MUNICIPALITIES.

(REPORT FROM CONFERENCE COMMITTEE ON FINANCIAL POSITION OF)

---

*Ordered by the Legislative Assembly to be printed, 4 December, 1873.*

---

THE SECRETARY TO MUNICIPAL CONFERENCE COMMITTEE to THE COLONIAL SECRETARY.

Camperdown,  
29 September, 1873.

SIR,

I have the honor, by direction of the Municipal Conference Committee, to forward, for your information, the enclosed return, compiled from statistics furnished to the Committee by the respective Municipalities, showing the amount of rates, endowment, &c., proportion of endowment to rates, for the year, the length of roads, &c., in each Borough and Municipal District, and the present liabilities of each Council; also, to state that some of the returns not having yet come to hand, I have been instructed to fill up the columns of such, if possible, from the Government Statistics of 1872-3, No. 141.

I have, &c.,  
WM. PIDCOCK,  
Secretary to Conference.

RETURN showing the Amount of Rates, Endowment, &c., for the Year; Proportion of Government Endowment to Rates now received; when Endowment ceases; Length of Streets, Roads, &c.; and the present Liabilities of each Borough and Municipal District. (Sydney, 29 Sept., 1873.)

BOROUGH.	Average Rates for the Year.			Government Endowment.			Other sources of Income, Loans, &c.			Total.		Proportion of Endowment to Rates.	When Endowment ceases.	Streets and Roads.				Bridges.	Present Liabilities.			Remarks.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MUNICIPALITIES.

(PETITION OF MUNICIPAL COUNCILS RESPECTING ENDOWMENT OF.)

*Ordered by the Legislative Assembly to be printed, 14 January, 1874.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Members of the Municipal Councils of the Boroughs and Municipal Districts of New South Wales,—

HUMBLY AND RESPECTFULLY SHOWETH :—

That your Petitioners believe that the Government is relieved of very much labour and expense by the Municipalities already incorporated in making roads, bridges, and many other improvements within the limits of their respective boundaries.

That in order to complete urgent and necessary improvements (the expenses of which have unavoidably involved an outlay, with the strictest regard to economy, far exceeding the amount raised by rates, endowments, &c., for many years to come) many of the Municipal Councils have been compelled to borrow money, to repay which, with interest, both the endowment and a large portion of the rates must be devoted, leaving a margin barely sufficient to meet ordinary expenses, and nothing whatever to carry on further improvements, or to keep in repair the many miles of roads, streets, and other improvements already made.

That the present rate of endowment, on the scale provided for in the 189th section of the "Municipalities Act of 1867," is inadequate to meet the claims of the Municipalities.

Your Petitioners are of opinion that nothing short of a perpetual endowment, equal to the amount raised by rates, subscriptions, &c., will be sufficient to carry on the necessary works; and pray that your Honorable House will duly consider the matter by amending the 189th section of the present Municipalities Act, so as to meet their requirements.

And your Petitioners, as in duty bound, will ever pray.

*[Here follow 457 Signatures.]*

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF PROSPECT AND SHERWOOD—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 7th May, 1873.

## MUNICIPAL DISTRICT OF PROSPECT AND SHERWOOD.

## BY-LAWS.

The following By-laws, made by the Council of the Municipal District of Prospect and Sherwood, for regulating their own proceedings, and the duties of the officers and servants of such Council—for preserving order at meetings of the said Council—for determining the times and modes of collecting and enforcing payment of rates—for preventing and extinguishing fires—for suppressing nuisances—for compelling residents to keep their premises free from offensive or unwholesome matters—for restraining noisome and offensive trades—and generally maintaining the good rule and government of the said Municipal District,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAWS of the Municipal District of Prospect and Sherwood.

## PART I.

## PROCEEDINGS OF THE COUNCIL AND COMMITTEES—DUTIES OF OFFICERS, SERVANTS, &amp;c.

*Ordinary Meetings.*

1. The Council shall meet for the transaction of business on the first Tuesday in every month, at such hour as they shall from time to time appoint, unless such day shall happen to be a public holiday. In the latter case, the meeting shall be held on such other day as the Mayor may appoint.

*Election of Chairman in the absence of Mayor.*

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from themselves a Chairman for such meeting.

*Business of ordinary meetings.*

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected (if erroneous), and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Correspondence to be read, and orders made thereon if expedient.
- (3.) Petitions (if any) to be read and dealt with.
- (4.) Reports from Committees and minutes from the Mayor (if any) to be presented, and orders made thereon.
- (5.) Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of the Committees or officers, to be made.

(6.) Motions, of which notice has been given, to be dealt with in the order in which they stand on the business-paper.

(7.) Orders of the day to be disposed of as they stand on the business-paper.

*Business may be taken out of regular order.*

Provided that the Council may, by resolution without notice, entertain any particular motion, or deal with any particular matter of business, out of its regular order on the business-paper, without any formal suspension of this section, and may in like manner direct that any particular motion or matter of business shall have precedence at a future meeting.

## GENERAL DUTIES OF THE MAYOR OR PRESIDING ALDERMAN.

*Order.*

4. The Mayor or Presiding Alderman shall preserve order, and his decision on all disputed points of order shall be final; but he is to state his decision without argument or comment.

*The Mayor may take part in proceedings.*

5. The Mayor or Presiding Alderman may take part in all the proceedings of the Council.

*Putting questions.*

6. The Mayor or Presiding Alderman shall put all questions and declare the sense of the Council thereon.

*Pre-audience.*

7. If two or more members rise to speak at the same time, the Mayor or Presiding Alderman shall decide which member is entitled to pre-audience.

*Not to speak a second time.*

8. The Mayor or Presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation, and without introducing any

new matter). The member introducing a motion to have the right of reply; and every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

*Questions put by Mayor.*

9. The Mayor or Presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

*Not speaking to question.*

10. No member shall deviate from the subject under debate, or make personal reflections upon any other member.

*Time for speaking.*

11. No member shall speak on any motion or amendment longer than ten minutes.

*Offensive expressions.*

12. No member shall make use of any expression capable of being applied offensively to any other member.

*Adjournment of debate.*

13. A debate may be adjourned to a later hour of the same day or to another day specified.

*Member entitled to pre-audience.*

14. The member upon whose motion any debate shall be adjourned shall be entitled to pre-audience on the resumption of the debate.

*Calls to order.*

15. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

*Motion for adjournment.*

16. Any motion for adjournment, if seconded, shall be immediately put without discussion, but if such motion be negatived, it shall not be competent for any member to make a like motion until the lapse of a quarter of an hour.

*Rescinding resolution.*

17. It shall be competent to give notice of motion for the rescinding of any resolution on the same day on which such resolution shall have been passed by the Council.

*Motions must be seconded.*

18. No notice shall be taken by the Mayor or Presiding Alderman of any motion unless it be seconded.

*Notices must be in writing.*

19. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn from the business-paper without the leave of the majority of the Council.

*Call of the whole Council.*

20. No motion, the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entered on the business-paper, unless a call of the whole Council has been duly made and granted for that purpose.

*How ordered.*

21. A call of the Council may be ordered by any resolution, of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

*How voting determined.*

22. The Council shall vote by show of hands; but any Alderman may divide the Council on any question, both in full Council or in Committee of the Whole, in which case every Alderman there present shall be compelled to vote; and all divisions shall be entered in the minute-book.

*Question to be read when required.*

23. Any member may require the question under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member whilst speaking.

*How Amendments to be put.*

24. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon; but no such amendment shall be discussed unless and until it be seconded. No motion or amendment shall be discussed until it shall have been reduced into writing.

*Council Clerk to give notice of Committee Meetings.*

25. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee.

*Petitions—No debate.*

26. On the presentation of a petition no debate shall take place until notice has been given in the usual manner; and the only question that can be entertained by the Council on the day of its presentation, shall be, that the petition be received, or that it be referred to a Committee.

*Language of Petitions.*

27. It shall be incumbent on any Alderman presenting a petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

*Petition of parties signing.*

28. All petitions shall be received only as the petitions of the parties signing the same.

*Committees.*

29. Before such Special Committees, as from time to time shall be found necessary, there shall be a Standing Finance Committee. Such Committee shall be appointed by resolution of the Council, within thirty days after the election of the Mayor for the municipal year.

*By-laws of Council observed.*

30. The By-laws, as to the proceedings of meetings of the Council, shall be observed in a Committee of the Whole Council except the rule limiting the times of speaking.

*Chairman of Committees.*

31. Every Committee, of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee, and such Chairman may direct the Council Clerk to call meetings whenever he shall think it expedient.

*Report to be signed.*

32. Every report of a Committee shall be signed by the Chairman thereof.

*Funds of Municipality.*

33. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined before any warrant shall be issued for the payment thereof: Provided that, in cases of emergency, the Mayor, with the assent of any two Aldermen, may authorize the expenditure of any sum not exceeding £5, and such expenditure shall be reported to the Council at its next sitting.

*Security.*

34. In cases where security is required by the Municipalities Act of 1867, no security shall be accepted otherwise than by a vote of the Council.

*Books and papers not to be shown.*

35. No officer or servant appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without leave from the said Council, except as provided by law.

*Common seal.*

36. The common seal shall not be affixed to any document without the express authority of the Council, and every impression thereof shall be verified by the signatures of the Mayor and Council Clerk.

*Seal, Charter, &c., where kept.*

37. The seal of the Municipality, and all charters, deeds, and records of the Council, shall be kept in the custody of the Council Clerk, unless the Council shall otherwise order.

PART II.

COLLECTION AND ENFORCEMENT OF RATES.

*Times and Modes of Collection.*

38. All rates levied or imposed by the Council under the provisions of the Municipalities Act of 1867, and for the purposes mentioned in the said Act, shall be collected once a year. And such rate shall be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

*Rates to be paid at office of Council Clerk.*

39. All rates made and authorized by the Council shall be paid within the time prescribed by the Act, at the Council Chamber of the Municipality, at such hours and such days as the Council shall from time to time appoint.

*Unpaid rates.*

40. The Council Clerk shall prepare, at such times as may be ordered by resolution of the Council, or the Mayor, a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for the payment of the same, and the Mayor shall take immediate proceedings either by summons or by the issue of distress warrants against defaulters.

*Bailiff.*

41. The Bailiff shall be appointed by resolution of the Council, and shall be at any time removable by a like resolution, and shall give such security as the Council shall approve of, for the faithful performance of the duties of such office.

*Levies and distresses.*

42. The Bailiff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor, such warrant to be made in accordance with the form in Schedule hereto, annexed marked A.

*Entry and Levy.*

43. The Bailiff shall be paid for entry and levy made under these By-laws, according to the Schedule annexed marked C.

*Making a distress.*

44. At the time of making a distress the Bailiff shall forthwith make out a written inventory in the form or to the effect of the Schedule annexed marked B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident in the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress has been made, and the Bailiff shall deliver a copy of such inventory to the Council Clerk for the information of all parties concerned.

*Bailiff to enter upon land, &c.*

45. It shall be lawful for the Bailiff, and such assistants as he may require, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein, or thereon, and to remain in such building, tenement, or other property, in charge thereof; and if the sum for which distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipal District as the said Bailiff may think proper to remove them to for such purpose; and the surplus (if any) that may remain after deducting the sum distrained for, together with the expenses attendant upon such distress, shall be paid over on demand to the owner of the goods so sold: Provided always that nothing herein contained as to the time of sale shall apply to any crop of cereals, fruit, or vegetables, which may be growing at the time when such distress shall be made.

*The Bailiff may impound.*

46. The Bailiff, when making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate as shall be most fit and convenient for such purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land and premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and to carry off and remove, the same on account of the purchaser thereof.

*Goods how to be sold.*

47. The owner of any goods so distrained upon may by writing direct and specify the order in which they shall be successively sold, and the said goods and chattels shall in such case be put up for sale according to such direction.

*Proceeds of sale to be paid to Council Clerk.*

48. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses as soon as possible after such sale, also the copy of every inventory and account of every such sale or sales.

*Bailiff may appoint Deputy.*

49. The Bailiff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy, and the person thus authorized shall have and exercise, for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall in such case be held responsible for the act of such deputy.

**SCHEDULE A.****WARRANT OF DISTRESS.**

I, **Mayor of the Municipal District of Prospect and Sherwood,** do hereby authorize you **Bailiff of the said Municipal District,** to distrain the goods and chattels of the dwelling-house, or in and upon the land and premises of **\_\_\_\_\_** situate at **\_\_\_\_\_** for the sum of £ **\_\_\_\_\_** being the amount of Municipal rates due to the said Municipal District, to the **\_\_\_\_\_** day of **\_\_\_\_\_** for the said dwelling-house, land, or premises, as the case may be, and to proceed thereon for the recovery of the said rates according to law.

Dated this **\_\_\_\_\_** day of **\_\_\_\_\_** 187 **\_\_\_\_\_** Mayor.

**SCHEDULE B.****INVENTORY.**

I have this day, in virtue of a warrant under the hand of the Mayor of the Municipal District of Prospect and Sherwood, dated **\_\_\_\_\_** of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of **\_\_\_\_\_** situate at **\_\_\_\_\_** within the said Municipal District, for the sum of £ **\_\_\_\_\_** being the amount of rates due to the said Municipal District, to the **\_\_\_\_\_** day of **\_\_\_\_\_** 187

Dated his **\_\_\_\_\_** day of **\_\_\_\_\_** 187 **\_\_\_\_\_** Bailiff.

(List to be appended.)

**SCHEDULE C.****Costs.**

	s.	d.
For every warrant of distress .. .. .	2	0
For serving every warrant, and making levy .. .. .	2	0
For making and furnishing copy of inventory .. .. .	2	0
For man in possession, each day or part of a day .. .. .	5	0
For sale and delivery of goods, one shilling in the pound on the gross proceeds of the sale, in addition to the costs of advertisements (if any).		

**PART III.****PREVENTING AND EXTINGUISHING FIRES.***Fire or combustible materials, &c.*

50. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction of every such offence forfeit and pay a penalty of not more than five pounds: and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials, to remain as aforesaid, for forty-eight hours after such conviction, shall be deemed guilty of a further offence against this By-law.

*Fireworks.*

51. Every person who shall discharge any fire-arms without lawful cause, or who shall light any bonfire, tar-barrel, or fireworks upon or within ten yards of any public or private street, or any public place, shall forfeit a sum not exceeding five pounds.

**PART IV.***Suppression of nuisances.*

52. No householder or resident in the said Municipal District shall be allowed to permit his or her premises, yards, closets, or drains to be offensive or a nuisance to the adjoining householders or residents.

*Offensive trade.*

53. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining or other houses.

*Notice to proprietor.*

54. Upon complaint being lodged at the Council Chambers that the yard, closets, or drains of any premises is or are a nuisance or offensive, and after inspection such shall be found to be the case notice shall be given in writing to the proprietor or tenant of such premises to remove or abate such nuisance within twenty-four hours after such notice; and if, after such notice the nuisance shall not be removed or abated, the proprietor or tenant of the said premises shall be liable to a penalty not exceeding forty shillings, nor less than five shillings.

*Inspector may visit premises, &c.*

55. Upon complaint being lodged at the Council Chambers, the Inspector of Nuisances may at all reasonable hours, with or without assistants, enter into and inspect any building, stall, or place kept or used for the sale of hutchers' meat, and examine any carcass, meat, flesh, or fish which may be therein; and in case any of such articles shall appear to him to be intended for human food but unfit, the same may be seized by him; and if it shall appear to a Justice of the Peace, upon competent evidence, to be unwholesome, he shall order it to be destroyed; and the owner thereof, or the person in whose custody it was found, shall be liable to a penalty, not exceeding forty shillings, nor less than ten shillings.

*Traffic may be stopped.*

56. The Council, or any person or officer acting under the authority of such Council, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same.

*Rubbish not to be thrown on streets.*

57. No person shall be allowed to throw rubbish, sweepings, broken glass, dead animal, or other offensive matter or thing, or deposit of any kind whatever, on the streets, pathways, or channels, or in any public place within this Municipal District.

*Injury to curbstones, guttering, &c.*

58. No driver, carter, or other person, shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the curbstones, guttering, or pathways of any street or roadway; and no person shall be at liberty to ride on horseback or to drive a wheeled vehicle of any kind on the footways.

*Cattle straying.*

59. It shall not be lawful for any person whomsoever to suffer any cattle, horses, mules, swine, or goats, belonging to him, or under his charge, to stray in any public road or thoroughfare within the said Municipal District.

*Careless riding or driving.*

60. No person shall ride or drive through or upon any street or public place so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered.

*Destroying pathways or roads.*

61. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel, from any of the streets or roads of the Municipality, without the authority of the Council; and for such authority a fee of one shilling shall be paid.

*Placing materials on streets or pathways.*

62. No person shall be allowed to place on the streets of pathways building materials, otherwise than is absolutely necessary, and by the sanction in writing of the Mayor or Council Clerk; and no person shall be allowed to have water-holes or excavations for cellars or other purposes, in or adjoining any public place, unfenced, or in such a manner as to be dangerous to passers-by; and all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

*Damaging trees and shrubs.*

63. No person shall destroy or damage any shrub or tree growing in any street or thoroughfare, or other public place within this Municipality, or injure any hedge, fence, gate, or building in such street, thoroughfare, or public place, or to set fire to any shrubs or trees, or to cut or remove any timber from any such street, thoroughfare, or public place aforesaid, or to destroy, tear, deface, or otherwise injure any notice, proclamation, or other document, purporting to be under the authority of the Council or of any officer of the said Council, which shall be affixed in any public place.

*Persons bathing.*

64. No person shall bathe within two hundred yards of any public road, place, or wharf, unless in some enclosed place, or otherwise in such manner as not to offend against common decency.

*Exposing goods for sale.*

65. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever, to the obstruction of the public.

*Penalty.*

66. For every offence against the provisions of the By-laws of this Municipal District, except as otherwise provided, the offender shall be liable to, and shall pay a penalty not exceeding ten pounds, nor less than five shillings, to be recovered in a summary way before any Justice of the Peace; and all other penalties and fines imposed by such By-laws, except as otherwise provided, shall be recoverable in a summary way before any Justice of the Peace.

Passed by the Council of the Municipal District of Prospect and Sherwood, this first day of April, in the year of our Lord one thousand eight hundred and seventy-three.

ARTHUR T. HOLROYD,

Mayor.

GEORGE EDWARD YOUNG, Council Clerk.

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF PROSPECT AND SHERWOOD—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 8th October, 1873.

## MUNICIPAL DISTRICT OF PROSPECT AND SHERWOOD.

## BY-LAWS.

The following By-laws made by the Council of the Municipal District of Prospect and Sherwood, for the establishment of Tolls and for the proper collection and management thereof, at certain toll-bars erected or to be erected on the Sherwood Road, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## MUNICIPAL DISTRICT OF PROSPECT AND SHERWOOD.

## BY-LAWS.

The following By-laws made by the Municipal Council of Prospect and Sherwood for the establishment of tolls and for the proper collection and management thereof, at certain toll-bars erected or to be erected on the Sherwood Road, of the Municipal District of Prospect and Sherwood.

## SHERWOOD ROAD TOLL-BARS.

*Tolls established.*

1. Tolls to the several amounts herein prescribed shall be demanded, paid, and taken at the several toll-gates or toll-bars mentioned and described in Schedule A hereto.

2. The Council of the said Municipality shall have power to appoint by resolution a collector for said toll-gates or toll-bars, or to lease or let the same by public auction or by private contract, or otherwise to appoint, lease, or let, release, or relet, as above, and as often as it may be necessary, and for any period not exceeding three years, and to fix the upset price at which the said toll-gate or toll-bar shall be leased or let; and in case a collector is appointed he shall be removable by a like resolution.

*Securities for Collector.*

3. Every such collector or lessee shall find security to the satisfaction of the Mayor, and to such a sum as the Council shall determine, for the faithful performance of his duty.

*Payment and recovery of Tolls.*

4. All such tolls shall be paid to the respective collectors thereof, to be appointed as aforesaid, in such several amounts for the respective animals or vehicles as are specified in Schedule B hereto; and if any person liable to the payment of such toll, other than those exempted from toll, as hereinafter provided, shall, after demand thereof, neglect or refuse to pay

any such toll, the collector, lessee, or other person lawfully in charge thereof may prevent such person, or any such horse, beast, cattle, carriage, or other vehicle in respect of which any such toll is payable, from passing to, through, or by, or from being ridden, led, or driven through or by such toll-gates or toll-bars.

*Exemption from Toll.*

5. No toll shall be demanded or taken by virtue of this By-law for any horses or carriages belonging to, or conveying, or attending, or going to convey or attend, or returning from having conveyed or attended the Governor, or of or from any of Her Majesty's officers or soldiers, being in proper staff, or regimental, or military uniform, dress, or undress, for any horse ridden, or any horse or carriage then employed by such officer or soldier upon or for Her Majesty's service, or returning from such employment; or of or from any member or any Corps of Volunteers going to or returning from exercise as such, for any horse ridden by such member; or for any gun-carriage, waggon, or other vehicle belonging to any such Corps, or then being employed exclusively for the purpose of the same, or returning from such employment, and not otherwise employed; or for any horses, carriage, or other vehicle of or belonging to the Government, or to the Council of the Municipal District, and then employed in the service of the said Government or Council; or of or from any member of the Police Force being on actual duty, or prisoners under the charge of such member of the Police Force, or for any horse or carriage exclusively employed in carrying such member of the Police Force or prisoner or their baggage respectively, or returning from such employment, and not otherwise employed; or for or in respect of any horse, beast, carriage, or other vehicle exclusively employed in conveying the Post Office mails, and not otherwise employed; or of or from any person actually following a funeral; or for or in respect of any horse, beast, carriage, or other vehicle carrying any clergyman or preacher in the discharge of his duty; or for any sheep, lamb, pig, goat, ox, bull, cow, calf, horse, mare, gelding, ass, mule, colt, and filly;

or for any carriage, cart, dray, waggon, or other vehicle *bona fide* the property of any ratepayer of the municipal district of Prospect and Sherwood, and whose rates are not in arrear and unpaid. Provided always, that if any ratepayer of the said Municipality shall lend his ticket of exemption to any person for the purpose of evading payment of toll, such ratepayer shall be disqualified for twelve months thereafter from non-payment of toll, and provided further that the ratepayer shall produce his ticket of exemption whenever so required by the collector or lessee of the said tolls. Provided always that every such member as aforesaid of any Volunteer Corps, or of the Police Force shall have his dress and accoutrements according to the regulations of such Corps or Force for the time being.

*False claim of exemption.*

6. If any person shall claim or take the benefit of any of the exemptions from toll hereinbefore mentioned, not being entitled to the same, he shall on conviction forfeit and pay for every such offence a penalty of not less than one pound nor more than five pounds.

*Evasion of toll.*

7. If any person shall, with any horse, cattle, beast, or carriage, go off or pass from any street or road through or over any land or ground near to or adjoining thereto (not being a public highway, and such person not being the owner, occupier, or servant, or one of the family of the owner or occupier of such ground), with intent to evade the payment of any toll payable under this part of these By-laws,—or if any owner or occupier of any such land or ground shall knowingly or willingly permit or suffer any person (except as aforesaid), with any horse, cattle, beast, or carriage whatsoever, to go or pass through or over such land or ground with intent to evade any such toll,—or if any person shall give or receive from any person other than a collector of such tolls, or shall forge, counterfeit, or alter any note or ticket hereby directed to be given, with intent to evade the payment of any such toll or any part thereof,—or if any person shall fraudulently or forcibly pass through or by any such toll-gate or toll-bar with any horse, cattle, beast, or carriage, or shall leave upon such street or road any horse, cattle, beast, or carriage whatsoever, by reason whereof the payment of any toll shall be avoided or lessened, or shall take off or cause to be taken off any horse or other beast or cattle from any carriage either before or after having passed through, by, or over any such toll-gate or toll-bar, or having passed through or by the same, shall afterwards add or put any horse or other beast to any such carriage and draw therewith upon any part of such street or road so as to increase the number of horses or other beasts drawing the said carriage after the same shall have so passed, whereby the payment of all or any part of the toll shall or may be evaded,—or if any person shall do any other act whatever in order or with intent to evade the payment of all or of any such toll and whereby the same shall be evaded,—every such person shall for every such offence forfeit and pay any sum not less than five shillings nor more than five pounds.

*Toll Board.*

8. The By-law Committee shall cause to be put up and continued on some conspicuous part of or near each such toll-gate or toll-bar as aforesaid, so that the same shall be visible to public view, a table painted in distinct and legible black letters at least two inches in length and of a breadth in proportion, on a board with a white ground, containing at the top the name of the toll-gate or toll-bar at which the same shall be put up, and also containing a list of the tolls payable thereat respectively, distinguishing the several tolls and the different sorts of animals or vehicles for which they are to be paid; and the said Committee shall also cause to be provided tickets denoting the payment of the toll, and on such several tickets shall be specified the name of the toll-gate or toll-bar at which the same shall be delivered, and one of such tickets shall, if demanded, be delivered gratis by the collector to every person paying any toll.

*Collector's Board.—Offences by Toll-collector.*

9. The toll-collector at each such toll-gate or toll-bar as aforesaid shall place or cause to be placed on some conspicuous part of or near such toll-gate or toll-bar, and so that the same shall appear to public view, his christian name and surname,

painted in black on a board with a white ground, each of such letters of such name to be at least two inches in length and of a breadth in proportion; and such board shall be and remain at such toll-gate or toll-bar during the whole of the time during which the person whose name shall be expressed thereon shall be on duty thereat; and if any such collector shall not place such board and keep the same there during the time he shall be such collector as aforesaid, or shall demand and take a greater or less toll from any person than he shall be authorized to do by virtue of this "Part" of these By-laws, or shall demand and take a toll from any person or persons who shall be exempt from the payment thereof and claim such exemption, or shall refuse to permit or suffer any person or persons to read, or shall in anywise hinder any person or persons from reading the inscriptions on any board put up or kept hereunder, or shall refuse to tell his christian name and surname to any person or persons who shall demand the same on being paid the said tolls or any of them, or shall in answer to such demand give a false name or names, or shall refuse or when required omit to give the person paying the toll a ticket denoting the payment thereof and naming and specifying the toll-gate or toll-bar at which the same has been delivered, or upon the legal toll being paid or tendered shall unnecessarily detain or wilfully obstruct, hinder, or prevent any passenger from passing through or by such toll-gate or toll-bar, or shall make use of any scurrilous or abusive language to any passenger—every such collector shall on conviction forfeit and pay for every such offence a penalty not exceeding five pounds.

*Collector to keep Accounts.*

10. Every such collector or lessee of tolls shall keep and render such accounts of all his receipts for such tolls as the Council or the Finance Committee thereof, may from time to time direct and require, and shall pay over all such receipts at such times and to such officer of the Council as the said Council may from time to time direct.

**SCHEDULE A.**

The Sherwood Toll-bars, situate at the junction of the Sherwood Road and the road through the Church and School Lands near Mr. Alderman Holroyd's stockyard, and erected or to be erected or established at such place in virtue of a resolution of the Council of the Municipal District of Prospect and Sherwood, bearing date the 15th day of July, 1873.

**SCHEDULE B.**

*Schedule of Charges to be made at the Sherwood Toll-bars.*

	s.	d.
For every sheep, lamb, pig, or goat.....	0	04
For every ox or head of neat cattle.....	0	1
For every horse, gelding, mare, ass, mule, colt, or filly.....	0	2

For every waggon, coach, chariot, chaise, or other such carriage, drawn by two horses or other animals.....	1	0
For every waggon, coach, chariot, chaise, or other carriage with four wheels, drawn by three horses or other animals.....	1	3
For every waggon, coach, chariot, chaise, or other such carriage with four wheels, drawn by four horses or other animals.....	1	6
And for every additional horse or other animal drawing such waggon, coach, chariot, chaise, or other such carriage with four wheels.....	0	3

Passed by the Council of the Municipal District of Prospect and Sherwood, on Tuesday, the 15th day of July, 1873.

ARTHUR T. HOLROYD,

Mayor.

GEORGE EDWARD YOUNG,  
Council Clerk.

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF SHELLHARBOUR—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 9th July, 1873.

## BOROUGH OF SHELLHARBOUR—BY-LAWS.

THE following By-laws made by the Council of the Borough of Shellharbour, for the extirpation of weeds and for the charging of mileage, having been confirmed by His Excellency the Governor with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAW for the Extirpation of Weeds.

THE Council may at any time cause an inspection to be made of all lands within the Municipality by an officer appointed for that purpose, whose duty it shall be on making such inspection to report to the Council on the state of the growth of the Scotch thistle, Bathurst burr, cotton plant, or other weeds that may be detrimental to good husbandry, on all such lands; and the Council may direct such officer to serve a notice on the owner, tenant, or occupier of any such lands, to destroy all such weeds within a reasonable time, not being more than sixty days nor less than seven days from the date of service of such notice; and if such owner, tenant, or occupier shall fail or neglect to destroy all such weeds within the time required by such notice, he or she shall forfeit and pay any sum not less than five shillings nor more than two pounds for every such offence; and the Court may order all such weeds to be destroyed at the expense of such owner, tenant, or occupier forthwith, in addition to any penalty that may be inflicted upon him or her aforesaid.

Passed by the Municipal Council of Shellharbour, this 17th day of May, in the year of our Lord one thousand eight hundred and seventy-three.

[L.S.] ROBERT WILSON,  
Mayor.

## SUPPLEMENTARY BY-LAW for the charge of mileage—Addition to B Schedule of Fees.

For mileage, where the warrant shall be executed—for the first mile or part of a mile ..... 1s.  
And for every additional mile or part of a mile from the Council Chamber..... 6d.

Passed by the Municipal Council of Shellharbour, this 17th day of May, in the year of our Lord one thousand eight hundred and seventy-three.

[L.S.] ROBERT WILSON,  
Mayor.

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF SHELLHARBOUR—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 25th October, 1873.

## BOROUGH OF SHELLHARBOUR.

## BY-LAWS.

The following By-laws, made by the Council of the Borough of Shellharbour, for regulating the Free Library established in that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

BY-LAWS for regulating the Shellharbour Free Library, established 6th September, 1873.

1. The Council shall appoint a Librarian, who shall make out and keep a catalogue of all books in the Library.
2. The Library shall be open for issuing and receiving books on every ordinary day for holding Council meetings, from 10 a.m. till 12 noon, and on every Monday from 4 p.m. till 7 p.m.
3. The Librarian shall keep a book, in which he shall enter the name and number of every book issued, and the name of the person taking the book, the date on which it was issued, and also the date on which the book was returned to the Library.
4. The persons entitled to use the Library shall be every householder within the limits of the Borough of Shellharbour.
5. Not more than one book shall be issued to any person at one time, nor shall any person be allowed to take a book from the Library until any book or books he or she may have previously taken out are returned: Provided that in cases where four members of a family are known to be able to read, it shall be competent for the Librarian to issue two volumes, and if a family consist of six persons able to read, three volumes, to the members of such household.
6. The period for which any book may be kept shall be one month, under a penalty or fine of three pence (3d.) per week for every week that such book may be kept beyond that time.
7. Any book or books lost or damaged by any person shall be replaced at his or her expense within one month, and in default the person or persons so offending may be sued for the value of such book or books by the person in charge of the Library, or by the Mayor of the Borough.
8. Any person in a state of intoxication applying for a book shall not be entitled to receive one.
9. Any person behaving in a disorderly manner while in the Library, or on the premises, or damaging any property in such Library, shall, for every such offence, be liable to a fine of not less than five shillings (5s.), and shall make good and replace the damaged property.
10. All fines and penalties incurred under these By-laws may be recovered in a summary way before any two Justices in Petty Sessions, and such fines so recovered shall be paid over to the Treasurer of the Municipal Council, together with costs, within (7) seven days, and may be applied to defray the working expenses of the Library; and in default of such payment being made, the amount may be recovered by levy and distress on the goods and chattels of the person or persons so defaulting.

Made and passed by the Municipal Council, this 6th day of September, 1873.

ROBERT WILSON. (L.S.)

RICHARD HALL,  
Council Clerk.

1873.

NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF LEICHHARDT—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 28th July, 1873.

## MUNICIPAL DISTRICT OF LEICHHARDT—BY-LAW.

THE following By-law, made by the Council of the Municipal District of Leichhardt, in substitution for clause 17 of Part IV of the By-laws relating to "Driving cattle, &c.," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

## BY-LAW.

ANY person or persons driving cattle (excepting milking cows), sheep, swine, or unbroken horses, on any road, street, or public place within the boundaries of the Municipality, excepting on the Abattoir Road, shall, on conviction, forfeit and pay any sum not exceeding five pounds nor less than forty shillings for every such offence.

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF WINDSOR—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 25th August, 1873.

## BOROUGH OF WINDSOR.

## BY-LAWS.

THE following additional By-laws, made by the Council of the Borough of Windsor, for laying out roads and streets—providing for the public health—altering Rule 1 of Part I of existing By-laws—and generally maintaining good rule and government within the Borough,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

## BOROUGH OF WINDSOR.

ADDITIONAL By-laws, made by the Municipal Council of the Borough of Windsor, for laying out roads and streets—providing for the public health—altering Rule 1 of Part I—and generally maintaining good rule and government of the said Borough.

## PART VIII.

## STREETS AND ROADS—PUBLIC HEALTH.

*Committee for Works to fix street levels.*

1. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Borough and the carriage-ways and foot-ways thereof. And it shall be the duty of such Committee, officer, or person, to place posts or stones at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council.

*Change of street levels.*

2. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section, showing the proposed cuttings and fillings, to be exhibited at the Council Chamber for fourteen days, for the inspection and information of rate-payers, and shall notify by advertisement in some newspaper circulating in the Borough that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman,

and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section, so signed and countersigned, shall be a record of the Council.

## PUBLIC HEALTH.

*Cleansing butchers' shambles, &c.*

3. For preserving the cleanliness of the said Borough, and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council, from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect any premises, yards, closets, drains, and any establishment within the said Borough, and to give such directions concerning the cleansing the said premises, yards, closets, drains, and establishments, both within and without, as to him shall seem needful; and any owner or occupier of any such premises, yards, closets, drains, and establishments, who shall refuse or neglect to comply with such directions within a reasonable time, shall for so doing forfeit and pay, on conviction in a summary manner, a sum not exceeding five pounds, nor less than ten shillings, for every such offence.

## ALTERATION OF RULE 1, PART I.

*Alteration of dates for holding ordinary Council Meetings.*

Rule 1 of Part I shall be altered as follows: The words "every first and third Wednesday of each month" shall be repealed and omitted, and the words "every alternate Wednesday" inserted in lieu thereof, as the days whereon the ordinary meetings of the Council shall be held.

Made and passed by the Municipal Council of Windsor, this fourth day of June, in the year of our Lord one thousand eight hundred and seventy-three.

JOHN THOS. SMITH,  
Council Clerk.

WM. DEAN,  
Mayor.

1873.

NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF ALBURY—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 4th October, 1873.

## BOROUGH OF ALBURY—BY-LAW.

THE following By-law, made by the Council of the Borough of Albury, in substitution for clause 20 of Part II of the By-laws of that Municipality, relating to placing awnings or verandahs in front of shops or houses, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the Municipalities Act of 1867.

HENRY PARKES.

## BOROUGH OF ALBURY.

## AMENDED BY-LAW.

ON and after the date of the publication hereof, the Albury Borough By-law No. 20, of part II, "Placing awnings or verandahs in front of shops or houses," will be rescinded, and the following By-law substituted in lieu thereof:—

*Placing Awnings or Verandahs in front of shops or houses.*

Nothing in these By-laws contained shall be deemed to prevent any person from placing an awning or verandah in front of his or her shop or house; provided, however, that such awning or verandah be not less than ten feet above the height of the footway in front of such house or shop, and that the posts be placed into the kerb at the outer edge of such footway.

Passed by the Borough Council of Albury, on the 13th day of August, 1873.

GEORGE DAY,  
Mayor.SAMUEL MUDGE, Council Clerk,  
August 27th, 1873.

1873.

## NEW SOUTH WALES.

**MUNICIPALITIES.**

(MUNICIPAL DISTRICT OF LIVERPOOL—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 16th October, 1873.

## MUNICIPAL DISTRICT OF LIVERPOOL.

## BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Liverpool, for regulating their own proceedings, for the collection of rates, the suppression of nuisances, the care and management of public roads, streets, and ways, for preventing and extinguishing fires, and generally for the good order and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

BY-LAWS for regulating the proceedings of the Council of the Municipal District of Liverpool, the collection of rates, suppression of nuisances, the care and management of public roads, and streets, and ways which are at present, or which shall be, within the control of the Council, preventing and extinguishing fires, and for the good order and government of the Municipality.

*Standing Orders.*

1. If at the expiration of thirty minutes after the time appointed for holding any legally convened meeting of the Council the Mayor shall be absent, any Alderman present may be elected Chairman for that particular meeting.

2. The Mayor may take part in all the proceedings of the Council, and shall preserve order, and on any disputed point of order his decision shall be final.

*Order of business.*

3. The business of the Council shall be conducted in the following order:—

1. Reading and confirmation of the minutes of the preceding meeting.
2. Immediately after the minutes of the previous meeting are read, the question as to correctness shall be put, and no discussion thereon shall be permitted, except as to point of accuracy.
3. Reading of official correspondence.
4. Presentation of petitions.
5. Reports from committees, and minutes from the Mayor, to be dealt with.
6. Questions on matters under the official cognizance of the Council to be put, and replied to; and statements upon matters which may require the attention of the Council, or any of its committees or officers, shall be made; provided that notice shall be given of all such questions as require for their answer a detailed reference to the books.

7. Motions of which due notice has been given shall now be considered, in the order in which they stand on the business paper, unless the Alderman giving such notice waives his right in favour of any other motion, when such suspended motion shall be considered as standing in the position of the one taken up.

8. Orders of the day,—That is, any matters which a previous meeting of the Council, or any of its committees, or the Mayor, shall have directed to be placed on the business paper, as necessarily arising out of the proceedings of a former meeting.

4. All motions duly proposed shall be put by the Mayor, and the sense of the Council shall be declared by him.

5. Every such motion shall be put—first in the affirmative, and then in the negative, as often as the Mayor shall deem necessary to enable him to ascertain which side has the majority.

6. If more than one member rises to speak at the same time, the Mayor shall decide which is entitled to the priority.

*Rules of debate.*

7. Every member, when speaking to any motion or question, shall stand up and address the chair.

8. When the Mayor rises to address the Council every member shall sit down; but he shall not interrupt a speaker, unless it be to set him right as to the question before the Council, or call him to order.

9. No member shall digress from the subject under debate, nor make personal reflections on members, nor impute improper motives to them.

10. No member shall speak more than fifteen minutes when moving any motion or amendment, unless by permission of the Council; seconders or other speakers shall be confined to ten minutes.

11. Except in committee no member shall speak more than once upon the same motion, unless by way of explanation, when misunderstood or misrepresented: Provided that every member shall have the right to speak once on every amendment, the mover of the principal motion only having the right of reply.

12. When the mover of any motion has made his reply, the question shall be at once put and a vote taken.

13. When any member uses an expression which is liable to be applied offensively to any other member, the Mayor shall require him to withdraw such expression, and make a satisfactory apology to the Council.

14. When a question of order arises, the person who was speaking shall sit down until the point has been debated and decided. No other business shall be allowed to intervene.

15. Any member may require the motion under discussion to be read at any time during the debate, yet so as not to interrupt any other member when speaking.

16. Any debate may be adjourned to any specific time or day, and the member upon whose motion the adjournment takes place shall be entitled to commence the resumption of the subject.

#### Questions of order.

17. Every member shall have the right to call the attention of the Mayor to any subject, argument, or observation, made or used by any other member, which he shall consider a breach of good order.

18. Should any Alderman be dissatisfied with any rule or principle of order, as laid down by the Mayor, he shall have the right to invite the Council by motion to consider the subject, and to lay down a different rule or principle for the determination of similar questions in future. Such rule or principle shall be binding on all parties, unless it shall be found to involve matters contrary to law.

#### Motions.

19. Notice of motion must bear the signature of the member forwarding it. No motion shall be considered which has not been given in at least four days before the time of meeting.

20. When a motion has been duly moved and seconded, it becomes the property of the Council or Committee, and cannot be withdrawn without leave.

21. When a motion is before the Council, any amendment thereon shall not be discussed until after it is seconded and placed before the Council in writing.

22. Only one amendment upon a motion or question shall be before the Council at the same time; and, if the amendment is carried, it shall form part of the original question, and may be subject to further amendment, but should the amendment be negatived then another amendment may be moved.

23. No motion, the effect of which would be to rescind or counteract any resolution which has been passed by the Council, shall be entertained unless a Call of the Whole Council is made for that purpose, when, if the question is negatived, it shall not be again introduced for a period of three months.

24. A motion for adjournment shall be put at once, and, if negatived, shall not be again put until half-an-hour has elapsed.

#### Petitions.

25. When a petition has been presented, the member in whose charge it is must be able to report to the Council that its language is respectful.

26. No debate or action shall be taken upon such petition, except referring it to a Committee, or that due notice has been given thereof.

27. No petition shall be received unless at least one signature is written upon the sheet containing such petition.

#### Committees.

28. In Committees of the Whole, the general rules of the Council shall be observed, except as regards the number of times of speaking.

29. Every Committee of which the Mayor is not an elected member shall choose its own Chairman, who shall be the convener thereof, and shall direct the Council Clerk to call meetings whenever he shall think proper.

30. No report from Committees shall be presented to the Council unless signed by the Chairman thereof.

31. Every report from a Committee shall be signed by its Chairman.

32. All reports of Committees shall be fairly written on foolscap paper with convenient margin for binding.

33. No report from Committee shall be adopted without notice in the usual way.

34. The Standing Committees shall be appointed by the Council as soon as convenient after the election of Mayor, and any vacancies occurring therein during the year shall be filled by the Council.

35. Every member proposing a Select Committee must propose himself as one of its members.

36. Every Committee shall keep minutes of any evidence of facts taken before it, and every report brought up shall have appended thereto the substance of such evidence.

#### The Finance Committee.

37. The Mayor shall (*ex officio*) be Chairman of the Finance Committee, which shall have charge of all matters relating to the finances of the Council; and no accounts affecting the corporate funds shall be disposed of until such committee has examined and reported thereon.

38. The Mayor and Finance Committee may, during the interval of regular meetings, authorize the expenditure of any sum not exceeding ten pounds.

#### Committee of Works.

39. The Works Committee shall have the oversight of all works ordered by the Council, all necessary improvements to roads, streets, ways, or bridges, and shall report upon all matters connected therewith, and no action shall be taken or expenditure incurred thereon until such report has been adopted by the Council.

40. No payments of accounts relating to matters under the cognizance of the Works Committee shall be paid until such committee has reported them correct.

41. The Committee of General Purposes shall have charge of all sanitary regulations, purchasing office furniture, and all other matters which may arise that do not come under the direct cognizance of the other committees, or are not specially referred to a Select Committee.

#### Miscellaneous.

42. On no account shall tenders sent into this Council, or to any of its Committees, be opened, or the covers thereof disturbed, until the Council or such Committee are in sitting prepared to consider them.

43. In cases of emergency, arising from flood or fire, such matters as can be suddenly called together by the Mayor, or Council Clerk, or Chairman of any Committee, as the necessities of the case may be, shall be empowered to expend any sum not exceeding twenty pounds.

44. All emergency expenditure shall be reported on at the then next meeting of the Council.

45. Before any proposed by-law affecting the general interests of the body corporate shall be adopted by the Council, fourteen days' notice thereof shall be given, during which time it shall be open for public inspection at the office of the Council during office hours.

46. Whenever the Council is adjourned for want of a quorum, the hour of such adjournment and the names of the members present shall be entered on the minutes.

47. The Council Clerk shall generally assist the Mayor in executing all orders or directions of the Council, conduct all official correspondence, have charge of all records and the corporate seal, and be responsible for the same.

48. The corporate seal shall not, except in special cases, be affixed to any document except by vote of Council, and every impression thereof shall be verified by the signature of the Mayor and Council Clerk.

49. Any member may enter a protest against any decision of the Council, provided he there and then gives verbal notice of his intention so to do, and forwards the same in writing to the Council Clerk within fourteen days thereafter, or hands it in at the then next meeting of Council, whether special or regular.

50. No Alderman or officer of the Council shall be accepted as security for any of its officers.

51. The Clerk shall prepare and lay before the Council a quarterly report of all moneys received and expended during the term, and also showing the Bank balance.

52. No election to any paid office of the Council shall take place until after fourteen days' notice shall have been given in a newspaper circulating in the locality.

53. Unless as provided by law no officer of the Council shall be at liberty to exhibit the records of the Council to any person not an Alderman, without a special order from the Council.

54. When any motion embraces several propositions, it may, by resolution of Council, be subdivided, and each proposition considered separately or collectively as the case may require.

55. The members of every Committee of which the Mayor is not a member, shall elect their permanent Chairman within seven days after their appointment.

56. The Council Clerk shall call a meeting of any Committee when requested to do so by its Chairman or any two of its members.

57. No part of any or all of these By-laws or Standing Orders shall be taken or construed so as to interfere with the rights or privileges of the Mayor or Aldermen which have been by law established.

58. No motion which has been entered on the business paper shall be withdrawn without the leave of the Council.

59. Any one of these Standing Orders may, in case of emergency, be suspended: Provided that such suspension does not interfere with any of the directions given in the "Municipalities Act of 1867."

60. When any such suspension is voted, no business other than that for which such suspension is made shall be discussed thereunder.

*Collection of Rates.*

61. The rates shall be collected half-yearly, and shall be held to be due and payable at the office of the Council Chambers, on such days as the Council may from year to year appoint.

62. The Council Clerk shall furnish the Mayor with a list of persons in arrears of rates within one month after the day appointed for the payment of the same.

63. All arrears of rates may be recovered by levy and distress, or by summons at any Court of competent jurisdiction.

*The Bailiff.*

64. The bailiff, either permanent or temporary, shall be appointed by resolution of Council, and shall be removable by like resolution, and shall, before performing any of the duties of such office, give security in two bondsmen of not less than the sum of ten pounds each.

65. All levies and distresses shall be made under warrant in the form of Schedule A, signed by the Mayor, with the corporate seal thereto attached, and countersigned by the Council Clerk.

66. At the time of making a distress the bailiff shall make an inventory of all goods or chattels so levied upon, in the form of Schedule B, a copy of which shall be delivered to the occupant of the land or premises, or the owner of the goods so levied upon, or to some person resident at the place where such distress shall be made; and in case there shall be no person at the place with whom such inventory can be left, such inventory in plain legible writing shall be posted on some conspicuous part of the land or premises on which such distress has been made, and a notification thereof addressed to the owner, published in some newspaper circulating in the neighbourhood; and the bailiff or the Council Clerk shall give a copy of such inventory to the ratepayer on demand within one month after the making of such distress.

67. When such distress has been made, the bailiff for better security of the goods so levied upon may remove the same to any place within the municipality; or he may impound the said goods or chattels on any part of the land or premises upon which such distress has been made, and leave a person or persons in charge thereof who shall exhibit such goods or chattels to all intending purchasers who come to view them; and if at the expiration of five days after such distress has been made, the full amount, with all costs and charges thereon, for which such distraint has been made, is not paid, the said goods, or a sufficient portion thereof, shall be sold by auction, and an account-sales, with any surplus cash, shall be given to the owner of such goods so sold on demand made by him during office hours; and any person purchasing goods so sold, or anyone on his or her behalf, shall be at liberty to enter upon or into the land or premises where such goods or chattels are, during the period of two legal days, for the purpose of removing the same.

68. The owners of goods or chattels so distrained upon shall have the option of directing the order in which such goods shall be sold; and within three days after such sale the bailiff shall enter into a book provided by the Council for that purpose a detailed account-sales, and hand over the proceeds thereof.

69. The costs and charges for every levy or distress and sale shall be in accordance with Schedule C.

*SCHEDULE A.**Warrant of Distress.*

I, \_\_\_\_\_, Mayor of the Liverpool Municipal District, hereby authorize you, \_\_\_\_\_, the Bailiff of the said Municipal District, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of \_\_\_\_\_ situated at \_\_\_\_\_ for the sum of \_\_\_\_\_, being the full amount of rates due to the said Municipal District, for the period of \_\_\_\_\_ ending \_\_\_\_\_, for the said dwelling-house, or land, or premises; and to proceed thereon for the recovery of said rates according to law.

Dated this \_\_\_\_\_ 187 \_\_\_\_\_.

Mayor.  
(Seal)  
Council Clerk.

*SCHEDULE B.**Inventory.*

I have this day, pursuant to warrant under the hand of the Mayor and seal of the Municipal District of Liverpool, dated \_\_\_\_\_, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of \_\_\_\_\_ situate at \_\_\_\_\_, within the said Municipal District, for the sum of \_\_\_\_\_, being the amount of rates named in the warrant as due to the said Municipal District, for the period of \_\_\_\_\_ ending the \_\_\_\_\_ day of \_\_\_\_\_.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 187 \_\_\_\_\_.

(Here follow the goods and chattels in detail.)

Bailiff.

*SCHEDULE C.**Bailiff's Fees.*

s. d.

1. For making entry in or upon the premises in executing a warrant with or without inventory 2 6
2. If more than one hour in possession (additional) 2 6
3. For every other day or part of a day ..... 2 6
4. 2½ per cent. on the net proceeds of sale.

*Suppression of Nuisances.*

70. Upon the representation of any householder or occupier of land or premises, that the house or premises, yards, closets, or drains of the adjoining premises are a nuisance or kept in an offensive condition, the Mayor or any two Aldermen shall cause an inspection of the same to be made; and if the complaint is sustained, notice shall be given in writing to the owner or occupier of such premises, that if such nuisance is not abated or removed within seven days after service of such notice, he, she, or they shall be liable to a penalty of not more than ten pounds nor less than one pound.

71. Any officer appointed by the Council to inspect nuisances shall be the person to whom such complaint shall be made in the first instance; and such officer shall have power to inspect the premises complained of, and report the same to the Mayor; and any person hindering such officer in the discharge of his duty, shall be subject to a penalty of not more than two pounds.

72. Any person casting filth, rubbish, or any dead animal into any public watercourse, sewer, waterhole, drain, or reservoir; or who shall suffer any dead animal to remain on his, her, or their land or premises, so as to be or become a nuisance; or who shall suffer filth of any kind whatsoever to flow from their premises over the footways of the streets or roads within the Municipality; or who shall, by means of drains or other contrivances, cause filth of any kind whatsoever to flow into any public watercourse, waterhole, or reservoir; or who shall divert any such watercourse or drain from its proper course or channel,—shall, in addition to the cost of restoring such road, drain, footway, waterhole, or reservoir to its proper state, or of removing such filth or rubbish, pay a penalty of not more than five pounds.

73. Any person allowing any horse, cow, swine, sheep, or goats, belonging to him, her, or them, to stray about the public streets, or be tethered thereon, shall forfeit and pay a sum not exceeding two pounds.

74. Upon the representation of any respectable resident or owner of property within the Municipality, that any house near to or adjoining his premises is a house of ill-fame, it shall be lawful for the Mayor or any two Aldermen to take such legal steps for the removal of the same as may be found necessary; and upon conviction, the owner of such establishment shall be liable to a penalty of not more than fifty pounds nor less than five pounds. And if such nuisance is not removed from within the bounds of the Municipality within three days thereafter, he, she, or they shall be liable to a further penalty of five pounds, and for every forty-eight hours thereafter that such nuisance is continued a further sum of five pounds.

75. Any person who after the passing of these By-laws shall be found bathing within two hundred yards of any residence, public watering-place, or public road, in any river, creek, or waterhole, between the hours of six o'clock in the morning and eight in the evening, shall be liable to a penalty not exceeding one pound.

*Public Roads and Streets.*

76. No new road, street, lane, or park, or other place, to be dedicated to the public, shall be taken under the control or management of the Council until after it shall have been examined and reported upon to the Council by the Committee of Works.

77. Whenever it shall become necessary to alter the levels of any street, road, or lane, above or below the depth or height of 2 feet, the Council shall cause a plan and sections of such alterations, which shall be exhibited at the Council Chambers, during the period of twenty-one days, for the inspection of ratepayers; and notification of such plan and section shall be given by advertisement in some newspaper circulating in the locality, and by notice written in a plain hand in front of the Council Chambers. If, during the said period of twenty-one days, no valid objection against such alterations of levels is made, the Council may alter or adopt the same as they see fit; but such alterations (if any) shall in no case increase the depth or height as marked on such plan, and when adopted it shall be signed by the Mayor, and countersigned by the Council Clerk, and be a record of the Council.

78. The Works Committee, or the Surveyor (if any), or any person acting for him, shall, when necessary, mark out any roads, streets, or lanes, in actual public use, or such as have been dedicated to the public by any plan of sale, or lease of land within the boundaries of the district. And it shall be lawful for the Council, or any of its officers appointed for that purpose, to have recourse to any such plans or correct copies thereof, for the purpose of defining the point of entrance and point of exit of such road, street, or lane.

79. When any street, road, or lane has been definitely marked off, the Works Committee, or the Surveyor, shall cause posts to be placed at the corners of the intersections thereof, leaving, for every street of 1 chain wide a carriage-way of 42 feet, and for every road or street other than 66 feet wide such width of carriage-ways such Committee or Surveyor shall deem necessary.

80. Any person who shall open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of any road or footway or other public place within the Municipality, without leave from the Council, or who shall in any way wantonly damage any such road or footway, shall forfeit and pay, for every such offence, a sum not exceeding five pounds nor less than five shillings.

81. If any person, after the publication of these By-laws, shall erect, or cause to be erected, any building or other structure on any part of any road, street, or way, such person or persons shall be compelled to remove such building or structure, or any part of the same which may be found to obstruct or prevent the even alignment of such street, road, or way; and if the same is not removed within seven days after notification from the Council, the person or persons to whom such obstructions belong shall pay all costs and charges incurred by the Council in removing the same, in addition to a penalty of not more than ten pounds nor less than five pounds: Provided that the Council, if they see fit, may, instead of removing such obstruction, proceed by action of trespass against the person causing such obstruction or encroachment or the person in charge thereof.

82. The Works Committee, or any person acting under their authority, may at any time stop the traffic on any road, street, or lane, for the purpose of repairing or making the same or any part thereof, or for any necessary purpose; and any person who shall offend against this by-law, either by riding or driving thereon, or by removing or destroying any fence or other obstruction which may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty not exceeding ten pounds.

83. Any driver or rider who shall negligently or wilfully injure or cause to be injured, any kerb, whether of wood or stone, or any pathway, by riding or driving or permitting any horse or other animals to stand thereon, shall forfeit and pay a penalty not exceeding two pounds nor less than one shilling.

84. Any person damaging any road, street, or lane, or any portion thereof, by trailing stone or timber thereon, or who shall suffer any timber or stone to trail over the sides of any wheeled vehicle, so as to occupy a greater space than the breadth of the cart or dray upon which it may be drawn, shall forfeit and pay a sum not exceeding two pounds nor less than one shilling.

85. When any road, street, or lane has been formed, and the pathways put in order, the owners of all houses or other structures abutting thereon shall so arrange the roofs of such structures, by spouting or otherwise, as shall prevent the rain from flowing therefrom on to such pathway; and any owner or occupant who shall refuse or neglect to carry out the provisions of this by-law, shall forfeit and pay for every such offence, after due notice given, any sum not exceeding five pounds.

86. Nothing contained in any of these By-laws shall be taken to refer or be applied to the driving of any travelling flocks or herds of cattle or other animals, provided the same be not negligently driven.

87. The Works Committee, Committee of General Purposes, or any Special Committee or officer appointed by the Council, may exercise all such powers and authority as is conferred by the various sections of the "Municipalities Act of 1867," in all such matters as may from time to time be, by resolution of Council, referred to their supervision and control.

88. Wherever the word Mayor occurs in these By-laws, as directing to be done or as being directed to do any matter or thing, the same shall apply to and be understood to mean any Alderman appointed by the Council to act as Mayor for the time being.

89. All fines and penalties for any breach of these By-laws shall be recoverable only by process, as directed by section 193 of the "Municipalities Act of 1867."

90. All drains or sewers communicating with any public drains or sewers, shall from time to time be repaired and cleansed, under the inspection and direction of the Council, at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains

shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed, according to the directions of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

#### *Sewerage and drainage.*

1. It shall not be lawful for any person without notice to the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds.

2. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm-water from or upon the same shall overflow, or shall tend naturally if not otherwise discharged to overflow any footway of such street, shall, within seven days next after the service of notice by the Council for that purpose, construct and lay from such point, upon such land being near to the footway as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway to the said channel, and through, under, and transversely to the footway, and keep in good condition such covered drain or trunk, as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall forfeit any payment not exceeding five pounds. And if within seven days after such conviction, such owner or occupier shall still have failed to comply with such notice, or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds, and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier, who shall still have made default as aforesaid for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

#### *Preventing and Extinguishing Fires—Inflammable Fences, &c.*

1. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and also shall remove such fence, stack, or covering within a reasonable time after such conviction; and any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid shall be deemed guilty of a further offence against this by-law.

#### *Water Carters to attend at Fires.*

2. Every owner and driver of a licensed water-cart shall keep such cart loaded with water during all times after sunset and before sunrise, and shall, if any building, premises, or property shall be on fire within one mile of town, attend at the place of such fire with such cart loaded with water; and shall continue to cart water by full loads to such place, and shall deliver such water in such manner as may be required by the Mayor or by any Alderman, or officer, or person duly authorized by the Council in that behalf and then present, for extinguishing such fire; and every such owner or driver who shall without reasonable excuse fail to comply with the provisions of this section shall forfeit a sum not exceeding ten pounds.

3. There shall be paid out of Municipal funds to the owner of every licensed water-cart who shall have attended with any water at the place of any fire as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf, and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums by way of reward as the Council may, by similar resolutions, have fixed.

1873.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF NUMBA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 26th October, 1873.

## MUNICIPAL DISTRICT OF NUMBA—BY-LAWS.

The following By-laws, made by the Council of the Municipal District of Numba, for regulating their own proceedings, impounding cattle, limiting weight of loading, &c., having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

## MUNICIPAL DISTRICT OF NUMBA.

THE following By-laws, made by the Council of the Municipal District of Numba, for regulating proceedings, impounding cattle, limiting weight of loading, &c., &c.

1. The Inspector of Nuisances, or any other person duly authorized by the Council, shall have the power to impound in any public pound in the Municipality all animals of every description found straying on the public roads, streets, or other public places or thoroughfares within the Municipality of Numba, and place whatever amount the law may direct as a trespass or driving fee thereon, provided the ownership thereof at the time is unknown.

2. No dray, having only two wheels, traversing the roads of the Municipality, shall be allowed to carry a load exceeding two and a-half tons weight: And any person or persons found traversing the roads of the Municipality of Numba with any dray, or any other vehicle having only two wheels, containing a load exceeding two and a-half tons in weight, shall forfeit and pay a sum not exceeding £5, and not less than ten shillings.

*Order of debate.*

3. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments made thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have the right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once on any question other than a question of order, unless when misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purposes of such explanation. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

4. Any Alderman shall be at liberty to call for a division; in such case the question shall be put, first in the affirmative, and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division, not being disabled by law from so doing, shall be liable for every such offence to a penalty of not less than ten shillings, nor more than five pounds.

*Committees.*

5. There shall be two Standing Committees, namely,—a Committee for Works, and a Finance Committee; and each Committee shall consist of the whole Council.

*Records.*

6. The minute-book, letter-book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls and other records relating to elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business, addressed to the Mayor or to any officer or servant of the Council, orders, reports, returns and memoranda relating to municipal business, drawings, plans, maps, contracts, specifications, agreements, and all other books and papers connected with the business of the Council shall be deemed records of the Council. All such records other than the minute-book and other books, and other than electoral rolls, and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every document thus registered, to which there is any reference in the minute-book, there shall be a note of the page wherein it is so referred to. And when any order has been made by the Council, or a report has been made by any Committee thereof, in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the Finance Committee to inspect the records from time to time, to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

7. If the driver of any waggon, wain, cart, or dray of any kind, shall be at such distance from such waggon, wain, cart, dray, or carriage of any kind, or in such a situation, whilst it shall be passing upon any street, road, or thoroughfare of the Municipality, that he cannot have the direction and government of the horse or horses, or cattle drawing the same,—or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care, upon such road, street, or thoroughfare, or, by negligence or misbehaviour, prevent, hinder, or interrupt the free passage of any waggon, wain, cart, dray, or carriage, in and upon the same, every such driver or person so offending shall, upon conviction, forfeit and pay any sum not exceeding forty shillings.

Made and passed by the Council of the Municipal District of Numba, this fourth day of September, one thousand eight hundred and seventy-three.

JOSEPH WILLIAMSON,  
Mayor.

(BOROUGH OF PARRAMATTA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 27th November, 1873.

## BOROUGH OF PARRAMATTA.

## BY-LAWS.

The following By-laws made by the Council of the Borough of Parramatta, for regulating the Free Library established in that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BOROUGH OF PARRAMATTA—FREE LIBRARY.

## BY-LAWS.

1. The Library and Reading Room shall be open daily, excepting Sundays, Good Fridays, Christmas Days, and Public Holidays, from 10 a.m. to 4 p.m., and from 7 p.m. to 9 p.m.

2. Every person who shall enter the Library or Reading Room shall immediately on entering the same, write his or her name and address in a book to be kept for such purpose and to be called the "Visitors' Book"; and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be written by the officer of the Council having the custody of the Institution, at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library or Reading Room; and it shall be the duty of the officer of the Council in charge to enforce this By-law.

3. Any person who being intoxicated shall enter such Library or Reading Room shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language,—or who shall by unnecessarily loud talking, or by any other noise or otherwise, disturb or annoy the persons using or resorting to such Library or Reading Room,—or who shall without lawful excuse, but without felonious or larcenous

intent, remove any property from such Library or Reading Room,—shall forfeit and pay any sum not less than ten shillings nor more than ten pounds. And in the event of any such person not leaving the premises when requested by the Librarian to do so, Police Constables on receiving information thereof shall give assistance as may be necessary to effect the offender's removal.

4. All books, statutes, newspapers, periodicals, maps, or other publications shall be accessible without fee, for use only in the Library or Reading Room. All books must be received from, and when done with returned to the Librarian.

5. Any person who shall wilfully damage any Visitors' Book, catalogue, copy of By-laws, or other book or record kept at such Library or Reading Room for the general use thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds: Provided also, that all fines, penalties, and forfeitures incurred under any of these By-laws may be recovered in a summary way before any two Justices in Petty Sessions, according to the provisions of the Act 14th Victoria No. 43 and the Acts therein adopted.

6. It shall be the duty of the Librarian to report, at every meeting of the Library Committee, any infraction of these Rules or any injury to the books.

7. The foregoing Rules shall be printed, framed, and suspended in the Rooms, for the information of visitors.

Colonial Secretary's Office,  
Sydney, 27th November, 1873.

## BOROUGH OF KIAMA.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Kiama, for regulating the Free Library established at Jamberoo, in that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAWS

## FOR REGULATING THE JAMBEROO FREE LIBRARY, BOROUGH OF KIAMA.

1. The books purchased with the Government grant in aid of the Jamberoo Free Library, together with all other books which the Kiama Borough Council may procure for that Institution, either by purchase or otherwise, shall constitute a Circulating Library, to be called "The Jamberoo Free Library."

2. The Council shall appoint a Librarian, who shall make out and keep a Catalogue of all books in the Library.

3. It shall be the duty of the Librarian, or his assistant, to be in attendance at the Library between the hours of 1 and 2 p.m. and 7½ and 8½ p.m. in every day on which municipal business may be legally transacted, to issue and receive books, and to allow any person to read any book in such Library.

4. The Librarian shall keep a book in which he shall enter the name and number of every book issued, the name of the person taking the book, the date on which it was issued, and also the date on which it was returned to the Library.

5. The persons who shall be at liberty to use the Library shall be every ratepayer of the Borough of Kiama.

6. Any ratepayer applying for books shall be entitled to receive one volume for every two individuals of his household who are known to be able to read; and no person shall be entitled to receive a book from the Library until he shall have returned any book or books he or she may have previously taken out.

7. The period for which any book may be kept shall be one month, under a penalty or fine of threepence per week for every week that such book may be kept beyond that time.

8. Any book or books lost or damaged by any person, shall be replaced by such person within one month, or the Council may procure a copy of such book, and the person so offending may be sued by the officer in charge of the Library for the cost of such book and all expenses incurred in obtaining it.

9. Any person in a state of intoxication applying for a book, shall not be entitled to receive one.

10. Any person behaving in a disorderly manner while in the Library or on the premises, or damaging any property in such Library, shall for every such offence be liable to a fine of not less than five shillings, and shall replace the damaged property.

11. All fines and penalties incurred under these By-laws may be recovered in a summary way before any two Justices in Petty Sessions; and such fines so recovered shall be paid over to the Treasurer of the Municipal Council, together with costs, within seven days, and may be applied to defray the working expenses of the Library. And in default of such payment being made, the amount may be recovered by levy and distress on the goods and chattels of the persons so defaulting.

Made and passed by the Kiama Municipal Council, this 30th day of September, 1873.

JAMES SOMERVILLE,  
Council Clerk.

JOSEPH PIKE, Mayor.

## MUNICIPALITIES.

(BOROUGH OF GRAFTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 28th November, 1873.

## BOROUGH OF GRAFTON.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Grafton, for the leasing and regulating Ferries established in that Municipality, and for regulating the Public Wharf at Grafton, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## CHAPTER 13.

BY-LAWS for leasing and regulating Ferries established in the Borough of Grafton.

1. The Council shall by resolution establish such Ferries as may be required for the public convenience, and lease the same for a period not less than one year or more than five years.

2. All leases shall be sold by public auction or by private tender as the Council may determine, to the highest bidder. Such sales shall be advertised in some paper published in the Borough, and giving not less than fourteen days notice. The upset price of each ferry to be fixed by the resolution of the Council.

3. The purchaser shall at the time of sale if by auction or notification of acceptance of tender pay to the Council one fourth of the annual rent, and provide within seven days two sureties who are willing to enter with him into a bond to the amount of one hundred pounds. Such sureties to be approved by the Council. All expenses connected with the bond and lease to be paid by the lessee.

4. The lessee shall pay one fourth of the annual rent, upon such days as may be fixed in the lease, to such person as the Council may appoint to collect the same. In default of payment the lease will become void and forfeited.

5. The lessee must either himself or by his servants, ply the punt and boat at all hours between sunrise and sunset, and without unnecessary delay, for the convenience and accommodation of the public. Provided that he shall not be compelled to work the punt on Sundays, Good Friday, or Christmas Day.

6. The lessee shall immediately on taking possession, put up in some conspicuous place at or near the ferry a board with a table printed in distinct and legible letters containing at the top the name of the ferry, and a list of all tolls and dues payable thereat, and the name of the lessee.

7. No tolls or dues shall be demanded or taken in addition to those provided in the Schedule annexed to these By-laws; and no tolls or dues shall be demanded in respect of any horses or carriages, or in respect of any person attending a funeral, or from any minister of religion, or from any member or officer of the Council, while upon the business of the Council.

8. Any person who shall be guilty of a breach of these By-laws shall be deemed guilty of an offence, and shall be liable to a fine not exceeding five pounds, to be recovered before any two Justices of the Peace in Court of Petty Sessions assembled.

## SCHEDULE OF TOLLS.

	s.	d.
For every foot passenger .....	0	3
For every child attending school .....	0	1
For every horse, mare, gelding, ass, or mule, drawing or not drawing .....	1	0
For every dray or cart with two wheels only .....	1	6
For every waggon, carriage, or other vehicle with four wheels .....	2	0
For every ox or head of neat cattle, drawing or not drawing, not exceeding ten .....	0	9
Every additional head over ten .....	0	6
For every sheep, lamb, pig, or goat, not exceeding ten .....	0	2
Every additional head over ten .....	0	1
Goods per hundredweight or part of a hundredweight .....	0	3

The above tolls to be doubled from sunset to sunrise.

Passed by the Borough Council of Grafton, at their meeting, this seventeenth day of January, 1872.

THOS. G. HEWITT,

JAMES PAGE, Council Clerk.

Mayor.

## CHAPTER 14.

BY-LAWS for regulating the Public Wharf at Grafton.

1. The Grafton Public Wharf, Prince-street, shall be appropriated to the landing and embarking of passengers, the loading and unloading of farm produce, general merchandise, building materials, or any produce whatever.

2. The Council may appoint a wharfinger, or let by tender, or sell by public auction, the tolls and dues arising from the wharf.

3. The wharfinger or lessee shall find two sureties in the amount of twenty pounds for the faithful performance of his duties.

4. The wharfinger or lessee shall preserve order and regularity upon the said wharf, and may remove therefrom any person making a riot or disturbance, or guilty of cursing or swearing or using indecent language, offending against common decency, being drunk, or in any way misconducting himself or herself.

5. The wharfinger or lessee shall be entitled to demand and receive the tolls and dues set out in the Schedule hereto annexed, from all parties using the wharf.

6. No dray, cart, or vehicle, shall be allowed to remain on the wharf longer than the time actually required for loading or unloading the same.

7. No goods, merchandise, produce, live-stock, lime, timber, stone, or other building materials, shall be allowed to remain on the wharf more than twenty-four hours from the time when the same may have been landed thereon.

8. It shall be compulsory on all parties loading or discharging cargo at the wharf, to keep and leave a space of six feet clear as a passage in the middle of the wharf.

9. No vessel or boat shall be allowed to be made fast to the wharf or occupy the berth, but for the purpose of loading or unloading.

10. The vessel or boat first arriving shall be entitled to precedence in the use of the wharf, and shall be loaded or unloaded, after which such vessel shall haul off from the wharf.

11. The master of every vessel shall before unloading any cargo, give to the wharfinger or lessee particulars in writing, signed by himself, of such cargo, with the name of the consignee, and if the same shall not be removed within the time limited by these By-laws, the wharfinger or lessee shall have full power to remove, or if he think fit to store the same at the expense of risk of consignee; and further, if such goods be not claimed and removed, and all charges and expenses accrued in respect

thereof paid within thirty days from their landing, shall dispose of the same by public auction, and dispose of the proceeds first in payment of all charges and expenses, and shall pay the balance, if any to the consignee.

12. The Borough Council, wharfinger, or lessee, shall not be held liable to any consignor, consignee, owner or master of vessel, or any other person landing or shipping goods, for any loss or damage to any goods placed upon the wharf, or in respect to any loss or damage occasioned by the removal or sale thereof under the preceding section of these By-laws.

#### SCHEDULE A.

13. Tolls and dues payable at the Grafton Public Wharf by vessels taking up berths, shall pay as follows:—

	s.	d.
Fifty tons register or under .....	10	0
Fifty tons register or under one hundred .....	15	0
For every additional fifty tons or part of fifty tons .....	5	6
Vessels not occupying a berth for more than one hour...	2	6
For every vessel loading or embarking passengers at the wharf, for every half-hour or part of half-hour .....	1	0

#### SCHEDULE B.

14. Time allowed to discharge or load, at Public Wharf, from taking up the Berth:—

For vessels not exceeding fifty tons register .....	48	hours
For vessels over fifty tons and under one hundred tons .....	72	hours
For every additional fifty tons or part of fifty tons ...	2½	hours

Passed by the Borough Council of Grafton, at their Meeting, this seventeenth day of January, 1872.

JAMES PAGE, Council Clerk.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF PENRITH—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 20th March, 1874.

## MUNICIPAL DISTRICT OF PENRITH—BY-LAWS.

The following By-laws, made by the Council of the Municipal District of Penrith, relating to the collection of Tolls, having been confirmed by His Excellency the Governor with the advice of the Executive Council, are published in accordance with the "Municipalities Act of 1867."

HENRY PARKES.

## MUNICIPALITY OF PENRITH.

The following new By-laws made by the Municipal Council of Penrith, viz., July 29th, 1873:—

1. Tolls to the several amounts hereinafter prescribed shall be demanded, paid, and taken at the several toll-gates or toll-bars mentioned and described in Schedule A hereto.

2. The Council of said Municipality shall have power to appoint by resolution collectors for said toll-gates or toll-bars, or to lease or let the same by public auction or by private contract, or otherwise; to appoint, lease, or let, release, or relet as above, and as often as it may be necessary, and for any period not exceeding three years, and to fix the upset price at which the said toll-gate or toll-bar shall be leased or let; and in case a collector is appointed he shall be removable by a like resolution.

3. Every such collector or lessee shall find two sureties, to the satisfaction of the Mayor and Council, and to such a sum as they shall determine, for the faithful performance of his duty.

4. All such tolls shall be paid to the respective collectors thereof to be appointed as aforesaid, in such several amounts for the respective animals or vehicles as are specified in Schedule B hereto; and if any person liable to the payment of such toll, other than those exempted from toll as hereinafter provided, shall, after demand thereof, neglect or refuse to pay any such toll, the collector, lessee, or other person lawfully in charge thereof may prevent such person, or any such horse, beast, carriage, or other vehicle in respect of which any such toll is payable, from passing to, through, or by, or from being ridden, led, or driven through or by such toll-gate or toll-bar.

5. No toll shall be demanded or taken by virtue of this By-law for any horses or carriages belonging to, or conveying or attending, or going to convey or attend, or returning from having conveyed or attended, the Governor,—or of or from any of Her Majesty's officers or soldiers, being in proper staff, or regimental, or military uniform, dress or undress, for any horse ridden, or any horse or carriage then employed by such officer or soldier upon or for Her Majesty's service, or returning from

such employment,—or of or from any member of any corps of Volunteers going to or returning from exercise as such, for any horse ridden by such member,—or for any gun-carriage, waggon, or other vehicle belonging to any such corps, or then being employed exclusively for the purpose of the same, or returning from such employment and not otherwise employed,—or for any horses, carriage, or other vehicle, of or belonging to the Government or to the Council of the Municipality, and then employed in the service of the said Government or Council,—or of or from any member of the Police Force being on actual duty, or prisoners under the charge of such members of the Police Force, or for any horse or carriage exclusively employed in carrying such member of the Police Force or prisoners or their baggage respectively, or returning from such employment and not otherwise employed,—or for or in respect of any horse, beast, carriage, or other vehicle, exclusively employed in conveying the Post Office mails,—or of or from any person going to or returning from attending a funeral, or any horse or beast, carriage or other vehicle, employed in conveying the same,—or for or in respect of any horse, beast, carriage, or other vehicle, carrying any clergyman in the discharge of his duty, or any other person or persons going to or returning from their proper church, chapel, or other place of worship, of the person or persons riding or driving the same, on Sundays, Christmas Day, or Good Friday, for any horse or private vehicle ridden or driven by such member or person,—or for any animal driven or going daily to or from water or feed,—or for any sheep, lamb, pig, or goat, ox, bull, cow, calf, horse, mare, gelding, colt, filly, ass, or mule, or for any carriage, cart, dray, waggon, or other vehicle, *bonâ fide* the property of any ratepayer of the Municipal District of Penrith, and whose rates are not in arrear and unpaid, subject to proviso hereafter made: Provided always that any member as aforesaid of any Volunteer corps, or of the Police Force, shall have his dress and accoutrements according to the regulations of such corps or force for the time being: Provided also, that if any ratepayer of the said municipality shall lend his ticket of exemption to any person for the purpose of evading payment of toll, such ratepayer shall be disqualified for twelve months thereafter from non-payment of toll; and provided, further, that any ratepayer shall produce his ticket of exemption whenever so required by the collector of the said tolls.

6. If any person shall claim or take the benefit of any of the exemptions from toll hereinbefore mentioned, not being entitled to the same, he or she shall, on conviction, forfeit and pay for every such offence a penalty of not less than (£1) one pound nor more than (£5) five pounds.

7. If any person shall, with any horse, cattle, beast, or carriage, go off or pass from any street or road through or over any land or ground near to or adjoining thereto (not being a public highway, and such person not being the owner, occupier, or servant, or one of the family of the owner or occupier of such ground), with intent to evade the payment of any toll payable under this part of these By-laws,—or if any owner or occupier of any such land or ground shall knowingly or willingly permit or suffer any person (except as aforesaid) with any horse, cattle, beast, or carriage, whatsoever to go or pass through or over such land or ground with intent to evade any such toll,—or if any person shall give or receive from any person, other than a Collector of such tolls, or shall forge, counterfeit, or alter, any note or ticket hereby directed to be given, with intent to evade the payment of any such toll, or any part thereof,—or if any person shall fraudulently or forcibly pass through or by any such toll-gate or toll-bar, with any horse, cattle, beast, or carriage; or shall leave upon such street or road any horse, cattle, beast, or carriage whatsoever, by reason whereof the payment of any toll shall be evaded or lessened; or shall take off or cause to be taken off, any horse, or other beast or cattle, from any carriage, before having passed through, by, or over any such toll-gate or toll-bar; or having passed through, by, or over, any such toll-gate or toll-bar, shall afterwards add or put any horse or other beast to any such carriage, and draw therewith upon any part of such street or road, so as to increase the number of horses or other beasts drawing the said carriage after the same shall have so passed, whereby the payment of all or any part of the toll shall or may be evaded,—or if any person shall do any other act whatever in order or with intent to evade the payment of all or any of such toll, and whereby the same shall be evaded,—every such person shall for every such offence forfeit and pay any sum not less than five shillings nor more than (£5) five pounds.

8. The By-law Committee shall cause to be put up and continued on some conspicuous part of or near each such toll-gate or toll-bar as aforesaid, so that the same shall be visible to public view, a table painted in distinct and legible black letters, at least (2) two inches in length and of a breadth in proportion, on a board with a white ground containing at the top the name of the toll-gate or toll-bar at which the same shall be put up, and also containing a list of the tolls payable thereat, respectively distinguishing the several tolls and the different sorts of animals or vehicles for which they are to be paid; and the said Committee shall also cause to be provided tickets denoting the payment of the toll, and on such several tickets shall be specified the name of the toll-gate or toll-bar at which the same shall be delivered, and one of such tickets shall (if demanded) be delivered gratis by the collector to every person paying any toll.

9. The toll collector at each such toll-gate or toll-bar as aforesaid shall place or cause to be placed on some conspicuous part of or near such toll-gate or toll-bar, and so that the same shall appear to public view, his christian name and surname painted in black on a board with a white ground, each of

such letters of such name to be at least two inches in length and of a breadth in proportion; and such board shall be and remain at such toll-gate or toll-bar during the whole of the time during which the person whose name shall be expressed thereon shall be on duty thereat; and if any such collector shall not place such board and keep the same there during the time he shall be such collector as aforesaid,—or shall demand and take a greater or less toll from any person than he shall be authorized to do by virtue of this part of these By-laws,—or shall demand and take a toll from any person or persons who shall be exempt from the payment thereof (and claim such exemption),—or shall refuse to permit or suffer any person or persons to read,—or shall in anywise hinder any person or persons from reading the inscriptions on any board put up or kept hereunder,—or shall refuse to tell his christian name and surname to any person or persons who shall demand the same on being paid the said tolls or any of them,—or shall in answer to such demand give a false name or names,—or shall refuse or when required omit to give the person paying the toll a ticket denoting the payment thereof and naming and specifying the toll-gate or toll-bar at which the same has been delivered,—or upon the legal toll being paid or tendered shall unnecessarily detain, or wilfully obstruct, hinder, or prevent, any passenger from passing through or by such toll-gate or toll-bar,—or shall make use of any scurrilous or abusive language to any passenger,—every such collector shall on conviction forfeit and pay for every such offence a penalty not exceeding (£5) five pounds.

10. Every such collector or lessee of tolls shall keep and render such accounts of all his receipts for such tolls as the Council or the Finance Committee thereof may from time to time direct and require, and shall pay over all such receipts at such times and to such officer of the Council as the said Council may from time to time direct.

11. Proviso for ratepayers to pay toll.—Every person drawing railway sleepers, wheelwright's timber, or billet wood for sale will be liable to pay toll as if they were not ratepayers.

#### SCHEDULE A.

The Penrith Toll-bars, situate on the Mulgoa and Castle-reagh and Great Western Roads.

JAS. J. RILEY, Mayor.

22nd September, 1873.

1873-4.

## NEW SOUTH WALES.

**MUNICIPALITIES.**

(BOROUGH OF HILL END—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 22nd April, 1874.

## BOROUGH OF HILL END.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Hill End, for regulating their own proceedings and the duties of their officers and servants—for the collection and enforcement of rates—the preventing and extinguishing fires, &c., &c., having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAWS OF THE BOROUGH OF HILL END.

## PART I.

## PROCEEDINGS of the Council and Committees—duties of officers, servants, &amp;c.

## Ordinary Meetings.

1. The Council shall meet for the transaction of business on every alternate Tuesday, at 7-30 p.m., unless such day shall be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

## Election of Chairman in the absence of Mayor.

2. If at any meeting of the Council the Mayor be absent at the expiration of thirty minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect for themselves a Chairman for such meeting.

## Business of Ordinary Meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected (if erroneous), and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Correspondence to be read, and orders made thereon if expedient.
3. Petitions (if any) to be read and dealt with.
4. Reports from Committees, and minutes from the Mayor (if any) to be presented, and orders made thereon.

5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers, to be made.

6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.

7. Orders of the day to be disposed of as they stand on the business paper.

## Business may be taken out of regular order.

Provided that the Council may, by resolution without notice entertain any particular motion or deal with any particular matter of business out of its regular order on the business paper without any formal suspension of this section, and may in like manner direct that any particular motion or matter of business shall have precedence at a future meeting.

## General duties of the Mayor or Presiding Alderman.

## Order.

4. The Mayor or presiding Alderman shall preserve order, and his decision on all disputed points of order shall be final; but he is to state his decision without argument or comment.

## The Mayor may take part in proceedings.

5. The Mayor or Presiding Alderman may take part in all the proceedings of the Council.

## Putting questions.

6. The Mayor or Presiding Alderman shall put all questions, and declare the sense of the Council thereon.

**Pre-audience.**

7. If two or more members rise to speak at the same time the Mayor or Presiding Alderman shall decide which member is entitled to pre-audience.

**Not to speak a second time.**

8. The Mayor or Presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation, and without introducing any new matter). The member introducing a motion to have the right of reply; and every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

**Questions put by Mayor.**

9. The Mayor or Presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

**Not speaking to question.**

10. No member shall deviate from the subject under debate, or make personal reflections on any other member.

**Time for speaking.**

11. No member shall speak on any motion or amendment longer than ten minutes.

**Offensive personal reflections not to be permitted.**

12. No Alderman shall make offensive personal reflections upon, or impute discreditable motives to, any other Alderman. Any Alderman so offending shall, immediately upon being thereto required by the Mayor or Presiding Alderman, withdraw the offensive expressions, and retract any such imputation of motive and make an apology satisfactory to the Council. Any Alderman declining so to apologize and to withdraw the offensive expressions, or to retract the imputation of motive, shall be liable, on conviction, to a fine or penalty of not less than one pound nor more than five pounds for every such first offence; and on a second conviction, for a like offence, he shall be liable to a fine or penalty of not less than two pounds nor more than ten pounds.

**Adjournment of debate.**

13. A debate may be adjourned to a later hour of the same day, or to another day specified.

**Member entitled to pre-audience.**

14. The Member upon whose motion any debate shall be adjourned shall be entitled to pre-audience on the resumption of the debate.

**Calls to Order.**

15. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

**Motion for adjournment.**

16. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any member to make a like motion until the lapse of a quarter of an hour.

**Rescinding resolution.**

17. It shall be competent to give notice of motion for the rescinding of any resolution on the same day on which such resolution shall have been passed by the Council.

**Motions must be seconded.**

18. No notice shall be taken by the Mayor or Presiding Alderman of any motion unless it be seconded.

**Notices must be in writing.**

19. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn from the business paper without the leave of the majority of the Council.

**Call of the whole Council.**

20. No motion the effect of which if carried would be to rescind any motion which has already passed the Council, shall be entered on the business paper unless a call of the whole Council has been duly made and granted for that purpose.

**How ordered.**

21. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

**How voting determined.**

22. The Council shall vote by show of hands, but any Alderman may divide the Council on any question, both in full Council or in Committee of the Whole, in which case every Alderman there present shall be compelled to vote; and all divisions shall be entered in the Minute Book.

**Question to be read when required.**

23. Any member may require the question under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member whilst speaking.

**How amendments to be put.**

24. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded. No motion or amendment shall be discussed until it shall have been reduced into writing.

**Council Clerk to give notice of Committee Meetings.**

25. The Council Clerk shall call a meeting of any Committee, when requested so to do by the Chairman or any three members of such Committee.

**Petitions—no debate.**

26. On the presentation of a Petition no debate shall take place until notice has been given in the usual manner, and the only question that can be entertained by the Council on the day of its presentation shall be, that the Petition be received, or that it be referred to a Committee.

**Language of Petitions.**

27. It shall be incumbent on any Alderman presenting a Petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

**Petition of parties signing.**

28. All Petitions shall be received only as the Petitions of the parties signing the same.

**Committees.**

29. Before such special Committees as from time to time shall be found necessary, there shall be a standing Finance Committee which shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect or be likely to affect the finances of the Borough; and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon. Such Committee shall be appointed by resolution of the Council, within thirty days after the election of the Mayor for the Municipal year.

**By-laws of Council observed.**

30. The by-laws, as to the proceedings of meetings of the Council, shall be observed in a Committee of the whole Council, except the rule limiting the times of speaking.

**Chairman of Committees.**

31. Every Committee of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee, and such Chairman may direct the Council Clerk to call meetings whenever he shall think it expedient.

**Report to be signed.**

32. Every report of a Committee shall be signed by the Chairman thereof.

**Funds of Municipality.**

33. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined before any warrant shall be issued for the payment thereof: Provided that in cases of emergency, the Mayor with the assent of any two Aldermen may authorize the expenditure of any sum not exceeding £5, and such expenditure shall be reported to the Council at its next sitting.

## Security.

34. In cases where security is required by the Municipalities Act of 1867, no security shall be accepted otherwise than by a vote of the Council.

## Books and papers not to be shown.

35. No officer or servant appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council without leave from the said Council, except as provided by law.

## Common seal.

36. The common seal shall not be affixed to any document without the express authority of the Council, and every impression thereof shall be verified by the signatures of the Mayor and Council Clerk, or in the absence of the Mayor by the signatures of three Aldermen and the Council Clerk.

## Seal, charter, &amp;c., where kept.

37. The seal of the Municipality, and all charters, deeds, and records of the Council, shall be kept in the custody of the Council Clerk, unless the Council shall otherwise order.

## PART II.

## COLLECTION AND ENFORCEMENT OF RATES.

*Times and modes of collection.*

38. All rates levied or imposed by the Council under the provisions of the Municipalities Act of 1867, and for the purposes mentioned in the said Act, shall be collected once a year. And such rate shall be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

## Rates to be paid at office of Council Clerk.

39. All rates made and authorized by the Council shall be paid within the time prescribed by the Act, at the Council Chamber of the Municipality, at such hours and such days as the Council shall from time to time appoint.

## Unpaid Rates.

40. The Council Clerk shall prepare, at such times as may be ordered by resolution of the Council or the Mayor, a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for the payment of the same, and the Mayor shall take immediate proceedings, either by summons or by the issue of distress warrants against defaulters.

## Bailliff.

41. The Bailliff shall be appointed by resolution of the Council and shall be at any time removable by a like resolution, and shall give such security as the Council shall approve of for the faithful performance of the duties of such office.

## Levies and Distresses.

42. The Bailliff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor; such warrant to be made in accordance with the form in Schedule hereto annexed marked A.

## Entry and Levy.

43. The Bailliff shall be paid for entry and levy made under these By-laws according to the Schedule annexed marked C.

## Making a Distress.

44. At the time of making a distress the Bailliff shall forthwith make out a written inventory in the form or to the effect of the Schedule annexed marked B, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distrained or to some person on his or her behalf resident in the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress has been made; and the Bailliff shall deliver a copy of such inventory to the Council Clerk for the information of all parties concerned.

## Bailliff to enter upon land, &amp;c.

45. It shall be lawful for the Bailliff, and such assistants as he may require, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful to sell the goods so distrained or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipal District as the said Bailliff may think proper to remove them to for such purpose; and the surplus, if any, that may remain after deducting the sum distrained for, together with the expenses attendant upon such distress, shall be paid over on demand to the owner of the goods so sold: Provided always that nothing herein contained as to the time of sale shall apply to any crop of cereals, fruit, or vegetables which may be growing at the time when such distress shall be made.

## The Bailliff may impound.

46. The bailliff when making a distress as aforesaid may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate as shall be most fit and convenient for such purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land and premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and to carry off and remove the same on account of the purchaser thereof.

## Goods how to be sold.

47. The owner of any goods so distrained upon may by writing direct and specify the order in which they shall be successively sold, and the said goods and chattels shall in such case be put up for sale according to such direction.

## Proceeds of sale to be paid to Council Clerk.

48. The Bailliff shall hand over to the Council Clerk all proceeds of such distresses within twenty-four hours after such sale, also the copy of every inventory and account of every such sale or sales.

## Bailliff may appoint deputy.

49. The Bailliff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy, and the person thus authorized shall have and exercise for the time being all the powers of the Bailliff himself, but the Bailliff and his sureties shall in such case be held responsible for the act of such deputy.

## SCHEDULE A.

## Warrant of Distress.

I, Mayor of the Borough  
of Hill End, do hereby authorize you  
Bailliff of the said Borough, to distrain the goods and  
chattels of the dwelling-house, or in and upon the land  
and premises of situate at  
for the sum of £ being  
the amount of municipal rates due to the said Borough  
to the day of for the  
said dwelling-house, land, or premises, as the case may  
be, and to proceed thereon for the recovery of the said  
rates according to law.

Dated this day of, 187  
Mayor.

## SCHEDULE B.

## Inventory.

I have this day, in virtue of a warrant under the hand  
of the Mayor of the Borough of Hill End, dated  
, of which a copy is attached hereto, distrained  
the following goods and chattels in the dwelling-house, or  
in or upon the land and premises of situate at  
within the said Borough,  
for the sum of £ being the amount of rates due  
to the said Borough to the day of 187  
Dated this day of 187.

Bailliff.

(List to be appended.)

## SCHEDULE C.

## Costs.

	s.	d.
For every warrant of distress .....	4	0
For serving every warrant and making levy ...	2	6
For making and furnishing copy of inventory..	2	6
For man in possession each day or part of a day .....	5	0
For sale and delivery of goods one shilling in the pound on the gross proceeds of the sale in addition to the costs of advertisements (if any).		

## PART III.

## PREVENTING AND EXTINGUISHING FIRES.

## Fire or combustible materials, &amp;c.

50. Every person who shall place or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction of every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after such conviction, shall be deemed guilty of a further offence against this By-law.

## Fireworks.

51. Every person who shall discharge any firearms without lawful cause, or who shall light any bonfire, tar-barrel, or fireworks upon or within twenty-five yards of any public or private street or any public place, shall forfeit a sum not exceeding five pounds.

## Negligently allowing chimney to be on fire.

52. If any chimney accidentally catch or be on fire, or if a chimney emits sparks to endanger the property of persons within the Borough, the person occupying or using the premises in which such chimney is situated shall forfeit a sum not less than five shillings nor more than forty shillings. Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

## PART IV.

## STREETS AND PUBLIC PLACES.—PUBLIC HEALTH AND DECENCY.

## Wells to be covered over—Penalty.

53. Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof, and any road, street, or footway within the limits of the said Borough, or at the side of or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having any such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last-known place of abode or on the said premises, shall on conviction forfeit and pay not less than two shillings and sixpence nor more than twenty shillings; and for every day after such notice that such well shall remain open and uncovered contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

## Drawing or trailing timber.

54. Any person who shall haul or draw or cause to be hauled or drawn upon any part of any street or public place within the said Borough any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow to drag or trail upon any part of such street or public place to the injury thereof, or to hang over any part of any such vehicle or barrow so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

## Driving carriages, &amp;c., on footways, and throwing filth, &amp;c., &amp;c.

55. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or footway of any street or other public place in the said Borough,—or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any or either of any such carriage or foot ways,—or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place any waggon, cart, dray, barrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway,—shall upon conviction, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings; for the second offence, a sum not exceeding five pounds nor less than ten shillings; and for a third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound for each such offence.

## Riding on drays, careless driving, &amp;c.

56. If the driver of any waggon, cart, or dray of any kind shall ride upon any such carriage in any such street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage or in such a situation whilst it shall be passing upon such street that he cannot have the direction and government of the horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his vehicle on the left or near side of the road,—or if any person shall in any manner wilfully prevent any other person or persons from passing him or her or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same,—every such driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

## Washing vehicles at the pumps or fountains.

57. Any person who shall wash any description of vehicle at any public pump, fountain, or waterworks within the Borough, shall forfeit and pay for the first offence not more than twenty shillings nor less than five shillings, and for every subsequent offence not more than two pounds nor less than ten shillings.

## Nuisances.

58. Every person who, in any street or other public place or passage within the said Borough, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds :—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey or cause to be carried or conveyed in any street or public place the carcass or any part of the carcass of any newly slaughtered animal without a sufficient and proper cloth covering the same for the concealment from public view, or shall hawk or carry about butcher's meat for sale, without covering the same as aforesaid.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window near to any street or public place, without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired),

Every blacksmith, whitesmith, anchormith, nailmaker, metalfounder, limeburner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture pointing or opening into or towards any street, lane, or passage, and not closing such door, or not fastening the shutters or other fastenings of such window and closing such aperture, or placing a screen before the same, every evening within one hour after sunset, so as to effectually prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

Every person who shall within the distance of one hundred yards from any dwelling-house burn any rags, bones, cork, or other offensive substance, to the annoyance of any inhabitant.

Every person who shall keep any kind of swine within forty yards of any street or public place in the said Borough, or shall suffer any swine, horse, ass, mule, sheep, or other animal belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street or public thoroughfare.

Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any street or other public footway.

Every person who shall be the keeper of, or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right of way, or use of any private yard, alley, street, or any other place within the said Borough.

**Traffic may be stopped.**

59. The Council, or any person or officer acting under the authority of such Council, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same.

**Rubbish not to be thrown on streets.**

60. No person shall be allowed to throw rubbish, sweepings, broken glass, dead animal, or other offensive matter or thing, or deposit of any kind whatever, on the streets, pathways, or channels, or in any public place within this Borough, unless by consent of the Council.

**Injury to curbstones, guttering, &c.**

61. No driver, carter, or other person, shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the curbstones, gutters, or pathways of any street or roadway: and no person shall be at liberty to ride on horseback, or drive a wheeled vehicle of any kind on the footways.

**Careless riding or driving.**

62. No person shall ride or drive through or upon any street or public place so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered.

**Destroying pathways or roads.**

63. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel, from any of the streets or roads of the Borough without the authority of the Council; and for such authority a fee of one shilling shall be paid.

**Placing materials on streets, &c.**

64. No person shall be allowed to place on the streets or pathways building materials otherwise than is absolutely necessary, and by the sanction, in writing, of the Mayor or Council Clerk; and no person shall be allowed to have waterholes or excavations for cellars or other purposes in or adjoining any public place unfenced, or in such a manner as to be dangerous to passers-by; and all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

**Damaging trees and shrubs.**

65. No person shall destroy or damage any shrub or tree growing in any street or thoroughfare or other public place within this Borough, or injure any hedge, fence, gate, or building in any such street, thoroughfare, or public place, or to set fire to any shrubs or trees, or to cut or remove any timber from any such street, thoroughfare, or public place aforesaid, or to destroy, tear, deface, or otherwise injure any notice, proclamation, or other document purporting to be under the authority of the Council, or of any officer of the said Council, which shall be affixed in any public place.

**Persons bathing.**

66. No person shall bathe within two hundred yards of any public road, place, or wharf, unless in some enclosed place, or otherwise in such manner as not to offend against common decency.

**Exposing goods for sale.**

67. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever, to the obstruction of the public.

**Gambling on Lord's Day.**

68. Any owner or occupier of any public billiard-room or other public place of amusement within the limits of the said Borough, who shall permit or suffer any one to play in his house or premises any game on Sunday, shall, on conviction, forfeit and pay a sum not exceeding five pounds nor less than three pounds.

**Driving cattle, &c.**

69. Any person driving cattle other than milkers or horses not under proper control, within the boundaries of the Borough between the hours of 8 a.m. and 5 p.m., shall, on conviction, forfeit and pay a sum not less than two shillings for each beast, and not exceeding five pounds in the aggregate, and the burden of proving that any animals the subject of any information hereunder come within the above exceptions shall be cast upon the defendant.

**Abandoned shafts, &c.**

70. Any person occupying unfenced lands within the municipal boundaries whereon waterholes or abandoned shafts exist, shall be required to secure the same to the satisfaction of the Mayor and Council.

**Vehicles plying for hire.**

71. All vehicles plying for hire within the boundaries of the Borough shall be inspected by the Mayor and Aldermen, or whom they may appoint, once in each year, and a license shall be issued to the owner or owners of such vehicles, should they be considered in good order and condition, on the payment of a fee of five shillings per annum. Any person plying for hire without a license shall be subject to the following penalties, viz.:—For a first offence, not more than ten shillings nor less than two shillings and sixpence; for the second and every succeeding offence not more than one pound nor less than ten shillings.

**Suppression of nuisances.**

72. No householder or resident in the said Borough shall be allowed to permit his or her premises, yards, closets, or drains to be offensive or a nuisance to the adjoining householders or residents.

**Offensive trade.**

73. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining or other houses.

**Notice to proprietor.**

74. Upon complaint being lodged at the Council Chambers that the yard, closets, or drains of any premises is or are a nuisance or offensive, and after inspection such shall be found to be the case, notice shall be given in writing to the proprietor or tenant of such premises to remove or abate such nuisance within twenty-four hours after such notice; and if, after such notice, the nuisance shall not be removed or abated, the proprietor or tenant of the said premises shall be liable to a penalty not exceeding forty shillings nor less than five shillings.

**Inspector may visit premises, &c.**

75. Upon complaint being lodged at the Council Chambers, the Inspector of Nuisances may at all reasonable hours, with or without assistants, enter into and inspect any building, stall, or place kept or used for the sale of butcher's meat, and examine any carcass, meat, flesh, or fish which may be therein; and in case any of such articles shall appear to him to be intended for human food, but unfit for the same, may be seized by him; and if it shall appear to a Justice of the Peace, upon competent evidence, to be unwholesome, he shall order it to be destroyed, and the owner thereof, or the person in whose custody it was found, shall be liable to a penalty not exceeding forty shillings nor less than ten shillings.

*Penalty.*

76. For every offence against the provisions of the By-laws of this Borough, except as otherwise provided, the offender shall be liable to, and shall pay a penalty not exceeding ten pounds nor less than two shillings and sixpence, to be recovered in a summary way before any Justice of the Peace; and all other penalties and fines imposed by such By-laws, except as otherwise provided, shall be recoverable in a summary way before any Justice of the Peace.

**PART V.***Slaughter-houses.**Slaughter of diseased animals.*

77. If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal affected with any disease affecting the milt, or spleen, or lungs, to be slaughtered in any such slaughter-house, or if, after the slaughter of any animal, it shall be found to be diseased, and such owner or occupier, as soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed by fire in the presence of the Inspector, such owner or occupier shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds: Provided, however, that, should the owner of any animal which may be condemned by the Inspector object to the decision of that officer, such owner shall be at liberty to appoint some veterinary surgeon or other competent person as arbitrator in his behalf; and in the event of the Inspector and such veterinary surgeon or other competent person not agreeing, it shall be lawful for and incumbent upon them, under a penalty of ten pounds each, to appoint an umpire, whose decision shall be final.

*Inspector may enter shops, &c., for certain purposes.*

78. Any such Inspector may, and he is hereby empowered at all reasonable times, with or without assistants, to enter into and inspect any shop, building, stall, or

place kept or used for the sale of butcher's meat or as a slaughter-house, and to examine any animal, carcass, meat, or flesh which may be therein; and in case any animal, carcass, meat, or flesh appear to him to be intended for the food of mankind, and be unfit for such food, the same may be seized; and if it appear to a Justice of the Peace, upon the evidence of a competent person, that any such animal, carcass, meat, or flesh is unfit for the food of mankind, he shall order the same to be destroyed, or to be so disposed of as to prevent its being exposed for sale or used for such food; and the person to whom such animal, carcass, meat, or flesh belongs, or in whose custody the same is found, shall be liable to a penalty not exceeding ten pounds for every animal or carcass, piece of meat or flesh so found.

*Cleansing of slaughter houses.*

79. Every slaughter-house within the said Borough shall be thoroughly washed and cleansed within one hour after any animal or animals shall be slaughtered therein, and the blood, offal, and filth of all such animals as may be slaughtered in any slaughter-house, or in the premises or appurtenances thereunto belonging, shall be removed once at least in every twenty-four hours; and any owner or occupier of any slaughter-house who shall neglect to comply with this By-law shall forfeit and pay on conviction for every such offence, before any two or more Justices of the Peace, in a summary way, any sum not exceeding ten pounds.

Municipal Council Chambers,  
Hill End, February 3, 1874.

I hereby certify that the appended copy of the By-laws has passed the Borough Council.

THOS. WYTHES, JR.,  
Mayor.

## MUNICIPALITIES.

(BY-LAWS OF NUMBA FREE LIBRARY.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Department of Justice and Public Instruction,  
Sydney, 17th April, 1874.

## MUNICIPAL DISTRICT OF NUMBA.

THE following By-laws, made by the Council of the Municipal District of Numba, for the regulation of the Numba Free Library, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

G. WIGRAM ALLEN.

## MUNICIPAL DISTRICT OF NUMBA.

## BY-LAWS FOR REGULATING THE NUMBA FREE LIBRARY.

1. The books purchased with the Government grant in aid of the Numba Free Library, together with all other books which the Numba Council may procure for that institution, either by purchase or otherwise, shall constitute a circulating library, to be called the "Numba Free Library."

2. The Council shall appoint a Librarian, who shall make out and keep a catalogue of all books in the Library.

3. It shall be the duty of the Librarian to be in attendance at the Library between the hours of 10 a.m. and 4 p.m. on every day on which municipal business may be legally transacted, to issue and receive books; but the Librarian is not prohibited from issuing books at other times, if he thinks proper.

4. The Librarian shall keep a book in which he shall enter the name and number of every book issued, the name of the person taking the book, the date on which it was issued, and also the date on which the book was returned to the Library.

5. The persons who shall be at liberty to use the Library shall be every householder residing within the limits of the Municipal District of Numba.

6. No more than one book shall be issued to any person at one time, nor shall any person be allowed to take a book from the Library until any book or books he or she may have previously taken are returned: Provided that in cases where four members of a family are known to be able to read, it shall be competent for the Librarian to issue two volumes; and if a family consist of six persons able to read, three volumes, to the members of such household.

7. The period for which any book may be kept shall be one month, under a penalty or fine of three-pence per week for every week that such book may be kept beyond that time.

8. Any book or books lost or damaged by any person shall be replaced at his or her expense within one month, and in default, the person or persons so offending may be sued for the value of such book or books by the officer in charge of the Library.

9. Any person in a state of intoxication applying for a book shall not be entitled to receive one.

10. Any person behaving in a disorderly manner while in the Library, or on the premises, or damaging any property in such Library, shall for every such offence be liable to a fine of not less than five shillings, and shall replace the damaged property.

11. All fines and penalties incurred under these By-laws may be recovered in a summary way before any two Justices in Petty Sessions, and such fines so recovered shall be paid over to the Treasurer of the Municipal Council, together with costs, within seven days, and may be applied to defray the working expenses of the Library; and in default of such payment being made, the amount may be recovered by levy and distress on the goods and chattels of the person so defaulting.

Made and passed by the Municipal Council of Numba, this  
5th day of March, 1874.

## MUNICIPALITIES ACT OF 1867.

(PETITION OF RATEPAYERS OF ASHFIELD, RESPECTING.)

---

*Ordered by the Legislative Assembly to be printed, 5 May, 1874.*

---

To the Honorable the Legislative Assembly, in Parliament assembled.

This Petition humbly sheweth :—

That we, the Ratepayers of the Municipality of Ashfield, are subject to grievous disadvantage in consequence of there being no Council to represent the Municipality ; and believing that there is no provision in the Municipalities Act of 1867 enabling us to elect Aldermen in the place of those resigned, we humbly pray your Honorable House to pass such a measure as will enable your Petitioners to fill up the vacancies in the Council caused by the resignation of its late Aldermen.

And your Petitioners, as in duty bound, will ever pray, &c.

## GRANT IN AID OF THE CITY FUND.

(CORRESPONDENCE RESPECTING.)

---

*Ordered by the Legislative Assembly to be printed, 15 May, 1874.*

---

May and June, 1870—Correspondence between Town Clerk and Under Secretary for Finance and Trade, in reference to Endowment of £10,000.

THE TOWN CLERK TO THE UNDER SECRETARY FOR FINANCE AND TRADE.

Town Clerk's Office,  
Sydney, 30 May, 1870.

SIR,

I have the honor, by direction of the Right Worshipful the Mayor, to request that you will be good enough to submit to the Honorable the Minister for Finance the following suggestion with reference to the disposal of the annual grant of £10,000 from the general revenue to the Municipal Council, in aid of the City funds.

It appears to have been the practice since the year 1858 for the Government to retain this sum in their hands and charge it as part payment of the interest due upon the loans under the Sewerage and Water Acts. To meet this arrangement the Municipal Council have also charged the sum of £10,000 annually to the Government as payment of interest, and have credited the City fund with a like amount to meet the Parliamentary vote for that purpose.

The Municipal Council have no objection to the appropriation of this grant in part liquidation of the debts in connection with the sewerage and water works; but it has been suggested that a more regular and satisfactory transfer of the amount might be made by an interchange of cheques between the Government and the Corporation, by which means the proper vouchers for the payment and the receipt of the moneys would be obtainable.

His Worship would be glad if Mr. Secretary Samuel will give this suggestion his consideration, with a view to its adoption, should there be no objection to such a course.

I have, &c.,

CHAS. H. WOOLCOTT,  
Town Clerk.

---

THE UNDER SECRETARY FOR FINANCE AND TRADE TO THE TOWN CLERK.

The Treasury, New South Wales,  
Sydney, 2 June, 1870.

SIR,

I have the honor to acknowledge receipt of your letter of 30th ultimo, requesting, by direction of the Right Worshipful the Mayor, that, in lieu of the present practice of transferring the annual grant of £10,000 in aid of the City funds, in the books of this office, to the credit of the City debt to the Government, a cheque for the amount might be given to the Mayor, as from time to time it fell due, he, on the other hand, paying back the amount into the Treasury in liquidation of the debt referred to.

I am to state, in reply, that the Treasurer has approved the suggestion which will be acted on this month in respect of the endowment for the current year.

I have, &c.,

HENRY LANE.

---

THE TOWN CLERK TO THE UNDER SECRETARY FOR FINANCE AND TRADE.

Town Clerk's Office,  
Sydney, 24 June, 1870.

SIR,

Referring to your letter of the 2nd instant, respecting the disposal of the annual grant in aid of the City funds, I have the honor, by direction of the Right Worshipful the Mayor, to state that upon the suggestion contained in my letter of the 30th ultimo being submitted by His Worship for the approval of the Municipal Council, it has been thought desirable not to interfere with the arrangements which have hitherto existed with regard to the appropriation of the endowment.

I have, &c.,

CHAS. H. WOOLCOTT,  
Town Clerk.

## INCORPORATION OF SHOALHAVEN.

### No. 1.

#### PETITION FOR INCORPORATION OF MUNICIPALITY.

To His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

The humble Petition of the undersigned householders and residents of Shoalhaven,—

SHOWETH:—

That your Petitioners are anxious that the area hereinafter described should be created a Municipality under the provisions of the Municipalities Act of 1867, by the designation of the "Municipal District of Shoalhaven."

That your Petitioners upon incorporation will be liable to be assessed for municipal taxes in respect of property *as* household residence within the proposed Municipal District.

That the proposed Municipality contains an area of less than 50 square miles, and that the population is more than 500.

That your Petitioners respectfully request that the following be declared the boundaries of the proposed Municipality, namely:—

Commencing on the south bank of the Shoalhaven River, at the north-eastern corner of the Municipal District of Nowra, and bounded on the west by the eastern boundary of that Municipality as far as the junction of the Ulladulla Roads to Nowra and Terara; thence by a line south-easterly to the south-west corner of James M'Mahon's 37 acres 3 roods, known as Gerald's Yard; then east by the south boundaries of that lot and three lots, 44 acres 1 rood, 48 acres, and 45 acres 3 roods, respectively, to the south-east corner of the last-mentioned lot; thence by a line bearing about east 15 degrees north to the north-west corner of E. Lord's 640 acres on the Crookhaven River, near the boundary of the Municipal District of Numba; thence by the boundary of that Municipal District north-westerly to the Shoalhaven River, and by that river south-westerly to the point of commencement.

That your Petitioners further request that there be two wards, to be called and bounded as under, viz.:—

#### *Terara Ward.*

Bounded on the east by the eastern boundary of P. de Mestro's 1,300 acres, being also the eastern boundary of this Municipal District prolonged south till it cuts the southern boundary of the said Municipal District, and westerly by the other boundaries of said Municipality to point of commencement.

#### *Crookhaven Ward.*

Commencing at the south-west corner of W. Elyard's 1,500 acres; and bounded on the west by the west boundary of that grant bearing south till it cuts the southern boundary of the said Municipal District; and thence easterly by the other boundaries of said Municipality to point of commencement.

##### MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 8 February, 1872.

Municipal District of Shoalhaven.

I RECOMMEND the publication, in accordance with the provisions of section 10 of the Municipalities Act of 1867, of the substance and prayer of the accompanying Petition, signed by sixty-one persons, who would upon incorporation be liable to be assessed for municipal taxes in respect of property or household residence within certain boundaries therein set out, praying that the area so defined may be constituted a Municipality, under the name of the Municipal District of Shoalhaven, and divided into two wards.

JOHN ROBERTSON.

#### No. 3.

##### MINUTE OF THE EXECUTIVE COUNCIL.

THE Executive Council advise that the substance and prayer of the Petition herewith submitted for the incorporation of "Shoalhaven," in terms of the "Municipalities Act of 1867," be published in the manner prescribed by the 10th clause thereof.

ALEX. C. BUDGE.

Minute 72/8, 14/2/72.—Confirmed, 19/2/72.  
Approved.—B., 20/2/72.

#### No. 4.

*COPY of Notice published in Supplementary "Government Gazette" of 29 February, 1872, and "Shoalhaven News" of 9 March, 1872.*

Colonial Secretary's Office,  
Sydney, 22 February, 1872.

HIS Excellency the Governor, with the advice of the Executive Council, directs the publication, in accordance with the Municipalities Act of 1867, of the substance and prayer of a Petition addressed to His Excellency, and signed by sixty-one persons, praying that their locality therein described may be erected into a Municipality, under the name of the Municipal District of Shoalhaven, and be divided into two wards.

JOHN ROBERTSON.

The Petitioners state that they are anxious that their locality should be incorporated, under the name of the "Municipal District of Shoalhaven."

That upon incorporation they would be liable to be assessed for municipal rates.

That the area proposed to be incorporated contains less than 50 square miles, and that the population thereof is more than 500.

The boundaries suggested for the Municipality are the following, viz. :—

Commencing on the south bank of the Shoalhaven River at the north-eastern corner of the Municipal District of Nowra, and bounded on the west by the eastern boundary of that Municipality as far as the junction of the Ulladulla Roads to Nowra and Terara; thence by a line south-easterly to the south-west corner of James M'Mahon's 37 acres 3 roods known as "Gerald's Yard"; thence east by the south boundaries of that lot and three lots 44 acres 1 rood, 48 acres, and 45 acres 3 roods, respectively, to the south-eastern corner of the last-mentioned lot; thence by a line bearing about east 15 degrees north to the north-west corner of E. Lord's 640 acres on the Crookhaven River, near the boundary of the Municipal District of Numba; thence by the boundary of that Municipal District north-westerly to the Shoalhaven River, and by that river south-westerly to the point of commencement.

The Petitioners further desire that there be two wards, with the undermentioned names and boundaries, viz. :—

*Terara Ward.*

Bounded on the east by the eastern boundary of P. de Mestre's 1,300 acres, being also the eastern boundary of this Municipal District prolonged south till it cuts the southern boundary of the said Municipal District, and westerly by the other boundaries of said Municipality to point of commencement.

*Crookhaven Ward.*

Commencing at the south-west corner of W. Elyard's 1,500 acres, and bounded on the west by the west boundary of that grant bearing south till it cuts the southern boundary of the said Municipal District, and thence easterly by the other boundaries of said Municipality to point of commencement.

No. 5.

MINUTE OF THE COLONIAL SECRETARY.

MR. BERRY called upon me and says that in the description in the *Government Gazette*, 8th March, 1872, the Crookhaven River is included, while that river is in the Municipality of Numba.

This should be inquired into, for of course the Crookhaven cannot be included in two Municipalities, nor should the river itself, being a navigable water, be in either of the Municipalities.—JOURN R., 18 March, 1872.

No. 6.

MINUTE OF THE PRINCIPAL UNDER SECRETARY.

MR. BERRY appears under a misapprehension in supposing that the Crookhaven River is included in the description of the proposed Shoalhaven Municipality, as described in the *Gazette* of the 29th February last. Ask whether such is the case.—H.H., 25 March, 1872.

No. 7.

OFFICIAL REPORTS.

It may be said to be; but however, the Shoalhaven description will be prepared, as in all such cases, with the river common to both Numba and Shoalhaven.—26.

See information noted in red ink, which has been obtained from the Survey Department.—26th March.

No. 8.

MINUTE OF THE PRINCIPAL UNDER SECRETARY.

INFORM MR. WM. BERRY in reference to his personal representation, care being taken that it is so provided for.—28 March, 1872.

No. 9.

THE PRINCIPAL UNDER SECRETARY TO W. BERRY, ESQ.

Colonial Secretary's Office,  
Sydney, 5 April, 1872.

SIR,

With reference to your recent interview with the Colonial Secretary, at which you represented that the Crookhaven River was included in the description of the boundaries of the proposed Municipal District of Shoalhaven, as published in a supplementary *Government Gazette* of the 29th February last, I am now directed to inform you that, in the event of the proposed Municipality being proclaimed, the description of its boundaries will be prepared in accordance with the principle observed in all such cases, so as to make the river in question common to the Municipalities of Numba and Shoalhaven.

I have, &c.,  
HENRY HALLORAN.

No. 10.

THE MAYOR OF NUMBA TO THE COLONIAL SECRETARY.

Municipal Council Chambers,  
Numba, 15 April, 1872.

SIR,

The Municipal Council of Numba begs me to bring under your notice the boundaries and title of the proposed Municipality of Shoalhaven as published in *Gazette*, No. 67 of 1872, page 557.

The Council of Numba object to the latter portion of the described boundaries as under, *i.e.* :—  
“Thence by the boundary of that Municipal District north-westerly to the Shoalhaven River.”

The boundary of Numba on the south-west is the north-east bank of the Crookhaven River, and if the Shoalhaven Municipality be established with the boundaries as applied for, they will have the same boundary as that of Numba, and therefore the whole of the navigable waters of the Crookhaven within their Municipality and under their control.

This the Council of Numba object to, on the following grounds :—1st. The Crookhaven is a navigable stream with a regular flow and ebb of tide, and as such can be made an important means of transit for the produce of the district, the regulation of which should be under municipal rule; and, as the majority of the inhabitants of that portion of the district live on the Numba side of the river, the Council of that district claim as a right, on behalf of these inhabitants, to a share in the control and making of any regulations for this navigable stream. 2nd. The Crookhaven being the principal source of drainage for the greater portion of the southern delta of the Shoalhaven basin, of which Numba forms the north-eastern part, should the boundaries applied for be granted, the Council of Numba will be cut off from using that stream for the benefit of their Municipality.

I am, therefore, requested to beg that the proposed boundaries of the Shoalhaven Municipality may be altered to the opposite bank of the Crookhaven from that of Numba, and so make the tidal water of that stream a common boundary between the two Municipalities.

I am also desired to bring under your notice the title of the said Municipality. Shoalhaven is a large Police District, and there are already within the same four Municipalities, the least of which is of more importance and of a greater area than the one now applied for. The Municipal Council of Numba, therefore, objects to this title being given to the proposed Municipality, and suggests that it should be called the Terrara Municipality, that being the name of the township within its boundaries.

I have, &c.,  
HENRY G. MORTON,  
Mayor.

No. 11.

THE MAYOR OF BROUGHTON CREEK TO THE COLONIAL SECRETARY.

Council Chambers, Broughton Creek,  
23 April, 1872.

SIR,

The inhabitants of Terrara and vicinity having applied for incorporation under the Municipalities Act of 1867, the Petition for which was published in *Gazette* No. 67 of 1872, page 557, petitioning the Government to proclaim their District, under the title of the “Municipal District of Shoalhaven”: As the District of Shoalhaven is a large and important Police District, having already three Municipalities within its boundaries under their local names, the smallest of which is of more importance and of greater area than that now applied for, the Council of Broughton Creek and Bomaderry, therefore, most respectfully beg that the Government will alter the title applied for to that of Terrara, or any other local designation that they may deem fit.

I have, &c.,  
JAMES WILSON,  
Mayor.

No. 12.

## No. 12.

THE COUNCIL CLERK OF BROUGHTON'S VALE TO THE COLONIAL SECRETARY.

Broughton Vale,  
April, 1872.

SIR,

The Worshipful the Mayor of the Municipality of Numba having requested the attention of this Council to the Petition from certain inhabitants of Ferrara and its vicinity, for incorporation, under the title of the "Municipal District of Shoalhaven," which was published in the *Government Gazette*, No. 67 of 1872, page 557, and inviting the Council to express an opinion on the matter, I have been instructed to submit the following for your consideration.

The District of Shoalhaven is a large and important Police District, having within its boundaries several Municipalities under their local names, each of more importance and having a larger area than that now applied for as above.

This Council therefore unites with the Council of the Numba Municipal District, in very respectfully requesting the Executive Government to alter the name and title applied for to that of "Ferrara," or any other local designation that may seem suitable.

I have to request, on behalf of the Worshipful the Mayor of the Municipality of Broughton Vale, that you will be pleased to bring this communication under the notice of the Honorable the Executive Council and of His Excellency the Administrator of the Government, with a view to its prayer being taken into consideration and carried into effect.

I have, &c.,  
THOMAS BOYCE,  
Council Clerk.

## No. 13.

THE PRINCIPAL UNDER SECRETARY TO THE MAYOR OF NUMBA.

Colonial Secretary's Office,  
Sydney, 6 May, 1872.

SIR,

In acknowledging the receipt of your letter of the 15th ultimo, in which exception is taken, on certain grounds stated, to the boundaries and designation of the proposed "Municipal District of Shoalhaven," I am directed by the Colonial Secretary to inform you that, in the event of the proposed Municipal District being incorporated, the Crookhaven River, and not the boundary of your Municipality, will be made its boundary; but that, as regards the designation, there is no precedent for such alteration as that which you suggest.

I have, &c.,  
HENRY HALLORAN.

## No. 14.

THE PRINCIPAL UNDER SECRETARY TO THE MAYOR OF BROUGHTON CREEK.

Colonial Secretary's Office,  
Sydney, 6 May, 1872.

SIR,

In acknowledging the receipt of your letter of the 23rd ultimo, requesting, for certain reasons stated, that the designation of the proposed "Municipal District of Shoalhaven" might be altered, I am directed by the Colonial Secretary to inform you that there is no precedent for such alteration as that which you suggest.

I have, &c.,  
HENRY HALLORAN.

## No. 15.

COUNTER-PETITION AGAINST THE INCORPORATION.

To His Excellency SIR ALFRED STEPHEN, Knight, Administrator of the Government of the Colony of New South Wales.

The humble Petition of the undersigned persons liable to be assessed for municipal taxes in respect to property or household residence within the proposed Municipality of Shoalhaven,—

RESPECTFULLY SHOWETH:—

That your Petitioners are averse to the incorporation of the Municipality of Shoalhaven, for the following reasons:—

That your Petitioners believe that there are not within the proposed area 500 souls.

That your Petitioners further believe that the incorporation would not, in consequence of the rates which would be raised owing to the before-mentioned reason, be sufficient for the public works necessary to be performed within the area, and therefore of no benefit to your Petitioners.

Your

Your Petitioners therefore humbly pray that the incorporation of Shoalhaven may not take place. And, as in duty bound, will ever pray, &c.

Approved.—H.R., 31/1/72.

### No. 19.

#### NOTICE.

Colonial Secretary's Office,  
Sydney, 5 August, 1872.

#### Municipality of Shoalhaven—Counter-Petition.

HIS Excellency the Governor, with the advice of the Executive Council, directs the publication, in accordance with the Municipalities Act of 1867, of the substance and prayer of a Petition received on the 4th June last, addressed to His Excellency the Administrator of the Government, and signed by sixty-seven persons, against the incorporation of the proposed Municipality of Shoalhaven, such Petition being in opposition to a Petition the substance and prayer of which were published in a Supplementary *Government Gazette* of the 29th February last, and otherwise as required by law.

HENRY PARKES.

The Petitioners represent that they are persons who, if incorporated, would be liable to be assessed for municipal taxes.

That they are averse to the incorporation of the proposed Municipal District of Shoalhaven, because they believe there are not 500 souls within the area sought to be incorporated, and because the rates that would be raised would not be sufficient for the necessary public works.

The Petitioners pray "that the incorporation of Shoalhaven may not take place."

## No. 20.

### PETITION FOR SCRUTINY.

To His Excellency SIR HERCULES GEORGE ROBINSON, K.C.M.G., Governor of New South Wales, &c., &c., &c.

The Petition of the undersigned persons liable to assessment for municipal taxes, in respect of property or household residence within the boundaries of the proposed Municipal District of Shoalhaven,—

RESPECTFULLY SHOWETH:—

That on the 24th February, 1872, your Petitioners' Petition for the erection of their locality into a Municipality, under the name of the Municipal District of Shoalhaven, was in prayer and substance published in the *Government Gazette*.

2. That no objection to the same was taken until the 5th August, when a Counter-Petition was published as having been received on the 4th June, and that many of the signatures to that Petition are not *bonâ fide* residents who can be called upon to pay taxes, while several of them had previously signed the original Petition or have no real qualification for the municipal franchise.

3. That the Counter-Petition was not presented within the period prescribed by the law.

4. Your Petitioners, therefore, pray that your Excellency will be pleased, in conformity with the 12th section of the Municipalities Act, to cause due inquiry to be made with respect to the allegations of your Petitioners, as may seem necessary in that behalf, and that your Excellency will defer the consideration of such Petition until the person appointed by the Minister to prosecute the inquiry shall have submitted his report.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

CHARLES ISAAC WATSON, Leaseholder.

MARK WALKER, Freeholder.

JAS. AVIS, Leaseholder.

JOHN MONAGHAN, J.P., Freeholder.

JOSEPH YOUNGER, Householder.

JOHN MASON, Freeholder.

JAMES LAMOND.

JOHN M'ARTHUR, Freeholder.

## No. 21.

### OFFICIAL MEMORANDA, AND DECISION OF THE COLONIAL SECRETARY.

The statement in the 3rd paragraph is incorrect. The Counter-Petition was received within the period prescribed by law.

There does not appear to be any objection to a scrutiny as desired.

9th September, 1872.

Approved.—H.P., 21/11/72.

It will be necessary to nominate some person to act as scrutineer.

21st November, 1872.

I recommend Mr. A. O. Moriarty, the amount of remuneration being determined beforehand, say £3 3s. per diem, including expenses.—H.H., 21st November.

Approved.—H.P., 28/11/72.

## No. 22.

THE PRINCIPAL UNDER SECRETARY to A. O. MORIARTY, Esq.

Colonial Secretary's Office,  
Sydney, 29 November, 1872.

SIR,

It having been decided, in consequence of certain representations made by the Petitioners for the incorporation of a Municipality to be called the Municipal District of Shoalhaven, to cause inquiry to be made, under section 12 of the Municipalities Act of 1867, as to the validity of the signatures attached to a Counter-Petition against such incorporation, as published in a supplementary *Government Gazette* of 5th August last, as also generally concerning both Petitions, I am directed by the Colonial Secretary to inform you that he has appointed you to make the proposed inquiry.

2. I am accordingly to invite your attention to the 13th and 14th sections of the Municipalities Act—the former of which sets forth the manner in which the inquiry may be conducted, while the latter fixes the time within which the report shall be made.

To be returned.

3. I am at the same time to transmit herewith, for your information, all the papers connected with the subject.

£3 5s. per diem.

4. You will be remunerated for your services by an allowance (which is to include travelling expenses) at the rate of three guineas per diem.

I have, &c.

HENRY HALLORAN.

No. 23.

THE PRINCIPAL UNDER SECRETARY to PETITIONERS.

Colonial Secretary's Office,  
Sydney, 29 November, 1872.

GENTLEMEN,

In reply to your Petition received on the 7th September last, I am directed by the Colonial Secretary to inform you that it has been decided, in compliance with the application therein contained, to cause inquiry to be made, under section 12 of the Municipalities Act of 1867, as to the validity of the signatures attached to the Counter-Petition against the incorporation of the proposed Municipal District of Shoalhaven, as published in a supplementary *Government Gazette* of 5th August last, as also generally concerning that Petition and the original Petition for incorporation, and that Mr. A. O. Moriarty has been appointed to conduct such inquiry accordingly.

I have, &c.,

HENRY HALLORAN.

No. 24.

THE PRINCIPAL UNDER SECRETARY to COUNTER-PETITIONERS.

Colonial Secretary's Office,  
Sydney, 29 November, 1872.

GENTLEMEN,

With reference to your Counter-Petition against the incorporation of the proposed Municipal District of Shoalhaven, which was published in a supplementary *Government Gazette* of 5th August last, I am now directed by the Colonial Secretary to inform you that it has been decided, at the instance of the original Petitioners for incorporation to cause inquiry to be made, under section 12 of the "Municipalities Act of 1867," as to the validity of the signatures attached to your Counter-Petition, as also generally concerning both Petitions, and that Mr. A. O. Moriarty has been appointed to conduct such inquiry accordingly.

I have, &c.,

HENRY HALLORAN.

No. 25.

A. O. MORIARTY, Esq., to THE PRINCIPAL UNDER SECRETARY.

No. 3, Gresham-street,  
Sydney, 17 December, 1872.

SIR,

I do myself the honor to report that, pursuant to the instructions conveyed to me by your letter of the 29th ultimo, I have made inquiry, under the 12th section of the "Municipalities Act of 1867," as to the validity of the signatures attached to a Counter-Petition published in the *Government Gazette* of the 5th August last, against the incorporation of a Municipality under the name of the "Municipal District of Shoalhaven," as desired in a Petition published on the 29th February last. I have also, as directed, made inquiry generally concerning both Petitions, and it is now my duty to submit the results.

In addition to their objections to various signatures on special grounds, the Petitioners take exception to the attestation of the greater number of the signatures to the Counter-Petition, as not being precisely in the words of the Schedule to the Act, and contended that all signatures of which the attestation was defective or informal should be omitted from the comparison. Believing, however, that such a course would be inconsistent with the objects of the inquiry, I have treated as valid all signatures which by the substance of the declarations or evidence taken by myself were shown to have been those of parties who would be liable to assessment for municipal taxes within the proposed Municipality. I think it will be found that in this I am fortified by the opinions which have been given by the Crown Law Officers in some former instances.

The signatures to the Counter-Petition amounted to sixty-seven (67). Of these I find that thirteen (13), enumerated in Appendix A, are those of parties who had signed the original Petition; but, for the reasons hereafter stated, I assume that these are to be retained; I find, however, that fifteen (15) signatures, set forth in Appendix B, are those of persons who, on the grounds mentioned in connection with their respective names, are to be considered unqualified. The number of valid signatures to the Counter-Petition is thus reduced to fifty-two (52).

The original Petition for incorporation purported to be signed by sixty-one (61) persons liable to be rated. As already stated, thirteen (13) subsequently signed the Counter-Petition; and I found upon inquiry that four (4) named in Appendix C were those of persons not possessed of the necessary qualifications. Deducting these seventeen (17) signatures, the number of Petitioners for incorporation is reduced to forty-four (44), being seven (7) less than those to the Counter-Petition, and six (6) less than the number requisite to constitute a valid Petition for incorporation under the Act.

It

It will be observed that the whole question at issue depends upon the effect of the signatures common to both Petitions. If, as the Petitioners for incorporation appeared to suppose would be the case, parties having once signed are not held at liberty to recall their names or append them to a Petition of opposite purport, the opposition to an original Petition would be insufficient; but whether the names are merely withdrawn from that Petition or treated in addition as valid signatures to the Counter-Petition, the effect would alike be to defeat the movement for incorporation. But I think it has on a former occasion been decided by the Crown Law Officers that effect should in such cases be given to the last signature, as expressive of the deliberate wish of the Petitioner.

I may state further—although, if the foregoing views be correct, the proposed incorporation cannot take place—that the population within the limits described appears to have been not less than five hundred at the date of the original Petition.

I have, &c.,  
A. O. MORIARTY.

#### APPENDIX A.

LIST of names appended both to original and Counter-Petitions.

Richard Goulding.	James Haunigan.
James Goulding.	John Herne.
M. M'Leod.	William Herne.
William Studden.	John Utick.
John Sommerville.	John Harris.
William Bennett.	James Behan.
James Chaseling.	

#### APPENDIX B.

LIST of persons signing Counter-Petition not qualified as ratepayers.

Name.	Remarks.
John Kohler .....	Signature not verified.
John Birrell .....	Non-resident.
J. Dwyer.....	do.
Matthias Duncomb .....	Servant living in premises of his employer.
Thomas Polton .....	do. do.
Charles Bennett.....	Servants residing in premises of their employers, or premises for which other parties liable to rates.
James Wilson .....	
Robert O'Neill .....	
Martin Hayes.....	
Edward Dwyer .....	Public School teacher; premises exempt.
Mary Fletcher .....	
W. H. Williams.....	Reside on premises for which rates payable by others.
John Clarke .....	
Alexander Emery .....	
John Fleming.....	Signature not verified, and not liable to be rated. Employed by and resides with his father, who would be rated for premises.

#### APPENDIX C.

NAMES of parties who signed original Petition not qualified as ratepayers.

Name.	Remarks.
James S. Reid .....	Not a resident or liable to be rated.
W. S. Stewart .....	do. do.
W. H. Priddy .....	Public School teacher; premises exempt from rates.
D. Lamond.....	A minor.

### No. 26.

MINUTE OF THE PRINCIPAL UNDER SECRETARY, AND DECISION OF THE COLONIAL SECRETARY.

ACCORDING to the opinion of Sir James Martin, Attorney General, which was contrary to the opinion previously given by Sir William Manning while Attorney General, the signatures last given—that is, to the Counter-Petition—should be considered to express the deliberate wishes of the persons signing. Under such decision the Petition for incorporation fails.

It may be thought desirable to take the opinion of the present Attorney General.

## MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 17 April, 1873.

Municipal District of Shoalhaven.

A PETITION from sixty-one persons, who would upon incorporation be liable to be assessed for municipal taxes, praying that their locality might be constituted a Municipality, under the name of the Municipal District of Shoalhaven, was published in a supplementary *Government Gazette* of 29th February, 1872, and in a local newspaper of the 9th March following.

2. A Counter-Petition against the incorporation of such Municipality, signed by sixty-seven persons who would be similarly liable as above, has also been received and published.

3. The Counter-Petition having been received within the period of three months allowed for that purpose by section 10 of the Municipalities Act of 1867, and the majority of the Petitioners being opposed to incorporation, I recommend that no further steps be taken to promote the object of the original Petition.

HENRY PARKES.

No. 29.

## MINUTE OF THE EXECUTIVE COUNCIL.

THE Executive Council advise, for the reasons herein specified, that no further action be taken, under the Petitions herewith submitted, to promote the incorporation of Shoalhaven under the Municipalities Act of 1867.

ALEX. C. BUDGE,  
Clerk of the Council.

## THE PRINCIPAL UNDER SECRETARY TO COUNTER-PETITIONERS.

Colonial Secretary's Office,  
Sydney, 29 April, 1873.

GENTLEMEN,

Referring to my letter of the 29th November last, notifying the appointment of Mr. A. O. Moriarty to make inquiry, under the 12th section of the Municipalities Act of 1867, into the validity of the signatures attached to the Counter-Petition against the incorporation of the proposed Municipal District of Shoalhaven, and generally concerning the same, I am now directed by the Colonial Secretary to inform you that, as it appears from the report which has been furnished by Mr. Moriarty, that the majority of the Petitioners are opposed to incorporation, it has been decided by His Excellency the Governor, with the advice of the Executive Council, that no further steps shall be taken to promote the object of the original Petition.

I have, &c.,  
HENRY HALLORAN.

No. 31.

[A letter similar to the above was also addressed to John Monaghan, Esq., and the other applicants for incorporation.]

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

SYDNEY CORPORATION ACT AMENDMENT BILL.  
(PETITION IN FAVOUR OF—J. MURPHY.)

*Ordered by the Legislative Assembly to be printed, 29 January, 1874.*

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of James Murphy, of the City of Sydney, J.P.,—

RESPECTFULLY SHOWETH:—

That your Petitioner has noticed with great satisfaction that there is a Bill before your Honorable House for giving to the Citizens of Sydney the right to elect the Mayor of the City.

That your Petitioner, having been for several years an Alderman of the City (during which time he has held office as Mayor), has had considerable experience of the present method of electing the Mayor by and from amongst the Aldermen.

That, in his opinion, this mode of election is faulty and injurious in its effects to the general interests of the citizens, inasmuch as it occasions differences of opinion amongst the Aldermen, and produces party feeling which more or less during the year affects the deliberations and decisions of the Council, and tends to place personal considerations before the public good.

That these evils would be avoided by taking the election of Mayor out of the hands of the Council and giving it to the ratepayers.

And your Petitioner, therefore, prays that you will be pleased to pass the Bill now before your Honorable House for that purpose.

And your Petitioner will ever pray, &c.

JAMES MURPHY.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE  
LEGISLATIVE ASSEMBLY.

VOTES No. 8. FRIDAY, 19 SEPTEMBER, 1873.

7. WORKING OF MUNICIPALITIES:—Mr. Macintosh moved, pursuant to Notice,—  
(1.) That a Select Committee be appointed, with power to send for persons and papers, for the purpose of inquiring into and reporting upon the present working and financial position of the Municipalities as now incorporated,—such inquiry to include the Municipal Council of Sydney.  
(2.) That such Committee consist of Mr. Tunks, Mr. Thomas Robertson, Mr. Webb, Mr. Parkes, Mr. Teece, Mr. Fitzpatrick, Mr. Lucas, Mr. Burns, Mr. Hannell, and the Mover.  
Debate ensued.  
Question put and passed.

VOTES No. 52. FRIDAY, 5 DECEMBER, 1873.

8. WORKING OF MUNICIPALITIES:—Mr. Macintosh (*with the concurrence of the House*) moved, without Notice, That the Report from the Municipal Conference be referred to the Select Committee now sitting on the "Working of Municipalities."  
Question put and passed.

VOTES No. 62. WEDNESDAY, 14 JANUARY, 1874.

7. FINANCIAL POSITION OF MUNICIPALITIES ("*Formal*" Motion):—Mr. Macintosh moved, pursuant to Notice, That the Petition presented by him on 13th January, from the Members of the Municipal Councils of the Boroughs and Municipal Districts of New South Wales, relative to the inadequacy of the endowments under the Municipalities Act, be printed, and referred to the Select Committee now sitting on the Working of Municipalities.  
Question put and passed.

VOTES No. 72. FRIDAY, 30 JANUARY, 1874.

8. PAPERS:—  
Mr. Parkes laid upon the Table,—  
Return (*in part*) to an Order, made on 10th December, 1873, in reference to the financial position of Municipalities.  
Ordered to be printed, and referred to the Select Committee now sitting on "Working of Municipalities."

VOTES No. 112. TUESDAY, 14 APRIL, 1874.

2. Mr. Parkes laid upon the Table,—  
(1.) Supplementary Return to an Order, made on 10th December, 1873, in reference to the financial positions of Municipalities.  
Ordered to be printed, and referred to the Select Committee now sitting on the "Working of Municipalities."

VOTES No. 118. WEDNESDAY, 22 APRIL, 1874.

2. WORKING OF MUNICIPALITIES:—Mr. Macintosh, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 19th September, 1873, together with Appendix.  
Ordered to be printed.

## WORKING OF MUNICIPALITIES.

## REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 19th September, 1873, *with power to send for persons and papers, for the purpose of inquiring into and reporting upon the present working and financial position of Municipalities as now incorporated,—such inquiry to include the Municipal Council of Sydney, to whom were referred, on the 5th December, 1873, the Report from the Municipal Conference,—on the 14th January, 1874, the Petition from the Members of the Municipal Councils of the Boroughs and Municipal Districts of New South Wales, relative to the inadequacy of the Endowments under the Municipalities Act—on the 30th January, 1874, the Return (in part) to an Order made on 10th December, 1873, in reference to the financial position of Municipalities—and on the 14th April, 1874, the Supplementary Return to an Order, made on 10th December, 1873, in reference to the financial positions of Municipalities,—*have agreed to the following Report:—

Your Committee have examined the witnesses named in the List\* \* See List, Page 14. whose evidence is herewith presented, and after giving due weight thereto, and to the appendices, beg to state that they are of opinion;—

1. That the establishment and working of Municipalities under the Acts 31 Vic. No. 12, and 36 Vic. No. 26, has been beneficial both for the general public and the ratepayers more directly concerned, and that the gentlemen who have been elected from time to time as Aldermen and Auditors have, with but few exceptions, discharged the duties devolving upon them with zeal and fidelity.

2. That the funds of the Municipalities have for the most part been expended judiciously, but that in some instances the population of the Boroughs or Municipal Districts has been too small to admit of revenue being obtained beyond what was required for the first and rudest improvements, after the payment of official and the like expenses, while in the majority of the Municipalities important and desirable sanitary works have not been undertaken, in consequence of the inadequacy of the funds at the disposal of the Councils.

3. That most of the Municipalities which have been brought into existence are heavily in debt for money borrowed for works of urgent necessity, and will either be rendered in-operative or even unable to maintain their present works in a state of efficiency when their endowment from the Consolidated Revenue shall have ceased, unless their revenues should be supplemented in some way other than is provided for under the Acts in question.

4. That an increase in the maximum rate of assessment would be regarded with great disfavour by the owners of property, and would not add much to the revenues of the Municipalities, as a higher rate would not willingly be submitted to, save under exceptional circumstances.

5. That a measure for the prevention of dead-locks in the election of Mayors is called for.

6. Your Committee believe it is desirable that the Municipal Councils should be established on a healthy financial basis, and that the municipal system of local self-government should be extended as widely as possible, and they have devoted a large amount of attention to the consideration of the means best calculated to effect these objects.

7. Your Committee have reluctantly arrived at the conclusion that it would be unwise to attempt to enforce compulsory incorporation at the present time, even in the so-called settled districts, as the burthen of taxation for roads, bridges, and other public works of general utility, would, from the great disparities in the location of population, necessarily fall unequally upon the respective Boroughs or Districts, and would consequently be attended by wide-spread discontent.

8. It appears to your Committee, that as compulsory incorporation would be inexpedient it would be politic to hold out additional inducements for voluntary incorporation and that the additional inducements whether in the shape of increased endowments or of enlarged powers of taxation should be retrospective. Experience has proved that the endowments allowed under the Act 31 Vic., No. 12, was wholly insufficient, and that the indebtedness of most of the Councils, shown in the Return laid on the Table of your Honorable House on the 30th January last, was, as stated in the Petition from the Members of the Councils, rendered imperative by the necessities of the Councils, "to complete urgent and necessary improvements, for which many of the Municipal Councils have been compelled to borrow money, to repay which, with interest, both the endowment and a large portion of the rates must be devoted, leaving a margin barely sufficient to meet ordinary expenses, and nothing whatever to carry on further improvements, or to keep in repair the many miles of roads, streets, and other improvements already made."

9. Your Committee cannot, however, endorse the opinion "that nothing short of a perpetual endowment, equal to the amount raised by rates, subscriptions, &c., will be sufficient to carry on the necessary municipal works." They think that an extension of the term of the first endowments from five to twenty-one years, with an endowment equal to half the amount of the rates for a further period of ten years, would be ample to cover the first and heaviest expenditure for the erection of chambers, the formation of streets, construction of culverts, and the like works; and your Committee believe that this increase in the endowment would not only be satisfactory to the Councils but would also stimulate the formation of new Municipalities.

10. Your Committee also think that the Municipal law is susceptible of improvement in several respects. They would in particular recommend that power be given to the Councils to assess property triennially, to lease or sell unoccupied or unclaimed lands for unpaid rates, as is the case under the Municipal law of Canada, and to fix a minimum charge for every property.

11. Your Committee would also recommend that the formation of small Municipalities and the sub-division of existing Municipalities be discouraged, as it is apparent from the evidence that in most cases of the kind an undue proportion of the revenue is absorbed in official salaries and other working expenses, while the efficiency of the works is impaired by the inability of the Councils to give proper salaries for planning and supervision.

12. Your Committee are satisfied that the re-establishment of the Municipal Council of Sydney was for the public benefit, and that the Council enjoys the confidence of the citizens, notwithstanding that it has all along had to cope with financial difficulties, which were not of its own creation, in consequence of which its usefulness has been seriously impaired.

13. The evidence of the witnesses connected with the Corporation fully sustains the claims of the Sydney Council to increased aid from the Government in consideration of its expenditure in maintaining the public thoroughfares and parks, and on account of the exemption from rates of buildings occupied for Governmental and other public purposes.

14. Your Committee have considered the Report of the Finance Committee of the Council, dated 24th July, 1873 (Appendix A 1), in which it is recommended—

- “1. That the Government be solicited to obtain for the city a permanent annual grant of £10,000, in continuance of the practice since the year 1853, and that they also be petitioned to hand over to the Council all moneys received for licenses to publicans, wine and spirit merchants, auctioneers, and pawnbrokers in Sydney, and all fees for registration of dogs in the city.
- “2. That the Government be solicited to introduce, or give support to, an Act authorizing the Council to collect a wheel tax, and give them power to recover city rates from all buildings occupied by the Government, or as public institutions, and from all unoccupied lands, whether public or private, exclusive of reserves for public recreation.”—

and in lieu of these recommendations would suggest for the favourable consideration of your Honorable House—

1. The inadequacy of the present annual Parliamentary grant.
2. That the Council be empowered to collect a city or improvement rate for all buildings occupied for Governmental purposes.
3. That the Council be empowered to collect a rate not exceeding one penny in the pound on the assessed value of unoccupied lands within the city boundaries, whether belonging to the Government or to private individuals, exclusive of reserves for public purposes.

15. The expenditure of the Council in improvements on Moore Park, under the “Sydney Common Improvement Act of 1866,” the “Amendment Act of 1868,” amounted on the 24th July, 1873, to £45,232, of which sum there is still £25,620 to the debit of the Common improvement fund; but it is to be hoped that this debt will be liquidated by the sale of the remaining portion of the land embraced in the schedule of the first-named Act.

16. The amount expended by the Council on the Prince Alfred Park up to the same date, under the “Prince Alfred Park Enclosure Act of 1869,” was £19,730, of which amount there is still a balance against the Park Improvement Fund of £18,377, represented by £12,000 in debentures, and a Bank overdraft of £6,377, the annual revenue from the Park being about equal to the annual expenditure thereon.

17. The following extract from the Report of the Committee of the Council is, in the opinion of your Committee, deserving of the favourable consideration of your Honorable House :—

“THE amount of indebtedness which appears from the accompanying memoranda to attach to Prince Alfred Park Fund seems to have been contracted under peculiar and pressing circumstances. The grounds of the park were originally placed under the control of the Council as a place for public recreation, but in the year 1869 an Act was passed, authorizing the erection thereon of a building ‘for the purpose of holding annual and other Exhibitions, and for like purposes of public recreation and instruction,’ and authority was given to borrow £12,000 towards this object. Concurrent with the passing of this law, a large amount of public interest was manifested, and considerable influence exercised towards obtaining such accommodation in the park as would enable the Agricultural Society to hold an annual exhibition of the products of this and the neighbouring Colonies with success; and the Council, finding that the sum originally intended to be expended for the purpose would be inadequate for the requirements of the society, were induced to incur a larger outlay, and erected a building at a cost of £20,000. The anticipations which were prevalent when the building was completed, as to the great public benefit which would result from its erection, have, your committee consider, been more than realized; and although (notwithstanding the liberal rent received from the Agricultural Society) the undertaking has so far been a pecuniary loss to the Corporation, yet the advantages which the citizens have derived from the large influx of visitors into the city during the Exhibitions, and the consequent increase to their business, as well as the means afforded for the furtherance of the agricultural, pastoral, and other interests of the Australian Colonies must have fully justified the action of the Council in incurring the larger debt. But as this building and the adjacent grounds may be said to have been appropriated almost specially for an object which has the advancement of the whole Colony in view, your Committee are of opinion that the citizens, at whose cost they have been provided, have some reason for seeking for some return of their outlay from those for whose benefit, in common with their own, it has been incurred.

