THE REGISTRAR GENERAL'S REPORT TO THE HONORABLE THE  
COLONIAL SECRETARY.

Registrar General's Office,  
Sydney, 8 September, 1873.

SIR,

The Returns which are requisite for the compilation of the Statistical Register for the year 1872 being now as complete as possible, I have the honor to forward the same, and in doing so, will, by way of Report, direct attention to the principal facts disclosed by these Returns.

PART I.

POPULATION, IMMIGRATION, VITAL STATISTICS, &c.

The estimated Population on the 31st December, 1872, was 539,190 persons; Page 2. of whom 295,680, or 54·84 per cent., were males, and 243,510, or 45·16 per cent., were females. The males therefore were 52,170, or 9·68 per cent., in excess of the females. The total addition to the Population during the year was 20,008, or 3·85 per cent. The increase for the decade was 160,256, which gives an average of something over 16,000 per annum.

MARRIAGES, BIRTHS, AND DEATHS.

Under this heading will be seen a return of Marriages celebrated by each Page 3. denomination for the last ten years, and for a like period a return of Deaths registered in the Colony, with a return of Births and Deaths for each quarter of the year 1872. The total number of Marriages was 3,925, showing a small decrease on the previous year. The Births numbering 20,250, and slightly in excess of the year 1871. And there were 7,468 Deaths against 6,407 for the twelve months preceding.

IMMIGRATION.

In the way of Immigration from the United Kingdom there were only 842 Page 4. arrivals, of which 326 were at the public expense. The arrivals, including Inter-colonial and Foreign, numbered 24,107.

LUNATIC AND INVALID INSTITUTIONS.

The return of the Hospital for the Insane at Gladesville appears first among Page 4. these institutions. The total number of patients in this hospital, on 31st December, 1872, was 474, as against 485, at the same date, in the previous year. Fresh cases, to the number of 219, were admitted, and there were 49 re-admissions, making a total of 268. The number of patients under treatment was 753, which was reduced by discharges, removals, deaths, &c., to 474 on 31st December, 1872. The total cost of this establishment was £12,955 15s. 5d. The Asylum at Parramatta for Free Lunatics commenced the year with 728 inmates, the number admitted and re-admitted was 90, bringing up the total under care to 818. After deducting patients discharged, died, &c., there were 749 remaining with which to begin the new year.

In the Convict Lunatic Asylum at Parramatta there were 47 patients under treatment. The expenditure for free and convict Lunatics amounted to £13,446 7s. The returns of the Lunatic Asylum for Imbeciles and Institutions for Idiots at Newcastle, the Lunatic Receiving House at Darlinghurst, and Bay View House Lunatic Asylum, Cook's River Road, show the number of inmates to be 181; the amount expended from the public purse being £6,592 5s. 9d.

#### CHARITABLE INSTITUTIONS.

Page 8.

First in order under this heading come the Returns from the Sydney Infirmary and other Institutions of a like nature, which are situate in various parts of the Colony to the number of 40\*. The Sydney Infirmary began the year with 232 patients; the number of admissions for the year was 1,827; there were 1,625 discharged, and 216 died, leaving 218 at the close of the year. The number of persons who received out-door relief from this Institution was 5,856. The receipts for the year were £10,331 3s. 7d., of which the Government provided £7,530 3s. 4d., and the balance, £2,801 0s. 3d., came from voluntary contributions. The disbursements amounted to £10,955 6s. 4d.

In St. Vincent's Hospital there were 25 patients at the close of the year 1871; the number admitted during the year 1872 was 331, the deaths numbered 29, and 291 were discharged,—the total number left on 31st December being 36. This establishment is supported entirely by voluntary contributions, which amounted to £1,042 9s. 9d., of which £992 15s. 7d. were expended.

The number of patients admitted into the Country Hospitals of the Colony during the year 1872 was 2,343; the out-door patients to whom relief was afforded numbered 549. The amount received from the public purse was £6,990 8s. 5d., and from voluntary contributions £11,075 4s. 3d. The total which was received by all the Hospitals was £29,439 6s.,—private funds contributing £14,918 14s. 3d., and the Government, £14,520 11s. 9d.

The Asylums for the Infirm and Destitute, situate in Hyde Park (Sydney), Parramatta, and Liverpool, numbered 1,075 on the 31st December, 1871. There were 1,365 admitted, 1,148 discharged, and 241 deaths, which left 1,051 at the end of the year 1872. Those Asylums were wholly supported at the public expense, at a cost of £12,713 5s.

The Benevolent Asylums (two) had the care of 583 persons, including 343 children, during the year; and also afforded relief to a large number of families. The receipts amounted to £3,992 15s. 5d. from Government, and £1,688 9s. 9d. from private funds,—together, £5,681 5s. 2d.

The total amount paid for the support of the Asylums for the Infirm and Destitute, and the Benevolent Asylums, was £18,394 10s. 2d.

The Protestant and Roman Catholic Orphan Schools, Nautical School Ship "Vernon," Industrial and Reformatory Schools for Girls, were maintained at a cost of £12,522 16s. 10d.

The Asylum for Destitute Children at Randwick was assisted by the Government to the sum of £8,180 13s. 10d., and voluntary aid amounted to £3,197 8s. 5d., making a total of £11,378 2s. 3d.

The Sydney Female School of Industry was supported from private contributions to the extent of £1,212 13s. 9d.

The

\* Exclusive of 5 institutions closed.

## STATISTICS, 1872—REPORT.

3

The Deaf, Dumb, and Blind Institution received the sum of £999 18s. from voluntary aid, and £450 from Government,—in all £1,449 18s.

The receipts of Ragged Schools of Sydney from voluntary contributions were £847 7s. 6d.

The total amount received by Orphan and Industrial Schools was £27,410 18s. 4d., of which £21,153 10s. 8d. came from the public funds.

Miscellaneous Institutions were supported by private contributions to the amount of £4,311 8s. 3d.

The grand total receipts by Lunatic Asylums and the Charitable Institutions of the Colony for the year 1872 were £112,550 11s., obtained as follows:—

	£	s.	d.
From the Government ... ..	85,374	11	0
Voluntary contributions ... ..	27,176	0	0
	<hr/>		
	£ 112,550	11	0

The total disbursements amounted to £113,796 18s. 3½d.

## WAGES.

The average rates of wages for the year 1872, for the different classes of labour in the Colony, was as follows:—

	Without board and lodging—	With board and lodging—
Carpenters ... ..	8s. to 11s. per diem.	£60 to £80 per annum.
Smiths ... ..	8s. to 11s. do.	£60 to £80 do.
Wheelwrights ... ..	7s. to 10s. do.	£60 to £80 do.
Bricklayers ... ..	8s. to 11s. do.	£60 to £80 do.
Masons ... ..	8s. to 11s. do.	£60 to £80 do.
Farm labourers ... ..	...	£32 to £35 do.
Shepherds ... ..	...	£30 to £40 do.
Females—		
Cooks (plain) ... ..	...	£26 to £30 do.
Housemaids ... ..	...	£20 to £26 do.
Laundresses ... ..	...	£26 to £30 do.
Nursemaids ... ..	...	£20 do.
General house servants, dairywomen, &c. ... ..	...	£26 do.

## PART II.

## RELIGION, EDUCATION, CRIME.

Under the head Ecclesiastical will be found a return showing the number of Ministers of Religion, &c., of each denomination for the year 1872, from which it appears there were 503 Ministers, and 976 Churches and Chapels; with sittings for 158,557 persons. The average attendance is stated to be 144,942; and there was also an attendance of 34,403 persons at other places used for public worship. The number of Churches and Chapels had increased from 924 to 976, and there was a difference in the average attendance of over 2,700 persons in excess of the previous year.

SUNDAY

## SUNDAY SCHOOLS.

Page 17. These Schools had increased from 933 in 1871, to 962 in 1872; and the teachers numbered 6,234, which is 185 over the number recorded in 1871. The average number of scholars which was given in 1870 as 52,327, and in 1871 as 51,447, again shows a decrease in 1872, when they are given as 49,027. I do not place much reliance on the accuracy of these figures, but give them as collected from the returns furnished.

## DAY SCHOOLS.

Page 18. The number of Private Schools has decreased from 561 in 1871 to 551 in 1872, but those employed in tuition had increased by 55. The number of those receiving instruction was 16,286, viz.:—7,194 males and 9,092 females. As compared with the previous year there was an increase of 2,586 scholars.

Page 19. The Protestant and Roman Catholic Orphan Schools afford instruction to 597 children; the Randwick Institution to 795; and the Industrial Schools to 177,—the numbers in all these Schools being about the same as the previous year.

Page 19. Schools under the Council of Education were 902 in number, being an addition of 24 on the year 1871. The scholars, which in 1871 were 62,295, advanced to 88,487 in 1872, showing the large increase of 26,192,—the average number of pupils to each School being 98. The sum granted by the Government from the Treasury was £123,601 10s. 11d., which included £1,601 10s. 11d. from the Clergy and School Estate Revenue Fund. The amount of £50,148 19s. 9d. was received from voluntary contributions, fees, &c. The total from both sources amounted to £173,750 10s. 8d. To show more clearly the progress or otherwise made by each class of Schools, by comparing the year 1872 with the previous year the following figures are now given:—

	1871.			1872.		
	No. of Schools.	No. of Teachers.	No. of Scholars.	No. of Schools.	No. of Teachers.	No. of Scholars.
Public Schools ... ..	378	609	31,348	396	676	46,458
Provisional do. ... ..	181	150	5,185	191	194	6,073
Half Time do. ... ..	96	40	1,544	101	47	1,792
	655	799	38,077	691	917	54,923
Denominational Schools—						
Church of England ... ..	104	204	11,517	98	203	16,590
Roman Catholic ... ..	86	162	9,447	85	162	13,065
Presbyterian ... ..	18	33	1,772	16	26	2,106
Wesleyan ... ..	14	24	1,326	11	21	1,539
Hebrew ... ..	1	3	156	1	3	264
	223	426	24,218	211	415	33,564

It will be seen that the increase in the number of scholars in the Public Schools was 16,846, and in the Denominational Schools, 9,346; the principal additions being in the Church of England and Roman Catholic Schools, which were 5,073 and 3,618 respectively. Of the total number of scholars in 1871, 61·12 per cent. attended Public Schools, and 38·88 per cent. Denominational Schools. In 1872 the percentage was for the former 62·07 and for the latter 37·93.

The number of students in the University of Sydney was 39. The usual amount of £5,000 was granted by the Government, and £2,265 0s. 9d. was obtained from other sources.

The

The Colleges of St. Paul's and St. John's had each 5 students, the former receiving £975, of which £500 was from the public purse, and the latter £731 2s. 3d., the greater portion of which, viz., £608 18s. 3d., was supplied by the Government.

The Sydney Grammar School, with 259 scholars, was assisted by the Government with £1,500, and £3,475 5s. 8d. was received from school fees.

CRIME.

Page 36.

The return of the number of Supreme and Circuit Court cases during the year 1872 shows that there were 309 committals, of which 235 were for Felonies and 74 for Misdemeanors. As compared with the previous year there is a decrease of 36 cases. Out of the above number of committals 243 went to trial, which resulted in 172 convictions and 70 acquittals. In Quarter Session cases the committals numbered 764, being an increase of 25 on the previous year. The cases which were sent to trial were 691, and 471 convictions were obtained, the remaining 220 being acquittals. From the Summary Jurisdiction Returns it will be seen that \*18,928 persons were taken into custody during the year 1872, the males numbering 14,684, and females 4,244. The convictions were 13,552, committals 1,049, and discharges 4,325. The total cases of persons taken into custody for drunkenness was 9,727, consisting of 7,308 males, and 2,419 females. As compared with the previous year, the increase in these cases was 1,255, viz.,—1,255 taken into custody, 853 convictions, and 402 dismissals.

PART III.

TRADE AND COMMERCE.

IMPORTS AND EXPORTS.

The total value of Imports for the year 1872 amounted to £9,208,496, being Page 48. at the rate of £17 9s. per head of the population† at the middle of the year. As compared with the previous year, there is a decrease of £401,012, as will be seen by the following figures:—

	1871.	1872.
	£	£
From United Kingdom ... ..	3,252,617	3,728,457
„ British Colonies ... ..	5,528,104	4,652,853
„ Foreign States ... ..	828,787	827,186
	<u>£9,609,508</u>	<u>£9,208,496</u>

There was therefore an increase in the value of Imports from the United Kingdom of £475,840, but British Colonies show a decrease of £875,251, and there was a trifling decrease from Foreign States.

I shall now show the value of the Imports from the Australian Colonies and New Zealand, distinguishing those received Seaward and Overland:—

	Seaward.	Overland.	Total.
	£	£	£
From Victoria ... ..	724,596	464,185	1,188,781
„ South Australia ... ..	501,183	152,720	653,903
„ Queensland ... ..	1,786,544	4,561	1,791,105
„ Tasmania ... ..	103,018	.. ..	103,018
„ New Zealand ... ..	326,369	.....	326,369
	<u>£3,441,710</u>	<u>£621,466</u>	<u>£4,063,176</u>

Page 48.

The

\* The apparent discrepancy of two between this and the following numbers is accounted by their being brought before the Magistrates, and remanded to other Benches to be dealt with.

† 527,682.

The increase or decrease of each of these Colonies is as follows :—

	Increase. £	Decrease. £
From Victoria ... ..	.....	509,455
„ South Australia ... ..	.....	70,922
„ Queensland ... ..	193,315	.....
„ Tasmania ... ..	.....	3,984
„ New Zealand ... ..	.....	555,132
Total ... ..	<u>£193,315</u>	<u>£1,139,493</u>

The total decrease from the above Colonies was £946,178, while other British Colonies show an increase of £70,927.

The total value of Exports for the year 1872 amounted to £10,447,049, being at the rate of £19 15s. 11½d. per head of population, and a decrease on the year 1871 of £797,983, as the following figures will prove :—

	1871. £	1872. £
To United Kingdom ... ..	4,378,281	4,926,728
„ British Colonies ... ..	6,508,802	5,146,018
„ Foreign States ... ..	357,949	374,303
	<u>£11,245,032</u>	<u>£10,447,049</u>

Exports to the United Kingdom had increased by £548,447, but to British Colonies there was a decrease of £1,362,784, and an increase to Foreign States of £16,354.

The value of Exports to the Australian Colonies and New Zealand will be seen to be as follows, to the Seaward and Overland :—

	Seaward. £	Overland. £	Total. £
Victoria ... ..	734,569	2,123,622	2,858,191
South Australia ... ..	137,682	304,334	442,016
Queensland ... ..	1,010,259	13,522	1,023,781
Tasmania ... ..	54,993	.....	54,993
New Zealand ... ..	228,930	.....	228,930
Western Australia ... ..	565	.....	565
Total ... ..	<u>£2,166,998</u>	<u>£2,441,478</u>	<u>£4,608,476</u>

The total decrease of Exports to these Colonies was £1,469,179.

The following figures will show the increase or decrease respectively :—

	Increase. £	Decrease. £
To Victoria ... ..	.....	1,719,368
„ South Australia ... ..	.....	48,630
„ Queensland ... ..	323,371	.....
„ Tasmania ... ..	31,944	.....
„ New Zealand ... ..	.....	56,533
„ Western Australia ... ..	37	.....
Total ... ..	<u>£355,352</u>	<u>£1,824,531</u>

The grand total of Exports over Imports was £1,238,553.

