NEW SOUTH WALES.

## INTERCOLONIAL CONFERENCE.

(FURTHER CORRESPONDENCE.)

Presented to Parliament by Command.

No. 1.

His Excellency the Governor to The Secretary of State for the Colonies.

No. 15.

Printed Correspondence on Chinese Immigration.

My Lord,

Government House, Sydney, 27 January, 1881.

I have the honor to transmit to your Lordship herewith further correspondence\* on the question of Chinese Immigration which has been presented to the Parliament of this Colony.

2. I also enclose an article from the *Sydney Herald* on the question of Chinese Immigration and the action taken in regard to it by the Government of Western Australia.

I have, &c.,

AUGUSTUS LOFTUS.

[Enclosure.]

EXTRACT from *Sydney Morning Herald* of 19th January, 1881.

THE disposition of the Government of Western Australia to encourage the immigration of Chinese to that Colony appears to have been shown rather inopportunistically. The question of combined action on the part of all the Australian Colonies to place restrictions upon the entrance of Chinese is one of the earliest and most significant which it has been proposed to consider at the Conference now sitting in this city. It was hoped that, as an advance towards federal action, this would have furnished a good subject for joint arrangements, and even for effective representations to the Imperial Government proceeding from Australia as a whole. There was reason for apprehension lest South Australia, which has evinced an inclination to look favourably upon Chinese as colonisers of her Northern Territory, might throw cold water upon the wished-for combination; but Western Australia was not expected to offer any difficulty. It is plain enough now, however, that nothing can be expected from Western Australia. Her Government are so far from resenting the immigration of Chinese that they are actually offering facilities for their introduction. The actuating cause in their case appears to be that the Colony suffers from a sparsity of cheap labour. Among the white working classes competition seems to be insufficient to keep the wage-rate proportionate to the value of the services rendered and the productiveness of the country. No person would attempt to deny that Western Australia suffers from lack of population. Her capital is planted in the wrong part of her territory; but to the north she owns a magnificent estate, with which she has done less than any of her sister Colonies have effected with their not superior properties. Along and back from the Western coast, on the littoral of the Indian Ocean, lies a second Queensland, unpeopled, unoccupied, unutilized. Something should certainly be done by Western Australia to rise to the level of her opportunities, and to obtain a population more adequate than that which she now possesses to her territory. But the introduction of ship-loads of Chinese can scarcely be regarded, we think, as a specific for the disease of lethargy which holds possession of that Colony. Her pastoral property has lain useless all these years chiefly because there is no local market for the produce, no harbours have been opened, and the markets in the Eastern Colonies are not accessible. But if the meat-freezing principle be fairly established, as there is every reason to believe it shortly will be, the conditions will undergo a radical change. Every inlet which can shelter a sea-going steamer will be an available market; meat will become a transportable commodity; pastoral land in Western Australia will be as profitable for occupation as pastoral land on the Barcoo. The rulers of the Western Colony appear somewhat too impatient, and at the wrong time. To swamp their land of promise just at this epoch with Chinese would be to discount their future on the most ruinous terms.

His Excellency the Governor to The Secretary of State for the Colonies.

No. 16.

Report of the Intercolonial Conference respecting the High Commissionership of the Western Pacific.

My Lord,

Government House, Sydney, 29 January, 1881.

I have the honor to enclose to your Lordship, in original, a letter which I have received from Sir Henry Parkes, as Chairman of the Intercolonial Conference, held in Sydney, requesting me in the name of the Conference to transmit to your Lordship the report of a Committee of the Conference appointed to examine the Acts and papers relating to the appointment of the High Commissioner for the Western Pacific Islands, and to consider generally the state of increasing insecurity to life and property in these islands.

2. From the report of the minutes of the proceedings of the Conference, forwarded by this mail (p. 14), your Lordship will observe that Mr. Dick, Colonial Secretary of New Zealand and delegate to the Conference, dissented from the first Resolution, and the Chief Justice Wrenfordsley, Commissioner for Western Australia, declined to vote except in favor of Resolution No. 2.

I have, &amp;c.,

AUGUSTUS LOFTUS.

[Enclosure.]

Sir Henry Parkes to His Excellency the Governor.

My Lord,

Council Room, Public Offices, Sydney, 27 January, 1881.

As Chairman of the Intercolonial Conference now sitting in Sydney, I have the honor to inform you that a Committee of the Conference was appointed, on the 19th instant, to examine the Acts and Papers relating to the appointment of High Commissioner for the Western Pacific Islands, and to consider generally the state of increasing insecurity to life and property in the Islands. The enclosed Report from the Committee, after consideration and amendment, has been adopted by the Conference.

The Conference respectfully requests that Your Lordship will be good enough to transmit the enclosed copy of this Report to the Right Honorable the Secretary of State for the Colonies.

I have, &amp;c.,

HENRY PARKES.

The Secretary of State for the Colonies to His Excellency the Governor.

New South Wales, No. 30.

My Lord,

Downing-street, 11 May, 1881.

I have the honor to acknowledge the receipt of your despatches, noted in the margin, respecting the proceedings of the Intercolonial Conference held at Sydney.

No. 15.	27 Jan
" 16.	29 "
" 17.	29 "
" 18.	29 "

I have perused with much interest the records of the deliberations and resolutions of the Conference, and I hope that this important meeting may eventually result in the adoption by the Legislatures of the Australasian Colonies of several useful measures.

Some of the questions considered by the Conference require separate and special notice, and I shall address to your lordship further despatches dealing severally with those points which appear to call for my observations.

I have addressed a similar despatch to the Governors of the other Colonies represented at the Conference.

I have, &c.,  
KIMBERLEY.

No. 6.

The Secretary of State for the Colonies to His Excellency the Governor.

New South Wales, No. 31.

My Lord,

Downing-street, 11 May, 1881.

I have had under my consideration the Resolutions agreed to by the Intercolonial Conference, held at Sydney in January last, with reference to the relations of British subjects with the natives of the Western Pacific Islands, and to the office and functions of the High Commissioner for the Western Pacific.

Her Majesty's Government highly appreciate the ability and earnestness with which Sir A. Gordon has discharged the responsible duties devolving upon him as the first High Commissioner. They are nevertheless sensible of the importance of the points raised in the Resolutions, as to several of which I have for some time past been conferring with the Lords Commissioners of the Admiralty; and the views of the Conference will receive full and careful consideration.

I have, &c.,  
KIMBERLEY.

No. 7.

The Secretary of State for the Colonies to His Excellency the Governor.

New South Wales, No. 32.

My Lord,

Downing-street, 11 May, 1881.

I have had before me the representation of the Intercolonial Conference held at Sydney in January last, on the subject of the introduction of Chinese Immigrants by the Government of Western Australia at the public expense.

I am well aware of the strong objections which are entertained generally in the Australian Colonies to an extensive Chinese immigration, but in the peculiar case of Western Australia, which comprises an enormous tract of country, more than a third of which lies within the tropics, strong evidence of injury already sustained or likely to be sustained by the neighbouring Colonies, would be necessary to justify Her Majesty's Government in interfering with the arrangements sanctioned by the Legislature (two-thirds of which is elective) for the very limited immigration now proposed.

It does not appear to be alleged that any of the Chinese hitherto introduced into Western Australia have passed into the other Colonies, while on the other hand, each of those Colonies already contain a much greater number of Chinese than Western Australia will have after the new immigrants have arrived.

I should not of course desire to see a large Chinese population introduced into Western Australia, and I shall carefully watch the results of the small immigration to which my attention has been called by the Conference; but under the circumstances, as at present known to me, I am not prepared to interfere with the action of the Western Australian Legislature.

I have, &c.,  
KIMBERLEY.

No. 8.

The Secretary of State for the Colonies to His Excellency the Governor.

New South Wales, No. 33.

My Lord,

Downing-street, 11 May, 1881.

In the Minutes of the Proceedings of the Intercolonial Conference held at Sydney in January last, I observe a resolution on the subject of the Naval and Military Defences of the Australian Colonies and New Zealand.

Her Majesty's Government have noticed with much satisfaction that part of the resolution which pledges the Members of the Conference to use all legitimate endeavours to procure the efficient fortification and land defence of the Australian Ports, at the cost of the Colonies interested. They are, however, unable to express similar satisfaction at the suggestion that the outlay for Naval Defence of the Australian Colonies should be increased, and at the same time that it should continue to be exclusively a charge upon the Imperial Treasury.

On this point I am glad to see that the Representatives of South Australia placed on record their opinion that the Colonies ought to contribute to the cost of maintaining the Australian Squadron.

I have, &c.,  
KIMBERLEY.

NEW SOUTH WALES.

INTERCOLONIAL CONFERENCE.

(FURTHER CORRESPONDENCE RESPECTING CERTAIN RESOLUTIONS PUBLISHED IN THE MINUTES OF PROCEEDINGS OF.)

Presented to Parliament by Command.

No. 1.

The Private Secretary to The Principal Under Secretary.

Sir,

Government House, Sydney, 28 April, 1881.

I am directed by His Excellency the Governor to forward you, for the information of the Colonial Secretary, a copy of a letter from Sir Arthur Gordon, enclosing one from the Chief Judicial Commissioner of the Western Pacific, and expressing a request that His Lordship would lay it before his Responsible Advisers.

I have, &c.,  
REGINALD BLOXSOME, P.S.

No. 2.

The High Commissioner for the Western Pacific to His Excellency the Governor of New South Wales.

My Lord,

Wellington, New Zealand, 21 April, 1881.

I received by last mail from Fiji a letter from the Chief Judicial Commissioner for the Western Pacific, which he is desirous should be communicated to the different Governments represented at the late Intercolonial Conference.

2. I have consequently the honor to enclose a copy of the letter in question, for your Lordship's information and that of your Responsible Advisers, to whom I would request that it may, in accordance with the desire expressed by Mr. Gorrie to that effect, be forwarded.

3. I could have desired to have been able to transmit this letter to your Lordship at a sufficiently early period to permit of its being included in any papers on the subject communicated by your Lordship to the Parliament of New South Wales; but although bearing date the 18th March, the letter did not reach my hands until after the prorogation of the New South Wales Legislature.

I have, &c.,  
ARTHUR GORDON, H.C.

[Enclosure.]

The Chief Judicial Commissioner, Western Pacific, to The High Commissioner.

Sir,

Suva, Fiji, 18 March, 1881.

I have the honor to state that I have by chance seen a copy of a blue-book of New South Wales, containing a report of the minutes of proceedings of an Intercolonial Conference held at Sydney in January last.

2. This Conference dealt with certain matters relating to the High Commission, and agreed to certain resolutions.

3. With the second of these, "That more effectual means should be devised for the punishment of natives of the said islands for any crimes or offences committed by them against British subjects," I most cordially concur, as it is a matter which both your Excellency and myself have urged upon the attention of the Imperial Government almost since the initiation of the High Commissioner's Court.

4. The third resolution is to the effect, "That in the case of capital convictions by the High Commissioner's Court, appeal should be allowed to the Supreme Court of some one of the Australian Colonies, to be selected by the High Commissioner."

5. As this resolution necessarily affects most the Judicial Commissioners, I venture to offer the following observations upon it.

6. Any Judge who has to try a capital case would, I imagine, be only too glad to be relieved of some share of the dread responsibility of a sentence of death.

7. Especially must this feeling animate a Judge who is obliged, by the law he administers, and by the necessities of the case, to be the judge both of the facts and the law.

8. The Supreme Courts of the sister Colonies have been, and are, presided over by singularly able men, of whose personal fitness to discharge any professional duties of however high or arduous a nature

not

not a question can be raised. I have seldom read a better judgment than that given lately by the Chief Justice of New South Wales, in which he vindicated the right and duty of the Supreme Courts of Justice to keep themselves free and unfettered in the performance of their high functions, by punishing for contempt those who impugn the motives and malign the characters of the Judges.

9. But the peculiarity of the High Commissioner's Court—that the Judicial Commissioner in a capital case must necessarily be judge both of the facts and the law, with only the assistance of assessors in regard to the former—would, I apprehend, be an insuperable barrier to any such appeal as is proposed.

10. The Supreme Courts of all the Australian Colonies administer the law of England without the modifications of law and procedure necessary in the region of the Western Pacific, which have been imposed by Order in Council. A trial for murder, without a Jury, would be alien to their system of jurisprudence, and to enable them on appeal to find a murderer guilty without such trial they must have additional powers. But to give such powers by Order in Council would not be palatable, or probably possible, in a constitutional Colony; and the delegates know best whether there would be any chance of passing such a Bill through their respective Legislatures.

11. Moreover, unless we are to shut the door of justice on the whole native race of the Pacific, as against evil-doers amongst Her Majesty's subjects, and undo the good work which the High Commissioner's Court has already done, we must, and do, under the powers of the Orders in Council, receive evidence on affirmation of those who are either not Christians, or only nominally Christians, and do not understand the nature of an oath in the technical sense of the English law, weighing such evidence to the best of our ability in the equal scales of justice. But this also would be repugnant to the procedure of some if not all of the Supreme Courts of Australia.

12. An appeal accordingly from the High Commissioner's Court to such a tribunal would be from a Court which in these particulars administers justice from a higher standpoint, to one which does not, and cannot with its present or any powers which it is likely to obtain for the purpose, administer justice on the same principles.

13. Another difficulty I foresee relates to the execution of the judgment. The person accused of murder, if taken to Australia for judgment, ought, if the judgment be confirmed, to be executed there. I have noted how in one Colony the fate of a notorious murderer and bushranger excited sympathy; in another, the keen and clamorous interest created by sentences of death. I can well imagine the public outcry if a colonist were condemned to death, without the intervention of a Jury, for murdering a Polynesian in a far-off island, and how an attempt would be made to force the hand of the Governor and his Council (who, as it was not a colonial crime, would have no constitutional right whatever to interfere) to prevent the execution on their own soil.

14. The proposal of the delegates bristles with difficulties. It is by Imperial Courts, and Imperial Courts alone, that justice can be properly administered in the Western Pacific, and any appeal, where such is necessary, must be to Courts dealing with evidence on similar principles, and accustomed to trials with assessors even in capital cases.

15. So much for the proposal itself; but I have something also to say upon the reason for such a proposal being made at this particular time.

16. Only one capital case has been tried in the High Commissioner's Court since its institution—that of a half-caste Australian, tried and condemned at Rotumah for the murder of a native of Rotumah before its annexation to this Colony. In this case the sentence of death was commuted by your Excellency to twenty-one years' penal servitude.

17. No white man has yet been tried for a capital offence in the Western Pacific; and, if the baser sort are not incited by the attacks of slanderers on the Court, and the encouragement given to them in quarters where we might have expected better things, I sincerely trust that the wholesome respect for law inspired by the existence of the High Commissioner's Court after only five or six important trials (followed by no severe punishments), will be sufficient to prevent any murder by British citizens in the Pacific.

18. As there seems to be no other cause for this particular resolution at this particular time, it has occurred to me as possible that the delegates have been influenced by the libels which they reprint and have appended to their report.

If so, then the proposal would not merely be one to insure a better administration of justice, but is a little disguised impeachment of the High Commissioner's Court itself.

19. Your Excellency will recollect that "The Vagabond," who signs some of these productions, and appears to have inspired the remainder, is the person who was last year brought down to Fiji for a few weeks, and, without knowing anything of the Colony or the affairs of its Government, or the administration of justice in it, sought notoriety by assailing your Excellency and myself in a public lecture, with abuse so foul and violent that even the local journals most hostile to the Government shrank from reproducing it in what purported to be a report of the proceedings.

20. The respectable part of the audience rose and left the hall, and he was thereafter shunned even by most of those who had taken him by the hand when he first came. He left the Colony baffled and most bitter, and to that bitterness, born of his failure to stir up sedition here, he has given abundant vent through the Australian papers.

21. No doubt the writer saw many things in this Colony which could not but shock a person of his views.

22. He saw that no means were taken to encourage or cajole the natives to strip themselves of the possessions solemnly guaranteed to them by the Queen, and that the maxim that (as he puts it) "the land is for the white man" was not one accepted by the Government of the Colony. He saw Her Majesty's Fijian subjects a well-ordered society; he saw their rights and property respected; he saw them contented and peaceful and industrious, with a fair prospect of rising with the rising prosperity of the colony—a prosperity which the contentment of the natives insures, and which their discontent would imperil or destroy. He saw an absence of all those costly precautions which elsewhere mutual distrust has rendered needful, and of that sullen ill-will which a sense of injustice has too often elsewhere engendered.

23. For offences such as these we are not likely to be forgiven by this man or others of his sort; but I think we are entitled to ask why the delegates should have received, and, without inquiry as to their truth, reprinted, his outpourings of bombast and falsehood.

24. It is a maxim with public men at Home that they do not take any serious step in grave concerns without having well-ascertained facts upon which to stand. Here we have a resolution of a meeting of colonial delegates supported apparently by nothing better than anonymous libels, or the random charges of an alien adventurer !

25. I must enter my protest against the character and good name of Judges, who have grown grey in Her Majesty's Service, and who fill positions such as those which for many years I have had the honor to hold, being thus trifled with, either by colonial delegates or by any other body of men. The delegates are now more responsible for the libels than even the author himself. As his, they would rapidly, and before this time, have sunk into oblivion ; accepted and recirculated by the delegates, they may live some little time longer,—not, however, to my hurt, but to the shame of those who have reproduced them.

I have, &c.,  
**JOHN GORRIE,**  
Chief Judicial Commissioner for the Western Pacific.

MINUTES OF PROCEEDINGS

OF THE

INTERCOLONIAL METEOROLOGICAL CONFERENCE

HELD AT MELBOURNE

ON THE

21ST, 22ND, 25TH, 26TH, AND 27TH OF APRIL, 1881.

---

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,  
*27 September, 1881.*

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1881.

# MINUTES OF PROCEEDINGS

## OF THE INTERCOLONIAL METEOROLOGICAL CONFERENCE HELD AT THE OBSERVATORY, MELBOURNE.

THURSDAY, 21st APRIL, 1881.

*Present :*

JAMES HECTOR, Esq., M.D., C.M.G., F.R.S., Inspector of Meteorological Stations, New Zealand.

C. TODD, Esq., C.M.G., F.R.A.S., Government Astronomer, South Australia.

R. L. J. ELLERY, Esq., F.R.S., F.R.A.S., Government Astronomer, Victoria.

H. C. RUSSELL, Esq., B.A., F.R.A.S., Government Astronomer, New South Wales.

R. L. J. Ellery, Esq., was called to the Chair.

The Conference commenced at 2.30 p.m.

1. The Chairman stated that in accordance with the understanding between the members at the close of the Conference held at Sydney in November, 1879, that it was desirable to hold a second Conference in Melbourne, early in 1881, he had addressed the following letter to the Hon. the Chief Secretary of Victoria :—

C. 3.

81

Sir,

Observatory, Melbourne, March 17th, 1881.

In November, 1879, the New South Wales Government invited the different colonial meteorologists to meet in Sydney and hold a Conference with a view of bringing about a more satisfactory intercolonial weather telegram system, and to decide upon the best means of improving our knowledge of Australian Meteorology generally. This Conference was held, and among other matters it was decided, if possible, to hold a similar Conference in Melbourne about twelve months later for a similar purpose. I now find that the gentlemen representing this science in New Zealand, New South Wales, and South Australia will be able to attend in Melbourne about the middle of April. I have now the honor therefore to enquire if you approve of such a Conference being held here, and if so whether you will cause an invitation to be sent to the Governments of New South Wales, South Australia, and New Zealand, asking that their respective astronomers or chief meteorologists may be authorized to attend such a Conference about the second or third week in April. I would also respectfully suggest that the Governments of Tasmania, Western Australia, and Queensland be invited to send representatives.

I have the honor to be, Sir,  
Your most obedient servant,  
ROB. L. J. ELLERY,  
Government Astronomer.

The Honorable the Chief Secretary, Melbourne.

The Minister approved of the proposal to hold a Conference, and at once invited the various colonies to send representatives. Replies from New South Wales, South Australia, and New Zealand agreeing to do so were received. Telegrams were also received from Queensland and Western Australia to the effect that those colonies were unable to send representatives. The following message from the Government of Tasmania was also received :—

*“To Chief Secretary, Victoria.*

“We have no such officer as the one mentioned in your telegram. This Government cannot send delegates to proposed Conference, but concurs generally in objects sought to be obtained, and if Conference is held will communicate their views to the Chairman by letter or memorandum.

2/4/81.

WM. MOORE.”

The only Colonies, therefore, represented at this Conference are New South Wales, South Australia, New Zealand, and Victoria. The Chairman also stated that the Government had placed the services of a shorthand-writer at the disposal of the Conference.

It was then resolved that the Government be thanked for their consent to grant the services of a shorthand-writer.

2. The Chairman reported that the following resolutions were adopted by the Conference held at Sydney in November, 1879 :—

- I. That, in view of the great importance which a better knowledge of the movement and origin of strong gales and storms on our coast lines and neighbouring seas is to the shipping and commercial interest generally, it is desirable to secure, as far as possible, co-operation in all the Australasian Colonies for the investigation of storms, as well as for agricultural and general climatological purposes.
- II. That, with the view of giving effect to the foregoing resolution, similar observations and the same form of publication should, as far as possible, be adopted throughout the colonies.
- III. That, in order effectively to carry out the objects of the Conference as affirmed in the foregoing resolutions, it is desirable to establish first-class meteorological stations in certain well-selected positions in the several Australasian Colonies, including New Zealand, in addition to those existing.

IV.

IV. That the definition of the work of a first-class station, given in the preface to the New Zealand Meteorological Report for 1873, be adopted, viz. :—

“The observations taken are limited to those for determining atmospheric pressure, maximum and minimum daily temperature of atmosphere, and of insolation and radiation, the average daily amount of moisture, the rainfall and number of rainy days, the force and direction of wind, and amount and character of cloud.”

V. That the instruments at each first-class station consist of a mercurial barometer, of either the standard or Board of Trade form; thermometers of new or approved patterns compared with standards as frequently as possible; rain-gauges of 8 inches collecting diameter; and wind-gauges of any approved form. The local hours of observation to be 9 a.m., 3 p.m., and 9 p.m. Beaufort's scale of wind to be adopted. The observations to be recorded in equivalents and pressure.

VI. That it is very desirable to obtain the co-operation of the Government of Tasmania, and to persuade them to establish a station at the public expense at Hobart Town.

VII. That it is desirable to secure the co-operation of the Governments of Western Australia, New Zealand, and Tasmania in the system of weather telegrams, which now embraces the colonies of South Australia, Victoria, New South Wales, and Queensland.

VIII. That, in the opinion of this Conference, it is desirable that weather telegrams and forecasts shall, in all cases, depend upon the observations used for general meteorological and climatological statistics, and be under the direction of the head of the meteorological department in each colony.

IX. That this Conference, having been informed that the Eastern Extension Telegraph Company will charge half rates for the transmission of weather reports through the cable connecting Australia and Tasmania, and probably also the cable to New Zealand, recommend that the cost of such reports be defrayed by the participating colonies in equal proportions; and that, in the opinion of this Conference, such cost need not exceed in the aggregate £350 per annum.

X. That, in the opinion of the Conference, this expenditure is justified by the extreme importance to the shipping interest of early information of the approach of dangerous easterly and westerly gales.

XI. That the several Governments be requested to cause precedence to be given to the regular weather telegrams and special storm reports.

XII. That, in the opinion of this Conference, there should be established in each of the colonies, upon a high mountain peak, a meteorological observatory for the special study of winds and other meteorological phenomena; and that the most desirable positions for them would be the following :—

South Australia	...	...	Mount Lofty...	...	About 2,500 feet above sea-level.
New South Wales	...	...	Kiandra	...	4,600 " "
New Zealand	...	...	Tauhara Taupo	...	4,600 " "
Ditto	...	...	Mount Herbert	...	4,000 " "
Tasmania	...	...	Mount Wellington	...	4,000 " "
Victoria	...	...	Mount Macedon	...	3,500 " "

XIII. That the revision of the present telegraph weather code be referred to Messrs. Russell and Ellery, with a view to its simplification and extension.

XIV. That the interchange of weather statistics, in carrying out the suggestions of this Conference between the different Australasian stations, should be in the form of a diagram; and that this should not interfere with the printing of statistics by the different colonies in any way they like.

XV. (1.) That the monthly graphic records for interchange consist of curves, showing barometer, velocity and direction of wind, temperature, humidity, rainfall, with remarks upon weather, especially with reference to storms and atmospheric disturbances, and that specific forms be prepared and distributed to the co-operating colonies.

(2.) That the mean humidity curve be derived from the means of maximum and minimum of wet and dry bulb thermometers.

(3.) The barometer curve to be constructed from barographic records, so as to depict the turning points.

(4.) The temperature curve to represent maximum and minimum and mean for each day.

(5.) The velocity and direction of the wind to be deduced from the anemometer.

XVI. That in the transmission of telegrams the reports be generalized from the local weather reports.

For New Zealand the following subdivision into districts is recommended for convenience of reporting :—

A	...	N.E. aspect	...	North Cape to East Cape.
B	...	N.W. aspect	...	Cape Maria to West Cape (exclusive of Cook Straits).
C	...	S. aspect	...	West Cape to Moeraki.
D	...	S.E. aspect	...	Moeraki to East Cape (exclusive of Cook Straits).
E	...	Cook Straits	...	Comprising Wanganui, Wellington, Cape Campbell, and Cape Farewell, Nelson.

A code to be framed to express the weather in each of the above aspects in general terms, according to the judgment of the reporter, thus :—

Aspect.	Wind and Weather.	Rain.	Sea.
---------	-------------------	-------	------

No remark to indicate absence of phenomena.

XVII.

XVII. That the telegrams furnished to Melbourne by Tasmania should conform with those between the Australian Colonies.

XVIII. (1). That weather telegrams from the Australian Colonies shall comprise :—

1. Barometer reduced to 32° and sea-level,
2. Dry bulb,
3. Humidity,
4. Maximum and minimum,
5. Direction and velocity of wind,
6. State of weather,
7. Rainfall,
8. Sea disturbances,

with a synoptical report of the weather generally.

(2). And that within New Zealand the same system should be adopted.

XIX. That the extreme importance of the weather system proposed be strongly urged upon the Queensland Government with a view to obtain their more active co-operation.

XX. That Australia be divided into six meteorological areas for transmission of reports to New Zealand, viz., Western Australia, South Australia, Victoria, New South Wales, and Queensland; South Australia being divided into two districts, tropical and extra-tropical.

XXI. That weather telegrams be written on paper of a special colour, so as to be readily distinguishable in the offices.

XXII. That the solar radiation thermometers should be blackened bulb thermometers in vacuo, and should be exposed on an open space at an elevation of 4 feet 6 inches from the surface of the ground, supported by a post carrying two light arms.

XXIII. That radiation thermometers be placed over grass.

XXIV. That the following subjects for experiment be referred to each member of the Conference for future consideration and report :—

1. Shade temperature.
2. Swinging thermometer and thermometer sheds in use.
3. Standards to be swung with 2 feet 6 inches string during sunshine and after sunset.
4. Observations to determine the difference in humidity, by self-registering maximum and minimum thermometers, and by other methods.
5. The best method of measuring the velocity and pressure of wind.
6. Whether any better method than black bulb thermometers can be devised for measuring the direct effect of the sun.
7. As to the best method of determining spontaneous evaporation.

XXV. That as investigation of the Newcastle tide-gauges has shown that such instruments give valuable indications of distant earthquakes, gales, and sea-disturbances, it is desirable, in the opinion of the Conference, that self-registering tide-gauges be established in as many convenient places as possible on the coast, in connection with the Meteorological Department of the different Colonies.

XXVI. That the foregoing minutes be adopted as the Report of this Conference on the various matters referred to it, and that the Chairman be requested to report to the Government of New South Wales.

#### REPORTS.

3. Resolved :—XXVII. That, as a preliminary proceeding, each member should report the action taken in the Colony represented by him with regard to the recommendations of the last Conference.

#### *Report by Dr. Hector.*

4. Dr. Hector accordingly reported as follows :—With regard to Resolution II. : The forms for the publication of meteorological statistics have been altered so as to meet the views adopted at the last Conference. The forms now used by first, second, and third-class stations respectively now submitted.

5. Under Resolution III. : Changes in the department have led to a reduction of the first-class stations from eighteen to three, which he thought to be quite a sufficient number to afford all the data required for complete meteorological statistics, especially as it is contemplated to furnish these stations with complete sets of continuous self-recording apparatus. The number of second-class stations has, however, been largely increased, and their equipment very much improved.

6. Under Resolution VII. : The New Zealand Government are favourably disposed in regard to the co-operation requested, and to provide the means suggested by the Conference, but the matter has not yet been brought before Parliament, the proposition being considered somewhat indefinite.

7. Under Resolution VIII. : Correspondence was read and handed in relative to the changes that had been made in the relations of the Meteorological and Weather Departments of New Zealand, partly in accordance with the recommendation of the Conference, and partly on account of certain changes in the direction of retrenchment. Since 1874 there has been a Weather Signal Department under the charge of Captain Edwin, quite distinct from the Meteorological Department, which furnished the statistics. The papers handed in by Dr. Hector, and marked "A," showed that he had recommended the reference to Captain Edwin of the Report made by the Sydney Conference, for report—(1.) As to how far the suggestions could be given effect to by his department. (2.) As to preventing duplication of observations by combining the work of the two departments. And (3.) As to preserving the reports on which the weather signals are founded, in order that the conclusions may be reviewed in the future. In Captain Edwin's reply, he drew attention to the expense involved in sending the daily synoptical report; to certain phenomena, indicating that, in his opinion, the meteorological connection between Australia and New Zealand is not so close as might be reasonably supposed; to the probability that information from Queensland would be more useful to New Zealand than that from the other colonies; to Mount Peel as a site for a mountain station, and to the doubt whether the results from only one such station would be worth the expense; and to the desirableness of

of assimilating the system of registration to that used in the United Kingdom ; he stated his preference for a direct statement (in weather warnings sent to New Zealand) of the position and route of any storm centre affecting that country, with an example ; he considered that certain suggestions in regard to telegraphic messages were not necessary ; that, while high tides are now predicted in New Zealand, additional information would improve these warnings, and that tide-gauges would collect valuable data. Attached to this paper were notes thereon by Mr. Ellery and Mr. Russell. Mr. Ellery remarked that the cost of telegrams would be but a trivial sum to each colony, say £90 or £100, and would be reduced by the joining of other colonies ; that the weather telegrams should not be complicated by any deductions regarding a single locality, though early intimation of any great disturbance, if added to the ordinary telegram from the colony where it originated, would be very valuable. The suggestions as to telegraphic messages, considered by Captain Edwin unnecessary, would secure promptitude in telegraph offices. The tide-gauges were not for prediction purposes, but to furnish knowledge concerning abnormal tides, or disturbances of normal ones. Mr. Russell expressed in his remarks the same view as Mr. Ellery did concerning the expense of telegrams ; observed that the Conference, having unanimously resolved in favour of cablegrams between Australia and New Zealand, it was very desirable to test the proposition ; remarked that it was proposed to send information from Queensland ; and pointed out that the messages proposed by the Conference were merely statements of existing conditions, unburdened by any theoretical matter which might not be correct, though it might, if of great importance, be appended as a remark, as it sometimes now is, in the cypher telegrams exchanged by Australian Colonies.

8. Dr. Hector then handed in certain papers on the subject of amalgamating and reorganizing the Weather Forecast and Meteorological Departments of New Zealand. The correspondence showed that on the 5th of April, 1880, Dr. Hector addressed to the Honorable the Colonial Secretary a letter pointing out that a saving might be effected, and drawing attention to the fact that in 1867 and on several occasions since he had suggested a complete reorganization of the department with a view to a better application of the vote, though nothing had been done. This letter enclosed extracts—(1.) From a memorandum dated the 12th of June, 1867 ; and (2.) From a letter to the Honorable the Colonial Secretary, dated the 23rd of September, 1874, both signed by Dr. Hector. In the former it was proposed to establish four principal stations where the daily periodic elements would be determined by frequent direct observations, and twenty second-class stations at which daily records should be taken of the indications of self-registering instruments. These could be maintained for £600 per annum, and would be quite sufficient for scientific purposes. The new arrangements were proposed to be brought into operation on the 1st of January, 1868. In the latter Dr. Hector recommended the reduction of the number of first-class meteorological stations to three, and the placing of the other stations under the Weather Signal Department. He advised that self-registering instruments should be procured ; that no break in the continuity of the observations should be allowed to occur ; and that the changes should be deferred to the end of 1875. In reply to the letter dated 5th April, 1880, and its enclosures, Captain Edwin sent a memorandum, dated 11th September, 1880, wherein he set forth the impossibility of maintaining efficient weather forecasts with a reduced expenditure, the necessity for an assistant in that branch of the service, the impossibility that one person could discharge efficiently the duties of both departments, and several facts which, in his opinion, made the duties of a meteorological observer incompatible with those of an observer for the Forecast Department. Captain Edwin laid stress on the difference which he conceived to separate meteorology from weather forecast, remarking that the former required trained observers, exact registration, and laborious calculation, in order to obtain results which it was hoped would prove valuable in the future for the prediction of seasons and climatic changes though they had not yet been found reliable for those purposes even where (as in Great Britain) observations, had been made carefully for over fifty years ; while the latter, requiring no special training of observers, demanded of the forecasting officer skill and despatch, while it gave daily value for the daily expenditure.

9. In order to explain to the Conference the method on which Captain Edwin conducted the Signal Department, Dr. Hector laid before the Conference a copy of Captain Edwin's paper communicated to the New Zealand Institute on the Principles of Weather Forecast in New Zealand, with a sheet showing the succession of weather as recorded in that colony, plotted on his principle for a period of six months from January to June, 1880. He explained that Captain Edwin's method was in the main the same as that adopted by the Meteorological Council of Great Britain, although it involved the acceptance of certain hypotheses which are not yet generally received. Since the beginning of the year, the Weather Signal Department having been placed under the charge of Dr. Hector, as Meteorological Director, the method of observing, recording, and reporting has been modified so as to agree with the wishes of the Conference.

10. Thirty-seven reporting stations are now fitted with complete instruments, and supply information at 9 a.m. of every day as to the wind, pressure, temperature, humidity, and general weather. These telegrams are grouped according to the aspects decided on by the Conference, viz. : (A) north-east ; (B) north-west ; (C) southern ; (D) south-eastern ; and (E) Cook's Straits. From the data thus obtained and from telegrams when found necessary, an isobaric map is constructed each day, and a general report for each of the above aspects is prepared, below which the forecast for each aspect is written in such a way as, if correct, would agree with the report for the following day, and warnings are issued when necessary to any part of the coast where dangerous winds are apprehended. The data thus obtained will be used as second-class station returns for statistical purposes.

11. Dr. Hector submitted these isobaric maps and the data upon which they were founded for the months of February and March, during which the new system was in operation, and stated as the result of his experience that it afforded the most satisfactory method of tracing and recording the changes of weather, and distinguishing the characteristics of a season.

12. The correspondence had resulted in arrangements for the future, whereby one or all of the three first-class stations should be gradually so improved as to approximate in their equipment to that of the central or observatory stations in Australia, while, in addition to the thirty-seven second-class stations, a large number of third-class or rainfall stations are being established. These last will be kept by lighthouse-keepers (where not in telegraphic communication), by pilots, by harbourmasters, and by other Government officers, and by amateurs. At these stations temperature, rain, wind, and weather observations are made.

13. Valuable meteorological observations are received from Fiji, and were published in Dr. Hector's last report for the years 1877, 1878, and 1879. An additional first-class station has been established at the Chatham Islands, and has been in operation since January, 1879. The results for that year having been published

published in the report just mentioned, a copy thereof was laid upon the table, and attention was drawn to the fact that it contained daily readings for the three stations at Auckland, Wellington, and Dunedin for pressure, wind, and rainfall for a period of three years, accompanied by curves which showed a very remarkable agreement of the atmospheric disturbances throughout that range of latitude, which is equal to a distance of 800 miles. Dr. Hector also submitted the daily observations for 1880, made at the Wellington Station, and the monthly abstracts from all stations for the same year.

14. Under Resolution IX. : It was reported that the Government of New Zealand had agreed to bear, for the present, the cost of any necessary cablegrams, but desired before bringing the matter before Parliament, that the Conference should express more clearly what they consider to be the particular value of those cablegrams, and what their probable cost, and what arrangements in regard to payment are suggested to give effect to the recommendation.

15. Under Resolution XI. : All weather warnings and the reports from stations are forwarded with the greatest celerity, and no difficulty is experienced in New Zealand from delay of weather telegrams, a result largely due to the interest which the Superintendent of Telegraphs, Dr. Lemon, takes in the subject.

16. Under Resolution XII. : No steps have been taken to get a high-level station; the establishment is not at present able to cope with this work, and it is doubtful whether, for some time to come, a vote can be got to make it so. Observations are, however, taken at Taupo, at an altitude of 1,200 feet, in the centre of the North Island, and Bealey (2,140 feet), in the centre of the South Island.

17. Under Resolution XIII. : The present agreement with Mr. Russell is, that cablegrams shall be sent only for any remarkable phases of weather in New Zealand, and that they shall indicate excessive pressure or abnormal differences in pressure within the New Zealand area.

18. Under Resolution XIV. : A form of diagram was submitted, in which the meteorological statistics have for some years been displayed at the Wellington Station, and in which they are to be communicated to Sydney, from the beginning of the present year, from Auckland, Wellington, and Dunedin.

19. Under Resolution XVI. : The classification and grouping of the weather reports has been strictly adapted to this recommendation, but, in practice, the arrangement is not found to be the most convenient, so that the definition of the aspects may probably be revised with advantage.

20. Under Resolution XVIII. : The requirements of this resolution have been met, with respect to New Zealand, and a synoptical report of the weather generally for the colony is published in the evening papers each day.

21. Under Resolution XXV. : Several tide-gauges have been procured, but at present they are utilized for the local requirements of harbour boards, and are not yet available for general investigations such as are contemplated by the Conference.

22. It was arranged that data should be obtained from Sydney, Adelaide, New Zealand, and Melbourne, for the months of January, February, and March, with a view of testing the applicability to Australia of the system of weather forecasts adopted in the northern hemisphere.

*The Conference adjourned to to-morrow at 10 o'clock a.m.*

ROB. L. J. ELLERY.  
25/4/81.

FRIDAY, 22ND APRIL, 1881.

*Present :*

Mr. ELLERY, in the Chair.

Dr. Hector, | Mr. Russell,  
Mr. Todd.

The Conference met at the Observatory at 10 o'clock a.m.

23. Resolved :—XXVIII. That the paragraphs of the Report shall be numbered with consecutive Arabic numerals.

24. Resolved :—XXIX. That the resolutions and important points shall be numbered consecutively with Roman numerals.

*Report by Mr. Russell.*

25. Mr. Russell reported, in accordance with Resolution XXVII., as follows :—Under Resolution II. : Had extended the range of the weather map by taking in new stations established in agreement with report; had published daily a barometer curve including all the coast stations, as this was a method which appeared to convey to the public better than could be done by figures the passage of barometric depressions. He desired to call the attention of the members of the Conference to the fact that this curve pointed to the insufficiency of the present telegrams because they did not give turning points of the barometer; hence some depressions appeared to pass from Eucla in two days, and others in one day. This, no doubt, was owing to the fact that the 9 a.m. observations were taken to represent the turning points. He submitted copies of the weather map printed daily at Sydney and distributed gratis.

26. Under Resolution III. : Additional stations (first-class) have been established at Kiandra, Menindie, Hay, and Wollongong, making altogether twenty-nine in New South Wales, *see list in Appendix No. 1*; besides these reports were received from 9 first-class private stations, from 72 thermometer and rain stations, and from 100 rain stations, making the total 210 stations.

27. Under Resolution VII. : Had been unable to secure active co-operation from the Government of Queensland in the weather system.

28. Under Resolution VIII. : Had continued to make the same observations serve for weather signal purposes and statistics.

29. Under Resolution IX. : Submitted a letter from the Superintendent of the New Zealand Cable showing the liberal rates at which the Eastern Extension Telegraph Company are prepared to transmit weather

weather telegrams. He was authorized to say that the Government of New South Wales would share the cost of the proposed weather cablegrams to the extent of £75 per annum, which was probably more than would be required.

30. Under Resolution XII. : A mountain station has been established on Kiandra, 4,600 feet above sea.

31. Under Resolution XVIII. : Had regularly sent, but had not received synoptical reports.

32. Under Resolutions XXII. and XXIII. : These resolutions had been conformed to.

33. Mr. Ellery, referring to the letter read by Mr. Russell (cf. par. 29), remarked that in 1877 he received a letter from the Superintendent of the Tasmanian cable stating that cable messages from Tasmania would be transmitted at half the ordinary rate, inclusive of the address and signature. In 1880 he had asked that this concession might be extended, and had received a reply to the effect that if more than one message was required each way daily an endeavour would be made to induce the directors to extend the concession to a second message.

*Report by Mr. Todd.*

34. Mr. Todd, in accordance with Resolution XXVII., reported as follows:—Under Resolution I. : That he would hereafter lay before the Conference the form of weather bulletin posted at the Adelaide Telegraph Office, at the Exchange, and at Port Adelaide.

35. Under Resolution II. : That nothing had been done, since the Sydney Conference had not arrived at any decision as to the form to be adopted, leaving it open to each director to publish the results of his own observations for his own purposes in his own way. A copy of the observations for January, 1879, was put in, to show the form in which the observations for South Australia had been published; also a copy of the weather map taking in the whole of Australia and New Zealand upon which it is proposed to lay down isobars.

36. Under Resolution III. : That as the outcome of the last Conference, a vote has been obtained from Parliament for providing the Observatory at Adelaide with self-recording instruments, namely, a barograph, thermograph, anemometer, and ombrograph. Had deferred ordering the anemometer, knowing that Mr. Ellery was making one on an improved principle; and it was probable that a similar instrument would be adopted at the Adelaide Observatory.

37. Under Resolution IV. : That the following are the first-class stations (as defined at the Sydney Conference) in South Australia:—Adelaide, Cape Northumberland, Cape Borda, Alice Springs, Port Darwin, Eucla, Mount Gambia, Robe, Strathalbyn, and Kapunda. Barometer stations have been established at Streaky Bay, Port Augusta, and Daly Waters. There are thermometer stations at Goolwa, Mount Barker, and Clare. At Cape Northumberland, Cape Borda, Alice Springs, and Port Darwin, observations are taken every three hours, day and night. At the other stations observations are taken generally at 9 a.m., 3 p.m., and 9 p.m.; but at some of them at 9 a.m., 12, 3 p.m., 6 p.m., and 9 p.m. It is intended to establish additional barometrical stations, and to make them first-class stations. The proposed first-class stations are Streaky Bay, Port Augusta, Farina, and The Peak. In addition to the stations named, there are nearly 200 rainfall stations throughout South Australia.

38. Under Resolution V. : That barometers of Fortin's construction are used, not the Board of Trade form.

39. Under Resolution VII. : That it had been left to him to secure the co-operation of Western Australia, which he had accomplished by the kind courtesy of the Honorable Mr. Fraser, Surveyor General. That recently observations had been made at 7.30 a.m., in order that the report might reach the eastern colonies early enough to be included in their daily reports.

40. Under Resolution IX. : That he was able to say that the South Australian Government would bear its share of the expense of the cable weather telegrams.

41. Under Resolution XI. : That in the South Australian Telegraph Department precedence is given to all weather telegrams before everything else, but that the same rule did not appear to apply to the other Australian colonies.

42. Under Resolution XII. : That no action had been taken, but desired to mention, *en passant*, that Alice Springs station is at an elevation of 2,100 feet above sea-level.

43. Under Resolution XVIII. : That the daily weather telegrams are not precisely consistent with the resolution, the Sydney Observatory, for instance, sending the humidity, whilst from Melbourne were sent the readings of the wet and dry bulb thermometers. The synoptic reports are not regularly received.

44. Under Resolution XX. : That South Australia has been divided in the tropical and extra-tropical districts, the stations in the tropics being Port Darwin, Daly Waters, Powell's Creek, Tennent's Creek, and Alice Springs.

45. Under Resolutions XXII. and XXIII. : That the resolutions are strictly carried out.

46. Under Resolution XXIV. : That experiments with swinging thermometers had been carried out, the results of which would be presented to this Conference at a future meeting.

47. Under Resolution XXV. : That he had not yet succeeded in getting records of self-registering tide-gauges.

48. That the meteorological statistics had always been in his hands.

*Report by Mr. Ellery.*

49. Mr. Ellery, in accordance with Resolution XXVII., reported as follows:—Under Resolution II. : That he had not changed the mode of publication for the reason that nothing had been definitely decided on by the Sydney Conference.