“That great advantages have already accrued to the agriculturists, breeders of stock, and manufacturers throughout the Colony, and a lively impetus been given to trade in almost all its branches by these annual Exhibitions, appears to be beyond doubt; and as the provision made in the park for these purposes is most ample and complete, and could not have been obtained in any other part of the city, it is presumed that the benefits which they bring to the colonists will increase from year to year rather than diminish.

“Your committee, therefore, would submit that the Council have good grounds for endeavouring to obtain from the General Revenue of the Colony an annual grant towards the support of this undertaking, and they would recommend that application be made to the Government to place the sum of £1,000 annually upon the Estimates for this purpose, until the existing debt be extinguished.”

18. As your Committee are aware that your Honorable House has read a first time a Bill introduced by the Government for the transfer of the Water Supply and Sewerage Works, with their several responsibilities, from the Council to a Metropolitan Board of Works, which is to have largely increased privileges, they refrain from submitting any recommendations in reference thereto, but would invite the early attention of your Honorable House to the evidence bearing on these subjects.

19. In the event of the provisions of such a Bill being passed into law, your Committee are of opinion that it is desirable that the Board should be empowered to take cognizance of the following principles for future improvements within the Metropolitan District :—

1. That wherever the main arteries along which the traffic now flows are found to be insufficient, relief should be sought either by opening up new routes or by enlarging the existing ones.
2. That more direct lines of communication should be established than now exist between the several points of the metropolitan district.
3. That all restrictions upon the natural and convenient flow of traffic—such, for example, as tolls on the roads and bridges within the metropolitan area—should as a general rule be removed.
4. That all reasonable facilities should be given for the establishment of railways and tramways calculated to improve the means of transit within the metropolitan district.
5. That care be taken by the Board to economize the waste spaces on the fore shores of the Parramatta River and the several bays within the harbour of Port Jackson.
6. The collection of a rate when deemed expedient by Parliament to defray the charges for the establishment and maintenance of a Metropolitan Fire Brigade; the protection of unclaimed and unoccupied places; the regulation of the use of locomotive engines on the streets or roads; the superintending of measures for suppressing contagious diseases and plague in cattle; the storage of explosive or other materials dangerous to the public safety.
7. To provide parks, pleasure-grounds, and other places of public recreation, for the improvement of the metropolitan district.
8. To watch over all matters brought before Parliament, by Bill or otherwise, affecting metropolitan interests.
9. That the cost of the formation of new streets or the enlargement of existing ones, or in the purchase or building of bridges, or in removing toll-bars, should be defrayed by a local rate levied on the whole metropolitan district, aided by such Endowment Fund as the Parliament shall deem it equitable and expedient to grant.

*No. 2 Committee Room,  
Sydney, 21st April, 1874.*

JOHN MACINTOSH,  
Chairman.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 25 SEPTEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh,		Mr. Burns,
Mr. Thomas Robertson,		Mr. Fitzpatrick,
		Mr. Tunks.

Mr. Macintosh called to the Chair.

Entry in Votes and Proceedings, appointing the Committee, read by the Clerk.

Committee deliberated.

Ordered,—That Edward Lord, Esq., and Charles H. Woolcott, Esq., be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at Two o'clock.]

TUESDAY, 30 SEPTEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Tunks,		Mr. Lucas,
Mr. Burns,		Mr. Thomas Robertson.

Charles H. Woolcott, Esq. (*Town Clerk*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Charles H. Woolcott, Esq., and Edward Lord, Esq., be summoned to give evidence next meeting.

[Adjourned to Thursday next, at Two o'clock.]

THURSDAY, 2 OCTOBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh,		Mr. Burns.
----------------	--	------------

In the absence of a quorum, the meeting called, for this day lapsed.

FRIDAY, 3 OCTOBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Tunks,		Mr. Burns,
Mr. Lucas,		Mr. Webb,
		Mr. Thomas Robertson.

Charles H. Woolcott, Esq. (*Town Clerk*), called in and further examined.

Witness handed in copy of the Report of Finance Committee on financial position of City Corporation, which was ordered to be appended. (*Vide Appendix A 1.*)

Witness withdrew.

Committee deliberated.

Ordered,—That Charles H. Woolcott, Esq., and Edward Lord, Esq., be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at Two o'clock.]

WEDNESDAY, 8 OCTOBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns,		Mr. Thomas Robertson,
Mr. Lucas,		Mr. Webb.

Charles H. Woolcott, Esq. (*Town Clerk*), called in and further examined.

Witness handed in Report from the City Engineer, estimating cost of new Town Hall, which was ordered to be appended. (*See Appendix A 2.*)

Witness withdrew.

Committee deliberated.

Ordered,—That S. H. Pearce, Esq., be summoned to give evidence next meeting.

[Adjourned till Friday next, at Two o'clock.]

FRIDAY,

FRIDAY, 10 OCTOBER, 1873.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.  
Mr. Lucas, | Mr. Burns,  
Mr. Tunks.

S. H. Pearce, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Edmund Webb, Esq., M.P., be requested, and Mr. Henry Hudson and Mr. R. N. Banks be summoned, to give evidence next meeting.

[Adjourned to Tuesday next, at *Two* o'clock.]

TUESDAY, 14 OCTOBER, 1873.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.  
Mr. Lucas, | Mr. Tunks,  
Mr. Webb, | Mr. Burns.

Edmund Webb, Esq., M.P., a member of the Committee, examined in his place.

Mr. Henry Hudson called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. R. N. Banks and Mr. F. R. Robinson be summoned to give evidence next meeting.

[Adjourned to Friday next, at *Two* o'clock.]

FRIDAY, 17 OCTOBER, 1873.

MEMBER PRESENT :—

Mr. Macintosh.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 21 OCTOBER, 1873.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.  
Mr. Burns, | Mr. Tunks,  
Mr. Teece.

Mr. F. R. Robinson called in and examined.

Witness handed in copy of Paper on "Dry Earth Closet System."

Witness withdrew.

Mr. R. N. Banks called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That C. H. Walsh, Esq., and Mr. Hosea Bennett be summoned to give evidence next meeting.

[Adjourned to Thursday next, at *Two* o'clock.]

THURSDAY, 23 OCTOBER, 1873.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 24 OCTOBER, 1873.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.  
Mr. Burns, | Mr. Fitzpatrick,  
Mr. Webb.

Mr. Hosea Bennett (*Mayor of Paddington*), called in and examined.

Witness withdrew.

C. H. Walsh, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. John Taylor and Mr. J. J. Riley be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at *Two* o'clock.]

TUESDAY,

TUESDAY, 28 OCTOBER, 1873.

In the absence of a quorum, the meeting called for this day lapsed.

THURSDAY, 30 OCTOBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Webb.

The Chairman informed the Committee that he had received a letter from Mr. John Taylor, stating that he was unable to attend on account of ill-health.

It being the desire of the Committee to examine the Chairman,—on motion of Mr. Webb, Mr. Burns called to the Chair *pro tem*.

John Macintosh, Esq., M.P. (*Chairman*), examined in his place as a Member of the Committee.

Mr. Macintosh resumed the Chair.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY, 13 NOVEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Hannell.

The Chairman informed the Committee that he had received letters from Mr. J. J. Riley and Mr. C. H. Walsh, stating that they could not attend this day.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 18 NOVEMBER, 1873.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 21 NOVEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Fitzpatrick,  
Mr. Tunks, | Mr. Webb.

Mr. J. J. Riley (*Mayor of Penrith*), called in and examined.

Witness withdrew.

Mr. John Brown (*Alderman, Wollongong*), called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 28 NOVEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Thomas Robertson,  
Mr. Fitzpatrick, | Mr. Tunks,  
Mr. Lucas.

Chairman informed the Committee that he had received a letter from His Worship the Mayor of Sydney, stating that he was unable to attend, and asking the Committee to postpone his examination until after the Municipal elections.

T. Bradridge, Esq. (*City Surveyor*), called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 2 DECEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Teece,  
Mr. Thomas Robertson.

James Oatley, Esq., called in and examined.

Witness withdrew.

James Merriman, Esq. (*Mayor of Sydney*), called in and examined.

Witness withdrew.

Thomas Robertson, Esq., M.P., a member of the Committee, examined in his place.

Witness to supply a copy of Return of Traffic, &c., over the Bridge over the Edwards River, at Deniliquin, which was ordered to be appended. (*See Appendix B1.*)

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 5 DECEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Fitzpatrick,  
Mr. Thomas Robertson, | Mr. Webb.

Chairman informed the Committee that he had received a letter from the Acting Town Clerk of West Maitland, informing him that Mr. Fulford was absent on sick leave, and therefore could not attend the meeting of the Committee this day.

Mr. William Pidcock called in and examined.

Witness withdrew.

Duncan Sim, Esq., called in and examined.

Witness handed in a copy of a Paper in reference to proposed alterations in the Municipalities Act, which was ordered to be appended. (*See Appendix C1.*)

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 16 DECEMBER, 1873.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Thomas Robertson, | Mr. Burns,  
Mr. Webb.

Entry in the Votes and Proceedings, referring Paper to Committee, read by the Clerk.

Printed copies of Paper referred before the Committee.

Mr. James Fulford (*Town Clerk, West Maitland*), called in and examined.

Witness withdrew.

Thomas Robertson, Esq., M.P., a member of the Committee, further examined in his place.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY, 15 JANUARY, 1874.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Teece, | Mr. Lucas,  
Mr. Burns.

Entry from Votes and Proceedings, referring Petition in reference to endowments to Committee, read by the Clerk.

Printed copies of the Petition referred before the Committee.

Charles Byrnes, Esq., called in and examined.

Witness withdrew.

J. D. Larsen, Esq., C.E., called in and examined.

Witness withdrew.

Clerk submitted a letter from Mr. George Pile, junr., requesting to be examined before the Committee; also a letter from Mr. James Fulford, forwarding claim for expenses.

Committee deliberated, and ordered that letters stand over for future consideration.

Re-assembling of Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY,

FRIDAY, 13 FEBRUARY, 1874.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.

Mr. Thomas Robertson, | Mr. Fitzpatrick.

Entry from Votes and Proceedings, referring Paper to Committee, read by the Clerk.

Printed copies of Paper referred before the Committee.

Committee deliberated.

Ordered,—That all the papers referred to the Committee be printed as Appendices. (*See Appendices D1, 2, and 3.*)

The Chairman informed the Committee that since the last meeting he had instructed the Clerk to write to the Mayor of Albury, inviting him to give evidence before this Committee, and that the Clerk had received a reply from that gentleman, expressing a desire to be examined, but stating that he would not be in Sydney for some time.

Committee deliberated.

Re-assembling of Committee to be arranged by the Chairman.

[Adjourned.]

WEDNESDAY, 1 APRIL, 1874.

MEMBERS PRESENT :—

Mr. Macintosh in the Chair.

Mr. Lucas, | Mr. Burns.

Chairman submitted Draft Report, which was read 1<sup>o</sup> as follows :—

“Your Committee have examined the witnesses named in the List, whose evidence is herewith presented, and after giving due weight thereto, and to the appendices, beg to state that they are of opinion,—

“1. That the establishment and working of Municipalities under the Acts 31 Vic. No. 12, and 36 Vic. No. 26, has been beneficial both for the general public and the ratepayers more directly concerned, and that the gentlemen who have been elected from time to time as Aldermen and Auditors have, with but few exceptions, discharged the duties devolving upon them with zeal and fidelity.

“2. That the funds of the Municipalities have for the most part been expended judiciously, but that in some instances the population of the Boroughs or Municipal Districts has been too small to admit of revenue being obtained beyond what was required for the first and rudest improvements, after the payment of official and the like expenses, while in the majority of the Municipalities important and desirable sanitary works have not been undertaken, in consequence of the inadequacy of the funds “under the control” of the Councils.

“3. The most of the Municipalities which have been brought into existence are heavily in debt for money borrowed for works of urgent necessity, and will either be rendered inoperative or even unable to maintain their present works in a state of efficiency when their endowment from the Consolidated Revenue shall have ceased, unless their revenues should be supplemented in some way other than is provided for under the Acts in question.

“4. That an increase in the maximum rate of assessment would be regarded with great disfavour by the owners of property, and would not add much to the revenues of the Municipalities, as a higher rate would “not” be submitted to, save under exceptional circumstances.

“5. That a measure for the prevention of dead-locks in the election of Mayors is called for.

“6. Your Committee believe it is desirable that the Municipal Councils should be established on a healthy financial basis, and that the municipal system of local self-government should be extended as widely as possible, and they have devoted a large amount of attention to the consideration of the means best calculated to effect these objects.

“7. Your Committee have reluctantly arrived at the conclusion that it would be unwise to attempt to enforce compulsory incorporation at the present time, even in the so-called settled districts, as the burthen of taxation for roads, bridges, and other public works of general utility would, from the great disparities in the location of population, necessarily fall unequally upon the respective boroughs or districts, and would consequently be attended by wide-spread discontent.

“8. It appears to your Committee, that as compulsory incorporation would be inexpedient it would be politic to hold out additional inducements for voluntary incorporation, and that the additional inducements, whether in the shape of increased endowments or of enlarged powers of taxation, should be retrospective. Experience has proved that the endowment allowed under the Act 31 Vic. No. 12, was wholly insufficient, and that the indebtedness of most of the Councils, shown in the Return laid on the Table of your Honorable House, on the 30th January last, was, as stated in the Petition from the Members of the Councils, rendered imperative by the necessities of the Councils, ‘to complete urgent and necessary improvements “(the expenses of which have unavoidably involved an outlay, with the strictest regard to economy, far exceeding the amount raised by rates, endowments, &c., for many years to come) and” for which many of the Municipal Councils have been compelled to borrow money, to repay which with interest, both the endowment and a large portion of the rates must be devoted, leaving a margin barely sufficient to meet ordinary expenses, and nothing whatever to carry on further improvements, or to keep in repair the many miles of roads, streets, and other improvements already made.’

“9. Your Committee “are, however, not of” opinion ‘that nothing short of a perpetual endowment, equal to the amount raised by rates, subscriptions, &c., will be sufficient to carry on the necessary municipal works.’ They think that an extension of the term of the first endowments “of an amount equal to the rates” from five to twenty-one years, with “the continuance of the present endowment for the remaining” period of ten years, would be ample to cover the first and heaviest expenditure for the erection of chambers, the formation of streets, construction of culverts, and the like works; and your Committee believe that this increase in the endowment would not only be satisfactory to the Councils but would also stimulate the formation of new Municipalities.

"10. Your Committee also think that the Municipal law is susceptible of improvement in several respects. They would in particular recommend that power be given to the Councils to assess property triennially, to lease or sell unoccupied or unclaimed lands for unpaid rates, as is the case under the Municipal law of Canada, and to fix a minimum charge for every property.

"11. Your Committee would also recommend that the formation of small Municipalities and the subdivision of existing Municipalities be discouraged, as it is apparent from the evidence that in most cases of the kind an undue proportion of the revenue is absorbed in official salaries and other working expenses, while the efficiency of the works is impaired by the inability of the Councils to give proper salaries for planning and supervision.

"12. Your Committee are satisfied that the re-establishment of the Municipal Council of Sydney was for the public benefit, and that the Council enjoys the confidence of the citizens "in a high degree," notwithstanding that it has all along had to cope with financial difficulties, which were not of its own creation, in consequence "of the existence" of which its "power to carry out improvements has been seriously checked."

"13. The evidence of the witnesses connected with the Corporation, "who have been examined by your Committee," fully sustains the claims of the Sydney Council to increased aid from the Government in consideration of its expenditure in maintaining the public "thoroughfares," parks, and on "account" of buildings occupied for Governmental and other public purposes.

"14. Your Committee have considered the Report of the Finance Committee of the Council, dated 24th July, 1873 (Appendix A 1), in which it is recommended—

"1. That the Government be solicited to obtain for the city a permanent annual grant of £10,000, in continuance of the practice since the year 1853, and that they also be petitioned to hand over to the Council all moneys received for licenses to publicans, wine and spirit merchants, auctioneers, and pawnbrokers in Sydney, and all fees for registration of dogs in the city.

"2. That the Government be solicited to introduce, or give support to, an Act authorizing the Council to collect a wheel tax, and give them power to recover city rates from all buildings occupied by the Government, or as public institutions, and from all unoccupied lands, whether public or private, exclusive of reserves for public "recreation"—

and in lieu of these recommendations would suggest for the favourable consideration of your Honorable House—

"1. "That" the present annual Parliamentary grant "be reconsidered."

"2. That the Council be empowered to collect a city or improvement rate for all buildings occupied for Governmental purposes.

"3. That the Council be empowered to collect a rate not exceeding one penny in the pound on the assessed value of unoccupied lands within the city boundaries, whether belonging to the Government or to private individuals, exclusive of reserves for public "recreation."

"15. The expenditure of the Council in improvements on Moore Park, under the 'Sydney Common Improvement Act of 1866,' the 'Amendment Act of 1868,' amounted on the 24th July, 1873, to £45,232, of which sum there is still £25,620 to the debit of the Common Improvement Fund; but it is to be hoped that this debt will be liquidated by the sale of the remaining portion of the land embraced in the schedule of the first-named Act.

"16. The amount expended by the Council on the Prince Alfred Park up to the same date, under the 'Prince Alfred Park Enclosure Act of 1869,' was £19,730, of which amount there is still a balance against the Park Improvement Fund of £18,377, represented by £12,000 in debentures, and a Bank overdraft of £6,377, the annual revenue from the Park being about equal to the annual expenditure thereon.

"17. The following extract from the Report of the Committee of the Council is, in the opinion of your Committee, deserving of the favourable consideration of your Honorable House:—

"The amount of indebtedness which appears from the accompanying memoranda to attach to Prince Alfred Park Fund seems to have been contracted under peculiar and pressing circumstances. The grounds of the Park were originally placed under the control of the Council as a place for public recreation, but in the year 1869 an Act was passed, authorizing the erection thereon of a building 'for the purpose of holding annual and other Exhibitions, and for like purposes of public recreation and instruction,' and authority was given to borrow £12,000 towards this object. Concurrent with the passing of this law, a large amount of public interest was manifested, and considerable influence exercised towards obtaining such accommodation in the Park as would enable the Agricultural Society to hold an annual exhibition of the products of this and the neighbouring Colonies with success; and the Council, finding that the sum originally intended to be expended for the purpose would be inadequate for the requirements of the Society, were induced to incur a larger outlay, and erected a building at a cost of £20,000. The anticipations which were prevalent when the building was completed, as to the great public benefit which would result from its erection, have, your committee consider, been more than realized; and although (notwithstanding the liberal rent received from the Agricultural Society) the undertaking has so far been a pecuniary loss to the Corporation, yet the advantages which the citizens have derived from the large influx of visitors into the city during the Exhibitions, and the consequent increase to their business, as well as the means afforded for the furtherance of the agricultural, pastoral, and other interests of the Australian Colonies must have fully justified the action of the Council in incurring the larger debt. But as this building and the adjacent grounds may be said to have been appropriated almost specially for an object which has the advancement of the whole Colony in view, your Committee are of opinion that the citizens, at whose cost they have been provided, have some reason for seeking for some return of their outlay from those for whose benefit, in common with their own, it has been incurred.

"That great advantages have already accrued to the agriculturists, breeders of stock, and manufacturers throughout the Colony, and a lively impetus been given to trade in almost all its branches by these annual Exhibitions, appears to be beyond doubt; and as the provision made in the Park for these purposes is most ample and complete, and could not have been obtained in any other part of the City, it is presumed that the benefits which they bring to the colonists will increase from year to year rather than diminish.

"Your Committee, therefore, would submit that the Council have good grounds for endeavouring to obtain from the General Revenue of the Colony an annual grant towards the support of this undertaking, and they would recommend that application be made to the Government to place the sum of £1,000 annually upon the Estimates for this purpose, until the existing debt be extinguished."

"18. As your Committee are aware that your Honorable House has read a first time a Bill introduced by the Government for the transfer of the Water Supply and Sewerage Works, with their several responsibilities, from the Council to a Metropolitan Board of Works, which is to have largely increased privileges, they refrain from submitting any recommendations in reference thereto, but would "direct" the "serious" attention of your Honorable House to the evidence bearing on these subjects.

"19. In the event of the provisions of "that" Bill being passed into law, "whereby a Metropolitan Board of Works will be created," your Committee are of opinion that it is desirable that the Board should be empowered to take cognizance of the following principles for future improvements within the Metropolitan District:—

- "1. That wherever the main arteries along which the traffic now flows are found to be insufficient, relief should be sought either by opening up new routes or by enlarging the existing ones.
- "2. That more direct lines of communication should be established than now exist between the several points of the metropolitan district.
- "3. That all restrictions upon the natural and convenient flow of traffic—such, for example, as tolls on the roads and bridges within the metropolitan area—should as a general rule be removed.
- "4. That all reasonable facilities should be given for the establishment of railways and tramways calculated to improve the means of transit within the metropolitan district.
- "5. That care be taken by the Board to economise the waste spaces on the fore shores of the Parramatta River and the several bays within the harbour of Port Jackson.
- "6. The collection of a rate when deemed expedient by Parliament to defray the charges for the establishment and maintenance of a Metropolitan Fire Brigade; the protection of unclaimed and unoccupied places; the regulation of the use of locomotive engines on the streets or roads; the superintending of measures for suppressing contagious diseases and plague in cattle; the storage of explosive or other materials dangerous to the public safety.
- "7. To provide parks, pleasure-grounds, and other places of public recreation, for the improvement of the metropolitan district.
- "8. To watch over all matters brought before Parliament, by Bill or otherwise, affecting metropolitan interests.
- "9. That the cost of the formation of new streets or the enlargement of existing ones, or in the purchase or building of bridges, or in removing toll-bars, should be defrayed by a local rate levied on the whole metropolitan district, aided by such Endowment Fund as the Parliament shall deem it equitable and expedient to grant.
- "10. Your Committee would observe that the tendency of the evidence has led them to the conclusion that to give proper effect to local improvement of a public nature, and to ensure economy of cost, the Board should be enabled to undertake such works on a uniform and sufficiently comprehensive scale adequate to existing and prospective wants of the traffic, the comfort, and general benefit of the inhabitants of the district."

Committee deliberated.

[Adjourned to Tuesday next, at *Two* o'clock.]

TUESDAY, 21 APRIL, 1874.

MEMBERS PRESENT:—

Mr. Macintosh in the Chair.

Mr. Burns, | Mr. Thomas Robertson.

Entry from Votes and Proceedings referring Paper read by the Clerk.

Printed copies of Paper referred before the Committee.

Ordered,—That Paper be appended. (*See Appendix D 4.*)

Committee deliberated.

Draft Report read 2<sup>o</sup>, paragraph by paragraph.

Preamble read and agreed to.

Paragraph 1 read and agreed to.

Paragraph 2 read and amended, on motion of Mr. Thomas Robertson, by the omission of the words "under the control", and the insertion in their place of the words "at the disposal."

Paragraph as amended *agreed to*.

Paragraph 3 *read and agreed to*.

Paragraph 4 *read and amended*, on motion of Mr. Thomas Robertson, by the insertion after the second word "not" of the word "willingly."

Paragraph as amended *agreed to*.

Paragraphs 5, 6, and 7 *read and agreed to*.

Paragraph 8 *read and amended*, on motion of Mr. Burns, by the omission of the words "(the expenses of which have unavoidably involved an outlay with the strictest regard to economy far exceeding the amount raised by rates, endowments, &c., for many years to come) and"

Paragraph as amended *agreed to*.

Paragraph 9 *read and amended*, on motion of Mr. Burns, by the omission of the words "are, however, not of", and the insertion in their place of the words "cannot, however, endorse the", and further by the omission of the words "of an amount equal to the rates", and further by the omission of the words "the continuance of the present endowment for the remaining", and the insertion in their place of the words "an endowment equal to half the amount of the rates for a further."

Paragraph as amended *agreed to*.

Paragraphs 10 and 11 *read and agreed to*.

Paragraph 12 *read and amended*, on motion of Mr. Burns, by the omission of the words "in a high degree", and further by the omission of the words "of the existence", and further by the omission of the words "power to carry out improvements has been seriously checked", and the insertion in their place of the words "usefulness has been seriously impaired."

Paragraph as amended *agreed to*.

Paragraph 13 *read and amended*, on motion of Mr. Burns, by the omission of the words "who have been examined by your Committee", and further by the insertion of the word "and" after the word "thoroughfares", and further by the insertion after the word "account" of the words "of the exemption from rates."

Paragraph as amended *agreed to*.

Paragraph 14 *read and amended*, on motion of Mr. Burns, by the omission of the word "That" in the first sub-paragraph, and the insertion of the words "The inadequacy of", and further by the omission of the words "be re-considered", and further by the omission of the word "recreation" in the third sub-paragraph, and the insertion in its place of the word "purposes"

Paragraph as amended *agreed to*.

Paragraphs 15, 16, and 17 *read and agreed to*.

Paragraph 18 *read and amended*, on motion of Mr. Burns, by the omission of the word "direct", and the insertion in its place of the word "invite", and further by the omission of the word "serious" and the insertion in its place of the word "early"

Paragraph as amended *agreed to*.

Paragraph 19 *read and amended*, on motion of Mr. Burns, by the omission of the word "that", and the insertion in its place of the words "such a", and further by the omission of the words "whereby a Metropolitan Board of Works will be created", and further by the omission of sub-paragraph 10.

Paragraph as amended *agreed to*.

Motion made (Mr. Burns) and Question,—That the Report as amended be the Report of the Committee,—put and passed.

Chairman to report to the House.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

WORKING OF MUNICIPALITIES.

TUESDAY, 30 SEPTEMBER, 1873.

Present:—

MR. BURNS,  
MR. MACINTOSH,

MR. LUCAS,  
MR. TUNKS.

JOHN MACINTOSH, Esq., IN THE CHAIR.

Charles Henry Woolcott, Esq., Town Clerk of the City of Sydney, called in and examined:—

1. *Chairman.*] This Committee has been appointed to inquire into and report upon "the present working and financial position of the Municipalities as now incorporated, such inquiry to include the Municipal Council of Sydney";—how long have you been connected with the City Corporation? Upwards of thirty years.
2. How long as Town Clerk? Since the year 1857—since the re-establishment of the Corporation.
3. I understand you are also a member of a municipality? I have been, but I am not at present.
4. For how many years? Two years.
5. How many distinct funds are there in the books of the City Corporation? There are five funds: The City Fund, the Water Fund, the Sewerage Fund, the Prince Alfred Park Fund, and the Sydney Common Fund.
6. What is the gross indebtedness of the City fund? £96,500 on the 30th June last, represented by debentures £90,000, and Bank overdraft £6,500; but against that we have a sinking fund, amounting to about £15,000, leaving the actual indebtedness of the City fund at about £80,000.
7. Could you explain to the Committee how this indebtedness has arisen? From the large demands upon the Council for improvements, and the inadequacy of their revenue, to meet such demands without borrowing.
8. *Mr. Lucas.*] What are the annual receipts of the City fund? From City rates, £36,000; markets, £7,000; wharves, £2,000; baths, £500; fees and fines, £2,000; tolls, £500; sale of manure, £500; making a total revenue of about £48,500. Independent of that there is the Government endowment of £10,000 per annum, which has not always been received, but has always been expended.
9. How has it been expended if it has not been received? It has been raised by debentures and charged against the interest account on the water and sewerage funds; that is to say, debentures have been issued on the water and sewerage funds, and charged against the payment of interest due on the Government debt, and credited to the City fund as a receipt of endowment from the Government. We charge £5,000 to the water fund, and £5,000 to the sewerage fund, and credit the City fund with £10,000.
10. And you spend this sum of £10,000 on the improvements of the City? Yes. The Government have, to a certain extent, approved of this course, some years since a proposition having been made to them to this effect, that if a cheque were paid into the Treasury for the sum of £10,000 annually, another cheque should be given from the Treasury to the Council for the endowment. The whole matter was submitted to the Treasury and approved of, but the City Council afterwards demurred to the arrangement.
11. *Mr. Burns.*] You adopted the course you have referred to in preference to drawing a cheque and counter-cheque? Yes.
12. *Chairman.*] There has been a large expenditure on what may be termed permanent improvements? Yes.

C. H.  
Woolcott,  
Esq.

30 Sept., 1873.

- C. H. Woolcott, Esq.  
30 Sept., 1873.
13. For instance, the alteration of the markets? Yes. The expenditure on permanent improvements, including the Town Hall, amounts to fully as much as the indebtedness of the Council for debentures issued on the City fund—£90,000.
14. *Mr. Tunks.*] Will you state the whole indebtedness of the Council? The total indebtedness of the Council on 30th June last, was £792,366.
15. Does that sum include the whole of the liabilities of the City, whether created by the Council or by the Government? Yes.
16. *Mr. Lucas.*] For how much of that is the Government responsible? £413,000.
17. *Mr. Tunks.*] Has any account of the money advanced by the Government been furnished to the City Council at any time? Some years since there was a debit and credit account sent in by the Treasury upon my official application; and at the same time we submitted a contra account.
18. Will you state the different deficiencies which go to make up this sum of £792,366? Up to the 30th June last on the City fund £79,640, after taking credit for the sinking fund, amounting to about £15,000; on the water fund, £294,089; on the sewerage fund, £374,640; on the Sydney Common fund, £25,620; on the Prince Alfred Park fund, £18,377.
19. Making altogether £792,366? Yes.
20. This includes the debentures guaranteed by the Government as well as the debt incurred by the City Council under the Act? Yes.
21. Will you state to the Committee how long this indebtedness has been accruing? The present Council has been in existence since 1857. As far as we are concerned it has only been accruing since that date; but the greater proportion of the water and sewerage debt was incurred by the City Commissioners.
22. Was the whole of that money spent by the Commissioners? No, the whole of it was not expended, but I think contracts had been entered into for nearly the whole of it, and left to the Council to complete.
23. Was not an Act passed to enable the Council to receive £130,000 of money raised by the Commissioners? Yes, the Corporation Act of 1857 enabled the Council to receive the balance of the £400,000 which the Commissioners were authorized to borrow.
24. That money was paid over? Yes, that money was received from the Government to pay the Commissioners' debts, to almost the full extent of it, I think.
25. Irrespective of the Commissioners' debts, how much indebtedness has been incurred by the Council since its re-establishment in 1857? £379,000.
26. £379,000 to the bad in sixteen years? Yes.
27. The expenditure of money on the water account realizes some kind of return? Yes, a very large return—about £36,000 a year. That is the gross income from the water rate.
28. Could you furnish us with an approximate statement of the annual cost of working the water supply? About £13,200.
29. Do you know how many Acts of Parliament there are regulating Corporations? I dare say four or five and twenty.
30. Some of these enable the Corporations to borrow money? Yes.
31. Which of them? "The Corporation Act of 1857," the Sydney Common Act, and the Prince Alfred Park Act.
32. Have you nearly exhausted the borrowing power under these Acts? We have altogether on the Sydney Common and Prince Alfred Park Acts; but not the City nor the Water or Sewerage Acts.
33. *Mr. Lucas.*] Is the power to borrow unrestricted except by the Acts themselves, or have you to get authority from the Government to borrow? The Acts give the Council absolute power to borrow up to certain limits.
34. *Mr. Tunks.*] There is £25,000 of indebtedness on the Sydney Common account;—have you not had authority from Parliament to sell some of the land belonging to the Common, a considerable portion of which still remains unsold? Yes, a very considerable and very valuable portion.
35. What is the probable value of the land which remains unsold? We have never made an estimate of it. The value of land in that neighbourhood fluctuates very much.
36. Is there any probability of the sale of this land clearing off the indebtedness on the Common? Yes, I think there is.
37. How many miles of streets are under the charge of the City Council? From 98 to 100 miles.
38. What portion of these are formed and made? As far as I have been able to ascertain—about two-thirds.
39. So that one-third of the streets are unformed, neither kerbed, guttered, nor metalled? Yes.
40. I suppose there are continual demands upon the Corporation for works throughout the whole City? Constantly.
41. I suppose it is next to impossible for the aldermen to refuse to meet the wishes of the people? It is impossible for them to comply with them.
42. If they have money in hand there is great pressure brought to bear upon the aldermen? Yes.
43. How often are the aldermen elected? Every two years.
44. Every alderman goes to his constituents every second year? Yes.
45. *Mr. Lucas.*] Will you state what has been the actual income of the City fund, independently of borrowed money, for each year since 1867? The income for the past five years, after deducting sums raised upon debentures, the Government endowment, and amounts refunded to the Corporation for works performed—street-watering and paving, for instance—has been for 1868, £49,795; for 1869, £52,071; for 1870, £54,155; for 1871, £50,789; for 1872, £53,330.
46. What is the present revenue from City rates? About £36,000.
47. How do you obtain that? From an assessment of City properties, the rate being one shilling in the pound on the net annual value.
48. Is that on occupied property? On occupied property.
49. Is unimproved land taken into account? No; the rate is on occupied buildings only.
50. And they must be occupied at some time during the half year for which the rate is levied. If a building is closed for a half year you do not receive any rate from it? No, not if the period corresponds with the half year in the books.
51. Have you any idea what a rate on unimproved land would amount to if you had power to levy it? No estimate has been made.
52. Could you furnish an approximate estimate? I am afraid it is scarcely possible to do so. I should not like to make any promise of the kind.

53. Have you not, in your office, plans showing the lands built upon, and the lands not yet built upon? No.

54. Have you not a map of the City? We have a map of the City made years ago, but the whole of the new buildings have not been placed upon it.

55. Would you make some inquiries and give us your ideas upon the subject? They would be too vague to be at all reliable. There are 20 miles of frontage of public streets to unoccupied lands, but we cannot value them.

56. How many miles of streets are there? From 98 to 100 miles.

57. Then one-fifth of the City is unbuild upon? Yes.

58. Will you make some inquiries, and think the matter over, with a view to forming an estimate of the average value of the unoccupied land fronting these 20 miles of streets? To obtain the information you ask for it, would be necessary to traverse the entire City, and value these unoccupied lands, as in the case of an ordinary assessment. An approximate estimate of their value would be useless for the required purpose.

59. There is a good deal of public property which pays no rates? Yes.

60. Will you also endeavour to get us an estimate of the value of that public property? There are nine miles of street frontage to public property.

61. As a rule it is valuable land? Yes; the most valuable parts of the City are occupied by public buildings.

62. Do I understand you to include Government House? Yes.

63. Not the Gardens, I suppose? The Gardens are put down as reserved land.

64. You are not referring to public reserves? Hyde Park, for instance, is included.

65. Will you endeavour to furnish us with an estimate of the value of public property in the City, not including public reserves? The annual value of public buildings, or buildings occupied for public purposes—charitable institutions and schools—is estimated at from £41,000 to £42,000.

66. Besides a rate on public property and unimproved property, are there any other means by which you think the City fund could be increased? I can only tell you what are the views of the City Council with regard to that question. The Council think they should have the permanent endowment of £10,000 a year; that they should also have all moneys received for licenses to publicans, wine and spirit merchants, auctioneers, and pawnbrokers, and all fees for the registration of dogs. They also think they should have power to collect a wheel tax, and to recover City rates from all buildings occupied by the Government and by public institutions, and from all unoccupied lands, whether public or private, exclusive of reserves for public recreation.

67. *Mr. Burns.*] Have you made any estimate of the increased revenue that would give? I have not.

68. *Mr. Lucas.*] Will you furnish it as near as you can? I will endeavour to do so.

69. *Mr. Tunks.*] According to an official document I find that your estimate of the value of a City rate upon public buildings is £2,059 a year? £2,200 is the present estimate.

70. Is it your opinion that the public have handed over to the City Council a water supply which should be an equivalent for anything the Government may be said to evade in the shape of taxation? The Government have not handed over anything but the debt to the Corporation.

71. *Chairman.*] Could you give the Committee any information as to the cost per yard for the formation of streets? The average cost of kerbing, guttering, forming, ballasting, and metalling streets, 66 feet in width, is £3 per lineal yard.

72. What has been the expense of keeping George-street in repair during the last two years? Last year upwards of £9,000 was spent upon George and Parramatta streets; that is about the average I think.

73. What is the revenue? The City rate is about £7,200 a year from these streets.

74. Does the expenditure you have mentioned include lighting or cleansing? It is for cleansing and repairing the street, but does not include lighting.

75. *Mr. Tunks.*] The revenue from the markets forms part of the City fund? Yes.

76. What have the markets cost since they were handed over—I mean for alterations? From £20,000 to £21,000. I am speaking of the George-street markets.

77. Can you state what they were handed over to the Corporation for—for what purpose? For the purpose of markets only.

78. The George-street markets? Yes, for public markets.

79. Not specially as a market for the sale of produce? I do not think that distinction was made at the time.

80. Have you any document to show the tenor of the grant? I have the grant itself for general market purposes,—that is the wording of the grant.

81. Is the using of this place for boot and shoe shops fairly within the terms of the grant, in your opinion? I do not think it is.

82. A large number of persons occupy the markets, both male and female? Yes.

83. What necessary conveniences for the calls of nature—waterclosets—have these people? Waterclosets are erected in the centre of the markets.

84. There is no other accommodation for females than the central closet? None other. There are separate divisions for males and for females.

85. Does it ever occur to you that they make away with the excrementitious matter in any other way? I have not given the matter any consideration. It is the duty of the Clerk of the Markets to attend to these matters.

86. Are these closets connected with the sewers? Yes.

87. There is one common place for females, and one common place for males? Yes.

88. And they are open to the public? Yes.

89. Since the alteration of the markets, have not the producers of fresh vegetables and fruit been practically excluded from the building—have they not until recently? That has arisen from the overcrowded state of the building.

90. Are not the whole of the stalls occupied by persons who are stationary there—boot and shoe shops on one front, and butchers' shops on another? There is only one butcher's shop in the markets now.

91. They are all occupied by persons in trade? No; the York-street markets are now occupied by producers and growers.

92. How long has that been the case? Two years. The north-eastern markets in George-street are occupied

C. H.  
Woolcott,  
Esq.

30 Sept., 1873.

C. H.  
Woolcott,  
Esq.

occupied as shops; the York-street shops, which were at one time occupied by butchers, are now occupied by growers and producers; and the other portions are occupied by growers of fruit and vegetables, and dealers in fancy goods, and live animals and birds—but principally by retail fruit and vegetable stalls.

93. Have you any idea what may be the income from growers paying market dues? No, I cannot separate them. The Treasurer keeps the accounts.

94. *Chairman.*] Are you aware that when the markets were first dedicated to the public by Sir Richard Bourke, one of the four sheds was to be used for merchandise? I am not aware of it. I knew nothing of the markets before they came into the possession of the Corporation.

95. *Mr. Tunks.*] Is it within your knowledge that the growers have frequently to occupy the street with their produce—rain or shine? Yes, they do at the present time.

96. And it is proposed to shift them somewhere else? It is under consideration to shift them to the Belmore Markets.

97. What do the Corporation propose to do with the present markets? To have them occupied by the retail trade.

98. What rent do these people pay for these sheds? The stalls are of different values.

99. *Mr. Lucas.*] How are they let? By the Clerk of the Markets, under the by-laws.

100. By auction or by tender? By the week.

101. Suppose one person were in occupation of a stall and another person offered a higher rent, would he get it? I have never known such a case.

102. *Mr. Tunks.*] Are these people ratepayers? They do not pay rates for the shops they occupy in the markets.

103. *Mr. Lucas.*] How are they dispossessed? By giving a week's notice.

104. Supposing it is found that these stalls are under-let, can other persons by offering a higher rental get possession? Such a case has never occurred. I have heard of one person buying-out another at a large premium, but that is not done with the consent of the Council.

105. All the present stall-holders have a vested right? No, the Council have power to dispossess them. They have done it frequently.

106. But as long as a man pays his rent they never interfere with him? No. Most of the present stall-holders have been there since the formation of the interior portion of the market.

107. Can you say what is the yearly rent received from these stalls? The shops in George-street are let at £7 7s. per month; the shops in York-street at from 10s. to 15s. per week; the stalls in the open market are rented at £1 per week, and the stalls in the sheds at 6s. per week.

108. *Mr. Tunks.*] How long is it since there has been any alteration in the rents? Very recently there has been a reduction in the rent of the shops in George-street.

109. *Mr. Lucas.*] How did that arise? On the application of the tenants.

110. Are all the stalls let? No.

111. Can any person obtain a stall by applying for it? Yes, any unoccupied stall, by applying to the Clerk of the Markets.

112. *Mr. Tunks.*] Are there any now vacant? There are.

113. Then we can infer from that that they are let at their full value? Yes.

114. *Chairman.*] Do you know Mrs. Buckingham, the fruit-seller in the market? Yes.

115. Do you know how many years she has been there? I think she was one of the original tenants. When the northern portions of the markets were first built, each stall was let by auction, and I think Mrs. Buckingham became a tenant at that time.

116. She has recently given up a stall in the market? She has given up her stall.

117. Are you aware whether a premium was given for her stall or not? I have heard of such transactions, but they do not come within the knowledge of the Council officially.

118. It is possible that a valuable good-will may have pertained to her stall? Yes.

119. How does the good-will arise? When we have heard of such cases it has been stated on inquiry that the premium has been paid for fittings and fixtures of the stall, and not in any way for the good-will of the business.

120. Have you ever known the whole of the stalls in the market to be occupied at one time? Yes, often; in fact it has only been within the last two years that there have been any vacant stalls at all, or at any rate since the opening of the Belmore Market.

121. Has the City Corporation increased the market accommodation latterly? Yes, very largely, by the addition of the Belmore Market.

122. So that the grower has now greater accommodation than he had previously? Yes.

123. *Mr. Tunks.*] In what way would the accommodation increase unless some of the people have been removed to the other market? The general market is in fact removed to the Belmore Market—the grower's market, to a very large extent, as well as the Saturday night market.

124. Is it within your knowledge that it is peculiarly expensive to make roads in Sydney—macadamising in particular I mean—as compared with other places? Yes.

125. From the difficulty of obtaining suitable material? Yes; the cost of metal is a very serious item; the whole of the metal has to be brought a long distance, and is very expensively got.

126. That on the face of it would imply a large cost, as compared with places where they get the material at hand? Yes.

127. Then the irregularities of the streets, from the hilly nature of the ground, necessarily bring about a large amount of grinding with vehicles and horses? Yes, unquestionably.

128. The heavy rains we are subject to in this climate necessarily wash away a large quantity of debris from the streets? Yes, very heavy rains are very injurious to the streets.

129. A number of silt-catchers have been constructed in the streets to save the harbour from filling up? Yes, some hundreds.

130. Could you furnish the Committee with an idea of the size of some that have been recently constructed? The only large one that has been recently constructed is at the Market Wharf. It is constructed in two compartments of 25 feet by 10 feet each, and is capable of retaining 83 cubic yards of solid matter.

131. Have you any idea of the area that is supposed to drain into it? About 12 acres.

132. Have you any idea how often it will want clearing out? It has been so recently constructed that I have had no opportunity of judging.

133. The probability is that it will not need clearing out very often? Not very often.
134. In the event of a heavy shower of rain coming down would it not wash a large quantity of faecal matter—dead dogs, cats, and so on—into this place? They would scarcely get past the gulleys, I think.
135. The water would get in after having washed the streets? Yes.
136. If that water is allowed to remain for sometime would it not be likely to smell, and be a nuisance to the neighbourhood? It is trapped, and there can be no smell from it.
137. Trapped at the inlet and outlet? At the inlet only; the outlet discharges into the sea.
138. Is there no opportunity for gases to escape from it to poison the air in the neighbourhood? Not any, I should think.
139. Is the sand that comes out of these silt-catches useful for anything—for buildings, for instance? When the Eastern Market at Woolloomooloo was being constructed, sand was used for it from a gully that was close at hand, and the deposit-mouth of the Hay-street sewer is now used by Messrs. Wadsworth in polishing sandstone flagging.
140. You have spoken of the reserves being in the hands of the Government—the Government Domain, for instance;—is not that rather an advantage to the Corporation to have them improved at the cost of the general public? I think it would have been better for the Corporation if the Government had kept all the reserves; they are a large expense to the City. Besides the original expenditure in their formation, there is a large annual expenditure in their maintenance—£1,500 or £2,000 a year—and they do not yield any revenue.
141. Do you think that a fair charge to come on the general public? Yes, I think so. I think all public reserves should be a charge upon the Government.
142. *Chairman.*] Are you aware whether the Corporation has been put to expense for removing encroachments on the streets? Yes.
143. Can you tell the Committee to what amount? I should think that, up to the present time, the Corporation have expended between £3,000 and £4,000 in the actual removal of encroachments, and they are now in treaty for the removal of other encroachments, which will involve an expenditure of about £1,200 more.
144. *Mr. Tunks.*] What do you mean by encroachments? Houses and fences standing on the footways and roadways.
145. Is it not a fact that the Corporation have taken many acres of land from people without giving them anything, with the object of widening the streets? I think parties have not been compensated in cases where they have failed to make claims for compensation at the time of the proclamation of the streets.
146. Was not an Act passed some years ago to enable the Government, or whoever should be their successors, to widen the streets at the cost of the owners of property? There is no such Act that I am aware of.
147. What Act do you proceed under? The Alignment Act.
148. Is it within your knowledge that many of the owners of property in Sydney are owners of land under the street now. I mean that the Corporation have only got the power of going over the surface—the land underneath does not belong to them? Yes, it does.
149. *Chairman.*] From £3,000 to £4,000 has been actually paid to owners of property for the removal of encroachments;—does that include the building of retaining walls and matters of that kind? Yes, and setting walls and fences back, and removing or rebuilding houses.
150. *Mr. Lucas.*] You have a water fund? Yes.
151. That returns a revenue of £36,000 a year? Yes, it is a gradually increasing revenue.
152. What is the amount of debentures the Government has issued on that fund for which the public revenue is responsible? £213,000.
153. What debentures have the Corporation issued since? £68,000.\*
154. Then the water debt amounts to £281,000? It is more than that. The Bank overdraft is about £17,000. It happens that at the present time there is an overdraft, but as a general rule there is a credit in the Bank to the account of the water fund.
155. The indebtedness of the water fund then at the present time amounts to £298,000? Yes.
156. What is the interest upon that? I do not know what interest the Government pays, but the Corporation pays 6 per cent. on the debentures and on the Bank overdraft.
157. The interest upon the Government debt is £10,650? Yes, at 5 per cent., and on the Corporation debt, £5,100.
158. How much is that together? £15,750.
159. What is the annual cost of working the water supply, including the works at Botany and in the City; I am not speaking of the cost of laying down pipes or anything charged to capital; I want the working expenses only; the net revenue and the net expenditure—will you give us these for last year? The annual cost at the present time of pumping, including wages, coals, general stores, and repairs and supervision, at Botany dams, is about £8,200; the expenses connected with the City distribution of water is about £1,400, and the salaries and office expenses about £3,600, making together £13,200.
160. In keeping your accounts for the City waterworks, do you write off so much per annum for depreciation and wear of water pipes? No.
161. How do you keep the accounts? Merely the actual receipts and expenditure.
162. How do you pay for your water pipes? Out of the water rates, and out of money raised by debentures.
163. Then as they wear out you replace them with borrowed money? Yes, and from the rates. What I mean to say is that we keep no particular charge against moneys borrowed, nor any particular charge against moneys raised by taxation.
164. You put down pipes with borrowed money, and as they wear out you replace them with borrowed money? No, we do not borrow money specially for the purpose. All the money received on account of the water fund goes into one account, and we go on borrowing as the money is required.
165. Then there is no capital account as distinct from the working account? No.

C. H.  
Woolcott,  
Esq.  
30 Sept., 1873.

FRIDAY,

\* NOTE (on revision):—These figures are corrected up to the present time.

FRIDAY, 3 OCTOBER, 1873.

Members Present:—

MR. BURNS,  
MR. LUCAS,MR. T. ROBERTSON,  
MR. TUNKS,

MR. WEBB.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Charles H. Woolcott, Esq., called in and further examined:—

C. H.  
Woolcott,  
Esq.  
3 Oct., 1873.

166. *Chairman.*] The Corporation as a body had had the financial position of the City brought under its consideration? It has.

167. Did the Council adopt any report upon the subject? It did.

168. I believe that report was first considered in committee, and then brought up and adopted by the whole Council? It was a special report from the finance committee—was brought up by that committee in the usual way, and was then formally adopted by the Council.

169. Have you a copy of that report? I have, and I now hand it in. (*See Appendix A I.*)

170. This report deals with the whole financial position of the Corporation, and embraces the City fund, the water fund, the sewerage fund, the Sydney Common fund, and also the Prince Alfred Park fund? Yes; it embraces everything with which the Council has to deal.

171. It also takes in a portion of the receipts and expenditure of the City Commissioners for the first quarter of 1857, and of the Municipal Council of Sydney from that date to the 31st December, 1872? It does.

172. It also shows the revenue received from the various funds of the City? It does, and the expenditure also.

173. And the indebtedness of the Corporation under each of these funds? It does.

174. And, after a very careful investigation, and a great deal of close consideration, that report was adopted by the Council, and by that body was laid before the Government? Yes. The report was adopted by the Council, and then by a deputation, specially appointed by the Council to fully explain the matter, was laid before the Colonial Secretary, at an interview granted by him.

175. Before proceeding further with this report, I would say that there is one matter in your last evidence that was not clearly understood. It was with reference to the water-closets in the George-street Markets. I almost understood you to say that the male and female closets were in the one compartment:—is that so? No. What I said was that they were contiguous, but certainly not in the one compartment.

176. Are the entrances to the male and female closets also contiguous? No. I certainly never could have said that, for they are in different parts of the market.

177. Are not these entrances separated by the main wall of the building? One entrance is from the open space in the centre of the market, and the other is from the interior of one of the sheds.

178. So that the one sex cannot from the entrance of their closet see the other sex enter the closet set apart for them? No, certainly not.

179. *Mr. Tunks.*] Is there any place but the one to which renters of stalls in the market can resort? No, not that I am aware of.

180. So that stallholders at the extreme northern and southern ends of the market must go down to this place, which you say is arranged, one side for the males and the other side for the females? That is so.

181. *Chairman.*] Now, coming back to this report, I would ask you, as regards the payment of interest on the Government debt, what would be the result to the Corporation if the Council had been compelled to pay out of the funds of the City the interest upon the debentures issued by the Government? The result would have been that it would have absorbed not only all the revenues from the water and sewers, but all its borrowing powers also; and by this time there would have been a virtual stoppage of all works.

182. So that the Council certainly would not have been able to carry on the works necessary for an increased supply of water? Certainly not. There would have been no funds for any works connected with the water and sewers.

183. Are you aware what quantity of water is now supplied to, and what quantity was supplied ten years ago; I ask you this in order to show what increase of supply there has been within the last ten years? The supply has been increased more than 100 per cent., for in 1862 the quantity supplied was 618,344,882 gallons, whilst in 1872 it was 1,490,841,390 gallons.

184. Has the Council, since the Municipality has been incorporated, levied upon all those persons whom the law declared to be liable for the rate, the whole amount of water rate demandable from them? Yes, to the fullest extent.

185. And the whole of the money so derived has been applied to meet the expenses of the water works, to increasing the supply of water, and to constructing works for such increased supply? Yes; the whole of it.

186. Except the amount that is yearly carried over to the City fund? That is not supposed to come out of the water rates, but out of borrowed money.

187. *Mr. Lucas.*] That is the £5,000 annually taken over to the City fund? Yes.

188. That is supposed to come out of borrowed money? Yes.

189. Then it is borrowed for one purpose and applied to another, being borrowed for water supply and applied to the general improvements of the City? Yes, that is so.

190. *Chairman.*] But the Government have yearly stopped the £10,000 voted by Parliament annually as an endowment for the City, in order to pay interest due on water and sewerage debentures? They have.

191. So that on account of this interest the Government yearly charge the Council with £10,000 which ought to go to the endowment of the City? That is so.

192. *Mr. Lucas.*] How much is now owing on the water supply fund? In round numbers, the total debt is £294,000.

193. Out of which the Government is responsible for how much? For £213,000.

194. That would leave the actual indebtedness of the City Council, in so far as the water supply fund was concerned, at £81,000? Yes.

195. What is the total annual revenue derived from the water? For the past year the revenue was £36,000.

196. That would include rates and special contracts for supply? Yes, the whole of the water revenue, from house property, at 5s. per room, and for special contracts in the case of manufacturers and others.

197.

C. H.  
Woolcott,  
Esq.  
3 Oct., 1873.

197. Have you any idea of what revenue would be received if the whole of the Government establishments had to pay water rates in the same way as do private individuals? It would give us an increase on our rates of £2,600 per annum. That is according to our present estimate.
198. What is the cost per annum of working the water supply, irrespective of laying down new mains? The yearly cost is £13,000, in round numbers. That will include the expenses of pumping, coals, stores, supervision, and distribution throughout the City, exclusive of the cost of providing and laying new mains.
199. *Mr. Webb.*] That is without the interest on the debts? Yes, merely what comes properly under the head of working expenses.
200. *Mr. Lucas.*] Deducting this £13,000 from the £36,000 of revenue there would be left a balance profits on the working of the water supply of £23,000? Exactly.
201. Then the interest you would have to pay on the debt for water supply, exclusive of that for which the Government is responsible, would be how much? At 6 per cent., the interest on our own debts of £81,000 would be about £4,800 a year.
202. That would leave you again £18,200 a year clear profit? It would.
203. How is this £18,200 a year applied? Which £18,200?
204. The yearly profit on the water works? It goes towards the laying of new mains and the extension of old works. It is used as far as it goes, and then when it is absorbed any further amount that may be required is raised by debentures.
205. It is not out of this profit that you yearly transfer the £5,000 to the City fund? No; that is done by a special vote of the Council, authorizing the issue of debentures to that amount.
206. Chargeable on that fund for the water supply? Yes.
207. Then every year you burden the debt for water supply with £5,000, borrowing it on account of that fund, and then transferring it to the City fund, to make good the £5,000 out of the endowment voted by Parliament and stopped by the Government to pay the interest on that part of the debt for which they are responsible? Yes, that is precisely the position of the case.
208. So that though the Government stop this annual endowment the City Council still goes on borrowing to that extent? Yes. The City fund does not use the money, for the Council goes on borrowing yearly to that extent on the water and sewerage funds.
209. Virtually you load the water supply debt with £5,000 a year, to make good the endowment stopped by the Government? Yes.
210. How long is it since you borrowed on this fund? We borrow on it every year.
211. Notwithstanding that you have a profit of £18,000 a year on the supply of water you still go on borrowing or issuing debentures on the water supply fund? Yes; in order to meet the expenditure under that head, which last year amounted to £36,000.
212. Of what did that expenditure consist? Of working expenses and the other expenses which I have already given you, of the extension of water supply, of the laying new mains, of the construction of dams, and of various other works on the water reserve.
213. Does that £36,000 include all the working expenses and the £4,800 of interest? It does. It includes everything—the £5,000 interest on Government loan as well.
214. How much money was there borrowed last year? We did not borrow anything last year, but on the contrary we paid some of the debentures off—£7,600. We did not borrow anything for maintaining and extending the work but the usual yearly sum of £5,000 for interest; we obtained a loan from the Bank during the past half-year.
215. I suppose you mean a cash credit? Exactly.
216. Of what amount? It was £7,650.
217. Was that all? Yes. That was all we borrowed from the Bank last half-year.
218. You did not last year borrow any moneys on the water fund? No, except as I have told you, that debentures were issued to meet this sum of £5,000 for interest.
219. Then no matter how the water supply fund stands, this sum of £5,000 is always raised by loan, and charged against it? Always.
220. Will you give us the yearly cost of the new works and constructions under the head of water supply. I do not mean the substitution of new for old pipes, for I presume that would come under the head of working expenses; but the laying down of new pipes, the additional works constructed at Botany, the construction of dams, or any other items that can be considered as separate from ordinary working expenses. We want such a return as will show us the charges which should rightly go against capital, and those which should be chargeable to working expenses? In the year 1872 the sum of £3,610 was spent in constructing dams Nos. 1 and 2, and laying new mains in the city and suburbs. The cost of laying new mains during the present year has been £5,657. These works I suppose you would charge against "capital." The "working expenses" are about £13,000 per annum.
221. The Council are now, I believe, carrying on some works at Botany? They are.
222. Will you give us the cost of constructing these dams? Dams Nos. 1 and 2, between the Botany and Randwick roads, were made in 1872 at a cost of £2,357. Other smaller dams and reservoirs have been made above the tunnel at Lachlan at a cost of £4,104; and the embankment at the Randwick road cost £3,500. The enlargement of the engine pond and dam at Botany is now progressing. The sum of £6,310 has been expended upon it, and it is about three-fourths completed.
223. And also the cost of sinking the cylinders? There has been only one cylinder well sunk at Lachlan, at a cost of £866.
224. You say that the supply of water has been increased very materially within the last five years? Yes, it has been increased 100 per cent. within the last ten years.
225. Will you also furnish us with a return of the number of gallons supplied during each year for the last ten years? We have no means of ascertaining the quantity delivered through the Lachlan Swamp tunnel, but the quantity pumped up from Botany has been as follows:—

1863.....	614,510,568 gallons.	1868.....	1,222,540,272 gallons.
1864.....	657,267,552 "	1869.....	1,394,563,536 "
1865.....	875,060,504 "	1870.....	1,600,377,696 "
1866.....	958,649,221 "	1871.....	1,321,209,268 "
1867.....	955,436,976 "	1872.....	1,490,841,390 "

C. H.  
Woolcott,  
Esq.

3 Oct., 1873.

226. You say that in keeping your accounts you do not keep the loan fund distinct from the fund derivable from revenue proper? Of course we keep the different items distinct, but all moneys go into the fund to which they belong.

227. I can understand that if you refer to your books you can say how much has been borrowed and how much has been received for rates, rents, &c.; but what I mean is, that when you borrow money for any particular purpose you do not keep a distinct account of how that money has been expended? No. The money received for water purposes, for instance, goes into one common fund, and the expenditure is drawn out of one common fund.

228. But do you not think that working expenses ought to be kept distinct from the expenditure upon such works as those, for instance, the Council is now doing at Botany? They are kept distinct to this extent, that we can ascertain from our accounts what the working expenses are, and what is the cost of laying new mains or any other special work; but then they are not carried out from a separate fund.

229. All your receipts, from whatever source, are all placed in one general fund? There are separate Bank accounts for the City, water, sewerage, Sydney Common, and Prince Alfred Park funds; and these are drawn against the general requirements of the City, whether they be for water supply, or any other purpose. Perhaps if you would refer to our printed annual statements of account they would satisfy you, as they would show you clearly how our accounts are kept.

230. I wish it, however, to come out in evidence, so that in reading your answers there would be no necessity to refer to any other document? I may say then that the different funds are kept distinct.

231. If money is borrowed for a specific purpose, does that money go into a general fund? We do not borrow money for a specific purpose, but for the purpose of meeting the ordinary expenses of the works of the Corporation—with the exception, however, of the £10,000, yearly borrowed for the water and sewerage funds. The mode of procedure is this: When a work is ordered by the Council, entailing a cost of (say) £7,000 or £10,000, we do not issue debentures for that work, but in the first instance we go to the particular fund for the expenses. When that fund ceases to supply the money, we issue debentures to furnish whatever deficiency there may be. These debentures are not drawn for the specific work, but for the general requirements of the fund; in fact, they are drawn on the general account. We are not like the central Government, which obtains a vote from the Legislature for a certain specified purpose, and which borrows money specially for that purpose and no other, and consequently has to keep a separate account of such expenditure. We borrow in aid of any one fund, and from that one fund everything connected with it is paid, so that there is no occasion for keeping separate accounts for the expenditure of the borrowed money.

232. I suppose you are paid for the water which you supply to the shipping in the ports? For that supplied to the mercantile vessels we are paid, but not for that supplied to Government vessels, or any vessels of war.

233. Do you think it would be desirable to raise the price of water to consumers? I think some better mode of assessment might be adopted.

234. Do you think that instead of the present system of charging by the room, it would be better to rate the property for water, the same as is now done for the City rate? That has always been my view.

235. Do you happen to know that that system is acted upon in England? I do, and in Melbourne also.

236. Are you aware that the statistics collected in England go to show that this is the most equitable mode of rating, since the house then pays in proportion to its requirements as according to the class of house, so is there a greater or less consumption of water? Yes; as a general rule, that would be a more equitable system than the present.

237. And a system by which the rates could be more easily levied? Yes.

238. And more cheaply levied? Yes; it would save the expense of a second assessment, which we now have to make, and the maintenance of almost a second lot of officers.

239. It would be more equitable and more convenient? It would be more convenient by far, without a doubt.

240. And, with regard to mercantile premises, they use large quantities of water? Some do, and some do not.

241. But taking into consideration the quantity of water used on such premises, as a general rule do you not think that, as far as they are concerned, a payment by assessment would be more equitable than a payment by rooms? What premises are you alluding to?

242. I am alluding to the case of large stores of two or three floors, each of which is only chargeable as one room? Yes, certainly; because in these cases large stores of three floors are only charged as for three rooms, and that is manifestly unfair.

243. *Chairman.*] Are you aware that there are large house properties in George-street which contain only two or three rooms, which yet pay rentals varying from £600 to £1,000 a year? I am.

244. And do you not know that there is no water used on these establishments, except that which is required for washing or sanatory purposes? Some of them are in this position. There are exceptional cases.

245. And in such cases as these would you recommend a charge to be made in accordance with the assessment? I think these cases might be met specially, the same as we now do under the present system of rating. Of course there would be a difficulty in dealing with such cases as these, but it might be done on a review of the case. I can see that that is where the difficulty would be in working the matter out.

246. Seeing this, do you not think that the most equitable way would be to sell the water by metre? The collection of the rate would be more expensive to begin with.

247. But as regards the equity of plan? Possibly, as a general rule, it might be an equitable system; but I am sure it would be very expensive in the collection, and I do not think it would be so satisfactory to the consumer.

248. *Mr. Lucas.*] Is it not the fact that in the case of persons using only a small quantity of water, the metre is useless—it does not register? I believe that was Mr. Edward Bell's idea.

249. That where a person passes only a thin thread of water through the pipe, the metre will not register at all? So I have heard.

250. *Chairman.*] But no case of that description has come within the knowledge of the Council? Never.

251. And charges or complaints of the meters registering falsely has always been immediately referred to the City Engineer and inquired into? Yes, the meters are tested whenever persons have the idea that they are charged for more water than they fancy they consume.

253. Are you aware of any unnecessary work that the Council have undertaken? Nearly the whole of the water works have been carried out on the recommendation of the City Engineer.

254. And after due and careful consideration by the Council? Yes. When a work is recommended by the Engineer, it is considered by the Council, and if adopted is carried out.

255. *Mr. Webb.*] With reference to these large stores which have been spoken of, such as many of those situated in George-street and Pitt-street, which have only two or three floors each charged as a room, and which pay rentals of from £600 or £1,000 a year, it has been suggested that these premises would not consume much water, and that therefore it would be unjust to charge them with a water rate in proportion to the rent they pay, which would be done if the rate for water were paid on the assessment in the same way as the City rate. Let me ask you if it is not the fact that most of these large stores contain a very considerable amount of valuable property? It is.

256. And is it not the fact also that the proprietors of these stores, from having the water laid on to their premises, would receive, in the event of a fire breaking out, very great benefits from the chance of saving a large amount of property? Yes, that is the case.

257. And are they not more benefited by the security thus given to their property than are the labouring classes, who only occupy small tenements? Yes, I should conceive so.

258. Is not that an advantage sufficient to counter-balance the argument used as to the small amount of water actually consumed in such stores? That is an indirect benefit that you will hardly get rate-payers to take into consideration.

259. But as a matter of equity do you not think that the water being laid on to the premises acts to some extent as an insurance upon the stock in those premises? That may act in two ways, for the use of the water in extinguishing the fire might injure their stock to a larger extent than the fire itself.

260. That would only be to a certain extent? Yes. It might only be partial.

261. Then, taking all things into consideration, are you of opinion that levying a rate for water in the same way as you do the City rate, on assessment of the property, would be an equitable plan? Yes, as a general rule it would be more equitable in every way than the present system.

262. I believe that you now have to turn off a large quantity of water for waste—as for the cleansing of the sewers, for instance? No. We run off no water for the cleansing of the sewers.

263. Do you not do this in dry or hot weather? No; there is no water run off for that special purpose.

264. But you turn off the water into sewers occasionally, and they are thereby cleansed? No; we depend upon the waste water from the houses to cleanse the sewers. The water is never turned off specially for that.

265. Reverting to the stores, do you not know as a matter of fact that a large store, say in the centre of the City, with no one residing on the premises, and unoccupied at night, yet has a great number of people employed in it during the day; and that though it contains only four or five rooms, yet a great deal more water is used there than is used on premises also with five rooms occupied by a small family? There are scores of such cases.

266. In which a much larger quantity of water is consumed than in a house of the same number of rooms occupied by a private family? There is no comparison between the two.

267. And yet the large store now only pays the same amount of water-rate as the small house? Yes. In some large stores there are only three floors, and each of these is counted as a room. Some of the largest stores only contain three or four rooms, and these, at 5s. per room, would pay 15s. or 20s. a year.

268. Then if a store only contained five rooms, even though it employed 300 hands, would only pay 25s. per year, whilst a cottage containing five rooms would pay the same, although the rental of the store was £800 a year, and that of the cottage only £45 a year? Yes, exactly.

269. *Chairman.*] You have stated that a store, in which 300 hands are employed, and having only three rooms, would pay only 15s. a year;—are you not aware that there is a special rate provided for in those cases? Yes; in the case of manufactories; but I understood the question to refer to stores, and not to manufactories.

270. But a store was spoken of in which 300 hands were employed? My answer had no reference to manufactories, because in the case of factories and engines a special contract is made.

271. All factories, wine and spirit merchants, and such like cases, are supplied under a special contract? Yes, or by meter.

272. Taking some of the older buildings in Pitt-street, now occupied as stores, but which, having formerly been dwelling-houses contain many rooms, and which pay a heavy rental—I suppose you know there are such cases? Yes, a great many.

273. Can you name any of them? I cannot call them to mind just now, but I have heard such cases spoken of. They are houses that have been constructed some years back; now they generally build the stores in floors, each floor being one room.

274. The Corporation do not charge any water rates to schools and churches? No; nor to any public institution of that character.

275. *Mr. Webb.*] What kind of schools do you refer to? To Public Schools and to Denominational Schools.

276. You do not refer to private schools? No; we charge them.

277. Do you charge ministers of religion? Yes; we levy the rate on all parsonages.

278. When you speak of manufactories, do you consider Farmer & Co.'s establishment to be a factory? No, certainly not.

279. Are you aware that they have some 300 hands employed there during the day? They are charged so much per room.

280. Do you charge M'Arthur & Co.'s establishment as a factory? No.

281. And there are between 100 and 200 hands employed there? Yes, I believe there are.

282. Are you aware of how many rooms M'Arthur & Co. are charged for? No, I am not.

283. *Chairman.*] Are you not aware that M'Arthur & Co. are supplied under a special contract from their having a steam-engine? I am not aware that they have a steam-engine. If so, that is supplied under a special contract; but it is not so with the premises.

284. *Mr. Webb.*] And where these premises are fitted up with water-closets a large quantity of water is necessarily consumed? Yes, a very large quantity.

285. *Chairman.*] In larger proportions than in other premises? Yes, certainly. If there is a larger number of occupants it must be so necessarily.

C. H.  
Woolcott,  
Esq.  
3 Oct., 1873.

C. H.  
Woolcott,  
Esq.  
3 Oct., 1873.

286. With regard to the sewerage fund, I see that this document shows an amount of indebtedness on that fund of £374,699? Yes.

287. And the annual revenue under this head is only £5,000? Not so much as that. That is only the estimated annual revenue; the receipts are much below that.

288. What is the actual revenue from the sewerage rate? During 1872 the amount actually received was £1,358.

289. Can you give us the amount of rates actually collected during the last four years? The amount collected in 1869 was £4,397; in 1870 it was £4,219; in 1871 it was £2,568; and in 1872 it was £1,358.

290. Will you explain to the Committee how it was that the revenue fell off so much in 1872 from what it was in former years? In the early part of that year instructions were given to recover the rates by process of law. An action was brought in the District Court, and was defended. This the Corporation lost, the decision of the Judge being against them on several points of law.

291. I see by this document that the debt to the Government on account of this fund, exclusive of interest, is £200,000? Yes.

292. After the decision of the Judge of the District Court were any steps taken to test that opinion—was there any appeal to the Supreme Court? No, no appeal could be made.

293. Was counsel's opinion taken on the subject? It was.

294. And was that opinion favourable or otherwise? The opinion was partly favourable and partly adverse, and on that opinion the Council prepared a new Sewerage Bill to place them in a right position, by giving them power to recover the rates. This was brought before Parliament and was passed by them in an amended form.

295. You say in an amended form;—did that amended form enable the Corporation to obtain a larger revenue from the sewerage rate? On the contrary, it very much diminished it.

296. Will you explain how it operated in this way? By the law under which the Council were acting they had power to raise rates from premises which could be connected with any sewer constructed by the Corporation; but the amended law gave them power to levy rates only upon those premises which were actually connected with a sewer. So that the utmost amount which the Council could collect would be about £5,000 a year.

297. Going back to the collection of the sewerage rate;—after that decision of the District Court I suppose the citizens refused to pay the rate levied in the usual way? They did.

298. And their refusal was owing to that decision? There had been considerable demur about paying previous to the decision, and that decision had the effect of entirely stopping all further payment of rates; and I do not think that a single shilling of rates has been received since then.

299. How long has that been the case? The decision of the District Court was given in April, 1872.

300. Will you explain the points of law which you say were taken on the trial? There were different points taken. One of these was, that the Act provided that a sewerage rate could be levied only from the date of the completion of sewerage work. This was found to render the Act utterly impracticable, if the Council were unable to levy rates for any day prior to the completion of the sewerage works. Another point was, that the Council could not levy a less rate than that mentioned in the Act, whereas one-half only had been levied.

301. When the present City Council was established, the Government handed over to it a debt of £200,000, contracted by the City Commissioners who had preceded them, for sewerage works? The amount of indebtedness handed over to the Council by the Commissioners was £164,400.

302. And what was the revenue at that time? The City Commissioners never collected any sewerage rates.

303. What was the amount of the first year's revenue received from sewerage rates? The first rate was levied in 1859, and realized £1,246.

304. And what was the debt at that time? The whole of the moneys authorized to be raised by the Government—£200,000—had then been expended, with a further loan from the Bank of £4,566.

305. Then, as regarded 1860, what was collected? No sewerage rates were collected in that year, nor was any money expended on the works.

306. Was there any doubt as to the legality of the collection at that time? I think not.

307. Has application been made to the Government and to Parliament to give the Corporation an amended Sewerage Act, so that they might be able to collect the rates? Yes. A Bill for the purpose has been introduced upon several occasions.

308. From 1859 up to the present time? Yes.

309. Can you state how many applications have been made to Parliament? No, I cannot, but I know there have been several. I am sure there have been three at least.

310. Two Bills have also been introduced to amend the Corporation Act, and dealing with this subject amongst others? Yes, on two occasions a Bill for the purpose has been introduced, and, independent of these, separate Bills dealing with the sewerage question have been introduced.

311. So that, in point of fact, the Corporation had to bear the responsibility of a debt of £200,000, without any means of collecting a revenue from the work on which that sum had been expended? Without any means of enforcing the collection. The rates in most cases from the first have been voluntarily paid, as the Council have never been in a position to recover them, except by expensive legal process.

312. I see that beyond the first £200,000 there has been a further debt of £176,000 contracted for these sewerage works;—will you explain how that debt has been incurred? It has arisen from the extension of the sewerage system.

313. Was it absolutely necessary that a further expenditure should be incurred, in order to complete the balance of the work commenced by the City Commissioners? It was; but the completion of that work did not absorb all the present debt; other sewers besides those commenced by the Commissioners have been constructed.

314. For the preservation of the public health it was found necessary that sewers should be constructed in other parts of the City besides those reached by the works of the Commissioners? Wherever they have been constructed it has almost invariably been at the particular request of the inhabitants of that portion of the City.

315. And in localities where they were necessary for the preservation of the public health? Where they have been judged to be so by the inhabitants, and by the Council of course.

C. H.  
Woolcott,  
Esq.  
8 Oct., 1873.

316. *Mr. Webb.*] Have the Corporation tested this question of the collection of the sewerage rates upon more than one occasion? They have.
317. How many times? On three different occasions.
318. In what year? I cannot recollect just at present.
319. Were they successful? In one case they were, but afterwards they were advised that it would be inexpedient to follow it up, and the matter was dropped.
320. What rates did you levy? A certain per centage on buildings of a certain value. The rate authorized by law varies, according to the value of the property, from 3 to 7½ per cent.
321. If you could collect the rates according to the schedule you now have, would you be able to collect sufficient to pay the interest on the sewerage debts? Do you mean the schedule under the amended Act?
322. No; the schedule to the Act you now have? No, the utmost we could collect would be about £5,000 a year.
323. That is supposing you collected everything? Yes.
324. Would that amount of revenue be sufficient to keep the sewers in order? Yes, the working expenses of the sewers are comparatively small.
325. But not to pay the interest on the debt? No.
326. Do you think if there were a special sewerage rate levied upon all City property, in the same way as the City rate, say of sixpence or a shilling in the pound, that that would raise sufficient to pay the interest on the debt, and to extend the sewerage system? That would depend entirely upon what you levied the rate upon. If you levied it upon all property, the same as the City rate, and to the same amount of one shilling in the pound, that would raise £36,000; that would be amply sufficient for all purposes.
327. Then at sixpence in the pound the rate would raise £18,000 a year? Yes.
328. Can all the properties in the City connect with the sewers? No, not all. Not more than a third of the City I should say could connect with the sewers.
329. Do you think it would be just to compel those to pay a sewerage rate who cannot connect with a sewer? There ought to be some limit as to the distance premises should be from a sewer before they became liable to pay the rate. I would also give an appeal to Quarter Sessions against the rate; then if the person was found liable the Council should have power to make him pay.
330. Then a general rate of sixpence in the pound would not bring £18,000, since only a third of the City could connect with the sewers;—we should have to reckon a third only of that amount? I am not prepared to say what the revenue would be, because they are the most valuable properties in the City which are in a position to connect with the sewers. One-half in value of the whole City property may be in a position to connect, although only one-third in extent.
331. Would it, in your opinion, be a good thing to have one general sewerage rate, the same as the City rate? I think it would be the most equitable system, if the sewerage was general. I know this, that where sewers do not exist the cost of removing the night-soil is more than anything that would be levied under a sewerage rate.
332. *Chairman.*] Can you state to the Committee what office expenses are attached to the sewerage fund? The only charge on it is for cleansing, and office expenses generally. The charges are about £1,500 or £1,600 a year, and that includes a large amount paid annually for cleansing the sewers—in fact, the principal portion of it.
333. *Mr. Webb.*] Are the Council now laying down new sewers? Yes, they are constantly doing so.
334. How do they obtain money for the purpose? By the issue of debentures.
335. Then they are still going into debt? Yes; there are no other means for doing the work.
336. *Chairman.*] Are there any observations you would desire to make on the subject of the sewerage fund? No, there is nothing that occurs to me just at this moment.
337. What amount would the Government be liable for if the Council had power to collect from them the amount of sewerage rate payable on public buildings generally? About £1,100 a-year.
338. Is not a large portion of the money due to the Government expended in the construction of sewers in the northern part of the City? Yes; the greater portion of it.
339. Where the property is chiefly owned or rented by the Government, and where it is but thinly populated? Yes. Much property there is owned by the Government; and the work has been very expensive—much more so than in other parts of the City.
340. The sewers there range from 20 feet to a greater depth? Yes, they are deep, and through very expensive ground.
341. If a rate of 1s. in the pound were levied generally over the City, amounting to £36,000, that would be no more than sufficient to meet the interest on the money borrowed, and for which the Corporation is held responsible, and to have £15,000 a-year for the extension of sewerage works? I have not made the calculations necessary to enable me to answer that question.
342. *Mr. Webb.*] From your experience, are you in a position to state whether property has been increased in value by the construction of the sewers? Where they are made use of, and the premises actually connected with them, no doubt property has been increased in value to the extent that it lets more readily and at a higher rent.
343. Can you give us any idea of the per centage of increased value given in this way? I could not, without knowing some particular cases to go upon.
344. For instance, two premises of the same character in the same street—the one connected with the sewer and the other not;—can you tell us what is the difference in value? As a general rule, when a person wants a house, the first thing he asks is, "Is the water laid on?" and then the next question is, "Is it connected with the sewer?"
345. Then if it is connected it lets more readily than another which is not? It does.
346. So that it is to the advantage of the landlord to connect? Assuredly.
347. *Chairman.*] The next fund on the list is that of the Sydney Common, and I see that there is a debt upon that of £25,620? There is.
348. But there has been expended on the Common a sum of £45,232, whilst the value of the land already sold is £26,866? That is so.
349. What was the particular objects of the expenditure? It was made for levelling the ground, and generally beautifying it.

- C. H. Woolcott, Esq.  
3 Oct., 1873.
350. Is the Common much taken advantage of by the population for the purpose of recreation? Yes; it is one of the greatest outlets of the City for persons desiring recreation.
351. What is it generally used for? For the general purposes of recreation. On Sundays there are thousands of people take advantage of it.
352. And on Saturdays? Yes. It is used as a cricket-ground, and for all kinds of sport, as well as for military purposes.
353. The citizens and suburban residents have resorted to that place in considerable numbers since the improvements? Yes; they have availed themselves of it very largely since then.
354. There is still a large quantity of land to be sold there? There is.
355. Can you form any estimate of the value of the land to be sold there? I have tried several times, but I have been unable to do so. I can say, however, that its value is probably sufficient to cover the present debt on the fund.
356. Can you tell us what is the annual revenue now received from the Common? About £300.
357. Coming now to the Prince Alfred Park Fund, I find that is in debt £18,377? It is.
358. And that the revenue derived from it is £1,250 per annum? That is all.
359. When that Park was handed over to the Corporation, at the request of the public, and with the authority and assistance of Parliament, an Exhibition building was erected in it? Yes, under the special authority of Parliament, given by the Prince Alfred Park Enclosure Act.
360. And the debt was incurred by the erection of the building, and the enclosure, and beautifying of the Park? Yes. The expenditure was altogether unconnected with the City fund.
361. What is the annual loss to the City upon this fund? The present debt is £18,377, whilst the income is only £1,250. Reckoning the interest on the outlay, and the annual cost for maintaining the building, the Council is every year about £200 on the wrong side of the account.
362. There is no further expenditure required in this direction? No. All that is required is for the ordinary maintenance of the ground, and the periodical painting and repair of the building.
363. I see that in the Corporation report it is stated that the Council have good grounds for endeavouring to obtain from the General Revenue of the Colony an annual grant towards the support of this undertaking, and recommend that application be made to the Government to place the sum of £1,000 annually on the Estimates for this purpose until the existing debt be extinguished? Yes.
364. This report was adopted by the Council after mature consideration? It was.
365. And from the advantage which the general public derive from this building, is it your opinion that this sum of £1,000 is not too much for the Council to expect to receive from the General Revenue of the Colony? That is the opinion of the Council.

WEDNESDAY, 8 OCTOBER, 1873.

Present:—

MR. WEBB,  
MR. BURNS,

MR. LUCAS,  
MR. T. ROBERTSON.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Charles H. Woolcott, Esq., called in and further examined:—

- C. H. Woolcott, Esq.  
8 Oct., 1873.
366. *Chairman.*] Would you explain to the Committee, Mr. Woolcott, the mode of election of the aldermen, and their term of office? The City is divided into eight wards, and there are two aldermen for each ward, one of whom is elected annually.
367. And the mayor? The mayor is elected from the body of the aldermen annually also by the aldermen.
368. Would you explain to the Committee the powers of the mayor? He is the chief executive officer of the Council—has the control of the whole body of officers and servants of the Corporation; but his powers are not defined by any Act of Parliament.
369. Has the mayor got power to expend money without the consent of the Council? The power which the mayor has exercised over the funds of the Corporation within the last seven or eight years has been, in my opinion, unconstitutional. I think it has been wrong in principle, and very frequently objectionable in practice.
370. That has been the practice of the whole of the mayors during the last six or seven years? Yes, the expenditure of the moneys of the Corporation is by an Act entrusted to the Council, and not to any individual Member of the Council.
371. That is, that the mayor should be merely the executive officer to carry out the resolutions of the Council? Yes. There are certain regulations made by the Council themselves with regard to the expenditure of money, to this effect: that any works the cost of which does not exceed £20 can be done by any Committee of the Council.
372. But the larger amounts? They must come to the Council for confirmation.
373. *Mr. Robertson.*] Is the City of Sydney under the Municipalities Act? No, it is under a totally different Act.
374. *Chairman.*] The mayor individually then has no power whatever to expend money? He has in certain cases: for instance, when a street is once metalled the metalling is continued by order of the mayor as occasion requires. There are other trifling works that the mayor has done to which no exception has been taken—that is, where the expenditure does not exceed the limit to which the Committees are confined.
375. Then there are cases of emergency that occur in which the mayor may act? They are met in this way: By a special by-law of the Council which allows a sum not exceeding £50 to be spent by the mayor, with the consent of any two of the aldermen, upon any work of emergency.
376. You believe that the mayor's having exercised the power of spending money without the consent of the Council has worked injuriously to the Council and to the City? I think the practice is objectionable; and in some cases it has been injurious also.

377. How has this money been expended so far as the improvement of the City has gone? In general works, improvement of the City, water works, and so on; it has not been confined to any particular fund.
378. Are there any objections to the mode by which the mayor is elected, and to the election of the aldermen according to the Act? Yes, there are many I think.
379. What are they? I think in the first place the mode of compiling and collecting the lists of voters is objectionable, and might be amended.
380. In what way? In this way: At present the voters' list very often contains the names of several persons for one premises—the name of the proprietor, the name of the lessee, the name of the sub-lessee, and the tenant. That is to say, that there are sometimes four names registered on the voters' list for one particular house.
381. Notwithstanding its value, or irrespective of its value? Yes, quite irrespective of the value of the house; it may be a house of only £5 a year.
382. And for that house all these persons claim to have their names on the list? Yes, and they exercise the right of voting, and there is nothing to prevent their exercising it.
383. *Mr. Lucas.*] Can lodgers vote also? No, not lodgers.
384. Not if they pay the rent? No.
385. But suppose that there are four or five tenants of a house, have they not each the right of voting? No, not unless they are members of a firm. They cannot if they are merely lodgers occupying rooms in the house.
386. But suppose that there are four or five families in a house and they are rated, does not each of them vote? No.
387. Only one tenant? Yes, only the one who pays the rent of the house.
388. *Mr. T. Robertson.*] That cannot arise under the Municipalities Act? No, it is under our own Act.
389. *Chairman.*] And are there not various places throughout the City in the hands of trustees for which the power to vote is claimed? They have in the case of an engine-house—a place where one of the fire-engines is kept—claimed the right for all the members of the Fire Brigade. They claimed to have all their names inserted on the lists.
390. And club-houses? There have not been any claims from members of club-houses.
391. There were claims from other trusts besides the one you have mentioned? Yes, but they were disallowed by the Revision Courts.
392. Are you aware how the franchise has been exercised in suburban Municipalities? Yes.
393. Can you suggest any better mode of registering voters than that which prevails at the present time? Yes. I have done so to the Council, and my proposition has been adopted by them, and an Act has been prepared for the purpose of amending the law: The proposition is to this effect: That the lists shall be compiled by a registration in my own office of the names of parties producing a receipt from the City Treasurer for the taxes for any particular premises; and these parties would be given cumulative votes on the principle that has been adopted in the Municipalities Act.
394. Would you explain to the Committee the manner in which works are initiated and brought before the Council for the first time? In various ways; sometimes they are done by petition from the citizens; in most cases these petitions are presented by aldermen. A petition after being presented is referred to the proper officer for his report—the City Surveyor or the City Engineer—and then when the report is made the matter comes under the consideration of one of the Committees of the Council, and then submitted to the Council for further action. In most cases however the works are originated by special motions on the part of the aldermen themselves—that is to say, they move on the Committee that the surveyor or other officer be instructed to furnish a report upon the necessity and cost of any special work, and then the report comes up and passes through the Committee in the usual way.
395. But in point of fact when the City Engineer or the City Surveyor is asked to report upon the necessity of a work, is it not the fact that all works are necessary in a new City such as this? There are instances in which a work has been asked for that has not been considered necessary by the officer to whom it was referred.
396. On many occasions? Not on very many occasions.
397. But generally speaking, are not all works, or almost all works, necessary? All works ordered are necessary as a general rule.
398. And it would for the most part be expedient to carry them out if the finances of the City were in a flourishing state? Yes.
399. Are there not committees of the whole Council—separate committees of the whole Council—to consider each subject: Improvement committee, lighting committee, sewerage committee, finance committee, water committee, and so on? Yes, each of these committees consists of the whole of the members of the Council.
400. And all matters connected with these works are brought before these committees previous to their being brought before the Council? Yes.
401. Do you think, *Mr. Woolcott*, that it would be beneficial to the City if it were subdivided into a greater number of wards than there are at present, so that there might be an increased number of aldermen, or do you think that it would be better to have three aldermen for each ward instead of two as at present? I do not think so.
402. *Mr. Lucas.*] Do you think that there should be an increase in the number of aldermen? I do not. I think from the experience I have had of the working of a larger body of aldermen, that it is more advisable to keep matters as they are at present.
403. *Chairman.*] So that if there were to be any amendment of the Act, you would not wish to see any amendment giving a larger number of aldermen, or extending their period of service? I would not.
404. Do you not think that by reason of their coming so often before their constituents aldermen are apt to get works done, which otherwise they would not consider of any great urgency? It very frequently happens that they endeavour to do so, but I do not know that they have always been successful in their attempts.
405. Is there not a tendency to that; as their term of office is so short, do not the aldermen endeavour to get works pushed through the Council during the latter part of their time? I think that that has been the case in former years, but it has not been so recently.
406. It has not been done within the last three years? No, not within the last few years.

C. H.  
Woolcott,  
Esq.  
8 Oct., 1873.

407. *Mr. Lucas.*] Do you not think that it would make the aldermen a little more independent if they had four years tenure of office rather than two? No, I do not think it would.

408. You think that two years is a proper time for them to hold their seats? Yes.

409. You think that an alderman should go to his constituency every second year? Yes, I do think so.

410. What is your opinion of cutting up the City into wards; would it not be better to have fewer wards—instead of having eight divisions to have four, and elect four aldermen for each; do you not think there would then be less localism—that such a system would tend to get a better representation? I think that perhaps the City might be more equitably divided as far as regards the number of voters; but I do not think that it would be advisable to reduce the number of wards and the number of members also.

411. I do not speak of reducing the number of members; there would be the same number of members, but half the number of wards. Suppose that you had four wards with four members for each, there would then be the same number of aldermen but only half the number of wards—would not that be an improvement? So long as the number of aldermen is not reduced I do not think that it matters much how the City is divided.

412. But do you not think that this reduction of the number of the wards would be a decided improvement? I do not think so.

413. Supposing there were four wards, and four aldermen to each ward, then an alderman could retire each year, and still they would have four years tenure of office instead of two;—would not that be a better state of affairs—would it not tend to make them more independent if they had a larger constituency and a longer tenure of office? I do not think so. I think that the aldermen do their duty conscientiously, without looking forward to the result of a future election. In that way they are independent to a certain extent.

414. With reference to this borrowing of money;—do you not think that it is desirable that some limit should be placed upon the powers of corporations to borrow? I am not now speaking of the corporate body of Sydney alone, but of all Municipalities. Do you not think that there should be some limit to the power of borrowing? The power of our own corporation is limited by an Act, and I think the principle is a good one.

415. What is the limit? On the City fund, £100,000; on the water fund, £150,000; on the sewerage fund, £200,000.

416. The amount to be borrowed on the City fund then would be about three years' revenue? Yes; from direct taxation.

417. And on the water fund it would be about five years' revenue? Yes.

418. On the sewerage fund it would be equal to about seven years' revenue? I cannot estimate that—the rates for sewerage are not regular.

419. Do you think that it is desirable that any corporate body should have the power of borrowing to that extent? Yes. I do not think that the power which has been given to the Sydney Corporation is excessive.

420. Do you not think that borrowing powers to the extent of one year's revenue would be ample? No, I do not.

421. Can you not see that it is this power of borrowing that has placed the Council in its present position? No.

422. Do you not think that there would be more economy used if the Council was confined to expending the revenue proper of the City, rather than having this power to borrow? If their power was limited to that they would find it impossible to carry out any works of a permanent character.

423. But would it not be as well to wait for permanent works until you got them within the year's revenue? No, I think not.

424. Are there any instances in which any of these works yield a return? Yes.

425. A return equal to the interest upon the money borrowed? Yes.

426. Will you name them? The eastern market at Woolloomooloo is one.

427. What was the cost of the eastern market at Woolloomooloo? The eastern market, I think, cost £2,800.

428. And what revenue is derived from it? The revenue at present is about £10 a week.

429. Is that the net revenue? No.

430. That includes the expense of keeping it up—the expense of servants and so on; what is the net revenue? I cannot say. The expenses are very trifling indeed. There is but one person specially appointed to take charge of the place, and he is engaged in other work besides. The general supervision of the market is undertaken by the Inspector of Nuisances.

431. Are there no persons employed to clean the place? The general cleansing of the place is done by the scavengers.

432. What is the cost of it? I do not know. It is very trifling.

433. What is the cost of these scavengers generally? About £160 a week.

434. Is there any other building which has been constructed with borrowed money which pays the interest of the money? Yes, I think that the Market Wharf is now returning a very fair rental for the money spent upon it.

435. Will you let us know the amount of the whole expenditure upon the wharf, and the cost of keeping it in repair, and the receipts from it? There has been about £8,000 expended in the construction of the wharf and the buildings upon it. The annual cost of its maintenance, including salaries, repairs, &c., may be estimated at £560. The present revenue is at the rate of about £1,600 per annum.

436. Let us know what is the cost of keeping it up, and what is written off every year for depreciation? We never write anything off.

437. Do you never allow for repairs? No; when the wharf is out of repair we renew it.

438. Is there any other work that repays the interest of the money? I think not, just at present. The most of these improvements were made in very dear times, and cost a great deal of money—much more than they would cost at present.

439. Give us an instance of that? The baths at Woolloomooloo, for instance, were built in the dear times.

440. But the Town Hall? There is a public accommodation derived from that building; and I do not think it was built for the purpose of returning a revenue.

441. *Mr. Burns.*] What rent do you pay at the present time for offices? £475 a year.

442. What will the Town Hall cost when it is finished? That I am not in a position to tell you; there has been no estimate made of it.

443. *Mr. Lucas.*] And did the Council enter upon this building without having an estimate of the cost? An estimate was made originally.

444. What was that? £35,000.
445. It has cost more than that now? Oh yes, considerably.
446. And it is not even a third finished? Yes, the main building is two-thirds finished. The cost up to the present time has been £45,644.
447. And there has been no estimate made of what it will take to complete it? There has been no estimate made of what it will cost to complete it. The original design was merely an elevation and a ground plan.
448. The hall for the accommodation of the public has not yet been commenced? The large hall has not.
449. All you have constructed are merely the offices? Yes, merely the offices.
450. Then what you have constructed up to the present time is not for the public accommodation at all? What do you mean by public accommodation?
451. Well, a place in which the public could meet—such a place as we usually expect a Town Hall to be? There is no large hall in the present structure; but the vestibule will hold 500 or 600 people.
452. There is the Council Chamber and the offices? Yes.
453. You are now paying £475 a year for offices? Yes.
454. What interest are you paying upon the money borrowed to build this Town Hall? 6 per cent. The whole of this money has not been drawn from the City fund.
455. You say that the whole of the money for the building of this Town Hall has not been drawn from the City fund? Yes.
456. You had, I believe, some piece of land next the Colonial Secretary's Office, that was granted to the Corporation? Yes.
457. Afterwards the City Council got a Bill through the House to empower them to sell that land and appropriate the funds to the erection of a Town Hall; they then, after getting the power to sell that land, applied for a grant of the present site of the Town Hall? Yes, and they got it.
458. They sold the land which was granted in the first instance, and placed the money in a fund for the purpose of building the new Town Hall? Yes, and they expended the money.
459. How much? £12,000.
460. That amount was received from the sale of the land? Yes.
461. Was the whole of the land sold? No, not all.
462. What is the value of what is left? It is worth about £2,000. I have included that in the £12,000.
463. Then, with the exception of this £12,000, the whole of the money expended upon the new Town Hall has been borrowed at 6 per cent.? As I explained before, we do not borrow money for these special works.
464. Nevertheless that Town Hall is built with borrowed money? Some of this money, constituting the City debt, was borrowed before there was any Town Hall at all.
465. But I presume that if you had not built the Town Hall you would not require to borrow so much money? That work in connection with others has necessitated the borrowing of money.
466. But you would not have wanted the money if there had been no building there? I do not say that.
467. You think then that the Council will borrow money whether they want it or not? As long as there are necessary works to carry out they will borrow money for them if the ordinary revenue will not supply it.
468. Then in reality the whole of the money expended on this structure will be borrowed money? Yes, with the exception I have mentioned.
469. *Mr. Burns.*] Will this new building give you much more largely increased accommodation for your officers than you have now? Oh yes.
470. More than double what you have now? Yes, more than treble I should think.
471. And have you felt the need of having increased accommodation both for your officers and for the public too? Yes, we have.
472. Has the obtaining of increased accommodation been in fact a necessity? Yes, we feel from year to year that it is necessary to have more accommodation.
473. *Mr. Lucas.*] What is the size of the large room in the new Town Hall? Do you mean the one to be built, or the Council Chamber?
474. I mean the Council Chamber? I forget the size just at present.
475. *Chairman.*] It is 42 feet by 31? Yes, I believe that is about the size.
476. *Mr. Lucas.*] Do you find a want of room in the present building? Yes; some of the offices are very much crowded, and the papers and documents are not in such a state as I should like them to be in for the want of proper accommodation.
477. That is the third place you have occupied as a Town Hall since the institution of the Corporation? Yes.
478. Is this building you now occupy more convenient than the others were? Yes, much more.
479. There are three houses;—are there not? We occupy two.
480. There are several houses in that row;—are there not? Yes, there are seven.
481. There would be no difficulty in obtaining another one of those houses if you required more I suppose? I cannot say; I do not know; but it would be very inconvenient to do so.
482. You are not able to give us any information as to what the cost of finishing the Town Hall is likely to be? No; as I told you, at the present time there are no designs made at all for the large hall, and consequently no estimate can be made of its cost; there is no design, except for the elevation and the ground plan of the building.
483. Can you give us an estimate of the cost of completing the present building, as well as of the roof? No, I cannot.
484. There is then really no estimate? No. The estimates are now in course of preparation.
485. One reason why you have not constructed the large hall was that there was not sufficient land included in the grant;—was it not? Yes.
486. Is the whole of the land that was granted covered with the present building—the half acre that was granted as a site for the new Town Hall? Yes.
487. The present building now covers the half-acre? Yes, the present building covers the half-acre within a very small piece, which is occupied by a portion of the foundation of the large hall—that is the northern wall; but we have since obtained a further grant of a quarter of an acre on which to build that hall.

C. H.  
Woolcott,  
Esq.  
8 Oct., 1873.

488. *Chairman.*] If the land granted had been sufficient, the building would have gone on—the large hall would have gone on in the same courses as the offices? Yes, the foundations were actually take out, and the contracts accepted. We were stopped by the action of the Government.
489. If the large hall were built there would probably be a large revenue derived from it? Yes, we look for that.
490. That would pay the interest, or assist to pay the interest, of the money? Yes.
491. Several prize plans were submitted; tenders were called for the supply of plans for the new Town Hall? Yes.
492. These plans were open to the inspection of the public? Yes, they were for several weeks.
493. You yourself gave considerable attention to the exhibition of these plans? Yes.
494. Did the citizens and those persons who came to look at the plans show a wish to have a large hall for concerts and assemblies, and so on? I have always heard so.
495. Was that not one of the main features of the building that they required? The building of a Town Hall has been looked forward to as a means of providing a great want in that respect.
496. The plans of the present building were placed before the Executive, and also before the Parliament? Yes.
497. Were they not on two occasions placed before the Parliament? Yes, by Sir James Martin.
498. So that, in point of fact, the Government and the Parliament assented to the construction of the new Town Hall as it now stands? I will explain how it was: When Sir James Martin introduced the Bill for the extension of the site of the grant to the Corporation, he submitted at the same time the elevation and general design of the ground plan of the building which it was intended should be erected upon that site.
499. *Mr. Lucas.*] When was this? The design was here for months and months.
500. When was this? The Session before last, and the beginning of last Session.
501. But were not the contracts entered into for the present structure before these plans were placed before the House? Yes.
502. Then the designs were submitted merely to show the Parliament the sort of building which the Corporation was about to erect, and induce them to grant another quarter-acre of ground? Yes, that was the object.
503. And the Parliament was not asked for an opinion as to whether this was a proper structure? Not by the Council; the Parliament were not supposed to have any voice in the matter. The matter was left to the discretion of the Council.
504. Had the Government any right to interfere in the matter? No.
505. It was left entirely in the hands of the Corporation? Entirely.
506. And the mere object of placing the plans on the Table was to induce the Parliament to grant another quarter of an acre—not to get the opinion of the Parliament as to the suitability of the structure? I presume so.
507. Were not competitive designs for a Town Hall called for, and was not a sum of money paid to the person whose plans were accepted? Yes.
508. What was the amount? The first prize ("Treu und Fest") was £200; the second ("City") £100; and the third ("Bunyip"), £50.
509. What were the conditions;—do you remember the conditions within which the competitors were to keep in order to entitle them to these prizes? The conditions were that the cost of the building was not to exceed a certain amount—£35,000. Originally the cost was limited to £25,000, but it was afterwards increased to £35,000.
510. And it was so increased after the sum of £25,000 had been advertised? Designs were called for on the second occasion, and after the amount was increased.
511. And the limit as to cost was one of the principal conditions? Yes; that and the amount of accommodation that the building should contain.
512. And the person who made this design received the prize? Yes; he received two prizes—the first and second.
513. Although the building will cost twice as much as the conditions stated that it should cost? The whole of these plans were submitted for the special report of our own officer—the City Engineer.
514. Just answer my question, please;—is that the fact that the building was not to cost above £35,000? Yes.
515. Is it not a fact that the building will cost twice that amount? It seems to be so; but I may state that at this time the Council were informed by their own officer that the building could be erected for the money voted.
516. This same building? Yes.
517. This building has been erected after the original design? Yes. There is a little difference, I daresay, in matters of detail, but the alterations have not been great.
518. Was there a report from the City Engineer stating that the structure could be built for £35,000? Yes, there was to that effect from the City Engineer and two architects appointed by the Council for the purpose of examining the designs.
519. Can you produce that report? Yes; I will append it to my evidence. (*See Appendix A 2.*)
520. Who was the successful competitor? Mr. J. H. Willson.
521. When tenders were called for, it was decided that he should have the supervision of the building? Yes; he was appointed by the Council as architect.
522. And he remained in that position up to the time of his death? Yes.
523. *Mr. Webb.*] You were asked a question with reference to borrowed money;—you said that borrowed money had been used in constructing works that would last for a considerable length of time—in fact, for permanent works? Yes.
524. Will not these permanent improvements bring in a revenue to the Corporation indirectly by the increased value that they give to property in the neighbourhood? Yes, I should think so.
525. Could you have constructed these works if you had not borrowed the money? No, certainly not with the ordinary revenue of the City,—that is, of course, without neglecting the more important work of maintaining the streets.
526. Therefore, although these works are not directly reproductive, nevertheless they are indirectly productive of revenue? Yes; they improve the value of buildings in their immediate neighbourhood, and thereby the revenue of the Council is increased.

527. Then, if the Corporation of Sydney had not borrowed money to carry on these improvements, would not many of the streets in the present day be in a very bad and dangerous state, and almost impassable? Well, as I said before, I think that the amount of money which has been expended on the public buildings and on the Town Hall amounts to more than our debt for borrowed money; and, consequently, I infer that all the money which has been spent on the streets has been the actual revenue of the Corporation.

C. H.  
Woolcott,  
Esq.  
8 Oct., 1873.

528. And the money borrowed has been expended on the Town Hall and the public buildings? Yes, on the markets, wharfs, baths, and other public buildings. What I say is this: That we have spent £100,000 on these particular works, and our Corporation debt is only about £90,000 for debentures for borrowed money, so that in fact the whole of the borrowed money may be said to have been spent on these public buildings and works.

529. And many of these public buildings and works are reproductive—all of them are to a certain extent directly reproductive? Yes.

530. Does the same thing apply to the sewerage debt and the water debt? It does to the water debt but not to the sewerage debt.

531. And the money you have borrowed for water purposes—I am speaking now of the Corporation debt? The Corporation debt on the water works is only £70,000 or £80,000, and we get from it a revenue of £36,000.

532. Then that pays well? Yes.

533. And the sewerage debt was incurred for a purpose that has increased the value of property and been of great advantage to the citizens, and been of great importance as far as the health of the population is concerned, but it has not yielded any return? No, scarcely anything.

534. That is owing to a defect in the law? Yes, it has been caused by a defect in the law.

535. The sewers could not have been constructed had you not borrowed the money? Certainly not.

536. These sewers will be of benefit to posterity—to the population a century hence? They are of benefit to the whole community.

537. Will they stand for the next fifty years or 100 years? I cannot say; if so, they will be a credit to the City, but I cannot say how long they will stand.

538. Do you think that they are well and faithfully built? I should like you to ask some professional person that question—some person who knows more about such matters than I do.

539. *Mr. Burns.*] What interest do you receive on an average for the money expended on those public works which you have constructed with borrowed money? What interest do we receive?

540. Yes, what interest do you receive on the average from the public works that you have borrowed money for? I cannot tell you that without making some calculations as to the various expenses and returns.

541. Do you get interest from most of the works with the exception of the Town Hall? We get a return, but I do not think that we get anything that can be considered remunerative upon so large an outlay.

542. Can you give us any information yourself as to what revenues the Corporation should have, other than that which is derived from the rates and taxes which they receive? I have given that in my former evidence.

543. Will you make an estimate of what that revenue will amount to? I cannot give it to you, except in so far as I have already done so. Since giving that evidence I have endeavoured to form an estimate, and I find that it would be impossible as regards the revenue to be received from unoccupied lands and a wheel tax. I think as far as I have been able to gather, the revenue which the Council have asked for, would be from £19,000 to £21,000, and that is irrespective of the assessments upon unoccupied lands and wheel tax.

544. Of what sources of revenue do you speak now? Auctioneers' licenses, publicans' and pawnbrokers' licenses, dog fees, wine and spirit licenses.

545. If you had the revenue from those sources would it put you in a position of solvency? I cannot say that.

546. *Mr. Lucas.*] Would it enable you to carry on these public buildings and so on? I am not prepared to say that.

547. *Mr. Burns.*] If you had this additional revenue would it give you ample funds to enable you to meet all demands? It would place us in a much better position of course, as it would increase our revenues by about a fourth.

548. And that would give you fair resources to carry on these operations? No, I think that it would require more than that with a growing City such as this; it must have from £90,000 to £100,000 a year.

549. But would not the receipts from taxes increase? Not so much as you imagine.

550. Not in proportion to the demands on the revenue? No, our City rates increase at the rate of from £700 to £800 a year from new buildings, and the chances are that if we were to make a fresh assessment now the rates would decrease.

551. At what per cent.? That I cannot say.

552. Have the Corporation any other public works now in view? I think if they had the means of doing so, they would feel inclined to improve some of their present properties.

553. But have they any new works in view which they propose to construct if they can get the means of doing so? No, I think not. The only thing that they require to do is to increase the accommodation at the Lime-street Wharf and Market Wharf.

554. What about the market accommodation; do they propose to increase that? They have had that under consideration for many years.

555. Why has it not been improved? The proposal was to convert the south-eastern corner of the markets into places of public business—shops—but the law requires that the plans shall be submitted to the Government for their approval, which was done, and the Government declined to give their approval.

556. What reason did the Government assign for refusing? I think it was done by petition from the shopkeepers and residents on the other side of George-street, who objected to such interference with their places of business as would have been caused by the alteration of public properties into private shops.

557. Have you in consequence of this refusal increased the accommodation at the Belmore Markets instead of at the George-street Markets? Yes.

558. The Corporation are disposed however to increase the accommodation of the George-street Markets? Yes, they are disposed to do that.

C. H.  
Woolcott,  
Esq.

8 Oct., 1873.

559. Would they spend much money upon that improvement? Yes, the alteration would cost a great deal of money, and it would also afford a very large return.
560. If the Corporation has no new works in view, and if they got this additional revenue, would they not work themselves free from their difficulties in a short time? They might, but of course the necessity for new works grows as the City grows.
561. *Chairman.*] Irrespective of the revenue to be derived from public works, it is necessary that some of them should be constructed—take for instance the baths in the Domain and at Dawes' Point; these are works which are necessary, irrespective of what returns can be got from them? They were constructed for the accommodation of the public, without view to their actual return to the Corporation of any very large revenue.
562. For instance, the baths at Dawes' Point cost between £4,000 and £5,000, and all the revenue received from them is £100 a year? Yes, in fact not so much as that, because the maintenance of these baths costs a large sum of money.
563. They were constructed for sanitary purposes? Yes, they were necessary for the accommodation and health of the public even if they did not return a shilling.
564. Previous to the Council taking into consideration the improved style of building on the south-eastern side of the George-street Markets, they had provided large accommodation at the Belmore Markets, and went to heavy expense? Yes, they spent a large sum of money there.
565. So that the market-accommodation now is more than double what it was? Yes, it is more than threefold by reason of the Belmore Markets.
566. Has the Council found itself very much hampered in leasing their lands, owing to the reservations in their trusts; take for instance the Market Wharf,—was there not a difficulty relating to that? There is no reservation in the grant with regard to the Market Wharf, except that it shall not be used for any other purpose.
567. *Mr. Lucas.*] The Corporation have let the Market Wharf for a period of ten years? Yes.
568. And there is no difficulty in the way of their letting it for any term? No, provided that it is let for wharf purposes.
569. Stores in connection with the wharf might be erected on the vacant ground there, and that would be a legitimate use of the ground? Yes.
570. And from the locality it is a very fine site for stores? Yes.
571. And it would be useful for no other purposes? No.
572. Then it is not so much the difficulty in the Corporation not having the power to deal with these lands as the influence which is brought to bear upon them to prevent stores being erected, which would be likely to come into competition with property in the neighbourhood? Yes, that may have influenced some persons, but it has not influenced the Council as a body.
573. Nothing has been done there? There have been plans prepared for it, but nothing else has been done as regards the large stores.
574. Did you not say that that was the reason why it had not been carried out? The wharf has been let advantageously without these stores; besides the want of funds may have prevented their erection.
575. Would it not increase the rent of the wharf? Yes, undoubtedly.
576. Do not stores there let at a very high rent? They do.
577. Is there any place in Sydney where stores let so well? I do not know of any place more adapted for it than that is.
578. Then there is nothing to prevent the Council letting the property for eight or ten years? For any period, so long as it is let for the purposes of a wharf.
579. *Chairman.*] Is there any further information that you wish to supply to the Committee? Yes. With regard to the election of the mayor I observe that a measure is to be submitted to the Assembly to place this duty in the hands of the citizens. This, I consider, would be inadvisable. The only argument I have heard in its favor has been, that it would prevent the exhibition of party feeling amongst the members of Council at the time of election. But if this feeling has occasionally existed, I have not found that the aldermen are influenced by it after the election is decided, and I consider that differences of a more serious character might possibly arise if the mayor were elected in the manner proposed by the Bill I refer to. I am also of opinion that the laws which render it necessary that the Government should be consulted before the Council can make any alterations to their properties, or can align or proclaim the streets of the City, should be repealed, and that the Council should have absolute control over all matters under their jurisdiction. The necessity for consolidating and amending the numberless Acts with which the Corporation has now to deal is very great and requires early attention. Nothing further occurs to me at present.
580. *Mr. Lucas.*] What do you think of the size of the City;—do you think that it is large enough or that it would be an advantage if the suburban Municipalities were in some cases to be annexed to the City? I do not think that it would be at all advisable; the boundaries of the City are at present sufficiently extensive.
581. Quite large enough to be worked with advantage? I do not know of any Municipality that the City would like to annex with its attendant revenue and expenses.
582. But it is not altogether what the City Council would like; it is what would be for the convenience of the people, and what would be worked at less cost. Would it not cost less to work two or three of these Municipalities together than to work them separately? I do not think that it would in our case. We have a large staff of officers, and we find quite enough to do to manage with the staff that we have.
583. And if you increase the size of the Municipality you would have to increase your staff? Yes.
584. And in reality it would not tend to decrease the cost of working the institutions? I do not think it would in any way.
585. You do not think that it would be desirable to increase any of them? I do not.
586. Either as affects the City or the Municipalities to be annexed? It might be of advantage to the outside Municipalities to be attached to the City, but I cannot see what advantage would accrue to the City itself.

FRIDAY, 10 OCTOBER, 1873.

Present:—

MR. BURNS, | MR. LUCAS,  
MR. TUNKS.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Simeon H. Pearce, Esq., J.P., was called in and examined:—

587. *Chairman.*] This Committee has been appointed by the Legislative Assembly to inquire into the working and present financial position of the Municipalities, as now incorporated. The inquiry is also to include the Municipal Council of Sydney. You have long been connected with the Municipality of Randwick;—have you not? I have, since its incorporation in 1859.

S. H. Pearce,  
Esq., J.P.  
10 Oct., 1873.

588. Have you been mayor of that Municipality? Yes. That was the first Municipality incorporated under the old Act—the Act of 1858.

589. How many years have you been mayor of that Municipality? I have been chairman or mayor five times. I was the first chairman or mayor of the Randwick Municipality.

590. What is the extent of your Municipality? What is the area?

591. Yes? I think it was about 12 square miles, but now reduced to about 10 square miles by an extension of the City boundaries.

592. What is the number of inhabitants who reside in the borough? The number of souls?

593. Yes; about the number? The number of souls resident within the boundaries of the Municipality is about 1,600, as far as I can remember.

594. What is the amount of your revenue? By assessment and taxation?

595. What is the amount raised by taxation? £644 7s. for 1873 and '74.

596. From what sources do you derive your revenue? From the general taxation under the Act; from the assessment of properties according to the Act.

597. What is the rate? One shilling in the pound on all ratable property as expressed in the Municipalities Act.

598. On improved property? Yes; and on unimproved property. One shilling in the pound is the rate we have levied—nine-tenths on the rental of improved lands, and '5 per cent. on the value of the fee simple on unimproved property.

599. That is according to the provisions of the Act? Yes.

600. How many miles of roads and streets are there within the Municipality? The roads and streets, made and unmade, under the charge of the Municipality, are about 34 or 35 miles in length, that is about the length of roads already laid out on the Government and private maps; but I cannot say exactly.

601. Do you receive any endowment from the Government? Yes; we at present receive the endowment provided under the Act, namely, 25 per cent. We have only about two years more to receive endowment under the present Act.

602. Do you find that the revenue which you derive from taxation and the amount of endowment received from Government sufficient to keep your streets and roads in proper repair? No; the present revenue would be scarcely sufficient to keep those in repair which we have made, without making any extensions at all.

603. The revenue at your command does not enable you to make any new roads at the present time? No; excepting under arrangements which, by resolution, our Council have made with the inhabitants,—namely, that if the inhabitants subscribe a portion of the cost of any work which they require to have performed, the Council, providing the work to be done is for the public good, agree to find the other portion of the cost by loan or otherwise.

604. Do you think that the area of your Municipality is sufficiently large to allow of its being economically worked? I think so. I think that where there is a Municipality within the suburbs of Sydney which has an area of 10 or 12 square miles, that is quite sufficient for efficient and economical working.

605. Do you think that it would be undesirable to annex Waverley to Randwick? Yes; under present circumstances I think it would be very much so. Their local wants and requirements, advantages and interests, are not similar to ours.

606. Your Municipality is in a very favourable position with regard to the supply of road metal, is it not? No; it does not contain any blue metal, or other material suitable for heavy traffic. Our Municipality contains a great many engineering difficulties on account of the hilly nature of the ground; and the creeks which we have to cross require large bridges and costly culverts. It will be a very expensive Municipality to make the necessary improvements properly.

607. So far as a supply of ballast and gravel for the roads are concerned, you stand well? We have a little gravel, but it is nearly all gone. We have ballast, but no road metal. That is what we are most deficient of; and the purchase of blue metal from Mr. Ryan's quarries at Penrith has absorbed a good portion of our money.

608. Do you find any difficulty in collecting your rates upon unoccupied land? The greatest difficulty we have experienced in the working of our Municipality from the commencement, arose from the fact that in the first instance it was wrongly incorporated, inasmuch as it included a "township with part of a suburban locality," which was then believed to be contrary to the provisions of the old Act, and so decided by the Supreme Court subsequently. During the first ten years, or up to the time of the passing of the amended Act, we were not able to enforce the payment of our rates on account of the presumed legal difficulty which stood in the way. We were afraid to go to law, because we knew if we did we should be likely to lose our case, because the proclamation of our boundaries was contrary to the provisions of the Act, including as it did, "a township with a part of the country." We lost a very large portion of our rates during the first nine or ten years that we were incorporated. We not only lost a great portion of the rates which we should have collected but we lost also the Government endowment, which we should have received had they been collected.

609. Suppose a piece of land to be worth £400;—the rate upon that would be 18s.? We could collect up to 20s., being 5 per cent. on the fee simple.

- S. H. Pearce, Esq., J.P.  
10 Oct., 1873.
610. That would be one four-hundredth part of its value? Exactly so; but that rate is not sufficient or fair—as non-improvers receive equal benefits in the increased value of their land.
611. Do you think that 1d. in the £ would be a better rate to levy—that would be one two hundred and fortieth of the value? ———
612. That would make the rate about  $8\frac{1}{2}$  per cent. instead of what it is now,—5 per cent. Do you think that 1d. in the £ would be too much of a burden? I think that amount would be more fair and equal. The present rate is not sufficient, as a large area of unimproved land is found in many Municipalities, and those lands are improved in value, according to the improvements made therein.
613. What amount of money would you require to be endowed with to enable your Municipality to work efficiently? I think each Municipality under the Act should be endowed by the Government with a sum equal to that which is collected within each area.
614. What are the expenses of your Municipality during the year for advertising, clerical services, interest, and all other sums not expended directly on works? We work our Municipality very reasonably indeed, and always have done so; in fact our main object from the commencement has been to expend all the money we raised upon roads and other works. We have spent nothing that we could avoid in the payment of salaries. I have acted as honorary surveyor of the Municipality from the commencement, and have received no salary whatever for my services as such. The treasurer is also an alderman, and he of course has given his services gratuitously.
615. Is that the general practice in Municipalities? I believe it is not. The treasurer is generally an alderman, and aldermen are not paid for services rendered by them, but surveyors are generally paid officers.
616. *Mr. Tunks.*] The Council could pay an alderman if they liked? No, they could pay the mayor but not an alderman. During the last two years we have awarded £30 a year as a salary to our mayor. It was voted for public purposes,—to enable the mayor to assist in securing proper omnibus traffic to our neighbourhood. We had to pay £150 as a subsidy to induce the Omnibus Company to run their vehicles regularly to our neighbourhood.
617. *Chairman.*] That is, the Municipality had? No, the people had, but they requested the Council to assist, and the assistance was granted in that manner. The salary to the mayor was voted, merely to enable him to assist in any of those subsidies which may be required for the benefit of the neighbourhood. He never puts any of it into his own pocket. It is always spent for the good of the Municipality. Mr. Bradley had to pay, I believe, £40, the sum deficient, and we voted a salary of £30 to him simply to enable him to give it to the 'bus Commissioners to provide 'bus communication between Sydney and Randwick.
618. What is the amount of your indebtedness? I think about £1,300 for corporate purposes.
619. At what rate of interest? 6 per cent.
620. Have you built a Town Hall? Yes; it has cost about £1,000; that is about the total cost of erection, alterations, and repairs up to the present time.
621. Have you any knowledge of road trusts; are you aware whether they are economically worked? Some of them are, and some appear not to be.
622. Could you enumerate any? We had a trust road running through our Municipality before and sometime after its incorporation. I was honorary surveyor for that too, but they allowed me £20 a year to cover my expenses, and they gave the secretary £20 a year for his services as such.
623. So that on the whole it is as expensive to work road trusts as it is to work Municipalities? In proportion it is. I think all road trusts ought to be transferred to the Municipal Councils, through whose boundaries they run.
624. Are there any defects in the present Municipalities Act to which you wish to draw particular attention? I waited upon the Conference yesterday in order to give them some information from the practical observations I have made, and suggested to them the propriety of confining their efforts under present circumstances to the alteration and amendment of the endowment clause, &c. I think that that clause should be amended so as to make the endowment perpetual. There are two or three other clauses in the Act which might be amended with advantage, and that clause which has reference to the area I would strongly recommend to be altered without delay. I suggested to the Conference, and I would again suggest to your Committee the propriety of not allowing any borough to be called into existence whose area is less than 9 square miles. That would be the smallest area I would recommend for incorporation as a suburban borough, and with regard to country Municipalities I think they should include an area of not less than 50 square miles. I think that in all small Municipalities a great portion of the money is expended foolishly, that is, in the maintenance of an establishment and office expenses. For instance, on the North Shore there are three or four Municipalities where there ought only to be one. There is nothing whatever in the features or area of those Municipalities to prevent them being united into one, under one expenso of management.
625. Have you any lands from which you could derive a revenue? We have no lands granted to us by the Crown, excepting such as are expressly and exclusively dedicated for the public use. We cannot obtain any revenue from them; but on the contrary they are rather a source of expense, as money is required for enclosing and planting those reserves.
626. In fact then they are an extra expense now? Yes. I fenced, trenched, and planted that triangular piece of land near the Institution at Randwick, at a cost of about £100 to the Council and public. The trees are now growing well, and it will no doubt in a few years be an ornament to the Municipality.
627. Would it not be better that the Government should endow the Municipalities with grants of land, from which they could derive a revenue, than that the present system of endowment should be continued beyond the time provided for under the Act? It would be very desirable that the Government should give us lands which we could let out, and which in time to come would improve in value, so as to make a perpetual endowment. But there is no Crown Lands in some Municipalities, and to act fairly the Government would then have to purchase lands, at a great cost, in some instances.
628. *Mr. Tunks.*] But if there is no land would you have them buy it? I think not. There are many Municipalities where the Government have sold or disposed of all the Crown land, and therefore great difficulties would arise.
629. *Chairman.*] Has the Government sold the greater portion of the land in your Municipality? No; there are large quantities of Government land in our Municipality. I think there is between 3,000 and 4,000 acres, and from which we derive no benefit whatever.
630. You have the site of a town in your Municipality at Long Bay? Yes. We have three townships in

in our Municipality. There is the private township belonging to Sir Daniel Cooper, the township of S. H. Pearce, Esq., J.P. Randwick and Coogee, the township at Long Bay, and there will be another, no doubt, at Botany.

631. *Mr. Burns.*] With reference to the question of additional endowments;—have you ever thought out for yourself what additional endowments ought to be given by the Government to the different corporations, to make them effective for the purposes they are intended to serve? Taking all the circumstances into consideration, I think that the Government would only be acting fairly by giving an equal sum to that collected within each of the Municipalities. As it must be remembered that every improvement has to be made; Municipalities here are not in a similar position to those in England, or in the other nations of Europe, for there the country has been long inhabited, and particular localities have been undergoing improvements for many hundreds of years. Here we have few inhabitants, and every road, bridge, sewer, culvert—every improvement devolving upon Municipalities to make. It is therefore impossible for the small and scattered population which some of these Municipalities possess, ever to make the most ordinary or necessary improvements from the taxation of their own lands, and not only so, but it should also be remembered that the population which reside in each of these municipal areas have taken upon themselves the care, management, cost, and local Government of all improvements required within that area. They have, as it were, taken that portion of the Colony included within their boundaries out of the hands of the central Government, which in the future will be relieved of all further care or trouble with regard to it.

632. You think that the Government should give pound for pound? Yes.

633. For how many years do you propose that this equivalent should be given by the Government? I have said in perpetuity. The number of inhabitants will continue to increase within the boundaries of these Municipalities, and they will continue to pay their share to the general revenue the same as other taxpayers in parts of the Colony where Municipalities do not exist, and they will have therefore a right to receive back from the general revenue some portion of the amount which they contribute to it for local improvements.

634. Would you at the same time extend the area of the different Municipalities? Exactly so. I would not allow one of them to be subdivided, for I think that the subdivisions which have taken place form one of the great evils of the existing system. Waterloo, Alexandria, and Redfern, ought to have been one Municipality. There are four Municipalities now on the North Shore which ought to be included in the area of one.

635. Your suggestion that the Government should give an amount equal to that raised by local taxation is conditional upon the Government extending the area of the Municipal incorporations, so that there shall not be an undue amount expended in salaries and office expenses? Just so. I would give them that endowment on condition that each suburban Municipality should contain an area of not less than 8 square miles; 9 would be little enough.

636. Would it be wise to give that equivalent to all corporations for an indefinite period? I think so, and on the broad basis that I stated before—that inasmuch as the inhabitants who may reside in these Municipalities will continue for all future time to contribute to the general revenue, the Government ought to return some portion of that revenue towards making roads and keeping them in repair.

637. Have you not a road trust in the Municipality of Randwick? We had, but it has been transferred to the Municipalities of Sydney and Randwick.

638. Have you given any attention to the question of the management of roads in the country districts? If I had the power, I would urge the Government to cut up the whole of the country where there was a suitable population into municipal districts; and instead of continuing these road trusts I would have municipal districts. I would make each cover an area of not less than 50 square miles, or in the far interior 100 square miles if necessary.

639. You would make municipal incorporation compulsory? Certainly. I would never leave it to the option of the people as now. If there are 500 persons living in a suburban area who sign a petition for incorporation, I would grant that petition without allowing any counter-petition, as there are landed proprietors who will not subscribe a single shilling, either privately or publicly, for general improvements; they will keep their land locked up, and if possible get excluded from a municipal area, while other people are spending their money on local improvements, of which they receive indirectly the benefit without contribution. I would therefore make incorporation compulsory. Whether people sign a petition or not, they all should be compelled to bear a share of the taxation for local improvements in all localities where the population warranted it.

640. Are there not parts of this Colony through which important main roads pass, where the population is so sparse that the taxation necessary to make or repair the roads would fall very unequally? Undoubtedly that is the case; and for that reason I think that the great main roads of the Colony would be better in the hands of the Government. I refer now to the main roads of communication with the interior of the Colony. They must be maintained until superseded by railways; but wherever the population is sufficiently large to establish a Municipality which could take in a portion of such main road, I would relieve the central Government of the charge of so much of that road as might be included within the boundaries of that Municipality, and require the municipal authorities to keep it in order, but would endow them according to the money which they raised, as before stated.

641. Have you found the allowance made by the Government for general roads brought under the management of your Municipal Council, sufficient for their maintenance? Certainly not; and moreover they have cut off the allowance under the minor roads grant for the trust roads, which have been transferred to the Municipalities, and that, I think, was a most inequitable and unwise measure. The money which they were giving for those minor trust roads, and, in some cases, the tolls also, were much less than the cost of making those roads, and was not sufficient to keep them in order. We have had to extend our powers of borrowing; and the debt on our portion of the trust road is now, I think, £3,500.

642. Have you contracted a debt with a view to supplement the Government endowment? No; this refers to another matter. An Act of Parliament was passed handing over our trust road to the Municipalities of Sydney and Randwick, which of course included the debt, but the accounts in regard to that road are, in accordance with the Act, kept separate from the other municipal funds. We receive no Government endowment on account of the trust road so transferred. The tolls are all the revenue we have to depend upon for the maintenance of that main road, and for the payment of interest and other expenses.

643. Have you found the tolls insufficient to keep that road in repair? Quite insufficient for repairs, interest, &c., for we have no road metal. We have to buy it all from the owners at Melbourne, or the Nepean River.

- S. H. Pearce, Esq., J.P.  
10 Oct., 1873.
644. *Mr. Tunks.*] What does it cost you a yard? By the time it is laid down, broken, and completed, it costs us about £1 a yard.
645. *Mr. Burns.*] With regard to your debt;—you seem to have a debt on the corporation of Randwick? The trust debt has been created to make and maintain that road, and handed over to us under the Act.
646. Have you any debt on the corporation itself, apart from the road trust? I think the debt of the corporation is about £1,300. We borrowed money to build the Council Chambers and to carry out some minor improvements which were urgently required.
647. And you have found the endowment you received from Government insufficient to carry out the work of the Municipality? Quite insufficient.
648. And that is one reason why you think that the endowment should be made perpetual? Yes.
649. Do you think, as far as your observation has gone, that corporations generally are in a similar position? There is no doubt of it, excepting such Municipalities as Woollahra, Balmain, the Glebe, and Paddington. Those have small areas and large populations, and consequently large revenues. There is but one main street, as it were, through some of those Municipalities over which most of the traffic passes. Nearly all those areas are small, and nearly all the land in them is built upon, so that they have a good revenue as compared with Randwick, the North Shore, and some other outlying suburban Municipalities, which contain so much unimproved land.
650. Is it not likely that when in most cases the population shall have considerably increased within the areas such as you have mentioned—8 square miles—is it not likely that you will be able to derive a revenue from local taxation sufficient for all municipal improvements? We might then obtain sufficient to keep the roads, &c., in order, but not to make many new improvements. We have about 38 miles of roads now laid out on the Government and Sir D. Cooper's maps, which have yet to be made, besides the 9 miles we have made already. There are 38 miles of road laid out, and as the subdivision of property takes place there will be perhaps at least five times that length. The land is now held in lots of from 5 to 1,000 acres; and I suppose we shall have at least 100 miles of roads within the Municipality of Randwick.
651. But if your population continues to increase, will not your revenue, on account of the road trust and from taxation by the Municipal Council, also continue to increase? Undoubtedly; but not in the same ratio as the required expenditure for additional works.
652. Not in the same ratio as the necessity for improvement? No; because we have these roads to form and make on a sandy foundation, and as the population increases constant wear and tear will cause repairs to be continually going on. The repairs to made roads here repeat the first expenditure about every ten years.
653. Do you not think that if the Government were to adopt the rule of giving to all Municipalities an endowment equal to the amount raised by local taxation for municipal work and improvement, and to continue it for the first twenty years, the income of the Municipalities would be sufficient to establish them on a fair basis? I would be content with that as a commencement; but I cannot depart from my belief in the matter, that the Government should make the endowment perpetual, seeing that they are forever relieved of the necessity of taking charge of works in the areas incorporated, and also that the rate-payers in those Municipalities will continue to contribute to the general revenue.
654. In giving your answer you are influenced by the consideration that these Councils take charge of all municipal improvements? Yes, certainly.
655. But do you not think that if there was a general regulation that each Council should get an endowment from the Government equivalent to the taxation which they levied for the first twenty years it would enable them to be established on a fair working basis? They could be established on a fair working basis; but whether they could be continued we must leave posterity to decide. I believe that would do for the present, but on the broad equitable principle I have already stated, I think the endowment ought to be perpetual.
656. *Mr. Tunks.*] I think you stated that you lost a considerable amount of revenue when your Municipality was established, owing to a town being incorporated with a rural district? Yes, we were unable to collect a large portion of our taxes on account of that, and consequently lost the endowment we should otherwise have received.
657. Did you make an assessment? Yes.
658. That point has been determined in favour of the legality of incorporating a town and rural district since, has it not? I do not remember; but the Judges of the Supreme Court decided to the contrary.
659. Is it within your knowledge that the decision of the Judges was reversed? I really do not know. I know that the Supreme Court decided at one time that it was not legal to incorporate a rural district with a town, and our fears were thereby increased.
660. You are not aware that that decision has been reversed? I have not heard, or, if I have, have forgotten it.
661. Supposing it has been reversed, would not the assessment remain as a debt against the property? It would, undoubtedly, under the provisions of the new Act; but unfortunately we should be bound to produce the service of notice, &c., in these cases, and it would not be possible for us to do so, and under any circumstances we have finally lost the Government endowment on the amount not collected.
662. You have not complied with the law in advertising these as a charge against the property? In some instances, no. The first Act was so defective that it was almost impossible to know how to work it.
663. When you say that some of the inhabitants in your neighbourhood subscribe money, and that you assist them, you mean also, I suppose, that the Government endowment is based upon those subscriptions, as well as upon the rates? Under the new Act it is; since 1868 they have done so. That was a suggestion which I submitted to Mr. Cowper when in office.
664. So that under the new Act the Government do pay upon subscriptions as well as rates? They do, but they did not under the old Act. We collected a large sum of money as contributions, but we could not get any endowment for it, because it was not then the law to give any endowment, excepting on rates collected.
665. Would you propose to extend the area under incorporation with the same power of taxing waste lands as exists under the present law? On waste lands of the Crown?
666. You cannot tax Crown lands; alienated land only can be taxed? You mean land held by private individuals?
667. Yes? I think so.
668. The land would be worth £20 an acre before you could get a shilling an acre as taxes? Yes, and that rate would not pay for writing out the notice-paper and the service of it. 5 per cent. on the fee simple is too low for any useful purpose.

669. In some of the suburban Municipalities, where there is unfenced, unimproved, untouched land, what is the value of it—what does the value range from, as a matter of opinion? In Randwick it ranges from £5 per acre to £20, and from £20 to £600. I have sold some at £840. It all depends on locality and position.
670. As to other places? In Newtown and on North Shore, near the water, I should say it would be about the same as at Randwick.
671. Would you think that the suburban lands in those gullies about Middle Harbour would be worth £600? I said from £5 to £20, and up to £600, according to position, &c.
672. Are you not aware that you might buy plenty of that land at £3 an acre? A good deal of it in the back gullies I would not give £1 per acre for at the present time.
673. In some cases it would require several acres of ground to produce 1s. of taxation? Perhaps so.
674. And that 1s. would be eaten up in the expenses? Yes, it would not be worth collecting.
675. If a ratepayer desired the corporation to point out the land which they rated him for, how would they do it? They are not bound to do it, and would act foolishly in doing so.
676. Supposing they be,—how would you do it? I would not do it at all, as the law does not authorize such a demand.
677. It would take several acres to produce one shilling? In some instances, that is to say on small grants of land in obscure positions, it would be eaten up by clerical labour. It would not pay for printing the papers, writing the notices, and serving them.
678. In that view of the matter would it be practicable to include large areas of worthless land in the country within Municipalities where roads are necessary? Under such circumstances I think that the minimum price should be fixed for land in the far interior, the minimum price of £1 per acre, as mentioned in the Land Act on all lands available for improvement, and exclude from incorporation lands of great extent not capable of improvement.
679. Then it would take twenty acres to give one shilling? Exactly so, under the present Act.
680. If land of that kind were liable to be taxed, it would cost as much to collect it as the tax would be worth; and the people would be put to the expense of paying rates, and yet nothing would be done? Exactly so, under such circumstances as you have described. Supposing there were 50 miles square, and it was all valued at £1 per acre, the revenue would then be very small; but to insure its incorporation there must be some improved lands and houses erected, upon which the rates would be increased. Where those areas were large, something would be produced in the commencement for general purposes over and above the clerical expenditure, and that is one reason why I would extend the areas for country Municipalities.
681. Would not that necessarily imply a larger expense for supervision—how could you look after your works? I think that one paid overseer could look after an extent of 50 square miles, to expend all the funds that it would be possible to raise in any such locality.
682. 7 miles square? Yes, one man could look after that area well, and it would take one overseer to look after half of it.
683. You said that you worked your Municipality in a very cheap way;—could you afford the Committee any information as to the rate per cent. it costs altogether for working it? Do you mean for clerical labour?
684. I mean everything—all the usual expenses that cannot be charged to actual street making? As economically as we act in the working of our Municipality the contingent expenses are too great, but they are unavoidable, as the provisions of the Act must be complied with.
685. Would they amount to less than 20 per cent. on your income? I think so. We give our clerk £25 a year, and the Municipal Chambers to live in, and £10 a year for the work of the road trust; £10 per annum each to the Bailiff and Inspector of Nuisances; that is all we have to pay as salaries, excepting that allowed to the Mayor for the purposes above stated. Then there is the interest on the debt, stationery, advertisements, lights, &c. The advertising costs a good amount of the money, because under the provisions of the Act we are obliged to advertise almost everything; and the expense of advertising in the *Government Gazette* and in the local newspapers is altogether out of proportion to our income.
686. Have you any law expenses? We do our legal matters as far as possible without the assistance of a lawyer. We had to employ a solicitor on one or two occasions, but since we passed our by-laws we generally do our business in collecting from defaulters by warrant from the mayor.
687. I think you stated that it was desirable to place the trust roads in the hands of Municipalities? Yes, when practicable to do so.
688. Do I understand you to say that you would destroy the trusts and leave the roads to the ordinary operation of the Municipalities Act? I would do away with all the road trusts which now exist in suburban Municipalities. I would, as a matter of course, provide for the division and payment of the debts which have been contracted under the old Acts. Wherever a trust road runs through two or more suburban Municipalities, each of those Municipalities ought to take their fair proportion of the debt and the portion of the road within their respective boundaries, providing a proper consideration were received from the Government to pay the debts and enable them to abolish the tolls now established thereon.
689. Would you take from the Municipalities the power of erecting tolls which is given to them by the present law? No, excepting as before stated, because persons who have advanced money to make the roads under those securities would be deprived of the means of repayment, and those roads would fall into disrepair.
690. In that case you might have a toll every mile or so? Not if my suggestions are adopted. If these observations are not approved, some limit must be defined for the erecting and collection of gates and tolls. There should then not be more than one toll payable within a distance of 8 miles, and the proceeds of such toll should be distributed ratably according to the mileage of each Municipality.
691. It seems to be necessary to modify the power in some way such as you speak of? It would be necessary, because there are vested interests at stake. Thus, for instance, a mortgagee has lent us £3,500 upon our road, and we could not destroy his vested rights by removing the toll-bar if we wished to do so. Indeed if the Government passed a Bill to abolish the present tolls, the mortgagees could fairly call upon the Government for compensation.
692. But irrespective of that, would not the power to erect tolls lead to our having a number of tolls in small Municipalities? Exactly; but I would not permit that the Act should be amended to prevent it. I would only allow one toll-gate for payment to be erected every 8 miles; or if there were ten toll-gates erected in that distance one payment should free them all, and the proceeds of the tolls should be divided among

S. H. Pearce,  
Esq., J.P.

- S. H. Pearce, Esq., J.P.  
 10 Oct., 1873.
- among the Municipalities interested in it, according to the length of road belonging to them respectively.
693. You have volunteered a statement with respect to the North Shore. I presume you are acquainted with the locality? I have a good knowledge of that locality for many years.
694. Have you any knowledge of the boundary of East St. Leonards Municipality? I have no knowledge of the boundaries of those Municipalities, excepting having been informed that there are three or four Municipalities in one parish or township which in that small area I think is absurd, as unnecessary expense is thereby incurred.
695. Having regard to the position of the ferry, would you say that it is absolutely necessary that nearly the whole traffic should go through it to and from Sydney? Undoubtedly I should call that road the main thoroughfare.
696. You know the Wesleyan Chapel? Yes.
697. How far would it be from the Wesleyan Chapel to Milson's Point? I think about three-quarters of a mile.
698. You know the corner of Mount and Miller Streets—the cross roads at the School of Arts? Yes, I know that well.
699. How far do you call that? From the Wesleyan Chapel would be, I should think, about a quarter of a mile, which would be about a mile from the ferry.
700. If in that distance there were three toll-bars would it be oppressive to these people? I should certainly think so; they ought to be removed without delay; unless one toll clears the others and the funds ratably divided as aforesaid.
701. I am speaking of the possibility of it? I think it would be absurd that there should be even two tolls or demands in so short a distance.
702. If this Milson's Point Municipality erected a toll and placed the whole side of country under contribution, and refused to contribute anything to the Municipalities outside, would that be oppressive to the rest of the district? It would be a very great oppression, one calling for a remedy at once.
703. In that view of the case, would it not be better to place that road under a trust? I should say it would, unless some alteration in the Municipalities Act could be made forthwith to provide against such oppression. Some amendment is evidently necessary to provide against such extortion as that.
704. With regard to the importance of endowing Municipalities, do you think that it would be desirable to hand over to them publicans' licenses, auctioneers' licenses, and revenue of that kind? Certainly not. I think that would be attended with the most fatal results. Nothing in my opinion would tend to demoralize the country more than that. It would also be unfair, as the revenues of some places would be unimportant in comparison with others. I would not allow Municipalities to interfere with taxation of that kind. Let us go to the Colonial Treasurer and receive our revenue from him, but let the Government collect all the general and direct taxation of the country; and on no account let the Municipalities have power to grant licenses of any sort, which would interfere with the general revenues of the country.
705. You would justify that position on the ground that persons residing in Municipalities contribute to the general Revenue by the consumption of dutiable articles? Exactly so; and that is the basis on which I rest all my calculations in reference to the perpetual endowment of the Municipalities.
706. If the Government make bridges and roads in different districts of the Colony out of the public Revenue, does it not discourage persons from incorporating, seeing that if they incorporated they would have to pay their share to the general Revenue, as before, and then, in addition to that, would have to pay the municipal rates—they would be contributing in common with all the country; and then they would be specially taxed under the municipal system to furnish themselves with roads? With regard to the leading thoroughfares of the Country, I think the Government ought to make all the main bridges, because important structures of that kind are not simply for local benefit but for the use and advantage of the whole Country generally.
707. The splitting up of Municipalities into very small areas encourages petty local feelings, and disinclines the people to undertake improvements for the good of the whole community, such as reserves or wharfs; take the North Shore for example, as that has been mentioned; we all want a wharf—would that be a fair charge upon the whole district which would require to use it? I scarcely comprehend your question.
708. The only outlet from the North Shore to Sydney is by means of a wharf, and that would be a public improvement which would be useful to everybody? I apprehend you refer to the termination of the Main North Road on the North Shore; and seeing that that is the termination of the Great Northern Road, I think that it is a work which ought to be done or assisted specially by Government.
709. We are in a similar position with regard to a reserve? The whole district ought to be one Municipality, and that would put an end to all the bickering which now exists. All those Municipalities should be compelled to unite and make a good and prosperous Borough.
710. Does not subdivision, such as has taken place, tend to intensify local feeling and produce ill will? It does; and it also produces an useless and unprofitable expenditure of money.
711. It produces ill feeling and prevents local improvement? Yes; it is the fault of the Government in permitting any Municipality to be divided unless there is an area to each of them of not less than 8 or 9 square miles. The Government could prevent such proceedings under the present Act.
712. *Mr. Burns.*] I think you are a member of the Conference now sitting with regard to Municipalities? I am not a member of the present Conference, but I was a member of the first Conference. Our Council desired me to attend the present Conference yesterday and give them my ideas with reference to the amendments required in the Act, and I did so.
713. *Mr. Tunks.*] I gather from you that in your opinion comparatively few alterations of the law are required, and that what is most wanted is increased areas and increased endowment? Exactly so. That was my chief argument before the Conference yesterday. I had something to do with the new Act when it was first framed, and have since carefully perused it, and can see but very few things in it which require immediate alteration.
714. A good many difficulties have been determined by the Judges? Yes, and we clearly know how the Act ought to be worked. The areas, the endowment, the increased rate on the fee-simple, and a few other unimportant matters, are all that urgently require alteration. I informed the Conference that I thought they ought to be content to get the endowment, &c., increased, and that any attempt to amend the whole Act would not in all probability be successful or satisfactory. The present Act authorizes us to make by-laws for almost every contingency which may arise. If suitable by-laws are made to meet local wants, and the few amendments now suggested adopted, then the Act, I think, would be almost perfect. I may be permitted,

permitted, however, to say that when I was in Victoria and Queensland I saw their Municipal Acts. I do not remember the particulars of them, but I know their Governments were much more liberal than ours. As far as I remember, in Queensland the Government not only gives a money endowment but also a portion of the revenue derived from the sale of Crown lands within each Municipality.

S. H. Pearce,  
Esq., J.P.  
10 Oct., 1873.

715. When you speak of a town being incorporated with a country district, that is only a difference in terms—there is no practical importance to be attached to the distinction? There is little or no practical difference, but a legal difficulty was made of it at the time referred to by me.

716. But the Judges or the Privy Council determined that? I believe that was in Mr. Berry's case.

717. A country town is sometimes a mere bush settlement? In the first instance that is the case with all Government townships.

718. The town of St. Leonards, for instance, stretches back to Long Bay, Middle Harbour, where the houses are not within a mile of each other? Yes, in some parts of it there is nothing of a town but in name. I saw the ambiguity of the clause to which you have alluded before we incorporated, and accordingly in describing our boundaries I took in a good portion of country, thinking at the time that it would be easier to lessen our area than to increase it.

719. Have you considered the question of determining the boundaries between Municipalities? I would decidedly prefer to employ natural boundaries, if they were conveniently near, such as rivers, creeks, valleys, or main roads, if those boundaries included an area of a suitable size.

720. I refer more particularly to cases in which there is a road between two Municipalities, where the Municipality which incorporates first leaves a road outside its boundary for the Municipality which incorporates next to take up? I would allow the Government to decide cases of that kind by fixing each boundary in the centre of such road or street.

721. Where a road is the boundary of a Municipality would you not let the boundary be in the middle of that road and require each Municipality to contribute towards its maintenance? Yes; there are Municipalities which are so bounded. The 120th and five following clauses of the Municipalities Act provides further for such cases.

722. Has it ever occurred to you that there has been a good deal of selfishness in the subdivision of Municipalities; that a certain number of persons having improved property to deal with have obtained the incorporation of a very small area, and by so acting having excluded a very large area of unimproved land, and when that unimproved land came to be incorporated many miles of roads required to be made, and the income for the purpose was very small? I have heard of such cases, which ought to be at once remedied and prevented in future.

723. Do you know the Borough of Victoria, North Shore, Blue's Estate? I do.

724. It reaches from the Point up to Mount-street—about 150 or 200 acres? Yes.

725. Upon that small area there is about 1,000 or 1,200 persons, and the Council receives about £400 a year from rates, whereas the Municipality at the back of it does not derive more than £400 a year from the area extending to Middle Harbour and the Heads, because most of the land is unimproved? Just so.

726. So that people are encouraged to form small Municipalities with a view to obtain a large municipal revenue? Yes; but that ought to be prevented at once. It is might succeeding against right, the majority forcing the minority to put up with anything but what is fair and equitable, but the redress and prevention is with the Government.

727. Do you see any reason why the inhabitants or ratepayers immediately adjoining the City of Sydney should be treated differently in a matter of this kind from people who live within the City of Sydney? In what way?

728. In the mode of rating? I have some knowledge of the rating of property in Sydney and also under the Municipalities Act. I think that the provisions of the Municipalities Act would do very well indeed with reference to the shilling rate on improved properties if the rate on unimproved properties was raised to 1d. in the £, as suggested; I think it would answer the purpose admirably.

729. The same burden of taxation would be as desirable for one as for the other? Exactly; because we want water, sewerage, and all the other general improvements which the inhabitants of the City of Sydney require. I do not see why taxes should not be levied on all property, excepting Crown Lands, according to the improvements required.

730. Supposing the Government do not see this question of endowment from your point of view, would an increasing the rate to 1s. 6d. in the £ be such a burden as would be too onerous to the ratepayers? It would not be just or equitable on the part of the Government to refuse an increased endowment, for they would then be receiving all that we contributed to the general revenue, and giving us little or nothing in return for local improvements. And the improvements, which would be made at the expense of the respective Councils would have the effect of increasing the value of Crown Lands which remained within the areas of the Municipalities. The localities also would be improved to the advantage of the inhabitants of other parts of the Colony who chose to visit them.

731. Have you ever considered the question of a ferry across the harbour from Sydney to the North Shore? A ferry or a bridge?

732. A ferry? Do you mean by steam-boats?

733. Whether a ferry should be provided by the public? A public ferry would be better than a private one at any time. Such a matter as that ought to be either under the general law which regulates omnibuses, or it should be placed under municipal direction and control.

534. In the event of there being a trust road through those Municipalities, it would be a fit subject to include in the trust? No doubt of it, because it would be part of the great highway connecting one portion of the land with another. It would be similar to a common ferry-boat or punt, which have been established on the rivers of the Colony.

735. Having regard to the size of the district, and the number of people who reside at the North Shore, they ought not to be left at the mercy of a private Company? Certainly not. The owners of the boats might employ them in towing ships out to sea, or in doing other private work, and thereby stop the traffic.

736. As they used to do? Yes; many a time I have had to wait at the old ferry in the sun with my horse for two hours; and sometimes at night I have been obliged to go home without my horse, because the ferry-boat was taken off.

