663. Was that his own doing, or was it done under directions from the Under Secretary? I could not say—I think it was his own doing. We used to have a good many conversations on these matters, and I made suggestions to him, but they were never carried out.

T. Ireland.  
27 Jan., 1882.

664. *Mr. Thomson.*] Judging by your experience, do you not think that Mr. Harris displayed an utter want of knowledge in keeping books? Well, I think he understood them; that was the Departmental way of keeping them, which he said was very different from the commercial way. I think he knew it from having been in the Audit Department.

665. Do you not think that this Cash book and Appropriation Ledger were suggested by Mr. Oliver and Mr. Pinhey after the investigation of the frauds committed by Evans? I believe they were, but I am not positive; there was also another book spoken of, an Individual Ledger; that was one I suggested to Mr. Oliver and Mr. Pinhey when they were making the investigation, so that every person should have a separate account and be credited with any voucher that came in in his favour and debited when it was paid; that would have prevented double payments.

666. And that suggestion was not acted upon? It was acted upon so far that I procured a ledger for the purpose and made the headings. I opened at least one hundred accounts; but I was never allowed to make any entries.

MONDAY, 30 JANUARY, 1882.

Present:—

MR. POWELL.

MR. THOMSON.

MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Francis Henry Wilson, in charge of the Miscellaneous Branch of the Lands Department, examined:—

667. *Chairman.*] Did Mr. Oliver give you any of the vouchers submitted to the Board by him during his last examination? Yes, those relating to the Pre-lease Branch—(*producing papers*).

F. H. Wilson.  
30 Jan., 1882.

668. You were in charge of the Pre-lease Branch, Mr. Wilson, I think, during the time of Mr. Harris' employment in that Branch? Part of the time.

669. Did you find him there when you took charge of the Branch? Yes.

670. What sort of a clerk did you find him? A very good one.

671. He was perfectly acquainted with the system? Yes.

672. And during the time that he was with you in the Pre-lease Branch had you any reason to suspect that he was committing any frauds or doing anything irregular? No, none whatever; in fact, he used to borrow small sums of money from me almost every month, I suppose to throw me off the scent of anything of that kind.

673. For expenditure of his own? Yes, a pound or two at a time, sometimes as much as £3; he did this all through the time I was there with him; almost every month he borrowed some money from me.

674. Was he removed from the Pre-lease Branch during the time you were Head of that Branch? He was.

675. And up to that time you had no suspicion whatever of anything wrong? None whatever.

676. Are you aware whether any of these frauds that have been discovered were absolutely perpetrated during the time he was employed in the Pre-lease Branch? No; only from the date of the papers I imagine they were.

677. Was he in the habit of receiving visits from land agents or other persons connected with land business outside the Department? Only at the counter, that is all.

678. You kept a very good eye upon him during that time? Yes.

679. From the time of his removal to the Account Branch then you had no connection with him? No.

680. And knew nothing of his conduct or habits or anything about him? No, except that he still borrowed money from me.

681. Have you studied any of these papers that you have brought with you? I have looked at them, but I have not studied them much.

682. Who was in charge of the Pre-lease Branch before you were appointed to it? Mr. Charles A. Brown.

683. In what state was the business of that Branch at the time? In a terrible state of arrear.

684. Can you tell the Board how many Audit Office queries were in the pigeon-holes of that Branch unattended to at the time you took charge? Between 1,200 and 1,400.

685. *Mr. Thomson.*] Do you remember what was the nature of those queries? Simply with respect to rents; Audit Office queries are always with respect to rents.

686. Were the questions raised as to the propriety of the refund, or what? No, as to whether rent had been paid in former years principally.

687. They had nothing to do with refunds? Not that I know of; there were about 5,400 cases on hand when I took charge of this Branch, on the 23rd December, 1879.

688. Undisposed of cases? Undisposed of cases.

689. *Chairman.*] I believe Mr. Harris was taken from the Audit Department to help to clear off those arrears, was he not? He was.

690. In consequence of the aptitude he had acquired in dealing with these pre-leases? I believe so.

691. And he did work steadily and well? Yes.

692. In fact he gave you every satisfaction during the time he was with you? Yes.

693. And I think you reduced the large amount of arrears to a very small number? Yes, we reduced them to something like 700.

694. *Mr. Thomson.*] When you left? Yes.

695. *Chairman.*] I see that in the first refund voucher (*referring to papers produced by witness*) No. 14,999, your name is attached as signing for the Under Secretary? Yes.

696. For a refund of £9? Yes.

F. H. Wilson.  
30 Jan., 1882.

697. Is that a forgery? (*Witness examined the voucher with a magnifying-glass.*) It seems so like my signature that I can hardly see the difference; but I believe it to be a forgery, because it is written with a fine pen, and I always write with a medium pen.
698. And in looking through the papers you can find no authority to justify your forwarding such a refund voucher to the Treasury for payment? No, I cannot.
699. *Mr. Thomson.*] When Mr. Harris forged this authority did he give the connecting number of these papers? Yes, he has given a number, but it has nothing to do with the case. The paper quoted is 79/2,053, which is the schedule of leases transferred from a person named Carey to a person named Read, and has nothing to do with the case.
700. And there should be no refund in this case? No refund, it being a transfer.
701. Then perhaps you can explain to us how he got hold of these papers to obtain the number: had he access to the papers? Yes, he had access to all the papers; but this is simply a number taken at haphazard.
702. Was that fraud perpetrated when he was employed in the Lease Branch or after he went to the Account Branch? He was in the Lease Branch at the time.
703. And were you then over him? I was.
704. But you did not sign on behalf of the Under Secretary—you always, I think, initialled these refund papers? I signed on behalf of the Under Secretary.
705. Will you look at this refund voucher No. 21,930, signed by W. W. Stephen and initialled by you (*handing paper to witness*)? Those are not my initials.
706. Can you say whether that signature of W. W. Stephen's is a stamped signature or a written forgery? I cannot say; I can only draw attention to this fact that W. W. Stephen was Under Secretary at the time, and that this is signed W. W. Stephen, *pro* Under Secretary, and Mr. Stephen never signed any vouchers during the time I was in charge of the Pre-lease Branch.
707. And the date of that voucher (August, 1880) corresponds with the date of your tenure of office when in charge of that Branch? Yes; and the initials are not mine, because there is a dot between the F and the H, and between the H and the W, which I never put.
708. And you think Mr. Stephen's signature is not a stamped signature? I think not; I do not think he could have got at the stamp, which was in the charge of Mr. Newman.
709. Was there no description of refund which it was necessary for the Under Secretary to sign himself? No, none.
710. And you cannot imagine why in this case Mr. Harris used Mr. Stephen's name and not your own? No, I cannot.
711. It is a mystery? Yes.
712. *Chairman.*] Look at that voucher No. 21,725: is that a forgery of your name? Yes.
713. Is this one, No. 21,870, also a forgery? Yes, I believe it to be a forgery.
714. *Mr. Thomson.*] Can you from the papers themselves decide that point? Yes. There is no authority for any refund in the paper.
715. Is it a fictitious claim altogether? Yes, the claims are fictitious in both cases—the papers show no authority for the refund.
716. *Chairman.*] Do you think it would be possible for the officers in the Treasury or Audit Department to discover from these papers the fraud that has been detected? No, I do not.
717. The forgeries are so perfect, and the information contained in the voucher itself so plausible, that you think it would be impossible for either the Treasury Paymaster or the Audit Officers to detect the fraud? The Treasury Paymaster, I believe, has only to deal with the authority for the refund; and I do not think there is anything in any of these papers to lead the officers of the Audit Department to believe there was any fraud. In one case Harris quoted the papers in reference to the defalcations of Hanrahan, the land agent at Dubbo, to justify the refund on a pre-lease.
718. Do you think it would be possible to establish an effective check against frauds of this kind? That is rather a difficult question to answer. The last case of the six submitted to you to-day, that of Rudd's, is a different kind of defalcation, to which the attention of the Board has not yet been drawn in the Under Secretary's examination.
719. Will you kindly explain how the fraud was perpetrated in connection with that case—what does it profess to be—I see the paper is numbered 7,724? Mr. Rudd had three leases, one of 6,112 acres, which was cancelled in 1877, there being no available land; another one of 2,742 acres, which was also cancelled in the same year, there being no available land; and a third one of 4,320 acres, also cancelled for the same reason at the same date. In March, 1881, Mr. Sutton, a land agent, wrote and applied for a refund of the rent paid on these three leases for the years 1876, '77, and '78.
720. What was the amount that he claimed? He claimed £48 2s. 9d., £21 8s. 7d., and £33 15s., on account of three leases. The refund vouchers were prepared, correctly prepared, but Mr. Rudd never authorized Mr. Sutton to receive the money. I was present in the Under Secretary's room when Mr. Rudd's son came in about it. The authorities which were signed William Rudd were shown to him, and in every case he said they were forgeries. Mr. Oliver asked him if he had a brother named William Rudd, and he said he had one brother named William Joseph Rudd, and those were not his signatures. When further pressed by Mr. Oliver to state his reason for affirming that the signatures were not his father's, he said his father could not write—a very good reason. Now these refunds ought to be made—they are legitimate refunds. Mr. Sutton was not present when Mr. Rudd said that, but the authorities to receive the money are filled up by Mr. Sutton. But the signatures are forgeries.
721. *Mr. Powell.*] And the money is still due by the Government? I suppose so.
722. *Chairman.*] I wish to know whether Mr. Sutton who made out the authority, to the best of your knowledge and belief, filled in the signature of Mr. Rudd? I believe not—he says not; he says they were handed in to him by Mr. Harris.
723. You know the filling in of the authority is in Mr. Sutton's handwriting? Yes, I identify that.
724. But you believe that the three signatures were forged by Mr. Harris? Yes, I know Mr. Sutton's handwriting—we have often had it in the office.
725. At present you have nothing to do with the Pre-lease Branch? Nothing.
726. You are in charge of the Miscellaneous Branch of the Lands Department? Yes.
727. I suppose you know pretty well the extent of the frauds that have up to this time been discovered? I believe they amount to something like £1,300—I am not sure.
- 728.

728. Can you form any opinion, or have you formed any opinion whether that embraces all the defalcations or frauds that have been perpetrated? I could not.
729. What do you think the best mode of investigation to determine, if possible, the frauds that may not yet have been discovered? The only way I know would be to compare the Refund Book with any book which the Audit Department may keep for the same purpose, if they do keep one.
730. You think that would effect the object? I think so; I do not know of any other way, unless you turn out the whole of the vouchers; there were 4,000 of them in 1880.
731. But do not you think it would be sufficient, if any discrepancy were discovered between the register in the Lands Department and the register in the Audit Department, to refer to the vouchers in those instances? I think it would.
732. Are you aware of the number of vouchers connected with refunds during last year? I do not know; there were 4,000 in 1880, when all these frauds were perpetrated.
733. Have you any suggestion to offer which might help the Board in recommending a more effective check and audit upon these pre-lease refunds than at present exists? Well, there are two or three different schemes. One would be to gazette monthly all the leases that were refused and forfeited. Another which occurred to me would be to have a list of all vouchers that had been received during the month sent privately to the Under Secretary from the Audit Department, and the Under Secretary could have them examined with the books of the Pre-lease Branch.
734. Would not an equally effective check be afforded if the Under Secretary were to furnish the Audit Department with a list of the refunds that had been passed through his books? Supposing the Head of the Lease Branch to be a rogue there would be no check, because he would include in that list the forged vouchers that he might have sent up.
735. Then you think it would be better for the Audit Department to send up a list to the Under Secretary to be examined under his direction and compared with the Lands Office Register? Yes.
736. Have you a third scheme to propose? The third scheme would be to send up a clerk from the Lease Branch to the Audit Department, who would take the papers with him when he took up the refund voucher.
737. What do you think of the plan proposed by the Under Secretary—to send up to the Audit Department the original papers in all these cases? The only question is, how long would the papers be kept at the Audit Office. Sometimes two or three cases are mixed up in one set of papers, and to send them up to the Audit Department would delay the action on the other papers, especially if the Audit Department happened to be rather overworked at the time.
738. That might involve very serious delay, and also involve the Department of Audit in a labour which the law does not contemplate putting upon it, and which it is very doubtful whether they could undertake? I do not see how the Audit Department could check the reason given in the voucher for the refund of lease rents.
739. You mean that the Auditor General could not go behind the authority of the Minister as announced in these refund vouchers to make any objection to the payments? I do not think he could.
740. It would convert the Auditor General into a Controller of the Minister for Lands? It might.
741. *Mr. Thomson.*] I think you said you succeeded Mr. Brown in the charge of the Pre-lease Branch? Yes.
742. Do you remember what date that was? The 23rd December, 1879.
743. Then how long had Mr. Harris been in that Branch before you took charge? Some few months—I do not know exactly; it was before I went into the Branch. I think the Under Secretary's evidence tells you when he was appointed.
744. Was it during your term of office that Mr. Oliver reorganized the Pre-lease Branch? No; I took charge in order to carry out the reorganization. Mr. Oliver's report had been sent in, and I was appointed by the Minister to carry out its recommendations.
745. How were you previously engaged, Mr. Wilson? I was in the Conditional Sales Division Office.
746. So that you really had no experience of the working of the Pre-lease Branch? No, none.
747. How long were you in that Branch? Till the 1st May, 1881.
748. Who succeeded you? Mr. Curry.
749. Is he the officer still in charge? He is.
750. Was he under you while you were in charge? No.
751. Do you know from what Branch he was sent? From the Miscellaneous Branch, of which I am now in charge.
752. Was it simply an exchange? No; I was promoted to a higher position in the Miscellaneous Branch, and he was promoted to a higher position as Head of the Pre-lease Branch.
753. Then the status of each of those Branches must have been raised? The Head of the Miscellaneous Branch receives £400, and the head of the Pre-lease Branch £350 a year.
754. You took Mr. Lindsay Thompson's place? Yes.
755. You say that from the time that you went into that Branch Harris was in the habit of borrowing money from you? Yes, small sums.
756. Did he give you any reason for borrowing that money? No; he would only borrow it for two or three days.
757. Just before pay-day? Sometimes he would ask for it in the middle of the month.
758. Did that ever lead you to suppose that he was fast in his habits? No; I knew he had £195 a year, that is 12s. 6d. a day.
759. *Chairman.*] Then you did not think there was anything suspicious in the fact of his borrowing money from you in this way occasionally? No; if I had suspected anything wrong it would rather have thrown me off the scent.
760. *Mr. Thomson.*] You say he continued to borrow money from you after he left the Branch? Yes.
761. How long did that continue? I think until about June or July, 1881.
762. You did not charge him interest or anything of that kind when you lent it to him? Oh no.
763. They were simply loans on account of friendship? That was it.
764. Are you aware whether any of these frauds were committed by Harris prior to your taking charge? It is suspected that one was committed during Mr. Brown's time.
765. What were Harris's duties? To attend to Audit Office queries, refunds, and to post up the Register in the Pre-lease Branch.

F. H. Wilson. 766. And did he submit the refund vouchers to you to sign? Yes.

30 Jan., 1882. 767. Was it your invariable practice to examine the refund vouchers with the papers themselves to see that they corresponded? It was.

768. Who authorized the refunds in your time? I did in Mr. Stephen's time, on the Survey Office reports in most cases.

769. I think Mr. Oliver, the Under Secretary, told us that in most cases he authorized them? Yes, he used to do so, but he did not in my time authorize all the refunds. I may explain that, under the old system, as soon as a pre-lease was applied for it was gazetted; but when Mr. Oliver held his examination it was found that this gave rise to a number of conflicting claims, and it was then decided not to grant any pre-lease until after the Survey Office had reported that there was land available. The consequence was that several thousand old applications that had been granted had to be refused. The Survey Office dealt with them at once; and all those for which there was no land available were refused, and that caused the immense number of refunds in 1880.

770. Notwithstanding that the rents had been paid the leases were refused? Yes; in some cases the rent had been paid for two or three years before they were refused.

771. And during those two or three years was the land not occupied? Yes, in several cases there were two men occupying the same land, both claiming it on the ground that they had paid rent for it.

772. Then you only refunded one rent? The last applicant's rent.

773. *Chairman.*] And that caused such an accumulation of refunds during the year 1880? Yes—clearing off all these cases.

774. *Mr. Thomson.*] Then is the Board to understand that a refund depends now entirely upon the action of the Survey Department? If the Survey Department report that the land is not available, the refund is then made, but I cannot say whether it goes to the Under Secretary or not; I believe it does now.

775. But in your time it did not? No; I had a general authority from Mr. Stephen to deal with all these cases?

776. Then the refund rested entirely with you? Yes, on the report of the Survey Office.

777. Mr. Harris kept the Refund Register, I believe, at that time? I think he did principally, Mr. Harris and Mr. Solway between them.

778. Was that register ever examined by yourself? No, I had not time.

779. You did not compare the authority for refund with this register to see that it was properly registered? After I had signed the refund voucher I considered that all my work was finished. The entering in the Refund Register was a mere matter of detail for the other officers to do.

780. *Chairman.*] Can you tell the Board with what view that register was established? To show what amount of money was refunded.

781. Was it during your time that it was established? Yes; it was commenced in January, 1880; it was one of the outcomes of Mr. Oliver's recommendations.

782. *Mr. Thomson.*] That was about a month after you took charge of the Branch? The week after I took charge.

783. It is an alphabetical register, is it not? Yes.

784. *Chairman.*] You did not attach so much importance to the keeping of that register as to think it worth your while to compare it with the other books of the Department? No; I considered it more for the information of the Department.

785. *Mr. Thomson.*] Seeing that this is an alphabetical register, could it not be easily checked with the Auditor General's books? I cannot say; I have never seen the Auditor General's books.

786. Do you not think that a chronological register would have been preferable? Do you mean in respect to the dates on which the vouchers are sent to the Treasury?—The advantage of having them in this form is that we can see at once whether a refund has been made to any particular person, without having to refer to the books.

787. *Chairman.*] It acted as a sort of index to your books? Yes; if any land agent came in and wanted to know whether a refund had been issued to any particular person, we looked in this book and found that on a certain day it had been sent to the Treasury.

788. That was the object of the book? That was one of the objects, and also to see the amount of refunds in the year.

789. *Mr. Thomson.*] Do you see any object in sending these refund vouchers to the Treasury in the first instance? No, I do not.

790. Do not you think that every purpose would be served if they were forwarded direct to the Audit Department for the verification which is now made through the Treasury? If they were kept in the Audit Department for a month or so it might become inconvenient, as there would be no means for the Treasury to trace the document to know if it had ever reached the Audit Department. I do not know whether it would have to be registered there.

791. Is there anything noted on the refund voucher to prove that it has been entered in the Register before it leaves the Pre-lease Branch? No; the refund vouchers were handed by me to the clerk, to be entered in the Refund Voucher Book before being despatched to the Treasury.

792. Then does not the clerk who makes the entry note on the voucher itself that it has been so entered? No; he notes on the papers, "Treasury and applicant and land agent informed."

793. And that was done before you signed it? Yes.

794. But should not some proof of registration appear on the document itself? It has never been done, and if it were I should never have seen it and should not have been a bit the wiser.

795. Still it would be satisfactory, as many of the authorized refunds may not have been entered in the Register at all? Yes.

796. *Chairman.*] As a matter of fact the fraudulent refunds did not appear in the Register? No, I believe not.

797. *Mr. Thomson.*] These refund voucher forms are not kept under lock and key, or were not in your time? No, they were not.

798. And any clerk in the office had access to them? Any clerk had access to them.

799. And any clerk could have filled up a form without your knowledge? Yes.

800. Do you know whether the Treasury were informed that you were authorized to sign these refund vouchers? They were,

801. And do you not think it was necessary that the refund vouchers should have been given out by yourself only, when you authorized the refunds? Well, there were so many hundreds and thousands of them in the office when I went there that that would have been of no good as far as I was concerned. F. H. Wilson.  
30 Jan., 1882.
802. Do you think it would be of any advantage to have these forms in books with butts? I dare say it would; the present system I believe was adopted on the suggestion of the Treasury.
803. That was only as to the form? Yes; but even the butt system would not have met Rudd's case; no system could meet cases of that kind.
804. And do you think that if the butts of these books were sent up to the Audit Department afterwards they would be a good check? I think it would be a very good idea.
805. *Chairman.*] Of course it would not check the fraud itself, but it would detect it? Yes.
806. *Mr. Thomson.*] In that case it would be necessary that the butt should be initialled by the Head of the Branch? Yes.
807. In these refund authorities the amount to be refunded is written in words? Written in words and also in figures.
808. *Chairman.*] Are you at all acquainted with the mode of procedure in the Account Branch of the Lands Department? No.
809. You know nothing about it? No.
810. *Mr. Powell.*] This Refund Register was established by Mr. Oliver in consequence of frauds that had been discovered in the office during Mr. Evans's time, was it not? No; it was in consequence of the disorganization of the Pre-lease Branch under the management of Mr. Brown.
811. Then it was intended as a check upon any possible frauds? It was intended as a record of the money authorized for refunds; I do not think the question of frauds ever arose.
812. If it were so, it has failed? Yes, I suppose it has.
813. The four documents I now produce, numbered 1,708, 1,709, 1,710 and 1,711, are lease applications? Yes.
814. Are they all *bona fide* applications? Yes.
815. And they have all been duly gazetted in the way you have described? Yes.
816. Nos. 1,710 and 1,711 are endorsed—"Objectionable, as the land applied for is alienated, and there is no other available land to satisfy this claim." Under those circumstances there could be no refund? Oh yes, that is the very reason there should be a refund; there was no available land, and the refund was authorized on 13th December, 1879.
817. Then a refund was authorized on 1,710 and 1,711? Yes.
818. And the applications 1,708 and 1,709—how were they dealt with? They stand good. No. 1,709 was an application for 2,880 acres; there were 2,880 acres available, and therefore it stands good. No. 1,708 was for 1,920 acres; there were only 1,000 acres available, and it was re-gazetted on the 12th March, 1878, that there were only 1,000 acres available.
819. Then on Nos. 1,708 and 1,709 the amounts claimed are due? On 1,709 no refund was due; on 1,708 there should be a refund on 920 acres.
820. This document, apparently a refund voucher, No. 20,285, claims on applications Nos. 1,708 and 1,709? Yes.
821. And it represents a claim that is admitted? No, it is a forgery.
822. And on Nos. 1,710 and 1,711 there was a claim? The voucher represents at the top that it is a duplicate of one issued on 13th December, 1879, which had miscarried.
823. This is the notice (*handing paper to witness*) to the lessee informing him that the refund is authorized? Yes, but it is a forgery.
824. Then on Nos. 1,708 and 1,709 the claims are good, but by this document two other numbers are quoted, 1,710, and 1,711, on which nothing is payable? The notice as to the two latter was a duplicate, the money having been authorized for refund; there is nothing payable on 1,709, but these are forgeries.
825. Now, supposing these lease applications had been sent to the Audit Department accompanied by the original papers containing the authority for the refund, would not the fraud have been discovered? It would.
826. Supposing a clever rascal like Harris, educated in the Audit Department, knew that such a check as this was in existence, is there any other way by which he could circumvent the Department? I think a clever man like Harris could circumvent almost any check that could be established.

Harris Curry, in charge of the Pre-emptive Lease Branch of the Lands Department, examined:—

827. *Chairman.*] Did you succeed Mr. Wilson in the Pre-lease Branch of the Lands Department? Yes. H. Curry.  
30 Jan., 1882.
828. How long is it since you took charge of that Branch? I went there in May, 1881.
829. Was Mr. Harris in that Branch at the time? No; he was appointed Accountant prior to my going there.
830. Did you find the work of the Branch in a satisfactory order? Yes.
831. Were you charged with the duty of signing the vouchers for pre-lease refunds? Yes.
832. You signed for the Under Secretary? Yes.
833. That plan was abandoned after a time, was it not? No; I still sign them.
834. For the Under Secretary? For the Under Secretary.
835. All the pre-lease vouchers? Yes.
836. And upon what authority do you sign them? As an invariable rule, I obtain the authority of the Under Secretary. We have a variety of cases. Frequently the practice of the Department is altered, and what was thought proper and legal years ago is not considered so now, and leases which have been in existence for some time have to be cancelled. For instance, a forfeited pre-emptive lease might be considered available for lease again, as it represents vacant country; but the Attorney General has given his opinion that it can only be disposed of by sale by auction. These cases are frequently challenged now by persons whose interests are opposed to the interests of the present holders of the leases, and they sometimes in consequence have to be cancelled. In such instances as these, although I have for my protection the opinion of the Attorney General, I always get the approval of the Under Secretary to refund the money.

H. Curry. 837. Then it rests with you to determine whether you shall, of your own motion or authority, sign the refund voucher, or whether, before doing so, you shall take it to the Under Secretary? I do not think it rests with me in that way. I spoke to the Under Secretary some time ago, and said I thought it would be desirable to submit to him cases which my predecessor might not have thought necessary to submit, and there is a tacit understanding that I should do so.

30 Jan., 1882.

838. The Board understood from Mr. Wilson that he was authorized to sign these refund vouchers without any reference to the Under Secretary, but he said that he believed there was a change made afterwards by which the Under Secretary took upon himself the duty of authorizing them? I am not aware of any written instructions bearing on the matter; I was not given to understand, as far as I can remember, that it was *absolutely necessary* for me to submit every case to the Under Secretary, but I do so upon a tacit understanding between us.

839. You think it is desirable to be supported by his authority? Yes; in fact I do not consider myself free to authorize refunds, as I do not hold an authority.

840. *Mr. Thomson.*] In other words, you are more cautious than your predecessor? I should not like to say that.

841. *Chairman.*] Has any plan occurred to you by which this system of refunds could be placed on a more effective footing, so as to prevent fraudulent treatment of the kind we have under consideration? I have thought over the matter, and I think it might be done by an expansion of our present Refund Book, or at any rate frauds might be guarded against to a great extent.

842. You mean to make that book a more comprehensive record of the transactions? Yes. I think the great evil we have to guard against is the probability of unscrupulous men like Harris tampering with forfeited leases. These leases have been forfeited for nonpayment of rent, and stand in our books as forfeited. Harris's scheme was this: he would write to the Treasury and Audit Departments (which could not know much about the validity of the reason given for the action) that a forfeited lease was cancelled, and as a matter of course the rent on it was due for refund. He would select a case in which the area was a large one, and the annual rent correspondingly large. He would write to the Treasury, say it was a lease granted over a forfeited lease, or over a reserve, that consequently it was cancelled, and the refund upon it was due. There was no check in our Branch against such transactions as these, because Harris would take care not to enter it in the Refund Book, and not to make any notation in the Lease Register, so that no inspection of the books by the Head of the Branch would lead to the matter being detected.

843. *Mr. Thomson.*] If Harris wrote a letter to the Auditor General, or to the Treasury, stating that a lease had been cancelled, and that it had been gazetted as a forfeited lease, would the Auditor General have any reason to object to the refund of three years' rent in such a case? That would depend entirely upon circumstances. It is a tradition of the Lease Branch to retain as much rent as possible; and in the cases mentioned, although the lessee might legally claim the whole of the rent paid, on the ground that it had been illegally granted, the Department might decide, as it has decided, that the man having had the use and occupation of the land ought not to object to pay rent for it.

844. That it ought not to grant a refund? It ought not to grant the refund. But where the Lands Department is placed in a dilemma, it sometimes finds it convenient to grant the refund.

845. Such as in a case where two persons had paid rent for the same land? Yes.

846. And in cases of that sort you return the rent? We ought to do so.

847. *Chairman.*] Have you any reason to suppose that all the frauds committed by Mr. Harris in connection with pre-leases have been discovered? The whole of these frauds having occurred before my time I did not express much curiosity about them, so that I am unable to say.

848. What plan do you think would be the most effective to discover whether there are any frauds that have not yet been discovered? As far as I can see, the only way—but it would involve a great deal of work—would be to examine every refund voucher that has been issued from the Pre-lease Branch.

849. Do not you think that a comparison between the Refund Register of the Lands Department and the Refund Register in the Audit Department in the first instance might lead to the discovery of any frauds that have not yet been made known? I do not think so, because I do not think Harris has been so foolish as to place on record any of his transactions.

850. Then the very fact of his not having placed them on record would at once indicate where the frauds had been committed, because the Audit Department would pass and enter in its register vouchers which did not appear in yours, and that would at once lead to the discovery? Yes, it might; but I cannot help thinking that the only comprehensive way, seeing what a clever forger has to be dealt with, would be to compare every voucher.

851. Whom would you propose to make the comparison, supposing all the vouchers were taken out? Of course it would be desirable to have some independent gentleman not connected with the Lease Branch; that would be more satisfactory to me and to everybody. It is a matter upon which I am scarcely competent to offer any further opinion.

852. Do you know the number of vouchers that would in all probability be required? I could not say.

853. *Mr. Thomson.*] Could you spare your register for the purpose? Yes.

854. In the meantime how would you deal with the documents you would have to register? We should have to enter them in a supplementary book, and re-register them afterwards.

855. *Chairman.*] Could not the register be sent up to the Audit Department for (say) one, two, or three hours a day, to be compared with the register in the Audit Department? Yes.

856. When was the Pre-lease Refund Register opened? In January, 1880.

857. Were there no entries in it prior to that date? Not that I am aware of.

858. *Mr. Thomson.*] Are you aware whether Mr. Harris forged your name in connection with these refunds? I am not aware that he did, and I think there is every probability that he did not. He would require information from my Branch, and as he ceased to occupy a position in it, he was deprived of the facilities he would have possessed had he remained in it; he would require to come to my office and obtain information from my books, and I am pretty certain that he did not do this.

859. *Chairman.*] Had he access to that Branch as he liked from the time he was appointed Accountant—could he go to that Branch and take what papers he wanted and copy them? No.

860. He would be allowed to go there to look up cases, would he not? I do not think so, without coming to me and giving me some special reason for it.

861. *Mr. Thomson.*] Where is your office situated? It has recently been removed from Bligh-street to O'Connell-street.

H. Curry.

30 Jan., 1882.

862. If Mr. Harris wanted to go to your Branch, he would have to apply to you in the first place for permission to refer to your register? Confidence having been placed in him, from the fact of his having been appointed Accountant, he might go to one of the subordinate officers for information, but then he would not only have to ask for information but would have to look over the books themselves, and that might create suspicion. He would have no chance of committing frauds unless he had charge of the books, as he would not know the numbers and condition of the cases.

863. *Mr. Powell.*] Harris's office was not in the same building as yours? No.

864. *Mr. Thomson.*] Then, as a matter of fact, you never saw him in your Branch? I have seen him there, because he has called upon and spoken to some of the officers, but I do not believe he has ever carried on any fraudulent transactions there since my time.

865. Did he ever borrow money from you? No; he was a man with whom I did not associate.

866. His duties as Accountant would not bring him in contact with the Pre-lease Branch? No.

867. *Chairman.*] You had no ground of suspicion in reference to Mr. Harris? No; I never associated with him or knew very much of him.

868. *Mr. Thomson.*] When you authorize a refund, do you instruct one of your clerks to fill up the refund voucher? Yes.

869. You do not fill those vouchers up yourself? No, except perhaps in rare instances.

870. And does the clerk who fills up the voucher enter it in the register of refunds? Yes. I do not however attach any importance myself to the Refund Book in its present condition as a guarantee against fraud, not the slightest.

871. But do not you think it is a matter of some importance to guard against these refund vouchers being forged? Unquestionably, but the only way to do that, in my opinion, would be by the expansion of this book. In my view, the frauds that have to be guarded against are those which might be committed behind my back.

872. That being the case, is it not necessary that every precaution should be taken by the Head of the Branch, that is yourself, to prevent that being done? Unquestionably. I have not been very long in the Branch, but I am prepared with a suggestion which, I think, would afford some protection.

873. Will you kindly state what that suggestion is? I think that in this Refund Register there ought to be two more columns, one for my signature, and another for the signature of a gentleman authorized by the Audit Department. Take, for example, the case of Atkins on the first page of this book. The entry represents the amount of £9 authorized to be refunded. If that refund were duly authorized, it, according to my scheme, should be guaranteed by my signature opposite it, and when the voucher passed into the Audit Office the Audit Clerk should compare it with the entry in the book. Then, presuming it to be apparently satisfactory, he should write his name in the column provided for the purpose. I should, of course, carefully examine the papers prior to signing my name either to the voucher or in the book.

874. *Chairman.*] It would be a simultaneous proceeding, the signing of the refund voucher and the book—you would sign them both together? Yes. Then I think some understanding should be arrived at between the Lands Department and the Audit Department that no voucher should pass unless it appeared in this book, and my signature appeared in the book also.

875. Then would you propose that the register should be sent up to the Audit Department for comparison, or that a certified extract should be sent up? I think it would not be desirable that the book should go out of my possession, as during transmission a forger might make an entry in it.

876. And you think that a certified copy of the register might be sent up to the Audit Department, say weekly, as a guide to that Department in examining the vouchers sent to it for verification? I think something of that sort might be done. My idea was that the Audit Clerk, who would be the responsible person, should see the book itself, but I do not see why, if sufficient precautions were taken, a certified extract would not do.

877. There would be considerable delay in carrying out that system? I am afraid there would, but it would be a great protection to me, as there would be my own signature and the signature of an officer from the Audit Department. Should I myself not be above suspicion, the book would have the advantage of containing the registered number of the papers or a tangible clue to the papers upon which all refunds were authorized, so that any independent person could inspect the book and be able to pronounce whether the transaction were free from doubt.

878. Do you think it would be desirable that the original papers upon which the refund is founded should be sent with the refund voucher to the Audit Department? I think that would be a guarantee, but I do not think as a rule that it would be convenient, because it may sometimes happen that after a refund has been authorized, some action in another section of the Department might have to be taken which could not be taken in the absence of the papers.

879. *Mr. Thomson.*] Is the authority for refund not noted on the original papers? It is—speaking of my own time; I do not pretend to know what was done before that.

880. And the amount is usually stated on the papers also? Yes.

881. Would the Auditor General therefore, in verifying a refund, have any difficulty if the original papers were sent to him? I do not think so—I think the matter could be made perfectly plain.

882. He would not have to wade through all the papers in order to discover the amount that was authorized to be refunded? The Auditor General has books which reflect ours completely. If we stated that the money was to be refunded from a given day to a given day, that would be all the Auditor General would require.

883. And that would tally exactly with the refund voucher? Yes.

884. Would it be any advantage to have these forms kept in books with butts, in the same way as cheques? It would be an advantage, but like cheque-books they might be tampered with.

885. But they could be kept under lock and key? There are a number of little accidents which might happen with respect to cheques or forms of a similar kind. A voucher for instance might get torn or mutilated, or ink might be spilt over it.

886. All that would be required in that case would be to cancel the voucher and attach the mutilated form to the butt. At present these forms are loose and lying about the office? They are; but even if I kept them under lock and key a man like Harris could forge a requisition for a supply and get them.

- H. Curry. 887. Then I presume that under your present system Harris had no difficulty in abstracting a number of these forms? No.
- 30 Jan., 1882. 888. Do you not think the system at present in vogue is a very loose one? I think it is defective.
889. And that to have these forms in books would be an improvement? Unquestionably it would.
890. And to have them numbered consecutively? Yes, I think it would be an improvement.
891. And as a check for the Auditor General to exercise upon these payments, the butts could be sent up as soon as the books were exhausted? Yes; I think it would be desirable that the examination should be rather frequent. That would of course depend upon the size of the book. For instance, we might have a rush of refunds which would exhaust a book in a month, and on the other hand we might have a slack time and the exhausting of a book would extend over a long period.
892. Have you any idea of the number of refund vouchers that you issue in a month? I think the last year I issued about 1,700.
893. During the year? Yes.
894. That would be at the rate of about a book and a half per month, supposing the books to contain 100 each? Yes.
895. *Mr. Powell.*] Does that number, 1,700, represent about the average number of claims in the year? We had 4,000 odd claims last year.\*
896. *Mr. Thomson.*] Have you any suggestion to make to us by which a check could be established upon the issue of these refund vouchers? No further than this—that if my signature or the signature of the Head of the Branch were entered in the book, and no refunds were issued unless they appeared there, there would be a good check.
897. That would be a departmental check for yourself more than for the Auditor General? Still the Auditor General could appeal to it also. As I pointed out before, the great thing to guard against is fraud that might be committed without the knowledge of the Head of the Branch. I would take care that I did not sign any refund voucher unless it was authorized, and unless there was solid ground for the refund, and I would take care that no refund voucher without my signature appeared in the Refund Register.
898. *Mr. Powell.*] But the initials of an officer of the Audit Department in another column of this book as you propose would be of no avail unless that officer saw the papers? In making this suggestion I presume that the responsibility would be divided between the Department of Lands and the Department of Audit. The Refund Book would show nothing but refunds which the Department of Lands would be prepared to ascertain or prove were genuine, and it would be for the Audit Department to see that no refund vouchers which were not recorded in this book were passed.
899. That would simply be a guarantee of record in your book? No; as I take it it would work in this way—Say for example that there was a sum of £9 due to this man Atkins; that it was on a lease which I will call for distinction A; that Atkins held another lease B, in respect of which a forged voucher issued; the refund upon A would appear in this book, and the Head of the Branch by his initials against it would guarantee that it was a straight forward case.
900. *Mr. Thomson.*] But supposing the Head of the Branch was a forger? The fact of the entry in the book being guaranteed by the signature of the Audit clerk would prove unquestionably that it was so far genuine. If the Head of the Branch were suspected, the book could be placed in the hands of an independent person, who would have no difficulty in pronouncing upon it.
901. That would be a very tedious operation, would it not? I have no doubt it would be. It is, however, difficult to devise a simple method of fencing round a forger.
902. Do you not think the production of the papers themselves would be the best guarantee for the Auditor General? Yes, it would; but even then in the hands of a clever forger I can see nothing to stop him from making and forwarding a fictitious case altogether.
903. *Chairman.*] Would not such a system have a tendency to cause a laxity on the part of the officers in the Lands Department, who would trust to the check which the Audit Department would make afterwards? I scarcely think so, because there would be a great deal of responsibility on the Head of the Lease Branch, viz., that the refund was a genuine transaction.
904. *Mr. Powell.*] You have said that the responsibility should be divided between the Lands Department and the Audit Department; but can there be any possible division of the responsibility unless both Departments have access to the papers for examination? I should think a line might be distinctly drawn in this way—that the Lands Department should be responsible for entering all refunds in a book, and should accept the responsibility of their being genuine. The responsibility of the Audit Department would be that no refund voucher should pass unless it was recorded in the Refund Book.
905. *Chairman.*] It would go beyond that, because, if the Examiner of Audit saw from the original papers that there was anything wrong, he would refuse to verify the refund for payment? In that case the responsibility of the whole transaction would have to rest with the Auditor General altogether, and I doubt whether the Audit Department would be able, in every case, to pronounce upon the matter, because it would not be conversant with the circumstances, decisions, and legal opinions which brought the cancellation about.
906. *Mr. Thomson.*] But is that not your duty, Mr. Curry? It is my duty, but then if I made a mistake how would the Auditor General check me?
907. The object of sending the documents to the Auditor General is to see that the authority for the refund is not a fraudulent one—that is the main object; it is not to see that the amount authorized is a correct one: the Auditor General will not enter into minute calculations to see whether you are refunding an amount in proportion to the area which cannot be leased—he never could undertake a duty of that kind? No, but I really do not think the Audit Department would be able to pronounce upon every case submitted to them.
908. Then you think it would be no use to send the papers to the Auditor General? I think it would be inconvenient, and that the book I suggest would answer all purposes.

WEDNESDAY,

\* NOTE (on revision):—By claims were understood claims not for refund but for pre-leases. It does not often occur that claims are made for refunds.

WEDNESDAY, 1 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, Esq., IN THE CHAIR.

Edward Alexander Rennie, Inspector of Accounts, Department of Audit, examined:—

909. *Chairman.*] You are aware, I presume, of the object of the inquiry by this Board? I believe so. E. A. Rennie.
910. And you can give the Board some information with respect to the treatment of pre-lease and other refunds that go through the Audit Office? I will answer any questions you may ask me. 1 Feb., 1882.
911. *Mr. Thomson.*] You have been a good many years in the Audit Department, I think? About thirty-six years.
912. Your present position is that of Inspector of Accounts in the Department? Yes.
913. I presume your inspection is of a general character only? Yes.
914. It would be quite impossible for you to examine the receipts and payments in full detail? Certainly; I do examine certain portions of the accounts as they come before me in minute detail, but as a rule I do not. However, every pay and receipt voucher that comes from the Treasury passes through my own hands before being taken up by the Branches for detailed audit.
915. How many distinct Branches have you in your Department? Three.
916. Will you kindly describe them? The Appropriation Audit, the Expenditure Audit, and the Revenue Audit, besides the correspondence, which is not treated as a separate branch of audit.
917. Who is in charge of the Expenditure Branch? Mr. Gilchrist.
918. Do you hold him responsible for the passing of payments of every description, or simply for those that are made direct from the Treasury? His duty does not cover the whole audit of the pay vouchers; he takes only the rates, computations, authorities, and acquittances—contracts of course included, and authorities from principals to agents.
919. How many clerks has he to aid him in the discharge of these duties? The number varies,—five is about the ordinary number.
920. Is Mr. Whittell under Mr. Gilchrist? No, Mr. Whittell is the Head of the Revenue Branch.
921. Then it is as Head of the Revenue Branch that Mr. Whittell checks the refund vouchers? No, he does not check refund vouchers as expenditure.
922. Simply as to whether the amounts requested to be refunded are available or not? His duty in regard to refund vouchers is simply to verify the original credits of the sums to be refunded—to verify the credit at the Treasury of the sums which are authorized to be refunded, that verification being asked for by the Treasury as a security to them.
923. Then if we want to get some further detailed information with respect to the refund of lease rents, what officer should we ask to attend as a witness? No one except Mr. Whittell.
924. And if we wish to ascertain something with regard to the payment of these claims, we should require to send for Mr. Gilchrist, I presume? All he could do would be to produce the vouchers for any claims you wish to investigate.
925. You have heard that Harris, the late Accountant of the Lands Department, committed a number of frauds on the Government? Yes.
926. He was a clerk in the Audit Department, I believe, for some time? He was.
927. How long was he with you? I think about fifteen months, as near as I can remember; more than a year, at any rate.
928. In what Branch was he employed? The Revenue Audit.
929. That is the Branch in charge of Mr. Whittell? Yes. I am not sure that he was there the whole time, as the clerks are shifted about: I rather think he was in the Appropriation Audit for a while. He joined the Department when I was absent in England.
930. He had an opportunity therefore of acquiring a great deal of information concerning the operations of the Audit Department? Yes, and of the run of all the documents from other Departments as well. He could trace the operations under which payments were made, and also those under which moneys were received.
931. Did you consider him a smart young man? Very—a capital clerk.
932. What salary did he receive when he was with you, do you remember? I think he was receiving £150 when he left us.
933. Do you remember the circumstances connected with his transfer to the Department of Lands? He either applied himself or he was appointed by the Minister for Lands on our recommendation, at least upon the certificate from the Auditor General of his capabilities. We had no hand, of course, in transferring him—we were very sorry to lose him.
934. You gave him a good recommendation however, did you not? Oh yes.
935. You had at that time every confidence in his integrity? There was nothing to impugn it in any way.
936. When he became Accountant in the Lands Department, nothing had occurred to change your good opinion of him? No; I believe he obtained the appointment of Accountant in the Lands Department mainly on the good character he received from the Auditor General, but I am not sure.
937. In fact, up to the time that you heard of these frauds, you considered him a trustworthy officer? Certainly, very zealous, as far as I knew.
938. During the time that he was Accountant in the Lands Department did he render his accounts to the Audit Department in a satisfactory manner and a business-like way? With him as Accountant we had nothing to do; it was with Mr. Oliver, the Under Secretary; but the accounts came from the Under Secretary in very good order.
939. You have lent a number of pay vouchers to the Under Secretary for Lands since the discovery of these frauds, have you not? Yes.
940. Before parting with these documents did you examine them critically, with a view to ascertain whether it was possible for the officers of your Department to have detected the frauds alleged to have been committed? I can hardly say that we did. In one or two cases which were brought under my notice by Mr. Oliver he and I together looked over them, not with a view to see if we could detect anything,

- E. A. Rennie. thing, but simply to see how ingenious Mr. Harris had been in his proceeding. I may say, however, that since considering the whole matter nothing has occurred to me by which we could have prevented it.
- 1 Feb., 1882. 941. In fact, Mr. Oliver was in too great a hurry to obtain these vouchers to admit of a critical examination? We did not propose to make a critical examination.
942. Did the Under Secretary for Lands, or any of his officers, describe to you the nature of the frauds? Yes.
943. Did you examine the signatures minutely, or compare with those considered to be genuine? I did in several cases.
944. Was the imitation so good that they could not be considered to be forgeries? The imitation was very good, and the possibility of the signature being a forgery would certainly never have suggested itself in most cases. In one or two cases when the forged signatures were compared with real signatures there was a vast difference between them, but in passing through the vouchers in the ordinary way no one would suppose them to be forged.
945. Do any of the pay vouchers for refunds undergo inspection by yourself after payment, as a general rule? No, except in the ordinary course in which all pay vouchers come under my notice; they do not come specifically under my notice, except when queried by the Examiners.
946. Since you heard of Harris's frauds have you examined or directed to be examined the whole of the payments connected with the Departmental and other votes for the Department of Lands and the refunds as well? No.
947. Have you examined the adjustment vouchers furnished to you in support of payments by the Lands Department out of advances for incidental expenses? Not with reference to any supposed fraud.
948. Will you kindly describe the nature of the audit which pay vouchers generally undergo? On receipt of pay vouchers from the Treasury they are first posted as against the Appropriations and the Governor's Warrants; then they are tested in regard of contract rates, or authorized rates for salaries and allowances; in regard to law or regulation or other authority; in regard to computations; in regard to certificates of actual supply or service; in regard to acquittances, and, where moneys are paid to agents, as to the authorities from the principals to those agents.
949. With regard to refunds of lease rents what is the nature of the audit? The same process is gone through with every voucher, refunds as well as others, so far as it is applicable.
950. In that case all you have to do, I presume, is to see that the authority for the payment is genuine? Yes. I should perhaps say that besides our own verification, which is a separate matter, there is a difference in respect to the adjustment vouchers which we receive from Departments; these are examined in regard to rates, computations, and so forth, but they do not pass through the Appropriation Audit in the same way as the direct payments from the Treasury do; they are compared with the advances to see that no payments have been made for other Services than those for which the money has been advanced by the Treasury and charged to specific Appropriations.
951. When a person to whom a refund is to be made gives an authority for an agent to receive the money on his behalf, do you consider it part of your duty to see that the signature of the Magistrate who attests his signature is genuine? No.
952. Have you a certified list of all the Magistrates in the Colony, in your office? The only list we have is the Gazette notice which appears from time to time.
953. You are not supplied with a certified list by the Colonial Secretary's Department? No; we do not require it in fact.
954. Having previously certified that the amounts authorized to be refunded are available, is the audit after payment less careful on that account? It makes no difference whatever to the course of audit. If in any case a refund were found unverified, it would be referred of course to the Revenue Branch for that verification. There have been some payments made by the Treasury without verification, but not many.
955. They might have been overlooked? There were probably some special reasons for it.
956. Do you think any check could be established by the Audit Department against collusion or forgery? No, I do not think there could be.
957. Have you given the matter some consideration recently? Since these frauds were committed I have.
958. Can you suggest anything to prevent similar impositions in future? It seems impossible to foresee in what direction an ingenious rogue may invent a scheme of fraud. We must rely on the integrity of some officer or officers in a Department, and if our confidence is misplaced that is a matter which we cannot foresee or provide against.
959. Would an examination of the original papers in cases of refund involve your Department in much extra labour? Very much, and, it appears to me, without corresponding benefit.
960. You think it would not tend to lessen the risk of fraud? I think not. If the papers, for instance, had been sent to us from the Lands Department when Mr. Harris was committing his frauds it would have made no difference that I can see. It might have made him a little more ingenious in his mode of carrying out his schemes, but it would have made no difference in respect to the check.
961. Supposing that these original papers had the authority of the Under Secretary for Lands noted on them, and you saw that authority, would that not be a good check for the Audit Department? The fact is that the verification of the refunds is not a verification of the Under Secretary's or Minister's authority to make the refunds; it is simply a verification of the original credit of the sums to be refunded. We do not go behind the authorities in ordinary cases; it would involve us in enormous labour, and bring us in collision right and left with all the Ministerial Departments. We presume that the authority has been correctly given by the Under Secretary.
962. But when frauds of this description have been discovered, do you not think it necessary that some effective steps should be taken if possible to prevent their recurrence? Doubtless; but these checks should be applied in the Department whence the authorities issue.
963. But if a check can at the same time be applied by the Auditor General, is it not desirable that he, holding such a position, should have such a check in his hands? According to present arrangements the Auditor General has nothing whatever to do with payments until they are made. If payments, as in former times, had to be audited before they were made, then there would be some reason for all the papers connected with the issue of money being submitted to him for examination; but under the present regulations, when we have nothing whatever to do with payments until they are actually made, we cannot go back upon authorities. If we detect anything, that is the utmost we can be expected to do.

964. Are you aware that some of the frauds committed by Harris were taken from papers where the lease had been granted? No, I did not know that case. E. A. Ronnic.

965. We have two or three cases of that kind? There are a number of cases of fraud of which I do not know the particulars. 1 Feb., 1882.

966. Will you kindly look at that voucher, No. 21,870 (*handing voucher and papers to witness*); that is a refund voucher for £24? Yes.

967. In favour of Daniel Murray? Yes.

968. All the papers connected with that refund appear to be there. Do you see any authority for the refund on those documents—that is, Ministerial or Departmental authority? No, I see none; but neither is there any authority for granting the lease, nothing beyond some memoranda.

969. Had the authority for the refund been sent to your Department with all those papers would you have passed the refund? Yes, certainly we should; there is no reason why we should not.

970. Notwithstanding that you cannot find the Ministerial authority for the refund on the papers themselves? I do not think it would have made any difference whatever, because to begin with we should not have known that these were all the papers, and there would be nothing on them to suggest that there were other papers.

971. Are the numbers on the papers not referred to in the refund voucher? Yes, but that does not imply that there are no other papers.

972. But supposing that these papers had been sent to your Department as a check upon the refund, and to show you that the refund had been duly authorized either by the Minister or the Under Secretary of the Department, would you consider it right to verify the amount although you could find no authority for the refund on the document? Do I understand you to say that the papers would be sent separately from the authority?

973. No, the papers and the authority would be sent up together to the Audit Department for the necessary verification? I could hardly conceive of the papers being sent with an official letter signed by the Under Secretary, or his delegate, if there was a discrepancy between the papers and the letter.

974. That is what I wished to arrive at. But if the system were altered, and you were unable to pass a document of that kind unless you saw the paper with the Ministerial authority there could be no fraud committed? Of course if it were made the rule that we were not to verify any refund unless we saw the Minister's authority or that of the Under Secretary acting for him for the refund, then of course we should insist upon seeing it.

975. Could that rule be applied with facility to your Department and without much inconvenience? Supposing a forged authority were sent where should we be?

976. You would have a greater number of checks, would you not? No, no more than we have now. The responsibility of the arrangement must rest entirely with the Department that issues the authority.

977. But as all these applications for lease rent refunds are referred in the first place to the Surveyor General to see whether the land applied for is available, would not the checks be increased so as to deter any one from attempting a fraud or forgery? I am not exactly acquainted with the mode of dealing with the lease rent applications in the Lands Department. If they are sent as you say, and I believe it is the case, to the Surveyor General for report in the first place, and he reports that the land is already taken up, then his certificate, I suppose, would be furnished to the Lands Department, as a justification of their issue of the money for the refund. But that certificate would be sent to the Minister for Lands, not to the Auditor General; we ought to have nothing to do with that.

978. Yes, but you would get that authority from the Ministerial Department in order to satisfy the Auditor General that no fraud was attempted. In view of these frauds do not you think it would be advisable to give the proposed system a trial? As I have said, I think, in answer to a former question, I do not see that sending the papers to us would prevent them, because we should have no security whatever that forged documents would not be sent.

979. Then the audit must be of very little avail to the public? Our duty is confined to certain prescribed limits. I have my idea of an audit perhaps different to that in which we are obliged to work. I think there is a sphere for a higher audit than that which we apply to the public accounts, but we are precluded from applying it in the direction you propose. The audit you suggest in respect to these refunds would be an audit of the operations and administration of the Ministerial Departments, instead of being simply an audit of receipts and payments. It would be an audit of administration, and that I apprehend is one to which no Minister would submit.

980. There is nothing in the Audit Act of 1870 that would prevent your carrying out such an arrangement as that I have suggested? We of course reserve the right to call for any papers in support of any payment or receipt where we think it necessary, but to impose upon us in every case the examination of all the papers connected either with the granting of money or the arrangements for the collection of money would be to place upon us a duty with which we are utterly unable to cope under our present arrangements; it would open up a course of action altogether different from that which we have hitherto pursued.

981. Then the Board may assume that you are not favourable to this plan? Certainly. I may mention perhaps in connection with this subject that the number of refunds which we have verified during the past year amounts to 5,000 or 6,000, and you may just imagine 5,000 or 6,000 bundles of papers to look over.

982. They would not all come together? They would probably come in parcels of a hundred at a time, as the authorities for refunds now do.

983. You have had no reason to suspect that there has been collusion between Harris and any officer of the Audit Department? No, not the slightest.

984. Such a thing could however have existed without your knowledge, and without the possibility of detection by yourself or the Auditor General? It is possible, of course.

985. Frauds of a similar character could I suppose be perpetrated by any skilful forger in any of the other Departments without detection? It is quite possible.

986. Do you subject signatures to any special test—the signatures of Bank Tellers, for example? I am not aware that the Examiners do; the signatures of the Bank Tellers are very well known, and they would not be questioned if they bore their ordinary appearance.

987. You are aware that there are an immense number of refunds in connection with conditional purchases and other descriptions of land sales constantly going on? Yes.

988.

E. A. Rennie. 988. Have you any satisfactory check upon such transaction? None whatever.

1 Feb., 1882. 989. You simply accept the authority on the signature of the gentleman authorized by the Under Secretary to act on his behalf? Yes, either the Under Secretary or his delegate.

990. Do you know who signs the refund vouchers for conditional purchase money? They are generally signed by Mr. Blackman, for Mr. Moriarty, the Chief Commissioner.

991. Should not this duty naturally devolve upon the Chief Commissioner himself, so far at least as conditional purchases are concerned? I could not say, but I should certainly prefer that all these orders should be signed by the Under Secretary, or at all events that they should be sent from the Lands Department through him, although they may be individually signed by Mr. Blackman or Mr. Moriarty, or any one else. I think they should be sent through the Under Secretary, with his own signature covering a schedule of the amounts, to show that they were sent with his sanction; that is the direction in which I think the check should be applied.

992. Then you consider it a very undesirable state of things to have so many officers in the same Department authorizing important payments and refunds of such vast magnitude in the aggregate? I do.

993. Would it meet your views if only one responsible officer in a Department were appointed to authorize such payments and refunds? I should prefer the double check; that is, as I indicated just now, that the Under Secretary himself should by his own signature authorize these payments, and that his authorization should be supported by the subordinate signatures of his responsible officers, one or many. And to secure that, it has occurred to me that if he had a confidential clerk who should examine these documents before they come before him for his own signature, it might be a good check against the issue of unauthorized vouchers. That would simply have the effect of relieving the Under Secretary, and insuring that he did not sign anything which he had not had tested by an independent check.

994. You are aware, I suppose, that Mr. Oliver does not sign any of these documents now? No, I am aware he does not.

995. Supposing that his time is so much taken up with what he considers his general departmental duties, would it not be well that he should depute some confidential clerk to sign on his behalf? He could hardly be expected to examine personally all the papers on which he is required to issue the authority for refund; but if he had a confidential clerk to whom all the papers with the covering letters of authority, signed, as now, by the subordinate Heads of Branches were referred, and that clerk were to examine these papers and certify their correctness to the Under Secretary, the latter might then sign a schedule of the amounts to be sent either to the Audit Department for verification or to the Treasury for payment. In that way, instead of the documents being sent separately from the Heads of the different Branches, they would all be sent through the Under Secretary and the Auditor General, and the Treasury would have some satisfaction that they were properly authorized. I myself and some of the Examiners in the Audit Department have frequently doubted the correctness of these refund authorities.

996. But suppose that this confidential clerk were as clever a fellow as Harris, would it not be easy for him to deceive the Under Secretary? It is possible enough; but, as I said before, you must place confidence somewhere, and I fancy that would be an additional check for the Under Secretary.

997. Have you any idea of the gross amount of the refunds made last year on the authority of the Under Secretary for Lands and those acting on his behalf? I could not tell you; the totals are not yet made out for last year.

998. The amount could not have been far short of £100,000? I dare say not; the amount of refunds a year or two ago, to the best of my recollection, was £150,000, that is, all the refunds together.

999. Under the present system the authorities for the refund of lease rents are sent first to the Treasury? Yes, and on account of conditional purchases as well; they are all sent to the Treasury.

1000. So far as you know, is that necessary? I think not; it is right in principle, but I do not think it is the most convenient way.

1001. After that they are forwarded to the Audit Office? Yes, simply for verification of credits.

1002. Would it not answer the purpose quite as well to send them from the Lands Department direct to the Audit Office? I think it would be a great deal better; the more simple and direct the transactions are with the public the better and the safer in my opinion.

1003. Is the forfeiture of a lease ever revoked? I think so, in numbers of cases.

1004. Does that occur on the payment of rent or on other grounds? I could not tell you exactly.

1005. Will you look at that voucher—(handing paper to witness)—No. 25,539. What is the amount authorized there? £115 2s. 6d.

1006. If that authority had come before you personally for the purpose of being verified, would you have raised any objection to it? I do not think I should.

1007. It seems in perfect order in every way? Yes; it seems to bear the signature of "Charles Oliver, Under Secretary," and it gives a definite reason why the rent should be refunded.

1008. What is that reason? (Reads) That "there is no land available to satisfy the applicant's claim for the pre-lease."

1009. That is the only reason given? It continues, "The intended pre-lease being entirely cut off by water reserve No. 15 and land in the possession of J. Strickland and R. F. Horsley." They give a satisfactory reason why the money should be refunded.

1010. What is the date of that refund? The letter of authority is dated 20 September, 1880.

1011. How many years' rent are authorized to be refunded? Three years' rent.

1012. What are the three years? 1876, 1877, and 1878; the rents are paid in advance.

1013. Would it not have struck you as very remarkable that they should not have discovered this land to be unavailable until the year 1880? No; there are so many and such long delays in the Lands Department in dealing with these matters that it would not have struck me as anything remarkable.

1014. It would not have struck you as remarkable that it should take three years to discover whether the land was available or not? No, I do not think so. You have no conception of the confusion which existed in respect to these leases until we took the matter up, and compelled the Department to put them into something like order, and established a registration of our own. Therefore such a thing as that would not strike me as being extraordinary. People pay rent for years for lands to which they are not entitled.

1015. In verifying that the amounts are available for refund, do you find that they correspond with your books? Yes.

1016. Do you see any marginal reference in this voucher to the Gazette notice? Yes. "Forfeited—G.G., E. A. Rennie. 12th August, 1880."
1017. Being a forfeiture, is it not unusual to authorize the refund of three years' rent? No, it is often done; refunds are often made although leases are gazetted as forfeited; but at some time, sooner or later, an authority is issued to reverse the forfeiture, and sometimes—I saw a case not long ago—the forfeitures are reversed for the very purpose of making the refund.
1018. That I could understand, but in this case there is no revocation? No; we had not it on the date of verification. I see the date is 7th October, 1880.
1019. *Chairman.*] Is not the document itself regarded as a revocation? Yes, we should so consider it.
1020. *Mr. Thomson.*] What do you understand the forfeiture to apply to in the case of a lease? The man's right to the lease is taken from him, because by non-payment of rent he has failed to comply with the conditions.
1021. That is the only condition? I think that is the only condition on which a lease is forfeited; a man may not pay his rent for a variety of reasons.
1022. *Chairman.*] There may not be land available to satisfy the lease? There are many reasons—we do not know what is the reason for not paying the rent.
1023. *Mr. Thomson.*] You do not consider that that voucher was improperly passed by the officers in charge of the refunds in your Department? I have no reason to suppose so.
1024. Had they referred to the Government Gazette notice in the margin, would not that have made them stop the refund? I do not think so.
1025. *Chairman.*] It is not considered the duty of the Auditor General to go behind the authority contained in this form of refund? No.
1026. *Mr. Powell.*] Did I understand you to say that in cases of doubt or suspicion you have power to call for the papers? Certainly, and we do.
1027. Does not that in itself assume some check other than that we are now speaking of? To a certain extent it does.
1028. And is not that going behind the authority contained in that document? In any case, even if it had the Minister's authority, if we had any reason to suppose that that authority had been given under a misapprehension, we should take some means to satisfy ourselves that it was correctly given; but there are very special cases; as a rule, we should not go behind a document which had all the appearance of being an official and correct document.
1029. *Mr. Thomson.*] And you look upon that as a correct document, notwithstanding the marginal notes? Yes; I find from looking at our register, that the same lease referred to in the voucher No. 5,539 has been gazetted as forfeited a second time on a later date.
1030. Is it usual for a Ministerial Department to notify the discontinuance of an officer's services? No; the usual notice we get of the discontinuance is the appointment of his successor.
1031. But where an officer's services are dispensed with entirely, is it not usual to send you a notification to that effect? I do not think so.
1032. You would only become aware of it from the absence of his name in the Pay Abstract? Yes.
1033. Have all the advances made by the Under Secretary for Lands during the time Harris was Accountant been adjusted? I believe they have.
1034. You are perhaps aware that a number of frauds on the Treasury have been committed in respect to payments authorized to be made out of the vote for £1,000 passed in 1881, as compensation for land taken for road purposes? I understand that several of the frauds have been committed in that way.
1035. There is a voucher for £65, No. 15,252 (*handing paper to witness*),—Will you kindly look at it, and tell us if you see anything irregular about it? I cannot see anything that appears irregular about it. There is the authority, signed "Charles Oliver"; the reason for compensation is given, the clause of the Act under which it is to be made is quoted, and also the appropriation against which it is to be charged; there is also a reference to the papers on which that authority is founded.
1036. Is there anything on the document to show that it has undergone audit in your Department—does it bear the initials of any of your officers? I think the blue tick on the acquittance represents the initials of one of the examining clerks in the Expenditure Branch; that, in fact, would be the whole examination in so simple a voucher.
1037. I presume, however, the examining clerk would see that the authority of John Retalleck to pay the money to Joseph Sutton was genuine? He could not go beyond that document.
1038. The authority attached to the voucher would satisfy him? Yes.
1039. John Retalleck's signature is attested by one William Moore, J.P.? Yes. We do not pay any regard to that.
1040. You do not see that these signatures are genuine? No.
1041. It would involve too much labour? We could not do it; besides, how could we tell, unless we were acquainted with the signatures of all the persons who might witness such documents, J.P.'s and others?
1042. This document states that "where the signature is not known at the Treasury, the witness must be a Magistrate, Clergyman, or Clerk of Petty Sessions"? I may mention that we do not hold ourselves responsible for the correctness of the authorities from principals to agents.
1043. Do you consider that a duty which falls more particularly on the Paymaster at the Treasury? On the paying officer, whoever he is, whether in the Treasury or any other Department. We raised that question, and got the opinion of the Crown Solicitor on that point, and he was decidedly against our having that responsibility.
1044. Had not that opinion of the Crown Law Officers reference more particularly to the signatures of Bank Tellers? It was asked for upon that, but the question was widened so as to embrace all cases.
1045. Then, as a matter of fact, when you find an authority of this nature attached to a document you are satisfied with it? Yes; of course if there were anything to suggest a doubt we should examine and investigate it, but not otherwise. For example, the examiner might say, "This is not that man's signature—I know his signature well," but that would be a mere accident.
1046. There have been eleven payments made out of that vote of £1,000 for land taken for road purposes, ten of which are fraudulent charges—I suppose it was impossible for you to discover these frauds if they were like the document to which we have just been referring? I do not see how we could.
1047. *Chairman.*] I think I understood you to say that it was not the duty of the Audit Department to go behind the authority contained in these refund documents? No, as a rule. 1048.

1 Feb., 1882.

- E. A. Rennie. 1048. The Minister's authority is considered a sufficient authority for the refund of the amount? Yes.
1049. Over-riding any objection that may have been registered previously? Yes.
- 1 Feb., 1882. 1050. As a matter of practice, do you think it would be possible for the Audit Department to examine all the original papers in connection with the demands for refund without very serious delay and embarrassment? It could not be done without very serious delay, and it would involve so much extra labour, that with our present staff it would be impossible.
1051. And would not such a plan bring us into constant conflict with the Minister for Lands? I think so.
1052. Who would resent our interference? Most likely he would.
1053. Do you think that, as a substitute for such a plan, a schedule of refunds authorized by the Minister or Under Secretary for Lands, furnished periodically to the Audit Office, would form a sufficient check upon frauds of the description of those which we have now under consideration? The efficiency of such a check would of course depend upon actual experience, but I think it would interpose a considerable hindrance in the way of possible frauds such as this man Harris has been carrying on.
1054. Do you think that would be a better plan than furnishing the whole of the papers with the refund voucher for examination in the Audit Department? I think it would be better, and more in accordance with the principle that the responsibility of the authorities should rest with the Department issuing them, and that all proper steps should be taken by that Department to secure protection against fraud. It should not be imposed upon the Audit Office, the Treasury, or any other Department.
1055. Supposing the plan were approved, and all the original papers were sent with the refund voucher, upon whom would the responsibility of examining those papers rest? That would depend upon the office arrangements altogether. It might be the Auditor General himself, or it might be the Inspector of Accounts, or his assistant.
1056. Do you think I could undertake it? I do not see how you could.
1057. Do you think you could? I certainly could not.
1058. Do you think the head of the Revenue Branch could do it? No.
1059. Then the duty would devolve upon a junior clerk in the Revenue Branch? That would be the result of it.
1060. And do you think that would be a wise and proper arrangement? Certainly not; it would not carry out what is the presumed object of the plan.
1061. That being to advise or control the decision of the Minister in regard to refunds? Yes; and the junior clerk who would be entrusted with the examination of these papers might possibly be in collusion with an officer in the Lands or any other Department, and therefore there would be no check whatever.
1062. *Mr. Powell.*] As a matter of fact, if the original papers could be examined by the Audit Department, as has been suggested, would not that examination be a valuable check? It would be a valuable relief to the Minister for Lands, I dare say.
1063. But it would be a valuable check as far as the payment of the moneys was concerned? That would all depend upon experience.
1064. Then, without reference to detail, if the papers forwarded to the Audit Office disclosed the general assent of the Minister, and the initials of the Heads of the various Branches of the Department to repayments and allowances, would not the papers sent with the vouchers be a good general check? I apprehend that the object of sending these papers to us would be to let us see that the Minister, or Under Secretary for him, had distinctly approved of the refund. If that be the case, that approval might just as well be put on the document that is issued from the Lands Department and sent to the Treasury.
1065. And could be quite as easily forged? Quite as easily forged.
1066. But in the case of the papers being sent, the whole of them would have to be forged? Not necessarily, as in that case where the papers had been put by. In such a case a fraudulent clerk might invent a covering paper or schedule to accompany the papers to show the amounts to be refunded, and if he were clever enough to watch and intercept the return of the documents we would be no better off as regards a check than before.
1067. But would it not increase the liability to detection? It is possible.
1068. Do you think that if all the papers had been sent to the Audit Office, as suggested, the frauds committed by Harris would have been discovered? I see nothing that would have prevented him from sending all the papers on and perpetrating the very same frauds.
1069. *Mr. Thomson.*] How could that be, for first of all there would be the minute of the Surveyor General that the land was partially available, and then that of the Under Secretary, or the Head of the Branch, that a refund for a certain amount should be made—Would not all that tend to check attempts at fraud? Yes, but you are going back now to the preceding operations of the Lands Department, with which we have nothing to do.
1070. All these would be noted on the papers? What I mean is that you would be referring to us papers we should not need to see, because if we had the Minister's authority on the document for the refund of the money—that would be all we should require. Your last question implies that we should examine all that is done between the Lands Department and its subordinate branches, from which these papers have to come, which we could not do, and which would be beyond our province.
1071. *Chairman.*] You think it would be quite impracticable? Quite so.
1072. *Mr. Thomson.*] Then your evidence would lead the Board to understand that you consider the present system the only one which can be worked? I advocated that the authorities for refund should in every case be signed by the Under Secretary himself, or that he should sign a schedule of them, and that that schedule should be sent direct to the Auditor General, and from the Auditor General to the Treasury after verification of credits. Of course there would be some other details in connection with that scheme which might be mentioned, but that would be the leading feature; Mr. Oliver, taking the precaution before he signed such schedule to satisfy himself that the authorities were correct, the responsibility of sending on the vouchers to rest entirely with the Under Secretary.
1073. Is it right to take the authority of the Under Secretary for a refund, unless he has been directed by the Minister? That is implied, but I do not at all mean that the Under Secretary is to authorize them himself. And that reminds me that I understand a number of these refunds are made on the authority of Mr. Moriarty; I believe he authorizes refunds on conditional purchases without reference to the Minister at all, but this is probably done under some departmental regulation. I really think as these refunds are literally orders to pay money, that they should in every case be authorized by the  
Minister

Minister himself. Of course a large number of them would involve a great deal of signing, but I think the Minister's authority should in every case be obtained. E. A. Rennie.

1074. I think you said that by the examination of the original papers in your office you would be interfering to a certain extent with the action of the Minister, which he would be inclined to resent? If we questioned any part of his action he would resent our interference. 1 Feb., 1882.

1075. But if your examination of these papers was shown to be for the protection of the public revenue, the Minister surely would be rather obliged to you than otherwise? I have no doubt he would be.

1076. *Chairman.*] A system of that kind would be quite outside the true principles of audit, would it not? Yes, unless our audit was of an entirely different character. I may state, in reference to the authorities from principals to agents, that in my opinion the practice of paying agents should as far as possible be discontinued, and that the payments should, in every case where it was practicable be made to principals.

1077. *Mr. Thomson.*] Or to a Bank? Or to a Bank. There is far too much trafficking with these authorities, and it was partly our dissatisfaction at this system of paying agents and the great trouble it entailed which caused us to make the inquiry of the Law Officers of the Crown as to our responsibility. I would allow no payment to be made except to principals, if it could be avoided. That would be one effective way of defeating fraudulent schemes such as those which have recently been carried out.

1078. In that case you would deprive the agent of the commission to which he was entitled for working up the case to a certain point? He would get his commission in some other way. I have always advocated such a system—that all payments, except very special ones, should be made either to the principal or else to his account at a Bank, and the principal could then authorize any person he chose to draw against that account.

FRIDAY, 3 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Charles Whittell, in charge of the Revenue Branch of the Department of Audit, examined:—

1079. *Mr. Thomson.*] How long have you been in the Department of Audit? Since 1868. C. Whittell.

1080. And how long have you occupied the position you now hold? Twelve months.

1081. Were you in charge of any Branch prior to that? Yes; I was in charge of the Conditional Purchase Branch of the Audit Department. 3 Feb., 1882.

1082. That is a subordinate Branch of the Revenue Branch, is it not? Yes; it is something similar to the Conditional Purchase Branch in the Treasury.

1083. It is really part and parcel of the Branch of which you now have charge? Yes. I was also in charge of the Pre-emptive Lease Rentals.

1084. When you were in charge of the Pre-lease and the Conditional Purchase Branch, under whose control were you placed? Under Mr. Moppett, who was in charge of the Revenue Branch at that time.

1085. How many clerks are under your immediate control? Twelve at present.

1086. Do you consider that you have an efficient staff? Yes.

1087. What are your special duties? I receive and examine what are called No. 1 attested accounts furnished by land agents for sales held by public auction in the country, which show the deposits made at the time of sale, and the balances which are due thereon three months from the date of sale. In explanation of the balances that are payable, the land agents furnish at the same time what is called the form D, which contains in detail the particulars of the land put up for sale.

1088. You examine these yourself specially? Yes. In addition to the examination of these accounts; *i.e.*, seeing that the money is paid at the Treasury, that the certificates are properly attested before a Magistrate and signed by the land agent himself, and correcting every detail, I also receive what we call No. 2 attested accounts furnished by the land agents.

1089. You do not examine all the land agents' accounts yourself? No, not all.

1090. You divide the work among your clerks? Yes. I take No. 1 accounts myself, and Mr. Scrutton takes the attested conditional purchase accounts No. 3.

1091. You take those accounts because you consider them of more importance than any others? Yes, they are considered of more importance. There are other matters which I may perhaps mention. I take all the Clerks of Petty Sessions' attested accounts. They are furnished to us on two forms, one for fees and licenses, and the other for fines. These are examined in detail in the case of fines as to the correct appropriation of the fines, otherwise the same form of examination is followed as in the case of the No. 1 accounts.

1092. Do you mean to tell us that you actually examine these accounts in full detail yourself? No; I have an assistant.

1093. I wish to ascertain from you what your own special duties are? I do almost all the work myself connected with these accounts, except the verification of the receipt of the money at the Treasury.

1094. Then besides the performance of these detailed duties do you take the general superintendence of the Branch? Yes.

1095. You are responsible to the Auditor General for the correct working of the Branch? Yes.

1096. In the discharge of your duties you have to verify the amounts authorized by the Lands and other Departments to be refunded? Yes.

1097. Will you kindly inform the Board of the nature of the refunds authorized by the Lands Department? There are, to begin with the most important, the amounts paid at sales of land by auction in the country; they often refund the amounts paid on the land at the time; we call them refund "auction sales deposits." Then there are refunds of money paid on land selected after public auction; then there are pre-emptive lease rentals; also conditional purchase refunds—(there are several classes of these). There are deposits, balances, instalments, and interest, subdivision fees, stamp duties, and transfer fees; all these

- C. Whittell. these are in connection with conditional purchases. There are one or two others of minor importance, but the refunds connected with them are few and far between—not more than one in three months.
- 3 Feb., 1882. 1098. Have you not refunds also in connection with improved purchases? Yes, on improving purchases, but there are very few of them—very few indeed. There are other refunds connected with the land, *i.e.*, rents of pastoral runs and assessments.
1099. When a refund authority is referred to you what are you expected to do with it? We are expected to see that the amount is available so far as the extent of it is concerned, and that that sum has actually been credited to the Consolidated Revenue Fund. I may say that, with regard to the deposits on conditional purchases, we go a little further than that; we do not rest satisfied with seeing it credited to the Revenue, but we require to see that the money authorized is supported by a notice for refund by the Minister for Lands revoking the forfeiture.
1100. Is all that information not embodied in the refund authority itself? At the present time, according to the latest form, it is exhibited so far as the cancellation of the conditional purchase is concerned, but not so in the case of forfeitures, the Gazette being our guide in that case, *i.e.*, in the case of forfeitures and lapsed conditional purchases.
1101. It is no part of your duty to question the propriety of the proposed refund? Only, as I have stated, in regard to conditional purchases, that is to say, if they state that a deposit is to be refunded owing to the cancellation of the purchase, we decline to verify until we know that it is cancelled. To that extent we question the propriety of the refund.
1102. You must be satisfied that the cancellation has actually taken place before you verify? Yes.
1103. Then you are not satisfied with the intimation of that cancellation in the letter authorizing the refund? Yes; that information is conveyed to us at the same time that we get the authority for the refund.
1104. You only get one paper authorizing the refund? The same voucher gives the authority for the refund and the notice of cancellation. If we received an authority to refund a deposit, and the cancellation was not stated on any such form, we should not verify it.
1105. I understood you to say that you were not satisfied until you saw the cancellation or the forfeiture in the Gazette itself? With regard to the forfeitures only the Gazette is our guide; but with respect to the cancellation we require to have it notified on a cancellation form.
1106. And in cases of that kind do you always refer to the Gazette to satisfy yourself that the notice in the Gazette and the authority harmonize? The only notice of forfeiture we get is the notice in the Gazette; that is the basis of our authority for noting the forfeiture in the Register.
1107. You do that prior to the Lands Department informing you of the refund? Yes, we do.
1108. So that when a refund authority comes up, you have the whole information already noted in your Register? Yes, we have the information that the conditional purchase is forfeited, but we refuse to verify unless we get a notice revoking the forfeiture.
1109. In other cases you consider it only your duty to see that the money proposed to be refunded has reached the Treasury and has not previously been refunded? Yes, that is so.
1110. How are you enabled to satisfy yourselves on that point—as to the money being available and that no previous refund has been made? When the verification is made in the case of conditional purchases it is noted in the Register opposite each selection, and on presentation of the second or duplicate voucher a reference to the Register exhibits the previous entry. The same course is followed with regard to the pre-emptive lease rentals, that is, so far as regards guarding against a double refund or verification.
1111. Then you satisfy yourself also that the money has actually been paid into the Treasury? Yes; credited to the Consolidated Revenue Fund, or paid into the Trust Fund if it happened to be another class of refund.
1112. Have you ever had occasion to reject applications for refund? Yes, we have.
1113. On what ground did you reject them? With regard to forfeited conditional purchases it has happened that the voucher has reached us before we have had the Gazette notice; and in that case we return the refund voucher to the Lands Department, and point out that we have not seen the notice of forfeiture.
1114. Is that the only description of rejection that you have? Sometimes in other cases the amount cannot be traced as credited on the dates stated by the Lands Department; then we return it for explanation. In other cases the amount stated as credited is not correct. In other cases, as regards pre-emptive lease rents, the credit or receipt vouchers have not been received in the Audit Department. Those are four reasons that I can think of.
1115. I presume, however, that in all such cases the necessary information is furnished afterwards to enable you to pass the refund? Yes, the vouchers sometimes being altered in accordance with the query raised in returning the document to the Lands Department. We tell them sometimes the actual sum credited in cases of arrears in the Lands Department.
1116. That is, you give them a clue to find out their mistakes? Yes, in simple matters, such as when they say 30s. was credited on a certain date, and we say it was 32s. or 33s., as the case may be—in simple mistakes of that kind.
1117. Are your objections ever of such a nature as to upset the refund altogether? I think that has occurred once or twice, but very seldom; I cannot call to mind any particular case. I think there is a query of that kind now in the possession of the Lands Department unanswered relating to pre-emptive leases held by a person named Leeman; the voucher is not in the Audit Department, having been borrowed by the Lands Department.
1118. Was it borrowed officially? Yes, I think so, in connection with the present investigation; but I am not sure.
1119. That could not have been a voucher for payment? I think it was a query on a voucher for payment; a query from our office returning a voucher for payment that had been received for verification.
1120. Then the payment had never taken place? No.
1121. And if it was a rejected application, how is it that it was not returned to the Treasury with a memorandum explaining the cause of your objection? We send the query on the voucher to the Lands Department, not to the Treasury, because they keep no register there for the purpose of check.
1122. Is your query not written on the document itself? Not necessarily.
1123. You retain the document and send a separate query? No; the query is written on the ordinary query

query form, which is attached to the refund voucher, and that is sent to the Lands Department. We may write the query on the back of the refund voucher, but if there is insufficient room then the query form is used. C. Whittell.  
8 Feb., 1882.

1124. That being the case, how did it come about that a document of that nature was borrowed from your Department; it would appear as if you had been retaining it? I could not answer that question. I think I said before, that that was one of Harris' cases.

1125. Do you personally verify these proposed refunds, or do you trust to one of your clerks to perform that duty? I trust to one of the officers in the Branch to verify in some cases, that is, in the case of deposits on conditional purchases and other classes of conditional purchase refunds, and also pre-emptive lease rentals; the sales by auction and selections I verify myself.

1126. Do you initial the documents when you satisfy yourself that the amount authorized is available for refund? Yes, I initial every refund that goes out of the Branch, and that is a certificate that the amount is payable.

1127. What is done with the voucher afterwards? It is passed on to the Treasury after going through the intermediate stages; that is to say, it goes to the Inspector of Accounts in the Audit Department, thence to the Auditor General for his signature, and then on to the Treasury.

1128. Then the Auditor General signs it as correct, on the strength of your initials? Yes.

1129. Do you see these documents after the accounts have been paid? No.

1130. The examination of them after that belongs to another Branch of the Audit Department? Yes, the Expenditure Branch.

1131. When refunds are submitted to you, do you examine them critically in order to see whether they are genuine or not? Yes, we do.

1132. Who signs the authorities for the refund of lease rents? They are signed by the Head of the Pre-lease Branch, Mr. Curry, in the first instance.

1133. And who signs for refunds of conditional purchase money? They are signed by Mr. Blackman.

1134. Does he sign for the Under Secretary or for the Chief Commissioner? The Chief Commissioner.

1135. And who signs the authorities for other refunds in connection with the Lands Department? Mr. Blaxland signs for the Under Secretary as regards refunds on auction sales and selections.

1136. And who signs for improved purchases and provisional pre-emptive right leases? Those are signed by Mr. Blackman, as they relate to the Commissioner's business in connection with conditional purchases.

1137. Was the Audit Department duly apprised of the names of the different officers authorized to sign refund vouchers? I am not aware that any such authority has been received.

1138. Cannot you charge your memory with that—may it not have been before your time? It must have been a good many years ago then—I have never seen any such authority.

1139. Then I suppose the Under Secretary for Lands never furnished the Audit Department with specimens of these officers' signatures? Not that I am aware of.

1140. That being the case, you have no means of identification? None whatever.

1141. Do you not consider it of the utmost importance to satisfy yourself of the genuineness of these signatures? Yes, I do; although at the same time I cannot see that forgery would be detected by any special instructions as to the names of the officers who were authorized to sign.

1142. Not even by specimens of their signatures? No.

1143. If Mr. Blackman were to sign an authority for the refund of lease rents, and Mr. Curry one for a refund of conditional purchase money, would you consider yourself justified in passing them? I should conclude that those gentlemen had exchanged positions, for all I knew to the contrary, in the Lands Department.

1144. Would it not be desirable in such a case that an intimation of the change of positions should be sent to the Audit Department? Yes.

1145. If the Under Secretary for Lands were to sign authorities for refunds, which he had intimated to the Auditor General were to be signed by other officers whose names he had specified, would you pass such refunds without question? Certainly, I would pass them in the absence of any express statement by the Under Secretary that those officers were absolutely to sign for him, for the reason that the management of the whole Department is vested in him.

1146. Did you ever pass authorities so signed without first drawing the attention of either the Inspector of Accounts or the Auditor General to them? Yes, I believe some have been passed signed by the Under Secretary for Lands, but not many.

1147. Are those authorities generally drawn out by the officers who sign? Not generally. Sometimes in the case of Mr. Curry, of the Lease Rent Branch, they are made out by him personally, and at other times by his subordinates, and the same remark applies to Mr. Blaxland, of the Auction Sales Branch.

1148. Have you ever noticed how many officers' handwriting appears on these papers? I have never taken particular notice of the number—I have noticed several.

1149. Is the reason for the refund invariably given in the body of the refund authority? It is at present.

1150. You have no means of knowing whether it is a satisfactory reason or not? None whatever.

1151. You do not consider that a matter for you to trouble yourself about? No, it is not within my province.

1152. Was it always the practice of the Lands Department to state reasons for refund? Not always.

1153. Are those reasons useful in any way to the Audit Department? I think not, for the reason that we have no means of testing their truthfulness.

1154. Why then were they asked for, do you know? They were asked for because in one or two cases the circumstances under which it was sought to refund the amount appeared suspicious. If it should seem to the officer verifying that there were suspicious circumstances connected with a refund it would be pointed out to the Under Secretary for Lands, not otherwise.

1155. Such a thing as that does not often occur? Very seldom.

1156. Is that the only reason, do you think, why the Lands Department was asked to furnish particulars of the refund? That is what gave rise to the request, so far as I was concerned personally.

1157. Did that request originate with you? I forget now whether it originated with me or with the Inspector of Accounts; it may have arisen with me—I cannot remember; it was sometime in 1875 that

- C. Whittell. the letter was written to the Lands Department requesting them to give us the reason for the refund on the face of the voucher.
- 3 Feb., 1882. 1158. At that time I suppose the work of the Pre-lease Branch of the Lands Department was very much in arrear? Very much indeed—in a dreadful state of confusion.
1159. When you make a refund, do you note in your books why the refund was authorized in every case? No, we do not.
1160. Is your lease rent-book similar in form to the one which is kept in the Lease Branch of the Lands Department? It is somewhat similar.
1161. If the two were compared would they be found to agree in almost every particular, if correctly kept? They should do so as regards the registration of rentals.
1162. And also as regards the refunds? And also as regards the refunds.
1163. Where do you obtain particulars of the lease rents paid into the Treasury? From the land agents' vouchers to their remittances.
1164. Is that long after the money has reached the Treasury? Not long now; at one time it was two years before we got the vouchers.
1165. Do you know what was the cause of delay at that time? Mr. Brown had charge of the Pre-lease Branch.
1166. And he was not a very efficient officer? No, very inefficient. I may mention that there were a thousand queries from the Audit Office in his time unanswered.
1167. The business is managed more promptly now? Oh yes, since Mr. Brown's removal and Mr. Wilson's promotion to the position.
1168. Are there many arrears now—that is, are there many particulars respecting these lease rents which have not been supplied to the Audit Office by the Lands Department? I think not; the work is well up to date.
1169. Did you know Mr. Harris, the late Accountant in the Lands Department? Yes.
1170. Was he ever in your Branch of the Audit Department? Yes; he was my immediate assistant in the audit of the pre-emptive lease rentals.
1171. Did he hold the position next to you? No; he was my immediate assistant in that particular work.
1172. Then he had charge of the Lease Rent Register? Mr. Harris posted into the Register from the receipt vouchers, raised queries thereon occasionally, noted the verifications of the refunds in the Register.
1173. He had therefore an opportunity of acquiring a thorough knowledge of the whole routine of the Branch? Yes.
1174. More especially with reference to lease rents? Yes, a thorough knowledge.
1175. How long was he under your charge? About eighteen months.
1176. Was he an efficient clerk and a good penman? Yes; although as regards his efficiency I was somewhat deceived in that respect, for I found that he ticked off as posted some of the items on the lease rent vouchers and never entered them in the books.
1177. That was a serious oversight, if oversight it was? He did it to get a good name, as it would be said that he got through a great deal of work.
1178. I suppose he would be tripped up afterwards? Not at once, unless I followed his footsteps and checked each individual item.
1179. Seeing that he did not enter some of these items, do you not think he did it intentionally, looking at it in the light of what has since transpired? He may have done so.
1180. In that case your Lease Rent Register would be incomplete? Yes; it has since been rectified.
1181. *Mr. Powell.*] He simply scamped his work to get a good name? Yes.
1182. *Mr. Thomson.*] Did you ever notice that Harris varied his handwriting? I never noticed it.
1183. When did he leave your Branch to go to the Lands Department? I really cannot recollect.
1184. Do you know the reason of his transfer to that Department? Yes; a vacancy occurred in the Pre-emptive Lease Branch for which Mr. Harris applied, and to which he was promoted from the Audit Department.
1185. Was he in the Government Service before he entered the Audit Office? No.
1186. Do you know how he was previously engaged? I heard that he was engaged with Messrs. T. and W. Willis, but in what capacity I cannot say.
1187. Did you come much in contact with him after he was transferred to the Lease Branch of the Lands Department? Not very much.
1188. Was he in the habit of visiting the Audit Office after that? No, he would come occasionally.
1189. Did you ever see him in your Branch subsequent to that? Yes.
1190. Did he ever refer to any of your books, on the plea of wishing to obtain information which the books of the Lease Branch could not furnish? Yes, he has done so on several occasions.
1191. Did you allow him access to the books by himself? No; I used generally to see what he required.
1192. Was he in the Lease Branch of the Lands Department at that time? Yes, he was.
1193. Do you remember whether he ever visited your Branch during the time he was Accountant? Yes; but not on business, to my knowledge.
1194. You do not remember his looking up any of your books? No.
1195. You are aware that Harris committed forgeries in connection with the lease rent refunds? Yes.
1196. Have you seen any of these documents since they were discovered to be forgeries? I have seen one or two of them.
1197. Was it impossible for you or any of your staff to have detected those frauds? Yes.
1198. In what way was it impossible? It would have been impossible to ascertain whether the signatures of the authorized officer, Mr. Wilson, were genuine or not.
1199. Then you might often be imposed upon in a similar manner? Yes, certainly.
1200. Do you not consider it absolutely necessary that the public should be protected in some way from such frauds? Yes.
1201. Can you suggest any way by which that can be done? I would suggest that a disinterested gentleman should be appointed as an Inspector; that gentleman obtaining from each of the Heads of the different Branches in the Lands Department a list of the amounts to be paid—the Branches in question being the Auction Sales Branch, the Pre-emptive Lease Branch, the Conditional Sales Branch, and the Account Branch. The Inspector in question should prepare from these lists an abstract of the accounts which it was intended should be discharged, and hand that abstract personally to the Paymaster of the Treasury.
- He

He should also leave with the Auditor General a duplicate of the lists of accounts handed to him by the Heads of Branches in the Lands Department. C. Whittell,

1202. Would not that involve a great deal of time, labour, and inconvenience? I think not. I have suggested it with the view of not placing confidence directly in the Heads of the Branches of the Lands Department or their subordinates. I would also suggest that the Inspector, before handing in his lists of accounts to be paid, should satisfy himself of the truthfulness or otherwise of the claim for refund or actual payment—that is, that he should inspect the registers or papers in connection with the case, thus superintending or inspecting the work of the Lands Department, the Inspector standing in confidential relationship to the Under Secretary, for Lands. 8 Feb., 1882.

1203. If the original papers, that is the papers on which the authority for refund was noted, were forwarded to the Auditor General, would it increase the work of your Branch much if you had to compare them with the refund authority which would accompany them? It would involve very great labour indeed.

1204. In what way? The number of refunds being about 5,000 in the year, the perusal of 5,000 bundles of papers would be necessary, and sometimes these papers are so numerous that the packet is 6 inches thick.

1205. Would it occupy in your opinion the whole time of one clerk to perform this important duty? I believe it would fully. And an objection would be that the work might devolve upon a subordinate officer.

1206. Does it not devolve upon a subordinate officer now to pass the refunds without any papers? Yes, but in that case there is an after-check at the Treasury, so far as regards the amount of money only; but there would be no after-check in the case you suggest, so far as the reasons for the refund were concerned.

1207. Will you kindly explain what after-check there is now at the Treasury? I mean with regard to the amount verified for refund.

1208. But the same check which exists now would exist then so far as the Treasury is concerned? Perhaps you do not understand me exactly. At present the only check at the Treasury is as to the amount. An investigation of the papers implies a doubt as to the reasons assigned for the refund given on the face of the voucher, such as for instance declaring a conditional purchase void, or cancelling a conditional purchase, or the forfeiture of a conditional purchase, the cancellation of a pre-lease, and so on.

1209. That is not the object for which the papers would be sent to the Auditor General—the object should be to enable him to satisfy himself that the refund had been duly authorized, that is all? That is approved by the Minister.

1210. By the Minister or any officer authorized to act on his behalf? I do not think it would take long merely to see to that.

1211. Mr. Powell.] Simply to see that all the papers had been examined by the proper officer, and finally passed by the Minister? Yes; I was under the impression that it implied we should go through the papers to see the reason for the refund.

1212. Mr. Thomson.] No, that was never intended—that would go beyond the duty of the Audit Department altogether? That information is conveyed to us now.

1213. What you get now is only the authority for the refund—what you require to know is that the Minister had authorized the refund? Yes.

1214. Do not you think that although that would create an additional expense of £200 or £300 a year the duty should be performed, that is the examination of the original papers to the extent I have pointed out? Yes, I concur in that.

1215. Mr. Powell.] That is the examination of the papers, not with any responsibility on the part of the Audit Department as to the subject matter disclosed in the papers, but as proof that the refund has been duly authorized? Yes.

1216. Mr. Thomson.] If these refund authorities—I am referring now particularly to the Lease Branch—were taken out of books with butts, and the books when exhausted sent to the Audit Department for the purpose of having the butts—which should be initialled by the officer signing the authorities—compared with the books in your Branch, would not that be a very satisfactory check? I do not think that would be requisite, having previously ascertained by the perusal of the papers as suggested that the amount was authorized for refund by the Minister.

1217. I am referring to another mode of check irrespective of the examination of the papers. Supposing you did not examine the papers and this other mode were adopted, would not that be a better check than that which is now in existence, and an easier one? I think not.

1218. I think you told us that in the case of forfeited leases you had a notation in your Register made from the Gazette notice of leases forfeited? Yes.

1219. Will you look at that voucher, No. 25,559 (*handing paper to witness*)? Yes.

1220. Do you see noted in the margin that the leases are notified in the Gazette as forfeited? Yes.

1221. Before passing that refund would you have a notification in your Register that they had been forfeited? Yes.

1222. Then how did you come to pass that refund voucher? For the reason, first, that there was no necessity to question the reasons assigned for the refund; next, for the reason that it was not usual for the Department of Lands to furnish the Audit Office with a notice revoking a forfeiture as is done at the present time, unlike the conditional purchases, in respect of which we get notices revoking the forfeitures.

1223. You observe on this document that £30 are authorized to be refunded? Yes.

1224. And that this amount is stated to be for rent for the years 1876, 1877, and 1878? Yes.

1225. Did it not strike you as very remarkable, in the face of this notice of forfeiture in the margin, that these lease rents should be refunded? No, not in the light of the reasons assigned for the refund—that there is no available land; which clearly implies that the man never held the lease.

1226. But as there is no intimation that the forfeiture is revoked, did it not strike you as something out of the ordinary course? No, because it was not usual at that time to send such notices.

1227. Do they send them now? Yes.

1228. In the case of leases? Yes.

1229. When did that practice come into operation? I think from the date of Mr. Wilson's taking charge of the Pre-lease Branch.

1230. Do you know when he took charge? I could not tell you exactly when he was appointed.

- C. Whittell. 1231. This authority for the refund of £115 2s. 6d. is signed by Charles Oliver, *pro* Under Secretary. Did that not strike you as something remarkable? I cannot say I observed it at the time,—I am inclined to think he was Acting Under Secretary then.
- 3 Feb., 1882. 1232. But you admit that it was not usual for the Under Secretary to sign refund vouchers of this nature? It was not usual.
1233. These refunds being generally signed by the Head of the Pre-lease Branch? Yes.
1234. Did it never occur to you that you should have queried this document? No, for the reasons I have already given.
1235. Would you pass such a document now, knowing that Mr. Curry is authorized to sign these vouchers? No, not for that reason, but because we receive a notice now informing us that the forfeiture had been revoked with a view to refund the rent.
1236. This is not a fictitious case? No; the lessee actually paid the money.
1237. But the authority to refund is a forgery? It appears to be so.
1238. *Chairman.*] Did you accept this voucher as a revocation of the forfeiture? Yes; the reason assigned being, as I have said, that there was no available land, and as the man could not therefore possibly have held the lease he was entitled to the rent.
1239. The fact of the Under Secretary's signature being attached to this document caused no suspicion in your mind of anything being wrong? No, it would cause less suspicion than if it had been signed by the officer in charge of the Branch.
1240. Although the word "*pro*" appears before words "Under Secretary"? No; I believe the appointment was in suspension then, and Mr. Oliver was Acting Under Secretary.
1241. *Mr. Powell.*] I suppose from Harris' experience in your office he would know that these documents come up unaccompanied by any papers? Yes. At the present time the gentleman at the head of the Pre-lease Branch could do the same as Harris did, that is to say, he could fill up a blank form defining the reasons for a refund of money, and sign it for the Under Secretary as authorized, and the document would be accepted in good faith at the Audit Office from the very fact of Mr. Curry's signature being attached to the voucher, and it might be a forgery, or it might be falsely drawn up and duly and correctly signed by him.
1242. But a forgery of that kind could not be so easily carried out if the original papers had to be sent to the Auditor General? No.
1243. *Mr. Powell.*] Suppose such a document as that you have just spoken of could only be dealt with by you when accompanied by the papers, would not that be an additional check? Yes, it would be.
1244. *Chairman.*] From your experience in the Audit Department, do you think that with the assistance of one extra clerk you would be able to wade through the documents which would be sent in support of these several refund vouchers? Merely to look for the Minister's approval?
1245. Yes? In that case one clerk would be sufficient. It appears to me, however, that a subordinate officer in the Lands Department could easily insert the approval of the Minister when it had not been given.
1246. *Mr. Thomson.*] And forge his initials? Yes; there would be no guarantee against it.
1247. *Chairman.*] Would it be likely to involve serious delay in the verification of this refund? It would take some time to search for the Minister's initials of approval. I could not say how long, because I could not know whether the papers in each particular case would be voluminous or otherwise.
1248. Could you undertake to make the investigation before you initial the verification? I do not see that I could undertake that without neglecting important matters which at present I attend to personally, and which I should not care to have discharged by my subordinates.
1249. Do you think that if a schedule of all pre-leases authorized for refund were furnished periodically, say weekly or monthly, to the Audit Office, verified by the Under Secretary and then compared with your Register, that that would form a sufficient check against malpractices such as those we are investigating? I think that would be as likely to be effectual as the inspection of the original papers, in view of the fact that even the Minister's approval may be a forgery.
1250. *Mr. Powell.*] Might not the Under Secretary's signature be also a forgery? Yes, it is difficult to say where the check must be to guard against forgery.
1251. Would not a large number of papers be the best evidence that the claim was a straightforward one. If the papers, for instance, were 6 inches in thickness, as you say they are sometimes, would not a forgery be less possible in that case? The final result would be the same.
1252. Nevertheless the comparing of all these papers would make the ultimate effecting of the forgery more difficult? I cannot see it; it would be just as easy to forge the approval in one case as it would in the other.
1253. I think I am right in assuming that every claim would be based upon certain papers, and if they went through your hands you would very readily form an opinion as to their *bona fides*? Experience alone would teach that. I have never seen any papers.
1254. And the greater the number of papers, the greater would be the difficulty of dealing improperly with them? It would of course be more difficult to wade through the subject matter of the papers, but if an official in the Lands Department were to put a forged approval on them we might probably accept it in good faith.
1255. *Mr. Thomson.*] There would surely be some other decision on the papers by the Minister or his deputy besides the approval which might be forged? There would be the recommendation.
1256. *Chairman.*] You mean to say that audit is no security against forgery. No.
1257. Would there not be some risk in the transmission of these papers backwards and forwards between the two Departments? Yes; out of about 5,000 bundles I am afraid some of them would go astray.
1258. Is that not frequently found to be the case with other Departments? Yes.
1259. And there would be the probability that out of these original papers some important documents would get lost? I believe that would be the case. There is another thing I wish to say. The very importance of these papers would be the chief reason why they should not leave the Under Secretary for Lands and be trusted to a subordinate officer—such, for instance, as I should be.
1260. *Mr. Powell.*] Do I understand, then, that you have no faith in the Audit Department as an office for the reception of public documents? I might be removed and some one else might succeed me at any time, or the papers may be improperly taken by my subordinates.
1261. *Chairman.*] All I wanted to ascertain was whether, in your opinion, there would not be a risk of the papers going astray? There would. 1262.

1262. And you think the other scheme, of sending a schedule to the Audit Office, would be preferable to furnishing the original documents? I think, considering the importance of the papers and the liability to loss by theft or otherwise, as well as the probability of the Minister's approval being forged on the papers, that a schedule would be just as good. C. Whittell.  
3 Feb., 1882.

1263. *Mr. Powell.*] But supposing such schedule were prepared by a man of the Harris stamp, and the signature of the Under Secretary forged? Such a thing might happen. I was under the impression that the appointment of an Inspector such as I have suggested would be a protection to the Under Secretary and to the Government as well—a disinterested Inspector, under heavy bond. Such a system of inspection, I may point out, would be somewhat similar to the system adopted in connection with the Public Revenue Collectors' accounts.

1264. *Mr. Thomson.*] Would not such a system as you have propounded be far more expensive than the appointment of an additional clerk to examine these papers in the Audit Department? It would be a question of an additional appointment in either case.

1265. But the Inspector would cost more than the additional clerk? I should be inclined to think that an Inspector, although costing more, would be more reliable than a subordinate at a low salary, especially if such Inspector were under a heavy bond.

1266. Would the duties devolving on such Inspector not interfere very much with those of the officers of the Lands Department? He would merely superintend that particular branch of their business, and that alone—he would not interfere with any other business.

1267. To satisfy himself of the genuineness of these refunds, would it not be necessary for him to refer to the original papers? Yes; but in many cases a reference to the Lease Rent Register alone would be sufficient, because refunds of rents on pre-leases are very frequently made on increased or decreased areas of the pre-lease. In all such cases a reference to the Register only would be quite sufficient.

1268. But would it not be easy for the person who forged the authority to forge also an entry in the Pre-lease Register—would not one be as easily done as the other, and if so, where would be the check? The Inspector would detect a forgery in the Register.

1269. He could not do so unless he compared it with the original papers? No.

1270. *Mr. Powell.*] Would not such an officer be an Auditor in the Lands Department? Yes; but at the same time there would be nothing to prevent his being attached to either the Treasury or Audit staffs.

1271. *Chairman.*] Do you think it would be safe to entrust the inspection of these original papers to an ordinary clerk at £100 or £150 a year? No, I certainly do not.

1272. You think it would require a higher class officer to undertake such a duty? I think so.

1273. Would not there be the risk of conflicts between the Audit and the Lands Departments as to missing papers; would not the Lands Department say such and such a paper was sent to the Audit Office, while the Audit Office would be certain they had not received it; would not that from your experience be likely to result? Yes; it would be very difficult for us to say what papers we received for inspection.

1274. It would be necessary to send a schedule of the papers sent each time? Yes, and to check that schedule would involve a great deal of time.

MONDAY, 6 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, Esq., IN THE CHAIR.

Drummond Gilchrist, in charge of the Expenditure Branch of the Audit Department, examined:—

1275. *Chairman.*] You are in charge of the Expenditure Branch of the Department of Audit? Yes. D. Gilchrist.

1276. And all pay vouchers come within your cognizance, for examination in your Branch? Yes.

1277. *Mr. Thomson.*] You have been, I believe, for a number of years in the Audit Department? Yes, 6 Feb., 1882.  
twenty-four years within a few weeks.

1278. And your position there now is — ? Examiner of Expenditure Accounts.

1279. How long have you filled that office? Since 1st May, 1875, to the best of my recollection.

1280. You have only recently returned to duty after a somewhat lengthened leave of absence? Yes, I have been nine months away.

1281. When did your leave begin and end? It commenced on 6th April, 1881, and ended on 5th January last; I returned to duty on 3rd January.

1282. Who performed the duties of your office during your absence? Mr. Gregory and Mr. Freeman conjointly, Mr. Gregory in the main degree I believe.

1283. Did those two officers hold special charges during the time they performed your duty? Do you mean were they specially charged to undertake the duty?

1284. No, did they hold any special charges at the time—for instance, was Mr. Gregory head of the Account Branch during the time he was performing your duty? I think not.

1285. How many clerks have you under your control just now? Seven.

1286. Can you describe the duties of your Branch? All vouchers representing payments are subject to examination under various heads. In the first instance, as to the correct rate at which anything may be charged, and next as to computations, and as to acquittances, that is the primary part of the examination. Then as to correct and complete details of service on the voucher for which payment is made; next as to due disbursements under competent authority in accordance with section 15 of the Audit Act; next as to the prescribed service on the voucher; next as to rates and questions of registration of payments under contracts; then as to any special circumstances, or authority, or regulation not previously specified.

1287. And what are your own special duties? The subsequent examination of these vouchers by myself. Of course it is necessarily a somewhat cursory examination, but it embraces the main points, with the exception of rates and computations.

1288. You are, however, under the supervision of Mr. Rennie, the Inspector of Accounts? Oh, certainly.

- D. Gilchrist. 1289. Does he instruct you how your examination of the pay vouchers is to be conducted, or is that left to your own judgment? He frames the regulations; they were framed when I took charge, and they afford full guidance.
- 6 Feb., 1882.
1290. You conduct the duties of your office then, under printed instructions? The main points for examination are in the printed directions.
1291. Have you a copy of these printed instructions? No; I have quoted the main points for examination.
1292. Will you furnish a copy of them? Yes. (*Appendix K.*)
1293. Does your duty embrace a critical examination of the signatures attached to pay vouchers? In a measure. I generally, when I take up a voucher, examine the acquittance.
1294. Do you not look upon that as an important part of the audit of accounts? The acquittance, decidedly.
1295. Are not the signatures on pay vouchers invariably witnessed? No, not invariably, it is rather the exception than the rule.
1296. Was it not the practice at one time that all signatures on pay vouchers should be witnessed? Only in some instances.
1297. To what instances do you refer? Where payments are made by public officers to public officers, or persons employed by the Government.
1298. Is it not necessary in the case of pay abstracts for the payment of salaries? It is usually so with wages sheets, but not salaries.
1299. Is it not necessary in the case of payments by the Paymaster at the Treasury? I think not in all cases; the form of acquittance on the voucher makes no provision for a witness' signature.
1300. What is your opinion as to the witnessing of signatures? I do not think it is absolutely necessary in all cases; it is intended as a protection to the Paymaster or paying officer.
1301. Do you not think it a further guarantee as to the genuine character of the payment? I do not think it absolutely necessary; it might be a further proof of the actuality of the payment.
1302. Where authority is given by claimants to agents and others to receive payment, do you carefully examine such authorities to satisfy yourself that they are genuine? Oh yes; we keep a book of authorities—that is of persons authorized to receive money on behalf of others.
1303. You have not the signatures of the persons who gave these authorities? No, we have no signature book?
1304. Are you not aware that all such authorities must be attested by a Magistrate, a Clerk of Petty Sessions, or a Clergyman? No, not always; it is rarely done.
1305. Look at that form (*handing paper to witness*): do you see the notice at the bottom? Yes.
1306. Will you read it? (*Reads*)—"In all cases where the signature is not known at the Treasury, the witness must be a Magistrate, Clerk of Petty Sessions, or Clergyman." Yes, but these vouchers are of a special character for persons living at a distance. This is only the Treasury authority, but the claimant sends a further authority for a person to receive the money.
1307. Then you mean to say that authorities given for payment in Sydney do not require to be so witnessed? No, I think not; they may be witnessed—I am not quite certain. We receive forty or fifty orders from the Treasury at brief intervals, being general or standing authorities to persons to receive money for others, whether they are witnessed or not, I cannot say, and do not enquire; they are printed forms filled up for each individual case. The Treasury keep a register of these authorities, and when we receive them we also enter them in a register, and return them back to Treasury.
1308. What guarantee have you then of the genuineness of these authorities? They have always been accepted as *bona fide* authorities; we have never had any doubt about them, or any reason to doubt them. I do not think we ever had a case that turned out to be spurious.
1309. *Chairman.*] As a rule you do not make it an objection to the passing of a voucher that the space left for the witness to sign is not filled up? No, not for what we call daily payments at the Treasury.
1310. If the voucher is otherwise correct, that is not an objection to your passing it? No; the voucher being correct in other respects, we pass it.
1311. *Mr. Thomson.*] But if the Treasury were to take an improper authority, would it not be the duty of the Audit Office to discover that they had done so, if it were possible to discover it? If the Treasury accepted a spurious authority, of course we should receive it also—we should fall into the same blunder as the Treasury.
1312. Do you consider this a matter for the Treasury only to satisfy themselves? Yes, we presume that what satisfies the Treasury in that respect should satisfy us. If we doubt the genuineness of one of these orders, we might doubt them all. Even the claimant's signature might be forged, and the signature of a witness would be no security.
1313. Did it ever strike you that it would be better if you had the signatures of Magistrates, Clerks of Petty Sessions, and Clergymen in your office? No, I never knew it was required or deemed necessary.
1314. Would it increase the labour in your Branch much to compare occasionally the signatures of witnesses to such authorities? It would to some extent retard the examination—it is difficult to say how much.
1315. Would it not render the audit much more complete? Oh, it would be an additional safeguard if it were practicable, but I do not see that it is.
1316. For anything you know to the contrary, you may often have passed fictitious or forged claims against the Government? I think not, still it is possible.
1317. You really have not, under the present system, any guarantee that you have not been imposed upon? No.
1318. Have you heard of the frauds committed by Harris, the late Accountant in the Lands Department since your return? Yes.
1319. Are you aware that the greater number of these frauds passed through your Branch undetected, and that had it not been for some accidental circumstances they might have been going on still? Yes.
1320. You must then consider that a very unsatisfactory state of things, from your position as Head of the Branch? Well, the frauds were perpetrated in a manner that almost defied detection.
1321. Can you suggest any means of placing the audit which you conduct on a better footing, in view of what has taken place? In some respects the examination I think is perfect—that is to say, with regard to nineteen-twentieths of the payments; I do not see a weak place in it.

1322. Can you suggest anything with regard to the remaining twentieth part? Some of the payments are matters of refund of revenue or receipts which arise under various circumstances, and of which our office to a great degree could have no cognizance until the refunds were made. D. Gilchrist.  
6 Feb., 1882.

1323. You pass a very large number of refund vouchers every year in connection with land revenue? We do.

1324. Did it ever occur to you that the system was faulty? Well, as they were matters of revenue refund they passed through the Revenue Branch, and we verify most of them there; the refunds as a rule are not made before verification by the Audit Office.

1325. Seeing that verification takes place by the Revenue Branch of your Department, you are less careful perhaps with these than you would be with other payments? I was thoroughly satisfied when I saw that the money was available, and I felt no hesitation in passing them so far as that element of the voucher was concerned.

1326. Had you charge of the Revenue Branch at one time? No, I was in it.

1327. When in that Branch was it your duty to certify that the amounts authorized to be refunded had been credited to the Consolidated Revenue Fund? No, to the best of my recollection I left the Revenue Branch in 1867, and matters of refund of land revenue were not matters with which I had anything to do.

1328. Do you remember who had the passing of these vouchers at that time? I do not.

1329. Do you consider your assistants thoroughly competent for the duties they have to perform? I do.

1330. They must necessarily pass a large number of pay vouchers themselves? Not all of them—it rests with two or three; they are not all charged with the duty of verifying acquittances.

1331. Do you examine the vouchers that are sent to the Auditor General's Department in support of payments out of advances made by the Treasury? I do.

1332. Do you remember having examined the adjustments of petty cash vouchers belonging to the Lands Department? I do, very clearly.

1333. Did you discover anything wrong in connection with those vouchers? Very much, and very much that was unsatisfactory.

1334. Was that during Mr. Oliver's time or in Mr. Stephen's? In Mr. Stephen's time principally. I do not think we have had any objections to make since Mr. Oliver's time.

1335. Had you many surcharges made on the payments? Yes, or explanations required.

1336. And were the explanations satisfactory? In some measure they were; on the whole we were induced to accept them.

1337. *Chairman.*] Some very strong remonstrances were addressed to Mr. Stephen as to the way in which his adjustment of advances were made? Yes.

1338. We had on more than one occasion to get Executive authority to pass them? Yes.

1339. And in every case, from the explanations which were furnished, the Auditor General felt justified in passing the accounts? Yes.

1340. *Mr. Thomson.*] I think you were away on leave of absence in June, 1881? I was.

1341. Will you look at that voucher (*handing paper to witness*), No. 15,252? It seems perfectly right.

1342. Would you have passed that voucher? Yes, without hesitation. There is nothing defective in it; here is the authority; here is the notice from the Lands Department that the money should be refunded.

1343. Then it appears to you that the document is in perfect order? Yes.

1344. And you would have passed it without question? I should.

1345. It now turns out however that that is a forged authority? That the signature is forged.

1346. Yes, and we have nine other cases before us of a somewhat similar nature, all supposed to be forgeries? I am not very familiar with Mr. Oliver's signature; he was only recently appointed when I went Home, and I do not know whether, comparing it with other signatures, it would have excited my suspicions.

1347. As I said before, had it not been for accidental circumstances, Harris might have gone on to the present time forging in this way, and you would have gone on passing the vouchers? Yes, unless we noticed any peculiarity in the signature; and in the rapid way we have to pass these vouchers we can only take a cursory glance at the signatures—we cannot make a critical examination of them. Sometimes a man's signature will vary a little from various causes, and if we were to scrutinize every eccentricity in the signatures we might have nothing else to do.

1348. There is an authority attached to the voucher I handed you, for the payment of the amount of the claim to an agent, is there not? Yes, to one Joseph Sutton.

1349. And that authority is witnessed? Yes, by William Moore, J.P.

1350. Was it impossible for your Department to say whether that witness' signature was genuine or not? We have no register of the signatures of J.P.s.

1351. And you have no list of the names of Magistrates in your Department? No.

1352. And you did not consider it any part of your duty to see that that witness' signature was genuine, or that Mr. Moore was on the list of Magistrates? I have not considered it necessary to verify the signature of every witness who signs himself J.P., or of any witness.

1353. We have been informed that there is no Magistrate of that name in the Colony. Had you compared the list, which you might have kept in your office, with that authority the fraud would have been detected, would it not? It might if we had questioned the witness's signature, and found that there was no such J.P. on the list.

1354. Do you not think it would be advisable to do so in future? I think it would, but it forms no part of our duty.

1355. *Mr. Powell.*] Do I understand you that you would pass this voucher simply as it is, and require no other authority? That would be to me indubitable proof of the genuineness of the claim.

1356. The single signature of the Under Secretary for Lands? Yes.

1357. These documents authorizing payments require that where the signature is not known at the Treasury the witness must be a Magistrate, Clergyman, or Clerk of Petty Sessions. Have you a record in your office of all the Clergymen in the Colony? I do not think we have, unless in the Blue Book, and then only those in receipt of State aid.

1358. Those are very few. Have you any means of identifying the signatures of Clergymen or Magistrates? No.

- D. Gilchrist. 1359. But does not this document throw upon the witness the identification of the person signing the order? It would simply require some identification.
- 6 Feb., 1882. 1360. Does it not say so in express words? Yes.
1361. Then would you pass such a document without the signature of a witness? Not without a witness, but I should take the signature of the witness to be genuine.
1362. *Chairman.*] Do you as a rule regard these authorities as part of the necessary audit of the vouchers to which they are attached? Yes, in part, as a corollary to the examination. This notice from the Department of Lands would be indubitable proof of the validity of the claim; the order to receive is subsidiary.
1363. I apprehend that the notice from the Lands Department and the receipt for the amount at the Treasury are quite sufficient evidence of the *bona fides* of the transaction? Quite sufficient evidence.
1364. Without the authority to receive? Yes; the authority to receive is only between the Treasury and the claimant.
1365. It is more a Treasury matter than a matter of audit? Yes.
1366. I suppose there would be a certain amount of correspondence in relation to this claim before it took the shape of an application for refund? There must be, but that is a matter for the Lands Department.
1367. *Mr. Powell.*] Would it not be an additional check if all the papers connected with it accompanied this requisition for payment? Certainly it would—it would add further support to the payment.
1368. That is to say, those papers would support the signature of the Under Secretary, by showing all the steps leading to it? Certainly it would be an additional support.
1369. *Mr. Thomson.*] Were you acquainted with Mr. Harris? Yes, I have spoken to him.
1370. Was he under you at one time? No, never.
1371. So that you really know very little about him? Very little.

---

William Wilberforce Stephen, Secretary to the Attorney General, and formerly Under Secretary for Lands, examined:—

- W. W. Stephen. 1372. *Chairman.*] The Board are inquiring into some of the irregularities which have been discovered in connection with the Lands Department. Some of them appear to go back to the time when you held office as Under Secretary. Here is a pay voucher, No. 21,930, for a refund of revenue for the sum of £59 2s. 5d. Will you be kind enough to look at the signature and say whether it is yours or not? (*Examining voucher through magnifying glass.*) No, it could not be my signature, though it is very like it. Even if I were not quite sure of it, otherwise I should know it was not mine by the word *pro* before Under Secretary, which if I had signed the voucher I should have been certain to scratch out. I was Under Secretary at the time, and I could not have signed "*pro* Under Secretary."
- 6 Feb., 1882. 1373. Were you in the habit of using a stamp for your signature to documents of this kind? To the best of my recollection I did occasionally, often in fact I may say. I think I used the stamp until the Treasury objected to it, and then I left it off. I cannot say how long that was. I do not think I used a stamp for documents of that kind at the date this voucher was signed.
1374. This voucher is dated 4th August, 1880? That was two or three months before I left. I do not think I ever used a stamp for documents connected with money at that time.
1375. Was the stamp kept in your own custody or that of any officer in the Department? It was kept in my room in a small box, and Mr. Newman, who acted as a sort of private clerk to me, kept the key.
1376. And was he authorized to use that stamp? Yes.
1377. In your presence? Yes.
1378. Was he authorized to use it whether you were present or absent? I do not think it was ever used when I was absent; but I might have been called out of the room to see the Minister and left Mr. Newman stamping, and have been absent for perhaps half-an-hour.
1379. Will you inform us whether it was the practice in your time for the heads of the different Branches to sign refund papers for you? There was no fixed rule about it, but I know they used to sign occasionally if I was away for instance. But I think, speaking from recollection, that with regard to lease refund vouchers, when Mr. Wilson was appointed ead of the Pre-lease Branch it was arranged that he should sign as Head of the Branch.
1380. Without reference to you? Without reference to me.
1381. Was Mr. Wilson acting as Head of the Pre-lease Branch when you left? Yes.
1382. Who was in that office before him? Mr. Charles Brown.
1383. Was he an efficient officer? Not of late years, he used to be an efficient clerk, but he was in bad health during the last year or two and was not so efficient as formerly.
1384. Did you commit to him the same authority which you did to Mr. Wilson to sign for you? No, I do not recollect that he ever had any authority.
1385. Did it ever strike you that the system of refunding amounts was somewhat loose? It occurred to me once or twice that a better system might be adopted, but the system was one which had been in use in my predecessor's time, and I did not find much time to give attention to the subject.
1386. The pressure upon your time was so great that you had not leisure to look into these matters? Yes; I thought the system served well enough, but there might have been an improvement; and having thorough confidence in the officers who were entrusted with the duty, I never carried out any radical change. In fact upon the appointment of an Accountant specially to relieve me of matters of detail in connection with accounts, which I always considered foreign to my proper duties as Under Secretary for Lands, I looked to him to submit any changes or improvements which might appear desirable.
1387. Do you think it would be practicable or desirable that the papers which are the foundation of these claims for refund—the original documents—should leave the Lands Department and be sent to the Audit Office for examination? It would be a great safeguard certainly, but I think it would cause a great deal of extra trouble.
1388. Would it not be attended with the risk of losing some of the papers in their transit to and fro? Yes.

W. W.  
Stephen.

6 Feb., 1882.

1389. But you think it would be a great safeguard against frauds of the kind we are now investigating? Yes, I think certainly it would be a safeguard, because you would have an opportunity of seeing the approval of the Minister and the signature of the applicant as well; but sometimes these refunds are made not, upon the application of the individual, but by order of the Lands Department, without any communication with the lessee.

1390. Do you remember a man named Harris being employed in the Lands Department? Yes, shortly before I left.

1391. Was he an active and intelligent clerk? I always thought he was very quick from what I saw of his work; he was recommended to me as a good man, quick at figures, and I took him—of course with the sanction of the Minister.

1392. Had you any reason to suspect his honesty? Not the least.

1393. It was not until you left the Lands Department that he was promoted to the office of Accountant? No; it was after I left.

1394. *Mr. Thomson.*] Mr. Brown was in charge of the Pre-lease Branch in July, 1879? Yes, he must have been, about that time.

1395. And do you not think you gave him authority to sign refund vouchers on your behalf? I really do not recollect giving him such authority; if so it was given in writing; I should not have given him a verbal authority.

1396. And would you have intimated that authority to the Treasury? I think so; I distinctly recollect notifying a similar authority with regard to the clerk in charge of the Auction Branch, and therefore I think if I had given the same authority to the clerk in charge of the Pre-lease Branch I should have done the same, but I do not recollect it.

1397. Would you have notified that authority to the Auditor General as well? I think, if I recollect right, we informed the Treasury, but not the Auditor General.

1398. Would you know Mr. Brown's signature again if you saw it? I think I should.

1399. Will you look at that voucher (*handing paper to witness*), No. 18,339. Is that signature Mr. Brown's? I think it is (*examining signature through magnifying glass*); at any rate it is very like it.

1400. Would you have passed it as his signature? Yes, I should have passed it; the surname looks a little cramped, but the "Charles A." is exactly like.

1401. Is the authority in other respects a complete authority? Yes, it seems quite complete.

1402. Do you think it is likely that if Mr. Brown had not been authorized to sign authorities on your behalf in 1879 Harris would have attempted to forge his name? The inference from his forging Brown's name is of course that there was such an authority.

1403. That is, that the Treasury would never have passed authorities of this kind unless they had been apprised that Mr. Brown was authorized to sign them? Unless they had understood that it was the practice. The Lands Department is so large that heads of Branches have larger powers of signing than they have in other Departments.

1404. Do you not think that a system which admits of so many officers in the same Department signing on behalf of the Under Secretary for the refunding of public money is a very bad one? I think it should be avoided if possible—I think it is a bad one.

1405. *Chairman.*] It opens the door to the possibility of fraud? Yes; but I always looked upon the Lands Department as an exceptional Department, simply on account of its magnitude and the number of documents that have to be signed; and that when the Minister or Under Secretary had given the authority for a refund, the Heads of Branches would then complete the action by having the vouchers made out and signing them.

1406. *Mr. Thomson.*] Would be impossible for the Under Secretary to sign all these refund vouchers in addition to his other duties? It would not be impossible, but it would very often delay them, I think, and all matters connected with money should be attended to as quickly as possible.

1407. Is it the practice of the Under Secretary to authorize these refunds on behalf of the Minister, or does the Minister do that himself? As a general rule the Minister does it, but the Under Secretary has done it at times when it was a case in which it was palpable that the refund ought to be made, in order not to trouble the Minister.

1408. *Chairman.*] That was done with the sanction of the Minister? With the sanction of the Minister. In the large majority of cases the Minister used to give the authority himself.

1409. Are you aware how many refunds were made during the year 1880, the last year I think in which you occupied the position of Under Secretary? I could not say.

1410. I suppose there was always great pressure put upon the Department in the case of these refunds by the claimants to get their money? No, no very great pressure; in some cases they would be rather clamorous for their money.

1411. Were the agents clamorous on their behalf? Yes, sometimes.

1412. *Mr. Thomson.*] Before you signed these refund authorities, what evidence did you require that they were genuine? They used to be initialled by the head of the Branch. Sometimes these papers were brought to me personally by the head of the Branch, and in that case they might not be initialled, as I should take it as a fact from his bringing them to me that they were genuine.

1413. When you had given authority to the Head of a Branch to sign on your behalf, would you consider it right to sign authorities yourself after that? Yes, it might be necessary sometimes.

1414. In what way? The head of the Branch might be away.

1415. It would only be under such circumstances that you would sign them? There might be some speciality about a voucher which would make it desirable to do so at any time. I recollect saying frequently in such cases—"Bring that voucher back to me, and I will sign it myself." Perhaps it was a larger amount than usual, or there was some other reason.

1416. Would not such a practice as that tend to mislead the Treasury? I do not think it should. Giving authority to the head of a Branch to sign for me did not mean that he was invariably and without exception to sign, but whenever he was required to do so.

1417. Are you acquainted with Mr. Wilson's signature? Yes.

1418. Will you look at the signature on this voucher (*handing paper to witness*), No. 40,999—Do you think that is his signature? I am really puzzled to answer; it seems to be a little too large; it is only the knowledge of the forgeries that have been committed that causes any doubt in my mind about it; but if any one had come to me and showed me the paper, I should have said at once, "That is Wilson's signature." Looking at it critically now, it seems to be slightly larger.

- W. W. Stephen.  
6 Feb., 1882.
1419. In other respects the authority would be considered genuine? Yes.
1420. The reason given for the refund is such a reason as would be passed by the Audit Office? Yes, I should think so.
1421. In some cases, I suppose, the original papers in connection with these refunds are few in number? Yes, very often.
1422. If these documents were sent to the Auditor General to prove the genuineness of the refund, do you think that would entail upon the Audit Office much additional labour? It would entail a little additional labour at both ends, as it would be necessary for the Lands Department to keep a list of the papers sent, so as to be sure they were returned, and the Audit Office, I imagine, would also have to keep a list and to note when they were returned, for their own protection.
1423. Are the notations on the original papers of such a nature that the Auditor General would have no difficulty in ascertaining the amount to be refunded? They would always show it; but in some cases where a refund was authorized, it is left to the clerk in the Lease Branch; but then it would be in the papers.
1424. It would always appear on the papers? I think so, in almost every case.
1425. Are you not of opinion that such a system would be a protection to the Revenue? Yes, I think it would, to a great extent.
1426. *Chairman.*] Will you look at this pay voucher (*handing paper to witness*) for a refund of revenue to Mr. James Pile, on the 28th April, 1879, for the large sum of £5,572 15s., signed "Charles Oliver, for the Under Secretary." Do not you think that a refund of such magnitude ought to be signed by the Under Secretary himself? Yes, I cannot see how that could have been signed by Mr. Oliver. If I had known that such an amount was to be passed through I should have signed the letter myself.
1427. What position did Mr. Oliver hold in the Lands Department on that date? He was Inspector of Land Offices, but when he was not on duty inspecting land offices he used to assist in the head office.
1428. And was he authorized to sign vouchers for you? I do not recollect giving him any authority to do so. He was at one time, by-the-by, when he was inquiring into the working of the Auction Sales Branch, in charge of that Branch, and it might have been then that he signed that letter, but I cannot recollect it after this lapse of time.
1429. Here is another voucher, No. 13,178, for the payment of a refund to Mr. James Dickson of £3,532 3s. 9d., signed by H. C. Edwards, for the Under Secretary. Was Mr. Edwards at that time authorized to sign for such large sums? Mr. Edwards, to the best of my recollection, had a written authority to sign for me; but I do not think it was given to him with the idea that he was to sign for such large sums.
1430. What position did he hold in the Lands Department? He was clerk in charge of the Auction Branch, and this is an auction case.
1431. Here is a third voucher, No. 22,642, dated in August, 1880, signed by John J. Blaxland, in favour of Messrs. Finlay, Allan, and Campbell, for £1,842 18s. 5d.—Would he be justified in signing that voucher for you? I do not believe I was in the office when that was signed, to the best of my recollection.
1432. But you think the Under Secretary should sign papers of this important character for large refunds, and not leave them to his subordinates? Yes. I wish to correct an answer that I made to a question put by Mr. Thomson. I said I thought every original paper showed upon the face of it the exact amount to be refunded; but I think, on further consideration of the matter, that very often the exact amount was not shown on the paper, that being a matter of calculation after it was decided that a refund should be made.
1433. *Mr. Powell.*] But speaking generally, the history of the refund would be disclosed by the papers? Yes.

Charles Whittell, in charge of Revenue Branch, Department of Audit, further examined:—

- C. Whittell.  
6 Feb., 1882.
1434. *Chairman.*] The Board understand that you wish to bring before them some three or four vouchers for land revenue refunds which you had not an opportunity of submitting to them on the occasion of your last examination? Yes. (*Appendix L.*)
1435. Will you produce those vouchers and give the Board any information in connection with them which may strike you as being of importance to this inquiry—I think it was the large amount authorized to be refunded in each case which struck you as being very carelessly authenticated? Yes, insufficiently authenticated.
1436. What is the first voucher that you wish to submit? It is one for £5,572 15s. It struck me in that case that the Government were not sufficiently protected as to an improper refund of that amount.
1437. Why so? The reasons assigned may or may not be true, and although untrue could be indorsed by the officer verifying in the Audit Department, the amount in that case being refunded as usual.
1438. You think that the refund voucher should be authenticated by the signature of the Under Secretary, the amount being so large? Yes, other than the signature "Charles Oliver, *pro* Under Secretary." The Harris defalcations have shown that this is not sufficient protection, and I should have a want of faith in it, Mr. Oliver's name having been so frequently forged. The gentleman from whom these refund forms issue could fill up a form like this and sign it for the Under Secretary *by his own authority*—I do not see what is to prevent him. In that way the money could be obtained from the Government improperly.
1439. What protection would you propose against a fraudulent claim of that kind? In my evidence on Friday last I alluded to the appointment of an Inspector. That gentleman would be a protection against frauds of this description.
1440. You think that the appointment of an Inspector in the Lands Department would be a sufficient protection against frauds like those which have been lately discovered? Yes, because that gentleman would examine the papers and refer to the books before furnishing a certificate to the Minister of the amount to be paid.
1441. There are three other vouchers before you for the refund of large sums of money. Would the reasons you have given apply equally in each of those cases? Yes, and I see in each of these cases that the vouchers are actually signed by Mr. Blaxland for the Under Secretary.
1442. What position does that gentleman hold in the Lands Department? He is head of the Auction Sales Branch.

1443. What amounts do these vouchers represent? £2,984 11s. 6d., £1,842 18s. 5d., and £3,532 3s. 9d. I would like to point out that it appears to me possible for purchasers of land by public auction to obtain the land and the purchase money thereon, together with their deeds; that is to say, if the officer in charge of the Auction Sales Branch were to fill in a refund form for the balances of any particular lots of land put up for sale they would be refunded, the purchaser in the meantime having obtained his deeds. C. Whittell.  
6 Feb., 1882.
1444. *Mr. Thomson.*] That would be a very serious case? It could easily be done.
1445. Was it ever done, so far as you know? It was never done, but there is the danger, a man could get his deeds, get his money, and get his land for nothing.
1446. In the case of the refund of £5,572 15s. authorized to be paid to James Pile, you found that the amount had actually been credited to the Consolidated Revenue Fund? Yes.
1447. And the reason given in the authority for refunding that amount is that the land was found to be part of the travelling stock reserve No. 355? Yes.
1448. When you passed this authority did you consider it was perfect? I did not consider at all the reason assigned.
1449. No doubt arose in your mind? No, and half a dozen similar cases might arise at any time, making (say) £30,000 in all.
1450. But now, in view of what has occurred, you think it necessary that a refund authority of this kind should be better authenticated? I think so.
1451. Supposing the original papers were sent up to you with an authority of this kind, would they enable you to satisfy yourself that the refund was a genuine one? A perusal of those papers would enable me to see whether the statements were true or otherwise on that voucher, that is, I should discover whether the land was in the travelling stock reserve.
1452. And that would be a more satisfactory check than the present system? It would be much better; but that, as I have already stated, is the business of the Lands Department.
1453. But still, if there is a doubt in the mind of the person who passes the voucher in the Audit Office, is it not desirable that he should be supported by the original papers? Yes, but no doubt would arise in the case in question.
1454. In the case of the voucher No. 26,200 authorizing the refund of £2,984 11s. 6d., the amount of a double payment—you could have no objection to pass that on the authority submitted? No, provided the money was doubly credited at the Treasury.
1455. What was your object in submitting to the Board a case of this kind? My object was this,—that it may have happened no double payments took place, notwithstanding which the amount could be verified by the Auditor General and paid; there is thus no protection to the Government.
1456. The money having been twice paid into the Treasury, was it not necessary that it should be repaid once? Yes, the refund; but what I wish to point out is that it can be stated on that document that a double payment has been made by the purchaser when such was probably not the case.
1457. But you have the means of proving whether a double payment to the Treasury has been made or not—it is your duty to verify it? Yes; but if it is stated on that voucher that a double payment has been made, and I indorse it, the money would be paid.
1458. The fault would be yours then? Yes, originating with the Lands Department, and indorsed by me.
1459. What you mean to imply is that there might be collusion between you and the officer authorizing the refund in the Lands Department? Yes, to an unlimited extent; the refunds on account of auction sales being very heavy, the amounts would not excite suspicion. In other cases it would be different; the refund of large amounts on account of conditional purchases, pre-emptive leases, &c., would be suspicious; but that would not be the case with regard to auction sales.
1460. Would the mere fact of the authority being signed by the Under Secretary for Lands himself be a sufficient protection against any collusion of that kind? I think not, in view of its being probably a forgery.
1461. Then what check would you propose to adopt? An inspection or superintendence over the Branch from which it emanates—that is, by the appointment of a confidential Inspector (acting for the Under Secretary for Lands) under a very heavy bond.
1462. Would not that Inspector require to satisfy himself by inspecting the original papers in the Lands Department? Yes.
1463. If those original papers were forwarded to the Auditor General, would not the check he would be able to establish be as satisfactory as if performed by an officer in the Lands Department itself? I doubt very much whether an officer in the Audit Department could really decide in some cases as to whether the money ought to be refunded or not. The reasons assigned for the refund go into matters of the Survey Department—that is, survey measurement. One thing leads to another, and the further you go back the more the special knowledge requisite.
1464. But should there not be Ministerial authority on these papers to settle that question at once without going so far back? Yes, if the Ministerial approval can be taken as a safe guide.
1465. The plan you propose, as I understand it, is the appointment of an Inspector in the Lands Department who would furnish a certificate that would be satisfactory to the Audit Department? As I stated in my last evidence, I suggested that the Inspector should obtain from the heads of Branches in the Lands Department lists of the amounts which they stated were to be paid, it being optional for the Inspector (otherwise the Minister) to decide what amounts should actually be paid, so that the heads of the Branches would be kept ignorant both as to the amounts and times of payment of the accounts, or whether such payments would actually take place. Duplicates of those lists to be sent to the Auditor General for comparison with the vouchers or accounts on payment thereof or subsequent to verification—that is to say, an audit before and an audit after. At present there is no after audit and no real check on the amount before payment, *i.e.*, no check against falsification of the Auditor General's certificate.

WEDNESDAY, 8 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Richard Augustus Cantor, Examiner in the Treasury, examined:—

- R. A. Cantor. 1466. *Chairman.*] Do all the accounts that come into the Treasury for payment pass through your hands?  
All of them.
- 8 Feb., 1882. 1467. How far does your examination of those accounts extend? They do not come to me for payment until they are completed.
1468. Does your examination extend to computations, castings, rates, and all those particulars which form the after examination in the Audit Office? No; the voucher is supposed to be perfect when it comes to me, ready for payment in fact.
1469. Then if at a glance you see that it is in its perfect state, you pass it on? I pass it on for payment.
1470. You could not, in fact, minutely and in detail examine every voucher that goes through your hands? No, the vouchers are countless in number.
1471. How many do you suppose pass through your hands in the course of a day? I could not say.
1472. They keep you pretty well at work all day? Yes, especially when there are vouchers of a particular nature upon which I have to use my own discretion, such as the distribution of moneys for Municipalities, Schools of Art and Hospitals. There is no one to question the payment of these but myself.
1473. To whom do you pass them? I pass them on to the Account Branch, to be charged against the various votes, and then they are sent from the Account Branch to the Paymaster.
1474. Is it part of your duty to examine the authorities to receive money which accompany many of the accounts? No, I have nothing to do with the authorities for the payment of money; the receipt of money lies with Mr. Newcombe—he receives all money.
1475. Have you any list in the Treasury of the Magistrates, Clergymen, and others who are authorized to authenticate? I have no list.
1476. It is not part of your duty to see that the signatures are genuine? No.
1477. Do any of the vouchers for the refund of pre-lease payments come under your notice? Yes, they all come under my notice.
1478. Have you in the course of your examinations had reason to suppose that any trickery has taken place with any of them? None whatever.
1479. On looking at the signatures you have passed them as genuine? Yes. They are first signed, then they are sent on to the Audit Office and verified, and when they come back to me the vouchers are simply perfect; I have nothing to do but to pass them on.
1480. *Mr. Thomson.*] They are perfect so far as you know? So far as I know; the only thing I have to look to is that the amount ordered to be refunded and the amount verified by the Auditor General agree.
1481. *Chairman.*] Have you any assistants? I have.
1482. How many? Two.
1483. Acting of course under your instructions? Yes, under my instructions.
1484. *Mr. Thomson.*] How long have you occupied the position of Examiner in the Treasury? Since 1878, I believe.
1485. I think you said that when vouchers were submitted to you to be passed they were generally in a perfect condition? If they are not I have to take care that they are in a perfect condition.
1486. I presume that all claims submitted for payment are certified or authorized by some Ministerial Department? Always.
1487. You have, however, frequently to disallow claims on account of the authorities not being considered by you satisfactory? I have frequently.
1488. Will you explain to the Board the nature of some of these objections? Sometimes I question whether they should be submitted for the Minister's special approval as to the refund of the money.
1489. That is where the approval has been given by the Under Secretary for instance? Or the officer appointed to sign.
1490. The payments authorized may be of so much importance that you consider it necessary to have Ministerial authority? Yes, I often submit them to the Minister for his special approval.
1491. In some cases where the authority is genuine, but not quite satisfactory, you submit them for the decision of the Treasurer as to whether they should be passed? I do, very often.
1492. Your examination being of a general character only, do you hold yourself responsible for errors in quantities or calculations, or anything of that kind? No; I hold the Head of the Department responsible from which the vouchers issue.
1493. These are detail duties which properly belong to the Audit Department? As to computations, dates, and so forth, we rely upon the Audit Office. In many cases where the sums are extensive, I have the computations examined in my Branch.
1494. Do either of your assistants pass claims without your personal supervision? Yes, the Assistant Examiner, Mr. Napier.
1495. And in the case of salaries you register the amounts passed on to the Paymaster for liquidation? Yes, I always examine them by my register to see that they agree.
1496. Having first satisfied yourself that all the abstracts are duly certified by the officers authorized to certify? By the Head of the Department; they must always be signed.
1497. In the case of revenue authorized to be refunded, what is the nature of the authority you require? If it be in the Lands Department then the Under Secretary for Lands, or if in the Department of Mines the Under Secretary for Mines; they sign under the direction of the Minister.
1498. Having that, you are always satisfied of the genuineness of the authority? Perfectly; before it comes to me it goes to the Auditor General, unless it is a direct payment from Revenue.
1499. In addition to the authority of the Minister in a case of refund, you require the certificate of the Auditor General that the amount is available for refund? Yes, that the amount has been credited to Revenue.

1500. Do you consider it part of your duty to satisfy yourself of the genuineness of signatures? I never had occasion to doubt a signature until these irregularities in the Lands Department took place. R. A. Cantor.
1501. Then for anything you know, or anything you might do to prevent it, fictitious claims might often be passed by you? They might be. In the case of Customs refunds they do not go to the Auditor General; I pass them on the certificate of the Collector of Customs, who is satisfied that his officers have certified to their correctness, and on his signature I pass the claims for refund. 8 Feb., 1882
1502. In that case the certificate of the Collector of Customs really takes the place of the Auditor General's certificate? It does.
1503. You have heard recently of claims for refunds having passed through your hands which were fraudulent? I have.
1504. And for those you do not consider yourself in any way responsible? Not in any way responsible.
1505. Did you pass some time ago a voucher for £187 6s. as a charge against the Treasurer's Advance Fund? I believe I did.
1506. Do you remember who authorized that payment? It was authorized by a letter signed by the Under Secretary for Lands, numbers of which we receive.
1507. You had no reason to suppose that authority was forged? Not the slightest.
1508. The charge on the Advance Fund was approved by the Treasurer, was it not? Yes.
1509. When you had obtained that approval, did you return it to the Lands Department? No; the letter asks the Treasurer to pay the money out of the Advance Fund. If there were funds it would not be necessary to ask for an advance.
1510. It has been stated in evidence before the Board that this authority, after approval by the Treasurer, was returned to the Lands Department—can you tell us what reason there was to return it? There is no object in returning an authority of that kind to the Lands Department unless they ask to be informed if the Treasurer approves of the payment, then it is often returned, so that it may be noted that the money will be paid in accordance with their request.
1511. Do you never return these authorities for the purpose of having vouchers prepared for payment? I do not think so. I see no occasion for it; we make out the receipt voucher in the Pay Office.
1512. Then you do not recollect whether you passed the money on the original authority or upon a voucher? To the best of my recollection we passed the money on the authority of the original letter asking the Treasurer to pay the amount out of the Advance Fund.
1513. You frequently pass authorities for refund on Lands vouchers? Frequently.
1514. By whom are they signed? By the heads of the various Branches.
1515. Do you remember whether you have been notified by a competent authority that the heads of the Branches in the Lands Department are empowered to sign on behalf of the Under Secretary? Yes, we generally get a letter to that effect from the Lands Department.
1516. And you require that authority in your Branch? Yes; that was the reason I objected to the use of a stamp signature at the time Mr. Stephen held that office.
1517. Do you remember how many officers of the Lands Department are in the habit of signing refund vouchers? They are changed so often. Mr. Lindsay Thompson used to sign them, also Mr. Blaxland and Mr. Curry and Mr. Wilson, and Mr. Blackman as a rule nearly always signs for Mr. Moriarty. Whenever an officer assumes the position of head of a Branch he generally signs for the Under Secretary.
1518. Not, however, without the Under Secretary's authority? No.
1519. Do you not consider that a system of this kind increases the risk of irregularity? Yes, I suppose it does; but I do not think the Under Secretary could sign all these documents.
1520. But some one person deputed by him might? Yes, in the same way that Mr. Newcombe is deputed to sign for Mr. Eagar, because Mr. Eagar could not possibly get through the work otherwise.
1521. Do you not think that a change is desirable in the system now in operation in the Lands Department? I do not see how it could be improved. The Government must place confidence in the head of a Branch, and if the signature of the Under Secretary were required it could be forged as easily as that of Mr. Wilson or Mr. Blackman. I do not see how that would protect the Revenue in any way.
1522. But in matters of Revenue, when hundreds and thousands of pounds are authorized to be paid, do you think it right that the head of a Branch should have that authority in his own hands? I think in that case the authorities for refunds should be signed by the head of the Department or an officer so deputed. If they bear the signature or initials of the head of the Branch, the Under Secretary or his *locum tenens* could then affix his signature to the voucher.
1523. Will you look at this voucher (*handing paper to witness*), No. 15,694, which purports to be a payment to one Patrick Francis Henry of £38 16s. Look at the voucher and the authority for the payment of the money? Yes.
1524. Did that pass through your hands? Yes, there is my stamp on it.
1525. And would you take that signature for Mr. Oliver's? Yes, I would take another like it to-morrow.
1526. You see nothing in it to create suspicion? Nothing whatever.
1527. What examination would such a document as that undergo at your hands? First, I should require to see that there was such a vote as £1,000 in accordance with that item number; and secondly, that that vote was under the control of the Lands Department.
1528. As far as you can see then the document is in perfect order? It is perfect so far as I can see.
1529. You see nothing in it to create suspicion? Nothing.
1530. Will you kindly look at this document (*handing paper to witness*), which is a copy of a pay voucher, No. 26,200—a certified copy from the Auditor General—submitted to the Board at their last meeting by one of the clerks in the Audit Department? Yes.
1531. By whom is that authority supposed to be signed? By Mr. Blaxland; I have quoted Mr. Blaxland as one of those who are authorized to sign these vouchers.
1532. What is the amount authorized to be paid? £2,984 11s. 6d.
1533. Do you consider the reason given for the refund in that case sufficient to justify you in passing the claim? I do.
1534. The refund was certified by the Auditor General? Yes. I could not pass it without an acknowledgment by the Auditor General that the money was paid to the Revenue at one time and was available for refund.