## STATISTICS, 1872—REPORT.

7

## SHIPPING.

From the Shipping Returns it is found that during the year 1872 the number Page 107. of vessels which entered the various ports of the Colony was 2,011, of which 1,245 were cargo-bearing, and 766 were in ballast. The nationality and tonnage were as follows:—

	No.	Tonnage.
From Great Britain ... ..	199	172,034
„ British Possessions ... ..	1,674	513,446
„ Foreign States ... ..	138	89,010
	<hr/>	<hr/>
	2,011	774,490
	<hr/>	<hr/>

The number and tonnage of vessels entering each Port of the Colony during the year will be seen by the following figures:—

	No.	Tonnage.
Sydney ... ..	1,022	418,164
Newcastle ... ..	876	342,514
Grafton ... ..	35	4,251
Eden ... ..	10	3,883
Richmond ... ..	45	5,050
Tweed River ... ..	23	628
	<hr/>	<hr/>
	2,011	774,490
	<hr/>	<hr/>

Vessels outward-bound from the various Ports of the Colony during the year 1872 numbered 2,091, of which 2,061 were cargo-bearing, and 30 left in ballast.

The following figures give the nationality and tonnage—

	No.	Tonnage.
Great Britain ... ..	212	173,184
British Possessions ... ..	1,734	542,077
Foreign States ... ..	145	98,289
	<hr/>	<hr/>
	2,091	813,550
	<hr/>	<hr/>

The total number of vessels with their tonnage which cleared from each of the Ports of the Colony during the year were—

	No.	Tonnage.
Sydney ... ..	854	360,735
Newcastle ... ..	1,092	427,845
Grafton ... ..	55	6,977
Eden ... ..	31	13,136
Richmond ... ..	33	4,122
Tweed River ... ..	26	735
	<hr/>	<hr/>
	2,091	813,550
	<hr/>	<hr/>

The number of vessels built in the Colony in the year 1872 was 25, of an Page 111. aggregate of 1,999 tons. They consisted of 1 barque, 1 brig, 9 schooners, 5 ketches, 2 cutters, and 7 steamers. The number of vessels registered during the year was 66, of an aggregate of 10,121 tons.

## PART IV.

## MILLS AND MANUFACTORIES.

Page 126. The return of the number of Mills for grinding and dressing grain shows that there were 188 in the Colony. The motive power of 159 of these was steam, 13 water, 6 wind, and 10 horse; of these, 134 were situate in the Settled Districts, and 54 in the Pastoral Districts.

## MANUFACTORIES, WORKS, &amp;C.

Page 127. The total number of these in the Colony was 7,769, as against 6,827 in the previous year. First on the list are Manufactories and Works connected with, or dependent on, Agriculture, which will be found to number 5,940; in this category are 34 establishments for the manufacture of tobacco; the quantity produced was 8,580 cwt. There were also 71 Sugar-mills, which manufactured 34,207 cwt. and 143,795 gallons of molasses,—the weight of cane crushed being 712,569 cwt.

In the working on raw materials, the production of the pastoral interest, there were 381. Under this head will be seen 6 Woollen Manufactories, which turned out 201,260 yards of cloth and tweeds. There were also 35 Soap and Candle Manufactories, producing 80,732 cwt. of the former article, and 13,824 of the latter, and 44 Boiling-down Establishments, in which 71,321 sheep and 1,978 horned cattle were slaughtered,—the produce being 45,986 cwt. of tallow, of which a large portion is obtained from the refuse from butchers' shops in the Metropolitan District.

The manufacture of food, of which the raw material is not the produce of agriculture, and of articles of drink, employed 214 establishments. In this class are Sugar Refineries and Distilleries. The former produced 134,380 cwt. of sugar, and the latter 36,059 gallons of proof rum.

There were also 531 Building Materials and Plastic Manufactories, and 137 Machine Manufactories, Brass, Lead, and Iron Works. The remaining 566 were Miscellaneous Works and Manufactories, which will be found on reference to the return.

## PART V.

## PRODUCTION.

Page 136. The returns of this portion of the Statistics begin with the quantity and value of Gold received by Escort from the several Gold Fields of the Colony, during the year 1872, and the comparative quality and value of the Gold received from each Gold Field, as assayed by the Mint.

The quantity received was 392,186 ounces, valued at £1,513,186, which shows an increase on the year 1871, of 95,258 ounces, of the value of £369,405.

The Western Gold Fields appear to have chiefly contributed to this increase, as will be seen by the following figures:—

Gold Fields.	1871.		1872.	
	Ozs.	Value.	Ozs.	Value.
Western	209,394	811,026	307,267	1,194,324
Southern	73,262	278,045	74,808	280,679
Northern	14,272	52,710	10,111	38,183
Total	296,928	£1,143,781	392,186	£ 1,513,186

More

More than 78 per cent. of the quantity was the yield of the Western Gold Fields.

The total value of Gold received into the Mint during the last ten years by Escort was £10,892,394.

#### COAL.

The number of Coal Mines which were worked during the year 1872 was 22, producing 1,012,426 tons, valued at £396,197. As compared with 1871 there was an increase both in quantity and value of 113,642 tons and £79,857 respectively. The export trade during the year was 669,110 tons. The largest quantities shipped were as follows :—

	Tons.
To Victoria... ..	190,975
„ United States ... ..	109,107
„ New Zealand ... ..	107,014
„ South Australia ... ..	79,053
„ Hong Kong ... ..	68,035
„ Shanghai ... ..	34,091
„ Tasmania ... ..	10,463
„ Mauritius ... ..	10,308

The total export exceeded that of 1871 by 103,681 tons.

#### COPPER.

Of Copper Mines there were 16\* in operation. The quantity of ore raised was 1,885 tons, valued at £54,643. Page 137.

#### TIN.

Of this metal 718 tons were raised of the value of £48,832. Page 137.

#### KEROSENE.

The quantity of Shale obtained during the year was 11,040 tons, valued at £28,700. Page 137.

The quantity in the year 1871 was 14,700 tons, so that there was a decrease of 3,660 tons.

#### AGRICULTURE.

From the Summary of Agricultural Returns it will be found that the total number of freeholders of land exceeding one acre in extent was 20,118, showing an increase of 882 on the year 1871. Page 138.

There were also 4,109 persons who were both freeholders and leaseholders of land exceeding an acre.

Leaseholders numbered 8,264, of which 6,998 were in the Settled Districts and 1,266 in the Pastoral Districts.

The extent of holdings over an acre possessed by freeholders was 6,306,194 acres, and of leaseholders 3,482,534 acres.

As compared with the previous year, the increase in acreage of freeholds amounted to 1,319,806 acres, and of leaseholds to 613,855 acres.

The extent of freehold land in cultivation was 322,922 acres, and of leasehold 131,712 acres. There was an increase on the previous year in the first-named of 44,675 acres, and a decrease in the last-named of 7,892 acres.

Freehold land enclosed but not under cultivation shows 3,493,966 acres, and leasehold 1,640,423 acres. In

\* Including two mines, the operations of which no information could be obtained.

In both classes the increase on the previous year was 858,067 acres and 354,818 acres respectively; the unenclosed freehold land numbered 2,489,305 acres, and leasehold 1,710,398 acres.

This class of holdings also shows an increase of 417,064 acres and 266,929 acres respectively.

Page 146.

The following comparative table shows the increase or decrease in the acreage of the various crops under cultivation, as well as the produce, for the years ending 31st March, 1872 and 1873.

Crops.	1872.		1873.		Increase.		Decrease.

\* Exclusive of the produce of 748 acres of Sugar-cane, grown in the Grafton District, which could not be ascertained.

From the foregoing table it will be seen that the area of land under wheat cultivation was 177,551 acres, which produced 2,898,463 bushels, being an increase on the previous year of 23,521 acres and 668,821 bushels. The average yield per acre was over 16 bushels.

The number of acres under the maize crop, which in 1871 was 119,956 acres, had decreased in 1872 to 116,745 acres,—the produce of the former year being in excess of the latter year by 31,015 bushels. The average yield per acre was a trifle over 34 bushels.

The crop of Barley had increased by 15,424 bushels, the figures for 1871 being 55,284 bushels. The average yield was 19 bushels to the acre.

Oats show a decrease of 9,920 bushels.

Potatoes had increased by 354 tons, and Hay, by 28,470 tons. The yield of Potatoes was about 3 tons per acre.

The value of Wheat, Flour, and Bread imported into the Colony during the year 1872 amounted to £429,152, which is a decrease on the previous year of £149,090. The principal market from which these Breadstuffs was drawn was from South Australia, to the value of £325,517, but large as this sum appears it is a decrease of £159,304 on the previous year.

The

## STATISTICS, 1872—REPORT.

11

The following table shows the importations of Wheat and Flour, with estimated value and quantity, and rate per head of the population, for the last five years :—

Year.	Popu-lation.	Imports.				Colonial Produce.				Value of Imports and Colonial Produce per head of Popu-lation.	Exports.			
		Wheat.	Flour and Bread.	Esti-mated Value.	Value of Imports per head of Popu-lation.	Wheat.	Average price per bushel in Sydney.	Esti-mated value.	Value of Colonial Produce per head of Popu-lation.		Wheat.	Flour and Bread.	Esti-mated Value.	Value of Exports per head of Popu-lation.
		bushels	tons	£	£ s. d.	bushels	s. d.	£	£ s. d.	£ s. d.	bushels	tons	£	s. d.

\* Ranged from 5s. to 5s. 6d.; calculations made on 5s. 3d.

## VINEYARDS.

The quantity of land under the cultivation of the vine was 4,090 acres, of which 2,568 acres were used for wine-making, the produce being 451,450 gallons of Wine, and 966 gallons of Brandy. Grapes for table-use occupied 665 acres, which produced 573 tons of Fruit, and 866 acres were unproductive. Page 138.

## LIVE STOCK.

In the Live Stock Returns for the year ended 31st March, 1872, it will be seen that there was a considerable decrease in all kinds of Stock, but the returns for the year ended 31st March, 1873, show that the reverse is the case, as follows :— Page 147.

Year ended 31 March.	Horses.	Horned Cattle.	Sheep.	Pigs.
	No.	No.	No.	No.
1872 .....	304,100	2,014,888	16,278,697	213,193
1873 .....	328,408	2,287,660	17,560,048	218,904
Increase .....	24,308	272,772	1,281,351	5,711

## PART VI.

## MONETARY AND FINANCIAL.

## COIN AND BULLION.

The amount of British Coin and Australian Sovereigns in the Mint and Banks of the Colony on 31st December, 1872, was £2,693,944 5s. 9d.; and of Bullion £159,102 18s. 11d.; making a total of £2,853,047 4s. 8d. The increase on the previous year was £330,659 6s. 9d. Page 191.

## PAPER CURRENCY IN CIRCULATION.

The value of Notes issued by the various Banks was £947,816,—the increase on the previous year being £194,031. Page 192.

On pages 193 and 194 will be found a general Abstract of the sworn Returns of the Average Assets and Liabilities, and of the Capital and Profits of the Banks of the Colony for each Quarter of the year 1872.

SAVINGS'

## SAVINGS' BANK.

Page 195. The return of the New South Wales Savings' Bank shows the number of Depositors, Amount of Deposits, Investments, &c., on 31st December, 1872.

The total number of Depositors was 25,561, at whose credit there was a sum of £1,028,737 12s. 6d. The increase in the number of Depositors on the year 1871 was 2,134, and in the amount of Deposits £97,049 2s. 8d. The Sydney Depositors had increased from 18,727 in 1871, to 20,193 in 1872; and Country Depositors from 4,700 to 5,368. The amount of Deposits in Sydney in 1872 was £795,693 against £742,616 in the previous year, and in the country, £233,043 against £189,071.

Page 196. The Government Savings Bank show that the year 1872 was entered on with 953 accounts, and that during the year the number of accounts opened was 2,271. The accounts closed numbered 633, leaving 2,591 at the end of the year. The total number of Deposits during the year was 8,415, to the value of £109,343 0s. 5d., and of withdrawals 2,059, to the value of £28,655 4s. 8d., the balance to credit of Depositors at the end of the year being £80,687 15s. 9d.

## BRANCH ROYAL MINT.

Page 197. The value of gold received by the Mint during the year 1872 amounted to £2,063,774 12s. 10d., being a decrease on the previous year of £823,827 3s. 7d.

The Coin and Bullion issued for the same period was of the value of £2,091,728 2s. 1d., showing a decrease of £778,690 11s. The revenue of the Establishment was £17,789 4s. 7d.

The following comparative table shows from whence the Mint was supplied, and also points out the increase or decrease respectively.

	1871.			1872.			Increase.			Decrease.

## RAILWAYS.

Page 198. The number of miles open for Railway Traffic at the end of the year 1872 was 396, being an increase of 52 miles on the previous year. The number of Season Tickets issued was 274,414, and other Passenger Tickets 753,910, in all, 1,028,324,—being a decrease on the year 1871 of 39,362. The revenue obtained from this source was £159,844 16s. 9d., as against £125,881 7s. 1d. for the previous year, the increase being £33,963 9s. 8d. The carriage of goods produced £261,028 10s. 8d., the weight of goods being 825,359 tons, the former being £35,201 19s. 8d., and the latter 83,375 tons in excess of the year 1871.

The sum of £4,115 12s. 7d. was received from rents and miscellaneous sources.

The total earnings from Passenger and Goods Traffic amounted to £424,989, showing an increase on the previous year of £69,667 3s. The total expenditure was £207,917 14s., and the net earnings were £218,837 15s. 7d.

The

The Southern Line shows the net earnings of the year to be £65,629 10s. 5d., which is an increase on the previous year of £12,149 2s. 9d.

The net receipts of the Western Line were £107,652 0s. 3d., being an excess on the previous year of £42,251 7s. 6d.

On the Richmond Line there was an excess of expenditure over receipts to the amount of £1,780 10s. 5d.

The net earnings on the Northern Line exceeded those of 1871 by £4,725 1s. 6d., the figures for 1872 being £45,169 12s., and for 1871 £40,444 10s. 6d.

#### ELECTRIC TELEGRAPHS.

At the close of the year 1872 there were 6,114 miles of wire on which the sum of £212,255 9s. 8d. has been expended in erection. Page 199.

The number of stations in the Colony for the transmission of messages was 92, and the messages transmitted numbered 335,822, the value of which amounted to £45,019 16s. 3d.

The number of miles of wire had increased by 535 miles. The increase in the number of Telegrams on the previous year was 117,292, and in their value £15,999 19s. 4d. The value of British-Australian Telegrams was £2,671 5s. 6d., and balances for Intercolonial and Guaranteed Business amounted to £1,904 10s. 4d.

#### POST OFFICES, LETTERS, &c.

The number of Post Offices in the Colony at the end of the year 1872 was 622, which employed 761 persons. The number of offices had increased by 52. Page 201.

The number of Letters transmitted through the Post was 8,654,000; of Newspapers 4,841,200; and of Packets 170,500. The increase on 1871 was 1,144,500 Letters, 849,100 Newspapers, and 12,200 Packets.

Foreign Letters numbered 1,244,700; Inland Letters, 6,699,900; and Town Letters, 709,400. Newspapers to Foreign Parts numbered 1,274,000, and those despatched Inland, 3,567,200. The total income was £96,477 3s. 4d., and the total expenditure, £87,309 13s. 4d.

#### MONEY ORDERS.

There were 87,435 Money Orders issued during the year, to the value of £393,882 2s. Page 202.

#### MILITARY AND NAVAL.

The amounts expended by the Colony during the year, under the heads Military and Naval, were £57,431 17s. and £4,426 19s. 6d. respectively,—the detailed statements of which will be found on reference to return No. 138. The expenditure by the Imperial Government on both services was £38,649 7s. 1d. Page 205.