737. That must be a great drawback? Nothing could be a greater drawback to a locality so situated. A

S. H. Pearce,  
Esq., J.P.  
10 Oct., 1873.

ferry such as that from the North Shore to Sydney, and in fact all ferries to connect one point of land with another ought to be in the hands of the public authorities.

738. *Chairman.*] They are in the nature of main thoroughfares? Yes; and they ought to be in the hands of municipal or other public authorities.

739. Do you think it would be beneficial to place the responsibility of the general supervision and regulation of all cemeteries, public-houses, public schools, the care of public reserves, trust roads, and other such matters, upon the Municipal Councils, in lieu of so many persons being appointed local Boards, so as to induce a greater number of person to take an interest in municipal government than now appears to be the case? I think that wherever we can do it without interfering with vested rights it should be done, because I look upon the Municipal Council of every locality as the proper governing body of that portion of the Colony.

740. Similar to what occurs in the United States of America? Yes, they ought to have every public local matter placed under their control, which can properly be referred to them. New cemeteries which require to be established, new schools which require to be founded, and every other thing, excepting as aforesaid, which tends to the public benefit of the locality, I would place under the control of their Municipal Council.

741. *Mr. Burns.*] And with regard to the licensing of public-houses? I would not entrust the Councils with the licensing of public-houses, but would give the ratepayers the power of limiting the number of licensed houses in their respective localities.

742. *Chairman.*] But as to the looking after them? I would give them the supervision of public-houses, and would allow them to employ, when necessary, additional special constables, but not to take the direction of the permanent police from the supervision of the general Government. The Municipal Councils ought to some extent to have the supervision of the police stationed within their limits, so that their by-laws may be observed and the general protection more fully secured.

743. Do you think that if such enlarged powers were given to municipal bodies it would induce more persons to take an interest in municipal affairs, and to offer their services as aldermen? I have no doubt of it. Many men of intelligence and ability would come forward as aldermen in the various Municipalities if the Councils were entrusted with the full power and authority to which you refer.

744. The effect of the appointment of so many Boards in different localities takes away from that authority and respect with which the public would regard one body, and destroys the emulation of citizens? It does. It takes away the dignity of office, and destroys the unity of action, and it also absorbs the funds which might be better expended.

745. Practically speaking, almost every person of any influence has some office of trust at the present time in most localities, and less interest is felt in the offices themselves in consequence? Yes; there is a division of responsibility, and consequently there is but little done for the public good.

746. *Mr. Burns.*] You are in favour of the concentration of all local management in the hands of the Municipal Council? Yes, that is the sum and substance of the matter.

747. Do you think that municipal corporations have been well managed hitherto? Some have, and some have not; the good or bad management depends entirely on the men who are elected as aldermen. I have seen and heard many things of a factitious nature which ought not to have existed, and I believe that it is the want of more power and concentration in the management of local matters that has prevented many men of intelligence and education coming forward as aldermen, and therefore almost any person who thought proper to offer himself as an alderman has been elected to fill the office on which so much depends.

748. It is your opinion that the best men available have not been chosen? It has been generally so, because they would not act under the circumstances.

749. And that has arisen partly from the powers of the Councils not being so extended as they ought to be? Exactly so; because they prefer not to come into collision with the various trusts already in existence.

750. *Chairman.*] Have not similar fracas to those to which you have referred taken place on Boards of local trusts with regard to roads, cemeteries, and other matters;—have not even worse disturbances taken place in such bodies than those which have occurred in Municipal Councils? No doubt such has been the case in many instances, because nearly every commissioner or trustee has his own part of the district which he specially wishes to serve. If one wants a bridge near his house or property, and another wants one near his, the question will be—who shall get it first?

751. You have given us a good deal of information with regard to the North Shore. Are you also acquainted with Redfern, Waterloo, and Alexandria? I am.

752. Do you think that the area of those Municipalities is sufficiently large? Certainly not. I think that Redfern, Alexandria, and Waterloo, should extend south to the shores of Botany Bay, and adjoin our Municipality; our western boundary should be their eastern boundary, the City their northern, and Newtown their western boundaries.

753. Are you also acquainted with South Botany? I am. All that area should be included in the Redfern Borough.

754. Do you know the Glebe, South Sydney, and Camperdown? I do. All that area, including Newtown, ought to be one, and bounded by Redfern.

755. Would you take in Newtown with them? If Newtown is not so included that Municipality ought to be extended to Cook's River, which would include Marrickville.

756. So that you would make these ten Municipalities you have named into three? Yes; three would be better than four.

757. With regard to Paddington, Waverley, and Woollahra? Paddington should be annexed to the City; the others ought to have been one Municipality. Waverley and Woollahra would include a large area, but none too large for the number of inhabitants it is likely to contain, and for economical working there would be an advantage.

758. You think it would conduce to the economical working of these Municipalities if they were amalgamated? I do. I should like to see Paddington joined to Sydney, and Waverley and Woollahra amalgamated.

759. *Mr. Burns.*] You think that the number of these suburban Municipalities could be reduced by two-thirds? I think such a reduction and amalgamation would ensure more economy and efficiency generally.

760. *Chairman.*] These corporate properties must all of them have got Council buildings? They could be sold or leased for the general good.

761. Do you think again that it would not be a benefit to have local Courts? I think so. Randwick has been

been proclaimed a place for holding a Court of Petty Sessions. Since its incorporation I think that sufficient magistrates could be collected at those places to perform the local duties which would be required of them, and it would not be necessary to employ Clerks of Petty Sessions. The police are generally an intelligent body of men, and I have been informed, on good authority, that for the payment of about £10. a year extra an intelligent constable could be stationed at such places as Randwick, Newtown, &c., to take the depositions, and perform the usual clerical work.

S. H. Pearce,  
Esq., J.P.  
10 Oct., 1873.

762. Do you think that the police generally are sufficiently educated to act as Clerks of Petty Sessions? There are a number of men in the present Force who would be able to do all the duties required, and who could, as I have been informed, be stationed in those Municipalities on application. All that would be necessary would be the payment of a small extra salary of £10 or £12 a year to the person so appointed.

763. Are you acquainted with any Municipalities in the interior? I know Yass, Bathurst, Inverell, and Hill End, Goulburn and Newcastle, Wollongong, Parramatta, Richmond, and other places.

764. Take Inverell;—would you be good enough to describe the locality? The locality I look upon as being a most undesirable site for a township. They have laid it out in the old bed of a river, and some day many of the people will, I fear, be drowned, like those were at Gundagai.

765. How are they situated with regard to road metal? I do not know of any metal "reserves," but I saw large quantities of material in the locality.

766. With regard to the town of Yass, have they got good facilities for obtaining road metal? Yes; there is plenty of road metal in the vicinity of Yass.

767. Are there any engineering difficulties connected with the formation of their streets? Very few, when compared with Randwick, or the North Shore.

768. Would you not make a discrimination between some Municipalities and others, having regard to the special natural advantages of each? Having reference to the endowment I would not. I would serve them all alike, because in the country districts the population and the revenue will not be so great as in the suburbs of Sydney. I would give them all the same encouragement by equal endowments, as before stated.

769. Yass is favourably situated? Yes.

770. Do you know their area? I do not; but I think they have a good area.

771. Are the opinions which you have expressed to the Committee generally applicable to the Municipalities throughout the Colony? I think so, from the information I have received in the country, and the practical observations I have made in travelling.

772. You have acquired considerable knowledge with regard to the City of Sydney? Yes, during the last thirty years.

773. Would you allow the Corporation of Sydney to receive the same endowment as other Municipalities? Certainly not. In the first instance they have derived a large endowment, £10,000 a year, from the Government. The waterworks, the wharfs, and the markets, which were built by the Government. A portion of the streets of the City were also formed and made at the time the Corporation took them under their care. The City of Sydney has also but a small area in proportion to its immense population, and the great revenues which it has and will receive. I therefore do not think that it would be fair to endow the City of Sydney in the same ratio as the suburban Municipalities. But I think the Government ought to endow the City more liberally than they do at the present time. They ought to give the City Council every encouragement they possibly could.

774. Considering that Sydney is the capital of the Colony, do you not think that the roads require a larger expenditure in kerbing and guttering, and various ways? Yes; because the traffic is much greater than in the suburbs.

775. There are very few roads or streets in other Municipalities which are kerbed and guttered so expensively? I do not know many of your streets in the main thoroughfares but what are properly kerbed and guttered at the present time.

776. Are you aware how long kerbing and guttering lasts? Not above ten years, with our sandstone. At all events they require repairs about every ten years.

777. You have said that the Government gave over expensive water-works to Sydney? Yes; the Lachlan water-works.

778. Are you aware of the cost of these works previously? No.

779. Do you think that the construction of Busby's bore, the works connected with it, and the laying down of pipes, et cetera, amounted to more than £30,000? It may not have cost more than that sum in those days, because nearly all of it was done by prison labour.

780. Are you aware that the cost of water through that bore is considerable? No doubt of it.

781. Have you formed any opinion as to whether the water brought to the City by gravitation, and that pumped up from Botany, is delivered at the lowest price? I should think that the water which flows into Sydney by gravitation was much less expensive than the water sent into Sydney by the pumps at Botany.

782. Are you aware that some forty or fifty men have to be kept employed during the summer months in clearing out the watercourse before and after rain, in connection with the water that is supplied by gravitation? No doubt expenses have to be incurred in keeping the channel clear.

783. Taking into consideration that there are forty or fifty men employed in keeping the channel clear, would you say that there was much difference in the cost of the water supplied by gravitation and that by pumping? Taking that into consideration, I should think there was very little difference in the cost; but it appears extraordinary that so many men should be so employed for such a purpose.

784. Do you know the area of the City of Sydney? I do not know the exact area.

785. Suppose that the City of Sydney has an area of 2,000 acres, in how much of it are the streets made, kerbed, and guttered? In a great portion of it.

786. Are there streets through an area of 500 acres still to be metalled, kerbed, and guttered? There may be; I might perhaps say that a quarter of its area still remains to be improved.

787. The cost of a cubic yard of metal would be about the same in Sydney and Randwick? I should say it costs you 15s. It costs us about 20s., when laid and completed.

788. You do not pay 5s. for cartage between Sydney and Randwick? I think the cost of cartage is 3s. 9d.; but when broken, laid, rolled, and blinded, it costs nearly 20s. per cubic yard.

TUESDAY, 14 OCTOBER, 1873.

Present:—

MR. BURNS,  
MR. TUNKS,MR. LUCAS,  
MR. WEBB.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Edmund Webb, Esq., M.L.A., examined in his place:—

E. Webb,  
Esq., M.L.A.  
14 Oct., 1873.789. *Chairman.*] You have been mayor of the Municipal Council of Bathurst? I have.

790. And you were for some time an alderman of that Council? Yes, I was an alderman for seven or eight years, and was twice mayor.

791. Do you know the area of that Municipality? I do not know the exact area just now.

792. Does it take in more than the town? Yes, it takes in what is commonly known as the borough; that includes the town proper and a considerable portion of the Bathurst Common. I should say it took in about 3 or 4 square miles, with the Common, though it does not include all the Commonage.

793. Do you mean that it is 3 or 4 miles square, or that it contains 3 or 4 square miles? What I mean is, that the area is about 3 or 4 square miles, to the best of my recollection.

794. In that case it would contain some 2,600 acres? Yes, I believe the area is between 2,000 and 3,000 acres.

795. Do you know what length of streets there are in the borough? There are about 80 miles of streets to maintain in the borough.

796. What is the annual amount of revenue derived from taxation, and without reckoning the Government endowment? In my time it was between £1,500 and £1,600 a year, though I cannot give the exact amount. I see that the return for last year shows the revenue to have been £1,550.

797. These amounts are exclusive of the Government endowment? They are.

798. And what is the amount of the Government endowment at the present time? We receive 5s. in the £; that is this year. The Municipality has been established a little over ten years.

799. From your acquaintance with the Municipality do you think that this amount of annual revenue is sufficient to keep the streets in good condition? No, it certainly is not sufficient. With the amount now received the Council cannot carry on anything like the works necessary for the town.

800. I believe the Bathurst streets are very wide? Yes; they are a chain and a half in width.

801. Are the streets kerbed and guttered? Some portion of them is, but no very great extent. Nothing has been done in the way of kerbing and guttering since the endowment has been decreased.

802. Is all the vacant land in the Municipality taxed? Yes, all the sold portions are taxed, but the unsold portions, which still remain in the hands of the Government, are not.

803. *Mr. Lucas.*] All private property in the borough is subject to taxation? Yes. It is all assessed and of course liable to taxation; but I do not think that it is all taxed—that is, that taxes are paid on the whole of it.

804. That would be from the fault of the aldermen and not from the fault of the Act? Yes, I believe it arises from the fact that influence is brought to bear upon the aldermen, so that though the rate is levied over all property the payment of the rate is not enforced in some cases.

805. Of course if the rate was levied, and the property liable, the non-payment would not be the fault of the Act? To some extent I think it is. I think it would be better if the Act made it imperative on the aldermen to enforce payment of the rates.

806. You complain then that certain properties in the borough are exempt from payment? Not exactly exempt, but that the payment of the rates is not enforced.

807. And that this arises not under the Act but from the favouritism of the aldermen? Yes. There are certain parties who are not compelled to pay their rates, and this necessarily acts very unjustly towards those who pay them regularly.

808. Do you think that you have a sufficient area for the economic working of your Municipality; supposing there were an idea of spreading local Governments throughout the whole Colony, would the area for Bathurst be sufficient? That is rather a comprehensive question. If you ask me simply whether the Municipality of Bathurst is sufficiently extensive to find funds for purposes of local improvement, I should say that I think it is. We have now a very considerable population in the town, and that population is yearly increasing; and I do not think it would be advisable to add on a purely country district to the town, because the interests of the two must necessarily be distinct.

809. But in the event of the adoption of a municipal system, to be applied to the whole Colony, do you think that the area of your Municipality would be too small? Not in so far as Bathurst is concerned. Neither do I think that it would be well to amalgamate the towns with the country districts in one Municipality, since the two must have different and to some extent conflicting interests. Localities should only be joined together in one Municipality where their interests are identical.

810. With what is the Municipality of Bathurst endowed besides money? We have had some portions of land given to us by the Government. There were two and a quarter acres conveyed to us as a market reserve; an acre for a Town Hall site; and about two and a half acres for a hay-market.

811. Are these available for the purpose of revenue? The two market sites are.

812. Can you say what amount of revenue is derived from them? The Municipal Council of Bathurst borrowed between £3,000 and £4,000 for the purpose of erecting a market on the market ground; the Council have to pay interest on that money and the rent and market dues cover that interest, and leave, I am under the impression, something between £100 and £150 a year towards liquidating the debt. At the same time I am unable to speak positively as to the amount.

813. Then the Council has no land which it could let out separately on building or other leases, by which to derive a revenue? None. And I may say that the Municipal Council applied to the Government for permission to let out some of the frontage of the market ground on building leases, but the proposal was objected to by the Government, or by the person to whom the application was made, and the permission was refused. The answer was virtually this: The ground has been granted to the Corporation for the purposes of a market, and we will not allow it to be used for anything else.

814.

814. Is not Bathurst very favourably situated as regards road material—metal for the streets? Yes, E. Webb, Esq., M.L.A. moderately so. We have no stone suitable for kerbing and guttering, but we have plenty of blue metal. This is procurable at about 7s. 6d. per cubic yard, broken, and laid on the streets.
815. That would not include spreading? Yes. I think that for 7s. 6d. the cubic yard we could get it 14 Oct., 1873. quarried, carted, broken, and spread. We have also abundance of gravel.
816. There are no great difficulties in the way of making and forming your streets? No. There is a creek runs through the town that entails some expense.
817. But there are no engineering difficulties? No, only in so far as we require to make bridges over this creek at various points.
818. Looking at all the work required to be done in the town, what amount would the corporation require to be endowed with in order to carry out these requisite works in a proper manner? We should require an endowment of pound for pound on all the money raised from local taxation.
819. Is the town favourably situated as regards water supply? No. We can get water by sinking for it, and wells are principally used for water; and the Macquarie runs round by the edge of the town.
820. Do you know the present amount of the indebtedness of the Bathurst Council? I cannot say positively, but I think it is between £3,000 and £4,000.
821. *Chairman.*] Have you any idea of what are the office expenses of the Municipality? I do not know the exact amount, but I believe it is very heavy. I will not be certain, but I am under the impression that the office expenses are something like 5s. 4d. in the pound.
822. *Mr. Lucas.*] Do you mean that the machinery for carrying on the corporation costs at the rate of 6s. 4d. in the pound? Something like that. I will not be certain as to the amounts, but it is between 5s. 4d. and 6s. 4d., to the best of my recollection, on the amount of rates collected. This, of course, includes the salary of the Town Clerk and surveyor, the cost of assessment, rent of buildings—in fact, the machinery altogether. I am aware that the corporation has borrowed more money than it ought to have done, and the interest which has to be paid, with these office expenses, has greatly reduced the amount in hand for improvements. I wish it, however, to be distinctly understood, that the expenses are between 5s. 4d. and 6s. 4d. in the pound on the rates collected.
823. And not including the Government endowment? No. That is excluded.
824. Have you given any consideration to the question of how the revenue of the Bathurst Town Council could be increased so as to meet the demands on it for improvements? That is rather a difficult matter to deal with, and I am not prepared just now to give an opinion on it.
825. Do you think that all trade licenses should be handed over to the corporation? That would depend entirely upon circumstances. I have thought a good deal over that question, and I do not think it would act well in regard to some Municipalities, though it might in so far as Bathurst is concerned; but as we have to make laws applicable to all Municipalities, and not to that of Bathurst alone, I do not think in that respect that it would be desirable.
826. Taking, for instance, the publicans' licenses, do you think, in the event of the House coming to the determination to hand over to each Municipality the amount received in each for publicans' licenses, that it would be advisable to continue the present system of licensing, or would you give the power of deciding upon the propriety of granting licenses to a Board to be appointed for the purpose? I think it would be very objectionable to give them these licenses, as it would lead to the multiplication of hotels and public-houses to a greater extent than at present; and we know that now a license is never refused if the house is found to be suitable.
827. What I mean to ask is: Supposing it be decided that the Municipalities should have these publicans' licenses would you have them granted as they are granted at present, or would you place the power in the hands of a Board, composed of men not interested in the corporation? They who grant the licenses now are not interested in the corporation.
828. That is not an answer to my question, which referred to the mode of granting, if the licenses were given to the corporation? I believe that to be a good argument, however, against any change, that the men who grant the licenses now are not interested in the corporation.
829. What I was asking you was, whether, in the event of the publicans' licenses being handed over to the different Municipalities, you would think it desirable that the present system of licensing should be altered, so that instead of the licenses being granted by the Magistrates this should be done by a Board, or by Commissioners? I do not think you could do better than to leave it in the hands of the Magistrates. They would undoubtedly deal satisfactorily with the matter if only they had sufficient power given them by law to resist applications which they considered should not be granted.
830. Have they not that power now? No; for if a publican is refused his license by a Bench of Magistrates he can apply again within a certain number of days—30 or 40 days—I forget exactly how long, but I know it is a very short period. Then, in the mean time, he goes round and gets his friends to go round for him, and solicits the votes of Magistrates in his favour, and induces them to come and take their seats on the Bench on the day in question. When the day arrives he has his friends on the Bench, and if there is a more numerous attendance than there was on the first day he gets his license. Now, I consider this to be a great evil, and power should be given to put a stop to it.
831. How would you remedy this? I would provide that where a license was refused the application should not be again entertained until the following year. It is disgraceful to see the decision of the Bench on one day overruled by the decision of the same Bench on another day.
832. In the case you mention, however, it can hardly be considered as the same Bench? It is the same Bench, unmistakably, only the applicant gets other Magistrates to come and attend; and I regard it as a very objectionable thing to get one set of Magistrates to come on to the Bench specially to upset what another set has done.
833. Then I take it from your remarks that you have no idea of any means by which the revenues of the corporation can be increased, except by increasing the amount of rate levied? Unless by an increased endowment.
834. So that the revenues can be increased only, either by an increased endowment, or an increased rate on property? Yes. I see no great objection to an increased rate, especially as property receives the benefit of it.
835. I think you have said that the revenues derivable from the market exceed the amount the corporation have to pay for interest on the amount borrowed for the erection of the market buildings? Yes; I am under the impression that such is the case.

- E. Webb,  
Esq., M.L.A.  
14 Oct., 1873.
836. Are you aware of what the Council does with the surplus? I cannot say that anything is specially done with it.
837. Do they expend it in the improvements of the town, or what do they do with it? I really do not know; but I am aware that the Council have had some trouble over the collection of the market dues. Some parties resisted the payment and put the Council to some trouble.
838. Was that in consequence of some informality? Yes, in consequence of a supposed informality. Some of the parties contested the matter with the corporation, but the question has since been decided in favour of the borough.
839. The decision was that the Council had power to collect the rates? Yes, full power. They collect these dues, and also a gas-rate, but this is levied only on a portion of the town; what portion that is I am not in a position to state exactly.
840. *Mr. Tunks.*] That is under a recent enactment that you have this power? No, under the Municipalities Act.
841. Was there not a short Act passed just at the close of last Session, giving powers to the Borough Councils which they did not possess under the Municipalities Act? I think the rates were levied under the Municipalities Act. I fancy the Act you refer to was one to enable the proprietor of the gas works to lay mains through the streets of Bathurst.
842. No. There was a short Act passed to remedy an inconvenience which had been experienced at Paddington? They have never had any trouble over the gas-rate in Bathurst that I am aware of; the trouble I alluded to occurred over the collection of market dues.
843. *Mr. Lucas.*] There is a Bill now before Parliament to establish cattle sale yards in Bathurst;—do you think the passing of that Bill will increase the revenues of the City? Very little.
844. *Mr. Tunks.*] If it increased the revenue of the town of Bathurst would it not be certain to prevent a similar income being derived by other Municipalities in the neighbourhood, through the whole of the sales being made in Bathurst? Yes; if there were any other Municipalities.
845. However, if there were any, this Bill would give all the revenue to Bathurst? Very probably it would, for the sales would all be made in Bathurst.
846. But does it not do so under any circumstances, whether the cattle are sold within the boundaries of the Municipality or not? No; as the Bill now stands, the tolls are collected only on such cattle as are sold within the boundaries of the borough. The House struck out that provision which gave power to collect the toll on sales within 10 miles of the boundary.
847. Has your Municipality borrowed to the full extent of the powers given to it under the Act? I think not.
848. What did you say the revenue of the borough is? I was under the impression that it was over £2,000 now, but I see by the return on the Table that it is £1,550 from rates.
849. Do you think it is expedient to allow these corporations to have the power to borrow money to the extent that is legalized? I do not think the Municipalities should have power to borrow money for other than permanent or reproductive works—they should be allowed to borrow only for the permanent improvements of the borough.
850. Have you in your experience discovered any tendency in those in office to borrow for works that suited their convenience at the time, and to care very little for those who might come after them? Yes, I believe that to be very often the case. It was so in the instance of the Bathurst Market in particular. Such a building was certainly not required, and it would never have been built had it not been for one or two persons who desired to have the money spent whilst they were in office. When I say never, I mean it would not have been built then nor yet for many years to come. At present it is next to useless. There is a large building, much too large for the requirements of the town, and only two or three stalls occupied.
851. This contracting of a heavy debt for an unremunerative purpose is very unfair to those who come into the Council afterwards, and find the revenue hampered with the payment of interest? It is, and it is also unjust to the public, who are taxed to pay the interest. In this very case of the Bathurst Market there is a large building which cost between £3,000 and £4,000, and which is literally useless for every purpose. It is not occupied, for the one or two or three stalls that are let cannot be called occupation, and the whole thing has been a mischievous mistake.
852. Do you think that house property in Bathurst yields such a return in the shape of rent as would justify an increase of the town rate from 1/- in the £? I believe that if the rates were reserved entirely for what they were intended for—and that is for the benefit of property, the rents derivable from that property would be increased to a considerable extent, and thus landlords would be in a better position to pay a small increase of rate.
853. Have you taken notice whether the effect of making roads, and so securing convenient means of transit, has had the effect of diminishing the cost of living, by reducing the price of articles brought into the towns? I do not know that this has been the effect, but I know that the houses in those parts of the town where the roads have been made good, bring higher rents than those in localities where the roads are not made. If you have good roads and well cared for footpaths the houses naturally bring a higher rent in proportion to the improvements made.
854. But has not the making of roads had the effect of increasing the quantity of supplies brought into the town from the country? No, I think not.
855. Then the ratepayers do not benefit by the outlay on the streets? No, only in convenience, but the owners of property do benefit materially.
856. And more especially those who you say pay nothing? Yes, they would benefit as well as the others.
857. But would they not benefit to a greater degree than the others, seeing that they get the same advantage without paying the same contribution? Yes. In that way they would of course benefit to a larger extent.
858. Did I understand you to say that property in Bathurst would stand a higher rate than is now paid? Property-holders as a rule all object to taxation.
859. What I mean is this: The cost of the land and the building is so much, and you are supposed to get a certain amount of interest on the outlay;—do the rents paid in Bathurst give a fair return on the outlay? I do not consider it would be a good investment to build in Bathurst. I do not consider house property there to be a good investment.
860. Then any increase of the rate would come hard upon the property-holder? Yes, unless as I say, the
- 861.

rates were specially devoted to the improvement of property—that is to works calculated to improve property. If that were done, property would increase in value, especially if our population increases as it is now doing steadily.

E. Webb,  
Esq., M.L.A.  
14 Oct., 1873.

861. One would depend upon the other—the rate upon the rental,—whether the population increases or not? It would.

862. You say that the office expenses are at the rate of 25 per cent. of the amount of rate collected? They are more than that. By the return, the office expenses are £451 4s. 8d., whilst the revenue proper from rates and taxes is £1,550; that would make them up to very nearly 30 per cent.

863. These allotments, which you have mentioned as belonging to the Bathurst Municipality, are, with the exception of the Market site, an expense to the Council instead of a source of revenue—the Town Hall site for instance? That is no expense, but they are about to put up a building on it in which to hold the meetings of the Council, instead of paying rent. They have to pay a very heavy rent now for their Council Chambers.

864. I believe you have had some difficulty in Bathurst over the election of the mayor? We have.

865. Can you suggest anything by which that difficulty may be remedied in future? I think there was a Bill introduced into the Assembly for that purpose, but my own opinion is that in a case of that sort it would be much better to decide the election by lot. That would settle the matter at once, and without trouble.

866. But if the number of aldermen on each side is equal how would the drawing of lots alter the matter? That is precisely the case in which the election should be decided by the candidates drawing lots. Where the numbers are equal and nobody is entitled to give a casting vote, that is the only way of settling the question.

867. I believe that is the case now, where there is a retiring alderman and there is an equality of votes the question is decided by lot? No; in the case of an equality of votes the election is decided by the casting vote of the returning officer, but I should not desire that the returning officer should have a casting vote for the election of a mayor.

868. I am not alluding to an election, but to the case of a retiring alderman;—when an alderman has to retire, and two aldermen have been elected by an equal number of votes, they have to draw lots for who shall retire? Yes, I am under the impression that it is so.

869. And you would approve of that principle being applied to the election of a mayor in cases of an equality of votes? I would.

870. This could be determined under the direction of the Council clerk or of some other person? Yes; or, what would be better, scrutineers could be appointed by the Council, and the matter be conducted under the supervision of two aldermen. I think the Council ought to have the matter entirely in their own hands, without the interference of the Council clerk or any other person.

871. But the Council could do that of themselves now if they thought proper? Yes, under the Act they can elect the mayor by any mode they like.

872. Why could it not be done then without an amendment of the law? Because the numbers being equal there would be the same difficulty in getting a majority to vote for this mode of proceeding as to decide in the election.

873. So you think it should be made imperative in cases of an equality of votes? I do; but I would have the matter to be conducted by the body of the Council, and would not advocate any plan which would have the effect of putting the Council clerk, even temporarily, over the aldermen, as such a thing would be certain to lead to his assuming in the Council a position he was not entitled to.

874. So that you agree in the propriety of settling the question by lot, but have not come to a conclusion as to how the drawing should be conducted? No. I believe it would be much better to let the Council decide this.

875. And then you come back to the old difficulty;—suppose the numbers to be equal—three on one side and three on the other, and each side determined to have its own way—you would never get them to decide, even as to the mode of drawing the lot? To meet that difficulty it would perhaps be better to define in the Act how the drawing was to be conducted.

876. *Mr. Lucas.*] Then, where the numbers were equal, you would not allow the Council clerk to have the casting vote? Most certainly not. I think it would be most objectionable to give him a voice in Municipal matters in any way.

877. But he might prepare the papers to be put in the balloting-box to be drawn by the parties? He might do that, because it would be a duty he was performing under the law; he would not be interfering with or taking a part in the election, but would be only doing a duty assigned to him.

878. From your experience of the working of the present Municipal Act, are you of opinion that other amendments are required in it besides those you have already alluded to? I am.

879. Will you be good enough to mention them? In the first place, I think that the provisions for the nomination of aldermen are far too stringent; so that it frequently follows that unless all the provisions are acted upon strictly the election is vitiated. These provisions are so numerous that, even though there may be only person nominated as alderman for a ward, the mayor is not safe in taking the nomination as valid, and in declaring the person to be duly elected; neither is the person himself safe in taking his seat and voting in the Council, even when the mayor has declared him elected.

880. In what way does this arise? There is a provision in the Act that persons nominating a candidate shall send in his christian and surnames in full, together with his occupation, address, and qualification, as also the christian and surnames, residence, occupation, and qualification of the persons nominating. All this involves an amount of detail anything but favourable to the validity of an election. For instance, if a person is nominated, and his occupation is omitted or is wrongly given, the returning officer refuses to accept it; or suppose he should overlook it, and receive the nomination, then this person, if he should be elected and should take his seat, would be liable not only to be ejected from the Council, but also to heavy costs and fines for having unauthorisedly taken part in the Council's proceedings.

881. *Mr. Tunks.*] Have not the Judges already determined this matter? Merely upon one point, I believe, and that was that it was not necessary to write the name in full.

882. And in regard to the occupation? No, I do not think they have.

883. If so there would be no necessity to go into the matter? I think there would be, for the Act says distinctly that certain information shall be given.

E. Webb,  
Esq., M.L.A.  
14 Oct., 1873.

884. But do you think it would be expedient to alter the law, when the Judges have given decisions upon it, and it has been found quite practicable to work the Act under those decisions? Well, perhaps not, where this has been done. Where cases have been decided by the Supreme Court it would perhaps be better to act under those decisions.

885. That is, as the Act is found to work under the decisions? Yes.

886. *Mr. Lucas.*] Is there anything else requiring amendment? There is the matter of the exemption from taxation, which I spoke of before. The practice is very objectionable, and is very unfair to the rate-payers who pay their rates regularly. There is every reason why it should not be allowed; and to prevent it there should be a stringent provision compelling the aldermen to collect all rates.

887. Are you aware whether the aldermen are under the impression that the rates are collected? I know that they are not collected, and that whether aware or not there is no power to compel the aldermen to collect them.

888. *Mr. Tunks.*] But would it not vitiate the whole proceeding if the rate was manifestly unfair, and if one party was rated whilst another was not? There is nothing unfair in the levy of the rate. It is levied upon all alike, but the complaint is that the aldermen do not collect it in certain cases, and that there is no clause in the Act to compel them to do so; the non-collection of the rate in these instances does not operate to vitiate the rate in so far as others are concerned.

889. Do you know whether that point has been decided in any way by the Supreme Court? I do not think it has. I believe there is no clause to compel them to collect the rates in all cases; but it is quite clear that they ought to serve all persons alike. Then again, with regard to the system of auditing the municipal accounts, I think this is very faulty. The auditors ought to go through all the books and papers, and make a close examination to see that all the money charged has been paid. As the auditing is done now, the auditors merely go through a balance-sheet, setting out that so much has been received and so much paid; they add this up to see that it is correct, and then sign it without going through the books and papers to see that the works and payments have been authorized. Besides this there ought, every half-year, to be a list made up, showing what rates were in arrear, and giving a full description of the properties rated, the locality where situated, and the names of the owners.

890. Would not that increase the amount of clerical labour, for which you are already paying so dearly? Only very little. The writing up of these arrears would entail only a very small amount of clerical work. As it is, they ought to be written up and seen to.

891. With regard to the auditors, do you know whether the course you mention is that pursued in any great number of the Municipalities? I believe it is very general.

892. What—that the books are refused to the auditors? I do not say that the books are refused but that the auditors do not generally see them; in fact, that they will not take the trouble and content themselves with the balance-sheet.

893. Then in Bathurst the books and papers are not placed before the auditors? I do not say even that; but that the auditors do not look at them. Speaking from my own experience when I was mayor, not only were all the books and papers produced, but I insisted upon the auditors going through them to verify the accounts; and I know also beyond this that some of the auditors have gone very carefully through the books and the accounts; whilst I am equally aware that some have not done so. What I more especially complain of is, that we cannot get the auditors to pay sufficient attention to the accounts.

894. Is there any improvement of any consequence in the streets of Bathurst since that town has been incorporated. Were the streets in a good condition before the borough was incorporated? No; they were in a perfectly shameful state. There were several large creeks running through the streets of the town, and some of these places were not safe to travel even in the day-time.

895. And since the incorporation have they improved upon this state of things? Yes, there have been improvements made in most of the streets.

896. Then, on the whole, municipal action has done good? Yes; it has unquestionably done a great deal for the town. A good deal of work has been done, notwithstanding the cost it has entailed, and also some mistakes have been made, as was to be expected.

897. May not these mistakes have occurred from the want of knowledge on the part of those entrusted with the work of the business placed in their hands? Yes, from want of experience. Some of them, no doubt, occurred in that way.

898. And many of those defects which existed in the early days of municipal government are now being cured as the people become educated to the work before them? Yes, certainly.

899. What is about the population of Bathurst within the municipal area? When the census was taken it was about 5,000, I think.

900. And what number of aldermen have you? We have a Council of nine, though we are entitled to twelve, for now that I think of it, our population is considerably more than 5,000; it is close upon 6,000.

901. Are there any other amendments of the law that you would recommend? I have been out of the Council some time, and I have not paid much attention to municipal matters since I left it; but I know that there were many things came under my notice when I was an alderman, which I thought would have been all the better for being amended. One thing that struck me was the mode of executing the work; and I think that in town it would be as well if it were made compulsory to let all the works by public tender. When public money is being handled there is sure to be a good deal of jobbery in small towns, through the aldermen giving work to their personal friends.

902. You think that contract work is more valuable than day work? I do. Contracts should be taken for all works that can be let in that way.

903. Would not the value of day labour very much depend upon the efficient supervision of the work? No doubt, but I am not favourable to its adoption where it can be avoided.

904. But suppose that you have a small Municipality, with a revenue of £400 a year from rates and £100 a year from endowment, do you think that out of that the borough could afford to pay for the plans and specifications which are necessary in all cases where works are let by contract? I think that in cases of that kind the mayor and aldermen might do it.

905. Prepare plans and specifications? Yes; nothing very complicated would be required.

906. And I suppose you do not think it possible to have jobbery under the contract system? Yes; it is quite possible to have jobbery under a contract, but it is certainly not so much open to it as the day labour system.

907. But with proper supervision of day labour? Of course if you look after day labour yourself that will make a difference, and a very great difference; but you cannot trust servants to look after your own day labourers, and you can trust them still less in the case of a Municipality. 908.

908. I suppose you are aware that to have efficient control over contractors you must be provided with plans and specifications, and that it is expensive to get these drawn up properly? Yes; but when the streets are all properly formed and made, and nothing is required but metalling or repairs, surely there could be no difficulty in preparing a specification for that, seeing that all that would be required would be the street, its size and measurement, where the metal was to be spread, and the depth to which it was to be spread, and then to get a tender at so much per cubic yard.

909. And that would secure the performance of the work without jobbery;—I suppose you think there could not be jobbery if this were done? The only way in which the Council could be robbed would be in the measurement of the metal, and in the seeing that the metal was broken to a proper size. No doubt they could manage to rob the Corporation by not breaking the stone to a sufficiently small gauge; but as regards the measurement of the metal very little trouble would prevent any loss in this respect. There is another matter which I would wish to allude to. I think that the system of allowing Municipal areas to be subdivided and to be made into a number of small Municipalities is very objectionable and a great mistake. My own impression is that the area of Bathurst is quite small enough for one Municipality.

910. Where there is a certain number of persons collected together on improved lands, where, as in a town, the people are thick on the soil, have only a small area to look after, and have considerable rates to provide a revenue, none of which advantages are to be got in the districts outside that area, how would you manage to make roads at all in the country districts if you confined your town Municipalities to those areas where the population is congregated? As in Bathurst?

911. Yes? Well, there are not nearly so many roads to be made and maintained outside the boundary of the town as within it. There are only just a few main lines of road, and there are no streets intersecting each other at intervals as in the town. It is this which gives the greater measurement of streets or roads to the towns than to the country.

912. But how would you manage in regard to these? I would incorporate them into rural districts. Not in the same way as the towns, but more by way of improving the roads of the district.

913. And where would you get your revenue from? From land and house property by assessment, the same as in the towns. As far as Bathurst is concerned, the land around it is all sold, and in the hands of private persons, so would be all liable to be rated.

914. Is it built upon? No, except here and there; but it is nearly all enclosed and improved.

915. Some of it unimproved? Yes.

916. But you say you do not rate unimproved lands in Bathurst? Yes. They rate all lands whether improved or not. They do not rate Government land, but all alienated land is assessed, and rated on that assessment.

917. I understood you to say that rates were not collected on certain properties? What I referred to was the not collecting rates from properties on which they were legally due—that notwithstanding that they are rated, there are a great number of properties which never pay the rate, and I complain that the aldermen do not cause them to be collected.

918. These properties include houses as well as land? They do.

919. And do those who pay the rates stand that kind of thing? They do stand it, for they have no remedy.

920. *Mr. Burns.*] Do you think it would be desirable to give the power of licensing public-houses to the corporation? I do not think such a thing would be desirable.

921. What are your objections to the corporation having that power? I presume that in asking that question you assume that the corporation is to have the money derived from the licenses.

922. I do? In that case if they were trusted to grant the licenses they would grant as many as they could in order to get the revenue from them. Then again, there would be some localities, the rural districts for instance, where there would be no public-houses, or perhaps very few indeed. These localities would receive nothing from this source, whilst the towns would derive a very considerable revenue from it.

923. *Mr. Lucas.*] Do you know any Municipality in which there is no public-house? I have heard of one at the North Shore.

924. *Mr. Burns.*] But that is only an exceptional case? No doubt; but then the rural districts would never have more than two or three or four public-houses at the outside in their boundaries, unless you made them very extensive, more extensive than would be desirable. In this way it might be that the aggregate amount raised by rates in a rural district might be very large, yet in spite of this and a large area, the endowment from these publicans' licenses would be very small where it would require to be large. On the other hand, in the towns where the rates turn in a large revenue they would also receive a large endowment of some £1,200 or £1,500 a year from this source. Thus, whilst the rural districts would have to pay ratable same as the people of the towns, they would receive a very much smaller endowment, and in this I conceive the inequality to exist.

925. But as a matter of public policy, do you think that such a thing would be wise? I do not think it would be good policy in a public point of view, nor do I think it would be desirable in itself.

926. *Chairman.*] Are you of opinion that it would be a wise policy to give to the different Municipalities the responsibility of looking after Trust roads, public cemeteries, and other cognate matters which are now intrusted to the hands of a number of private individuals, and that such a responsibility would induce a larger number of persons than at present to take an interest in Municipal government? Not under the present Municipalities Act; I certainly should not think it desirable.

927. If that Act were amended do you not think it would be better to concentrate all these matters into the hands of the Municipal bodies? No. I think it would be very much better to keep all these honorary offices separate from the business of the Municipality. By doing this you naturally induce a larger number of persons to take an interest in these matters than you would do by confining them to the management of a close public body.

928. The main road through the Town of Bathurst is part of the Main Western Road of the Colony? It is.

929. And the Government keeps that in order? They are supposed to do so; but the Town Council made it metalled not only through the town but also for a mile across the flat. The Government, however, have now taken it in hand.

E. Webb,  
Esq., M.L.A.  
14 Oct., 1878.

Mr. Henry Hudson called in and examined:—

- Mr. H. Hudson. 930. *Chairman.*] You know the nature and object of the inquiry upon which the Committee are now engaged? I do.
- 14 Oct., 1873. 931. How long have you been an alderman of the Redfern Municipality? In February next I shall have been in the Council six years.
932. You are now mayor of that Borough? I am.
933. How long have you held that position? This is my second year of office as mayor.
934. Do you know the area of the Redfern Municipality? I could not give it you correctly—about three quarters of a mile according to plan.
935. Is it a mile square? Yes, it is quite that.
936. Can you give us the number of miles of streets you have to maintain? About 9 miles.
937. What is the present amount of indebtedness of the Borough? Only £2,000.
938. What was it incurred for? £1,500 were borrowed to build the Municipal Council Chambers, and £700 for the improvement of the streets.
939. What revenue do you derive from your Council Chambers? It does not average more than £50 a year.
940. And what is your revenue from rates? About £2,200.
941. And the endowment from the Government? Just one-fourth of that.
942. Are all the streets in the Borough metalled? No, not all of them—about 4 miles metalled.
943. Is the half of them metalled? No, not quite the half of them.
944. Your main road through the Borough is kept in order by a Road Trust,—is it not? No.
945. But they contribute towards its maintenance? Yes. We halve the length of road through the Municipality. We keep up one-half, and the Trust keeps up the other.
946. Do you find the ordinary revenue of the Borough sufficient to maintain in order the streets you have already made, and to make other streets in the Municipality as they are required? No, certainly not enough. There are streets now that we are most anxious to make if we only had the money to spend on them.
947. What period of endowment is your Borough now in? In the last. We get 25 per cent. on the amount of revenue raised in the Borough.
948. Suppose that there was a proposal that you should be permanently endowed by the Government, what amount would you require annually to enable you to conduct the work of the Borough in an efficient manner? I believe, from looking at the rate of progress we have made in the different stages of the endowment that if we had an endowment of one-half of what we raised from our own taxation, we should be able to keep the streets of the Borough in a proper state of repair; but in mentioning this I am not of course taking into account the sewerage and other matters which will have to be attended to.
949. When you say one-half, do you mean that the Government should give you £ for £ on what you raise by taxation? It would take all that if we were to undertake a system of sewerage and other matters that require to be undertaken by the Council.
950. How long has your Borough been incorporated? Fourteen years past.
951. You have a large amount of vacant lands within the boundaries of your Borough? Yes, there are large portions of the Redfern and other estates that are unbuilt upon.
952. They are assessed as vacant lands? They are.
953. Do you think that the Council get sufficient revenue from them—as much as they are entitled to pay? No. I do not think they contribute to the revenues of the Borough in fair proportion to other property.
954. What do you think they ought to contribute? That I am not prepared to say, as it is now merely a nominal revenue that we get from them. The assessors value them as unoccupied land, and we only get a rate based on that.
955. *Mr. Lucas.*] You get the value of the land, then you take 5 per cent. of that value as the yearly rental, and on that you levy your rate? That is how I think it ought to be.
956. But that is according to the Act? That may be so, but we have to go by the valuation of our assessors.
957. The Act prescribes what the assessors shall do, and that is, to take the value of the land, then to take 5 per cent. of that value as the yearly rental? That is no doubt according to the Act, but our assessors will not do that, but they go by the actual rental. They say,—“Here is land worth £500, and we take 5 per cent., or £25 for the yearly rental; but the owner appeals, goes to the Quarter Sessions, and says,—‘I am only getting £5 a year rental for this property,’”—and the Justices will not allow him to be rated at more than that.
958. *Mr. Burns.*] So that the rate is made upon the actual rent, and not upon a per centage of the value? Yes, that is exactly the position of the case.
959. *Chairman.*] Is the area of your Borough sufficiently large to allow of its economic working? I think it could be more economically worked if the area were larger. Our present staff would be quite sufficient for working a Municipality of twice our area.
960. If Redfern, Alexandria, and Waterloo were put together into one Municipality, do you think the area would be too large for its economic working? I do not. I think that those three Municipalities could be well managed with the staff which we at present employ for the Redfern Municipality alone.
961. *Mr. Lucas.*] Did not Redfern and Waterloo at one time form one Municipality? They did.
962. The people of Waterloo petitioned, and were divided? They did.
963. *Chairman.*] Have you now had an opportunity of ascertaining how long kerbing and guttering is likely to last? Yes; I think generally it lasts about fourteen years. We have some that was laid down when the Municipality was first established, and it is in very good repair now; and there is some again that we have had to remove. If the best Pymont stone be used I think you may safely reckon upon its lasting fourteen years.
964. Are you aware of what is the cost of a cubic yard of metal delivered in your Borough? The carting will bring it up to about 10s. 6d. per yard. This is the lowest cost for 25 cubic feet, being 3 feet less than a cubic yard.
965. Then the charge for spreading? That would not be more than 2s. at the outside. The charge is 6s. a yard for the unbroken stone; then there are 2s. up to 3s. a yard for breaking, and 1s. 6d. for drawing, or 10s. 6d. in all.

966. In your experience has the system of the cumulative vote acted satisfactorily in your Borough? Yes, I believe so. Mr.  
H. Hudson.
967. Have you any acquaintance with the Municipality of Sydney? I have.
968. And from what you know of it do you think that the system of the cumulative vote should be extended to Sydney? Yes, I think it should. 14 Oct., 1873.
969. So as to give the votes in the City of Sydney on the same principle as in the Municipalities? Yes. I have no doubt but that by so doing the value of property will be much better represented.
970. I believe that in the Municipalities it is only the ratepayer who votes? Yes; the rates may be paid by the owner of the property, but this is usually done in the tenant's name; not always; the landlords, as a general rule, pay all rates in their own name.
971. And you think that to enable them to carry on properly, the Municipalities would require an endowment equal to the amount received by them from taxation? I do; that is, if it is intended that the work of the Councils should embrace all that they were originally intended to perform.
972. I believe you now levy a rate for gas? We shall do so next year. We have entered into a contract with the Gas Company at the price of 3d. in the £ on our assessment.
973. You are supplied with water from the City? We are.
974. At the usual rate of 5s. per room? Yes.
975. Do you think that an equitable way of raising a water-rate? I believe it is not. It is very unequal in its operation.
976. If the charge were made on the assessment in the same way as the City or improvement rate, would that be more equitable than the present system? Yes. I certainly think it would be more equitable than charging by the room.
977. *Mr. Tunks.*] And would not the best way of all be to charge for the quantity of water consumed on each premises? No doubt that would be the best of all plans, for people would pay only for what they used; and it would also operate as a very great check upon waste. I use the water by meter on my establishment.
978. *Chairman.*] The present system of paying for the water is by the room? Yes.
979. But you think that is not so equitable as would be a payment by assessment? That is my opinion.
980. Then if the Borough were assessed for water the same as for the City rate could not one set of officers collect the rates instead of two? I can see no objection to it. It would certainly be a saving of labour.
981. And of expense also? Yes, I think so.
982. But of all you think that the payment by meter would be preferable? I do, certainly.
983. Are you aware that a large quantity of water is now allowed to run to waste? Yes. Of my own knowledge I know there must be a large quantity.
984. Is the corporation of Redfern satisfied with the supply of water it now receives? Yes. We have had no reason to complain of the supply during the last two years. Before that it was very irregular and uncertain.
985. But now you get an ample supply? Yes. But two years ago where I live I had to make all sorts of arrangements to get water sufficient for my purposes, and had to keep my engine at work to raise it, in order to secure enough for the next day, as there was no certainty about having it from one day to the other.
986. You use a great deal of water, I believe? I do.
987. What do you pay the City Council for water? Not much, because I have a very large tank which holds between 20,000 and 30,000 gallons, and that keeps me pretty well supplied. However, I have a meter attached to the boiler of my engine, and when I have not water enough of my own in the tank I use that of the City Council.
988. What would be the daily cost of water to you, supposing you had not a tank of your own? I should say it would be about 16s. a day.
989. Then at the present rate you would have to pay that to the Corporation, supposing you had no supply of your own? Just so. That is, when my machinery is in full work.
990. *Mr. Tunks.*] In what way do you account for the improved condition of the water supply to your Municipality during the last two years? I have no way of accounting for it, except from what I have read in the papers, that the amount of storage for water has been increased, and that there is consequently a better supply in the reservoirs.
991. There are the Municipalities of Darlington, Waterloo, Redfern, Alexandria, and Newtown;—could not these five be well worked together under one Municipality? I think if Redfern, Waterloo, Alexandria, and Darlington were put together they would form a sufficiently large area for working in one Municipality.
992. *Chairman.*] Would you not extend them to the Bay? No. They would have plenty large enough area without that. The Botany and Cook's River Municipalities could be incorporated into one, and they would take in all to the Bay, and would have an identical interest.
993. *Mr. Tunks.*] Then Newtown, Marrickville, and St. Peter's might very well be joined together? Yes, with great advantage; and these could also absorb the Boroughs of Cook and Camperdown.
994. Many of the Municipalities might be joined together in this way? Yes. As a rule I think that of the suburban Municipalities four might be merged into one with great advantage.
995. Suppose the Parliament should come to the conclusion to make these amalgamations, would it, in your opinion, be desirable that provision should be made in the Act that the revenue raised in the different wards of the Municipality should be expended in that ward in which it is raised? Yes. I should certainly desire to see some provision of that sort.
996. Has not the jealousy that has existed from the idea, whether right or wrong, that one ward has absorbed the rates raised in another, been the cause of nearly all the severance in Municipalities that have taken place? It has, certainly.
997. And has not that been the great cause of complaint in the working of the Municipal system? It has.
998. And would not this cause of complaint be done away with if provision were made that the rates raised in each ward should, after deducting that ward's share of the general expenses, be spent upon the ward in which they are raised? Yes, of course. But then you could not act rigidly up to that rule, for you might have a ward in which a large revenue would be raised, sufficient to put all the streets in perfect order within a few years; whilst at the same time you might have an unproductive ward, with streets  
urgently

Mr.  
H. Hudson.  
14 Oct., 1873.

urgently requiring to be made, but with a revenue so small that you would not be able to raise money enough for the work in any number of years. In that case I think that the revenue of the productive ward might well be applied to make the streets of the unproductive ward.

999. On the contrary, do you not think it would be better to wait till you could raise the money from the ward than to create dissatisfaction by spending on it the money raised in another ward? I do not know that. The dissatisfaction is sure to exist under any circumstances, for you would have to encounter that of the persons who required to have their street made.

1000. *Mr. Tunks.*] This could be met by treating the expenditure as an advance made to the ward, to be settled up in time from the rates raised in it? That may be; but I contend that in a Municipality you cannot act rigidly up to a rule. You may have one portion of a Borough with the property all centralized and thickly populated. From this you would naturally get a large revenue, and the streets would consequently very soon be in good repair, so that it would require only a nominal cost to keep them up. In this way you would have this locality producing a large revenue, and not requiring the money to be spent upon it. In that case I say it would be perfectly right to take a portion of that money which is not required, and to spend it upon an unproductive locality which does not yield revenue enough for its own purposes, and yet might imperatively require that money should be laid out on it. If you acted up to the strict rule of spending on each ward what was collected on that ward you would soon find that you would be lavishing money on places where it was not required, whilst you would be leaving untouched places that were urgently in need of improvements.

1001. Taking your view of the case, and supposing it to be carried out, would not people be dissatisfied at the prospect of their rates being expended in another ward? Judging from past experience it is not at all unlikely that such would be the case, but if the people of any particular ward had their streets in good order and their footpaths in good repair, they certainly would have nothing to grumble at if some portion of their surplus funds was taken to provide the same advantages for their neighbours.

1002. However they do grumble? Yes; and I have generally found that the greatest grumblers are those who want things done for them, but who have not the money to do it with.

1003. *Mr. Lucas.*] But do you not think it would be a fair objection for men to say that they declined to have more money raised in the ward than could be fairly expended in the immediate neighbourhood of where it is raised for? There certainly might be some force in such an objection.

1004. Then, in that case, would it not be better to reduce the rates in those wards in which the streets and footpaths had been put in complete order, and in which only little annual expenditure would be required? I should not recommend that course under any circumstances.

1005. Why should the rates not be reduced when everything has been put in perfect order? Because I consider it to be the duty of one ward that has had all its work performed to assist another ward in which work is required to be done.

1006. You know the Darlington Municipality? I do.

1007. I believe the Newtown Road Trustees maintain the main road of that Borough? Yes.

1008. So that its Council has very little to do in maintaining its streets? Yes, very little.

1009. They have only about 2 miles of streets to maintain? I should not think that they exceeded that length.

1010. And who makes them? It is done at the cost of the ratepayers as I suppose.

1011. And that is all they have to do? That is all.

1012. *Mr. Tunks.*] A measure which made it compulsory on the Councils to spend all the money raised in a ward upon that ward in which it was raised would be unfair towards those localities which might be improving, but which, from the Municipality having been long in existence, would not be receiving any endowment, whilst the older localities would have had heavy endowments spent on them, and by that means have been put in an efficient state? That is exactly the position of the case. It would be manifestly unfair, because the older locality would have been improved by means of the endowment, and the rising places which required expenditure would have no endowment; and yet you would be compelled to spend the money where it was not required.

1013. You have in every Municipality certain compact places thickly built upon which have received the endowment from the first, whilst there are other places only now growing into importance which will receive no endowment? Yes, exactly.

1014. So you think it only fair that those places which have received the advantage of the full endowment should now give some assistance to those other localities which have not had that advantage? I think so. Those streets which have been made and are now in good order have been made so by the endowment. It is only the expenditure of the endowment on them that has put them in this effective state. In such cases the rising localities have a right to look for assistance to those who have had their turn served.

1015. Still, as a general rule, you would expend the money in the ward in which it is raised? Yes, as far as possible, provided the money has not to be spent needlessly. I may say that in the Redfern Borough we keep a separate account for each ward.

1016. Do you find any difficulty in working under the present Municipalities Act? No. We might get a worse one.

1017. You think it requires very little alteration? Yes, very little. There is one thing however that I should like to see altered, and that is, that the various offices of the Government do not show that courtesy and good will towards the Municipal Councils which they might do. There is one instance, in which we applied twelve months ago for the alignment of the streets of the Borough. We had no reply to this application for some months, but at last we were informed from the proper office that a person had been employed and instructed to do the work on receiving certain information from us that was required. This information was at once furnished to the office by our Council clerk, but there the matter rested for a long time, and nothing was done until two months ago, when the matter was again brought up in our Council, and the clerk was directed to send another letter to the Government. This was done, and in reply to that we got a note from the Government, stating that another gentleman had been appointed to do the work. After that we got another letter from another branch of the Lands Office, informing us that Mr. Tindal, a licensed surveyor, would survey the required streets for us at a charge of one guinea a tracing of whatever size. When we got this I went at once to the Lands Office with it, and saw Mr. Stephen. He said he would look into the matter, and the other day we got a kind of Ministerial intimation that each person in the office was entitled to be paid for doing anything which was not official work.

1018.

1018. But this information that was to be furnished to you was public property? Yes. It was in the Land's Department, and one of the parties in that department says that he will furnish it to us, if we want it, at the rate of a guinea a tracing.

1019. *Mr. Webb.*] Has this taken place in regard to other Municipalities? I am not aware. We have usually had to wait a very considerable time for anything we wanted to have done, but we have never before been subjected to extortion.

1020. Is this delay general in the Government Departments? No. It is mainly experienced in the Survey Department.

1021. *Chairman.*] Can you always recover the rates levied on vacant lands? Yes, when we can find the owner; and that brings me to another thing that I would like to suggest to the Committee. We have in our Borough a few properties for which we cannot find the owners. It has occurred to me that something might be done to secure the rates to the corporation by inserting a clause in any amended Act to enable Municipalities to lease, for a term of years, properties for which no owners can be found, so as to provide means for paying the rates. If the owner turned up, he would of course have to abide by the act of the Council during the currency of the lease. Before dealing with the land the Council should be bound to advertise it for a certain time, and then if the owner did not come forward he would have to take the consequences for the term of the lease.

1022. Are you aware of any place where that custom prevails? I believe that there is something of that kind in force in the United States.

1023. I presume you mean that the land should be let for the shortest term of years for which it would be likely you could get a tenant? Yes; it might be leased for three years, at a rental sufficient to cover the rates. The Municipality would naturally not trouble itself to do more than to get its rates.

1024. And at the end of the term you would allow the lessee to remove any improvements, or permit the owner to take them at a valuation? That is a matter of detail that could be agreed upon.

1025. Is there any other matter to which you would like to draw the attention of the Committee? With regard to the working of the present Municipalities Act, I think that the present Act could be administered very well if we only had the decision of the Supreme Court upon a few ambiguous points in it. This could be done by a friendly suit at very little expense.

1026. Do you find that your aldermen attend pretty punctually? Yes, very well indeed.

1027. That is as far as the Redfern Council is concerned? Yes.

1028. Can you speak as to the others? No, I cannot.

1029. And the Committees—do you find the aldermen attend them? No; as a rule they did not, until we divided the work amongst the aldermen. There are the finance and the improvement committees, and we divided the Council between the two. When we did that we found it work very well indeed.

1030. With regard to the finance—all the expenditure comes before the general body of the Council before payment is authorized? Yes; it comes first before the finance committee, and by that committee is reported to the Council.

1031. How much is the mayor allowed to spend without previous reference to the Council? Up to £10, and no more. If we get an alderman from each ward we can go to £30, that is, £10 for each ward. That is when anything particularly urgent is required we can expend £10 from each ward without first consulting the Council.

1032. *Mr. Webb.*] How often do you assess the property in your Municipality? Once a year.

1033. Do you think it necessary that the property should be assessed every year? I do not.

1034. Then you regard the cost of assessment as an unnecessary expense? I do.

1035. Do you think that the Councils possess sufficient power in the present system of assessing improved properties? I do; because sometimes we have been fortunate enough to secure the services, as assessors, of men who are much better qualified for the work than those to whom it is generally given, and then we find the great advantage to the revenue of the Borough. At other times we have found with other assessors that though there has been a great increase in the property of the Borough we have had our rates less than they were in the preceding year.

1036. And how often do you think it would be advisable to have a general assessment? Not oftener than once in three years.

1037. So that you think the provision in the present Act for making an assessment on the property of the Municipality every year is objectionable? I do.

1038. And that it is an unnecessary expense? Not only that it is an unnecessary expense, but also that it sometimes leads to a loss of revenue.

1039. *Chairman.*] Are you satisfied with the Justices as an Appeal Court in the matter of assessments? Yes.

TUESDAY, 21 OCTOBER, 1873.

Present:—

MR. BURNS, | MR. TEECE,  
MR. TUNKS.

JOHN MACINTOSH, Esq., IN THE CHAIR.

Mr. Frederic Ropier Robinson called in and examined:—

1040. *Chairman.*] You understand the nature and objects of the inquiry entrusted to this Committee? Yes. I saw them stated in the circular I received.

1041. You have been for a long time a resident of Balmain? Yes, for eight or nine years.

1042. You have also been a member of the Municipal Council there? Yes, for six years.

1043. You have been mayor I believe? Yes, I was mayor for one year, and an alderman for five years.

1044. Are you now an alderman of the Borough? No, I am not now in the Council. I went out the year before—in February, 1872.

Mr.  
H. Hudson.

14 Oct., 1873.

Mr. F. R.  
Robinson.

21 Oct., 1873.

- Mr. F. R. Robinson.  
21 Oct., 1873.
1045. I believe you have given a very considerable amount of attention to the working of your Municipal Council? Yes. From my position in the Council I naturally took a very considerable amount of interest in the Borough, and gave my attention specially to the working of the Municipal system and to the best mode of carrying out the Act properly.
1046. Can you inform us what is the present amount of the revenue of your Borough? Last year the revenue was £1,809. In 1860 it was only £994.
1047. Does the amount you have mentioned include the Government endowment? No, only the amount actually received from rates. The endowment last year was £465, being one-fourth of the amount raised by ourselves. I may however explain, with regard to the small amount received in 1860, that was the first year in which rates were collected, being the year when the Municipality was started. I apprehend that the reason why only £994 were collected was, that being new at the work some of the properties escaped notice, and all the rates were not collected for that year, so that the income stands at a very small amount. I am borne out in this from the fact that during the next year no less than £1,777 were received, being nearly double the receipts of the previous, and the endowment was to the same amount.
1048. You were in the Council in 1870? I was.
1049. I see by the Statistical Register that for that year the revenue was £2,397, whilst you received £659 from the Government, making together £3,056, whilst your office expenses for that year were £1,224 6s. 8d.;— is that correct? Yes. I apprehend that the particulars would be furnished by the Municipal authorities, and would therefore be correct; at the same time I scarcely fancy the office expenses would come up to that large sum. I know that in 1873 the office expenses did not exceed £400; and for the year 1872-3—that is up to February, 1873—over £2,000 were spent in the Borough upon public works.
1050. Can you inform us how many miles of street in your Borough have been formed and laid with kerbing and guttering since the establishment of your Municipality? We reckon that we have about 15 miles of fairly formed streets, that is, formed and completed in such a way as to be perfectly finished for use, and that of these we have about 8 miles kerbed and guttered.
1051. That would be about half the streets that you have made that are kerbed and guttered? Yes, we have rather more than half kerbed and guttered, and laid with blue metal; those streets which are most in use are laid with blue metal, whilst in the others, where there is not much traffic, we use the white metal—a kind of hard sand-stone, and covered with iron-stone gravel on top—very well for light traffic, and easily obtainable since we get it in the Borough.
1052. Is your Council proceeding with the formation and metalling of new streets? No. It has taken nearly all the funds they could get to keep in proper repair the streets which have been already made.
1053. So that their work has been confined entirely to the streets already formed? Almost; there was one new street formed last year, and rather a long one too, at an expense of between £200 and £300; but all the money is wanted for keeping the old streets in order, and finishing them.
1054. Your Municipality is now in its last quinquennial period of endowment? It is.
1055. From Balmain being so favourably situated in regard to road metal, having good white metal within its own boundaries, are you of opinion that the Council will be able to go on with the formation of new streets, as well as with the maintenance of the old ones, from the rate of 1s. in the £ raised from the people of the Borough? From what I have seen during the last year, as well as from my experience of our position when I was in the Council, I am of opinion that it will be a very difficult matter to do so; for, though you speak of the facilities we have for getting road material, yet, owing to the peculiar conformation of the Municipality, being all hills and hollows, and of considerable gradients, the road metal washes away very quickly, and every storm shower is a heavy expense to the Municipality. From this cause the streets of Balmain entail a much larger expenditure than would be the case were they more level. Looking at all this, my impression is, that if left to our own resources we shall not be able to make new roads so fast as our population will require them; and, in fact, I know that even now the Council has been obliged, from the want of sufficient funds at its disposal, to refuse to form some new streets in the western portion of the Borough, much required.
1056. So that the inconvenience of heavy gradients in your streets counterbalances any advantages you may have by the possession of road metal on the spot? Yes, to a very great extent.
1057. The rate you levy is 1s. in the £? Yes.
1058. That is the improvement rate? Yes.
1059. Have you any other rate than that? No, no other.
1060. What revenue do you derive from unoccupied lands in your Borough? Not much. The rate imposed is only very small in amount, and when levied upon the small annual value at which these lands are assessed, produces only a very small sum indeed.
1061. The rate received on unoccupied land is only 1-400th of its capital value? I am not prepared to say what is the proportion, but I know it is very small indeed. The allotments surveyed are assessed at such an annual value that all we get from them is only some two shillings or three shillings each year.
1062. So that the rates received from unoccupied lands are insufficient to provide the funds for the roads which abut on them? They help but very little towards it; but I suppose that this is a dilemma shared by Balmain with other suburban Municipalities. The vacant lands are so lightly assessed that they provide very little funds towards the making of streets.
1063. Are you of opinion that the rates in this respect should be increased? My opinion is that the revenue of the Municipality generally should be increased, and as one means of doing this I think the endowment might very fairly be extended.
1064. To what amount and for what term would you extend it? I have thought very earnestly over this matter for some time, but I am scarcely yet prepared to give you any very definite plan. My opinion in the first instance was that there should be a fixed endowment of £ for £ on the actual receipts of the Borough; but I soon began to feel that there were many very serious objections to such a proposal as that, since it certainly would not do to ask the Government to give us so large an endowment as that, to be continued possibly for all time. Then I came to the idea that such an endowment should be made for a certain specified term. Then in coming to the term I again experienced a difficulty as to how long it should be.
1065. If it were continued for twenty years do you think that would be sufficient? I would make it longer than that. I would double the present term of fifteen years, and give the endowment for thirty years, in the same way that it is now given, but doubling the terms. In this way the £ for £ endowment

endowment should be given for ten years instead of five; the 50 per cent. for ten years instead of five, and the 25 per cent. endowment the same, thus making the endowment spread over thirty years instead of fifteen years.

1066. Have you found the present mode of assessment to be a correct one? I agree with the provisions of the Act for obtaining the valuation of property to be assessed and the manner of regulating the assessment. My principal objection is to its frequency; it should only be made once in three years. That would be quite sufficient for all practical purposes, and a great deal of expense would be saved yearly to the Borough, whilst no injury could accrue.

1067. Giving the Municipality power to assess any new property that might become liable to assessment in the meantime? Certainly; and also in the same way the Municipal roll, which now has to be made out every year, should be extended, so as to be in force for three years, giving power to ratepayers to come in and have their names enrolled. This would save a great expense for clerical work and printing, which now has to be incurred every year. Then getting out this compilation yearly causes an amount of office work that is very considerable for a time,—so much so as to throw into arrears the ordinary work of the Borough, and to necessitate the employment of extra clerical assistance to fetch up the work. I have thought very much over this matter, and have regarded it from every point of view, and I cannot see that it would be any disadvantage to the ratepayer any more than it would be for the Municipality, for provision could be made for a new ratepayer to have his name inserted on the roll, and also for any ratepayer to register any removal he might make from one ward or street to another.

1068. Has the Balmain Council given any attention to the question of water supply? Yes. This is a matter that has never been lost sight of. During the whole six years that I was in the Council we had the question of water supply continually before us; and whilst I was in office as mayor I did all in my power to obtain a supply of water for Balmain. There were deputations waited on the City Council, and applications were made in various ways to that body to give a water supply to Balmain, but hitherto everything has been without effect. When I understood that the water was to be brought from the City to the Abattoirs I was in hopes that then at last we should gain our object, and I applied to the City Council to extend the main from the Abattoirs into our Borough. The application, however, was useless, for the water was never brought to the Island. If we could only get the water brought into our suburbs we would be satisfied.

1069. Are you not in a situation to obtain a supply of water for yourselves, independently of the Sydney water? No; we have no means of obtaining a supply for ourselves. Our only dependence now is upon tanks and wells.

1070. In the event of your Council receiving an endowment of £ for £, would that body be prepared to carry out sewerage works? I am not an advocate for underground sewerage in any Municipality, and believe that any sewerage that should be constructed, except in special cases, should be surface drainage only, and therefore comparatively inexpensive.

1071. I believe you have given a great deal of attention to the subject of dry-earth closets? I have.

1072. Can you give us any information in respect to them? I produce a circular (*document produced*) which I caused to be distributed amongst the ratepayers of Balmain, in which all the information I am possessed of is contained. I may say that I have always heard them very highly spoken of by those who have used them, and that there are the occupiers of very nearly 300 houses in Balmain now using them.

1073. I see this document is dated 1869;—has this system of earth-closets been worked since then? Yes; and has been steadily increasing ever since, until now the number of householders using them amounts very nearly to 300.

1074. And have you found that the system has generally given satisfaction? Yes, I believe so. The chief difficulty in the way of getting it into general use is to be found in the fact, that people cannot be induced to leave the old style of closets they have been used to, and go to a new plan.

1075. With regard to the area of the Balmain Municipality, do you think it is sufficiently large for the economic working of the Municipality, keeping in view the idea of extending municipal government throughout the whole Colony? With respect to its local position, I think that Balmain is quite large enough for its proper and efficient working; at the same time I do not think it should be made any smaller. I have a very decided opinion that small Municipalities are very great evils, and calculated to do anything but good; and as far as Balmain is concerned, looking at the way in which it is situated, I think it a very good and proper size, and certainly should not be smaller.

1076. I see by the Statistical Register that the Municipal area contains 30 miles of streets? Yes; I dare say it does. I was under the impression that the length of streets was some 27 or 28 miles, but I daresay that 30 miles are nearer the mark, as there are probably some streets which I have overlooked.

1077. Can you inform the Committee what is about the superficial area? I should say from 500 to 600 acres, but I cannot speak positively as to the exact quantity.

1078. You have the cumulative vote in Balmain? We have.

1079. Have you found it work well? Yes, very well.

1080. You are also a resident of Sydney? I am.

1081. And have been so for many years? Yes.

1082. Do you think it would be advantageous if this system of the cumulative vote were applied to the Municipality of Sydney? I do most certainly; I am so much an advocate for it that it is my opinion that in every Municipality where property is necessarily required to be represented this system of the cumulative vote should be in existence.

1083. For how many years have you been a resident of Sydney? For thirty-five years and upwards.

1084. As you think it would be beneficial, as far as Balmain is concerned, to endow that Borough with £ for £ on the money they raise amongst themselves by taxation, are you also of opinion that it would be but equitable if the same principle were applied to the City of Sydney, considering that the streets of the City have to be kept in first-rate order, that there is an immense traffic on them, continually cutting them up—that the kerbing and guttering have to be of a superior description—and that the improvements generally have to be of a more expensive character? I must confess that I have not given the subject that amount of consideration as regards the City that I have bestowed on it with respect to the Suburban Municipalities; but my impression, speaking from the spur of the moment, is, that it certainly would appear to be only equitable and reasonable that the same endowment should be given to Sydney as is given to the suburban Municipalities, and for these reasons: That the people of Sydney are equally large consumers

Mr. F. R.  
Robinson.

21 Oct., 1873.

Mr. F. R.  
Robinson.  
21 Oct., 1873.

sumers of dutiable articles with the people of the suburbs; that they pay the same to the general revenues of the Government as is paid by other parts of the Colony; and that, as they are thus called upon to pay taxes to the general Government, they are entitled to the same consideration and to the same financial assistance as are the suburban bodies.

1085. Besides this, the people of Sydney, from their position as residents in a large City, are compelled to take an interest in all great social questions, and thus become contributors to charities, hospitals, and matters of a kindred nature? Yes. It no doubt becomes the duty of a citizen of Sydney to do more for the assistance of institutions of that kind than is required from a resident of a suburban or country district, because in the City there is necessarily a large accumulation of people, and the citizens have these social matters more especially brought under their immediate notice, such, as you very properly observe, with regard to charities.

1086. The Government give no assistance towards any of the roads in your Municipality whatever? No. There was a road surveyed and marked out through land taken up by Government, which led through our Municipality to some places beyond—Five Dock and other places; and for the formation of that street the money was paid by the Government in the first instance.

1087. Have you a Town Hall? Not one of our own. We rent a building, which we use as a Council Chamber.

1088. What is now the amount of your indebtedness? When I first went into the Council our debt was about £4,100, and when I left it was about £1,600. From the time of my going into the Council my attention had been particularly directed to this debt of the Borough, and all my efforts were turned to the means of reducing it. By my exertions a rule was adopted by which the debt would have been gradually liquidated, by paying off annually a certain proportion of the amount. By keeping to this rule we brought the debt down to £1,600 whilst I was in the Council, and had the rule been continued that amount would have now been still further reduced. But since I left the Council this rule was left off, and nothing further was paid off our indebtedness. Had the rule been continued, the Municipality would have been out of debt, or nearly so, by the time our endowment ceased. That indeed had been the object I was desirous of securing, so that when the endowment ceased we should have no debt, and consequently no interest to pay, so that the whole of the rates would have been available for the purposes of improvements.

1089. When and for what was the debt incurred? It was incurred during the first three or four years of the establishment of the Municipalities, for the formation of the streets. The work was very heavy and very expensive during that time.

1090. Has the Municipality of Balmain the supervision of public schools and cemeteries within its boundaries? No, they are not in the hands of the Council.

1091. These matters are all entrusted to the care of Trustees? Yes.

1092. Are you of opinion that it would be better to entrust all such matters as these to the Municipal Council, so as to induce a larger number of persons to take an interest in Municipal government? Yes, I think it would have that effect if all such institutions were given over to the control of the Council. I have always thought that the Act should have given a wider range of power, and consequently a greater amount of responsibility to the Municipal bodies.

1093. So that you would give to the Municipal Councils the supervision of public schools, the management of public cemeteries, the looking after public-houses (not to license them, but to see to their good conduct), the control of all road trusts, and the suppression of all nuisances? They have the suppression of nuisances now to look after.

1094. But still you consider it would be beneficial to the interests of local self-government that all these matters should be placed under the direction of the local Councils? I think the responsibility of the Municipal bodies should be increased as much as possible, so as to give the members weight and to lead to a respect for the office on the part of the ratepayers. I would do this as far as possible, in order that it should be a matter of necessity that the best men should be selected to come in and take the position of aldermen.

1095. Are there any other matters to which you would like to allude? Yes, there is one little matter that I would like to see altered, and that is in respect to the polling-places. I have seen in my experience a great deal of mischief arise from the having more than one polling-place in a ward; and there was one instance in which the having two polling-places led to double voting and to other illegal practices. I would therefore seriously press upon the Committee that in the event of their recommending any amended Municipal Act, they would take care that a provision should be inserted, making it imperative on the Municipalities to have no more than one polling-place for each ward, and only in the ward. I would also suggest, for the purpose of preventing this double and other improper voting, that the ratepayer on paying his rate should be compelled to take out a voting-ticket, to be presented by him to the returning officer when he tenders his vote,—no vote to be receivable unless accompanied with this voting-ticket. Then I have already suggested that the valuation should be only taken once in three years, and that the Municipal Roll of ratepayers should also be made up at the same time. If these suggestions were carried out of course the voting-tickets would only be issued once in three years; but a provision could be made by which the ticket could be renewed whenever the voter might remove from one ward to another, or from one part of a ward to another, so that his removal might not be made a disqualification. In all such cases the voters should be allowed to register again, as well as in any other case where from accidental circumstances he might be deprived of a vote. There is also another matter, which I have no doubt has already come under the notice of the Committee, and that is with respect to the casting vote in the election of a mayor, when it may happen that the aldermen are in equal numbers on both sides. In such a case I would recommend that the matter should be decided by lot, as in the case of aldermen who have been elected by an equal number of votes. There is another matter on which I should like to offer a suggestion: Under the wording of the Municipalities Act it is very clearly laid down that it is the payer of the rate, and he alone, who should have the vote for the Borough. All through this is very clearly implied by the Act. Now, under the Municipal rules, all those persons who are liable for the Municipal rates have to be entered on the roll of ratepayers, and thus there are often three individuals entered on the roll as being able to vote for the one property, because they are liable for the rates—the owner, the leaseholder, and the occupier. Each of these is now placed on the roll, and is of course liable to vote, and in consequence of this, when there happens to be two polling-places for one ward, the whole of the three will sometimes manage to record their votes. To remedy this I would suggest that in company with the voting-ticket, the party tendering

tendering his vote should also produce his receipt for the last rates paid by him. This would cause no difficulty, as the voter could very easily bring it with him, to prove to the returning officer that he was the person entitled to the vote. The returning officer also could initial it so as to prevent its being used a second time. At the present time it is not possible for the returning officer to decide who is the right party to vote, and it thus often happens that more than one vote is given for the same property.

1096. *Mr. Burns.*] You say that these Municipalities should, in your opinion, get an increased endowment, extending, as I understand you, to £ for £ of what they raise themselves;—for how many years would you desire this to be continued? That is a question which, as I have already said, I am hardly prepared to answer. However, I would rather say just now that the present duration should be doubled, and that for ten years instead of five years they should receive an equal amount of endowment to their rates; then the half-rate endowment should extend for ten years instead of five; and then the quarter-rate endowment should be extended in the same way. This would just double the duration of the present endowment.

1097. You think then that, generally speaking, to extend the endowment to twice its present duration would give you ample revenue for extending the works, and for generally carrying on the business of the Municipality? I do; for my experience goes to show that it is the first twelve or fifteen years' work that causes the most outlay in a Municipality, seeing that everything has to be done at a time when the Borough is least able to bear the burden, whereas, at the end of thirty years, a Municipality should be able, by the increase in it of property and population, to pay for everything, except waterworks or sewerage on an extensive scale, that then might require to be done. If I did not advocate that, then I certainly should fix some definite term at which the £ for £ endowment should cease.

1098. For how long—for twenty years? I am not prepared to say that I would extend it for that term only.

1099. Are you of opinion that one-third of the rates raised in the Municipality, if given as a permanent endowment, would be sufficient? No, I do not think it would be sufficient. I do not think that with the present one-fourth endowment, continued for any length of time, the Council would be in a position to carry on the necessary works required in the Borough, and a one-third endowment would be but little better.

1100. I suppose you have observed that most of the Corporations are in debt? Yes, that is mainly what I allude to when I speak of their inability to carry on the works.

1101. Do you think as a general rule that the Corporations have been well managed? Yes, I think they have. Speaking for our own Municipality of Balmain, I am quite satisfied that it has been so. I may say too that for the first eleven years no better men could have been found in Balmain than they who were elected as aldermen.

1102. And did your Corporation involve itself in debt for works which were carried out for the advantage of the Municipality? Certainly they were, and in saying this I speak from my own knowledge. I am aware also that a great deal of care and consideration was given to the subject of expenditure, and afterwards with a view to the adoption of a plan by which the Municipality should be got gradually out of debt. As I before said, the plan was followed out for several years, until we had reduced our debt to some £1,600; but this was only done at the cost of omitting many necessary improvements which might have been made with the money that went to decrease the indebtedness. I thought it better, however, to make this sacrifice then, as I foresaw that our position would be a very bad one if, when our term of endowment ceased, our revenue should remain charged with the interest payable on a heavy debt. It was for this reason that I used all possible exertions so that the Municipality should start as clear as possible by the time that the endowment ceased.

1103. Would you be in favour of the Corporation having power to license public-houses and getting the revenue receivable from them? Yes, I am quite in favour of such a proposal, and I can see no reason why it should not be adopted.

1104. Have you any idea that such a plan, if adopted, would be likely to lead to the establishment of more public-houses than would be required, as the Corporations would grant licenses indiscriminately in order to get revenue? I do not think there would be more liability to it under such a plan than there is under the present system.

1105. However, I suppose you will say that getting a sum direct from the General Revenue is open to less abuse, and liable to less objection? Yes, I believe so. Of course in speaking of public-houses I look upon them solely as a source of revenue, not but what preferable sources of revenue to this might be found.

1106. Have you any public reserves in your Municipality? None.

1107. Have you no recreation ground, or anything of that kind? No, none at all. We applied some time ago for some land at the head of the Bay for this purpose, but could not get it. When I was mayor I headed a deputation to the Secretary for Lands to ask the Government to give us some land at the head of White Bay as a place of public recreation. It is now a mere mass of mud and slush, but we offered to fill it in and improve it if it were given over to us; but there were obstacles in the way, and the Government could not grant us the land.

1108. What were the obstacles? They were the purchasers of land at the head of the Bay who claimed the right of water-frontage.

1099. What means of providing a water supply have you in Balmain? No public means. We are entirely dependent for water upon what each private individual catches and stores for himself by means of tanks and wells. I have always held that with care and prudence every person ought to be able to save enough water from his house to supply him with all the water required for the consumption of his family, and in such places as Balmain I would go so far as to make it imperative on every person building a house to provide a tank proportioned to the size of the house, and of course to the number of persons calculated to occupy it. I think that such a provision as this should be equally imperative in a Building Act, as the making up of a parapet-wall to prevent fires, or anything of that kind. My experience has proved to me that sufficient water falls during the year for the consumption of a family, if only means for storing it be provided. I have found it to be the case as regards my own residence, though perhaps I may have some advantage over other persons by having a very large area connected with my premises. Speaking generally, however, I should say that every house ought to be quite capable of saving water enough for the supply of its inhabitants. I may say also, in connection with water, that I would make cess-pits illegal

- Mr. F. R. Robinson.  
21 Oct., 1873.
- in any Municipality. A cess-pit does more injury to the water and to the atmosphere, and is more detrimental to public health than a pig-stye, and yet whilst you allow the cess-pit you will not permit the other to be maintained within a certain distance of a public street, under a heavy penalty.
1110. *Chairman.*] Will you be good enough to inform the Committee what proportion the office expenses, including salaries, and the interest on your Corporation debt, bear to the amount of revenue received last year? The revenue for the year ending 1873 was as follows:—Rates, £1,809 10s. 9d.; miscellaneous revenue, £250 5s. 8d.; endowment, £510 16s. 5d.; total, £2,570 12s. 10d. Salaries for year ending February, 1873, £290 3s. 4d.; interest on Corporation debt, £93. The salaries being a little more than 11 per cent. upon the revenue, and the interest a little more than 3½ per cent. ditto. Our council clerk is a surveyor able to prepare plans, &c., for the Survey Department for the proclamation of streets, and all working plans and specifications for the making of streets. This, of course, involves professional knowledge, which effects the salaries; the survey and preparation of plans for the proclamation of many new streets were made by a licensed surveyor, the cost of which would swell the item of "office expenses" for those years.

Mr. Robert Banks called in and examined:—

- Mr. R. Banks.  
21 Oct., 1873.
1111. *Chairman.*] You are council clerk to the Newtown Municipal Council? I am.
1112. For how many years have you held that office? For seven years.
1113. And in that capacity I presume you have acquired considerable knowledge of the working of the Municipal Council of Newtown? I have.
1114. Can you inform the Committee what is the superficial area of the Municipal District of Newtown? About 1¼ square mile.
1115. And what is the length of streets you have to maintain? About 16 miles.
1116. Can you tell us the number of miles of street that you have formed, metalled, kerbed, and guttered? We have 10½ miles formed and metalled, but it is not all kerbed and guttered.
1117. The road through your main street is not under the charge of your Municipality? No; it is under a Road Trust.
1118. So that the street which bears the greatest traffic in your Borough is maintained by a Road Trust? Yes.
1119. Have you found that to be an advantage? Of course, a great advantage. Having this main road maintained by a Trust instead of being kept up by the Council, we have been able to expend a larger amount in kerbing and guttering than we should otherwise have done, as, but for the Trust, we should have had to expend that money on our main road.
1120. What was the amount of revenue collected in the Borough during the past year? The amount collected was £1,231 19s.
1121. And the endowment? The amount received from the Government last year was £1,077, but that included a grant of £300 for a special purpose.
1122. What was this special purpose? It was towards the purchase of property for the widening of the Enmore Road.
1123. Then what was the amount of the ordinary endowment? It was £777 11s. 1d.
1124. Do you think, from the favorable position in which Newtown is placed, from its advantageous site, its main road kept up by a Trust, its contiguity to the Railway, and other circumstances, that if your present endowment were continued permanently you would have a revenue sufficient for the maintenance of the streets already formed, and for the formation of other streets as they may be required? I do not think it would. We are now this year coming into our last quinquennial period, and the endowment with the rates will certainly not provide revenue sufficient to enable the Council to proceed with the kerbing and guttering of the streets as they have been doing. It might provide sufficient to keep the present roads in repair, but that would be about all.
1125. You mean such roads as have been already formed? Exactly.
1126. But not to form new streets or to metal new streets already formed? No; they would not be able to do much towards it,—the more especially as we shall shortly have to re-metal many of the streets on which the metal has been worn through. The Committee are no doubt aware that these streets have to be renewed periodically as they wear out.
1127. Have you had any experience as to how long kerbing and guttering lasts? From what I have seen, some of that in Newtown seems calculated to last for a man's life-time.
1128. I suppose that is in some of the back streets? Yes; on the main road the kerbing and guttering has been laid about ten years; the guttering in several places has been repaired.
1129. That must be owing, I presume, to the level character of the road;—do you know the gradient? There is very little fall, but the wear arises chiefly from the carts backing into the gutters to load and unload at the shops where purchases have been made.
1130. The rate you levy is 1s. in the £? Yes.
1131. You have no gas-rate? No, we have no gas-rate in Newtown; our only rate is the 1s. in the £ improvement rate, but out of that we pay, and have been paying for the last three years, about £133 10s. for lighting. The Road Trust pays a portion of the expense of lighting the main Newtown Road, and the Council lights the Enmore Road.
1132. The Council lights the Newtown and Enmore Roads, but does not apply the gas to the rest of the streets of the Municipality? No.
1133. Suppose it should be decided that the Government should assist you by a permanent endowment, what amount of endowment do you suppose would be required to enable the Council to keep in repair the streets already formed, and to form new streets as the population spreads? I think that with a permanent endowment of 10s. in the £ the Newtown Council would be able to manage very well.
1134. That is owing to the circumstance of Newtown being so very favourably situated? Yes, of course. As we have the responsibility of our main road taken off our hands we should be able, with a permanent endowment of 10s. in the £, not only to keep existing roads in good order, but to form new streets as the population increased and the spread of improvements demanded it.
1135. You have a Town Hall, I believe? Yes.
1136. Do you derive any revenue from it? Not much. All we got from it last year was £15 5s.

1137. What is the present amount of indebtedness of your Municipality? The Council have a cash credit with the Joint Stock Bank, which varies from time to time according to their requirements, the average amount being about £600. In addition to this there is a fixed debt of £1,500, at 6 per cent. Mr. R. Banks.  
21 Oct., 1873.
1138. How much did you pay for interest last year? The amount paid was £145 4s.
1139. In your position with the Council what are considered to be your duties? I am in the first instance council clerk, then I am collector of rates, and I also have to superintend the carrying out of all the works directed to be performed by the Council, and am likewise librarian.
1140. In fact you have to act as surveyor and civil engineer of the Council? I am not an engineer nor a professional surveyor, but I have to see that the works are properly carried out.
1141. Have you to make arrangement for the letting of the work? I have to prepare specifications for any contracts the Council may desire to let.
1142. And you act also as librarian to the free library? Yes; and that again is another expense that comes out of the 1s. in the £ rate. When the free library was established I was requested to undertake the duty of librarian, and the Council increased my salary by £25 a year to remunerate me for the trouble the office entailed.
1143. What is your salary now? My salary now is £175 a year. It was £150 before the office of librarian was added.
1144. Is that all you receive? In addition I have free quarters in the Town Hall building.
1145. Do you think that the Municipality of Newtown is of a sufficiently large size for its economic working, bearing in mind the idea that the whole Colony should be divided into Municipal areas? I think it would be for the general good to have the Municipal boundaries increased so as to take in larger areas; but this would have to be done with a great deal of care and consideration. For instance, it would not be for the benefit of Newtown to be joined to Marrickville, as that Municipality has a greater length of streets than Newtown, whilst the rates of the whole Municipality do not equal those of one of our wards. So that if they were joined there would be a great injustice done to Newtown, unless some arrangement was made by which the amounts raised in each particular district or ward were to be assigned for the improvement only of the ward or district in which they were raised.
1146. Then you think that the amounts raised in each ward should be expended in the ward in which it is raised? Yes, as a general rule, but not in all cases. For instance, as in the case of the Enmore Road, there is more traffic on that than in any other street of the Municipality, with the exception of the main Newtown Road. In fact there is considerably more traffic upon it than upon the Cook's River Road; and in cases of that kind I think that all parties ought to be called upon to contribute to keep it in order.
1147. Do you think it necessary to the good working of the Municipality that there should be an annual assessment? I do not. My opinion is that this annual assessment is one of the expenses attached to the working of Municipalities, that might be very well be got rid of; but if so, several clauses of the Municipalities Act would have to be altered. For instance, under the present Act the council clerk is bound to put down the names of all persons liable to pay the rates of the Borough, and who are consequently supposed to have a right to vote at elections. This roll the clerk has to prepare from the records or assessment taken ten months previously; thus any change in the assessment must necessarily require a change in this respect also. If you arrange to have an assessment only once in three years you would have to make some corresponding alteration in the mode of preparing the roll of the Municipality, as it would require to be different from what it is at present under those circumstances.
1148. Then, would you suggest that there should be an assessment only once in three years, of course with power to assess any new buildings which may be erected in the interim? Yes. I think such a change would be a great saving to the Municipalities.
1149. I believe the ratepayers of Newtown have the cumulative vote? They have.
1150. Do you consider that there is any great advantage connected with that system of voting? I think it gives to the owners of property advantages which they would not have under any other system, and this is more especially the case in Newtown. I can give you an instance of how it has acted: Sometime ago the Newtown Council were petitioned to light the Borough. The matter was taken up very warmly by the ratepayers for and against the proposal. There was a majority, as far as numbers were concerned, against the proposal, but when the votes came to be taken, and the cumulative votes to be counted up, it was found that there was a large majority of property votes in favor of the proposal—thus giving the holders of property the advantage over mere numbers.
1151. You assess vacant lands in your Municipality? We do.
1152. You take 5 per cent. on the value as the yearly rental, and then 5 per cent. on that again for the rate? Yes.
1153. Or the four-hundredth part of the capital value? Yes. If the property is worth £100, we take the yearly value at £5, and then 1s. in the £ on that gives 5s. as the yearly rate.
1154. Do you think that sufficient payment for the advantage given to these properties by making streets round them? I am sure it is not.
1155. In your opinion would it be equitable to increase the rate on vacant lands to the extent of 1d. in the £ on the capital value of the property—that would give you the one two-hundred-and-fortieth of the capital value instead of the one four-hundredth, as at present; or 8s. 4d. on the £100 instead of 5s.? I do not think that goes quite far enough.
1156. Still it would not be an inequitable amount as far as the owner was concerned? No, it would not.
1157. Have your Council turned their attention to the means of securing a supply of water for Newtown? They have turned their attention to Sydney, but not to any other source of supply.
1158. For what reason have they not done so? Because the Act will not allow them to borrow money sufficient to carry out a work of this character. No Municipality would ever be able to carry out a work of this character under the present Act, which prescribes the borrowing power of the Corporation to a limit which prevents anything of this kind from being undertaken.
1159. I think you said it would be beneficial to have increased areas for Municipalities? Yes; generally it would be so.
1160. You are acquainted with the Municipality of Darlington? I am.
1161. I suppose you know that that Municipality has kept out of debt—that it has been well and cheaply worked, and that its streets are kept in first-rate repair? I do.
1162. And yet that is a small Municipality? Yes, but there is a reason for that. You would be able to get

Mr. R. Banks. get very few men like the present mayor of Darlington who would take all the trouble he does, give the Municipality the benefit of his knowledge and experience, and put it to no expense. In addition to this it is compact, with few streets, and thickly populated; and I do not think you can find a parallel case in any other suburb.

21 Oct., 1873.

1163. Then, in the event of the Legislature generally increasing the size of the Municipalities, would it be advisable for local reasons not to increase the size of Darlington? I think it would as far as Darlington is concerned.

1164. They are bounded by a Trust road on one side? Yes, and by the City on another.

1165. So that their main thoroughfare is like yours—they have not to keep it in repair? Yes.

1166. Supposing it were considered judicious, for the better government and more economic working of Municipalities, to increase their size, what in your opinion would be the most convenient and equitable way of increasing that of Newtown? That is rather a difficult question to answer. I know, however, that it has been suggested that the Parramatta Road should be our boundary, and that we should also take in South Kingston.

1167. But in that case you would take in a considerable amount of public land that is not liable to taxation? We should.

1168. Do you think it right that these public lands should be exempt from taxation? No, I certainly do not.

1169. It should be subject to taxation the same as all other property? Yes; because there would be a length of road fronting these lands which the Corporation would have to keep in repair, but for which they would receive no rates.

1170. What land is your Municipality endowed with for the purposes of public recreation? With none within the boundary of the Municipality. What is called the recreation-ground of Newtown is outside the Municipality. It is the ground lying between the University and St. Paul's College, and Newtown Road, and is named Victoria Park.

1171. Do you know what the size of it is? No, I cannot tell you the size.

1172. Has it cost your Municipality anything? No, we have never expended anything on it. It is in the hands of trustees, and I believe the Road Trust gave something towards its improvement.

1173. With regard to the election of mayor in your Borough, has the Act worked satisfactorily? Yes, in so far as Newtown is concerned it has.

1174. Have you found that the Act has generally worked well? Yes, it has acted very well in Newtown.

1175. Then, with the exception of the minor matters you have mentioned, you have found the Act work well? Yes; with the exception of the assessment and the making out the roll. These seem to me to be the worst things in the Act, more especially as regards the roll, because the law makes it compulsory on the clerk to put on the roll the names of all those who are liable to pay rates; and then it says that only they who actually pay the rates shall be entitled to vote. So that whilst it says that only certain persons shall vote it does not give the power necessary to prevent others from voting by keeping them off the roll.

1176. Have your Municipal Councillors turned their attention to the question of sewerage? Only to surface sewerage, not to underground sewers. It would be useless for them to do so, as the present Act does not give them the power necessary to carry out any system of the kind.

1177. But if the Government endowed you permanently with a grant of ten shillings in the pound would not that enable you in time to carry out a system of sewerage? No, nothing beyond surface sewerage.

1178. What is the cost to you per yard for road metal? We have hitherto used all white metal at a cost of 7s. 6d. per ton broken; but during the last year the Council have turned their attention to blue metal, which they can get delivered broken at the railway station for 10s. 6d. per ton.

1179. I believe there is very little traffic upon any of your streets, with the exception of the one that is under the Road Trust? Oh yes, there is; there is very considerable traffic on the Missenden Road, and on Australia-street. On the Enmore Road there is very great traffic, as that is the great feeder of the main Newtown Road.

1180. What property is there in your Municipality that does not pay taxation? Not a very great deal.

1181. What does it consist of? The schools under the Council of Education, all the churches, and all the Government property—the police station, the railway station, and the station-master's house.

1182. What amount of money is the Mayor of Newtown authorized to spend of his own motion, and without consulting the Council? Only £5.

1183. Suppose an expenditure of money to be required, what is the first step that has to be taken? The matter is first brought under notice by an alderman; then the Committee for Works is directed to examine the place; having done this they report upon it to the Council, or they examine the different places in the ward on their own motion, and where they think the money is required to be expended they report to the Council in its favour. Then I look over the work and give them an estimate of what I conceive will be the probable expense of it. This is brought up before the Council, and, if approved, is adopted. But then nothing is done with any of these works which have been reported on and approved until some member of the Council brings in a special motion to vote the particular sum required for the work. Perhaps, for instance, the report from the Committee for Works recommends work to be done in two or three different streets; on that being adopted, the aldermen interested in the different localities bring in a motion for the amount required for each separate street, and these have to be put and carried before the work can be done.

1184. So that each work has always to come two or three times under the consideration of the Council before it is finally adopted and the money appropriated? Yes; it has always to come twice at least.

1185. And in the case of an emergency the mayor is entitled to expend any sum up to £5? Yes, up to that sum without the sanction of the Council; but in that case he has to report the circumstance to the Council at its first meeting.

1186. Do you find it expensive to advertise, as you are compelled to do by law, in the *Government Gazette*? It is not so expensive now as it used to be some time back. Our expenses last year for advertising in the *Government Gazette* and daily papers were about £21.

1187. What does your assessment cost you annually? Last year it only cost us £10. Last year the Council adopted a different plan to any they had previously followed. Instead of engaging a professional man, as they had always done before, they appointed the working overseer and myself to the work, and then they gave me £10 for my trouble.

1188. And they followed this plan in order to reduce the cost of the work? Yes. When they called for tenders, the plan previously followed, they used to get it done for £18 or £20.
1189. Is there a Court of Petty Sessions in Newtown? There is not.
1190. Would it be a convenience to the inhabitants that there should be one? Not for Newtown alone, but for the district perhaps it might be convenient.
1191. Do your mayor and aldermen give a good attendance to the duties of their office? Yes, very good; we have had nearly a full Council all the year.
1192. Is there any other matter that you would desire to state to the Committee with regard to the working of the Municipalities Act? I may perhaps mention that it would be desirable to alter the clause relating to the election of a mayor, as where both sides are equal a difficulty has frequently been caused. To remedy this, I think that where the sides are equal, and neither will give way, then the candidates should do as retiring aldermen have to do, and at a first election draw lots for the office; this would get over the difficulty, and prevent the Council from getting into a fix, as some of them have done, especially in Parramatta.
1193. Do you think that financially it would be better for your Council if the Trust road were taken into your Municipality, and placed under your management? I am certain it would not be.
1194. Not even if you received your proportion of the tolls? No; because a portion of the road is not in any Municipality.
1195. Then, is it your opinion that the main roads through Municipalities should be under the management of trustees? No, not in all cases; but in respect to Newtown I would make an exception.
1196. *Mr. Burns.*] Would you be in favour of all public thoroughfares within incorporated districts, for which no provision is now made, other than placing them in the hands of trustees, being handed over to the Municipal body, the Government giving that body a reasonable endowment for their maintenance? I would not be favourable to such a plan in so far as Newtown is concerned; but then, as I said, I look upon that as an exceptional case.
1197. How does it arise that a rule which would be applicable to all other Municipalities would not suit the circumstances of Newtown? Because it would take nearly the whole of our money to keep the main Newtown Road in repair.
1198. Do not the Government now contribute something from the general revenue towards the maintenance of that road? Yes, about £200 a year I think; but that goes a very small way in the work that has to be done.
1199. That would not be a sufficient sum to induce your Council to take the road over? It would not.
1200. Would you be in favour of taking the road over if your endowment was proportionately increased? And do away with the tolls?
1201. Suppose you were to have the tolls? If the toll-money was placed in the hands of the Council I think it might very beneficially undertake the management of the road.
1202. What is the annual amount received from the tolls on the Newtown Road? The last tender taken was £2,800 a year; but then the Trust has the charge of 4 miles of road.
1203. And this length of road is managed, and this amount of money is expended by a Trust? Yes.
1204. And not by the central Government? No.
1205. I presume the trustees find that they have sufficient with the toll money to keep the road in repair? As a proof that the tolls are sufficient for this, I may mention that the Road Trust every year hands us something either in money or metal for the improvement of the Enmore Road.
1206. So that the Trust assists you with the Enmore Road, and also keeps in repair the whole line of road from town to Cook's River out of the toll money? Yes; from the City boundary to the Dam at Cook's River.
1207. What officers have you got in your Corporation? I am the only officer of the Corporation. The police sergeant is appointed inspector of nuisances, at a salary of £10 per annum.
1208. And you get a salary of £175? Yes, with quarters.
1209. Do you act as surveyor for the Corporation? I have to take levels, prepare plans, sections, and specifications, to carry out all works ordered by the Council; during the last seven years they have not engaged any professional gentlemen to carry out the Corporation works.
1210. How much additional endowment do you think would be a fair thing, supposing the Council to have to undertake all that the Act intended? I think that to do all required, the Municipality would require a perpetual endowment of 1s. in the £ on its ratable property.
1211. Or £ for £ on what you raise yourself? Yes, that is the same thing.
1212. Have you any important public work or building in your Municipality? Only the Town Hall.
1213. And what do you say is your debt? £1,500 on the Town Hall, and £600, the average amount used during one year.
1214. Making a total liability of? £2,100.
1215. You are the only officer of the Corporation? Yes.
1216. So that the Council have no further official outlay beyond your salary, and the preparation of the assessment paper, which you say does not exceed £10 a year? Exactly.
1217. Have you found that the Corporation has not been able to carry out some of the improvements asked from it, owing to the want of funds at their disposal? I have, and some very important improvements too.
1218. From want of funds? Yes.
1219. Have you had under your consideration the question of handing over to the Corporation the revenue from and control of public-houses within your Municipal district? Yes. The Newtown Council had two or three meetings to consider this matter; and they came to the determination that a permanent endowment would be preferable to anything of that kind.
1220. That is preferable to taking the license money of public-houses? Yes.
1221. Your Council then have had some meetings on this subject? They have.
1222. With reference to this Committee? No; with reference to the Municipal Conference, at which these matters were to be dealt with.
1223. And touching the endowment what were the views of your aldermen as to the amount of endowment they ought to receive? The determination came to was that an endowment of 10s. for every £ of rates would be a fair thing.

- Mr. R. Banks. 1224. They would be satisfied with that? They would.
21. Oct., 1873. 1225. *Chairman.*] Taking the year 1870 I find that your office expenses were £442 18s. 7d.;—that would show more salaries than you mention? No. That amount includes the interest account. After that very statement to which you now refer had been made and sent in, the mayor, who saw the return in print, thought that this interest account ought not to have been included, because it could not in any way be considered as an office expense.
1226. *Mr. Teeco.*] Setting aside the Government endowment, your only source of revenue is from the rate-payers? Yes, except a very small sum, which we receive from the police office.
1227. How much is that? I daresay the average sum might be about £10 a-year—just about sufficient to pay our inspector of nuisances. The senior-sergeant of police at Newtown has that appointment, and receives the amount I mentioned. I find, however, that last year the Council received £15 5s. from the police office, so that they were £5 5s. in pocket on that occasion.
1228. Are you of opinion that the Municipalities generally are in the same favorable position as Newtown? No, I am not. I believe that the country Municipalities are far less favorably situated, from having a greater length of roads to maintain, and from having a sparse and scattered population.
1229. They would consequently be more in need of an endowment than Newtown? Yes, much more so.
1230. To what extent ought they to be endowed? I think that giving them 1s. in the £ on their ratable property would not be one penny too much for them.
1231. What revenue would you derive from public-houses in Newtown? We have 13 public-houses within the Municipal boundaries, and at £30 a-piece they would give us £390, or about equal to 25 per cent. on our rates.
1232. You say that you have made only about one-half your streets? More than that—about 10½ miles.
1233. But these are not fully completed—kerbed and guttered? No, and there are also about 5½ miles untouched.
1234. And your debt is £2,100? Yes.
1235. How much is on the town hall? £1,500.
1236. And what revenue do you derive from the town hall? Not much. Last year all that we received from it was £17 4s. 6d.; but then there is this to be taken into account, that the inhabitants have the use of it every day as a free library. Of course that ought to be considered even though the building does not bring us in any actual funds.
1237. You do not receive anything like sufficient to cover the interest on the debt? No.
1238. How many volumes have you in your free library? We have 2,700 volumes. I may mention, however, that we obtained the building and library under rather peculiar circumstances. It was at one time a School of Arts, and the Council would not certainly have erected a building of that kind for their town hall; but it was offered to the Council on what was supposed to be favourable terms when the School of Arts gave in, but it was with the stipulation that when the School of Arts closed the Council should establish a free public library there.
1239. *Mr. Tunks.*] The School of Arts not being able to carry on offered the building to your Council? Yes.
1240. And I believe some little pressure was brought to bear on them to induce them to purchase? There may have been.
1241. The Council gave £1,000 for it, I believe? Yes.
1242. And now the council clerk gets his quarters in the building? Yes.
1243. What would that be worth—£40 a year? Yes, about that.
1244. Then, instead of having to pay rent for a library and reading-room, you have one for nothing—that would be worth another £50? I dare say it would.
1245. And the Council has no rent to pay for Council Chambers? No.
1246. So that though you do not get revenue from it you save expenditure by it? Certainly.
1247. Are the pathways on each side of your main thoroughfare in the charge of the Corporation or of the Road Trusts? The Council generally paid two-thirds of the kerbing and guttering, the trustees paying the other one-third—the pathways being kept in repair by the Council.
1248. As a matter of fact do you not think that the main road being under a trust is a very desirable thing for the Corporation of Newtown? I do most certainly. As far as Newtown is concerned, it has been a very great advantage to the Municipality.
1249. You always have your main road kept in good repair for you? Yes.
1250. I believe that Newtown is built over pretty extensively? Yes, it is.
1251. And the amount of rates receivable is as much now as it is likely to be for some years to come? No, I think not; for notwithstanding the reduction in rents, which has taken place recently, the revenue of the Municipality is still steadily increasing and appears to be likely to do so, because there are a great number of these private paddocks about the Municipality which are being cut up into allotments and offered for sale. These are purchased very readily by persons who build on them for their own residence, so that new buildings are being constantly erected.
1252. As these buildings are erected they become liable to assessment? Yes, and so go to increase our revenue.
1253. But will not all these additional buildings bring with them additional traffic, so that your roads will be much more quickly worn out? Yes, to some extent that must be the case.
1254. In the event of your not being able to obtain a permanent endowment, do you think that property in your Municipality would be able to stand an additional 6d. in the £, or any other sum? I do not think any additional rate ought to be imposed, and more especially in Newtown.
1255. And why not there, seeing that you have your main road kept in order for you? Because many of the inhabitants now pay in tolls more than the 1s. in the £ already levied on them as a rate. They have to pay the toll for going in and out of Sydney; and there is a large number of them who go in and out every day, and that must be quite equal to what they pay as rates.
1256. But that would only be a charge upon those who keep horses and vehicles, and not upon the others? Yes, of course, it would only be on them.
1257. Then you think that the amount of taxation levied upon Newtown at present is quite as much as the property there can bear? Yes; it is quite as much as people can put up with.
1258. Have you the water from Sydney laid on to Newtown? No.

1259. Have your Council applied for it? Yes; we have been making almost constant applications for it during the last ten years, but the City Council have never shown any disposition to meet our wishes. They have promised to lay the water on to our Municipality, but nothing has yet been done towards doing it. Mr. R. Banks.  
21 Oct., 1873.
1260. And I suppose you have as yet done nothing in regard to sewerage? No, nothing, except surface sewerage only,—as it would be very difficult to carry out any other kind of sewerage in Newtown, owing to the restrictions of the Municipalities Act.
1261. And that has been made out of your yearly revenue? Yes. It is not by any means of an expensive character, for Newtown is so situated that almost as soon as the water falls it runs off into other Municipalities by which Newtown is surrounded.
1262. How is Newtown supplied with water? Chiefly obtained from roofs of houses and retained in wells and tanks.
1263. Any wells? Some few, but not many.
1264. And these, I suppose, if sunk deep, would drain the water from the Cemetery? Yes, no doubt they would; but some of our people would not mind that.
1265. How do you mean? I have heard them say as much as that they did not object to the water which drained from the Cemetery, when the question was being discussed as to closing the Cemetery. This was said before a Committee of the Legislative Council that was appointed to inquire into the matter. I saw a man myself, when the Committee was on the ground, dip some of the water out of a pond and drink it in presence of the Committee.
1266. As far as the Municipalities Act is concerned, you are of opinion that with a trifle of patching it will do well enough? I do, certainly.
1267. And that there is no necessity for any great alteration? No, except in the matter I have mentioned.
1268. As it is now the Judges have decided many points which have been in dispute, so that the law is now very well known? Yes, we have found it work pretty well in Newtown.
1269. How much of this amount for office expenses goes towards the payment of interest? £145.
1270. And all the rest of the revenue of the Borough goes to improve the streets? Yes, with the exception of £133 10s., which we pay for lighting. The Road Trust pays half the expense of lighting the main road.
1271. Having regard to your position as a Corporation, do you think the free library any advantage to the district? Yes, I believe so. I know that a very great many people make use of it.
1272. Have you any valuable works there? We have.
1273. How do you arrange with them;—you cannot lend out valuable works to every comer? No; valuable works, such as books of reference, are not allowed to leave the premises; but any ratepayer, by paying half-a-crown a year and getting an order from an alderman, can take out the ordinary books.
1274. What do you mean by paying half-a-crown a year—it cannot be a free library if they have to pay? The half-a-crown a year is merely for the purpose of keeping the books in repair.
1275. Since you expended the £200 granted for the library by the Government, what sums have you expended on the library in the purchase of books or otherwise? Scarcely anything. There are a few pounds raised occasionally by entertainments, so that the library really does not cost the Council anything for books, except only for the purchase of the papers.
1276. Can you suggest anything further by way of improvement? As you have mentioned the matter of sewerage, I may say that if the Municipalities are expected to carry this out, special legislation will be required, as the present Act does not give the Municipal Councils sufficient power to execute any complete system of underground sewerage. This is more especially the case in Newtown, which from her position, and being hemmed in by other Municipalities on all sides, would necessarily be obliged to run her sewerage through the lands of one of her neighbours, and this she would not be permitted to do under the present Act. In addition to this the Municipalities are restricted as to their borrowing powers, and could not under the present Act raise sufficient money for carrying on such an extensive work as sewerage. But even if they had the power, I think that borrowing so large a sum as would be required would terribly hamper property to pay the interest.
1277. What rate do you think would be required? I do not think that a rate of 2s. in the £ would be sufficient to pay the interest on the large sum that would be necessary.
1278. You mean that a system of underground sewerage would be thus expensive? I do.
1279. You think then that under the circumstances a system of underground sewerage would not be desirable for Newtown? I think it would be desirable, but I don't think it is required at the present time.
1280. *Chairman.*] What price do you pay for labour in your Municipality? 6s. a day for day labour.
1281. How long have you paid that price? For the last seven years.
1282. You pay 6s. a day all round? No; the carters get 9s. a day.

FRIDAY, 24 OCTOBER, 1873.

Present:—

MR. BURNS, MR. FITZPATRICK,	MR. MACINTOSH, MR. WEBB,
JOHN MACINTOSH, Esq., IN THE CHAIR.	

Hosea Bennett, Esquire, was called in and examined:—

1283. *Chairman.*] Your name, Mr. Bennett? Hosea Bennett.
1284. You are a resident in Paddington, and mayor of that Borough at the present time, I believe? Yes.
1285. How long have you filled the position of mayor and alderman? I have been mayor of Paddington since March last. It is two years ago in February since I was elected alderman.
1286. You are therefore well acquainted with the working of the Municipality of Paddington? I do not know that I can say I am well acquainted.

H. Bennett,  
Esq.

24 Oct., 1873.

1287.

- H. Bennett,  
Esq.  
24 Oct., 1873.
1287. You must have had considerable experience in reference to your Borough? Only for that length of time. I took no interest in Municipal matters prior to my election.
1288. Could you tell the Committee the area of the Municipality of Paddington? I think there are about 12 miles of streets in it altogether. I do not know what the acreage is.
1289. How many miles of your streets have been formed—that is, formed and metalled, and in complete working order? We have about 4 miles of streets made.
1290. And 8 miles still to make? Only 4 to make. We have three miles and a half of Trust road in our Borough which we have merely to kerb and gutter, and to keep the foot-paths in repair.
1291. The Road Trust keeps the carriage-way in repair? Yes.
1292. The Trust roads are the main thoroughfares of your Municipality? Yes.
1293. Seeing that you have your main thoroughfares kept in repair by the Trust, may the Committee infer that the revenue which you derive from taxation and from the endowment by the Government is sufficient to keep your streets in thorough repair and to make new ones where required? What—at the present time?
1294. Yes. May we not take that for granted, seeing that your main thoroughfares are kept in order by the Road Trust? No; we cannot make any improvements—our hands are regularly tied up for want of money.
1295. Is your Municipality in debt? It is considerably in debt.
1296. What is the amount of your indebtedness? About £1,700.
1297. For what purpose was that debt incurred? It is not a recent debt. It has been owing for some years, and it was incurred for building the Council Chambers, and, I suppose, for making roads when the Council first came into existence. There is no mortgage on the Chambers.
1298. You say you have Council Chambers? We have.
1299. Do you derive any revenue from them? From the Council Chambers?
1300. Yes? We do not derive any revenue from them; they are occupied by the Council clerk.
1301. What salary does your Council clerk receive? For the last six months he has been paid at the rate of £50 a year.
1302. Does he superintend the making of the streets? He has not done so for the last six months. Prior to that the whole of his time was occupied in the service of the Council; but when I was elected to the chair I thought that as we were so short of funds it would be as well to reduce the expenses as much as possible, and to devote all we could to the repair of the streets. His salary, which prior to that had been £160 per annum, was therefore reduced.
1303. The mayor and aldermen supervise the work? Yes, since I have been in the chair that has mainly been done by myself.
1304. Are your works carried out by contract or by day labour? We get work done in both ways. Some of it is done by contract; but we find that although we have to pay a little more by day work, we get the work better done.
1305. Has the Council turned their attention to the question of supplying the Borough with water? Only to the extent of applying to the City Corporation. Former Councils, I think, have done that, but very little attention has been paid to the matter since I have been in the Council. We have only waited on the mayor and aldermen of Sydney to ask them to lay the water on to so much of the Municipality as can be supplied from the reservoir which is within the Borough, but they would not hear anything of it.
1306. Are you of opinion that it would be advantageous to extend the area of the Paddington Municipality, with a view to greater economy in management? As far as my own personal views go, I think that it would be much better if two or three Municipal Boroughs were amalgamated. If Woollahra, Waverley, and Paddington, were made into one—allowing what are now separate Boroughs each to be a ward—I think it would be better. The working expenses of each is about the same; but the area is far too small in proportion to the cost of management. Each Borough has to employ a clerk and an overseer, and to do that runs into money, more especially where the total income is small.
1307. The funds at your command at the present time do not enable you to employ an efficient Council clerk—one who could perform the clerical duties and the making of the roads at the same time? The man we have is quite competent to do so. He is a thoroughly practical man; but the Council is not in a position to pay him £160 a year out of their revenue. We were compelled to economize, and so he had to seek other employment, but he still performs the clerical duties for £50 a year.
1308. What is the amount of your rates? £1,200 per annum.
1309. What is your assessment? 1s. in the £.
1310. That is the whole amount you receive from taxes? About £1,200.
1311. Do you levy a gas-rate? Yes.
1312. What rate do you levy? About 3d. in the £.
1313. Have you done anything with regard to sewerage? Nothing whatever.
1314. Would it be expensive to construct a sewer that would drain your Municipality? It would involve a considerable outlay. I have not given much attention to the matter, because we have not been in a position to incur any expense for sewerage in Paddington. No doubt the time will come when it will have to be done, and the work will cost a considerable sum of money.
1315. Would it be beneficial to Paddington and to the City that your Borough should be annexed to Sydney, seeing that a portion of the City juts into your Borough? Do you mean Paddington alone, or Paddington and Woollahra?
1316. Paddington alone. Would the amalgamation be desirable, seeing that a portion of the City projects beyond your Municipal boundary? Yes. Our people made a mistake in the assessment the year before last, and assessed a portion of the district which really belonged to the City of Sydney.
1317. A portion of the Sydney Common, a portion of the water reserve, and our reservoir are within your Municipal boundaries? Yes; they are in our Municipality.
1318. Then would it be beneficial to annex your Borough to Sydney? I have not a doubt of it. I think that the feeling of the people of Paddington is in favour of the Borough being annexed to Sydney, and it is my opinion that that would be a desirable thing to do.
1319. You assess the property in your Borough annually? Yes.
1320. And do you find that that is the proper mode of assessment? It is an improving locality; it is going ahead. There are new buildings continually going up out there, and you have to make an assessment on that account.

1321. Would it not be more satisfactory to make the assessment every three years, giving the Council power to assess new buildings as they are erected from year to year? It would save about £12 per annum, hardly that, because the assessment of new buildings in the way you suggest would cost something. Some one must go round and some little expense would have to be incurred. The total cost now is only £12 a year. The assessment is done by the clerk and an assistant.

H. Bennett,  
Esq.  
24 Oct., 1873.

1322. You state that you are not able to carry on the Municipality satisfactorily, for want of funds;— what amount of endowment would be necessary to place the Borough in good working order? We have got a great many streets, and although they are only short streets, it would cost a great deal to make them. It would require a great outlay to fill them up. For instance, there are the streets in that portion of the Municipality which was lately sold by the City Municipal Council. To fill up, form, ballast, and metal the streets laid out there, opposite the Sydney Common, would cost some thousands of pounds. The outlay required on that block of land alone would not, I am sure, repay an interest for the next fifty years.

1323. At what amount do you assess vacant lands? 5 per cent. on the fee simple.

1324. That is a four-hundredth part of the capital value? Yes.

1325. Do you think that sufficient? No, because a great number of people hold lands with no intention of building upon them, but directly one or two houses are put up in a street, the people demand that the street shall be kerbed and guttered, and the whole street has to be done for the sake of two or three houses. An outlay of some hundreds of pounds is involved, and yet you get little or no revenue from the few houses erected there.

1326. Is there anything in the Act which might be altered with advantage so as to improve the working of Municipalities? I think the Municipalities Act as it stands now is quite workable. The requirements of country Municipalities are no doubt different from those round about Sydney, but I have not found any difficulty in the working of the Act. Some alteration may be required with respect to the election of a mayor in case of emergency, such as that which occurred at Parramatta. It might be well to extend the time. Then, with regard to making up the roll, occupiers are bound to be placed upon the roll, although in many cases they do not pay the rates. The landlords pay the rates. I think that leaseholders and owners ought to have a right to vote only, and not weekly tenants.

1327. You think that the persons who pay the rates should be allowed to vote, and no others? Just so.

1328. You have the cumulative system of voting, have you not? We have.

1329. Has that worked well with that exception? Yes, I think so. The man who has the most property in the Borough has the largest number of votes; but it matters not how much property a man may have; the largest number of votes that he is allowed to have is four. It is not right that a man who has no property in the Municipality should have practically as much power as a man who is the owner of property to the value of a thousand pounds, for his interest is evidently much less.

1330. *Mr. Webb.* Are all the streets in your Municipality lighted with gas? No. Last year we were under a contract which was made prior to my going into the Council at all. I believe the Gas Company will not lay on gas to a Municipality for the first time unless a definite contract is made for a term of five years. Prior to my going into the Council, the mayor and aldermen entered into a contract with the Gas Company for five years. They afterwards had the gas extended, and several more lamps were put up, and they then entered into a fresh agreement with the Gas Company for five years more. During the last two years we received no gas-rate at all; a gas-rate was levied, but we found we could not enforce it. The Council summoned a number of ratepayers to the District Court, but we were nonsuited and could not recover. After that I waited upon Mr. Parkes, and explained to him the position in which we were placed in not being able to collect the rate, and explained to him that we had to pay a heavy interest on the debt we had incurred, and that we could not get rid of the gas until the first of this month. He consented to bring in a Bill to amend that section of the Act which referred to the matter, and to empower us to enforce the special rate. A Bill was introduced for that purpose, and was passed into law.

1331. The whole of your Municipality is not lighted with gas? Yes; pretty well every street has some gas; but we gave the Company three months notice, prior to the expiration of the term, that we were going to discontinue some of the lamps as soon as the contract expired. We have knocked off seventeen lamps in all.

1332. Do you make all the ratepayers pay this rate whether they have any gas-lights in their neighbourhood or not? We levy the rate upon everyone.

1333. It matters not whether they have any light or not? Just so; but they all have the benefit, either directly or indirectly.

1334. In some portions of the Municipality you have no lamps at all? There are some intermediate streets from which we get rates, but they have no lamps.

1335. And still you charge them with the gas-rate? Yes.

1336. And they have to pay it? Yes; but I do not know that we could recover in those cases; I am not sanguine on that point, but still we levy the rate.

1337. You make an assessment every year? Yes, every year.

1338. You get it done, you say, for about £12 a year? About £12 per annum.

1339. Do you not think that it would do equally well if the general property in the Municipality were assessed once every three years, and to assess any improvements every year? The value of things fluctuates a great deal. The value of a number of properties is going up, but some few years back the value of properties was much depressed. I suppose the value of property must have fallen nearly 50 per cent. as compared with what it had formerly been. I think there is a probability now of property going up again in value; and seeing that the annual assessment is made at so trifling a cost, I think it would be almost as well so long as Municipalities are what they are, to have a yearly assessment.

1340. If the cost of making an assessment in other Municipalities varied from £30 to £50 a year, what would be your opinion? I suppose in proportion to the amount of the revenue and the number of the population the cost would be greater. It would cost the City of Sydney considerably more to make an assessment than it would cost Paddington.

1341. Your rates amount to £1,200? About that in round numbers.

1342. In the case of a Municipality, whose revenue amounted to £1,500, suppose the cost of the assessment were £50 a year, would that modify your opinion? Yes, if that were the case.

1343. Would it not be quite unnecessary to go to such an expense every year? Yes; I think that once every three years would do.

- H. Bennett, Esq.  
24 Oct., 1873.
1344. Can you suggest any plan by which the difficulty in electing a mayor can be got over? By extending the time—instead of seven days make it a month. I do not think that there is any great difficulty about the matter, even as things are now, excepting in cases where they are really determined not to elect a mayor, as they were at Parramatta.
1345. Suppose there were twelve aldermen, six of them on each side, and that neither party would give way, how would you get over the difficulty? Where there are two equal parties I would compel them to draw for it.
1346. If the parties were equal you would suggest that they should draw lots? Yes; let them write "mayor" on one slip of paper, and leave a blank on the other, and whoever draws "mayor" let him be the mayor.
1347. Whenever there was a tie you would suggest lots? Yes, I think that would be a fair way of settling the matter.
1348. You have not sufficient money, you say, to carry on improvements? We are continually carrying out improvements, but not to the extent required. I have always some one employed.
1349. But you have not sufficient money to carry out the necessary improvements? No; we have a great deal of work that wants doing, but we have not the money to do it.
1350. Can you suggest any mode by which you can obtain more money to carry out these necessary improvements? We are limited as to the extent of our borrowing power.
1351. I wish to have your view as to how you think the necessary funds could be raised? The nicest plan would be for us to have it in the shape of an endowment.
1352. Do you recommend an increased endowment? An increased endowment, or an extended endowment.
1353. Do you think that property would stand an extra amount of rate? I think that a shilling in the £ is a plenty high enough rate; and besides, we are levying now a gas-rate as well. We pay 15d. in the £ at present, and if we had the water laid on, then we should have to pay something more for that.
1354. When you recommend that a large amount should be given as an endowment, do you not see that there would be great objection to any largely increased endowment being given by the Government to all these Municipalities? I can see that it would be a perpetual burden on the Government to be always finding money for these Municipalities, but I have no doubt that if the endowment were extended for some years more that would answer very well. All these places are improving, and every year enhances the value of property, so that of course we should have more revenue, considerably more, in ten or twelve years time than we have now. For that reason, I think, that if the endowment were extended for a few years more, we might be able to work without any assistance from the Government. We could carry on now without any assistance from the Government, but it would only be in a very unsatisfactory way. We could not make many improvements. We should have to keep crawling along as we are, and we should be perpetually over head and ears in debt.
1355. Do you think that the improvements you make in your Municipality increases the value of property in the Borough? Undoubtedly they do.
1356. Then who, principally, should be made to pay for it? Who should be made to pay for it?
1357. Yes? The owners of property of course.
1358. The owners of property? Decidedly.
1359. Then, would you recommend an increased endowment from the Government, unless at the same time you called upon the owners of property to pay for the improvement of their property? Yes; but you could increase the amount received from property, although I do not know that it would be sufficient. Suppose you doubled the amount charged on vacant land, the revenue you would receive would be very small compared to that which would be derived if those lands were all built upon. Suppose you trebled or quadrupled the rate it would not amount to much. It costs just as much to make a street, and to kerb and gutter it where the land is vacant, as it does where all the land is built upon.
1360. And you enhance the value of the property? Most undoubtedly you enhance the value of the land.
1361. And do you not think that, in view of that fact, it would be quite fair to call upon these people to contribute considerably more than they do at present? I think that the owners of vacant land ought to be compelled to pay more. They hold the land for sale to get a higher price. The rate is very trifling now for vacant land. If we improve the value of this land, we ought by right to receive considerably more than we do now in the shape of taxation.
1362. If you had an increased endowment, or the present period of endowment extended—if, we will say, you received £ for £ for ten years instead of five, and 10s. for every £ raised locally for ten years instead of five, as at present—do you not think that the owners of property should also contribute more than they do at present;—do you think that 1s. 6d. in the £ would be too heavy a rate, seeing that the money would be expended in making roads for the benefit of the landowners in these Municipalities? Of course the streets that are really made benefit them.
1363. Do you think that the charge would be too heavy upon property? 1s. 6d. in the £?
1364. Yes? I think it would, when you take into consideration that in these suburbs houses are sometimes unoccupied for a length of time. I have had houses unoccupied for seven months, and the wear and tear and taxes go on all the time; but I think that vacant and unimproved lands should be compelled to pay considerably more.
1365. In reference to the electoral roll, have you had any difficulty in getting that made up satisfactorily at Paddington; that is, in finding out who are really electors? No, I do not think we have. It has not come under my observation.
1366. How do you make up the roll? It is made up from the books in the office, *i.e.*, from the previous assessment. Their names are put down in the electoral roll and remain, unless they are objected to. If there is any well-founded objection lodged, the name is struck off on revision.
1367. Do you allow both the owner and the occupier to vote? Yes.
1368. Although the owner may pay the rate, and the occupier pays nothing? Yes.
1369. You allow them both to vote? Yes.
1370. Although the tenant only pays the rate? They are both allowed to vote.
1371. For the same property? Yes, for the same property.
1372. Do you think that that is the intention of the present Act? From the reading of it, I should imagine that it was.
1373. You do not know how it is carried out in other Municipalities? I really do not; but I believe the practice is the same.

1374. For both the occupier and the owner to vote? For both the occupier and the owner to vote.
1375. Are you not aware that there is a clause in the Act which provides that the person who pays the rates shall vote? I am; but then there is another clause which says that the name of the occupier shall be on the roll, and the Act also provides that any person whose name is on the roll shall be entitled to vote.
1376. Therefore, these two clauses are not consistent with each other? No. The Act should be altered, and the man who owns the property should be the person entitled to vote. The tenant really cannot have much interest.
1377. Would you recommend that the rate should be levied on the landlord or on the tenant? You can recover now from the landlord; but if it comes to a levy, you could not levy on the owner. According to the present Act you must levy upon the occupier. You can sue the owner, but in the event of getting a verdict you cannot distrain for the rates upon the owner of the house, unless he were also the occupier.
1378. I want to ascertain if you can recommend any simple mode by which the Council can at all times serve one person—the owner or the occupier. If you serve the occupier with notice, he may leave, and not pay the rate, and then you are under the necessity of serving the owner with notice before you can recover the rate, are you not? We are bound to serve a notice.
1379. On the owner afterwards? Yes.
1380. Consequently that necessitates the service of two notices, does it not? It does.
1381. And at the same time prevents you from recovering the rates within the time during which they ought properly to be paid? Yes.
1382. Could you recommend the adoption of any plan by which that difficulty could be avoided? It would be rather difficult to do so, because it is almost impossible to find the owners of some properties. They may be all over the country and we do not know who actually owns the property.
1383. You cannot serve the notice until you get information as to who the owner is? No.
1384. You find that there is a difficulty in collecting the rates on that account? Yes, we do. The rates are left to accumulate.
1385. But you are not prepared to recommend any course by which the difficulty could be got over? I do not know that I am. The only way in which you could get over the difficulty would be by making the owners pay, and not levying the rate upon the tenant at all.
1386. But in that case there would be a considerable amount of difficulty in collecting the rate, because of the great difficulty which you say often exists in the way of finding out who are the owners? That would be in reference to vacant land. It would not be the case in reference to the owners of improved property.
1387. What do you think of an idea of this sort: that the tenant should be compelled to pay the rates in the name of the landlord, but that he should be authorized by law to deduct the amount of the rates from the rent? But then, how would you get over the difficulty which would arise in the case of weekly tenants? They come into possession of a house, but do not stop there more than a few weeks. The Council only collects its rates once in the half-year. The occupant of a house may stay for a month or three months; but may leave directly you come upon him for the rates. How could you get the rates in a case like that? I think it would be better to have the owner liable.
1388. And not the tenant? That is my idea. I believe that nearly all the owners do pay the rates now, excepting in the case of leasehold properties.
1389. Then you think that it is not quite fair for the tenant to have the right to vote when he does not pay the rates? No; they have no stake in the Borough. They have no interest compared to that which the man has who owns the property.
1390. You have a Trust road running through your Borough? We have. We have three miles and a half of Trust roads—the Old South Head Road, the New South Head Road, the Glenmore Road, and the Point Piper Road are all Trust roads.
1391. Do the ratepayers in your Municipality complain of having to pay toll? There are very few people who, when you come to touch their pockets, do not complain.
1392. But you have to pay toll? It is not compulsory. The Corporation of Sydney have made a road by which it is rendered optional with the people as to whether they pay toll or not.
1393. Would the Municipal Council, as a body, prefer to take over these roads and do away with the tolls? I do not think so.
1394. They would prefer that the roads should be left as they are? Yes.
1395. And to pay the toll? Decidedly. The Road Trust gets £3,700 per annum for the tolls; and the whole revenue of our Borough is only £1,200. I do not think that it would be right to do away with the tolls because the whole of the public use these roads, and they would not contribute anything towards them if there were no tolls.
1396. Do the trustees of these roads pay anything towards lighting the roads? Not a farthing.
1397. They do not contribute anything? No; they do not.
1398. The Council pays for the lighting? Yes.
1399. *Mr. Burns.*] How much is your corporation now in debt? About £1,700.
1400. Are there any important local improvements you would like to have effected if you had ample funds? Yes. If we had funds we have any amount of streets to spend them on. We want to make new streets,—streets to which there has never been anything at all done,—streets which we really cannot think of touching at present. From the position in which we are placed, nearly the whole of our revenue is eaten up in the payment of interest on the debt and other expenses. We have very little more than enough to pay for the sweeping of the gutters.
1401. What is the total annual cost of working your Municipality? I do not exactly understand what you mean.
1402. What do you pay for clerical expenses, rent, and so forth? Our working overseer is a working man, and he earns his money by his own labour, and the clerk receives £50 a year for performing the clerical duties connected with the Municipality.
1403. Do you pay no rent? No. We have a Municipal Council Chamber. There is no mortgage on the Council Chambers.
1404. If the Government were to consider some fresh arrangement for aiding Municipalities, have you considered what amount per £ would be a fair contribution for the country to pay to enable the Municipalities

H. Bennett,  
Esq.

24 Oct., 1873.

- H. Bennett,  
Esq.
- 24 Oct., 1873.
- Municipalities to work tolerably well? If they got an extended endowment of £ for £ for some few years more until they got their streets formed and made, I think that in that case we should in the course of a few years be able to do without any assistance from the Government.
1405. I see by a return published in the Statistical Register that the expenditure on your Municipality is £402 a year, and that your total expenditure is £1,187 10s. 3d. for a year;—I suppose that is correct? I cannot vouch for it.
1406. I suppose it is an approximate statement of your expenditure per annum? I could not tell you exactly what we have spent.
1407. You think that the Municipalities ought to get an extended endowment until their streets and roads are put into fair repair? Yes. We could carry on now, but it would not be in a way that we ought to do. Everybody that sticks a house up wants a road. Two or three little cribs are built upon a line of street, and although the amount which they pay as taxes is not more than 10s. a year, directly they begin to pay they want all sorts of improvements made.
1408. Look at the matter in a general point of view. Considering that it is the policy of the Government to encourage local self-Government, what ought the Government to give beyond what the present Act provides to encourage the successful establishment of Municipalities? What amount the Government ought to give them, or would it be necessary for the Government to give them?
1409. Yes? They could do with £1, or with 10s. According to the amount of endowment would be the improvements made.
1410. Do you think that most of these Municipalities could get into something like a solvent condition, and give a fair amount of work if they were to receive the present amount of endowment for ten years longer? Yes.
1411. Would one-third of the amount raised locally be a sufficient endowment? No; I think they would want fully £ for £ until they got their streets made, and then it might be reduced.
1412. If for the first five years they had £ for £, and the next five years they had 10s., do you think that that would be an adequate endowment for these Municipalities? I think they would be able to get on very well with it.
1413. Have you considered whether it would be well if the Government were to let the Councils have the power to license public-houses? I do not approve of giving them the power to license public-houses.
1414. You think it would be undesirable to let them have the control of the licensing of public-houses? Yes, they would license as many houses as licenses were applied for.
1415. Have you any reserves in your Borough? We have.
1416. More than one? Only one.
1417. Has it been improved? It has not. Only a portion of it has been fenced in.
1418. What is the reason that it has not been improved? Want of funds.
1419. Does your reserve require draining? It is nearly all under water. It is in that gully just below the Glenmore distillery.
1420. You have not been able to improve it owing to the want of funds? No. To make it anything like it would want filling up considerably.
1421. And you would have to put a tunnel out to Rushcutter's Bay? It would involve a considerable outlay to drain it.
1422. Are you in favour of the public schools in the Municipality being handed over to the Municipal Council? To our Council? It is a matter that I have not thought anything about. The public schools work very well as they are.
1423. Do you find that people generally take sufficient interest in Municipal affairs? Interest is not shown by what I may call the best man.
1424. Do you think that if Municipal Councils had more extended powers more men would be induced to come forward and offer themselves for election? There is not a doubt about it, and we should have a different class of men.
1425. Men better qualified for the position of councillors? Yes; men better qualified, and men who would have a greater stake in the Municipality.
1426. How better qualified—by education and experience? By education, experience, and position.
1427. But how does position affect a man's qualification for the office of councillor? By position I mean social standing in the community. Thus, for instance, I should imagine that there are plenty of men in our Municipality who are far better qualified by education and position for the office which I now hold than I am.
1428. Would the class of men to whom you refer come forward if the Council had more extended powers? I think they would. It is not considered an honor to be an alderman or a mayor; they are looked down upon as nothing, and virtually they have no great power or influence; nobody thinks anything about them. It is not considered to be an honor to be an alderman in Paddington.
1429. Have the councillors attended the meetings pretty regularly? Since I have been in the chair the meetings of the Council have lapsed twice for want of a quorum.
1430. How long have you been in the chair? Since March.
1431. March of this year? Yes; the former mayor died within a month after he was elected.
1432. Is it possible that some of the apathy which exists in regard to Municipal affairs in your Borough results from the want of funds to carry on improvements? Most undoubtedly. I think that is one of the principal causes; but I believe that the men who are in the Council are quite competent to carry on the necessary works if they had the means. I think if we had a better income we should have men who are better educated—gentlemen who are in a better position than the men we now have.
1433. In what sense would they be better educated—would they be better educated for the office of councillor? I always suppose that an educated man is superior to an uneducated man for any position.
1434. Is it not quite possible that you may get into the Council a man who has not received so much scholastic training, and yet that he shall be better qualified for the office than your educated man? No doubt. You may educate some men for twenty years, and they are fools after all, that is, they have not got as much sound sense as a man who has not been to school at all.
1435. You would be likely to get men better qualified to perform the duties of councillors? Yes, men who would give the Municipal Council a better tone. There has been a great deal of bickering and squabbling amongst the aldermen. We have now got a number of mechanics as aldermen. Men like Mr. Cowlshaw, Mr. Broughton, and Mr. Begg, are the men who have the most stake in the Municipality, and who, I think, would be better qualified for the position of aldermen than men like myself.

1436. Do you think that such men would be induced to come forward and serve as councillors if you had a larger endowment and more extended powers with regard to local institutions, such as public schools? If there was any particular honor attached to the position I daresay they would come forward, but if they were to be simply aldermen, as we are now, without extended powers, would not be sufficient, even supposing the Council had larger funds.
1437. Your Council works harmoniously now? It works very well indeed. Business has gone on very well since I have been in the Council.
1438. Taking things all in all, I suppose you get a very fair class of men as councillors? Yes, but I could wish that some of them were a little sharper.
1439. *Chairman.*] Are you of opinion that a sewer should be constructed along the Barcom Glen to Rushcutter's Bay to carry off the storm waters? I think so; but it is of very little use thinking about it for we cannot do it. We cannot contemplate works of that kind for some time to come, for we have no money at our disposal to undertake them. That work would involve a tremendous outlay.
1440. Could you say about what would be the amount? I could not.
1441. It would be necessary that the City should bear one-half of the expense of it? Most undoubtedly, because the watercourse is on the boundary of the City and the Borough of Paddington—there is a watercourse which runs through Obed West's property.
1442. That work is highly necessary? I think so. All the drainage flows in that direction now.

H. Bennett,  
Esq.

24 Oct., 1873.

C. H. Walsh, Esquire, was called in and examined:—

1443. *Chairman.*] What is your name, Mr. Walsh? Charles Hamilton Walsh.
1444. You have been a Member of the Legislature, I believe? Yes.
1445. And you have been a resident in Goulburn for a number of years? For about twenty-five years.
1446. You are a property holder of considerable amount? Yes, I have held a good deal of property.
1447. You have also been alderman and mayor of Goulburn? I was the first mayor of Goulburn under the Act of 1858, and I was in the Municipal Council a couple of years afterwards. The Municipality of Goulburn was then declared to have been illegally constituted, because there were included a rural district and a town within its boundaries. The proclamation was held to be void.
1448. Could you inform the Committee as to what is the superficial area of the Goulburn Municipality? I could not say exactly what the area would be. The Goulburn Corporation includes a population of about 5,000 or 6,000 persons.
1449. Do you think the Municipality is 3 miles square? Yes; it is fully that.
1450. From your experience of the working of the Municipalities Act, do you think that the introduction of local self-government has been beneficial to the District of Goulburn? Yes; not only in Goulburn but in every place where Municipalities have been formed there has been very great improvement effected in the particular locality.
1451. You do not know what the income and expenditure of the Goulburn Municipal Council is at present? No; not beyond a general idea. I cannot give you figures.
1452. Would you kindly tell the Committee what you have observed as to the working of the Municipalities Act generally in the Borough of Goulburn? Well, as to its results—its present results—I think that so far as works are concerned, it has been satisfactory; but I think it has been satisfactory at a very great expense, not simply pecuniarily, but also in a moral sense. I think that the present Municipal system is calculated to breed any amount of feuds in a locality, and rivalry amongst neighbours, which would never arise but for their Municipal disputes. But a vast material improvement has been effected,—there can be no question of it, though as I think at too great a cost. Now, for instance, before any important works were undertaken in Goulburn, the first thing that was done was to negotiate for a loan with one of the Banks for £5,000. That £5,000 effected a vast improvement in the appearance of the streets, and so forth, but at an expense quite inadequate to the work done, that is, I believe the work cost more than the same amount of work in private hands would have cost.
1453. The work being carried out how? By loan and by contracts. The work was done, but I think it was expensively done.
1454. The fact that the people were new to the work, and were without experience in the Municipalities, might account for that? There was a general anxiety I think to effect improvements. The then mayor, Mr. Davies, negotiated the loan of £5,000 with the Joint Stock Bank, and at the same time he prepared a scheme for its reduction, for its repayment within a reasonable time. No sooner had he secured the loan than a re-election of mayor became necessary, and they put him out of office. He was succeeded by men who had no scheme, who had never considered the matter. They had the funds at their disposal and they spent them. The result has been that although they have reduced the loan very considerably, still they have been struggling with it beyond the period within which Mr. Davies calculated it might have been paid off.
1455. Financially, they are at present in difficulties? I think they owe money now; I think that some of that money is still due.
1456. Are you of opinion that the rates now raised—that is 1s. in the £ upon improved property and one 400th part of the capital value of vacant property—are sufficient to improve the town of Goulburn in a satisfactory manner, and to make the streets as the houses are built? My impression is this, that the working of Municipalities—and I am not speaking now in reference to Goulburn, but of what I have observed generally—from the smallness of the area is much too expensive. The working expenses far exceed what might be done by the same officers if the area were large enough to require it, and I think that the system adopted of giving contracts for every petty item as it occurs is expensive. The tender system should be for large jobs. My impression is that the true system on which to found Municipalities in the interior is to have larger areas and subdivision of the areas.
1457. Such as counties or shires? Such as counties or police districts; call them by what name you will, following almost the Irish Grand Jury system that certain works within the Municipal District should be charged against the whole district. A certain class of works, such as the maintenance of the main roads and the construction of bridges on the main roads, would be charged to the whole district, while certain other

C. H. Walsh,  
Esq.

24 Oct., 1873.

C. H. Walsh, Esq.  
24. Oct., 1873.

other works, such as second class roads and bridges, would be charged upon the particular subdivision of the district where they occur. Thus, for instance, some of the Municipalities insist upon the rates raised in a particular ward being expended in that ward, subject to a certain deduction for general expenses. What occurs to me is that—assuming we have larger areas—the formula of the Irish system would be better adapted to the working of our Municipal system than any other under the Irish Grand Jury Act—and I am not referring now to the Irish Grand Jury Act in its criminal capacity at all, but to its fiscal capacity. Under that Act the system pursued is this: Every county is divided into what are called baronies—old well established boundaries, the same as hundreds in England—and each barony has a presentment sessions twice a year. Within a given time, before the holding of the Sessions, which of course is advertised, persons desirous of having works done within their barony make application. The applications are sent to the Secretary of the Grand Jury, and are signed by a certain number of ratepayers. The Sessions are composed of a number of magistrates and a number of ratepayers. The ratepayers were nominated by the previous Grand Jury; but now I believe that practice has been discontinued, and the elective element has been introduced. All the applications for works or improvements in the particular barony come before the sessions. They are canvassed there, and passed or not, as may be thought best. If passed, they are scheduled, and sent on for the approval of the Grand Jury. In addition to the baronial presentment sessions, there is a presentment sessions for the county at large. The sessions for the county has to deal with works in which the whole of the county is interested, such as prisons and hospitals, and formerly the constabulary which was a charge upon it, and other general works of that kind. They dispose of the matters referred to them; but after the presentment sessions are over all finally come before the Grand Jury. The Grand Jury meets generally two days before the Judge of Assize comes round. Every item is gone through there, and it is discussed whether this or the other improvement shall be done or not, and the works are passed or not, as the case may be. If any person complains of the decision of the Grand Jury he has a right to appeal to the Judge of Assize, who comes round two days afterwards, and who has a right to take the opinion of a common jury of twelve upon the subject, but under such conditions that, unless the case of the persons who appeal is *bonâ fide*, it would be condemned. The person who makes the appeal has to make a deposit of costs and so forth. If there be any objection to what has been done, it is met by the procedure under which, before a single work or act can be done, the legality of it must be fiat by the Judge of Assize; that is, the Judge must certify, under the Grand Jury Act, that the Grand Jury have power to present the money. When fiat by the Judge, the work is carried out under the direction of the county engineer, with his assistants. They only meet twice a year; and there are none of these little brawls in every town and village which are apt to spring up under our system.

1458. Then a rate is levied to cover the expense of the work passed? The basis of the rate in Ireland is under the Ordinance Valuation. There is an Ordinance Valuation in Ireland of all the properties in the country, and the Secretary to the Grand Jury certifies the amount required to be levied in each district in the shape of county cess for the works required to be done in it, and their proportion of the works to be done for the county at large. The whole thing is got rid of in two days in each half-year. You have no improvement committees, or anything of the kind; but you have a civil engineer, who has obtained a working certificate, and upon whose certificate alone the contractors can take up any money. Another part of the system is this: Say a road is made between two points, and after it is completed, they then make what is called a maintenance contract, which may extend over three, five, or seven years, according to the nature of the case. The contractor is bound to maintain that road during that time, whatever the term may be, according to his specification, and he is only paid upon the certificate of the engineer, half-yearly, upon the Assize, which meets half-yearly, finding that he has performed his contract. The thing operates in this way: The contracts are generally taken by farmers who live in the locality, and who, during the time that their farming operations are in suspense, turn their attention to keeping the road in repair. Sometimes they are employed in breaking the metal for it, and at others they are engaged in looking after the road; but the work is cheaply done, and the contractors do not get paid unless the road is kept in repair. That portion of the system applies merely to roads; but there are bridges and other works which have to be looked after more directly.

1459. The system you have described would be applicable more particularly to a police district or a large area; but when a number of people congregated in a village or small town, you would withdraw a certain area from the district and incorporate it separately? The Grand Jury in Ireland retains the power over the streets of the towns; but, where the towns are of such importance as to require it, there is a body called the Towns Commissioners, who look after the lighting, sewerage, water-supply, and so forth; but they have nothing to do with the streets. They are a check upon the Grand Jury; in fact, they come before them as applicants. The townspeople have to pay taxes for the lighting, sewerage, and so forth; but the Grand Jury provides them with the streets. There are some few exceptional cases in which large towns have obtained special Acts of Parliament to meet their own requirements. That is where the population outgrows the system; but I am speaking of the Irish Grand Jury system, as a system applicable to the interior of this Colony. It would be quite impossible to adopt it in all its forms. You could not adopt it by a single clause in an Act of Parliament. There must be special legislation to modify and adapt the system perfectly to the requirements of the country here. I can hardly conceive of a greater evil in connection with the working of the Municipalities Act than that which results from the frequency of the meetings of Council, the bickerings which ensue, and the shortness of the tenure of office. Just as a mayor—as I have referred to in the case of Goulburn—has matured some scheme which would work beneficially for the general interests,—he is put out of office, and some man is elected as his successor who is perfectly incompetent to deal with the subject.

1460. The frequency of elections so completely changes the character of Municipal bodies that a systematic plan of operations cannot be maintained? Yes; as soon as a man has acquired experience which would make his services useful, he may be put out of office by some mere caprice. I think every man should be three years in office.

1461. As mayor and alderman? Yes, because the casualties and the extra vacancies that will occur, as they do now from death and other causes, would always give a sufficient infusion of new blood into a Corporation. There should be some men in the body who would have at least three years' experience of the working of it.

1462. Do you think that an adaptation of the Irish system such as you have spoken of would be suited to meet the circumstances of many districts in New South Wales? I think it would. I can hardly say anything

anything at all in reference to suburban Municipalities here. So far as the country districts are concerned I think it would be applicable, but connected with that idea is this—I would have the Municipal system compulsory throughout the Colony. I think it is a great mistake not to have it compulsory.