50. Under Resolution III. : That there are now in Victoria the following first-class stations, viz., Melbourne, Portland, Cape Otway, Wilson's Promontory, Gabo Island, Sandhurst, Ballarat, and Echuca. That Mount Macedon and Omeo are about being made first-class stations. Echuca is the only first-class station established since the last Conference, any extension of the system during that time, besides the alterations mentioned, being confined to third-class stations.

51. Under Resolution VII. : That soon after the last Conference he had requested the Victorian Government to place him in communication with the Tasmanian Government in order to secure their co-operation

co-operation in the scheme. Through some misunderstanding the application was not made to Tasmania, but he had subsequently taken the best steps open to him to induce the Tasmanian authorities to join in the Australian scheme. The Government had been again directly invited to send a delegate to the Conference, but in the telegram produced they stated that they could not send one, although they concurred in the objects sought to be attained by the Conference, and promised to communicate with the Chairman by letter or memorandum. The Honorable the Chief Secretary of Victoria had been requested to convey to them the information that the Conference would commence its sittings on the 21st instant, and would be very glad to hear from them. He had no doubt that the co-operation of Tasmania would in a very short time be secured.

52. Under Resolutions IX. and X. : That the Victorian Government had consented to exchange weather telegrams, and had placed upon the Estimates for the current year a sum of £90 to meet Victoria's share of the cost. They had been prepared ever since last June to bear this expense.

53. Under Resolution XI. : That, after the last Conference, a copy of the report was sent to the Government, attention being drawn to this paragraph, with a request that precedence and promptitude be accorded to weather telegrams. A perceptible improvement had taken place since then, but he was still of opinion that further improvement in promptitude might be made if the Conference pressed the matter.

54. Under Resolution XII. : That last week a large obelisk station had been completed upon the extreme south-west point of Mount Macedon, at an altitude of 3,500 feet, for the erection of a self-registering anemograph, which would be in charge of an observer who, about 100 feet lower, has a barometer, thermometers, and all the appliances of a first-class station. This would be worked as a first-class station in about a month, with a continuous registration of the direction of the wind. The form of anemometer to be used will be a direction-vane with pressure-plate.

55. Under Resolution XIII. : That Mr. Russell, subsequent to the last Conference, communicated to Mr. Ellery some proposed improvements in or additions to the code, but the matter had not yet been discussed.

56. Under Resolution XIV. and XV. : That nothing had been done in Victoria.

57. Under Resolution XVIII. : That the recommendation as to weather telegrams was carried out in the telegrams from this station to the other colonies, except that the readings of dry and wet bulbs were sent instead of the dry bulb and humidity. No synoptical report is sent from this station to other colonies, and none is received. A long time ago two or three came, and then they ceased.

58. Under Resolution XXI. : That nothing has been done in this colony in regard to the use of a coloured paper for weather telegrams.

59. Under Resolution XXII. : That the recommendation has been carried out.

60. Under Resolution XXIV. : That he will hereafter report on Nos. 1, 2, 3, 5, and 6.

61. Under Resolution XXV. : That enquiries had been made as to the best spot in which to place a tide-gauge on the south coast of Australia. That Gabo Island had been recommended as the best position on the south-east coast, and Portland as another site. It was desired to have Wilson's Promontory made a station, but there was no place for it. He hoped to get one or two of these tide-gauges erected in the course of the next eight or nine months.

#### *Definition of First-class Station.*

62. Resolved, on the motion of Mr. Russell, XXX. : That, instead of the definition in Resolution IV., the Congress adopt the definition of the stations given at the Vienna Congress, and contained in the introduction to the Instructions for the use of Meteorological Instruments.

*The Conference adjourned to Monday next, the 25th April, at 10 o'clock a.m.*

ROB. L. J. ELLERY.  
25/4/81.

MONDAY, 25th APRIL, 1881.

*Present :*

Mr. ELLERY, in the Chair.

Dr. Hector, | Mr. Russell,  
Mr. Todd.

The Conference met at the Observatory at 10 o'clock a.m.

The minutes of the meetings held on Thursday and Friday last were read and confirmed.

65. Mr. Todd laid before the Conference the following suggestions to be discussed hereafter, viz. :—

(a.) That, with a view to the observations being referred to one uniform standard, a complete set of standard instruments be purchased for circulation between the four chief stations, viz., Melbourne, Sydney, Wellington, and Adelaide—the cost to be divided between the four colonies represented at this Conference. The instruments to comprise barometer, thermometer, max solar thermometer, anemometer, and rain-gauge.

(b.) All readings of the several instruments to be reduced to the readings of the standards.

(c.) That although absolute uniformity in the form of publication of meteorological statistics is not considered essential, whatever form is adopted should give—

a. Barometer reduced to 32° and sea-level, at least at one of the hours agreed upon at the last Conference (9 a.m., 3 p.m., 9 p.m.), and the principal turning points, also reduced, with the times or their occurrence.

B—

β.

- $\beta$ . The temp. of the air at the same hour or hours, also max. and min. The max. should be read at 9 p.m., and the min. at 9 a.m.
- $\gamma$ . Wet bulb ther. readings at the same hour or hours, or humidity.
- $\delta$ . Amount and character of cloud, and upper current of cirri, or high cloud.
- $\epsilon$ . Direction and force of wind.
- $\zeta$ . Rain during previous twenty-four hours, recorded at 9 a.m. It would be better to read the gauge at 9 a.m. and 9 p.m., and distinguish between night and day rain.
- (d.) The chief stations at Melbourne, Sydney, Wellington, and Adelaide, in addition to the foregoing, should give max. solar ther. ; min. on grass and wool ; hours of sunshine ; ozone, 9 a.m. and 9 p.m. ; evaporation, read off at 9 a.m. and 9 p.m.
- (e.) In addition to this, Melbourne, Sydney, Wellington, and Adelaide should publish hourly readings of barograph (reduced to 32° and sea-level), thermograph, and anemograph.
- (f.) Carrying out Resolution XIV., passed at the previous Conference, that curve sheets, with synoptic reports on weather, should be exchanged monthly ; it is recommended that these curves should show barometrical pressure at sea-level, temp. of air, relative humidity, dir. and force of velocity of wind, and rainfall ; and that the synopsis should be in sufficient detail to trace storms and other atmospheric disturbances. There should be a sufficient number of stations selected in each colony to supply data for forming isobaric maps for every day.
- (g.) The adopted mean temp. to be deduced from the min., 9 a.m., max., and 9 p.m. readings ; and at the four principal stations this mean should be compared with the hourly means.
- (h.) Exposure of thermometer to be uniform, or, if that cannot be effected, the four principal stations, or one of them, should mount thermometers on each plan adopted by the other colonies, and compare the readings on each kind of stand with the readings of a rotatory thermometer in the shade.
- (i.) The dry and wet bulb thermograph readings should be compared with the readings of the standard or ordinary dry and wet bulb thermometers at 9 a.m., 3 p.m., and 9 p.m. ; and the readings of the thermograph should be referred to those of the ordinary dry and wet, or the correction supplied.
- (k.) The readings of the barograph should also be compared with the readings of the standard barometer at the same hours, and the differences given if not applied.
- (l.) Rain-gauges to be of one uniform pattern and size of receiving surface, viz., 8" in diameter, and the mouth of receiver to be 1 foot above the surface of the ground, in such a position as to be wholly unsheltered in all directions.
- (m.) Atmometer.—The form adopted at Adelaide is recommended. This consists of an outer tank of brick cemented, 4 feet square, internal measurement ; and an inner tank of slate or marble, 3 feet square ; both tanks being filled with water to the same level. The amount of evaporation is read off by means of a float carrying a graduated rod and vernier, divided 0.01 inch.
- (n.) Observations to be taken at Melbourne, Sydney, Wellington, and Adelaide, at 0 h. 43 m., Gr. m. t., or 7 h. 35 m., Washington, in compliance with the request of the late Brigadier-General A. J. Myer, Chief Signal Officer, U.S.

*Reports on Resolution XXIV.*

66. Dr. Hector reported that he had experiments in progress upon the velocity and pressure of the wind, and upon solar thermometers, but they were not sufficiently advanced to be reported upon. Experiments had also been made with the swinging thermometer.

67. Mr. Todd reported that he also had made experiments on the subjects referred to members, but that they were not sufficiently advanced to be reported. He found that the swinging thermometers agreed very closely with the thermometers upon the stand, but were always lower than those upon the old Greenwich stand, which had been in use for so many years. For shade temperature, he had for a number of years adopted two modes of mounting thermometers. In one case the instruments were mounted on a modified form of Greenwich stand, which was always kept turned with its back to the sun. The instruments are about 5 feet 6 inches above the ground, and are protected from rain by a wooden shade. His experience did not lead him to think that this is the best mode of mounting thermometers. The best plan, he considered, was a shed with an open louvre roof, which will effectually screen the stand (which should be simply a skeleton frame) and instruments from the sun, and yet leave free access to currents of air. This is the other method adopted at Adelaide, and is well shown in a photograph submitted to the Conference—[*put in*].

The shed is octagon shaped, 10 feet wide, the louvre roof being supported by eight stout posts at a height (at the eaves) of about 7 feet 6 inches above the ground. The shed is floored, and the whole painted white. The skeleton frame, on which the thermometers are mounted, revolves on a wooden standard and has a sloping back of well oiled and painted canvas.

Comparing the results of the two methods, it is found that the mean temperatures on the stand and in the shed, as well as those at 6 p.m. and 9 p.m., and the minima are nearly identical, whilst the mid-day readings and maxima are higher on the stand. The maximum reading in the summer on the stand is often 3° or 4° higher than in the shed. The difference is less in the winter.

Taking the year through the temperature on the stand exceeds that in the shed at different hours in the day by the following quantities :—

Mean readings on stand exceed mean readings in shed—

Minimum	...	...	...	-0.1	3 h. p.m....	...	...	...	+1.2
9 h. a.m....	...	...	...	+0.4	6 h. p.m....	...	...	...	-0.1
Noon	...	...	...	+1.0	9 h. p.m....	...	...	...	-0.1
Maximum	...	...	...	+1.6					

Approximate mean temperature of the year (mean of max. and min.)—

Stand	...	...	...	...	...	...	...	...	63.6
Shed	...	...	...	...	...	...	...	...	62.9

*Shade*

*Shade Temperature.*

68. Mr. Russell reported that he had made experiments with the Greenwich stand that had to be turned twice a day. With another, in which the exterior was composed of louvres, and the interior a box in which perfectly free and carefully arranged ventilation was provided for, at the same time that no radiation from the ground could affect the thermometers, and found that if the south side of the box was removed it gave a temperature the same as the shed; but, if the south side or door was shut, the temperature was thereby raised two degrees. Had found that thermometers placed on the south side of a wall with a box to protect them from morning and evening sun, gave same mean temperature as shed.

69. That he had made a series of comparisons between a swung thermometer and a thermometer in the shed with the following results:—

	Mean difference	...	...	...	0.2	Swung thermometer being highest.
Morning 10.5 a.m.	—Greatest difference	...	...	...	2.3	Swung highest.
Evening 10.30 p.m.	—Greatest difference	...	...	...	0.6	Swung lowest.
	Swung in sun sometimes as much as 3.7 higher than swung in shade.					

70. That to determine the difference of humidity as obtained from max. and min. thermometers, and from the three daily observations of wet and dry bulb thermometers, he had made the following comparisons of observations taken in July, 1880, and January, 1881, the result showing a difference of 4.1° in July and 2.6° in January between the two methods.

July /80.	Max. (1).	Max. Wet.	HUMIDITY.	Min. (1).	Min. Wet.	HUMIDITY.	Jan. /81.	Max. (1).	Max. Wet.	HUMIDITY.	Min. (1).	Min. Wet.	HUMIDITY.

*Evaporation.*

71. Having for the past ten years carried on observations with three forms of evaporators, he thought the condensed results might be of interest to the members of the Conference. He mentioned that observations with the glass evaporator were begun at Sydney Observatory in 1860, but it was not until 1871 that the other two forms were placed beside it for the purpose of comparison. It was simply because the glass instrument was the one in use, that it was assumed to be the standard for comparison, and not for any advantage in form or substance which it might be supposed to possess. The tin one had been adopted for use in the country, because its cost was little, and the large one was started because it seemed to put the water into the condition which obtains in an ordinary open reservoir. The following details will form a sufficient description of these instruments:—

No. 1.—A glass vessel, standing on the ground, 8 in. high and 8 in. in diameter, in which the water is usually about 6 in. deep; it is read by a vernier scale attached to a point which is every morning made to touch the water by screw motion.

No. 2.—A tin vessel, painted white, standing on the ground, 12 in. high and 8 in. in diameter, in which the water is usually about 8 in. deep; the amount of evaporation is ascertained by weighing it every morning.

No. 3.

No. 3.—Is a galvanized iron vessel, sunk into the ground 2 ft. 4 in. ; it is 2 ft. 6 in. deep, and 4 ft. in diameter. In it is a small float, to the top of which is attached a light vertical rod passing through two guides ; this is graduated to tenths of an inch, and read to  $\frac{1}{1000}$  of an inch by means of a microscope fixed on a firm support ; the edge of the vessel is only 2 in. above the ground, to prevent surface water from running into it ; and the glass is allowed to grow level with the top, to prevent rain splashing in, and sun-heat on the metal outside.

72. The table herewith shows the result from each evaporator, together with temperature, humidity, wind, and rainfall, for ten years, 1871 to 1880. It will be observed that the tin one shows the greatest amount, the glass second, and the large one least, on the average for ten years ; but it is worth noting that in 1876, when the velocity of wind greatly exceeded other years, the tin one gave the evaporation only 7 per cent. above the average, the large one 20, and the glass 28 per cent.

Observations on the temperature of the water in the evaporators show that the glass one is most affected by the sun, the tin next, and the large one least.

73. In the course of the experiments the question arose whether more or less evaporation took place during the day as compared with the night. The day was divided at 9 a.m. and 9 p.m., and the observations confined to the glass and large evaporators ; and it was found that the glass one gave 42 per cent. more during the day than during the night, and the large one 18 per cent. more during day than night, and it sometimes happened that it was more during the night than during the day. The result of these observations may be expressed in another way : Comparing the two, the large one gave 13 per cent. less than the glass one during the day, and 23 per cent. more during the night, which seems to prove that the heat absorbed by the large one during the day was given off in vapour during the night, and not by radiation from the sides, as in the glass one.

74.

75. Another question presented itself, and was answered by several months' observation. It was—What ratio does evaporation in the shade bear to that in the sun ? The shade chosen was the thermometer-shed, where the air has free access, but there is complete protection from the sun. The mean result of the measures was that 26 per cent. less evaporation took place in the shed than in the glass evaporator in the sun ; or, comparing it with the large one, the result in shade was 9 per cent. more than in the large one ; but, as the shade evaporator was placed 3 feet above the ground, where the air would probably be drier than on the surface of the ground, where it affects the large evaporator, it is probable that a small evaporator in the shade would give about the same result as one 4 feet over and sunk into the ground.

76. It will appear from what has been said that every change of condition under which evaporation is measured produces a change in the result, and since the conditions are infinitely variable, so the results must be. Therefore, before any comparable results can be obtained, we must determine what it is that we want to measure. Is it the evaporation from water in the ground, from water in a glass or metal vessel on the ground, or from water at some distance above the ground ? For the mere purpose of comparison, any one of these positions would do, but since the one in the ground comes nearest to the condition of a natural reservoir, I prefer it, because the results would be directly useful for a practical purpose, as well as for science.

#### *Shade Temperature and Thermometer Sheds.*

77. Mr. Ellery reported as follows :—Experiments with regard to true shade temperature, and best form of thermometer shed, were made here early in 1880. The thermometer stands previously in use at the Melbourne Observatory were—a Lawson's stand, and, for a short time, a modified Stevenson's stand. Prior to 1865, a form of Lawson stand, movable about a central column, so as to place its back to the sun three times a day, was exclusively used, but this was done away with in favour of an ordinary fixed stand, of the same form, in 1865.

78. Occasional experiments with a swing thermometer had shown that, on hot days, in which a rapid change of temperature had occurred in the afternoon, the thermometers always indicated a higher temperature than that indicated by a thermometer swung in the air, and *vice versa* after a cold night, showing that the stand itself retained a temperature different to that of the air a considerable time after an actual fall or rise of shade temperature ; and further experiments showed that, in the ordinary small stands used for thermometer exposure, the temperature of the material or the stand itself always lagged behind that of the air.

79.

\* Corrected for two months, January and February, when observations were not taken. Large evaporators started in March.

79. In a Stevenson's stand, made for one of the country stations (with vertical instead of horizontal louvres), the indications were half-way between the Lawson stand thermometers and the swing thermometer. It was evident, therefore, that if we assume a correct thermometer swung in the open air will give true shade temperature, thermometers shaded in the ordinary wooden stands (Lawson's or Stevenson's) do not always do so; and also that the mass of material in the stand, want of free traverse of the air through all its parts, its slow conductivity, and its proximity to the thermometers themselves were probably the chief causes. It therefore appeared that the required shelter should be formed of some better and more rapid conductor than wood, that the mass of material used should be as small as possible, and that the circulation of air around every part of this mass should be as free as possible; also that the thermometers themselves should be as far as convenient from at least the more massive or worst conducting portions of the stand, and thus free from the retarding effects of radiation.

80. Acting upon this, trials were made with shades constructed of zinc and galvanized iron, and it was soon found that under such shades the thermometers followed the swing thermometer very closely, and when a sufficient and thoroughly open air space was allowed between the sheets of a double screen of this material, and when no side screens were interposed, the swing and fixed thermometers always read alike, even when the temperature of the air was over 100°, and the sun temperature 150°. Trials were made by day and at night, in both cloudy and clear weather, and the indications were always within a fraction of a degree of that of the swing thermometer, while thermometers in the other stands differed from it frequently two or three degrees, and in some cases four or five degrees.

81. After these experiments were completed, a new shed was erected at the Observatory in March, 1880, which has been used ever since for shading the thermometers, and has given every satisfaction; and whenever an occasional trial with the swing thermometer has been made, the thermometers fixed in it have always agreed very closely indeed. Sometimes, after a very cold night, they have shown a slightly higher temperature (sometimes fully half a degree) than the swing thermometer, which is perhaps due to the ground beneath the shelter being less cooled by radiation during the night. The shed itself consists of six uprights of wood fixed in the ground, carrying a double roof of galvanized iron, with low gables north and south, and eaves east and west. The area covered is 12 feet by 12 feet; height of ridge above ground, 8 feet; height of eaves, 6 feet; space between two roofs, 9 inches. On the north gable a light trellis extends from the apex of the gable to within 4 feet 6 inches of the ground. The three other sides are fully open, except three louver boards just below the eaves on the east and west sides, to keep the direct rays of the rising or setting sun from reaching the thermometers. The 9-inch space between the two roofs is also open all round. The thermometers themselves are exposed in a cage of open wire netting hung from the roof, and about 1 foot below the iron of the inner roof, and, while fully exposed to the air in all directions, are out of the reach of driving rain. A photograph appended shows the form.

82. The ombrograph is placed beneath this shed, with the collector on the roof.

83. The swing thermometer is a very good one, in glass tube, by Greiner, of Berlin. It is attached to a silk cord, about 2 feet 6 inches long, with loop to pass over finger. It is usually swung at full length eight or ten revolutions at a moderate speed, then stopped and immediately read, while the fixed thermometer is read by another observer.

*The best method of measuring the velocity and pressure of the wind.*

84. I have made numerous experiments in these directions since the first meeting of the Conference, but I am certainly not prepared to give any opinion yet as to the best method. According to my experience, the mean velocity for short periods, as furnished by the Robinson's anemograph does not answer all the questions that arise, and a good method of measuring the pressure of gusts is wanted. There is no doubt that the Robinson, if kept in good order, is the most satisfactory of all forms now generally in use; but, in the Kew pattern used here, the register scale is too small and close—unnecessarily so, I think—so that it is almost impossible to obtain the maximum velocities in high winds, which generally take place in very short periods.

85. It was necessary, some months ago, to thoroughly repair, indeed to remake, our anemograph, as nearly twenty years' wear had made it very shaky in all its parts. I therefore took the opportunity of introducing some modifications, especially in the registering portion of the apparatus, and in replacing the original anti-friction ball bearings by the *oil cup* and *Smeaton ring*, as now used at Kew, with the effect of securing a beautifully silent and smooth motion, combined with equal sensitiveness.

86. The registering apparatus is quite different from the old form and the record sheet much larger, being 12 inches wide and 18½ inches long. The direction record for a full revolution of the wind covers 4½ inches wide, and the velocity 5 inches for 50 miles' motion. An hour's movement of the record proper equals about ¾ of an inch. The velocity pen—a glass one, charged with aniline ink—falls back to zero every hour by means of a clutch on the velocity shaft, which is released by an electro-magnet every hour, the contact for which is made by the clock. Should the velocity exceed 50 miles an hour, the pen moves a lever at the end of its range and makes contact, allowing the pen to fall back to zero at the completion of the 50 miles. This acts exceedingly well, and the pen commences its new curve the instant it has fallen back to zero.

87. In order to facilitate measurements for short intervals during strong winds, there is a second electro-magnet which gives the pen an upward movement when in action, forming a short off-set on the velocity curve. By inserting a plug the clock actuates this electro-magnet every minute; the velocity curve is thus divided by cross marks every minute, and an easy way of obtaining the velocity for short intervals is thus supplied.

88. The direction record is given by spring pencils on a pair of endless chains running over two rollers, a cam plate throwing the pencils, not in position for registering, out of action. The more open scale of the record sheet, and return of the velocity pencil to zero every hour, enables the sheets to be much more easily read off, furnishes more precise results, and the minute marks on the curve made when the second electro-magnet is connected promises to be a very useful addition for occasional requirements.

89. There still seems to be some question as to the exact ratio of the rotation of the cups to the velocity of the wind in Robinson's anemometer, as it is stated that this varies with the length of the arms and size of the cups. It appears to me, therefore, very desirable to adopt some method by which the results of the several anemometers in Australia shall be comparable. With this in view I have lately made some experiments with

with Hagemann's vacuum anemometer, described in the *Journal of the Meteorological Society* for October, 1879, because it appears probable that exactly similar conditions can be easily secured at each observatory for such an instrument, which, moreover, has the advantage of being simple and cheap in construction. The conditions necessary are, that the height above buildings or trees, or like disturbing causes, and the size and shape of the orifice of the top of the vertical tube, shall be similar in each case; and perhaps it may be also desirable to have the capacity of the floating air chamber nearly similar.

90. I have had placed on the observatory a light mast carrying a  $\frac{1}{4}$ -inch gas-pipe, about 25 feet above the main roof, terminating in a nozzle similar to that described by Hagemann, having an aperture of about 3 or 4 millimeters diameter. The pipe leads to a "gasometer" arrangement in a chamber below, where a dial and index shows the amount of exhaustion in the floating chamber of the gasometer, or in other words the velocity of the wind, according to the law referred to in Hagemann's paper.

91. This apparatus has now been at work some weeks, and has furnished very satisfactory results; the movements of the index are steady, making gentle sweeps around the dial with the lighter winds, and bold and rapid ones in the strong gusts of a high wind. The steadiness of its action will render making it self-registering an easy task.

From observations made with a dial roughly graduated to millimeters water pressure and miles per hour, its indications appear to agree very closely with the Robinson anemograph, but of course all the rapid variations of velocity lost in the Robinson are plainly observable in this apparatus. I am so well satisfied with this form of anemometer that I have had constructed a more perfect dial and index movement and carefully made spring than at first used, and propose to make it self-registering by means of a lever marking on a drum covered with smoked paper.\*

#### *Shade Temperature.*

92. In regard to the experiments on shade temperature, Mr. Ellery mentioned that during the erection of the shed, experiments were made with side screens, which made a very great difference in the readings, the thermometer, as soon as the current of air was stopped, showing an elevation of temperature to the extent of 4° or 5°.

#### *Swinging Thermometers.*

93. Dr. Hector enquired whether in swinging thermometers the shape of the bulb had been observed to modify the results. Mr. Ellery replied that he had found that the shoulder bulbs always registered too low when swung, although, when placed upon the stand, they read correctly.

94. Dr. Hector remarked that this coincided with his experience, and had led him to discard the shoulder bulb, for the form in which the bulb was of the same diameter with the stem.

#### *Evaporation.*

95. Mr. Ellery stated that he had for many years adopted only one system of measuring spontaneous evaporation, namely, that of a tank level with the surface of the ground. The height of the surface in this tank was measured every morning at 9 a.m.

#### *Black Bulb Thermometers.*

96. Some years ago he made experiments upon black bulb thermometers, the results of which were given in a paper read before the Royal Society of Victoria, and showed that, while the thermometers registered correctly up to about 125° or 130°, at temperatures over 125°, even with the best instruments, variations appeared amounting sometimes to 16°. The experiments were made in a room by means of dark radiation from a heated copper surface, within about 3 feet of which the thermometers were placed.

97. Dr. Hector enquired whether, after such an experiment, the thermometer returned to its normal registration. Mr. Ellery replied in the affirmative: the instruments acted quite correctly when placed in hot water; the variations appeared to result from variations in the diathermancy of the glass. His opinion was, that not the slightest confidence was to be placed in black bulb thermometers at temperatures over about 130°.

98. Dr. Hector stated that he had found that after 130° had been reached these thermometers radiated heat from the back at a very different rate from that at lower temperatures. He considered that the back should always be in contact with a substance of the same nature and the same colour. When the back was covered with a white cambric handkerchief, he obtained higher readings than when any other material was used, while contact with black substances, such as black wool, gave quite different results. The highest readings had always been got when white substances were used, though these were not reflecting substances. It would appear that after attaining a certain temperature the material of the instrument was altered in its power of dispersive radiation; in other words the curve of dispersive radiation did not coincide with the curve of absorptive radiation.

99. Mr. Ellery suggested that the difficulty might be got over by using a bulb, one-half of which was blackened and the other half left bright.

100. Mr. Todd said that, in comparing a thermometer whose bulb was lampblacked with one whose bulb was of black glass, he found that the greatest difference appeared between them when the sun suddenly shone out upon them. The lampblacked thermometer then showed sometimes as much as 13° higher than the black glass.

101. Mr. Russell said that he had observed similar facts to those reported by Mr. Todd. He remarked that the difficulty with the black bulb was to know the exact amount of vacuum in the tube. Those instruments which he had lately got were provided with an electric contact to test the vacuum.

102. Mr. Ellery said that the electric indications of the nature of the vacuum varied with the purity of the air and other circumstances, and that probably observers would have to revert to Pouillet's or some other of the old forms.

#### *Anemometer.*

103. Mr. Russell suggested that, pending the solution of the best method of determining the velocity of the wind, the form of hand anemometer now laid upon the table by him should be used at first-class stations

---

\* This apparatus has since been completed and is found to work extremely well. The pressure or velocity of gusts of wind is easily measured off from the smoked paper curves, while a mean curve will give the velocity for any period.—  
R. L. J. E.

stations. He had ordered twelve of these instruments from London, at a cost of 15s. each. He explained the mode of using the anemometer, which was to be held in the hand, and gave the velocity and pressure of the wind for 2 minutes at each experiment.

Discussion ensued.

104. Moved,—That the Conference recommend that, pending their final decision as to the method of ascertaining the velocity of the wind, observers at second-class stations should use Mr. Russell's hand form of Robinson's anemometer.

The decision on this motion was deferred.

*Cable arrangements and financial matters connected therewith.*

105. Moved by Dr. Hector, seconded by Mr. Todd, and resolved:—XXXII. That all accounts for weather cablegrams be rendered to Mr. Russell and be paid by him.

*Synoptical Telegrams.*

106. The consideration of this subject was deferred, to be resumed in connection with the subject of isobaric analysis to be brought forward by Dr. Hector.

*Time at which Observations are to be made in the various Colonies.*

107. Mr. Todd, in introducing the subject, said that he considered it desirable to take the observations at the same hour by local time, but that in order to get out the results in time to be of service to the general public, especially to persons interested in shipping, they should be taken earlier than at present—say at 8 o'clock a.m. If this were done, South Australia would receive Sydney and Melbourne observations at 9 a.m., and the eastern Colonies would receive South Australian observations about 9.30.

108. Mr. Russell considered that no alteration in the present system was practicable.

109. Dr. Hector said that evening observations were far preferable for weather prediction purposes to observations taken at 9 a.m.

110. Mr. Russell suggested that if 9 a.m. observations were transmitted with the 9 p.m. observations of the previous evening, predictions could fairly be made for the one day.

111. Mr. Todd moved, and it was resolved:—XXXIII. That no alteration be made at present in the time at which observations are to be made. A standing foot-note to be made that the observations taken in Western Australia are made at 7.30 a.m. local time.

*Form of Telegrams from Tasmania.*

112. Resolved—XXXIV. That weather telegrams from Tasmania shall be similar to those received from Cape Otway, Portland, &c., and shall be transmitted in this form to Adelaide and Sydney.

*Form of Telegrams to New Zealand.—Adoption of Isobaric Analysis.*

113. Dr. Hector submitted the outline of a telegraphic code based on the isobaric analysis, and pointed out that the whole system depended upon the assumption that the deductions which had led to the adoption of the isobaric system in the Northern hemisphere were applicable to these colonies, and, with sufficient accuracy, to our present observing stations. He considered that the work done in New Zealand since 1877 had completely established that proposition. He saw no benefit in any other system that could not be secured by the one he proposed, which would confer this one in addition, namely, that the members of this Conference would use the terms now used by meteorologists at home, those terms having been hitherto avoided in order to prevent any appearance of attachment, on the part of the members, to certain theories. The method of curves hitherto adopted was well adapted for the study of storms after the disturbances had passed over, but did not show where the centres of storms passed, the observing stations not being movable to follow the centres which moved very irregularly. The geographical curves used by the Sydney Observatory were very useful, but he did not think that they gave a true idea of the grades of the atmospheric disturbances. He moved that it was desirable to use the isobaric method of representing the weather upon our coasts.

114. Mr. Russell concurred with Dr. Hector's remarks as to isobars. He had not hitherto adopted them, because he had felt that the observatories were not sufficiently numerous to enable us to trace the lines; but as the number of stations was being increased from time to time, and as New Zealand and Tasmania were now probably about to join in the scheme, he would be very glad to adopt the isobaric system.

115. Dr. Hector pointed out that the use of isobars would prevent the need for communicating so many instrumental readings for weather purposes as are now sent, since, if a centre was mentioned and the grade given for particular winds, the general character of the weather would be a matter of almost necessary inference. He had no doubt, however, that for other purposes those readings would be desirable.

116. Mr. Todd was in favour of the isobaric method, and had been carrying it out for some time in connection with the intercolonial system of weather telegraphy, but had not published the results, feeling that they rested upon insufficient data, owing to the fewness of barometric stations.

117. Mr. Ellery said that seventeen years ago work was done at the Melbourne Observatory in drawing curves from logs of ships and tracing out the isobars. This was continued for nearly two years, but had been given up as perfectly useless, since there was no observations to be combined with those made at the Observatory, except such as were got at sea. The work was only given up because there were not a sufficient number of observing stations in Australia to carry on the system. He thought it could now be carried out, and therefore supported the motion.

118. Resolved unanimously:—XXXV. That the isobaric system of analysis of the weather reports as in use in America and Europe, be adopted throughout Australasia on the basis of the instructions contained in the pamphlet by Mr. Ley, published by the Meteorological Council of Great Britain.

119. Dr. Hector, as a basis for suggestions, had taken the study of two months' isobaric charts, which he produced. He had not been able to find any critical place for New Zealand, the atmospheric relations of different parts of that colony being so varied that no one place would give the means in Australia of carrying the isobars through New Zealand: in other words, the range of pressure within the

New

New Zealand area was greater than the great range between the centre and the outside of a disturbance. Thus a disturbance, which ranged from the Leeuwin to Melbourne, might be so distorted as to be all existent within the small area of New Zealand. He thought, therefore, that it would be best to give the highest and lowest pressures in New Zealand. These islands lie right athwart of all the disturbances that pass over them, which, as a rule, follow the east coast line, under its lee from south to north. If, therefore, the extremes of pressure each day were telegraphed when a well-defined centre of disturbance was shown passing any of the aspects (but only in those cases where the grade might be considered as a source of dangerous winds); if, for instance, a depression was making off Foveaux Straits, *i.e.*, off aspect D, and if the depression had a light grade for N.W. winds, that information might be of great use to Australia, since such depressions have frequently been observed to bring in a change to strong wind from the S.W., and this might be the beginning of a very large depression, whose diameter might exceed a thousand miles. Thus, if the grade were given, Australia might form some idea of the weather to be expected along its east coast. He did not see that in any other way the telegrams from New Zealand would as yet be of immediate use except for purposes of study. Another point to be mentioned was, that when these disturbances—which often form a consecutive series—had heavy N.W. grades, the series is inclined to the meridian at a different angle from those previously mentioned. These points were not yet completely settled, but he thought it would be necessary to indicate when a depression existed with a grade above 0.02 for every 15 miles of horizontal distance.

120. The general weather and all remarks would be referred to aspects as decided at the last Conference. When in his report he said that these aspects were not satisfactory, he did not mean to imply that he had yet sufficient knowledge to say how they should be amended. As an instance, he mentioned Bealey, the central station in the South Island, which is considered to be in aspect D, but experience has shown that it ought to be regarded as in the West Coast aspect, and not that of the East Coast, although it is upon the east side of the mountains. If at any time he had to change the definition of an aspect, he would give notice of it, and explain the reason.

121. He proposed to give the cyclonic weather for north or south winds, and what aspect they are in, and the anti-cyclonics, which are of great interest, since, for some unknown reason, in summer, when they should have low pressure, a high pressure occurred over the land.

122. Dr. Hector then submitted a double-entry code, prepared to exhibit the aspects of the New Zealand coast, and the cyclones, anti-cyclones, &c.

123. Mr. Russell considered that what was wanted was to give such information as would be useful to the public. It might not appear to be of much interest to the Sydney public to know the general weather in New Zealand, but in reality it was of interest to business men and all connected with shipping. Particulars would therefore be extremely valuable.

124. Mr. Ellery agreed with this view, and considered that a little extension of the cypher code for New Zealand would give all that was required.

125. Mr. Russell thought that the telegrams should show the general state of the weather, and the particular state, if such existed. He thought that the synoptical view of the weather in each colony should be compiled by the chief officer of that colony.

126. Further discussion ensued, after which the principle of the form for synoptical telegrams from New Zealand to Australia was adopted.

*The Conference adjourned to to-morrow at 10 o'clock a.m.*

ROB. L. J. ELLERY.  
26/4/81.

TUESDAY, 26TH APRIL, 1881.

*Present:*

Mr. ELLERY in the Chair.

Dr. Hector, | Mr. Russell,  
Mr. Todd.

The Conference met at the Observatory at 10 o'clock a.m.  
The minutes of the last meeting were read and confirmed.

*Form of Telegrams from New Zealand to Australia, and vice versa.*

The discussion on this subject was resumed.

127. Dr. Hector, in submitting a form of code, said that he had divided Australia into districts somewhat similar to those into which New Zealand had been divided.

128. He proposed that, under the column headed "Over the Land," Australia should be divided into the West Central and East Central districts; the word "General" being used when the phenomena reported were common to the whole. He proposed that the name of each station should be only one word, thus—for "Alice Springs" the word "Alice" alone should be used. Reports should be sent from only one station in each district, unless some unusual phenomenon appeared at one of the others, in which case its importance would justify the cost of reporting it in full. The western section extended across the continent from Darwin to Adelaide, including as its principal stations Darwin, Alice, and Adelaide. He suggested that Alice should be the station selected for the Central District. The Eastern District he proposed should take a similar range in longitude, its stations being Ravenswood, Bourke, Deniliquin, and Melbourne. The section through Darwin and Adelaide he regarded as the plain country. That from Ravenswood to Melbourne would embrace the country westward from the foot of the mountain range.

129. Mr. Todd observed that Darwin would report the tropical rains.

130. Dr. Hector considered that that would be very valuable information, as the weather would probably be found to be to some extent controlled by these rains.

131. Mr. Todd remarked that the monsoon rains this year did not extend further than 12 miles south of Tennent's Creek.

132. After some discussion, Gunnedah, Tamworth, Bathurst, and Melbourne were selected as the stations for the Eastern district, Bathurst to be the reporting station.

Dr. Hector proceeded further to explain the draft code, pointing out that the station selected to report was underlined and proposed to be printed in italic letter.

133. The coast he had divided into aspects. Aspect A would be the promontory from Perth to Israelite Bay (Weld), including the stations Perth and Albany, the latter to be the reporting station; aspect B was proposed to extend from Israelite Bay to Cape Borda, including Eucla, Borda being the reporting station; aspect C from Cape Borda to Cape Otway, would include Robe, Cape Northumberland, Portland, and Cape Otway, Portland to be the reporting station; aspect D comprised Tasmania, Hobart being its station; aspect E, he suggested, should extend from Cape Otway to Gabo Island, including Georgetown, Wilson's Promontory, and Gabo being its reporting stations; aspect F to include Jervis Bay, Sydney (reporting station), Newcastle, and Macquarie; and aspect G should comprise Brisbane (reporting station), Rockhampton, and Bowen. For exceptional phenomena, he considered that ordinary words should be used, and the particular station be referred to by name if necessary. He moved that the decision of the Sydney Conference relative to the division of Australia into aspects should be amended according to the schedule handed in, as follows:—

134. Mr. Russell considered that the arrangement made at the Sydney Conference, by which each colony or aspect sent an account of its own weather, was better than that proposed.

135. Resolved:—XXXVI. That the coastal aspects proposed by Dr. Hector be adopted.

136. Upon the proposition to adopt Dr. Hector's division of inland Australia, Mr. Todd proposed as an amendment that Port Darwin should be made a separate aspect, to be named the North Coast aspect, it having a climate peculiar to itself and quite distinct from that of Central Australia, as represented by Alice Springs; also, that, instead of East Central and West Central, the inland portion of the continent be divided into "Central Australia" and the "Riverine District."

137. Mr. Russell considered that storm centres were the most important phenomena to be watched, and that for this purpose the lines of barometers in the South Australian Stations, on the overland telegraph line, should be taken, and similar lines through the other colonies.

138. Dr. Hector explained that in laying out the proposed divisions he had looked upon Australia as a large plain country, with a range of mountains on its eastern border. He had, therefore, divided it into a Western and an Eastern district; the former being the whole of the plain country, and the latter the country at the western face of the range. The deductions regarding changes of weather arising in the south-east would be made by the coastal aspects on the east coast, while changes passing to the south of Australia (which are of the greatest importance to New Zealand) would be inferred from the successive coastal aspects along the south coast of the continent.

139. Resolved:—XXXVII. That the interior of Australia be divided into East Central and West Central.

140. Resolved:—XXXVIII. That the specimen code prepared by Dr. Hector be adopted provisionally.

141. On the motion of Mr. Russell, it was resolved:—XXXIX. That the daily telegrams exchanged within Australia shall include the time of turning points of the barometer and shift of wind.

142. On the motion of Mr. Todd, it was resolved:—XL. That the members of the Conference undertake to impress upon their respective Governments the need for promptitude in the despatch of weather telegrams, and the desirableness of using coloured paper for the forms on which these messages are written.

#### *Alterations in Code.*

143. Mr. Ellery pointed out that the code had been found to be not quite perfect, but he had no doubt that the American word method adopted in Australia was preferable to the figure code, in which opinion all the members concurred.

144. Mr. Russell suggested that the present extensive table for direction and force of the wind might be advantageously reduced to sixteen or even to eight words, since the clerks would soon learn by heart so short a code, and there would be no need of constant reference to the printed code.

145. Dr. Hector pointed out that, though as few as four points might be sufficient for merely keeping a general record of the weather, yet, for the purposes of isobaric analysis, the information should be as minute as possible.

146. Resolved:—XLI. The present form of the code in Table IV. be altered, as suggested by Mr. Russell, and that the selection of code words be left to Mr. Ellery.

147. Dr. Hector suggested that every code word should consist of two syllables.

148. Mr. Russell recommended that in any reprint of the code, the sheet form should be adopted.

#### *Mode of carrying out Resolution XIV.*

149. Mr. Russell submitted the form of diagram used in New South Wales. Mr. Ellery stated that he now published no diagrams. Mr. Todd was of opinion that if the barometer temperature, direction and force of wind, and rainfall records appeared on the diagram it would be sufficient.

150. On the motion of Mr. Russell, it was resolved:—XLII. That in carrying out Resolution XIV. diagrams be used, in the form now submitted, on which shall be represented the barometer, temperature, direction and force of wind, and rainfall curves. That the following shall be the weather diagram stations, viz:—Alice Springs, Brisbane, Albany, Adelaide, Sydney, Melbourne, Hobart, Auckland, Wellington, and Dunedin; and, provisionally, that the stations shall appear upon the diagram in the order abovenamed.

#### *Co-operation of all Australasian Colonies.*

151. On the motion of Mr. Todd, it was resolved:—XLIII. That the Government of New South Wales be asked to move the Government of Queensland to co-operate in the meteorological scheme of Australia, and to furnish to the Sydney Observatory daily telegrams from Brisbane, Rockhampton, Cooktown, Normantown, and Cloncurrie.

152. In the discussion on this motion the members unanimously expressed their sense of the great importance attached to the co-operation of Queensland.

153. Moved by Mr. Russell, seconded by Mr. Todd, and unanimously resolved :—XLIV. That in the opinion of this Conference the results obtained under the present weather telegram system prove that storm centres pass from west to east over Australia and New Zealand at such a rate as permits of important telegraphic warning being given of approaching gales; and that it is of very great importance so to extend and complete this system, that it may include all Australia and New Zealand.

154. In the discussion upon the above resolution, Mr. Russell, Mr. Todd, and Dr. Hector detailed minutely numerous and well-marked instances of the facts upon which the resolution was based. (*Vide* Appendix No. 2.)

155. On the motion of Dr. Hector, it was resolved unanimously :—XLV. That additional barometer stations be established in the interior of Australia, with the view of tracing the latitude of passing storm centres.

156. On the motion of Mr. Todd, it was resolved :—XLVI. That the Government of New South Wales be requested to communicate with the Government of New Caledonia, and that the Government of New Zealand be requested to communicate with the Government of Fiji, in order to obtain regular observations from those countries.

157. Dr. Hector stated that Mr. Holmes, a resident of Fiji, an able observer, had been furnished by the Government of New Zealand with a complete set of instruments, and had supplied statistics regularly since 1872, which had all been published.

158. Mr. Russell said that he had sent instruments to New Caledonia, with a request that observations might be regularly sent to him, but that these had ceased to be received after the first two months.

#### *Daily Weather Map.*

159. Mr. Russell proposed that a map, including Australia and New Zealand, be adopted for plotting the information upon for daily publication.

Mr. Ellery submitted a specimen map.

160. Dr. Hector said that it was necessary that upon any map used for this purpose the gaps in the mountains should be marked.

161. Mr. Russell remarked that in New South Wales there was a meteorological pass of very great importance, which was a low place in the mountains at the head of the valley cut by the Hunter River; and stated that he could often see the storms coming from the other side of the range long before they reached Sydney. These disturbances came along the valleys, and passed out upon the coast at Port Macquarie.

162. On the motion of Mr. Russell, it was resolved :—XLVII. That the weather map be upon the scale of the map submitted by Mr. Ellery; that the projection to be used shall be Mercator's; that the direction of the wind be indicated by arrows; and that the map shall include New Zealand, Fiji, New Caledonia, and Batavia, &c.

163. It was agreed that Mr. Ellery should have proof maps struck off, which should be sent to the delegates, in order that each may put in the principal features of his colony.

#### *Tide-gauges.*

164. On the motion of Mr. Ellery, it was resolved :—XLVIII. That self-registering tide-gauges be established at the Semaphore, Guichen Bay, and Victor Harbour, in South Australia; at Portland and Gabo Island, in Victoria; in New South Wales, one at Clarence River in addition to those now in use at Sydney and Newcastle; at Brisbane, in Queensland; and at Pinkaro, the Bay of Islands, Lyttleton Heads, Otago Heads, Peyseugar Point, and New Plymouth, in New Zealand.

165. Resolved :—XLIX. That Messrs. Ellery and Russell be requested to report upon the best form for, and the cost of, a tide-gauge, to be adopted; the report to be forwarded to each member of the Conference as soon as the enquiry is completed.

