THE REGISTRAR GENERAL'S REPORT TO THE HONORABLE THE
COLONIAL SECRETARY.

Registrar General's Department,
Sydney, 20 August, 1878.

Sir,

The greater portion of the Statistical Returns having been received and placed in the hands of the printer, I do myself the honor to submit the following Report for the year ended 31st December, 1877.

I have to call your special attention to the great difficulty of procuring the necessary Returns for the publication of the Statistical Register in anything like a reasonable time. We have now entered the eighth month of the year 1878, and yet there is information for the past year not yet supplied from two or three of the Departments. I am satisfied that if the head of each Department would insist on a compilation of returns at stated periods of the year, the Statistics could be made public at a much earlier date. I also bring under your notice the present mode of collecting the Agricultural and Live Stock Returns. Some of the details are inaccurate and misleading, besides entailing much labour and causing great delay in publication. The general totals, as also the totals of each District, may be relied on as correct. On this subject, however, I purpose going more into detail on a future occasion.

PART I.

POPULATION, IMMIGRATION, VITAL STATISTICS, &c.

The estimated population of the Colony on the 31st December, 1877, was 662,212 persons, which makes an addition during the year of 32,436 persons, or 5·15 per cent. The estimated number of the sexes was as follows:—Males, 367,323, females, 294,889, so that the former were 72,434 in excess of the latter. The percentage of males to total population was 55·47, and of females 44·53, showing a difference of 10·94 in favour of males, which figures are 0·46 higher than those for the previous year. The proportion of males per 1,000 of population was 555, and of females 445. The following figures show the increase for each half year:—

Half-year ending 30th June, 1877:

Births	11,457	Deaths	5,502
Arrivals by sea	18,255	Departures by sea.....	10,574
Total.....	29,712	Total.....	16,076

showing a net increase of 13,636 persons, and bringing the estimated population to 643,412 persons.

Half-year ending 31st December, 1877.

Births	12,394	Deaths	4,367
Arrivals by sea	20,373	Departures by sea.....	9,600
Total.....	32,767	Total.....	13,967

showing a net increase of 18,800 persons, and making our estimated population to number 662,212 persons.

Marriages,
Births, Deaths.

The registers show that during the year 1877 there were 4,994 marriages celebrated, being an increase of 364 on the previous year. The number of births registered was 23,851, as against 23,298 in the year preceding, giving an addition of 553 births to the year under consideration. Registered deaths numbered 9,869, which are fewer by 1,324 than those for the previous year.

Marriages.

From the number of Marriages celebrated during the year 1877, we find that the rate per 1,000 of estimated population was 7·76, which figures show that the average for the previous nine years has been a little more than fully sustained. Marriages celebrated in the City numbered 1,343, which gives a rate of 13·81 to estimated population. The number of Suburban marriages was 556, which amount to 7·21 per 1,000; and 3,095 was the number for the Country Districts, making 6·58 per 1,000. The City rate is 1·18 lower than the average of the previous nine years; that for the Suburbs is higher by 2·19 than the previous nine years' average, and also higher by 0·95 than any single year of the same period. The Country Districts show a rate of 1·08 in excess of the average of the previous nine years. Of the total number of marriages we find that the Church of England celebrated 37·42 per cent.; Roman Catholic, 19·82; Presbyterian, 17·10; Wesleyan, 10·19; Primitive Methodist, 2·20; Congregational, 4·86; Baptist, 1·40; and Registrars, 6·07.

Births.

During the year 1877, we find that the total number of Births registered in the Colony was 23,851, viz., 12,292 males and 11,559 females, or 51·54 and 48·46 per cent. respectively. There were then 733 more male than female children. In the previous year the excess of male over female children was 1·22 per cent.; for the year under consideration it is 3·08 per cent. Of the total number of births 14·25 per cent. occurred in the City, 13·61 per cent. in the Suburbs, and 72·14 per cent. in the Country Districts. The birth rate of the Colony per 1,000 of estimated population for the year 1877 was 37·05, which is 0·70 lower than the previous year, and 2·16 below the average of the previous nine years. On referring to the decennial tables it will be seen that, with the exception of the year 1873, the birth rate of the Colony has been gradually on the decrease year by year. The City shows a birth rate of 34·95, which is lower by 0·53 than the preceding year, and 1·69 under the average of the nine previous years. In the Suburbs the birth rate for the year was 42·15, which is 0·76 higher than the previous year, but 1·61 lower than the nine previous years' average. The Country Districts show a birth rate of 36·67. Here again we find a decrease of 0·95 on the previous year, and 2·29 on the average of the previous nine years.

Deaths.

From the death registers for the year 1877, we learn that the rate of mortality was considerably lower than for the two preceding years. The number of deaths registered in the Colony was 9,869, as against 11,193 in the previous year. The percentage of male deaths to total deaths is 59·55, and of female deaths 40·45; the former being 19·10 per cent. higher than the latter. The death rate for the Colony per 1,000 is 15·34, which is 2·79 lower than the previous year; but 0·32 over the average of the nine years preceding. The average of daily rate of mortality is about 27. The rate for Sydney, for the year 1877, was 20·57, which is under the figures for the previous year by 6·13, and also for the average of the previous nine years by 2·42. The average daily rate for the City was 5·48. The Suburbs show a death rate of 17·15, and here we find a difference of 5·66 in favour of the year under consideration, as compared with the previous year, and 0·82 lower than the nine years' previous average. For the Country Districts the death rate was 13·95, which is lower by 1·64 than the previous year, but 1·06 higher than the average rate of the previous nine years. The consideration of these figures indicates that the past year has been an unusually healthy one, and that the greatest improvement is to be noticed in the City of Sydney.