1463. Supposing a district were dissatisfied, would you allow it to be separated? No. I think the boundaries ought not to be under the control of the districts; I think they ought to be fixed by the Government. Even under the present Act consider what the effect of this practice of allowing separation is,—there is a Municipality formed, say about Camperdown—and I only name that locality for the sake of illustration, without knowing whether my remarks have any special reference to it or not. There is some antagonistic interest created between one side of the Municipality and the other, and the first thing they do as a mode of settling the dispute is to get up a petition for separation. I think this is vicious; it is simply adding fuel to the strife which the frequency of these Municipal meetings is apt to occasion.

1464. Are you acquainted with the Municipalities of Redfern, Waterloo, and Alexandria? No; I do not know them.

1465. They illustrate to a large extent what you have now stated? I speak from general impressions, and not from personal knowledge of particular localities.

1466. Are you of opinion that Municipalities as they now exist should be encouraged by a further endowment from the Government? That is really a very hard nut to crack. It just comes to this, whether or not it is obligatory upon the general Government to endow Municipalities. For the purposes of local improvement, purely local improvement, I do not think that the Government is bound to endow them at all; and for this reason, the Government does already supply out of the Consolidated Revenue of the Country a large amount of support to every locality. You have the administration of justice, you have the support of the police, you have the maintenance of your gaols, and of your hospitals to a certain extent, and you have all the ordinary appliances of government. You have all that from the general revenue of the Country; and if the Government meet all these requirements out of the general revenue, I do not see any reason why the Government should give to any particular locality which chooses to assume to itself to have a Municipality any more than it should give to a locality that does not choose to have a Municipality. For the sake of illustration, take Goulburn. We have had a Municipality in Goulburn; we have had all the protection that the Government can give us in the particulars to which I have referred; and we have had a Municipality and an endowment. Take Yass. The people there have had like protection, but no Municipality and no endowment. I confess I cannot see why the mere fact of giving to a particular locality the right to manage their own Municipal affairs gives them any claim upon the general revenue of the Country, beyond what the objects of Government fairly and properly call for.

1467. So you are of opinion that the Government ought not to levy taxation to an extent which will enable them to endow Municipalities? That does not follow from what I said; that is not a *sequiter* at all. What right has the Government to levy taxes on people who have no Municipality, to enable them to endow a locality which, in its caprice, chooses to have a Municipality? I am considering the question now in the abstract. What right has the Government to levy taxation to satisfy the caprice of a particular locality at the expense of another? That suggests the reason, the great reason in my mind, why the Municipal system should be compulsory; and if it be made compulsory, then you may come to the Government for your contribution.

1468. *Mr. Webb.*] And not otherwise?

1469. *Chairman.*] What is the smallest area that you would have incorporated? That must depend upon geographical considerations rather than upon acreage.

1470. *Mr. Burns.*] However, you would make incorporation compulsory? That is what it comes to, I suppose.

1471. Would you include all the roads in a particular district under the charge of the Municipality which might be created in that district? That would be arranged for in this way: If the Irish system were adopted all the roads, excepting the main roads, would be placed under the care of the Municipality. The leading thoroughfares of the Colony are provided for, of course, under the Main Roads Management Act; but in reference to the other roads, all the little Trust roads that we have ought certainly to be brought under the control of the Municipalities in which they might be placed. If you adopted the Irish system you would have this power. If you made the road good to the boundary of your Municipality you could require the adjoining Municipality also to make their portion good. Take the road leading from Goulburn to Bathurst, and suppose the Abercrombie River to be the boundary between two Municipalities of Goulburn and Bathurst. Suppose the Goulburn people made the road good from Goulburn to the Abercrombie River, the boundary of their Municipality, it would then be in their power, according to the Irish system, to compel the adjoining Municipality to make the road good to the terminal point,—in that case from the Abercrombie River to Bathurst.

1472. How would you provide the revenue to construct the improvements required? By local taxation. You cannot expect perfection. According to the law in force in Ireland, if a well defined road between two given points is situated, one-half of it in one county and the other half in another—if one county makes the road up to the boundary of the other—the Judge of Assize will make a compulsory presentment for the money, and it will have to be levied and the work completed.

1473. Do you not see that some difficulty would arise in this Colony in enforcing compulsory incorporation upon a large district which is very thinly occupied? I think there is difficulty in it; and it is for that reason that I think the Irish system in all its parts is not all fours with what is required here, but something analogous to that system, and based upon it, might be worked out. We could have a presentment sessions here. The District Court Judges go all through the country, and they could do what the Judges of Assizes do at Home—that is, certify to the validity of the thing; and then if you adopted large areas you could work them with much less expense. You would require one engineer, a certifying officer, a treasurer, and cess collectors, as they have in Ireland, and you would have an official auditor. At present the auditing under the Municipalities Act is a mere farce.

1474. Coming back to the question of compulsory incorporation;—have you not seen districts where roads have been opened for the convenience of the general public—roads many miles in length, and the population in the district is not sufficient to bear the taxation which would be required to maintain them? That merely comes to the question of how much ought to be extended on the road. It is not a question as to whether you are to have a road or no road, but the question is, whether you are to have a sufficient road or not? If you have a road sufficient for the locality, well and good. You do not want to spend money upon it. In many cases a bush road, for instance, would do.

- C. H. Walsh, Esq.,  
24 Oct., 1873.
1475. If incorporation were compulsory, the expense of maintaining these roads, which in some sense may be called local roads, but which are in fact general roads, would press very unequally upon the inhabitants of the locality, as compared with the accommodation they would receive? That would be corrected in this way. They would not get a presentment. The approval of the ratepayers would be necessary.
1476. But the ratepayers might not require the road so much for their accommodation as for the accommodation of the general public. Cases might arise where, if a vote were not taken for a particular road, which, although not a main road, would still give a large amount of accommodation, inconvenience might be suffered in consequence? I do not see how that affects the question. If the road is one which is required for the public accommodation, it must be one which will benefit those who live along it.
1477. Have you not seen many roads which pass through a thinly populated district, which would cost a great deal to maintain, and where the cost of maintenance would bear very heavily upon the residents in the locality? It might to some extent; but the question is what is meant by maintenance? If the country is sparsely populated the public have no right to expect a first class road.
1478. Would it not be one of the difficulties in the way of compulsory incorporation—the forcing of a few inhabitants of a district to maintain roads in which they were not chiefly interested? I do not see how you are to cure that.
1479. You see the difficulty? I see there is a difficulty; but there is no given state of facts upon which there may not spring a difficulty; but take the subject as a whole, and I think there is only one conclusion that can be arrived at, and that is in favour of compulsory incorporation. I believe that a system of compulsory Municipalities would be attended with a still greater difficulty than that you suggest; and it would arise in the case of rushes to new gold-fields. Take, for instance, the gold-field of Burrangong, which is now the prosperous agricultural district of Young: Suppose a very large amount of money had been expended upon public improvements, as soon as the gold-field was worked out the population all went away, and as a gold-field now it is merely nothing. In a case like that there would be a difficulty in getting the rates; and at all times there would be difficulty in getting rates out of gold mining property adequate to make the roads which would be really required.
1480. *Mr. Webb.*] You think that that is the greatest difficulty we should have to contend with? It is a great difficulty where you have to deal with a shifting population of that kind.
1481. *Mr. Burns.*] On the question of revenue for these Municipalities, would you be in favour of giving power to the Municipalities to impose any taxation besides that which would be required merely for roads and bridges; would you be in favour of their having the publicans' licenses? I certainly think that they ought not to have the control of the public-houses. I think that that would be a great evil. They might have a contribution from the Government *quo ad* Municipalities; but to give them the control of the public-houses would be a great evil.
1482. *Mr. Webb.*] Did I understand you to say that the Irish Grand Jury System had been superseded by some other system? No; all that they have done is to engraft the elective element upon it.
1483. Do you not think that the system here would be objectionable without the elective element? What I say is that having improved it by the elective element it could be adopted here. I have frequently had conversations with Mr. Forster and Mr. Byrnes about it when they were in office, and Mr. Forster prepared a Bill upon the subject. There is a Bill prepared by Mr. Forster which is really very much in accordance with my views. His view was to give a perpetual endowment based on a per centage of the rates levied in the district.

THURSDAY, 30 OCTOBER, 1873.

Present:—

MR. BURNS, | MR. MACINTOSH,  
MR. WEBB.

JOHN BURNS, ESQ., CALLED TO THE CHAIR.

John Macintosh, Esq., M.L.A., examined in his place:—

- J. Macintosh, Esq., M.L.A.,  
30 Oct., 1873.
1484. *Chairman.*] You are one of the Members representing the Electoral District of Sydney East? I am.
1485. As a Member of the Assembly you have moved for and obtained this Committee for the purpose of inquiring into the working of the Municipal Councils generally, and more particularly with regard to the Municipal Council of Sydney? I have.
1486. Would you be good enough to state your views generally upon the subject of inquiry, and the particular objects you had in view in moving for this Committee? The main object I had in view in asking for this inquiry, was to bring under the notice of the Legislature the importance of Municipal government; and further, to show that when Municipal institutions were established in this Colony they were not sufficiently endowed by the Government. My own opinion is that the Government of the day looked upon what had been given to kindred institutions in England, an old established, populous, and wealthy country, and took it for granted that the same privileges and endowments would suffice here in a new and only thinly-peopled country, where everything had to be done from the beginning. Now, after some fifteen years experience of the working of the system, we have found that the means placed at the disposal of these Municipal bodies had been altogether insufficient to enable them to carry out the work entrusted to them by law, and expected from them by the Government and the people.
1487. Will you state first, with regard to the Municipal Council of Sydney, what additional endowment is called for from the general revenue to put that Council in funds to carry out the objects for which it was established? The Municipal Council of Sydney, in so far as the improvements of the City is concerned, requires a very considerable increase of endowment upon what it now has. The two most important streets in Sydney, George and Pitt streets, are the main thoroughfares for the whole of the southern and western traffic of the Colony. Although some of the most valuable property in the City abuts on these streets, still the rate of 1s. in the £ on the assessed value of the properties received is not by a long way sufficient to keep these streets with their heavy and continuous traffic in anything like a fair state of repair

repair, putting aside the cost of lighting, watering, and cleansing, which the Council have to go to. Owing to this, the Council suffers a continual loss by these streets, which, however, from their large traffic have to be kept in good order, and funds have to be devoted to these streets which ought to be appropriated in other quarters, thus depriving other localities of improvements and the formation of new streets often very urgently required.

1488. Is there no contribution from the general revenue towards the maintenance of these streets? There were £10,000 voted by the Parliament towards the endowment of the City, but that is stopped by the Government on account of some claim raised by them for interest payable on debentures issued for the construction of sewerage and water works. But though these £10,000 are taken, the Council has yearly borrowed an equivalent sum, which has been charged to the sewerage and water funds—£5,000 to each; so that the City has not actually been deprived of the use of the money, although it has been stopped by the Government.

1489. Then, your endowment having been stopped by the Government, you have borrowed another £10,000, and charged them to the funds on account of which the money has been stopped from you? Yes. We have yearly borrowed the £10,000, charging them to the sewerage and water funds—£5,000 to each yearly; but even with that, we find that we have not sufficient funds to do all that is wanted.

1490. So that practically you do not get any money from the Government? None; then, besides what I have mentioned as to the traffic, many of our streets have very steep gradients, and being of a sandy or sandstone formation they readily cut up with the traffic and wash away with heavy showers, entailing almost constant expenditure. The kerbing and guttering too are of sandstone, and wear out so quickly as to require renewing in the frequented streets every seven years.

1491. In which of the streets is this the case? I may say in almost the whole of the streets, because the traffic is not very great. The kerbing and guttering get worn by the rush of water down the steep gradients. They will not last ten years in any one of them. Since I have been an alderman of Sydney, and that is now twelve years, George-street has been repaired three times, and now it is in a bad state of repair as far as kerbing and guttering are concerned.

1492. You have heard the evidence given before this Committee in regard to the present state of indebtedness of the Municipality of Sydney, to the numerous works which require to be accomplished, and to the funds at the disposal of the Council not being sufficient for the purpose;—how would you propose to increase those funds—how endow the Council in addition to the endowment they already possess? My own opinion is that in the first place the Government ought to pay taxes on all their properties the same as private individuals do, and that they should contribute their fair share to the city fund, the water fund, and the sewerage, for all their public establishments which enjoy the benefits of the expenditure of these funds.

1493. Would you also tax unoccupied lands? Yes; they should be taxed also.

1494. If you were paid all these rates by the Government would you then have funds enough to work your Corporation sufficiently well to give satisfaction? They would be a great help, but they would not give us sufficient funds. One point has to be taken into consideration, and that is, that this being the metropolis of the Colony, everything has to be done in a better manner than elsewhere, and that what would be considered quite good enough for a small suburban Municipality would not be so regarded in Sydney. People naturally look to Sydney as a guide for what ought to be done, and we ought to be placed in such a position as that the work should not be done so meanly as we are now forced to do it from want of means.

1495. The Corporation, I believe, takes charge of all the public recreation grounds—the parks? Yes, of all of them, except of the Inner and Outer Domain, and Hyde Park.

1496. Do they not involve the Corporation in a good deal of additional expense? Yes; they entail a very considerable expense for railing them in, levelling, planting, and generally improving them. For some of them the expense has been very great.

1497. And yet you get nothing from the Government to assist you in this work? No. We get nothing whatever for the parks.

1498. Then, in addition to getting the Government to contribute their quota towards the rates of the City, how would you propose further to aid the revenue of the City? I consider that the Corporation of Sydney is entitled to receive from the Government a sum of money equal in amount at least to the whole amount of business licenses, exacted at the present time from persons conducting various businesses within the City limits. That is to say, the licenses received from licensed victuallers, from wholesale wine and spirit dealers, from bond storekeepers, from pedlars, and, in fact, all the licenses now levied on the different tradesmen of the City by the Government.

1499. Taking the publicans' licenses—supposing the license money to be given over to the City;—would you still leave the business of licensing the public-houses to the Magistrates, as at present, or would you hand this, as well as the license money, over to the Corporation? I should prefer to see the licensing of public-houses given over to a licensing Board.

1500. To a licensing Board, not in any way to be under the control of the Municipal Council? Exactly.

1501. All you would wish would be to get a sum equal to that received by the Government for these licenses, leaving the collection, as at present, in the hands of the Government? Yes.

1502. Have you made any estimate of the revenue you would probably derive from these various sources of licensing? A rough estimate has been made that the licenses for the City of Sydney would amount to something like £12,000 a year. And I may mention that in proposing this I am proposing no new thing, for in the Colony of Victoria all these licenses, or rather the proceeds of them, are given over to the Municipal Council of Melbourne, and that Municipality is not in any way so difficult to work as is that of Sydney. Their streets are almost level, whilst ours are very steep in many places. Then again, they can get the metal spread on their streets at 4s. 6d. per cubic yard; whilst in Sydney we cannot get a yard of metal spread under 10s., and the price ranges at from 10s. to 11s. per ton. Then again, the traffic in the leading thoroughfares of Melbourne is very much lighter than it is upon those of Sydney, mainly owing to the fact that their railway stations are outside, or rather on the boundaries of the City. From this cause the traffic on the Melbourne streets is not one-half of what it is on the main thoroughfares of Sydney, seeing that all the traffic of the whole Colony has necessarily to pass through our central streets.

1503. Is not the railway terminus within the City of Melbourne? No. They are both, so to speak, outside the boundary of the City; for one is at the western end at Spencer-street, and the other is similarly placed,

J. Macintosh, just outside the traffic at the bottom of Elizabeth-street, in Flinders-street. In consequence of the termini being in these positions, a very great deal of the heavy traffic does not come over the streets at all. Then there are very large stores at the Spencer-street Station, in which all the heavy articles, such as salt, sugar, and the like, are stored until they are required to be sent up the country to Ballarat, Bendigo, and Castlemaine, or other inland centres of population.

30 Oct., 1873.

1504. Have the Municipal Council of Sydney been prevented from making the necessary improvements in the City through the want of funds? Yes; and so much so that they have not constructed any new streets for the last two or three years. All the revenue available has been required to keep in repair the streets which have been already made, so that there has been nothing left for new ones. We have been receiving a revenue of £36,000 from the rates on assessment, and from the different properties of the City, the Market Wharf—the two markets—and other properties; but the revenue which the Corporation derives from these is only small on account of the interest payable on the large sums which have been borrowed for the erection and construction of these several places. There are the markets for instance. It takes nearly all the revenue derived from them to pay the interest on the money borrowed to construct them, and the working expenses. The Market Wharf is in about the same position. Then again, there is the wharf at the bottom of King-street. That cost the Corporation £3,000 to construct, and all the revenue we get from it is some £100 a year; and as the money was borrowed at 6 per cent. the revenue is insufficient to pay the interest on the debt. Then there are the baths at Dawes' Point; these cost the Corporation between £4,000 and £5,000, and the revenue obtained from that is only about £100 a year, so that there is a dead loss upon that again. These works are altogether irrespective of those carried on out of the rates.

1505. Do you think that the City Council have exercised due economy in their expenditure of the City funds? Yes. They have exercised great economy and great care in dealing with the Corporation money. I have now been connected with the Corporation for twelve years as an alderman, and from my experience of the Council as a body, I can say that all the aldermen have attended the meetings of the Council remarkably well. At the meetings of the Council itself there is nearly always a full attendance, whilst the Committee meetings have been equally well attended, there being seldom less than ten aldermen present on these occasions. I can speak confidently, from my long experience of the Council, that the strictest economy is carried out in every branch. Then again, there is another matter which militates against the Corporation, and which ought to be taken into consideration in connection with its expenditure, and that is, that Sydney being the Metropolitan City people naturally flock to it in very large numbers. Amongst these there is always a very considerable proportion of indigent persons amongst the actual residents as well as amongst the more recent arrivals from the interior. These, at times, get into so impoverished a state from a scarcity of work or other causes as to be in danger of starvation. The Corporation, as guardian of the City, is in a manner forced to step in and to give employment to individuals of this description; but whilst it employs them it is not able to get a fair day's work from them for the wages received. This is from no disinclination to work on the part of the men employed, but from their sheer inability to do work to which they are unaccustomed, or from want of physical strength. The aldermen are fully aware of this, and yet from one cause or another they are forced to give, occasionally, employment to these men.

1506. Have you anything further to add with reference to the Municipal Council of Sydney? I might state further that the sewerage of the City ought to be looked to very shortly for several very important reasons. In the first place, before very long some of the most important portions of the harbour will be filled up with the debris from the higher lands of the City unless some alteration is speedily made. From the general plan for the sewerage of the north-eastern portion of the City, adopted by the Government before the Municipal Council of Sydney was in existence, the whole of the sewage of the City is conveyed into the harbour at different points; not only silting up the portions of the harbour into which the main sewers empty themselves, but also creating an intolerable nuisance, so much so that at the outlet of the different sewers round the harbour the stench is most terrible and has been the cause of almost constant complaint; and this brings me to the second reason why I conceive a change to be imperatively necessary, and it is this: If our present system of sewerage is continued there is very great danger that some pestilence will break out in the City in a very few years time, from the accumulation of filth at the outlets of the sewers. There is so small a rise in the tide in Sydney harbour, only some 4 or 5 feet, that there is no strong current to scour the harbour and carry the offensive matter away out to sea. Thus the sewage matter settles down in close proximity to the outlets of the sewers, silting up the bays and becoming a fruitful source of disease in the future. The only remedy I can see for these evils is to adopt an entirely new system of sewerage, by which all the storm waters of Sydney, and very much of the sewage matter, should be carried in a direction different to what is done at the present time.

1507. I think you said that this matter has been subject of complaint by persons residing near the mouth of these sewers? Yes, I did say so; and I may mention this circumstance, that you can get no person to live in Sussex-street from choice owing to the manner in which the waters at the head of Darling Harbour are polluted by the sewage matter brought into it by the Hay-street sewer. No one will live there unless obliged to do it either from impoverished circumstances, or from the necessity of being near their places of work.

1508. Have you heard any complaints from Government House in regard to the main sewer at Fort Macquarie and its effect upon the waters of Farn Cove? Yes. There have been frequent complaints for some years past as to the effect of the sewage matter upon the water and upon the atmosphere. But the plan of the present sewerage system was, as I said, adopted by the Government of that day, about twenty years back, and before the present Municipal Council was in existence. The locality for the outlet of the main sewer at Fort Macquarie was selected, I believe, by Governor Denison himself, who planned the course of the sewer to its present outlet.

1509. Have you any particular plan of sewerage that you would like to see carried out in place of the one now employed? I cannot say that I have any plan, because a work of this description will require very careful surveys, and the settlement of very many details before anything like a plan can be fixed upon. However, as a mere rough notion, I may say I have thought that if a main sewer could be constructed to take its rise in Liverpool-street, somewhere near Darling Harbour, and then be continued east to Bondi or some locality near there, as may be found most convenient, such a sewer if practicable would have the effect of carrying off all the storm-water and very much of the sewage matter from the Harbour of Port Jackson. With such a sewer I think it would be quite practicable to connect much of our present system of sewerage, so as to turn and intercept such of the sewage as was at the proper depth, and carry it away in the other direction.

1510. By whom in your opinion should this be done—should it be done by the Corporation or out of the general revenue? I regard it as a matter of general importance, as a question affecting the health of the public generally, and consequently it should be paid for out of the public funds. But there is another reason why this should be so: It was assumed at the beginning that the harbour was the natural cesspool for the City of Sydney, and as such it was adopted by the Government of the day. This was done altogether irrespective of the City, whose inhabitants had no voice in the matter, no Municipal Council being then in existence. When the Council came into existence it was obliged to accept things as they found them, and have since endeavoured to carry out the plan of the Government to the best of their ability and at considerable cost to their revenue. Seeing that the present plan was adopted by the Government and not by the Council, if it has proved a failure the Government and not the Council are to blame, so that should any alteration be made the Government should be the constructors of the new work and bear all the expense, since it was their mistake that made a change necessary. I may also say that should some such a sewer as that which I have suggested be constructed, it would be of very great benefit to many of the suburbs of the City. All those suburbs which lie to the east of the City would benefit most unmistakably by the carrying out of such a work.

J. Macintosh,  
Esq., M.L.A.

30 Oct., 1873.

1511. Can you give us any idea of what would be the probable expense of executing a work of that kind? Upon this point I can only say that the distance from Liverpool-street, at the point where I imagine the sewer should commence, to Bondi, is 4 miles. The distance from the Pheasant's Nest to the Cataract River, between which places Mr. Moriarty proposes to make a tunnel for the purpose of bringing water into Sydney, is also 4 miles. Mr. Moriarty estimates that the cost of constructing such a tunnel will be about £43,000. As the character of the work and the dimensions of the tunnel will be about the same in both cases, and as each will be carried through the same kind of country, that is, chiefly through a sandstone formation, I calculate that the cost of the sewer ought to be about the same as that of the water supply tunnel, or £43,000. That would be as far as the main sewer is concerned, but then other sewers would have to be constructed so as to intercept the great bulk of the sewage which now goes into the harbour. Of course this could only be done at such a level as would take the sewage into the new main sewer, leaving the other to flow as it does now out to its present outlet. If this were done, the whole of the storm-water and sewage matter of Sydney down to a certain level, say to within 20 feet of high water-mark in Darling Harbour and Woolloomooloo Bay, and to a lower level towards Rushcutter's Bay and Rose Bay, would be kept out of the harbour and turned out into the ocean. And in speaking of Rushcutter's Bay, I may inform the Committee that it is at present in a most filthy state from the effects of the sewage matter running into it from Paddington and a portion of Sydney. Were such a sewer as that I propose carried out, all the sewage matter now going there and forming the nucleus of disease for some few days would be carried away in another direction and emptied into the ocean. The same thing may be said of Double Bay as a branch sewer could be constructed there, thus increasing the value of property and enhancing the convenience of residents in that neighbourhood. Then again, some portion of our present watershed, which at present threatens to injure our water supply, could be turned off from the lower portion of Waverley so as to find an exit by this sewer. And this alone is by no means a matter to be lost sight of, for I may state, with regard to the watershed, that owing to the action taken by the Government of the day some short time back in alienating the land on the northern and eastern sides of the Sydney watershed, there have been during the last year or two a large number of houses built upon those two sides of the watershed, and that these buildings and this occupation of the ground is so rapidly increasing, that in the course of a few years it will be impossible to preserve the Botany water supply from pollution, owing to the drainage from so large an area of occupied land. When it comes to this point it will be found absolutely necessary to resume these lands; and to purchase the rights of the individuals who own the property on the portions of the watershed indicated will require a sum of something like £200,000 at least. All the way round from the Victoria Barracks to the western slope of the hills at Waverley the drainage comes down into the Sydney watershed, and will have to be diverted, if the land is not resumed. In this respect alone the main sewer I recommend would be of incalculable advantage. And whilst speaking of the pollution of our water supply, I may add that it is not merely on the north and east that it is threatened but also on the west, for south of the Randwick Racecourse and half a mile distant from it on the inner slope of the ridges to the creek preparations seem to be making for building. Then again, on the western side of the Randwick Racecourse, the lands of Sir Daniel Cooper cross the Botany watershed, and settlement is now taking place on them very fast. I saw some stables which have just been built upon the land, with large heaps of manure standing there within a very short distance of the stream which supplies Sydney with water. Thus to preserve the Botany watershed it will become absolutely necessary to purchase some 1,000 acres of Sir Daniel Cooper's land in order to prevent settlement upon them, and this ought to be done with as little delay as possible. Unless the rights of these individuals are purchased, or unless a law be passed to prevent persons from building on any portion of the present watershed, it is my firm opinion that in less than five years from the present time the water on the Botany shed will be polluted to that extent that it will be impossible to use it. The Committee will see that the impounding and the storing of water is absolutely necessary, in order to have a sufficient supply for our pumps. The soil upon which the water has to be stored is of a boggy character, being full of peat, so that from that circumstance alone the water is not improved by being stored upon it; but when to this is added the fact that the water has to lie stagnant upon it for a time, it can be readily understood how if it be polluted by the fouling of the eastern, northern, and western portions of the watershed, a very great and serious injury may arise. So much will this be the case, that I fear with a few heavy floods to wash down the objectionable matters from these parts into the waterway, the water will be made unusable to the citizens within a very few years of the present time. On the other hand I can say confidently that had the Botany watershed been kept free from houses and occupation, and been preserved as nearly as possible in its natural state, there is no similar area of land of equal value as a water reserve in the neighbourhood of any City that I know of in the civilized world.

1512. Then, for the purposes of a water supply, you consider the Botany watershed to be equal to anything you have seen? Yes; for the purpose of supplying a large City with water. It is an immense natural basin, fully 100 feet deep, filled up entirely with sand and water, and quite equal to the supply of a City very much more populous than Sydney. I may say that the rates levied on the citizens of Sydney are 1s. in the £ on the annual value of all improved property—this being a City rate, for the general improvements of the City; and for the payment of water a rate of 5s. per room is levied. With regard to the sewerage,

wo

J. Macintosh, Esq., M.L.A.  
30 Oct., 1873.

we have never had an opportunity of levying any rate for that purpose, the law being imperfect, and giving us no power to recover them. We of course levy a sewerage rate, but we are to a very great extent compelled to accept this rate as a voluntary payment from the people. Only those pay who chose to do so voluntarily, as we have no power to enforce payment. As far as the City rate is concerned, I am of opinion that the revenue ought to be increased by an authorized charge, by way of rate, upon all vacant lands, whether belonging to the Government or to private persons. In fact, after giving the matter a very full and careful consideration, I have come to the fixed conclusion that in order to enable the Corporation to carry on properly the works entrusted to it, and to execute those works to the satisfaction of the public, the Council would require to have a revenue of from £80,000 to £90,000 a year of actual money at their disposal to expend. There are many of the streets from which very little revenue is derived, and yet they are of a very expensive character to make and maintain. Some of them, to my knowledge, have cost £10,000 or £12,000, and possibly not £100 of revenue is derived from the rates on the properties abutting on these streets. The aldermen of course consider it necessary to construct these streets for the sake of the City, as the City takes its character not from two or three or four streets kept in good order, but from the state of its streets generally. The work, though giving no commensurate return, has therefore to be done, as well for the reputation of the City as for the necessity of keeping it in an healthy and proper state, in which it cannot be with our made streets. I may mention one case in particular, that of Brougham-street, from which we get very little revenue. The formation of that street cost the Corporation a large amount of money, whilst the revenue derived from it is hardly more than sufficient to pay for the gas by which it is lighted, or about 25 per cent. of the annual outlay. In reference to this, I may explain that it takes one-quarter of our revenue to light the City with gas, the expense of lighting being about 3d. in the £ on the assessed property. The lighting has to be paid for out of the City rate, owing to our not being able under the Act to raise a lighting rate.

1513. *Mr. Webb.*] You state that you believe the publicans' and other licenses for the City would amount to something like £12,000? Yes, at a rough estimate; I have not gone closely into the figures.

1514. If the Government paid all the taxes you could claim from them—City rate, water rate, and sewerage rate—on all their property within the City, and if you received the £10,000 now stopped from you as payment of the interest on what are called the sewerage and water debentures, would that, in your opinion, be sufficient for the City;—could you get on with it? Not unless the old debt was cancelled. It must be remembered that the City was never consulted in the matter of this debt, and that it has really received no benefit from the expenditure of the money.

1515. Then if the old debt were cancelled the rates paid by the Government, and these £10,000 yearly handed over to you, they would meet all your requirements? Yes; if we received also an amount equivalent to the sums received from licenses in the City.

1516. Would you require that as well as all the other matters I have mentioned? We should; we have still some very expensive works which require to be constructed.

1517. Then what you wish is to tax all Government property, to be relieved of your old debt, to receive £10,000, and to receive an amount equal to that received from licenses? No, not the £10,000.

1518. You think you could do without that if you had the rest? Yes, we could do without that; and all the more readily in the event of the railway being carried down direct to the wharfs, as that would very considerably deliver our streets from the traffic which now cuts them up; and this reminds me of another injustice that we suffer from: We get no revenue from vehicles of any description; our streets are cut up by the continued traffic of omnibuses, cabs, and other vehicles, and yet we get no revenue from them.

1519. Then, if you received £12,000, or the sum equal to the license money, and rates were made payable on Government property, you would be able to get on if the old debt were extinguished? Yes, if, in addition, we get the power to levy rates on vacant land.

1520. Do you not think you would be used quite as fairly if you received an endowment of £10,000, had the old debt extinguished, and had power to levy rates on Government property, and did not receive the licenses for the City? The Corporation do not wish for any of the licenses; they do not desire to have anything to do with them. All they want is that the Government shall give them an equivalent sum to that which they themselves receive from licenses.

1521. You see the endowment is £10,000, and the license money you estimate at £12,000, only £2,000 more,—do you not think then that one is within a very little of being as good as the other? I do not think that the £10,000 would be sufficient.

1522. With what amount do you consider it would be a fair thing to endow the Corporation of Sydney? Our revenue is now £48,000 for City improvements—that is, the revenue derivable from all sources. To enable the Council to go on with the necessary works, and to carry them on in a proper manner, that revenue would require to be increased from £48,000 to £80,000 or £90,000. Owing to the large amount of traffic on our streets we find that the sandstone kerbing and guttering we now use last but a very short time, and the Council would require to go to the expense of replacing these in the principal streets by stone of a harder quality, either Melbourne bluestone or granite. Material of this description would be very costly in the first instance, but would be much more serviceable than that which is now used. We have already had some experience of the granite kerbing, and there are places where it has been in use for the last twenty years, and is now as good as on the day when it was put down. The aldermen have all acknowledged the advantage of using this stone, and are in fact desirous of introducing it generally, but they have been unable to do so from the want of means. The first cost would be very heavy, as it could not be put down under 6s. or 7s. per cubic foot.

1523. Then, according to your idea, the best way to endow the City would be to give the Council all the rates payable on Government buildings, a sum of money equal in amount to all the licenses collected in the City, and for the Government to relieve the Corporation of the present sewerage debt? And the water-supply debt.

1524. Leaving that out of the question for the present, do you consider that to be the best scheme? I do.

1525. The City Corporation received a considerable sum some time ago for the licenses of cabs and 'buses? They did.

1526. What amount was received under the new Act? The Corporation have received no money under the Metropolitan Transit Commissioners Act; but I can tell you what the Corporation have lost—they have lost, between the licenses to vehicles and drivers, and fees, and fines, somewhere about £4,000 a year.

1527. They have lost that through the introduction of the new Act? Yes.

1528. And the Corporation have also been deprived of all control over the vehicles? Yes, and we have also been deprived of the revenue which we have received since our incorporation, from the licenses paid by the hawkers of vegetables through the City; this amount alone was something like £1,400 a year. This also we have lost during the last twelve months.

J. Macintosh,  
Esq., M.L.A.

30 Oct., 1873.

1529. Can you furnish the Committee with the reasons assigned for depriving the Corporation of the power of licensing the omnibuses and cabs plying in the City of Sydney? The Bill was introduced into Parliament and passed, depriving the Corporation of the management and control of the omnibuses, cabs, and public vehicles, and also of all the revenue derived from them. The Legislature was under the impression that the Corporation were not the proper parties to have the sole control of all the public vehicles, seeing that these vehicles plied also within the limits of other Municipalities than that of Sydney. Seeing this, the Legislature thought that three Commissioners would be a better means of dealing with the various interests involved; but from our experience of the working of the system up to the present time this has hardly been proved to be the case.

1530. Was there not another reason—that the vehicles were not kept clean; that the horses were in bad condition; and that the drivers were not looked after? Complaints were made by interested individuals to the effect that there was a difficulty in getting stands appointed in proper places; that the vehicles were not in such order as they ought to have been in; and that the horses were in such a condition as to be unfit for work. These complaints were being remedied by degrees, and as fast as possible, just at the very time when the whole affair was taken out of the hands of the Council; indeed so much were the complaints being remedied that there has actually been no increased improvement in the vehicles or drivers since the time the management was taken out of our hands. One cause of the complaints made as to the state of the vehicles arose in this way: Prior to 1872 there were three years of extremely wet seasons, and the vehicles were not only not much employed, but also suffered more from wear and tear when they were employed. Cabs and omnibuses suffered to a very considerable extent, and the traffic fell off so much that the proprietors of the vehicles were much impoverished. In this state of things, knowing that these men, who had to get the living of themselves and their families by their vehicles, had not the means to put their cabs or 'buses in good order at once, the aldermen may possibly have shown too much forbearance to these men. Of course they might have refused to renew the licenses to many of these vehicles; but then, by so doing, they would have deprived many families of bread, which they were scarcely prepared to do. However, they took the next best step, and that was, to give as much encouragement as possible to the formation of companies, so that there might be funds available for procuring a better class of vehicle, and a superior quality of horse, and altering, by degrees, the 'bus traffic from that of the individual owner to that of the large public company. The Council found that this change which they had introduced was beginning to answer remarkably well, and was just coming to the point aimed at when the management was taken altogether out of the hands of the Council.

1531. Have you noticed any marked improvement in 'buses and cabs since the present Commissioners have had control of them? No; none but what was inevitable from the preliminary or initiatory steps taken by the Corporation to introduce the new system of 'buses.

1532. Have the Corporation still power over cabs and 'buses in the City? None whatever.

1533. So that cab and 'bus proprietors use your streets and yet pay nothing towards your revenue? Nothing whatever; and it is not merely the cabs and 'buses, but no vehicle at all, either public or private, pays anything to our revenue.

1534. Do you think that is equitable to the Corporation? Most certainly not; on the contrary, it is most inequitable. It cannot but be most damaging to the City, that the streets should be cut up by vehicles which pay nothing to their maintenance, and whose owners reside more often outside the City boundary than they do within it. By this the burden of maintaining the streets in good order is thrown, not upon those who use them, but upon the owners and occupiers of the property of the City. And here is where the unfairness is shown: The resident of Sydney cannot go out of the City in any direction without being called upon to pay a heavy toll on his vehicle, of 9d. in some places and 6d. in others; whilst the residents of the suburbs can come into Sydney and use the streets free of charge.

1535. I suppose then you consider that this state of things requires to be remedied? I have long thought so; and several Bills have been introduced at different times, at the instance of the Corporation, for the purpose of providing a remedy for many of the matters I have mentioned; but from some reason or other these Bills have all fallen through.

1536. With regard to the foot-paths of the City, you have heard it said in evidence that they were in a bad state of repair;—under what system are they made? It must be admitted that generally they are not in good repair. There is a Paving Act; but it applies only to certain parts of the City. It is in operation in all that part of Sydney included between George-street and Elizabeth-street. It also applies to the South Head Road and to William-street. All to the east of George-street up to Elizabeth-street is under the Paving Act; and it extends in George-street from the Circular Quay to the Newtown Road. Then, with the exception of William-street and the South Head Road, no other part of the City has been brought under the Act.

1537. Do you think it would be desirable to do this—to bring the rest of the City under the Act? I do, for many reasons. In the first place, it would have the effect of causing many of the encroachments upon the foot-paths to be removed. The Corporation have had this in view for some time past, and latterly they passed a resolution to the effect that in the event of any private person paving his foot-path with good hard material, such as the Victoria blue-stone, the Corporation would afterwards take it in hand and keep it in repair. That resolution, however, cannot have the effect of law, and leaves it entirely to the discretion of the individual to make his foot-path or not. I know that in the various Cities of Britain, the Corporation make arrangements with the owners of property, by which, if the landlord consented to the paving of the foot-path in front of his premises, he could have five or ten years credit for the cost, provided that good material were laid down. On his agreeing to do this, the Corporation execute the work, and payment is taken from the landlord in yearly instalments running over from five to ten years. Something of the same thing might very well be done here.

1538. Then you think it would be desirable to extend the Paving Act to the whole of Sydney? I do, with a discretion to the Corporation to give five years' credit to the freeholder, receiving the cost in instalments spread over that term. Where the property is of but small value it would almost amount to a confiscation of the property to compel these persons to pay the money down, since the work could not be done

J. Macintosh, done under 2s. or 2s. 6d. per foot superficial for any other material than sandstone, which I do not consider it would be desirable to lay down.  
Esq., M.L.A.

30 Oct., 1873. 1539. You have given your views on the present system of sewerage, and have recommended in place of that system the construction of a main sewer from Liverpool-street to Bondi? That is a mere suggestion as to locality; without a survey it would be impossible to suggest a locality.

1540. You merely point out a rough plan without wishing to bind yourself to any particular spots? Exactly.

1541. Thus suppose the Government to construct a main sewer from some point in Liverpool-street to the sea-coast, do you think that the citizens would be able to manage the connections with the main sewer without asking assistance from the Government? Yes. If you will pass an Act to enable us to collect the rate from all persons benefited by the sewer whether they are connected with it or not.

1542. And would you be prepared to recommend that? I should.

1543. To what extent would you give the power of assessing to the sewerage;—how far would you say they should be to come within the designation of being within reach of a sewer? I would go to the extent of providing a revenue to maintain the works. In the case of the Metropolitan Board of Works, which has carried out works of a similar character to this, the Government of England have allowed a rate of 8d. or 9d. per ton upon all coals brought within the boundaries of the metropolitan district, and also a duty of 4s. per gallon upon all wine so brought within the boundaries for the purpose of providing a revenue for the construction of the works; and after their construction they have to be supported and maintained by a rate raised from amongst the persons who are benefited by the work.

1544. At all events if the Government constructed the main sewer upon a proper system, and full power were given for the collection of rates, the Corporation would be able to manage the construction of the necessary communications with the main sewer? Yes, supposing the main plan to be carried out by the Government.

1545. In reference to the water-rate and the present system under which it is collected, do you think the present a just system, or would you require its amendment? I have heard Mr. Woolcott's evidence on this point, and I must say that I differ from him. I have given the matter a very great deal of consideration, and after very carefully thinking the matter over I have come to the conclusion that the room rate is the only equitable plan that can be followed; because, in many instances, if you charged for the water actually consumed, the price would come very heavy upon a number of poor females who obtain their livelihood by taking in washing, and upon other persons who obtain a precarious living from the use of water; and then, on the other hand, if you put the rate upon the assessments, you would charge an exorbitant rate upon persons who perhaps pay a rental of £1,000 a year for their premises, and who yet use little or no water. If they paid £1,000 a year they would have to pay £50 a year water-rate, and very possibly they would not use so much water as persons who occupied a small house for which they only paid £20 a year.

1546. Have you ever considered that a good supply of water upon mercantile premises amounts to a great extent to an insurance? Such is the case; but in those instances the supply of water is taken into consideration in the insurance paid by these persons.

1547. Then even in that case should not the landlord contribute something more than he now does to the water-rate, seeing that he gets the advantage of the water supply in the rate he pays for insurance? I do not think he should.

1548. I may assume then that you approve of the present system of levying the water-rate? Yes; I have well considered the matter, and I have arrived at the conclusion that it is the most equitable plan we can devise, the Council reserving the power to charge special rates for manufactories and other persons requiring large quantities.

1549. Do you raise sufficient revenue by these means? Yes, to keep our works in a tolerable state of repair, and to lengthen the mains as much as our supply of water will warrant, so that in a few years I believe that our water will turn us in a good surplus revenue when we have finished the additions to our works which are now in contemplation; but I have changed my opinion with regard to the water-shed, not in so far as its value as a water-shed is concerned, but by reason of the pollution of the water that is now going on, and which there seems to be no means of preventing. The only way of doing this is to decultivate and depopulate the whole of the water-shed, and to authorize the Corporation to purchase it. I believe that it will take at least £200,000 to buy up the rights of the various parties interested in the land already alienated, and I do not think it would be either politic or proper to go to so heavy an expense as this. Under these circumstances I would wish myself that the water should be brought, for the benefit of the City, from the best possible source, and that source I believe to be the Nepean, as from that source we shall be able to procure an unlimited supply of water. My reason for laying so much stress upon this point of supply is this:—We have one large establishment, the Sugar Works in Parramatta-street, which consumed water to the annual value of between £600 and £700 at the rate at which it is supplied to them. That Company is under the impression that the Corporation charges them too much; the Corporation on the other hand have an idea that they charge the Company too little, because they say, "If we supplied the same amount of water to the householders of the City we should receive a much larger amount of revenue." Now if Sydney is destined, as I believe it is, to become, before very long, a large manufacturing City, we shall not have, as we have now, some half dozen establishments, but twenty, forty, or sixty establishments of equal size, requiring water to the same extent as is now used by the Sugar Works, the Mint, and other large establishments, and that too within the next few years. If this were the case we should never be able to secure a sufficient supply of water from the Botany and Lachlan Swamps.

1550. Then you are of opinion that our present source of supply is insufficient? Yes; if we have some thirty of such establishments as the Sugar Works and the Mint; and these we shall have within the next few years.

1551. So you advise that we should look out to get a supply of water from somewhere else than Botany? I do most certainly.

1552. And that I suppose as speedily as possible? Yes; there is no time to be lost, especially if the pollution of the water-shed, now going on, is not put a stop to. If something be not done at once I very much fear that in five years time the water will be so much deteriorated as to be unfit for use. With regard to the pollution, of which it was alleged that the Corporation had been the cause, I may say that  
although

although pollution to some extent had taken place, yet the Corporation has done all in their power to undo the mischief, and that considerable expense has been gone to, in order to remove the offensive material complained of. As all this stuff has now been carted away, that portion of the water-shed can be kept clean, but as to the other portion which I have alluded to, that to the north and the east of the water-shed, it is altogether beyond the control of the Corporation, and the mischief must unavoidably go on increasing every day. I may also state that there is a number of wool-washing establishments which have been settled down upon the outer edge of the basin of sand, and that these places obtain their water by cutting through the bog and tapping the sand which contains the main supply. This sand acts as a conductor to the water, so that if many of these wool-washing places are established a very large proportion of our water supply will be drawn off. There is a coating of peat or boggy earth which seems to me to be repellant to water, throwing the water off from it except only in extreme wet weather, when the water passes over it. This peat over-lies the sand, and these wool-washing establishments get on the edge of the bed of peat, cut into the clean sand, and at once get a fine supply of water for their washing arrangements. It can be easily seen that any large number of these must have the effect of draining this large subterranean basin right up to its northern extremity. I have before alluded to this large basin of sand. It is supposed at one time to have been an inlet of the sea from Botany, and has been traced by explorations and borings from Botany right up to Paddington and Waverley. Thus, as these establishments increase on the private lands bordering on the water-shed, our supply of water for the City will decrease proportionately.

J. Macintosh,  
Esq., M.L.A.

30 Oct., 1873.

1553. With reference to vacant lands within the City—have you any idea of what revenue would be obtained from them if they were assessed upon the same principle as that which is embodied in the Municipalities Act? I am of opinion that we should get something like £4,000 a year from this source.

1554. Do you think such an arrangement would be equitable and just? I do, most certainly; and besides, it must have a good effect upon the City. There are many now who own vacant lands, and will not sell or let them because they are put to no expense about the land which is gradually increased in value by the improvements going on around it. Now if a tax were levied on the land it would compel these persons to derive some benefit from the land in order to recoup themselves the annual outlay of taxation.

1555. There is another point to which I would direct your attention with reference to the distinction between vacant and improved lands;—are you aware that under the Municipalities Act any land without a fence is valued, and 5 per cent. of that value is regarded as the annual value on which the rate is paid; whereas if the land is fenced in it is considered as improved land, and the proprietor can successfully resist the imposition of the rate on the 5 per cent. principle, and can get off with the payment of only a few pence a year, the rate being on the rental and not on the value? Yes, I am aware of it.

1556. Do you think that is a desirable state of things? No, I do not. My own impression is, that the freehold land should be valued separately from the improvements on it. The rate upon the land should be considered as the landlord's tax, and that upon the house as the tenant's tax. In this way a much fairer system of valuation would be got at than by the present method. Land is considered to be occupied though there may be over so small a house in a big block of land, perhaps of an extent of several acres; and only a nominal rate is obtained from it. If each were assessed, the land and the house separately, where we now get a revenue of 10s. we should be quite likely to derive 20s. at least from the two; and in many instances the increase of revenue would be very much greater, and properly so too in such instances.

1557. That system of assessing however would not be likely to be satisfactory to the land-holder? No. I do not suppose it would be. It is somewhat difficult to arrive at a correct system of valuation that will suit all parties; but I think nothing could be fairer than to put one tax upon the land and another upon the house. That system of taxation has prevailed in Canada for many years past.

1558. Then you consider it objectionable to treat land which is only fenced in, as improved land? Yes; but in the City we take it as improved land only when there is a house on it.

1559. But I am alluding to the Municipalities Act, and that declares that land fenced in shall be taken to be improved land? I do not think that is a satisfactory method of dealing with the land. I have sat in the Appeal Courts when the assessments have been under review; and I have observed in a great many cases that land which is very valuable of itself, and which is being improved and rendered more valuable by the streets which are made around it, has not paid anything like the amount of taxation which it ought to have paid, or anything in proportion to that which was received from others.

1560. They are only assessed for what the property lets for, and not on its value? Yes.

1561. In the City of Sydney you have not the cumulative vote? No. Only the single vote. That is a matter in which the law will require to be revised.

1562. Would you recommend the vote in the City to be the same as in the Municipalities? From what has been stated by the witnesses examined before this Committee, I should be favourable to applying the cumulative vote to the City.

FRIDAY, 21 NOVEMBER, 1873.

Present:—

MR. BURNS, | MR. TUNKS,  
MR. FITZPATRICK, | MR. WEBB.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

James J. Riley, Esq., was called in and examined:—

1563. *Chairman.*] You have long been a resident in the Municipality of Penrith, have you not? I have; some eighteen years.

1564. You are the mayor of that Municipality? Yes.

1565. How long have you been mayor of Penrith? Since May, 1871. I was elected mayor on the first establishment of the Municipality, and have been mayor ever since.

1566. Do you know the area of the Municipality? 48 square miles.

1567. What is the amount of assessed taxes? £400.

1568. And the amount of the endowment would be equal to that I suppose? Yes.

1569.

J. J.  
Riley, Esq.

21 Nov., 1873.

J. J.  
Riley, Esq.  
21 Nov., 1873.

1539. And do you find that amount sufficient for the requirements of your Municipality—for the formation and making of your streets? We have a very large amount of roads to make, to form, repair, and so on. I may tell you that we have 43 miles of roads and 5 miles of streets in the Municipality.

1570. Do you find the amount which you receive from taxation, and from the Government, sufficient to maintain the streets in proper repair, and to form others as it becomes necessary to do so? No, certainly not; your question I take it, is rather vague, if you will excuse me. We spend such an amount as we have, but we could expend a much larger amount of money than we do at present. To form our roads and streets in the first instance would require an outlay of many thousands of pounds. When I tell you that we have 43 miles of roads within our Municipality, and 5 miles of streets within the Borough, you will be aware that it would take a very large amount of money to form those thoroughfares, and to keep them in good repair.

1571. But your main street is kept in a state of repair by the Government;—is it not? It is not kept in repair by the Government. It is part of one of the main thoroughfares of the Colony. We have now a correspondence with the Government as to that very piece of road; we have not taken it over yet as a portion of the Municipality, because it forms part of a main road, and we have asked the Government to put it in thorough repair before we do take it over. There are 2 miles of it.

1572. Are you of opinion that if the Government were to continue the same amount of endowment as you now receive, that that sum, together with the taxes you collect, would be sufficient to maintain your roads in a sufficient state of repair, and to form others as the population widens to require them? Yes; we should gradually form our roads. If we got that amount I should say we should do very well indeed.

1573. You think that you would be able to perform the functions of your office with satisfaction to yourselves and to the public if such were the case? Decidedly.

1574. Is there anything that you would wish to state to the Committee with regard to any proposed amendment you might think to be desirable in the Municipalities Act? No; I think not.

1575. Take the election of mayor, for instance? That is one point which I think might with very great advantage to the Municipalities be dealt with. With us—and we naturally look at home—a difficulty can scarcely arise with regard to an equality of votes. We have nine aldermen.

1576. That is in the event of a full attendance? In the event of a full attendance. With regard to the evenness of the vote in the election of a mayor, I think it would in all cases simplify matters if the senior alderman, that is the alderman who has the greatest number of votes, were to be declared mayor.

1577. The alderman who received the largest number of votes for the ward? For the ward or Municipality.

1578. But in the event of a sham candidate being brought forward, who would not poll more than a dozen votes, the ratepayers might not trouble themselves to record their votes for the candidate whom they regarded as certain to be elected; and in that case an alderman, who was really very popular might not receive more than three or four dozen votes? That is an aspect of the question which I have hardly considered. With us there are three who retire by rotation, and thus there are three who have to be elected. One of those three must get more votes than the other two; and in that case I should consider him the senior alderman.

1579. The wards would have to be so divided that there would have to be an equal number of voters in each? Our Municipality is not divided into wards.

1580. *Mr. Tunks.*] Would it not be a better mode to determine the matter by lot? You mean in the event of an equality of votes?—yes.

1581. *Chairman.*] With regard to the assessment of property, do you think that it is necessary that property should be assessed every year, or would not once in three years be sufficient, giving the Council power to assess newly erected properties? I should be inclined to have the property assessed every year, because there are always changes taking place; in a rural district especially, farms which are let this year may not be let next, or they may not be let to the same individual.

1582. Do you employ a council clerk? Yes.

1583. What salary do you pay him? £60 a year; and he acts as clerk, treasurer, collector of the rates, and so forth.

1584. Does he perform the duties of road superintendent also? No.

1585. The aldermen perform that duty among themselves? There are three elected each year as a Works Committee, and they do that work.

1586. I presume you do your work by day labour? No; we get it done by tender.

1587. Do the aldermen make out the specifications? Yes.

1588. What is the cost of a yard of blue metal? We have never gone into blue metal yet.

1589. The cost is merely nominal I suppose; that is, the cost of the material? Our road-making material is the natural gravel-boulders, which, after the road is formed, we do at the rate of 2s. 6d. a yard. In fact I think the last contract was at the rate of 2s. 3d.

1590. *Mr. Tunks.*] What you get is shingle? Shingle—screened-boulders.

1591. You dig it out of the bank? We dig it out of the bank.

1592. *Chairman.*] Spread? Yes; spread.

1593. I presume your Council is not in debt? Well, we have a cash credit at the local Bank; and I think when our rates are paid we shall be perhaps at the end of this year £50 in debt; that is, we shall have overdrawn our cash credit to the extent of £50.

1594. Could you state the amount of your expenses; that is, what you have to pay for advertising, clerical work, interest, and so on—the amount of the working expenses of the Municipality, exclusive of the money spent upon improvements? About £120.

1595. Do you think that your Municipality is sufficiently large for its economical working,—taking into consideration the whole Colony or Municipal system? We could work a much larger Municipality with the same expense—an area four times the size with the same staff.

1596. Do you assess vacant lands? Yes.

1597. *Mr. Tunks.*] Have you experienced any difficulty in working the present Act? No.

1598. With some trifling alterations you could go on with it? Yes; I think so.

1599. I suppose, in common with others, you consider that increased endowment would assist you? By increased endowment do you mean anything beyond £ for £? We are still receiving that.

1600. Then you are in your first five years? We are in our first five years. We were only incorporated in May, 1871. We should be very well content to get £ for £.

J. J.  
Riley, Esq.

21 Nov., 1873.

1601. *Mr. Burns.*] Have you not got some special advantage by reason of the main road passing through your Municipality? On the contrary, the Government have not spent one sixpence upon it. I am speaking of repairs annually. A man with a barrow and pick I have seen about once in six months filling in a few holes.

1602. How long is it since the Government ceased to keep that road in repair? They have not done anything to it for years, excepting one portion, which they have metalled lately. This portion was lately metalled at a cost of some £600, which has been almost in a state of nature but for some small attempt at forming. It is one of the main roads of the Colony—portion of the Great Western Road—along which all the sheep and cattle pass which travel through the Municipality.

1603. And do the Government now contribute nothing towards this road? They offered us £60 the other day, which was about our proportion of the amount of tollage we are entitled to on the bridge.

1604. After the Government endowment ceases will your revenue be sufficient to carry on the works of the Municipality? No; I say now certainly not.

1605. *Mr. Tunks.*] The source of your revenue arises, I suppose, from the rating of cultivated lands? No; not cultivated land. There is very little cultivated land in the district. It is raised from waste lands, cultivated lands, and from the village of Penrith.

1606. *Mr. Webb.*] Have you any difficulty in collecting the rates? No.

1607. Do you succeed in getting the amount from the tenants? As to that I can hardly say. I can hardly tell you whether the rate is paid by the landlord or the tenant. We have had no difficulty in getting our rates. There may be some little dispute between the landlord and the tenant, but that we know nothing of as a Municipal Council.

1608. You have all the ratable property assessed every year? Yes.

1609. You think that necessary? I have already said that I think it is necessary. I may state that the expense is very much less than it was at the first onset, when we had a good deal of money to pay. Now they have access to the old rates, and the collectors do the work very much cheaper.

1610. Why do you consider it necessary to reassess the property every year? We have a shifting population. The Land Act has offered such tremendous advantages to small tenant farmers as have induced them to become free-selectors; and half a dozen properties may thus become vacant in the course of the year. These properties may be relet, but they are apt to become deteriorated in value by the changes of tenancy.

1611. *Mr. Fitzpatrick.*] You said that you had about 43 miles of road in your Municipality. What assistance do you get from the Government in the maintenance of those roads? We get assistance in four cases. I cannot tell how many miles, but the mileage is £7.

1612. You do not require to use the Municipal rates in sustaining those roads? So far as the roads are concerned, in which I am a trustee, we have generally, with the sanction of the Government, amalgamated the funds of the trust and the Council. Suppose a mile of road wants repairing, the trustees give £50, and the Municipality does the same; so that for the £100 we get a much better job than could otherwise be made.

1613. *Chairman.*] What buildings or properties are exempt from taxation in your Municipality? Only those which are exempted by the Act—public schools, churches, and Government buildings.

1614. Manse? I do not think there is a manse there.

1615. *Mr. Webb.*] Any ministers' residences? We have no manse, but we have parsonages which pay rates.

1616. *Chairman.*] What is the rate of wages paid to labourers within your Municipality? Day labourers?

1617. Yes? 4s. 6d. a day.

1618. With horse and cart or a team? The ordinary labourer gets 4s. 6d. Latterly we tried the experiment of having a ganger, to whom we paid 6s. 6d., and a cart and horse, for which we paid 5s. 6d.

1619. Are you in favour of Municipal government as it now exists under the Municipalities Act? Yes.

1620. Are you of opinion that it should be extended throughout the Colony wherever there is a sufficiently large population to be incorporated? Yes, I think so.

1621. Do your aldermen attend to their duties punctually? Yes, very fairly.

1622. You have had some experience with regard to trust roads, being a trustee yourself? Yes, for a good many years.

1623. Might I ask you whether you are of opinion that the expenses—I mean the office expenses—are greater under the Municipal system than under the trustee system? Infinitely. With us the road trusts have never cost the Government one single sixpence; we have expended the money the Government has entrusted to us without the deduction of a single sixpence.

1624. Are there any tolls in your Municipality? Not yet. By-laws have been sent to the Government to allow us to establish tolls—that is to say, tolls under the Municipal Council.

1625. Has your Council given any attention to the subject of water supply? Well, it has been mooted once or twice.

1626. Is the necessity apparent? No, I do not think it is.

1627. Sewerage, I suppose, you do not require? No. As to water we have an inexhaustible supply within a very short distance of the town; the Nepean is within a mile of the town; we are supplied by means of carts. We applied to the Railway Department of the Government to ask them to let us have a tap to facilitate the cartage of water to the inhabitants, but they refused.

1628. Are you favourable to the system of appointing road trusts in Municipalities? Certainly not; I think they ought all to be handed over to the Municipalities.

1629. *Mr. Tunks.*] Has it come within your knowledge that in several Municipalities they have ceased to get money for the trustees to expend? No, it has not.

1630. *Chairman.*] Is there any other matter with regard to the Municipal system upon which you have not been questioned, but upon which you would like to speak? I think not. The gentleman opposite has asked a question which may fairly give rise to the consideration as to whether any roads which are within a Municipality should be subsidized, especially while the Municipality is receiving £ for £. We have received it, and expended it; but I think not quite fairly to the rest of the Country.

1631. You have not found any difficulty in working the Act? No.

1632. So that you have nothing to object to in the Act with the exception that you think the provision in reference to the election of mayor might be amended? I think that is the only thing which has come across my mind.

John Brown, Esq., called in and examined:—

- J. Brown,  
Esq.  
21 Nov., 1873.
1633. *Chairman.*] You are an old resident in the Municipality of Wollongong? Yes.
1634. You are a member of the Municipal Council? Yes.
1635. How long have you been in the Municipal Council? Three years come February.
1636. You are now mayor of the Borough? No; an alderman.
1637. Could you tell the Committee the area of the Municipality of Wollongong? I have not precise information with me on that point, but I could tell you the length of the streets.
1638. You could ascertain the area in Wollongong? Yes.
1639. Perhaps you will supply that information when you come to revise your evidence? Yes.
1640. Could you state the length of the roads in your Municipality? Yes; 14 miles altogether.
1641. What is the population? That I did not get exactly before I came away, but I suppose you will have it in the Census.
1642. What is the amount of taxation arising from the assessment of property? £325.
1643. What amount do you receive from Government? At the present time £80 a year.
1644. From the facilities you have of obtaining metal you are in a position which enables you to carry on the works of the Municipality cheaply and satisfactorily? No. I believe so unsatisfactorily that if there is not some further provision made by-and-by the Municipal incorporation must cease.
1645. Have you got a town hall? No; we rent a hall.
1646. What rent do you pay for it? I think it is £16 a year.
1647. What is the present amount of your indebtedness? £400.
1648. Does that comprise the whole of your debts—your overdrawn account and everything? Yes; I believe that will cover the whole of our debts. Last year we borrowed £400 from the English, Scottish, and Australian Chartered Bank, the terms of which were that £100 should be paid off each year. £100 have been paid off; but there are accounts outstanding which will bring up our indebtedness as nearly as possible to the sum I have named—£400.
1649. Do you employ a Council clerk? Yes.
1650. What amount do you pay him? £40 a year.
1651. What are his duties? He takes the minutes of the Council's meetings, makes out the rate-papers, and does all the clerical work that requires to be done.
1652. Does he superintend the making of the roads? No.
1653. Is your work carried out by day labour or by contract? One man is kept employed as a day labourer. He has also a horse and cart; and at times when it may be necessary he has a man with him, and his horse and cart. At other times he works by himself. He gets 5s. a day for his own labour, and 8s. when he has the horse and cart. He is a very good man, and is paid below the ordinary rate for labour in the district, but then he is employed all the year round. And larger works are let by contract.
1654. What is the general rate which contractors pay for labour? 6s. and 7s. a day.
1655. What is the cost to you of a cubic yard of metal or gravel? Of metal?
1656. Yes? We have been paying 9s. 6d. for it.
1657. Spread on the street? No, delivered on the wharf. We have had to get it from Kiama. We had some broken in the gaol, but now that the prisoners are removed we have not that facility.
1658. Your main road, I presume, is maintained in repair by the Government? No; we have no roads maintained by the Government.
1659. None within your Municipality? None within our Municipality. There are a few chains of road round the wharf under the control of the Government, and for the maintenance of which the Government is responsible.
1660. In the event of the Parliament taking into consideration the prospect of continuing the present Municipal system, what amount would you reasonably require to be endowed with to enable you to perform your Municipal functions satisfactorily—to make and maintain your roads in reasonably good repair? That is rather a difficult question to answer. To give utterance to my own individual opinion—
1661. The Committee would prefer to have your own opinion? My opinion is that 10s. to the £ would be a fair and equitable endowment.
1662. For what length of time? It should be permanent; and I believe that £ for £ for ten years would be necessary on the first establishment of any Municipality.
1663. £ for £ for the first ten years, and 10s. as a permanent endowment afterwards? Yes.
1664. What reserves are there in your Municipality? In one block, including the permanent and temporary common, there are something over 100 acres. The permanent common is 84 acres; what the extent of the temporary common is I cannot say. There is the racecourse and recreation ground in it.
1665. What revenue does the Council derive from the lands given to them in trust by the Government? The reserve is so situated now that we cannot derive any revenue from it. That is one of the grievances of the Municipality.
1666. Is the Council at any expense with regard to these reserves? It is not at any expense, but they are so situated that they cannot form the roads, and cannot re-arrange the common as they wish to do, because of the racecourse, which is in the centre of it, not fenced in and under trust. If any of the ratepayers turn any of their cattle on to the reserve, and if they get on to the racecourse, they are liable to be impounded. We derive no revenue at all from the reserve now.
1667. Are there any trust roads within the Municipality? Not any.
1668. Is that the racecourse about a mile south of Wollongong? It is about a mile south; but it is not in the road,—it is near to the beach.
1669. Is that given over to the Municipality? The racecourse is not; it is vested in other trustees for the race club. It is described as a recreation ground, but it cannot be used for any other purpose, except by leave from the trustees.
1670. What endowment of land have the Government given? To the race club?
1671. No, to the Municipal Council? The permanent common is 84 acres, and, I believe, the temporary common is about 90 acres.
1672. Are there any lands that you could let on lease for building purposes, so as to derive a rent from them at some future time? None.
1673. Has your Council given their attention to the question of a water supply for the town of Wollongong? Yes.

J. Brown,  
Esq.

21 Nov., 1873.

1674. What steps have they taken? They have had one or two surveys made and estimates framed. I should say they have spent something like £100 in examinations and surveys, but that is all that they have done as yet.

1675. If the Government were to continue the endowment as you suggest, the Council would be enabled to obtain a water supply? There were two or three creeks proposed as suitable sources of a water supply. The creek that the survey was made of is called Hell Hole. There are creeks which might be made available for this purpose, but if the water were brought from Hell Hole the works would be so expensive that the Corporation would never be able to carry them out. It is upon this that the money for the surveys have been spent.

1676. What is the reason why you have not had a supply of water to Wollongong? The funds of the Council have not been sufficient for the purpose. That is the main reason. There are other considerations connected with the subject. I do not know that the formation of a water reserve would be practicable to the Corporation. If the Government were to lend money to the Municipalities they might be able to carry out works of this kind, and perhaps be able to keep the cost of them within the smaller endowment. One of the great difficulties which Councils have to contend against now is the high price they have to pay for money.

1677. What number of aldermen have you got? Nine.

1678. Do they attend punctually to their duties? Reasonably so.

1679. You have always a quorum? Not always; perhaps two or three meetings have lapsed this year for want of a quorum.

1680. Are you of opinion that if Municipal Councils were enabled to perform their duties more satisfactorily they would take more interest? No, I think the number of aldermen is too many for the place. One of the main reasons is, I believe, that the Municipalities are so small that they become petty, and there is not so much attention paid to them as there ought to be. People do not take so much interest in them as they would do if the areas of the Municipalities were larger.

1681. Are you of opinion that the Municipality of Wollongong ought to be extended? I am.

1682. To what extent? To the extent of the police district.

1683. What is the area of that? I do not know the exact number of square miles it would contain, but the size of the police district would not be a bit too large.

1684. Take the wharf at Wollongong as the centre, how far south would you place the boundary? About 14 miles, and about 12 or 14 miles north—about 28 miles from north to south; and I would carry it back to the centre of the ridge of the mountain.

1685. How many miles would it be to the crown of the mountain? About 7 miles.

1686. Could that area, incorporated as a Municipality, be worked at the same expense for office purposes? I do not think that it could be worked at the same cost, but there would be this benefit, the Council could employ a superior class of officers. They could, for instance, afford to employ a town clerk who would find it worth his while to inform himself about Municipal matters. Now persons are employed who know nothing about the business, and who are often incapable of informing themselves with regard to these matters.

1687. Are you in favour of the Municipal system as it now exists? I am, with these and some other alterations, and I believe it is a benefit to the country.

1688. And you are of opinion that it would be beneficial to the Colony to extend the system to all districts where there is a sufficient population? Yes; and I think it should be made compulsory.

1689. Compulsory? Yes.

1690. Are you of opinion that the Act should be amended so as to prevent one portion of a Municipality separating from another? Yes; I believe it is an injury to the people in any district that the Municipality should be small.

1691. Are you of opinion that the rates collected in a particular ward should be expended in that ward? Yes; and then all the advantages of the present system would be obtained with the additional benefit of superior management.

1692. What amendments would you suggest in the Act besides those you have mentioned, or do you think that any amendments are required. With regard to the mayor, for instance, are you satisfied with the provisions of the law in that particular? Do you mean with reference to the present system of electing the mayor?

1693. Yes? I am myself inclined to the opinion that the mayor should be elected by the whole Municipality.

1694. Are you of opinion that it is advisable to assess the property yearly? Not as the system is at present. I think that a legal and full assessment should be made about once every seven years, and that the revision of the assessment should be left in the hands of the Council, without going to any other expense than that which is involved in the appointment of a proper assessor. At present persons are often appointed who are thoroughly incompetent to perform their duties.

1695. Is your district of so much importance that it would be necessary to assess property more frequently than once in seven years? At the present time it is not improving fast; any improvements that are made could be taken account of by a yearly reviser. Another reason why the size of the Municipality should be extended is this—that the number of men required to fill the offices of aldermen is larger than there are competent men available in such small communities.

1696. If the area of the Municipalities were to be extended there would be a larger number of qualified men to choose from as aldermen? Yes. Take our district for example: It is not capable of supplying nine men, nine competent men, who are free to perform the duties of aldermen. Men are taken to fill up the number who are totally unfit for the office, or men have to be forced into the Council whose business engagements are such that it would be better for them to keep out.

1697. Have you any knowledge of the district adjoining—of the Municipality of Kiama? Not much. I have done some building contracts there, and I have been at Kiama during the time that those contracts were being carried on. That is all.

1698. From your knowledge of the locality do you think that your observations would also be applicable to Kiama? I believe they would—almost exactly.

1699. What you have stated with regard to Wollongong would be almost equally true of Kiama? I believe so, exactly. I regard that as a very important matter—that with regard to the number of aldermen.

1700. *Mr. Burns.*] If you had the area extended in the way you have pointed out, do you think you would get a sufficient number of competent men as aldermen? I am satisfied that it would be easier to find

J. Brown,  
Esq.

21 Nov., 1873.

nine competent men in the whole district than it would be from a small community in a portion of it. I believe they could be found.

1701. Would you get persons to attend from a distance? Yes; the distance is not so great. From the far end of the district there are people coming into Wollongong three or four times a week upon an average, especially people such as those who would be likely to be elected aldermen. Again, where the Municipality is small, a number of petty local influences come in to overrule the determination of questions in the Council. If three or four persons agree they can almost turn the scale on any question in a way that is contrary to what would be beneficial.

1702. I presume that in any case three or four persons would turn the scale in the Council? Yes; but now three or four persons out of the Council can acquire influence enough to do it.

1703. *Mr. Tunks.*] Large and small are relative terms;—what do you mean by a large Municipality, or what do you mean by a small one;—is Wollongong small in numbers or in area? It is small in both respects; but there is another Municipality near to Wollongong, which is larger in area and smaller in the number of the ratepayers.

1704. What object would you gain by making them larger? The revenue from the whole area conjoined would be sufficient to enable the Council to employ competent persons to perform the duties which have to be done by voluntary labour, duties which are almost always left undone, or done very slovenly.

1705. What do you suppose is the area of Wollongong? I think it is about 2 miles each way. That extent would be the very outside.

1706. Where there are small areas inhabited by a large number of persons, the tendency would be to encourage selfishness on the part of those who had a relatively large amount of money to expend on a small space? Yes. These smaller interests can operate most successfully in the smaller Municipalities. Where the area of a Municipality is large, there are a number of interests, and one acts as a check upon another.

1707. Small areas, like townships for instance, receive more money relatively than some of the country places where the population is not so numerous, and the selfishness of the former would dictate to them that it would be better for them to incorporate in small areas? I do not think so, though perhaps I do not rightly understand the import of your question. Where there is a large number of people there are more streets to be attended to, and if you extend the area very much, while the number of ratepayers is not in proportion, yet still perhaps there may be only one main road requiring to be looked after. I believe that it would secure all the advantages of the present system if large Municipalities were divided into wards, and if each ward were to have the funds contributed by it expended on improvements in it, deducting, of course, a proportion for the general expenses of the Municipality.

1708. Is it, in your opinion, absolutely necessary that the money should be expended in the ward in which it is collected? I think it would be right.

1709. Suppose you had a reserve situated in a particular ward, would you think it right that that ward should pay the cost of management when the reserve is for the benefit of the whole of the Municipality? No. There are general expenses, and any work which is for the general benefit of the whole of the Municipality should be paid out of the general expenses contributed by the whole of the Municipality.

1710. In that view of the matter it is not absolutely necessary that the money collected in a ward should be spent in it? Not to the strict farthing. The reason why it should be is this, that where there are three wards for instance, two may combine and spend the money raised from the whole of the Municipality, in works in which they only are interested, the other portion of the district being left unattended to. The thing has not operated in that way at Wollongong, but I know of Municipalities where it has, Kiama, for instance.

1711. You have a wharf made at the public expense? Yes.

1712. If that wharf had had to be made by the ward in which it is situated it would have been a great drain upon its funds? Yes, but it is a work which would be of benefit to all.

1713. You say that you are in favour of compulsory incorporation? Yes.

1714. How would you propose to effect that? I am not prepared to say exactly how it could be effected; but I know that it is looked upon as a great grievance by those who are incorporated and who tax themselves for local improvements, that there should be other parts of the Colony which are not incorporated, but where the local works are carried out at the cost of the central Government.

1715. That is where they get money voted by Parliament? Yes.

1716. If persons were unwilling to incorporate, how would you compel them to do so? The rule which exists now would be applicable to some extent; if a place is incorporated and the people neglect to elect aldermen the Government has the power to appoint them. It might be done on some such system as that. As an instance of the unfairness of the present system, I may mention the Municipality of Wollongong, where the people tax themselves for making their roads and keeping them in repair; but a few miles further north there is Bulli, where the people are not incorporated, and there the Parliament votes money for their roads.

1717. It would be advantageous if these places were all in one Municipality? It would; it would do away with a real grievance.

1718. In your opinion it would be a good thing that the mayor should be elected by the ratepayers? My sympathies are in favour of that plan; but I have not reasoned the matter out, so as to be sure that it would be beneficial.

1719. You are a mayor? No.

1720. An alderman? Yes.

1721. Do you think that it is necessary that a mayor should have the confidence of the body over which he presides? He should.

1722. Would not that object be defeated by the ratepayers electing a man who might be very unfit for managing the Council, although he might be popular amongst the ratepayers? No; I believe that he would have the confidence of the body elected from the same source as himself.

1723. As regards the Council;—if they were to undertake to amend the rate, would it not bring a great deal of importunity upon the aldermen, by reason of certain persons urging them to make the rate such as would suit particular individuals? I think not.

1724. Would it not be better to have some person under the obligation of an oath, to act fairly, than to expose the Council to being continually teased to alter or reduce the rate? That is to some extent contingent upon the extended area of the Municipality.

1725. Have you not got the power now? I think the Council is bound to employ an assessor each year.  
 1726. The Council could alter or amend the rate now? I brought that question forward in the Council myself, and it was decided against me. The 170th section of the Act says that they can, but another part of the Act seems to make it compulsory that they shall appoint assessors.

J. Brown,  
Esq.  
21 Nov., 1873.

1727. That is merely a resolution of your Council, that it cannot be done? Yes; the 170th section gives power in my opinion. Under that 170th clause I believe the annual revision of the rates by the Council would work well.

1728. Suppose you were to make the rate strictly correct, by any means you chose to adopt, and supposing the persons rated were to apply to the nearest police court, would not the number of appeals disarrange matters pretty considerably? No; because it would only be necessary to allow the appeal in cases where the rate had been altered.

1729. Everybody has the right to appeal every year under the present Act? I do not think that the right of appeal would be necessary, excepting in cases where the rate or the assessment was altered.

1730. Suppose they have the right of appeal—is it not the tendency of Magistrates to make concessions to persons who appeal? Very often that is so; a good deal depends on the constitution of the Bench for the time being.

1731. Can you suggest any other mode of appeal besides that? No; I think there is no other mode available. Upon the whole, I think that is the fairest mode that can be adopted.

1732. Do you pay the mayor in your Municipality? No.

1733. I mean a salary? No; we do not pay him a salary.

1734. It is considered by a great number of persons that there ought to be an increased endowment to the Municipalities;—are you aware of that? Yes.

1735. Do you think that properties in your neighbourhood would be able to stand a higher rate? Scarcely so; not without the district were to be more prosperous than it is now. I do not think that property would stand a higher rate at present.

1736. You charge nine-tenths of the actual rental? We can charge nine-tenths of a shilling now; and if there were other conveniences, such as water and lighting, and other things, we could go to the extent of another shilling.

1737. Have you ordered a lighting rate? No; we are restricted to a shilling, because we only attend to the roads.

1738. An Act was passed last Session to enable you to recover a lighting rate? I believe if there were greater facilities given by the Council—for instance, if we provided a water supply, it would be necessary to charge 2s.; we could never do it without.

1739. But would not the charge for water be like a fair charge—like a charge for beef and bread;—would not the ratopayers be simply paying for what they consume? Yes.

1740. You would not look upon that as a rate—as taxation? It would be a rate, because the Act specially refers to it. It says that you may levy a water rate, but that the amount shall not exceed 2s.

1741. Have you any idea what the proportion of the whole sum is to the cost of working the Municipality? About £80 a year.

1742. What is the rate per cent.? —

1743. The expenses are £80 out of £400? Out of £325.

1744. That is 30 per cent.? Yes.

1745. That is from rates only? £325 is what we derive from rates only.

1746. What is the endowment? £80 now, but it dies out at the end of this year.

1747. You get 10s. in the £? No, 5s.; and that will cease at the end of this year. The very fact of the prices we pay will show you that some of the evils I have named are inevitable. Incompetent persons have to be employed, and it is not to be wondered at when we only pay a town clerk £40 a year.

1748. What other officers have you besides the town clerk? The man that we employ now is all.

1749. *Chairman.*] Have you an inspector of nuisances? No.

1750. *Mr. Webb.*] Do you let your work by contract? The papers are delivered by contract. We have no rate collector. The Council clerk attends once a week to receive the rates.

1751. *Mr. Tunks.*] Are you aware that the police perform certain duties connected with Municipalities for a very small pay? The police at Wollongong have always shown themselves willing to perform any duties connected with the Municipality, and have never asked for payment.

1752. That is, they carry out the provisions of the Towns Police Act? Yes.

1753. Have you made any by-laws? They are now, I think, in the hands of the Government for the first time. They were sent once before, and lost.

1754. Where fines are obtained for petty offences do you get any portion of them? In the case of convictions under the Municipalities Act the fines would go to the Municipal funds.

1755. That is under the Towns Police Act? No; in the case of prosecutions under the Corporation by-laws.

1756. But I thought you said you had no by-laws? They are now in the hands of the Government; and when once they are authorized the fines obtained under the by-laws will then go to the Municipal Council. The Municipal Council of Central Illawarra have had several prosecutions under their by-laws, and have had the fines. We have got 14 miles of roads and streets; six of these are made; eight are not made.

1757. Did you furnish that return to the Colonial Secretary not long since? Yes.

1758. It will take about all your present income to keep what you have made in order? It will; and that will scarcely do it after a very wet season. After that wet season, which occurred a little while back, it took all the funds we had, and the Council had to incur a debt of £400.

1759. *Mr. Webb.*] Who reaps the benefit from the repair of these roads;—what class of people? The benefits are very general. The townspeople, of course, could not do without good roads and streets; and the country people who come to the harbour also reap the benefit.

1760. Does not the making of these streets and the keeping of them in repair enhance the value of property? I suppose it does; but properties are not more valuable now than they were ten or fifteen years back. Perhaps Municipal improvements have kept them at a higher value than they would have remained. The tendency of these improvements must of necessity be to enhance the value of property.

1761. Where a house is built fronting a main street which has been made, does it not let at a higher rental than it would if it had been built fronting a street which had not been made? Yes; but still there are other reasons which go to enhance the value of property than frontage to a well made street. The streets which are made best are those upon which there is the most traffic.

- J. Brown,  
Esq.  
21 Nov., 1873.
1762. But you do think that the making of these streets does enhance the value of property in their immediate neighbourhood? It must do so.
1763. Then who do you think ought to be called upon to pay for these improvements? To a fair and reasonable extent—the people.
1764. What people do you refer to? The people of the town.
1765. Do you not think that where property is increased in value by the formation and repair of streets, the owners of the property should contribute considerably more than they do at present towards the cost of these improvements? I do not think they could contribute more than they do now. The rate is pretty heavy. It has to be so, or the revenue would amount to little or nothing. I do not think that the owners of property could stand any higher rate than that which they have to pay, unless it were that the trade of the district should increase. At present I do not think that property could bear a higher rate.
1766. Then you think that the general public should pay for these repairs? Or for a portion.
1767. Have you considered out of whose pockets the money has to come which would be given to the Municipalities in the way of increased endowment? Yes.
1768. From whom would the bulk of it be derived? From the general population.
1769. And who form the general population—the masses? They of course contribute.
1770. In what position in life would you consider the masses to be? They must of course be working people.
1771. The labouring classes? The labouring classes.
1772. Do you think it is fair to take money out of the pockets of these people to improve the property of landed proprietors and wealthy householders? But we should not be doing so. Under the present system the money is taken out of our pockets to improve the roads in other districts. We rate ourselves; people in other districts do not; but still they obtain more money from the public funds for their roads than we do. The people at Bulli may be mentioned as an example.
1773. I should like to get your views on this question as it relates to the Municipal system generally. You may if you like assume, for the purposes of my question, that the whole of the Colony has been incorporated; that all the people in the Colony are grouped under various Municipalities, and stand upon the same footing. Assuming that all the Colony has been incorporated, you state that you require a larger amount of endowment, and at the same time you state that you do not think that property would stand an increased assessment;—I want to call your attention to the fact that this increased endowment for which you ask comes out of the pockets of the masses, or of the working classes? Yes.
1774. Then what I want to ascertain from you is whether you think it is fair or not—as the masses do not participate in the advantages to be derived from the improvement of property by means of roads to the same extent as the owners of the property participate;—do you think it is fair that they should be called upon to contribute £ for £, or 10s. in the £, as suggested by you, unless at the same time the holders of property are called upon to bear increased taxation? Your supposition has altered the complexion of the case altogether. At present the Government does supply funds to the different districts. If the whole of the Colony were incorporated, and if no district received any endowment from the Government, the Government would not require so much revenue. The benefit would accrue to the corporations in another manner—they would not have to supply so much revenue to the Government. Now other parts of the Colony get money from the Government; and if we also do not get help in the same way we consider that the money is taken from us.
1775. Then I take it from your answer now that you think if the whole of the Colony were incorporated the Municipalities could be managed best without any increased endowment? They could then bear increased taxation because the taxation for Government purposes would be less. They could at any rate bear increased taxation to that amount.
1776. Then do you think that you could do without any increased endowment if the whole of the Colony were incorporated? I believe so, if we could be brought into thorough working order, but I believe it would take some time before things found their own level. As things at present stand I look upon increased endowment as absolutely necessary.
1777. To place you on the same footing as the rest of the Colony? Yes; and not only to give us the endowment that those people at present not incorporated obtain, but I think that they should be compelled to contribute a like amount from local taxation to that which we contribute.
1778. I gather from your reply, that if the whole of the Colony were to be divided into various Municipalities it would then be quite fair to increase the rates so as to pay for all improvements made within the Municipalities, and then that the Municipalities could do without any endowment from Government? Yes.
1779. But as long as the present system continues you think that it would be only fair that existing Municipalities should receive 10s. from Government to every £ they contribute? At least 10s.
1780. *Mr. Tunks.*] Regarding the Colony as a whole, do you not think that there are certain large works which ought to be done, but which would be quite out of the power of the local corporation to grapple with. Take the main roads and large bridges for instance, would it not be necessary that works of that nature should be done at the public expense? There are certain works of a general character, and in all cases of that sort they ought to be performed out of the general funds.
1781. And is it not a fact that some portion of our revenue arises from the sale of Crown Lands? Yes.
1782. So that all the revenue does not come out of the pockets of the people? No.
1783. *Chairman.*] Are there any vacant Crown lands in your district which derive advantage from the formation of the roads? No; I believe there are none unalienated; or, if there are, the extent of them is very small.
1784. Which reap advantage from the expenditure of your money? There are Government reserves, but very little unsold land.
1785. What buildings are exempt from taxation? The churches and the Government buildings, and the schools.
1786. Parsonages? No; they are not.
1787. What amount of assessed rates remain unpaid on improved property within your Municipality? I forget the exact amount. I do not think it would be more than some £31 or so.
1788. Since the beginning? Yes; but I think there was some written off before my time in the Council.
1789. The arrears at the present time which you might also term irrecoverable amount to £30? About that.
- 1790.

1790. You stated a short time ago that your observations would also apply to Kiama? Yes.
1791. The price of metal for road-making is lower there? Yes.
1792. But they have some engineering difficulties which would counterbalance that advantage? I think so.
1793. So that taking one thing with another your observations would still stand? Yes.
1794. They have got great facilities for getting road metal? But the whole place is hilly.
1795. *Mr. Tunks.*] Is there not power under the law to write off rates? I think not.
1796. You suggest that the Municipality of Wollongong should be extended northwards so as to include Bulli? I do.
1797. And southwards to Shellharbour? To Macquarie River; Shellharbour comes in the Police District of Kiama.
1798. *Chairman.*] That is beyond the lake? It empties into the lake.
1799. Is it beyond Mullet Creek? Yes, it varies in distance. In some places it is 6, 7, 8, or 9 miles beyond Mullet Creek.
1800. What is your present source of water supply? The common source is a waterhole into which lots of the sewage of the town flows; and besides the sewage of the town there is a graveyard close by, and in wet weather there is a stream of water running right through the graveyard into the waterhole.
1801. Has the sand from the sea-beach continued to cover the graveyards as it did formerly? Yes; it has covered the Roman Catholic graveyard altogether.
1802. I presume that as an alderman you perform the duties of inspection gratuitously? Yes; I am one of the committee of works, and I do what I am called upon to do.
1803. Do you make out the specifications? Sometimes; it is considered the mayor's duty to do that; but our present mayor is the manager of the Mount Pleasant Coal-mines, and he is seldom in town.
1804. What property do you call improved property? All land that is built upon.
1805. Suppose, in assessing property, a house were in the middle of a tolerably large plot of land; suppose that the house was only worth £20 a year, and that the ground was worth considerably more, how would you assess that property? If the property is in the character of a farm, the house is scarcely taken into consideration at all. The conveniences made, to a certain extent, enhance the value of a farm itself, but the house goes in as part of the farm property. I believe that the house is not mentioned at all in the ratepapers, but the house is included in the estimate of the value of the farm, and the whole is classed as so many acres of land.
1806. Is there any other matter to which you would wish to draw the attention of the Committee? There is one matter which I may mention. It does not apply to ourselves although it does to our neighbours: The Municipal Council of North Illawarra consists of six aldermen, and on several occasions there has been great danger there of a dead-lock in the election of mayor. Another matter affects the legal liability of Municipal corporations. I believe that they are rendered too liable to prosecution, and that in many cases they are prosecuted where the contractor alone is in fault. Our Council had to bear some considerable expense a year or two ago through the default of a contractor to perform his duties properly. Of course, in that case, the mayor ought to have looked more closely after the contractor, but he did not do so, and a man had his log broken. The Council had to pay the expense, besides all the costs of a law suit. There is too great a disposition, in juries especially, to lean to the individual as against the Corporation; and they seem to think that the Corporations are a fair prey. I have for instance travelled a good bit between Wollongong and Kiama, and I have seen the man who has the contract for the repair of the road shoot loads of gravel right down in the middle of the road—twenty or thirty loads following one another. If I had received any injury in consequence it would have been scarcely fair to make the Corporation liable; for, considering the extensive area of the Municipality, it is scarcely possible that the Council can look after the contractor.
1807. Having obtained that experience, you would be able to guard against the neglect of contractors,—to protect yourselves by inserting a clause in the specification? Yes; but if the Corporation were to guard themselves to any extent in that way they would still be liable under the law.
1808. Would not a clause in the specification hold you harmless? No. We are now responsible under the law for anything that the contractor does,—for any harm which any person may suffer in consequence of any neglect in the manner in which works are carried out by the Corporation.
1809. Would not a clause in your specification enable you to recover the expenses from him to which you might be put through his neglect? Yes.
1810. I presume that sometimes the contractors are not men of means? Very few of them are. Most of the contractors who do work under Municipalities are men whom it would be no use suing for money.
1811. *Mr. Tunks.*] Would not the course suggested be to deprive an injured person of his remedy if, instead of going against the Corporation, he were shut up to an action against the contractor, who might be worth nothing? If the offence were made criminal, and if one or two contractors were imprisoned, it would have more influence with the contractors. Now they know that the Corporation is liable, and they therefore pay no attention. If the offence were treated as a misdemeanour they would be more careful.
1812. Would you not have the same responsibility even then;—would you not have to pay contractors at a higher rate to indemnify them against the risk of such a procedure? I think the contractors should be paid a higher price—a sufficiently higher price to pay them for any extra care they may take, but not to protect them against any culpable neglect in guarding their works.
1813. *Chairman.*] You have a good wharf at Wollongong? Yes, it is a good little one.
1814. From the facilities which it affords for the shipment of coal and other matters is it not of great benefit to your district? At present it is so managed that it is a positive injury to the district; it is a complete monopoly, and nobody can use the wharf but the Illawarra Steam Navigation Company.
1815. Will you explain the matter? The best way in which I can explain the matter is to mention one or two cases which have recently occurred. The Colliery Company and the Steam Company have both combined, so that any person who brings a cargo of goods to Wollongong cannot obtain coals to load away again; they will not allow them to have coal.
1816. Do they rent the wharf from the Government? I do not know. The assessors assessed it some time ago, but the Council never got any rates from it. The "Lady of the Lake" was in the habit of bringing goods to Wollongong and taking away coal to the Government dredge at Shoalhaven; but when the manager of the Company found it out he ordered that they should not allow him any more coal, and he had to give it up. A vessel brought a cargo of wheat from Adelaide, with the object of taking away coal

J. Brown,  
Esq.

- J. Brown,  
Esq.  
21 Nov., 1873.
- coal from Wollongong, but the captain would not have been allowed to load with coal had not the owner made arrangements with the agent of the Company in Sydney beforehand.
1817. *Mr. Webb.*] The proprietors of the coal-mine there will not supply anyone but the Steam Navigation Company? If they oppose the Steam Navigation Company they are not to have any coal.
1818. How many coal-mines are there there now? Two, that send coal from Wollongong; but people are talking of opening up several others. There ought to be others opened, for there is coal cropping out along the whole length of the mountain's side.
1819. *Chairman.*] If, on the revision of your evidence, it should occur to you that there is any other matter which the Committee have not questioned you upon, but which you think would further the present inquiry, will you be kind enough to add it to your evidence? Yes.

## ADDENDUM.

As near as I can ascertain, the area of the Borough of Wollongong is about 3,200 acres, and the population 1,297. If an evil, that what is called the racecourse and recreation ground, consisting of 61 acres, situated right in the middle of the common, should be vested in other trustees than the Council, who, as has been the case in Wollongong, will often be in antagonism to each other; as now, in Wollongong, the whole of the common is monopolized by the lessee of the racecourse. The Council have endeavoured by every means to obtain funds from the common to form the roads to it, and to beautify or arrange it, and they are powerless to do so. The road would be a benefit to the racing interest, but the trustees will not agree with any effort of the Council. The Council should be trustees in care of all public lands within its area. The limit to the rating power of the Council is too low.

FRIDAY, 28 NOVEMBER, 1873.

Present:—

MR. BURNS,  
MR. FITZPATRICK,MR. T. ROBERTSON,  
MR. TUNKS.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Thomas Henry Bradridge, Esq., called in and examined:—

- T. H. Bradridge,  
Esq.  
28 Nov., 1873.
1820. *Chairman.*] You are a surveyor? Yes, I am surveyor for the City of Sydney.
1821. How long have you been an officer of the Corporation? Fourteen years—all but a week.
1822. What are your duties generally? Those appertaining under the different Acts defining the duties of city surveyor,—such as the alignment of the streets, levels of streets, and general supervision of the expenditure of all city funds.
1823. You also report as to the necessity and cost of the different works, such as the formation and maintenance of streets? I do.
1824. Are you aware how many miles of streets there are in the City of Sydney? There are a little under 100 miles of lanes, streets, and places.
1825. How many miles of these streets are formed and metalled, kerbed and guttered? I could not say.
1826. Half of the total number do you suppose? I should think that more than half had been kerbed and guttered, but not half metalled.
1827. Are there many of the streets where population has settled which are still unmade? There are a great many streets still unformed.
1828. Could you tell the Committee what would be the cost of forming, metalling, and kerbing a street 66 feet in width—such a street as George-street for instance? George-street would cost from £3 5s. to £3 9s. per lineal yard. That would include the cost of forming, ballasting, kerbing, guttering, and metalling. Streets of a second class character, not requiring such a thickness of metal, nor ballast, nor formation, nor such a good class of kerbing and guttering, could be done for about £2 10s., or £2 12s., per lineal yard.
1829. That is I suppose without taking into consideration any special features, such as the declivities of the streets? Without taking into consideration the declivities of the streets, nor any special cost where extra formation is required. In some cases it would cost nearly double or three times the amount I have named. The price I state has reference to the average class of streets, not to places where extra work is required.
1830. Have there been any complaints as to the necessity of forming those streets which are still unmade? Yes, there have been continual complaints, and I frequently get abused, as if I could help it.
1831. In your estimate of the cost of forming the streets, do you include the cost of forming the foot-paths? Yes, the rough formation, exclusive of any paving.
1832. The Paving Act only extends to a portion of the city? It applies to only a very small portion.
1833. Would it be for the benefit of the citizens generally if the provisions of the Paving Act were made to extend over the whole of the city? I think not over the whole city. In many parts of the city there are no buildings. If paving were made compulsory all over the city, the expense to the owners of property would in many cases be so great that the value of the land would be almost absorbed in paying the expenses.
1834. If a Bill were passed extending the provisions of the Paving Act over the whole city, do you not think that it would be safe to entrust the aldermen with the discretion of putting the Act in force in those parts of the city where it might be necessary? I think so.
1835. Could you tell us the cost of paving with hard stone, such as the blue stone of Victoria or the Yorkshire paving? About 2s. 6d. per foot superficial.
1836. In the event of the Paving Act being extended to streets where the properties are of a low class value, suppose the Corporation were to give five years' credit, and accept the amount in instalments, do you think that would do? I would prefer to confine myself to professional work, not to financial matters. I am but an amateur in financial matters, and I do not think that I could properly express an opinion.
1837. Would you explain to the Committee how you are set in motion with regard to the performance of your duties in the improvement of the streets? In some cases, for instance, improvements which are in the nature of new works, a motion is made in Committee of the Council, asking that the City Surveyor report

report upon the advisability and the cost of performing the work. That motion, if it is passed, comes to me as an instruction in the instruction book, and I report according to my judgment in the matter, as to whether it is necessary or not, and stating what the probable cost would be.

1838. It then comes before the improvement committee? It then comes before the improvement committee and they decide as to whether or not they will recommend the expenditure. If the money is passed in the committee and in the Council, I receive instructions to carry out the work.

1839. Have you carried out the works as ordered by the Council? I have not.

1840. Why? Because I have not had a sufficient staff to carry them out.

1841. What do you mean by staff? Staff of workmen and labourers.

1842. If the work is ordered by the Council have you not the power to increase the staff to an extent which will enable you to carry out the works ordered by the Council? I have not.

1843. Who employs them? The mayor employs the different workmen and labourers. He employs and discharges them.

1844. Does he regulate the amount of labour employed by the Corporation according to the state of the Corporation funds? I believe so.

1845. So that many works now remain in abeyance for the want of funds to carry them out? Yes; works which were ordered three years ago are still not carried out for want of material and labour.

1846. *Mr. Burns.*] That is not arising from want of funds? I imagine from want of funds.

1847. That is the reason why there is not a large enough staff employed? I think so. I have been told repeatedly that the staff must be kept down as much as possible; and the staff has therefore been reduced from time to time by the mayor.

1848. *Chairman.*] Have you in your experience with the aldermen found that they wish to expend money on unnecessary works? I have not. There has been a general wish on the part of the aldermen to have the most necessary works carried out first.

1849. So that no improper influence has been brought to bear upon you to facilitate the carrying out of unnecessary works? No; there has not.

1850. Have you heard rumours to the effect that that was the case? No; I have not.

1851. Have you given any attention to the sewerage arrangements of the city? I did during the eleven years that I was assistant engineer; and I have not quite lost sight of it even now. I frequently think of it.

1852. Do you think that the existing plan is a judicious one, taking into consideration the importance of preventing the harbour from silting up and having regard to the health of the citizens? I think it highly objectionable, both as regards the health of the citizens and the damage it does to the harbour.

1853. How does it affect the health of the city? Bad smells arise from the gases which are exhaled from the sewage matter in the water, and they are disseminated over the city according to the direction of the prevailing wind. There is a very small quantity of sewage matter discharged into Rushcutter's Bay for instance, but when the tide is out and the wind is blowing from that direction I am obliged to put my handkerchief over my face as I go along, the smell which arises from the head of the bay being so offensive. If the smell is so bad there, where there is scarcely any drainage into the bay, it must be a great deal worse in those thickly populated parts of the city where the sewage flows directly into the harbour.

1854. Your remarks would not be applicable to Darling Harbour? Not in the same way; because at low-water, in Rushcutter's Bay, there are about 20 acres exposed to the action of the sun. In other parts of the harbour there is commonly deep water; but there is still this damaging influence going on by the discharge of the filth from the closets and yards of the citizens, and the water of the harbour is rendered quite filthy by this means in some places. Down at the Circular Quay, where the Manly Beach steamers start from, when the paddle-wheels of the vessels stir up the water the stench which arises is intolerable. I have had to move off from the A.S.N. Co's. Wharf from the same cause, the smell there is so very bad. In other places, where there is a sewer, the same disagreeable odour arises. To me it is not simply offensive but it affects my health; and I presume that there are plenty of other persons in the city of a similar organization to myself, whose health would be injuriously affected from the same cause.

1855. Is not this polluted water carried away by the flow of the tides? To a very small degree only. The main current in the harbour of Port Jackson flows along the course generally known by nautical men as the stream. The deep indentations of the bays are such that the current of the stream does not visibly affect them. There is only the rise and fall of the tide; and where there is a flow outward there is also an equal flow backward. There is nothing that can be called a scour; nothing that can cleanse this filth away.

1856. *Mr. Tunks.*] Excepting in rainy weather? Except in rainy weather, and then the watershed is so small that it does not affect it to any great extent.

1857. *Chairman.*] On the whole, you consider our present system of sewerage objectionable? I do.

1858. Have you thought of any means which can be adopted to prevent the waters of the harbour from being polluted in this way? I believe that the only way to obviate that is to get rid of the sewage entirely by sending it to the ocean. That appears to me to be the safest way. I have thought that it would be desirable to utilize it for purposes of manure; but then we have a very small agricultural population around Sydney, and it would not be possible to dispose of it in that way.

1859. *Mr. Tunks.*] The proportion of solid matter would be very small? Very small.

1860. You are now addressing yourself to the city alone? The remarks I have made may also be applied to the suburbs.

1861. And in any general system of sewerage we should contemplate the requirements of the whole population? Yes, the suburbs should be taken into consideration in devising a proper system of sewerage.

1862. *Chairman.*] Could you suggest any scheme that would take the sewage to the ocean? I believe that a very large section of the drainage could be intercepted and carried by gravitation to the ocean. I do not fix any particular site for the discharge of it; but I believe that two-thirds or three-fourths could be carried by gravitation to the ocean, and the remaining portion could, if it were thought desirable, be lifted by pumping to the grand trunk main and be discharged in the same way.

1863. You think that two-thirds or approximately three-fourths might be disposed of by gravitation? I do.

1864. Do I understand you to suggest that the ordinary sewers should be led into one main drain? Yes.

1865. And the remainder might be pumped up? Yes.

1866. *Mr. Tunks.*] Do you contemplate in your plan the large discharge of water in a thunderstorm,

T. H.  
Bradridge,  
Esq.  
28 Nov., 1873.

when there may be fall of a foot of water in the course of a few hours;—do you contemplate pumping that up? No, I do not. What it is necessary should be sent to the sea is that which is deleterious to the public health. Silt-pits could be constructed so as to prevent the damage to the harbour from the debris of the streets. Only in dry seasons do I think it would be necessary to pump up the sewage from the lower level.

1867. *Chairman.*] Have you thought where the best place of discharge would be? I think the best site would be the southern head of Bondi. There is a good bold headland which projects well forward into the ocean, and there is a current setting to the south which would take it all away, and prevent silting up in the vicinity of the mouth of the sewer.

1868. Have the Council taken that up as a body with a view to change the present system? I believe they have not. It is beyond their means to do so.

1869. Have you given any attention to the present source of water supply for the City of Sydney? I have, during the eleven years that I was connected with that department, and subsequently as an amateur.

1870. Would you state your opinions with regard to the source of water supply;—would you state whether you consider that the present source of supply will be sufficient for the wants of Sydney in the future, having regard not only to the prospective increase of the population but also to the probability of this becoming a large manufacturing community? Whether it will supply the future population of Sydney will depend entirely on what that population becomes. It is, I am perfectly satisfied, quite adequate to supply the districts we are now supplying, and a much larger district even, but the time will come, and I think it is not far distant, when it will be quite inadequate to supply the city and suburbs. The actual quantity required can only be determined by the demands of the population which draws its supply from this source.

1871. Is there any danger of pollution to the existing source of supply at the present time? There is great danger; a very large portion of Waverley, a portion of the city, and a considerable portion of Paddington drain into the watershed. The number of houses in these parts is rapidly increasing. I think there are some portions of Randwick which also drain into it; and I may add the Victoria Barracks and some portions of Woollahra. Its drainage has not very much affected the purity of the water as yet because the particles have been in a great measure held back by the sand through which it has had to filter, and precautions have been taken by the City Engineer to prevent the pollution of the water as far as it is possible to do so.

1872. *Mr. Tunks.*] Would the drainage from the Victoria Barracks flow into the Botany watershed? It does.

1873. Would it not drain into the tunnel which runs underneath them? It does not do so; yet a portion of it might possibly find its way into the tunnel.

1874. The tunnel is right under the barracks? It is; but the drainage of the barracks passes away to near the south-eastern corner and along the surface of the ground to one of these swamps, called Nanny-goat Swamp.

1875. From experiments which have been tried upon the tunnel it is found that large quantities of water find their way into the tunnel? It has—in the same way as water will find its way into a well. The tunnel is a kind of elongated well, and the quantity of water which flows into it in rainy weather is so great that the lock is shut at the Lachlan Swamp, and very little water is required to supply those portions of the city which are served by the tunnel. It is therefore possible that some impurities find their way into the tunnel.

1876. *Chairman.*] In wet weather, even when the sluice is shut at the swamp, that portion of the city which draws its supply from the tunnel is not sufficient to receive the whole of the water which flows into it? No; not with the present reticulation of mains.

1877. In wet weather there is no demand upon the swamp from that source? No, there is not.

1878. The tunnel as an elongated well receives water enough to supply that portion of the city? It does, excepting that some water from the swamp may find its way into the tunnel; but I scarcely think that is probable.

1879. *Mr. Tunks.*] All water in wells is derived from rain? Yes.

1880. *Chairman.*] The absorption under the soil is so great that the rain-water finds its way quickly into this elongated well? Yes; through the portions of the soil adjacent to the tunnel.

1881. The soil being chiefly sand? A great deal of it is through sand, but there is a large portion of the tunnel through rock. The water does find its way quickly into the tunnel, so that it is evident there is some ready means of communication from the surface. The flow into the tunnel is very great after one or two days' rain.

1882. Have you read Mr. Busby's reports on the tunnel? No; I have merely read extracts from them.

1883. Have you read any of Colonel Barney's reports? I have read some of them.

1884. From what you have read of Colonel Barney's reports, and from the experience you have derived as to the value of the Lachlan Swamp as a watershed, do you think it has deteriorated in any way as a source of water supply during the forty years it has been in existence? I believe the water is not so pure, owing to the dwellings which have been erected on the watershed and owing to the discharge of filth into it. But the value of the watershed itself has not deteriorated to any appreciable extent.

1885. That is, not in the quantity it is capable of supplying? In the quantity it is capable of supplying: I believe it has not been deteriorated to any appreciable extent in that respect.

1886. From what you have stated you are not of opinion that it would be proper to allow buildings to be erected on the watershed, as has been the case the last few years? Certainly not; it should on no account be permitted.

1887. Are you of opinion that those lands should be resumed which drain into the watershed? I would propose that those lands should be resumed which are not built upon; and that the area of drainage where lands have been built upon should be intercepted with drains to convey the drainage away from the swamps. That appears to me to be the cheapest method of dealing with the matter.

1888. Might not that limit the area of the watershed? It would reduce it, but not to any great extent.

1889. What would be the cost of resuming this land? I have not the slightest idea. I have not gone into the question of cost.

1890. You are aware also that Sir Daniel Cooper has a large area of land in that vicinity? I am.

1891. How many acres of his land would have to be resumed? I do not know exactly, but I could tell you within a few hundred acres. I think there would be about 1,200 acres. I speak merely from guess, looking at the plan.

1892. *Mr. Tunks.*] Have you any idea what number of people there are in the City of Sydney and suburbs? Do you mean what is the population?

1893. Yes? I think it is about 130,000.

1894. About how many of this number live in the City of Sydney? I think from 75,000 to 80,000.

1895. What proportion of the inhabitants living outside the city boundary has been supplied with water previous to the last two years? Previous to the last two years?

1896. Yes? A very large section of the Glebe, Redfern, and Darlingtown.

1897. Newtown? No portion of Newtown.

1898. Paddington? Some parts of Paddington.

1899. Have you any idea of the approximate number who have been benefited by the water supply outside the city boundary.

1900. But the 80,000 within the boundary have been pretty well supplied? I think they have been very well supplied. There has been very little to complain of, especially if they would adopt the necessary precautions of storing a day's supply. The mains have been extended lately as far as Camperdown, up to the back of Newtown, and I think the Glebe is now almost entirely supplied.

1901. Is the present supply sufficient to meet the wants of the people in the case of fires? There is plenty of water conserved for that purpose and available in the dams and the reservoirs; the two reservoirs contain about four and a half millions of gallons, which would be available for a large fire. I believe that by taking the precaution, immediately a very extensive fire occurs, of sending out to Botany and informing the engineer, the pumps could be set at work, and the reservoirs could be kept full for use in the case of fires.

1902. That could best be done by telegraph? Yes; but long before the reservoirs were empty we could communicate with the engineer at Botany by a messenger.

1903. That is assuming you have got the water there? At the present time we have five months supply ready for consumption in the dams; and that is exclusive of the quantity of water headed up in the sand, which I assume is equal to the quantity stored in the dams; so that I reckon we have about ten months supply altogether. But that is not taking into consideration the effect of evaporation during the mean time, if we had no rain during that period.

1904. You are speaking after a very wet season? We have had an unusually wet season.

1905. If a fire were to break out to-morrow, making a large demand upon your supply, what means have you for getting that water out of the sand? It will flow out as you lower the water in the dams.

1906. *Chairman.*] The source being higher? Yes. At the level of saturation the water stands higher than it does in the dams, and will drain through the sand into the dams as you lower the water in them.

1907. You are in charge of the streets now, professionally? Yes.

1908. Has Mr. Bell anything to do with them;—is he in any way your superior officer by the present arrangements? I do not look upon him as my superior officer for he has nothing to do with me. Mine is an independent office. All streets and works upon which the city funds are expended come under my control, with the exception of city buildings.

1909. *Mr. Fitzpatrick.*] You spoke of taking the city sewerage to the south head of Bondi. The natural level will not permit of that? Only the sewage of so much of the elevated portions of the city as will discharge there by gravitation.

1910. How high do you think it would be necessary to raise it by artificial means, so that the whole should be discharged at south Bondi? To an elevation of 35 or 40 feet.

1911. You would pump it up by steam engines? Yes.

1912. Would that be very costly? Not very costly.

1913. *Chairman.*] Do you not think that a gradient of 2 to 3 feet in the mile would be a sufficient fall to carry away the sewage of the city,—the sewer being made of the most improved shape—oviform? I would prefer to have a fall of 5 feet; I have reckoned 5 feet to the mile. I have no doubt that with a good stream running down it, it would work with a fall of 2 feet to the mile.

1914. Taking into consideration the facility which exists in being able to pump water from Darling Harbour to sluice the sewer at a small cost, would not a less gradient than 5 feet be sufficient? The less gradient would answer in that case.

1915. *Mr. Tunks.*] Would not a system of locks facilitate the keeping of the drain clear? The danger of introducing locks would be that you would cause a sediment to take place at the bottom, and you would lose the velocity arising from the steeper gradients of the sewers discharging into the main drain.

1916. But water in a lock, suddenly let go, would sweep all before it? It would, but there would be sediment at the bottom of the lock, which would require for its removal another flushing from a lock higher up, and so on. It would be possible to introduce something of that form into any kind of sewer; but the sewage would be liable to be held back in the subsidiary drains or sewers above the lock, and that would be a very undesirable thing.

1917. The sewers have not been extended to the suburbs in any direction—have they? I think not—in no instance that I am aware of.

1918. *Chairman.*] Could you give the Committee a rough estimate of the cost of such a work as that which you suggest? Of a main sewer?

1919. Of the main sewer, and the subsidiary works? No; I could not possibly do it without the scheme being laid down on paper.

1920. What would be the cost of a rough trial survey of the plan you suggest—the probable cost, so as to determine the practicability of the scheme? That is rather a difficult question to answer. £1,000 might do it, and it might take more. An approximation might perhaps be got for £500, taking into consideration that in the office of the City Engineer there is a good deal of the matter already collected.

1921. You have got the whole of the levels of the city, and I think even a portion of those in the suburbs? We have only a small portion of those of the suburbs. It would be the extension of the survey to the suburbs and of the main trunk line that would form the great feature of the expense.

1922. Taking into consideration the sewerage of the city and suburbs, and the importance of extending Municipal government, and making it as economical as possible,—are you of opinion that it would be proper to extend the city limits, say to the ocean, so as to include the whole of that tract lying north of the South Head Road and Bondi? I believe that the extension of the city limits, so as to include some of the smaller Municipalities, would be certainly beneficial to those Municipalities, and would, on the whole, be beneficial to all whose interests were concerned.

T. H.  
Bradridge,  
Esq.

28 Nov., 1873.

T. H.  
Bradridge,  
Esq.  
28 Nov., 1873.

1923. That is, supposing the rates raised from particular localities should be expended upon them, and also that they should not be deprived of the endowment now granted to them by Parliament? I think there would be no objection at all if that were done. The amount of rates collected in each district, and the endowment proper to it, being expended in that district, so that in that case the city would not suffer to any great extent by the absorption of the smaller districts within its limits.

1924. Would such an enlargement of the city boundaries increase the working expenses of the City Corporation to any great extent beyond the cost of the present staff? Not in proportion to the additional work performed.

1925. Are you of opinion that such an extension would add to the convenience of the people and conduce to the general improvement of the district? I believe it would.

1926. I believe an application was made to the Municipal Council of Sydney some short time back to consent to the annexation of Paddington? There was an application of that kind about four or five years ago.

1927. I believe it met with refusal;—could you state on what grounds? I could not state positively what were the grounds of refusal, but I believe it arose in this way: Mr. Taylor was Mayor of Paddington at that time, and he, individually, was opposed to it. He got up a counter-petition to Parliament, in which the petitioners prayed that Parliament would not allow the Municipality of Paddington to be annexed to that of Sydney. I was then a resident in Paddington, and I believe that three-fourths of the people there were in favour of annexation, and Mr. Taylor has told me since that he was very sorry he ever opposed it, as he saw that he had been standing in his own light.

1928. From your experience as an officer of the Corporation, do you see any objection to it? I do not, if the money raised in each district were to be expended in that district, and the funds raised in the city were not diverted to the outside districts.

1929. If that were carried out it would lessen many of the grievances which now exist between the city and suburbs? It would. For instance, where a watercourse runs along the boundary of two Municipalities there is great difficulty in getting unanimity of opinion in regard to the works required in the way of drainage. For example, we propose to do a particular work, but the other parties say, "No, we will not agree to it"; or, "We cannot afford it." And, on the other hand, the Borough Council may propose to effect some improvement in which the city is interested, and our Municipal Council in their turn object, or say they cannot afford it.

1930. Something of that kind occurs in regard to the maintenance of Cleveland-street? That supplies an illustration of the state of matters to which I allude.

1931. In the case of the watercourse, to which I presume you alluded, in Barcom Glen? Yes; there it will be necessary in some short time to construct a sewer at a cost of £20,000, and the same state of things may again occur there.

1932. *Mr. Tunks.*] Following that out to its fullest extent, would it not necessarily imply that you should annex the whole county to the Municipal Council of Sydney? I think not; I think a line could very easily be drawn.

1933. How would you settle your line? By the voice of the people themselves, I imagine. If the residents of these districts adjacent to Sydney are not willing to be annexed to the Municipal Council of Sydney, there is no reason why they should be compelled; but in the case of Paddington I know that a large number of the people desire it.

1934. If you would allow them to be annexed to Sydney in that way, would you also allow them to separate again by the same process? I do not propose to deal with that; it is rather a difficult matter.

1935. *Chairman.*] I have limited the matter as to what could be done with the present staff of officers? Yes.

1936. So that it can in no way allude to placing the whole country under one Municipality? No. I would not consider it advisable that the whole country should be placed under one Municipality.

1937. I have also alluded, in the consideration of this matter, to the fact that the City of Sydney projects unevenly into Paddington and a portion of Waverley? Just so, where our interests should be identical, and almost inseparable; only those places should be annexed to the city.

1938. *Mr. Tunks.*] We may infer from that that the Corporation officers are not in full employment at present? No. Where there is one head office a very slight addition to the number of officers is capable of doing a much larger amount of work in proportion to the increase, all the official machinery being in existence.

1939. I understood you to say that if these places were annexed to the City of Sydney the money collected in them should be spent upon them? The money collected in any district or ward should be spent upon it.

1940. Suppose that Paddington were to become a ward of the city? Yes.

1941. Would not the adoption of your principle imply a very narrow view of things in meeting the requirements of a great city? To carry it out exactly in detail would be wrong. There should be some little limit allowed, as is done now in effecting improvements in the city. There are certain wards in the city the requirements of which are such that we are obliged to spend more money upon them than is collected in them. This arises from the circumstance that the traffic is greater in those parts, and a larger amount has therefore to be expended upon them. The same principle may apply to some of these suburbs. If it were necessary, in consequence of some of the suburbs being very much used, that more money should be expended upon them, then I think some discretion should be allowed, and that is a matter which, I take it, could be dealt with by the Council itself.

1942. *Chairman.*] It would beget unanimity in the larger works, such as the sewers, and the maintenance of those main roads which are chiefly used as drives for public recreation? Yes; and the Acts relating to water supply and sewerage also have reference to the suburbs. I think that Municipal government here would work better if the boundaries of the city were extended on these accounts.

1943. *Mr. Tunks.*] Such matters as those which you are speaking of are looked upon in England as metropolitan affairs, taking in not only the city but the suburbs? Yes, they are.

1944. *Chairman.*] Has the Corporation given any attention to procuring a better material for kerbing and guttering than the sandstone now in use? They are doing so.

1945. What steps have they taken in the matter? We have called for tenders for the supply of granite, bluestone, or any other hard stone suitable for this purpose.

1946. I think that was done some years ago, but without any result? I do not recollect that it was ever done in the Corporation during my time, but I believe it was done prior to my entering the service of the Corporation.

T. H.  
Bradridge,  
Esq.

28 Nov., 1873

1947. You have visited Melbourne, have you not? I have.

1948. The kerbing and guttering of Melbourne is made of bluestone? It is.

1949. Have we any good bluestone in New South Wales equal in quality to that of Victoria? I have not seen any equal in quality for quarrying purposes. That which I have seen will not admit of being quarried economically. In some of the quarries you could not possibly get a stone 6 feet long.

1950. Could you get them 2 feet long? Nor even 2 feet long.

1951. The electricity seems to have passed out of the bluestone in New South Wales to a greater extent than appears to have been the case in Victoria? Some operation of nature seems to have shattered the stone so that it cannot be quarried economically. It can only be got out in very small blocks.

1952. Have we not had some experience with granite. I have seen some granite kerbing and pitching which was put down twenty years ago? There are several places in the city which have been kerbed and guttered with granite, and it has lasted well. The wear in it is very little—scarcely perceptible. There is a piece on the south side of Bridge-street that has worn very well.

1953. Are you of opinion that it would be judicious of the Corporation to korb and gutter all the streets with that material? If it could be obtained at anything like a reasonable price I should certainly advocate it.

1954. What would you call a reasonable price? If we could get it for 5s. or 6s. a cubic foot.

1955. Ready for laying? Yes.

1956. Where are the quarries situated? The granite quarries?

1957. Yes? One I believe is at Moruya, opened by Mr. John Young. I do not know of any other granite quarries which have been opened in New South Wales. We have granite to the westward, but I am not aware that any quarry has been opened.

1958. Have you any knowledge whatever of the financial position of the Corporation? I know nothing more than what I have gathered from hearsay, and as that is not within my province I have not concerned myself about it. I have heard that the funds were low, and I have received instructions from time to time to exercise the most rigid economy in carrying out the works.

1959. The Corporation of Sydney at present occupies two large houses;—are they sufficient for all the requirements of the Municipal Council? They are not.

1960. Would you tell the Committee why? I may take for instance my own department; for all the officers under me I have only three rooms. In the room with me I have my secretary; and the public have free access to that office from 9 o'clock in the morning until 3 or 4 o'clock in the afternoon. I have no privacy whatever. I cannot perform any work requiring careful thought during office-hours, and as a consequence I am obliged to remain after the office has been closed to do work of that nature. The City Engineer has only two rooms for his work—one room he occupies himself, and the other is used by his draughtsmen, and I may say as much of other officers. I have known in some instances five officers in one room, each officer dealing with the public, and we have found the greatest inconvenience and impediment to our work in consequence.

1961. Is there any want of accommodation for the preservation of your plans connected with the sewerage and water supply of the city? I have nothing in which I could put a record to preserve it from fire. It is necessary—I believe it is highly necessary—that both the engineer's plans and my own should have one or more fire-proof rooms for their preservation. If a fire were to occur and our drawings were destroyed it would place the city in a very awkward predicament, more especially with regard to the sewerage and the water-works. We should lose information which we could never collect again at any cost.

1962. So that upon the whole you think that a building put up for a private purpose could hardly be adapted for the uses required for a Corporation,—seeing that documents necessarily increase, and as they are multiplied become more valuable? I think it amounts almost to an impossibility that a house fitted up for a private dwelling should suit the purposes of a public office, for the reason that you have yourself stated, and to which I also have referred.

1963. I presume you have given some attention to the new Town Hall—do you think that the new Town Hall will give the necessary accommodation? I believe it will give very good accommodation and meet all our requirements.

1964. With regard to the Market Wharf;—are you of opinion that stores suitable for the requirements of a wharf such as that ought to be erected there? I think that stores should be erected so as to improve the value of the property. We do not derive the revenue from that wharf which we should derive if we had sufficient storage accommodation there. In fact we have very little accommodation on the wharf and nearly all that is there is of a very temporary character. Valuable goods could not be stored there now.

1965. *Mr. Tunks.*] A fire took place at the Town Hall some time since? There was a fire there about four years ago.

1966. Were there any papers of consequence destroyed by that fire? There were.

1967. Do you still retain the trigonometrical survey which was taken some years ago? That is complete still. I think there was one drawing—and, as it happened, one that was of least value, having very few properties on that section of the city—that was partially destroyed. But some three or four years previous to that the engineer represented to the Council—at least I imagine that is how it occurred, but I am not quite certain—that tracings of the original were required to facilitate the business of the office; and the improvements which have been carried out since were added on to that tracing, so that if all the originals had been destroyed we still had the copies with more information on them. A great many papers were destroyed by that fire, and I was myself the loser of property that I would not have taken £500 for. It unfortunately happened that the fire came through from the adjoining office, and licked up all my papers, and some of my father's which he had given me.

1968. *Chairman.*] Some of the documents connected with contracts in Moore Park were destroyed? They were, and also some street plans, some information connected with the water supply, and also a portfolio of plans and subdivisions of property in adjacent Municipalities.

1969. The large expenditure upon Sydney Common has been beneficial to the residents of the city and suburbs generally? It has been very generally beneficial. The common is largely resorted to for purposes of recreation. It is decidedly a vast improvement which not only benefits the city but some portions of the suburbs also.

1970. Are you of opinion that the levelling of that Park could have been done more economically? I think it could. Seeing what it has cost, and the method in which it has been carried out, anyone coming after

T. H.  
Bradridge,  
Esq.  
28 Nov., 1873.

after could see where improvements could be made and where the work could have been done at a cheaper rate. I believe it could have been done cheaper if they had had the same light then that we have now. That however is a matter of professional opinion, but the improvement is undoubted.

1971. There is a large number of streets in the city which have yet to be formed and made, and a large number of buildings to be put up? There are a great number of streets which require forming; nearly all the streets on the Ultimo Estate have yet to be formed, and there will shortly be all those streets which are now being laid out through Mrs. Hughes' paddock which will have to be made. There are many streets in the south-eastern portion of the city which are still unformed—streets which have been projected since the year 1844, which are still unformed.

1972. Do you think that you can perform your duties satisfactorily to the public with the staff which the mayor at present allows you? Do you mean staff of officers or workmen?

1973. Staff of workmen? I could not. I have the greatest difficulty to keep matters going. Instead of being able to keep my work before me, all that I can often do is to repair and patch up the worst parts of the gutters, foot-paths, and streets. I cannot do as I should wish, and as I think would be most advantageous to the public. Those old streets which have been formed for many years require to be re-constructed. The foundations of the streets have been destroyed by the laying down of water-pipes, sewerage, and gas-mains.

1974. Can you tell the Committee the cause of your inability to act as you think would be for the best? I attribute it to the want of funds. I am told to practise the greatest economy, and I am doing it to the best of my ability.

1975. *Mr. Lucas.*] You spoke of repairing the streets, and of the damage done by breaking up the streets, for the purpose of laying water-pipes and gas-mains;—would it not be better to have two pipes running down the streets, one to supply one side and the other the other? I am perfectly sure that would be the best plan.

1976. Would it not also be more economical? I believe that in the end it would be found to be cheaper.

1977. You could then lay the pipes close to the houses? Close to the houses—outside the gutter-stones.

1978. Could you not lay them under the footpath? That could be done.

1979. You could then lay water or gas on without interfering with the traffic of the street or the pathway? The traffic on the pathway would be interfered with a little.

1980. That portion next to the house which would not incommode the public to any great extent? Only a little.

1981. Do you think that there should be some by-law made to regulate the openings of the gateways. I find that in the case of some houses or stores the entrance from the street to the pathway is over a sort of bridge, and then the stones are pitched level with the pathway;—do you not think that is a great improvement upon the old system of having a depression across the footpath at each entrance? It is an undoubted improvement, and I have advocated it strenuously since I have been city surveyor.

1982. Do you not think that it would be cheaper to the persons who make these gateways to make a bridge across the gutter, and to pitch the footway on the same level as the flagging? I think the cost would scarcely be affected, because the traffic is the same.

1983. I speak of the cost of constructing the entrance to the gateway;—would it not be quite as cheap to construct a bridge and a track for the cart as it would to construct these entrances upon the old principle of leaving a depression? Not quite. There is the additional cost of constructing the bridge; but the maintenance, as regards the gutter, would be cheaper. The loaded dray passing across the gutter comes down into it with a jolt, and the wear and tear is therefore very great.

1984. And also in the pulling out the same thing occurs? It does. I believe that in the end it is cheaper; but so far as the first cost goes—the cost of construction—it is more costly.

1985. But the wear and tear is considerably greater under the old system than where a bridge is employed? Yes.

1986. If there were a by-law made by the Council to enforce the construction of gateways in this manner—and I do not mean that persons should be compelled to take up those which already exist; but if they require any material repairs would it not be desirable that there should be a by-law passed to compel persons to construct a bridge across the gutter, and also to make tracks across the footway on a level with the paving? I should approve of that very much. It is very trying upon persons, upon infirm persons more especially, to have so many breaks in the footway. It very frequently happens that within a distance of 100 yards there are as many as ten or twelve gateways, and sometimes there are two together. But there is one objection to these bridges in our main thoroughfares, such as George-street, between King-street and the northern end of the city, and that is this,—the roadway is virtually reduced by the width of these bridges.

1987. But the bridge need not be very long? Yes.

1988. Properly constructed they should not project beyond the gutter? They should not under any circumstances do so, but the gutter is nearly 3 feet wide, so that would amount to 6 feet in the whole width of the street.

1989. What is the difference between the level of the top and the outside gutter-stone? About 5 inches.

1990. Then a bridge may be constructed not to come out to the extreme width of the gutter, which would be much easier for the dray traffic and much more convenient for passengers than the system of construction which at present commonly prevails? It could be made not to come out far, but still it does reduce the width of the roadway. But I think the benefit to the public is of more importance than the additional cost of construction to the proprietor.

1991. And the wear and tear is less? It would be so, undoubtedly.

1992. When the Gas Company lays down gas-pipes are they compelled to put the street in good order again? They are; that is to say, not entirely in good order, but to restore the metal they take out of the cutting, and to make the roadway good to that extent. They are not required to repair it beyond that; and it frequently happens that the Gas Company take up their mains in streets where there is but a mere crust of metal, and the street is destroyed in consequence. The thin crust of metal would have lasted a little longer; but when once the street is broken up in that way they make a bad road of it.

1993. Then in reality they do a great deal of injury to the streets of the city? They do; and the same thing occurs in laying down water-mains and sewers.

1994.

T. H.  
Bradridge,  
Esq.

28 Nov., 1878.

1994. But that is your own arrangement? Which would be obviated by laying down the pipes along the sides of the streets.
1995. There would be no objection to that? Yes, there would, and it is this:—If any leakage in a water-pipe occurred, the premises alongside of it would be in danger of being flooded if there were cellars, and the walls would become damp through saturation.
1996. That could be obviated very easily, could it not? You cannot always detect a flaw in a pipe. We do subject them to pressure, but in spite of all precautions they give way in places where we least expect.
1997. But if anything occurs it is soon discovered and set right? Yes.
1998. How far do you think the pipe might be safely laid from the wall? About the middle of the foot-path.
1999. That would materially obstruct the progress of pedestrians? Not so much, more particularly if the traffic were rightly directed, as it should be, and as it is in London, where all the pedestrians going in one direction keep to one side of the path, and all those who are going in the opposite direction keep to the other side of the path. An opening in the middle of the footpath would not then be a great obstruction.
2000. Could it not be so arranged that a flag of the necessary width should be laid longitudinally along the centre of the path directly over the pipe, so that if they wanted to get at the pipe they would only have to take up one row of flags? That could be done, and would no doubt be the plan adopted. When I was studying engineering I proposed to myself that it would be well to have the water and gas pipes laid on each side of the road, and that communications should be obtainable with these mains without having to excavate by means of man-holes under the footway; but it would be an expensive process.
2001. But laying them as I propose, merely making the mains as you now make them, with a ledge on one side and a flag in the middle, that would not be expensive? It would be merely placing small stones on each side, on which the centre stone would rest.
2002. And that must be cheaper than breaking up the streets continually? It would, with this exception, there would be additional cost at first of laying two mains instead of one.
2003. But they would require to be only half the capacity of the present mains? It would be desirable that they should be a little more than half the diameter; and the question would arise as to how they would answer in the event of fires. The mains as they are now laid do, in some measure, meet the requirements of the city; but if you reduced them to half the capacity they would not.
2004. But you could use the two mains—one on each side; would not that be an improvement; you would have two supplies instead of one? Taking that into consideration, we ought to have the same amount of supply.
2005. And it is not so likely that both would be damaged at once? It is not so likely.
2006. There would be always one pipe to draw the water from? There would.
2007. Would not that also be an economy;—would not half the water be turned off from Sydney at night? I do not know how that would operate.
2008. I presume you are aware that there is a great waste of water in the City of Sydney? I am.
2009. And the chief reason why the water is turned on at night is in consequence of the liability to fires? That is the great reason I believe.
2010. If there was a main laid down on each side of the street, you might shut one of them off at night? One might be shut off at night.
2011. And that would to a large extent prevent the waste of water? That would arrest the waste of water considerably; and by having two mains—one on each side of the street—there would be a considerable saving to each individual proprietor in regard to the connection pipes, the distance between the main and the house being so very much shorter.
2012. And the expense of breaking up the streets would be saved? Yes.
2013. It is very expensive to cut through the streets? It is; and it is very destructive to a road which has once been formed, metalled, and open for traffic. The surface of the road can never be brought to have so good a crust as it had before.
2014. How do you obtain your metal for the streets? We get it by contract.
2015. Where from? From Pennant Hills, from Mr. Ryan's property at the Nepean, from Prospect, from various other places, and from ships which come to the port in ballast.
2016. What does it cost you per ton delivered in Sydney? The cost varies with the quality. Our first-class metal costs us 9s.
2017. I am not speaking of the breaking of it? We get the greater part of it broken.
2018. What does the metal cost you delivered in Sydney, when it is broken? About 9s.
2019. What do you pay for it in its unbroken state? 5s. to 6s.; the price varies.
2020. What do you pay for breaking it? 3s. a ton.
2021. Do you use machines for breaking it? We do not; but there is one contractor who supplies us with machine-broken metal.
2022. Is that as good as the other? I do not reckon that it is. We do not pay the same price for it. We pay 8s. 6d.
2023. Do you think that the Corporation could save anything by using machines instead of hand labour? I believe that it would be very expensive, taking into consideration that the machine-broken metal does not wear so long.
2024. Is it not so good a fracture? Not nearly so good as metal broken by hand. The machine-broken metal is thin, flaky, and broad. For good roads you want the metal broken in the form of a cube, as nearly as possible, so that it will present a flat surface, but at the same time have great strength to resist pressure.
2025. Could you tell us how many men are employed in the Corporation? The number of men employed, including carters, is 248 at the present time.
2026. Do you get much of your work done by contract? We do all that we can, all that I think advisable.
2027. Why do you say that you think advisable? Because there are some works which I think would be badly performed by contract.
2028. Could you not draw up specifications? I have done so, and we have had tenders for some works, such as the repairs to streets, and the tenders were at higher prices than the work cost us.
2029. Are you in favour of having the work done by day labour? I am not. I am an advocate for contract work wherever it could be done satisfactorily.
2030. Do you think that the fact that you get the repairs of the street done by day labour, prevents other persons

T. H.  
Bradridge,  
Esq.

28 Nov., 1873.

persons from giving their attention to the business which would enable them to contract for it at a cheaper rate than the Corporation can get it done for now? It might have that effect; but the fact is, we have called for tenders, and the tenders have exceeded what we could get the work done for by day labour.

2031. Do you think that the men employed by the Corporation work as hard during a given number of hours as they would if they were working under a contractor? I have some men I think who work as hard for the Corporation as they would for others.

2032. You think they work harder for the Corporation than they would for private individuals? I do not think that these men —

2033. I want to know whether the men, as a whole, work as hard for the Corporation as they would for contractors? As a whole I think they scarcely work as hard for the Corporation as they would for private contractors.

2034. Do you think a contractor would get as much work done by five men as the Corporation would with seven? I think it is possible he might do so by the greater supervision which he could exercise, the contractor being always on the work. I believe he would, and that is why I advocate contract work where I can get it done.

2035. What do you think of the present system of employing carts;—do you not think that some better system could be adopted than that of employing them by the day? I do not see my way clear to do it.

2036. You do not think it impossible? I do not think it impossible, but I do not see my way clear to do it; certainly not having regard to the way in which I have had to work during the last few years—patching up the streets.

2037. What supervision have you over these men? I have foremen of works, or clerks of works, who have also gangers. The men are mustered in the morning and then parcelled off to their different works. Gangers supervise these different lots of men, going round from time to time, and I issue my instructions to the clerks of works, who convey them to their gangers.

2038. Have you any system of piece-work? Pipes are laid at so much a yard; and that system of piece-work has been in operation now since the year after I entered the service of the Corporation. About thirteen years ago we began to lay all the water-mains through the city by piece-work, excepting only where two or three lengths would be required, and it was not advisable to get a gang. The work has been done under a schedule of prices.

2039. Do you not think that a system of petty contracts could be adopted with advantage if you kept what we may call a petty contract book in your office for all works required in the city? I do now anything that I can do by contract. If I have a simple job that amounts to no more than 30s., I make a contract, an agreement, with the man for doing it.

2040. Is it open for competition? The plan I adopt is this: I make a rough memorandum, giving a synopsis of the work to be done, and then I get to know from three or four men, who can be relied upon for good work, what they will do the job for.

2041. Would it not be an improvement if you kept a book in some part of your office from which any person who wished to contract could, without troubling you at all in the matter, ascertain the work required to be done, and give in a price for it. The contractors knowing that the work was to be done would look at the book, inspect the work, and give you a price? There is one great objection to having universal competition; you get a class of men who will tender cheaply, but who know nothing whatever about the business they take in hand. If you give them the job, they cannot do it properly, and you have the greatest difficulty in getting the work done at all.

2042. Presuming that there would be competition from a sufficient number of persons in whom you had confidence, would not the system I suggest take a great deal of trouble off your hands? These petty contracts are not of very great extent, and do not involve so much trouble as you might suppose. First of all I have to draft the work, and I hand the drawing to one of my overseers, instructing him at the same time to obtain tenders from a certain number of competent men who may be relied upon to do the work without giving unnecessary trouble.

2043. Do you not see that favouritism could be carried out under your system, and that it could not be if a book were placed upon the table, and every man who thought proper to tender for the work entered in it would be at liberty to do so. Suppose you wanted 20 yards of water-main laid, you enter it in this book, with all necessary particulars as to situation, depth, and so forth; in an hour or two you get two or three tenders—could you not select the best? In a case like that you could have universal tendering.

2044. What other cases would you allude to? I may have a job of carpentering or plumbing which only a tradesman can do properly; and in such a case I might get a tender from a man who was totally incompetent to do the work.

2045. Then he would not be paid for it? But there are many things in which you cannot exercise strict supervision, in which you must trust something to the workman you employ.

2046. Plumbers are licensed; and if they did not do the work properly they would not get another job? I do not deal so much in plumber's work.

2047. I am speaking of the smallest jobs, my object being to get rid of this system of day work. If the work you wanted doing were only worth 10s., people would soon become accustomed to come to your office to look at the tender-book? They would.

2048. Would it not have the effect of drawing out a lot of small tenderers, persons who were competent to do the work, and would not the city authorities then be sure of getting their work done in the best possible manner and at the lowest possible price? They get that now; I have a large number of persons constantly resorting to my office in search of work.

2049. But you tell me that you resort to your gangers, and that they get two or three tenders. In that way there is likely to be favouritism; but if you had a tender-book there could be no favouritism, for every man would be able to see the book and give in a tender. You could adopt the system of requiring successful tenderers to give a deposit to ensure that the work shall be carried out properly? I am afraid if we were to do that we should have such a multiplicity of red-tapeism that I should never get through the work. I cannot take money myself, and I should have to hand every man who does any work for the Corporation over to the treasurer, so that he might make a deposit. I agree with you as to the advantage of the tender system in the main, but if you want to employ good workmen no plan that you can adopt will stop favouritism.

2050. If a tender-book were laid upon the table at your office at a certain hour in the morning (say 9 o'clock) you and your gangers would be saved the trouble of looking up tenderers? Yes.

2051.

2051. That is the way they do in Melbourne: the tenderers sign their names in the book, and the officials have only to see that the work is properly performed? That may be all true enough, but there are some men whom you cannot get to do good work. When a pipe, for instance, is covered up you cannot discover whether the joint is properly made or not.

2052. You have a clerk of works who looks over the work now;—have you not? Yes.

2053. He could still do so under my system as well as under this? That could be done.

2054. That could be done as well in the one case as in the other? But I endeavour to avoid the employment of incompetent men. Plenty of men come to me for work that I should not be justified in employing on any account.

2055. You need not give those men a contract if you once find that they scamp their work? The system you speak of never occurred to me before, and I see a great deal in favour of it. I may tell you this much, that when I took the office I now hold I found that there were a great many men who had the run of the office and the work. I set myself against such a system of favouritism, and gave every good man a chance to tender.

2056. Under my proposal they would have a chance? I see that they would. The suggestion is a good one, and might be worked to a certain extent; but I know that at first I should get tenders from men who would not do the work.

2057. But that would rectify itself in time? It would.

2058. There are always difficulties in the way of adopting a new practice in such an institution as yours? Yes.

T. H.  
Bradridge,  
Esq.

28 Nov., 1873.

TUESDAY, 2 DECEMBER, 1873.

Present:—

MR. BURNS, | MR. TEECE,  
|  
MR. T. ROBERTSON.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Alderman James Oatley, Esq., was called in and examined:—

2059. *Chairman.*] You are aware of the nature of this inquiry? I understand that it is an inquiry as to the working of Municipalities.

2060. If I remember aright you were a member of the old Corporation of Sydney, before it was abolished? Yes; I was a member of the original Corporation, which was afterwards succeeded by Commissioners.

2061. And on the abolition of the Commissioners and the creation of the present Municipal Council, you were again elected a member of the Corporation of Sydney? Yes, I was a member previous to the Commissioners, and after the Commissioners ceased to exist. I was again elected an alderman for the city, and mayor for 1862.

2062. And you have been an alderman continuously since then? Yes, with the exception of one year, I have been an alderman for about twenty years altogether.

2063. Have you found difficulty in carrying out the duties of your office as alderman? In what way?

2064. In so far as the financial position of the Corporation is concerned? So far as the financial state of the Council goes we have always been very deficient of funds. We have found that the amount of rates we were empowered to collect by the Act was not sufficient to keep the streets and works of the city in a proper state of repair; and not only so, we have laboured under this disadvantage, that the endowment of £10,000, which was to have been given to us every year by the Government, has never been paid over. The Government has retained it to meet the interest on the debt due by the city.

2065. *Mr. Burns.*] Was that the debt left by the City Commissioners? Not the whole of it.

2066. *Chairman.*] Of late years you have found the difficulty arising from the financial position of the Corporation increase? We have. While the city has been extending in every direction, and therefore requiring new and increased expenditure, the revenue of the Corporation has, if anything, been diminishing—that is, the revenue which we derive from taxation.

2067. So that in point of fact from the means at the disposal of the Council they are not able to form the streets as they are required? From the funds at our disposal at the present time we have not the means of carrying out those improvements which are absolutely necessary for the health and comfort of the citizens.

2068. I believe you are one of the aldermen who represent Fitzroy Ward? I am; but I have not represented that ward during the whole time that I have been an alderman of the city.

2069. Are there not many streets in Fitzroy Ward which have cost a large sum per mile to form, metal, and kerb and gutter, while the revenue derived from the properties abutting on those streets is not more than sufficient to pay the gas rate? There are some streets which have only a very few houses in them but where a very large outlay has had to be incurred. In some of these streets there is a great deal of unoccupied land, and the rates received from the few properties that are built upon are not sufficient, at present at any rate, to pay the interest on the money spent in forming the streets and in kerbing and guttering them.

2070. You are aware that vacant lands do not at the present time pay taxes? They do not.

2071. Do you think that it would be equitable that a rate should be levied upon vacant land? I think there ought to be a rate levied upon unoccupied lands. Land has been bought at a very small price indeed, say at £2 or £3 a foot; and after the Corporation has gone to the expense of making the streets and kerbing and guttering them, the value of these lands has been enhanced from £2 or £3 to £10 or £12 per foot. This increased value has been obtained to a very great extent if not altogether by the improvements effected by the Corporation, and towards the cost of which the owners of the land pay nothing.

2072. I think your remarks will apply to Bourke-street? They apply to several streets in Fitzroy Ward; Cook Ward and Denison Ward more particularly.

J. Oatley,  
Esq.

2 Dec., 1873.

J. Oatley,  
Esq.

2 Dec., 1873.

2073. Deep and extensive cuttings have had to be made to form some of the streets? Yes; in some of them.

2074. From your experience as an alderman, do you think that the Municipal Council of Sydney can carry on satisfactorily with their present revenue? I do not believe that it could attend to the requirements of the city in a way that would be satisfactory to the electors, because we have not money enough to carry out the improvements which are required to be made in the various wards of the city. We want some further endowment to enable us to do it.

2075. Would you carry out many of the improvements which are now carried out in a more satisfactory manner, that is so far as the Council and the citizens are concerned, had you the proper means? The improvements which are now made are carried out in this way: The aldermen of the various wards call for a report on any work which they think ought to be done. This report is furnished by the city surveyor, and then the works are generally carried out in accordance with his report. There is no doubt that if we had the means, more extensive improvements would be made, but those works which are now carried out are carried out satisfactorily and properly, so far as the funds at the disposal of the Council will allow.

2076. The city surveyor in framing his reports has to take into consideration, to a certain extent, the means at the disposal of the Council? It is the duty of the city surveyor to report upon the cost of the various jobs, and it is a matter for the Council to say whether the works shall be carried out or not.

2077. Are there many works, such as the formation of streets, which you think it necessary should be carried out for the benefit of the city? There are. There is Brougham-street, for instance, in the ward which I have the honor to represent, which requires a very great outlay to complete it. If that work were to be undertaken by the Council during the present or the coming year, it would require the whole of the rates available from the ward to finish that job alone; indeed, I very much question whether the whole of the rates would give a sufficient amount to do it.

2078. Do you mean the whole of the assessed rates from Fitzroy Ward would be required to form Brougham-street? Yes; to carry out the improvements in that one street. But there are other streets which require doing as well as that. There is Bourke-street, for instance, up near Darlinghurst Gaol, where there requires a great deal of filling-in to be done, a retaining-wall to be erected, kerbing and guttering to be laid, and various other works.

2079. As to Denison Ward? You could expend the whole of the revenue of the city in Denison Ward, and then you would not complete all the works which are desirable and necessary in that division of the city.

2080. You are aware, I presume, that the net revenue of the Municipal Council from all sources at the present time is £48,000 a year—that is the revenue available for city improvements? Yes.

2081. And you state that that amount is not sufficient to carry out the works required in a manner satisfactory to the citizens? Decidedly not.

2082. In round numbers, what amount do you think the city would require to perform those works in a way that would be satisfactory to the aldermen and to the citizens? I have not considered that matter closely enough to enable me to give an opinion at present; but I believe a report has been prepared by the officers of the Municipal Council on the subject.

2083. You could not yourself state what would be required? I am not aware at the present moment.

2084. The report to which you refer was under deliberation in the Council on several occasions? Yes, it was, and for a considerable time.

2085. Was it adopted? It was adopted.

2086. How? It was unanimously adopted by the Council.

2087. Did you, as an individual member of the Corporation, vote for it? Yes; I thoroughly agreed with it; that is, so far as the importance and the absolute necessity of some further endowment being given to the city.

2088. It suggested, I believe, that the Corporation should have power to levy taxes on Government property in the same way as they do upon the property of the citizens? Yes, rates for the improvement of the city, for sewerage, and for water. We have to pay those rates as private individuals.

2089. It also suggested that a sum of money, equivalent to that which is collected from business licenses in the city, should be handed over to the Municipal Council to be by them expended in the improvement of the city? Yes; either that the Council should have the power to grant these licenses and receive the money, or that the amount which they would realize should be handed over to the city for improvements.

2090. The Corporation, as a body, did not desire to have the power to grant publicans' licenses? They were not particular as to whether they had that power or not. They were quite willing to leave that matter in the hands of the Government, so long as the amount realized from them, or a reasonable proportion of the amount, taking into consideration the expense of collection, should be handed over to the Council.

2091. George-street and Pitt-street, I suppose, may be said to be the leading thoroughfares for the whole traffic of the Colony? They are the leading thoroughfares of the city. George-street and Parramatta-street may be considered as the outlet to all the southern and western portions of the country.

2092. A portion also towards the steamer's wharf, northwards? Yes.

2093. I think it was stated in the report that the taxes abutting on these streets were not sufficient to keep them in repair? They are not sufficient even for blue-metalling those streets, not to take into consideration other expenses.

2094. I believe the mayor and aldermen have had it in contemplation to get harder material for kerbing and guttering than sandstone? Yes; a resolution was passed by the Council, ordering that tenders should be invited for granite and other materials more durable than sandstone.

2095. Having regard to the present revenue of the Corporation—do you think that you could enter into sufficiently satisfactory arrangements to secure a large supply? We could not do so. We should have to go further into debt, and I believe that at the present time on the city rate we are within £10,000 of the amount we are authorized to borrow.

2096. You have considerable private property in the City of Sydney;—have you not? Yes.

2097. Are you of opinion that the works of the Corporation are carried out in an intelligent and economical manner? I think so. I think the officers are very efficient, and there is never any matter which comes before the Municipal Council which is not fully discussed and examined into in every possible way before any vote is arrived at. I think that the works done by the Municipal Council of Sydney are as well done as similar works by any other public body.