## PART VII.

## MISCELLANEOUS.

Page 212. The total amount expended on the various Public Works of the Colony in the year 1872 was £475,814 2s. 7d., which was distributed as follows:—

	£	s.	d.
Railways ... ..	182,955	4	2
Electric Telegraphs ... ..	12,329	8	2
Roads, Bridges, &c. ... ..	130,488	4	9
Harbours and Rivers ... ..	67,121	3	9
Public Buildings ... ..	82,920	1	9
	<u>£475,814</u>	<u>2</u>	<u>7</u>

## METEOROLOGY.

Page 227. An abstract of Meteorological Observations taken at the Sydney Observatory in the year 1872, and other results obtained from various stations in the Colony, will be found on returns No. 144 to 147.

## MORTGAGES.

Page 240. From the return of Mortgages on Land, it will be seen that the number of these securities registered during the year 1872 was 1,331, securing £611,857 5s. 10d. Discharges of Mortgages numbered 634, of a total value of £392,697 15s. 9d. As compared with 1871, the decrease in the number of Mortgages was 147, and in value to the amount of £85,583.

## LIENS ON WOOL.

Page 241. The amount secured on Preferable Liens on Wool was £377,032 1s., which was a decrease on the previous year of £74,894 12s. 5d. It must be borne in mind, however, that when any sum has been secured both by a lien on Wool and by a mortgage of the Sheep, the amount is included under the head of mortgages only.

## MORTGAGES ON LIVE STOCK.

Page 241. Securities of this kind show that the amount lent was £1,076,432 12s. 2d., and discharges were effected to the value of £1,245,318 10s. 3d.

## LIENS ON GROWING CROPS.

Page 242. Liens on growing crops show a total of £11,795 13s. 5d., being a decrease on the previous year of £1,374 14s. 3d.

## REAL PROPERTY ACT.

Page 242. Under this Act there were during the year 229 applications to bring land under its provisions. The total area included in these applications was 35,459 acres, valued at £157,376.

The total amount collected as fees was £3,460, of which £2,865 were paid into the Revenue, £267 were received as fees to the Land Titles Commissioners, and £328 were paid into the Assurance Fund.

The number of Crown Grants issued was 3,637, of a total area of 173,922 acres, for which the purchase money obtained was £187,783. From this source, the sum of £392 was added to the Assurance Fund. The amount secured by mortgage during the year was £389,346.

The total area of land under the provisions of this Act, on the 31st December, 1872, was 1,707,357 acres, valued at £4,096,630.

## INSOLVENCIES.

## INSOLVENCIES.

There were 492 Insolvents during the year. The liabilities, as shown in their schedules, amounted to £370,035, and the deficiency was £242,817. Page 245.

## MINERS' RIGHTS AND BUSINESS LICENSES.

During the year 1872 there were 30,629 Miners' Rights issued, and 1,723 Business Licenses. The number of Leases issued of auriferous tracts was 5,013. Page 245.

## PUBLICANS' LICENSES.

From this return it appears there were 2,403 Licenses issued during the year 1872, being an increase of 161 on the previous year. Page 247.

## VOLUNTEER FORCE.

The total strength of the Volunteers was 4,186 members, including the Cadets and Engineer Corps, the former numbering 786, and the latter 64. The total expenditure was £10,092 0s. 2d. There were also four Companies of the Naval Brigade in Sydney and one at Newcastle—of a total strength of 252 men; the cost of maintenance was £3,933. Page 248.]

## POLITICAL FRANCHISE.

The number of Electors on the Rolls of the several Electoral Districts of the Colony at the General Election in 1872 was 151,798, which includes an estimated number of 31,000 voters who are electors on the Gold Fields. The return also shows the number of persons who recorded their votes at the last General Election. Page 251.

## LAND SALES.

The total amount realized on the sale of Land, otherwise than conditionally, was £177,062. Of this sum £148,267 was derived from Land sold in the Pastoral Districts, and £28,794 from the Settled Districts. The total area alienated was 166,833 acres. Comparing these figures with the previous year it will be seen that there was an increase of £77,103 in the sum obtained, and an additional area of 78,196 acres alienated. Page 253.

Conditional purchases of Land show a very large increase on the previous year, as will be seen from the following: The gross amount realized was £257,765, being an excess of £112,696, and by far the largest sum yet received in any one year. The number of selections made during the year had increased from 4,751 in 1871, to 8,281 in 1872; and the area of Land so selected, from 358,682 acres to 749,586 acres. The gross amount realized was made up as follows:—For deposit, £187,396; for balance of purchase money, £24,692; and for interest, £45,676.

Reviewing the Statistics for the year 1872, the Colony has much cause for gratulation for the advance which has been made, and I hope that on a future occasion I shall be able to report as great if not greater progress for the current year.

I have the honor to be,

Sir,

Your obedient Servant,

E. G. WARD,

Registrar General.

STATISTICAL VIEW OF THE PROGRESS OF THE COLONY OF NEW SOUTH WALES, FROM THE YEAR 1821 TO 1872 INCLUSIVE.

Main statistical table with columns for Year, Population, Births, Marriages, Deaths, Schools, Convictions, Mills, Manufacturing, Number of Acres Under Crop, Live Stock (Horses, Horned Cattle, Sheep, Pigs), Coal Raised (Quantity, Value), Land Sales (Quantity, Amount Realized), Shipping (Inwards, Outwards), Exports (Wool, Tallow, Gold, Coal), Value of Total Imports/Exports, Revenue (General, Loans, Ordinary, Loans), and Expenditure (Ordinary, Loans).

\* Exclusive of the overland traffic.
† The Census was taken in 1821, 2, 3, 5, 8, 33, 6; population as above.

2nd March, 1846, " 189,609
1st March, 1851, " 187,343
1st March, 1856, " 265,359
7th April, 1861, " 350,860
2nd April, 1871, " 603,881

The population from the year 1836 is estimated up to the end of each year.
† The reduction in the year 1831 was caused by the separation of Port Phillip from New South Wales.

\* The reduction in the year 1859 was caused by the separation of Queensland from New South Wales.
† Lands conditionally sold under the " Crown Lands Alienation Act of 1861."

Price of land in 1825, 7s. 6d. to 10s. per acre.
The minimum price of land was 6s. per acre from 1832 to 1840; 12s. per acre, 1840-2. (20s. in Port Phillip, in 1841). 20s. per acre from 1843 to present time.
In 1822, 3, 4, 5, the accounts were kept in Spanish dollars and British money; generally in Spanish dollars.
Transportation ceased in 1840.

The Return of the Revenue and Expenditure previous to 1850 cannot be accurately ascertained. In addition to the above Expenditure, the Imperial Government paid large sums for the maintenance of Convicts and Military.

Gold discovered in May, 1851.
The Loans Expenditure previous to 1853 cannot be shown.

\* Includes £270,543 proceeds of Treasury Bills, issued under the Act of Council 27th Vic., No. 8, to cover deficit of 1853 and previous years.
† The Revenue and Expenditure columns include " Church and School Lands Revenue," " Police Reward Fund," " Police Superannuation Fund," and " Superannuation Fund," 27th Vic., No. 11.

‡ Includes Trust Fund and Treasury Bills.
§ Includes the Gold received at the Mint from other Colonies, and converted into Bars and Coins.
† Inclusive of the Overland Traffic.

# STATISTICAL REGISTER.

\* 1869—The Government Immigration Regulations were cancelled in 1867; immigration therefore in fact ceased in 1853, but at the commencement of 1869 47 individuals arrived, being those who failed to avail themselves of their embarkation orders in the early part of 1868.

NOTE.—1872.—The total number of persons arriving in the Colony was 24,107. This number includes *Inter-colonial* as well as *Foreign* arrivals.

\* 1 case postponed.

NOTE.—In the year 1872 many prisoners tried for one offence were convicted of another; therefore, in several instances the number of convictions for certain offences appears actually larger than the number of trials.

NOTE.—The large apparent decrease in the export of Wool *via* Moama is caused by the fact that under the regulations issued by the Collector of Her Majesty's Customs, all wool brought by steamer to Echuca from the Murrumbidgee, Edward, and Lachlan Rivers, is ordered to be included in the Swan Hill return, and not, as in former years, in the Moama return.

Act of Council under which levied.	SPECIFICATION OF TAXES, DUTIES, &c.— <i>continued.</i>	Authority under which originally established.	At what Period.
<p>Act of the Parliament of New South Wales, 29 Vic., No. 6, amended by Acts 31 Vict., No. 26, and 34 Vict., No. 20. (To continue in force until 31 December, 1874) .. ..</p>	<p style="text-align: center;">STAMP DUTIES—<i>continued.</i></p> <p style="text-align: center;">SCHEDULE III—<i>continued.</i></p> <p>Also for the clear residue (when devolving to one person) and for every share of the clear residue (when devolving to two or more persons (of the personal estate of any person who shall have died after the passing of this Act (after deducting debts, funeral expenses, legacies, and other charges first payable thereout), whether the title to such residue or any share thereof shall accrue by virtue of any testamentary disposition, or upon a partial or total intestacy, where such residue or share of residue shall be of the amount or value of £20 or upwards, and where the same shall be paid, delivered, retained, satisfied, or discharged after the passing of this Act.</p> <p style="text-align: right;">£ s. d.</p> <p>And also for the clear residue (when given to one person) and for every share of the clear residue (when given to two or more persons) of the moneys to arise from the sale, mortgage, or other disposition of any real estate directed to be sold, mortgaged, or otherwise disposed of by any will or testamentary instrument of any person who shall have died after the passing of this Act (after deducting debts, funeral expenses, legacies, and other charges first made payable thereout, if any) where such residue or share of residue shall amount to £20 or upwards, and where the same shall be paid, retained, or discharged after the passing of this Act.</p> <p>Where any such legacy or residue, or any share of such residue, shall have been given or have devolved to or for the benefit of a child of the deceased, or any descendant of a child of the deceased, or to or for the benefit of the father and mother or any lineal ancestor of the deceased, a duty at and after the rate of one pound per centum on the amount or value thereof .. £1 7<sup>⁄</sup> centum</p> <p>Where any such legacy or residue, or any share of such residue, shall have been given, or have devolved to or for the benefit of a brother or sister of the deceased, or any descendant of a brother or sister of the deceased, a duty at and after the rate of two pounds per centum on the amount or value thereof .. .. £2 7<sup>⁄</sup> centum</p> <p>Where any such legacy or residue, or any share of such residue, shall have been given or have devolved to or for the benefit of a brother or sister of the father or mother of the deceased, or any descendant of a brother or sister of the father or mother of the deceased, a duty at and after the rate of three pounds per centum on the amount or value thereof .. .. £3 7<sup>⁄</sup> centum</p> <p>Where any such legacy or residue, or any share of such residue, shall have been given or have devolved to or for the benefit of a brother or sister of a grandfather or grandmother of the deceased or any descendant of a brother or sister of a grandfather or grandmother of the deceased, a duty at and after the rate of five pounds per centum on the amount or value thereof .. .. £5 7<sup>⁄</sup> centum</p> <p>And where any such legacy or residue, or any share of such residue, shall have been given or have devolved to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described or to or for the benefit of any stranger in blood to the deceased a duty at and after the rate of six pounds per centum on the amount or value thereof.. £6 7<sup>⁄</sup> centum</p> <p>And all gifts of annuities, or by way of annuity, or of any other partial benefit or interest out of any such estate or effects as aforesaid, shall be deemed legacies within the intent and meaning of this Schedule.</p> <p>And where any legatee shall take two or more distinct legacies or benefits under any will or testamentary instrument which shall together be of the amount or value of £20 each shall be charged with duty, though each or either may be separately under that amount or value.</p> <p>Exemptions—  Legacies and residues or share of residue of any such estate or effects as aforesaid given or devolving to or for the benefit of the husband or wife of any person who shall have died or who shall die subsequently to the first day of July one thousand eight hundred and sixty-five.  Legacies given for religious, educational, or charitable purposes.</p>	<p>29 Vict., No. 6 ..</p>	<p>20 June, 1865.</p>

Act of Council under which levied.	SPECIFICATION OF TAXES, DUTIES, &c.— <i>continued.</i>	Authority under which originally established.	At what Period.	
<b>STAMP DUTIES—<i>continued.</i></b>				
SCHEDULE IV.				
<i>Succession Duties.</i>				
Act of the Parliament of New South Wales, 29 Vic., No. 6, amended by Acts 31 Vict., No. 26, and 34 Vict., No. 20. (To continue in force until 31 December, 1874) .. ..	Where the successor shall be the lineal issue or lineal ancestor of the predecessor, a duty upon the value of the succession at the rate of .. .. .	£1¼ centum	29 Vict., No. 6 .. 20 June, 1865.	
	Where the successor shall be a brother or sister, or a descendant of a brother or sister of the predecessor, a duty upon the value of the succession of .. .. .	£2¼ centum		
	Where the successor shall be a brother or sister of the father or mother, or the descendant of a brother or sister of the father or mother of the predecessor, a duty upon the value of the succession of .. .. .	£3¼ centum		
	Where the successor shall be a brother or sister of the grandfather or grandmother, or a descendant of the brother or sister of the grandfather or grandmother of the predecessor, a duty upon the value of the succession of .. .. .	£5¼ centum		
	Where the successor shall be in any other degree of collateral consanguinity to the predecessor than is hereinbefore described, or shall be a stranger in blood to him, a duty upon the value of the succession of .. .. .	£6¼ centum		
	Exemptions— Where the whole succession or successions derived from the same predecessor, and passing upon any death to any person or persons shall not amount in money or principal value to £100, no duty shall be payable; and no duty shall be payable upon any successions which, as estimated according to the provisions of this Act, shall be of less value than £20 in the whole, or by any person in respect of a succession who, if the same were a legacy bequeathed to him by the predecessor, would be exempted from the payment of duty in respect thereof by Schedule II. All successions acquired in trust for religious, educational, or charitable purposes.