- R. A. Cantor. 1535. That being a large refund authorized by Mr. Blaxland, did you not hesitate to pass it? No; we pass large sums frequently on the signatures of the officers authorized to sign refunds.
- 8 Feb., 1882. 1536. Had you to pass that document without the signature of the Auditor General, would not you hesitate on account of the largeness of the amount? It would be authorized by the Minister in that case and signed by the Under Secretary, because it would be a payment by the Government out of the Revenue; but in this instance it is simply a refund, and I look upon Mr. Blaxland's signature only as a formal, a departmental signature.
1537. Supposing you were asked to certify that the amount was available, and that you were in the Auditor General's place, would you consider it necessary to raise any question about the authority? No, I should not, simply because the Lands Department have authorized us to accept the signature of Mr. Blaxland.
1538. And you think the whole responsibility rests with the Lands Department? Yes.
1539. *Mr. Powell.*] Claims for refund coming up to you from the Customs, are they not in all cases accompanied by papers? Yes.
1540. The signature of the Collector of Customs for a refund never reaches you unsupported by documents bearing the signatures of the subordinate officers of the Department? No, that is quite correct.
1541. Is it not in your opinion a safeguard that the papers connected with the refund should accompany the claim? I think you guard against that sufficiently by having the signatures of the bondkeeper, the locker, the searcher, as well as that of the Collector of Customs.
1542. But it being the practice to have the signatures of the persons you have named, do you not think they afford an additional safeguard and security to the final signature of the Collector of Customs for a refund? Certainly.
1543. In this case of Henry's, do not you think that in addition to the application by Henry, and the report of Inspector Davis, it would be an additional safeguard if the papers referring to the claim were forwarded with it? Certainly it would; but if all the papers connected with every refund were attached to the application, I do not know how you would get through the work.
1544. But they are in existence somewhere? In this case I suppose there were no papers, because it is a forgery. If the original papers in connection with the purchase of the land where the Minister has approved of the money being refunded were attached to the letter to the Treasury, directing the money to be refunded, it would be an additional security.
1545. *Chairman.*] You are aware that applications for refund, in connection with lands, go direct from the Lands Department to the Treasury? They go to the Receiver at the Treasury, not to me; they do not come into my hands until they are perfect.
1546. And they are sent by the Receiver to the Audit Office for verification? They are sent to Mr. Eagar, the head of the Department, for his signature, and then sent on to the Audit Office for verification.
1547. Do you see any necessity to send these papers to the Treasury in the first instance? As far as my knowledge of Mr. Newcombe's Branch goes, the object is that Mr. Newcombe is made aware that such authorities to refund have been issued, and are sent to him in the first instance to be noted; they are then sent on to the Auditor General for action. I think that is the course pursued in the Receiving Branch.
1548. Is there any advantage in that? I do not see any advantage, except in the case of conditional purchases, where the authority to refund the money blocks all further receipts.
1549. The first you see of these refund vouchers is on their return from the Audit Office, duly verified? Yes; they come to me, supposed to be completed. There may be some reason for these vouchers being sent direct to the Treasury before they go to the Audit Office, which Mr. Newcombe will be able to point out.
1550. In nine cases out of ten these refund vouchers are signed by the heads of Branches, and not by the Under Secretary? I think in nearly every instance they are signed by the heads of Branches.
1551. Under an authority given at the time to the officer who is appointed to take charge of the Branch? Yes; the Audit Office would question the signature of an officer, unless he had been authorized to sign, as we should.

William Newcombe, Receiver at the Treasury, examined:—

- W. Newcombe. 1552. *Chairman.*] How long have you held your present appointment? Since December, 1864.
- 8 Feb., 1882. 1553. Will you kindly tell the Board the exact nature of your duties as Receiver? My duties are to receive on behalf of the Treasurer all moneys coming into the Treasury from whatever source.
1554. Do you receive applications for payments to be made by the Treasury? No, I cannot say that.
1555. Then you are concerned solely with the receipt of money? Yes.
1556. *Mr. Thomson.*] You have a large staff to aid you in the discharge of your duties? I have.
1557. I presume the conditional land purchase system forms a large portion of the duties of your Branch? It does.
1558. Who is in charge of that part of your duty? Mr. Barraclough.
1559. Do you remember how many books you have in use at the present time for this description of land sales? Are you alluding to the Registers?
1560. Yes, the Conditional Purchase Registers? I think the Registers number 142 separate volumes, independent of a lot of auxiliary books, all in use.
1561. Are there many refunds of conditional purchase money authorized by the Department of Lands? Yes, a great many.
1562. Can you describe to the Board the nature of these refunds—the reasons for refunding the money? The selections have mostly been declared void by the Minister; another reason is the purchases have lapsed from the non-compliance of the holder with the terms of the Act, either in making the declaration or the payment of the money within the given time; but in these latter cases no refunds are made.
1563. Are there not forfeitures also? I believe there are.
1564. *Chairman.*] Where the land taken up is found to be within a reserve? Yes, a reason for voiding the selection.
1565. *Mr. Thomson.*] Have you any idea of the amount of conditional purchase money refunded last year?

W.  
Newcombe.  
8 Feb., 1882.

year? I have here a statement prepared by the Accountant showing the conditional purchases refunds from Revenue during the last four years. (*Appendix M.*)

1566. Will you state from that document what is the amount for 1881? Conditional purchases, £72,174 19s. 8d.

1567. Is that an average amount, or have larger sums been refunded in previous years? I think there have been larger sums. In 1878 the amount was £80,289; in 1879 it was £83,000; and in 1880 £57,000, in round numbers.

1568. How are these refunds authorized? By a letter from the Conditional Sales Branch of the Lands Department, generally signed by Mr. Blackman on behalf of the Chief Commissioner.

1569. Is the Chief Commissioner empowered by the Minister to authorize refunds? Yes.

1570. Do you hold any Ministerial authority to that effect? I have not one with me, and I am inclined to think that none has been received for Mr. Moriarty, and that his appointment as Chief Commissioner was taken to include that authority; I have no recollection of any other.

1571. Did Mr. Moriarty authorize Mr. Blackman to sign on his behalf? Yes.

1572. Have you that authority with you? No, the second clerk could not trace it in time, but such an authority has been received.

1573. Is it usual for the Lands Department to intimate to you the names of the officers who are authorized to sign on behalf of the Under Secretary? Yes, otherwise we should not pass any refund; we always hold them back till we get that intimation or return them.

1574. In notifying these names to you, do they give you a specimen of the signature of the officer authorized to sign? No, merely the name of the officer.

1575. And you have never considered it necessary to ask for a specimen signature? Never.

1576. Do you record these authorities in your Branch? No, they are recorded in the general books of the office; they are specially referred to officers in our Branch.

1577. In fact you make them acquainted with the fact? Yes.

1578. Are they forwarded to the Audit Office for notation? Yes.

1579. Always? Always.

1580. They are noted there and returned to you? Yes, I think in nearly every case. I have some of them with me (*producing papers*).

1581. Will you tell us what authorities you have with you? I have one for Mr. Blaxland when he was appointed to the charge of the Auction Branch.

1582. Have you one for Mr. Curry? We received one, but I have not it with me.

1583. Had you an authority for Mr. Charles Brown to sign on behalf of the Under Secretary? Yes, as well as for Mr. Wilson, who succeeded him.

1584. Are you called upon to verify that the amount is available for refund, or do you simply note in your books the forfeiture or cancellation as the case may be? That is all—we just notify the cancellation to keep up the record, and so prevent any interest being received. If in doing that we find any discrepancy in the amount or in any other particular, we refer back the authority before sending it on to the Auditor General; that is the only examination we make of them. This refers to conditional purchases only.

1585. After that notation you send the document on to the Audit Office for verification? Yes.

1586. And the responsibility of verification you consider rests with the Audit Department? I do.

1587. After a refund has been made, do you note the date of the refund in your books as well? Yes; I get the voucher sent to me by the Accountant, and I note from that the actual date the money was refunded, and by that means I have a complete record from the beginning of the selection to the date of payment.

1588. What is the object in having the refund entered? For reference; there are so many applications one way or the other to know whether certain refunds have been made, and our books afford a ready means of ascertaining; it is easier to turn them over than the Paymaster's.

1589. Did you ever know of a case where the deed for land purchased had been issued, and the purchase money refunded as well—any description of land sale? Yes; I could not give you the particulars, but I have heard Dr. Wilson mention several times the case of one of his clients, where the purchaser had the deed and also the money refunded.

1590. Was that a solitary instance, or have you heard of others? I fancy there was another case or two, but I am not very clear about it.

1591. Did you consider it your duty to bring this matter under notice at any time? No, because Dr. Wilson told me he was in communication with the Lands Office on the subject.

1592. Is it possible for you to detect transactions of that kind? No.

1593. You think it is quite impossible? Quite impossible.

1594. The case to which you refer came to your knowledge accidentally? Yes, in conversation.

1595. And you are not aware whether the deed was cancelled or not? No, I do not know what the result was.

1596. Do you not think that a system which admits of a deed being issued and a refund made as well must be a very defective one? It must be in a case like that.

1597. Can you suggest to the Board the name of any officer in the Department of Lands who could give us evidence on this point—that is, as to the possibility of a deed and a refund being both issued? I should think the gentleman in charge of the Auction Branch, as the case in question is either an auction purchase or selection after auction.

1598. In view of the frauds which have been perpetrated by Harris, have you thought of any plan to check such irregularities? No, I have not taken that matter into consideration at all.

1599. These refund authorities, as you are aware, are very numerous? Very numerous.

1600. Do you think that if these authorities were in bound books with butts consecutively numbered, and sent to the Auditor General, that it would tend to check frauds? I am not so clear that it would; an evil-disposed person could prepare a voucher in that way and get it paid without any authority being given. It would simply carry out the system that was carried out the other day, only in another form, because it would be simply a record of the refund in another shape; instead of the copy of the letter the butt of this book would be the record.

1601. But if these authorities which would be contained in books and numbered consecutively were kept under

W.  
Newcombe.  
8 Feb., 1882.

under lock and key by the officer in charge of the Branch, there would be less chance of frauds being committed, would there not? Well, he might forge the whole thing as Harris did—he might commit the fraud and keep it under his own eye. I think there ought to be a check beyond the Branch from which the authority issues.

1602. That system would at all events be an improvement upon the present system of using loose forms? Yes, it would be better than that.

1603. In the case of receipts given by the Treasury for moneys paid over the counter, you are aware that no one officer is allowed to draw the receipt and take the money? Yes, it takes three to do it; one to draw the receipt and butt it, one to enter, and a third to receive the money; and at the end of the day these three officers have to make an independent balance. The man who has the butts makes up his total, the entry clerk does the same from his entries, and the receiver the same with his cash, and the three have to agree with each other. That system is adopted every day.

1604. And unless there is collusion between those three officers there can be no fraud? No.

1605. And you consider that a satisfactory check? Yes, I think it is the best we could have, because these gentlemen work independently of each other, and the rule is that we have the money in the Bank before the balances are made up.

1606. Seeing that you consider that to be as perfect a system as could be established for the receipt of public moneys, would not the same system or one similar to it be as good a check in respect to refunds? I think every bit as good.

1607. That is, that they should pass through three officers' hands instead of one? Yes; it is a standing rule since Mr. Donaldson was Treasurer that no one person should do the work which is now done by three.

1608. If the original papers were sent to the Auditor General with the refund authorities, would not that also be a good check for the Audit Department? I think it would.

1609. Do you see any valid reason why those authorities—I am referring now to the refund of pre-lease rents—should be sent to the Treasury first? None at all; they merely give us extra work for no purpose, because I have no means of checking them.

1610. What do you do with them when you receive them? I enter them in a subsidiary book, so as to be able to answer any questions that may be put respecting them by the public or by any public officer; of course that is quite beside my work.

1611. *Chairman.*] Then you would be relieved entirely of that work if the documents were sent in the first place to the Audit Office for verification? Yes.

1612. And you see no valid reason for sending them to the Treasury in the first instance? None whatever.

1613. *Mr. Thomson.*] After they come back from the Auditor General, do you not think it would be necessary to make the same entries for the information of the public that you did before? No, I do not think so.

1614. You think that would not be necessary? I think it would not.

1615. *Chairman.*] Upon the receipt at the Treasury of these documents duly verified by the Audit Office, they are ready for payment? After going through the hands of the Examiner and Accountant.

1616. And as a rule, I presume they are paid within a few days? Yes, of course, if applied for.

1617. The claimants, I suppose, are pretty prompt in applying for payment? Yes.

1618. *Mr. Thomson.*] Besides the refunds on conditional purchase money, have you any other description of refunds to note in your books? Yes, I have the guarantee deposits of 6d. an acre—guarantees to purchase land by auction if submitted.

1619. Who authorizes those refunds? The head of the Auction Branch of the Lands Department.

1620. I see from this statement of refunds which you have handed in (*Appendix M*) that in the year 1878 deposits under the 31st clause of the Lands Acts Amendment Act had been refunded to the extent of £99,000—Can you explain to the Board why such a large sum was refunded in that year? Simply because nearly all the applications were refused by the Minister for Lands; these refunds went to the Trust Fund.

1621. But if they went to the Trust Fund, how is it that the refunds took place out of the Revenue? That is for the Accountant to say; we put them to the Trust Fund.

1622. They must have been transferred from the Trust Fund to the Revenue before they could have been refunded from the Revenue? Yes.

1623. In this description of refunds do you know who signed the authorities? I could not tell you the name of the gentleman; it was the officer who had charge of the Miscellaneous Branch at the time.

1624. Was that in Mr. Edwards' time? I think they were in force in Mr. Edwards' time.

1625. Have you anything to do with the verification of those refunds? Yes, I make the verification before I pass on the Treasury refund voucher.

1626. The Auditor General is not responsible for certifying to the refund in these cases? I think not, because from the Revenue Branch they go to the Account Branch, and there, I believe, they keep a check upon every receipt, and thus they are doubly checked before they go to the Paymaster.

1627. Did the refund of such a large amount as that not arouse your suspicions? No, not under the 31st clause.

1628. There are not many refunds now under that clause? No, very few.

1629. Are you aware whether the Minister for Lands has authorized the Under Secretary for Lands to sign refund authorities? I think not I think in the case of the Under Secretary we get no formal authority, his appointment as Under Secretary being considered sufficient.

1630. Do you not consider that when refunds to such a large amount are made, it is absolutely necessary that an authority for the Under Secretary to sign should be conveyed by the Minister to the Treasury in some way or other? I think not, as the Under Secretary is recognized as the permanent Head of the Department.

1631. He is not under security, so far as you know, for a duty of this kind? No.

1632. Have you ever, that you remember, had occasion to object to any authorized refund? We have had double authorities in many cases from the Lands Department—in very many cases, that is to say, a double authority for the same money; in such cases we refuse the authority and return it, officially of course.

1633. In cases of that kind you act upon your own responsibility? Yes.

1634.

W.  
Newcombe.  
8 Feb., 1882.

1634. And you do not forward the document to the Audit Office for any verification? No.
1635. You have heard that Mr. Harris, the late Accountant of the Lands Department, has committed several frauds in connection with the Lease Branch? I have heard so.
1636. Did it never strike you that the system of authorizing refunds of lease rents was a loose one? It is no worse than that adopted in the other Branches; each Head of a Branch has permission to sign refunds for the Under Secretary. The same system prevails throughout the Department.
1637. Do you remember whether that system originated with yourself or was suggested by you? It was not suggested by me.
1638. I think we have it from Mr. Oliver that it was a joint arrangement between the Lands Department and the Treasury? I do not see how he could call it an arrangement between the Lands Department and the Treasury; it was done to relieve him, because he could not get through the work; it was entirely to suit his Department. Still I think it is a defective system which allows all these gentlemen to sign for the Under Secretary—it is wrong in principle.
1639. Can you suggest any remedy for this unsatisfactory system of signing refund authorities? Nothing more than that the Under Secretary should sign all the authorities himself; and that, I presume, he would not do unless he had the Minister's authority.
1640. But do you think it possible for the Under Secretary to sign all these authorities and examine the papers in connection with them? It would be very heavy work, and there would be some delay in issuing them.
1641. You think, at all events, it would be better that one officer should be appointed to perform that duty, than that it should be done as at present, by a number of officers? Yes.
1642. Do you think it is desirable that an officer should be specially appointed to carry out that duty? I should not like to say that a special appointment should be made; I think the Under Secretary ought to sign them all.
1643. But I understood you to say that he would not have time to do it? Yes, and that is why these gentlemen are authorized to sign for him.
1644. *Chairman.*] Still you think that one gentleman of high standing would be better than a number of others in different Branches of the Department? Yes, as when one of them is absent we require an authority for some one else to act for him.
1645. *Mr. Thomson.*] In that case, I suppose you would accept the signature of the Under Secretary himself? Yes.
1646. But even that arrangement would be objectionable, as it would increase the number of signatures? You mean from the Under Secretary signing promiscuously?
1647. Yes, stepping in to sign now and then? Yes, it is very undesirable; at the same time I should consider his signature sufficient.
1648. *Chairman.*] What do you do with these refund vouchers after they are returned by the Auditor General verified—say the pre-lease vouchers? They do not come to me—I never see them again; I merely enter them in the first instance in a subsidiary book, in order to answer questions respecting them that may be referred to me; it is only conditional purchase vouchers that I want back after payment.

FRIDAY, 10 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

James Daniel Cronin, Paymaster, Treasury, examined:—

1649. *Chairman.*] How long have you held the position of Paymaster to the Treasury? Nearly seventeen years. J. D. Cronin.
1650. How many assistants have you? Six. 10 Feb., 1882.
1651. Can you tell the Board the average number of payments made daily in your Branch? They vary very much; on some days I make over 300 payments, on others 150, scarcely ever less than 100.
1652. Do the land revenue refund vouchers pass through your hands? Yes.
1653. Are they paid over the counter like other vouchers? Sometimes over the counter and at other times into a Bank, according to the order from the principal.
1654. Do you countersign as witness, or does any one in your Branch? No, I always understood that the Audit Office object to my witnessing, being an interested party.
1655. Do any of your assistants do so? Not of late years, simply because I make all the payments myself personally.
1656. Are there any cases in which the signature of a witness is required by you to a payment to be made over the counter? Where the person applying for the money is not known to me personally, and a gentleman comes with him who knows him, then I get him to witness the payment.
1657. In making payments to others than principals what precautions do you take against imposition? As a rule when I pay an agent he brings me an order signed by his principal, and witnessed either by a Magistrate, a Clergyman, or a Clerk of Petty Sessions.
1658. How do you satisfy yourself of the *bona fides* of an agent claiming payment over the counter? By the order which he brings, signed by his principal, and witnessed as I have stated. Of course where I know the signature of the principal I do not require a witness.
1659. If a claimant presented a note from a public officer testifying that he was the claimant, would you accept it without demur? Yes, particularly if the officer was of good standing in the Service.
1660. Supposing it was a forgery, would you be held responsible? That would be for my superiors to say; I always understood that I should not be, provided that I had used every ordinary precaution and judgment.
1661. Have you ever been imposed upon in that way, or have any attempts been made to impose upon you? Yes, once or twice attempts have been made. I have detected persons trying to sign for others, which

J. D. Cronin. which would have been forgery. There was one case where I was distinctly imposed upon. It was in connection with an authority given by the Lands Department for payment of money for fencing. A letter was written from the Lands to the party, which was presented to me at the Treasury; I took exception to it as not being satisfactory identification of the party, and said I should require further evidence. He asked me if the Bishop of Sydney would do, and I said, "Certainly." He then went, and after dinner he presented himself again and said the Bishop was out. Then he turned down the corner of the letter, and said, "Would that do?" presenting to me the certificate of a well-known firm in Sydney. He was not the proper claimant, but of the same name.

10 Feb., 1882.

1662. How long was that ago? About ten years ago.

1663. *Mr. Thomson.*] In that case did you know the attesting witness? Yes, I knew the signature of the firm certifying. I paid the money of course, and within two days the real man applied by letter to the Treasury for the money. I took action at once through the Inspector General of Police, and found that there were two men of the same name in the district. The wrong man had got the letter from the Lands Department, which he had presented to me, and he had got the money. The greater part of the money was recovered, all but a very small portion, and the man was punished.

1664. Is that the only instance of a payment being made to the wrong person through false representations that you remember? That is the only instance. Persons have presented themselves at the counter, representing themselves to be principals and signing as principals, who upon examination were found not to be. For instance, here is the case of a payment on the 6th February to a certain individual, whose name I need not mention, of £4. A person appeared at the counter and signed the identical signature which appeared on the voucher as the claimant's. On inquiry it turned out that he was agent for the principal, and he said the man had asked him to sign for him. I have had several cases of that kind.

1665. The agent in that case signed the name which was on the voucher? Exactly.

1666. *Chairman.*] Do you personally test the accuracy of the authorities from principals to agents? I have always examined the country orders myself; I now do all, both country and counter, but previous to the Harris defalcations that duty was divided to a certain extent. It was the duty of the counter clerk to test all orders handed over the counter, but if he had any doubt they had specially to be brought under my notice; but now I test them all.

1667. How do you ascertain the correctness of the signatures of principals? Numbers of signatures are known to me; those that are not known are required, as a rule, to be attested by either a Magistrate, a Clergyman, or a Clerk of Petty Sessions.

1668. Have you any register of signatures? No, it would be a waste of time without it were complete. We could not have the signature of every Magistrate and Clergyman and Clerk of Petty Sessions in the Colony; and some of the orders are from time to time witnessed by Magistrates beyond the Colony.

1669. How did you come to accept the signatures of both principals and witnesses which were forged by Harris, the late Accountant in the Lands Department? I accepted them on the same principle that I accept every other signature.

1670. That is to say, that they were so like the true signatures that it was impossible for you to discover that they were forgeries? I presume you allude to the signature of the Under Secretary. When I have no knowledge of the principals, their signatures are duly witnessed according to the practice in force.

1671. Will you look at this paper attached to a Treasury voucher, No. 15,694, purporting to be an authority from Mr. Oliver, the Under Secretary, for a refund of £38 16s. to Patrick Francis Henry (*handing paper to witness*)? Yes.

1672. You passed that payment? Yes.

1673. Without any suspicion? None whatever; it is apparently duly signed by a Magistrate, in accordance with our usual practice.

1674. Do you know whether there is such a Magistrate? I cannot say; I do not know the name of every Magistrate.

1675. It has never been your duty to compare the signatures with any list of the Magistrates of the Colony? No; I have no such list, and the necessity for doing so never entered my head. Much loss of time and delay in payments would be occasioned, to no useful purpose, by such a search, for I need not point out that seeing a corresponding name on a printed list is no guarantee that the signature is genuine.

1676. Would it be possible for you to ascertain in every case the correctness of the signatures before acting upon them? I certainly think not, and to endeavour to do so would cause an indefinite delay, and give much trouble and annoyance to the public.

1677. What do you consider to be the object in obtaining the signature of a witness? In ordinary business transactions, as a verification of the signature of the principal.

1678. Is it not principally to protect yourself as the paying officer? The Government in the first place, and myself next.

1679. Do you think it is of any value except when given in your presence, or in the presence of some of your assistants? Undoubtedly it is of value, for in the vast majority of cases it is perfectly satisfactory, and attests the correctness of the signature.

1680. What do you consider to be the value of a written signature which comes to you by post, and which you cannot test? It is of the same value if it comes by post as if it is given by the hand of an agent.

1681. There can be no security against forgery? I am afraid not; a clever and unprincipled man may do almost anything.

1682. There are many vouchers which pass through your hands which have no witness's signature? Where the signature of the principal is known to me I do not require a witness.

1683. On many of the vouchers there is no provision for a witness's signature? Yes, many of them; all vouchers, for instance, for conditional purchases, also for debenture drawbacks, have no provision for a witness's signature to the acquittance.

1684. Is it the practice in the Treasury to accept general orders from principals to pay money due to them to agents? Yes.

1685. How long are such orders considered to be in force? Until they are cancelled, according to the terms of the order.

1686. Do not you think it would be better to have them renewed from time to time? I think it is perfectly unnecessary so long as the principals let them lie. The authority states "unless or until otherwise ordered," as you will see by the form I hand in (*Appendix N*). I may add that this form is duly registered in the Treasury, and also forwarded to and registered in the Audit Office.

1687.

1687. You do not think it would be better for principals to give a direct order for every payment? No, J. D. Cronin. certainly not; I think it would lead to a good deal of inconvenience and delay to the public.
1688. On making payments into a Bank, you usually obtain an acknowledgment from the Bank Teller, do you not? Yes. 10 Feb., 1882.
1689. On the return of the vouchers signed by the Bank Teller, do you personally examine the signatures? Every one of them.
1690. Have you a signature book, with the Bank Tellers' signatures in, for reference? Certain Bank Tellers are authorized to sign from time to time; and on the acquittances being presented to me each evening, fresh authorities, if necessary, must be supplied in accordance with this form (*Appendix O*).
1691. By whom do you require this form to be signed? By the Manager or Sub-Manager, or in some cases by the Accountant, when I know him.
1692. Then, as a matter of fact, you find your present practice to be a tolerably safe one? I certainly think so; I take every care; and I am afraid that anything outside it would only be irksome to the public and would give dissatisfaction.
1693. In the light of Mr. Harris's recent operations, can you suggest any check other than those which are at present in force, to prevent the repetition of such frauds as those we are now inquiring into? I am afraid I cannot do so; my own business so entirely takes up my time that I have not been able to give the subject any consideration. And if you refer particularly to the Pay Branch, I may venture to express my opinion that any regulations of an arbitrary kind which might prove vexatious to the public should if possible be avoided.
1694. You do not see the refund pre-lease vouchers until they are returned to you verified by the Auditor General, do you? No, I see no voucher until it comes to me perfectly completed for payment.
1695. *Mr. Thomson.*] You have been in the Treasury, I think, for a much longer period than that during which you have been engaged as Paymaster? I have been in the Treasury twenty-eight years this month.
1696. All payments from the public funds are made in the first instance by you? Yes.
1697. You act, however, under the instructions to a certain extent of the Under Secretary, who is the permanent Head of the Department? Undoubtedly.
1698. Have you any written or printed instructions for your guidance? Up to a recent period I had had none whatever, except the general regulation of 1864; but subsequent to the perpetration of these frauds by Harris I submitted a memo. to the Under Secretary, and upon which the Treasurer made a minute. It was as follows:—
- "I would wish to receive definite instructions from the Under Secretary with reference to the witnessing of signatures to orders on the Treasury.
- "The practice (although not defined by regulations but following precedent) has been to require signatures, not known at the Treasury, to be witnessed by a Magistrate, Clergyman, or Clerk of Petty Sessions.
- "I have at times found it difficult and impolitic to enforce the practice, because, strictly carried out, it would sometimes act harshly, and unnecessarily impede public payments.
- "I may add that orders not witnessed in accordance with the practice above stated are frequently presented by firms of high standing, such as Wilson & Ranken, H. H. Brown & Co., and others, and by gentlemen well known at the office.
- "Will the Under Secretary please instruct me in this matter, and say if I am in every case to enforce the practice that all orders are to be witnessed by a Magistrate, Clergyman, or Clerk of Petty Sessions, or shall I (as heretofore), when in my judgment the circumstances may admit of it, relax the practice?"
- Minute by the Treasurer:*—"I think the question raised is not one in which a hard and fast rule should be enforced, otherwise it might, in cases, lead to great hardship and unnecessary delay in payment of accounts, which should be avoided; and as I have the greatest confidence in Mr. Cronin, the matter may be left to his discretion and judgment when such cases as that alluded to arise.—J. W., 29/12/81."
1699. You are thus left free to follow the course you consider best in all ordinary cases? Yes; to the best of my judgment.
1700. But in cases of a peculiar nature you deem it advisable to seek instructions? Undoubtedly.
1701. Are those instructions given generally by the Under Secretary, or do you obtain them from the Treasurer? Generally from the Under Secretary—in fact nearly always.
1702. Do you sometimes seek instructions in respect to the payment of authorities submitted by agents or others, or do you act in such cases on your own judgment entirely? Generally on my own judgment. I never could get through the business if I were constantly seeking instructions.
1703. When you act upon your own judgment, you hold yourself responsible for all erroneous payments you may happen to make? Certainly I am responsible, but to the extent that I have not neglected my duty, or failed to use all ordinary care and precaution.
1704. You have heard of the frauds lately committed by Harris, the late Accountant of the Lands Department? Yes.
1705. The vouchers or authorities by which these frauds were committed passed through your hands? Some of them.
1706. The frauds on the Treasury? Yes.
1707. Of course you had no reason to suspect that frauds would be perpetrated in the name of the Under Secretary for Lands? None whatever.
1708. Notwithstanding that, do you use every precaution which your long experience may suggest to prevent anything of the kind? Certainly; I have always done so in every instance, and taken every care.
1709. Have you been made aware officially of the frauds on the Treasury perpetrated by Harris? No.
1710. You have not therefore admitted that you have been imposed upon in any case, except the one alluded to in your evidence to-day? No.
1711. You do not hold yourself responsible for the genuineness of signatures in all cases? No, beyond using every precaution.

J. D. Cronin. 1712. Do you entrust any of your assistants with the payment of claims? No, as a rule I pay them all myself.

10 Feb., 1882. 1713. Would it be practicable in all cases to make payments to principals or to Banks only? No, certainly not—all cannot appear personally; a large number of our constituents have no banking accounts, and some are poor men who apply for small sums of money by agents.

1714. Are there any other cases you can mention? Yes; for instance some of the large firms in Sydney would object to it strongly, because they send up one of their clerks to collect their money, so that they may get full information of the amounts they receive. There are also the debenture drawbacks, which are paid through a Customs Agent.

1715. Has the business in your Branch increased much since you took charge of it? Yes, about fourfold.

1716. How much do you think you may have paid during your tenure of office as Paymaster? At a rough guess about eighty or ninety millions of money.

1717. What do you think is the average amount now? About eight millions a year.

1718. Are you and your staff under security? Every one.

1719. What is the amount of your own? £4,000.

1720. Has the Auditor General ever had occasion to surcharge you for an erroneous or excessive payment? I have no recollection of such a thing.

1721. Are your payments generally to principals or agents? About two-thirds to agents and one-third to principals.

1722. Can you give the Board an idea of the number of orders that have passed through your hands? At a rough guess about 800,000 or 900,000.

1723. I suppose you have different kinds of orders? Yes, there are the orders on the vouchers, general orders, special orders for special amounts, and also payments under powers of attorney.

1724. Do you find much difficulty in getting the public to comply with the requirements of the Department in respect to the witnessing of signatures? Yes, they object to anything that retards the payment. Frequently we have to return vouchers to persons up the country that are sent without proper signatures, with a memo. like this attached to them:—

“The regulations with reference to the witness have not been attended to; the attached order is therefore returned to you for the signature of the necessary witness.

The Treasury, Pay Branch.”

1725. Would you, in view of what has taken place, advise more stringent regulations? No, I certainly would not, so far as the public are concerned; I would avoid any regulations which were arbitrary or vexatious to the public and cause delay of payments.

1726. Do you not think it would be desirable to have all the regulations that are now in force printed for general use, and published in the Government Gazette, and copies of them hung up in your office? I am afraid that would not serve any useful end, because as a general rule the public who receive these payments never see the Government Gazette; besides, all the documents issued from the Treasury have the regulations referring to them printed in red at the foot of the form.

1727. But I thought you stated to the Board that there were no regulations under which you acted? No, there are no regulations; it is a practice more than a regulation.

1728. Then would it not be advisable that all these practices which are now in force, but of which the public do not hear except through you, should be printed and circulated for general use? Well, you see the minute of the Treasurer, which I read, it leaves it to my discretion, and if these were made strict regulations I should have to enforce them. Beyond this there would be no harm in doing what you suggest, but I am afraid it would not have much effect in drawing the attention of the public.

1729. Do you not think it would put the Pay Branch on a more satisfactory footing as regards the public? They might be hung up, but it would have to be as a distinct order signed by the Treasurer or Under Secretary.

1730. There was a claim sent up to the Treasury in the name of J. H. King, of Campbelltown, for £50. That claim was authorized to be paid by Mr. Oliver, Under Secretary for Lands. Will you kindly look at that document (*handing paper to witness*) and see if the authority for the payment to the agent is satisfactory? Yes; according to the usual practice it is signed by the gentleman to whom the money is payable and witnessed by a J.P.

1731. Was that authority not sent from your office and by your authority to Mr. King, of Campbelltown? Yes; if I receive an authority to pay to a party in the country without any order for the disposal of the money I send a notice with blank order at foot asking him how the money is to be disposed of.

1732. You would under the authority given there consider that Mr. King was a resident at Campbelltown? Undoubtedly.

1733. And you would send that authority to Mr. King, of Campbelltown. Undoubtedly.

1734. To whom was that amount afterwards paid? To William Nicholls, as agent for Mr. King.

1735. Would that authority be afterwards returned by Mr. King to you? That is the practice usually, but I have often received authorities returned through the Department which issued them through the Bank, and through agents.

1736. Can you see how that could have been converted into a fraudulent document? No; there is nothing whatever on the face of it to show it. Of course I suppose in this case it has been sent by Mr. King to Mr. Nicholls to get the money.

1737. In that case Mr. Nicholls would be the legitimate agent of Mr. King? Yes.

1738. Then can you understand how that could have been converted by Harris into a fraud? No; I cannot understand how it could have got into Harris's hands at all unless he intercepted it in some way; that is the first I have seen of it. It would look as if he had a confederate at Campbelltown.

1739. It is impossible for a pay officer in your position to detect fraudulent transactions of that kind? Unquestionably, the forgery is so complete.

1740. It would be impossible to frame any regulations to render a fraud of that kind impracticable? Quite so; a clever, unprincipled man like that could circumvent almost any regulation you could make.

1741. *Mr. Powell.*] I suppose that in paying public money the main consideration with you is the authority

authority of the head of the Department verifying the claim? Undoubtedly, that is the first consideration. J. D. Cronin.

1742. Does not the witnessing the signature of the person giving the authority to pay expressly throw the responsibility upon the Magistrate, Clergyman, or Clerk of Petty Sessions? Undoubtedly; because on the form of authority itself is a notice in red ink that "the witness should in all cases be satisfied of the identity of the person signing the order." 10 Feb., 1882.

1743. If payments were only made to principals or into a Bank, would such a system as that retard the public business? It would, certainly, and cause delay in the payments; in fact, such a system would be quite impracticable.

1744. Outside of Harris's frauds, have you become aware of any frauds specially brought about by the employment or through the act of agents? I am not aware of any, except the one I have alluded to.

1745. *Mr. Thomson.*] Do you know a land agent named Sutton? Yes.

1746. Does he do a large business with the Treasury? Yes, from time to time.

1747. Do you consider him a respectable agent? I have always looked upon him as such.

1748. Is it usual for agents to fill up authorities, and send those authorities or orders to principals for their signatures? They frequently do it.

1749. Will you kindly look at that voucher, No. 15,252, for the payment of £65 to John Retalleck (*handing paper to witness*)? Yes.

1750. That amount has been paid to Mr. Sutton, has it not? Yes.

1751. As the authorized agent of John Retalleck? Quite so.

1752. The authority is filled up in the handwriting of Mr. Sutton, is it not? It is.

1753. Have you any reason to doubt the genuineness of that authority? No.

1754. Everything is in perfect order? Yes, and the fact of the authority being presented by a well-known land agent would be thought to be a guarantee of its *bona fide* character. For instance, only within the last day an order was presented to me by a very large firm in Sydney. I did not know the signature of the principal, and it was not witnessed, but as it was presented by a large Sydney firm I accepted it on the strength of their name.

1755. We have another case where the order is in favour of William Connell for £45 10s. Will you look at that voucher, No. 23,003 (*handing paper to witness*)? Yes.

1756. That amount has also been paid to Sutton? Yes.

1757. Is the authority in Sutton's handwriting? It is.

1758. And everything in that case appears to be in perfect order? Yes.

1759. There is nothing about it to create suspicion? Nothing whatever.

1760. Had Connell given authority to pay that money into a Bank, would it not have been a preferable course to adopt than to pay it to an agent? So far as we are concerned it amounts to the same thing, because in either case we pay upon Connell's signature.

1761. No; in one case you would pay the money to Connell's credit at the Bank, and no one could draw it out but Connell himself? Yes, but it is paid on Connell's signature, and when it goes out of the Treasury it is a matter of no consequence to us what becomes of it.

1762. What I wish to ascertain is whether in that case there would not be a better protection to the Government against fraud? I think not, because a payment might be made to a Bank on a forged signature as well as to an agent, and money drawn from the Bank in like manner. The Banks frequently refer to me for certificates of signatures, the amounts having been paid in by me. Again, the direction might be to pay to the credit of an agent—Sutton for instance.

1763. You are aware, however, that the case is a forgery throughout? I am told so.

1764. But as a general rule, do you not think that the plan of paying money into a Bank to the credit of principals preferable to that of paying the moneys to agents over the counter? No; to carry out such a plan as that would interfere to a great extent with the right of principals to receive their money as they choose, and would cause much additional work.

1765. But if the plan were adopted for their protection they could not take any reasonable objection to it? They might not see it in that light. Another reason against it is that you would be taking the bread out of the mouths of persons who live entirely upon these agencies.

1766. *Mr. Powell.*] I suppose a number of persons who make these claims have no banking account? A great many.

1767. *Mr. Thomson.*] Then you think it is not desirable to make payments only to principals or into a Bank to their credit? I do not think so; as a rule, it is not desirable to impose any restrictions upon the public in the way of their getting their money. I should pay as the principals might direct, into a Bank or otherwise.

1768. *Chairman.*] Then the Board, I presume, may gather from your evidence that every reasonable precaution is taken by you in the matter of payments to the public? Undoubtedly. I have always taken the greatest care and adopted every precaution which has suggested itself to me.

1769. And you think that an over-suspicious discharge of your duties would render the business of the Treasury Pay Branch almost impracticable? That is exactly what I wish to convey, and as a consequence of my attempting such a course of business I am afraid that the public would soon be very dissatisfied with me.

Victor Cohen, Accountant to the Lands Department, examined:—

1770. *Chairman.*] How long have you held your present position in the Department of Lands? Since 1st December, 1881. V. Cohen.

1771. Did you find the business of the Department in great confusion when you took charge of the Account Branch? No, I did not; that is to say, the books were posted—I will not say correctly—and the work was up to date. 10 Feb., 1882.

1772. What books did you find were kept in that Branch? A Cash Book, an Appropriation Ledger, and an Abstract Book; those were the books of account. There were, of course, subsidiary books, such as press copy letter books, and so on.

1773. Who had been posting up these books? Mr. Ireland, principally; there were some entries by Mr. Harris, in the early part of 1881.

1774. Did you, upon taking charge of the Account Branch, receive any written instructions from the Under Secretary or Minister for Lands? No written instructions; I have had general verbal instructions from the Under Secretary. 1775.

- V. Cohen: 1775. Did you find it necessary to make any serious alteration in the system of accounts? Yes, decidedly.
- 10 Feb., 1882. 1776. Will you, as concisely as possible, acquaint the Board with the improvements you have introduced? In the first place I found that the Cash Book had not been added up on the credit side, and that it only contained a memorandum, I may call it, of the cheques issued; that it contained entries of vouchers that were sent to the Treasury and paid by the Treasury, and which certainly formed no part of the cash transactions of the Department of Lands. I gave instructions that these were not to be entered in the Cash Book in future. Then again, I found there were no debit entries of money received from the Treasury and deposited to the credit of Mr. Oliver's account as Under Secretary for Lands; they had not been accounted for in any way on the debit side of the ledger. Since I have been there all these entries have been made regularly. The first thing I did was to strike a balance with the Bank Book, and bring it forward in the Cash Book.
1777. Do you examine the Bank pass book at regular periods with the entries in your Cash Book? I have not done so at regular periods as yet, but since I have been there I have examined it, I think, three times. It is my intention to examine the Bank pass book with the Cash Book at least twice a month, but I have been pressed by work, and have not yet been able to carry out that examination regularly.
1778. What method do you pursue in making that examination? Either Mr. Ireland or myself takes the Bank pass book—I am not particular as to which, and one or other takes the Cash Book and Cheque Book; one calls out the number of the cheque; that is compared with the Cash Book entry, and the details, as shown on the cheque butt, are compared with the Cash Book, and marked off in the Cash Book, so that those not marked off represent the unrepresented cheques that have been drawn.
1779. How is the Bank pass book posted—by numbers or names? By numbers. A cheque may represent many payments, so that it is necessary to compare the butt of the cheque with the Cash Book, which shows the details.
1780. Then any great discrepancy between the numbers represented in the pass book must attract your attention? Decidedly.
1781. Did you find on taking charge of the Account Branch any cancelled cheque-books containing blank cheques? Yes, I did.
1782. What did you do with them? After conferring with the Under Secretary I had them immediately parcelled and sent to him.
1783. And they are no longer under your care? No; the only cheque-book in my possession is the one in use, for which I gave a receipt to the Under Secretary, and when that is exhausted I shall get another in the same way.
1784. Do you fill in all the cheques yourself, or is that done by your assistant? It is done by my assistant; I merely countersign the cheques.
1785. Are they made out from the original voucher? Yes.
1786. In all cases? In all cases since I have been there. I do not know what was done before.
1787. And then you take the cheques with the vouchers to the Under Secretary for signature? Yes.
1788. After countersigning them yourself? Yes. I think I have departed from that practice in one case only, when I was unable to leave the room, and sent my assistant with a cheque which he brought back immediately.
1789. Have you any arrears of adjustment at the present time? Yes, I believe there are, in connection only, I think, with Harris's forgeries, where the adjustments could not be made; that is to say, adjustments not made within the time specified by the Audit Office.
1790. But beyond Mr. Harris's time you have no arrears? I think not.
1791. Then are you waiting for the result of the investigation by this Board to bring the matters of Harris' defalcations to an issue and get the adjustment of his accounts squared up? I cannot say I am waiting for the result of this Board's investigations; I am simply waiting till the Guarantee Society repay the amount that has been claimed. I have not quite finished opening an account which I call the Harris Defalcations Account, to which I shall credit the money that is repaid.
1792. What books have you now brought with you for the information of the Board? The Cash Book and the Appropriation Ledger. I was asked to bring the Register of claims paid and forwarded to the Treasury. I have brought books which will cover those claims.
1793. Will you leave them for the Board to make such examination of them as they may consider necessary? I have no power to leave them, and I do not know whether I should not be acting outside my duty in leaving them.
1794. *Mr. Thomson.*] You do not consider that the Cash Book was properly kept before your time? No.
1795. It was practically useless? Yes.
1796. You have a second Cash Book I see? Yes; it was not in use during the whole of Mr. Harris's time—only up to July, 1881.
1797. Has that book been kept as an ordinary Cash Book ought to be kept? No.
1798. Are there any entries on the debit side? Yes.
1799. What do they purport to be? Vouchers forwarded to the Treasury on given dates for different services.
1800. And what is entered on the credit side? The different services for which the vouchers have been forwarded.
1801. Then both sides are alike? Yes; it seems to be simply a Dr. and Cr. account of the same transaction.
1802. Only that on the credit side, I presume, more details are given? That is it.
1803. *Mr. Powell.*] It is more like a journal than a Cash Book? It is, really.
1804. *Mr. Thomson.*] Do you use that Cash Book now? No.
1805. You have abandoned it altogether? Yes; I did not adopt it.
1806. Do you record in any book the claims that you send to the Treasury for direct payments? Yes.
1807. Have you that book here? Yes (*producing it*); I have opened it since 1st January.
1808. It is simply a register of claims? All claims forwarded to the Treasury for payment direct.
1809. You post into the ledger from that book against the appropriation? I do not post direct from this book.

1810. Do you not keep an appropriation account? I do.

1811. From what book do you post? I post from the Abstract Book, which contains in an abstract form all the payments made from the different vouchers; in fact, it records all transactions upon any particular vote, which I subsequently carry to the Appropriation Ledger account in one item.

1812. Have you that book here? No; it is called an abstract book, but it might very properly be called a journal, since it records the whole of the transactions in the Department.

1813. Do you consider the system you have now in operation satisfactory? Yes, if properly carried out.

1814. Do you think an Account Branch is necessary in the Lands Department? Yes, I do.

1815. Are not most of the payments made direct from the Treasury? No.

1816. What payments are made through your Department which could not be made through the Treasury? I do not know any payments that could not be made by the Treasury just as well as through the Lands Department, but a very much larger staff than the Treasury has now would be required to do it. As a matter of economy, I think the better mode is to allow the Lands Department to conduct all its transactions; a more satisfactory mode altogether I take it to be.

1817. I presume that your principal payments are for salaries to the officers in the various Branches of the Department and contingent expenses? No, they are not; there are innumerable items of expenditure during the year. The Appropriation Ledger will show you the different items in the Estimate, and the transactions in each one of them are pretty considerable. The mere payment of salaries occupies only one or two days in the month in the matter of drawing the cheques and making the payments to the officers. I consider that the payment of salaries is about the lightest part of our work.

1818. Are not most of the payments made direct from the Treasury without the intervention of the Lands Department? No—I am alluding now only to the accounts of the Department—not questions of refund.

1819. *Chairman.*] Can you say what proportion of the total vote for the Lands Department is paid direct from the Treasury, and what proportion is paid through the Lands Department itself? I could not say with any degree of accuracy, because I have not had sufficient experience in the Department; but I can say that the claims which the Treasury pay are only those which are charged to the Miscellaneous Services of the Lands Department.

1820. And you do not know the proportion they bear to the general expenditure of the Department? I do not, but that could easily be arrived at. If I may be permitted to add to this last question, I would say that the estimated disbursements by the Lands Department will, in 1882, amount to £54,500, whilst vouchers from the Department for payment by Treasury direct to persons interested will be about £24,700.

Charles Hart Townley Pinhey, Inspector of Public Revenue Collectors' Accounts, examined:—

1821. *Mr. Thomson.*] Have you ever examined the collections of the Lands Department? Yes; I did so in July, 1878.

1822. On that occasion did you find everything correct in connection with those collections? I did.

1823. The Lands Department is not, however, properly charged with the collection of revenue? With one exception I think—the Public Gates fees.

1824. What was the nature of the receipts you had to examine in addition to the Gates fees? Revenue which had been improperly forwarded to the Lands Department, and had to be transferred from that Department to the Treasury or to any other Department to which it belonged.

1825. Who was in charge of these funds and of their disposal? The Record Clerk.

1826. Did you find them properly recorded in any of the books of the Department? They were recorded in a small ruled note-book, in the last column of which the initials of an officer of the Department to which the money was transferred were affixed to the entries.

1827. Did you consider that a satisfactory record, or did you make any suggestion for its improvement? I have no recollection of having made any suggestion for its improvement, except as to the form of the books; the record was satisfactory.

1828. Did you ever inquire into the system of expenditure there? Yes, in July, 1878, and again in August, 1880, conjointly with Mr. Oliver.

1829. What was the general result of your first inquiry? It was somewhat unsatisfactory, and proved negligence and considerable irregularity.

1830. Who was Accountant at the time? No actual appointment had been made; Mr. Croft was acting as Accountant.

1831. Did you make any suggestion for keeping the accounts in a more satisfactory manner? This is my report to the Chief Inspector of Accounts, dated 22nd July, 1878, with his covering minute upon it. (*Appendix P.*)

1832. Had any previous suggestions been made by a Treasury officer? Yes, some suggestions had been made in a memo. by the Chief Inspector, dated 2nd August, 1877. (*Appendix Q.*)

1833. I think you were engaged in a second examination in August, 1880? Yes.

1834. Did you then find that the suggestions made in your previous report had been carried out, wholly or in part? Certainly not fully.

1835. In what respect had they been ignored or set aside? They had not been carried out fully in respect to the books referred to in my previous report, in which special particulars and instructions were given.

1836. Do you remember the amount of defalcations and frauds that were then discovered? Approximately £989.

1837. By whom had those frauds been perpetrated? One fraud in connection with a manipulated cheque for £818 15s. was certainly perpetrated by Evans. The balance of £171 5s. was the amount of unadjusted advances for petty cash and incidental expenses, which were presumably frauds by Evans, but which were only looked upon as general deficiency, as no actual proof was submitted to us.

1838. In consequence of that manipulation of a cheque by Evans, I presume that you and Mr. Oliver made some suggestions to prevent the recurrence of similar frauds? We did so in our joint report dated 24 August, 1880. (*Appendix R.*)

1839. Did you find that Evans had forged the signature of any officer of the Department in connection with these frauds? No.

1840.

V. Cohen.

10 Feb., 1882.

C. H. T.  
Pinhey.

10 Feb., 1882.

- C. H. T.  
Pinhey.  
10 Feb., 1882.
1840. Do you recollect how sufficient funds happened to be in the Bank to meet this large fictitious claim by Evans? By delaying to lodge the amounts for salaries to be paid into private accounts from the funds placed to credit of the Under Secretary's Public Account in Bank of New South Wales.
1841. That is to say, in place of depositing the crossed cheques to the credit of public officers in the Bank he withheld them? Yes, he withheld them, and presented the £818 15s. cheque.
1842. Were the precautions which you and Mr. Oliver suggested in your report sufficient to prevent future loss to the Revenue by any similar manipulation of cheques? Yes, I think so.
1843. But not by forgery? Certainly not by forgery.
1844. Are you aware whether any of your last suggestions have been carried out? I am not aware.
1845. Having on different occasions inquired into the working of the Account Branch of the Lands Department, did it occur to you that it could be dispensed with altogether? I think not.
1846. Is the work of such a character that it is absolutely necessary there should be an Account Branch? If not, I think it would be necessary to have an officer to perform the duties now performed by the Account Branch.
1847. Did you find that the payments made by the Under Secretary were principally departmental salaries and contingent expenses? Wholly.
1848. And do you not think that these could be kept in the Treasury in such a way as to avoid the necessity for an Account Branch? I think not: it would add very considerably to the work of the Pay Branch of the Treasury at a time when it is most hardly pressed.
1849. The Accountant has nothing to do with the refund of lease rents of land revenue, so far as you are aware? He has not.
1850. In the course of your last inquiry did you find that the Accountant had to perform duties somewhat foreign to his office? I have no recollection of it at the present time.
1851. Was it not usual for him to write letters, a duty which properly belongs to the Correspondence Branch? He had been in the habit of writing letters in connection with the accounts, and it was specially suggested in our report that he should no longer be allowed to do so, but that this duty should fall within the province of the Ministerial Branch.
1852. You are not aware whether that part of your suggestion was adopted? I am not.
1853. Will you kindly look at these account books which have been left here by the Accountant of the Lands Department, and see if they are similar to the books kept in the Account Branch at the time of your last inquiry? Yes.
1854. You find two Cash-books there? Yes.
1855. How are they designated? One is indorsed "Cash-book" and the other "Cash-book, 1881."
1856. But they are entirely different in construction? Yes; the first has been used as a departmental register, showing all expenditure, whether vouchers forwarded by the Lands Department to the Treasury for direct payment or abstracts sent to the Treasury for deposit of the amount they represent to the credit of the Under Secretary for Lands. The book indorsed "Cash-book, 1881" is intended to represent the amount of deposits so made and the cheques drawn by the Under Secretary against them.
1857. Do you find in the last Cash-book to which you have referred that the deposits made to the credit of the Under Secretary in the Bank have been entered? There is no entry of deposit prior to the 1st December, 1881.
1858. That was about the date of Mr. Cohen's appointment? Yes; the first entry is in Mr. Cohen's handwriting.
1859. Then prior to that, that book has not been kept as you suggested it should be? It has not.
1860. Will you kindly look at the credit side of that book and tell us what description of entries are there? I find that not only the amounts properly chargeable against the advances made to the Under Secretary for Lands are entered here, but also vouchers which were forwarded for direct payment by the Treasury.
1861. It was never intended that those vouchers for payment by the Treasury should be entered in that Cash-book? Certainly not.
1862. Then, in fact, that book is practically useless as a Cash-book? Quite useless.
1863. Because it would be impossible to balance it properly and check it with the Bank pass book? Impossible; it was intended for banking transactions only.
1864. The balance should be struck monthly, and the difference between that and the Bank balance ascertained? Yes.
1865. That difference, if everything were right, would be represented by the unpaid or unrepresented cheques? It would.
1866. *Mr. Powell.*] Practically there was no Cash-book at that time? No; that is, if these represent the whole of the books then in use.
1867. *Mr. Thomson.*] You were Examiner of Accounts in the Treasury for many years? From 1872 to 1878.
1868. When in that position it was your duty while so engaged to see that all claims presented for payment were properly authorized? That was my duty.
1869. Did you consider it your duty to see that these authorities were genuine, that is, that the signatures were not forged? I should have considered it my duty.
1870. That is to say, to the best of your ability? Yes; I do not mean to say that I should examine every signature minutely to see whether it was forged or not, but if I had the slightest suspicion I should take care to find it out.
1871. You consider that an important part of the duty? Yes; and I think any officer having important payments to pass should consider himself responsible for the genuineness of the signatures which really authorize them.
1872. During the time you were Examiner I suppose you passed many authorities for the refund of revenue? A large number—many thousands.
1873. In most of those cases the refund was made on the certificate of the Auditor General? In all of them, with the exception of drawbacks and refunds of Customs duties, which are passed upon the checked returns and certificates of Customs officers.
1874. You would therefore have more confidence in passing those documents than if they had not borne that certificate? I should consider the fact of their having previously gone through the hands of another officer an additional check.
- 1875.

1875. You have heard of the frauds committed by Harris, the late Accountant in the Lands Department? I have.

C. H. T.  
Pinkey.

1876. Some of these were frauds in connection with refunds from the Lease Branch. Can you offer any suggestion to protect the Government against similar frauds? The only possible suggestion I could make would be to send the original papers along with the refund voucher.

10 Feb., 1882.

1877. To the Treasury or to the Auditor General? To the Auditor General, for verification.

1878. You think that would be an additional check? I have thought over the matter, and it appears to me the only possible check in addition to those we have at present.

1879. If that course were adopted, do you from your experience as an Examiner think it would entail much additional labour on the Audit Department? It would certainly occupy more time to examine, not only into the proof of the payments into the Treasury and the correctness of the sums to be refunded, but also into the sufficiency of the authority for the refund proposed to be made.

1880. In view of what has taken place, do you think it would be desirable, even although a little extra expense should be incurred, to carry out such a system? I can only say so in the light of what has occurred, because previous to that I thought the verification was complete.

1881. But you now see its defects? Only from forgery or collusion.

1882. *Chairman.*] Would not the furnishing a schedule of supposed refunds under the hand of the Under Secretary for Lands, from week to week, or from month to month, as might be deemed advisable, to the Auditor General, to be compared with his register, furnish a check as valuable, or almost as valuable, as sending him the original papers? I have thought of that plan; and if such a schedule were prepared by an independent officer, that is other than the one who has the preparation of the refund vouchers, I thought it would prove a valuable check. But I discarded that idea from my mind, because I came to the conclusion that it would take far more time to carry out, and would require a second check in the Audit Department. The monthly schedule would have to be gone over and compared with the registers, while the original papers would be verified at the same time as the original audit.

1883. Does your experience teach you to what extent the original papers accumulate in ordinary cases? They might range from simple cases, which are immediately discovered to be proposed purchases or leases which cannot be allowed, to cases of a complicated nature; they would vary from three or four, perhaps to sixty, pages of foolscap.

1884. Do not the original papers sometimes refer to three or four different cases? In some instances.

1885. And the examination of these original papers would involve considerable time, and require very great care on the part of the Examiner in the Audit Office? I should not for a moment suppose that he would go over the whole of the papers to see that the Minister had properly decided upon the refund, but that he would simply satisfy himself that the Minister *had* approved it.

1886. But in nine cases out of ten I understand there is no notice on the papers of the approval of the Minister? In cases where the decision of the Surveyor General is sufficient by showing that there is not sufficient land, or that the land is not available, that may be the case. It is only in questions of law that the Minister himself authorizes the refund. All formal refunds are made upon the report of the Surveyor General.

1887. Then you think that to forward the original papers with the application for refund would be the simplest and most effectual mode of verifying the amounts? It appears so to me.

1888. *Mr. Powell.*] Would not the number of papers, supposing them to be forwarded to the Auditor General, be a guarantee against malpractices and render forgery less possible? It would be scarcely possible for the cleverest forger to manufacture papers supposed to be original.

1889. Then the fewer the papers the less would be the trouble of examination? No, I do not see that; the examination in the Audit Office would simply extend to the decision of the Surveyor General or the approval of the refund by the Minister, which would be noted on the last paper; it would not be necessary to question the decision of the Minister or the formal opinion of the Surveyor General.

1890. I take it then that, in forwarding the papers to the Audit Department, it would be understood that the subject matter of the papers would not be subjected to a close audit? I conceive that it would not be within the province of the Audit Department to find out or be responsible for more than that the refund was duly authorized.

1891. Referring to the Chairman's suggestion to send a schedule of approved refunds, might not the signature to that schedule be also a forgery? Yes; but the guarantee in that case would be that it was prepared by an independent officer other than the officer who had prepared the refund vouchers, and it would be compared with the vouchers at the end of the month.

1892. Can any check, in your opinion, be so perfect as that of sending the original papers with the refund vouchers to the Audit Office? It appears to me not.

1893. *Chairman.*] Would not the carrying out of that system be attended with great risk of losing important papers in their transmission backwards and forwards? It would be attended, I suppose, with the usual proportion of risk to which all papers sent from one Department to another are subjected.

1894. And therefore it would be desirable that with every batch of papers a schedule describing each separate communication supporting the claim should be sent? If that were necessary the system would have to break down.

1895. Supposing on the receipt at the Audit Office of a set of these original papers a very important document were found to be missing, the clerk who forwarded the papers from the Lands Department would declare that he sent it, while the clerk in the Audit Department would affirm that it never came? The same thing might be said in respect to all documents or letters sent from one Department to another, to none of which a schedule is attached.

1896. I am afraid it would be a source of constant conflict between the Departments? I am not prepared to defend the system, but it is the only one I can see that would be effectual.

1897. *Mr. Thomson.*] Do you see any reason why these authorities for refunds of land revenue should be sent in the first place to the Treasury? I think there is every reason that they should not.

1898. You have been in the Receiving Office, and you know that the Receiver can do nothing with them? He has no means of checking them; they are merely entered at the Treasury for the purpose of enabling him to answer the occasional inquiries of those to whom refunds may be due.

MONDAY, 13 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Abram Orpen Moriarty, Chief Commissioner of Conditional Sales, Department of Lands, examined:—

A. O.  
Moriarty.  
13 Feb., 1882.

1899. *Chairman.*] How long have you held your present position in the Lands Department? Practically since the close of 1877; I forget the exact date.

1900. You were previously Under Secretary for Lands? Some years ago I was Under Secretary. I was Chief Clerk and Commissioner for the Metropolitan District in 1875.

1901. What staff have you under you? Thirty-six permanent clerks and about thirty-five temporary clerks—about seventy altogether, irrespectively of the Commissioners and Inspectors in the country.

1902. Who is your immediate assistant? Mr. Blackman.

1903. What branch of the duty of the office do you yourself personally superintend? I supervise the whole; I review the reports and minutes of all matters which go to the Minister, including the recommendations from the Survey Department, and I direct all the correspondence. I have been obliged to give up signing ordinary correspondence for some two years past; it became so voluminous that it was necessary to obtain relief, and the Minister approved of Mr. Blackman's signing all ordinary correspondence for me; he does merely the executive duty of signing; no communication is made without my authority.

1904. Do you sign the forms for refund deposits? No, they are signed by Mr. Blackman—the actual intimation to the Treasury; he has done so for the last three or four years. I think it was in 1875 that it was first arranged that the Treasury were to take Mr. Blackman's signature or mine for that of the Under Secretary.

1905. Do they come under your notice, or does he act independently of you? I do not see the notices, but no refund is authorized unless by direction of the Minister or myself.

1906. Do the papers bear evidence of that direction? In every instance the papers bear either my signature or that of the Minister. There are certain matters which I do not submit to the Minister, which are matters of official arrangement; all matters for decision or authority are submitted to the Minister.

1907. Then it rests with you to determine under which class the papers coming before you shall be treated? That I take to be my own responsibility. I need not observe that I should not be very likely to encroach upon the Minister's province and to make myself responsible for anything beyond my own.

1908. Then after these papers have been approved either by yourself or the Minister, what action is taken by your Department? They go from Mr. Blackman to the clerk whose business it is to prepare the refund notices. His first step is to refer to the register to see whether the names are correct, whether the entries correspond with the books, and to see whether there are any other purchases involved in the same transaction; for example, if the original purchase is found to be void, any additional purchases that may be made in connection with it are void also. Transfers may possibly have been made of the original application, and it is the duty of the clerk to see whether that is the case by reference to the books.

1909. What is the name of that clerk? Mr. Bailey.

1910. Then if he finds anything wrong, what is done? He reports it to Mr. Blackman or myself.

1911. And if it is found correct, what does the clerk do with the form? He fills up the forms, takes them to Mr. Blackman for signature, and then makes a second reference to the books to see whether any transfer or other action may have taken place in the interim,—perhaps some authority may have been sent for an agent to act. Then he notes in the register the avoidance, or cancellation, or refund, hands the refund notices to the despatch clerk for despatch to the Treasury or to the party concerned.

1912. Then they do not come before you or Mr. Blackman again? No; I only see the documents before action is taken, and Mr. Blackman sees them when he signs them; but he has nothing to do with the final despatch. After the refund clerk has done with the papers they are passed to the clerk in charge of the register, to be finally put away and locked up.

1913. Under that system is there any reasonable probability of fraud being perpetrated? I do not think the system we have is absolutely proof against possible fraud by a trusted employé, not theoretically, but it has been in operation for over twenty-one years, and I have never heard of any attempt at fraud having been made, much less succeeded. I may mention that up to some six or seven years ago the system of refund consisted in merely sending what we term the refund voucher from the Department to the person entitled to receive the money; he had then to transmit it to the Treasury, and after it had been referred to the Audit Office for verification, it had then to pass through the various Branches of the Treasury for payment. Complaints were made of continual delays, and with a view to diminish these delays and superadd a check, I suggested some six years ago that the notice to the Treasury should be despatched direct from the Lands Department, which would admit of the necessary checks and audit being made while the documents sent to the claimant were in course of transmission to and fro through the post. That system provides an additional check, that is to say, there is the communication to the Treasury, there is also the communication to the party accompanied by the verified document which he has to present to the Treasury, so that in point of fact the system resembles the giving of a cheque and a separate notice on which the payment is to depend. That change, and perhaps a little more activity in the departmental action has put a stop to the complaints of delay, and I have not heard of any frauds having been attempted. With regard to Mr. Harris, I have not seen any of the papers relating to his transactions, and I only know of them by hearsay; but I have been given to understand that, among other frauds which he succeeded in carrying out, he forged the Under Secretary's signature to the appointment of a clerk to my office while I was in England; and that he forged an abstract for this clerk, and received his pay. Curiously I heard this morning, on inquiring as to the period when this occurred, that the last payment retained in this way was on the 5th August last, which was about a week after my return to the Colony. But this payment was obtained through the Under Secretary's notes and not through mine, so that I am not aware that Harris has attempted any frauds in connection with my Branch while I have been in the office. I do not exactly understand how that expenditure in my Department could have been passed

passed without Mr. Blackman's signature, because it had been distinctly intimated some time previously that no expenditure was to be passed without his signature or mine.

1914. As I understand it, your Branch is perfectly distinct from the other Branches of the Department? Yes, I take my instructions direct from the Minister. Matters relating to expenditure and finance I submit through the Under Secretary, but in all other matters within my own Department I am the official organ.

A. O.  
Moriarty.

13 Feb., 1882.

1915. Then you are not aware of any frauds having been committed by Mr. Harris in connection with your Branch of the Department? No, with the exception of the one I have mentioned, and another in his continuing to draw the salary of a disgraced Inspector for some months after he had been disgraced.

1916. You have no knowledge of that yourself? No, I only know it from hearsay. But I have heard also that some of the frauds committed by Harris in connection with the refund of lease rents would have had relation indirectly to my business, inasmuch as some of those refunds, I am told, were made on the ground that the conditional purchases in virtue of which the leases had been taken had been cancelled. But I only know this from hearsay. I could hardly understand how that could have taken place, because the inquiry would naturally have been made as to the cancelled purchase and its state, and that inquiry would at once have disclosed something irregular.

1917. I think you say that you think the system of making these refunds is one which provides every reasonable precaution against fraudulent treatment? I think it is a fairly careful and business-like system, and during twenty-one years it has been proof against fraud and irregularities of any kind. Perhaps, while I am on this subject, I may say that in the beginning of this year I found it necessary to change the mode of keeping the Conditional Purchase Registers. They were so bulky and comprehensive, and the business in connection with them involved references through so many hands that a good deal of inconvenience occurred. The system up to the end of last year was that each person was responsible for his own entries in the registers; one person would note one class of business, and one would note another.

1918. In the same Register? In the same Registers. That system had its advantages, but it also had its disadvantages, one of which was that no person except the clerk in general charge of the whole was responsible for the state of the Registers. At the beginning of this year I carried out a change I had long contemplated, by placing one clerk in charge of each group of Registers and making him responsible for everything they contain. Superadded to that, it would now be possible to provide another check by the transmission at short intervals to the Audit Office or Treasury of a return or schedule, prepared by a different hand, of the refunds or avoidances noted in the Registers.

1919. What classes of refunds come within your jurisdiction? Those in which the purchase is of itself a void or bad one. For example, a great many applications are made for land that is not available, or land which has been already sold, or they are made by a minor, or they are within a reserve, and so on. All these matters, involving as they do no authority properly so called, come within my own action.

1920. Can you say what is the amount of refunds made upon conditional purchases in the year? I have been shown here a published statement giving £28,000 as the amount of refunds actually made. I should have thought it was at least double that amount.

1921. From your experience in the Lands Department, not only in your present position but as Under Secretary for Lands, will you give the Board your opinion as to the best check to be applied, other than the checks which now exist, upon the system of making refunds in connection with pre-leases? I am hardly qualified to advise you on that point—it is some years since I saw a pre-lease case; but I think that when refunds are made of pre-lease rents in connection with supposed refunds on conditional purchases it would be a good thing for the verifying officer to compare the two.

1922. You are aware that the forms of application for refund are forwarded to the Treasury in the first instance and sent by the Treasury to the Audit Office for verification? One of the two forms is sent to the Treasury, the other is first sent to the party entitled to receive the refund.

1923. Do you think it would be a possible and an effective plan to send to the Audit Department direct with the refund authority the original papers connected with it? In a great number of cases it might be done, but it would be inconvenient in some where the action was partial only, that is to say, where a partial refund only was to take place. Where other action is going on with the same documents in connection with the title of the applicant, the more directly the Lands Department are charged with these papers and the fewer the stages through which they pass the less risk is there of complications. Where purchases are absolutely void there is no reason why the papers should not be sent to the Treasury, except that they are often subsequently required for reference.

1924. Not to the Treasury. It has been proposed, as a check upon such fraudulent transactions as have been brought under our notice in Harris' case, that the original documents should accompany the refund authority to the Audit Office? I think the action would be only partial, because other and more important action would be going on in the Lands Department in connection with the same papers in a large proportion of cases.

1925. Then you think such a system would be attended with considerable inconvenience and delay. I think so.

1926. And do not you think such a system would impose upon the Auditor General a duty which necessarily and properly belongs to the Lands Department itself? I must say I think the Lands Department is properly chargeable with advising in a reliable manner the Audit Office and Treasury of the refunds which ought to take place.

1927. You are aware that the verification of the Auditor General on these papers amounts to this and to this only—that the money which it is proposed to refund has been previously credited to the Consolidated Revenue? My impression was that the Auditor General's function embraced an audit of the payment as well.

1928. That is a different affair altogether. I am speaking of the verification before payment. Do you think, from your experience, that it would be practicable for the Auditor General or his officers to go through the original papers in connection with every case of refund in a manner satisfactory either to the Government or the public? I can only say that the transactions are very numerous and generally technical, arising out of the administration of the land laws and their various clauses, and must number about six every day in the year; the number of cases dealt with last year was about 1,800.

1929. With regard to these transactions in your own Department, I think I understood you to say that the papers bore evidence of your own or the Minister's approval? In every instance.

A. O.  
Moriarty.  
13 Feb., 1882.

1930. Therefore, if those papers were to accompany the refund authority there would be no difficulty in seeing at once that they were approved by you? No; but I should object to part with these records, even for purposes of audit.

1931. There would be the danger of losing some of the papers in their transmission from one Department to the other? Yes, and more than that, there would be the extra and unnecessary references in connection with them. The number of references already made is so great as to be in itself dangerous. It has been objected that these papers now go through too many hands, and this objection would be increased. The papers in connection with conditional purchases are of very great importance, as they form the foundation of the title of the purchasers and their only evidence thereof up to the ultimate grant, that is for a period of some eight and twenty years.

1932. Then you think you would be compelled, in the interests of the persons concerned, to object to part with them? Yes; I have already objected to part with them to the surveying officers.

1933. Do you think that the preparation and transmission to the Audit Office, weekly or monthly, of a schedule setting forth the refunds that have been authorized by yourself would be a protection against fraud? I think so.

1934. Would you prefer that system to the other? I should much prefer it.

1935. And you believe it would be effective? I think so, bearing in mind that there would be a third check? I should be glad to see it in operation, because in matters of this kind the checks cannot be too many. I make the suggestion, and it is my impression that at a former period a similar course was adopted in connection with the Audit Department in some other matters of business. I now send the Treasury weekly a list of transfers.

1936. But you think that the transmission of the original documents with the refund authority would be attended with very serious risk? I think so. There might be an understanding that any particular paper that might be specially asked for should be sent, but to send all the papers I think would be a very bad system.

1937. *Mr. Thomson.*] I think you said that the refunds from your Branch average six a day? About six a day, I think.

1938. Can you tell us how you are put in motion with regard to these refunds—what is the first action in your Branch in respect to them? The action depends to some extent, wholly in fact, on the character of the objection. Sometimes the applications come to me direct from the land agents. A land agent sometimes calls attention to something in a case which he notices as an objection when he submits the application. If that objection is of such a character as in my opinion vitiates the application, I take action upon it from the land agent's report. Sometimes the clerk charged with the Conditional Purchase Register in examining the application detects some irregularity. The head clerk in that Branch then notes the document, and sends it to me, and I take action upon that. But the great bulk of cases pass into the Survey Office, and are reported upon by that office to me; and when the objection is one of an official character I deal with it myself, as I have already said. If authority is involved, or there is a question of disputed rights to the property or the like, then I take the Minister's instructions. Thus the objections made to me are from the land agents, from the clerk in charge of the Conditional Purchase Register, or from the Surveyor General.

1939. And you deal with these cases on your own authority? I can hardly call it authority; I act on my own responsibility. The purchases themselves are absolute purchases, and the Minister himself has no authority to refuse a purchase or cancel it; but it very often happens that on account of conflicting interests and other reasons the cases are so important that I submit them to the Minister and take his directions.

1940. In the majority of cases I suppose the number of papers which accumulate is not very large? Sometimes it is; for example, the bulk of conditional purchases are on unmeasured land. The surveyor's report is the first additional paper obtained; then there are one or more reports from the Inspector, the declaration by the party at the end of three years, and the Treasury report on interest or balances. Ordinarily each case of selection before survey would have five documents connected with it. In many cases there are hundreds of documents where the claims are involved or disputed for instance, or where they are complicated by questions of improvements by lessees, and there is a heavy correspondence.

1941. Then in a number of cases the papers have to go to the Surveyor General? In all cases where the applications are not cancelled on receipt for some technical irregularity they go to the Surveyor General.

1942. And afterwards they come back to you? Yes, either examined and noted, or regular, in the Charting Branch, or with some recommendation or report from the Surveyor General's Department.

1943. It is only important cases that you refer to the Minister for Lands? No; I refer some cases which are unimportant in themselves but important in principle. For instance, it is found, on measurement, that a purchase contains 30 acres of land less than the area applied for. In that case it is usual to advise that the purchaser is entitled to have a certain amount of money back; but if the number of acres is three more, it is an act of authority to give him that extra quantity, and I take the Minister's direction on the subject. Or if a selection is made of a measured portion, containing (say) 640 acres, and it is found that the applicant has only paid a deposit on 610 acres, I call upon him for the difference, on my own responsibility. My action is purely official; all authoritative action is by the Minister, and I take his instructions.

1944. Then in the matter of refunds, do you take upon yourself to note upon the papers the amounts to be refunded, after the Minister has given his decision? No, I do not note it myself.

1945. What then is the nature of your decision? My usual note is "void," in which case Mr. Blackman proceeds to issue the refund notice to the Treasury for the whole amount, or, if a part only is available, for the part. My note refers to the action to be taken. I do not myself make out the figures; the acreage is given in the application, and the note shows the action upon it.

1946. Does Mr. Blackman make these calculations himself, or does he depute some one else to make them? The refund clerk does that; of course it is checked by Mr. Blackman.

1947. Then the papers simply pass from you into Mr. Blackman's hands, and thence to the refund clerk? The office is just now a little out of routine—it is spread over several buildings, and Mr. Blackman at present is not in the same building with me, and consequently the papers go to Mr. Neate, the next clerk in seniority, and from him to the refund clerk, through the clerk in charge of the refund clerk's Branch.

1948.

A. O.  
Moriarty.  
13 Feb., 1882.

1948. Then is it Mr. Neate or the refund clerk who makes the calculations for the refund? The refund clerk; they are very simple, 5s. an acre.

1949. I suppose the forms that are used for refund authorities are lying loose in your office, and in no one's charge? I do not know any grounds for that supposition; they are obtained by the refund clerk and are kept in his custody, and he is responsible for the number of them and for their execution.

1950. They are not in books with butts to them? No, they never have been.

1951. Does the refund clerk keep these forms under lock and key? I do not think he does.

1952. Then I suppose any officer in the Branch would have access to them? Certainly, if required.

1953. Or any gentleman from another Branch of the Department might easily pick up some of these forms and make use of them? Possibly; of course that would mean theft and forgery.

1954. Do you think it would be of any advantage to have these forms in books with butts attached and numbered consecutively, and kept under lock and key for the future? It might; but during twenty-one years we have not found it necessary. I know that in some instances similar forms are prepared in that way and left about in the same way as the forms are supposed to have been.

1955. But that is not the fault of the system so much as the carelessness of the individual? Yes, but the system did not prevent it. Probably it would be a good plan to have the refund forms in a book.

1956. I presume these forms would be filled up by one gentleman, registered by another, and signed by a third? Yes.

1957. In that case there would be less chance of fraud, would there not? Probably there would be; it would be a very proper precaution to have forms of that kind in books and numbered consecutively.

1958. Seeing that the refunds of conditional purchase money amount to such a large sum in the year, do you not think it necessary that every precaution consistent with convenience to the public and the Department should be adopted? Certainly, no precaution that vigilance could suggest to prevent forgery would be misapplied. It is however some testimony to the efficiency of the present system that during such a number of years there has been no instance of irregularity.

1959. You must however admit that the present system is a loose one, in so far as these forms are left lying about? Excuse me, I have not admitted that the system is a loose one, nor have I admitted that the refund forms are left lying about. I have informed you that they are in the custody of one reliable officer.

1960. Are you aware whether any one has called the gentleman in charge of these forms to account for the number he has used? I have no doubt that when a requisition is sent in for a further supply he has to account for the expenditure—that is a rule of the Service. I never sign a requisition myself without comparing the number asked for with the ordinary expenditure. Some time before the Evans frauds were discovered I was not satisfied with the mode of expenditure. I found it difficult to obtain information, and I had reason to suspect that there was room for fraud. I saw, for instance, on one occasion that my own salary had been paid in money. This struck me as being irregular, and I looked a little more closely into the matters, and I then agreed to do what I had objected to do before, to take upon myself the payment of salaries of my own subordinates. Up to that time I had contented myself with having my signature to the salary abstract; but some time before the Evans frauds were committed, thinking that something might go wrong, I agreed to take the whole duty upon myself. But that plan, though authorized was not carried out, because I became ill, and had to go to England.

1961. So that plan is not in operation now? No, except that all expenditure is certified by me.

1962. The payments are made to you through the Account Branch? Through the Under Secretary, which relieves me of a great deal of trouble and responsibility.

1963. Did you or the Minister for Lands intimate to the Treasury that Mr. Blackman was authorized to sign refund vouchers for you? I think that was done in 1876, when Mr. Stephen was Under Secretary. Mr. Blackman has signed in all cases for the last two or three years, unless he has happened to be absent from the office, when I have signed myself.

1964. Then you consider that you are quite justified in signing for him in his absence? Yes, he signs for me when present.

1965. You do not depute any one else to sign for him in his absence? No, no other person has authority to sign for me; no other signature would be taken at the Treasury.

1966. Are you aware whether Mr. Blackman examines these papers thoroughly, to see if the refunds are duly authorized before he signs them? It would be his duty to see that he was not signing at random. Mr. Blackman is a very experienced officer, and I know that he does examine them, because he often brings papers to me and points something out, showing that he must have done so.

1967. I presume you are considered to have authority to make these refunds by virtue of the position you hold? I take it to be my duty; it is not a matter of authority, but of duty. I do not care to take authority on myself unnecessarily.

1968. The Minister's duties in connection with these matters are defined by law I presume? Yes.

1969. Can you tell the Board whether those refund vouchers are sent up to the Treasury daily, or are they sent up in batches? I think they go up day by day as the cases come in; I do not think they go up in batches, unless several cases come in at the same time.

1970. Have you any means of ascertaining from the Treasury whether the money has been refunded or not? I do not know when payments are made at the Treasury.

1971. So that you have no notation in your books beyond that made when the vouchers go up? Except that it sometimes happens that the vouchers get lost and the parties apply for duplicates. In such cases duplicates are never issued until application is made to the Treasury or Audit Department to ascertain whether the previous documents have passed.

1972. If any fraud were committed in connection with a refund of conditional purchase money it would be discovered in a short time? Any inquiry through the Audit Office or Treasury in connection with any refund could be answered in two minutes.

1973. What I wish to know is whether you think in the case of a refund of a fraudulent nature the fraud would be discovered in the course of time either in your office or in the Treasury? It must be discovered ultimately, because subsequent action would be taken in connection with the Treasury which would bring to light any refund that was made, but not necessarily very speedily.

1974. Not probably for three years? Possibly not for three years; but if the application was a forgery it might be discovered at once. It must be detected within three years of the application being made.

1975. Is the period for payment of instalment not extended to five years now? No.

- A. O. Moriarty:  
18 Feb., 1882.
1976. The interest must be paid up at the end of three years? Yes—instalment rather.
1977. The five years apply to the improvements? Yes.
1978. Mr. Powell.] As I understand you, a fraud might remain undetected for three years? Yes, in an extreme case.
1979. And you have told us that during your twenty-one years' experience you have found the present system to work fairly well? I have never heard of any case of attempt at fraud or irregularity in connection with these refunds.
1980. Then I understand you to speak of your own Branch of the Lands Department only? I am speaking of refunds in connection with conditional purchases.
1981. You are aware that refunds have been passed by the Audit Office on the signature of the Under Secretary, and that his signature was forged? I am told so.
1982. And that the Lands Department failed to detect the frauds? I really do not know what took place, but I understand that these frauds were detected by the Lands Office.
1983. You have told us that every refund passes through the hands of the refund clerk, Mr. Bailey, and that the documents bear the signatures of Mr. Blackman and yourself? The refund notices are signed by Mr. Blackman and the original papers bear my signature. It is quite possible that the risk of detection would be increased if the Treasury were to advise me of payments made from time to time, as I have suggested that I should advise the Treasury of refunds authorized.
1984. Do you think if all the papers duly verified in connection with a refund accompanied the claim to the Treasury and Audit Office, that would be an additional check? I hardly think it would, because the papers would be altogether technical.
1985. But if they are passed on a single signature, such as that of the Under Secretary for Lands or Mr. Blackman's, is not that fraught with danger? Of course there is the same risk of forgery that there would be with any other cheque given in business.
1986. Was not that the foundation of Harris' frauds—the forgery of one signature only? I really do not know; but I understand the foundation of Harris' frauds was an intimate acquaintance with the routine of the Lands Department, the Treasury, and the Audit Office, a position of peculiar confidence, great cleverness, and great rascality.
1987. In the cases where you think it inadvisable to part with the papers, do you not think that an abstract of the papers bearing the signatures of the different officers in your Department would be an additional check? That is very much what I suggested a short time ago—a weekly or monthly abstract.
1988. You spoke of papers which were noted by yourself as void, in which case Mr. Blackman prepared to give notice of refund. Would not those papers alone be a sufficient guarantee to the Audit Office or to the Treasury for the payment of the claim? No doubt they would.
1989. Do you think there would be any greater danger in letting these documents go out of your office than there is generally in respect to documents which are sent from one office to another? These are not ordinary documents the loss of which might be attended with but slight inconvenience; they evidence the title of the land, and the loss of them might be ruin to the purchaser; they are as valuable as a grant would be.
1990. But the general run of papers might be parted with without any danger? The great bulk of these papers are cases of partial refund only, where the application is the foundation to the title. Where the cancellation is total and the whole application is declared void, then the document of course becomes thereafter a mere official record, but still an important one.
1991. Are not the cases of partial refund fewer than the others? I think they are more numerous; but I am speaking from recollection only—I have not compared them.

William Blackman, Chief Clerk in the Conditional Sales Branch of the Lands Department, examined:—

- W. Blackman.  
13 Feb., 1882.
1992. Chairman.] The position you hold in the Department is next in rank to Mr. Moriarty? Yes.
1993. And in that position you are authorized by him to sign documents of different kinds,—I allude especially to refund vouchers? I was not authorized by Mr. Moriarty, but by the Minister.
1994. You are authorized by the Minister to sign the refund notices of deposits on conditional purchases? Yes.
1995. In performing that duty what is the mode of procedure; how do the papers come to you in the first instance? The Chief Commissioner was absent lately for twelve months, and all the papers came to me then from the Survey Department connected with the cancellation of conditional purchases.
1996. You were then *in loco* of the Chief Commissioner? Yes.
1997. But now that he is present what is the procedure—do these papers now go to Mr. Moriarty? Yes, in the first instance, with certain recommendations or statements of fact by the Survey Department as to the conditional purchases, by which he sees whether they are to be declared void or not. If for instance the Surveyor General reports that a certain conditional purchase is on a reserve, Mr. Moriarty at once, without reference to the Minister, notes upon it that it is void; it then comes to me, and I see that the letters are prepared, and that the Treasury is authorized to refund the money.
1998. And what are the letters and notices which are sent? A notice to the Treasury that the conditional purchase is void for certain reasons, either because it is on a reserve or on some one else's land, or because it does not adjoin the original purchase, or some other reason. Then we inform the Treasury and also inform the individual that his purchase is declared void.
1999. Then there are two notices sent, one to the Treasury and one to the purchaser? The notice to the purchaser is also the voucher? Yes, and another to the Land Agent, telling him that the purchase is declared void, which he has to note in his books, because the purchase stands good with him until we inform him that it is not.
2000. Do you prepare these notices yourself? I have clerks under me to do it; they pass through my hands.
2001. What are the names of the clerks to whom these notices are passed for preparation? Mr. Bailey is one, Mr. Hobbs is another, and Mr. Lackey is a third.
2002. Are these notices of frequent occurrence? Yes, we have had a great many refunds.
2003. What is the daily average? About six,—thirty-five per week for 1881.
2004. Are they so numerous that you require the assistance of three clerks to fill them in? Yes, but there

there are various other miscellaneous duties, such as calling upon applicants for extra deposits—for balances of subdivision fees—refunds of subdivision fees—instructing Treasury to refund interest and instalment—changes of district and of section, and other minor matters.

W. Blackman.  
18 Feb., 1882.

2005. Then, after they are filled in, what action is taken? All the entries have to be made in our books, then I sign the letters and they are despatched.

2006. After the necessary notices are prepared they are brought to you for signature? Yes.

2007. And do you satisfy yourself by an inspection of the original documents from which these refund forms are prepared that they are accurate in every particular? I do.

2008. Before signing them? Yes.

2009. Are you satisfied that the present system is an effective one against the fraudulent treatment of these forms as could be applied? Yes; I do not see how frauds could be committed; we have never had a mistake.

2010. You are not aware of any attempt at fraudulent treatment? No, I am not aware that anything of the kind has occurred. There have been occasionally some little miscalculations where a few acres too much or too little have been put down, but they have always been rectified. During the whole time Mr. Moriarty was away I used to declare these purchases void and sign the letters to the Treasury authorizing the refunds. I used to put in the papers—"This purchase is void," or "This purchase is to be cancelled." When the Chief Commissioner returned he took that duty upon himself. I took a large bundle in to the Minister to sign, and he said—"Mr. Moriarty used to do all this work, and did not worry me," and I said—"I cannot do it, because I have no authority," and he then gave me authority to sign them.

2011. Did he give it to you orally or in writing? Orally, and in writing as well.

2012. Then you discharged the duties of the Chief Commissioner as well as your own? Yes, as well as one person could do them. I had to stop in the Department till 10 o'clock at night. Our refunds go through so many hands that it is almost impossible for the slightest mistake to occur.

2013. Do you think it would be advisable to forward the original papers in connection with these refunds to the Audit Office for check and examination? I hardly think it would, because they are wanted in the Charting Branch of the Survey Department. I am afraid it would lead to serious delay.

2014. Do you think there would be danger of losing them? I think so, and I think it would seriously delay the work of the Survey Department.

2015. The refunds are very considerable? Yes, very considerable in the aggregate. 1,827 conditional purchases were declared void in 1881; on 818 conditional purchases the areas were reduced; the total amount refunded in 1881 was £75,132 6s. 3d.

2016. From your experience in dealing with these matters, can you make any suggestion to the Board as to a more effective check upon the issue of refunds? Mr. Moriarty and I went into the question in a very elaborate way, and for a considerable time before the present arrangements were made, and I think the system now in force was the result. I cannot suggest anything at present.

2017. And you are not aware of anything having arisen which makes it necessary to establish any further check in connection with the business of your Branch? I am not aware of anything.

2018. Are you aware whether Mr. Harris attempted to forge either your name or that of Mr. Moriarty? I do not think so—I never heard of it.

2019. Upon any document in connection with your Branch of the Service? No.

2020. Then no person ever signed these refund vouchers except yourself? Except the Chief Commissioner, the Treasury would not take any other signature. A letter was written to the Treasury stating that my signature was to be taken in all these matters and no other would be accepted.

2021. The Chief Commissioner signs only when you are absent? Only when I am absent; he has too much to do.

2022. *Mr. Thomson.* Do you remember in what year you were authorized to sign these authorities? It was three or four years ago—I forget the exact date.

2023. That was when the Conditional Purchase Branch was established as a separate Branch? Yes, some time after. I have been signing three or four years in that particular way.

2024. When Mr. Moriarty signs in your absence, is it necessary for the Minister to give him authority to do so? He always had authority.

2025. By virtue of his office? No, verbally or in writing. He has had conversations with the Minister and received certain instructions; he has done nothing of that kind by virtue of his office.

2026. Then do you think that a letter was sent in to the Treasury authorizing Mr. Moriarty to sign refunds when he became Chief Commissioner? I cannot exactly say. It has been an established fact that he was authorized to sign them, and he would not do it without authority. I know that he has on various occasions spoken to the Minister about it—in fact to every Minister coming in.

2027. Before you sign these refund vouchers I presume you have the initials on the document of the clerk who has made the calculations for you? Yes, everything is initialled as it goes along; that is how we distribute the responsibility and make a number of persons liable for any flaw in it.

2028. How many officers have you engaged in filling up refund vouchers? About three. Sometimes the work is a little too much for them and I have to get some one else to give a hand.

2029. You do not, however, wish the Board to understand that it takes three men to fill up the refund vouchers? No, that is only part of the duty; they have to make the preliminary examination to see that everything is correct; they have to look over the papers.

2030. And compare them with the Register? Yes, and afterwards to note the result in the Register.

2031. How many Registers have you in continual use in connection with conditional vouchers? About 300, out of which 140 constantly, and occasionally more are employed in connection with refunds.

2032. Have you as many Registers as there are in the Treasury? I think so. We have a Register for every abstract and for every land agent.

2033. Does one of the three gentlemen you have named exercise a special charge over the other two? He does.

2034. So that the refund vouchers they prepare pass through his hands before they come to you? Yes, unless the gentleman who is associated with him, and who is very intelligent and understands the business just as well, brings them direct to me.

2035. Have you a Register of refunds, that is, a book in which you keep a record of all the refunds authorized? Yes.

- W. Blackman. 2036. Who keeps that book? One of the three clerks I have referred to.
- 13 Feb., 1882. 2037. Is it the one in charge, or one of the others? Generally the one in charge, if he has sufficient time; we have been very careful in selecting intelligent, trustworthy men for this work.
2038. You consider it a very important duty? Yes, very important, and one which ought not to be hurried over in any way.
2039. Where do you obtain the refund forms? The Government Printer furnishes them.
2040. Are they supplied upon your requisition? Yes.
2041. Not upon Mr. Moriarty's? I generally initial and he signs, but sometimes I sign for him.
2042. Have you any idea how many you get at a time? About a thousand, I think.
2043. When you receive these forms, do you place them in charge of any one in particular? They are in the charge of the senior clerk of the three who carry out that work—the detailed work.
2044. Do you ever check the number of the forms to see that none of them have been improperly used? No; I do not see how they could be improperly used; they are of no use unless my initials are attached to them, and there is other writing upon them; and if there were anything wrong, even the smallest difference in the handwriting, it would be certain to be detected.
2045. You have heard of the frauds committed by Harris? Yes.
2046. Do you know how those frauds were committed? I know nothing about them.
2047. Have you not heard that Harris forged the names of several officers of the Department? Yes, I have.
2048. Would it not be very easy for a clever clerk in your Department to forge your name? I suppose that what has happened once might happen again; but he would also have to forge the handwriting of the clerks who fill up the body of the form.
2049. Supposing Harris had been a clerk in your Branch, do you think it would have been possible for him to perpetrate frauds similar to those he perpetrated in the Pre-lease Branch? I hardly think it would, because there would be a greater number of risks in carrying them out; he would not only have to forge the signature, but the writing of various persons in the body of the form, and he could not do that by reference to the books himself.
2050. You think the inspection in the Branch is so complete as to leave very little room for a clever rascal to play similar tricks? I do not see how he could.
2051. But the same action that was taken with lease rents in connection with which Mr. Harris committed his frauds is taken with reference to conditional purchase money, I presume? Yes, I suppose so.
2052. Then, of course, if a fraud could be committed in one Branch it could be committed by a clever man in another Branch under similar conditions? It is just possible.
2053. That being the case, do you not think it is necessary that every precaution should be taken to prevent frauds of that kind from being attempted? I do indeed.
2054. Do you consider it a good plan to leave the refund documents lying about the office in the way I understand they are now left? Well, they are not under lock and key I admit, but they are not lying about. I have always selected for this duty the most trustworthy clerks in the Department; in fact, their fitness for this particular work has stood in the way of their promotion, and would stand in the way of their promotion to-morrow; they know their work so thoroughly well, and the work is always up to date.
2055. Do you think it would be a satisfactory check to have the refund forms in books with butts, and kept under lock and key? I think it is a good suggestion.
2056. It would not impede your business in any way? I do not think so.
2057. There would not be much more delay in using forms in books with butts? No; I think it would be a very good plan.
2058. Do these forms go up to the Treasury daily as they are prepared, or are they kept until there is a batch of them? No, I send them up as fast as they are done.
2059. Do you think there is any advantage in sending them to the Treasury to be forwarded by the Treasury to the Audit Office for verification? I can scarcely say, as that is a matter entirely for the Treasury; we send them because they wish it to be done.
2060. *Mr. Powell.*] Supposing the refund forms were in books with butts, as suggested by Mr. Thomson, and a weekly abstract from the Refund Book were sent to the Audit Office, would not that also be an additional check? So that the Audit Office could compare it with the vouchers when they came in?
2061. Yes? No doubt it would, if it were regularly done; we could do that if desirable.
2062. *Mr. Thomson.*] There is no obstacle to your doing it that you can see? No; in fact we would do anything to facilitate the matter and make security doubly secure.
2063. Are you under security? No.
2064. Do you not think it would be well to put your assistants and yourself under security, as you have such large powers in your hands? I do not know that exactly.
2065. Would it not have the effect of making your assistants more careful? I do not think anything could make them more careful; they were selected for their carefulness and trustworthiness.
2066. Does the Treasury ever return any of these authorities, pointing out that they are wrong in any way? Sometimes we have an authority sent back for a name to be supplied or something of that sort.
2067. Have you never had them returned because the dates or areas were wrong? I think there have been some returned on that account; but there were complications in the papers that almost rendered it inevitable, and we had to refer to the Surveyor General to determine the question.
2068. Do you ever make refunds of interest on conditional purchases? No, that is always done by the Treasury. We always refer people to the Treasury for anything in the way of interest; we have nothing to do with that.
2069. Is it in your Branch that the improvement purchases are dealt with? No, they come under the Under Secretary.
2070. In what is called the Ministerial Branch? Yes.
2071. Then you have nothing to do with anything except the conditional purchase refunds? Nothing at all.
2072. *Mr. Powell.*] The officers in your Branch being according to your own showing in a position of great trust, is not that a strong reason why they should give security for honest conduct? I suppose that is a question for the Board to determine; they know all the facts of the case; we have never imagined that there was the slightest possibility of a mistake.

2073. *Mr. Thomson.*] But seeing that your Branch of your Department is very much in the position of a Bank, issuing authorities for the payment of money, do you not think that every precaution, even to the taking of security from those concerned in the preparation of these documents, should be adopted? I think every precaution should be taken certainly—any course in fact that would make careful clerks more careful, and even serve to impress the Department with the seriousness of the duty.

W. Blackman  
13 Feb. 1882

WEDNESDAY, 15 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Joseph Sutton, Land Agent in Sydney, examined:—

2074. *Chairman.*] You are engaged as a land agent in Sydney? Yes.
2075. Where is your office? At the Exchange.
2076. Have you been for some time engaged in that occupation? Yes, for more than ten years.
2077. And you have had frequent intercourse with the Lands Department in connection with that business? Yes.
2078. Were you acquainted with an officer in the Lands Department named Harris? I was.
2079. When did you first become acquainted with him? About two years ago, probably a little more; I first knew him in the Lease Branch.
2080. In what way did you first come in communication with him? In my capacity as a land agent, calling in the usual way to get information.
2081. That was about two years ago? Yes, somewhere thereabouts.
2082. Did you know anything of him previously? Nothing whatever.
2083. *Mr. Thomson.*] Were you ever requested by Mr. Harris to act as his agent, or the agent of any person named by him, in connection with land transactions? Yes.
2084. To what kind of business did your agency apply generally? Generally in the way of getting leases set right, and obtaining refunds in frequent cases.
2085. It was not confined exclusively to obtaining the refund of lease rents, was it? Not exclusively. I did something for him, I think, after he left the Lease Branch, in the way of obtaining refunds for land resumed by the Government.
2086. That was during the time Harris was Accountant? Yes.
2087. When in the Lease Branch was he in the habit of writing you private notes requesting you to call and see him? Yes.
2088. He always came outside to speak to you on those occasions, did he not? No; he has come outside, but he generally spoke to me in the office.
2089. Had he a room of his own—I am referring now to the time he was in the Pre-lease Branch? He had no room of his own in the Pre-lease Branch.
2090. Did it not strike you as strange that an officer in the Department should send for you for the purpose of placing business in your hands? No, it did not, as I had reason to believe that it was frequently done. He represented to me that the parties were personal friends of his, but that, being in the Government Service, he was prevented from acting for them.
2091. Did he allow you a commission on all sums obtained from the Treasury by you under his instructions? Not absolutely a commission or percentage on the amounts, but a small fee for each transaction.
2092. Had you any written agreement with him to do this business for him? No, nothing special, beyond his written notes to me.
2093. Was that allowance not regulated by the amount of money recovered? No, it was not.
2094. It was a fixed fee? Well, sometimes there would be a little more trouble and difficulty in obtaining the money, and the fee would be a little larger on that account.
2095. Did Mr. Harris assign any reason for asking you to undertake the collection of moneys on his behalf? He said the parties were personal friends of his, and he wished it to be done for that reason.
2096. Did it not strike you as somewhat remarkable that a young man who had just entered the Lease Branch should be authorized by persons residing in the country to obtain refunds for them in this way? No, it did not, as I had been informed that he had been in the Government Service before, and I thought he might have been associated with these persons previously.
2097. Then you knew he had been employed in some other Department? I was informed that he had been employed in the Audit Office—in fact he told me so himself.
2098. Were you not aware that it is contrary to the rules and regulations of the Service for a Government officer to act as private agent for the payment of public funds? I was aware that it was irregular for him to act on his own behalf, but I was not aware that it was irregular for him to employ an agent.
2099. Was not his action in the matter tantamount to his acting as agent himself? Not exactly; he told me he had informed the parties that he had employed me as agent.
2100. Mr. Harris, I think, told you that he employed you because he dare not go himself to the Treasury? Yes.
2101. Was not that in itself sufficient to arouse suspicion and create in your mind a doubt of his integrity? No, it did not; I believed him to be honest at the time; of course I knew his reason—that he could not go to the Treasury himself, being in the Service.
2102. Did he ever tell you what commissions he obtained on the transactions placed in your hands? He never intimated to me that he obtained any commissions at all.
2103. Can you tell the Board the aggregate amount of fees or commissions paid to you by Harris during the time you acted for him? About seven, or eight guineas.
2104. Altogether? Yes, altogether, or it may probably have been ten; it did not exceed ten guineas.
2105. How did he pay you this commission or fee,—was it on each transaction, or did you render him an account periodically? On each transaction.
2106. Did he ever pay you by cheque? Never.

J. Sutton.  
15 Feb., 1882.

- J. Sutton. 2107. How many transactions have you had with him altogether, do you recollect? Ten or twelve. I left a statement of the transactions I had with him, with Mr. Oliver the Under Secretary for Lands.
- 15 Feb., 1882. 2108. *Chairman.*] Did you ever receive refunds at the Treasury in connection with conditional purchases on behalf of Harris, or at his instigation as agent for the persons to whom the money was to be refunded? No, it was principally lease money; there were no refunds on conditional purchases.
2109. *Mr. Thomson.*] When you were requested to call upon Mr. Harris, did you usually find him in the office? Yes, generally.
2110. You have however occasionally found him absent? Yes.
2111. On those occasions did you ever mention your business, for instance to Mr. Ireland, of the Account Branch, or to any officers of the Lease Branch if they happened to be there? No, I do not think it is probable that I did.
2112. I presume you seldom went to see Harris unless he requested you to do so? Never unless requested.
2113. When you were in the habit of going to the Account Branch of the Department, did you converse freely with him in the office, or did you go outside? Generally in the office.
2114. Did you talk of the business for which he had sent for you? Yes; he was very frequently alone in the office.
2115. If Mr. Ireland had been in the office, would you have conversed on the subject in his presence? Yes.
2116. After Harris became Accountant you had a number of pre-lease rent transactions with him, had you not? I think there were one or two pre-lease cases only, they were chiefly two cases of refund where the Government had resumed the land for road purposes.
2117. The authorities for lease rent refunds were as a rule drawn out by Harris, and sometimes signed by the Under Secretary? Very frequently.
2118. That being the case, did it never seem to you as somewhat remarkable that Mr. Harris should continue these transactions after his connection with the Lease Branch had ceased? I think I only acted for him in two cases after that; I am not prepared with the dates at this moment, but I left a list of them with Mr. Oliver the Under Secretary for Lands.
2119. You never asked Mr. Harris to explain to you why he continued to engage you as an agent in connection with pre-leases after he had ceased his connection with the Lease Branch? No, I never put the query to him in that way, but he intimated to me that, as I had been so long acting as a land agent, and had some experience in the matter, he preferred to deal with me.
2120. Did he ever appear to you to be afraid of detection? No, not to me in any way.
2121. When he sometimes went outside the office with you, did you never suspect any wrong-doing? No; I asked him on one or two occasions whether I should not send a bank draft up direct to these gentlemen in the same way that I do with my other clients, and he said no, that he had some other little matters to do for them outside the office work.
2122. So he put you off your guard? He put me off my guard.
2123. You never considered it your duty to report any of your private interviews to the Under Secretary? No, I never considered that there was anything irregular.
2124. Did you never consider or feel that your transactions with Harris were not legitimate ones? No, I did not.
2125. You kept a cash book, I presume? A memorandum book.
2126. Did you enter in that book all the sums you received from the Treasury on Harris' account? Yes.
2127. In doing so, did you enter them in Harris' name, or in the names of the respective claimants? In Harris' name, on behalf of the respective claimants.
2128. Did you cash the Treasury cheques yourself, or simply hand them over to Harris and allow him to do as he liked with them? I cashed them on receiving instructions from him to do so.
2129. Did he give you instructions to receive the money from the Bank in any particular form? Yes.
2130. Did he ever explain to you why he wished the money in a particular form? No; he simply said that it was to pay in various sums, and that he would rather have one large note than several small ones.
2131. Did you ever lodge money to his credit at a Bank in Sydney or elsewhere? No.
2132. Have you any objection to furnish the Board with a copy of all your transactions with Harris? I cannot give it now, but I will supply it. (*Appendix S.*)
2133. Had you ever any reason to suspect that the documents he gave you authorizing refunds to be paid by the Treasury were fraudulent? No, I had no reason to suspect it.
2134. You know Mr. Wilson's signature well, I presume? Pretty well.
2135. Please look at that document (*handing paper to witness*), pay voucher No. 14,999, of 3rd June, 1880, and say whether you think the signature attached to it is Mr. Wilson's? It very much resembles it. I have seen various documents signed by Mr. Wilson and this very much resembles it, but I could not swear to it.
2136. That document purports to be an authority for the refund of £9 to Mr. Alexander Milligan, being rent paid on certain leases for the years 1876 and 1877? Yes.
2137. You received that money as Mr. Milligan's agent? I received it at the request of Harris.
2138. But as Mr. Milligan's agent? I suppose so, but I had instructions from Mr. Harris to receive it on behalf of Milligan.
2139. In other words, you received your instructions secondhand? Yes.
2140. Mr. Milligan did not send you an order to receive the money? No.
2141. You received it from Harris? Yes.
2142. How did you come to fill up the order form? That was at the request of Harris; he sent me a note asking me to fill it up.
2143. Were you in the habit of filling up these order forms without question? Yes, I have done it frequently.
2144. Did you never communicate with the parties yourself? No, I did not; but I told Harris once or twice that I would prefer to send a Bank draft direct to the parties themselves.
2145. Which he objected to? Which he objected to.
2146. Were you acquainted with the signature of Charles A. Brown, who was at one time in charge of the Lease Branch? Yes.

2147. Look at that pay voucher, No. 18,339 for £12, in favour of Mr. John Dickson (*handing paper to witness*), and say if that is his signature attached to the authority? Yes, it very much resembles Mr. Brown's signature. J. Sutton.  
15 Feb., 1882.
2148. You could not, however, swear to it of course? No, but it very much resembles it, and I have seen Mr. Brown's signature scores of times.
2149. Did you receive the money in that case? No, that is not a case that I have dealt with.
2150. Who did? Charles B. Walsh has signed for it.
2151. Do you know who Charles B. Walsh is? No.
2152. You are acquainted with Mr. Oliver's signature also, I presume? Yes.
2153. Please look at that document (*handing paper to witness*), pay voucher No. 28,943, of 2nd November, 1880, for £125 16s. 10d., and say if you think that is his signature attached to the authority for the refund of that amount to J. T. Learmonth? Yes, it very much resembles Mr. Oliver's signature.
2154. You received that money on the 23rd November, 1880? Yes.
2155. What did you do with it? I paid it over to Harris.
2156. Were you acting as Mr. Learmonth's *bona fide* agent or only for Mr. Harris? I was acting for Mr. Harris and by his directions.
2157. Where did you obtain the information to enable you to fill up the order on the Treasury, which seems to be signed by Mr. Learmonth, whose signature appears to have been witnessed by one Albert W. Gilbert, J.P.? This authority was forwarded to me by Harris, with instructions to fill up an order for the amount.
2158. You had no reason to doubt the genuineness of Mr. Learmonth's signature? No. I did not know Mr. Learmonth's signature; I looked at it, and it appeared to me to be like a squatter's signature.
2159. Are you acquainted with the signature of Mr. W. W. Stephen, the late Under Secretary for Lands? Yes.
2160. Look at this pay voucher No. 21,930 for £59 2s. 5d., and say if you recognize the signature to the authority to refund that sum to Mr. J. C. Anderson as Mr. Stephen's? Yes, it very much resembles Mr. Stephen's signature.
2161. You received that sum as Mr. Anderson's agent, did you not? As in the previous case, on the authority of Mr. Harris.
2162. To whom did you pay the money you received? To Mr. Harris.
2163. Passing over several sums paid to you as the seemingly authorized agent of various parties, we now come to three payments made to you on the 30th March, 1881, as agent for William Rudd, of Wanganilla, in the Hay district. These three payments, which were £48 2s. 9d., £33 15s., and £21 8s. 7d., making a total of £103 6s. 4d., were received by you as agent for Mr. Rudd? Yes, I remember that case; Harris instructed me by letter to apply for them.
2164. Will you kindly tell us what you did with that money? I paid it over to Harris, by his instructions, considering him to be virtually entitled to it.
2165. Why did you pay it to Harris when you wrote to the Under Secretary for Lands on the 10th March, 1881—thirteen days before Mr. Rudd's authority for the payment to you of the three sums mentioned—applying "on behalf of your client William Rudd, Esquire," for refund vouchers for the same? I had a letter from Harris requesting me to apply for the amount, which I did not specify in my letter, as Mr. Rudd's agent. I left that letter with the other papers with Mr. Oliver. Harris said—"I wish you to apply on behalf of my friend William Rudd" for such and such refunds, particularizing them. I had Harris's written authority.
2166. That is your letter to the Under Secretary for Lands (*handing paper to witness*) applying for the refund? Yes, I sent it on Harris' written authority.
2167. Did you not think that the statement therein made was a fraudulent one? No, that did not occur to me at the time.
2168. Can you prove to the Board by document or otherwise that you were the authorized agent of Mr. Rudd? Not directly his agent.
2169. If Mr. Rudd never received these sums which were lawfully due to him, do you not consider yourself responsible to him for the money? No, because I have Harris' letter to show that I was instructed by him. I should not have applied for the money unless I had been instructed to apply for it by Harris.
2170. You received from the Treasury, on the 7th February, 1881, a refund of £74 0s. 8d. on account of Mr. Thomas Robertson, Hay—Can you tell us whether you remitted that sum to Mr. Robertson? No, that was paid to Mr. Harris.
2171. Did you obtain any receipt from Harris for the amount? I had various receipts from Harris, and I think I had a receipt for that.
2172. You are aware, I presume, that in this case you applied to the Under Secretary for Lands on the 13th January, 1881—that is, two weeks before the date of Mr. Robertson's order to pay you the amount—for this sum "on behalf of your client," as if you had been previously instructed by him to act for him in this matter? I was instructed by Harris, as in the former case.
2173. That is your letter of the 13th January, 1881 (*handing paper to witness*)? Yes, that is my letter; that was written on Harris' instructions to apply for the refund. I left Harris' instructions with the Under Secretary for Lands.
2174. That being the case, do you not consider yourself legally liable to Mr. Robertson for that amount, as he never received the money? I do not; I acted on the instructions of Mr. Harris.
2175. But when you sent the letter to the Under Secretary for Lands stating that you were Mr. Robertson's agent, without stating that you were acting for any one else, did you not consider yourself liable for the amount? I did not; I have done it in other cases outside of my instructions with the Lands Office. Friends of mine have asked me to apply for payment of sums due to them, but in such cases I have always remitted the money to them by Bank draft.
2176. Do you not consider that a document of this kind is a fraudulent one? It is no fraud on my part, inasmuch as I received instructions to apply for the money.
2177. You received several sums from the Treasury at the instance of Harris in 1881, in favour of persons entitled to them in view of the resumption of land by the Government for road purposes, did you not? Yes.

- J. Sutton. 2178. You were in the habit of filling up the order on the Treasury on your own behalf as agent for these parties, were you not? Yes, the orders were filled up as in previous cases at the request of Harris, who instructed me to return the orders when I had filled them up, and he would forward them to the parties himself and get their signatures.  
15 Feb., 1882.
2179. Where did you procure these forms? Originally from the Treasury, where any land agent can obtain them on application; I had usually a supply on hand.
2180. Then when you had filled them up you forwarded them to Harris? Yes.
2181. And he returned them to you? Yes.
2182. Have you any explanation to make to the Board of this matter? No, nothing beyond what I have said in reference to previous cases.
2183. Did Mr. Harris caution you to secrecy in any of those transactions in which you were concerned? No, he said nothing of that sort to me.
2184. *Chairman.*] And you had no suspicion that anything fraudulent was being done? Not the slightest.
2185. The signatures attached to the documents placed in your hands were so perfect that they never suggested to your mind any fraudulent intent? Not in the least. I did not know the signatures of many of the supposed Magistrates whose names appeared as witnesses, but I knew those of Mr. Oliver for instance, Mr. Wilson, Mr. Stephen, and Mr. Brown.
2186. You are not in the habit of criticising the signatures of the Magistrates who witness the signatures? No; there are many of them I do not know, and whose signatures I never saw.
2187. Will you be good enough to look at this pay voucher, No. 3,382, for the sum of £187 6s., claimed by William Richards, of Singleton, and paid on the 3rd June, 1881 (*handing paper to witness*)—Is there anything in that document which suggests to your mind any irregularity in connection with it? No, here is Harris's pencil—"Payable from the Advance Account."
2188. Did you receive that amount? Yes.
2189. And what did you do with it? I paid it over to Harris.
2190. Did you get a fee from him for so doing? Yes.
2191. Might I ask what fees he gave you? I do not exactly remember—I think it was a guinea, or if the case was a troublesome one it may have been two guineas, but I think it was usually a guinea.
2192. There was nothing in this case to lead you to suppose that any fraudulent transaction was in question? Not at all.
2193. Did you fill up the order? Yes.
2194. By whose instruction? Harris's; I have got it in writing.
2195. *Mr. Powell.*] Have you had any communication with Harris since the discoveries which led to his removal from the Civil Service? None at all.
2196. *Mr. Thomson.*] We have some private notes here from Harris to you—Have you any objection to answer questions in reference to them? None at all.
2197. There is one here (*producing paper*) dated 3rd August, 1880, to this effect: "I enclose you an amended advice refund circular in lieu of the one you have, dated the 2nd instant, which please destroy at once, as one is signed by the Under Secretary, and the other by Wilson—destroy *Wilson's, &c.*" Did the receipt of that note not create suspicion in your mind that something was wrong? No, I simply took it that the wrong person had signed. I know that these irregularities do occur sometimes in the Lands Department; I have frequently known irregularities occur in various ways.
2198. But you never suspected anything wrong? No; I considered that the previous letter of advice being wrong, it had to be destroyed as being of no use.
2199. If you had received the payment of £187 6s., referred to by the Chairman in a previous question, on behalf of the claimant, without the intervention of Mr. Harris, what commission would you have received on the transaction? About the same as I charged Mr. Harris; there is no scale of charges or regular percentage; the fee depends upon the work and labour that has to be done to obtain the payment. I have never charged percentage on the actual sums, but simply a fee.
2200. The fee corresponds with the labour involved in recovering the amount? Yes, it does not depend so much upon the amount as the time and trouble employed in obtaining it.

William Nicholls, warehouseman to Messrs. Saddington & Sons, of Barrack-street, Sydney, examined:—

- W. Nicholls. 2201. *Chairman.*] Have you been in the habit of taking any business in the Lands Department in connection with refunds? On two occasions I have taken documents up to the Treasury and received cheques for them.  
15 Feb., 1882.
2202. Will you kindly state what those sums were? One was about £50, and the other about £30, more or less—I cannot remember the exact amounts.
2203. And by whom were you employed to do this? By Mr. Harris, the late Accountant of the Lands Department.
2204. Did you not think it strange that he should employ you to do this duty? No, I did not give it a second thought; he told me any one could act as collector to collect these moneys, and that there was one guinea fee for collection. I thought so little about it that if I had had the opportunity I should have gone on with the business. He said it was all right, and that I was simply to collect the money as an agent.
2205. Were you acquainted with Harris previously? Yes, some eighteen months or two years before; he married into the same family that I did.
2206. Were you acquainted with him before he joined the Public Service? No, he was in the Lands Department before I knew him, shortly before his appointment as Accountant.
2207. Then his employment of you for this duty did not convey to you any idea of wrong-doing? Not the slightest; if he had given me a dozen or twenty orders to cash I should have taken them; I had not the faintest suspicion of anything wrong.
2208. Was this one of the documents you got cashed for him; it is a Treasury voucher, No. 19,580, for the sum of £50 (*handing paper to witness*)—Is that your signature? Yes.
2209. What did you do with the money when you received it? I took it to Mr. Harris in notes; I remember that they were principally £5 notes and some £1 notes, and he returned me one guinea as the fee for collection. I got the cheque from the Treasury, and signed it as you see.

2210. Will you tell me if this is the other case mentioned (*handing paper to witness*), Treasury Voucher, No. 15,694, for £38 16s., which also bears your signature? Yes, that is my signature. W. Nicholls.  
15 Feb., 1882.
2211. And what did you do with the money in that case? I returned the cheque with the papers he gave me to Mr. Harris; I did not cash that cheque. I took the £50 cheque to the Bank of New South Wales, and got the money and gave it to him; but the cheque for £38 16s. I gave to him, and he asked me to write on a slip of paper a receipt for the collection fee of one guinea for the sum due to Mr. King, or whatever the same was, which I did.
2212. Who filled up this authority to receive the £38 16s.? I do not know at all.
2213. Was that authority handed by you to the Treasury when you applied for the money? I forget now; I had two or three of these payments.
2214. You do not recognize the writing in the order to receive? No; I recognize Mr. Harris's writing in the body of the form from the Lands Department.
2215. You observe that the order is made out in your favour? Yes; acting as agent, neither more nor less.
2216. Did I understand you to say that you gave the cheque for £38 16s. to Mr. Harris? Yes, to Mr. Harris himself.
2217. Whose cheque was it? I do not recollect—it is so long ago; but at any rate he had the cheque, and he took my receipt on a slip of paper for the collection fee, which he said would be forwarded with the other papers, and he gave me £1 at the time.
2218. Were you instructed by Mr. Harris to pay the £50 over to him in notes? Yes; he asked me to get so many £5 notes and so many £1 notes. I forget how many there were, but I know the bulk of the money was in £5 notes; I think there were only ten £1 notes.
2219. Did he caution you to secrecy in connection with these transactions? No, he said nothing of that kind.
2220. Then there was nothing to create suspicion in your mind? Not the faintest suspicion; in fact I would have gone on doing the same thing, so little idea had I of anything wrong? Harris told me that a friend of his had made £5 a week at it, and I said something to the effect that I only wished I could make money as easily.
2221. He was connected with you by marriage, so that that brought you together? Yes, we married sisters in the same family.
2222. You are not then in the habit of engaging in business of this kind? No, I never did it before or since.
2223. And these were the only instances in which you acted for Harris? Yes, I never dreamt of anything of the sort before.
2224. *Mr. Thomson.*] At the time these transactions took place, I presume Mr. Harris had married into the same family as you did? No; I think this must have been before his marriage; but he was a constant visitor to the house and we met there every evening and frequently dined there, and so became intimate.
2225. Did Harris ever tell you that he was conducting a business of this kind? No, he seldom talked to me about his business.
2226. Then you were under the impression that these were accidental cases? I never gave it a thought; he told me any one could act as an agent in this way, and that he had given other cases to a friend who had made £5 or £6 a week, and that if I liked to walk up to the Treasury I could make a pound.
2227. Did you understand from what Harris said to you that this person who was making or had made £5 or £6 a week as agent was making that amount from business which he had placed in his hands? Yes, I thought so; the exact expression that he made use of was that a friend of his was making or had made £5 a week.
2228. And did he promise you that in the event of your conducting these two cases satisfactorily he would put other business in your way? No, he said nothing about any other cases. When he told me about his friend making £5 a week, I said—"Well, I wish I could make money as easily," little thinking how it was made; but I have no doubt that if he had given me the opportunity I should have done more business for him.
2229. And you had no suspicion at all? Not the faintest.
2230. *Chairman.*] Did you notice any growing extravagance in his habits? Well, he was always extravagant, in dress especially. I have said to him on more than one occasion—"I do not know how you can do it on your salary." I knew he had £300 a year, and he said—"I could not do it on my salary, but I get £50 every now and then from my father in Jamaica." After that I never suspected anything. I believe that on one occasion he did get some money from his father. We used to leave our mother-in-law's house every night and walk home together, and I used often to make these remarks to him; but when I understood that he was getting money from his father I thought no more about it.
2231. *Mr. Thomson.*] Was he a native of India? He was, I believe, a native of Carthage, in the West Indies.
2232. Do you know if he has left his family provided for? I do not think from what I hear that they have anything at all to live on, and I know that his wife has nothing, for she is dependent upon us for a living; she has stayed with one brother-in-law, and now we are thinking of having her with us for a while.
2233. Have you ever heard the amount of the frauds committed by Harris? I heard it was £1,060 or thereabouts; I think it was Mr. Oliver who told me.
2234. And do you think it was possible that he could have spent that sum besides his salary in household matters? No, and it has been a matter of speculation with the whole family what he has done with the money—he could not have spent it either in furniture or dress.
2235. Have you ever suspected that he has banked this money for the purpose of drawing it out afterwards? Since these matters have turned up I have suspected it.
2236. But his family have been unable to discover anything about it? I think not—I have not seen them lately, in fact Harris and I were on bad terms for some three months before I heard of these transactions.

Augustine Heard Fearon, Bank Teller, Government Department of Bank of New South Wales,  
examined :—

- A. H. Fearon, 2237. *Chairman.*] Do all Government cheques pass through your hands? As a rule—cheques presented  
15 Feb., 1882. for cash.
2238. You have an assistant? Occasionally, not ordinarily.
2239. In passing cheques for payment, do you observe the numbers of the cheques? No.
2240. Then if a cheque bearing the No. 210,026 were presented and paid, and a subsequent cheque numbered, say, 447 came before you, would that create suspicion in your mind? None whatever, because people do not always use the same cheque-book with consecutive numbers.
2241. The Bank you consider is not chargeable with a duty of that kind? Not at all.
2242. How are the cheques from the Lands Department usually filled up? They are drawn in favour of the payee named. I believe there is a printed number in the corner of the cheque, but we pay no attention to that.
2243. And the fact of there being a great discrepancy in the numbers of the cheques would not convey any idea of fraud to your mind? No.
2244. Have you been able to bring with you any of the cheques which have been discovered to be fraudulent? Which are said to be fraudulent—yes (*handing in papers for inspection*); the others are, I believe, in the hands of the police.
2245. Are you aware whether there is any difference between the cheques you have handed in and those of an older date? There is a difference in the counter-signature.
2246. Do these cheques bear the counter-signature of the Accountant? Yes.
2247. And before Mr. Harris's appointment as Accountant they were not countersigned? They were initialled or supposed to be initialled; we had no instructions from the Treasury that the cheques were to be countersigned until after the Evans fraud.
2248. You accepted these cheques as *bona fide*? Yes.
2249. Do you think now, upon looking at them critically, that they are forgeries? No; I am perfectly satisfied in my own mind that the signatures are Mr. Oliver's.
2250. Do you receive a statement daily, weekly, or monthly, of cheques drawn upon you by the Lands Department? No, we give them a statement of the cheques we have paid, by our pass book.
2251. How is that pass book posted—is it from the numbers of the cheques, or the payees? The numbers.
2252. As being more easy? Yes, more easy to mark off in their cash book.
2253. Can you say how often you are in the habit of furnishing their pass book? Only when asked for; we usually ask them at the end of our half-year to give us a certificate that they have examined their pass book and found it correct.
2254. *Mr. Thomson.*] And did the Lands Department comply with that request at any time? I could not say from memory; if they did we have the certificates in the office.
2255. Since these frauds have been discovered you have been made aware, I presume, that certain cheques presented to you and paid are presumed to be frauds? Yes, we have been asked to refer to them.
2256. And since you turned them up, have you compared the signatures on the supposed fraudulent cheques with the signatures on those which are not supposed to be frauds? We have.
2257. And do you find that they correspond? Exactly.
2258. You do not admit that these cheques are forgeries? No, they are fac-similes of the signatures supplied to us by the Treasury at the time the account was opened, and we believe they are Mr. Oliver's signatures.
2259. If the Government were to make a claim against the Bank for the amount of the cheques which are said to be fraudulent, would you if called upon swear that they are not forgeries? So far as a man can swear. To the best of our belief, comparing one signature with another, we say that they are signed by Mr. Oliver, and we have shown them to a great many experts who say the same thing. Of course I could not swear that Mr. Oliver actually signed them.
2260. Is it your practice before paying a cheque to examine the signature on the cheque with the signature in your book? No, we do it from memory, unless there is any doubt. If there is any doubt as to the genuineness of the signature, then we refer.
2261. Do you remember that a short time ago—perhaps twelve months ago—the Lands Department introduced a new form of cheque? Yes, I believe they commenced operating upon a different form, a thing of which we take no notice at all.
2262. Were you not informed by the Under Secretary for Lands that this new form had been introduced? Not to my knowledge.
2263. If that new form of cheque had been in operation for several months, would you have felt justified in passing a cheque of another and different form? Yes.
2264. Without question? Without question, if I were satisfied as to the signature.
2265. You would not however pass a cheque if it were written on a blank piece of paper with Mr. Oliver's signature? No, I suppose we should not, because all Government cheques are supposed to be drawn on public forms.
2266. Have you any idea how long it was after the introduction of the new forms that the cheques you have submitted were paid? No.
2267. You admit however that these are drawn on old cheque forms? I do not know at all; we take no notice of the forms.
2268. But they are not forms that are now in use? We never notice the forms, so long as they bear Mr. Oliver's signature.
2269. Did you not find that these cheques at the time they were presented stood out by themselves, inasmuch as they did not run in any consecutive order? That is a matter of which we take no notice.
2270. Is it usual for a Bank to insert in every cheque-book a memorandum requesting their customers to keep their cheque-books under lock and key? It is in some Banks, but not in ours; the Government cheque-books are not supplied by us.
2271. Do you think it would be any advantage as a check against frauds if you were informed of every new series of numbers used by a Department? I do not know whether the Bank would accept the responsibility.

2272. Would the responsibility be any greater than the responsibility of accepting the signature? *A. H. Fearon.*  
Yes, it would be extra trouble and responsibility to the ledger-keeper, and perhaps the cheques would be paid before they went to the ledger-keeper.

15 Feb., 1882.

2273. Do they not go first to the ledger-keeper to see if there are sufficient funds? No, that is not done in our Bank—the Teller takes all the responsibility. All the other Banks have the cheques marked except ours. We were robbed once by having a cheque marked. A man presented a cheque for £1,000, took it to the ledger-keeper and got it marked; then he went to a side table and altered it to £4,000, and we lost the difference.

2274. In the case of road trustees you must have the cheques marked by the ledger-keeper before they are paid? Yes, we refer all the road trustees' cheques—any cheques, in fact, of which we have any doubt.

2275. It is only in the case of large firms and persons who are known to you to have large deposits that you pass cheques without referring them? Yes; if there is any doubt about a cheque I refer it of course.

FRIDAY, 17 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, Esq., IN THE CHAIR.

C. N. J. Oliver, Under Secretary for Lands, further examined:—

2276. *Chairman.*] The Board understand that you would be glad before the inquiry closes to supplement the evidence you have already given, and they are anxious to give you an opportunity to make any further remarks you may desire to offer in connection with the subject under consideration. They also wish to obtain some information from you in connection with the working of the Deeds Branch of the Lands Department—Does that Branch come under your special notice? Yes.

*C. N. J. Oliver.*  
17 Feb., 1882.

2277. Who is the head of that Branch? Mr. M'Kern.

2278. Can you describe the process that is followed in the preparation of deeds? When a case arrives at such a stage that a deed should be prepared, the papers are sent from the Branch which deals with the case to the Deed Branch, with instructions from a responsible officer for the preparation of the deed. The papers are duly recorded at the Deeds Branch, in a book kept for that purpose, the area of the land, the number of the portion, the county and parish, and the name of the proposed grantee, are noted therein; and to the papers a number is given which is afterwards the number of the deed. An instruction is then issued to the Noting Branch of the Survey Department for the notation on the plan of the name of the grantee, how the land was sold, and particulars of that nature. The papers are then sent to the description writer, who prepares a description of the land; that description is examined by the officer in charge of the Description Branch in the Survey Office, who certifies to its correctness. The papers then go to the Diagram Branch, where a diagram is placed in the margin of the deed showing the land to be conveyed. The papers are then returned to Mr. M'Kern, the head of the Deeds Branch, for the purpose of having the deed engrossed.

2279. Then Mr. M'Kern is primarily responsible for the accuracy of the deed? Yes; of course he is supported by the testimony of each of the responsible officers through whose hands the papers have passed, and each of these officers acknowledges his responsibility by initialling the papers, the noting officer that he has noted the plan; the description writer that he has written the description; the examiner that he has examined the description and found it correct; the officer in charge of the Diagram Branch that he has placed a correct diagram on the deed. And then after the engrossment is prepared it is examined by the examiners employed for that purpose, acting immediately under Mr. M'Kern, and initialled by the Chief Examiner as correct. It is then examined in a general way by Mr. M'Kern, who officially initials it as correct, and the deeds are then sent to me in batches for the signature of the Minister.

2280. Is that a new rule? It has been the practice ever since Sir Hercules Robinson was Governor; he took exception to the system then in force, on the ground that he had no guarantee that the deed was correct, and he required to be relieved of the responsibility by the signature of the Minister for Lands. After the signature of the Minister is attached the papers again come back to me, and are in due course transmitted with a schedule to the Colonial Secretary's Department, to have the Great Seal of the Colony attached. That having been done, the deeds are sent to Government House for the signature of the Governor. They are then returned to the Colonial Secretary's Department to the Under Secretary, by him to me, and by me to the Deeds Branch, and thence sent to the Registrar General for enrolment.

2281. *Mr. Thomson.*] And are they issued by the Registrar General to the public? Yes.

2282. On payment of the fees? No, all fees are then paid except the stamp duty.

2283. Is it possible for a refund of the purchase money to be made after a grant has issued? It has been stated that such a thing has occurred, but I have made diligent inquiry and have not been able to find that such is the fact. I think there was a case of this kind:—A surveyor measured a portion of land; that land was subsequently re-surveyed by the same surveyor, or another, and included in another portion of a larger area. There were two plans furnished to the Survey Office, two plans accepted there, and two plans acted on, two areas of land paid for, and two areas of land conveyed. As a matter of fact there had been a double payment, as the smaller area had been included in the larger, and I believe, through some slight confusion, a refund was made on the smaller area before the surrender of the deed to the Crown was actually executed.

2284. *Chairman.*] How long ago was that? I cannot say.

2285. Was that the only case that came under your notice? No, there was another one, but I do not remember the particulars. The case I have described was one where no fraud was attempted and one which did not open the door to fraud—it may be said to have been a mere accident.

2286. You think every precaution is taken to prevent fraud? I think so; and I may say that, as an additional precaution to prevent any possible manipulation of the Minister's signature, that signature is actually witnessed.

2287.

C. N. J.  
Oliver.

17 Feb., 1882.

2287. Have you, since you gave evidence here before, thought of any improved system by which these refunds can be managed? I have not, and I am really of opinion that the best check, or as good a check as any that has been proposed, and certainly the easiest as far as the work is concerned, would be for the Treasury or the Audit Office—perhaps the Audit Office—to furnish me with a list of the refunds that have passed.

2288. Would it not be easier for you to furnish a list of the refunds you have authorized? It might be, but the check would not be so effective, because if a fraud had been committed the list would issue from the office in which the fraud originated; but if it came from the Audit Office to me direct it would be a list of refunds passed, and therefore upon examination if any of them were frauds they would be immediately detected.

2289. Well, but suppose you were to put this list in the hands of a fraudulent clerk like Harris, where would be the check? The list would be put into the hands of some responsible officer not in any way connected with the Branch from which the refunds were issued. No system of course can be perfect, but the list need not necessarily, and probably would not, be always given to the same officer for the purpose of being checked. Therefore any person attempting a forgery would be in hourly dread of an officer coming in armed with the list, when detection would follow immediately.

2290. *Mr. Thomson.*] But could the list, which the Chairman suggests should be sent from your Department to his, not be prepared in the same manner as the list you propose should be sent from the Audit Office to yours—could the same checks not be applied in the one case as in the other? They could, but it would be more difficult I think to ensure the compilation of a list in our office with positive accuracy than it would be to check a list sent from the Audit Office.

2291. The labour would be the same in each case, but it would be more in accordance with the principles of audit that the Auditor General should examine your list than that you should examine his, would it not? I do not suppose it would be very material whether the list came from the Audit Office or the Lands Department, if the same system of check were adopted: it only struck me that it would be better if it came from the Audit Office.

2292. *Chairman.*] But would it not be making the Audit Office do the work of the Lands Department? No, I think the suggestion is rather in the interest of the Audit Office, because it seems to me that at present the system is faulty.

2293. But do you not think that the Department immediately concerned in the preparation of these documents should be the Department from which such a list should emanate, and be examined in the ordinary course by the Audit Department? Looking at it from that point of view probably it would be; and if the same check were carried out in the preparation of this list it might be forwarded to the Auditor General, upon whom would rest the onus of detecting frauds. I think perhaps that would be the best. Of course this list should be specially sent to the Audit Department, and not sent as an ordinary letter, so that it could not be tampered with.

2294. And authenticated with the signature of the Under Secretary? Yes.

2295. *Mr. Thomson.*] And numbered consecutively? Yes; so that if there were any break in the receipt of the lists it would be detected at once.

2296. *Chairman.*] Have you reconsidered the proposition that has been laid before the Board to submit to the Auditor General the original papers with these applications for refund? I have thought the matter over, and I am satisfied that, although there would be an amount of security about that plan which does not exist at present, it would lead to a great deal of delay and inconvenience. Our papers are not like the papers of other Departments where a case is represented by a single document. We have cases where the papers are 1 foot thick, and although, we will say, A. may be entitled to a refund on a certain set of papers, there may be other claims of B., C., and D. connected with the same papers, and if to pay A.'s refund we have to send all these papers to the Audit Department, the remaining cases embraced by the papers would have to wait until their return.

2297. *Mr. Thomson.*] Is the despatch of business in your Department so rapid that a single day would be a matter of consequence? I am satisfied it would not be the delay of a single day, but often the delay of a month. If 4,000 refunds are to be passed in the year, and the investigation is to be of any value, the Audit Office could not run the cases off at lightning speed. There is another and a much more substantial reason for not sending these papers out of the office. The Department of Lands deals with cases often affecting the interests of many people, and we have great difficulty even now in preventing the exact position of a case from being known before finally disposed of. We are put in a false position by our action becoming known before it is completed, and are liable to be thereby much embarrassed. The difficulty alluded to would probably be multiplied to a great extent if the papers were allowed to go out of the office. The officers in the Audit Department would become acquainted to a certain extent with the position of cases, and might communicate their position to the parties interested, that is to say, it would put the Audit Office officials in possession of information which ought certainly to be only in the possession of the officials in the Lands Department.

2298. *Chairman.*] Then is the Board to understand that you consider the proposition to be surrounded with so many difficulties that you would consider it your duty, supposing the Board were to recommend it, to advise the Minister not to allow it to be carried out? I should certainly advise the Minister strongly not to allow it.

2299. *Mr. Powell.*] Are the papers you speak of always submitted to you before you sign a refund voucher? As I explained before, I do not always sign the refund vouchers; the papers are submitted to me for the purpose of authorizing the refund, and where the cases are simple and the amounts small, and there is no question about the refund, I authorize it on my own responsibility; if the amounts are large I take the papers to the Minister for his approval.

2300. *Mr. Thomson.*] Is it not a fact that land agents have access to these papers? Not that I am aware of; there is a strict injunction against it in the Department, and officers who allow it are liable to be suspended and ultimately dismissed. There are only two officers in the Department authorized to allow the inspection of papers—myself and the Chief Commissioner.

2301. Was it not the practice formerly to allow access to the papers, and some of them were missing? Yes. Some were abstracted, by whom could never be ascertained. I may say that I gave the direction that no one should have access to papers except by the permission of the Chief Commissioner or myself.

2302. Supposing the proposed plan of sending the original papers to the Auditor General was brought into

C. N. J.  
Oliver.

17 Feb., 1882.

into operation, would it not be quite enough to send the paper showing the Minister's decision for the refund? No; because in the case of a forgery it would be comparatively easy to forge the covering paper, and there would be nothing to support it.

2303. I do not mean a single paper exactly, but a few papers indicating the final action in the case? That would be highly objectionable, because the other papers remaining would be acted upon, and in a large Department like the Lands it is the most difficult thing to separate numbers of papers and get them together again; it would throw an immense amount of work on the Department.

2304. We have had evidence from several witnesses to the effect that they did not consider the present system of signing the refund vouchers a very satisfactory one, in consequence of so many officers being connected with it. Do you think it would be advisable to appoint a deputy—say for yourself, for example—to sign all refund vouchers? My opinion is that the composition of the Department is altogether wrong. I should have the support of a Chief Clerk, and he should be the Chief Clerk of the whole Department. If such an officer were appointed, it would be to him that I should look for protection in matters of this kind. If a deputy were given me in that capacity I should say it would be an immense benefit to the Department, and he would be a protection not only to me but to the public. I am perfectly satisfied that such an appointment would facilitate business very considerably. I suppose the Lands Department is the largest Department in New South Wales, and yet there is no Chief Clerk.

2305. You have a number of clerks in charge of Branches, but no one officer in the position of Chief Clerk? No; I have no officer whose position, unless under very special circumstances, would warrant my instructing him to go into any Branch and let me know how matters stand.

2306. If such an officer were appointed, could he undertake to sign the refund vouchers from the Conditional Sales Branch also? Certainly; I should think so.

2307. Do you think the Chief Commissioner of Conditional Sales would take exception to such interference? I cannot say; but I do not see of what value such an objection would be, unless it could be shown that the proposition was a bad one. If it were to the interest of the Department and the public, I really do not see that any opposition could be offered to it which would have any great weight.

2308. Such an arrangement would require to be authorized by the Minister? Certainly, it would be a matter entirely for the Minister.

2309. Referring to the issue of deeds, can you inform the Board who certifies to the purchase money having been duly received before instructions are given for their preparation? In cases of auction sales, Mr. Blaxland.

2310. Does he certify upon the papers in connection with each case, or how? He does not actually certify in so many words that the purchase money has been paid; but there are books kept in the Branch of which he is in charge which record all the sales, the amount of deposits paid, and the balance subsequently paid. In connection with each sale there are final reports made by the local land agents, and these final reports are examined with the books, and if it is shown that all the purchase money has been paid, the final reports are sent on to the Deeds Branch, with a direction for the preparation of the deeds. He does therefore certify to each payment, although not in so many words.

2311. You receive no certificate either from the Treasury or the Auditor General that the money has been paid before the deed is issued? We receive a report of payments from the Treasury, and it is from that report of payments that we enter up our books.

2312. Do you consider the signature of the Minister for Lands to a deed any satisfactory guarantee that the money has been paid, and that it has not been refunded? The signature of the Minister is a guarantee that the deed is properly issued, and therefore I take it that it refers not only to the payment of the money but to everything else connected with the Crown grant.

2313. Would it not be satisfactory to the public and to the Governor if these deeds were certified in some way by the Auditor General, who must be aware whether the money has been paid, and whether it had been subsequently refunded? I do not think there is any necessity for it; I think the system we have in force is as complete a system as can be; and even if it could be proved that we have in one or two instances issued both deed and refund, which I very much doubt, it is not a very great mistake, considering that we issue 10,000 Crown grants in the course of the year. There are more Crown grants issued in New South Wales than in any country in the world.

2314. And you can only think of that one double case? That is all I can think of—I have not had time to hunt up the cases.

2315. Did you not about two years ago reorganize the Deeds Branch? Yes.

2316. Was the work in that Branch very much in arrear when you undertook that duty? Yes, there were 8,000 Crown grants in arrear.

2317. Are there many now in arrear? No, there is only the current work.

2318. In your joint report with Mr. Pinhey to the Minister for Lands of 24th August, 1880, you have a recommendation to this effect:—"The Accountant's duties should be confined entirely to matters of account, all letters being written in the Ministerial Branch; he should, as the Department is at present organized, be directly responsible to the Under Secretary, communicate directly with him, and furnish security for the faithful discharge of his duties in the sum of £500." Have you since taking charge as Under Secretary carried out your own recommendation in that respect? Yes; but I have varied it slightly from necessity; I was quite unable to get the correspondence appertaining to accounts satisfactorily done in the Ministerial Branch, and I was obliged to remove it.

2319. Had your suggestions been carried out in their integrity, do you consider that it would have been possible for Harris to have committed so many frauds on the Treasury? Certainly, they would not have prevented him in the least that I can see.

2320. Did he not write the letters himself? Yes, but he could have done that even if the letters had been written in the Ministerial Branch.

2321. Do you find from experience that it is impossible that all letters can be written in the Ministerial Branch? That is not what I intended to say. It was impracticable for me some little time ago to carry on the correspondence satisfactorily and continue to have the letters of the Account Branch written in the Ministerial Branch.

2322. In a previous report from the Treasury a suggestion was made that two accounts should be kept in the Bank—one for salaries and one for contingencies—Can you tell us if that suggestion has been carried out? No; I never knew of such a suggestion.

C. N. J.  
Oliver.  
17 Feb., 1882.

2323. Had those two accounts been kept as suggested, Harris would not have had so much at his command to work upon? No.
2324. I think you told us on a former occasion that you did not intimate to the Bank that you had changed the form of your cheques? No; I have no power to correspond with the Bank; according to administrative arrangements, correspondence with Banks comes under the Treasury.
2325. Do you not think that it would have been advisable, in the light of what has taken place? I think so.
2326. Did you ever examine the books kept by the Accountant after Mr. Harris held that office? No; I never had time.
2327. Then you are not aware that they have not been kept in accordance with the recommendations made in your report? I am aware of it now.
2328. But you were not aware of it during the time that Harris was Accountant? No; I thought as there were two officers there, both having a knowledge of accounts, that it was impossible the books could be improperly kept; and I must confess that when I saw the books I was somewhat surprised.
2329. I suppose you are satisfied now that Mr. Harris was not competent for the position of Accountant? Oh, I think he was highly competent, though I do not think he did his work properly.
2330. As Accountant he does not seem to have kept any books at all? He does not seem to have kept the books certainly, but I do not think there is evidence of his want of competency; the bulk of evidence is rather the other way.
2331. But surely the way the books are kept is a proof of want of competency? I do not think the books were kept by Harris, but by Mr. Ireland.
2332. Referring to the vouchers we have had before us here, it has been doubted by several persons whether the signatures attached to many of them are really forgeries. Do you not think it possible that Harris placed these papers before the officers for their signatures, and that they, having entire confidence in him, signed them? I do not think so, and I will tell you why,—there could have been no papers with any one of them, and I am perfectly satisfied that neither my officers nor myself would have signed them without having the papers before us.
2333. But would not the fact that there were no papers have made it easier for Harris to obtain the signatures? Certainly not, because neither I nor my officers would have signed the vouchers in that case. There were no papers because the vouchers were forgeries, and in the absence of papers he could not have obtained signatures to them.
2334. I meant to say this—that it may have been the practice with Heads of Branches to sign anything placed before them as a mere matter of form, and that Harris, having frequently observed this took advantage of it to push in forged documents for the purpose of having them signed? I do not think it is possible, because I do not believe that any of my officers would sign a refund or an authority to pay money without the papers were there, and it would be impossible in these cases to produce the papers, because there were none in existence.
2335. Would it not have been very easy for Harris to put in other papers, so as to give the appearance of genuineness to the whole transaction, and by that means to throw the officer who was asked to sign off his guard? Of course it is not impossible, but it is highly improbable; I and my officers are, of necessity, so thoroughly conversant with the papers relating to all cases that the imposition would be detected at once. Harris would hardly have attempted such a dangerous experiment, because it would have led to his immediate dismissal and probable prosecution, as he would have convicted himself by presenting a paper which did not support the claim.
2336. Then is the Board to understand that you never sign a cheque yourself without having the papers in support of the payment before you? I never did, nor do, except in the case of petty cash, where of course there are no papers, as the amount is for expenditure when required.
2337. In the case of petty cash you admit that you may have been imposed upon? No, the forgery on the petty cash is clearly shown to be a forgery, from the fact that the cheque was drawn from a cheque-book not then in use.
2338. The Bank Teller, who was examined by the Board on the occasion of their last meeting, stated emphatically that he believed all the signatures to the cheques which he produced at the request of the Board were genuine signatures? I should not expect the Bank Teller would say anything else.
2339. That gentleman stated, that after it was pointed out that these cheques were forgeries, he examined some previous cheques signed by you and compared the signatures, which he found so much alike that he could almost swear they were genuine in both cases? I am perfectly satisfied that I never signed the cheques in question.
2340. My reason for asking is that I wish to elicit from you whether you ever signed cheques without examining the documents upon which the payments were made? Not only do I examine the documents, but I satisfy myself that the butt is correctly prepared; and the only occasion when a cheque was presented to me for signature without the papers I sent it back, and the papers were produced. As to what the Bank officers say I am not surprised at it, for Mr. Fitzgerald, who is Teller at the London Chartered Bank, admitted three times to me that the signature attached to the receipt for £52 12s. 7d. was his, and he afterwards on investigation pronounced it to be a forgery; and Harris, the Accountant, admitted the forgery, and got five years for it. Of course the Bank will not admit that the cheques are forgeries, but I am perfectly satisfied of it myself; and if the Crown Solicitor so advised, I am prepared to take steps to recover from the Bank.
2341. Did you ever use a stamp signature? I have used one, but not lately, and when I did it was only for circulars, printed circulars, to the land agents, of whom there are eighty-nine. They were of no importance to any one except the land agents, and I used a stamp signature for them; the stamp was never out of my possession.
2342. Was the stamp affixed by yourself or the Government Printer? By myself or a gentleman standing alongside me.
2343. It was not a signature printed in the circular? No.