#### *Standard Instruments.*

166. On the motion of Mr. Todd, it was resolved :—L. That, with a view to the observations being referred to one uniform standard, a complete set of standard instruments, be purchased for circulation between the four chief stations, viz., Melbourne, Sydney, Wellington, and Adelaide—the cost to be divided between the four colonies represented at this Conference. The instruments to comprise :—Barometer, thermometer, max. solar thermometer, and anemometer.

167. At the suggestion of Mr. Russell, it was agreed that the results of comparison should be sent on with the instruments.

#### *Conditions of Observation.*

168. On the motion of Mr. Ellery, it was resolved :—LI. That the following conditions of observation be observed, viz. :—That thermometers be exposed on the stands and close to those with which they are to be compared; the barometer to be hung close alongside the standard with which it is compared. The solar thermometer to be exposed in exactly the same conditions as that used for ordinary registration; and the anemometer to be exposed near to, and upon the same level with, the fixed instrument.

169. Mr. Todd moved that all readings of the several instruments in use be reduced to a common standard.

The consideration of this motion was deferred until the results of the experiments should be known.

#### *Form of Statistics.*

170. On the motion of Mr. Todd, it was resolved :—LII. That although absolute uniformity in the form of publication of meteorological statistics is not considered essential, whatever form is adopted should give—

- (a.) Barometer reduced to 32° and sea-level at least at one of the hours agreed upon at the last Conference (9 a.m., 3 p.m., 9 p.m.), and the principal turning points (also reduced), with the times of their occurrence.

(b.)

- (b.) The temperature of the air at the same hour or hours, also the maximum and minimum.
- (c.) Wet bulb thermometer readings at same hour or hours, or the humidity.
- (d.) Amount and character of cloud, and upper current of cirri or high cloud.
- (e.) Direction and force or velocity of wind.
- (f.) Rain during previous twenty-four hours, recorded at 9 a.m.

171. It was agreed that 9 a.m. local time should be adopted as the common epoch of these observations.

172. During the discussion on the above resolutions Mr. Russell asked Mr. Ellery whether in his experience so many as 1 per cent. of cases occurred where the maximum temperature of the day occurred in the morning before 9 a.m. Mr. Ellery having replied in the affirmative, Mr. Russell expressed a doubt whether the cases were numerous enough to make their record of any value, and his conviction that that value would never compensate for the disadvantage of heating the thermometers with a lamp at night when reading them.

173. The suggestion contained in Mr. Todd's notice of motion (*vide par. 65 c β*) that a maximum reading be taken at 9 p.m. was therefore rejected.

174. On the motion of Mr. Todd, it was resolved:—LIII. That the chief stations at Melbourne, Sydney, Wellington, and Adelaide should, in addition to the foregoing, give maximum solar thermometer, and minimum on grass, hours of sunshine, and the evaporation read off at 9 a.m. and 9 p.m.

#### *Ozone.*

175. On the proposition contained in Mr. Todd's notice of motion, that ozone observations be made at 9 a.m. and 9 p.m., Dr. Hector moved, Mr. Russell seconded, and it was unanimously resolved:—LIV. That, on account of the uncertainty of the tests adopted to detect ozone, the continuance of observations on ozone be optional with each director.

#### *Hourly Readings at Principal Stations.*

176. Mr. Todd moved,—That in addition to the observations already resolved on, Melbourne, Sydney, Wellington, and Adelaide should publish hourly readings of barograph (reduced to 32° and sea-level), thermograph, and anemograph. The motion was negatived.

#### *Curve Sheets and Synopsis.*

177. On the motion of Mr. Todd, it was resolved:—LV. That (carrying out Resolution XIV. passed at the previous Conference) curve sheets with synoptic reports on weather should be exchanged monthly: it is recommended that these curves should show barometrical pressure at sea-level, temperature of air, direction and force or velocity of wind, and rainfall, and that the synopsis should be in sufficient detail to trace storms and other atmospheric disturbances. There should be a sufficient number of stations selected in each Colony to supply data for forming isobaric maps for every day.

#### *Adopted Mean Temperature.*

178. Mr. Todd moved,—That the adopted mean temperature should be deduced from the min., the 9 a.m., the max., and the 9 p.m. readings, and that at the four principal stations this mean should be compared with the hourly means.

179. Mr. Ellery, in reply to a question, stated that at his Observatory the mean was arrived at by taking the mean of all the observations of the day, and applying to it a correction deduced from the hourly observations.

180. Mr. Russell preferred to have the max. and min. observations without any correction.

181. Mr. Todd concurred with Mr. Russell, and explained that he read his min. at 9 a.m. and max. at 9 p.m. It of course occasionally happened in the summer that a lower temperature than the min. recorded at 9 a.m. was reached at a later hour during the same day when a southerly wind set in after a hot wind.

182. Dr. Hector considered that it would be sufficient to take as the mean for the day the mean of the max. and min., as the thermograph gave all the intermediate variations. He much preferred morning readings to those taken in the evening.

183. In deference to a general consensus of opinion, Mr. Todd consented to omit the recommendation of using the 9 a.m. and 9 p.m. readings in deducing mean temperature.

184. Whereupon it was resolved:—LVI. That the adopted mean temperature be deduced from the max. and min. of the day read at 9 a.m., and at the four principal stations this mean should be compared with the hourly means obtained from the thermograph.

#### *Exposure of Thermometers.*

185. Mr. Todd moved,—That the exposure of thermometers be uniform, or, if that cannot be effected, the four principal stations, or one of them, should mount thermometers on each plan adopted by the other colonies and compare the readings on each kind of stand with the readings of a rotatory thermometer in the shade.

186. Mr. Russell suggested that this would not be necessary if a thermometer were sent round for comparison.

187. Mr. Ellery remarked that the proposal might be referred for a report to be brought up with the further experiments to be made with swing thermometers, and the motion was postponed accordingly.

#### *Dry and Wet Bulb Thermometers.*

188. Mr. Todd moved,—That the dry and wet bulb thermograph readings should be compared with the readings of the standard or ordinary dry and wet bulb thermometers at 9 a.m., 3 p.m., and 9 p.m., and the readings of the thermograph should be referred to those of the ordinary dry and wet, or the corrections supplied. He suggested that this might be left to each person who had a thermograph.

189. Mr. Russell enquired what was to be done with the thermograph registrations—were they published?

Mr. Ellery and Mr. Todd replied that theirs were not.

Dr. Hector said that he had never taken any.

190. The motion was negatived.

*Rain-gauges.*

191. On the motion of Mr. Todd, it was resolved:—LVII. That rain-gauges be of one uniform pattern and size of receiving surface, viz., 8" in diameter, and that the height of the mouth of the receiver above the surface of the ground be stated in the published observations.

192. In the discussion upon this resolution, Dr. Hector mentioned that he was in the habit of causing a small mound of earth to be raised, into which the rain-gauge was sunk up to within 6 inches of the lip.

193. Mr. Ellery disapproved of the artificial knoll.

*Atmometer.*

194. Mr. Todd moved,—That the form of atmometer adopted at Adelaide be recommended. This consists of an outer tank of brick cemented, 4 feet square internal measurement, and an inner tank of slate or marble, 3 feet square or 3 feet in diameter, both tanks being filled with water to the same level. The amount of evaporation is read off by means of a float carrying a graduated rod and vernier divided into 0.01 inch.

195. Resolved:—LVIII. That the consideration of the best form of evaporator be deferred to the next meeting of the Conference.

*Form for Reports on Stations.*

196. Mr. Russell said it had been remitted to him to prepare some form in which the members should furnish a description of their stations. He produced form providing for—(1.) A description of the instruments in use at the Observatory, or on stations containing recording instruments; (2.) The names and positions of stations having barometers and thermometers, &c.; and (3.) The number of stations having rain-gauges, or rain-gauges and thermometers.

197. Resolved:—LIX. That the form of return prepared by Mr. Russell for reporting stations and their equipment be adopted.

*Defective Max. and Min. Thermometers.*

198. Mr. Todd drew the attention of the Conference to a common defect in maximum thermometers received from Messrs. Negretti and Zambra. When these instruments were put into the ordinary approximately horizontal position the column of mercury ran down two or three degrees, from the expansion of the air near the bend of the tube.

199. Mr. Russell said he had had much experience with these instruments, and had found that many were sent out in a defective state. He detailed the method of examination applied when thermometers were offered to him for sale, and stated that if they passed that examination they seldom went wrong afterwards. He suggested that Mr. Todd should return imperfect instruments to the makers.

200. Mr. Ellery said that he formerly had much trouble with these instruments, but it had never occurred since he had obtained them through the Kew authorities.

201. Mr. Todd remarked that he got most of his in the same way, but nearly all were similarly defective. To return them was practically impossible, partly because of the distance and partly because the goods were already paid for.

202. After some further discussion, it was agreed that it would be best to draw the attention of the Meteorological Department of the Board of Trade to the facts, in order that the evil might be remedied.

*Estimates of Force, &c., of Wind.—Anemometer.*

203. Mr. Russell again drew attention to the question whether the present mode of estimating the velocity of the wind where there was no anemometer should be continued, or whether some better means should be adopted.

204. Dr. Hector considered that, for ordinary weather reporting stations, the estimates were sufficient.

205. Mr. Todd placed very little reliance upon estimates, but feared that, at most of the stations, the instrument devised by Mr. Russell would be of little use, since the officer would seldom take the trouble to go out of the shelter of the building. At light-houses and such places he would be quite prepared to place a Robinson's anemometer, and have it registered.

206. Mr. Ellery said he proposed to try Mr. Russell's form of Robinson's anemometer at some of the light-houses on the coast, in order to test its value for measuring velocity of the wind.

*The Conference then adjourned to to-morrow at 10 o'clock.*

ROB. L. J. ELLERY.  
27/4/81.

WEDNESDAY, 27TH APRIL, 1881.

*Present:*

Mr. ELLERY, in the Chair.

Dr. Hector, | Mr. Russell,  
Mr. Todd.

The Conference met at the Observatory at 10 o'clock a.m.

The minutes of the last meeting were read and confirmed.

*Co-operation of Tasmania.*

207. Mr. Ellery drew attention to the fact that the communication from the Tasmanian Government, which the Conference had been informed would be made before the meetings terminated, had not yet been received.

208. On the motion of Dr. Hector, it was unanimously resolved :—LX. That the evidence before the Conference shows the paramount importance of obtaining the co-operation of Tasmania in Australian meteorology ; and the Conference therefore requests Mr. Ellery, the representative of Victoria, to continue the steps he has already taken to secure the practical co-operation of that Government as soon as possible.

*Weather Maps.*

209. The method of securing perfect uniformity in the maps was discussed and agreed upon.

*Rain-gauges.*

210. Mr. Russell stated that it had come to his knowledge that rain-gauges were offered for sale, and were actually sold, which had an error of as much as 10 per cent. ; and that he thought it desirable to point out to all persons interested in rain measurement the necessity for having accurate means of measurement. On this motion it was resolved :—

211. LXI. That this Conference, in view of the importance of, and general interest taken in, rain observations, recommend private observers to use none but certified 8-inch gauges ; and that each member of the Conference undertakes to certify to the accuracy of rain-gauges gratis.

*Sliding Scale for Reducing Barometrical Observations.*

212. Mr. Russell stated that during the pass few months he had devised a sliding scale for reducing barometrical observations for weather purposes, a copy of which he submitted. In his experience it had to a great extent obviated the risk of error in reduction. Its use could be taken up immediately, only a few minutes' instruction being required even by a person who had no knowledge of the ordinary forms of computation. A calculation had to be made for each station, and from its result a curve was plotted ; this curve varied with the altitude.

213. Mr. Ellery suggested that a series of diagrams might be constructed which should serve for all altitudes.

214. Mr. Russell agreed that the suggestion was practicable, but had found that, for actual use, it was best to compute for each station and plot it with its name upon the scale so that it could be easily seen.

215. Mr. Ellery enquired whether the index error of each barometer was indicated upon the scale.

216. Mr. Russell replied that he had introduced that element, so that the diagram gave the reading corrected for index temperature and altitude.

217. Mr. Todd stated that he had for each station a small card, upon which all the corrections were included for index error, altitude, and reduction to 32°.

218. Mr. Russell said that in constructing the diagrams computations were made for 40° and 80°.

219. Mr. Ellery said that in his opinion the method would be found as valuable as Mr. Russell's hygrometric sheet had been, and the other members of the Conference agreed in approving of Mr. Russell's plan.

*Report.*

220. Dr. Hector moved, and it was unanimously resolved :—LXII. That the foregoing minutes be adopted as the Report of the Conference, and that the Chairman be requested to report them to the Government of Victoria, with a request that copies of them may be transmitted to the other Colonies.

221. A vote of thanks to Mr. Ellery for his services as Chairman, and for the accommodation afforded to the Conference at the Observatory, was passed unanimously.

*The Conference then terminated.*

27th April, 1881.

ROB. L. J. ELLERY,  
Chairman.

## APPENDIX No. 1.

METEOROLOGICAL STATIONS in New South Wales, New Zealand, South Australia, and Victoria, with Standard or Corrected Barometers, Thermometers, &c., at which complete and regular observations are made.

NEW SOUTH WALES.				NEW ZEALAND—continued.			
Stations.	Altitude in Feet.	South Latitude.	East Longitude.	Stations.	South Latitude.	East Longitude.	Altitude above Sea.

## APPENDIX No. 2.—(Vide paragraph 154.)

The following extract from the Adelaide Meteorological Report for the month of May, 1879, was put in by Mr. Todd, and affords evidence of the easterly progressive motion of atmospheric disturbances:—

The mean barometer was about 0·06 inch to 0·07 below the average of the previous twenty-two years. It ranged high—or above 30—during the first half of the month, or till the 17th, attaining a maximum (30·485) at Adelaide on the 9th; and was below 30 from the 17th to the 29th, reaching a minimum (29·482) on the evening of the 20th, or 29·358 at Cape Borda on the morning of the 21st. The high pressure prevailed over the centre of Australia till the 17th, and the records of other Colonies, as well as ships' logs, show that this area of high pressure extended not only over the whole of Australia, but far to the westward in the Indian Ocean, probably even to longitude 70° east, as vessels from the westward report high barometer, one stating that it stood as high as 30·400 for fourteen days during the first half of May. It was broken by a depression between the 10th and 12th at Eucla, where, however, it was only slight, not going below 30·1; but more marked to the eastward, at Cape Northumberland, where the barometer fell from 30·45 on the 9th to 29·78 at midnight of the 12th and 13th; the depression was also slightly felt at Alice Springs, in the centre of the continent. The prominent barometrical feature of the month was the large depression, which commenced generally on the 15th, setting in from the westward. Thus Perth, on the west coast, reports a fall of about one-quarter of an inch between the 12th and 13th, but at Cape Borda the downward tendency did not commence till noon of the 15th, and Tasmania on the 16th. By ships' reports, the centre of this depression appears to have passed about 200 miles south of Cape Leeuwin on the 19th. The minimum pressure at Perth occurred also on the 19th, 29·381; Eucla, 29·34, at 3h. p.m. on the 20th; Cape Borda, 29·358, at 3h. a.m. on the 21st; Cape Northumberland, 29·401, at 3h. p.m. on the same day; and Hobart, 29·05, about midnight on 21st and 22nd. It reached New Zealand on the 25th, the barometer at Auckland falling to 29·497; Wellington, 29·290; and Dunedin, 29·293.

On

On the south coast this depression was preceded by rains between the 13th and 14th, the wind being from the S. along the coast as far as Cape Otway, and S.E. and southerly with high seas to Cape Howe, to the north of which along the east coast the winds were W. and S.W., with a relatively low barometer, being four-tenths lower there than at Kangaroo Island. On the 15th the S.E. winds reached along the south coast from Wilson's Promontory to Kangaroo Island, with clouded skies, whilst at Eucla it was N.N.E. and overcast, under the influence of the advancing depression. On the east coast the winds were S. and S.E., the weather being generally clouded from Sydney round to Eucla, the barometer showing a rise of two-tenths at Cape Howe. On the 16th the wind was still from N.N.E. at Eucla, with falling barometer, but S.E. and easterly along south coast from Wilson's Promontory to Cape Borda, and southerly with heavy seas and rain on east coast; barometer steady then at Eucla. On the 17th wind still N.N.E. at Eucla, E. and S.E. along south coast from Cape Howe to Kangaroo Island, and southerly with high seas and falling barometer on east coast, accompanied with rain. On the 19th the wind was from N. and N.E. in South Australia and along south coast to Melbourne; but on the east coast the general direction was westerly, with falling barometer and clear skies. On the 20th the wind was N.N.E. from Eucla throughout South Australia to Cape Otway, and westerly on east coast, the sky being clouded in South Australia and Victoria, also in the interior of New South Wales and along east coast. The north winds are maintained on the south coast, veering to the N.W. on the 22nd. Westerly through Bass's Straits and east coast on the 22nd and 23rd.

In connection with the extended area of high pressure prevailing during the first half of the month, and the subsequent large depression, the progress of which we have just traced, it may be well to call attention to a cyclonic disturbance to the west and south of the Mauritius, reported by Mr. Meldrum, as it seems not improbable that the disturbance just referred to here originated in the Indian Ocean, to the north of that island.

The following is extracted from the Monthly Notices of the Meteorological Society, Mauritius, 17th June, 1879, page 105:—

"Barometric depression of 25th April to 10th May, 1879.—The mean height of the barometer on the 25th April was 30.103 inches, from which it gradually fell to 30.043 on the 29th. On the 30th April and 1st May it recovered a little, but in the evening of the 1st it began to go down again, and continued falling till the 5th, on which day its mean height was 29.895. It then began to rise, and on the 10th was at 30.033. The highest reading (corrected and reduced) was 30.146 at 9 a.m. on the 25th April, and the lowest, 29.862, at 3 p.m. on the 4th May.

"From the 25th to the 29th April the wind veered from S.E. to E. On the 30th it backed to S.E. × E., and then veered to N.E. on the 3rd May; was light and variable on the 4th, from N.N.W. to W. on the 5th and 6th, from W. to S.W. on the 7th, from W.S.W. on the 8th and 9th, and from the S. on the 10th.

"On the night of the 3rd to the 4th May there was a thunderstorm, and also some thunder and lightning throughout the 4th. From 9 a.m. of the 3rd to 9 a.m. on the 4th, 3.75 inches of rain fell at the Observatory.

"These atmospheric disturbances indicated the existence of heavy weather away to the southward and westward, and it is now known that on the 6th May two vessels, the *Maria Elizabeth* and the *Wagrien*, were dismasted in about latitude 29° S. and longitude 53° E."

This last position, it will be seen, is about 420 miles E.S.E. of the locality given by the ship *Windsor Castle* on the 4th, in the following paragraph, which would show the storm to have had a progressive motion of about 210 miles per day in an E.S.E. direction.

The ship *Windsor Castle*, from Port Pirie, in South Australia, to Antwerp, appears to have felt the full force of this storm on 4th May, in latitude 27° 10', longitude 45° 45' east, or about 200 miles south of Madagascar. The captain reports as follows:—

"Left Port Pirie roads (South Australia) on 13th March; passed Cape Borda on the 19th. Had light S.E. trades across the Indian Ocean to latitude 27° 10' S., longitude 45° 45' E., when, on 4th May, was overtaken by a cyclone, which came on at the N. and veered by the W. to S.E. During this gale, and for several hours before its commencement, a mountainous sea was running from S.W. Had for four days previous hot sultry weather, with light variable winds. In the height of the storm the vessel was forced over on her beam-ends, and everything movable on deck washed overboard; two harness casks full of beef and pork, which were lashed under the topgallant fore-castle for present use, were washed adrift, and their contents went overboard; the carpenter's tool chest, which was lashed in the same place as the cask, was stove in and some of the tools washed overboard; the half-deck and galley doors stove in, and one of the iron posts wrenched off its hinges; the gig was floated out of her chocks and dashed against the lifeboat, both boats received damage; the force-pump was washed about the main deck and broken."

On the 18th of May the barque *Elizabeth* reports experiencing a storm in 118° E., lat. 39° S., the barometer falling to 28.9 inches.

The clipper ship *Oberon*, from England, on the same day, in long. 115° E., lat. 39° S., had a violent S.E. gale, the barometer falling to 21.16 on the 19th, having evidently sailed into the S.W. quadrant of the storm.

The barque *Alice Mary*, from Port Louis, on the 18th, in long. 114° E., lat. 37° S., reports the wind to have veered to S.E., blowing a heavy gale with high confused sea. Fierce gale on the 19th, and the ship was hove-to from the 20th to the 23rd.

The central depression passed therefore from the meridian of Cape Leeuwin to Hobart in about sixty hours, more or less, and had a mean velocity of about 26 miles an hour; but the velocity increased as the disturbance advanced eastward, as between Cape Leeuwin and Eucla it moved at about the rate of 570 miles a day, 650 per day between Eucla and Cape Northumberland, and 960 miles per day between Cape Northumberland and Tasmania; this increased velocity in the neighbourhood of Tasmania may be accounted for by the supposition that the area of low pressure then lying to the S.E. of Cape Howe in a great measure lessened the resisting medium in front. The storm off Madagascar had a velocity of about 210 a day, and assuming a gradually increased velocity to a mean of about 300 miles a day between the 6th and 19th would bring it off the Leeuwin on the 18th or 19th. It seems not improbable, therefore, that the storms were identical, and that having passed southwards between Madagascar and the mainlands of Africa, it recurved to the eastward, traversing the Indian Ocean to Australia, on the south side of the area of high pressure, which, however, did not move bodily off the continent to the eastward, but gradually contracted and was dissipated; thus we find on the 10th that the isobar of 30.4, which on the 9th embraced an area of about 800,000 square miles, extending from Melbourne to beyond Eucla, with an average breadth from N. to S. of about 500 miles, was restricted to an area of only some 20,000 square miles over the Riverina District of New South Wales, north of the Murray, Deniliquin being about the centre. It should be added that the barometrical depression which we have described as setting in from the westward, passing Perth on the 19th, was felt slightly on the north coast at Port Darwin, and was very marked in the centre of the continent, where, at Alice Springs, the mercury fell from 30.46 on the 15th, to 29.72 on the afternoon of the 18th, remaining low till the afternoon of the 22nd, the barometer at all other times of the month being there over 30 inches.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

**CIVIL SERVICE.**

(LEAVE OF ABSENCE TO PUBLIC OFFICERS.)

---

*Ordered by the Legislative Assembly to be printed, 23 August, 1881.*

---

SUPPLEMENTARY RETURN, as far as the Survey Branch of the Department of Lands is concerned, to an *Order* of the Honorable the Legislative Assembly of New South Wales, made on the 30th March, 1881, That there be laid upon the Table of this House,—

“ A Return showing, for the last three years, the number of Public Officers  
“ who have been allowed leave of absence, and for how long, on full  
“ salary.”

(*Mr. Buchanan.*)

---

## CIVIL SERVICE.

RETURN showing the number of Public Officers in connection with the Department of Lands who have been allowed leave of absence, and for how long, on full salary, during the period from 1st April, 1878, to 31st March, 1881:—

13.	Commissioner to Mr. Mason, conveying notification of acceptance of his resignation. 14 March, 1881.....	5

MR. MASON, LATE ENGINEER FOR EXISTING RAILWAY LINES.

No. 1.

The Engineer for Existing Lines to The Commissioner for Railways.

Subject: Leave of Absence.

Department of Public Works, Railway Branch, Existing Lines,

Sir,

Engineer's Office, Sydney, 7 March, 1878.

I have the honor to apply for twelve months leave of absence on full pay, for the purpose of visiting England. My chief object in doing so is for the benefit of my health, which of late has suffered much by the severity and long hours of labour in the arduous duties I have had to perform.

I beg to state that my appointment as Chief Assistant Engineer, for laying out and constructing railways in this Colony, was made on the 11th June, 1856. I arrived here on the 16th January, 1857, and have been engaged since that time up to the present date without intermission, in full and active service, now upwards of 21 years—not having had leave of absence during the whole of that time; in fact, for the last seven years I have never been able to take any of the ordinary holidays, owing to the nature of the duties I had to attend to.

After 21 years of continuous and faithful service I respectfully submit that I am fully justified in making this application.

WILLIAM MASON.

In what way does Mr. Mason propose his duties are to be performed in his absence, by whom, and at what extra cost, if any?—J.S., 5/4/78.

I would recommend Mr. Drewett to take charge of this Department during my absence, provided Mr. Whitton can spare him for that time. By this arrangement the work of the Department would be carried on without causing any extra expense to the Government.—W.M., 8/4/78.

Mr. Whitton to say.—J.S., 12/4/78.

Mr. Drewett's time is so fully occupied in my Department that it would be utterly impossible for him to attend to any other work.—J.W., 16/4/78.

Mr. Mason to sec.—J.S., 18/4/78.

Under these circumstances I would recommend Mr. Cowdery, Chief Assistant in this Department, to take charge of it during my absence. Mr. Cowdery has had a large and practical experience on railway works, and I have confidence in recommending him.—W.M., 25/5/78.

No. 2.

The Engineer for Existing Lines to The Commissioner for Railways.

Subject: Leave of Absence.

Department of Public Works, Railway Branch, Existing Lines,

Sir,

Engineer's Office, Sydney, 26 August, 1878.

Referring to my application for leave of absence, I beg to remind you that I have heard nothing further of the matter since the date of my last communication on the subject.

As I understand that I shall be relieved from the duties connected with the Locomotive Branch, on the 1st proximo, I take this opportunity to ask to have the matter decided as early as possible.

WILLIAM MASON.

No. 3.

Minute of Mr. Secretary Sutherland.

\* Leave of absence to Mr. Mason, Engineer for Existing Lines.

Mr. Mason has applied for twelve months leave of absence to visit Europe; he has been twenty-one years in the service, and has not previously had any leave.

It is proposed that the duties of his office, during his absence, should be performed by Mr. Cowdery, Chief Assistant Engineer, who is in receipt of £600 a year.

Mr. Whitton, in 1867, obtained eight months leave of absence on half-pay after a service of eleven and a half years.

Mr. Drewett, Assistant Engineer, obtained, in 1876, nine months leave of absence on full pay after a service of nineteen and a half years.

The salary attached to the office held by Mr. Mason is £1,000, and in consideration of his lengthened service I recommend that leave of absence be granted to him either for nine months on full pay, or for twelve months on three-fourths of his salary.

JOHN SUTHERLAND, 30/11/78.

No. 4.

Further Minute of Mr. Secretary Sutherland.

Mr. Mason's leave of absence.

I HAD intended to bring the question of Mr. Mason's leave of absence before the Cabinet, with my recommendation that it be granted as the \*enclosed paper shows, but other pressing business before the Cabinet prevented it from being considered. I must now leave it for the consideration of my successor, with the assurance that had I remained in office the leave would have been granted, and I desire to recommend it very strongly.

JOHN SUTHERLAND, 6/12/78.

\* Paper referred to above.

## No. 5.

## Minute of Mr. Secretary Lackey.

THIS application was submitted to me some time back, asking for leave of absence for twelve months. I find that Mr. Moriarty, Engineer-in-Chief, Harbours and Rivers, is now on leave in England, and that Mr. Rae, Under Secretary, has obtained leave to visit England; under these circumstances I cannot see my way to recommend that another Officer of this Department be granted a similar concession. On Mr. Moriarty's return, however, Mr. Mason may renew his application, which I will then have no objection to bring before the Cabinet.

J.L., 21/4/79.

Now that Mr. Moriarty has returned to Sydney, and as I understand that Mr. Rae will return in about two months, I have the honor to renew my application for leave of absence, in accordance with Mr. Secretary Lackey's minute, 21/4/79. I shall feel obliged if the Commissioner will submit this to the Minister, with the view of having the matter settled at an early date, as I am desirous of leaving Sydney by the Mail in February next.—W.M., 30/12/79.

I have brought the application of Mr. Mason, the Engineer for Existing Lines, for twelve months' leave of absence on full pay, before the Cabinet, and they came to the decision that in view of the number of applications now before the Government of a similar character, they could not consent to the leave being given under the circumstances. A strong opinion exists against the propriety generally of such leave to Officers in the Civil Service, and two other applications besides Mr. Mason's were refused upon these grounds.—J.L., 5/3/80.

Mr. Mason, B.C., 8/3/80.—CII. A.G. Seen.—W.M., 11/3/80.

## No. 6.

## The Engineer for Existing Lines to The Commissioner for Railways.

Subject: Refusal of leave of absence.

Department of Public Works, Railway Branch,  
Existing Lines, Engineer's Office, Sydney, 31 March, 1880.

WILL you oblige me by laying the enclosed letter on the above subject before Mr. Lackey.

W. MASON.

Submitted accordingly.—CII. A.G., 2/4/80.

[Enclosure.]

The Engineer for Existing Lines to The Secretary for Public Works.

Sir, Department of Public Works, Railway Branch, Sydney, 31 March, 1880.

Referring to my application for leave of absence to visit Europe for the benefit of my health, I have the honor to state that I have read your minute dated 5/3/80; conveying to me the decision of the Cabinet thereon, namely, that leave of absence could not be granted to me owing to the number of applications now before the Government of a similar character, and that two other applications besides mine were refused upon those grounds.

As I am not aware by whom, or on what grounds, or under what circumstances, these applications were made, I have no means of comparing their claims, urgency or necessity, with my own; and it may be that some or all of them have had leave of absence at some period or periods of their service, whereas I have had none. I am, however, aware that leave of absence was granted to three officers in the Public Works Department over which you preside, whose claims I submit were no stronger than my own, and whose applications for leave were made *subsequently* to mine; two of them were granted twelve months leave of absence, one of which was extended to fifteen months; the other, an officer in the Railway Branch, was granted nine months leave, although his appointment dates only from August, 1867, whilst mine dates from June, 1856, about half the length of my service.

When Mr. Sutherland was in office he gave me a distinct promise that he would strongly recommend to the Cabinet that leave of absence should be granted to me, which is fully borne out by his minutes on the subject, and you, sir, will, no doubt, remember when I first renewed my application to you that you also promised to do all you could for me in the matter of obtaining leave.

Considering all the circumstances of the case, combined with these promises, upon which I fully relied, coupled with the responsible position I hold, and the nature of the professional services I have ever rendered to the Government, together with the fact that for the twenty-three years I have been in the service I have had *no leave of absence* beyond a few days granted many years ago, I looked upon the matter as certain, that leave would be granted to me now, especially under the circumstances of failing health, consequently I was much disappointed at the decision of the Cabinet.

After having spent twenty-three years of the best part of my professional life in the service of the Government of New South Wales, twenty-three months of the latter part of it in discharging the duties of what are now two departments with equal salaries of £1,000 a year each, and which were of so arduous a nature as to affect my health, I submit that my request cannot be considered an unreasonable one, being only such as that which I believe has been invariably granted to others under similar circumstances.

For some time past I have suffered from general prostration of the "nervous system," which I am satisfied was induced by excessive overwork in carrying on the duties of two departments, and the constant application to the onerous duties of my present office has certainly aggravated that affection; and desirous as I am of continuing those duties, I am certain to do so without cessation would be at great risk of permanent injury to my health, as I feel that a complete change and rest from work for a time is absolutely necessary to re-establish it; and in this opinion I am fully confirmed by Dr. P. Sydney Jones, who has been my medical adviser for the last sixteen years, and who strongly recommends a rest from all work for a time, coupled with a sea voyage, and says I never can expect to recover without it.

As

As many of the circumstances I now mention do not appear in the papers referring to my application, and as it appears to me they would have had an important bearing in deciding the case, I take this opportunity of bringing them prominently to your notice, for I cannot for one moment suppose that the Government would reduce me to the painful and humiliating alternative of sacrificing either my office or my health.

Having now stated all the principal points bearing on the case, I leave the matter in your hands.

I have, &c.,

WILLIAM MASON.

I have brought Mr. Mason's application for twelve months' leave of absence on full pay before my colleagues, who will not alter the decision they have already come to.—J.L., 21/5/80. Engineer for Existing Lines.—D.V., *pro* Commissioner. Seen.—W.M., 9/6/80.

No. 6A.

The Engineer for Existing Lines to The Commissioner for Railways.

Department of Public Works, Railway Branch,  
Engineer's Office, Sydney, 30 October, 1880.

Sir,  
Minister for Public Works. Will you do me the favour to lay my resignation, herein enclosed, before the Honorable

I have, &c.,

W. MASON.

[Enclosure.]

The Engineer for Existing Lines to The Secretary for Public Works.

Department of Public Works, Railway Branch,  
Engineer's Office, Sydney, 30 October, 1880.

Sir,  
I have the honor to resign my appointment as Engineer for Existing Lines of Railways and Engineer temporarily in charge of Tramways, and shall be glad to be relieved of the duties of my office at the end of the ensuing month.

I have, &c.,

W. MASON.

I have submitted the above to the Minister, and he will attend to it.—CHAS. A. G., 2/11/80. Mr Mason, after an interview with the Minister, requested that his resignation might be considered as withdrawn.—CH. A. G., 9/12/80.

No. 7.

The Engineer for Existing Lines to The Commissioner for Railways.

Leave of Absence.

Department of Public Works, Railway Branch,  
Existing Lines, Engineer's Office, Sydney, 5 January, 1881.

At Mr. Lackey's request I have postponed renewing my application for leave of absence until now. I shall feel obliged if the Commissioner will bring this matter before the Minister at an early date, with a view of having it decided before the expiration of this month.

W. MASON.

No. 8.

The Engineer for Existing Lines to The Secretary for Public Works.

Railway Department, Office of Engineer for Existing Lines,  
Sydney, 31 January, 1881.

Sir,  
I have the honor to remind the Minister that I have not received any reply to my communication of the 5th instant, about my leave of absence, although I asked to have one before the end of this month.

The Minister will no doubt remember the interview I had with him on the 3rd November last, when at his request I withdrew my resignation, on the understanding that leave of absence should be granted to me as soon as the special press of work in the Department in connection with the tramways would admit of my leaving, and that I was not to re-submit my application until a month or six weeks after that date. This I agreed to, and did not re-submit it until a fortnight after the time fixed by the Minister.

The whole of the works and other matters relating to tramways as above referred to having now been put in good order, I have therefore fully carried out my arrangement with the Minister, but still feeling the necessity for a rest from work for a time, and the uncertainty when the question of my leave of absence may be settled, I claim the right to retire from the service under my former resignation, and have now the honor to request that I may be relieved forthwith from the duties of the office I now hold as Engineer for Existing Railways and Tramways.

I have, &c.,

WILLIAM MASON.

No. 9.

The Engineer for Existing Lines to The Commissioner for Railways.

Department of Public Works, Railway Branch, Existing Lines,  
Engineer's Office, Sydney, 21 February, 1881.

I BEG to remind the Commissioner that I have not yet received any reply to my letter of the 31st ultimo, requesting to be relieved forthwith from the duties of the office I hold, and to state that it is my intention to vacate it at the end of this month.

WILLIAM MASON,

No. 10.

## No. 10.

## Minute by The Secretary for Public Works.

LEAVE will be given Mr. Mason on half pay for nine months. I understand that ample provision has been made for the performance of the work of Mr. Mason's office during his absence.

J.L., 4/3/81.

I shall be glad to be informed upon what terms nine months' leave of absence has been granted to me, as the Minister's minute, I observe, does not state them?—W. MASON, 8/3/81. See Minister's minute above, "on half pay," interlined since.—CH. A.G., 10/3/81. Mr. Mason, B.C.

## No. 11.

## The Engineer for Existing Lines to The Secretary for Public Works.

## Mr. Mason's Leave of Absence.

WHEN I consented to withdraw my resignation at the Minister's special request in November last, it was on the understanding that I would be paid additional salary for taking charge of the Tramway Department; this, however, I waived on condition that leave of absence was granted to me on the terms I applied for, namely, *twelve months leave on full pay*.

Instead of this I am now offered *nine months on half pay* without any further consideration for the extra excessive and onerous duties I have had to perform for the last six months, by having the works of the whole of the said Tramway Department added to my then already overburdened one of the Railways.

I refrain from any comment on the subject; but taking the whole circumstances of the case into consideration, I have merely to remark that it would be impossible for me to accept the terms offered in the Minister's minute 4/3/81, and beg to refer him to my second letter of resignation, dated 31st January last, and *again* request that I be relieved from the duties of my office forthwith, as I must respectfully decline all responsibility in connection with it after this date.

WILLIAM MASON, 14/3/81.

## No. 12.

## Minute of The Secretary for Public Works.

As Mr. Mason declines to be responsible after to-day, I have no alternative but to accept his resignation, and I desire to state at the same time that there was no promise contained in the communication to which Mr. Mason refers that I did not carry out.

J.L., 14/3/81.

Letter to Mr. Mason, accepting his resignation.—CH. A.G., 14/3/81.

## No. 13.

## The Commissioner for Railways to Mr. W. Mason.

Sir,

Department of Public Works, Railway Branch, Sydney, 14 March, 1881.

Referring to your minute of this day's date, requesting that you may be relieved of the duties of your office as Engineer for Existing Lines of Railways and Tramways, I have the honor to inform you that the Secretary for Public Works has been pleased to accept your resignation, and in so doing desires me to say, with reference to your representations as to what transpired at the interview which you had with him in November last, on the subject of your application for leave of absence, that he made no promise then which he has not fulfilled.

I have, &c.,

CHAS. A. GOODCHAP,  
Commissioner for Railways.

1881.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

LICENSED SURVEYORS.  
(NAMES OF, AND AMOUNTS DUE TO, &c.)

*Ordered by the Legislative Assembly to be printed, 28 October, 1881.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, made on the 19th July, 1881, That there be laid upon the Table of this House,—

- “ (1.) A Return showing the Licensed Surveyors to whom the Government were indebted on the 30th June last.
- “ (2.) The amount in each case.
- “ (3.) The dates of accounts on which such sums are due.”

(*Mr. Murray.*)

NOTE.—A memorandum by the Surveyor General on the subject accompanies the return.

MEMORANDUM to accompany the Return showing the probable amount due by the Government to Licensed Surveyors on the 30th June, 1881.

In submitting the accompanying Return, which has been prepared to a motion of the Legislative Assembly, showing what was the probable indebtedness of the Government to Licensed Surveyors on the 30th June last, I deem it desirable to offer the following remarks in connection therewith.

The first column shows the amount actually due to Licensed Surveyors on the 30th June, as passed by the Professional Branch, and at that time going through the Treasury, Bank, &c., in course of payment. This column answers the motion as worded.

The next column shows the amount of gross outstanding claims of all kinds, embracing measurements made without instructions, payment for which is delayed pending alienation and all other claims, which will in due course be dealt with.

It is a part of the Articles of Instruction that 75 per cent. is advanced on receipt of plans, and final adjustment remains until the surveys shall have been examined, &c.

The average amount voted for licensed surveys is about £136,666 per annum ; therefore the £33,703 does not amount to the 25 per cent. which should nearly always exist as a perpetual possible debit.

P. F. ADAMS,  
Surveyor General's Office,  
27th October, 1881.

## LICENSED SURVEYORS.

RETURN to Legislative Assembly, showing the amount outstanding on Licensed Surveyors' accounts on the 30th June, 1881, distinguishing the amount as passed for payment on that date from outstanding claims which are subject to reductions and alterations on final examination of plans and acceptance or cancellation, wholly or in part, of surveys charged for.

Surveyor.	Period of Service.		Amounts due on accounts passed for payment on 30 June.	Outstanding claims, as per heading, and including accounts for surveys effected without instructions.	Total as per preceding columns.

<b>Contingencies of Dredges and Tugs.</b>																								
Coals, stores, repairs, renewals, and all other incidental expenses		£ 3,394	£ 4,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 1,500	£ 2,000	£ 1,500	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	£ 2,000	24394
To provide for salaries, stores, and all other incidental expenses for two new Dredges and plant, which will be in service at Manning River and coast lakes and rivers during 1882, and for emergencies																								9178
The Dredges are at present stationed as under:—																								
"Pluto"—Shoalhaven River.																								
"Samson" } Newcastle.																								
"Hercules" } Sydney.																								
"Archimedes" } Sydney.																								
"Charon" } Sydney.																								
"Titan"—Myall River.																								
"Newcastle" } Newcastle.																								
"Hunter" } Newcastle.																								
"Vulcan"—Hunter River.																								
"Fitzroy"—Macleay River.																								
"Clarence"—Clarence River.																								
Total .. .. .																								
£ 63524																								

Boys are interchanged in Dredges and Tugs as the requirements of the service or promotion may demand:—

\*The boy of the "Samson" now receives £60 instead of £50 as formerly; the boy of the "Clarence" now receives £50 instead of £60; the boy of the "Hercules" now receives £50 instead of £60. This is the result of the interchange as explained above.

†Additional brakemen required to enable the "Hunter" to work two ladders at one time.

‡Crew reduced by one boy.

§Boy substituted for a seaman.

\*For the year 1881 the sum of £1,292 was estimated as required under this head, the larger sum now asked for, is to provide for the working of two new Dredges for the year 1882, which are not yet scheduled, as they will not be put into commission till the end of 1881.

†The salary of the clerk who has been employed on the Dredge accounts is now paid from a contingent vote, at the rate of 12s. per diem. As the Dredge service has now grown to large dimensions it is thought desirable to give him a fixed position at a salary of £225 per annum.

‡The "Hunter," by reason of her working double ladders, has been raised to the position of a first-class dredge; the salary therefore of the Master of the "Hunter" is made to correspond, being raised from £300 to £325, as in the case of the other first-class dredges.

PERMANENT AND VOLUNTEER MILITARY FORCES.					
<i>General Staff.</i>					
15	Colonel Richardson	Commandant ...	600	915	The allowance for forage cannot properly be said to form a source of emolument, as keeping horses for the Public Service entails expenses in no way covered by the forage allowance. These expenses include purchase and replacement of horses, food, clothing, shoeing, veterinary charges, provision of appropriate appointments, grooms' wages, &c., which in point of fact reduce the amount of income. These remarks apply to all officers to whom forage allowance is granted.

Police Magistrates receive travelling expenses when absent from head-quarters (at night) visiting minor Courts in district, 25s. per diem on the road, and 20s. per diem, with forage and stabling, when at Police Stations. Police Magistrates, who are also Mining Wardens without salary, receive travelling expenses at same rate while engaged on duty. Coroners receive 20s. each inquest, and 9d. a mile (one way) travelling expenses. District Commissioners of Insolvent Estates receive 20s. in respect of each meeting. Commissioners of Affidavits receive fees—usually 2s. each affidavit.

The issue of Debentures under various Loan Acts, in 1870, to the extent of £450,000, has adjusted the amounts short and over raised under these Acts.

\* Net proceeds. † Transferred to the credit of the Consolidated Revenue Fund. ‡ The amount short raised under this Act, viz., £175,833 13s. 1d. has been made good from the Consolidated Revenue Fund. α Debentures to the extent of £2,050,000 of these Acts have been realized in London, but the particulars of the sales are not yet to hand.

The Treasury, New South Wales,  
Sydney, 15th November, 1881.

JAMES PEARSON,  
Accountant.

THE COLONY OF NEW SOUTH WALES, ON 30TH SEPTEMBER, 1881.

S.W.R.—Narrandera to Hay, do. No. 1 ... ..	106 „ 72 „
Total length under contract ... ..	<u>488 miles 44 chains</u>

The number of men employed on these contracts in the month of September was 5,760, exclusive of bushmen getting timber and materials, and the amount paid to contractors, after deducting 10 per cent., was £70,098.

Tenders are now invited for the construction of the remaining length of extension, Dubbo to Bourke, 126 miles and 20 chains.

A length of 38 miles from Narrandera to Darlington was opened for traffic on September 1st, and will be taken over from the contractor very shortly. The length of line under contract at the beginning of 1882 will therefore be 576 $\frac{3}{4}$  miles, of which it is expected that 225 $\frac{1}{4}$  miles will be opened for traffic in 1882, viz :—

Tamworth to Armidale ... ..	78 miles
Gunnedah to Narrabri ... ..	55 „ 61 chains
Wallerawang to Capertee ... ..	22 „ 56 „
Darlington to Hay ... ..	68 „ 72 „
	<u>225 miles 29 chains</u>

The particulars of the contracts for construction only now in hand are as follows :—Great Northern Railway, Contract No. 1, from Tamworth to Uralla, length 63 miles 51 chains 81 $\frac{1}{2}$  links. Tenders invited, February, 1879; contract let to A. & R. Amos for £612,962 15s. 4d., in May, 1879; time of completion, May 31st, 1882. On this contract rails are now laid for 35 miles, and the works generally are sufficiently forward to allow of the line being easily completed within the contract time. The station at Tamworth, on the north side of river, is completed, and stations are in course of erection at Moonbi, Walcha Road, and Uralla.