Act of Council under which levied.	SPECIFICATION OF TAXES, DUTIES, &c.— <i>continued.</i>	Authority under which originally established.	At what Period.																																																																																	
Governor General and Executive Council ..	<p style="text-align: center;"><b>FITZ ROY DRY DOCK, COCKATOO ISLAND.</b></p> <p style="text-align: center;"><i>Conditions.</i></p> <p>All vessels belonging to H. M. Navy, the Colonial Government, and men-of-war of other nations, will be admitted to repair in the Fitz Roy Dock, Sydney Harbour, free of any dock dues or rates, but they will be required to repay all actual expenditure of stores, wages, and material.</p> <p>All other vessels will be liable to a minimum dock-rate of 6d. per ton per diem, if of 1,500 tons register or upwards, and an additional <math>\frac{1}{4}</math>th of a penny per ton for every decrease of 50 tons or portion of 50 tons down to a maximum rate of 9d. per ton for a vessel of 300 tons, and all below, as set forth in the scale attached hereto.</p> <p>Double rates will be charged for the day of docking.</p> <p>The Dock dues will include and cover the cost of pumping, shoring, wedges, and blocking, and the cost of all labour connected with opening and closing the Dock, and all incidental labour connected with the actual operation of docking a vessel.</p> <p>No vessel will be permitted to enter the Dock with gunpowder or combustible ammunition on board.</p> <p style="text-align: center;"><i>Workshops and Machinery.</i></p> <p>Vessels in Dock and private engineering establishments will be permitted to avail themselves of any portion of the machinery of the Dockyard workshops on payment of a rate per hour; preference being always given to the requirements of a vessel in Dock. These charges will be in addition to Dock dues, and in accordance with the rates mentioned in the subjoined Schedule.</p> <p>The rate for the machinery will include the cost of putting and maintaining the machine in motion, the use of the 20-ton overhead traversing crane, and all tools belonging to the Machine in use, but nothing further.</p> <div style="text-align: center;"> <p><b>DOCK DUES.</b></p> <p><i>Scale of Charges.</i></p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th colspan="2">Per ton per diem.</th> </tr> <tr> <th></th> <th>s.</th> <th>d.</th> </tr> </thead> <tbody> <tr><td>1,500 tons, and all above .. .. .</td><td>0</td><td>6</td></tr> <tr><td>1,450 tons, and under 1,500.. .. .</td><td>0</td><td>6<math>\frac{1}{2}</math></td></tr> <tr><td>1,400 " " 1,450.. .. .</td><td>0</td><td>6<math>\frac{1}{4}</math></td></tr> <tr><td>1,350 " " 1,400.. .. .</td><td>0</td><td>6<math>\frac{3}{8}</math></td></tr> <tr><td>1,300 " " 1,350.. .. .</td><td>0</td><td>6<math>\frac{1}{2}</math></td></tr> <tr><td>1,250 " " 1,300.. .. .</td><td>0</td><td>6<math>\frac{5}{8}</math></td></tr> <tr><td>1,200 " " 1,250.. .. .</td><td>0</td><td>6<math>\frac{3}{4}</math></td></tr> <tr><td>1,150 " " 1,200.. .. .</td><td>0</td><td>6<math>\frac{7}{8}</math></td></tr> <tr><td>1,100 " " 1,150.. .. .</td><td>0</td><td>7</td></tr> <tr><td>1,050 " " 1,100.. .. .</td><td>0</td><td>7<math>\frac{1}{8}</math></td></tr> <tr><td>1,000 " " 1,050.. .. .</td><td>0</td><td>7<math>\frac{1}{4}</math></td></tr> <tr><td>950 " " 1,000.. .. .</td><td>0</td><td>7<math>\frac{3}{8}</math></td></tr> <tr><td>900 " " 950.. .. .</td><td>0</td><td>7<math>\frac{1}{2}</math></td></tr> <tr><td>850 " " 900.. .. .</td><td>0</td><td>7<math>\frac{5}{8}</math></td></tr> <tr><td>800 " " 850.. .. .</td><td>0</td><td>7<math>\frac{3}{4}</math></td></tr> <tr><td>750 " " 800.. .. .</td><td>0</td><td>7<math>\frac{7}{8}</math></td></tr> <tr><td>700 " " 750.. .. .</td><td>0</td><td>8</td></tr> <tr><td>650 " " 700.. .. .</td><td>0</td><td>8<math>\frac{1}{2}</math></td></tr> <tr><td>600 " " 650.. .. .</td><td>0</td><td>8<math>\frac{1}{4}</math></td></tr> <tr><td>550 " " 600.. .. .</td><td>0</td><td>8<math>\frac{3}{8}</math></td></tr> <tr><td>500 " " 550.. .. .</td><td>0</td><td>8<math>\frac{1}{2}</math></td></tr> <tr><td>450 " " 500.. .. .</td><td>0</td><td>8<math>\frac{5}{8}</math></td></tr> <tr><td>400 " " 450.. .. .</td><td>0</td><td>8<math>\frac{3}{4}</math></td></tr> <tr><td>350 " " 400.. .. .</td><td>0</td><td>8<math>\frac{7}{8}</math></td></tr> <tr><td>300 " " 350.. .. .</td><td>0</td><td>9</td></tr> </tbody> </table> </div>		Per ton per diem.			s.	d.	1,500 tons, and all above .. .. .	0	6	1,450 tons, and under 1,500.. .. .	0	6 $\frac{1}{2}$	1,400 " " 1,450.. .. .	0	6 $\frac{1}{4}$	1,350 " " 1,400.. .. .	0	6 $\frac{3}{8}$	1,300 " " 1,350.. .. .	0	6 $\frac{1}{2}$	1,250 " " 1,300.. .. .	0	6 $\frac{5}{8}$	1,200 " " 1,250.. .. .	0	6 $\frac{3}{4}$	1,150 " " 1,200.. .. .	0	6 $\frac{7}{8}$	1,100 " " 1,150.. .. .	0	7	1,050 " " 1,100.. .. .	0	7 $\frac{1}{8}$	1,000 " " 1,050.. .. .	0	7 $\frac{1}{4}$	950 " " 1,000.. .. .	0	7 $\frac{3}{8}$	900 " " 950.. .. .	0	7 $\frac{1}{2}$	850 " " 900.. .. .	0	7 $\frac{5}{8}$	800 " " 850.. .. .	0	7 $\frac{3}{4}$	750 " " 800.. .. .	0	7 $\frac{7}{8}$	700 " " 750.. .. .	0	8	650 " " 700.. .. .	0	8 $\frac{1}{2}$	600 " " 650.. .. .	0	8 $\frac{1}{4}$	550 " " 600.. .. .	0	8 $\frac{3}{8}$	500 " " 550.. .. .	0	8 $\frac{1}{2}$	450 " " 500.. .. .	0	8 $\frac{5}{8}$	400 " " 450.. .. .	0	8 $\frac{3}{4}$	350 " " 400.. .. .	0	8 $\frac{7}{8}$	300 " " 350.. .. .	0	9	Governor General and Executive Council ..	30 Aug., 1861.

These thermometers were made by Mr. Grimaldi, of Melbourne, and the lengths are 20 feet, 11 feet, 6 feet, 3 feet 6 inches, and 1 foot 1 inch. One foot of each is occupied with the scale, and is above ground. Before they were put in, they were compared with a standard thermometer from Kew, and the errors then determined have been applied to the above results. A pit 20 feet deep and 4 feet in diameter was dug in the Observatory grounds, to receive them; and the strata cut were as follows:—5 feet red clay, with a few stones in it; 7 feet bands white clay and iron-sandstone; 8 feet solid sandstone. The thermometers were carefully placed vertical, and the pit filled in with the material which came out of it, care being taken to put sand round the bulb of each. There is a wooden case, 3 inches square, round the stem of each thermometer, and a wooden case, with a glass front, protects the scales from the weather. The readings can be taken through the glass front.

No. 146.—COMPARATIVE RESULTS OF EVAPORATION OBSERVATIONS, TAKEN AT THE SYDNEY OBSERVATORY, IN THE YEAR 1872.

Month.	Temperature.	Miles of Wind.	Smalley's.		Scott's.	Russell's.

Snow 31st August. Auroras 17th and 18th, and shock of earthquake 18th October.

Returns kindly furnished by J. Wyndham, Esq.

No. 147.—METEOROLOGY—continued.

Table for WEST MAITLAND. Columns include Month, Barometer, Mean Temperature, Humidity, Wind (Direction, Force), Temperature in Shade (Means, Extremes), Rain (Total Fall, No. of Days, Greatest Fall, Date), Evaporation, and Cloud. Rows list months from January to December with numerical data.

Thunderstorm 26th, S. squalls and rain 2nd January. Thunderstorms 9th and 25th February. Foggy 10th, 13th and 18th, and S.E. squalls 11th April. Heavy fog 10th, stormy 13th and 20th, and cold in May. Foggy, cold, and frost, 15th June. Heavy thunderstorm 20th, and stormy, cold, and foggy during July. Sharp frost 3rd, snow 11th, and cold during August. Hot 20th September. River up 9 ft. 14th, thunderstorm and hot wind 29th October. Thunderstorm 5th, and stormy and hot during November. Thunderstorm 16th, severe gale and thunderstorm 29th, large blocks of hail falling, and wind knocking over rain gauge in December.

LAMBTON.

Latitude, 32° 53'; longitude, 151° 44'; least distance from east coast, 7 miles.

Table for LAMBTON. Columns include Month, Barometer, Mean Temperature, Humidity, Wind (Direction, Force), Temperature in Shade (Means, Extremes), Rain (Total Fall, No. of Days, Greatest Fall, Date), Evaporation, and Cloud. Rows list months from January to December with numerical data.

Thunderstorms 22nd and 26th January. Thunderstorms 21st, 22nd, and 26th February. Thunderstorms during March. Thunderstorms 10th and 27th, lightning frequent in April. Heavy gale 19th, and lightning during May. Thunderstorm June 25th. Ice 3/4-inch thick 2nd, and thunder and sleet storm 10th August. Thunderstorm 30th, lightning during September. Auroras 15th and 18th, shock of earthquake 18th, thunderstorms 1st and 30th, and lightning frequent in October. Eight thunderstorms in November. S. burster 7th, and six thunderstorms in December.

Returns kindly furnished by Rev. J. Spicer Wood.

NEWCASTLE.

Latitude, 32° 55'; longitude, 151° 51'; altitude, 112 feet; least distance from east coast, 1 mile.

Table for NEWCASTLE. Columns include Month, Barometer, Mean Temperature, Humidity, Wind (Direction, Force), Temperature in Shade (Means, Extremes), Rain (Total Fall, No. of Days, Greatest Fall, Date), Evaporation, and Cloud. Rows list months from January to December with numerical data.

Stormy 23rd, and foggy 11th and 12th January. Stormy 3rd and 22nd February. Stormy 21st, S.E. squalls 11th and 20th, and lunar rainbow 18th March. Heavy sea 15th, 16th, 23rd, and 26th April. Heavy sea 7th and 8th, and foggy 10th, 30th, and 31st May. Thick fog 1st, 2nd, and 3rd, and heavy sea 12th and 16th June. Foggy 6th, 8th, and 9th, heavy sea 7th, 16th, 17th, and 18th, and stormy 16th July. Stormy 12th, and heavy sea 11th, 12th, 13th, 14th, 21st, and 22nd August. Stormy 24th, brilliant meteor 28th September. Auroras and shock of earthquake 18th, heavy sea 1st, 5th, and 30th, and stormy 4th, 5th, and 30th October. Stormy 2nd, 22nd, and 30th, and thunderstorm 29th December.

ORANGE.

Latitude, 33° 18'; longitude, 149° 9'; altitude, 2,891 feet; least distance from east coast, 124 miles.

Table for ORANGE. Columns include Month, Barometer, Mean Temperature, Humidity, Wind (Direction, Force), Temperature in Shade (Means, Extremes), Rain (Total Fall, No. of Days, Greatest Fall, Date), Evaporation, and Cloud. Rows list months from January to December with numerical data.

Thunderstorms 3rd, 13th, 14th, 25th, 27th, and meteor observed 15th January. Thunderstorms 3rd, 5th, 15th, and 23rd February. Thunderstorms 9th, 13th, 14th, 15th, 30th, and three meteors observed in March. Meteors observed 3rd and 9th, and frost in April. Thunderstorm 3rd, meteor 3rd, and frost during May. Heavy thunderstorms 20th and 22nd, and frost during June. Snowing 27th, foggy 30th, and frosty during July. Heavy snow 10th, 20th, and 27th. Thunderstorm 30th, and frost during August. Thunderstorm 1st, frosty 3rd and 8th September. Auroras 14th, 15th, 17th, and 18th, shock of earthquake 18th, snow 3rd and 4th, frost 1st, and thunderstorm 29th October. Eleven thunderstorms in November. Seven thunderstorms in December.

\* Rainfall from 9.20 a.m. December 31, 1871, to 3.25 p.m. January 31, 1872. b Rainfall from 3.25 p.m. January 31, to 8.40 p.m. February 27. c Rainfall from 8.40 p.m. February 27, to 11 a.m. April 1. d Rainfall from 11 a.m. April 1, to 9 a.m. April 30. e Rainfall from 9 a.m. April 30, to 9 a.m. May 31.

All the thermometers, with the exception of Nos. 2,613 and 8,569, have been corrected to No. 2,661, adopted as a standard. This thermometer was compared with a Kew standard at the Sydney Observatory, on the 3rd November, 1870, and found to read 0.28 too high, but this correction is not taken into account in the above results.

Returns kindly furnished by J. Tebbutt, Esq., from his private Observatory.

## REPORT.

The REGISTRAR GENERAL to The Honorable  
THE COLONIAL SECRETARY, transmitting  
certain additional Returns relating to  
the Census of 1871, and reporting upon  
the results obtained.

Registrar General's Office,  
Sydney, 1 April, 1873.

SIR,

I do myself the honor to forward to you the following explanatory remarks upon the statistical results of the Census of 1871.

2. The Census of New South Wales, of 1871, was taken under powers given by Act of Parliament, 33 Victoria, No. 12 (*Appendix A*), which provided for obtaining the necessary information referring to the population, and also certain Agricultural and Pastoral Statistics; to these, however, no reference will be made in this Report, as they have been dealt with separately in the Statistical Register for the year 1871. Preliminary remarks.

The rule followed in 1861, of fixing a date upon which the Census of the whole of the British Empire might be taken simultaneously, having been adhered to on this occasion, the 2nd April was the day named by the Home Government, and adopted, with two exceptions, by the Australian Colonies, the night between Sunday and Monday being selected as a time when people are generally to be found at home.

The difference in the density of population of Great Britain and New South Wales, and the large area of ground which had to be traversed here to obtain comparatively scanty information, precluded the possibility of following the example of the Registrar General for England in having the whole of the Schedules distributed and collected on the one day. It became necessary, therefore, to divide the Colony in such a manner as would enable the work to be completed in the shortest possible period, in accordance with the 6th clause of the Act, which stated that the Schedules should be delivered at every dwelling throughout the Colony in the course of the week ending on Saturday, the 1st day of April, and collected on the Monday following, or as shortly after that day as possible.

3. The Colony was divided into ninety-one districts, corresponding with the Registration Districts already established, the boundaries of some of which were altered for the convenience of the work, so as to give to each district—with the exception of a few—a maximum population of 10,000, this being considered as much as one person could superintend. Preparatory work.

Appointment of Enumerators.

4. To every one of these districts an Enumerator was appointed to supervise the work, to whom instructions were issued, and who was held responsible for the proper performance of the duties entrusted to those under him,—the City of Sydney forming a separate Census District, over which I was appointed Enumerator.

The Enumerators were mostly Clerks of Petty Sessions or District Registrars, in some cases gentlemen unconnected with the Government Service, who were appointed on the recommendation of the local Bench of Magistrates.

Appointment of collectors.

5. Maps of the various districts having been prepared, showing as clearly as possible the natural boundaries, such as mountains, rivers, creeks, &c., and the divisions required,—these, with a description of the proclaimed boundaries, were forwarded to the Enumerators, who were instructed to state, after careful consideration, how many collectors they thought it would be necessary for them to employ, specifying what portion of their district they proposed to allot to each collector.

Ultimately 629 collectors were appointed for the whole Colony, including 46 for Sydney. Of this number, 504 were employed on horseback, 99 on foot, 16 partly on horseback and partly on foot, and 10 in boats, for the collection of the information relating to those who were at the time on board ships, boats, barges, &c., in any of the ports, harbours, or other waters of the Colony.

Chinese interpreters.

6. At the previous Census the information obtained about the Chinese population was limited almost entirely to their gross number. In order to arrive at better results on this occasion, a larger number of interpreters were appointed to accompany the collectors who had to visit localities where Chinese were congregated. Thus, while in 1861, when the Chinese element numbered nearly 13,000, only 5 interpreters were engaged; in 1871, when their number had decreased to 7,220, 21 interpreters assisted in gathering the information. The result has been very satisfactory, as will be seen by the large decrease of numbers in the column devoted to "Unspecified" throughout the compiled tables, if compared with the Census Returns of 1861.

Travellers on the road, &c.

7. It was anticipated that in the outlying districts, where the population is so scattered, some difficulty would be experienced in arriving at a correct estimate of the number of those away from home or without fixed abode on the night of the 2nd April. In order to meet the difficulty as far as possible, the Enumerators were authorized to appoint additional collectors, whose duties would be to obtain information from travellers on the roads, or in the bush, whenever practicable. The number of additional schedules thus filled in was not without importance.

Allowance to Enumerators and collectors.

8. The allowance to be paid to Enumerators was fixed at from £15 to £25; but taking into account the additional duties devolving upon them through their having to supervise and summarize the Agricultural and Live Stock Returns, only three of them received the minimum rate, the others being allowed £20 or £25, according to the importance of the district.