2098. Do the aldermen, as a body, attend to their duties? Yes, very regularly indeed, as a body.
2099. During your experience has there ever been a want of a quorum in the Council? I do not remember anything of the sort. There may have been a meeting which lapsed during some holiday time, but I do not recollect it. I was never aware of any business of importance being brought before the Council when there was not a quorum of the aldermen present.
2100. I suppose the same may be said of the committees? The same may be said of the committees. They are very regularly attended. The chief part of the business of the Corporation is done in the committees, subject to the approval of the Council.
2101. It has been stated before this Committee that the different mayors of Sydney have, during the last six or seven years, expended more money than they were warranted in doing by law? That is a positive fact. That has been the case ever since Mr. Charles Moore took office as mayor. He first introduced the practice, and it has been carried on from that time to this.
2102. Has that had an injurious effect? I think so. I do not think it is right that the mayor should expend money unless he first obtains the sanction of the Council—that is, any money exceeding £10, which is the amount he has authority to spend in cases of emergency.
2103. With reference to the sewerage of the city—are you aware that the general plan is that which which was laid down during the time the Commissioners had the management of the affairs of the city? Yes.
2104. And the cost of constructing those sewers was handed over to the Corporation as a debt? Yes; the Corporation or the representatives of the city had no voice in the expenditure of the money at all. The debt was contracted by the Commissioners, who were appointed by the Government, and who were not in any way responsible to the citizens.
2105. From the fact that these sewers were commenced by the Commissioners, the Corporation which has come into existence since has had to expend large sums of money to complete the works? They have to complete them as far as possible.
2106. When that debt was handed over, were the Corporation in a position to collect the taxes—the sewerage rate—so as to pay the interest on the debt, and to complete the works? I think the Council collected some portion of the rate, but the Act was so imperfect that we could not enforce the collection of the rate, and any money that was received was paid voluntarily by persons whose premises were connected with the sewers.
2107. Notwithstanding that fact the Corporation felt it to be their duty to endeavour to carry on the works to completion for the benefit of the public health? Yes; and large sums of money have been expended by the Council, although they were not legally empowered to collect the rates, that is to say, from some defect in the Act they could not legally enforce the payment of them. Still, however, a large amount has been voluntarily paid in by the public.
2108. The matter, I think, was tried in the Court? Yes; and it was found that we had not the necessary power.
2109. Counsel's opinion was taken on the point? The Court decided that we had not the power.
2110. *Mr. Burns.*] The Supreme Court? I think it was the District Court, if my memory serves me correctly.
2111. *Chairman.*] Counsel's opinion was taken? Yes.
2112. And it was considered that it would be useless to proceed with the case? Yes; we were advised that we had really no power to enforce payment.
2113. With regard to the water supply, a similar debt was handed over to the Corporation with the water works? Yes.
2114. Has the Corporation collected the whole of the money to which they were entitled under the Act since then? I think so—as far as the water is concerned. We have power under the Act to charge the Government with the cost of pumping the water into Sydney, which we supply to the different Government establishments. An estimate of the cost has been made out, but the money has never been paid to the Municipal Council. That, of course, is for the cost of pumping alone, and does not include any charge for wear and tear. We are bound to supply the Government with water free.
2115. So that the Corporation has not been in a position to pay the interest or the principal of that first debt incurred by the Commissioners? No.
2116. The money that has been collected has all been expended in extending the mains through the city and to the suburbs? Yes.
2117. Has the Corporation been desirous of extending the water supply to the various suburban Municipalities? There has scarcely been an application where it was possible to supply the water to the suburbs which has not been granted.
2118. And granted although there would not be a sufficient return to reimburse the Council for their outlay in extending the mains? The rule has been that the main should not be laid down without there was an amount collected from the parties which would be sufficient to pay the interest on the expenditure.
2119. The convenience of the residents of the suburbs has always been attended to? It has always been favourably considered.
2120. That was always taken into consideration as well as the return that was to be made? Exactly.
2121. You say that the whole of the revenue arising from the water has been expended in the construction of the works and the extension of the mains through the city and to the suburbs, wherever it was possible to supply the suburbs? Yes; in fact more than our income has been expended.
2122. If the revenue derived from the water had not been extended in that way it would have been wholly absorbed in the payment of the public debt? As a matter of course, if it had not been expended in the way I have stated, a portion of it would have gone to pay the interest due on the debentures issued for water purposes.
2123. But with that revenue I think the water supply of Sydney has been quadrupled in the last ten years? Yes; there is a statement which was made by the City Engineer which shows clearly the quantity of water conserved some years ago, and the quantity conserved at the present time.
2124. With regard to the water rate levied now? The rate is 5s. a room, and a special rate is charged for manufactories.
2125. And for engines? Yes, a special rate is levied. They are supplied by metre, so much per 1,000 gallons.

J. Oatley,  
Esq.  
2 Dec., 1873.

- J. Ostley,  
Esq.  
2 Dec., 1873.
2126. Do you consider that, on the whole, the room-rate is as equitable a plan as could be devised? I think so. I think the rate is quite low enough, especially taking into consideration the amount of our liabilities at the present time. It would not be possible to reduce it.
2127. Would it not be a more equitable plan to charge the rate upon the value of the property, so much in the £? I do not think so. Take the case of the Banks, for example. They consume very little water indeed, but if they were charged according to the value of the premises they would have to pay a very large amount, while a washerwoman, who lived in a house of two or three rooms, and who consumed an enormous quantity of water, would scarcely have to pay anything.
2128. So that you think the present room-rate is as equitable a plan as can be devised—that it is a fair compromise between large and small owners of property? I think so.
2129. With regard to Prince Alfred Park a large expenditure has taken place there;—has there not? Yes.
2130. How long was the proposal to erect that building before the Council before it was adopted? A considerable time. It was a long time before the Council would consent to spend any money upon it, and no money would have been spent but for certain promises that were made.
2131. Did the citizens as a body interest themselves in favour of the erection of that building? I do not know that there were any public meetings called to advocate the erection of it, but I believe that the general feeling of the community was in favour of the erection of it.
2132. Did an election of aldermen take place while the matter was under consideration? Yes.
2133. And the aldermen who were returned were in favour of it? Yes. There was great difference of opinion. The majority were in favour of it.
2134. Looking at that building in a Municipal point of view, do you consider it a success? I think that the country and the citizens generally have been very much benefited by it.
2135. Looking at it in a financial point of view? It has not paid.
2136. But so far as the Colony is concerned it has been of great benefit? It has.
2137. The Government, I think, were in favour of the erection of the building? I do not know I am sure.
2138. Looking at the success which that building has been, at the benefit which it has conferred upon the Colony generally, do you think that the Government ought to assist the Corporation in that matter? If it is considered advisable to continue the present Exhibition Building for the purpose for which it was erected, I think it would be the duty of the Government to assist the Corporation in the matter. It is not merely a benefit to the Municipal Council of Sydney but it is a benefit to the whole Colony, and therefore I think the whole Colony ought to bear some portion of the cost. The building does not pay for the outlay that was expended in the erection of it. It is a questionable matter whether the Government will not require that Park very shortly for railway purposes; and if they do why then as a matter of course they would have to reimburse the Corporation for the money expended there.
2139. I see there has been a very large expenditure connected with Moore Park? Yes.
2140. Has that been a beneficial expenditure upon the whole? I think there has not been such care and discretion used in expending the money there as there ought to have been; but I believe what has been done has been productive of very great benefit to the general public. Formerly that locality was a mere mound of sand, and now thousands of the citizens, residents in the suburbs, and people from the interior, resort there as a place of recreation.
2141. It is much used by residents in the suburbs? It is.
2142. You stated that sufficient care and attention was not given to the expenditure of the money? I am speaking of this particular place. I believe there has been a great deal more money expended on Moore Park than ought to have been expended there. Money was expended without the consent of the Council, and it was therefore improperly expended. I do not say that this has been the case to any great extent; but if all the money which has been expended there had been first voted by the Council, I think more care would have been taken before the expenditure was sanctioned.
2143. But on the whole you think it has been a judicious improvement? I think so. There are thousands of persons who constantly avail themselves of it as a place of recreation.
2144. In the event of the Government refusing to assist the city by further endowment, do you think that the citizens could bear additional taxation? Do you mean as to the city, water, and sewerage rates?
2145. Yes? I believe that they are over-taxed now; that they pay to the full extent of their power; and I do not think that it would be advisable to extend the power of the Municipal Council so as to enable further taxation to be levied.
2146. A Bill is now before Parliament having for its object the election of mayor by the citizens;—do you think that that would be beneficial to the working of the Council? I have always been of opinion that the mayor ought to be elected by the citizens. If he were merely chairman of the Municipal Council I think it would be only right that the aldermen should elect him; but he is the chief magistrate of the city and takes precedence on all occasions. I therefore think that the people ought to elect him.
2147. Is there any other matter that you would wish to bring under the notice of the Committee which you think would tend to throw light upon the working of the Municipal Council? I am not aware that there is. I think that something must be done to increase the endowment of the city in some way or other. A report has been prepared, embodying the views of the Council upon this subject, and that report I think contains everything that is absolutely necessary. Unless some of these suggestions, if not the whole of them, are carried out, I believe it will be impossible for the Municipal improvement of the city to go on so as to meet its growing wants.
2148. You have been an old resident in the city;—do you see any marked difference in the water of the harbour—has it been visibly affected by the sewage? The sewage has a very injurious effect in discolouring the water and filling up the harbour with silt. But the Municipal Council has done all it can to prevent the silt from flowing into the harbour. One hundred or more gully-shafts have been made for the purpose of intercepting the flow of silt into the harbour during the last few years, and thousands upon thousands of loads of silt have been carted away which would otherwise have gone to fill up the harbour.
2149. So that the present plan of sewerage has entailed an extra expense upon the Corporation in that regard? No doubt; first in putting these gully shafts down, and then in carting the silt away from them.
2150. Is there not a very offensive smell arising from Darling Harbour? Yes; nearly all the closets in the city are connected with the sewers, and wherever the sewage flows into the harbour there is sure to be an offensive smell.
2151. Complaints are frequently made? Very frequently indeed.

J. Oatley,  
Esq.  
2 Dec., 1873.

2152. Have you heard that there have been any complaints from Government House? I believe that communications have been sent complaining of the stench that arises from the mouth of the sewer in that particular locality; but not only in that locality—complaints are made from various other neighbourhoods.
2153. *Mr. T. Robertson.*] Has the value of city property increased much of late years? In some business streets it has improved very much. Where ground has been bought at a very low price, and streets have afterwards been made, and kerbing and guttering laid down, the value of property has increased considerably. Under the Municipal Act parties forming new streets by the sub-division of their property, are bound to pay for the forming of them; but not for the kerbing and guttering. Until lately that provision of the law has never been carried out; the Council has formed the streets without calling upon the proprietors to pay the amount.
2154. What I mean to suggest is this: If the value of city property has been increased by the improvements effected, and in proportion to the debt incurred, would it not be a fair thing to make the owners of the freehold clear off that debt? I do not see how you could possibly do that. In the first place they now pay a city rate of 5 per cent. on the net income; they then pay a sewerage rate if demanded; they pay the water rate, and the street watering rate, and they do the paving in front of their properties, so that I should say that 25 per cent. of the actual income goes in rates. We generally assess the property by the annual value; a property may be sold for £5,000 or £10,000, but the annual rent derived from it may not be more than £100. We frame the rate not upon the value of the property but upon the amount of rent which it will produce.
2155. But most of these assessments fall upon the tenants? No doubt they do, either directly or indirectly. The rates are taken into consideration in determining the amount of the rent.
2156. What amount of grant from the general revenue would it take to put the finances of the city in a satisfactory state? I cannot state the amount; but there is a report, which has been sent in to the Legislature, which gives full information on this subject. At the present time the endowment of £10,000 for the city fund is retained by the Government to pay the interest on the money actually due.
2157. That is the debt arising from the construction of the sewers? Exactly; and that debt was contracted by the Commissioners, who were not in any way responsible to the citizens, who had no voice in the expenditure of the money.
2158. *Chairman.*] And who had no power to collect the revenue? The Council had no power to enforce the payment of the rates.
2159. *Mr. T. Robertson.*] Have the citizens of any municipal borough at Home power to elect their own mayor? I am not aware; I am a native of the Colony, and have not heard what the practice is in England. A resolution was passed by the Municipal Council of Sydney some time ago, asking the Legislature to pass an Act enabling the citizens to elect their own mayor. As a matter of course I mean out of the aldermen.
2160. In regard to the nomination of aldermen do you think that the Act requires any amendment? Yes, there is some difficulty in the matter, but alteration is certainly needed. Persons are nominated now who are really not consulted in the matter. I think it necessary to obtain the consent of a person before he is nominated as a candidate. If, under the present Act, a person is nominated, and there is no opposition to his election, we cannot declare him to be elected in the same way as a candidate for Parliament may be returned, but we are obliged to keep polling-places open from 9 o'clock until 4, and go to all the expense of a contested election, when in point of fact there is no contest at all. I think the consent of the candidate ought to be obtained in writing previous to nomination or the ballot; and that, where there is only one candidate proposed, the returning officer ought to have power to declare him elected without any further proceedings.
2161. Persons who are nominated can avoid being elected by sending a letter in time? No; several persons were nominated the other day without their consent, and the names of the persons which appeared to the nominations were actually forgeries. Still, however, although that was known, they had to go to the poll, and their names had to appear upon the ballot-papers. That wants altering in some way or other.
2162. Then, although there is no opposition to the election of a particular candidate, I suppose the city is put to some expense in providing the forms necessary for an election? As to the expenses of an election, I have known cases in which the expenses have been run up to £300 or £400; I mean the candidate's expenses.
2163. What does each polling-place cost the city? A polling-place does not cost very much. There would be £2 2s. for the room, and two or three poll-clerks have to be employed. I suppose £20 would about cover the cost of each polling-place.
2164. And that expense is incurred whether there is more than one candidate or not? Yes; and it is for that reason that I think it would be advisable to give the Municipal Council the same power of declaring a candidate elected in cases where there is no opposition as is possessed by returning officers for elections to the Parliament. It is a perfect farce to open polling-places and employ a staff of clerks when there is really no opposition.
2165. *Chairman.*] Have you any knowledge of the working of other Municipalities than that of Sydney? I cannot say that I have. I think it is under consideration as to whether it would not be advisable to increase the representation of the city—that is, to have more aldermen. Something of that kind has been thought of; but I consider that the present number of aldermen—two for each of the eight wards into which the city is divided—is quite sufficient.
2166. You would not give three to each ward? I would not.
2167. You would not increase the present number? I would not increase the number. I consider that it is a great mistake to suppose that the business would be better done by a larger body.
2168. As to length of service? I do not know as to that.
2169. Taking into consideration that a large portion of the city projects eastward into Paddington, and also having regard to the purposes of Municipal government generally;—do you think that it would be advisable that Paddington and Woollahra should be annexed to the city, on the understanding that the revenue raised in those localities should be expended there? I think it would be a very great saving indeed if the Municipalities immediately around the city were connected with it. They should send their own representatives to the Council, and the money raised in the existing Municipalities should be expended upon them. It would be a very great saving to these suburban Municipalities; for I believe that the staff of officers we have at the present time could do the whole of the work with very little additional assistance. The Municipalities which joined with the city would of course have to bear their proportionate share of the working expenses.

- J. Ostley, Esq.  
2 Dec., 1873.
2170. Do you think that they would obtain the services of superior officers to attend to their works than they can now afford to employ in these Municipalities? I should be sorry to say that the officers of suburban Municipalities were not conducting their business properly. I think that there would be a very great saving, that the work would be better performed, and that the present staff of officers employed by the Municipal Council of Sydney could do nearly the whole of it.
2171. So that with the allowance of a horse to some of the officers, and some small office expenses, the whole management of the city and suburbs might be centred in one body? Yes, that is still allowing suburban Municipalities to elect their own representatives.

James Merriman, Esq., Mayor of Sydney, was examined:—

- J. Merriman, Esq.  
2 Dec., 1873.
2172. *Chairman.*] How long have you been an alderman of the city? Five or six years.
2173. You have been mayor of the city for the present year? I have.
2174. The town clerk has been examined before this Committee, and has handed in a report of yours, setting forth the present financial position of the Corporation? Yes.
2175. And certain suggestions were made in that report as to the best way of increasing the municipal funds so as to enable you to carry out your works? The state of the Corporation finances has been considered in committee on several occasions. We resolved to lay the matter before the Government, and that statement was therefore drawn up. That report was adopted by the unanimous voice of the Council.
2176. From your experience as mayor, have you found that you have been able to carry out the works ordered by the Council in a way that was satisfactory to yourself and that would properly meet the requirements of the city? I must give the aldermen every credit for having kept down all unnecessary expenditure during the time that I have been mayor. Nothing has been done but repairing and kerbing and guttering.
2177. Have there not been any new streets formed this year? I think not—not to any great extent.
2178. I think you suggested in your report to the Government that the proceeds of certain licenses—the revenue derived from publicans' and auctioneers' licenses, the fees charged to hawkers, and the fees paid for the registration of dogs, should be handed over to the Corporation. Is that your opinion? We must have an increased endowment in some form, and that appears to me the best.
2179. It has been suggested that if the debt incurred on account of sewerage and water were cancelled, and the amount of the Government endowment, £10,000 a year, were regularly paid over to the Corporation, that would be sufficient to put its affairs in a satisfactory condition, without giving the Council the proceeds of these license fees? I think not. I think that to carry on our improvements in the way that they should be carried on in a city like this, all that is suggested by the Council in that report to the Government is absolutely necessary. Our revenue ought to be double what it is to carry out the improvements required. Our revenue is £48,000 a year, and it ought to be at least £90,000, if we are to carry on our works as they should be carried on—to finish the Town Hall, and do other things.
2180. Have you had many applications from the citizens to carry out works during your mayoralty? Yes, a great number.
2181. Are there many works now in abeyance which you consider are necessary—should be done? Yes, there are very many.
2182. You are not able to carry out these works from the want of funds? No; we have not the funds. We have had to incur a large expenditure for improvements, from which we get no revenue whatever, such as steps, and the removal of encroachments.
2183. Upon steps? Yes; there has been a large expenditure upon stairs. Caraher's Stairs, Butler's Stairs, Moore's Stairs, have been built at a great cost. They are a great convenience to the public, but we derive no revenue from them.
2184. What did they cost in the aggregate? I should say not less than £3,000.
2185. Have these stairs, upon which you have spent so much money, had the effect of increasing the value of property? I think so. The neighbourhoods in which they are erected have been improved a great deal; they have been made much easier of access.
2186. Have you given any attention to the question of water supply latterly? I have during the last year. I have given much attention to it; more especially during the past twelve months.
2187. Could you state to the Committee your views with regard to the water supply of Sydney. Having regard to the present requirements of the city and its probable future wants, do you think the present source of supply is sufficient? If the Government were to resume all the land which is now occupied with buildings, and all the land held by private individuals, which will shortly be sold, the drainage from which flows into our reservoir and pollutes the water, I think if that were done, and if a further expenditure were incurred—I would not say to a large amount—in the construction of dams and reservoirs, then we should have a supply sufficient to meet the requirements of the city proper and the suburbs, and for manufactories also.
2188. Are there many houses on the water reserve now? I think there must be nearly 200.
2189. The drainage from which is towards the watershed? Which drain into it, and pollute the water. Unless those lands are resumed, the Government will have to go somewhere else for a supply of pure water.
2190. Why should the Government resume this land? The Corporation is not in a position to do so. We have not the power to do it. We have taken a large debt over from the Government, and they have a right to see us out of the difficulty.
2191. As that is the natural well or watershed belonging to Sydney, the Government ought not to have sold the land? I do not think one bit of that land ought to have been sold.
2192. But you think that the Government, having sold it, they ought to resume it again? I do. Unless something is done the water will become so polluted that it will be utterly unfit for use. There are 1,000 acres of land upon the water reserve which will soon be built upon.
2193. Has the land to which you refer been advertised? I have been informed that it has been cut up into allotments. If, in addition to the present sources of contamination, 1,000 acres are covered over with buildings, I do not know what will become of the watershed.
2194. *Mr. T. Robertson.*] Is that the watershed which supplies the Botany stream? Yes.

J. Merriman,  
Esq.  
2 Dec., 1873.

2195. *Chairman.*] It has been given in evidence that it would be more equitable to charge for the water upon an assessment instead of the present plan of charging by the room. From the experience which you have gained as mayor, what is your opinion;—whether do you think it would be more equitable to charge it upon the basis of the city rate, or to continue the present rate of 5s. per room? I think that all manufacturing and establishments of that kind ought to be charged by meter; but so far as the citizens generally are concerned, I believe the room rate is the more equitable.

2196. It has been stated that property has been greatly increased in value by the supply of water, and that notwithstanding the assessment would be heavy the owners of property should bear it;—are you of that opinion? No; I think the best plan is to charge by the room. I do not think the assessment plan would answer at all.

2197. You have heard the remarks made by Alderman Oatley with regard to the sewerage? I have.

2198. Do you differ from him in opinion upon that subject? I do not.

2199. You hold the same opinion as that which you have heard him express in giving his evidence here to-day? I do. I think some other system will have to be adopted, and that before long, to remove the sewage of the city into the sea in some way; but I believe the Corporation has taken every means in their power to prevent the silting up of the harbour; we do all that we can.

2200. From your position as mayor you have necessarily been brought into close contact with the aldermen generally;—do you think that the aldermen have attended properly to their duties, and that they have shown a desire to see the works required for the city carried out in the most economical manner? I do. At every meeting of committee we have two-thirds of the aldermen present, and in nineteen times out of twenty we have a full Council. During the time that I have been mayor the aldermen have done all they could to economise the expenditure.

2201. What wages do you pay the workmen employed by the Corporation? Per day?

2202. Yes? Labourers get 7½d. per hour; some picked men (gangers) get from 7s. to 9s. per day; men with horses and carts, 10s.

2203. You have yourself been a considerable employer of labour? I have.

2204. Are you of opinion that the works of the Corporation are carried out as economically as private works? I think so, taking them as a whole.

2205. With regard to the labour which is employed in the city;—are you of opinion that it is of the best character? We employ a large number of men; and the orders which have been given since I have been mayor to all the men in charge of them are, that any man who does not do his duty properly is to be weeded out and replaced by a man who will. Taking them as a whole, I think we have a first-class lot of men at work.

2206. The works are carried out mainly by contract, are they not? The principal part of them is done by contract, but there is some day labour employed. The contract system is adopted wherever we can.

2207. As chief magistrate of the city, are you not compelled to employ men from various circumstances, to work on the streets who are not able to do a day's work? There are some few who are not fit for anything else, who are employed to pick up stones, weeds, and so on.

2208. Are there not many strangers who come from the interior, and persons who are newly arrived in the Colony, whom you are forced to employ? Yes, a great number. They come to us in a state bordering on starvation, and we put them on for a few weeks until they can turn themselves round.

2209. You say that you then weed them out? We weed out all bad workers, and keep the good men on.

2210. So that giving assistance in that way is one source of expense that the Corporation is subject to? It is.

2211. During your tenure of office as mayor, have you found the buildings at present occupied by the Council too small and very inconvenient for the use of the Corporation? I think they are very inconvenient myself. The accommodation is not sufficient for the large staff of officers we have there. In some of the rooms, which are very small, there are two or three officers at work.

2212. Are there sufficient rooms to show the plans or to provide for their safe keeping? I hardly think there is.

2213. Your opinions on the financial position of the Corporation are embodied in that report which was adopted by the Council, and which has been put in evidence by the town clerk? I fully endorse that report.

2214. You have seen no reason to modify your opinions with regard to the suggestions offered in that report? I have not.

2215. Are you of opinion that if the Parliament were to give the Corporation power to levy taxes at a higher rate you would be able to clear off the interest and principal of that debt due to the Government? I believe that as far as property-holders are concerned they are quite sufficiently taxed already. I feel it to be so myself; I have a large number of houses in the city, and I have got hard work to make 6 per cent. out of them.

2216. You think it would not be possible to levy a sufficient rate to discharge the debt due to the Government? I think it would not be possible, and I am of opinion that it would not be just.

2217. *Mr. T. Robertson.*] Has the city ever received an endowment of land? They have had land handed over to them as reserves for the city—places of public recreation.

2218. But you have not reserved any land which the city could let on building leases? We have not had the power to let any of our lands on building leases until latterly.

2219. Is there any land in the neighbourhood of the city now with which the Government could endow the Corporation, so as to create a large estate? For the city proper.

2220. Land suitable as an endowment for the city as a source of future revenue? I am not aware of any, excepting the watershed.

2221. There are a great many Municipalities in the country which are now getting very much straitened for want of funds, the preliminary years during which they received assistance from the Government having run out;—do you not think that in cases such as those it would be wise for the Government, while they have so much country land available to endow country Municipalities, so that these lands which are now of little value may become to them a source of revenue in the future? I think so.

2222. I suppose that if that had been done in the early days of the Colony the City of Sydney would now have had a princely revenue? I believe it would.

2223. When do you expect that the new Town Hall will be finished? I cannot tell you.

2224. *Chairman.*] The completion of the Town Hall will depend to a great extent upon the amount of assistance you receive? Yes.

- J. Merriman, Esq.  
2 Dec., 1873.
2225. Assistance by the Government? Yes. It might be roofed in in twelve or eighteen months if we got a suitable endowment.
2226. *Mr. T. Robertson.*] Is it a fact that the present system of drainage is radically defective, and that the drains ought to have been carried out towards Bondi? I think so; it must come to that some day.
2227. Is the tide in the harbour sufficient to carry away the impurities which now flow from the sewers? I think not; I am round the wharfs every day, and I can see the harbour silting up the whole year round. The smell arising from it is in some places abominable.
2228. And the only way to obviate that is by the adoption of some new system? Yes; by taking the sewerage out to sea—to Long Bay, Little Coogee, Bondi, or some of those places.
2229. What is your opinion with regard to the election of mayor;—should the mayor be elected by the aldermen or by the citizens? I believe the mayor ought to be elected by the people out of the body of the aldermen. I have always been an advocate for that myself.
2230. I should have thought that it would have been more agreeable to the aldermen to elect their own chairman than that any outside influence should place a chairman over them? As far as my judgment goes, the aldermen are almost unanimous in the opinion that the mayor ought to be elected by the people. I think there is a Bill before the House now which has the sanction of the Municipal Council.
2231. Do the aldermen think that it would relieve them from any responsibility? Well, I think it would to a great extent relieve them from being enemies to each other.
2232. Does unpleasantness arise from the election? Yes.
2233. I suppose then that what you wish us to understand is that sometimes unpleasantness arises within the Council which would be avoided if the mayor were elected outside? Yes. As a rule, since I have been an alderman, I have heard it said that the mayor elected was the enemy of those who opposed him, that he kept the works required in their wards back, and treated them badly, whilst at the same time he always favoured those who had supported his election. During my term of office, however, I have endeavoured to treat all aldermen alike.
2234. If the Parliament passes the Bill that you speak of, they will be meeting the views of the aldermen as well as of the citizens? I think so. I think there was hardly a dissentient voice when that Bill was under consideration and was approved by the Council.
2235. Is that Bill still before the House? I think it is. It has been here some two or three years.
2236. *Chairman.*] I think it has always been considered by the aldermen and by many of the citizens that the election of mayor caused great excitement to prevail, and often caused opposition to aldermen which would not otherwise take place? Yes, I know that in my own case I was threatened that if I opposed the election of a certain gentleman to the chair I should have opposition when I came to the electors next year, and be put out.
2237. Have you any other suggestions to offer? We are working under twenty-six different Acts, and in nineteen cases out of twenty we get defeated at the Courts with them. They have for the last two months been in the hands of the solicitor for the purpose of having them consolidated into one Act.
2238. Then you have taken some steps towards consolidation? Yes, and I hope it will soon be completed.
2239. Have you made suggestions for the amendment of the law as it now stands, or are your instructions merely that the present Acts shall be consolidated? I believe it is proposed to make some amendments.
2240. After having made a more careful survey of the watershed, would you add to your evidence a statement of the quantity of land which it is probable will shortly be offered for sale? On Sir Daniel Cooper's estate?
2241. Yes; and inform us as to the effect it would probably have upon the watershed? I should say that fully one-half of it, 500 acres, would drain into the watershed.
2242. Have you observed that any Church and School Lands have been marked out for sale on the watershed? I have.
2243. Right down to La Perouse's Monument? Yes.
2244. Would the sale of that land affect the watershed? I should imagine it would.
2245. Have you raised any objections to the Government against that sale? I think some steps were taken in that direction if I remember rightly. We also took steps to prevent them from putting a sheep-yard there, but it was no use.
2246. You have drawn the attention of the Colonial Secretary and the Minister for Works to the sale of that ground? Yes.

Thomas Robertson, Esq., M.P., was examined in his place:—

- T. Robertson, Esq., M.P.  
2 Dec., 1873.
2247. *Chairman.*] You are a Member of the Legislative Assembly? Yes; I represent the Hume.
2248. You were for a considerable time a resident in the district of Deniliquin? Yes.
2249. You have been a member of the Borough Council of Deniliquin? The Municipality was proclaimed in 1868. I was the returning officer at the first election. If you will allow me, I will describe the state of the town before we had a Municipality: There were no foot-paths in the town, and the inhabitants had to wear knee boots in wet weather, for the roads or the streets were converted into perfect quagmires. Since the Municipality was established, the streets have been made, the foot-paths have been formed, and the whole aspect of the place has been greatly improved.
2250. Were you elected an alderman of Deniliquin? I was elected an alderman without my consent.
2251. Did you take office? Yes; I had to do so. I wrote, intimating that I did not wish to act, but my letter was received a day too late, and the other gentleman who were nominated withdrew in order to compel my election. I was anxious not to sacrifice the time which I anticipated I should have to lose if I entered the Municipal Council; but when I found that I was compelled to serve I did my duty as far as I could.
2252. How many years did you serve? I was elected mayor at the next election following that at which I was elected alderman, and I continued to act as mayor for nearly two years until I left Deniliquin.
2253. Do you remember what was about the amount of revenue arising from the assessment of the property there? Shortly after the Municipality was incorporated, the Government handed over to it the bridge across the Edwards, on condition that the proceeds of the tolls should be devoted to keeping the main road in repair for a distance of 4 miles on each side of the town. The money so raised has been faithfully expended; and although the public have been charged a lower rate of toll than they were called upon to

to pay when the bridge was in the hands of the Government—the bridge has been kept in a better state of repair than it was previously, and a very considerable portion of the main road has been formed. It has been made partly of burnt brick and partly of wood, there being no road metal available. There is not a stone within 100 miles of Deniliquin. The wooden road was made of blocks, on a foundation of red gum planks, the whole being covered over with a thin layer of gravel. A very excellent road it made, but the cost, which was at the rate of about £4,500 a mile, was more than we could afford. The use of wood had to be abandoned, and since then the road has been made of burnt bricks, broken up as ordinary metal is broken up, and this has cost at the rate of about £3,700 per mile. The cost of material for road-making has been the greatest drawback that the Municipality has had to contend against. The net income from the bridge has been about £1,000 a year, and has been expended in the manner I have described.

T. Robertson,  
Esq.

2 Dec., 1873.

2254. The revenue derived from the bridge is not an endowment to Deniliquin? No.

2255. But the money is handed to the Council for the special purpose of maintaining 8 miles of the main road? Yes, the main high road of the Colony.

2256. I see, from a return published in the Statistical Register, that the endowment from the Government in 1872 was £518 2s. 10d., and the revenue received during that year was £1,873 6s. 3d. What endowment have you? £ for £ during the last five years.

2257. In that £1,873 the income received from the bridge is included, so that the £518 is equal to the amount raised from the assessment of property in the borough of Deniliquin? Yes, the total revenue of £2,391, includes the bridge money. If you will allow me, I will give you the returns of the bridge traffic. I find that the traffic through the town during the two years that I was mayor amounted to 1,546,110 sheep, between 30,000 and 40,000 head of cattle and horses, 35,045 bales of wool, and say about 3,400 tons of goods, passed through Deniliquin for the interior, and about 2,400 tons were delivered at Deniliquin. The whole of these things, excepting some of the cattle and horses, and the goods delivered at Deniliquin, paid toll at the bridge. I shall have the exact returns of the traffic in a few days, and I will hand them in. (See Appendix B 1.)

2258. But none of the proceeds from that toll was available for the Municipality proper? No, there is a separate account kept, and the bridge fund is only debited with the actual cost of making these particular portions of the main road, and a proportion goes to defray the salary of the officer who looks after the expenditure. The town clerk is the only officer employed; he has had considerable experience as a contractor and builder, and he prepares all the specifications, and acts as overseer in seeing that the works are properly carried out.

2259. Do you remember the salary you pay to the town clerk? I think it is £200 a year.

2260. Is this bridge in the borough? Yes; Deniliquin is a Municipal district. There is North Deniliquin, which is part of the district, and South Deniliquin. The bridge is between the two. I read the evidence given by Mr. Walsh before this Committee, and I think it may be as well to say that the ill-feeling which Mr. Walsh says was engendered by the establishment of the Municipality at Goulburn did not arise at Deniliquin. I think that the establishment of the Municipality there has tended to draw men together, and to increase their respect for each other, rather than to give rise to any ill-feeling or unpleasantness.

2261. I see that there are 20 miles of roads within the borough of Deniliquin;—could you state what length of these roads has now been made? I do not think altogether that more than 2 miles have been made. That would be the outside.

2262. Does the Main Southern Road pass through Deniliquin? Yes.

2263. So that the revenue derived from taxation and endowment is expended on other streets than on the main road? Yes.

2264. The footpaths of that main road I presume are taken in charge by the Municipal Council? Yes.

2265. Is the site of Deniliquin favourable for a town;—is it level? It is too level. It is so level that it is very difficult to drain it—it is almost a dead level. The rain-water flows from the streets into a lagoon at the back of the town. Sometimes that lagoon overflows, and then the town, or three-parts of it, is flooded.

2266. The amount of endowment is equal to the revenue from assessed taxes? Yes; and will continue to be so for five years from the time the Municipality was established.

2267. Considering that the main road is kept up by the tolls from the bridge and the expenditure by the Government, do you not think that the Municipal Council will be able to perform all necessary improvements in a satisfactory manner without further assistance? I think so. The Municipality has erected some bridges and have formed some of the streets,—that is, they have cut the channels and formed the footpaths. But Deniliquin is a very scattered place, and it will be years before they will be able to form all the streets of the town. Nor is there any urgent necessity for making the whole of them. If two or three of the principal streets were made and cross streets formed, so as to connect them together, that is as much as it will be necessary to do for a long time.

2268. So that I infer you do not think it will be necessary that the Government should supplement the amount of endowment when the Municipality gets into its second term and is only in the receipt of 10s. to the £,—or would you wish to see the amount of the Government endowment kept up, so as to equal the revenue raised from local taxation? I think that the better plan would be for the Government to endow the town with a large tract of land from which a revenue could in the future be derived.

2269. Taking into consideration the very small amount of money that would be obtainable, even from a very large tract of land, do you think it would be judicious to alienate (say) 20,000 acres of land, the revenue immediately derivable from which would not be more than £100 or £200—looking to the future, and taking the whole Colony into consideration, do you think it would be judicious to permanently endow each Municipality with 20,000 acres of land? I believe that in America very great advantage has arisen from the large endowments which were given in early days to the cities; and I think that it would be advisable that some such provision should be made here.

2270. To what extent do you think the Municipality of Deniliquin should be endowed with land, and to what extent is there land available? At present there is a common called the permanent common, and there is a large tract of land in charge of the Municipality, which is known as temporary commonage. I think that this temporary commonage should be converted into a permanent endowment for the Municipality.

2271. What would be the probable revenue derivable from the temporary commons? At the present time the revenue derived from the two commons is sufficient to pay the salary of a herdsman, who, I believe,

T. Robertson, Esq. gets £150 a year, and to supply thorough-bred bulls for the commoner's cattle. There would have been a large profit but for the fact that during the last two years very large sums have had to be paid in cutting down the Bathurst burr. I do not think that any large amount of revenue could be expected from these lands at present; and when I say that they would be advantageous as an endowment, I am looking forward to the distant future.

2 Dec., 1873.

2272. The possession of that endowment by the citizens of Deniliquin would be advantageous, and would give them an indirect benefit, so as to enable them to do without a money endowment from the Government? Deniliquin is a place on which any amount of money could be spent. But that is not the question: the people will have to cut their coat according to their cloth; and if their revenue is small their improvements will of course be necessarily small. I do not see on what ground they can go to the general Government for an increased endowment, excepting on the plea that the public revenue is benefited by the sale of town lands.

2273. As I understand you, Deniliquin is a special place, and would require special advantages, owing to its peculiar position near the Border, and the necessity for a common for the accommodation of travelling sheep and cattle? Deniliquin is a great depôt for travelling stock, and always has been; a large commonage is therefore of the utmost importance to the place.

2274. And you believe that both the common proper and the temporary common ought to be in the hands of the Municipal Council for the general benefit of the Colony, and that you might be able to derive a revenue from it, which would pay the expenses of management, and would also be of use as an endowment for the borough? Yes.

2275. How far is Deniliquin from Echuca? It is about 45 miles.

2276. So that this commonage is necessary as a place of rest for cattle and sheep? Yes.

2277. The lands between Deniliquin and Echuca are mostly in private hands? Yes.

2278. So that this commonage is the largest block of land in the district available for that purpose? Exactly. We expect to have in two or three years' time a railway from Echuca to Deniliquin, and this will of course very much enhance the value of the land set apart for temporary commonage.

2279. It is on these grounds that you believe the commonage should be entrusted to the Municipal Council? I think that the present use of them is a necessity to the place, and that the future—the prospective increase in their value—should be secured for the Municipality. At present, it is in the power of the Government at any time to cancel the temporary commonage. They have recently had a portion of it surveyed, and have been talking of selling it at an increased upset price. There is no doubt that in the course of a few years the value of these lands will be quadrupled, and a considerable revenue would then be derived from the leasing of them. I think the Government would be making a provision for the future requirements of the Municipality if they were to endow them with these lands, so that they could let them on leases for a term which would fall in from time to time, and from which the Municipality would be deriving an ever increasing rental.

2280. Is Deniliquin a place likely to become of sufficient importance to warrant the Government from departing from the general course by entrusting the Municipality with the management of so much land? The people of Albury are now petitioning the Government to continue the endowment. They have been in existence so long that the endowment has ceased. Albury is a much wealthier place than Deniliquin, and has a population ten times the number; and seeing that they have found it necessary to appeal for extraneous support, I am suggesting this endowment of land as a provision against the time when Deniliquin will cease to be entitled to any endowment. Deniliquin was selected by Sir Thomas Mitchell on his first journey to the Murray as a place which, from its geographical position, must always be a place of great importance, and upon his recommendation a very large reserve was set apart for the town.

FRIDAY, 5 DECEMBER, 1873.

Present:—

Mr. FITZPATRICK,	Mr. BURNS,
Mr. T. ROBERTSON,	Mr. WEBB.

JOHN MACINTOSH, ESQ., IN THE CHAIR.

Mr. William Pidcock called in and examined:—

Mr. William  
Pidcock.  
5 Dec., 1873.

2281. *Chairman.*] You are town clerk of the Municipality of Camperdown? Yes.

2282. How long have you held that situation? About three years.

2283. Could you tell us the area of the Municipality? I cannot tell you the exact area just now; but there are nearly 8 miles of streets.

2284. What length of streets are formed? About 3 miles are made—completed.

2285. What is the amount of revenue derived from taxation? Between £400 and £500.

2286. In what term of your Government endowment are you? For two wards—Cook and Kingston—we are in the last five years. We have completed ten years, and entered into the 5s. in the £ term. The other ward—Belmore—has just entered upon its second term—10s. in the £.

2287. What is the aggregate amount of the Government endowment? About £250.

2288. Camperdown is very favourably situated with regard to the formation of streets? Yes.

2289. It is tolerably level? There is a gradual incline towards the different bays.

2290. It is favourable to drainage? Yes, very.

2291. So that with the amount of rates you are able to draw from property, after the Government endowment is discontinued you will be able to carry on very well? No; we cannot do that as it is, although we have borrowed £2,000.

2292. Is your Corporation £2,000 in debt? £1,600 at the present time. We have paid off one portion of our debt—£500 and interest.

2293. Do you think Camperdown is sufficiently large in area to be economically worked as a Municipality? It is sufficiently large; but with regard to the style of buildings, and so forth, in it, I do not think it can be worked as a Municipality without considerable help, over and above taxation.

2294.

2294. What help do you consider necessary to enable the Corporation to carry on the work satisfactorily to the public and themselves? I am of opinion that a perpetual endowment is necessary to the amount of at least half the rates, or 10s. in the £.
2295. You would then be able to go on satisfactorily? I do not know that. The Municipality is very peculiarly circumstanced. A very large slice of land has been taken from it, that is, freed from taxation. I mean the University paddocks and buildings and the Colleges; and by-and-by there will be the Prince Alfred Hospital. No revenue whatever is derived from these properties; but by-and-by they will require a new street half a mile in length at least, which will cost £600 or £700 to make.
2296. Considering that your main street is kept in repair by the Government, will not that overbalance that disadvantage? The road itself has been kept in repair; but we have paid a considerable sum of money out of Municipal funds for kerbing and guttering it, and keeping the footpaths in order.
2297. How many aldermen have you? Nine.
2298. Do they give good attendance to their duties? Very good attendance.
2299. Do they give attention to matters coming under their notice? Yes, the most devoted attention, and work with the strictest regard to economy.
2300. What are the wages paid for labour? 6s. a-day.
2301. Do you carry works out by day labour? Sometimes by contract—according to the nature and amount of the work.
2302. You acted as secretary to the Municipal Conference lately held in Sydney? Yes.
2303. Were there many meetings of the Conference? There were two general meetings of the Conference; and a committee has been appointed to meet weekly, or as occasion may require. It has held eight meetings.
2304. How many members were present at the first meeting—mayors and aldermen? Upwards of forty.
2305. What was the result of that Conference? The result was that an almost unanimous opinion was expressed to the effect that the Municipalities could not be carried on without aid from the Government at the rate of £ for £, as a perpetual endowment; and certain matters with regard to the Municipalities Act we considered required to be altered. A committee was appointed for the purpose of drawing up a petition to the Government, considering the Act, and suggesting to the Government certain alterations to be made.
2306. Was any financial report brought up? At the request of Mr. Parkes, or by his directions, I sent to the respective Municipalities in the Colony, and obtained a report of the financial state of each, which was forwarded to Mr. Parkes, as Colonial Secretary.
2307. What were the chief objections to the Municipalities Act? The committee have not gone through it at present. They have not made very rapid progress. The opinion expressed is that the Act, as a whole, is a very good one, but requiring certain alterations to suit the claims the Municipalities make upon the Government.
2308. As far as that is concerned it is still under consideration? Yes. A petition has been forwarded to the respective Municipalities for signature, to be presented to the Government, praying for a permanent endowment.
2309. Are you acquainted with the Municipality of the Glebe? Very little.
2310. Is there any other matter with respect to the Municipality of Camperdown which you wish to state to the Committee for their information? There will be a considerable number of streets requiring to be formed by-and-by; but there will be scarcely any revenue to be derived from them. There is a great deal of unoccupied land in the Municipality; for instance, 100 acres between the "Hampshire Hotel" and Mr. Fowler's, and extending to the borders of the Borough of Newtown. That cannot be let for any other than grazing purposes for the next ten years to come, so the agent tells me; it is out of his power to let it for anything else.
2311. Roads will be required through that? Not exactly through it, but on its side and near to it. Other small allotments are near. People will build upon these allotments no doubt by-and-by; but there are glass-works there, which are somewhat detrimental to the interest of the Municipality—people do not like to build near them.
2312. Has not the Municipality power to remove all nuisances? I do not think they have power to interfere in this case.
2313. What is your salary as town clerk? A merely nominal one—£52 per annum.
2314. What are your duties? I perform all the duties of the Municipality, as clerk and overseer of works.
2315. Do you make out the specifications and superintend? Yes. My time is not wholly occupied. The office hours are from 5 o'clock to 7, three evenings in the week; but the work requires a great deal of my time.
2316. Are you not of opinion that it would be more beneficial that the Municipalities should be sufficiently large, and have sufficient revenue, to enable them to keep a town clerk continually occupied, so as to give the whole of his time? I am of that opinion.
2317. *Mr. Fitzpatrick.*] Do you know the number of rated houses in your Municipality? I am not prepared to answer that question just now, but I know the number of ratepayers is 600, and the amount raised a little over £400.
2318. What is the gross value of the entire rated property in the Municipality? I have the information in the office, and can supply it.
2319. The rate is 1s. in the £? Yes.
2320. What is the annual cost of the staff of the Municipality, including your own salary and the expenses of other permanent officers? About £90. The total expenses of the Municipality, including rent, office expenses, salaries, electioneering expenses, and all expenses, other than improvements, amount to about £180 a year.
2321. What is the gross income from rates and endowment? Between £500 and £600.
2322. *Mr. Burns.*] Has your Council any public works in view which they would like to carry out for the benefit of the Municipality? Yes; there is a street to be made half a mile long, which will also require to be kerbed and guttered, near St. Andrew's College, running from the Missenden Road to the Newtown Road.
2323. What do you suppose that work would cost? About £700.
2324. The Council does not get this work done for want of sufficient funds? Just so. There are other streets also requiring to be made, but we have not the funds.

Mr. William  
Fidcock.

5 Dec., 1873.

- Mr. William Pidgeon.  
5 Dec., 1873.
2325. Have you considered whether in any measure for giving increased endowment or assistance to Municipalities, it would be better to give the assistance by continuing the present endowment, or by giving increased powers of local taxation? My opinion is that it would be better to give a permanent endowment from the General Revenue. I doubt whether sufficient funds could be drawn from local taxation. I think we would be more secure by payment from the General Revenue.
2326. Have you considered the question of giving the Municipalities power to take revenue from other sources than mere property? Yes; a good deal of revenue might be got in that way, but not equal to a grant from the General Revenue to the amount required.
2327. Has your Council taken charge of any roads near the Municipality besides the streets? Not any.
2328. How are you off for water in the Municipality? We have just been supplied with a main from Sydney, but not many have availed themselves of its use at present; it has been quite recently laid.
2329. You have no public works, except making the streets, kerbing, guttering, and so on? No.
2330. And still you cannot carry on? No.
2331. *Mr. Webb.*] Do you not think the property in the Municipality will stand a heavier rate? The rate is now 1s. in the £, and I know there would be a difficulty in imposing a heavier rate. There is a large number of the labouring class of people, and the buildings are such that there would be great difficulty in attempting it.
2332. The money raised by rates would be expended in making the streets within the Municipality? Yes.
2333. Do you not think the making of these streets increases the value of the property in the Municipality? Yes, undoubtedly.
2334. Do you not think it fair then that those who reap the benefit of the increased value of property should pay for it? They should, especially those who have lands unoccupied.
2335. Then, supposing a measure were introduced to compel the whole Colony to be incorporated, do you not think it would be perfectly fair for property to bear all the taxation of a Municipal nature? No, I do not think that could be done. The value of property in the country is different to that in Sydney. I am opinion that the Government must step in and help—that there would not be sufficient revenue derived from property.
2336. Not if all the Colony were placed on the same footing? No.
2337. As a matter of equity, do you think it is just to call upon the labouring class to pay taxes for improving property? As a matter of equity it is hardly a fair thing; but the labouring class, notwithstanding, benefit by it indirectly.
2338. Do you not think the making of roads and bridges tends to increase the value of property generally? No doubt of it, but these roads and bridges are for the public; therefore they all use them.
2339. Do you think it increases the wages of labour? It may help to keep up the price of labour, but I do not know whether it increases it.
2340. As a matter of fact is the rate levied paid by the landed proprietor or by his tenant. If the tenant pays the rates does he get his house at a lower rental? I cannot say that it is so in all cases.
2341. Is no difference made? I do not know what arrangement is made between landlord and tenant; still I believe in many cases it is so.
2342. Do you not think that if a landlord arranges to pay the rates he gets a higher rent from his tenant? I should think he ought to do so.
2343. If such is really the case the property contributes or pays the rates—the property is chargeable with the rates? Yes, property pays them.
2344. As regards the benefit, it is nothing but right that the landed proprietor who receives the greatest benefit from the improvements should pay for them? Certainly the landed proprietor should pay; his property receives the benefit.
2345. *Mr. Burns.*] Is any large portion of your rates unpaid? The greater portion are paid now; there is very little out.
2346. Have you heard of instances where large sums have been owing for years? We have had very small sums owing for years, amounting in the aggregate to large sums. In many cases the owners of land cannot be found.
2347. Have you heard of cases in which the officials of the Councils have not enforced the rates? I have not heard of any instances in which they did not care to enforce them; they are all anxious to get in the rates. I have heard of instances in which large sums have been recovered—the Glebe, for instance, £700, so I am informed; the clerk told me.
2348. In general, I presume, the accumulation of old rates is only a small portion of the amount obtained? With regard to our own Municipality they form a large portion; I may say one-fifth nearly.
2349. Not paid? Not paid.
2350. How long have they been owing? Some of them for several years.
2351. They form one-fifth of what? One-fifth of the amount that has been collected.
2352. During the entire period of the existence of the Council? During each year of the Council.
2353. Have you ever seen a return of the rates that are owing in the different Municipalities? No.
2354. You did not ask for that at the Conference? No.

Mr. Duncan Sim called in and examined:—

- Mr. D. Sim.  
5 Dec., 1873.
2355. *Chairman.*] You are Mayor of Morpeth? Yes.
2356. How long have you been connected with that Municipality? Since its establishment; this is the eighth year. I was one year out of the Council during that period.
2357. You have taken an active part in the management of Municipal affairs? Yes, I have performed my share of the work.
2358. What is the area of the Municipality? 676 acres.
2359. What is the amount of revenue from all sources, excepting the endowment from the Government? The receipts from rates last year amounted to £353.
2360. What amount was received from the Government? £176 10s.
2361. The Great Northern Road goes through Morpeth? Yes.
2362. That road is kept entirely in repair by the Government, is it not? It is placed under the care of the Corporation, and a proportion of the funds collected from two toll-bars, at Campbell's Hill and Morpeth,

- Morpeth, is handed over to us for its maintenance. We receive a mileage rate from the receipts at these toll-bars; it comes to about £180 a year. I think the distance we have to keep in repair is about 2 miles.
2363. Is that sufficient to maintain your portion of the road in good repair and to maintain the footpath? It is not. The footpath is not charged against that amount. The main road is kept altogether apart from our own account, and the money received from the tolls is entirely expended in maintaining the dray or carriage road; none of it is expended in maintaining the footpath or in making the gutter.
2364. Property in Morpeth is principally leasehold;—is it not? No; freehold. The largest portion belongs to Mr. Close, and is simply let to weekly tenants.
2365. Have you a town hall? No; we rent premises.
2366. At what rate? £16 a year.
2367. What staff of officers do you keep? A town clerk and an inspector of nuisances. They are the two principal officers, apart from the payments for labour.
2368. What are their salaries? The town clerk's salary is £50 a year; the salary of the inspector of nuisances, £12. The office of inspector of nuisances is held by one of the men who acts as a leading man on the roads, to make his position a little better than that of the ordinary men.
2369. What are the duties of the town clerk? All that is required to be done under the Act—the collection of rates and all the clerical duties of the office.
2370. Does he superintend the roads? The roads are under the more especial care of the improvement committee of the Council.
2371. Are the works performed by contract or day labour? Any extensive work is performed by contract, but the maintenance work is done by day labour.
2372. Are you favourable to the Municipal system of government generally? I am, if it was placed on a system calculated to effect the object it is designed for, which I do not think the present system is.
2373. Do you think Morpeth is of sufficiently large area for the efficient and economical working of Municipal government? No. I think the present method of laying out Municipalities not the one that will serve the country.
2374. What is your objection, or is there any other better system? Under the present Act any fifty residents of any locality may petition the Government to establish a Municipality within a certain area, and the residents within that area are then taxed, while those outside that area receive equal advantages from the good roads and other improvements that may be made by the Municipality, and at the same time the roads outside are maintained by the Government. It seems to me altogether inequitable that men should embody themselves for the maintenance of the thoroughfares within a limited area, and leave those outside to the Government without getting any funds to work with. I think the defect will end in the destruction of Municipalities. I do not think they are likely to continue to exist if the present system is maintained.
2375. Have you embodied your ideas upon the proper system of Municipal government in any way? I have. We were requested by the Conference to state the objections or amendments that our Council entertained or wished to see made in the present Municipalities Act, and the Council by a vote deputed me to draw up a paper and send it to the secretary of the Conference, and I did so. That paper is in the hands of the Conference.
2376. Have you a copy of it? I have a copy here.
2377. Have you any objection to hand this in to the Committee? No. (*Paper handed in. Vide Appendix C 1.*)
2378. This paper contains your matured thoughts upon the subject of Municipal government? Yes, and on the present Act.
2379. And you believe that if a system such as you have suggested be carried out, Municipal government will be a greater success than it is at present? I do.
2380. From your experience generally, do you believe that the men elected give good and faithful attention to their duties on the whole? On the whole, considering the condition of the intelligence of the people, I think they do. I hope I am not saying anything wrong, but it is best, I think, to acknowledge the fact, that every one in the country is engaged in considering his own interest, and therefore the intelligence of the country is directed to each man improving his own condition. Taking that view, I think the persons elected to these offices do the work as well as it is possible to have it done.
2381. Taking into consideration that it is a new country, and that the people are new to the work, you believe that Municipal government is being faithfully worked out? Yes, I think so. The old system was to get everything from the Government, and people require to be weaned from that system.
2382. Is there any Government land in your Municipality? No, none, except some small blocks in the hands of the Railway Department.
2383. Is there any land in the district that would be available for endowing the Municipality? There is no Government land within some considerable distance of the Municipality. All the Government land is taken up for the East Maitland reserve.
2384. I see that in the paper you have handed in you suggest that the rate should be one penny in the £ on the capital value of the property assessed? Yes.
2385. That is an increase on the present rate? The present rate is 10 per cent. on the annual value of improved property and 5 per cent. on the annual value of unimproved property. The wording of the Act is to the effect that the property should be assessed at nine-tenths of its fair annual value, and then a rate of one shilling in the £ is struck upon that. The annual value of unimproved property is estimated at the rate of 5 per cent. on the value of the fee simple.
2386. Under the present system a block of land valued at £100 would be liable to 5s. yearly? Yes.
2387. In the way you suggest in this paper it would be 8s. 4d.? Yes. The rate may be excessive, but I think the land should bear the burden.
2388. You do not think that would be an excessive rate to levy upon property? I do not think it would. It is the land that is improved in value, not the house property, by Municipal improvements.
2389. Are you acquainted with the Municipality of Maitland? I have a little knowledge of it, but I could not say anything definite with respect to it.
2390. The remarks you have made with respect to Morpeth would, to a certain extent, be applicable to Maitland? I think so; I do not think there is any material difference.
2391. They are subject to some disadvantages to which you at Morpeth are not subject, for instance floods, which entail expense? Yes, in West Maitland they are subject to floods.

- Mr. D. Sim. 2392. The site of Morpeth is more favourably situated with regard to the making and maintenance of roads than West Maitland? I think not.
- 5 Dec., 1878. 2393. With regard to drainage? With regard to drainage it is; but the drainage of West Maitland is not difficult, for although it is very level the soil is very open and the water soon escapes through it.
2394. What is the cost of the gravel or metal you place upon the roads? The blue metal we have placed upon the roads during the year has cost us about 10s. a cubic yard.
2395. Where do you obtain it from? From Newcastle. It is brought by ships as ballast, and taken up the river instead of being discharged at Newcastle. They obtain it at Maitland at the same cost, with the cost of land carriage added, about 3s. a ton additional. But they have an advantage over us in having the river gravel, which does very well where the traffic is light.
2396. Has your Municipality done anything with regard to water supply? We have taken it into consideration, but it is altogether beyond the reach of our means. We have no land on which we can make a water reserve.
2397. *Mr. Burns.*] Have you sufficient funds? No. It is impossible that under the present condition of things any water reservoir could be formed. The only way it could be obtained would be by damming across a valley, and collecting the water from the watershed.
2398. *Chairman.*] Do you remember the number of houses in Morpeth? I do not.
2399. Is there any other matter I have not asked you about that you wish to give any information upon? We have a difficulty in the formation of roads in the Municipality, because the material we have on the spot does not last long; it soon gets ground up into puddle; and to make a good road we are obliged to get the stone from Newcastle. We can do nothing with any portion of the road-making unless we have the means to complete it. The surface keeps good for walking over if you do not touch it; but a good road requires to be made to bear the heavy traffic.
2400. Do you know anything of Singleton? I have been there. I should think Singleton a very easy Municipality to work.
2401. Have you any acquaintance with Newcastle? A little.
2402. They have superior advantages to you? Yes, as far as metal is concerned; and they have not the same amount of traffic on their roads that we have, the railway taking it nearly all, which relieves their roads of a great deal of wear and tear.
2403. But their streets are more steep and more difficult of formation? Yes, no doubt; but as I have said there is not much wheel traffic on them. Our coal trade alone, to supply steamers with coal, amounts to about 60 tons a day. Each dray carries 2 tons of coal, so that there are nearly 3 tons, including the weight of the dray, passing over our streets, on one pair of wheels, of which the tires are only 3 inches wide. That is a very heavy traffic, and cuts up the roadway greatly; that alone is greater perhaps than all the heavy traffic in Newcastle put together.
2404. With regard to Waratah, that is a more level place? Yes; I think they will be troubled in keeping things in order there, with regard to drainage and road material.
2405. Is there no road material in Waratah and the other boroughs near Newcastle? There is the blue metal imported as ballast.
2406. Considerable expense will be required for the drainage and formation of the streets? Yes, a good deal.
2407. Do you think they will be able to carry on satisfactorily to themselves? I cannot say. They will probably do as we have done—borrow money, and find it difficult to get it repaid.
2408. *Mr. Fitzpatrick.*] If I understood you aright, you conceive that the present system of Municipalities will fail because of the inequalities between those who are rated inside the Municipalities and those who are not rated outside? Yes, that is one of the causes.
2409. The principal cause? The principal cause. But want of funds in proportion to the amount of work to be done is a great drawback.
2410. You complain of the inequality? Yes.
2411. Is not that inequality partially removed by the endowment system? Yes; but that ceases altogether at the end of fifteen years.
2412. Do I understand that your objection would not exist if the endowments were continued? The objection is that while those who have property within the Municipalities are taxed, those who are without the Municipality are exempt from ratepaying, so that the inequality would not be removed, even though the endowments were continued.
2413. Do you think the Government should in some way restrict their endowments to persons not incorporated—give them less, in fact as an inducement to incorporate? I think what the Government should do, should be to initiate the system of Municipal action—that they should do themselves what the Municipal bodies would be called upon to do when in a condition to do it.
2414. Suppose, for the sake of argument, that when your Municipality was first started, all the roads in it were thoroughly made, would your present rates enable you to keep those roads in repair? I think it is possible.
2415. You seemed to draw some distinction between improvements to house property, and improvements to land, as the result of Municipal action, but if the land is improved is not the house property improved too? If you call the house property the bricks and mortar put together in forming a residence, there is no difference in the value of them. If I put up a house worth £1,000 in one locality, ten miles away from a Municipality, and put up a house of the same description within the Municipality, in one place I may get the land for almost nothing, in the other it may cost me £1,000 for the land alone, yet both houses will cost me the same amount, and the increased rent I get from that within the Municipality arises entirely from its position. It is its position that gives it value.
2416. If the Municipality be in healthy working order would not the value of property within it be increased—would not house rents be increased; and does not that lend value to the property? It has all the appearance of that.
2417. Is it not a reality as well as an appearance? The house property is increased in value no doubt, but would the house property be increased in value without the land being increased in value? It is the land that is enhanced in value, not the house property—the cost of the building. You get more for your improvements because of the increased value of the land, but the improvements you effect cost you no more. The increased value you get for your house simply arises from the increased value of the land it stands upon.

2418. *Mr. Burns.*] When will your endowment from the Government cease? We are in the second year of the second term. It will cease in seven years. Mr. D. Sim.
2419. Do you find at present a reasonable amount of revenue at your disposal for the improvement of the Municipality? In the first two years we went into debt £2,300 to effect certain repairs, from the necessity that I have already stated, that when a thing is commenced it must be finished. We have been labouring since to get out of that debt, but we still owe some £500. It will take us three years to get out of debt. Dec., 1873.
2420. Are you, in your anxiety to get out of debt, neglecting any works that are necessary for the improvement of the sanitary or material condition of the borough? We are at present. We can obtain no money, except upon the personal responsibility of the aldermen, and that responsibility continues after they leave the Council.
2421. Would any amendment of the Municipalities Act place you in a better position with the Banks, to obtain advances on account of the rates? It requires to be amended, so that the Banks will accept security upon the revenue.
2422. Will any amendment of the law induce the Banks to look upon the rates as security for their advances. If the Bank took the rates as security, how could they, or any money-lender, levy the rates? I do not know; but I do not think it is right that an alderman should be personally responsible for large advances for Municipal purposes, and continue so after his term of office has ceased.
2423. Do you think any amendment of the law will render the Banks more disposed to make advances, where the aldermen are constantly changing? An amendment might be made which would render the incoming aldermen responsible.
2424. How long have you been mayor of Morpeth? Only this year.
2425. But you have taken a lively interest in its Municipal affairs all through? Yes.
2426. Have you ever considered in what way the revenue of the Council could be supplemented to enable it to carry on its operations? I think the areas at present under the government of the Councils are too small.
2427. Would the extension of area give sufficient revenue to the Councils? Yes.
2428. Would not that bring increased responsibility as to works? Yes, it would. There was one way in which I have thought the revenue should be increased; I have no idea of coming to the Government; I think the right way is to place at the disposal of the Councils some source of revenue that now exists.
2429. Have you considered what source? The receipts from publicans' licenses perhaps; but I have felt considerable difficulty in arriving at that conclusion, because then it would be to the interest of the Council to have as many public-houses as possible.
2430. What other way could you suggest? Only to increase the rate upon land. I do not see any other way.
2431. Do you think owners of property and ratepayers generally would not object to an increased rate? They would, no doubt.
2432. Has it occurred to you that the benefits derivable from Municipal improvements are participated in by others than those who reside in Municipalities? Yes; I think the improvements are of public utility.
2433. Does not that impose on the General Revenue an obligation to assist in carrying them out? It does. I think the Councils should get some portion of the revenue from Crown Lands, instead of letting it all go to the general Government.
2434. The proceeds of the sale of Crown Lands? Yes.
2435. How would you provide for cases where there were no Crown lands? Where a system has been established, such as now exists, it is very difficult to provide for them.
2436. You would not be in favour of continuing the present endowment in some new form, after the expiration of the term for which it has been granted? If the thing can be done by no other way than by endowment I think that would be better than allowing the Corporations to go out of existence. If they do not get increased means very few of them can exist.
2437. What is the amount of arrears of rates usually standing in the books of the Municipality of Morpeth? From the commencement I think they have amounted to something like £150.
2438. Has any of that amount been owing since the Council was first established? Some of it since the first year.
2439. What has been the difficulty in collecting these arrears? The main difficulty has been the removal of tenants. The tenant occupying a place when the notice is served goes away, and the incoming tenant gets no notice till the following year. Under the present Act you cannot follow a tenant that leaves premises, to levy upon his goods; you can only levy upon goods found upon the premises where the notice was served, and on the person who has received the notice.
2440. Have much of these arrears been in course of accumulation since the beginning of the Council? Not a great deal; the first year only about £9, the next £13, and the next a little more.
2441. Have you heard of any instances where there are large arrears, amounting to some thousands of pounds? I have heard that both at West Maitland and Newcastle the arrears are very large.
2442. How much more than what you get from the Government does it cost to maintain the Great Northern Road? To maintain it in a condition to satisfy the public would take as much again.
2443. How much do you expend upon it now? At one time the main road was in our debt something like £150, and it remained so for some time; that was in addition to a sum of £125 we received from the Government, above the toll rates, to put our portion in order. There were some extensive pitching and metalling required.
2444. What is the average cost of maintaining that road through the Municipality, in addition to the Government endowment? We take pretty good care not to expend more than we receive, because in the meantime we have to pay interest on borrowed money.
2445. *Mr. Webb.*] You re-assess all the property in the Municipality every year? Yes.
2446. Do you think that necessary? No; once in three years would be quite often enough.
2447. What is the cost of this re-assessment? About £5 a year. We employ the town clerk as one of the assessors for economy's sake.
2448. You have stated that persons outside the Municipalities participate in improvements made by those residing within them. If the whole of the settled portion of the Colony were incorporated into various large Municipalities, do you think there would be any injustice in that state of things? I think not.

- Mr. D. Sim. 2449. Do you think the present system of taxing improved property has a tendency to retard improvements in buildings? Yes, because by improving his property a man increases the rates payable upon it. There are properties in Morpeth which the owners are disposed to pull down, because of their being rated for unduly large amounts.
2450. If a piece of vacant land is valued at £1,000, what amount would it be rated at? £2 10s.
2451. If the owner expended £1,000 in erecting a building upon it, what rent should he expect to receive as a fair return from the property which has now cost him £2,000? Land ought to yield 8 per cent.; buildings, 12 or 15 per cent.
2452. 8 per cent. for the whole improved property would be quite within the mark? Yes.
2453. That would be £160 a year? Yes.
2454. There would be 10 per cent. off that, according to the present system of assessment? Yes.
2455. That will leave £144 a year as the assessed value of the property? Yes.
2456. What amount of taxation would the proprietor or tenant have to pay on £144 a year nett? 1s. in the £—£7 4s.
2457. Therefore by improving his property he increases the taxation on the money he spends, nearly 150 per cent.? Yes, and he does not add a single inch to the roads to be made or kept in order.
2458. That is a state of things you think ought not to exist—that the land ought to contribute, not the bricks and mortar? Just so.
2459. But the bricks and mortar now increase the assessment or charge at once? Yes.
2460. Therefore the present mode of assessment retards improvement? It does.
2461. *Chairman.*] I see by the Statistical Register that there are 13½ miles of streets in your Municipality;—does that include the main road? That must be the extent, including the main road.
2462. What amount of revenue would it be necessary you should have to enable you to keep these streets in repair and carry out all necessary improvements in a satisfactory manner? It is difficult to say. There are so many of the streets which require to be newly made. There is one leading from the Queen's Wharf to the burying-ground, which is one of the steepest we have, and which will take something like £900 to put in order, that is to bring it to a proper level, form, and pitch it. All the streets require pitching from the nature of the soil underneath.
2463. In the event of Morpeth being increased in area, in what way would you extend it—would you include Largs, Hinton, East and West Maitland, and the surrounding centres of population in one Municipality? Yes, I would include them in one Municipality and separate them into wards, keeping the receipts and expenditure of each ward separate.
2464. You would expend the whole of the money obtained from each ward on that ward? Yes.
2465. Lending money from one to the other, as occasion might require? Yes; that would be by the action of the Corporation; I do not suppose it would require Legislative enactment. My own impression is that the rate levied upon each ward should be about the amount required for improvements in that ward.
2466. Do you think that the want of funds for Municipal purposes has the effect of destroying the spirit of the Councils, and tends to depreciate them in public favour to such an extent that people do not seek seats in them with the emulation to be expected in a new country? It is difficult to get aldermen. We have scarcely had a change since the commencement. That arises from the indifference of the ratepayers; or it may be that nothing has arisen to create any strong party feeling.
2467. Have any complaints been made that you have neglected particular streets? No.
2468. Are any extensive works required in your Municipality, with the exception of the formation and repair of roads and streets? No.
2469. No bridges? No. We had to put a new bridge on the Northern Road that cost £30 or £40.
2470. Where do you obtain water? Those that have not supplied themselves by means of underground tanks get it from the river; or, when the river is salt, they get it from the lagoon.
2471. Is that lagoon public property? No, private property.
2472. Is the water obtained from it on sufferance? Only on sufferance.
2473. Is the river frequently salt? I think during my time the Hunter has been salt as far as Morpeth nearly one-half the time; it is only since we have had wet seasons for the last few years that it has been for any long time fresh. When I first came to the Hunter it was salt very nearly as far as the Falls. And the Paterson in the same way; I have got water salt very nearly to the punt at the Paterson, and at Clarence Town, on the Williams, before these wet seasons set in. The river could not be relied on in any way for water, unless there were means of letting the water from it into some large reservoir when it was fresh.
2474. Is it not actually necessary that a place for water supply should be got for the district? There is no possibility of a large increase of population at Morpeth without it. A great many have adopted the system of putting a tank in the ground, and obtaining water in that way.
2475. You have not the means of entertaining the project of obtaining a water supply at the present time? No.

TUESDAY, 16 DECEMBER, 1873.

Present:—

MR. BURNS, | MR. T. ROBERTSON,  
MR. WEBB.

JOHN MACINTOSH, Esq., IN THE CHAIR.

Mr. James Fulford, Junior, called in and examined:—

- Mr. J. Fulford. 2476. *Chairman.*] You are town clerk of West Maitland? Yes.
2477. How long have you held that office? Over six years.
- 16 Dec., 1873. 2478. What salary do you receive? £200 a year.
2479. What are your duties? To attend in the office from 10 in the morning till 4 in the afternoon, daily, and of course all Council meetings, committee meetings, &c., and to transact all business in connection with the Municipality.
2480. Do you issue the ratepapers? I do not serve them, but I issue them all.

2481.

2481. Do your duties extend beyond the office;—have you anything to do with the streets? No.
2482. You have nothing to do with the superintendence of works? No, there is a surveyor who attends to that.
2483. What is his salary? When employed the full week he gets £2 2s., but it is understood that he is to be employed three days in the week, as a rule, for which he gets £1 1s.; he averages perhaps £1 10s. a week.
2484. Is there any other officer? There is a bailiff and inspector of nuisances, the two offices being combined.
2485. What is the salary? £25 a year.
2486. What is the area of your Municipality? About 10,000 acres.
2487. What is the amount of rates? Something like £2,000 a year.
2488. What is the endowment? We have received for the last five years one-half the rates; our endowment for the next five years will be only one-fourth.
2489. High-street is kept in repair by the Government, is it not? We receive a certain proportion of tolls for keeping High-street in repair, but the amount is not sufficient.
2490. Does it keep the carriage-way in repair? No, nothing like it.
2491. What is the amount? Last year it was £244.
2492. For about 3 miles of road? Yes. There is a good deal of traffic, you must bear in mind.
2493. Is there any other money received from the Government for branch roads? No.
2494. Is there any endowment in land or other property? What is called a reserve has been granted to West Maitland, some 4 or 5 acres; but it is totally inadequate for the purpose intended, and the Council let it for £25 a year as grazing land.
2495. I presume you get gravel for the streets from the river? Yes, and from Campbell's Hill.
2496. Do you know what length of streets you have in the Municipality? About 32 miles.
2497. How many miles of these streets have you now formed and gravelled, or metalled? About 22 miles.
2498. Do the occasional floods put the Council to extra expense? Decidedly.
2499. To what extent? A great portion of the Borough is inundated, and subjects the Council to a heavy expenditure for repairs.
2500. Did not the Government construct an embankment on the river-side? They constructed an embankment to protect High-street, which is the Main Northern Road.
2501. Who constructed the embankment from the Falls along the Horse-shoe Bend? The Council did that at very great expense. It was before my time.
2502. What is the whole indebtedness of the Council at the present time, including overdrawn account and everything? Our account is on the right side just now; but we have a liability of about £4,000, and we have about £2,700 to meet it. Our debt is about £1,300, including the cost of erecting flood-gates.
2503. What assets have you to make up the £2,700? A sinking fund to meet the debentures.
2504. Do you assess unoccupied land? Yes, all lands within the Borough, with the exception of Government buildings.
2505. Are there much arrears of rates due? Until within the last few months we had a very heavy amount of arrears; but lately we have taken action which has had the effect of getting a great deal in; there are arrears now, amounting to £600 or £700.
2506. On what properties? Properties we cannot well get at. For instance, the Nicholson Estate; there is some difficulty in the way of getting in the rates on that estate; something like £250 are owing from that quarter alone, and we cannot get it.
2507. Do you receive the Government endowment for rates in arrear? No; and so we lose doubly. We have lost considerably on properties of that kind, because a large amount of these arrears accrued some years ago, when we could have got 15s. to the £ from the Government.
2508. Having facilities in obtaining gravel and metal, and having Government assistance in keeping the main street in repair, will your Council be able to go on without endowment when the last term expires? I hardly think we will. We have been unfortunate the last few years, having been put to great expense by floods.
2509. What works are there which it is necessary for the convenience of the people to carry out in the Municipality? The flood-gates are the only extensive works we are now erecting.
2510. Has the Municipal Council done anything with regard to sewerage? No.
2511. It is not necessary, perhaps? Not absolutely necessary.
2512. Has no attention been given to the subject? It has been under notice. The inspector of nuisances submitted a report in reference to it some time ago, but no works have been commenced.
2513. Why not? We are not in a pecuniary position to carry it out.
2514. Has anything been done with regard to water supply? No.
2515. Is the river amply sufficient for all purposes at all times? It is for all ordinary purposes. Some years ago there was a movement made to supply the town with water; but as the expense would have amounted to £20,000 it had to be abandoned.
2516. From what source? From a place above the Falls.
2517. The water is occasionally brackish up to the Falls, is it not? I have never found it brackish, but I have heard people say it is so sometimes.
2518. How many years have you been in the district? Thirty years; I was born there.
2519. Is the property in the Municipality assessed once a year? Yes.
2520. What is the expense of making the assessment? Under £30.
2521. Do you consider it necessary that the property in the Municipality should be assessed once a year? No.
2522. Would once in three years be sufficient, with power to assess new buildings? I think so, if provision were made for making alterations every year in assessments, where necessary. There is a very slight difference in the assessment each year.
2523. Are you acquainted with Singleton? A little; not very much.
2524. Would the remarks you have made with regard to West Maitland be applicable to Singleton? Now that the Railway passes through there I think they would.
2525. And also to East Maitland? Yes.
2526. Do you think your Municipality is sufficiently large for the economical working of it? I think

Mr. J. Fulford.  
16 Dec., 1873.

Mr. J. Fulford. West Maitland might very well take in East Maitland, and the two could be worked with the same staff of officers.

- 16 Dec., 1873. 2527. From what you state it takes about 20 per cent. of the taxes raised from the people to pay the officers? It takes very nearly that, I dare say.
2528. East Maitland being annexed would lessen the proportion of expenditure for officers? Yes.
2529. Are the interests of the two places the same? Yes, identical.
2530. How many aldermen have you? Twelve.
2531. Do they attend punctually? Very regularly.
2532. Are there any lapsed meetings of the Council? Scarcely any, except under peculiar circumstances.
2533. Does your mayor expend any money without the consent of the Council? He may have done once or twice, but he is generally brought over the coals about it; he has not done it for a long time; he has done it perhaps a few times in cases of pressing necessity; but as a rule, no.
2534. From your experience, are you of opinion that your works are carried out intelligently and economically? I believe they are now.
2535. Who superintends the labourers? There is an improvement committee appointed by the Council—a very good committee. That committee and the surveyor superintend everything. If the surveyor is not there one of the working men gets 6d. a day extra for looking after the rest. The improvement committee works very economically, making a £ go as far as possible.
2536. Are your works carried out by day labour or contract? Everything by contract, with the exception of some trifling work, which cannot well be tendered for.
2537. What rate of pay do your labourers get? 5s. 6d. a day for labourers, and 10s. a day for horse and cart.
2538. *Mr. T. Robertson.*] If you were to get publicans' licenses and billiard licenses and auctioneers' licenses, what would be the income? They would bring a very good income. I think in West Maitland alone there are twenty-five or thirty public-houses, which would give an income of from £800 to £900 a year.
2539. And dog licenses and slaughtering licenses? Slaughtering licenses would not be much, but dog licenses would bring in a fair amount.
2540. I suppose you could spend the money to advantage if you got it? Yes. Many of the streets require attending to very badly; although they are not to say in bad order now, they will bear favourable comparison with other Municipalities.
2541. *Chairman.*] Did not East Maitland join you in the erection of flood-gates? No, they bear no portion of the expense whatever; in fact we have to indemnify them if any loss takes place. They simply act as agents for West Maitland in collecting the rates in the portion of the flood area annexed to them.
2542. *Mr. T. Robertson.*] What is the area of the reserve for which you get £25 per annum? It may be 5 or 6 acres.
2543. Are there any Crown Lands available in the neighbourhood of West Maitland that could be given to the Municipal Council as an endowment in perpetuity? No, I do not think so.
2544. Whereabouts is the racecourse? Right in the centre of the town.
2545. To whom does that belong? I understand it belongs now to Mr. John Eales; at all events it is in his possession.
2546. What material do you use for making the streets? On the streets where there is the most traffic we use Melbourne metal, which is brought to Newcastle as ballast, and we get it up from there. The Council would much like to use it on all the streets, but it is a very expensive material; it costs us 13s. or 14s. a cubic yard laid on the streets.
2547. *Mr. Burns.*] The town of West Maitland has received no endowment or assistance from the Government except the ordinary endowment under the Act? Nothing further.
2548. Has there not been great difficulty at times in obtaining a supply of water at West Maitland? There was some difficulty some years ago.
2549. Do you think the Council would be disposed to take steps for the construction of waterworks if they had the funds at their disposal? No doubt they would. It would be a great boon to West Maitland if they were in a position to do so. West Maitland is an unhealthy spot, being subject to hot winds, during which the dust is very troublesome; if we had water to keep the dust down it would be a great benefit.
2550. Is there not the greater reason for sewerage being provided on account of its being an unhealthy place? No doubt.
2551. And yet nothing has been done? Attention has been called to it, and a report placed before the Council, and they will make an effort to carry it out if possible.
2552. Have they funds to carry it out? They have not; that is the stumbling block.
2553. What is to be done for waterworks? The Council cannot possibly do that. A special rate might be imposed for sewerage, but I do not think they could make an effort at all for waterworks.
2554. That arises from want of funds? Yes.
2555. Speaking of including East and West Maitland in one Municipality—do you think that any amalgamation of interests between the two places would be likely to work harmoniously? I am afraid not.
2556. Has it not been your experience of these two towns that there is a good deal of rivalry between them? Yes. I do not think it possible they could work together harmoniously.
2557. Do you think the ratepayers of East Maitland would agree to be annexed to West Maitland? I do not think they would.
2558. Do you think the Council of West Maitland is looking forward with some anxiety to the cessation of the endowment from the Government? They are indeed.
2559. Do you think they could do their work satisfactorily if the endowment entirely ceases? Not satisfactorily; they find it very difficult to do it now.
2560. Supposing Parliament should be disposed to give the Municipalities some further endowment, do you think it would be advisable to let the Councils have the revenue from public-houses—or would you prefer seeing them get a direct vote from the Treasury, bearing some proportion to the rates? As far as I am concerned I would sooner see a certain amount from the Government, in proportion to the rates.
2561. Are your streets all kerbed and guttered? No; the only street kerbed and guttered is the High-street.
2562. That is a Government road? Yes.

2563. The reason why the other streets are not kerbed and guttered is, that there are no funds to get the work done? As soon as the Council have the funds they intend to do it. It is a very great item to keep the streets in order without kerb and gutter. If they were kerbed and guttered it would not only be an improvement in appearance but would be a great saving also. Mr. J. Fulford.
2564. Are the principal streets lit with gas? Only from the publicans' lamps. The Council have entered into arrangements with the Gas Company lately to light the Long Bridge.
2565. There are no general arrangements for lighting the town with gas? Not any.
2566. Do you think the ratepayers would submit to a special rate for that purpose? I am afraid not.
2567. Is there much unoccupied land in your Municipality? There are a good many small allotments.
2568. Do you think these unoccupied allotments contribute a fair proportion to the improvement of the locality? 5 per cent. on their capital value does not amount to much. In fact there is an accumulation of rates upon all this unoccupied land, which tends to make our arrears so great—we cannot find out the owners.
2569. Over what period have your rates extended? Ten years.
2570. Have the arrears extended over that period? Up to five or six years ago the arrears were very small.
2571. You have now £600 or £700 owing? Yes.
2572. How long has that been owing? Perhaps £300 of it for two or three years. A great portion of that is owing for the Nicholson Estate. One mill there owes £70. We cannot sell the machinery or the property, and there is no one to sue.
2573. Have you any town hall in West Maitland? No.
2574. Does the Council now occupy a portion of the Court House? No; but we have made an arrangement with the Government with that view.
2575. At present you are paying rent? Yes.
2576. *Mr. Webb.*] You have stated that the Council would carry out a system of sewerage if they had the means? Yes, I believe so.
2577. How would they get rid of the sewerage without water? I am not in a position to say. It would be necessary to have a good water-supply to carry out sewerage.
2578. Are there wells in the town? Yes, there are wells all round.
2579. Is the water good? Yes.
2580. Is it not affected by the drainage from cess-pits? Yes, in many cases the wells become spoiled from the drainage from the deposits in the cess-pits. The yards are very small. In fact many wells have had to be abandoned from that cause. People get water from the river or catch it in a tank.
2581. Do you think the system of rating unimproved land an equitable one, in proportion to the power given to Municipalities for rating improved land? I do.
2582. Supposing there are three allotments facing a street, each of which is worth £1,000;—suppose you have two of them, and you have £1,000 to spend, and you purchase the third allotment for that sum, what amount of rates would you have to pay for the three allotments? £7 10s.
2583. But supposing that instead of purchasing the third allotment you spend £1,000 in building a house on allotment No. 1, what rate would you have to pay them according to the way buildings are assessed now? The property, after £1,000 had been spent upon it, would represent a value of £2,000, and would be supposed to yield £200 a year, from which 10 per cent. would be allowed off, making the assessment £180 a year, upon which the rate would be £9.
2584. And as you would have to pay £2 10s. on allotment No. 2 the whole rate would be £11 10s. for the two allotments? Yes.
2585. But if you had spent the £1,000 in land, instead of bricks and mortar, it would be only £7 10s.? Yes.
2586. Has not that a tendency to retard improvement? I do not think it has that tendency in fact, though as you put it in figures it may lead one to suppose so. The party spending £1,000 in building a house would be getting £200 a year for it, which would be his inducement to build.
2587. Do you think that is giving encouragement to people to improve their property? It is not certainly.
2588. Is it not the land that increases in value by Municipal improvements—not the bricks and mortar? It is the position that gives increased rent.
2589. Then the land ought to be assessed, not the houses? No doubt there is something to be said in favour of that view; but it would be a very difficult thing to legislate upon.
2590. Do you not think that by altering the rate on unimproved land from 5 to 8 or 10 per cent. we might get over the objection? I never heard any objection raised against it in our quarter. People pay the amount freely on unimproved land, and think it a very lenient assessment.
2591. I want to ask whether it is not too lenient in proportion to improved land? I think unimproved land might well bear something additional.
2592. *Chairman.*] Are you favourable to Municipal government? I am.
2593. If the Municipality of West Maitland were extended so as to include Lochinvar, Largs, and East Maitland, do you not think it would be more beneficial to the district and more economical for the working of local government? I certainly think it would. The whole area might be worked for very little more than it costs West Maitland as far as officers are concerned.
2594. If you had the tolls taken on the bridges would the receipts then be sufficient without further endowment? I doubt whether the amount received from the bridges would be sufficient to keep all the area you refer to in repair.
2595. Is there any other question on which you would like to give the Committee any information? No, I do not think of any.

Thomas Robertson, Esq., M.P., a Member of the Committee, further examined in his place:—

2596. *Chairman.*] Since your former examination have you made yourself more acquainted with the details of the working of the Municipality of Deniliquin? I have received a communication stating the grounds on which the Deniliquin Municipal Council think the endowment of £ for £ ought to be made perpetual, and I concur to a certain extent in the argument made use of, that is, that the extent of high road T. Robertson,  
Esq., M.P. 16 Dec., 1873.

- T. Robertson,  
Esq., M.P.  
16 Dec., 1873.
- road running through the district, amounting altogether to about 24 miles over and above the Great Southern Road, partially provided for by the revenue from the bridge, renders it impossible for the Municipal resources to make these roads and keep them in repair. There are 24 miles of road within the Municipality traversed by mail-coaches over and above the main high road—the Great Southern Line.
2597. That is 8 miles? Yes. It appears it will take twenty-four years revenue of the bridge to complete the 8 miles of road.
2598. From the evidence given in regard to other Municipalities, that seems to be an exorbitant amount to be laid out on 8 miles of road. Are there any local difficulties? The nett revenue of the bridge, after deducting the expense of collection, is £1,000 a year, and the cost of making roads there, owing to the want of stone to break up into road metal, is £3,000 a mile, equal to £24,000 for the 8 miles.
2599. How far distant are the quarries? There is no stone within a hundred miles of Deniliquin. The roads are made of burnt bricks, made in the ordinary fashion, and then broken up for road metal.
2600. Does that answer well? Yes, very well. When it is coated with sand it looks just like an ordinary metalled road.
2601. Owing to the want of road metal you believe the Municipality of Deniliquin will not be able to carry on satisfactorily, unless endowed £ for £? No; they will make very slow progress with their roads. The revenue of the town may be sufficient to keep the streets formed and partially drained, and to keep the main footpaths in order; but beyond that they will not be able to do much.
2602. Would the endowment be in addition to the temporary Common, which you wish to be entrusted to the Municipal Council of Deniliquin, or is it necessary that the Common should be free for the common uses of the South-western District? The Crown Lands Alienation Act gives travelling stock the right to use the Common for three days without charge; when they stay after that they have to pay. The commoners themselves pay so much per head for all the cattle they run on the Common.
2603. In time that would bring in a considerable revenue, would it not? The cost of cutting down the Bathurst burrs upon the Common has amounted to from £150 to £300 a year, which has carried off more than all the profits which have been made.
2604. You have heard the evidence given with regard to the present assessment on vacant land;—are you of opinion that it would be fair and justifiable to increase the revenue from unoccupied property? I think it could be increased in localities where the site was improved by improvements made by the Municipalities. At present allotments in the very heart of a town, the value of which is increased very much by the making of the roads, pay but an inappreciable sum. At the same time it would not do to increase the rate very much, because in a few years it would amount to confiscation of the land. If the amounts paid for publicans' licenses, wine and spirit licenses, billiard licenses, auctioneers, dogs, and hawking licenses, &c., were transferred to the Municipality of Deniliquin, it would increase the revenue by about £350 a year.
2605. Do you think that would be a sufficient endowment? It would be an assistance.
2606. You stated some time back that there were 42 miles of streets in Deniliquin;—I see, in the return from Deniliquin, the streets are set down as 60 miles unmade, and 3 miles 40 chains made? That is more than I thought was made. They must have made a considerable quantity this year—a mile or more—since I left. The 60 miles include North as well as South Deniliquin; I was speaking of South Deniliquin only.
2607. Are not North and South Deniliquin included in one Municipality? Yes. In speaking of unmade roads I spoke of South Deniliquin alone.
2608. Would you prefer obtaining increased revenue from licenses or by a direct vote from the Treasury? It appears to me that the Deniliquin people want to have both. It all depends upon what is considered the duty of the Government. If it is the duty of the Government to make all the main roads throughout the Colony, they ought not to stop short of making them where these roads run through Municipalities. At the same time I do not think the resources of the Colony are equal to making all the lines of mail road, not at any rate in Riverina, where road metal is so scarce.
2609. Is timber plentiful in the district? Tolerably plentiful.
2610. Would plank roads, as laid down in America, answer the purpose? I think that in some places trees sawn in half and laid down would make a very good road to pass through parts that were boggy. When I was Mayor of Deniliquin we were considering the advisability of sending the town clerk down to a place called Buninyong, in Victoria, where we heard there were about 15 miles of road formed in this manner, between Buninyong and Ballarat. That was with the view of deciding upon the best way of making about a mile of road between the river and North Deniliquin, through the river flat. We determined to ask the advice of the Government Engineer of Roads before we took any further steps, and at the time I left nothing had been decided upon.
2611. Are you favourable to Municipal government—do you think it should prevail in the Settled Districts of the Colony? I think that, both in a sanitary point of view and as a mere matter of comfort, as well as health, Municipal government is absolutely necessary in the towns in the interior. I think that if the Municipal areas could be extended, so as to relieve the central Government from the duty of making roads and bridges, it would be to the advantage of both the Country and the Government.
2612. Do you think a Municipality ought to be established with a less revenue than £2,000 a year, seeing the expense that the employment of proper and competent officers would amount to? I do not think very much could be done with less. It might be as well to fix that as a minimum. When the revenue is less than that the salaries appear out of all proportion to the amount spent on works.
2613. Do you think 12½ per cent. on the revenue, for office expenses and general management, would be a reasonable price to pay for the services of competent officers? Yes, I think it would be very good management that enabled that proportion to be observed.
2614. *Mr. Webb.*] When you speak of a revenue of £2,000, do you mean that amount of revenue derivable from the assessment alone, or including the Government endowment? I mean the income from all sources. You cannot get a good man to discharge the duty of town clerk and overseer under £150 or £200 a year. Then, with the payment of other officers, rent, office expenses, assessors valuing property, and advertising, the expenses necessarily amount to a considerable sum. If a Municipality can start with an income of £2,000 a year, I think it as well they should do so, because towns generally take a start from the time they are incorporated, and the revenue would gradually increase.
2615. There would only be £1,000 from rates? Yes.
2616. Do you think it desirable to incorporate districts which could not raise £1,000? I think the districts ought to be made so large that the income must necessarily be considerably more. For instance, I should like to see a district of not less than 300 square miles incorporated, so that the expenses would not be so great

great as working the Road Boards in Victoria, and yet the district would be large enough to enable a sufficient amount of assessment to be raised to make the bridges and roads of the district. Of course, I do not contemplate that for many years the roads throughout Riverina can be metalled, but at the same time there are many creeks and rivers that want bridging that could be done, and many places where a mile or two of very boggy road could be made that would make the country fairly passable. - For instance, take a road 20 miles in length: if at one or two places along this country road there was an expenditure of a few hundred pounds the road could be made sufficiently passable to do for a generation. I do not think we ought to expect to do too much. People who live in the country have many advantages, and of course they cannot expect to have the same facilities for travelling as people who live in cities or the neighbourhood of cities, neither do they expect it. All they ask is to have the public roads kept in such a state that they can travel without danger to life and limb.

2617. Then I gather from what you say that you are in favour of incorporating country districts into large Municipalities, not small ones, such as at present exist;—you think small Municipalities very expensive to work and not calculated to meet the requirements of the districts so well as larger ones? That does not exactly express what I mean. Take a small township of 1,000 inhabitants: I think it better it should be incorporated than that it should not be incorporated. At the same time I think it would be better to incorporate a large district, say a county. I would either confine the incorporation entirely to towns and villages, or else I would make the Municipal districts very large—sufficiently large to relieve the central Government altogether from the responsibility of making roads and bridges, and either raise the revenue for such purposes locally, or apportion the public revenue to be spent by local bodies. I am told the Road Boards have not proved a success where they have been tried in some of the settled districts. I have had no experience of the working of them myself, and I fancy that if they have failed it has been from the districts not having been made large enough.

2618. Has it not struck you that, in adopting the system you have shadowed forth, there would be some difficulty in dealing with the main roads;—would it not be unjust to throw the maintenance of main roads passing through any Municipality upon the people of that Municipality, when they were used by other persons residing in Municipalities on either side, and by travellers generally? I have always thought it the duty of the general Government to make the main high roads, and that they ought to have been made out of the proceeds of the sale of Crown Lands. I think the most legitimate manner in which the money realized from the sales of Crown Lands should be applied is to the making of permanent improvements in the districts from which the moneys are received. That is to a certain extent the present system. The Government do take upon themselves the responsibility of making the main high roads; but they are altogether too slow about it. They have too great an extent of country to look after. I know the superintendent who looks after the road-making in the south-western district has an extent of 400 or 500 miles to travel in a direct line,—for instance, he superintends the making of roads near Deniliquin and also at Wentworth, and the result of the operations is, that the people are in a constant state of dissatisfaction all over the Colony.

2619. *Chairman.*] Are you acquainted with the suburbs of Sydney? Not a great deal. I reside at the North Shore; and I believe the great drawback there is that there are four Municipalities where there ought to be only one.

2620. Would you be favourable to the creation of a central Board for the city and suburbs, to be called the Metropolitan Board of Works, to take cognizance of sewerage, water supply, and other works in which the suburbs as well as the city are interested, so as to beget unanimity of action on such matters? I do not consider myself competent to give an opinion on that subject.

THURSDAY, 15 JANUARY, 1874.

Present:—

MR. BURNS, | MR. LUCAS,  
MR. TEECE.

JOHN MACINTOSH, Esq., IN THE CHAIR.

Charles Joseph Byrnes, Esq., called in and examined:—

2621. *Chairman.*] You are one of the aldermen of the Borough of Parramatta? I am.

2622. For what length of time have you been in the Council? About six years.

2623. Have you been mayor? I have—once.

2624. Could you inform us what is the superficial area of Parramatta? I am unable to ascertain the information required in this question.

2625. What is the population of the Borough? About 6,000—between 6,000 and 7,000.

2626. What is the amount of revenue arising from the assessment of property? Between £1,200 and £1,300 per annum from rates only. The revenue would be about £1,500, including other sources—markets, wharfs, cab licenses, and so forth.

2627. Is there any revenue derived from the Park? No.

2628. How much is received from the markets? About £90 per annum.

2629. What is the amount received from the Government? According to the Municipalities Act we are now receiving 25 per cent. on the amount of rates raised.

2630. Is there any Government expenditure within the area of the Municipality? We get from the Road Trust a certain proportion of tollage—the exact amount I am not now prepared to state.

2631. Is there any land within your Municipal area that you could derive a revenue from, by letting for building or other purposes, not required for the recreation of the inhabitants? No.

2632. Are there not some old grants, that were given by Governor Macquarie, in the centre of the town? There are several grants, which are vested in the Council as trustees for market reserves, and are required for those purposes.

2633. How many aldermen are there? Twelve.

2634. Do they give good attendance to their duties? Yes, they are very attentive. The fact is, the casting vote of the mayor is so often given that we have to stick to it like bricks.

2635.

T. Robertson,  
Esq., M.P.

16 Dec., 1873

C. J. Byrnes,  
Esq.

15 Jan., 1874.

- C. J. Byrnes, Esq.  
15 Jan., 1874.
2635. Have you any difficulty in collecting the rates from unoccupied property in the Municipality? No, not as a rule. There is a great quantity of unoccupied property in Parramatta, belonging to estates which have not contributed to the revenue, for the simple reason that the assessors have not followed out properly the provisions of the Act. But as a rule the rates are well paid up in Parramatta. All the ratepayers are so anxious to vote that the rates are generally paid up before each annual election.
2636. From your experience, is the money economically and judiciously expended? It is not.
2637. Why? My own opinion is that the money is squandered from political motives. It is injudiciously expended by taking the men hither and thither, especially at election times, to please certain voters, and thereby wasting the labour of the Council. Money is also voted and expended for works which are certainly not at all requisite. This may have an appearance of a party statement, and you will accept it as you please. I give it as my own opinion.
2638. Do you think that opinion applies to Municipal Councils generally? Not to such an extent.
2639. So that you believe Parramatta is an exception to the general rule? One of the exceptions.
2640. Is your work carried on by contract? No, all by day labour, with the exception of cartage, which is done by contract.
2641. Has the Council never taken into consideration the propriety of carrying out the works by contract? I believe at one time, before I had the honor of holding the position of alderman, it was tried, and for some cause or other altered to the present system.
2642. Do you think that Parramatta is of sufficient area to be economically worked? Yes; I think the mileage we now have to take care of is too large altogether for the revenue. We have about 25 miles of streets to look after.
2643. What is the cost of metal? I think our last contract was about 11s.
2644. Spread on the streets? No, that is the cost of purchasing. The cost per chain of making the road, that is, forming, ballasting, and metalling, would be about £40, the street being 60 feet wide.
2645. Including the footpath? 60 feet in width, including the footpath.
2646. Is your street 60 feet wide without the footpath? No. Kerbing and guttering would be about £10, and forming and gravelling the footpath about £3 per chain.
2647. Is there not blue metal within the parish of Parramatta? Prospect is our nearest place where the metal is of any use. We get it from Prospect generally.
2648. That is obtained by contract? Yes, by tender.
2649. The greater part of your streets are formed and in good order? I will not say they are in good order; they are nearly all formed.
2650. From the compact state of Parramatta, and the large revenue you are able to raise from the assessment on property and arising from the markets, tolls, and wharfs, you will be able to go on now and carry out the works of the Municipality in a satisfactory manner? I think not. I think the revenue is totally insufficient for carrying out the operations devolving upon the Council, seeing that, as I have stated, we have 25 miles of streets to look after, two of which are the principal streets—Church-street, leading from the Railway and the Sydney Road, and George-street from the steamer. These two streets we endeavour to keep in the best possible order, by covering them with blue metal, which, as you will see, costs about £40 per chain to do. I think the revenue is totally inadequate for the works required. All our back streets are merely formed.
2651. How would you propose to increase the revenue, seeing that the roads are meant for the benefit of the Borough and used only by the Borough, and it would be improper to tax other portions of the public for the improvement of Parramatta? In Parramatta I should certainly not propose to increase the taxation. The place is poor enough, and so many houses are not of a productive character, and could ill afford to stand any extra taxation; and seeing further, that in all probability we must have special taxation under the provisions of the Municipalities Act for lighting and water, I think property could ill afford to pay any additional taxation for general purposes. Seeing, further, that the Government is relieved from all Parliamentary influence for votes for Parramatta, and all incorporated towns, &c., I think they would be quite justified in increasing the endowment, or keeping it perpetual. I think we should have certainly 50 per cent., or perhaps a hundred per cent., upon our rates. We are now in the 25 per cent. period, having been established twelve years.
2652. You think that would be justice? I do. I think you would find that the money voted by Parliament for Parramatta would fall far short of the revenue contributed by the people. I am merely stating my opinion.
2653. *Mr. Burns.*] Do you think that if you had 50 per cent. as a permanent endowment, it would be ample as a contribution from the general revenue? I think it should be, judiciously managed.
2654. What is your opinion of the working generally of Municipal government in this Colony? I think, on the whole, it has been a source of great improvement to all the districts that have been incorporated.
2655. Do you think it desirable the principle should be extended? I do; I should make it compulsory. But whilst I would ask the Government to perpetuate the endowment, I would also ask them to appoint an Inspector of Municipalities to see that the funds were properly appropriated. I can speak, in my own Municipality, without going into detail, of several misappropriations of the public money.
2656. Would you place a power above the ratepayers themselves? I would. I think that if the Government grant 50 per cent. they should have some voice.
2657. You would be satisfied, I presume, if the Government had the right to inquire how the contribution they gave was expended? Yes, I should.
2658. And leave the rest to the ratepayers? Yes.
2659. Without going into questions that might excite comment or feeling, do you think there is something exceptional in the management of the affairs of the Borough of Parramatta? Yes, I think there is.
2660. How are you provided with water at Parramatta? We are provided from a supply created from a dam having been erected across the Parramatta River.
2661. Who erected the dam? The Government, many years ago.
2662. Have you a local debt? Yes, a loan of £1,500.
2663. Are there any other Municipal works, such as sewerage, that ought to be carried out if you had funds? Yes; that is one of the reasons why I should ask for a Government Inspector. We are so reckless in our expenditure that we make no provision for real sanitary matters.
2664. Is your remark special to the Borough of Parramatta? It may be applied to the whole lot; they never seem to soar above kerbing and guttering.

2665. You think it would be a great advantage if the Municipalities had the means to carry out sanitary improvements? Yes. I might mention that they have power under the Act to make a special rate for such purposes. C. J. Byrnes, Esq.

2666. You seem to think that property will scarcely bear additional taxation? That brings up matter of opinion. I believe myself that special taxation for sewerage, lighting, and so forth, would so enhance the value of property that ultimately it would be felt to be no burden at all. 15 Jan., 1874.

2667. What is your opinion as to the feeling of the ratepayers? I think they are opposed to special taxation.

2668. *Chairman.*] Do you think the Boroughs are entitled to a portion of the proceeds of the land sales? I should say so undoubtedly; but I would prefer to accept 50 per cent.—extend the operation of the Act as to endowment.

2669. Do you think vacant lands are properly rated at present? That is a question of policy—whether it is thought proper to tax vacant land so as to compel the owner to build upon it. I am one of those who believe that all vacant lands should be built upon, and that owners should not be allowed to have the benefit of Municipal action by increasing the value of their property without contributing their quota.

2670. What is the rate per cent. you would expect to pay you for building? I suppose 10 or 12 per cent.

2671. Suppose you had a piece of land worth £1,000, and you built upon it at a cost of £1,000, making the whole property worth £2,000, what rent would you expect to get? I should think £200 a year.

2672. So that you would be tolerably certain of obtaining, under usual circumstances, £150 a year. You see in that case the taxation on the vacant land would be only £2 10s.; but by spending in bricks and mortar £1,000 it would be raised to £7 10s.; so that the taxation falls principally upon the improvements on property, not upon the land? True, the buildings become part and parcel of the real estate.

2673. The property in your Municipality is assessed every year? Yes.

2674. Would not once in three years be sufficient, giving the mayor and aldermen power to assess new properties? I think it would in Parramatta, where the value of property does not vary very much, judging from the assessments; they seem very uniform.

2675. Is there any matter in the Municipalities Act which you would wish to see altered? I think the mayor should be elected by the ratepayers upon the same franchise as the aldermen. I also think the Electoral Roll should be made up on the 31st December, only including those persons who have paid up their rates to that date. There is nothing but confusion in all January in making up the Electoral Roll in the Revision Court, and preparing for the elections. So many persons refrain from paying their rates until the day of election that it is almost impossible to carry out the elections satisfactorily. As a returning officer I can speak for the great inconvenience of persons presenting themselves to vote who have not paid their rates. They have to go back to the Council Chamber and obtain a certificate from the Council Clerk that they have paid their rates that morning. Now I think that would be obviated if the roll was made up from those persons only who had paid their rates up to the 31st December.

2676. Have you a town hall? Merely a rented room.

2677. What is the rent? £40 a year.

2678. What officers have you? A town clerk, and an assistant clerk, who is also the bailiff.

2679. What is the salary of the town clerk? £125 a year.

2680. What are his duties? Merely the clerical duties. We have a road-overscer, who is supposed to give levels and so forth, which I consider a very unsatisfactory state of things. He is not a professional man.

2681. Are you not of opinion that it would be better to have a town clerk, at a higher rate of salary, who would be competent to take levels and make out specifications? I am quite of that opinion.

2682. Are there any trusts within the Municipality? We have a Road Trust.

2683. Is there any local Board or trust exercising powers within the Municipality? There are the trustees of the Parramatta Park.

2684. Are not the mayor and aldermen trustees? No, and I should be very sorry to see them so.

2685. Why? In Parramatta, party feeling runs very high. The Park has been satisfactorily conducted for the benefit of the people, and I should be very sorry to see it brought under political influence.

Jorgon Daniel Larsen, Esq., C.E., called in and examined:—

2686. *Chairman.*] You are a resident in England? Yes, in London; I have been there for the last eleven years. J. D. Larsen, Esq., C.E.

2687. You are now on a professional visit to New South Wales for the promotion of tramways? Yes. 15 Jan., 1874.

2688. Prior to your residence in London you resided in Sydney and Newcastle for some time? Yes.

2689. During your residence in London your professional pursuits have made you acquainted with the working of the Metropolitan Board of Works? Yes, I have been acquainted with many of the parishes, and also to a certain extent with the Metropolitan Board of Works.

2690. The Metropolitan Board of Works is, I understand, composed of deputies from the various parishes and vestries of London? Yes, something like fifty members, elected from each parish according to the number of houses, not of inhabitants, in that parish; some have three members, some two members, and some one member. The Metropolitan Board of Works have great power, especially in regard to sewers and improving the plan of the streets, such as pulling down three streets to make two, and so forth. They have all that under their control.

2691. Has the working of the Metropolitan Board of Works been considered beneficial? It is considered one of the greatest benefits conferred upon the metropolis, but at the same time the rates have been increased greatly.

2692. Has not the value of property been increased in the same ratio as the rates? Property generally has increased lately, within the last six years, but that is not owing to the Metropolitan Board of Works, but to the great increase of London.

2693. Could you inform the Committee how the Metropolitan Board of Works derive the revenue which they expend in widening the streets, the construction of sewers, and other works of a general character? In the first place they are empowered to levy a duty of so much per ton upon all coals imported into London, which is regulated by the Board; then they have a wine duty, and also a tax upon the sewerage.

2694. The rates are collected by the vestries, are they not? Each vestry collects its own rates on a precept issued by the Board, fixing what they shall charge in the £. 2695.

- J. D. Larsen, Esq., C.E.  
Jan., 1874.
2695. I understand that within the last ten or twelve years they have expended about fourteen or fifteen millions of money? Yes, I should say fully that. To my certain knowledge they have spent over four millions up to last year, or something like five millions, on the Thames embankment; and they have now borrowed a million for this year for its further extension. They are spending something like one hundred thousand from Hatton Garden to the Fleet for one sewer. There is one thing you must not lose sight of, and that is that when streets have been pulled down they have derived a great revenue from the land, which has more than repaid the outlay; for instance, at Holborn Viaduct the land was sold at enormous prices, but it has now increased 100 per cent., and so with Snow Hill and Farringdon-street, and Queen Victoria-street.
2696. The coal and wine duties, I understand, amount to a little over £200,000? Yes, something like £250,000.
2697. I see from a document here that a penny in the £ on the assessed value of property in London amounts to about £67,000? Yes, in the whole metropolitan district.
2698. You have a tolerable knowledge of Sydney and the suburbs? Yes, I have studied Sydney pretty well during the last six months.
2699. And during your former residence here also? Yes. I may say that I have at this present time formed a stronger idea than previously.
2700. From your close knowledge of the working of the Metropolitan Board of Works in London are you of opinion that it would be beneficial to create a Board with somewhat similar powers in Sydney, to take in charge the water supply and sewerage for the metropolitan district? From my knowledge of the way in which the different Municipalities are situated here, I think it would be a great benefit to all concerned if a Board were constituted with similar powers to that in London. Without the greatest powers it would be a failure, especially for levying rates, for upon that depends the whole. The different districts are so situated that they might all be combined for general purposes; for instance, Randwick, Waverley, Woollahra, Paddington, are all closely connected, and I do not see why they should not have water supplies, for which they would contribute a great revenue, which now they do not; also the Glebe and Newtown might derive the same benefit. Each of these districts might be represented by a member on the Metropolitan Board. It would not do to have too large a Board.
2701. How many members would you think it necessary to have on a Board representing all the Municipalities within the Police District of Sydney, including Balmain and St. Leonards, seeing that matters connected with them would interfere with the harbour? I should say fifteen members, with the chairman, would be quite ample. The chairman should be elected by the Board itself, not by the Government.
2702. To whom would you give the election of the members—to the mayors and aldermen of the different Municipalities? Yes, they would be the electors, not the public. The Board should consist of persons who had already been elected to Municipal honors—members of the Borough Councils. They should not elect persons outside the Council.
2703. Some dissatisfaction has been expressed at the Metropolitan Boards of Works in London increasing the salaries of their officers? Yes, I remember the time that was under discussion; but people lost sight of the fact that the Board started with an expenditure of only £200,000 or £300,000 per annum, and did not then require so large a staff as now, when, with the enormous works they have in progress, they require the very best skill. I know a good many of the gentlemen connected with the Board as engineers, and they have £500 or £600 a year—first-class officers; and their foremen, who are very superior men, have £250. They look after the work while the sewers are being constructed. I may say that you can scarcely have any conception of the accuracy with which these sewers are constructed, and the trial which each brick and each ounce of cement has to go through before being used. The foremen have constantly to be down in the works, and see them carried out.
2704. If a system of sewerage is to be carried out in the metropolitan district here, it would be more beneficial than to place it in the hands of a central Board than to leave it in local hands in each Borough? Yes; a small body cannot carry out such an undertaking, on account of the expenditure being so great, and because the sewers constructed by one Borough could be made use of by others, and therefore there is economy in their joining together.
2705. If the sewers and water supply were placed under the control of such a body as the Metropolitan Board of Works, any local body requiring to make any connection would have to give notice to them? Yes, they have to do so in London, Glasgow, and Edinburgh. If there are any connections to be made with a main sewer the Board of Works do it themselves.
2706. All the sewers, both main and branch, are under the Metropolitan Board in London? All the principal sewers are, but not the minor ones.
2707. They also have the control of removing encroachments and obstructions? Yes. If they want a house moved back they have to give compensation.
2708. They have also the power to make by-laws for the guidance of the vestries and the maintenance of the main sewers? Yes; the whole matter of sewerage is under the Metropolitan Board.
2709. They have also the power of purchasing land and making public parks? Yes. The public parks are now handed over to the Board—Blackheath, Hampton Court, and other Commons. They derive no revenue from them.
2710. If a vestry does not pay the amount specified in a precept they have the power of levying the rates themselves? Yes, which they are very quick to do.
2711. You believe that even with these great powers it would be beneficial to introduce such a body here? Yes. Experience has shown that the health of the City of London is equal to any in the world in consequence of the improvement in the drainage and water supply.
2712. I understand that the Thames has been so purified of late years that fish can live in it at London Bridge? Yes. I have here a map showing the districts that the Metropolitan Board of Works have control of. (*Produced.*)
2713. *Mr. Lucas.*] Will you state to the Committee the number of members returned to the Board of Works for the different localities? Forty-six. This map shows how many houses there are in each district and the number of members from each vestry.
2714. *Chairman.*] The Metropolitan Board of Works is required to lay its plans before Parliament for sanction before any work of magnitude is undertaken? Yes.
2715. Do you not think it would be a grievous tax to levy 9d. a ton on the coals consumed within the districts you have named? I do not think Parliament would grant any such tax.

2716. *Mr. Lucas.*] Are you in favour of such a tax? I think a tax might be imposed on all coals that came by water. J. D. Larsen,  
Esq., C.E.

2717. Do you not think that would be a tax upon the manufacturers of Sydney, and practically a bonus to their rivals, the manufacturers of Melbourne? I have not studied that question, but I have observed the financial state of the City of Sydney, and I see it is necessary there should be some additional source of revenue. Even if the Sydney manufacturers paid a tax of 9d. a ton on coal, it would still cost the Melbourne people more to get it. 15 Jan., 1874.

2718. Are you aware that even now, with all our facilities for getting coal, companies and persons requiring machinery often send to Victoria for it? I am aware of that, but I think that is under special circumstances. I have seen works in Victoria that can compare favourably with any at Home.

2719. Are you acquainted with the water supply of London? I am pretty well.

2720. From what source is it taken? Some from the river; some from wells.

2721. How many water companies are there? To the best of my recollection there are five. The Kent waterworks are considered the best; the supply is derived from artesian wells in the chalk; they are very deep, and very large machinery is required.

2722. Is the principal supply for London taken from the river Thames? Yes, from above Kew Bridge.

2723. Have you any idea of the number of towns and the population, whose sewerage flows into the Thames above the source of the water supply for the City of London? No, I have not. The water is thoroughly filtered; it goes through filter beds, which extend for miles.

2724. Could you inform the Committee what is the comparative quality of the water supplied to the City of Sydney and that supplied to the City of London? There is no comparison; I have not seen any water so pure in Sydney with regard to colour and the matters contained in it.

2725. Do you mean to say the water supplied to the citizens of Sydney is far more impure than that supplied to the citizens of London by the River Companies? Yes; and Dr. Smith's report, published in the papers this morning, bears me out.

## WORKING OF MUNICIPALITIES.

## APPENDIX.

## A. 1.

[Handed in by Mr. Woolcott, 3 October, 1873.]

## REPORT OF THE FINANCE COMMITTEE ON THE FINANCIAL POSITION OF THE CITY CORPORATION

Your Committee have the honor to state that they have had for some time past under their consideration the present condition of the different funds under the control of the Council, and beg now to submit the following General Report thereon, for the information and further action of the Council.

It will be advisable to prepare this statement under the heads of the several funds, which the law requires should be kept distinctly in the city accounts.

## THE CITY FUND.

From the memoranda attached hereto, showing the receipts and expenditure in connection with this fund since the year 1856, its present condition and future probable revenue, it appears evident that the Council cannot continue satisfactorily to conduct the general improvements of the city, the construction of streets, the maintenance of the public recreation grounds, and the other various properties entrusted to their care, unless some measures be adopted for increasing their present resources.

In the year 1860 a detailed statement of the then position of the city affairs was submitted to the Members of Parliament, and at a conference between the City Members and the Council, further explanations were made which resulted in the introduction of a Bill into the Legislative Assembly, by the Colonial Secretary, having for its object the further endowment of the Corporation by the grant of land at the head of Darling Harbour, and in other portions of the city, and by giving them extended powers with regard to taxation. But the dissolution of Parliament shortly afterwards prevented further action in the matter at that time; and although frequent attempts have since been made to obtain power for increasing the city revenues, they have, from various causes, been unsuccessful.

As abstracts of the whole of the Corporation accounts are annually placed before the Executive Government and the Parliament, it is presumed that there exists a general knowledge as to the very limited means which the Council possess for the maintenance of this large city, and the time has now arrived when strenuous efforts must be made for the removal of the difficulties which exist against the proper carrying on of the necessary works.

By a reference to the subjoined memoranda, it will be seen that the means at the command of the Council, after deductions of the outlay for lighting, cleaning, office expenses, interest, &c., are reduced to so small an amount that the thorough repair of one of the principal thoroughfares (George and Parramatta streets), as instanced in last year's expenditure, absorbs more than half the entire sum. It is shown also that a very considerable portion of the one hundred miles of city thoroughfares still remains to be properly constructed; and as it is estimated that an expenditure at the rate of £3 per lineal yard will be necessary for the forming, metalling, and kerbing and guttering of these streets, it appears to your Committee that the extension of these improvements beyond their present boundaries must, under present circumstances, be entirely beyond the power of the Council.

Your Committee feel that the demands which have been made upon the resources of the Council within the last few years, by the opening up and occupation of the streets in what was formerly the outskirts of the city, by the largely increased traffic in every direction, and also by the advance in the prices of labour and all kinds of material, have been such as to limit the operations of the Council to works of absolute necessity; and now that their annual income will be reduced to the extent of about £5,000 by the withdrawal of the license fees, hitherto received from public vehicles and by the loss of market and other fees from the defective state of the laws, it is certain that even these works of necessity cannot be undertaken unless the present revenue be supplemented by some further endowment.

Your Committee, with this object in view, would beg to submit that, taking into consideration the position of the city at the time of the re-establishment of the Corporation in 1857, the Council have strong claims upon the Government for assistance in relieving them from their present embarrassment. At that time a very large debt to the Government had been incurred in connection with the water and sewerage works, and as these works were then placed under the charge of the Corporation, the liability also was transferred. The Council, at the outset, felt, and represented, their inability to meet the large demands made upon them for the interest of this debt, but the Government held in their hands and exercised the power to pay themselves in part, by the retention of the £10,000 which has been annually voted by Parliament towards the improvement of the streets; and although the Council have occasionally obtained this grant for the use of the city, by advances from the water and sewerage funds, yet the amount which has been absolutely lost by this action of the Government is almost equal to the debt upon debentures issued. It may also be remarked that the city has, from the first, received but very inadequate endowment from the Government, as compared with that which, under the "Municipalities Act of 1867," has been given to suburban and country municipalities. The several properties, namely, the George and Hay street Markets, and Market and Lime street Wharfs, which have been given to the city, have yielded revenues chiefly from the monies which have been expended upon them by the Corporation, and it is doubtful if the present receipts from these properties return a fair interest upon such outlay. If endowments to the extent granted to other Municipalities (which could have no greater claim upon the Government) had been also granted to the city at the time of re-incorporation, your Committee consider that the affairs of the Council, at least as regards the city fund, would not now have called for this inquiry.

After very careful consideration of the whole question of the difficulties connected with the future stability of the city fund, your Committee would beg to submit the following recommendations for adoption by the Council:—

1. That the Government be solicited to obtain for the city a permanent annual grant of £10,000, in continuance of the practice since the year 1853, and that they also be petitioned to hand over to the Council all moneys received for licenses to publicans, wine and spirit merchants, auctioneers, and pawnbrokers in Sydney, and all fees for registration of dogs in the city.
2. That the Government be solicited to introduce, or give support to, an Act authorizing the Council to collect a wheel tax, and give them power to recover city rates from all buildings occupied by the Government, or as Public Institutions, and from all unoccupied lands, whether public or private, exclusive of reserves for public recreation.

## THE WATER FUND.

The indebtedness of this fund at the present time, as shown by the annexed statement, is £294,000, exclusive of the claim for interest upon the Government Loan of £213,000.

Your Committee find that the entire outlay upon the works at Botany, and the lines of mains and reservoirs connected therewith, has amounted at the present time to £377,000, the larger proportion of which expenditure had been contracted when the works were given over to the Council. A very large additional outlay must be incurred before the scheme for securing a permanent supply of water from this source can be completed, and as recent experience has shown that many of the principal mains in the city have become unserviceable from corrosion and long use, the demands upon this fund will be constant and heavy for some time to come. The revenue from the water supply has, of course, steadily increased from year to year with the extension of mains through the city and suburbs, but it is found that this additional return does not much more than meet the cost of these extensions, and contributes but little towards the general maintenance of the works.

It is clear therefore that while the Council have charged against them the large amount borrowed by the Government (and secured upon the general revenues of the Colony, but remaining as a charge on the water rates) they cannot, even with the further power which your Committee are prepared to advise should be sought for, maintain and carry out to completion the present system of water supply. Relieved from this debt, and by exercising the further borrowing power they possess, the Council may possibly so far secure such means of extended supply as will yield a revenue sufficient for the support of the works as they now exist; but measures must eventually be adopted for securing an enlargement of the area at present occupied for water purposes, and the large outlay which will be consequent thereon must then be provided for.

Your

Your Committee have to submit for the approval of the Council the following recommendations with respect to this fund:—

1. That the Government be applied to to obtain the remission of the debt in connection with the water works, amounting to (exclusive of any claim for interest beyond the sums which they have already given credit for) £212,000.
2. That the Government be also requested to place in the hands of the Corporation the fees simple of all lands at Botany, resumed for water purposes, and now vested in Her Majesty the Queen.
3. That an Act be introduced into Parliament to authorize the collection of water rates from all Government and public properties, and to make a charge for water to Her Majesty's vessels and other vessels of war.
4. That provision be also made for exempting from payment of rates all lands, reservoirs, or other properties, situate in any suburban Municipality, and held by the Council for water purposes.

#### THE SEWERAGE FUND.

The difficulties which are attendant upon this fund have been mainly brought about by the very imperfect provision made in the Sewerage Act for the collection of the sewerage rate. The rate has been ordered by the Council to be collected from year to year since 1859, to the extent of one-half of the per centage enumerated in the Act, and would have yielded an income of from £11,000 to £15,000 per annum since that date. The actual amount, however, received during the past fourteen years has been £30,058 only, instead of (at an average of £13,000 per annum) £182,000, a difference amounting to little less than the debt of the Council for debentures issued. Several efforts have been made to obtain from the Legislature such an enactment as would remove the existing difficulty, but no amendment of the law has taken place until the present year. The Act recently passed has authorized the enforcement of the sewerage rate from those persons only whose premises shall have been connected with the sewers, and not from persons who, under the provisions of the Sewerage Act, were liable if their premises were in the vicinity of a public sewer, and could have been connected. Your committee need scarcely point out that such a restriction as this is not only adverse to the original intention of the Sewerage Act, but that its operation, as affecting the only possible source of revenue from the sewers, is entirely destructive of the income which the Council had previously anticipated would be obtained for the purpose of supporting the works. It is estimated that the revenue which, under this law, will be now recoverable (at the rates which the Council have thought it desirable to collect) will not exceed £2,250 annually, about one-fourth of the sum required to meet the interest upon the debentures which the Council have issued on account of these works. It is true that the Corporation have power to compel all persons within reach of the sewers to make use of them by connecting their premises therewith, but to carry out this law merely to enable the Council to demand the rates would, your committee consider, be a very undesirable proceeding, and would in many cases inflict great injustice upon the citizens. It seems therefore to your committee that if any further action is to be taken by the Corporation in connection with the sewerage works, the repeal of this recent law must be obtained, and some more equitable enactment secured whereby means may be placed at their disposal for that purpose.

The large proportion of the sewerage debt had, as in the case of the water debt, been incurred at the time when the Sydney Municipality was re-established, but the works undertaken were confined to a district of the city where their execution was the most costly, and where they were the least remunerative. The Council have since that period continued the extension of the sewers in localities where, from dense population and other causes, they seemed to be most urgently required, and where they have been demanded by the citizens. It has always been contended that the carrying out of these works in the city cannot be considered as an altogether local benefit, but that as they have for their object the comfort and convenience of the public, and the preservation of the public health, the cost of this undertaking should not be entirely met by local contribution or taxation. Your committee therefore, taking these sewerage works to be a means whereby the welfare of the general public is influenced, consider that the Council would be justified in seeking to obtain from the general revenue of the Colony, not only a considerable grant towards the cost of the existing sewers, but further assistance from time to time as the sewers are extended.

Your Committee would submit to the Council the following recommendations for the relief of this fund:—

1. That an effort be made to obtain from the Government the cancelling of their claim (amounting to £200,000) for moneys advanced for sewerage purposes, with all interest thereon.
2. That the Council be authorized to collect sewerage rates from all Government and public properties.
3. That the present law be amended so as to render all properties within reach of any public sewer, whether connected therewith or not, liable for sewerage rates.

#### SYDNEY COMMON FUND.

Your Committee beg to attach a statement showing the past expenditure and receipts, and the present income in connection with this fund, but in the absence of any definite information as to the value of the lands still remaining unsold, they are unable to ascertain to what extent the present debt is likely to be liquidated, and they are not prepared with any recommendation with regard thereto.

#### PRINCE ALFRED PARK FUND.

The amount of indebtedness which appears from the accompanying memoranda to attach to this fund seems to have been contracted under peculiar and pressing circumstances. The grounds of the Park were originally placed under the control of the Council as a place for public recreation, but in the year 1869 an Act was passed, authorizing the erection thereon of a building "for the purpose of holding annual and other Exhibitions, and for like purposes of public recreation and instruction," and authority was given to borrow £12,000 towards this object. Concurrent with the passing of this law, a large amount of public interest was manifested, and considerable influence exercised towards obtaining such accommodation in the Park as would enable the Agricultural Society to hold an annual exhibition of the products of this and the neighbouring Colonies with success; and the Council, finding that the sum originally intended to be expended for the purpose would be inadequate for the requirements of the society, were induced to incur a larger outlay, and erected a building at a cost of £20,000. The anticipations which were prevalent when the building was completed, as to the great public benefit which would result from its erection, have, your Committee consider, been more than realized; and although (notwithstanding the liberal rent received from the Agricultural Society) the undertaking has so far been a pecuniary loss to the Corporation, yet the advantages which the citizens have derived from the large influx of visitors into the city during the Exhibitions, and the consequent increase to their business, as well as the means afforded for the furtherance of the agricultural, pastoral, and other interests of the Australian Colonies must have fully justified the action of the Council in incurring the larger debt. But as this building and the adjacent grounds may be said to have been appropriated almost specially for an object which has the advancement of the whole Colony in view, your Committee are of opinion that the citizens, at whose cost they have been provided, have some reason for seeking for some return of their outlay from those for whose benefit, in common with their own, it has been incurred.

That great advantages have already accrued to the agriculturists, breeders of stock, and manufacturers throughout the Colony, and a lively impetus been given to trade in almost all its branches by these annual Exhibitions, appears to be beyond doubt; and as the provision made in the Park for these purposes is most ample and complete, and could not have been obtained in any other part of the city, it is presumed that the benefits which they bring to the colonists will increase from year to year rather than diminish.

Your Committee therefore would submit that the Council have good grounds for endeavouring to obtain from the General Revenue of the Colony an annual grant towards the support of this undertaking, and they would recommend that application be made to the Government to place the sum of one thousand pounds annually upon the Estimates for this purpose, until the existing debt be extinguished.

Your Committee beg to append a detailed abstract of the receipts and expenditure of the Corporation from the 1st January, 1857, to 31st December, 1872, on account of the city fund, together with such memoranda as will show the position of the several funds under the control of the Council on the 30th June, 1873.

In conclusion, your Committee would suggest that the matter of this report be placed in the hands of the Honorable the Colonial Secretary for his perusal, and that the members of the Government and the gentlemen representing the city in Parliament be solicited to meet and confer with the Council on the whole question of the city finances on an early day.

Town Hall,  
Sydney, 24th July, 1873.

JAMES MERRIMAN, Chairman.

CITY FUND.

ABSTRACT of the Receipts and Expenditure of the City Commissioners from the 1st January, to the 31st March, 1857, and of the Municipal Council of Sydney from 1st April, 1857, to the 31st December, 1872.

Table with columns for years 1857-1872 and rows for Receipts and Expenditure. Receipts include City Rate, Watering Street Rate, Licensed Vehicles, etc. Expenditure includes Allowance to Mayor, Salaries, Office expenses, etc. Each entry is detailed with pounds, shillings, and pence.

## The Town Clerk to The Chairman of the Finance Committee.

Town Clerk's Office,  
Sydney, 10 July, 1873.

Sir,

I have the honor, in compliance with a resolution of the Finance Committee, of date the 20th March last, to transmit herewith Statements of the Receipts and Expenditure of the Corporation, in connection with the City fund, from the 1st of January, 1857, to 31st December, 1872, together with such memoranda as will explain the present position of the Council with regard to the different funds under their control, on the 30th June, 1873.

I have, &c.,  
CHAS. H. WOOLCOTT,  
Town Clerk.

MEMORANDA connected with the finances and the present position of the Sydney Municipal Council, 30th June, 1873.  
The accounts of the Corporation are kept under the following distinct funds:—

City Fund.  
Water Fund.  
Sewerage Fund.  
Sydney Common Fund.  
Prince Alfred Park Fund.

## CITY FUND.

The liability on account of the City fund for debentures issued is .. .. .	£95,800
Less the sinking fund of .. .. .	14,723
	<hr/>
And a Bank credit of .. .. .	£81,077
	1,437
	<hr/>
Making a total debt of .. .. .	£79,640
	<hr/>
The annual revenue from the markets, wharfs, baths, fees, and other sources may be estimated at .. .. .	£11,800
And from the city rate of 1s. in the £ .. .. .	36,700
	<hr/>
Making a total income of .. .. .	£48,500

The expenditure for the year for lighting, interest, office and working expenses, exclusive of the cost of maintaining the streets and cleansing the city, will probably be £21,700, leaving a balance of £26,800, of which sum upwards of £11,000 will be required for the necessary cleansing of the thoroughfares, the removal of house refuse, and the maintenance of the public reserves, markets, wharfs, &c., so that the amount available for kerbing, guttering, metalling, and repairing the streets, and for general improvements will be reduced to about £15,000 or £16,000 for the year.

The extent of streets, lanes, and alleys throughout the city is little short of 100 miles in length, of which a large proportion still remains to be kerbed, guttered, and metalled.

The average annual expenditure for metal required for keeping in repair the principal thoroughfares during the past three years (without the cost of casting and spreading) has been £11,000, and for kerbing and guttering, about £4,000.

The lands which have been handed over to the Corporation as places for public recreation (exclusive of the Sydney Common and the Town Hall site) are about 30 acres in extent, and have cost in their formation about £6,334. The annual outlay for keeping them in order is £1,300.

The expenditure of the Corporation in the first formation of streets, without metalling, or kerbing and guttering, since the year 1858, has amounted to £71,000.

As an example of the cost of maintaining the streets, it may be stated that the expenditure for lighting, and cleaning and repairing George and Parramatta streets during the past year amounted to £9,297. The rates received during the same period amounted to £7,200.

The annual cost of lighting the city is £7,700.

The Government lands and buildings, public institutions, and trust reserves in the city, from which no rates are received, occupy a frontage to the streets of upwards of 9 miles in extent.

The extent of unoccupied private lands, which also are not assessed, is about 20 miles of street frontage.

The revenue which would be obtained from buildings belonging to, or occupied by the Government, if assessed for city rates, would be about £2,200 per annum.

The Council have the power of borrowing on account of the city fund a further sum of £4,200 only.

## WATER FUND.

The water fund is indebted to the Government (exclusive of interest) .. .. .	£213,337
Debentures have been issued for .. .. .	73,100
And there is a debt at the Bank of .. .. .	7,652
	<hr/>
Making a total debt of .. .. .	£294,089

The annual income from water rates is about £36,000, the whole of which amount is required for maintaining the works, the extension of mains and further means of supply, the interest on debentures, and the necessary office expenses. The cost of the works at Botany, the construction of reservoirs, and laying of mains up to the present time, may be stated at £377,663.

The amount paid for lands resumed by the Government and purchased by the Corporation has been £58,150, and the value of additional lands required for the preservation of the watershed is (say) £34,200.

The cost of the extension of the works now under the consideration of the Council is £103,000.

The value of the water now supplied free of charge to Government buildings and grounds, public institutions, and shipping, is £2,600 annually.

The balance of the amount which the Council have power to borrow for water purposes is £76,900.

## SEWERAGE FUND.

The debt to the Government on account of this fund is (exclusive of interest) .. .. .	£200,000
Debentures have been issued for .. .. .	162,800
There is a Bank overdraft of .. .. .	13,899
	<hr/>
Less to the credit of the sinking fund .. .. .	£376,699
	2,000
	<hr/>
Making a total debt of .. .. .	£374,699

The

The income which will be derivable from the sewers under the Act recently passed, which confines the liability for rates to such persons only whose premises are connected with the sewers, cannot at present be correctly ascertained; but it is anticipated that, at the full rates as enumerated in the Sewerage Act, it will not exceed £1,500 per annum. The Council hitherto have ordered the collection of the sewerage rate to the extent of one-half only of the authorized per centage.

The amount received during the past year from those who voluntarily paid sewerage rates was £1,368.

The interest payable upon the debentures issued is £9,768 per annum, and to the Bank for overdraft an average of £1,020 per annum.

The total amount expended on works in connection with the construction of the sewers has been £319,461.

The amount which would be received annually for sewerage rates upon Government properties and public buildings is £1,124.

The Council have further borrowing power to the extent of £37,200.

#### SYDNEY COMMON FUND.

Debentures have been issued in connection with the Sydney Common fund to the extent of .. .. .	£15,000
And the present overdraft is .. .. .	10,620
	<u>25,620</u>
Making together a debt of .. .. .	£25,620

The total expenditure upon improvements upon the Common has been £45,232.

The value of the lands already sold is £26,866.

A considerable quantity of land still remains for disposal, but no estimate can be made of its present value.

The revenue from rents and agistment is about £300 per annum.

The average annual expenditure for interest and improvements is about £3,860.

#### PRINCE ALFRED PARK FUND.

The amount raised by the issue of debentures on account of the Prince Alfred Park is .. .. .	£12,000
And the Bank overdraft is .. .. .	6,377
	<u>18,377</u>
Making a debt of .. .. .	£18,377

The revenue from the Exhibition building is about £1,250 per annum.

The cost of the building has been £19,730.

The expenditure for interest on the debt, and the maintenance of the building, is about £1,325 per annum.

#### RECAPITULATION of the Liabilities and Revenues of the City Council, 30th June, 1873.

## A 2.

## MESSRS. KEMP &amp; LEWIS' AND CITY ENGINEER'S JOINT REPORT ON COMPETITIVE DESIGNS FOR TOWN HALL.

## LIBRA—Design No. 1.

- Clause No. 1.—Exceeds £35,000.  
 " 6.—Sectional parts of roof not filled in black.  
 " 7.—Non-sectional parts of roof and gallery are not executed as elevations.  
 " 8.—External perspective shaded, and treated as a picture.  
 " 10.—No elevation of southern front; and nothing showing the principal points in the construction of roof and gallery.  
 All other conditions are complied with.

## EUREKA—Design No. 2.

- " 1.—Exceeds £35,000.  
 " 8.—External perspective shaded as a picture.  
 All other conditions are complied with.

## ART—Design No. 3.

- " 1.—Exceeds £35,000.  
 " 10.—There is nothing showing the construction of the foundations, or any foundations whatever below the ground line.  
 All other conditions are complied with.

## UBI FRUIT—Design No. 4.

- " 1.—Exceeds £35,000.  
 " 6.—Sectional parts of roof not filled in black.  
 " 7.—Non-sectional parts are not executed as elevations.  
 " 10.—There is nothing showing the principal points in the construction of the roof; and nothing showing the construction of the foundations, or any foundations whatever below the ground line.  
 All other conditions are complied with.

## BUSYIP in double triangle.—Design No. 5.

All conditions complied with.

## DOG—Design No. 6.

- " 10.—Two elevations only, instead of four (*i.e.*, one for each front.)  
 All other conditions complied with.

## TRBU UND FEST—Design No. 7.

All conditions complied with.

## STRUCTOR—Design No. 8.

All conditions complied with.

## R.B.—Design No. 9.

- " 6.—Floors not tinted as specified.  
 " 7.—Other tints used than those specified.  
 " 10.—No plan of roof; no western nor southern elevation.  
 All other conditions complied with.

## ROYAL STANDARD—Design No. 10.

- " 1.—Exceeds £35,000.  
 " 8.—Shadows shown in windows.  
 " 10.—No elevation for southern front.  
 " 11.—Estimated cost per foot not given.  
 All other conditions complied with.

## SPES—Design No. 11.

Clause No. 1.—Exceeds £35,000.

- 6.—All floors not tinted.  
 10.—No plan of roof; no drawing of western or southern front.  
 11.—One front executed on tracing paper.  
 All other conditions complied with.

## CITY—Design No. 12.

All conditions complied with.

## VIVA ITALIA—Design No. 13.

All conditions complied with.

## HOPE—Design No. 14.

All conditions complied with.

## T in square—Design No. 15.

- 1.—Exceeds £35,000.  
 2.—Covers more than half an acre.  
 7.—Non-sectional parts are not treated as elevations.  
 10.—Principal points in construction of roof not shown; and there is nothing shewing the construction of the foundations, or any foundations whatever, below the ground line.  
 All other conditions complied with.

## NIL DESPERANDUM—Design No. 16.

- 1.—Exceeds £35,000.  
 6.—Floors tinted, but not with neutral tint.  
 All other conditions complied with.

## CORINTH—Design No. 17.

- 6.—Floors not tinted; no allowance made for fall of ground.  
 All other conditions complied with.

## AD HOC in circle—Design No. 18.

- 1.—Exceeds £35,000.  
 8.—Shadows shown in windows.  
 10.—Southern front does not accord with the plans.  
 All other conditions complied with.

NOTE.—There are some red lines drawn upon these plans which are intended to show how the size of the building may be reduced to make the cost come within the prescribed limit of £35,000. These lines do not accord with the general conditions in any way; they are, in fact, another design for which distinct plans should have been given, in accordance with the general conditions.

## AD HOC in circle—Design No. 19.

Shows an elevation for George-street and Druiitt-street fronts, without plans or other drawings to suit; and no estimates.

## EMU in triangle circumscribed—Design No. 20.

All conditions complied with.

The calculations for the estimated cost of all these designs have been made at the rate of 6d. per cubic foot below the ground line, and 9d. per cubic foot above the ground line for the main structure, and 1s. 3d. for the towers above the height of main structure:—

## C 1.

[*Handed in by Mr. Sim, 5 December, 1873.*]

The Mayor, Morpeth, to Wm. Pidcock, Esq., Secretary to Municipal Conference.

Dear Sir,

Your circular requesting me to lay before the Conference the amendments that the Council of this borough deem necessary to be made in the Municipal Act was laid before the Council at its last sitting, and it was resolved that the matter should be left in my hands, as mayor, to make such suggestions as would seem to be of value to the Conference.

In entering on this task I must confess the difficulty I have to contend with in suggesting amendments to an Act that appears to me wrong in its leading principles. It will be necessary therefore, at the cost of a little tedium, to point out the defects in our present municipal system, and first as to its objects.

Civilization is said to be the creator of wants public and private, which ever increase with its advance, and the supply of these public wants are vital to its existence. Each individual must have these wants supplied, and as it is impossible for the individual to supply himself with the public requirements they must be supplied by some governing body vested with power equal to the requirements.

Before the establishment of our municipal system the central Government, with a power to raise revenue limited only by the will of the Parliament (and as a good local man is the main essential in a candidate for Legislative honors, that will in this particular was generally subservient), had entered upon the duty of supplying the public wants, and continue to do so now in all areas not incorporated. With an evident desire to be released of this duty the Government gave the Country our present municipal system in which the power of taxation is limited to 1s. in the £ of nine-tenths of the annual value of improved fixed property, and 1s. in the £, or 5 per cent. of the value of the fee simple of unimproved property, and as security for the payment of this rate or revenue they have given the Municipal Councils the goods and chattels of the occupiers. It strikes me that if the goods and chattels of the occupiers are the proper things to be pledged for municipal improvements they would also be the proper things to assess and raise a rate upon; but is it the chattel property of the occupier that is improved in value by municipal works, or is the real or fixed property that is improved? No one will give more for a chair or table in an incorporated area than they would outside that area, but if the approaches to premises are well made and in good order, and some care is taken to secure cleanliness and health, any one would be willing to give more rent for a dwelling where these conditions exist than they would where they do not exist. If then it is the real property that is enhanced in value would it not be more equitable to make that amenable for municipal improvements than it is to impose the hard task on Municipal Councils of selling the goods and chattels of occupiers to pay for improving the property of their landlords, for which they have again to pay in an increase of rent? This is surely wrong.

The next point I would draw the attention of the Conference to is, the power given in the 10th section of the Act to any fifty persons liable to be taxed for municipal purposes of being incorporated on petition, and define the boundaries of such Municipality, and the counter power given to a like number of petitioners to resist incorporation. In view of the object of our municipal system (to wit) the distribution from the central Government of the power to improve and take care of the common property of the inhabitants, to that of the residents of different localities more immediately concerned in the good order of our common property in their immediate neighbourhood, it must be apparent that the principle involved in this section, of allowing fifty residents to lay out a Municipality to suit themselves, or (as in most cases) be confined in their action by the will of surrounding proprietors, can never meet the object of municipal law, as all the roads in the intervening areas must still be left in the care of the central Government. The present method of doing this is by placing to the credit of an irresponsible committee—usually recommended by the local Member—a sum of money, at a rate per mile, in accordance with a departmental arrangement. It would be too much to say that this is not in many cases wisely expended; but would it be too much to say that it is in many cases expended more in view of the interests of the local committees and their friends than that of the general public. Of this abuse the Government can hardly plead ignorance; but they can, with good reason, plead their inability to cure the abuse, except by municipal action; and that by this section, being placed at the will of the people, is removed from the province of Government. There can be no hope that a municipal system that will be of any general benefit to the Country can come into existence under this clause of the Act.

The next clause I would draw the attention of the Conference to is, the exemption from rates of certain properties, set forth in section 163. The property of Her Majesty and the Imperial Government in the Colony may be set down as the exact amount of our attachment to our Queen and British institutions. All the real property unalienated is virtually vested in the Government of New South Wales. On what ground of equity is the property of the Government exempt from municipal rates? Is the property of the Government not enhanced in value as much as any other property by municipal improvements? Does the Government not use the roads so improved? If we look on the Government as the trustees of the public property and the executive of the public will, surely it is a bad example of the use of their powers to exempt themselves from a payment they are in equity as much liable for as any other holder of property. All the other properties exempted are proper objects for the exercise of sympathy with; but it seems to me that the Council is the proper body to exercise that sympathy, and not the Government.

Section 164 I have already referred to as one of the leading features of the Act, and as being wrong in principle, by making the goods and chattels of the occupier liable for municipal improvements in the place of the real property. Sections 165, 166, and 167 are useless under the powers possessed by the Council to borrow money. Section 176 is one of the longest and most ambiguous sections in the Act. When it is read in connection with the 164th section it is difficult for men of fair average understanding to wade their way through them. This section, which involves an outlay of our small rates in law charges, should, of all others, be clear, so that the ordinary men that are usually elected as aldermen would be able to recover the rates without risk.

The next section of importance is the 189th, or endowment clause. In our Municipality, and I believe in all others, under this Act all the moneys collected by rates and endowment (less the working expenses) have been expended in improving the public thoroughfares of the Colony, which are common to all, not on the private property of the ratepayers. If the private property of the ratepayers has been enhanced in value, it has been by giving greater facilities of intercourse to those outside their

their boundary; and as facilities to intercourse and industry tend to increase population, and population revenue, it is not easy to understand why the Government has fixed the endowment to Municipalities at a ratio inversely with the facilities given; and further, that, at the end of fifteen years, the endowment should discontinue, while the Government must continue to keep the thoroughfares in order outside the municipal boundary. This cannot be right.

The next section I would draw the attention of the Conference to, is the 190 or borrowing power. Our Corporation, and I believe there are many like us, have no property to offer as security for a loan, except the rates, and no Bank or money, lender will advance on such security. All the money we have borrowed has been on the joint and several prom-note of the aldermen. By the operation of the Act, all the aldermen pledged for the repayment of this loan may all be outside the Council in three years; and there is a possibility under the Act of the new Council repudiating the debt, as the document held by the Bank is simply a promise to pay made by persons whose names are attached; no one else is liable. For the purpose of effecting the improvements specified in the 165th section, the Council is empowered to levy a rate on all occupiers or owners of property deriving any benefit from such works, and not till then. Such works can only be constructed with borrowed money, and to pledge the general revenue of the Council for works that may be only of partial benefit would be unjust.

It seems to be utterly impossible that a proper system of municipal self-government can become general under the present Act, and even to continue those in existence we must have a new Act.

For the construction of a new Act, I beg to submit to the consideration of the Conference the following principal features to be embodied in such Act, that I think will meet the wants of the country:—

- First. That the settled portion of the country be laid out into municipal areas or districts, leaving no intervening spaces between, as at present.
- Second. That all the fixed property in each municipal area be assessed every three years, and a rate (say) of one penny in the £ on the value of the fee simple, payable by the owner for the general maintenance of the roads within the Municipal area, be levied by the Government, and expended on said roads under Government supervision.
- Third. That all postal roads be subsidized by the Government in accordance with the present classification of roads, subject to such alteration as the necessity of the postal route may require.
- Fourth. That any of the municipal areas, but no more nor no less than that laid out, may be incorporated on petition of a majority of the inhabitants within such area, on the completion of which, all powers for the assessment of property and the raising of money by rates, and the maintenance of roads, exercised by the Government, together with the subsidy for postal roads, be vested in the inhabitants so incorporated. The Councils may be similar to the present.
- Fifth. That all towns within an incorporated area requiring greater improvements than the maintenance of roads, such as kerbing and guttering of streets, the sewerage of the town or the drainage of land, the supply of water, the lighting with gas, or any other public improvement the advancing civilization may require, shall, before any such improvements be made, be subject to an additional rating, such rate to be estimated to yield at least 10 per cent. on the cost of the work required for such improvements.
- Sixth. That all moneys required for improvements be borrowed from the Government, on the security of the rates; and on any failure or default on the part of the Council of the municipal area, the Government to seize on the security and collect the rates.
- Seventh. That in each municipal area a portion of land be set apart for public purposes, water reserve, and commonage, and on incorporation be vested in the Council.

I do not deem it necessary to give details, as these can be added when required.

Yours faithfully,  
D. SIM, Mayor.

Municipal Council Chambers,  
Morpeeth, 29 September, 1873.

D 1.

[Ordered to be appended, 1 April, 1874.]

#### MUNICIPALITIES.

(REPORT FROM CONFERENCE COMMITTEE ON FINANCIAL POSITION OF.)

Ordered by the Legislative Assembly to be printed, 4 December, 1873.

The Secretary to Municipal Conference Committee to The Colonial Secretary.

Camperdown, 29 September, 1873.

Sir,

I have the honor, by direction of the Municipal Conference Committee, to forward, for your information, the enclosed return, compiled from statistics furnished to the Committee by the respective Municipalities, showing the amount of rates, endowment, &c., proportion of endowment to rates, for the year, the length of roads, &c., in each Borough and Municipal District, and the present liabilities of each Council; also, to state that some of the returns not having yet come to hand I have been instructed to fill up the columns of such, if possible, from the Government Statistics of 1872-3, No. 141.

I have, &c.,  
WM. PIDCOCK,  
Secretary to Conference.

RETURN

## APPENDIX.

115

RETURN showing the amount of Rates, Endowment, &c., for the Year; proportion of Government Endowment to Rates now received; when Endowment ceases; Length of Streets, Roads, &c.; and the present Liabilities of each Borough and Municipal District. (Sydney, 29 Sept., 1873.)

D 2.

[Ordered to be appended, 1 April, 1874.]

MUNICIPALITIES.

(PETITION OF MUNICIPAL COUNCILS RESPECTING ENDOWMENT OF.)

Ordered by the Legislative Assembly to be printed, 14 January, 1874.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Members of the Municipal Councils of the Boroughs and Municipal Districts of New South Wales,—  
HUMBLY AND RESPECTFULLY SHOWETH:—

That your Petitioners believe that the Government is relieved of very much labour and expense by the Municipalities already incorporated in making roads, bridges, and many other improvements within the limits of their respective boundaries.

That in order to complete urgent and necessary improvements (the expenses of which have unavoidably involved an outlay, with the strictest regard to economy, far exceeding the amount raised by rates, endowments, &c., for many years to come) many of the Municipal Councils have been compelled to borrow money, to repay which, with interest, both the endowment and a large portion of the rates must be devoted, leaving a margin barely sufficient to meet ordinary expenses, and nothing whatever to carry on further improvements, or to keep in repair the many miles of roads, streets, and other improvements already made.

That the present rate of endowment, on the scale provided for in the 189th section of the "Municipalities Act of 1867," is inadequate to meet the claims of the Municipalities.

Your Petitioners are of opinion that nothing short of a perpetual endowment, equal to the amount raised by rates, subscriptions, &c., will be sufficient to carry on the necessary works; and pray that your Honorable House will duly consider the matter by amending the 189th section of the present Municipalities Act, so as to meet their requirements.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 457 Signatures.]

D 3.

[Ordered to be appended, 1 April, 1874.]

MUNICIPALITIES.

(FINANCIAL POSITION OF.)

Ordered by the Legislative Assembly to be printed, 30 January, 1874.

RETURN (in part) to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 10 December 1873, That there be laid upon the Table of this House, during the month of January, 1874,—

- "(1.) A Return from each Borough and Municipal District, showing the amount of arrears or of unpaid rates on the 31st December in each year since their incorporation to 1873 inclusive.
- "(2.) A Return showing the liabilities, whether by loan, unpaid accounts, or otherwise, of each Borough and Municipal District on the 31st December, 1873.
- "(3.) A Return showing the actual superficial area, or an approximation thereto, of each Borough and Municipal District, as now incorporated."