Contract No. 2, from Uralla to Glen Innes, length 78 miles 38 chains. Tenders invited, November, 1880; contract let to David Proudfoot for £457,522 18s. 4d., in January, 1881; time of completion to Armidale, August 31st, 1882, and to Glen Innes, December 31st, 1883. There are about 1,300 men employed on this contract at present and good progress is being made.

Great

Great Western Railway, Contract No. 1, is for the iron bridge (fixing only) 612 feet long over the river Macquarie, at Dubbo, and a timber viaduct over the flooded banks of that river; length, 37 chains 31 links; tenders invited, August, 1881; contract let to B. Barnes and Company for £31,112 15s., in September, 1881; time of completion, 31st March, 1883; the iron-work for the bridge was ordered from England in July, 1881. The works are only just commenced.

Contract No. 2, from Macquarie River, at Dubbo, to Nyngin on the Bogan River. Length, 98 miles and 50 chains; tenders invited, November, 1880; contract let to A. & R. Amos for £306,339 13s. 4d., in December, 1880; time of completion, June 30th, 1883. There are about 450 men at work on this contract.

North-western Railway, Contract No. 1, from Gunnedah to Narrabri. Length, 55 miles and 61 chains; tenders invited, November, 1880; contract let to James M'Guigan and Company for £170,990 6s. 6d., in December, 1880; time of completion, June 30th, 1882. There are now 12 miles of permanent-way laid. The bridges and culverts are completed for 30 miles, and the works generally are very forward. There are 670 men employed and good progress is being made.

Extension—Wallerawang to Mudgee, Contract No. 1, from Wallerawang to Capertee. Length, 22 miles and 56 chains; tenders invited, June, 1880; contract let to Monie and Mattinson for £180,692 7s. 6d., in August, 1880; time of completion, March 1st, 1882. All the works for 18 miles from Wallerawang are completed ready for laying the rails, which is just being commenced. On the last 4 miles of this contract there are some very heavy works which are fairly forward. 440 men are employed on this contract.

Contract No. 2, from Capertee to Mudgee. Length, 61 miles 78 chains and 15 links; tenders invited, March, 1881; contract let to Fishburn and Morton for £463,973 8s., in June, 1881; time of completion, 30th June, 1884. The works on this contract were only lately commenced, but the work is being pushed on with vigour, and 1,088 men were at work last month.

South-western Railway; Contract No. 1, for the whole length of 106 miles and 72 chains. Tenders invited, May, 1880; contract let to George Blunt for £321,942 8s. 4d., in July, 1880; time of completion, June 1st, 1882. 38 miles of this contract were opened for traffic on September 1st, although not quite completed. The earthworks and bridges are practically completed all the way to Hay, and rails are now laid to 106 miles or 45 miles from Narrandera, and are being laid at the rate of about 7 miles per month. Stations are being built at Hulong and Darlington, and tenders will be invited immediately for stations at Kurrathool and Hay. Loading stages for wool and stock are being made along the line.

#### LINES FOR WHICH WORKING PLANS AND SECTIONS ARE BEING PREPARED.

The final surveys of the whole of the extensions authorized by Parliament at the passing of the "Public Works Loan Act of 1881" are now being proceeded with, and the Parliamentary plans, sections, and books of reference will be submitted as early as practicable. The following is a statement showing the number of surveyors employed on each extension, and the progress made to date.

#### *Southern and Northern Junction Railway—From Homebush to Waratah.*

There are six surveyors employed on this extension, and the work having been commenced from both ends, and also in opposite directions at the Hawkesbury River, very satisfactory progress has been made.

The junction with the main Southern Railway has been fixed close to the Redmyre Station, with a fork joining the main line between the Homebush Station and the site of the new cattle sale-yards and a short branch for the delivery of stock on the northern side of the yards.

The junction with the Northern Railway has been arranged in a similar manner between the stations at Hamilton and Waratah.

The final surveys have been completed from Redmyre to a point midway between the crossing of the Parramatta River and the Hawkesbury, from the summit on the Peat's Ferry Road, across the Hawkesbury, to Gosford, and from Waratah to a point a few miles north of Cooranbang.

The borings for foundations of the piers of the proposed bridge at the Parramatta River crossing are completed, and borings are now in progress at the site of the proposed bridge at the Hawkesbury crossing. All alterations and improvements on the route of trial survey having been determined, the Parliamentary plan and section of this extension is being proceeded with, and will, I hope, be ready to lay before Parliament in about three weeks.

*Sydney to Wollongong and Kiama.*

Three surveyors are now employed on the final survey of this extension, and the centre line has been staked from the junction with the Southern Railway, between the Eveleigh and Macdonaldtown Platforms, to George's River; thence *via* the ridge on which the Bottle Forest Road has been formed, through the village of Bottle Forest, to a point 14 miles north of the Bulli Pass; thence to a crossing of Port Hacking River, through the coast range to Stanwell Park and Coal Cliff. From this point the route of the original trial line will be adopted to Wollongong, and thence passing to the west of that town and the Illawarra Lake to Kiama.

The borings at the crossing of George's River are now being carried forward, and the Parliamentary plan, section, and book of reference, of the through length to Kiama will be completed in about a fortnight.

*Goulburn to Cooma, via Tarago, Bungendore, and Queanbeyan.*

Five surveyors are now engaged on the final survey of this extension. The junction with the Southern Railway has been fixed on the southern side of the bridge over the run of water, about  $3\frac{1}{2}$  miles south of Goulburn, and the permanent staking of the centre line has been completed to Tarago; the rough country between Bungendore and Queanbeyan has been thoroughly cross-levelled, and the centre line through the greater portion of this length has been staked. From Cooma the centre line is also being staked towards Queanbeyan, as the various alterations and improvements are being made in the route of the original trial survey.

*Orange to near Forbes, via Molong.*

Four surveyors are engaged on the final survey of this line. There has been considerable delay in selecting the route between Orange and Molong. It has been determined that the junction with the Western Railway is to be formed on the southern side of the town of Orange, and after making various trial surveys, with a view of improving the very heavy section of the original trial survey route, *via* the Molong Creek, the final line has been selected and is now being staked to Molong. From Molong the route of the trial survey passing within about 7 miles of Parkes, and terminating about  $5\frac{1}{2}$  miles north of Forbes, will be adopted.

*Narrandera to Jerilderie.*

Three surveyors are now engaged upon the final staking of this extension, and considerable progress has been made. The junction with the South-western Railway has been made at the western end of the Narrandera Station ground, and from this point the centre line has been staked to the crossing of the Murrumbidgee River, immediately below the town of Narrandera, and thence for about 15 miles in the direction of Jerilderie. The line is also being staked from Jerilderie towards Colombo. A slight deviation has been made from the route of the trial survey, and the centre line is to be staked as nearly as possible along the roads forming the boundaries of the large estates between the Colombo and Yanko Creeks, by which means there will be considerably less severance than is shown on the plan of the trial survey.

*Cootamundra to Gundagai.*

Three surveyors are now occupied in staking this extension, and the final line has been selected throughout, and has been staked as far as Coolac. This being a short line I expect the whole of the field work to be completed by the end of the year, and to have the working plans and sections ready for calling for tenders at a very early date.

*Murrumburrah to Blayney.*

Four surveyors are engaged on the permanent staking of this line, and the points of junction with both the Southern and the Western Railway having been determined, the staking is being proceeded with both from Murrumburrah and from Blayney. The centre line has been selected between Blayney and Carcoar, and the route throughout of the original trial survey will not admit of any very great improvements.

*Glen Innes to Tenterfield.*

Two surveyors are now engaged in completing the permanent staking to Tenterfield. The centre line has been staked throughout, and most of the working section has been plotted. I expect the surveyors to return to this office next month, when all the contract plans and sections may be proceeded with.

SUMMARY.

## TRIAL SURVEYS.

*Clarence and New England.*

Four surveyors are now engaged in making trial surveys of various routes suggested by residents in this district, and so far without any useful or practicable results. The through route suggested by Mr. Marcolini has been surveyed and a second route proposed by Mr. Quinn is being proceeded with, both of which routes show a far more expensive section than either of the original trial survey routes between Grafton and Glen Innes or from Lawrence to Tenterfield. Another route is now being surveyed from Byron Bay to Tabulam, which is merely a difference of proposed route between the coast and the foot of the Coast Range and joins the original trial line from Lawrence to Tenterfield at the point when the difficulties of making the ascent to the New England Tableland commence.

*Monaro to Twofold Bay.*

A trial survey has lately been commenced upon which two surveyors are employed from Bombala *via* Cathcart to the summit of the Coast Range and thence in a north-easterly direction towards the Bega district and thence *via* Candelo and Pambula to Eden.

A fall of nearly 3,000 feet has to be made from the summit of the Coast Range and it is probable that several routes will have to be surveyed before the most favourable descent to the coast level can be selected.

*North Shore to junction with line from Homebush to Waratah.*

Two surveyors have been selected to make a trial survey from deep water frontage on the North Shore to a junction with the Southern and Northern Junction Railway. I have not yet had time to examine this country but from such knowledge as I have of the ground I imagine that an ascent will have to be made from the water frontage in the neighbourhood of Berry's Bay to the summit of the ridge dividing the waters of Lane Cove from those of Middle Harbour, and that the general direction of the Lane Cove Road will be followed to a junction with the northern line on the Peat's Ferry Road.

*Glen Innes to Inverell.*

One surveyor has been instructed to proceed to Glen Innes to commence this trial survey, and another will be sent shortly.

JOHN WHITTON, 17/10/81.

## BRIEF OUTLINE OF WORKS—HARBOURS AND RIVERS DEPARTMENT.

HAVING been requested to condense this statement as much as possible, I can only give in bare General. outline the works which have been undertaken by my Branch, say within the last ten years. These have consisted of wharfs and jetties, in all parts of the Colony—breakwaters, harbour and river improvements,—in which last may be noted clearing the Rivers Murray, Murrumbidgee, Darling, and Richmond, of rocks, sandbanks, and snags, the latter the accumulation of ages, which greatly obstructed their navigation; reclamations of considerable areas of land in Sydney Harbour, and bordering them with spacious quays, or sea-walls; construction of dredging plant; surveys for the Sydney and a large number of country water supplies; surveys also of our rivers and harbours, &c.

It would be of course impossible for me, in the limits assigned, to particularize even in the briefest Funds provided from Consol- dated Revenue. detail these works; but without taking into account funds provided from loans to carry on undertakings of the above character, something like £680,000 have been provided from the Consolidated Revenue to meet their cost.

With regard to dredging, during the last twenty years the sum of £334,000 may fairly be put down Dredging of permanent character charged to revenue. as the value of works performed by that means of a permanent character which have been charged to revenue, but which might properly have been debited to the Loan Fund. It is right to mention here that the whole of the annual cost of dredging is chargeable to revenue, a large portion of the work being, as before explained, of a permanent character.

With regard to some of the principal works, either in progress or recently carried out, special Newcastle. attention might be drawn to Newcastle, a port not very long ago the dread alike of shipmasters and Insurance Companies, but now both safe and commodious. These results have been achieved on the one hand by the construction of breakwaters, and on the other by means of dredging.

With regard to the former, something like twenty years ago the Harbour-master drew attention to the gradual deepening of the bar, resulting from the action of the breakwaters, and this has been confirmed by soundings recently taken, which show an increased depth there from 16 feet, its former depth, to 22 feet, its present.

The effect of the southern breakwater in lessening the range of the waves inside the harbour, and thus effectually protecting the shipping which lie along the wharfs, is also very marked. This breakwater now extends 1,500 feet into the ocean from the base of Nobby's, something like 186,108 tons of stone having been used in its construction from that point. The end of the breakwater is now in 28 feet of water low spring tides.

With regard to the dredging, the accompanying diagram will show more clearly than words would convey, what has been accomplished by that means. Twenty laden ships can now swing to moorings in the Horseshoe, where formerly accommodation could with difficulty be found for one or two.

Large quantities of rock, &c., along the line of wharfs have also been removed by dredging, the rock having been first broken up by blasting.

The wharfs now extend to a length of over a mile and a half, on which, in addition to the staiths and seven steam cranes, eight powerful hydraulic cranes of the newest and best construction have been erected, two of them capable of lifting 25 tons each. Large areas have also been reclaimed, on a portion of which stands the hydraulic engine-house. Perhaps nothing is more calculated to convey to the mind the justification of the large expenditure which has taken place at Newcastle than the accompanying diagram, which shows the marvellous increase in the coal trade, which would simply have been impossible without that outlay. Probably no public expenditure has been more remunerative than that at Newcastle.

At the Clarence, Moruya, Ulladulla, Kiama, and Wollongong breakwaters have been constructed. Clarence, Moruya, Ulladulla, Kiama, Wollongong. In the latter place two steam cranes have been added to the shipping appliances (three staiths) already existing and a third steam-crane (a powerful one) is in course of erection.

At the Clarence River very considerable improvements have been effected inside the bar by means of Macleay River and Lake Macquarie. dredging; this is also true of the Macleay River; and at Lake Macquarie extensive works for the improve- ment of the outlet are also in progress.

At Trial Bay large prison buildings have been erected for the accommodation of the prisoners who Trial Bay. will be employed in constructing a harbour of refuge there. The value of the harbours along our coast is every year becoming more apparent in connection with the rapid development of trade which is taking place in the colony.

Sydney. In Sydney harbour a fine channel (the eastern) has recently been made at the Sow and Pigs reef, so that ships of the heaviest draft can now safely enter. The improvements to the wharfage on the eastern side of Sydney Cove are rapidly approaching completion, and arrangements are in hand for the necessary hydraulic machinery for facilitating the loading and discharging of ships.

New dock, Sydney.  
Darling Harbour Wharf. With regard to the new dock about to be constructed at Cockatoo Island, the necessary surveys, &c., have been prepared, and the work will shortly be commenced. A considerable extension of the wharfage accommodation at Darling Harbour will also very soon be put in hand.

Country water supplies. With reference to works for country water supplies which are being paid from revenue, those for Newcastle, Maitland, and the mining townships are in progress, several contracts having been taken for the reservoirs, &c. The necessary piping will be ordered at once. It has been determined also to carry out the Bathurst and Goulburn water supplies, and tenders have been invited for the pumping machinery; other towns will doubtless quickly follow.

Sydney water supply. I have reserved the Sydney water supply for the last and more extended notice.

It is well known that this contemplates bringing the combined waters of the Upper Nepean, the Cordeaux, and the Cataract Rivers into Sydney, the furthest point being about 63 miles distant. The place of intake is at the junction of the two former rivers, whose united waters\* are held back by means of a dam, and conducted through a tunnel  $4\frac{1}{2}$  miles long to the Cataract River; the waters of the two streams to which the Cataract is then to be added, are again to be arrested by a dam, then carried by another tunnel,  $1\frac{3}{4}$  mile long, and brought into the canals and aqueducts along which they are to flow, until they are delivered into the large reservoir at Prospect; from thence by another  $4\frac{3}{4}$  miles of open canal and 16 miles of piping and aqueduct, and delivered into the reservoir at Crown-street, the higher levels being reached by pumping from that point. Of the  $11\frac{1}{2}$  miles of tunnel comprised in this scheme nearly 9 miles are actually under contract, 2,151 $\frac{3}{4}$  lineal yards being already completed. Of the  $33\frac{1}{4}$  miles of open canal, nearly 21 miles are under contract, the larger part of the ground being opened up, giving a total amount of excavation to this date of nearly 340,000 cubic yards.

The plans for the 15 miles (or so) of canal and tunnel work not yet under contract are nearly ready, and tenders will be immediately invited for the work. Pipes, &c., for the remaining portion of the line will shortly be ordered.

Tenders will also soon be invited for the reservoirs at Prospect, Petersham, and Waverley, for all which the land is already secured, so that the whole scheme may now be said to be well in hand, considerable portions having been already executed.

The large tunnels, which are the key to the whole work, so far as time is concerned, are to be completed under heavy penalties by July, 1883; and as proper machinery is now being introduced there is every reason to believe that that time will not be exceeded.

E. O. MORIARTY,

Engineer-in-Chief for Harbours and Rivers.

Sydney, 12th October, 1881.

---

\* That is to the extent required. It is not of course intended here to be understood that the *whole* of the waters of these rivers are diverted.

TELEGRAPHS.

Since the opening in N.S.W. of communication by electric telegraph, the advancement of the Colony, in this respect, has been marked by a rapidity which furnishes abundant evidence of the possession upon our parts of great resources for the construction, maintenance, and carrying on of works of this kind, and when it is remembered that many difficulties have continually presented themselves during the progress of the work, I think it may safely be said that the Colony has reason to congratulate itself upon the proprietorship of a telegraphic system which will compare most favourably, from any point of view, with that of any telegraphic administration in the world.

The first electric telegraph line in this Colony was opened on the 26th January, 1858, and the following is a statement showing the progress of construction from that time to the present date, namely :—

1858...	...	...	...	...	372 miles of wire.
1859...	...	...	...	...	470 "
1860...	...	...	...	...	1,173 "
1861...	...	...	...	...	1,744 "
1862...	...	...	...	...	1,984 "
1863...	...	...	...	...	2,754 "
1864...	...	...	...	...	2,901 "
1865...	...	...	...	...	3,177 "
1866...	...	...	...	...	3,510 "
1867...	...	...	...	...	4,064 "
1868...	...	...	...	...	4,385 "
1869...	...	...	...	...	5,053 "
1870...	...	...	...	...	5,247 "
1871...	...	...	...	...	5,579 "
1872...	...	...	...	...	5,907 "
1873...	...	...	...	...	6,604 "
1874...	...	...	...	...	7,340 "
1875...	...	...	...	...	7,972 "
1876...	...	...	...	...	8,472 "
1877...	...	...	...	...	9,761 "
1878...	...	...	...	...	11,760 "
1879...	...	...	...	...	12,426 "
1880...	...	...	...	...	13,188 "
9 months, 1881...	...	...	...	...	13,689 "

There are 323 telegraph offices in the Colony. I think it will be admitted that this is a very satisfactory statement of the works which the Department has carried out during the 23½ years it has been in existence, but when we compare our operations in this direction with those carried on simultaneously in the adjacent Colonies, we have every reason to be still more pleased with our efforts to place a speedy and reliable means of communication within the reach, not only of those in all the settled districts, but also of those seeking their fortunes in the more remote parts of the Colony. Thus I find that New South Wales stands at the head of the list, with 13,689 miles of wire, New Zealand follows with 9,587 miles, Queensland with 8,967 miles, Victoria 6,675 miles, South Australia 7,017, Tasmania 1,000, and Western Australia with miles.

And whilst the extent of our telegraphic system is so gratifying, it becomes still more so in the evidence of the general prosperity of the Colony, which is furnished by the necessity which has from time to time manifested itself for thus increasing this means of rapid interchange of communication. The proof of the existence of this necessity and the ready appreciation upon the part of the people, of the promptness with which successive Governments have contrived to meet it, is clearly set forth in the following return showing the number of messages transmitted and the revenue derived from the Telegraph Department from the year 1858 up to the present time, viz. :—

Year.	Messages.	Revenue.
1858	9,141	£1,932 19 9
1859	36,867	7,826 0 10
1860	53,981	12,136 13 2
1861	74,224	16,542 8 9
1862	104,660	25,513 9 8
1863	124,638	29,599 0 0

Year

Year.	...	...	...	...	Messages.	Revenue.
1864	...	...	...	...	130,500	29,678 8 4
1865	...	...	...	...	138,785	31,362 5 5
1866	...	...	...	...	143,523	30,698 7 7
1867	...	...	...	...	130,447	28,197 0 10
1868	...	...	...	...	132,872	27,908 2 2
1869	...	...	...	...	145,370	30,150 7 6
1870	...	...	...	...	173,812	28,550 4 8
1871	...	...	...	...	218,530	29,019 16 11
1872	...	...	...	...	335,822	45,019 16 3
1873	...	...	...	...	363,950	41,132 7 6
1874	...	...	...	...	569,001	39,379 19 2
1875	...	...	...	...	718,512	48,657 18 2
1876	...	...	...	...	854,204	57,317 13 11
1877	...	...	...	...	996,175	65,645 6 0
1878	...	...	...	...	1,132,287	76,226 18 11
1879	...	...	...	...	1,175,218	80,490 0 6
1880	...	...	...	...	1,319,537	84,110 4 8
*1881	...	...	...	...	926,503	63,366 17 11

To meet this rapid increase of traffic it has been found necessary from time to time to avail ourselves of whatever new inventions were considered the most suitable for increasing the carrying capacity of lines already existing, without incurring the large expenditure necessary for duplicating the number of these lines. Then, in 1877, we obtained from the Western Union Telegraph Co. of New York the instruments for working the quadruple system, patented by Messrs. Prescott and Gerritt Smith. After some delay the Victorian Department consented to adopt the system, which was introduced between the two colonies early last year, and has been very successfully worked ever since. It has proved of immense advantage in enabling us to dispose of this large traffic at the rate of 6,000 words per hour with one line. Later on, the business between New South Wales and Queensland began to assume such large proportions that it became necessary to duplex the carrying capacity of that line. Accordingly, we obtained the instruments for working the double current duplex system which has been adopted in England. This system has now been established between Sydney and Brisbane, and the work between the two places is being done at the rate of 3,000 words per hour with but one wire. The lines leading to the interior of our Colony are still worked upon the "Morse" principle, which is likely to meet all requirements for many years to come. It is satisfactory thus to know that our lines are worked upon those principles which have met with most approval upon the part of the British Postal-Telegraph Department and other large telegraphic systems in Europe and America.

The following is a statement showing the revenue derived from telegraphs in New South Wales in 1880 compared with that collected in the sister colonies, viz. :—

New South Wales	...	...	...	...	...	£84,110 4 8
Victoria	...	...	...	...	...	85,359 0 0
South Australia	...	...	...	...	...	55,152 14 2
Tasmania	...	...	...	...	...	7,422 6 0
New Zealand	...	...	...	...	...	73,002 0 0
Queensland	...	...	...	...	...	46,313 4 3

Looked at in the light of a revenue-producing branch of the Service it is of course to be regretted that though in the early days of our telegraphic history the receipts of the Department considerably exceeded the expenditure, yet for some years past the balance has been upon the wrong side of the ledger. This has been due, on the one hand, to the fact that in former years our lines extended only to the largely populated places near to the metropolis, whence the returns were great and the expenditure comparatively small, whilst in later times we have adopted the course of carrying our lines into remote and sparsely peopled parts at a large present loss; and, upon the other hand, to the large reductions which have been made in our scale of charges, in some cases amounting to three-fourths of the original rates. That loss should accrue under these circumstances is but a natural consequence, still it may be fairly assumed that as the now thinly-peopled districts become occupied by large populations, the first-named cause will gradually disappear in the increase of revenue which is sure to follow without any appreciable enlargement of the expenditure, and the many intellectual, social, and commercial advantages arising out of a scale of charges which is as small as that of any other part of the world may be regarded as fully compensating the tax-payers generally for the loss incurred under this head.

E. C. CRACKNELL.

Chief Telegraph Office,  
Sydney, 7 October, 1881.

\* Nine months.

## MINING.

THE value of the minerals raised in the Colony during 1880 amounted to £1,987,873, or nearly two millions sterling.

This was less by £97,582 than the production for the previous year (1879), but when it is considered that the diminished output of coal and shale, and the reduction in the price of coal (caused chiefly by the disagreements between the coal-miners and the mine-owners) resulted in the large deficiency in the value of the coal output for the year of £347,747, it will be seen that actually there has been a satisfactory increase upon the value of the output of other minerals amounting to no less than £250,165. And it is confidently anticipated that the increase for the present year will exceed that of 1880, owing to the renewed activity manifested in mining throughout the Colony; and the consequent increase in the number of those engaged in mining pursuits and of trades dependent thereon will tend to show that the mining industry of New South Wales is in a progressive and satisfactory condition. The Mint returns for gold alone show the value of the production for the nine months ending 30th September of the present year to be £367,424, being an increase of £66,189, as compared with the yield for the corresponding period of 1880.

The output of coal for the nine months ending 30th September of this year exceeds that of the corresponding nine months of last year by 222,534 tons. The output of tin ore will, it is feared, not equal that of last year, owing to the want of water for washing purposes, but the recent rains will enable the mine-owners to wash up a large quantity of earth raised during the drought, and if the water supply hold out the deficiency may by the end of the year be found to be less than was anticipated.

From the new gold fields of Temora, Mount Browne, and other districts, encouraging reports have been received. At Temora the probable occurrence of new leads, and of a second bottom to the main lead now being worked, which has already yielded over 20,000 ounces of gold, has been pointed out by the geological surveyor, who is also of opinion that some of the reefs will be profitably worked, and that increased returns of gold may be expected from this gold field.

The reefs at Milburn Creek and Nana Creek, which have been lately opened up, are attracting considerable attention, and if thoroughly tested will probably add considerably to our gold yield. At Mount Browne, west of the Darling, a large area has been proved to be auriferous, and the quartz reefs are believed to be of a permanent character; the scarcity of water, however, at present, retards mining operations, but the formation of the country is favourable for the conservation of water in tanks, and a good supply for domestic purposes can be obtained in the locality by sinking to a moderate depth. The discovery of gold in this part of the Colony has led to the settlement of a population at Milparinka of about 1,000 persons, and of a similar population at Tibooburra. At these places, situate in the extreme north-west corner of the Colony, permanent buildings are being erected, and there is every reason to suppose that the settlement will be permanent.

The Minister for Mines, in addition to having a well sunk at Milparinka, and another at Tibooburra, has recently had an examination made of this gold field and the Upper Darling district, with the view of ascertaining the probability of obtaining an underground water supply. Artesian water has already been proved in this district, and Mr. Brown, geological surveyor, reports that a very extensive tract of country is underlaid by water-bearing strata of the cretaceous formation. There can therefore be no question as to the increased capabilities of this portion of the Colony when this source of water supply has been made available by means of artesian or pump wells.

Though the revenue from mining for the past three months shows a considerable decrease upon that of the corresponding quarter of 1880 there is a decrease of only £250 upon the revenue of the nine months of 1881, as compared with that of the corresponding nine months of 1880, and the decrease is, I think, mainly due to the want of water on the tin fields.

HARRIE WOOD, 13/10/81.

---

MEMO. RESPECTING PUBLIC WORKS

(COMPLETED AND IN PROGRESS)

UNDER THE COLONIAL ARCHITECT,

FROM 1<sup>ST</sup> JANUARY TO 17<sup>TH</sup> OCTOBER, 1881.

---

**MEMO. respecting Public Works completed and in progress under the Colonial Architect, during the year 1881 to date.**

The following statements show that the principal works completed this year, to date, comprise erection of 11, and additions to 8, Post and Telegraph Offices ; erection of 5, and additions to 11, Court-houses ; erection of 5, and additions to 2, Lock-ups ; erection of 6, and additions to 2, Police Stations ; and erection of 1 Light-house—the expenditure during the year upon these works being £43,726 13s. 8d. ; in addition to which, £32,005 4s. 7d. has been expended during the same period, on additions, repairs, and alterations to Public Buildings generally ; £9,385 2s. 11d. for Furniture ; and £197,417 on Contracts now in progress ; making a total expenditure this year to date of £282,534 1s. 2d.

Expenditure in 1881 to date, £282,534 1s. 2d.

The Contracts now in progress, the most important of which are :—the extension of the General Post Office to Pitt-street ; completion of new Offices for Department of Lands ; additions to Lunatic Asylums, Gladsville and Parramatta ; Fortifications, Bare Island, Botany, and Newcastle ; Callan Park Asylum ; Light-houses, Montague Island, South Head, and Green Cape ; Post and Telegraph Office and Gaol at Goulburn ; Albury Gaol. These works, with others of less importance, amount to £868,056.

Amount of contracts in hand, £868,056.

Estimates have also been prepared for six Post and Telegraph Offices, one Court-house, two Lock-ups, and other works, amounting to £43,957. In addition to these, several works have been authorized, estimates of which are not yet prepared.

Amount of estimate for proposed works authorized, £43,957.

JAMES BARNET,  
Colonial Architect.

Colonial Architect's Office,  
Sydney, 17th October, 1881.

**PUBLIC WORKS UNDER COLONIAL ARCHITECT.**

GENERAL SUMMARY of annexed statements showing Public Works under the Colonial Architect carried out this year to date, those now in hand, and those authorized but not yet commenced.

RETURNS FURNISHED BY THE COLLECTOR OF CUSTOMS

RELATING TO

**CUSTOMS REVENUE**

FOR THE YEARS 1876-1880, BOTH INCLUSIVE.

---

---

## CUSTOMS.

THE return of Customs' revenue given herewith shows the rates of duty imposed, the quantity entered, and the amount collected on each article for a period of five years.

Under the heading "Specific," the gross amount collected for the Colony is given, and in a separate return the amount of specific duty, with the various articles specified, quantity entered, and the amount collected are shown for Sydney *only*, the details of the collections at the outports not having been kept until recently.

The amount returned for drawback on several articles upon which a refund is allowed by law is not given. This defect will be remedied in future, and the net return will be available for comparison.

The differences between the returns for the years given seem to present a difficulty not easy of solution. Taking spirits for example, it is not easy to understand why the year 1876 should give a consumption of 970,481 gallons, and that 1880, with an increase of population close upon 150,000 persons, should reach only 999,744 gallons. The year 1878 gave a consumption of 1,089,191 gallons. Of this quantity a large proportion must have been held in stock, for the following year the consumption fell in seeming anticipation of an increase of the rate of duty. The year 1880, with an increased rate of duty, brought up the consumption to a considerable extent, and the year approaching its close will doubtless show a return to the normal consumption to be reasonably expected in conjunction with the population increase.

That there are many disturbing influences at work, causing perturbations of the revenue pendulum, assisting to defy estimates based upon the experience of selected years, will be admitted by those who have watched the progress of the Customs' collections for a lengthened period. To these some reference may be admissible.

For example, it is a notable fact that the bonded stocks of dutiable articles have undergone extraordinary fluctuations, for which many reasons may be afforded, according to the bias by which those approaching the question are influenced.

The following table, showing the stocks in bond at the close of the years 1871, 1875, and 1880, discloses differences of a remarkable character :—

	1871.	1875.	1880.
Rum ... .. Gallons ...	175,515	79,099	20,271
Brandy ... .. " ...	345,840	248,950	363,454
Geneva ... .. " ...	180,358	166,029	104,795
Whiskey ... .. " ...	30,930	33,303	96,035
Liqueurs ... .. " ...	3,276	3,625	3,898
Gin ... .. " ...	8,909	5,334	7,397
Tobacco manufactured ... .. Ds. ....	454,023	388,822	299,021
" Leaf ... .. " .....	52,081	1,087,276	941,034
Cigars ... .. " .....	22,769	33,784	36,079
Sugar ... .. Tons .....	2,137	1,035	1,596
Coffee ... .. " .....	150	19	11
Tea ... .. lbs. ....	2,503,265	2,228,994	2,580,211
Chicory ... .. " .....	83,423	105,723	74,895
Wine ... .. Gallons ...	160,913	179,370	205,213
All other Spirits ... .. " ...	8,715	9,384	4,145

Taking

Taking the totals of spirits from the years quoted, the figures would stand as follows :—

	1871.	1875.	1880.
Spirits (in gallons) ... ..	753,543	545,724	599,995

There should be some good reason for such a diminution in the stock of spirits to account for the falling off of 153,548 gallons in a comparison covering a period of ten years. Without pretending to give a reason it may be well to give some consideration to the following figures showing the number of vessels employed in bringing cargo to ports in New South Wales, for each of the years compared above.

#### VESSELS.

	From Great Britain.		From all Ports.	
	No.	Tonnage.	No.	Tonnage.
1871	67	69,008	1891	706,019
1875	141	150,071	2376	1,109,086
1880	148	211,372	2108	1,242,458

This would seem to show that as increased facilities are afforded for the importation of goods there is less necessity to run the risks of heavy stocks, and an increasing disposition to meet the wants of the market without so heavy a margin as a less frequent and more unreliable means of transport rendered imperative in the past.

It also seems to show that Sydney is becoming less a depôt from which the adjacent colonies draw their supplies, and that the increased facilities of transit are likely to more and more equalise the trade of the colonies, making the supply of each the means of building up a carrying trade of a direct character.

The article next noticed in the return is methylated spirit. In Victoria the increasing consumption of this article has caused an uneasy feeling that the spirit duties are defrauded by re-distillation. The consumption in New South Wales does not appear to increase to any serious extent. It is, however, desirable to carefully notice the deliveries, and it may perhaps be necessary to so increase the duty at some future time that no temptation shall remain to tamper with the spirit to the injury of the revenue.

The headings—wine, still, and sparkling, ale and beer in wood, and in glass, tobacco manufactured and unmanufactured, and sugar, represent articles manufactured in the Colony.

Excepting ale and beer in bottle, which is imported and consumed as a luxury, these articles are imported in competition with similar articles produced here. The revenue from these commodities is gradually diminishing, and the alternative between the entire loss of the revenue, and the imposition of excise duties, is a question for Statesmen to consider.

The increase in the manufacture of Colonial beer should justify the expectation of a larger revenue from malt and hops than the returns disclose, and the inference is suggested that other material of a possibly more objectionable character is used, from which the revenue of the Colony does not derive an adequate return.

The increase in the consumption of cigars seems to indicate a disposition to use an expensive article affording its own guarantee of foreign leaf and production.

Articles not produced in this Colony, such as tea, coffee, chicory, and opium, show a consumption fairly in accord with the relative increase of the population.

Passing on to the return of specific duties, which, as before-mentioned, contains only the Sydney collections, it is curious to notice the features presented in certain articles of food such as bacon, hams, cheese, and fish. The gradual settlement of the Colony, has had its legitimate effect in increasing the Home food supply, rendering the community less dependent on sources outside our Colony. The revenue from these articles is considerably less year by year, and the evidence is irresistible that the causes are to be found

found in the healthy and profitable settlement of the people on the soil. Differing schools of politicians and political economists will find arguments in favour of their particular theories from the statements herein given which it is not within the province of this paper to notice. But it may be excusable to draw attention to the fact that in the instances of biscuits, corn-flour, maizena, and kerosene oil, upon which duties were imposed and were regarded with favour as tending to foster industries, a reverse result is presented so far as restriction is concerned, the increase of importation being considerable in each instance.

Articles not liable to disturbing influences by the competition of Colonial-produced articles of a similar character, such as cement, galvanized iron, wire, nails, oils, pepper, spice, salt, shot, starch, timber, turpentine, varnishes, and woolpacks, exhibit a ratio of steady increase in proportion to the population.

It is encouraging to note that the specific duties realize a revenue, year by year, much greater than the revenue derived from duties *ad valorem*, and the Customs' revenue of the Colony generally affords evidence that, however inevitable, and perhaps objectionable, indirect taxation may be, there is an ability to purchase articles subject to Customs' duty, and that the absolute necessities of life are free from such taxation.

The amount of Customs Revenue for 1860 was	...	...	...	£555,104		
Do.	do.	1870	„	...	...	853,815
Do.	do.	1880	„	...	...	1,203,916

The values of goods imported into and exported from the Colony, for 1871, 1875, and 1880, were as follows :—

			Imports.	Exports.
			£	£
1871	...	...	9,609,508	11,245,032
1875	...	...	13,490,200	13,671,580
1880	...	...	13,950,075	15,525,138

JAMES POWELL,  
Collector of Customs,  
5th November, 1881.

RETURN of Customs Revenue for the Colony of New South Wales, from 1876 to 1880,  
both inclusive.

## STAMP DUTIES.

The Commissioner of Stamps to The Under Secretary for Finance and Trade.

Sir,

Stamp Office, 13th October, 1881.

By the desire of the Honorable the Treasurer, I do myself the honor to forward the following information as to the receipt of revenue from stamp duties since the passing of the "Stamp Duties Act of 1880."

- 1st. Statement of revenue collected from the passing of the Act to the 31st December, 1880.
- 2nd. Statement of revenue collected during the quarter ended 31st March, 1881.
- 3rd. Statement of revenue collected during the quarter ended 30th June, 1881.
- 4th. Comparative statement of revenue collected during the corresponding quarters ended 30th September, 1880, and 30th September, 1881.

Appendix 1,  
3, 4.

The revenue collected during the year 1880, amounted to...	...	...	...	...	£72,303	2	7
For quarter ended 31st March, 1881	...	...	...	...	£35,146	15	5
" 30th June, 1881...	...	...	...	...	42,992	19	10
" 30th September, 1881	...	...	...	...	46,997	1	10
						125,136	17 1

Making a total to 30th September, 1881, of ... £ 197,439 19 8  
which includes a sum of £6,084 16s. 4d. collected by the Treasury.

Since the beginning of the present year I have kept (with a view to compare the amount of revenue actually collected with the revenue estimated to be received from certain descriptions of instruments where the impressed stamp only is allowed to be used), a daily record of the receipts from which I am enabled to furnish the following return.

RETURN showing the revenue estimated for the year 1881, and the amount actually collected for impressed stamps during the nine months ended 30th September, 1881.

Class of Instruments.	Estimated Revenue for the year 1881.			Actual collections during past nine months.

Totals	£ 138,750	0	0	100,066	13	8

\* General duties comprise those on agreements under seal, common deeds, conveyances or transfers of any property not shares, grants, leases, and transfers of runs, &c.

The above Return does not include the amount of Revenue received on account of Impressed Stamps issued to Licensed Vendors and others on credit, from whom I receive monthly payments, as shown in Statements of Miscellaneous Receipts; and which, if added to actual collections, would make the same exceed the estimated Revenue.

With respect to adhesive stamps I am unable to furnish any such information, as it is impossible to tell on which of the five classes of instruments, viz., agreements under hand, foreign bills, drafts payable on demand, policies of insurance and receipts, adhesive stamps are used.

As credit is given to various public officers, and to certain licensed vendors, I am not in a position to positively state the amount daily received by them, but the total paid on account of such credits is as follows:—

Total amount of Credit.	Total amount paid.	Balance unpaid.
£ s. d. 33,287 1 5	£ s. d. 14,583 14 10	£ s. d. 18,703 6 7

Appendix 5, 6.

The total number of stamps issued, both impressed and adhesive, are shown in the accompanying lists or returns for the period between the 1st January and 30th September, 1881. It will be seen that upwards of 3,500,000 stamps of the value of 1d. have been impressed during that period, being an average of 90,000 per week, each of which has to be impressed separately to get a perfect impression.

Having reference to postage stamps being allowed to be used for stamp duties, I beg to give the following extract from the report of the Honorable the Postmaster General for the year 1880. The revenue for that year being £194,084 8s. 7d.

“In 1879 the revenue amounted to £171,336 5s. 5d., showing an increase for the year 1880 of “£22,748 3s. 2d.”

“The Stamp Duties Act having come into operation in July, 1880, and postage stamps being available for stamp duty purposes, a portion of the large increase of revenue collected during that year is “attributable to the operation of the new Act.”

I roughly estimated the loss to this Department by the use of postage stamps to be at least £10,000 per annum. That estimate is now shown by the quarterly returns to have been considerably underrated. These returns show a very considerable increase, which I submit is partly attributable to the use of postage stamps for stamp duty purposes.

Quarter ending	1880.	1881.	Increase.
	£ s. d.	£ s. d.	£ s. d.
31 March... ..	40,773 4 7	48,043 7 9	7,270 3 2
30 June ... ..	45,540 17 2	60,272 11 0	14,731 13 10
30 September ... ..	49,665 1 4	73,111 10 6	23,446 9 2

Since compiling the above I have had an interview, by the direction of the Honorable the Treasurer, with the Secretary of the General Post Office, who made an offer to refund the amount of £12,000 for the half-year ended 30th June last, as an approximate amount for that period on account of postage stamps used for stamp duties.

I think that offer should be accepted, but in future adjustments an additional sum of £1,000 should be added to every subsequent half-year, making as follows:—£13,000 for the half year ending December, 1881; £14,000 for half-year ending June, 1882; £15,000 for half-year ending December, 1882, and so on. On that basis I conceive the revenue would be fairly adjusted.

In concluding these remarks I take the opportunity of stating that the Act, which has now been in operation for fifteen months, appears to work satisfactorily and with little (if any) inconvenience to the public.

I have, &c.,

W. HEMMING,

Commissioner of Stamp Duties.

## APPENDIX.

(1.)

STATEMENT of Revenue collected at the Stamp Office, under the Stamp Duties Act of 1880, during the Quarters ended 30 June, 30 September, and 31 December, 1880, respectively.

### BONDED SUGAR REFINERIES.

The Pymont Sugar Refinery is worked under the "Bonded Distilleries and Bonded Sugar Houses Act," 26 Vic. No. 18 of 1862.

The raw sugar for refining is delivered by Customs Officers from the ship to the inspectors at the refinery, when all supervision by the Customs authorities ceases, except in cases of export from the refinery, when the necessary clearing papers are forwarded by the inspectors to the Customs Officer in charge of the vessel by which the sugar is shipped.

Duty is paid by the Colonial Sugar Company through this department, and receipts taken, and filed in my office.

J.H.B.

#### PYRMONT SUGAR REFINERY.

STATEMENT of Operations during the year 1880, and to 30th September in the year 1881.

	1880.	Nine months of 1881 to 30th Sept.
Raw sugar received—		
Of Foreign growth ... ..	tons. 8,241	tons. 12,780
Of Queensland growth ... ..	776	260
Of New South Wales growth... ..	2,768	2,751
*Total ... ..	11,785	15,791
Sugar issued—		
Of raw sugar, on duty ... ..	297	227
Of bastard sugar " " ... ..	7,039	9,204
Of " " export ... ..	5,270	3,012
Of " " exchange† ... ..	1,903	3,288
Total ... ..	14,509	15,731

\* Exclusive of stock on hand at end of previous year.

† Exchange—This term is applied to sugar issued free of duty in exchange for New South Wales grown sugar delivered to the refinery, less 2½ per cent., as per Treasurer's authority, dated 8th April, 1880.

#### COLONIAL DISTILLERIES.

26 Vic. No. 18, of 1862.

The Harwood Island Distillery has produced during the present year, to the 30th September, 72,926 gallons of proof spirit, and with the exception of 4,887 gallons remaining on hand at that place, and 19,464 gallons ascertained to be in the Customs Bond at Pymont, I am quite unable to account for its disposal, as under the 91st clause of the Act 13 Vic. No. 27, as soon as the spirit leaves the Distillery it passes completely out of my custody into that of the Customs. This is most inconvenient, as I am consequently unable to estimate the quantity issued on duty or export without going to another department for that information which ought to be capable of record in my own. As, however, I hold a deputation under the authority of the Governor and Executive Council to act as a Customs Officer, perhaps some arrangement might possibly be made permitting me to have charge of the spirit manufactured under my supervision, until it is disposed of.

The greater part of the spirit produced in New South Wales is exported, and as may be seen by the Statistical Register for 1880 there were sent

To Great Britain ... ..	24,057 gallons.
To Victoria ... ..	18,012 "
To New Caledonia ... ..	60,155 "

The chief causes which tend to check the sale of New South Wales spirit in the local market are the inferior quality of the spirit made, the superior quality of the Queensland rum, and the large importations of German and other foreign spirit at a very low price and very high strength.

G. H. BARNEY.

1881.

—  
**LEGISLATIVE ASSEMBLY.**  
**NEW SOUTH WALES.**

—————  
**WAYS AND MEANS.**  
 (EXPLANATORY STATEMENT.)

—————  
*Ordered by the Legislative Assembly to be printed, 15 November, 1881.*  
 —————

**EXPLANATORY Statement of the Public Accounts of  
 New South Wales, as embodied in the Ways and  
 Means for the year 1882.**

—————  
**THE CONSOLIDATED REVENUE FUND.**

The accounts now submitted differ in arrangement slightly from those of former years. Hitherto it has been the practice to submit with the Ways and Means an account for each individual year so long as the account remained unclosed. This practice had the advantage, no doubt, of showing whether the year's revenue was sufficient or otherwise to meet the authorized expenditure; but since the appropriations of Parliament have obtained a currency of two years, the continuance of the practice hitherto adopted would be inconvenient, inasmuch as it would multiply accounts which would tend to confuse rather than make clear the financial condition of the Colony.

The Ways and Means of 9th February last embraced the Surplus Revenue Account, the Account of Revenue and Expenditure for 1879, a similar account for 1880, and an account showing the proposed expenditure in relation to the estimated income for the year 1881. Although the Surplus Revenue Account is not yet closed, nor all the services authorised out of the revenues of 1879 and 1880 completed, it is not considered desirable, for the reasons above stated, to resubmit any of these accounts.