The collectors were paid at the rate of 10s. per diem on foot, 15s. and 20s. on horseback or in boats. Where Government officials were employed as collectors, these rates were in some cases reduced by the amount of their daily allowance. The Chinese interpreters were remunerated on the same scale as the collectors.

Instructions issued.

9. All instructions to the collectors were issued by the Enumerators, who also supplied them with a written description and a tracing of the district through which they had to travel.

To

To the Benches of Magistrates and to other authorities throughout the Colony, a circular was forwarded, soliciting their advice and assistance if needed to those employed in the work, and the Inspector General of Police instructed the officers in his department to afford every assistance in their power. It may be here stated that the importance of the undertaking seemed to be fully appreciated by all classes of the people, and that, except in a few trifling cases, the greatest anxiety was shown by all to give full and correct particulars, the collectors being everywhere received with kindness and hospitality, more especially in the scattered Pastoral Districts, where they sometimes had to travel between 40 and 50 miles a day.

10. There were two forms used for the purpose of obtaining the information required,—the Householder's return (*Appendix B*) and the Ship return (*Appendix C*), the latter differing but slightly from the former, and intended for occupiers of ships, barges, &c. Forms used for distribution.

About 185,000 of these schedules were sent to the Enumerators, in accordance with their estimate of the number required, nearly 100,000 of which were actually filled in and returned to this office.

11. The information sought to be obtained from every head of a family consisted in the name and surname of the members of his household, their relation to him, their sex, age, social condition, rank, profession or occupation, the religion they followed, their degree of primary education, and also a description of the dwelling. Information required.

The word "Household" or dwelling was taken to include all buildings, tenements, or other erections, of which the whole or any part was used for the purpose of human habitation; each of these, without reference to the number of inmates, being returned as one household; and the term "Householder" was taken to mean the head of the family, or if absent, his *locum tenens*, wife, son, &c. In the case of pastoral or other large establishments, the *Occupier*, whether proprietor, lessee, or superintendent, was considered as the Householder, and required to fill in the schedule accordingly. The number of schedules collected, however, did not represent the actual number of families residing in the Colony, there being a great many separate returns for miners, &c. sole occupants of huts or tents, whose families, residing in other parts of the Colony, were also separately returned.

12. The schedules having been collected and delivered to the Enumerators, and verified and carefully endorsed by them, were returned to this office as soon as possible after the 2nd of April, accompanied by a summary of the population of the district, according to a form provided for the purpose; and from this a preliminary return was prepared and submitted to Parliament with the least possible delay. Owing, however, to the difficulty of obtaining the returns from the outlying districts, in consequence of floods which at the time prevailed in different parts of the country, it was not until the end of May that all the papers were received. Schedules returned to this office.

13. In the meantime advertisements were inserted in the principal newspapers, requesting those persons at whose houses schedules had been delivered but not collected, to forward them to this office, and those who might have been entirely passed over by the collectors, to advise me of the fact. Through this medium a few additional returns were received, and some omissions supplied; but the complaints of neglect which were inquired into were generally found to be groundless. Steps taken to collect additional information.

14. The careful manner in which the duties were performed, in the first instance, by those employed in the collection, and subsequently by the staff engaged in tabulating and compiling the returns, justify Correctness of the returns.

justify me in testifying to their general correctness. The numbers of the people, allowance being made for a few travellers or bushmen who may have escaped notice, form an exact return of our population, and all the details of figures which this volume embraces may, I think, be relied upon as correct.

Tabulation and compilation.

15. After receipt of the returns at the head office, they were handed over to the tabulators, to whom was entrusted the work of extracting from the schedules, and of condensing into forms prepared for the purpose, the particulars contained under the several headings. Their labours lasted from the 15th June to the 15th November, their remuneration being at the rate of 6s. per hundred entries made, and 4s. per hundred revised.

It was not until the middle of November that the compilation proper was commenced.

Divisions of the Colony.

16. The divisions of the Colony under which the information is grouped are the following :—

- 1st.—The Registry or Census Districts.
- 2nd.—The Police Districts.
- 3rd.—The Electoral Districts.
- 4th.—The Counties and Pastoral Districts.
- 5th.—The Towns and Villages.
- 6th.—The Municipalities.

Of these, the three principal groups are the Registry Districts, the Electoral Districts, and the Counties and Pastoral Districts, for each of which, at the risk of repetition, the most minute details are given.

The Police Districts, the boundaries of which coincide with those of the Registry Districts, are represented by summaries only.

The Towns and Villages comprise a list of townships containing a population of one hundred persons or over, whether their boundaries have been officially defined or not.

Divisions of the compiled tables.

17. The information extracted from the Schedules is divided into six Parts, namely :—

1. Ages.
2. Nationality.
3. Religion.
4. Education.
5. Social condition.
6. Occupations.

For every one of these each of the divisions of the Colony above enumerated forms a separate series. As already stated, this classification has necessarily occasioned many repetitions; but to those who may have to consult the tables it will obviate the inconvenience of reference from one part to the other.

Each series of the several Parts is preceded by a summary; and immediately following this Report will be found special centesimal and proportional tables, forming an interesting epitome of the facts elicited. The comparison of the results has not been carried back farther than the year 1861, when the first Census was taken after the separation of the Northern Districts (1859); and it was not without difficulty that even this comparison could be drawn, on account of the alterations since made in the boundaries of some of the districts.

Period 1861-1871.

18. The Census of 1861 was taken on the 7th of April, that of 1871 on the 2nd of April, so that a few days are wanted between the two dates to complete the decade. The difference is so unimportant that it was not thought necessary to increase the difficulties of the

## CENSUS OF NEW SOUTH WALES, 1871.—REPORT.

the work by taking the broken period into account, and the computations have been made on the basis of a full decennial period having elapsed between the preceding Census and the present one.

19. The total cost of the Census of 1871 was £17,183 12s. 8d., Cost of the Census. divided as follows:—

	£	s.	d.
650 Collectors and Interpreters ...	8,665	5	0
91 Enumerators ... ..	2,045	0	0
26 Tabulators ... ..	2,394	3	3
Clerical staff ... ..	2,280	3	1
Printing and purchase of type ...	1,252	11	2
Postages and petty expenses ...	413	13	10
Stationery and sundries ... ..	132	16	4
Total Cost ... ..	£17,183	12	8

representing an expenditure of about 8½d. per head of population. The actual cost of collection was £10,710 5s., or a trifle over 5d. per head. In 1861 it was £10,087 18s. 6d., or nearly 7d. per head.

## POPULATION.

## PROGRESS OF NEW SOUTH WALES.

20. Foremost among the elements of national and social wealth, Power of population. upon which depends the progress of a civilized Country, stands the power of population, shown by the increase or decrease of the numbers of the people. Before proceeding with a general analysis of the results of the Census, I will endeavour to point out, without going beyond the province of this Report, how the progress of the Colony has been affected in that respect during the last decennial period.

There are two causes from which arises the increase in the population. The excess of births over deaths, or natural increase, and the increase caused by the excess of migration flowing into, over that flowing out of, the Country.

The natural increase is in a great measure influenced by the increase or decrease in the migratory movement; and it would be a matter of great difficulty, with the statistics at present at our command, to arrive at the exact proportion in which each cause contributes towards the general increase of the population. To indicate clearly the change in one element, it would be necessary to suppose the other to be constant, and the results that such an assumption would enable us to attain at the present time would be of no value, and will only become possible when the great disproportion of the numbers of the people to the extent of territory occupied by them disappears, and with it the wide fluctuations now taking place from year to year in the relative proportion of one cause of increase to the other.

21. The total addition to the population of New South Wales Progress of the population between years 1861 and 1871. on the 2nd of April, 1871, was, for the ten preceding years, 153,121 persons, giving a yearly rate of increase of 4·36 per cent. The increase in the previous period, from 1856 to 1861, notwithstanding the separation of the Northern Districts, which took place in 1859, was at the annual rate of 6·36 per cent. Therefore, although the addition of 43·64 per cent. to our population in the decade must be a welcome fact, it should be noted not only that the rate of increase has not been maintained during the last few years, but that there has been a very noticeable retrograde movement in the progress of our population.

Turning

Turning to the annual Registration Returns, we find the addition to the population represented by the excess of births over deaths, from 1856 to 1861, to have been 36,818 persons, or at an annual rate of 2·76 per cent., leaving the balance of increase, 47,853 or 3·60 per cent. annually, to be accounted for by immigration. From 1861 to 1871 the excess of births over deaths was 104,204, representing a natural increase at the annual rate of 2·97 per cent., leaving 48,917 or 1·39 per cent. as the contribution of immigration towards the general increase of the population.

Thus, while the natural increase from 1861 to 1871 was slightly in excess of that from 1856 to 1861 (2·97 against 2·76), the perceptible falling off in the number of arrivals\* to this Colony is shown by the decrease in the annual rate, from 3·60 per cent. during the period 1856–1861, to 1·39 per cent. during the period 1861–1871.

The temporary cessation of assisted immigration, although one of the chief causes of the falling off just pointed out, is not alone sufficient to account for it. There is over the Borders of this and the neighbouring Colonies a constant movement of population, of which no record is kept, and by which each one has benefited lately, chiefly in proportion to the importance of the mineral discoveries made. During the last few years of the period that we are now dealing with, the result of this movement for New South Wales has undoubtedly been an important exodus of her population, to Victoria more particularly. But it should not be forgotten that the great impetus given to this Colony by the improvement in the agricultural prospects, as well as by the rich discoveries of minerals, dates from after the time when the Census of 1871 was taken; and there is every reason to hope, should the present prosperous state of the Country continue, that the next Census will show very different results.

#### NUMBERS AND DISTRIBUTION.

Population of New South Wales.

22. The total population of New South Wales on the 2nd April, 1871, exclusive of roving aborigines, was 503,981 persons, consisting of 275,551 males and 228,430 females. The numbers on the 7th April, 1861, were 350,860 persons, consisting of 198,488 males and 152,372 females.

The addition to our population in the period which has expired since the Census of 1861 is therefore 153,121 persons, or 43·64 per cent.; the males having increased by 77,063, or 38·82 per cent., and the females by 76,058, or 49·91 per cent.

Inequality of sexes.

23. The inequality of sexes, so prominently apparent on former occasions when a Census was taken, is fast disappearing as the population becomes more settled. In 1861 the males had increased at an annual rate of 6·95 per cent., and the females at an annual rate of 5·58 per cent.; in 1871 the males had progressed at the rate of 3·88 per cent. only, against 4·99 per cent. for the females.

Thus, while in 1861 there were, for every 10,000 persons, 5,657 males and 4,343 females, or a proportion of 7,676 females to every 10,000 males, in 1871 there were 5,467 males and 4,533 females for every 10,000 persons, or a proportion of 8,289 females to every 10,000 males.

Density of population

24. The density of population, or the relation that the numbers of the people bear to the area of the country occupied by them, will be found a question of some interest, as exemplifying, in so far at least as the actual extent of territory is concerned, the capabilities of the Country to support those who have made it their home.

The total area of the Colony is computed at 323,437 square miles, or 207,000,000 acres. Taking, however, the Surveyor General's return of land coming under his observation, we have in 1871 an area of 305,988 square

\* By this is meant the excess of arrivals over departures.

square miles, against 271,635 square miles in 1861. The difference, 34,353 square miles, representing the extent of fresh country opened, in the intervening period, in some of the Pastoral Districts.

Taking then into account the extent of opened country only, we find that the centesimal proportion of the population to the area of the Colony, at the Censuses of 1856,\* 1861, and 1871, was 0·91, 1·28, and 1·64 respectively.

Placing a person on each square yard, 3,097,600 persons might stand on a square mile, so that the whole of the population of New South Wales, if thus mustered together, would not occupy much more than 104 acres, or about one-sixth of a square mile, and the area of the Colony is 305,988 square miles!

The density of the population of England in 1861 was 344 persons to a square mile, giving a proportion of 1·86 acres to each person. In New South Wales there are over 388 acres to every inhabitant.

25. A glance at Summary table No. 2, will show how unequally Distribution of the population. the population is distributed over the Colony.

Taking first the Settled Counties, which comprise most of the agricultural and mining population, we find that, with an area of 40,117 square miles and a population of 376,170 persons, they contain 9·37 persons to a square mile, against 5·48 in 1856 and 7·05 in 1861.

The most populous County is of course the County Cumberland, which includes the City of Sydney. The area of this County is 1,586 square miles, with a population numbering 167,153. Here the progress is very marked; for the density, which was 68·71 in 1856 and 78·61 in 1861, had increased in 1871 to 105·39 persons to a square mile. The County Northumberland comes next in importance, with an area of 2,342 square miles, occupied by 41,082 persons, or 17·54 persons to a square mile, against 9·88 and 13·35 in 1856 and 1861. In the County Camden the thickness of population is increasing but slowly, from 10·39 in 1861, to 10·55 in 1871.

Turning to the outlying or Pastoral Districts, we find the comparison between the two periods 1861 and 1871 more difficult. In some of them, such as the Darling, the Murrumbidgee, &c., the area has been greatly decreased by the addition of portions of the territory to that of the Settled Counties; while the boundaries of others, such as the Albert, the Lachlan, the Warrego, &c., have been extended by the opening of fresh country in the distant parts of the Colony.

The total area of these districts in 1871 was 265,871 square miles, and the population 127,811 persons. The density was 0·48 persons to a square mile, against 0·13 and 0·29 in 1856 and 1861.

26. The distinction of the population of the towns and villages Urban and rural population. from that dispersed over the country and engaged in rural pursuits, was not effected without trouble. In many cases the official boundaries of the towns were not clearly known; in others the township proper was found to be almost deserted, the people having found it more convenient to settle in the neighbourhood. Some, which at one time had shown signs of wealth and progress, had been all but abandoned by the inhabitants, and nothing but a few huts remained to remind one that a town had ever been planned there. These great fluctuations of population are a remarkable feature in the growth of the Colonies; they are of course most frequent in the mining districts, where they are caused by the rush of the people to every newly discovered Gold Field. Wherever such rushes take place, townships arise with wonderful rapidity, generally to disappear as rapidly, as soon as the report of some rich find in another part of the country causes the abandonment of the Gold Field by the majority of those interested in it.

27.

\* Leaving out the area of the Northern Districts.

## Towns and villages.

27. The rule followed in the classification of the towns and villages and of the rural parts, was to take the Government boundaries whenever practicable, enumerating the suburban population separately. But towns or villages, although without any officially defined boundaries, were nevertheless to be considered as being part of the urban population of the Colony; and the number of inhabitants within their approximate limits, these having been carefully determined, was to be returned as the population of the town or village.

In arriving at the numbers of the urban population of the Colony, towns and villages containing less than 100 inhabitants have been disregarded, most of them being composed—only in not quite such a scattered state—of a population following the same rural pursuits as in the surrounding country districts. Therefore, the fifth series of the tables, which is devoted to “Towns and Villages,” gives information only about towns or villages containing 100 inhabitants or over. Separate mention is made, however, in other parts of the work, of many localities with a population of less than 100 persons, and all particulars relating to their statistics are given; for although not now classed as towns or villages, they will probably rise in importance, when the information here given will be found useful in tracing their growth.

## Suburban population.

28. The whole of the Suburbs of Sydney comprised in the Metropolitan Police District are included in the urban population. In 1861 the same course was not followed; a large portion of the suburban districts was added to the rural population, and this mode of dividing materially affected the returns. In order to allow of a comparison being drawn between the two periods, it has been necessary to make out fresh computations for 1861 on the same basis as the one adopted on the present occasion.