John Gregory Blaxland, in charge of the Auction, Statistical, and Volunteer Order Branch of the Lands Department, examined:—

2344. How many assistants have you? Eight.
2345. Do many claims for refund come under your cognizance as head of the Auction Branch of the Department of Lands? Yes, a great many; there are two kinds of refund, from Revenue and from Trust Fund—to which do you refer principally.
2346. I am speaking of refunds of revenue? There are not many of those, because those are from the cancellation of purchases.
2347. The larger part are refunds from the Trust Fund? Yes.
2348. What class of payments are they chiefly? Under the 30th clause of the Act of 1875, which provides for the deposit of 6d. an acre for the survey of land for auction sale.
2349. Through whom do the papers in connection with these claims come to you? They come to me direct from the applicant for refund.
2350. Do they pass through the hands of the Under Secretary before they come to you? No.
2351. They come to you direct from the Record Branch? Yes.
2352. And you are authorized to deal with them without reference to the Under Secretary? No, I always refer large amounts to the Under Secretary, but there are some cases in which there is perhaps 1s. deposit paid, and in those cases I do not consider it necessary to trouble the Under Secretary.
2353. Then you exercise your own discretion as to what class of cases you shall deal with yourself without reference to the Under Secretary? Yes.
2354. Can you tell the Board the amount of refunds that pass through your hands in the year—the average amount? No, I cannot from memory.
2355. Is it very large? Yes, it is very large.
2356. Do you sign all the refund vouchers? Yes.
2357. You have authority from the Under Secretary to do so? Yes.
2358. For the Under Secretary? For the Under Secretary.
2359. And do you satisfy yourself before signing of the genuineness of the claim in each case? Always.
2360. Have you the papers before you when you sign? Yes, in every case.
2361. And you carefully examine them to see that the claim is a correct one? Yes; and on the original papers on which money is paid it is written off, in addition to its going through the books, and the original application is looked up in the case of refund and put with the papers, and these cases are submitted to the Under Secretary.
2362. Do you keep a register of these cases? Yes.
2363. Have you a register of all the cases which pass through your hands? Yes.
2364. Who keeps that register? An officer in my branch, Mr. Yeomans. In addition to that, every refund voucher that goes out is press copied in a book as a further security.
2365. Did you know Mr. Harris who was Accountant in the Lands Department? I knew him officially.
2366. Were any tricks played by him in connection with any of the cases that came under your control? No, not that I am aware of.
2367. Are the refund forms in use in your Branch ordered by you from the Government Printer? Yes.
2368. In what quantities? I think about 500 at a time.
2369. And in whose custody are they placed when they come to your Branch of the Department? They were placed in the custody of the officer who made out the refunds, but since these affairs of Harris I have taken charge of them, and placed them under lock and key, and as a refund is authorized, I give out two forms—one to the Treasury and the other to the applicant—and expect the officer to make use of these two forms.
2370. Do you think there would be any additional security in having these blank forms prepared in books with butts, and numbered consecutively? In that case each form would be accounted for, but I do not see that there would be any greater security, because to tamper with them would be forgery; the form would be of no use unless the signature were forged.
2371. *Mr. Thomson.*] You think that the mere fact of having them in books would be no check against forgery? Yes.
2372. But the person who signs the refund voucher is not usually the person who fills it up? No.
2373. Then supposing that these documents were taken out of a book and filled up by one officer in your Department, registered by another, and signed by yourself, would not that be a sufficient precaution against fraud, unless you were all three in collusion? I think not, because I have the papers complete before me when I sign, and for my own protection I investigate every case. Further than that, a press copy of each voucher is taken in the letter book. I do not see therefore that that would be any greater security. Of course the vouchers might be printed in any outside office.
2374. But supposing a clever rascal like Harris filled the position you now hold, would it not be very easy for him to do the whole thing himself and commit very extensive frauds upon the Government? Yes, I think it would.
2375. Well, what could be done by him could be done by you if you were a man of a similar stamp? Yes.
2376. Then do you not think it would be a great precaution if these documents had to pass through the hands of three gentlemen in your Branch? They do pass through the hands of three officers as it is, the officer who writes them out, then Mr. De Low, who is under me, who initials them, and they come to me for my signature, and I examine each one with the papers myself personally.
2377. Is it an invariable rule that you examine the papers yourself? Yes, at present I have to do Mr. De Low's work as well, because he is acting as land agent at Moama, and they come direct to me from the officer who writes them.
2378. You have sometimes large refunds in connection with sales by auction: will you describe to the Board the nature of these refunds? When land is surveyed for auction sale, before it is offered it is sometimes conditionally purchased, and the Department is not aware of this conditional purchase until after the sale has taken place. In that case, the Department not having the power at the time to sell the land by auction; the auction purchase is null and void, and we have to refund the money.

J. G.  
Blaxland.  
17 Feb., 1882.

J. G.  
Blaxland.  
17 Feb., 1882.

2379. That is one description of refund. I presume you have several others? There are others, in the case of a conditional purchaser having selected part of a portion subsequently sold to some one, and in that case we refund the money on that part of the area, and issue a deed for the residue.
2380. Then again, I suppose you sometimes find that the land which has been sold has been improperly put up to auction, probably from its having been afterwards discovered to be on a reserve. Have not cases such as that occurred? Yes; then we follow the same course in respect to the refund.
2381. You have also refunds sometimes in consequence of the balance of the purchase money having been paid both in the district where the land was sold and by the purchaser's agent in Sydney? Yes.
2382. In cases of refunds of this description do you authorize them on your own responsibility? No, the Under Secretary does it.
2383. And does the Under Secretary, do you know, submit them to the Minister or take the responsibility of making the refunds himself? That would be as he might consider necessary; large amounts of money he would submit, and others he would authorize himself.
2384. On the 14th August last you wrote a letter to the Under Secretary for Finance and Trade on behalf of the Under Secretary for Lands authorizing a refund of £1,842 18s. 5d. to Messrs. Finley, Allen, and Campbell, or their order, which is stated to be the amount of purchase money and deed fees for certain allotments of land, and the reason assigned for the refund is that it had been paid once into the Treasury and once to the Crown Land Agent. Do you remember that case? I cannot say I remember that particular case, but I know there have been several.
2385. In a case of that kind, would you submit it to the Under Secretary or undertake the responsibility of authorizing such an amount yourself? I should submit it.
2386. To what amount would you go on your own responsibility—have you any instructions on that point? No, it is left to my discretion, I believe; but in cases where the Treasury has received as payment the guarantee deposit of 6d. an acre and they ask me if it can be accepted as part payment of the balance, I authorize it without reference to the Under Secretary. I had a similar case the day before yesterday of 17s. 6d., which I passed. I do not think I ever had a large sum to authorize credited in that way.
2387. Do you think it is desirable that an officer in your position should authorize the refund of money on behalf of the Under Secretary? Yes.
2388. You consider it a desirable system? Yes.
2389. In what way? Because I think the head of the Branch is far more likely to re-investigate a case thoroughly, *as he signs the voucher*, than the Under Secretary, who is pressed into all kinds of work, and perhaps the signature of the head of the Branch might be harder to forge than the Under Secretary's, as, by previous answer, the matter would have already been before the Under Secretary for authority to refund if the amount was at all large.
2390. What action do you take with reference to authorizing deeds to be issued for land sold by auction? We receive a parchment form from the Land Agent and see that the money is duly reported by the Treasury as credited; we see that the names and callings of the purchasers are in accordance with the sale list, which is the contract signed at the time by the purchasers.
2391. Is the sale list furnished to you by the land agent? We furnish it to him to be filled in at the time of the auction sale, and all things being correct we authorize the deed to issue.
2392. To whom do you send the papers for the purpose of having the deeds prepared? To Mr. M'Kern, the head of the Deeds Branch.
2393. You send them direct to him? Yes; we enter them each in a book, and get his receipt for them.
2394. You get Mr. M'Kern's receipt for the papers? Yes.
2395. Do those papers come back to you again? They often come to us for intermediate action; when a plan is being noted the area may have been altered—some of it taken for a road or some other purpose—and in that case we make the alteration on the final report before the deed is issued; the parchment form which I mentioned is called the final report.
2396. Then this intermediate action of which you speak must sometimes very much upset the original arrangements? Yes, inasmuch as we may have to make a refund of a smaller amount, or we may have to call for a further payment for an extra area.
2397. And do you think it is possible that a refund of the whole amount could take place, and the deed notwithstanding be issued? I do not think so.
2398. You never heard of a case of that kind? Do you refer to my particular Branch?
2399. Yes? No, I have not.
2400. The thing is possible, however, if proper precautions are not adopted? Yes.
2401. But you think, under present arrangements, such a thing could not occur? I think not.
2402. When the papers come back from the Deeds Branch, do you examine them to see that the deeds have been duly prepared and issued? No, I do not.
2403. They are put away without any examination whatever by you? Yes, the Deeds Branch send them to the Record Branch to put away.
2404. Then supposing a deed had not been issued, and the papers were put away, who would be held responsible for the non-preparation of the deed? The Deeds Branch.
2405. It would be the Deeds Branch and not your Branch? Not our Branch.
2406. *Chairman.*] The Board then are to understand that you think it is an utter impossibility under your system to make a refund, while at the same time the deed is going on for issue? Yes.
2407. *Mr. Thomson.*] Have you any suggestion to make with reference to the management of refunds or as to a check upon your own Branch, in view of the frauds committed by Harris? No, I have not; the only precaution I have taken is to lock up the forms; they were not kept under lock and key before.
2408. *Chairman.*] You think that such reasonable precautions are taken as to leave little chance of any fraudulent manipulation of your papers? Yes, except actual forgery. I am responsible for a great number of Volunteer Land Order Certificates, which are worth very nearly £200 each. I suppose I have between £50,000 and £60,000 worth locked up in my Branch.
2409. *Mr. Thomson.*] Will you kindly describe to the Board the importance you attach to these, and the nature of the duty you perform in connection with them? The Government only value them at 50 acres of land, but we know that they pass current in the country as cheques for £150 and upwards; therefore we register them, and keep them under lock and key. They are gone through and checked once in every two or three months to see that they are all there.

2410. Where are they prepared? They are issued from the Brigade Office.
2411. And do they come from the Brigade Office to your office? No; they are issued to the Volunteers, transferred by them to individuals wishing to select land under them, and they come to us to be registered before they can be made use of.
2412. From these individuals to whom they have been transferred? Yes.
2413. Would it not be a better arrangement to have them registered as they are issued from the Brigade Office—before they go to the public? There are none issued now—the system, in fact, is abolished.
2414. Then after they are registered in your office the persons who hold them can go into the interior and select 50 acres of land in each individual case? Yes.
2415. These Volunteer Land Order Certificates must then be presented to the land agent? Yes.
2416. And he takes them as money? No, he takes them as authority for these mens' selections.
2417. And in his books he must register the selections? Yes, with all particulars.
2418. Then all the land agents send these Volunteer certificates down to you? Yes, from week to week, with an abstract and full particulars.
2419. What do you do with them when you receive them? We see in the first place that the transferee on the certificate is the same as the applicant.
2420. And you issue an order from your Branch for the preparation of the deed? No, we separate that certificate from the application and hold it under lock and key. The land applied for most likely has to be surveyed, and it may be many months before we are able to have the certificate attached and the deed issued; or the land applied for may be alienated, or it may be on a reserve, and then we should cancel the application and return the applicant his certificate for selection elsewhere.
2421. And he has the option of selecting again? Yes.
2422. But supposing the application to be right in every particular, I presume that after the selection has been made you instruct the Deeds Branch to prepare the deed? If the application is all correct it is sent to the Deeds Branch for issue of deed, and for that purpose the certificate is got out of the press and attached.
2423. Then after the deed is issued the certificate and accompanying papers are returned to you? Yes.
2424. And you put them into records as you do papers pertaining to ordinary sales? No; we note in our Register that a deed has issued and the date of it, and see that the certificate has been properly cancelled; we do that in all cases.
2425. With a view to prevent its being used a second time? Yes; then the papers are put away in the general record with the certificate attached, for reference at any future time.
2426. Have you anything to do with selections after auction? Yes, we have everything to do with them.
2427. And I suppose you go through the same course of action with them as you do with the sales by auction? Very nearly the same.
2428. In cases of selections after auction, I presume you have more refunds than in sales by auction? No.
2429. Being on measured portions, they are supposed to be complete and ready for sale? Yes; we have only to see that the land is open for selection; that being the case, and the money duly credited, we pass it on to the Deeds Branch without any circumlocution.

J. G.  
Blaxland.  
17 Feb., 1882.

TUESDAY, 21 FEBRUARY, 1882.

Present:—

MR. POWELL, | MR. THOMSON,  
MR. ROLLESTON.

CHRISTOPHER ROLLESTON, ESQ., IN THE CHAIR.

Francis Kirkpatrick, Inspector of Public Revenue Collectors' Accounts, Treasury, examined:—

2430. *Mr. Thomson.*] How long have you held your present position in the Treasury? Over five years.
2431. Previous to that you were Accountant to the Treasury? Yes, for nearly five years.
2432. How long have you been in the Service altogether? Twenty-three years last November.
2433. During that period you have been constantly engaged either in the examination or the keeping of Public Accounts? Yes,—constantly.
2434. And you have recently been engaged in examining the books kept in the Account Branch of the Lands Department? Yes.
2435. By whose instructions did you make that examination? By the instructions of the Honorable the Treasurer, conveyed to me by Mr. Eagar, the Under Secretary for Finance and Trade.
2436. With what object has that investigation been conducted? With the view of ascertaining whether the entries in the books of the Lands Department corresponded with those in the books of the Treasury.
2437. And also I presume to discover whether any frauds have been committed by Harris in addition to those which have been discovered by the Lands Department? Yes.
2438. What period did your examination embrace? From 1st January to 30th November, 1881.
2439. Have you compared the sums charged to the Appropriations for Services under the control of the Minister for Lands for that period with the entries in the books of the Treasury? I have.
2440. Did you also compare the balances shown by the books of the Lands Department with those shown by the Treasury books? Yes.
2441. Did you find any discrepancies? Yes, there were differences in the balances of nine accounts.
2442. Have you prepared a statement showing the differences between the balances of the two Departments? Yes, I have prepared a statement showing the balances of the Appropriations according to the books of the Lands and Treasury Departments respectively, on 30th November last, and the differences between these balances, which I now produce. (*Appendix T.*)
2443. Did you ascertain how those differences arose? I did.
2444. You can I presume furnish the Board with a statement reconciling the balances? Yes, in every case.
2445. Will you put that statement in as evidence? Yes. (*Appendix U.*)

F.  
Kirkpatrick.  
21 Feb., 1882.

2416.

- F. Kirkpatrick.  
21 Feb., 1882.
2446. In the course of your examination of the books of the Lands Department with those of the Treasury, did you discover entries in the latter which did not appear in the former? I did, a great number.
2447. Have you compared these discrepancies with the list of frauds committed by Harris as prepared by the Under Secretary for Lands? Yes.
2448. And did you discover any items charged in the books of the Treasury not included in that list? I did, a good many. The particulars of these items are shown in the memorandum respecting the discrepancies between the balances on 30th November, according to the books of the Lands and Treasury Departments. (*Appendix U.*)
2449. Did you discover any of a fraudulent character? No, none that were not in the list prepared by the Under Secretary for Lands.
2450. Did you examine any of these discrepancies carefully with a view to ascertain whether they were of a fraudulent nature? I did, all of them.
2451. So that you are satisfied from your examination no frauds except those already discovered could have been perpetrated by Harris in connection with the appropriations for Services of 1881 under the control of the Minister for Lands? Yes, I am satisfied no other frauds could have been committed in connection with the appropriations for Services of the year 1881 under the control of the Secretary for Lands, as the amounts charged in the books of the Treasury in excess of those charged in the books of the Lands Department are all for genuine claims, with the exception of those specified in the list referred to.
2452. What books did you find in use in the Account Branch of the Lands Department? A Cash Book, an Abstract Ledger, and an Appropriation Ledger, besides subsidiary books, such as Register of Advances, Personal Account Ledger, and others.
2453. Do you consider that these books have been properly kept? The books that I examined were certainly not properly kept.
2454. What books do you specially allude to? Principally to the Cash Book; but the Abstract and Appropriation Ledgers were also carelessly kept.
2455. You mean to say that they had not been kept as any good and proficient accountant would keep them? I do.
2456. In what way is the Cash Book defective? There are no entries on the debit side whatever up to 30th November last, and those on the credit side are not added up.
2457. Did you not find entries in the Cash Book for vouchers forwarded to the Treasury for payment there as well as for payments made by cheques on the Bank of New South Wales? Yes, I did.
2458. And you consider that they were very improper entries? Undoubtedly; because the Under Secretary for Lands had not received the money to pay those accounts.
2459. Is the system now in operation an improvement upon that which Harris had adopted? Yes, a very great improvement.
2460. Do you think an Account Branch is absolutely necessary in the Lands Department? I do.
2461. Could not the accounts be kept in the Treasury in sufficient detail to afford all the information required? Yes, but it would throw a great deal of additional labour on the Treasury Department.
2462. It could, however, be done? It could.
2463. What description of payments have been made in the Account Branch of the Lands Department? Nearly all the payments now and since July last, such as salaries, commission to land agents, appraisement fees, and payments for travelling and incidental expenses are and have been made in the Account Branch of the Lands Department.
2464. I think there is no commission now? No, but there was up to the period to which my examination extended.
2465. The Under Secretary for Lands does not, however, make any payments through his banking account for Services of a miscellaneous nature? No; the payments for these Services are made direct from the Treasury.
2466. Is it necessary that all the books which are now in use in the Account Branch of the Lands Department should be continued? I think the Abstract Ledger might be abolished and the details entered in the Appropriation Ledger.
2467. Is that the only change you consider necessary? No; there is also a Personal Account Ledger which I consider unnecessary.
2468. Does the keeping of that ledger involve much time? Yes, a good deal.
2469. Have you any suggestion to make to the Board with a view to improving the management of the Account Branch, so far as your examination enables you to understand its working? I am not aware of anything except that the Abstract Ledger might perhaps be abolished and the vouchers posted direct into the Appropriation Ledger; it might also be desirable to keep a Register of accounts paid instead of the Personal Account Ledger which is kept now.
2470. *Chairman.*] Does the Personal Ledger consist of a Dr. and Cr. account of each man's salary and payments? Yes, for salaries, exclusive of those payable to officers of the Department; and also for claims for Services of any kind that may be chargeable to the Departmental Votes.
2471. *Mr. Thomson.*] I see in the second memorandum you have put in that there have been charges on the Vote for Oyster-beds to the extent of £70 0s. 6d. which did not appear in the books of the Lands Department? Yes.
2472. Did you examine the items composing that sum? I did.
2473. Have you the vouchers with you? Yes (*producing papers*).
2474. And do you consider from your examination of these documents that they are genuine claims? There is no doubt respecting the genuineness of the claims.
2475. They did not pass through Harris's hands at all? No.
2476. So that it was utterly impossible for him to have forged them? It was.

James M'Kern, Assistant Ledger-keeper, Department of Audit, examined:—

- J. M'Kern.  
21 Feb., 1882.
2477. *Chairman.*] Do you post into the ledgers all refund land vouchers? Yes, all the refunds.
2478. Have you had placed in your hands the Refund Register of the Lands Department to compare the entries it contains with the entries in your ledger? Yes, I have.
2479. And have you completed that examination? Yes.

2480. Will you be good enough to state to the Board the result? It is given in the returns I now hand in (*Appendix V*). J. M'Kern.  
 2481. How many returns do you put in? Three. 21 Feb., 1882.
2482. What does the first return comprise? It is a memo. of differences between the Register of Refunds of Lease Rents kept at the Lands Department and the sums found to have been paid at the Treasury, as per Audit Office Ledger in 1881.
2483. I see that in this return there are fourteen vouchers posted in the ledgers of the Audit Office which have no corresponding entries in the Register of the Lands Department? Yes.
2484. And in the same return you notice six vouchers differing in amount from the entries in the Lands Register? Not only in the amounts, but in some cases in the names.
2485. The second return is a similar return of the payments during 1880? Yes.
2486. And upon examination of your ledgers, you find and show by this return thirty-five entries of sums posted in the Audit Office Ledger which do not appear in the Refund Register of the Lands Department? Yes.
2487. Have you examined the vouchers which support these entries? Yes, they have been examined.
2488. Have you them with you? Yes (*producing papers*).
2489. Have you reason to believe that they are genuine or fraudulent? I think in most cases they are genuine; there are one or two that seem doubtful.
2490. In the same return you show thirteen vouchers as posted in the Audit Office Ledgers, differing from the entries in the Lands Refund Register? Yes.
2491. Have you the documents which support that statement? Yes (*producing papers*).
2492. Would it be possible for you to state positively to the Board which of these vouchers are frauds, or whether any of them are? I think I could point out one; it is this one, bearing the Treasury number 4,658.
2493. Requesting the refund of £18 to Edward Williamson, and purporting to be signed by F. H. Wilson, *pro* Under Secretary? Yes; I doubt the signature.
2494. Did you doubt the signature at the time you passed the entry? No, I did not; it was no part of my duty to examine the signatures.
2495. Then it is in consequence of the discoveries that have been made that you are led to question its authenticity? It is.
2496. In what way do you think it would be possible or desirable to test the accuracy of these different vouchers to which you have made reference in your memorandum? I think the only way will be to refer to the Under Secretary for Lands.
2497. It would be necessary to refer these papers to the Lands Department, in order to arrive at a conclusion as to their genuine or fraudulent nature? Yes; I see no other way to set the matter at rest.
2498. What is the third document you have put in? It is simply a memorandum of vouchers that have been borrowed by the Lands Department from the Audit Office.
2499. Not having those documents in your hands, of course you could not check them? No; I do not find those items mentioned in the Lands Register.
2500. But they are entered in your ledger? Yes.
2501. Have you conferred with any officer of the Lands Department on the subject of these defects in their Register? No.
2502. And you think the only way of finding out whether frauds have been committed will be to refer the vouchers themselves to the Lands Department, to be investigated? Yes; on each voucher they quote the number of the papers on which the refund is made. These papers would be in their possession.
2503. We have no means in the Audit Office of proving whether they are genuine or not? No, I am not aware of any.
2504. *Mr. Thomson.*] What period has your investigation embraced? The period shown in the Register for the years 1880 and 1881, which has been compared with our ledger for those years.
2505. *Chairman.*] What date does the Lands Register commence at? 1 January, 1880.
2506. And there are no entries for 1879? No entries for 1879.
2507. Then, as there were no entries for that year in the Lands Register, you commenced your examination of the Audit Office Ledgers at the period on which the Lands Register commenced, which was 1 January, 1880? Yes.
2508. *Mr. Thomson.*] Did you ask if any previous Register had been used? No.
2509. Then you are not aware whether they have such a book or not? I am not sure; but I heard that this is the first book of that description they have had.
2510. You are however aware that Mr. Harris entered the Pre-lease Branch in April, 1879? I believe that was the time he left the Audit Office to go to the Lands, but I could not say which Branch he went to.
2511. Then if he entered the Pre-lease Branch at that time, would it not be necessary, in order to discover whether any frauds have been committed, to examine the vouchers from that time up to the end of 1879? I think it would be necessary, in view of what has occurred.
2512. Would it take you long to do that, judging by the time you have been engaged in the examination of the two years' transactions? I think it would take some time—two or three days at the least. In that case I had the Lands Refund Register to refer to, but in this case it would be necessary to turn up every voucher for refund of lease rent.
2513. That is, assuming that there has not been any refund register of a similar character for the year 1879? Yes.
2514. In the course of your examination, did you find entries in the Register of the Lands Department of refunds which did not appear in your books? Yes, there were numerous cases—almost every page in the Refund Register contains authorities for refunds which have not been made.
2515. Did you make a list of those entries? No; they appear in the book which I have here.
2516. Can you explain to the Board why those entries appear in one book and not in the other? Yes, I think I can. I found, upon examining these payments as shown by the Audit Office Ledger, that some of these authorities were given nearly two years before the refunds were made.
2517. So you assume from that that the vouchers are lying unpaid at the Treasury? Not in every case—they may be in the hands of the claimants.

- J. M'Kern. 2518. How can that be when the vouchers are sent to the Treasury for payment; the vouchers must be in the Treasury unpaid? Yes, I see that.
- 21 Feb., 1882. 2519. Then do you think it would be necessary, to make this investigation more complete, that you should obtain from the Treasury all the unpaid vouchers for refunds? It would in that case prevent any payments from being made improperly, subsequent to the present investigation.
2520. Then I presume you could examine the documents obtained from the Treasury, and compare with the Register of the Lands Department? I think so.
2521. All these items which appear in the Refund Register, and for which you have discovered no vouchers in the Audit Office, must necessarily have been for claims forwarded to the Treasury? Yes.
2522. But as they were not, you had no means of ascertaining whether they had been verified by the Auditor General or not? I have no means now.
2523. No ready means at all? No ready means.
2524. *Chairman.*] What is the average time between the payment by the Treasury and the posting in the Audit Office ledgers? About seven or eight days.
2525. *Mr. Thomson.*] But you find that many remain unpaid for a long period? Yes, many of them.
2526. From your examination of the Register in the Lands Department, do you consider that it has been carefully or carelessly kept? Carelessly.
2527. It has not been kept, in fact, with a view to detect frauds? It does not appear to have been.
2528. Can you make any suggestion to the Board by which that Register could be rendered more useful as a check? I think that could only be done by having it examined periodically by the Audit Department, but as every authority for refunds should be sent to the Audit Office for verification, I think it would be almost necessary to keep a similar register there. I would suggest also that when the vouchers are paid the voucher number should be inserted in the last column.
2529. In what Branch could that be done? In the Revenue Branch.
2530. The ledger of refunds which you keep in the Expenditure Branch is, I presume, simply a register of the payments made? Yes, of all the payments made.
2531. Under the head of Revenue refunds? Yes.
2532. And that must necessarily be a correct record? Yes.
2533. And agree with the Treasury books? Yes.

MONDAY, 27 FEBRUARY, 1882.

Present:—

MR. POWELL,

MR. ROLLESTON.

MR. THOMSON,

CHRISTOPHER ROLLESTON, Esq., IN THE CHAIR

James M'Kern, Assistant Ledger-keeper, Department of Audit, furthered:—

- J. M'Kern. 2534. *Chairman.*] On the 21st instant you were examined by this Board with reference to some inquiry you had been making into refund vouchers, and comparing them with your ledgers? Yes. Audit Office
- 27 Feb., 1882. 2535. And you handed in three separate returns showing certain discrepancies?
2536. In consequence of the information obtained on that occasion the *Chairman* thought it necessary to apply to the Lands Department for an explanation of those discrepancies. Are those the papers in connection with the inquiry you made (*referring to papers submitted by witness*)? These are four of the papers that were forwarded to the Lands Department.
2537. How many vouchers were sent? Sixty-seven, I believe.
2538. I believe you took them yourself to the Lands Department? I took them myself, with a letter from the Auditor General.
2539. Have you a copy of that letter? Yes. (*Producing it, Appendix W.*)
2540. And you delivered it yourself with the papers to the Under Secretary for Lands? Yes.
2541. Have you the reply to that letter? I have. (*Producing it, Appendix W.*)
2542. That letter is based upon the return which you furnished to the Board showing the discrepancies between the postings in the Audit Office ledgers and the Refund Register of the Lands Department (*Appendix V*)? Yes.
2543. What does Mr. Oliver say in that letter—does he state that the sixty-seven vouchers which you mention as having been sent to him are all genuine? No, he points out that in some four cases they are forgeries.
2544. What are the four cases stated by Mr. Oliver in his reply to be forgeries—can you name them? Yes. Edward Williamson, lease 77-18, Corowa, voucher for £18, dated 3rd February, 1880; J. Peter, lease 76-154, Oxley, voucher for £19 13s. 9d., dated 11th March, 1880; Margaret Thomas, lease 77-11, Oxley, voucher for £18, dated 26th April, 1880; and William Wood, lease 76-11, voucher for £15, dated 9th July, 1880.
2545. Have you the vouchers themselves in your hands? Yes. (*Appendix X.*)
2546. Is there anything on the face of those vouchers that would lead you or the Examiner at once to pronounce them palpable forgeries? There is only one that I doubted, as I mentioned on the last occasion on which I was examined.
2547. Which is that? The voucher in favour of Edward Williamson for £18, dated 3rd February, 1880, Treasury No. 4,658; I doubted the signature.
2548. Then your doubt as to the signature was in consequence of the discoveries that have been made of the forgeries committed by Harris? Yes.
2549. At the time you posted the document you had no doubt whatever? I had no doubt then.
2550. *Mr. Thomson.*] Was it your duty to pass these claims in the first place? No, in the last place.
2551. After payment? After payment.
2552. You did not see them before? No.

2553.

J. M'Kern.  
27 Feb., 1882.

2553. Of course if you did not see them before payment you would not examine them critically; you would simply see that there was a proper receipt for the payment made? Yes, I should see the receipt on the voucher, but I should not look into it critically.
2554. *Chairman.*] And if you did not see a receipt on the voucher you were posting you would of course draw the attention of the head of the Branch to it? Of the Examiner, yes.
2555. You were also engaged in examining the refund vouchers that had accumulated in the Treasury, and had remained there unpaid for some years past? Yes, for the years 1880 and 1881.
2556. What was the result of your examination? The result was that we found six, I think, that had not been entered in the Lands Refund Register.
2557. Did you discover anything fraudulent? No, I did not see anything that led me to think there was any fraud.
2558. Who was engaged with you? Mr. Kirkpatrick.
2559. Then you found nothing that you consider desirable to communicate to the Board in connection with this inquiry? Only the non-entry of some of the refund authorities. One of them appears in the Register as £6, and in the authority it is £3.
2560. *Mr. Thomson.*] And you have yet to ascertain the cause of the discrepancy? We have yet to discover it.
2561. You have no reason to suspect that to be a fraudulent transaction? No.
2562. You say that you discovered half-a-dozen vouchers in the Treasury that were not entered in the Register in the Lands Department? Yes, about half-a-dozen.
2563. Did you go down to the Lands Department to make any inquiry in respect of these half-a-dozen vouchers? No, we made no inquiry.
2564. Did you not think it desirable to refer them to the Lands Department to see if they were duly passed there? Yes, it would be desirable.
2565. They are unpaid documents? Yes.
2566. And of course can be retained or kept in the Treasury until inquiry is made respecting them? Yes.
-

## HARRIS DEFALCATIONS BOARD.

## APPENDIX.

## A.

## FRAUDS BY H. V. HARRIS.

Date.	In whose favour.	Amount.	Remarks.
1881.			
June 3	William Richards	£ 187 6 0	Drawn over counter of Treasury by fraudulent employment of agents, and by means of forged signatures to vouchers.

## APPENDIX B.

Mr. S. Freeman to The Under Secretary for Lands.

Sir,

Department of Lands, Sydney, 28 November, 1881.

In compliance with your verbal instructions I took immediate steps to inquire into the accounts kept by Mr. H. V. Harris, Accountant to this Department, and do myself the honor to report the result of my investigation thereon.

In the first place my attention was directed to an examination and comparison of the Bank pass-book with cheques drawn against your public account, and after a searching inquiry I discovered that the following items had been fraudulently made use of, viz. :—

	Date on which cheque was cashed.	No. of cheques.	Amount.	In whose favour drawn, and Remarks.
Cheques drawn out of obsolete cheque books.	1881.		£ s. d.	
	March 9	158617	5 0 0	Petty cash.
	" 17	158618	5 0 0	do.
	" 26	158629	5 0 0	do.
	May 10	158632	16 5 0	G. T. Hunt.
	" 25	158637	29 3 4	Wm. Wallace.
	June 25	209997	15 12 6	G. T. Hunt.
	July 1	210402	53 12 7	P. F. Richardson.
	" 4	210197	16 5 0	G. T. Hunt.
	" 11	210601	13 8 4	P. F. Richardson.
	" 11	210019	5 0 0	Petty cash *
	" 18	210196	6 5 0	Wm. Spicer.
	" 29	210195	3 10 0	Gardiner & Cool.
Aug. 5	210026	16 5 0	G. T. Hunt.	
Cheques drawn on the official form in use.	Sept. 9	L 447	10 0 0	P. W. Street.
	Oct. 19	L 715	8 8 0	A. T. Holroyd.
	" 19	L 716	8 8 0	W. H. Wilkinson.
	" 1	L 648	0 10 0	— Ballantine. †
	Nov. 21	L 947	5 0 0	Petty cash.
			£222 12 9	
Deduct amount of cash received from Mr. Harris, also vouchers in hand			3 10 1	
			£219 2 8	

\* Cheque drawn for £10; butt only shows £5.  
† Difference between total amount of cheques and sum for which there is a voucher.

The cheques from 9th March to 5th August, enumerated in the foregoing Schedule, amounting to £190 6s. 9d., I desire to point out are taken from obsolete cheque-books and filled up in the handwriting of Mr. Harris, and further, the sums specified were not due to the persons named, or indeed to any one. The butts of all these cheques are blank.

The cheques drawn on the official form, and also shown in the statement, amounting to £32 6s., are in the handwriting of Mr. Ireland, the officer who usually fills up the Departmental cheques. Items marked † were fraudulently obtained from the Treasury by misrepresentation, as per particulars hereunder :—

Date of advance.	On what representation procured.	Amount.
1881.		£ s. d.
May 10	As salary of G. T. Hunt, temporary clerk, for month of April, 1881	16 5 0
June 22	Do do do May, 1881	15 12 6
July 1	As salary of Wm. Wallace, C.P. Inspector, from 1 April to 26 May, 1881	53 12 7
" 4	As salary of G. T. Hunt, temporary clerk, for June, 1881	16 5 0
Aug. 5	Do do do July, 1881	16 5 0
		£118 0 1

In regard to the items in the name G. T. Hunt, it will be observed that in order to secure the passing of the adjustment vouchers the Accountant despatched a forged letter, dated 4th May, 1881, to the Auditor General, intimating that the Secretary for Lands had appointed Mr. Hunt to a temporary clerkship, with salary at the rate of 12s. 6d. per diem, for six months, and although some of the signatures to documents in support of the payments are said to be somewhat unlike your usual handwriting, they appear to have passed without question. For obvious reasons neither the vouchers nor letter were copied or recorded in this office. No person named G. T. Hunt is or has been employed in this Department.

The other item of £53 12s. 7d., in the name of William Wallace, for salary from 1st April to 26th May, 1881, is an evident fraud, inasmuch as Mr. Wallace ceased to be employed on 31 March, 1881.

The failure to discover this was evidently owing to the fact that neither Treasury nor Audit Office was advised of the discontinuance of Mr. Wallace's services.

My attention was next directed to outstanding adjustments of advances. Those unadjusted are as follows :—

Date of advance.	No. of advance.	Amount advanced.	Vouchers or cheques on hand.	Amount unaccounted for.
1881.		£ s. d.	£ s. d.	£ s. d.
August 5	35	133 13 4	133 13 4	.....

## HARRIS DEFALCATIONS BOARD—APPENDIX.

3.

I find that there are on hand either cheques or vouchers for all advances made to your public account, excepting the times before mentioned.

It would appear on inquiry that all previous adjustments have satisfied the Auditor General of their correctness.

Of the advance No. 63, £335 6s., a cheque for £10 in favour of Mr. Street was abstracted by the Accountant, and the ombezzlement of this sum formed the subject of recent Police Court proceedings, when Mr. Harris was committed for trial.

Of No. 63, £17 3s. 6d., a sum of 10s., due to Mr. Ballantine, formed part of a cheque for £1 6d., the other portion being represented by a voucher properly applied.

Of No. 86, £41 15s., two cheques for £8 8s. each, due to Messrs. Holroyd and Wilkinson, have been appropriated by Mr. Harris.

On looking at the petty cash account, I find that during the present year four advances of £25 each have been obtained. Of these the first three were duly adjusted by the production of expenditure vouchers. Payments to the extent of 19s. 5d. have been made out of the fourth, and a sum of £2 10s. 8d. in cash is in hand. This leaves a balance of £21 9s. 11d. to be accounted for, and if the books had been honestly kept there could be no difficulty in adjusting the account. It appears, however, that after receiving the third advance of £25 the Accountant drew cheques for £31 3s. 8d., but only furnished expenditure vouchers for £25, so that there is a sum of £6 3s. 8d. unaccounted for.

Mr. Harris has in my opinion forged thirteen cheques and stolen three others, as well as part of the proceeds of two. His defalcations may be summarized thus:—

Forgeries .....	£190 6 9
Stolen cheques.....	27 6 0
Petty cash .....	1 9 11
Other deficiencies (particulars at present unascertained) .....	1 18 3
	£221 0 11

The balance-sheet is as follows:—

<i>Liabilities.</i>		<i>Assets.</i>	
Petty cash.....	£21 9 11	Balance in Bank.....	£156 17 6
Money due to Street, Holroyd, & Wilkinson ...	26 16 0	<i>Deduct—</i>	
Unpaid account No. 98 .....	2 11 8	Outstanding cheques .....	120 8 0
"    "    102 .....	88 12 9		£36 9 6
	£139 10 4	<i>Add—</i>	
		Amount to be made good .....	103 0 10
			£139 10 4

The above sum of £103 0s. 10d. required to balance the Bank Account to meet legitimate liabilities, added to the sum of £118 0s. 1d. for which advances were fraudulently obtained for fictitious names, brings the total up to £221 0s. 11d. This amount the Fidelity Guarantee Company will, I presume, be called upon to pay so soon as the Accountant's trial terminates.

As you are anxious to obtain a speedy report, and have given me to understand that you do not desire it to be delayed for the purpose of obtaining particulars as to the sum of £1 18s. 3d. required to balance the account, I have not thought it advisable to attempt a strict search for the necessary particulars which may or may not be procurable.

I have, &c.,

STEPHEN FREEMAN.

MEMO.—In submitting the within report, which has been made at my request, I deem it advisable to take the different matters therein alluded to as they occur.

With regard to the cheques drawn from obsolete cheque-books, I have to remark that it has been my invariable practice before signing any cheque whatever to examine the butts and the cheques to see that they correspond, and also to require the production of vouchers in support of the different payments. In these cases the butts are *not* filled in, and the cheques are drawn, as before stated, from obsolete cheque-books. In some instances there are no vouchers in existence, and others must be admitted to be fabrications. For these reasons alone I must pronounce the cheques to be forgeries, although the signatures are in many instances remarkably like my usual handwriting. However, as showing the extraordinary skill in penmanship possessed by Mr. Harris, I may here mention that Mr. Fitzgerald, the teller of the London Chartered Bank, acknowledged a signature to a fraudulent voucher to be his, but afterwards an investigation of the books of the Bank declared it to be a forgery, although singularly like his signature. It will be easily understood that it would be extremely difficult for me to discriminate between my signature and a forgery thereof when an expert in such matters under almost precisely similar circumstances failed to do so.

As to the advances fraudulently obtained in the names of Messrs. Hunt and Wallace, I am confident that the signatures to the vouchers purporting to be mine must be forgeries, although, as in other cases, the signatures in nearly every instance bear a great resemblance to my own.

The appointment of Mr. Hunt was a cleverly concocted scheme, and must have been well thought out, being, so far as my knowledge extends, entirely original in conception, and a perfect masterpiece of invention.

With regard to the failure to inform the Treasury and Audit Office of the removal of Mr. Wallace, I have to observe that it is probably due to the fact that I never saw the papers relating thereto or received any instruction on the subject.

The larceny of Mr. Street's cheque is of recent date, and explains itself. The same may be said of the cheques drawn in favour of Messrs. Holroyd and Wilkinson.

As to the petty cash, it will be seen that three of the four advances obtained have been duly adjusted, and the frauds in the fourth are trifling in amount and of recent date.

It would appear that the frauds have been chiefly effected by means of skilfully devised forgeries, and that the total deficiency amounts to £221 0s. 11d., which sum is fully covered by a fidelity bond for £1,000, entered into by the London Guarantee and Accident Company.

It is proper to mention that Mr. Harris was appointed to the Pre-lease Branch of this Department in April, 1879, and was received with an irreproachable character from the Audit Office. He proved to be a most attentive and efficient officer in that Branch, and was subsequently for a time employed in the Account Branch.

Displaying a thorough knowledge of accounts he was ultimately appointed Accountant, for which position he appeared from experience, supported by the recommendation of the Auditor General, to be specially fitted.

As the Secretary for Lands is aware, Mr. Harris has been committed to take his trial for stealing the cheque for £10 drawn in favour of Mr. Street, and I have laid three informations against him for forgery, and the charges will be heard on Thursday next.

C.O., 29/11/81.

## APPENDIX C.

Mr. S. Freeman to The Under Secretary for Lands.

Sir,

Department of Lands, Sydney, 3 December, 1881.

Since furnishing my report on the defalcations of Mr. Harris, so far as they related to your banking account, I have obtained from the Treasury a statement of unexpended balances of votes for Services of this Department. This statement could not be procured until Thursday. Simultaneously, a batch of blank printed forms of authority for the payment of money, purporting to be signed by you, were found folded up and cunningly secreted in the middle of a quantity of unused official paper, in a drawer in the Account Branch.

The discovery of these forms indicated that frauds of an exceptional character had probably been perpetrated, and, a comparison between the balances shown by this office with those of the Treasury having been made, a very noticeable discrepancy

discrepancy appeared in the vote of £1,000 for compensation under clause 27 of the Land Act of 1880. Inquiry was then made at the Audit Office for any vouchers there might be for payments charged against this vote, when it was found that thirteen adjustments for a total sum of £399 11s. 10d. had been accepted; of these, ten payments, representing £374 1s., are palpable frauds, investigation proving that the papers quoted by the late Accountant in the letters of authority either had no existence or referred to totally different matters. Appended are particulars of the various sums.

In course of inquiry at the Pay Branch of the Treasury, it transpired that there were two vouchers for a total of £86 5s. awaiting payment. These also are frauds, and by your direction payment of them has been stopped.

Although there is no apparent reason to suspect that any other votes have been manipulated in a similar manner, it cannot possibly be stated that such is or is not the case until a further and more detailed comparison has been made between the Treasury books and those of this office. The difficulty of arriving at a conclusion without comparison may be accounted for by the fact that the details of charges against some of the votes are apparently not kept in the same way by both Departments.

This examination will probably be completed on Monday.

I have, &c.,  
STEPHEN FREEMAN.

STATEMENT of sums paid out of vote of £1,000, item 363, Appropriation Act, 1881.

	£1,000	0	0

MEMO.—I have to submit a further report on the frauds committed by Mr. Harris. It will be observed that the frauds have been effected by means of obtaining payments direct from the Treasury, of which I could have no possible knowledge.

As is pointed out in the within report, the immediate detection of these frauds has followed on the discovery of blank forms of authority for payments purporting to be signed by me.

These forms, of which two are enclosed, never were signed by me, the signatures being forgeries. No doubt they are forms to which Mr. Harris had attached my signature for practice, or having been successful so far in imitating it, they were kept by him for the purpose of effecting further frauds.

It appears to me that these frauds have been committed by Mr. Harris in the manner which I shall hereafter describe, and that he selected the vote on account of the improbability of any large demands being made upon it. I am led to this view from the result of inquiry made by me of Mr. Stopps, the officer charged with the business in connection with the resumption of land for road purposes, who informed me that Mr. Harris had sought to ascertain from him the mode of procedure in these matters, and the probable claims for compensation. The course taken by the late Accountant may be briefly described. Having, by some means at present unknown to me, obtained the services of persons to act as agents for the supposed claimants, he signed the claimants' names to authorities for payments of the moneys to the agents, appending thereto signatures purporting to be those of attesting Magistrates. He then prepared letters of authority for the payments of the amounts of the alleged claims and signed my name thereto. The transactions, so far as the Department would have been concerned in legitimate cases, were complete, and in due course the agents attended at the Treasury and received the moneys. What afterwards became of the moneys I am unaware, except in the case of W. H. Lee for an alleged claim of £72 15s. This amount, I have reason to believe, was handed to Mr. Harris by Mr. Campbell, who acted as agent. It will thus be seen that the frauds committed have completely deceived both the Treasury and Audit officials, and are the result of a well matured course of action.

Joseph Sutton.  
William Nichols.  
Wm. A. Gilder.  
A. J. Campbell.  
Chas. B. Walsh.

The late Accountant appears to have been cunning enough to vary the agents (names in margin) so that any danger of suspicion might be averted. Each of these agents I purpose closely examining, and will as soon as possible report the result. I however deem it necessary to draw special attention to the fact that these agents have received the different sums on behalf of persons to whom they cannot have forwarded or paid them, and, to my mind, have participated in the responsibility of the miscarriage of the moneys. Their conduct is almost inexplicable, as had they acted in even a business-like manner they must have become aware of the fraudulent way in which the moneys had been obtained. I would suggest that the question of their responsibility be referred to the Crown Law Officers.

With regard to the sum of £86 5s. passed for payment at the Treasury, I think that I should point out that, had it not been for the detection of Mr. Harris's frauds, that sum also would have been lost. I have throughout hurried the reports on the subject of these defalcations, with a view to placing any discoveries immediately before the Secretary for Lands; and I would only observe that the frauds are of such a nature (forgeries) as cannot be readily detected, and I have no doubt by this afternoon or to-morrow morning I will be in a position to place before Mr. Secretary Hoskins a complete statement of the frauds, forgeries, or otherwise.

C.O., 5/12/81.

I concur. The Crown Solicitor should be consulted as suggested.—J.H., 5/12/81. The Crown Solicitor does not consider that any proceedings against Harris's agents would be successful, as there is no evidence of a criminal knowledge on their part. They will state that they acted as innocent agents, and they may have done so. The Crown would have to prove the contrary.—C.O., 6/12/81.

APPENDIX D.

Mr. Freeman to The Under Secretary for Lands.

Sir,

Department of Lands, Sydney, 6 December, 1881.

Since my last report in regard to the late Accountant's frauds, particulars have come to hand of sums paid to Mr. Joseph Sutton, one of the persons employed to procure these moneys. Having obtained the adjustment vouchers from the Audit Office, it appeared that several payments were made before Mr. Harris left the Pre-lease Branch, and on inquiry it was found that no less than six refunds, as per memo. appended, for a total sum of £257 14s. 3d., had been fraudulently procured, your signature, as also Mr. W. W. Stephen's, and Mr. F. H. Wilson's, having been forged. The papers quoted on five of the forged authorities (herewith) clearly show that no such action as that relating to these refunds should have been taken, the lessees having no possible claim to refund.

The papers in the sixth case are not forthcoming, but no refund was due.

In his list of sums obtained for and paid to the late Accountant, Mr. Sutton includes three other items, the papers and vouchers in regard to which appear so far as can be judged to be genuine, as per Mr. Wilson's covering memo. It does seem strange, however, that the moneys for these refunds should have been paid to Mr. Harris, although Mr. Sutton himself, as agent for the lessee, applied for the refunds, *vide* 81-1,130 leases.

I have, &c.,  
STEPHEN FREEMAN.

## APPENDIX E.

## Mr. S. Freeman to The Under Secretary for Lands.

Sir,

Department of Lands, Sydney, 6 December, 1881.

In connection with the late frauds, and amongst other items stated by Mr. Joseph Sutton to have been collected by him and handed to the late Accountant, is an amount of £187 6s., for "Compensation to Mr. Richards for loss of improvements on land granted to him under an erroneous survey." This claim would appear to be entirely imaginary, the letter of authority to the Under Secretary for Finance and Trade, dated 12th May, 1881, herewith, quoting papers in reference to Simon Richards's claim for compensation £40.

In order that the money (£187 6s.) might be easily obtained, the Treasurer's advance account was operated on, and a request made for a vote on Supplementary Estimates to recoup the advance account.

In the event of the money being voted no further trouble would under ordinary circumstances have been anticipated by Mr. Harris, the voucher in adjustment having satisfied the Audit Office.

This item appears on Supplementary Estimates for 1881, now before Parliament.

I have, &amp;c.,

STEPHEN FREEMAN.

MEMO.—Having questioned Mr. Sutton as to his transactions for the late Accountant, I ascertained that Harris's operations had apparently not been confined to the frauds already reported, but that it was very probable that by means of forgeries he had obtained sums of money as refunds of alleged over-paid pre-lease rent. On obtaining certain vouchers from the Audit Office I found my suspicions to be well founded. The first fraud (as yet ascertained) was committed so far back as Sept., 1879, and to effect it Harris evidently forged the name of Mr. Charles Brown, then in charge of the Pre-lease Branch, to a refund voucher purporting to authorize the repayment of a sum of £18 for overpaid pre-lease rent to one Thomas Lecman.

Other frauds have been committed by the evident forgeries of the signature of the late Under Secretary and Mr. Wilson, the latter officer's name having been forged while he was in charge of the Pre-lease Branch. The frauds in connection with pre-lease rent amount to £379 14s. 3d., and the majority of them would not have been discovered had it not been for the information gathered from Mr. Sutton, by strict examination—no record of the forged authorities being placed by Harris in the books of this Department, and the vouchers, with the exception of Lecman's, having been accepted by the Audit Office, and never likely to be afterwards referred to. The amounts were refunded on account of leases which from various causes had ceased to exist, but the rents refunded were properly charged on account of the leases while current, except in the case of Mr. William Rudd. The refund (£103 6s. 4d.) in this case was properly payable, but a forged authority to receive the sum was obtained by Harris, through Mr. Sutton, who will have to explain why he wrote a letter as the agent of Mr. Rudd, he never having been employed by that gentleman.

The amount, £187 6s., obtained from the Treasurer's Advance Account, would never have been detected but for the information obtained in the manner before described, as the sum was placed by the Treasury on the Supplementary Estimates for the purpose of recouping the advance fund, and would have been passed without question.

Similar frauds could be committed unless some better system of check is adopted both by the Treasury and Audit Office. With regard to the former Department, it may be pointed out that the orders to receive the sums were forged, and in many instances purported to be signed before Magistrates who, I have ascertained by inquiry at the Colonial Secretary's Department, do not exist. I venture to suggest that an effort be made to devise some more efficient check on these payments and the acceptance of vouchers in adjustment. It is impossible for this Department to guard against similar frauds, as no records of the forgeries appear in the books of this Department, and the payments are made on the forged letters and authorities without further reference or inquiry as to whether the amount is properly payable or whether the authorities are genuine.

Notwithstanding the excellent character Harris received from the Audit Office and from officers of this Department, as will be seen from the papers relating to his appointment to the Pre-lease Branch, it will be observed that he has been a systematic forger for over two years, and that the success of his forgeries is the result of expert penmanship and a thorough knowledge of how the system of check in force could be defeated.

C.O., 8/12/81.

As a Board is about to be appointed by the Honorable Colonial Treasurer to investigate and inquire into the manner by which Harris's (the late Accountant's) forgeries were carried on for such a lengthened period without being discovered, I do not see what further action can be taken by this Department, although I am of opinion that the system followed of making payments at the Treasury and paying accounts through the Audit Office must be defective, or otherwise the forgeries perpetrated by Harris should have been discovered before they were.—J.H., 17/12/81.

## APPENDIX F.

[81—7,088 Con. Sales]

Department of Lands, Sydney, 12 May, 1881.

I am directed by the Secretary for Lands to apprise you that the Under Secretary for Finance and Trade has been requested to cause the sum of one hundred and eighty-seven pounds six shillings sterling to be paid to you or your order, as compensation for the loss of your improvements on portions 171 and 173, the land having been granted to you through an erroneous survey.

I have, &amp;c.,

£3,532 3s. 9d. stg. Bank of Australasia, Melbourne.

Mr. ELLIOTT, Manager of the Bank of Australasia, witness to the signature of James Dickson.

£3,501 was collected by the Land Agent at Hay on May 4th, 1878, and credited at Treasury May 7th, 1878; the same amount was also paid to the Treasury by the Bank of Australasia for Jas. Dickson on 31st May, 1877. This amount having been twice paid, Mr. Dickson is entitled to a refund of £3,501.—W.K. P.F.R., 29/5/78. Refunded.—30/5/78.

REVENUE REFUNDED.

Lands Department, Sydney, 28 April, 1879.

Treasury, 2394, 1st May, 1879. £5,572 15s.

Sir,

I am directed to request that you will be good enough to refund to Mr. James Pile, or his order, care of Mr. Walterus Brown, of Wilcannia, the sum of five thousand five hundred and seventy-two pounds fifteen shillings, credited at the Treasury, being the amount paid by him for lots A to K, of Crown Lands sale, Wilcannia, 28th November, 1877, as the land in question is partly within the travelling stock reserve No. 355. The Minister for Lands has directed that the sale should be cancelled and a re-survey made of those portions outside the boundary of the reserve.

I have, &c.,

CHARLES OLIVER, pro Under Secretary.

Receiver, 1.—A.E., pro U.S. Notice.—May 18, 1879, Paymaster.

The Under Secretary for Finance and Trade.

## The Inspector of Public Revenue Collectors' Accounts to The Chief Inspector.

No. 8.

Sir,

The Treasury, New South Wales, Sydney, 22 July, 1878.

In accordance with the terms of your memorandum of the instant, I have made an inquiry into the state of the expenditure accounts of the Lands Department.

The two cash books in operation were entered up to the 4th April and 4th May, showing arrears of two and three months respectively. They have now been brought up to date.

So far as these books show, the various advances have been duly adjusted, but there still remains to Mr. Stephen's credit in the Bank the sum of £25 Os. 4d., which the Acting Accountant cannot explain.

I did not feel justified in addressing myself to a lengthy detailed examination of this balance—an operation rendered more difficult by the absence of the necessary information under the head of "cheque No." in the Bank cash book.

Failing such examination, the Acting Accountant might be called upon to explain the discrepancy.

The actual balance (if any) after provision for outstanding claims should be paid into the Treasury.

The Appropriation Ledger was simply a blank. It has now however been entered up to date, but the balances on the Departmental votes do not altogether agree with those shown by the Treasury registers.

As the officer having present charge of these books has apparently not possessed a clear perception of their proposed uses, I may perhaps state specifically the manner in which they are intended to be kept and the transactions they are presumed to record.

With the exception of the Land Agents' salaries and commissions, the Lands Department takes cognizance of all claims chargeable against the appropriations placed under its control.

These claims are liquidated either by direct payment by the Treasury, on certificate and approval of the Lands Department or by the latter from funds placed from time to time at its disposal.

The "large cash book" (so-called) is intended to represent the Departmental Register, and should show, in detail, all the vouchers sent to the Treasury for direct payment to the claimants, and the advances placed to the Under Secretary's credit.

The item No. of the Appropriation, and the sub-head of Estimate, must invariably be given in each case, to admit of the compilation from this book alone of the Appropriation Ledger debits.

The Bank Cash-book should be used to record the Bank transactions, and the adjustment of accounts with the Auditor General.

The advances given on the Dr. side should not be dated until the actual deposit in the Bank is made.

When the final adjustment takes place, the dates should be noted under the entry of the advances.

Upon the Cr. side will be shown in detail the dates of each cheque, the cheque No., the name of the claimant, the period of service, and the sum drawn.

There are at present in use some six or seven cheque-books for payment out of the several appropriations.

The Under Secretary for Lands has but one public account; and it would, I think, be better to adopt the plan of using one Departmental cheque-book.

The

The ordinary inspection of accounts, and the discovery of unrepresented cheques, would be rendered far more easy than under the present system.

The Appropriation Ledger should be prepared with headings of the sub-heads of the passed Estimates.

The transactions shown in the Departmental Cash-book should be abstracted and entered daily in the Dr. column.

A special reason for the necessity for this ledger lay in the fact that it would enable the Head of the Department to obtain information as to the balances existing upon the several votes which he might wish to operate upon.

Had the Ledger been complete to date, the £2,500, voted for 1878 on account of extra clerical assistance would not have been exceeded by £1,590 without the fact having been brought prominently before the Minister.

It would perhaps be well if a monthly abstract of the balances on the Departmental votes for salaries and contingencies were prepared and submitted to the Under Secretary.

I have, &c.,  
CHAS. PINHEY.

Minute of Chief Inspector upon Mr. Pinhey's report on the Expenditure Accounts of the Lands Department.

24 July, 1878.

THIS report, it will be observed, is not one of the ordinary description.

It is not the duty of the Treasury Inspectors, unless specially instructed to do so, to take cognizance of the expenditure accounts of any public officer.

In this case, however, I thought it right to request Mr. Pinhey to see that the system which I suggested, at the instance of the Minister for Lands, was being carried out.

I regret to find, from his report, that it has not, as it appears that one of the principal books—the Appropriation Ledger—had not even been commenced.

Although the books have been written up since Mr. Pinhey first looked into the matter, they still exhibit discrepancies which it is absolutely necessary should be discovered and explained as early as possible.

Perhaps it would be advisable therefore to forward the report of the Inspector to the Under Secretary for Lands, who will no doubt take the necessary steps for having the accounts at once investigated, with a view to ascertain how the difference between the books of his office and those of the Treasury arises, and what cheques are still payable out of the balance of £25 0s. 4d. at his credit in the Bank of New South Wales.

Besides these discrepancies, Mr. Pinhey refers to other matters which it is important Mr. Stephen should be made aware of, as he is the officer more immediately responsible for the Departmental expenditure of the Lands Department.

JAMES THOMSON, C.I.

True copy,—CHAS. PINHEY.

#### APPENDIX Q.

Expenditure Accounts, Lands Department.

2 August, 1877.

HAVING gone carefully through the papers in this case, I am somewhat at a loss to make out the precise object of the reference to me. The gentlemen appointed to investigate the accounts, and inquire into other matters referred to in the Auditor General's letters and query papers, appear to me to have done their duty in a very careful and efficient manner, and have really left almost nothing for me to do beyond suggesting how the present difficulties might be met.

Assuming that the amounts charged as petty cash payments are not fictitious, I do not see there need be much difficulty now in squaring up the accounts to the satisfaction of the Auditor General. There is no doubt, however, that culpable negligence, almost unpardonable, has been exhibited by the officers entrusted with the management of the financial affairs of the Department, for which they should in my opinion be severely censured, and deprived for the future of any responsibility of a similar nature.

I gather from the papers that the salary and the pay abstracts, to the number of forty-five or forty-six, have with a few exceptions been completed and forwarded to the Auditor General, and that if the Under Secretary for Lands will sign the form of certificate prepared by that officer for petty expenses he is willing to pass them.

With respect to the other matters requiring to be dealt with, I beg to make the following suggestions, viz. :—

- 1st—That the sum of £18 9s. 2d. be paid from the Treasurer's Advance Account to meet the two dishonored cheques referred to in paper No. 3,017 of 28th July, until the amount on the Additional Estimate for 1877 is duly appropriated by Parliament.
- 2nd—That a sum of £58 18s. 11d. paid out of an advance from the vote of 1875, for Services of 1876, be charged against the vote for unforeseen expenses and repaid to the vote of 1875, as required by the Auditor General.
- 3rd—That in future all vouchers for payments from advances for contingent expenses be forwarded to the Treasury, under the following regulations, viz. :—The advance not to exceed £100. When payments are made therefrom to the extent of £75, the vouchers in support of these are to be forwarded to the Treasury, when the amount which they represent will be repaid, thereby restoring the advance to the original amount.
- 4th—That a cash book be kept in the Lands Department, in which shall be recorded particulars of every payment made from these Treasury Advances.
- 5th—All petty cash payments under £1 must be certified as correct by the Under Secretary, who must also certify the abstract of adjustments sent to the Treasury.
- 6th—That two accounts be kept in the Bank, one for Salaries and one for Contingencies, and that no cheque be drawn on either unless it is clearly ascertained that there are funds available at the Bank.
- 7th—That the officer entrusted with the keeping of the accounts and the drawing of cheques be called upon to furnish the fidelity bond of a Guarantee Society for a sum of £250.

If these suggestions are approved and acted upon, I feel satisfied the accounts can never fall into the disgraceful state of arrear they have of late been allowed to fall into.

JAMES THOMSON.

True copy,—F. KIRKPATRICK, 8/2/82.

#### APPENDIX R.

The Inspector of Public Revenue Collectors' Accounts to The Chief Inspector.

Sir,

The Treasury, New South Wales, Sydney, 30 August, 1880.

I have the honor to enclose a copy of a report on an inquiry into the conduct of the business of the Account Branch of the Lands Department.

This inquiry was conducted by Mr. Charles Oliver, the Inspector of Land Officers, and myself, under the instructions of Mr. Secretary Huskins, indorsed, so far as I was concerned, by the approval of the Hon. the Treasurer.

I have, &c.,  
CHARLES PINHEY.

Submitted for the information of the Treasurer.—J.T., 30/8/80. Read.—J.W., 30/8/80. Mr. Thomson.—G.E., 30/8/80.

Messrs.

Messrs. C. Pinhey and C. Oliver to The Minister for Lands.

The Account Branch.

Sir,

Department of Lands, Sydney, 24 August, 1880.

In accordance with the direction of the Minister for Lands, by memoranda enclosed, dated the 11th and 13th instant, we have inspected the books of the Account Branch, and otherwise made a searching inquiry into its working.

In July 1878 a recommendation was made by the Treasury as to how the accounts of the Department of Lands should be kept, which has been very imperfectly carried out.

The books—notably the Departmental Register—have not been properly kept or periodically balanced, nor can it be said that sufficient care and intelligence have been exercised in the business of the Branch as a whole.

No rule appears to have existed as to the drawing of cheques or the custody of the cheque-books, which were nominally in Mr. Croft's possession, but always obtainable by Evans. Although Mr. Croft states that all cheques were either drawn or examined by him, it is not shown that he was in the habit of regularly initialling them as correct, nor is it clear that any specific direction was given upon this point. The recognized rule of payment by cheque has been frequently departed from, large sums, as per schedule attached, having been drawn from the Bank and payments therefrom made in cash. This innovation seems to have resulted from the inability of the Under Secretary, owing to pressure of other matters, to sign a large number of cheques, and those cash payments have at times extended to lodgments in Banks to the credit of officers having banking accounts, necessitating the withdrawal of large sums in cash from one Bank to place in others. In connection with the adjustment of advances grave irregularities have been committed, and represented to the Department by the ordinary queries from the Audit Office, but owing to their being intercepted by Evans, in transit from the Record Room to the Account Branch, they have not, as appears from the evidence before us, been seen either by the Under Secretary or the Accountant.

Having replied to the specific questions of the Minister we now beg to deal with the account matters as a whole, and as far as possible with the individual responsibilities of the officers connected with the Account Branch. Evans' defalcation of £818 15s. appears to have been effected thus:—Various cheques were required to be drawn for the purpose of lodgment in different Banks; Evans drew these cheques, and when drawn they were, without being seen, examined or initialled by Mr. Croft, sent by Evans to the Under Secretary for signature, through Mr. Newman, who acts as his clerk. The cheques were presented to the Under Secretary by Mr. Newman, and signed. At the time, Mr. Stephen, having noticed that they were not crossed, gave a direction that they were to be crossed by the Accountant before leaving the office. In this batch of cheques was the one which was subsequently manipulated by Evans, who at a later period in the day presented another cheque for signature in lieu of that which he altered, and alleged that the Under Secretary had omitted to sign it with the others. Having obtained Mr. Stephen's signature to the second cheque, it was substituted for that by which the fraud was committed, and the batch was rendered complete. Presuming that the cheques were presented to Mr. Stephen for signature in the usual form, it is not surprising that the cheque made use of for the purpose of fraud was not at the time detected; yet had that promptitude which should be observed in the lodgment of amounts to the credit of officers interested, and the production of the Bank receipts for such lodgments, been in this instance insisted upon by Mr. Croft, to whom the cheques were apparently handed by Mr. Stephen for immediate lodgment, and then passed on without examination to Evans, the fraud would have been readily detected, if ever attempted, notwithstanding that a signature had been surreptitiously obtained with that intention. Moreover, Mr. Croft, not having examined the cheques before submission for signature, should have taken the opportunity of doing so upon their being handed to him, which would no doubt have resulted in the informality in the drawing of the cheque, afterwards altered and cashed by Evans, being detected. Apart from the defalcation of £818 15s., there is a deficiency (as shown by balance-sheet herewith) of £171 5s. 1d., in connection with the Incidental and Petty Cash payments. In the absence of any entries in the Account Books, information in writing, at the date of the transactions, or receipts of payment, we have been compelled to accept the statement of Mr. Croft, that all the cheques drawn against the advances made by the Treasury, either for petty cash or direct payments to claimants, were, without exception, handed to Evans, who thus personally became responsible for the whole expenditure.

The mode of obtaining advances from the Treasury under this head was extremely reprehensible. The successive applications for advances appear to have been prepared by Mr. Croft upon the representation of Evans, who informed him that the previous advance had been exhausted, and that the adjustment vouchers were in his possession, and about to be forwarded to the Auditor General. Mr. Croft did not examine these accounts or assure himself that they had been forwarded; and this failure of duty undoubtedly gave Evans the opportunity of converting a considerable portion of the advances to his own use, and may be almost looked upon as a premium on the temptation to their wrongful use.

The unadjusted advances—now aggregating £250—range from January, 1879, to June last; and, in view of this fact, it is deemed desirable to point out that it was within the province of the Auditor General, under the Audit Act of 1870, to have reported to the Treasurer the failure to adjust, which would have prevented subsequent advances being made, pending such adjustment. Although the direct responsibility of what happened later cannot be attributed to the Auditor General having omitted this duty, there can be little question that, had any inquiry—from whatever source originating—been instituted into the non-adjustment of advances, the discovery of the speculation which had been practised would have prevented the large subsequent embezzlement.

It is admitted by the Accountant that the Treasury recommendation as to the method of keeping the accounts was referred to him for his guidance and that he to the best of his ability endeavoured to carry it out; yet, although we have made repeated inquiries for the papers they cannot be found, and therefore, in their absence, we are unable to state the nature of the directions (if any) given to the Accountant, apart from the recommendations made in the Treasury Inspector's report.

There is no doubt that the system of drawing cheques has been very lax, and that ordinary care has not been taken to ensure their being correctly drawn and properly presented for signature. It appears that the Under Secretary never gave any instruction for their being countersigned, and that he is not certain that he directed them to be initialled, but always considered that cheques coming from the Account Branch came from Mr. Croft. No written instructions appear to have been given as to crossing cheques requiring to be lodged in Banks. Mr. Stephen, however, states that he has always given verbal instructions to that effect when he has observed the omission. It appears from information afforded by Mr. Croft that sometimes he initialled the cheques, at others he did not. Without going further into the question of drawing and presenting cheques for signature, we deem that sufficient has been reported to show clearly that no definite instructions in reference thereto have been given, and that no system has been insisted upon.

With regard to the advances on account of incidental expenses and petty cash, it may be said that no apparent effort has been made to control the expenditure under these heads. Evans seems to have had the almost unchecked control of the whole expenditure. Sums for petty expenses were placed in his hands, and he was permitted to draw cheques for incidental expenses without due inquiry being made as to the genuineness of the claim; in fact, in connection with this expenditure, as well as other matters of account, he appears to have acted rather as the Accountant than his assistant.

We have experienced great difficulty in determining the responsibility of the officers actually taking part in the business of the Account Branch. It appears that, prior to Mr. Croft's appointment as Accountant, Mr. L. G. Thompson was requested to supervise the Account Branch until the appointment of a responsible officer, and that he did so, but, by his own statement, he considered his responsibility ceased when Mr. Croft was formally appointed. Mr. Thompson also states that he fully instructed Mr. Croft in his duties prior to his appointment, and when handing over the duties to him did not consider it necessary to further instruct him. While making these statements, he admits that he has since acted in the capacity of "referee" in matters of account, but disclaims any responsibility. The Under Secretary states that he requested Mr. Thompson to supervise the Branch when Mr. Croft was first appointed as Acting Accountant, and that he "looked upon Mr. Thompson as between him and the Accountant, although he was never recognized as Head of the Account Branch," and that the direction to supervise the business thereof has not been officially withdrawn. Mr. Croft, on the other hand, looks upon Mr. Thompson as his superior officer and the real Head of the Account Branch; he also states that he generally receives his instructions from him, and in reference to the petty cash distinctly remembers Mr. Thompson handing it over to Evans, which statement Mr. Thompson contradicts.

The conflicting testimony as to the recognized Head of the Account Branch, and the consequent difficulty of offering a decisive opinion upon whom the responsibility should rest, may be regarded rather as the result of a complete absence of any system controlling the business of the Branch, and the failure to issue any specific regulations for its conduct, than from the desire of the officers to evade distinct responsibility.

The position of Mr. Thompson relatively to the Account Branch appears to have been an anomalous one, which the

Inspector of Public Revenue Collectors' Accounts.

The Treasury, New South Wales,  
18. February, 1882.

## APPENDIX U.

MEMORANDUM respecting the discrepancies between the balances of the Appropriations for Services under the control of the Secretary for Lands, for the year 1881, on the 30th November last, according to the books of the Lands and Treasury Departments respectively.

## DEPARTMENT OF LANDS.—SALARIES.

Difference as per statement .....	£91 13 4
This difference arises in the following manner, viz. :—	
Transfer of Mr. Low's salary from Appropriation for Contingencies .....	£90 8 11
Payment on 12th May to Mr. Low, charged in the books of the Lands Department to the Appropriation for Contingencies .....	1 4 5
	<u>£91 13 4</u>

## DEPARTMENT OF LANDS.—CONTINGENCIES.

Difference as per statement .....	£42 2 2
This difference arises as follows, viz. :—	
Transfer of expenditure in the books of the Treasury Department from Contingencies to Salaries, as above .....	£90 8 11
Add amounts charged to this Account in the books of the Lands Department in error,—	
1st June, 1881. R. H. D. Low .....	£1 4 5
18th October, 1881. Fairfax & Sons—advertising .....	0 16 0
22nd November, 1881. Advance .....	5 0 0
	<u>7 0 5</u>
Carried forward .....	<u>£97 9 4</u>

Deduct

	Brought forward.....	£97 9 4	
Deduct amounts paid and charged to this Account in the books of the Treasury, but not entered in the books of the Lands Department, viz. :-			
4th July, 1881.	G. T. Hunt .....	£16 5 0	
28th July "	Advance in January .....	*£10 0 0	
	Less repayment by cash .....	6 11 6	
		3 8 6	
5th August.	G. T. Hunt .....	16 5 0	
18th November.	C. Oliver—advance .....	15 0 0	
25th "	A. C. Kayser.....	4 8 8	
		55 7 2	
			£42 2 2

\* This advance was made from the Treasurer's Advance Vote.

CONDITIONAL LAND SALES—SALARIES.

Difference as per statement .....	£61 14 3
This discrepancy is caused by the undermentioned sums not having been entered in the books of the Lands Department, viz. :-	
1st July, 1881, C. Oliver, to pay W. Wallace, Inspector, April to 26th May.....	£53 12 7
1st September, 1881, C. Oliver—Advance to pay Inspectors, August .....	£375 0 0
Less—Amount entered in the books of the Lands Department.....	366 18 4
	†£8 1 8
	£61 14 3

† The sum of £8 1s. 4d. was repaid to the Treasury Department on 2nd September, 1881, and credited to Unclaimed Moneys Account—Trust Fund.

CONDITIONAL LAND SALES—CONTINGENCIES.

Difference as per statement .....	£105 4 8
This difference is caused by the undermentioned payments not having been entered in the books of the Lands Department, viz. :-	
10th May, 1881. C. Oliver, to pay G. T. Hunt.....	£16 5 0
10th June, 1881. W. M. Ollivier, salary, 1st June .....	0 15 9
18th November, 1881. Commissioner for Railways .....	11 16 5

## APPENDIX W.

Correspondence referring to certain discrepancies between the Refund Register in the Lands Department and the Audit Office Ledgers.

The Auditor General to The Under Secretary for Lands.

Sir,

Department of Audit, 21 February, 1882.

The accompanying returns, marked 1 and 2, represent the discrepancies which have been found to exist between the Refund Register in the Lands Department and the postings in the ledgers of the Department of Audit, for the years 1880 and 1881. I do myself the honor to request that you will be good enough to cause such explanation to be given as circumstances permit, and to report for the information of the Board of Inquiry whether any, and if any, which of the payments have been fraudulently obtained. The supporting vouchers accompany the returns, and the Board would be obliged by immediate attention being given to the inquiry.

I have the honor to be, Sir, your obedient servant,

C. ROLLESTON,  
Auditor General.

Leases 82/1682.

The Under Secretary for Lands to The Auditor General.

Sir,

Department of Lands, Sydney, 25 February, 1882.

Referring to your letter of the 21st instant, inquiring whether any of the payments authorized by the refund vouchers forwarded by you had been fraudulently obtained, I have the honor to inform you that, with the exception of four cases quoted in the margin, all the refunds included in the schedules furnished by you are correct.

As regards the unauthorized refunds, I would mention that—

- (1.) The refund voucher to Williamson is a palpable forgery, and should have been detected by the Treasury and Audit Office officials, the signature not being that of Mr. Wilson, and the reason given for the refund being simply absurd.
- (2.) That to J. Peter is also a forgery. The papers in the case cannot be found. The reason given for refund is erroneous, and I also find that satisfactory proof can be produced of this amount having been paid by Mr. Perry to Mr. Harris himself.
- (3.) The refund voucher to Mr. Thomas is also a forgery. It is stated to be in lieu of one prepared on the 19th April, 1880, but no such document ever issued from this Department, nor is there any notation on the papers.
- (4.) That to W. Wood for £15 was obtained by fraud. It is represented as being a refund on 76/11 Oxley, a forfeited lease, and the authority for cancellation is given as L.A. 75/2698. This however is a lease application by William Goedde, gazetted as 76/12, and the rent paid thereon, viz., £9, was authorized for refund in 1878, though from the papers it appears doubtful whether it was issued. In the Lease Register 76/11 is noted as cancelled by L.A. 75/2697, which is an application for a lease of land in the Wellington District. This is a fraud.

I have further to add that it appears that the £47 refunded to Mr. Beale, Crown Land Agent, Coonamble, was duly entered, at the time the voucher issued, in the Refund Book, on the 10th page of letter B, and has therefore been included in the 1st Schedule in error.

I have also to state that the entry of refund on Hart's lease was not made because the receipt in August was illegal, and the Treasury was authorized by B.C. to return the amount to the Land Agent.

The omissions and corrections specified by you will be duly made on the return of the Refund Book, for which purpose the vouchers have been retained. They appear to have been caused during the hurry of business, through oversight on the part of some of the subordinate officers of the Lease Branch.

I have the honor to be,

Sir,

Your most obedient servant,  
CHARLES OLIVER,  
Under Secretary.

## APPENDIX X.

Four Vouchers for Refunds alleged to be forgeries.

Special Payments Form No. 6 (b)

Pay Voucher No. 8,797.

REVENUE REFUNDED.

Lands Department, Sydney, 11 March, 1880.

Papers No. L.A. 76-3280

Sir,

I am directed to request that you will be good enough to refund to Mr. John Peter, care of Mr. James Perry, of No. 18 Bridge-street, Sydney, the sum of nineteen pounds thirteen shillings and nine pence, credited at the Treasury on the 8th September, 1876, £6; 13 Feb., 1878, £2 8s. 9d.; and 4 Oct., 1878, £11 5s.; being the rent paid on the pre-emptive lease particularized in the margin, cancelled, as the same is entirely surrounded by land conditionally purchased or already under lease.

I have, &c.,

## No. 2.

## The Auditor-General to The Under-Secretary for Finance and Trade.

Harris Defalcations Board, City of Sydney Improvement Board Offices,  
35 Castlereagh-street, Sydney, 1 March, 1882.

Sir,  
As Chairman of the Board appointed by the Honorable the Colonial Treasurer to inquire into and report upon the frauds committed by H. V. Harris, the late accountant in the Department of Lands, &c., &c., I have the honor to submit the report of the Board, which was unanimously agreed to on the 27th ultimo, together with the minutes of evidence taken during the inquiry, appendices, and minutes of proceedings. Also the expenses incurred by the Board for secretary and shorthand writer, and incidentals amounting to £128 7s. 6d.

I have, &c.,  
C. ROLLESTON.

*Minutes on No. 2.*

Forward to the Secretary for Lands for his perusal.—J.W., 3/3/82. The Under-Secretary for Lands.—G.E., 3/3/82, B.C. Submitted for the information of the Secretary for Lands. I have to respectfully request that I may be allowed to make observations on the report of the Board on the evidence taken.—C.O., 7/3/82. Approved.—JOHN R. See separate memo.—C.O., 7/3/82.

## No. 3.

## Memorandum by Mr. Under-Secretary Oliver.

By permission of the Secretary for Lands, I beg to offer the following observations on the report of the Board appointed to inquire into the frauds committed by H. V. Harris, late accountant of the Department of Lands.

The Board has arrived at five conclusions, with which I will deal as they are referred to in the different paragraphs of the report.

The fourth paragraph, which immediately follows the general conclusions, is the first calling for remark, as being not altogether free from question. I regret to say that a claim can only be made against the Guarantee Society for £967 6s. 9d., the amount of Harris' frauds while under bond, and not £1,000, as stated by the Board. The allusion to the comparison of books, &c., made by "two officers unconnected with the Department of Lands," appears to me to convey a wrong impression. These two officers really only completed researches upon which I had entered before the Board was appointed, and they pursued a course suggested by me. The further frauds, alleged to have been discovered by them, were so pronounced by me, neither of these gentlemen being in a position to certify whether they were frauds or not.

The £1,212 4s. 6d. (out of a total amount of £1,435 12s. 1d. misappropriated) obtained over the counter at the Treasury I purpose referring to hereafter.

The evidence of Mr. Fearon, the teller of the Bank of New South Wales, who paid the forged cheques appears (paragraph 5) to have been quite sufficient foundation for the Board to become "inclined to believe it quite possible that Harris placed these cheques before Mr. Oliver, and that he signed them in full reliance upon Harris' integrity, &c." Could it be supposed that Mr. Fearon would give any other evidence than he did? There can be no question that he thought the signatures mine or he would not have cashed the cheques. Moreover, an admission by him would inevitably have rendered the Bank liable for the repayment of the amount thus improperly paid. He is, however, not prepared to swear that I signed the cheques (question 2259). The Board has, I feel, gone somewhat out of its way to weaken the evidence given by me on the point of these forgeries, by taking the least important portion of it on this subject. It is stated that I am prepared to swear that they are forgeries, "chiefly, however, on the ground that they were drawn for fictitious claims." I gave more than one substantial reason for the conclusion arrived at by me, which must have been overlooked by the Board. Take as examples answers to questions 32, 156, 157, 158, and 2340: "I insisted on having the same notation in the butt, so that I have, as far as possible, a fac-simile of the cheque in the book." "I never sign a cheque unless the cheque-book is produced." "Certainly they are forgeries, and I am prepared to prove it to the satisfaction of an intelligent jury." "There were no such sums payable, and although in many instances the signatures are very like mine it was impossible for me to have signed any cheques in the books from which these cheques were taken at that date." "I am not in the habit of signing any cheques except in the cheque-book, and I am always particular that the accountant initials the butts of the cheques." "Not only do I examine the documents (vouchers), but satisfy myself that the butts of the cheques are properly prepared." "The only occasion on which a cheque was presented to me for signature without the papers I sent it back, and the papers were produced." As supporting the evidence quoted, I deem it necessary to invite attention to the answer given by Mr. Ireland to question 385: "Was it his habit to take the book to the Under-Secretary to sign? Yes, in every case." In addition to this evidence, I may mention that the cheque-books in use have *four cheques* on a page, and those from which the forged cheques were drawn only *one*, and in no instance was the butt of the cheque filled up as always required by me. It is necessary also to state that while examining the teller of the Bank of New South Wales, who cashed the forged cheques, on the subject of the forgeries, the Board did not appear to deem it requisite to take advantage of any evidence which could have been given by Mr. Fitzgerald, teller of the London Chartered Bank, whose signature had been so closely imitated by Harris that he (Mr. Fitzgerald) at first pronounced it to be genuine. (See answer to question 2340.) So important do I consider the forging of Mr. Fitzgerald's signature, as contrasted with the conclusions of the Board, that I append a copy of his sworn evidence at the Police Court, and it is worthy of mention that to the forgery therein asserted Harris pleaded guilty, and received a sentence of five years. Added to what I have already stated, I have to remark that I exhibited to the Board a number of blank forms found in one of Harris' drawers, to which my signature had been forged in such a remarkably clever manner as to have defied, in nearly every instance, detection. On this paragraph (5) I think I have written sufficient, although much more could be added, and I therefore respectfully submit that the conclusion of the Board is not borne out by the evidence adduced.

The

Appendix B.

The next paragraph (6) of the report is devoted to the new form of cheque, and the failure to lock up or destroy the old forms. The omission to apprise the Bank of the change of the form of the cheque is one for which I think the Treasury is responsible. That Department duly approved of the change, and, by the published administrative arrangements, alone had authority to communicate it to the Bank, and therefore any omission on that head rests with the Treasury. In support of this statement I would refer to correspondence (marked B) on the subject of the new form of cheque, which I have obtained from the Government Printer. With regard to the obsolete cheque-books not having been locked up, it may be observed that it is incorrect to suppose that they were never locked up, the fact being that they were, by my direction, placed in the safe of which the accountant, Harris, had a key, and consequently command of them. So far I think the paragraph has been disposed of, but I cannot allow its seeming peculiar inconsistency, as compared with the preceding paragraph (5), to pass unnoticed. If the Board are inclined to believe that, notwithstanding the apparent overwhelming evidence to the contrary, I did sign the cheques declared by me to be forgeries, "from my full reliance in Harris' integrity," why should that individual have resorted to the dangerous course of using the obsolete cheque forms when he could have, if the Board's assumption be correct, with much less risk, equal ease, and greater safety, obtained my signature to a cheque drawn on the proper form? The next paragraph will be commented upon when dealing with the £1,212 4s. 6d. obtained over the Treasury counter.

The Board's comments on the fraud of £187 6s. (paragraph 8) on the Colonial Treasurer's advance account are justifiable in every particular, and clearly indicate that Harris was a forger of the greatest possible ability and tact.

The next three paragraphs require, it appears to me, no remark on my part, with the exception of the observation that it would be unwise to take proceedings against Mr. Sutton unless it is deemed that he had criminal knowledge of Harris' proceedings, and should be prosecuted. The Board does not appear to be of this opinion, and it would be scarcely worth while attempting to recover the sums paid to him on behalf of Messrs. Robertson and Rudd respectively, as the amounts form part of the claim against the Guarantee Bond, and cannot be twice recovered. The attempt, if made, to recover from Mr. Sutton would only reduce the demand made on the Company, and risk the loss of the sum of £177 7s. by failure to prove the liability of the former. It is here, however, deemed necessary to draw attention to what appears to be a very marked disagreement in the report. Paragraph 13 states that the frauds have been perpetrated by "clever forgeries, not only of the names of the officers of the Lands Department, but of presumed claimants and others," yet in paragraph 5 it is asserted that the Board are inclined to believe my signatures are not forgeries, as pronounced by me, and as disclosed by the evidence. Why my signature is (by paragraph 5) selected as an exception is somewhat remarkable.

Paragraph 14 deals with the account books. The failure by Harris to keep the books properly had been discovered by me long before the appointment of the Board was contemplated. There was, however, no fault worthy of notice in the system. The fault consisted in Harris' failure to carry it out.

Paragraph 15 requires special notice, as I fear it is calculated to mislead. The recommendations made by Mr. Pinhey, Inspector of Accounts, and myself, when Inspector of Land Offices, were in every way provided for by me, and Harris fully instructed. That he did not carry out those instructions was likewise discovered by me before the Board was appointed. The disregard of the recommendations was on Harris' part solely. It is, however, necessary to specially note that the precautions taken to prevent a repetition of the Evans' frauds were, as far as possible, perfect, and fraud, to any extent, except by skilful forgery of signatures, rendered impossible. The recommendations made by Mr. Pinhey and myself as to signing cheques, obtaining advances on account of petty cash, and the adjustment of all advances, have been strictly adhered to. The only departure from the recommendation was in the conduct of correspondence, and was rendered necessary by circumstances fully explained to the Board. Regarding my reply as to Harris' qualifications as an accountant, I am forced to observe that it has been scarcely fairly dealt with. The question (2329) was: "I suppose you are satisfied now that Mr. Harris was not competent for the position of accountant?" and I replied "Oh, I think he was highly competent, though I do not think he did his work properly." It would, however, appear that there is nothing to justify his competency being questioned. As bearing on this point attention is invited to the certificate of Mr. Rennie, Inspector of Accounts, Department of Audit, and Mr. Hall, late Examiner of Revenue Accounts there (at the time acting as Assistant Inspector); I also received a letter from the Auditor-General, written in reply to one from me, before Harris was appointed, on the subject of his qualifications and general character, and, although it is not now forthcoming, will, I have no doubt, be admitted by that gentleman. Too much I think has been made of the account business of the Department of Lands. It is by no means so intricate as to require extraordinary professional skill on the part of the officer in charge. Moreover, the way in which the books were kept had very little, if anything, to do with the frauds committed. With regard to the Bank pass book it is observed that it was the duty, as it had always been, of the accountant and his assistant to examine it, and the course should have been under ordinary circumstances sufficient. However, the frauds by forged cheques form but a small part of the amount obtained by Harris, being £185 6s. 9d. as against other frauds amounting to £1,250 5s. 4d.

Appendix C.

Paragraph 16 deals with the system of refunds. It was thought unsatisfactory by certain witnesses as a system, but not as regards that portion of the system which appertains to the Department of Lands. The "system," so far as this Department is concerned, was the result of an arrangement, in writing and duly approved of, with the Treasury in 1875. While referring specially to this arrangement I deem it necessary to state that the answer to question 1638 is, in an important feature, and so far as it relates to me, incorrect, but at the same time I think it was not intended to refer to me personally. The magnitude of the business of the Department of Lands demanded that the late Under-Secretary should be relieved of as much clerical work as possible, and it was therefore determined that the mere signing of the refund vouchers should be delegated to the officers in charge of the branches from which they issued. The authorization of the refund is altogether another matter, and, except in cases of small amounts, about which there can be no question, is one vested entirely in the Under-Secretary, and, in the case of conditional purchases, in the Chief Commissioner, subject to the approval of the Secretary for Lands when necessary. This rule is strictly adhered to by me. The fault of the system, it appears to me, is the alleged irresponsibility of the Treasury and Audit Office for passing fictitious claims. The observation "there appears to have been no means of detecting them" (frauds), might, I venture to say, be supplemented by the addition of "or attempt made."

made." As to there being "nothing to prevent any one individual from doing all that is necessary himself," it is observed that the remark is applicable to any case of forgery, which is, as a rule, the act of one individual.

I perceive that the Board (paragraph 17) are of opinion that the system of refunds obtaining in the Conditional Sales Branch has been less open to abuse, although, as far as I am aware, it is in reality in all material points identical with that of the other branches of the Department, the only difference being that Harris was not employed in connection with it, and therefore had no knowledge of the books or business.

It is difficult to understand (paragraph 18) in what particular way the system was conducted in a loose manner, in the Pre-Lease Branch especially. No doubt Harris's knowledge of the Audit Office "style" of verifying these documents (refund vouchers) assisted him;—in fact, had he not known how easy it was to meet the requirements of the Audit Office he never would, I feel assured, have attempted the frauds. It is there the system is loose, there being literally no check, attention only being given to the question of whether the sum purported to be authorized to be refunded had been collected, and no attempt made to ascertain the accuracy or otherwise of the authority. The second sentence of this paragraph reads as follows:—"The vouchers which he fraudulently prepared when engaged in the latter capacity (accountant) bore the alleged forged signature of Mr. Oliver, the Under-Secretary for Lands, whose name was accepted for refunds at the Treasury and Audit Office without question, notwithstanding the names of the officers authorized to sign refund vouchers had been previously duly notified to those Departments." The object of this sentence is difficult to comprehend, particularly as I am under the impression that only one of such vouchers bore my name, purporting to be in my writing. I have not the vouchers before me, but I believe I am correct. The two concluding sentences of the paragraph alluded to are as follows:—"From the evidence of several witnesses the Board is very much inclined to believe that some of the signatures attached to the refund vouchers prepared by Harris are genuine, although fraudulently obtained. They are more inclined to this opinion from the fact that the officers themselves could not declare positively that they were forgeries"—are not, so far as I can gather, supported by evidence. In every case where forgery occurs it is testified to, and where the signatures—only two—were obtained by fraud the fact is stated. The evidence in the cases of forgery seems to be very conclusive, and the opinion pronounced by the Board as above to the contrary scarcely harmonizes with the belief expressed in paragraph 13 that many of the frauds were "perpetrated by clever forgeries, not only of the names of officers," &c., &c.

I do not think that much importance attaches to the allegation (paragraph 19) that the refund voucher forms "have apparently not been under the special charge of any one in particular." Surely it must be admitted that an individual desiring to forge would not be stopped by the apparent difficulty of obtaining printed forms. He would find means of obtaining them—indeed he could without the slightest difficulty have them printed. The forms themselves are of no value, the essential element being the forgery.

While apparently great prominence has been given to the alleged shortcomings of the Department of Lands in connection with the Harris frauds, no mention is made of the responsibilities, alleged or real, of the Treasury and Audit Office. I venture to assert that had it not been for my researches prior to the appointment of the Board, and reported to the Secretary for Lands, the forgeries passed by the Treasury and Audit Office would have remained undiscovered.

Out of a total amount of £1,435 12s. 1d. obtained by Harris, the sum of £1,212 4s. 6d. was paid over the Treasury counter, in response, in every instance, to one or more forged documents. Of this sum £187 6s. is accounted for in paragraph 8, although nothing is said of the forged order on the Treasury for payment. It, however, occurs to me that the remaining £1,024 18s. 6d. deserved some notice from the Board. The system, so far as the Department of Lands is concerned, has been condemned; but I would respectfully inquire what becomes of the value of the Audit Office check or the responsibility of the Treasury for paying on forged documents, even including the authorities required by that Department for the final receipt of the sums by agents on behalf of the persons alleged to be entitled to them? Without these latter documents the frauds could not have been consummated. The blank forms of authority for the disposal of money are issued by the Treasury, and, judging from results, must be quite as accessible, or as easily obtainable, as the Lease Rent refund vouchers of the Department of Lands. The note on the foot of the authority to pay money is as follows:—"In all cases where the signature is not known at the Treasury the witness must be a Magistrate, Clergyman, or Clerk of Petty Sessions. The witness should in all cases be satisfied of the identity of the person signing the order." From inquiries made at the Colonial Secretary's Department—see reply to question 229—I found that the persons, with one exception only, whose names are attached to these authorities as attesting Magistrates, are not Justices of the Peace. Perhaps the signatures to the authorities were, as required by the foot-notes, known at the Treasury, and, therefore, no investigation thought necessary as to whether the attesting witness was a Magistrate or not. I have no desire to write more than is absolutely necessary, and will now only observe, before referring to the recommendations of the Board and the concluding portion of the Report, that, when last examined, I was informed that the "Board were anxious to give me an opportunity of making any further remarks I may have desired to offer in connection with the subject under consideration," but, after putting sixty-eight questions to me on various subjects, I was told that I was no longer required; and I was, therefore, not permitted to take advantage of the offer made by the Board.

The propositions of the Board are, I venture to submit, of such an elaborate nature as to be, on that ground alone, objectionable. The suggestion to appoint a chief clerk or assistant Under-Secretary to perform the mechanical duty of signing refund vouchers would scarcely be a warrantable arrangement in view of the very much more responsible duties now performed by other officers of the department, who have not such a position either as regards status or salary. Besides, if a chief clerk were appointed, his services would be required in connection with duties of a far higher character than attending wholly to refund work. I do not think any of the other propositions, except No. 5, require special comment. The unnecessary circumlocution in connection with the pre-lease refund voucher was alluded to by me in my evidence, and the suggested change to send them to the Audit Office instead of the Treasury is in accord with my views. The proposal that conditional purchase refund vouchers should be sent to the Treasury by the officer who signs them is highly objectionable, as these documents are now despatched direct to the persons to whom the money is refundable, in order that the vouchers, on being made payable to the Colonial Treasurer, may be tendered

as

as cash, should the recipients be desirous of re-selecting. Any attempt to vary this system would result in the greatest possible inconvenience to the public, without any corresponding advantage being obtained. To carry out the proposals of the Board, which appear to be far from complete as a check, would be to cast further work on a department having to contend with a daily increasing business, and one that is, at the present moment, well nigh overwhelmed. A very simple system of check, which, however, is not put forward as perfect and beyond evasion, would be the keeping of refund registers in every branch from which refunds issue. Each refund, as signed by the officer authorized to do so, should be entered in the register, and the entry initialled by him as correct. On receipt of these vouchers at the Audit Office it should be the duty of an officer to come to this department and satisfy himself that the refund is entered in the refund register, and initial the entry—the refund vouchers of each branch to be numbered consecutively. The responsibility would then rest with the head of the branch as to the refund having been properly approved of, and, with the Audit Office, that no amount is verified for refund unless it appears in the register, and I think this is certainly a responsibility that the Audit Office should accept.

The proposition to place officers who sign refund vouchers under security should, I think, be given effect to.

With regard to paragraph 21, it is proper to mention that any alterations recently made in the Account Branch were carried out by my instructions. The officer selected for the position of accountant was specially chosen from his known reliability and general competency, and was formerly an officer of the Treasury. The recommendation of the Board as to the examination of the bank pass-book has been already provided for. The proposed intimation to the bank of the change of cheque is, as before stated, a matter for the Treasury.

17th March, 1882.

CHARLES OLIVER.

Minutes on No. 3.

My honorable colleague the Colonial Treasurer should see this paper.—JOHN R. The Under-Secretary for Finance and Trade.—C.O., B.C., 6 April, 1882. Seen.—J.W., 17/4/82. The Chief Inspector of Accounts.—G.E., 20/4.

A.

Regina v. Henry Vincent Harris (Forgery and uttering).—Quarter Sessions, Sydney, 12th December, 1881.

Copy of the evidence of Arthur Fitzgerald.

ARTHUR FITZGERALD, on oath, states: I am teller in the London Chartered Bank, Sydney; no person named William Wallace has any business transactions with our bank; I do not know prisoner; the signature to E is not my signature; it closely resembles my signature; I never received the amount of money mentioned in that receipt; Wallace has no account at our bank; I never received any money on his account; the signature is so good an imitation of my own that at first sight I was inclined to think it was my signature, but I never put the initial letters after my signature, as in E; I take them to be L.C. Bk., and to mean London Chartered Bank.

A. FITZGERALD.

Sworn at Sydney, 1st December, 1881.—THOS. HALE, J.P.

B.

The Under-Secretary for Lands to The Under-Secretary for Finance and Trade.

Sir,

Department of Lands, Sydney, 20 June, 1881.

I am directed to request that you will be good enough to furnish me with eight cheque-books of 200 cheques each, four forms on a page, and printed in accordance with the enclosed pattern, at your earliest possible convenience.

I have, &c.,

CHARLES OLIVER.

The Treasury cheques alone are headed "Public Account." There is no objection to a new series of "Numbers," and to the heading "Department of Lands."—G.E., 23/6/81. The Under-Secretary for Lands. Amended form herewith.—C.O., B.C., Department of Lands. The Under-Secretary for Finance and Trade. The Government Printer will be good enough to print the cheques as requested.—G.E., 28/6/81.

C.

DURING the time Mr. Harris was in the Audit Department, the officers under whom he was employed all testify to his zeal, assiduity, and correctness, and also to his good conduct otherwise; and, so far as my own observation goes, I can endorse the above testimonial. I shall be glad to hear of his application being successful.

13/8/79.

EDWARD A. RENNIE,  
Deputy Auditor-General.

While endorsing the above testimonials, I may add that I believe Mr. Harris to be a qualified accountant.

Department of Audit, 13/8/79.

R. T. HALL,  
Asst. Insp. Accs.

No. 4.

Memorandum by Mr. Chief Inspector Thomson.

Inspecting Branch, The Treasury, New South Wales, Sydney, 12 June, 1882.

Minute-Paper.

Subject:—Mr. Under-Secretary Oliver's memorandum on the report of the Board appointed to inquire into Harris' frauds, &c.

On my return from New Zealand I found the accompanying papers on my desk, having, I presume, been referred to me for the purpose of obtaining any remarks I might think necessary on Mr. Oliver's memorandum.

Having carefully read that memorandum, which deals exclusively with the report of the Board appointed to inquire into the frauds and defalcations of Harris, the late accountant in the Lands Department, and which was also authorized to devise, if found necessary, a system of refunding over payments, &c., that would admit of a more satisfactory check being established in future, I regret to say that I find that document of such a character as to preclude my dealing with it alone, and for this reason, that it is directed against the Board as well as against its recommendations. Having been a member of that Board

it

it would be improper for me to attempt to combat Mr. Oliver's objections, unless in the presence of my colleagues, and even then I question whether it would be judicious to do so, as our comments thereon might be referred to Mr. Oliver for his further remarks, and then back again to the Board, and so on, so that there would really be no finality to the affair.

If the report of the Board is to be shelved, and its recommendations ignored, simply because they did not meet Mr. Oliver's views, then it must be apparent that its appointment was a mistake, and that the gentlemen forming it were less competent to come to a right conclusion than the Under-Secretary for Lands.

JAMES THOMSON,  
Chief Inspector.

---

*Minutes on No. 4.*

I think the course taken by Mr. Oliver was an improper one. The Board had the confidence of the late Secretary for Lands and myself, and their report and inquiry was not directed against Mr. Oliver, but against the system.—J.W., 19/6/82. Mr. Thomson.—G.E., 20/6/82. The Under-Secretary for Lands.—G.E., B.C., 21 June, 1882.

---

No. 5.

Memorandum by The Under-Secretary for Lands.

I REGRET more the minute of the Colonial Treasurer than anything the Board has written or could possibly write.

The Secretary for Lands permitted me to make the observations which I did, and they were confined to a fair and accurate criticism of a report which is opposed to evidence, and in itself contradictory.

Mr. Thomson's memo. calls for no remark on my part, further than that the first few lines are extremely disingenuous, as he had carefully perused the comments made by me before he left for New Zealand; indeed he called upon me with no other object, so far as I could divine, than that of inducing me to withdraw them.

While I cannot agree with recommendations of the Board, I am perfectly prepared, as is almost unnecessary to mention, to carry them out to the letter, if so directed.

C.O.,  
4/7/82.

**CONDITIONAL PURCHASES.**

(APPLICATIONS FOR, BY AGENTS.)

---

*Ordered by the Legislative Assembly to be printed, 26 October, 1882.*

---

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, made on the 27th September, 1882, That there be laid upon the Table of this House,—

“ A copy of the letter addressed to the Crown Lands Agent, Newcastle, by  
 “ the Department of Lands, instructing him to accept applications for  
 “ conditional purchases not tendered in person ; also copy of Ministerial or  
 “ other authority for the issue of the instructions referred to.”

(*Mr. Reid.*)

---

Memo.

Department of Lands, 22 May, 1872.  
 IN case of doubt on the part of the Land Agent, Newcastle, as to legality of accepting applications for mining conditional purchases from an agent, instead of from the applicant in person, he is hereby informed that it has been held that mining conditional purchases may be made by agents for the actual purchaser. He will therefore accept any such applications which may be tendered to him by agents.

LAND LAWS.

(PETITION OF FREEHOLDERS, &c., OF COROWA, COLLENDINA, &c.)

*Received by the Legislative Assembly, 31 August, 1882.*

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales.

The Memorial of the Freeholders, Selectors, Mechanics, Storekeepers, &c., &c., &c., of Corowa, Carnsdale, Collendina,—

HUMBLY SHOWETH:—

That your Petitioners view with alarm the large area of land that is being alienated from the Crown, and the formation of large estates, or sheep-walks, by financial Companies and others, by the existing system of auction sales, improvement purchases, and dummy selections.

That such wholesale disposal of the public estate is detrimental to the future prosperity and welfare of the Colony.

That the delay and inactivity displayed by the Lands Department in dealing with correspondence, applications from conditional purchasers, and in causing surveys to be made after selections have been approved of, is inflicting great hardship, trouble, annoyance, and loss to *bond-fide* selectors.

That the free-selectors of New South Wales constitute a large portion of our community, and are forming the nucleus of future prosperity by industry, perseverance, enterprise, and their settlement of the country districts. Nevertheless, when any important question arises in connection with the Land Laws, selectors are frequently stigmatised as "land sharks" and "dummies."

That your Memorialists are aware that "dummyism" is practised to an alarming extent in the most barefaced manner, and that sections 9 and 10 of the Crown Lands Amendment Act of 1875, by making both parties to the breach of the law liable to punishment, help to shield rather than to expose the practice.

That, in order to bar settlement, useless improvements are scattered broadcast over the country, and free-selection thereby prevented.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take this Memorial into your favourable consideration, and advise His Excellency the Governor to appoint, as early as possible, a Royal Commission with powers to make the most searching inquiries into all reported cases of "dummyism," the general working of the Land Act, its administration and effects; and we further pray that, pending such inquiry, all auction sales may be stopped until a report has been submitted and the electors have had an opportunity of expressing an opinion at the next General Election.

And your Petitioners, as in duty bound, will ever pray.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

SALE OF CROWN LANDS BY AUCTION.  
(PETITION AGAINST—R. C. LUSCOMBE.)

*Received by the Legislative Assembly, 26 September, 1882.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Colonists, in public meeting assembled, Temperance Hall, Sydney,—

MOST RESPECTFULLY AND HUMBL Y SHOWETH :—

1. That your Petitioners view with alarm the continued formation of large freehold estates in this Colony, and the slow progress of the settlement of the people on the soil.

2. That your Petitioners attribute these results to the land auction system now in force, and to the other facilities and inducements now presented by the law for the monopoly of land by large holders, and to the insufficient encouragement given to smaller settlers.

3. That your Petitioners are convinced that the remedy for these evils will be found in an immediate stoppage of all sales of Crown Lands by auction, or auction selection other than urban and suburban lands; in such alteration of the existing land laws as will check all other alienations of land except for the purpose of *bonâ fide* manhood settlement, in accordance with the true spirit of the Crown Lands Alienation Act of 1861; and in such further alterations of the laws as will afford a stronger inducement than now exists, and a surer protection to *bonâ fide* settlers upon the soil in holdings of a moderate area.

Your Petitioners therefore most humbly and earnestly pray that your Honorable House may be pleased to cause such alterations in the existing law and regulations as to carry out the above objects.

And your Petitioners, as in duty bound, will ever pray, &c.

Signed for and on behalf of meeting,

25 Sept., 1882.

R. C. LUSCOMBE.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

APPRAISEMENT OF RUNS IN THE NEW ENGLAND  
AND CLARENCE AND MACLEAY DISTRICTS.  
(PARTICULARS.)

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 14th December, 1881, That there be laid upon the Table of this House,—

“ A Return showing the results of the Appraisal of Runs for 1881 and  
“ 1882 in the New England and the Clarence and Macleay Pastoral  
“ Districts, specifying the names of the runs, the names of the lessees, the  
“ area, grazing capabilities, and rent of each run; and showing also, as  
“ regards stock capabilities, the rate per head represented by the rent as  
“ determined; also the names of the appraisers, date when award was made  
“ by the appraiser, and the previous rents of the runs.”

(*Mr. Dillon, M.P.*)

APPRAISEMENT OF RUNS IN THE NEW ENGLAND AND CLARENCE AND MACLEAY DISTRICTS.

RETURN showing the results of the Appraisements of Runs for 1881 and 1882 in the New England, Clarence, and Macleay Pastoral Districts, specifying the names of the Runs, the names of the Lessees, the area, grazing capabilities, and rent of each Run; and showing also, as regards stock capabilities, the rate per head represented by the rent as determined; also, the names of the Appraisers, date when award was made by the Appraisers, and the previous rents of the Runs.

\* Of runs marked thus the awards of the Appraisers named were not confirmed by the Minister charged with the appraisement, but were determined by him at the amounts stated after report and recommendation received from Messrs. W. P. Mylcharane, J. R. Canvin, and F. A. Thompson. All others were confirmed by the Minister, and rent fixed accordingly. The estimate of grazing capabilities shown is that made by the Appraiser in the cases where his award was confirmed. In the other cases the estimate made by Messrs. Mylcharane, Canvin, and Thompson has been given.

—  
**LEGISLATIVE ASSEMBLY.**  
**NEW SOUTH WALES.**

---

**MR. COLIN SIMSON'S RUNS NEAR HAY.**  
 (RESERVES AND PURCHASED LAND ON.)

*Ordered by the Legislative Assembly to be printed, 26 October, 1882.*

---

RETURN to an *Order* of the Honorable the Legislative Assembly, dated 12th September, 1882, That there be laid upon the Table of this House, a Return showing,—

- “(1.) The date on which Mr. Colin Simson was returned as Member for Balranald.
- “(2.) The date on which he ceased to be Member for Balranald.
- “(3.) The number of Reserves on his Mungadel or other Runs near Hay, the date or dates on which such Reserves were made, and the purposes for which they were made.
- “(4.) The area of each Reserve, and the total area of all Reserves on Mr. Colin Simson's Mungadel or other Runs near Hay.
- “(5.) The date or dates on which each of the Reserves on Mr. Colin Simson's Mungadel or other Runs near Hay were cancelled; the reasons for which they were so cancelled.
- “(6.) The names of the purchaser or purchasers of the land contained in each and all of the above Reserves.
- “(7.) The area of land which Mr. Colin Simson was allowed to purchase out of each of above Reserves, and total area out of all the Reserves in virtue of improvement, or any other purpose except auction, whilst he was Member of Parliament for the Electorate of Balranald.
- “(8.) The area of land purchased by auction by Mr. Colin Simson, whilst he was Member of Parliament, out of each Reserve, and the total area so purchased out of all the Reserves by him.”

(Mr. McElhone.)

**CUSTOMS REGULATION ACT OF 1879.**  
 (REGULATIONS UNDER.)
 

---

Presented to Parliament, pursuant to Act 42 Vict. No. 19, sec. 131.

---

The Treasury, New South Wales, 11 May, 1882.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to make the following amended Regulations, under the "Customs Regulation Act of 1879."

JAMES WATSON.

---

 REGULATIONS UNDER THE "CUSTOMS REGULATION ACT OF 1879."

1. Upon the arrival of any ship within a league of any port on the seaboard, the Master or Pilot, as the case may be, shall cause to be hoisted and exhibited on a conspicuous part of the rigging the numeral flags indicating her port of departure; and if such ship shall arrive in the night, the Master shall cause such flags to be so hoisted and exhibited at sunrise next morning, and keep such hoisted during the hours of daylight until boarded by the proper officer of Customs.

2. Drawback on the exportation of duty-paid wine, beer, and sugar will be allowed as heretofore until further notice.

3. Upon examinations and inquiries made by the Collector or other principal officer of Customs, or other persons appointed by the Colonial Treasurer or Collector of Customs to make such examinations and inquiries for ascertaining the truth of facts relative to the Customs, or the conduct of Officers or persons employed therein, any person examined before them or him as a witness shall give evidence on oath or affirmation, to be administered or taken by such Collector or other principal officer or such other person as shall examine him, and who are hereby authorized to administer such oath and take such affirmation.

4. The proper ensign for the Customs shall be the red English ensign with the addition of a white cross, being in form and proportion the same as the white English ensign, but with the colours of the flag and cross reversed, and with the letters CH in the outer lower quarter of the flag; and the pendant shall be the red pendant.

5. Every entry which the Master of any Coaster is required by the 126th and 129th sections of the "Customs Regulation Act, 1879," to make in the Cargo-book shall be duly signed by the said Master.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

WINE DUTIES.  
(CORRESPONDENCE.)

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.*

The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, Victoria-street, S.W., 24 March, 1882.

I have the honor to inform you that having heard that the Imperial Government contemplated proposing to Parliament some alterations of the Customs Duties upon Wines imported into this country, Sir Arthur Blyth, Agent-General for South Australia, and myself, waited upon Lord Kimberley, Secretary of State for the Colonies, to urge upon His Lordship, that in any modifications that might be intended, the interests of the Wine Producing Colonies of Australasia should not be overlooked or disregarded.

His Lordship was good enough to listen to our representations and promised to submit the matter for consideration of the Government, and suggested that we should address a letter to him upon the subject, which we accordingly did, and I transmit a copy for your information.

I also transmit a newspaper report of a deputation of gentlemen representing the wine trade that waited upon Lord Kimberley on the 4th instant.

I have, &c.,

SAUL SAMUEL.

The Colonial Treasurer.—JOHN R., 15/5/82. The Under Secretary for Finance and Trade.—  
B.C. 15/5/82.

[Enclosure No. 1.]

The Agents-General for New South Wales and South Australia to The Right Honorable the Secretary of State for the Colonies.

My Lord, 5, Westminster Chambers, Victoria-street, S.W., March, 1882.

Understanding that it is not improbable that changes may be made in the Customs Duties upon wines imported into England from Foreign Countries, we have the honor to ask your Lordship to be so good as to bring under the consideration of Her Majesty's Government the interests of the wine growing Colonies of Australia, and we respectfully hope that in any contemplated alterations of the Tariff, those interests may not be overlooked or disregarded. We would further respectfully urge that the Australian Colonies may in this regard be placed upon equally favourable terms with any Foreign Countries exporting wine to England.

We have, &c.,

SAUL SAMUEL,

Agent-General for New South Wales.

ARTHUR BLYTH,

Agent-General for South Australia.

[Enclosure No. 2.]

COLONIAL WINE DUTIES.

The Earl of Kimberley yesterday afternoon received at the Colonial Office a deputation of gentlemen representing the Cape and Australian Colonies, with respect to the modification of the present wine duties.—Sir H. Holland, M.P., who introduced the deputation, said the present tariff provided that wines below twenty-six degrees proof spirit paid 1s. per gallon, and wine between twenty-six and forty-two degrees a duty of 2s. 6d. In regard to the Cape and Australian wine its natural strength was above twenty-six degrees, and the present duty therefore became differential and favourable to the cheap French wines, which contained less spirit. What was desired was that the uniform rate of 1s. per gallon for wine of twenty-six degrees should be retained, but instead of a leap to 2s. 6d. a sliding scale should be substituted of 1d. for every degree above twenty-six.—Sir Donald H. Currie, M.P., Mr. Alderman M'Arthur, M.P., Mr. W. G. Soper, vice-chairman of the South African Association, Mr. Montefiore, and Mr. Staveley Hill, M.P., also spoke, claiming that the present was a favourable time for the revision of the wine duties, and asserting that

that the Colonies desired not a better but an equal footing to other wine-producing countries.—Lord Kimberley, in reply, said it was a fiscal matter. The whole question was essentially a financial one, and as such might be referred to the Chancellor of the Exchequer. It had been assumed by all the speakers that the present wine duties were differential. Of course they were aware this was entirely denied. It was a very old controversy, which had been going on ever since the conclusion of the French treaty. By some it was asserted that the duties were not differential, but equal. He denied the inference which had been made, that the duties were meant to favour the French, for they were intended, he recollected, to operate equally and fairly. In respect to the failure to renew the French treaty, and the reconsideration of duties, he need scarcely say that if he were in the secret of Mr. Gladstone's Budget, it would be absolutely impossible for him to give the smallest information, but he should suppose that when these wine duties came to be revised—as he dared say they would be at some time—the object of any Chancellor of the Exchequer would be so to revise them as to place them upon a perfect equality, and if the result of such revision were to be more favourable to colonial wines, of course he should be extremely glad. He apprehended his duty was to bring under the notice of the Chancellor of the Exchequer the strong feeling which existed on the part of the colonists—(hear, hear)—first that the present duties operated differentially against them; and, secondly, that if these duties could be revised so as to be more favourable to wine of greater natural alcoholic strength, it must operate favourably to colonial trade, the increase of which was to be desired by everybody. In conclusion, he stated that the matter had not been overlooked, for the Agents-General for South Australia and New South Wales had been in communication with him, and he knew it was their intention to memorialize the Government on the subject.

1882.

## NEW SOUTH WALES.

## EDUCATION.

(REPORT OF THE MINISTER OF PUBLIC INSTRUCTION FOR THE YEAR 1881.)

Presented to Parliament, pursuant to Act 43 Vic. No. 23, sec. 36.

## REPORT of the Minister of Public Instruction for the Year 1881.

DURING the portion of the year 1881 anterior to 13th November, the work of the Department had been carried on by my predecessor, Sir John Robertson, who was the first Minister under the Public Instruction Act. As remarked in the report submitted by him upon the matters dealt with in 1880, much remained to be accomplished in reorganizing the system of public instruction upon the new basis laid down in the Public Instruction Act; and upon this point, as well as upon the current questions of the Department, much attention was bestowed. To this end, Regulations were framed respecting Exemption from payment of School Fees, the Duties of Public School Boards, the Collection of School Fees, General Religious Instruction in schools, and the Standard of Education required under the 20th section of the Public Instruction Act. Appendix I.

In reporting upon the progress made during the past year, it seems desirable to supply information as to the extent to which the task of providing the means of education for the whole Colony has been effected. For this purpose, the results of the Census of 1881 have given considerable facilities, though it is to be regretted that, in other respects, the statistics available are not sufficiently exact to supply more than an approximation to the truth.

## II.—THE SCHOOL POPULATION OF THE COLONY.

According to the Census of 1881 the total number of children in the Colony, of ages from six to fourteen years inclusive, was 147,318; and for the education of these—the statutory school population—provision of some kind requires to be made in Public Schools and Private Schools, or by Home Tuition. Besides the children of statutory school ages, others of ages above or below, but especially the latter, are usually found attending school. In fact, but for the presence of children below six and above fourteen years, many schools in country districts could not be maintained and would have to be abandoned. Practically, therefore, the school population of the Colony consists of children ranging from four to fourteen or fifteen years of age. The Census gave 40,871 as the number of children between four and six years of age, and 16,279 as the number from fourteen to fifteen years of age; consequently in 1881 the school population of ages from four to fifteen years inclusive was 204,468; and as children of these ages are required, or permitted, to attend school, it may be assumed that school accommodation in some form will have to be provided for the whole number.

It may be useful to record here the numbers of children in the Colony of the respective ages between four and fifteen years as the basis of any comparison that may hereafter be found desirable. They are the following:—

From 4 to 5 years...	...	...	...	20,092	}	40,871
" 5 to 6 "	...	...	...	20,779		
" 6 to 7 "	...	...	...	20,109	}	147,318
" 7 to 8 "	...	...	...	19,557		
" 8 to 9 "	...	...	...	18,869		
" 9 to 10 "	...	...	...	18,621		
" 10 to 11 "	...	...	...	18,973		
" 11 to 12 "	...	...	...	17,186		
" 12 to 13 "	...	...	...	15,565		
" 13 to 14 "	...	...	...	16,438		
" 14 to 15 "	...	...	...	16,279...	16,279	

## III.—EXISTING MEANS OF EDUCATION.

The means already provided for the education of this population may be conveniently classed under two heads, viz.—those provided at the public expense, and those provided at the cost of private individuals. The means provided at the public expense include the Sydney Grammar School, Schools established under the Public Instruction Act, and Schools in Charitable Institutions. The means provided at private expense may be classed as High Schools, Elementary Schools, and Home Tuition; and in addition there are the special cases of the Deaf and Dumb and the Blind Asylum and the Ragged Schools.

The existing means are exhibited clearly in the following table:—

<i>(a) Means provided at the public expense—</i>	
The Sydney Grammar School ... ..	1
Public High Schools (to be established) ... ..	...
Public Schools ... ..	1,018
Provisional Schools ... ..	234
Half-time Schools and Third-time Schools ... ..	93
Evening Schools ... ..	57
Certified Denominational Schools ... ..	144
Orphan Schools ... ..	2
Industrial Schools ... ..	2
<i>(b) Means provided at private expense—</i>	
School for the Deaf and Dumb and the Blind ... ..	1
Ragged Schools ... ..	3
Private Schools (Statistical Register for 1881) ... ..	507
Home Tuition ... ..	...
Total number of Schools ... ..	2,062

In the foregoing list it will be observed that no High Schools have yet been brought into operation under the Department. A partial explanation of this fact may be found in the considerations presented in Sir John Robertson's report for the previous year. It was therein pointed out that, in view of the probable expense, it was considered necessary to obtain from the residents in any locality where a High School was desired some guarantee for the permanency of the institution; that schools of this kind were apparently intended by the Act to be large schools; that in proportion to the size of the school, so great would be the loss of funds in the event of its failure; that if a High School was to fulfil the aim for which it was intended, the pupils must be fitted by their previous training to receive and profit by instruction in the advanced subjects enumerated in the 25th section of the Act; and that it was further considered essential to provide that High Schools should not interfere with the ordinary Public Schools or with Superior Schools, by withdrawing from them pupils whose proper place was in one or other of these classes of schools.

Without improperly withdrawing children from other kinds of schools, it has apparently been found difficult to obtain in any locality a sufficient number of pupils for a High School. For this reason, probably, but few applications for the establishment of this kind of school have yet been made. Further, as regards the few applications made, they could not be finally dealt with, the preliminary requirements not having been met in any case.

For the 1,546 Schools (or 1,667 Departments) established under the Public Instruction Act, schoolrooms are provided to accommodate about 124,721 pupils. These schoolrooms are provided in 827 vested buildings, 477 non-vested and rented buildings, 93 Half-Time and Third-Time School buildings (the property of the promoters of the schools), 144 Certified Denominational School buildings, and 36 School tents; and, as shown in a subsequent part of this report, arrangements have been made for supplying the accommodation expected to be needed hereafter. Taking the schools in the aggregate, ample accommodation of some kind is already provided for the ordinary school attendance. The distribution of this accommodation is, however, somewhat unequal, being in some places insufficient, while in others it is superabundant. In the former cases steps are being taken to adjust the available accommodation to the number of pupils likely to attend.

No means exist at present of ascertaining the amount of accommodation supplied by Private Schools, or the number of pupils by whom they are ordinarily attended. A Return is made annually to the Registrar-General of the number of such schools and scholars, but means of verification are wanting, and the statistics regarding these schools must therefore partake of the character of uncertain approximations instead of precise numbers.

As the Public Evening Schools are conducted in the same buildings as the Day Schools, the number of pupils attending them is fully provided for, and there is no necessity to take them further into account.

## IV.—ATTENDANCE AT THE SCHOOLS PROVIDED.

In order to secure the attendance of the statutory school population at the schools provided, it is enacted in section 19 of the Public Instruction Act that the Governor may, by proclamation in the Gazette, constitute and define Public School Districts and appoint a Public School Board for any such District; and that one of the duties of every Public School Board shall be "to use every endeavour to induce parents to send their children regularly to school, and to report the names of parents or guardians who refuse or fail to educate their children." In section 20 it is further provided that the children of the statutory school ages shall, unless just cause of exemption be shown, be compelled to attend school for a period of not less than seventy days in each half-year;

year; and section 21 provides that by proclamation in the Gazette, any Public School District may be declared to be a portion of the Colony where the obligation enacted by section 20 may be enforced. Towards carrying out these provisions, fifty-eight Public School Districts had been, or were about to be, constituted and defined at the end of 1881; twenty-seven Public School Boards had been appointed; fifty-one Districts had been proclaimed as portions of the Colony where the attendance of children at school might be enforced; and thirty-five of these Districts had been placed under the charge of School Attendance Officers. The Principal School Attendance Officer reports that the thirty officers appointed to work under his supervision are, with some exceptions, well qualified for their work, and perform it with proper temper, with earnestness, and with success; that they are well received and cordially supported by the inhabitants of the Districts where they labour; that 22,584 cases of non-attendance or irregular attendance at school on the part of children included in the statutory school population of the Colony had been investigated; and that, as a result of the investigations held, 9,814 children had shown marked improvement in their school attendance. The Principal Officer further reports that, as a District must have been six months proclaimed under section 21 of the Public Instruction Act before parents residing in it can be prosecuted for neglecting to send their children to school, no such prosecutions could have taken place in 1881 in any Country District. In the Sydney Districts, however, there have been thirty-five such prosecutions, and thirty-three convictions have been obtained.

Notwithstanding the apparent success reported to have been achieved by the Attendance Officers in the various districts where they labour, the Principal Officer anticipates that proper school attendance will not be secured unless parents found guilty of neglect are duly prosecuted and punished under section 21 of the Public Instruction Act. In concluding his report the Principal Officer remarks as follows:—"This year's experience has shown that, without a most stringent application of the law, the desired result and that contemplated by the Act will not be fully obtained. Parents may listen approvingly to remonstrance and promise compliance with the law, but they will come to regard expostulation, however earnest or persuasive, as mere sentiment, so long as they think there will be no punishment."

It is necessary to bear in mind that, up to the end of 1881, but a small proportion of the Colony had been divided into School Districts; for though fifty-eight such Districts had been, or were about to be, constituted and defined, and fifty-one had been proclaimed as portions of the Colony where the obligatory provision of the Public Instruction Act could be enforced, they covered but a comparatively small space, though it was, undoubtedly, the most thickly populated.

The gross enrolment of pupils for the year in the ordinary schools under the Department was 176,969, but a deduction estimated at 30,863 or 17·43 per cent. has to be made for multiple enrolments, leaving 146,106 as the net enrolment of distinct individual pupils. The following statement will explain the method by which this net enrolment of pupils has been obtained:—

By returns obtained from 1,400 schools it was found that 86,704 individual pupils were present in such schools on the 18th December, 1881.

Of these, 70,849 had attended 1 school only in the year.
13,696           "       2 schools           "
1,858           "       3           "
and 301       "       4           "

The names of these pupils would therefore appear on the school rolls as follows:—

70,849 would appear once, showing ...	70,849 names.
13,696           "       twice           "	27,392   "
1,858           "       three times, showing ...	5,574   "
and 301       "       four times       "	1,204   "   and thus

86,704 pupils were represented by an enrolment of 105,019 "

Further, in the last quarter of the year there were on the class rolls—and therefore in actual attendance for some portion of the quarter—128,796 pupils; and as 86,704 of these same pupils caused an enrolment of 105,019 names *in the year*, the whole 128,796 pupils would, in the same proportion, cause an enrolment of 156,002 names—*i.e.*, a net enrolment of 128,796 pupils caused a year's gross enrolment of 156,002 names, the difference between these enrolments being 27,206, or 17·43 per cent. of the gross enrolment. But the total number of names in the year's gross enrolment is 176,969; and as the enrolment of 156,002 of these names was caused by 128,796 distinct pupils, the remaining 20,967 enrolled names would, in the same proportion, represent 17,310 pupils—*i.e.*, the year's gross enrolment of 176,969 names represents a net enrolment of 146,106 (128,796 + 17,310) pupils. As none of the pupils represented by 20,967 of the enrolled names attended school beyond the third quarter of the year, it would follow, *ceteris paribus*, that such pupils had among them on this account a smaller proportion of multiple enrolments, and that, therefore, a smaller deduction than 17·43 per cent. of the names should be made in estimating the net enrolment of pupils represented. This probable difference, which at most would be only about 4 per cent. of the year's gross enrolment, has, however, been ignored in estimating, from the gross enrolment, the net enrolment of individual pupils as 146,106. In Public Schools only, the deduction to be made is 17·06 per cent.; in Provisional Schools, 6·9 per cent.; in Half-time Schools, 9·06 per cent.; in Certified Denominational Schools, 21·85 per cent.; in all Schools, 17·43 per cent., and in all Schools other than Certified Denominational, 16·53 per cent. of the gross enrolment of names.

The

The quarterly enrolment and daily average attendance of pupils during the year were as follows :—

Appendix VI.

For March quarter there were 121,175 pupils enrolled, and 82,457, or 68 per cent. of enrolment, in average daily attendance ;  
 „ June quarter there were 125,639 pupils enrolled, and 80,772, or 64·2 per cent. of enrolment, in average daily attendance ;  
 „ September quarter there were 126,416 pupils enrolled, and 81,781, or 64·6 per cent. of enrolment, in average daily attendance ;  
 „ December quarter there were 128,796 pupils enrolled, and 86,533, or 67·2 per cent. of enrolment, in average daily attendance ;  
 giving an average enrolment of 125,506, and an average daily attendance of 82,890, or 66 per cent. of enrolment, for the year.

The following tables exhibit the enrolments and attendances in the last two years, and the increase for 1881 :—

	Enrolment in 1880.	Enrolment in 1881.	Increase for 1881.	Average daily attendance for 1880.	Average daily attendance for 1881.	Increase in average attendance for 1881.

Attendance of pupils for the period required by statute.

	Number of day-school pupils attending thirty-five days or above.	Number of day-school pupils attending less than thirty-five days.	Number of pupils who entered after the commencement of the quarter, or left before its termination.	Percentage of enrolment attending thirty-five days, or above.	Percentage of enrolment attending less than thirty-five days.	Percentage of enrolment, entering after the commencement of the quarter, or leaving before its termination.
In March quarter ...	57,538	62,901	26,669	47·8	52·2	22·1
„ June „ ...	73,804	45,812	26,624	63·2	36·8	21·0
„ September „ ...	72,640	52,875	27,760	57·8	42·2	22·1
„ December „ ...	83,339	42,867	22,420	66·6	33·4	17·5

Of the total number of children (144,667) enrolled in the year for attendance at day schools, 84,965, or 58·73 per cent., had their names on the school rolls during the whole year ; 59,702, or 41·26 per cent., entered after the commencement of the school year or left before its termination ; 57,727, or 39·90 per cent., attended 140 days or above, in the year ; 86,940, or 60·09 per cent., attended less than 140 days in the year.

The net enrolment for the year in day schools was 144,667, the total number of school days in the year was 230, and the average daily attendance for the year was 82,436. These numbers give an average of 131 days' attendance in the year for each pupil of the net enrolment ; if, however, the average quarterly enrolment for the year be taken in place of the net enrolment for the year, the numbers give an average of 152 days' attendance for each pupil.

Of the net enrolment of 146,106 pupils, 3,502, or 2·4 per cent., were estimated to be under four years of age ; 25,275, or 17·3 per cent., between four and six years ; 85,913, or 58·8 per cent., between six and twelve years ; 21,626, or 14·8 per cent., between twelve and fourteen years ; and 9,790, or 6·7 per cent., over fourteen years of age. If from the total number enrolled we deduct the 28,777 under six years of age, and the 9,790 above fourteen years of age, we shall have as the remainder 107,539, which is the estimated number of children of the statutory school ages enrolled in the year for attendance at the ordinary schools under the Department. To this number may be added 300 for the Sydney Grammar School, 441 for the two Orphan Schools, 371 for the two Industrial Schools, 478 for the Ragged Schools and the Asylum for the Deaf and Dumb and the Blind, and 13,481 for 507 private schools, the same correction for ages having been applied in each case ; and the total thus obtained, 122,610, is the estimated number of children of the statutory school ages actually enrolled in the year for school attendance. Subtracting this total from 147,318, the statutory school population as returned in the Census, the remainder, 24,708, is the number either taught at home or untaught. The Census returns, however, give 19,792 as the number of children of all ages under instruction at home in 1881. If from this number we deduct 5,226, or 26·4 per cent., as being children

children under six years or above fourteen years of age, and add the remainder, 14,566, to 122,610, we shall obtain 137,176 as the estimated number of children of the statutory school ages who were actually under instruction in 1881. If this number be deducted from 147,318, the remainder, 10,142, is the estimated number of children of the statutory ages who, in 1881, were entirely untaught.

The following table exhibits the number of children of different ages attending schools under the Department, and the proportions such numbers form of the whole school population and of the total population of the Colony:—

Ages of Pupils.	Net enrolment of pupils under different ages.	Percentage under different ages of enrolment.	Percentage of population under different ages enrolled for school attendance.	Percentage of total population of Colony enrolled under different ages for school attendance.
Under four years of age .....	3,502	2·4	3·8	·46
Between four and six years of age.....	25,275	17·3	61·8	3·36
"    six and twelve years of age...	85,913	58·8	75·8	11·43
"    twelve and fourteen years of age .....	21,626	14·8	63·3	2·87
Over fourteen years .....	8,351	6·7	.....	1·30
"    Evening Schools...	1,439			
Totals .....	146,106	100·0	.....	19·42+

Nearly 20 per cent. (equal to 1 in 5) of the total population of the Colony were enrolled for attendance at schools under the Department in 1881.

22 per cent. of the total population of the Colony were enrolled for attendance at schools—private schools and schools supported by the State—in 1881.

Fully 24 per cent. of the total population of the Colony were returned as being under instruction in school or at home in 1881.

73 per cent. of the total statutory school population of the Colony were enrolled for attendance at schools under the Department in 1881.

93 per cent. of the total statutory school population of the Colony were returned as being under instruction in school or at home in 1881.

Only a small proportion of the statutory school population can now be said to be entirely untaught; but owing to the great irregularity which prevails in school attendance, the teaching actually received by many pupils is to a considerable extent ineffective. From the information herein furnished, it has been seen that about 41 per cent. of the year's enrolment of children in schools under the Department did not attend school at all during portions of the school year, and that of the year's average quarterly enrolment even, more than half failed to attend the 140 days (out of 230) required by statute. This irregularity is undoubtedly the chief obstacle to educational progress; but, as the arrangements made for carrying into effect the obligatory attendance provisions of the Public Instruction Act are brought into full operation throughout the Colony, the obstacle will in part be removed, and regularity of attendance, at least to the degree required by the statute, will no doubt be secured.

#### V.—CHANGES EFFECTED IN EXISTING SCHOOLS, AND THE NUMBER OF NEW SCHOOLS ESTABLISHED IN THE YEAR.

There were 1,357 schools in operation at the end of 1880, and in 1881 the number was increased to 1,546. Six of the Public Schools on the list for 1880 were not re-opened in 1881, but the number in operation was increased by the conversion of sixty-three Provisional Schools and eleven Half-time Schools, and by the establishment of seventy-eight entirely new schools. The number of Provisional Schools was increased by the conversion of three Half-time Schools, and by the establishment of seventy-six entirely new schools. Six Half Time and three Third Time Schools were established in the year; but as fourteen Half Time Schools were converted into Public Schools or Provisional Schools, the number of Half Time and Third Time Schools in operation in 1881 shows a decrease of five when compared with the number of Half Time Schools on the list at the end of 1880. Thirty-three additional Evening Schools were brought into operation in the year. One of the Certified Denominational Schools on the list for 1880 was not subsequently re-opened, and twelve of those in operation in 1881 were closed before the end of the year.

Full particulars as to the changes effected in schools in the year, and as to the establishment of new schools, will be found in the following tables:—

	Public Schools.	Provisional Schools.	Half-time Schools.	Evening Schools.	Certified Denominational Schools.	Total.

## VI.—TEACHERS.

In 1881, 2,558 teachers—males, 1,320, and females, 1,238—were employed in the schools under the Department, viz.:—1,535 as teachers in charge of schools, 237 as assistants, 677 as pupil-teachers, and 109 as work-mistresses. The teachers in charge were—males, 1,057, and females, 478; the assistants—males, 30, and females, 207; and the pupil-teachers—males, 233, and females, 444. 1,038 of the teachers in charge, and 223 of the assistants, had obtained classification by examination; while 497 of the teachers in charge, and 14 of the assistants, were unclassified. Of the 677 pupil-teachers, 78 were in Class I, 148 in Class II, 150 in Class III, and 301 in Class IV.

The following table exhibits the number of teachers under the different grades of classification, as obtained by examination:—

## Teachers' Emoluments.

Public Schools are by regulation arranged in ten classes, according to the number and proficiency of the pupils attending them, and the number of departments into which they are divided; and there are seven divisions, or grades, of classified teachers. Each teacher is paid salary according to the class of the school in which he or she is employed, but, to be eligible to hold a permanent appointment in a school of a certain class, the teacher must obtain, by examination, a corresponding grade of classification. In Provisional Schools the classification depends upon the number of pupils only, and each teacher is paid the rate of salary allotted to the class of school under his or her charge. As a rule, the teachers of these schools do not hold a classification.

Assistant teachers are employed in the first four classes of schools only, and are paid the salaries awarded to the positions they hold, but to be eligible for these positions they must have gained the necessary grades of classification. Pupil-teachers are arranged in four classes, are required to pass an examination in each year, and are paid salaries increasing annually according to the classification thereby obtained. They are appointed to the first six classes of schools only. Work-mistresses are employed in the first five classes of schools, and, as in the case of ordinary teachers, their salary varies according to the class of school in which they are engaged. In schools below the fifth class in charge of married teachers, needlework is usually supervised by the teachers' wives, an additional sum of £12 per annum being paid in such cases.

The

Up to that time a teacher's salary was dependent upon his certificate alone, and there was no Regulation requiring that a large and important school should be in charge of a high class teacher, though the justice of the principle had been recognized, and to a considerable extent acted upon by the Council of Education. By giving practically the force of law to this arrangement, teachers will feel assured that merit must eventually place them in positions of such trust and emolument as their qualifications entitled them to fill. As a matter of fact, some important schools were under the management of teachers with comparatively low grade certificates; and, on the other hand, some teachers with high certificates were appointed to low class schools.

The case of teachers in high-class schools was further affected by those provisions of the Public Instruction Act that relate to Superior Schools, and by the Regulations which were framed to give effect to those provisions. By the Act (section 6) it is provided that in Superior Schools additional lessons in the higher branches of education may be given; and the Regulations prescribe Mathematics, Physical Science, Latin, and Drawing, for boys, and French, the Piano, and Drawing, for girls, as the branches to be taught. For instruction in these advanced subjects, extra fees are to be paid by the parents at the rate of 7s. per month. It was clearly incumbent upon the Minister to ascertain that the teachers upon whom devolved the duty of imparting this higher instruction possessed the necessary qualifications for that purpose; and examination was the only possible means of establishing their fitness for this duty. The teachers in the Service might have anticipated the necessity for examination by a perusal of the Regulations of 17 June, 1880, which deal with the question of salaries, and provide that classification by examination is necessary for holding certain positions and the receipt of certain salaries. Moreover, the Regulations for Superior Schools were published on 20th December, 1880, and the teachers should, in strictness, have been examined at that time, so as to be prepared to commence teaching the higher branches when the Regulations came into force. Under all the circumstances, however, it was deemed advisable to give the teachers ample time for preparation, and the examination was therefore deferred for a period of twelve months, thus affording them eighteen months from the publication of the Regulations of June, 1880, and twenty months from the date when the Act came into force. The teachers summoned to examination were those whose classification was not in accordance with Regulation, and others who voluntarily sought to obtain promotion. In view of the object for which this examination was required, it was considered that classifications gained by teachers under the late Council of Education, in virtue of certain conditions specified by Regulation, could not be held to establish a teacher's ability to give instruction in the advanced subjects to be taught in Superior Schools; and teachers holding such classifications were accordingly informed of the necessity for their attendance at examination.

## Appendix IV.

The examinations were fixed to take place on the same dates, at various convenient centres throughout the Colony; the same questions were given, and in the same order in each place; and the teachers concerned could thus observe that identical facilities for success were at the disposal of all.

The total number of persons examined in the year was 1,914. These were examined for appointment as teachers, or pupil-teachers, for classification, or for promotion. Of the whole number, 718 were applicant pupil-teachers, sixty-three were applicants for employment as teachers, forty-seven were applicants (other than pupil-teachers) for admission to the Training School, 590 were pupil-teachers, due by length of service for promotion in class, or to the Training School, and 496 were applicants for classification as teachers, or for promotion in such classification. Of the 718 applicant pupil-teachers, 337 were successful in their examination, and 381 failed; of the sixty-three applicants for employment as teachers, thirty were successful and thirty-three failed; of the forty-seven applicants (other than pupil-teachers) for admission to the Training School, seventeen were successful and thirty failed; of the 590 pupil-teachers due for promotion in class, or to the Training School, 422 were successful and 168 failed; and of the 496 applicants for classification as teachers, or for promotion in classification, 297 were successful, and 197 failed.

The results of the Examinations held are exhibited more fully in the following table:—

*The Training School.*

The Training School is still conducted under the temporary organization of former years, but steps have now been taken towards effecting very important improvements. Before the close of the current year part of the operations of the Institution will, it is expected, be carried on under a re-organization of a satisfactory character, which may be further advanced towards completion in 1883. The steps already taken towards this end are—the purchase of the Hurlstone Estate, near Ashfield, as the site for a new Institution for the Training of Teachers, the alteration, for temporary occupation, of the existing buildings on the estate, and the drawing up, by the architect, of plans for the erection of proposed permanent buildings. Upon completion of the proposed permanent buildings all the students in training will be provided with board and residence in the Institution, and meantime the female students will be so accommodated in the existing buildings altered for the purpose. In view of this arrangement a lady teacher has been engaged in the mother country to take the position of Training Mistress, and her arrival in the Colony may be expected in October next. It is further intended that students shall remain in the Institution a minimum period of twelve months, and that when circumstances permit the period of training shall be extended to two years—as is the practice in similar Institutions in England.

Full information respecting the work done in the Training School in 1881 will be found in the Training Master's appended report. Appendix IV.

## VII.—INSPECTION.

The Inspectoral Staff in 1881 consisted of the Chief Inspector, seven District Inspectors, and sixteen Inspectors—two of the latter having been appointed in the year; and, for the purposes of inspection, the Colony was divided—as in 1880—into seven Districts, viz. :—The Metropolitan District, and the Districts of which Armidale, Bathurst, Goulburn, Maitland, Wagga Wagga, and Wellington are the principal centres of population. Each of these Districts was under the charge of a District Inspector, assisted by one or more Inspectors.

Of the 1,610 day schools, or departments, in operation in the year, 1,546 were fully inspected; and 86,741 pupils, or 59 per cent. of the year's enrolment, were present at the Inspectors' examinations.

Of the total number of pupils (86,741) present at Inspection, 85,191, or 98·2 per cent., were examined in Reading; 85,323, or 98·3 per cent., in Writing; 78,397, or 90·3 per cent., in Arithmetic; 43,206, or 49·8 per cent., in Grammar; 47,962, or 55·2 per cent., in Geography; 22,645, or 26·1 per cent., in Scripture Lessons; 81,012, or 93·3 per cent., in Object Lessons; 41,662, or 48 per cent., in Drawing; 58,894, or 67·8 per cent., in Vocal Music; 3,139, or 3·6 per cent., in Euclid; 2,172, or 2·5 per cent., in Algebra; 567, or 0·65 per cent., in Mensuration; 1,126, or 1·29 per cent., in Latin; 48,050, or 55·3 per cent., in Drill; and 26,615 girls were examined in Needlework. A few pupils were also examined in History, French, and Trigonometry.

Of the 85,191 pupils examined in Reading, 11,704, or 13·7 per cent., were examined in the Alphabet; 27,509, or 32·2 per cent., in Monosyllables; 23,667, or 27·7 per cent., in Easy Narrative; and 22,311, or 26·1 per cent., in Ordinary Prose. Of the 85,323 pupils examined in Writing, 40,136, or 47 per cent., wrote on slates, and 45,137, or 52·9 per cent., wrote on paper. Of the 78,397 pupils examined in Arithmetic, 55,765, or 71·1 per cent., were examined in the Simple Rules; 15,256, or 19·4 per cent., in the Compound Rules; and 7,376, or 9·4 per cent., in the Higher Rules. Of the 43,206 pupils examined in Grammar, 23,598, or 54·6 per cent., were examined in the elementary part of the subject; and 19,608, or 45·3 per cent., in the more advanced part. And of the 47,962 pupils examined in Geography, 28,413, or 59·2 per cent., were examined in the elementary part of the subject; and 19,549, or 40·7 per cent., in the more advanced part.

It may be found useful to compare the results of examination for the years 1879 and 1881—the year 1879 being the last complete year the schools were under the late Council of Education, and 1881 the first complete year they have been under the Department of Public Instruction.

Table showing the numbers of pupils examined and the percentages that passed in the different subjects, in the years 1879 and 1881 :—

Appendix III. Further particulars as to the condition of the schools inspected will be found in the accompanying reports from the Chief Inspector and his assistants.

#### VIII.—LOCAL SUPERVISION.

As already stated, 58 school districts had at the close of the year been defined and constituted under the Public Instruction Act. Fifty-one of these districts had also been proclaimed as portions of the Colony where the obligatory attendance provisions of the Act might be enforced, and to 27 of them Public School Boards had been, or were about to be, appointed.

The following is a general description of the positions of the 58 constituted districts :—

Districts 1 to 11 are in the County of Cumberland—1 to 8, including Sydney and its suburbs; 9, Penrith and the localities around it; 10, Windsor and Richmond and their surrounding localities; and 11 taking in Campbelltown and its neighbourhood. Districts 12 to 21 occupy the country drained by the Hunter River and its principal tributaries. District 22 takes in the country around Camden and Picton; and 23, Mittagong and its vicinity. North Illawarra is included in district 24; South Illawarra in district 25; and district 26 comprises all the localities about Shoalhaven and Ulladulla. Araluen and Braidwood are included in district 27; and the country about Binda, Crookwell, Goulburn, and Queanbeyan in districts 28 to 30. District 31 takes in Bowenfels, Wallerawang, and the surrounding localities; and 32 includes the country lying between Rydal and Bathurst. District 33 includes the Fish River localities; 34, Bathurst and its neighbourhood; and 35, Orange and the adjacent country. Districts 36 to 39 occupy the country of which Rylstone, Hill End, Mudgee, and Wellington are the principal centres of population; and 40 and 41 take in Gosford and Wollombi, and all the adjacent coast country lying between the Hawkesbury River on the south and Lake Macquarie on the north. Districts 42 to 44 include the Clarence River country; 45 includes the basin of the Manning River; 46, Camden Haven and the River Hastings; 47, the Macleay River; 48, the Rivers Nambucca and Bellinger; 49, the Tweed River; and 50 and 51, the Richmond River. Districts 52 to 57 are in the south-western portion of the Colony, and include localities on, or adjacent to, the River Murray and its tributaries; and district 58 is in the County of King, and includes Gunning and Wheeo, with their surrounding localities.

Of the 58 school districts referred to, 21 were constituted and defined in 1880, and 37 in 1881; and of the 51 districts proclaimed under the obligatory attendance provisions of the Act, 10 were so proclaimed in 1880, and 41 in 1881.

Appendix II.

In an Appendix to this Report detailed descriptions are given of these districts, together with the schools in each, and the names of the present members of the Public School Boards.

#### IX.—PERMANENT SCHOOL ACCOMMODATION.

Additional school sites to the number of 175 were obtained in the year, the total number now vested in the Minister being 1,182. Of the 175 sites, 108 were grants from public lands; 35 were obtained by resumption under the Lands for Public Purposes Acquisition Act; and 32 were purchased or obtained as free gifts from the owners. The cost of the sites resumed and purchased, so far as it has been determined, is £27,538 4s. 8d., but in a few cases the question of price has yet to be decided by legal process. On these sites

sites 827 school buildings are already erected—44 having been completed in the year, and 65 others were in course of erection at the close of the year; while for the erection of 40 more, to be completed before 31st December, 1882, contracts have been taken. Further, at the close of the year, large additions had been erected, or were in course of erection, to 15 existing school buildings, and arrangements had been made for the completion of similar additions to 12 others before the end of 1882. The 149 new buildings, and the additions to 27 existing buildings will, when completed, afford permanent school accommodation for 14,198 additional pupils; and early in 1883 further accommodation will be provided by other new buildings then to be ready for occupation. As a temporary provision, 127 buildings have been leased for school purposes, and 36 school tents have been provided. With these additions to the existing Public Schools, sufficient accommodation will be provided both for increased attendance at new schools and for supplying the places of such Denominational Schools as are likely to be discontinued at the close of 1882.

The condition of the existing school buildings is fairly satisfactory. During the year 360 buildings have been repaired, or improved, and weathersheds have been erected at 164 schools.

Up to the present time, the promoters of Provisional Schools have been required to provide the necessary school buildings and furniture. Although the cost of such buildings as would suit the purpose to a reasonable degree is not great, it has been found in many instances more than the people resident in the locality could raise; and in these cases, the schools applied for have not been brought into operation, and the children have in consequence been denied the means of education. As, in general, this takes place in the poorest localities where the people are least capable of self-help, it seems desirable to grant some assistance towards the expense of school-building, especially in cases where the schools are likely to be permanent and ultimately to become Public Schools. Some addition would, in that event, be made to the outlay upon buildings, but such increase of expenditure would, it is believed, be amply justified by the benefit conferred upon the children to be educated.

#### X.—FINANCE.

The Accountant's statement of Receipts and Disbursement will be found in Appendix XVI. Appendix XVI.

School fees to the amount of £47,097 2s. 11d. were collected in the year. Of this sum, £749 17s. 7d. was received by teachers of Evening Schools as part of their remuneration, and £46,347 5s. 4d. was paid into the Consolidated Revenue in accordance with the provisions of the 11th section of the Public Instruction Act.

The total amount actually expended under the Public Instruction Act in the year was £474,157 5s. 7d., the following being the different items:—

	£	s.	d.
1. General Management .....	9,312	6	1
2. Chief Inspector's Branch .....	17,512	6	0
3. Examiners' and Training Branch .....	9,170	2	3
4. Architect's Branch .....	5,499	11	5
5. School Attendance Officers' Branch .....	5,331	2	5
6. Teachers' Salaries and Allowances .....	303,830	8	5
7. „ Travelling Expenses .....	1,054	8	6
8. „ Forage Allowances .....	380	17	8
9. Fuel Allowance for Schools .....	448	9	3
10. School Materials .....	5,576	4	6
11. Sites for Schools .....	27,538	4	8
12. New School Buildings, including Furniture .....	52,982	8	1
13. School Tents .....	2,574	10	0
14. Additions and Repairs to School Buildings.....	24,664	3	4
15. Rents for School Buildings .....	8,282	3	0
Total as per Balance Sheet .....	£474,157	5	7

Taking each of the items enumerated as a percentage of the total amount expended, it will be found that—

The General Management cost .....	1.96	per cent. of the Total Expenditure.
The Chief Inspector's Branch .....	3.69	„ „
The Examiners' and Training Branch .....	1.93	„ „
The Architect's Branch .....	1.15	„ „
The School Attendance Branch .....	1.12	„ „
Teachers' Salaries and Allowances .....	64.07	„ „
„ Travelling Expenses.....	.22	„ „
„ Forage Allowances .....	.08	„ „
Fuel Allowances for Schools.....	.09	„ „
School Materials .....	1.17	„ „
School Sites .....	5.80	„ „
New School Buildings and Furniture .....	11.17	„ „
School Tents.....	.54	„ „
Additions and Repairs to Buildings .....	5.20	„ „
Rents for School Buildings .....	1.74	„ „

Further, if the first five of these items be grouped under the head of "Administration," the next three under the head of "Teachers' Salaries and Allowances," and the last seven under the head of "Buildings and Material Appliances," we find that the amounts expended under these heads were:—

Administration .....	£46,825	8s. 2d. = 9.8 per cent., or 1s. 11½d. in each £ of the total expenditure.
Teachers' Salaries, &c. ....	£305,265	14s. 7d. = 64.4 per cent., or 12s. 10½d. in each £ of the total expenditure.
Buildings, &c. ....	£122,066	2s. 10d. = 25.7 per cent., or 5s. 1¼d. in each £ of the total expenditure.
	99.9	19s. 11¾d.