The payments made this year, and yet to be made for services chargeable thereto, will be found embodied in the account for the present year. The accounts now submitted are only two, viz. :—

1. An account of Revenue and Expenditure for 1881.
2. An account showing the proposed Expenditure in relation to the estimated Income for 1882.

These two accounts are absolutely necessary, as it would be almost impossible to explain satisfactorily the present and prospective financial position of the Colony without them. The first account to be explained is therefore

#### THE ACCOUNT FOR 1881.

In order to bring into one view the Assets and Liabilities of the Consolidated Revenue Fund for the present year so far as these can be ascertained at this time this account is prepared so as to show not only the revenue and expenditure proper to the year 1881 but the payments which have been made since the 1st January last on account of services of 1880 and previous years and the claims against those years which were outstanding on the 30th September last. The payments made during the present year, and the claims outstanding on the last-mentioned date, of course form a charge against the cash balance at the credit of this fund on the 31st December, 1880, and any other assets which were then available.

The cash balance on that date was £1,440,227 10s. 6d. ; the other assets consist of the Treasurer's advance votes of £100,000 each for the years 1879 and 1880, the former having been recouped this year, the latter repayable on or before the 31st December next; and the amount due by the Loans Account on the 31st December, 1880, for advances made prior to 1879, from the Consolidated Revenue Fund, pending the sale of Debentures, which was £465,437 18s. 7d. These assets, which together amount to £2,105,665 9s. 1d., were legally available to meet all the services of 1880, and previous years, including of course those which Parliament authorised to be defrayed out of the Surplus Revenue Account, which were either in course of completion or not commenced at the close of last year.

On the debtor side of the account the charges on account of these services are fully set forth. They are divided into two classes, namely, those services for which payment has been made between the 1st January, and the 30th September last, and those which were retained as liabilities on that date. The payments amounted to £953,317 5s. 10d., and the liabilities, particulars of which are given in the statements marked B, C, D, and E, at pages 19, 21, 49, and 73 of the Ways and Means, to £892,104 10s. 9d., making together a sum of £1,845,421 16s. 7d. To this there has also to be added £270,026 11s. 9d., being the amount of additional items of expenditure on account of services of 1880 and previous years, as per the Supplementary Estimates now before the Legislative Assembly. Deducting the assets, which amount to £2,105,665 9s. 1d., from the charges, the amount of which is £2,115,448 8s. 4d., there is left a debtor balance of £9,782 19s. 3d., which is the amount of deficiency on the account for 1880.

The revenue of this year, which is also shown in this account, is now estimated at £6,347,747, of which £4,793,730 was actually received during the first nine months, and £1,554,017, estimated as the probable revenue of the remaining three months.

These

These two sums make, as stated, a total of £6,347,747, which, if realised in full, will be by far the largest annual revenue ever collected in this or any colony south of the equator. Deducting from this revenue the debit balance of £9,782 19s. 3d. on the first division of the account, there is left a sum of £6,337,964 0s. 9d. available for the services of the year 1881. The services chargeable against this sum amount to £5,157,113 8s. 4d., which is composed of the following items, viz., authorised expenditure less £250,000 estimated savings, £4,957,216 7s., and additional expenditure yet to be authorised as per Supplementary Estimates now before the Committee, £199,897 1s. 4d. The authorised expenditure is £25,750 less than the amount estimated as the charge against the year when the last Financial Statement was made. This sum represents the amount of the reductions made in the Estimates-in-Chief for 1881 in their passage through Committee of Supply.

Treating the account as a whole, that is, making no distinction between current and arrear expenditure, it would show an estimated surplus at the close of this year of £1,180,850 12s. 5d. The following statement will show more clearly, perhaps, how this result is arrived at:—

*Assets.*

Cash Balance 31st December, 1880	...	...	...	£1,440,227	10	6
Treasurer's Advance for 1879, repaid in 1881	...	...	...	100,000	0	0
Treasurer's Advance for 1880, to be repaid in December next	...	...	...	100,000	0	0
Amount due by the Loans Account	...	...	...	465,437	18	7
Amount of Actual and Estimated Revenue for the year 1881	...	...	...	6,347,747	0	0
Total Assets	...	...	...	£ 8,453,412	9	1

*Liabilities.*

Payments made on account of Services of 1880 and previous years from the 1st January to the 30th September, 1881	...	...	...	£ 953,317	5	10
Amount of appropriations on account of 1880 and previous years, retained for expenditure on same date...	...	...	...	892,104	10	9
Amount of authorized expenditure for the year 1881—						
Less £250,000, estimated Savings	...	...	...	4,957,216	7	0
Amount of the Supplementary Estimates now before the Legislative Assembly	...	...	...	469,923	13	1
Total Liabilities	...	...	...	£ 7,272,561	16	8

Deducting the total liabilities from the total assets thus shown, there is left the balance above stated, namely, £1,180,850 12s. 5d.

As

As the actual and estimated revenue of this year, as now ascertained, far exceeds the original estimate of February last, the following statement is appended in order to show the sources from which the increase is being derived :—

Head of Receipt.	Original Estimate.	Actual and Estimated Revenue.	Short of Original Estimate.	In Excess of Original Estimate.
<b>TAXATION.</b>

#### ESTIMATED ACCOUNT FOR 1882.

This account it will be observed is commenced with the estimated balance at the credit of the account for 1881, namely, £1,180,850 12s. 5d. The revenue of next year is estimated at £6,240,940. These two sums make together £7,421,790 12s. 5d., which is the amount that will probably be available to meet the expenditure of 1882. According to the Estimates now before the Legislative Assembly that expenditure is estimated at £5,961,368 8s. Deducting this sum from the credit of £7,421,790 12s. 5d. above mentioned, there is left an estimated surplus of £1,460,422 4s. 5d.

The

The following are the principal increases in the Estimates of expenditure for 1882 :—

Immigration ... ..	£35,000	0	0
Charitable Allowances (including £12,500 for re-building Sydney Infirmary) ... ..	22,800	0	0
New Services :—			
Fisheries Commission... ..	3,310	0	0
State Children's Relief Department... ..	3,160	0	0
State Nursery ... ..	1,160	0	0
Public Instruction ... ..	84,208	0	0
Grants in aid of Educational Institutions (including £8,500 for the Sydney University—£5,000 of which is for an additional endowment) ... ..	15,731	0	0
Petty Sessions—being re-arrangement ... ..	19,145	0	0
Prisons ... ..	13,287	0	0
Survey of Lands ... ..	76,527	0	0
Harbours and Rivers Navigation—Dredge Service ... ..	8,200	0	0
Colonial Architect :—			
Public Works and Buildings :—			
Parramatta Lunatic Asylum... ..	14,800	0	0
Other Public Works and Buildings ... ..	66,482	0	0
Revotes for Public Buildings ... ..	23,928	0	0
Roads and Bridges :—			
Construction and Maintenance ... ..	92,701	0	0
Revotes of 1878 and 1879 ... ..	25,764	0	0
Railways—Existing Lines :—			
Working Expenses ... ..	107,302	0	0
Post Office ... ..	5,810	0	0
Electric Telegraphs ... ..	5,092	0	0
Department of Mines ... ..	21,400	0	0

The increase for these services amounts to the sum of £645,807 0 0

The difference between this and the actual increase is made up of increases on some items and decreases on others.

#### TREASURY BALANCES.

Particulars of the balances at the credit or debit of the various Public Accounts on the 30th September last, as exhibited by the books of the Treasury, will be found at page 109 of Ways and Means. The following is an abstract of these balances and the distribution of same :—

#### BALANCES AS PER TREASURY BOOKS.

Consolidated Revenue Fund... ..	*£2,308,166	3	9
Trust Fund ... ..	1,525,490	13	0
Old Loans Account ... ..	154,180	2	5
Gross total ... ..	£3,987,836	19	2
Less—Debit balance on the General Loan Fund ... ..	2,839,202	8	5
Net total ... ..	£1,148,634	10	9

#### DISTRIBUTION

\* In addition to this there is a sum of £465,437 18s. 7d. due by the General Loan Account, which would bring the credit on the Consolidated Revenue Fund up to £2,773,604 2s. 4d.

## DISTRIBUTION OF BALANCES.

## Bank of New South Wales—

Public Account, Sydney ... ..	£3,337,355	6	2
Special Bank Deposits ... ..	821,822	0	0
	<hr/>		
		£4,159,177	6 2

Cash in the hands of the Receiver ... ..		19,591	0 1
Securities in the Treasury Chest ... ..		613,336	12 3
Securities in Bank of New South Wales ... ..		600	0 0
		<hr/>	
Total as above ... ..		£1,148,634	10 9

## THE LOANS ACCOUNT.

As usual, statements are appended to the Ways and Means, showing the Assets and Liabilities of the Loan Account, and the exact condition of the several votes taken for Railways and other services authorised to be carried out by borrowed money. These Statements will be found at pages 79–104. During last Session a Loan Bill was passed, authorising a Loan to be raised to the amount of £7,807,500 for carrying out the following services, viz. :—

## Railways :—

Southern and Northern Junction Railway—From Homebush to Waratah (double line) 95 miles ... ..	£2,000,000	0	0
Sydney to Wollongong and Kiama, 68 miles ... ..	1,020,000	0	0
Goulburn to Cooma, <i>via</i> Tarago, Bungendore, and Quean- beyan, 130 miles ... ..	1,430,000	0	0
Albury to the river Murray (double line), including moiety of cost of construct- ing the Bridge, 1¼ mile ...	80,000	0	0
Orange to near Forbes, <i>via</i> Molong, 83 miles ... ..	705,500	0	0
Narrandera to Jerilderie, 63 miles	518,000	0	0
Cootamundra to Gundagai, 34 miles ... ..	218,000	0	0
Murrumburrah to Blayney, 108 miles ... ..	1,260,000	0	0
	<hr/>		
Carried forward... ..	£7,231,500	0	0

Brought

Brought forward ...	£7,231,500	0	0		
From Wagga Wagga to Albury, to complete the Line ...	95,000	0	0		
Alterations and Additions to Station Buildings and Siding Accommodation to meet in- creasing traffic, inclusive of payments made in 1880 in anticipation of this vote ...	300,000	0	0		
				£7,626,500	0 0
Harbours and Rivers Navigation—					
Towards construction of Southern Breakwater, Newcastle ...	20,000	0	0		
Towards construction of Break- water, Clarence River ...	30,000	0	0		
Towards completing Darling Harbour Wharf and Exten- sion of Railway to deep waters of Port Jackson ...	60,000	0	0		
Towards Harbour Works, Lake Macquarie ... ..	20,000	0	0		
				130,000	0 0
Roads and Bridges—					
Bridge over Manilla River at Manilla ... ..	27,000	0	0		
Bridge over the Gwydir or Big River at Bingera ... ..	24,000	0	0		
				51,000	0 0
Total ... ..				£7,807,500	0 0

The Liabilities and Assets of the Loan Account on the 30th September last were as follows:—

*Liabilities.*

Unexpended Votes—

Old Loans Account ... ..	£14,389,782	11	7
General Loan Account ... ..	154,180	2	5
Amount due to the Consolidated Revenue Fund for Advances, pending sale of Debentures ... ..	465,437	18	7
Overdraft at Bank of New South Wales... ..	2,896,020	8	5
Total Liabilities ... ..	£17,905,421	1	0

*Assets.*

Cash in the Bank of New South Wales at the credit of the Old Loans Account, being part of the balance at the credit of the Public Account ... ..	£154,180	2	5
Amount on Special Deposit with four of the city Banks	56,818	0	0
Amount yet to be raised under various Loan Acts ... ..	17,694,422	18	7
Total Assets ... ..	£17,905,421	1	0

It

It is necessary to mention that in May last a Loan was negotiated in London for £2,050,000, so that the amount to be raised, as above shown, has to be reduced by that sum. The proceeds of this Loan cannot be brought to account in the books of the Treasury until complete accounts are furnished by the London Branch of the Bank of New South Wales, and these are not due in the Colony for some time yet, the last instalment of the Loan having only been paid on the 30th ultimo. This sale of Public Securities is by far the most successful that has ever been made. The prices realized averaged £103 8s. 11d. per cent. Although details have not yet been received the following is an approximate result of the sale, viz. :—

Proceeds of £2,050,000 Debentures, at average price of							
£103 8s. 11d....	...	...	...	...	...	£2,120,639	11 8
Deduct Charges, &c. :—							
Brokerage, $\frac{1}{4}$ per cent. on							
£2,039,200 ...	...	...	...	£5,098	0 0		
Bank's Commission ...	...	...	...	3,812	10 0		
Stamp Duty, $\frac{1}{8}$ per cent. ...	...	...	...	2,562	10 0		
Advertising, &c., say ...	...	...	...	500	0 0		
						11,973	0 0
Net proceeds ...	...	...	...	£2,108,666	11 8		

### TRUST FUND.

The balance at the credit of this Fund on the 30th September last was £1,525,490 13s. 0d. On the 31st December, 1881, it stood at £1,190,130 8s. 3d., so that there has been an increase during the last nine months of £335,360 4s. 9d. The following statement will show on what accounts this increase chiefly occurs :—

	Balances.		Decrease.	Increase.				
	31st Dec., 1880.	30th Sept., 1881.						
	£	s. d.	£	s. d.	£	s. d.	£	s. d.

	£1,190,130	8 3	1,525,490	13 0	12,320	12 4	347,680	17 1

## PUBLIC DEBT.

On the 31st December, 1880, the Public Debt stood at £14,903,919 9s. 2d. Since then a loan has been negotiated in London to the extent of £2,050,000. The outstanding debt amounts at the present time to £16,947,119 9s. 2d. During next year Interminable Debentures to the amount of £232,130 are payable at the option of the Government. As it is not considered desirable to renew this small loan, provision will be made in an additional Estimate for 1882 for its liquidation out of the Consolidated Revenue Fund. With the exception of this sum, and the gradual extinction of the Million Railway Loan of 1864, no portion of the Public Debt falls due till the year 1888, when Debentures issued under various Acts mature to the amount of £499,200. The Loans authorised but not yet negotiated amount to £15,644,422 18s. 7d., a sum which, at the present rate of expenditure, will not be all required for very many years to come. In fact there is no immediate need of borrowing, as the general funds at the credit of the Government are ample to meet all demands for Loan services.

The Treasury, New South Wales,  
31st March, 1881,

JAMES PEARSON,  
Accountant.

## TENTH ANNUAL REPORT

OF THE

## AUDITOR GENERAL

ON

THE TREASURER'S STATEMENT OF THE RECEIPTS AND EXPENDITURE OF THE CONSOLIDATED REVENUE FUND, AND OTHER MONEYS, FOR THE YEAR 1880.

(Under Act 33 Victoria No. 18.)

In terms of the 22nd clause of the "Audit Act of 1870," the Treasurer's Accounts were sent to me on the 31st of March. They were returned for the consideration of certain corrections, which were found on examination to be necessary, on the 6th of June, and were finally returned to me with such amendments as were assented to, on the 13th.

The monthly adjustment of discrepancies between the postings of the Treasury and Audit departments, which has been established, has reduced the work of the final audit, and I have the satisfaction of reporting that the corrections required in these Accounts were found to be generally of an unimportant character.

2. The Supply Bills, under which the Funds were appropriated for carrying on the Service, were as follows, viz. :—

43 Victoria, No. 14—Services, 1879-80	...	...	£185,000
"    "    15—    "    January, 1880	...	...	308,379
Works	...	...	614,818
Treasurer's Advance	...	...	100,000
"    "    19—Services, February, 1880	...	...	385,379
"    "    21—    "    March,    "	...	...	385,379
"    "    26—    "    April,    "	...	...	385,379
Macquarie-street Resumption...			60,000
"    "    31—Services, May, 1880	...	...	385,379
			£2,809,713

The Annual Appropriation Act was assented to on the 2nd of July, granting for the Services of 1879 and

previous years	...	...	...	...	£202,366	17	6
And for the Service of 1880	...	...	...	...	4,420,016	5	2
Total	...	...	...	...	£4,622,383	2	8

The practice which has obtained for many years past of revoting in the annual Appropriation Act the sums granted in the monthly Supply Acts, presents this anomaly, that the grants are made twice over; practically, however, this mode

of voting supply has not been found inconvenient, inasmuch as the reductions that have been made in the Estimates-in-Chief have usually been held as covered by the Supply Acts.

I call attention to this incongruity because it has not escaped the notice of a keen inquirer into our system, sent over from New Zealand to investigate the financial systems of the Australian Colonies. I allude to Mr. Fitzgerald, the Controller and Auditor General of that Colony, whose report has just been issued.

3. In my last report I discontinued the practice of summarising the figures contained in the Treasurer's Statement, and as it seems to be of no practical utility I do not propose to take it up again. The public interest in the information afforded has long since subsided, and no good purpose would seem to be served by the encumbering of the report with uninteresting figures, which are set forth with sufficient clearness in the Statements themselves. I therefore propose to confine my observations to points which have arisen in the course of audit to provoke controversy with some one or other of the public Departments as being apparently in contravention of the provisions of the Audit Act, or of other Acts or Regulations appertaining to the points in dispute, or which seem to require explanatory notice.

4. I cannot help regarding the reintroduction of the clause for extending the life of the Votes to the end of the second year as unnecessary. As I pointed out in my Report on the Accounts for 1879, the expedient was adopted to meet a pressing difficulty created by the late period of the year at which the Appropriation Act for the services of 1877 was passed, more than three-fourths of the year had expired when this Act was assented to, and it was impossible within the short period which intervened between the 11th October and the end of the year to call for tenders and obtain satisfactory contracts for the Public Works for which provision was made. Many of the Votes must have lapsed under the 17th clause of the Audit Act to the detriment of the public interest but for the prolongation extended to them by the clause referred to. Since that time, however, there has been no similar justification for overriding the express provisions of the Audit Act, and to perpetuate the innovation in the absence of pressing necessity is much to be deprecated. The rendering of Accounts to Parliament of the expenditure of its Votes is delayed, and the efficiency of the audit, owing to lapse of time, is seriously impaired, whilst the Ways and Means, presented by the Treasurer to Parliament, cannot be prepared with that certainty or precision which is to be desired in laying his financial proposals before your Honorable House.

5. I would again advert to the proposal for adopting an uniform system whereby the receipts and payments within the financial year are made the basis of appropriations and of the accounts laid before Parliament, to which attention was invited in my last report. There has been some discussion on this proposal between the Treasury officers and myself, but they seem to think that the uncertainty of getting supply before the close of the year raises an insuperable obstacle to the carrying into effect of the proposal. Nevertheless, if this difficulty could be removed, I believe that its adoption would go far towards the simplification of the Accounts by doing away with the necessity for taking separate Votes for "Arrear Services," and confining the Votes to the estimated actual payments within the year without regard to date of service. The principle contended for is in accord with the Imperial practice under the provisions of the Exchequer and Audit Departments Act of 1866.

6. I will now proceed to bring under notice the points of difference which have arisen in the course of audit in connection with the accounts during the course of the past year. A warrant for the sum of £18,936 19s. 4d., represented to be for "Loans Services,"—namely, for "charges in connection with the negotiation of the late Loan," that is to say, the Loan of £3,249,500 floated in London in the month of May, 1879, was submitted by the Treasurer for my certificate, upon which I felt it to be my duty to raise a question, and as we could not agree the case was forwarded by me for the opinion of the law officers.

The Treasurer's contention was that whereas the Loan Fund in the Colony had been fed by advances from the Consolidated Revenue it was fair to charge to Loan Services certain charges brought forward by the Bank of New South Wales in connection with advances made by its branch in London on the Public Account; but inasmuch as on analyzing those charges it was found that a very small proportion had any reference to "Loans," I demurred to signing the certificate required by the Audit Act. The Treasurer subsequently gave way and placed the sum on the Supplementary Estimates. The papers in the case will be found in the Appendix marked A.

7. A further disagreement with the Treasury has to be reported in connection with a warrant submitted for the sum of £76,857 12s. 7d., representing transfers from the Consolidated Revenue Fund to the Treasurer's Advance Account for re-issue from that account. But inasmuch as no vouchers had been furnished for several of the payments, I felt bound to withhold my certificate for the issue of the money until vouchers were furnished by which the credits could be verified. Upon the assurance however of the Treasury Accountant that the missing vouchers would be forthcoming, I was induced to certify to the legal availability of the money. The Treasurer having insisted on his right to demand a warrant in the absence of supporting vouchers, I felt constrained to submit the question for the opinion of the law officers, but in consequence of his having received intimation that the vouchers had been furnished, the Attorney General did not deem it necessary to give an opinion on the question. The correspondence will be found in the Appendix marked B.

8. A difference which it is my duty to notice arose with the Treasury on the subject of a claim to refund of deductions under the Superannuation Act of 1864. By the Superannuation Act Repeal Act of 1873 (section 9), officers in the Public Service at the time of the passing of this Act were entitled to the refund of deductions that had been made from their salaries under the Act of 1864, but it had been ruled by a legal opinion given in 1873—(See Appendix to my report on the Accounts of that year)—that those officers only were entitled to refunds from whose pay or salary deductions were, up to the passing of the Act, continuing to be made under the Act of 1864. A claim was made on behalf of Mr. Samuel South, an officer then in the Telegraph Department, and formerly in the Railway Department, but inasmuch as his service did not fulfil the obligations declared to be essential under the opinion above quoted, I felt constrained to decline to certify that he was entitled to the refund claimed. In consequence of the pressure brought to bear upon me, I deemed it desirable to submit the case for the opinion of the Law officers. I beg to append copies of the case and of the opinion given, by which it will be seen that the Audit Office view of the question received favourable support. (*See Appendix C.*)

9. In my report on the Accounts for 1879 (clause 10), I had to invite attention to certain overcharges made by the Bank of New South Wales under the Agreement of 1876 for Commission on payments made in London. I have now to report the credit by the Bank on the 29th of December last of a sum of £24,033 6s. 5d. to the Public Account in liquidation of this and other claims made by the Treasury, as set forth in the Statement in the Appendix marked D.

After ineffectual negotiations with the several Banking institutions of the Colony for the conduct of the Public Banking Business, an agreement was finally made with the Bank of New South Wales, and approved by the Governor and Executive Council, on the 8th of February, for a period of two years certain, from the 1st day of January, 1881, to be terminable at any time afterwards by six months' notice from either side. Although applied for in the usual course the Audit Department has, in so far as any official communication is concerned,\* been kept in complete ignorance of the existence of the agreement. A copy thereof was laid on the table of your Honourable House on the 8th of April last, together with the correspondence in connection with it, and it was only through this channel that I obtained any knowledge of the terms agreed upon.

10. In the year 1879 the advance to the Treasurer, to enable him to make advances to Public Officers, and on account of other Governments, and to pay expenses of an unforeseen nature, was raised from £60,000 to £100,000, the whole amount to be adjusted not later than the 31st of December, 1880. It is my duty to report that by letter dated 31st December, I was informed that the Advance Account would require to remain unadjusted until the re-assembling of Parliament enabled the Treasurer to make provision for the same; and on the 9th May I received intimation, by letter of same date, that the advance had been adjusted and the amount repaid on the 3rd of that month. I do not think that I shall be travelling out of the realm of my duty if I submit for the information of Parliament an Abstract of the transactions of the year as they are recorded in the Registers of the Audit Department under the head of "Treasurer's Advance Account."

Upon inspection of the Statements which will be found in the Appendix marked E, it will be seen that of the issues amounting to £403,167 9s. 10d.—*vide* Special Deposit Accounts, page 89, in the Treasurer's Abstracts—there was paid out as follows, viz. :—

Pending Warrants	...	...	...	...	...	£105,628	8	1
Supplementing Votes	...	...	...	...	...	159,611	7	0
New Services	...	...	...	...	...	137,927	14	9
Total	...	...	...	...	...	<u>£403,167</u>	<u>9</u>	<u>10</u>

11. The Accounts of the Commissioner and Engineer-in-Chief for Roads and Bridges having shown that the Votes for the Service of 1879 had been used for the Service of 1880, a surcharge to the amount of £19,414 9s. 10d. was raised with a view to the bringing of the expenditure legitimately within the votes of Parliament. It was pleaded by the Department that the introduction of the 15th clause into the Appropriation Act justified the course that had been taken, as it gave the votes for 1879 vitality to the 31st December, 1880. The question was referred by the Commissioner for Roads to the Treasury with a view to ascertain the correctness of his position, and if not confirmed to ascertain whether the Treasurer would be disposed to place upon the Estimates a sum to make good the surcharge, seeing that the votes for 1879 were completely exhausted. The

\* Since this Report was closed a communication has been received from the Treasury transmitting the agreement.

The view taken by the Treasury was not favourable to the Roads Department, but inasmuch as the public interests were not prejudiced by the course adopted, and the persistence in my objections would have upset the accounts, and involved considerable trouble to all three Departments without corresponding benefit, I was induced to withdraw the surcharge on condition that the irregular practice should at once be abandoned. (*See Appendix F.*) I should here notice the unsatisfactory manner in which the Road Accounts *under Trustees* are rendered. There is great delay in getting in the accounts and when furnished they are often full of inaccuracies. I may perhaps be permitted to express the opinion that it would conduce very much, I think, to economy, and I am sure, to greater regularity, in the disposal of the votes for minor roads if their administration were kept more within the control of the Department.

12. A question in connection with charges for Trial Surveys under the "Tramways Extension Act of 1880" (43 Vic., No. 25) was raised by this Department as to the legality of their debit, firstly to Railway Trial Surveys, and secondly to the Public Works Loan Act of 1880 (44 Vic., No. 12). Under this Act provision was made to the extent of £600,000 for the construction of Tramways, authorised by the Act 43 Victoria, No. 25, but no vote had been taken for the preliminary survey of Tramway lines, and therefore the Commissioner for Railways had sanctioned the expenditure for salaries and allowances to surveyors, &c., to the vote for Railway Trial Surveys, and had subsequently transferred it, at my instigation, to the Tramway Loan Vote above referred to. Upon a careful comparison of the two Acts, however, it appeared that the vote of £600,000 was confined to the construction of the Tramways authorised by the Act 43 Victoria, No. 25, and as the services for which the charges were made were not authorised by that Act, I advised that a vote should be taken to cover the expenditure which still remains a charge upon the Loan Vote referred to. As the "Tramways Extension Act" authorises the construction of Tramways other than those mentioned in the Schedules to that Act, the Commissioner for Railways urged that the spirit, if not the letter, of the Appropriation in the Loan Act (44 Vic., No. 12) justified the charge to that Loan, and as the point was a moot point, I have not thought it incumbent upon me to disallow the payment, although it is one which seems proper to be brought under the notice of Parliament.

The minutes and correspondence on the subject are given in the Appendix marked G.

13. Another difficulty has occurred with the Railway Department in consequence of the apparently unnecessary limitation of the terms of appropriation in the Loans Act 40 Vic. No. 12. Votes were taken under that Act as follows, for "Railway Extensions" :—

Orange to Wellington	...	...	...	...	...	...	£350,000
Wellington to Dubbo	...	...	...	...	...	...	260,000

and Warrants were certified to the Treasurer to the full extent of these votes.

It appeared from a memorandum of the Engineer-in-Chief for Railways that whilst the vote for the extension from Orange to Wellington was exhausted, there was an unexpended balance of £136,964 on the extension from Wellington to Dubbo, and he asked that the total length might be treated as one vote. This course was approved by the Minister and concurred in by the Treasurer; but it was thought proper to submit the question for my opinion. Whilst fully recognizing the reasonableness of the proposition I felt unable to concur in it, in the face of the

the express provision contained in the 3rd clause of the "Loans Fund Amalgamation Act of 1879" which is to this effect: "Provided that nothing in this section contained shall authorize the application to any such Loan Service of any larger sum of money than is or shall be by the special Act authorizing such service expressly appropriated or set apart therefor."

Whatever view may be taken by the Minister who can defend his action before Parliament, I have always considered that the Auditor General is bound by the strict letter of the law; and when that is of no doubtful interpretation, no supposed intention of Parliament can be allowed to override it.

Under these circumstances, when it was found that the warrants for the first part of the line were exhausted, and that payments were being made out of the warrants granted for the second part of the line, those payments were challenged, and they have been placed in suspense. Notice of disallowance has been given from time to time to the Treasurer, and some of the discharges, which under the 28th section of the Audit Act I am required to give have been withheld, pending the settlement of the question towards which object no attention has to my knowledge yet been given.

The Engineer-in-Chief states that the division of the vote was a departure from his intention, and the subsequent vote of £40,000 in the "Loans' Act" (44 Vic. No. 12) to complete the works—Orange to Dubbo—would seem to show that the Legislature intended that the line should be one. Nevertheless, I feel myself bound by the terms of the Appropriation, and continue to hold in suspense payments to the extent of £107,821 6s. 4d., as per statement in the Appendix marked H. By this statement it would appear that at the close of the year there was a net credit balance on the whole line, "Orange to Dubbo," of £62,668 16s. 8d.

14. Payments to the extent of £10,630 19s. 2d., on account of Immigration in the year 1879 having been charged to the "Treasurer's Advance Account," that sum was on the 27th of January of the present year transferred to the debit of the Immigration Remittances Trust Fund. Exception had been taken by me to the charge to the Immigration Vote of 1880, of certain services rendered in 1879 under a Warrant obtained against the appropriation for 1880, and the Treasury was advised that the payments as posted must be disallowed. At the same time the Treasury was informed that by a return obtained from the Agent for Immigration the sum of £7,813, paid out of the 1879 vote, was chargeable to the account of "Immigration Remittances," and should be transferred to that account. This opinion was based upon the ground that the immigrants themselves had contributed to that extent towards the cost of freight of the vessels employed in their transport. This view was at first combated, but seeing that the only way out of the difficulty, if my proposition was rejected, was to apply to Parliament for a vote, it was determined to make the transfer and so relieve the vote.

15. An attempt was made by the Department for Mines to make use of a vote of £5,000 for prospecting for gold for the service of the year 1878 towards the service of the year 1880, which I was obliged to challenge. It was contended by the Department that under the 15th clause of the Appropriation Act the vote was kept alive till the 31st December, 1880, but upon its being shown that, whilst the vote was applicable to the payment of services rendered in 1878 up to the end of 1880, it was not applicable to the payment of services rendered in 1880, unless under contract, a re-vote was taken in the Estimates for 1880 out of the accumulated Surplus Fund, to which the expenditure was carried.

16. In accordance with the directions contained in the 36th clause of the Audit Act, I have now to report the following cases of default in accounting for Public Moneys.

In my Report on last year's Accounts I had occasion to notice that deficiencies had been brought to light in the accounts of the Prisons Department, and that the Deputy Comptroller had pleaded guilty to the embezzlement of certain sums paid to him by the Roads Department for Prison labour. It is now my duty to report that Mr. W. G. Beverley is undergoing a sentence of imprisonment for his defalcations, but I have not been informed as to, nor have I the means of ascertaining the extent of, his embezzlements. The result of the Treasury Inspector's inquiry has not been communicated to me, and as the Audit Act does not empower me to enter the Public Offices I am precluded from instituting any inquiry of my own into the matter.

The Audit Department is thus placed at a disadvantage in its attempt to comply with the terms of the Audit Act, which requires full particulars "of every case in which default shall have been made in accounting for Public or other moneys."

On the 29th of June, 1880, I forwarded to the Treasury a list of unsatisfied surcharges raised upon the Accounts of the Comptroller General of Prisons, extending as far back as the 6th May, 1878, shewing a total of £91 11s. 1d.,\* and requested that under the provisions of the 29th section of the Audit Act they might be enforced against that officer. To this letter a reply was received under date 13th July, 1880, to the effect that the Colonial Treasurer had approved of the matter remaining in abeyance pending action by the Colonial Secretary. I was not informed under what provision of the law the Treasurer came to this resolution, nor can I find in the Audit Act any authority for it. The 30th section of the Act gives to Public Accountants the right of appeal to the Governor in Council against a surcharge of the Auditor-General, but authorises no lesser authority to interpose. On the 7th of September, and again on the 19th January last, I reminded the Treasurer of the still unsatisfied state of this surcharge, but to these reminders no attention has been given, in so far as my knowledge extends.

Again, on the 9th of March last I forwarded a second list of surcharges, amounting to £45 19s. 3d., requesting their enforcement under the 29th section of the Audit Act, and in so far as I have the means of knowing, no action has yet been taken for the recovery of the money. The surcharges still stand in the books of this Department against the Comptroller General of Prisons, and a list of these will be found in the Appendix marked I.

17. Mr. J. T. Evans, a clerk in the Department of Lands, was found to have altered a cheque of the Under Secretary's for the payment of certain salaries for the sum of £18 15s., to £818 15s., and to have disappeared with the proceeds. The fraud was not detected until the delinquent had absconded. It was ascertained that he had taken his passage in a ship sailing for San Francisco, and he was followed by a detective in the mail steamer, who received him on landing and brought him back. A bank draft for £640 was found upon his person, and pleading guilty he was sentenced to a term of imprisonment.

There was found in his possession besides the draft referred to cash to the extent of £62, and a sum of £25 was recovered from his landlord. The public loss, therefore,

---

\* Since this list was sent on, three surcharges to the amount of £2 17s. 5d. have been withdrawn.

therefore, was reduced to comparatively small dimensions. The authority of the Governor and Executive Council (see minute in the Appendix marked J) was obtained under the 31st clause of the Audit Act to enable me to pass accounts found to be unacquitted, to the extent of £165 11s. 2d., which has been done accordingly.

18. Mr. Sidney Schrieber, Clerk of Petty Sessions and Land Agent at Bre-warrina, disappeared from his district, and has not been heard of. It appears by a statement published in the Appendix marked K that the amount of his collections unaccounted for was—

As Clerk of Petty Sessions	...	...	...	...	£134	0	6
As Land Agent	...	...	...	...	684	17	9
							<hr/>
					£818	18	3
There was recovered from his sureties	...	...	...	...	634	0	6
							<hr/>
Leaving a deficiency of	...	...	...	...	£184	17	9
							<hr/>

19. The following defaults, for the curing of which Executive authority has been obtained, also require to be noticed, viz. :—

The late G. H. Rowley, Land Agent at Hartley	...	...	...	...	£10	0	0
							<hr/>
And M. Hanrahan, late assistant Land Agent at Dubbo	...	...	...	...	3	0	0
							<hr/>

both of these being short remittances in connection with the purchase or lease of lands.

20. In the Appendix will be found the usual list of Balances transferred from one head of service to another by the authority of the Governor and Executive Council under the provisions of the 18th section of the Audit Act. (See Appendix L.)

21. Under the 31st section of the Audit Act, the authority of the Governor and Executive Council has been obtained to enable me to pass certain payments without the production of vouchers, which will be found set forth in the Appendix marked M, but they are not of sufficient importance to require special comment.

22. A list of surcharges raised during the year, showing those recovered, withdrawn, and outstanding in connection with the several Departments named in the list is submitted for reference if required. (See Appendix N.)

The only items which seem to require particular notice are those connected with the accounts of the Comptroller-General of Prisons, £95 3s. and £42 7s., and the surcharge of £4 10s. against the late Superintendent of Stores. These have been the subject of special reference to the Treasurer for enforcement under the 29th section of the Audit Act, but up to this time remain unsettled, and the items are held open as against the parties in the books of this department.

23. I have further appended to this Report the undermentioned statements :—

- Appendix O.** *First.* A schedule of payments made without warrants, and disallowed in the Treasurer's Accounts.
- Appendix P.** *Second.* The usual statements in connection with the Registration of Brands and Public Abattoirs, which are not separately shown in the Treasurer's Statements, although so required by the Act.
- Appendix Q.** *Third.* A specification of the liabilities of the Consolidated Revenue Fund (proper) for the year 1880.

24. Under the opinion given by Mr. Attorney-General Windeyer in 1879, the following officers have retired upon the fund provided by the Constitution Act, during the course of the past year, known as Schedule B, namely :—

T. C. Battley, Clerk of Petty Sessions, after 36 years service	£118 12 0
Charles Nightingale, Post Office, 28 years service	176 15 0
L. I. Brennand, Stores, 25 years service	142 17 0

25. A statement showing the names of officers, and the amount of refund of contributions, with interest paid to each under the provisions of the 9th section of the Superannuation Act Repeal Act of 1873 will be found in the Appendix marked R. It had been held that the words of the 9th and 13th sections, quoted below,\* precluded the refund of deductions to officers in receipt of pensions, but the legal opinion before quoted in the case of Mr. Phillips set at rest the doubts that had existed on this point.

There still exists in the minds of many contributors a doubt as to the expediency of claiming the deductions made from their salaries, under the Act of 1864, for fear of prejudicing their claims; and I may, perhaps, be permitted to express an opinion that if the reception of their contributions does not prejudice the interests of officers to whom pensions are assigned under the Constitution Act, neither should it prejudice the interests of those who may be in a position to prefer a claim under the Act of 1864.

26. In the Appendix will be found the undermentioned Returns, viz. :—

*First*—A Statement of Advances made to Public Departments to 31st December, 1880, but remaining unadjusted at this date. Appendix S.

*Second*—A Statement of the Number of Letters and Queries issued to Public Accountants to 31st December, 1880, unreplied to at this date. Appendix T.

The latter Statement is published as evidencing the difficulties with which the Audit Department has to contend in its efforts to extend an effective supervision over the public accounts. Indeed, the inattention to, and the delay in replying to, the queries from the Department, may be regarded as the chief obstacle to prompt and effective audit.

27. The great addition to the clerical labor of the department by the legislation of the past year is also deserving of notice.

The introduction of the Public Instruction Act has, by the conversion of the whole of the Education Staff into Civil Servants, added considerable over 2,000 to the number of public servants with specific salaries voted by Parliament, and requiring individual attention, added to which it has been found necessary to make a monthly in place of a yearly audit of the general accounts of the department.

Then there are the Stamp Duties Act, the Wharfage and Tonnage Rates Act, and the Lands Act Further Amendment Act, all involving more or less careful supervision.

The

\* 36 Vic. No. 29, sec. 9 :—Provided always that no such deductions shall be refunded to any person to whom any pension gratuity or payment shall have been or be granted or made under this or any Imperial or the said repealed Act and that no pension gratuity or payment under this Act shall be granted or made to any person to whom any such deductions shall have been or be refunded as aforesaid.

36 Vic. No. 39, sec. 13 :—Provided always that nothing in this Act shall be deemed to alter or affect the Constitution Act or any instruction issued by Her Majesty to the Governor in pursuance thereof or to prejudice or affect the rights of any members of the Civil Service in office at the time of the passing of this Act and who shall not have received any refund of deductions under the 9th section hereof to any pensions or superannuation allowances to which they may claim to be entitled by virtue of any Imperial Act Order in Council or instruction as aforesaid.

The number of primary or covering vouchers to the Treasurer's Receipts and Payments have increased from 51,729 in 1878 to 60,688 in 1880, with, of course, a corresponding increase in the number of subordinate vouchers or documents by way of support to the covering vouchers, and all demanding careful examination.

The Land Revenue also exhibits an addition to the Registers of Conditional Purchases during 1880 of about 9,000 selections, whilst for the present year Registers have to be opened for a further addition of nearly 10,000 selections. It may not be uninteresting to state that there were upon the Registers of the Department, at the close of the last year, no less than 95,629 selections subject to annual payment of interest, and requiring careful supervision to check the payments due under the provisions of the law.

28. I have further to invite attention to three separate statements in the Appendix marked U 1, 2, 3, designed to show the payments on account of the Sydney International Exhibition during the past year. They show the expenditure as follows, viz. :—

1. Out of Special Vote ... ..	£33,000	0	0
2. From Receipts under the Act of 1879 ... ..	28,710	15	1
3. From Treasurer's Advance ... ..	19,166	0	2
Total ... ..	£80,876	15	3

The expenditure at the close of 1879 was,

Under the Act ... ..	£15,083	5	6
Under Votes ... ..	214,733	1	2
	229,816	6	8

Grand total ... .. £310,693 1 11

The receipts were to 31st December, 1879 ... £25,186 13 4

" " " 1880 ... 18,677 9 8

43,864 3 0

Making the total net cost to the close of 1880 ... .. £266,828 18 11

It should be noticed that in the No. 3 account there are payments by the Bank of New South Wales, in London, to the extent of £6,287 6s. 6d., for which no accounts have yet been furnished.

29. By the Bank Sheets of the London branch of the Bank of New South Wales for the month of December, 1880, there appear to be two charges :—

One for Interest, July to December ... ..	£23,269	16	10
One for Commission, same date ... ..	2,373	4	4
Together ... ..	£25,643	1	2

Which for want of appropriation or otherwise of funds to which they could be charged, have not been adjusted in the Treasurer's Sydney Accounts. (*See Appendix V.*) On the charge for Commission, a surcharge will have to be raised when the sum is brought to account.

30. I have only to add that, subject to the objections herein contained, the accounts are found to correspond with the postings in the Audit Department.

Department of Audit,  
30th June, 1881.

C. ROLLESTON,  
Auditor General.

APPENDIX

APPENDIX A.

GENERAL LOAN ACCOUNT.

Warrant, No. 34; Act, 33 Vic. No. 18.

To the Auditor General,—

The amount of moneys likely to become due and payable out of the General Loan Fund, during March now next, is eighteen thousand nine hundred and thirty-six pounds nineteen shillings and four pence, and the services and purposes for which the same will be required are as follows (that is to say) :—

For Services payable out of the General Loan Fund :—

Charges in connection with the negotiation of the late loan ... .. £18,936 19 4  
 Dated this 22nd day of March, 1880. JAMES WATSON,  
 Treasurer.

Memorandum, Warrant No. 34.

FROM the minutes accompanying the proposed warrant No. 34 it would appear that the sum of £18,936 19s. 4d., to which the Auditor General is requested to certify as for "Charges in connection with the negotiation of the late loan," consists of interest on special advances made by the Bank of New South Wales in London on the security of Debentures to be sold, and these advances (£500,000 in all) are stated to have been obtained from the Bank "for loan services."

On referring to the London accounts it appears that from the date of the first advance of £100,000 (4th November, 1878) to 30th September, 1879, the whole of the London payments amounted to £842,309 7s. 7d., and were chargeable as follow :—

Consolidated Revenue Fund ... ..	£596,096 0 2
Trust Fund ... ..	175,521 12 7
Loan Services ... ..	70,691 14 10

and (excepting the sum of £5,847 10s. 11d., Exhibition account) have been so adjusted according to the Treasury accounts.

The statement accompanying shows the periods of the accounts and the charges for interest. The difference in excess of £68 9s. 10d. stated in the proposed warrant may probably be for a sum in the October accounts which have not reached this Department.

The interest to 31st December, 1878 (£1,517 16s. 2d.), has been already adjusted, and I think correctly, by charging it to the Consolidated Revenue Fund.

The outstanding interest now in question should in my judgment be also so adjusted, as the advances were clearly obtained under the circumstances and views set forth in Mr. Watson's minute of 13th January, 1879, and have clearly nothing to do with the negotiation of the loan. Those advances (and as continued beyond 1st April, 1879) formed part of an arrangement devised to economize the public funds, saving the loss of 4 per cent. on moneys deposited in the banks in Sydney by obtaining an advance of a similar amount in London, and thus expenses attached to these advances would not improperly be a legitimate set-off against the 4 per cent. derived to the Consolidated Revenue Fund from the special deposits in the Sydney banks.

The revenue is of course chargeable with the interest of all moneys borrowed to make up its deficiency, but it is not all clear that borrowed money should bear the cost of the interest by paying it to the Revenue while securities were being negotiated for a loan, the Revenue being in the meantime in a position to make advances without loss.

C. ROLLESTON,  
 A.G.

Department of Audit, 24 March, 1880.

Minute Paper.

The Treasury, New South Wales, Sydney, 5 April, 1880.

Subject :—Interest on advances by the Bank of New South Wales, London.

It appears to me that the Auditor General has taken an erroneous view of this matter. The advance of £500,000 was obtained against Debentures transmitted to London for sale in August, 1878, and was renewed simply because it was not considered prudent to negotiate a loan when the money market was unfavourable. It will be seen from the Treasurer's minute of the 13th January, 1879, to which the Auditor General refers, that in December, 1878, the Agent General stated that possibly our Debentures would bring 93. By continuing the advance and delaying the sale the price realized was £98 8s. 2d., so that we actually got an increase of £5 8s. 2d. per cent., or on the whole sale a sum of £175,770 16s. 8d.