Of the total population of New South Wales in 1871, there were 234,162 persons in towns or villages, 267,417 in the rural parts, and 2,402 on board the ships, boats, barges, &c., in the ports, harbours, or other waters of the Colony. Thus, out of every 10,000 of the population, 4,646 persons lived in towns, and 5,306 in the country. In 1861, for every 10,000 persons, there were living in towns (including all the suburbs of Sydney) 4,549, and in the country 5,396, the proportion of urban and rural population being pretty nearly the same for the two periods, with a slight difference in favour of the towns in 1871.

Comparing the sexes, we find the disproportion naturally greater in the rural parts, although it is gradually becoming less apparent. Thus, in 1861, 80,449 or 40·53 per cent. of the male population were in the towns, and 116,197 or 58·54 per cent. in the country, against 79,181 or 51·96 per cent. of the female population in the towns, and 73,123 or 47·99 per cent. in the country. In 1871, the numbers are, for the males, 117,513 or 42·64 per cent. in the towns, 155,680 or 56·50 per cent. in the country, and for the females 116,649 or 51·06 per cent. in the towns, and 111,737 or 48·92 per cent. in the country; or, leaving out the decimals, the following table will show more clearly the contrast between the two periods:—

	1861.			1871.			Increase in the decennial period 1861—1871.		
	For every 10,000 persons.	For every 10,000 males.	For every 10,000 females.	For every 10,000 persons.	For every 10,000 males.	For every 10,000 females.	For every 10,000 persons.	For every 10,000 males.	For every 10,000 females.
Urban .....	4,549	4,053	5,196	4,646	4,264	5,106	4,868	4,809	4,926

Of

## CENSUS OF NEW SOUTH WALES, 1871.—REPORT.

IX

Of the 234,162 persons composing the urban population in 1871, 134,736, or 26·73 per cent. of the total population of the Colony, formed the population of Sydney and the Suburbs. 99,426, or 19·73 of the total population of the Colony, were in the country towns and villages.

Leaving out the metropolis, there were enumerated in 1871 166 towns and villages containing 100 inhabitants or more, with an aggregate population of 99,426 persons. In 1861 there were 105 towns and villages so enumerated, with a population of 65,944 persons, giving an increase for the decennial period of 61 towns and villages, with an additional urban population of 33,482 persons. Thus, for every 10,000 of the population, there were in the country towns and villages 1,973 persons in 1871, against 1,879 in 1861. Towards the total increase of the population in the decennial period, they contributed at the rate of 2,187 in every 10,000.

Taking the sexes separately, we have in 1871, for every 10,000 of the male population, 1,895 in country towns and villages, against 1,764 in 1861; and for every 10,000 of the female population, 2,066 in 1871, against 2,029 in 1861. The contribution towards the general increase of population in the decennial period being for the males 2,232 in every 10,000, and for the females 2,140 in every 10,000.

The progress towards the equalization of sexes since the year 1861 will be still better illustrated by the following table:—

	1861.				1871.			
	Sydney and Suburbs.	Towns and Villages of 100 inhabitants and over.	Total Urban.	Total Rural.	Sydney and Suburbs.	Towns and Villages of 100 inhabitants and over.	Total Urban.	Total Rural.
Persons .....	10,000	10,000	10,000	10,000	10,000	10,000	10,000	10,000
Males .....	4,849	5,311	5,040	6,138	4,845	5,253	5,018	5,821
Females .....	5,151	4,689	4,960	3,862	5,155	4,747	4,982	4,179

In 1861, there were for every 10,000 males 9,842 females in the urban and 6,293 in the rural parts. In 1871 the numbers had increased to 9,926 for the towns, &c., and 7,176 for the country.

29. Table No. 12 shows the progress of our principal towns, Principal towns. viz., those containing a population of over 1,000 persons. The most important after Sydney is Newcastle, with 7,581 inhabitants; then Parramatta, with 6,103; West Maitland, 5,079; Bathurst, 5,030; Goulburn, 4,453; Grafton, 2,250. Of these, Newcastle has made by far the most rapid strides since 1861, her population having increased at the rate of 10·37 per cent. annually. On the other hand, Parramatta increased at the rate of 0·94 per cent. per annum only; and if we were to leave out the Asylums, Orphan Schools, &c., which go far towards swelling her population, and the number of whose inmates increases in proportion to the total increase of the Colony, we should have an actual decrease in her numbers during the last ten years.\*

The largest increase of urban population will be found to have taken place in the towns of Wagga Wagga, Orange, Muswellbrook, and Tamworth, which progressed at the annual rates of 19·63 per cent., 15·06 per cent., 13·12 per cent., and 13·10 per cent. respectively; while the numbers for East Maitland, West Maitland, and Windsor, show a very material falling off; the decrease being at the rates of 0·87 per

\* Of the 6,103 persons composing the population of Parramatta, 1,727, or one-fourth, are supported by the Government, viz.:—in the Gaol, 261 persons; Lunatic Asylum, 874; Destitute Asylum, 266; Roman Catholic Orphanage, 326. Total, 1,727 persons.

per cent., 1·08 per cent., and 0·88 per cent. annually. This retrograde movement is explained by the impoverished state of the surrounding districts, caused chiefly by the floods to which they are exposed.

Sydney.

30. The town of Sydney, within the corporate boundaries, contained in 1871 a population of 74,423 persons, consisting of 36,149 males and 38,274 females. In 1861 the total population was 56,394, consisting of 27,285 males and 29,109 females; the numerical increase in the intervening period being 8,864 males and 9,165 females, or 18,029 persons. The rate of increase was very nearly the same for both sexes, 3·25 per cent. annually for the males, 3·15 per cent. for the females, or an average of 3·20 per cent. for the total population.

This is a marked improvement on the returns for 1861, when the rush to the Victorian mines between the years 1856–1861 had caused such a drain on our Metropolitan population that the annual rate of increase during the preceding quinquennial period was only 0·7 per cent. for the males, 1·5 per cent. for the females, and 1·2 per cent. for the total population.

The proportion of sexes in the City of Sydney is pretty evenly maintained from year to year, although it is of course to some extent affected by the gradual disappearance of the disproportion of their relative numbers in the rural districts. Thus, while in 1861 there were in the town for every 10,000 persons 4,866 males and 5,134 females, or a proportion of 10,551 females to every 10,000 males, in 1871 we have for every 10,000 persons 4,961 males and 5,039 females, or a proportion of 10,156 females to every 10,000 males.

The following table, showing the progress of the town since the year 1828, will be found interesting :—

RETURN showing the population of the Town of Sydney at each Census taken since the year 1828, and the increase of the same in the intervening periods.

Years.	Population.			Increase.									
				Numerical.			Centesimal.			Centesimal Annual Average.			
	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.

1856	53,358	26,396	27,032	9,118	4,030	5,088	20·6	18·0	23·2	4·1	3·6	4·6	
1861	56,394	27,285	29,109	3,036	959	2,077	5·7	3·6	7·7	1·2	0·7	1·5	
1871	74,423	36,149	38,274	18,029	8,864	9,165	32·0	32·5	31·5	3·2	3·3	3·1	

Between the years 1836 and 1861, the intervening periods are all quinquennial. 1861–1871 is the only decennial period.

The population of the Metropolis, however, does not consist only of those living in the town of Sydney proper. It includes also the numbers of those residing in the Suburbs, who, though not within the City boundaries, must be practically looked upon as forming part of her population.

Suburbs.

31. These Suburbs, with the City of Sydney, compose the Metropolitan Police District. Their aggregate population is 60,324 persons, of which 29,148 are males and 31,176 females. They are divided into eight Districts (Registry), as follows :—

POPULATION.

## POPULATION.

	Persons.	Males.	Females.
1. Balmain ... ..	6,886	3,191	3,695
2. The Glebe ... ..	5,721	2,751	2,970
3. Newtown ... ..	6,601	3,144	3,457
4. Redfern and Botany ... ..	12,621	6,297	6,324
5. Paddington ... ..	11,411	5,317	6,094
6. Concord ... ..	3,520	1,667	1,853
7. St. George ... ..	8,438	4,232	4,206
8. St. Leonards ... ..	5,126	2,549	2,577
	60,324	29,148	31,176

The population of the Suburbs has very largely increased since 1861, when it was in the aggregate 36,846 only, consisting of 17,768 males and 19,078 females. The addition in the decennial period was therefore 63·72 per cent., or 64·05 per cent. to the males, and 63·42 per cent. to the females. The annual rate of increase—6·37 per cent.—is nearly double that of the town. And this is only natural. The limits of the City are now far too narrow to give abodes to all to whom she affords a living, so that the proportion of those who reside out of town is necessarily increasing yearly; and the rate of increase will be found to become greater as that of the town itself becomes more settled.

The highest suburban rate of increase is in the Redfern and Botany District, 88·34 per cent. in the ten years, the numbers having increased from 6,701 in 1861 to 12,621 in 1871. In the Concord, St. George, and St. Leonards Districts, which are farther from the City, the rates of increase are the lowest, being 49·40 per cent., 49·42 per cent., and 48·45 per cent. respectively, for the decennial period.

32. Taking the town and suburbs together, the population of Town of Sydney and suburbs. Sydney in 1871 was 134,736 persons, consisting of 65,286 males and 69,450 females. In 1861 the numbers were 93,686 persons, consisting of 45,425 males and 48,261 females, and the numerical increase in the decennial period was for the males 19,861, for the females 21,189, or 41,050 for both sexes, being an addition of 43·72 per cent. for the males, 43·90 per cent. for the females, or 43·82 per cent. together.

33. Most of the population composing the Metropolitan Municipalities. District has already been incorporated under the Municipalities Act. The town itself constitutes the Municipal City of Sydney, and in the suburbs there were in 1871 no less than nineteen Municipalities, containing together 49,962 persons, out of a total population of 60,324.

There were altogether in New South Wales, at the Census of 1871, forty-nine Municipalities, with a population of 192,181; while in 1861 there were only twenty-four Municipalities, with a population of 102,476; the increase in the decennial period being represented by twenty-five Municipalities and 89,705 persons.

In 1861, for every 10,000 of the population, there were 2,921 persons within municipal boundaries, and 7,079 in unincorporated localities. In 1871 the Municipalities contained 3,813 persons in every 10,000, against 6,187 in other parts. Again, taking the total increase of population in the decade, we find that for every 10,000 of the increase, 5,858 was contributed by the Municipalities, and 4,142 by the unincorporated parts of the Colony.

Municipality of  
Sydney.

34. The Municipality of Sydney being identical with the town, requires no special reference here. It will be sufficient to indicate in the following table the population of the several Wards, and their progress since 1861.

RETURN showing the Population of the eight Wards of the Municipal City of Sydney, at the Censuses of 1861 and 1871 respectively, and the increase of the same in the decennial period 1861-1871.

WARDS.	POPULATION.						INCREASE.		
	1861.			1871.			Numerical	Centesimal	Centesimal Annual Average.
	Persons.	Males.	Females.	Persons.	Males.	Females.			
The City.....	56,394	27,285	29,109	74,423	36,149	38,274	18,029	31.97	3.20
Fitzroy .....	10,959	5,041	5,918	12,000	5,630	6,370	1,041	9.50	0.95
Bourke .....	5,154	2,484	2,670	5,258	2,493	2,765	104	2.02	0.20
Macquarie .....	4,513	2,213	2,300	7,945	3,750	4,195	3,432	76.05	7.60
Cook .....	8,268	3,961	4,307	14,694	6,986	7,708	6,426	77.72	7.77
Denison .....	8,061	4,004	4,057	10,134	5,064	5,070	2,073	25.72	2.57
Brisbane .....	6,304	3,242	3,062	7,269	3,803	3,466	965	15.31	1.53
Gipps .....	7,220	3,576	3,644	8,969	4,501	4,468	1,749	24.22	2.42
Phillip .....	5,915	2,764	3,151	8,154	3,922	4,232	2,239	37.85	3.79

The above return shows how unevenly the population of the different parts of the city has progressed since 1861. The tendency of the city to spread out towards the east is illustrated by the large addition to the numbers of the people in Macquarie and Cook Wards, where the increase in the decade was 76.05 and 77.72 per cent.; while in Bourke and Brisbane Wards, representing the older and more thickly populated parts of the town, the increase was comparatively very small, 2.02 and 15.31 per cent., respectively.

Counties and Pastoral  
Districts.

35. The distribution of the people in this Country cannot be better shown than by a comparison between what were formerly the Settled Counties and the Pastoral Districts. The twenty Counties, forming previously to 1861 the more settled portion of the Colony, and composed chiefly, as already stated, of the agricultural and mining districts, have since received the accession of portions of five Counties, viz.: Buccleugh, Cowley, Gorden, Harden, and Lincoln. Including these, there were in 1871, for what may be termed the first class districts, a population numbering 376,583, or 74.72 per cent. of the total population of the Colony, and 127,398 persons, or 25.28 per cent., for the Pastoral Districts. In 1861 the numbers were, for the twenty Counties, 283,375,\* or 80.77 per cent. of the population, and for the Pastoral Districts 67,485, or 19.23 per cent. of the population. The progress of the outlying districts is here clearly marked. The addition to the population of the Counties between the years 1861 and 1871 was 33.79 per cent., or at the rate of 3.38 per cent. annually. The population of the Pastoral Districts had in the meantime increased by 88.77 per cent., or at the rate of 8.88 per cent. annually.

Taking the sexes separately, we find that in 1861, of the total male population, 151,595 or 76.37 per cent. were in the Counties, and 46,893 or 23.63 per cent. in the Pastoral Districts. In 1871 there were 198,814 or 72.15 per cent. of the male population in the Counties, and 76,737 or 27.85 per cent. in the Pastoral Districts. Of the total female population, there were in 1861 129,870 or 85.23 per cent. in the Counties, and 22,502 or 14.77 per cent. in the Pastoral Districts; and in 1871, 177,769 or 77.82 per cent. in the Counties, and 50,661 or 22.18 per cent. in the Pastoral Districts.

The rate of increase in the decennial period was, in the Counties, pretty equal for both sexes, 31.15 per cent. for the males and 36.88 per cent. for the females; but in the Pastoral Districts the rate

\* Including, for the sake of comparison, the shipping, which was left out in the returns for 1861.

rate for the males was 70·33 per cent., and for the females over 125·82 per cent. This large excess in the increase of the female population bears out what has already been said about the steady progress in the equalization of the sexes in the less settled districts.

This is again illustrated in table No. 8, which gives the proportion of the sexes in the Counties and in the Pastoral Districts, at the two periods of 1861 and 1871. In 1861 there were in the Counties, for every 10,000 persons, 5,386 males and 4,614 females, and in 1871, 5,279 males and 4,721 females, or 8,941 females for every 10,000 males in 1871, against 8,566 in 1861. In the Pastoral Districts the numbers were, for every 10,000 persons in 1861, 6,675 males and 3,325 females, and in 1871, 6,023 males and 3,977 females. So that in 1871 there were in the Pastoral Districts 6,602 females to every 10,000 males, against 4,979 only in 1861.

The progress of some of the Counties since 1861 has been very marked. County Phillip, the centre of the Western mining districts, increased in the decennial period by 282·26 per cent. of its population, the addition to the males being 341·49 per cent., and to the females 199·27 per cent. In County Georgiana the increase was 127·92 per cent.; 107·38 per cent. for the males and 167·34 per cent. for the females. On the other hand, County Camden, whose population has been greatly thinned lately by the exodus of small settlers, attracted to other parts by the greater advantages offered by free selection, shows an actual decrease of the male population of 3·35 per cent. for the period, and the total rate of increase for both sexes was only 1·50 per cent. In the County Cumberland the increase was almost at the same rate as in the City of Sydney, 34·07 per cent. for the period, and the proportion of sexes in 1871 was 10·068 females to every 10,000 males, against 10,223 in 1861.