In the following tables the expenditures under the three heads in 1881 are compared with similar expenditures for 1879.

	As a percentage of the Total Expenditure.		As a rate per £ of the Total Expenditure.		Increase or Decrease in 1881.	
	In 1881.	In 1879.	In 1881.	In 1879.	In the percentage.	In the rate per £.
Expenditure on Administration...	9.8	7.5	1 11½+	1 6 +	2.3	0 5½
Expenditure on Teachers' Salaries, &c. ....	64.4	58.2	12 10½+	11 7½+	6.2	1 3
Expenditure on Buildings, &c. ....	25.7	34.2	5 1½+	6 10 +	8.5	1 8½

The average cost of a child's education is shown in the following statement :—

Cost per child calculated upon the—	1879.	1881.	Decrease or increase in 1881.
Aggregate enrolment for the year ...	£3 4 2½	£2 13 7	Decrease £0 10 7½
Net enrolment .....	3 17 9	3 4 10½	„ 0 12 10½
Average quarterly enrolment .....	4 11 1½	3 15 6½	„ 0 15 6½
Average daily attendance for .....	6 17 8½	5 14 4½	„ 1 3 3½
Average cost per child of <i>net enrolment</i> for—			
Administration .....	0 5 10½	0 6 4½	Increase 0 0 6½
Teachers' Salaries, &c. ....	2 5 2½	2 1 9½	Decrease 0 3 5½
Buildings and Material Appliances.....	1 6 7½	0 16 8½	„ 0 9 11

In 1879 the amount of fees collected in day schools and retained by teachers as a portion of their income was £73,227 13s. 8d.; and in 1881, under the reduced scale of payments provided for in the Public Instruction Act, the amount of such fees collected and paid into the Consolidated Revenue was £46,347 5s. 4d. If for each year the amount of fees paid be deducted from the total expenditure, it will be found that the whole cost *to the State* was—for 1879, £358,920 13s. 9d., and for 1881, £427,810 0s. 3d.

The average cost *to the State* of a child's education is shown in the following table :—

Cost per child calculated upon the—	1879.		1881.		Decrease in 1881.	
	£	s. d.	£	s. d.	s. d.	s. d.
Aggregate enrolment for the year...	2	13 3½	2	8 4	4	11½
Net enrolment for the year .....	3	4 6½	2	18 6½	6	0 ½
Average quarterly enrolment for the year .....	3	15 5½	3	8 2	7	3½
Average daily attendance for the year ...	5	14 4½	5	3 2½	11	2

If the amount of school-fees paid into the Consolidated Revenue in 1881 be deducted from the total sum paid to teachers as salaries and allowances, it will be found that the cost *to the State* for teachers' salaries and allowances in the year was £258,918 9s. 3d., or at the rate of £1 15s. 5½d. per child of the year's net enrolment. The similar cost for 1879 was £178,232 14s. 3d., or at the rate of £1 12s. 0½d. per child of the year's net enrolment.

#### XI.—GENERAL SUMMARY.

In 1881 there were under the Department 1,489 day schools (or 1,610 departments) and 57 evening schools. The number of pupils enrolled in the year for attendance at these schools was 146,106, or 20 per cent. (nearly) of the total population of the Colony; the average daily attendance was 82,890; about 40 per cent. of the pupils enrolled attended 140 days or above in the year; and school-fees amounting to £46,347 5s. 4d. were collected in day schools for payment into the Consolidated Revenue. 2,558 teachers were employed in the year; 1,914 teachers and applicants for employment were examined; 1,546 schools, or departments, were fully inspected; and 86,741 pupils were examined. 58 School Districts were constituted and defined, and steps were taken for placing these districts under the supervision of Public School Boards; 51 of such districts were legally proclaimed under the provisions for enforcing school attendance; and for the effective carrying out of these provisions 35 of the districts were placed under school attendance officers. The Department has now 827 vested school buildings. 44 additional school buildings were erected in the year, 65 were in course of erection at the close of the year, and arrangements for the erection of 40 others had then been completed. Additions and repairs to 375 school buildings were also effected in the year; 164 weather-sheds were erected, and 36 school tents were provided for temporary use. The total amount actually expended in the year under the Public Instruction Act was £474,157 5s. 7d., 9.8 per cent. of this sum having been expended in Administration, 25.7 per cent. on Buildings and Material Appliances, and 64.4 per cent. in Teachers' Salaries and Allowances.

## ADDITIONAL REGULATIONS FRAMED UNDER THE PUBLIC INSTRUCTIONS ACT IN 1881.

- a. Regulations respecting exemption from payment of school fees.
- b. Regulations respecting the duties of Public School Boards.
- c. Regulations respecting the collection of school fees.
- d. Regulations respecting general religious teaching in schools.
- e. Regulations respecting the standard of education required under the 20th section of the Act.

Department of Public Instruction, Sydney, 8 April, 1881.

## (a.) REGULATIONS UNDER THE 13TH, 17TH, AND 19TH SECTIONS OF THE PUBLIC INSTRUCTION ACT OF 1880.

THE following Regulations under the 13th, 17th, and 19th sections of the Public Instruction Act of 1880, have been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the provisions of that Act, in substitution of articles 48, 49, 50, 51, and 68 of the Regulations of 4th May, 1880.

JOHN ROBERTSON.

## REGULATIONS UNDER THE 13TH SECTION OF THE PUBLIC INSTRUCTION ACT.

1. Parents or guardians desiring to be relieved from the payment of school fees must apply to the Minister in the form prescribed for that purpose.
2. In any case where, after due inquiry, the inability of parents or guardians to pay school fees is satisfactorily shown, a certificate of exemption from such payment will be issued under the authority of the Minister for a period not exceeding three months.

## FORM A.

## APPLICATION TO BE RELIEVED FROM THE PAYMENT OF SCHOOL FEES.

I, \_\_\_\_\_ of \_\_\_\_\_ hereby apply to be relieved from payment of School Fees for my \_\_\_\_\_ of \_\_\_\_\_ for the period of \_\_\_\_\_ from date, on the ground that \_\_\_\_\_  
(Signature of applicant)

## (b.) REGULATIONS UNDER THE 13TH, 17TH, AND 19TH SECTIONS OF THE PUBLIC INSTRUCTION ACT OF 1880, RESPECTING THE DUTIES OF PUBLIC SCHOOL BOARDS.

1. Every Public School Board at the first meeting thereof shall elect from the members a Chairman, whose duty will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board may deem expedient.
2. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty prescribed by the 19th section of the Public Instruction Act, of visiting any of the schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board.
3. In the inspection of schools placed under the supervision of a Public School Board in accordance with the aforesaid section of the Act, the Board may be represented by a quorum thereof, and the Board may, if it see fit, report the result of such inspection to the Minister; the Board is not however to interfere with the professional duties entrusted to the Inspectors as set out in the Regulations under the head of duties of Inspectors.
4. The grounds upon which any Public School Board should exercise the power conferred on it by the section beforementioned to suspend a teacher for misconduct should be the following:—Unfitness on the part of such teacher to perform his duties, from intemperance, immoral conduct, gross neglect of duty, or continued absence from duty without leave.
5. Public School Boards shall report to the Minister any case in which a teacher is suspended by them before leaving the school under inspection at the time, and apprise the Inspector having charge of such school by letter.
6. Public School Boards should use every endeavour to induce parents to send their children regularly to school, and should report, in cases coming under their notice, the names of any parents or guardians who refuse or fail to educate their children, for which purpose necessary forms will be provided.
7. When the course laid down in the Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the Public School Board of the district; and if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months, and shall thereupon report the case to the Minister.
8. In fixing, in consultation with any teacher, the hour for Special Religious Instruction in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school as laid down in the Regulations is not unduly interfered with.

Department of Public Instruction, Sydney, 8th April, 1881.

## (c.) REGULATIONS UNDER THE 11TH SECTION OF THE PUBLIC INSTRUCTION ACT OF 1880, AS TO THE PAYMENT OF SCHOOL FEES.

THE following Regulations under the Public Instruction Act of 1880 have been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the 37th section of that Act.

JOHN ROBERTSON.

## REGULATIONS AS TO THE PAYMENT OF SCHOOL FEES UNDER THE 11TH SECTION OF THE PUBLIC INSTRUCTION ACT.

In all schools established or aided under the provisions of the Public Instruction Act,—

1. The fee payable for each child shall be three-pence per week up to four children of one family, and for four or any larger number from the same family the total amount of fees shall not exceed one shilling.
- 2.

- 2. Such fees shall be paid to the teachers in charge on or before school closing on Friday in each week.
- 3. The teachers shall demand and receive such fees, and shall record the receipt thereof at the time in the roll-books of the schools.
- 4. All sums received by teachers as school fees shall be remitted by such teachers respectively to the Cashier of the Department of Public Instruction, for payment into the Consolidated Revenue Fund, together with statements in the forms appended hereto marked A and B.

(d.) REGULATIONS UNDER THE 7TH & 18TH SECTIONS OF THE PUBLIC INSTRUCTION ACT OF 1880.

Department of Public Instruction, Sydney, 16th June, 1881.

THE following Regulations under the Public Instruction Act of 1880 have been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the 37th section of that Act. JOHN ROBERTSON.

1. The general religious teaching, for which provision is made in 7th section of the Public Instruction Act, shall be that contained in the Books of Lessons, including the Scripture Lessons, compiled and published under the authority of the Commissioners of National Education in Ireland, that is to say—

First Book of Lessons.  
 Second Book of Lessons.  
 Sequel No. 1 to the Second Book of Lessons.  
 Sequel No. 2 to the Second Book of Lessons.  
 Third Book of Lessons.  
 Fourth Book of Lessons.  
 Supplement to the Fourth Book of Lessons.  
 Scripture Lessons, Old Testament, No. 1.  
 Scripture Lessons, Old Testament, No. 2.  
 Scripture Lessons, New Testament, No. 1.  
 Scripture Lessons, New Testament, No. 2.

2. Such Books of Lessons and Scripture Lessons shall be read by the pupils of the various classes as prescribed in the course of school instruction laid down in the Regulations.

3. If the parents or guardians of any pupil object to the reading of such Books of Lessons or Scripture Lessons by such pupil, they shall so inform the principal teacher of the school attended by such pupil; and the principal teacher, upon receipt of such notification, shall not require such pupil to read the said books.

Department of Public Instruction, Sydney, 21 February, 1881.

(e.) REGULATIONS UNDER THE 20TH SECTION OF THE PUBLIC INSTRUCTION ACT OF 1880.

THE following Regulation has been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the 37th section of that Act.

JOHN ROBERTSON.

REGULATION UNDER THE 20TH SECTION OF THE PUBLIC INSTRUCTION ACT OF 1880.

The standard of education required by the 20th section of the Public Instruction Act, as a just cause for exempting any child from the obligation provided therein to attend school, shall be the following:—

1.—*Reading.*

To read the Fourth Book of any series authorized for use in Public Schools, or, at the option of the Inspector, any other book of equal difficulty.

2.—*Writing.*

To write in a neat and legible hand, and without serious errors in spelling, a passage of twelve lines, to be dictated slowly from such book.

3.—*Arithmetic.*

To work correctly questions of ordinary difficulty in Simple and Compound Rules, Reduction, and Simple Proportion.

## APPENDIX II.

PUBLIC SCHOOL DISTRICTS constituted and defined; similar Districts proclaimed under the 21st section of the Act; and Public School Boards appointed.

## Public School District No. 1.

County of Cumberland: To include Bourke Ward, Cook Ward, Fitzroy Ward, Macquarie Ward, Phillip Ward, and a north-eastern portion of Gipps Ward, City of Sydney. Bounded on the west from the landing-place at Dawes' Battery Point by the centre of the road; thence to George-street; thence by George-street to Parramatta-street; thence by Parramatta-street to the Newtown Road, being the boundary of the City of Sydney as defined by Act 33 Victoria No. 9, published as a Supplement to the Government Gazette of the 20th of April, 1870, number 89; thence by that city boundary southerly, easterly, and generally northerly to Rushcutter's Bay; thence by the waters of Port Jackson westerly, to the point of commencement.

The following is a list of schools in this district:—

## PUBLIC SCHOOLS.

Bourke-street, Woolloomooloo,	Devonshire-street,
Chippendale,	Macquarie-street South,
Cleveland-street,	Riley-street,
Crown-street,	William-street.

## CERTIFIED DENOMINATIONAL SCHOOLS.

Christ Church Church of England,	Surry Hills Wesleyan,
Darlinghurst Church of England,	St. Andrew's Church of England,
Haymarket Roman Catholic,	St. James's Church of England,
Parramatta-street Roman Catholic,	St. Mary's Roman Catholic,
Redfern Church of England,	Victoria-street Roman Catholic,
Surry Hills Church of England,	Hebrew (Castlereagh-street).
Surry Hills Roman Catholic,	

## PUBLIC SCHOOL BOARD.

Hon. William Maddison Alderson, M.L.C.,	Hon. Arthur Kenwick, M.D., M.P.,
Messrs. William Jonathan Green,	Hon. John Stewart, M.L.C.,
James Greenwood, M.A.,	Hon. John Bowie Wilson, J.P.
Daniel O'Connor, M.P.,	

## Public School District No. 2.

County of Cumberland: To include Brisbane Ward, Denison Ward, and the greater portion of Gipps Ward, City of Sydney; also the Municipal Districts of Balmain, Glebe, and Leichhardt. Bounded on the east from the landing-place at Dawes' Battery Point by the centre of the road; thence to George-street; thence by George-street to Parramatta-street; thence on the south by Parramatta-street to Orphan School Creek; thence by Orphan School Creek downwards to Johnstone's Creek; and by Johnstone's Creek upwards to the centre of the Parramatta Road, again by the centre of that road westerly to Long Cove Creek; thence by Long Cove Creek downwards to the Parramatta River; and by the Parramatta River and the waters of Port Jackson, to the point of commencement, including Cockatoo Island, Goat Island, Schnapper Island, and Spectacle Island.

The following is a list of schools in this District:—

## PUBLIC SCHOOLS.

Balmain,	Glebe,
Balmain West,	Leichhardt,
Biloela,	Sussex-street,
Fort-street,	Ultimo.

## CERTIFIED DENOMINATIONAL SCHOOLS.

Balmain Church of England,	Pymont Roman Catholic,
Balmain Roman Catholic,	St. Philip's Church of England,
Glebe Church of England,	Trinity Church of England,
Parramatta-street Church of England,	Kent-street North Roman Catholic,
Pymont Church of England,	Kent-street South Roman Catholic.

## PUBLIC SCHOOL BOARD.

Messrs. John Broomfield,	Messrs. John Harris,
Owen Spencer Evans, M.D.,	John Young, J.P.,
Peter Francis Pagan,	Hon. John Lucas, M.L.C.
John Hay Goodlet, J.P.,	

## Public School District No. 3.

County of Cumberland, parishes of Alexandria and Botany: To include Bondi, Botany, Coogee, Double Bay, Paddington, Randwick, Rose Bay, Watson's Bay, Waverley, and Woollahra. ## Public School District No. 51.

Counties of Richmond and Rous: To include Ballina North and South, Bexhill, Blakebrook, Bungawalbin, Broadwater, Gundurimba, Lismore, Nimbin, Pimlico, Tintenbar, Tucki Tucki, Tuckurimba, Tunstall, Uraba, Wardell, Woodburn: Commencing on the sea-coast at a point about 4 miles north-westerly from Cape Byron, opposite to a spur leading to the range dividing the waters of the Richmond from those of the Tweed and Brunswick Rivers; thence to that spur and by the range westerly to the road or track from Lismore to the Tweed River along the ridge *via* Hanging Rock and Hanging Rock Creek, as shown on county map of Rous, at the Surveyor-General's Office, Sydney; on the west by that track along the ridge southerly to a point due north from the north-west corner of A. Armstrong's portion No. 66, parish of Tomki, county of Rous; thence by a line due south to Back Creek; thence by Back Creek easterly to the western boundary of the parish of South Lismore, as shown on the map aforesaid; thence by the western boundaries of that parish and the parish of South Gundurimba southerly to the south-east corner of A. Irving's portion No. 41, parish of Tomki; thence by the southern boundary of the parish of South Gundurimba, as shown on the map aforesaid, south-easterly and easterly to the Richmond River north arm; thence by that arm and the Richmond River downwards to the Richmond River south arm; thence by the south arm of the Richmond River upwards to Myall Creek, and by Myall Creek and Camira Creek upwards to the range dividing the waters of the Richmond and Clarence Rivers; thence by that range and the northern watershed of the Clarence River easterly to the sea-coast, and by the sea-coast northerly, to the point of commencement.

The following is a list of the Schools included in this District:—

## PUBLIC SCHOOLS.

Alstonville,  
Ballina,  
Blakebrook,  
Broadwater,  
Dungarubba,  
Goonellebah,  
Gundurimbah,  
Lismore,  
North Creek,  
Pimlico,

Swan Bay,  
Tintenbar,  
Tirramia Creek,  
Tunstall,  
Wardell,  
Wardell East,  
Woodburn,  
Woodlawn,  
Wyrallah,  
Yeurabar.

## PROVISIONAL SCHOOLS.

Bexhill,  
Bungawalbyn,

Tucki Tucki,  
Wollongbar.

## LIST OF PRESENT MEMBERS OF PUBLIC SCHOOL BOARD.

Messrs. Ernest Carter,

Edmund Ross, J.P.

Arthur F. Parker, M.D.,

## APPENDIX III.

## CHIEF INSPECTOR'S GENERAL REPORT FOR 1881.

Few changes of importance have taken place in the inspectoral arrangements since the date of last report. So long as the number of schools continues to increase at the present rate the work of inspection may be expected to grow in like ratio. Additions to the inspectoral staff, therefore, will from time to time have to be made. Two new Inspectors have been appointed during the year. The staff now consists of seven District Inspectors and sixteen Inspectors. This staff is barely sufficient to complete one inspection of all schools within the year; it is therefore not possible, except in a few urgent or special cases, to inspect schools a second time.

Table A, appended, shows the number of schools or departments fully or regularly inspected during 1881. Exclusive of 57 evening schools, 1,546 schools, out of a total of 1,610, underwent inspection. The uninspected schools, to the number of 64, chiefly lie within the Armidale, Wagga, and Bathurst Districts. The reasons assigned for the non-inspection of these schools are that they were brought into operation after the Inspectors' visits to the localities in which they lie, or that they could not be reached for want of time.

The number of schools or departments in operation at the close of 1880 was 1,460; the number open during 1881 was 1,667. There has, therefore, been an increase of 207 schools. With few exceptions, schools are well distributed throughout the Colony. Allowing 100 cubic feet of space to each child, they afford accommodation for 122,119 children. The highest number enrolled for any one quarter was 128,796, while the ordinary attendance was 95,088. Viewing the schools in the aggregate, there is therefore no lack of room for all children now under instruction. It is true that in some places this accommodation is insufficient, while in others it is more than enough. In the former case steps are being taken to meet necessary requirements. In the metropolitan district and the more populous inland towns school attendance quickly outgrows the accommodation provided, and the resources of the Department are greatly taxed to keep pace with the demand for additional space. One of the readiest and best means of providing the requisite accommodation, pending the erection of permanent buildings or the enlargement of existing ones, is by school tents. These can be put up at short notice, and as temporary schoolrooms they answer very well. In one or two localities, and by a very small section of the Press, opposition has been shown to the use of tents in this way. It is urged against them that they do not sufficiently protect children from the heat, and that they are badly ventilated. The experience of our Inspectors and teachers is of an opposite kind. Of course there may be places where it would be both better and cheaper to erect temporary wooden structures as schoolrooms, but for general use nothing, I believe, will be found to do so well as tents. At the close of 1881 there were thirty-six tent schoolrooms in various parts of the Colony.

Inquiries with a view to provide for future educational wants have been actively continued throughout the year. In Sydney and the larger inland towns a number of eligible sites has been secured. Little more in this direction remains to be done. It is hoped that school buildings will be put up on these sites in time to replace the Certified Denominational Schools which, in accordance with section 28 of the Public Instruction Act, will cease to receive State support at the end of 1882.

School organization has been improved in various ways. A number of new schools has been erected, other premises have been leased or rented for school purposes, while existing buildings have in many instances been enlarged or repaired. Altogether, much has been done to increase school accommodation.

The Inspectors report the working appliances in schools to be sufficient. Complaints are occasionally made that certain necessary materials are not supplied by the agents, but the general opinion of the Inspectors is that, as regards furniture and the other usual school requisites, the schools under the Department are fairly equipped.

The demand for weathersheds continues. These form useful adjuncts to the playgrounds of large schools, but the necessity of them for small schools is not very apparent. Applications are often made for this, as for other kinds of expenditure, for no better reason than to get a share of public money.

The Inspectors are unanimous in reporting the discipline of our schools to be in a high state of excellence. A disorderly school is very seldom met with. In general, the government is mild, but firm; the pupils yield a prompt and willing obedience; the ordinary school routine is of a quiet, methodic, orderly character, and the use of corporal punishment is becoming less each year. These are pleasing features in connection with the conduct of our schools, and may be taken as a sign that teachers are acquiring a proper conception of the value and importance of one of the most important branches of school management. While it may be true that in a few instances the business of teaching is subordinated to the maintenance of discipline, in the vast majority of schools the contrary is the case. It is generally felt by our teachers that good effective teaching is only possible where the essentials of a sound healthy discipline have been first secured. In connection with this subject it should be mentioned that a very marked improvement has been effected in the drill taught in schools. So unfavourably was this subject reported on for 1880 that it was deemed advisable to direct the attention of Inspectors specially to the matter. Although the result of the action taken by these officers has, as already stated, been of a beneficial character, much remains to be done to place the teaching of military drill on a satisfactory footing.

The subjoined statement may afford some useful information respecting school attendance in the Colony:—

Number of pupils enrolled during the year	176,969
Number of pupils enrolled for March quarter	121,175
Number of pupils in average attendance for March quarter	82,457
Number of pupils enrolled for June quarter	125,639
Number of pupils in average attendance for June quarter	80,772
Number of pupils enrolled for September quarter	126,416
Number of pupils in average attendance for September quarter	81,781
Number of pupils enrolled for December quarter	128,796
Number of pupils in average attendance for December quarter	86,741
Number of pupils in ordinary attendance about	95,088
Number of pupils present at inspection	86,741
Number of children between six and fourteen years who are not known to be receiving statute education	9,774
Number of pupils who have attended school 140 days or more	79,584
Number of pupils who have attended less than 140 days	97,385.

The aggregate enrolment for 1880 was 149,112. The increase for the year 1881 was therefore the difference between 176,969 and 149,112, or 18½ per cent. This result affords ground for satisfaction.

With regard to the total annual enrolment, it is proper to point out that it includes all children who attended two or more schools during the year. From the returns furnished it would appear that this class of children is rather numerous, varying from 3½ per cent. in the Armidale and Bathurst Districts to 29 per cent. in the Metropolitan District. It is not possible to fix with absolute exactness the percentage for the whole Colony.

The largest total enrolment for any one quarter rose from 114,811 to 128,796 or 12 per cent. The average attendance also rose from 72,041 to 86,553, or 20 per cent. These gratifying results are no doubt largely due to the labours of the Principal School Attendance Officer and his assistants; and, as the enforcement of the penal clause of the Public Instruction Act becomes extended through the various parts of the Colony, a corresponding improvement in school attendance may be looked for.

The average attendance for December quarter was 67 per cent. of the gross enrolment; for the same quarter of 1880 it was 63 per cent.

From inquiries made by our teachers, the number of children between six and fourteen years of age may be approximately fixed at 116,185, while the number who are not known to be receiving statute education is estimated at 9,774. These estimates cannot, however, be unreservedly accepted. The process by which they were arrived at was necessarily imperfect, and the actual number in each case is without doubt much larger.

With respect to the number of children who have attended school 140 days or more, it is proper to observe that it leaves out many of those who have attended two or more schools during the year, and who, although making the 140 attendances, could not be included in the returns furnished, as no proper record of their attendance had been kept. The number of pupils who completed 140 attendances is about 45 per cent. of the gross yearly enrolment.

A fair inference from the foregoing figures is that, while the number of children not under instruction is comparatively small, irregularity of attendance is very great.

Table B, appended, exhibits the number of pupils examined in the several subjects of instruction, together with the degree of proficiency attained in each subject. An inspection of this table discloses the following facts:—

Of 85,191 pupils examined in reading, the proficiency of 72 per cent. ranged from fair to good, while the proficiency of 28 per cent. ranked from tolerable to indifferent. These results may be regarded as fairly satisfactory.

The defect most noticeable in the teaching of reading is a tendency to spend too much time in explanation of matters foreign to the lessons. This fault is especially observable in young teachers. Instead of endeavouring to get their pupils to learn to read well in a reasonable time, their main aim seems to be to make the reading lesson the medium through which to convey information upon every variety of topic. The pupils read too little, and the teachers talk too much. That the rate of progress made in the reading by the pupils in the lower classes is below what it ought to be most of our Inspectors are agreed. It is hoped that one of the effects of the new standards about to be issued will be to improve the reading of the lower classes in this respect, but the chief remedy will still rest with the Inspectors themselves.

In writing, 85,323 pupils were examined, 40,186 on slates and 45,137 in copy-books. Of those examined on slates, the writing of 78 per cent. was estimated from fair to good, while that of 22 per cent. received marks varying from tolerable to indifferent. The writing on paper was somewhat better, 82 per cent. of the examinees gaining the mark fair and upwards, and 18 per cent. marks of a lower degree.

These results are very fairly satisfactory. They go to show that the subject is taught with care and success. Compared with the position writing occupied in 1880, marked improvement has been made in the teaching of it.

The results in arithmetic are, as compared with those obtained in the two preceding subjects, much less satisfactory, and must be regarded as decidedly low; indeed there is no other subject that appears to such poor advantage. Of 78,397 pupils examined in it, 71 per cent. were working the Simple Rules, 20 per cent. the Compound Rules, and 9 per cent. the higher Rules. These ratios tend to show that too large a proportion of pupils are in the lower classes, and that the progress made by them in arithmetic is slow. It should be stated, however, that about one-fifth of those examined in the simple rules are in infants' schools, and are for the most part below the school age, while another fifth, although in the primary schools, are very young.

Of pupils examined in the lower Rules, 55 per cent. gained the mark fair or above, and 45 per cent. earned marks ranging between indifferent and tolerable. In the Compound Rules, the work 46 per cent. reached fair or above, while that of 54 per cent. was tolerable or worse. The corresponding percentages in the higher Rules were 52 and 48 respectively.

The causes that have helped to produce such poor results are correctly stated by some of our Inspectors. The teaching in arithmetic is too mechanical, and, in schools taught by one teacher, the lower classes are left too much to themselves. There is not enough of oral explanation, blackboard exercise, or vigilant oversight of the pupil's work. The teaching in the higher classes is marked by the same faults, and by the further one that the questions are too bookish. Greater resource, a better understanding of the nature of the reasoning faculty, and a wider acquaintance with the business requirements of everyday life will need to be shown by our teachers before much better results can be looked for.

43,206 pupils were examined in grammar, 23,598 in the elements, and 19,608 in the more advanced parts of the subject. Of those examined in the elements, 60 per cent. gained the mark fair and upwards, and 40 per cent. marks not so high. In advanced grammar, fifty-nine per cent. gained the mark fair and above, and the remainder did less satisfactorily. The highest proficiency was shown in mechanical parsing; in accidence, paraphrasing, and the application of the syntactical rules to prose composition, the teaching needs to be more thorough. It is doubtful whether any real good is done by introducing grammar, as we now do, to second-class pupils in the first and second half-years of their enrolment. The subject is too abstruse for children so young to understand, and I am inclined to think the time so spent in teaching it would be better employed in giving extra instruction in reading, writing, and arithmetic.

Geography occupies a much better position than grammar,—a circumstance probably attributable to two causes: the subject can be presented in a more interesting form to young children, and its successful treatment does not demand so large an amount of skill. Nevertheless, the methods used in teaching it admit of improvement. The lessons in elementary geography are burdened with dry, uninteresting facts, undue stress is laid on the communication of bald, meaningless definitions, and insufficient use is made of suitable and well-timed pictorial illustrations. There is too little reference to the map, and too much talk on what to young children must be pure abstractions. In the teaching of the more advanced parts of the subject, the aim of a good number of teachers seems to be to drill pupils in the heights of mountains and lengths of rivers, rather than to give them a vivid and lasting conception of the main physical features of the various countries in which such mountains and rivers are found. Very poor judgment is shown in teaching what would prove useful to children in after years, but much worthless information is conveyed in the lessons, and a good deal of time and energy misspent.

Of 47,962 pupils examined in geography, the proficiency of 63 per cent. was fair and upwards, while the attainments of 37 per cent. did not rise above tolerable. The answering was somewhat better in advanced than in elementary geography. This is partly explained by the fact that a large number of children examined in the elements were in infants' schools.

With regard to the other subjects ordinarily taught in Public Schools, good proficiency has been attained in needlework, and fair proficiency in Scripture lessons, drawing, vocal music, object lessons, mensuration, and elementary Latin. The results in Euclid and Algebra approach fair—a mark below that awarded to these subjects in former years. The position held by vocal music is likely to mislead, inasmuch as the examinations held in that subject did not generally go beyond hearing the children sing. Those of the Inspectors who extended their examinations into the theory of music agree in reporting that this part of the subject is poorly taught.

Of the 1,546 schools inspected, 25 per cent. were above, 31 per cent. up to, and 44 per cent. below the standard (fair). In view of the searching nature of the examinations usually held by our Inspectors, these results may be regarded as fairly satisfactory.

Hitherto there has been but one standard of proficiency for all schools, in accordance with which, examinations held by Inspectors have mainly been conducted. It is felt, however, that a school taught solely by one teacher should not be examined by so high a standard as a school taught by more teachers than one. In other words, it is thought that a reasonable allowance should be made to a teacher who, unaided, has to teach three classes, as compared with a teacher who has to instruct a less number. Accordingly, a new set of standards is in course of preparation, which will probably be completed at an early date. The adoption of these standards will, it is believed, not only mete out equal fairness to teachers of all classes of schools, but render the work of teaching more effective in the leading branches of instruction. The latter result will be mainly brought about by apportioning more time to the teaching of reading, writing, and arithmetic to the lower classes, and by introducing into the standards the principle of awarding different values to the different subjects of examination, according to their importance and the degree of skill required in teaching them. Under the existing standard, all subjects are treated as of equal importance, "good" in object lessons carrying the same number of marks as "good" in reading, notwithstanding that the work and skill needed to gain the estimate in the latter subject are very much greater than those required to gain it in the former.

The general testimony of the Inspectors is that evening public schools have not been a success. Many of these institutions have been established under the most favourable auspices. Good, well ventilated schoolrooms have been provided, there has been no lack of the best teaching appliances, and the teachers have been men thoroughly competent for the work and imbued with the requisite zeal and earnestness to carry it on to a successful issue. Their efforts have, however, in almost every instance, ended in failure. And this result is not due to the regulations under which this class of schools is worked, but mainly, if not entirely, to a want of public support. Several of the schools have started with an attendance of from thirty to forty pupils, which in the course of a few weeks has dwindled to less than ten, and the schools have finally collapsed. Mr. Inspector McIntyre, who was specially deputed to inquire into the condition and prospects of these schools, collected a large amount of valuable information respecting their working in this Colony and also in Victoria, where the pupils attend instruction free of charge. The conclusions arrived at by that officer are unfavourable to the success of evening schools in Colonies like ours, where population is but limited, where the openings for remunerative labour are many, and where the attractions of outdoor amusements are strong. He has, however, made certain recommendations respecting the future conduct of these schools, which, if adopted in a modified form, may cause them to receive a larger amount of public support.

Under the regulations of 14th December, 1880, twenty Public Schools, embracing thirty-eight Departments, became Superior Schools. A course of instruction has been laid down for these schools and suitable text books prescribed for use in them. Although their organization cannot be regarded as complete, tolerable progress has been made towards getting them into working order. Some difficulty has been met with in applying the "special rules," under which this class of schools is to be conducted, to the girls' departments, and this difficulty has not yet been overcome. An agitation, got up to do away with the fees charged for instruction in the special subjects, has helped to keep matters in an unsettled state. However, the whole subject of Superior Schools is likely to re-engage the attention of the Department, when it is hoped all obstacles to their efficient working will be removed.

As stated in my report of last year, a great many teachers are in positions which, under the Regulations, they are not eligible to fill. This is especially true of teachers in charge of the larger and more important schools.

In order to afford all such teachers an opportunity to gain the classifications required of them, they were summoned to examination in December last. A good number of teachers attended. The examinations were held simultaneously at the head quarters of the several Inspectors, and were conducted in accordance with a time-table drawn up for the purpose. The main feature of this time-table was that the same subjects were to be given out on the same days and at the same hours at the various seats of examination. It is intended to hold another examination in June next, at which all teachers who failed to attend the former examination, although summoned thereto, will be expected to be present. The results of the December examination have not yet been generally made known.

The number of applicants for the office of pupil-teacher is very great, especially in the larger towns. The result is that many of the successful candidates have to wait long periods before openings can be found for their services. In a few remote country places, however, some difficulty has been met with in procuring suitable local applicants for the office, and it has consequently not been found possible to complete the teaching staffs of the schools concerned. The blame for this is largely attributable to the teachers who, although foreseeing that the services of pupil-teachers would be required in the schools under their charge, have either taken no pains to train young persons for the position, or have shown a want of ability to train them successfully.

The number of pupil-teachers in the Service at the end of 1881 was 650. They are favourably reported on, both by teachers and Inspectors, and they perform no unimportant part in the work of primary instruction. Not only are they in many cases more competent than well-paid assistants, but they form the main source from which vacancies in the larger and more important schools are filled. The pupil-teacher element is one of the most striking features of our system of Education, and it is certainly one of the most hopeful.

The results of the year's operations may be briefly summarised as follows:—1,546 out of 1,610 Schools underwent full inspection; 210 new Schools or Departments were established; good progress has been made in securing suitable school sites, especially in Sydney and its neighbourhood; school accommodation has been largely increased and school organization sensibly improved; the quarterly enrolment of pupils has risen 12 per cent., and the average quarterly attendance 20 per cent.; a very large number of additional children has been brought under instruction; the discipline of our schools has reached a high state of excellence; the pupils' attainments are an advance on those of the previous year; and the condition of the schools in general is fairly satisfactory.

Appended are the reports of the several District Inspectors and Inspectors.

EDWIN JOHNSON,  
Chief Inspector.

Sydney, 22nd March, 1882.

## ANNEX A.

## MR. DISTRICT INSPECTOR JOHN M'CREIDIE'S GENERAL REPORT FOR 1881.

THE following Table shows the number of schools in operation in the Metropolitan District at the end of 1880, the number opened and closed during 1881, and those remaining in operation at the end of 1881 :—

Schools.	No. in operation at end of 1880.	No. opened during 1881.	No. closed during 1881.	No. in operation at end of 1881.
Public .....	204	17	.....	221
Provisional .....	11	2	.....	13
Half-time .....	12	.....	2	10
Evening .....	.....	13	9	4
Church of England .....	50	.....	8	42
Roman Catholic .....	41	.....	4	37
Wesleyan .....	4	.....	.....	4
Presbyterian .....	2	.....	2	.....
Hebrew .....	1	.....	.....	1
Totals .....	325	32	25	332

Of the thirty-two schools opened during the year, seventeen were new schools, viz., nine Public, two Provisional, and thirteen Evening schools, and the remaining eight were converted into Public ones, viz., four Church of England, two Presbyterian, and two Half-time Schools. It will be seen, therefore, that six of the twelve Denominational Schools closed have become Public ones. Two of the other six are about to be opened as Provisional Schools, and the education of the localities occupied by the remaining four is already provided for by existing Public Schools.

At the end of the year steps had been taken for the conversion of four other Denominational Schools into Public, and four Provisional Schools had reached the average attendance required (20) to entitle them to be placed on the list of Public Schools for 1882.

From the preceding table it will be observed that Presbyterian Schools no longer exist in this district—that of Palmer-street, Woolloomooloo, having been converted into a Public School of two departments. It is also noticeable that but few of the Evening Schools opened during the year continue on the list. As a rule these schools have had but a short-lived existence. Scarcely any have been able to maintain the required minimum average of ten, and the attendance has dwindled down until it has been found necessary to close most of them. Altogether, 349 schools—omitting the eight converted—were in operation during 1881. Besides these, the Parramatta Orphan, Blocla, and Vernon Schools are placed under my supervision. The following schools which were in operation during a portion of the year have not undergone inspection, viz., Cabramatta and Irishtown Roman Catholic Schools, and Berkeley, Bourke-street, Broughton Vale, Bulli, Kiama, Marshall Mount, Pitt Town, Richmond North, Ryde, Sussex-street, and Wollongong Evening Schools. These schools were closed before the Inspectors had an opportunity of examining them. All other schools have been fully inspected, and reports of the regular or general kind have been furnished respecting them. In addition, incidental visits have been paid to schools whenever circumstances presented the opportunity, but no ordinary inspections, except those of the Parramatta Orphan Schools (six), have taken place. In theory, every school should be subjected to two inspections in the year, one regular, to examine the children thoroughly, and another ordinary, to observe the school in its usual working aspect, to ascertain the character of the discipline and the teaching, to discover defects in these, and to suggest to the teacher such remedies as may be necessary. Visits of the latter kind would be valuable alike to Inspector and Teacher, but with present arrangements there is no time at the disposal of the Inspectors to make them. Their clerical duties and regular inspections fully occupy their time. Indeed, as regards the Sydney section of this district, it is improbable that the work can be done in 1882 by the present staff of two Inspectors, in view of the increasing number and dimensions of schools, and the extra labour and time that will be required to examine the Superior Schools, which will be in full working order during the year. It appears to me that the services of a *third* Inspector are needed for Sydney and its suburbs.

I may here state that, in addition to the heavy clerical work of this office, I inspected forty-three schools, and furnished forty-nine reports on inspections of schools visited by me in various parts of the district.

Much attention has been given to the selection of suitable sites for new school premises, especially in localities where they will be required to replace existing Denominational Schools. Of those secured the following may be mentioned:—Camperdown, Darlington, Forest Lodge, Leichhardt, Macdonald Town, Newtown North, North St. Leonards, Pyrmont, St. Peter's, Concord, Blackfriars, Stanmore, Waterloo, Summer Hill, Banks' Meadow (Botany), Gardiner's Road, Botany Heads, Bourke-street, Bondi, Brisbane-street, Riley-street (Surry Hills), Paddington Barracks, Glenmore Road, Double Bay, Randwick, Darlinghurst, Australian Farm, Comleroy Road, Dural, Mulgoa, Parramatta, Rouse Hill, Croome, Peterborough, Saggart Field, Dapto West, Riverstone.

Action has also been taken to obtain sites at Cobbitty, Gondarin Creek, Little Meadow, Liverpool, Mount Pleasant, Palmer-street, Pennant Hills, Seven Hills, Wiseman's Ferry, and Croydon.

Steps have been taken to erect sheds, or effect repairs or improvements, in connection with the undermentioned schools:—Fort-street, Five Dock, Glebe, Leichhardt, Newtown, North Sydney, Sussex-street, Ultimo, Pyrmont (R.C.), St. Peter's, Ashfield, Burwood, Cleveland-street, Coogee, Crown-street, Petersham, Blacktown, Castlereagh, Dundas, Erskine Park, Freeman's Reach, Granville, Hurstville, Kogarah, Lane Cove, Moorfield, Parramatta, Penrith, Prospect, Richmond, Rooty Hill, Smithfield, South Creek, Springwood, Wallgrove, Wilberforce, Windsor, Berkeley, Broughton Vale, Broughton Village, Camden, Campbelltown, Charcoal Creek, Dapto, Jamberoo, Jerrara, Kiama, Narellan, Omega Retreat, Picton, Violet Hill.

New premises were either built, are in course of erection, or are projected at the following places, viz.:—Balmain West (girls'), Camperdown, Darlington (girls'), Greenwich, Leichhardt (girls'), Macdonald Town, Manly, Mossman's Bay, St. Leonards (girls'), Balmain East, Concord, Forest Lodge, Blackfriars, Ashfield (girls'), Banks' Meadow, Burwood (girls'), Croydon, Bondi, Petersham (girls'), Surry Hills South, Darlinghurst, Double Bay, St. Leonards (R.C.), Comleroy Road, Drutt Town, Dural, Granville, Kurrajong North, Blakehurst, M'Donald (Upper), Mulgoa, Parramatta North, Parramatta South (girls'), Pennant Hills, Penrith (girls'), The Vineyard, Avoca Vale (tent), Bargo, Bellawongarah, Brook's Point (tent), Broughton Creek, Bulli Mountain, Dapto West, Liverpool (primary), Peterborough, Saggart Field, Theresa Park, Tullimbar, Westbrook, Wollongong, Croome, Gondarin Creek, Woonona, Riverstone. To provide temporary accommodation, tent schoolrooms fully equipped with the necessary furniture and teaching appliances have been supplied for Avoca Vale, Brook's Point, Camperdown, Macdonald Town, Leichhardt, and Petersham (girls') schools; and it is proposed to meet some other pressing cases by their supply. These tents are admirably adapted for shifting populations on diggings, railway or water supply works, and also to provide speedily for such exceptional cases of rapid growth of population as are to be met with at present in the suburbs of Sydney. Temporary premises have been found available for school purposes at Ashfield, Burwood, and Woonona.

As

As regards the accommodation provided by the buildings now in existence, including Denominational School premises, it may be estimated, generally speaking, as good. In some cases the accommodation is greater than is required, while in others it is less, owing to unexpected or unusually rapid increase of population. The reports of the four Inspectors stationed in this district furnish particulars, and they may be consulted for special information on this point. The tendency in Sydney is to the overcrowding of infant departments. Except in some instances specially dealt with, there is no check, in regard to age, to the admission of very young children, and consequently there are many admitted who would be much better at home. These babies have actually, in some schools, sofas or cots provided for them, on which they can be laid when asleep. Were the admission of pupils to ordinary infant departments limited to those of six years of age, they would make more rapid progress, and instances in which scholars remain in infant schools for three, four, or even more years, would be less frequent. In the case of such a rule being in force, Kindergarten Schools might be established in the densely peopled parts of the city, such as Surry Hills, Woolloomooloo, Sussex or Kent Street, the Glebe and Waterloo. In addition to this, infant schools of the ordinary kind should flank the very large schools of the city, to relieve the infant departments of these schools. Two infant schools—Brisbane-street and Devonshire-street—are now in operation with this view. There are no Kindergarten Schools at present in operation, but an experiment is being made by a teacher who has had experience in that class of schools. The total space in cubic feet provided by the buildings in the district amounts to 4,452,293 cubic feet, which, allowing 100 cubic feet to each pupil, furnishes accommodation for 44,523 pupils. The ordinary attendance being 37,821, and the highest average for the year 32,594, it is evident that the accommodation provided is equal to the wants of the district as a whole, were it equally distributed throughout it.

In all cases where a deficiency exists in the necessary accommodation, steps have been taken to remedy it by the building of new premises, or by the erection of class-rooms or new departments. As already stated, tents have also been provided in cases of urgency.

For convenience of reference the following information is given in a tabular form :—

Number of pupils enrolled for 1881.....	74,517
Number enrolled two or more times during 1881 .....	21,951
Number of pupils present at inspection .....	32,388
Number in ordinary attendance .....	37,821
Number in average attendance for March quarter .....	32,594
Number in average attendance for June quarter .....	30,888
Number in average attendance for September quarter .....	29,632
Number in average attendance for December quarter .....	32,244
Number enrolled for December quarter.....	50,028
Number between six and fourteen years in District .....	35,279
Number not known to be receiving statute education .....	3,549
Number who have attended school for 140 or more days .....	33,852
Number who have attended less than 140 days .....	40,665
(a) From sickness.....	4,868
(b) Through truancing .....	814
(c) Through removals from locality .....	8,232
(d) Through other causes.....	26,751
Total .....	40,665

From the preceding numbers it will be seen that 21,951 have been enrolled at two, three, and even four schools during the year. This frequent shifting of pupils from schools occurs almost wholly in Sydney and its suburbs—scarcely 4 per cent. of the number belonging to country schools. The frequent removals of families from one quarter of the city or from one suburb to another, and the facility of access to different city schools on account of their proximity to one another, may account to a large extent for this undesirable state of matters.

The number of pupils returned as attending less than 140 days (40,665) cannot be regarded as even approximately accurate. It is evident that the scholars who are given as having been enrolled two or more times (21,951) may have been 140 days in the several schools which they have attended, though the majority are probably returned as not having been. The teacher in whose school the last enrolment took place would, in nearly all cases, return the pupil as a non-attendant for 140 days, although the sum of his attendances at various schools may have reached or exceeded the required minimum.

To remedy this defect, the teacher should be furnished with information, on a pupil's admission, as to his attendance for the previous portion of the year at other schools. For this purpose a system of clearance certificates should be adopted, so that some approximation to accuracy may be made on this point. The regularity of attendance has been seriously affected by the prevalence of small-pox in several localities, and the scare caused thereby throughout the city. This cause has likewise increased the actual number of non-attendants for 140 days during the year.

The following has been the percentage of average attendance in proportion to the enrolment for the four quarters of the year :—

For March quarter .....	66·7 per cent.
For June quarter .....	62·0 "
For September quarter.....	60·5 "
For December quarter .....	64·4 "
Average quarterly attendance for year .....	63·4 "

This attendance is lower than that of previous years, and is accounted for by the very great irregularity that existed for some time in many schools by reason of small-pox, the June and September quarters especially being under the normal percentage of past years.

The number of schools below, up to, or above the standard (fair) in respect to organization, discipline, and instruction, is as follows :—

Above the standard.....	144
Up to the standard .....	83
Below the standard .....	105

The next table shows the percentage of pupils who satisfied the standard (fair) in each subject of instruction in 1881 and in 1880 :—

	1881.	1880.		1881.	1880.
Reading.....	79 per cent.	71 per cent.	Drawing ...	80 per cent.	75 per cent.
Writing.....	85 "	85 "	Music.....	80 "	84 "
Arithmetic..	56 "	35 "	Euclid .....	54 "	47 "
Grammar ...	64 "	54 "	Algebra .....	73 "	65 "
Geography ..	67 "	53 "	Mensuration	81 "	47 "
Scripture ...	75 "	65 "	Latin .....	55 "	76 "
Object			Needlework	90 "	(Not given in 1880.)
Lessons ...	71 "	60 "	Drill .....	73 "	(Not given in 1880.)

In only one school in the District were pupils examined in English History, Trigonometry, and Statics. In the two first-named subjects the pupils satisfied the Standard, so far as they had been taught the subjects; in Statics the examination was a failure. These

These percentages are arrived at by collating the results gained by the four Inspectors in charge of different sections of the district with those obtained in the schools examined by myself. On comparison of them with those of 1880, it will be observed that there is a very marked increase of efficiency indicated by the higher rate of proficiency in the majority of subjects, Music and Latin being apparently the only subjects that do not exhibit improvement. This is the more remarkable, inasmuch as the greater irregularity prevalent during a good portion of the year might reasonably have led to the expectation of lower rather than higher results. Arithmetic still continues to hold a comparatively low position, and with it Geometry and Latin stand in near association.

The following table shows the position held in regard to classification by Teachers in charge of schools at the end of the year:—

Class I.		Class II.		Class III.			Teachers not holding Classification.	Total.
Section A.	Section B.	Section A.	Section B.	Section A.	Section B.	Section C.		
1	5	50	74	85	46	30	33	324

The list of "Teachers holding no classification" includes Teachers of Provisional Schools, who are not required to be classified, Teachers who have long held positions in the Service, but have not undergone examination either under the late Council of Education or under the present Act; and also others who, having passed through the Training School and been examined, have not yet received notice of the result, but have been placed in temporary charge of schools before being permanently appointed. A large number of Teachers do not hold the classification required by their schools. Some of these were examined last December, but many still await examination at midwinter next. The Regulations which require that certain grades of schools must be held by certain ranks of Teachers, and that these ranks must be obtained by examination, are producing good results in inducing study, and thereby raising the attainments, classifications, and general efficiency of the Teachers, who, as a body, are respectable and earnest, and deserve well of the community.

Besides the Teachers in charge, there were employed in the schools throughout the district—

Assistants .....	142
Pupil-teachers .....	355
Work-mistresses .....	59

Summing up, the material condition of the schools throughout the district has been much improved during the year, and steps have been taken to improve it still further during 1882, by the addition of departments to existing schools, and the erection of suitable premises for new schools, to meet the increase of population in certain localities and the probable closing of Denominational Schools at the end of 1882. The prevailing discipline is judicious and effective, and the instruction is, on the whole, of an intelligent character, while the general results of inspection evince higher proficiency in the majority of subjects than has obtained in previous years. The irregularity has been greater than usual during the year, but this is accounted for by the prevalence of small-pox in Sydney.

J. M'CREDDIE,

District Inspector.

#### ANNEX B.

##### MR. INSPECTOR J. S. JONES' GENERAL REPORT FOR 1881.

No material change has been made in the limits of the school district assigned to me in 1880; but various improvements have been effected and initiated to better its condition in regard to school extension, increased schoolroom accommodation, and repairs to school premises. The following report has reference to the Public and the Denominational Schools of West Sydney, Pyrmont, Balmain, Darlington, Glebe, Camperdown, Newtown, Waterloo, Cook's River, Leichhardt, Five Dock, Concord, North Shore, and Manly. The number of schools in operation at the beginning of 1881 was 72, viz., 37 Public, 20 Church of England, 14 Roman Catholic, and 1 Hebrew; and at its close, 75, viz., 44 Public, 16 Church of England, 13 Roman Catholic, 1 Hebrew, and 1 Evening. The difference between such numbers is due to the establishment of a non-vested Public School at Balgowlah, a vested Public School of two departments at Macdonaldtown, and an Evening School in Sussex-street; to the conversion under lease of the Pyrmont and St. Peter's C.E. Schools into non-vested Public Schools, and to the voluntary closing of the Camperdown R.C. School. The educational wants of Camperdown, Leichhardt, West Balmain, and Macdonaldtown have been well and wisely met by the use of suitable and well appointed tents, pending the erection of better class buildings. Provision, too, has been made for the conversion of Trinity Church of England School into a non-vested Public School, for the establishment of Girls' Schools, and the enlargement of the Infants' Schools in connection with the Public Schools of Darlington and St. Leonards, and for the erection of superior school buildings at East Balmain, North St. Leonards, Mossman's Bay, Camperdown, and Manly. It is intended also to establish Public Schools at Blackfriars, Croydon, Longbottom, Pyrmont, Stanmore, Forest Lodge, Summerhill, and Newtown North; the best available sites have been secured for the purpose, and it is expected that the projected school buildings will be ready for occupation by the end of 1882, the time fixed for the withdrawal of State aid to Denominational Schools. Further provision, however, must be made to meet the future educational requirements of the few remaining parts of Sydney where Denominational Schools alone are in operation. It will be necessary to establish Public Schools in the neighbourhood of the Church of England Schools of St. James', St. Andrews', and Christ Church, the Roman Catholic Schools in Kent-street South and Campbell-street, and the Hebrew School in Castlereagh-street. Efforts have been made to secure suitable sites for such schools, and it is hoped that the difficulties as to cost, area, and situation, will soon be overcome, and the way thereby cleared for the erection of the requisite school buildings. Considering, however, the large percentage of children who are as yet exempt from compulsory school attendance, it may become necessary to establish a few inexpensive schools upon the principles of the Kindergarten, the aims of which are to regulate the conduct, improve the habits and manners, and cultivate the tastes, aptitudes, and understandings of infants, by means of a well regulated course of recreation and technical training in its elementary forms. Such schools would be to the families of the poor what well regulated nurseries are to the families of the rich, and they would thus have the effect of removing many children from the dangers and temptations of the streets, of preparing them for the Primary Schools, of lessening the amount of truancy, and of raising the standards of instruction.

All the schools but one have been visited for regular inspection, that one being the Sussex-street Evening School, which was closed in November because of its proximity to severe cases of small-pox. Sixty-five of such inspections have been made by me, eight by Mr. District Inspector McCreddie, and one by Mr. Inspector Morris. Whenever practicable, the schools have been visited for incidental inspection; but the number of such visits has not been as great as I intended, because of the heavy demands upon my time for the performance of other duties. For the same reason I was unable to visit any schools for ordinary inspection, and could not therefore make myself as well acquainted with their real character as regards the details of management, the discipline, the style and quality of the teaching, and the relative merits of the teachers, as I should otherwise have done. I should further explain that of the sixty-five schools regularly inspected by me this year, only twenty-two of them were so inspected by

by me in 1880, because of the lateness of my appointment to the West Sydney District. In the following parts of my report, therefore, I shall be unable to give a comparative view and estimate of the condition and progress of the schools this year in relation to last. Whatever comparisons I may make will have reference to the twenty-two schools referred to above, to the several schools I have visited incidentally one, two, or three times, and to Mr. Inspector Dwyer's report for 1880.

As regards the state of the school premises, the accommodation afforded, the supply of furniture and educational appliances, and the clean and orderly aspect of the schoolrooms and their surroundings, the material condition of two-thirds of the schools, chiefly Public, is very good, and that of the rest is more or less satisfactory. Greenwich has been provided with new and commodious school buildings; others are in course of erection at Manly and Camperdown; and the contract for the enlargement of Darlington Public Infant School has been completed. Repairs, more or less extensive and important, have been made to the Public Schools of Fort-street, Newtown, Sussex-street, Glebe, Leichhardt, Five Dock, North Sydney, and Ultimo. The Pyrmont R.C. schoolroom has been lengthened, and the St. Leonards R.C. School is now conducted in a building of very superior merit in point of design, structure, and appointments. The arrangements for cleaning the schools are in many instances better than they were last year, and most of the schools present a cleaner and more respectable appearance.

The character of the school attendance, as shown in the following statistics, is not as satisfactory as it ought to be, either in regard to aggregate enrolment, regularity, ages of scholars, or numbers present at inspection. With regard to regularity of attendance, however, it should be explained that the rate of it was considerably reduced about the middle of the year, in consequence of the prevalence of small-pox in and about Sussex-street, Pyrmont, Ultimo, and Waterloo.

1. Number of pupils enrolled in the year .....	27,416
2. Number of pupils enrolled only a part thereof .....	14,409
3. Number of pupils in actual attendance on the 13th December .....	9,556
4. Number of such 9,556 pupils who had attended one other school any time during the year .....	2,878
5. do. do. two other schools .....	559
6. do. do. three other schools .....	82
7. Ordinary attendance of pupils .....	11,977
8. First quarter's enrolments ... 17,521 ... Average attendance ...	11,475
Second " " ... 17,965 ... " " ...	10,739
Third " " ... 17,262 ... " " ...	9,556
Fourth " " ... 17,644 ... " " ...	10,858
Average .....	17,598
9. Rate of regular attendance for the year .....	60 per cent.
10. " " " 1880 .....	65 "
11. " " " 1874-78 .....	69 "
12. Number of pupils present at inspection .....	9,336
13. Number of pupils between the ages of six and fourteen years, and known to be living within reasonable distances of schools .....	12,012
14. " " but not known to be receiving instruction .....	1,505
15. Number of pupils who have attended school 140 days in the year ...	8,054
16. " " who have not done so .....	16,842
1st. Through illness .....	1,910
2nd. " truancy .....	312
3rd. " removals .....	2,870
4th. " other causes .....	11,750
17. Number of pupils under 4 years of age .....	848
" " between 4 and 6 years of age .....	5,467
" " " 6 and 12 years of age .....	15,642
" " " 12 and 14 years of age .....	3,664
" " over 14 years of age .....	1,145
" " enrolled for the year up to 13th December .....	26,768
18. Number of pupils in the different classes on the days of inspection :-	
First Classes (40) .....	4,722
Second Classes (47) .....	2,461
Third Classes (46) .....	1,407
Fourth Classes (26) .....	597
Fifth Classes (5) .....	149
19. Average number of school days in the year .....	211.7

Viewed as a whole, the organization of the schools inspected by me is from very fair to good. They are reasonably well supplied with the prescribed educational appliances, such as books, slates, maps, &c.; but the "Form of Requisition for School Materials" needs further extension, for there is a greater or less lack of such things as are needed to meet the requirements of sound methods of instruction, especially in the earlier stages of it, in which the concrete, the pictorial, and the practical, play leading parts. The supply of teachers is liberal, and is at the rate of one to forty-three pupils. In most of the schools the duties of the teachers are duly defined and supervised, and the distribution of the teaching power is just and judicious. There is room for improvement, however, as regards the supervision of the playground, the washing arrangements, and the dismissal of the pupils to their homes. The classification of the pupils according to their acquirements and intelligence is generally appropriate, but it is still more or less faulty as regards the unequal size of the classes and the high average ages of the lower ones. Time-tables and programmes of lessons are suspended in all the schools, and very fair average care and judgment appear to have been exercised in framing them, but the observance of them is not always as strict as could be desired. Here and there, also, the examination of the classes and the instruction of the pupil-teachers are not as well regulated and efficiently carried out as they ought to be.

With regard to discipline, the condition of the schools is as follows :-

Very good, 6; good, 15; very fair, 27; fair, 13; tolerable, 4.

In most instances the schoolrooms present a clean and well ordered appearance; order, industry, and quietness are maintained; and the pupils are clean and decently clad, docile, cheerful, and well behaved. Many of them, however, are not either as punctual and regular in their attendance, as assiduous in their attention to home study, or as patient and particular in their exercises in writing and composition as they should be. Such defects show themselves chiefly in the schools that are governed with a lax hand and a half-closed eye; but there is no doubt that the home government is more or less responsible for their existence. The fact of there being for the year 312 cases of known truancy and 11,750 cases of irregular attendances, for reasons unknown to the teachers, is sufficient to show

show where the blame mainly rests. Many of the parents, however, may have been ignorant of the absence of their children from school; for a case of the kind occurred during the year where a lad of fourteen years of age was absent from school for weeks together without the knowledge of his guardians. To meet such irregularities some remedy is needed, and the best one to my mind would be to supply teachers with postal cards, in order that they may inform parents of the absence of their children from school. I think also that there should be "Clearance Cards of Attendance", the purpose of which would be to show in cases of removals from school to school the extent of the child's attendance, his arrears of school fees, and, if desirable, the fact of his having been vaccinated or not.

In all the schools but one, in which singing is not taught, the prescribed course of instruction is strictly followed, and very fairly well regulated by Time-tables, Programmes, and the Standards of Proficiency. The teaching continues to be marked by earnestness and diligence, and is better than it was last year in point of vigour and efficiency; but the methods are still more or less defective as regards aim, principles of procedure and practical effect. The subjects in which such deficiencies are more or less noticeable are Arithmetic, Grammar, Geography, Composition, and Dictation, Object Lessons, and Musical Theory and Notation. The following table shows the number of Schools in which each subject is taught, the aggregate number of pupils examined, and the percentage of pupils that met or passed above the standard requirements.

Subjects.	No. of Schools.	Numbers examined.	Percentage of Passes.
Reading .....	65	9,336	79
Writing .....	65	9,336	79
Dictation .....	65	9,336	55
Arithmetic .....	65	9,336	48
Grammar .....	46	4,614	60
Geography .....	65	5,081	52
Object Lessons.....	65	9,336	64
Singing .....	64	9,091	78
Drawing .....	54	5,237	78
Scripture Lessons .....	38 (Public)	3,307	70
Euclid .....	17	431	60
Algebra .....	8	246	69
Latin .....	8	246	32
Needlework .....	46	2,201	86
Drill .....	65	9,336	87

The number of schools below, up to, or above the standard (fair), in respect to organization, discipline, and proficiency, is as follows:—

	Schools.	
	Public.	Denominational.
Below the Standard.....	4	5
Up to the Standard.....	10	13
Above the Standard .....	24	9

The classification by examination of the teachers employed in the schools under my supervision is shown in the following table. It should be explained, however, that it does not contain the number (23) of work-mistresses employed in the schools; for although their practical skill has been duly tested and estimated, yet they have not been submitted to written examinations and classified like the other teachers.

Classes.	Teachers in charge of Schools.	Assistant Teachers.	Pupil Teachers.
Class I, Section A.....	1	...	...
"    "    B.....	2	...	...
"    II, "    A.....	16	1	...
"    "    "    B.....	23	3	...
"    III, "    A.....	13	4	...
"    "    "    B.....	7	3	...
"    "    "    C.....	2	6	...
<i>Pupil-Teachers.</i>			
Class I.....	...	...	18
"    II.....	...	...	40
"    III.....	...	...	35
"    IV.....	...	...	52
Totals.....	64	15	145

In addition to these, there are four teachers in charge of schools who have never undergone examination, and four who have been examined, but not classified. There are also forty-two assistants who have been examined, but whose grades of classification have not as yet been made known to them. There are, however, but few of the teachers, not including pupil-teachers whose grades of classification are on a par with the classes of schools they manage. Those, therefore, who did not satisfy the regulation requirements were summoned by authority to attend an examination in December; but little more than a third of them submitted to it. One-third obtained leave of absence because of their duly certified ill health, and the rest apologized for their absence on the grounds of age and long service or unpreparedness, or both. Considered in the aggregate, the teachers under my supervision are a highly respectable and trustworthy body of officers, whose minds and energies are cheerfully devoted to their work, and whose general ability and usefulness are of very fair merit.

To sum up: the supply of schools is good and well distributed, and very fair progress has been made towards completing the educational requirements of the district by the end of 1882; the applications for repairs to school buildings have been reasonably well met; the discipline is healthy and intelligent, and the instruction is improved and very fairly satisfactory, but the general character of the attendance is not satisfactory.

Sydney, 14th February, 1882.

J. S. JONES,  
Inspector.

ANNEX C.

## ANNEX C.

## MR. INSPECTOR MORRIS'S GENERAL REPORT FOR 1881.

In May I was placed in charge of that part of the Metropolitan District known as Sydney East. At the end of 1880 seventy-three schools were in operation in this portion of the district, viz. :—

Public	42
Church of England	17
Roman Catholic	10
Wesleyan	2
Presbyterian	2

During the year a Public School was opened at Banks' Meadow (Botany), and an Evening School at Bourke-street (Woolloomooloo). The Palmer-street Presbyterian School of two departments was converted into a Public School, and the Botany Wesleyan School was transferred to my care. Thus at the end of 1881 seventy-four schools were under my supervision, viz. :—

Public	45
Church of England	16
Roman Catholic	10
Wesleyan	3

All these schools have been fully inspected. Of those in operation during any part of 1881, Bourke-street Evening School alone remained uninspected, and it had been closed on account of the small attendance before it had become due for examination. There were present at inspection in all 10,385 pupils.

The gross enrolment for the year was 28,462. Of these, 10,550 were enrolled more than once. This must be taken as an approximation.

The enrolment, ordinary attendance, and average attendance for the several quarters are exhibited in the following table :—

	Enrolled.	Ordinary Attendance.	Average Attendance.
First quarter	17,892	12,984	11,804
Second "	18,596	12,536	11,398
Third "	17,911	11,699	10,636
Fourth "	18,103	12,796	11,633

It is to be observed that pupils are often enrolled late in the quarter; and thus, while they increase the number on the roll, they do not increase the average attendance proportionately.

The estimated number of children between six and fourteen years of age within reach of the schools under my supervision is 12,403.

This can only be taken as a rough estimate.

The number returned as not known to be receiving statutory education is 1,328.

According to the returns furnished by the teachers, the attendance for the year was as follows:—

Attended 140 days	16,016
Attended less than 140 days—	
(a) Through sickness	1,818
(b) Through truancy	293
(c) Through removal	3,125
(d) Through other causes	7,210

In interpreting these figures, it is necessary to remember that this return includes children under six and over fourteen years of age. We must also bear in mind that each teacher could answer only for those pupils who were in his school at the end of the year. A child might have attended sixty days in some other, and then eighty at the school in which he was at the end of the year; yet such a one would be returned as a defaulter with respect to the compulsory clauses of the Public Instruction Act. This difficulty might be met by the adoption of a system of clearance tickets.

Public Schools have been established at Darlinghurst, Croydon, Gardener's Road (Botany), and Double Bay.

Preparations have been made for the erection of buildings at Croydon and Bondi. Sites have been obtained and schools are projected at Randwick, Glenmore Road, Paddington West, Riley-street (Surrey Hills), Bourke-street (Woolloomooloo), and Waterloo. Steps have been taken towards securing sites for buildings to take the places of the non-vested premises in Brisbane-street and Palmer-street, in which Public Schools are at present conducted. Steps have also been taken towards the conversion of the Surrey Hills Church of England School of two departments into a Public School. Preliminaries have been arranged for the formation of a girls' department at Burwood, also one at Ashfield, and another at Petersham.

In the schools now open, the total space, allowing 100 cubic feet for each child, is sufficient for 12,953 pupils.

The practical results of the year's work will be seen from the following statistics :—

Schools below standard	19
" up to "	18
" above "	30

Subjects.	Numbers examined.	Up to Standard.
		Per cent.
Reading	10,385	78
Writing (Slates)	4,635	84
" (Paper)	5,343	94
Arithmetic, Simple R.	7,931	86
" Compound	1,632	73
" Higher	822	88
Grammar	5,143	61
Geography	6,790	65
History	44	100
Scripture	3,580	65
Object Lessons	9,597	80
Drawing	7,162	88
Music	9,028	80
Euclid	489	60
Algebra	257	80
Mensuration	96	90
Latin	243	70
Trigonometry	19	100
Statics	19	...
Sewing	2,661	90
Drill	6,189	80

When pupils secure the mark Fair in any subject, they are held to have reached the standard. Fair equals 6, 10 being the maximum.

The foregoing table gives the general results of examination in the various subjects of instruction ; I wish however to refer specially to a few of them. When examining in reading I strive to estimate the proficiency of the pupils mainly on four points—accuracy of pronunciation, clearness of enunciation, fluency, and expression. I have found very little wrong in pronunciation, and the fluency is generally good ; but the enunciation lacks distinctness, and there appears to be little effort to secure taste and expression. There are, nevertheless, many pupils to whom these strictures do not apply. I have been sorry to observe also in some of the higher girls' classes a tendency to a certain measure of affectation, which destroys the pleasure of one listening to what otherwise would often be very good reading.

Arithmetical questions, when they are so framed as to test the knowledge of rules and are of a straightforward kind, are answered with accuracy and dispatch by a large majority of the pupils ; but an equally large majority frequently fails to solve a problem when the points are intricate or involved. It also not infrequently happens that a pupil does not see by what rule a sum should be worked, the problem itself being easily within his grasp. The defect in teaching which causes this is very easy to be traced. Notwithstanding these criticisms, I feel justified in expressing a high opinion of the industry and patience devoted to the teaching of this branch of study, although there is room for improvement in skill and method.

The technical parts of English Grammar are as a rule very fairly taught, but little attention is given to Syntax, or to the detection and correction of inaccuracies, inelengancies, or improprieties of speech.

One of the weakest subjects is composition. I think this results largely from the pupils not beginning early enough. In order to attain to any degree of proficiency years of practice are necessary ; as soon, therefore, as children can speak connectedly, they should be trained to express their thoughts in writing.

In Latin I have found the pupils able to translate sentences well, but as a rule possessing an indifferent knowledge of the grammar. In one case only had they gone as far as the 25th exercise in Smith's Principia. On the whole therefore I cannot report favourably on the teaching of this subject.

It is necessary to remark also, in the case of Algebra, Mensuration and Trigonometry, that although a large proportion of those examined reached the standard, their study had not covered a very wide extent of the subjects.

As a general rule the Public School buildings are in good condition, well suited to their purpose, and well furnished with educational appliances. In these respects the state of Denominational Schools is not so satisfactory ; in some places indeed there are serious deficiencies, notably in the matter of playgrounds, which are generally very limited in space. The remark just made is likewise applicable to some of the non-vested premises in which Public Schools are now carried on.

Both pupils and teachers deserve commendation for their punctuality of attendance. In regularity, however, very considerable improvement is necessary, even when we take the seventy days per half-year as our standard ; but when we judge by the absolute standard—enrolment—irregularity of attendance is a marked defect.

The general appearance of the children is very pleasing. They look clean, bright, healthy, and intelligent. Their manner is usually very respectful, and their conduct very little tarnished by gross wrong-doing. It is safe, therefore, to form a high estimate of the prevailing moral tone in the schools. Good order is maintained without recourse to severe punishments, and cordial relations are generally found to exist between the pupils and their teachers.

The teachers of the schools under my supervision hold the following classification by examination :—

I	II A.	II B.	III A.	III B.	III C.
3	20	26	13	3	1

These teachers almost without exception are a faithful, industrious, and highly respectable body of men and women.

Taking a general view, I am of opinion that primary education is on the whole in a healthy state, and that there are good grounds to expect steady improvement in the future.

R. N. MORRIS,  
10/2/82.

ANNEX D.

MR. INSPECTOR MURRAY'S GENERAL REPORT FOR 1880.

In this section of the Metropolitan District there were at the close of 1880,

70 Public Schools,	5 Church of England Schools.
5 Provisional Schools,	7 Roman Catholic Schools,
8 Half-time Schools,	1 Wesleyan School,

making a total of 96 schools. Changes made in the early part of the year left the following schools under my supervision :—

68 Public Schools,	5 Church of England Schools,
4 Provisional Schools,	7 Roman Catholic Schools,
8 Half-time Schools,	1 Wesleyan School,

in all 93 schools.

During the year a Public School was established at Druiit Town and a Provisional School was opened at Pittwater. The Half-time Schools at Australian Farm and Wiseman's Ferry were converted into Public Schools, and four Evening Schools were established. Three Evening Schools were closed through diminished attendance within a very few months.

The schools in operation at the close of the year stood as follows :—

71 Public Schools,	5 Church of England Schools,
5 Provisional Schools,	7 Roman Catholic Schools,
6 Half-time Schools,	1 Wesleyan School,
1 Evening School,	

making a total of 96 schools. All were fully examined, 8 by Mr. District Inspector M'Creddie and 88 by myself. Several received one or more incidental visits. At the 88 schools inspected by me, 4,734 pupils were fully examined.

The total enrolment for the year, according to the Annual Returns furnished by the teachers, is 10,439, and of this number 723 were enrolled two or more times.

The ordinary attendance at the 88 schools examined by me was 4,636.

The enrolment and average attendance for all the Schools under my supervision for each quarter of the year were as under :—

	Enrolment.	Average Attendance.
March quarter .....	7,537	5,276·8
June quarter .....	7,488	4,953·0
September quarter .....	7,978	5,162·0
December quarter .....	8,215	5,640·2

The

The number of children, according to teachers' returns, who attended school 140 or more days during the year is 4,530, while those who failed to attend 140 days number 5,498. Of this number—  
 584 failed through sickness.  
 140 failed through truanting.  
 1,078 failed through having removed from the locality.  
 3,696 failed from other causes.

From inquiries made at each inspection it was found that, within a 2-mile radius of each school respectively, there were 483 children between the ages of six and fourteen years who were not known to be receiving statute education; and while these 483 children were not attending any school, there were 2,383 children attending school who for the six months previous failed to attend the minimum number of days prescribed by the Public Instruction Act. In a few localities where juvenile labour in the field or garden is valuable, I found that some parents were in the habit of keeping their children at home in the afternoon at work, or sending notes to the teacher requesting him to send their children home at 2 o'clock or half-past 1, as the case might be. There would thus be the appearance of school attendances, which were clearly of little benefit to the children concerned, and so far the provisions of the law were defeated.

It is worthy of note here that while the Annual Returns show a total enrolment of 10,439, the average or true attendance for the year is only 5,286. It would appear, indeed, as if nothing less than a strict enforcement of the provisions of the compulsory clause of the Public Instruction Act will remove this great disparity between the apparent and real school attendance, as well as bring to school non-attending children.

*Buildings.*—During the year new school buildings have been erected at—

Druitt Town,	North Kurrajong,
The Vineyard,	Blakehurst;

and steps have been initiated with a view to securing sites, and erecting new buildings, when required, at

Australian Farn,	Parramatta North,
Comleroy Road,	Parramatta South (Infants),
Dural,	Pennant Hills South,
Longueville,	Rouse Hill,
Mulgon,	Wiseman's Ferry.

Repairs or additions to the following school buildings are either in progress or under consideration :—

Blacktown,	M'Donald Central,
Castlereagh,	Parramatta South (Girls' School),
Dundas,	Penrith (Girls' School),
Gladesville,	Richmond,
Hornsby,	Smithfield,
Hurstville,	Wallgrove,
Kogarah,	Windsor.
Portland, Lower,	

*Accommodation* afforded by existing school buildings :—The following table shows the average space in square feet per pupil afforded by all the schools in this part of the District.

In the case of each school, the highest quarterly average attendance for the year has been used in the calculation.

No. of Schools.	Space allowed per pupil in each school.
5 schools.....	8 square feet.
10 ".....	9 " "
4 ".....	10 " "
7 ".....	11 " "
3 ".....	12 " "
5 ".....	13 " "
3 ".....	14 " "
2 ".....	15 " "
3 ".....	16 " "
2 ".....	18 " "
17 ".....	over 18 " "

There are nine Public Schools or Departments of Schools in which the space per pupil in attendance is below 8 square feet. The following table shows the names of these schools, the average space allowed per pupil, and also the daily average attendance at each of the schools.

School.	Space allowed per pupil.	Daily average attendance.
Granville .....	6½ square feet.....	157
Parramatta (Infants) .....	5 " .....	126
Parramatta South (Infants) ...	3 " .....	176
Penrith (Infants) .....	4 " .....	147
Richmond (Infants).....	4 " .....	124
Smithfield .....	7 " .....	84
South Creek (Infants) .....	4 " .....	75
Wiseman's Ferry.....	7 " .....	24
Yarramundi .....	7 " .....	49

PROVISIONAL SCHOOLS.

There are five Provisional Schools. In the school at Barrenjoey, the pupils have but 7 square feet of space per pupil; in the other four schools, the space per pupil varies from 13 square feet to 16 square feet.

HALF-TIME SCHOOLS.

In the six Half-Time Schools the space per pupil varies from 14 square feet to 33 square feet.

CHURCH OF ENGLAND SCHOOLS.

Two schools afford .....	9 square feet per pupil.
One school affords .....	10 " "
" " " .....	12 " "
" " " .....	18 " "

ROMAN CATHOLIC SCHOOLS.

In the seven Roman Catholic Schools, the space per pupil varies from 8 square feet to 14 square feet.

WESLEYAN SCHOOL.

There is but one Wesleyan School, and in it the average space per pupil is 9 square feet.

Except

Except in the cases of the nine Public Schools or Departments before mentioned, the existing buildings afford sufficient accommodation for all the educable children in their respective localities. In respect to seven of these nine schools, arrangements are in progress for supplying the deficiency in the accommodation. The other two schools have not been examined by me, and I am therefore not aware of what steps have been taken in reference to supplying additional accommodation for them. At several of the places above mentioned there has been lately a considerable increase in the population. This increase was not expected when the present buildings were provided.

Existing Public School buildings afford accommodation for 6,296 pupils at eight square feet per pupil. This accommodation would be sufficient if it were distributed according to the population, but, as previously shown, some schools are larger than are required, and others are overcrowded.

Arrangements are in progress for providing additional accommodation wherever it is needed, and also to meet, at the end of 1882, the wants of the 1,514 children now being educated in Denominational Schools.

The table appended to the statistics accompanying this report shows the condition of the schools inspected by me in relation to the Standard of Proficiency, and the following table shows the percentage of pupils who satisfied the Standard in each subject of instruction in which they were examined :—

Reading .....	72.3	per cent.
Writing .....	83.6	"
Arithmetic .....	53.4	"
Grammar .....	60.8	"
Geography .....	56.8	"
Scripture .....	78.3	"
Object Lessons .....	67.3	"
Drawing .....	67.5	"
Music .....	66.02	"
Euclid .....	61.01	"
Algebra .....	81.3	"
Needlework .....	75.6	"
Drill .....	42.2	"

From this table it will be seen that, save in drill, the lowest results are in arithmetic. Except in a few leading schools, the teaching of arithmetic is too mechanical. Teachers adhere too much to book questions, instead of familiarizing their pupils with the arithmetic of daily life. After a brief exposition of the principles of a certain rule has been given by the teacher, the pupils are hurried on to another new rule, which is dealt with in a similar manner. More examples should be given, and these should generally be of a practical character. Teachers would do well to remember that if in this subject they would produce good results, they must "make haste slowly."

*Teachers.*

There are employed in this part of the District—  
 92 Teachers.  
 10 Assistant Teachers.  
 5 Work-mistresses.  
 41 Pupil-teachers.

These Teachers are classified as under :—

Class.	Section.	Teachers.
II .....	A .....	13
II .....	B .....	18
III .....	A .....	28
III .....	B .....	15
III .....	C .....	13
Probationers .....		15

With a view to raising their educational status, thirty-nine teachers were lately examined at Parramatta. The result of this examination is not yet known.

One effect of the new system is to induce teachers generally to raise their classification, and thus qualify themselves for higher positions in the Service.

During the latter part of 1880, I examined in this part of the District only thirty-seven schools, and the proficiency, according to the standard by which they were gauged, was tolerable. This year I have examined eighty-eight schools, and their condition was determined by a higher standard than that employed last year. It will be therefore more satisfactory to take their present condition as a point from which to estimate future progress, than to contrast it with the condition of less than half the number of schools at the close of last year.

The teachers generally are making commendable effort to raise the standard of instruction in their schools and their own status as teachers. Everything, therefore, educationally, is promising, and justifies the hope that the defects disclosed in this year's inspections will not appear in those of the next.

J. H. MURRAY,  
 Inspector.

ANNEX E.

MR. INSPECTOR W. H. JOHNSON'S GENERAL REPORT FOR 1881.

The schools under my supervision at the close of 1880 were as follows :—

- 55 Public.
- 6 Provisional.
- 4 Half-time.
- 8 Church of England.
- 10 Roman Catholic.

Total ... .. 83

The following schools were opened during 1881 :—

- 3 Public.
- 1 Provisional.
- 7 Evening.

Total ... .. 11

The undermentioned schools were closed during the year :—

- 2 Church of England
- 3 Roman Catholic.
- 6 Evening.

Total ... .. 11

There were therefore in operation at the end of the year :—

- 58 Public.
- 7 Provisional.
- 4 Half-time.
- 6 Church of England.
- 7 Roman Catholic.
- 1 Evening.

Total ... .. 83

The

The certificate of the Macquarie River Church of England School was voluntarily surrendered, but the other ten schools were closed in consequence of the attendance having fallen below the required minimum.

Of the ninety-four schools that were in operation during the year, eight were inspected by the District Inspector, and seventy-eight by myself. The remaining eight were closed before the time fixed for their inspection.

The number of pupils enrolled during the year is 7 per cent. in excess of the number enrolled during 1880, and the average attendance shows an increase of 20 per cent. The number of children within the prescribed ages of six and fourteen years, who are not known to be receiving statute education, is  $4\frac{1}{2}$  per cent. of the whole number within reach of school. There is still, however, much room for improvement in the regularity of attendance, especially during harvesting and other farming operations, when the elder pupils are kept at home for the sake of their assistance. The shifting nature of the population in the coal-mining districts, and also along the line of works of the Sydney Water Supply, has necessarily affected the attendance at the schools in these localities. Another great cause of annoyance to the teachers and of loss to the pupils themselves is their want of punctuality in arriving at school, and their frequent withdrawal from school some half-hour before the close of the day's work. In this way many of the pupils, though fulfilling the letter of the law, do not attend for much more than half the time prescribed.

The following statement is submitted for the information of the Department:—

No. of pupils present at inspection .....	3,424
Do. enrolled for the year .....	8,200
Do. do. two or more times .....	582
Do. in ordinary attendance .....	4,798
Average attendance for March quarter .....	4,039
Do. do. June do. ....	3,798
Do. do. September quarter .....	3,878
Do. do. December do. ....	4,113
No. of children between six and fourteen years of age within reach of school .....	5,192
„ not known to be receiving statute education .....	233
„ who have attended for 140 days or more during the year ..	3,948
No. who attended for less than 140 days:—	
(a) Through sickness .....	329
(b) Through truancing .....	31
(c) Through removal from locality .....	775
(d) Through other causes .....	2,530

During the year the establishment of Public Schools at the following places was determined on by the Department:—

Croome,	Bimlow,
Gondarin Creek,	Woonona,
Glenfield,	Woodhill.

It has also been decided to establish Provisional Schools at Razorback, Cabramatta, and Glenhill.

Schools are also in course of establishment at Little Meadow, Green Hills, and Foxground.

Four of the existing Provisional Schools having secured the required attendance, are about being converted into Public Schools, and two of the four Half-time Schools are to be superseded by the proposed Public School at Bimlow.

The percentage of pupils who satisfied the Standard in each subject of instruction is as follows:—

Reading .....	80 per cent.
Writing .....	90 „
Arithmetic .....	46 „
Grammar .....	65 „
Geography .....	63 „
Object Lessons .....	75 „
Scripture History .....	85 „
Drawing .....	82 „
Music .....	68 „
Algebra .....	84 „
Geometry .....	82 „
Sewing .....	86 „
Drill .....	50 „

#### SCHOOL BUILDINGS.

The accommodation afforded by existing school buildings is sufficient in the greater number of cases, but inadequate at Broughton Creek, Peterborough, Wollongong, Saggart Field, Theresa Park, Westbrook, Campbelltown, Camden, Picton, Bargo, and Woonona. To meet this deficiency, it has been decided to erect new buildings at Broughton Creek, Peterborough, Wollongong, Saggart Field, Theresa Park, Westbrook, and Woonona, and classrooms at Campbelltown, Camden, and Picton. Repairs have been effected to the school buildings at Berkeley and Bulli North, and weathersheds erected at Broughton Village, Bulli North, Charcoal Creek, Dapto, Jamberoo, Ferrara, and Omega Retreat. These sheds have proved very useful to those schools which are much exposed, in protecting pupils from cold stormy weather in winter and great heat in summer. They would not however, be so much needed if teachers would plant a few trees in the playgrounds. There are several kinds of trees easily obtainable that, with very little care, would in a few years after planting, not only afford excellent shade, but become an ornament to the school. In the few places where trees have been planted, their growth is of the slowest owing to neglect, and should they not die before coming to maturity, they will become so stunted as to be practically useless.

#### TEACHERS.

The teachers are, generally speaking, industrious and conscientious in the discharge of their duties, and exhibit a desire to avail themselves of the suggestions and directions given to them for the improvement of their schools, but some have failed to carry out such suggestions and directions, either through inability to do so or through negligence, and I am afraid, in a few cases, through an over-estimate of their own skill. On the whole they are respectable and steady, and have gained the esteem of their neighbours. The recent action of the Department with reference to the examination and classification of teachers has had a beneficial effect, especially upon the younger teachers. Many of these on leaving the Training School made no further effort to improve their literary attainments, depending

depending solely for promotion on their work in school. Under the new order of things, many of them have been roused to exertion towards self-improvement. At the close of the year the teachers in charge of schools under my supervision were classified as follows :—

Class II.		Class III.			Unclassified.
A	B	A	B	C	
2	10	28	17	7	14

Of the fourteen unclassified teachers, two are on probation, six are in charge of Provisional Schools, three in charge of Public Schools recently raised from being provisional, and the remaining three are teachers of many years' service.

#### PROGRESS SINCE LAST INSPECTION.

*Reading.*—Fair progress has been made in this subject during the year, but in all except a few schools, it is necessary that much improvement should still be made before it can be considered satisfactory. This remark applies in an especial manner to the reading of the pupils in the upper classes, which is often wholly devoid of emphasis or modulation. Much improvement cannot however be expected in this direction till the teachers generally improve their own defective style. There are of course teachers to whom this does not apply, but they are in the minority. Sufficient attention is not given to explanation, though much time is by some teachers devoted to the meaning of words, which by itself often fails to render the drift of a passage apparent to pupils, especially when the language is at all figurative.

*Writing.*—A slight improvement has been made in this subject also. In the lower class schools, writing is seldom intelligently or systematically taught, many teachers giving no time to supervision, and never attempting to explain or illustrate the construction of the letters. In this way the pupils contract habits which it is difficult if not impossible afterwards to get rid of.

*Arithmetic.*—This subject appears to have been handled to some extent more intelligently, and greater attention seems to have been given to explanation of principles by the more skilful of the teachers, and hence the results of the inspection are more satisfactory. The small progress made in this subject by the pupils of some schools is mainly owing to a want of intelligent, systematic, and exhaustive explanation, and in some cases, to wholesale and unrestricted copying. In other cases, the questions are badly selected and unsuited to the attainments of the pupils. In one school the pupils of the third class were, on the occasion of my visit thereto, working questions in Mensuration of solids, and yet they failed to do very ordinary questions in the Compound Rules. The teacher would not have been guilty of such an absurdity had he periodically and carefully examined his pupils in order to test their knowledge of each step before advancing them to the next. It seems strange that so many teachers should neglect this most important point. By attending to it, they would save themselves from the disappointment and annoyance of seeing their pupils fail at the yearly inspection in matters which they had spent much time in trying to ground them in. Every intelligent teacher should be able to judge pretty well beforehand as to the results of the inspection of his school.

*Grammar.*—The answering in this subject was somewhat less mechanical, more attention having evidently been given to etymology, parsing exercises, and analysis. In very few schools, however, is proper instruction given on the construction of sentences. Exercises in composition are mostly confined to reproduction of object lessons, which is generally in the exact language used by the teacher when giving the lesson.

*Geography.*—This subject is, in its elementary stages especially, placed before the pupils in such a manner as to render the learning of it a drudgery to them. The definitions, as taken from a text book and without explanation or illustration, are committed to memory by the pupils, immediately after which they are introduced to the geography of Australia or Europe by having the map placed before them, from which they are required to learn the names of the various physical features, as the teacher points to them without comment of any kind. I have frequently found the pupils of a class who could repeat, parrot-like, the names of all the capes, inlets, &c., of Europe, fail to tell what waters a ship would pass through in sailing from the Baltic Sea into the Atlantic Ocean. Some improvement has, however, been effected during the year, and I hope to find still further progress made during 1882.

*Object Lessons.*—Judging from the way in which this subject is treated, the real aim of those lessons seems to be wholly misunderstood by a large number of teachers. Badly arranged and dry facts are told to the pupils, which they are supposed to take notes of and reproduce when required to do so. Pupils have in this way a very considerable amount of information given to them which they could have been led to find out for themselves, and thus have been stimulated to habits of observation and thought.

*Singing.*—This subject is in most of the schools in charge of old, untrained teachers, taught by ear only, and in some cases would be better left alone. In some of the larger schools, however, it is well taught, the results being very satisfactory.

*Drawing* is fairly taught in all except a few of the smaller schools.

*Scripture History* is fairly taught in the Public and Provisional Schools.

*Algebra and Geometry* are taught in five schools only. The attainments in both subjects are fairly satisfactory.

*Sewing* is now taught in all Public Schools under my supervision.

*Drill.*—The proficiency of the pupils in drill is satisfactory in schools taught by trained teachers, but some of the older untrained teachers have little or no acquaintance with it themselves, and hence are unable to instruct their pupils therein.

Some improvement has been made during the year in most of the subjects; but before any very satisfactory advance can be effected there must be more attention given to the development and training of the mental powers of the pupils, and more systematic and searching examination by the teachers themselves into the results of their own work. A more careful preparation of the lessons by the teachers is also necessary, not only in collecting the information, but in the proper arrangement of it when collected. This applies to lessons on all subjects, and not to lessons on objects only as some seem to think.

W. H. JOHNSON,  
Inspector.

Wollongong, 14th January, 1882.

#### ANNEX F.

##### MR. DISTRICT INSPECTOR W. DWYER'S GENERAL REPORT FOR 1881.

THE number and several classes of schools in operation at the close of 1880 were as follow :—

Public.....	174
Provisional .....	53
Half-time .....	55
Evening Public.....	3
Church of England .....	4
Roman Catholic .....	16
Presbyterian.....	1

Total..... 311

During

During the past year twenty-two schools were opened, five were closed, and sixty-five were transferred to the Wagga Wagga District, under the supervision of Mr. Inspector M'Creddie, stationed at Yass. On the 31st December last the number in existence was—

Public .....	136
Provisional .....	58
Half-time .....	49
Third-time.....	3
Evening Public.....	3
Church of England .....	1
Roman Catholic .....	13
Presbyterian.....	1
Total.....	264

Of these, 259 were fully inspected, the non-inspection of the remaining five being due to the facts—  
That two were inaccessible from rain and floods at the time of the Inspector's visit.

That three were opened so late in the year as to prevent their being examined, regard being had to the pressure of other equally urgent duties.

The number of pupils present at inspection was .....	8,970
The number of pupils enrolled for the year was .....	14,539
The number enrolled two or more times was .....	3,799
The number in ordinary attendance was .....	9,066

The average attendance for each quarter of the year was as follows :—

For quarter ending March .....	8,514·8
"    "    "    June.....	8,310·1
"    "    "    September .....	8,605·9
"    "    "    December .....	8,810·5

The number of children between six and fourteen years of age in each School District, as nearly as can be ascertained, will be found in the returns forwarded by the several teachers at the close of the year, the aggregate of such being 11,965, of whom 998 are reported to be attending no school. The number who attended 140 days or more during the year was 6,889; the number who attended for a less period was 7,650; their failure to fulfil the prescribed term being attributable to the following causes :—

1. To sickness in the case of .....	903
2. To truancy in the case of.....	94
3. To removal from locality in the case of .....	1,648
4. To other causes in the case of.....	5,005

Among the "other causes" are comprehended the indifference of parents and guardians, the disagreements and misunderstandings between parents and teachers, and the almost numberless and indefinite but potent influences which engender jealousies, dislikes, and social grievances, and seem inseparable from human society both in town and country. It may be that when the attendance officers have exercised to the full extent their legitimate functions, these hindrances may be overcome or suppressed; but until then, it cannot be affirmed with any degree of confidence that the compulsory provisions of the Act have been exhausted; nor can a fair and impartial estimate of their value in accomplishing the end in view be finally formed. It is worthy of note that, as shown above, nearly 1,000 children are supposed to be receiving no instruction.

The number of schools established during the past year was twenty-two; the number in course of establishment was seventeen; and the number projected was eight; seven new schools were erected; extensive repairs effected in three, and further enlargements and improvements are recommended or authorized for the year now current. Existing buildings provide accommodation for about 13,904 children, the estimated total requirement being for 11,965, leaving a surplus of room capable of meeting the wants of 1,939 additional pupils. While, therefore, as a whole, there may be said to be ample room for the present and prospective wants of the District, it is to be remarked that in Goulburn, Braidwood, and Bega, and in a few other localities, considerable additions are still necessary to meet the increasing demand for accommodation. Recommendations have already been submitted and approved in some of these cases, and further action, where necessary, will be taken, so that ordinary deficiencies may be adequately met. For unforeseen contingencies, the school tents offer a temporary solution of more pressing difficulties.

The condition of the schools inspected will be understood from the following comparison with the standard (Fair) in regard to organization, discipline, and proficiency :—

Below the Standard .....	115 Schools.
Up to " " .....	86 " "
Above " " .....	58 " "

The percentage of pupils who satisfied the standard in each subject of instruction may be seen from the following table :—

	Good to Fair.	Tolerable to Indifferent.
Reading ... ..	61½	38½
Writing ... ..	68	32
Arithmetic ... ..	48	52
Grammar ... ..	50	50
Geography ... ..	57	43
Scripture Lesson ... ..	66	34
Object Lesson ... ..	54	46
Drawing ... ..	50½	49½
Vocal Music ... ..	60½	39½
Geometry ... ..	66½	33½
Algebra ... ..	58	42
Needlework ... ..	66	34
Drill ... ..	69½	30½

The preceding, geometry and algebra excepted, are the subjects of general instruction. In the Superior Public School at Goulburn, elementary Latin, mensuration, and trigonometry are taught, and the proficiency of thirteen pupils in the two first-named subjects was very satisfactory. The number being so few, a tabular statement is not given. It will be observed in the results above quoted, that in arithmetic and grammar, the knowledge shown is comparatively low, but that in most of the other subjects it is of a higher character. Arithmetic and grammar, along with reading and dictation, form the foundation of any system of instruction possessing or claiming the right of providing suitable mental food for pupils of Elementary Schools, and hence a thorough acquaintance with these four is a matter of paramount importance. It seems, looking at the long list of subjects above given, that the time available for the generality of children to acquire anything like a correct knowledge of so many is too short, and that the knowledge generally acquired is at best only superficial, and of short duration. It is further a matter of considerable moment, now that a definite test is to be applied for exemption from compulsory attendance, that the course of instruction should be so regulated as to enable schools of every class to meet the test. As, I believe, a new standard of proficiency is in course of preparation, it would, in my opinion, be worthy the attention of the Department to consider how far the present course of instruction may be advantageously compressed, so as to secure as far as possible complete agreement with the requirements of the law, thorough proficiency to the extent of the programme, and practical adaptation to the circumstances and opportunities of the children for whose benefit the law is

is designed. It should, in my opinion, be an indispensable condition that no subjects except the necessary and useful should be taught in the ordinary schools, *unless* the Standard for these is fully attained; and that even then, instruction in singing and drawing should be optional and dependent upon a teacher's taste and skill in these matters, and upon the particular bent and aim of individual pupils. In needlework there appears to be very great care bestowed upon the instruction of the girls, and a reasonable amount of success achieved; but it is remarkable that, as far as I am aware, there is, as yet, no systematic instruction given in the art of cutting out garments for general wear; and, in this age of sewing-machines, any results of mere needlework, however excellent, without a passable share of originality, skill, and success in cutting and fitting, fall short of what may be reasonably expected and required in this useful branch of female education.

There are 245 teachers in charge of Schools; in addition to whom fifteen assistants and forty-two pupil-teachers are employed. The classification by examination of the first-named is as follows:—

Holding I. A .....	1	Holding III. A .....	45
" I. B .....	1	" III. B .....	29
" II. A .....	11	" III. C .....	48
" II. B .....	23	Unclassified .....	88

The progress made in this district in primary education during the past year may be understood from the following facts:—twenty-two new schools were opened; three Evening Schools; one Denominational (C.E.) and one Provisional School were closed, the last being likely to be re-established or replaced by a Public School. The average enrolment for each school was—

In 1880 .....	49
In 1881 .....	55

and for the same two years the relative efficiency of the schools may be shown as under:—

	1880.	1881.
Percentage of schools below Standard .....	49	40
" " up to .....	32	33
" " above .....	19	27

In conclusion, it is to be observed that the wants of the district in the matter of Primary Schools are comparatively few, and will be met, as they arise, by the ordinary procedure authorized by the rules of the Department; that the existing schools are working with fair average efficiency; and that the teachers in general are respectable, intelligent, and fairly popular. The reports of the Inspectors (Messrs. O'Byrne, Dawson, and Kevin) associated with me are forwarded herewith.

Goulburn,  
14th February, 1882.

WM. DWYER,  
District Inspector.

#### ANNEX G.

##### MR. INSPECTOR O'BYRNE'S GENERAL REPORT FOR THE YEAR 1881.

###### I.—Number and Distribution of Schools.

In that portion of the Goulburn District assigned to me, the schools in operation at the commencement of the year 1881 consisted of fifty-four Public, nineteen Provisional, fourteen Half-time, two Roman Catholic, and one Presbyterian, making a total of ninety schools. In the course of the year, seven new Provisional Schools were opened; two of the Provisional were converted into Public, and two of the Half-time were transferred to the list of Provisional Schools, so that the number of schools under my supervision at the end of the year was ninety-seven. In December, aid was granted to Provisional Schools at Bomballaway and Chalkerville. These two schools will be opened in January. Schools are projected at Colo and at Berrima Coal Mine. There are no other places within my knowledge where schools are wanted. Of course here and there will be found isolated families that cannot be reached by any of the classes of schools. It is proposed to bring the benefits of education to these people by a system of "house to house teaching." It may be stated that this portion of the Goulburn District is well supplied with the means of primary education.

###### II.—Inspection.

Ninety-six of the schools were fully inspected. The Provisional School at Myango Creek, opened very late in the year, was not examined. In arranging my programme of work, I endeavoured to provide that each locality should be visited twice in the year, at intervals of about six months. Schools in charge of untrained teachers, and schools whose efficiency was doubted, were as a rule examined in the first half of the year. This gave me an opportunity of noticing later on if my suggestions had been carried out, and if the schools were improving in efficiency; it also gave me a chance of visiting nearly all the schools incidentally in addition to the usual visit for examination and report. A good number of schools were visited three or four times during the year. These incidental inspections are of great practical value, and the twenty or thirty minutes they occupy is time well spent. As they are generally made at unexpected times, they enable the Inspector to see the schools in their every-day attire. A rapid inspection of the Records, a glance at the Time-table, and a noting of the work just then in hand, will reveal whether the business is carried on in a regular and systematic manner or not. The teacher who is industrious and conscientious is never taken aback by these visits, whilst they keep a wholesome check on the idle and careless.

Owing to the favourable nature of the season, I was able to carry out the work of inspection with greater completeness than formerly. The results of examination in the several subjects are exhibited in the following table. This table shows how many out of every hundred passed a fair to good examination on the several subjects:—

Reading .....	60.1 per cent.
Writing .....	60.2 "
Arithmetic .....	43.4 "
Grammar .....	53.3 "
Geography .....	53.0 "
Scripture .....	60.4 "
Object Lessons .....	38.9 "
Drawing .....	49.8 "
Singing .....	62.6 "
Euclid .....	47.8 "
Algebra .....	40.1 "
Needlework .....	44.7 "
Drill .....	45.1 "

These results are not quite so good as might reasonably be expected—a cause is assigned later on in this report.

It appears to me very desirable that the standard course of instruction should be modified to meet the change brought about by the recent alteration of the law. Where there is but one teacher, it is received almost as an axiom that there should not be more than three classes. Schools with one teacher must always predominate. It is quite plain that the course for the third class (highest) should at least reach the standard prescribed for exemption from school attendance; otherwise, in country places

places at least, children cannot be apprenticed to trades until they *grow beyond* the school age—a condition of things that would not be creditable to our school system. This point deserves special attention. It appears, therefore, desirable to expand the standard in reading, writing, and arithmetic, whilst the time devoted to singing, drawing, and object lessons should be curtailed. In fact, I would not have singing and drawing taught in schools where there is but one teacher, unless—

- (a) The standards on the essential subjects are fully reached.  
 (b) And unless the teacher is qualified to instruct on these extra subjects. Valuable time is frequently spent in futile and ludicrous attempts to teach singing and drawing. Nor do I think instruction in algebra and geometry ought to be permitted in the class of schools I am now referring to, unless the above-named conditions are satisfied. The first and main aim should be to give to every child sound instruction in reading, writing, and arithmetic.

### III.—Organization.

Of the fifty-five Public Schools examined, the material condition and organization of thirty-five are good or passable. Of the twenty whose organization is indifferent, nearly all have been recently transferred from the list of Provisional Schools. As is generally known, these Provisional Schools are cheaply got up by local contributions. The process of replacing them by more suitable structures is being steadily pushed on by the Department. The organization of the three Denominational Schools is pretty good, whilst the Provisional and Half-time Schools are very inferior in this respect. Persons applying for aid to Provisional Schools are not now so anxious as they were some years ago to provide substantial buildings. The general aim is to provide a mere shell, have it recognized under the Department, and, when an attendance of twenty has been scraped together, to apply for the erection of a Public School. There is a very general impression (which needs to be corrected) that when an attendance of twenty has been secured, the Minister is bound to erect a school-house and teacher's residence. If these applications were too readily granted, there would, in a few years, be many costly buildings spread over the country, testifying to the folly and extravagance of the Education Department. Unreasonable demands for repairs and improvements are also frequently received from large centres of population. A strong desire manifests itself everywhere to secure as large an expenditure of public money as possible. So far as I could, I have steadily resisted all unreasonable demands. It is interesting to notice how people's ideas of school accommodation have expanded since the necessity of raising the local quota has been abandoned. The effective remedy for all this lies in a local school rate.

All the Public and Denominational Schools have suitable playgrounds. The Provisional and Half-time Schools, being in the country, have ample room for recreation for the pupils, although the grounds are usually open. Twenty-three of the Public Schools, and all the Denominational Schools, are without weathersheds. Only fourteen of the schools are provided with class-rooms, and some of these are too small for any practical use. Steps have been taken to supply all schools with an average over fifty with class-rooms. All the vested Public Schools and the three Denominational Schools are well furnished, and properly supplied with the necessary working appliances. The internal organization of the other schools is, as a rule, inferior.

### IV.—Attendance.

As heretofore, regularity and punctuality are least satisfactory in the farming localities. The appointment of Attendance Officers considerably improved the regularity, but not the punctuality. In the country, many of the children are worked too hard in milking, harvesting, &c. They frequently come to school late, physically tired out, and almost incapable of mental effort. It would surprise most of our city children, and parents too, to learn that there are hundreds of boys and girls of ten and eleven years of age who milk from seven to twelve cows every morning, and then walk two or three miles to school. But such is the case. A high degree of punctuality is scarcely to be expected under such circumstances. From the following table an idea of the regularity may be obtained. The ordinary attendance for the year was 3,041.

Quarter ending	Enrolment.	Average.
March 26th	4,105	2,831·9
June 25th	4,285	2,802·6
September 24th	4,316	2,943·6
December 31st	4,486	3,164·5

The total number of pupils enrolled in the ninety-seven schools throughout the year was 5,545. Of these 126 were enrolled two or more times. The average for the whole year was 3,042·3, and the amount paid in school fees was £1,561 13s. 9½d., or at the rate of 10s. 3d. per head.

I give here some items regarding the accommodation afforded in the 97 schools examined, and regarding the character of the attendance at them. The public can judge from these numbers how far the law of compulsion has been effective in this part of the Colony.

1. Number of pupils for whom accommodation is provided	4,849
2. Number of children of school age in the 97 School Districts	3,952
3. Number of pupils who attended for 140 days during year	2,403
4. Number who failed to attend 140 days	
(a) Through sickness	277
(b) Through truancing	23
(c) Through removal from locality	489
(d) Through other causes	886
Total who failed	1,675
5. Number who have been enrolled two or more times	126

### TEACHING STAFF.

The following Table shows the classifications, by examination, of the teachers in the several kinds of schools.

Kind of School.	First-class.		Second-class.		Third-class.			Unclassified.
	I. A.	I. B.	2. A.	2. B.	3. A.	3. B.	3. C.	
Public	.....	.....	2	11	12	7	15	10
Provisional	.....	.....	.....	.....	.....	.....	.....	25
Half-time	.....	.....	.....	1	2	1	1	1
Denominational	.....	.....	.....	.....	2	.....	1	.....
Total	.....	.....	2	12	16	8	17	36

There are 18 pupil-teachers employed in the District, classified as follows, viz. : 1 first-class, 2 second, 4 third, and 11 fourth.

It will be observed that the twenty-five Provisional School Teachers are unclassified. Without a word of explanation this would tell very unfavourably for these teachers. Many of them are quite competent to gain a classification, so far as literary attainments are concerned, but it is usual to test their practical skill and usefulness in small schools for a year or so before they are examined for classification. Many very useful teachers have come up from these schools.

In the course of the year thirty-two teachers were examined. Of these thirteen succeeded and ten failed to gain promotion; the papers of nine have not yet been finally dealt with.

I am glad to be able to report that a decided revival in the spirit of study has been manifested among the teachers. No corresponding improvement in the efficiency of the schools is yet apparent, but greater zeal in the first point is pretty sure to be followed by improvement in the latter. It is a good feature in the new regulations that they force teachers to study for examination.

During no year, within my experience, have there been so many applications for removal. This shows that the new *régime* largely unsettled the minds of the teachers. Many holding grades higher than the "class" of the school in which they were engaged expected to be put in charge of more important schools. In a great many instances this was found impossible. Disappointment, accompanied by flagging zeal, followed. To this cause I attribute the low results before adverted to. However, as the principles on which future promotions are to be made are becoming better understood, the teachers are taking to their work with more steady and contented zeal. I therefore have good grounds for anticipating that the results of the year now entered on will reveal a higher state of efficiency in the schools.

I can truly say that the teachers in this district are a respectable body of persons, with whom a word of kindly sympathy and encouragement is more efficacious than the cold frown of officialism.

With all their shortcomings, I can see good reason to regret the dissolution of the old Local Boards.

A return showing the number of pupils examined, and the estimated proficiency in the several subjects, has already been furnished.

Mittagong, 27th January, 1882.

G. O'BYRNE,  
Inspector.

#### ANNEX H.

##### MR. INSPECTOR DAWSON'S GENERAL REPORT FOR 1881.

I HAVE the honor to submit my general report for the year 1881.

Of schools under my supervision there were in operation at the end of the year thirty Public, nine Provisional, two Evening Public, eight Denominational, twenty Half-time, and three Third-time, in all seventy-two. During the year eight new schools were established, viz., three Provisional, two Evening Public, and three Third-time. On the other hand, three were closed owing to insufficient attendance, viz., one Public and two Evening Public. Schools of the latter class have not been well supported where established.

For the most part the schools are centrally situated, and their districts do not overlap. In the large centres of population, owing to the presence of Denominational Schools, the number is in excess of present requirements. The smaller centres of population are all provided with means of education. There has been an increase in the number of schools in the more thinly settled localities. Small schools have been opened at Keewong, Black Creek, Meroo Flat, Anembo, Norongo, and Wild Cattle Flat, and similar schools are in course of establishment at Currowan, Rossi, and Kowen. The services of an itinerant teacher have been granted to the very sparsely inhabited district of the Big Badger River. When these contemplated arrangements are completed only a few localities will be without means of education.

Existing schools collectively afford accommodation for 4,150 pupils, which is fully equal to the requirements of the district, in which there are approximately 2,780 children from six to fourteen years of age. To meet the want of increased accommodation in the particular cases of Braidwood Public School and Araluen Upper Public School, the usual steps have been taken with a view to the erection of new buildings.

The following statistics, showing the number of pupils enrolled, and the average daily attendance for each quarter, as well as the ordinary attendance for the year, make it clear that in this respect the condition of the schools calls for improvement:—

Quarter.	Enrolment.	Average daily attendance.
March .....	3,030	2,178
June .....	3,106	2,108
September .....	3,097	2,079
December .....	3,094	2,109
Ordinary attendance .....		2,270

There were enrolled during the year 3,934 pupils of all ages. Of these 120 attended evening schools, and of the remainder 1,762 attended 140 days and upwards, and 2,052 attended less than 140 days, during the year. The failure of 216 of these latter to make the requisite number of attendances is explained by "sickness," that of 26 by "truanting," that of 397 by "removal from locality," and that of the large number of 1,413 is set down to "other causes." Amongst these "other causes" which exert so hurtful an influence on the attendance are to be noted specially the negligence of parents and the employment of children in farming occupations.

Throughout the whole district there are approximately 374 children of school age who are not known to be receiving school instruction. Of these 194 are within reach of schools, and 180 beyond.

##### Results of Inspection.

Seventy-two schools were fully and regularly inspected during the year. Eight ordinary and thirty-eight incidental inspections (chiefly of schools in the Bega District) were also made. Three schools were not inspected, owing to their being closed on the dates fixed for inspection.

The material condition of most of the Public Schools is fairly satisfactory. Several are in need of repairs, or require to be replaced by new buildings, especially where Provisional Schools have been converted into Public Schools. In the course of last year repairs and improvements have been made in three schools, a new building has been completed at Burry, and another is in course of erection at Kiora.

The condition of the Provisional and Half-time School buildings is far from satisfactory. The residents are slow to make necessary improvements.

Of the seventy-two schools fully and regularly inspected, eight were found to be above, thirty up to, and thirty-four below standard requirements in attainments. These last are chiefly small schools. Accordingly, as will be seen from the statistics given in the succeeding paragraph, the percentage of pupils who satisfied standard requirements is higher than what might be anticipated from the percentage of schools which fell below standard requirements.

At the regular inspections there were present 2,177 pupils, of whom 2,136 were examined in reading, 2,112 in writing, 1,646 in arithmetic, 1,164 in grammar and geography, 367 in Scripture lessons, 2,025 in object lessons, 890 in drawing, 934 in music, 78 in geometry, 50 in algebra, 764 in needlework,

needlework, and 15 in mensuration. Underneath is a table showing the percentage of pupils who passed in each subject:—

Reading ... ..	67	per cent.
Writing ... ..	74	"
Arithmetic ... ..	52	"
Grammar ... ..	58	"
Geography ... ..	66	"
Scripture Lessons ... ..	89	"
Object Lessons ... ..	74	"
Drawing ... ..	57	"
Music... ..	73	"
Geometry ... ..	89	"
Algebra ... ..	80	"
Mensuration... ..	0	"
Needlework ... ..	90	"

In arithmetic, grammar, and drawing low results have been produced; in arithmetic, chiefly because of the inability of pupils to apply abstract rules to concrete examples; in grammar, because of the superficial knowledge of its principles which most teachers are satisfied with imparting to their pupils; in drawing, because most of the teachers are unacquainted with the proper methods of giving instruction in it.

As a body the teachers are diligent and conscientious in the discharge of their duties. Many exert a considerable influence for good in the localities in which they are placed. I find, however, few students amongst their number.

Sixty teachers were engaged in schools under my supervision at the end of the year. Of these, six possessed second-class certificates by examination; thirty-seven, third-class certificates; and seventeen possessed no classification. These last are in charge of schools of the smaller sort. An improvement in the classification of teachers is expected as a result of the examinations held in December.

The condition of the Braidwood District, from an educational point of view, is fairly healthy, and there is reason to hope for improvement. Progress has been made during the past year in providing schools for localities destitute of means of education. The results of instruction in the schools are in many cases very creditable, and where improvement is still necessary, it is confidently anticipated, from the promise of greater exertion on the part of the teachers, that an advance will be made on the year 1881.

J. DAWSON,  
Inspector.

Braidwood, 30/1/82.

#### ANNEX I.

##### MR. INSPECTOR KEVIN'S ANNUAL REPORT FOR 1881.

I HAVE the honor to submit my annual report for the year 1881.

I took charge of this section of the Goulburn District on 12th May last, and had then upon my list of schools 35 Public, 29 Provisional, 12 Half-time, and two certified Denominational R.C., in all 78. Three of the Provisional Schools, namely, Bibbenluke, Numbla, and Spring Vale, have been converted into Public Schools, and one Half-time School—Saucy Creek—has become a Provisional School during the year.

New Public Schools have been opened at the following places during the year, viz.: Angledale and Cootalantra; and Provisional Schools at Caddigat and Wapengo. No schools have been permanently closed during the past year.

New Public Schools will be opened at an early date at Montreal and Three-mile Waterhole; and Provisional Schools at Burrumbooka, Church Creek, Cobbobora, Gunningrah, Towomba, Mumbulla, and Cochrane's Flat. In addition the establishment of Provisional Schools at the following places is under consideration, viz.: Black Rock, Forest Dale, Lord's Hill, Rocky Plain, and Square Range.

New Public School buildings have been sanctioned at Bega and Nimitybelle, and will be commenced without delay.

The accommodation at Bega, Cobargo, Cooma, and Kiandra, is insufficient, but steps have been taken to remedy matters as far as possible for the present. A school tent has been supplied to Bega as a temporary measure; tenders have been invited for extensions to Cobargo. Additions to Cooma will be undertaken at once; and more suitable premises will be rented at Kiandra pending the erection of new buildings.

##### *Distribution of the Means of Education.*

The means of education are well distributed in the centres of population, and with one or two exceptions are adequate. New, handsome and commodious buildings have been erected by the Department at the following places during the year, viz.: Angledale, Delegate, and Numbugga; and extensions and repairs have been effected at Dangelong, Eden, and Wyndham.

In thinly populated districts the means of education are fairly within reach of all, but there are some places still where the establishment of schools is urgently needed. In some of these localities delay has been brought about by the residents refusing to avail themselves of the aid granted to Provisional Schools, preferring to go without a school altogether when one was not provided at the public expense. A very general notion prevails in some places that, where twenty children can be enrolled, the Minister is obliged to establish a Public School, and if need be to go to great expense in providing new buildings. People who hold such notions never appear to discriminate between enrolment and average daily attendance, for it must be generally known by those who take anything like an intelligent interest in school matters that an enrolment of twenty will give, as a rule, a daily average of no more than fourteen or fifteen. This number is of course too small to warrant the establishment of a Public School.

##### *Results of Inspection.*

Nominally there were 78 Schools of all classes under my supervision for the year 1881, but of this number two Public, 14 Provisional, and six Half-time Schools were not in operation. There remained consequently 57 Schools open for inspection.

Of these all were regularly inspected and reported upon, with the exception of four, viz.: Numbla and Cootalantra Public, and Saucy Creek and Caddigat Provisional. The first and third of these could not be reached, owing to heavy rains and floods. The remaining two were opened in the middle of December, and when the work of inspection had terminated. These Schools could not, therefore, be said to form a regular part of my inspection programme for the past year.

In addition to the general and regular inspections, 16 Schools were visited incidentally.

There were 3,364 pupils enrolled for the year, and the average attendance was 1,789·7. The average attendance for the four quarters of the year was—

	Boys.	Girls.	Total.
March ... ..	804·7	778·6	1,583·3
June ... ..	826·0	807·8	1,633·8
September ... ..	880·5	851·8	1,732·3
December ... ..	860·2	847·3	1,707·5

The number enrolled two or more times was 201.

The ordinary attendance was 1,843, and the number present at inspection, 1,754.

The

The total number between 6 and 14 years that might reasonably be expected to be in attendance in this part of the Goulburn district is 2,234; and the number not known to be receiving statute education, 239.

Of the total number enrolled, 1,286 attended 140 or more days during the past year, and 1,398 failed to do so through the following causes:—

Sickness	...	...	...	...	...	...	...	...	184
Truanting	...	...	...	...	...	...	...	...	8
Removal	...	...	...	...	...	...	...	...	333
Other causes	...	...	...	...	...	...	...	...	873

It will be seen by a glance at the foregoing figures that by far the greater number failed to attend through "other causes." The chief of these is undoubtedly indifference of parents, and the sooner the compulsory clause of the Act is extended to this part of the Colony the better for the children who live in it. There is accommodation for 2,665 children.

*Organization.*—The schools generally are well supplied with working material, but I regret to say it is not always taken good care of, judging by the torn books and broken slates I have seen in some. The classification is, as a rule, sensible; but there is a general disposition to carry subdivision too far. All cases of the kind calling for my interference were dealt with, and the teacher instructed how to act in the future. It is a matter of comment that so large a proportion of the enrolment is found in the first classes, but I consider the parents are chiefly responsible for this state of things, as I trace it mainly to irregularity of attendance and withdrawal before the pupils have attained the fourteenth year. I shall look for improvement, however, when the district shall have been brought under the provisions of the compulsory clause of the Act.

The records are generally correctly and neatly kept, and the returns are furnished promptly and accurately from all but a few schools.

*Discipline.*—The discipline of the schools under my supervision is generally satisfactory; but I have noticed that some teachers do not lay stress enough upon punctuality. In point of regularity also there is room for improvement, but until parents are *compelled* to send their children regularly I cannot see that things are likely to mend in this direction. Many of the schools, particularly in the Monaro district, are almost emptied during the weaning and shearing seasons, while those on the coast are badly attended in the harvest-time.

As a rule, I have had reason to be pleased with the personal appearance of the children, and it is evident that in the majority of schools cleanliness receives due attention. The government is mild and judicious, and no case of severe corporal punishment inflicted upon a pupil has been reported to me during the year.

*Instruction.*—Taken as a whole, the results of examination may be regarded as satisfactory, particularly when it is borne in mind that some of the schools had not been inspected for nearly two years, while others have but recently been opened.

The following table exhibits the relation of the various schools in point of proficiency to the standard.

Schools.	Below standard.	Fairly meeting Standard (Fair).	Above standard.
Public .....	6	13	14
Provisional .....	4	6	2
Half-Time .....	...	3	3
Certified Denominal.	...	1	1

#### Percentages.

Reading .....	49	% up to or above standard,	51	% below.
Writing .....	57	"	43	"
Geography .....	58	"	42	"
Grammar .....	40	"	60	"
Arithmetic .....	41	"	59	"
Singing .....	40	"	60	"
Drawing .....	47	"	53	"
Algebra .....	49	"	51	"
Euclid, .....	34	"	66	"
Needlework .....	30	"	70	"
Object Lessons .....	48	"	52	"
Scripture Lessons	53	"	47	"

The whole course of instruction is not covered in the majority of schools, the subjects most frequently omitted being singing, drawing, and military drill. None except trained and classified teachers are, as a rule, competent to give instruction in these branches; and, as there are a considerable number of unclassified and untrained teachers in this district, these subjects are in many schools omitted altogether or taught with but indifferent success.

#### ATTAINMENTS.

*Reading.*—In this subject all were examined. The results on the whole are rather low, and in only a very few schools did I meet with anything like even fair reading. The chief faults are indistinct utterance and an absence of naturalness. As clear enunciation is the groundwork of all good reading, I have in every case impressed this fact upon the teachers and directed them to secure that point first. Simultaneous reading is not practised to any extent. Oral spelling and spelling from dictation are generally low.

*Arithmetic.*—The results in this subject are somewhat higher than in reading, but not so high as might be expected. The simple rules are generally poorly taught, and the result is that the pupils fail to get a clear idea of what they are working when advanced to the higher rules. The class of questions too given by many teachers is open to grave objection, as being too mechanical and of little or no practical utility. In my inspections I have invariably shaped my questions as bearing upon the ordinary transactions of every-day life. Mental arithmetic is not generally taught with success.

*Grammar.*—The results of inspection in this subject were fairly satisfactory, but I should like to see more time devoted to English composition, and less to what is generally known as analysis of sentences. I have found children who could "analyse" difficult passages selected at random from the reading lessons, and yet who could not write a dozen lines of sensible and grammatical English. I have in every instance of this kind that came under my notice instructed the teachers to give more time to English composition and less to the merely mechanical work of analysing and parsing. Accidence is a part of grammar which receives little attention.

*Geography.*—This is generally a popular subject in the school course, and the results are on the whole satisfactory. In one school only is physical geography taught as a separate subject.

*Object Lessons.*—All were examined in these. The results were not, however, quite up to my expectations. Only a moderate number of teachers treat this subject in a sensible and attractive form. Much valuable time is lost over such words as "translucent," "malleable," "opaque," &c., when addressed to first and second class children; and the selection of subjects is also a matter much abused. Many teachers take such subjects as the "hippopotamus," "the whale," or "the hyena,"  
for

for a lesson, while there are scores of objects under the children's feet and around their homes about which it would be more interesting and more instructive to enlighten them. I have noticed also that in very few schools are the pupils able to answer on any lesson given some weeks back, showing clearly the subject had been made neither interesting nor clear to the children's minds.

*Penmanship* is taught with very fair success in a majority of the schools. The chief faults were a want of uniformity and an absence of neatness.

*Singing*.—This subject is taught with passable success in about 30 per cent. of the schools, whilst in the remainder hardly any attempt is made to teach it. In two schools the subject is taught with good results, and the children sing with taste and correctness.

*Algebra and Euclid*.—In three schools only were these subjects taught with any success. The results were on the whole satisfactory, and indicative of intelligent and careful teaching.

*Needlework* is taught in most of the schools, and with tolerable success. There is a disposition on the part of some parents to dictate the class of work to be done by their children, while others take so little interest in the subject that it is very often a matter of impossibility on the part of the teacher to get mothers to supply the needful appliances. In more than one school I found the practice obtained of taking the sewing samples home, and thus at my visit there was nothing to show that needlework had been taught at all. I need not say I directed such a practice to cease.

The teachers of this district are as a rule an intelligent, sober, conscientious, and hard-working class of public servants, and command the respect and sympathy of the people among whom they labour. They are not, however, so diligent in study and self-improvement as could be wished; but the new regulations, making it compulsory upon each to qualify for his or her position by examination, must tend to increase their usefulness as well as standing. I am glad to say that a large number presented themselves for examination during the Christmas vacation, and I look forward to very satisfactory results from these periodical tests. They must tend in a great measure to bring the deserving and studious to the front, and reward those who are desirous of advancing by their own merit.

The following table shows the present classification of the teachers under my supervision:—

PUBLIC SCHOOLS.		
Class.	Section.	No. of Teachers.
I	A	0
I	B	0
II	A	2
II	B	0
III	A	7
III	B	8
III	C	11
Unclassified		9

#### PROVISIONAL SCHOOLS.

There are no classified teachers in charge of any of these, though some have expressed a desire to be examined when circumstances will permit.

#### HALF-TIME SCHOOLS.

There are two classified teachers—one III A and the other III C—in charge of these.

#### CERTIFIED DENOMINATIONAL SCHOOLS.

There are two of these schools under my supervision, and both teachers hold a II B certificate by examination.

#### SUMMARY.

The means of education are on the whole fairly distributed, but are not quite adequate. When, however, a few applications now under consideration shall have been granted, this part of the Colony will be well supplied with schools. The material condition is generally satisfactory, the organization fair, and the discipline of average range. While I look forward to higher results for the present year, I consider fairly satisfactory progress has been made during the past.

JOHN KEVIN,  
Inspector.

#### ANNEX J.

##### MR. DISTRICT INSPECTOR MAYNARD'S GENERAL REPORT FOR 1881.

EXCLUDING Evening Schools, there were in existence in the Maitland District, on the 31st December 1880:—

167 Public Schools.
43 Provisional Schools.
14 Half-Time Schools.
15 Church of England Schools.
18 Roman Catholic Schools.

Total, 257

During the year 1881 the following sixteen schools were opened:—

(a) *Public*:—East Maitland Infants', Mount View, Whittingham, Cackle Creek, Jerry's Plains, Wallsend Girls'.

(b) *Provisional*:—Sedgefield, Mondrook, Wangat, North Forster, Seal Rocks, Cuan-Cuan, Davis Creek, Black Hill, Cross Creek, and Upper Wybong.

During the same period, Raymond Terrace R.C., Dungog C.E., and the four small schools at Chilcott's Plains, Stewartfield, Hillsborough, and Campsie were closed.

There remained, therefore, in operation on the 31st December, 1881:—

173 Public Schools.
53 Provisional Schools.
10 Half-Time Schools.
14 Church of England Schools.
17 Roman Catholic Schools.

Total, 267

Including the six that were closed, 273 schools were open during the whole or a portion of the year.

At the rate of 100 cubic feet of space per child, the minimum allowance sanctioned by the Act, there is found to be the following accommodation in these 267 schools:—

Public have accommodation for 16,593 with an average of 11,165 attending.	
Provisional	1,579
Half-Time	267
Church of England	1,883
Roman Catholic	2,786
All schools	23,108
	14,345

There are individual cases where schools are overcrowded, and other cases where the size of the building is far beyond actual requirements, but in this district such inequalities are exceptional, and taking the whole school area, the results shown in the above table may be accepted as substantially accurate. The table may be thus summarized: the Public and Provisional Schools are about two-thirds full, the Church of England Schools considerably less than half-full, and the Roman Catholic Schools about

about half full. In addition to the 16 new schools established, nine others are nearly ready for opening, and steps have been taken to start six more. During the year, 27 schools have been extensively repaired or enlarged, 19 new buildings have been completed or begun, and arrangements are being made to erect 30 more. Expenditure on buildings is chiefly needed not for the establishment of new schools, where none have hitherto existed, but for the erection of suitable in place of unsuitable and dilapidated old structures. In all cases where the closing of Denominational Schools at the end of 1882 is likely to increase the attendance at Public Schools, steps have been taken to meet the demand for additional accommodation that may be needed. With this object in view, new Public School buildings are contemplated for Raymond Terrace, Miller's Forest, Bendolba, Stroud, Blandford, Plattsburgh, Upper Hexham, East Maitland, and Denman, and new departments for Singleton, Muswellbrook, Newcastle South, and Wickham.

2. The pupils enrolled during the year amounted to 26,359. This number, however, is of somewhat doubtful value for statistical purposes, as it includes double and treble enrolments. For instance a boy who changed his school three times in 1881 would count in this summary as three boys, the teacher in each school being obliged to enter him on his records and to include him in his returns. Again, a boy who leaves school for a whole quarter but returns during the year to the *same* school, is re-entered as a separate individual, and swells the annual total by counting as two boys. As nearly as can be ascertained, 3,353 must be deducted from the gross enrolment to meet cases of the first, and 457 to meet cases of the second kind here mentioned. There remain then 22,549, which may be taken as fairly representing the number of individual children actually under tuition here during 1881.

The following table shows the enrolment and the average attendance for each quarter of the year, and also the averages for corresponding quarters of the preceding year:—

March quarter, enrolled	19,459	average,	13,553	as against	12,038	in 1880,
June	20,116	13,545	12,678			
September	20,230	13,280	13,364			
December	20,272	14,423	12,130			

The average attendance is considerably below the number that would be found at school on any ordinary, fine day. Leaving out of consideration the small averages caused by wet weather and harvest operations, the usual daily attendance is about 16,000.

Except in thinly peopled localities, it is almost impossible for teachers to state precisely the number of children between the ages of six and fourteen who are living in the neighbourhood of their schools. From returns sent in by teachers, it appears that the numbers in three portions of the district—Taree, Newcastle, and Maitland—are respectively 3,111, 19,193, and 5,228. I have not much confidence in the correctness of this return, for teachers in towns have really no means of obtaining accurate information, and it is not known to what extent the same children may have been included in the returns of different teachers living in the same town.

From the same returns it appears that there are 759 children in the district who are not known to be receiving school instruction. Of the pupils enrolled, 11,905 attended school 140 days and over during the year, and 14,454 attended less than 140 days. Sickness is given as the reason why 1,105 failed to make the minimum number of attendances; 271 cases of failure are ascribed to truanting; 2,450 to removals, and 10,628 to other causes. As the number 14,454 only refers to attendances in one and the same school, it is certain that under the heads "removals" and "other causes" there are included many children who made full time by attending two or more schools. But even assuming—which would be an extravagantly liberal assumption—that in all these cases of double and treble enrolments (3,353) the full attendance of 140 days was reached, there then remain more than 10,000 who were at school less than the minimum time contemplated by the Act. These numbers prove what teachers and inspectors have for years been urging on public attention, that the obstacle to progress in education is irregular attendance and not non-enrolment.

3. Of the 273 schools open during the year, 267 were fully inspected. Four of the remaining six were closed when the schools around them were examined, one the inspector was unable to reach on account of floods, and one he had no time to visit. The number of pupils examined was 14,371. As this coincides very nearly with the ordinary average attendance, it shows that the schools in the aggregate were tested in their normal condition as to numbers. In regard to efficiency, twenty-six schools were found to be above standard requirements, 128 reached the standard, and 113 were below it. The following numbers show what proportion of the children examined passed satisfactorily in the different subjects:—

Reading	60 per cent.
Writing	80 "
Arithmetic	38 "
Grammar	52 "
Geography	58 "
Object Lessons	72 "
Scripture	72 "
Drawing	56 "
Music	71 "
Needlework	67 "
Drill	52 "
Algebra	18 "
Euclid	43 "
Mensuration	69 "
Latin	45 "
Trigonometry	61 "
English History	93 "

The examinations in the six last-named subjects were confined to pupils in fourth and fifth classes.

Considering irregularity of attendance, and bearing in mind the fact that the great majority of schools have an average below fifty, and are therefore taught by one teacher, the results given above cannot be called unsatisfactory. I have long been convinced that there will be no great improvement in the quality and amount of education given in schools placed under one teacher till fewer subjects are taught to the young children in first and second classes and higher results demanded in the few that are taught. If sufficient instruction were given in the lower classes in reading, spelling, writing, and elementary arithmetic, something really effective might be done, in more advanced subjects, in the higher classes.

4. The discipline in the majority of schools is good. Orderly habits and movements are systematically enforced, and pupils as a rule attentively and respectfully listen to their teachers in class and promptly obey them.

5. Arranged with reference to classification by examination, the teachers in charge of schools stand thus:—

Class I	A. ....	0
	B. ....	2
Class II	A. ....	17
	B. ....	41
Class III	A. ....	48
	B. ....	39
	C. ....	27

Unclassed

Unclassed probationers in charge of Provisional or other small schools ... .. 88

The bulk of the teachers are steady, competent, and respectable.

The pupil-teachers have conducted themselves well, and no complaint has been made of any of them.

6. Fourteen evening schools have been in operation during the year, but all except two have closed for want of scholars. The experiment of establishing these schools could not have been tried under more favourable circumstances than it was in this district, for, with scarcely an exception, they were placed in charge of teachers who were not only professionally competent, but who personally took an interest in the schools and showed a willingness to go to a great amount of trouble to make them successful. The general opinion amongst teachers is that, though an individual here and there may be found anxious to attend an evening school, there is not a sufficient number so disposed, even in towns the size of Newcastle, to make it possible to form classes for any length of time.

No changes have been made in the inspecting staff during the year. Mr. Inspector M'Cormack has had charge of the Newcastle and Muswellbrook portions of the district, Mr. Inspector Smith of the Taree portion, and the central portion around Maitland has been under my own direct supervision.

J. C. MAYNARD,  
District Inspector, Maitland.

E. Maitland, 4th January, 1882.

ANNEX K.

MR. INSPECTOR M'CORMACK'S GENERAL REPORT FOR THE YEAR 1881.

1. The Newcastle portion of the Maitland District had 99 schools in operation at the beginning of the year, viz. :—

Public Schools	66
Provisional Schools	19
Denominational Schools	14

During the year this number has been increased to 106 by the opening of Public Schools at Cockle Creek and Jerry's Plains, the addition of a Girls' department to the Wallsend Public School, and the establishment of Provisional Schools at Black Hill, Cuan, Davis Creek, and the Upper Wybong. The Provisional School at Moonan Flat, having secured the requisite attendance, was added to the list of Public Schools in July, and those at Baerami Creek, Black Hill, Cuan, Galgabba, and Mount Mooly, have recently been reported upon as eligible for conversion into Public Schools.

2. Public School buildings have been completed at Ash Island, Moonan Brook, and Wickham. Others are in course of erection at Belltrees, Cockle Creek, Stockton, and Wallsend. Important additions and repairs to the following schools have been effected :—

Aberdeen,	Minmi,
Cooranbong,	Murrurundi,
Dunbar's Creek,	Muswellbrook,
Goorangoola	Newcastle,
Gosford,	Newcastle South,
Kayuga,	Onybigambali,
Kincumber,	Seone,
Lambton,	Waratah.

New Public School buildings are to be erected at—

Belmont,	Newcastle South,
Blue Gum Flat,	Plattsburg,
Gungah,	Rouchell,
Mangrove Lower,	Wybong,
Middle Creek,	Baerami,
Moonan Flat,	Denman,
Mosquito Island,	Blandford,
Muswellbrook,	Fullerton Cove.

At the majority of these places schools are in existence, conducted in non-vested premises.

3. The Schools are well distributed throughout the district, and the extent of accommodation provided by them is shown in the following table :—

Schools.	Average enrolment.	Average attendance.	Space in schoolrooms.	Space per child enrolled.	Space per child in attendance.
Public .....	8,280	5,598.4	cubic feet. 894,606	cubic feet. 108	cubic feet. 159
Provisional .....	558	391.9	66,810	119	170
Denominational .....	1,639	1,130.8	257,214	156	227

The space prescribed for each scholar is 100 cubic feet. Viewing the averages, this requirement is well satisfied by existing schools. In a few places, however, the means of education are insufficient owing to the increase of attendance, but in each case steps have been taken to remove the defect.

4. The total enrolment of pupils in the district for the year is presented in the school returns as 14,042. This number is misleading; it is largely in excess of the real attendance. Owing to various causes, many children are withdrawn during the year from some schools and sent to other schools, where on admission they are again registered. The plain result is that the number of enrolments exceeds the number of pupils. In the schools under my supervision the difference amounts to 2,152. The number of pupils in actual attendance during the year therefore is 11,890. In the following tables the enrolment and the average attendance for each quarter of the year are given :—

ENROLMENT of pupils for each quarter of the year.

Schools.	Quarters.			
	March.	June.	September.	December.
Public .....	8,115	8,356	8,325	8,326
Provisional .....	506	584	557	587
Denominational .....	1,542	1,587	1,701	1,728
Totals.....	10,163	10,527	10,583	10,641

AVERAGE

## AVERAGE attendance of pupils for each quarter of the year.

Schools.	Quarters.			
	March.	June.	September.	December.
Public .....	5,561.4	5,526.6	5,429.6	5,876.0
Provisional .....	367.2	421.1	381.5	398.1
Denominational .....	1,095.1	1,068.9	1,112.8	1,246.6
Totals.....	7,023.7	7,016.6	6,923.9	7,520.7

Inclement weather prevalent during a portion of the September quarter diminished the attendance for that period. The ordinary attendance is estimated at 8,025.

The number of children between six and fourteen years of age living within two miles of existing schools, and not known to be receiving statute instruction, is 338. This presents a great decrease in the number of non-attendants, and is due in a great measure to the action taken by the School Attendance Officers, three of whom were appointed to this district in July last. During the year 5,351 pupils attended school for 140 or more days, and 6,539 became defaulters, their attendance not reaching 140 days, the minimum prescribed by law. Of these

557 are recorded as having failed through sickness,  
 123 " " " " " " truanting,  
 1,107 " " " " " " removal from locality,  
 and 4,752 " " " " " " other causes.

It is well to notice that the majority of the 1,107 pupils returned as defaulters through removal from locality were subsequently enrolled in other schools, and the sum of their attendances before and after removal must in numerous cases have exceeded 140. That many of these are also included in the next number, 4,752, is evident.

5. During the year 103 schools and departments were fully inspected. Three schools were not inspected; one was closed when I visited the locality, want of time prevented the inspection of another, and inclement weather compelled the omission of the third school.

The material condition of the Public vested schools is good, and of the Provisional Schools about tolerable. Most of the buildings have very fair means of ventilation, but in many instances these are not fully utilized by the teachers. All schools are liberally supplied with materials, but their stock of apparatus is inadequate. The school documents and records are, as a rule, carefully prepared and correctly kept.

The punctuality and regularity of pupils have much improved. The average attendance for the December quarter is 70 per cent. of the enrolment for that period. In several schools smart, precise, and quiet simultaneous movements are not practised, a defect leading to disorder and loss of time. Evidence exists that some teachers fail to exercise over their pupils a constant and uniform vigilance, and to keep them during the prescribed lessons uninterruptedly and profitably employed. Directions have been given to include military drill, hitherto almost neglected, in the regular course of instruction.

The following statement shows the general condition of the schools inspected:—

Schools.	Below Standard.	Up to Standard (Fair).	Below Standard.
Public.....	22	34	11
Provisional .....	21	1	...
Denominational .....	4	8	2
Total.....	47	43	13

Of the schools below the standard twenty-eight are taught by teachers who do not hold certificates. At the inspection 7,465 pupils were present. The subjects of instruction, the number of pupils examined, and the percentage of them who satisfied the standard in each subject are given in the following table:—

Subjects.	Pupils examined.	Standard satisfied by--
Reading .....	7,465	57%
Writing .....	7,210	78
Arithmetic.....	7,128	31
Grammar .....	3,584	39
Geography.....	4,468	51
History .....	88	87
Scripture .....	2,118	50
Object Lesson .....	6,954	62
Drawing.....	4,012	42
Music .....	5,537	53
Euclid.....	444	32
Algebra .....	407	20
Mensuration .....	113	69
Latin .....	174	72
Trigonometry .....	13	61
Needlework .....	2,354	61
Drill .....	1,016	23

Teachers in charge of schools are classified as follows:—

0 in Class I, Section A.  
 2 in Class I, Section B.  
 9 in Class II, Section A.  
 18 in Class II, Section B.  
 21 in Class III, Section A.  
 12 in Class III, Section B.  
 8 in Class III, Section C.  
 36 are not classified.

Of the thirty-six teachers not classified, twenty-seven are in charge of Provisional Schools, and nine conduct Public Schools. Six of the latter have recently been examined with the object of obtaining certificates. With very few exceptions, teachers are studying diligently in order to raise their classification by examination.

As

As a body the teachers are intelligent and respectable. They perform their duties faithfully, and manifest a strong desire to achieve success. The pupil-teachers are industrious and well conducted; many of them display good aptitude for their work.

Summary.—The schools in operation are well distributed, and afford ample accommodation for the number of pupils enrolled. An improved attendance has been secured, and the proficiency ranges from tolerable to fair. The teachers generally are studious and painstaking. Existing conditions are favourable to the progress of primary education in the district.

Newcastle, 31/1/82.

J. M'CORMACK,  
Inspector.

ANNEX L.

MR. INSPECTOR SMITH'S GENERAL REPORT FOR 1881.

I HAVE the honor to submit my general report upon the schools under my supervision.

At the beginning of the year 1881 there were in operation fifty-four Public, nineteen Provisional, eight Half-time, five Church of England, and two Roman Catholic Denominational Schools in the Taree portion of the Maitland District.

During the year petitions for Public Schools at Cedar Party Creek and Lower Wollamba River were granted. Three Provisional Schools were converted into Public Schools, viz., Dingo Creek (now called Apple-tree Flat), Cucumbark and Oakendale. Three Provisional Schools were opened, viz., Mondrook, North Forster, and Wangat Diggings, and three Evening Public Schools, viz., Miller's Forest, Raymond Terrace, and Taree. Applications for the establishment of Provisional Schools at Burraduc, Bow Bow, and Sugarloaf Creeks were favourably entertained, and so soon as the usual conditions are complied with by the residents at each of these places operations will at once be commenced. A petition for an Evening Public School at Copeland North has lately been reported upon.

Three Public Schools were closed, viz., Campsie, Stewartfield, and Taree Evening Public, Campsie and Taree because of diminished attendance, and Stewartfield, because it was thought desirable to remove it to the Oakendale side of the Williams River, where there was already a good school in existence, and where the majority of the children reside. Dungog and Raymond Terrace Roman Catholic Denominational Schools were also closed during 1881.

The number of schools of each kind in operation at the present time is as follows:—

Public.	Provisional.	Half-time.	Denominational.	Evening Public.
55	19	8	5	2

These schools, with the exception of Seal Rocks Provisional, Miller's Forest, and Raymond Terrace Evening Public Schools were fully inspected. Seal Rocks Provisional was closed, Miller's Forest Evening Public had only been in operation for a few weeks, and Raymond Terrace Evening Public was not in operation when their respective localities were visited.

The following figures will show the enrolment and attendance of pupils:—

The enrolment of pupils for 1881 .....	4,866
The number enrolled two or more times .....	115
The number in ordinary attendance .....	2,831
The number present at inspection .....	3,015
The number of children of school age in this portion of the district, as nearly as can be ascertained .....	3,967
The number not known to be receiving school instruction .....	221
The number who have attended school for 140 or more days during the year .....	2,622
The number who have attended for less than 140 days .....	2,244
(a) Through sickness .....	225
(b) Through truancing .....	43
(c) Through removal from locality .....	528
(d) Through other causes .....	1,448
Total .....	2,244

The average attendance for each quarter of the year:—

March.	June.	September.	December.
2,875.7	2,896.9	2,817.5	2,954.8

The material condition of the fifty-five Public School buildings may be thus estimated:—

	Good.	Fair.	Tolerable.
Vested .....	27	0	17
Non-vested .....	0	0	11

A good stone building is in course of erection at Bulladelah; and new buildings at Bandon Grove, Caergurle, Chichester, Cedar Party Creek, Gresford, and Lower Wollamba River will soon be commenced. The Public School at Dungog has been considerably enlarged.

All the Vested Schools have teachers' residences, most of them attached to the schoolrooms, and in about the same state of repair as the schools themselves. Three of the Non-vested Schools have residences rented by the Department, and the teachers of the remainder live either in lodgings or with their friends, or have residences of their own.

At Larry's Flat the residents, with most praiseworthy enterprise, have built a very substantial residence for their teacher. The other Provisional Schools have no residences.

The extent of accommodation provided by existing buildings may be seen from the following tabulated form:—

	Average enrolment.	Average attendance.	Cubic space in Schoolrooms and Classrooms.	Cubic space per Child.	
				Enrolled.	Average.
I. Public Schools .....	3,734	2,181	S's 284,938 C's 17,486 302,424	80.9	138.
II. Provisional .....	521	311	60,926	116.9	195.
III. Half-time .....	103	50	21,636	210.	434.
IV. Denominational .....	386	216	31,114	80.6	144.
Total .....	4,744	2,758	416,100	87.	150.

The percentage of pupils who satisfied the standard of proficiency is as follows:—

Subjects.	Percentage rated from Fair to Good.	Percentage rated from Moderate to Tolerable.
Reading .....	57	43
Writing .....	81	19
Arithmetic .....	33	67
Grammar .....	57	43
Geography .....	65	35
Scripture Lessons .....	80	20
Object Lessons .....	80	20
Drawing .....	68	32
Music .....	89	11
Needlework .....	93	7
Drill .....	58	42

*Reading.*—There are few really good readers of easy narrative or ordinary prose in any of the schools. One cause of this failing appears to be that the teachers do not first read a portion of the lessons themselves to the class, and make the pupils thoroughly understand what they are reading about. The importance of at once comprehending the meaning of each word and line is too often forgotten in the bare attempt to teach correct enunciation and spelling of the words. Hence the monotonous drawl or the declamatory style, which is so harsh to the ear.

*Writing.*—This subject, always a favourite one among children, as they are able to see for themselves whether they are improving or not, is well taught.

*Arithmetic.*—A few pupils in each class were able to work correctly the sums which were set, but the majority were not able to do so. Explanations on the blackboard have probably not been made plain and easy enough to be generally understood.

*Grammar.*—An improvement has taken place chiefly in composition. In the Dungog Public School there are a few pupils who deserve special mention.

*Geography.*—This subject continues to be taught very fairly.

Scripture and Object Lessons are fairly taught. The prescribed subjects, drawing, singing, military drill, and needlework (where possible) now commonly form part of the school curriculum.

The moral tone of all the schools is good. Such a thing as vice of any kind or rude behaviour was not so much as mentioned to me. The punctuality of the pupils, considering the distances many of them have to walk in country districts (frequently 2 and 3 miles up and down hill), may be considered very fair.

The teachers, as a body, are much respected by the residents in their several localities for their work's sake. Only two charges of a serious nature were preferred during the year. Their arduous duties are performed to the best of their ability. There are eighty-three teachers in this portion of the Maitland District.

The principal and assistant teachers are thus classified:—

2 .....	II A.
7 .....	II B.
15 .....	III A.
14 .....	III B.
13 .....	III C.
32 .....	Not classified.

In conclusion, it may be said that last year's work was such as to afford reasonable satisfaction. Its distinguishing feature was the earnest endeavour on the part of the teachers to increase the efficiency of their schools. The prospects for next year are most encouraging.

J. LESLIE SMITH,

Taree, 7th January, 1882.

Inspector, Taree, Maitland District.

#### ANNEX M.

##### MR. DISTRICT INSPECTOR ALLPASS'S GENERAL REPORT FOR 1881.

THE Bathurst School District has two divisions, eastern and western. The latter is under the immediate supervision of Mr. Inspector Long; the schools in the eastern division are inspected by myself.