Under these circumstances it is surely right that this enhanced price should bear the interest on the advance which after all amounts to somewhere about 11s. 6d. per cent. only.

When

When the Auditor General points out that the payments in London, on which this interest has been charged, are for Trust Fund and Revenue Services chiefly, he forgets that during the same period we were making far larger payments in the colony on account of Loan Services for which we had no Loan Funds. A mere book arrangement in no way alters the fact that the money advanced was in reality borrowed for carrying on Loan Services, pending the negotiation of our debentures in London. During the first three quarters of the year 1879 the payments for Loan Services, for which we had no Loan money available beyond the £500,000 advanced, amounted to about £1,120,000. It must therefore be evident that the proposed charge is not only a perfectly fair one against the Loans Account, but one which could not with propriety be otherwise dealt with. Interest of this nature has repeatedly been charged against the proceeds of loans.

JAMES THOMSON, C.I.

The Auditor General appears to me to have taken an erroneous view of this case. The advances were made against the debentures, which, had they not been obtained, and the debentures had been sold, would have resulted in a heavy loss to the country, but by obtaining the advances to carry on loan works the debentures subsequently realized a considerable advance, and this large gain is I maintain fairly chargeable with the interest on the advances obtained from the Bank.—J.W., 29/4/80. The Auditor General.—G.E., B.C., 3/5/80.

The Auditor General would be glad if the cases in which interest has been charged against loans could be pointed out to him, and also the appropriation under which he is asked to certify as legally available the sum specified in the proposed warrant. As an administrative arrangement the Auditor General does not presume to question the policy of the Treasurer's view, but he cannot see his way to certify that the money is legally available.—C. ROLLESTON, Department of Audit, 5 May, 1880, B.C. The Under Secretary for Finance and Trade.

MEMO. in reply to the Auditor General's minute of the 5th instant with respect to the interest charge for advances by the Bank of New South Wales, pending the negotiation of the last Loan in London.

1. In the Loan Statement for the year 1856, signed "W. C. Mayne, Auditor General," the sum of £506 3s. is charged for interest paid to the Commercial Bank upon overdrawn account.
2. In an appendix to that statement it is shown that £2,282 9s. 4d. was paid as interest on Treasury drafts prior to sale of debentures.
3. In the Loan Statement for 1857, also signed by W. C. Mayne, Auditor General, the sum of £1,147 11s. 2d. is charged for interest on Treasury drafts prior to sale of debentures.
4. In the Loan Statement for 1867 the sum of £7,413 12s. 1d. appears under the head "Charges on the sale of debentures," of which I believe a large portion is for interest on advances. Of this, however, I am not quite certain, as I have no means at my command for ascertaining it positively, but the vouchers in the Audit Department will readily enable the Auditor General to determine the question.
5. Although not quite to the point, I desire to state as bearing upon the subject somewhat, that the discount allowed on instalments of loans paid by the purchasers of our debentures before they become due has always been made a charge on the sale. In 1868, debentures were sold in London to the nominal value of £1,590,000, the charges on which amounted to £22,741 11s. 2d.; of this sum £10,816 11s. 2d. was for discount on payments before due dates. Had these payments not been made, and the bank had advanced the money pending the final payments of the loan, the interest payable to the bank for such advances would have been no more than that allowed to the purchasers of our debentures in the form of discount for instalments paid in advance. That being so there is really little or no difference in the nature of the two charges, so far at least as the loan itself is concerned.
6. The Auditor General wants to know the appropriation under which he is asked to certify as legally available for the payment of the interest in question. When Parliament authorises a loan to be raised, authority is given to borrow as much money as will carry out the various works, to the amounts specified in the Loan Act. The charges incurred in raising the loan (which have sometimes, as already pointed out, included interest on bank advances pending sale of debentures) must go to reduce the proceeds, and may either be deducted from the selling price before bringing the same to account in the Treasury books, or made a regular payment out of Loan Funds, as has frequently been done, for which of course there is no specific vote, as such is not required, and has never been obtained. The Auditor General might just as well ask the Treasurer to point out a specific vote for the payment of the interest on the public debt, or for revenue refunded, or charges on collections, as to ask to have the vote for the charges on the sale of debentures pointed out.

It is to be regretted that the proceeds of the debentures were not reduced by the interest charge before they were brought to account in our books, for it is probable it would not in that case have been objected to by the Auditor General. That omission or oversight should not, however, prevent the payment of the amount out of the General Loans Account, which will require in all likelihood to be supplemented by either a vote from the Consolidated Revenue Fund, or a fresh loan to make good the amounts short raised in consequence of our loans having realised less than par.

JAMES THOMSON, C.A.

The course proposed by the Treasury appears to me so clear, and is one which has been adopted previously, that I fail to see any valid objection.—J.W., 12/5/80. The Auditor General.—G.E., 14/5/80, B.C.

## Memorandum for the Auditor General.

I do not think this further minute of the Treasury mends the matter.

The arrangements in the case quoted in 1855-6-7 were altogether peculiar, and are not parallel to the present one; and occurred moreover at a time prior to Responsible Government, when the Government had had little experience in Loans.

The case of 1867 cannot be determined from any papers yet traceable in this office, the accounts of the Oriental Bank for the period having gone astray. But whether interest was included or not, the case did not occur under the Audit Act, and really has no proper bearing on the case, as will be shown presently.

The reference to the allowance of discount to the contributors to the loan is unfortunate, as such allowance formed part of the terms of the sale of the debentures, and has no connection whatever with the point at issue.

It is equally beside the question to refer to the payments of interest on loans or charges on collections, as both are provided for by statute. Refunds of revenue are merely corrections of mistakes or excessive credits which, not being revenue at all, are not open to the demand for reference to appropriation.

The warrant asked for is for neither of those classes of payments, but for the issue of *money raised by the sale of debentures*, the application of which is distinctly forbidden to be paid, used, or applied on any pretence directly or indirectly to or for any other purpose than what is specifically directed in the Loan Acts.

The expense of the financial operations of which the sums stated in the warrant form a part should, in my opinion, be provided for in some other way, the same as is done with the expense of exchanges on remittances and like expenditure.

I see no possible ground for certifying to a warrant such as that submitted, and I am satisfied that the question would never have been raised but for the falling off of the revenue and increase of expenditure.

E. A. RENNIE,  
19/5/80.

---

Case for opinion of Attorney General.

THE Auditor General is asked to certify that the sum of £18,936 19s. 4d., under the head of "Charges in connection with the negotiation of the late loan," is legally available.

The above sum is said to be for interest on the special advances made by the Bank of New South Wales in London, on the security of the loan; but inasmuch as those advances were used in great part for *general purposes*, and only in small part for loan purposes, viz. :—

Consolidated Revenue Fund...	...	...	£596,096	0	2
Trust Fund ...	...	...	175,521	12	7
Loans Fund ...	...	...	70,691	14	10

the Auditor General demurred to signing the certificate that the money was legally available as a charge upon the Loan Fund.

2. The Colonial Treasurer presses the claim on the grounds that the Loan Fund *in the Colony* was being fed by even larger advances from the Consolidated Revenue *without interest*; and therefore it is only fair that the Loan Fund should bear the charge made from advances in London.

3. The Auditor General does not question the reasonableness or equity of the contention, but he does not see his way to certify that the money is legally chargeable to the Loan Fund, seeing that all the ordinary charges have already been debited to it.

He contends that it should be submitted to Parliament for vote in the usual way, and seeks the Attorney General's opinion on the question.

C. ROLLESTON,  
Auditor General.

20th May, 1880.

My honorable colleague the Colonial Treasurer having intimated to me that it is his intention to submit a vote to Parliament to cover the sum in question, it is not necessary that I should give any opinion upon the matter.

ROBERT WISDOM,  
A.G., 18/6/80.

Recd. 25 June, 1880.—J.W.

## APPENDIX B.

MEMO.—Before completing the check of the proposed transfer it is requested that the original vouchers, as specified in the accompanying list, may be furnished to this Department.

C. ROLLESTON.

Department of Audit, 6 August, 1880.

The Auditor General to The Under Secretary for Finance and Trade.

Sir,

Department of Audit, 2 September, 1880.

Referring to my blank cover memo. of 6th ultimo, on the checking of the statement of the proposed transfer from Treasurer's Advance Account to Votes (since made under voucher 21,428 of 24 August), I have the honor to inform you that those sums for which the original vouchers have not yet been furnished, a statement of which accompanied the B.C. memo., will have to be disallowed until the receipt of original vouchers referred to.

I have, &c.,

C. ROLLESTON,

Auditor General.

## WARRANT 132.

## Memorandum.

Reference is requested to the Auditor General's letter of 2nd instant, respecting the transfer of £76,774 16s. 5d. to the credit of the Treasurer's Advance Account, 1880, from which it will be seen that without the vouchers to the original payments from the said account to the amount of £3,108 3s. 6d., specified in statement of 6th August, and forwarded by blank cover on that date to the Treasury, the Auditor General is unable to pass the transfer to the Revenue Account, and consequently to pass the credit for more than £73,666 12s. 11d.

Department of Audit, 8 September, 1880.

C. ROLLESTON.

The Under Secretary for Finance and Trade.

The Auditor General cannot be expected to certify that sums are legally available for issue when he is not in possession of the means of verifying the credit on which the warrant is claimed. If in any similar circumstances a warrant has been certified for it must have occurred through oversight. B.C., 9/9/80.

WARRANT

## WARRANT 132.

## Memorandum.

In reference to a previous objection to certify the proposed Warrant 132, it is found that now the only original vouchers which remain to be supplied, are the following, viz. :—

Voucher	2,506	...	...	...	...	...	...	£60	15	0
"	2,507	...	...	...	...	...	...	27	0	0
"	2,508	...	...	...	...	...	...	2	8	0
"	2,509	...	...	...	...	...	...	1	4	0
"	2,867	...	...	...	...	...	...	300	0	0
"	3,329	...	...	...	...	...	...	20	0	0

On the assurance, however, that these vouchers, which are stated to have been mislaid (or duplicates thereof completed as originals), will be supplied, and in the urgency arising from the immediate departure of His Excellency the Governor from the Colony, the warrant is now certified.

C. ROLLESTON,

Auditor General, 23/9/80.

The Under Secretary for Finance and Trade.

The Under Secretary for Finance and Trade to The Auditor General.

Sir,

The Treasury, New South Wales, Sydney, 25 September, 1880.

I have the honor to acknowledge receipt of a memorandum forwarded to this office with warrant No. 132, in which you state (referring to a previous objection to certify the warrant) that the warrant was so certified and returned to the Treasury on the assurance that certain vouchers assumed to have been mislaid, would be supplied; and in the urgency arising from the immediate departure of his Excellency the Governor from the Colony.

I have submitted your memorandum to the Colonial Treasurer, and to prevent any future mistake or misconception as to the position of this case, as well as to avoid possible obstruction to public business on grounds of an untenable character, I am desired to inform you that the production of vouchers has nothing whatever to do with the obligation imposed upon you to certify to the warrant in question. A sum of money had been placed to the credit of the Treasurer's Advance Account, in recoupment of amounts paid therefrom, and the Treasurer maintains his right to ask for a warrant for the expenditure of an equivalent sum without any reference whatever to the vouchers for the previous expenditure, his liability for the production of which is defined by law as a matter entirely apart from his demand for a warrant.

I am further to state that no one was authorized to give any such assurance as that contained in your memorandum before referred to, and Mr. Watson declines to receive the warrant as accompanied by conditions, or on any plea of urgency such as that which you allege.

I have, &c.,

G. EAGAR.

Case for the Opinion of the Law Officers of the Crown, under the Audit Act of 1870.

The Opinion of the Honorable the Attorney General is respectfully solicited under the following circumstances :—

By arrangement between the Treasury and Audit Departments the annual vote for "Advance to Treasurer" (now £100,000) is withdrawn at once and in full from the Consolidated Revenue Fund and placed to a Trust Fund Account known as the "Treasurer's Advance Account," and is thus made a circulating fund in the nature of a cash credit.

All payments from it require to be supported by written vouchers, and if not so supported fall to be disallowed under section 31 of the Audit Act.

All repayments to it are effected by transferring the original payments to votes of Parliament, or other funds to which they are subsequently found to be chargeable.

But the allowance of those payments as charges upon votes of Parliament, or otherwise, is, as in the case of the original payments, dependent upon the production of written vouchers,—the same vouchers in fact.

The amount of all such repayments to credit of the Treasurer's Advance Account goes of course to the "Public Account," whence it cannot be redrawn except by a fresh warrant.

On 24th August last the Treasurer transferred or repaid to his advance account out of votes of Parliament, sums advanced by him to the amount in all of £76,774 16s. 5d., but for so much \*of that total he furnished no vouchers for the original payments from the Trust Fund, and of course no vouchers justifying their being "allowed" as charges upon the votes to which they were transferred.

The Treasurer on the ground of this transfer to his credit claimed a warrant for the reissue of the whole amount, but the Auditor General declined to certify that more was legally available for reissue than the amount for which he had received vouchers, thus disallowing the original payments in terms of the 31st section of the Audit Act, pursuant to his letter of 2nd September to the Treasury.

The Treasurer claims to have the Auditor General's certificate to the warrant notwithstanding the non-supply to him of the vouchers upon which the recredit is based.

The question is whether the Auditor General is justified in certifying to the legal availability for issue of moneys when he has no evidence of the payments upon which the warrant is claimed.

C. ROLLESTON,

Auditor General.

Memorandum

Department of Audit, 30th September, 1880.

\*£411 7s. See memo. accompanying.

## Memorandum of Vouchers not yet received :—

Voucher					£	s.	d.

Before advising, I wish to be informed as to the practice since the year 1871 in cases of this kind. Also, whether the conditions of section 20 of the Audit Act have been complied with by the Treasurer. I would like moreover to have an opportunity of perusing the correspondence between the Treasury and Audit Departments with respect to this case.—R.W., A.G., 22/10/80. The Auditor General, B.C., 22nd October, 1880.—W.E.P.

## Minute Paper.

Audit Office, New South Wales, Sydney, 26 October, 1880.

Subject :—As to certifying a Warrant without Vouchers.

Memorandum for the Hon. the Attorney General.

THERE seems to have been only one case similar to this which occurred last year, and was brought under the notice of Parliament in the Auditor General's Report on the 1879 Accounts (see clause 21, page 104.)

A warrant was certified in this case, but inadvisedly, as the Auditor General is disposed to think, and he now seeks to be advised as to his legal responsibility in the matter.

2. Copies of the several communications made to the Treasury are herewith, together with the Treasury letter of 25th September—(to be returned.)

3. The provisions of the 20th section of the Audit Act have not been literally complied with. Latitude has generally been taken as to the time of furnishing the cash sheets and supporting vouchers; and in many instances the place of the original vouchers has been supplied by substitute slips, as in this case.

C. ROLLESTON,

Auditor General.

The Auditor General to The Under Secretary for Finance and Trade.

Sir,

3 December, 1880.

Attention to your letter of 25th September last has necessarily been delayed awaiting its return from the Attorney General.

The question that has been raised with reference to the production of vouchers as a necessary precedent to the Auditor General's certifying to the legal availability for reissue of funds transferred from the Advance Account to Votes of Parliament, was referred by me for the opinion of the Attorney General. As the case put for his advice seemed to Mr. Wisdom to open up a wider field of inquiry than it appeared to him desirable to consider and advise upon, and as he had been informed that the vouchers required by me had been furnished, I consented, in compliance with his desire, to withdraw the case.

But whilst I have done this, I cannot allow the position assumed by the Colonial Treasurer in the letter under reply—namely, that he maintains his right to ask for a warrant without any reference whatever to the vouchers for the previous expenditure—to pass unchallenged.

I dispute that right, and (to use your own words) to prevent any future mistake or misconception, as well as to avoid possible obstruction to public business on grounds of an untenable character, I deem it my duty to state for the information of the Colonial Treasurer that I shall decline to certify to any warrant of the class in question, without the credits upon which the warrant is claimed being duly supported by vouchers, always of course subject to the direction of the Law Officers.

I have, &c.,

C. ROLLESTON,

Auditor General.

## APPENDIX C.

The Auditor General to the Crown Solicitor.

Sir,

9 October, 1880.

I have the honor to submit for the opinion of the Crown Law Officers, under the authority of the 37th clause of the Audit Act, a case which has arisen under the Superannuation Act Repeal Act of 1873.

In that year the Solicitor General laid down a principle of construction with reference to the refund of deductions which has guided me in dealing with these claims up to the present time.

It will be seen on reference to the papers that an attempt is made by the Treasury officers, under color of the Treasurer's approval, to force me to certify to the claim for a refund of deductions in the case of a Mr. S. N. South, an officer in the Telegraph Department, in the teeth of the opinion above referred to. Whether that opinion is rightly or wrongly interpreted, I feel that I cannot act in contradiction to it, except under an authority in all respects equal to that which laid down the principle for my guidance.

I have, &c.,

C. ROLLESTON,

Auditor General.

Case

Case for the opinion of the Crown Law Officers, under the Superannuation Act Repeal Act of 1873  
(36 Vic., No. 29.)

*Re-application of Mr. S. N. South for refund of deductions.*

THE doubt as to Mr. South being legally entitled to the return of the deductions made from his salary arises out of the fact that at the time of the passing of the Repeal Act he did not occupy an office in the Civil Service, from the pay or salary of which deductions were made towards the Superannuation Fund.

This view of the law is taken from an opinion given by Mr. Solicitor-General Innes in the year 1873, copy of which will be found with the Auditor General's report on the Public Accounts of that year. (Appendix A, page 107.)

The Solicitor General there holds "that those officers in the public service who are entitled to a refund of deductions under section 9 of the Superannuation Act Repeal Act of 1873 must be officers who at the time of the passing of the Act were paid or salaried officers, from whose pay or salary deductions were, up to the passing of the Act, continuing to be made under the Act 1864."

This appears not to have been the case with the applicant, who had been removed from the office from the emoluments of which the deductions had been made, and at the time of the passing of the Repeal Act had been re-appointed to an office from which no contributions were called for.

In the face of the opinion quoted above the Auditor General hesitates to certify that the applicant is entitled to the refund and would be obliged by the opinion of the Attorney General thereupon.

C. ROLLESTON,  
Auditor General.

Department of Audit, 9 October, 1880.

The Crown Solicitor to the Auditor General.

Sir,

Crown Solicitor's Office, Sydney, 30 October, 1880.

I have the honor to return herewith the papers forwarded to me, with your letter of the 9th instant, having reference to the application of Mr. South for a refund of contributions to the Superannuation Fund, and to inform you that I have submitted the matter to Mr. Attorney-General Wisdom, a copy of whose advising thereon will be found upon the other side.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

COPY OPINION.

I do not think that Mr. South is entitled under the 9th section of the "Superannuation Act Repeal Act of 1873" to a refund of the sums of money deducted from his salary under the provisions of the Superannuation Act of 1864. I agree with the opinion given by Mr. Solicitor-General Innes in 1873, that those "officers in the Public Service who are entitled to a refund of deductions under the Act of 1873 must be officers who at the time of the passing of the Act were *paid or salaried officers from whose pay or salary deductions were up to the passing of the Act continuing to be made under the Act of 1864.*" This construction appears to me to be strongly supported by the form of "Schedule" and "Endorsement of Auditor General" at the end of the Act. The case of Mr. South would seem to be a hard one, and his claim for a refund of deductions might, I think, under the circumstances, be fairly submitted to the consideration of Parliament.

ROBERT WISDOM,  
A.G., 27/10/80.

APPENDIX D.

Department of Audit,  
30th June, 1881.

## APPENDIX F.

## Roads—Minute Paper.

Subject :—Surcharges by the Auditor General.

Sydney, 7 February, 1881.

THIS Department has been surcharged by the Auditor General with the various amounts set forth in the accompanying papers, amounting in the aggregate to £19,414 9s. 10d. The vouchers have all been paid by the Treasury, but the Audit Office represents that they have been charged to the wrong year's votes, and must accordingly be refunded. As the year's votes to which it is contended they should be debited are exhausted, it is utterly impossible to recoup the sums as required. The only course under these circumstances if the refunds are to be made, is for a sum to be placed on Estimates to cover them, and the papers might perhaps be forwarded to the Treasury in the first instance, with the view of ascertaining whether that Department will be willing to provide in that manner for their final adjustments.

I am of opinion, as I was when I sent on the amounts for payment, that under the extension clause of Appropriation Act they were legitimate charges on the votes from which they have been paid. The Treasury must have concurred in this opinion or the amounts would not have been paid.

Under Sec., B.C. W.C.B., 8/2/81.

Annual votes are only available for the year for which they are voted, except when under contracts of that year's date. These accounts have been charged by the Treasury according to the headings marked thereon, which is seldom or never disputed, and can only be learnt when the adjustments are to hand.—J.P.

If the Auditor General insists on surcharging the amounts, they must await settlement until votes be taken.—J.P.

The Under Secretary, Finance and Trade. Will the Under Secretary for Finance and Trade please favor me with his opinion on this question.—J.R., B.C., 16/2/81. Accountant.—G.E., 17/2/81. Mr. Thomson,—G.E., 19/2/81.

## Minute Paper.

Subject :—Minute by the Commissioner and Engineer-in-Chief for Roads on surcharges raised by the Auditor General.

Inspecting Branch, The Treasury, New South Wales, Sydney, 1 March, 1881.

HAVING examined these papers I gather from them that the Auditor General objects to the manner in which the Commissioner and Engineer-in-Chief for Roads has been charging some of his expenditure, and so far as I can judge, rightly too. The Commissioner seems to have misunderstood the purport of the 13th clause of the Appropriation Act of 1877. That clause which runs as follows :—“No appropriation included in this Act shall lapse until the 31st day of December, 1878,” has with the exception of the necessary change of year been inserted in every subsequent annual Appropriation Act ; since then Mr. Bennett has evidently understood this clause as admitting the expenditure of two years against the vote of one so far as that vote would

would bear it. For example, he charges expenditure of 1877 and also of 1878 against a vote obtained for 1877 services, notwithstanding a vote of a similar nature was actually taken for the services of the later year. This is I think a wrong reading of the clause, which simply says, in effect, that votes are to have a currency of two years. It was never contemplated, and indeed the clause can bear no such construction, that the expenditure of the second year's currency was to be charged to the vote of the first year, unless under a contract.

As I understand the matter, it was intended by the clause in question to keep votes alive until the close of the second year, in order that outstanding claims properly chargeable to votes of the first year might have a longer time to come in; but where there is an annual vote for a service, such annual vote should bear nothing but the payment made for the service of the year for which it was obtained. In the case however of a special service a contract taken before the 31st December of the second year secures the life of the vote until the completion of such service. If I mistake not, this is the construction hitherto put upon the clause by the Auditor General.

From the two lists accompanying these papers it would appear that the Auditor General has discovered improperly charged items in the Commissioner's Accounts for 1878 and 1879 to the amount of £19,414 9s. 10d. Mr. Bennett suggests that this amount should be placed upon the Estimates for appropriation by Parliament if the sum is to be refunded as the Auditor General's statement and surcharges would imply. As no benefit however can now result from adopting such a course, I would suggest that the Auditor General be requested to allow the payments to remain as charged by the Commissioner on the distinct understanding that the practice which he has been following hitherto be at once abandoned, as it would upset not only the books of the Treasury and Audit Departments, but those of the Commissioner for Roads as well, if all the items included in the Auditor General's list have to be revoted. Even if they were, nothing would be gained by it so far as I can see.

Mr. Bennett is wrong in assuming that the Treasury concurred in his charging votes of one year with the expenditure of another. The accountant states that the practice is to charge expenditure to votes in the manner indicated on vouchers by heads of Departments, leaving the final adjustment to the Auditor General, who alone is furnished with such details as enable him to ascertain the correctness or otherwise of such expenditure.

As this matter has apparently been a long time under reference to the Commissioner for Roads I would recommend that an early appeal be made to the Auditor General, with a view to a speedy settlement of the question. So far as known to me, the Auditor General has never brought these erroneous charges under the direct notice of the Treasurer.

JAMES THOMSON, C.A.

I am glad that exception has been taken by the Auditor General to the practice which has been carried on by the Roads Department, but as no advantage is to be gained by revoting this money I invite the concurrence of the Auditor General in the suggestion of Mr. Thomson.—J.W., 3/3/81.

The Auditor General, B.C.—G.E., 3/3/81.

Minute Paper.

Subject:—Surcharges on the accounts of the Commissioner and Engineer-in-Chief for Roads and Bridges.

Department of Audit, New South Wales, 7 March, 1881.

£19,414 9s. 10d. For the reasons given in Mr. Thomson's report I am happy to be able to concur in the Treasurer's suggestion for the abandonment of the surcharges raised upon the accounts of the Engineer-in-Chief for Roads, on the understanding, however, that the irregular practice upon which the surcharges are based be at once abandoned.

C.R.

The Under Secretary, Finance and Trade.

APPENDIX G.

Memorandum.

Trial Surveys for Tramways on new lines.

It does not appear to me that the Act 43 Vic. No. 25 can be operated upon as an Appropriation Act, except in conjunction with the Loan Act of 1880, and that only to the extent of the lines of tramway specified in the first and third Schedules. The appropriation under the Act 44 Vic. No. 12 is confined to "the construction of the tramways authorized by the Act 43 Vic. No. 25," and cannot be strained I think to cover the "construction" or "preliminary survey" of any lines that have not received the sanction of Parliament.

To cover the cost of the necessary preliminary survey and expenses a vote should be taken as is done in the case of the railways.

Such vote should I think be asked to cover not only new work but also the expenses of the surveys for the lines already in course of construction. The sum of £576 17s. 0d., already charged to the construction vote of £600,000 as incurred for surveys, although done at the request of this office appears, on a closer examination of the two Acts quoted above, to be more properly an expense requiring a distinct appropriation to cover it.

It is besides improbable that the vote of £600,000 will cover the cost of constructing all the lines of tramway that are legitimately chargeable to it, if constructed at all.

The Auditor General

E. A. RENNIE, 16/11/80.

This should be referred to the Commissioner for Railways with a view to provision being made on the Estimates for this service.—C.R., 17/11/80.

The

The Auditor General to The Commissioner for Railways.

Sir,

Department of Audit, N.S.W., 18 November, 1880.

I have the honor to invite your attention to the enclosed memorandum, referring to your reply to a query from this department, dated 26th ultimo, respecting the mode of charging the expenses of surveys of tramways, which do not appear to be covered by the loan appropriation of £600,000, under the Act 44 Victoria, No. 12, with a view to provision being made on the Estimates for those expenses.

I have, &c.,

C. ROLLESTON,

Auditor General.

Enclosures to be returned, V. 1938, query of 26 Oct, 1880, and covering memorandum.

The lines authorized by the Act 43 Victoria, No. 25, are not only the lines mentioned in the schedules to that Act, but the lines which under the 2nd and 4th sections of the Act the Governor with the advice of the Executive Council may deem it expedient to construct.

It may be that the £600,000 cannot be made use of for lines under the 4th section—*i.e.* lines constructed as feeders to the railway till the plan and books of reference have been approved by Parliament—and that, consequently, there must be a special fund provided for trial surveys of such lines; but the vote of £600,000 was taken to cover not only the tramway lines mentioned in the schedule of the Act (for which it is far more than sufficient), but also other lines which the Governor with the advice of the Executive Council may authorize to be constructed, especially lines in the streets and suburbs of Sydney which do not require further Parliamentary sanction.

Perhaps the Auditor General concurs in this view.—C.A.G., 26/11/80. Department of Audit, B.C. (No. 748) 27 Nov., 1880.

As the Commissioner for Railways recognises the propriety of providing a special fund for the expenses of trial surveys of tramway lines, it is concluded that steps will be taken to procure a vote for the sum of £576 17s. 0d., already irregularly charged to the construction vote, for the amount of the voucher under query with these papers, and for any other expenses of the same kind that may be required for lines in contemplation.

The question as to the applicability of the vote of £600,000 to the construction of lines of tramway under the 4th section of the Act 43 Vic. No. 25, is not necessarily involved in the query of 26 October, on voucher 1938.—C.R., B.C., 1 Dec., 1880. The Commissioner for Railways.

It can hardly be said from anything I have stated in my minute of 26/11/80, that I "recognise the propriety of providing a special fund for the expenses of trial surveys of tramway lines." My own opinion is that no objection should be raised to these expenses being charged to the vote for £600,000; but I admit that by a critical reading of the letter of the Act (its spirit is undoubtedly in favour of the view I take), it may be that the vote cannot be made available for trial surveys under the 4th section of the Act, until the plans, &c., have been approved by Parliament.

The vote can be used for trial surveys of lines under the 2nd section of the Act, and also for trial surveys under the 4th section, after Parliament has approved of the plans. If the Auditor General insists that the expense of trial surveys of lines to run in conjunction with the railways (being those mentioned in the 4th section to Act) cannot primarily be charged to the vote for £600,000, then some fund must be provided, but with every deference and respect I must add that I do not "admit the propriety of providing" such a fund if the words are taken to mean that I concur in the proposal.—C.A.G., 7/12/80. The Auditor General, Department of Audit, 9 Dec., 1880.

Whilst adhering to the opinion that a vote should be taken to cover the cost of trial surveys for tramway lines not specially authorised, I do not think it necessary to push my objection to the extent of disallowing the charge already made to the Loan Vote of £600,000. The operation will have to be brought under the notice of Parliament, and the Commissioner should I think consult his Minister upon it.—C.R., 11/12/80. The Commissioner for Railways.

Government Railways—Minute Paper.

Subject:—Cost of trial surveys for Tramways charged to vote of £600,000 for Tramways.

Department of Audit, N.S.W., 23 December, 1880.

I SUBMIT, for the consideration of the Minister, the correspondence that has passed between the Auditor General and myself on the subject of charging to the vote of £600,000 for tramways the cost of making trial surveys of lines not mentioned in the schedules to the Act. The Auditor General adheres to the opinion he has expressed that a special vote should be obtained for these trial surveys. My view is that, while perhaps the *strict letter* of the Act requires a separate fund to be provided for those lines, the plans of which must be approved by Parliament before their construction can be commenced, the *spirit* of the Act is clearly in favour of the cost being charged to the £600,000 vote, which was taken to cover the expenditure on tramways authorized by the Act; the Act authorizes the construction not only of the lines mentioned in the schedules, but other lines which the Governor, with the advice of the Executive Council, may deem it desirable to have carried out.

That this was also the intention when the vote was asked for, is proved by the fact that the amount of it exceeds considerably the estimated cost of the lines mentioned in the Schedules to the Act. If the excess were not taken for the purpose I have stated, I know of no other purpose to which it can be applied.

The Auditor General says, in his last minute on the subject, dated 11/12/80, that he does not think it necessary to push his objection to the extent of disallowing the charge already made to the Loan Vote of £600,000, but he adds, the question will have to be brought under the notice of Parliament, and suggests that I should consult Mr. Secretary Lackey upon it.

I now submit the case accordingly, and within the province of my office would respectfully advise the Minister to approve of the loan fund for tramways being made available for the expenditure for trial surveys of lines other than those mentioned in the schedules to the Act. I am clearly of opinion that when the Auditor General submits the question in his annual report to Parliament, the charging of such expenditure to the vote of £600,000 will not, under this explanation of the circumstances, be deemed to be a misappropriation.

Approved.—J.L., 22/12/80.

C.A.G., 14/12/80.

## APPENDIX H.

## Minute Paper.

Subject:—Amalgamation of Votes—Orange to Wellington and Dubbo.

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 15 April, 1880.

I AM informed by the Accountant that the vote of £350,000 for the extension from Orange to Wellington is exhausted, and consequently no further payments can be made for this portion of the line.

The total amount voted by Parliament for the extension from Orange to Dubbo was £610,000; but it was voted in two sections, viz., from Orange to Wellington £350,000, and from Wellington to Dubbo £260,000, making the total vote £610,000.

There is still a balance on the extension from Wellington to Dubbo of £136,964, and I now ask the Minister's sanction to treat this extension to Dubbo as one vote.

I cannot see any objection to this course as the works were let in one contract, and it was always intended by me that the total length should be treated as one vote, but in consequence of the amounts to Wellington and Dubbo appearing on the Estimates separately, these sections have been dealt with as two contracts.

This is a very urgent matter as the wages and salaries on the sections to Wellington remain unpaid.

The total vote will most probably have to be supplemented in consequence of the large additional quantity of earthwork which has been removed between Orange to Wellington caused by slips and the widening of the cuttings to render the line safe for traffic.

An amount of over £12,000 has also been paid for land from these votes which was not included in the estimate.

JOHN WHITTON.

The Secretary for Public Works.

Approved.—J.L., 15/4/80. The Under Secretary for Finance and Trade.—W.F., B.C., 16 April, 1880 (for U.S.) Mr. Thomson.—G.E., 17/4/80. Under this explanation I can see no objection to the course proposed, but the Auditor General may take a different view of the matter and object to the expenditure after it has been incurred; I would therefore recommend a reference to that officer in the first instance.—J.T., 17/4/80. The Auditor General.—G.E., B.C., 17 April, 1880. Urgent.

Whilst fully acknowledging the reasonableness of the proposal, the Auditor General regrets that in the face of the express proviso in the 3rd clause of the "Loans Fund Amalgamation Act of 1879," he feels himself precluded from concurring in it.—C.R., 19/4/80. The Under Secretary for Finance and Trade.

Department of Audit, 8 May, 1880.

General Loans Account, Treasury Payment, 28th April, 1880.

As there is no vote for railway extension Orange to Dubbo under 40 Victoria, No. 12, and as according to the marking of the voucher by the Railway Department the charge appears to be on account of Orange to Wellington, and the balance on that vote being only £103 10s., the excess £163 10s. 11d. must therefore be disallowed for want of warrant.

C. ROLLESTON.

The Under Secretary for Finance and Trade.

Department of Audit, 20th May, 1880.

General Loans Account, Treasury Payments, 29th and 30th April, and 3rd May, 1880.

As there is no vote for railway extension Orange to Dubbo, 40 Vic., No. 12, the charges on that account which appear on the enclosed vouchers must be disallowed for want of warrant.

C. ROLLESTON.

The Under Secretary for Finance and Trade.

I find the Auditor General has written the concluding sentence under a misapprehension. I find there is a warrant for this expenditure.—J.W., 26/5/80. The Auditor General, B.C.—G.E., 27/5/80.

MEMORANDUM on Treasury Paper A.G., 420/1880.

It is pointed out for the information of the Treasurer that the whole of the warrants for the vote of £350,000 for the line Orange to Wellington have been expended upon vouchers certified by the Railway Department to be charged to that account. The vouchers objected to are all marked by the Railway Department as for the *service of Orange to Wellington*, the funds for which service are exhausted, as admitted by that Department, and on a recent reference upon the subject of amalgamating the votes the Auditor General reported as follows, viz.:—"Whilst fully acknowledging the reasonableness of the proposal, the Auditor General regrets that in the face of the express proviso of the 3rd clause of the Loans Fund Amalgamation Act of 1879 he feels himself precluded from concurring in it."—B.C., 19/4/80.

The alterations of the headings of the vouchers in the Treasury to "Orange to Dubbo," or "Wellington to Dubbo," does not alter the fact that the payments were for services of the line "Orange to Wellington," and the Auditor General has no alternative but to disallow the proposed charges until Parliament either sanctions the amalgamation of the two votes for the entire line "Orange to Dubbo," or makes additional provision for the extra and unforeseen expense of the line Orange to Wellington.—C.R.

Department of Audit, B.C., 28/5/80.

The Under Secretary for Finance and Trade.

## APPENDIX J.

Minute-paper for the Executive Council.

Subject:—To enable the Auditor General to pass all accounts connected with the frauds perpetrated by James T. Evans, for which no acquitted vouchers can be furnished in adjustment.

Department of Lands, Sydney, 11 January, 1881.

I BEG to recommend to His Excellency the Governor and the Executive Council that an authority, as required by the 31st section of the Audit Act, be granted to the Auditor General, to enable him to pass (without the usual acquitted vouchers in adjustment) accounts for £165 11s. 2d., being a portion of the public moneys embezzled by James T. Evans, late assistant in the Account Branch of this Department, as well as all accounts for which no acquitted vouchers can be furnished, consequent on the frauds perpetrated by the same defaulter.

JAMES HOSKINS.

The Executive Council advise that authority be granted to adjust the sum of £165 11s. 2d., and any other amount that may be found to have been embezzled by James T. Evans, late a clerk in the Lands Department, now committed to take his trial.—ALEX. C. BUDGE, Clerk of the Council.

Approved.—A.L., 11/1/81. Min., 81/2.—11/1/81. Confirmed.—18/1/81. The Accountant.—T.B., 19/1/81.

Sir,

8 December, 1881.

Under the directions contained in the 18th section of the "Audit Act of 1870," I do myself the honor to submit to you, for presentation to the Legislative Assembly, copy of a Minute of His Excellency the Governor and Executive Council, authorizing the application of such sums as may be required, from one Head of Service, to supplement a Vote for another Service.

I have, &c.,  
C. ROLLESTON,  
Auditor General.

Minute Paper for the Executive Council.

Colonial Secretary's Office, Sydney, 21 November, 1881.

Authority under 18th section of the Audit Act.

I RECOMMEND that authority be given, under the 18th section of the "Audit Act of 1870," for the transferring of such sums as may be required, from the Vote for "Contingencies" of the Asylums for the Infirm and Destitute, to meet the Expenditure of the Erysipelas Hospital to the end of the present year.

HENRY PARKES.

The Executive Council advise that authority be granted for the transfer of the sum referred to from the Vote, to the Vote specified.—ALEX. C. BUDGE, Clerk of the Council.

Min. 81/60, 22/11/81.—Confirmed, 29/11/81. Approved.—A.L., 22/11/81.

1881.

## NEW SOUTH WALES.

## TRUST MONEYS DEPOSIT ACCOUNTS.

(FROM 1ST APRIL, 1880, TO 31ST MARCH, 1881.)

Presented to Parliament, pursuant to Acts 20 Vict. No. 11 and 42 Vict. No. 7.

## TRUST MONEYS DEPOSIT ACCOUNTS.

The Treasurer of New South Wales in account with the Trust Moneys Deposit Accounts, under the Act 20 Victoria No. 11 and 42 Victoria No. 7, from 1st April, 1880, to 31st March, 1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MURRAY RIVER CUSTOMS.

(CONVENTION BETWEEN NEW SOUTH WALES AND SOUTH AUSTRALIA.)

---

*Ordered by the Legislative Assembly to be printed, 21 July, 1881.*

---

Colonial Secretary's Office,

Sydney, 21st July, 1881.

HIS Excellency the Governor directs the publication, for general information, of the following Convention made between this Colony and the Province of South Australia, relative to the operation of the Customs Laws on the River Murray.

HENRY PARKES.

*CONVENTION made and entered into between the Honorable Sir HENRY PARKES, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, Colonial Secretary, and the Honorable JAMES WATSON, Colonial Treasurer, for and on behalf of the Colony of New South Wales, of the one part, and the Honorable WILLIAM MORGAN, Chief Secretary, and the Honorable WILLIAM BENJAMIN ROUNSEVELL, Treasurer, for and on behalf of the Province of South Australia, of the other part.*

FOR the purpose of enabling each of the Colonies of South Australia and New South Wales to receive the duties of Customs to which it is entitled on goods imported from one to the other by way of the river Murray or across the boundary between the respective Colonies without the actual collection of such duties by Customs Officers on the occasion of each importation it is agreed as follows:—

1. That for a period of three years from the eleventh day of January one thousand eight hundred and eighty-one inclusive goods of all kinds including live stock shall be imported from South Australia into New South Wales and from New South  
Wales

Wales into South Australia by way of the river Murray or across the boundary between the respective Colonies without collection of Customs duties or charges of any kind upon any such importation save as hereinafter excepted.

2. That during such period there shall be paid to New South Wales by South Australia by equal quarterly payments the yearly sum of £47,500 as the consolidated rate payable by that Colony in lieu of the Collection of Customs duties.

3. That the duties on goods which prior to the eleventh day of January shall have been imported into New South Wales from South Australia by way of the river Murray or across the boundary between the respective Colonies and shall then be in any of the New South Wales bonded warehouses on that river or its tributaries and the duties on all goods which may hereafter during the continuance of this Agreement be placed in the present or any future bonded warehouse in New South Wales on the said river or its tributaries from South Australia shall be collected by New South Wales and paid over to South Australia without charge.

4. That should the Legislature of New South Wales during the period of three years set forth in the first clause of this Agreement reduce or repeal the Customs or Excise duties at present imposed by law the yearly sum to be paid to New South Wales shall in a corresponding manner be adjusted and reduced such adjustment to be determined by the amount of duties collected during the year 1880 on the dutiable article or articles affected by such alteration of the law.

5. That should the said Legislature during the same period of three years increase the Customs or Excise Duties at present imposed by law or impose new Duties upon articles now admitted free the sum to be paid to New South Wales shall be adjusted and increased by the proportional amount received or receivable on the articles so subjected to Customs duties which shall be imported into New South Wales by way of the river Murray or across the boundary between the respective Colonies or be taken out of bond for consumption during the next succeeding six months after the Act imposing such duties shall come into operation.

6. That nevertheless it shall be optional for New South Wales or South Australia on the Legislature of either Colony passing any measure altering the Customs or Excise duties at present in force in such Colony to retire from this Agreement on giving thirty days' notice of its intention so to retire.

7. That the Government of South Australia shall afford all customary facilities for the transport under bond of goods destined for consumption in New South Wales to the boundary between the respective Colonies.

8. That all tobacco grown in either Colony and imported into the other Colony in leaf shall be subject to the duty payable on such tobacco by the Tariff of the Colony into which it is imported and all tobacco manufactured in either Colony and exported into the other shall be subject to the duty payable on manufactured tobacco in the latter Colony less the amount paid in the former upon the imported leaf such additional duty to be accounted for by the Colony collecting it to the Colony from which it is imported.

9. That nothing herein shall be held to prevent New South Wales making such arrangements not inconsistent with this Agreement with Victoria as it may think fit in reference to Customs Duties on goods imported into New South Wales from Victoria by way of the river Murray or establishing and maintaining such Custom Houses and bonded warehouses and making such regulations as it may think fit for the collection of Customs duties on goods imported from or through Victoria by way of the river  
Murray

Murray but any goods imported into South Australia by the said river from Victoria or across the said river from Victoria *via* New South Wales shall be altogether exempt from the provisions of this Agreement and shall be chargeable with duty according to the South Australian tariff then in force and the New South Wales officers of Customs shall co-operate with the South Australian Customs officers and take all proper steps to prevent the provisions of this Agreement being in any such way infringed.

10. That either Government shall be entitled to terminate the convention at any time on giving to the other Government notice in writing of its intention three months prior to such termination.

Done at Sydney the twentieth day of June, one thousand eight hundred and eighty-one.

HENRY PARKES.  
JAMES WATSON.

Done at Adelaide the thirtieth day of May, one thousand eight hundred and eighty-one.

## NEW SOUTH WALES.

REPORT ON SURTAXES D'ENTREPÔT, &c., RECENTLY  
PRESENTED TO THE FRENCH SENATE BY THE COM-  
MITTEE ON THE GENERAL TARIFF BILL.

(DESPATCH RESPECTING.)

Presented to Parliament by Command.

The Treasury, New South Wales,  
11th June, 1881.

HIS Excellency the Governor directs the publication, for general information, of the following Circular Despatch from the Right Honorable the Secretary of State for the Colonies, enclosing copy of a Report on Surtaxes d'Entrepôt, &c., recently presented to the French Senate by the Committee on the General Tariff Bill.

JAMES WATSON.

(Circular.)

Downing-street,  
21st March, 1881.

Sir,

With reference to my predecessor's Circular Despatch of the 18th of February, 1880, on the subject of the proposed new French General Tariff Bill, I have the honor to transmit to you, for the information of your Government, a copy of a Report on Surtaxes d'Entrepôt, &c., recently presented to the French Senate by the Committee on the General Tariff Bill.

I have, &c.,  
KIMBERLEY.

The Officer Administering  
The Government of New South Wales.

NO. 24—SÉNAT, SESSION 1881.

Annexe au Procès-Verbal de la Séance du 3 Février 1881.

RAPPORT fait au nom de la Commission\* chargée d'examiner  
le projet de loi, concernant l'établissement du Tarif  
général des Douanes.

(Tarif de sortie.—Surtaxes d'entrepôt.—Régime applicable aux  
produits importés des colonies et possessions françaises.

PAR M. ANCEL,  
Sénateur.

TARIF DE SORTIE. (TABLEAU B.)