The comparison between the two periods is more difficult for the Pastoral Districts, on account of the difference of area of some of them in 1861 and in 1871. In the Warrego District the population increased from 219 in 1861 to 2,650 in 1871, or at the rate of 1,110·04 per cent. for the decade. In the Albert, the increase was at the rate of 322·27 per cent. for the decade, and in the Macleay at the rate of 279·77 per cent. But the Warrego and the Albert had in the same period received a very large addition to their area, while the Darling, although reduced by nearly half the extent of its territory, had nevertheless increased by 102·29 per cent. of its population in the ten years.

#### DOMICILIATION.

36. Taking next the manner in which the people of this Country are lodged, we find that the 503,981 persons forming the population of New South Wales in 1871 inhabited 93,690 dwellings of all descriptions, 28,497 of which were built of brick or stone, 50,800 of weatherboard, 11,973 of inferior material, and 2,420 of which were tents, drays, &c. In addition to these, there were 4,917 empty stores, uninhabited houses, or buildings in the course of construction. In 1861 the total number of inhabited or uninhabited buildings was 64,571, of which 18,639 were brick or stone houses, 38,773 weatherboard or inferior, and 7,159 tents, drays, &c. The large diminution in the number of the latter is accounted for by the decrease of the Chinese population.

37. There were in 1861, 184 dwellings to every 1,000 inhabitants, or a proportion of 5·43 persons to each dwelling. In 1871 there were 196 dwellings to every 1,000 persons, or a proportion of 5·11 persons to each dwelling. The progress is shown by an increase in the period of twelve dwellings to every 1,000 persons, and by a corresponding decrease in the density of habitation of 0·32 persons to each dwelling.

The

The density of habitation of the principal towns, in 1871, did not differ very materially. In Sydney, it was 5·39 persons to each inhabited dwelling; in the suburbs, 5·45. In Newcastle it was 5·64. Liverpool and Parramatta, with their Asylums and other public institutions, show a density of 9·83 and 6·95 respectively.

The following table, giving the progress of the City of Sydney in respect to the lodgment of the people, will conclude this part of the Report:—

RETURN showing the description of residences, and the density of habitation in the eight Wards of the Municipal City of Sydney, at the Censuses of 1861 and 1871 respectively, and the progress of the same in the decennial period 1861-1871.

Wards.	1861.					1871.					Period 1861-1871.

## AGES.

Mode of grouping.

38. In the detailed tables having reference to the ages of the people, the units of population will be found tabulated for each year of age up to 21, after which they are grouped in periods of five years up to 80, the last three columns being devoted to persons between 80 and 100 years of age, to centenarians, and to those whose ages were not specified. In the special summary tables the grouping of persons under 20 has been condensed into quinquennial periods.

Effective and non-effective portion of the population.

39. Following the plan adopted in 1861, we will first divide the population into three distinct groups of age, classing as children all those under 15 years,—as adults, representing the effective strength of the community, those between 15 and 65 years of age,—and as non-effective adults, those over the age of 65.

Of the 503,981 persons forming the population in 1871, 210,183, or 41·71 per cent., were children under 15, \*283,087, or 56·17 per cent., were adults between the ages of 15 and 65, and 10,711, or 2·12 per cent., were over 65 years of age.

In 1861, 133,221, or 37·97 per cent. of the population, were children under 15, 212,843, or 60·72 per cent., were adults between 15 and 65 years of age, and 4,796, or 1·31 per cent., were over 65.

The increase in the decennial period was, therefore, 76,962, or 57·77 per cent. of their numbers, for children under 15 years of age, 70,244, or 33·00 per cent., for adults between 15 and 65, and 5,915, or 123·33 per cent., for persons over 65.

Assuming the numbers of those under 15 and over 65 years of age to represent the section of the population depending upon others for support, and taking the remainder as the class embracing the self-supporting and those who support others,—we have in 1871, for every 10,000 of the population, 5,620 effective to 4,380 non-effective persons, against 6,070 effective to 3,930 non-effective in 1861.

In

\* Including, as in 1861, the unspecified ages.

In England, where the self-supporting classes are taken to be between the ages of 20 and 60, their proportion to the numbers depending upon others for support remains pretty constant. In 1851 there were, for every 10,000 of the population, 5,230 persons depending upon the remaining 4,770 for maintenance. In 1861 the numbers were 5,240 and 4,760 respectively.

The proportionately large decrease in the numbers of our effective population should, it need hardly be pointed out, not be taken as showing a diminution of our producing power, but simply as instancing the tendency of this Country—yearly increasing with its growth—of approaching in this respect the standard of Great Britain.

It does not follow, because the proportion of those relying upon others for support has so largely increased since 1861, that there should be, therefore, a decrease in the number of those capable of supporting them. The inference to be drawn is merely that, as the Colony grows older and the sexes become more equal, causing a corresponding increase in the number of marriages, so each adult has the care of more who are dependent on him for support; and the same person upon whom *two* others depended in 1861, would in 1871 have to support nearly *four* persons.

40. Looking next at each sex separately, we have in 1871, out of a total male population of 275,551, 106,615, or 38·69 per cent. of the whole number, under 15 years of age; 161,654, or 58·67 per cent., between the ages of 15 and 65; and 7,282, or 2·62 per cent., over 65 years of age. In 1861 the percentage of the male population was, for children under 15, 33·78, for those between the ages of 15 and 65, 64·55, and for those over 65 years of age, 1·67. Males and females.

Of the total female population, numbering 228,430 in 1871, 103,568, or 45·34 per cent., were under 15; 121,433, or 53·16 per cent., were between the ages of 15 and 65; and 3,429, or 1·50 per cent., were over 65 years of age. In 1861, the percentage was 43·43 for children under 15, 55·60 for those between 15 and 65, and 0·97 for those over 65 years of age.

41. Taking the proportion of one sex to the other, we find that in 1871, for every 10,000 of the active class, 5,710 were males and 4,290 females, and for every 10,000 of the remainder of the population, 5,156 were males and 4,844 females; whilst in 1861, for every 10,000 of the active class, there were 6,019 males and 3,981 females, or nearly twice the number of males; and for every 10,000 of the remainder, there were 5,099 males and 4,901 females. Proportion of sexes.

Thus, while the proportion of sexes of the children and aged does not materially differ at the two periods, the maintaining class, which in 1861 numbered nearly *two* males to every female, in 1871 only numbered *five* males to every *four* females. This illustrates very clearly the theory that the disproportion of sexes on the one hand, and the difference in the numbers of the effective and non-effective classes on the other, disappear on a par.

42. A noticeable increase will be found to have taken place since 1861 in the numbers of those over 65 years of age. Persons aged 65 and more.

Between the ages of sixty-five and seventy there were 4,850 persons in 1871, against 2,189 in 1861, an addition to the numbers of 2,661 or 121·56 per cent. in the decade. Between the ages of seventy and seventy-five, there were 3,609 persons in 1871, against 1,466 in 1861, giving a numerical increase of 2,143 or 146·18 per cent. in the period. Between seventy-five and eighty, 1,275 persons were returned in 1871, against 614 in 1861, the increase of 661 being at the rate of 107·65 per cent.; and over eighty, there were 977 persons in 1871, against 527 in 1861, giving an increase of 250, or 85·39 per cent.

Centenarians.

43. With regard to persons of a reputed age of 100 years and more, the information given requires careful scrutiny. We have little documentary evidence in this Country of the truth of the statements made by supposed centenarians, whose loss of memory often leads them to exaggerate their age. I can only give their numbers such as they were extracted from the schedules, without expressing any opinion about the correctness of the returns. Eighteen persons were put down as centenarians in 1871, which is a proportion of about  $3\frac{1}{2}$  to every 100,000 of the population. In England, in 1861, there was one centenarian returned to every 100,000 persons.

Inequality of sexes at different periods of age.

44. I annex the following return to show, at different periods of age, the inequality of the sexes, and at the same time to indicate at what ages the disappearance of this disproportion is most observable.

RETURN showing, at different periods of age, the proportion of females to every 10,000 males, in the years 1861 and 1871 respectively.

	All Specified ages.	Under 5 years.	5 and under 10	10 and under 15	15 and under 20	20 and under 25	25 and under 30	30 and under 35	35 and under 40	40 and under 45	45 and under 50	50 and under 55	55 and under 60	60 and under 65	65 and under 70	70 and under 75	75 and under 80	80 and over
1861	7,922	9,859	9,984	9,753	10,459	8,376	6,956	5,957	6,461	6,225	5,379	4,877	4,818	3,868	4,574	4,274	5,235	3513
1871	8,303	9,684	9,681	9,798	10,224	9,883	8,235	6,690	6,412	5,783	6,365	6,220	5,706	5,360	4,900	4,465	4,294	5,266

It will be seen by the above return that up to the age of 15 the sexes were pretty equally divided, both in 1861 and 1871; there being under that age 9,869 females to every 10,000 males in 1861, and 9,714 in 1871. Between the ages of 15 and 20 the female element predominates. Again, at the age of 20–21 (which was not enumerated separately in 1861) there were 10,402 returned to every 10,000 males, in 1871. Above that year the preponderance goes on decreasing with age, but with a marked improvement in 1871.

Better way of grouping the population.

45. Although the three periods *under 15*, *15 and under 65*, and *65 and upwards*, were adopted, for the sake of comparing the results of this Census with those of the preceding one, a better way of grouping the population in this Country would perhaps be into the following four series of ages:—Infants under 5; children, between 5 and 15; adults, between 15 and 60 (which it is thought would correspond here with the period 15–65 in England), and adults aged 60 and upwards.

Ages in the urban and rural parts.

Under this mode of grouping, tables 20 and 21 will give a comparison between the urban and rural parts of the Colony in 1871, as regards the percentage of the population, and the proportion of sexes at each of the four periods of age. They will serve as a basis for future comparison.

Electoral districts.—Males aged 21 and more.

46. A useful return (table 22) has been made out in connection with this part of the Census, giving for each Electorate the number of adult males of the age of 21 and upwards; and, deducting from these the Chinese and Aboriginal element and the Foreigners who were not returned as naturalized, the estimated number of electors,—From this we elicit that there were in 1871, in the fifty-seven Electoral districts, 141,147 adult males aged 21 and over, giving an estimated number of electors of 130,919, or a proportion of 2,610 electors in every 10,000 persons. The total number of Members of the Legislative Assembly being 69, the average is 1,897 electors to a Member. To arrive at the exact number of males aged 21 and upwards in the Colony, we must add the shipping, which is not included in the Electoral districts. We thus get a total of 143,730 adult males of 21 years of age or over, representing 28.52 per cent. of the population.

SOCIAL

## SOCIAL OR CONJUGAL CONDITION.

47. The next point to be considered is the social condition of the people; and, without following the order in which the detailed tables are printed, I will now proceed with the analysis of the statistical information contained under that head.

It should be mentioned, however, that as, through an oversight in the compilation, the corresponding tables for 1861 were not classified by ages, no comparison can be drawn between the two periods, except as regards the general results.

Difficulty of comparing the two periods, 1861 and 1871.

48. This is the first occasion on which, in inquiring into the social state of the community, the Chinese element has not been left out. It must be admitted that the time has arrived when the Chinese should be regarded as forming part of our settled population; for although the nomadic habits of many of them still remain unchanged, the number of those who are settling in our midst, as merchants, tradesmen, artificers, or agriculturists, is increasing yearly, and the number of marriages registered between them and European women is becoming more and more important.

Chinese population included in the returns.

Of course, by including them, the percentage of the *married* will be to a considerable extent weakened; but this does not appear a sufficient reason to justify in leaving them out of the returns, more especially as the information obtained about them was, with the assistance of the interpreters, very complete.

The figures that are given hereafter must therefore be taken to refer to the whole of our specified population.

49. Comparing, first, the general results of this Census with those of the preceding one.

General results of this Census, compared with those of the preceding one.

We find that, in 1871, of the total population of 503,981, there were\* 336,770 persons, or 66·82 per cent. unmarried, 150,692 or 29·90 per cent. married, and 1,019 or 3·28 per cent. widowed.

In 1861 there were 231,152 persons, or 65·88 per cent. of the population unmarried, 109,188 or 31·12 per cent. married, and 10,520 or 3·00 per cent. widowed.

The unmarried therefore increased in the period by 105,618 or 45·69 per cent. of their numbers, the married by 41,504 or 38·01 per cent., and the widowed by 5,999 or 57·02 per cent.

The proportion of the unmarried to the total population increased in the period by 0·94 per cent., that of the married, on the contrary, decreased by 1·22 per cent., and that of the widowed increased by 0·28 per cent.

50. This increase in the proportion of the unmarried is not to be attributed to a proportionate decrease in the number of marriages. The percentage of increase of our adult population has already been shown to have been smaller between the years 1861–1871 than in the preceding period, while that of the children was correspondingly larger. And if we deduct from the number of unmarried the youthful element, we shall find that the proportion of the unmarried, that is, of the bachelors and spinsters, has decreased since 1861.

Increase in the proportion of the unmarried to the total population.

Leaving out, therefore, for the males all under 20 years of age, and for the females all under 15, we are left with a total unmarried population numbering 74,136 in 1861 and 104,486 in 1871, and with a percentage of the total population of 21·13 in 1861 and 20·73 in 1871, or a decrease of 0·40 per cent. in the period.

Decrease in the proportion of the unmarried, taking the adult population only.

51.

\* Including at both periods, the unspecified, who in 1861, were chiefly Chinese, and may therefore reasonably be included amongst the unmarried.

In the tables for 1871, however, the unspecified fairly represent the three classes, married, unmarried, and widowed, and should be left out when comparison is drawn with future results.

Married—Proportion of sexes.

51. Of the 150,692 persons returned as married in 1871, 75,810 were males and 74,882 females; so that there were 928 husbands whose wives were not in New South Wales when the Census was taken.

In 1861 there were 55,679 husbands and 53,509 wives, the excess of husbands being 2,170, so that a large number of wives whose husbands had probably preceded them in this Country to prepare a home for them and their families, had joined them since 1861, coming from the neighbouring Colonies or from Europe.

In England, on the contrary, the number of wives predominates. In 1861, for instance, there were nearly 70,000 husbands, or about 2 per cent. of their total number, absent from the Country, most of whom were seamen.

Increase of the married.

52. The addition to our married population in the period 1861–1871, was 20,131 or 34·36 per cent. to the males, and 21,373 or 39·94 per cent. to the females.

Widowed—Proportion of sexes.

53. Of the 16,519 widowed persons in 1871, 6,730 were males and 9,789 females. In 1861 there were 4,781 males and 5,739 females; the females exceeding the males by 958 in 1861, and by 3,059 in 1871.

The increase in the ten years was 1,949 or 40·98 per cent. to the number of widowers, and 4,050 or 70·57 per cent. to the number of widows.

Here then, as well as in England, the chances of remarrying are far greater for widowers than for widows.

Proportion of the married to the widowed.

54. The proportion of the married to the widowed was, in 1861, 1,160 husbands to 100 widowers, 930 wives to 100 widows; and in 1871, 1,270 husbands to 100 widowers, and 760 wives to 100 widows. In England the proportion is about *five* wives to *one* widow.

I regret that the incompleteness of the returns for 1861 will not allow me to extend this inquiry to the progress of the *married*, *widowed*, and *unmarried*, in the last decade, at different periods of age, which would be necessary to render the information complete.

Summary of the proportion of sexes of the unmarried, married, and widowed, in 1861 and 1871.

55. The following table summarizes the proportion of sexes of the three social classes in 1861 and 1871:—

	1861.			1871.		
	Unmarried.	Married.	Widowed.	Unmarried.	Married.	Widowed.
Persons .....	10,000	10,000	10,000	10,000	10,000	10,000
Males .....	5,971	5,099	4,545	5,731	5,031	4,074
Females .....	4,029	4,901	5,455	4,269	4,969	5,926

So that there were in 1861, of the unmarried, 6,747 females to every 10,000 males; of the married, 9,610 females to every 10,000 males; and of the widowed, 12,004 females to every 10,000 males; while in 1871 the unmarried were in the proportion of 7,448 females to every 10,000 males; the married, in the proportion of 9,878 females to every 10,000 males; and the widowed, in the proportion of 14,545 females to every 10,000 males.