(Mr. Macintosh.)

RETURN.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## GOVERNMENT ASYLUMS.

(REPORT FROM BOARD RELATIVE TO EXPENDITURE FOR 1873.)

*Ordered by the Legislative Assembly to be printed, 23 June, 1874.*

THE SECRETARY TO THE BOARD, GOVERNMENT ASYLUMS, to THE PRINCIPAL UNDER SECRETARY.

Board of Government Asylums,  
Sydney, 16 June, 1874.

SIR,

I am directed by the Board of Management to transmit, for the information of the Honorable the Colonial Secretary, returns of the expenditure of the Government Asylums for the Infirm and Destitute, for the year 1873, with a comparative statement of the expenditure of those Institutions for the eleven years 1863 to 1873 inclusive, and to request that, as has been customary, they may, with this report, be laid before Parliament.

The Board desire me to call attention to the following facts connected with the management of the Asylums, as brought out in these Returns:—

1. The numbers of admissions, discharges, and deaths in the three Asylums were as follows:—

	In the Asylums, 31 Dec., 1872.			Admitted during 1873.		Discharged during 1873.		Died during 1873.		Remaining in the Asylums, 31st Dec., 1873.		
	Males.	Females.	Total.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Total.
Sydney .....	...	217	217	...	234	...	196	...	42	...	213	213
Parramatta .....	256	...	256	343	...	298	...	43	...	258	...	258
Liverpool .....	578	...	578	701	...	508	...	167	...	604	...	604
Total .....	834	217	1,051	1,044	234	806	196	210	42	862	213	1,075

2. The average number of inmates in the three Asylums during the year was—

Hyde Park, Sydney (Females) ..	...	...	...	...	219
Parramatta, (Males) ..	...	...	...	...	264
Liverpool, (do.) ..	...	...	...	...	613
					<u>877</u>
Total ..	...	...	...	...	<u>1,096</u>

3. The total expenditure for the maintenance of the above 1,096 paupers for the past year, including salaries to staff, rations, medical comforts, medicines, clothing, &c., has amounted to £13,773 16s. 5d., showing an average expense per head of £12 11s. 4d., or £1 1s. 8½d. per head more than that for the previous year; this may be accounted for almost entirely by the increased price of provisions. The cost for provisions in the year 1872 was at the rate of £5 17s. 0½d. per head, whilst the cost in 1873 was at the rate of £6 15s. 5½d. per head.

4. As compared with the average cost (£13 2s. 4½d.) of the previous ten years, the past year shows a reduction of 11s. 0½d. per head on the entire expenditure.

5. When the south wing of the Liverpool Asylum was commenced it became evident that the space for exercise for the inmates was of too limited an area, and the Board, to meet the difficulty, arranged for a ten years lease of five acres of land in the vicinity of the Asylum. The field was fenced in, drained, and improved so as to make it a valuable addition to the Institution. At Parramatta also, a piece of land (about three acres in extent) has been rented from Sir William Macarthur, and fenced in for the purpose of growing vegetables for the inmates. The expenditure for these works and other small urgent improvements which have been paid for from the Asylums' vote, have increased the expense to the extent of 4s. 8½d. per head; that is to say, were these expenses eliminated from the returns the annual cost per head would be reduced from £12 11s. 4d. to £12 6s. 7½d.

6. The per-centage of deaths, and the average age of inmates who have died in the Asylums during the past year were as follows:—

	Per-centage.	Average.
Hyde Park, Sydney—Females ... ..	19.18	63 years.
Parramatta—Males ... ..	16.28	66 „
Liverpool „ ... ..	27.40	68 „

7. The ages of deceased inmates, as given by themselves, were as follows:—

	Years.									Total.
	Over 20.	Over 30.	Over 40.	Over 50.	Over 60.	Over 70.	Over 80.	Over 90.	Over 100.	
Hyde Park—Females .....	2	...	4	6	12	12	6	...	...	42
Parramatta—Males .....	1	2	4	8	8	11	6	2	1	43
Liverpool „ .....	...	7	9	12	50	53	28	6	2	167
Total ... ..	3	9	17	26	70	76	40	8	3	252

8. In explanation of the much larger per-centage of deaths at the Liverpool Asylum, as compared with the deaths at Parramatta and Hyde Park, it is right to state that, on account of the convenience for the removal of patients from the train to the Asylum, and to the superior hospital accommodation at Liverpool, as a rule all very infirm and helpless persons, as well as all admissions from the Sydney Infirmary, are sent to Liverpool instead of to Parramatta. In fact the Liverpool Asylum has become in a great measure a convalescent hospital, taking in destitute invalids from all the hospitals in the Colony.

9. The Board are aware that there is a prevailing opinion that several inmates are maintained in the Asylums who are able to earn their own livelihood; but if there are, at any time, persons of that description in the Institutions, they are convalescent patients who, having been admitted in a sickly and destitute condition, are allowed to remain for a limited time until they hear of some employment, and who, unless occupied in the work of the Asylums, are, on the certificate of the medical officer, if not hired out, forthwith discharged.

10. The work of the Asylums is performed entirely by the inmates, who are paid small gratuities of 2d. to 4d. per diem, a few of the principal wardsmen being paid 1s. per diem; by this arrangement the Board are enabled to utilize the small capabilities of some of the more healthy inmates who, outside the Institution, would probably starve.

11. The utilization, by the Board, of the late Volunteer quarters, the expenditure for which was specially authorized by the Honorable the Colonial Secretary from the Asylums' vote for the current year, has added much to the comfort of the old women at Hyde Park; and the addition of the new wing at Liverpool, which has been constructed principally with a view to hospital purposes, has largely increased the capabilities of that establishment.

12. At the Hyde Park Asylum all the clothing is made by the inmates, and at Liverpool the greater portion is so made; by this means not only is a large saving effected in the expenditure but both men and women are employed in useful labour, who, from age and infirmity, could not obtain a livelihood outside the Institution.

13. The Board deem it only doing justice to the officers immediately in charge of the Hyde Park and Liverpool Asylums to say, that those two Institutions have been conducted in all respects to their entire satisfaction; and that the general management, cleanliness, and order maintained in them is deserving of the highest praise. The Board regret that they cannot accord similar praise to the management of the Parramatta Asylum.

I have, &c.

FREDERIC KING,  
Secretary.

RETURN of the Expenditure of the Government Asylums for the Infirm and Destitute at Sydney, Parramatta, and Liverpool for the year 1874.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ORPHAN SCHOOLS.

(STATISTICS IN REFERENCE TO.)

*Ordered by the Legislative Assembly to be printed, 4 December, 1873.*

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 18 November, 1873, That there be laid upon the Table of this House,—

- “ (1.) A Return of the average daily number of children in the Protestant Orphan School at Parramatta in the year 1871.
- “ (2.) The number of children who died in 1871.
- “ (3.) The number of boys and number of girls apprenticed from the Institution in 1871.
- “ (4.) An account, in detail, of needlework performed by the girls in 1871.
- “ (5.) A detailed account of any work or labour performed by the boys.
- “ (6.) The total cost, in detail, of the whole Establishment for the year 1871, to be given under the several headings, as follows:—Amount paid for salaries, maintenance, clothing, medical attendance, furniture, crockery, &c., fuel, light, forage, and all other miscellaneous expenses not included under the above heads; cost of repairs, building improvements, &c., made for and on account of the Establishment under the order of the Minister for Works, or of the Colonial Architect.
- “ (7.) All other charges or expenditure of whatsoever kind in connection with the Establishment, entered in detail.
- “ (8.) The like Returns for the year 1872.
- “ (9.) The like Returns for the years 1871 and 1872 respectively of the Roman Catholic Orphan School.”

(*Mr. Raphael.*)

## ORPHAN SCHOOLS.

THE MATRON, PROTESTANT ORPHAN SCHOOL, PARRAMATTA, to THE PRINCIPAL UNDER SECRETARY,  
Protestant Orphan School,  
Parramatta, 21 November, 1873.

SIR,

In reply to your letter of the 19th instant, requesting me to furnish certain information which has been called for by the Legislative Assembly, I have the honor to enclose—

- (1.) A return of the average daily number of children in the Protestant Orphan School at Parramatta, in the year 1871.
- (2.) The number of children who died in 1871.
- (3.) The number of boys and number of girls apprenticed from the Institution in 1871.
- (4.) An account in detail of needlework performed by the girls in 1871.
- (5.) A detailed account of any work or labour performed by the boys.
- (6.) The total cost in detail of the whole establishment for the year 1871, to be given under the several headings as follows:—

Amount paid for salaries, maintenance, clothing, medical attendance, furniture, crockery, &c., fuel, light, forage, and all other miscellaneous expenses not included under the above heads.

- (7.) All other charges or expenditure of whatsoever kind in connection with the establishment, entered in detail, and the like returns for the year 1872.

I have, &c.,  
M. BETTS,  
Matron.

[Enclosures.]

(1.)

A RETURN of the average daily number of Children in the Protestant Orphan School at Parramatta, in the years 1871 and 1872.

Year.	Average daily number.		
	Boys.	Girls.	Total.
1871 .....	156	93	249
1872 .....	154	89	243

(2.)

RETURN showing the number of Children who died in 1871 and 1872.

[Nil.]

(3.)

RETURN showing the number of Boys and number of Girls apprenticed from the Institution in 1871 and 1872.

Year.	Boys.	Girls.	Total.
1871 .....	11	4	15
1872 .....	25	16	41

(4.)

AN account in detail of Needlework performed by the Girls in 1871 and 1872.

1871.	1872.
12 bags.	20 aprons.
10 bed-ticks.	44 bags.
10 bed-quilts.	7 bed-ticks.
152 blouses (boys.)	32 bed-quilts.
13 capes (girls.)	143 blouses (boys.)

THE REV. S. J. A. SHEEHY TO ACTING PRINCIPAL UNDER SECRETARY.

Vicar General's Office,

3 December, 1873.

SIR,

I have the honor to enclose reports from the Roman Catholic Orphan School for the years 1871 and 1872, as required by your letter of the 19th ultimo, to lay before the Legislative Assembly. All the information demanded is, I believe, given, except the amount of the medical officer's salary and of repairs, which we do not know.

I have, &amp;c.,

S. J. A. SHEEHY.

[Enclosures.]

Roman Catholic Orphan School, Parramatta—Return for the year 1871.

No. 1. Average daily number of children, 318.

No. 2. Number of children who died, 1.

No. 3. Number of girls apprenticed, 15.

Do. boys do., 11.

No. 4. Needlework done by the girls:—200 sheets, 100 counterpanes, 4 dozen towels, 50 pillow-slips, 100 pocket handkerchiefs, 5 dozen dress shirts, 60 petticoats, sew the buttons on all their clothing, and assist with the general repairing of house linen and clothing. Every girl over 8 years assists in the housework out of school-hours.

No. 5. Four boys assist in the farm work; changed weekly. All the boys over 8 years assist in cutting wood, keep the grounds in order, and have the entire charge of their dormitories, school, and halls, under the supervision of the drill-master.

## NEW SOUTH WALES.

## NAUTICAL SCHOOL SHIP "VERNON."

(REPORT FOR YEAR ENDED 30 JUNE, 1873.)

Presented to both Houses of Parliament, by Command.

THE SUPERINTENDENT, N.S.S. "VERNON," TO THE PRINCIPAL UNDER SECRETARY.

N.S.S. "Vernon,"  
15 July, 1873.

SIR,

I have the honor to transmit, for the information of the Honorable the Colonial Secretary, a Report of this Institution for the past year, ending 30th June.

The general health of the boys has not been so good as in previous years; this I attribute in a great measure to our present anchorage. Scarlet fever was in the ship several months, which I have every reason to believe travelled from Balmain to us, as the boy who steered the boat to and from that place was the first to take it. The number sick during the past twelve months was 72; the cost of medicines, £27 10s. Table 16 gives a comparative statement of sick and cost at our present and former moorings off Garden Island. It affords me great satisfaction to be enabled to state that no death has taken place during the past twelve months, and that at present we are quite clear of sickness; the great attention and care of the sick by Mr. James Gorman, officer-in-charge of the lower deck, that was specially reported and commended, I think is worthy of notice here, for it was no doubt to his skilful nursing that many of them recovered so speedily.

When the weather permitted, on Sunday, all the well behaved boys were landed and marched to their respective churches under the charge of officers, but when detained on board, through boisterous, wet weather or sickness, the Church of England Service was read by myself to all the Protestants. They were also visited during the week by clergymen of the Church of England, Roman Catholic, and Presbyterian persuasion, for imparting religious instruction. Table 12 contains a record of their visits. Mr. Whytlaw's visits are included with the Presbyterian; he conducts the Protestant Sunday School and has been so doing for more than six months past, by the joint wishes of the Reverends Mr. Langley, C.E., and Mr. Cosh, Presbyterian, Ministers of Balmain. From the statement of these reverend gentlemen the answers given by the boys in this school have been very good, and the improvement in their singing is worthy of mention.

The educational return (table 13) gives a general view of their attainments. They have been attentive in school, and made good progress since the appointment of our present schoolmaster; the whole tenor of the school has improved greatly.

In pulling in boats, trades, gun-drill, and general work about the ship, they have all made good progress in seamanship; they have improved upon the last year; but it is still far short of what it should be, and to make any marked improvement in this profession we should either be in sight of the shipping, or what will be better, have a small vessel for exercising and cruising outside the Heads, such as I formerly recommended in my letter of the 3rd May, 1869.

Table 10 will show a list of the articles made, and their estimated value. Among these is a steam launch, 52 feet over-all, 46 feet keel, 6 feet 11 inches beam, and 3 feet 9 inches deep, built on the lines of the fast model yacht "Miranda." This boat is now entirely planked and timbered, and only requires the internal fittings, caulking, coppering, and launching, to be ready for the engines and use, when she will be a very valuable acquisition to the Government,—be useful for any purpose that may be required of her in the harbour, or even outside in ordinary weather, and worth £850 finished; this is taking her at the English rate. A boat-shed and cow-shed has also been erected by the carpenter, seamen, and boys; these will always be useful for any Government purpose if the vessel should be hereafter removed from her present anchorage.

The admissions during the year have been 65; discharged and apprenticed, 67; passed though the books since inauguration, 408; apprenticed to 30th June, 233.

Table 11 shows a statement of their conduct, so far as I can obtain a report and trace the career of the boys. One gentleman reports: "On the 30th of this month my apprentice, M. O'B., will have completed his term of three years, during which time he has conducted himself with the greatest propriety in all things; and it affords me the greatest pleasure to testify to his general good conduct, which must reflect the greatest credit on his original training on board the 'Vernon.' One thing I must state and that is, he has studiously avoided all low associates, and I think will become both a respectable and useful member of society." Another, from the Clarence, writes, that the boy T.M. has conducted himself very well for the last

last twelve months. Another writes, regarding the boy W.J. :—"He is still the same good boy, faithful and honest, and will be a first-class tradesman when out of his apprenticeship." The master of another says: "My apprentice, R.T., is well behaved, of good habits, honest and upright in every way." Another master from the Clarence says: "My apprentice is conducting himself very well. Accept my thanks for sending me such a good boy." Another says: "My apprentice, J.D., is doing very well. I am quite satisfied with him, and he likes his place very well." A gentleman, who has two boys, writes: "Since my last report both the boys have improved, especially J.B., who is now beginning to be very useful; and I have no doubt in another year I shall be able to say the same of W.; but on the whole I am much more satisfied with them than when last I wrote. Another, from the same district, writes: "My apprentice, J.C., has conducted himself very well during the time he has been with me." Another writes: "My apprentice, E. M'E., is now conducting himself very well, and appears very contented; he has a bad temper, but think he will make a useful lad in time if properly treated." A lady, who had two boys (one now out of apprenticeship), writes: "J.S. has conducted himself very well. I am pleased to say there is a decided improvement in the boy in all respects. M.C. has been at service near me for the last six months; he is a most useful servant and seems to be doing well, being mounted and dressed like a gentleman." A gentleman near Grafton writes: "It affords me great pleasure in speaking in the highest terms of the whole tenor of J.S.'s behaviour during the time he has been apprenticed to me, and should he remain long enough after his apprenticeship I feel sure I can raise him superior to his class. The boy M. has also conducted himself very creditably. In fact I have no fault to find, nor have I heard any; he is willing and obedient, and for such a little fellow does all that can be expected." Another, from about the same locality, reports: "T.E. has conducted himself fully to my satisfaction. He is obedient and trustworthy. I have not known him to say a bad word or tell a lie since he came to me, and I consider he is a credit to your noble institution. I may remark that this last boy was apprenticed to a person near Sydney, but did not please his master; the indentures were cancelled, and he was apprenticed afterwards to the master near Grafton, thereby proving what can be done with boys under different treatment. A gentleman from along the line writes: "My apprentice, G.W., is conducting himself with credit and giving us satisfaction; indeed he is so favourably known in the district that several residents speak of applying to you for apprentices." Capt. Towns wrote, just before his demise, that his experience of the "Vernon" boys was so good that he wished to get several more for the two whalers that he was then fitting out. One Saturday morning, a few months back, when about to step into a cab on the Circular Quay, a well dressed respectable looking young man came up to me, touched his cap, and requested permission to visit the ship, to see the officers and boys. I did not recognize him until he told me his name. He was one of our old boys, who had been to sea, just returned, and paid off, and was about to go to a northern port to see his father. A more respectable decent looking young person could not be found among the officers of the merchant vessels in harbour.

Three other youngsters finished their apprenticeship with Capt. Towns in two of his whalers; one went back to the same ship as second mate, and one of the others I believe before the mast; John M'G., a boy who had been working for himself, wrote to me last April thus: "Dear friend,—I hope you will excuse my long silence. I was often thinking about writing to you, and I used to keep putting it off from time to time. I suppose you thought I had forgot you. I shall never forget your kindness to me. I have done well since I left the 'Vernon.' It was the best job ever happened to me to be sent there. I have been on the diggings and done well. I am going to get married very soon. I think I will be going to Sydney; then I will go and see you"—&c. Since the above letter was received I have heard from him again, in reply to one of mine, thanking me for writing him.

I could give many more extracts from letters, speaking favourably of boys from this ship, but perhaps these few, taken at random, may be considered more than enough to prove the good that this Institution has done for the stray youths of this Colony.

It would be better for all those who are apprenticed, if it were possible that I could get to see, and have speech with them and their masters. I think if this could be managed it would prevent many from absconding. I would then be able to ascertain from personal observation if the masters were fit persons to have charge of the boys, for I am aware by report that some persons have obtained boys, through the recommendations of Magistrates, who are quite unfit to have charge of children.

At present we have forty applications, and it will be quite impossible to supply them all this year.

The cost per head is less than it was last year, the daily average being 107 and the work done by everyone greater than any year yet. Everything that is worn by the boys is made on board, and all the internal work and fittings done by ourselves, boats repaired, and also vegetables grown on the Island. A copy of the gardener's report is appended; by it you will notice that many of the vegetables were gathered by others not connected with this establishment. Altogether, for the moral tone and welfare of this Institution it would be better if we had a place distinct to ourselves, for indeed if a party of boys are sent to work at anything on Cockatoo Island it is almost impossible to keep them quite clear from coming in contact with dock labourers and others not connected with this Institution, over whom we have no control, from whom they hear most filthy and shocking expressions. Dock labourers are proverbially noted for having their conversation interlarded with frightful oaths and obscene expressions. If any of our boys make use of language of this description they are punished. I therefore think they should be removed from coming in contact with such demoralizing examples. On the whole, notwithstanding the many disadvantages, this Institution is doing a vast amount of good to the destitute and unfortunate children that pass through it, and I think the before-mentioned extracts from some of their masters will bear out this statement; but a greater amount of good might be done if we had a more efficient number of men to instruct them. We should at least have two more seamen, that the boys may at all times have an instructor with them. As we are now, if a man falls ill the others have to do double work and the children necessarily suffer for the want of proper supervision and instruction. Again, if the three seamen are required to work at the rigging, the children have to be put to some work not of much use, to keep them quiet and in order, whereas if we had two other men they could be put to the ordinary routine work.

I do not think of any further suggestions to offer just now, otherwise than to refer you to my former reports.

I have, &c.,  
J. S. V. MEIN.

The Gardener to The Superintendent, N. S. S. "Vernon."

Cockatoo Island,  
17 June, 1873.

Sir,

I beg to hand you the following report of the gardens under my charge: The last twelve months has been very favourable for light soils, having had a good deal of rain during the summer. I have been enabled to fully supply the ship with all kinds of vegetables in excellent condition; the most of the gardens are under crop at the present time, and are offering to be very productive, as they are looking strong and healthy.

The gardens on the south side of the Island are now being put under root crops, such as turnips, parsnips, carrots, and onions. The gardens that are lower down (that is Johnson's gardens as we call them) I have cropped with lucerne as in those gardens the vegetables are stolen by wholesale, and puts me to great inconvenience. Sometimes a crop disappears in one night, such as turnips, broad-beans, cabbages, cauliflowers, and onions. I have known a whole crop of beans disappear in one night, and I have known 160 full grown store onions disappear in the same space of time. Indeed, all my watching cannot save them, and I have been obliged to sow some of the ground with fodder for the cows.

On the other side of the Island, that is, on the north side, I do not suffer from such depredations. The middle garden that was cropped with *Sorghum saccharatum* last spring has done well and is a very excellent feed for milch cows during the hot days of summer. I have cut it twice, and some of the first sowings three times.

The boys that have been under my charge work very well, are tractable and obedient, and as I am with them the whole of the time that is allotted for working hours, I can watch them pretty correctly, and act accordingly.

The trees that we planted last season have done well,—most of the "ficus" first rate; having made a shoot between two and three feet, all have done well from the jetty to the steamer's wharf, but on the dock side the fence got knocked down, and the cattle got in, and eat the heads off some of the trees, but they are all breaking again.

I have, &c.,  
JAMES DUNCAN,  
Gardener.

1873-4.

## NEW SOUTH WALES.

## HOSPITAL FOR THE INSANE, GLADESVILLE.

(REPORT FOR THE YEAR 1873.)

Presented to both Houses of Parliament, by Command.

THE MEDICAL SUPERINTENDENT OF THE HOSPITAL FOR THE INSANE, GLADESVILLE, to THE COLONIAL SECRETARY.

Lunacy Department,  
Hospital for the Insane, Gladesville,  
30 March, 1874.

SIR,

I have the honor to submit the Report of the Hospital for the Insane, Gladesville, for the year 1873, with the usual Statistical Tables.

On December 31st, 1872, the number of patients in hospital was 474, of whom 215 were males and 259 females.

The admissions during the year have been 189 males and 107 females—a total of 296.

The total number under care during the year was 770—404 males and 366 females—and the average daily number resident was 525. The number discharged was 179, of whom 100 had recovered, 22 were relieved, and 57 were forwarded to other institutions for the insane as “not improved.”

The deaths during the year were males 20, females 10—a total of 30.

The number of patients in hospital on December 31st, 1873, was males, 267, females, 294. Total, 561; showing an increase during the year of 87.

These results are summed up in Appendix A, table 1.

The admissions during the year have been more numerous than during any previous year in the history of the institution, and are in excess of those during the year 1872 at any of the English Asylums, with the exception of those for the populous Counties of Middlesex, Lancashire, Yorkshire, and Kent. The reception and classification of this number of patients has in itself involved a very large amount of trouble and anxiety.

It has for a long time been a matter of observation that a very large proportion of the cases coming from the up-country districts do not reach the hospital until the malady has existed for such a time as to leave little hope of recovery. In a certain number of the cases the mental aberration does not appear to have been recognized in its early stages, the patients leading very often a solitary life, and having few social or family relations. Even after the insanity has become so declared as to bring the patients under supervision or confinement, weeks and months elapse before they are sent to hospital. In the meantime they are, owing to difficulties as regards conveyance and escort, kept in the up-country gaols, under circumstances and with surroundings which are decidedly antagonistic to mental restoration. A few of the milder cases recover, but the greater number come to Gladesville incurable.

The patients from Sydney and the immediate neighbourhood are generally of a more hopeful class, but even these, owing to defects in the Lunacy statutes, are some days or weeks before reaching the hospital, and the chance of early, continued, and systematic treatment, at the time it is most likely to be of service, is lost.

The character of the cases admitted during the past year has been, from causes of which I am not cognizant, singularly unfavourable. Of the total number of 296, 25 were epileptics, 17 were idiotic or congenitally imbecile, 16 were suffering from general and 3 from special forms of paralysis, and 20 were upwards of 60 years of age. In addition to this, in 49 cases the disease had existed upwards of a year, and in 18 there was very pronounced hereditary tendency. All these, with an occasional exception, might have been pronounced hopeless when admitted. The cases received within three months of the outbreak of the disease were 47 only.

The number of re-admissions during the year is a large one, but as previously pointed out it is drawn from the discharges of many former years, the institution having now entered on the thirty-fifth year of its existence. A considerable proportion of the cases had been discharged to the care of friends as still insane,—the present Lunacy statutes not permitting absence on trial,—and others were transfers or re-transfers from other institutions.

In the relapsed cases the average time of absence from the hospital was two (2) years and eleven (11) months.

Of the admissions, 190, or about two-thirds of the total number, came to the hospital through the Reception House,—the larger number having spent some days in that institution, and the remainder having stayed there for one or two nights on their journey from Newcastle, Maitland, Wollongong, or some other out-lying districts. The total number of admissions to the Reception House was 214, and of these 8 were discharged recovered—11 to the care of friends; and 5 remained on December 31, 1878.

By a reference to table 11 it will be seen that the number of native born among the admissions is becoming gradually larger, but the majority are still drawn from the United Kingdom.

As to the causes of insanity I have but little to add to opinions expressed in former reports.

In the Appendix, table X, will be found a succinct statement of the causes, apparent or assigned, of the malady in the admissions, discharges, and deaths during the year. Considerable care has been taken in the preparation of this table, and in many cases, information has been specially obtained to supplement or correct the vague or peculiar statements sent with patients.\* It must, however, be received as only an approximation to the truth; because, in many cases trustworthy information was unattainable whilst in others it was purposely withheld or falsified; and because the causation of insanity is often beyond the reach of ordinary observation, can seldom be packed into a word or sentence, and is due in many cases to a lowering in the mental and bodily vigour, or a change in mental directness which has gone on for generations. The exciting and apparent cause, the last strain which has weighed down the mind, would have been powerless in a healthy organism, or even in one without a strong predisposition in this direction.

As will be seen from this table—confessedly imperfect and inaccurate, but still far removed from the stigma of being a “tabulated falsehood”—the most powerful causes in the production of insanity in this Colony during the past year have been *mental anxiety, isolation, hereditary taint, congenital mischief, intemperance, sunstroke, injury to the head, epilepsy, fever ill-health and destitution, and old age.*

By *mental anxiety* is meant as a rule all the worries and struggles of life, the cares which far more than work disarrange and put out of tune the many strings which go to make up the instrument of the mind. No stronger proof of the power of the cause in the production of insanity can be adduced than the enormous increase of insanity in the Negroes in the Southern States of America since the abolition of slavery. The number of insane Negroes in the Northern or free States has always been considerable, and such as to excite the astonishment of those living in the slave States where insanity among the negroes was almost unknown. Dr. Green, superintendent of the State Asylum of Georgia, after a most careful inquiry, conducted with a view to make provision for their care, failed in 1851 to find more than forty out of a population of 400,000; whilst in 1873, with a population which had not increased, the number was estimated at upwards of 300—100 of whom were under treatment, whilst 200 further applications for admission were on record. In the State of Virginia, prior to emancipation, Dr. Stebbing reports that there were at no time more than forty under care out of a population of 400,000, whilst at the present time—the coloured population having somewhat diminished in numbers—the number in the Richmond Asylum is 200, and 300 more are said to exist in the State.

The opinion of American psychologists is that the striking increase is due in great part to the anxieties of life. Their wants in childhood, manhood, and old age, in sickness and in health, were formerly supplied by their owners. They are now left to their own resources for food and raiment, for all the comforts and necessaries of life, and for attention and care during sickness.

*Isolation*—on which I especially remarked in the Annual Report for the year 1871—again figures as a large factor of insanity in this Colony. By isolation is meant not only the lonely life of the shepherd, and the isolation of homesteads far in the bush and from which the husband is often absent, but the isolation from family ties, from friendship, and from the closer and better feelings of sympathy, which is experienced not only by the mining and labouring populations in up-country districts, but even by the dwellers in our towns. It is most painful to notice the number of utterly friendless people who come into this institution in the course of a year; the number who have no relatives nearer than the old country, no family ties in this, no settled home, and no permanent interest. The class is peculiar, and the form of insanity bred of much introspection, suspicion, and selfishness, is almost distinctive.

*Hereditary taint* is only given as a separate cause in cases where the immediate or exciting cause is not known, but the number tabulated under this head is still a large one, and together with the cases arising from *congenital mischief* make up a total of thirty-three during the year. This, however, does not represent one-third of the cases due more or less to hereditary influence, and every year serves only to strengthen a belief—in holding which I am by no means singular—that a large part of the insanity which now burdens our asylums is due to moral and physical causes, generally of a debilitating kind, acting through several generations; and that in no small number of cases the immediate progenitors of our patients were people whose mental energies had been sapped and whose brains had been damaged.

The increase of insanity from distinctly hereditary causes, even if such increase is not greatly out of proportion to the population, is a question of the gravest consideration. The Inspectors of Asylums in Ireland in their elaborate report for the year 1872, after pointing out that there is now quite as large, if not a larger, aggregate of insanity among a population of little more than five millions as there was in the year 1864, when the population was over six millions, go on to remark that “in reference to the future a grave question arises as to the result which might ensue from a restricted intellectual development of a country through the spread of insanity, for it is idle to disguise the fact that it is an affection of progressive tendency, and to no inconsiderable extent, through imbecile females, particularly in the humbler classes of society.” And a thoughtful writer,† in an essay on the “Non-survival of the Fittest,” has pointed out the downward tendency, both as to mental and physical status of our home population, as the indisputable effect of the state of social progress reached. “With us” he writes “thousands with tainted constitutions, frames weakened by malady or waste, brains bearing subtle and hereditary mischief in their recesses, are suffered to transmit their terrible inheritance of evil to other generations, and to spread it through

\* The causes given in the papers sent with patients vary considerably, and range from those as definite as “fall from a window on the head,” “loss of sight,” “an unexpected legacy,” “one of the Revd. Mr. ———’s alarming sermons,” and “three glasses of rum”—to vague statements as “fright,” “grief,” “cold,” “excitement,” and “jealousy.”

† W. R. Gregg. *Enigmas of Life.*

through a whole community." "Whilst the prudent and the resolute, those with the soundest constitutions and the most resourceful minds—those most qualified and deserving to continue the race—are precisely those who do so in the scantiest manner."

At this time there are in hospital two out of five brothers, who have at various times been inmates, and whose mother died in the institution; a brother, sister, and two children of the former; a brother and two sisters; a brother and sister, and, seven pairs of sisters, besides a number of other patients whose near relatives have been formerly inmates, or are now in the Parramatta, Newcastle, or other Asylums.

*Intemperance* is stated as the cause in seventeen of the cases admitted during the year, and I believe that this fairly represents the number of cases due to alcoholic drink as an immediate and exciting cause. It must be remembered however that intemperance is a pre-disposing cause in a number of the hereditary and congenital cases, and that many, if not all, of the milder cases of insanity directly excited by alcohol or its compounds do not reach the hospital, but recover before being sent. In many of the cases in which alcoholic drink is an exciting cause of insanity, I am convinced that the mischief is due to the quality rather than the quantity taken, and as Dr. Paley\* has pointed out, it is a significant fact that few concerned in the sale of intoxicating drinks become insane. During the past five years, from 1869 to 1873, inclusive, out of a total number of 1,256 admissions in this institution, seven only had been connected with the sale of intoxicating liquors.

Twenty cases among the gross admissions were attributed to *sunstroke*, and although some of these were no doubt due to a combination of causes of which the sun or heat was one, still there is abundant evidence to show that heat or sunstroke is a fertile source of cerebral mischief in this Colony, and that the population generally are by no means sufficiently careful to avoid undue exposure. The enormous power of the sun's rays is well shown by the observations recorded daily at the Observatory by Mr. Russell, the Government Astronomer. The thermometer with a black bulb in a black box with a glass top, by which the whole of the sun's rays are collected, frequently reaches the boiling point. The sun's heat actually burst one thermometer made expressly for the work, and recorded to 234° 5; a temperature of 237° 2 has been recorded with another.

*Injury to the head* is said to have been the cause in thirteen cases, but in very few did the insanity follow closely upon the accident. It is, however, in cases where injury to the brain has been received that causes of insanity, otherwise powerless, are sufficient to light up the mischief, and in which intemperance and exposure to heat should expressly be avoided.

To *epilepsy* twenty cases are attributed, and it is sad to think that all these go to swell the large number of cases in which some alleviation is all that can be hoped for. In the population in the asylums in this Colony on the 31st December, 1873, eighty males and forty-two females were epileptics (a total of 122), forming a per centage of 7·99, or 1 in every 12·5 patients.

The number of cases attributed to *fever, ill-health, and destitution* was twenty-five, and the failure consequent on *old age*, contributed fourteen as its quota.

The discharges include 100 who had recovered, giving a per centage on the admissions of 33·78, a result less satisfactory than that for the preceding year. For the first time for five years the proportion of recoveries among the female patients has been less than among the males.

The per centage of recoveries for the last five years has been as follows:—

1869	...	...	...	...	...	40·36
1870	...	...	...	...	...	38·57
1871	...	...	...	...	...	33·57
1872	...	...	...	...	...	44·44
1873	...	...	...	...	...	33·78
				Average	...	38·14

This average compares favourably with the recoveries in the English asylums during the five years ending December, 1872, up to which date returns have been received; the proportion being 33·80 on the numbers admitted. It is only fair to remark also, that owing to the large numbers of admissions and the consequent over-crowding, it has been necessary to transfer as many quiet patients as possible to other institutions. During the past four years, 474 patients have been forwarded to Parramatta, and of these such a proportion were curable as would have materially raised the proportion of recoveries had they remained in this institution until they got well.

The discharges to the care of friends have as in former years been few—no alterations have been made in the Lunacy statutes, which will permit of absence on trial; and the regulations bearing date 17th July, 1869, and intended to facilitate the discharge of harmless patients, have proved altogether a failure.

Of the number discharged "not improved" forty-seven were sent to the Lunatic Asylum at Parramatta, six to the Asylum for Imbeciles at Newcastle (the patients in which have as a rule been first admitted here and passed a probationary period), and four to the licensed House for Lunatics at Cook's River.

The deaths during the year show a per centage of 5·71 on the average number resident; and to show that this per centage is not due to the transfer of the more feeble and sickly patients it may be advisable to state that the death-rate at the Parramatta Asylum, to which the majority of the patients were transferred, was below that in this institution; and that the death-rate for the whole of the asylums has been during the past year only 6·85 per cent. on the average number resident.

The average proportion of deaths in English asylums for the last fourteen years has been 10·24 per cent.

The comparatively low rate of mortality among the insane in this Colony (in itself satisfactory, although it assists in swelling the number to be maintained) is, I believe, mainly due to the mild climate. Cold acts most injuriously on the insane, many of whom have feeble circulations, whilst others unwittingly expose themselves, both by day and night, to its influence. The causes of death are shown in Appendix—table V. Inquests were held in two cases, in which the decease was sudden. In both death was due to apoplectic seizure.

The

\* Report on Lunatic Asylums. Victoria, 1870-71.

The general health of the patients has not been satisfactory, although the average number confined to bed has been small. Epidemics of diarrhoea have been frequent; idiopathic erysipelas appeared in an epidemic form in the female division, and was very troublesome; and throughout the year there have been numbers of cases of purpura, due mainly to the vitiated atmosphere of the overcrowded dormitories, requiring not only medical treatment but a large amount of extra diet and stimulants.

At the close of the year 1872 there were 474 patients in hospital, and these served to fill every single room, and to crowd every associated dormitory far beyond what was compatible with health and comfort. At the close of the year 1873 the number had increased by eighty-seven; every corridor and passage had been filled with beds; the rooms set apart for reading, amusement, and divine service had been occupied as dormitories, and there was no possibility of transfer to other institutions, since both the Parramatta and Newcastle Asylums contained the full number of patients, which could be accommodated with safety. No one without being intimately acquainted with asylum management can imagine the difficulties, the dangers, the relaxation of order and discipline, caused by overcrowding; and it is only persons who have been in charge of institutions of this character, who can understand how disheartening it is to a Superintendent to see his means of restoration and cure gradually curtailed, until he is left with little or no resources beyond food and physic. The overcrowding during the present year has not only taxed the energies of the officers and staff to the utmost but has seriously interfered with the comfort, the health, and the recovery of the inmates.

The following resolutions bearing on the question of the overcrowding of Hospitals for the Insane were passed at a meeting of the Medical Superintendents of American Institutions for the Insane, held early in the year 1873, and have been forwarded to me by the Secretary:—

“Resolved,—That this Association regards the custom of admitting a greater number of patients than the buildings can properly accommodate, which is now becoming so common in Hospitals for the Insane in nearly every section of the country, as an evil of great magnitude, productive of extraordinary dangers, subversive of the good order, perfect discipline, and greatest usefulness of these institutions, and of the best interests of the insane.”

“Resolved,—That this Association having repeatedly affirmed its well-matured convictions of the humanity, expediency, and economy of every State making ample provision for all its insane, regards it as an important means of effecting this object, that these institutions should be kept in the highest state of efficiency, and the difference in condition of patients treated in them, and those kept in alms-houses, gaols, or even private houses, be thus most clearly demonstrated.”

“Resolved,—That while fully recognizing the great suffering and serious loss that must result to individuals by their exclusion from hospitals when labouring under an attack of insanity, this Association fully believes that the greatest good will result to the largest number, and at the earliest day, by the adoption of the course now indicated.”

“Resolved,—That the Boards of Management of the different hospitals on this Continent be urged most earnestly to adopt such measures as will effectually prevent more patients being admitted into their respective institutions than, in the opinion of their Superintendents, can be treated with the greatest efficiency, and without impairing the welfare of their fellow-sufferers.”

“Resolved,—That the Secretary be instructed to furnish a copy of these resolutions to the Boards of Management of the different Hospitals for the Insane in the United States and the British provinces.”

The increase in the number of insane persons under care in this Colony, during the past two years, has been 139. All these have been received into the old buildings, and during this period no additional accommodation has been provided. The increment of another year in the same ratio will render the existing institutions perfectly unmanageable unless additional accommodation is afforded.

It is with great satisfaction that I have learned that the Government has purchased a site for a new hospital. The estate at Callan Park possesses many of the requisites for the site of such an institution. Its proximity to Sydney, its ready accessibility both by land and water, the fine and varied view to be obtained from it, and the facilities for water supply and drainage are all great advantages, and the main drawback, that the quantity of good and cultivated land is small, is perhaps less important when the character of the population for whom the new hospital is destined, that drawn largely from Sydney and neighbouring towns, and unused to agricultural avocations, is considered.

I trust that before very long a hospital on the most modern principles, thoroughly substantial in structure, possessing every requisite for the successful treatment of insanity, and every means of economising labour and expense, will be erected; but I would deprecate all expenditure in mere architecture or ornamentation. “Such a house of refuge from sorrow and disease cannot be too quiet and unpretending in its externals,” and a “staring structure of gaudy Gothic or Lombardo Venetian is a painful burlesque on the pain and suffering within its walls, and on the care fretting those whom business brings to its gates.”\*

The efforts of the Government for the amelioration of the condition of the insane by the provision of adequate accommodation should not, however, be limited to the establishment of a new metropolitan hospital which the increase of a few years will suffice to fill almost as soon as it is completed. In my Report on Asylums in the year 1863 I strongly recommended the establishment also of institutions for the insane in some of the towns in the interior, and the experience of the past five years has only served to strengthen me in the opinions then expressed.

The following table, showing the number of insane in this Colony, and the proportion to population in each year since 1863, and further, the proportion in England and in the neighbouring Colony of Victoria, is interesting as showing that although the number of insane in New South Wales has increased at the rate of about fifty-four annually, the proportion to population has not very greatly risen, and is not now greater than in Victoria and in the United Kingdom.

\* On a Middle Class Asylum in Sussex. By C. L. Robertson, M.D.

Year.	Population of New South Wales.	Total number of Insane in New South Wales on 31st December.	Proportion of Insane to population in New South Wales.	Proportion of Insane to population in Victoria.	Proportion of Insane to population in England.
1863	378,034	931	1 in 407	1 in 670	1 in 464
1864	392,589	984	" 399	" 604	" 457

1866	431,412	1114	" 387	" 541	" 436
1867	447,620	1155	" 387	" 515	" 424
1868	466,765	1230	" 379	" 439	" 411
1869	485,356	1226	" 395	" 416	" 403
1870	502,861	1289	" 389	" 392	" 400
1871	519,182	1387	" 374	" 369	" 394
1872	539,190	1440	" 374	" 310	" 387
1873	560,275	1526	" 367		

The proportion of insane to population in Ireland on December 31st, 1872, was 1 in 297, and the proportion for the three kingdoms at that date (the latest for which returns have been received) was 1 in 340.

The total number of insane persons under official cognizance on December 31st, 1873, was distributed as follows:—

	Males.	Females.	Total.
In Hospital for the Insane, Gladesville ... ..	267	294	561
Lunatic Asylum, Parramatta ... ..	499	205	704
{ Free ... ..	29	7	36*
{ Convict ... ..	42	3	45†
{ Criminal... ..	100	32	132
Asylum for Imbeciles, &c., Newcastle ... ..	5	43	48‡
Licensed House for Lunatics, Cook's River... ..			
Total ... ..	942	584	1,526
Total number on December 31, 1872... ..	894	546	1,440
Increase during the year ... ..	48	38	86

A few insane persons live with friends, and are maintained from private resources. The number of these cannot be ascertained, but there is reason to think that they are fewer in proportion to population than those similarly situated in Great Britain.

In the middle of the year contracts were taken, through the Colonial Architect's Department, for building the new laundry, kitchen, and store, which have been so long and so urgently required. The works are still in progress, and are not likely to be completed for some months. Various minor alterations and repairs have been completed, and the main building is now in good repair throughout. The stables and out-houses, built of wood many years ago, are, however, in a ruinous condition and require renewal. Extra rooms for picking hair, mattressing beds, &c., are much needed, some additions are required at the engine-house, and cottages are necessary for the gatekeeper, engineer, and chief attendant, who should be, but are not now resident, and whose absence from the institution is a frequent inconvenience.

Care has been taken that the services of both the Protestant and Roman Catholic Churches should be conducted every Sunday with all decorum and solemnity. A large number of the patients are always present, and form an attentive and appreciative congregation. In many minds, far alienated on other subjects, religious impressions still remain, and I have for a long time remarked that on Sundays the patients are throughout the hospital more quiet and orderly than at other times. The convalescent often regard the religious services as the greatest boon, and ask and receive permission to attend long before they are fit subjects for a return to the active duties of life. The chaplains have not confined their attention to the Sunday services, but have frequently visited the hospital at other times, and have been prompt to answer every call for their services. During the year we have had to regret the death of the Rev. Charles Archdall, who continued to attend at the hospital when too ill to undertake other duty, and who took the deepest interest in the welfare of its inmates.

By means of the annual vote for the purpose, by gifts placed in my hands to supplement the amount granted by Parliament, and by the personal assistance of many kind friends, the amusements have been as frequent and varied as in former years, and have been most beneficial in promoting the contentment, the happiness, and the recovery of the patients. Towards the close of the year, however, the overcrowding of the hospital seriously infringed on the rooms used for this purpose, and the continuance of associated amusements will soon be only possible by such arrangements as will disturb the order of the establishment and sacrifice the comfort of the patients.

In the course of the year the Morton Amateur Dramatic Society gave a most amusing performance at the Hospital. Mr. Newman, Mr. Craven, and Mr. Webster, with a party of ladies, gave an excellent concert, in which the operetta of Box and Cox was performed. The Hunter's Hill Mutual Improvement Society, Mr. Delaney, Miss Clara Lee, Mr. Packer, Mr. Hazeland, Mr. Blanchard, and others have at various times assisted at musical and other entertainments. Messrs. Lees and Webster have again given a sleight-of-hand and musical performance. Mr. Alfred Cane and Mr. Beaver have rendered kindly help with our magic lanterns, and to the former and the Messrs. Flavell I am indebted for the loan, on several occasions, of magic lantern slides.

The

\* British convicts still at the charge of the Imperial Treasury.

† Confined under Criminal Lunacy Act, 24 Vict. No. 19, N.S.W.

‡ Thirty-two of these are maintained at the public expense.

The proprietors of the Australian School Review, Burrangong Argus, Bathurst Free Press, Bathurst Times, Clarence and Richmond Examiner, Deniliquin Chronicle, Dubbo Dispatch, Goulburn Herald and Chronicle, Grafton Observer, Illawarra Mercury, Kiama Independent, Maitland Mercury, Monaro Mercury, Newcastle Chronicle, Queanbeyan Age, Social Reformer, Southern Argus, Wagga Wagga Express, Wagga Wagga Advertiser, Western Examiner, Western Post, and Yass Courier, have, as in former years, forwarded to me, free of charge, a copy of every issue for the use of the patients, and I cannot too warmly thank them for their thoughtful generosity.

Mr. Moore, of the Botanic Gardens, has given me a number of young trees and shrubs. The Board of Management of the Asylums for the Infirm and Destitute have passed on to me, through Mr. Frederic King, 100 volumes of library books; Mr. William Buchanan, of the General Post Office, has given me a large quantity of unclaimed newspapers; and the Directors of the Sydney Infirmary very courteously supplied me with samples of wine and brandy.

To Mrs. Isler I am indebted for a large quantity of fruit, for a number of books, and for the use of a paddock for cricket and other games; and from Mrs. Darvall, who has always taken a warm interest in the welfare of the institution, I have received several cart-loads of oranges and other fruits on Her Majesty's Birthday and other occasions.

I have also received the following gifts during the year, and beg to record my appreciation of the kindness of the donors:—Mrs. D. G. M., 35 guineas; a Near Neighbour, as a Christmas Box, £10; Mr. J. Stuart, 2 guineas; the Honorable Lady Robinson and Mrs. St. John, 2 kangaroos and a parrot; the Honorable H. Parkes, 2 emus, 2 kangaroos, a donkey, and a spur-winged plover; the Honorable Thomas Holt and the Honorable H. Parkes (conjointly), 3 llamas; Mr. T. Lee, a llama; Mr. Arthur Betts, 6 swans; Captain Truscott, 2 Island ducks; Mr. Samuel, game fowl; Mr. Cleaves, rabbits; Mr. Fullagher, flying-squirrel; Sir William Macarthur, case of plants; Mr. Thomas Salter, gold-fish and several packets of illustrated newspapers; Union Club, illustrated and other papers (monthly); Australian Club, illustrated and other papers (several packages); Mr. Ernest O. Smith, illustrated papers (monthly); Mr. Justice Hargrave, illustrated papers; Mrs. and Miss West, dolls, books, &c.; Lady Stephen, Mrs. Edye Manning, Mrs. J. C. Taylor, Mrs. Charles Smith, Mrs. M'Carthy, Mrs. Charles Thorne, and Mrs. John Hughes, large parcels of illustrated papers; Mr. John Fairfax, a large case of magazines, &c.; Mr. C. Wilson, bound volumes of the British Workman, Sunday at Home, Leisure Hour, and copies of every issue of the Sydney Mail and Punch; Mr. J. Clark, illustrated papers and magazines; Mr. George Barney, illustrated papers; Mr. Sloper Cox, magazines, &c.; Mr. Thomas Walker, magazines, books, &c.; Mr. Thomas Hodgson, Mr. J. Stuart, Mr. T. Small, Mr. Howard Reed, Mr. Ritchie, Mr. Henry Wager, Mr. F. Tooth, and Mr. H. Cornwell, illustrated and other papers; Mr. W. M'Donnell, the Athenæum for two years; Anonymous illustrated papers, several packages.

From the staff of the hospital generally I have received the most loyal and efficient support. The officers, attendants, and nurses have on several occasions voluntarily undertaken extra duty, with a view of sparing me anxiety and trouble, and Dr. Joseph and Mr. Betts, my more immediate collaborators, have spared no pains to lighten my labours, and to carry out the great objects of the institution.

At the close of the year Mrs. Jane Manson, to my exceeding regret, resigned the office of Matron, which she had held for a period of twenty-five years. During all this long period no suicide and no fatal accident had taken place in the division of the hospital under her supervision, a fact, I believe, almost unparalleled in the history of an institution of this character. My predecessor, Dr. Campbell, has borne testimony to her services by writing of her as "one of the most faithful, constant, and useful officers that ever served a Government." His testimony I most cordially endorse.

I desire very gratefully to acknowledge the promptness with which all my recommendations for expenditure within the limit of the vote for the institution have been acceded to during the past year; and I have pleasure in stating that whilst the authorized expenditure has been liberal, the maintenance rate has, notwithstanding the general increase in prices, been lower than during the preceding year.

I have, &c.,

F. NORTON MANNING, M.D.,  
Medical Superintendent.

## APPENDIX.

THE tables in this Appendix consist of,—(1st) those recommended by the Medico-Psychological Association for general use in Institutions for the insane, and approved by the English Commissioners in Lunacy; (2nd) those having a domestic character, or a more immediately local interest. The revised series of statistical tables, recommended by the Medico-Psychological Association, and which have been already adopted in most of the English and Scottish, and in some Colonial Institutions, are ten in number. They are confined to medical statistics, and include the main and more important facts required for statistical comparison.

Table I gives the number of admissions, readmissions, discharges, and deaths, with the average numbers resident during the year, the sexes being distinguished under each head.

Table II gives the same results for the entire period the Asylum has been in operation.

Table III furnishes a history of the yearly results of treatment since the opening of the asylum.

The table also embraces a column for the mean population or average numbers resident in each year. In other columns are shown for each year the proportion of recoveries calculated on the admissions, and the mean annual mortality, or the proportion of deaths, calculated on the average numbers resident. It is of the first importance that these two principal results under asylum treatment, when given, should be calculated on a uniform plan, and according to the methods here pointed out.

Table IV gives a history of each year's admissions: how many, for example, of the patients admitted (say) in 1855 have been discharged as cured, how many have died, and how many remained in the asylum in 1865.

The value of this table, in regard to the vexed question of the increase of insanity, is evident. The table is adopted from the Somerset Asylum Reports.

Table V shows the causes of deaths, classified under appropriate heads. This form is adopted from the Reports of the Commissioners in Lunacy for Scotland, with some addition and modification. It appears sufficiently detailed for statistical purposes.

Table VI gives the length of residence in the Asylum of those discharged recovered and of those who died during the year.

Table VII shows the duration of the disorder on admission, in the admissions, discharges, and deaths of each year, according to the four classes recommended by Dr. Thurnam in his work on the Statistics of Insanity.

Table VIII shows the ages of the admissions, discharges, and deaths of each year, in quinquennial periods.

Table IX shows the condition, in reference to marriage, of the admissions, discharges, and deaths of the year.

Table X shows the causes, apparent or assigned, of the disorder, in the admissions, discharges, and deaths of the year.

As stated in my Report for the year 1869, in which the first six of the tables were given, it has been found impossible, owing to the form in which the records of this Institution have been kept, to make the returns retrospective, without an amount of labour altogether out of proportion to the value of the result. The statistics therefore commence with the year 1869.

1873.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## TREATMENT OF CRIMINAL LUNATICS.

(REPORT ON.)

*Ordered by the Legislative Assembly to be printed, 23 October, 1873.*

THE PRESIDENT OF THE BOARD OF VISITORS TO THE PRINCIPAL UNDER SECRETARY.

Medical Adviser's Office,  
8 September, 1873.

SIR,

On many occasions the Board of Visitors have in letters drawn the attention of the Honorable the Colonial Secretary to the state of the buildings at the Parramatta Lunatic Asylum, and to circumstances connected with Queen's-pleasure men and criminal lunatics.

In July, 1870, a deputation waited on the Colonial Secretary, urging the necessity for great additions and alterations for the accommodation of the insane. The Government being aware of the want of proper accommodation, and having the erection of buildings to afford it under consideration, it has not been thought proper to repeat these representations frequently, yet the necessity became so pressing that in July, 1873, a letter was addressed calling the attention of the Government to the bad effects of the yearly increase of patients, and the necessity for immediate action.

The Board have recently received from Mr. Alfred Roberts a communication, a copy of which is enclosed for perusal, containing observations made during his recent visit to Europe, particularly with reference to Broadmoor and Dunderum Asylums, and on the treatment of criminal lunatics. This communication was read by the Board with great interest, containing as it does the account of the course pursued at Broadmoor, from the reports of that institution. The observations of Mr. Roberts on the Asylums at Broadmoor and Dunderum are particularly valuable to the Board, as he is aware of the defects at Parramatta, which it has been our endeavour to see remedied. Appendix  
marked A.

In England the criminal lunatics, before being sent to an asylum, are sent to Millbank, and detained there for observation for three months, and if insane, forwarded to Broadmoor. In this Colony, criminal lunatics are sent either to Darlinghurst or to Parramatta Gaols. Since 1871, they have been examined by a Board appointed for that purpose, and if reported as insane by that Board are forwarded to the Parramatta Asylum. The establishment of this Board has been of great benefit; feigning has been much checked, the admissions from the gaols to Parramatta are fewer, and the attempts at combination that did take place are, I believe, at an end. This plan should be continued, but it would be desirable to have one rather than two gaols for observation. The next point is the treatment of criminal lunatics in an asylum. It is quite right that in asylums criminals should be treated as patients; beyond the safety of retention the whole treatment should be to restore the patient if possible to sanity, without any reference to punishment for crime. There is one class of patients in asylums (Queen's-pleasure men) who although they may require treatment as patients, it must be remembered, may be of unblemished character—perhaps of refined habits, but who must be kept for observation after the recovery of their senses, as in cases when murder has been committed.

These people should be quite separate from the criminal class, and everything done for their well-being consistent with safe custody.

With regard to the discharge of criminal lunatics: in England, when sane, they are discharged on certificate to the gaol from which they came; if they remain insane after the period for which they are sentenced has expired, they are moved from Broadmoor Asylum to the Lunatic Asylum of the county to which they belong. In this Colony a patient can only be removed from the criminal yard to another part of the same asylum.

The discharge of the Queen's-pleasure men is not at all defined.

In England the course seems to be to discharge females who have committed murder during attacks of puerperal fever, after the age of child-bearing, if sane; in other cases, on special report; but when murder has been committed a long period of probation is required. It is most desirable that the Board of Visitors should be the persons to report upon the fitness for discharge of such persons.

Seeing the course pursued in the treatment of the insane at Broadmoor and Dundrum, it is necessary to annex an account of the state of accommodation at Parramatta, to show that in that Criminal Lunatic Asylum no such system can be carried out.

And, while entirely agreeing with the plan pursued in England, brought before us in Mr. Roberts's remarks, it being of the character we have hoped to see established here, it is only necessary to point to the state of the building at Parramatta to show the impossibility of doing so, and that that has alone prevented any proper system being adopted with the particular class of patients now referred to.

I have, &c.,  
E. S. P. BEDFORD,  
President of the Board of Visitors.

[Appendix marked A, referred to in letter of Board of Visitors, 8 September, 1873.]

Alfred Roberts, Esq., to The Board of Visitors of Lunatic Asylums, New South Wales.

Phillip-street, 28 July, 1873.

Gentlemen,

We have experienced so much anxiety in dealing generally with the question of criminal lunacy, as well as with individual cases of "Queen's pleasure-men," that I felt it my duty, during a recent visit to Europe, to examine the system which experience has developed in Great Britain.

Lord Belmore was kind enough to provide me with an official introduction to the Colonial Office, and I am much indebted to the very kind and courteous manner in which Mr. Herbert promoted my inquiries into this and other social questions. I first visited the Milbank Penitentiary, the system of which appears to be very efficiently carried out, as far as the somewhat ancient and limited nature of the accommodation permits.

I subsequently visited the Chatham Convict Prison, the Portsmouth Convict Prison, the Government Criminal Lunatic Asylum at Broadmoor, the Government Criminal Lunatic Asylum at Dublin (Dundrum), and a private Lunatic Asylum, at Bow, near London, where criminal lunatic soldiers are sent, who as a class are very dangerous.

Although my scheme of inquiry would have been imperfect without including the prisons alluded to, it will be unnecessary to make further mention of them in this report. For the same reason, I append reports of the Asylums of Broadmoor and Dundrum only, as they afford full special information upon the present system of managing criminal lunatics in Great Britain.

Upon the important question of the mode in which criminal lunatics are observed in Milbank Penitentiary should be dealt with, after the cure of their mental disease has been attained, I thought it desirable to obtain the necessary information in the form of official replies to questions. I append copies of the questions which the Governor and Surgeon of the Milbank Penitentiary and the Superintendent of the Broadmoor Asylum were good enough to permit me to put to them, with the replies thereto; also of a letter from the Superintendent of the Broadmoor Asylum, and one from Godfrey Lushington, Esq., to R. G. W. Herbert, Esq., the latter of whom was kind enough to submit a question referred by Mr. Orridge to the Secretary of State for the Home Department, to Mr. Lushington. Should my efforts tend in any degree to remove the difficulties hitherto surrounding this question in the Colony, and to harmonize the condition and fate of our patients in the Criminal Lunatic Asylum at Parramatta with the ends of humanity and justice, I shall be rewarded.

I have, &c.,  
ALFRED ROBERTS.

H. M. Convict Room,  
Milbank, July 31, 1872.

My dear Sir,

I have the pleasure to forward replies to your questions, which appear to include every point of importance.

Dr. Roberts.

I am, &c.,  
R. M.

*Question I:* Are all convicts under long sentences who are seized with symptoms of insanity, or who feign that disease, sent to the Milbank Penitentiary for observation: if not, what proportion of them? *Answer:* All are sent to Milbank, unless at once detected to be impostors.

*Question II:* For what period are they detained in the penitentiary after admission? *Answer:* This depends on the number of vacancies which occur from time to time at Broadmoor.

*Question III:* What are the comparative numbers of those detained for three, six, twelve, or twenty-four months respectively? *Answer:* About 5, 30, 40, and 15 per cent. respectively. The period would be much shorter if the accommodation at Broadmoor were sufficient.

*Question IV:* What is the shortest period which, in your opinion, it is safe to detain such persons, having in view the great desirability of a sound opinion being arrived at? *Answer:* On the average, three months.

*Question V:* What is the proportion of those who come under observation, and are proved to have feigned insanity? *Answer:* The number is very small,—less than 5 per cent.

*Question VI:* When such are returned to the prison from whence they came, are they specially punished? *Answer:* Yes, by loss of the whole or part of the remission of sentence to which they would otherwise be entitled.

*Question VII:* What is the proportion of those who, being sent for observation, are cured during the period of its continuance? *Answer:* About 5 per cent.

*Question VIII:* Are all cases proved by your observation to be insane sent to the Broadmoor Asylum if there is room in that institution? *Answer:* Yes.

*Question IX:* Do you endeavour to form so clear an opinion of all cases that, in the event of their return to prison, they may safely be treated strictly as convicts, or if sent to Broadmoor be detained as lunatics for life? *Answer:* Decidedly so, in every case.

*Question X:* Are convicts sent by you to Broadmoor as insane ever discharged from that asylum as cured or otherwise? *Answer:* Yes; those who are cured, if on the point of completing their sentence, are returned to Milbank for discharge, in order that they may be photographed, inspected by the Metropolitan Police, &c.; while those who continue of unsound mind are forwarded, on expiration of their sentences, to the counties to which they belong.

*Question XI:* What term of experience have you in the working of this department in the Milbank Penitentiary? *Answer:* twelve years.

*Question XII:* What is your opinion as to the necessity for and the advantages of this system? *Answer:* It simplifies and facilitates the proper management and disposal of mental cases, whether real or feigned.

*Question XIII:* Can you form any opinion as to whether the present system has tended to lessen the habit of feigning insanity? *Answer:* I am of opinion that it has done so, and there is no doubt that it has diminished the numbers of impostors sent to asylums.

*Question XIV:* Has the present system been one of gradual development or otherwise? *Answer:* Of gradual development.

Question

*Question XV:* Will you be kind enough to explain the details of the system as at present carried out at Milbank, specially as to the various forms of accommodation, means of observation, the special provisions to ensure safety and attain due knowledge of symptoms, diet, treatment? *Answer:* A prisoner sent for observation, as a rule, is, in the first instance, placed in an ordinary cell. If of suicidal tendency, he is placed in a strong cell or in association, according to the nature of the case. If, on the expiration of an interval, varying from one month to three months, he is found to be insane, he is certified, and removed at the first available opportunity to Broadmoor.

*Question XVI:* Will you be kind enough also to suggest what modifications you would propose if you had to establish a new place for the same purpose? *Answer:* I should compose a few cells provided with inspection apertures at different points, or other means, by which the whole of the cells could be commanded by the attendant on duty.

W. Orange, Esq., to A. Roberts, Esq.

Broadmoor Asylum,  
Wokingham, 11 October, 1872.

My dear Sir,

I now send answers to three of your questions, and, with reference to the fourth, as it is a matter which rests entirely in the discretion of the Secretary of State for the Home Department, I have thought it better to refer you to him. I may however say in this note, as expressing only my own private opinion, that I do not think that any inmate whom the Superintendent might believe to be perfectly cured, and not more than ordinarily liable to relapse, would be debarred from the hope of release sooner or later.

The circumstances usually taken into consideration are the previous history, whether the first attack or not. If not the first attack, whether in previous attacks the delusions or propensities have been dangerous.

If the insanity appears to have been due to intemperance, and a craving for drink still manifests itself from time to time, although the patient may be rational and free from delusions, he would scarcely be recommended for discharge if he had committed a grave offence, such as murder. Another question which is considered is, whether the patient whom it is proposed to discharge has any friends to take care of him or not. I may add, that every facility is afforded to the Superintendent for bringing to the notice of the Secretary of State the case of any patient whose discharge he may believe should be considered.

If I have left any point unanswered, I shall be happy to supply the deficiency if you will kindly write again.

Believe me, &c.,  
W. ORANGE,  
Broadmoor.

Broadmoor Criminal Lunatic Asylum,  
12 October, 1872.

*Question I:* What are the classes admitted into the Broadmoor Asylum? *Answer:* Criminal lunatics. This term is defined by the "Criminal Lunatics Act, 1867, 30 Vic., cap. 12, sec. 2.

*Question II:* Where do they come from, and under what certificates and authorities are they admitted? *Answer:* From all parts of England and Wales, and by the authority mentioned in the section of the Act above referred to.

*Question III:* Of those who have been tried for murder, and acquitted on the ground of insanity, are any discharged as cured; and if so, what proportion; under what circumstances; and by whose authority? *Answer:* Since the opening of the Asylum in 1863, 139 male and 75 female patients have been admitted, charged with murder; of these, 4 male and 15 female patients have been discharged. The following table shows the matter in detail:—

CHARGED WITH MURDER.

	Admitted.			Discharged as cured.			Died.			Remaining.		
	Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.
Found insane before trial, or on arraignment.....	48	26	74	...	4	4	6	5	11	42	17	59
Acquitted, on the ground of insanity	82	44	126	4	11	15	8	4	12	70	29	99
Convicted and sentenced, but certified to be insane after conviction..	9	5	14	...	...	...	1	2	3	8	3	11
Total .....	139	75	214	4	15	19	15	11	26	120	49	169

The discharges are much greater in proportion amongst the female than amongst the male patients, and this arises from the fact that the women charged with murder consist largely of persons who have taken the lives of their own children whilst suffering from puerperal mania, and from which condition recovery occurs in a large proportion of instances.

The fifth section of the Act above referred to renders it lawful for one of Her Majesty's Principal Secretaries of State to discharge any criminal lunatic.

*Question IV:* Is every patient believed by the Superintendent to be cured discharged; if not, what are the circumstances which guide the Government in the respective instances? *Answer:* This question, it is suggested, should be addressed to the Secretary of State for the Home Department.

21 October, 1872.

Dear Herbert,

The practice of the Home Office is to discharge Broadmoor prisoners who are reported cured, if there is no doubt that they were really insane when they committed the crime, and if there is good reason to expect that they are not likely to offend again under similar impulses. Much, therefore, must depend upon the circumstances of the particular case. Murderers, whose premature discharge would be especially dangerous to society, are not let out until after a long period of probation and they are considered perfectly safe.

Women who have committed infanticide (these form a large proportion of the prisoners) are detained till past the age of child-bearing.

Some, again, may be let out earlier than others, because assurance is given that they will be well taken care of by their friends.

I hope this will be sufficient for your purpose; if not, pray let me know.

Truly yours,  
GODFREY LUSHINGTON.

THE Criminal Asylum of England is situated at Broadmoor, and contained, in 1870, 463 male and female patients; in 1871 there were 456, and in 1872, the period of my visit, 494.

In respect to the class of patients as compared with those in the asylum at Dundrum, it has to be borne in mind that, whereas the latter receives all the lunatics of the criminal class, the former takes no case in which mental disease is not confirmed, or which has not been subjected to some months of close observation in one of the general convict prisons or in the special prison at Milbank; and further, as Broadmoor Asylum has not accommodation for all of these, the worst and most dangerous cases are selected from Milbank to be sent there, the others remaining in the lunacy department of the Milbank Penitentiary.

The

The following tables will supply all the statistical information which is necessary for the purpose of this report:—

	1870.	1871.	1872.
Admitted	45	25	79
Re-admitted after escape	3	...	2
Recovered and discharged	6	10	10
Removed to other asylums after expiration of sentence	12	10	15

The following extracts from the reports of the Commissioners for the years 1869-70-71-72, upon the points to which I have chiefly directed my attention, speak for themselves.

#### 1869.

The state in which we found the wards everywhere in regard to order and cleanliness was uniformly good, and though the painting noticed at the last visit as having been commenced in the blocks occupied by the less favourable class of patients has not been carried far in the way of cheerfulness, there is yet an improved aspect about these portions of the building; otherwise they remain, in structural defects, in scantiness of furniture and comfort, and in prison-like arrangements for their inmates, substantially the same as when objection was first made to them. They are a marked contrast to the other parts of the asylum.

Of the violent and even dangerous propensities of some of the patients placed in these wards and of the generally unfavourable character of the rest there is no doubt, but it is matter of the gravest doubt whether insane persons of the criminal class having this disposition should be treated differently from other patients suffering under mental disease.

The experience of the Commissioners has led them to the conclusion that patients of the most refractory class are amenable to the influences which by general consent are now employed in the treatment as well of the most acute as of the mildest forms of mental disorder; and that it is both expedient and safe to extend to them, under vigilant and incessant supervision, the same kind of advantages. If, indeed, the withholding of all indulgence were more likely than the concession of it to have a beneficial effect, there is nothing in the class of cases in this Asylum that should intercept on any ground of personal consideration or sympathy an application of the repressive system to the fullest extent; but in other times there has been sufficient trial of that system on all descriptions of patients, and in every conceivable state of circumstances, and it has uniformly failed as completely as the other has succeeded in a more or less degree. It has been found all but invariably that, by association with others,—by some occupation, as far as practicable,—by the prospect, from time to time, of some recreation or amusement,—above all, by regular daily out-door exercise, improvement has been made in habits the most inveterate and in the most evil dispositions. No attempts of the kind are now made at Broadmoor. If a patient exhibits violent conduct, he is for so many days, or portions of days, put into seclusion. If he is supposed to be, or has given proof of being dangerous, he is isolated altogether. To none set apart as refractory are the arrangements applied which make judicious and satisfactory provision for the bulk of the inmates by suitable accommodation and considerate treatment. The excepted class occupy cheerless rooms, have neither occupation nor amusement, are subject to the unrelieved and continued presence of gloomy and dispiriting influences, have no opportunity at any time of associating with patients in the other blocks, are confined for exercise to narrow airing courts within high walls, and in some six or seven instances marked out for special example even in the class they form part of, are required to take such exercise alone.

That this is not, in our opinion, an efficient way of dealing with mental disease, however complicated with criminal habits and even dangerous violence, we conceive it our duty once more to put on record.

#### 1870.

It will be remembered that, on the occasion of their last visit, the Commissioners commented in strong terms upon the system of treatment of the violent and refractory patients referred to, their frequent and prolonged seclusion or constant isolation, the cheerless character of their rooms, the absence of occupation or amusement, and their confinement for exercise to narrow airing courts with high walls. The condition of this class of patients has since been much improved.

In addition to other means of amusement, these patients are all now taken out twice a week to walk for two hours on the principal terrace, the inmates of No. 1 Tuesdays and Fridays, and of No. 2 Mondays and Thursdays, and no male patients are any longer restricted for exercise to their high-walled exercise courts.

In reference to the seven men specially noticed at the last visit as having been isolated for many months, rarely even walking, under the restrictions imposed, in the airing courts, we were glad to find five of them quiet, associated with others, and apparently contented. The other two were, at the time of our visit, secluded, one in a single room in block No. 1, and the other in the barred-off portion of a gallery in No. 6.

We regret that it has been deemed expedient since the last visit to bar off the end of a fourth gallery. These barred-off portions of galleries contain each some single rooms. The holes in the walls of a few single rooms in Blocks No. 1 and 6 are still considered by Dr. Meyer as required in some cases of very violent and dangerous patients, with a view to the protection of the attendants and in order to avoid personal conflicts. We cannot but think that this exceptional mode of treating even such patients is not only unnecessary, but calculated prejudicially to affect the relation between attendants and patients.

In the improved arrangements to which we have adverted for out-door exercise and recreation, of which the male patients generally, including the most untractable, violent, and dangerous, have now regularly the benefit, and in the consequent great diminution in the amount of seclusion in the male division, we recognize with satisfaction the adoption of the views and principles advocated from time to time by the Commissioners, and strongly expressed on the occasion of their last visit.

#### 1871.

It will thus be seen that the amount of seclusion in this Asylum still continues to be very large, but a careful examination of the returns shows that within the last four months the duration of the individual instances of seclusion has been generally reduced,—no instance of mechanical restraint is recorded in either division. It is satisfactory to find that the system formerly pursued of restricting the more violent and refractory patients for exercise to their high-walled gloomy airing courts has been discontinued, and during the past year all but one patient in No. 1 block have had the advantage of exercise beyond their precincts.

More attention seems to have been given to matters of amusement and recreation, and apparently the result has been beneficial to the patients. There have been cricket matches, in which as many as 111 patients have taken part, exhibitions in the hall, attended by both sexes, but where they were not present at the same time, and a flower show was held on the estate at which 120 men and thirty-five women were present.

A brass band, composed partly of patients and partly of attendants, plays once a week in each division.

Many of the wards have been repapered and painted, and the rooms thus rendered more cheerful and important.

Structural additions and improvements are in progress; new day rooms are being constructed in connection with the male blocks numbered 1, 3, and 4. The day rooms thus to be added to No. 1 block, in which the most refractory class are placed, will have a very important bearing on the accommodation now provided, as, instead of the windows opening upon the confined and gloomy airing courts, an extensive view over the country will be obtained. Blocks 3 and 4, which form the right and left wings of the main building, are being enlarged on each floor by the addition of spacious day rooms, projecting towards the south. These rooms are cheerful and well lighted; their use will allow of two of the existing apartments being appropriated for associated dormitories, whereby the total accommodation will be increased from eighty-six to 100 in each block.

No. 5 ward of No. 2 block, for women, is not in a satisfactory state; the patients were disorderly, and the aspect of the place cheerless, and the same changes are necessary here which have proved advantageous with a similar class in the male division. The attendance at divine service in the chapel is still very small, the number present last Sunday being only seventy-four men and twenty-nine women. There are in the Asylum eighty-five males and seven females who are Roman Catholics; of the former, twenty have attended mass.

The

The staff of attendants continues to be large, being in the male division in the proportion of two to eleven patients. The changes amongst them have been fewer than formerly, resulting, no doubt, from the continued efforts made to provide them with all reasonable comforts, and with various advantages when not on duty.

## 1872.

The comfort of the female infirmary has been considerably increased by fresh curtains and carpets, and the addition of a large fireplace.

There are now also enlarged means and opportunities for recreation; greater attention is given to that important subject; and there is better provision for out-door exercise for the inmates of the worst blocks. Many of the wards were in a most quiet and orderly state at the time of our visit, and this remark will apply to the most part of the female division. The exceptions on the male side, which were considerable and very strongly marked, will be better understood by the information supplied to us in the very carefully classified lists of patients subjected to seclusion since the last visit, still very large (notwithstanding the reductions effected in the last year or two) which we received from Dr. Orange; nor should the evidence thus presents, notwithstanding improvements lately effected of the continued troublesome and disorderly habits of a large part of the population of the Asylum, be unaccompanied by a mention of the fact that the medical staff, so essential for its adequate supervision, has been in an incomplete state during the greater portion of the last and a large part of the present year.

This peculiarity is to be noted,—that if the secluded patients are divided into the two classes of which the inmates generally of the Asylum consist, those, namely, who have been proved to be insane before or at the time of trial, and those who have been certified as insane while undergoing various terms of penal servitude, it will be found that, while thirty-one men of the first-named class have been secluded 372 times, sixty-eight men of the second class have been secluded 2,152 times, the instances being between nine and ten times as frequent in the second class as in the first; and applying the same comparisons to the female division, it is seen that the occasions of seclusion for violence have been twenty times as many in patients of the second as in those of the first class.

It is our opinion, many times strongly expressed in these reports, that all the bad qualities of such inmates are exaggerated by excessive seclusion; but we freely admit the difficulty of dealing with them in the present circumstances of the Asylum, so restricted as it is in the amount of accommodation necessary to afford proper facilities for a more equable distribution of cases, with suitable regard to the general comfort of the wards. We have spoken of the greater attention lately given to the provision of means of recreation, and we saw evidences of this not before noticed by us in the wards themselves.

The numbers attending divine service are still a very small proportion of the inmates, consisting of no more than eighty-three men and twenty-four women, at the Asylum Chapel, and of twenty-seven men, in nearly equal numbers, at the Wesleyan and Roman Catholic services.

Of the completeness and efficiency of the staff of attendants at this Asylum, and of the liberal and indeed generous provision made, not alone for their adequate personal remuneration and due recreation, but for the comforts of their homes, and for opportunities of education to their children, we cannot speak too highly; and the last year has been no exception to the rule naturally resulting from such treatment of infrequent changes in the staff. Of the seventy-two male and nineteen female attendants of which it consisted at the last visit, all but five of the former and three of the latter continue in the service of the Asylum, and upon the increase of the number of male patients one principal and four assistant attendants were added.

## 1871.

Numbers employed on 29 October, 1871.	Males.	Females.	Total.
In farm garden .....	25	.....	25
As ward-cleaners .....	46	4	50

Needlework .....	.....	25	25
Sundry work .....	12	.....	12
<b>Total</b> .....	<b>218</b>	<b>41</b>	<b>254</b>

These extracts afford information upon most of the leading points of this important establishment.

The hospital ward struck me as appropriately arranged. The walls were painted, and besides the beds there were suitable plain couches and arm-chairs.

In the female department a spacious room was well fitted and devoted to the purposes of an Associated Recreation Hall—it was said to be of material use.

On the male side there was a good reading room, in which I noticed that the tables were covered with green baize cloths. A large aquarium formed a prominent and pleasing object. Writing tables with books upon them offered amusement, and one penny paper was supplied to every thirty patients. These, I was informed, were seldom mutilated.

In one day-room I noticed a billiard-table, also cages containing canaries.

There was also on the men's side a large recreation room fitted at one end with a full stage for theatrical performances, a band stand, grand piano, &c.; patients were allowed to smoke in the corridors.

Patients convicted of murder but found to be insane on trial were amongst the most quiet of the patients, and many were allowed to be in associated sitting-rooms (of which, generally speaking, there was one to each twenty-five patients) and dormitories.

The cubic space of the dormitories varied from 700 to 1,100 feet.

The single cells were lined with Parian cement, and in addition to the furniture had each a piece of carpet.

In this as in all the English Asylums the mattresses were stuffed with horsehair. The cost of each patient was 21s. per week exclusive of his labour.

The kitchen garden occupied 7 acres, and was well cultivated.

## CENTRAL ASYLUM AT DUNDRUM, NEAR DUBLIN.

This asylum was opened in 1850 for the reception of lunatics charged with grave offences and acquitted on the plea of insanity, and for convicts becoming insane during the period of penal confinement. Up to the year 1869 it had received an aggregate of 381 inmates within its walls, and has been satisfactory in its working. During the first twenty years of its existence 131 patients were discharged, and eighty died. Of those discharged, eleven capitally convicted or indicted were liberated through the clemency of different Lords-Lieutenant, while sixty-seven convicted of grievous assaults, arson, larceny, &c., were sent out cured, and forty-five were sent to other asylums, when their penal servitude ceased.

In 1870, seventeen patients were admitted and fourteen discharged. In 1871, twelve were admitted and five discharged.

During the years 1869, 1870, and 1871, there was only one escape and one attempt to escape. One serious attack upon a warder has been made during the period of twenty-two years.

With

With regard to the discharge of patients, whether fully recovered or still continuing mentally afflicted but quiet and amenable, such cases are brought from time to time, with the particular circumstances attending each, under the notice of the Executive and its decision.

No unfavourable reports have been made of the after conduct of those unconditionally liberated. The utmost caution is always exercised, but more especially in patients guilty of homicide or violent assault. Unbroken good conduct and obedience to the rules, without manifestation of mental infirmity by word or deed—sometimes for years, constitute the reasons for the favourable interposition of the Commissioners. The employment of the patients, both in or out of doors, has always been and continues to be very large. Upon an average, a total of 126 of both sexes are said to be employed.

During my visit I found thirty-two men at work in the garden, with whom were four attendants in charge. The latter were in uniform, but not working. Each of them had a black-thorn walking-stick in his hand. This is allowed for protection against a sudden attack. The daily average furnished to me was as follows:—

Garden labourers .....	30	Tailors .....	3
Smith .....	1	Farm labourers .....	3
Carpenter .....	1	Miscellaneous .....	67
Shoemakers .....	4		

The only paid tradesman is a tailor, who gets 12s. 6d. a week, with rations.

The four tailors make all the patients' clothes and the attendants' uniforms.

"It is gratifying to find from the reports for 1871 and 1872, that, notwithstanding the great amount of freedom enjoyed by the patients throughout the premises, and the comparatively small number of attendants in connection with a class of persons looked upon by the public generally as predisposed to mischief, no accident of any kind has occurred nor any attempts at personal violence; neither have any injuries to the Asylum property been recorded, except the breaking of a few panes of glass, scarcely to the value of twenty shillings."

The grounds attached to the Asylum are uniformly enclosed (the boundary walls average not quite 9 feet in height), and are of a park-like character. The walls around the airing courts do not exceed 5 feet. It is found that the less the restraint and the less the prison appurtenances, the less the disposition among the patients to do gratuitous injury or to attempt to escape. The grounds contain 11 acres under grass, and 8 under cultivation; the clear profit upon which was, in 1871, £319 4s. 4d.

Both garden and farm are well kept. A racket court is provided for the patients. The Commissioners for Ireland appear always to have advocated that every facility should be given for religious worship, and to report favourably of its beneficial effect upon the patients. The Protestant Church and Roman Catholic are both very nice.

The dormitories are comfortable and well furnished, each contains eight or nine beds; the day rooms are suitably furnished, and well supplied with magazines, books, games, &c. A few good ornaments are hung about the walls.

The female side is in admirable order.

[Appendix marked B, referred to in letter of Board of Visitors, 8th September, 1873.]

THE GOVERNMENT CRIMINAL LUNATIC ASYLUM OF NEW SOUTH WALES.

THIS establishment consists of a single yard, within the general Lunatic Asylum at Parramatta. Its size is 147 feet by 99 feet, and it is surrounded by a stone wall 16 feet high. In this space stands the building in which the patients are accommodated; it is three stories high, and measures 85 feet by 34½ feet. It appears, therefore, that the total surface area of the yard is 14,553 square feet, of which 2,890 are occupied by the building. There is no verandah in the yard to shelter the inmates from the heat of the sun, except one which covers the entrance and measures 22 feet by 14 feet. Each floor of the building consists of a central oblong space, surrounded by nineteen cells and one attendants' room, which opens into it. The whole structure is substantially built of stone, and well kept.

In wet weather the patients are necessarily detained in the central spaces of the building. All the beds are made upon the floors of the cells; and a few benches in the yards are the only articles of furniture in the department.

In this branch of a general lunatic asylum are received and detained all the criminal lunatics of the Colony—Aboriginals and Chinamen, English, Scotch, and Irish men, Queen's-pleasure men, convicts in whom mental aberration has been developed during their period of sentence, men of education who have committed crime during a sudden and perhaps brief attack of mental illness, and the brutish savage-minded criminal, in whom it would be difficult to distinguish between insanity and bestial impulse. There is no possibility of classification in any degree; all the patients are of necessity together in one dreary, high-walled, most limited space. In the summer the stone walls and building render it intensely hot; in winter the same causes make it draughty and cold.

In wet weather, the condition of the patients is changed, though not for the better. They are then huddled together in the limited central spaces in the building around which their cells open; they have no furniture except some benches, neither are they provided with any recreation, occupation, or amusement except one bagatelle-board. Thus they are left to dwell upon their morbid delusions, erratic fancies, or miserable crimes.

The department is under the control of the Superintendent of the General Asylum, in which are 783 patients. A practitioner in the town visits the entire establishment daily, to conduct the medical treatment of the patients.

No measures are legally available for dealing in any special manner with individual cases of Queen's-pleasure men whose insanity has passed off, and who may have proved themselves to be well conducted and capable of self-control.

There has been no record kept of the assaults upon officers and attendants, but it has to be recorded that, some few years since, a highly esteemed and most humane Superintendent of high mental cultivation was murdered in this department, and that more recently an instance of combined insubordination occurred in which two experienced and valued warders escaped loss of life by accident alone. Since this catastrophe, however, no serious accident has occurred. The proportion of attendants is 1 to 7.

The annual cost of each patient is £24 8s. 7d. The number of patients in January 1871 was thirty-six; in January 1872, was forty-five; at present the number is thirty-eight, of whom twenty-three are Queen's-pleasure men, and fifteen are convicts in whom insanity showed itself during the period of imprisonment. The cleanliness of the building, the general order maintained, with so small a proportion of attendants, and the general health of the patients, reflect great credit upon the Superintendent and other officers of the establishment. There is no special department for female criminal lunatics, but the women's side of the general asylum in which they are placed is in some respects more painfully repulsive, and quite, if not more unfavourable, to comfort and recovery, as the department in which the male criminal lunatics are confined.

Such, I fear, is a candid but simple and truthful description of this Asylum. It is probable that those who know it best will most readily realize the picture.

E. S. P. BEDFORD,  
President of the Board of Visitors.

NEW SOUTH WALES.

---

**CASE OF CHARLES GALONSKI.**

(PETITION OF W. H. BEDELL, RELATIVE TO.)

---

*Ordered by the Legislative Assembly to be printed, 26 November, 1873.*

---

To the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned,—

**HUMBLY SHOWETH:—**

That in the year 1869, one Charles Galonski, a storekeeper, carrying on business in the town, of Grenfell, became of unsound mind; and the authorities were made cognizant thereof, but took no steps for the care of either the person or property of Galonski.

That an unwarrantable and unlawful method, certain parties in no way related to the insane Galonski, did convey away and become possessed of a large and valuable iron store and a large and valuable stock of goods therein, contrary to law; the unfortunate owner was induced to proceed to Sydney by mail coach, and was within a few hours of his arrival found in Hunter or Bridge-street by the police, and taken into custody as being a person of unsound mind at large, and sent to Gladesville Asylum, where he has since been maintained at a heavy cost to the Country, although the estate of the inmate was ample to reimburse the charges of his keep for years, had such estate been properly taken possession of by the Crown.

That your Petitioner is in a position to prove by competent witnesses the truth of the above premises, and prays that your Honorable House may, for the due security of liberty and property, cause such inquiry into the matter set forth as to your Honorable House may seem fitting.

And your Petitioner, as in duty bound, will ever pray.

W. H. BEDELL.

Grenfell, 20th November, 1873.

# REPORT

OF THE

# COUNCIL OF EDUCATION

UPON THE CONDITION

OF THE

# PUBLIC SCHOOLS

FOR

1873.

---

Presented to both Houses of Parliament, in pursuance of Act 30 Vict. No. 22, sec. 27.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1874.

THE COUNCIL OF EDUCATION TO HIS EXCELLENCY THE GOVERNOR,

SUBMITTING

REPORT UPON THE CONDITION OF THE PUBLIC SCHOOLS FOR 1873.

To His Excellency SIR HERCULES GEORGE ROBERT ROBINSON, Knight, Commander of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies, and Vice-Admiral of the same.

MAY IT PLEASE YOUR EXCELLENCY,—

In accordance with the provisions of the Public Schools Act, section 27, we have the honor to submit the following as our Report upon the condition of the Public Schools during the year 1873, and to append a General Statement of Accounts.

I.—COUNCIL.

At the commencement of the year the Council consisted of the undermentioned Members:—

George Wigram Allen, Esquire, M.L.A.  
William Augustine Duncan, Esquire.  
The Honorable Thomas Holt, M.L.C.  
The Honorable Henry Parkes, M.L.A.  
John Smith, Esquire, M.D., President.

Mr. Parkes and Mr. Allen having resigned their offices, were succeeded by Sir Alfred Stephen, Knight, C.B., and Stephen Campbell Brown, Esquire, M.L.A., on the 29th November and 12th December, who hold office respectively for the unexpired portion of the statutory four years period for which their predecessors were appointed. The undermentioned gentlemen, therefore, now constitute the Council:—

Stephen Campbell Brown, Esquire, M.L.A.  
William Augustine Duncan, Esquire.  
The Honorable Thomas Holt, M.L.C.  
John Smith, Esq., M.D.  
Sir Alfred Stephen, Knight, C.B., K.C.M.G.

Professor Smith was unanimously re-elected President for the year 1874, at a meeting of the Council held on the 5th January.

II.—GENERAL STATISTICS.

From the following tables the progress made during 1873, as regards schools and pupils, may readily be perceived:—

1.—SCHOOLS.

	1867.	1868.	1869.	1870.	1871.	1872.	1873.

A net increase of forty schools is observable from the first of these tables, but the actual number of entirely new schools brought into operation in 1873 was eighty-seven. Besides these, several existing schools were removed from one class to another, and upwards of forty were permanently or temporarily closed. Among those finally closed were a few Public Schools situated in localities which were formerly occupied by persons engaged in railway construction, but which were deserted on the completion of the works. The removal of population from other causes led to the closing of a large number of Provisional Schools. Of schools temporarily closed, some were Public Schools in which the necessity for providing new buildings led to the suspension of the work of teaching. A striking example of this kind is afforded by the case of the Pyree Public School, in the Shoalhaven district. The land in this locality being private property, and the owner refusing to alienate a site for a school, the Council was precluded by the provisions of the Public Schools Act from contributing to the cost of erecting suitable school buildings, although those in use had become so dilapidated as to be altogether untenable. After repeated applications to the owner of the property, who had as frequently promised to erect a schoolroom, the Council was compelled, on the 31st March, 1872, to close the school; and the large number of children residing in the vicinity have ever since that date been altogether deprived of the public means of instruction. The difficulty and delay in procuring school sites are further alluded to in a subsequent paragraph of this Report.

The aggregate number of pupils enrolled in 1873 was 92,018, being an increase of 3,531 upon the number attending in the previous year. Of the number thus added, 2,373 went to Public Schools, 793 to Provisional, and 417 to Half-Time, Schools. A slight decrease is observable in the attendance at Denominational Schools. While it is satisfactory to record the gradual yearly increase in the number of children brought under instruction, there is some ground for regret on account of the large number who appear to attend no school whatever. From inquiries instituted through the Council's Inspectors in 1873, it appears that, exclusive of the great pastoral districts of the interior, upwards of 25,000 children attend no school; and, as far as could be ascertained, receive no systematic instruction. Of these about 3,000 reside in localities in which no schools at present exist; 5,000 will be provided for by schools in course of establishment; and the remaining 17,000 do not avail themselves of facilities for education placed within their reach.

Appendix A.

A decline, which cannot easily be accounted for, took place in 1873 as regards regularity of attendance. The proportion of pupils in daily attendance to the total number enrolled was for all schools, and for the whole year, 66 per cent. only, and at no part of the year did the proportion rise above 68·5 per cent. In each of the larger classes of schools the decline was about 2 per cent., the proportions being for Public Schools, 67, and for Denominational Schools, 65·7 per cent., as against 69·3, and 67·5, per cent. respectively in 1872. It should be borne in mind, however, that in making these calculations the attendance for every school day\* in the year is included, even though the number of pupils present might, on various occasions, in some schools, have been diminished almost to zero by rain, floods, sickness, or other causes.

The amount paid as school fees in 1873 was £48,947 5s. 11½d. Although this exceeds the sum paid in the previous year by £2,953 8s. 4½d., there is still ground for complaint on the score of non-payment of fees due. It is calculated that not less than £6,000 per annum is lost by the neglect or refusal of parents to pay. This sum if paid would go to increase the remuneration of teachers who are thus unjustly deprived of a portion of their incomes to which they are legally and on every other ground entitled. The loss to teachers thus occasioned has induced the Council to make inquiries in the more flagrant cases, with a view to obtain information on which to take action hereafter in such manner as is provided by law. The Public Schools Act however is defective in not providing simpler and more easy means for enforcing payment. The teacher, suing under the direction of the Council, ought to be enabled to recover all unpaid fees by the most summary and inexpensive process.

The number of free scholars during the past year was 6,573, being a decrease of 638 upon the number returned in 1872. It is believed that the effect of the inquiry instituted by the Council will be still further to reduce the proportion of free scholars, and to restrict the privilege of free education to those, and those only, who are unable to pay—the class for whose special benefit it was conferred by the Statute. Some glaring instances have come under the notice of the Council, where parents in good circumstances have evaded the payment of fees, to the serious loss of the teachers who ought rather to be stimulated by additional remuneration.

## III.—PUBLIC SCHOOLS.

Appendix B.

During the year 1873 the Public Schools in operation numbered 400, with an average quarterly enrolment of pupils, amounting to 35,114. Six schools returned as Public Schools in 1872, were classed as Half-Time in 1873, and four others were temporarily closed pending the erection of suitable buildings. In the case of nine schools it seems improbable that the population will, within a reasonable time, so far increase as to warrant the expectation that they will be re-opened. The number of entirely new Public Schools opened in 1873 was 15; one school temporarily closed in the previous year was re-opened; nine Provisional Schools had increased in numbers to such an extent as justified their conversion into Public Schools; and one Half-Time and one Denominational School were converted into Public Schools.

Out

\* The average number of school days in the year is 230.

Out of thirty-two applications received in 1873 for the establishment of Public Schools, seventeen were agreed to, six were declined, and nine remained undecided at the close of the year. Two of the applications were made by the Local Boards of Certified Denominational Schools, and others emanated from the promoters of Provisional and Half-Time Schools. Excluding these ten cases, the new applications, signed by 558 parents or guardians, were intended to provide the means of education for 1,698 children. Appendix C.

Allusion has already been made to the difficulty of obtaining sites, and consequently of providing schools, even where they are urgently required. In further illustration of this fact, it may be mentioned that from this cause five of the schools applied for in 1872, and which the Council agreed to establish, have not yet been brought into operation, and in some instances the sites have not yet been granted. For many years past this serious hindrance to the institution of new schools has existed, and by wearying the patience of the promoters, has in numerous cases produced such indifference or dissatisfaction as to lead them to abandon their project of erecting the necessary buildings.

#### IV.—PROVISIONAL SCHOOLS.

The Provisional Schools in operation in 1873 numbered 216. Of these, forty-seven had not been previously in existence under the Council's superintendence, and five were originally in operation as Half-Time Schools or Denominational Schools. Thirty of the Provisional Schools existing in 1872 were closed in 1873, or transferred to the list of Public or Half-Time Schools. Appendix D.

That schools of the Provisional class continue to be favorably regarded by the public generally, is shown by the fact that forty-eight applications for aid were made in 1873; and though some of these were necessarily declined, yet they afford evidence that 525 parents or guardians were desirous of providing the means of education for 1,384 children. The applicants of the different religious denominations were—Church of England, 240; Roman Catholic, 200; Presbyterian, 46; Wesleyan, 27; others, 12; total, 525. Thirty-five applications were agreed to, and seven others were under consideration at the end of the year. From various causes, great difficulty was experienced in completing the organization of the schools to which aid was granted, and bringing them into operation during 1873. The most important of these causes was the disinclination of properly qualified teachers to undertake the management of such schools, chiefly on account of the meagre emoluments to be derived from them, and the circumstances of discomfort which they in general present. Means were adopted, however, to remove this difficulty which before the end of the year had to a considerable extent diminished. Appendix E.

#### V.—HALF-TIME SCHOOLS.

The number of Half-Time Schools in operation was 117, being sixteen more than in the previous year; and applications were received from twenty-eight localities for the establishment of such schools. Twenty of these applications were granted, and four were reserved for further consideration, the remainder being declined. Five Public Schools were included in the number for which aid was sought as Half-Time Schools. Appendix F.

Schools of this class still continue to effect much good in remote and thinly peopled districts, where the number of children is too small even for Provisional Schools. Appendix G.

#### VI.—INSPECTION.

No alteration in the inspectoral staff took place in 1873. On the whole the past year was favourable to the work of inspection, three schools only having been found inaccessible on account of floods. These were in the Armidale District. Notwithstanding this fact, a larger number of schools was left uninspected than in 1872. For the purposes of inspection, the schools in existence in 1873 were divided into 1,032 departments requiring to be separately reported upon. Of these, 876 were inspected. In explanation of the large number of schools, 156, which were deprived of the advantages of inspection, the Inspectors report that seventy-nine were closed at the date of their visits; and that want of time prevented them from examining seventy-four others. Appendix H.

As in former years, the inspection has been minute and searching. While faults and defects have thus been discovered, it is pleasing to find from the Inspectors' reports that, with hardly an exception, suitable remedies were suggested, and assurances given that efforts would be made to apply them vigorously and effectively.

The following table shows the number of schools visited and unvisited in each Inspectoral District.

AMOUNT OF INSPECTION, 1873.

Districts.	Number of Schools or Departments existing.	Number fully inspected.	Number not inspected.
Albury .....	57	52	5
Armidale .....	92	73	19
Bathurst .....	111	73	38
Braidwood .....	109	94	15
Camden .....	103	87	16
Cumberland .....	88	81	7
Goulburn .....	107	97	10
Maitland .....	93	67	26
Mudgee .....	65	51	14
Newcastle .....	97	91	6
Sydney .....	110	110	...
Total .....	1,032	876	156

#### VII.—CONDITION OF SCHOOLS INSPECTED.

Of the 876 departments or schools examined, 60 per cent. were reported to be below the standard, about 27 per cent. up to the standard, and 12 per cent. above it. In some respects these figures show a decided improvement on the condition of schools in 1872; especially if the fact be kept in view that the establishment of upwards of eighty new schools must necessarily tend to lower the average merit by the influx of pupils,

pupils, for the most part previously untrained. It may further be necessary to explain that the standard above-mentioned is intended to denote a certain measure of efficiency not only as regards the instruction imparted, but taking cognizance also of the discipline and organization. As in former years, the standard by which the schools were judged was designedly fixed as high as good teachers could reasonably be expected to reach. To have succeeded in reaching the standard is, therefore, creditable to the ability of any teacher, while the fact that the standard has been excelled by any teacher marks him out as standing in the front rank of his profession.

The following table exhibits the per centage of each class of inspected schools meeting the standard or being above or below it:—

Schools.	Below the standard.	Equal to the standard.	Above the standard.
Public .....	44.7	36.8	18.4
Provisional .....	84.1	9.3	6.6
Half-Time.....	80.4	9.8	9.8
Denominational .....	63.7	29.1	7.2
All Schools .....	60.4	27.2	12.4

The proficiency of the pupils examined may be estimated from the accompanying table:—

**ESTIMATED PROFICIENCY OF THE PUPILS.**  
**ALL SCHOOLS.**

Subjects taught and number of children examined in them.					
Subjects.	Estimated Proficiency.				
	Good.	Fair.	Tolerable.	Moderate or Indifferent.	Totals.
<i>Reading—</i>					
Alphabet .....	620	1,627	1,864	2,097	6,208
Monosyllables .....	2,800	5,129	3,572	2,287	13,788
Easy narratives .....	2,921	5,588	3,592	1,664	13,765
Ordinary prose .....	3,819	4,372	2,052	779	11,022
Totals .....	10,160	16,716	11,080	6,827	44,783
<i>Writing—</i>					
On slate .....	4,379	7,525	4,358	2,736	18,998

Algebra .....	179	180	271	134	764
Mensuration .....	112	84	36	51	283
Latin .....	184	202	177	189	752
Trigonometry .....	23	7	.....	.....	30
Needlework.....	4,385	4,030	2,588	823	11,829

Comparison of these figures with those contained in the report for 1872, will show that during the past year (1) a larger number of children was examined in the various subjects of instruction; (2) that the number in the advanced grades of the different subjects is steadily increasing; and (3) that the proficiency attained in the several grades is also improving. In the subject of reading, for example, out of 44,783 children examined, 37,956, or nearly 85 per cent., may be considered to have satisfied the standard; while more than 37 per cent. passed with credit, and 22 per cent. with great credit. Considering the large number of very young children attending the schools, the early age at which in general the pupils leave, the addition of untaught children in eighty-seven entirely new schools, and the inferior appliances met with in Provisional Schools, the statistics above given show a very substantial advance in the work of primary instruction. Some further allowance might also be made, on account of the interruptions to a systematic course of instruction, caused by the frequent closing of schools for want of teachers, and by the irregular attendance of the pupils themselves.

The Inspectors' reports continue to speak in favourable terms of the discipline maintained in the schools.

## VIII.—TEACHERS.

The question as to the supply of competent Teachers for schools of all classes has occupied much attention during the past year. Although fewer applicants for the office of Pupil Teacher presented themselves for examination in 1873 than in the previous year, the number of those who succeeded was about the same. The numbers were,—

	1873.	1872.
Applicants examined .....	179	216
Applicants successful .....	94	97
Applicants unsuccessful.....	85	119

These figures seem to show that candidates were better prepared for examination in 1873. Of the successful candidates, seventy-two were appointed to situations.

Considerable improvement was also manifest in the examinations of appointed Pupil Teachers, as may be seen from the following statement of the number promoted:—

From Class IV to Class III .....	76
"    "    III to "    II .....	42
"    "    II to "    I .....	40
"    "    I to the Training School .....	38

Only fifty-six failed to pass, being a little more than 21 per cent. of the whole number. In the two preceding years the failures were 31 and 27 per cent. respectively. Notwithstanding the improvement thus evidenced, there still remains some ground for dissatisfaction which, however, may be expected to disappear as soon as the measures devised for the benefit of the Pupil Teacher staff have had time to operate. These consist of (1) arrangements for exercising greater stringency in the selection of candidates wherever the opportunity of making a choice is attainable; (2) defining, with more precision than heretofore, the relative duties and privileges of Teachers and Pupil Teachers; and (3) the institution of classes for their instruction in the subjects which they are required to learn. These classes, which at present are of necessity confined to Pupil Teachers employed in and near Sydney, are held on Saturday mornings; so that the ordinary school-work may not be interrupted.

The Training School was open for two sessions of six months each during 1873. The extended course of instruction introduced in the previous year was continued in this, and seems to have produced very satisfactory results, as far as can be judged from so short a period of trial. The number of applicants for admission was seventy-five, of whom fifty-eight were successful in passing the preliminary examination. That the number of failures should be so small as seventeen may be explained on the supposition that the requirements of the Training School are now better understood, and that the applicants came up better prepared for the test.

The classifications gained by candidates after training may be seen from the following table:—

Classification.	Males.	Females.	Total.
Class II.			
Section A .....	1	3	4
"    B .....	6	10	16
Class III.			
Section A .....	13	4	17
"    B .....	6	4	10
"    C .....	...	4	4
Probationers .....	...	4	4
<b>Total .....</b>	<b>26</b>	<b>29</b>	<b>55</b>

One candidate died during the first session, and another withdrew from the Training School; four failed to gain any classification; and the examination of another was not completed by the end of the year.

On the whole, the operations of the Training School during 1873 may be pronounced decidedly successful; and the value of the institution, as a means of raising a supply of qualified Teachers, becomes yearly more evident.

It has been found, however, that the Training School is not adapted to provide Teachers for small country schools—Public, Denominational, Provisional, and Half-Time. In the early part of 1873, about forty schools of this kind were vacant on account of the difficulty of procuring suitable persons for such appointments, and the need for Teachers was becoming daily more urgent. Even when persons applied for such situations it was frequently found that their knowledge of the colony was limited to Sydney and its vicinity—that they were so habituated to city life as to be almost helpless when removed from it—and that their distaste for bush life and ignorance of bush ways interfered greatly with their success as Teachers. When trained Teachers are appointed to these situations the evil is aggravated, for such Teachers naturally expect higher emoluments and greater consideration than the circumstances of the localities could afford. It seemed desirable, therefore, that an effort should be made to procure candidates for the office of Teacher in small schools from residents in country districts, who, being accustomed to the usual mode of living in the bush, its advantages and its privations, and being familiar with the views and feelings of the people, would know how to secure their own comfort, and turn their position to the best account both for themselves and their pupils. At no distant date, however, we may hope to induce residents in the interior to make suitable provision for competent Teachers selected from the Training School.

These considerations induced the Council very reluctantly to sanction for a limited time, and as an experiment, the following arrangements:—

- I.—Inspectors were authorized (1) to invite applications from persons resident in country districts and accustomed to the usual mode of living in the bush; (2) to direct suitable applicants, after the necessary inquiries had been made, to attend some good school conveniently situated, for the purpose of receiving instruction of an elementary kind, and acquiring some practical knowledge of school keeping.

II.—

- II.—Applicants so admitted were to be paid £4 monthly during such attendance, subject to the Inspector's certificate that their conduct, attention, and progress were satisfactory.
- III.—A small bonus was to be awarded to the master or mistress of the school in which such persons were trained.
- IV.—In filling up vacancies in small schools of every kind preference was to be given to persons who had undergone the course of instruction herein indicated, and the prospect of admission to the Training School was held out as a reward for successful teaching for three years in a bush school.

So far as carried out this experiment has proved highly successful. In the districts in which the Inspectors acted the most energetically upon their instructions—Braidwood and Goulburn—no schools were closed at the end of 1873 for want of Teachers; and due provision had been made for vacancies anticipated in the early part of the current year.

Examinations of Teachers under the 37th regulation, and of those who voluntarily submitted themselves for the purpose, were duly held, the results being exhibited in the following statement:—

Failed to gain promotion ... ..	208
Promoted to Class III, Section C ... ..	23
"          "          "          B ... ..	17
"          "          "          A ... ..	19
"          Class II,          "          B ... ..	9
"          "          "          A ... ..	3
"          Class I,          "          B ... ..	1
	72
Total ... ..	280

While the large number of failures proves that much remains to be done, it is encouraging to find that some improvement has been made upon the result of the previous year's examinations. In 1872 the per centage of failures was 82; in 1873 it fell to 74.

The promotions of Teachers under article 39 of the Regulations were:—

From Class III, Section C, to Class III, B ... ..	1
"          III,          "          B, to          "          III, A ... ..	7
"          III,          "          A, to          "          II, B ... ..	14
"          II,          "          B, to          "          II, A ... ..	5
"          II,          "          A, to          "          I, B ... ..	1
"          I,          "          B, to          "          I, A ... ..	2
	30

At the close of 1873 there were in the service of the Council 950 Principal Teachers, 167 Assistants, and 272 Pupil Teachers—in all 1,389. Their aggregate emoluments for the year were:—

From salaries ... ..	£82,414 17 2
From school fees ... ..	£48,947 5 11½
Total ... ..	£131,362 3 1¼

This amount, divided among the whole number of Teachers, gives £94 11s. 5½d. as the average payment of each for the year, £59 6s. 8d. being derived from salary, and £35 4s. 9d. from fees. But as Pupil Teachers do not participate in the school fees, it follows that by excluding them in the calculation of income from that source, the sum of £43 16s. 4½d. would accrue to each Teacher as his share of fees, making the total emoluments £103 3s. 0½d. per annum. Even under this view, however, a fair estimate of the remuneration of trained Teachers cannot be formed; inasmuch as in the foregoing calculation the emoluments of Provisional and Half-Time Teachers are taken into account. Excluding these, as well as Pupil Teachers, the average salary paid to Public and Certified Denominational School Teachers amounts to £84 6s. 2d. for 1873, and the average income from fees to £53 8s. 6½d., making a total of £137 14s. 8½d. In a large number of instances a residence is also provided. The highest salary paid to any Teacher during the year was £200, and the maximum amount of school fees received by one Teacher was £434 19s. 6d., and the smallest 15s.

The following table contains additional information as to the remuneration of Teachers:—

AVERAGE income of Teachers in 1873.

Schools.	From Salary.	From Fees.	Total.
	£ s. d.	£ s. d.	£ s. d.
Public .....	65 8 10½	41 14 5½	107 3 4
Provisional .....	38 5 0	15 17 8	54 2 8
Half-Time .....	53 12 8	8 19 7	62 12 3
Church of England .....	59 11 9	41 2 11½	100 14 8½
Roman Catholic .....	62 7 3½	33 6 4	95 13 7½
Presbyterian .....	66 16 11½	45 14 7½	112 11 7
Wesleyan .....	63 0 7	45 1 0	108 1 7

The Council does not consider that the rates of payment disclosed in this table are adequate to the value of the services rendered, especially when compared with the wages now earned by artisans, and with increased cost of the means of subsistence. Impressed with this view, the Council, in the month of October, passed a regulation by which the salaries of principal Teachers, excepting those of the first class, were increased in Public and Certified Denominational Schools. The rate of increase thus awarded varied from 5 per cent. upon the highest salaries affected by the regulation, to 10 per cent. upon the lowest.

lowest. Simultaneously with these additions, the Council augmented the salaries of Teachers in Provisional Schools, the rate of increase varying with the number of pupils, but being about 25 per cent. on the average. Having been made at so late a period, these increases did not materially affect Teachers' incomes for 1873, but a marked improvement will probably be visible in the course of the current year. Some further improvement may also be expected from the steps already taken to ascertain the cause of non-payment of school fees.

But with the emoluments now accruing to Teachers, it is evident that few are enabled to make suitable provision for their own maintenance when incapacitated by old age or sickness from discharging the duties of their office, or for their dependent families after their own decease. There are cases in which it would be an advantage to the Public Service if Teachers were to relinquish the profession, but the Council has hesitated to recommend that course, from the circumstance that such Teachers would, in the event of their retirement, be wholly deprived of the means of living. On these grounds the Council resolved in the month of May, 1873, to encourage and assist the Teachers in its service to make some provision for their old age, or for their dependent families, by contributing in a certain proportion towards these objects. The limit was fixed at 2½ per cent. upon the Teacher's gross income, and the grant was made payable upon the following conditions:—

1. That the Teacher invested a certain sum in Life Assurance, Government, or Sydney Savings' Bank Deposits, or made some similar provident arrangement.
2. That Assurance policies were placed in the custody of the Council's Secretary for the time being.
3. That deposits in Savings' Banks were made in the joint names of the Secretary and of the Teachers making such provision.
4. That the Council should contribute to the extent of one half a Teacher's investment, subject to the limitation above mentioned.

The effect of these arrangements was to induce twenty-two Teachers to effect assurances upon their lives to the extent of £5,275, and fifty-one others to make deposits in Savings' Banks to the amount of £190 7s. 3d. When the working of the system becomes more fully understood, still greater advantage will doubtless be taken of the encouragement which it affords in providing for such contingencies as death and disability on the part of Teachers. Already the Council has had the satisfaction of learning that through this arrangement a Teacher long in the service but now deceased, was induced to increase the provision made for his family who are thus relieved from the fear of want, and placed in circumstances of comparative comfort.

#### IX.—LOCAL SUPERVISION.

In the Albury District the Inspector reports that "for no period during the past four years were the duties prescribed for Local Committees and School Boards so faithfully performed or productive of such beneficial results."

Improvement is also said to be manifest in the Cumberland District, and still greater improvement is expected. The Public School Board at Burwood is specially deserving of honorable mention for attention to its duties and efficiency in discharging them. In the Bathurst District the Boards at Young and Grenfell are also entitled to credit on the same grounds. Several Boards in the Goulburn and Mudgee Districts display laudable activity in the performance of their duties; and the same is to be said of the Public School Boards at Morpeth and Marrickville. There may be some other cases in which their duties have been more or less satisfactorily discharged; but we reluctantly add, that in very many instances the supervision of the schools by the Local Boards during the past year has been nominal only.

#### X.—FINANCE.

The following sums were at the Council's disposal, for the purposes of Public Instruction, during 1873, viz. :—

	£	s.	d.
Balance from 1872 ... ..	5,151	13	10
Parliamentary vote for 1873 ... ..	120,000	0	0
Church and Schools Estates Revenue ... ..	1,285	3	5
Refund of payments on account of buildings, Graf- ton Public School ... ..	2,000	0	0
Local contributions in cash ... ..	4,058	9	5
Total... ..	£132,495	6	8

A further sum of £48,947 5s. 11½d., derived from school fees, must be added in order to ascertain the whole amount recorded as available for the establishment and maintenance of schools. The total sum expended upon schools under the Council's supervision, as far as known, was £181,442 12s. 7½d.

The following statements, gathered from the Return of Receipts and Disbursements, appended hereto, show how the sums abovementioned were expended.

The expense of the general management, including the cost of providing the books and other articles necessary for school records, amounted to £7,541 14s. 8d.

The inspection of schools, and transaction of other business connected therewith, necessitated an outlay of £7,467 16s. 9d.

The sum of £2,506 13s. 3d. was expended upon the training of Teachers.

There were paid to Teachers the following sums:—

	£	s.	d.
For salaries ... ..	82,414	17	2
For travelling expenses ... ..	1,206	0	0
For text books... ..	25	1	4
Total... ..	£83,645	18	6

In the establishment of new schools, and for the support of those already in existence, the under-mentioned expenses were incurred:—

	£	s.	d.
For building schools and expenses incidental thereto...	12,154	17	4
For books and apparatus ... ..	2,846	17	2
For sundries ... ..	83	12	9
	<hr/>		
	£15,035	7	3

The whole amount expended upon buildings, including local contributions, was £16,678 10s. 6d.

We submit this as our Report upon the Public Schools for the year ending 31st December, 1873; and in testimony thereof we have caused our corporate seal to be affixed hereto, this thirtieth day of March, one thousand eight hundred and seventy-four.

## ALBURY DISTRICT.

## INSPECTOR'S GENERAL REPORT FOR 1873.

I HAVE the honor to submit, for the information of the Council of Education, this General Report upon the condition of the Public, Provisional, Half-Time, and Certified Denominational Schools in the Albury District, for the year ending 31st December, 1873.

*Supply of Schools.*—In the work of establishing schools in country districts many impediments have to be overcome. It is often no easy task to reconcile conflicting opinions as to the most eligible situation for the necessary buildings; it sometimes happens that the best site cannot be procured by reason of the alienation of the land, or its reservation for other public purposes; and occasionally it is urged that the people are too poor to subscribe towards the cost of erecting schoolhouses. Having regard to these circumstances, it may be considered that the progress made during the past year in supplying schools to the outlying portions of this district affords satisfactory evidence of the increasing interest evinced by the people generally in the cause of education.

Within the period embraced in this report, Public Schools have been established at Batlow, Edwards-town, Eunonyharsenyah, Narrandera, and Woomargamah; Provisional Schools opened at Blowering, Wagra, and Welaregang; and Half-Time Schools brought into operation at Upper and Lower Tarcutta. A certificate was also granted to the Roman Catholic School at Adelong. The Public School at Tumbarrumba, which had been closed for a considerable time for want of suitable buildings, was re-opened in new vested premises; and final arrangements were made for the establishment of a Provisional School at Ferndale, near Tumut. Some progress has been made towards the opening of Public Schools at Blackrange, Bungowanah, Gombargannah, Hopfield, Jindera, and Tattalia; and it may with confidence be anticipated that, as regards the establishment of new schools, a like measure of success to that noted for the past year will have to be recorded for 1874.

Speaking generally of the means of education throughout the district, it may be stated that in the towns and on the gold-fields they are adequate to existing requirements; that Public Schools are in operation in three-fourths of the rural localities possessed of the requisite population; and that upwards of one-half the smaller and more recently formed settlements are provided with Provisional or Half-Time Schools.

*Organization.*—The material state and general equipment of the schools continue to improve. New vested premises have within the year been provided at Howlong, Narrandera, Tumbarrumba, and Woomargamah; substantial repairs have been made in several instances; and in only seven schools was the organization so defective as to impair the efficiency of the teaching, viz., in the Public Schools at Adelong and Moama—the Provisional Schools at Huon, Ten-mile Creek, Wagra, and Welaregang—and the Half-Time School at Upper Tarcutta. In each locality mentioned, promises were made, and I believe steps are being taken to provide suitable premises.

As in previous years, the stock of working materials granted by the Council was found to be sufficient in almost all the schools visited, and with few exceptions its condition evidenced that due care and economy had been exercised as to its preservation and use. In my Report for 1871 attention was called to the neglected and uninviting appearance presented by the playgrounds of even many of the best conducted schools in the district, and to the absence of trees, shrubs, flower-borders, and the simplest appliances for recreation and play. It is gratifying to note that since then considerable improvement is apparent in most of the school premises provided with fencing,—those at Albury, Balranald, Deniliquin, Gundagai, Tumut, Thurgoona, Wagga Wagga, and Wentworth, being deserving of honorable mention.

*Discipline.*—The improved character of the regularity and punctuality of the pupils' attendance, noted in last general Report, has been maintained during the past year, the daily average being 70 per cent. of the pupils enrolled, and the numbers present at inspection 83 per cent. The disparity between these percentages is due chiefly to the fact that the daily average attendance is calculated from the numbers present at each school on every day it has been in operation, no allowance being made for any of the following disturbing influences:—(1) Wet weather, bad roads, and impassable creeks; (2) the prevalence of juvenile sickness; and (3) farm operations at seed-time and harvest.

If in accordance with the practice said to obtain in some of the neighbouring Colonies, as well as in many of the countries of Europe, the partial attendances due to the causes above indicated were excluded from the data of calculation, the average daily attendance for this district would approach 80 per cent. of the numbers enrolled, and it may be supposed that the statistics of the other inspectorates would exhibit a corresponding increase. These remarks are not intended to convey any objection against the rule by which the average is at present calculated; indeed, I am strongly of opinion that for cogent reasons this rule should still be adhered to. My object is simply to point out how it affects our educational statistics, and would be likely to prejudice a comparison drawn therefrom between the results achieved in New South Wales and in other countries.

Passing to the remaining features in the moral aspect of the schools visited, it has to be stated that neatness of dress and personal cleanliness marked the appearance of 90 per cent. of the pupils; that the requirements of order, attention, and prompt obedience were satisfactorily met in three-fourths of the schools; and that the government was in the main found to be reasonably judicious and very fairly effective.

*Instruction.*—The aggregate results of instruction as estimated at examinations held during the year exhibit, when compared with those for 1872, a slight falling off in all the ordinary subjects except arithmetic. This decadence was however due wholly to the low attainments of the pupils in the unusually large number of new schools brought into operation during the past twelve months. In these were to be found many children of ages ranging from ten to fourteen years, who could scarcely distinguish the letters of the alphabet, and many others whose proficiency was limited to the mechanical reading of easy sentences. Exclusive of these schools the quality of the instruction and the general proficiency of the pupils may be estimated as follows:—In 25 per cent. of the schools, from very fair to very good; in 30 per cent., fair; in 26 per cent., tolerable; and in the remaining 20 per cent., indifferent to moderate. The proportion of pupils examined in the higher classes and extra subjects was much greater than in any former year.

Teachers

*Teachers and School Boards.*—The experience of the past year has served only to strengthen the favourable opinion previously entertained as to the moral worth and painstaking industry of the teachers as a body. There are perhaps a few among them not always sufficiently watchful against the temptations inseparable from a position of partial social isolation, and the absence of neighbourly sympathy with their arduous labours; but for the one likely to exhibit such weakness there are twenty whose self-control and quiet perseverance are among the best proofs of their fitness for the office they so worthily hold. The recent direct increase to teachers' salaries—the previous augmentation for provident purposes—and the rescission of the rule by which salaries were subject to reduction for small attendance,—have all been duly appreciated; and I have reason to believe that the forthright and liberality manifested by the Council will be productive of increased efficiency throughout the schools of this district. For no former period within the past four years were the duties prescribed for Local Committees and School Boards so faithfully performed, or productive of such beneficial results.

*Working of the Public Schools Act.*—A review of the progress of education in the Albury District since the passing of the Public Schools Act discloses the following facts:—

1. That thirty-three new schools were established and are now in operation in localities formerly unprovided with the means of education;
2. That the number of children on the rolls of schools aided by the State has increased from 1,200 to 3,200;
3. That the average daily attendance in said schools has increased from 820 to 2,260 pupils; and
4. That the average cost of a child's education has decreased from £1 17s. to £1 7s.

*Summary.*—From the foregoing statements it may be inferred—

- (a.) That the work of extending the means of education throughout the district has, during the lapsed year, been attended with an unusually large measure of success;
- (b.) That the material state and general organization of the established schools admit of favourable report;
- (c.) That the moral condition of the schools exhibits progressive improvement; and
- (d.) That the results of instruction are on the whole reasonably satisfactory, and the educational prospects of the district encouraging.

Inspector's Office,  
Albury, 24 January, 1874.

EDMUND H. FLANNERY,  
Inspector of Schools.

#### ANNEX A.

DETAILED Statement of the condition of Schools in the Albury District, inspected during the year 1873.

##### I.—PUBLIC SCHOOLS.

ADELONG :—Visited, 27th May.

Present at examination :—Boys, 75; girls, 46; total, 121.

1. The general organization is as good as circumstances permit, but the accommodation is limited and the out-buildings insufficient. 2. The discipline is judicious, and the moral tone of the school pleasing. 3. The instruction is duly regulated, the methods of teaching are marked by very fair skill, and the average proficiency approaches good. Steps are being taken for the erection of vested school buildings.

ADBLONG CROSSING :—Visited, 22nd May.

Present at examination :—Boys, 20; girls, 15; total, 35.

1. Painting and some minor repairs are needed; otherwise, the material state is good, and the organization fairly appropriate. 2. The discipline is but partially effective. 3. The instruction is fairly regulated, the methods of teaching are tolerably skilful, and the results show a tolerable approach to the requirements of the standard. The attendance has sensibly increased since the present teacher took charge.

ALBURY (Primary) :—Visited, 17th, 18th, and 21st July.

Present at examination :—Boys, 78; girls, 52; total, 130.

1. The school buildings are spacious and well furnished, but need painting and other minor improvements. As a whole, the premises are fairly well kept. 2. The discipline is reasonably effective, and the moral tone of the school is tolerable. 3. The instruction is judiciously regulated, and the results show a fair approach to the requirements of the standard.

ALBURY (Infants) :—Visited, 16th July.

Present at examination :—Boys, 54; girls, 49; total, 103.

1. A well designed schoolroom, but rather small for the ordinary attendance. The general organization is appropriate. 2. The disciplinary arrangements are very good, and the prevailing tone of the school is healthy and cheerful. 3. The teaching is productive of good results.

BALRANALD :—Visited, 6th October.

Present at examination :—Boys, 24; girls, 17; total, 41.

1. The school buildings are suitable, in very fair repair, and well organized. 2. The general discipline is effective and the moral tone is high. 3. The work of instruction is conducted with very fair practical skill, and the average proficiency of the pupils is fully up to standard.

BATLOW :—Visited, 30th May.

Present at examination :—Boys, 26; girls, 20; total, 46.

1. The schoolhouse has been recently enlarged and provided with additional furniture. The whole premises are neatly kept. 2. Some of the pupils attend irregularly, but in other respects the moral condition of the school is fairly pleasing. The instruction is regulated to meet the requirements of the standard of proficiency, and the results fairly accord therewith.

BOWNA :—Visited, 27th June.

Present at examination :—Boys, 12; girls, 24; total, 36.

1. The material state of the school is defective, but the organization is fairly appropriate. 2. The discipline approaches fair. 3. The teaching is painstaking, and the average proficiency tolerable.

BRUCEDALE :—Visited, 22nd November.

Present at examination :—Boys, 14; girls, 13; total, 27.

1. The supply of furniture is scanty, and the out-buildings are unsuitable; otherwise, the material state and general arrangements admit of favourable report. 2. The moral aspect of the school is healthy. 3. The teaching is based upon modern methods, and is productive of fair results.

DENILQUIN :—

DENLIQUIN :—Visited, 15th and 16th September.

Present at examination :—Boys, 68 ; girls, 40 ; total, 108.

1. The material state of the school is very good, but the accommodation is barely adequate for the present attendance.
2. The pupils are not sufficiently punctual ; otherwise, the discipline is fairly effective.
3. The instruction is very carefully regulated, and the average proficiency is fair.

EDWARDSTOWN :—Visited, 15th May.

Present at examination :—Boys, 23 ; girls, 15 ; total, 38.

1. The schoolhouse is commodious, well furnished, and amply provided with working materials. Its general organization is passable.
2. The requirements of order, attention, and regularity of attendance, are tolerably met, and in its remaining features the moral aspect of the school is fairly pleasing.
3. The lesson documents are of indifferent value, and the results show a moderate approach to the requirements of the standard.

EUNONYHABEENYAH :—Visited, 20th November.

Present at examination :—Boys, 16 ; girls, 25 ; total, 41.

1. The schoolhouse is spacious and well furnished, the general organization is good, and the whole premises present a neat and well ordered appearance.
2. The pupils are regular, punctual, and neat in dress ; good order is maintained, and the government is firm and effective.
3. The instruction is marked by a tolerable degree of practical skill, and is productive of reasonably good results. The general condition of the school has been materially improved under the management of the present teacher.

GOCUP :—Visited, 2nd December.

Present at examination :—Boys, 19 ; girls, 22 ; total, 41.

1. The schoolhouse is a substantial wooden building, of good design, and well furnished. Fencing and the necessary out-buildings have yet to be provided.
2. The moral condition of the school evidences thoughtful supervision and judicious government.
3. The instruction is fairly regulated, and the methods of teaching are modern. The school has been only a short time in operation, but there is promise of reasonably good results.

GUNDAGAI :—Visited, 13th and 14th May.

Present at examination :—Boys, 55 ; girls, 51 ; total, 106.

1. A weather-shed, lavatory, and a supply of water are needed to complete the material equipment of the school. So far as the teacher can be held accountable, the general organization is satisfactory.
2. The daily attendance has largely increased since last inspection, and as a whole the disciplinary arrangements are fairly effective.
3. The instruction is duly regulated, the methods of teaching are of very fair practical skill, and the average proficiency ranges from fair to very fair.

HAY :—Visited, 4th November.

Present at examination :—Boys, 15 ; girls, 14 ; total, 29.

1. The school buildings are commodious and well furnished, but are in need of painting, colouring, and other repairs.
2. The attendance is small, and the general discipline very unsatisfactory.
3. The work of instruction is of little value, and the pupils' attainments are small. In consequence of the protracted and fatal illness of the late teacher, the school, for some time previous to the date of inspection, had been under the care of an inefficient substitute, but before the close of the year an experienced teacher was appointed.

HOWLONG :—Visited, 26th August.

Present at examination :—Boys, 15 ; girls, 22 ; total, 37.

1. New vested buildings, of suitable design, and well provided with educational appliances, were opened in the early part of the current year. A weather-shed, lavatory, and fencing have yet to be provided.
2. The attendance is reasonably punctual, and in other respects the disciplinary arrangements are moderately effective.
3. The instruction is tolerably well regulated, and the average proficiency is moderate. The present teacher has been only a few months in charge.

JEREELDERIE :—Visited, 11th September.

Present at examination :—Boys, 24 ; girls, 6 ; total, 30.

1. The schoolhouse is a new building, well furnished, and fairly provided with working materials, but rather slovenly kept.
2. The moral condition of the school is tolerable.
3. The work of instruction is conducted with much industry, and the progress made since last inspection is fairly satisfactory. A weather-shed and lavatory, and a teacher's residence are much needed.

LAKE ALBERT :—Visited, 21st November.

Present at examination :—Boys, 11 ; girls, 23 ; total, 34.

1. The material state and general organization of the school admit of favourable report, and the whole premises are very fairly kept.
2. The pupils are rather sluggish under instruction ; otherwise, the general discipline is reasonably effective.
3. The teaching is based upon modern methods, and the average proficiency approaches fair.

MENINDIE :—Visited, 22nd October.

Present at examination :—Boys, 21 ; girls, 23 ; total, 44.

1. A new schoolhouse, fairly supplied with working materials, but indifferently furnished. A residence, weather-shed, and lavatory have yet to be provided.
2. The attendance is reasonably regular, and the disciplinary arrangements, as a whole, are tolerable.
3. The work of instruction is marked by fair industry and moderate skill. The average proficiency is moderate.

MULLENGANDRA :—Visited, 17th December.

Present at examination :—Boys, 15 ; girls, 26 ; total, 41.

1. The schoolhouse is reasonably commodious, fairly furnished, and fully supplied with working materials. The general organization is satisfactory.
2. The attendance is general and fairly regular, and the requirements of order, attention, and industry are satisfactorily met.
3. The instruction is well regulated, the teaching intelligent, and the average proficiency ranges from fair to very fair.

NARANDERA :—Visited, 11th November.

Present at examination :—Boys, 14 ; girls, 15 ; total, 29.

1. An excellent schoolroom, amply provided with educational appliances. A residence, weather-shed, and lavatory have yet to be provided.
2. The attendance is satisfactory, and the general discipline fairly effective.
3. The instruction is fairly regulated, the methods of teaching are tolerably skilful, and the results, though small, evidence reasonable progress. This school has been only a few months in operation, and the bulk of the pupils have had no previous instruction.

SEBASTOPOL :—

**SEBASTOPOLE :—Visited, 14th November.**

Present at examination :—Boys, 7 ; girls, 5 ; total, 12.

1. The schoolhouse is in passable repair, fairly furnished, and cleanly kept. 2. Owing to the suspension of work at the local gold field, the population is small ; and the attendance includes nearly all the children of school ages in the neighbourhood. The discipline is moderately effective. 3. The instruction is limited, and the average proficiency small. This school was closed at the end of the year.

**THURGOONA :—Visited, 26th June.**

Present at examination :—Boys, 47 ; girls, 32 ; total, 79.

1. The material state of the school is good, and its general organization excellent. 2. The attendance is general, regular, and remarkably punctual, and the moral tone of the school is high. 3. The work of instruction is conducted with zeal and very fair practical skill. The attainments of the several classes average very fair.

**TUMBARUMBA :—Visited, 2nd June.**

Present at examination :—Boys, 15 ; girls, 14 ; total, 29.

1. The school buildings are new, suitable, and well furnished ; a weather-shed, lavatory, fencing, and a verandah to the residence, are needed to complete the material equipment. 2. The attendance is partial and irregular ; otherwise the discipline is tolerably effective. 3. The instruction is fairly regulated, and the results are moderate. The present teacher has been only five months in charge.

**TUMUT :—Visited, 28th and 29th April.**

Present at examination :—Boys, 42 ; girls, 32 ; total, 74.

1. A weather-shed, lavatory, and residence are needed ; otherwise the material state is very good, and the general organization satisfactory. 2. In all its features the moral aspect of the school is pleasing, and evidences judicious government. 3. The instruction is very carefully regulated, the teaching is intelligent, and the average proficiency ranges from fair to very fair.

**WAGGA WAGGA (Boys) :—Visited, 17th and 18th November.**

Present at examination :—184.

1. The accommodation is barely adequate to the wants of the present attendance ; otherwise the material state is excellent, and the organization appropriate. 2. The pupils are attentive, orderly, neat in dress, and punctual in attendance. The prevailing tone of the school is pleasing. 3. The instruction is well regulated, the methods of teaching are modern and skilful, and the results are fully up to the requirements of the standard.

**WAGGA WAGGA (Girls) :—Visited, 20th November.**

Present at examination :—100.

1. The material state of the school is excellent, and its general organization appropriate. 2. The pupils are punctual, neat in dress, and orderly under instruction. The government is judicious and effective. 3. The methods of teaching are of fair average skill, and the results evidence progressive improvement.

**WENTWORTH :—Visited, 13th and 14th October.**

Present at examination :—Boys, 55 ; girls, 44 ; total, 99.

1. Fencing, a weather-shed, and additional lavatory are needed to complete the material equipment. The material organization is excellent, and the whole premises are neatly and tastefully kept. 2. The attendance, which has steadily increased during the past year, is punctual and regular ; the order is excellent, and the moral tone of the school high. 3. The course of instruction is complete and well regulated, the teaching is skilful, and the average proficiency is good.

**WOOMARGAMA :—Visited, 16th December.**

Present at examination :—Boys, 12 ; girls, 18 ; total, 30.

1. A new schoolhouse, in excellent repair, and suitably furnished. 2. The attendance is reasonably good, and the general discipline fairly effective. 3. The teaching is profitable, and the average proficiency moderate. The teacher has been but a short time in charge.

**II.—PROVISIONAL SCHOOLS.****BLOWERING :—Visited, 2nd May.**

Present at examination :—Boys, 19 ; girls, 14 ; total, 33.

1. A new schoolhouse, fairly commodious, and moderately furnished. 2. The attendance is satisfactory, and the moral tone fairly healthy. 3. The work of instruction is conducted with industry, and, for the short time the school has been in operation, there is evidence of improvement.

**COOLAC :—Visited, 19th May.**

Present at examination :—Boys, 19 ; girls, 14 ; total, 33.

1. The schoolhouse is suitably furnished, well supplied with working materials, and very neatly kept. 2. The attendance is regular and punctual, the general discipline is effective, and the moral tone of the school is pleasing. 3. The course of instruction is that prescribed by the Council, and the results are fairly up to standard.

**HUON :—Visited, 19th August.**

Present at examination :—Boys, 8 ; girls, 7 ; total, 15.

1. The schoolhouse is out of repair, and the out-buildings are insufficient. There is a fair supply of furniture and working materials. 2. The attendance is partial and irregular ; in other respects the discipline is tolerable. 3. The average proficiency is moderate.

**KIMO REEF :—Visited, 16th May.**

Present at examination :—Boys, 12 ; girls, 12 ; total, 24.

1. The schoolhouse is in good repair, well furnished, and neatly kept ; but the out-buildings are dilapidated, and the premises are unfenced. 2. The discipline is on the whole fairly satisfactory. 3. The teaching is marked by intelligence, and the average proficiency is tolerable.

## LACMAJAC :—Visited, 5th May.

Present at examination :—Boys, 12 ; girls, 12 ; total, 24.

1. The accommodation is limited ; otherwise the material state of the school is reasonably good. 2. The discipline fairly answers the desired ends, and the moral tone is tolerably pleasing. 3. The work of instruction is conducted with vigour and fair intelligence, and the average proficiency is fairly up to standard.

## MAJOR'S PLAINS :—Visited, 27th August.

Present at examination :—Boys, 10 ; girls, 14 ; total, 24.

1. The schoolhouse is in good repair, fairly furnished, and tolerably well kept. The attendance is somewhat irregular, and many of the pupils are very unpunctual ; otherwise, the discipline is judicious and the tone of the school pleasing. 3. The instruction is duly regulated, and the average proficiency is tolerably satisfactory.

## MOUNT ADRAH :—Visited, 23rd April.

Present at examination :—Boys, 4 ; girls, 10 ; total, 14.

1. The schoolhouse is suitable, well furnished, and passably well kept. 2. The attendance is partial, but fairly regular, and the general discipline is reasonably effective. The instruction is productive of tolerable results.

## MOUNT PATRICK :—Visited, 23rd May.

Present at examination :—Boys, 12 ; girls, 8 ; total, 20.

1. The schoolhouse is fairly commodious but badly furnished, and unprovided with out-buildings. 2. The attendance is reasonably good, and the general discipline tolerably effective. 3. The instruction is productive of tolerable results. Arrangements are being made for the erection of new school buildings in a more central position.

## MULWALA :—Visited, 2nd September.

Present at examination :—Boys, 21 ; girls, 15 ; total, 36.

1. A comfortable schoolhouse, fairly furnished, and amply found in working materials. 2. The attendance has steadily increased since the present teacher took charge, and the general discipline is very good. 3. The teaching is painstaking, and the average proficiency moderate.

## TEX-MILE CREEK :—Visited, 15th December.

Present at examination :—Boys, 8 ; girls, 5 ; total, 13.

1. The situation is objectionable, and the schoolhouse unsuitable. There is an ample supply of furniture and working materials. 2. The attendance is partial ; otherwise the discipline is tolerably healthy. 3. The instruction is duly regulated, and the average proficiency approaches moderate.

## URANA :—Visited, 9th September.

Present at examination :—Boys, 14 ; girls, 14 ; total, 28.

1. The schoolhouse is a weatherboard building, in tolerable repair, and fairly found in working materials. It is very neatly kept. 2. The attendance is general, and fairly regular ; otherwise, the discipline is of moderate quality. 3. The work of instruction is painstaking, but the methods are mechanical, and the average proficiency is very moderate.

## WAGRA :—Visited, 19th December.

Present at examination :—Boys, 7 ; girls, 8 ; total, 15.

1. The temporary schoolhouse is very unsuitable, but a new one is in course of erection, and will be completed early next year. 2. The attendance is partial, and the discipline ineffective. 3. The instruction is based upon mechanical methods, and the average proficiency is very small. The teacher resigned immediately after the examination.

## WANGANILLA :—Visited, 30th September.

Present at examination :—Boys, 9 ; girls, 14 ; total, 23.

1. Additional furniture is needed, and the premises are unfenced ; otherwise the organization is fairly appropriate. 2. The moral condition of the school is tolerably healthy. 3. The instruction is not regulated by the prescribed documents, and the teaching is necessarily desultory. The average proficiency is moderate.

## WELAREGANG :—Visited, 11th December.

Present at examination :—Boys, 9 ; girls, 10 ; total, 19.

1. The school is at present held in temporary premises, of a very unsuitable character. Arrangements have, however, been made for the erection of suitable buildings within three months. 2. The attendance is generally fairly regular and reasonably punctual, and in other respects the discipline is fairly healthy. 3. The teaching is painstaking and reasonably profitable.

## III.—HALF-TIME SCHOOLS.

## ADELONG, UPPER :—Visited, 29th May.

Present at examination :—Boys, 7 ; girls, 8 ; total, 15.

1. The school is amply found in working materials, and its material state is fair. 2. The discipline is fairly healthy. 3. The teaching is painstaking, and the average proficiency is reasonably satisfactory.

## TARCUITA, UPPER :—Visited, 28th November.

Present at examination :—Boys, 5 ; girls, 3 ; total, 8.

1. The schoolhouse is unsuitable and scantily furnished, but the supply of working materials is adequate, and the organization is as good as circumstances will permit. 2. The attendance is partial, but the pupils enrolled are regular and punctual ; the government is mild and the moral tone pleasing. 3. The instruction is fairly regulated and the proficiency is satisfactory.

## TARCUITA, LOWER :—Visited, 29th November.

Present at examination :—Boys, 4 ; girls, 7 ; total, 11.

1. A good schoolhouse, suitably furnished and fairly organized. 2. The attendance is regular, and the general discipline is healthy. 3. The instruction is judiciously regulated, and the bulk of the pupils have made tolerable progress for the time they have been under instruction.

WONDALGA :—

WONDALGA :—Visited, 4th June.

Present at examination :—Boys, 7 ; girls, 8 ; total, 15.

1. The schoolhouse is suitable, well furnished, and fairly organized. 2. The attendance includes two-thirds of the children of school ages in the locality, and the general discipline is tolerably healthy. 3. The instruction is fairly regulated, and the teaching is productive of tolerable results.

EDMUND H. FLANNERY,  
Inspector, Albury District.

#### ARMIDALE DISTRICT.

INSPECTOR'S General Report for the Year 1873.

No material alteration in the limits of this district has been made during the year 1873, and ninety-two (92) schools have been in operation for the whole or part of that period. Of those schools seventy-three (73) have received the general inspection specially appointed for the year ; and this inspection, involving as it does thorough inquiry and report upon every circumstance connected with a school, both in its material and educational aspect, is the most comprehensive and, at the same time, the most lengthy and arduous of any ordered by the Council. Of the nineteen (19) schools not inspected, three (3) were inaccessible by reason of floods, seven (7) were closed at the date of my visit, and the remaining nine (9), most of which lie in the west and north-west portions of the district, at long distances apart, could not be reached for want of time.

Within the year four (4) Public, two (2) Provisional, and two (2) Denominational Schools, temporarily closed from various causes, were re-opened ; and four (4) new Provisional and two (2) Half-time Schools have been established. Applications for the establishment of Public Schools at Duck Creek (Alstonville), Maryland, and Tingha, have also been favourably reported upon, and there is every probability that schools will be in operation at these places very shortly. An application for the establishment of a Public School at Vegetable Creek is in abeyance ; one for a Public School at Solferino has been withdrawn owing to material decrease of population ; and a third for a Provisional School at Brombin, has been declined on the ground that the means of education are already afforded by existing schools in the locality.

Having had charge of this district only for the past twelve months, I have some hesitation in speaking in very positive terms as to the adequacy of the means of education afforded. Large accessions to the population have taken place in the tin-producing localities ; and these, through want of time, I have been unable to visit. Except in a few places, however, where the proceeds of the mines are such as to encourage settlement, the bulk of the population consists either of single men, or others who have left behind them their wives and families ; so that the necessity for schools in these places is less in proportion to the actual population than in other parts of the district. Of those portions that have received visitation and inspection, comprising the Coast District, from the river Hastings on the south to the Queensland frontier on the north, and nearly the whole of the northern table-land, in which areas are found more than ninety (90) per cent. of the entire school population, it may safely be said, that the means of education are very fairly supplied. Indeed, I know of no locality, either as the result of inquiry or of personal observation, where a school is required which is not already supplied with one, or where steps for its establishment are not being taken. It would be well if parents were as willing to avail themselves of the facilities for educating their children as the Council, in carrying out the provisions of the Public Schools Act, has been prompt and liberal in affording them such facilities ; but unfortunately this is not the case. From statistics furnished by the teachers of fifty-three (53) schools, and which may fairly be taken as the basis of a general conclusion, it would appear that not less than forty-eight (48) per cent. of the children of the school age and living within a 2-mile radius of existing schools under the Council's supervision are not in attendance thereat. True, some of these may be receiving their education elsewhere ; but considering the comparatively small number of private schools to be found in this or in any of the country inspectorates, it is not likely that more than ten (10) per cent. should be deducted on their account. The somewhat startling fact therefore remains that, as regards this district, and probably in like proportion in the rest, some three thousand (3,000) children, for whom the State has provided a sound, inexpensive, or if need be, free education, are growing up in the most culpable ignorance. Comment upon so deplorable a state of things is needless. There are a few instances in which teachers, by skilful management and the exercise of more than ordinary tact, secure, under favourable conditions, the attendance of all or nearly all of the available pupils ; but the apathy, indifference, and selfishness of parents are so wide-spread and persistent that the only effectual remedy for the evil is to be found in a system of compulsory education. So urgently does the need for such a measure present itself, that it is to be hoped its consideration may engage the attention of the Legislature at no distant date.

The average condition of the schools of the district as regards the character of the buildings, state of repair, and accommodation afforded, may be thus estimated :—Public Schools, fair to very fair ; Provisional and Half-time Schools, moderate to tolerable ; and Certified Denominational Schools, tolerable. During the past year new and suitable Public School buildings have been completed at Coraki, Gundurimba, and Tweed River (Murwillumbra) ; and a new Provisional School has also been erected at Codrington. There are also at present in progress, buildings for the Public Schools at Copper, Glen Lines, Palmer's Island, and Rocky Mouth, in each case but the first, in substitution for old and unsuitable structures. The increased attendance at Aldavilla, Ulmarra, and Uralla necessitates the enlargement of the school-houses, and prompt measures have been taken for raising the local quota of the cost ; so that the requisite alterations will shortly be proceeded with. At Bowling Alley Point, Rocky River, and Walcha, important repairs and additions, amounting in the case of the latter school to almost thorough renovation, have also been effected ; and the long needed weather-sheds and fencing for the Public School at Grafton have been provided for at last. The buildings occupied as Denominational Schools are, with three exceptions, used as places of worship ; and the Church furniture both obstructs the work of teaching, by rendering effective organization and discipline impossible and gives to the schoolrooms a disorderly aspect. In a few instances, occurring chiefly among Provisional and Half-Time Schools, the furniture is of a rough and primitive character, and not well arranged. As a rule, however, it may be said that the schools are supplied with sufficient and suitable furniture, well arranged, and in a fair state of preservation ; and the stock of books and minor apparatus is in general fully adequate to the requirements of the various classes of schools. Complaints, however, have been received from teachers to the effect that some of the latter articles supplied to their schools have been of indifferent quality ; and I have, on inquiry, found the representations made to be correct. As the "requisitions" for school materials are kept as low as possible consistent with the efficient working of the schools, it is very desirable that the supplies should be of good and substantial quality.

Viewed in their educational aspect, the condition of the schools as a whole shows some improvement. From the inspection of 1872 it would appear that eighty (80) per cent. of the schools examined gave results below the requirements of the standard ; seventeen (17) per cent. met those requirements ; and three (3) per cent. exceeded them. For 1873 it is found that in seventy-five (75) per cent. of the schools examined the results fall below the standard ; in fourteen (14) per cent. the standard is met ; and in eleven (11) per cent. exceeded. Retrogression is perceptible in the case of the Denominational Schools, in none of which do the results of examination either meet or exceed the standard, and the Provisional and Half-Time schools are about stationary ; so that whatever of improvement has been made goes to the credit of the Public Schools. While in very many schools the discipline to which the children are subjected

jected is of a healthy character, and secures much that is highly important as regards their moral training it is to be regretted that in comparatively few instances is the *order* really good. School drill, one of the most effective aids to discipline, is either neglected or not understood, and the marching and various simultaneous class movements are not performed with the necessary uniformity, quietness, and precision.

As a body the teachers are men of respectability and intelligence, and reasonably earnest, energetic, and skilful in the performance of their duties. It would appear, however, that they are not as studious as they should be, for applications for examination are very rare, and out of twenty-one (21) examinees under article 37 of the Regulations only four (4) succeeded in gaining promotion.

The character of the local supervision shows no material improvement; but where opportunity has offered and occasion required, I have arranged for periodic meetings of the Boards and for the regular visitation of the schools, giving general directions calculated to secure a systematic, and as far as possible, efficient, supervision. In nearly every instance my suggestions have been received in such a spirit as to encourage the hope that permanent good may be the result.

Briefly summarizing the foregoing Report, it may be said that—

1. The supply of schools throughout the district suitable in character, accommodation, and equipment, is very fairly adequate to existing requirements; but that in view of the fact that a very large number of parents are wilfully negligent of their children's education, as well as for other reasons, the introduction of a scheme of compulsory education is highly desirable.

2. The teachers as a class sustain their character for respectability, intelligence, and industry, while the attainments of the pupils may be regarded as fairly satisfactory when the stringency of the examination and the numerous obstacles to successful teaching are borne in mind.

3. Of local supervision there is more to hope for than to record.

Appended to this Report are the following Annexes:—

A.—Summary of Reports on Public, Provisional, and Half-Time Schools, examined during 1873.

B.—Summary of Reports on Certified Denominational Schools, examined during 1873.

J. D. BRADLEY,

Inspector of Schools,

Armidale District.

SUMMARY of Reports upon Public, Provisional, and Half-Time Schools, examined during the year 1873.

#### I.—PUBLIC SCHOOLS.

ALDAVILLA, P. (V.)—General inspection, 11th June.

Numbers enrolled:—Boys, 40; girls, 19; total, 59.

Numbers present:—Boys, 28; girls, 12; total, 40.

1. The schoolroom is much too small for the attendance, but in other points is suitable; and, with the rest of the premises, is in good condition, and neatly kept. Additional furniture is required. The stock of books and apparatus is sufficient, and, generally speaking, in very fair condition. 2. The pupils are reasonably regular and punctual, but a large number of children in the district do not attend school owing, it would appear, to the insufficiency of the accommodation. The appearance and demeanour of the children are in general creditable, and the discipline and moral tone fair. 3. The classification is at present too low; otherwise, the instruction is fairly regulated. The methods are appropriate, and applied with reasonable industry, and the average proficiency approaches fair.

ALUMNY CREEK, P. (V.) :—General inspection, 8th August.

Numbers enrolled:—Boys, 26; girls, 18; total, 44.

Numbers present:—Boys, 23; girls, 16; total, 39.