Messieurs,

Le tableau B où se trouvent inscrits les tarifs de sortie  
ne se compose que de trois chapitres, dans le projet de loi qui  
a été adopté par la Chambre des Députés, et qui est soumis

\* Cette Commission est composée de MM. Feray, Président; De Parieu, Anceel, Vice-Présidents; Paris, Denis (Gustave), Secrétaires; Dupuy De Lome, Caillaux, Mayran, Cordier, Scheurer-Kestner, Gaston Bazille, Dauphinot, Baron de Lareinty, Pouyer-Quertier, Robert-Dehault, Oscar De Lafayette, Issartier, Cherpin.

à l'examen du Sénat. Le projet de loi, déposé par le  
Gouvernement le 21 janvier 1878, contenait un tarif de  
de sortie, dont voici les dispositions :

Désignation des Produits.	Droits (Décimes et 4 p. 100 compris).
Chiens de forte race exportés par la frontière de terre.	Par tête 6f ,,
Chiffons, autres que ceux de pure laine et drilles de toute espèce, y compris les vieux cordages goudronnés ou non.	les 100 kil. 4f ,,
Carton de simple moulage ou pâte de papier ...	12 ,,
Contrefaçons en librairie .....	Prohibées.
Munitions de guerre .....	Prohibées.
Toutes autres marchandises .....	Exemptes.

La Chambre des Députés a maintenu le droit de 6 francs à l'importation des chiens de forte race par la frontière de terre. Nous vous signalerons plus loin une proposition faite à la Commission du Sénat par M. le Ministre de l'Agriculture et du Commerce, proposition qui tend à prohiber la sortie de ces animaux.

La Chambre des Députés, dans sa séance du 29 mai 1880, a supprimé, d'un commun accord avec le Gouvernement, le droit de 4 francs par 100 kilogrammes à la sortie des chiffons, autres que ceux de pure laine et drilles de toute espèce, y compris les vieux cordages goudronnés ou non. Elle a également supprimé le droit de 12 francs à la sortie du carton de simple moulage ou pâte de papier. Ces droits constituaient un avantage pour nos fabricants de papier qui conservaient ainsi leurs matières premières. Comme compensation de la suppression de ces droits de sortie, le droit à l'entrée des papiers venant de l'étranger a été augmenté. C'est là une question qu'il n'y a pas lieu d'aborder ici et qui a trouvé sa place dans le rapport spécial sur le papier et ses applications.

La prohibition à la sortie des contrefaçons en librairie inscrite au projet du Gouvernement a été maintenue par la Chambre des Députés.

C'est d'accord avec le Gouvernement que la Commission de la Chambre a levé la prohibition à la sortie des munitions de guerre ; cette mesure a été prise dans l'intérêt des fabricants français d'armes et de munitions.

En résumé, le tarif de sortie (tableau B) a été réduit par la Chambre aux trois chapitres suivants :

Chapitre 580.—Chiens de forte race exportés par la frontière de terre .....	6 fr.
Chapitre 581.—Contrefaçons en librairie ...	Prohibées.
Chapitre 583.—Toutes autres marchandises.	Exemptes.

Votre Commission a reçu de M. le Ministre de l'Agriculture et du Commerce une lettre datée du 22 novembre, qui contient les passages suivants concernant le chapitre 580 :

« Le droit de 6 francs à l'exportation des chiens de forte race par les frontières de terre a soulevé des réclamations de la part d'agriculteurs qui se plaignent des ravages qu'exercent ces animaux uniquement employés à faire la fraude du tabac, en traversant leurs champs, loin des routes où se trouvent les bureaux de douanes. D'autre part, le département des finances a fait observer que le droit de 6 francs était par lui-même insuffisant pour empêcher l'exportation.

« La charge des chiens fraudeurs qui descend quelquefois à 2 kilogrammes de tabac, s'élève souvent à 12 et même 15 kilogr. Une introduction frauduleuse de tabac au moyen d'un chien exporté après paiement du droit de 6 francs, peut donc, à raison de 5 francs en moyenne par kilogramme, produire un bénéfice de 10 à 80 fr. Pour être efficace, la taxe devrait être fixée à ce dernier chiffre ; mais par l'élévation même, on rendrait l'application difficile, et du reste, il ne s'agit pas dans l'espèce de créer un revenu au Trésor, mais bien de détruire la fraude.

« Dans ces conditions, il a paru plus simple de demander la prohibition qui atteindra plus facilement le but que l'on se propose, et qui facilitera l'action de la douane. Pour que cette prohibition ait une sanction efficace, il y aurait lieu, peut-être, d'insérer dans le tarif de sortie une clause pénale contre les contrevenants. »

Il résulte de la lettre de M. le Ministre de l'Agriculture et du Commerce que c'est à la fois dans l'intérêt des cultivateurs de l'extrême frontière dont les récoltes sont ravagées par les chiens des contrebandiers, et dans l'intérêt du Trésor, que le Gouvernement demande que le droit de 6 francs à la sortie des chiens de forte race, voté par la Chambre, soit remplacé par la prohibition. La Commission a examiné la proposition du Ministre. Le rapporteur se bornera à faire remarquer, très incidemment du reste, que l'État détenteur du monopole des tabacs, n'hésite pas à nous demander de sauvegarder ses intérêts par les mesures les plus énergiques, alors qu'on marchandait à notre agriculture, à notre industrie, les droits compensateurs les plus indispensables.

M. le Directeur général des Douanes a insisté pour que la proposition fût adoptée, elle n'a pas été combattue. M. le Directeur général des Douanes a demandé à votre Commission de formuler ainsi la disposition pénale qui serait inscrite dans le projet de loi, disposition qui formera le paragraphe 2 de l'article 13 :

« Les infractions à la disposition prohibant la sortie des chiens de forte race par les frontières de terre donneront lieu à l'application des peines édictées par la loi du 28 avril 1816 pour les importateurs en contrebande des marchandises prohibées. »

Nous vous proposons, en résumé, de prononcer la prohibition, à la sortie par la frontière de terre des chiens de forte race, et d'inscrire le paragraphe ci-dessus dans l'article 1<sup>er</sup> du projet de loi portant fixation du tarif général des Douanes. Nous vous proposons aussi d'adopter les chapitres 581 et 583, comme au projet voté par la Chambre. Le chapitre 582 prohibant la sortie des munitions de guerre restera supprimé, ainsi que les tarifs à la sortie des chiffons et du carton de simple moulage, ou pâte de papier.

Ainsi réduit, notre tarif général de sortie ne s'appliquera plus à aucun intérêt industriel ou agricole, et votre Commission ne croit pas inutile de vous faire remarquer qu'il n'en est pas partout de même à l'étranger. C'est ainsi, par exemple, que l'Italie applique un tarif de sortie qui lui procure de véritables ressources, tarif dont voici les principaux articles :

Vin en futaies.....	1 fr. 10 l'hectolitre.
Vin en bouteilles .....	5 50 le cent.
Huile d'olive.....	1 10 les 100 kil.
Lie de vin .....	2 20 —
Fromages .....	4 40 —
Bœufs et taureaux .....	5 50 par tête.
Vaches .....	4 40 —
Bouillons et taurillons .....	2 20 —
Veaux.....	1 10 —

etc. etc.

Notre tarif de sortie est donc conçu dans un esprit essentiellement libéral. En voici les dispositions :

TABLEAU B.  
Tarif de sortie.

Chapitres.	Désignation des Produits.	Projet adopté par la Chambre.	Projet de la Commission du Sénat.
580	Chiens de forte race exportés par les frontières de terre.	6 fr. par tête.	Prohibées.
581	Contrefaçons en librairie.	Prohibées.	Prohibées.
583	Toutes autres marchandises.	Exemptes.	Exemptes.

SURTAXES D'ENTREPÔT.

Le projet de loi déposé à la Chambre des Députés par le Gouvernement abaissait dans de fortes proportions les surtaxes d'entrepôt applicables à plusieurs produits d'origine extra-européenne importés d'un pays d'Europe. La surtaxe de 20 fr. 80 sur le café en fèves et le cacao en fèves était ramenée à 10 francs ; la surtaxe de 41 fr. 60 sur le girofle, la cannelle et cassia-lignea, le poivre et piment, les amomes et cardamomes était abaissée à 10 francs ; la surtaxe de 31 fr. 40 sur le thé était ramenée à 20 francs ; la surtaxe de 31 fr. 20 sur l'indigo et ses composés était réduite à 20 francs, etc., etc. Un accord est intervenu sur presque tous les points entre le Gouvernement et la Commission de la Chambre, les surtaxes ont été presque toutes fixées à leur ancien chiffre, sauf quelques exceptions regrettables.

La discussion des surtaxes d'entrepôt n'a donné lieu dans la séance de la Chambre des Députés qu'à un débat assez court qui a porté exclusivement sur l'exemption dont les laines d'Australie et du Cap, les cotons de l'Inde et le jute bénéficieraient désormais aussi bien dans le tarif général que dans le tarif conventionnel.

En présence de l'accord intervenu entre le Gouvernement et la Commission de la Chambre des Députés, et satisfaction ayant été donnée dans la plupart des cas aux intérêts de nos ports et de notre marine marchande, votre Commission s'est ralliée presque sans débat aux surtaxes du projet qu'elle soumet à votre approbation. La tâche de votre Rapporteur se trouve ainsi simplifiée et peut-être, pourrait-il se borner à vous transmettre les conclusions de votre Commission.

Cependant, Messieurs, la question des surtaxes d'entrepôt présente pour notre marine marchande, et surtout pour nos ports de commerce un si grand intérêt, que nous nous ferions scrupule de ne pas lui consacrer quelques observations générales.

Autrefois, notre marine marchande bénéficiait de la surtaxe de pavillon et de la surtaxe d'entrepôt. Toute marchandise étrangère, quelle que fût sa provenance, payait à l'entrée en France une surtaxe de pavillon lorsqu'elle n'était pas transportée par des navires français ou par des navires du pays de production. La surtaxe d'entrepôt atteignait et atteignait encore celles de ces marchandises qui, même par navires français, sont importées des entrepôts étrangers.

La surtaxe de pavillon a disparu, et vous savez ce qu'est devenu notre marine marchande sous le régime de la libre concurrence. Il a fallu chercher à rendre à nos chantiers et à notre navigation la vie et l'activité en accordant des primes à la construction et à l'armement. Les surtaxes d'entrepôt dont on proposait la suppression en même temps que celle de la surtaxe de pavillon ont été heureusement maintenues. Elles rencontrent cependant des adversaires : les droits de douanes en rencontrent aussi. Ces adversaires sont de deux sortes. Selon les uns la marine marchande et le commerce des ports ne peuvent pas avoir la prétention d'obtenir des surtaxes d'entrepôt pas plus que les industriels et les agriculteurs ne peuvent avoir celle d'être mis, jusqu'à un certain point, à l'abri de l'importation étrangère par des droits compensateurs.

Cette théorie n'a point été soulevée dans votre Commission, qui s'est bornée à discuter les surtaxes d'entrepôt inscrites dans le projet de loi soumis au Sénat.

Les surtaxes d'entrepôt ont naturellement aussi pour adversaires ceux qu'elles atteignent ou qu'elles paraissent atteindre dans leurs intérêts particuliers.

Rarement, soit en matière de douanes, soit en matière de surtaxes d'entrepôt ou de pavillon, on trouve l'intérêt particulier disposé à s'incliner devant l'intérêt général.

Il y a des représentants des ports qui combattent les droits de douanes réclamés par l'Agriculture et l'Industrie et qui restent très partisans de surtaxes d'entrepôt ; de même il y a des industriels qui demandent des droits compensateurs pour eux-mêmes et qui sont hostiles à ces surtaxes.

Qu'il nous soit permis de dire que ces intérêts opposés en apparence sont en réalité absolument solidaires, et c'est à les concilier que les pouvoirs publics doivent surtout s'attacher, en se plaçant au point de vue supérieur des intérêts généraux.

Le commerce maritime et la marine supportent les mêmes charges que l'industrie et ont droit à la même protection. Les surtaxes d'entrepôt telles qu'elles sont réclamées représentent certes la forme de protection la plus modérée.

N'oublions pas que les navires français sont comme des voies françaises de transport prolongées jusqu'aux pays les plus lointains.

Il est hors de doute que partout où la marine française pénètre avec des produits français, elle crée des débouchés pour ces produits, tandis que par un effet contraire, d'ailleurs naturel, les marines étrangères qui exportent nos produits cherchent à les remplacer par ceux de leur propre pays. Ainsi se lient les grands intérêts, et il est certain que toutes les mesures favorables au pavillon national profitent aussi à nos exportations, c'est-à-dire à nos industries. Quant aux avantages que les surtaxes d'entrepôt assurent à nos ports, ils sont de la plus haute importance.

C'est la surtaxe d'entrepôt qui maintient seule ces marchés puissants, sans lesquels nous serions absolument à la merci de la spéculation étrangère. On importe directement les marchandises des pays qui les produisent, afin d'éviter la surtaxe qu'elles supporteraient, si elles provenaient des entrepôts, et c'est ainsi que l'industrie trouve sur nos marchés ses approvisionnements. Les surtaxes proposées ne sont pas assez élevées pour arrêter les achats que les industriels français peuvent avoir intérêt à réaliser sur les marchés anglais ou autres; de tels achats s'accomplissent tous les jours, et il est bien juste qu'ils puissent s'accomplir; mais la faveur assurée aux importations directes conserve à nos portes, c'est-à-dire au commerce, au travail d'ouvriers innombrables, des éléments de prospérité qu'il serait téméraire et injuste de leur enlever. Sans les marchés intérieurs, nos industries seraient à la discrétion des marchés étrangers. Les surtaxes d'entrepôt ont été supprimées sur les laines et sur divers articles d'Australie, sur les cotons de l'Inde, sur les jutes. Il n'y a plus de marchés en France pour ces articles si considérables, on va les chercher en Angleterre ou en Belgique.

La surtaxe sur les cotons d'Amérique a été maintenue, et notre marché pour cet article a conservé toute son importance. On ne saurait contester que des marchés indépendants et considérables se sont constitués en France pour les articles qui tels que les cafés, les cacao, les poivres n'ont pas cessé d'être soumis au régime des surtaxes d'entrepôt—tandis que les articles dont la provenance directe a cessé d'être favorisée ont à peu près disparu de nos diverses places de commerce. Le régime des surtaxes a donc prouvé ses mérites par ses résultats. Trois grands intérêts en réclament le maintien—l'intérêt des ports, l'intérêt de la marine et l'intérêt des industries d'exportation. N'est-il pas prudent, n'est-il pas équitable de conserver des avantages acquis, dont on peut apprécier les bienfaits?

Votre Commission l'a pensé et elle vous propose d'adopter les surtaxes conformément aux tableaux C et D, votés par la Chambre des Députés. Ces surtaxes sont de deux sortes. Les premières sont applicables aux produits d'origine extra-européenne importés d'un pays d'Europe. Ces surtaxes sont comprises dans le tableau C. Les secondes sont applicables aux produits d'origine européenne importés d'ailleurs que des pays de production; elles forment le tableau D. Elles sont de beaucoup moins importantes que les autres.

Nous allons dire quelques mots du tableau C et du tableau D.

#### TABLEAU C.

A l'exception des laines en masse d'Australie et du Cap; du coton de l'Inde en laine ou non égrené; de la plombagine de Ceylan; des tabacs de santé et d'habitude et des végétaux filamenteux, tels que jute, aloès, plorumium tenax, abaca, fibres de coco, tous les produits d'origine extra-européenne importés d'un pays d'Europe sont soumis à la surtaxe d'entrepôt. En thèse générale la surtaxe est de 3 fr. 60 par 100 kilogrammes et le tableau C énumère les marchandises qui ont une surtaxe spéciale. Ainsi que nous l'avons dit en commençant, le projet primitif du Gouvernement réduisait dans d'assez fortes proportions ces surtaxes spéciales. La commission de la Chambre est parvenue à obtenir en grande partie le maintien de ces surtaxes. Toutefois, la surtaxe de 20 francs sur le café en fèves est abaissée à 10 francs; la surtaxe de 41 fr. 60 sur les amomes et cardamomes est réduite à 10 francs; par contre la surtaxe de 3 fr. sur la vanille, est portée à 10 francs. La surtaxe de 31 fr. 20 sur l'indigo est ramenée à 25 francs; la surtaxe de 3 fr. 12 sur la porcelaine du Japon est relevée à 30 francs. Signalons en passant une erreur typographique qui s'est glissée dans le projet de loi qui a été transmis au Sénat. Au lieu de 60 centimes, il faut lire 3 fr. 60 dans le chapitre 619 qui concerne toutes les marchandises autres que celles énumérées dans les chapitres précédents du tableau C.

Ce ne sont pas les seules innovations introduites dans les surtaxes applicables aux produits d'origine extra-européenne importés des entrepôts d'Europe. Notre tarif général actuel atteint d'un droit de 3 fr. 74 les laines en masse d'Australie et du Cap, venant des entrepôts d'Europe, et d'un droit de 3 fr. 12 les cotons de l'Inde et le jute. Il est vrai que, par suite des traités de commerce, ces surtaxes ne sont pas appliquées; on peut penser que c'est grâce à cette suppression que le marché du Havre a perdu les articles d'Australie et de l'Inde, les laines, les cotons, les jutes. D'autres marchés auraient pu se créer et l'industrie française au lieu d'aller chercher en Angleterre ces importantes matières premières, aurait pu se les procurer dans nos ports, au grand profit du commerce et du travail français.

D'après le projet qui nous est soumis, ce n'est plus seulement dans les tarifs conventionnels que les surtaxes du coton de l'Inde, du jute et des laines d'Australie et du Cap se trouvent supprimées; elles le sont aussi dans le tarif général, et l'exemption est prononcée même en dehors des traités de commerce.

Un assez vif débat s'est engagé à la Chambre des Députés sur ce point. Dans l'intérêt de l'agriculture française et du marché français, M. Guichard a développé un amendement tendant à insérer dans le tableau C une surtaxe de 3 fr. 60 sur les laines d'Australie et du Cap venant des entrepôts d'Europe.

M. Foulovey a soutenu un autre amendement dans le sens du maintien au tarif général des surtaxes actuelles sur les laines d'Australie, le coton des Indes et le jute. Il a fait remarquer qu'il ne fallait pas faire d'avance la concession de la suppression de ces surtaxes, et qu'en les maintenant dans le tarif général, on obtiendrait des compensations en échange de leur suppression lors de la négociation des nouveaux traités de commerce.

Il a été répondu à M. Guichard qu'il ne fallait pas songer à créer en France un marché de laines d'Australie, parce que le marché anglais était désormais assez puissant pour annuler les rivaux qui tenteraient de se produire. Ce n'est pas là un argument, c'est seulement l'acceptation d'un fait accompli. Quant à l'objection consistant à dire qu'il faut tout au moins conserver les surtaxes dans le tarif général pour pouvoir obtenir des concessions en échange de leur suppression dans le traité Franco-Anglais, elle n'a été l'objet d'aucune réponse concluante. La Chambre s'est prononcée pour la suppression, même dans le tarif général, des surtaxes sur les laines d'Australie et du Cap, et sur le jute et le coton des Indes.

#### TABLEAU D.

Il nous reste à parler des surtaxes applicables aux produits d'origine européenne importés d'ailleurs que des pays de production. Le tableau C ne concerne que les produits d'origine extra-européenne. Dans ce tableau, l'exemption ne s'applique qu'à quelques produits. Dans le tableau D, au contraire, l'exemption est la règle, et les produits soumis à la surtaxe sont énumérés en quelques chapitres.

La question de savoir si des surtaxes spéciales ne doivent pas être appliquées lorsqu'il s'agit de marchandises d'origine européenne venant des entrepôts, comme elles le sont, lorsqu'il s'agit de marchandises d'origine extra-européenne, s'est posée devant la Chambre des députés.

Logiquement, il devrait en être ainsi, car s'il est admis que l'importation directe du pays d'origine est affranchie de la surtaxe, lorsqu'il s'agit de produits hors d'Europe, et cela dans l'intérêt du maintien de nos marchés intérieurs, et aussi dans l'intérêt de la marine, on doit admettre également que l'importation directe des produits d'origine européenne bénéficiera seule de la franchise, et que les marchandises produites en Europe, mais venant d'ailleurs que du pays de production, subiront la surtaxe.

Cependant la Commission de la Chambre des députés ne s'est pas prononcée dans le sens de l'extension de la surtaxe d'entrepôt aux produits d'Europe venant des entrepôts.

Nous nous bornerons à vous proposer d'adopter le tableau D tel qu'il a été voté par la Chambre des députés, tableau identique à celui du projet du Gouvernement, excepté sur ces deux points: la surtaxe de 1 franc sur les joncs et roseaux bruts est supprimée; les bois communs, exempts dans le projet du Gouvernement, seront assujettis à une surtaxe de 1 franc.

Voici les textes des tableaux C et D dont nous vous demandons l'adoption.

#### TABLEAU C.

Surtaxes applicables aux produits d'origine extra-européenne importés d'un pays d'Europe.

646	Bois communs .....	1 00
647	Rognures de cuir .....	Exemptes.

REGIME APPLICABLE AUX PRODUITS IMPORTÉS DES COLONIES ET POSSESSIONS FRANÇAISES. (Tableau E.)

Le tableau E fixe le régime applicable aux produits importés des colonies et possessions françaises. Comme on le verra en parcourant le tableau E, il n'y a qu'un très petit nombre de produits importés de nos colonies et possessions qui soient soumis à des droits de douane. Nous ne le regrettons pas, car il est naturel que nous accordions des faveurs spéciales à ces terres françaises qui, pour être séparées de la métropole, n'en contribuent pas moins à la grandeur de la nation.

Après avoir écarté un amendement de M. de Villiers, relatif aux droits de douane des colonies, la Chambre a adopté l'amendement suivant de M. Bouchet, amendement qui forme le second paragraphe de l'article 3 du projet de loi portant fixation du tarif général des douanes :

“ Pour les colonies qui ne sont pas régies par le Sénatus-Consulte du 3 mai 1854, complété par celui du 4 juillet 1866, les tarifs de douane seront établis par décret du gouvernement métropolitain, le Conseil d'Etat entendu.”

Cet amendement ne fait que confirmer ce qui existe déjà.

Les tarifs de douane en Algérie sont actuellement fixés par la loi du 17 juillet 1867. On pouvait se demander si l'amendement de M. Bouchet n'aurait pas pour conséquence d'enlever au Parlement le contrôle du régime douanier de l'Algérie sans doute l'Algérie n'est pas considérée comme une colonie, mais il doit rester bien entendu que ses tarifs douaniers ne pourront, en aucun cas, être fixés par de simples décrets.

M. le Directeur général des Douanes et M. le Directeur du commerce extérieur ont donné à votre Commission l'assurance formelle que rien ne serait changé dans l'application de la loi de 1867, et que cette loi continuerait à régir les tarifs douaniers de l'Algérie.

C'est sous la réserve de ces observations que votre Commission vous propose d'adopter le tableau E, tel qu'il a été accepté par la Chambre des Députés, en modifiant toutefois le paragraphe relatif aux chocolats originaires de l'Algérie, pour le faire concorder avec la loi sur les sucres, votée le 19 juillet dernier.

TABLEAU E.

Régime applicable aux produits importés des colonies et possessions françaises.

Numéros du Répertoire.	Désignation des Produits.	Droits.
	Sucres .....	Droits du tarif général.

MR. JUSTICE HARGRAVE.

No. 1.

His Honor Mr. Justice Hargrave to The Minister of Justice.

Sir,

I much regret that I am compelled (under Dr. MacLaurin's advice) to apply at once for six months' leave of absence from my judicial duties.

Rushcutters' Bay, 21 September, 1881.

Yours faithfully,  
JOHN F. HARGRAVE.

P.S.—I enclose Dr. MacLaurin's certificate.

[Enclosure.]

I AM of opinion that Mr. Justice Hargrave's state of health is such that it is absolutely necessary that he should abstain from his judicial duties for six months.

21 September, 1881.

H. MACLAURIN, M.D.

Acknowledge.—Express my sincere regret at His Honor's indisposition, which I trust may not be so serious as he apprehends. Inform His Honor that his application, with Dr. MacLaurin's certificate, will be brought by me before the Cabinet at the earliest opportunity.—J.G.L.I., 22/9/81.

No. 2.

The Minister of Justice to His Honor Mr. Justice Hargrave.

Sir,

Department of Justice, Sydney, 22 September, 1881.

In acknowledging the receipt of your Honor's letter of the 21st instant, applying under medical advice for six months' leave of absence from your judicial duties, permit me at the same time to express my sincere regret at this intimation of your indisposition, which I trust may not be so serious as you apprehend.

I do myself the honor to state that your application, together with Dr. MacLaurin's certificate, will be brought by me before the Cabinet at the earliest opportunity.

I have, &c.,  
J. GEO: LONG INNES.

No. 3.

The Minister of Justice to His Honor Mr. Justice Hargrave.

Sir,

Department of Justice, Sydney, 28 September, 1881.

I do myself the honor to inform you that I have laid your application for six months' leave of absence on the ground of ill health, together with the medical certificate forwarded by you in support of your application, before the Cabinet. I regret to have to inform you that after mature consideration my colleagues have felt themselves unable to accede to your request.

The accompanying copy of the minute of the Cabinet upon the subject will explain more fully the view taken by the Government, and to that I have to refer you.

While the unwelcome task of conveying to your Honor this intimation has fallen to me, I am at the same time authorized by my colleagues unanimously to assure you that this decision has not been arrived at without much reluctance, and not without due appreciation of your Honor's long and faithful services in the distinguished and responsible position of a Judge of the Supreme Court.

My colleagues join with me in the expression of sincere regret that your Honor's health has become so impaired, and in the earnest hope that the evening of so valuable and honorable a life may be lengthened out by well-earned rest from arduous labour.

I have, &c.,  
J. GEO: LONG INNES.

[Enclosure.]

Cabinet Minute.

THE Minister of Justice having submitted Mr. Justice Hargrave's letter of the 21st instant, applying for six months' leave of absence, the Cabinet feel bound to consider the application, not only in reference to Mr. Hargrave's failing health but in view of their duty to secure for the public the best services in the Judges of the Supreme Court. It does not seem open to doubt that the Constitution in granting retiring pensions to the Judges, demandable after fifteen years' service, has made this provision in the interest of the public, in order that the duties of the Judicial Bench should be continuously performed by persons not incapacitated by the infirmities of age. Mr. Hargrave himself appears to have entertained this view of his own case two years and eight months ago. Writing on the 30th January, 1879, he says, "I have struggled hard to continue at work till July, 1880, when I shall be able to retire altogether." Since that date, six months' leave has been granted to Mr. Hargrave, and now, more than a year after he has become entitled to retire on his pension, another application for six months' leave is submitted for the consideration of the Government. If this application were entertained, the Government must of necessity again resort to the objectionable course of making temporary appointments to the Bench of the Supreme Court, a practice which in itself is prejudicial to obtaining the highest degree of available ability to fill the office of Judge. In any case the suddenness with which Mr. Hargrave has intimated to the Government his inability to perform his judicial duties will necessitate resort to temporary expedients.

Considering all the circumstances of the case, the Government have no alternative, in the just performance of their duty, but to request Mr. Hargrave to retire upon the pension which the Constitution has provided for him, and which he has so well earned.

Colonial Secretary's Office, 23/9/81.

HENRY PARKES.

## No. 4.

## His Honor Mr. Justice Hargrave to The Minister of Justice.

Sir,

Rushcutters' Bay, 30 September, 1881.

Before receiving your kind and courteous letter of yesterday's date, enclosing the Minute of the Cabinet in the very complimentary terms as to my services, I had firmly resolved to resign my judicial position, owing to the very infirm state of my health, which resignation I now formally desire hereby to tender for acceptance.

With regard to my pension I respectfully submit that the amount to which I am entitled is by the Constitution Act fixed at seven-tenths of the salary I have always received as Judge of the Supreme Court, viz., £2,000 per annum, as the limitation in the Act of 1857 could have no application to Judges of the Supreme Court like myself subsequently to that date.

I take this opportunity of expressing my great appreciation of the unvarying kindness and courtesy from yourself and the other members of the Government, under my long failing health for several years past.

I remain, &amp;c.,

JOHN F. HARGRAVE.

Prepare Minute for Executive Council recommending that the resignation of Mr. Hargrave be accepted. Let papers be recorded in this office.—H.P., 7/10/81. Minute herewith, 8 Oct., /81.

## No. 5.

## Minute Paper for the Executive Council.

Resignation of His Honor Mr. Justice Hargrave.

Colonial Secretary's Office, Sydney, 10 October, 1881.

In laying before the Council the accompanying letter from His Honor Mr. Justice Hargrave, dated the 30th ultimo, I beg to recommend that the resignation therein tendered of office as Senior Puisne Judge of the Supreme Court be accepted.

HENRY PARKES.

The Executive Council advise that the resignation tendered by Mr. Justice Hargrave, of his appointment as Senior Puisne Judge of the Supreme Court, be approved.—ALEX. C. BUDGE, Clerk of the Council.

Approved.—A.L., 11/10/81. Min. 81.—11/10/81. Confirmed. J. F. Hargrave, Esq., informed, 13 Oct., /81.

## No. 6.

## The Colonial Secretary to J. F. Hargrave, Esq.

Sir,

Colonial Secretary's Office, Sydney, 13 October, 1881.

With reference to your letter of the 30th of September, addressed to the Minister of Justice, wherein you tendered the resignation of your office of Senior Puisne Judge of the Supreme Court, I have the honor to inform you that your resignation has been accepted by His Excellency the Governor with the advice of the Executive Council.

I have, &amp;c.,

HENRY PARKES.

## No. 7.

## J. F. Hargrave, Esq., to The Attorney General.

Rushcutters' Bay, 17 October, 1881.

Dear Mr. Attorney General,

As I am still under your official care (though now a mere Barrister of our Supreme Court) to answer all the kind inquiries in Parliament by Mr. Buchanan, Mr. Abigail, and other Members of the Legislative Assembly, about my conduct as a Judge, still I must trouble you to inform Mr. Buchanan, in \*replying to the above questions, that my release from further judicial toil has probably saved my life, as my leave of absence had already sufficiently over-worked my esteemed brother Judges in doing my proper work, and I could not have honorably accepted any further leave of absence, now that I had become entitled to my pension under the Constitution Act.

I shall, &amp;c.,

JOHN F. HARGRAVE.

Seen.—R.W., A.G., 18/10/81.

## NEW SOUTH WALES.

## MR. DISTRICT COURT JUDGE DOCKER.

(CORRESPONDENCE RESPECTING ADDRESS TO A JURY AT WILCANNIA QUARTER SESSIONS.)

*Ordered by the Legislative Assembly to be printed, 8 December, 1881.**[Laid upon the Table of the House in accordance with promise made in answer to Question 9, Votes 87, Tuesday, 6 December, 1881.]*

Mr. District Court Judge Docker to The Under Secretary of Justice.

Sir,

Melbourne, 24 November, 1881.

I beg to acknowledge the receipt of your letter of the 16th instant, with the enclosures of that date and of the 19th instant.

The delay which has occurred arose from the mistake of your department in addressing me at my residence, when a reference to the Law Almanac would have shown that on the above date I was sitting at Hay, at which place I should have been communicated with.

With reference to the subject of your letter, I have to express my regret that the Honorable the Minister of Justice should require the information for the purpose of a Parliamentary discussion. It appears to me that such a course is calculated to strike a blow at the dignity and independence of the body to which I have the honor to belong. It further appears to me calculated to encourage the notion that any person feeling himself aggrieved by the action of a Judge may forthwith appeal to Parliament instead of following the course prescribed by law. If Judges in discharging their duties are to be hampered by considerations as to what may be said of them by Members of Parliament, it appears to me that those duties will often be unsatisfactorily discharged. If a District Court Judge gives a wrong direction in law, or adopts a course of action which causes a mistrial, the Supreme Court is the proper tribunal to appeal to. If he is guilty of misconduct which would justify his removal, the Governor and Executive Council are empowered by law to deal with the matter. It appears to me that no other inquiry into the conduct of a District Court Judge is contemplated by law.

I feel bound to make this protest in the interests of the members of the body of whom I am a junior, and whom I have had no opportunity of consulting upon this matter, in order that their position may not be compromised by the action I am now taking in complying with the request of the Minister of Justice. I have every desire to show due respect to Parliament, and so far as I am personally concerned I am prepared to answer as to any words or actions of mine whensoever and by whomsoever required, as the Minister is aware, I having already placed at his disposal a full explanation of the matters referred to.

I have now to repeat that at the last Wilcannia Quarter Sessions Campbell and Burgess were tried for sheep-stealing and receiving. The case began on Monday after lunch, and lasted to a late hour in the evening. The Jury not having agreed at midnight were locked up till the following morning. At 9 o'clock they were brought in, and as they had not then agreed to a verdict I read over the evidence again, and further directed them as to their responsibilities as being sworn to return a true verdict according to the evidence. The language I then used is on the whole fairly and accurately summarised in the report of the *Wilcannia Western Grazier*, which is copied by the *Deniliquin Pastoral Times*. One error, however, occurs: I am represented as saying, "I noticed from the opening of this case the face of one jurymen who, I felt convinced, had made up his mind to acquit the prisoners, whatever the evidence might be." I did not use those words, but said, "had made up his mind what his verdict should be, whatever the evidence might be." The reporter in summarising very naturally, no doubt, has put the inference instead of the actual words.

I considered it my duty to address such observations to the Jury, because on the previous day, at the opening of the case, I observed one of the jurymen telegraphing some communication to one of the prisoners, and subsequently, watching his demeanour, saw that he was paying no attention whatever to the case.

I believe that such misconduct would have justified me in discharging the Jury at once and calling a fresh panel; but though I had no doubt, and still have no doubt, whatever as to this man's conduct, I considered that there was the bare possibility of my being mistaken, and that I might be doing him an injustice. I therefore refrained from commenting on the matter till the following morning, when it appeared to be necessary to do so.

The

The language I used in no way reflected upon, nor could it be offensive, to any honest jurymen, nor was it calculated to influence any having a reasonable doubt as to the evidence. It was calculated to warn and rebuke any, if such were there, who were perversely persisting in a conclusion which they themselves knew to be false; and I consider that I should be false to the oath I have taken if I did not when occasion arose warn and rebuke such. I am happy to think that in this case I saved the offender from persisting in a crime, and prevented a gross failure of justice.

I have been informed that the Jury agreed immediately on their retirement, but that to preserve the appearance of having further deliberated they remained in the Jury room half an hour longer.

With regard to the illustration I used, I state that it was simply to enforce what I was then saying, namely, that the person I was referring to could not be identified by any person but himself. I did not intend to compare him with Judas Iscariot, nor, I am certain, were my remarks so construed by any person who heard me. Even the compressed report, fairly read with the context, shows what my meaning was. It appears from the newspaper extracts which you have been good enough to supply me with that those remarks have been wrongly construed.

I presume I am not called upon to answer newspaper writers. I will simply observe that no Judge, even the most experienced, is infallible; that in speaking *extempore* he cannot pick and choose the words which would best express his own meaning and exclude every other; he must take those which first come, if they fairly represent the idea he wants to convey.

In the light of subsequent events I see that my illustration was an unfortunate one; and if at any future time I should find it my duty to make the same observations, it is not likely that I should use the same language or the same illustration.

I have, &c.,  
ERNEST B. DOCKER,  
District Court Judge.

The Under Secretary of Justice to Mr. District Court Judge Docker.

Sir,

Department of Justice, Sydney, 6 December, 1881.

In reply to your letter of the 24th ultimo, furnishing report with respect to certain language alleged to have been used by you in addressing a Jury at the recent Wilcannia Quarter Sessions, the Minister of Justice desires me to say that he is of opinion that the dignity and independence of the District Court Judges will not be injuriously affected by Parliamentary discussion, so long as that dignity or independence is supported by the honorable and efficient exercise of their powers and duties, which he trusts will always be the case.

Mr. Foster regrets that you should have used language upon the occasion in question which he cannot help considering injudicious. He is, however, glad to find from your letter that in the light of subsequent events you see that your illustration was an unfortunate one; and that if at any future time you should be similarly situated it is not likely you would use the same language or the same illustration.

I have, &c.,  
W. E. PLUNKETT,  
Under Secretary.

1881.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## ADMINISTRATION OF JUSTICE.

(THE MASTER IN EQUITY—COMPLAINTS BY F. J. PLOMLEY AND J. PARKINSON AGAINST.)

*Ordered by the Legislative Assembly to be printed, 24 November, 1881.*

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 15 November, 1881, praying that His Excellency will be pleased to cause to be laid upon the Table of this House,—

“ Copies of all Correspondence which has passed between Francis James Plomley and John Parkinson, Esquires, solicitors of the Supreme Court, and the Department of the Minister of Justice; as also copies of all Correspondence which has passed between the said Department and the Master in Equity touching certain complaints made by the said Francis James Plomley and John Parkinson respectively against the Master in Equity.”

*(Mr. Joseph P. Abbott.)*

## SCHEDULE.

NO.	PAGE.
1. F. J. Plomley, Esquire, solicitor, to the Minister of Justice, preferring complaint against the Master in Equity, with enclosures. 22 January, 1881 .....	2
2. John Parkinson, Esquire, solicitor, to the Minister of Justice. 31 January, 1881 .....	5
3. F. J. Plomley, Esquire, solicitor, to the Minister of Justice, with minute thereon. 15 February, 1881 .....	6
4. Same to same, with minute thereon. 20 April, 1881 .....	6
5. Under Secretary of Justice to the Master in Equity. 4 May, 1881 .....	6
6. John Parkinson, Esquire, solicitor, to the Minister of Justice, with minute thereon. 4 June, 1881 .....	6
7. Under Secretary of Justice to the Master in Equity. 8 June, 1881 .....	7
8. The Master in Equity to the Under Secretary of Justice, with minute thereon. 10 June, 1881 .....	7
9. F. J. Plomley, Esquire, solicitor, to the Minister of Justice, with minute thereon. 11 June, 1881 .....	7
10. Under Secretary of Justice to F. J. Plomley, Esquire, solicitor. 15 June, 1881 .....	7

12. Under Secretary of Justice to F. J. Plomley, Esquire, solicitor. 16 August, 1881 .....	9
13. Same to Master in Equity. 17 August, 1881 .....	9
14. The Master in Equity to the Minister of Justice, in reply to No. 2. 17 August, 1881 .....	10
15. F. J. Plomley, Esquire, solicitor, to the Minister of Justice. 28 September, 1881 .....	10
16. Minute of the Minister of Justice (Sir J. G. L. Innes), on complaints preferred by Mr. Plomley and Mr. Parkinson against the Master in Equity. 13 October, 1881 .....	11
17. Under Secretary of Justice to the Master in Equity, with copy of No. 16. 13 October, 1881 .....	12
18. Same to John Parkinson, Esquire, solicitor, with copy of No. 16. 13 October, 1881 .....	12
19. Same to F. J. Plomley, Esquire, solicitor, with copy of No. 16. 13 October, 1881 .....	12

## ADMINISTRATION OF JUSTICE.

No. 1.

F. J. Plomley, Esq., to The Minister of Justice.

Sir,

69, Elizabeth-street, Sydney, 22 January, 1881.

As a solicitor of the Supreme Court, and myself a suitor in certain pending Equity proceedings, I beg to call your attention to certain facts connected with the administration of justice in the Equity Branch of the Supreme Court, and in particular to the extraordinary conduct of the Master in Equity towards myself.

There is a special case now depending in Equity wherein Charles Shepherd and others are plaintiffs, and Annie Shepherd, myself, and others are defendants. On 17th December last a decree was made on the said special case by the Primary Judge. Feeling myself aggrieved at the decision of His Honor, on 23rd December I filed a notice of appeal, signed by two counsel, as by law required, copies of which notice were afterwards duly served on all proper parties and on their Honors the Judges. Under the new Equity Act, in order to prosecute my appeal, I was bound, within fourteen days after filing my notice of appeal, to deposit in the hands of the Master in Equity such sum (not exceeding £100) as the Master should direct, or, at my option, to deposit in the hands of the Master a bond of two persons, to be approved of by him, in such sum (not exceeding £100) as he might direct, as security for the respondents' costs of the appeal. I have been advised, and am myself of opinion (an opinion fortified by the universal practice of the Court), that, for the purpose of an appeal, time runs in vacation, and that notwithstanding the general rule, that time does not run in vacation, I was bound to lodge security on my appeal on or before the 6th January instant—that is, within fourteen days after filing my notice of appeal on 23rd December. I may also call your attention now to the rule which says that all proceedings on an appeal may be taken in vacation. On 28th December last I caused a warrant to be drawn up to fix the security on my appeal, and sent a clerk to the Equity Office to have it issued. The warrant was returned to me with a memo. endorsed thereon by Mr. Curtis, the chief clerk as follows:—"Presented to the Master, and he refused to give appointment in vacation. £100 security must be paid into Court.—P.C.C., 28/12/80." I thereupon attended personally upon Mr. Curtis, and having learnt from him that the Master had absolutely declined to issue a warrant for me during vacation, I attended with Mr. Curtis on Mr. Justice Faucett, the only Judge then in Chambers, explained the urgency of my case, and asked for a peremptory order on the Master to issue the warrant. His Honor thereupon suggested I should write to the Master on the subject, at the same time expressing his opinion as to what the form of the letter should be. I thereupon, pursuant to the suggestion of His Honor, wrote a letter, a copy of which is hereunto annexed, marked "A," which at my request, the Master being absent from town, was forwarded from the Equity Office to his private residence at Sherwood, beyond Parramatta. On 30th December I received from the chief clerk a letter, a true copy whereof is hereunto annexed, marked "B." I thereupon made and filed an affidavit of the above facts, which was brought to the notice of the Master, and, as I am informed, read by him. He thereupon instructed Mr. Curtis, as the latter informed me, to issue a warrant to fix the security on my appeal on the conditions that it should be returnable on the following Monday, at 10:30 a.m., at his private residence, Sherwood, several miles beyond Parramatta, that I myself should not attend upon the said warrant, but might be represented by my clerk or partner (my partner, Mr. Dixon, being then out of the Colony, as the Master was then aware); and further, that Mr. Curtis should attend upon the said warrant, and that I should pay his expenses to and from Sherwood. At the time he gave these extraordinary directions the Master was in the habit of coming to his office at the Supreme Court at least three times a week, vacation notwithstanding. On receipt of the above information I made and filed an additional affidavit of the facts, a draft of which affidavit was submitted to the Master, who declined to read it; and I thereupon attended again upon Mr. Justice Faucett, who, after hearing my two affidavits read, and hearing me, directed Mr. Curtis to write a letter to the Master, inviting him to take into consideration the expediency of issuing a warrant for me. On 4th January instant my clerk attended at the Equity Office, and a warrant was issued at about 11 a.m., returnable at 12 noon that day, within which time I had to get a bond signed, and serve two solicitors with the warrant, get them to accept such short notice, and to approve of the bondsmen, which they did—on the return of the warrant (at which time it had been agreed between myself and the other solicitors concerned that the security on an appeal by other defendants in the same special case should be fixed) I attended at the Equity Office, and was informed by the chief clerk that the Master would not hear me either in that or any other proceedings. Mr. F. Curtiss, who acted as the solicitor of the other appellants, having gone into the Master's room with a clerk from the office of Messrs. Pigott & Trickett, who also represented other parties, I shortly followed, and as soon as I entered, and before I spoke a single word, the Master said it was no use my going in, as he would not hear me, and added that I had been most insolent to him, and had boasted of what I could do with him. I thereupon said it was utterly useless for him to issue a warrant if he would not hear me on it, and then the Master still persisting in ignoring my presence, I withdrew with the intention of again applying to a Judge, but none happened to be in Court. While I was waiting for a Judge, Mr. F. Curtiss, the solicitor, informs me he asked the Master to hear me, as he (Mr. Curtiss) wanted me to consent to his paying into Court £50 as security on the appeal of the defendants he represented, but the Master refused to do so, and then Mr. Curtiss came out and asked if I would consent as above, which I refused to do unless I was heard upon the matter before the Master. Subsequently Mr. Curtis (the chief clerk) after seeing the Master, informed me that the latter proposed to direct Mr. Curtiss' clients to pay into Court £50, and for me to pay in the same amount as security. I then told Mr. Curtis (the chief clerk) that I was prepared with and desired to give a bond pursuant to the Act, that had been approved by the respective solicitors of the other parties. Mr. Curtis (the chief clerk) thereupon saw the Master on the matter, and I was afterwards informed that the Master had, behind my back, without giving me an opportunity of being heard and against my consent, fixed the security to be given by the other appellants at £50, and directed me

to.

to pay into Court £50 as my security, at the same time directing Mr. Curtis to inform me that if I wished to give a bond, he would not be in town till the following Thursday, the 6th January instant; and that the bondsmen would have to be such as he (the Master) approved of, notwithstanding the other parties interested had approved of my bondsmen, and intimated again that he would not see me personally on the subject. As the time within which my security had to be given was then within two days of expiring, and there was no time left to take the necessary steps to compel the Master to pursue the legal course, and as it is understood that the omission to give security within fourteen days is irremediable, I was reluctantly obliged to deposit the sum of £50 as the Master directed. I affirm that in acting towards me as he did the Master was actuated by malice and ill-will to me personally, a fact which I am prepared to establish if opportunity is afforded me.