At the commencement of the year there were in operation—

Public Schools .....	123
Provisional Schools .....	16
Half-time Schools .....	4
Certified Denominational Schools (R. C.) .....	8
Evening Public Schools .....	4
	155

During the year Public Schools have been established at Boree Cabonne, near Orange; Box Ridge, near Sofala; Crown Creek, Mudgee Road; Essington, near O'Connell; Green Grove, near Toogong; Guyong West; Katoomba; Marangaroo, near Wallerawang; Milburn Creek; Minosa Dell, Campbell's River; Piper's Flat, near Wallerawang; Thommond, near Carcoar; Trelowarren, near Parkes; Towac, Canobolas; Two-mile, near Grenfell; and Walli, near Cowra.

Provisional Schools have been opened at Brisbane Valley, near Essington; Blowclear, near Parkes; Caragball, near Grenfell; Monument Hill, near Bathurst; and Swashfield, Campbell's River. The Provisional Schools at the following places have been converted into Public Schools:—Blossom Hill, near Rockley; Fitzgerald Valley, near Bathurst; Mayfield, near Oberon; and Mountain Home, near Rydal. Through a falling off in population, schools at the following places were closed during the year:—

Public: Carrawa, near Trunkey; and Coota, near Cowra.

Provisional: Murga, near Toogong.

Evening Public: Brewongle, Forbes, Lake Cudjellico, Marangulla, Parkes, Spring Side, and White Rock.

Half-time: Lowther and Off Flat.

The last two schools will, however, be re-opened; Lowther as a Provisional and Off Flat as a Public School.

The establishment of schools at the following places is contemplated:—Brownlea, near Rockley; Evans' Swamp, near Newbridge; Five Islands, near Evans' Swamp; Mount Hope, near Euabalong; Mount Tamar, near Bathurst; and Shooter's Hill, near Gingkin.

The Provisional School formerly in operation at the Wolgan, near Wallerawang, will be re-opened shortly.

Schools in operation during the year, or some portion thereof :—

Public Schools .....	142
Provisional Schools .....	18
Half-time Schools .....	4
Certified Denominational Schools (R.C.) .....	8
Evening Public Schools .....	9
	181

Ninety-nine Schools are under my personal supervision, and ninety-one of these were fully inspected.

Eight, mentioned hereunder, were not visited, for the reasons given :—

Crown Creek, Public.....	} Established late in the year, and after the Inspector's visits to the locality.
Katoomba, Public .....	
Piper's Flat, Public .....	
Palmer's Oakey, Provisional .....	Re-opened late in the year, and after the Inspector's visit to the locality.
Bathurst, Evening Public.....	No suitable opportunity.
Brevongle, Evening Public .....	Open for a short time only.
Orange, Evening Public .....	No suitable opportunity.
White Rock, Evening Public .....	Open but a short time.

In his general report upon the schools under his supervision, Mr. Inspector Long assigns reasons for the non-inspection of certain schools in the western division of the district.

It should be stated here that petitions from Eskbank, Lowther, Mayfield, and Walang, were sent to the Minister praying for the establishment of Evening Public Schools, but that, although the applications were approved and gazetted, the schools did not, owing to the absence of pupils, come into operation.

These evidences of the non-success of Evening Public Schools may partially be explained by stating that there is a general disinclination in rural districts to pay the authorized fee (1s. per week); that there is in most places a want of parental control to enforce the attendance of youths at such schools; and that many who would otherwise attend are too shy to expose their ignorance to their fellows.

The Evening Public School at Bathurst is the only one in this district that has been a success.

*Material condition of School Buildings.*

As reported last year, the vested school buildings are, for the greater part, in good condition. Now school-houses have been erected during the year, or they are now in course of erection, at Box Ridge, Broilgar, Hartley, Milburn Creek, Orange, Sofala, Thorp's Pinch, and Wallerawang.

The Church of England schoolrooms at Bathurst have been leased by the Department, and are now undergoing alterations which will fit them for Public School purposes.

Spacious cap and cloak rooms have been added to the several departments of the Superior Public School at Bathurst.

At Eskbank it has been found necessary to increase the accommodation for the infants by the erection of a school tent, and temporary premises are to be leased at the same place for a Girls' department. School tents have been placed at Boree Cabonne, Guyong West, Katoomba, Piper's Flat, Thommond, Towac, and Walli. Weathersheds have been provided for Blancy, Milltown, Newbridge, Peel, and Tarana. Repairs, more or less extensive, have been effected at Duramana, Oberon, Spring Grove, Spring Hill, and Wallbrook.

*Accommodation afforded in School Buildings.*

In general terms it may be stated that the school buildings in this district afford ample accommodation, and are well provided with teaching appliances. The exceptions are at Condobolin, Forbes, Goolagong, Green Grove, Hartley Vale, King's Plains, Lake Cudjellico, Mandurama Ponds, Toogong, and Wattle Flat.

Plans are in progress for new buildings, or the enlargement of the existing ones, at these places.

*School attendance.*

It has been ascertained that 14,537 children were enrolled during the year :—

Under 4 years of age .....	447
Between 4 and 6 years.....	2,474
"    6 and 12 years .....	8,466
"    12 and 14 years .....	2,176
Over 14 years of age .....	974
	14,537

Of this number, 6,235 pupils attended school 140 days and more, during the year, whilst 8,302 failed to do so through the following causes :—

Sickness .....	1,072
Truancing .....	60
Removals .....	1,842
Short enrolments and re-enrolments .....	3,657
Kept at home for unassigned reasons .....	1,671
	8,302

The enrolment and average attendance for each quarter of the year have been—

	March.	June.	September.	December.
Enrolment .....	10,291	10,440	10,549	11,296
Average attendance .....	7,005·4	6,683·3	7,345·8	7,498·3

Reports furnished by the teachers show that 10,183 children between the ages of 6 and 14 years can, through proximity to the schools, be reasonably expected to attend, but that 713 of this number are at no school, and are believed to be growing up without a proper education.

In the eastern division of the district, out of the number previously stated, there are 5,878 children of the statute ages living within two miles of school, 207 of whom do not attend. This number would undoubtedly have been larger but for the efforts of the School Attendance Officers.

The

The compulsory provisions of the Public Instruction Act were applied on the 1st July last to the eastern portion of the Bathurst District, and five school districts (31, 32, 33, 34, and 35) were proclaimed.

The officers charged with the visitation of these districts are in no way under my control, but they deserve to be mentioned by me as having shown zeal and tact in the performance of their duties. Up to the present time their efforts to bring neglected children under proper instruction have been more of a persuasive than a coercive character.

The following will show to what extent improvements have been effected in the attendance of schools lying within the proclaimed portions of the district :—

*Enrolment.*

March Quarter.	June Quarter.	September Quarter.	December Quarter.
6,590	6,526	6,782	7,094
Average enrolment for the six months prior to the introduction of compulsion.....			6,558
Average enrolment for the six months, 1st July to 31st December .....			6,938

*Average attendance.*

March Quarter.	June Quarter.	September Quarter.	December Quarter.
4,511.3	4,133	4,692.8	4,741
Average from January 1st to 30th June .....			4,322.3
Average from 1st July to 31st December.....			4,716.9

As the result of a special poll throughout the district, taken on 13th December, it was found that 7,686 pupils were at school. The ordinary attendance for the year was 7,627.

*School Discipline.*

With a few exceptions, in the schools inspected, the pupils were found under effective control, and the moral aspect of the schools was healthy. Drill, however, is not taught in seventy schools, and but indifferently so in twenty-one. In these schools the movements are, as a rule, loosely and noisily performed.

It must be stated, however, that most of these schools are conducted by untrained teachers, who have had little or no opportunity of acquiring the necessary instruction in drill.

*Instruction.*

The inspections made were unannounced, and, in many cases, were quite unexpected by the teachers. Such a mode of visitation affords good opportunities for seeing schools in their normal condition. With a few exceptions, I found that the teachers had faithfully and systematically performed their duties. As regards general efficiency, however, *seventy-eight* out of *one hundred and fifty-eight* schools inspected failed to satisfy the standard of Fair.

The subjects of instruction that showed to least advantage were Dictation, Arithmetic, Grammar, Geography, and Drill. Referring to Arithmetic alone, it is difficult to understand why in so important a subject such low results should be so frequently obtained.

The time-tables in use show that sufficient time is devoted to the study and practice of Arithmetic, and yet questions, however simple, but involving the application of a principle, are seldom successfully answered by the pupils.

The total number of children examined was 7,351. The following table presents a view of the percentage of pupils examined who exceeded, met, and fell below a standard of Fair, in each subject of instruction :—

Subject.	Number examined.	Percentage exceeding a Standard of Fair.	Percentage satisfying a Standard of Fair.	Percentage below such Standard.
Reading—				
Alphabet .....	603	10.4	27.6	62.
Monosyllables .....	2,746	23.	55.8	21.2
Easy Narrative .....	2,127	15.2	57.8	27.
Ordinary Prose .....	1,623	27.9	60.2	11.9
Writing—				
On Slates .....	3,620	31.4	53.	15.6
On Paper .....	3,731	41.7	41.9	16.4
Dictation .....	5,177	17.	43.2	39.8
Arithmetic—				
Simple Rules .....	4,497	12.6	46.6	40.8
Compound Rules .....	1,285	7.4	41.	51.7
Higher Rules .....	347	15.	44.4	40.6
Grammar—				
Elementary .....	2,186	14.5	48.5	37.
Advanced .....	1,653	26.1	39.7	34.2
Geography—				
Elementary .....	2,443	27.1	26.9	46.
Advanced .....	1,629	34.	35.5	30.5
Scripture Lessons .....	1,545	25.8	49.	25.2
Object Lessons .....	7,334	24.	43.5	32.5
Drawing .....	3,272	11.2	53.8	35.
Vocal Music .....	5,187	40.	36.8	23.2
Euclid .....	114	23.	42.1	34.9
Algebra .....	86	30.	40.	30.
Mensuration .....	26	61.5	38.5	.....
Elementary Latin .....	60	43.3	56.7	.....
Needlework .....	1,855	30.	53.5	16.5
Drill .....	2,478	28.	39.4	32.6

As regards general efficiency in respect to organization, discipline, and class proficiency, the inspected schools rank thus :—

Schools.	Below Standard.	Up to Standard (Fair).	Above such Standard.
Public .....	63	48	20
Provisional .....	11	4	...
Half-time .....	3	1	...
Roman Catholic .....	1	6	1
All schools.....	78	59	21

The foregoing may be stated in another way :—

1. Schools having two classes.

(a) Below standard of fair.

*Public Schools.*—Blossom Hill, Box Ridge, Canimbla, Cave Creek, Emu Valley, Essington, Fitzgerald Valley, Gosling Creek, Marangaroo, Mayfield, Mimosa Dell, Tamers' Mount, Thonmond, and Wyagdon.

*Provisional Schools.*—Bindogundra, Blowclear, Brisbane Valley, Monument Hill, Sister's Rocks, Mount Strombli, and Off Flat Half-time school.

(b) Up to Standard requirements.

*Public Schools.*—Carawa, Green Grove, Mountain Home, Mutton's Falls, Upper Turon, and White Rock.

*Provisional Schools.*—Cullen Bullen, Kingstown, Swallow's Nest, and Gaubenang Half-time school.

2. Schools in which the highest class is a Third.

(a) Below Standard of Fair.

*Public Schools.*—Binni, Borenore, Bowan, Brewongle, Brolgar, Bumbury, Cadia, Canowindra, Condobolin, Coffey Hill, Duramana, Eglinton, Eugowra, Forest, Fish River Creek, Goolagong, Grantham, Guyong West, Hobby's Yards, King's Plains, Lagoons, Lake Cudgellico, Lewis' Ponds, Lucknow, Malmsbury, Mandurama, Marangulla, March, Mount Macquarie, Mount Victoria, Nangar, Newbridge, Nyrang, Oberon, O'Connell, Peel, Raglan, Rockley, Shaw, Sofala, Spring Side, Thorp's Pinch, Trelowarren, Wallbrook, Wallerawang, and Weddin.

*Provisional Schools.*—Dark Corner, Duckmaloi, Mulyan, and Norton.

*Half-time Schools.*—Cox's River and Lowther.

*Certified Denominational.*—Sofala (R.C.)

(b) Up to standard requirements.

*Public Schools.*—Beneree, Ben Bullen, Blaney, Burkeville, Bowenfels, Caloola, Carawa, Cargo, Carrawabbity, Esk Bank (infants'), Evan's Plains, Glanmire, Glenburn, Goobang, Grehamstown, Guyong, Hartley, Kelso, Kirkconnell, Lunekilas, Mandurama Ponds, Meadow Flat, Meranburn, Moorialda, Mount Lawson, Orange (infants'), Spring Grove, Spring Hill, Spring Mount, Rydal, Toogong, Triangle Flat, Trunkey, and Vittoria.

*Provisional School.*—Slippery Creek.

*Half-time School.*—Ganbenang.

*Certified Denominational Schools.*—Grenfell (R.C.), Orange (R.C., girls'), Orange R.C. (infants').

(c) In requirements, above the standard of fair.

*Public Schools.*—Bathurst (infants'), Brown's Creek, Budgerrabong, Cudal, Forbes (infants'), Grenfell (infants'), Haverton Hill, Mitchell's Creek, Mitten's Creek, Parkesborough, Perth, Tarana, and Wangoola.

*Certified Denominational Schools.*—Bathurst R.C. (infants').

3. Schools in which the highest class is a Fourth.

(a) Below standard of fair.

*Public School.*—Cowra.

(b) Up to such standard.

*Public Schools.*—Cow Flat, Coorwull, Esk Bank (primary), Hartley Vale, Orange (superior, boys'), Orange (superior, girls'), and Wattle Flat.

*Certified Denominational Schools.*—Bathurst (R.C., boys'), Bathurst (R.C., girls'), and Orange (R.C., boys').

(c) Above the standard requirements of fair.

*Public Schools.*—Bathurst (superior, girls'), Forbes (primary), Grenfell (primary), Milltown, and Parkes.

4. Schools in which the highest class is a Fifth.

(a) Above the requirements of a standard of fair.

*Public School.*—Bathurst (superior, boys').

TEACHERS AND PUPIL-TEACHERS.

183 teachers, 15 assistant, and 43 pupil-teachers are employed in the schools of the Bathurst District. Of these, 69 teachers and 6 assistants have to obtain higher classification by examination to qualify them for the retention of their appointments. Most of them were recently examined, but the results are not known.

Of the majority of the teachers, I am in a position to state that they are hardworking and trustworthy, and what is of more importance, most of them are good exemplars to the people of the localities in which they are placed.

The pupil-teachers are employed in 26 schools. These young persons are doing good work, and they give great promise of future usefulness. The teachers and pupil-teachers are classified as follows :—

<i>Teachers and Assistants :—</i>		
First Class, Section A.....		None.
B.....		None.
Second Class, Section A.....		10
B.....		26
Third Class, Section A.....		36
B.....		34
C.....		26
Probationers .....		53
<i>Pupil-Teachers :—</i>		
First Class .....		8
Second Class .....		7
Third Class.....		5
Fourth Class .....		23

*Concluding*

*Concluding remarks.*

Important improvements have, during the year, been made in many of the school-houses. Other buildings, and enlargements of existing school-houses, are in progress, or they are under consideration. The schools for the most part are effectively organized, very fairly disciplined, and on the whole, fairly taught.

In the proclaimed portion of the district, the enrolment and average attendance of pupils have sensibly improved. In the western part, where compulsion is not in force, whilst the enrolment for the latter half of the year is 160 higher than during the first half, the average attendance has fallen from 3,024 to 2,702. Evening Public Schools have not proved very successful, but in other respects primary education has in this district made satisfactory progress.

Mr. Inspector Long's report, which is attached, deals with the schools under his immediate supervision.

11th January, 1882.

J. W. ALLPASS,

District Inspector, Bathurst.

## ANNEX N.

## MR. INSPECTOR LONG'S REPORT FOR THE YEAR 1881.

I HAVE the honor to submit the following report for the year 1881, on the western portion of the Bathurst School District. The schools herein referred to are, it may be stated, scattered over an area whose extent is approximately estimated at 15,000 square miles.

Since the end of 1880, 9 Public and 2 Provisional Schools have been opened, and 1 Public and 3 Provisional Schools have been closed.

The number of schools actually in operation at the end of 1881 was 73, comprising 1 Denominational, 5 Provisional, and 67 Public Schools. This number will be considerably augmented during the current year, as 8 new schools are in course of establishment, and 6 others are projected.

67 of the above schools, and 4 in the eastern part of the district, were fully inspected by me during the year, and one was, under special instructions, re-inspected. Many schools were incidentally visited on one or more occasions, and several underwent ordinary inspection. The following schools were not inspected:—

Public Schools:—Coota, Boree Cabonne, Towac, Walli, Trajere, Yarra, Glenlogan, Milburn Creek.

Provisional Schools:—Murga, Caragaball.

The non-inspection of these schools is accounted for as follows: Coota and Murga were closed early in the year, Trajere and Yarra were not in operation at the time of my visiting their respective localities, and the others are newly established schools which came into operation late in the year.

The number of children of school age, *i.e.*, between 6 and 14 years, in the area under my supervision, is as nearly as can be ascertained, 4,458, and of these 506 are not known to be receiving any instruction whatever. The number present in the schools on the 13th ultimo was 2,583; the enrolment for the year was 5,306, and of these 381 were enrolled twice or more times. The ordinary attendance was 2,989, and the average for the year 2,610·2.

The following statement shows the average attendance for each quarter of the year:—

March quarter .....	2,494·1
June quarter .....	2,550·0
September quarter.....	2,650·0
December quarter.....	2,756·9

The number of children present at the inspections held in the western portion of the District was 2,686. These results are small compared with the enrolment, and point to the extremely irregular attendance which is found to obtain in rural localities, where the services of children are largely employed in pastoral, agricultural, and mining operations. This irregularity in the attendance of the pupils, perhaps the most formidable obstacle with which those engaged in primary education have to contend, is in most cases traceable solely to the indifference of parents, or their unwillingness to forego the trifling amount of gain produced by their children's labour. The extent to which the teacher's efforts must be affected by this cause may be inferred from the fact that of the 5,306 children enrolled only 2,317, or less than one-half, attended school 140 or more days during the year. Of the remainder who did not complete the prescribed number of attendances, 464 failed to do so from sickness, 12 from wilfully absenting themselves, 676 through change of residence, and 1,837 from other causes, of which "required to work" is the one assigned in the large majority of cases.

The material condition of all vested Public Schools is satisfactory, except that in seven instances the school space is insufficient. These seven have an enrolment of 628, and an average attendance of 390, but the schoolroom space is sufficient for only 347. For four of these schools the erection of suitable buildings has been sanctioned; and with respect to the others, steps have been initiated for the supply of what is required. In some instances temporary relief has been afforded by rendering weather-sheds available as class-rooms or by the provision of tents. The accommodation afforded by the remaining 60 Public Schools is equal to present requirements, for while their aggregate enrolment is but 3,343, they contain sufficient space for 3,575 pupils. In the case of Provisional and Non-vested Public Schools, however, the accommodation is in but few instances more than tolerably up to bare requirements. The promoters, having secured the establishment of their school, lapse into indifference as to its future success. They neglect to effect the repairs which are from time to time necessary, and so fail to fulfil the conditions on which Government aid was granted. On their duty being pointed out to them they become importunate for the conversion of the school into a Public one, and to this end spasmodic efforts are made to raise the attendance to the requisite standard. This being effected, and the desired conversion secured, the attendance falls off; the teacher is paid at Provisional rates, but the school remains Public in name, and the promoters are relieved of their just responsibility as to its material condition.

In all schools excepting three in which pupil-teachers are required, the staff is such as is allowed by the regulations. As a body the teachers are competent, energetic, and conscientious in the discharge of their duties, and are respected in their several spheres of labour. In the case of some few, however, the proper and pleasing interest in their pupils' advancement, generally observed among teachers, is wanting, and there is manifest an indolent apathetic indifference, which is accompanied by its natural results. The pupil-teachers who are employed in schools under my supervision are without exception acquitting themselves satisfactorily in their several positions; they have received most favourable reports from the teachers under whom they serve, and give fair promise of future usefulness.

The discipline is on the whole suitable and effective, the demeanour and appearance of pupils are with few exceptions satisfactory, and the prevailing tone is healthy and pleasing.

With very few exceptions all the prescribed subjects are taught in all schools under the charge of trained teachers. From this statement, however, drill must be excluded, for in only thirty-one of the schools visited is efficient instruction in this subject given. Suitable steps for the remedy of this defect have been taken.

Of the schools examined only 45 per cent. exceeded or satisfied standard requirements, the remainder being found to be below. The percentage of pupils who gained the mark fair, or a higher one, in the different subjects of instruction is also undesirably small. These unsatisfactory results are not, however, to be accepted as indicating that the teaching generally is of a lower than average quality. They are to be attributed chiefly to the very irregular attendance before referred to, and to some

some extent to antagonistic home influences. Where a fairly regular attendance is secured, the attainments are uniformly found to be of fairly satisfactory merit. In some cases it must be acknowledged with regret that low efficiency is directly traceable to culpable indolence and neglect, while in others it arises from misdirected zeal, which perhaps produces a few instances of phenomenal precocity, but results in failure so far as average excellence is concerned. The percentages of pupils who attained to the different degrees of proficiency in the various subjects are, as before stated, included in the District Inspector's general report.

In nearly all schools the instruction given in school hours is supplemented by a system of home lessons, set to be worked in the evenings. The good effects of this are as a rule plainly discernible. It is, however, observed with regret that some earnest, hard-working teachers, from want of tact in adapting these lessons as regards kind and quantity to the ability of the pupil, cause what should be a most valuable auxiliary to be productive of evil rather than good. Tasks sufficient to occupy two or more hours, are set, irrespective of age and capacity, to children who have perhaps to walk a considerable distance daily, and are required to assist in farm and household work before and after school. Urged on by fear of the teacher's displeasure, and by the promptings of parents, who suppose that anything enjoined by a teacher must be right, the child sets about the evening task when indisposed, by very weariness, to exertion of any kind, and often under circumstances which render neatness and accuracy difficult in the extreme. The effect is to engender a distaste for mental effort, which most prejudicially affects the child's intellectual advancement. Most teachers exercise a wise discretion in this matter, but it would, I think, be well that in country schools at any rate no child under eleven years of age should be required to perform any evening tasks, and that in no case should an evening lesson be set which would demand more than one hour's application from a child of ordinary capacity.

Five Evening Public Schools have been in operation during some part of the past year, but all are now temporarily closed. It would appear that the attendance necessary to keep such schools in existence can only be maintained in rural localities during that period of the year in which there is little to be done in connection with farming. The establishment of such schools should therefore I think be accompanied by a proviso that they may be closed during the seasons in which the scholars' avocations render it improbable that a sufficient number will attend.

When the schools now in contemplation have been brought into operation, all places in the district which can comply with the provisions of the Act will be provided with means of education. At various points, however, in the vast and sparsely populated Lachlan and Bogan Districts, outlying families are to be met with, who cannot be brought under the operation of any part of the authorized educational scheme. These cases must always exist while the present mode of settlement obtains, and it does not appear that any feasible plan can be devised to meet them. In many instances these isolated groups will doubtless develop into centres of population, and it is to be expected that the cases will diminish in number which at present lie even beyond the reach of the liberal provision made for primary education in New South Wales.

The percentage of pupils who attained to the various degrees of proficiency in the various subjects of instruction, the classification by examination of the teachers in charge of schools under my supervision, and all statistics given herein, are included in the District Inspector's General Report.

GEORGE ED. LONG.

Sydney, 30th January, 1882.

#### ANNEX O.

##### MR. DISTRICT INSPECTOR BRADLEY'S GENERAL REPORT FOR 1881.

###### I.—SCHOOLS AND SCHOOL ESTABLISHMENT.

At the close of the year 1880 there were in operation under my general supervision 184 schools, viz. :—133 Public, 38 Provisional, 4 Half-time, 6 Denominational, and 3 Evening Schools. During the year 1881, 45 new schools have been opened, viz. :—25 Public, 7 Provisional, 4 Half-time, and 9 Evening Schools; and 2 Public, 3 Provisional, 2 Half-time, 1 Denominational, and 9 Evening Schools have been closed; so that the list of schools working at the end of 1881 comprises—

156 Public Schools.  
42 Provisional Schools.  
6 Half-time Schools.  
5 Denominational Schools.  
3 Evening Schools.

Total ... 212

Besides the 45 new schools brought into operation during the year, the establishment of 50 others (30 Public and 20 Provisional) has been approved by the Minister, and steps are being taken to supply the requisite buildings. The localities concerned are—

*For Public Schools* :—Argent's Hill, Bellenger South, Big Ridge, Buckendoon, Byangum, Castle Doyle, Castle Mountain, Currabubula, Dungarubba, Eden Valley, Eulah, Ferndale, Gowrie, Gum Flat, Hall's Creek, Leech's Gully, Meermaul, Molley, Mount Russell, Nullamana, Pelican Island, Rushford, Swan Bay, Tamworth West, Tangley, Ulmarra Lower, Werris Creek, Wilson's Downfall, Woolomal, and Yarrahappini.

*For Provisional Schools* :—Acacia Creek, Black Springs, Brookdale, Bundella, Clevedon, Collerinderbri, Goolmangar, Gulligal, Harparary, Millie, Mullally, Pallamallawa, Pinch Flat, Reedy Creek, Swan Vale, Tooloom, Wangan Creek, Whiteman's Creek, Wollan, and Yetman.

With the establishment of these schools provision will be made for the education of some 1,800 children, nearly all of whom are at present beyond the reach of existing schools.

Formal applications have also been received for the establishment of 10 Public, 2 Provisional, 1 Half-time, and 2 Evening Schools; but the necessary inquiries have yet to be made. The several localities are :—

*Public* :—Belmore River (Upper), Brookstead, Darkwater Creek, Lagoon Reserve (Waterloo Run), Mattier's Creek, Misty Mount, Nambucca (Upper), Orundumbi, Pilliga, and Y Water-holes.

*Provisional* :—Gundurimba East, Hickey's Creek.

*Half-time* :—Yarraman.

*Evening Public* :—Camden Haven and Uralla.

Eleven applications for the establishment of schools have been declined; in six cases on the ground of insufficient attendance, and in five because the requirements of the several localities were already provided for by existing schools. At Pialamore and Tuckombil, however, where Public Schools were applied for, Provisional Schools have been promised on the usual terms.

###### II.—ATTENDANCE.

The total number of children enrolled during the year 1881 was 15,699; but from this number a deduction must be made of 570 for pupils enrolled two or more times; the actual enrolment will thus be 15,129. Of these, 12,934, or 85 per cent., are children of the prescribed school age (6 to 14 years); the ages of the remainder lie chiefly between 4 and 6 years. From returns furnished by teachers, the attendance under ordinarily favourable circumstances may be estimated at 10,160. This number is, of course, in excess of the actual average attendance, in calculating which every day's attendance, no matter how small, is included, and where attendance only in the forenoon or afternoon counts but as a half.

The

The average attendance for the several quarters of 1881 was as follows:—March quarter, 8,708·8; June quarter, 8,499·6; September quarter, 8,920·6; December quarter, 9,233·1. For the whole year it was 8,840·5.

Comparing the statistics of 1880 with those of 1881, it is found that an increase of 1,063 in the gross enrolment has taken place, and of 1,173·4 in the average attendance—results that must be considered very fairly satisfactory, as, at any rate, indicating a material extension of the means of education in this part of the Colony. It is less pleasing to note that out of the 15,699 pupils enrolled during the year, only 7,490 (not quite 48 per cent.) attended school during the 140 days prescribed by the Act, while 8,209 (52 per cent.) did not so attend. Of these, 948 were irregular through sickness, 55 were truants, 1,814 did not complete the prescribed attendance on account of removal, and 5,392 failed from other causes. In this latter number, however, are included somewhere about 600 children belonging to schools that were opened towards the end of the year, and in which the absolute statutory attendance of 140 days was impossible. As a rule, in newly-opened schools the rate of regularity is above the average; and I believe that, of the 600 children referred to, 400 attended at the rate of 140 days in the year. Making this allowance, the number of pupils completing the statutory attendance would be approximately 7,890, and the number failing to do so 7,809. Thus it is probable that about 50 per cent. of the total number enrolled met the requirements of the Act as regards attendance, and 50 per cent. did not.

Up to the present no Public School Districts have been proclaimed in the portion of the Colony under my inspectoral supervision, nor have any attendance officers been appointed. The urgent necessity for action in this matter is apparent from the foregoing data, and, further, in view of the fact that there are reported to be 1,169 children living mostly within reasonable distance of schools already established, but who are neither in attendance threant, nor receiving instructions at home.

### III.—MATERIAL CONDITION AND ORGANIZATION.

During the year nine Public Schools have received enlargement or repairs, the more important of which are Cowper, Grafton, Narrabri, and Vegetable Creek. Reports upon all other cases in which repairs or additional accommodation are needed have been made, and steps are in progress towards effecting the necessary improvements.

The gross superficial area of floor-space provided in the schools of the district is about 92,000 square feet. As the ordinary attendance of pupils is 10,160, this will allow on an average a little more than 9 square feet for each child; while the regulation limit is 8 square feet. Estimated by the gross enrolment of pupils the space per child available is nearly 6 square feet. In the majority of cases, as may be inferred from perusal of these data, the sitting accommodation provided is fairly adequate to present requirements. In a few instances, however, including some of the larger schools, it is far from sufficient; but there is reason to expect that the defects will be remedied during the ensuing year.

Generally speaking, the condition of the school buildings leaves little room for complaint; and with very few exceptions, arising mainly from unexpected accession to the attendance, the supply of furniture, apparatus, and books, is fully adequate to the efficient working of the schools.

### IV.—INSPECTION.

Omitting Evening Public Schools, there have been in operation during the whole, or for a portion, of 1881 in all 214 schools; and, of this number, 197 schools and 9,327 children have received full inspection and examination. Of the seventeen schools that were not inspected, four outlying ones could not be reached for want of time; and the remaining thirteen were either brought into operation after the Inspector's visit, or were temporarily closed at the time it was made.

From statistics carefully compiled it appears that of the 197 schools inspected 98 satisfied or exceeded the standard requirements, and 99 failed to meet them—about 50 per cent. in each category. These results are but slightly better than those of last year, and in the abstract are by no means satisfactory. It should be mentioned however, as in some degree accounting for the comparatively low proficiency exhibited, that, prior to the month of June last, the schools in the coast division of this district had been for a long period practically without inspectoral supervision; and there can be no doubt that serious retrogression has been the result. The average proficiency has also been brought down by the low standard reached in the many schools recently established, and most of which were, of necessity, inspected but a short time after they were brought into operation.

The following table exhibits (1) the subjects of examination, (2) the number of pupils examined in each subject, (3) the percentage of pupils satisfying or exceeding the requirements of the standard, and (4) the percentage that failed to reach the standard:—

Subjects.	Number examined.	Percentage up to or above Standard.	Percentage below Standard.
Reading .....	9,213	63 %	37 %
Writing .....	9,188	72	28
Arithmetic .....	8,470	49	51
Grammar .....	4,065	48	52
Geography .....	4,074	39	61
Scripture .....	1,413	58	42
Drawing .....	3,916	47	53
Music .....	4,405	64	36
Euclid .....	113	73	27
Algebra .....	53	34	66
Mensuration .....	56	63	37
Needlework .....	3,349	70	30
Drill .....	2,687	51	49

### V.—TEACHERS.

During the year there were employed in the various schools of the district 207 principal teachers, 16 assistant teachers, and 39 pupil-teachers. Their classification by examination is shown in the following tables:—

Status.	Class I.		Class II.		Class III.			Not Classified.	Totals.
	Sec. A.	Sec. B.	Sec. A.	Sec. B.	Sec. A.	Sec. B.	Sec. C.		
Principal Teachers .....	...	...	9	24	36	39	24	75	207
Assistant Teachers .....	...	...	1	3	3	5	4	...	16

	Class I.	Class II.	Class III.	Class IV, and Probationers.	Totals.
Pupil Teachers .....	2	6	11	20	39

In the absence of definite information from the Inspectors on the subject, I am unable to state accurately how many teachers have undergone examination during the past year. The ordeal, in the case of all who were in charge of schools above the meed of their qualifications, has been compulsory under the regulations; and a fair percentage besides attended voluntarily. Altogether the number examined has been larger than in any previous year.

With but a few exceptions the teachers have conducted themselves in a manner befitting their position, and the character for industry formally bestowed on them is well sustained. The pupil-teachers have been well reported on by their principals both for conduct and efficiency, and as a body they give good promise of future usefulness in the service of the Department.

#### VI.—EVENING PUBLIC SCHOOLS.

Before closing this report some remarks are due relative to the Evening Schools of the district. Since the commencement of the Act 12 have been established; of these 9 have lapsed through the poor support accorded, and the 3 others are in a moribund condition. It is thus evident that the working of this class of school has proved anything but a success; and so many obstacles to their effective operations exist, that it is difficult to suggest any practical remedies. In the first place, the pupils, so far as attendance at night-school is concerned, are their own masters, and in the towns, where evening entertainments are frequent, they invariably prefer to resort to a place of amusement rather than to school. Again, nearly all the evening pupils are employed in some form of manual labour during about ten hours of the day, and this in a measure unfits them for, or at any rate indisposes them to, mental application at night. A few of the pupils—very few, however—actuated by an earnest desire for improvement, overcome the irksomeness of the task, maintain a steady attendance, and work diligently; but the majority soon find study tedious and restraint galling; attend only when in the humour, and ultimately withdraw altogether. It should be remembered, too, that the teachers of Evening Schools are men whose energies have been fully taxed in the discharge of their daily duties, and that, of necessity, they come to the task of evening teaching jaded and with but little spirit or enthusiasm. Few of them accept the position from choice, but undertake the work rather than that the school should not receive a trial. Viewing the whole aspect of the case with regard to these schools I must admit that I see little reason to hope for better results in the future than have obtained in the past.

#### VII.—SUMMARY.

Briefly summarizing the foregoing report, there is ground for satisfaction in the spread of schools and in the substantial accession to the attendance. The character of the attendance, however, is as yet far from creditable, and means for applying the penal clause of the Act should be provided as soon as possible. Existing vested school buildings, tents and rented premises for temporary purposes, very fairly provide for present wants; and measures are in progress to meet prospective requirements. All but a very few of the smaller schools in the district have received full inspection, some defective schools having been twice examined; and although the proficiency of the pupils as a whole cannot be regarded as satisfactory, the blame does not lie altogether with the teachers, and there is hope of speedy and material amendment. The working of the Evening Public Schools has, up to the present, proved very discouraging, and must be regarded as but little short of absolute failure.

Reports from Inspectors Thompson and Willis are appended.

J. D. BRADLEY,  
District Inspector, Armidale.

#### ANNEX P.

##### MR. INSPECTOR THOMPSON'S GENERAL REPORT FOR 1881.

I HAVE the honor to submit my general report upon the Schools inspected, and the official duties transacted, in that portion of the Armidale District placed under my supervision at the beginning of the year 1881.

The portion of the district assigned to me embraced the Western Plains and the Hastings River Basin. Owing, however, to the extra demand upon my time for special duties of an urgent character (involving long and devious journeys, and thereby precluding the fulfilment of a continuous and systematic course of inspection), I was unable to visit the schools in the Hastings River Basin. These schools were subsequently transferred to another Inspector towards the end of the year.

*Organization.*—The material organization of the majority of Public Schools inspected by me may be regarded as satisfactory. That of schools of other classes as tolerable.

*Discipline.*—This, as a whole, is very fair, the government being administered with firmness and tact, and without undue severity.

*Instruction.*—Taking the award "fair" as the standard of proficiency, of the 69 schools examined 32 are below standard, and the remaining 37 are either equal to or above standard. Comparison with the proficiency attained by the schools under my supervision last year cannot, however, be justly made, as the present estimate is calculated upon a different basis to that of last year, owing to additional schools, namely, those in the Hastings River Basin, having been included. Moreover, according to the estimates furnished by the officer to whom the inspection of the Hastings River schools was ultimately assigned, these schools, with one exception, appear to be below standard, a feature which depreciates the average proficiency that otherwise would have been obtained. Relative to the schools on the Western Plains, inspected by me during this and previous years, the progress shown has been reasonably satisfactory, and the effort made by the teachers to maintain the proficiency of their pupils to the standard required has been very fairly successful.

The following details will serve to illustrate the educational status of that portion of the district assigned to me at the beginning of the year:—

1. The number of schools under my supervision at the commencement of the year:—Public Schools, 57; Provisional Schools, 15; Half-time Schools, 2; Denominational School, 1.

2. The number of schools opened since the commencement of the year:—Public, 4; Provisional, 3.

3. The number of schools closed during the year:—Public, 1; Provisional, 2. Of these schools one Public and one Provisional were closed on account of insufficient average attendance, and one Provisional on account of non-fulfilment of the provisions on which the school was sanctioned.

4. The number of schools in operation at the end of 1881:—Public, 67; Provisional, 5; Half-time, 2; Denominational, 1.

5. The number of schools fully inspected:—Public, 55; Provisional, 11; Half-time, 2; Denominational, 1.

Of the Provisional Schools inspected some have been converted into Public Schools since date of inspection.

6. The number of schools not fully inspected, and why :—Public, 2; Provisional, 4. The inspection of these schools was omitted for the following reasons :—

One Public and one Provisional, on account of inability to visit owing to pressure of special work in other parts of the district.

One Public, on account of temporary closing incident on change of teacher.

Two Provisional, closed previous to any visit to the locality.

One Provisional opened late in the year, subsequent to official visit in the neighbourhood.

7. The number of children present at inspection, 3,119.

8. The number of children enrolled for the year, 4,378.

9. The number of children enrolled two or more times during the year (approximate estimate), 156.

10. The number of pupils in ordinary attendance, 3,250.

11. The average attendance for each quarter in the year :—

Schools.	First Quarter.	Second Quarter.	Third Quarter.	Fourth Quarter.
Public .....	50.4	46.6	45.6	34.8
Provisional .....	20.3	20.0	14.7	17.1
Half-time .....	17.4	16.6	16.5	16.5
Denominational .....	183.8	121.9	118.6	124.0

The conversion of certain Provisional Schools, having small average attendance, into Public Schools, has caused a diminution in the average attendance in the Public Schools during the third and fourth quarters.

12. The number of children between six and fourteen years of age in the school district, as nearly as can be ascertained, 3,781.

13. The number of children not known to be receiving school instruction (approximate estimate), 344.

14. The number of children who have attended 140 or more days during the year, 2,447.

15. The number of children who have attended less than 140 days during the year :—

(a) Through sickness .....	384
(b) Through truanting .....	12
(c) Through removal from locality .....	513
(d) Through other causes .....	1,022

Total .....

1,931

16. The number of schools established during the year, 7.

17. The number of schools in course of establishment, 18.

18. The number of schools projected, 10.

19. The number of schools enlarged or repaired :—1 Public School in course of enlargement, 2 schools repaired.

20. Extent of accommodation provided by existing buildings :—The accommodation provided is, with few exceptions, sufficient for the requirements. The average accommodation provided ranges between 7 and 8 square feet of space per child.

21. The steps taken to provide for any deficiency :—Whenever the accommodation provided has been found inadequate for the requirements of any locality the matter has been duly represented, and the necessary recommendation has been made.

22. The number of schools below, equal to, or above standard :—

Schools.	Below Standard.	Equal to Standard.	Above Standard.
Public .....	21	19	15
Provisional .....	8	3	...
Half-time .....	2	...	...
Denominational .....	1	...	...
All Schools .....	32	22	15

23. The per centage of pupils who have satisfied the standard in each subject of instruction :—

Reading .....	66 per cent.
Writing .....	67 "
Arithmetic .....	54 "
Grammar .....	55 "
Geography .....	44 "
Scripture .....	71 "
Object Lesson .....	45 "
Drawing .....	45 "
Music .....	74 "
Geometry .....	74 "
Algebra .....	70 "
Mensuration .....	75 "
Latin .....	50 "
Drill .....	46 "
Needlework .....	90 "

The above table of per centage shows proficiency in the several subjects as follows :—Reading and Writing, fair to very fair; Arithmetic and Grammar, tolerable to fair; Geography, Object Lesson, Drawing, and Drill, moderate to tolerable; Scripture, very fair +; Music and Geometry, very fair to good (nearly); Algebra, very fair; Mensuration, very fair to good; Latin, tolerable; Needlework, very good.

24. The classification by examination of teachers in charge of schools under my supervision :—

I A.	I B.	II A.	II B.	III A.	III B.	III C.	Total number of classified Teachers.
None.	None.	4	12	11	15	6	48

25. The progress made in primary education during the year :—With respect to the dissemination of primary education during the year, steady advancement has been made throughout that portion of the district under my supervision, more particularly in the Western Plains, and applications for the establishment of new schools have been frequent. In the course of the year seven new schools were established, and steps have been taken towards the organization of an additional eighteen. Thus it may be computed that the demand for primary education has been met by the establishment of 25 additional schools. There are, however, several instances of families which by their isolated situation are precluded from the advantages of primary education. In such cases the distances to be travelled over are too great to allow of the services of an itinerant teacher being engaged, and on this account the establishment of Half-time or even of Third-time schools cannot, as elsewhere, be readily effected.

The following applications for the establishment of new schools have been attended to, and reported upon :—

Public Schools : M'Donald River, Surveyors' Creek, Stannifer, Mount Pleasant, Gowrie, Pilliga, Peel River, Tamworth West, Collerinderbri, Nullamanna, Swanvale.

Provisional Schools : Yetman, Mullaly, Gulligal.

Half-time Schools : Gragin and Gullengatta, Yarraman proposed Half-time, with Blackville, late Public School.

Evening Public Schools : Rob Roy, Bundarra, Narrabri, Tamworth, Gunnedah.

*Evening Public Schools.*

From present experience in this portion of the district Evening Public Schools have been far from a success. In the course of the year four Evening Public Schools have been in operation, namely, at Rob Roy, Bundarra, Narrabri, and Tamworth. Three of these schools have been closed owing to lax and insufficient attendance, a defect in no case due to the fault of the respective teachers, but solely to indifference and irregularity on the part of those who have undertaken to attend.

The Evening Public School at Tamworth has but recently been established, but, taking into consideration the promises given of support, and the population of the town, the average attendance is so small that this school may be regarded as a failure.

At Gunnedah the school lately sanctioned has not yet been organized.

The following appear to be among the causes which tend to the non-success of schools of this class :—

1. Physical fatigue, consequent upon heavy manual labour during the day, detracts from the power of mental application in the evening, superinduces disinclination for study, and subsequent indifference so soon as the novelty of the idea has worn off.

2. Many seek education in schools of this class solely for the advantages they may derive from instruction in reading, writing, and arithmetic, regarding instruction in grammar and geography as superfluous and profitless.

3. Not a few, who at the outset are enrolled, have already, and comparatively recently, received primary education in some day school, and possibly have attained very fair proficiency in the prescribed subjects of instruction. To such pupils the old routine soon becomes irksome, and they, therefore, cease to attend.

It is somewhat difficult to furnish practical and effective suggestions with a view to overcoming these apparent obstacles to sustain attendance in Evening Public Schools.

In the first-named cause there seems to be no remedy other than that which determination and resolution, on the part of such as attend, may effect.

As regards the second cause I would suggest the consideration of the advisability of eliminating grammar, or at any rate geography, from the prescribed course of instruction in Evening Public Schools, and of substituting some more practical subject, such as elementary mechanics or dynamics.

With respect to the third cause, I would suggest the exclusion of pupils who had received prior, and possibly recent, education in day-schools, except in instances where such education may have been intermittent, or but partially complete.

The above remarks have been made with the hope that they may suggest some practical means of counteracting what appear to be some of the impediments to success in the working of Evening Public Schools.

W. FREWIN THOMPSON,  
Inspector of Schools.

ANNEX Q.

MR. INSPECTOR WILLIS' GENERAL REPORT FOR 1881.

I HAVE the honor to submit this General Report upon the schools under my supervision for seven months of the year 1881.

I took charge of this section of the Armidale District on the 27th of last May.

*Schools in this Section.*

At the close of the year ninety-seven schools were in operation, attended by an average of 4,293.9 children.

The following statement shows the number of schools of each class, and the attendance at each :—

78 Public Schools .....	attended by 6,989
12 Provisional Schools .....	„ 330
4 Half-time Schools .....	„ 91
2 Certified Denominational Schools ...	„ 329
1 Evening School .....	„ 14

The new schools established during the year are ten in number. These were opened at the following places :—

(a.) *Public*—At Tacking Point, Codrington, Dalwood, Eatonsville, Boorook, and Broadwater.

(b.) *Provisional*—At Turner's Flat, Kangaroo Creek, Rolland's Plains, and Pelican Creek; and Evening Public, at Fernmount.

Applications for Schools at the following localities have been granted by the Minister :—

(a.) *Public*—Cudgen, Corangula Mines, Yarahappini, Lower Bellinger, Argent's Hill, Rushford, Ferndale, Broadwater, Boorook, Codrington, Eatonsville, Dalwood, East Wardell, and Buckendoon.

(b.) *Provisional*—At Bexhill, Goolmangar, M'Lean's Ridge, Whiteman's Creek, Denton, Acacia Creek, and Tooloom.

It is under consideration to establish schools at the following places :—Mattier's Creek, Hickey's Creek, East Gundurimba, Upper Belmore, and Upper Nambucca.

Applications for schools at the following places have been refused :—Commandant Hill, Willi Willi, Brushgrove, and Tuckombill.

*Classification*

*Classification of Schools.*

The following table shows the number of the schools belonging to each of the different classes :—

Class	I.....	None.
"	II.....	1 Public of 2 Departments.
"	III.....	None.
"	IV.....	None.
"	V.....	4 Public.
"	VI.....	18 "
		1 Roman Catholic.
"	VII.....	19 Public.
"	VIII.....	15 "
		1 Presbyterian.
"	IX.....	17 Public.
"	X.....	2 "
	Provisional.....	12
	Half-time .....	4
	Evening Public.....	1

Of the four Public Schools belonging to the Fifth Class, one, that of Grafton South, is separated into two Departments.

From this table is to be gleaned the fact that the schools in this portion of the Armidale District mainly consist of those belonging to the lower grades.

I expect to be able to show a very considerable increase next year in the number of schools ranking above Sixth Class.

ORGANIZATION OF SCHOOLS.

1. *Material Condition.*

The school buildings are in fair condition, well found in educational appliances, and are satisfactorily kept by the teachers.

At the following places new buildings have been erected :—Tacking Point, Woodford Leigh, South Arm, Woodlawn, and Yenrabar.

Others are in course of erection at Southgate, Lower Ulmarra, Pimlico, Grafton, Ballina, North Creek, and Goonellebah.

All of these will be opened early in the first quarter of next year.

It has been decided to put up new premises at East Kempsey, Carr's Creek, Upper Coldstream, Swan Bay, Chatsworth Island, Wombah, Summer Island, Murrangang, Yarrahappini, Argent's Hill, Corangula Mines, Rushford, Lower Bellinger, Eatonsville, Ferndale, and Buckendoon.

During the year improvements to existing buildings have been effected at the following schools :—Swan Creek, Lismore, Iluka, Seven Oaks, Frederickton, Gladstone.

It is proposed to improve the following :—Bowra, Gerrymberryn, Wardell, Gundurimba, Taloumbi, Grafton Superior, Cowper, Bellinger, Valla.

2. *School Accommodation.*

The accommodation provided by the existing schools in the Grafton section is adequate for the average number of pupils attending, but not for the number enrolled, and still less for the possible enrolment. This will be shown by the following table :—

No. of Schools.	Yearly Enrolment.	Possible Enrolment.	Average Attendance for Year.	Accommodation.
97	7,753	8,600	4,293.9	48,660 square feet.

To satisfy existing requirements in the matter of school accommodation, new buildings are being erected where the need for them is most urgent, and temporary buildings and tents provided where the erection of permanent structures cannot at once be proceeded with.

*Attendance.*

From returns specially prepared by the teachers of this division it appears that the total number of children between the ages of 4 and 14 years is 8,600. Of these 6,540 are of school age. The enrolment for the year is given as 7,753; but 240 of these were entered a second time, and 50 others were entered a third time, so that the actual enrolment will be 340 less than 7,753, or 7,413.

The average attendance for the year is 4,293, while the ordinary attendance may be approximately given as 3,066.

The number who have attended 140 days during the year is 3,377; taking these figures from the actual enrolment will give the large remainder of 4,036, a number representing the proportion of the pupils enrolled who failed to complete during the year the statutory number of attendances. Of these it appears that

30	failed through truanting.
434	" sickness.
975	" removal.
2,597	" other causes.

When the Regulations under the compulsory clause of the Public Instruction Act are brought into operation in this district there will without doubt be a very much larger proportion of the pupils in regular attendance than there has hitherto been.

It appears from an estimate prepared by the teachers that 507 children of school age are receiving no instruction; to this number must be added about 350 children who are at present without the means of education in their neighbourhood, but for whom schools are in process of establishment.

*Inspection of Schools.*

Since the 27th of last May I have fully inspected 75 schools in this Division, viz. :—

Certified Denominational.....	2
Half-time.....	4
Provisional.....	11
Public.....	58

In addition to these I have also inspected Amosfield and Maryland Schools for the District Inspector, and specially examined the schools at Cowper, Carr's Creek, and Corangula.

Mr. Inspector McIntyre, in the northern part of this Division, also examined 12 Public Schools and 2 Provisional; so that of the 97 schools in operation during the year, 89 were fully inspected.

Of the 8 not visited, 2 were omitted for want of time, and the remaining 6 were those not open when their several neighbourhoods were visited.

The

The following tables show the number of each kind of school, and the condition of those inspected :—

*Kinds of Schools.*

	Public.	Provl.	H.-Time.	C.E.	R.C.	Pres.	Wes.	Total.
Number in operation .....	79	12	4	...	1	1	...	97
Number inspected .....	70	13	4	...	1	1	...	89
Number not inspected .....	6	2	...	...	...	...	...	8

*Condition of Schools.*

Kind.	Below Standard.	Up to Standard.	Above Standard.
Public .....	30	28	12
Provisional .....	12	1	...
Half-time .....	4	...	...
E.C. ....	...	...	...
R.C. ....	...	1	...
Pres. ....	1	...	...
Wes. ....	...	...	...
All Schools .....	47	30	12

From the latter table it will be seen that forty-seven out of eighty-nine schools fell below standard requirements. This may to some extent be due to the irregularity of the pupils, but there is no doubt that in the schools recorded as being below the standard much that was defective was the result of unskilful teaching.

The number of children examined in each subject and the per centage of those above and below the standard in each may be seen by the following statement :—

Subjects.	Pupils examined.	Up to standard.	Below standard.
Reading .....	4,275	61 per cent. ....	39 per cent.
Writing .....	4,275	66 " .....	34 " "
Dictation .....	3,112	56 " .....	44 " "
Arithmetic .....	3,548	46 " .....	54 " "
Grammar .....	1,959	40 " .....	60 " "

*Instruction.*

*Reading and Writing* are intelligently taught, and with results above fair.

*Dictation* in most schools is taught with care and a reasonable amount of success.

*Arithmetic.*—A very large per centage of the pupils examined in this subject failed to do the work expected of them.

Questions involving but a very moderate amount of thought puzzle the pupils in most of the schools.

In many schools the children compute slowly and inaccurately, and in some copying obtains in the upper classes.

Instruction in *Music* and *Drawing* is omitted by the teachers of many schools. In thirty-one schools music is not taught, and in fourteen others the pupils receive no lessons in drawing.

*Grammar* is a very weak subject in all the schools under my supervision excepting two or three.

Beyond a little mechanical parsing and elementary analysis nothing is expected from the pupils.

With but few exceptions the teachers make no attempt to give lessons in such important parts of grammar as those relating to the spelling, pronunciation, inflection, and derivation of words; and only a very small fraction of those learning grammar of an advanced kind can either name the chief rules of Syntax or compose sentences exemplifying them.

*Geography.*—This subject is unskilfully taught in a large number of schools. A knowledge of New South Wales—its physical features, towns, and chief products—should be possessed by all the children who have been enrolled a reasonable time in the third class of each school. Instead of this being the case, the majority of those examined knew very little about this country beyond the names of the rivers and ranges on the coast and a few of the more important capes and inlets. The Australian Continent, too, though marked out for special study, is made to occupy but a very small amount of the pupils' attention, and as a result of this most of those attending our schools in this corner of New South Wales know about as much of Queensland and Victoria as they do of Greenland or Soudan.

Mapping is taught in two schools only, and, in nearly all, the positions of the great commercial cities of the world are imperfectly known.

The higher subjects—*Latin*, *Euclid*, &c.—are studied by very few of the pupils attending the schools in this division, for the reason that in only five of these schools is the instruction up to the range of fourth class attainments.

*Needlework* is faithfully taught in the schools and averages fair results.

*Discipline.*

The pupils are fairly punctual. Generally they present a neat appearance and are well behaved. The government exercised in most of the schools is judicious and effective, and in nearly all the order is good.

*Teachers.*

*Teachers.*

During the year there have been in charge of schools in this Division, in the capacity either of principal or assistant, 100 teachers.

These are classified as shown in the following table :—

I A. ....	...
I B. ....	...
II A. ....	3
II B. ....	12
III A. ....	23
III B. ....	16
III C. ....	15
Unclassified .....	31

There are moreover fifteen pupil teachers.

The unclassified teachers are those in charge of the Half-time and Provisional Schools and of the smaller Public Schools.

Two examinations have been held in this Division since it has been under my supervision ; one on the 28th of June last and the other on the 19th of December.

With few exceptions the teachers eagerly embrace the opportunity thus afforded them of raising their classification. Before the end of the year 1882 I feel confident that a very large number of the teachers included in the above table will be in receipt of certificates higher than those they now hold.

The teachers and pupil teachers are for the most part attentive to their duties, energetic, and socially respectable.

*Summary.*

No report of the schools in this Division was published for the year 1880, so that I am not able to compare the results of this year's inspection with those obtained last year.

Judging from the reports entered by Mr. Inspector Huffer in the Teachers' Observation Books, I am of opinion that the efficiency of the schools this year is below that of 1880.

The prospects of the schools in this portion of the Armidale District are very encouraging.

Before the close of 1882 I shall in all probability have at least 110 schools under my supervision.

The teachers have promised to effect improvements in the organization of their schools and in the instruction imparted, and these promises will no doubt be duly performed by most of the teachers and enable me to make a favourable report for the year 1882.

M. WILLIS,  
Inspector.

Grafton, 30th January, 1882.

## ANNEX R.

## MR. DISTRICT-INSPECTOR BRIDGES' GENERAL REPORT FOR THE YEAR 1881.

The district under my supervision extends from the Blue Mountains on the east, to the Darling River on the west, and from the Turon River and the neighbourhood of Molong on the south to the Borders of Queensland on the north ; it may be said to include the north-western portion of the Colony. In the south and south-east of this vast district schools are numerous, and at short distances from each other, but in the north and west a very few schools are scattered over a large area.

From the statistical information given in this report, it will be seen that during the year much has been done towards providing for the educational wants of this remote and thinly-peopled part of the Colony.

## I.—SCHOOLS.

At the end of the year 1880 there were in operation under my supervision 110 schools, viz. :—

76 Public.
19 Provisional.
4 Half-time.
8 Denominational.
3 Evening Public Schools.

One of the Public Schools, Upper Turon, was transferred to the Bathurst district at the beginning of 1881.

During the year 42 new schools, viz., 21 Public, 16 Provisional, 2 Half-time, and 3 Evening schools were opened. These new schools are :—

*(a.) Public.*

Bayly, Bective, Beryl, Bob's Creek, Carwell, Dubbo (Infants), Eurimbla, Gilgandra, M'Donald's Creek, Medway, Millsville, Minore, Molarban, Mullion Creek, Mumbil, Nullabong, Nymagee, Stubbo, Tallawang, Willandra, Wilpinjong.

*(b.) Provisional.*

Bara Creek, Beni, Boomey, Botobolar, Campbell's Creek, Collingwood, Dabee, Grattai, Gulargambone, Hamilton's Falls, Honeysuckle Spring, Kellick, Orandelbinnia, Pyangle, Tong-Bong, Yalcagreen.

*(c.) Half-time.*

Biambil and Merrygoon.

*(d.) Evening Public.*

Cobar, Hill End, Nymagee.

Of the schools open in 1880, the Provisional Schools at Denison Town and Mitchell's Creek Mine, and the evening Public Schools at Eurunderec and Warren, have been closed.

The Provisional School at Denison Town was closed because the residents would not provide the school buildings required by the Regulations ; the other schools lapsed for want of pupils. On the 31st December there were 147 schools in operation :—

105 Public.
24 Provisional.
6 Half-time.
8 Denominational.
4 Evening Public Schools.

During the year 12 Provisional Schools were converted into Public Schools. The Public School at Warburton was ready for occupation in November, but the teacher appointed had not entered on duty by the end of the year.

In addition to the 42 new schools already established, 24 are in course of establishment, and 17 others are projected ; these 41 schools will in all probability be brought into operation in the first half of 1882. In dealing with cases of new schools, less difficulty has been experienced than in former years. As the Public Instruction Act becomes more generally known and better understood it is the more appreciated, and in many localities the residents have shown themselves willing to make some sacrifice in order to take immediate advantage of its beneficent provisions. This is evidenced by the fact that of the 21 new Public Schools established 18 are conducted in temporary buildings provided by the residents.

*Evening*

*Evening Public Schools.*

Three of these schools have been established during the year, at Cobar, Hill End, and Nymagee, and it is proposed to establish one at Gulgong. I regret that my anticipations as to the want of success of these institutions have been more than realized. The schools at Eurunderee and Warren, after lingering for a few months, had to be closed as the pupils had ceased to attend. The school at Mudgee, though it started well, is now so poorly attended that it is not likely to re-open after the Christmas vacation. The only school of this class that can be regarded as a success is that at Cobar, and its success is owing to the application of the principle of compulsion. About 50 boys employed by the Cobar Copper Company have been compelled to attend the school; the Company pays the fees, and the teacher furnishes a return every week of the attendance of each boy.

II.—MATERIAL CONDITION OF SCHOOLS.

On this head I have very little improvement to report. Though much has been done in the way of preparing plans and specifications; only two new buildings have been completed and occupied during the year. These are the Public School and teacher's residence at Canadian Lead, and the Infants' school-room at Dubbo. New buildings are in course of erection at Cobar, Cumnock, Garra, Gregra, and Wellington. School tents have been placed at Bob's Creek, Dubbo, Eurimbla, and Mullion Creek. These tents are more comfortable and are better suited for school purposes than most of the temporary buildings usually placed at the disposal of the Department. For making *immediate* provision for the educational wants of a locality, and for bringing the means of education within the reach of the shifting populations of gold-fields and railway camps, these tents have met a necessity long felt, and have proved of great service in the educational arrangements of the Colony.

A striking example of the usefulness of school tents is furnished in the case of Cobar. The buildings rented for school purposes were burnt down in November last; no other buildings could possibly be obtained, and if the Department had not been in a position to supply tents for carrying on the school work, the children of that large and flourishing town would have been without schooling for well nigh a year.

Repairs or additions have been effected at 15 schools, viz., Binnaway, Brocklehurst, Coonamble, Cooyal, Crudine, Cudgong, Eulomogo, Goodrich, Ilford, Louth, Molong, Ponto, Rylstone, Spring Flat, Wilberree.

As regards material condition 72 Public Schools may be classed from fair to good, and the remaining 33 as bad. The large number rated as bad arises from the fact that most of the new schools, and those recently converted from Provisional Schools, are conducted in temporary buildings. 33 Public Schools are conducted in non-vested premises; in all of these cases suitable sites have been applied for, if not already secured.

42 Public Schools are without teachers' residences.

In the plans for new buildings prepared by the Architect for Public Schools, better provision is made for the accommodation of the teacher and his family. The poor residences, usually consisting of two small rooms and a kitchen, hitherto provided for teachers of ordinary country schools, present a marked contrast to those provided for station-masters by the Works Department, and are far inferior to those erected by the same Department for gate-keepers. The buildings used for Provisional and Half-time schools, though generally roughly constructed, are tolerably suitable; in a few instances really good buildings have been provided.

Weather-sheds are frequently applied for, and in all cases where they are required have been granted. At times the demands made by the applicants are out of all proportion to the wants of the school concerned. The demand is made ostensibly in the interests of the children, but really with no other object than to secure an expenditure of public money. While on this subject I cannot refrain from mentioning in terms of commendation the action taken by the parents of the children attending the Maryvale Public School. They supplied the materials and erected the framework of a large shed, 40 feet by 18 feet, and then applied to the Department merely for the galvanised iron for roofing. The Maryvale Public School has now one of the best weather-sheds in the district, erected with little expense to the Department. Similar action has been taken at Yullundry, and I hope to see the example frequently followed.

The furniture in most of the Public Schools is sufficient, suitable, and well arranged; that in Provisional and the smaller Public Schools is frequently rough and clumsy, but, as a rule, is the best that can be procured, and fairly meets the requirements of the various schools.

With but very few exceptions all the schools are very fairly supplied with books, maps, and other requisites; in nearly all schools due care is taken of those articles.

The school buildings of the district, inclusive of the Denominational, are estimated to provide accommodation for 6,250 pupils. As nearly as can be ascertained, the number of children of the school age living within reach of existing schools is about 8,000. Additional accommodation for about 2,000 pupils is required.

In most instances the additional accommodation will be provided by new buildings, in others the buildings now used will be enlarged. No case has been overlooked; tents have been recommended for those that are urgent.

III.—ENROLMENT AND ATTENDANCE OF PUPILS.

Many circumstances have this year militated against regularity of attendance. In addition to the ordinary causes of pupils' absence from school, such as harvesting and shearing, there has been an unusual amount of sickness in most parts of the district. Epidemics of measles, whooping-cough, and low fever have almost emptied schools for months. One school had no attendance for eight weeks in consequence of prevalence of fever.

The "small-pox scare" has even in this back district made sad havoc among the schools. Nearly all the children have been vaccinated, and on that account were kept away from school for a fortnight.

The following table gives the number of schools in operation, the enrolment of pupils, and the average attendance for each quarter of the year:—

	Schools in operation.	Pupils enrolled.	Average attendance.	Per-centage of attendance to enrolment.
March quarter.....	117	7,406	4,993.3	67.4
June quarter.....	126	7,818	5,167.9	66.1
September quarter.....	130	7,949	5,461.8	68.7
December quarter.....	146	8,267	5,416.4	65.5

The Evening Public School at Nymagee was in operation during the December quarter, but as the teacher neglected to furnish the required returns it is not included in the above tables.

Schools are always badly attended in the month of December. In agricultural districts all children whose services can be made use of in any way are kept to assist at the harvesting; on the plains the prevalence of sandy blight keeps half the pupils away.

The aggregate enrolment for the year is 11,123; of this number a deduction of about 9 per cent. must be made for double and treble enrolments.

The

The number of children who attended school in 1881 may be set down as 10,123, and the number in ordinary attendance as 5,851.

This portion of the Colony has not yet been divided into school districts.

As already stated, the number of children of the school age living within reach of existing schools is 7,826, and of this number 894 are not known to be under instruction.

The number of pupils who have attended school 140 or more days during the year is 4,325. The number who have attended less than 140 days,—

(a) Through sickness .....	746
(b) Through truanting.....	51
(c) Through removal from locality .....	1,449
(d) Through other causes .....	4,552

The large number under (d) is made up principally of the pupils of schools established late in the year, of children who through removals and other causes were enrolled only in the second half-year, and of the pupils of Half-time Schools.

One Attendance Officer has been at work in my district. The school district assigned to him, No. 39, lies around Wellington. His work has been confined to visiting the parents, explaining the law, and pointing out the penalty to which they expose themselves by non-compliance with its provisions. In one locality, Ironbarks, his visits have been productive of good, but in most places visited there was little work for him to do.

#### IV.—INSPECTION.—EFFICIENCY OF SCHOOLS.

The number of schools open during the year 1881, or any portion thereof, was 150, viz. :—

105 Public,
25 Provisional,
6 Half-time,
1 Church of England,
7 Roman Catholic,
6 Evening Schools.

Of this number 144 received general or regular inspection :—

105 Public,
24 Provisional,
6 Half-time,
1 Church of England,
7 Roman Catholic,
1 Evening.

The schools not inspected were the Provisional school at Mitchell's Creek Mine, and the Evening Schools at Eurunderce, Warren, Cobar, Hill End, and Nymagee.

The school at Mitchell's Creek Mine was in operation only four days; the Evening Schools at Eurunderce and Warren collapsed before an Inspector had an opportunity of inspecting them; the Evening Schools at Cobar, Hill End, and Nymagee were not established till after the Inspector had left the respective localities. Of the schools inspected 83 were visited by Mr. Inspector Dwyer, and 61 by myself. The following table shows the condition of the schools inspected :—

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public .....	49	27	29
Provisional .....	18	5	1
Half-time .....	3	2	1
Church of England.....	...	...	1
Roman Catholic .....	...	2	5
Evening Public.....	...	1	...
All Schools .....	70	37	37

Of the schools below the standard twenty-nine were inspected shortly after their establishment. The efficiency of each school inspected is given in the following tables :—

The schools are arranged in four groups—

- Those with a fourth class.
- Those with a third class.
- Those in which the highest class is the second.
- Those which have only a first class.

##### a. Schools with a fourth class (18).

Below Standard.	Up to Standard.	Above Standard.
	Tambaroora Pub. Wellington R.C.	Coonamble Pub. Dubbo Pub. Gulgong Pub. Gulgong Infants. Hill End Boys. Hill End Girls. Ifford Pub. Molong Pub. Mudgee Pub., Boys. Mudgee Pub., Girls. Mudgee Pub., Infants. Wellington Pub. Mudgee R.C., Boys. Mudgee R.C., Girls. Gulgong R.C. Mudgee C.E.

d.—SCHOOLS which have only a *first* class (5).

## Below Standard.

Eurimbla Pub.  
 Eulomogo Pub.  
 M'Donald's Creek Pub.  
 Campbell's Creek Prov.  
 Grattai Prov.

The number of pupils examined was 5,901; of these 2,942 were examined by Mr. Inspector Dwyer, and 2,959 by myself. Of this number 571, or about 9½ per cent., would be eligible for certificates that they are educated up to the standard required for exemption from school attendance.

*Organization.*

In most schools the organization can be reported upon in favourable terms. In general the buildings and grounds present a neat, well-ordered appearance, indicative of careful supervision on the part of the teachers. Many teachers by planting trees and flowers have tried to remove the bare aspect usually presented by school play-grounds, but the intense heat and long-continued drought of summer, combined with the sharp frosts of winter, have rendered their labours fruitless except in a few specially favoured spots.

With very few exceptions the school records are kept neatly and accurately, and the required returns are furnished in good time. Teachers now seem to have learned that by too minute subdivision of classes they waste their energies, and that it is not to their credit to have an undue proportion of pupils in the lower classes. They cannot be too often reminded that by delaying promotions they not only deprive their pupils of the higher instruction they are entitled to, but also reduce the efficiency of their schools, and thus injure their reputations as teachers. The opposite fault, that of promoting pupils too rapidly, is not often met with. In the majority of schools a correct classification is found; in this particular decided improvement is manifest. Of the 5,901 pupils examined, 581, or about 9½ per cent., were in *Infant Schools*; 2,394, or 40½ per cent., were in *first classes*; 1,739, or 29½ per cent., were in *second classes*; 869, or about 15 per cent., were in *third classes*; and 318, or 5½ per cent., were in *fourth classes*. Last year 53½ per cent. of the pupils examined were in *first classes* and *Infant Schools*: this year the per centage is 50. When the number of new schools is taken into consideration this advance is cheering.

#### Discipline.

The discipline in most of the schools is of a very satisfactory character. Many of the teachers give evidence of good tact in dealing with children, and of good governing power. Though the regularity is by no means what is desired, the short-comings in this respect frequently arise from causes beyond the teacher's control or influence. The attendance is better than the percentages given in the table under the head of attendance would imply. At certain periods the schools are emptied of all but the youngest children, and in many places the streets or roads are so bad in rainy weather that attendance at school is impossible; two or three wet days in a quarter completely spoil the average. Punctuality, good order, diligence, and attention prevail in many schools, and few cases of prompting and copying occur.

During the year great improvement has been made in the teaching of drill. Wherever practicable, regular and systematic instruction in this subject is insisted upon. It is true that in many instances this instruction is but elementary, but the mere teaching children to walk without slouching, to step in time, to move with quietness and precision, and to obey promptly the word of command, has a good physical and moral effect. Drill is now taught in 86 schools: 3,105 children were examined in this subject, and of the number 2,092 passed creditably. Boys have benefited by instruction in drill to a greater extent than the girls, who really need it more, but in all schools where there are female teachers who have passed through the Training School, I have directed such teachers to give instructions in calisthenics. The Hill End Girls' School merits special mention for the efficient teaching of this subject.

#### Instruction.

The per centage of pupils who satisfied the requirements of the standard is lower this year than last. This falling off is not to be attributed to any decrease in the efficiency of the teachers, but to the large number of new schools, some of which were inspected when they had been only a few days in operation.

The methods of teaching are of a mixed character. In the bush schools, of which there are many in this district, in charge of untrained teachers, crude and unskillful methods must be looked for. As might be expected, the best methods are employed in the large Public Schools in charge of teachers who have passed through the complete course of pupil teachership and training; in these schools high results are gained. In some of the smaller schools I have met with teachers of good aptitude for teaching, who have made themselves thoroughly acquainted with some of the excellent text-books on school management now available for teachers, the works of Currie, Gladman, and others, and by earnestness and diligence have made themselves really skilful teachers. I must, however, give the bulk of the teachers in this district credit more for patient, steady work than for skill.

There are a few, fortunately—*very few*, teachers who make no effort to improve; they have taken to school-keeping as a means of subsistence, and would gladly change for something more congenial if they could. The sooner such persons—teachers they cannot be called—are got rid of, the better.

It is satisfactory to be able to report improvement in the documents which regulate the instruction. Time-tables, which provide for the constant and profitable employment of the pupils, for a judicious rotation of lessons, and for the equitable apportioning of the teachers' time among the various classes, are now frequently seen. In some schools this document is drawn up with great taste, and when neatly framed forms an ornament to the schoolroom.

In the Public Schools generally the programmes of lessons bear evidence of careful preparation, and fairly subserve their end—that of preventing desultory teaching.

As a rule the lesson guides are faithfully observed, and the instruction given is honestly recorded.

The number of pupils present at examination was 5,901, or 915 more than were examined last year.

The total number of pupils examined in each subject of instruction, and the percentage who satisfied the standard, are given in the following table:—

Subjects.	Total number examined.	Percentage of pupils who satisfied the Standard.
Reading .....	5,901	85
Writing .....	5,618	95
Arithmetic .....	5,545	44
Grammar .....	3,180	63
Geography .....	3,127	74
Scripture .....	1,449	90
Object Lessons .....	5,751	78
Drawing .....	2,803	65
Music .....	3,772	73
Euclid .....	261	70
Algebra .....	173	70
Mensuration .....	102	63
Latin .....	81	64
Needlework .....	1,811	89
Drill .....	3,105	67

*Reading.*—A very satisfactory feature in the schools of this district is that proper attention is given to this important subject; very few are now open to the charge that too much time is occupied over the merely elementary stages. Of the 5,901 pupils examined, 1,358 or about 23 per cent. were reading ordinary prose, and 1,816 or 30 per cent. easy narrative. Though this proportion is a decided advance on the work of previous years it is still too low. At least one-third of the pupils attending primary schools should be able to read a passage from a newspaper with ease and fluency. The explanation of the words and the subject matter of the lessons receive ample justice at the hands of most teachers. I find that the danger to be guarded against is that of making the reading lesson the means of giving information on all sorts of subjects. The reading in our schools would be improved, and a taste for literature fostered, by the addition to the series of reading books of a class book consisting of carefully selected extracts from the works of standard authors—such a class-book to be principally used for recitation.

*Spelling*

*Spelling* is very fairly taught in most schools. There are various ways of teaching this subject, by requiring pupils to learn by heart columns of words, by spelling round the class the words of the reading lesson, by lessons on words similar in sound but of different spelling, and by transcription and dictation exercises. All of these modes should be employed. In the transcription and dictation exercises all errors should be carefully marked, and the pupils required to re-write the passage correctly. Unless this is done the lesson proves a failure.

*Writing* continues to occupy the highest position as regards results. In most of the schools the teachers make good use of the blackboard, and do not depend wholly upon the head-lines in the copy-books for models. In nearly all cases copy-books of a suitable kind are provided, and those used by the pupils are kept free from blots and smears. The greatest want of care in this particular is found in small schools under female teachers. In the larger schools the pupils should be practised in writing on unruled paper, and in writing down quickly from dictation.

*Arithmetic.*—This is still the weak subject of the school course, though this year the results are slightly in advance of those of last year. As has been frequently stated, arithmetic is one of the most difficult subjects to teach; but if teachers were more careful in supervising the work of the pupils in the simple rules, and to regularly put the solution of sums on the board, making the pupils do the work orally, higher results would soon be gained. It must, however, be borne in mind that the tests applied in our schools are rather severe. Questions given to an ordinary third class are more difficult than those given to the candidates at a Civil Service examination.

*Grammar.*—In passing and analysis good marks are gained. In accident and composition, especially the latter, low marks. The lessons in composition are too frequently of a haphazard and desultory character. If a good Manual of Composition, like Curries', were used, the teaching would be systematic, and in a short time improvement would be effected.

*Geography* is well taught in the large schools, and indifferently in the smaller ones. The teachers of small schools do not take advantage of the natural features in their vicinity in the teaching of this subject, but slavishly adhere to text-books. Many schools, particularly new ones, have suffered through the inability of the contractor to supply maps.

*Scripture.*—The fact that 90 per cent. of the pupils examined in this subject satisfied the standard is sufficient proof that it is not neglected.

*Object Lessons.*—The high percentage of marks in this subject is owing to good results of the larger schools. In too many of the smaller schools the object lesson is frequently one of mere words, elastic, ponderous, combustibles, amorphous, &c., or a verbal repetition of a lesson selected from one of the ordinary text-books. When the text-book is a good one, as Walker's, there is probably not much harm done; but when a bad one, as Lake's, is used, the so-called lesson is a waste of time. The range of lessons is very limited. The camel, elephant, ostrich, and whale occupy a prominent place in many programmes of lessons. It would be much better for teachers to give lessons on food and clothing and their bearing upon health, better to let the children know the importance of fresh air and pure water, than the exact weight and value of an elephant's tusk or the number of gallons of oil that can be obtained from a whale. The lessons are arranged in series in very few schools, though if object lessons are to fulfil their end as a means of mental training, each lesson should be a sequence to the one immediately preceding and a preparation for those following.

*Elementary Drawing* is taught in 115 schools with fair success. *Vocal Music* on the tonic sol-fa method is taught in 76 schools. 3,772 children were examined in this subject, and 73 per cent. satisfied the standard. In the large Public Schools the singing is of a high order. For excellent singing the undermentioned schools deserve special mention—Dubbo, Hill End, Molong, Mudgee, Wellington.

*Needlework* is taught in all schools except a few small ones in charge of unmarried male teachers. *Fancy work* has been so persistently discountenanced by the Inspectors that it is now almost banished from the schools of this district. It is to be regretted that no appliances exist for giving instruction in "cutting out." In all schools to which sewing-mistresses have been appointed a regular course similar to that laid down by the London School Board should be followed.

*History.*—No pupils have been examined in this subject, as the text-books to be used have not been specified, and the course of instruction has not been defined.

The advanced subjects—*Geometry, Algebra, Mensuration, and Latin*—are taught with very fair success in the larger Public and Denominational Schools. Three schools—Dubbo, Mudgee, and Wellington—have been declared Superior Public Schools. In these schools the fifth class subjects are taught to the boys; but the arrangements for teaching French and the piano to the girls have not been completed.

#### Teachers.

At the end of 1881 there were employed under my supervision 140 principal teachers, 9 assistant teachers, 30 pupil teachers, and 9 work-mistresses.

The teachers and assistants are thus classified:—

57	.....	Probationers.
15	.....	Class III, section C.
21	.....	" III, " B.
22	.....	" III, " A.
22	.....	" II, " B.
12	.....	" II, " A.

The following is the classification of the pupil teachers:—

13	.....	Fourth class.
6	.....	Third class.
10	.....	Second class.
1	.....	First class.

Of the conduct of the teachers generally I can speak only in terms of praise. They are a conscientious and hard-working body of persons, and attend to their duties with commendable diligence and earnestness. A fair proportion have shown by their voluntary submission to examination their disposition to study and their desire to rise in the profession. When I consider the isolated position in which many teachers are placed, the impossibility of their procuring assistance in their studies or of obtaining the advice of a more experienced teacher, I feel that they are entitled to credit for the work that has been accomplished. If it were practicable for the Inspector to visit each school twice a year the efficiency of the teachers would be largely increased.

The new arrangements for the examination of teachers are likely to work well. In addition to the regulations already in force for conducting these examinations, I should like to see one similar to that observed in the University examinations, viz., that questions once used cannot be used again.

The pupil teachers are an intelligent promising body of young persons, and have rendered good service during the year. They are regularly instructed; in fact most teachers devote considerably more than the stipulated hour to the instruction of their pupil teachers. In some places the number of applicants for the office of pupil teacher is greatly in excess of the demand; in the remote towns, as Bourke, Brewarrina, Cobar, Nymagee, and Warren, none can be obtained, and the teaching staff in those places is consequently incomplete.

The new rules for the training of teachers for Provisional Schools have worked well. The persons who have offered themselves for employment in small schools have been in most instances young persons of good repute, fairly educated, and of tolerable aptitude for teaching. All the schools established have been provided with teachers without delay.

#### Progress.

The progress made in primary education during the year may be thus summarised:—The schools have increased at the rate of 35 per cent., the number of pupils enrolled at the rate of 18 per cent., the average attendance of pupils at the rate of 15½ per cent., and the number of pupils examined at the rate of 18 per cent. The

The establishment of new schools has been regarded as of paramount importance, and has therefore received particular attention. The fact that 42 new schools were opened in 1881, and that the necessary action for establishing 41 others has been taken, shows that in this district much has been done towards bringing the means of education within the reach of every child. For the reasons already given the increase in the average attendance of pupils has not been as large as was anticipated; but as it is probable that the compulsory clauses of the Public Instruction Act will be enforced next year, and as additional accommodation will be provided where there is now a deficiency, a large increase may be looked for in 1882.

On the whole very fair progress has been made in all the departments of the school work.

In carrying on the work of this district I have been ably and zealously assisted by Mr. Inspector T. Dwyer. To the hearty co-operation of that gentleman I am indebted for much of the success that has attended the year's operations.

Wellington, 20th January, 1882.

F. BRIDGES,  
District Inspector.

ANNEX S.

MR. INSPECTOR T. DWYER'S GENERAL REPORT FOR 1881.

I HAVE the honor to submit my report on the schools inspected by me in the Mudgeo portion of the Wellington District during 1881.

The schools under my supervision are situated in the following counties, viz. :—Roxburgh, Wellington, Phillip, Brisbane, Bligh, Napier, Lincoln, Gowen, Baradine, Ewenmar, Oxley, Leichardt, Gregory, Clyde, Cowper, Yanda, and Robinson, and at the close of 1880 they comprised :—

48 Public Schools and Departments.
13 Provisional „
2 Half-Time „
3 Evening Public „
1 Certified Denominational C.E. School.
4 „ „ R.C. Schools.
—
71 Total.

Of these, one Provisional School, Denison Town, was closed in December, 1880, and has not been reopened since; and two Evening Public Schools, Enderence and Warren, had to be closed for want of support in June, 1881.

During the year the following new schools were opened, viz. :—

<i>Public Schools. (12.)</i>	
Bayley	Medway
Beryl	Nullabong
Beckive	Nyamagee, Evening
Cobar, Evening	Stubbo
Gilandra	Tallawang
M'Donald's Creek	Warburton

<i>Provisional Schools. (16.)</i>	
Bara Creek	Honeysuckle Spring
Botobolar	Kellick
Campbell's Creek	Molarban
Carwell	Orandelbinna
Collingwood	Fyangle
Dabee	Tong Bong
Grattai	Wilpinjong
Gulargambone	Yalegreen.

<i>Half-Time Schools. (2.)</i>	
Biambil	Merrygoen.

<i>Evening Public Schools. (2.)</i>	
Cobar	Nymagee.

During the same period the following Provisional were converted into Public Schools, viz. :—

Ballarah	Molarban
Binnaway	Mundooran
Camboon	Millsville
Collie	Tabrabucca
Coomber	Wilpinjong
Carwell	Wollar.

Applications for Public Schools from the undermentioned places have been favourably entertained, viz. :—

Capertee Camp	Flatlands
Clandulla	Lambing Hill
M'Donald's Hole.	

A school-room has been rented at Clandulla. Tents are to be supplied as temporary schools at Capertee Camp, Flatlands, and M'Donald's Hole, and it is expected that the promoters of the proposed school at Lambing Hill will erect a temporary building in that locality. The Minister has also decided to open Provisional Schools in the following places, which hitherto have been without the means of instruction, viz. :—

Elong Elong	Uribrible
Nyngan	Wollar Creek

Applications for a Public School at Cudgebong and for Provisional Schools at Brymair and Ben Buckley await my report. I expect to visit these localities during the present month.

I hope to see schools in operation in each of the following places in a few months, viz. :—

Girilambone, Public
Belar, Provisional
Currajong Park, Provisional
Kerbin „
Lahy's Creek „
Warkville „
Willy Wally „

I also expect to see Half-time Schools opened at Holders and Yeranan, two small settlements in the neighbourhood of Coonabarabran, during the present quarter.

The number of schools in operation during 1881 or any portion thereof is :—

Public Schools and Departments ... ..	70
Evening Public Schools ... ..	5
Provisional „ ... ..	17
Half-time „ ... ..	4
Church of England Schools ... ..	1
Roman Catholic „ ... ..	4
	101

The Evening Public Schools at Eurunderee and Warren were not a success and had to be closed at the end of June, 1881.

The number of schools fully inspected during the year is :—

Public Schools ... ..	70
Evening Public Schools ... ..	1
Provisional „ ... ..	17
Half-time „ ... ..	4
Church of England „ ... ..	1
Roman Catholic „ ... ..	4
	97

Four Evening Public Schools were uninspected—Eurunderee and Warren, because they were not in operation at the time of the Inspector's visits; Cobar and Nymagee, because they were established after the date of my visit to these remote places, and too late in the year to make a special visit possible.

The work of inspection will be seen from the following table :—

Schools inspected during 1881.

Inspected by	Public and Evening Public Schools.	Provisional Schools.	Half-Time Schools.	Church of England Schools.	Roman Catholic Schools.	Total.
Mr. District-Inspector Bridges .....	11	1	.....	.....	3	15
Mr. Inspector Dwyer .....	60	16	4	1	1	82
Total .....	71	17	4	1	4	97

I also inspected the Public School at Spicer's Creek, which is under the direct supervision of Mr. District-Inspector Bridges, to whom I forwarded the statistics relating thereto.

The number of pupils present at the inspection of the 82 schools is 2,942.

The number enrolled for the year in these schools was :—

Schools.	No. of	Boys.	Girls.	Total.
Public .....	60	2,149	2,266	4,415
Provisional .....	16	213	227	440
Half-time .....	4	48	38	86
Church of England .....	1	135	116	251
Roman Catholic .....	1	129	86	215
Total .....	82	2,674	2,733	5,407

The number of pupils enrolled two or more times will be seen from the following table :—

Schools.	Number enrolled one other time.	Number enrolled two other times.	Number enrolled three or more other times.	Total.
Public .....	236	20	3	268
Provisional .....	33	.....	.....	33
Half-time .....	6	.....	.....	6
Church of England .....	20	.....	.....	20
Roman Catholic .....	20	1	.....	21
Total .....	315	30	3	348

The number in ordinary attendance in the inspected schools was :—

Schools.	Boys.	Girls.	Total.
Public .....	1,099	1,181	2,280
Provisional .....	130	141	280
Half-time .....	19	17	36
Church of England .....	63	55	120
Roman Catholic .....	84	46	130
Total .....	1,406	1,440	2,846

The

The number of projected schools is :—

School	Numbers.
Public .....	6
Provisional .....	12
Half-time .....	2
<b>Total .....</b>	<b>20</b>

The names of these are given on page 76.

The number of school buildings enlarged or repaired is 7, viz:—Binnaway, Crudine, Cudgegong, Ilford, Louth, Spring Flat, and Willertree.

The following table exhibits the condition of the schools inspected :—

Schools.	Below the standard.	Up to the standard.	Above the standard.	Total.
Public .....	31	14	15	60
Provisional .....	12	4	.....	16
Half-time .....	2	1	1	4
Church of England.....	.....	.....	1	1
Roman Catholic.....	.....	.....	1	1
<b>Total.....</b>	<b>45</b>	<b>19</b>	<b>18</b>	<b>82</b>

Last year 60 per cent. of the inspected schools met or exceeded the requirements of the standard as against 46 per cent. this year. To account for this apparent falling off in the efficiency of the schools under my supervision is easy. A good many were inspected early in the year, in February and March, when a number of pupils had been only a few weeks under instruction; and several new schools were opened in the last quarter of the year, the majority of which were inspected a few weeks, and, in some instances, a couple of days, after their opening.

The following table shows the condition of the inspected schools in relation to the standard of proficiency, and to the number of classes in each school :—

#### I.—PUBLIC SCHOOLS.

##### A. Above the standard.

- (a.) Schools with 1st, 2nd, 3rd, and 4th classes :—Gulgong Infants', Gulgong Primary, Ilford, Mudgee Infants', Mudgee Girls.  
 (b.) Schools with 1st, 2nd, and 3rd classes :—Cassilis, Cobar, Cobbora, Coonabarabran, Crudine, Cudgegong, Eurunderee, Guntawang, Mobellah, Pipeclay Creek, Windeyer.  
 (c.) School with 1st and 2nd classes :—Spicer's Creek.

##### B. Up to the standard.

- (a.) Schools with 1st, 2nd, 3rd, and 4th classes :—Nil.  
 (b.) Schools with 1st, 2nd, and 3rd classes :—Baradine, Binnaway, Carwell, Canadian Lead, Coolah, Coomber, Lawson's Creek, Merriwa, Spring Flat, Warrumbungul.  
 (c.) Schools with 1st and 2nd classes :—Ballarah, Bayly, Cullenbone, Nymagee.

##### C. Below the standard.

- (a.) With 1st, 2nd, 3rd, and 4th classes :—Nil.  
 (b.) With 1st, 2nd, and 3rd classes :—Burrundulla, Cannonbar, Collie, Cooyal, Cooyal Diggings, Medway, Hargraves, Mundooran, Munghorn, Round Swamp, Pyramul, Springfield, Tabrabucca, Uarbry, Molarban, Wilbertree, Wilpinjong, Wollar.  
 (c.) With 1st and 2nd classes :—Bective, Beryl, Borambil, Dungaree, Gulgarnie, Millsville, Nullabong, Louth, Stubbo, Mullamuddy, Tallawang.  
 (d.) With 1st class only :—McDonald's Creek.

#### II.—PROVISIONAL SCHOOLS.

##### A. Above the standard :—Nil.

##### B. Up to the standard.

- (a.) Schools with 1st and 2nd classes :—Botobolar, Kellick, Orandelhinna, Pyangle.

##### C. Below the standard.

- (a.) Schools with 1st, 2nd, and 3rd classes :—Goolma, Gulargambone, Turce Creek.  
 (b.) Schools with 1st and 2nd classes :—Avisford, Bara Creek, Collingwood, Crudine Lower, Dabee, Honeysuckle Spring, Tong Bong.  
 (c.) Schools with 1st class only :—Campbell's Creek, Grattai.

#### III.—HALF-TIME SCHOOLS.

- A. Above the standard :—Narrango, 2 classes.  
 B. Up to the standard :—Mount Morris, 2 classes.  
 C. Below the standard :—Biambill, Merrygoen, 2 classes.

#### IV.—CERTIFIED DENOMINATIONAL SCHOOLS.

- A. Church of England Schools.  
 Above the standard :—Mudgee, with 1st, 2nd, 3rd, and 4th classes.  
 B. Roman Catholic Schools.  
 Above the standard :—Gulgong, with 1st, 2nd, 3rd, and 4th classes.  
 Total, 83 schools.

The

The total number of pupils examined in each subject of instruction, and the percentage of pupils who satisfied the standard are given in the following table :—

Subjects.	Total number examined.	Percentage of pupils who satisfied the Standard.
Reading .....	2,942	78 per cent.
Writing .....	2,659	93 "
Arithmetic.....	2,585	47 "
Grammar .....	1,541	47 "
Geography .....	1,383	72 "
Scripture .....	654	86 "
Object Lessons.....	2,853	63 "
Drawing.....	1,236	63 "
Music .....	1,575	67 "
Euclid.....	43	100 "
Algebra .....	35	100 "
Latin .....	17	100 "
Mensuration .....	21	100 "
Needlework .....	851	85 "
Drill .....	1,866	56 "

The classification of the 68 teachers and assistants, and of the 8 pupil teachers, in the Public, Half-time, and Denominational Schools, is as follows :—

<i>Teachers and Assistants.</i>		<i>Pupil Teachers.</i>	
Probationers.....	19	Class I.....	2
Class III, C.....	10	" II.....	2
" " B.....	13	" III.....	4
" " A.....	10	" IV.....	4
" II, B.....	13		
" " A.....	3		
Total.....	68	Total.....	8

Having now set forth the statistics relating to the schools under my supervision, it may not be out of place here to offer some remarks on the organization, discipline, and instruction of these schools, on the teachers engaged therein, and on the prospects of primary education in this part of the Colony.

#### 1. Organization.

So much has been written year after year on the subject of school organization that it is a difficult matter to say anything new on this head. Increased attention has been paid to the correct keeping of all records in the schools under my supervision, to the compilation of the lesson guides, and to the punctual despatch of the Quarterly Returns, which are, moreover, filled up with much greater neatness than in past years. But there is another feature of school organization which is yet only in its infancy. I mean the cultivation of taste among children. The influence which the teacher can wield in this matter is very great, even where there is no direct teaching. Nothing distinguishes one school from another more than its moral atmosphere. One element in it that first strikes a visitor is the air of cleanliness, neatness, arrangement, order, cheerfulness, and taste, that pervades the room like light. The teacher who claims to have his school well organized never fails to make these features prominent. In a considerable number of schools inattention to scrupulous cleanliness, not only of the floor, but also of the walls, corners, windows, furniture, &c., is still too apparent; the maps are carelessly hung, are not often dusted, and the cards, pictures, &c., present a neglected appearance. The remedying of these defects would be the foundation of that moral atmosphere alluded to above, which might be the means of silently educating children to habits of neatness and order, so essential to the formation of their characters in after life.

#### 2. Discipline.

I have not much to remark upon the discipline of the schools placed under my supervision. It appears, upon the whole, to be productive of good moral results in the obedience, order, and fair propriety of manner, which I see in most schools whose pupils attend regularly. Speaking of regularity of attendance induces me to offer a few remarks on the urgent need that exists for the application of the compulsory clause of the Public Instruction Act to this district. The possibility of enforcing attendance at school is now no longer a matter of speculation. It has been proved in districts of the most diverse character. A short time ago, though it was scarcely doubted that attendance might be insisted upon in towns, few believed that country children could be compelled to attend school. The best schools have struggled against irregularity of attendance without success; the best teachers have produced only a partial efficiency. They may, under favourable circumstances, have succeeded in keeping their schools select; but where they have had to deal with a whole population, where theirs has been the only school, the injurious effects of irregular attendance have been altogether beyond their control. And now that we are on the eve of having compulsory education introduced into this part of the Colony, I have no doubt that its beneficial effects will soon be seen, and that its operations will not be felt by any parent having the welfare of his children at heart.

One of the results of good discipline in schools is the habit of close attention to work among the children generally, by which time is economised and idleness overcome. The discipline should be sufficiently effective to prevent copying, and the habits of whispering and prompting, which militate against a self-reliant independent spirit. Discipline should end in creating a habit of mind with a life of its own, independent at last of the exterior check of the teacher's presence. The discipline has been greatly improved by the systematic and thorough teaching of drill. It has tamed down the restlessness and turbulence of many unruly spirits, and has brought about a much greater degree of quiet submission to authority, and a more prompt obedience to orders, than any which existed before. Changes of lessons, &c., are effected with less noise and a smaller waste of time. The work of an Inspector, too, is rendered less troublesome in proportion as the scholars are more steady and obedient in their behaviour. The habits of order, respectful manners towards others, and ready compliance with legitimate commands, are invaluable as helping to form the character and promote the welfare of the youth who cultivates them.

#### 3. Instruction.

The employment of suitable methods is characteristic of large schools under trained teachers, while unsuitable methods are the rule in the small schools taught by untrained and unclassified persons, and by a few negligent classified ones. The same defective methods are followed in these latter schools, which

which the Inspectors have over and over again condemned, and for the improvement of which so many suggestions have been offered. My own conviction is, that the real cause of the absence of successful teaching in inefficient schools is to be attributed to the scant preparation bestowed by teachers on their work, or to the neglect of all preparation. To make the teaching of common objects—geography, natural history, and explanatory reading—effective, special preparation is absolutely necessary for every teacher. "I have listened," says an English Inspector of schools, "to some hundreds of oral lessons delivered by teachers in elementary schools, and the observation has continually presented itself to my mind that in such lessons the cardinal defect—that which lies very generally at the root of the failure of such lessons, and makes of what would under other circumstances be the most successful expedient and highest resource of education in too many instances an impediment to it—is an inadequate knowledge on the part of the teacher of that which he is teaching."

*In Reading*, 78 per cent. of the pupils have satisfied the standard, that is to say, could intelligently pronounce, group, and explain every word in the passage selected. Of course it must be admitted that numbers of children knew almost by heart the extract allotted to them; but, on the whole, there is no reasonable ground for complaint, as far as the teaching of elementary reading is concerned. I find recitation from standard authors but little attempted in our schools, yet it is an exercise which is productive of many advantages to the young. Learning by heart is a pleasant, easy task to children. In an extract, well chosen, from some popular poet, there is a variety of things to master which interest without tiring, which awaken curiosity and enlarge the learner's stock both of words and ideas. Yet this variety is not overpowering, because it is limited by the passage which the pupil has thoroughly learnt. Such work is the key to intelligent as well as to fluent reading.

*Writing*.—93 per cent. satisfied the standard in this subject. There is generally speaking no difficulty in deciding upon the penmanship in the schools of this district. The character is good, the letters being regularly and neatly formed; but in a few schools there is frequently a tendency to break into a running hand, and the letters are not of uniform size and slope. In a few Provisional Schools the slates were not ruled with indelible lines.

*Dictation*.—This is a most important exercise, being well adapted to develop as well as test the habits of attention, promptness, and accuracy of children. In this exercise a teacher should never repeat, and should always observe a limit of time within which the words dictated should be taken down.

*Arithmetic*.—Only 47 per cent. have satisfied the standard in this subject. The failures are the result of inaccuracy in the mechanical operations, which shows what need there is for regular revision and for constant practice in the simple rules. Failures in notation largely contributed to reduce the average proficiency in this subject. *Mental Arithmetic*, the poor man's logic, has not received that attention its importance demands. In fact, only in a few schools is any attempt made to teach it systematically.

*Grammar*.—47 per cent. is my estimate of the number that fully satisfied the standard in this branch. While parsing has been very fairly taught in most schools with three classes, and reasonable progress has been attained in analysis, the results in composition afford but little room for praise. In the bulk of the schools inspected by me the quality of the exercises in composition is unsatisfactory. The exercise generally given is the reproduction of an object lesson or a description of a school treat or journey. The short ill-expressed productions which I have had to revise are proofs that this branch of instruction has not received proper attention. There should be no difficulty in setting down in simple but correct sentences, with some regard to the order of events, the recollections of observations of a natural object frequently seen, or of an event in which a part has been taken, if the mind has received any real training.

*Geography* is satisfactorily taught. I should be glad to see every school supplied with a small globe, as it is an important auxiliary in giving children correct ideas as to the shape and motions of the earth, latitude, longitude, and other terms of frequent use in teaching this subject.

*Scripture* is well taught.

*Object Lessons and Drawing* are fairly treated.

In Euclid.....	43	pupils	were	examined.
In Algebra.....	35	"	"	"
In Latin.....	17	"	"	"
In Mensuration.....	21	"	"	"

All succeeded in satisfying the standard in these four branches.

*Singing* is well taught in the schools under trained teachers.

*Drill*.—56 per cent. satisfied the standard in this branch. (See my remarks on Discipline.)

The *Sewing* is not what I could wish. The quantity of work is often inadequate in relation to the size of the schools; and if the quality is satisfactory as regards the mere sewing, there are the drawbacks of an absence of cutting-out, and sufficiently convincing signs of no properly organized scheme of instruction. I am of opinion that work-mistresses should draw up programmes of work for each class under their tuition.

*Teachers*.—As a body the trained and classified teachers of this portion of the Wellington District exhibit satisfactory ability and devotion to their duties. A few are men of superior parts and high intelligence. The remarks respecting this class of teachers made by me in my report for 1875 appear to be, after the lapse of nearly seven years, so appropriate that I take the liberty of quoting them here. "It is of the highest importance that there should be among our teachers men of superior abilities and attainments. The value of such men is not to be measured by the benefits their example confers on the schools in their vicinity. Their influence is felt through the entire staff—they lighten the whole mass; they make the office of teacher respectable and respected; and their success not only attracts young men of promise to the Service, but stimulates them to devote all their energies to their work. While concurring in the propriety of taking the teacher's efficiency in his school into account in determining his fitness for promotion, I would hold out every facility for undergoing examination to the young men in the profession desirous of raising their classification rather by such means than seeking it under good service clauses or special regulations."

Judged by the number of applicants, the office of pupil-teacher appears to be very popular in this part of the Colony. Those under my supervision are a highly promising body of young people. I wish something could be done to give them more instruction in the higher branches. The Sydney pupil-teachers receive lessons on Saturdays from the Training Masters. Those in the country, who need instruction more, miss this great advantage. As stated in my report for last year, I am of opinion that if those teachers who have pupil-teachers under them were awarded small sums of money as premiums, for the success achieved by their pupil-teachers in passing their annual examinations, an incentive to study on the part of both, and consequently indirect good to the Service generally, would result from the arrangement.

*Prospects of Primary Education in this District*.—It may be inferred that the prospects of primary education in this part of the Colony are promising indeed, when it is considered that 32 new schools have been opened during the year, that 20 more will shortly be in operation, and that at least a dozen new vested buildings are about to be erected; and when it is borne in mind that we shall have the compulsory clause of the Act to aid us during the current year, the success likely to be attained in the development of the present Education Act may be regarded as eminently satisfactory.

Mudgee, 10 January, 1882.

T. DWYER,  
Inspector.

ANNEX T.

## ANNEX T.

## MR. DISTRICT INSPECTOR HICKS' GENERAL REPORT FOR THE YEAR 1881.

THE year 1880 closed with 118 schools in existence, of which 59, comprising 39 Public, 16 Provisional, and 4 Roman Catholic, were under my own direct supervision, and the other 59 under that of Mr. Inspector Hookins, of Albury.

At the commencement of 1881, Mr. Inspector M'Creddie, of Yass, and 63 schools (40 Public, 12 Provisional, 6 Half-time, 2 Church of England, and 3 Roman Catholic), were transferred to my superintendence from that of the Goulburn District Inspector, so that the year commenced with 181 schools in actual operation. The principal Circuits added to my District were Yass, Gininderra, Canberra, Gundaroo, Burrowa, Young, Murrumburrah, Cootamundra, Temora, Wheeo, and Tucna, and the entire area of the District was increased to about 70,000 square miles.

During 1881 there were 216 schools in existence, of which 209 were in full operation at the end of the year, so that the net increase was 28 schools.

The total number of pupils enrolled was 14,070\* for the year, and the average attendance rose to 8,735·1 for the last quarter.

For the purposes of supervision the whole District was divided into three sections—Wagga Wagga (or Central), Albury, and Yass, under myself and Messrs. Inspectors Hookins and M'Creddie respectively. The reports of the Inspectors attached hereto convey necessary information regarding the Albury and Yass sections.

Mr. Inspector Hoskins inspected 61 out of 70 schools under him, and Mr. M'Creddie 71 out of 75; while I inspected 66 out of 71; so that 198 out of the 216 schools were fully inspected. The principal reasons for the non-inspection of the others were want of time, owing to the number of inquiries to be made and the amount of correspondence to be attended to, and the temporary closing of schools at the time appointed for their inspection.

## WAGGA WAGGA (OR CENTRAL) SECTION.

## I.—MEANS OF EDUCATION.

## 1. Schools.

The Wagga Wagga Section comprised 71 of the whole number of schools in existence during the year, and 68 of those in operation at the end of the year, viz.:—47 Public, 1 Evening Public, 16 Provisional, and 4 Roman Catholic.

The three that closed were—

Hillas Creek Public, temporarily, pending erection of a building on a more suitable site.  
Snowball Copper Mine Public, owing to the cessation of work at the mine and the removal of the population.

Gundagai Evening Public.

Inquiries as to the establishment of the following schools were made:—

- +Malebo Public (near Wagga Wagga).
- +Wallacetown (or Gerilgambeth) Public.
- \*+Clarendon Provisional.
- \*+Wantabadgery Provisional.
- +Wantiool Provisional (near Junee).
- +Boree Provisional (near Junee).
- \*+South Gundagai Public.
- \*+Bombowlee Provisional (near Tumut).
- \*+Yerong Creek Public.
- Minjary Provisional (between Gundagai and Tumut).
- Five-mile Creek Provisional (near Gundagai).
- +Tarrabandra Public (on Tumut River).
- +Jugiong Public.
- Emu Flat Provisional (near Wagga Wagga).
- \*+Gundagai Evening Public.
- \*+Wagga Wagga Evening Public.
- North Wagga Evening Public.

The Minister agreed to establish 13 (marked †) of these, and also 5 (Lower Tarcutta Provisional, Umbango Provisional, Oura Public, Kindra Provisional, and Junee Reefs Provisional), reported on during 1880, *i.e.*, 18 in all. Favourable reports have been submitted respecting the other four, which may therefore be regarded as in course of establishment.

The seven marked \* and also 5 others (Alfredtown, Greenhills, Kindra, Mitta Mitta, and Tarcutta Lower), the cases of which were dealt with in 1880—12 in all—have been opened.

Applications have been received for the establishment of schools at Mitta Mitta, near Clarendon, and Cuddall, near Narrandera; initiatory steps have been taken at Hanging Rock; and the conditionally promised Provisional Schools at Darlington Point, Umbango, and Junee Reefs have yet to be brought into existence. These six may be regarded as projected schools.

There are thus (including Hillas Creek Public, which will be resuscitated) 17 schools which there is a prospect of adding to those already in existence; and arrangements have been so far completed in respect of 5 (Malebo Public, Wallacetown Public, Tarrabandra Public, Boree Provisional, and North Wagga Evening Public) of those, that they are sure to be opened early in 1882. Most, if not all, of the others are likely to come into operation before the end of the year.

It would be hard now to find any group of children sufficiently numerous for a school whose educational wants are not either met by existing, or prospectively provided for by proposed, schools.

As long therefore as the distribution of families remains as it is, the rate of increase in the number of schools within 70 miles of Wagga Wagga which has prevailed during the last two years cannot, I think, be maintained. Changes resulting from settlers "selling out," and others connected with mining industries, however, cause fluctuations in local populations, and materially affect the schools. Thus, the Snowball Copper-mine Public School, which not long since numbered some 70 pupils, has now collapsed; and the Adelong Grove and Mount Adrah Schools have narrowly escaped the same fate. Collengullie, Rowan, Ferndale, Marrar, Wyangle, and Wantabadgery are examples of schools in agricultural and pastoral localities that maintain only a flickering and precarious existence, owing to the removal of families; and Borambula and The Pinnacle may be cited as prospective schools of last year which from the same cause were unable to spring into existence. The movement is generally a westward one. The settlers are inclined to go farther back, where they believe they can get larger holdings and have more scope. The movement therefore means that we may anticipate a continuance of a large number of applications for new schools from the western and south-western parts of the Colony. Some of the new schools and prospective schools enumerated in this report find their origin in this movement, and provide for a considerable number of children who have been lost by other schools, and who do not therefore increase the total number of children who are being educated. The fact that out of 1,862 children present at school on 13th December last, 190, or over 10 per cent., had attended other schools during the year is, similarly, to a large extent accounted for.

In connection with this matter it remains to be pointed out that, after all, the number of schools that finally pass out of existence is very small. The normal results of the causes in question are not the breaking up of the schools and the deprivation of the few families who remain in a locality of the means of education, but an anomalous state of things under which—as at Forest Hill, Downside, Uranquinty, Mount Adrah, and Adelong Grove—the material provisions devised for the original school

population

\* Deduction being made for multiple enrolment.

population are far beyond the requirements of the locality; or, as at Nangus Creek, Yarragundry, Collengullie, Junee Junction, Oberne, and Humula, both teacher and pupils are compelled for a longer or shorter period to put up with the discomfort, inconvenience, and drawbacks of inferior, sometimes wretched premises, in consequence of the fear that the eventual history of the school might not justify the expenditure necessary to a proper organization.

This matter and the selection of the best sites (which is affected by like causes) are the two most difficult problems in connection with the establishment and organization of schools in this district.

2. *School Accommodation.*

The aggregate accommodation provided by school buildings is 364,000 cubic feet, that is, sufficient for 3,640 children. The ordinary attendance is below 3,000, so that simply as regards amount the accommodation is sufficient. But it is not distributed according to the attendance, nor is it suitable in kind throughout. The Denominational Schools, for example, provides space for about twice as many children as attend them, but the buildings were not designed for school requirements, and are used for church and other purposes, and are poorly furnished. The Provisional Schools, again, provide in the aggregate more than 100 cubic feet of space for each child, but the buildings are, as a rule, very rough and badly appointed structures. The total accommodation provided in Public Schools slightly exceeds 100 cubic feet for each child ordinarily in attendance; but while, as already indicated, some schools have an excess of accommodation, in several others there is a deficiency. Nine of the Public School buildings are decidedly unsuitable. Necessary steps have been taken for the erection of new buildings at these places, and also for effecting necessary improvements to other school premises. As a consequence, five schools have already been enlarged or repaired, and tenders have been invited for works in connection with several others; so that great improvement in the material condition of the schools may be looked for in the near future.

School tents as a temporary provision have been provided for five schools.

In a hot dry climate such as this, the questions of shade on the grounds and of water supply are of first importance, and have received due attention in the proposals submitted for the Minister's approval.

3. *Accommodation for Teachers.*

Twenty of the Public Schools are provided with residences, the property of the Department. In the case of eight (8) others the best available premises have been rented. In the remaining cases three of the teachers are under the necessity, as the best practicable arrangement, of occupying very bad rough premises put up originally by the promoters of the school, and the rest have secured the best obtainable lodgings. As married teachers cannot be got for all Public Schools, it is not absolutely necessary that residences should in all cases be built. Arrangements have been approved by the Minister, however, for providing eight (8) more schools with vested residences.

The Provisional School teachers have to make the best arrangements they can for their accommodation, which, except in four cases, is reasonably satisfactory.

4. *Evening Public Schools.*

Three applications for Evening Public Schools came in, and all were favourably reported on. Two of the schools—Gundagai and Wagga Wagga—came into existence, and the third, North Wagga, is likely to open early this year. The school at Gundagai commenced in July with an attendance of over twenty. This number, however, gradually declined, until in November it fell below the required minimum of ten, and the school consequently closed.

The Wagga Wagga school opened in October with an attendance of 21, which reached 24 by the end of the year. The school bids fair to continue and to prove beneficial to a number of young people.

Experience of Evening Public Schools is not sufficiently extended to warrant an opinion as to the general success and fruits of that portion of the Public Instruction Act under which they can be maintained, but there can be no doubt that for some years to come at least there will be a number of persons who might with advantage to themselves attend Evening Public Schools as contemplated by such provision.

In my special report on the working of Evening Public Schools I have dealt with details.

5. *High Schools.*

Nothing definite has been done to secure for the district the benefits of High Schools, under sections 25 and 26 of the Act. At Wagga Wagga, which is the principal centre, and where a High School ought to be, some preliminary action was taken by a "Progress Committee," who, however, have been unable to get the required guarantee of fifty qualified pupils. Until the residents of neighbouring towns and districts—say Wagga Wagga, Narrandera, Urana, Adelong, Tumut, Gundagai, and Cootamundra, for example—co-operate, there will, I think, be little hope of High Schools under the present arrangements; and parents who wish that their children should complete the Public School curriculum or be prepared for the University will be compelled, as hitherto, to send them to Sydney or Melbourne.

II.—SCHOOL ATTENDANCE.

From returns furnished by the teachers, it would appear that there are 3,883 children between six and fourteen years of age who might reasonably be expected to attend existing schools. Of this number 458 are not known to be receiving statute education, nearly all of whom are fit subjects for the operation of the compulsory clauses of the Public Instruction Act.

The gross number of enrolments for the year was 5,104, a number which may be regarded as representing (approximately) 4,593 \*separate children. The number enrolled two or more times during the year may be estimated (approximately) at 410.\*

The total average attendance was—

- 2,569·8 for the first quarter.
- 2,584·5 for the second quarter.
- 2,735·8 for the third quarter.
- 2,668·8 for the fourth quarter.

The regularity of attendance was affected to an unusual degree by sickness, measles, whooping-cough, scarlet fever, and eye-blight having been prevalent throughout the year. Several schools indeed had to be closed for a time. Only 2,354 pupils are returned as having completed an attendance of 140 or more days for the year, while 2,366 failed to complete 140 days' attendance (that required by section 20 of the Public Instruction Act). Of these latter 283 are reported to have failed through sickness, 19 through truancing, 591 through removal from the locality, and 1,473 through other causes, amongst which is to be included enrolment for too short a period. These numbers, it is to be pointed out, must exaggerate the irregularity of pupils' attendance, owing to the fact that they are the totals of the numbers given on the returns from separate schools, whereas some children who failed to complete 140 days' attendance at one school doubtless made up that number at some other school or schools.

Six schools were less than 140 days in existence, and are therefore excluded from these statistics as to regularity of attendance. The ordinary attendance—that is, the attendance when not affected by special influences such as bad weather, epidemics, &c.—may be estimated in the aggregate at over 2,900.

At

\* These approximate estimates are calculated on the number of children who were at school on 13 December (the day appointed throughout the Colony for taking the school attendance), and the number of such who attended one, two, and three or more other schools during the year. It unfortunately happened that in this District no less than nine schools (including the largest) were closed on that day, owing principally to the prevalence of epidemics—scarlet fever and measles.

At the close of the inspection of each school I instructed the teacher to forward to the Principal Attendance Officer the names of the unenrolled children, and of those pupils who without sufficient reason had failed to complete seventy days' attendance during the preceding half-year, but for so far without any result whatever. The facts given, however, go to show that when Attendance Officers extend their operations to this district they will find scope for the exercise of their functions.

### III.—INSPECTION. CONDITION OF SCHOOLS.

#### 1. General Results of Inspection.

Sixty-six (66) of the 71 schools were fully inspected. The remaining five were—  
 Hillas Creek, Public : Closed early in the year, before I had an opportunity of visiting it.  
 Wagga Wagga, boys'. } Schools temporarily closed by the Minister while the inspections  
 Wagga Wagga, girls'. } were in progress in December, owing to the prevalence of  
 Wagga Wagga, Evening. } scarlet fever.  
 Wantabadgery, Provisional.—Came into existence very late in the year, when the time proper for inspections was past.

Of the 66 schools inspected—

35, or 53 per cent., were below the standard of efficiency (fair).  
 12, or 18·2 per cent., were up to the standard.  
 19, or 28·8 per cent., were above the standard.

The aggregate attendance at inspection was 2,767 pupils, of whom 1,066 or 38 per cent. were in the 35 inefficient schools, and 1,701 or 61·5 per cent. were in the 31 efficient schools. The total number examined and the total at efficient schools would have been larger had the inspection of the Wagga Wagga schools not been prevented.

These results show that the inefficient schools are chiefly small schools, which must of necessity be placed in charge of teachers of least experience and ability, and some of which have been but a short time in existence.

One hundred and thirty-eight (138) of the children present at inspection were very young, and had been so short a time at school that they had made no measurable progress. Of the remaining 2,629—

1,483, or 56·4 per cent., were in the 1st (lowest) class.  
 619, or 23·5 per cent., were in the 2nd class.  
 430, or 16·4 per cent., were in the 3rd class.  
 97, or 3·7 per cent., were in the 4th class.

Keeping in view the facts that a pupil cannot be prepared to satisfy the "standard of education" (sec. 20 of the Act) until he has spent some time in the third class, and that he ought to be in that class at twelve years of age, it will be interesting to compare this table with the following :—

1·7 per cent.	of the pupils are under 4 years of age.
12·6 per cent.	" " 4 to 6 years of age.
62·5 per cent.	" " 6 to 12 "
15·8 per cent.	" " 12 to 14 "
7·4 per cent.	" " over 14 "

The comparison shows that while 23·2 per cent. of the pupils should be qualified, or actually qualifying themselves, to obtain the "certificate of a child being sufficiently educated," only 20·1 per cent. are actually in that position. The difference is not great; it is, I think, almost fully represented by the pupils of advanced age who have but recently had the means of education brought within their reach; and it will probably be much reduced, if not altogether removed, during this year.

The "certificate of a child being sufficiently educated" were not issued during 1881, but they are now ready; and from the statistics given, it may be expected that some 500 children will receive them during 1882.

#### 2. Management of the Schools.

##### (a) Organization.

The material provisions have already been reported on; they are of course the direct business of the Department; but teachers can do a great deal to improve such provisions, and make them to the fullest extent subserve educational ends. I regret, however, that in respect of the industry, ingenuity, and taste which might be bestowed upon school premises and appointments, I have but little of a commendatory character to report. The school premises at Bruce's Dale, Mount Adrah, Sheperdstown, and Windorrie, present a particularly pleasing and attractive appearance; and the teachers at Wagga Wagga and Adelong have bestowed a good deal of attention on the general aspect of their schools. But generally school premises remain from time to time in much the same state in which the teachers found them; indeed, some of them bear traces of positive neglect.

The departmental provisions for supplying trees and shrubs have been availed of to a very limited extent.

The schools have not throughout been found as well stocked with apparatus and working material as is desirable, but this has been to a large extent owing to the faulty execution of school requisitions for supplies. Several teachers—especially the younger and less experienced ones—have yet to learn judgment in preparing their requisitions, and care and economy in the use and preservation of their school stock.

The classification of pupils is, as a rule, correctly and judiciously made. The exceptions are nearly all in the cases of new teachers, who have been at a disadvantage from being unable to obtain the prescribed standards of proficiency,—a loss which they have much felt in the preparation of their programmes of work also.

The occupation of the pupils is provided for in a fairly satisfactory and profitable manner by the time-tables drawn up by the teachers.

The records are correctly and properly kept in nearly all the schools, but in the preparation of returns there are far more inaccuracies and shortcomings than should occur. I am forced to the conclusion that a number of teachers prepare their returns, especially those which have to be compiled at the breaking-up of the schools for holidays, very hurriedly, and without due regard to the importance of the matter, or to the trouble and inconvenience which their carelessness occasions.

In respect of organization, as far as the teachers can be held responsible for it—

25	of the inspected schools, or 37·9 per cent., exceed fair (the standard).
24	" " 36·3 " are up to "
17	" " 25·8 " are below "

##### (b) Discipline.

This is the most satisfactory branch of the management of the schools. It is a rare thing to find a school in which the pupils are not reasonably clean, mannerly, orderly, and obedient. And these results have been secured in almost all cases by proper and laudable means—moral influence, backed up by the knowledge that punishment can and will be inflicted if necessary. The power of administering corporal punishment has, on the whole, been judiciously and beneficially employed by the teachers.

The least satisfactory feature in connection with the discipline is punctuality of attendance; but this is in many cases beyond the teacher's control.

The

The only characteristic defect is the general want of a knowledge of military drill—a want which will continue to be found in the schools as long as it exists amongst the teachers, a large proportion of whom have never had an opportunity of acquiring the necessary knowledge. Some teachers have attempted to gain it by studying drill books, but the results give little ground of hope that any progress worth speaking of will be made by this means. Some of the teachers who have gone through a course of drill in the Training School do not show that interest in and attention to the matter which are desirable. In eight schools attended by some 300 children there cannot be said to be any proper drill. Only 1,125 children, or 46.9 per cent. of those who *are* instructed in drill, and 42.6 of those who *ought to be*, exhibited satisfactory proficiency.

In respect of general discipline—

34 schools, or 51.5 per cent., exceeded the mark fair.  
26 schools, or 39.4 per cent., reached            "  
6 schools, or 9.1 per cent., were below            "

(c) *Instruction.—Proficiency.*

It is in this most important branch that the lowest results are to be reported. In respect of it—

43 schools, or 65.1 per cent., were found to be below the standard.  
8 schools, or 12.1   "            "            up to            "  
15 schools, or 22.8   "            "            above            "

The 43 schools in which the results of instruction were below the standard contained, however, only 47.8 per cent. of the total number of children examined, and even this proportion somewhat exaggerates the number of children who are not being instructed in a satisfactorily efficient manner, inasmuch as in the 43 schools are included some which had been so short a time in existence that satisfactory proficiency could hardly be expected. After making all allowances, however, the result must be pronounced unsatisfactory, and decided improvement must be demanded.

Did the numbers represent merely the proportion of children who can read, write, cipher, and spell with a degree of proficiency commensurate with their ages the result would be very different; but proficiency under the course approved in our schools takes cognizance of English grammar, geography, knowledge of common objects and phenomena, elementary drawing and vocal music, needlework for the girls, and Scripture and easy mathematics in the upper classes. That the standard fixed is not too high is proved by the fact that it has been reached in 8 and exceeded in 15 schools.

The course and range of instruction have for so far remained the same as under the late Public Schools Act. In only 28 schools was this course found to be carried out fully.

*History* was not found to have been introduced in any of the schools, as the teachers were awaiting instructions on the matter.

*Reading* is taught to all the pupils, 73.6 per cent. of whom satisfied the standard in this subject. The general result is thus above very fair.

*Writing* also is taught to all pupils; 69.1 per cent. satisfied the standard. The proficiency in this subject thus approaches very fair.

*Arithmetic* too is taught to all pupils, but only 21.6 per cent. have got beyond the simple rules. The proportion who satisfied the standard corresponding to their age and time under instruction was 58.6 per cent.—below fair. It would thus appear that this most important subject remains a weak one, a fact which I attribute largely to children being left to work too much by themselves, and receiving too little of explanatory instruction and home exercises. In a school in which—as in the majority of country schools—a teacher has to supervise three classes, he is frequently compelled to leave an arithmetic class to itself while he attends to classes engaged in oral lessons; but a thoroughly skilful teacher will always contrive to give in each class a sufficient amount of time and attention to explanatory instruction, with a view to the teaching of principles, and to smart mental and black-board work, to secure rapidity and accuracy in calculation.

*Object Lessons* are required in all schools, and are ostensibly taught to all pupils I examined. 68.2 per cent. satisfied the standard; general result, approaching very fair. In 6 of the schools the teaching in this subject was barren and fruitless, the teachers being evidently ignorant of the process of questioning out or of elucidating, and being satisfied with merely telling the children a mass of facts, generally in language above their comprehension.

*English Grammar* is required in all schools containing classes higher than the first, and is taught accordingly. In three (3) of the schools, however, the pupils failed in this subject. 64.7 per cent. of the pupils examined satisfied the standard; results, as a whole, above fair. Composition is not as well taught as grammar.

*Geography* is required within the same limits as English grammar, but is not as well taught. In four (4) schools the pupils failed, and only 52.1 per cent. of the children examined satisfied the standard. This subject is thus only tolerably well taught on the whole. As in the teaching of object lessons, there is a want of illustration both pictorial and concrete. I found pupils who could give a definition, but failed to recognise the thing defined when they saw it; and several who could name the features of a country or continent, but failed to point them out on a map.

*Scripture Lessons* are omitted, as allowed, in the four (4) Roman Catholic Schools; and in eight (8) of the other schools are either partially or wholly neglected, owing chiefly to parental objections. As a consequence, the number of children who satisfied the standard, though 69.1 per cent. of those examined in it, are only 50 per cent. of those who might study it under the Regulations. General result—only tolerable.

*Drawing.*—1,109 pupils are taught this subject, out of 1,146 who are competent to learn it under the Regulations. 53 per cent. of the pupils examined, or 51.3 per cent. of those who should have been presented for examination, satisfied the standard. This low result (tolerable) is mainly due to the fact that but few of the teachers can themselves draw well. The drawing lessons are in too many cases merely a means of keeping the children occupied while the teacher is engaged on some other lesson. Here and there in country schools children are met with who have a natural taste for drawing, and who have profited by the use of the drawing cards and other copies supplied by the Department, but as a rule anything approaching excellence is only to be found in town schools in charge of teachers who understand drawing and take an interest in teaching it.

*Singing* is prescribed for all classes, and should therefore be taught to all pupils—in the lower classes by ear and in the upper in connection with theory and from notation. The fact, however, falls lamentably short of this ideal. In only 36 schools was singing found to be taught. Little better than half the pupils present at inspection had received instruction, and of these 67.3 per cent., or only 34.4 per cent. of the whole, satisfied the standard. Nearly three-fourths of this number were in Infants' Schools, where singing is only taught by ear. Only eight (8) even of the trained classified teachers profess to teach both the theory and practice of vocal music, and, as a consequence, the number of children who leave the schools able to read even the simplest music is almost inappreciably small. The most that is as a rule attempted is to get the children to sing a few school songs which they pick up by ear. Several teachers who have been brought up in the Service, and have passed through the Training School, profess utter inability to teach this subject. The attempts which have hitherto been made to induce these teachers, and those who have not had some instruction in music, to acquire a knowledge of the subject and to teach it, have signally failed. The results as a whole in singing only slightly exceed indifferent.

*Needlework* is taught to the girls wherever practicable. In 14 schools, however, no arrangements can yet be made for teaching needlework by the teacher's wife, sister, or other person. In three schools—Wagga Wagga, Adelong, and Tumut—special workmistresses have been appointed. In schools

schools where the subject is attended to it is well taught, as is evidenced by the fact that 80 per cent. of the pupils examined satisfied the standard. This number, however, is only 58 per cent. of those pupils who are eligible for instruction. General result, fair.

*Euclid* is taught to 59 boys in 5 of the inspected schools, and 94.9 per cent. of these reached fair to good.

*Algebra*.—Of 43 pupils who are taught this subject, 38, or 88.3 per cent., satisfied the standard.

*Mensuration*.—Twenty pupils were presented for examination, and 11, or 55 per cent., passed from fair to good.

*Latin*.—Four pupils were presented for examination, and all of them passed well. They had, however, gone over but very little ground.

At the close of the inspection of each school a full report, with necessary suggestions and instructions, was left for the teacher's information and guidance. These, if turned to account, as in most cases I believe they will be, should do good.

The chief general defects in connection with the teaching of which I have to complain are a want of ingenuity and resource in the presentation of the matter of instruction, the neglect of regular preparation of work, resulting in adherence to a beaten round of stock lessons, and the neglect of pupils' home work. The truth is that there is a tendency on the part of a considerable number of teachers to think that by simply going to the school daily, and giving lessons as set down in the timetable in a routine sort of way, they satisfy all claims upon them. The proper remedy for this lies in more frequent inspection and oversight. Under existing arrangements Inspectors find it impossible, as a rule, to visit a school oftener than once a year, and then for the purpose of regular inspection. They have an annual opportunity of testing a teacher's work, and of telling him what to do and how to do it; but they have little, if anything, more. This might be sufficient were all the schools in charge of teachers who are masters of the principles and practice of their profession; but not so where, as in this district (see next section), the qualifications of the teachers as a whole are not up to the requirements of the schools, and the ranks have to be provisionally recruited from persons who join the Service first, and have to learn the practical business of teaching afterwards. Throughout the past year I have increasingly felt the necessity of revisiting schools for the purpose not of re-testing teachers' work, but of watching and directing them in it, and of actually showing them how to do things; but the demands of official correspondence, of examining and certifying returns, of compiling statistics, of routine office work, and of attention to matters of inquiry, were inexorable, and rendered such a course impossible.

#### IV.—TEACHERS.

The following table exhibits the classification of teachers required by the classification of the schools, and the classification of the teachers actually employed:—

<i>Teachers.</i>		
Classification.	Required.	Employed.
I. B. ....	3	0
II. A. ....	2	3
II. B. ....	9	6
III. A. ....	1	6
III. B. ....	18	8
III. C. ....	18	10
Unclassified. ....	17	32
Unknown. ....	0	2
Total. ....	68	67

Besides these 67 principal teachers, there are 6 assistants and 14 pupil-teachers employed.

The anomalies of the foregoing table are being remedied as far and as fast as practicable, by removals, and by the examination for promotion of those teachers who are not duly qualified for their positions.

The fact that 15 unclassified teachers are in schools entitled to classified teachers is owing to two circumstances:—

1. Some of the schools have been raised to the rank of Public Schools from that of Provisional Schools, and the teachers have been afforded an opportunity (six months) of duly qualifying themselves for their improved position.
2. It has been found impossible to obtain III C teachers for all vacancies in schools of classes 9 and 10, and the most promising of the unclassified teachers and candidates for small schools have necessarily been drafted into these positions.

These circumstances render it all the more necessary that a good class of small school candidates should be obtained. I have to report, however, that the supply of really suitable persons is not equal to the demand. There can be no doubt that until the Training School can be relied upon as a source from which teachers for vacancies in Public Schools may be obtained, such schools will not be efficiently filled. Unclassified teachers placed in charge of Public Schools are, of course, only provisionally appointed. In due course they are examined for the classification necessary to their permanent appointment; and though some of them, by virtue of their natural intelligence and aptitude, hard study and earnest work, pass the examination, they do not, as a rule, exhibit that familiarity and efficiency in their duties which might have been expected had they been properly trained.

*Pupil-teachers*.—Every locality except one has met its own requirements in respect of pupil-teachers, and I have also had to find in Wagga Wagga pupil-teachers for schools in the Albury and Yass sections. The pupil-teachers employed have all passed their regular annual examinations, and three of them have completed their course and gained admission to the Training School.

#### V.—SCHOOL DISTRICTS.

I subjoin a brief description of each School District and its educational condition.

##### 1. WAGGA WAGGA CIRCUIT.

*Wagga Wagga*.—This school district lies on the south side of the Murrumbidgee River, and includes the town of Wagga Wagga. The number of children of school age may be estimated at 1,100. The provisions made or aided by the State for the education of these are, the Public School (of three departments), and the Roman Catholic Boys' School. The former provides accommodation for 381 children in substantial well-situated buildings, but has an enrolment of 669 and an average attendance of about 440. Necessary measures have been matured for providing additional accommodation sufficient for prospective as well as present wants. The school has been gazetted as a "Superior Public School." The Roman Catholic Boys' School is conducted in good and commodious premises, but not suitably furnished. It has an enrolment of 123, and an average attendance of over 100. Both schools are under very fairly efficient management.

The remainder of the school population comprise the children who attend the Convent School, those under private tuition, and neglected children.

*North Wagga Wagga* is on the north side of the Murrumbidgee, and contains a school population of 130, of whom 88 belong to the Public School established, and a few of the remainder attend school in Wagga Wagga. A good site has been secured, and a house has been purchased as a teacher's residence. Plan and specification for a commodious schoolhouse have been approved. Meanwhile school is being conducted with a fair degree of efficiency in rented but inadequate premises.

*North*

*North Wagga Railway Station* (Bomen). To meet the wants of a school population of about 50, a Public School, conducted in a tolerably efficient manner, is carried on in fairly suitable premises rented for the purpose. Enrolment, 49; attendance, over 30.

*Brucevale* has a school population of 40. Excellent and well appointed school premises are provided, and a fairly efficient school is maintained, with an enrolment of 36 and an average attendance of 30.

*Downside* has a school population of 40, and school accommodation for a much larger number. 32 are enrolled, and the average attendance is about 30, but rising. The school is efficiently managed.

*Murrar* has a fluctuating school population of 20, which towards the end of the year showed signs of decrease. A tolerably efficient Provisional School is at present maintained, but its permanence is doubtful.

*Malebo* has a school population of 35 to 40, to provide for whom a Public School is to be at once opened in a school tent.

*Oura*.—The wants of this locality will also be at once provided for by a tent school. Late removals from the locality leave a school population of only 20 to 25, so that for the present the school will be small.

*Emu Flat* is a field for a Provisional School of some 24 children, arrangements for the establishment of which have been submitted.

*Yarragundry* has a school population of 35. A Public School is established, which has an enrolment of 48 and an average attendance of 30 to 35. It is conducted in wretched premises, but tenders have been invited for new buildings. The management is but moderate.

*Collingullie* formerly supported a well-attended school, but owing to removals the school population has declined to about 20, and the attendance to 17. The management is tolerably efficient.

*Uranquinty*.—Excellent premises here provide adequate accommodation for the school population of 30. There is an enrolment of 38, and an average attendance of 20 to 25. The management is only moderate.

*Hanging Rock* is a field for a first class Provisional School, initiatory steps for the establishment of which have been taken.

*Yerong Creek* has a school population of 33. The Public School is at present conducted in a large bark hut, but a good site has been secured, and new buildings will be erected. Enrolment, 44; average attendance, over 30.

*Rowan* has a school population of 30, who are provided for by a small Public School, conducted in fairly suitable rented premises pending the erection of a schoolhouse. Enrolment, 35; average attendance, 18. Management, tolerable.

*Lake Albert*.—This locality has a school population of 60, for whom sufficient accommodation is provided in the Public School, which is fairly well managed, and has an enrolment of 55, and an average attendance of 35.

*Forest Hill*.—The school population proper of this locality is 30, but excellent accommodation is provided for 80. Enrolment, 41; average attendance, over 30. The school is tolerably well managed.

*Alfredtown* has a school population of 28. A Public School has been opened in a school tent, which has secured an enrolment of 37 and an average attendance of 25. The management is promising.

## 2. TARCUTTA CIRCUIT.

*Upper Tarcutta* has a school population of 25. A Public School is established, which is managed with a degree of efficiency approaching fair. Enrolment, 41; average attendance, 25.

*Umbango* has a school population of some 25 children, for whom a Provisional School will be established as soon as the residents provide the required building and furniture.

*Humula* has a school population of some 38 children. 39 are enrolled at the Public School, and the attendance averages 30 to 35. The accommodation is neither suitable nor adequate, but tenders have been invited for new buildings. The school is well managed.

*Oberne* has a school population of 32. The school premises are very inferior, but suggestions for improved accommodation are under consideration. The management is fair. Enrolment, 27; average attendance exceeds 20.

*Lower Tarcutta*.—The school population depends upon the gold-mines, and at present reaches 30. A Provisional School exists, which has an enrolment of 27 and an average attendance of 18 to 20, and is managed with tolerable efficiency.

*Hillas Creek*.—The school here fell through from want of attendance, but by shifting the school so as to catch the Mundarlo children it is expected that 32 children will be enrolled. One of Elford's patent houses is ready for erection as an experiment.

## 3. ADELONG CIRCUIT.

*Adelong* has an estimated school population of some 430. A Public School (of two departments) and a Roman Catholic School exist in the town. The premises of the former are excellent in kind and design, but provide hardly sufficient accommodation. The school is in a good state of efficiency, and has an enrolment of 358 and an average attendance of 268. The Roman Catholic School is also well managed, has an enrolment of 100 and an average attendance of over 60, and is conducted in the church.

*Mount Adrah*.—The population of this locality has declined of late years. An excellent and commodious schoolhouse is built, but it is with difficulty the school keeps alive. The present school population may be estimated at 20. The enrolment is 26; the average attendance, 14. The school is tolerably well conducted.

*Yaven Yaven* has a school population of 26. A Public School is conducted with tolerable success in rough premises, which will be superseded. Enrolment, 35; average attendance, 25.

*Sheparistown* has a school population of 128. A well-conducted Public School is carried on in excellent and admirably kept premises. Enrolment, 93; average attendance, 57.

*Greenhills*.—This locality contains only 20 children between the age of 6 and 14 years, but the Public School, which is efficiently conducted, has an enrolment of 23 and an average attendance of 21.

*Adelong Grove* is another now thinly populated locality, where an excellent schoolhouse has been built. The school population is 20. The Public School is tolerably well managed, has an enrolment of 25 and an average attendance of 20.

*Wandalga* has a school population of 25, for whom a new and good schoolhouse has been built. Enrolment, 26; average attendance over 20. Management, tolerable.

*Upper Adelong* has a school population of 40. New and suitable premises are provided. Enrolment, 43; average attendance, 31.6; management, tolerable.

## 4. TUMUT CIRCUIT.

*Tumut*.—The school population of this town may be estimated at 200. A Public School is conducted in very fair premises, is well managed, and has an enrolment of 149, and an average attendance of 106. The Roman Catholic School is carried on in fairly suitable premises. It has an enrolment of 68, an average attendance of nearly 50, and is fairly well conducted.

*Windowie*.—School population, 42. Excellent premises provided. School in a fair state of efficiency. Enrolment, 49; average attendance, 30.

*Ferndale*

*Ferndale*.—School population only 23. A Provisional School exists, but is in a low and declining state. Enrolment, 22; average attendance, 11 to 12. The teacher's management is fair.

*Gadara* has a school population of 36. The Public School premises are not large enough. The enrolment is 42, and the average attendance 32. The school is tolerably well managed.

*Tumut Plains*.—School population, 44. The premises require to be superseded by new vested ones. The Public School has an enrolment of 47 and an average attendance of 32. The management is but moderate.

*Blowering* has a school population of 41. Very fair Public School premises are provided. The school is fairly well managed, and has an enrolment of 41 and an average attendance of over 30.

*Lacmucac* has a school population of 38. Excellent premises provided. Enrolment, 37; average attendance, nearly 30. Management, barely moderate.

*Bomboulce* has a school population of 29, for whom a Provisional School has been established. Enrolment, 31; average attendance, 24. Management, fairly satisfactory.

*Wyangle* has only some dozen children, between six and fourteen years of age. A Provisional School exists. Enrolment, 13; average attendance, 10.6; management, tolerable.

*Gocup* has a school population of 46. Fair Public School premises are provided. The school is very fairly managed, and has an enrolment of 42 and an average attendance of 30 to 35.

*Minjary* has a school population of some 22 children, for whom it is proposed to establish a Provisional School.

#### 5. GUNDAGAI CIRCUIT.

*Gundagai* has a school population of about 150.

The Public School is conducted in old buildings, which are to be superseded, has an enrolment of 121 and an average attendance of 80 to 90, and is very fairly managed. The remainder of the children comprise those at the Roman Catholic School (maintained by the Church and under private tuition), besides some neglected children.

*South Gundagai* has a school population of 60. Pending the erection of buildings, the Public School is conducted in rented premises. It is very fairly managed, and has an enrolment of 71 and an average attendance exceeding 50.

*Adelong Crossing* has a school population of 50. Ample accommodation is provided in very fair Public School premises. Enrolment 44; average attendance, 25; management, tolerable\*.

*Tarrabandra* has a school population of over 30, for whose wants it has been resolved to provide by the establishment of a Public School.

*Brunyle* has a school population of 35. A Provisional School exists, which is but moderately managed. Enrolment, 29; average attendance, over 18.

*Wayragobilly* has a school population of 22, but the enrolment at the Public School is 29 and the average attendance 20. Sufficient accommodation is provided; the management is moderate.

*Edwardstown* has a school population of 45. The enrolment at the Public School is 39, the average attendance, 24. Fair premises are provided. The management is tolerably efficient.

*Jones' Creek* has a school population of 20 and maintains a Provisional School. The building is too small. Enrolment, 20; average attendance, 18. The school is fairly well managed.

*Nangus Creek*.—In this locality there are 35 children six to fourteen years of age. The Public School has an enrolment of 45 and an average attendance of over 30. The school is very fairly managed. The present wretched premises are to be at once replaced by proper school buildings.

*Five-mile Creek* has a school population of 18, for whom it is proposed to establish a small Provisional School.

#### 6. BETHUNGRA AND COOLAC CIRCUIT.

*Coolac* has a school population of about 50. Good premises are provided. The enrolment at the school (Public) is 45, and the average attendance 26. The management is but moderate.

*Bongonyalong*, with a school population of 15, is a field for the small Provisional School which exists with an enrolment of 23 and an average attendance of 13 to 14. The management is tolerable\*.

*Burra Burra*, with a school population of 25, also supports a Provisional School, which is tolerably well managed, and has an enrolment of 18 and an average attendance of 16.

*Mitta Mitta* has a school population of about 30, and supports a fairly well managed Provisional School. Enrolment, 30; average attendance, 25.

*Jugiong* has a school population of 44. The Roman Catholic School is the only existing one, but arrangements have been completed for the establishment of a Public School. The Roman Catholic School has an enrolment of 42 and an average attendance of over 32, and is in a very fair state of efficiency.

*Bethungra* has a school population (including those who come into school by rail) of 65. The Public School has hitherto been conducted in a wretched hut, but new and suitable buildings are in course of erection. Enrolment, 42; average attendance, 31; management, tolerable.

#### 7. JUNEE CIRCUIT.

*Junee Junction* is a rising place, the school population of which now reaches about 70, and is likely to further increase. The Public School has an enrolment of 83 and an average attendance of 46. It has recently been placed under proper management, and is conducted in a school tent pending the erection of properly organized buildings.

*Junee (old)* has a school population of 30. The Public School has an enrolment of 44 and an average attendance of 27. The management is tolerable.

*Junee Reefs, Wantiol, The Pinnacle*.—The Department has agreed to establish schools at these three places when the residents provide buildings, but the removal of families appears to have prevented this. School population, 18, 10, and 10 respectively.

*Yathella* has a school population of 27. A Public School has been established, at which an enrolment of 36 and an average attendance of 23 are secured. The management is fairly efficient.

*Wallacetown* has a school population of some 30, for whom a Public School will be opened in a tent early in 1882.

*Boree* has a school population of 20 to 25. A Provisional School will be opened immediately.

*Wantabadgery*.—Owing to the removal of families the school population has fallen to 15. A Provisional School has recently been opened.

*Clarendon* has a school population of 35, and maintains a fairly well conducted Provisional School, which bids fair to become a Public School. Enrolment, 44; average attendance, 29.

*Cooba Creek* has a school population of 26 and maintains a Provisional School, which is fairly well managed, and has an enrolment of 22 and an average attendance of 15.

#### 8. NARANDERA CIRCUIT.

*Narandera* has an estimated school population of 150. The Public School premises are not altogether suitable, and are to be superseded. Enrolment, 128; average attendance, about 90; management, only moderate.

*Gobbagully* has a school population of some 25, of whom only 14 are enrolled at the existing Provisional School. Average attendance over 12. The premises are fairly suitable, and the school is tolerably well conducted.

*Cuddall*.—Application for the establishment of a school now under consideration.

*Darlington Point* and *Wuldai* contain together a school population of about 40. Steps already taken to provide for these having borne no fruit so far, further inquiries will be at once made.

*Warangesda*.—

*Warrangesda.*—This is a mission for aborigines near Darlington Point. A Provisional School has been established in connection with the mission, and is attended by some thirty of the aborigines. The arrangements so far made are very primitive.

*Kindra.*—In this locality there are at present only some dozen children, between the ages of six and fourteen; but the Provisional School established has an enrolment of twenty, and an average attendance of eleven. The management is tolerable.

*Berry Jerry* has a school population of some 30. A Public School is conducted temporarily in rented premises, and has an enrolment of 35, and an average attendance of 20 to 25. It is tolerably well managed.

NOTE.—By the school population of a school district is meant the number of children 6 to 14 years of age within reasonable distance (say 2 miles) of a centre. In cases where the enrolment exceeds the school population, the difference is made up by children under 6 and over 14 years of age, and of those who travel a long distance to school.

#### VI.—SUMMARY.

The means of education have been considerably increased, and are likely to be still more so during 1882. The total attendance of children shows steady increase, notwithstanding that sickness has seriously interfered with it. Steps have been taken to provide improved and enlarged accommodation where required. The condition of the schools as regards efficiency is not as satisfactory as is desirable; and routine office work, correspondence, revision of reports, &c., take up so much of my time that I can only devote to the executive duty which would be the best means of remedying this state of things a share small in comparison with its importance and the necessity for it. The compulsory provisions of the Act and local supervision have not yet been extended to the district.

The year's experience as a whole is so far satisfactory that it has given the Department a knowledge of the educational condition of the District such as it never before possessed, and that it indicates some measure of progress which is likely to be accelerated during 1882.

D. S. HICKS,  
District Inspector.

District Inspector's Office, Wagga Wagga, 17 January, 1882.

NOTE.—Required tabulated statistics for the *whole* district under my superintendence are attached.  
15/3/82.

CHARLES HOOKINS,  
Inspector, Albury.

JAMES McCREDIE,  
Inspector, Yass.

D. S. HICKS,  
District Inspector.

District Inspector's Office, Wagga Wagga, 15 March, 1882.

## ANNEX U.

## MR. INSPECTOR HOOKINS' GENERAL REPORT FOR 1881.

1. At the commencement of the year there were placed under my immediate control the following schools :—46 Public, 9 Provisional, 4 Half-time, and 1 Certified Denominational. These are scattered over an area equal to one-sixth of the entire Colony, and in some cases they are nearly 200 miles apart.

In addition to the work of inspecting existing schools, I have been engaged in ascertaining the educational wants of localities not hitherto visited; and as a result preliminary arrangements have been made for the establishment of twenty-three schools at the following places :—

Argoon	Mohonga South
Boggy Creek	Rosewood
Boooroban	Quat-Quatta
Broome	Tamar
Burraja	Urangeline
Daisydale	Walbundree
Dahwilly	Wandook North
Brocklesby	Wandook South
Greg-Greg	Wyndham
Gal-Gal	Weebo
Gerogery	North Yanko.
Khancaban	

2. Schools are already in full work at seven of these places :—Broome, Greg-Greg, Khancaban, Quat-Quatta, Tamar, Walbundree, Weebo.

A Public School has also been established at Tocumwal.

One Public School and two Provisional Schools have been re-opened, three Provisional Schools converted to Public Schools, and two Provisional Schools closed.

At the end of 1881 there were under my immediate supervision the following schools :—Public, 51; Provisional, 14; Half-time, 4; Certified Denominational, 1. Total, 70 schools, showing an increase of ten schools; 5 Public, and 5 Provisional Schools opened or re-opened during the year.

A Public School at Burraja, and Provisional Schools at Gal Gai, and Urangeline, open at the commencement of the year 1882. Provisional Schools at North Yanko, Gerogery, and Wandook, North, wait the appointment of teachers. Final arrangements have been made for schools at Daisydale Public; Dahwilly, Provisional; Rosewood, Public; Brocklesby, Public; Boooroban, Provisional; Wandook South, and Boggy Creek; while applications for schools at Argoon, Mahonga, and Wyndham have fallen through from various causes.

One application for a school at Granville has still to be dealt with.

*Organization.*—Out of a total enrolment of 5,209 pupils, 3,752 are provided with comfortable accommodation, but to supply the deficiency important additions are determined upon, or are in progress, at Albury, Public (both departments), Balranald, Wagra, Black Range, Wentworth, Hay, Euston, Wandook, Batlow, Forest Vale, Booligal, and Wanganella, where pressure is chiefly felt. New buildings have also been completed at Mullengandra, Glenroy, Deniliquin, and Menindie.

In all these works the architect has carefully provided for ample space, improved ventilation, and properly distributed light, while external neatness of design has not been forgotten.