Immigration.

The number of Immigrants who arrived in the Colony direct from the United Kingdom during the year 1877, was 6,757, which largely exceeds the figures for any one year of the decade. The increment to our population from this source for the year was nearly 60 per cent. over the previous nine years. From other countries the number of arrivals was 465. The total number of Immigrants at the public expense was 6,018, consisting of 2,892 males and 1,627 female adults, and 743 male and 756 female children. There were 739 immigrants at their own expense. The number who arrived at the public expense from England and Wales was 3,689 or 61·30 per cent.; Scotland, 418 or 6·95 per cent.; Ireland, 1,446 or 24·02 per cent.; and other countries

countries, 465 or 7·73 per cent. The religious belief of immigrants at the public expense is as follows:—Protestants, 4,554 or 75·67 per cent.; Roman Catholics, 1,403 or 23·31 per cent.; and other religions, 61 or 1·02 per cent. The arrivals from Great Britain by the mail steamers cannot be ascertained, as they only appear in the lists as from the Port of Departure of the vessel in which they arrive, therefore the foregoing numbers may be looked upon as arrivals by sailing vessels.

During the year 1877 there were 8 Institutions in operation for the treatment of Lunatics and Imbeciles, 7 of which are under the control of Government, and 1 is conducted by a private individual. We find that the total number of inmates on 31st December, 1877, was 1,836—consisting of 1,155 males and 681 females. The number of admissions during the year (inclusive of re-admissions, 115) was 797; of patients under care, 2,704; of those discharged as recovered, 209; and as relieved, 55. The deaths numbered 129. There were 340 patients passed through the Lunatic Receiving House at Darlinghurst. The total receipts for the year from the Government were £49,035. By a foot-note on page 15 it will be seen that the sum of £1,863 was received from relations and friends for maintenance, and paid into the Colonial Treasury.

The number of patients in the various Hospitals of the Colony at the end of the year 1877 was 544—comprising 428 males and 116 females. These institutions, supported chiefly by the Government, provided for 1,869 adults and 420 children as admissions during the year. There were 1,537 adults and 383 children discharged; and 317 adults and 40 deaths of children. The number remaining at the end of the year was 1,289 adults and 191 children. The cost of maintenance to the Government was £23,961, and £1,891 were the proceeds of voluntary contributions.

Two of these institutions were in operation during the year, at a cost of £612, of which amount voluntary contributions provided £398, and the Government £214.

From the returns of these schools we find that the number of inmates on 31st December, 1877, was 1,848, consisting of 1,028 males and 820 females. The receipts for the year amount to £30,760, of which £24,032 were from the public purse, and £6,728 the result of contributions.

Under this head are 6 establishments, supported entirely by private contributions. 4 of them, the Home, Sailors' Home, Sydney Female Refuge, and Infants' Home, had the care of 1,577 inmates, of which number 1,431 were discharged, and 34 died, including 32 infants. The receipts of 3 of the institutions (the Sailors' Home not giving an account) amounted to £2,165, and the disbursements were £46 in excess of receipts. The City Night Refuge and Soup Kitchen gave during the year 67,800 meals, and afforded shelter in 34,076 instances; the receipts were £622, and expenditure £560. The House of the Good Shepherd rendered no return.

The total amount provided in relieving distress and in ameliorating the condition of the people during the year 1877 was £151,158; of which sum private contributions afforded £33,387.

On page 18 of the Statistics will be seen a decennial return of the average rates of wages for different classes of labour in the Colony; and on page 21 a like return of the average prices of provisions and clothing in Sydney. The average rates of wages obtained in the Colony for the year 1877, are as follows:—

As compared with the previous year we find that the value of Imports was in excess by £933,818, and of Exports by £121,878. Taking the estimated mean population* of the year it will be seen that Imports amounted to £22 12s. 2½d. per head, and Exports to £20 6s. 4½d. MILLS AND MANUFACTURES.

On page 158 will be seen a return of the number of *Mills for grinding and dressing grain* in each of the Police Districts of the Colony for the year 1877. The total number of these Mills was 163, of which 15 were in the Metropolitan District, and 12 in the Bathurst District, the rest being distributed over the remaining Districts. Seven Mills of the total number were not working. The aggregate horse-power used was 2,623. There were 151 Mills worked by steam, representing 2,529 horse-power, 8 by water with 80 horse-power, and three were moved by horses. The number of pairs of stones in use was 382, and employment was given to 623 persons.

The total number of *Manufactories and Works* in operation in the Colony during the year 1877 was 2,438, which employed 23,807 persons, viz :—20,590 males and 3,217 females. In the Metropolitan District we find 795 Manufactories, and employing 13,897 persons, of whom 10,827 were males and 3,070 females. There were 8 Mills in operation during the year for the manufacture of *Woollens*. The quantity of Cloth and Tweed manufactured was 271,452 yards, as against 395,704 yards in the previous year. This large reduction in production is accounted for by the fact, that one owner of a large Metropolitan establishment refused to afford the collector any information. The number of persons employed in the seven establishments for which returns have been received, was 207, consisting of 156 males and 51 females.

Soap and Candles.