1. The schoolground is still unfenced. The buildings are very suitable and in good repair; and the equipment of the schoolroom leaves very little to be desired in this branch of the organization. 2. About six-sevenths of the pupils enrolled attend regularly, and I believe the degree of punctuality is good. The government is firm and consistent, and the order and general demeanour of the pupils are satisfactory. 3. The course of instruction is complete and well regulated. The classification, however, is too minute, and several pupils have been unwisely promoted on account of their age and size. The teaching, as far as noted, appears intelligent and energetic, but is not as penetrative as it should be. The average proficiency is from tolerable to fair.

ARMIDALE, P. (V.) :—General inspection, 27th and 28th Nov., and 1st, 2nd, 5th, and 8th Dec.

Numbers enrolled:—Boys, 135; girls, 106; total, 241.

Numbers present:—Boys, 120; girls, 80; total, 200.

1. The western wing of the building is badly in need of some important repairs. The other portions of the premises are, in general, in good condition and well kept. The principal schoolroom, however, is rather small for the attendance. There is an ample supply of books and apparatus, but the furniture is barely sufficient for the comfortable accommodation of the children. 2. The attendance of pupils is well sustained, and of the number enrolled about 85 per cent. are regular in their attendance. A very fair degree of punctuality is also secured. The appearance and demeanour of the children are pleasing. The government seems to be mild and judicious, and the moral tone of the school is good. Greater precision as regards drill is necessary—the marching especially being unsteady and irregular; in school, however, the various class movements are performed with quietness and uniformity. 3. The course of instruction is complete and judiciously regulated; and algebra, Latin, and mensuration are extra subjects taught in the fourth class, while Euclid has recently been introduced in the third. Viewed as a whole, the methods employed are of fair merit, and the teaching is marked by intelligence and earnestness. The pupils are in general very attentive under examination, and evince very fair mental activity, but, with few exceptions, read and answer in an indistinct under tone. The average proficiency is fair. The management of the boarding department in connection with the school is worthy of commendation.

BALLINA, P. (V.) :—General inspection, 20th October.

Numbers enrolled:—Boys, 34; girls, 23; total, 57.

Numbers present:—Boys, 25; girls, 17; total, 42.

1. On the whole the buildings are in very fair repair, and there is a sufficiency of all necessary working appliances. In other respects the organization is tolerable. 2. About three-fourths of the number enrolled attend regularly. The degree of punctuality does not appear good, several pupils presenting themselves half-an-hour late on the day of inspection. The discipline is far from being satisfactory; irregular, indiscriminate answering is common, and the children are talkative, sit in disorderly attitudes, and, as a whole, are but moderately disposed to work. 3. All the prescribed subjects are taught, and the pupils are fairly classified. The lesson programmes are of tolerable utility, and appear to be followed. The methods, as far as observed, and judged by results, are not thorough nor calculated to develop the thinking faculties of the children who, generally speaking, yield but a desultory and passive attention to the instruction. The average proficiency is from moderate to tolerable.

BELMORE

BELMORE RIVER, P. (V.) :—General inspection, 2nd June.

Numbers enrolled :—Boys, 32 ; girls, 24 ; total, 56.

Numbers present :—Boys, 26 ; girls, 19 ; total, 45.

1. The premises are suitable, in good condition, and very fairly equipped ; and the general organization, as far as the teacher is accountable for it, is tolerable. 2. Very fair regularity and punctuality are secured ; and, on the whole, the results of the discipline are fairly satisfactory. 3. All the prescribed subjects are taught. The classification is correct, and the lesson documents suitable and apparently duly observed. The methods are of tolerable merit in themselves, but the degree of mental training effected is unsatisfactory, and many of the older pupils are disinclined to work. The average proficiency is nearly tolerable.

BENDEMBER, P. (V.) :—General inspection, 25th March.

Numbers enrolled :—Boys, 14 ; girls, 8 ; total, 22.

Numbers present :—Boys, 6 ; girls, 1 ; total, 7.

1. The premises generally are in good repair ; and, except that the schoolroom is too short to admit of a proper arrangement of the desks, it is very fairly suitable. There is an ample supply of furniture, apparatus, and books. 2. The attendance has fallen away to an average of less than ten, owing to the unpopularity of the teacher, brought about by injudicious conduct on his part. There is no means of forming a correct estimate of the character of the discipline under existing circumstances. 3. The instruction in needlework has been discontinued for some time past, owing to the illness of the teacher's wife, and singing is not now taught. The lesson documents are of fair merit, and appear to be observed. The average proficiency of the pupils is from indifferent to moderate.

BOWLING ALLEY POINT, P. (V.) :—General inspection, 31st March.

Numbers enrolled :—Boys, 36 ; girls, 46 ; total, 82.

Numbers present :—Boys, 24 ; girls, 30 ; total, 54.

1. The condition of the premises generally leaves little to be desired, and the interior equipment is very fairly satisfactory. The exterior of the building has been painted since last inspection, the gates and fences repaired, and a roadway formed from the main thoroughfare of the township up to the school grounds. The stock of books and minor apparatus is at present rather low, but a fresh supply is due. 2. The attendance has been disturbed by sickness for some time past ; ordinarily, the pupils are very fairly regular and punctual. The drill is indifferent in character, but generally speaking the school operations are conducted in an orderly manner, and with few exceptions the appearance and demeanour of the children are creditable. 3. The course of instruction is complete and regulated with very fair judgment. Recent promotions in all the classes have lowered the standard of the attainments, and in some measure account for the comparatively low results of examination. The methods seem painstaking and of tolerable merit in themselves, but are not applied with sufficient animation and energy. The average proficiency of the pupils is from moderate to tolerable.

CASINO, P. (V.) :—General inspection, 9th October.

Numbers enrolled :—Boys, 24 ; girls, 25 ; total, 49.

Numbers present :—Boys, 21 ; girls, 23 ; total, 44.

1. The building is a good one and well adapted for school purposes ; but some extensive repairs are urgently necessary to it and also to the teacher's residence. The roof in many places has completely decayed or been destroyed by white ants, and the wood work is very badly in need of painting. New closets are also required. There is an ample supply of furniture and apparatus, but a good deal of the latter has been injured by silver-fish—the wall tablets more particularly. 2. The attendance of pupils is unsatisfactory. A large number of children in the district do not attend the school ; and of those that are enrolled not more than 65 per cent. are regular in their attendance. The government is lax and the general order and moral tone fall far short of what they should be. 3. All the ordinary subjects but singing are taught, but the classification is complicated and injudicious in some particulars. Under examination many of the pupils are restless, and none work with the energy and animation that should characterize a properly conducted school. The average proficiency is from moderate to tolerable, and in general the condition of the school is retrograding and unsatisfactory.

CHATSWORTH ISLAND, P. (V.) :—General inspection, 21st August.

Numbers enrolled :—Boys, 37 ; girls, 30 ; total, 67.

Numbers present :—Boys, 33 ; girls, 27 ; total, 60.

1. In general the material condition of the premises is good, and a right-of-way has recently been secured by the purchase of about two acres of land in the rear of the property. The supply of furniture, apparatus, and books is ample, and the organization otherwise is very fair. 2. The attendance appears satisfactory as regards regularity and punctuality. Except that the younger children are restless and rather noisy in their habits, the order is very fair, and the results of the discipline reasonably satisfactory. 3. All the prescribed subjects are taught. The lesson documents are suitable and apparently observed. The methods are in general appropriate and applied with fair success. The average proficiency is tolerable to fair.

CORAKI, P. (V.) :—General inspection, 15th October.

Numbers enrolled :—Boys, 15 ; girls, 19 ; total, 34.

Numbers present :—Boys, 15 ; girls, 19 ; total, 34.

1. The schoolroom is too small and badly lighted, but a new building is approaching completion. There is a fair supply of furniture, apparatus, and books. In other respects the organization is good. 2. The attendance is increasing, and a steady average above thirty may shortly be expected. Six-sevenths of the pupils enrolled attend regularly, and the punctuality is also good. The discipline is sound, and the children are attentive, obedient, and in good order. 3. The course of instruction is complete and well regulated, the classification judicious, and the methods of fair quality, and marked by vigorous and intelligent application. The pupils work well—the younger ones especially—and, considering the short time that has elapsed since the re-opening of the school, their progress is satisfactory. The average proficiency is from tolerable to fair.

EUROKA, P. (V.) :—General inspection, 9th June.

Numbers enrolled :—Boys, 22 ; girls, 21 ; total, 43.

Numbers present :—Boys, 16 ; girls, 18 ; total, 34.

1. The schoolhouse is well situated, suitable, and in very fair repair ; and the whole premises present every evidence of care and neatness on the part of the teacher and his wife. When the requisites now due are received, the equipment as regards apparatus and books will leave little to be desired ; and the organization, as far as the teacher is accountable for it, is very fair. 2. From 75 to 80 per cent. of the pupils attend regularly, and the degree of punctuality is equally good. The discipline is salutary and the moral tone good. 3. All the ordinary subjects but singing are taught, and the classification of the pupils and arrangement of the lesson documents are judicious and in accordance with the provisions of the standard. The methods are fair and appear to be diligently applied. The pupils are very attentive under examination and evince fair mental training. The average proficiency is fair.

## GRAFTON P., Primary (V.) :—General inspection, 27th, 28th, and 29th August, and 2nd September.

Numbers enrolled :—Boys, 117 ; girls, 61 ; total, 178.  
Numbers present :—Boys, 105 ; girls, 51 ; total, 156.

1. The premises need fencing, and a weather-shed is urgently required, as there are no trees for shade, and the playground is very much exposed. In all other respects the material condition is as good as can reasonably be expected, and the organization is complete. 2. About seven-ninths of the pupils attend regularly, and the degree of punctuality is also good. The government is on the whole very fair in its character. The drill, however, is not sufficiently precise—the marching especially being loose and irregular. The moral tone of the school may be regarded as very fair. 3. In addition to the ordinary subjects, elementary algebra and Latin are taught in the upper third class. The instruction is well regulated, and the lesson documents duly observed. As a whole the teaching is painstaking and earnest, and the methods fair. The pupils are attentive under examination, and make fair mental effort. The average proficiency exceeds fair.

## GRAFTON P., Infants (V.) :—General inspection, 27th August and 2nd September.

Numbers enrolled :—Boys, 68 ; girls, 77 ; total, 145.  
Numbers present :—Boys, 51 ; girls, 51 ; total, 102.

1. The material condition and organization are very good in most respects. Fencing and a weather-shed are much required. 2. A good attendance of pupils is maintained, and about two-thirds of the number enrolled are regular. The degree of punctuality is not as good as it should be. The discipline is in general judicious, and the order and moral tone very fair. 3. The course of instruction is complete as prescribed for infant schools, and regulated by the usual documents, in the preparation of which fair skill is shown. The classification is correct, and the teaching marked by animation and a reasonable degree of tact. Except in the case of the youngest children, the attention is very fairly sustained, and otherwise the mental training is in most respects satisfactory. The average proficiency is nearly fair.

## KELLY'S PLAINS, P. (V.) :—General inspection, 6th March.

Numbers enrolled :—Boys, 20 ; girls, 16 ; total, 36.  
Numbers present :—Boys, 16 ; girls, 10 ; total, 26.

1. The playground needs fencing and the windows repairing. In other respects the material condition of the premises is good. The organization is reasonably good, but another blackboard and a larger stock of first books are required. 2. The attendance has improved and very fair regularity and punctuality are secured. The discipline is healthy, but somewhat deficient in vigour ; and the order and general demeanour of the pupils are very fair. 3. All the prescribed subjects but needlework are taught. The classification is in general correct, and the time-table and lesson programmes are fairly suitable and duly observed. The methods of teaching, as far as noted, are of fair merit, and considering the short interval that has elapsed since the reopening of the school, the attainments of the pupils are not unsatisfactory. Their average proficiency is nearly tolerable.

## KEMPSEY, P. (V.) :—General inspection, 18 June.

Numbers enrolled :—Boys, 30 ; girls, 38 ; total, 68.  
Numbers present :—Boys, 19 ; girls, 18 ; total 37.

1. Except that the roof needs repair in places, the general condition of the premises is very fair. The supply of apparatus and other requisites is adequate ; and the school stock appears to be well taken care of. 2. The attendance was much lower than usual on the day of examination on account of rain. Ordinarily four-fifths of the pupils enrolled attend regularly, and very few appear to be unpunctual. Their demeanour and general appearance are creditable, and in other respects the effects of the discipline are very fairly satisfactory. 3. The classification is judicious, and the occupation of the pupils reasonably well provided for. The teaching seems earnest and painstaking, and the methods employed are of fair quality. Under examination the children are very attentive and evince fair mental training. The average proficiency is fair.

## LISMORE, P. (V.) :—General inspection, 17th October.

Numbers enrolled :—Boys, 31 ; girls, 22 ; total, 53.  
Numbers present :—Boys, 20 ; girls, 17 ; total 37.

1. The premises are in general in good condition, suitably furnished, and except that another blackboard is required, amply supplied with apparatus and books. In other respects the organization is fair. 2. Only about 60 per cent. of the children in the locality attend the school. Of these from two-thirds to three-fourths are regular and punctual. The pupils, though not well trained to habits of order and the uniform performance of the various class movements, are well behaved, obedient, and respectful ; and, as a whole, work with reasonable willingness and diligence. 3. The teaching of analysis has been omitted for some time past, and singing is not taught ; otherwise, the prescribed course of instruction is carried out. The classification is rather low, and too few pupils are found in the third class. The lesson programmes are not sufficiently specific, and are in some particulars incomplete. The teaching seems painstaking, though not very skilful. The average proficiency of the pupils is tolerable.

## NUNDLE, P. (V.) :—General inspection, 1st April.

Numbers enrolled :—Boys, 49 ; girls, 33 ; total, 82.  
Numbers present :—Boys, 38 ; girls, 32 ; total, 70.

1. Except that the building needs spouting, and that there are barely sufficient seats for the present attendance, the material condition and organization are good. Some diagrams and pictures, to illustrate object lessons, &c., however, are needed. 2. The pupils are regular and punctual ; and, although in some instances not as tidily dressed as is desirable, their general appearance and demeanour are very creditable. School drill needs to be systematically attended to, the marching being loose and irregular ; otherwise, the discipline is vigorous and effective, and the moral tone of the school is good. 3. The classification is judicious, and the instruction well regulated. The methods, both in themselves and as applied, are very fair ; and the pupils yield a ready, active, and well-sustained attention. Their average attainments rate from fair to very fair.

## PALMER'S ISLAND, P. (V.) :—General inspection, 19th August.

Numbers enrolled :—Boys, 26 ; girls, 24 ; total, 50.  
Numbers present :—Boys, 20 ; girls, 22 ; total, 42.

1. The building is out of repair and is not large enough for the present attendance of pupils, but a new schoolhouse is about to be commenced. The furniture is of fair quality but insufficient. In other respects the organization is reasonably good. 2. Four-fifths of the pupils attend regularly, and the degree of punctuality is very fair. The government appears firm, vigorous, and consistent ; and the order and moral tone are satisfactory. 3. Singing and needlework are not taught. The lesson documents are suitable and apparently observed. The methods are of fair merit, and are applied with care and industry. The pupils—some of the youngest excepted—are very attentive, and work with reasonable energy. The average proficiency is fair.

PORT MACQUARIE, P. (N.-V.) :—General inspection, 19th, 20th, and 21st May.

Numbers enrolled :—Boys, 67 ; girls, 47 ; total, 114.

Numbers present :—Boys, 58 ; girls, 35 ; total, 93.

1. The school buildings are pleasantly and healthily situated, and are in very fair repair. The fences and out-offices, however, are in a dilapidated state. The stock of furniture and apparatus is sufficient and in very fair condition ; but the supply of books, owing to increased attendance, is at present inadequate. All the school records are neatly kept and posted to date. 2. The attendance is reasonably regular and punctual. The order in general is fair, but the discipline is rather lax. The drill and inspection before school are not sufficiently precise ; and in school the pupils need much closer supervision to prevent whispering, prompting, and indolent attitudes. 3. In addition to the ordinary subjects, the elements of algebra and Latin are taught in the fourth class. The methods, as a whole, are of fair merit ; but the pupils are not made to work with sufficient industry. Their average proficiency is from tolerable to fair.

RAINBOW REACH, P. (V.) :—General inspection, 5th June.

Numbers enrolled :—Boys, 19 ; girls, 25 ; total, 44.

Numbers present :—Boys, 15 ; girls, 9 ; total, 24.

1. The school site, which is unfenced, is fairly central, but is low and surrounded by bush, which extends to within a few yards of the building, giving the place a wild, untidy appearance. Except that the roof leaks in one or two places, the premises are in very fair repair. There is a sufficiency of working materials, in tolerably good condition. The remaining features of the organization—those under the control of the teacher—are but very moderately satisfactory. 2. The attendance is neither regular nor punctual, the order is indifferent ; and little or no trouble seems to be taken by the teacher to check whispering and other improprieties now very prevalent. 3. The instruction accords in the main with the provisions of the "standard." The time-table and programmes are tolerably suitable, but the methods of teaching are weak and mechanical. The average proficiency is from indifferent to moderate.

RAMORNE, P. (N.-V.) :—General inspection, 13th August.

Numbers enrolled :—Boys, 23 ; girls, 25 ; total, 48.

Numbers present :—Boys, 18 ; girls, 19 ; total, 37.

1. The schoolroom is commodious and suitable, and fairly supplied with furniture, apparatus, and books. It is frequently used for entertainments and public meetings, and does not present as tidy an appearance as is desirable. 2. The discipline and moral tone are fair, but minor points of order need closer attention. 3. All the prescribed subjects but singing are taught, and the lesson documents are compiled with care and appear to be observed. The methods seem fair in themselves, but have not proved penetrative, the average proficiency of the pupils being barely tolerable.

ROCKY MOUTH, P. (V.) :—General inspection, 12th September.

Numbers enrolled :—Boys, 27 ; girls, 20 ; total, 47.

Numbers present :—Boys, 23 ; girls, 15 ; total, 38.

1. The schoolhouse is too small, and is otherwise unsuitable, but new promises are in course of erection. There is a sufficiency of apparatus, in good condition ; but the stock of books is rather too small for existing requirements. 2. The attendance of pupils is lower than might be expected. Two-thirds of the number enrolled attend regularly, and the punctuality is very fair. The government is judicious, but needs to be more vigorous ; and, except that the pupils are indifferently drilled, the order is good. 3. Singing is not taught ; otherwise, the course of instruction is complete. The classification is correct, and the lesson documents well arranged, and, I believe, punctually observed. The teaching is painstaking and earnest ; and the pupils, when under examination, yield a steady attention, and work with very fair energy. Their average proficiency is from fair to very fair.

ROCKY RIVER, P. (V.) :—General inspection, 23rd April.

Numbers enrolled :—Boys, 31 ; girls, 39 ; total, 70.

Numbers present :—Boys, 25 ; girls, 35 ; total, 60.

1. Various improvements have been effected since last inspection ; and it is probable that the fencing in of the playground and erection of a weather-shed will shortly be proceeded with. The furniture barely suffices for present requirements, but the stock of books and apparatus is, in most particulars, ample and in good preservation. 2. The pupils are in general regular and punctual ; but various points of order leave room for improvement, and the children are not as tidy in appearance as they should be. On the whole, however, the moral tone of the school may be regarded as very fair. 3. All the ordinary subjects but singing are taught, and the third class boys are instructed in the elements of algebra and book-keeping. The lesson documents appear to be carefully prepared and properly observed ; and, as far as noted, the methods are of tolerable merit. Under examination the pupils are attentive, but do not exert themselves sufficiently ; and they are rather shy and awkward, answering in an indistinct and somewhat slovenly undertone in many instances. The average proficiency is tolerable.

SEVEN OAKS, P. (V.) :—General inspection, 3rd June.

Numbers enrolled :—Boys, 25 ; girls, 28 ; total, 53.

Numbers present :—Boys, 15 ; girls, 21 ; total, 36.

1. The schoolhouse is fairly suitable, but the site is low ; and tall, offensive weeds surround the building and obscure the view. The fences are in a dilapidated state, and the out-offices also are out of repair. There is a very fair supply of books and apparatus, and otherwise the organization is fair. 2. The pupils are in general regular and punctual, and in reasonably good order ; and the moral tone of the school is very fairly satisfactory. 3. Singing is not taught, but otherwise the prescribed course is followed. The lesson documents are suitable and appear to be adhered to. The methods of instruction are tolerable, but need to be applied with greater animation and energy. The average proficiency is tolerable.

SMITH'S FLAT, P. (N.-V.) :—General inspection, 14th August.

Numbers enrolled :—Boys, 20 ; girls, 28 ; total, 48.

Numbers present :—Boys, 19 ; girls, 23 ; total, 42.

1. The schoolroom has been greatly improved by the present teacher, the furniture repaired and re-arranged, and a small gallery constructed for the use of the younger pupils. Except that the room affords too little accommodation, the material organization is now as good as can be expected. The premises are in very fair repair, but the playground is still unfenced. Swings and other contrivances for the amusement and physical training of the pupils have been introduced, and, altogether, the aspect of the school is very superior to that of most in the country, and in strong contrast to what previously obtained. There is a very fair supply of apparatus, but the stock of books is at present insufficient. 2. The pupils are very regular and punctual in their attendance, and the number is steadily increasing. The discipline is salutary, and the moral tone good. 3. In the main the prescribed course of instruction is followed ; and the time-table and programmes are compiled with very fair judgment, besides being models of care  
and

and neatness. The methods appear fair in themselves and are applied with zeal and energy, but the pupils need stimulating to greater mental activity. Only six weeks, however, have elapsed since the re-opening of the school, for which period the progress is fully satisfactory. The average proficiency is from tolerable to fair.

SOUTHGATE, P. (V.) :—General inspection, 10th September.

Numbers enrolled :—Boys, 22 ; girls, 28 ; total, 50.

Numbers present :—Boys, 11 ; girls, 19 ; total, 30.

1. The school site is low, and subject to inundation. The premises are well adapted for school purposes, and in good repair. The supply of working material is ample, and in good condition. 2. Not more than 50 per cent. of the children available for school are in attendance thereat, and of those the attendance is by no means as regular as it should be, the services of the children being in frequent requisition in connection with sugar-growing. The pupils are rather shy and timid, but otherwise their behaviour is satisfactory, and the moral tone of the school is from very fair to good. 3. The course of instruction is complete, and the lesson documents suitable ; the classification, however, is faulty in some respects. The methods are of fair merit, and marked by reasonable intelligence and energy in their application. The average proficiency is fair.

STRONTIAN PARK, P. (N.V.) :—General inspection, 12th August.

Numbers enrolled :—Boys, 14 ; girls, 24 ; total, 38.

Numbers present :—Boys, 10 ; girls, 24 ; total, 34.

1. The premises generally are but moderately suitable, and in a very unsatisfactory state as regards repair. There is a sufficiency of apparatus and books, in fair condition. 2. About one-third of the pupils enrolled are very irregular in their attendance, but the degree of punctuality appears to be very fair. The discipline is firm, and, generally speaking, judicious. The pupils give a well-sustained attention under examination, and are obedient, orderly, and respectful. 3. The course of instruction is complete and very fairly regulated, and the lesson documents seem to be duly observed. The teaching is energetic—rather boisterously so at times,—and the results of instruction are, on the whole, satisfactory. The average proficiency is from tolerable to fair.

SUMMERLAND, P. (V.) :—General inspection, 4th June.

Numbers enrolled :—Boys, 19 ; girls, 26 ; total, 45.

Numbers present :—Boys, 15 ; girls, 21 ; total, 36.

1. The roof is in need of repair in places, but otherwise the premises are in fair condition. The stock of working materials is at present inadequate, but a supplementary grant is now due. The organization is in most respects satisfactory. 2. As a rule the pupils are obedient and well-behaved, but some of the older ones are disinclined to work. The government is reasonably firm and effective, but greater vigilance needs to be exercised ; and the manner in which marching and other simultaneous movements are performed admits of considerable improvement. 3. The classification of the pupils and compilation of the lesson documents are judiciously made, and accord with the provisions of the standard. As far as noted, the methods are fair, but need to be marked by greater animation and energy. Too much reliance is placed on simultaneous answering. The average proficiency of the pupils is tolerable.

SWAN CREEK, P. (V.) :—General inspection, 11th August.

Numbers enrolled :—Boys, 19 ; girls, 21 ; total, 40.

Numbers present :—Boys, 13 ; girls, 18 ; total, 31.

1. Except that the site is rather low and swampy, the material condition of the school is good, and there is a sufficient and suitable supply of furniture, apparatus, and books. 2. About two-thirds of the pupils enrolled attend regularly and punctually. Several minor points of order need closer attention, but, on the whole, the discipline is fairly satisfactory. The moral tone of the school may be regarded as very fair. 3. All the prescribed subjects are taught, and the documents regulating the instruction are of fair merit and appear to be followed. The methods, as far as observed, approach fair ; but the teaching does not exact sufficient effort from the pupils. The average proficiency is a little above tolerable.

TALOUMBI, P. (V.) :—General inspection, 19th August.

Numbers enrolled :—Boys, 21 ; girls, 16 ; total, 37.

Numbers present :—Boys, 14 ; girls, 12 ; total, 26.

1. The schoolhouse is a slab structure, well built, and in good condition ; but the playground is neither cleared nor fenced. The supply of furniture is insufficient ; of books and apparatus the stock is ample and, generally speaking, in good order. 2. As a rule the pupils are punctual in their attendance, but little more than half the number enrolled attend regularly. The government is judicious as far as observed, but not sufficiently vigorous. The order and moral tone are very fair. 3. Singing and needle-work are not taught. The classification of the pupils is correct, and their profitable occupation fairly provided for. They are attentive under examination, and make fair mental effort. The average proficiency is from tolerable to fair.

TAMWORTH, P. (V.) :—General inspection, 27th March.

Numbers enrolled :—Boys, 80 ; girls, 58 ; total, 138.

Numbers present :—Boys, 52 ; girls, 28 ; total, 80.

1. The premises are in need of several repairs. The roof is leaky, and the plaster-work of ceiling and walls very much broken ; the closets also are in a very dilapidated state. The schoolroom is too small for the present attendance of pupils. In other respects the material part of the organization is very fair. 2. The pupils do not attend very regularly, and a large number are unpunctual. The discipline is of a low order, and the government altogether too lax and indulgent—many of the elder pupils when under reproof either treating the matter with levity or in a decided spirit of insubordination. Disorderly attitudes and other improprieties are the rule, and it is with extreme difficulty that the attention of the pupils can be obtained. 3. The course of instruction is complete, and regulated by the usual documents, in the preparation of which fair skill is shown. In some subjects, however, the instruction is not strictly in accordance with the requirements of the standard. The teacher seems earnest in his work, and the methods employed are of tolerable merit, but the defective state of the discipline precludes the possibility of successful teaching. The average proficiency is about moderate. The answering is confined to a few pupils—the greater number being unwilling to exert themselves.

TENTERFIELD, P. (V.) :—General inspection, 12th and 13th November.

Numbers enrolled :—Boys, 68 ; girls, 46 ; total, 114.

Numbers present :—Boys, 46 ; girls, 30 ; total, 76.

1. Some slight repairs are needed, but the general condition of the premises may be considered good. The school is well organized, and supplied with all appliances necessary for its efficient working. 2. The pupils are punctual, and about 75 per cent. attend regularly. The order and moral tone are very good, and the government appears free from harshness and severity. 3. All the prescribed subjects are taught,

taught, together with elementary algebra and mensuration in third class. The classification is unnecessarily minute; for, although there are nominally but three classes, as far as the actual working of the school is concerned, there are six. The methods are of very fair quality, and the teaching is marked by intelligence and industry. The pupils yield a ready attention under examination, and work with very fair spirit. The average proficiency exceeds fair, and would doubtless have been higher, but that a general promotion of the pupils was made only a few weeks prior to the inspection.

**TWEED RIVER, P. (V.)** :—General inspection, 27th October.

Numbers enrolled :—Boys, 18 ; girls, 11 ; total, 29.

Numbers present :—Boys, 18 ; girls, 9 ; total, 27.

1. Since last inspection the school has been removed from the "Junction" to Murwillumba, a few miles further west and intermediate between the north and south arms of the Tweed, central to the bulk of the population. The new buildings are very good of their kind, and, except that the schoolroom is likely to prove too small for future requirements, suitable. There is a fair supply of furniture, apparatus, and books. 2. The school has only been in operation a fortnight, and the attendance approaches thirty. Many of the pupils never attended school before; notwithstanding, the order and moral tone are fair. 3. All the prescribed subjects are taught, and the classification is fairly appropriate. The time-table in use is not very suitable, nor are the lesson programmes. As far as observed, the methods are fair, and the teaching marked by reasonable intelligence and painstaking. The attention of the pupils is at present rather unsteady, and the attainments meagre. The average proficiency is very moderate.

**ULMARRA, P. (V.)** :—General inspection, 3rd September.

Numbers enrolled :—Boys, 33 ; girls, 35 ; total, 68.

Numbers present :—Boys, 27 ; girls, 30 ; total, 57.

1. The schoolhouse is in the immediate vicinity of a swamp, and the same swamp occupies more than one-third of what should be the playground. The buildings are in good condition, but the schoolroom is much too small. There is a sufficiency of materials in very fair condition; and, otherwise, the organization is satisfactory. 2. Five-sevenths of the pupils enrolled attend very regularly, and the punctuality is in the main good. The government is firm and judicious, and the order and moral tone in most respects good. 3. The course of instruction is complete, except that needlework is not taught. The classification is correct, and the lesson documents are framed with very fair skill and appear to be duly observed. The teaching seems earnest and painstaking, and the methods are of very fair quality. The pupils are attentive under examination and show fair mental training. Their average proficiency is from fair to very fair.

**URALLA, P. (V.)** :—General inspection, 24th and 25th April.

Numbers enrolled :—Boys, 54 ; girls, 41 ; total, 95.

Numbers present :—Boys, 46 ; girls, 36 ; total, 82.

1. In all essential points the material condition of the school premises is good. The supply of books is at present hardly adequate, and the sitting accommodation is too limited for the present attendance of pupils; in all other respects the equipment and organization are fully satisfactory. 2. The pupils are with few exceptions regular and punctual, neat in appearance, and readily obedient to orders. The government appears free from harshness or severity, but is firm, equable, and effective. The moral tone of the school is good. 3. The course of instruction is complete and judiciously regulated, and the teaching is earnest and marked by very fair skill. As a whole the pupils are very attentive under examination, work freely, and evince very fair mental training. The average proficiency of the pupils is from fair to very fair; and in all its aspects the school is in a very promising condition.

**VIOLET DALE, P. (V.)** :—General inspection, 17th and 25th February.

Numbers enrolled :—Boys, 22 ; girls, 7 ; total, 29.

Numbers present :—Boys, 18 ; girls, 6 ; total, 23.

1. The schoolhouse, though old, is in very fair condition; and there is a reasonably good supply of furniture, apparatus, and books. The organization is in general correct, and the keeping of the records, on the whole, satisfactory. 2. The pupils are regular and fairly punctual. The discipline and general order are fair; but drill is not sufficiently understood or practised to secure the necessary precision and uniformity of action. 3. All the prescribed subjects are taught, and the methods, as far as noted, are of tolerable merit. There appears, however, a necessity for more frequent and thorough recapitulation and examination. The average proficiency of the pupils ranges from moderate to tolerable.

**WALLABADAH, P. (N.-V.)** :—General inspection, 3rd April.

Numbers enrolled :—Boys, 27 ; girls, 23 ; total, 50.

Numbers present :—Boys, 26 ; girls, 23 ; total, 49.

1. The schoolroom is too small and the grounds are unfenced. The stock of books is inadequate, but otherwise the school is very fairly supplied, both as regards furniture and apparatus. 2. The pupils are regular and punctual. The discipline is firm and effective; the order very good, save in the matter of marching, and the moral tone creditable. 3. All the prescribed subjects are taught, and the lesson documents are framed with intelligence and appear to be duly observed. The teaching is energetic and skilful, and the pupils are trained to habits of self-reliance and industry. They are very attentive under examination, and their attainments are satisfactory for their ages and period of enrolment. The average proficiency is fair.

**WAUCHOPE, P. (N.-V.)** :—General inspection, 14th May.

Numbers enrolled :—Boys, 19 ; girls, 16 ; total, 35.

Numbers present :—Boys, 14 ; girls, 11 ; total, 25.

1. The schoolhouse is not central, and is built on a low, damp, piece of brush land, difficult of access in even moderately wet weather. The furniture is sufficient and of moderate quality, but owing to the shape of the schoolroom, not well arranged. There is a sufficiency of books and apparatus, all in fair condition. 2. About two-thirds of the pupils attend regularly and punctually. The discipline in other respects is poor in its effects, the pupils being in most points ignorant of order, though in general quiet and obedient. 3. The instruction is but indifferently regulated, and the teaching stiff and mechanical. The lesson programmes are imperfect, and no register of lessons has been kept for a long time past. The average proficiency of the pupils is indifferent.

**WOODFORD DALE, P. (V.)** :—General inspection, 19th September.

Numbers enrolled :—Boys, 19 ; girls, 13 ; total, 32.

Numbers present :—Boys, 15 ; girls, 9 ; total, 24.

1. The premises are commodious and well adapted for school purposes, and except that the external wood-work needs painting, the state of repair is good. A neat little flower-garden has been formed by the teacher since his appointment, and the general aspect of the school is cheerful and inviting. A clock is wanted; otherwise, the organization is reasonably complete. 2. The attendance is low, and is affected prejudicially by the existence of a Provisional School about half a mile distant, on the opposite bank of the

the river. Nine-tenths of the pupils enrolled attend regularly, and the punctuality is also good. The discipline is sound and vigorous, and the order and moral tone good. 3. The course of instruction is complete and well regulated, and the methods fair, and applied with zeal and intelligence. The attention of the pupils under examination is very good, and the degree of mental training evinced fair. The average proficiency approaches fair. The present teacher has only been in charge for a short time.

WOODFORD LEIGH, P. (V.) :—General inspection, 2nd October.

Numbers enrolled :—Boys, 31 ; girls, 36 ; total, 67.  
Numbers present :—Boys, 29 ; girls, 30 ; total, 59.

1. The premises are suitable, well arranged, and in good repair, except that the wood-work needs painting. The furniture is insufficient for the present attendance, but the stock of books and apparatus is ample and in good condition. 2. Nearly every child of the school age in the district attends the school, and three-fourths of the number enrolled are very regular. Except in the case of one family, the degree of punctuality is good. The government is mild but firm, and the moral tone good. 3. Singing is not taught, but otherwise the course of instruction is complete. The lesson documents are suitable and appear to be carefully observed. The methods are not of the most modern cast, but anything defective in them is more than counterbalanced by the care and energy shown in the teaching. The pupils are very attentive under examination, and work with a degree of vigour rarely met with in country schools. The average proficiency is from fair to very fair.

WOODFORD PARK, P. (N.-V.) :—General inspection, 1st October.

Numbers enrolled :—Boys, 20 ; girls, 29 ; total, 49.  
Numbers present :—Boys, 20 ; girls, 29 ; total, 49.

1. The building is too small and otherwise unsuitable, and is in bad repair and infested with the white ant. Most of the furniture is of a fair description, but it is insufficient in quantity, and rude contrivances have to be made by the teacher to accommodate the pupils. The stock of books and apparatus is adequate, and generally speaking in good condition. In other points, as far as the teacher can be held accountable, the organization is satisfactory. 2. There is a good attendance of pupils, and nearly all are regular and punctual. In other respects the discipline is very fairly effective, and secures good order and a healthy moral tone. 3. The course of instruction is complete and regulated by the usual documents, in the preparation of which neatness and fair judgment are shown. The classification is correct on the whole, and the methods rate at from tolerable to fair. The pupils are readily attentive under examination, and show fair mental training. The proficiency averages from tolerable to fair.

WYRALLAH, P. (V.) :—General inspection, 16th October.

Numbers enrolled :—Boys, 25 ; girls, 41 ; total, 66.  
Numbers present :—Boys, 23 ; girls, 35 ; total, 58.

1. Generally speaking the premises are in very good condition and well adapted for school purposes. The ground however is unfenced, and a weather-shed is much required, as there is little or no shelter afforded the children from sun or rain. The equipment of the school as regards furniture, apparatus, and books is reasonably good, and the organization otherwise is very fair. 2. The school is attended by about 80 per cent. of the children available, and a fair degree of regularity and punctuality is secured. The government is not sufficiently vigorous and exacting, and the minutiae of order are in a great measure overlooked. The moral tone is not above tolerable. 3. Singing is not taught, and object lessons have been given only in a desultory sort of way to the first class. The methods appear tolerable as far as noted, but the average proficiency falls below this mark, owing no doubt to the defects in the discipline. The average proficiency is from moderate to tolerable, and the pupils show only moderate mental training.

## II.—PROVISIONAL SCHOOLS.

BRUSGROVE, Prov. (N.-V.) :—General inspection, 17th September.

Numbers enrolled :—Boys, 9 ; girls, 9 ; total, 18.  
Numbers present :—Boys, 7 ; girls, 7 ; total, 14.

1. The building is altogether unfit for school purposes, being too small, badly shaped, and out of repair. The furniture is more than sufficient for the attendance, but only of very moderate quality ; and there is an ample stock of apparatus and books. The school records continue in an unsatisfactory state. 2. The attendance is small. The children are quiet and respectful, but otherwise ignorant of order ; and the government is deficient in energy and tact. 3. All the prescribed subjects but singing are taught, but the lesson documents are of indifferent quality and not properly observed. The methods are poor in themselves, and the teaching lacks spirit. Little mental activity on the part of the pupils is shown. The average proficiency is very moderate.

CASINO S., Prov. (N.-V.) :—General inspection, 13th October.

Numbers enrolled :—Boys, 13 ; girls, 16 ; total, 29.  
Numbers present :—Boys, 11 ; girls, 15 ; total, 26.

1. The schoolroom is small and but moderately suitable in other respects ; but there is a probability that steps will be taken shortly for the erection of a proper building. The furniture and apparatus are reasonably good and otherwise the organization is fair. 2. About four-fifths of the pupils attend regularly and punctually ; and in other points the results of the discipline leave little room for complaint, the children being quiet and respectful in their demeanour, and in fair order. 3. Singing and needlework are omitted from the course of instruction. The lesson documents are tolerably appropriate and appear to be observed ; and the classification of the pupils is in general judicious. The methods and general results of instruction may be estimated at about tolerable.

COCKBURN RIVER, Prov. (N.-V.) :—General inspection, 26th March.

Numbers enrolled :—Boys, 18 ; girls, 18 ; total, 36.  
Numbers present :—Boys, 11 ; girls, 12 ; total, 23.

1. Since last inspection a sufficient supply of good furniture has been procured, and the playground has been enclosed with a substantial fence. There is a fair stock of books and apparatus ; and in other respects the organization is reasonably complete. 2. The pupils are in general regular and punctual, well behaved, and in tolerable order. School drill is not understood, and the various class movements are rather clumsily performed. 3. The prescribed course of instruction is followed ; the classification is, on the whole, correct, and the time-table and lesson programmes tolerably suitable. No lesson register has, however, been kept for nine months past. The instruction seems painstaking, but the methods are rather mechanical. The average proficiency of the pupils is tolerable.

CODRINGTON,

CODRINGTON, Prov. (V.) :—General inspection, 13th October.

Numbers enrolled :—Boys, 12 ; girls, 11 ; total, 23.

Numbers present :—Boys, 8 ; girls, 6 ; total, 13.

1. The schoolhouse, which is a new one, has been erected entirely out of local contributions, and is very fair of its kind. It is fairly furnished and supplied with the necessary apparatus, but the stock of books is at present inadequate. 2. The children are irregular and unpunctual in their attendance and poorly trained to habits of order—the younger ones being very unsteady and talkative. The government is lax and without tact, animation, or energy. 3. The classification is tolerably correct, but no programmes of lessons have been prepared, nor has any register of lessons been kept for some time back. The methods are indifferent in themselves, and the teaching languid and mechanical. The average proficiency of the pupils is indifferent.

COLDSTREAM LOWER, Prov. (N.-V.) :—General inspection, 5th September.

Numbers enrolled :—Boys, 12 ; girls, 12 ; total, 24.

Numbers present :—Boys, 8 ; girls, 12 ; total, 20.

1. The schoolroom is a very fair one, but the site, although perhaps the best available, has several objectionable features. The general equipment is tolerably satisfactory. 2. The pupils appear to be reasonably regular and punctual, and on the whole their behaviour is satisfactory. The details of order, however, are not observed. 3. No lesson programmes are prepared, and the time-table is imperfect. The full course of instruction has not yet been followed ; but the books and apparatus had but just arrived prior to the inspection. The teaching needs to be conducted with greater animation and energy. The average proficiency of the pupils is moderate.

COLDSTREAM UPPER, Prov. (V.) :—General inspection, 4th September.

Numbers enrolled :—Boys, 23 ; girls, 19 ; total, 42.

Numbers present :—Boys, 14 ; girls, 17 ; total, 31.

1. The schoolhouse is suitable, and on the whole in good repair. The desks are of very fair quality, but the forms are clumsy and heavy. The stock of working materials is sufficient, except in the case of First Books. In other respects the organization is passable. 2. About three-fourths of the children attend regularly, and the degree of punctuality is fair. In other points the discipline is tolerably effective, and the children are obedient and in general well-behaved. 3. All the prescribed subjects are taught, but the methods are rather mechanical and not calculated to develop the mental faculties of the children. The teaching, however, is not wanting in industry. The average proficiency of the pupils is moderate.

ENNIS, Prov. (N.-V.) :—General inspection, 15th May.

Numbers enrolled :—Boys, 20 ; girls, 15 ; total, 35.

Numbers present :—Boys, 9 ; girls, 11 ; total, 20.

1. The schoolhouse is but moderately suitable, and is not in good repair. The furniture is sufficient and fair of its kind, and the stock of books and apparatus ample for present requirements. 2. Very fair regularity and punctuality of attendance prevail. The order is fair, but drill is not practised ; and the inspection of the children before entering school is not as thorough as it should be. 3. The teaching is fairly regulated, and the methods suitable. The average proficiency of the pupils is from tolerable to fair.

HARWOOD ISLAND, Prov. (N.-V.) :—General inspection, 20th August.

Numbers enrolled :—Boys, 19 ; girls, 15 ; total, 34.

Numbers present :—Boys, 11 ; girls, 9 ; total, 20.

1. The schoolhouse (a slab building) is good of its kind, and sufficient for present requirements ; and there is a very fair supply of furniture, apparatus, and books. In other respects the organization is passable. 2. Usually four-fifths of the number enrolled attend regularly, and are fairly punctual. The discipline is fair, and the order and moral tone reasonably satisfactory. On the whole, however, the children are not as neat and clean as they should be. 3. All the ordinary subjects but singing are taught. The classification is correct, and the lesson-documents fairly suitable. The methods are of tolerable merit, and the average proficiency of the pupils is from tolerable to fair.

KENTUCKY, Prov. (N.-V.) :—General inspection, 10th April.

Numbers enrolled :—Boys, 5 ; girls, 15 ; total, 20.

Numbers present :—Boys, 1 ; girls, 5 ; total, 6.

1. The schoolhouse is fair for the place, but in need of repair. Out-offices have not yet been provided. The supply of furniture, apparatus, and books is fairly sufficient and suitable. 2. The attendance of the pupils is not regular ; and the teacher represents that the parents are very indifferent with respect to the education of their children. The discipline is weak ; but the few pupils present at examination appeared quiet and well-behaved. 3. The classification of the pupils and arrangement of the lesson documents are tolerably correct ; but the methods employed are poor in themselves, and the teaching lacks vigour, and is but little calculated to develop the mental faculties of the children. The average proficiency is from indifferent to moderate.

LAWRENCE, Prov. (N.-V.) :—General inspection, 11th September.

Numbers enrolled :—Boys, 14 ; girls, 22 ; total, 36.

Numbers present :—Boys, 8 ; girls, 7 ; total, 15.

1. The general condition of the premises is very indifferent, and a new and suitable schoolhouse should be provided without delay. The equipment, as far as books and apparatus are concerned, is very fair. In other respects the organization is tolerable. 2. About half of the pupils attend irregularly, and a large number also appear to be unpunctual. Better results in these respects may reasonably be expected of the teacher. The children are timid and only moderately trained to habits of order. 3. All the prescribed subjects but singing and needlework are taught. The methods are of moderate quality, but the pupils do not work with any degree of vigour. Their average proficiency is moderate.

SOUTH ARM, Prov. (N.-V.) :—General inspection, 18th September.

Numbers enrolled :—Boys, 20 ; girls, 19 ; total, 39.

Numbers present :—Boys, 11 ; girls, 14 ; total, 25.

1. Extensive repairs to the premises are required ; but in view of their general unfitness it is desirable that a new building should be provided. Proper out-offices are also necessary. The furniture is sufficient, and with slight alteration would be fairly suitable ; and the supply of books and apparatus is adequate. 2. About five-eighths of the pupils enrolled attend regularly, and very fair punctuality is secured. The children are clean and well-behaved ; and the government, which appears firm and consistent, is in most other respects fairly effective. 3. The course of instruction is complete and fairly regulated, the methods of tolerable merit, and the teaching earnest. The average proficiency exceeds tolerable.

## SOUTHGATE LOWER, Prov. (N.-V.) :—General inspection, 19th September.

Numbers enrolled :—Boys, 19 ; girls, 24 ; total, 43.  
 Numbers present :—Boys, 16 ; girls, 14 ; total, 30.

1. The school is held in the Wesleyan Chapel which, though large enough, is so crowded with furniture as to obstruct the work of teaching, and give the interior an untidy aspect. Out-offices and a playground for the children are not provided. The school furniture proper is suitable, but insufficient. The stock of working materials is reasonably good. 2. About three-fourths of the pupils are regular and punctual. In other respects the discipline is not so satisfactory. The supervision of the pupils is lax, and the younger ones are very talkative and restless. The various class movements are noisy and irregular. 3. The lesson documents are of fair quality, but the instruction is very partial in its effects, owing in a great measure to the minute and complicated classification which obtains, no fewer than six divisions being formed in two classes. The pupils as a whole are fairly attentive under examination, but work with indifferent energy. The average proficiency is very moderate.

## TYNEDALE, Prov. (N.-V.) :—General inspection, 1st October.

Numbers enrolled :—Boys, 5 ; girls, 11 ; total, 16.  
 Numbers present :—Boys, 5 ; girls, 10 ; total, 15.

1. The schoolhouse is fair of its kind, and the furniture is sufficient, but rough—the forms especially so. The stock of books is too small, the teacher having withheld his requisition for a fresh supply. 2. The attendance is small and not very regular or punctual, and although the children are fairly behaved the various class movements are made without order or uniformity. 3. The classification is moderately correct, but the lesson documents are inappropriate and of little utility. The teaching is mechanical, and induces little mental effort on the part of the pupils. The average proficiency is about moderate.

## WOMBAN, Prov. (V.) :—General inspection, 22nd August.

Numbers enrolled :—Boys, 23 ; girls, 16 ; total, 39.  
 Numbers present :—Boys, 10 ; girls, 7 ; total, 17.

1. The schoolhouse is suitable and in good repair, but the felled timber and new growth of brushwood in the playground require removing. The stock of books and apparatus is sufficient, and on the whole in good condition. In other respects the organization is fair. 2. Three-fourths of the children enrolled attend regularly, but the attendance was small on the day of examination on account of rain. Drill is not understood, and the order is not precise. The children are shy and awkward, and can with difficulty be made to speak audibly, and the attention of the first and second class pupils is unsteady. 3. The classification is on the whole appropriate, and the lesson documents are suitable. The methods are of moderate quality, and the teaching painstaking. The average proficiency of the pupils is from moderate to tolerable.

## WOODBURN, Prov. (N.-V.) :—General inspection, 14th October.

Numbers enrolled :—Boys, 17 ; girls, 25 ; total, 42.  
 Numbers present :—Boys, 14 ; girls, 24 ; total, 38.

1. The schoolroom is used as a Presbyterian place of worship, and a large space is occupied by un-  
 gainly church furniture. The school furniture is sufficient, but not well arranged, and the stock of books and apparatus is adequate, and in general in good condition. 2. The attendance has improved both in point of numbers and regularity. The pupils are not, as a whole, clean and tidy in appearance, and the various class movements are irregular and noisy. Their general demeanour however is fair. 3. All the prescribed subjects are taught, but the classification is not judicious, many of the pupils having been advanced prematurely. The teaching seems active and energetic, but is not penetrative, the pupils being too little called upon to exert themselves. Proper recapitulation and examination are omitted. The average proficiency is little beyond moderate.

## III.—HALF-TIME SCHOOLS.

## BEECHWOOD, H. T. (N.-V.) :—General inspection, 12th May.

Numbers enrolled :—Boys, 8 ; girls, 9 ; total, 17.  
 Numbers present :—Boys, 6 ; girls, 6 ; total, 12.

1. The school building is suitable and in good repair, except that the slabs need closing. Out-offices have not yet been provided, nor is the school-ground fenced. The stock of working materials is fair. 2. The pupils are with few exceptions regular and punctual, quiet, obedient, and respectful in their demeanour, but otherwise in indifferent order. School drill seems to be little understood or practised. 3. All the essential subjects are taught. The time-table and lesson programmes are fairly suitable and appear to be adhered to. The teaching is painstaking but not sufficiently energetic, and the methods employed rate at about moderate. The average proficiency of the pupils is from moderate to tolerable.

## HUNTINGDON, H. T. (N.-V.) :—General inspection, 12th May.

Numbers enrolled :—Boys, 6 ; girls, 6 ; total, 12.  
 Numbers present :—Boys, 6 ; girls, 6 ; total, 12.

1. A new schoolhouse has been provided since last inspection, but proper out-buildings have yet to be erected. The furniture is sufficient and suitable, and, in general, in good condition ; and the stock of books and apparatus is ample. 2. The enrolment of pupils is small, but the attendance is very regular and rarely falls below the prescribed minimum. The children are well-behaved, but the various movements are not performed with the necessary quietness and uniformity. 3. All the essential subjects are taught, but in some the instruction has not been in accordance with the standard. The teacher is painstaking, but only moderately skilful. The average proficiency of the pupils is from moderate to tolerable.

## KILLALEE, H. T. (N.-V.) :—General inspection, 3rd December.

Numbers enrolled :—Boys, 5 ; girls, 12 ; total, 17.  
 Numbers present :—Boys, 4 ; girls, 6 ; total, 10.

1. This school is worked in conjunction with that at M'Intyre's Flat. The building is old and unsuitable, and the furniture, though fairly sufficient, is of indifferent quality. There is a fair supply of books and apparatus. 2. The attendance, generally speaking, is regular and punctual, though lower than usual on the day of inspection. In other respects the results of the discipline are not satisfactory. A poor observance of order is shown, and some of the elder girls are frivolous and unsteady in their conduct. The moral tone of the school is moderate. 3. Singing and needlework are not taught ; otherwise, the prescribed course of instruction is followed. The teaching is marked by fair energy, but very little knowledge of method is shown, and only in the more mechanical acquirements is reasonable proficiency found. The average proficiency is moderate.

M'INTYRE'S

**M'INTYRE'S FLAT, H.-T. (N.-V.)** :—General inspection, 3rd December.

Numbers enrolled :—Boys, 7 ; girls, 15 ; total, 22.  
 Numbers present :—Boys, 4 ; girls, 12 ; total, 16.

1. The schoolhouse is a neat slab building, and fairly furnished and provided with the necessary books and apparatus. The desks and floor, however, are much disfigured by ink stains, and the First Books have been badly used. 2. The attendance has been low of late, owing to the shearing. School discipline is but little understood or practised, but, as a rule, the children are fairly behaved. 3. The teaching arrangements correspond with those of Killalee, H.-T., and the remarks on the methods, &c., in the report on that school apply here. The average proficiency of the pupils is tolerable.

**DONDINGALLONG, H.-T. (N.-V.)** :—General inspection, 10 June.

Numbers enrolled :—Boys, 9 ; girls, 6 ; total, 15.  
 Numbers present :—Boys, 9 ; girls, 6 ; total, 15.

1. The building is substantial, in good repair, and large enough for existing and prospective requirements. The furniture is sufficient and tolerably suitable, and the supply of books and apparatus fair. 2. The pupils are, on the whole, regular and punctual, in good order, and well trained to habits of diligence and self-reliance. 3. All the prescribed subjects but singing are taught, and the methods are tolerable in themselves, and applied with care and energy. The classification is correct, and the lesson documents are compiled with fair judgment. The pupils are attentive under examination, and show fair mental training. Their average proficiency is fair.

**SHERWOOD, H.-T. (V.)** :—General inspection, 10th June.

Numbers enrolled :—Boys, 7 ; girls, 8 ; total, 15.  
 Numbers present :—Boys, 7 ; girls, 8 ; total, 15.

1. A new building has been erected on the Council's property since last inspection, suitable in most respects, and fairly provided with furniture, apparatus, and books. 2 and 3. This school is worked in conjunction with Dondingallong, H.-T., and the remarks on the discipline and instruction made in the report on that school apply here. The average proficiency is from fair to very fair.

**STEVE KING'S PLAIN, H.-T. (N.-V.)** :—General inspection, 15th October.

Numbers enrolled :—Boys, 4 ; girls, 7 ; total, 11.  
 Numbers present :—Boys, 3 ; girls, 7 ; total, 10.

1. The building is only moderately suitable, and the slabs need closing. The supply of furniture, apparatus, and books is reasonably sufficient, but some of the latter appear to have been badly used. 2. The pupils are regular and punctual in their attendance ; but although quiet and obedient are shy and ignorant of order. 3. The classification of the pupils is bad, and no lesson programmes have been framed by which to regulate the teaching ; the methods are very mechanical and of little effect ; the average proficiency is very indifferent.

**TUCKI TUCKI, H.-T. (N.-V.)** :—General inspection, 16th October.

Numbers enrolled :—Boys, 5 ; girls, 6 ; total, 11.  
 Numbers present :—Boys, 5 ; girls, 6 ; total, 11.

1. The schoolhouse is a rough slab building, sufficiently large for the attendance, and tolerably furnished ; it is in need of some repairs, and a closet is required ; the stock of books and apparatus is ample and in good condition. 2. About five-sixths of the pupils enrolled attend regularly, and are punctual ; although quiet and obedient they are shy and ignorant of order. 3. The course of instruction is incomplete, the classification is bad, and no programmes have been prepared by which to regulate the teaching ; the methods are very mechanical, and the average proficiency of the pupils is from small to indifferent.

**SAUMAREZ CREEK, H.-T. (V.)** :—General inspection, 26th November.

Numbers enrolled :—Boys, 8 ; girls, 5 ; total, 13.  
 Numbers present :—Boys, 3 ; girls, 1 ; total, 4.

1. The premises are suitable, and in very fair repair, but they are not centrally situated ; there is a good supply of furniture and apparatus, and of all books but the First, which appear to have been destroyed by the careless handling of the children ; the general organization under the teacher is very indifferent, and the school records are not correctly kept. 2. The attendance is very small and irregular ; the government is extremely feeble and the order and moral tone bad. 3. The instruction is indifferently regulated, and the teaching mechanical ; only four 1st class pupils were present at examination, whose average proficiency is small.

J. D. BRADLEY,  
 Inspector of Schools, Armidale District.

**BATHURST DISTRICT.****INSPECTOR'S General Report for 1873.**

WITHIN the year 1873, twenty (20) schools or departments were brought into operation in this district, and at the close of the year the total number on the list was 110, viz. :—57 Public, 32 Provisional, 8 Half-time, and 13 Certified Denominational Schools. Preliminary steps were also taken for the establishment of 34 additional schools, and it is expected that the majority of these will be brought into operation within the first six months of 1874. The mining population of the district is not so large as it was in 1872, but the number of agricultural settlers has been considerably increased. In the whole district there are upwards of 12,000 children of a school-age ; and, all things considered, the means of education are adequately provided for about five-sixths of this population. The localities of importance which are still unprovided with the means of education are principally those named by Mr. Inspector McCredie in his report of this district for 1872. There is now some prospect, however, that decided steps will be taken (in 1874) towards providing schools for several of these localities. With a few exceptions the schools are well distributed in the district, and there are not many places where the number of existing schools could be reduced with any advantage to the interests of education. Bathurst is greatly in need of a Model Public School, and the townships of Orange, Sofala, Burrows, Young, and Grenfell, might each be better supplied with the means of education by one good Public School than by the number of rival schools now in operation. During the year new premises have been opened at Wyagdon and Perth. At Young, a superior vested building, for two departments, is nearly completed, and further steps have been taken towards providing suitable vested school buildings for Bathurst. One Denominational School (Grenfell R.C.) has been certified in the year, and one, which was certified (Bathurst Pres.), has been closed. The Bathurst Presbyterian school buildings are now occupied by the boys' department of the Public School.

Eighty-one (81) of the schools in operation have been visited, and of that number seventy-three (73) have been fully inspected in the year. As regards their material condition and organization—17 Public Schools range from fair to good, 16 are tolerable, and 10 are moderate; 6 Provisional Schools are tolerable and 8 are moderate; 3 Half-Time Schools are moderate; and 9 Certified Denominational Schools range from fair to good; 2 are tolerable, and 2 are moderate. Except in a few instances the school records are accurate, and, as far as the teachers can be considered responsible, the school premises are well kept, and their general aspect is pleasing. As regards the attendance of children at a large majority of the schools in the district, I have to report very unfavourably. From returns carefully obtained for the quarter ending September last, I find that the district has a school population of upwards of 12,000, and that of this population about one-half are enrolled for attendance at schools under the Council's supervision; about 1,200 are attending private schools; and the remainder (about 5,000) are not enrolled for school attendance. Further, three-fifths of the children not enrolled for school attendance reside within reasonable distances of existing schools; and of the 6,000 children enrolled at the Council's schools one-half are very irregular in their attendance. It follows, therefore, that of the whole school population in the district about one-fourth only are receiving regular instruction in our schools. Except as regards regularity, the discipline of the schools visited is fairly satisfactory, and their prevailing tone is good. The instruction has been carried on during the year with industry, zeal, and fidelity; and, considering the irregularity of the pupils' attendance, with fair success. As, however, I have only had charge of the district during 1873, I am not able to report very definitely as regards the actual improvement effected in the schools since their last inspection.

As a body, the teachers appear to be painstaking and industrious, and some among them are highly qualified for their work. All manifest a willingness to receive and act upon advice given them for the improvement of their schools. At the end of the year the teaching staff of the district consisted of 100 teachers, 10 assistants, and 10 pupil teachers.

The local supervision in the district is, on the whole, comparatively of little practical use; at the same time, however, there are a few School Boards who manifest a warm interest in the welfare of their schools, and whose attention to duty is all that it should be. Among these few I would especially name the Boards at Young and Grenfell. In Denominational Schools the local supervision is generally left to the clergy, and they, in most instances, attend to it with care and regularity.

With regard to the future prospects of education in the district, I am of opinion that within the next two (2) years nearly every locality where a population has settled will be provided with a school; but at the same time it will be impossible to bring the schools to a proper state of efficiency unless an enactment be passed to render school attendance compulsory. Further, without such enactment I fear a large proportion of the school population of the district will be allowed to grow up entirely without education.

Detailed statements (Annexes B and C), showing the condition of the schools inspected, are furnished as usual.

Bathurst, 19 February, 1874.

J. HUFFER,  
Inspector.

#### ANNEX B.

DETAILED STATEMENT of the condition of Schools inspected in the Bathurst District in 1873.

##### I.—PUBLIC SCHOOLS.

BATHURST, Primary (N.-V.) :—Visited, 10th, 11th, and 12th December, 1873.

Numbers present :—Boys, 82; girls, 70; total, 152.

1. The material condition and organization are the same as at last inspection. The school is well supplied with requisites. 2. The discipline is healthy. 3. All the prescribed subjects are taught. The classification is appropriate, the lesson documents are judiciously arranged, the methods are fairly suitable, and the teaching is conducted with much industry and painstaking. 4. The proficiency in the 2nd and 3rd classes ranges from tolerable to fair, and in the 4th class it is about very fair. Steps are now being taken towards the erection of the new vested buildings.

BATHURST, Infants (N.-V.) :—Visited, 11th and 12th December.

Numbers present :—Boys, 50; girls, 37; total, 87.

1. No alteration has been made in the premises since last inspection. The supply of requisites is sufficient. 2. The pupils are regular and punctual, and in all other respects the discipline is satisfactory. 3. The subjects of instruction are those prescribed. The classification is judicious, the lesson documents are well arranged, and the teaching is conducted with industry and skill. 4. The proficiency is very fair.

BLAYNEY (V.) :—Visited, 13th December.

Numbers present :—Boys, 28; girls, 30; total, 58.

1. The school and residence have been repaired, painted, and whitewashed since last inspection. The out-offices require screens, and additional accommodation in the schoolroom will soon have to be provided. The supply of requisites is fairly satisfactory. 2. The pupils enrolled are very fairly regular and punctual; and their order, attention, and general demeanour are satisfactory. 3. The prescribed subjects are taught. The classification is appropriate, the lesson documents are drawn up with care, and the teaching is conducted with earnestness and fair skill. 4. The proficiency ranges from fair to very fair.

BINALONG (V.) :—Visited, 3rd June.

Numbers present :—Boys, 17; girls, 14; total, 31.

1. The buildings and fences are in need of repairs, and new furniture should be provided. Additional requisites have been supplied since the date of inspection. 2. The discipline is only moderately satisfactory. 3. The prescribed subjects are taught, the classification is moderate, the instructional documents are not satisfactory, and the teaching is but moderately intelligent and effective. 4. The average proficiency is about moderate.

BOWENFELS (V.) :—Visited, 29th November.

Numbers present :—Boys, 14; girls, 10; total, 24.

1. New out-offices are much needed; otherwise, the material condition is very fair. The supply of requisites is satisfactory. 2. The pupils are punctual but only moderately regular. In other respects the discipline is satisfactory. 3. All the subjects but singing are included in the course of instruction. The classification is fairly judicious, the lesson documents are suitably arranged, and the teaching is carried on with intelligence and zeal. 4. The proficiency is nearly fair.

BURROWA (V.) :—Visited, 29th and 31st May.

Numbers present :—Boys, 28; girls, 10; total, 38.

1. The school grounds need planting and other improvements, and the teacher's house should be enlarged. The school is well supplied with requisites. 2. The discipline is fairly satisfactory. 3. The subjects

subjects of instruction are those prescribed. The classification is fairly appropriate. The lesson documents are only tolerably satisfactory, and the teaching, though carried on with industry, is not sufficiently penetrative. 4. The proficiency in the 1st class is very fair, but in the 2nd and 3rd classes it is only tolerable.

**BURKEVILLE (V.)** :—Visited, 19th September.

Numbers present :—Boys, 7 ; girls, 5 ; total, 12.

1. The schoolroom needs whitewashing, and the residence should be fenced. 2. The discipline is fair. 3. Singing is omitted from the course of instruction. The classification is appropriate, the lesson documents are tolerably satisfactory, and the teaching is carried on with moderate industry. 4. The proficiency of the pupils examined ranged from fair to very fair.

**COWRA** :—Visited, 19th November.

Numbers present :—Boys, 50 ; girls, 48 ; total, 107.

1. A verandah to the school building, a lavatory, a separate entrance to the class-room, and a porch for the hat-pogs are much needed. Otherwise, the material condition is good. 2. The pupils are regular and punctual, and in other respects the discipline is very fair. 3. All the prescribed subjects are taught. The classification is appropriate, the lesson documents are suitably arranged, and the teaching is carried on with much earnestness and industry. 4. The proficiency is above very fair. The attendance has greatly increased since last inspection.

**CANOBOLAS (N.-V.)** :—Visited, 9th October.

Numbers present :—Boys, 6 ; girls, 7 ; total, 13.

1. The situation is not central. The schoolroom and residence are in need of repair. The furniture and requisites are fairly suitable and sufficient. The property is kept with care by the teacher. A new vested building in a more central situation is much needed. 2. Except as regards attendance the discipline is tolerably satisfactory. 3. The course of instruction is that prescribed, the classification is fairly appropriate, and the lesson documents are tolerably satisfactory. The methods are defective, but the teaching is carried on with industry and care. 4. The average proficiency of the pupils examined was only moderate.

**CARGO (N.-V.)** :—Visited, 19th December.

Numbers present :—Boys, 18 ; girls, 5 ; total, 23.

1. The ground remains unfenced, the roof of the schoolroom is defective, and the windows are still unglazed. 2. The discipline is healthy, and the spirit of the school is pleasing. 3. The prescribed subjects are taught. The classification is appropriate, the lesson documents are fairly satisfactory, and the teaching is conducted with earnestness and fair skill. 4. The proficiency is above fair.

**CARCOAR (V.)** :—Visited, 18th September.

Numbers present :—Boys, 19 ; girls, 15 ; total, 34.

1. The schoolroom needs repairs and whitewashing, and the teacher's residence should be enlarged. A separate playground should be provided for the girls. 2. The pupils enrolled are fairly regular and punctual, but the enrolment is much smaller than it should be. In other respects the discipline is fairly satisfactory. 3. Singing is not taught ; otherwise, the course of instruction is that prescribed. The classification is fairly appropriate, the lesson documents are carefully drawn up, and the teaching is carried on with intelligence. 4. The proficiency ranges from fair to very fair. The general tone of the school is not pleasing.

**CUNNINGAR (V.)** :—Visited, 5th June.

Numbers present :—Boys, 11 ; girls, 12 ; total, 23.

1. The floors in schoolroom and residence should be boarded, the walls should be repaired, and a verandah should be erected to preserve the building. The out-offices need rebuilding. 2. The discipline is satisfactory. 3. The prescribed subjects are taught with intelligence and earnestness. The classification is appropriate and the necessary lesson documents are carefully drawn up. 4. The proficiency ranges from fair to very fair.

**EGLINTON (N.-V.)** :—Visited, 12th December.

Numbers present :—Boys, 21 ; girls, 13 ; total, 34.

1. The material condition is only moderate. New vested buildings are greatly needed. The supply of requisites is sufficient, and new furniture has been provided since last inspection. 2. The discipline is healthy, and the prevailing tone of the school is pleasing. 3. The prescribed subjects are taught—singing excepted. The classification is appropriate, and the instruction is properly regulated. The methods are fairly suitable, and they are applied with earnestness and care. 4. The proficiency ranges from tolerable to fair.

**EVANS PLAINS (V.)** :—Visited, 9th December.

Numbers present :—Boys 9 ; girls, 10 ; total, 19.

1. The material condition and organization are tolerable. The residence is too small, and the school furniture is only moderately suitable. The supply of school requisites is fairly satisfactory. 2. The discipline is fair. 3. The prescribed subjects are taught (singing excepted), the classification is fairly judicious, and the lesson documents are arranged with care. The methods are tolerably suitable, and they are applied with industry. 4. The proficiency is about tolerable.

**FREDERICKTOWN (N.-V.)** :—Visited, 13th October.

Numbers present :—Boys, 7 ; girls, 8 ; total 15.

1. The material condition and organization are fair. The supply of requisites is sufficient, and the whole property is kept with care by the teacher. 2. Except as regards regularity, the discipline is very fair. 3. Singing and drawing are not taught ; otherwise, the course of instruction is that prescribed. The classification is fairly appropriate, the lesson documents are satisfactory, and the teaching is carried on with intelligence and industry. 4. The average proficiency is fair. It was raining on the day of inspection, and hence the number in attendance was small.

**GRENFELL, Primary (V.)** :—Visited, 26th and 27th June.

Numbers present :—Boys, 65 ; girls, 55 ; total, 120.

1. The classroom is too small, and there is no residence for the teacher ; otherwise, the material condition and organization are satisfactory. The supply of requisites is sufficient. 2. The discipline is sound. 3. The prescribed subjects are taught, the classification is appropriate, and the lesson documents are judiciously drawn up. The methods are good, and the teaching is conducted with intelligence, earnestness, and painstaking. 4. The proficiency in the 4th class is good ; in the 3rd class it is above very fair ; and in the 2nd class it is nearly fair.

**GRENFELL**

GREENFELL (Infants'—V.) :—Visited, 26th June.

Numbers present :—Boys, 54 ; girls, 50 ; total, 104.

1. The material condition and organization are satisfactory, and the school is well supplied with requisites. 2. The discipline is healthy. 3. The prescribed subjects are taught with zeal and painstaking ; and the instruction is carefully regulated by the necessary documents. 4. The proficiency ranges from fair to very fair.

GUYONG (V.) :—Visited, 7th April, 1873.

Numbers present :—Boys, 24 ; girls, 12 ; total, 36.

1. The closets should be screened, and a playshed and lavatory should be provided. The teacher's residence is too small. The supply of requisites is sufficient, and the whole property is kept with care by the teacher. 2. The pupils are fairly punctual, but only moderately regular in their attendance. In other respects the discipline is satisfactory. 3. The prescribed subjects are taught, the classification is fairly appropriate, and the instructional documents are satisfactory. The school work is carried on with industry and care. 4. The proficiency ranges from tolerable to fair.

HARTLEY (V.) :—Visited, 30th July.

Numbers present :—Boys, 9 ; girls, 10 ; total, 19.

1. The material condition and organization are tolerable, the school is well supplied with requisites, and the property is kept with care. 2. The discipline is fair, and the prevailing tone of the school is pleasing. 3. The prescribed subjects are taught, the classification is fairly appropriate, and the instruction is regulated by the usual documents. The methods are mechanical, but the teaching is conducted with industry and painstaking. 4. The average proficiency is nearly tolerable.

HARTLEY VALE (N.-V.) :—Visited, 29th July.

Numbers present :—Boys, 19 ; girls, 7 ; total, 26.

1. A new schoolroom is greatly needed, and the playground should be cleared and fenced. The supply of requisites is sufficient. 2. The discipline is healthy. 3. The prescribed subjects are taught, the pupils are properly classified, and the lesson documents are satisfactory. The methods are suitable, and they are applied with earnestness. 4. The proficiency is fair.

KELSO (N.-V.) :—Visited, 8th December.

Numbers present :—Boys, 24 ; girls, 22 ; total, 46.

1. The situation is not central ; a supply of water is not provided, and the school buildings need repairs and white-washing. The supply of requisites is fairly satisfactory. 2. The discipline is satisfactory in all respects. 3. The prescribed subjects are included in the course of instruction, and in addition thereto, Algebra, Euclid, and French, are taught to a few advanced pupils. The classification is appropriate, the lesson documents are satisfactory, and the teaching is carried on with earnestness and skill. 4. The proficiency is very fair.

LUCKNOW (N.-V.) :—Visited, 10th October.

Numbers present :—Boys, 17 ; girls, 27 ; total, 44.

1. The material condition and organization are the same as at last inspection. A new vested building is much needed. 2. The pupils are very fairly punctual, but only moderately regular in their attendance. In other respects the discipline is satisfactory. 3. The prescribed course of instruction is followed, the classification is fairly judicious, and the schoolwork is carefully regulated. The methods are fairly intelligent, and they are applied with earnestness and painstaking. 4. The average proficiency is nearly fair.

LIMEKILNS (V.) :—Visited, 7th May.

Numbers present :—Boys, 13 ; girls, 15 ; total, 28.

1. The roof of the schoolroom needs repair, and both schoolroom and classroom should be lime-washed. The out-offices need screens, and the residence is too small. The supply of requisites is sufficient. 2. The pupils are only moderately regular and punctual, but in other respects the discipline is fairly satisfactory. 3. The prescribed subjects are taught (singing excepted), the classification is appropriate, the instruction is fairly well regulated, and the teaching is conducted with tolerable skill. 4. The proficiency ranges from tolerable to fair in the 1st and 2nd classes. In the 3rd class it is tolerable.

MAIN CAMP (N.-V.) :—Visited, 18th October.

Numbers present :—Boys, 33 ; girls, 25 ; total, 58.

1. The material condition and organization are the same as at last inspection, but a new stone building is now being erected. The supply of requisites is sufficient. 2. The discipline is satisfactory in all respects. 3. The prescribed subjects are taught (singing excepted), the classification is judicious, and the lesson documents are suitably arranged. The methods are intelligent, and they are applied with energy and painstaking. 4. The average proficiency is nearly very fair.

MOUNT VICTORIA (N.-V.) :—Visited, 21st October.

Numbers present :—Boys, 26 ; girls, 21 ; total, 47.

1. A suitable residence for the teacher is needed. The material condition and organization of the school are only tolerable. The supply of requisites is fairly satisfactory. 2. The discipline is fair. 3. The prescribed subjects are taught, and the classification is tolerably appropriate. The lesson documents are moderately satisfactory. The methods are mechanical, but they are applied with much industry. 4. The average proficiency is a little above moderate. At the date of inspection the school had only been a short time in operation.

MACQUARIE PLAINS (N.-V.) :—Visited, 15th October.

Numbers present :—Boys, 37 ; girls, 21 ; total, 58.

1. The building is a rough bark structure, tolerable suitable for use as a temporary school-room. It is well supplied with furniture and requisites. 2. The discipline is in all respects satisfactory. 3. The prescribed subjects are taught, the classification is appropriate, and the instruction is properly regulated. The methods are suitable, and the teaching is carried on with earnestness, intelligence, and industry. The school has only been in operation during 1873. 4. The average proficiency is nearly very fair.

MEADOW FLAT (V.) :—Visited, 12th September.

Numbers present :—Boys, 16 ; girls, 5 ; total, 21.

1. The position of the school is not sufficiently central. The buildings are in need of repairs. The supply of requisites is sufficient. 2. The pupils are only moderately regular and punctual, and the general discipline is weak. 3. The prescribed subjects are taught—singing excepted. The classification is moderately appropriate, the instruction is not skilful, and the pupils are wanting in thoughtful self-reliance. 4. The general proficiency is about moderate.

## MUTTON'S FALLS (N.-V.) :—Visited, 10th September.

Numbers present :—Boys, 8 ; girls, 8 ; total, 16.

1. There is no teacher's residence, but otherwise the material condition and organization are satisfactory. A few additional requisites are needed. 2. The discipline is in all respects satisfactory. 3. The prescribed subjects are taught, and the classification is judicious. The instruction is carefully regulated and registered, the methods are intelligent, and the school work is carried on by teacher and pupils with energy and painstaking. 4. The proficiency ranges from tolerable to fair.

## MARENCO (V.) :—Visited, 27th May.

Numbers present :—Boys, 14 ; girls, 17 ; total, 31.

1. The out-offices need re-building, and the school ground is still unfenced. The supply of requisites is sufficient, and the property is very carefully kept. 2. The discipline is satisfactory. 3. Singing is not taught ; otherwise, the course of instruction is that prescribed. The classification is appropriate, the lesson documents are carefully drawn up, and the teaching is carried on with intelligence and painstaking. 4. The average proficiency ranges from fair to very fair.

## O'CONNELL (N.-V.) :—Visited, 28th November.

Numbers present :—Boys, 8 ; girls, 10 ; total, 18.

1. The school premises are tolerably suitable for temporary use, but new vested buildings are much needed. The supply of requisites is sufficient. 2. Except as regards regularity the discipline is very fair. 3. The prescribed subjects are taught (singing excepted), the classification is fairly appropriate, and the lesson documents are arranged with much care. The methods are tolerably suitable, and they are applied with industry. 4. The proficiency is above tolerable.

## ORANGE (V.) :—Visited, 3rd and 4th April.

Numbers present :—Boys, 57 ; girls, 27 ; total, 84.

1. Lime-washing, painting, and some plastering are required in the schoolroom and classroom, and the out-offices should be screened. The back yard to the residence should be fenced, and the school ground should be planted. 2. The general discipline is satisfactory ; but the school should have a much larger enrolment of pupils than it has at present. 3. The subjects of instruction are those prescribed, the classification is fairly satisfactory, the lesson documents are complete, the methods are suitable, and the teaching is carried on with industry and painstaking. 4. The proficiency ranges from fair to very fair.

## PEEL (V.) :—Visited, 1st and 3rd December.

Numbers present :—Boys, 14 ; girls, 18 ; total, 32.

1. The premises are in the same condition as at last inspection. Some repairs are required, and new furniture should be provided. The supply of requisites is sufficient. 2. The pupils are punctual but not regular in their attendance. In other respects the discipline is tolerable. 3. The prescribed subjects are taught—singing excepted. The classification is tolerable, the lesson documents are fairly satisfactory, and the teaching is carried on with industry. 4. The proficiency is about tolerable.

## RYDAL (V.) :—Visited, 29th November.

Numbers present :—Boys, 14 ; girls, 9 ; total, 23.

1. There is no residence, and the school ground still remains unfenced. The supply of requisites is sufficient. 2. Except as regards regularity the discipline is fair. 3. Singing is not included in the course of instruction. The classification is tolerably appropriate, the lesson documents are fairly well arranged, and suitable methods are practised. The teaching is wanting in thoroughness and vigour. 4. The proficiency is about tolerable.

## ROCKLEY (V.) :—Visited, 17th December.

Numbers present :—Boys, 19 ; girls, 13 ; total, 32.

1. The residence is too small, the school ground is unfenced, and new closets are required. The supply of requisites is sufficient. 2. The discipline is tolerably healthy. 3. The course of instruction is that prescribed, the classification is tolerably appropriate, and the instruction is regulated by the usual documents. The methods are fairly suitable, but they should be applied with more thoroughness. 4. The proficiency is below tolerable.

## SPRING GROVE (N.-V.) :—Visited, 8th April.

Numbers present :—Boys, 26 ; girls, 22 ; total, 48.

1. New vested buildings are urgently needed. The supply of requisites is sufficient, and the whole property is kept with care by the teacher. 2. Except as regards regularity the discipline is very fair. 3. The subjects are those prescribed, the classification is appropriate, and the instruction is fairly well regulated. The methods are suitable and intelligently applied. 4. The proficiency is above fair.

## TRAPOT SWAMP (V.) :—Visited, 16th December.

Numbers present :—Boys, 14 ; girls, 14 ; total, 28.

1. Some plastering, painting, and whitewashing are required in the schoolroom and residence ; and the entrance-gate to the school ground should be repaired. An additional supply of requisites is needed. 2. The pupils are very irregular, and in other respects the discipline is only moderately satisfactory. 3. The prescribed subjects are taught, and the classification is tolerably appropriate. The lesson documents are fairly well-arranged. The teaching is carried on with industry, but the pupils are not trained to thoughtful self-reliance. 4. The proficiency is only moderate.

## TIPPERARY GULLY (N.-V.) :—Visited, 14th June.

Numbers present :—Boys, 17 ; girls, 23 ; total, 40.

1. A new school building is much needed midway between "Tipperary Gully" and "Three-mile Rush." From the two localities there should be an enrolment of over 100 pupils. The material condition of the Tipperary Gully school is unsatisfactory. 2. Except as regards regularity the discipline is fair. 3. The prescribed course of instruction is followed, the pupils are fairly well classified, and the instruction is properly regulated. 4. The proficiency ranges from tolerable to fair.

## WALLERAWANG (N.-V.) :—Visited, 17th October.

Numbers present :—Boys, 29 ; girls, 21 ; total, 50.

1. The teacher's residence is too small, new out-offices are needed, and the schoolroom should be refloored and newly furnished. I was informed that the necessary improvements were to be effected during the Christmas vacation. The supply of requisites is sufficient. 2. The discipline is fairly satisfactory in all respects, and the attendance has considerably increased since last inspection. 3. Singing is the only subject omitted from the course of instruction. The classification is fairly judicious, and the instruction is regulated by the usual documents. The methods are fairly intelligent, but greater vigour is needed in their application. 4. The average proficiency is about tolerable.

WHITE ROCK (N.-V.) :—Visited, 8th December.

Numbers present :—Boys, 12 ; girls, 20 ; total, 32.

1. The school is conducted in the Wesleyan Chapel. A new vested building is much needed for the locality. The supply of requisites is sufficient. 2. The pupils are very fairly regular and punctual, and in other respects the discipline is fairly satisfactory. 3. The prescribed subjects are taught, the classification is fairly appropriate, and the lesson documents are satisfactory. The teaching is carried on with industry and fair skill.

WATTLE FLAT (V.) :—Visited, 2nd December.

Numbers present :—Boys, 31 ; girls, 15 ; total, 46.

1. The playground is unfenced, there is no residence, and the schoolroom is badly furnished. The supply of requisites is sufficient. 2. The pupils enrolled are fairly regular and punctual, but the enrolment is much smaller than it should be. In other respects the discipline is fair. 3. All the subjects but singing are included in the course of instruction. The classification is fairly appropriate, and the lesson documents are satisfactory. The methods are suitable, but more animation and vigour are required in their application. 4. The average proficiency is about tolerable.

WYAGDON (V.) :—Visited, 1st December.

Numbers present :—Boys, 19 ; girls, 12 ; total, 31.

1. The residence is too small ; otherwise, the material condition is good. The supply of requisites is sufficient. 2. The prescribed course of instruction is followed, the classification is appropriate, and the lesson documents are carefully arranged. The methods are suitable, and they are intelligently and industriously applied. 4. The proficiency is very satisfactory for the time the school has been in operation ; algebra, geometry, and Latin are taught to four boys in the third class.

WOMBAT (V.) :—Visited, 11th June.

Numbers present :—Boys, 24 ; girls, 27 ; total, 51.

1. When the improvements now being carried out are completed the material condition and organization will be satisfactory. 2. The discipline is good. 3. The prescribed subjects are taught with energy and skill. 4. The proficiency is above very fair.

YOUNG (V.) :—Visited, 16th and 17th June.

Numbers present :—Boys, 71 ; girls, 63 ; total, 134.

1. New school buildings are now being erected, and when they are completed the material condition and organization will be very satisfactory. Upon completion of the new buildings there will be a separate department for infants. 2. The discipline is on the whole very satisfactory. 3. The prescribed subjects are taught. The classification is appropriate, and the instruction is carefully regulated and registered. 4. The general proficiency is very fair.

#### HALF-TIME SCHOOLS.

FISH RIVER CREEK (V.) :—Visited, 9th September.

Numbers present :—Boy, 1 ; girls, 12 ; total, 13.

1. The buildings need repair, the schoolroom is badly lighted, and the desks are not properly arranged. The supply of requisites is fairly satisfactory. 2. The pupils are only moderately regular and punctual. The general discipline is weak. 3. Object lessons and singing are not taught to the first class. The lesson documents are only moderately well arranged, and the instruction is mechanical and ineffective. 4. The proficiency ranges from indifferent to moderate.

OBBERON (V.) :—Visited, 8th September.

Numbers present :—Boys, 8 ; girls, 10 ; total, 18.

1. The schoolroom needs a fireplace, suitable out-offices should be erected, and the school ground should be fenced. 2. Both teacher and pupils are unpunctual, and in other respects the discipline is only moderately satisfactory. 3. All the prescribed subjects are taught except singing. The classification is not appropriate, and the instruction is not properly regulated and registered. 4. The average proficiency is below moderate.

PLEASANT VALLEY (N.-V.) :—Visited, 9th September.

Numbers present :—Boys, 9 ; girls, 8 ; total, 17.

1. The schoolroom and residence need repairing and whitewashing, and the supply of school furniture is insufficient. 2. The pupils are only moderately regular and punctual, but in other respects the discipline is satisfactory. 3. Singing and drawing are omitted from the course of instruction. The classification is moderately appropriate ; the lesson documents are satisfactory. The teaching is mechanical and but moderately effective, but it is carried on with zeal and painstaking. 4. The average proficiency is a little above moderate.

#### PROVISIONAL SCHOOLS.

BACK CREEK :—Visited, 20th November.

Numbers present :—Boys, 9 ; girls, 12 ; total, 21.

1. There are no out-offices, but otherwise the material condition is tolerable. 2. The pupils are fairly regular and punctual. The general discipline is tolerable. 3. The prescribed subjects are taught, singing excepted. The classification is tolerably appropriate, and the instruction is regulated by the usual documents. The teaching is not skilful, but it is carried on with much industry and care. 4. The proficiency is moderate.

BRISBANE VALLEY :—Visited, 14th May.

Numbers present :—Boys, 11 ; girls, 12 ; total, 23.

1. The schoolground is not fenced, and there are no out-offices. 2. Teacher and pupils are unpunctual and the general discipline is weak. 3. Singing and drawing are omitted from the course of instruction. The necessary lesson documents are not used, and the teaching is desultory and ineffective. 4. The average proficiency is indifferent.

COOMBERG CREEK :—Visited, 21st November.

Numbers present :—Boys, 10 ; girls, 9 ; total, 19.

1. The material condition is the same as at last inspection, but steps are now being taken towards erecting additional buildings, in order to have a Public School established in the locality. 2. Except as regards regularity the discipline is fair. 3. The prescribed subjects are taught, the lesson documents are carefully arranged, and the teaching is carried on with earnestness and care. 4. The proficiency is fair.

CALABASH :—

## CALABASH :—Visited, 28th May.

Numbers present :—Boys, 11 ; girls, 6 ; total, 17.

1. The ground is unfenced, and the walls of the building need plastering. 2. The discipline is unsatisfactory in all respects. 3. Object lessons, singing, and drawing are not included in the course of instruction. The classification is defective, suitable lesson documents are not provided, and the teaching is very unsatisfactory. 4. The proficiency is *indifferent*.

## FISHER'S CREEK :—Visited, 29th May.

Numbers present :—Boys, 10 ; girls, 13 ; total, 23.

1. The school-ground is unfenced, and the closets require re-building. The schoolroom is small and badly lighted. The local committee have promised to have the necessary improvements effected. 2. The discipline is moderate. 3. The course of instruction is that prescribed, the classification is moderately appropriate, and the lesson documents are tolerably satisfactory. The teaching is mechanical and ineffective. 4. The average proficiency is *indifferent*.

## GALONG :—Visited, 4th June.

Numbers present :—Boys, 8 ; girls, 10 ; total, 18.

1. The school-ground is unfenced ; otherwise, the material condition is tolerable. 2. The discipline is defective, and the moral tone low. 3. Singing, object lessons, and drawing are omitted from the course of instruction. The classification is moderate, the necessary lesson documents are not used, and the teaching is weak and ineffective. 4. The proficiency ranges from *indifferent* to moderate.

## HOVELL'S CREEK :—Visited, 15th November.

Numbers present :—Boys, 9 ; girls, 12 ; total, 21.

1. There is no residence ; otherwise, the material condition is fair. 2. The discipline is healthy. 3. Singing and drawing are not taught ; otherwise, the course of instruction is that prescribed. The classification is fair, the lesson documents are tolerably satisfactory, and the teaching is conducted with industry and painstaking. 4. The proficiency is nearly tolerable.

## MILLAMURRA :—Visited, 3rd December.

Numbers present :—Boys, 8 ; girls, 6 ; total, 14.

1. The playground is not fenced, and the buildings are in an unfinished state. A suitable residence for the teacher is much needed. 2. The discipline is moderate. 3. Drawing is not included in the course of instruction. The classification is not appropriate, and the lesson documents are unsuitable. The teaching is carried on with industry, but it is unskilful. 4. The proficiency is *indifferent*.

## MACMAHON REEPS :—Visited, 7th November.

Numbers present :—Boys, 11 ; girls, 2 ; total, 13.

1. The material condition is only moderate. 2. The discipline is unsatisfactory in all respects. 3. Object lessons are omitted from the course of instruction ; the classification is very defective and the school work is not properly regulated. The instruction is feeble. 4. The proficiency is *indifferent*.

## RAGLAN :—Visited, 18th August.

Numbers present :—Boys, 12 ; girls, 11 ; total, 23.

1. The material condition of this school is only moderate, and the situation is not central. New buildings are now being erected (in a central position) for a Public School. 2. The discipline is healthy. 3. The course of instruction is that prescribed. The classification is tolerably appropriate, the lesson documents are drawn up with care, and the teaching is conducted with industry. 4. The average proficiency is moderate.

## TWO-MILE CREEK :—Visited, 12th November.

Numbers present :—Boys, 12 ; girls, 8 ; total 20.

1. The building is moderately suitable for temporary use as a schoolroom. Arrangements for the erection of new buildings are now being made. 2. The pupils are fairly regular in their attendance, but they are not punctual. In other respects the discipline is tolerable. 3. Object lessons, singing, and drawing, are not included in the course of instruction. The classification is tolerably appropriate, but the instruction is not regulated by the usual documents. The methods are moderately suitable, and they are applied with industry. 4. The proficiency is moderate. The school has only been a short time in operation.

## TANGMANGAROO :—Visited, 2nd June.

Numbers present :—Boys, 8 ; girls, 9 ; total, 17.

1. There are no out-offices, and the playground is unfenced. Otherwise the material condition is tolerable. 2. Except as regards regularity the discipline is very fair. 3. Singing is omitted from the course of instruction. The classification is appropriate, the instructional documents are fairly satisfactory, and the teaching is carried on with earnestness and care. 4. The proficiency is fair.

## VICTORIA CREEK :—Visited, 23rd September.

Numbers present :—Boys, 9 ; girls, 5 ; total, 14.

1. The ground is not fenced, the schoolroom is not floored, and the furniture is unsuitable and badly arranged. The residence is too small. 2. The discipline is weak in all respects. 3. Object lessons and singing are not taught. The classification is defective and the instruction is not properly regulated. The methods are unsuitable and ineffective. 4. The average proficiency is below moderate.

## VICTORIA :—Visited, 14th October.

Numbers present :—Boys, 5 ; girls, 11 ; total, 16.

1. A fireplace or stove is needed in the schoolroom. Out-offices are now being erected, but the school ground is still unfenced, and there is no residence for the teacher. 2. The pupils are neither regular nor punctual, and in other respects the discipline is only moderate. 3. Scripture lessons are omitted from the course of instruction. The classification is only moderately appropriate, the lesson documents are indifferent, and the teaching, though carried on with industry, is unskilful and ineffective. 4. The average proficiency is below moderate.

J. HUFFER,  
Inspector.

## BRAIDWOOD DISTRICT.

## INSPECTOR'S General Report upon Public, Provisional, Half-Time, and Denominational Schools, for the Year 1873.

1. During the year 1873, fourteen new schools have been opened in this district, two have been closed on account of the removal of the population, and five have quietly died out in consequence of local apathy and disunion. This leaves at the present date 107 in actual operation. In the coast district, lying between the tableland and the sea, and stretching south from the Clyde to the Borders, there are thirty-seven schools around the three centres, Moruya, Begu, and Eden; and so well are they situated in regard to population, that when four or five new schools, now being established, are opened, it will be difficult to suggest where others can be placed that will be maintained by children unable to reach existing ones. In the Braidwood section a piece of country about 70 miles by 40, extending from Nerriga to Krawarree, and from Boro to the edge of the coast range, there are thirty-three schools; arrangements are in progress for opening five more, and when these have commenced work there will be very few children in this part altogether cut off from the means of education. In the neighbourhood of Queanbeyan there are twenty schools, and sanction has been given for the opening of three others. As far as the distribution of schools is concerned this part of the district is, on the whole, well provided for. In the Monaro District, extending from Michelago to Victoria, and from Kiandra to Cathcart and Delegate, there are but seventeen schools, and owing to irregularity and apathy, some of these find it extremely difficult to keep up the small average attendance that is requisite to warrant the continuance of aid. Throughout these extensive plains the distance from homestead to homestead is so great, and the demand for children's labour so constant, that when attempts have been made by local and other gentlemen to establish small schools in thinly peopled localities, the results have generally been disappointing. When the present excitement connected with the selection of land has subsided, and the positions taken up by families have indicated where centres of population are likely to be permanent in future, applications for schools will probably come in rapidly from Monaro.

2. The scholars attending these 107 schools amount in round numbers to 4,000, and the children between five and fourteen years of age living in the neighbourhood of them, but not enrolled, to about 1,200. Of these 1,200 about 300 are receiving private instruction, about 200 have passed through the Council's schools and have left before reaching the age of fourteen, and about 700 go nowhere. In townships the non-attendants are, as a rule, street arabs, and girls who are required at home to nurse or to do domestic work. In the bush the greater proportion of those who attend no school are employed labouring on farms or among cattle and sheep.

3. In reporting on the condition of 107 schools it would be pleasant to have to state that most of them were doing their work in a masterly and admirable way; but such a statement would be so much at variance with probabilities that no thinking man would be likely to accept it as true. There is so much knack in teaching, and effective government depends so greatly on fact and character, that very few persons not naturally adapted for the work can ever, by any amount of experience and direction, acquire the peculiar power that makes a man conspicuously eminent as a teacher. Extraordinary capacity for teaching being therefore extremely exceptional, it would be unreasonable, in judging wide surfaces, to be dissatisfied with results that in the aggregate represent fair average proficiency. During the year considerable pressure has been put upon the teachers of bad schools to get, if possible, better results from them. In most instances beneficial effects have followed, but in a few cases it has been found hopeless to expect improvement. When children attend with ordinary regularity the state of their education and the progress they make depend entirely upon the teacher. It is important that he should feel this and not delude himself with the idea that he can shift any portion of the responsibility from his own shoulders. Unsuccessful teachers will seldom confess even to themselves that it is they, and not peculiar circumstances, that ruin a school. Bad schools are sometimes suddenly changed into good ones, and good schools are sometimes seen to fall away rapidly into bad ones, by a mere change of teachers. When a teacher has to complain of excessive irregularity, widespread indifference, and a want of general support, it will be well worth his while to consider carefully whether these evils are the cause or the effect of his unsuccessfulness; in other words, to consider whether the slow progress in his school has created the apathy, or the apathy occasioned the slowness.

In about two-thirds of the schools there has been considerable improvement made during the year. In one respect in particular this is noticeable. Much more attention than hitherto has been given to the proper training of the young children in the first or lowest classes. A first class increases in numbers so imperceptibly, and divisions and subdivisions form themselves so naturally, that unless great judgment be used, and the children be prepared for a higher class and passed on to it regularly and within reasonable time, the first is liable to become an unmanageable medley of unassortable groups, that get little or no satisfactory teaching, and that are a constant subject of anxiety and distress to the master. Some determined and successful efforts have been made to grapple with this difficulty, and although all the good effects cannot be tabulated with statistical exactness, there is no doubt but that in a great number of schools the increased attention given to the classification of the young pupils not only tends to divide the teacher's time more equitably between the highest and lowest scholars, but also makes the labour of teaching easier to him and more telling upon the pupils. It is necessary to attend thus carefully to the young scholars, if it be only to counteract in some measure the injurious influences that are liable to affect them as they become older. In all country places, especially in agricultural and grazing localities, pupils are removed from school at so early an age, that unless the teacher does the most he can with them during the short time they remain with him, it is probable that they will leave school with so little education that in a year or two all trace of it will have disappeared. If children are kept at school till they can read sufficiently well to take an interest in newspapers and the books that come in their way at home or from libraries, and can so write as to be able to carry on with ease ordinary business and friendly correspondence, the chances are that they will not only not forget what they have learned but that they will throughout life be insensibly widening their knowledge and improving themselves. If, however, a child leaves before he has mastered the art of reading, he is almost certain, if left without further guidance, to neglect the use of books and in time to be unable to read anything. When schools that have been closed a long time are reopened, this tendency is always observable, and it appears to point to the necessity for some enactment providing that no child shall be removed from school till he has obtained from an inspector an exit or clearance certificate to the effect that he has successfully passed such an examination as the Council may consider a sufficient guarantee that public money has not in his case been wasted. To most parents this would be a boon, and to none more so than to the uneducated, who are at present often sorely puzzled to know when their children may safely be removed from school. When a family and its connections sit in judgment on the last completed copybook, and some individual remarks that the boy's capitals or what not are as good as those in the head-line, it too frequently follows that the unfortunate pupil is summarily removed from school under the supposition that further attendance would be useless, since he already "knows as much as his master." This subject is dwelt on at some length because the habit of removing children without reference to their attainments is so common in country districts that the general usefulness of schools is greatly impaired by the practice. In the absence of a standard to be reached, children are sent for a specified time and not as they should be till they have acquired the amount of knowledge considered requisite for them. This prevalent anarchy in regard to regularity of attendance, length of time to be spent at school, and the minimum attainments to be arrived at, is an evil whose injurious effects may be noticed in all directions.

4. From these general remarks it will be seen that though there are signs of steady progress, though schools are spreading and scholars yearly increasing in numbers, though the standard of attainments

ments aimed at is gradually rising, though teachers of proved incompetence are by degrees being replaced by better men, there is as yet no reason why the friends of education should rest content with present achievements. While any children can be found not attending school, while pupils are removed too early, while the disunion and antagonism of adults can injuriously and permanently affect the young, and while anything exists that all eyes can recognize as an obstacle to progress, there will remain a field open for the labours of all men, who are disposed to lend a hand in the cause of education.

A detailed statement of the condition of each school inspected is appended hereto.

Braidwood, 27th December, 1873.

J. C. MAYNARD,  
Inspector, Braidwood District.

SUMMARIES of Reports furnished during the year 1873, on Public, Provisional, and Half-Time Schools.

(Throughout these summaries the words used to indicate general or average proficiency have the following relative values:—1, excellent; 2, very good; 3, good; 4, very fair; 5, fair; 6, tolerable; 7, moderate; 8, indifferent; 9, bad; 10, failure.)

I.—PUBLIC SCHOOLS.

ARALUEN (Boys) V. :—Inspected, 9th June, 1873.

Enrolled, 90; present, 74.

1. The material condition and organization are good in all respects. 2. Six-sevenths of the pupils are regular. They are still somewhat too talkative, inattentive, and restless, but they are not nearly so bad in this respect as they were last year, and the discipline has undoubtedly much improved. 3. All the prescribed subjects are taught, except singing. The condition of the lower second is the weak point in the school. The state of the other classes is creditable to the teachers, and the progress made since last inspection is satisfactory. The average proficiency is very fair.

ARALUEN (Girls) V. :—Inspected, 10th June, 1873.

Enrolled, 51; present, 35.

1. In all respects the material condition is satisfactory. 2. Only half the pupils are regular, and at least forty girls living in the neighbourhood attend no school. The discipline is satisfactory, and the government firm and precise. 3. All the prescribed subjects are taught. It appears to be taken too much for granted in this school that children never forget anything. A great amount of instruction is communicated, but for want of more frequent repetition, of severer tests, and of a steady determination to have things done thoroughly, much that is taught disappears from the children's minds, leaving no trace. The average proficiency is fair, but if judiciously applied, the quantity of work done would produce a higher mark than this with less trouble to the teacher.

ARALUEN (Infants) V. :—Inspected, 4th June, 1873.

Enrolled :—Boys, 43; girls, 31; total, 74.  
Present :—Boys, 35; girls, 19; total, 54.

1. The school is too small; otherwise, the material condition is satisfactory. 2. Most of the pupils are clean. They talk and fidget about more than they need do, but on the whole, the discipline is fair. The government is kind and attentive, and sufficiently firm. All the prescribed subjects are taught, and most of them with more than average success. The general proficiency is between fair and very fair.

ARALUEN WEST (N.-V.) :—Inspected, 13th June, 1873.

Enrolled :—Boys, 67; girls, 79; total, 146.  
Present :—Boys, 45; girls, 54; total, 99.

1. School is held in a rented wooden building that is much too small for the number in attendance. There is a sufficient supply of apparatus but not of furniture. Steps are being taken to put up a new building. 2. Five-sixths of the pupils enrolled are regular. They are attentive, obedient, fairly clean, and, considering the crowded state of the room, orderly and well-behaved. The government is firm and effective. 3. All the prescribed subjects are taught, except singing and drawing. When under examination the children are ready and intelligent. Considering the inadequate accommodation, the want of assistance, and the backward state of many of the children when they entered school, the progress made has been both rapid and sound. The average proficiency approaches very fair.

ARALUEN UPPER (N.-V.) :—Inspected, 18th September, 1873.

Enrolled :—Boys, 30; girls, 27; total, 57.  
Present :—Boys, 17; girls, 16; total, 33.

1. No change has been made in the material condition of the school since last inspection. The greatest want is a residence for the teacher. 2. About half the pupils are regular. They are a little inattentive and given to staring about, but on the whole the discipline is fair. 3. All the prescribed subjects are taught except singing and drawing. The progress made is satisfactory. The teacher has worked hard, and the results are higher than circumstances would lead one to expect. The average proficiency is slightly beyond fair.

BATEMAN'S BAY (V.) :—Inspected, 18th July, 1873.

Enrolled :—Boys, 17; girls, 7; total, 24.  
Present :—Boys, 15; girls, 7; total, 22.

1. The present building is a rough slab hut, but tenders have been invited for a new school. The desks are unsteady and small, but in other respects the outfit is satisfactory. 2. Out of twenty-four pupils thirteen are regular; but seventeen children living in the neighbourhood attend no school. The discipline has greatly improved since attention was drawn to it last year. The attainments of class 1 are poor; the progress made by the other classes is of an average character. The general proficiency is between tolerable and fair.

BERGA (V.) :—Inspected, 8th September, 1873.

Enrolled :—Boys, 46; girls, 46; total, 92.  
Present :—Boys, 36; girls, 33; total, 69.

1. Since last inspection a new wing has been added to the school, the grounds have been fenced, extensive verandahs for shade and protection of the walls have been put up, and the whole building has been thoroughly repaired. Except that additional furniture is needed for the class-room the outfit is in all respects good. 2. Two-thirds of the pupils are regular and punctual. They are not always attentive and quiet, but in other respects the discipline is satisfactory. 3. The classification is somewhat injudicious, tending to give the teacher extra trouble without any corresponding advantage. The general progress is satisfactory; the attainments range from tolerable to very good, giving an average approaching very fair.

BERGALLA

**BERGALLA (V.)** :—Inspected, 28th July, 1873.

Enrolled :—Boys, 23 ; girls, 29 ; total, 52.  
Present :—Boys, 15 ; girls, 21 ; total, 36.

1. The building and the general outfit are good, and everything is clean and well looked after. 2. Not more than twenty-eight can be called regular attendants, and nine or ten in the neighbourhood take no advantage of the opportunity of getting an education. The discipline is satisfactory. 3. All the prescribed subjects are taught except singing. The classification is better this year than last, and the instruction is somewhat more practical and pointed. The first class is admirably taught, and the spelling and dictation throughout the school are good. The weakest subjects are arithmetic and grammar. The average proficiency is fair.

**BOMBALA (V.)** :—Inspected, 24th and 28th February, 1873.

Enrolled :—Boys, 73 ; girls, 52 ; total, 125.  
Present :—Boys, 34 ; girls, 17 ; total, 51.

1. The pump is out of order, and new window-blinds are needed, but in other respects the material condition and the general organization are satisfactory. 2. Only half the pupils can be called regular ; this is a very low average for a township. It is evident, also, that many children in the neighbourhood attend no school. The order and general discipline are very fair. 3. The attainments of the children are of an average character. Reading is a weak subject throughout the school ; the geography of class 3, the writing of class 1, and the drawing of class 4, are good ; the other subjects range from indifferent to very fair, giving an average between tolerable and fair.

**BRAIDWOOD, Boys (V.)** :—Inspected, 9th October, 1873.

Enrolled, 58 ; present, 48.

1. A few small repairs are necessary, and will shortly be effected, but in other respects the material condition and organization are satisfactory. 2. Of fifty-eight pupils enrolled, forty-two are regular. This is an improvement upon last year, and the punctual attendance in the morning is much better than it was. With few exceptions, the children are clean, and the order and general discipline have so greatly changed for the better that the teacher deserves credit for the reform he has wrought in this respect. 3. Last year too many children were massed in the 1st class ; this has been altered, so that the 1st is now the smallest class in the school. Notwithstanding the extra labour thrown upon the teacher by this general promotion, the proficiency of each class is higher than it was at the last inspection. The average for the whole school is very fair.

**BRAIDWOOD, Girls (V.)** :—Inspected, 10th October, 1873.

Enrolled, 42 ; present, 33.

1. A new set of desks is required, and the room wants whitewashing ; in other respects the material condition is satisfactory. 2. Of the pupils thirty-two are regular and punctual. By their restlessness and talking a few of the younger children disturb the general order, but on the whole the discipline is fair. 3. All the prescribed subjects are taught. The work of the school is carried on with energy and industry. Spelling and dictation are the strongest subjects in the school, and arithmetic is the weakest. The average proficiency is fair.

**CANDELO (V.)** :—Inspected, 4th September, 1873.

Enrolled :—Boys, 42 ; girls, 24 ; total, 66.  
Present :—Boys, 34 ; girls, 20 ; total, 54.

1. The material condition is in the same satisfactory state that it was last year. The local Board have obtained and fenced in a piece of land for a horse-paddock. This was much needed, for as many as twenty or thirty horses are ridden to the school in the morning, and left there all day by the children who come from a distance. 2. The attendance of a number of children is irregular, and more than twenty living in the neighbourhood might attend school but do not. The discipline and government are satisfactory. 3. All the prescribed subjects are taught, and most of them with more than average success. This year, as last, the weak features of the school are the reading and the arithmetic. The general proficiency approaches very fair.

**CHARLBYONG (N.-V.)** :—Inspected, 30th October, 1873.

Enrolled :—Boys, 13 ; girls, 20 ; total, 33.  
Present :—Boys, 10 ; girls, 19 ; total, 29.

1. A small house has been put up for a residence since last inspection. As regards the school and the supply of furniture and apparatus, the material condition is satisfactory. 2. Of thirty-three pupils twenty-two are regular. They are fairly clean, the work is carried on in an orderly and methodical way, and the general behaviour of the children is modest and becoming. 3. All the prescribed subjects are taught, except singing and needlework. During nearly six months of the year the school was closed for want of a teacher, and many forgot much that they previously knew. The average proficiency is tolerable.

**COBANGO (V.)** :—Inspected, 8th August, 1873.

Enrolled :—Boys, 11 ; girls, 12 ; total, 23.  
Present :—Boys, 9 ; girls, 12 ; total, 21.

1. The defects pointed out in the material condition have been remedied, and the school is now sufficiently good in all respects for existing requirements. 2. All the children in the neighbourhood are enrolled, and fifteen may be called regular. The discipline is fair, and the behaviour of the children satisfactory. 3. The condition of class 1 is very creditable, but that of classes 2 and 3 is scarcely of an average character. The general proficiency is between tolerable and fair. This is now a Half-Time School, worked in connection with Wandella.

**COOMA (V.)** :—Inspected, 10th March, 1873.

Enrolled :—Boys, 38 ; girls, 19 ; total, 57.  
Present :—Boys, 29 ; girls, 13 ; total, 42.

1. The material state of the school has not been improved since last inspection. 2. Only twenty pupils are regular, but the attendance in the morning is pretty punctual. There is too much talking in school. The government is spasmodic, the children are allowed at times to go great lengths unchecked, and on other occasions are pulled up summarily when they first begin to go wrong. This want of system worries the children, entails more punishment than is necessary, and in the end gives but a disorderly school as the result. 3. When under examination the children answer with fair intelligence, but only the individual directly spoken to appears to pay attention to a question. Last year the junior classes were weak in comparison with the 3rd ; since then much attention has been given to the younger children, and they have made considerable progress. The average proficiency is between fair and very fair.

EDEN

EDEN (V.) :—Inspected, 26th August, 1873.

Enrolled :—Boys, 36 ; girls, 16 ; total, 52.  
Present :—Boys, 32 ; girls, 15 ; total, 47.

1. The repairs pointed out last year as being needed have not been done. 2. Of fifty-two pupils enrolled forty-six are regular and punctual. Except that the children are a little inattentive and noisy, the discipline is satisfactory. 3. All the prescribed subjects are taught. Since last inspection many former scholars, whose regular education had for some time been suspended, have returned to the school. The average proficiency is between fair and very fair.

JAMBRAICUMBENE (V.) :—Inspected, 21st October, 1873.

Enrolled :—Boys, 22 ; girls, 22 ; total, 44.  
Present :—Boys, 19 ; girls, 18 ; total, 37.

1. Since last inspection the building has been repaired, the grounds fenced, and an extra room added to the residence. A large number of trees have also been planted for shade. In all respects now the material condition is satisfactory. 2. Of forty-four pupils, twenty-five are regular; but eighteen living in the neighbourhood attend no school. The children are still too noisy and inattentive. The government is kind, but of that easy nature which is rather calculated to please the children than to make them work. 3. All the prescribed subjects are taught; the classification is injudicious; all but nine of the children inspected were in the 1st class, and there is no 3rd. Considering age and length of time at school, the present 2nd should be a good 3rd class, and the upper 1st a good 2nd. The progress made during the year is unsatisfactory, and the average proficiency is only between moderate and tolerable.

KIORA (N.-V.) :—Inspected, 29th July, 1873.

Enrolled :—Boys, 16 ; girls, 22 ; total, 38.  
Present :—Boys, 15 ; girls, 20 ; total, 35.

1. The school building is in a satisfactory state, and is well supplied with necessaries, but the residence requires a new roof. 2. Twenty-two pupils attend with ordinary regularity, but eighteen living around are not enrolled. The children are well-behaved and the school is firmly but kindly ruled. 3. All the prescribed subjects are taught. The children in the 3rd class read badly, and the arithmetic of both 2nd and 3rd is very poor. In other subjects the attainments range from tolerable to good, giving the average proficiency fair.

LITTLE RIVER (V.) :—Inspected, 27th May, 1873.

Enrolled :—Boys, 31 ; girls, 40 ; total, 71.  
Present :—Boys, 20 ; girls, 28 ; total, 48.

1. The material condition is satisfactory in all respects. 2. Two-thirds of the pupils are regular and punctual. When the creeks are up the numbers are necessarily low, but in fine weather parental indolence and indifference are the only obstacles that stand in the way of a large attendance. The children are clean, attentive, and quiet, and under the present teacher the discipline has greatly improved. 3. All the prescribed subjects are taught, except singing. Improvement has been made in the classification since last inspection; there are now no unnecessary subdivisions, and the teacher's time is not therefore frittered away to no purpose. The weak subjects in the school are reading and penmanship. The average proficiency is slightly beyond fair.

MAJOR'S CREEK (V.) :—Inspected, 21st November, 1873.

Enrolled :—Boys, 40 ; girls, 54 ; total, 94.  
Present :—Boys, 25 ; girls, 31 ; total, 56.

1. All the material defects noticed last year have been remedied; the building has been thoroughly repaired, and its condition now is satisfactory. 2. Two-thirds of the pupils are regular, but at least seventy are running about idle attending no school. The discipline has improved, the children are more attentive, silent, and orderly than they were; the government is firmer and more consistent, and the general tone is higher. 3. All the prescribed subjects are taught except singing and drawing. Since the reopening of the school the work has been carried on with greater energy, and the pupils are now making more rapid progress than formerly. The radical defect of this school hitherto has been the low standard arrived at by the teacher; there is likely to be an improvement in future in this respect. The average proficiency is fair.

MERIMBULA (V.) :—Inspected, 28th August, 1873.

Enrolled :—Boys, 21 ; girls, 15 ; total, 36.  
Present :—Boys, 19 ; girls, 13 ; total, 32.

1. The present school is fairly suitable, but a new one with a residence is being put up. 2. Out of thirty-six enrolled, twenty-six are regular. At present the attendance is unusually good, but with the small population in the township it is difficult to keep up an average of thirty. 3. Last year the children were conspicuously dirty, disorderly, unpunctual, and ignorant; the present teacher has changed all this, and the school is now carried on properly, and ruled with firmness and good sense. 3. All the prescribed subjects are taught except drawing and sewing. During the short time he has been in charge the present teacher has produced admirable results in regard to the attainments. The reading and spelling of class 1, the reading, spelling, dictation, geography, and object-lessons of class 2, and the geography of class 3, are good; the average proficiency of the whole school is very fair.

MONKITEE (N.-V.) :—Inspected, 20th October, 1873.

Enrolled :—Boys, 18 ; girls, 17 ; total, 35.  
Present :—Boys, 10 ; girls, 6 ; total, 16.

1. The material condition is fairly suitable for existing requirements. 2. About half the pupils are regular. After being closed for some time, the school has been reopened under a new teacher; not sufficient time has elapsed to show with what success he will manage the school, but the attainments of the children at present are not high. The average proficiency is slightly beyond moderate.

NELLIGEN (V.) :—Inspected, 17th July, 1873.

Enrolled :—Boys, 13 ; girls, 18 ; total, 31.  
Present :—Boys, 12 ; girls, 15 ; total, 27.

The building, outfit, and general organization are satisfactory in all respects. 2. Only thirteen out of thirty-one are regular, and twenty-two of school age do not attend at all. The discipline is better than it was, but it is not yet what it should be. The government is spasmodic, and therefore irritating to teacher and pupils, and in the end not effective. 3. All the prescribed subjects are taught, but there are no children able to do the work of a 3rd class. Considering all circumstances, the school is not in so satisfactory a condition either in regard to discipline or attainments as one might fairly have expected it to be.

NERRIGUNDAH

## NERRIGUNDAH (N.-V.) :—Inspected, 6th August, 1873.

Enrolled :—Boys, 16 ; girls, 20 ; total, 36.  
Present :—Boys, 10 ; girls, 14 ; total, 24.

1. The building is fairly suitable, but the writing accommodation is scarcely sufficient. 2. Three-fourths of the pupils are regular. Owing to a want of system and firmness, the discipline is loose. 3. All the prescribed subjects are taught. Its teacher has worked hard, but in his anxiety to advance the children he has skimmed over wide surfaces and left but small trace of his labour behind. The average proficiency is between moderate and tolerable.

## PANBULA (V.) :—Inspected, 21st August, 1873.

Enrolled :—Boys, 20 ; girls, 25 ; total, 45.  
Present :—Boys, 18 ; girls, 23 ; total, 41.

1. New desks and a bookpress are needed ; there is no residence and the closets are badly situated ; in other respects the material condition is satisfactory. 2. Only sixteen out of forty-five children are regular, and at least sixteen in the township do not attend at all. The irregularity might, to some extent, be checked if the teacher were strict in regard to the matter. The pupils fidget and stare about, giggle a great deal, and in many little ways show that they have not been trained to habits of strict and instant obedience. Without any increase of severity all this might be changed by a more determined government. 3. All the prescribed subjects are taught except singing and object lessons. As far as mechanical adherence to ordinary forms and methods is concerned, the teacher faithfully goes through his daily routine, but as yet he has produced only poor results. If he were to determine that, like it or not, the children should, week by week do, and do well, all the work cut out for them ; if he would test his own labours and when unsound progress showed itself, spare neither time, himself nor his pupils, till thorough mastery of the subjects in hand had been obtained, the school might soon become a credit to himself and the district. The average proficiency is tolerable.

## QUEANBEYAN (N.-V.) :—Inspected, 6th February, 1873.

Enrolled :—Boys, 43 ; girls, 25 ; total, 68.  
Present :—Boys, 35 ; girls, 19 ; total, 54.

1. The building and general outfit are in an unsatisfactory a state as they were last year. The organization is as good as circumstances will permit, but the general aspect is dismal and wretched. 2. Four-fifths of the pupils are regular. The want of desks and suitable forms makes it difficult to secure good order, but the teacher does the best he can with the materials at his command. 3. All the prescribed subjects are taught except singing. The state of the 1st class, consisting of nineteen children, averaging 7 years of age, is most creditable, giving "good" all round ; and though the mark obtained by the other classes is not quite so high, it is sufficient to show that the school is being well and soundly taught throughout. The general proficiency is between very fair and good.

## TANTAWANGLO (V.) :—Inspected, 1st September, 1873.

Enrolled :—Boys, 22 ; girls, 19 ; total, 41.  
Present :—Boys, 18 ; girls, 16 ; total, 34.

1. Since last inspection a stone foundation has been put under the building and the whole of the walls have been tightened up and battened. There is a good supply of furniture, apparatus, and working materials. 2. Of forty-one children, twenty-nine are regular, but at least thirty-nine living in the neighbourhood attend no school. The pupils are somewhat inattentive, but with this exception their behaviour in school is satisfactory. 3. All the prescribed subjects are taught. The children are well grounded. The condition of classes 1 and 2 is very creditable, the average proficiency of class 1 being good, and of class 2 between very fair and good. The 3rd class is small and owing to irregular attendance is not relatively equal to the others in attainments. The general proficiency is very fair.

## WOLUMLA, NORTH (V.) :—Inspected, 14th August, 1873.

Enrolled :—Boys, 17 ; girls, 13 ; total, 30.  
Present :—Boys, 15 ; girls, 11 ; total, 26.

1. The material condition of the school is in all respects good. 2. Of thirty children enrolled, nineteen are regular, but eleven at least living in the neighbourhood attend no school. The pupils are orderly and attentive. 3. All the prescribed subjects are taught. The spelling and dictation of class 3 and the spelling of the lower 2nd are good ; in other subjects the attainments range from moderate to very fair, giving an average between tolerable and fair.

## WOLUMLA, SOUTH (V.) :—Inspected, 19th August, 1873.

Enrolled :—Boys, 26 ; girls, 13 ; total, 39.  
Present :—Boys, 22 ; girls, 13 ; total, 35.

1. Since last inspection new desks have been provided, an extra room has been added to the residence, and a verandah placed round two sides of the building. 2. At the date of my visit twenty-three children in the neighbourhood were not enrolled, but of the thirty-nine pupils thirty-one are regular. They are attentive and orderly, and the government of the school is careful and sufficiently firm. 3. Great progress has been made since last inspection. The spelling in each class is very good, the dictation throughout the school good, the writing, reading, and geography of class 3 good, and the average proficiency of the whole school very fair.

## II.—PROVISIONAL SCHOOLS.

## BELL'S CREEK (N.-V.) :—Inspected, 3rd June, 1873.

Enrolled :—Boys, 22 ; girls, 21 ; total, 43.  
Present :—Boys, 15 ; girls, 20 ; total, 35.

1. The roof leaks and the building is altogether too frail and patched for a school. There is a fair supply of furniture and apparatus, and the organization is as good as circumstances will permit. 2. Only half the pupils are regular, and at my visit eighteen living in the neighbourhood were going to no school. The children are clean but restless and talkative. The government is kind but too yielding. 3. In reading, writing, and arithmetic, the attainments of the children are good, and the younger pupils are particularly well taught in these subjects. For young scholars this is one of the best schools in the district ; their progress in some respects is surprising. In the upper class the children are weak in grammar and geography. The average proficiency is between tolerable and fair.

## BODALLA (N.-V.) :—Inspected, 4th August, 1873.

Enrolled :—Boys, 16 ; girls, 20 ; total, 36.  
Present :—Boys, 10 ; girls, 14 ; total, 24.

1. The building temporarily used is uncentral, and in wet weather is not easy of access. In other respects it is suitable and well supplied with necessary furniture and requisites. 2. Not more than one-third

third of the pupils are regular. They are clean and well behaved, but the teacher does not appear to be acquainted with the ordinary system of discipline carried out in Public Schools, and no steps have been taken to regulate the instruction by the prescribed standard. The children are bright and intelligent, but up to the present time they have received but little education. The average proficiency is small.

**BROWN MOUNTAIN (N.-V.)** :—Inspected, 2nd September, 1873.

Enrolled :—Boys, 14 ; girls, 12 ; total, 26.

Present :—Boys, 12 ; girls, 10 ; total, 22.

1. Since last inspection a new school has been built, which is well supplied with necessary apparatus and furniture. 2. Of twenty-six children enrolled fourteen are regular, but eight who ought to attend do not. The pupils are clean, attentive, and obedient. 3. Great improvement in all respects has been made in this school during the past year. There is a want of fluency and expression in the reading of class 3, and the arithmetic in classes 2 and 3 is weak. The average proficiency is fair.

**BUNGENDORE (N.-V.)** :—Inspected, 6th May, 1873.

Enrolled :—Boys, 13 ; girls, 19 ; total, 32.

Present :—Boys, 8 ; girls, 15 ; total, 23.

1. The material condition is good, and the school is well organized. 2. Five-eighths are regular, but many get late in the morning. The discipline is not satisfactory, the government is kind and fatherly, but is wanting in firmness and determination. 3. All the prescribed subjects are taught except singing and needlework. The writing is satisfactory, but all other subjects need more thoroughness. The average proficiency is tolerable.

**COROWONG (N.-V.)** :—Inspected, 4th March, 1873.

Enrolled :—Boys, 15 ; girls, 22 ; total, 37.

Present :—Boys, 11 ; girls, 14 ; total, 25.

1. Since last inspection a new school has been erected, and supplied with sufficient furniture and apparatus. 2. All the children in the neighbourhood are on the roll, and considering the nature of the country, and the distance that many have to travel, the attendance is creditable to the parents. 3. The teaching is carried on in a painstaking and plodding manner ; reading and writing are taught with average success, but in other subjects the children's knowledge is very limited and confused. The general proficiency is between indifferent and moderate.

**GINNABROTHERS (N.-V.)** :—Inspected, 18th February, 1873.

Enrolled :—Boys, 23 ; girls, 9 ; total, 32.

Present :—Boys, 13 ; girls, 8 ; total, 21.

1. The school is a slab building, with sufficient sitting and writing accommodation for about thirty scholars. 2. When visited, the ordinary supply of apparatus and books had not arrived. The teacher has made a good start, but for want of books and materials was unable at the time of inspection to carry out the ordinary course of instruction.

**HOSKINSTOWN (N.-V.)** :—Inspected, 29th January, 1873.

Enrolled :—Boys, 11 ; girls, 10 ; total, 21.

Present :—Boys, 11 ; girls, 9 ; total, 20.

1. Except that there is no fireplace, the material condition of the school is satisfactory. 2. Three or four of the children are tolerably regular, but the attendance of the majority is so broken that they have but little chance of making progress. 3. There is no 3rd class. Ten of the pupils present read the 2nd Book, I.N.B., and write fairly well, but the attainments of the children on the whole are very poor. The average proficiency is between indifferent and moderate.

**JEMBAICUMBENE (N.-V.)** :—Inspected, 28th October, 1873.

Enrolled :—Boys, 6 ; girls, 13 ; total, 19.

Present :—Boys, 4 ; girls, 12 ; total, 16.

1. In the early part of the year the schoolhouse was burnt down, but a new one has been put up, and a new set of desks and forms provided. 2. Of nineteen pupils thirteen are regular. More attention is required to the neatness and cleanliness both of the schoolroom and the scholars. The discipline is on the whole satisfactory, and the government is firm and consistent. 3. Last year this was a H.-T. School worked with Ballalaba, and the attainments were wretched. The progress made under the present teacher has been both rapid and sound. The spelling and dictation throughout the school are very good, and considering the short time the children have been under regular instruction the attainments in other subjects are beyond the average. The general proficiency is between fair and very fair.

**KLANDRA (N.-V.)** :—Inspected, 13th March, 1873.

Enrolled :—Boys, 12 ; girls, 10 ; total, 22.

Present :—Boys, 8 ; girls, 9 ; total, 17.

1. A room tolerably suitable has been rented for a school, and three somewhat rough desks and forms afford sufficient sitting and writing accommodation. 2. When visited the school had only been re-opened a day, and the classes had not been definitely formed. The school having been closed for nearly a year the children have forgotten much that they knew, and will require great attention and firmness to bring them into anything like a state of efficiency.

**MICHELAGO (N.-V.)** :—Inspected, 12th February, 1873.

Enrolled :—Boys, 19 ; girls, 6 ; total, 25.

Present :—Boys, 19 ; girls, 6 ; total, 25.

1. The building is large, in good repair, and well fitted up with furniture and apparatus. 2. Some of the distant pupils come late in the morning, but nineteen out of twenty-five attend regularly. The discipline is fair. 3. All the prescribed subjects are taught, except singing and needlework. Last year the children were weak in reading, spelling, writing, and arithmetic ; considerable improvement has been made in these subjects. The average proficiency is between tolerable and fair.

**MOGO (N.-V.)** :—Inspected, 21st July, 1873.

Enrolled :—Boys, 20 ; girls, 13 ; total, 33.

Present :—Boys, 15 ; girls, 9 ; total, 24.

1. School is held in the Wesleyan Church, which has been temporarily lent for the purpose. There is a sufficient supply of working requisites, the organization is satisfactory, and the premises are clean and tidy. 2. Only six can be called regular. This excessive irregularity makes it almost impossible for the children to advance. The government is somewhat impulsive, but on the whole the behaviour of the children is satisfactory. 3. Considering age and length of time at school the attainments are but poor, and the progress made since last inspection has been but small. The average proficiency is tolerable.

**NERRIGA (N.-V.)** :—Inspected, 18th May, 1873.

Enrolled :—Boys, 12 ; girls, 19 ; total, 31.  
Present :—Boys, 8 ; girls, 15 ; total, 23.

1. The building, furniture, and apparatus are in a satisfactory state, and the school is properly organized. 2. Of thirty-one scholars enrolled eighteen are regular. They are attentive and remarkably well behaved. The government is quiet, kind, and effective. 3. All the prescribed subjects are taught, except singing and drawing ; last year the arithmetic was poor ; it is not good yet, but considerable improvement has been made in it. The other subjects are taught with rather more than average success. The progress made during the year is very satisfactory. The average proficiency is between fair and very fair.

**\*NEWSTEAD (V.)** :—Inspected, 30th July, 1873.

Enrolled :—Boys, 12 ; girls, 9 ; total, 21.  
Present :—Boys, 12 ; girls, 9 ; total, 21.

1. The building is sufficiently good for present requirements, but a new outfit of desks and forms is needed. 2. When visited the school was but just reopened after being closed a considerable time. Its attainments are indifferent.

**RUNNYMEDE (N.-V.)** :—Inspected, 19th July, 1873.

Enrolled :—Boys, 14 ; girls, 15 ; total, 29.  
Present :—Boys, 9 ; girls, 11 ; total, 20.

1. The school is a little slab hut, sufficiently good for temporary purposes. There is a fair supply of furniture and apparatus. 2. The records show that sixteen out of twenty-nine are regular. The children are well under control, but are allowed too much latitude in regard to talking. 3. When under examination the pupils answer with fair intelligence ; they are respectful and well-behaved, and on the whole have made average progress since last inspection. The general proficiency is between tolerable and fair.

**TUGGRANONG (N.-V.)** :—Inspected, 31st January, 1873.

Present :—Boys, 4 ; girls, 3 ; total, 7.

1. The school has been repaired and whitewashed since last inspection, and, except that the roof is scarcely watertight, the building is sufficiently good for present requirements. 2. Most of the pupils were away harvesting when I visited, and the records have been so badly kept that it is impossible to obtain any trustworthy information from them respecting the general attendance. 3. Those present were quiet and attentive, and the progress they have made in reading and spelling is good. In all other subjects however they are much below the standard. The average proficiency is indifferent.

**WIANGA (N.-V.)** :—Inspected, 7th May, 1873.

Enrolled :—Boys, 13 ; girls, 10 ; total, 23.  
Present :—Boys, 5 ; girls, 8 ; total, 13.

1. The school is an ordinary slab building with a bark roof, and is in a fair state of repair. There is a sufficient supply of school requisites. 2. The discipline is moderate, and the attainments low, giving the average proficiency slightly beyond indifferent.

### III.—HALF-TIME SCHOOLS.

**ADAMINIBY (N.-V.)** :—Inspected, 14th March, 1873.

Enrolled :—Boys, 8 ; girls, 8 ; total, 16.  
Present :—Boys, 6 ; girls, 6 ; total, 12.

1. The material condition is satisfactory. 2. Only seven out of sixteen are regular. The cleanliness, order, and general discipline are fair. 3. Considering the age of many of the pupils and the length of time they have been at school, their attainments are very poor. Their irregularity has been excessive, but taking this and other adverse circumstances into full consideration, the progress made since last inspection must be pronounced unsatisfactory. The average proficiency is slightly beyond moderate.

**BEMBOOKA (N.-V.)** :—Inspected, 2nd September, 1873.

Enrolled :—Boys, 10 ; girls, 5 ; total, 15.  
Present :—Boys, 7 ; girls, 5 ; total, 12.

1. Maps and another desk are needed ; otherwise, there is sufficient accommodation. There are also enough working materials for existing requirements. 2. The school has not long been opened, and the children are not yet broken in to orderly habits. 3. The attainments are of course low, but the small amount professedly taught has not been mastered. The pupils are apparently allowed to go through their work in a careless slipslop manner. The average proficiency is indifferent.

**BIBBENLUKE (N.-V.)** :—Inspected, 20th September, 1873.

Enrolled :—Boys, 6 ; girls, 12 ; total, 18.  
Present :—Boys, 5 ; girls, 11 ; total, 16.

1. The building is suitable and well supplied with necessary furniture and materials. 2. Not more than half the pupils are regular. The discipline is satisfactory. 3. Singing, drawing, and sewing are not taught. Considering age and length of time at school, the attainments of the children are not satisfactory. The teacher has aimed at a very low standard and has failed even to reach that. In more than one instance children have been kept back to wait for inferior scholars to reach them, and the effect of such management has been to shake the confidence of the parents in regard to the utility of the school. The average proficiency is slightly beyond moderate.

**BOCOSKOC (N.-V.)** :—15th March, 1873.

Enrolled :—Boys, 9 ; girls, 8 ; total, 17.  
Present :—Boys, 8 ; girls, 8 ; total, 16.

1. School is held in a private room. The situation is unfavourable, the room too small, and the desks so narrow and steep as to be almost useless. The Local Board undertake to provide suitable desks at once, but as the room in use answers all purposes reasonably well they are not at present prepared to build a new school. 2. The discipline is satisfactory, but the average proficiency is only tolerable.

**BOMBAY (N.-V.)** :—Inspected, 23rd October, 1873.

Enrolled :—Boys, 9 ; girls, 10 ; total, 19.  
Present :—Boys, 4 ; girls, 6 ; total, 10.

1. School is held in a small slab hut, which is provided with a sufficient supply of rough but substantial sitting and writing accommodation. 2. Fifteen attend with ordinary regularity. The school is worked with that at Columbo, and the general management and average proficiency of the scholars are the same in both.

**BURRA**

**BURRA (N.-V.)** :—Inspected, 11th February, 1873.

Enrolled :—Boys, 10 ; girls, 11 ; total, 21.  
Present :—Boys, 10 ; girls, 11 ; total, 21.

1. The building is in a satisfactory condition and there is a sufficient supply of furniture, apparatus, and working materials. 2. Two-thirds of the pupils are regular ; they are nearly all clean and their behaviour in school is good. The teacher rules firmly and effectively, and the children are very attentive and respectful to him. 3. All the prescribed subjects are taught, except singing and drawing. The methods of teaching are quiet and impressive, and the work is carried on with industry and good sense. It speaks well for the teacher that in less than two years he has turned a bad 1st class into a good 3rd. The reading, spelling, and writing, are good throughout the school, and excepting the arithmetic of the 1st and 2nd classes no subject obtained a lower mark than fair. The average proficiency is very fair, being one out of but two teachers of H.-T. schools in this district who have obtained this comparatively high mark. Mr. Kennedy was complimented by the Council and promoted for special merit.

**BURRAGATH (V.)** :—Inspected, 20th August, 1873.

Enrolled :—Boys, 10 ; girls, 7 ; total, 17.  
Present :—Boys, 6 ; girls, 4 ; total, 10.

1. The school is not sufficiently clean and tidy, but in other respects the material condition is the same as reported last year. 2. Three-fourths of the pupils are regular and punctual, and the discipline is satisfactory. 3. All the prescribed subjects are taught, except singing and drawing. The school was closed for want of a teacher during the early part of the year, and the children have scarcely yet recovered lost ground. The average proficiency is between tolerable and fair.

**CATHCART (N.-V.)** :—Inspected, 20th February, 1873.

Enrolled :—Boys, 9 ; girls, 10 ; total, 19.  
Present :—Boys, 8 ; girls, 9 ; total, 17.

1. This school is scarcely central, but it is comfortably fitted up and answers all present requirements. 2. Out of nineteen enrolled, only six are regular, and there are at least twenty children living around who attend no school. The discipline is satisfactory. 3. This school is worked with that at Bibbenlute, and as regards attainments is little superior to it. The average proficiency is slightly beyond tolerable.

**COLUMBO (N.-V.)** :—Inspected, 23rd October, 1873.

Enrolled :—Boys, 5 ; girls, 9 ; total, 14.  
Present :—Boys, 5 ; girls, 8 ; total, 13.

1. This is a new building which was not quite finished at the time of inspection. The desks are frail and badly designed, and there is a deficiency of apparatus. 2. Of fourteen pupils eight are regular, but seven children in the neighbourhood, who might attend, do not. Too much talking is allowed, but in other respects the discipline is fair. 3. All the prescribed subjects are taught, except singing, drawing, and needlework. The school has not been long in operation. The average proficiency is between tolerable and fair.

**COCHRANE'S FLAT (V.)** :—Inspected, 25th August, 1873.

Enrolled :—Boys, 7 ; girls, 4 ; total, 11.  
Present :—Boys, 5 ; girls, 3 ; total, 8.

1. This is a neat building, in good repair, and well fitted up in all respects. 2. Out of eleven pupils seven are usually regular. The discipline is satisfactory. 3. Considering the ages of the children the attainments should be much higher than they are. The average proficiency is tolerable.

**CRAIGIE (N.-V.)** :—Inspected, 5th March, 1873.

Enrolled :—Boys, 9 ; girls, 3 ; total, 12.  
Present :—Boys, 4 ; girls, 2 ; total, 6.

1. The furniture is rough and unsuitable, but the room in which school is held is sufficiently good for present purposes. 2. The digging population having nearly disappeared, this school has been closed and one opened at Power's Corner in its place. The average proficiency at Craigie was tolerable.

**DELEGATE (N.-V.)** :—Inspected, 5th March, 1873.

Enrolled :—Boys, 9 ; girls, 12 ; total, 21.  
Present :—Boys, 8 ; girls, 9 ; total, 17.

1. Except that at the time of inspection there was a scarcity of working materials, the material condition was sufficiently good to meet existing requirements. 2. Distance and creeks interfere with the attendance, but about half the pupils are regular. The children are orderly and attentive, and the government is kind and firm. Since last inspection the children have made considerable progress in reading, spelling, writing, and arithmetic, the attainments in these subjects ranging from fair to good. The other subjects have not been so successfully taught. The average proficiency is between moderate and tolerable.

**DURBAN-DURRAH (N.-V.)** :—Inspected, 20th November, 1873.

Enrolled :—Boys, 9 ; girls, 16 ; total, 25.  
Present :—Boys, 5 ; girls, 14 ; total, 19.

1. The roof leaks, but in other respects the building and general outfit are sufficiently good for present purposes. 2. The discipline has considerably improved, and altogether there is a higher tone in the school and more systematic management. 3. The children are more sensibly classified than they were, and though the attainments are not high there appears to be indications that the progress in future will be more rapid and sound than hitherto. The average proficiency is between moderate and tolerable.

**FARRINGTON (N.-V.)** :—Inspected, 8th December, 1873.

Enrolled :—Boys, 9 ; girls, 11 ; total, 20.  
Present :—Boys, 6 ; girls, 6 ; total, 12.

1. The school is not centrally situated, but the residents appear disinclined to go to any expense in building, while the present school answers reasonably well. There is scarcely sufficient writing accommodation, but in other respects the outfit is satisfactory. Two-thirds of the pupils are regular, but a good number in the neighbourhood attend no school. The general tone is higher in every way than it was last year. 3. All the prescribed subjects are taught, except singing and drawing. When under examination, the pupils show a desire to do well, but their mental training has not hitherto been of a very satisfactory character. Under the present teacher better results are being produced. The average proficiency is tolerable.

## GUNDILLION (N.-V.) :—Inspected, 10th December, 1873.

Enrolled :—Boys, 7 ; girls, 7 ; total, 14.

Present :—Boys, 6 ; girls, 7 ; total, 13.

1. This school to be in a central position should be placed about a mile and a-half nearer to Fairfield. The building is in a tolerable state of repair, and there is a sufficient supply of furniture, apparatus, and working materials. 2. Three-fourths of the pupils are regular. They are attentive and obedient and the government is firm and quiet. 3. All the prescribed subjects are taught except singing and drawing. The methods of teaching are practical and intelligent and substantial progress has been made since last inspection. The average proficiency is between tolerable and fair.

## HAROLD'S CROSS (N.-V.) :—Inspected, 8th December, 1873.

Enrolled :—Boys, 5 ; girls, 9 ; total, 14.

Present :—Boys, 4 ; girls, 8 ; total, 12.

1. This is a rough little bark hut in a tolerable state of repair and sufficiently well provided with furniture and working necessaries. 2. Of fourteen enrolled twelve are regular, and all the children living within a radius of 2 miles attend. The pupils are quiet and attentive, and the general management is satisfactory. 3. All the prescribed subjects are taught except singing and drawing. When under examination the children answer readily what they know and appear to take much interest in their work. Since last inspection considerable progress has been made, and the teaching is conducted in an intelligent and practical manner. The average proficiency is between tolerable and fair.

## INGLEWOOD FOREST (N.-V.) :—Inspected, 12th May, 1873.

Enrolled :—Boys, 10 ; girls, 9 ; total, 19.

Present :—Boys, 9 ; girls, 6 ; total, 15.

1. School is held in a neat little brick building belonging to one of the residents. Everything about the room is clean and tidy and there is a sufficient supply of all requisites. 2. Half the children are regular, and those living near the school are punctual. They are clean, orderly, and well behaved. 3. Considering age and length of time at school the attainments are poor, and but slow progress has been made since last inspection. The average proficiency is between moderate and tolerable.

## JELLAT JELLAT (N.-V.) :—Inspected, 9th September, 1873.

Enrolled :—Boys, 10 ; girls, 14 ; total, 24.

Present :—Boys, 7 ; girls, 9 ; total, 16.

1. A new building has been put up since last inspection, which is well supplied with good furniture. 2. Of twenty-four pupils, eleven attend regularly. The discipline is not sufficiently strict. 3. The attainments are low. The lessons are skimmed through but nothing appears to be mastered. The average proficiency is between small and indifferent.

## JERRABAT GULLY (N.-V.) :—Inspected, 9th December, 1873.

Enrolled :—Boys, 9 ; girls, 9 ; total, 18.

Present :—Boys, 6 ; girls, 6 ; total, 12.

1. Except that a new supply of working stock is needed, the material condition is reasonably satisfactory. 2. Five-sixths of the pupils are regular. They are tolerably obedient, attentive, and quiet. 3. Under examination the children are dull. Little progress has been made since last inspection, and the attainments cannot be called satisfactory. The average proficiency is moderate.

## JERRICKNORRA and TOMBOYE (N.-V.) :—Inspected, 2nd May, 1873.

Enrolled :—Boys, 6 ; girls, 10 ; total, 16.

Present :—Boys, 5 ; girls, 8 ; total, 13.

1. The children were inspected at Jerricknorra. The building there is old and rough, but it answers all present demands. 2. All the prescribed subjects are taught except singing and drawing. Considering age and length of time at school the children are not as advanced as they should be. They answer with but little intelligence, and the progress made since last inspection is small. The average proficiency is tolerable. Since my visit, Tomboye and Jerricknorra have been united and are now worked with Dennis Flat.

## LABRY'S POINT (N.-V.) :—Inspected, 17th September, 1873.

Enrolled :—Boys, 5 ; girls, 9 ; total, 14.

Present :—Boys, 5 ; girls, 9 ; total, 14.

1. This is a very small rough hut, but at present it answers sufficiently well. 2. The school is worked with that at Snaphook, and is in all respects in about the same condition.

## M'DONALD'S FLAT (N.-V.) :—Inspected, 11th February, 1873.

Enrolled :—Boys, 8 ; girls, 4 ; total, 12.

Present :—Boys, 5 ; girls, 3 ; total, 8.

1. The building is rough and small, but is sufficiently good for existing requirements. This school is worked with that at Burra, and is in about the same condition.

## MERINGLO (N.-V.) :—Inspected, 3rd September, 1873.

Enrolled :—Boys, 6 ; girls, 7 ; total, 13.

Present :—Boys, 6 ; girls, 7 ; total, 13.

1. This school has but lately been established. Except that the records are slovenly and dirty and the new furniture already scratched and inked, the material condition is satisfactory. 2. Of the pupils most are reasonably regular, but there are at least ten children in the neighbourhood who have not yet attended. The school is worked with that at Bambooka, and, in regard to discipline, methods of instruction and attainments is in about the same condition.

## MOUNT ITALY (N.-V.) :—Inspected, 10th December, 1873.

Enrolled :—Boys, 5 ; girls, 6 ; total, 11.

Present :—Boys, 4 ; girls, 6 ; total, 10.

1. This school has but recently been opened. The building is large, but is not yet provided with necessary writing accommodation. 2. The pupils are regular and particularly clean and well behaved. 3. All the children are in the 1st class. They have made satisfactory progress during the time they have attended school. The average proficiency is between tolerable and fair.

## NORONGO (N.-V.) :—Inspected, 26th March, 1873.

Enrolled :—Boys, 8 ; girl, 1 ; total, 9.

Present :—Boys, 4 ; girls, 0 ; total, 4.

1. School has been held in a private house which is in every way unsuitable. 2. The attendance is wretched, and though fourteen children could attend not more than half that number can be assembled. Since my visit the teacher has been instructed to discontinue teaching at Norongo and Whinstone Valley till suitable buildings in central positions have been put up. At present the inhabitants show no disposition to do anything for themselves in regard to education.

## ORANMER (N.-V.) :—Inspected, 9th December, 1873.

Enrolled :—Boys, 11 ; girls, 12 ; total, 23.

Present :—Boys, 9 ; girls, 10 ; total, 19.

1. The building is a neat, little, thatched room, with a fair supply of furniture and apparatus. 2. Of twenty-three enrolled, fourteen are regular. They are clean, modest, and well-behaved. 3. Under the new teacher fair progress has been made, and should the pupils continue to attend regularly the school may soon be worked into an ordinary state of efficiency. The average attainments are between moderate and tolerable.

## PARKWOOD (N.-V.) :—Inspected, 4th February, 1873.

Enrolled :—Boys, 7 ; girls, 10 ; total, 17.

Present :—Boys, 7 ; girls, 10 ; total, 17.

1. The building is rough, but suitable for temporary purposes. 2. Out of seventeen pupils, sixteen are regular. They are dull and lifeless under examination, and appear unaccustomed to answer questions. 3. For their ages the attainments are poor, and but little progress has been made since last inspection. All the prescribed subjects are taught except singing, drawing, and needlework. The average proficiency is between indifferent and moderate.

## ROSENREATH (N.-V.) :—Inspected, 13th May, 1873.

Enrolled :—Boys, 12 ; girls, 6 ; total, 18.

Present :—Boys, 11 ; girls, 5 ; total, 16.

1. The building is good and sufficiently well supplied with furniture, apparatus, and working materials. 2. Half the pupils are regular. They are quiet, attentive, and obedient. All the prescribed subjects are taught except singing and drawing. Most of the pupils are very young, and are making ordinary progress. The average proficiency is tolerable.

## SIX-MILE FLAT (N.-V.) :—Inspected, 20th May, 1873.

Enrolled :—Boys, 6 ; girls, 9 ; total, 15.

Present :—Boys, 3 ; girls, 6 ; total, 9.

1. The roof leaks, the slab walls are very open, the whole place is unswept and untidy ; but there are sufficient desks and forms of a rough kind, and there is a full supply of apparatus and working stock. 2. Only four out of fifteen are regular and none are punctual. The children are tolerably clean but they talk in school and appear to do pretty much what they like. 3. All the prescribed subjects are attempted except singing, drawing, and needlework. The average proficiency is indifferent.

## SNAPHOOK (N.-V.) :—Inspected, 16th September, 1873.

Enrolled :—Boys, 8 ; girls, 15 ; total, 23.

Present :—Boys, 4 ; girls, 7 ; total, 11.

1. School is held in a rough slab hut. The desks answer fairly well, and there is a sufficient supply of apparatus and working materials. 2. Out of twenty-three pupils fourteen are regular. They are shy but attentive and obedient. 3. All the prescribed subjects are taught except singing and drawing. The present teacher has not been long in charge, and the children have done little more than commence their studies. The average proficiency is between moderate and tolerable.

## STONY CREEK (V.) :—Inspected, 10th September, 1873.

Enrolled :—Boys, 8 ; girls, 6 ; total, 14.

Present :—Boys, 7 ; girls, 6 ; total, 13.

1. This is a good building, well supplied with all requisites. The records and school documents are most neatly kept, and the general cleanliness and organization are admirable. 2. The children attend regularly, and their behaviour in school is in all respects satisfactory. 3. This school is worked with that at Tarragandah, and the attainments are of the same low character. The daily routine is faithfully gone through, but as the teacher does not appear to know when he has taught a thing and when he has not there is scarcely anything to show for his labour. The average proficiency is between indifferent and moderate.

## TARRAGANDAH (N.-V.) :—Inspected, 15th August, 1873.

Enrolled :—Boys, 6 ; girls, 3 ; total, 9.

Present :—Boys, 5 ; girls, 3 ; total, 8.

1. The material state of the school is good in all respects. 2. The population is scarcely sufficient to keep up the numbers. Only eight attend, and of these five are old enough to go to Bega and three are mere infants. 3. The attainments are very poor and the progress made has been small. The average proficiency is between indifferent and moderate.

## TOWAMBA (V.) :—Inspected, 29th August, 1873.

Enrolled :—Boys, 8 ; girls, 5 ; total, 13.

Present :—Boys, 7 ; girls, 5 ; total, 12.