*Attendance.*—

*Attendance.*—For the year, 5,209 pupils were enrolled; and of these, in the case of sixty schools, from which returns have been received, 276 pupils had attended one or more other schools during the year.

Out of 3,569 children between six and fourteen years of age living within 2 miles of school, 447 were not believed to be receiving any instruction whatever; while of the 5,209 pupils of all ages enrolled, 1,912 attended 140 days or more, and 3,297 failed to do so from the following causes:—

a.	Through sickness,	629 pupils.
b.	“ truancy,	55 “
c.	“ removals,	702 “
d.	“ other causes,	1,911 “

The “other causes” referred to include domestic occupation, absence on messages, and downright negligence. In some few cases poverty is the alleged reason.

The following table exhibits the state of the attendance during the past year:—

Quarter.	Enrolment.			Average Attendance.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.
March .....	2,002	1,612	3,614	1,225·6	1,032·3	2,257·9
June .....	2,117	1,704	3,821	1,314·7	1,057·0	2,371·7
September .....	2,164	1,787	3,951	1,527·6	1,250·8	2,778·4
December .....	2,189	1,864	4,053	1,420·6	1,198·4	2,619·0

Average attendance for the year, 2,506·8 pupils.

Ordinary attendance for the year, 2,914 pupils.

A progressive increase is noticeable in the enrolment for the four quarters; but the average attendance shows a slight falling off in the December quarter. This is due to harvest work, shearing, and to a certain extent sickness.

For the year the percentage of average attendance to enrolment is nearly 65 per cent.

For March quarter	... ..	61·9 per cent.
“ June “	... ..	62·0 “
“ September quarter	... ..	70·3 “
“ December “	... ..	64·6 “

The past year has been one of much sickness among the pupils; scarlatina, measles, whooping-cough, and skin diseases, have been prevalent, requiring in several cases the schools to be closed to prevent contagion or infection.

NUMBER of Children between six and fourteen years of age in each School District.

Albury R.C.—No. of children embodied in the return for Albury Public.

It must be noted also that, on the “Plains” especially, children often ride long distances to school, and the drawbacks to a punctual and regular attendance are therefore much greater than in localities where children reside within moderate bounds.

*Inspection.*

*Inspection.*

During the year there were—

61 schools fully inspected.

1 „ that received an ordinary inspection in addition to the regular one.

9 „ not inspected, not being in operation at the time of my visit to the locality.

There were enrolled during the year 5,209 pupils, of whom 3,047 were present at inspection.

The following table exhibits the percentage of pupils who satisfied the standard in the various subjects of instruction :—

Subjects.	Number examined.	Satisfying Standard.
Reading .....	2,607	70·9 per cent.
Writing .....	2,638	78·2 „
Arithmetic .....	2,078	52·5 „
Grammar .....	1,496	74·9 „
Geography .....	1,590	67·3 „

Form .....	247	100·0 „
Colour .....	247	100·0 „

13 schools more than satisfied the standard.

15 „ satisfied the standard.

33 „ were under standard requirements.

To give effect to the Regulations as regards the classification of teachers and schools, examinations have been held in different parts of the district to afford teachers the opportunity of sitting for promotion. The results show that in several cases private study with a view to self-culture has been quite neglected. The following table exhibits the classification of the teachers at present working in my district :—

Second Class.		Third Class.			Unclassified.	
Section A.	Section B.	Section A.	Section B.	Section C.	Probationers.	Provisional Teachers.

.....	.....	1	4	4

Sewing-mistresses are employed at the Public Schools at Albury and Deniliquin.

*Instruction.*

The results obtained in the subjects of arithmetic, geography, object lessons, drawing, and military drill are not quite satisfactory.

As regards arithmetic, it is to be accounted for by the fact that my questions were not confined to those of a merely mechanical nature. One at least out of the four given to each class above the First depended for its solution upon the knowledge of some arithmetical principle, simple or abstruse, according to the grade of the class. In general the three mechanical questions were fairly dealt with, but the fourth proved a stumbling-block to very many whose bright intelligence seemed to promise better results.

To the want of an extended and thorough system of training for the teachers of our small schools must be attributed the comparatively low results obtained in drawing and object lessons, 64·5 per cent. and 58·4 per cent. respectively.

In military drill no great success has been achieved, except in schools located in the important centres of population. Many of the pupils arrive at school fatigued; and this, together with the heat of the climate and the difficulty in the rural schools of assembling in the cool of morning, the only prudent time for this lesson, has been a serious obstacle to the effective teaching of drill. I have, however, instructed the teachers generally that it must now form part of the ordinary school course, and receive the same attention as other subjects of instruction.

*Discipline.*

On the whole I have found the discipline fairly satisfactory. Cleanliness, good behaviour, and orderly demeanour prevail in nine-tenths of the schools; and while various causes, already mentioned, have interfered with the regular attendance of pupils, they have been very fairly punctual in assembling at the authorized hours.

Since my visits of inspection in 1880 considerable improvement is noticeable in the minor points connected with the working of schools. Greater economy of time and labour is observed, and the tone of the schools is much improved.

Corporal punishment, although employed as a corrective, has in few instances been used with severity, or where other and milder measures would have been effective.

The teachers as a body have laboured with patient and fairly successful energy, often in the face of great trials and discouragements, and they continue to enjoy general respect and esteem.

C. HOOKINS,  
Inspector.

ANNEX V.

## ANNEX V.

## MR. INSPECTOR JAMES M'CREDDIE'S GENERAL REPORT FOR 1881.

The number of schools under my supervision in operation at the beginning of 1881 was 65, consisting of 42 Public, 12 Provisional, 6 Half-time, and 5 Denominational Schools. Early in the year Mitten's Creek Public and Weddin Public were transferred to the Bathurst District, and the remaining 63 schools were with myself placed under the supervision of the District Inspector at Wagga Wagga.

Fourteen new schools were opened during the year, viz.:—6 Public—Cudgell Creek, Kilrush, Mugwell, Tangmangaroo, Wallendbeen, and Woodonga; 4 Provisional—Ironbong, Julong, Litledale, and Winduella; 4 Evening Public—Cunningar, Murrumburrah, Cootamundra, and Yass. The Evening Public Schools established at Cunningar and Murrumburrah at the close of 1880 were duly opened, but were subsequently closed from want of attendance. Four other schools were also closed during the year, viz.:—Cootamundra Evening Public; Yass Evening Public; Throsby Creek Half-time, and Tangmangaroo Half-time. Cootamundra Evening Public was in operation for two weeks, with an average attendance of 8·8, and Yass Evening Public for three weeks, with an average attendance of 4·8. The Half-time Schools at Throsby Creek and Tangmangaroo were superseded by a Public School at the latter place in July last. The Public School at Tipperary Gully was removed to new vested premises in September. The total number of schools in operation at the close of the year was 71. These consisted of 50 Public, 12 Provisional, 4 Half-time, and 5 Denominational Schools.

Thirteen schools were established during the year, six are in course of establishment, and four are projected. Applications for the establishment of Provisional Schools at Bellmount Forest, Demondrille Creek, and Galong, were declined, after careful inquiry had been made in each case. To the residents of Galong, a Half-time School to be worked in conjunction with one at Rocky Ponds, has been offered. Four Provisional Schools—Canberra, Felled Timber, Marina, and Sutton—were converted into Public Schools.

Existing schools are judiciously distributed throughout the district, and when arrangements are completed for opening schools already established, or in course of establishment, together with those projected, the means of education will be fairly brought within the reach of nearly all children of school age in the district.

The total number of schools in actual operation during the whole or part of the year was seventy-five. Of these seventy-one were fully inspected; three for special reasons received two inspections, and in one instance an ordinary inspection was made. The following schools were not inspected for reasons stated opposite each:—

1. Yass Evening Public..... Want of time and opportunity. School in operation three weeks.
2. Cootamundra Evening Public..... Want of time and opportunity. School in operation two weeks.
3. Throsby Creek Half-time..... } Not in operation when I visited the locality. The children enrolled at these schools were examined at Tangmangaroo Public.
4. Tangmangaroo Half-time ..... }

The material condition of the school buildings is with few exceptions satisfactory. Necessary repairs to the Provisional School buildings at Bango Creek and Farrington were effected by the local Committee of each school. Young Roman Catholic School and Teacher's residence have also undergone much needed repairs at the expense of the Local Board. Important additions or repairs have been made by the Department to the Public Schools at Two-mile Creek and Cootamundra. Repairs and additions have also been sanctioned to the Public Schools at Bowning and Murrumbateman. New Public School buildings have been erected and opened at Mugwell and Tipperary Gully, and others are in course of erection at Nelanglo and Elizabethfield. Action has also been taken for the erection of new Public School buildings at Tallagandra. School tents were provided during the year for Public Schools at Cudgell Creek, Kilrush, Stony Creek, Tangmangaroo and Temora. Weathersheds have been erected for Yass Public and Cullinga Public, and sanctioned for the following Public Schools:—Binalong, Bowning, Frogmore, Gundaroo, and Murrumbateman.

The schools are adequately found in teaching appliances. In very few instances has neglect been shown by teachers in the keeping and preservation of the school furniture and material. A marked improvement in the internal appearance of the schoolrooms was observed, but comparatively little has been done to improve the appearance of school grounds by the planting of trees and shrubs and the making of flower borders and gardens.

Adequate accommodation is provided by existing school buildings for the number of children of school age within a reasonable distance of the several schools. This statement is fully borne out by the subjoined table:—

Classes of Schools.	Floor area of schoolrooms in square feet.	Space of schoolrooms in cubic feet.	Number of children of school age within reasonable distance of schools.	Number of square feet per child.	Number of cubic feet per child.
Public Schools .....	25,230	305,640	2,974	8·4	102·7
Provisional Schools .....	3,759	29,560	267	13·7	110·7
Half-time Schools .....	921	9,054	88	10·4	102·8
Denominational Schools .....	6,255	78,657	570	10·9	137·9
All Schools.....	36,165	422,911	3,899	9·2	108·4

In the above table the number of children between six and fourteen years of age who might reasonably be expected to attend existing schools under my supervision is given. For December quarter, 1881, the enrolment of pupils in the several classes of schools was as follows:—Public, 2,926; Provisional, 316; Half-time, 90; Denominational, 493. It will be observed that the enrolment for December quarter in Provisional and Half-time Schools is in excess of the number of children within a reasonable distance of such schools. The disparity is accounted for by the fact that the homes of many of the children are from 3 to 5 miles distant from the schools in their several localities. Provisional and Half-time School buildings are erected at the expense of the promoters of the schools, and rarely exceed 8 feet in height, but are otherwise of suitable dimensions. Allowing 8 square feet of floor area per child, existing Provisional Schools would accommodate about 470 pupils, and the Half-time Schools 115 pupils. Again, allowing 100 cubic feet of space per child, the Provisional Schools would accommodate about 296 pupils, and the Half-time Schools 90 pupils.

In all schools there were 5,261 pupils enrolled during the year. Of these 175 were enrolled two or more times. The number of children present at inspection was 2,619, and the number in ordinary attendance 2,690. The average attendance for the year in all schools was 2,542·7. The average attendance for each quarter of the year was as follows:—

March quarter .....	2,309·8
June quarter .....	2,408·6
September quarter.....	2,544·0
December quarter.....	2,399·3

The

The falling off in the attendance for December quarter is attributable to the prevalence of whooping-cough, measles, scarlatina, and dysentery in many localities, the unsettled state of the weather, and to the fact that many of the elder pupils were detained at home during the latter half of the quarter to assist in shearing and harvesting operations. In March quarter the average attendance was 66.1 per cent. of the enrolment; in June quarter, 63.9 per cent.; in September quarter, 66.3 per cent.; and in December quarter, 62.7 per cent. Viewed in relation to the number of children of school age within a reasonable distance of each school, the attendance for the year is fairly satisfactory.

The subjoined table, compiled from information furnished by teachers at the close of the year, presents another aspect of the attendance in relation to the school population:—

	Public Schools.	Provisional Schools.	Half-time Schools.	Denominational Schools.	Totals.
Number of children between six and fourteen years of age who might reasonably be expected to attend existing schools. ....	2,974	267	88	570	3,899
Number of such children not known to be receiving statute education. ....	359	19	29	32	439
Number of pupils who attended school 140 days or more during 1881. ....	1,468	122	51	226	1,867
Number of pupils who failed to attend school 140 days during 1881. ....	2,619	249	96	415	3,379
(a) Through sickness. ....	292	25	2	48	367
(b) Through truancing. ....	8	1	0	3	12
(c) Through removal from the locality. ....	919	56	1	46	1,022
(d) Through other causes. ....	1,400	167	93	318	1,978

Teachers in the Public Service throughout the Colony were required to furnish at the close of the year a return as to the attendance of pupils in the schools under their charge on Tuesday, 13th December, 1881. The day was favourable as regards the weather, but sickness, harvesting, and other farm work, considerably reduced the attendance in many schools. Exclusive of two schools not in operation at the time, and two others from which no returns have yet been received, there were on the day appointed 2,211 pupils in attendance at schools under my supervision. Of the number then present, 264 pupils had attended one other school, and 27 had attended two other schools during the year.

An improvement in the discipline of the schools was a pleasing feature of the year's inspection. It is to be regretted, however, that little or no attention is paid in the majority of schools to the teaching of military drill. In a few schools an effort has been made to teach the subject thoroughly and systematically. Teachers frequently plead that they are utterly ignorant of the subject, and hence cannot be expected to teach it. This plea, however, cannot be honestly advanced by such teachers as have had the advantage of training. In some instances untrained teachers have promised to procure a Manual of School Drill, and to master, if possible, the elementary parts of the subject, with the view of introducing it in their schools. It is needless to add that I shall gladly supplement such praiseworthy efforts by every assistance in my power as opportunity offers.

The instructional documents in the majority of schools are not drawn up with sufficient care and neatness, and the entries in the Lesson Register are, as a rule, wanting in explicitness. Of the subjects of instruction, writing, arithmetic, object lessons, elementary grammar, elementary geography, and composition, are the least skilfully taught.

The number of pupils present at examination was 2,619.

The subjoined table shows the subjects of examination, the number of pupils examined, and the percentage of pupils who satisfied the standard in each subject:—

Subjects.	Number of Children examined.	Percentage ranking from "Fair" upwards.
Reading. ....	2,619	64
Writing. ....	2,617	69
Arithmetic. ....	1,822	56
Grammar. ....	1,235	64
Geography. ....	1,310	68
Scripture Lessons. ....	484	84
Object Lessons. ....	2,502	59
Drawing. ....	1,111	74
Music. ....	1,295	66
Euclid. ....	47	89
Algebra. ....	38	89
French. ....	7	100
Latin. ....	76	68
Needlework. ....	881	70
Drill. ....	665	77

Of the 71 schools inspected, 52 per cent. were in point of efficiency up to or above the standard, while 48 per cent. were below it. In 1880, 47 per cent. of the 34 schools inspected from 1st May to 31st December were up to or above the standard, and 53 per cent. were below it. A comparison of these results will show that reasonable progress has been made during the year.

With one or two exceptions, the teachers in the district have won the confidence and esteem of the parents in their respective fields of labour. Many of them have not only manifested increased zeal and earnestness in their work, but have also given greater attention to study, with the view of qualifying themselves for the retention of their present situations, or for higher positions in the Service. The pupil-teachers are industrious, diligent, and painstaking in the performance of their duties, but several of them are not sufficiently studious.

At the close of the year the teaching staff consisted of 69 principal teachers, 2 assistant teachers, 2 work-mistresses, and 12 pupil-teachers.

The classification by examination of the teachers in charge of schools or departments under my supervision is as follows:—

Class II, section A. ....	1
" II, " B. ....	11
" III, " A. ....	14
" III, " B. ....	9
" III, " C. ....	5

The number of unclassified teachers is 29. Each of the two assistant teachers holds Class III, section A, by examination. Of the 12 pupil-teachers, 8 are in Class IV, 1 is in Class III, and 3 are in Class I.

Summary

*Summary remarks.*—Fourteen new schools have been opened during the year, and 6, consisting of 4 Evening Public and 2 Half-time Schools, have been closed. Thirteen schools have been established, 6 are in course of establishment, and 4 are projected. Adequate accommodation is provided by existing schools for the number of children of educable age within a reasonable distance of each school. The schools are judiciously distributed; the material condition and organization are with few exceptions satisfactory; the discipline has improved; the results of inspection compare favourably with those of the past year; and, speaking generally, satisfactory progress has been made in the work of education.

Inspector's Office, Yass, 30th January, 1882.

JAMES M'CREDDIE,  
Inspector.

#### ANNEX W.

##### MR. INSPECTOR M'INTYRE'S REPORT ON EVENING PUBLIC SCHOOLS.

*The Minister's memorandum, dated 1st August, 1881, respecting the working of Evening Public Schools:—*

"I HAVE observed that it is stated in the Sydney Press that Night Schools are dying away for want of support, or some other want. I presume the Inspectors in Sydney have as much to do at present as they can do. Could not some other qualified gentleman look into the matter, with a view to reporting on the whole matter of Evening Schools?"

"J.R."

"To the Under Secretary and the Chief Inspector."

The Chief Inspector, for report.—W.W., B.C., 3rd August, 1881.

Mr. Inspector M'Intyre, for report.—E.J., B.C., 9th August, 1881.

The Chief Inspector,—I forward my report and all former papers herewith.—W.M., B.C., 25th January, 1882.

#### MEMORANDUM TO CHIEF INSPECTOR.

##### *Evening Schools—as to working of.*

As to the working of Evening Public Schools under the Public Instruction Act, I have to report as follows:—

In the first place, I beg to notice that Evening Public Schools are intended for the instruction of persons who have not received the advantages of a primary education. In accordance with the 37th section of the Act, on 20th July, 1880, Regulations were issued for the management of Evening Schools. These Regulations show the mode of application, that persons below the age of fourteen years are not eligible as pupils; that all Teachers must be trained, placed in Class 3, and appointed by the Minister. The Regulations further provide that the ordinary school furniture and apparatus of any Public School and the schoolroom may be used in the management of an Evening School, and that the necessary books will be supplied. The time of meeting is not to be less than two hours, three times weekly. The course of instruction is secular, and includes reading, writing, arithmetic, grammar, and geography. The weekly fee for each pupil is fixed at 1s., and teachers' salaries range from £20 to £40 per annum for average attendances of pupils varying from ten to forty. The Teacher provides fuel and light, and the records, returns, inspection, and control are in all respects the same as for Public Schools.

In accordance with these Regulations, in the latter half of the year 1880 there were fifty-two applications made for the establishment of Evening Schools in various portions of the Colony, including agricultural settlements, as well as large towns and mining districts. In forty cases the applications were agreed to, and twenty-four schools were brought into operation, attended by 695 scholars.

During the nine months of the year 1881, ending 30th September, it appears that the number of applications increased from fifty-two to seventy-eight; but at that date six of these had not been brought into operation. Of the remaining seventy-two, about twenty-six, or more than one-third of the number, were closed or to be closed, for want of scholars, and the prospects and permanency of many others were very discouraging. The Inspectors and District Inspectors report unfavourably of the success of the schools, owing to the want of pupils and the irregular attendance of the scholars promised. The following is a list of schools closed:—

Glendon Brook,	Lowther,
Newcastle South,	New Lambton,
Stockton,	Macquarie Plains,
Newcastle,	Bulli,
Eurunderee,	Giant's Creek,
West Kempsey,	Walang,
Warren,	Bell's Creek,
Narrabri,	North Richmond,
Murrumburrah,	Kiama,
Cunningar,	Tenterfield,
Vegetable Creek,	Bundarra,
Wollongong,	Jamberoo,
Newbridge,	Mayfield.

District Inspector Bradley, of Armidale, reports that of the 11 Evening Schools established under his supervision, 5 have been closed after a short existence, owing to the average attendance falling below 10, and that the remaining 5 are likely to be closed shortly. District Inspector Maynard, of Maitland, reports that of 14 Evening Schools established in his district under the most favourable circumstances, only 3 are in existence, and may continue for a short time, owing to the support they receive from working-men. District Inspector McCredie, of Sydney, reports that Evening Public Schools have not proved successful. Nearly all those opened under his supervision have failed to maintain an average of 10. District Inspector Bridges, of Wellington, reports that of the 4 Evening Schools established in that district, 2 have been closed, and that the one at Mudgee is not a success. District Inspector Hicks, of Wagga Wagga, reports that of the 7 schools which the Department consented to establish, only one is in operation. District Inspector Dwyer, of Goulburn, reports that of the 5 Evening Schools established in that district, 3 have been closed from want of attendance.

From these reports it is evident that Evening Schools have not been successful. Before attempting to give any reasons as to the probable cause of this, I would call attention to the want of success of these schools in the Colony of Victoria, where the pupils pay no fees for their instruction. The Inspectors in Victoria report on the Night Schools of that Colony as follows:—Mr. Inspector Tynan reports that "the advantages of Night Schools are utterly worthless." Mr. Inspector Curlewis says, "Night Schools have only a weakly existence for a month or two." Mr. Inspector Holland reports that "Free Night Schools have not proved a success." Mr. Inspector Gamble is of opinion that "Mixed Night Schools should not be established." Mr. Inspector Stewart reports that "all the Night Schools in my district are now closed." Mr. Inspector Shelton reports "there is only one Night School in my district." Mr. Inspector Russell states that "the good done by Night Schools is not commensurate with the expense." Mr. Inspector Hepburn reports "there is only one Night School in operation in my district, and it is in a moribund state."

I am of opinion these remarks show that Night Schools in Victoria are not more successful than they are in New South Wales, although the pupils pay no school fees.

The Evening Schools in New South Wales have been established in some respects under the most favourable circumstances. The schoolrooms were suitable, the educational appliances sufficient, and competent teachers were appointed. With the Regulations no fault can be found. In Victoria, as already noticed, the schools are free to the pupils, but the results are equally as unsatisfactory as in this Colony, and on that ground I do not think that reducing the fee would have any beneficial effect.

As to the cause of Evening Schools not being more successful and better attended, I think the real reason is that a sufficient number of pupils cannot be found willing to attend. Several causes operate in producing this result.

Among these the following may be mentioned:—

1. Evening Schools are at present established where 10 scholars promise to attend, and an average of 10 is required. According to the principle upon which averages in other schools are estimated, no Evening Schools should be established unless at least 20 scholars promise to attend. It is quite clear that an enrolment of 10 scholars cannot maintain an average of 10. This is the principal reason why many schools have been closed so soon.

2. The Regulations very properly permit no scholars to attend Evening Schools under the age of 14 years, as they are to attend day schools until educated up to the required standard. There is no doubt but that this rule lessens the number of scholars that otherwise would have attended Evening Schools.

3. Although the Act and Regulations do not exclude female pupils from the Evening Schools, very few attend. In most of the schools no females are enrolled. It is evident that the non-attendance of females must lessen the number of pupils considerably, but that is not a matter for regret, because mixed Evening Schools have not been found to be desirable institutions.

4. Evening Schools are not so much needed now, and not so well-attended as they were say twenty years ago, when half the people were unable to read, and Day Schools few and far apart. The more efficient the Public Schools become, and the more strictly the compulsory clause of the Act is applied, the less need will there be for Evening Schools.

5. As most of the persons for whom Evening Schools are intended have to work all day as servants or for their parents, they are weary of work in the evening, and seek rest or amusement rather than learning and study, which under proper discipline they find too severe after their daily labour.

6. In America and France, Evening Schools are kept in operation only during the winter months, but in this Colony they are established with the view of being continued, in most cases, throughout the year.

#### RECOMMENDATIONS.

The Evening Schools under the Public Instruction Act having been established under such favourable circumstances, I am of opinion that very little can be done to secure a larger or more regular attendance of scholars. As the persons for whom the schools are intended are unwilling to attend them, I do not expect much educational progress through the agency of these institutions.

I would recommend, however, that no Evening School should be established unless there is a promised enrolment of 15 scholars residing within one mile of the proposed schoolhouse.

2. That the schools be kept in operation only half the year, from 1st April to 30th September.

3. That the teaching of grammar and geography be left to the teacher's option.

W. MINTYRE,

Inspector of Schools.

Glebe, 25th January, 1882.

Under Secretary.—I concur in recommendations, as amended. The general testimony of the Inspectors is to the effect that Evening Public Schools are not a success: all are pretty well agreed that the regulations under which they have been established could hardly be improved upon, and also that other conditions necessary to their success have not been wanting. Altogether, this feature of our educational system is not a hopeful one.—B.C., 17/2/82, E.J.

## Memorandum to Chief Inspector.

EVENING SCHOOLS—As to working of.

THESE schools have not proved successful. Nearly all those opened in schools under my supervision have failed to maintain an average of 10—the minimum required by the Regulation.

I do not think these schools are likely to prove a success unless in very populous localities, and even there not for the whole year.

I would recommend that these schools be opened only from April to September each year, and that the subjects be confined to reading, writing (including dictation), arithmetic, and composition (including letter writing).

J. M'CREIDIE,  
District Inspector.

Sydney, 5th January, 1881.

Mr. Inspector M'Intyre.—E.J., B.C., 9/1/82.

## Memorandum to Mr. District Inspector M'Creddie.

EVENING PUBLIC SCHOOLS—Your memo. of 20th September, 1881.

1. Evening Public Schools were established at Broughton Vale, Berkeley, Bulli, Kiama, Marsha Mt., Picton, and Wollongong.
2. Only four of these secured the required attendance, viz., Kiama, Marshall Mt., Picton, and Wollongong. Picton is the only one which at present maintains the required minimum.
3. This is, I think, owing to the unwillingness of the young men to forego other, to them, more agreeable methods of spending their evenings to which they have been accustomed. This is especially the case during the summer, when the long afternoons enable them to join in cricket and similar games after their ordinary work is over.
4. Berkeley, Marshall Mt., and Broughton Vale, are farming districts, in which the population is very scattered; and though in such localities a considerable number, acting under instructions from their parents, may be found to promise to attend, yet it is improbable that a sufficient attendance could be kept up. I am of opinion that very few cases will occur in which Evening Schools can be maintained in such localities, and that during the summer months the same will be found true with reference to the smaller towns.
5. I would suggest—
  - a. That Evening Schools be kept open during the winter months only, viz., from 1st April to 30th September.
  - b. That the minimum attendance be lowered to eight.
  - c. In Sydney and other large towns they might be continued in operation throughout the year.

W. H. JOHNSON,  
Inspector.

Wollongong, 10th October, 1881.

Memorandum

## Memorandum of Inspector to The District Inspector.

Sydney E. District.

Touching your memorandum concerning Evening Schools, I have to reply:—

1. That there is only one at present in operation in my district. It is held in the Bourke-street premises by the teacher of the Day School. I have not yet been able to examine the pupils, so that I cannot speak of the attainments; but I learn from the late quarterly return that the attendance is far from satisfactory. During three weeks out of the eleven the school was not held at all, in consequence of the absence of pupils, and out of an enrolment of fifty-four the average for the remaining eight weeks was only 16.5.
2. The only suggestion I am at present prepared to make is to the effect that the Minister should refuse to establish Evening Schools unless with the understanding that those for whom they are established will remain pupils for a given period and attend a given number of times in the quarter; and that new pupils be admitted only on the promise that they during the quarter will attend a number of times not fewer than a certain minimum, and I beg to recommend that the Minister be requested to fix such minimum. Further, I would respectfully suggest that the minimum be not less than two-thirds of the total number of school nights in the quarter.

R. N. MORRIS,

St. Leonards, 3/10/81.

## Memorandum to Chief Inspector.

EVENING PUBLIC SCHOOLS—Report upon the working of.

Your B.C. memo., No. 81-7,298, dated 24th August ult.

SINCE the passing of the Public Instruction Act of 1880, eleven (11) Evening Schools have been established in the district under my supervision, viz., Armidale, Bundarra, Fernmount, Grafton, Kompsey, Narrabri, Port Macquarie, Rob Roy, Tenterfield, Tamworth, and Vegetable Creek. Of this number, five have been closed, after a comparatively short existence, in consequence of the average attendance having fallen below the minimum required. The schools now in operation (6) are Armidale, Bundarra, Rob Roy, Fernmount, Port Macquarie, and Tamworth. The three latter have been but recently opened, and no reports have yet come to hand from the teachers. Of Fernmount, however, Mr. Willis says, that "though but just established, it is not working well." Armidale Evening School has at present an average attendance of 14, but the teacher is afraid that the minimum of 10 will not be maintained throughout the current quarter. Rob Roy barely maintains the average required, and Bundarra has been below for the past two quarters. It is thus evident that the working of the Evening Schools in this district is by no means successful; and so many obstacles to their effectiveness exist that it is difficult to suggest any practicable remedies. In the first place, the pupils, so far as their attendance at night school is concerned, are their own masters; and in the towns, where evening entertainments are frequent, they invariably prefer to resort to a place of amusement rather than to school. Again, nearly all of the evening pupils are employed in some form of manual labour during about ten hours of the day; and this in a measure unfits them for, or at any rate indisposes them to, mental application at night. A few of the pupils—very few, however—actuated by an earnest desire for improvement, overcome the irksomeness of the task, maintain a steady attendance, and work diligently; but the majority soon find study tedious and restraint galling, attend only when in the humour, and ultimately withdraw altogether. It should be remembered, too, that the teachers of Evening Schools are men whose energies are fully taxed in the discharge of their ordinary school work, and that they come to the task of evening teaching jaded, and with but little spirit or enthusiasm. Few accept the charge of an Evening School from choice, but undertake the work rather than that the school should not receive a trial. I have heard no complaint that the fee (1s.) charged is too heavily felt, or is prohibitive; yet it is possible that a lower rate—say 6d. per week—might induce a better attendance.

While I am not sanguine that much improvement, under any circumstances, may be expected in the working of Evening Schools, I would suggest, as possible measures towards success,—

1. That the fee for attendance be reduced to 6d. per week.
2. That Evening Schools be opened only during the months of May, June, July, and August.
3. That one hour's instruction (7 to 8 p.m.) instead of two be prescribed.
4. That the instruction be limited to reading, writing, and arithmetic.

J. D. BRADLEY,

District Inspector.

Armidale, 18 October, 1881.

## Memorandum to Chief Inspector.

EVENING PUBLIC SCHOOLS—Your memo., No. 81-7,295, dated 24th ult.

WITH reference hereto I beg to state that, since the passing of the Public Instruction Act of 1880, Evening Public Schools have been established in this district at the following places:—Araluen, Braidwood, Bell's Creek, Goulburn, and Queanbeyan.

The three first named have been recently closed or recommended to be closed for want of the prescribed attendance, and only the two last-named are now in actual operation. The former of these was opened on the 17th January, and the latter on the 19th July last, the attendance in each case being as follows:—

	Enrolment.	Average.
Goulburn—March quarter .....	59	43.7
„ June quarter .....	27	22.4
„ September quarter .....	30	23.5
Queanbeyan—September quarter .....	30	20.

The diminution in the attendance of the Goulburn school is partly attributed to the fact that several tradesmen and labourers have left the town since its establishment, and partly to the apathy which appears to have soon succeeded to the first flush of interest with which its advent was apparently regarded. There seems no present prospect of recovering the lost numbers, but enough remain to render the school beneficial and effective. Of the pupils now attending, ten, who, I am informed, had been apprenticed to trades prior to the passing of the Act, are under 14 years of age.

The Queanbeyan school has been only two months in operation.

Appended is a report on this subject from Mr. Inspector Dawson; and as I concur in his suggestions, I beg to recommend them as a means of securing and promoting the success of Evening Schools, as far as that object is at present attainable.

WM. DWYER,

District Inspector.

Goulburn, 27 September, 1881.

BRAIDWOOD

## BRAIDWOOD DISTRICT.

## Memorandum to District Inspector.

## EVENING PUBLIC SCHOOLS—Their working.

THE working of the Evening Public Schools established in the Braidwood District has been very unsatisfactory. The young persons who promise attendance are enthusiastic at the start, but in a few weeks the enthusiasm dies out, they fall away, and the school has to be closed. This has been the history of four out of five Evening Public Schools established.

The pupils give several reasons for non-attendance. Some grudge the fee, 1s. a week; some are so tired with their day's work that they cannot attend in the evening; some have long distances to travel. Others, earnest enough at first, soon prefer the superior attractions of possum-shooting, the billiard-room, and the dance, to the serious work of the school.

I consider that Evening Public Schools should be kept in operation during the winter months only, say from the beginning of May to the end of September. When the evenings are long and the days fine, there is little disposition to attend on the part of the pupils.

As to the subject taught, I, of course, consider that reading, writing, dictation, and arithmetic should be amongst the number.

Grammar, which I find taught as in the day schools, and in the same uninteresting manner, should, I consider, only be taught practically—that is, in the way of an aid to actual composition, and leaving out technical details, which are positively distasteful to grown-up young persons, because of apparently no practical advantage.

I would recommend the omission of geography from the subjects taught. The pupils manifest no interest in it, and seem glad to get away from it to something more useful in their opinion.

J. DAWSON,  
Inspector.

Braidwood 12/9/81.

## Memorandum to the Chief Inspector.

## EVENING PUBLIC SCHOOLS—Your memo., No. 81-7,296.

SINCE the Act came into operation the following Evening Schools have been established in this district, and with the results noted opposite each name:—

1. Giant's Creek; collapsed for want of attendance.
2. Glendon Brook, do.
3. New Lambton, do.
4. Newcastle, do.
5. Stockton, do.
6. Raymond Terrace, do.
7. Taree, do.
8. West Maitland; re-opened by new teacher; no one attended for a fortnight; 7 at present.
9. Newcastle South; attendance, 16; enrolled, 33. Teacher reports it will not last.
10. Platsburg; " 14; " 21.
11. Miller's Forest; " 10-8 " 14. Teacher reports closing since August, and not likely to meet again for six months. Virtually collapsed.
12. Mimmi; attendance, 8-6; enrolled, 21. Only eight likely to keep to it. Virtually collapsed.
13. Onybigambah; attendance, 9; enrolled, 37. Teacher gives it to the end of this month to die out.
14. Tighe's Hill; " 15; " 34. Teacher reports it will not be permanent.

A good number of miners in the Newcastle District have risen to become teachers, clergymen, clerks, &c.; and I considered that three schools out of the above list—Platsburg, Newcastle South, and New Lambton—might possibly stand for a year or so, on account of the support they would receive from working-men ambitious to rise. One of these—New Lambton—has already collapsed, and the other two, though at present averaging sixteen and fourteen, are reported by their teachers to be dying. All others may be said to have failed completely.

I can offer no suggestions for making Evening Schools a success, for my experience coincides with that of every teacher I have heard speak of the matter, and is to the effect that, though an individual here and there is found desirous of attending school at night, there are not a sufficient number so disposed to make it possible to form a class large enough to justify the necessary outlay.

As far as teachers are concerned, I do not think the experiment could have been tried under more promising circumstances than it has been here, for with scarcely an exception they were not only professionally competent, but were men who accepted the positions chiefly on account of the personal and kindly interest they took in the work, and they have been willing therefore to go to a great amount of trouble to induce young men to take advantage of the schools. All alike have met with the same result—failure.

J. C. MAYNARD,  
District Inspector, Maitland.

E. Maitland, 12 September, 1881.

## Memorandum to Chief Inspector.

## EVENING PUBLIC SCHOOLS—Your B.C. memo., No. 81-7,299.

IN the District under my supervision Evening Public Schools have upon application been established at Cootamundra, Cunnigar, Gundagai, Hay, Murrumburrah, Wagga Wagga, and Yass. Applications have lately been received from North Wagga Wagga and Wentworth, and have been favourably reported on.

Of the seven schools which the Department consented to establish, only two—Gundagai and Wagga Wagga—can be said to have really come into existence. At the other five, notwithstanding that classified and competent teachers—those in charge of local Public Schools—were appointed, and did their utmost to secure the attendance of the promised pupils, the numbers did not reach the necessary minimum of ten and declined from the start, so that the schools collapsed very shortly after the attempts to organize them. Two of them, indeed—Cunnigar and Murrumburrah—failed to secure the attendance of any pupils whatever to open with. The Gundagai school has also now collapsed after living five months.

The Wagga Wagga School opened in October last, and has so far maintained an attendance of twenty to twenty-four. Owing to the closing of the Wagga Wagga schools early in December, through the prevalence of fever, I was prevented from visiting and inspecting the school.

The only Evening Public School inspected was the one at Gundagai. There I found that decided good was being done, and I therefore all the more regret that the school has since closed from want of attendance.

From the reports as to the working of Evening Public Schools from Messrs. Hookins and M'Creddie herewith, it will be observed that the former Inspector attributes their failure to apathy of parents and demand for youths' labour on the stations; thinks that "as a rule the day-school teachers

Two enclosures

teachers are not much inclined to supervise an Evening School," and suggests that *the Inspector on his visit to any locality should exert all possible means to encourage the establishment of these schools, and that bonuses should be given as an encouragement to teachers.* The latter gentleman thinks that "it would be a difficult matter to devise plans whereby such schools could be worked successfully without serious moral injury resulting to the pupils," and that "the rigid enforcement of the compulsory clause of the Public Instruction Act, as to the attendance of pupils at the day schools, will in the course of a few years render the establishment of Evening Public Schools unnecessary."

In considering these opinions, it must be remembered that neither gentleman visited an Evening Public School or succeeded in having one really brought into existence under his supervision, and that consequently the opinions expressed are not based on actual experience or observation. Seeing that every application made for an Evening Public School has been granted, that a duly qualified teacher has been found for each school, that premises and appliances have been provided, and that the teachers have been quite satisfied with the scale of remuneration devised, I can see no sufficient ground for Mr. Hookins' opinions that the day school teachers are not as a rule inclined to take charge of Evening Schools, and that the Department or its officers might possibly do something further by giving "encouragement" and "bonuses." Mr. McCredie's opinion as to "serious moral injury resulting to the pupils" must of necessity, under the circumstances, be a pure fear or suspicion of what *might* happen.

As already indicated, my own opportunities of observing the working of Evening Public Schools have necessarily been limited; but my inquiries into the circumstances of my district justify the following conclusions:—

1. There are many youths and girls whose early education has been so neglected that they could derive decided benefit by attending Evening Public Schools.
2. That these consist to a large extent of persons who live in remote places, and at such distances from population centres, that it would be difficult, in many cases impossible, to assemble anything like a sufficient number for a school at regular meetings for school purposes.
3. That as the persons last referred to cannot leave their work to attend day schools, and as itinerancy is highly objectionable, if not positively impracticable, in connection with Evening Schools, it were all but vain to expect that they (the persons) can be brought under the operation of the provisions of the Public Instruction Act.
4. In towns and population centres, notwithstanding the existence there for years of day schools, there is a considerable number of young persons of both sexes (many of whom belong to a floating section of the population) who could with advantage attend Evening Public Schools; but they are at work during the day, and feel—probably only naturally so—inclined to spend what leisure time they can get in the evenings in amusement, recreation, or social intercourse, rather than in attending an Evening School. Few of them have acquired a taste for reading or study, and as few feel the necessity or importance of increasing their small stock of knowledge.
5. Most of the persons in question have more or less outgrown parental authority—at least their parents are, as a rule, either unable or unwilling to compel them to attend Evening Schools against their inclination.
6. The school fee of 1s. per week is no bar, as this sum can be easily afforded as a rule, and provision is made for exemption from payment in deserving cases.

In view of these facts, I do not think Evening Public Schools will be numerous or largely attended. Though their number may be small, however, and their existence fitful and interrupted, I believe they provide the possibility of doing some good. There will always be some young persons who will feel a desire to improve themselves by attending these schools, and where a sufficient number (10) of these can arrange to meet, it is a wise provision that a school may be established for them. It is clearly advisable that their enthusiasm or desire in the matter should be utilized to their advantage before it cools (which it quickly does, I observe, in many cases); and I would therefore suggest that Evening Schools should be established as speedily as possible after they are applied for. This is the only suggestion I would venture to offer.

I do not see how the conditions under which they can be maintained can be made more efficient or attractive.

D. S. HICKS,  
District Inspector.

Wagga Wagga, 30th December, 1881.  
Mr. Insp. McIntyre, B.C., 5/1/82.

#### ALBURY DISTRICT.

#### Memorandum of Inspector to The District Inspector.

EVENING PUBLIC SCHOOLS—Your memo. of the 14th September, 1881.

In compliance with your request, I have the honor to report—

#### *As to the present working of these Schools.*

Only two applications have been forwarded for the consideration of the Department up to date, namely, from Hay, and recently from Wentworth, and the latter is now under consideration.

The following table shows the progress of the school up to the 23rd September last:—

Hay Public Evening School.

Periods.	Enrolment.			Average attendance.		
	B.	G.	Total.	B.	G.	Total.
1st Quarter.....	7	5	12	3	2	5
2nd Quarter.....	12	1	13	4	0	4
3rd Quarter.....	5	0	5	2	0	2

This unfavourable result of the experiment at Hay is due, I am convinced upon inquiry from the teacher, to the apathy of the pupils and indifference of the parents.

The school, Mr. Murray reports, has been opened nightly with punctuality and regularity.

During my recent tour through the West and South-western Districts I found little or no desire on the part of the residents to avail themselves of the assistance offered by the Department in establishing Evening Schools. It being shearing time, nearly all the lads of an age to attend night school were away at the stations, where they can make wages of a very satisfactory character, and in many cases permanent work as boundary riders is given to these lads.

As a rule the day school teachers are not, it seems to me, much inclined to supervise evening schools in the summer; the heat and closeness of the atmosphere during the day are quite a sufficient tax upon their energies for the rest of the twenty-four hours. Suitable teachers of other kinds are scarce.

Until

Until the population of the townships in Riverina becomes more dense and numerous, and there are such facilities for the youths of this part of the Colony obtaining lucrative employment at manual labour, or as boundary riders and such like, the incentive to intellectual improvement is wanting, and thus little desire for these schools has been exhibited in this part of the Colony as yet.

All that can be done that I can see now is that the Inspector on his visit to any locality shall exert all possible means to encourage the establishment of these schools, and that encouragement may be given to teachers to assist in the work. Would it not be well to grant bonuses for every successful pupil taught in them?

C. HOOKINS,  
Inspector.

#### Memorandum to Chief Inspector.

EVENING PUBLIC SCHOOLS—AS TO WORKING OF.

Your B.C. memo. No. 81-7,300.

EVENING Public Schools have been established at Mudgee, Warren, Eurunderce, and Cobar, and application has been made for the establishment of one at Nymagee. Two of these schools—Warren and Eurunderce—have been closed on account of small attendance of pupils, and the one at Mudgee is not a success as regards attendance. I have endeavoured to obtain applications for Evening Schools at Dubbo, Wellington, Molong, and Gulgong; but although assisted by the local Press, my efforts have been fruitless.

I am of opinion that, except in the mining townships of Cobar and Nymagee, Evening Schools will not be successfully worked in this district.

I attribute this want of success to two causes:—

- (1.) The fact that most of the youths and young men are engaged in pastoral and agricultural pursuits; these pursuits do not tend to induce a love for learning, and do not demand a high degree of education.
- (2.) The climate of the district. In summer for about five months the heat is so intense that young men are really unable to engage in study after the ordinary work of the day is over. In winter for about three months the cold is very severe, and the schoolrooms are very uncomfortable at night, even when provided with fires.

I have given the subject of Evening Schools much attention, but I am unable to offer any suggestions with the view of securing the success of these schools. So far as I can judge, the existing regulations cannot be improved.

F. BRIDGES,  
District Inspector.

Wellington, 1 September, 1881.

## APPENDIX IV.

### CHIEF EXAMINER'S REPORT FOR THE YEAR 1881.

#### I.—THE EXAMINING DEPARTMENT

Deals with all matters relating to the Training, Examination, and Classification of Teachers.

Through the operation of various causes the examinations of the past year exhibit a considerable increase, the total number revised up to this date being 1,916. They embrace—

1. The Examination of Applicants for the office of Pupil-teacher.
2. The Examination of Pupil-teachers of all classes.
3. The Examination of Applicants for admission to the Training School.
4. The Examination and Classification of Students in Training.
5. The Examination of Applicants for Employment.
6. The Examination of Applicants for Classification.
7. The Examination of fixed Teachers.

#### II.—APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

Compared with past years, the number presented for examination has largely increased; but the actual degree of preparedness shows little improvement since 1880. Groups of boys and girls present themselves, from time to time, to undergo the Entrance Examination, merely to fail. The proper Examinees should, as a rule, be drawn from the highest classes in school only, but many of those competing are scarcely fit for a Third Class. Their Writing, Orthography, and general mode of executing their work are unsatisfactory, and show that they could have been subjected to no searching tests in the ordinary subjects nor to any thorough preparation before entering upon the ordeal of Examination. In one group of 13, for example, from the country, not one passed. In another of 17, only 3 passed; in a third, out of 9, 1 only passed; and in a fourth, 32, out of 86, were successful. It is quite possible that Parents and Guardians may act inconsiderately in some of these cases; but it is also manifest from the papers that many are allowed to rush upon examination without any adequate idea of, or preparation for the work in which they seek to engage. Teachers should, for their own sakes, not only not encourage, but dissuade their pupils, whose attainments they must know to be low, from applying for examination.

The following will show the numbers examined and the results:—

In the Metropolis.....	Eligible.....	75	Ineligible.....	95	Total.....	170
In the Country .....	Eligible.....	262	Ineligible.....	286	Total.....	548
Totals.....	Eligible.....	337	Ineligible.....	381	Total.....	718

A specimen of the Examination papers used in connection with these candidates is given in Annex 1.

#### III.—PUPIL-TEACHERS.

A pupil-teacher is a young person, who, while requiring tuition, is employed to aid in the management of a large school—one who purposes to follow the profession of teaching, and who desires to become fully qualified to discharge the duties pertaining to the Teacher's Office. By clause 45, of the Regulations, instruction must be given by the Head Teacher to the Pupil-teachers employed in the school under his supervision, as a portion of their remuneration. The amount of time to be devoted to this duty must be, at least, one hour every school-day. This daily instruction is designed to qualify them for the discharge of their school duties, to enable them to pass their Annual Examinations successfully, to prepare them for admission to the Training School at the close of their apprenticeship, and for the subsequent completion of their professional education. If

If a Pupil-teacher has been diligent and deserving, his term of service may terminate in three years; but more generally it extends to four. Pupil-teachers are divided into four Sections or Classes, namely, First, Second, Third, and Fourth, or lowest. They are expected to serve not less than six months, nor more than twelve in each Class; and to pass a satisfactory Examination annually in the Prescribed Course, before being considered entitled to promotion. The subjects of examination consist of Reading, Writing, Arithmetic, Grammar, Geography, Dictation, Composition, Art of Teaching, Vocal Music, Drawing, Euclid, Algebra, Latin, with French and Needlework for females. To these must be added Practical Skill, as tested by the results of their teaching.

It is presumed that the Home Lessons of the Pupil-teachers will be supervised and directed by the Principal Teacher, that studious habits will be encouraged, and every assistance given that may tend to develop in their minds a love of learning, and a desire to fit themselves for the effective performance of their duties. It is also required that their practical training shall receive careful attention, so that they may become acquainted with the best modes of Organizing schools—with the best effective means of promoting Discipline, and the most appropriate methods of imparting Instruction. Nor is this all. Their morals and life out of school, as far as these can be reached or affected, are expected to be the objects of untiring solicitude on the part of the Teachers in charge. On the other hand, the Pupil-teachers are expected to render a prompt and cheerful obedience to all directions, to perform their duties punctually and effectively, and at all times to manifest a proper interest in the well-being of the school to which they are attached.

The following shows the results of examination:—

Promoted from Class IV to III, 143; failed, 71.	Total examined, 214.
Do do III to II, 121; do 46	do 167.
Do do II to I, 84; do 40.	do 124.
Do do I to Training School, Upper Class, 52; } failed, 11.	do - 85.
Lower Class, 22; }	

These numbers are not satisfactory. All 1st Class Pupil-teachers should, at the close of their term of service, pass into the Upper Division of the Training School. Twenty-two, however, either through deficiency of Attainments or low Practical Skill, or both, failed, at the Entrance Examination to reach the necessary Standards. Some of the Pupil-teachers do study carefully, but these constitute the minority. The majority appear to read little beyond the bare confines of the Prescribed Course; and, even here, the knowledge gained is to a great extent superficial. Very few of the Examinations can be commended for excellence throughout. While the teachers, as a rule, speak favourably of the conduct of the Pupil-teachers, and of their discharge of duty in school, I am not sure that the subject of propriety in matters of dress receives all the attention which it deserves. There must, however, be more diligence in study, more earnestness in their instruction, and far more vigilance in supervision, before a satisfactory state of matters can be reached.

The nature of the examinations to which these Pupil-teachers are subjected may be understood from the papers given in Annexes 2, 3, 4, and 5.

#### IV.—APPLICANTS FOR ADMISSION TO THE TRAINING SCHOOL.

As regards strangers applying for admission to the Training Department, one Examination only was held in 1881, namely, that of June. There was no Examination, as usual, in December; and the applications of 65 persons, not previously in the Service, had to be declined. This, in a great measure, arose from the presence of a large number of 1st Class Pupil-teachers due for final Examination, besides Provisional School Teachers, seeking admission to Training. Apart, however, from the Teachers and Pupil-teachers above referred to, 47 strangers were examined in June, with the following result:—

Passed satisfactorily .....	17
Failed to pass .....	30
Total .....	47

These candidates, as a rule, enter the Lower Class only, for reasons which will appear. They are examined in the subjects of Reading, Writing, Arithmetic, Grammar, Geography, Dictation, Composition, Drawing, and Music (Elementary). Their Aptitude for Teaching is also tested. Many pass in the literary part of the examination, who fail to show the possession of any faculty for teaching, while others, whose literary attainments are decidedly defective, show a promising degree of Aptitude. After every precaution has been taken, there is always some degree of risk or of uncertainty in dealing with these Applicants. Even when all the requirements of examination have been outwardly met, there may be some idiosyncrasy or moral defect lying undiscovered—one, perhaps, which time, isolation from their fellow teachers, or actual service alone will bring out, and one which may be sufficient to mar their future usefulness. Still, not a few promising Teachers have entered through this channel; and, until the annual supply from within the Service is continuous and sufficient, the admission of strangers to Training cannot altogether be dispensed with.

The papers used in connection with the Entrance Examination (both Classes) will be found annexed—6 and 7. Those of the Upper Class necessarily take a higher range, as most of the Examinees are Pupil-teachers of the First Class.

Annexes 6, 7.

#### V.—CANDIDATES IN TRAINING SCHOOL.

One hundred and eight students passed through the Training School in 1881, receiving Classifications varying from Class III, Section C, to Class II, Section A, the highest attainable on the completion of Training. The following are the details:—

Recommended for Class III, Section C.....	3
Do. do. III, do. B.....	35
Do. do. III, do. A.....	28
Do. do. II, do. B.....	36
Do. do. II, do. A.....	6
Total.....	108

The examination papers employed will be found in annexes 8 and 9.

Annexes 8, 9.

It will be seen from the above data that the majority of the classifications range from Class III, Section B, to Class II, Section B, avoiding the lowest grade, but falling short of the highest. For the Class III, Section B, an average of Attainments and Practical Skill reaching "Tolerable" is required; for that of Class III, Section A, the mark "Fair" is necessary. For Class II, Section B, the average of "Very Fair" is expected; while the value of Class II, Section A, is represented by the average mark of "Good," both for Attainments and Skill.

The subjects of instruction include Reading, Writing, Arithmetic (Theory and Practice), Grammar, (Analysis, Composition, and Paraphrase), Geography (Physical and Descriptive), Art of Teaching, Euclid, Algebra, Mensuration, English Literature, Latin, French, Physics, Chemistry, Drawing, Singing, Domestic Economy, Drill, and Calisthenics. To these must be added instruction in Practical Teaching.

The duties of the Training School are regulated in the usual way by Time-Tables and detailed Programmes showing the course to be pursued in each subject, and the report of the Training Master will be found appended.

Annex 13.

The progress during the first half of the year proved less satisfactory than usual in several subjects, more especially French, Music, and Drill, but these defects had, to a great extent, disappeared during the Second Session. French is a subject imperfectly understood, and necessarily imperfectly taught by many of the country Teachers. The means of obtaining instruction in this branch are, furthermore, less accessible in the country than in the town, and hence the outlying Pupil-teachers come up, as a rule, less prepared than those of the city. To obviate this and other existing difficulties, as well as to secure a higher range of results generally, it may be found necessary to extend the period of Training.

Ar

An American writer has well observed that, "the Examination and granting of Certificates to Teachers is a vital part of any School System. If the Standard be low, allowing untrained persons to continue as Teachers, the schools at once suffer. The usefulness of a School System depends upon the kind of men and women actually in command in the school-houses—not on money—taxes or School Boards." It may be added that, apart from the Ordinary Lesson Course as laid down in the Regulations, considerable care has been taken to instil sound principles, and to imbue the candidates with high aims. Knowledge alone is not necessarily power for good. "Knowledge is power" in its true sense only, when combined with moral excellence. He is but a poor Teacher, and one only in name, who holds his duty discharged when he has mechanically traversed the range prescribed in Reading, Writing, Arithmetic, and the other school subjects. Even when the Teacher has attained a high degree of success in dealing with the ordinary routine, he ought to feel the necessity of using his best efforts for the extinction of evil in his pupils, by the cultivation and encouragement of all that is good and true. His vigilance in this cause should be unwearied.

It is only just to say that the conduct of the Students, as a body, has been all that could be desired. Obedient, attentive, respectful, and studious, I have seen little ground for dissatisfaction, and less for reproof. No complaint of levity or of approach to impropriety has ever reached the Examiners.

#### VI.—APPLICANTS FOR EMPLOYMENT AS TEACHERS.

This Section embraces persons in the Colony desirous of entering the Service, as well as Teachers from the United Kingdom, America, New Zealand, Tasmania, South Australia, and Victoria. Sixty-eight of these were dealt with during the year, as follows:—

Recommended for trial in the charge of Provisional Schools .....	26
Recommended for Examination and Classification .....	4
Failing to appear when called up .....	2
Applications withdrawn .....	3
Not deemed eligible for employment .....	33
<b>Total .....</b>	<b>68</b>

These persons are somewhat difficult to deal with. Occasionally they plead impaired health, as the ground of departure from other countries; but not unfrequently their habits are doubtful, and their history obscure. They are averse to revelation of their antecedents; and their testimonials, when produced, are unsatisfactory. In other cases there are evidences of intemperance, or of some other infirmity sufficient to warrant the belief that they could not work successfully even if appointed.

Others again, better qualified, openly avow that they have come here solely to improve their circumstances. Their expectations are, however, unreasonable. Apparently concluding that education in New South Wales is exceedingly backward, they expect immediate employment, ask for city schools, are averse to "going into the bush," dislike to be closely interrogated as to their qualifications, and recoil from examination.

Under such conditions it will not appear surprising that scarcely one-half should give satisfaction. Of those, however, placed upon trial, with a view to determine their value and efficiency, a considerable portion do passably well. They obtain, at the outset, a preliminary training in some effective school, labour, while teaching in schools suited to their capacities, to prepare themselves for a regular Examination, and eventually enter the ranks of Classified Teachers with more or less success.

#### VII.—PROBATIONERS AND UNCLASSIFIED TEACHERS.

The number of Examinations in this Section was 193. The details are—

Recommended for Class III, Section C .....	58
" " III, " B .....	27
" " III, " A .....	12
" " II, " B .....	2
Failing to meet the conditions of standard .....	94
<b>Undetermined—awaiting data .....</b>	<b>2</b>

The above are mostly Teachers in charge of the minor schools. Some have comparatively recently entered the Service from other countries, and, under the operation of Articles 14 and 15 of the Regulations, they have been required to undergo regular Examination in order to test their competency.

I am unable to say, in all cases, what the attainments of these unclassified Teachers were on entering the Service. They are chiefly young persons, natives of the Colony, who have received their education in country schools, who evince some degree of Aptitude for Teaching, and who are expected to succeed better in the country districts than those accustomed to city life or to the conditions of other Colonies. Up to the close of the year 1880, Applicants for Small Schools were required to pass a "preliminary Examination" in the subjects they had to teach, not sufficient to carry a classification, but such as to show that they possessed the knowledge necessary to warrant their provisional appointment. These examinations were conducted by the Examining Department; but since the above-mentioned date, the selection and preliminary Examinations of these applicants have rested mainly with the Inspectors of the various Districts.

The nature of the examination for classification may be understood from Annexes 10 and 11.

Annexes 10, 11

#### VIII.—CLASSIFIED TEACHERS SEEKING PROMOTION, &c.

These Examinations were conducted under the provisions of Articles 15 and 22.

Certain Teachers are actuated by the laudable desire of raising their Classifications in order to attain the highest Grade.

Others have to undergo Examination to prove their right to retain the schools of which they are in charge. With some, therefore, the Examination is optional, with others it is not so.

Examinations of Teachers are, except in very special cases, conducted annually only. There are certainly Teachers who seek Examination more frequently, and who do not rest until they have attained the object of their ambition. This, however, is open to abuse. The school has interests as well as the Teacher, and these must be protected. It is quite possible that a Teacher, unsuccessful at Examination, may carry his zeal for renewed study so far as to allow his school to retrograde, while striving to gain promotion for himself. Such cases have occurred, and it is felt that examination, especially of the highest order, held once annually, is as much as the Teachers and Officers, in justice to the pupils, should be allowed to attempt.

The Examination Papers will be found in Annexes 10, 11, and 12. The following are the results:—

Annexes 10, 11

Recommended for Class III, Section B .....	24
" " III, " A .....	18
" " II, " B .....	25
" " II, " A .....	18
" " I, " B .....	4
" " I, " A .....	1
Failing to gain promotion .....	99
<b>Undetermined—awaiting data .....</b>	<b>4</b>

The

The results, as far as yet known, are not altogether encouraging. In former years, Teachers were advanced under the Regulations, which granted promotion for Good Service; and Examination, as a means of advancing Classification, fell into disuse with the majority of the Upper Class Teachers. Under the new Regulations, however, careful study has become a necessity, especially in the Higher Alternative subjects. These test, to the utmost, the powers of those examinees who had ceased to keep up their attainments, and bar the promotion of not a few who acquit themselves passably well in the Ordinary subjects.

In accordance with long-established custom, first inaugurated by the Commissioners of National Education, the Alternative Papers for Class I have been supplied by Educationists and other gentlemen outside the Department. During the past year the questions in Chemistry and Physics have been drawn by Professor Liversidge; those on Latin and French, by A. B. Weigall, Esq.; those on Geometry, Algebra, Trigonometry, and Mechanics, by Edward Pratt, Esq.; those on Physiology, by H. E. Barff, Esq.; and those on Geology, by Charles S. Wilkinson, Esq., Government Geologist.

Chief Examiner's Office,  
Sydney, 7 March, 1882.

J. GARDINER,  
Chief Examiner.

#### ANNEX A.

##### APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

###### *Grammar.*

An hour and a half allowed.

*Did we but use it as we ought  
This world would school each wandering thought  
To its high state.*

1. Punctuate the above. 2. Express its meaning in your own words. 3. Parse the portion italics. 4. Analyse the whole.

###### II. Correct the following expressions, and state your reasons:—

Yes, it was her that told me.  
That is him.  
Who is there? *Ans. Me.*  
Her and I were in the same class.  
I seen him here yesterday.  
I praise the boy which acts honorably.

###### III. Write the singular and plural, through all the cases, of the word "Money."

###### *Arithmetic.*

An hour and a half allowed.

1. A merchant sold 87 lbs. of tea for £9 7s. 6d. by which he gained 15s.; what did it cost him per lb.?
2. What quantity of land is contained in a field  $27\frac{3}{4}$  times the extent of one that measures 17 acres 3 rds. 27 pls. 29 yds. 3 ft.?
3. At 7s. 9d. in the pound sterling, what will be the tax upon an income of £7,106 13s. 6½d.?  
By Practice and Proportion.

###### *Geography.*

An hour and a half allowed.

1. Name and state the positions of the principal islands that belong to Europe.
2. Give the boundaries and rivers of Africa.
3. What do you understand by the terms Latitude and Longitude?

###### *Dictation.*

A passage of not less than twelve lines from the Fourth or Fifth Book.

###### *Reading.*

A passage from the same Book.  
Applicant's Personal Statement to be given as usual.

###### *Elementary Drawing.*

Two hours and a half allowed.

1. Describe the construction figures most commonly used in Elementary Drawing.
2. What construction figures would you use to draw a circle, a cask, and a kite?
3. In drawing an object, by what means do you give it the appearance of solidity?
4. In shading an object, describe the proper direction of the shade lines.

NOTE.—In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

###### *Vocal Music: Tonic Sol-fa Method.*

An hour and a half allowed.

1. What is the name we give to the time which extends from one *strong* accent to the next of the same kind?
2. What is the difference between "Sol-faing" and "Vocalising," and which should be practised first.
3. Express in figures the value of the following notes:—

s	: . .	fe	: l . s	m	: —	s	: d <sup>1</sup>	: m	: l	s	: —	
---	-------	----	---------	---	-----	---	------------------	-----	-----	---	-----	--

What is meant by the blank space in the last pulse?

## ANNEX B.

## PUPIL-TEACHERS.—FOURTH CLASS.

*Grammar.*

An hour and a half allowed.

1. Yet for aught I see they are as sick that surfeit with too much as they that starve with nothing it is no mean happiness therefore to be scated in the mean.
- (a) Punctuate the above, (b) paraphrase it, (c) analyse it, (d) parse the words in italics.
2. Give examples of nouns, (a) that are used only in the singular, (b) that are used only in the plural.

*Arithmetic.*

An hour and a half allowed.

1. If 15 horses and 148 sheep can be kept 9 days for £75 15s. 0d., what sum will keep 10 horses and 132 sheep for 8 days, supposing 5 horses eat as much as 84 sheep?
2. Add together  $\frac{2}{15}$  of a guinea,  $\frac{3}{8}$  of a pound,  $\frac{1}{10}$  of a crown, and  $\frac{1}{8}$  of a shilling, and reduce the result to the decimal of a pound.
3. Supposing the cost of carpeting a room 25 feet long at 5s. per square yard, to be £6 5s. 0d.; find the breadth of the room.

*Geography.*

An hour and a half allowed.

1. Give a full description of the Baltic Sea.
2. Name in order, beginning at the South, the spurs of the Great Dividing Chain of New South Wales.
3. Define the terms, horizon, zenith, meridian, ecliptic, solstice, nadir.

*Reading.*

The Fifth Book.

To repeat from memory 50 lines of poetry.

*Dictation.*

A passage of not less than 12 lines selected from the Fifth Book.

*Algebra and Geometry.*

Three hours allowed.

1. Define co-efficient, exponent, term, dimension.
2. Divide  $x^3 + y^3 + 3xy - 1$  by  $x + y - 1$ .
3. Find the G. C. M. of  $x^4 + 7x^3 + 7x^2 - 15x$  and  $x^3 - 2x^2 - 13x + 110$ .
4. Write down in words what is expressed by  $\sqrt{a^2 - b^2}$ .
5. If two angles of a triangle be equal to one another, the sides also which subtend, or are opposite to, the equal angles, shall be equal to one another.
6. Demonstrate the 26th Proposition of the First Book.

*French.*

Two hours allowed.

1. Translate into French :  
His forefathers have filled high stations. Avoid bad company. The new tower is in the old town. Is she quarrelsome? It is a new discovery. All the general officers were present. Death is less fatal than the pleasures which attack virtue. It is as easy to do good as to do evil. The least excusable of all errors is that which is wilful. That work is very much esteemed by the learned. He writes well, but his sister writes still better. We have eighty men-of-war ready to sail; we shall soon have two hundred. Magistrates and physicans formerly rode on mules. We tell him the truth, but he will not believe us.
2. Give examples of nouns which have two plurals.
3. Give six adjectives which form their feminine irregularly.
5. Express in words, 1,010,021.

NOTE.—Arrange the translation in parallel columns.

*Latin.*

Two hours allowed.

1. Translate into English :  
Aggeres et fossæ sunt munimenta castrorum. Urbs turres altas habet. Boves magnas vires habent. Neutri dat totam laudem. Facillimi erant labores militum. Præceptorum memores este. Variæ cupiditates animo insunt. Ista auctoritas est maxima.
2. Translate into Latin :  
The cities are the booty of the soldiers. The mother gives a garment to the maiden. The house of the old man is full of riches. The one was pleasing to the citizens, the other was troublesome. The swiftest animals are not always the strongest. Be just, be upright, thou wilt be successful. The soul survives the body. That man is a very good friend.
3. Parse the words in italics.
4. Write out the subjunctive mood of *esse*.

NOTE.—Arrange the translation in parallel columns.

*Drawing.*

An hour and a half allowed.

1. What is the first instruction you would give to a class commencing to draw?
2. Describe the positions necessary to draw a vertical and a horizontal line.
3. In what does the position for drawing differ from that used in writing?
4. Draw a chest of drawers and meat safe.

*Vocal Music: Tonic Sol-fa Method*

An hour and a half allowed.

1. Describe the "manual signs" for the tones of the tonic triad. What characteristics of those tones are the signs intended to denote?
2. Analyse the following rhythmical passage:—

$$\left\{ \begin{array}{l} s \cdot d' : l \cdot t \\ d' : s \end{array} \right\} \left\{ \begin{array}{l} m' : d' : l \cdot t \\ d' : - \end{array} \right\} \left\| \right.$$

3. Write the melody of a tune from the "Elementary School Song-book," in four-pulse measure.

ANNEX C.

## ANNEX C.

## PUPIL-TEACHERS.—THIRD CLASS

## Grammar.

An hour and a half allowed

- 'Tis greatly wise to talk with our past hours,  
And ask them what report they bore to heaven,  
And how they might have borne more welcome news,  
Their answers form what men experience call.  
(a) Punctuate the above. (b) Paraphrase it. (c) Analyse it. (d) Parse the words in italics.
- Mention the different ways of indicating the difference of gender in nouns; give examples.

## Arithmetic.

An hour and a half allowed.

- At what rate per cent. per annum will £245, amount to £252 19s. 3d. in nine months?
- If the sixpenny loaf weighs 4.35 lbs., when wheat is at 5.75 shillings per bushel, what weight of bread, when wheat is 18.4 shillings per bushel, ought to be purchased for 18.13 shillings?
- What is the length of the side of a square field which contains exactly 10 acres? (Give answer in yards).

## Geography.

An hour and a half allowed.

- Describe the Australian Coast from Cape Otway to Cape Leeuwin.
- Name, in order, the rivers which water the Spanish peninsula; give a full description of one of them.
- Give a list of the chief mountain chains in Asia, stating their direction and highest peaks.

## Art of Teaching.

An hour allowed.

Give notes of a lesson on one of the Australian animals, arranging them under two heads: (a) Matter; (b) Method.

NOTE.—In your introduction give specimens of copy-setting.

## Algebra and Geometry.

Three hours allowed.

- Find the L.C.M. of  $x-1$ ,  $2+2x$ , and  $2x^2+2$ .
- Simplify  $\frac{2}{x} + \frac{3}{1-2x} - \frac{2x-3}{4x^2-1}$ .
- Divide 36 into 3 such parts that one-half of the first, one-third of the second, and one-fourth of the third are all equal.
- Parallelograms on the same base, and between the same parallels, are equal to one another.
- Demonstrate the 48th Proposition of the First Book.
- The perpendiculars let fall on two sides of a triangle from any point in the straight line bisecting the angle between them are equal to one another.

## French.

Two hours allowed.

- Translate into French:—

The child to whom everything yields, is the most unhappy. Take some more. Whoever has said so has not spoken the truth. They speak ill of each other. She is quite ashamed of it. Alexander lost some three hundred men when he defeated Porus. Having eyes, see ye not? Have you not better pens to lend me? We were all present when the thing happened. At all times gold has been looked upon as the most precious metal. He had tuned my piano. When he had filled his pockets with apples and pears, he went away. Let us receive his apology. I was waiting for the steamer. Do not be so idle. I had not finished my exercise when you came.

- Write out the future absolute of *danser*, the preterite and the imperfect subjunctive of *emplier*, the Imperative Mood of *devoir*, and the Conditional Mood of *perdre*.

NOTE.—Arrange the translation in parallel columns.

## Latin.

Two hours allowed.

- Translate into English:—

Probitate, non fraude amicos parabis. Si animum virtutibus ornaveris, semper beatus eris. Ne nomen muta; muta mores. Heri ambulabam, ut tristem animum exhilararem. Non est dubium, quin terror omnium civium animos occupavisset. Lucia cantans animos nostros delectat. Tu nobis nocueras, quia temeritatem tuam non coercueras. Bonis placuisse maxima laus est.

- Translate into Latin:—

Whose arms are the best? Many men build houses in which they will not dwell. All good men will always obey the Divine laws. Destroy not the city, soldiers. The fire had consumed almost the whole city. It is difficult to rule the minds of men. Nature has clothed the eyes with very tender membranes. There is no doubt that length of time assuages both grief and anger.

- Parse the words in italics.

- Write the imperfect subjunctive of *erro*, the perfect indicative of *doceo*, the pluperfect of *instruo*, and the supines and participles of *finio*. (Active voice.)

NOTE.—Arrange the translation in parallel columns.

## Drawing.

An hour and a half allowed.

- Draw a pair of scissors.
  - What construction lines would you use in drawing a cask?
  - Describe the method on which you proceed in drawing from a copy.
  - How do you proceed in setting a copy on the blackboard?
- In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

## Vocal Music: Tonic Sol-fa Method

An hour and a half allowed.

- Explain fully what you understand by the terms *Accent* and *Rhythm*, and illustrate by poetical quotations from the "School Song Books."
- State what you know of the production, pitch, and classification of musical sounds.
- Define the terms *Melody* and *Harmony*, and give examples of both.

## ANNEX D.

## PUPIL-TEACHERS.—SECOND CLASS.

## Grammar.

An hour and a half allowed.

1. Here he sees  
*Revolving ages sweep the changeful earth*  
*And empires rise and fall regardless he*  
*Of what the never resting race of men*  
*Project thrice happy could he 'scape their guile.*

(a) Parse the words in italics. (b) Analyse the sentence.

2. Explain, give the derivation of, and construct sentences to illustrate the words solace, exempt, surpass, prominence, salutary, capricious, surcharge, prevent.

## Arithmetic.

An hour and a half allowed.

1. If by selling a horse for £17 4s. 0d. I lose 20 per cent., what did it cost?  
 2. A. does  $\frac{1}{4}$  of a piece of work in 14 days; he then gets B. to help him; and the two finish the work in two days more. How long would B. take to do the work?  
 3. Find, to 4 places of decimals, the cube root of 28.

## Geography.

An hour and a half allowed.

1. Draw a map of Palestine, marking the positions of the principal hills, plains, and rivers.  
 2. Give a brief description of the plateaus of North America.  
 3. Name the States of South America, with their capitals.

## Art of Teaching.

An hour allowed.

Describe your mode of giving an Arithmetic lesson and the steps you take to prevent copying.  
 NOTE.—In the first lines of your answer give specimens of Copy-setting.

## Algebra and Geometry.

Three hours allowed.

1.  $\sqrt{x+4ab} = 2a - \sqrt{x}$ .  
 2. Simplify  $\left\{ \frac{x+y}{x-y} + \frac{x-y}{x+y} \right\} \div \left\{ \frac{x+y}{x-y} - \frac{x-y}{x+y} \right\}$   
 3. What numbers are those whose difference is 20, and the quotient of the greater divided by the less is 3.  
 4. If a straight line be divided into any two parts, the squares on the whole line, and on one of the parts, are equal to twice the rectangle contained by the whole and that part, together with the square on the other part.  
 5. Demonstrate the 12th Proposition of the 2nd Book.  
 6. Construct a right-angled triangle, having given the hypotenuse and the sum of the sides.

## French.

Two hours allowed.

1. Translate into French :—

Why did he not answer your question? He was saved from a great danger by his youngest son. He quarrelled with everybody. Let us rest under the shade of this tree. Have we not flattered ourselves without foundation? It was necessary to consent to that bargain. I wish that there were more order in his conduct. I shall endeavour to persuade them. I shall never forget what I owe you. Why do you go away so soon? She started with fear. Boil that meat again, it is not done enough. We shall collect in ancient history, important and valuable facts. All the witnesses have been heard. That coach starts every day at twelve o'clock.

2. Write out the Indicative of *s'en aller*, the Subjunctive of *offrir*, and the Imperative of *devenir*.

NOTE.—Arrange the translation in parallel columns.

## Latin.

Two hours allowed.

1. Translate into English :—

Moniti sumus, ut diligentiores essemus. Dixit mihi, quid tibi a sorore scriptum esset. Curavit ut oratio sua Ciceronem saperet. Incolæ hoc facinus fatebuntur. Hannibal milites adhortatus est, ut reminiscerentur pristinae virtutis suae, neve liberorum obliviscerentur. Voluptas blanditur sensibus nostris. Cato in senectute præ ceteris floruit. Pessime omnium egisti! Orabam te, ut mecum ludere velles.

2. Translate into Latin :—

All the citizens were terrified by his arrival. No one doubted but that the boy had been well warned by us. The fishes in the sea, the birds in the air are nourished by God. Who doubts that it is better to be trained by a good master than by a bad one? Flee not, soldiers! It is safer to fight than to flee. Hear much, speak little. Generals often exhort their soldiers to remember their wives and children. The Romans have laid waste many towns on the farther side of the Rhine.

3. Parse the words in italics.

4. Conjugate the verb *vescor*.

NOTE.—Arrange the translation in parallel columns.

## Drawing.

An hour and a half allowed.

1. In drawing curved line figures, what should be the position of the body, and in what position should the hands be placed?  
 2. Of what use are construction lines and figures in Drawing?  
 3. Name the construction figure you would use in drawing a Top and a Tumbler.  
 4. Draw a Bell and Loo Table.

## Vocal Music : Tonic Sol-fa Method.

An hour and a half allowed.

1. Describe the "Manual Signs" for the Tones s, t, r<sup>l</sup>, and f<sup>l</sup>. When heard together, what is the combination called, and what is its effect?  
 2. Which three Tones of the Scale should first be taught, and why?  
 3. What are the values of the Notes and Rests in the following passage :—

s | s<sub>1</sub> ., s<sub>1</sub> : s<sub>1</sub> :— . d | t<sub>1</sub> ., l<sub>1</sub> : l<sub>1</sub> : . l<sub>1</sub> | f ., r : d : t<sub>1</sub> | r : d . : . ||

Write the melody of a tune from the "Elementary School Song-book," in six-pulse measure.

## ANNEX E.

## PUPIL-TEACHERS.—FIRST CLASS.

## Grammar.

An hour and a half allowed.

1. For *who to dumb* forgetfulness *a prey*  
*This pleasing anxious being e'er resign'd*  
*Left the warm precincts of the cheerful day*  
*Nor cast one longing ling'ring look behind.*
- a. Punctuate the above. b. Paraphrase it. c. Analyse it. d. Parse the words in italics.
2. Define and give examples of Metaphor, Hyperbole, Apostrophe, Metonymy.

## Arithmetic.

An hour and a half allowed.

1. A's share of a sum of money is  $\frac{1}{2}$ , and is 8 per cent. more than B's, and 8 per cent. less than C's; what are the shares of C. and B.?
2. A. can mow 5 acres of grass in 3 days, B., 7 acres in 9 days, C., 11 acres in 12 days; in how many days can they jointly mow 121 acres?
3. The cost of a cube of metal, at £3 10s. 4d. per cubic inch, is £1,206 : 4s. 4d. Find the cost of gilding it over, at a halfpenny per square inch.

## Geography.

An hour and a half allowed.

1. Enumerate the British possessions in America.
2. Give some particulars respecting the Atlantic Ocean—its shape, dimensions, and distinguishing features.
3. What are isothermal lines? In what do they differ from parallels of latitude?

## Art of Teaching.

An hour allowed.

What are the marks of a good lesson? What steps do you take to ascertain that a lesson has been effective?

NOTE.—In the first lines of your answer give specimens of copy-setting.

## Algebra and Geometry.

Three hours allowed.

1. Find the G. C. M. of  $x^4 + 4x^2 + 16$  and  $x^3 + x^4 - 2x^2 + 17x^2 - 10x + 20$ .
2.  $\frac{4x}{x+3} - \frac{x-3}{2x+5} = 2$ .
3. There is a number of two digits, and it is equal to 4 times the sum of its digits; if 18 be added to the number, the digits will be inverted. Find the number.
4. Describe a square that shall be equal to a given rectilineal figure.
5. If the middle points of any two sides of a triangle be joined, the triangle so cut off is a quarter of the whole.
6. Two triangles of equal area stand on the same base and on opposite sides; show that the straight lines joining their vertices is bisected by the base on the base produced.

## French.

Two hours allowed.

1. Translate into French :—

Silkworms are hatched in the beginning of spring. What the one does, the other undoes. He can neither read nor write. He promises enough, but he seldom keeps his word. He pretended not to see him. Take the first street on the right. She was laughing most heartily. Well! what is the consequence? The least thing diverts his attention. Why do you make so much noise? People often deceive themselves by judging from appearances. He has done that very cleverly. Write injuries upon sand, and benefits upon brass. It is during youth that we must lay the foundations of an honorable and happy life. The neglect of all religion soon leads to the neglect of all the duties of man.

2. Write the indicative of *être*, the conditional of *vouloir*, and the subjunctive of *s'associer*.

NOTE.—Arrange the translation in parallel columns.

## Latin.

Two hours allowed.

1. Translate into English :—

Ignoratio futurorum malorum *utilior* esse videtur scientia. His *paratis* rebus, Cæsar milites naves conscendere jubet. *Delectu* habito, consul ad exercitum statim proficiscitur. Tiberius *domo* cessit, et se *rus contulit*. *Pollicebaris* te venturum esse. Memoria proditum est, Latonam confugisse Delum atque ibi Apollinem Dianamque peperisse. Estne verum, quod nonnulli *dicunt*, animos ex *aliis* (corporibus) in alia corpora migrare?

2. Translate into Latin :—

I am going away, thou art returning from a journey. God has given to man nothing more excellent than mind. When the snows melt, the rivers are accustomed to swell. Our men, having slain many of the enemy, returned to the camp. They build a wall fifty feet high, and eight feet broad. Dionysius taught boys at Corinth. No one will deny that the world is preserved by God. It is probable that the stars are suns.

3. Parse the words in italics.
5. Conjugate the verb *scire*, and give the perfect of *soleo*.

NOTE.—Arrange the translation in parallel columns.

## Drawing.

An hour and a half allowed.

1. When is it necessary to use shading? What is the usual direction of the shade lines?
2. How would you shade a circle to make it appear flat, round, and hollow?
3. Draw a jug shaded.

## Vocal Music : Tonic Sol-fa Method.

An hour and half allowed.

1. Give, in as few words as possible, the rules for transition to the keys of Sol and Fah, and illustrate by a diagram.
2. How would you teach your pupils to pitch the following keys from a C tuning-fork :—G, E flat, D and A flat.
3. Three kinds of motion are recognized between the "parts" of a Tune; name and describe them.
4. The Sol-fa names of sharpened and flattened tones have the vowels *e* and *ah* respectively. On what principle have these names been given to those tones?

ANNEX F.

## ANNEX F.

## APPLICANTS FOR TRAINING—LOWER CLASS.

*Grammar.*

I. "Since all great souls still make their own content  
We to ourselves may all our wishes grant  
For nothing coveting we nothing want."

1. Punctuate the above.
2. Write the meaning in your own words.
3. Parse fully the words underlined.
4. Analyse the whole.

II. Correct the following ; giving your reasons :—

1. Your sister and me were in the same class.
2. He and they we know well.
3. Who do you think I met to-day ?
4. It is me, don't go away.

III. Give simple illustrations of the uses of the several parts of speech.

*Arithmetic.*

1. A field contains 27 acres, 3 roods, 25 poles, 30 yards, 4 feet, 97 inches ; find the extent of one  $17\frac{3}{4}$  times as large.
2. I bought 27 canisters of tea, each containing  $3\frac{1}{2}$  lbs. at  $2\frac{2}{3}$  per lb. ; how much sugar worth  $3\frac{1}{2}$  d. per lb. should I get for it, so as to gain  $10\frac{1}{6}$  d. by the transaction.
3. 39 tons 17 cwt. 3 qrs. 24 lbs., at £3 13s. 9 $\frac{1}{2}$  d. per cwt. ? By Practice.

*Geography.*

1. What differences do you perceive between the continents of Europe and Australia as regards position, configuration, surface, and rivers ?
2. In what respects do the Atlantic and Pacific Oceans differ ?

*Reading.*

A portion from Fifth Book.

*Dictation.*

A passage of twelve lines at least from the same Book.

Applicant's Personal Statement to be given as usual.

*Vocal Music : Tonic Sol-fa Method.*

An hour and a half allowed.

1. Between what tones of the scale do we find Short Steps or Semi-tones ?
2. Express in figures the values of the notes in the following passage :—

: m . , f | s : s | s : s | s : — . l | s . d : m , f | s : s | f : — . r  
| d : — | — ||

3. What is musical accent ?
4. Explain the following musical terms :—"Key-tone," "Piano," "Allegro," "Staccato," "Rest," "Rallentando."

*Elementary Drawing.*

Two hours allowed.

1. What lines would you use in beginning a first drawing lesson ?
2. Describe the proper position of the pupil for drawing, and the way of holding the pencil.
3. What are construction lines, and why are they used in drawing ?
4. What kind of figures should be first used by beginners ?
5. Draw a chair and a box with the lid open.

In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

## ANNEX G.

## APPLICANTS FOR ADMISSION TO TRAINING SCHOOL—UPPER CLASS.

*Grammar.*

An hour and a half allowed.

*Honour that praise which real merit gains  
Or e'en imaginary worth obtains  
Here passes current paid from hand to hand  
It shifts in splendid traffic round the land  
From courts to camps to cottages it strays  
And all are taught an avarice of praise.*

1. Punctuate the passage.
2. Parse the words in italics.
3. Analyse the whole.
4. Paraphrase it.
5. Describe the kind of verse.

*Arithmetic.*

An hour and a half allowed.

1. 378 acres 3 roods  $27\frac{1}{2}$  poles, at £1 : 17s. 9 $\frac{1}{2}$  d. an acre ? By Practice or Proportion.
2.  $27\frac{3}{4}$  yards of fencing are erected by 3 men in  $5\frac{1}{2}$  days, working 9 hours a day ; how long should it take 7 men, working  $10\frac{1}{2}$  hours a day to erect  $107\frac{1}{4}$  yards of similar fencing—the latter men being less capable than the former by one-third ?
3. Find the side and surface measurement of a cube whose solid contents are 54,439,939 yards,

*Geography.*

An hour and a half allowed.

1. Give an account of the Tablelands of Asia.
2. Describe the leading physical features of North America.
3. How is Victoria drained ?

*Art of Teaching.*

An hour allowed.

Give full notes of an object lesson upon one of the following, showing minutely how you would give it.

Sponge. Cork. Wool.

*Reading.*

From a standard Author.

*Practical Skill,*

To be ascertained as usual.

*Euclid.*

*Euclid.*

An hour and a half allowed.

1. If the square described on one of the sides of a triangle be equal to the squares described on the other two sides of it, the angle contained by these two sides is a right angle.
2. The straight line joining the middle point of the hypotenuse of a right-angled triangle to the right angle is equal to half the hypotenuse.
3. To divide a straight line into two parts, so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.

*Algebra.*

An hour and a half allowed.

1. 
$$\frac{2}{7}x + \frac{1}{6}(x - 1) = x - 4$$
2. I bought 20 yards of cloth for 10 guineas, part at 11s. 6d. a yard, and the rest at 7s. 6d. How many yards of each did I buy?
3. The difference between the hypotenuse and two sides of a right-angled triangle is 3 and 6 respectively. Find the sides.

*French.*

Two hours allowed.

1. People who have little to do are great talkers; the less one thinks, the more one speaks.
2. Whatever your talents may be, you will not succeed without application.
3. Have they not risen too late this morning?
4. There would not be so many duels, if people were to reflect that one of the first obligations of a Christian is to forgive injuries.
5. He will support you with all his credit.
6. They would send back their horses.
7. Anger soon dies in a kind heart.
8. Help the gentleman to some partridge.
9. To finish their affairs, it would be necessary that they should see each other.
10. You do not appear convinced.
11. They were always complaining.
12. The vine does not grow in cold countries.
13. Saint John wrote his Gospel at the age of ninety, and joined the quality of an evangelist to that of an apostle and a prophet.

Write the verb *employer*, to employ, in all its moods and tenses.

N.B.—Write this exercise in parallel columns.

*Latin.*

Two hours allowed.

Translate into English:—

*Nemo fit casu bonus. Jam coenati eramus, et in horto ambulabamus. Me pudet poenitetque meae stultitiae. Si forte tonuerat, veteres Jovi tribuere solebant. Tullus Hostilius non solum proximo regi dissimilis fuit, sed ferocior etiam Romulo fuit. Sole oriente nox fugit. Proelio commisso, conantur, Galli aciem Romanorum perfringere. Hanno tria passuum millia ab ipsa urbe castra posuit. Tiberius Rhodo cessit, et se Romam contulit. Catalina humi jacet. Mores puerorum se inter ludendum detegunt. Proficiscendum mihi erat illo ipso die. Omnibus moriendum est. Ciceroni in arduis temporibus gerenda erat respublica.*

Translate into Latin:—

My country is dearer to me than life. The name of that poet is most renowned. The laws which the Persians have are not sacred. In winter we dwell in the city, but in summer we will dwell in the gardens. Let the scholar love his instructors. Cæsar is able to procure friends to himself. The enemy is on the point of arriving to storm our city. That very excellent man dared to die, but not to lie. He lived many years at our house.

1. Parse the words in italics.
2. Write the indicative and subjunctive, active and passive of *jaceo*.
3. How are *ut*, *ne*, *quin*, and *quo* used?

N.B.—Write these translations in columns parallel to the originals.

*Drawing and Perspective.*

An hour allowed.

1. In drawing objects either in angular or parallel perspective, to what points and where do lines at right angles to the picture plane terminate?
  2. Give an example of the difference between geometrical and perspective drawing.
  3. Name all the different lines and points necessary in a perspective drawing, showing their relative positions.
  4. Explain the difference between shade and shadow—which is the darker? and give a reason.
- In addition to answering the foregoing questions, examinees should furnish specimens of their finished drawings.

*Vocal Music: Tonic Sol-fa Method.*

An hour and a half allowed.

1. What is the difference between Soh-one and one-Soh? What is the Sol-fa notation of those two Tones?
2. Mark the places of the accents in *a*, so as to make the phrase in Three-pulse Measure, and in *b*, so that it will form Two-pulse Measure.

<i>a</i>		d	r	m	f	s
<i>b</i>		s	f	m	r	d

3. What is meant by a Common Chord, and by what other name is it sometimes known. Give examples.
4. Give some of the words used to indicate Rate of Movement, classifying them as *a*. Slow, *b*. Moderate, *c*. Quick.
5. Write a Melody containing Transition to the first Sharp Key.

## ANNEX H.

## TRAINING SCHOOL.—LOWER CLASS.

## Grammar.

Three hours allowed.

“The unlearned man knoweth *not what it is* to descend into *himself* and call himself to account nor the *pleasure* of that most pleasant life which consists in our daily feeling ourselves *become better* the good *parts* he hath he will learn to show to the *full* and use them dexterously but not *much* to increase them the faults he *hath* he will learn how to hide and color them but not much to amend them *like an ill mower that mows on still* and never *whets* his scythe whereas with the learned man it fares *otherwise* that he doth ever intermix the correction and amendment of his mind with the use and employment *thereof*.”

- Supply the punctuation necessary in the above passage.
- Express the author's meaning in other words.
- Parse the words in italics.
- Analyze.

## Arithmetic.

Three hours allowed.

- Reduce thirty-seven millions two hundred and seven thousand one hundred and nine-sixteenths of a dram to tons.
- Find a decimal of a guinea equivalent to—  

$$\frac{\frac{3}{4} - \frac{1}{8}}{\frac{4}{7} + \frac{3}{8}} \text{ of } \frac{\frac{5}{7}}{\frac{7}{8}} \text{ of } \frac{\frac{4}{11}}{\frac{7}{8}} \text{ of a Pound stg.}$$
- Seventeen labourers, working  $7\frac{1}{2}$  hours a day, can in 9 days trench 2 acres; in what time may 11 labourers working 9 hours a day be expected to trench 16 acres, the capacity for work of each of the 11 being as 3 to 4 of each of the 17, and the character of the work in the latter case being in point of difficulty as 7 to 6 in the former?
- 806 acres 3 roods 27 poles 18 yards, at £7 11s. 9d. per rood? By *Practice* and *Proportion*.

NOTE.—All work must be fully shown.

## Geography.

Three hours allowed.

Omit the 5th or 7th question if necessary.

- Where upon the Earth's surface should you be placed so that your hemisphere should contain—  
  - The greatest possible quantity of land?
  - The greatest possible quantity of water?
- What continents lie wholly in the Northern Hemisphere, and what partially?
- What land-masses lie partially in the Northern Hemisphere, and what wholly in the Southern?
- Describe the Basin of the Euxine.
- Give a concise account of the island clusters belonging to Eastern Asia.
- New South Wales*.—What points of difference and resemblance are observable between the lowlands on the east, and those lying to the west of the Dividing Range?
- Describe the leading features of the Selvas of the Amazon.

## Writing.

Two hours allowed.

- Draw up a Programme of Writing graduated as for a Second Class in its last quarter.
- Describe the essentials of good writing.
- What should be the material, or composition, of copy lines? Give examples.
- What is the best mode of giving Elementary Writing Lessons?

## School Books.

Three hours allowed.

- Book 3rd, I.N.B.—The Date Palm*.—How could you supplement the information given in this Lesson?
- Sequel Book No.—The Camel*.—Some erroneous impressions are conveyed by this Lesson. What are they?
- Sequel No. 1*.—Specify the Lessons here mostly in the form of dialogue.
- Australian Class Book No. 1*.—What is the aim of this work? Summarize the preface.

## School Management.

Three hours allowed.

- How would you provide for the maintenance of order and attention in School? What are the objects of Military Drill?
- State specially what space and place you would give to reading in the distribution of your teaching time?
- Describe how you could conduct the instruction of three classes simultaneously, in a school of 40 pupils.
- Describe how you would give a first lesson on the subject of Grammar to a Junior Class.

## Domestic Economy.

Two hours allowed.

- You are beginning housekeeping: name the utensils required for the kitchen, and state their probable cost.
- What animal food is the most digestible and nutritious? How should it be cooked?
- In choosing materials for clothing, on what principles would you act?
- For the maintenance of health and cheerfulness among your pupils, to what considerations should your attention be directed?

## Drawing.

Two hours allowed.

- Of what use are construction lines and construction figures?
- Describe the proper position of the pupil for drawing, and the method of holding the pencil.
- In a first drawing lesson, what kind of figures would you commence with?
- Draw from memory a square table, below the level of the eye.

In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

Focal

Vocal Music: Tonic Sol-fa Method.

Three hours allowed.

1. Which are the *weak* or *leaning* tones? Which tones have the strongest leaning tendency, and to which tones do they generally lead?
2. What is a major third?—a minor third?—a perfect fifth? How many of each of those intervals do we find in the scale?
3. When three tones related to each other as first, third, and fifth, are heard together, what is the combination called?
4. Draw two scales side by side, that on the right showing transition to Sol, or the dominant key, and explain fully.
5. Write in figures under the music, the values of the following notes and rests:—

a.  $\left\{ \begin{array}{l} .m, f: s . s | ta . l : f \quad \quad \quad : f . s | l \quad : - . f \\ t . , t : t . d' | s ' : \quad \quad \quad || \end{array} \right.$

b.  $\left\{ \begin{array}{l} : . s | m . , r : m . d | s \quad : f \quad | m . s : l \quad t \\ d' \quad : f \quad | m . , f : r \quad | d . d' : t . s | d' \quad : \quad \quad || \end{array} \right.$

6. Describe the *manual signs* for the tones Me, Te, Ray, and Lay.

Staff Notation.

7. How do we show the *pitch* of tones by the staff notation?
8. Write the two clefs most commonly used, and explain their meaning.
9. What is the use of *sharps* and *flats* at the commencement of the staff? In what order are those sharps and flats written?
10. How are the *lengths* of tones shown by the staff notation? Give the most usual key signatures for two, three, four and six pulse measures.
11. Translate the following chant into the staff notation, and write the chord analysis underneath—

Key G.

m	—	f	: m	r	: —	s	: —	t <sub>1</sub>	: d	r	: t <sub>1</sub>	d	: —
d	: —	t <sub>1</sub>	: d	t <sub>1</sub>	: —	d	: —	s <sub>1</sub>	: s <sub>1</sub>	l <sub>1</sub>	: s <sub>1</sub>	s <sub>1</sub>	: —
s	: —	s	: s	s	: —	s	: —	f	: m	r	: f	m	: —
d	: —	r	: m	f	: —	m	: —	r	: d	f <sub>1</sub>	: s <sub>1</sub>	d	: —

ANNEX I.

TRAINING SCHOOL—UPPER CLASS.

Grammar.

Three hours allowed,

“Never deem  
Thoughts deeds or feelings valueless *that* bear  
The *balance* of the heart to virtue's side  
The coral worm seems *nought* but coral *worms*  
Combined heave up a reef where mightiest keels  
Are *stranded* and the powers of man *put down*  
The water-drop wears out the stone and *cares*  
Trifling *if* ceaseless form an *aggregate*  
Whose burden weighs the buoyant heart to earth  
Think not the right path *may* be safely *left*  
Though *twere* for but *one* moment and *one* step  
That one departure slight *howe'er* it be  
From innocence is *nought*.”

- a. Supply the punctuation in the above.
- b. Arrange the text in ordinary prose sentences.
- c. Express the author's meaning in other words.
- d. Parse the words in italics.
- e. Analyse the last seven lines.

Arithmetic.

Three hours allowed.

1. Find the G.C.M. and the L.C.M. of 4, 9, 15, 36, 45, 81.
2. A merchant bought sugar at 5 guineas per cwt.; how must he sell it per lb. to gain 15 per cent.?
3. A. and B. can do a piece of work in 10 days, B. and C. in 15 days, and A. and C. in 25 days. They all work at it for 4 days; A. then leaves, and B. and C. go on for 5 days; B. then leaves; in how many days will C. finish it?
4. Find the common and also the true discount upon a bill for £1,005 15s. due five years hence, interest being at the rate of 4½ per cent. per annum.
5. Divide 2·50892806 by 92·41035 to 4 places of decimals, and show by fractions that the result is correct.
6. Find the cost of painting the gable-end of a house at 1s. 9d. per square yard, the breadth being 27 feet, the distance of the eaves from the ground 33 feet, and the perpendicular height of the roof 12 feet.

Geography.

Three hours allowed.

NOTE.—Answer four questions; the first must be one.

1. *Drainage of Eastern New South Wales*.—A remarkable parallelism exists among the River Courses here. Show this clearly, and account for it.
2. Describe the Great Central Plateau of Asia.
3. Give a full account of the Lake Regions of North America.
4. Specify the chief Atmospheric Currents. Explain their origin and effects.
5. Specify the principal Lowland Plains of the Old World, and describe in detail one of them.

Lesson

## Lesson Books.

Two hours allowed.

1. What lessons of a Geological character occur in the Sequel Book, I. N. B.?
2. In what respects is the Lesson upon Bees, in the Third Book, defective? How could you supplement the information given?
3. What are the distinctive features of Book IV.?
4. What is stated relative to Honesty or Conscientiousness in the Supplement to the Fourth Book, I. N. B.?

## Principles of Teaching.

Three hours allowed.

1. What principles should regulate the construction of Time-tables? Make a *time synopsis* for a school of three classes.
2. Distinguish between *solid teaching* and *merely talking* to pupils upon the lessons. Explain how the existence of the former is to be ascertained.
3. In giving Reading Lessons, what essential points should be kept in view?
4. Describe, from the outset, how English composition should be taught.
5. What are the evils of fitful, inconsistent government in school.

## Writing.

One hour allowed.

1. Give the particulars of any method of teaching writing with which you are acquainted.
2. State your views on each of the following:—
  - (a) Setting copies on the black board.
  - (b) Writing the copies in the pupils' books.
  - (c) Using printed head-lines.
  - (d) Writing from dictation.
3. Give specimens of what you consider suitable copies for each class up to the Fourth.

## Domestic Economy.

Two hours allowed.

1. What are the consequences of living in damp houses? Mention the more simple expedients to remedy the defect referred to.
2. Describe the essential qualifications of a good housekeeper.
3. Describe the relative merits of cotton, linen, and woollen fabrics as articles of clothing.
4. State some of the more obvious precautions against contagious diseases.

## Euclid.

Three hours allowed.

1. Construct an isosceles triangle which shall have one-third of each angle at the base equal to half the vertical angle.
2. Describe a parallelogram that shall be equal to a given triangle and have one of its angles equal to a given rectilineal angle.
3. Divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.
4. The sum of the squares on the sides of a parallelogram is equal to the sum of the squares on the diagonals.
5. The diameter is the greatest straight line in a circle, and of all others, that which is nearer to the centre is greater than one more remote; and the greater is nearer the centre than the less.
6. A triangle is inscribed in a circle; show that the sum of the angles in the three segments exterior to the triangle is equal to four right angles.

## Algebra.

Three hours allowed.

1. Find the G.C.M. of  $x^4 - 2x^3y + 2xy^3 - y^4$  and  $x^4 - 2x^3y + 2x^2y^2 - 2xy^3 + y^4$
2. Find the L.C.M. of  $4(a^2 - ab^2)$ ,  $12(ab^2 + b^3)$ ,  $8(a^3 - a^2b)$ ; and  $6(x^2y + xy^2)$ ,  $9(x^3 - xy^2)$ ,  $4(y^3 + xy^2)$ .
3. Find the value of  $2 + \frac{a^2 + b^2}{a^2 - b^2} - \frac{a - b}{a + b}$
4.  $\frac{x + 10 - x}{3} - \frac{10 - x}{3\frac{1}{2}} = \frac{4 - \frac{2}{3}x}{11} - \frac{1}{11}$
5. A man spends £10 less than  $\frac{1}{3}$  of his yearly income, which results in his having at the year's end £45 more than  $\frac{1}{2}$  of it remaining; what is his income?
6. Find a number such that the product of the numbers obtained by adding 3 and 5 to it respectively shall be less by 1 than the square of its double.
7. Multiply  $3\sqrt{15}$  by  $4\sqrt{20}$ ,  $2^3\sqrt{4}$ , by  $3^2\sqrt{54}$ , and find the square root of  $11 + 6\sqrt{2}$ .

## French.

Three hours allowed.

Translate into French:—

Let us hate vice. He abstained from drinking on that day. Shall we sit down here? Abraham was born about three hundred and fifty years after the deluge. How many verbs have you learned? Of all our great writers, he is the one I like best. The same prejudices are found in Europe, in Asia, in Africa, and even in America. Homer has described men such as they were with their good and bad qualities. God said, "Let there be light," and there was light. Pope Leo the Tenth and Luther were contemporaries. We have shot a brace of peasants. Paul's sister's son entered into the castle. Take the coffee-cups into the dining-room. Louis 14th had in France an absolute power and authority

Translate in English:—

Il est naturel qu'un jeune homme, épuisé des fatigues que demande l'arrangement d'un si grand jour, tombe ensuite dans un sommeil plein; il l'est aussi qu'un génie fait pour la guerre, agissant sans inquiétude, laisse au corps assez de calme pour dormir. Le prince gagna la bataille par lui-même, par un coup d'œil qui voyait à la fois le danger et la ressource, par son activité exempte de trouble, qui le portait à propos à tous les endroits. Ce fut lui qui, avec de la cavalerie, attaqua cette infanterie espagnole jusque-là invincible, aussi forte, aussi serrée que la phalange ancienne si estimée, et qui s'ouvrait avec une agilité que la phalange n'avait pas, pour laisser partir la décharge de dix-huit canons qu'elle renfermait au milieu d'elle. Le prince l'entoura et l'attaqua trois fois. À peine victorieux, il arrêta le carnage. Les officiers espagnols se jetaient à ses genoux pour trouver auprès de lui un asile contre la fureur du soldat vainqueur. Le duc d'Enghien eut autant de soin de les épargner, qu'il en avait pris pour les vaincre.

Conjugate the irregular verb *Luire*, to shine. Where is the adjective generally placed in French? Give exceptions. Give the present participles of *Savoir*, *Pouvoir*, *Faire*, *Hair*, *Peindre*, and *Taire*.

Latin.

Latin.

Three hours allowed.

Translate into English :—

Quum exercitus urbem oppugnavit, nos jam emigraveramus. Ita judicat justus iudex ut in omni re rectam conscientiam servet. Equites Caesaris Pompeium ejusque amicos terruerunt. Non dubito quin dux temeritatem militum coegerit. Imperator exercitum duxit, multasque urbes expugnavit. Quis dubitat quin hostes urbem obsidione cincturi sint. Clarem vocem hujus avis non audivisti? eam non audivi. Venio auditurus quid pater scripserit. Puer bene educatus, omnibus placet. Puer strenue exercetor. Sapite et iram coercete. Hortabor patrem ut pueri mentem probe excolat. Jucundum est mare a terra intueri. Augustus omnes cives benigne alloquebatur. Pessime omnium egisti; bonos cives perdidisti; improbis bene fecisti. Nolite nimis dolori indulgere. Cæsar fisus est suis rebus. Tullus Hostilius non solum proximo regi dissimilis, sed ferocior etiam Romulo fuit. His rebus paratis, contendit Cæsar maximis itineribus in agros Helvetiorum. Quædam bestiolæ unum diem vivunt. Horatius Venusius natus est. Num tu has res melius quam magister tuus intelligis? Enitar ne possis mihi diffidere. Non longius progrediendum est, committitones, ne commatibus nostris intercludamur.

Translate into Latin :—

Some animals are accustomed to dwell both in the water and on the land. Some birds dare to approach near to the dwellings of men. I am ashamed and repent of my folly. What is brighter than the sun? When the sun rises, night flees away. Having extended his empire as far as the Indus, Alexander returned towards the west. Hanno pitched his camp three miles from the city itself. Alcibiades having accomplished very great exploits, has returned to Athens. Marius and Cicero were born at Arpinum. Are these things true? I will strive hard to persuade him. It was owing to Trebonius that they did not take possession of the town.

1. Parse the Latin words in italics. 2. Write the perfect indicative of *terreo*, *duco*, *cingo*, *hortor*, *alloquor*; the perfect subjunctive passive of *indulgeo*, *excolo*, *audio*, and the imperative of *coerceo*, *intercludo*, *audeo*, and *nolo*. 3. What are the interrogative particles used in Latin? Describe their shades of difference.

NOTE.—Write your translations in columns parallel to the original.

English Literature.

Three hours allowed.—Answer five questions.

1. Enumerate the chief "Landmarks" indicating the course of English Poetry from the time of Chaucer to the present day. Assign reasons for your views.
2. Give an account of the Scottish Poetry of the Third Period.
3. What peculiarities do you observe in the poetry of Queen Elizabeth's time and in the prose of the reign of her successor?
4. Give a concise account of one of the following authors :—Bacon, Locke, Barrow, Bunyan, Tillotson, Temple, Clarendon, Gilbert Burnet.
5. What was the position of Literature in the days of the Commonwealth?
6. Compare what is known as the "Augustan Age" of English Literature with the Revival of Learning in the 16th Century. Cite, if you can, any observations of the Edinburgh Review or other authorities on the subject.

Chemistry.

Two hours allowed.

1. Is the air a chemical compound? Give reasons for your answer.
2. Explain two methods by which hydrogen may be got from water.
3. Give a chemical test to detect common salt dissolved in very small quantity in water. Explain the change observed when the test is applied.
4. What are the causes of explosions in coal-pits? How does the Davy safety lamp prevent these explosions.
5. Name the elements and the proportions in which those elements are combined in—common salt, nitric acid, sulphuric acid, chalk, Epsom salts, washing soda, saltpetre, quartz, clay.
6. Describe chlorine, and its most important uses.
7. How can it be shown that there are silver and copper in a silver coin?
8. Describe and explain the change that is produced when potassium chromate in solution, is added to a solution of lead acetate.

Physics.

Two hours allowed.

1. Define gravity, cohesion, chemical attraction, and state the use of these forces.
2. What is meant by the term "specific gravity"? How is the specific gravity of an insoluble solid heavier than water found?
3. Define the terms work, energy, foot-pound, horse-power.  
A cannon ball of 60 lbs. weight was projected vertically upwards to height of 500 feet; what was the energy in foot-pounds at the moment of projection?
4. A rod of brass 36 inches long at 62° F. is heated to 120° F.; find its length at this temperature. [The expansion between the freezing and the boiling points of water, of a rod of brass 100,000 inches long is 188 inches.]
5. What effect is produced when a person holds a metallic point close to the conductor of an electrical machine in action? How does a lightning-conductor protect a building from a stroke of lightning?
6. What is a voltaic cell? What are the special features and advantages of Grove's battery?
7. What is an electro-magnet?
8. Explain the means used in a galvanometer to increase the influence of an electric current upon a magnetic needle.

Drawing and Perspective.

Two hours allowed.

1. Explain the difference between angular and parallel perspective.
  2. In what does geometrical and perspective drawing differ?
  3. By what means are distances along receding lines obtained?
  4. Draw and shade a square box with the lid opened.
- In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

Vocal Music: Tonic-Sol-fa Method.

Three hours allowed.

1. Which are the *weak* or *leaning* tones? Which tones have the strongest leaning tendency, and to which tones do they generally lead?
2. What is a major third?—a minor third?—a perfect fifth? How many of each of those intervals do we find in the scale?
3. When three tones related to each other as first, third, and fifth, are heard together, what is the combination called?

4. Draw two scales side by side, that on the right showing transition to soh, or the dominant key, and explain fully.
5. Write in figures under the music the values of the following notes and rests :—
 

a.  $\left. \begin{array}{l} \{ \} \\ \{ \} \end{array} \right\} .m, f : s . s \mid ta . l : f \mid \quad : f . s \mid l \quad : - . f$

$\left. \begin{array}{l} \{ \} \\ \{ \} \end{array} \right\} t . , t : t . d' \mid s \quad : \quad \parallel$

b.  $\left. \begin{array}{l} \{ \} \\ \{ \} \end{array} \right\} \quad : , s \mid m . , r : m . d \mid s \quad : f \quad \mid m . s : l . t$

$\left. \begin{array}{l} \{ \} \\ \{ \} \end{array} \right\} d' \quad : f \quad \mid m . , f : r \quad \mid d . d' : t . s \mid d' \quad : \quad \parallel$
6. Describe the *manual signs* for the tones Me, Te, Ray, and Lay.

*Staff Notation.*

7. How do we show the *pitch* of tones by the staff notation?
8. Write the two clefs most commonly used, and explain their meaning.
9. What is the use of *sharps* and *flats* at the commencement of the staff? In what order are those sharps and flats written?
10. How are the *lengths* of tones shown by the staff notation? Give the most usual key signatures for two, three, four, and six pulse measures.
11. Translate the following chant into the staff notation, and write the chord analysis underneath:—

Key G.

{	m : —	f : m	r : —	s : —	t <sub>1</sub> : d	r : t <sub>1</sub>	d : —
	d : —	t <sub>1</sub> : d	t <sub>1</sub> : —	d : —	s <sub>1</sub> : s <sub>1</sub>	l <sub>1</sub> : s <sub>1</sub>	s <sub>1</sub> : —
	s : —	s : s	s : —	s : —	f : m	r : f	m : —
	d : —	r : m	m : —	f : —	r : d	f <sub>1</sub> : s <sub>1</sub>	d : —

ANNEX J.

THIRD CLASS TEACHERS.

*Grammar.*

Three hours allowed.

- I. *Life is not merely to live—it is much more than this—merely to-live might not prove a blessing—the question is still behind—what and how—what manner of life to live, and how should we live it.*
- II. The humours of the body have a stated regular course which impels and imperceptibly guides our will they co-operate with each other and exercise successively a secret empire within us so that they have a considerable part in all our actions without our being able to know it hence the necessity of attention to our bodily health.
  - a. Supply the punctuation necessary in the above passages.
  - b. Paraphrase the second extract, and
  - c. Analyze the first.
  - d. Parse the words in italics.
3. Exhibit by examples all the offices (as a part of speech) which can be performed by the word "still."
3. Some words change *y* into *i*, with *ous*, as *fury*, *furious*; but some change the *y* into *e* in the same position. Give examples.
4. Distinguish between the "preposition" and the "adverb," special reference being made to the passages given above.

*Arithmetic.*

Three hours allowed.

1. Divide 725 guineas among five persons, so that one may have 105 shillings more than each of the others.
2. To what sum will £842, 17s. 6d. amount in 5 years 16 weeks and 14 days, at 3½ per cent. per annum? *Simple interest.*
3. 17 cwts. 3 qrs. 23 lbs., at £9, 11s. 5d. per ton? *Practice.*
4. Explain the leading principles of decimal notation, and divide forty-five ten thousandths by fifteen millionths, decimally.
5. Renting a farm of 40 acres 3 roods 29 perches for 150 guineas, I desire to know what I should have to pay for the third part of another, larger by 13 acres and 14 perches.

NOTE.—At least four questions are to be solved. Candidates for Class 3, Section A, must work the last two.

*Geography.*

Three hours allowed.

1. On what part of the earth's surface should you be placed so that
  - Your latitude should be the least possible?
  - Your longitude the least possible?
  - Your latitude the greatest possible?
  - Your longitude the greatest possible?
  - Your latitude and longitude the least possible?
2. A ship sails from Riga to Sebastopol. Through what seas, gulfs, and straits does the vessel pass?
3. Describe the remarkable features of the South American Continent.
4. Compare, in detail, the eastern side of New South Wales with the western, as regards surface and vegetation.

*School management.*

Three hours allowed.

1. ORGANIZATION.—What is necessary to the complete equipment of a mixed school of fifty pupils?
2. Give a synopsis showing the best use you could make of the time devoted weekly to instruction, supposing the school to consist of three classes. Show the time given to *each subject* weekly.
3. What is the cause of disorder in school? How is it to be prevented?
4. What is meant by *non-penetrative instruction*? What methods are best calculated to secure solid teaching?
5. The teacher's example has more power than his injunctions. *Lesson*

*Lesson Books.*

Two hours allowed.

1. How many times is the Alphabet presented in the First Reading Book?
2. Write out any prose lesson, Section I, II, I.N.B.
3. What account is given in Sequel No. 2 of the birds called *Nataores*?
4. Distinguish between the "Pearly Nautilus" of the Pacific, and the "Nautilus" spoken of in Book III, I.N.B.

*Writing.*

An hour allowed.

1. Construct a programme of *Writing*, suitable for a second class in its first quarter.
2. To what account would you turn a black-board in teaching the art of writing?
3. Give specimens of all the head-lines you employ.
4. State the essentials of good penmanship.

*Domestic Economy.*

Three hours allowed.

1. How would you make a currant cake?
2. Describe the process of washing blankets.
3. To what account would you turn a plot of unbroken ground about 50 feet square, attached to your residence?
4. How do you discover the approach of scarlet fever in children? How would you act in the early stages of this disease, supposing no medical aid were available?

*Vocal Music: Tonic Sol-fa Method.*

An hour and a half allowed.

1. What are the three common uses of the word "time," and what distinct names do we give to each of the three things?
2. Describe transition to the first sharp key, and illustrate by a diagram.
3. Express numerically the values of the notes and rests in the following passage:—

: . r : m . f	s ., s : d' . t : l . s	s : f : :
., l : r' . d' : t . l	l ., s : s : :	

4. Give examples of the following intervals:—Thirds—Sixths—Fifths—Sevenths.
5. What are the meanings of the following abbreviations and signs?—*ff*, *cres.*, *rall.*, *fnc*, *d*, *̇*.
6. Write a song from one of the school song-books, and describe how you would teach it to a class of children.

*Drawing.*

An hour and a half allowed.

1. By what means would you represent the solidity of objects in drawing?
2. What direction do the shade lines take in shading a concave or convex figure?
3. Describe the proper method for drawing curved lines.
4. Draw and shade a cube and a basin.

In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

## ANNEX K.

## SECOND CLASS TEACHERS.

*Grammar.*

Three hours allowed.

"Your *Grace* should now in *these* grave years of *yours*  
*Have found ere* this the price of mortal joys  
 How short *they* be how fading here on earth  
 How full of change how little our *estate*  
 Of nothing *sure* save only of the death  
 To *whom* both man and all the world *doth owe*  
*Their end at last* Neither should nature's power  
 In *other sort* against your *heart prevail*  
*Than as* the naked *hand* whose stroke assays  
 The armed *breast* where force doth light in *vain*."

- a. Supply the punctuation in the above.
- b. Arrange the passage in ordinary prose sentences.
- c. Give the substance or meaning in your own words.
- d. Parse in detail the words italicised.
- e. Analyse fully.

*Arithmetic.*

## Males.

Three hours allowed.

1. 7 cwt. 3 qrs. 13 lbs. 13½ oz. at £7, 11s. 9½d. per ton? By *Practice* and *Proportion*.
  2. A beam 15 feet long, 2½ feet wide, and 8 inches thick, weighs 1,280 lbs., required the length of another beam whose breadth is 3½ feet, thickness 7½ inches, and weight 2,020 lbs.?
- $$\frac{1000 \cdot 10001}{1000}$$
3. Find the square root of  $\frac{1000 \cdot 10001}{1000}$  to six decimal places.
  4. A. can do a piece of work in 12 hours, B. in 4, and C. in 3 hours. All work together for half an hour; and then A. leaves. When will B. and C. complete the work?

*Arithmetic.*

## Females.

Three hours allowed.

1. From 15 acres take 5 ac. 5 ro. 39 per. 30 yds. 1 ft. 7½ in. and express the fifth part of the remainder in square inches.
  2. The erection of 384 yards of stonework cost £142, 11s. 7d., what will the cost be when 19 yards more are added to the original contract?
  3. 6032½ articles at 12s. 7½d. each? *Practice*.
  4. The carriage of a cwt. costs ¾ of a shilling per mile. What shall I give to convey 13½ tons for three-quarters of a mile?
  5. Find the difference between 6½ guineas and £3 525. Reduce the result to the decimal of a crown.
- Geography.*

*Geography.*

Three hours allowed.

1. Compare the River System of Western New South Wales with that of South-eastern Europe.
2. Describe the winds peculiar to the Indian Ocean.
3. Give a full account of the Tides.
4. Describe the mountain systems of North America.

*Art of Teaching.*

Three hours allowed.

1. How would you classify and arrange a mixed school, newly opened, containing 70 pupils?
2. Distinguish between Analysis and Synthesis, as applied to method. Describe the circumstances under which each can best be employed.
3. Distinguish between "Exposition" and "Examination." *When and how* should progress be ascertained by the Teacher?
4. Why is a knowledge of the constitution of the Human Mind essential to the success of the Teacher?
5. Give an example of what you understand to be a High-Class Object Lesson, say upon the "Rainbow" or "Superb Menura."

*Lesson Books.*

Two hours allowed.

1. *Third Book I. N. B.* How is the sagacity of the sheep-dog illustrated in this treatise?
2. What allusions to African countries or scenes are contained in Sequel No. 2, I. N. B.?
3. What Hebrew History is given in the Fourth Book, I. N. B.?
4. Describe the contents and scope of the Australian Class Book, No. I, Part 3.

*Writing.*

An hour allowed.

1. Construct a Programme of *Writing* suitable for a Third Class in its First Quarter.
2. What do you understand by the terms "parallelism," "uniformity," and "equality of space," as applied to the art of Writing?
3. As a "Silent Lesson," what should be the position of Writing "upon the Time-table and Synopsis"?
4. Give specimens of the copy lines you deem most suitable for youth.

*Domestic Economy.*

Three hours allowed.

1. What evils follow a residence in damp houses?
2. How should an ox-tongue be cooked and served?
3. What tests would you employ to determine the quality of woollen and silken fabrics?
4. In the case of excessive bleeding from a wound—say in the arm or leg—how would you act if beyond all medical aid?

*Vocal Music: Tonic Sol-fa Method.*

An hour and a half allowed.

1. Why is *ta* called the *Leading Tone*, and what is its Manual Sign?
2. Compare the uses of the tone *ta* in the two following passages:—  
(1.) s d<sup>1</sup> ta l s f  
(2.) s d<sup>1</sup> t ta l  
What is implied by its use in (1.)?  
What is the progression in (2) called?
3. Describe what is meant by the *similar* motion of two parts in relation to each other,—by *contrary* motion,—by *oblique* motion.
4. Analyse the following rhythmical passages from Gounod's *Faust*:—

a.	., r : r	f <sub>1</sub> . f <sub>1</sub> : f <sub>1</sub> . la <sub>1</sub>	., r : r	— : s <sub>f</sub> .
b.	: d <sup>1</sup> : r <sup>1</sup>	m <sup>1</sup> : d <sup>1</sup> : l	s : — : —	— : — : m
	s : s : —	— : — : r	m : — : —	— : — : —

5. Describe the method of beating time for each of the kinds of measure quoted above.
6. What is meant by *ear* or dictation Exercises in teaching singing, and what is their use?

*Drawing and Perspective.*

An hour and a half allowed.

1. Give an example of the first figures you would use in elementary drawing.
2. Draw and shade a globe, showing light, shade, and projected shadow.
3. To what points do parallel receding lines appear to converge?
4. Draw in outline, from memory, a chest of drawers in parallel perspective.

In addition to answering the foregoing questions, Examinees should furnish specimens of their finished drawings.

*French.*

Three hours allowed.

Translate into English:—

Le roi de Danemarck était alors dans le Holstein, où il semblait ne s'être rendu que pour lever le siège de Tonningue. Il voyait la mer Baltique couverte de vaisseaux ennemis, un jeune conquérant déjà maître de la Zéeland, et prêt à s'emparer de la capitale. Il fit publier dans ses états que ceux qui prendraient les armes contre les Suédois auraient leur liberté. Cette déclaration était d'un grand poids dans un pays autrefois libre, où tous les paysans, et même beaucoup de bourgeois sont esclaves aujourd'hui. Charles fit dire au roi de Danemarck qu'il ne faisait la guerre que pour l'obliger à faire la paix; qu'il n'avait qu'à se résoudre à rendre justice au duc de Holstein, ou à voir Copenhague détruite, et son royaume mis à feu et à sang. Le Danois était trop heureux d'avoir affaire à un vainqueur qui se piquait de justice. On assemble un congrès dans la ville de Travendal, sur les frontières de Holstein. Le roi de Suède ne souffrit pas que l'art des ministres trainât les négociations en longueur: il voulut que le traité s'achevât aussi rapidement qu'il était descendu en Zéeland. Effectivement il fut conclu, le 5 d'Août, à l'avantage du duc de Holstein, qui fut indemnisé de tous les frais de la guerre, et délivré d'oppression.

Translate into French:—

Was he rejoicing at his good fortune? There would be more happiness if every one knew how to moderate his desires. Let us go away from here. Napoleon Bonaparte was born at Ajaccio, in Corsica, on the fifteenth of August, seventeen hundred and sixty-nine. How many people cannot be convinced

convinced but by experience. Do you fear his resentment? No, not at all. I can go in one day from Edinburgh to London, and in two days from London to Geneva. The Monument of London is a round pillar, two hundred feet high. He, perceiving their intentions, gave up the project. I see only us two who are reasonable. Whose daughter is she? You and he shall accompany me.

Write the *prétérite défini*, future simple, and the imperative of *Savoir*—To know; also, the subjunctive of *vouloir*—To will. When does the past participle agree with its subject, and when with its object? Name the primitive tenses, and state how the others are formed from them.

*Latin.*

Three hours allowed.

1. Translate into English the following passages:—

Id aliquot de causis acciderat, ut subito Galli belli renovandi legionisque *opprimendæ* consilium caperent: primum, quod legionem, neque eam plenissimam, *detractis* cohortibus duabus, et compluribus singillatim, qui commeatu petendi causa missi erant, absentibus, propter paucitatem despiciabant: tum etiam, quod, propter iniquitatem loci, cum ipsi ex montibus in vallem decurrerent, et tela conjicerent, ut primum quidem posse impetum sustinere existimabant. Accedebat, quod suos ab se liberos abstractos *obsidum* nomine dolebant: et Romanos non solum itinerum causa, sed etiam perpetuæ possessionis, culmina Alpium occupare conari, et ea loca *finitimæ* provinciæ adjungere, sibi persuasum habebant.

2.

Hic cursus fuit:

Quum subito assurgens fluctu nimbosus Orion  
In vada *caeca* tulit, penitusque *procacibus* Austris,  
Perque undas, superante *sabo*, perque invia saxa  
Dispulit; huc pauci vestris adnavimus oris.

3. Translate into Latin the following:—

He who will help the guilty, will become a partner in his fault. When the sun rises, night flees away. You promised that you would come. Who doubts that good men deserve praise? Be wise, hear much and speak little. All must die. Should not all the citizens strive to benefit the State? Are the wise and good always happy? Faithfully discharge the duties of your office.

4. Parse fully the Latin words in italics. Write the second person, singular and plural, of all the tenses in the active voice of *accido*. What verbs govern the ablative, and what the genitive?

*Euclid.*

Three hours allowed.

- The straight line, which bisects the external vertical angle of an isosceles triangle, is parallel to the base. Show this.
- If a parallelogram and a triangle stand upon the same base and between the same parallels, the triangle is half of the parallelogram.
- If a straight line be divided into two equal, and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line and of the square on the line between the points of section.
- If two chords in a circle cut one another, the rectangle contained by the segments of one of them is equal to the rectangle contained by the segments of the other.
- The perpendiculars drawn from the angular points of a triangle to the opposite sides, pass through the same point.

*Algebra.*

Three hours allowed for the subject.

- $3x - \frac{a}{b} + cx = \frac{a+x}{3} - \frac{b-x}{a}$  Required the value of  $x$ .
- How much rye, at 4s. 6d. a bushel, should be mixed with 50 bushels of wheat, at 6s. per bushel, so that the mixture shall be worth 5s. a bushel.
- $$\left. \begin{array}{l} \frac{3x+2y}{6} + 2x = 16 \\ \frac{2x-3}{9} + \frac{2x \times 7y}{11} = 4 \end{array} \right\} \text{Find values of } x \text{ and } y.$$
- Find two numbers, such that if 5 be added to the first, the sum will be twice the second; and if four times the second be increased by 3, the sum will be three times the first.
- Find two numbers whose product is 143, and the sum of whose squares is 290.

ANNEX L.

FIRST CLASS TEACHERS.

*Grammar.*

Three hours allowed.

- [“ Since thou hast vouchsafed  
Gently for our instruction to impart  
Things above earthly thought *which yet* concerned  
Our knowing as to highest wisdom seemed  
Deign to descend now lower and relate  
What may no less perhaps avail us known  
How first began this heaven which we behold  
Distant so high with moving fires adorned  
Innumerable] and *this* which yields or fills  
All space the ambient air *wide* interfused  
Embracing round this florid earth what cause  
Moved the Creator in his holy rest  
Through all eternity so late to build  
In chaos and the work begun how soon  
Absolved if unforbid thou mayest unfold  
What we not to explore the secrets ask  
Of his eternal empire but the more  
To magnify his works the more we know”

“ PARADISE LOST.”

  - Supply the punctuation in the above.
  - Arrange it in prose order.
  - Paraphrase the passage.
  - Analyse the portion enclosed by brackets.
  - Parse the words italicised.
- It has been said that the *English alphabet* is *redundant*. It has also been said that it is *defective*. How may these statements be reconciled? *Arithmetic.*

*Arithmetic.*

## Male Teachers.

Three hours allowed.—Algebraic Solutions not admissible.

- In "Arithmetic," we say that the result of "Division" is a "diminished quantity." When does this statement not hold good? Illustrate by examples.
- A. can do a piece of work in 25 days, B. in 20 days, and C. in 24 days. All work together for two days, when A. and B. leave. C., however, goes on, and, after  $8\frac{1}{2}$  days, is rejoined by A., who brings D. with him, and these finish in three days more. When could D. have done it alone?
- Solve  $\frac{{}^3\sqrt{6\cdot 27} \times {}^6\sqrt{1\cdot 2}}{{}^2\sqrt{312}}$  to three decimal places.
- Thirty-five pounds of cochineal are mixed with 20 lbs. of a higher quality, and the mixture is then found to be worth 7.3 shillings per lb. Supposing the difference of their values to be 1s. 10d. per lb., what is the value of each kind?
- Explain fully the principles upon which the extraction of the cube root is based.

*Arithmetic.*

## Females.

Three hours allowed.

Answer five questions at least, the last to be one.

- If the ninepence loaf weigh  $7\frac{1}{2}$  lbs. when wheat is 9s. per bushel, what will be the price of 150 lbs. of bread when wheat sells at 60s. per quarter?
- 3 qrs. 25 lbs.  $15\frac{1}{2}$  ozs., at £142, 16s. 8d. a ton? *Practice.*
- A gentleman having purchased  $\frac{1}{2}$  of an estate, sold to one person  $\frac{1}{3}$  of his purchase, and to another  $\frac{1}{3}$  of the remainder. The proceeds of the sale were £875; what was the value of the part which he retained?
- What decimal of a guinea corresponds to £125?
- The diagonal of a four-sided field is 304 yards, and the perpendiculars let fall upon it from the opposite corners, 78 and 96 yards respectively. Required the cost of ploughing the field at £1, 17s. 9d. an acre.
- Explain the principle upon which the extraction of the square root depends.
- Explain, as to children, the principles upon which the solution of the following process depends:—

	Ac.	No. Poles	Yds.	Feet	In.
From	15	0	0	0	0
Take	3	3	39	30	1

*Geography.—Physical.*

Three hours allowed.

Answer four questions.

- Describe the vegetation of Asia, south of the 33rd parallel of north latitude.
- Define some of the effects, geographical and industrial, which arise from an irregular or deeply-indented coastline.
- Describe the course and character of the "Gulf Stream."
- Describe fully one of the principal river systems of the Eastern Hemisphere.
- How is it that the lower strata of the atmosphere are warmer or retain more of the solar heat than the higher?

*Geography.—Descriptive.*

Three hours allowed.

One question may be omitted, but not the second.

- Describe concisely the commercial centres of the Pacific.
- Give a full account of the *Illawarra District*, New South Wales.
- Describe the *Italian Peninsula* and its adjacent seas.
- Enumerate all the countries bordering upon the Indian Ocean. Give a detailed account of one of those lying on its northern side.
- Describe the habitat, nature, and uses of cochineal.

*Principles of Teaching.*

Three hours allowed.

- School Discipline.*—How can pupils best be trained to habits of systematic diligence and sustained effort.
- Certain qualities or precautions are essential to the success of *all* methods. What are they.
- What classes of children fall under the Teacher's influence in the "Perceptive Stage"? Describe how the requirements of this stage should be met.
- In the light of the surroundings and habits of Australian youth, to what points of moral culture would you deem it necessary to give special care?
- Give full notes of an *advanced* or Fifth Class object lesson upon one of the following:—

The "diving-bell."  
The laws of harmonious coloring.  
Combustion.  
Insect architecture.  
A plate glass reflector.

*School Books.*

Two hours allowed.

- Give an outline of the lessons upon Fishes in Book III, I.N.B.
- What lessons on Political Economy are given in Book IV, I.N.B.?
- What lessons upon Chemistry are given in the Supplement to Book IV?
- Describe the lessons given upon Trees in the Girls' Reading Book, I.N.B.

*English Literature.*

Three hours allowed.

Answer five questions at least.

- Describe the plan or scope of the "Paradise Lost."
- What was the condition of English literature when Chaucer appeared? What position does he occupy in English literature? Show what influence he has exercised.
- Enumerate the leading authors of Queen Anne's time, and give an account of the works of Addison. Explain what is meant by the "Augustan Age."
- Enumerate those poems in the Language which stand *alone*, or which have, so to speak, no literary parallels. Quote a portion of one or more.

5. "Ode to the Passions." Describe concisely this poem, or cite some of its stanzas. Enumerate the other works of its author.

6. To what circumstances and persons do we owe the advancement of British literature during the Sixteenth Century?

#### WRITING.

An hour allowed. One question may, if necessary, be omitted.

1. The best writing differs from the worst in three particulars only, or at most, four. How can you show this?
2. Assuming the above to be proved, how long should it take a lad (say) of twelve years old to acquire a good style of writing?
3. What is the most suitable matter for copy-lines?
4. Give specimens of the writing which you teach.

#### DOMESTIC ECONOMY.

Three hours allowed.

1. What use would you make of a piece of ground, 30 feet by 15 feet, attached to your house?
2. Suppose you lived in the remote interior, what domestic remedies or medicines would you deem it prudent to keep?
3. How should woollen fabrics be washed?
4. How would you guard girls of the working class against such evils as over-dressing, gossiping, idling, extravagance, &c.?
5. How do you account for the desertion of husbands, or the neglect of "homes"?

#### VOCAL MUSIC.—TONIC SOL-FA METHOD.

An hour and a half allowed.

1. What is the difference between a triad and a chord of the seventh, and what is necessary in the use of the latter?
2. State what you know of the mezzo-Soprano and baritone voices, and explain how you would classify such voices for four-part harmony.
3. By whom and when were the sol-fa syllables first used, and what suggested their employment in that manner?
4. Translate the following into the established notation, in *short score* :—

Score :—

Key G.

m	:	—	f	:	r	s	:	—	d	:	—	r	:	f	m	:	r	d	:	—
d	:	—	l <sub>1</sub>	:	t <sub>1</sub>	d	:	—	d	:	—	l <sub>1</sub>	:	r	d	:	t <sub>1</sub>	d	:	—
s	:	—	f	:	s	s	:	—	m	:	—	f	:	l	s	:	f	m	:	—
d	:	—	r	:	f	m	:	—	l <sub>1</sub>	:	—	f <sub>1</sub>	:	r <sub>1</sub>	s <sub>1</sub>	:	s <sub>1</sub>	d <sub>1</sub>	:	—

5. The above passage contains examples of four different chords, occurring once, twice, thrice, and four times respectively. Write their names (and *positions*, if you know them) under the bass, in the order in which they occur.

6. What are the uses of the established notation marks called the *sharp* and the *flat*? Illustrate by examples.

7. Write down the most usual established notation *time signatures* for two, three, four, six and nine pulse measures respectively, and explain the principles on which those signatures are constructed.

8. What is the difference between the principles of the notation of *tune*, or the musical scale, by the Tonic Sol-fa and Established Notations respectively? State your opinion of their relative merits or defects.

#### DRAWING AND PERSPECTIVE.

An hour and a half allowed.

1. Explain the foundation of the theory of perspective.
2. Give an example of the difference between the real and apparent forms of objects.
3. Is Geometry of any use in working out a problem in perspective?
4. Does an object always appear of its real shape?

In addition to answering the foregoing questions, examinees should furnish specimens of their finished drawings.

#### FRENCH.

Three hours allowed.

1. Translate into English :—

a. Non seulement il s'imposa la loi de travailler régulièrement avec chacun de ses ministres, mais tout homme connu pouvait obtenir de lui une audience particulière, et tout citoyen avait la liberté de lui présenter des requêtes et des projets. Les placets étaient reçus d'abord par un maître des requêtes qui les rendait apostillés; ils furent dans la suite renvoyés aux bureaux des ministres. Les projets étaient examinés dans le conseil quand ils méritaient de l'être; et leurs auteurs furent admis plus d'une fois à discuter leurs propositions avec les ministres en présence du roi.

b. Oh ! combien le péril enrichirait les dieux,  
Si nous nous souvenions des vœux qu'il nous fait faire !  
Mas le péril passé, l'on ne se souvient guère  
De ce qu'on a promis aux cieux ;  
On compte seulement ce qu'on doit à la terre  
Jupiter, dit l'impie, est un bon créancier,  
Il ne se sert jamais d'huissier.  
Eh qu'est ce donc que le tonnerre ?  
Comment appelez-vous ces avertissements ?

2. Translate into French :—

#### THE FOUR-LEGGED THIEF-CATCHER.

A Polish count named Oginski had a very fine poodle dog, and liked him so much that he never went out without him. One evening the count went to amuse himself, for an hour or two, at a public ball at the Winter Vauxhall. He was accompanied, as usual, by his favourite dog, but the sentinel at the door would not admit him, and the master left him in the guard-house in care of a soldier. The count had not been long in the saloon before he perceived that his watch had been stolen; he complained to the police officers who were there, and they assured him they would use all their endeavours to find it. "I have a very sure method of finding it," said Oginski, "if you will admit my dog and lock the doors; I promise you he will not harm anybody." The officers consented, and the dog was admitted. After a few mutual caresses, the count walked round the room with him, then stopping in the middle, and tapping with his hand upon his foot, he said, "Strinki, go and find it!" pointing at the same time round the saloon. Strinki began immediately to examine every one, smelling their clothes, and at last stopped short before a very well-dressed man, and began barking. The count then made himself known to the company, saying: "Ladies and Gentlemen—I have been robbed of my watch

watch and that man has it; I insist on his being searched, and if it be found that I have accused him unjustly, I will answer for the consequences." The company seconded the count, the search took place, and the watch was found, to the great admiration of all but one, who was immediately kicked out of the room.

3. Give the first persons singular and plural of—

The *Présent de l'Indicatif* and *Passé Défini*, as well as the two participles of *souffrir*, *nâître*, *clore*, *teindre*, *devoir*, *protéger*, *vire*, *envoyer*, *être*, *pleuvoir*, *mourir*, *mouvoir*, *s'asseoir*, *prendre*, *savoir*, *faire*, *avoir*, *tressaillir*, *absoudre*, and *maudire*.

4. State briefly the difference between—

1. *Emprunter à*, *Emprunter de*. 2. *Durant*, *pendant*. 3. *Beaucoup*, *très-beaucoup*. 4. *Lire sur*, *lire dans*. 5. *Oublier à*, *oublier de*. 6. *Second*, *deuxième*. 7. *Servir à rien*, *servir de rien*. 8. *Tous les deux*, *tous deux*.

5. Correct the following participles when necessary, and give your reasons for each correction:—

1. *Approuvé l'écriture à-dessus*. 2. *Il nous a félicité*. 3. *Les cinq heures que j'ai dormi*. 4. *Les dix ans qu'il a vécu*. 5. *Ils se sont imaginés que je plaisantais*. 6. *Ils se sont écrit*. 7. *Nous nous sommes nu*. 8. *Les mauvais temps qu'il y a eus*. 9. *La réponse que j'avais prévue qu'on vous ferait*. 10. *Ces questions sont plus intéressante que je ne l'avais crues*.

6. Correct the words in italics when necessary—

La fécondité du lapin est encore plus grande que *celui* du bœvre. Pratiquez la vertu, fuyez la paresse; *celle-là* rend malheureux, *celle-ci* mène au bonheur. Il faut honorer *ses* père et mère. Ma sœur a *sa* migraine. Les langues ont chacune leur bizarrerie. De qui n'est pas capable un cœur que la jalousie *endurçit* et *envenim*? Le bûcheron priaît la mort de (*le* or *lui*?) aider à recharger son bois. Cinq à six persons vont venir.

Latin.

Three hours allowed.

1. Translate into Latin:—

The merchant, having finished his business, set out for the country. You ask if a prophet is ever believed in his own country and by his own family. Do not go back to your home in Italy, but come to see us at Athens.

2. Write down the accusative plural of *socer*, *faber*, *agger*, *vulnus*, *manus*, *numerus*, *bos*, *vis*; the genitive plural of *pater*, *ager*, *hostis*, *canis*, *senex*, *judez*, *dies*, *nubes*; the ablative singular of *crinis*, *securis*, *vectigal*, *sal*, *caro*, *orto*, *salus*, *domus*. Give the gender of each of these words.

3. Write down, with English, all the infinitives of *aufero* (in the active and passive voice), the perfect and supine of *vinco*, *figo*, *torreo*, *detero*, *sperno*, and parse *licuisset*, *memento*, *regerere*, *pateris*, *eunti*.

4. Translate into English:—

(1.) Ad haec Ariovistus respondit: Jus esse belli ut qui vicissent iis quos vicissent quemadmodum vellent imperarent; item populum Romanum vietis non ad alterius praescriptum sed ad suum arbitrium imperare consuesse. Si ipse populo Romano non praescriberet quemadmodum suo jure uteretur non oportere sese a populo Romano in suo jure impediri. Aeduos sibi, quoniam belli fortunam etentassent et armis congressi ac superati essent, stipendiarios esse factos. Magnam Caesarem injuriam facere qui suo adventu vectigalia sibi deteriora faceret. Aeduis se obsides redditurum non esse, neque his neque eorum sociis injuria bellum illaturum, si in eo manerent quod convenisset, stipendiumque quotannis penderent; si id non fecissent, longe iis fratrum nomen populi Romani abfuturum. Quod sibi Caesar denuntiaret se Aeduorum injurias non neglecturum, neminem eorum sine sua pernicie contendisse. Quum vellet congregaretur: intellecturum quid invicti Germani, exercitissimi in armis, qui inter annos XIV tectum non subissent, virtute possent.

(2.) Cultores regionum a reliquis mortalibus multum differunt. Mortuos limo obliti plangunt: nec cremare aut fodere fas putant, verum arte medicatos intra penetralia, collocant. Lutum inter manus, farinam calcibus subigunt. Forum ac negotia feminae, viri pensa ac domos curant: onera illac humeris, hi capitibus accipiunt. Cum parentes egent, illis necesse est, his liberum alere.

5. Translate into Latin:—

The Helvetii, brought to it by want of all things, sent to him ambassadors about a surrender. Who, when they had met him on the march, and had thrown themselves at his feet, and having spoken like supplicants had sought peace, and when he had bidden them to await his coming in the place, in which they then were, obeyed. After Cæsar had come thither, he demanded the hostages, the arms, the slaves who had fled over to them. Whilst these things are being sought and brought together, a night having intervened, about six thousand men of the canton, which is called Verbigenus, whether thoroughly terrified by fear, or induced by hope of safety, at the beginning of night, having gone forth from the camp of the Helvetii, marched to the Rhine and the boundaries of Germany.

German Language.

1. Where is German said to be spoken most correctly?

What are the English equivalent sounds to

*an*, *ün*, *en*,

and to

*sch*, *sz*, *z*, *v*, and *w*?

2. Decline the articles—

*der*, *die*, *das*,

and

*ein*, *eine*, *ein*.

3. Decline the substantives—*der Vater*, *der Sohn*, *die Nacht*, *der Fürst*, *die Uhr*, *das Dorf*, *das Pferd*.

4. Decline in the singular and plural the personal pronouns of the 3rd person.

How is it usual to address a person in German, and how is this method expressed in printing?

5. Explain clearly the division of the German verbs into *strong* and *weak Conjugations*.

Give the past and perfect tenses of *singen*, *kommen*, *hören*.

6. What is the meaning of a *Separable* and what of an *Inseparable compound verb*?

Give the present tense and the future perfect tense of—

(1.) *abgehen*,

(2.) *entstehen*.

7. (a.) What auxiliary verb is used to form the *Passive* of German verbs?

Ex. Give the pluperfect passive of *lieben*.

(b.) What auxiliary verb is used to form the perfect tenses of German Reflexive verbs?

Ex. Give the perfect tense of the verb "*sich waschen*."

8. Give the German of—

1. The first twelve cardinal numerals.

2. The days of the week.

3. The months of the year.

4. The four seasons.

Ex. Translate—

Sydney, the 5th December.

A quarter to twelve.

Half-past three.

A bottle of wine.

Translate

Translate into English—

“ Durch diese hohle Gasse muss er kommen  
 Es führt kein anderer weg nach Küssnacht—Hier  
 Vollend' ichs—Die Gelegenheit is günstig.  
 Dort der Hollunderstrauch verbirgt mich ihm,  
 Von dort herab kann ihm mein Pfeil erlangen,  
 Des Weges Enge wehret den Verfolgern.  
 Nach' deine Rechnung mit dem Himmel, Vogt  
 Fort musst du, deine Uhr ist abgelaufen.  
 Ich lebe still und harmlos—Das Geschoss  
 War auf des Waldes Thiere nur gerichtet,  
 Meine Gedanken waren rein von Mord—  
 Du hast aus meinem Frieden mich heraus  
 Geschrecht; in gährend Drachengift hast du  
 Die Milch der frommen Denkart mir verwandelt  
 Zum Ungeheuren hast du mich gewöhnt—  
 Wer sieht des Kindes Haupt zum Ziele setzte,  
 Der kann auch treffen in das Herz des Finks.  
 Die armen kindlein die unschuldigen,  
 Das treue Weib muss ich vor deiner wuth  
 Beschützen, Landvogt! Da, als ich den Bogenstrang  
 Anzog—als mir die Hand erzitterte—  
 Als du mit grausam teuflischer Lust  
 Mich zwangst, auf's Haupt des Kindes anzulgen—  
 Als ich ohnmächtig flehend rang vor dir,  
 Damals gelobt' ich mir in meinem Innern  
 Nit furchtbarm Eidschiour, den nur Gott gehört  
 Das meines nächsten Schusses erstes Ziel  
 Dein Herz sein sollte—was ich mir gelobt  
 In jenes Augenblickes Hollenqualen,  
 Ist eine heil'ge Schuld, ich will sie zahlen.”

Translate into German—

“ Paul had never risen from his little bed. He lay there, listening to the noises in the street, quite tranquilly; not caring much how the time went, but watching it, and watching everything about him with observing eyes. When the sunbeams struck into his room through the rustling blinds and quivered on the opposite wall like golden water, he knew that evening was coming on and that the sky was red and beautiful. As the reflection died away and a gloom went creeping up the wall, he watched it deepen, deepen, deepen into night. Then he thought how the long streets were dotted with lamps, and how the peaceful stars were shining overhead. His fancy had a strange tendency to wander to the river, which he knew was flowing through the great city; and now he thought how black it was, and how deep it would look, reflecting the host of stars—and more than all how steadily it rolled away to meet the sea.”

*Geometry.*

Three hours allowed.

1. Define a right angle, and show how to draw a straight line at right angles to a given straight line of unlimited length from a given point without it. Why “of unlimited length”?
2. If two triangles have two sides of the one equal respectively to two sides of the other, but the contained angles unequal, show that the base of the triangle with the greater contained angle is greater than the base of the other.
3. A. If a straight line be divided into two equal parts, and also into two unequal parts, the rectangle under the unequal parts, together with the square of the intermediate part, is equal to the square of half the given line.  
 B. A B C is an isosceles triangle; A B being equal to B C, D is any point in A C. Prove that the square on A B is greater than the square on B D by the rectangle A D, D C.
4. Prove that the tangent to a circle at any point is at right angles to the diameter through that point, and thence show that the two tangents, from an external point, are equal.
5. The opposite angles of any quadrilateral, inscribed in a circle, are together equal to two right angles.
6. Show how to inscribe a regular pentagon in a given circle.
7. Give Euclid's test of four quantities being proportional. In what propositions of the Sixth Book is this test applied?
8. Prove that two triangles are similar when they have an angle in each equal and the sides about the equal angles proportional.

*Algebra.*

Three hours allowed.