Returns for 1871.—Unmarried.

56. Passing now to the returns for 1871, and taking first the *unmarried*,—we find that of their total number, 210,182 are under 15, and 125,569 were aged 15 and upwards.

Proportion of sexes.

Of the 210,182 persons under 15 years of age, 106,615 or 50·73 per cent. are males, and 103,567 or 49·27 per cent. females. Of the 125,569 persons aged 15 and upwards, 85,614 or 68·18 per cent. are males, and 39,955 or 31·82 per cent. females. Under the age of 15 there are 9,714 unmarried females to every 10,000 unmarried males; above that age, 4,690 unmarried females to every 10,000 unmarried males.

57. Deducting the males under 20 years of age and the females under 15, we have in the Colony 64,620 bachelors and 39,955 spinsters, or a proportion of 6,183 spinsters to every 10,000 bachelors.

The proportion of unmarried females to unmarried males decreases with age. Thus the proportion is—

Under 15 years of age, 971 spinsters to every 1,000 bachelors.			
Between 15 and 20	"	955	" "
" 20 " 21	"	751	" "

" 60 " 70	"	76	" "
" 70 " 80	"	72	" "
At 80 years and upwards	...	119	" "

58. Of the total number of *married*, 150,691 persons are aged 15 and more, 1 only is under 15. There were 75,810 males and 74,881 females at the age of 15 and upwards. The 1 under 15 is a female. Between the ages of 15 and 20, there are 71 married males and 1,479 married females. At the age of 20–21 there are 145 married males and 1,289 married females. Above that age, the proportion of married females to married males goes on decreasing, as the following will show :—

Between 20 and 21 years of age there are 8,890 wives to every 1,000 husbands.			
" 21 " 25	"	2,656	" "
" 25 " 30	"	1,443	" "
" 30 " 35	"	1,028	" "
" 35 " 40	"	878	" "
" 40 " 50	"	764	" "

" 60 " 70	"	514	" "
" 70 " 80	"	342	" "
At 80 years and upwards	...	362	" "

59. None of the population under 15 years of age are returned as widowed. Between the ages of 15 and 20 there are such; of these, 11 are females and 1 is a male. Between the ages of 20 and 30 there were 736 widowed, namely, 157 males and 579 females.

The proportion of widows to widowers decreases with age. Thus, between 20 and 21 the proportion is 7,000 widows to 1,000 widowers.

61. Table number 45 gives, at three different periods of age, the percentage of the unmarried, married, and widowed, in the urban and rural parts of the Colony. In the towns and villages, the percentage of unmarried is 64·15, of married 31·60, and of widowed 4·09. In the country it is 68·74 unmarried, 28·48 married, and 2·57 widowed.

Unmarried, married, and widowed, in the urban and rural parts of the Colony.

Of the male population, 66·35 per cent. are unmarried, 30·78 per cent. married, and 2·61 per cent. widowed, in the towns or villages; and 72·29 per cent. unmarried, 25·13 per cent. married, and 2·33 per cent. widowed, in the country.

Of the female population, 61·92 per cent. are unmarried, 32·42 per cent. married, and 5·60 per cent. widowed, in the towns and villages; and 63·78 per cent. unmarried, 33·15 per cent. married, and 2·91 per cent. widowed, in the rural parts.

### NATIONALITY.

62. The population of New South Wales, whose progress mainly depends upon immigration from various parts of the World, is necessarily one of mixed nationality. It is therefore a matter of great importance to trace the growth of its component parts, and to ascertain the relative importance of the native-born, and of the other elements of which its numbers are constituted.

63. The inquiry under the head of Nationality extends into two parts, the one requiring a division of the people into British and Foreign subjects, and the other a distinction of the Countries in which they were born.

64. Taking first the subject of allegiance,—we find that of the 503,981 persons enumerated on the 2nd April 1871, 484,762 were British subjects, viz., 481,857 by birth, and 2,905 by parentage or naturalization, and 17,770 were Foreign subjects.

British and Foreign subjects.

Of the British subjects, 259,489 were males and 225,273 females. Of the Foreign subjects, 15,025 were males and 2,745 females.

There were, in addition to these, 983 Aborigines forming part of the settled population of whom 709 were males and 274 females, and 466 persons of unspecified nationality, of whom 328 were males and 138 females.

Taking only the people whose nationality was stated, it would appear that 96·28 per cent. of the population were British, and 3·53 per cent. Foreign subjects. Of the males, 94·28 per cent. were British, and 5·46 per cent. Foreign; of the females, 98·68 per cent. were British, and 1·20 per cent. Foreign.

65. The sexes of the British subjects are comparatively equal,—5,353 males, and 4,647 females in every 10,000 persons, or a proportion of 8,682 females to every 10,000 males; but there is a great disparity of numbers to be noted in the sexes of Foreign subjects, of whom there were 8,455 males, and 1,545 females in every 10,000 persons, or a proportion of 1,827 females only to every 10,000 males.

Proportion of sexes.

I am not able to compare the above results with those of the preceding Census, when no corresponding return appears to have been framed, but a contrast between the numbers of different birth-places, at the two epochs, will be sufficient to indicate the progress of the different nationalities in the decennial period.

Birth-places of the people.

66. The population of New South Wales may be classed under three principal heads—the \*Australian-born, the natives of Great Britain or of other parts of the British Dominions, and those born in Foreign Countries, including such as, being naturalized, enjoy all the rights of the British subject.

There were in New South Wales, in 1871, 308,673 persons born in the Australian Colonies, of whom 294,244 were natives of this Colony; 174,167 persons born in Great Britain or in British Possessions; and 20,675 born in Foreign Countries, or at sea; forming, with 466 persons of unspecified birth-places, the total population.

67. Taking the *specified* only, 61·30 per cent. of the people were Australian-born; 34·59 per cent. were born in Great Britain or in British Dependencies, and 4·11 per cent. in Foreign Countries or at sea.

In 1861, the percentage of Australian-born was 47·14, of persons born in Great Britain or in British Dependencies, 46·30, and of persons born in Foreign Countries or at sea, 6·56.

Increase of the Australian-born.

68. Thus, while in 1861 the Australian-born only slightly outnumbered others of British blood, they now stand to them in the proportion of nearly two to one.

Taking the total increase of the population in the decade, we find that to every 10,000 of the increase the Australian-born contributed 9,359, and others of British blood only 789, whilst the Foreign element showed a decrease of 148 in every 10,000.

That the proportion in which the natives stand to the total population should augment from year to year is only to be expected, as their numbers, if compared with the other elements of which the population is composed, increase in the same proportion as the natural increase of the population bears to the migratory increase. Even if the rate of immigration had been kept up in the last decade, the proportion of the natives, swelled by the numbers of the children born of immigrants in the decennial period, would still have been greater than in 1861. But it would have been far less than it actually is; and it is therefore doubtful whether, considering the causes to which it is to be attributed, this large preponderance of the native element is a matter for congratulation. That it will decrease again, as soon as the immigration movement is revived, is not to be doubted.

Of the 308,673 Australian-born, 294,244 or 58·44 per cent. of the population, were born in New South Wales, and 14,429 or 2·86 per cent. in other Australian Colonies. In 1861 the numbers were 160,298 or 45·80 per cent. of the population for New South Wales, and 4,694 or 1·34 per cent. for other Australian Colonies.

The increase in the decade was, therefore, 133,946 or 83·56 per cent. for New South Wales, and 8,752 or 186·45 per cent. for the other Colonies.

Great Britain and British Dependencies.

69. Of the 174,167 persons, in 1871, who were born in Great Britain or in British Possessions, 87,334, or 17·35 per cent. of the total population, were born in England; 1,870, or 0·37 per cent. of the population, in Wales; 20,041, or 3·98 per cent. of the population, in Scotland; and 62,943, or 12·50 per cent. of the population, in Ireland.

In 1861 the numbers were 84,152, or 24·04 per cent. of the population, for England; 1,378, or 0·39 per cent. of the population, for Wales; 18,222, or 5·21 per cent. of the population, for Scotland; and 54,829, or 15·67 per cent., for Ireland.

The

\* To simplify these returns, I have included amongst the Australians those born in New Zealand and Australia.

The addition to the numbers of the English-born in the decennial period was very small, 3,182, or only 3·78 per cent. To the Welsh, 492 persons, or 35·70 per cent. of their numbers, were added; to the Scotch, 1,819, or 9·98 per cent. of their numbers; to the Irish, 8,114, or 14·79 per cent.

70. The proportion in which the British-born stood to the total population decreased between the years 1861–1871 by 6·69 per cent. Proportion of the British to the total population. for England, 0·02 per cent. for Wales, 1·23 per cent. for Scotland, and 3·17 per cent. for Ireland.

71. Of the 20,675 persons born in Foreign Countries, 1,340 or Foreign Countries. 0·27 per cent. of the population were from the United States, 891 or 0·18 per cent. of the population from France, and 6,623 or 1·32 per cent. of the population from Germany.

In 1861 the members were 1,067 or 0·31 per cent. of the population for the States, 690 or 0·20 per cent. for France, and 5,467 or 1·56 per cent. for Germany.

The addition to their numbers in the decade was therefore 273 or 25·58 per cent. for the Americans, 201 or 29·13 per cent. for the French, 1,156 or 21·14 per cent. for the Germans; and the proportion which each Country stood to our population decreased in the same in period, by 0·04 per cent. for the States, 0·02 per cent. for France, and 0·24 per cent. for Germany.

72. The numbers of the Chinese, which in 1861 were 12,988, Chinese. or 3·71 per cent. of the population, had fallen in 1871 to 7,220, or 1·43 per cent. They had therefore decreased in the intervening period by 5,768, or 44·41 per cent.

73. Taking the males and females separately, we see that the Proportion of sexes. proportion of sexes of *all British-born* was well kept up in the period 1861–1871, with a slight difference in 1871 in favour of the females. Thus, for every 10,000 persons born in the British Empire, there were 5,345 males and 4,655 females in 1871, against 5,427 males and 4,573 females in 1861, which gives a proportion of 8,425 females to every 10,000 males in 1861, and of 8,708 in 1871.

The Australian-born show a great equality of sexes at both periods, the natives of New South Wales numbering 80,106 males and 80,192 females in 1861, and 147,877 males and 146,367 females in 1871. For the whole of the Australian Colonies there were 82,548 males and 82,444 females in 1861, and 155,734 males and 152,939 females in 1871.

The proportion of sexes for the Australian-born was therefore, in 1861, 5,003 males and 4,997 females in every 10,000 persons, or a proportion of 9,987 females to every 10,000 males; and in 1871, 5,045 males and 4,955 females in every 10,000 persons, or a proportion of 9,820 females to every 10,000 males. And for the natives of New South Wales it was 4,997 males and 5,003 females, or a proportion of 10,011 females to every 10,000 males in 1861, and 5,026 males and 4,974 females, or a proportion of 9,828 females to every 10,000 males in 1871.

The English-born show a decrease in the proportion of females, from 5,829 females to every 10,000 males in 1861, to 5,689 in 1871; the Scotch, from 6,556 in 1861, to 6,509 in 1871; the Irish, from 9,858 in 1861, to 9,716 in 1871; the Welsh, on the contrary, show a slight increase, from 5,109 females to every 10,000 males in 1861, to 5,141 in 1871.

From Foreign Countries, the number of females arriving in this Colony is, in proportion to that of the males, very small. From France and Germany it has considerably decreased since 1861. From the

the United States it has slightly improved. From the States there were in 1861, \*1,777, and in 1871, 2,407 females to every 10,000 males. From France, the proportion had fallen from 3,346 females to every 10,000 males in 1861, to 2,306 in 1871. And from Germany it was 4,473 in 1871, against 5,228 in 1861.

Urban and rural parts of the Colony.

74. Tables 27 and 28 give for the year 1871 the percentage of the total population, and the proportion of sexes of persons of different birth-places, in the urban and in the rural parts of New South Wales.

Proportion of the native-born.

75. The proportion of the native-born is larger in the country than in the towns. Thus, 56·76 per cent. of the urban population and 60·36 per cent. of the rural were natives of this Colony.

The centres of population naturally afford a wider field for enterprise and speculation, consequently offering greater attractions to new comers, so that there are in the country a number of localities in which small congregations of people are settled and find the means of earning a livelihood, but which have not yet succeeded in drawing much of the element supplied by immigration, depending entirely for progress upon the natural increase of their numbers.

Proportion of persons born in Great Britain and British Dependencies.

76. 19·42 per cent. of the urban, and 15·30 per cent. of the rural population, were English-born; 0·30 per cent. of the urban, and 0·43 per cent. of the rural, Welsh; 3·76 per cent. of the urban, and 4·09 per cent. of the rural, Scotch; and 13·27 per cent. of the urban, and 11·87 per cent. of the rural, Irish.

Proportion of persons born in Foreign Countries, or at sea.

77. 3·07 per cent. of the urban population, and 4·86 per cent. of the rural, were returned as born in Foreign Countries, or at sea; of which the Chinese contribute 0·61 per cent. in the towns, and 2·16 per cent. in the country.

## RELIGION.

Reasons for not dwelling at any length upon this part of the Census.

78. It is not my intention to dwell at any length upon this part of the returns.

A great many people here, as well as in Great Britain, strongly object to be questioned on the subject of their religious belief. At home, in fact, Parliament has since 1855 refused to sanction the inquiry; and although provision is made in our Census Act for obtaining the information, it was determined to allow the filling up of the column devoted to "Religion" to be optional, the collectors being instructed to be very careful not to press for particulars.

Therefore, notwithstanding that the majority of the people did not hesitate to answer the inquiry, the number of those who refused or omitted to do so amounted to 5,946 persons, or 1·18 per cent. of the population, and the information is necessarily incomplete.

For this reason I did not feel justified in classifying the different returns, such, for instance, as the *social condition* or the *education* of the people in connection with the religious denominations; nor did I consider it requisite to enter into the particulars of the numerous subdivisions of some of the religious sects, but have been content with a careful grouping of those whose religion was stated with respect to the denominations predominating in this Colony.

"Protestants" and "Catholics."

79. The principal sects will be found tabulated under two heads, called, respectively, for convenience, *Protestants* and *Catholics*. The former embracing, in addition to the Church of England, such sects as acknowledge themselves as *Protestants*, as well as those who,

\* The actual numbers in the Colony are considerably less than the figures here quoted. The proportion in every 10,000 is given, because it has been generally adopted throughout the Report.

who, without further specifying the sect to which they belonged, simply returned themselves as *Protestants*. The latter comprising the Roman Catholics, and those who return themselves as *Catholics*, with no other explanation of their religious creed.

I should explain, however, that before adopting this mode of classification, the Enumerators of the different Census Districts were written to on the subject; and their answers, gathered from the explanations of the collectors employed by them, satisfied me that in most cases when the terms "Protestants" and "Catholics" were used they intended to mean "Church of England" and "Roman Catholics" respectively.

80. Of the 503,981 persons enumerated in 1871, 339,392, or 67·34 per cent. of the population belonged to the different sects professing *Protestantism*, 147,627 or 29·29 per cent. of the population were returned as *Catholics*, 2,395 or 0·48 per cent. as Hebrews, 1,166 or 0·23 per cent. as belonging to other persuasions, and 7,455 or 1·48 per cent. as Pagans. In addition to these, 5,946 persons, or 1·18 per cent. of the population, omitted or refused to supply the information.

Division of the population comparison with 1861.