Since the above events happened my attention has been drawn to the evidence given last year by the Master in Equity before a Select Committee of the Legislative Assembly on the Equity Branch of the Supreme Court, portions of which are being published in the *Sydney Morning Herald*. In the Master's evidence I find the following statements:—

"The other day a very singular thing happened. A plaintiff's solicitor had to procure a conveyance from defendant's solicitor, and came into my office about 10 minutes before I was leaving. He said—'Oh, here is a conveyance I want to have engrossed as quickly as possible. I drew it, and defendant's solicitor, who has read it over very carefully, has certified to the correctness of it, and is willing to accept it.' I said I had nothing to do with his consent. Besides that there was no necessity for him to have referred it to me, because the order says that in case parties disagree it is to be referred to the Master. I then put the draft into my bag and took it home. When I opened it, I saw amongst the sheets something about the Master covenanting to produce deeds. I thought it a very odd thing that the Master must be a party to the deed. I turned the deed over, and found that I was one of the parties to it. I looked through the deed and found that in it I covenanted to produce a deed which I might never have. When I saw the solicitor the next morning I said to him you certainly tried to steal a march upon me by trying to get me to settle this very document that you, and as you say the other solicitor, had consented should be the document to convey land to you. You had no business to put my name in. If ever anything comes from you before me again I will never let it go until I have looked carefully through every line.

"*Captain Onslow.*] Had you nothing to do with the case before? Only as Master.

"*Mr. Terry.*] He thought you would pass it without looking at it? Yes; I mention these things because I have my enemies."

From certain of the above statements, and from circumstances that have come to my knowledge lately, I am satisfied that the Master referred to a case in which I was concerned for the plaintiff, and consequently I am the object of the imputations contained therein. The facts of the case are simply these: In a suit of *Glover v. Bell* and others, in which I acted as solicitor for the plaintiff, Mr. C. Bull as solicitor for three of the defendants, Mr. Fitzhardinge as solicitor for another defendant, and Mr. John Shepherd as solicitor for two defendants, William Robison and Hugh Savage, a decree was ultimately made declaring the defendants Robison and Savage trustees for the plaintiff to the extent of one-fifth share of certain land and premises in Sydney, and the said Robison and Savage were directed to execute a conveyance to the plaintiff of the said one-fifth share, and such conveyance, in case the parties differed, was to be settled by the Master. Thereupon drew a conveyance which from the fact that the defendants Robison and Savage were, and were intended to remain, the owners of four-fifths of the land, and had only to convey one undivided fifth, had to be in the form of a conveyance of the whole of the land to some third person, no matter whom, to hold, as to four-fifths, to the use of the defendants Robison and Savage, and as to one-fifth to the use of the plaintiff, the result of which would be that, immediately on the execution of the conveyance by the operation of the Statute of Uses, the legal estate would be vested in the *cestui que* uses, no matter who such third person might happen to be, and whether he executed the conveyance (which is in point of fact never executed by him) or not, and even though immediately after the execution by the other parties, such third person should formally dissent or even disclaim.

Considering that it was usual for the solicitor who settles the conveyance to put his own name in as re-lessee to uses as he is called, and that perhaps the Master would ultimately have to settle the draft I, intending it more as a compliment to the Master than anything else, inserted his name as a dry trustee to uses, never suspecting that his knowledge of conveyancing was so limited that he would not know the nature and effect of the transaction. At this time no reference of the draft to the Master was immediately contemplated, and there was no reason to suspect that the defendants would not approve of it. A copy of the draft conveyance having been sent to Mr. Shepherd was not returned, and ultimately another copy was made and filed, and a warrant taken out to settle the draft. This had the effect of making Mr. Shepherd return the draft on the morning when the warrant was returnable with an endorsement of approval, the filed copy having been in the Master's office for the preceding five days open to the inspection of every one. In this draft conveyance the covenants, including a covenant to procure certain title deeds, were expressed to be made by the defendants Robison and Savage with the relessee to uses, Mr. Holroyd, in the usual manner, and in accordance with all precedents. On the return of the warrant, which was at 12 noon, on 11th February last, in order to secure the costs of the warrant I attended and informed the Master the defendant's solicitor had approved the draft, and that there was no necessity for him to go through it, or to approve of it. He said he would like to take it home and read it, and told me to come up the following morning for it. The next day I attended at the Master's office for the draft and he attacked me in a most violent manner, accusing me of having endeavoured to entrap him into approving of a conveyance, to which he was a party, and making him covenant to produce deeds. I indignantly and warmly resented the imputation, flatly and repeatedly denying that there was any covenant in the draft *by* him but only *with* him, and I turned up the passages in the draft to convince him of this. I told him that it was wholly immaterial whether his name was inserted or any other persons, and I offered to insert the name of the Governor as equally answering the purpose, which the Master insultingly told me I did not dare do.

The Master thereupon conducted himself in a manner which no judicial officer, having any respect for the office he filled, would have been guilty of. He threatened to go and lodge a complaint before the Primary Judge at once, a course which I invited him to pursue, but he only said, "Don't be too confident," or words to that effect. He absolutely forbade his name being inserted in the conveyance; consequently, as it was utterly immaterial to me, I saw Mr. Shepherd, informed him of the Master's objection, and told him that he might either insert my name or his own, or his clerk's in the place of the Master's, and ultimately the

the conveyance was executed with the name of Mr. Shepherd's clerk, Mr. Dale (now a solicitor), inserted in the place of the Master's, but in all other respects the conveyance was the same. The Master was never asked to execute the conveyance, and it was never intended that he should do so, and how the mere approval of a draft conveyance (which as matters turned out, the Master was never asked to approve) without the execution of the engrossment, which was never before the Master, could under any circumstances prejudice him, I am at a loss to imagine.

The statements of the Master before the Select Committee, that "when he opened it [the draft] he saw amongst the sheets something about the Master covenanting to produce deeds," and "he looked through the deed and found that in it he covenanted to produce a deed which he might never have," are absolutely false; and, in view of the fact of my repeated denials of the existence of any such covenant, I cannot characterize them otherwise than as most recklessly if not wilfully made.

Some weeks after the above occurrence, thinking that the Master would in calmer moments have seen the impropriety of his conduct and the injustice he had done me, I attended on him personally and asked him to withdraw the statements he had made, which he in an angry and insulting manner declined to do. I received no intimation that the Master intended to reiterate his charges before the Select Committee, or that he had done so, and I was totally unaware of his having done so till the other day.

The above are the two principal grounds of complaint affecting me personally that I have against the Master; but in other cases I have myself been witness to most improper conduct on his part, and there are many cases of alleged improprieties which have been communicated to me by other members of the profession.

In nearly all cases of sales of real estate under the direction of the Equity Court the Master has Messrs. Mills & Pile appointed as auctioneers, independently of the wishes of the parties, Messrs. Mills & Pile being the auctioneers whom he employs to sell his own properties. In a suit, *Roberts v. Gibbons* and others, in which I represented one of the defendants, all the solicitors concerned had agreed on the appointment of Messrs. Richardson & Wrench and Hardie & Gorman as auctioneers, and the usual proposals to carry out that arrangement were duly brought the Master, who, notwithstanding the consent of all parties, rejected them on the alleged ground that by law he had the conduct of the sale, his real ground of objection, as was well known amongst the solicitors concerned, being that Messrs. Mills & Pile were not employed as auctioneers. This rejection necessitated an appeal to the Primary Judge, who declared the proposals to be proper ones and such as should have been accepted. The Master, I am informed, was so incensed at this appeal and the result that he told Mr. Cathcart, clerk to Messrs. Holdsworth & Evans, solicitors for the plaintiff, who had the carriage of the appeal, that "he [the Master] would always keep a close watch on him in future," which seems to be a stereotyped form of insult used by the Master towards solicitors on all emergencies. In the same suit, on a warrant (if I remember rightly) to fix the reserve prices of certain allotments to be sold, the Master accused Mr. Cathcart to his face of having entrapped him into signing certain documents, for which charge, which was most offensively preferred, there was no ground whatever. The Master subsequently, as I am informed, forbade Mr. Cathcart appearing before him any more in any matter, and said he would not hear him, a resolution which he only altered after being interviewed by Mr. Holdsworth personally, who intimated that he would call for an inquiry into the Master's conduct if he persisted in the course he was pursuing.

From my own observation, as well as from the almost unanimous testimony of the rest of the profession, I am able to assert without any doubt that the Master's infirmity of temper in his official capacity is so great, and his conduct so offensive, both to litigant parties, witnesses, and solicitors (especially the latter), as to disqualify him for any public, let alone a judicial, position. If the slightest opposition to his wishes is shown, or if the slightest irregularity in the proceedings before him occur, he loses his temper, sometimes working himself into a perfect fury, when he storms at the unfortunate individuals who have offended him, will listen to no explanation, and conducts himself generally in a manner not only derogatory to his own position but absolutely degrading to the objects of his resentment.

I have seen the Master, on the occasion of some trifling omission in a document before him, take it up and throw it violently the whole length of the table towards the solicitor's clerk who had displeased him, and the document having shot over the end of the table, then order the clerk to pick it up again.

Other complaints against the Master, which are constantly and almost universally made, are of the delays that take place in the conduct of business, the neglect by the Master of his duties, the arbitrary and unprecedented manner in which he acts at times, and the cavalier way in which he treats members of both branches of the profession. The Master is very rarely ready to take business at the hours appointed. If appointments are made for half-past 10, the Master very often does not come to his office till nearly 11. On several occasions I have been obliged to wait till after 11 before the Master came in to take a 10:30 warrant. And when he has actually entered upon an inquiry he performs his duties in a most perfunctory and negligent manner. On one occasion on a warrant to settle some proceeding in connection with the administration of the moneys paid into Court under the Underwood Estate Acts, when the Master's room was full of barristers and solicitors representing the numerous parties interested, and a question arose as to the frame of a document dealing with, I believe, fully £100,000, the Master told us to see if we could not settle it amongst ourselves, and then took up the *Sydney Morning Herald* and amused himself reading it till all parties had arranged their differences, taking no notice of the discussions that took place.

In connection with the same estate, I can advance another example of the lax way in which important business is conducted in the Master's office, and how little security there is at present for the rights and property of suitors. In the suit of *Underwood v. Underwood*, advertisements were directed to be made in the United Kingdom and elsewhere for claimants against the Underwood Estates to send in their claims, and these advertisements were afterwards repeated by the direction of the Judge, the object being to ascertain before ordering the distribution of any moneys, whether paid in by the receiver appointed by the Court, or by the trustees, all the parties who claimed to be interested in the estates.

In response to these advertisements numerous claims were sent in, and now remain of record, but incredible as it may seem, on subsequent inquiries directed by the Court to ascertain if certain specified persons were entitled to certain shares (very large some of them) of the moneys paid into Court by the trustees of the Underwood Estates, the Master never once referred to these claims to see if there was anything therein inconsistent with the claims of the applicants for money in Court, and in at least one instance thousands of pounds were paid out of Court without notice to two claimants who admittedly have valid claims

on

on the shares then dealt with by the Master. It is true that no substantial injustice was done, because other moneys were afterwards paid into Court, and the rights of these claimants were established on a general inquiry which Mr. Westgarth and myself succeeded in obtaining as to the rights of all parties and the carriage of the shares to separate accounts, a course which would never have been adopted if it had not been for our persistence, and of which I perceive the Master coolly takes upon himself in his evidence before the Select Committee the whole credit.

In support of some of the charges I make against the Master I beg to draw your attention to the evidence taken before the Select Committee to parts of which I have already referred:—

On the above and other grounds I now make the following charges against the Master in Equity:—

1. That he has abused the powers placed in his hands for the administration of public justice in declining to hear me in my capacity of suitor, and making orders behind my back fixing the amount and nature of the security to be given in the cross-appeals in the suit of *Shepherd v. Shepherd*, expressly against my consent and declared wishes, and that he acted in open defiance of the clear unambiguous enactments of the Legislature, the well established practice of the Court, and of every principle of law and natural justice.
2. That he has in his conduct towards myself and others shown that he is not impartial.
3. That he is in the habit of making charges of a grave nature against members of my profession without affording them any opportunity of clearing their characters of such aspersions, and without having any grounds to justify them; and further, that in my own case, months afterwards, he reiterated his charges before a Select Committee of the Legislative Assembly without informing me of his intention or of the fact that he had done so, and endeavoured to establish such charges by statements false in fact and most recklessly made.
4. That he is negligent of his duties to an extent imperilling the property and rights of suitors, and is altogether oblivious of the requirements of his office.

I therefore respectfully request that you may be pleased to cause an inquiry into the general conduct of the Master in Equity to be instituted at once, so that the correctness or otherwise of my charges may be determined, and in case they should be substantiated, a speedy remedy afforded for the grievance for which I and other members of my profession suffer.

I have, &c.,

F. J. PLOMLEY.

[Enclosure to No. 1.]

A.

F. J. Plomley, Esq., to The Master in Equity.

*Shepherd and others v. Shepherd and others.*

Sir,

69, Elizabeth-street, Sydney, 28 December, 1880.

In this matter (a special case heard by the Primary Judge on the 17th instant) I am one of the defendants, and am desirous of appealing to the full Court in Equity against the decision of the Primary Judge. With that view, in accordance with the new rules, I filed a notice of appeal on the 23rd instant, copies of which have been duly served on the Judges and all proper parties. In order to prosecute my appeal I must, in pursuance of the Act and rules, within fourteen days from the date of filing my notice of appeal (that is on or before the 6th of January next), deposit in your hands such sum not exceeding £100 as you shall direct, or at my option deposit with you a bond of two persons to be approved of by you in such sum not exceeding £100 as you shall direct.

Now, it is clear that time for this purpose runs in vacation, and the rules expressly provide that all necessary proceedings may be taken for an appeal during vacation.

This morning I sent my clerk to your office with a warrant in the usual form to settle the security which Mr. Curtis, acting, as I am informed, under your instructions, declined to issue.

I trust, on reconsideration, you will make the necessary appointment, as I am bound to give the security within a certain time, which I cannot do without your concurrence. If my request is not complied with there will remain no other course open to me but to apply to a Judge in Chambers for an order directed to you to assess the amount of security pursuant to the Act. I enclose a form of warrant.

I have, &c.,

F. J. PLOMLEY.

[Enclosure to No. 1.]

B.

The Chief Clerk to F. J. Plomley, Esq.

Sir,

Equity Office, Supreme Court, 30 December, 1880.

By direction of the Master I have to acknowledge the receipt of yours of the 28th inst., and in reply now forward copy of the Master's minute thereon, viz., "Mr. Curtis, inform Mr. Plomley that *all* communications from him must come through you in future. Let him pay into Court £100; and if not satisfied with this direction he must take such other course as he may be advised.—A.T.H., 30/12/80."

I have, &c.,

PETER C. CURTIS,

Chief Clerk.

No. 2.

J. Parkinson, Esq., to The Minister of Justice.

Sir,

58, Hunter-street, 31 January, 1881.

Having this day accidentally heard that a formal complaint and demand for official inquiry against the Master in Equity has been lodged with you, I beg to supplement this by requesting your attention to my evidence before Mr. Farnell's committee, and in particular to my letter to the Master (and the complaint therein set forth, which I desire to repeat to you as Minister of Justice) of 24th November, 1879, and not only to the gross discourtesy of the Master in not replying to this letter until after I had threatened to appeal to the Judge, but also to the neglect of the Master to accept my appeal to substantiate or withdraw his serious and unfounded charge.

I have further to draw your special attention to the slanderous "note" added by the Master to the revise of his own evidence before this committee (which I submit ought not to have been published as it has been)

been) as follows "NOTE.—I am not aware whether Mr. Parkinson, *who, by his letters, appears to be a gent.* [*sic* in original] only by act of Parliament, sent a copy of this correspondence to Mr. Justice Hargrave. I can only say I heard nothing more about the matter.—A.T.H."

I may safely ask you whether this language and conduct is becoming in one occupying a high judicial post, especially as his "note" was added *after* my notice of 28th November that I had appealed to the Judge.

I have, &c.,

JOHN PARKINSON.

No. 3.

F. J. Plomley, Esq., to The Minister of Justice.

Sir,

69, Elizabeth-street, Sydney, 15 February, 1881.

With reference to the complaints which I have recently made to you about the conduct of the Master in Equity, I wish to explain that portion of my letter which refers to the employment of Messrs. Mills and Pile as auctioneers in all sales ordered by the Court.

The facts as to their employment were advanced with the object of showing that the Master refuses in matters coming before him in his judicial capacity to act in accordance with even the unanimous wishes of the litigant parties, and arbitrarily insists on the employment of the abovenamed gentlemen, not because others, whom the parties wish to employ, are incompetent or untrustworthy, but simply because he in his individual capacity thinks fit to favor those gentlemen.

In the complaint I made I had no intention of imputing the existence of any collusive or corrupt arrangement between the Master and Messrs. Mills and Pile, a construction which at our recent interview you seemed to think might be put upon that portion of my letter if unexplained.

The only charges which I desired to prefer against the Master were those set out at the end of my letter, and all the facts alleged in the earlier part of it were intended only as a statement of the evidence which I could give in support of those charges.

I have, &c.,

F. J. PLOMLEY.

This, with previous letter, to be sent to Mr. Holroyd for such explanation or observations as he may desire to offer.—J.G.L.I., 18/2/81. A. T. Holroyd, Esq., Master in Equity, B.C., 19 February, 1881.—W. E. PLUNKETT.

No. 4.

F. J. Plomley, Esq., to The Minister of Justice.

Sir,

69, Elizabeth-street, Sydney, 20 April, 1881.

In the month of January last, in a letter addressed to you, I made certain complaints of the conduct of the Master in Equity towards myself and others, and on or about the 15th day of February last I again wrote to you on the same subject.

Since writing the last-mentioned letter I have received no communication from you, nor am I aware that any steps have been taken to ascertain the truth of the charges that I have preferred. I shall esteem it a great favour if you will inform me whether you have come to any, and, if so, what decision in this matter.

I have, &c.,

F. J. PLOMLEY.

The previous papers in this matter were forwarded to the Master in Equity for report on 21st February, 1881. Will a reminder be sent to Mr. Holroyd on the subject?—27/4/81. Remind.—J.G.L.I., 28 April, 1881. Master in Equity, 4/5/81.

No. 5.

The Under Secretary of Justice to The Master in Equity.

Sir,

Department of Justice, Sydney, 4 May, 1881.

Not having received a reply to my blank cover communication of the 21st February last, having reference to complaint made against you by F. J. Plomley, Esq., solicitor, I am directed by the Minister of Justice to draw your attention thereto, and to request the favour of your early answer.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 6.

J. Parkinson, Esq., to The Minister of Justice.

Sir,

Hunter and Bligh Streets, Sydney, 4 June, 1881.

I have the honor to draw your attention to the fact that I have never had your decision or reply (beyond simple acknowledgment) to my formal complaint preferred against the Master in Equity some three or four months since.

Meantime I beg to remind you that I remain under a most serious imputation that has never yet been withdrawn.

I am, &c.,

JOHN PARKINSON.

Ask Mr. Holroyd to furnish the report.—J.G.L.I., 6/3/81. Master in Equity, 8/6/81.

## The Under Secretary of Justice to The Master in Equity.

Sir,

Department of Justice, Sydney, 8 June, 1881.

Referring to my letter of the 4th ultimo, I am directed by the Minister of Justice to forward for your information, copy of a communication received from Mr. John Parkinson, further respecting complaint preferred against you, and to request that you will have the goodness to furnish the report as solicited in letter from this Department of the above date.

I have, &amp;c.,

W. E. PLUNKETT,

Under Secretary.

No. 8.

## The Master in Equity to The Under Secretary of Justice.

Sir,

Master's Office, 10 June, 1881.

I have to acknowledge the receipt of your letter of the 8th instant, received to-day, and in reply I have to request that you will inform the Minister of Justice that the delay in furnishing the report solicited has arisen from my having been constantly and continuously employed in pressing official duties, which I could not postpone, except at great inconvenience to members of the legal profession and cost to suitors of the Court. As the legal vacation will shortly occur I will then be enabled to devote time to report as asked.

I hope this explanation will satisfy the Minister.

I have, &amp;c.,

ARTHUR T. HOLROYD,

Master in Equity.

F. J. Plomley, Esq., may be informed in terms of this letter.—J.G.L.I., 14 June, 1881. Mr. Plomley, 15/6/81.

No. 9.

## F. J. Plomley, Esq., to The Minister of Justice.

Sir,

69, Elizabeth-street, Sydney, 11 June, 1881.

On ——— last I forwarded you a letter (the receipt of which has never even been acknowledged) on the subject of certain complaints I had some months previously made against the Master in Equity. In my letter I pointed out that I had received no communication from you in reply to my previous letters, which still remain unanswered. Since forwarding my last letter I have again been subjected to insult, and treated in a most arbitrary manner by the Master in Equity when attending before him as a litigant, in consequence of my action in formally complaining to you of his previous conduct.

However, I refrain from making any specific complaint of the Master's recent conduct until I learn whether any notice is intended to be taken of my repeated communications to you.

I have, &amp;c.,

F. J. PLOMLEY.

Has any reply been received yet from the Master in Equity?—J.G.L.I., 11/6/81.

No. 10.

## The Under Secretary of Justice to F. J. Plomley, Esq.

Sir,

Department of Justice, Sydney, 15 June, 1881.

In acknowledging the receipt of your letter of the 11th instant, and previous correspondence, preferring complaint against the Master in Equity, I am directed by the Minister of Justice to inform you that owing to the Master in Equity being constantly and continuously employed in pressing official duties, which he could not postpone except at great inconvenience to the members of the legal profession, he has been unable to furnish a report in reference to the charges preferred by you against him, but as the legal vacation will shortly occur he will then be enabled to devote time to furnish a report in the matter.

I have, &amp;c.,

W. E. PLUNKETT,

Under Secretary.

No. 11.

## The Master in Equity to The Minister of Justice.

Sir,

Master's Office, 30 July, 1881.

I have the honor to submit to your notice an explanation of charges made by Mr. Plomley against me on the 15th February last, complaining of alleged grievances which he mentions that he has received at my hands.

I am always ready to meet such charges in a fair and liberal spirit, but if you will read Mr. Plomley's letter you will see that, throughout, it contains such a tirade of abuse, discourteous language, and unfounded epithets, that no one, in my opinion, should be allowed to address a Minister through such channels. If Mr. Plomley had complaints to make he surely could have done so without attempting to prejudice your mind, before I had been heard, by such expressions as the following:—

"That the Master was actuated by malice and ill will to me personally;" "never suspecting that his [Master's] knowledge of conveyancing was so limited;" "Master attacked me in a most violent manner;" "offered to insert name of the Governor, which Master insultingly told me I did not dare do;" "Statements before the Select Committee absolutely false;" "I cannot characterize them otherwise than

as

as most recklessly if not wilfully made ;" "I asked him [the Master] to withdraw the statements he had made, which he in an angry and insulting manner declined to do ;" "There are other cases I have witnessed of most improper conduct, many cases of alleged improprieties ;" "A stereotyped form of insult used by Master in all emergencies ;" "Master's infirmity of temper is so great, his conduct so offensive to litigant parties, witnesses, and solicitors as to disqualify him for any public let alone any judicial position ;" "Master loses his temper ;" "works himself into a perfect fury when he storms at unfortunate individuals who offended him ;" "Conducts himself generally in a manner not only derogatory to his own position but absolutely degrading to the objects of his resentment ;" "arbitrary and unprecedented manner in which he acts at times ;" "cavalier way in which he treats members of both branches of the profession ;" "business performed in a perfunctory and negligent manner ;" "in same estate [Underwood v. Underwood] lax way in which important business is conducted in Master's office ;" "in his conduct towards myself and others shown that he is not impartial ;" "made statements before Select Committee false in fact and recklessly made ;" "negligent of his duties to an extent imperilling property and rights of suitors ;" "altogether oblivious of the requirements of his office," &c., &c.

The above are some few of the elegant expressions applied to me by Mr. Plomley, and when it is considered that I am about half a century his senior in age and forty years a member of the English Bar, and having by my own talents and industry attained my present high and distinguished legal position, I submit that this kind of language ought not to be tolerated from a young man who at the time of writing his letter to you had only been admitted as an attorney a couple of years.

I will now shortly give my explanation of some of the different charges and complaints which Mr. Plomley has made against me. In the case of Shepherd and others v. Shepherd and another, the decree was made on the 17th of December last. The legal vacation commenced on the 18th of December ; on the 23rd of December Mr. Plomley filed his notice of appeal. Assuming that time for fixing the security on appeal runs in vacation, a question naturally arises how the security is to be perfected in vacation. I had at that time contemplated an excursion trip, but when I found that I had to pay into the Treasury my quarterly collections in Equity I delayed it till that was done, and while the negotiation was going on about the security I told my chief clerk, Mr. Curtis, that I would take the matter at my residence, 18 miles from the Supreme Court, with twenty railway trains to Parramatta and six to Merrylands Platform, the former three miles from my residence and the latter one mile, in order to have the matter settled within the prescribed time. This however would not suit Mr. Plomley, who must have his own way, and that at the risk of interfering with my vacation. I think the "malice and ill will" is on his side ; it was certainly not on mine. And I only precluded Mr. Plomley from appearing before me on account of his insolent conduct in my office for some weeks previously.

The history of the conveyance case is shortly this : Mr. Plomley brought to my office a draft conveyance, which he asked me to mark as settled, as he had drawn it, and the solicitor, Mr. Shepherd, on the other side had seen it and consented to it and had endorsed his consent on the back. I told him that I never settled a draft conveyance without looking over it, and that I would take it home with me and look through it at night.

I find my evidence before the Select Committee of the Legislative Assembly is transcribed in pages 8 and 9 of Mr. Plomley's letter, and is substantially correct, and though I may have made a mistake as to whether I was a covenantor or covenantee, what I complained of was that Mr. Plomley committed an unwarrantable liberty in making me a party to the deed without an order from the Court, or without my consent, and when I remonstrated with him about it he stated that he would not hesitate to do the same thing again. He never mentioned the Governor's name in his remarks. I did not speak insultingly to him, neither did I tell him "he dared not do so." Neither did I threaten him that I would lodge a complaint against him before the Primary Judge. It is really too bad to make these statements, which are utterly without foundation. My language in this matter was most guarded, and all that he could complain of was that any matters which he would bring before me would be most carefully and scrupulously examined after the indecent haste which he had shown in attempting to secure my signature to the draft with my name in it as a party without my concurrence.

I don't know what Mr. Plomley has to do with the sales under the direction of the Court. When I was appointed Master fifteen years ago I found that my predecessor, Mr. Deffell, employed Mr. Mort, and he asked me to continue him as the auctioneer, which I did until the firm was dissolved, when I transferred the business to Messrs. Richardson and Wrench. They held it for some years under special instructions, which on one occasion they disregarded and placed my position as Master in Equity in jeopardy.

I therefore transferred the business to Messrs. Bowden and Mills, where I have continued it with their successors ever since. I surely am at liberty to employ them to sell properties which I may have for sale without asking Mr. Plomley's consent. I always pay them the same commission that other customers do and I never ask for any reduction on the usual commission. I have special reasons for employing them, which I do not think it necessary for Mr. Plomley to become acquainted with.

With respect to Roberts v. Gibbons and others, I appointed my auctioneers under the Rule of Court giving me the power. They appealed to the Primary Judge, who overruled my appointment, and I carried out his directions. I should like to know what Mr. Plomley had to do with the case. He appears to be a meddling busybody. It is a statement without any foundation that "I was incensed at this appeal," and what he says that I said to Mr. Cathcart on the occasion he mentions is utterly untrue. On a subsequent occasion, when Mr. Cathcart was indignant at my not fixing a reserve on the lots about to be sold in the Golden Grove Estate, and he said he had got it already when he said I had signed it, and which happened to be a "column head," I told him that I should scrupulously examine all papers that he brought me, and keep a close watch on him in future. To this statement he made some insulting remarks, which I told him precluded me from seeing him again personally in matters of business. He is the equity clerk of Messrs. Holdsworth and Evans, and it was only after one if not two interviews with Mr. Holdsworth, who interceded on his behalf, and stated the inconvenience in which his business was placed, that I consented to receive and hear Mr. Cathcart again. But I think it but right to add that Mr. Holdsworth never personally intimated to me that "he would call for an inquiry into the Master's conduct if he persisted in the course he was pursuing." This is one of Mr. Plomley's impudent and inventive falsehoods. (See Mr. Richard Holdsworth's letter annexed hereto.)

The observations about my temper at pages 17 and 18 of Mr. Plomley's letter are of such a disgraceful character and so untruthful that I shall make very few remarks upon them. As Minister I hope

you

you will bear in mind that these slanderous epithets come from an attorney who was only recently admitted. I don't recollect his ever coming before me when he was a clerk, and I will admit that when he first appeared before me as a solicitor I complimented him on his success at the Sydney University, and was glad to make his acquaintance, but when he found he could not have all his own way when he was before me he became insolent, abusive, and reckless in his language. But why do these charges rest on the *ipse dixit* of one solicitor, when others, he says, "the almost unanimous testimony of the rest of the profession" can testify to my alleged offensive misconduct. All I can repeat again is that these charges are unwarranted, malicious, and without any foundation whatever.

As to the delays in my office I admit that in 1879 and part of 1880 there were a few occasions when I was prevented taking my office business at the appointed times, but this arose from my being obliged on such occasions to see the Colonial Secretary and Minister of Justice in reference to the organization of the Lunacy Office, and being delayed longer than I expected. This I explained, and none of the parties before me made any complaint, not even Mr. Plomley. It is amusing to notice how microscopically he watches my acts when, as he alleges, I took up the *Sydney Morning Herald* while the parties were discussing a matter for which I asked their opinion, but he forgot to tell you that the *Herald* was put aside when the discussion (which I purposely refrained from hearing) was at an end.

The charge in the case of the advertisements in *Underwood v. Underwood* is of such a puerile character that it is hardly worth mentioning, excepting that my attention was never called to the irregularity when he and others were before me, and that he himself admits "that no substantial injustice was done."

I have now I believe answered all Mr. Plomley's charges, and if you are not satisfied with my explanation by all means give him the inquiry he asks for, bearing in mind that these charges are made by a solicitor of little more than two years standing, and not recommended or endorsed by any other member of his profession.

I must offer every apology for having delayed answering this letter before, but the continued pressure of business in the Equity and Lunacy Offices must be my excuse. Had I replied to it sooner I must have taken some days at home to prepare it to lay before you, as I should have been subject to such continued interruptions as to have been incapable of doing it in office hours. I therefore have done it in vacation, and I hope such an infliction on my leisure (which I much require) will not be pressed upon me again.

In conclusion I respectfully submit that any complaints or charges against the Master in Equity should in the first instance be made to the Primary Judge or to the Judges of the Supreme Court.

I have, &c.,

ARTHUR T. HOLROYD,  
Master in Equity.

[Enclosure to No. 11.]

R. Holdsworth, Esq., to The Master in Equity.

My dear Holroyd,

With reference to a passage in a letter from Mr. Plomley to the Minister for Justice, which you showed me this morning, in which my name is introduced in connection with some misunderstanding between you and Mr. Cathcart, I have to state that I have a distinct recollection of the occurrence, and that so far from my having intimated that I would call for an inquiry into your conduct if you persisted in the course you were pursuing, that was in refusing to allow Mr. Cathcart to appear before you, I asked you as a personal favour to myself to overlook anything that had passed, and to permit Mr. Cathcart to attend on warrants before you on my behalf as he had been accustomed to do; to this you expressed your willingness if I obtained from Mr. Cathcart a promise that for the future he would abstain from doing anything that could be deemed discourteous to yourself or to your office. On Mr. Cathcart having given me this assurance you permitted him again to appear before you and no further misunderstanding or unpleasantness as far as I am aware has occurred between you.

I remain, &c.,

R. HOLDSWORTH.

Let Mr. Plomley be furnished with a copy of this letter, and state that it is furnished to him for any observations he may desire to offer in reference to same.—J.G.L.I., 9/8/81. Copy to Mr. Plomley.—16/8/81. Has any report been received from the Master in Equity as to the complaints of Mr. Parkinson?—J.G.L.I., 9/8/81. Remind Master in Equity, 17/8/81.

No. 12.

The Under Secretary of Justice to F. J. Plomley, Esq.

Sir,

Department of Justice, Sydney, 16th August, 1881.

With reference to your letter of the 15th February last, preferring certain charges against the Master in Equity, I am directed by the Minister of Justice to forward, for your information, the enclosed copy of a report which has been received from Mr. Holroyd upon the subject, and to request that you will have the goodness to favour with any observations you may desire to offer thereon.

I am, &c.,

W. E. PLUNKETT,  
Under Secretary.

No. 13.

The Under Secretary of Justice to The Master in Equity.

Sir,

Department of Justice, Sydney, 17 August, 1881.

Not having received a reply to my letters of the 4th of May and 8th of June last, respecting a complaint preferred against you by Mr. John Parkinson, I am directed by the Minister of Justice to draw your attention thereto, and request the favour of your early answer.

I have, &c.,

W. E. PLUNKETT,  
Under Secretary.

No. 14.

## No. 14.

## The Master in Equity to The Minister of Justice.

Sir,

Master's Office, 17 August, 1881.

The letter of complaint, addressed to you by Mr. John Parkinson on the 31st January last, appears to me from the tacit refusal of the Primary Judge to entertain his complaint to be an appeal to you, but on what ground I cannot understand.

My chief clerk who was present says:—"That when the report was engrossed after the draft had been settled by you [Mr. Holroyd] for your signature, you [Mr. Holroyd] perceived that the schedule thereto was already initialled by you, and was in fact the one annexed to the draft, and you then complained of its removal from the said draft." This annexure was removed from a document in my office and without my permission and consent. I still say that this was a "tampering" with a document in my office and that I will narrowly watch any documents that Mr. Parkinson brings before me in future. I decline to answer any of his other charges or allude to his evidence taken before the Select Committee of the Legislative Assembly further than to say that his answers are vulgar and disgraceful, and many of them without foundation. I am an officer of the Supreme Court and I respectfully submit that the Judges are the proper tribunal to look into these matters, and that your time ought not to be frittered away by complaints made by an attorney's clerk in reference to my proceedings in Equity practice.

I have, &amp;c.,

ARTHUR T. HOLROYD,  
Master in Equity.

## No. 15.

## F. J. Plomley, Esq., to The Minister of Justice.

Sir,

69, Elizabeth-street, Sydney, 28 September, 1881.

I beg to acknowledge the receipt of letter (81-7,885) from your Department, enclosing a copy of the report or explanation sent in by the Master in Equity in answer to certain complaints preferred by me against him in January last, and have the honor to forward in response to your invitation the following observations thereon:—

With regard to the Master's preliminary complaint as to the tone of my communication to you and the language in which it is expressed, it seems to me that the person to find fault with the language in which a complaint is preferred to a Minister of the Crown is the Minister himself, and not the subordinate official; and further, that it is to say the least of it very questionable taste on the part of an officer in Mr. Holroyd's position to attempt to prescribe to you the manner in which you permit yourself to be officially addressed.

The insinuation that I attempted to prejudice your mind before he (the Master) had been heard is really too ridiculous to call for serious comment in view of the fact that the Master allowed nearly six months to elapse after the receipt of my complaint before replying to it.

I have never alluded to the Master's age in any of my communications, thinking that such a reference would be needlessly offensive; but as he has himself referred to and attempted to make capital out of his half century of seniority, I may perhaps be excused in asking if it is not highly probable that a man of so great an age would be likely to exhibit great infirmity of temper and be somewhat oblivious of what he may have himself said or done at more or less remote periods, and, moreover, be utterly unfitted for the position partly judicial and partly administrative which he fills. How the allegation of his half century of seniority, his forty years membership of the English Bar, that by his own talents and industry he has attained his present high and distinguished legal position, can be advanced as a bar to any charge an individual in my position may prefer, certainly passes my comprehension.

With regard to the case of *Shepherd v. Shepherd*, one of the principal charges preferred by me against the Master, I submit that the latter's so-called explanation is no explanation at all, and that in no particular have any of my statements been met and refuted. I am simply met with such disingenuous statements as the following: "A question naturally arises how the security is to be perfected in vacation." It seems almost idle to say that such a question did not first arise in 1880 in the case of *Shepherd v. Shepherd*, and in fact numerous instances have occurred of security being perfected in vacation; and I submit the rule of Court referred to by me expressly imposes an obligation on the occupant for the time being "of the high and distinguished legal position" the Master fills to be at his post whenever a suitor is compelled by the law to take proceedings to establish his legal rights. The statement of the Master that he made the appointment to settle the security at his own house, "in order to have the matter settled within the prescribed time," I am unable to believe; on the contrary I charge that the real motive of his conduct was to annoy and insult me personally as grossly as he could, in retaliation for having been compelled by me to recede from the position he had originally taken up, namely, to absolutely refuse to take the security in vacation. I am quite prepared to establish the Master's "malice and ill-will" towards me in the transaction, if only an inquiry is granted, at which evidence would be available which is not at present forthcoming.

With regard to the Master's statement that "he only precluded me from appearing before him on account of my insolent conduct, &c.," I ask what possible ground or justification can there be for the Master precluding me from appearing before him had I been never so insolent? Whence does this officer of the Court obtain his power of disqualifying another officer of the Court from performing his legal duties? Whence does he obtain the power of refusing to hear a suitor in the Court and of making orders behind his back for the payment of money? The charge of insolence, immaterial though it is, I assert is absolutely groundless, and as neither, time, place, nor circumstance is stated in the Master's charge, I can only deny the latter in the general manner in which it is alleged.

With

With regard to the conveyance, I deny that the Master was ever asked to mark the draft as settled ; on the contrary he was told that the solicitor on the other side, having approved of the draft, it became immaterial for the Master to consider so much of the business for which the warrant had been taken out as related to the approval of the conveyance. The Master says, "What I complained of was that Mr. Plomley committed an unwarrantable liberty in making me a party to the deed without an order from the Court or without my consent." This statement I affirm to be a wilful misrepresentation both of his original charge against me and of the effect of the charge he made behind my back before the Select Committee. If you refer to the evidence on this point, which is copied *verbatim*, and not only substantially, into my original letter of complaint from the printed evidence before the Select Committee, you will find that the tenor of the Master's evidence went to show that I had attempted by fraud to place the Master under a serious personal liability—that I had fraudulently attempted to obtain his consent to this liability ; not that I was doing something without his consent, for I suppose the Master must have known it was too strong a thing for even a committee of laymen to believe that such a liability could be incurred without his consent.

What a different complexion the whole matter would have borne in the eyes of the Committee if it had been stated as the law and facts were that the Master's name had been inserted as a purely formal matter, and such insertion had exactly the same effect as the insertion of the name of any other individual, and that he incurred no personal or official liability.

The Master traverses a lot of statements made by me in reference to this matter, which he says are without foundation, and attempts to fortify his denial by saying that he was most guarded in his language. I simply repeat that the statements are the exact truth, and I assert that I can prove by independent testimony as well as by my own, if opportunity is afforded me, that the Master's language was the reverse of most guarded, and in fact was violent, abusive, and insulting in the extreme.

The Master inquires how I am interested in the mode in which sales under the direction of the Court are conducted. I can answer this by stating that besides the interest which every member of the community, and more particularly every suitor in the Court, has in this matter, I have been acting and will probably hereafter act for various clients who have been and will be materially interested in the manner in which such sales are conducted. The Master says, "I surely am at liberty to employ them to sell properties which I may have for sale without asking Mr. Plomley's consent." To this I reply certainly not, if I am individually concerned or act professionally for others who are concerned in such properties, unless there is a conflict on the subject between different interested parties.

The statement that in *Roberts v. Gibbons* he appointed his auctioneers under the rule of Court *giving him the power*, astonishes me, inasmuch as on the appeal the Primary Judge held that where the parties were agreed the Master had no such power, and of course the Master had to carry out the Judge's directions *volens volens*.

The Master might have readily ascertained what I had to do with the case if he had referred to the papers filed in his office when he would have discovered that I was the solicitor of one of the litigant parties.

The expression "meddling busybody" which he applies to me is important evidence of the "fair and liberal spirit" in which he is always ready to meet charges. As to the statement that he, the Master, was not incensed at the appeal (in *Roberts v. Gibbons*), I am confident I can contradict it by the evidence of every one of the solicitors concerned in the suit, and it is not very material whether he told Mr. Cathcart he would keep a close watch upon him because of the appeal, as I am informed was the case, or (as he admits he did) of a subsequent proceeding.

With regard to the other statements made by me with regard to the Master's behaviour towards Mr. Cathcart, I have made further inquiry from persons in whose credibility I have every confidence, and who are themselves in a position to know the exact circumstances, and I am informed that I was strictly and entirely correct in every particular, with the simple exception that Mr. Holdsworth's intimation of his intention to have matters inquired into if the Master persisted in the course he was pursuing was made, not to the Master himself, but to other persons.

Of the Master's insulting behaviour towards Mr. Cathcart in several instances I have myself (as I alleged in my original communication to you) been a witness.

While expressing my regret for having expressed myself in language which admits of an interpretation which the facts do not justify, I think I have just cause for indignation at the Master branding my statements generally in reference to this matter, as "Mr. Plomley's impudent and inventive falsehoods," the only evidence in support of which being that an inference to be drawn from my statement was in fact incorrect. What a commentary on the fitness of the Master for a judicial position does the language I have just referred to furnish.

My remarks about the Master's temper which have roused so desperately his ire, do but moderately and inadequately represent the feelings (almost daily expressed) of many members of the profession, and I repeat that they are true in every particular.

The Master twits me with being alone in the course I have pursued, and reiterates and insists upon the fact as if it were his strongest suit, but the same arguments will apply in every case of a complaint against an official ; but I can, with great assurance, promise the Master that if an inquiry into his conduct is held he will find many members of the profession who will give as strong, and even stronger, evidence against him than I advance.

I should have taken the course the Master suggests of preferring my complaint in the first instance to the Primary Judge (who has had occasion on several occasions lately to comment severely in open Court on the Master's official conduct), but I was led to believe that the only person having direct authority over the Master is yourself. As the Master seems to court an inquiry, I trust you will see your way to grant one, which will be certainly the most satisfactory course to me, and will afford the Master an opportunity of meeting the severe complaints made not only by me but by his superior, the Primary Judge, and also by members of the public and of both branches of the legal profession.

If such an inquiry can be held before the Primary Judge, or any other Judge of the Supreme Court, I shall be only too happy to prefer my charges before such Judge.

I have, &c.,  
F. J. PLOMLEY.

## Minute of the Minister of Justice.

In the matters of the complaints against Mr. Holroyd, the Master in Equity, by Mr. Plomley and Mr. Parkinson.

I HAVE conferred with my honorable colleague, the Attorney General, upon these matters, and although we think that the Master in Equity is not wholly undeserving of blame, we think his offence is more to be attributed to infirmity of temper than to any more serious misconduct.

It must be borne in mind that Mr. Holroyd is now of the advanced age of 75, and in view of his long services we do not think that the charges brought against Mr. Holroyd by Mr. Plomley and Mr. Parkinson are of so serious a character as to justify the great expense to the country of a Commission of Inquiry into his conduct. At the same time it would be well if Mr. Holroyd would study somewhat more carefully the amenities of intercourse between himself and the solicitors who appear before him.

Let a copy of this minute be sent to Mr. Plomley and to Mr. Parkinson, and also to the Master in Equity. J.G.L.L., 12/10/81.

Sir,

Department of Justice, Sydney, 13 October, 1881.

With reference to previous correspondence upon the subject of the complaints preferred by you against Mr. Holroyd, the Master in Equity, I am directed to transmit to you the enclosed copy of a minute which has been written by the Minister of Justice upon the subject.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

1881.

NEW SOUTH WALES.