1. State the *rule of Subtraction* in Algebra, and explain the reason for it.
2. If  $a = \frac{1}{4}$ ;  $b = -\frac{1}{27}$  Find the values of  $\sqrt{a}$ ;  $\sqrt[4]{-b}$ ;  $\frac{a^3 - b^3}{a^2 + ab + b^2}$
3. Simplify  $\left\{ 1 - \frac{1}{(2x+1)^2} \right\} \div \frac{x+1}{(x+\frac{1}{2})^2}$   

$$\frac{1}{x-2} - \frac{1}{x+2} + \frac{x+3}{x^2+5x+6} - \frac{x-3}{x^2-5x+6}$$
4. Find by inspection or otherwise the G.C.M. of  $x^3 - mx^2 + mx - 1$  and  $x^2 - 1$ .
5. Solve the equations—  
 (A)  $\frac{5x-1}{7} - (10x-3) = \frac{x-1/5}{14} + 1$   
 (B)  $\frac{x^2-9}{3} = \frac{x+3}{4}$   
 (C)  $1+x = \sqrt{1+x} \sqrt{3+x^2}$   
 (D)  $x + \frac{ab}{x} = a \cdot b$   
 (E)  $\left. \begin{aligned} x^2 + y^2 &= 35 \\ xy(x+y) &= 30 \end{aligned} \right\}$

6. Find the sum of the squares of the roots of the equation  $x^2 + px + q = 0$ .

7. Simplify the Surds—

$$\frac{\sqrt{3} + \sqrt{5}}{\sqrt{5} - \sqrt{3}}; \sqrt{8} \times \sqrt{31} + \sqrt{\frac{8}{9}} \sqrt{27 + 4\sqrt{35}}$$

8. The area of a rectangle is ( $a$ ) square feet, and if the length and breadth were each increased by one foot the area would be doubled. Find the sides.

#### Trigonometry.

Three hours allowed.

1. If the sine of an angle be  $\frac{1}{3}$ , find the other trigonometrical functions and also the cosine of twice the angle.

2. Show that the sine of an angle = cosine of its complement = sine of its supplement.

3. Prove that in any triangle the sides are proportional to the sines of the opposite angles. Show how this proposition can be used to find the distance of an inaccessible object, which can be observed from each end of a measured base-line.

4. Prove the formulae

$$\text{Cos. } ^2A \text{ Cos. } ^2B + \text{Sin. } ^2A \text{ Sin. } ^2B + \text{Cos. } ^2A \text{ Sin. } ^2B + \text{Sin. } ^2A \text{ Cos. } ^2B = 1$$

$$\frac{\text{Sin. } 3A + \text{Sin. } A}{\text{Sin. } 3A - \text{Sin. } A} = \tan. 2A.$$

5. Assuming that in a plane triangle

$$a^2 = b^2 + c^2 - 2bc \text{ Cos. } A.$$

$$\text{Prove that } \text{Cos. } \frac{A}{2} = \frac{\sqrt{S(S-a)}}{bc} \quad \text{Sin. } \frac{A}{2} = \frac{\sqrt{(S-b)(S-c)}}{bc}$$

6. If in a triangle  $\text{Cos. } B = \frac{\text{Sin. } A}{2 \text{ Sin. } C}$ , show that the triangle is isosceles.

7. The sides of a triangle are 3 and 12, and the contained angle is  $30^\circ$ . Find the hypotenuse of an equal isosceles right-angled triangle.

8. A person wishing to ascertain his distance from an inaccessible object, finds three points in the horizontal plane at which the angular elevation of the summit of the object is the same. Show how the distance may be found.

#### Mechanics.

Three hours allowed.

1. Assuming the parallelogram of forces, prove the triangle of forces.

2. Two equal forces act at a certain point. If one of them acted in an exactly opposite direction the resultant would be increased in the ratio of 1 :  $\sqrt{3}$ . Find the angle between the forces in the first instance.

3. Define the "moment" of a force about any point, and show that if two forces keep a body which is movable freely about a fixed point at rest, their moments are equal.

4. A body of weight,  $W$ , rests on a smooth plane inclined to the horizon at an angle of  $30^\circ$ , being supported by a string which makes an angle of  $30^\circ$  with the plane. Show that the tension of the string =  $\frac{W}{\sqrt{3}}$

5. If  $O$  be the intersection of the diagonals of a square  $ABCD$ , find the centre of gravity of the figure formed by removing the triangle  $AOB$  from the square.

6. A uniform triangular board rests horizontally on three props at the angular points. Show that the pressures on the props are equal.

7. Find the relation between  $P$  and  $W$  in the system of pulleys in which each pulley is attached to the weight, the weights of the pulleys being neglected. If there are three pulleys, each weighing  $Q$ , how would the result be modified?

#### Experimental Physics.

Three hours allowed.

1. What is meant by the diffusion of gases? What is the law of diffusion?

2. What is the specific heat of a body? Show its use in controlling the atomic weight of a substance.

3. What is electrolysis? What is the action of an electric current upon solutions of hydrochloric acid, copper sulphate, and sodium chloride?

4. Describe the Ruhmkorff coil, and explain its action.

5. Explain the action of the common glass frictional electrical machine.

6. What is sound and how does it travel?

7. Give an account of the eye as an optical instrument. Give sketch.

8. How would you illustrate the conduction, convection, and radiation of heat to a class?

9. The latent heat of water is 79, and that of steam 537—what is meant by this?

10. Give instances of the reflection and refraction of light.

N.B.—In all cases where possible, illustrate your answers by sketches.

#### Chemistry.

Three hours allowed.

1. Show that the terms supporter and non-supporter of combustion are merely relative.

2. Define the terms atom, molecule, mixture, and chemical-compound.

3. Give an account of the preparation and properties of chlorine. How does it differ from sulphuric acid ( $\text{SO}_2$ ) as a bleaching agent?

4. Describe the manufacture of coal gas.

5. What are the oxygen compounds of nitrogen; how is nitric acid prepared?

6. Explain the use of the spectroscope in chemistry.

7. How much zinc and sulphuric acid would be required for the preparation of 50 litres of hydrogen gas at  $15^\circ \text{C}$ . and 755 m.m.?

8. How is sulphuric acid prepared?

9. How is copper extracted from its ores?

10. Describe the chemical changes brought about in air by the respiration of plants and animals.

N.B.—In all cases where possible, illustrate your answers by sketches and equations.

British

*British History.*

Three hours allowed.

1. What proofs exist that Britain was once occupied by races different from those by which it has been inhabited since the Fifth Century?
2. Give an account of the reign of King Alfred.
3. Account for the comparatively stationary condition of Scotland from the time of Alexander the Second to that of the last of the Stuarts.
4. Describe the case of Sir John Fenwick. What lessons may be drawn from it?
5. Compare the condition of England with that of Scotland during the reign of Charles the Second.
6. Relate concisely the rise and progress of Public Education in each of the "Three Kingdoms."
7. What differences do you observe between a Government as administered under Queen Elizabeth, and that now existing in this Colony?
8. What was the Darien Scheme?
9. Account for the existence and power of the Bank of England.

*Geology.*

Three hours allowed.

1. State generally the chief objects of the Science of Geology.
2. Upon what principles have the *sedimentary formations* been classified? Mention some of the characteristics of the *Paleozoic epoch*, and of the *Jurassic* and *Pleistocene Periods*.
3. Name the periods of the *Paleozoic* or *Primary epoch*. To which of them does the oldest known fossil belong? Name and describe this fossil.
4. To what periods do the principal coal measures of England and of New South Wales belong? Name some of the fossil plants of each. In what other geological formations have workable seams of coal been found?
5. How have quartz-veins been formed? In what sedimentary and igneous formations are the auriferous quartz-veins chiefly found?
6. In what formations do tin lodes usually occur.
7. Explain the nature and origin of an *ordinary fault* and a *reversed fault*; and illustrate by a sketch. How would you ascertain the position of a faulted or displaced stratum in the case of an *ordinary fault*.
8. How do you account for the origin of the Great Dividing Range which extends through New South Wales, and of the valleys on both sides of it; also of the vast alluvial plains of Riverina through which flow the Darling, Murrumbidgee, and Murray Rivers?
9. Where do the most extensive coral reefs occur? Describe the formation of a *fringing reef*, a *barrier reef*, and an *atoll*.
10. Define the terms *porphyry*, *amygdaloid*, *breccia*, *conglomerate*.
11. What are the component minerals of *ternary granite*, *diorite*, *felstone*, and *syenite*? How do you account for the vesicular and dense structures of *Basalt*?
12. How are *glaciers* formed? Explain the geological action of *frost*, *snow*, *glaciers*, and *icebergs*.
13. Explain the solvent action of rain-water upon limestone rocks; and how *stalactites*, *stalagmites*, and *calcareous tufa*, or *travertin*, are formed.
14. Name the accompanying fossils: of what formation are they characteristic?
15. Name the accompanying rock specimens: what do you know about their mineral composition?

*Physiology.*

Three hours allowed.

1. Describe the various stages of the process of digestion in man, enumerating briefly the different functions of the various organs concerned.
2. What is a *gland*? Describe its minute structure. Enumerate and describe the principal glands and state what you know of the respective functions.
3. Describe the microscopic character, of human blood. How does arterial differ from venous blood?
4. What is reflex action? Give any illustration of reflex action with which you may be acquainted.
5. Describe the different kinds of muscular structure, their minute characters, and their functions.
6. Describe the human lungs, their functions, and the effect of respiration on the blood and on the air inspired and expired.
7. How does the human eye accommodate itself to near and distant vision?

## ANNEX M.

## DEPARTMENT OF PUBLIC INSTRUCTION.

## TRAINING MASTER'S REPORT UPON THE PUBLIC TRAINING SCHOOL, FOR THE YEAR 1881.

DURING the year 1881 the work of the Training School was carried on by the following staff:—

The Training Master.  
The Assistant Training Master.

Also,—

The Teacher of French .....	3 hours weekly.
The Teacher of Physics and Chemistry .....	2     "
The Teacher of Singing .....	2     "
The Drill Instructor .....	4     "
The Drawing Master (until he resigned in August) .....	2     "

Every Wednesday the male students were under the charge of the Master of Method, and the female students under that of the Mistress of Method. The female students were also instructed in sewing, and the method of teaching it to pupils, by the Head Sewing-mistress.

There were two sessions of six (6) months each, and the students of each session were divided into Upper and Lower classes. None were admitted into the Upper class except under the following conditions:—

1. That they had been pupil-teachers of at least three years' standing.
2. That a favourable report had been received from the Inspectors of their several districts upon their practical skill.
3. That their yearly examinations (as pupil-teachers) had shown that they possessed fair literary ability.
4. That they satisfactorily passed a test examination held by the Examiners at the end of the first month in training. When the result of this examination left doubts as to the proficiency of one or more of the students, another month's probation was allowed.

The

The following tables show the classification, &c. of the students:—

a. CLASSIFICATION AND AGES.

Classes.	Males.	Females.	Total.	Ages.						Total.

Of these, eight (8) males in the Lower Class were married. Their wives received instruction in the Model School one day each week in needlework, and in the duties required of them in connection with their husbands' schools—in the assembling and dismissing of the female pupils.

Previous to entering the Training School, pupil-teachers are neither instructed nor examined in English literature, physics, or chemistry, and consequently have but little if any knowledge of those subjects; and the majority are defective in English grammar (especially composition), physical geography, theory of arithmetic, Latin, and French.

Teachers from small schools are, as a rule, very defective in every subject requiring original thought. Their knowledge of English grammar is very poor, and they are generally defective in even the mechanical part of elementary arithmetic. They know almost nothing of the geography of New South Wales, and from this fact it may be inferred that their knowledge of general geography is very low.

Married students are paid £8 per month, and single ones £6. To procure these payments, satisfactory reports must be obtained from the officers of the Examining Department, who examine the students at the end of each month to determine their diligence in study and their progress.

*Practical Training.*

The students attend one day in each week at the Model School for practical training in teaching, the males under the Master of Method, and the females under the Mistress of Method. They were instructed in the method of teaching, and were required to give lessons in the school, which were afterwards criticised.

*Physical Training.*

The males received instruction two hours weekly in military drill and gymnastics, and the females a like time in drill and calisthenics. The practical knowledge acquired by them in these subjects was tested by each student drilling a class of pupils, and their theoretical knowledge by a written examination. These physical exercises proved beneficial to the health of the students.

*Progress while in Training.*

Considering the attainments of the students when they entered, and the shortness of the term of training, very satisfactory results were achieved.

*In the Upper Class.*

5 males and 13 females reached the limit of *Good*.  
 7 " 15 " " *Very Fair*.  
 4 " 5 " " *Fair to Very Fair*.

*In the Lower Class.*

15 males and 14 females reached the limit of *Fair*.  
 16 " 11 " " *Tolerable*.  
 2 " 1 female " " *Moderate*.

*Appearance of Students.*

With but few exceptions, the personal appearance of the students was respectable and their attire neat and becoming. *Conduct.*

*Conduct.*

Their conduct and demeanour while under instruction were very satisfactory. I visited the residences of those who lived within a reasonable distance of the Training School as frequently as possible; but the majority of them had their lodgings in various parts of the city and suburbs beyond my reach, and consequently my knowledge of their home life was very slight. From visits made to those within reach, and inquiries concerning those at a distance, I was led to believe that their evenings were for the most part spent in study. I am further led to this conclusion from the fact that the work appointed to be done at home was, in nearly every case, carefully and correctly performed. Had the Department arranged for licensed lodging-houses for the accommodation of the students, there would have been greater facilities afforded for visiting them and for forming a correct opinion regarding their private character.

*Saturday Classes.*

The Saturday classes in connection with the Training School were in operation throughout the year. These classes were attended by pupil-teachers from the Public and Denominational Schools in Sydney and the suburbs. The number enrolled for the last quarter of the year was 91 males and 218 females, making a total of 309. The subjects in which they received instruction were—

Mathematics,	Latin (males),
French (females),	Drawing,
Vocal music,	School management.

The conduct and attention of the pupil-teachers in these classes—especially of the girls—were very good, and their progress on the whole was reasonably satisfactory.

J. WRIGHT,  
Training Master.

## APPENDIX V.

## PRINCIPAL SCHOOL ATTENDANCE OFFICER'S REPORT FOR THE YEAR 1881.

I HAVE the honor to submit for the information of the Minister my report for the year 1881 on the working of the compulsory clauses of the Public Instruction Act of 1880.

In order to carry out the provisions of the 20th and 21st sections of the Act, the Colony is being divided into districts. These districts are being proclaimed as places where under defined conditions the obligatory attendance of children at school may be enforced.

At the end of the year 51 such districts had been proclaimed, comprising those parts of the Colony lying between the Tweed on the north, Dubbo on the west, Queanbeyan on the south-west, Ulladulla on the south, and the Metropolis on the east.

Of the proclaimed districts, 35 are now under the charge of School Attendance Officers. These districts embrace the counties of Cumberland, Cook, Camden, Northumberland, Hunter, Roxburgh, Westmoreland, Argyle, St. Vincent, Murray, Bathurst, Wellington, Gloucester, Brisbane, and Bligh.

The School Attendance Branch of the Public Instruction Department being an entirely new feature it was decided to commence operations on a small scale, and gradually enlarge the circle of its action. Accordingly the work this year was begun with four officers whose duties were confined to Sydney and its immediate suburbs. After careful instruction in the matter and manner of their work these officers commenced their duties, which they have performed very satisfactorily. Upwards of 10,000 cases of default have been investigated and reported upon by them, and they have inquired into numerous cases of application for exemption from payment of school fees, in order to ascertain whether the applicants had reasonable grounds for their request.

About the end of May, twenty-six additional officers were appointed. After seven weeks' continuous training in the theory and practice of their duties these officers were allocated, care being taken to place them as near the centre of their respective districts as circumstances would permit, in order to economise their labours and prevent unnecessary travelling expense. The Metropolitan officers afforded considerable help in the training of the others by taking them in parties of three or four into their districts, and affording them opportunities of seeing how the work was done.

Suitable registers were supplied to each School Attendance Officer on taking charge of a district, and in these he is required to record methodically the nature and amount of his work. These registers comprise,—

1. A diary book in which the duties of each day are to be entered clearly and in the order of their performance, at the close of the day; this book is liable to be inspected or sent for by the Principal Attendance Officer on the shortest notice.

2. A weekly report giving a summary of the week's work. This paper is forwarded to the Principal Attendance Officer at the close of each week for examination, and becomes a record of the Office.

3. Printed forms on which all the necessary legal information required must be detailed in each case of default, when it is considered necessary to take the case into Court.

The Minister will thus see that the work of this Branch has been reduced to a system, requiring uniformity of action on the part of those who carry out its duties, a point of great importance, as it enables me to form a fairly correct estimate of the comparative usefulness of each officer and greatly facilitates the work of the Office.

The officers who have been already appointed are, with some exceptions, well qualified for their work, and perform it with proper temper, with earnestness, and with success. It is highly gratifying to me to acknowledge the intelligent efforts of these officers in carrying out the instructions and counsel which have been imparted to them, and to find that they are well received and cordially supported by the inhabitants of the districts where they labour. The following table will show that much success has attended their efforts not only in promoting the more regular attendance of children at school but in bringing many children into school who had hitherto been deprived of education by the culpable carelessness or wilful neglect of their parents or guardians.

Districts.	Number of children whose cases have been investigated.	Number of children whose attendances at School shows a marked improvement.	Number of children who had not attended School for some months previous to the visits of an Officer.
Metropolitan (for 12 months) .....	10,579	4,781	1,680
Country (for 6 months) .....	12,005	5,033	875
Total .....	22,584	9,814	2,555

The average attendance in the Metropolitan Districts has been considerably lessened by the presence of small-pox. The fear of infection induced by this much-dreaded disease has caused numbers of people to keep their children away from school, and some schools were actually closed in consequence for a time. This has to a great extent paralyzed the efforts of the officers, and rendered their work unpleasant and apparently less successful.

Few persons have this year been subjected to prosecution in a Court of law, in the hope that mild instruction and earnest persuasion would bring about more beneficial results than the employment of harsh measures, and would also tend to conciliate those who might be opposed to the compulsory clauses of the Act.

However, in some cases of flagrant violation of the Act, and when every other means had been tried—repeatedly tried, and failed,—and when as in some instances open hostility had been manifested and openly vaunted, it became imperatively necessary, not only for the vindication of the law but as an example to others, to have recourse to extreme measures. The following table shows the number of prosecutions and convictions in the Metropolitan Districts :—

District.	School Attendance Officer.	Prosecutions.	Convictions.
No. 1 .....	George Turner .....	7	5
No. 2 .....	Robert George .....	7	7
No. 3 .....	W. G. Wilson .....	10	10
No. 4 .....	R. T. Sutton .....	11	11
Total .....	.....	35	33

In some districts an impression exists that defaulters are treated with too much leniency ; but it should be borne in mind that no prosecution can take place in any locality till the district of which it forms a part has been six months proclaimed, and therefore none could have taken place earlier than 1882 in any district outside the Metropolitan County. A few convictions in country districts would, however, have a beneficial effect on all delinquents, and give those who have complied with the law reason to feel that they had done right.

This year's experience has shown that, without a more stringent application of the law, the desired result and that contemplated by the Act will not be fully obtained. Parents may listen approvingly to remonstrance and promise compliance with the law, but they will come to regard expostulation, however earnest or persuasive, as mere sentiment, so long as they think there will be no punishment.

ALF. W. SLADEN.

## EDUCATION.

No. 1.

Mr. John Conlon and others to The Minister of Public Instruction.

Sir,

Quipolly, 9 June, 1882.

We, the undersigned, School Picnic Committee, are sorry to have to complain against the conduct of the local school teacher, Mr. Elliott. Three years ago we had a school feast, and Mr. Elliott acted as secretary, when there was £1 14s. 6d. left in his hands, which was to go towards the expense of the next school feast. You will see by the *Murrumbidgee Times* of Saturday next there is to be a picnic for the school children on Saturday the 17th instant. The above-mentioned committee waited on Mr. Elliott on Wednesday last, and requested him to hand the money over, which he refused to do; his reason for doing so is because the picnic is not taking place at the new school, the committee thinking the old school site a much better place for it. The money Mr. Elliott detains was raised by public subscription. Would you kindly advise Mr. Elliott to deliver the money to the committee, to prevent any legal proceedings being taken.

JOHN CONLON.  
WILLIAM WADWELL.  
JAMES TAYLOR.  
FREDK. BURDEN,

Ackndg. (*sic*) Secretary.

The Chief Inspector, for report.—W.W., B.C., 14/6/82. District Inspector Bradley, for report (see also papers appended).—E.J., B.C., 28/6/82. B.C. Chief Inspector,—Implicit reliance may be placed in the statements of the teacher and Mr. Battley, both of whom I know well. I have no doubt whatever that Mr. Burden is the author of the present complaint, which, like others that have emanated from him, I regard as both untruthful and malicious. I believe that Burden has set himself to persecute the teacher to the utmost; and Mr. Elliott deserves the fullest sympathy and support of the Department. The names of Conlon, Wadwell, and Taylor, attached to the present letter, are evidently in the handwriting of Burden; and from past experience of the latter gentleman, I think it very doubtful that he was authorized to act on their behalf. I recommend that the "School Picnic Committee" at Quipolly be informed that the Minister, having made inquiry relative to the complaint against the teacher made in their letter of the 9th ultimo, is of opinion that such complaint is wholly without foundation; [but that he has no desire to prevent their taking the legal proceedings contemplated, should they deem such a course expedient]. (2.) That the teacher be informed that the explanation of the matter furnished in his letter of 22nd ultimo is regarded as fully satisfactory. (3) [That, should legal proceedings be taken against the teacher, the expense of defending the action be borne by the Department.]—J.D.B., 1/7/82. Under-Secretary. I concur, omitting the passages in brackets.—E.J., B.C., 6/7/82. Approved.—F.B.S., 18/7/82.

No. 2.

The Under-Secretary of Public Instruction to Mr. F. Burden.

Sir,

Department of Public Instruction, Sydney, 13 June, 1882.

I am directed to acknowledge the receipt of your letter, dated 9th June instant, on the subject mentioned below, and to state that its contents have been duly noted.

I have, &c.,  
W. WILKINS,  
Under-Secretary.

Subject:—Complaining of detention by Mr. Elliott, teacher of the Quipolly Public School, of the sum of £1 14s. 6d., balance accruing from a school picnic three years ago.

No. 3.

Deputy Chief Inspector of Schools to Mr. Elliott.

[No. 82-5,762.]

Department of Public Instruction, Sydney, 19 June, 1882.

Memorandum to Mr. W. Elliott, Public School, Quipolly—Complaint preferred against you.

Your attention is invited to the following extract from a letter dated 9th instant, signed by the gentlemen named in the margin:—

Mr. J. Conlon,  
" W. Wadwell,  
" J. Taylor,  
" F. Burden.

We, the undersigned, School Picnic Committee, are sorry to have to complain against the conduct of the local school teacher, Mr. Elliott. Three years ago we had a school feast, and Mr. Elliott acted as secretary, when there was £1 14s. 6d. left in his hands, which was to go towards the expense of the next school feast. You will see by the *Murrumbidgee Times* of Saturday next that there is to be a picnic for the school children on Saturday, 17th instant. The above-mentioned committee waited on Mr. Elliott on Wednesday last, and requested him to hand the money over, which he refused to do; his reason for doing so is because the picnic is not taking place at the new school, the committee thinking the old school site a much better place for it. The money Mr. Elliott detains was raised by public subscription.

It is necessary that you should furnish some explanation in regard to these representations.

J. C. MAYNARD,  
Deputy Chief Inspector.

No. 4.

## No. 4.

Mr. Elliott to The Chief Inspector.

Sir,

Public School, Quipolly, 22 June, 1882.

In reply to your memorandum No. 82-5,762, respecting complaint preferred against me, permit me to state that the statement quoted by you from that complaint *is not true*. The persons therein named did not wait upon me as stated by them; they waited upon the Secretary of the School Treat Committee (Mr. J. B. Battley), at his house, and at his request, to receive from him some sums of money which they had collected for a school treat. They then demanded of Mr. Battley (in writing) the balance of a former account (£1 14s. 6d.) which they knew was in his hands; this Mr. Battley refused to give them; thereupon the spokesman of the party threatened to get it out of me. I happened to be present merely to witness the transfer of the money, as above stated.

I have requested Mr. Battley to make a statement in reference to this complaint, which I trust I am, &c.,

THOMAS ELLIOTT.

## No. 5.

Mr. John B. Battley to The Chief Inspector.

Sir,

Quipolly, 23 June, 1882.

It has come to my knowledge that Mr. Elliott, the Public School teacher here, has been charged by Messrs. Burden, Conlon, Wadwell, and Taylor with withholding the sum of £1 14s. 6d., a balance remaining from the school feast which was held some three years since.

As Secretary and Treasurer for the School Feast Committee I can give this charge a most unqualified denial, as the money referred to had been for some time in my hands prior to the time at which the charge was made against the gentleman referred to.

The four persons who made this wretched complaint against Mr. Elliott were perfectly well aware that I held the £1 14s. 6d. before referred to, with all other money collected, for a school feast, which we purposed holding, and they demanded the money of me, which I refused to hand them, for reasons not necessary to be mentioned here. After my refusal they then said they would have the £1 14s. 6d. out of Mr. Elliott, who I then told them had nothing whatever to do with the matter, as the money referred to was in my hands, and they saw it handed to me at a previous meeting when they were all present.

As I am writing I may as well go a little further and say that I am well aware of the sort of person Burden is, from whom all complaints against the school teacher emanate. I know that he (Burden), after being disappointed about the site of the new Public School, said that Mr. Elliott should never take charge of the new school if he could possibly prevent his doing so.

This person—Burden—is a man of unbounded rancour, and would injure anyone who thwarted him in anything, if possible.

I have, &amp;c.,

JOHN B. BATTLEY,

Overseer, Walhallow Station.

## No. 6.

The Under-Secretary of Public Instruction to Mr. Burden and others.

Sir,

Department of Public Instruction, Sydney, 22 July, 1882,

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter, dated 9th ultimo, complaining of the conduct of Mr. Elliott, teacher of the Public School at Quipolly, in detaining the sum of £1 14s. 6d., the balance accruing from a school picnic three years ago, together with the Chief Inspector's report upon his inquiry into the matter.

2. In reply, Mr. Suttor desires me to state that, having carefully considered the matter, he is of opinion that your complaint is wholly without foundation.

I have, &amp;c.,

W. WILKINS,

Under-Secretary.

## No. 7.

Memorandum from The Chief Inspector to Mr. Elliott.

(As to charge made against you by the School Feast Committee.)

Department of Public Instruction, Sydney, 26 July, 1882.

I HAVE to inform you that the explanation of this matter, furnished in your letter of 22nd ultimo, has been deemed by the Minister of Public Instruction to be fully satisfactory.

E. JOHNSON,

Chief Inspector.

## No. 8.

Mr. Conlon and others to The Minister of Public Instruction.

Sir,

Quipolly, 30 July, 1882.

The undersigned begs to acknowledge the receipt of your letter dated 22nd July, and am surprised at your decision. We therefore request that you will be pleased to give this matter a thorough investigation, as we are of opinion that the matter has been misrepresented to you by Mr. Elliott, or someone on his behalf, as we have neither been acquainted with this report or have we been allowed to give evidence in the matter. We therefore think it is a onesided matter. We don't think a teacher should be allowed to deprive his pupils of funds subscribed by the public, and make it appear that the collectors is defrauded in not spending the money as intended. Had the money been handed to the School Picnic Committee, as demanded by them, the pupils would have had it layed out in prizes for them and distributed at the picnic, which took place on the 17th June.

If

If the investigation should be refused, we shall be compelled to apply to the Members of the district to have the matter brought before the House when it meets, as we think the teacher's conduct is diserving of the trouble we are taking.

I have enclosed subscription list headed by the teacher's own handwriting, also affixing (*sic*) to a balance of £1 14s. 6d., also in his own handwriting. There are four subscription lists in the hands of the committee, all in the teacher's own handwriting, and headed the same. I have also enclosed some of the bills that affix (*sic*) to the expense of the picnic, as you will see it has been duly carried out on the above-mentioned date.

I may also inform you, in the former picnic 3 years ago there were only two collectors, the names being Frederick Burden and James Sprigeons. The two above-mentioned names demanded the £1 14s. 6d. from Mr. Elliott—F. Burden in person, J. Sprigeon by order through John Conlon—when he distinctly refused to give it up, F. Burden telling him at the same time if he did not give the £1 14s. 6d. up proceedings would be taken against him for the same. The teacher's reply being, "You can do your best; you will not get it."

JOHN CONLON.  
JAMES TAYLOR.  
WILLIAM WADWELL.

(Signed) F. BURDEN,  
Acting Secretary.

P.S.—Please return the enclosed documents.

The Chief Inspector, for report.—W.W., B.C., 4 August, 1882. District-Inspector Bradley, for report.—J.C.M., B.C., 8/8/82. B.C., Chief Inspector. It is distinctly stated by Mr. Battley (*Secretary and Treasurer* to the School Feast Committee) that the balance referred to in this letter, £1 14s. 6d., is held by him, and I consider that any investigation relative thereto would be mere waste of time. I recommend therefore Mr. Burden be informed of Mr. Battley's statement.—J.D.B., Glen Innes, 19/8/82. Under-Secretary. I concur.—J.C.M., B.C., 29/8/82. Approved.—F.B.S., 6/9/82.

#### No. 9.

#### The Under-Secretary of Public Instruction to Mr. Burden.

Sir, Department of Public Instruction, Sydney, 4 August, 1882.

I am directed to acknowledge the receipt of your letter, dated 30 July last, on the subject mentioned below, and to state that its contents have been duly noted:

I have, &c.,  
W. WILKINS,  
Under-Secretary.

Subject:—Expressing surprise at decision arrived at in your complaint against Mr. Elliott, Public School teacher at Quipolly.

#### No. 10.

#### The Under-Secretary of Public Instruction to Mr. Burden.

Sir, Department of Public Instruction, Sydney, 21 September, 1882.

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter, dated 30 July last, respecting the decision arrived at in regard to your complaint against Mr. Elliott, teacher of the Quipolly Public School, for withholding the sum of £1 14s. 6d., the balance accruing from school picnic held three years ago, and requesting a thorough investigation into the matter.

2. In reply, I am to state that Mr. John B. Battley, Secretary and Treasurer of the School Feast Committee, has forwarded a communication to this office in which he explains that the money referred to by you had been in his hands for some time prior to the time at which you complained that Mr. Elliott had detained it. He further states that you and the gentlemen whose names are noted in the margin were perfectly well aware that he held the £1 14s. 6d., and that he refused to hand it over to you when demanded.

3. In view of the statement made by Mr. Battley, Mr. Suttor is of opinion that no further investigation is necessary.

I have, &c.,  
W. WILKINS,  
Under-Secretary.

The documents forwarded by you to this office are returned herewith.

Mr. John Conlon,  
Mr. James Taylor,  
Mr. William Wadwell.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

## DEPARTMENT OF PUBLIC INSTRUCTION.

(RETURN RESPECTING ARCHITECTURAL BRANCH.)

*Ordered by the Legislative Assembly to be printed, 28 September, 1882.*

(7.) Architectural Branch of Department of Public Instruction:—Mr. Poole asked the Minister for Public Instruction,—

(1.) Will he lay upon the Table of this House at an early date a Return showing the names, duties, salaries, and travelling expenses, respectively, of all the officers employed in the Architectural Branch of the Department of Public Instruction?

(2.) The names of all private architects employed by the Department since the 1st of January, 1881, specifying in each case the name and locality of the school buildings for which they have prepared, or are preparing, plans and specifications, and the rate of remuneration for preparing such plans and specifications?

(3.) For their services in superintending the erection of the school buildings, stating if assisted by the officers of the permanent staff; and, if so, to what extent?

(4.) The estimated or real cost of the buildings in each case, and the estimated or ascertained amount of remuneration paid or payable to each architect or firm?

Mr. Suttor answered,—Yes; such a Return is being prepared.

RETURN showing the names, duties, salaries, and travelling expenses, respectively, of all the Officers employed in the Architectural Branch of the Department of Public Instruction.

Those marked \* are only the estimated costs; tenders have been accepted for the others.

1882.

NEW SOUTH WALES.

## UNIVERSITY OF SYDNEY.

(REPORT FOR 1881.)

Printed in accordance with Resolutions of both Houses of Parliament.

*REPORT of the Senate of the University of Sydney for the year ended 31 December, 1881.*

1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1881, for the information of His Excellency the Governor and the Executive Council.

2. Out of a total of seventy-seven students who presented themselves for matriculation in June, fifty-one qualified themselves. Of this number five were allowed exemption from attendance upon lectures, it having been certified by the Examiners that in their case the concession was warranted by their attainments, and that the attending circumstances justified it.

3. The following is the list of honors gained by undergraduates :—

## (I.) SCHOLARSHIPS.

## (a) Awarded to first year students.

Four scholarships for general proficiency :—

The "Bowman Cameron" Scholarship—G. C. Halliday.  
The Second "Cooper" Scholarship—Thos. E. Jones.  
"University" Scholarship—L. Armstrong.  
"University" Scholarship—F. Leverrier.

## (b) Awarded to second year students.

The "Lithgow" Scholarship for Classics—A. B. Piddington.  
The "George Allen" Scholarship for Mathematics—J. Woolcock.  
The Second "Barker" Scholarship for Mathematics—T. Rolin.  
The "Levey" Scholarship for Natural Science—A. E. Poolman.

## (c) Awarded to third year students.

The "Cooper" Scholarship for Classics—F. R. Barlee.  
The "Barker" Scholarship for Mathematics—C. A. Flint.  
The "Deas-Thomson" Scholarship for Natural Science—G. E. Rennie.  
The "Renwick" Scholarship for Natural Science—G. W. Sutherland.  
The "R. C. Want" Scholarship for Chemistry—G. E. Rennie.

(II.) Prize books, stamped with the University Arms, were awarded to all who obtained first classes at the yearly examinations. The list is as follows :—

## (a) CLASSICS.

*First Year.*

A. B. Piddington,  
G. E. Rich, *prox. acc.*

*Second Year.*

F. R. Barlee,  
G. E. Rennie.

## (b) MATHEMATICS.

*First Year.*

J. Woolcock,  
T. Rolin.

*Second Year.*

C. A. Flint.

## (c) NATURAL SCIENCE.

*First Year.*

A. E. Poolman,  
G. E. Fairfax,  
T. Rolin,  
J. Woolcock, } *Æq.*

*Second Year.*

G. E. Rennie,  
G. W. Sutherland.

## (III.) Honors at the B.A. Examination :-

CLASSICS.	MATHEMATICS.	NATURAL SCIENCE
<i>Class I.</i>	<i>Class I.</i>	<i>Class I.</i>
J. G. Cribb, R. U. King.	J. G. Cribb.	None.
<i>Class II.</i>	<i>Class II.</i>	<i>Class II.</i>
J. F. M'Manamey, P. V. M'Culloch, H. M'Lelland.	J. F. M'Manamey.	A. G. Ralston, J. G. Cribb.
		<i>Class III.</i>
		C. R. Fletcher.

The "University" Gold Medals awarded to the first in the first class in each subject at the B.A. Examination were gained by J. G. Cribb in Classics and Mathematics.

## (IV.) Special annual prizes were awarded as follows :-

- "Wentworth" Medal, for the best English essay—J. Woolcock.
- "Nicholson" Medal, for Latin verse—F. R. Barlee.
- "Belmore" Medal, for proficiency in Geology and Practical Chemistry, with special reference to Agriculture—A. G. Ralston.
- "University" prize, for the best composition in English verse—J. Woolcock.
- "Professor Smith's" prize, for proficiency in Experimental Physics—G. E. Fairfax and T. Rolin, *æq.*

## 4. The following degrees were conferred after examination :-

LL.B. :—Walter Edmunds (awarded the "Wigram Allen" and "Faucett" prizes for Jurisprudence).

M.A. :—J. J. Cohen, J. A. Flynn, E. E. Fosbery, and G. C. Waldron.

B.A. :—J. G. Cribb, J. Elphinston, C. E. Fletcher, R. U. King, A. W. M'Carthy, P. V. M'Culloch, H. M'Lelland, J. F. M'Manamey, and J. G. Ralston.

5. The "Ad Eundem Degrees Act," assented to on the 23rd of March, 1881, has considerably increased the number of members of the Convocation, by adding to it seventy-five Bachelors of Arts of three years' standing, and has also enabled the Senate to admit graduates of other Universities to Degrees in this University equivalent to those which they hold.

The following gentlemen were admitted to degrees, in accordance with the terms of the Act, during the year :-

To the degree of M.D. :—Messrs. R. R. S. Bowker, M.D., St. Andrew's; and A. T. Holroyd, M.D., Edinburgh.

To the degree of M.B. :—Mr. Arthur Oakes, M.B., Edinburgh.

To the degree of M.A. :—Rev. E. G. Hodgson, M.A., Oxford; Rev. A. J. Williams, M.A., Cambridge; Mr. J. T. Lingen, M.A., Cambridge; Rev. W. Hey Sharpe, M.A., Oxford; Rev. Jas. Cosh, M.A., Glasgow; Rev. H. W. Mort, M.A., Oxford.

To the degree of B.A. :—Rev. H. A. Barker, B.A., Oxford.

Several other gentlemen have made satisfactory applications to the Senate, and will be admitted to degrees equivalent to those which they now hold, at the Annual Commemoration of 1882.

## 6. Bursaries were awarded as under :-

"Levey and Alexander" Profession Bursary—F. P. Brennan, B.A.

"John Ewan Frazer" Bursary—J. Dobbie and F. W. Clarke.

"Ernest Manson Frazer" Bursary—A. E. Perkins.

"J. B. Watt" Exhibition—J. F. McManamey.

In December the newly established "Aitken" Bursary was awarded to F. W. Clarke, in place of half the "J. E. Frazer" Bursary.

7. At the Public Examinations held in the month of November, in Sydney, and in the following twenty places, Albury, Armidale, Bathurst, Brisbane, Cowra, Forbes, Goulburn, Grafton, Hobart, Ipswich, Maitland, Mittagong, Newcastle, Orange, Queanbeyan, Richmond, Singleton, Toowoomba, Windsor, and Yass, 48 candidates presented themselves for the Senior Examination, and 392 for the Junior Examination, and of these 36 senior candidates and 231 junior candidates were successful.

The prizes given for general proficiency in these Examinations were awarded as follows :-

"John West" Medal for proficiency in Senior Examination—G. W. Power.

"University" prizes for males—

Senior Examination—Geo. W. Power.

Junior Examination—Harry A. Russell.

"Fairfax" prizes for females—

Senior Examination—Marianne H. Carson and Jane F. Russell, *æq.*

Junior Examination—Sarah E. Holt.

A complete analysis of the Examinations will be found in the "Manual of Public Examinations" hereto appended.

8. Four examinations of candidates for the Civil Service were held during the year, at which 116 candidates obtained certificates.

9. Additional leave of absence for a period of twelve months from the meetings of the Senate has been granted to Sir Charles Nicholson.

10. Through an accidental oversight as to granting leave of absence to His Honor Mr. Justice Faucett before his departure for Europe, that gentleman's seat in the Senate became vacant in November, but at a convocation of electors held on the 7th of December to fill the vacancy thus caused, he was re-elected without opposition.

11. In accordance with by-law No. 2, the triennial election of the Chancellor took place at the monthly meeting of the Senate held in May, and resulted in the re-election of His Honor Sir William M. Manning, LL.D. At the same meeting the Reverend Canon Allwood was re-elected Vice-Chancellor for the twelfth time.

12. The Senate has much pleasure in announcing the following donations to the University for the year :—

- (a) A sum of £25 from Randolph C. Want, Esq., to be applied as a Scholarship for Chemistry (theoretical and practical).
- (b) A valuable collection of Oriental books presented to the Library by the Rev. W. B. Boyce, in addition to several minor contributions.
- (c) A further sum of £100 from Sir Patrick Jennings, to complete the cost of an organ in the Great Hall of the University, to which that gentleman had previously contributed £1,000 out of a total £1,563.
- (d) A sum of £500 from Thos. Walker, Esq., of Yaralla, Concord, for erecting the organ and for incidental expenses.
- (e) A sum of £400 from Fitzwilliam Wentworth, Esq., for ornamental screens and panellings to be placed underneath the organ gallery.
- (f) A legacy of £1,000 from the late James Aitken, Esq., of Grafton, to be applied to the foundation of a Bursary of the annual value of £50. The amount, together with interest accrued in the hands of the executors, has been invested in 5 per cent. N.S.W. Government Debentures, and the first award was made in December, 1881.
- (g) A sum of £30 from J. R. and E. R. Fairfax, Esquires, to make up a deficiency in the "Fairfax Prize Fund," caused by the paying off of the debentures in which it was invested, and to enable the Senate to make a similar reinvestment at the current rate of premium.
- (h) A sum of £5,000 from Thos. Walker, Esq.; of Yaralla, Concord, for the foundation of Bursaries, some of which are to be given to students of the female sex. The fund has been placed for the present at fixed deposit in the Mercantile Bank, and it is proposed to award four Bursaries in June next; two to students of each sex.

13. During the year an important step has been taken by the Senate in its decision to admit women to all University privileges, and to place them in all respects as regards University matters on an equal footing with men.

On the 6th of April the Senate passed the following resolutions :—

- (a) That, subject to such regulations as the Senate may make, women shall henceforward be admitted to matriculation and instruction in the University, and to annual examinations, and examinations for degrees, and shall be entitled to receive degrees equivalent to those granted to male students.
- (b) That it be referred to the Board of Studies to report to the Senate on the subject of the arrangements and regulations necessary for carrying out the above resolution.

On the 4th of May the Board of Studies brought up its report, containing the following recommendations, which were adopted by the Senate :—

- (a) That female students be admitted to the same lectures as male students in all subjects.
- (b) That it will be impossible to carry out the above recommendation unless steps are taken to provide a suitable retiring room and other necessary conveniences set apart exclusively for female students.
- (c) That, in the present building, there is no room that can be applied to any such purpose, nor is any rearrangement possible by which a room could be put at their disposal without resuming that part of the building which has been assigned to the Professor of Classics as his residence.

In order to provide the necessary accommodation, a small cottage is to be erected at the rear of the University buildings, under the supervision of the Colonial Architect, and it is expected that this will be ready for use before the next Matriculation Examination in June, 1882.

In consequence of some doubts as to the power of the Senate, under the Incorporation Act of 1851, to grant degrees to women which shall be equivalent to those granted to men, it is intended to invite the Legislature to pass an Act giving all necessary powers for so doing, and it is hoped that such an Act will have become law before any female students are ready for degrees.

14. In December the Senate learned, with great gratification, that Parliament had voted an increase in the present endowment of the University to the extent of £5,000 for the year 1882, besides repeating the vote of £1,000 for Assistant Lecturers. At its monthly meeting, held on the 7th of that month, a Committee was appointed to "report to the Senate as to the best means of applying the increased endowment." The Committee, after several meetings in quick succession, brought up its report at a special meeting of the Senate convened for the purpose on the 23rd of the month, when the following scheme of teaching was adopted :—

#### SCHEME OF UNIVERSITY TEACHING,

IN ACCORDANCE WITH THE INCREASED ENDOWMENT LATELY VOTED BY PARLIAMENT. ADOPTED BY THE SENATE ON THE 23RD OF DECEMBER, 1881.

1. SCHOOL OF CLASSICS.		
To include Ancient and Modern Languages and Literature, Ancient History, and Mental Philosophy.		
Professor ( <i>with half-fees</i> )	... ..	£900
Assistant Lecturer—Latin and Greek	... ..	350
Assistant Lecturers—Modern Languages	... ..	300
		£1,550
2. SCHOOL OF MATHEMATICS.		
Mathematics, pure and mixed, including Astronomy and Surveying.		
Professor ( <i>with half-fees</i> )	... ..	900
Assistant Lecturer	... ..	350
		£1,250
3. SCHOOL OF CHEMISTRY.		
Inorganic, Organic, and Practical Chemistry, with Mineralogy and Metallurgy.		
Professor ( <i>with half-fees</i> )	... ..	900
Assistant Lecturer	... ..	350
		£1,250
4. SCHOOL OF NATURAL PHILOSOPHY.		
Experimental Physics, Physics, Mechanics, and Engineering.		
Professor ( <i>with half-fees, except for Engineering</i> )	... ..	900
Engineering Lecturer ( <i>with half-fees</i> )	... ..	300
		£1,200

5. SCHOOL OF NATURAL HISTORY.	
Zoology, Botany, Geology, and Physical Geography.	
Professor and Hovell Lecturer ( <i>with half-fees</i> )	900
Demonstrator in Comparative Anatomy and Physiology and in Histology..	350
	£1,250
6. SCHOOL OF MEDICINE.	
Anatomy and Physiology.	
Professor ( <i>with half-fees</i> )	900
Demonstrator	350
Lecturers on the following subjects—	
Practice of Medicine	200
Practice of Surgery	200
Practice of Midwifery	200
Clinical Medicine	100
Clinical Surgery	100
General Pathology	200
Materia Medica and Therapeutics	200
	£2,450
7. SCHOOL OF LAW AND MODERN HISTORY.	
Law, Medical Jurisprudence, and Modern History.	
Three Lecturers ( <i>with full fees</i> )	£300
8. SCHOOLS GENERALLY—	
Examiners not on the staff ( <i>say</i> )	£500
9. ADMINISTRATION.	
Registrar and Librarian	500
Clerk and Curator of Museum	150
Accountant and Auditor (together)	100
Prizes, &c., other than under private endowments	150
	£900
	£10,650

General expenses of the University, including the salary of Bedell, the wages of attendants and gardeners, cost of books, &c., fuel and light, and incidental and casual expenses and outlays, to be met by half-fees and the balance of endowments.

REVENUE—	
The original endowment	£5,000
Vote for Lecturers	1,000
New endowment	5,000
Hovell Fund (private benefaction)	300
	£11,300

H. E. BARFF,  
Acting Registrar.

WM. M. MANNING,  
Chancellor.

On the 28th day of December a copy of this scheme was, by the Chancellor's instructions, communicated by the Acting Registrar to the Under Secretary of Public Instruction, to be laid before the Minister, with the expression of the Chancellor's hope that it would "be found in consonance with the views which had led the Government to propose the vote."

In view of the necessity that will arise for further buildings for the accommodation of the additional Professors and Lecturers for whom the increased endowment was intended to provide, the Chancellor was requested by the Senate, at its meeting on the 7th of December, to solicit the Government to cause the sum of £10,000 to be placed on the Parliamentary Estimates towards the erection of such buildings; and he applied accordingly, but the application was too late for any action to be taken in the matter for this year.

15. Independently of increased endowment, an application has been made to the Government for means for the erection of a detached Chemical Laboratory, both on account of the inconvenience of the present situation of the laboratory in the main building, and because the vacation of the rooms at present used for laboratory purposes would afford much needed accommodation for the Assistant Lecturers.

16. The organ which the generosity of private benefactors, notably Sir Patrick Jennings, has enabled the Senate to purchase, arrived from England in the end of the year, and is now in course of erection in the Great Hall.

17. Leave of absence for fifteen months, from the 1st of March, 1882, has been granted to Professor Smith, in order that he may visit Europe, as well for the purpose of recruiting his health, as for observing closely the rapid advances which all branches of science are making at the present day. The generosity of Parliament has also enabled the Senate to place in his hands a sum of money by means of which he will be able to add considerably to the stock of scientific apparatus at present at the University. During his absence the duties of his Chair will be discharged by the Rev. Joseph Campbell, B.A. of this University, who has lately distinguished himself by delivering several courses of lectures upon scientific subjects in the Technical College.

18. Additional leave of absence for six months was, in November, granted to Mr. H. Kennedy, Registrar, whose state of health has not enabled him to resume the duties of his office.

Appended is an account of the receipts and disbursements of the University during the year, certified by the Auditor, the Honorable Geoffrey Eagar.

February, 1882.

H. E. BARFF,  
Acting Registrar.

## APPENDIX.

## UNIVERSITY OF SYDNEY.—BY-LAWS.

## PUBLIC EXAMINATIONS.

104. Two Public Examinations shall be held every year; the one to be called the Junior Public Examination, and the other to be called the Senior Public Examination, and shall be open to all candidates, male or female, who may present themselves.

105. The Public Examinations shall be held at such times and at such places as the Senate may from time to time appoint.

106. The subjects of the Junior Public Examinations shall be the English Language and Literature, History, Geography, the Latin, Greek, French, and German Languages, Arithmetic, Algebra, Geometry, Natural Science, and such other branches of learning as the Senate may from time to time determine.

107. The subjects of the Senior Public Examinations shall be those mentioned in the foregoing section, together with higher Mathematics, Drawing, Music, Natural Philosophy, and such other branches of learning as the Senate may from time to time determine.

108. Every candidate who shall pass either of these Examinations, or such portions of either of them as may be required by the Rules or Orders of the Senate in force for the time being, shall receive a Certificate to that effect, specifying the subjects in which he shall have passed, and signed by the Dean of the Faculty of Arts and by the Registrar.

109. No person shall be admitted to either of the Public Examinations until he shall have paid such fees as may be required by the Rules or Orders of the Senate in force for the time being.

110. The Professors and Assistant Professors not engaged in tuition, except publicly within the University, together with such other persons as the Senate may from time to time appoint, shall form a Board for conducting the Public Examinations; and of this Board the Dean of the Faculty of Arts, or in his absence the Professor next in seniority, shall be Chairman.

111. At the conclusion of each Examination, the Board shall transmit to the Senate a report of the result, signed by the Chairman and at least one other member.

112. Subject to these By-laws, the Public Examinations shall be conducted according to such Rules or Orders as the Senate may from time to time establish.

## DIRECTIONS FOR CONDUCTING THE PUBLIC EXAMINATIONS.

1. The Public Examinations shall be held annually at the University, in the month of November, commencing on the first Monday in that month.

2. In addition to the regular annual Examination in November, the Board of Examiners are authorized at their discretion to hold Junior Public Examinations in Sydney at such other times as they may consider desirable.

3. There shall be one or more Examiners to assist the Professor in each section, the Assistant Examiners to have concurrent jurisdiction with the Professor as to the questions to be set, and to be responsible with him for the said questions; and no candidate shall be rejected without the concurrence of the Examiners, except in cases other than with respect to the Preliminary Examination, in which the Professor shall think and declare the grounds of rejection too obvious to require such concurrence.

4. The fee for admission to the Junior Public Examination shall be £1 10s., and to the Senior Public Examination £2. This fee shall admit to only one Examination.

5. Forms of application for admission to the Public Examinations (Form A) may be obtained from the Registrar or from Messrs. Gibbs, Shallard, & Co. One of these forms must be filled up and sent to the Registrar, together with the proper fee, at least fourteen days before the commencement of the Examinations.

6. The Examinations shall be conducted by means of written or printed papers and *vis à voce* at the discretion of the Examiners.

7. Public Examinations may be held at any place where persons approved by the Senate can be found to superintend the Examination.

8. Local Examinations, as provided for in clause 7, shall be held at the same time as those at the University, and shall be conducted as follows:—

(a) Copies of the papers to be set at the Public Examinations at the University, together with such additional papers as the absence of *vis à voce* examination may render necessary, shall be transmitted under seal to the person appointed by the Senate to superintend the Local Examinations.

(b) Candidates shall write out answers to the questions set, in the presence of the persons appointed to superintend the Examination, and in accordance with such detailed instructions as may be furnished by the Chairman of the Board of Examiners.

(c) The written answers shall be transmitted to the Board of Examiners, who shall examine them and report thereon to the Senate.

(d) The local expenses of the Examination shall be defrayed by the Local Committees, who may repay themselves by charging the candidates with a fee for that purpose.

(e) Local Committee forms must be sent in to the Registrar at least three weeks before the commencement of the Examinations.

(f) Candidates who wish to be examined at local centres must send in their forms of application, together with the fees for Examination, and for defraying the local expenses, to the Secretary of the Local Committee, in time for the forms to be forwarded to the Registrar at least fourteen days before the commencement of the Examinations.

(g) No school teacher or person in any way engaged in tuition is allowed to be a member of any Local Committee.

9. The Senate may at their discretion send an Examiner or Examiners to conduct Local Examinations.

10. In order to pass the Junior Examination a candidate must pass in at least three of the thirteen sections hereinafter mentioned, and the sections in which he passes must not all be contained in a single group. No candidate is allowed to take up more than seven sections. The successful candidates shall be arranged according to a twofold standard in each section.

11. Candidates may enter year by year for the same subjects, or for different subjects as often as they please, provided that they take up not fewer than two subjects on each occasion after the first time of passing the Examination. For each Examination they must pay a separate fee.

12. In order to pass the Senior Examination, a candidate must pass in at least four of the twenty-four sections hereinafter mentioned, and the sections in which he passes must not be all contained in a single group, and of these only two sections in the Natural Science group and only one in the Art group shall count. No candidate is allowed to take up more than ten sections.

13. Candidates may enter year by year for the same subjects, or for different subjects as often as they please, provided that they take up not fewer than two subjects on each occasion, after the first time of passing the Examination. For each Examination they must pay a separate fee.

14. The names of those candidates who pass the Senior Examination shall be arranged in classes, the names in each class being arranged alphabetically.

15. After the name of each candidate in the above list shall be added the name of his school or of his private teacher.

16. A separate account shall be kept of all receipts and disbursements on account of the Public Examinations.

17. The fees shall be collected by the Registrar and paid into the general fund of the University, and shall be appropriated in the first place to the payment of all expenses incurred, including printing, stationery, and fees paid to Examiners, other than the Professors and Assistant Professors. The residue (if any) shall be appropriated for payment of the members of the Examining Board,

18. The subjects of the Examination shall be as follows :—

PRELIMINARY EXAMINATION.

Writing from Dictation.

The Rudiments of English Grammar.

The first four rules of Arithmetic, simple and compound, and the Rule of Three.

All candidates, both Senior and Junior, shall be required to pass the Preliminary Examination, except those who have already passed it on some previous occasion.

JUNIOR EXAMINATION.

Group I.—English.

*Section I. English History.*—To date from the Norman Conquest to the Accession of Queen Victoria. An acquaintance with Dr. Smith's *Smaller History of England*, or any similar work, will be sufficient.

*Section II. Geography.*—To consist in a knowledge of the physical features of all countries and the situation of the principal towns.

*Section III. English.*—Questions on the language generally, and others on the subject set for the year. *For further details, see Notices and Hints to Candidates, set on page 25, and Cycle of Subjects on page 9.*

Group II.—Languages.

*Section IV. French.*—Passages for translation into English (*see Cycle*). Questions on Inflexions and short sentences for translation into French, such as to test the students' accuracy in the elementary parts of Grammar, including the common rules of Syntax.

*Section V. German.*—Passages for translation into English (*see Cycle*). Questions and short exercises similar to those in French.

*Section VI. Latin.*—Passages for translation into English (*see Cycle*), with a further examination similar to that in French. (*See Hints to Candidates, on page 25.*)

*Section VII. Greek.*—Passages for translation into English, with a further examination similar to that in French.

Group III. Mathematics.

*Section VIII. Arithmetic.*—The paper will consist of two parts. Questions on cube root, complex fractions, circulating decimals, transfer of stock, compound interest. Solid mensuration may be set in the second or *higher* part of the paper, but will not appear in the first or *lower* part. In order to pass in this section, a candidate must show up satisfactory work in the first part of the paper.

*Section IX. Algebra.*—Divided into two parts: the lower part (upon which the candidate's passing will depend) may contain questions upon factors, fractions, square roots, easy equations of one unknown quantity, simple and quadratic, and easy problems leading to such equations; the second part may involve questions upon equations of two or more unknown quantities, and ratio, proportion, fractional indices, and surds.

*Section X. Geometry.*—First three books of Euclid and easy questions upon their subject matter. The paper will be divided as in the two preceding sections: the lower part will consist of questions from the first two books only.

Group IV. Natural Science.

*Section XI. Inorganic Chemistry.*—The physical properties of gases. The principal elements, and their chief inorganic compounds.

[*Book recommended*:—Roscoe's *Elementary Lessons in Chemistry (Macmillan & Co.)*]

*Section XII. Physics.*—Candidates will be expected to show a knowledge of the elements of Electricity, Magnetism, Light, Heat, and Sound.

[*Book recommended*:—*Lessons in Elementary Physics, by Balfour Stewart (Macmillan & Co.)*]

*Section XIII. Geology.*—The elements of Physical Geography and Geology.

[*Books recommended*:—*Geikie's Elementary Lessons in Physical Geography (Macmillan & Co.)*; *Keith Johnston's School Atlas of Physical Geography.*]

SENIOR EXAMINATION.

Group I. English.

*Section I. History of Europe.*—From the beginning of the fourteenth century to the end of the sixteenth.

*Section II. Geography.*—Physical, Political, and Commercial.

*Section III. English.*—Questions on the structure and origin of the language; on the derivation and meaning of words; on Idioms and Usages. Analysis, Composition. Questions on a set subject (*see Cycle*).

Group II. Languages.

*Section IV. French.*—Passages for translation into English (*see Cycle*). Questions on Inflections, Syntax, and Prosody. Passage for translation from English into French.

*Section V. German.*—Passages for translation (*see Cycle*), with a further examination similar to that in French.

*Section VI. Latin.*—Passages for translation (*see Cycle*), with a further examination similar to that in French.

*Section VII. Greek.*—Passages for translation (*see Cycle*), with a further examination similar to that in French.

Group III. Mathematics.

*Section VIII. Arithmetic.*—Including the elements of Mensuration.

*Section IX. Algebra.*—Including the three Progressions, the Binomial Theorem for a positive index, and the properties and use of Logarithms.

*Section X. Geometry.*—The first four books of Euclid, the sixth Book and the first twenty-one Propositions of the Eleventh Book, with easy deductions. A satisfactory knowledge of the first four Books shall entitle a candidate to pass in this section.

*Section XI. Trigonometry.*

*Section XII. Elementary Surveying and Astronomy.*

*Section XIII. Mechanics.*—Until further notice, the paper will consist of Statics only.

[*Books recommended*:—*Todhunter's Algebra, or Gross's Algebra; Todhunter's Plane Trigonometry; Gillespie's Land-surveying; Todhunter's Mechanics for Beginners; Goodeve's Principles of Mechanics.*]

Group IV. Natural Science.

*Section XIV. Inorganic Chemistry.*—The same as for Juniors. The standard will, however, be higher.

[*Books recommended*:—*Fowue's Manual of Chemistry (Churchill & Co.); Miller's Elements of Chemistry (Longmans & Co.)*]

*Section XV. Physics.*—The same as for Juniors. The standard will, however, be higher.

[*Books recommended*:—*Ganot's Physics; Deschanel's Natural Philosophy (Blackie & Son).*]

*Section XVI. Geology.*—General Description and Classification of Rocks. Distribution of Organic Remains.

Candidates will be expected to name the specimens of common rocks and fossils placed before them.

[*Books recommended*:—*Jukes' Manual of Geology, by Geikie; Lyell's Elements of Geology; Nicholson's Ancient Life History of the Earth; Nicholson's Palaeontology.*]

*Section XVII. Physiology.*—The Elements of Animal Physiology.

[*Books recommended*:—*Huxley's Lessons in Elementary Physiology (Macmillan & Co.); Carpenter's Text Book of Physiology.*]

*Section XVIII. Zoology.*—The general Anatomical Structure of the various groups in the Animal Kingdom, the Principles of Classification, and the Distribution of Animals.

[*Books recommended*:—*Nicholson's Advanced Text Book of Zoology; Elementary Biology, Huxley and Martin.*]

Section

*Section XIX. Botany.*—Vegetable Physiology, the Principles of Classification, the Distribution of Plants. Candidates will be expected to show a knowledge of the leading characters of the following natural orders :—Ranunculaceæ, Nymphaeaceæ, Cruciferae, Leguminosae, Rosaceae, Umbelliferae, Compositae, Labiatae, Primulaceae, Polygonaceae, Euphorbiaceae, Saliaceae, Orchidaceae, Liliaceae, Graminaceae, Coniferae, Filicales, Muscales, Fungi, Algae. Candidates will be expected to describe and name the common plants placed before them.  
[Books recommended:—Oliver's Lessons in Elementary Botany (Macmillan & Co.); Carpenter's Vegetable Physiology.]

*Group V. Art.*

*Section XX. Geometrical Drawing and Perspective.*

*Section XXI. Free Hand and Model Drawing.*

*Section XXII. Drawing in Colour from a Natural Object.*

*Section XXIII. Design for an Ornament or a Pattern, or for a Picture.*

*Section XXIV. Music.*

[Book recommended:—Richter's Harmony.]

PRIZES AT PUBLIC EXAMINATIONS.

The Annual Prizes shall only be open to competition to candidates presenting themselves for the first time for the Senior and Junior Examinations respectively.

FAIRFAX PRIZES.

A sum of £500 was given by John Fairfax, Esq., in 1872, for the purpose of founding two Annual Prizes of £20 and £10 severally, to be awarded to the greatest proficient among the female candidates at the Senior and Junior Public Examinations in Michaelmas Term. In the case of Seniors the candidates must not be over twenty-five years of age, and of Juniors seventeen years. The endowment money is invested in City of Sydney Debentures, yielding 6 per cent.

<i>Senior Prize.</i>	<i>Junior Prize.</i>
1871.—Bolton, Anne Jane.	1871.—Rennie, Amelia Cummins.
1875.—Everitt, M. M.	1872.—Garran, Mary Eppes.
1876.—Whitfield, Caroline A.	1873.—Badham, Julia.
A'Beckett, Caroline A., <i>prox. acct.</i>	1874.—A'Beckett, C. A. } <i>æq.</i>
1877.—Garran, Helen Sabine.	Carney, Kate. }
1878.—Burdoff, Bertha Marie.	1875.—Hall, A. F.
Haggard, Alice, <i>prox. acct.</i>	1876.—Shadler, Cornelia.
1879.—Love, Helen C.	1877.—Holt, Eliza M.
1880.—Holt, Eliza Marion.	1878.—Russell, Emily L. } <i>æq.</i>
1881.—Carson, Marianne H. } <i>æq.</i>	Russell, Jane F. }
Russell, Jane Foss. }	1879.—Carson, Marianne H.
	1880.—O'Brien, Marion.
	1881.—Holt, Sarah Elizabeth.

JOHN WEST MEDAL.

In 1874 debentures to the extent of £200 were given by the subscribers to a memorial of the Rev. John West, Editor of the *Sydney Morning Herald*, for the foundation of an annual Gold Medal to be awarded to the greatest proficient in the Senior Public Examinations.

1875.—Allen, Reginald.
1876.—Dunn, Thomas.
1877.—Murray, Hubert.
1879.—Love, W. W. R. } <i>æq.</i>
Nisbet, W. B. }
1880.—Leverrier, Frank.
1881.—Power, George Washington.

UNIVERSITY PRIZES.

Prizes of £20 and £10 are appropriated annually by the Senate for the greatest proficient amongst the male candidates at the Senior and Junior Public Examinations in Michaelmas Term. The limit of age for Seniors is twenty-five, for Juniors seventeen years.

<i>Senior Prize.</i>	<i>Junior Prize.</i>
1873.—Allen, G. B.	1872.—Fletcher, A. J. } <i>æq.</i>
1874.—Maclardy, J. D. S.	Maclardy, J. D. S. }
1875.—Allen Reginald.	1873.—McKeon, P. } <i>æq.</i>
Moore, W. L., <i>prox. acct.</i>	Moore, A. L. }

1880.—Leverrier, Frank.	1877.—Butler, Francis
1881.—Power, George Washington.	1878.—Jones, T. E.
	1879.—Power, G. W.
	1880.—Hay, James Alexander.
	1881.—Russell, Harry Ambrose.

SILVER MEDALS.

The University offers a Silver Medal to the highest proficient in each subject both of the Senior and Junior Examinations, provided the Examiners shall think that sufficient merit has been shown. It shall be possible for a candidate to obtain a Medal in more than one subject.

J. B. WATT EXHIBITION.

This Exhibition was founded by the Honorable John Brown Watt, in 1877, by a donation of £1,000 for the benefit of Students from the Primary Public Schools who should pass with special credit at the Public Examinations.

1.—The Exhibition is bestowed on the Bursary principle; that is to say, it is given only to youths of good character and of intellectual promise, whose parents and friends could not otherwise afford to provide the higher education which the founder desires to promote.

2.—It is confined to boys or youths who have been for at least three years in the Government Primary Schools, in which category service as Pupil-teachers is included.

3.—The Exhibition is tenable for three years, and entitles the holder to £30 for the first year, £40 for the second, and £50 for the third year.

4.—It is not obligatory on the holder to become a member of the University; but it is open to him to pursue an intermediate course of education if he is not ripe for the University, or he may even be allowed to seek the higher education elsewhere; provided that he passes the Matriculation Examination. In either of such cases the arrangements and their observance will be under the supervision of the Senate, whose duty it will be, according to the terms of the foundation, to satisfy itself that the money is being applied to maintenance and to an appropriate course of education.

5.—If the Exhibitioner should enter the University as an undergraduate he will be exempted from all fees, as in the case of a Bursar.

6.—The candidates must have passed with special credit either the Junior or Senior Public Examination.

7.—The fundamental intention of the founder being to connect the Primary Schools with the University, the Senate must be satisfied with the intermediate education. The Chancellor will give preference (other things being equal) to candidates who contemplate entering the University over those who do not propose to avail themselves of its instruction and discipline.

8.—Any candidate desirous of entering the University but not immediately prepared to pass the Matriculation Examination, may, at the discretion of the Senate, be permitted to employ his first year in preparatory attendance at the lectures of the University, and under its discipline as a University Student; provided that he shall have satisfied the Senate that he is sufficiently advanced to profit by the lectures, and to give promise of ability to matriculate at the next Examination. This permission, will not, however, entitle the Exhibitor to more than three years' enjoyment of the Exhibition.

9.—The tenure of the Exhibition will not preclude the holder from competing for any other of the University benefactions.

The next award will be made under the Public Examinations of November, 1883.

Applications are to be made to the Chancellor, and should be accompanied with evidence touching the character and circumstances of the applicant.

1880.—John Fraser McManamey.

Form E.

DIRECTIONS TO CANDIDATES FOR THE PUBLIC EXAMINATIONS.

1. No books, manuscripts, writing-papers, or blotting-paper are allowed to be brought into the Examination Room. No communication by word or otherwise between candidates is allowed during the Examination; if a candidate wishes to communicate with a Superintendent he must stand up in his place.

Candidates are to write on one side only of their paper, and they are to lay each sheet when finished close beside them *with the face downwards*.

Any candidate violating any of the above regulations is liable to be immediately expelled from the Examination Room.

2. Each candidate is to place his distinguishing number at the head of every sheet of paper which he sends up. *He is not to write his name or initials upon his papers.*

He is to prefix to each answer the number or letter corresponding with the question. He is not obliged to copy the question.

He is to write on the outside of his papers when folding his distinguishing number, the name of the subject, and the letter S., J., or C.S., according as it forms part of the Senior, the Junior, or the Civil Service Examination.

Any breach of the rules in this paragraph will at least produce delay, and may cause the omission of a candidate's name from the published lists.

3. In answers to the mathematical questions the whole of the work must be sent up. No credit will be given for *answers only*.

Warning will be given ten minutes before the time fixed for giving up papers. When the papers are called for, every one is to cease writing immediately.

Candidates should so arrange their papers that on the Examiner opening them the answer to the first question may *face him* and the other answers lie in order behind it.

Questions may be answered in any order, and in the mathematical papers full credit will be given for the second part (or *rider*) of a *double* question even if the first part be not answered.

Candidates should fasten together their written papers before giving them up. They may use for this purpose metal paper-fasteners or pieces of tape or string. The papers are to be connected at the *upper left-hand corner*.

Form F.

INSTRUCTIONS TO LOCAL COMMITTEES FOR SUPERINTENDING PUBLIC EXAMINATIONS.

1. If one room is used, two of the Committees must be present during the whole of the examination; if more than one room, then two of the Committee in each room, who must carefully superintend the whole examination and see that candidates use no unfair means, either by assisting each other or by using books or notes. Members of the Committee can if they wish it relieve one another, provided at least two are always present. *No persons except those under examination, members of the Committee, and University Examiners, are permitted to be in the room during the examination.*

2. Places must be allotted to the candidates so that they may be seated at least five feet apart from centre to centre. All diagrams, &c., having reference to the subjects of the examination must be removed from the walls of the examination room. Ink, pens, blotting-paper, and white writing-paper (foolscap or post) must be provided, also metal paper-fasteners or other means for connecting the written papers.

3. The candidates must be in their places ten minutes before the time fixed for the paper. After this time no candidate can be admitted unless under very exceptional circumstances and by express permission of the Superintendents, provided always that no person who shall have seen the paper have previously left the room. No candidate who shall have entered the room and may desire to abandon the examination shall under any circumstances whatever be permitted to leave before the expiration of one hour from the time of the paper being given out. Arrangements must be made so that in case any candidate is allowed to leave the room for any necessary purpose, he may remain under sufficient supervision during his absence. Places should be assigned to candidates according to their distinguishing numbers, so that consecutive numbers may sit together; but if senior and junior candidates are examined at the same time, they should be placed alternately as far as can be arranged.

4. It may be of service to the Superintendents in some cases that teachers should attend before the examination begins, to assist in identifying their pupils. There is no objection to this, *but the teachers must leave the room before the envelope containing the examination questions is opened.*

5. The writing materials should be distributed and the candidates told to write their distinguishing numbers on each sheet as they use it. No candidate is to be allowed to bring in any writing or blotting paper for himself.

6. The envelopes of examination questions must be opened in the examination room, in the presence of the Superintendents and of the candidates, just before the time fixed for beginning the paper.

7. As soon as the candidate has finished with a sheet of paper, he is to turn it face downwards on the table.

8. Ten minutes before the time fixed for giving up papers the candidates are to be warned; and on the completion of the time they are immediately to cease writing, arrange their papers in order (so that on opening them the answer to the first question may *face* the Examiner, and the other answers lie in order behind it), see that every sheet has the distinguishing number on it (but no name), fold and fasten the papers, and hand them to a Superintendent to initial. The worked papers must immediately be sealed up and sent by post to "The Registrar, Sydney University." Before they are thus sealed up, neither a teacher nor any other person not being a Superintendent of Examination or officer of the University, must be allowed to enter the room.

9. Superintendents of Examinations are cautioned against talking in the room unnecessarily, as it tends to disturb and distract the attention of candidates. They are also requested to refrain from making observations on the work of the candidates, either to the candidates themselves or to each other.

10. The papers must be initialled by one of the Superintendents when they are received from each candidate, as a guarantee that each paper has been worked by the person whose distinguishing number it bears. This is to prevent personation, and the Superintendents will see how essential it is that this duty should not be treated as a mere matter of form. The Superintendents will of course know both the name and the distinguishing number of each candidate.

11. The printed passage furnished for dictation is to be read to the candidates by the Superintendent, or some person selected from the Committee, at any convenient time during the first day's examination. The passage should be first read over to the candidates to enable them to catch the meaning, and candidates are to listen but not to write; then it is to be read again *slowly*, a few words at a time, in order that the candidates may write it. Immediately after this second reading, the candidates are to give up their papers. They are not to be allowed any time for final corrections.

N.B.—One of these forms must be posted up in the Examination room.

## Form G.

## PUBLIC EXAMINATIONS.

## Form of Proposal to act as a Committee.

We, the undersigned, propose to act as the Local Committee for the Public Examinations to be held at  
and to commence on the                      day of                      188 .

Signature.	Address.	Occupation.

1. The Committee must consist of a Secretary and at least two other gentlemen ; and, if there are female candidates for examination, it must also include at least two lady members. It must be composed entirely of well-known responsible persons of independent position, who have no such personal interest in the Examination as can lay them open to the slightest suspicion of partiality.

2. It is very desirable that as many persons as possible in recognized positions of public responsibility in the district should act on the Committee.

3. For duties of Committee see separate form. (*Form F.*)

4. This form must be filled up and sent to the Registrar at least three weeks before the commencement of the Examinations.

## Form H.

## UNIVERSITY OF SYDNEY.

## Public Examinations.

To be filled in and signed by Members of Local Committees, and forwarded to the University with each set of worked papers.

We, the undersigned, Members of the Local Committee of the Public Examination held at  
in                      \* rooms, hereby certify that we were present during the Examination on the  
day of                      188 ., when the accompanying papers on                      were worked in our  
presence, in accordance with the rules for Public Examinations.

Dated this                      day of                      188 .

Signatures.	Hour of Arrival.	Hour of Departure.

\* Here state whether the candidates sat in one or more rooms.

## Cycle of Subjects for the Public Examinations.

The English, Latin, Greek, French, and German subjects for the Public Examinations are arranged in cycles of four years' period in accordance with the following scheme.

The Board of Examiners are empowered to alter these cycles at any time, with the sanction of the Senate, but eighteen months' notice of any such alteration will be given in the Manual of Public Examinations.

## ENGLISH.

## Juniors.

1882. Milton's Paradise Lost, Book I.  
1883. Milton's Comus and Sonnets.

1884. Milton's Samson Agonistes and Lycidas.

## PAPERS SET AT THE PUBLIC EXAMINATIONS HELD IN NOVEMBER, 1881.

## PRELIMINARY EXAMINATION.

2½ hours (including half an hour for Dictation).

## ENGLISH.

Dr. Badham. Professor Gurney. Mr. H. S. Hawkins.

Point out which of the following sentences are faulty, and give your reasons :—

He laid down under a tree, where he had laid the night before.  
 We will lay our weary limbs in this place.  
 The man whom you saw locked up has escaped.  
 The man whom you said was the thief is innocent.  
 Owing to the rain he could not come.  
 His not coming was owing to the rain.  
 He had eat and drank before he started.  
 The rain has wet the verandah and bursted the pipes.

Copy the following, but correct the faults of spelling :—

This soverain belieived more in his forrin mersenaries than in the troupes recruited in Briton. He was not undecieved untill it was to late to remmedy the mischeif.

Give the past tense and past and present participle of—

I shear, I forgive, I crow, I smite.

## ARITHMETIC.

1. Multiply nine hundred and nine thousand and seventy by ten million thirty thousand and thirty-five.
2. How many times is 8½d. contained in £27 17s. 9½d. ?
3. How long will a man take to walk 100 miles at the rate of 4½ miles per hour ?
4. What is the rent of 25a. 3r. 25p. at £3 10s. 8d. per acre ?
5. If 11 cwt. 3 qrs. 8 lbs. cost £41 7s. 6d., find the price per ton.

## DICTATION.

He seems to have engaged in this pursuit without duly weighing the difficulties with which it was surrounded, and he committed himself to a course of action which finally brought him into the most serious jeopardy. As soon as he became conscious of his position, he grew desperate, and afforded opportunities to his detractors of hastening those calamities which he might have deferred, or even, by great efforts, avoided.

## JUNIOR EXAMINATION.

HISTORY OF ENGLAND.—3 hours.

Dr. Badham. Dr. Beatty.

- A. Give a full account of the principal events during the reign of Edward I.
- B. Relate circumstantially the changes of government and the chief occurrences from the death of Henry VIII to the accession of Elizabeth.
- C. Mention all the circumstances that you know with regard to the following persons :—Villiers, Duke of Buckingham ; John Hampden ; Monk, Duke of Albemarle ; Lord Somers ; the Earl of Bute.
- D. Describe three principal victories by sea and three by land during the reign of George III.

## GEOGRAPHY.—3 hours.

Professor Gurney. Professor Liversidge.

1. Draw a map showing how France is bounded, and giving the positions of the Seine, the Loire, the Rhone, the Garonne, the Cevennes, the Vosges, Alsace, Lorraine, Brittany, Normandy, Burgundy, Flanders, Nice, Bordeaux, Paris, Tours, Nantes, Rouen, Marseilles, Avignon, Dijon, and Orleans.
2. Briefly describe the countries on the southern coast line of Asia, from Arabia to Kamschatka.
3. Name the principal rivers which flow into the North Sea, and describe the course of each.
4. Which countries have the same longitude as Scotland ? Which have the same latitude ?
5. Explain the terms Gulf, Strait, Peninsula, Bight, Sound, Firth, and give an example of each.
6. Where and what are the following :—Scinde, Saragossa, Parma, Oude, Padua, Lübeck, Leicester, Leinster, Geneva, Etna, Ontario, Dunedin, and Havana ?

## ENGLISH.—3½ hours.

Dr. Badham. Dr. Beatty.

[The question A must on no account be omitted.]

A. Parse the words in italics :—

This is now  
 Our doom, *which* if we can sustain and bear,  
 Our Supreme Foe may in time *much* remit  
 His anger, and *perhaps* thus far removed  
 Not *mind* us not *offending*, *satisfied*  
 With what is punished ; whence these raging fires  
 Will slacken if his breath *stir* not their flames.

\* \* \* \* \*  
 Besides *what* hopes the never-ending flight  
 Of future *days* may bring.

N.B.—No parsing will be accepted as sufficient that does not give the concordances and governments of the several words.

B. Explain the italicised words in the following extracts :—

- (a) Will he so wise let loose at once his ire  
*Belike* through *impatence* ?
- (b) And through the *palpable* *obscure* find out  
 His uncouth way.
- (c) The harmony . . . . *suspended* hell.
- (d) The parching air *burns* *frore*.
- (e) *Impaled* with circling fire.
- (f) Retire or *taste* *thy* *folly*.
- (g) With lonely steps to tread the *unfounded* *deceit*.
- (h) *Weighs* his spread wings, at leisure to behold  
 Far off the *empyrean* heaven.

C. Paraphrase the following extracts, turning the author's meaning into the simplest words you can find, but in such a way as to show that you understand the grammatical connection of the original words ; and explain whatever is peculiar in the construction :—

- (a) And who knows,  
 Let this be good, whether our angry Foe  
 Can give it or will ever ?
- (b) The former, vain to hope, argues as vain  
 The latter.
- (c) Then of their session ended they bid cry  
 With trumpets' regal sound the great result.

D.

D. Point out the exact application of the italicised words below in relation to the general sense :—

- (a) Or if our substance be indeed divine  
And cannot cease to be, *we are at worst*  
*On this side nothing.*
- (b) Since fate inevitable  
Subdues us, and omnipotent decree,  
The Victor's will ; to suffer as to do  
Our strength is equal ; *nor the law unjust*  
*That so ordains.*

E. Quote a few lines (not above six or seven in each place) of any three and no more of the passages in which the following expressions occur :—

- (a) While the north wind sleeps.  
(b) Confusion worse confounded.  
(c) Rather than be less  
Cared not to be at all.  
(d) Could make the worse appear  
The better reason.  
(e) There to converse with everlasting groans.  
(f) Majestic though in ruin.  
(g) O'er many a frozen many a fiery Alp.  
(h) With heaven's artillery fraught.  
(i) And fields were fought in heaven.  
(k) Sad instrument of all our woe.

[No credit will be given for quotations that spoil the verse or make nonsense.]

F. Give the derivation and explain the formation of the following words :—

Amain, Burden, Chief, Forbid, Irksome, Utter, Whole.

G. Counsel, Either, Least, Lingered, Worth.—Each of these words belongs to more than one part of speech. Show this by examples of your own making ; and name the part of speech in each case.

FRENCH.—3 hours.

Dr. Badham. Dr. Beatty.

A and B. Extracts from the subjects set in the Manual for 1881, to be translated into English.

C. Translate into French—

- (a) The skin of these animals is very black, their teeth are whiter than ours.  
(b) All the lessons which I have given you will be useful to you.  
(c) Do not go into that room, you will find nothing in it.  
(d) Those who do nothing for their friends ought not to complain of their negligence.  
(e) They have courage, but they have not prudence.  
(f) With good bread you have no need of wine.

D.

- (a) Write down the first person singular of the passé défini indicative and subjunctive of Aller, Boire, Craindre.  
Mettre, Pendre, Prendre.  
(b) Write down the persons singular and plural of Je Parlaï, Je Cours.

E. Translate into French—

- (a) I do not think that he had the intention of offending you.  
(b) However great his reputation may be I find some mistakes in his book.  
(c) They were ready to grant him more than he demanded, provided he destroyed their enemies.  
(d) He was very near being taken whilst waiting for his friends to come to his aid.  
(e) I should have bought myself a pair of gloves if I had remembered it in time.

GERMAN.—3 hours.

Dr. Badham. Dr. Helms.

A and B. Extracts from the subjects set in the Manual for 1881, to be translated into English.

C. Translate into German—

- (a) Through his own courage, and not through any help of others, he came back victorious.  
(b) It occurred to me that this labour would be less fatiguing in town than in the country.  
(c) He was accustomed to the bed of a soldier, and was contented with the simplest food.  
(d) The possessor of that property invited all his neighbours to dinner, but scarcely the half of them accepted his invitation.  
(e) She died of a sickness which she had long borne with wonderful patience, and left all her money to a poor servant girl.  
(f) Let us enjoy the fresh air of this beautiful region, that we may renew the strength of our minds and bodies.

LATIN.—3½ hours.

Dr. Badham. Dr. Beatty.

A and B. Extracts from the subjects set in the Manual for 1881, to be translated into English.

C. Write down the Latin for—

He planted those trees. They have built a broad bridge. She has a small needle. He proposed an unjust law. He rolled down a large stone. I have caught a big fish. We have bought two houses.

Give the perfect and supine of—sæpio, ascisco, desilio, cico, defetiscor, ordior, requiro, retexo.

D. Translate into Latin—

- (a) They ought not to be envied, who gain honours by acting unjustly.  
(b) I warned him not to injure my client, if he wished to enjoy my friendship.  
(c) He said that he would sell the farm for nineteen talents.  
(d) He determined to fight the enemy before their allies came up.  
(e) The Gauls endeavoured to cut Cæsar off from his supplies.

FOR HIGHER LATIN.

- (a) The ambassadors met Cæsar on his march, and begged him not to advance further.  
(b) When these ships were drawing near to Britain, on a sudden so violent a storm arose that none of them could keep on its course.  
(c) He told them that, if they rebelled, they would find that the Romans did not spare the vanquished.  
(d) Cæsar sent messengers to the commanders of the cavalry, to order them not to provoke the enemy to an engagement.  
(e) If I had not believed in his innocence, do you suppose that I would have exposed myself to so many men's enmity by undertaking his case ?

GREEK.

## GREEK.—3 hours]

Dr. Badham. Dr. Beatty.

A. and B. Extracts from the subjects set in the Manual for 1881, to be translated into English.

C. Parse—ἀποθανούσιν μαχόμενοι, παρεγγύσαντος, κατέτεμνε, δόντες, δέξας, φέρετο.

D. Write down the Greek for—Longer Walls, The Sweetest Wine, Of a more Beautiful Harbour, The Smallest Island, On the Left Hand, The Highest Mountains, 1,000 Years, To many Birds, On the Former Day.

E. Give the dative plural of νεώς; θυγάτηρ, κίων, ποῦς, ἄστυ; and the accusative singular of πῦρ, ἰχθός, τέλος, μάστιξ.

F. Write down the first person singular of the principal tenses of ἐνδίδωμι, κατασβέννυμι, καλῶ, λαβδάνω, ἀφίημι, γελῶ, ἐπιτέλλω, ἀλσκομαι.

G. Translate into Greek—

(a) He called the Captains together, to deliberate how they might most safely cross the river.

(b) You seem to forget that you promised to assist us.

(c) I fear that our guide will betray us to the enemy, so that they may spare his kinsman.

(d) He exhorted them to fight bravely for their country, for their wives and children.

(e) Never injure your neighbour, nor revenge yourself on your enemy.

## ARITHMETIC.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

All candidates are required to satisfy the Examiners in the first part of this paper. Full work must be shown up.

## FIRST PART.

1. Resolve into their simplest factors, and find the least common multiple of 3430, 1512; and 2205.

2. Simplify  $\frac{10309}{13481} \times \sqrt{208804}$ .

3. What is the value of 45a. 3r. 25p. at £111 11s. 4d. per acre?

4. Divide 3'39584 by '00379.

Suppose a sheet of paper weighs 97'372 grains, how many pieces can be cut off it each weighing '0273 grains, and what is the weight of the piece left over?

5. What is the interest on £372 10s. 4d. for 60 days at the rate of 6 per cent. per annum?

6. A metre is equal to 39'37079 inches. Find the number of millimètres in a fathom.

7. How much water must be added to 80 gallons of spirit worth 14s. a gallon to reduce the value to 10s. 6d. a gallon?

## SECOND PART.

8. By what decimal must 1'00503 be divided so that  $\frac{2}{3}$  of the quotient may be '859?

9. Find the cost of papering a room 19 feet long, 16 feet broad, and 9 feet high with paper 1 ft. 9 in. wide at 1s. 1½d. per yard.

10. What will £576 10s. amount to in 6 years at 4 per cent. per annum compound interest?

11. £18,150 cash is invested in 3 per cents. at 90 $\frac{1}{2}$ ; they rise to 91, when the owner sells out and invests the proceeds in railway shares at 97 $\frac{1}{2}$ , which pay a dividend of £3 10s. per share. What difference is made in the owner's income by this transfer?

12. How long will a man take to walk at the rate of 3 miles an hour round a square block of land containing 160 acres?

13. When the income tax is 3d. in the pound, a man's net income remaining is £2,370 per annum. What will it be reduced to if the income tax be raised to 7d. in the pound?

## ALGEBRA.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

All candidates are required to show up satisfactory work in the first part of this paper.

## FIRST PART.

1. Multiply  $x^4 - 2x^3 + 3x^2 - 2x + 1$  by  $x^4 + 2x^3 + 3x^2 + 2x + 1$ .2. Divide  $ab(x^2 + y^2) + (a^2 + b^2)xy + (a - b)(x - y) - 1$  by  $bx + ay + 1$ .

3. Simplify

(i.)  $\left\{ \frac{x^2 + y^2}{x^2 - y^2} - \frac{x - y}{x + y} \right\} \div \left\{ \frac{x + y}{x - y} + \frac{x - y}{x + y} \right\}$

(ii.)  $\frac{a^2}{(a - b)(c - a)} + \frac{b^2}{(b - c)(a - b)} + \frac{c^2}{(c - a)(b - c)}$

4. Find the G. C. M. of  $3x^4 + 5x^3 - 7x^2 + 2x + 2$  and  $2x^4 + 3x^3 - 2x^2 + 12x + 5$ .

5. Solve the equations

(i.)  $(x - 1)(x - 5)(x - 7) = (x - 3)(x - 4)(x - 6)$ .

(ii.)  $a + \frac{1 - a}{a + x} = 1 - a + \frac{a}{1 - a + x}$

6. A woman spends three shillings in eggs; if she had bought a dozen less for the same money, they would have cost three pence a dozen more. How many did she buy?

## SECOND PART.

7. A certain number consists of two digits, and is six times as great as the right hand digit; prove that it is twelve times as great as the left hand digit.

8. Solve the following equations:—

(i.)  $\begin{cases} \frac{x + 3y + 5}{x + y + 1} + \frac{3x + y + 4}{x + y - 1} = 4 \\ (x + 2y)^2(n + 2y)^2 + (y + 2x)^2 = 5(x + y)^2 + 4y. \end{cases}$

(ii.)  $\begin{cases} \frac{\sqrt{x + y} + \sqrt{y}}{\sqrt{x - y} - \sqrt{y}} - \frac{\sqrt{x - y} - \sqrt{y}}{\sqrt{x + y} + \sqrt{y}} = \sqrt{2}, \\ \sqrt{x + y} = \sqrt{\frac{x}{y}} + 3. \end{cases}$

9. If  $a : b = c : d$ , prove that

$$\frac{a - b}{a + b} = \frac{c - d}{c + d} \text{ and that } \frac{a}{b} = \sqrt[3]{\frac{pa^3 + qc^3}{pb^3 + qd^3}}$$

10. Extract the square root of  $10\frac{1}{2} + 2\sqrt{5}$  and find the product of

$$x\sqrt{a + \sqrt{\frac{b^2}{4a} - c} + \frac{b}{2\sqrt{a}}} \text{ and } x\sqrt{a - \sqrt{\frac{b^2}{4a} - c} + \frac{b}{2\sqrt{a}}}$$

GEOMETRY.—

## GEOMETRY.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

*All candidates are required to satisfy the Examiners in the first part of this paper.*

## FIRST PART.

1. Define a *plane superficies*, a *term or boundary*, a *figure*, a *scalene triangle*, a *trapezium*.
2. On the same base and on the same side of it there cannot be two triangles having their sides which are terminated in one extremity of the base equal to one another and likewise those which are terminated at the other extremity equal.
3. If a side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the interior angles of any triangle are together equal to two right angles.  
Give the enunciations of the two corollaries of this theorem. May the rectilinear figures have re-entrant angles? A certain rectilinear figure has each of its interior angles six times as great as the adjacent exterior angle. How many sides must the figure have?
4. The complements of the parallelograms which are about the diameter of any parallelogram are equal to one another.  
Can these equal magnitudes be made to coincide?
5. If a straight line be divided into any two parts, the square on the whole line is equal to the squares on the two parts together with twice the rectangle contained by the two parts.

## SECOND PART.

6. In every triangle the square on the side subtending an acute angle is less than the squares on the sides containing that angle by twice the rectangle contained by either of these sides and the part of it intercepted between the perpendicular let fall upon it from the opposite angle and the acute angle.  
If AB, AC be the equal sides of an isosceles triangle ABC, and if BD be drawn perpendicular to AC, prove that the square on BC is equal to twice the rectangle CA, CD.
7. The angle at the centre of a circle is double the angle at the circumference on the same base, that is, on the same part of the circumference.
8. On a given straight line describe a segment of a circle containing an angle equal to a given rectilinear angle.
9. If the arc AB be one-third, and the arc CD one-sixth of the circumference of the circle ABCD, prove that the straight lines, AC, BD cut one another at right angles.
10. The straight line which bisects the right angle of a right-angled triangle passes through the intersection of the diagonals of the square described on the hypotenuse.

## CHEMISTRY—3 hours.

Professor Liversidge. Dr. Helms.

1. What are the differences between a chemical compound and a mechanical mixture?
2. What is the action of red hot iron upon steam? Describe an experiment by which this action can be shown.
3. Describe a method for the preparation of chlorine gas, and describe its principal properties.
4. How does phosphorus occur in nature, and how is it obtained from bones?
5. Give the chemical composition of the following—Green Vitriol, Mundic, Saltpetre, Plaster of Paris, Lunar Caustic.
6. How is tin obtained from its ores?
7. Explain the following equation;—  
$$\text{NaCl} + \text{NH}_3 + \text{CO}_2 + \text{H}_2\text{O} = \text{NaHCO}_3 + \text{NH}_4\text{Cl}.$$
8. Give tests for the detection of sulphuric and carbonic acids.

*N.B.—In all cases, where possible, illustrate your answer with chemical equations.*

## PHYSICS.—3 hours.

Professor Liversidge. Dr. Helms.

1. Describe the construction and action of the common mercurial barometer.
2. What takes place when you break a bar magnet?
3. How do you explain the formation of a rainbow?
4. Explain the action of the common pump.
5. What is sound? How does a musical note differ from mere noise?
6. Describe the structure of the refracting telescope.
7. Give an account of Daniell's battery, and of the changes which go on within it.
8. What is the electrophorus; what is the explanation of its action?

## PHYSICAL GEOGRAPHY AND GEOLOGY.—3 hours.

Professor Liversidge. Dr. Helms.

1. What are the principal proofs that the earth is a globe?
2. Explain the terms—Cyclone, delta, monsoon, simoom, and zenith.
3. Describe the effects of frost as a geological agent.
4. State generally how the indigenous fauna of Australia is distinguished from that of other countries.
5. What is the Gulf Stream?—What effect has it upon the climate of the coasts along which it passes?
6. What indications are there of slow movements of upheaval and of depression upon the earth's surface?
7. Why are certain seas comparatively fresh, and some lakes excessively salt?
8. How are earthquakes accounted for?

## SENIOR EXAMINATION.

## HISTORY OF EUROPE.—3 hours.

Dr. Badham. Dr. Beatty.

- A. Give an account of the state of affairs in Florence during the fourteenth century.
- B. Relate the history of the Invasion of Italy by Charles VIII of France.
- C. Give a full account of the following persons:—Savonarola; John Sobieski; Petrarch; Cardinal Ximenes; John the Fearless, Duke of Burgundy.
- D. Describe the principal events in the History of Germany and the Low Countries, from the accession of the Emperor Charles V to the death of Philip II of Spain.

## GEOGRAPHY.—3 hours.

Professor Liversidge. Dr. Helms.

1. What do you understand by the term *isotherm*? Over what countries in the northern hemisphere do the isotherms of 50°, 40°, and 32° (Fah.) pass?
2. Explain the terms, steppe, tundra, savannah, prairie, sierra, plateau, salina, and oasis.
3. Give a sketch map of the Mediterranean Sea, showing the positions of the principal islands.
4. What are the principal vegetable productions of the Malay Archipelago?
5. Describe the course of the Danube, the Euphrates, the Indus, and of the Ganges.
6. Give a short account, including position, produce, manufactures, and trade of the following:—Antwerp, Lima, Bradford, Sheffield, Cape Town, Oregon (State), Buenos Ayres, and British Guiana.
7. Give a brief account of the principal races or varieties of mankind inhabiting Europe.
8. Describe the forms of government existing in France, the United Kingdom, the Australasian Colonies, Sweden and Norway.

ENGLISH.—

## ENGLISH.—3½ hours.

Dr. Badham, Dr. Beatty.

- A. What other plays of Shakespeare come nearest to the *Tempest* in conception and treatment? Specify the points of resemblance.
- B. Explain the following expressions :—
- I'll warrant him for drowning.
  - To trash for overtopping.
  - Hast thou performed to point the tempest that I bade the?
  - A maze trod through forthrights and meanders.
  - Each putter-out of five for one.
  - We know what belongs to a frippery.
  - Now jerkin you are like to lose your hair.
  - So dry he was for sway.
  - Which since have steaded much.
- C. In what senses do the several words following occur in the *Tempest*?—  
Aspersion, Changed eyes, Cockrel, Corollary, Dowle, Foison, Good life, Invest, Mercy.
- D. State the derivation of Charms, Endeavour, Islander, Knave, Merciful, Requite.
- E. Explain the formation of Methought, Darling, Wholesome.
- F. Name the metres of the following lines, and mark the divisions of the feet and the accented syllables :—  
Sea-nymphs hourly ring his knell,  
Hark? now I hear them—ding-dong bell.  
Lie at my mercy all mine enemies.  
Then to sea, boys, and let her go bang.
- G. Quote a few lines of any three (and no more) of the undermentioned passages :—
- Prospero's speech on dismissing the masquers.
  - Prospero's resolve to abjure his art.
  - The song of Ceres.
  - Ariel's song in the fifth Act.
  - Ferdinand's declaration of love.
  - Gonzalo's commonwealth.
- H. In what connections do the following expressions severally occur?—
- That deep and dreadful organ-pipe.
  - A living drollery.
  - The picture of Nobody.
  - The top of admiration.
  - A very ancient and fish-like smell.
  - As fast as mill-wheels strike.
  - The still-vex'd Bermoothes.

## FRENCH.—3 hours.

Dr. Badham, Dr. Beatty.

A, B, and C. Extracts from the subjects set in the Manual for 1881, to be translated into English.

D.

- The men who buy that of which they have no need do not make trade to flourish.
- They had called him several times before he appeared in the court.
- The more courage you put in it the greater will be the success of this undertaking.
- However small the source of the river may appear, it is nevertheless one of the greatest to be found in Europe.
- Whatever you do, take care not to betray the two secrets which I have confided to you.
- He did more than I asked of him, and he did his best.
- May the goodness of his brother redeem the grievous faults of that man.
- He did not think that he ought to fail in his promise, whatever it might cost him.
- If they had known that the task which they had undertaken was one of which the greatest men had complained that it could not be accomplished without great loss of time, they would have abstained from it, and would have turned themselves to some work more proportioned to their strength.

## GERMAN.—3 hours.

A and B. Extracts from the subjects set in the Manual for 1881, to be translated into English.

Translate into German—

C. Thereupon she said cheerfully, at the same time doubling her quicker steps along the darkening path with easy movement, "I hope, indeed, to make both of them alike content; for the disposition of your mother is like my own nature, and to external courtesy from youth up I am no stranger." Our neighbours, the Franks, in their former time cared much for politeness; it was common to the noble and the citizen, as also to the peasant, and each one displayed it to his kindred.

D. Alas, then, we first felt the sad fate of war, for the victor is great and good—at least he appears so—and he spares the conquered man as though he were his own, if he daily helps him and serves him with his goods. But the fugitive knows no law, for he only wards off death, and only consumes goods swiftly and without regard; besides his temper is also kindled, and despair brings forth out of his heart the criminal attempt. Everywhere he sees death and enjoys the last minutes, cruelly delights in blood, and is pleased with the loud lamentation.

## LATIN.—3½ hours.

Dr. Badham, Dr. Beatty.

A, B, and C. Extracts from the subjects set in the Manual for 1881, to be translated into English.

D. Translate into Latin—

- Some are of opinion that, if, after the battle of Cannæ, Hannibal had known how to profit by his victory, he would have taken Rome itself.
- He had nothing to say in answer to the charge of the Consul that he had formed a conspiracy to destroy the commonwealth.
- He ordered his men to pack up their baggage and break up the camp at daybreak, thinking that he would come upon the enemy unawares.
- I exhorted him never to forget that he was indebted to his brother for this great kindness, and to endeavour to make him a return for it at the earliest opportunity.

## HIGHER COMPOSITION.—1½ hour.

(Not necessary for Pass.)

Translate into Latin—

His love of his country was remarkable, and so was the mildness of his disposition, saving that he bore an extreme hatred to tyrants and wicked men. His natural abilities for war were so happily tempered that, as an extraordinary prudence was seen in the enterprises of his younger years, so an undaunted courage distinguished his declining age. He had an elder brother, named Timophanes, who resembled him in nothing; being rash and indiscreet of himself, and utterly corrupted besides, by the passion for sovereignty, infused into him by some of his profligate acquaintance, and certain foreign soldiers whom he had always about him.

GREEK.

## GREEK.—3 hours.

Dr. Badham. Dr. Beatty,

A, B, C, and D. Extracts from the subjects set in the Manual for 1881, to be translated into English.

E. Parse the following words, and give their principal tenses— $\phi\delta$ ,  $\delta\acute{\upsilon}\mu\epsilon\nu\alpha\iota$ ,  $\epsilon\pi\iota\sigma\pi\eta\rho\iota\varsigma$ ,  $\tau\epsilon\tau\acute{\alpha}\kappa\omicron\nu\omicron\tau\omicron$ ,  $\epsilon\delta\epsilon\acute{\upsilon}\epsilon\tau\omicron$ ,  $\delta\acute{\iota}\epsilon\chi\epsilon\nu\alpha\nu$ ,  $\kappa\alpha\tau\alpha\rho\epsilon\acute{\iota}$ ,  $\sigma\upsilon\sigma\tau\eta$ .

F. Translate into Greek—

(a) If he had not bribed some of his judges, he would certainly have been convicted of sacrilege, and sentenced to death.

(b) He thought that his house would fetch thirty talents, but it was sold for seventeen.

(c) He endeavoured to persuade his fellow-citizens to revolt from the Athenians, showing that it would be greatly to their advantage to form an alliance with the Lacedæmonians.

(d) Do not give up the war until you have forced the enemy to restore that fortress.

(e) He exhorted his disciples not to pride themselves upon wealth and birth, because one was the gift of nature and the other of fortune.

## HIGHER COMPOSITION.—1½ hour.

Not necessary for Pass.

Translate into Greek—

Another time, when a certain stranger derided Dionysius, at Corinth, in a very rude and scornful manner, for having, in the meridian of his power, taken pleasure in the discourse of philosophers, and at last asked him "What he had got by the wisdom of Plato?" "Do you think," said he, "that we have reaped no advantage from Plato, when we bear in this manner such a change of fortune?" Aristoxenus, the musician, and some others, having enquired what was the ground of his displeasure against Plato? he answered, "that absolute power abounded with evils; but had this great infelicity above all the rest, that among the number of those who called themselves the friends of an arbitrary prince, there is not one who will speak his mind freely; and that by such false friends he had been deprived of the friendship of Plato."

## ARITHMETIC.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

1. Show that the value of a vulgar fraction is not altered by multiplying its numerator and denominator by the same number. If the same number be added to the numerator and the denominator of a fraction, show that the fraction is made more nearly equal to unity.

2. Marks are made at equal distances of .037 inches along a straight line 4.029 inches long, commencing at one end of the line. How far is the last mark from the other end of the line?

3. Simplify  $3\sqrt{\frac{7}{5}}$  of  $\frac{4}{5}\sqrt{\frac{7}{5}} \div 71 + 2\sqrt{\frac{7}{5}}$  of  $\frac{4}{5}\sqrt{\frac{7}{5}} - 1\sqrt{\frac{7}{5}}$  of  $1\frac{1}{5}$ .4. If 379 of 45 guineas will purchase  $1\frac{1}{2}$  acres, how many roods will  $\frac{1}{2}$  of £538 13s. purchase?

5. Find the present value of £10,000, due 6 years hence, at 4 per cent. per annum compound interest.

How would you solve this question with the help of a table of logarithms?

6. Describe the system of measures which have for units the metre, the litre, and the gramme.

A cubic fathom of water weighs six tons, and a kilogramme is the weight of a cubic decimetre of water. If 1 decimetre be equal to 11 yards, express a kilogramme in pounds.

7. A man knows the area of a rectangular field accurately, but his estimate of the length is 5 per cent. too large. If he calculates the breadth, show that he will make it about  $4\frac{1}{2}$  per cent. too small.

8. The inner surface of a cubical box is 5 square feet 6 square inches; find its solid content.

9. The buyer of an estate has the option of paying half the purchase money at once and the remainder at the end of three years, or of paying 25 per cent. at once and equal amounts at the end of 1, 2, and 3 years, in each case paying no interest. Which is the more advantageous arrangement?

10. A grocer mixes 1 cwt. of tea which cost him 2s. 4d. per lb. with an equal quantity of inferior tea and sells the mixture at 2s. 9d. per lb., thereby gaining 32 per cent. profit. What did the inferior tea cost him per lb.?

11. If 3 per cent. stock is selling at 96½, at what price would you expect to find 3½ per cents. selling, the security being equally good?

A man calculates whether he shall invest in the 3 per cents. at 96 or in the 3½ per cents. at 108, and he finds that it will make a difference of £2 10s. in his annual income. How much money has he to invest?

12. Explain the methods of contracted multiplication and division, and give an example of each process.

## ALGEBRA.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

1 Simplify

$$\frac{a}{(a-b)(a-c)(x-a)} + \frac{b}{(b-c)(b-a)(x-b)} + \frac{c}{(c-a)(c-b)(x-c)}$$

$$\text{and } \left\{ \frac{1}{1+\sqrt{x}} + \frac{1}{1-\sqrt{x}} \right\} \div \left\{ \frac{1}{1+\sqrt{x}} - \frac{1}{1-\sqrt{x}} \right\}$$

2. If  $ab(c+d-e-f) + cd(e+f-a-b) + ef(a+b-c-d) = 0$ , prove that  $(a-c)(b-f)(e-d) = (a-e)(b-d)(c-f)$ .3. Find the highest common divisor of the expressions  $ab(x^2+y^2) + xy(a^2+b^2)$  and  $ab(x^3+y^3) + xy(a^2x+b^2y)$ .4. If  $m$  and  $n$  be positive integers prove that  $x^m \times x^n = x^{m+n}$ . How is this index law extended to the case of fractional and negative exponents?5. Show how to extract the square root of a surd of the form  $a + \sqrt{b}$ , when  $a^2 - b$  is an exact square.Extract the square root of  $\frac{21\sqrt{2} + 3\sqrt{5}}{(2\sqrt{10} - 3)(\sqrt{5} - \sqrt{2})}$ .

6. Prove the rule used for extracting the square roots of numbers.

7. Solve the equations—

$$(i) \frac{x^2+2x-2}{x-1} + \frac{x^2-2x-2}{x+1} = \frac{2x^2-6x+2}{x-3}$$

$$(ii) \sqrt{\frac{x}{a}} + \sqrt{\frac{a}{x}} = \sqrt{\frac{x}{b}} + \sqrt{\frac{b}{x}}$$

$$(iii) \begin{cases} x^2 - xy = 8x + 3, \\ xy - y^2 = 8y - 6. \end{cases}$$

$$(iv) \frac{3(x+y)}{z} = \frac{y}{2x+x} = \frac{3x+4y}{5x-14} = 1\frac{1}{2}$$

8. The surfaces of the top, a side, and an end of a box are respectively 15, 12, and 5 square feet; find its dimensions.

9. Find a formula for the sum of  $n$  terms of a Geometrical Progression. When can we find the sum to infinity? Find the sum of the following series to infinity:—

$$n + (n-1) + \frac{(n-1)^2}{n} + \frac{(n-1)^3}{n^2} + \dots$$

 $n$  being greater than 1.10. Define the logarithm of a number. Calculate the logarithms to base 3 of  $\frac{1}{27}$ , 81 and  $\sqrt{243}$ . How many positive integers are there whose logarithms to base 3 have 4 for a characteristic?11. Given  $\log_{10} 54 = 1.7323938$  and  $\log_{10} 72 = 1.8573325$ , find  $\log_{10} 45$ .12. Given  $\log 3.6135 = .5579281$   
and  $\log 3.6136 = .5579401$ ,find by the principle of proportional parts the logarithm of .0361356 and the number whose logarithm is  $\bar{5}.5579333$ .

GEOMETRY.—

## GEOMETRY.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

1. Parallelograms on the same base and between the same parallels are equal to one another.  
Find when the complements of the parallelograms about the diameter of a given parallelogram are greatest.
2. In obtuse-angled triangles if a perpendicular be drawn from either of the acute angles to the opposite side produced, the square on the side subtending the obtuse angle is greater than the squares on the sides containing it by twice the rectangle contained by the side on which when produced the perpendicular falls, and the straight line intercepted without the triangle between the perpendicular and the obtuse angle.  
The squares on the two sides of a triangle are together double of the square on half the base and of the square on the line drawn from the point of bisection to the vertex.  
Show that two propositions of the Second Book (Nos. 9 and 10) may be considered special cases of this theorem.
3. The opposite angles of any quadrilateral figure inscribed in a circle are together equal to two right angles.  
Any two chords of a circle are drawn cutting each other at right angles. Prove that the quadrilateral formed by tangents at their extremities can be circumscribed by a circle.
4. Pp, Qq are chords of a circle cutting one another in R, and O is the centre of a circle; if circles round PRq and QRp meet again in S, prove that circles round PSQ and pSq meet again in O.
5. If two straight lines cut one another within a circle, the rectangle contained by the segments of one of them shall be equal to the rectangle contained by the segments of the other. (Take the case in which the chords are not at right angles, and one of them only passes through the centre.)
6. Describe a circle about a given square.  
Show that, for the same circle, the circumscribing square is double the inscribed square.
7. The sides about the equal angles of triangles which are equiangular to one another are proportionals, and those which are opposite to the equal angles are homologous sides.  
Lines are drawn from one angular point of a parallelogram to bisect the opposite sides, prove that they trisect a diagonal of the parallelogram.
8. In any right-angled triangle, any rectilinear figure described on the side subtending the right angle is equal to the two similar and similarly described figures on the sides containing the right angle, taken together.
9. Planes to which the same straight line is perpendicular are parallel to one another.
10. Describe a circle which shall pass through a given point and touch two given straight lines.

## TRIGONOMETRY.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

1. Which is greater,  $9^{\circ} 56' 10'' 25$ , or  $11^{\circ} 4' 2''$ ?
2. Prove that the formulæ  

$$\cos(A+B)\cos(A-B) = \cos^2 A - \sin^2 B,$$

$$2 \cot 2A = \cot A - \tan A,$$

$$2 \cos^{-1} x = \cos^{-1}(2x^2 - 1).$$
3. Find the value of the continued product  

$$\cos x \cdot \cos \frac{x}{2} \cdot \cos \frac{x}{4} \cdot \cos \frac{x}{8} \dots \text{to infinity.}$$
4. Find all the solutions of the following equations in  $\theta$  :—  

$$(1 - \tan \theta)(1 + \sin 2\theta) = 1 + \tan \theta.$$
5. The angles of a triangle are as 3 : 4 : 5. Find the ratios of the sides.
6. Given  $A = 60^{\circ}$ ,  $b = 273$  feet,  $c = 327$  feet,  $\log 3 = 4771213$ ,  $L \tan 8^{\circ} 51' = 9.1922939$ , difference for  $1' = 0006302$ .  
Find the other angles.
7. Prove that in any triangle  $a = b \cos C + c \cos B$ , and hence find the relation which exists between the cosines of the angles of a triangle.
8. Find the radii of the four circles which may be drawn to touch the sides of a given triangle, and show that the square root of their continued product is the area of the triangle.
9. If  $a, b, c$  be the sides of the triangular base of a pyramid, and  $\alpha, \beta, \gamma$  the inclinations to the base of the corresponding adjacent faces; find the height and the volume of the pyramid.
10. Investigate a series for  $\log_e(1+x)$  arranged in ascending powers of  $x$ .  
Find the value of  $\cos x + \frac{1}{2} \cos^2 x + \frac{1}{3} \cos^3 x + \dots$  to infinity.

## MECHANICS.—3 hours.

Professor Gurney. Mr. H. S. Hawkins.

1. How may forces be represented by straight lines? Enunciate the Parallelogram of Forces, and prove that if true for direction it must be true for magnitude.  
An inclined plane makes an angle of  $45^{\circ}$  with the horizontal and a weight  $W$  is supported on it by a force  $P$ , such that  $2W^2 = 3P^2$ ; find the direction in which the force  $P$  acts.
2. Find the resultant of a number of forces which act upon a particle in a plane, and whose directions and magnitudes are known.  
Example  $2\sqrt{3}$  lbs. East,  $2\sqrt{6}$  lbs. North-west, 2 lbs. South  $30^{\circ}$  West.
3. Find the resultant of two forces acting in directly opposite directions, but not in the same straight line.  
Prove that forces represented in every respect by the sides of a polygon, taken in order, are equivalent to a couple.
4. Define the term Centre of Gravity. The C. of G. of a body and that of a known portion of the body being given, find the C. of G. of the remaining portion.  
Lines are drawn from  $G$ , the centre of gravity of a triangular lamina  $ABC$ , to the angular points, and the portion  $GBC$  is removed. Find the C. of G. of the remainder.
5. The upper end of a uniform rod leans against a smooth wall, and the lower end hangs by a string which is fastened to a point in the wall above the rod; the lengths of the string and the rod are as  $\sqrt{7} : 2$ . Prove that in the position of (unstable) equilibrium the rod is inclined at an angle of  $60^{\circ}$  to the vertical.
6. Determine the conditions of equilibrium in the system of pulleys where all the strings are attached to the weight, neglecting the weights of the pulleys.  
If the string of the last pulley be tied to the weight, show that the tension of the string is diminished in a certain ratio depending on the number of pulleys. If the tension be decreased in the ratio 16 : 15, find the number of pulleys.
7. Show how to graduate the common steelyard.
8. Show that the sum of the moments of two (non-parallel) components about any point in their plane is equal to the moment of their resultant about that point.  
 $ABC$  is an equilateral triangle, each side being 2 feet long. Certain forces act upon it in its own plane, and the sum of their moments about  $A$  is 3 foot-pounds, about  $B$  9 foot-pounds, and about  $C$  minus 3 foot-pounds. Find the magnitude and line of action of the resultant force.
9. Two equal heavy uniform roof-rafters rest against each other at their upper ends and their middle points are connected together by a tie-beam whose weight may be neglected, and which relieves the walls from all horizontal thrust. Show that each rafter is subject to four forces forming two couples, and prove that the tension of the tie-beam is equal to the weight of a rafter multiplied by the tangent of the angle between the rafter and the vertical.
10. When is a force said to do work?  
There are 20 blocks of stone, cubes of one foot, each weighing 1 cwt., and lying side by side on a horizontal plane. What mechanical work must be expended to pile them up into a single column 20 feet high?

CHEMISTRY.—

## CHEMISTRY.—3 hours.

Professor Liversidge. Dr. Helms.

1. Why cannot a hard and fast line be drawn between the non-metals and the metals?  
 2. How much metallic sodium (Na. = 23) would you require and how much water would be decomposed in preparing 10 litres of Hydrogen (measured at 15°C and 750 mm. pressure) by acting upon water with sodium?  
 3. What are the common impurities of sulphuric acid, and how would you detect their presence?  
 4. How is Iodine prepared? Give an account of its properties.  
 5. What is glass? Describe its method of manufacture.  
 6. What is the action of zinc upon a solution of a sulphite? What when both zinc and hydrochloric acid are added?  
 7. Calculate the formula of the salt having the following composition:—

Ca.	23.256
S.	18.605
O.	55.814
H.	2.325
	<hr/>
	100.000

NOTE.	Ca=40
	S = 32
	O = 16 and H = 1.

8. Give tests for the recognition of arsenic, antimony, gold, silver, copper, cobalt, and magnesium.

## PHYSICS.—3 hours.

Professor Liversidge. Dr. Helms.

- Describe the phenomena of capillarity.
- What is the mechanical equivalent of heat?
- What are the circumstances affecting the velocity and intensity of sound in air?
- Describe the spectroscope and explain how it has led to a knowledge of the chemistry of the sun.
- Explain the action of Siemens' magneto electric machine.
- Give a sketch of the essential parts of Coulomb's torsion balance, and explain its action.
- What is meant by *dark heat*? Describe an experiment to prove that it is capable of refraction.
- What is electrolysis?

## GEOLOGY.—3 hours.

Professor Liversidge. Dr. Helms.

- What are aqueous, volcanic, and metamorphic rocks. Give examples of each kind.
- What are the principal differences between the shells of marine and fresh water mollusca?
- What are anticlinal and synclinal curves? Indicate by diagram how beds may have become inverted.
- Describe the chief processes of denudation.
- How have lakes been formed?
- What is the origin of coal? Why do coal beds often occur in basins?
- Mention some of the fossils characteristic of the Old Red Sandstone rocks.
- What are the theories with respect to the origin of slaty cleavage?
- Name the accompanying rock specimens.
- Name the accompanying fossils, and mention the names of the strata in which they are found.

## BOTANY.—3 hours.

Professor Liversidge. Dr. Helms.

- Give an account of the structure of a typical vegetable cell.
- Make and describe sketches of a dicotyledonous stem, as seen in transverse and longitudinal sections.
- What is chlorophyll, and what are its functions?
- Describe the characteristics of starch granules.
- Explain the terms bulb, frond, berry, carpel, fruit, disk, tuber, and whorl.
- Give an account of the order Labiales.
- What are the principal characters of the sub-kingdom Thallophyta?
- Describe in botanical terms the fresh plants laid before you.

## PHYSIOLOGY.—3 hours.

Professor Liversidge. Dr. Helms.

- In what respects do the veins differ from the arteries?
- Give an account of the process of respiration.
- What is chyle, in what respects does it differ from chyme?
- Describe the structure of bone, illustrate your answer by diagrams.
- State briefly what you know about the structure and functions of the spinal cord.
- Describe the structure of the organ of the sense of taste.
- What are the functions of the kidneys?
- In what respect do the salivary glands and the pancreas correspond?

## GEOMETRICAL DRAWING AND PERSPECTIVE.—3 hours.

Mr. Montefiore. Professor Gurney.

*Lines used in the constructions are not to be erased. Write a description of each step.*

- Draw a triangle sides 2 in., 2½ in., 3 in. Describe a circle about it. Take any point on the circumference and from it draw three perpendiculars to the sides. Join the feet of these perpendiculars.
- Draw two sections of a carriage wheel with twelve spokes.
- Trisect a given straight line.
- Draw a triangle, sides 2 in., 2½ in., 3 in., and describe three semicircles each of them touching two sides and having its diameter on the third side.
- Give a general definition of perspective.
- Name the various points in the horizontal line and their positions.
- How is the horizontal line determined?
- What is the difference between parallel and angular perspective?
- Put into perspective a cube of 5 ft. edge having its front parallel to the picture plane, at eight feet to the left of spectator and 6 feet within the picture. Show the workings in dotted lines. Scale 1½ in. to foot. Height of spectator 6 feet, distance 15 feet.

## CIVIL SERVICE EXAMINATION.

ENGLISH.—1½ hour.

- Parse the following—Wherever betting interferes with manly sports we may feel sure that mischief rather than good will result from them.
- Write down the past tense and the past participle of the following—I forget, I shear, I strive, I forbid.
- Explain the meaning of the following words—Fraught, Sudden, Credence, Fictitious, Profusion, Contaminate.
- Point out the subject in the following sentences—
  - This resolution of mine no further considerations will ever alter.
  - The half of my goods I give to the poor.
  - The meaning of this threat time alone will show.

5. Write out the following, correcting the bad spelling—When he separated from his friends, he besought them to forego the many omissions with which his conscience upbraid him. He assured them that his fidelity had always been undoubted, though his practice was not up to his profession.

ARITHMETIC.—1½ hour.

1. Find the quotient and remainder when eleven million one thousand and thirty-one is divided by nineteen thousand and sixty.
2. If a train be moving uniformly at the rate of  $22\frac{1}{2}$  miles per hour, what number of yards will it pass over in a second.
3. If I buy 18 head of cattle for £229 10s. and sell 5 of them at cost price, for how much per head must I sell the remainder so as to gain £32 10s. by the whole?
4. Find the cost of 41 tons 16 cwt. 2 qrs. 21 lbs. at £4 16s. 8d. per cwt.
5. A bankrupt's assets are £1,879 9s. 1½d. What are his debts if he can pay 6s. 9½d. in the pound?
6. A bill of £3 0s. 11½d. has to be paid by several persons in equal shares. If three of them together pay 16s. 7½d., how many are there to share the cost?

GEOGRAPHY.—1½ hour.

1. Draw a rough outline map of Great Britain and Ireland, showing the position of London, Edinburgh, Dublin, Limerick, Cork, Inverness, Perth, Dundee, Glasgow, Newcastle, Liverpool, Manchester, Leeds, Sheffield, Bristol, the Isle of Wight, the Thames, the Clyde, the Severn, and the Caledonian Canal.
2. Describe the principal rivers of North America.
3. Give the names and positions of nine important seaport towns of Europe, three on the Baltic, three on the Mediterranean, and three on the West Coast.
4. Where and what are the following:—Algiers, Sierra Leone, Pondicherry, the Caspian, Cape Horn, Nova Scotia, San Francisco, the Corea, Cuba, Quebec, Arkansas, the Amazon, the Congo, and the Nile.

HISTORY.—1½ hour.

1. Name the fathers of the following sovereigns—John, Edward I, Richard II, James I, Anne.
2. In what reigns did the following events occur? The murder of A'Becket; the rebellion of Jack Cade; the assassination of the Duke of Buckingham; the great fire of London; the trial of the seven bishops.
3. Between whom and with what result were the following battles fought? Evesham, Flodden, Sedgemoor, Corunna, Trafalgar.
4. Who were the following persons and when did they live?—Chaucer, Raleigh, Marlborough, Warren Hastings.

DICTION.

His life was toilsome and sedentary. The variable temperature as well as the unwholesome vapours of a city crowded with manufactories produced in him symptoms which alarmed his friends. The chief of these were debility and a capricious wavering of the appetite. He therefore obeyed the salutary warnings of his physician, and releasing himself from accumulating cares, he repaired to his native province with its unpolluted air and limpid sources of water.

A FEW HINTS TO CANDIDATES PREPARING FOR THE JUNIOR PUBLIC EXAMINATION.

The subjects pertaining to Section III, on which questions will be asked, may be classed under four heads:—

I. Parsing. In naming the parts of speech, the candidate is not bound to use the words employed by the author of any particular Grammar. Any words used in other grammars will equally satisfy the Examiners. For instance, if in parsing the sentence "Seeing is believing," he were to call the first or the last word a participle, this would be marked as a blunder, but he would be free to call it a participial noun, or an infinitive, or by any other name which showed that he did not confound it with a participle. In like manner there are certain words which appear in some Grammars as adverbs, and in others as conjunctions; here also it would not be imputed as a fault to the candidate if he followed one Grammar rather than another; but it will save the student's time to understand that, neither in parsing, nor in answering any other question, will it be necessary for him to know the classes of adjectives, or adverbs, or conjunctions, as given in certain Grammars: the ordinary divisions of the noun-substantive and the verb are the only ones which will be required of him. With regard to the moods, it would save a student much trouble if he treated the so-called conditional and subjunctive moods as merely artificial uses of the potential; but if he has been taught otherwise, he can answer as he has been taught without fear of its being imputed to him as a fault. The errors against which he has to guard under the head of parsing will appear in the following examples:—When *like* is used as an adverb, and he calls it an adjective, when *down* is used as a preposition, and he calls it an adverb, or when he treats such words as *that*, *far*, *half*, *more*, &c., otherwise than he is warranted by the sentence in which any one of them occurs, or when he confounds the past tense with the past participle, or calls a neuter verb active, or *vice versa*, or when he fails to detect what part of a sentence governs the rest.

II. A knowledge of the meaning of words. It is obvious that no student can be entitled to pass with credit in the English section if he is unable to give a fair explanation of words in common use, or of such as are found in the Reading Books, or in authors suited to his age. The endeavour of the Examiners has been to select a number of words, not with the hope that they will all be answered, but with the expectation that every diligent student will be able to explain a fair proportion of them. The Examiners have met with answers which showed that the Candidate had confounded *ambiguous* with *ambitious* or *ambitious*, *elicit* with *illicit*, *deprecate* with *depreciate*, *valid* with *invalid*, *paramount* with *paramour*. To *eliminate* was interpreted to take the *elements* of; to *invalidate* to *make strong*; to *denounce* to *renounce*; to *enervate* to *refresh the nerves*; to *implicate* to *implicate*. A hundred other instances might be added, but these will suffice to put the student on his guard. It is reported that some candidates have wasted their time in reading up the dictionary, as a preparation for answering questions of this class. The only preparation that is of the least value, for such a purpose, is to mark carefully what is heard or read, and to acquire a definite conception of its meaning. Without attention and thought, nothing can be learnt that is worth the learning.

III. Etymology. It would be unfair to expect that the boys who come from schools where neither French nor Latin is taught should be able to give the derivations of English words which are borrowed from those languages. Nevertheless, as there is more than one manual of etymology intended expressly for the use of schools of the above description, and as this branch of knowledge ought to be encouraged, the Examiners will set questions which involve a knowledge of a few of the most obvious Latin roots from which English words in everyday use are derived. On that part of Etymology which traces the connection between one English word and another, it is reasonable to expect that candidates from all schools should be able to give satisfactory answers.

IV. Analysis. Many schemes are published in books of education according to which the learner is expected to place in certain squares, arranged for the purpose, the extensions or limitations of the principal subject, or of the predicate, or of the object; and other contrivances are adopted in order to separate the principal subject from its subordinate sentences, or to distinguish subordinate from co-ordinate clauses. The Examiners, in setting sentences for analysis, require *no performances of this kind*. Their only drift is to ascertain whether the candidate can distinguish the subject from the predicate, or, in other words, the thing of which the writer or speaker is thinking from that which he has to tell us concerning it. If this is done in two or three instances, the Examiners will give as full marks for this species of answers as for any of a more elaborate kind.

The advice of the Examiners on the general preparation of this and all other subjects, is one that every teacher has to repeat continually to his pupils. It is laziness not to exercise your memory; it is worse laziness to burthen your memory, in order to save yourself the trouble of understanding and reflecting on what you learn. Half the battle in an examination is courage, and courage never fails him who has mastered his subjects by thought.

Many candidates write out their work roughly at first, and afterwards make a fair copy to show up. Now, though the Examiners by no means undervalue neatness and accuracy, they strongly advise candidates to write so carefully and well at first that no copying may be necessary. Mistakes frequently occur in this copying, and so the work shown up, though neat, is inaccurate; moreover, candidates put off the writing-out so long that in Mathematical papers they have only time to give the answer, for which they get no marks at all (see Form E. § 3), whereas the full work, however rough might get some marks, if shown up.

In writing out Euclid, references to preceding propositions are not necessary, unless they are especially asked for, and even in that case the *enunciation* of the proposition will be sufficient, its *number* will never be required.

NATURAL SCIENCE.

It is extremely desirable that candidates for examination in Chemistry and Physics should, if possible, be taught the subjects experimentally; in schools where it is not convenient to make arrangements for each individual student to go through a course of experimental exercises in Practical Chemistry or Elementary Physics, in which the students personally make the experiments, courses of lessons which are illustrated experimentally by the teacher should at least be instituted.

In the case of Geology, Mineralogy, and Botany, the instruction should also be made practical as far as possible; pupils should be allowed to handle and examine specimens; they should also be given specimens of fossils, rocks, minerals, and plants, to describe and name; they should also be encouraged to gather specimens for themselves, and to form small collections and herbaria illustrating the local geology, mineralogy and botany of the districts in which they live. It is not in all cases convenient to place Physiological specimens and preparations before school pupils, but much assistance may be given to them by means of models and diagrams.

A knowledge of Natural Science gained from books alone is but of extremely little value; instruction so imparted must necessarily partake more or less of the nature of "cramming."

Sets of Chemical apparatus and tests, as well as collections of Fossils, Rocks, and Minerals, prepared expressly for school use, can now be obtained at extremely reasonable prices.

Sets of Chemical and Physical apparatus specially prepared for the use of Teachers and of Students, can be obtained from the following amongst others:—

Messrs. Aug. Bel & Co., 34 Maiden Lane, London, W.C.

Messrs. J. J. Griffin & Sons, Garrick Street, London, W.C.

Collections of Rocks, Fossils, Minerals, &c., can be obtained from—

Mr. Hume, Pharmaceutist, 296, George-street, Sydney.

G. EAGAR,  
Auditor.

P. J. CLARK,  
Accountant.

1882.

NEW SOUTH WALES.

## UNIVERSITY OF SYDNEY.

(BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vict. No. 31, sec. 21.

## BY-LAWS OF THE UNIVERSITY.

ALL By-laws heretofore passed by the Senate and now in force are hereby repealed, and, in lieu thereof, the following By-laws shall be and are hereby declared to be the By-laws under which the University of Sydney shall henceforth be governed. Provided always that nothing herein contained shall be deemed to revive any By-law previously repealed, or to prejudice any matter already done or commenced under any By-law hitherto in force. Provided also that undergraduates who matriculated before June, 1882, shall complete their course according to By-laws in force up to that date, with the exception that their Annual Examinations shall take place in Lent Term.\*

## CHANCELLOR.

1. The elevation to the office of Chancellor shall take place at a duly convened meeting of the Senate to be held in Lent Term.
2. The Chancellor shall be elected for a period of three years (except as hereinafter provided) to be computed from the date of election, but shall be eligible for re-election.
3. In the event of the office of Chancellor becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the election of a successor shall be proceeded with at the next ensuing regular meeting of the Senate, and the Chancellor so appointed shall hold office until the Lent Term next after the expiration of three years from the date of such election.

## VICE-CHANCELLOR.

4. The election of the Vice-Chancellor shall take place annually at a duly-convened meeting of the Senate to be held in Lent Term, except as in cases otherwise provided for by the Act of Incorporation.

## SENATE.

*Meetings and Rules of Procedure.*

5. The Senate shall meet on the first Wednesday in every month, or on the nearest convenient day, should such first Wednesday be a public holiday, and may adjourn from time to time to conclude any unfinished business.
6. At any time in the interval between such monthly meetings it shall be competent for the Chancellor, or, in his absence, the Vice-Chancellor, in any case of emergency, to call a special meeting of the Senate, to be held as soon as conveniently may be, for the consideration of any business which he may wish to submit to them.
7. Upon the written requisition of any three members, the Chancellor, or, in his absence, the Vice-Chancellor, or, in the absence of both, the Registrar shall convene a special meeting of the Senate, to be held as soon as conveniently may be after the expiration of seven days from the receipt of such requisition.
8. Except in any case of emergency as aforesaid, no motion initiating a subject for discussion shall be made, but in pursuance of notice given at the previous monthly meeting, and every such notice shall be entered in a book to be kept by the Registrar for that purpose.
9. The Registrar shall issue to each member of the Senate a summons with a written specification of the various matters to be considered at the next meeting of the Senate, whether such meeting be an ordinary or a special one, and such summons, except in any case of emergency as aforesaid, shall be issued at least three days previously to such meeting.
10. In the event of a quorum of the Senate not being present at any monthly or other meeting within half-an-hour after the hour appointed, the members then present may appoint any convenient future day, of which at least three days' notice shall be given by the Registrar in the usual manner.

11.

\* Students who matriculated before June, 1882, are referred to the Calendar for 1881-82 for the By-laws under which they will complete their Academic Course.

11. All the proceedings of the Senate shall be entered in a journal, and at the opening of each meeting the minutes of the preceding meeting shall be read and confirmed, and the signature of the Chairman then presiding shall be attached thereto.

12. If any Fellow shall, without leave from the Senate be absent from its meetings for six consecutive calendar months, his fellowship shall *ipso facto* become vacant.

#### ELECTION TO VACANCIES.

13. At the first meeting of the Senate after the occurrence of a vacancy among the Fellows, a day shall be fixed for a Convocation for the election of a successor, such day to be within sixty days from the date of such Senate Meeting, and to be announced at least thirty days before such Convocation, by notice posted at the University and by advertisement in one or more of the daily newspapers. Due notice shall also be given of the day on which a ballot shall be taken, should such be required. Provided that no Convocation shall be held in the month of January.

14. No person shall be eligible for election to fill any vacancy among the Fellows unless his name shall have been communicated to the Registrar by some legally\* qualified voter at least ten clear days before the time of Convocation; and it shall be the duty of that officer to cause the name of such person and the fact of his candidature to be forthwith advertised in one or more of the daily newspapers published in Sydney, and to be posted in a conspicuous place in the University for eight clear days at least before such Convocation.

15. The Convocation for the Election of a Fellow shall be held in the University and shall be presided over in the same manner as if it were a meeting of the Senate. Every candidate submitted for election must be proposed and seconded by legally qualified voters. If one candidate only or one only for each vacancy be so proposed and seconded, then such candidate or candidates shall be declared by the President to be duly elected. But if more candidates are proposed and seconded than there are vacancies in the Senate to be filled at such Convocation, a show of hands shall be taken, and unless a ballot be demanded by at least two members of Convocation then present, the President shall declare the candidate or candidates in whose favour there shall be the greatest show of hands to be duly elected. Should a ballot be demanded, it shall be conducted in the following manner:—

- (A.) The voters then present shall choose two or more Members of Convocation to act as scrutineers.
- (B.) The ballot shall not be held earlier than one week from the day of nomination at Convocation, and shall be notified by notice posted in the University and by advertisement in one or more of the daily newspapers.
- (C.) The ballot shall commence at 10 a.m. and close at 2 p.m. on the day appointed.
- (D.) At the expiration of the time allotted for the ballot the scrutineers shall proceed to the examination of the voting papers, and shall report the result to the President, who shall then declare the candidate or candidates having the majority of votes to be duly elected to the vacant seat or seats in the Senate.
- (E.) In the event of an equality of votes, the election shall be decided by the casting vote of the President.

16. Before the time fixed for the Convocation for the Election of a Fellow, the Registrar shall prepare for the President's use a complete list of all persons entitled to vote under the provisions of the law, and a copy of such list shall be posted in a conspicuous place in the University for two days at least before the time of Convocation.

17. None but legally qualified voters shall be allowed to be present during the taking of a ballot.

#### EX OFFICIO MEMBERS.

(24 Victoria No. 13.)

18. The Professor of Classics, the Professor of Mathematics, and the Professor of Experimental Physics shall be *ex officio* members of the Senate under the the provisions of the "Sydney University Incorporation Act Amendment Act of 1861."

19. The present Professor of Chemistry and Mineralogy shall be an *ex officio* member of the Senate under the Act of 1861.

#### SUPERIOR OFFICERS.

(24 Victoria No. 13.)

20. The Registrar and the Solicitor to the University are hereby declared to be Superior Officers of the University entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

21. The present Auditor of the University, the Honorable Geoffrey Eagar, is hereby declared to be a Superior Officer of the University entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

#### REGISTRAR.

22. The Registrar shall keep all necessary records of the Proceedings of the University, conduct all necessary correspondence, and keep such Registers and Books of Account as may be required.

23. All fees, fines, or other sums received by the Registrar in his capacity as such shall be paid into the Bank of the University, in order that the same may be applied, accounted for, and audited in such manner as the Senate may from time to time appoint.

SEAL

\* The legally qualified voters are Fellows of the Senate for the time being, Professors, Public Teachers and Examiners in the Schools of the University, Principals of Incorporated Colleges within the University, Superior Officers of the University declared to be such by By-law, Graduates who shall have taken the Degrees of M.A., LL.D., or M.D. in this University, and Bachelors of Arts of three years' standing.

## SEAL OF THE UNIVERSITY.

24. The Seal of the University shall be placed in the charge of the Chancellor, or Vice-Chancellor, and Registrar, and shall not be affixed to any document except by order of the Senate.

## FACULTIES.

25. There shall be four Faculties in the University, viz. :—

1. Arts.
2. Law.
3. Medicine.
4. Science.

## LIMITATION OF THE TITLE OF PROFESSOR.

26. The title of Professor shall be distinctive of those Public Teachers of the University upon whom the Senate shall have conferred that title, and no person in or belonging to the University, or any College within it, shall be recognized as Professor without the express authority of the Senate.

## PROCTORIAL BOARD.

27. The Chancellor, the Vice-Chancellor, and the Professors in the four several Faculties shall form a Board, to be called the "Proctorial Board," to which shall be confided the duty of enforcing the observance of order on the part of the undergraduates of the University. And this Board shall make such regulations as it may deem expedient for the maintenance of discipline amongst the undergraduates, and shall have the power of inflicting or authorizing to be inflicted all such academic punishments as are sanctioned by the present usage of British Universities, including fines to an amount not exceeding five pounds (£5) for any one offence: Provided, however, that the Board shall not proceed to the expulsion of any undergraduate or his suspension for a period exceeding one Term without the express authority of the Senate.

28. No question shall be decided at any meeting of this Board unless three members at the least shall be present.

29. At meetings of this Board the Chair shall be occupied by the Chancellor, or in his absence by the Vice-Chancellor, or in the absence of both by the Dean of the Faculty of Arts; and in the event of an equality of votes at any meeting, the Chairman shall have a casting vote. At meetings of this Board the Registrar of the University shall attend and record the proceedings, and it shall be his duty to collect all fines imposed by or under the authority of the Board. It shall be the duty of the Registrar to convene the Board on the requisition of any one of its members, at such time within seven days from the date of the requisition as may be directed by the Chancellor, or in his absence by the Vice-Chancellor, on whom it shall be incumbent to give such direction on the Registrar's application. In the event of the absence of the Chancellor and Vice-Chancellor, the time of meeting shall be fixed by the Dean of the Faculty of Arts.

## BOARD OF STUDIES.

30. The Chancellor, the Vice-Chancellor, and the Professors of the four several Faculties shall form a Board, to be called the Board of Studies, for the consideration of all general questions relating to the studies of the University which may be referred to them by the Senate, and shall be subject to like regulations with the Proctorial Board in respect of its meetings.

## DEANS OF FACULTIES.

31. A Dean for each of the Faculties in the University shall be appointed by the Senate from time to time for a term of three years.

32. In the event of the office of Dean becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the appointment of a successor shall be proceeded with at the next ensuing regular meeting of the Senate; and the Dean so appointed shall hold office until the first regular meeting of the Senate in the Term next after the expiration of three years from the date of such appointment.

## TERMS.

33. The Academic Year shall contain three Terms, that is to say :—

*Lent Term.*—Commencing on the first Monday in March, and terminating with the fourth Saturday in May.

*Trinity Term.*—Commencing on the second Monday in June, and terminating with the first Saturday in September, except when the second Monday in June falls on the 8th, 9th, or 10th of the month, when Trinity Term shall commence on the third Monday in the month.

*Michaelmas Term.*—Commencing on the second Monday in October, and terminating with the third Saturday in December.

## LECTURES.

34. Lectures shall commence on the first day of Term, except in Lent Term, in which they shall commence on the fourth Monday in March.

35. Lectures of an hour each shall be given by the Professors and other teachers, at such times and in such order as the Senate may from time to time direct.

36. Before the admission of a student to any course of Lectures he shall pay to the Registrar of the University the fee appointed by the Senate.

37. Full and complete tables of Lectures and subjects of Examinations shall be printed annually in the Calendar and posted at the University from time to time.

38. Any undergraduate not holding a scholarship in the University, nor being a Member of a College established under the provision of the Act 18 Victoria No. 37, may be exempted from attendance upon any or all of the prescribed Lectures, upon producing evidence which shall satisfy the Senate that there are sufficient reasons for such exemption: Provided that no such exemption shall be granted for more than one year at any one time.

39. No such exemption shall be granted until the Examiners shall have specially certified to the Senate that the abilities and attainments of the applicant are such as to enable him in their opinion to keep up with the usual course of study at the University without attendance upon Lectures. Undergraduates admitted

admitted *ad eundem statum* and who are not required to pass the Matriculation Examination, shall nevertheless be required to pass a Special Examination, to be certified by the Examiners as above, before obtaining exemption from attendance upon Lectures.

#### YEARLY EXAMINATIONS.

40. In the Faculties of Arts, Law, and Science, Yearly Examinations shall be held during the first fortnight of Lent Term, and no undergraduate shall absent himself therefrom except under medical certificate. In the Faculty of Medicine such Class Examinations shall be held as shall seem to the Senate advisable on the report of the Dean of that Faculty.

41. No undergraduate not exempted under By-law 38 from attendance upon Lectures shall be admitted to these examinations who, without sufficient cause, shall have absented himself more than three times during any one term from any prescribed course of Lectures.

42. Such undergraduates as absent themselves from examinations except under medical certificate, or fail to pass them in a satisfactory manner, shall at the discretion of the Senate on the Report of the Examiners be required to keep additional terms before proceeding to any degree.

43. Every undergraduate exempted from attendance upon Lectures under By-law 38 shall, before being admitted to any Yearly Examination, pay to the Registrar a fee of two pounds. If any such candidate fail to pass the examination, the fee shall not be returned to him, but he may be admitted again to examination without the payment of any additional fee.

44. Undergraduates who shall have passed the Yearly Examinations shall receive certificates to that effect, signed by the Dean of the Faculty in which he is pursuing his studies and by the Registrar.

45. At each examination honour papers shall be set where necessary, and a list of the honour subjects shall be annually published in the Calendar.

46. The names of those candidates who obtain honours shall be arranged in order of merit.

47. Prize books, stamped with the University arms, shall be given to each student who shall be placed in the first class in honours at Examinations, other than those for Degrees.

48. Examiners shall be appointed from time to time by the Senate to conduct the examinations provided for under these By-laws.

#### ADMISSION AD EUNDEM STATUM.

49. Undergraduates of other Universities may, at the discretion of the Senate, be admitted *ad eundem statum* in this University without examination: Provided always, that they shall give to the Registrar, to be submitted to the Senate, sufficient evidence of their alleged *status*, and of good conduct.

#### SCHOLARSHIPS.

50. Scholarships shall be awarded after examination as the Senate may from time to time appoint.

51. No Scholarship shall be awarded except to such candidates as exhibit a degree of proficiency which shall be satisfactory to the Examiners.

52. The Examination for Scholarships shall be concurrent with the Matriculation and Yearly Examinations, additional papers and questions being set when required.

#### FACULTY OF ARTS.

##### *Board of Examiners.*

53. The Professors in the Faculty of Arts, together with such other persons as may from time to time be appointed by the Senate, shall form a Board of Examiners for conducting the Examinations in the Faculty of Arts, and of this Board the Dean of the Faculty, or in his absence the Professor next in seniority, shall be Chairman.

54. The Board of Examiners shall, from time to time, and in accordance with the provisions of the By-laws for the time being, frame rules and appoint times and places for the several examinations in the Faculty of Arts.

55. At the conclusion of each Examination the Board shall transmit to the Senate a Report of the result, signed by the Chairman and by at least two other members.

#### MATRICULATION.

56. Candidates for Matriculation must make application to the Registrar before the commencement of Lent Term.

57. The Matriculation Examination shall take place at the commencement of Lent Term, but the Examiners in special cases, with the sanction of the Chancellor or Vice-Chancellor, are authorized to hold such examinations at such other times as may be deemed expedient.

58. The examination shall be conducted by means of written or printed papers; but the Examiners shall not be precluded from putting *vivâ voce* questions.

59. The names of all candidates who have passed the Matriculation Examination shall be arranged and published in such order as the Board of Examiners shall recommend to the Senate.

60. Students who shall have passed the Matriculation Examination and shall have paid a fee of two pounds to the Registrar may be admitted by the Senate as Members of the University.

61. The Examination for Matriculation shall be in the following subjects:—

English Grammar and Composition.

Latin.

Arithmetic.

Algebra to Simple Equations, inclusive.

Geometry, Euclid, Book I.

And one of the following:—

Greek.

French.

German.

Elementary Chemistry.

Elementary Physics.

BACHELOR

## BACHELOR OF ARTS.

62. Candidates for the Degree of Bachelor of Arts shall during their first year attend the University lectures on the following subjects :—

Latin.  
Mathematics.  
Elementary Chemistry and the Elements of Natural Philosophy.

And one of the three following languages :—

Greek.  
French.  
German.

63. Candidates for the Degree of Bachelor of Arts shall during their second year attend the University lectures on the following subjects :—

Latin and Ancient History.  
Mathematics.  
And two of the three following languages :—

Greek.  
French.  
German.

No student of the second year will be allowed to attend the lectures upon Greek, French, or German, unless he shall have passed a previous examination in these subjects, or shall satisfy the Professor or Lecturer that he is qualified to profit by such lectures.

64. The undergraduates of the first and second years shall be examined in the subjects of the undergraduate course upon which lectures have been given during the year, and shall be required to pass in such proportion thereof as the Senate shall from time to time determine.

65. Candidates for the Degree of B.A. shall during their third year attend Lectures upon the following subjects :—

1. Latin or Greek Language and Literature.
2. Mathematics (pure and mixed).
3. French or German Language and Literature.
4. Mental Philosophy and Logic, or Physical Geography and Geology.
5. Zoology and Botany.

66. The Examination for the Degree of B.A. shall take place once a year, at the beginning of Lent Term.

67. No candidate shall be admitted to this examination unless he produce a certificate from the Dean of the Faculty of Arts that he is of nine Terms' standing, and that he has passed all the examinations required since his admission to the University.

68. The fee for the Degree of B.A. shall be three pounds. No candidate shall be admitted to the examination unless he have previously paid his fee to the Registrar. If a candidate fail to pass the examination, the fee shall not be returned to him ; but he shall be admissible to any subsequent examination for the same degree without the payment of an additional fee.

69. The examination shall be conducted in the first instance by means of printed papers, and at the termination of such examination each candidate shall undergo a *vivâ voce* examination if the Examiners think fit.

70. To obtain the Degree of B.A. candidates shall pass satisfactory examinations in the following subjects :—

- I.—Latin or Greek Language and Literature.
- II.—Mathematics (pure and mixed).
- III.—French or German Language and Literature.

71. Students proceeding to the Degree of B.A. who have passed the First Year Examination, and who have therat been placed in the honour list both in Classics and in Mathematics may elect to attend lectures during their second year in one of these subjects only, and if they again obtain honours in that subject at their Second Year Examination, they shall be deemed to have passed that examination.

72. Students of the Third Year who have obtained honours in either Classics or Mathematics at both their First and Second Year Examinations, may elect to attend lectures during their third year in that subject only, and if they again obtain honours in that subject at their B.A. Examination, they shall be deemed to have passed for their Degree.

73. The Candidate for Honours, who shall have most distinguished himself at the B.A. Examination in Classics or in Mathematics, shall, if he possess sufficient merit, receive a gold medal or a prize to the value of £10.

## MASTER OF ARTS.

74. There shall be a Yearly Examination for the Degree of M.A. during Lent Term, or at such other times as the Examiners, with the sanction of the Chancellor or Vice-Chancellor, may appoint.

75. Every candidate for this Degree must have previously obtained the Degree of B.A., and two years must have elapsed since the time of his examination for such Degree. He will also be required to furnish evidence of having completed his twenty-first year.

76. The fee for the Degree of M.A. shall be five pounds. No candidate shall be admitted to the examinations unless he have previously paid this fee to the Registrar. If a candidate fail to pass the Examination, the fee shall not be returned to him, but he shall be admissible to any subsequent examination for the same Degree without payment of an additional fee.