1. The material condition is satisfactory in all respects, and everything about the school is particularly neat and tidy. 2. Of thirteen pupils ten are regular. They are attentive and obedient, but the government is a little too easy to ensure hard work. 3. All the prescribed subjects are taught except singing. The average proficiency is between tolerable and fair.

## WARRAGUBRA (N.-V.) :—Inspected, 9th September, 1873.

Enrolled :—Boys, 16 ; girls, 13 ; total, 29.

Present :—Boys, 8 ; girls, 10 ; total, 18.

1. The material condition is good in all respects. 2. The children are not regular, and when in school they talk too much. 3. The attainments are very poor ; nothing has been taught with even ordinary success. The average proficiency is between indifferent and moderate. The teacher now in charge is not responsible for these wretched results.

## WHINSTONE VALLEY (N.-V.) :—Inspected, 25th March, 1873.

Enrolled :—Boys, 4 ; girls, 10 ; total, 14.

Present :—Boys, 0 ; girls, 5 ; total, 5.

1. School is held in a private room, which is not central for the residents. The general outfit is insufficient. 2. Of fourteen enrolled, twelve are regular ; but at the time of my visit six were away on account of fever. The children are orderly and respectful, but excessively shy and timid. 3. The progress made in reading and writing is satisfactory ; that made in other subjects is but poor. The average proficiency is moderate.

WYNDHAM (V) :—Inspected, 30th August, 1873.

Enrolled :—Boys, 12 ; girls, 17 ; total, 29.  
Present :—Boys, 8 ; girls, 16 ; total, 24.

Steps are being taken to put up a house for the teacher. When this is done the material condition will be satisfactory, both as regards building and outfit. 2. Out of twenty-nine enrolled, eighteen are regular, but many living in the neighbourhood have not yet attended. The pupils are orderly and attentive and the government is firm. 3. All the prescribed subjects are taught, except drawing. Last year the attainments were poor, owing to irregular attendance. During the early part of this year the school was closed for a long time for want of a teacher, so that the children know even less now than they did. The average proficiency is moderate.

J. C. MAYNARD,  
Inspector, Braidwood District.

#### CAMDEN DISTRICT.

INSPECTOR'S Annual Report for 1873.

I HAVE the honor to submit, for the information of the Council of Education, my Annual Report for the year 1873. The information contained therein relates to the adequacy of the means of education in the district, as regards amount and distribution, the efficiency of the schools inspected, their material condition, organization, and general discipline, the subjects of instruction, moral training, progress of the pupils in learning, and prospects as to future usefulness.

#### SCHOOLS IN THE DISTRICT.

There are 103 schools in the Camden District, attended during the year 1873 by 7,249 scholars, being an increase of 267 pupils since last year. The following statement shows the number of each class of schools on 31st December, and the attendance of scholars :—

45 Public Schools, attended by 3,860 scholars—average for each school,	85.
18 Provisional	620 "
8 Half-Time	190 "
14 Church of England	1,266 "
14 Roman Catholic	1,039 "
3 Presbyterian	182 "
1 Wesleyan	86 "

No change has taken place in the number of each class of schools during the year, excepting that the Half-Time Schools at Marsden's and Maxwell's have been, at the request of the inhabitants, converted into Provisional Schools. The Council has agreed to the establishment of Half-Time Schools at Jamberoo Mountain and the Pheasant Ground. Applications were received during the year for the establishment of Public Schools at the villages of Gerringong and Jamberoo, and for Provisional Schools at Sugarloaf Hill, and Appin Road, near Campbelltown, but the Council did not deem it expedient to entertain them, on the ground that the means of education are already sufficient to meet the educational wants of the settlers. As regards the amount and distribution of the means of education in the district, I am of opinion that, with the exception of a few very sparsely settled localities, the schools are fairly distributed among the settlers ; but in several places the number is in excess of the wants of the people. At Campbelltown, Liverpool, Camden, Koggorah, Wollongong, Dapto, and Jamberoo, there are three schools at each place ; and at Appin, Bankstown, Wilton, Menangle, Brownlow Hill, and Charcoal Creek, there are two schools at each place. One school in each of these localities would be sufficient, and therefore thirteen schools, centrally situated, would supply the means of education afforded by thirty-three schools under present arrangements. In most cases the Council of Education has no power to remedy this state of matters, because the Public Schools Act provides for the support of two or three existing schools in one locality, so long as the required number of thirty pupils is maintained at each.

#### CONDITION OF THE SCHOOLS INSPECTED.

I inspected 87 of the schools in the district during the year, viz. :—35 Public, 14 Provisional, 8 Half-Time, 13 Church of England, 13 Roman Catholic, 3 Presbyterian, 1 Wesleyan.

Of the thirty-five Public Schools inspected, twenty-six are vested and twelve non-vested. Seven of the schoolhouses are built of stone, eleven of brick, and seventeen of wood. With only two or three exceptions, the buildings are in good repair. In almost every instance there are suitable playgrounds, outbuildings, and a comfortable residence for the teacher ; but for many of the schools, lavatories and weathersheds have not yet been provided. The school grounds, with two exceptions, are all fenced ; and the supplies of furniture, apparatus, and books are in almost every instance quite sufficient. Many of the vested buildings, although not of an ornamental character, are substantial and good, sufficient in size, well furnished, and properly ventilated.

Of the fourteen Provisional Schools inspected there are two of the schoolhouses built of brick and twelve of wood. The buildings are all in passable repair, and the supplies of apparatus and books are generally sufficient, but the furniture is frequently of an unsuitable kind. The playgrounds are often not enclosed, closets are sometimes wanting ; and generally there is no residence for the teacher. The material condition, however, of the Provisional Schools is improving.

Of the eight Half-Time Schools inspected, two are held in private dwellings. Three of the schoolhouses are of stone and five of wood. In three cases the buildings need some repairs and out-offices are required ; but otherwise, the material condition of the schools is tolerably satisfactory.

As regards the thirty Denominational Schools visited, there are eight held in churches. With two or three exceptions the schoolhouses are all in fair repair. Six of the buildings are of stone, seven of brick, and seventeen of wood. In six cases there is no residence for the teacher, but with two exceptions the school grounds are all fenced. During the year important repairs have been made to the Church of England Schools at Wollongong, Foxground, and Ashfield, and a new schoolroom has been erected for the Roman Catholic School at Charcoal Creek. Buildings are in course of erection for the Church of England School at Liverpool. The Denominational Schools are nearly all well supplied with furniture, apparatus, books, maps, clocks, and bells.

In nearly all the schools the classification of the pupils is carefully and intelligently arranged according to their ages and capacities for learning, but in some instances the programmes of lessons do not strictly accord with the "course of secular instruction" as prescribed on the "standard of proficiency." The time-tables are generally neatly and carefully prepared in accordance with the regulations. In a few instances I found the admission registers and daily report books incomplete, the class-rolls not closed at the end of the quarter, and the quarterly returns not kept in progress ; but in general, the school records are correctly and neatly kept. The cleanliness of the children attending the schools is in almost every instance satisfactory. This is in itself of great importance to the community, because it is so conducive to health and morality that it has been often and truly said that "cleanliness is a virtue." In some schools, however, the inspection of the scholars as to cleanliness is not sufficiently strict, and in nearly all the schools the late pupils are not inspected before taking their seats. The general rule is that every morning and afternoon the children form themselves into lines on the playgrounds before entering the school, and

and the teachers satisfy themselves by personal inspection that the hands, faces, necks, and ears of the pupils are clean, their hair brushed, and their clothes neat and clean. In very few instances were the schoolroom floors so thoroughly clean as they should be. I have, however, pointed out the urgent necessity for improvement in this respect, and attention has been promised to my suggestions. The irregularity of the scholars attendance continues to be a source of complaint among many teachers; but on the whole the attendance for the year was very fair, being 70 per cent. for the number enrolled, or about 168 full day attendances for each scholar. It is unquestionable that the degree of regularity greatly depends on the character of the teacher. Excessive irregularity is frequently assigned as the cause of the low condition of a school, but it is generally the result of the bad management of a teacher, for both parents and pupils naturally become indifferent when the discipline and instruction are of a worthless character. On the other hand, a good cheerful popular school, where the teacher is industrious, earnest, and painstaking in the performance of his duties, exerts an attractive influence over the children. They become anxious for learning, are less liable to be kept at home, and attend with increased regularity. I may however observe, that children in order to become useful colonists have other things to learn which to them are of far greater importance than regular attendance at school, and these are the means of earning an honest livelihood. This, with sickness, and in some cases poverty, are the chief causes of the irregular attendance of school children. Generally, the people of New South Wales have a strong desire to educate their children, and in some cases it is carried to excess. In the recent report of the Registrar General it is stated that at the time the Census was taken in 1871 there were between the ages of five and fifteen years 37,428 children who were not receiving any school instruction. These children are said to be chiefly employed assisting in the culture of the land, or as apprentices to trades, and the remainder are at home doing nothing. It however appears in the report that 70.79 per cent. of all the children in the Colony of the educable ages are actually receiving school instruction, and the Registrar General observes that in this respect New South Wales bears favourable comparison with England, where in 1861 the per centage of children between the ages of five and fifteen, returned as scholars under tuition, was about 58.8. During the month of September last I made inquiry relative to the number of children not receiving school instruction in the Camden District, and from the reports furnished to me on the subject I find that the number of children of the educable ages not attending school was 2,254. There were 5,357 scholars attending the schools in the district during the September quarter. It therefore appears that about three-tenths, or nearly one-third of the children of the educable ages, are not attending school. That all children of the educable ages in the Colony who have not been educated up to a certain standard of proficiency—(say) to read and write, and cast accounts fairly—should be attending school, I think no one will deny; but how to make them attend is a matter of great importance and a wide field for discussion, and I shall not enter upon it at present. In a number of the schools inspected the pupils are not sufficiently punctual. This is chiefly the case in the dairying parts of the district, where the children are chiefly employed in attending and milking cows. Although the teachers can do much if they use the proper means to train the children to habits of punctuality, it is in some cases very difficult, if not impossible, to get all the children to come to school at the proper time in the morning. I made careful inquiry as to the cause of the lateness of the pupils, and in many cases I found that they had been milking cows from 5 till about 9 o'clock, and then they had to prepare for school and travel some distance. But no matter what the result is, the milking must be done. As a general rule the children attending the schools are orderly, well-behaved, respectful in their manners, and attentive to their work.

The subjects of instruction prescribed by the Council, as set forth in the "Course of secular instruction" for the schools, may be summarized as follows:—

Reading, spelling, and meanings of words, knowledge of the subjects of the reading lessons, writing from copies and from dictation, slate and mental arithmetic, English grammar, composition, and analysis of sentences, geography, object lessons on the mineral, vegetable, and animal kingdoms, manufactures, and the production of food, with music, drawing, needlework, and Scripture, the laws of health, and duties of citizens, social economics, elementary mechanics, and book-keeping. Geometry, mensuration, algebra, and Latin are taught to the advanced pupils in a number of the schools. In addition to the plain needlework, the girls in some of the schools learn wool-work, crochet, knitting, netting, and tatting. With regard to the subjects that should be taught in Public Schools a great deal may be said; but I do not consider it advisable to deal with that subject at present. It will no doubt be admitted by all that the most useful instruction should be given, but to decide what is the most useful is the difficulty. In a number of the schools drawing and singing are not taught, because the teachers have not studied these subjects; and the extra branches are taught in only a few of the more important schools, but with these exceptions the "Course of secular instruction" is strictly observed.

As regards the management of the schools, including all matters of organization, discipline, and instruction, for which the teachers are responsible, the following statement shows the efficiency of the schools inspected:—

	3 schools are good.
13	" very fair.
30	" fair.
30	" tolerable.
11	" moderate.

I made it a business matter to examine each child carefully in every school that I inspected in all the branches it was learning. This process has the advantage of satisfying the teacher that the inspector is inquiring into all the operations of his school, and not merely into a favourable or an unfavourable sample of them. It pleases the children and gives confidence to the parents to find a stranger take an interest in examining them in the drudgery of their least inviting lessons; and it affords the inspector himself an unerring means of forming a correct estimate of the worth of the school. The standard is very much higher than the average proficiency of elementary schools, but nevertheless it is not only approachable, but attainable to a high degree of efficiency if the teachers would strictly adhere to the work prescribed, and bear constantly in mind that the three great means of instruction are explanation, interrogation, and repetition, carefully prepare the school work, and make the pupils thoroughly acquainted with each lesson as they proceed. In the eighty-seven schools inspected, I found 3,426 children present. Of these 530 were learning the alphabet, 1,036 reading and writing monosyllables, learning the elements of arithmetic, such as notation to three places, simple addition sums on slates, and mental operations involving results up to sixty. They are also taught object lessons on domestic animals and common things, and in a considerable number of the Public and Denominational Schools to sing melodies. In many of the schools the younger children are not taught with as much care as they should be. Too much time is occupied in learning to read, and sufficient attention is not given to the meanings of words. Of the 1,566 children examined in 1st class, the proficiency of 21 per cent. was good, 40 per cent. fair, and 39 per cent. moderate to tolerable in the subjects taught.

The children in the 2nd class read easy narrative; they write on paper from copies, and on slates portions of their readings, lessons from dictation. They learn the topography of the school district, the uses of a map, and to define the common geographical terms—the simple rules of arithmetic, notation, numeration, and tables—to define the parts of speech, and to distinguish them in their reading lessons—are taught to sing melodies by ear, or by the tonic sol-fa method,—and to draw rectilinear figures on slates. Of the 1,086 children examined in this class, the proficiency of 22 per cent. was good, 43 per cent. fair, and 35 per cent. moderate to tolerable in the subjects prescribed.

In the third and fourth classes there were 777 scholars present, being about 23 per cent. of the number examined. The proficiency of 32 per cent. of the pupils in these classes is good, 41 per cent. fair, and 24 per cent. moderate to tolerable in the course of instruction prescribed. That course includes reading

reading and writing, ordinary prose, English grammar, analysis of sentences, composition, the geography of the Continents in detail, arithmetic as far as and including fractions, with object lessons on manufactures, mechanics, and natural history. Singing, drawing, and Scripture are also taught in a considerable number of the schools inspected, and in some schools good progress has been made in algebra, geometry, and the elements of Latin. Generally speaking, the pupils in the third and fourth classes in all the schools read with ease and intelligence, and the penmanship is creditable. There are several where the reading of the younger children is painfully hesitating and indistinct, the subject of the lesson but little understood, and the writing careless. As regards arithmetic, in some schools the pupils are still backward at notation; but the chief defect appears to be the want of sufficient practice to secure accuracy. The theory of English grammar is fairly taught, but in few schools are the children trained with care to accuracy of expression, which is one of the great objects of studying the subject. There are few schools where the junior classes are not fairly acquainted with the outlines of the map of the world, and the advanced pupils have added to this a considerable knowledge of the physical and political geography of New South Wales, Australia, and the other Continents. Instruction in Scripture history is given in all the Public and some of the Provisional Schools. The teachers competent to give instruction in singing and drawing are on the increase. In a considerable number of the schools the pupils can sing part songs in a pleasing manner, but the theory is not well understood. In twenty-two of the schools drawing is creditably taught; but in several cases the teachers do not adhere with sufficient strictness to the course prescribed by the Council. Object lessons are given in all the schools, but in many cases their design and method of giving them are not generally well understood, the improvement of the intellectual powers and the cultivation of the habit of observation being overlooked. In the majority of the schools in charge of married teachers the needlework is creditably taught; but there are a few where it does not receive sufficient attention, and the full time specified in article 42 of the Regulations is not allotted to it, but steps have been taken to remedy the neglect. In nearly all the schools inspected there is more or less progress to note since last year, and retrogression as regards efficiency in any respect in very few. The apathy of some teachers, the removal or resignation of others, and the difficulty of securing the services of competent persons for the more important schools, frequently retard the progress of education.

*Concluding remarks.*—The material condition of several schools has been improved during the year, and repairs and additions to others are in progress. In many instances the School Boards do not hold regular meetings, the members seldom visit the schools, and they do not take much active interest in school matters, although they are all apparently more or less interested in the success and usefulness of the schools. The teachers of the district, as a body, are intelligent, industrious in the performance of their duty, and anxious for improvement. The attendance of pupils has increased since last year, and the present state of the schools affords evidence of progressive improvement, and warrants the hope that higher results may be fairly anticipated in future. Appended hereto is a summary of my reports on the schools inspected during the year.

W. MINTYRE.

Inspector, Camden District.

Inspector's Office, 15th January, 1874.

#### CAMDEN DISTRICT.—SUMMARY OF REPORTS FOR 1873.

The following remarks are abridged statements of my detailed reports upon the condition of the Public, Provisional, and Half-Time Schools, inspected by me during the year 1873. The remarks chiefly relate to the material condition and organization of the schools, the general discipline and moral training, the subjects and methods of instruction, and the progress of the pupils in learning:—

##### PUBLIC SCHOOLS.

APPIN (V.) :—Visited, 29th July.

Pupils enrolled :—Boys, 20 ; girls, 11 ; total, 31.  
At examination :—Boys, 17 ; girls, 9 ; total, 26.

Lavatories, a bell, and a weathershed are required, and the walls of the closets need painting ; but in all other respects the material condition of the school is good. The discipline is satisfactory, the classification is not quite appropriate, and the school work does not fully accord with the course of instruction prescribed. The time devoted to reading by the 1st class is insufficient, and the 2nd and 3rd classes do not use the proper class-books. There is no drill instruction, and the schoolroom floor was not sufficiently clean. The management is tolerable. The pupils answered 50 per cent. of the questions asked at the examination.

ASHFIELD (N.-V.) :—Visited, 26th February.

Pupils enrolled :—Boys, 31 ; girls, 23 ; total, 54.  
At examination :—Boys, 22 ; girls, 16 ; total, 38.

The material condition of this school is bad, and new school-buildings are much required. The instruction and discipline are satisfactory. The school exhibits progressive improvement, and it exercises a salutary influence within its sphere of operation ; but it does not appear to be so much appreciated as it should be. The management is very fair. The pupils answered 70 per cent. of the questions asked at the examination. The School Board has been endeavouring to make arrangements for the erection of suitable buildings, but there is much difficulty in procuring a proper site.

AVONDALE (V.) :—Visited, 11th December.

Pupils enrolled :—Boys, 33 ; girls, 27 ; total, 60.  
At examination :—Boys, 27 ; girls, 23 ; total, 50.

Lavatories, weathersheds, and repairs to the roof of the schoolroom are required ; but in all other respects the material condition of the school is fairly satisfactory. All the ordinary subjects of instruction are taught except singing, and the teaching is conducted with industry and care. The general discipline and attainments of the pupils are fairly satisfactory. 66 per cent. of the questions asked at the examination were answered.

ALBION PARK (V.) :—Visited, 12th December.

Pupils enrolled :—Boys, 36 ; girls, 30 ; total, 66.  
At examination :—Boys, 25 ; girls, 23 ; total, 48.

The buildings are new, constructed of timber, substantial and good ; but lavatories and weathersheds have not yet been erected. The general discipline is fairly satisfactory. All the subjects of instruction prescribed are taught except singing. The school records are not quite complete, and the full time required by article 42 of the Regulations is not given to the needlework. The classification is not sufficiently careful. The school has been but a short time in operation. The pupils answered about 65 per cent. of the questions asked. The attainments are therefore not fully up to very fair.

BERKELEY

BERKELEY (V.) :—Visited, 5th December.

Pupils enrolled :—Boys, 26 ; girls, 14 ; total, 40.

At examination :—Boys, 15 ; girls, 5 ; total, 20.

Lavatories, hat-pegs, and weathersheds are required. The inside walls of the schoolroom are in much need of colouring, and the buildings require painting. The school business did not begin until 10 o'clock, half an hour after the proper time. The pupils are irregular and unpunctual. The desks, floor, walls, and windows of the schoolroom were not sufficiently clean. All the prescribed subjects are taught except singing. The small number of pupils present was caused by the wet weather. 50 per cent. of the questions asked at the examination were answered, and the proficiency of the pupils is tolerable.

BROUGHTON VILLAGE (V.) :—Visited, 3rd November.

Pupils enrolled :—Boys, 24 ; girls, 28 ; total, 52.

At examination :—Boys, 22 ; girls, 26 ; total, 48.

A bell and a class-room are required ; but in all other respects the material condition of the school is good, and the property is kept with much neatness and care. The organization and general discipline are satisfactory. All the subjects prescribed by the Council are taught, except singing, and the teaching is conducted with skill and industry. 70 per cent. of the questions asked at the examination were answered, and the proficiency of the pupils is very fair.

BULLI (V.) :—Visited, 26th November.

Pupils enrolled :—Boys, 57 ; girls, 50 ; total, 107.

At examination :—Boys, 46 ; girls, 44 ; total, 90.

A water-tank and fencing have been supplied since last inspection, and a kitchen is in course of erection. Separate playgrounds have been provided for the boys and girls. Weather-sheds are required ; but in all other respects the material condition of the school is good. All the subjects prescribed by the Council are taught with success. The classification of the pupils is appropriate, and the school-work is carefully and skilfully arranged. 80 per cent. of the questions asked at the examination were answered, and the proficiency of the pupils is good.

BULLI NORTH (V.) :—Visited, 27th November.

Pupils enrolled :—Boys, 13 ; girls, 10 ; total, 23.

At examination :—Boys, 5 ; girls, 6 ; total, 11.

There are no lavatories nor weather-sheds ; but otherwise the material condition of the school is good. The establishment of the Public School at Bulli and the removal of some of the settlers have greatly reduced the attendance of scholars at this school, but as some of the land in the neighbourhood has been recently sold to Melbourne Coal Companies, it is probable that the population may increase. The small number of pupils present was caused by the death of a person near the school. The elder children are not punctual, having to milk cows in the morning ; but otherwise the discipline is passable. All the subjects are taught but singing. About 50 per cent. of the questions asked at the examination were answered, and the proficiency of the pupils is tolerable.

CAMDEN (V.) :—Visited, 20th March.

Pupils enrolled :—Boys, 43 ; girls, 22 ; total, 65.

At examination :—Boys, 26 ; girls, 11 ; total, 37.

The residence is too small. The desks are old, but substantial, and there is an ample supply of apparatus and books. About 60 per cent. of the pupils attend regularly, and a number are unpunctual, but they are clean and orderly and attentive to their work. The small attendance was caused by the late disastrous flood. All the subjects of instruction prescribed by the Council are taught. 70 per cent. of the questions asked at the examination were answered, and the proficiency of the pupils is very fair.

CAWDOR (N.-V.) :—Visited, 26th March.

Pupils enrolled :—Boys, 39 ; girls, 33 ; total, 72.

At examination :—Boys, 25 ; girls, 23 ; total, 48.

Hat-pegs are required ; but in all other respects the material condition of the school is reasonably good. The general discipline is satisfactory. All the subjects prescribed by the Council are taught, except singing. The classification is appropriate, the schoolwork is properly arranged, and the teaching is conducted with industry and care. 60 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is fair.

FAIRY MEADOW (V.) :—Visited, 27th August.

Pupils enrolled :—Boys, 38 ; girls, 36 ; total, 74.

At examination :—Boys, 33 ; girls, 29 ; total, 62.

Lavatories, another desk, new closets, and some repairs to the roof of the building are required ; otherwise, the material condition of the school is reasonably good. About two-thirds of the pupils are regular, and nearly all punctual. All the subjects prescribed are taught, and the teaching is conducted with industry and care. Owing to the increased attendance of scholars the services of a pupil teacher are required. 65 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is not fully very fair.

GLENMORE (V.) :—Visited, 24th May.

Pupils enrolled :—Boys, 23 ; girls, 16 ; total, 39.

At examination :—Boys, 18 ; girls, 14 ; total, 32.

A gate to the premises, a kitchen, weather-sheds, and out-buildings for the girls are required, but otherwise the material condition of the school is good. The supply of school requisites is sufficient, and the records are correct. About three-fourths of the scholars are regular, but they are not punctual. All the subjects prescribed by the Council are included in the course of instruction. 43 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is moderate.

GLENSWOOD (V.) :—Visited, 21st March.

Pupils enrolled :—Boys, 16 ; girls, 14 ; total, 30.

At examination :—Boys, 12 ; girls, 9 ; total, 21.

Additional hat-pegs, a table, a chair, and some repairs to the out-buildings are required, but otherwise the material condition of the school is reasonably good. The inscription—"Public School"—has not been placed on the schoolroom. About 65 per cent. of the scholars are regular, but they are not punctual. They are clean and decently clad, but not sufficiently attentive. The subjects of instruction are those prescribed. 45 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is not fully tolerable.

**JAMBEROO (V.)** :—Visited, 17th July.

Pupils enrolled :—Boys, 34 ; girls, 20 ; total, 54.  
At examination :—Boys, 34 ; girls, 17 ; total, 51.

The residence is small, lavatories and weather-sheds are required, and the inside walls of the schoolroom are in much need of colouring. The supply of furniture, apparatus, and books is sufficient, and the records are correct. The general discipline is satisfactory. All the subjects prescribed by the Council are taught. 60 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is fair.

**KIAMA (V.)** :—Visited, 22nd, 23rd, and 24th October.

Pupils enrolled :—Boys, 144 ; girls, 88 ; total, 232.  
At examination :—Boys, 123 ; girls, 84 ; total, 207.

Owing to the increased attendance of pupils the schoolroom is too small. Weather-sheds, a lavatory for the girls, and a separate apartment for the younger children are urgently needed. The general discipline is satisfactory. In addition to the ordinary subjects the elder boys are well advanced in Latin, algebra, and geometry. The teachers are industrious and skilful, and the school is managed with much success and efficiency, and it is highly beneficial to the district. About 90 per cent. of the questions asked at the examination were answered. The proficiency of the scholars is very good.

**KOGGERAH (N.V.)** :—Visited, 20th November.

Pupils enrolled :—Boys, 24 ; girls, 30 ; total, 54.  
At examination :—Boys, 18 ; girls, 22 ; total, 40.

A residence for the teacher, lavatories, and fencing are required ; but in other respects the material condition of the school is reasonably good. The discipline is fairly satisfactory. The prescribed subjects are taught, the instruction is properly regulated, and the proficiency of the pupils, so far as examined, was fair.

**LIVERPOOL (V.)** :—Visited, 19th February.

Pupils enrolled :—Boys, 62 ; girls, 28 ; total, 90.  
At examination :—Boys, 54 ; girls, 21 ; total, 75.

A residence for the teacher, lavatories, and weather-sheds are required. The working materials are sufficient, and in all other respects the material condition of the school is good. Seven-tenths of the pupils are regular, and nearly all punctual ; but the schoolroom, furniture, and maps were not sufficiently clean. All the subjects prescribed by the Council are taught and the classification is appropriate ; but the lesson documents do not fully accord with the "standard." 56 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is not fully up to fair.

**MARSHALL MOUNT (V.)** :—Visited, 12th December.

Pupils enrolled :—Boys, 23 ; girls, 29 ; total, 52.  
At examination :—Boys, 19 ; girls, 21 ; total, 40.

Lavatories, weather-sheds, and a bell are required. The supply of apparatus, furniture, and books is sufficient. The general discipline is fairly satisfactory. All the subjects prescribed by the Council are taught, the instruction is properly regulated, and the teaching is conducted with industry and care. The proficiency of the pupils, so far as examined, was nearly very fair.

**MULGOA FOREST (N.V.)** :—Visited, 22nd May.

Pupils enrolled :—Boys, 28 ; girls, 23 ; total, 51.  
At examination :—Boys, 23 ; girls, 19 ; total, 42.

Lavatories, new out-buildings, hat-pegs, and weather-sheds are required. There is no drill instruction given, but the discipline is fairly satisfactory in most respects. Drawing and singing are not taught, but the lesson documents are properly arranged. The teaching does not appear to be conducted with much industry or skill. 43 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is but little above moderate.

**MOUNT KEIRA (N.V.)** :—Visited, 25th November.

Pupils enrolled :—Boys, 34 ; girls, 26 ; total, 60.  
At examination :—Boys, 22 ; girls, 16 ; total, 38.

The schoolroom has been repaired since the last inspection, but closets, lavatories, weather-sheds, and a book-press are still required. The supply of working materials is sufficient, but some of the books are much worn. Two-thirds of the pupils are regular, but they are not sufficiently punctual. All the prescribed subjects are taught except singing. The classification is appropriate and the schoolwork is properly arranged. 60 per cent. of the questions asked at the examination were answered. The attainments of the pupils are fair.

**MENANGLE (V.)** :—Visited, 13th May.

Pupils enrolled :—Boys, 18 ; girls, 22 ; total, 40.  
At examination :—Boys, 18 ; girls, 19 ; total, 37.

Lavatories, weather-sheds, a clock, and a verandah to the teacher's residence are required. The records are correct, and the supply of working materials is sufficient. Two-thirds of the pupils are regular ; but they are not sufficiently punctual. They are frequently kept at home to work. Singing is not taught. The classification is appropriate ; but the programmes of lessons do not fully accord with the "standard." About 60 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is fair.

**OMEGA RETREAT (V.)** :—Visited, 27th October.

Pupils enrolled :—Boys, 61 ; girls, 30 ; total, 91.  
At examination :—Boys, 50 ; girls, 29 ; total, 79.

Lavatories, weather-sheds, hat-pegs, a book-press, new desks and forms, new closets, new locks for the doors, and some repairs to the windows are required. The discipline is fairly effective, but the classification is rather high ; and the time devoted to reading by the junior classes is insufficient. The writing is not sufficiently careful, and many of the pupils are backward in arithmetic. All the subjects prescribed by the Council are taught with considerable care and industry, but greater thoroughness in the work is required. 65 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is not fully up to very fair.

**PEAKHURST (N.V.)** :—Visited, 23rd June.

Pupils enrolled :—Boys, 21 ; girls, 26 ; total, 47.  
At examination :—Boys, 17 ; girls, 23 ; total, 40.

There is no residence for the teacher, and a book-press and lavatories are required. The supply of working materials is sufficient, and the general discipline is tolerably satisfactory. Needlework, singing, and drawing are not taught. The lesson documents do not fully accord with the standard, and the classification

fication is not quite appropriate; but the teaching is conducted with much industry and earnestness, 50 per cent. of the questions asked at the examination were answered. The attainments of the pupils are tolerable.

PETERBOROUGH (N.-V.) :—Visited, 4th November.

Pupils enrolled :—Boys, 39; girls, 32; total, 71.  
At examination :—Boys, 30; girls, 28; total, 58.

The situation is not quite central, and the residence is in bad repair. A book-press, additional hat-peg, and better out-buildings are much needed. The schoolroom is a low building, and the roof is leaky; but there is a sufficient supply of desks and forms. The books are much worn; otherwise, there is a fair supply of working materials. The records are correct. The general discipline is fairly effective. All the prescribed subjects are taught but singing, and the teaching is conducted with skill and industry. 70 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is very fair.

PICTON, UPPER (V.) :—Visited, 9th April.

Pupils enrolled :—Boys, 21; girls, 36; total, 57.  
At examination :—Boys, 18; girls, 32; total, 50.

When the additional room and verandah to the teacher's residence, now in course of erection, have been completed, the material condition of the school will be good. Two-thirds of the pupils are regular, but a considerable number are unpunctual. There is no system of drill, and the order is not good. The prescribed subjects are taught, and the classification of the pupils is appropriate. The school work is properly arranged, and the teaching is conducted with considerable zeal and industry. The school was in a very unsatisfactory condition when the present teacher took charge. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

PICTON, LOWER (V.) :—Visited, 7th May.

Pupils enrolled :—Boys, 75; girls, 58; total, 133.  
At examination :—Boys, 70; girls, 46; total, 116.

The material condition of this school is good in all respects, the general discipline is effective, and the instruction is properly arranged. All the prescribed subjects are taught, the school is much appreciated by the inhabitants, and it exercises a salutary influence among the people. The teachers are earnest, industrious, and painstaking in the performance of their duties. 75 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is over very fair.

ROSE VALLEY (V.) :—Visited, 28th October.

Pupils enrolled :—Boys, 10; girls, 13; total, 23.  
At examination :—Boys, 9; girls, 12; total, 21.

The buildings require painting, and the weather-sheds need some repairs to the roof, but in all other respects the material condition of the school is reasonably good. The general discipline is satisfactory, and the instruction is properly regulated. All the subjects of instruction prescribed by the Council are taught. 60 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is fair.

SHELLHARBOUR (V.) :—Visited, 30th October.

Pupils enrolled :—Boys, 35; girls, 53; total, 88.  
At examination :—Boys, 27; girls, 35; total, 62.

Weather-sheds and lavatories are required, but in all other respects the material condition of the school is good. Two additional rooms and a verandah to the teacher's residence have been erected since the last inspection. All the prescribed subjects are taught, the instruction is well regulated, and the teaching is conducted with industry and attention. 70 per cent. of the questions asked at the examination were answered. The proficiency of the scholars is very fair.

TOOLEMOCA (N.-V.) :—Visited.

Pupils enrolled :—Boys, 62; girls, 53; total, 115.  
At examination :—Boys, 45; girls, 55; total, 100.

Lavatories, a weather-shed, and a bell are required. The schoolroom is in much need of lining with boards. Some additional books and diagrams are required. The discipline is satisfactory, the prescribed subjects are taught, the classification is appropriate, and the teaching is conducted with attention and industry. The proficiency of the pupils, as far as examined, is very fair.

VIOLET HILL (V.) :—Visited, 16th December.

Pupils enrolled :—Boys, 26; girls, 29; total, 55.  
At examination :—Boys, 21; girls, 27; total, 48.

A classroom, a weather-shed, a water tank, and a lavatory are required. The organization and general discipline are fairly satisfactory. Sufficient time is not given to the needlework, and drawing and singing are not taught. 55 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is above tolerable.

WOLLONGONG, Boys (V.) :—Visited, 21st August.

Pupils enrolled :—Boys, 64.  
At examination :—Boys, 52.

A lavatory and weather-sheds are required. The closets are too near the residence. The walls and ceiling of the schoolroom require colouring, but otherwise the material condition is good. There is an ample supply of working materials, but the records are not quite complete. Three-fourths of the scholars are regular and punctual, clean, orderly, attentive to their work, and respectful in their manners. The government is judicious, and the tone of the school is good. The classification is appropriate, excepting that the pupils recently removed from the infant school are quite unfit for the boys' department. All the subjects prescribed by the Council are taught, and the lesson documents are carefully prepared. 66 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is not quite up to very fair.

WOLLONGONG (Girls) V. :—Visited, 22nd August.

Pupils enrolled :—Girls, 79.  
At examination :—Girls, 69.

A lavatory and a weather-shed are required. The closets are too near the schoolroom, and the drainage is bad. The schoolroom is too small, and the walls and ceiling are in much need of colouring. There is an ample supply of working materials, and the records are correct. The general discipline is satisfactory. The prescribed subjects are taught, and the classification is appropriate, excepting that the pupils recently removed from the infant school are quite unfit for the girls' department. 70 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is very fair.

WOLLONGONG

**WOLLONGONG (Infants) V. :—Visited, 20th August.**

Pupils enrolled :—Boys, 32 ; girls, 34 ; total, 66.  
At examination :—Boys, 26 ; girls, 20 ; total, 46.

The walls of the schoolroom need colouring, and the ventilation is imperfect. A table and a chair are required, and a lavatory and a weather-shed are much needed. The supply of apparatus and books is sufficient and the records are correct. The pupils are rather restless and talkative when under instruction. The attainments are tolerable.

**WILTON (V.) :—Visited, 31st July.**

Pupils enrolled :—Boys, 31 ; girls, 20 ; total, 51.  
At examination :—Boys, 25 ; girls, 11 ; total, 36.

A supply of water, a clock, a gate, a book-press, a lavatory, and a weather-shed are required. About two-thirds of the scholars are regular, but a considerable number are unpunctual. They are tolerably clean and orderly. All the subjects prescribed by the Council are taught, but the classification is unsuitable, and the instruction is not properly regulated. 45 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is above moderate.

**WOODSTOCK (N.V.) :—Visited, 23rd September.**

Pupils enrolled :—Boys, 36 ; girls, 34 ; total, 70.  
At examination :—Boys, 33 ; girls, 28 ; total, 61.

There are no lavatories nor weather-sheds, but otherwise, the material condition is reasonably good. The site is low and damp, and not sufficiently central to conveniently accommodate the settlers in the village of Jamberoo. A good Vested Public School in a more central position, instead of this school, is required for this locality. About two-thirds of the pupils are regular and punctual in attendance. The cleanliness, order, attention, and manners, of the children are satisfactory ; and the government is judicious. All the prescribed subjects are taught, the instruction is well regulated, and the teaching is conducted with zeal and industry. 70 per cent. of the questions asked at the examination were answered. The attainments of the pupils are very fair.

**PROVISIONAL SCHOOLS.****BARGO :—Visited, 10th April.**

Pupils enrolled :—Boys, 10 ; girls, 13 ; total, 23.  
At examination :—Boys, 8 ; girls, 9 ; total, 17.

This school is held in a room of Mr. John Ashcroft's residence. It is suitable and properly furnished, and the working materials are sufficient. The records are incomplete, the pupils are very unpunctual, inattentive, and disorderly. The schoolroom is not sufficiently clean, and the government is very lax. Drawing is not taught, the classification is not appropriate, and there are no programmes of lessons in use. The present teacher has been recently appointed. About 40 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is moderate.

**BLACKGOLER :—Visited, 24th April.**

Pupils enrolled :—Boys, 11 ; girls, 10 ; total, 21.  
At examination :—Boys, 7 ; girls, 9 ; total, 16.

The schoolhouse is constructed of wooden slabs and shingles. It is sufficient in size, but needs two windows. Outbuildings, suitable desks and forms, hat-pegs, a book-press, a chair, and a table are required. The children are tolerably clean and orderly. They are learning the mere elements of reading, writing, and arithmetic. The proficiency is small.

**BROWNLOW HILL :—Visited, 27th March.**

Pupils enrolled :—Boys, 10 ; girls, 17 ; total, 27.  
At examination :—Boys, 5 ; girls, 6 ; total, 11.

The site is low, and the schoolroom was flooded up to the eaves in February last. The fencing, school materials, and walls of the schoolhouse were much injured, and the majority of the pupils have not since returned to the school. The records are correct ; but the desks are unsuitable. A fresh stock of apparatus and books has been ordered. Two-thirds of the pupils are regular and punctual, and the few children present were clean and orderly. Singing and drawing are not taught ; but the schoolwork is properly arranged, and the teaching is earnest and intelligent. 57 per cent. of the questions asked at the examination were answered. The proficiency of the scholars is nearly fair.

**BULL MOUNTAIN :—Visited, 27th November.**

Pupils enrolled :—Boys, 17 ; girls, 17 ; total, 34.  
At examination :—Boys, 9 ; girls, 12 ; total, 21.

Fencing, outbuildings, hat-pegs, lavatories, weather-sheds, a clock, and a bell are required. The schoolroom is built of sawn timber and shingles, and in fair repair, and there is a sufficient supply of furniture, apparatus, and books. About two-thirds of the scholars are regular ; they are not all punctual ; but they are tolerably clean and orderly. All the prescribed subjects are taught except singing. About 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

**BROOK'S POINT :—Visited, 4th August.**

Pupils enrolled :—Boys, 13 ; girls, 5 ; total, 18.  
At examination :—Boys, 13 ; girls, 5 ; total, 18.

Fencing, closets, weather-sheds, a lavatory, a table, and hat-pegs are required. The schoolroom is built of wooden slabs and shingles, and in fair repair. The supply of furniture, apparatus, and books is sufficient. The general discipline is tolerably satisfactory. Drawing is not taught. The programmes for the current quarter have not yet been prepared. 50 per cent. of the questions asked at the examination were answered. The attainments of the pupils are tolerable.

**CORDEAUX RIVER :—Visited, 16th December.**

Pupils enrolled :—Boys, 17 ; girls, 20 ; total, 37.  
At examination :—Boys, 11 ; girls, 17 ; total, 28.

New schoolbuildings have been erected since the last inspection ; but closets, a weathershed, a kitchen, and a supply of hat-pegs are required. There is a fair supply of furniture, apparatus, and books, but the desks are of a bad description. The general discipline is tolerable. Singing and drawing are not taught. The teacher is industrious. The proficiency of the pupils is tolerable so far as examined.

MOORFIELDS :—

## MOORFIELDS:—Visited, 8th July.

Pupils enrolled:—Boys, 28; girls, 9; total, 37.  
At examination:—Boys, 27; girls, 8; total, 35.

The schoolroom is built of bricks and shingles and in fair repair. Closets, a lavatory, and a book-press are required; but there is a sufficient supply of furniture, apparatus, and books. The records are correct. The general discipline is tolerably satisfactory. The subjects of instruction prescribed are taught except needlework and singing. The time devoted to reading by the 1st class is insufficient; but otherwise, the time-table and programmes are suitable, and the teaching is conducted with tolerable care and attention. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

## NEW RUN:—Visited, 3rd June.

Pupils enrolled:—Boys, 17; girls, 7; total, 24.  
At examination:—Boys, 8; girls, 4; total, 12.

The schoolroom is built of slabs and bark; but it still requires flooring and windows. Lavatories, hat-pegs, and a weather-shed are needed. The furniture consists of a rough bush table and four forms made of adzed-hardwood. Suitable furniture and a supply of apparatus and books are much wanted. The pupils are unpunctual and not sufficiently clean, and the general discipline is unsatisfactory. Singing is not taught. The instruction is not well regulated. All the elder pupils were absent pulling maize. The children present were learning the mere elements of reading, writing, and arithmetic. The progress is slow and unsatisfactory.

## OAKDALE:—Visited, 2nd June.

Pupils enrolled:—Boys, 8; girls, 15; total, 23.  
At examination:—Boys, 3; girls, 13; total, 16.

The schoolroom is built of slabs and bark, and in fair repair, but it needs windows. There are no hat-pegs nor lavatories, but otherwise, the supply of furniture, apparatus, and books is sufficient. The general discipline is tolerably satisfactory. The prescribed subjects are taught, except singing and drawing. The classification is suitable, but the lesson documents are not carefully drawn up. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

## SAGGART FIELD:—Visited, 30th May.

Pupils enrolled:—Boys, 14; girls, 16; total, 30.  
At examination:—Boys, 10; girls, 9; total, 19.

A lavatory is required, but otherwise the material condition of the school is passable. Two-thirds of the pupils are regular and punctual. They are clean and orderly, and well behaved. Drawing is not taught, but the classification and lesson documents are suitable, and the teaching is conducted with care and attention. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

## ST. JOSEPH'S:—Visited, 24th April.

Pupils enrolled:—Boys, 14; girls, 10; total, 24.  
At examination:—Boys, 7; girls, 8; total, 15.

The schoolroom is built of slabs and shingles, but it requires two windows. Desks, forms, hat-pegs, out-buildings, and a chair and table are needed. The children are clean and orderly. They are learning the mere elements of reading, writing, and arithmetic. The proficiency is small.

## THERESA PARK:—Visited, 20th May.

Pupils enrolled:—Boys, 14; girls, 19; total, 33.  
At examination:—Boys, 10; girls, 11; total, 21.

There are no lavatories, and fencing is required. The supply of working materials is sufficient; about half the pupils are regular; but they are not sufficiently punctual. The cleanliness, order, attention, and manners of the pupils are fairly satisfactory. Singing and drawing are not taught. The classification is not quite appropriate, but the lesson documents are carefully prepared, and the teaching is conducted with industry and attention. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

## THE DAIRY:—Visited, 21st May.

Pupils enrolled:—Boys, 13; girls, 9; total, 22.  
At examination:—Boys, 8; girls, 8; total, 16.

The schoolroom is built of wooden slabs and bark, and it needs two windows. A lavatory, a book-press, and a blackboard, a table, and a chair are required. About three-fourths of the pupils are regular and tolerably punctual. The cleanliness, order, and attention are passable. The children are learning the mere elements of reading, writing, and arithmetic. The attainments are small.

## WEROMBI:—Visited, 9th June.

Pupils enrolled:—Boys, 7; girls, 21; total, 28.  
At examination:—Boys, 2; girls, 11; total, 13.

The schoolroom is built of wooden slabs and shingles, and in good repair, but a lavatory, hat-pegs, and fencing are required. The small number of pupils present was caused by the wet morning. The general discipline is satisfactory; singing and drawing are not taught. The lesson documents are properly prepared. 53 per cent. of the questions asked at the examination were answered. The progress of the pupils is tolerable.

## HALF-TIME SCHOOLS.

## BELMORE AND ESSEX HILL:—Visited, 12th September.

Pupils enrolled:—Boys, 19; girls, 14; total, 33.  
At examination:—Boys, 19; girls, 14; total, 33.

The schoolhouses are suitable, but there is no residence for the teacher. The supply of furniture and working materials is nearly sufficient, and the records are correct. At Essex Hill a weather-shed, a lavatory, a bell, hat-pegs, a supply of water, and some fencing are required. About two-thirds of the pupils are regular and punctual. They are clean and orderly and respectful in their manners. All the prescribed subjects are taught except singing. The schoolwork is properly regulated, and the teaching is conducted with industry and earnestness. 60 per cent. of the questions asked at the examination were answered. The progress of the pupils is fair.

## BIMLOW AND MALENDI:—Visited, 6th June.

Pupils enrolled:—Boys, 15; girls, 13; total, 28.  
At examination:—Boys, 10; girls, 11; total, 21.

The schoolrooms are built of wooden slabs and bark. They need windows instead of shutters. The desks and forms are too high, closets, a book-press, a table, a chair, and hat-pegs are required for each school. The discipline is tolerable. The prescribed subjects are taught, but the programmes of lessons are not well arranged, and the teaching is of a very superficial character. About 40 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is moderate.

## BELOON AND TOONTLLI:—Visited, 4th June.

Pupils enrolled:—Boys, 24; girls, 15; total, 39.  
At examination:—Boys, 15; girls, 12; total, 27.

The schoolrooms are suitable, and the supply of furniture, apparatus, and books is sufficient. Out-buildings are required at Beloon. There is no residence for the teacher. About two-thirds of the scholars are regular and punctual. There are eight aboriginal children attending. The discipline is effective. All the prescribed subjects are taught, and the instruction is well regulated. 60 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is fair.

## HAYES AND JONES:—Visited, 5th June.

Pupils enrolled:—Boys, 7; girls, 14; total, 21.  
At examination:—Boys, 7; girls, 14; total, 21.

There is no residence for the teacher; one of the schoolrooms needs some repairs, and closets, lavatories, and a book-press are needed for both schools. The children are clean and orderly. The prescribed subjects are taught, and the lesson documents are neatly and carefully prepared. The teacher is industrious. 50 per cent. of the questions asked at the examination were answered. The proficiency of the pupils is tolerable.

W. MCINTYRE,  
Inspector, Camden District.

## CUMBERLAND DISTRICT.

INSPECTOR'S General Report on the condition of Schools visited and reported upon during 1873.

EIGHTY-EIGHT schools have been in operation in the district during the year, viz. :—

Public .....	34
Provisional .....	16
Half-Time.....	4
Church of England.....	18
Roman Catholic .....	12
Wesleyan .....	2
Presbyterian.....	2
Total.....	88

Of these, three, viz., Parramatta Wes., Shancamore Prov., and Tottenham Park Prov., have been finally closed, the two latter from paucity of attendance; two—Kellyville Pub. and Petersham C.E.—were placed under the superintendence of the Council towards the close of the year; and two—Lower M'Donald Public and Upper M'Donald H.T.—were shut for the greater part of the year. Cobbitty C.E., Greendale Prov., Lower Portland Pub., and Upper Colo and Wheeny Creek H.T. Schools were also closed for a time, owing to the difficulty of obtaining teachers for them. Two others on the list of schools—Frecman's Reach Pub. and Peat's Ferry Prov.—have not been opened during the year. With respect to the former active steps have been taken to remove the buildings to a site less accessible to floods, but various difficulties have arisen to delay its accomplishment. The Parramatta Wes. has been closed by the voluntary act of the Local Board; and the Parramatta Pres., through the action of its Board, has been converted into a Public School.

Various improvements, additions, or repairs have rendered the material condition of the following schools of a more satisfactory character, viz., Burwood, Castlereagh, Dural, Luddenham, Parramatta, Penrith, Richmond, and Smithfield Public, Cabramatta and Cobbitty C.E., and Penrith and Petersham R.C. At the latter place a new brick schoolroom has been erected, and steps have been taken for a similar purpose in connection with the Richmond and Ryde C.E. and St. Mary's Public Schools.

From the fact of this district comprising within its boundaries some of the earliest settled parts in the Colony, the remark may be anticipated that there are but few places within it requiring schools—whose wants have not been already supplied by one or other of the schools, recognized and provided for by the Public Schools Act. Action has been taken to establish a Public School at Rooty Hill, on the old Windsor Road, and application has been made to re-open schools at Wiseman's Ferry and Australian Farm on the Hawkesbury. Provisional or Half-Time Schools may be found necessary to meet the wants of a few thinly-peopled localities chiefly connected with the Hawkesbury; and it will probably be requisite to establish a Public School between Balmain West and the schools already in existence around Petersham. On the whole, however, little requires to be done in the way of extension of the means of education in this district as compared with others more inland and more subject to fluctuations of population. These means are already fairly well supplied so far as providing necessary accommodation is concerned. There are few school-going children in the district who have not access to a school of some kind, if their parents have a wish to send them to it.

But while the provision made to meet the educational wants of the district may be looked upon as reasonably sufficient for that purpose, it does not appear that the education offered is estimated at its proper value. In no other way can the fact be accounted for that some are utterly regardless and never send their children to school at all, while others avail themselves of it so irregularly as to show that to them it is a matter of little moment whether their offspring receive or go without education. They send their children to school for such short periods—often with long intervals between them—that but small mental or moral benefit can accrue from the instruction or discipline of the school. From year to year this state of matters goes on without perceptible improvement, and without any effective means being used to check it. It is a fact that the average per centage of attendance at all the schools in this district, which was sixty-nine in 1872, reached only sixty-eight in 1873, thus showing a diminution rather than an increase in this direction. In 1872 the numbers enrolled during the four quarters ranged from 5,352 to 5,448, and the averages from 67.4 per cent. to 71; in 1873 the numbers on the roll for the several quarters varied from 5,510 to 5,585, and the averages from 65.6 to 69.7 per cent. It appears, therefore, that while there was a slight increase in the enrolment for 1873, there has been a decrease in the average per centage of attendance as compared with 1872. Even supposing that this falling off may be explained as resulting from special and exceptional causes it is evident that there has been no improvement.

But

But this is not all. The preceding remarks refer to the regularity of the pupils in actual attendance at the schools in operation in this district under the Council; but when it is taken into consideration that there are many who do not attend any school, or who do so at rare intervals, the case wears a still more painful aspect, and shows the urgent need of some action being taken to remedy the present state of things, and utilize, as far as practicable, the educational arrangements of the Colony, so as to secure more satisfactory results. During the quarter ending September last, instructions were issued to all the teachers of schools then in operation in this district under the Council to forward a return at the close of the quarter, showing the number of children of school-age not attending any school. These returns, compiled after careful inquiry by each teacher in his school locality, give a total of over 2,000 children in the Cumberland District who were not receiving any instruction whatever at that time. Granting that many of these do attend school occasionally, and are therefore not wholly destitute of education, there is still sufficient margin left for serious reflection to all who desire to see education entirely pervasive and promotive of general benefit. These facts should be adequate to convince those who yet need to be convinced of the necessity for some action being taken to produce an improvement; and this, it is believed, can only be effected thoroughly by a legislative enactment of a compulsory character.

Another aspect of the question as to the means of education remains for notice. The point as to how present arrangement in certain places affect the quality of the instruction and the economical expenditure of public money is without doubt a matter of much importance. Viewed in this light, there are various places in which the number of schools might, with advantage to the cause of education, be reduced. So long as several small schools exist in a town or locality where one would more effectively do the work, so long will the education of such town or locality be of a comparatively defective character. The following is a list of the places where benefit would accrue by the lessening of the number of schools:—Burwood, Kurrajong, Lane Cove, Parramatta, Penrith, Petersham, Richmond, Ryde, South Creek, and Windsor.

At the first-mentioned of these places there are four schools under the supervision of the Council within a short radius from the railway station; and one of them, with the addition of a department, would accommodate all the children attending the other three. At Kurrajong, Lane Cove, Penrith, Ryde, and South Creek there are two schools respectively, and one would amply suffice to meet the wants of the inhabitants. At Petersham there are now, within a radius of about half a mile from the railway station, three schools, and there can be no doubt whatever that one school, situated in the vicinity of the station, would afford all that is necessary. With respect to Parramatta, Richmond, and Windsor, the following remarks in the report on this district for 1872, by my predecessor, may here be quoted:—"On the other hand there are localities where the number of schools may fairly be regarded as too large, such as Parramatta, Windsor, and Richmond. In the first of these towns there are no fewer than six schools maintained by the Council of Education, whereas three large schools, properly placed and thoroughly equipped, would be amply sufficient, more effective for the end in view, and less costly to the country. Windsor and Richmond have each three schools, whereas one tolerably large and well organized school in each would, for all the genuine purposes of education, be much more effective. Could a change like that hereby indicated be brought about, not only would it be possible to give a better education than is now given in these towns themselves, but funds would be set free for supplying it to those parts that are still devoid of its blessings." During the year something has been effected in this direction at Parramatta, by the closing of the Wesleyan school through the voluntary act of its Board, and by the conversion of the Presbyterian school, in consequence of similar action, into a Public one, with a view to the erection of large and suitable vested premises at Parramatta south.

As regards the "estimated proficiency" of the pupils in the subjects taught in the various classes of schools under the supervision of the Council, the following statement will give a succinct view of the proficiency attained in the schools examined during the year:—

- About 26 per cent. reached an average of fair and over.
- About 31 per cent. reached an average of from tolerable to fair.
- About 32 per cent. reached an average of from moderate to tolerable.
- About 11 per cent. reached an average of under moderate.

Of these four groups the first may be considered satisfactory; the second as more or less nearly approaching a satisfactory condition; while the third and fourth—especially the latter—must be regarded as decidedly unsatisfactory. On the whole it must be apparent that there is much room for improvement, and that strenuous efforts are necessary to bring a large number of the schools into a reasonably pleasing condition as respect the attainments of the pupils. Vigorous, watchful, and sustained discipline, thorough teaching, searching examination, and earnest application on the part of the pupils are requisite in many schools to bring about a better state of things than now exists.

Reading, which is without doubt the most important of the subjects taught in Primary schools, does not appear to be so well attended to in many schools as that importance demands. There is little to find fault with so far as the correct pronunciation of words is concerned, but much as regards a prevailing want of a firm articulation, and of such a distinct enunciation of words, in a clear tone of voice, as cannot fail to convey to the ear of the hearer the exact words of the author. To the absence of a habit of firm articulation in the lower classes in which the progress in reading largely depends, much of the slovenly reading in the higher classes may be traced as well as the want of deliberateness in the utterance of phrases and clauses, so as to make the reading intelligible. In the higher classes little attention seems to be paid to emphasis, or the careful expression of the sense of the passage read, and it is often difficult for one listening without a book to catch the meaning, or even all the words of the lesson. A good deal of the current reading consists in the dreary utterance of words in a low monotonous sing-song tone of voice, which is irritating rather than pleasing to the hearer, if he has any task in the matter. Good exemplar reading by teachers seems somewhat rare. Much good might be done in this way, were the teacher to prepare each lesson and practise himself in private with a view of furnishing models of style to his pupils. There is much truth in what has been said by one, that "if a schoolmaster wishes his pupils to learn to read well, let him first learn to read himself."

Writing in copy-book meets with varied success according to the taste, ability to produce good models, and the care and disciplinary power of the teacher, but, on the whole, there is a reasonable amount of success attained in this subject in the majority of schools. The results in dictation are very far from being satisfactory. The writing is in general legible, and in many cases good, but the spelling gives results of a very poor character. The want of careful selection of such passages as present difficulties in spelling—general neglect to dictate from previous lessons single words that contain peculiarities of any kind, likely to escape the notice of the pupil—the omission to point out to their scholars certain principles of spelling for their guidance in the formation of words—the short time often devoted to it and loose supervision of the work done,—seem to be the causes of the unusually low results in connection with this subject. Considering the importance of the subject, it is very desirable that vigilant superintendence should be exerted over the exercises in it, and care taken that every word be mastered by the pupils. In connection with this, it may be remarked that many teachers have fallen into the bad habit of repeating frequently the words they dictate to the pupils. They should be read only once to them with deliberation, so that the exercise may cultivate the attention and mental effort of the pupils. In conclusion, it is hoped that the poverty of this year's results may stimulate to greater care and exertion, so as to produce something more creditable next year for report.

Arithmetic is another subject in which the attainments rank low, especially in the simple and compound rules. In the three usual divisions, the following are the results:—

<i>Simple rules.</i>	
Indifferent to moderate .....	46·5 per cent.
Tolerable .....	28 "
Fair to good .....	25·5 "
<i>Compound rules.</i>	
Indifferent to moderate .....	47 per cent.
Tolerable .....	36 "
Fair to good .....	17 "
<i>Higher rules.</i>	
Indifferent to moderate .....	28·5 per cent.
Tolerable .....	17 "
Fair to good .....	54·5 "

It will be observed that the results in the higher rules are much better than in either of the other two divisions. This is accounted for from the fact that the pupils examined in them are chiefly to be found in the larger schools, in which the teaching is generally of a superior character. It is evident that on the whole the results are not satisfactory. Foremost among the causes that contribute to the want of success in teaching this subject, the absence of thorough training in mental arithmetic may be placed. If this were well done, from the first entrance of the child into school, there would result a much higher measure of speed and accuracy. The questioning thereon should be rapid, and the answering prompt, and care taken to prevent the exercises from falling into a dull routine, as those on the prices of dozens, &c., may become. Every precaution should be taken to prevent the work from assuming the form of mechanical practice in one uniform mode. The questions should be presented to the pupil in every variety of shape of which they are susceptible, each peculiarity pointed out, explained, and illustrated at the time, a large amount of practice given to make the principle familiar, and frequent revision employed to keep up the pupil's knowledge of methods and principles.

In grammar 49 per cent. of the pupils range from indifferent to tolerable, and the remainder from fair to good. Composition is little practised, except in the form of reproduction of lessons. It is rarely taught in a systematic manner in connection with the lessons in analysis, of which it should be the counterpart, the synthesis keeping pace, in the form of exercises in composition, with the progress of the pupil in analysis.

In geography 46·5 per cent. of the pupils are from indifferent to tolerable, and 53·5 per cent. from fair to good. The teaching of the geography of New South Wales is not so thorough as it should be in the schools of the Colony, taking into consideration that the instruction therein should serve as a model, and form a foundation for all after teaching on the subject. Surely it is not too much to expect that the pupils in our schools should know accurately and intelligently the geography of their own country, which is not the case in many instances at present.

Singing and drawing are omitted in various schools whose teachers have not the necessary ability to give instruction in them, but object lessons are rarely left out, though they are taught with only tolerable success in the majority of schools.

From the preceding observations, and the detailed statement accompanying this report, it may be gathered that those who dread that our educational system is over-educating the boys and girls of the Colony, have little to fear. The early age at which pupils are withdrawn from school, the irregularity of attendance of those who are in school, and the non-attendance of many, preclude anything like general over-education. To such persons it must be gratifying to find that their fears—that the people of this Colony should become too intelligent, from the fact of their being over-educated—may go to sleep for some time to come, and that they may rest in peace.

During the year some improvement in the local supervision of the schools in this district is manifest, and there are indications that next year a still further improvement may take place. Various Local Boards of Denominational Schools—especially the clergymen connected with them—have shown great activity during the year in promoting the interests of their schools. Visitation of schools seems more frequent than heretofore, and a few Public School Boards have manifested an intelligent interest in the welfare of their schools, and done what in them lay to promote their well-being, materially and otherwise. From among these the Burwood Public School Board may be selected for honorable mention, as having, in an unusual degree, exerted themselves for the benefit of the school under their supervision.

J. M'CREIDIE,  
Inspector, Cumberland District.

#### ANNEX B.

##### CUMBERLAND DISTRICT.

DETAILED Statement of the condition of the Schools examined in the Cumberland District during the year 1873.

##### PUBLIC SCHOOLS.

BURWOOD (V.) :—Visited, 11th September.

Numbers present :—Boys, 124 ; girls, 61 ; total, 185.

A separate lavatory is required for the use of the girls. With this exception the material condition of the school is excellent; the whole property is also carefully kept. The school is efficiently organized. About four-fifths of the pupils are in regular attendance. They are also punctual, clean, neatly attired, and well-behaved. The government is judicious and secures very good order. The moral tone is sound, and the prevailing spirit healthy. The classification is correct, the instruction is well regulated, the methods are modern, and are applied with earnestness, vigour, and skill. The average proficiency is very fair.

CASTLEREAGH (N.-V.) :—Visited, 13th March.

Numbers present :—Boys, 24 ; girls, 22 ; total, 46.

The school is badly situated in a locality subject to floods, the premises are not in good condition, and the furniture is not sufficient, and only partially suitable. The closets are also in bad repair. Some new furniture has been obtained since my visit. The erection of new vested premises on a site above flood-mark is urgently necessary. About two-thirds of the pupils are regular. They are fairly punctual and attentive, but only tolerably orderly, and the government is too slack. The classification is appropriate, the lessons are fairly judicious, and the teaching is earnest and industrious, but from want of disciplinary power it does not produce such results as might be expected. The average proficiency is from tolerable to fair.

COLYTON

COLYTON (V.) :—Visited, 6th March.

Numbers present :—Boys, 7 ; girls, 12 ; total, 19.

There is a sufficient supply of furniture and apparatus, and a fair stock of working materials, but the buildings are in need of repair. Considerable irregularity prevails, and the pupils are only tolerably orderly and attentive. The government is feeble. The subjects do not include singing, and the teaching is wanting in thoroughness, energy, and penetrative force. The pupils are weak in self-reliance, and do not answer with promptness. They appear little used to earnest application and sustained mental exertion. The attainments are not satisfactory. The attendance was smaller than usual on the day of inspection.

DOBROYDE (N.-V.) :—Visited, 28th July.

Numbers present :—Boys, 11 ; girls, 17 ; total, 28.

There is no residence. The schoolroom is suitable, and is fairly supplied with furniture and teaching appliances. It is not so clean or tidy as is desirable, and the records exhibit a want of care and neatness. The pupils are irregular ; they are only tolerably orderly and attentive ; and their thinking power is feeble. They are neither ready nor accurate in answering, and appear little inclined to mental exertion. The instruction is regulated, the methods are only moderately effective, and the teaching is wanting in energy and point. The discipline is not productive of good effects, and the attainments are low. Altogether this school is in an unsatisfactory condition.

DUNDAS (V.) :—Visited, 4th September.

Numbers present :—Boys, 37 ; girls, 38 ; total, 75.

Some painting is requisite, but otherwise the material state of the school is satisfactory. The playground is far too small, but this defect is remedied by one of the members of the Board giving the use of an adjoining paddock. About seven-tenths of the pupils are regular ; they are fairly orderly, but their power of attention and mental effort requires cultivation ; and they are only tolerably self-reliant and accurate in answering. The regulation of the instruction is defective ; the methods are suitable, but need to be applied with greater energy ; and the teaching lacks penetrative force. The government is too slack ; and, considering the teaching power, the general progress and proficiency are not of a satisfactory character.

DURAL (N.-V.) :—Visited, 2nd December.

Numbers present :—Boys, 8 ; girls, 13 ; total, 21.

A new room is being added to the residence, and, on the whole, the material organization is fairly satisfactory. About two-thirds of the pupils are regular ; they are tolerably orderly and attentive, and exhibit passable self-reliance. The teaching is industrious, but wanting in energy ; the government needs greater vigour ; and the average proficiency is nearly tolerable.

FIVE DOCK (N.-V.) :—Visited, 31st July.

Numbers present :—Boys, 31 ; girls, 13 ; total, 44.

There is no residence ; the desks are of a clumsy description, while the forms are unsuitable ; and one closet is in need of repair. The pupils are fairly orderly and attentive ; they are tolerably steady and industrious ; and the moral tone is fair. The lesson documents are fairly judicious, the methods are intelligent, and the teaching is earnest. The discipline is marked by firmness and vigilance, and the average proficiency is from tolerable to fair. Owing to the illness of the teacher (since deceased), the school was under the charge of an advanced pupil teacher at the date of inspection.

GRONO PARK (N.-V.) :—Visited, 11th and 12th June.

Numbers present :—Boys, 16 ; girls, 17 ; total, 33.

The schoolroom is only moderately suitable ; there is no residence ; and the closets are of an indifferent character. There is a fairly sufficient supply of tolerable furniture, but a book-press is needed for the proper custody of materials and documents. About three-fifths of the pupils are regular ; they are fairly orderly and attentive, but only tolerably accurate in answering. The discipline needs vigour and sustained attention, the teaching requires care, and the average proficiency exceeds tolerable.

HORNSBY (V.) :—Visited, 11th September.

Numbers present :—Boys, 18 ; girls, 20 ; total, 38.

The premises are now and suitable ; the schoolroom is well furnished, and the teaching appliances are fairly sufficient ; spouting is needed, and the playground requires clearing of stumps. About two-thirds of the pupils are regular ; they are orderly and attentive, and evince more than usual self-reliance and promptness under examination. The government is healthy, the general spirit of the school is very pleasing, and the results are satisfactory.

HUNTER'S HILL (V.) :—Visited, 28th and 29th August.

Numbers present :—Boys, 54 ; girls, 19 ; total, 73.

The material condition is very satisfactory. The premises are well kept, and the teacher deserves credit for the way in which he has improved the grounds by planting and embellishing, and thus rendering the exterior very attractive. About three-fourths of the pupils are regular ; they are orderly and fairly attentive, and display fair application under examination. The lesson documents are properly framed ; the methods are intelligent ; and the teaching is conducted with earnestness, care, and industry, but lacks greater point and force. The government is mild, but needs greater promptness and vigilance, the moral tone is good, and the results are fairly satisfactory.

KELLYVILLE (N.-V.) :—Visited, 5th November.

Numbers present :—Boys, 6 ; girls, 7 ; total, 13.

The building is constructed of slab, with bark roof. There is no residence, and the closet is of an indifferent character. The school—a new one—had been opened only two days before the inspection took place. In the circumstances, therefore, no opinion can be expressed on the discipline and instruction. The attainments of the pupils in attendance were low.

LANE COVE (N.-V.) :—Visited, 12th September.

Numbers present :—Boys, 16 ; girls, 17 ; total, 33.

Except one of the closets, the premises are in fair repair. The accommodation for the teacher is not good ; the playground is too small, and the internal fittings of the building (a Wesleyan chapel) render it unsuitable for school purposes. About three-fourths of the pupils are regular ; they are fairly orderly and attentive, and show tolerable self-reliance and accuracy under examination. The government is fairly effective, the teaching is marked by industry, and the attainments are fairly satisfactory.

## LANEHILO (N.-V.) :—Visited, 23th May.

Numbers present :—Boys, 19 ; girls, 11 ; total, 30.

The buildings are of slab with bark roof ; the school is fairly supplied with working materials, and the records are correct. The pupils are fairly orderly, attentive, and self-reliant ; they answer with tolerable promptness and accuracy, and their spirit is fairly pleasing. The classification is somewhat low, the instruction is fairly regulated, and the teaching is conducted with care and industry. The government is mild but firm, and the average proficiency is nearly fair.

## LOWER PORTLAND (N.-V.) :—Visited, 19th November.

Numbers present :—Boys, 19 ; girls, 22 ; total, 41.

The material quality of the school is very bad. The schoolroom is a mere hut ; the furniture is unsuitable, and there are no closets. The erection of suitable buildings is urgently necessary. About three-fourths of the pupils are regular ; they are fairly orderly and attentive, and they manifest fair mental power. The instruction is regulated ; the methods are intelligent, and the teaching is careful and painstaking. The government is fairly effective, and the average exceeds tolerable.

## LUDDENHAM (V.) :—Visited, 7th August.

Numbers present :—Boys, 23 ; girls, 31 ; total, 54.

The premises have recently undergone repair, and the material condition is now reasonably satisfactory, except as regards the furniture, which is of a clumsy description. The order and attention are fair, the government needs greater vigour, and the general spirit of the school is tolerably pleasing. The instruction is fairly regulated, the teaching is painstaking, but wanting in energy, and the average proficiency is about tolerable.

## M'DONALD RIVER (Central V.) :—Visited, 17th November.

Numbers present :—Boys, 21 ; girls, 8 ; total, 29.

The material organization is fairly satisfactory. Some apparatus is needed, but the school, on the whole, is fairly supplied with teaching appliances. About three-fourths of the pupils are regular ; they are tolerably orderly and attentive, but they are slow in answering, and their thinking power is feeble. The classification is appropriate, the instruction is tolerably regulated, and the teaching is earnest. The government needs greater promptness and vigilance, and the average proficiency is moderate.

## NORTH RICHMOND (V.) :—Visited, 20th March.

Numbers present :—Boys, 40 ; girls, 34 ; total, 74.

The material condition is good. The school is well furnished and supplied with apparatus ; the property is carefully kept, and the general aspect is inviting. The teacher, by planting and otherwise decorating the grounds, has rendered the surroundings of the school more than usually attractive. The pupils are tolerably orderly and fairly attentive ; their self-reliance and power of application require fostering, and the answering should be more prompt. The classification is somewhat low, the methods are intelligent, and the teaching needs vigour and point. The government is wanting in energy and watchfulness, and the average proficiency is from tolerable to fair.

## PARRAMATTA (V.) :—Visited, 8th, 9th, 10th, and 14th October.

Numbers present :—Boys, 202 ; girls, 125 ; total, 327.

There is no residence ; the infants' schoolroom is too small ; and the playground is too small. The latter defect is however remedied by the boys using the public park on the other side of the street. About seven-tenths of the pupils are regular and punctual ; they are orderly and attentive ; and, taken as a whole, they are fairly self-reliant and accurate. The classification is appropriate, the methods range from tolerable to good, and the teaching is conducted with industry and intelligence. The general discipline is healthy, the prevailing spirit is pleasing, and the supervision is exercised with judicious care. The average proficiency of the Infants' is about tolerable ; that of the Primary department is fairly satisfactory.

## PARRAMATTA, SOUTH (N.-V.) :—Visited, 23rd and 24th September.

Numbers present :—Boys, 61 ; girls, 45 ; total, 106.

The material condition of this school is very unsatisfactory, and it is desirable that the erection of suitable vested buildings, for which action has already been taken, should be effected without delay. About seven-tenths of the pupils are regular, they are tolerably orderly and attentive, but show only moderate application and accuracy under examination. The lesson documents are meagre and unsatisfactory, the methods are of modern cast, and the teaching is energetic, but of a desultory character, and wanting in penetrative force. The discipline has hitherto failed to form habits of earnest, vigorous application on the part of the pupils, the moral tone is tolerable, and the average proficiency is barely tolerable. This school, formerly the Parramatta Presbyterian, was converted during the year.

## PENNANT HILLS (V.) :—Visited, 10th and 11th September.

Numbers present :—Boys, 22 ; girls, 17 ; total, 39.

The material organization is good. About three-fifths of the pupils are regular ; they are fairly orderly and attentive, but only show tolerable self-reliance and accuracy under examination. The instruction is fairly regulated, the methods are intelligent, and the teaching is earnest, but needs greater vigour to render it thoroughly effective. The government is wanting in energy, and the average proficiency is from tolerable to fair. The attendance was small, the general average being over fifty.

## PENRITH (V.) :—Visited, 25th and 26th February.

Numbers present :—Boys, 62 ; girls, 44 ; total, 106.

The residence and closets need repair, and a press and a table should be furnished for the schoolroom ; otherwise the material condition is good. About three-fourths of the pupils are regular ; they are orderly, attentive, and very fairly self-reliant and accurate ; and their general spirit is pleasing. The government is healthy, the lesson documents are judiciously framed, and the methods are intelligent ; and the teaching is conducted with zeal and industry. The range of attainments is reasonably satisfactory.

## PETERSHAM (V.) :—Visited, 29th July.

Numbers present :—Boys, 42 ; girls, 22 ; total, 64.

The material condition is good, but the site is not central. The instruction is properly guided, the methods are intelligent, and the teaching is zealous and energetic. The pupils are fairly orderly and attentive ; they manifest tolerable self-reliance and accuracy, and the general spirit of the school is pleasing. The discipline is effective, the moral tone is fair, and the general proficiency is tolerable. The present teacher has been only a few weeks in charge of the school, which is now (1874) named "Leichhardt."

PROSPECT (V.) :—Visited, 27th May.

Numbers present :—Boys, 18 ; girls, 15 ; total, 33.

The residence is too small, but otherwise the material condition is good. The pupils are fairly orderly and attentive, the discipline is effective, and the general spirit of the school is pleasing. The methods are fairly intelligent, the teaching is earnest and careful, and the attainments are reasonably satisfactory.

RICHMOND (N.-V.) :—Visited, 18th, 19th, and 21st March.

Numbers present :—Boys, 91 ; girls, 81 ; total, 172.

Since the date of inspection the material condition has been improved by the addition of a press and urinal, and the erection of the desks on platforms. The want of a residence is still a defect. About three-fourths of the pupils are regular ; they are orderly and very fairly attentive, and evince considerable self-reliance and application to work. The instruction is judiciously regulated, the methods are intelligent, and the teaching is conducted with earnestness, but needs more thorough revision in some subjects. The government is firm and vigilant, the general spirit of the school is pleasing, and the average proficiency is reasonably satisfactory.

RYDE (V.—Infants) :—Visited, 17th October.

Numbers present :—Boys, 34 ; girls, 22 ; total, 56.

The material condition is reasonably satisfactory. The pupils are orderly and attentive, the classification is judicious, and the answering is creditable. The instruction is properly regulated, the methods are intelligent, and the teaching is animated and careful. The government is firm and prompt, and the attainments and general spirit of the school are satisfactory.

RYDE (V.—Primary) :—Visited, 21st and 22nd October.

Numbers present :—Boys, 51 ; girls, 40 ; total, 91.

The walls of the ceiling need colouring, and a detached kitchen is necessary for the residence. The school is well furnished and supplied with working materials. About two-thirds of the pupils are regular ; they are orderly and attentive, and display fair application under examination. The instruction is judiciously regulated, the methods are intelligent and fairly effective, and the teaching is careful, but requires greater vigour and point. The discipline is fairly effective, the general spirit of the school is pleasing, and the attainments are fairly up to the "standard."

SMITHFIELD (V.) :—Visited, 22nd May.

Numbers present :—Boys, 28 ; girls, 13 ; total, 41.

The school buildings and closets need repair, for effecting which, steps have already been taken by the Board. About two-thirds of the pupils are regular ; they are fairly orderly and tolerably attentive, and manifest tolerable accuracy. The instruction is fairly regulated, the methods are suitable, and the teaching is industrious. The government needs greater vigilance and promptness, and the average proficiency is from tolerable to fair.

ST. ALBANS (N.-V.) :—Visited, 17th November.

Numbers present :—Boys, 16 ; girls, 11 ; total, 27.

The material condition of the school is bad, and steps should be taken to erect suitable vested premises. About two-thirds of the pupils are regular ; they are fairly orderly and attentive, and show fair accuracy under examination. The instruction is fairly regulated, the methods are suitable, and the teaching is careful and painstaking, but wanting in animation. The government is firm, but not vigorous enough ; and the average proficiency is from tolerable to fair.

ST. MARY'S (N.-V.) :—Visited, 7th March.

Numbers present :—Boys, 20 ; girls, 19 ; total, 39.

The material condition of this school is far from satisfactory. There are neither a residence nor a playground belonging thereto ; the closet is a wretched one, and the furniture is indifferent. The site is far from central, and the general aspect is not pleasing. Action is being taken to erect a new building in a more central situation. The pupils are only tolerably orderly and self-reliant, and they do not manifest sufficient readiness in answering. The lesson documents are fairly framed, the methods are tolerably effective, and the teaching is wanting in energy and penetrative force. The government is too slack, and the average proficiency is about tolerable.

WALLGROVE (V.) :—Visited, 6th March.

Numbers present :—Boys, 19 ; girls, 19 ; total, 38.

A verandah or playshed is desirable ; but, on the whole, the material condition is good. About three-fourths of the pupils are regular ; they are orderly and more than usually attentive, and show self-reliance and accuracy under examination. The classification is somewhat faulty. The instruction is fairly regulated, the methods are intelligent, and the teaching is marked by energy and well-sustained zeal. The government is healthy, the tone of the school is pleasing, and the average proficiency is fairly satisfactory.

WINDSOR (V.—Infants) :—Visited, 13th June.

Numbers present :—Boys, 18 ; girls, 18 ; total, 36.

The schoolroom is too small, but otherwise the material condition is good. About seven-tenths of the pupils are regular ; they are orderly and attentive, and answer with commendable readiness. The government is judicious, the instruction is marked by earnestness and intelligence, and the average proficiency is very fair. The attendance, owing to a flood, was much smaller than usual.

WINDSOR (V.—Primary) :—Visited, 18th, 19th, and 26th June.

Numbers present :—Boys, 36 ; girls, 35 ; total, 71.

The material organization of the school is good. Playsheds have been erected since last inspection for both departments. About three-fourths of the pupils are regular ; they are orderly and very fairly attentive, and manifest fair self-reliance under examination. The classification, up to a recent date before inspection, was of an irregular character ; the instruction is regulated, and the discipline seems watchful, but not genial. The teaching is industrious, but would be improved by greater animation. The attainments range from moderate and tolerable in some subjects to good in others, and considering the teaching power and general circumstances of the school, the proficiency is only partially satisfactory.

## II.—PROVISIONAL SCHOOLS.

BARRANJOEY:—Visited, 17th December.

Numbers present:—Boys, 9; girls, 4; total, 13.

The material condition of the school has been improved since last inspection. It is conducted in a slab hut, which suffices for the small numbers in attendance. The pupils are clean, tolerably orderly, and moderately attentive. The government is mild, the instruction is not regulated, the methods are only partially suitable, and the teaching is earnest, but is conducted with little skill. The average proficiency is from indifferent to moderate. The school has evidently improved since last examination.

BLACKTOWN:—Visited, 1st May.

Numbers present:—Boys, 4; girls, 18; total, 22.

The school is conducted in a room of the teacher's residence, which she herself rents. The furniture is tolerably suitable and sufficient, the apparatus is scanty, and the records are incorrect in some particulars. The pupils are moderately orderly and attentive; they are also only moderately self-reliant and accurate. The classification is injudicious in some respects, the instruction is moderately regulated, and the teaching needs greater thoroughness and point. The government requires more vigour and watchfulness, and the attainments range from moderate to tolerable.

GREYDALE:—Visited, 9th August.

Numbers present:—Boys, 14; girls, 7; total, 21.

The material organization is passable. The pupils are tolerably orderly and attentive; they show only moderate application, and their thinking power is feeble. The government needs greater vigour, the teaching is industrious, but wanting in force, and the average attainments are about moderate.

GUILDFORD:—Visited, 16th July.

Numbers present:—Boys, 13; girls, 14; total, 27.

The premises are the property of the teacher. The school is too narrow, and is not sufficiently supplied with desks and apparatus. The pupils are tolerably orderly and attentive. The lesson guides are tolerably drawn up, the teaching is careful, but defective in energy, and the results are from moderate to tolerable. The government requires greater watchfulness and vigour.

HASLEM'S CREEK:—Visited, 29th April.

Numbers present:—Boys, 12; girls, 9; total, 21.

The schoolroom is suitable, but there is no teacher's residence. The ground is unfenced; there are no closets, and the furniture is insufficient. The records are neither accurate nor complete. The pupils are neither orderly nor attentive; they exhibit little self-reliance, and their answering is small. The subjects taught do not embrace grammar, geography, object lessons, singing, or drawing; the instruction is neither regulated nor registered, the methods are not intelligent, and the teaching is mechanical. The discipline is slack, and the attainments are low.

KEMP'S CREEK:—Visited, 14th August.

Numbers present:—Boys, 13; girls, 14; total, 27.

The roof of the schoolroom needs repairing; the residence requires flooring, and additional furniture is desirable. About two-thirds of the pupils are regular; they are fairly orderly and attentive, and display tolerable self-reliance and accuracy under examination. The methods are of modern cast, the teaching is careful and fairly intelligent, and the average proficiency is about tolerable. The government is fairly prompt and vigorous.

KURRAJONG SOUTH:—Visited, 7th April.

Numbers present:—Boys, 9; girls, 8; total, 17.

The school needs repair, the residence is not tenable, and the closets are in bad condition. Otherwise the material condition is passable, and the records are tolerably correct. The pupils are moderately orderly, and tolerably attentive; they are weak in self-reliance, and do not answer with promptness or accuracy. Up to near the date of my inspection the classification had been very improper. The lesson documents are indifferent, the methods are of a mechanical character, and the teaching is neither thorough nor penetrative. The government is feeble, and the attainments are not satisfactory.

LOWER HAWKESBURY:—Visited, 14th November.

Numbers present:—Boys, 10; girls, 14; total, 24.

There are no closets or teacher's residence, and the playground is unfenced. About two-thirds of the pupils are regular; they are tolerably orderly and fairly attentive, and evince tolerable self-reliance. The classification is appropriate, the instruction is tolerably regulated, and the teaching is careful and painstaking. The government is fairly firm, but needs greater promptness, and the average proficiency is tolerable.

M'DONALD RIVER:—Visited, 18th November.

Numbers present:—Boys, 11; girls, 13; total, 24.

The schoolroom has just been shingled, but there are no desks, and the maps have been damaged through the previous bad state of repair of the school. The pupils are moderately orderly, but their attention is indifferent; they exhibit small self-reliance, and their thinking power is feeble. The classification, regulation of instruction, methods, and teaching, present but few features of a satisfactory character. The government is too slack, and the average proficiency is indifferent.

MULGOA:—Visited, 8th August.

Numbers present:—Boys, 15; girls, 14; total, 29.

The residence needs repair, but otherwise the material condition is reasonably satisfactory. The order and attendance are fair, the government is tolerably firm and watchful, and the prevailing spirit of the school is fairly pleasing. The instruction is tolerably regulated, the teaching is earnest and industrious, and the attainments average tolerable. The attendance of this school has been sufficient for some time past to warrant its establishment as a Public School.

MULGOA FOREST, NORTH:—Visited, 11th August.

Numbers present:—Boys, 5; girls, 15; total, 20.

The material condition is very defective. The room is too narrow, and is scantily furnished, the playground is unfenced, and without the necessary out-houses, and the supply of apparatus is meagre. The lesson documents are only moderately suitable, the order is tolerable, and the teaching is careful, but lacks power. The government requires vigour, the pupils are slow at answering, and exhibit only moderate self-reliance; and the average attainments are only moderate.

NEWINGTON:—

## NEWINGTON:—Visited, 2nd May.

Numbers present:—Boys, 17; girls, 8; total, 25.

The school is conducted in an irregular octagonal building at the entrance to Newington College. It is quite unsuitable for school purposes. The furniture is tolerably suitable, but insufficient. The pupils are tolerably orderly and fairly attentive; they manifest tolerable accuracy and self-reliance under examination. The instruction is moderately regulated, the methods are tolerably suitable, and the teaching is industrious and tolerably effective. The government is mild, the spirit of the school is tolerably pleasing, and the average proficiency is tolerable.

## REGENTVILLE:—Visited, 27th February.

Numbers present:—Boys, 7; girls, 14; total, 21.

The material condition is very defective. The schoolroom is too small, the furniture is neither sufficient nor suitable, and the closet is in need of replacing. The supply of apparatus is scanty, and the records are incorrect in various particulars. About two-thirds of the pupils are regular; they are only moderately orderly and attentive, and evince a want of self-reliance, accuracy, and earnest application. The lesson documents are indifferent, the methods are not intelligent, and the teaching is conducted with little energy or mental vigour. The government is feeble, and the attainments are low. The attendance was much smaller than usual on the day of examination; it is generally sufficient to warrant the establishment of a Public School.

## SACKVILLE REACH:—Visited, 20th November.

Numbers present:—Boys, 10; girls, 3; total, 13.

On the whole the schoolroom is fairly suitable, and is sufficiently supplied with furniture and apparatus. The pupils are moderately orderly and attentive, they are weak in self-reliance, and they are listless and little inclined to mental exertion. The lesson documents are indifferent, the methods are not intelligent, and the teaching is wanting in thoroughness. The government is slack, and the attainments are from indifferent to moderate.

## SHANAMORE:—Visited, 12th August.

Numbers present:—Boy, 1; girls, 6; total, 7.

The material condition is defective in nearly every respect. The pupils are neither punctual nor regular, their mental effort is feeble, and their answering is of a rote character. The methods are mechanical, the teaching appears to be of a similar character, and the general proficiency is low. This school was closed soon after inspection.

## THE VINEYARD:—Visited, 7th November.

Numbers present:—Boys 11; girls, 7; total, 18.

The material condition is, on the whole, tolerable. About two-thirds of the pupils are regular; they are tolerably orderly and moderately attentive, but they are weak in self-reliance and accuracy in answering. The instruction is indifferently regulated, the methods are only partially suitable, and the teaching is wanting in energy, intelligence, and penetrative force. The government is feeble, and the average proficiency is indifferent.

## GOULBURN DISTRICT.

## INSPECTOR'S General Report for 1873.

DURING the year 109 schools have been in operation, consisting of forty-one Public Schools, thirty-six Provisional Schools, sixteen Half-Time, and sixteen Denominational. Two of these—Cararawell H.T. and Yass Presbyterian—have been permanently closed on account of low attendance. Of the remainder, three Public Schools—Bangalore, Parkesbourne, and Tuena—are closed until proper school buildings are provided; three Provisional Schools—Bolong, Clear Hills, and Kenny's Point—have lapsed from smallness of numbers; and three others—Carrick, Grabben Gullen, and Killenamella—are kept vacant in consequence of the promoters not taking proper steps for obtaining teachers. In former years Public Schools existed at Warragee and Pyree, but had to be closed in consequence of the unsuitability of the school buildings. Though the educational wants of the localities have been and still are pressing, the year has been allowed to pass without the local action being completed which is necessary to secure the re-opening of the schools. The school formerly in operation at Milbang still remains closed. The following localities have also been without efficient means of education, although the circumstances are such that schools could be maintained:—

1. Muttibilly and other places on the Great Southern Road between Goulburn and Yass.
2. Basin of the Yass River, near Gundaroo.
3. Places on the lower course of the Yass River and adjoining spots on the Murrumbidgee River.
4. Manton's Creek and other places on the railway extension between Goulburn and Yass.
5. Borebangalo, near Gunning.
6. Upper course of the Lachlan (Fish) River.
7. The Abercrombie Mountains.
8. Junction Point.
9. Woodhouselee.
10. Laggan.
11. Crookwell and surrounding district.
12. Mining settlements on the Shoalhaven (omitting Jacqua).
13. Mandemar and Jellere, near Berrima.
14. Nowra Hill (Shoalhaven).

Of the places now enumerated as being educationally destitute, either through the schools having been allowed to lapse, or through no schools having yet been established, there are some at which local action has been taken to make good the defect. Thus, at Parkesbourne, Pyree, and Crookwell, Public School buildings are in course of erection; at Mandemar the schoolhouse is nearly finished, and matters are kept waiting for the building to be proceeded with at the place where a school is to be worked in conjunction with Mandemar as a Half-Time school; at Laggan the people have done all that is necessary for a Provisional School, and one is to be opened in the beginning of 1874; and applications from Muttibilly and Borebangalo have been received. Inquiries and observations relative to the number of children in the district not attending school, fix that number at 900 as an approximation as near as can be obtained by such means as it is possible to adopt under existing circumstances. It is certain that the estimate is not in excess of the actual numbers. Of these 900 children 100 may be set down as living within reach of existing schools, about 750 in the localities already indicated as being without the means of education, and the remainder in isolated and remote spots. About 200 of these 900 children will, it is estimated, attend the schools which are likely to be opened shortly; leaving 700 on whose behalf proper and efficient action yet remains to be taken. These figures show that while there is an encouraging prospect of present action bearing good and early fruit, there is abundant work for the future, in the direction of extending the means

means of education until it is placed within the reach of every child. A retrospective view affords ground for gratification. Seven new schools have been opened, viz. :—

Carrick .....	Provisional
Burragowang .....	"
Jacqua .....	"
Shaw's Creek .....	"
Spring Creek (Yass River) ...	"
Curran's Creek .....	Half-Time
Lost River .....	"

and five which were in operation in former years have been revived, viz. :—

Run of Water, Provisional, (formerly a H.-T. School)	
Pejar, .....	"
Walner, .....	"
Bamerang, .....	"
Tarago, .....	Public;

also the school at Burrier has been raised from a Half-Time to a Public School.

The only change that has taken place in connection with the economical distribution of educational agency is the classing of the Yass Presbyterian School. This school was attended by thirty children, and cost the Council in the item of salary alone £60 annually, or at the rate of £2 for each child. As there is no Public School in Yass, the thirty children have since had to attend schools belonging to other denominations, of which there are two in the town—Church of England and Roman Catholic. During the last quarter of the year these two schools were attended by 282 children, and salaries at the total rate of £276 per annum are paid, being 19s. 6½d. per child. The teaching power employed in these schools would be more than sufficient for the number of children if collected in one school; but scattered among three departments as at present, is inadequate, and must be increased at no distant date, if the efficiency of the schools is to be maintained. Such an increase will, of course, be accompanied by a corresponding augmentation of expense. The considerations which these facts suggest, gather extra force from a glance at other places in the district where more schools than one are in operation. In Goulburn there are three schools—Public, Church of England, and Roman Catholic—attended by 815 pupils, and receiving assistance in the shape of salaries from the public funds, to the extent of £1,068 annually. Last year the amount paid in salaries to these schools was £1,068 2s. 10d., and there were at the end of the year 737 children in attendance. The actual expense, therefore, may be considered to have undergone no change, while the rate per head has somewhat decreased; this year it is £1 6s. 2½d.; last year it was £1 8s. 11½d. A comparison of these figures with others given in the Council's Report for 1872, will show that in consequence of the number of schools in Goulburn, the cost to the Country of primary education in that city is far greater than in the largest and most important schools in and near the metropolis. For the purposes of comparison, take the three largest schools in the Colony: At the Fort-street School, 1,725 pupils were educated at a cost for the year of £1,529 16s. 11d., or 17s. 8½d. per head; and the corresponding numbers for Cleveland-street and William-street respectively, were—

1,554 pupils, £1,085 14s. 4d., or 13s. 11½d. per head.
1,052 " £923 8s. 5d., or 17s. 6½d. "

At Berrima, Nattai, and Taralga, again, there are two schools—Public and Roman Catholic. The two schools at Berrima are attended by 105 children in all; and the annual salaries now amount to £240, or at the rate of £2 5s. 8½d. per head. At Nattai the maintenance of two schools entails an expenditure annually of £156 for the education of ninety-six children, or £1 12s. 6d. per head. At Taralga the two schools have 109 children enrolled, and the salaries amount to £168, or £1 10s. 9½d. per head. It will thus be seen that at each of these places there are not more than enough children to form one good school, which would offer inducements not at present existing to teachers of ability, and which would meet existing educational requirements more effectively and far more cheaply. As it is, the cost of education is unusually high, and there is a prevalent discontent among the teachers, arising either from the difficulty of keeping up the numbers necessary to ensure full salary, or from the unhealthy competition which such a state of things produces. It is not to be wondered at under such circumstances, that four out of the six teachers engaged in these schools are desirous of removal. In one case—that of the Mittagong (Nattai) Roman Catholic School—the numbers have been below the minimum required by law for Denominational Schools, all through the year, and the cost to the Country is nearly £3 per child, annually. The facts now stated serve to indicate the localities in this district in which the distribution of the means of education is neither economical nor favourable to the production of the highest results. It has already been pointed out that both the Yass schools are Denominational. At the following places the only school is a Denominational School :—

Sutton Forest, Church of England.
Torrara, .....
Burrawang, .....
Numba (Shoalhaven), Presbyterian School.

At Burrawang and Numba (Shoalhaven) the distinctive features of the Denominational School are either kept in the back ground or entirely eliminated, so that all denominations are satisfied. At Yass, Sutton Forest, and Torrara there is more or less discontent. At Yass the people see that as far as educational provisions go they are gradually drifting behind other places of inferior importance; and a movement has already been initiated to get a Public School established. At Sutton Forest the discontent resolved itself into action, for two attempts were made within the year to get a certificate to a Roman Catholic School in the town. The question of the establishment of a Public School has also been considered, and some of the principal of the inhabitants conferred with me on the matter, on the occasion of my visit to the locality. At Torrara too, a desire for a Public School was expressed; but there are practical difficulties at present in the way of its taking definite shape.

Of the 109 schools which have been in operation during the year, six, viz., Bangalore and Parkesbourne, Public, and Bolong, Carrick, Clearhills, and Kenny's Point, Provisional, closed before the time set down for their inspection, and, as already stated, have not since been re-opened. Another, Cullycutly-gang, Provisional, was temporarily closed when I was in the locality. The remaining 102 were all visited, and eighteen of them re-visited. Ninety-seven were fully inspected, two were subjected to ordinary inspection, in which everything is taken cognizance of except the results of instruction, and three were visited on applications for aid. The inspection consisted of a thorough investigation into everything connected with the schools as educational and State-aided institutions. Considering its extent and character, it may safely be taken as being such as to reveal fully and truly the actual condition of the schools, and the state of education in the district generally.

The character of the school buildings and premises is very various. As a rule the best are of course found in the older settlements. In the more remote and newly occupied districts mere huts are the rule. These, in many instances, are floored, and made snug and comfortable. Generally they are poorly furnished and badly appointed, but as pioneer schools they are subserving great ends—they indicate a proper spirit among the settlers, and are an earnest of better things. Many of them are in places where a Public School cannot be maintained, and is not likely to be for some time to come, and where, consequently, assistance towards building cannot be obtained from the Council, and the whole expense has to be borne by the people. In such places the inhabitants very generally regard it as a hardship and an anomaly incompatible with the generally liberal character of the Public Schools Act that where twenty-

five children can be got to attend a school regularly, the Council will supplement local contributions towards school buildings by double the amount, whereas in cases where the numbers reach twenty or twenty-three no assistance of the kind whatever is obtainable. By reason, in some instances of the better circumstances, in others of the superior energy, of the inhabitants, well-designed and completed school premises have been provided in several even of the outlying places. Within the year a new and suitable vested Public School building has been opened at Gullen, and an excellent teacher's residence has been erected at Lower Mittagong. Material improvements have been effected at Binda, Chatsbury, Mooroolooloolan, Nowra, and Roslyn Public Schools; at Cottawalla Provisional School; at Long Reach, Rock View, and Springfield Half Time Schools; and at Sutton Forest C.E., Terrara C.E., Goulburn R.C., and North Goulburn C.E. Denominational Schools. In the following localities the material provisions are seriously defective:—Collector, Croobyar (Ulladulla), Ulladulla, Boat Harbour, Eling Forest, Marulan, Mummel East, New Sheffield (Nataai), Bungonia, Kirkdale, Tarlo, Richlands, and Numba (Shoalhaven). The Goulburn C.E. schoolhouse is in a very dilapidated state. Measures are in progress, however, for the erection of new school-buildings at Collector and Kirkdale; and a fine Church of England schoolroom is now in course of erection in Goulburn.

Viewed as a whole, the moral character of the schools affords ground of satisfaction. Much has been done towards cultivating in the pupils habits of cleanliness, obedience, and a respect for the rights and feelings of their fellows. In matters of detail, however, the discipline in many of the schools needs to be greatly improved. In these instances little or nothing is attempted in the way of school drill, and order and system are anything but characteristic of the school operations. Each child would seem to have a way of its own of doing things, and to act on its own impulses instead of in concert with the rest. The economy of time effected by the adoption of a system of drill covering all the school movements, not to mention the beneficial effects upon the health and habits of the pupils and the efficiency of the school generally, makes it a matter of regret that the system now introduced in the most important schools in the Colony, and practised by every teacher thoroughly up to his work, is not extended to all the country schools. That such a thing is practicable is demonstrated by the fact that in two obscure Provisional Schools a complete course of drill was found to have been introduced; the teachers were young and untrained men, and had spent all their lives in the bush, but by dint of inquiry and study they had made themselves proficient in as much of the regular military drill as is appropriate for schools. In these and other instances where true discipline is understood and enforced, the operations of the school go on with the precision and steadiness of a machine, and at the same time afford pleasing indications of a vigorous and well-regulated vitality.

The aggregate number of children enrolled on the days of inspection at the ninety-seven schools fully inspected was 4,424, and of these, 3,557, or upwards of 80 per cent., were present and underwent examination. This proportion is somewhat above the ordinary attendance, which is doubtless to be accounted for by the fact that in the majority of instances notice of inspection was sent. At eleven of the schools the attendance is so numerous that more teachers than one are employed. Each of the remaining schools is under one teacher. Where this is the case not more than three classes can, as a rule, be properly taught, and in the majority of schools this arrangement is adopted. By it the most that can, under ordinary circumstances, be done, is to get the pupils to read, understand, and explain the meaning of ordinary prose such as is to be met with in common descriptive writings; to write legibly and with correct spelling of common words; to work questions in reduction and the compound rules of arithmetic, and make up ordinary accounts; to know the simpler grammatical forms of their mother tongue, and be able to express their thoughts intelligibly; to understand the geographical terms, and have a general knowledge of the great features on the surface of the globe, and an acquaintance with the geography of Australia in outline and New South Wales in detail; to be conversant with the nature and uses of the natural objects around them; to be able to sing simple tunes and draw easy figures; and to have a knowledge of the creation and early history of the world, and of the life and work of the Saviour. Such are the attainments which the Council's "Course of Secular Instruction" and "Standard of Proficiency" aim at securing to pupils attending an average bush school. In eleven schools a 4th class has been formed, and a correspondingly higher standard adopted. This should be the case after a reasonable time in every school where more than one teacher is employed. In a very few instances only two classes have yet been formed, and in a still smaller number, where the schools had been in operation but a very short time, only one. In such cases, of course, the attainments are much lower than those sketched above. The course prescribed is a liberal one, and its faithful and skilful pursuit would, combined with proper school discipline, have the effect not merely of giving to the pupils a certain amount of useful knowledge, but also of subjecting them to such a mental and moral training as to furnish them with lights as to their conduct and weapons for action and defence; it would give them a power over themselves and over circumstances, and prepare them for a proper discharge of their duties as moral agents, as members of families, and as citizens. In applying the standard to schools, the extent to which these results had been achieved, as well as the actual proficiency of the pupils, was carefully noted, and duly considered in arriving at the final estimate. Due allowance was also made for the age of the pupils, the length of time they had been in the classes, and any other circumstances of a special nature. The discipline and internal organization of the schools were also taken into account. The standard even thus modified according to circumstances is one which requires both industry and ability for its satisfaction; but it is just and attainable. Judged by it, 13·4 per cent. of the schools examined were found to be above the standard, 17·5 per cent. up to it, and 69·1 per cent. below it.

The numbers in detail are—

Schools.	Public.	Provisional.	Half-Time.	Denom- inational.	Total.
Above the standard .....	8	3	1	1	13
Up to    "    .....	9	2	3	3	17
Below    "    .....	22	21	12	12	67
Totals .....	39	26	16	16	97

It will thus be seen that 56·4 per cent. of the Public Schools, 80·7 per cent. of the Provisional, 75 per cent. of the Half-Time, and 75 per cent. of the Denominational, were unable to pass satisfactorily the test to which they were submitted. These results cannot be pronounced satisfactory. The causes to which they are to be ascribed are somewhat complex; but the following are amongst the most influential:—

1. *The adoption in a considerable number of the schools of the narrow and partial plan of giving undue, in some instances exclusive, attention to reading, writing, and arithmetic.*—Carried away with the idea that in spite of all that has been said of late years relative to the enlargement of the course of instruction for Primary Schools, these subjects are after all the true basis and the proper staple of a sound education, several teachers have most culpably neglected other branches. It is beyond all question that these three subjects are among the most important in the prescribed course, and that it is a very poor school

school in which they are not well and thoroughly taught; but it is equally certain, if the results produced in this district can be accepted as data upon which to base a general conclusion, that the surest way to teach them ineffectively is to teach them exclusively. The reason is obvious: the pupils grind away in the dull routine of the "three R's" until they become surfeited and disgusted with them, and long for something which will exercise some other set of faculties and thus afford them relief.

2. *The limitation of the range of instruction to the bare requirements of the standard.*—It is surprising, but nevertheless true, that some teachers have regarded the prescribed standard as a maximum instead of as a minimum, and have acted under the belief that there is no use in going beyond the actual requirements, as no credit will be gained by it. Children six quarters in a 3rd class were found working by a fourth quarter standard, simply because they were still only 3rd class pupils; and the teachers were astonished to find that these children failed in things in which they were alleged to have passed at previous inspections. No wonder, in a school stagnation is retrogression—if a child is not actually progressing he is going back.

3. *The length of time some schools are allowed to remain closed when the teacher leaves.*—In the early part of the year this defect arose in a great measure from the difficulty in getting teachers for small bush schools; but, under a plan devised by the Council and now in operation, providing for the preparation by a paid course of training of persons to take charge of small country schools, this difficulty has been overcome. During the year eight persons have been so prepared at the Goulburn Public School, and most of them are now in charge of schools. The only circumstance which now operates to keep schools closed for any length of time is the dilatoriness of some of the persons who are either entrusted with, or assume, the supervision of Provisional Schools, in taking proper action for obtaining teachers. This occurs chiefly in the cases of certain Provisional Schools, which are conducted as Denominational rather than as Public Schools. The persons having, or assuming, the oversight of these schools, show a determination to get persons of their own selection as teachers, and the schools often remain vacant for months in consequence. Instances have occurred where schools have been thus left, even when the names of persons suitable for appointment as teachers have been officially submitted to the parties concerned.

4. *The inferior qualifications of some of the teachers of small schools.*—There are some persons, it must be remarked, who have been induced to take charge of small schools, mostly Provisional, who have no sufficient knowledge of the duties expected of them, and of the Public School system and routine. They have not even attended a good Public School as pupils, and are found in some instances to be quite ignorant of approved methods of instruction, and of some of the subjects they are expected to teach. In some instances they resigned shortly after the inspection of their schools. They were taken on at a time when there was a dearth of teachers, and when the salaries for Provisional School teachers were lower than at present. Under the new arrangements, and the increased rate of salary, there is every reason to believe that great improvements will be effected in this matter.

5. *The absence from or irregular attendance at school of many children during certain seasons of the year.*—This occurs mostly during harvest-time, and it is not easy to see how, under the present circumstances of the district, the defect can be remedied. In some instances the attendance is affected to a far greater degree than is absolutely necessary.

There are other causes of minor importance, but the extension of the course and range of instruction, and the continuance of the arrangements now in operation for providing teachers for small schools, primary education, in this district at least, will be set free from formidable impediments to its growth, and to the proper extension of the system embodied in the Public Schools Act and Regulations.

In addition to the heads of schools or departments, eight assistant-teachers and seven pupil-teachers are employed. Of the 105 teachers (including assistants) in the district during the last quarter of the year, fifty-one are classified, leaving fifty-four unclassified. The latter are of course for the most part in charge of Provisional or Half-Time Schools. Of a few of them it has been necessary already to speak professionally in terms not altogether flattering; of others a far less unfavourable report may be made; and there are a few who are doing, unseen and sometimes unappreciated, in places remote and almost unknown to the world, work which speaks of diligence, devotion, and ability, and which would be no discredit to a trained, experienced, and certificated teacher. In recognition of their work three have been admitted to the Training School. The classified teachers are in charge of Public, Denominational, or Half-Time Schools. In almost every instance they give evidence of industry and care, and in some, of energy, skill, and devotion. Within the year, ten of them succeeded in gaining promotion in classification. The pupil-teachers are all industrious, and give promise of ability and usefulness. They all passed their annual examinations, and were promoted accordingly. One has been admitted to the Training School.

Much yet remains to be done to place the local supervision of the schools on a proper basis, and measures to this end are now in progress. Several of the Public School Boards display a laudable activity and interest in the performance of their duties, while with others nothing like combined action exists, and the business is either not attended to at all, or left to some member who has more inclination, and possibly more time for it than the rest. In the case of many Provisional Schools local committees have not yet been officially recognized, and persons have been found officiating in that capacity who have no authority to do so. These irregularities have already been in some measure checked, and will in all probability be entirely removed before long. The clergymen connected with the different Denominational Schools continue in most instances to exercise an active supervision over them, and use their influence for their support.

As this is my first year in the district, I am not in a position to report as to the improvement or retrogression of the schools in point of efficiency since 1872. There is, however, ample scope for action in the future in respect of the extension of the means of education and the range of instruction, the improvement of the quality of the instruction, and of the material provisions for carrying on the work, and the organizing of a thorough and complete machinery for the more effective local supervision of the schools. Full reports of the condition of the schools inspected, together with such suggestions and instructions as were necessary, have been left in the "Observation Books," and judging from the spirit in which these were received, and the improvement observable in schools I had an opportunity of revisiting, there is good reason to hope that during 1874 higher general results will be achieved.

A summarized statement of the condition of each school visited is appended.

ANNEX A.

Inspector's Office, Goulburn,  
8th January, 1874.

D. S. HICKS,  
Inspector.

## ANNEX A.

### SUMMARIES of Reports on Schools inspected.

#### I.—PUBLIC SCHOOLS.

BERRIMA (V.) :—Visited, 14th and 15th October.

Numbers enrolled :—Boys, 38; girls, 26; total, 64.

Numbers present :—Boys, 36; girls, 25; total, 61.

Another room to the teacher's residence, weather-sheds, and a pump would render the material organization complete. Three-fifths of the children in the locality attend. Punctuality is only tolerable, but in all other respects the government is satisfactorily effective. As a whole the discipline is very fair. The

The whole instructional arrangements are well adapted to the circumstances of the school, and the work is carried on with vigour, system, and intelligence. The attainments of the pupils average nearly very fair. To the subjects prescribed for the classification, algebra to simple equations, mensuration of surfaces, and the first book of Euclid's elements, are added for the 4th class.

**BINDA (V.)** :—Visited, 1st May.

Numbers enrolled :—Boys, 15 ; girls, 12 ; total, 27.

Numbers present :—Boys, 15 ; girls, 11 ; total, 26.

The school is undergoing repairs, and measures are in progress for erecting a new teacher's residence. When these improvements are completed the material condition will be satisfactory. Excepting in the matter of punctuality the general discipline is good. Progress has been made in military drill. All required subjects are taught, and the proficiency ranges from moderate in the 1st class to very fair in the 3rd. At the time of inspection the teacher had been but a short time in charge. During that time he had thoroughly re-organized the school, and placed its management on a proper basis.

**BOWNING (V.)** :—Visited, 4th March.

Numbers enrolled :—Boys, 21 ; girls, 17 ; total, 38.

Numbers present :—Boys, 17 ; girls, 13 ; total, 30.

The school buildings are new and in good order, but both schoolroom and teacher's residence are uncomfortably small. For some time past the attendance has been low and irregular, but now shows signs of recovery. The pupils are clean, and have been trained to habits of order and obedience. The present teacher had been but two days in charge on the occasion of the inspection. Under previous management singing was not taught. In the other subjects the proficiency is moderate in the first and second classes, and between tolerable and fair in the 3rd.

**BOWRAIL (V.)** :—Visited, 13th October.

Numbers enrolled :—Boys, 25 ; girls, 24 ; total, 49.

Numbers present :—Boys, 22 ; girls, 21 ; total, 43.

The floor is inkstained, and the walls are damaged in many places. The material provisions are satisfactory. The pupils are irregular in attendance, and only tolerably punctual. Talking, playing, collusion over work, and other objectionable habits, characterize the conduct of the children while in school. There are nominally three classes, but these are split up in a systemless and unnecessary manner. The time-table wants entire remodelling. The attainments of the pupils average tolerable. The condition of the school is not commensurate with the circumstances of the place.

**CHATSBURY (V.)** :—Visited, 20th March.

Numbers enrolled :—Boys, 18 ; girls, 19 ; total, 37.

Numbers present :—Boys, 15 ; girls, 13 ; total, 28.

Repairs are wanted to the building. They have been made since the inspection. Now, therefore, the material organization is satisfactory and sufficient for the place. The quarter of enrolment of the children is calculated by a method altogether subversive of the end obviously contemplated in providing for such an entry. The attendance has lately been affected by harvesting, but ordinarily the numbers in attendance are fairly proportionate to those enrolled. Punctuality is very unsatisfactory. The government secures cleanliness, obedience, and fair order, but is not enthusiastic and forceful enough. Several pupils have been prematurely advanced to the 2nd class. Singing and drawing are not taught. In the other branches the attainments are uneven, and average only a little above moderate. The teacher is too easily discouraged.

**CURRAWANG (V.)** :—Visited, 6th and 7th November.

Numbers enrolled :—Boys, 57 ; girls, 64 ; total, 121.

Numbers present :—Boys, 48 ; girls, 50 ; total, 98.

A new brick schoolroom well organized has been erected. There is a fine enclosed playground ; but to complete the material condition a class-room, sheds, lavatory, water supply, and teacher's residence are wanted. The attendance is numerous, and the general discipline good. Singing is not taught, but elementary algebra is an extra for the upper division of the 3rd class. The pupils unduly preponderate in the 1st class, and as a consequence, a disproportionately large share of work is thrown on the assistant. All other arrangements for the conduct of the school are satisfactory. In the 1st class the proficiency is moderate ; in the 2nd and 3rd, very fair. Needlework is not effectively taught.

**COLLECTOR (N.-V.)** :—Visited, 2nd December.

Numbers enrolled :—Boys, 31 ; girls, 24 ; total, 55.

Numbers present :—Boys, 25 ; girls, 15 ; total, 40.

School is at present conducted in make-shift premises, but active measures are being taken to get a properly organized vested school. The discipline is the weak point in the general management ; it is at best but indifferent. Some time had to be spent in getting the children into order before the examination could be proceeded with. The Scripture lessons have not been read hitherto, but all other required subjects to a 3rd class standard are taught. The instructional documents are only moderately well adapted to the desired end. In the 1st class the proficiency is tolerable, but in the 2nd and 3rd approaches fair. The oral subjects are the weakest.

**CROOBYAR (N.-V.)** :—Visited, 28th and 29th August.

Numbers enrolled :—Boys, 66 ; girls, 36 ; total, 102.

Numbers present :—Boys, 55 ; girls, 30 ; total, 85.

Considering the attendance, the prospects of the school, and the character and importance of the district, properly appointed and much larger vested premises are badly wanted. The classification is appropriate, the instructional documents judiciously constructed, the records correct, and the teaching power equally distributed. The defective material condition has an unfavourable effect upon the attendance, which does not include more than three-fourths of the children of school age in the locality. The same cause interferes with the regularity of attendance of those enrolled. Punctuality is only tolerable, but cleanliness, order, and moral tone are good. During the year a 4th class has been formed, and all subjects required for it are intelligently taught. The average proficiency is from fair to very fair.

**DALTON (N.-V.)** :—Visited, 12th March.

Numbers enrolled :—Boys, 25 ; girls, 27 ; total, 52.

Numbers present :—Boys, 20 ; girls, 21 ; total, 41.

School is conducted in rented premises, half the expense being borne by the teacher—a very objectionable arrangement, which there is a prospect of some action being taken to supersede. The premises comprise schoolroom and teacher's residence, and are tolerably suitable, though the external appointments are very incomplete. The records and property generally are neatly and carefully kept. Harvesting affects the attendance. In all other respects the general discipline is thoroughly effective. Its results, as seen in the

the general order and tone of the schools are good. There are three classes, and, singing excepted, all subjects required for these are taught. The whole instructional arrangements are satisfactory, and the proficiency exceeds fair. The general management is energetic and efficient.

ELING FOREST (V.) :—Visited, 23rd October.

Numbers enrolled :—Boys, 15 ; girls, 18 ; total, 33.  
Numbers present :—Boys, 12 ; girls, 17 ; total, 29.

The building is of stone, but in a dilapidated condition. The schoolroom is too small, and does not allow of a proper arrangement of the furniture. A separate teacher's residence is in ruins. Repairs and additions are badly wanted to the whole premises. The general discipline is very fair, the work of instruction is systematically and diligently carried on, and the proficiency of the pupils is nearly fair.

GOULBURN (Boys—V.) :—Visited, 22nd, 23rd, 24th, and 25th September.

Number enrolled :—129.  
Number present :—104.

The rooms used are suitable, but are badly in want of general repairs, and have a somewhat naked appearance from the absence of sufficient wall apparatus. The external appointments may be considered complete. Neatness is not characteristic of the records. The numbers are about stationary. Taken as a whole the general discipline approaches good. The instruction is well regulated, and of extensive range—elementary Latin, algebra to quadratics, the mensuration of superficies, and the text of Euclid—Books I, II, III, IV, and VI, with exercises on Book I—being added to the prescribed subjects up to a 4th class standard. The average proficiency of the pupils in this course ranges from fair to very fair. Arithmetic, singing (except in the 4th class), and mensuration are weak branches.

GOULBURN (Girls—V.) :—Visited, 17th, 18th, and 19th September.

Number enrolled :—92.  
Number present :—80.

The schoolroom is rather narrow, but is otherwise suitable. It is well furnished, and fairly well stocked. The external appointments are of satisfactory character. The numbers are increasing. The government is thoroughly effective, the pupils being very regular and punctual in attendance, and the order and moral tone excellent. All required subjects to a 4th class standard are taught, and the work is judiciously regulated, and carried on with fidelity, vigour, and skill. The attainments of the pupils are very fair on the average, and their answering is thoughtful and spirited.

GOULBURN (Infants—V.) :—Visited, 15th and 16th September.

Numbers enrolled :—Boys, 78 ; girls, 72 ; total, 150.  
Numbers present :—Boys, 64 ; girls, 57 ; total, 121

The accommodation provided is not quite sufficient. Much of the apparatus is getting old and soiled. The walls have a bare appearance, and want re-colouring. The attendance is large and increasing. On the whole the discipline is good. All the usual infants' school subjects are taught except Scripture. The classification is unnecessarily minute, and in many particulars incongruous—the time-table is impracticable under it. The teaching is intelligent, and is carried on steadily, and with very fair skill. The collective lessons are the weakest points in the instruction. The proficiency in them is a little above tolerable, while in the other branches it ranges from fair to good.

GULLEN (N.-V.) :—Visited, 6th May.

Numbers enrolled :—Boys, 15 ; girls, 35 ; total, 50.  
Numbers present :—Boys, 4 ; girls, 23 ; total, 27.

Nothing could be worse than the material condition of the school building now in use, but a new vested and well-appointed schoolhouse is approaching completion. The daily report book and quarterly return are the only records in a satisfactory state. Regularity and punctuality of attendance are both bad. The government is rather feeble, and the order is lax as a consequence. Loss of time and power is caused by minute subdivision of the classes. In reading, writing, drawing, and geography the attainments range from moderate to tolerable ; in the other subjects, from failure to indifferent. The singing is simply an infliction upon the listener.

Note.—Since the inspection the new building has been opened.

GUNDABOO (V.) :—Visited, 3rd December.

Numbers enrolled :—Boys, 28 ; girls, 20 ; total, 48.  
Numbers present :—Boys, 20 ; girls, 16 ; total, 36.

The material organization is well-nigh complete. The attendance is satisfactorily numerous, and is regularly maintained. The order, however, is indifferent,—the result of a weak and wavering government. Singing is not taught. The methods are not of any definite character. The results of examination are a little beyond moderate. The range of attainments is low, but this is accounted for in part by the fact that the school was closed for some time previous to the present teacher taking charge.

GUNNING (V.) :—Visited, 13th March.

Numbers enrolled :—Boys, 29 ; girls, 35 ; total, 64.  
Numbers present :—Boys, 25 ; girls, 29 ; total, 54.

A verandah to the residence, lavatory, and weather-sheds would make the material organization complete. In all main features the general discipline is very fair. It would be improved by the infusion of more life and cheerfulness into the government. The pupils are judiciously classified, and are taught all subjects required up to a 3rd-class standard. The methods are modern, and are practised with fair skill and tolerable energy. The 1st class has not received a proportionate share of attention, and the range of attainments in it is consequently low, and its general proficiency barely moderate. In the second class the attainments are nearly fair, and in the 3rd from fair to very fair ; average, tolerable to fair.

KANGALOOON (N.-V.) :—Visited, 10th June.

Numbers enrolled :—Boys, 23 ; girls, 24 ; total, 47.  
Numbers present :—Boys, 22 ; girls, 21 ; total, 43.

School is held in the Church of England building, which is fairly suitable. Hat-pegs are wanted to complete the internal fittings, and a lavatory and playshed to make good the external appointments. The church furniture interferes but slightly with school business. The pupils are regular in attendance, and fairly punctual, clean, mannerly, and in good order. The teaching of singing is temporarily suspended. The general proficiency exceeds tolerable in the 1st and 3rd classes, and reaches very fair in the 2nd. The pupils are attentive, ready to work, and generally thoughtful and intelligent.

KANGALOOON,

**KANGALOOON, WEST (V.)** :—Visited, 9th June.

Numbers enrolled :—Boys, 26 ; girls, 18 ; total, 44.  
Numbers present :—Boys, 21 ; girls, 16 ; total, 37.

The school is in good material condition, and the property is carefully kept. A few omissions occur in the records. Punctuality admits of improvement, but the children are clean, of becoming demeanour, cheerful, and in tolerable order. Several minute divisions, differing for the different subjects, have been made in the 1st class, and to this extent the classification is defective. The instruction is fairly well regulated, and is imparted on modern methods with tolerably satisfactory results.

**MARULAN (N.-V.)** :—Visited, 28th May.

Numbers enrolled :—Boys, 14 ; girls, 17 ; total, 31.  
Numbers present :—Boys, 10 ; girls, 14 ; total, 24.

School is held in an apartment of a former hotel, now falling into disrepair. The records are very imperfect, and are disfigured with ink stains and erasures. The general discipline is very fair. The work is not well regulated, and is not very skilfully performed. The oral lessons are the weak feature in the instruction, and reduce the general average of proficiency, which lies between moderate and tolerable.

**MITTAGONG, LOWER (V.)** :—Visited, 20th October.

Numbers enrolled :—Boys, 26 ; girls, 17 ; total, 43.  
Numbers present :—Boys, 25 ; girls, 15 ; total, 40.

The front door is broken, and has no step to it. An excellent teacher's residence has lately been erected. Sheds, a lavatory, and bell are wanted to make the material organization complete. There is a full attendance, and in all main features the general discipline is good. The instruction is judiciously regulated, the classification is appropriate, and the methods are modern and carefully applied. The proficiency averages fair. Dictation is weak.

**MITTAGONG, UPPER (V.)** :—Visited, 6th June.

Numbers enrolled :—Boys, 23 ; girls, 17 ; total, 40.  
Numbers present :—Boys, 7 ; girls, 6 ; total, 13.

The school is in good material condition, and is thoroughly well organized, but very little care has been taken of the premises. The schoolroom and residence are anything but clean, and are littered over with paper and rubbish. Only two-thirds of the children in the locality are enrolled, and for some time past the attendance has been both irregular and unpunctual. On the day of inspection it was exceptionally low on account of bad weather. The classification is altogether too high, the present 3rd class being far below the required standard. The teaching has been poor and superficial. The proficiency ranges from small to indifferent. At the time of inspection the present teacher had but just entered on charge of the school ; he cannot be held accountable for its very unsatisfactory condition.

**MOOROOWOLLLEN (V.)** :—Visited, 29th May.

Numbers enrolled :—Boys, 43 ; girls, 47 ; total, 80.  
Numbers present :—Boys, 30 ; girls, 26 ; total, 56.

A new, well-planned weatherboard building is provided. Weather-shed, water supply, lavatory, and additional accommodation for the teacher are wanted. In several particulars the records are erroneously kept. The attendance is large, fairly regular, and tolerably punctual. The teaching power is barely sufficient. The children are given to prompting and collusion over their work, and their attention and effort are inclined to be fitful. The classification is unnecessarily minute, and entails a great loss of time. Undue prominence has been given to reading, writing, and arithmetic. The proficiency, on the whole, ranges from moderate in the 1st class to fair in the 3rd. The progress of the school has not been commensurate with its advantages.

**MOSS VALE (V.)** :—Visited, 17th June.

Numbers enrolled :—Boys, 37 ; girls, 28 ; total, 65.  
Numbers present :—Boys, 22 ; girls, 14 ; total, 36.

The teacher's residence is too small, and a weather-shed is wanted on the playground. Otherwise the school is in good material condition. The internal equipment is satisfactory also, but, strange to say, the maps and pictures are rolled up in a corner instead of being suspended on the walls. The attendance on the day of inspection was low in consequence of wet weather, but ordinarily it is satisfactorily numerous, regular, and punctual. The government is mild and cheerful, vigilant, and fairly effective. Military drill has been introduced with beneficial results. The classification and instructional arrangements generally are unobjectionable. Singing is not taught, but in the other subjects the attainments average nearly fair. The teaching is careful and zealous, but needs to be more equitably distributed among the different branches. Object lessons and explanation of the reading lessons are weak points.

**MUMMELL (V.)** :—Visited, 29th September.

Numbers enrolled :—Boys, 21 ; girls, 24 ; total, 45.  
Numbers present :—Boys, 17 ; girls, 13 ; total, 30.

The material organization is good. All children of school age in the locality attend ; two-thirds of them, regularly. Punctuality is satisfactory, cleanliness is secured, and the order and moral tone are good. There are three classes, and, singing excepted, all subjects required for these are taught. The instruction is imparted zealously, intelligently, on approved methods, and with results ranging from fair to very fair.

**MUMMELL EAST (N.-V.)** :—Visited, 17th November.

Numbers enrolled :—Boys, 10 ; girls, 17 ; total, 27.  
Numbers present :—Boys, 8 ; girls, 11 ; total, 19.

The roof is in want of repairs, and the furniture is insufficient. There is neither enclosed playground nor teacher's residence. There are no proper external appointments. From various causes the attendance is low and irregular. The government is vigorous, secures fair order, and is developing a healthy moral tone. Scripture and drawing are omitted. In the other branches the attainments are tolerable. The present teacher has been but a short time in charge, and she has had several difficulties to face and irregularities to correct.

**MURRUMBATEMAN (V.)** :—Visited, 7th March.

Numbers enrolled :—Boys, 16 ; girls, 18 ; total, 34.  
Numbers present :—Boys, 13 ; girls, 15 ; total, 28.

The school building is new, suitable, and well-furnished. The playground is enclosed, and a comfortable cottage is provided for the teacher. A tank and a bell are wanted. There is no lesson register. The attendance has been low for some time past, but is recovering. The general discipline is fair, and the moral

moral tone healthy. The classification is adapted to the circumstances, and singing and drawing are the only omission from the prescribed course. An intelligent effort is made to practise modern methods of teaching, and with tolerable results.

MYRTLEVILLE (V.) :—Visited, 21st March.

Numbers enrolled :—Boys, 11 ; girls, 23 ; total, 34.  
Numbers present :—Boys, 5 ; girls, 20 ; total, 25.

The schoolroom is low, but otherwise fairly suitable. It is well stocked, but not kept sufficiently tidy and clean. The quarter of enrolment is estimated according to the attainments, instead of by the attendance of the pupils. The numbers are low and fluctuating. The pupils are extremely unpunctual, and in consequence of the laxity and feebleness of the government, the order is but moderate, and the moral tone low. Singing and drawing are omitted, and the reading of the Scripture Lessons was discontinued at the beginning of the year. The other subjects, up to a 3rd class standard, are professedly taught, but in reality the instruction has been mainly confined to reading, writing, and arithmetic. The average proficiency is a little above indifferent. Modern methods are either ignored or not understood. The school appears to have seriously declined in both numbers and efficiency.

NEW SHEFFIELD (N.-V.) :—Visited, 17th October.

Numbers enrolled :—Boys, 33 ; girls, 28 ; total, 61.  
Numbers present :—Boys, 30 ; girls, 23 ; total, 53.

The building used is the Wesleyan chapel, which is a roomy and comfortable structure, fairly well furnished ; but the locality requires a fully organized and vested school establishment. The numbers enrolled comprise two-thirds of the children in the locality. The government is mild without being forceful, and the several features of the discipline are only tolerably satisfactory. The time-table is very defective. Little objection can be taken to the classification. The teaching is on modern methods, but is based more on experience than on a knowledge of principles. Its results slightly exceed tolerable. Existing arrangements are in part only provisional, and, considering the importance and prospects of the place, cannot be regarded as efficient.

NORWOOD (N.-V.) :—Visited, 18th November.

Numbers enrolled :—Boys, 20 ; girls, 15 ; total, 35.  
Numbers present :—Boys, 16 ; girls, 14 ; total, 30.

A good schoolhouse and residence are provided. The playground is partially enclosed, but there are no out-offices. Book-press and hat-pegs are badly wanted, and the lighting of the room is somewhat defective. No right-of-way to the school is secured, and in wet weather it becomes inaccessible to many of the children. All children in the locality attend, and the discipline throughout is very fair. The instructional arrangements are satisfactory, and the proficiency ranges from tolerable in the 1st class to fair in the 3d. The school was closed for some months before the appointment of the present teacher ; but he has successfully re-organized it, and considerably improved its general efficiency.

NOWRA (V.) :—Visited, 11th and 12th August.

Numbers enrolled :—Boys, 50 ; girls, 34 ; total, 84.  
Numbers present :—Boys, 47 ; girls, 27 ; total, 74.

Recent additions have made the house accommodation for the teacher pretty complete, but some portion of the playground should be fenced off for his private use. Weather-sheds and lavatory are wanted. The numbers have increased, until they now include nearly all the children of school age in the locality, and the attendance is marked by fair regularity and punctuality. The order is tolerable. Greater attention to the details of discipline is necessary to render it fully satisfactory. The teaching is lacking in force and substance. As a result, the pupils do not work with sufficient will and vigour. The attainments average tolerable. Geometry and dictation are very weak branches. The gradual influx of new scholars of very uneven attainments may have had some effect in lowering the general efficiency.

ROBERTSON (V.) :—Visited, 13th June.

Numbers enrolled :—Boys, 34 ; girls, 34 ; total, 68.  
Numbers present :—Boys, 26 ; girls, 23 ; total, 49.

Excellent stone buildings are provided. A lavatory, weather-shed, and water supply are wanted, and the playground has yet to be enclosed and properly cleared. The interior of the school has a very bare appearance from the absence of apparatus on the walls ; a sufficient stock is provided, but not suspended. A numerous and fairly regular and punctual attendance is secured. The order is fair, but the moral tone only tolerable ; there is an under current of whispering, and the pupils are slow. There are only two classes, but by this time there should have been three. There is also a tendency to make too many subdivisions of the classes. Modern methods are practised, but in such a way that the whole results of instruction are not much above tolerable. In the 2nd class the general proficiency reaches fair. The adoption of the narrow and partial plan of giving an undue, almost exclusive, attention to reading, writing, and arithmetic, has had a great deal to do in preventing the accomplishment of higher results.

ROSLYN (V.) :—Visited, 24th April.

Numbers enrolled :—Boys, 18 ; girls, 17 ; total, 35.  
Numbers present :—Boys, 15 ; girls, 12 ; total, 27.

The building is in very fair material condition, and well organized. The discipline is fair throughout. Progress has been made in military drill. The classification is judicious, the methods of instruction suitable, and the teacher's attention has been well distributed among the classes ; but object lessons, Scripture lessons, and geography have been somewhat neglected. On the average, the proficiency is nearly fair.

TARAGO (N.-V.) :—Visited, 9th October.

Numbers enrolled :—Boys, 19 ; girls, 10 ; total, 29.  
Numbers present :—Boys, 17 ; girls, 10 ; total, 27.

The building used is the English church. So much space is taken up by church furniture, altogether unavailable for school use, that the operations of the school are seriously embarrassed. The furniture is but moderately suitable, and a proper arrangement of it is impossible. The attendance is regular and fairly punctual ; and the government, which is mild but vigilant, secures good order and thorough obedience. Singing and drawing are omitted ; in the other branches the attainments range from tolerable to fair. These results are mainly achieved by dint of patient and continuous application. The pupils are rather slow over their work.

TARALGA (V.) :—Visited, 26th March.

Numbers enrolled :—Boys, 26 ; girls, 26 ; total, 51.  
Numbers present :—Boys, 18 ; girls, 21 ; total, 39.

The teacher's residence wants enlarging. In other respects the material condition is satisfactory. The playground is prettily bordered by flower-plots kept by the children. The general aspect is very pleasing, and bespeaks both taste and industry. Habits of whispering and promiscuous answering, and a tendency

tendency to frivolity on the part of the pupils are observable; otherwise the general discipline is very fair. Military drill is introduced with marked advantage. Although singing and drawing are nominally the only prescribed subjects not taught, an altogether undue prominence is given to reading, writing, and arithmetic. According to the time-table the 3rd class gets seventeen, and the 2nd class sixteen arithmetic lessons in the week, taking up about half their time. The time-table is defective in other respects, and the programmes are little better than transcripts from the "Standard of Proficiency." The instruction lacks thoroughness and comprehensiveness. Dictation, object lessons, arithmetic, and geography are particularly weak subjects, and the general proficiency is only from moderate to tolerable. The disadvantages said to be connected with the school are no greater than in the average of schools.

**TERRANNA (N.-V.)** :—Visited, 16th May.

Numbers enrolled :—Boys, 22 ; girls, 15 ; total, 37.

Numbers present :—Boys, 19 ; girls, 13 ; total, 32.

School is in the Church of England building, a neat and commodious stone structure, not however suitably furnished for school purposes. A comfortable residence is provided for the teacher, who has ornamented the premises with a garden, laid out and planted with great taste, and kept with an equal amount of care. To maintain the minimum average is a work of considerable difficulty, but up to the present it has been done. The pupils are also fairly punctual, and generally clean and tidy. Other features of the discipline are less satisfactory. Whispering and restlessness are prevalent, and the school movements are attended with an amount of noise and confusion. The classification and general arrangements for lesson giving are somewhat incongruous. The plan of having a separate class for each subject is followed to a considerable extent, and a loss of time and power is the result. The attainments range from indifferent in the 1st class to fair in the 3rd. The oral lessons are weak.

**TOMERONG (N.-V.)** :—Visited, 22nd August.

Numbers enrolled :—Boys, 23 ; girls, 14 ; total, 37.

Numbers present :—Boys, 22 ; girls, 14 ; total, 36.

This is a substantial and well-built schoolroom of sawn slabs with shingled roof, but the teacher's residence is a mere hut. A good playground is enclosed and cleared. The building is frequently used for religious purposes, and a disarrangement of the furniture, &c., left for the teacher to make good, is a common consequence. With the exception of the quarterly return, no one of the records can be said to be complete and correct. The pupils are irregular and unpunctual in attendance, and, although quiet and obedient, are not well trained to proper school habits. To be fully effective the government needs to be more exacting in character, and to be administered with greater vigour and promptitude. The time-table needs entire remodelling on correct principles, and the entries on the programmes are vague. In some branches the teaching is intelligent and developmental, but in others it is mechanical and bears little or no fruit. As a consequence, the attainments vary greatly. On an average, they are between indifferent and moderate. Grammar, geography, object lessons, explanation of reading lessons, and Scripture lessons are exceedingly low. The teacher clings to old forms with a tenacity that greatly mars his usefulness.

**TOWRANG (N.-V.)** :—Visited, 14th May.

Numbers enrolled :—Boys, 17 ; girls, 14 ; total, 31.

Numbers present :—Boys, 13 ; girls, 9 ; total, 22.

School is conducted in the Wesleyan chapel, and the presence of heavy church furniture renders a proper school organization impossible. The records are in an unsatisfactory state. The pupils are regular, punctual, and clean, but in only moderate order. The government is mild to weakness, and tolerates many loose and objectionable habits. The classification is judicious. The instruction does not include object lessons, singing, or drawing, and is imperfectly regulated. The results are below moderate.

**TUENA (N.-V.)** :—Visited, 28th April.

Numbers enrolled :—Boys, 29 ; girls, 19 ; total, 48.

Numbers present :—Boys, 20 ; girls, 18 ; total, 38.

The building used is a miserable hut, badly furnished. The lesson register is not kept at all, and the class roll and fee book very imperfectly so. Only about one-half the children in the locality attend; and discipline, order, moral tone are unknown. There are no programmes, and the time-table is worthless. The teaching bears no fruit. The school is a failure.

*Note.*—The teacher resigned immediately after the inspection, and the school is now closed until proper buildings are provided.

**ULLADULLA (N.-V.)** :—Visited, 1st September.

Numbers enrolled :—Boys, 27 ; girls, 18 ; total, 45.

Numbers present :—Boys, 20 ; girls, 17 ; total, 37.

The schoolhouse is an old and dilapidated slab building. It is passably well furnished and stocked, but the external appointments are very indifferent. The schoolroom is kept scrupulously clean and tidy. The attendance is numerous for the locality, and the children are clean, in good order, and manifest a cheerful and subdued demeanour. Fair judgment is shown in the classification and in the regulation of the instruction. All required subjects are provided for, and the teaching is carried on with diligence, care, and method. The proficiency is from fair to very fair.

## II.—PROVISIONAL SCHOOLS.

**BAMARANG** :—Visited, 13th August.

I visited this school to report on an application for aid to it. A suitable building is provided, and satisfactory general arrangements are in force. The school has since been aided, and will provide the means of education for from 20 to 25 children who would be otherwise destitute.

**BERELLAN** :—Visited, 3rd September.

Numbers enrolled :—Boys, 15 ; girls, 17 ; total, 32.

Numbers present :—Boys, 13 ; girls, 16 ; total, 29.

This was originally a Roman Catholic school, and is still held in a building belonging to that denomination. The premises generally are of suitable character, but the furniture is old and cumbersome, and much of the apparatus is soiled and worn. Three of the records are defectively kept. Only those children within very easy reach of the school attend. The government is mild and indulgent. The general discipline is only tolerable. Singing and Scripture are omitted. The time-table neither is nor can be worked upon, and the programmes are little better than mere transcripts from the "Standard of Proficiency." Several children have been prematurely promoted. Grammar, geography, object lessons, and word-meanings have been much neglected. In the other subjects the attainments range from tolerable to fair.

**BUNDANOON** :—

**BUNDANOON** :—Visited, 10th December.

Numbers enrolled :—Boys, 21 ; girls, 16 ; total, 37.  
 Numbers present :—Boys, 18 ; girls, 15 ; total, 33.

This is a good building of sawn slabs with shingle roof, and is generally suitable. It is the property of the Primitive Methodist body, and religious services are occasionally held in it, which, however, are not allowed to interfere with the school business. The furniture is new and suitable, but insufficient. The attendance is reasonably numerous and regular, but not punctual enough. The pupils are clean, but in only moderate order. They are properly classified, and taught all subjects up to a 2nd class standard. The teaching is intelligent and careful, and produces results approaching to fair.

**BUNGONIA** :—Visited, 9th December.

Numbers enrolled :—Boys, 14 ; girls, 10 ; total, 24.  
 Numbers present :—Boys, 8 ; girls, 8 ; total, 16.

School is held in a room of a dilapidated and untenanted cottage. It is but indifferently suitable, and is not kept tidy enough. The records are in an unsatisfactory state. The attendance is low and irregular. The pupils are unpunctual, and generally untrained to proper school habits. The classification is too minute, and the teaching is mainly individual. The proficiency of the pupils is below indifferent. Singing, drawing, and Scripture lessons are omitted, but special religious instruction from Dr. Butler's catechism is superadded. In its general character the school assimilates far more closely to a Certified Denominational Roman Catholic School than to a Public School.

**BURRAGAWANG** :—Visited, 22nd October.

Numbers enrolled :—Boys, 19 ; girls, 15 ; total, 34.  
 Numbers present :—Boys, 18 ; girls, 15 ; total, 33.

The building is new and suitable, and fairly well furnished, but there are no out-offices. The records are very imperfect. The school was opened two months before the inspection, and during that time the children attended regularly and punctually. They are also tractable and willing, and seem to be actuated by right motives ; but very little has been done towards effecting thorough order. The instructional arrangements are crude and ill-adapted to the "Standard of Proficiency." The work is very imperfectly regulated, and is encumbered by mere mechanical and rote operations of an anything but educative tendency. The average proficiency is small. Special religious instruction from Dr. Butler's catechism has been added to the ordinary subjects. For this breach of the Council's Regulations the teacher excuses herself on the ground that she was misled by advice from a source which she at the time considered authoritative.

**CHAIN OF PONDS** :—Visited, 11th March.

Numbers enrolled :—Boys, 17 ; girls, 17 ; total, 34.  
 Numbers present :—Boys, 15 ; girls, 14 ; total, 29.

The schoolhouse is a good slab building, but needs plastering. It is well furnished and stocked. Excepting in a few minor matters, the records are properly kept. Attendance is considerably affected during the summer months by the demand for children's labour on the farms, but in all other respects the discipline is good. Singing and drawing are the only subjects entirely omitted, but explanation of the reading lessons, grammar, geography, and object lessons have received far too little attention, and are extremely weak branches. The teaching inclines to be somewhat mechanical, and produces results which are both partial and various, being as high as good in writing and dictation, and only small in geography. They average nearly tolerable.

**COTTA WALLA** :—Visited, 23rd April.

Numbers enrolled :—Boys, 16 ; girls, 9 ; total, 25.  
 Numbers present :—Boys, 11 ; girls, 5 ; total, 16.

The school building is a slab structure divided into two rooms—one for a schoolroom, the other for a teacher's residence. Both are unfloored, and the former is not very well supplied with requisites. There are no out-offices. No lesson register is kept. The attendance is small for the locality, and the pupils are both unpunctual and irregular. Order and cleanliness have yet to be secured. Singing, drawing, and Scripture are not taught ; in the other branches the attainments average moderate. The population and resources of the locality are sufficient to support a Public School. The committee keeps this circumstance in view. Since the inspection certain material improvements have been effected.

**GARRETT'S FLAT** :—Visited, 11th June.

Numbers enrolled :—Boys, 14 ; girls, 17 ; total, 31.  
 Numbers present :—Boys, 12 ; girls, 17 ; total, 29.

Two acres of Crown land have been secured for school purposes ; and the people have erected a slab building, divided into two rooms—one for a schoolroom, the other for the teacher's use. The schoolroom is fairly well furnished, but is badly lighted. No other material provisions have yet been made. The stock of working materials is scanty. The discipline is firm and thoroughly effective. The pupils are well drilled. The school, the first in the locality, was ten months in operation at the time of inspection. There was consequently no higher class than a 1st, which was divided into three sections. The children have been well and carefully taught, and their mental powers developed. The proficiency averages very fair. The progress made is real and good.

**GOOD HOPE** :—Visited, 3rd November.

Numbers enrolled :—Boys, 19 ; girls, 15 ; total, 34.  
 Numbers present :—Boys, 17 ; girls, 15 ; total, 32.

A snug slab building with two rooms for the teacher, a playground of two acres enclosed by a log fence and the Murrumbidgee River, and a fairly sufficient and suitable supply of furniture and working materials, make up the material provisions. Only three-fifths of the children of school age in the locality attend. The place is really a fair field for a Public School, and one ought to exist. Contrary to the Council's Regulations, the distinctive features of a Denominational School are incorporated in the general management—catechism instruction being regularly given by the teacher. The children on the books are punctual and regular in attendance, and clean, but order and moral tone are low. The pupils talk, answer, leave their places, and commit many other breaches of discipline, apparently as a matter of course, and in the majority of cases, unchecked. Singing, drawing, and Scripture lessons are omitted. Old rote methods are mostly practised, and the results are correspondent. The instruction is of a very limited range, and the proficiency is considerably below indifferent.

**GRABEN GULLEN** :—Visited, 5th May.

Numbers enrolled :—Boys, 18 ; girls, 20 ; total, 38.  
 Numbers present :—Boys, 6 ; girls, 13 ; total, 19.

The building is of the usual bush kind, slab and bark ; it is badly appointed. The furniture and fittings are insufficient. The records are in a very unsatisfactory state. Nearly all the children in the locality are enrolled, but they are very irregular and unpunctual. The discipline is weak and ineffective.

Object

Object lessons, singing, drawing, and Scripture lessons are omitted, and the professed teaching of grammar and geography is mere waste of time. Even in reading, writing, and arithmetic the proficiency is but small. Special religious instruction from Dr. Butler's catechism is grafted on the ordinary work. The school is opened and closed with prayers, and is to all intents and purposes a Roman Catholic School, with the time for special religious instruction changed.

**GREENWELL POINT** :—Visited, 20th August.

Numbers enrolled :—Boys, 15 ; girls, 20 ; total, 35.  
Numbers present :—Boys, 12 ; girls, 20 ; total, 32.

A good schoolhouse and residence are provided. The playground is too small, and there are no out-offices. The children exhibit a very pleasing demeanour and spirit, and are in very good order. The attainments average from fair to very fair throughout ; and the pupils are very attentive, and display considerable industry and mental culture. The school is in a creditable state.

**GULLEN** :—Visited, 7th May.

Numbers enrolled :—Boys, 18 ; girls, 12 ; total, 30.  
Numbers present :—Boys, 12 ; girls, 9 ; total, 21.

The schoolhouse, a slab building with bark roof, is in fair repair and is neatly kept ; it is poorly furnished and badly appointed. The records are imperfect. The attendance is reasonably numerous, but not steadily maintained ; several of the pupils are unpunctual. The discipline is only partially effective—it is not strict enough. The classification is appropriate, and the instruction includes all required subjects except drawing ; but is badly regulated, and is imparted in such an unskilful manner as to be unproductive of real results. The attainments are below small. Denominational teaching from Dr. Butler's catechism is attached to the ordinary work in such a way as to become virtually a part and parcel of the regular routine, and the school is opened and closed with prayers, so that it is not, as it is required to be, conducted as a Public School.

**GURRUNDAN** :—Visited, 8th May.

Numbers enrolled :—Boys, 14 ; girls, 12 ; total, 26.  
Numbers present :—Boys, 11 ; girls, 12 ; total, 23.

A slab building, with bark roof, and no external appointments, standing in a lonely spot near the top of the Oullarin Range. Internally it has been made pretty comfortable, and is fairly well provided with requisites. No fee book is kept. The attendance is reasonably numerous, and is maintained with average regularity and fair punctuality. The pupils are quiet in manners and clean in appearance ; but are in loose order, and anything but smart and industrious. The classification tends to be too minute. Singing and drawing are professedly the only omissions. Reading and writing are the only subjects, however, in which the average proficiency rises above indifferent.

**HIGH RANGE** :—Visited, 21st October.

Numbers enrolled :—Boys, 15 ; girls, 11 ; total, 26.  
Numbers present :—Boys, 13 ; girls, 8 ; total, 21.

This is a good bush schoolhouse, satisfactorily fitted up, but there are no external appointments. Numerous errors are made in the keeping of the records. The pupils are punctual and clean, but neither regular in attendance nor sufficiently orderly. The time-table is quite unsuitable, and the instruction is neither regulated by programmes nor recorded in the lesson register. Object lessons, singing, drawing, and Scripture are omitted altogether, and geography is regularly given to the 3rd class only. Judging by results, grammar can hardly be said to be taught. In the remaining subjects the proficiency is from moderate to tolerable.

**JACQUA** :—Visited, 26th September.

This school was visited on an application for aid to it. It is in a mining settlement near the Shoalhaven River, and provides the means of education for about forty children. The stability of the place is not by any means certain. The building is fairly suitable, and proper furniture will be provided immediately.

**JANNUNG** :—Visited, 27th August.

Numbers enrolled :—Boys, 11 ; girls, 16 ; total, 27.  
Numbers present :—Boys, 10 ; girls, 16 ; total, 26.

Several of the pupils live on the opposite side of an adjacent creek, which becomes heavily flooded in wet weather, and is for a time uncrossable. This circumstance materially affects the attendance at certain seasons. Ten acres of ground have been secured, and a suitable schoolhouse has been erected, furnished, and stocked ; but there are no other material provisions. All the children in the locality attend, except one family ; and the discipline secures fair punctuality, cleanliness, and good order. There is, however, a lack of enthusiasm among the pupils. The course of instruction is complete ; modern methods are studied and practised ; and the instructional arrangements generally are satisfactory, and give evidence of considerable inventive power. The proficiency approaches fair, but the answering is insufficiently prompt and spirited.

**KILLENAMELLA** :—Visited, 2nd May.

Numbers enrolled :—Boys, 15 ; girls, 13 ; total, 28.  
Numbers present :—Boys, 11 ; girls, 9 ; total, 20.

The schoolhouse is a comfortable slab building, tolerably well supplied with necessaries, and kept commendably neat and clean. The attendance is reasonably numerous, and the pupils are tolerably regular and punctual, and also clean. Real order, however, is not obtained, and the discipline as a whole is but moderate. The instruction is neither regulated nor registered, and is mainly confined to reading, writing, and arithmetic. The proficiency of the pupils is indifferent. Prayers are given each morning before the regular business commences, and special religious instruction from Dr. Butler's catechism is superadded to the ordinary instruction. The distinctive features of a Denominational Roman Catholic School are imported into the general management.