77. Candidates for the Degree of M.A. shall elect to be examined in one or more of the following branches of knowledge :—

1. Classical Philosophy and History.
2. Mathematics and Natural Philosophy.
3. Logic, Moral, Mental, and Political Philosophy.

The candidate most distinguished in each branch at the examination shall, if he possess sufficient merit, receive a gold medal.

78. The Senate may at its discretion admit to examination for the Degree of Master of Arts any person who shall have obtained at least two years previously the Degree of Bachelor of Arts or equivalent first Degree in Arts, in any other University approved by the Senate. Every candidate for admission under this By-law must make application in writing to the Registrar and supply satisfactory evidence of his qualification as aforesaid, and that he is a person of good fame and character, and upon the approval of his application shall pay to the Registrar a fee of two pounds for the entry of his name in the University books, in addition to the prescribed fee for his Degree. Every candidate before he is admitted to his Degree shall be required to furnish evidence of having completed his twenty-first year.

#### FACULTY OF LAWS.

##### *Bachelor of Laws.*

79. Until Professorships are established there shall be a Board of Examiners appointed by the Senate to test the qualifications of candidates desirous of obtaining a Degree in Laws. The examination for the Degree of LL.B. shall take place at such times as the Examiners with the sanction of the Chancellor or Vice-Chancellor may appoint.

80. Every candidate for the Degree of LL.B. shall lodge with the Registrar satisfactory evidence of having taken the Degree of B.A., or some equivalent Degree, at least one year previously in this or in some other University approved by the Senate. Every such candidate shall also furnish satisfactory evidence that he is a person of good fame and character, and that he has completed his twenty-fifth year.

81. The fee for the Degree of LL.B. shall be ten pounds. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar. If the candidate fail to pass this examination, the fee shall not be returned to him, but he shall be admissible to any subsequent examination for the same Degree without the payment of an additional fee.

82. Candidates for the Degree of LL.B. shall be examined in the following subjects:—

Roman, Civil, and International Law.  
Constitutional History and Constitutional Law of England.  
General Law of England.

##### *Doctor of Laws.*

83. The Degree of LL.D. shall not be conferred until after the expiration of two academic years from the granting of the LL.B. Degree. Every candidate shall be required to pass an examination in the Civil Law in the original Latin with especial reference to such particular works as the Examiners may from time to time determine. The fee for the Degree of LL.D. shall be ten pounds.

84. The Senate shall have power to admit to examination for the Degree of LL.D. any person who shall have obtained at least two years previously the Degree of LL.B. at any other University approved by the Senate, and who shall have completed his twenty-seventh year, and shall also have obtained the Degree of Bachelor of Arts or an equivalent first Degree in Arts, at any such University, or shall pass an examination similar to that prescribed for the Degree of Bachelor of Arts in this University. Every candidate for admission under this By-law must make application in writing to the Registrar and supply satisfactory evidence of his qualifications as aforesaid, and that he is a person of good fame and character, and upon the approval of his application he shall pay to the Registrar a fee of two pounds for the entry of his name in the University books, in addition to the prescribed fee for his Degree.

#### FACULTY OF MEDICINE.

85. Fellows of the Senate who are legally qualified members of the medical profession, the Professors and Lecturers connected with the Medical School of the University, and the Examiners in Medicine appointed by the Senate from time to time shall constitute the Faculty of Medicine.

86. The Dean shall exercise a general superintendence over the administrative business connected with the Faculty, and shall convene meetings of the Faculty when required, and act as Chairman at all such meetings, but in his absence the members of the Faculty present shall elect a Chairman. The Dean or Chairman shall transmit all resolutions of the Faculty to the Senate.

87. The Faculty shall meet from time to time for the purpose of considering and reporting to the Senate such subjects as have relation to the studies, lectures, examinations, and Degrees in Medicine, and such questions as may be referred to them by the Senate.

88. The Academic Year in Medicine shall comprise two sessions, the one including Lent and Trinity Terms, the other Michaelmas Term.

89. Lectures shall be delivered on subjects directed by the Senate, and shall consist either of a hundred lectures of one hour each, to be called a long course, or of fifty lectures of one hour each, to be called a short course, and, as far as possible, the long course shall be delivered during the long session, and the short course of lectures during the short session.

90. Notwithstanding the above provision as to lectures during the various terms, dissections may be conducted during the months from May to October inclusive.

91. Every undergraduate in Medicine must have passed the Matriculation Examination and during his first year must have pursued the course of studies provided for Undergraduates in Arts, and have passed satisfactorily the examinations in the subjects of lectures before proceeding any further. Graduates in Arts are exempted from the provisions of this by-law.

92. During the second year, the subjects of lectures to be attended shall be:—

General and Descriptive Anatomy—Lent and Trinity Terms.  
Regional and Surgical Anatomy       "       "  
Chemistry       ...       ...       "       "  
Materia Medica and Therapeutics—Trinity and Michaelmas Terms.  
Zoology—Michaelmas Term.  
Demonstrations in Comparative Anatomy—Michaelmas Term.  
Botany (Junior)...       ...       ...       "       "  
Practical Surgery at an Hospital (including  
Clinical Lectures) ...       ...       "       "  
Dissections from May to October.

93. During the third year the subjects of lectures to be attended shall be :—

General and Descriptive Anatomy—Lent and Trinity Terms.  
 Regional and Surgical Anatomy       "       "  
 Physiology       ...       ...       "       "  
 Surgery       ...       ...       "       "  
 Practical Physiology       ...       "       "  
 Comparative Anatomy—Michaelmas Term.  
 Botany (Senior)       "  
 Practical Chemistry       "  
 Dissections from May to October.

The undergraduate shall also produce certificates of having attended the *Surgical Practice* of a recognized Hospital during twelve (12) months, and of having attended the *Surgical Practice of the Out-door Patients of an Hospital* during three (3) months, and of *Practical Pharmacy* during three (3) months.

94. During the fourth year the subjects of lectures to be attended shall be :—

Physiology—Lent and Trinity Terms.  
 Medicine (Theory and Practice)—Lent and Trinity Terms.  
 Surgery and Operative Surgery       "       "  
 Midwifery and Diseases of Women       "       "  
 Pathology—Trinity and Michaelmas Terms.  
 Clinical Surgery (not less than fifty lectures)→Lent and Trinity Terms.  
 Regional Anatomy (fifty lectures)       "       "

The undergraduate shall also produce certificates of having attended the *Medical Practice* of a recognized Hospital during twelve (12) months, of having attended the *Medical Practice of the Out-door Patients of a Hospital* during three (3) months, and of competency to perform vaccination.

95. During the fifth year the subjects of lectures to be attended shall be :—

Midwifery and Diseases of Women—Lent and Trinity Terms.  
 Practice of Medicine       "       "  
 Pathology and Pathological Anatomy       "       "  
 Forensic Medicine (fifty lectures)       "       "  
 Clinical Medicine (fifty lectures)       "       "  
 Operative Surgery (at least twenty-five lectures)       "       "  
 Clinical Lectures on Diseases of Children—Michaelmas Term.  
 Clinical Ophthalmic Instruction—Three months.

During this year the undergraduate will be required to attend to *Practical Midwifery* and to produce a certificate that he has personally attended at least twenty cases.

He shall also produce certificates of attendance in a Hospital for the Insane for three months, and of attendance upon not less than twelve clinical lectures on *Psychological Medicine*; also of *General Hospital Practice* for nine months.

96. There shall be four Degrees granted in the Faculty of Medicine—viz., Bachelor of Medicine (M.B.), Bachelor of Surgery (Ch. B.), Doctor of Medicine (M.D.), and Master of Surgery (Ch.M.)

97. Candidates for the Degree of M.B. or Ch.B. shall be required to have completed the first year in the Arts Classes, and to pass two Professional Examinations.

98. The first Professional Examination shall take place at the end of the third year, and shall include the following subjects :—

Anatomy.  
 Practical Anatomy.  
 Chemistry.  
 Practical Chemistry.  
 Botany.  
 Materia Medica and Practical Pharmacy.  
 Elementary Physiology.  
 Comparative Anatomy.

99. Before admission to the Final Examination for the Degree of M.B. or Ch.B., the candidate shall furnish a declaration, in his own handwriting, that he has completed his twenty-first year, and also a certificate as to his moral character, signed by two competent persons.

100. At the several Professional Examinations, the candidate who shall have most distinguished himself for honours shall, if he possess sufficient merit, receive a gold medal or a prize of the value of ten pounds.

101. The Second or Final Examination shall not take place until the completion of the fifth year of studies, and shall include :—

Physiology.  
 Pathology.  
 Surgery (including Operative Surgery).  
 Medicine (including Psychological Medicine).  
 Midwifery and Diseases of Women and Children.  
 Forensic Medicine.  
 Hygiene.  
 Clinical Medicine.  
 Clinical Surgery.

102. In the two Professional Examinations the candidate will be required to give proof of his knowledge of Botany by the examination and dissection of specimens; of Chemistry, by practical analysis; of Pathology and Physiology, by reference to specimens, &c., &c.; of Surgery, by performing operations on the dead subject, if required; and of a knowledge of Clinical Medicine and Clinical Surgery, by the examination of patients at the bedside.

103. Candidates who shall have passed to the satisfaction of the Faculty in all the subjects of the above examinations shall be classified in order of merit, and shall be recommended to the Senate for admission to the Degrees of Bachelor of Medicine (M.B.), and Bachelor of Surgery (Ch.B.), or to either of such Degrees.

104. If any candidate at these examinations be found unqualified, he shall not be again admitted to examination until he has studied another year the subjects in which he has failed to pass.

105. Accredited certificates of attendance and of examination from other Universities and Schools of Medicine recognized by the University of Sydney may, on the report of the Dean of the Faculty, be accepted by the Senate as proof *pro tanto* of the attendance on lectures required by these By-laws. But in all such cases a Degree in Arts, or some similar literary or scientific certificate satisfactory to the Senate, on the aforesaid report, shall be required.

106. Bachelors of Medicine and Bachelors of Surgery of this University shall not possess any right to assume the title of Doctor.

107. The Degree of Doctor of Medicine (M.D.) shall not be conferred until after the expiration of two academic years from the granting of the M.B. Degree.

108. The candidate must produce evidence that after having obtained the Degree of M.B. he has spent two years in hospital practice, or three years in practice either private or in the public service.

109. The candidate shall be required to pass the following examination, which shall be conducted by means of printed papers and *vivâ voce* interrogations, viz. :—

- (a) Logic and Moral Philosophy, or Medical Psychology (including the Physiology of the Brain and Nervous System, Mental Pathology, Mental Therapeutics, and Mental Hygiene).
- (b) Medicine (including State Medicine).
- (c) Commentary on a case (to be furnished to the candidate) in Medicine or Obstetric Medicine.
- (d) Examination and report on cases of patients under treatment in the wards of a hospital.
- (e) *Vivâ voce* interrogations, and demonstrations from specimens and preparations.

110. Candidates who shall pass the examinations satisfactorily shall be classified in order of merit, and may, on the report of the Dean of the Faculty, be admitted by the Senate to the Degree of M.D.

111. The Degree of Master of Surgery shall not be conferred until after the expiration of two academic years from the granting of the Degree of Bachelor of Surgery.

112. The candidate must produce evidence that after having obtained the Degree of Bachelor of Surgery he has attended—

- (a) To Clinical or Practical Surgery during two years in a recognized hospital;
- (b) Or of having been engaged during three years in the practice of his profession.

113. The candidate must pass an examination in the following subjects :—

1. Logic and Moral Philosophy.
2. Surgery.
3. Commentary on a case in Surgery.
4. Operative Surgery.
5. Surgical Anatomy (including demonstration on the dead subject).
6. Pathological Anatomy.
7. Clinical Surgery.

Candidates who have previously passed the examination in Logic and Moral Philosophy, Graduates in Arts, and Doctors of Medicine shall be exempted from examination in these subjects.

114. Candidates who shall have passed in all the subjects of this examination shall be classified in order of merit, and may, on the report of the Dean of the Faculty, be admitted by the Senate to the Degree of Master of Surgery.

115. The Senate shall have power to admit to the examination for the Degree of M.D. or Ch.M. persons who shall have obtained (after examination) the Degree of M.B. or Ch.B. respectively, or some corresponding or equivalent first Degree in Medicine at a University recognized by the Senate. Provided that at least three years shall have elapsed since the Degree of M.B. or Ch.B. was obtained, and that the condition contained in By-laws 107 or 111 shall have been complied with. Provided also that proof shall be supplied by the candidate satisfactorily to the Medical Faculty, that the attendance on lectures and other conditions prior to the obtaining of the Degree of M.B. or Ch.B., shall be equivalent to those required for the Degree of M.B. or Ch.B. in this University. When such evidence cannot be supplied, the candidate shall attend lectures either in this University or in some recognized University or School of Medicine, in the required subjects, and shall pass a satisfactory examination in them before admission to the examination for the Degree of M.D. or Ch.M.

Every candidate for admission under this By-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualifications as aforesaid, and also that he is a person of good fame and character. Upon the approval of his application, he shall pay to the Registrar a fee of two pounds for the entry of his name in the University Books in addition to the prescribed fee for his Degree.

116. The fee for the Degrees of M.B., Ch.B., M.D., and Ch.M., shall be Ten Pounds respectively.

117. The above fees shall be paid to the Registrar previous to the examination, and shall not in any case be returned to the candidate.

118. Candidates who fail to pass an examination shall be allowed to present themselves for one further similar examination without fee, but for each subsequent examination that may be required shall pay the sum of five pounds.

#### FACULTY OF SCIENCE.

119. The Professors in the Faculty of Science, together with such other persons as may from time to time be appointed by the Senate, shall form a Board of Examiners for conducting the examinations in the Faculty of Science, and of this Board the Dean of the Faculty, or in his absence the Professor next in seniority, shall be Chairman.

120. The Board of Examiners shall, from time to time, and in accordance with the provisions of the By-laws for the time being, frame rules and appoint times and places for the several examinations in the Faculty of Science.

121. At the conclusion of each examination the Board shall transmit to the Senate a report of the result signed by the Chairman and by at least two other members.

122. There shall be two Degrees granted in the Faculty of Science—viz., Bachelor of Science (B.Sc.) and Doctor of Science (D.Sc.)

123. Every Undergraduate in Science must have passed the Matriculation Examination, and during his first year must have pursued the course of studies provided for Undergraduates in Arts, and have passed satisfactorily the examinations in the subjects of Lectures before proceeding any further. Graduates in Arts are exempted from the provisions of this By-law.

124. Candidates for the Degrees in Science shall during their second year attend Lectures and pass examinations in the following subjects:—

Chemistry—Theoretical and Practical.

Physics—Theoretical and Practical.

Natural History.

Mathematics—(as in the second year of Arts).

French and German unless (in respect of Lectures) specially exempted.

125. To obtain the Degree of B.Sc., undergraduates of the third year shall attend Lectures and pass examinations in at least three of the following subjects:—

Chemistry—Inorganic and Organic (with Laboratory practice).

Physics—Theoretical and Practical.

Mathematics (pure and mixed).

Mineralogy.

Geology and Palaeontology.

Zoology and Botany.

126. The candidate who shall at this examination most distinguish himself shall, if of sufficient merit, receive a gold medal or prize of the value of ten pounds.

127. The examination for the Degree of B.Sc. shall take place once a year, at the beginning of Lent Term.

128. No candidate shall be admitted to this examination unless he produce a certificate from the Dean of the Faculty of Science that he is of nine Terms' standing, and that he has passed all the examinations required since his admission to the University.

129. The fee for the Degree of B.Sc. shall be three pounds. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him; but he shall be admissible to one subsequent examination for the same Degree without the payment of an additional fee.

130. The Second and Third Year Examinations shall be conducted in the first instance by means of printed papers, practical exercises, and reference to specimens when necessary, and at the termination of such examinations each candidate shall undergo a *visd voce* examination if the Examiners think fit.

131. At both the Second and Third Year Examinations honour papers shall be set where necessary. Students may elect to take up any one or more subjects.

132. The Examination for the Degree of Doctor of Science (D.Sc.) shall take place once a year, at the beginning of Lent Term. This degree shall not be conferred until after the expiration of three academic years from the granting of the B.Sc. Degree.

133. Every candidate must produce evidence that during the intervening time he has been employed in scientific study and research for at least three years, and shall be required to pass an examination in one of the following branches of Science—viz., Chemistry, Physics, Zoology, Botany, Geology, or Palaeontology; he shall also be required to write a paper embodying the results of an original investigation or scientific research, such as shall receive the approval of the Board of Examiners.

134. The candidate who at this examination shall most distinguish himself shall receive a gold medal or prize of the value of ten pounds.

135. The fee for the Degree of D.Sc. shall be ten pounds, which shall be paid to the Registrar previous to the examination.

136. The above fee shall not in any case be returned, but any candidates who fail to pass an examination shall be allowed to present themselves for one further similar examination without fee, but for each subsequent examination that may be required, shall pay the sum of five pounds.

#### DEPARTMENT OF ENGINEERING.

137. The Board of Examiners in Science shall conduct the examinations in the Department of Engineering, as provided for in By-laws 119, 120, 121.

138. There shall be three certificates in Engineering, that for Civil Engineering and Architecture, that for Mechanical Engineering, and that for Mining Engineering.

139. Candidates for Certificates in Engineering must have passed the Matriculation Examination, and during their first year must have pursued the course of studies provided for Undergraduates in Arts, and pass satisfactorily the examinations in the subject of lectures before proceeding any further. Graduates in Arts are exempted from the provisions of this By-law.

140. The examinations shall take place annually at the beginning of Lent Term.

141. During the Second Year, candidates shall attend Lectures and pass examinations in the following subjects:—

Mathematics (as in the Second Year of Arts).

Chemistry (as in the Second Year of Science).

Physics (as in the Second Year of Science).

Surveying.

Geometrical Drawing.

Applied Mechanics.

142. During the Third Year, candidates shall attend Lectures and pass examinations in the following subjects :—

- Mathematics (pure and mixed).
- Surveying.
- Engineering.
- Mineralogy and Geology.

Candidates for the Certificate of Mechanical Engineer are exempted from Lectures and examinations in Mineralogy and Geology.

143. To obtain the Certificate in Engineering Candidates during the Fourth Year shall receive instructions and pass examination in one of the following branches :—

1. Civil Engineering and Architecture.
2. { Mechanical Engineering.  
Machine Construction.
3. { Mining Engineering  
Metallurgy.  
Mining Law.

144. No candidate shall be admitted to the Final Examination for the Certificate in Engineering unless he produce a certificate from the Dean of the Faculty of Science that he is of twelve Terms' standing, and that he has passed all the examinations required since his admission to the University.

145. Candidates will also be required to produce evidence of having been satisfactorily engaged for twelve months in acquiring a knowledge of Civil Engineering, of Machine Construction, or of Mining, according to the Branch or Branches selected.

146. The candidate who shall most distinguish himself at this examination shall, if of sufficient merit, receive a gold medal or prize of the value of ten pounds.

147. Every Certificate in Engineering shall specify the Branch or Branches of Engineering for which it is granted.

148. The fee for the Certificate in Engineering shall be ten pounds. No candidate shall be admitted to the examination unless he shall have previously paid this fee to the Registrar. If a candidate fail to pass the examination the fee shall not be returned to him, but he shall be admissible to one subsequent examination for the same Degrees without the payment of an additional fee.

149. Candidates who have received a Certificate in Engineering in one Branch may, upon passing the examination and producing the necessary evidence of practical work for any other Branch or Branches, receive a Certificate in Engineering for such additional Branch or Branches.

150. The fee for such additional Examination shall be ten pounds.

#### ADMISSION AD EUNDEM GRADUM.

151. Admission of *ad eundem gradum* in this University may, at the discretion of the Senate, be granted without examination to Graduates of the following approved Universities, that is to say, the Universities of Oxford, Cambridge, London, Edinburgh, Glasgow, Aberdeen, and Dublin, the Queen's University of Ireland, and the Royal University of Ireland lately established in its place, and the Universities of Melbourne, New Zealand, and Adelaide; and may also be granted to Graduates of such other Universities as the Senate may from time to time determine. Provided always, that they shall give to the Registrar, to be submitted to the Senate, sufficient evidence of their alleged Degrees respectively and of their good fame and character. Upon the approval of his application, each candidate shall pay to the Registrar a fee of £2 for the entry of his name on the University books, in addition to the prescribed fee for his Degree.

#### REGISTER OF GRADUATES.

152. A Register of the Graduates of the University shall be kept by the Registrar, in such manner as the Senate shall from time to time direct.

153. A Register of the Members of the Convocation shall be kept by the Registrar, in such manner as the Senate shall from time to time direct, and such Register shall be conclusive evidence that any person whose name shall appear thereon at the time of his claiming to vote at a Convocation is so entitled to vote.

#### SUBSTITUTES FOR OFFICERS.

154. Any act required by the By-laws to be performed by any officer of the University may, during the absence or other incapacity of such officer, unless otherwise provided, be performed by a person appointed by the Senate to act in his place.

#### ACADEMIC COSTUME.

155. The Academic costume shall be for—

*The Chancellor and Vice-Chancellor*—a robe and cap similar to those worn by the Chancellor of the University of Oxford. In undress, the silk gown worn by other Members of the Senate,—black velvet cap and gold tassel.

*A Member of the Senate*—the habit of his Degree, or a black silk gown of the description worn by Graduates holding the Degree of Doctor, with tippet of scarlet cloth edged with white fur, and lined with blue silk,—black velvet trencher cap.

*Doctor of Laws, Medicine, or Science, or Master of Surgery*—The gown worn by Graduates holding the Degree of Doctor in the University of Oxford or Cambridge,—black cloth trencher cap.

*Doctor of Laws*—hood of scarlet cloth, lined with blue silk.

*Doctor of Medicine*—hood of scarlet cloth, lined with purple silk.

*Doctor of Science*—hood of scarlet cloth, lined with amber-coloured satin.

*Master of Surgery*—hood of scarlet cloth, lined with lavender silk.

*Master of Arts*—the ordinary Master's gown of Oxford or Cambridge, of silk or bombazine, with black silk hood lined with blue silk,—black cloth trencher cap.

*Bachelor of Laws, Medicine, or Surgery*—the black gown worn by civilians in Oxford or Cambridge holding Degrees,—black cloth trencher cap. *Bachelor*

- Bachelor of Laws*—hood of black silk, edged with blue silk.  
*Bachelor of Medicine*—hood of black silk, edged with purple silk.  
*Bachelor of Surgery*—hood of black cloth, edged with lavender silk.  
*Bachelor of Arts or Science*—a plain black stuff gown,—black cloth trencher cap.  
*Bachelor of Arts*—hood similar to that worn by the B.A. at Cambridge.  
*Bachelor of Science*—hood of black silk, edged with amber-coloured silk.  
*An Officer not being a Graduate*—a black silk gown of the description worn by civilians not holding Degrees,—black cloth trencher cap.  
*Engineer*—a plain black stuff gown with hood of black cloth, lined with light maroon silk,—black cloth trencher cap.  
*Undergraduate*—a plain black stuff gown,—black cloth trencher cap.  
*Scholar*—plain black stuff gown with a velvet bar and shoulder-strap,—black cloth trencher cap.

156. Members of the University shall, on all public occasions when convened for Academic purposes, appear in their Academic costume.

157. The undergraduates shall appear in Academic costume when attending Lectures, and on all public occasions in the University, and whenever they meet the Fellows, Professors, or other Superior Officers of the University, shall respectfully salute them.

158. Each Professor and Lecturer shall keep a daily record or class roll of the Lectures delivered by him, showing the number and names of the Students present at each Lecture. These class rolls shall be laid on the table at each monthly meeting of the Senate, and shall be collected by the Registrar at the end of each term, and preserved for reference.

#### NON-MATRICULATED STUDENTS.

159. Any person desirous of attending University Lectures may do so without Matriculation upon payment of such fees as the Senate may from time to time direct.

#### PUBLIC EXAMINATIONS.

160. Two Public Examinations shall be held every year,—the one to be called the Junior Public Examination, and the other to be called the Senior Public Examination; and shall be open to all candidates, male or female, who may present themselves.

161. The Public Examinations shall be held at such times and at such places as the Senate may from time to time appoint.

162. The subjects of the Junior Public Examinations shall be the English Language and Literature, History, Geography, the Latin, Greek, French, and German Languages, Arithmetic, Algebra, Geometry, Natural Science, and such other branches of learning as the Senate may from time to time determine.

163. The subjects of the Senior Public Examinations shall be those mentioned in the foregoing section, together with higher Mathematics, Drawing, Music, Natural Philosophy, and such other branches of learning as the Senate may from time to time determine.

164. Every candidate who shall pass either of these examinations, or such portions of either of them as may be required by the rules or orders of the Senate in force for the time being, shall receive a Certificate to that effect, specifying the subjects in which he shall have passed, and signed by the Dean of the Faculty of Arts and by the Registrar.

165. No person shall be admitted to either of the Public Examinations until he shall have paid such fees as may be required by the rules or orders of the Senate in force for the time being.

166. The Professors and Assistant Professors not engaged in tuition, except publicly within the University, together with such other persons as the Senate may from time to time appoint, shall form a Board for conducting the Public Examinations; and of this Board the Dean of the Faculty of Arts, or in his absence the Professor next in seniority, shall be Chairman.

167. At the conclusion of each examination, the Board shall transmit to the Senate a report of the result, signed by the Chairman, and at least one other member.

168. Subject to these By-laws, the Public Examinations shall be conducted according to such rules or orders as the Senate may from time to time establish.

L.S.

W. M. MANNING,  
Chancellor.

The Great Seal was affixed in accordance with the }  
 resolution of the Senate, on this 31st day of July, }  
 one thousand eight hundred and eighty-two,—

H. E. BARFF, Registrar.

Laid before Executive Council, on 19th Sept., /82,—

ALEX. C. BUDGE, Clerk of the Council.

Approved, 19th Sept., /82.

AUGUSTUS LOFTUS.

1882.

NEW SOUTH WALES.

## UNIVERSITY OF SYDNEY.

(BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vict. No. 31.

## BY-LAWS OF THE UNIVERSITY.

ALL By-laws heretofore passed by the Senate and now in force are hereby repealed, and, in lieu thereof, the following By-laws shall be and are hereby declared to be the By-laws under which the University of Sydney shall henceforth be governed, provided always that nothing herein contained shall be deemed to revive any By-law previously repealed, or to prejudice any matter already done or commenced under any By-law hitherto in force.

## CHANCELLOR.

1. The election to the office of Chancellor shall take place at a duly convened meeting of the Senate to be held in Lent Term.
2. The Chancellor shall be elected for a period of three years (except as hereinafter provided) to be computed from the date of election, but shall be eligible for re-election.
3. In the event of the office of Chancellor becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the election of a successor shall be proceeded with at the next ensuing regular meeting of the Senate, and the Chancellor so appointed shall hold office until the Lent Term next after the expiration of three years from the date of such election.

## VICE-CHANCELLOR.

4. The election of the Vice-Chancellor shall take place annually at a duly convened meeting of the Senate to be held in Lent Term, except as in cases otherwise provided for by the Act of Incorporation.

## SENATE.

*Meetings and Rules of Procedure.*

5. The Senate shall meet on the first Wednesday in every month, or on the nearest convenient day should such first Wednesday be a public holiday, and may adjourn from time to time to conclude any unfinished business.
6. At any time in the interval between such monthly meetings it shall be competent for the Chancellor, or, in his absence, the Vice-Chancellor, in any case of emergency, to call a special meeting of the Senate, to be held as soon as conveniently may be, for the consideration of any business which he may wish to submit to them.
7. Upon the written requisition of any three members, the Chancellor, or, in his absence, the Vice-Chancellor, or, in the absence of both, the Registrar, shall convene a special meeting of the Senate, to be held as soon as conveniently may be after the expiration of seven days from the receipt of such requisition.
8. Except in any case of emergency as aforesaid, no motion initiating a subject for discussion shall be made, but in pursuance of notice given at the previous monthly meeting, and every such notice shall be entered in a book to be kept by the Registrar for that purpose.
9. The Registrar shall issue to each member of the Senate a summons with a written specification of the various matters to be considered at the next meeting of the Senate, whether such meeting be an ordinary or special one, and such summons, except in any case of emergency as aforesaid, shall be issued at least three days previously to such meeting.
10. In the event of a quorum of the Senate not being present at any monthly or other meeting, within half-an hour after the hour appointed the members then present may appoint any convenient future day, of which at least three days' notice shall be given by the Registrar in the usual manner.
11. All the proceedings of the Senate shall be entered in a Journal, and at the opening of each meeting the minutes of the preceding meeting shall be read and confirmed, and the signature of the Chairman then presiding shall be attached thereto.
12. If any Fellow shall, without leave from the Senate, be absent from its meetings for six consecutive calendar months, his Fellowship shall *ipso facto* become vacant.

## ELECTION TO VACANCIES.

13. At the first meeting of the Senate after the occurrence of a vacancy among the Fellows, a day shall be fixed for a Convocation for the election of a successor, such day to be within sixty days from the date of such Senate meeting, and to be announced at least thirty days before such Convocation, by notice posted at the University, and by advertisement in one or more of the daily newspapers. Due notice should also be given of the day on which a ballot shall be taken should such be required, provided that no Convocation shall be held in the month of January.

14. No person shall be eligible for election to fill any vacancy among the Fellows unless his name shall have been communicated to the Registrar by some legally\* qualified voter at least ten clear days before the time of Convocation; and it shall be the duty of that Officer to cause the name of such person and the fact of his candidature to be forthwith advertised in one or more of the daily newspapers published in Sydney, and to be posted in a conspicuous place in the University for eight clear days at least before such Convocation.

15. The Convocation for the election of a Fellow shall be held in the University, and shall be presided over in the same manner as if it were a meeting of the Senate. Every Candidate submitted for election must be proposed and seconded by legally qualified voters. If one Candidate only, or one only for each vacancy be so proposed and seconded, then such Candidate or Candidates shall be declared by the President to be duly elected. But if more Candidates are proposed and seconded than there are vacancies in the Senate to be filled at such Convocation, a show of hands shall be taken, and unless a ballot be demanded by at least two members of Convocation then present, the President shall declare the Candidate or Candidates in whose favour there shall be the greatest show of hands to be duly elected. Should a ballot be demanded, it shall be conducted in the following manner:—

- (A.) The voters then present shall choose two or more Members of Convocation to act as Scrutineers.
- (B.) The ballot shall not be held earlier than one week from the day of nomination at Convocation, and shall be notified by notice posted in the University, and by advertisement in one or more of the daily newspapers.
- (C.) The ballot shall commence at 10 a.m. and close at 2 p.m. on the day appointed.
- (D.) At the expiration of the time allotted for the ballot, the Scrutineer shall proceed to the examination of the voting papers, and shall report the result to the President, who shall then declare the Candidate or Candidates having the majority of votes to be duly elected to the vacant seat or seats in the Senate.
- (E.) In the event of an equality of votes the election shall be decided by the casting vote of the President.

16. Before the time fixed for the Convocation for the election of a Fellow, the Registrar shall prepare for the President's use a complete list of all persons entitled to vote under the provisions of the law, and a copy of such list shall be posted in a conspicuous place in the University for two days at least before the time of Convocation.

17. None but legally qualified voters shall be allowed to be present during the taking of a ballot.

## EX OFFICIO MEMBERS.

(24 Victoria No. 13.)

18. The Senior Professor of Classics, the Senior Professor of Mathematics, and the Senior Professor of Experimental Physics, shall be *ex officio* members of the Senate, under the provisions of the "Sydney University Incorporation Act Amendment Act of 1861."

19. The present Professor of Chemistry and Mineralogy shall be an *ex officio* member of the Senate under the Act of 1861.

## SUPERIOR OFFICERS.

(24 Victoria No. 13.)

20. The Registrar and the Solicitor to the University are hereby declared to be Superior Officers of the University, entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

21. The present Auditor of the University, the Honorable Geoffrey Eagar, is hereby declared to be a Superior Officer of the University, entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

## REGISTRAR.

22. The Registrar shall keep all necessary records of the proceedings of the University, conduct all necessary correspondence, and keep such Registers and books of account as may be required.

23. All fees, fines, or other sums received by the Registrar, in his capacity as such, shall be paid into the Bank of the University, in order that the same may be applied, accounted for, and audited in such manner as the Senate may from time to time appoint.

## SEAL OF THE UNIVERSITY.

24. The Seal of the University shall be placed in charge of the Chancellor or Vice-Chancellor, and Registrar, and shall not be affixed to any document except by order of the Senate.

## FACULTIES.

25. There shall be three Faculties in the University, viz.:—

- 1. Arts.
- 2. Law.
- 3. Medicine.

## LIMITATION

\* The legally qualified voters are Fellows of the Senate for the time being—Professors, Public Teachers, and Examiners in the Schools of the University, Principals of Incorporated Colleges within the University, Superior Officers of the University declared to be such by By-law, Graduates who shall have taken the Degrees of M.A., LL.D., or M.D. in this University, and Bachelors of Arts of three years' standing.

## LIMITATION OF THE TITLE OF PROFESSOR.

26. The title of Professor shall be distinctive of those Public Teachers of the University upon whom the Senate shall have conferred that title, and no person in or belonging to the University, or any College within it, shall be recognised as a Professor without the express authority of the Senate.

## PROCTORIAL BOARD.

27. The Chancellor, the Vice-Chancellor, the Senior Professor of Classics, the Senior Professor of Mathematics, the Senior Professor of Experimental Physics, and the present Professor of Chemistry and Mineralogy, shall form a Board, to be called the "Proctorial Board," to which shall be confided the duty of enforcing the observance of order on the part of the Undergraduates of the University. This Board shall make such regulations as it may deem expedient for the maintenance of discipline amongst the Undergraduates, and shall have the power of inflicting, or authorising to be inflicted, all such Academic punishments as are sanctioned by the present usage of British Universities, including fines to an amount not exceeding five pounds (£5) for any one offence, provided, however, that the Board shall not proceed to the expulsion of any Undergraduate, or his suspension for a period exceeding one term, without the express authority of the Senate.

28. No question shall be decided at any meeting of this Board unless three Members at least shall be present.

29. At meetings of this Board the chair shall be occupied by the Chancellor, or, in his absence by the Vice-Chancellor, or, in the absence of both, by the Dean of the Faculty of Arts; and in the event of an equality of votes at any meeting, the Chairman shall have a casting vote. At meetings of this Board the Registrar of the University shall attend and record the proceedings, and it shall be his duty to collect all fines imposed by or under the authority of the Board. It shall be the duty of the Registrar to convene the Board on the requisition of any one of its members, at such time within seven days from the date of the requisition, as may be directed by the Chancellor, or, in his absence, by the Vice-Chancellor, on whom it shall be incumbent to give such direction on the Registrar's application. In the event of the absence of the Chancellor and Vice-Chancellor, the time of meeting shall be fixed by the Dean of the Faculty of Arts.

## BOARD OF STUDIES.

30. The Chancellor, the Vice-Chancellor, and the Professors of the three several Faculties shall form a Board to be called the Board of Studies, for the consideration of all general questions relating to studies of the University which may be referred to them by the Senate.

## DEANS OF FACULTIES.

31. A Dean for each of the Faculties in the University shall be elected by the Senate from time to time for a term of three years.

32. In the event of the office of Dean becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the election of a successor shall be proceeded with at the next ensuing regular meeting of the Senate; and the Dean so appointed shall hold office until the first regular meeting of the Senate in the term next after the expiration of three years from the date of such election.

## TERMS.

33. The Academic year shall contain three terms; that is to say:

*Trinity Term.*—Commencing on the first Monday in June, and terminating with the last Saturday in August.

*Michaelmas Term.*—Commencing on the first Monday in October, and terminating with the third Saturday in December.

*Lent Term.*—Commencing on the first Monday of March, and terminating with the third Saturday in May.

## FACULTY OF ARTS.

*Subjects of Study.*

34. Professors and Lecturers appointed by the Senate shall give instruction in the following subjects:—

1. Greek Language and Literature.
2. Latin Language and Literature.
3. Ancient History.
4. Logic.
5. Mathematics.
6. Natural Philosophy.
7. Chemistry.
8. Experimental Physics.
9. Physical Geography.
10. Geology.
11. Mineralogy.

*Board of Examiners.*

35. The Professors in the Faculty of Arts, together with such other persons as may from time to time be appointed by the Senate, shall form a Board of Examiners for conducting the examinations in the Faculty of Arts, and of this Board the Dean of the Faculty, or, in his absence, the Professor next in seniority, shall be Chairman.

36. The Board of Examiners shall from time to time, and in accordance with the provisions of the By-laws for the time being, frame rules and appoint times and places for the several examinations in the Faculty of Arts.

37. At the conclusion of each examination the Board shall transmit to the Senate a report of the result signed by the Chairman, and by at least two other members.

## MATRICULATION.

## MATRICULATION.

38. Candidates for Matriculation must make application to the Registrar before the commencement of Trinity Term.

39. The Matriculation Examination shall take place during the first fortnight of Trinity Term, but the Examiners in special cases, with the sanction of the Chancellor or Vice-Chancellor, are authorised to hold such examinations at such other times as may be deemed expedient.

40. The Examination shall be conducted by means of written or printed papers, but the Examiners shall not be precluded from putting *viva voce* questions.

41. The names of all Candidates who have passed the Matriculation Examination shall be arranged and published in such order as the Board of Examiners shall recommend to the Senate.

42. Students who shall have passed the Matriculation Examination, and shall have paid a fee of two pounds to the Registrar, may be admitted by the Senate as Members of the University.

43. The Examination for Matriculation shall be in the following subjects:—

- The Greek and Latin Languages.
- English Grammar and Composition.
- Elementary Chemistry, Physics, or Geology.
- Arithmetic.
- Algebra, to Simple Equations inclusive.
- Geometry, First Book of Euclid.

44. Any Candidate for Matriculation shall, on application to the Board of Examiners, be exempted from examination in Greek.

## LECTURES.

45. Lectures shall commence on the first day of Term excepting in the first or Trinity Term, in which they shall commence on the Monday after the conclusion of the Matriculation and other Examinations hereinafter provided for.

46. Lectures of an hour each shall be given by the Professors at such times and in such order as the Senate may from time to time direct.

47. Before the admission of a Student to any course of Lectures he shall pay to the Registrar of the University such fee as shall have been appointed by the Senate.

48. Full and complete tables of Lectures and subjects of examinations shall be printed annually in the Calendar and posted in the University from time to time.

49. Candidates for degrees shall during their first year attend the University Lectures on the following subjects:—

1. Greek Language and Literature.
2. Latin Language and Literature.
3. Mathematics.
4. Experimental Physics.

50. Candidates for degrees shall during their second year attend the following Lectures:—

1. Greek Language and Literature.
2. Latin Language and Literature.
3. Mathematics.
4. Natural Philosophy.
5. Chemistry.
6. Geology.

51. Candidates for B.A. shall during their third year attend the University Lectures upon those subjects in which they shall have elected to be examined in accordance with By-law 66.

## EXEMPTION FROM LECTURES.

52. Any Under-graduate not holding a Scholarship in the University, nor being a Member of a College established under the provision of the Act 18 Victoria No. 37, may be exempted from attendance upon any or all of the abovenamed Lectures, upon producing evidence which shall satisfy the Senate that there are sufficient reasons for such exemption, provided that no such exemption shall be granted for more than one year at any one time.

53. No such exemption shall be granted until the Examiners shall have specially certified to the Senate that the abilities and attainments of the applicant are such as to enable him in their opinion to keep up with the usual course of study at the University without attendance upon Lectures. Under-graduates admitted *ad eundem statum*, and who are not required to pass the Matriculation Examination, shall nevertheless be required to pass a special examination, to be certified by the Examiners as above, before obtaining exemption from attendance upon Lectures.

## YEARLY EXAMINATIONS.

54. Yearly Examinations shall be held during the first fortnight of Trinity Term, and no Under-graduate shall absent himself therefrom except under medical certificate.

55. The Undergraduates of the first and second years shall be examined in the subjects of the Under-graduate course upon which Lectures have been given during the year, and shall be required to pass in such proportion thereof as the Senate shall from time to time determine.

56. No Undergraduate not exempted under section 52 from attendance upon Lectures shall be admitted to these Examinations who, without sufficient cause, shall have absented himself more than three times during any one term from any prescribed course of Lectures.

57. Every Undergraduate exempted from attendance upon Lectures under section 52 shall, before being admitted to any yearly Examination, pay to the Registrar a fee of £2. If any such Candidate fail to pass the Examination, the fee shall not be returned to him, but he may be admitted again to Examination without the payment of any additional fee.

58. Prize books, stamped with the University Arms, shall be given to each Student who shall be placed in the first class in each year.

59. Such Undergraduates as absent themselves from the Examinations, except under medical certificate, or fail to pass them in a satisfactory manner, shall, at the discretion of the Senate on the report of the Examiners, be required to keep additional Terms before proceeding to the B.A. degree.

60. Undergraduates who shall have passed the yearly Examinations shall receive Certificates to that effect signed by the Dean of the Faculty of Arts and by the Registrar.

#### ADMISSION AD EUNDEM STATUM.

61. Undergraduates of other Universities may, at the direction of the Senate, be admitted *ad eundem statum* in this University without examination, provided always that they shall give to the Registrar, to be submitted to the Senate, sufficient evidence of their alleged status and of good conduct.

#### BACHELOR OF ARTS.

62. The Examination for the Degree of B.A. shall take place once a year at the beginning of Trinity Term.

63. No Candidate shall be admitted to this Examination unless he produce a Certificate from the Dean of the Faculty of Arts that he is of nine terms' standing, and that he has passed all Examinations required since his admission to the University.

64. The fee for the degree of B.A. shall be £3. No Candidate shall be admitted to the Examination unless he have previously paid this fee to the Registrar. If a Candidate fail to pass the Examination, the fee shall not be returned to him; but he shall be admissible to any subsequent Examination for the same Degree without the payment of an additional fee.

65. The Examination shall be conducted in the first instance by means of printed papers, and at the termination of such Examination each Candidate shall undergo a *vivâ voce* Examination if the Examiners think fit.

66. To obtain the degree of B.A. Candidates shall pass satisfactory examinations in two at least of the undermentioned schools:—

1. *Classical*.—The Greek and Latin Languages, and Ancient History.
2. *Mathematical*.—Mathematics and Natural Philosophy.
3. *Natural Science*.—Chemistry, Experimental Physics, Practical Chemistry, and Geology.

But if any Student shall have been placed in the first class in honours in Classics, Mathematics, or Natural Science at the second yearly Examination, such Student shall not be required to pass in any other school except that in which he has already passed in the first class; but any Student availing himself of this privilege will be required to pass in the first class in honours at his third yearly Examination to qualify him for the attainment of B.A.

67. In addition to the ordinary Examinations for B.A. there shall be special papers for honours in the schools of Classics, Mathematics, and Natural Science.

68. The Candidates in each school shall be arranged in classes in order of merit.

69. The most distinguished Candidate for honours in each of the aforesaid schools shall, if he possess sufficient merit, receive a prize of £10.

#### MASTER OF ARTS.

70. There shall be a yearly Examination for the Degree of M.A. during Lent Term, or at such other times as the Examiners, with the sanction of the Chancellor or Vice-Chancellor, may appoint.

71. Every Candidate for this degree must have previously obtained the Degree of B.A., and two years must have elapsed since the time of his examination for such Degree. He will also be required to furnish evidence of having completed his twenty-first year.

72. The fee for the Degree of M.A. shall be £3. No Candidate shall be admitted to the Examinations unless he have previously paid this fee to the Registrar. If a Candidate fail to pass the Examination, the fee shall not be returned to him; but he shall be admissible to any subsequent Examination for the same Degree without payment of an additional fee.

73. Candidates for the Degree of M.A. shall elect to be examined in one or more of the following branches of knowledge:—

1. Classical Philology and History.
2. Mathematics and Natural Philosophy.
3. Logic; Moral, Mental, and Political Philosophy.
4. Natural Sciences.

The Candidate most distinguished in each branch at the Examination shall, if he possess sufficient merit, receive a gold medal.

74. The Senate may, at its discretion, admit to Examination for the Degree of Master of Arts any person who shall have obtained at least two years previously the Degree of Bachelor of Arts, or equivalent First Degree in Arts, in any other University approved by the Senate. Every Candidate for admission under this By-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualifications as aforesaid, and that he is a person of good fame and character, and upon the approval of his application shall pay to the Registrar a fee of £5. Every Candidate before he is admitted to his Degree shall be required to furnish evidence of having completed his twenty-first year.

#### SCHOLARSHIPS.

75. Scholarships shall be awarded after Examination as the Senate may from time to time appoint.

76. No Scholarships shall be awarded except to such Candidates as exhibit a Degree of proficiency which shall be satisfactory to the Examiners.

77. The Examination for Scholarships shall be concurrent with the Matriculation and yearly Examinations, additional papers and questions being set when required.

## FACULTY OF LAWS.

*Bachelor of Laws.*

78. Until Professorships are established there shall be a Board of Examiners appointed by the Senate to test the qualifications of Candidates desirous of obtaining a Degree in Laws. The Examination for the Degree of LL.B. shall take place at such times as the Examiners with the sanction of the Chancellor or Vice-Chancellor may appoint.

79. Every Candidate for the Degree of LL.B. shall lodge with the Registrar satisfactory evidence of having taken the Degree of B.A., or some equivalent Degree, at least one year previously in this or in some other University to be approved by the Senate. Every such Candidate shall also furnish satisfactory evidence that he is a person of good fame and character, and that he has completed his twenty-fifth year.

80. The fee for the Degree of LL.B. shall be £10. No Candidate shall be admitted to the Examination unless he have previously paid his fee to the Registrar. If the Candidate fail to pass this Examination, the fee shall not be returned to him; but he shall be admissible to any subsequent Examination for the same Degree without the payment of an additional fee.

81. Candidates for the Degree of LL.B. shall be examined in the following subjects:—

Roman, Civil, and International Law.  
Constitutional History and Constitutional Law of England.  
General Law of England.

*Doctor of Laws.*

82. The Degree of LL.D. shall not be conferred until after the expiration of two Academic years from the granting of the LL.B. Degree. Every Candidate shall be required to pass an Examination in the Civil Law, in the original Latin, with especial reference to such particular Works as the Examiners may from time to time determine. The fee for the degree of LL.D. shall be £10.

83. The Senate shall have power to admit to Examination for the Degree of LL.D. any person who shall have obtained at least two years previously the Degree of LL.B. at any other University approved of by the Senate, and who shall have completed his twenty-seventh year, and shall also have obtained the Degree of Bachelor of Arts, or an equivalent First Degree in Arts, at any such University, or shall pass an Examination similar to that prescribed for the Degree of Bachelor of Arts in this University. Every Candidate for admission under this By-law must make application in writing to the Registrar and supply satisfactory evidence of his qualifications as aforesaid, and that he is a person of good fame and character, and upon the approval of his application he shall pay to the Registrar a fee of £2 for the entry of his name in the University Books, in addition to the prescribed fee for his Degree.

## FACULTY OF MEDICINE.

*Bachelor of Medicine.*

84. A Professor appointed by the Senate shall give Lectures in Chemistry.

85. Until other Professorships in the Faculty of Medicine be constituted in the University, there shall be a Board of Examiners appointed by the Senate to test the qualifications of Candidates who may apply for Medical Degrees to be granted in accordance with the provisions contained in the Act of Incorporation.

86. Such Candidates must lodge with the Registrar of the University satisfactory evidence of his having taken the Degree of B.A., or some equivalent Degree, in this or in some other University approved by the Senate. Candidates who have not taken such Degree must pass an examination similar to that prescribed for the B.A. Degree in this University, or must produce evidence of having passed such other Preliminary, Literary, or Scientific Examination as may be considered by the Senate sufficient for the purpose.

87. The Candidate must also furnish evidence that he is of good fame and character, and that he is not under twenty-one years of age, and that he has diligently pursued a course of medical studies extending over a period of four years at some Medical School approved of by the Senate. His Certificates must show that he has attended the following eight classes each for a course of six months:—Anatomy, Practical Anatomy, Physiology, Chemistry, Materia Medica, Surgery, Practice of Medicine, Midwifery, and the following five classes each for a course of three months—Botany, Practical Chemistry, Medical Jurisprudence, Clinical Medicine, and Clinical Surgery; also that he has attended for two years the Medical and Surgical Practice of a hospital containing not fewer than 100 beds, and that he has been engaged for six months in compounding and dispensing medicines.

88. Medical or Surgical Diplomas from regularly constituted Examining Boards in Europe or America may, at the discretion of the Senate, be accepted as equivalent to the whole or part of the above-mentioned Certificates.

89. As soon as the required documents have been declared satisfactory by the Senate, the Registrar shall notify to the Candidate the day on which his Examination will commence.

90. Before being admitted to Examination the Candidate must deposit with the Registrar a fee of £10, which will not be returned in the event of the Candidate not passing the Examination; but such Candidate may be admitted to any future Examination without any further charge.

91. Upon compliance with the above Regulations, and on the report of the Examiners that the Candidate has passed a satisfactory professional Examination, the Senate shall confer upon him the Degree of M.B.

*Doctor of Medicine.*

92. The Degree of M.D. shall not be conferred until after the expiration of two Academic years from the granting of the M.B. Degree.

93. The Candidate must produce evidence that, after having obtained the Degree of M.B., he has spent two years in hospital practice, or three years' practice in either private or in public service. Further,  
he

he shall be required to pass the following examination, which shall be conducted by means of printed papers and *vivá voce* interrogations :—

- (A) Commentary on a case in Medicine, Surgery, or Obstetric Medicine, at the option of the Candidate.
- (B) Medicine (including Psychological Medicine).
- (C) Examination and Report on cases of Patients under treatment in the wards of a hospital.
- (D) *Vivá voce* Interrogations and Demonstrations from specimens and preparations.

94. The fee for the Degree of M.D. shall be £10.

95. The Senate shall have power to admit to examination for the Degree of Doctor of Medicine any person who shall have obtained at least two years previously the Degree of Bachelor of Medicine, or some corresponding First Degree in Medicine at any other University approved by the Senate. Every Candidate for admission under this By-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualification as aforesaid, and also that he is a person of good fame and character. Upon the approval of his application, he shall pay to the Registrar a fee of £2 for the entry of his name in the University Books, in addition to the prescribed fee for his Degree. Before the granting of the Degree, every passed Candidate will be required to furnish evidence of having completed his twenty-third year.

96. Admission *ad eundem gradum* in this University may, at the discretion of the Senate, be granted without Examination to Graduates of the following approved Universities, that is to say :—The Universities of Oxford, Cambridge, London, Edinburgh, Glasgow, Aberdeen, and Dublin, the Queen's University of Ireland, and the Royal University of Ireland lately established in its place, and the Universities of Melbourne, New Zealand, and Adelaide; and may also be granted to Graduates of such other Universities as the Senate may from time to time determine, provided always that they shall give to the Registrar to be submitted to the Senate sufficient evidence of their alleged Degrees respectively, and of their good fame and character. The fee for any such admission shall be 5 guineas.

#### REGISTER OF GRADUATES.

97. A Register of the Graduates of the University shall be kept by the Registrar in such manner as the Senate shall from time to time direct, and such Register shall be conclusive evidence that any person whose name shall appear thereon as holding the Degree of Master of Arts, or Doctor of Laws, or Doctor of Medicine at the time of his claiming to vote at a Convocation for the election of a Fellow of the Senate is so entitled to vote, and that any person whose name shall not appear thereon at the time of his claiming to vote in Convocation is not so entitled to vote.

#### SUBSTITUTES FOR OFFICERS.

98. Any act required by the By-laws to be performed by any Officer of the University may, during the absence or other incapacity of such Officer, unless otherwise provided, be performed by a person appointed by the Senate to act in his place.

#### ACADEMIC COSTUME.

99. The Academic Costume shall be for—

*The Chancellor and Vice-Chancellor*—a robe and cap similar to those worn by the Chancellor of the University of Oxford. In undress, the silk gown worn by other members of the Senate, black velvet cap and gold tassel.

*A Member of the Senate*.—The habit of his Degree or a black silk gown (of the description worn by Civilians holding Degrees from Oxford or Cambridge), with tippet of scarlet cloth edged with white fur and lined with blue silk—black velvet trencher cap.

*Doctor of Laws or Medicine*.—The gowns worn by Graduates of the same rank in the University of Oxford—hood of scarlet cloth lined with blue silk—black cloth trencher cap.

*Master of Arts*.—The ordinary Master's gown of Oxford or Cambridge, of silk or bombazine with black silk hood lined with blue silk—black cloth trencher cap.

*Bachelor of Laws or Medicine*.—The black gown worn by Civilians in Oxford or Cambridge, holding Degrees, with hood of blue silk lined with white fur—black cloth trencher cap.

*An Officer not being a Graduate*.—A black silk gown, of the description worn by Civilians not holding Degrees—black cloth trencher cap.

*Bachelor of Arts*.—A plain black stuff gown, with hood similar to that worn by the B.A. at Cambridge—black cloth trencher cap.

*Undergraduates*.—A plain black stuff gown—black cloth trencher cap.

*Scholar*.—The same gown with a velvet bar on the sleeve—black cloth trencher cap.

100. Members of the University shall, on all public occasions when convened for Academic purposes, appear in their Academic costume.

101. The Undergraduates shall appear in Academic costume when attending Lectures, and on all public occasions in the University, and whenever they meet the Fellows, Professors, or other Superior Officers of the University, shall respectfully salute them.

102. Each Professor and Lecturer shall keep a daily record or class roll of the Lectures delivered by him, showing the number and names of the Students present at each Lecture. These class rolls shall be laid on the table at each monthly meeting of the Senate, and shall be collected by the Registrar at the end of each term, and preserved for reference.

#### NON-MATRICULATED STUDENTS.

103. Any person desirous of attending University Lectures may do so without Matriculation upon payment of such fees as the Senate may from time to time direct.

#### PUBLIC EXAMINATIONS.

104. Two Public Examinations shall be held every year,—the one to be called the Junior Public Examination, and the other to be called the Senior Public Examination; and shall be open to all Candidates, male or female, who may present themselves.

105. The Public Examinations shall be held at such times and at such places as the Senate may from time to time appoint.

106. The subjects of the Junior Public Examinations shall be the English Language and Literature, History, Geography, the Latin, Greek, French, and German Languages, Arithmetic, Algebra, Geometry, Natural Science, and such other branches of learning as the Senate may from time to time determine.

107. The subjects of the Senior Public Examinations shall be those mentioned in the foregoing section, together with higher Mathematics, Drawing, Music, Natural Philosophy, and such other branches of learning as the Senate may from time to time determine.

108. Every Candidate who shall pass either of these examinations, or such portions of either of them as may be required by the rules or orders of the Senate in force for the time being, shall receive a Certificate to that effect, specifying the subjects in which he shall have passed, and signed by the Dean of the Faculty of Arts and by the Registrar.

109. No person shall be admitted to either of the Public Examinations until he shall have paid such fees as may be required by the rules or orders of the Senate in force for the time being.

110. The Professors and Assistant Professors not engaged in tuition, except publicly within the University, together with such other persons as the Senate may from time to time appoint, shall form a Board for conducting the Public Examinations; and of this Board the Dean of the Faculty of Arts, or or in his absence the Professor next in seniority, shall be Chairman.

111. At the conclusion of each examination, the Board shall transmit to the Senate a report of the result, signed by the Chairman, and at least one other member.

112. Subject to these By-laws, the Public Examinations shall be conducted according to such Rules or Orders as the Senate may from time to time establish.

(L.S.)

ROBERT ALLWOOD,  
Vice-Chancellor.

AUGUSTUS LOFTUS,  
Governor.

The Corporate Seal was affixed on the third day of  
January, one thousand eight hundred and eighty-  
two, in pursuance of a resolution of the Senate,—

H. E. BARR, Acting Registrar.

ALEX. C. BUDGE, Clerk of the Council.

1882.

## NEW SOUTH WALES.

## SYDNEY GRAMMAR SCHOOL.

(ANNUAL REPORT, 1881.)

Presented to Parliament, pursuant to Act 18 Vic., No. 16.

## The Secretary to Trustees, Sydney Grammar School, to The Minister of Public Instruction.

Sir,

Sydney Grammar School, 29 May, 1882.

I have the honor, by direction of the Trustees of the Sydney Grammar School, to transmit to you, for the purpose of being laid before Parliament, the following report of their proceedings and the progress of the School during the year 1881.

The Trustees at their first meeting elected the Honorable Sir George Wigram Allen, K.C.M.G., Speaker of the Legislative Assembly, Chairman, and Alfred J. Cape, Esq., Vice-Chairman, of the Board for the year.

On the 14th February Mr. R. A. Martin was appointed Master of Modern Languages for six months, at £250 per annum. Mr. W. Newbery was also appointed an Assistant Master, to take the position previously held by Mr. J. H. Skinner, at a salary of £350 a year, which was increased on the 1st September to £450.

On the 31st March Mr. C. J. Fache resigned his Assistant Mastership, which he had held for the last twelve years. Mr. John Perry also resigned his position in the school, and the vacancy was temporarily filled, in the first place by Mr. G. H. Hanslip, B.A., of the University of London, and afterwards by Mr. H. W. C. Michell, M.A., of Hertford College, Oxford.

At the August meeting the Trustees received a letter from Mr. J. H. Skinner, the Acting Mathematical Master, regretting that he was compelled by the state of his health to give up his work at the Grammar School, as it was absolutely necessary for him to leave Sydney for a time. Under these circumstances the Trustees accepted Mr. Skinner's resignation, and the vacancy was filled up temporarily by the appointment of Mr. H. C. Kingsmill, M.A., late Scholar of Cains' College, Cambridge, and the Head Master was instructed to write to Dr. Abbott, Head Master of the City of London School, to engage an Assistant Mathematical Master for the school.

The Trustees regret to report the resignation of Mr. Edward Pratt, who for the last twenty-four years had occupied the position of Mathematical Master. A resolution was passed by the Trustees thanking Mr. Pratt for the valuable services he had rendered to the school.

At the request of the Trustees, Edwin Bean, Esq., B.A., late Scholar of Trinity College, Oxford, and Thos. Harlin, Esq., M.A., late Fellow of St. Peter's College, Cambridge, conducted the annual examination in classics and mathematics. Their reports are annexed.

Since the date of the last report the Trustees have not found it necessary to make any further regulations for the management of the school.

The average attendance of pupils during the year was 387 $\frac{3}{4}$ .

An account of the whole income and expenditure of the school during the year is hereto appended.

I have, &amp;c.,

W. H. CATLETT,

Secretary.

## APPENDIX.

## Report of the Classical Examiner.

To the Chairman of the Trustees of the Sydney Grammar School,—

Sir,

I have the honor to submit for your consideration the report of the classical examinations for the year 1881.

In reviewing the work done, I will first give a list of the subjects presented by the various forms with a general estimate of the results of each, and then add such conclusions as I have come to with regard to the classical work of the school as a whole.

*Form VI* presented no less than eleven authors, six Latin and five Greek. In a paper on *Livy, Book 22*, the translation was good, but the critical, and especially the historical, questions, only fair. Broomfield, Pratt (1), and Jeffreys did well in translation, and Pratt fairly in the historical notes.

*Cicero, pro Milone*, produced good translation, especially from Pratt (1) and King (2). The questions annexed, being less historical and chiefly grammatical, were well answered by all.

*Ovid Fasti, Book I.*—The translation was very fair throughout the form, Delohery doing best, Broomfield and Cranna (1) well. The critical questions on this subject were well answered by all.

*Terence Andria.*—All the translation was very good, especially that of King (2), Broomfield, Pratt (1). Questions connected with the subject matter were avoided by the form in general, but Pratt (1), and Broomfield gave a good estimate of the difference of modern family life and that of ancient Rome.

*Horace—Odes, Book IV, and Epodes.*—This was the least excellent work shown up by this form, but Pratt (1) did a very good paper, and also King (2).

*Virgil Æneid V*, was a very good paper from the whole form. Pratt (1) may be specially mentioned as best.

The Greek authors submitted were as follows:—*Æschylus, Prometheus Vinculus*. All except Pratt (1) did very well, the translation was very good, the critical remarks very fair. Broomfield sent the best answers to this paper.

*Lucian's Dialogues*, taken up by that portion of the form who did not read *Æschylus*. The standard of work here was not so high as in the *Æschylus*, but the results were fair.

*Homer, Iliad, Books VI and VII.*—Very fairly done by all. Garnsey and Pratt (1) sent good papers.

*Aristophanes, Ranæ.*—The chorus set out for translation was rendered excellently by almost all the form. A question on the comparison of the chief Greek dramatists was well answered. And another question requiring quotations of Aristophanes' criticisms upon Euripides was well answered by Pratt (1) and King (1).

*Thucydides, Book 2.*—This is a very long and difficult book, and the manner in which questions were answered, especially by the lower boys of the form, is highly creditable. Neill, Broomfield, King (2), and Delohery deserve especial mention.

In addition to these authors two papers in unseem or unprepared translation were given.

For *Latin unseem* a very stiff piece of *Livy*, describing a naval engagement off the harbour of Utica, was admirably handled by the form generally, this portion of the paper securing the high average of 68 per cent. of the marks. A difficult passage from *Virgil* was not quite so well rendered. Garnsey did best in *Virgil*, and for the paper as a whole, Broomfield, Garnsey, and Russell deserve mention. *The Greek unseem* consisted of a piece from the *Themistatus* of Plato and a speech from *Sophocles' Ajax* was excellently done by Broomfield, who was far the best, reaching 86 per cent. of the marks, Pratt being next with 54.

The *Latin prose composition* was well done by Broomfield and Pratt (1), who each obtained 76 per cent.; the rest reached a very fair average, 54 per cent. But none of the papers reached the excellent standard of last year.

The *Greek prose composition* was excellent on the part of Broomfield and King (2). Garnsey very good, and King (1) good. Pratt's composition was spoilt by inaccuracies and defective knowledge of grammar.

A *Taste paper* consisting partly of grammatical questions and partly of questions on Philology, Antiquities, History, and Latin verse composition, produced good grammatical answers, especially from Broomfield; but in the second part, with the exception of well-written remarks on the Persian Wars by King (1), and on the Roman Wars from King (2), received no answers of any value.

*Form V* is not wholly satisfactory. In a *Cæsar* paper and a *Latin Grammar* the translation was good, especially Russell's and Garran's; but the question about *Cæsar's bridge* was poorly answered, except by Beehag and Russell, and the parsing of the form was below the mark. Dare, Garran, and Russell sent good grammar, but the rest were only fair, while twelve boys out of the twenty-seven answered badly. The *Virgil* translation was good, and the scansion and critical answers very fair. Some questions on *Horace*, which formed part of the same paper, were not so well done. In this paper, as a whole, Dare was excellent; Loxton, Saddington, Garran, and Barker very good. *Unseen* pieces from *Virgil* and *Cicero* were excellently translated by Loxton, and well by Garran and Barker, but the *Latin prose* was not satisfactory, being full of false concordances and inaccuracies; and though the grasp of the passage as a whole did credit to the teaching of the form, the grammatical inaccuracy contrasts with last year's work, and is not worthy of the position of the form in the school. On the other hand the *Greek composition* of this form, considering the difficulty of the paper, was well done; but even here a sounder grammatical knowledge is required. Loxton, Cruickshank, and Curnow did well.

The *Xenophon* and *Greek Grammar* produced good translation and poor parsing; the contracted verbs, and verbs in  $\mu$  being unsatisfactorily known. The comments on the syntax were not good, except those of Russell and Beehag; Dare, Garran, and Russell parsed best. A paper on *Lucian* was unevenly done, some—as England (1), Garran, Loxton—doing very well; others badly, and two obtaining no marks. The *Unseen Greek* however was good, especially that of Loxton, Fraser, Curwood, England (1), Barker, and Cruickshank.

*Form IV* especially, considering that eighteen out of the twenty-five boys have been in it only for six months, has done satisfactorily, the *Virgil* papers being excellent. The form is well together, the parsing good, but not good enough, especially in *Greek*. The names of *Leibius* and *Littlejohn* deserve mention for general work; Holmes, Bowman, and Barlee (1) for *Latin composition*; but Barlee's *Greek parsing* was thoughtless and bad.

*Form Upper Remove*, considering that it receives boys from several forms of the Lower School, and is therefore more miscellaneous than the rest, is a credit to its teacher. The *Cæsar*, *Latin grammar*, and *composition* were all well done, and the *Greek grammar* very well done, the form reaching an average of 55 per cent. Hungerford (1), Mackay (1), Newcomen, Collins, and Thomson (2) deserve mention.

*Form Modern I.*—This form shows great improvement on last year; the *Virgil* translation was very good, and *Horace*, as far as the form had learnt, the form being well together.

The parsing is of a low standard, and also the composition, except that of Thomson (1). I may mention for general excellence the work of Thomson (1), and Woolcott, and I am struck with the improvement made by Fosbery since last year.

*Form Moderns II.*—This form works neatly, and has improved much since last year. Though the parsing is poor it is evident that great care has been spent on the teaching. Richardson did a good paper in *Cæsar*.

In the *Lower School* a great improvement is traceable throughout all the forms.

*Form III (A)* was very fair throughout. In the *Latin grammar* paper no boy obtained less than 35 per cent. out of a form of 33 boys. Thomson (3) and Taylor were excellent; Parker, Joseph, Dixson (1), and Windeyer very good. In *vivâ voce* Bernasconi did best, but the form generally were slow to answer. Not so *Form III (B)*.—Here the *vivâ voce* was excellent; the boys answered promptly, and showed generally bright intelligence. This form give signs of good systematic teaching, and parses very well. In the paper work Mackay (4) did best. *Form III (C)* did moderately, and considering that it is the lowest of the three produced good accident, but poor composition. Ramsay (1) and McInnes deserve mention.

*Form II (A)* is an excellent form. Its *Latin Grammar* paper was the same as that of the three forms above it, but out of thirty-seven boys only two obtained less than 25 per cent., Stephen (2) and Weigall being the best. The *vivâ voce* was good, and the *Latin sentences* very good; Weigall being first with 99 per cent., Stephen (1) 88, Stephen (2) 84, and the average of this large form, 54 per cent. *Form II (B)* are well together; Paterson and Kimross did good *Latin sentences*; Newbon best in *vivâ voce*. *Form Lower Remove* are also well together, Belisario being best in *vivâ voce*. *Form I*, the upper division, are well together, Colyer answering smartly, and Cranna (2) very well. In the *Lower Division I* may mention Boulter.

I now proceed to offer a few remarks on the general classical work of the school as a whole.

Throughout all the forms it is evident that the lower boys as well as the upper receive careful attention. Very few boys have done badly, a sign that the dull boys as well as the clever boys receive careful attention. I conclude that where a boy has done badly it arises from his own wilful carelessness.

In the upper school the most noticeable feature is the large amount of work got through in the year. As regards amount, this work would compare favourably with the classical work of the great public school of England. But it must be noted that here the language, not the subject matter, forms the chief part of the work. Such subjects as history, antiquities, verse composition, and general criticism with philology being hardly touched upon, except in the sixth form, and then as comments by the way, rather than distinct subjects.

Certainly it is better to have one branch well studied than several superficially, and for the sake of the majority of of boys who do not proceed to the University it is essential that the grammatical training, and the mental discipline, which belong to the study of Latin, should not be sacrificed to the mere memory work of gathering facts in Roman or Greek History. But on account of boys who do proceed to higher work, I would strongly recommend that the outlines of Roman History be begun in the fourth form, and of Greek History as a substitute for it in the fifth, while European History would be well changed into ancient in the classical sixth, for the latter would throw light upon the rest of the school work in a way that the European History could not. With one exception the work of the upper school is quite satisfactory, though there is not the same brilliant display of scholarship at the head as there was last year. That exception is the fifth form, where so much attention has been paid to the higher work of studying the connection of sentences and grasping passages as wholes, that grammatical accuracy has been sacrificed. This must prove a great drawback to the head-master when a boy is promoted to his form; for the groundwork which should have been kept up is lost; the boy has developed the grave mental fault of inaccuracy, and the groundwork which should have been perfected in the forms below has to be again established, with much loss of time. It is to be hoped that next year will see a decided improvement in this respect.

Of the lower school I can hardly speak too highly. The teaching has been thorough, the parsing very good. If any suggestion is to be offered it is that there shall be one grammar only, that thus confusion of grammatical rules may be avoided. There is confusion in all the forms about the rule and exceptions regarding the genitive plural of the third Latin declension, and also about the genders of nouns. I must here add a word in praise of the excellent discipline of the school. Among boys of the lower school generally I noticed a gentlemanly tone and a courtesy of behaviour that reflects the highest credit on the whole teaching staff. Of that staff I would say a few words in conclusion. It is a staff of which an English School might well be proud. All are men of scholarly education, and eleven out of the thirteen come from the English Universities. With such opportunities the Sydney Grammar School is capable of producing scholars second to none among Colonial school-boys; but they need to be fairly dealt with. Boys must not be sent here from the Public Schools or elsewhere at an age too late to get the good which this school can impart. I am glad to see that in this respect there is an improvement, the average duration of a boy's stay here being four years in the fifth form, and  $3\frac{1}{2}$  in form four. I may add in connection with rivalry of the Brisbane Grammar School with this school, that there is no provision here, as in Queensland, for drafting clever boys from the Public Schools to this school, and it is therefore presumable that the results are less brilliant than they would be if a proportion of the boys, as in the Brisbane Grammar School, consisted of exhibitors from the Public Schools of the Colony.

I have, &c.,

EDWIN BEAN, B.A.,

Late Scholar, Trinity College, Oxford,

Head-master of All Saints College, Bathurst.

### Report of the Mathematical Examiner.

To the Chairman of the Trustees of the Sydney Grammar School.

Sir,

The Grammar School, Sydney, 21 December, 1881.

I am very glad indeed to be able to begin by informing you that the mathematical state of the Sydney Grammar School is not only satisfactory as regards the present time, but also full of promise for the future. For, on the previous occasions, when I have had the honor of examining the school, I have had to discharge the unpleasant duty of speaking in very plain terms as to the deficient organization, and as to the defective system of classification, which I found on its mathematical side. These were organic faults; and being organic faults, I condemned them unsparingly in my reports for 1878 and 1879. To-day, however, I have the pleasure of reporting that they no longer exist; and of stating that the school system is now almost as perfect on its mathematical side as it has long been known to be on its classical.

I have no doubt as to the influence which this changed state of matters will exert on the future history of this place. Not only will it lead to the enlargement of the general average of the mathematical work done within these walls; but, what is of far greater importance, it will tend to raise the general school morale.

I have now to speak in some detail as to the results of the mathematical examination of this year.

The Euclid papers which I had to examine have been very good indeed. The propositions which have been attempted have been written out, as a rule, well and carefully, and a great many successful and a still larger number of honest attempts have been made to solve the riders which were set.

In algebra the average attainments are not so high, but I have had a large proportion of satisfactory, and a fair share of good, results.

As to arithmetic similar remarks apply. And having carefully read the report of the mathematical examiner for 1880, I may add that in my judgment the present state of the school in arithmetic compares very favourably with the state reported as existing at the end of last year.

The work of the Lower School is not only good, but the divisions have been arranged so that, with one exception, there is no great gap between the attainments of the best and worst of the boys in any one of them. In the highest division, however, there are five boys whose proper place in mathematics ought to be in the first or second division of the Upper School; of these boys, two, Oliver and Thompson (8), strike me as possessing unusual mathematical ability; and I shall be much surprised if they do not make their mark hereafter in the public examinations of the University.

In the Upper School the work of the boys of division I A compares unfavourably with that of the rest of the school. On the other hand, the boys of division IV have quite held their own with the boys of division III; and I feel bound to select the master of division IV for an especial compliment, on the excellence of his teaching throughout the year.

In divisions I and II the average results (excluding the higher paper in which only a few of the boys were expected to do well), have been very good indeed. The proportion of inaccurate working has been comparatively small; and the evidence of careful teaching have been everywhere manifest. Russell, Pratt (1), and Smith (1) are, so far as I can judge, boys of exceptional mathematical promise, who will doubtless distinguish themselves hereafter; and who, if they should decide on proceeding to the University of Sydney, will, in due time, maintain the credit which so many Grammar School boys have already won there. I have to add, however, that the mathematical attainments of the boys of the senior division are not so high as those of the boys of corresponding standing two years ago. But this deficiency in mathematical range at the top of the school may both be explained and excused by the facts that there have been several changes throughout the year in the mathematical staff; and that the gentleman who now occupies the position of mathematical master has only held his office for the last few months. Moreover, it is amply compensated by the system of careful classification of which I have already spoken at sufficient length. The development of that system is almost entirely due to Mr. Skinner, who was mathematical master for the first nine months of this year. I regret, and I am sure that every friend of the school will join with me in regretting, that the state of Mr. Skinner's health compelled him to sever his connection with the school so soon after his appointment to the direction of its mathematical work. But, at the same time, I am glad to have found that Mr. Skinner's mantle has fallen on a competent successor; and from what I have seen of Mr. Newberry's energy and capacity for organization I feel justified in expressing the opinion that the mathematical interests of the school could not be entrusted to more worthy or more capable hands.

I had intended to add some remarks as to the advisability of providing the school with a properly equipped chemical laboratory, and as to the necessity of improving several of the class-rooms and the school accommodation generally. But my report has already extended to so great a length that I will not trespass further on your patience—enough that material improvements are needed. I am confident that the Trustees, who are served by a staff of very able masters, will take due care that the work of these masters is not hampered by any obstacles which fall within the province of the governing body to remove.

I have, &c.,

THOMAS HARLIN, M.A.,

Late Fellow of St. Peter's College, Cambridge.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

TRAINING SCHOOL, HURLSTONE.

(ENGAGEMENT OF A LADY PRINCIPAL—CORRESPONDENCE, &c.)

*Ordered by the Legislative Assembly to be printed, 19 October, 1882.*

The Colonial Secretary to The Minister of Public Instruction.

Sir,

Colonial Secretary's Office, Sydney, 28 September, 1882.

I have the honor to inform you that on receipt in London of your private letter of February 14th, in which you suggested that I should endeavour while in England to engage a competent person to fill the office of Principal of the Female Training College about to be established in Sydney, I personally put myself in communication with Mr. Mundella, the Vice-President of the Committee of the Privy Council on Education, on the subject. Mr. Mundella entered very cordially into the matter, and assured me that he would do all in his power to obtain a thoroughly qualified person for the office. Subsequently I addressed to Mr. Mundella the letter dated May 23rd, copy of which forms No. 1 of the Appendix hereto.

2. The result of the correspondence which followed was that, on behalf of the Government, I entered into an engagement with Miss Caroline Mallett, of the Whitelands College, Chelsea, who may be expected to arrive in Sydney about the 20th November next. Miss Mallett explained to me that, though she was herself prepared to leave England at any time, she could not honourably leave the College until she had concluded a course of lectures on which she was then engaged, but she agreed to embark not later than the first week in October.

3. It will be seen from the letters in Appendix that Miss Mallett had gained in the Education Service of England the highest opinions as to her qualifications, from the Minister and all under him who had had opportunities of judging of her school work.

I have, &c.,

HENRY PARKES.

SCHEDULE OF APPENDIX.

1. Letter from Sir Henry Parkes to The Right Hon. A. J. Mundella, M.P.
2. " from The Right Hon. A. J. Mundella, M.P., to Sir Henry Parkes.
3. " from same to same (original).
4. " from Miss Mallett to The Right Hon. A. J. Mundella, M.P., with enclosure A (original).
5. " from Rev. J. P. Faunthorpe, M.A., Principal of Whitelands College (original).
- 6 & 7. " from Governesses of College.
8. " from Miss Mallett to Sir Henry Parkes.
9. " from Agent-General.

(1.)

Sir Henry Parkes to The Right Hon. A. J. Mundella, M.P.

Dear Sir,

98, Lancaster Gate, W., 23 May, 1882.

Some little time ago I received a letter from my colleague, the Minister of Public Instruction in New South Wales, suggesting that, while in England, I should endeavour to engage a lady of superior attainments as a trained teacher to take the office of Training Mistress of our Training School for Female Teachers.

I may mention that in 1880 a new Education Act was passed, and that under this enactment a separate Training School for Females is about being established. Hitherto all teachers have been trained in one school.

It may be well to explain further that the character of our trained teachers stands high, and we think our system sound and good. The object in seeking to obtain a lady from England is to secure in the Principal a practical knowledge of the working of the English system and those new influences in the work of teaching which an English lady, with her heart in her work, would bring with her. The salary named by my colleague is £300.

If you can assist me in selecting a qualified person for this office I shall, on behalf of the Government of New South Wales, esteem your services of much value.

I shall be happy to afford the fullest information respecting the Colony.

Yours, &c.,  
HENRY PARKES.

(2.)

The Right Hon. A. J. Mundella, M.P., to Sir Henry Parkes.

Dear Sir Henry,

Privy Council Office, 26 June, 1882.

I have found the right person for your Training College. When will you see her? Would you like to meet her here, or shall I send her to you? I could fix a time that would be convenient for you to see her here to-morrow, or any day this week.

I should like to tell you personally all I have learnt about her.

Faithfully yours,  
A. J. MUNDELLA.

(3.)

The Right Hon. A. J. Mundella, M.P., to Sir Henry Parkes.

My dear Sir Henry,

Privy Council Office, 29 June, 1882.

Herewith I enclose letters I have received from Miss Caroline Mallett, and testimonials from Mr. Faunthorpe, Principal of Whitelands Training College, and the two principal governesses.

Canon Warburton, H.M. Inspector of Training Colleges, agrees with me that no more accomplished and successful teacher could be found to take the position of Lady Principal of a Training College than Miss Mallett. She has not reached this position in England as yet because of her youth, but that she will attain it, if she remains, I think there can be no doubt; and as we have made considerable advances of late years in educational science, I am of opinion that Miss Mallett has had greater advantages, and possesses a better knowledge of modern methods, than teachers who have been longer in the profession.

I believe that if Miss Mallett is selected to fill the post of Lady Principal she will acquit herself to your satisfaction, and reflect credit upon her English training.

I remain, &c.,  
A. J. MUNDELLA.

(4.)

Miss Caroline Mallett to The Right Hon. A. J. Mundella, M.P.

Sir,

Whitelands Training School, Chelsea, S.W., 29 June, 1882.

In obedience to your order by telegram, I waited on Sir Henry Parkes last evening. He wished me to send to you my testimonials, and another copy of my parchment reports, and the list of certificates which I hold, as he said he must receive them through you.

I apologize for trespassing thus upon your valuable time.

And remain, &c.,  
CAROLINE MALLET.

A.

Whitelands Training College, London.

Copies of Reports on C. M. Mallett's Parchments, with dates.

- 1878.—"Miss Mallett teaches with earnestness and care, and is likely to make an efficient governess."—From Canon Tinling, H.M.I.  
1879.—"Miss Mallett teaches with intelligence and thoughtfulness; she shows full knowledge of her subject."—From Canon Tinling, H.M.I.  
1880.—"Miss Mallett is a good teacher, simple in manner, and with very fair language."—From Canon Tinling, H.M.I.  
1881.—"Miss Mallett taught on a well-chosen and useful subject, cleverly illustrated by a lesson given to very young children. Her manner was patient and self-reliant, and the discipline of the babies was maintained in a kind and firm manner."—From Mr. Campbell, H.M.I.  
1882.—"Miss Mallett teaches clearly and intelligently, and with a thorough knowledge of her subject. She shows considerable skill in maintaining the attention and interest of her class."—From Mr. Campbell, H.M.I.

1881.—First-class Certificate of Merit, from Dr. B. W. Richardson, M.D., LL.D., F.R.V., for proficiency in Domestic Sanitation.—Given with Edwin Chadwick's prize of five guineas.  
1882.—First-class Certificate of Merit from B. W. Richardson, M.D., LL.D., F.R.V., for proficiency in Domestic Sanitation.—Given with the Lady Sudely prize of one guinea.  
1882.—A Certificate from the St. John's Ambulance Association.

Copied 29 June, 1882,—

CAROLINE MALLET.

(5.)

The Rev. J. B. Faunthorpe, M.A., F.R.G.S., Principal of Whitelands College, to Sir Henry Parkes.

Sir,

Whitelands College, 29 June, 1882.

I have very special pleasure in testifying to the exceptional ability of Miss Mallett for the post she is seeking.

She was trained by me nearly seven years ago. She was the *first* student of her year out of seventy (*facile princeps*). She obtained, of course, a first-class in both the secular and religious knowledge lists. She gave the best lesson of her year before Her Majesty's Inspector, and was marked excellent for it. The Council appointed her Governess of the College at my recommendation, and she has more than justified my choice. Indeed I am very sorry that she is leaving.

The reports on her parchment certificate, of which she encloses copies, show that she is an excellent teacher. She is an excellent disciplinarian and manager. The students like her, and she makes them get on with her work. I consider she is quite competent, not only to manage your College, but, as she is both theoretically and practically acquainted with the best English methods and has measured their success, also to make it a success.

She is a very excellent teacher, practical and theoretical, of school management, pedagogy; and has some knowledge of the Kindergarten system. She is thoroughly familiar with all parts of the work of a Training College—teaching, examination, discipline, &c.

Besides her Certificate from the Education Department of the First-class, she holds the following Certificates:—

(a.) Obtained when a student—

1. First-class Archbishop's Certificate.
2. Full Drawing Certificate, "D."
3. Physical Geography, 2nd Class Advanced Stage, Science and Art Department.
4. Botany, do. do., First-class.

(b.) Obtained since she has been Governess with me—

1. First-class Advanced Stage Physiology, Science and Art Department.
2. { " in Domestic Sanitation } Edwin Chadwick, Esq., prize.
- { " Dr. Richardson's 1st Course }
3. " " 2nd Course. Lady Sudely prize.
4. " St. John's Ambulance Society.

Besides Pedagogy and Geography, she has taught very successfully the following sciences:—

Physiology.  
Botany.

I can only say, in conclusion, that I am the more regretful after seeing this list of certificates than I was before that she is leaving me; but as it is for an increase of her usefulness I am content. I ought to add that by her own endeavours she has a very fair knowledge of Greek, Latin, and French.

She is, I believe, a consistent Churchwoman, and will be an ornament to any College.

I am, &c.,

JNO. B. FAUNTHORPE, M.A., F.R.G.S.,  
Principal.

Miss Stanley, Governess, Whitelands College, to Sir Henry Parkes.

Sir,

Whitelands College, 29 June, 1882.

It affords me great pleasure to be able most cordially to testify to Miss Mallett's high personal character, as well as to her unusual ability as a teacher. After having successfully completed her two years' training in this College, she was appointed governess, and has performed the duties of her position in an exemplary manner. For the last six years she has been in constant daily association with the other officers of the College staff, to each and all of whom she has ever shown herself readily obliging. To the students she has been sympathetic and kind. They all love and respect her, and appreciate the value both of her lessons in class and her help to them individually. She is frank and ingenuous, and with strict firmness of discipline blends affectionate kindness of manner. Miss Mallett is an excellent needlewoman, and as a senior student took the first prize for needlework. She is fond of the subject, and is thoroughly competent to teach it in all its branches. She has always assisted me with the students, and has given very successful collective lessons both in needlework and cutting out to a class of seventy. She is perfectly familiar with the requirements of the New Code, Schedule III, and I do not know anyone more competent to teach students to fulfil them. She is clear and decisive in her directions, and exact in her statements. I am extremely sorry to lose her, as I know that I shall have the utmost difficulty to replace her in my workroom.

For more than twenty years I have been a governess in Whitelands, and in 1876 I became head governess, and have taught needlework all that period. Quite recently, too, I have been elected Fellow of the Royal Botanical Society.

I am, &c.,

KATE STANLEY.

(7.)

From Mrs. Newton, Superintendent, Whitelands College.

Whitelands College, 29 June, 1882.

Mrs. Newton has great pleasure in recommending Miss Caroline M. Mallett as a thoroughly efficient manager in practical Domestic Economy. Miss Mallett has passed through the College cookery classes; has been a great help in arranging the dormitories and linen presses, blankets, &c.; and understands sanitary arrangements of offices.

Mrs. Newton is in her tenth year as Superintendent of Whitelands College; was formerly Superintendent of the R. S. Hants Infirmary, Southampton, and out through the greater part of the Crimean War as nurse. Mrs. Newton was recommended to this College by the late Bishop Wilberforce, by General Lord William Paulet, who had command of the Forces in Bosphorus in the Crimean War, and by Rev. W. H. Brookfields, H.M.I. Schools.

(8.)

Miss Caroline Mallett to Sir Henry Parkes.

Sir,

Whitelands College, Chelsea, London, 30 June, 1882.

With many thanks I accept the post of Lady Principal of the Training College in Sydney, which you have honoured me this morning by offering me.

I promise to embark not later than the first week in October.

I understand that a saloon passage to Sydney will be provided for me by the Government of New South Wales, and that my salary will be £300 a year, to commence from the date at which I enter on my duties.

I will endeavour, by earnest and successful work, to prove myself worthy of the post to which you have appointed me.

I am, &amp;c.,

CAROLINE MALLET.

(9.)

From The Agent-General to The Colonial Secretary.

Lady Principal for Training College.

Sir,

5, Westminster Chambers, Victoria-street, S.W., 9 August, 1882.

Referring to Sir Henry Parkes' telegram of the 30th June last, I have the honor to inform you that I have secured a berth in the s.s. "Potosi," to sail on the 5th October next, for Miss Caroline Mallett.

I have, &amp;c.,

SAUL SAMUEL.

**BLANDFORD PROPRIETARY SCHOOL BILL.**

---

**REPORT.**

---

THE SELECT COMMITTEE of the Legislative Assembly for whose inquiry and report was referred, on the 11th October, 1882,—“*the Blandford Proprietary School Bill,*”—beg to report to your Honorable House:—

That they have examined the witnesses named in the List\* (whose See List, page 5 evidence will be found appended hereto); and that the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, to which it was deemed necessary to add a new clause.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

J. F. BURNS,  
Chairman.

*No. 3 Committee Room,  
Sydney, 25th October, 1882.*

---

## PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 18 OCTOBER, 1882.

MEMBERS PRESENT:—

Mr. Burns,		Mr. Martin,
Mr. John Brown,		Mr. Hungerford,
	Mr. Fawcett.	

Mr. Burns called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce the same, before the Committee.

Present:—Henry Burton Bradley, Esq. (*Solicitor for the Bill*).

Henry Burton Bradley, Esq., sworn and examined.

Witness produced the following original documents, and handed in copies of the same:—

Information and Bill filed on the 23rd December, 1874, by the Attorney-General, at the instance of the Right Reverend Dr. Tyrrell, in Humphry and others, Plaintiffs, v. Scott and others, Defendants.

Decree made, on or about the 27th June, 1877, by the Supreme Court in Equity, in Attorney-General v. Scott and others.

License dated 31 December, 1880, under the Company's Act, and signed by Sir Henry Parkes.

Notice, dated 5th February, 1880, addressed to subscribers and others, inviting subscriptions to new shares, &amp;c.

Conveyance, dated 25 February, 1881, of 150 acres of land, parish of Murulla, County of Brisbane, from P. W. Wright to the Trustees of the Blandford Proprietary School.

Letter, dated 18 August, 1882, from Mr. Frederick R. White to Messrs. Bradley &amp; Son, declining to concur in the Bill.

Declaration of Trust, dated 19 July, 1844, of 21 acres 3 roods 20 perches of land at Honey-suckle Point, Newcastle, signed by William Croasdill and Alexander Walker Scott.

Conveyance, dated 19 July, 1844, of same land, from James Mitchell and Wife to William Croasdill and Alexander Walter Scott.

Richard Holdsworth, Esq., called in, sworn, and examined.

Witness withdrew.

Peter Campbell Curtis, Esq. (*Chief Clerk in Equity, Supreme Court*), called in, sworn, and examined.

Witness produced the original list of contributors to the establishment of a School at Blandford; also the original declaration of trust by Messrs. Croasdill and Scott.

Witness withdrew.

Alexander Walker Scott, Esq. (*a Trustee of the School*), called in, sworn, and examined.

Witness withdrew.

Edmund Baker Boulton, Esq., called in, sworn, and examined.

Room cleared.

Committee deliberated.

Ordered, That Edmund Barton, Esq., M.P. be requested, and Henry Wheeler Gillam, Esq., and Francis John Wickham, Esq., be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at Three o'clock.]

WEDNESDAY, 25 OCTOBER, 1882.

MEMBERS PRESENT:—

Mr. Burns in the Chair.

Mr. John Brown,		Mr. Fawcett,
Mr. Hezlet,		Mr. Jacob.

Edmund Barton, Esq., M.P. (*Secretary to the Blandford Proprietary School*), called in, sworn, and examined.

Witness produced the Minute-book of the Company.

Witness withdrew.

Henry Wheeler Gillam, Esq. (*Deputy Registrar-General*), called in, sworn, and examined.

Witness produced Register-book of land purchases No. 11 of 1841, showing entries of four grants issued to James Mitchell on 5th February, 1841.

Witness withdrew.

Francis John Wickham, Esq. (*Accountant, Railway Department*), called in, sworn, and examined.

Witness withdrew.

Henry Burton Bradley, Esq., further examined.

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Solicitor called in and informed.

Clauses 1 to 10 read and agreed to.

New Clause\* to stand Clause 11, read and agreed to.

Schedules read and agreed to.

Title read and agreed to.

Chairman to report the Bill, with an amendment, to the House.

\* See Schedule of Amendment.

SCHEDULE OF AMENDMENT.

Page 4. *Insert* the following new Clause, to stand as Clause 11,—“This Act may be cited as the ‘Blandford Proprietary School Act of 1882.’”

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

## BLANDFORD PROPRIETARY SCHOOL BILL.

THURSDAY, 19 OCTOBER, 1882.

Present:—

MR. JOHN BROWN,  
MR. BURNS,MR. FAWCETT,  
MR. HUNGERFORD,

MR. MARTIN.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

Mr. Burton Bradley appeared as Solicitor for the Bill.

Henry Burton Bradley, Esq., Solicitor for the Bill, examined:—

1. *Chairman.*] I believe you are Solicitor for this Bill, and have also been a Trustee of the property to be affected by it? I am Solicitor, and have been Agent for Mr. Scott's co-Trustee—Mr. Croasdill—for many years, but that agency has for a long time ceased.
2. You are at the present time Solicitor for the Bill and for the estate? Yes.
3. Will you be good enough to explain the object of the parties concerned in asking the Legislature for this Bill? The object of the parties concerned is the winding-up of an adventure which, having had its inception some forty years ago in a different state of circumstances and a different state of public feeling on the subject of education, and having long lain in abeyance, has now proved to be unsuitable to the time, unsuitable to the public feeling, and impracticable, having reference to the amount of money at the disposal of the Trustees. In or about the month of September, 1840, a number of ladies and gentlemen mentioned in the first Schedule to the Bill, impressed with the desirableness of the establishment of a Superior School in connection with the Church of England, selected Newcastle, which was at that time considered the sanitarium of the Colony—a place of small trade and small population, but very healthfully situated—as a site for a school. A sum of money was subscribed, amounting in the whole to £650 or thereabouts, and a loan was made by the then Bishop of Australia, the late Dr. Broughton, on behalf of his constituents, the Society for Promoting Christian Knowledge, of £500, in order to facilitate the acquisition of a suitable piece or pieces of land then being offered for sale by the Government at Honeysuckle Point, Newcastle. The late Dr. Mitchell, at the request of the subscribers or some of them, became the purchaser at the Government sale of 21 acres 3 roods and 20 perches of land at Honeysuckle Point, for the sum of £303 15s. In due course of time four grants from the Crown issued in respect of the four parcels, making up the total area which I have mentioned. The grants were dated the 5th February, 1841. After the purchase Bishop Broughton, being anxious that the foundation of the adventure to which he had made this loan should be permanently recognized and established, asked my uncle, old Judge Burton, to oblige him by drawing up a form of trust deed by which the land should be vested in two Trustees—the late Mr. William Croasdill and Mr. Alexander Walker Scott, one of the petitioners for the present Bill.

H. B.  
Bradley, Esq.  
19 Oct., 1882.

H. B.  
Bradley, Esq.  
19 Oct., 1882.

4. Mr. Croasdill is dead? Yes. Accordingly my uncle got this trust deed prepared, and it was signed by Dr. Mitchell, by the two Trustees, and by the old Bishop. Simultaneously, or thereabouts, a conveyance was made by Dr. Mitchell to the two Trustees, by which conveyance the lands granted were vested at law in the Trustees, the trusts being declared by the trust deed which I have mentioned. This being done, only a small sum of money remained in the hands of the late Dr. Mitchell, who was Treasurer to the scheme, wholly insufficient for the erection of the meanest building, and bad times coming upon the community—I think 1844 and '45 were about the worst years we have ever had—the Bank of Australia time—no effect seems to have been made to obtain increased subscriptions, no further sums were paid up on the shares which were subscribed for, and the scheme remained in abeyance. Mr. Croasdill went to England. The See of Newcastle was established. The Bishop who then took charge of Newcastle received some information that a parcel of land at Honeysuckle Point belonged to the Church, and he immediately took upon himself, without inquiry into the title, to have it parcelled out into allotments, and granted leases of it to a large number of persons, who erected buildings and wharves, and made other improvements. When this came to the knowledge of Mr. Croasdill and Mr. Scott they were very much perplexed what to do. They had no money to pay lawyers; the scheme appeared by common consent then to have been abandoned as a school scheme; and eventually Mr. Croasdill asked me if I would consider his personal position in relation to the trust. In some portion of the time which I have mentioned, after the Bishop's lessees had made their improvements, a Company was established for the purpose of forming the Hunter River Railway. This Company took, under statutory powers, on or about the 4th July, 1854, the whole of the land vested in these Trustees, for railway purposes. Subsequently to that taking, a general Railway Act enabled the Government to purchase from the Hunter River Railway Company their property, and by that Act the Company's property became vested in the Commissioner for Railways. Mr. Croasdill and Mr. Scott, after considerable delay and difficulty, in about the year 1866, obtained a reference to arbitration between the Commissioner for Railways and themselves, of the question of compensation for the land which they had been deprived of primarily by the Hunter River Railway Company, and eventually by the vesting of the land in the Commissioner. During the course of this arbitration, which took place at Newcastle, and which I attended on behalf of the Trustees, the Commissioner for Railways stated that a portion of the land taken for railway purposes had been resumed by the Minister for Lands, under reservations contained in the deeds of grant of the area between high-water-mark and 100 feet above it; and he contended that therefore the arbitrators had nothing to do with assessing the value of that land, but only of the remaining land. The arbitrators made their award, in pursuance of which an amount was paid into the hands of the Master in Equity of the Supreme Court of this Colony, and on or about the 2nd of June, 1869, was taken out by me, as the Trustees' solicitor, namely, the sum of £9,310 14s. 6d., in ninety-three Government debentures of £100 each, and £10 14s. 6d. in the Master's official cheque. After the receipt of this money the original subscribers remaining and the representatives of many who had died were called together by circulars from the Trustees, and met from time to time at my office, for the purpose of considering, primarily, in what manner the original design could be carried out, and, secondarily, as to the course to be adopted for distribution of the funds in case the original design could not be carried out. The subject of the claim upon the Crown for the value of the land which had been resumed was also considered at various meetings, and eventually it was resolved that the Honorable House of which I am now addressing a Committee should be petitioned for relief in respect of the peculiar circumstances of the case; for, in estimating the value of the land sold to the original promoters of the scheme, its waterside frontage and opportunities of making wharves had been made use of by the auctioneer to enhance the value and obtain a better price; but in estimating the compensation at the hands of the arbitrators that element of value had been carefully taken away; so that whereas the promoters had bought waterside land, they were to be paid for land having no water frontage. A petition was accordingly presented, of which I hold the official printed copy presented to the Legislative Assembly and ordered to be printed on the 18th February, 1870. The report of the Select Committee to which this petition was referred I hold in my hand—a printed copy—and with your leave I will hand it in. The Committee in effect reported that which I have already stated in that behalf; and they also reported "that it appears by the evidence of Mr. Maitland, the surveyor, that 7 acres and 7 perches of land were included in the reservation in the grants, or are within 100 feet of high-water-mark; that the value of such land at the time of the taking by the Hunter River Railway Company was about £2,000 per acre; that since the taking by the Railway Company in 1854, the petitioner and his co-Trustee have been wholly deprived of all benefit from their land"; and they went on to say, "Your Committee are of opinion that the petitioner's case for relief has been completely established, and therefore recommend it to the immediate and favourable consideration of the Government." This report is dated 25th March, 1870, and signed "Benjamin Lee, Chairman." This report having been obtained, Mr. Williams, the Crown Solicitor, was directed by Sir John Robertson to consider the principle upon which the petitioners were entitled to claim relief at the hands of the Government, upon the report of the Committee of this Honorable House. It is not necessary, I think, for me to go into the details of the matter further than to say that Mr. Williams adopted one principle of compensation, while the Trustees were advised that another principle was the proper one to be applied. Not any action, therefore, was taken upon this reference to the Crown Solicitor, and upon the recommendation of the report on which I have given evidence, the Blandford Proprietary School proprietors have still a claim to consideration at the hands of the Government in respect of that compensation.

5. What amount do the Trustees claim from the Government? The Trustees have not made any specific claim. Mr. Williams thought we should get our money back with 5 per cent. interest, and we thought we were entitled to the value of the land. During the forty years and upwards which have elapsed since the original scheme was launched a large number of the original proprietors have departed this life. Mr. Robert Scott, Mr. Helenus Scott, Dr. James Mitchell, Captain D. C. F. Scott, Mr. James Donnithorne, Mr. J. W. Gosling, and many others, have departed this life. Others have become insolvent, and some have quitted the Colony. In that condition of matters, and while the original subscribers and representatives of the deceased, insolvent, and absent subscribers, were considering in what manner they should ask for legislative aid to enable them to establish a school, with a provision for winding-up in case such establishment should be found impracticable or undesirable, a suit was instituted in the Supreme Court of this Colony, by the filing of a bill by the Attorney General, at the instance of the late Right Reverend

Dr.

Dr. Tyrrell, Bishop of Newcastle, against Mr. Scott (the petitioner), myself, and other persons, H. B. Bradley, Esq., for the purpose, amongst other things, of carrying into effect the design of the original shareholders. This is a copy of that information and bill. (*Handed in.*) Such proceedings were had in the suit that, on or about the 27th of June, 1877, a decree was made by the Supreme Court in Equity, of which I hold in a copy. (*Handed in.*) By this decree it was referred to the Master in Equity to settle a scheme for the establishment of a school at Newcastle; and such proceedings were afterwards had that a scheme was duly settled which took the form of this license which I hold in my hand, signed by Sir Henry Parkes. (*Produced.*) This is a copy of that license, which I would ask leave to leave with you, in order that I may not be deprived of the original. (*Handed in.*) This scheme was duly settled, approved, and confirmed by the Court, and adopted, as you observe, under the provisions of the Companies Act, enabling the adventure to be carried on—not being an adventure of profit—under the form of a license. By this scheme provisions were made for allotting shares to such of the original shareholders as should elect to come in and should make their election known within a limited time, and for allotting new shares to such new subscribers as might be willing to come in and join in the scheme. By this scheme Mr. Alexander Walker Scott and the Venerable Archdeacon Coles Child, the petitioners before your Committee, together with Mr. Frederick Robert White, were appointed Trustees. The Trustees, on or about the 5th February, 1880, issued and distributed many hundreds of notices, a copy of which I hold in my hand, addressed to original subscribers to the school, and to others, inviting, in fact, subscription of new shares and the taking up of old ones. (*Paper referred to handed in.*) Many of these circulars or notices were issued by my firm; a large number more by Mr. Salter, the solicitor for the late Bishop of Newcastle, who had filed the bill, and many by the Trustees individually. In pursuance of these notices, a few of the original subscribers consented to come in without payment and take up the shares which this scheme allotted to them in respect of their past payments. Among these were Mr. Alexander Walker Scott, myself and Lady Deas-Thomson, as executor and executrix of Sir Edward Deas-Thomson, Mr. Gordon Sandeman, the representatives of the late Leslie Duguid, Esq., Mr. Holdsworth, who is here to-day, and some others—a very few. I personally found it impossible to induce a great many old members—whom I wished to join for the purpose of working the thing, if it could be worked, or of making a speedy winding-up of it if it could not be worked—to interest themselves in the matter, which at any rate cost them nothing, and the provisions of which protected them from loss; but they refused to join it, even though they had nothing to pay. New subscribers came in, in the persons of the Venerable Archdeacon Coles Child, Mr. Frederick Robert White, and Mr. Joseph Palmer Abbott, who took five shares between them, and to them have been allotted the shares mentioned in the second Schedule to the Bill. The Trustees have purchased as site for the school 150 acres of land situate at Blandford, in the parish of Nurulla, in the county of Brisbane, in this Colony, and the same have, by a conveyance which I hold in my hand, been duly conveyed to the two petitioners and Mr. Frederick Robert White. I would ask that a copy of this conveyance may be accepted as an exhibit (*handed in*) in lieu of the original, which I produce. (*Produced.*) From a statement which another witness will make to you, it will be gathered by the Committee that the funds in the hands of the Trustees are insufficient for the establishment of a school. I have said that the efforts which have been made to obtain the subscriptions of additional shareholders have met with very limited success, that success being the subscription for five new shares to which I have referred. In view of this limited success, a majority of the proprietors—original shareholders who have joined in the new scheme and new subscribers—at a meeting, the records of which I have in my hand (*produced*), signed by the Chairman, the Honorable F. M. Darley, held at his chambers, on the 25th February, 1881, resolved in general meeting duly convened, as follows—I read the resolution from the Minute-book:—"Moved by Mr. Bradley, seconded by Mr. Holdsworth, and carried, that the establishment of the intended school having proved to be impracticable, it is desirable to wind up the undertaking." I need not trouble you further with that. I will hand you the original Minute-book (*produced*), and I may state as a matter of evidence that it is apparent that the scheme cannot at the present time be successful.

6. *Mr. Hungerford.*] What sum did the Hunter River Railway Company pay for the land they took? The Company had paid nothing when the Government took over the land. The sum of £9,310 14s. 6d. was eventually received by me, as solicitor for the Trustees, from the Government.

7. *Chairman.*] What is your estimate in round numbers of the assets now? That evidence you will have distinctly from Mr. Scott, who has his memoranda of the state of the account. I believe the amount of the present assets stands at £14,212 17s. 1d., estimating the 150 acres of land at Blandford as being worth £900. The other assets consist of the balance of the original subscriptions in the hands of the representatives of the late Treasurer, Dr. Mitchell—a sum that has not been defined, but is in part definable, no doubt, by reference to the facts that a sum of £1,150 was originally raised by loan and by subscription, and that a sum of £803 15s. was paid by Dr. Mitchell for the land. The difference between these sums would be in the hands of the Treasurer (Dr. Mitchell). The Trustees have never been able to obtain from Dr. Mitchell or his representatives any admission as to the possession of these moneys or obligation to pay them; nevertheless, as Dr. Mitchell was Trustee in respect of the money, and no time will run at law between Trustees and their beneficiaries, this money may be presumed to be recoverable notwithstanding that forty years have elapsed. The other asset to be collected is the compensation, which my clients hope they will receive in some shape from the Government, under the recommendation of the favourable report which I have quoted, on account of their claim for the land 100 feet back from high-water-mark.

8. You might now state briefly your own reasons for thinking the scheme must be abandoned? My reasons are partly financial, and partly reasons arising from the policy of the Government and the condition of the country, in reference to educational establishments.

9. *Mr. John Brown.*] Was this 100 feet from high-water-mark included in the original grant? Yes, and paid for at so much an acre.

10. Did the Government give any compensation for it? That was the question which was referred to the Select Committee I have spoken of. The Honorable Member will observe that we were advising the Trustees in reference to matters of considerable complexity, and it would have been perhaps injudicious on our part to involve them in expensive litigation. We therefore contented ourselves with obtaining that favourable report and leaving the matter there. While there was living evidence I advised that we should take that evidence and have it recorded where it would live for ever, trusting that some Government will some day do us justice.

H. B. Bradley, Esq.  
19 Oct., 1882.

11. *Chairman.*] Will you now resume your reasons for believing the scheme impracticable? I am looking now at the scheme as drawn up in consequence of the proceedings in the Court of Equity. The scheme states, in clause 6, "That the property of the school for the purpose of the interests of the proprietors therein shall be considered as divided into 300 shares of £50 each, to be called for at such periods and in such manner as the Directors may determine." It also provided, as I have mentioned before, that the original subscribers and their representatives should be deemed to be proprietors of a fully paid-up share for every two shares originally subscribed for as appeared by the list, provided that they should, within three months from 1st January, 1880, notify to the Trustees their intention to take them up. In pursuance of the circular notice issued by the Trustees, five new shares of £50 each out of the 300 contemplated by the scheme to form the capital of the Company, in other words £250 have been raised in place of 300 times £50, or £15,000 in all, contemplated by the scheme. That is one of the grounds for my opinion that the scheme cannot at the present time be successful. Another ground is this: at the time this adventure was originally conceived I happened, as being an inmate of my old uncle's house and a member of his family, to be very intimately acquainted with the feeling which existed in his mind, in the mind of his old friend the Bishop, the late Mr. Norton, and many other old colonists, on the subject of the want of education for the sons of persons, members of the Church of England, who desired that the religious element should enter systematically into the training of their sons. So far back as the year 1834 I remember a general expression of regret that the element of religion was taken out of the educational system at that time gaining favour in Sydney—I allude to the Sydney College amongst others—and it was for the purpose of giving expression to that feeling, as a place for the purpose of providing education for the sons of the subscribers themselves in a great many instances, that this school scheme was originally got up. Since that time broader views have been taken upon the subject of education. A great number of public schools have been established, many of them supported by and many of them subsidized by the Government from time to time, private establishments for the tuition of boys having in many instances given way under the pressure of the subsidized schools. My old friend, the late Mr. William Timothy Cape, who brought up most of our present legislators, told me himself that he was obliged to close his school because he could not compete with the Government, that as soon as he got a good teacher one of the Government establishments took him away from him by giving a better salary than he could afford to pay, and therefore private establishments could not compete with subsidized establishments. This statement was made to me by Mr. Cape probably as far back as twenty years ago, for he, poor man, has been many years dead. Since that time the extension of the Government schools has been very great. The plan of superior schools and high schools which has been approved by the Legislature, and to some extent has found expression at the hands of the Government, has operated still further disadvantageously against the establishment of private schools having similar objects. It appears to me that another reason why the scheme cannot at the present time be successful is this, that so many persons entitled gratuitously to certain advantages in the nomination of scholars have declined to take them as a gift; they will not have anything to do with our school even as a gift; they being the very persons who forty years before subscribed their money and evinced their anxiety to establish a school under the then different circumstances of the Colony. As solicitor for the school I received instructions, in pursuance of a resolution adopted by a general meeting, following the resolution which I have had the honor to read to the Committee, to the following effect:—"That Messrs. Bradley & Son be instructed to prepare a Bill to wind up the undertaking." I thereupon prepared a petition in the names of the three Trustees, obtained the signature of Mr. Scott, and forwarded it to Mr. Frederick Robert White for his signature. Mr. White declined to concur in the petition. He writes a long letter, which I will put in if you choose to take it (*letter produced*); but the pith of it only I will state in my evidence. He says, "I have no wish to stand in the way of what is said to be the wish of the great majority of those interested; I only regret that I should be placed in a position in which I may appear to do so." He adds, after some other little matter, "I would very willingly receive back the value of my shares and wash my hands of it. I have long wished and intended to resign my position as Trustee, a position which from the first I was averse to accept, and will now take the opportunity of doing so by sending in my resignation to the Board, and forwarding the same by this post. This may perhaps facilitate matters in regard to the course proposed. Not knowing the name or address of the President, I enclose my letter of resignation to him, and would be much obliged if you would add the address and post same." We received the letter of resignation, and forwarded it to Mr. Edmund Barton, the Secretary to the Proprietary School, who is at present on circuit, and his evidence will not be obtainable until next week. There will also be in attendance when required the proper officers from several public Departments, in case the Committee desire them to produce the originals of several documents connected with the case. For instance, the original list of shareholders is in the hands of the Master in Equity, also the original bill filed in equity in the suit before referred to, and the original decree. I have here a copy of the original deed declaring the trust, that deed having been signed by Mr. Croasdill and Mr. Scott. (*Copy handed in*). The original conveyance, of which this is a copy (*handed in*), alluded to in a former part of my evidence, by which Dr. Mitchell conveyed the four grants to the two Trustees, was delivered over, along with the grants themselves, to the Commissioner for Railways, when he completed his purchase, as it were, of the land comprised in them. Therefore I am not in a position to produce that conveyance. If I may be allowed to add to the evidence which I have incompletely given before, I would say that, in addition to the reasons which I have given why it is desirable that the School should be wound up is that, in the course of the suit by the Bishop of Newcastle against the Trustees, which issued in the scheme referred to, the evidence of a large number of original subscribers and representatives of original subscribers was given, testifying their desire that the school should be wound up. Among these original subscribers who so testified were the late Sir Edward Deas-Thomson, then living, Mr. Walter Lamb, representing the late Mr. John Lamb, Mr. Richard Holdsworth, representing the late Mr. Leslie Duguid, and many other persons, who testified their desire and opinion that the scheme should be wound up. These resolutions having been arrived at, the subject of the loan made by the late Bishop of Australia on behalf of the Society in England, and the manner in which its settlement should be attempted, became the subject of consideration by meetings of the shareholders in the present adventure, and the mode to be adopted was discussed at several meetings. Some correspondence took place between the present Bishop of Newcastle, who holds the power of attorney for the Society, and the Secretary, Mr. Barton, as to the payment which His Lordship would expect to receive in respect to the £500 lent in 1840 or 1841, and which might have been considered to

have

have so far fructified in the increased value of the land as to entitle the lender not to mere interest upon his loan, but to a participation in the profits. I contended unsuccessfully against that view, and, upon the evidence afforded by the word "loan," written by the late Bishop Broughton, felt that the Society would be amply compensated by receiving their £500 back, with interest at 8 per cent. for forty years. However, by a resolution of the shareholders—old shareholders and new shareholders—arrived at at a meeting presided over by Mr. Darley, it was resolved to address the Bishop and inquire what sum he would be satisfied to receive on behalf of his Society. He was accordingly so addressed, and having intimated in the meantime his views that the Society should receive £5,000, it was at the meeting of the 25th February, to which I have before referred, resolved as follows:—"That the Directors be authorized to close with the Bishop for any sum not exceeding £5,000." Another resolution was carried, that in the event of the assent of the Bishop the solicitors be authorized to solicit a private Act to enable and facilitate the winding-up, and that in such measure provision be made for the participation of the original shareholders, who had not given in their adhesion to the scheme, in the division; as it was not considered fair that they should be shut out when the scheme for the school broke down and matters reverted to their original state, that they should not participate in the division of the funds that have been made the subject of provision in this Bill. Having received directions in that behalf, I prepared the Bill which is now before you, and forwarded it, a few days before the 8th December last year, to the present Bishop of Newcastle, for his consideration. I have here a letter (*produced*) from him—one of several, the others perhaps not being important—in which His Lordship says, "I have looked carefully through the draft Bill respecting the Blandford School which you kindly sent me, and which I return herewith. It appears to me to embody very fairly the main provisions that are desirable in this matter." Other correspondence took place between myself and the Bishop, with reference to His Lordship's authority from the Society in England to deal with the matter, in pursuance of which I prepared and submitted to His Lordship a draft of such a power of attorney as it would be satisfactory to the Trustees, my clients, to receive upon handing him over the money. His Lordship was kind enough to send that to England. Some few months' delay occurred, and eventually, on the 22nd of March last, His Lordship wrote me the letter which I hold in my hand (*produced*), in which he says, "I received this morning the power of attorney on behalf of the Society for Promoting Christian Knowledge which has been so long expected. They agree to the provisions therein laid down." So that the measure not only in principle but in detail has had the advantage of the approval of the Bishop, as representing our largest creditor. The draft Bill, before being sent to the Bishop, if I remember rightly, was approved by Mr. Barton as Counsel in the Law, who had the advantage of being Secretary to the institution and therefore knew something about it, and was presented by me to a general meeting of Directors, and by them adopted. Under these circumstances it will be observed that the Bill—not a very long one excepting its preamble—makes provision for the interests of all parties. The three gentlemen who have subscribed £250 between them will participate to the same extent as the holders of old shares who have lain out of their money for so many years. That is all approved of by new shareholders and old shareholders. The Society, which lent the shareholders £500 forty years ago, will get £5,000. The other provisions of the Bill enable the Trustees and their successors to wind up the affairs in the ordinary manner, by sale of such things as are saleable, by collection of such debts and claims as are colligible, and by providing for the payment of moneys in respect of the shares of persons deceased, absent, insolvent, or that cannot be found, into a place of safety and responsibility in the hands of the Master in Equity of the Supreme Court, whence the funds can be drawn out by persons who can make good their claim to them, but who might not perhaps be able to make their claim so plain to the Trustees as to enable the Trustees to pay them out of the fund.

12. I gather from your evidence that the whole of the shareholders approve of this Bill for the winding-up of the undertaking? The whole of them.

13. Will you explain how it came to pass that the Trustees purchased the land at Blandford? The purchase of the land at Blandford, the sale of which now forms one of the objects of the Bill, was made by the Trustees under the authority and by the direction of the scheme approved and confirmed by the Court, which scheme took the form of the establishment of a school at Newcastle or elsewhere in the diocese of Newcastle. The Master in Equity was provided to approve of the site for the purpose, and as I understand—I did not see him do so—he proceeded to Blandford for the purpose of selecting either that site or some other site then offered. He approved of the site at Blandford, as being under the circumstances the preferable one.

14. *Mr. Hungerford.*] Are you aware that a site at Morpeth was offered? I believe it was, but I do not bear it in mind as a matter of evidence on oath, because in point of fact, though I have been cognisant of all the early proceedings in the matter, when a suit was instituted the conduct of the suit devolved, according to my office arrangements, upon my son and partner, because I never attend the Courts—I limit myself to Parliamentary business and conveyancing.

---

Richard Holdsworth, Esq., examined:—

15. *Chairman.*] You are a solicitor of the Supreme Court of this Colony? I am.

16. Do you represent some of the parties concerned in this Bill? I represent the late Leslie Duguid, who was, I believe, the largest subscriber to this adventure.

17. *Mr. Bradley.*] Have you attended meetings of the proprietors under the scheme that issued from the suit in the Court? Yes, I have attended several meetings.

18. Did you participate in the resolution that it was desirable to wind up the undertaking? I did; I think I seconded the resolution.

19. Are you of opinion that it is desirable to wind up the undertaking? I am decidedly of that opinion. I may state also that I have heard the evidence of Mr. Bradley, and quite concur in all the conclusions he has arrived at.

R.  
Holdsworth,  
Esq.

19 Oct., 1882.

---

Peter

Peter Campbell Curtis, Esq., examined:—

- P. C. Curtis, Esq.  
19 Oct., 1882.
20. *Chairman.*] What is your official designation? I am Chief Clerk in the Equity Department of the Supreme Court.
21. You produce certain documents as exhibits—will you state what they are? This (*produced*) is the original information and bill, filed 23rd December, 1874, and numbered 2,542, entitled “The Attorney-General, informant, at the relation of Humphrey and others, plaintiffs, against Scott and others, defendants.”
22. *Mr. Bradley.*] Do you produce the minutes of the decree made in that suit? Yes. (*Produced.*)
23. What is the date? 27th June, 1877. This is the draft; we have the record in the entry books.
24. Do you produce one of the exhibits put in by the plaintiffs in that suit? Yes, this (*produced*) is marked, as an exhibit in the suit, A 3. It seems to be the original list of contributions to the establishment of a school. It was put in in evidence before the Master, on 7th October, 1875. That would be prior to the hearing of the cause.
25. Do you produce an exhibit marked A 8? Yes, put in on the same day. It is a declaration of trust by Messrs. Croasdill and Scott. (*Produced.*)
26. The original deed? Yes.

Alexander Walker Scott, Esq., examined:—

- A. W. Scott, Esq.  
19 Oct., 1882.
27. *Chairman.*] You are one of the Trustees of the Blandford Proprietary School, and one of the petitioners for this Bill? Yes.
28. *Mr. Bradley.*] Do you remember the original proposal to establish a Proprietary Grammar School at Newcastle? Yes.
29. Will you look upon this paper (*handing the paper put in by Mr. Curtis, marked A 8*) and say what it appears to be? This is the original list of subscribers to the school; I know a great number of the signatures; these are the signatures of the original subscribers.
30. Have you any doubt that that is the original list? Not the slightest.
31. Is the paper I now put into your hands the original declaration of trust, dated 14th July, 1844? Yes; here is my signature, and the signature of the late Bishop of Australia, Dr. Broughton; I know his writing well; this is the signature of Dr. James Mitchell, which I also know well; and I believe the other to be the signature of Mr. William Croasdill.
32. *Chairman.*] I think you have heard the evidence of Mr. Bradley—Do you concur in that evidence? I do perfectly.
33. *Mr. Bradley.*] Will you refer to your memorandum of the Bank balance to the credit of the Trust, and state to the Committee what money now remains in the hands of the Trustees after payment of expenses already discharged? The present Trustees keep their account with the Bank of Australasia, and I got this on the 11th October, showing the balance on hand, and signed by Mr. Edward Hughes, Manager. It shows a credit balance as follows:—Current account, £312 17s. 1d.; fixed deposit, £900; debentures held for safe custody, £12,100; which together will make £13,312 17s. 1d. Then there are 150 acres of land at Blandford, for which we paid £900, but I believe they will not realise that amount now. Including that land at cost price, the total amount will be £14,212 17s. 1d. The fixed deposit will not be due till 7th March, 1883. It is at 4 per cent., and the interest will therefore amount to £36.
34. You are aware that considerable efforts have been made to obtain new subscribers to the school? Yes, certainly, every exertion has been made to obtain new subscribers, and we could only induce three persons to purchase five additional shares.
35. You have been acquainted with this matter from its inception? From the very first.
36. You have worked with me laboriously for many years for the establishment of the school? Yes.
37. As long as you believed it to be practicable? Yes.
38. Have you now arrived at the conclusion that it is impracticable, and that it is desirable it should be wound up? Perfectly. The estimate of the Master in Equity of the amount required by the new scheme amounted to £15,000, out of which we only got £250, with all our exertions.
39. Have you had conversation on the subject of the winding-up or the prosecution of the enterprise with many of the original subscribers during the last few weeks or months? Yes; with those resident in Sydney. I have spoken to a great number, and their views were most unquestionably that the scheme should be wound up. I have spoken to Captain Mayne, Mr. Philip Gidley King, and to every shareholder I have met with. They are constantly referring to me, having been so long connected with it. I also spoke to Sir Edward Deas-Thomson about it before his death. And I mention that not a single person I spoke to about it disagreed with the winding-up. I have spoken to the Bishop of Newcastle, and he concurs perfectly.

Edward Baker Boulton, Esq., called in and examined:—

- E. B. Boulton, Esq.  
19 Oct., 1882.
40. *Chairman.*] You are one of the original subscribers to the Blandford Proprietary School? Yes; it was called the Newcastle Grammar School at that time.
41. You are aware of the object of this Bill? Yes.
42. Do you identify the paper now before you as the original list of shareholders? It is so many years ago that I have quite forgotten the appearance of the document, but I recognise my handwriting and also the handwriting of several of my friends here.
43. Do you approve now of the proposal for winding-up this undertaking? Most certainly I do.

WEDNESDAY, 25 OCTOBER, 1882.

Present:—

Mr. JOHN BROWN,		Mr. HEZLET,
Mr. FAWCETT,		Mr. JACOB.

JOHN FITZGERALD BURNS, Esq., IN THE CHAIR.

Mr. Burton Bradley appeared as Solicitor for the Bill.

Edmund Barton, Esq., M.P., examined:—

44. *Chairman.*] You are Secretary to the Blandford Proprietary School? Yes.45. *Mr. Bradley.*] Do you look upon the minutes of a meeting of the proprietors held on the 25th February, 1881? Yes. (*Minute-book produced.*) The meeting was duly convened, and the President, Mr. Darley, was in the Chair.E. Barton,  
Esq., M.P.  
25 Oct., 1882.46. *Chairman.*] Will you state what were the resolutions come to at that meeting? Certain resolutions were adopted about incoming Directors; then the report for the year was presented and adopted; after that the balance-sheet was presented and adopted; and then it was moved by Mr. Bradley, one of the Directors, and seconded by Mr. Holdsworth, and carried, "That the establishment of the intended school having proved to be impracticable, it is desirable to wind up the undertaking." Another resolution was moved by Mr. Manning, seconded by Mr. Deloitte, and carried, "That it be an instruction to the Secretary to communicate with the Bishop of Newcastle, with a view to ascertaining upon what terms he would join the proprietors in applying to Parliament for a Bill to wind up the undertaking and divide the funds." Then there was another resolution, moved by Mr. Manning, seconded by Mr. Deloitte, and carried, "That the Directors be authorized to close with the Bishop for any sum not exceeding £5,000."

47. The Bishop represented the interests of a Society in England that had advanced £500 as a loan to the original promoters of the undertaking? Yes, the Society for Promoting Christian Knowledge. The sum to be received by him was also supposed to be in compensation of what might be called the loss to the Diocese of Newcastle by the abandonment of the intended school. It was also moved by Mr. Bradley, seconded by Mr. Dawes, and carried, "That in the event of the assent of the Bishop, the solicitors be authorized to solicit a private Act to enable and facilitate the winding-up, and that in such measure provision be made for the participation of the original shareholders, who have not given in their adhesion to the scheme, in the division." I then had some correspondence with the Bishop, which I have here.

48. The Bishop agreed to the terms? The Bishop agreed to the winding-up being undertaken on the terms indicated in these resolutions.

49. Have you heard of any dissent on the part of any of the shareholders? Only one, Mr. Frederick Robert White, one of the Trustees, whose letter of resignation I produce.

50. Have we not had that before? That was his letter of objection. I have here his letter of resignation, dated 18th August, 1882. That explains the fact of the other two Trustees only being named in the Bill.

51. Is the list of shareholders in the Schedule of the Bill, as far as you know, correct? That is the list of the original shareholders. I produce a list of the shareholders who were recognized, after the election of Directors, as having come in and exercised their rights, and had shares allotted to them under rule 6 of the scheme settled and approved by the Equity Court; and also a list of the representatives of those shareholders who have passed away, or in one way or other gone out of the undertaking. (*Produced.*)

Henry Wheeler Gillam, Esq., called in and examined:—

52. *Mr. Bradley.*] You are Deputy Registrar-General in the Registrar-General's Office? Yes.53. Do you produce one of the public registers kept in that office, in which are recorded grants by purchase of land in this Colony? I do. (*Register produced.*)H. W. Gillam,  
Esq.  
25 Oct., 1882.

54. Do you find four grants from the Crown, dated 5th February, 1841, to James Mitchell? I do.

55. Will you state the respective areas and situation of the land? The first is to James Mitchell, 10 acres 2 roods, county Northumberland, parish Newcastle, suburban lot near Newcastle; the next is to James Mitchell, dated 5th February, 1841, county Northumberland, parish Newcastle, 1 acre 1 rood 20 perches, suburban lot near Newcastle; the next is to James Mitchell, dated 5th February, 1841, county Northumberland, parish Newcastle, 9 acres; and the fourth is to James Mitchell, 5th February, 1841, 1 acre, county Northumberland, parish Newcastle, near Newcastle.

Francis John Wickham, Esq., Accountant to Railways, called in and examined:—

56. *Mr. Bradley.*] Have you been able to find the copy of the original notice of the Hunter River Railway for taking the lands at Honeysuckle Point? No; the papers were never in my possession, but I have made it my duty to have a thorough search made for them and have not been able to obtain them. The last information I can get of them is that they were forwarded to the Crown Law Officers.

57. Have you searched for another notice also—a notice from the Minister for Lands to the Commissioner for Railways, informing him of the resumption? Yes; they were both together, and the same statement applies to both.

F. J.  
Wickham,  
Esq.  
25 Oct., 1882.

Henry Burton Bradley, Esq., further examined:—

58. *Chairman.*] I understand you desire to add something to your evidence? Yes, I desire to supplement the evidence I gave before the Committee last week, with reference to the names of the persons who, in the suit which has been mentioned, testified that it was desirable that the project should be wound up. They were Mr. Dawes, Sir Edward Deas-Thomson, Mr. Deloitte, Mr. Sandeman, Mr. Sparkes, Mr. Boydell, Mr. Walter Lamb, Mr. John Blaxland, Mr. James Norton, Mr. William Colburn Mayne, Mr.H. B. Bradley,  
Esq.  
25 Oct., 1882.

H. B. Bradley, George Weller, Mr. Alexander Macdonald, as executor of Philip William Flower, and Sir William Macarthur. I mentioned some of these names at the last meeting, but I had not the list before me. I would refer the Committee to the Act of the Legislature of this Colony, passed on 10th October, 1853, to establish and incorporate a Company to be called the Hunter River Railway Company. Under the 81st and 82nd sections of that Act, the Hunter River Railway Company were authorized to enter upon and take the lands which they might require for railway purposes. Under the authority of that Act the Company did in fact take—though I have not been able to show you the original notice, by reason of its being mislaid or lost—the areas of the four grants, the records of which have been produced before you by the proper officer from the Registrar-General's Department. I read now from the 18th Victoria No. 40, entitled "An Act to make provision for the construction by the Government of Railways in the Colony of New South Wales." The preamble refers to, among other things, an Act to establish and incorporate a Company to be called the Hunter River Railway Company, and to the fact that the Company named had commenced the railway works authorized by their Act, but had been unable, by reason of the difficulty of raising capital, to proceed with them; it states that it is expedient that the said works and other railways to be constructed in the Colony should be carried on by a Commissioner for Railways, and that Her Majesty's Government should be empowered to purchase from the Company their respective interests in the lines of railway and other works. By the 14th section of that Act it was enacted that it should be lawful for the Governor, with the advice of the Executive Council, to purchase the railways and other works belonging to or vested in the Sydney Railway Company and the Hunter River Railway Company, or either of them, and upon the completion of any such sale the railways and other works should be thenceforth vested in the Commissioner.

H. B. Bradley,  
Esq.  
25 Oct., 1882.

1882.

## NEW SOUTH WALES.

## AUSTRALIAN MUSEUM.

(REPORT OF THE TRUSTEES, FOR 1881.)

Presented to Parliament, pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this their twenty-eighth Annual Report.

1. The Museum has been open continuously to the public throughout the year; from 10 to 5 in winter and 10 till 6 in summer, except on Sundays, when the hours are from 2 till 5, and except on Mondays, when the Museum is necessarily closed. The number of visitors was 115,655, being an increase of 3,192 on the number for 1880. The number who attended on Sundays was 41,660, being an increase of 8,963 on the number for 1880, while the attendance on week-days decreased by 5,771. The average daily attendance on week-days was 281, and on Sundays 801. The conduct of visitors has been without exception decorous and orderly.

2. The collections made during the dredging excursion to Port Stephens in November, 1880, were in some orders and families very extensive, but they have not yet been entirely worked out. A list of those which have been determined during the year will be found in Appendix XII. The crustacea have been determined by Mr. Haswell, and the mollusca (shells) by Mr. Brazier. The vertebrates are all well known species, excepting some small deep-sea fishes. Most of the specimens were obtained within Port Stephens itself; and, with some differences in detail, they represent a fauna very similar to that of Port Jackson. The northern limit of this zoological zone must be further north, probably towards the confines of the tropics. Dredging outside the heads of Port Stephens was much impeded by stormy weather; but on two days, when the weather was sufficiently fine, a great number of specimens were obtained. These include a large proportion of new species, and represent a fauna distinct from that of Port Stephens or Port Jackson, and are the most valuable results of the excursion. The total number of species (invertebrata) procured may be roughly estimated at 700. Of these the mollusca, chiefly of minute kinds, comprise 450 species (1,500 specimens), forty-seven of which are new to science. There were obtained also many fine specimens of sponges, of species hitherto unrepresented in the Museum. The duplicate specimens of polyzoa, about fifty species, have been sent for determination to Mr. Goldstein, of Melbourne, who states that the collection contains several new species and genera. The hydroid-zoophytes have not yet been worked out. Among the corals there are several rare species, and some are new. The echinoderms obtained were very few, with the exception of the ophiuridæ, of which a large series was secured. The annelids were not numerous, comprising only about a dozen species, but most of these are new to the Museum. There are about eighty species of crustacea, of which twenty are new to science.

3. A large number of donations from persons in this Colony, and Australia generally, have been made to the Museum, and some valuable specimens from the South Sea Islands have been presented by officers in Her Majesty's ships of war on this station.

4. The Trustees were enabled, through the kindness of Commodore Wilson, R.N., and Commander Bruce, R.N., to send a collector, the Assistant Taxidermist, to the Solomon Islands, where he obtained a number of species not previously in the Museum. A collection of fossil bones was obtained from the Darling Downs, Queensland, by a collector sent there; and a collector was recently sent to the interior of New South Wales, but not being successful he was recalled.

5. The system of exchanging specimens with foreign Museums has been extended mainly through the opportunities afforded by the Melbourne International Exhibition, notably with India, Japan, Belgium, America, Germany, and the Netherlands. From the South Australia and Melbourne Museums the Trustees have received moulds of numerous interesting and rare fossils. The collection of food-fishes sent to the Melbourne Exhibition proved of great interest. Many of the specimens were, at its close, sent in exchange to the Wellington, N.Z., and Melbourne Museums. From Austria, France, China, and Poland many valuable specimens of birds, mammals, and shells have been received, collections of a similar kind being sent to the above-mentioned places in exchange. The number of specimens received as exchanges exceeds that of the previous year by 827, and the number sent away in 1881 was larger by 2,261 than that sent in 1880.

6. Among the collections purchased have been many very valuable ethnological specimens from the South Sea Islands, of a kind which it is daily becoming more difficult to obtain. A collection of fishes from New Guinea was also purchased.

7. The maps purchased with funds provided by a special vote from Parliament have arrived, and been displayed in the Garden Palace.

8. A portion of the Anatomical Collection, for teaching purposes (also provided for by special vote), has arrived and will be displayed as soon as the show cases for their reception (for which money has been specially voted) are completed.

9. The large collection of fossils purchased in Germany, with funds provided by Parliament, has arrived, and Mr. F. Ratte, Civil Mining Engineer, Officier d'Académie (Paris), has been specially engaged to arrange the collection for exhibition. This work will be completed, it is hoped, in March next.

10. Large additions have been made to the Museum Library, and a further supply of books is daily expected.

11. Show cases have been provided, with money voted by Parliament, for the collection of fossils, and cabinets have been obtained for the reference collections of birds' skins.

12. The erection of a new workshop has been of great advantage to the Institution generally, by giving more space and greater facilities for work to the Taxidermist and his Assistant. The office accommodation, however, is still inadequate to the ever increasing operations of the Department. This inconvenience must remain until the rooms occupied by the Curator shall be given up by him to the general purposes of the Museum.

13. The Trustees are about to publish a Catalogue of the Crustacea of the Australian Seas. This work has been prepared by Mr. W. A. Haswell, M.A., B.Sc., and will be of great scientific value, containing, as it does, descriptions of all known Australian species, many of which are new to science. A Catalogue of the collection of fossils (referred to in paragraph 9) has also been prepared. Both of these will shortly leave the printer's hands. Mr. Brazier has been engaged in cataloguing the collections of shells.

14. The By-laws and General Rules of the Institution have been carefully revised, and in several respects amended. A copy has been transmitted to the Minister of Public Instruction, for submission to His Excellency in Council, as required by the Act of Incorporation.

15. Three vacancies have occurred in the Board of Trustees during the year 1881, by the resignation of Patrick Mackay, Esq., and the loss of the seats of the Rev. J. E. Tenison-Woods, F.G.S., and James R. Fairfax, Esq., by absence without leave. These vacancies have been filled, in the two former cases, by the election of Alexander Stuart, Esq., M.P., and the Hon. P. G. King, M.L.C. The last vacancy had not been filled at the end of the year, the Hon. W. A. Brodribb, M.L.C., being nominated for the position.

16. The most important work undertaken by the Trustees during the year has been the renewal of the exploration of the caves of the Colony; for which object a special sum of money was voted by Parliament. Mr. Jenkins, of Yass, was engaged to explore the caves at Coodradigbee. The bones obtained there are all of recent origin, belonging to still existing species of the kangaroo, wallaby, wombat, opossum, &c. The Siluro-Devonian fossils, however, obtained by him from the limestone rocks are of considerable interest, and will form a valuable addition to the Museum collection. The exploration of the caves at Wellington was superintended by the Curator, who frequently visited the locality, leaving in charge of them, during his absence, one of the Museum employés. The first cave examined was found to contain several feet of water on the floor, and could not be worked without very great expense. The second cave showed no signs of bone breccia, consequently the search was discontinued. The third cave, known as the Breccia Cave, was next examined. Here above 1,000 specimens were obtained, many of them of great interest; among others an almost perfect ramus of a *Thylacoleo* with the articulating condyle; and the toe bones of a large species of *Echidna*. The fourth cave examined was the large one situated at the summit of the ridge. Photographs were taken by magnesium light of the walls of this cave. At first no bones were discovered, but on sinking a shaft through the floor the tooth of a *Diprotodon* and some bones of small marsupials were found. In some other shafts the bones were larger and more perfect than those in the Breccia Cave. Among the most important discoveries were portions of the pelvis of an immense kangaroo, caudal and cervical vertebrae; jaws of large marsupials, especially five rami of *Thylacoleo* nearly perfect, and many good teeth. The Curator inspected all other caves in the district, but found only two, on the Nanima Estate, 6 miles east of Wellington, which showed any signs of bones. A list of the most important specimens discovered is contained in Appendix XIII.

17. The exploration of the Rivers of New South Wales (provided for by special Parliamentary vote) was undertaken by the Assistant Taxidermist, who was sent to the Richmond River with a boat, nets, and all necessary outfit. This exploration was so far successful that nearly all the kinds of fish hitherto known to frequent the fresh-water rivers were obtained, in addition to other interesting species, some of which are new to science. The cod found is scarce, and similar to that obtained in the Macquarie River. No fishes in any way allied to the Ganoidei, Sirenoidei, or Dipnoi, were found, and it is proposed to search for these fish during 1882 in the Queensland rivers. A list of the various species obtained will be found in Appendix XIII. A detailed report of the exploration of the caves and rivers will be published during the year 1882, when the numerous specimens shall have been determined.

18. The Trustees add to this their Report the following Appendices:—I. The annual balance-sheet; II. A list of books purchased for the Museum Library; III. A list of books acquired by donation. IV. Attendance of visitors; V. Attendance of the Trustees; VI. A list of donations; VII. A list of specimens acquired by exchange; VIII. A list of specimens sent away by exchange; IX. A list of specimens purchased; X. A list of specimens collected; XI. Particulars of the work done by the Taxidermists and Articulator; XII. A list of such of the specimens obtained during the dredging excursion to Port Stephens in November, 1880, as have been determined; XIII. A list of the most important bones discovered at the Wellington Caves, and fishes obtained in the Richmond River.

The Common Seal of the Museum is affixed, by order of the Board, this 13th day of May, 1882.

(L.S.)

ALFRED STEPHEN,

*Chairman and Crown Trustee.*

CHARLES R. BUCKLAND,  
*Secretary.*

## APPENDIX I.

BALANCE SHEET of the Trustees of the Australian Museum for the year ending 31st December, 1881.

RECEIPTS.	£ s. d.	£ s. d.	PAYMENTS.	£ s. d.	£ s. d.
The Hon. the Colonial Treasurer, as follows:—			Salaries and Wages—		
Curator's salary .....	500 0 0		Curator .....	500 0 0	
Assistant Taxidermist's salary .....	150 0 0		Assistant Taxidermist .....	150 0 0	
Endowment for 1881, under Act of Incorporation .....	1,000 0 0		Secretary, Taxidermist, Articulator, carpenter, 5 attendants, labour .....	1,102 9 4	1,752 9 4
Opening the Museum on Sunday .....	200 0 0		Sunday attendants .....		196 2 0
Purchase of specimens .....	520 0 0		Purchase of specimens .....		477 19 3
Collection .....	300 0 0		Collection .....		277 10 2
Formation of catalogues .....	600 0 0		Formation of catalogues .....		434 0 3
Purchase of books .....	500 0 0		Purchase of books .....		277 11 9
" maps .....	250 0 0		" maps .....		421 5 6
" cabinets .....	1,000 0 0		" cabinets .....		543 18 5
Travelling expenses .....	200 0 0		Travelling expenses .....		101 0 0
Exploration of caves and rivers .....	600 0 0		Exploration of caves and rivers .....		603 9 3
Furniture .....	100 0 0		Furniture .....		105 0 1
Additional endowment .....	500 0 0	6,420 0 0	Bookbinding and catalogue .....	35 19 6	
Formation of a Technological Museum .....	2,000 0 0		Chemicals .....	30 2 2	
Cost of teachers and classes .....	500 0 0	2,500 0 0	Stationery .....	33 1 3	
Refund per Ramsay .....	5 0 3		Lighting lamps .....	6 10 0	
" Broadbent .....	5 16 8	10 16 11	Telegrams, exchange, postage .....	8 15 6	
Balance from 1880 .....		777 14 5	Taxidermist's materials .....	11 8 4	
			Customs, freight, cartage .....	100 10 1	
			Insurance .....	22 10 0

APPENDIX II—*continued.*

- Geological Magazine—  
 1874. February, July, to December.  
 January, 1875, to October, 1881.
- Geological Society's Journal—  
 1874. No. 118. Nos. 121-44.  
 1881. February, May, August.
- D'Alberti's New Guinea. 2 vols.
- W. Boyd Dawkins' Cave-hunting.  
 Zoological Record. Vols. 11-16.
- Reeve's Conchologia Iconica. Vol. 20.
- Journal of the Linnean Society—  
 Botany. Nos. 36, 76-80.  
 Zoology. No. 51.
- Zoological Journal. Vol. 3—April 26 to 1828.
- M. A. Rutot's Pamphlets :—  
 Sur la position stratigraphique des restes de mammifères terrestres.  
 Compte rendu d'une course dans Le Quaternaire.  
 " " de l'excursion de la Société Géologique de France.  
 " " des excursions faites en commun par les Sociétés Géologiques et Malacologiques de Belgique  
 " " au point de vue paléontologique de l'excursion de la Société Malacologique de Belgique.
- Hewitson's Exotic Butterflies. 2 vols.
- Tryon's Manual of Conchology. 2 vols.
- Transactions of the Zoological Society. Vol. X., Part 10, to Vol. XI, Part 5.
- Webster's English Dictionary.
- Liddle and Scott's Greek-English Lexicon.
- Yonge's English-Greek Lexicon.
- Lewis and Short's Latin-English Dictionary.
- Riddle and Arnold's English-Latin Dictionary.
- Clifton et Grimaux' French Dictionary. 2 vols.
- Millhouse's Italian Dictionary. 2 vols.
- Velasquez' Spanish " 1 vol.
- Grich's German " 2 vols.
- Calish's Neterland " 2 "
- Russian Dictionary. 1 vol.
- Chemnitz Conchylien Cabinet. 11 parts.
- Transactions of the Linnean Society. Vol. 29, Part 3; Vol. 30, Parts 1-3.  
 2nd Series—Zoology. Vol. 1, complete; Vol. 2, Parts 1-2.  
 " Botany. Vol. 1, Parts 1-9.
- Ray Society's Publications, 1844-80. Complete except four parts.
- Palaontographical Society. Vols. 32-5, 1878-81.
- Hull's Coal-fields of Great Britain.
- Wallace's Geographical Distribution of Animals. 2 vols.
- Etheridge's Catalogue of Australian Fossils.
- Ure's Dictionary of Mines and Manufactures. 4 vols.
- Couche's History of Fishes. 4 vols.
- Beechy's Zoology of a Voyage to the Pacific.
- Wallace's Island Life.
- Bleeker's Révision des Espèces Insulindiennes.
- Bleeker's Contribution à la Fauna Ichthyologique de l'Île Maurice.
- Bleeker's Enumeration des Espèces de Poissons connues du Japon.
- Gray's Synopsis of Star-fish in the British Museum.
- Ceikie's Prehistoric Europe.
- Adam's Genera of Recent Mollusca.
- Buiney and Bland's Land and Fresh Water Shells of North America. 1 vol., Parts 1-3.
- Natural History Review, 1853-65. 12 vols.
- Balfour's Comparative Embryology. 2 vols.
- Bell's British Stalk-eyed Crustacea.
- Bate and Westwood's Catalogue of British Sessile-eyed Crustacea. 2 vols.
- Siebold and De Haan's Fauna Japonica, Crustacea.
- Palaontologie Française. Tome X., Part 1.
- Philosophical Transactions. Vol. 170.

## APPENDIX III.

## Books acquired by donation for the Museum Library, 1881.

- Presented by James Hector, Esq., M.D., C.M.G. :—  
 Studies in Biology, for New Zealand students.  
 Palaontology of New Zealand.  
 Fifteenth Annual Report on the Colonial Museum and Laboratory, New Zealand, 1879-80.  
 Reports of Geological Explorations, New Zealand, 1879-80.  
 Transactions and Proceedings of New Zealand Institute, 1880.  
 Meteorological Report, New Zealand, 1880.
- Presented by the Commissioners, Melbourne International Exhibition :—  
 Official Catalogue of Exhibits. 2 vols.
- Presented by Professor W. K. Parker, F.R.S. :—  
 The Structure and Development of the Skull in the Common Snake.  
 " " " Lacertila.  
 " " " Urodela and Amphibia. Parts I, II.
- Presented by the Honorable Wm. Macleay, M.L.C. :—  
 Transactions of the Entomological Society, New South Wales. Vol. II.
- Presented by the Royal Society, New South Wales :—  
 Journal and Proceedings of the Royal Society, New South Wales, 1876.  
 1880.
- Presented by the "Free Public Library, Sydney, New South Wales" :—  
 Catalogue, 1876.  
 " 1877-8 (supplementary.)  
 " Lending Branch.
- Presented by the Royal Society of Tasmania :—  
 Reports for 1879.

Presented

APPENDIX III—*continued.*

- Presented by the Government Printer, New South Wales :—  
 Von Müeller's Select Extra-Tropical Plants.  
 Estimates, 1882.  
 Supplementary Estimates, 1881.  
 Schedule on Estimates for 1882.
- Presented by the Linnean Society, New South Wales :—  
 Proceedings of the Society. Vol. 5, Part IV.  
 " " " 3 " III.  
 " " " 4 " II.  
 " " " 6 " I, II.  
 " " " 1 " III.  
 " " " 2 " IV.  
 " " " 3 " III.
- Presented by the Smithsonian Institute, United States, America :—  
 Annual Report, 1878.  
 Bulletin of the United States National Museum. Nos. 10, 12, 13, 14, 15, 21.  
 " " " Entomological Commission. Nos. 1, 2.
- Presented by the Department of Mines, New South Wales :—  
 Annual Report, 1880.
- Presented by the Nagpur Museum, India :—  
 Catalogue, 1876, 1881.
- Presented by the Government of Madras, India :—  
 Report of the Central Museum, 1880-81.
- Presented by the Beechworth Free Public Library and Burke Museum :—  
 Annual Report, 1880-81.
- Presented by E. D. Cope, Esq., North American Survey :—  
 Review of the Rodentia of the Miocene Period of North America.  
 On some Mammalia of the Lowest Eocene Beds of New Mexico.  
 On the Canidæ of the Loup Fork Epoch.  
 " Temporary Dentition of a new Creodont.  
 " Effect of Impacts and Strains on the Feet of Mammalia.  
 " Rodentia of the American Miocene.
- Presented by Messrs. Trübner & Co. :—  
 Zoologischer Anzeiger. No. 72.  
 Geological Magazine. Vol. I, Decade II, No. 1.  
 " " " III " II " 1.  
 Beiträge zur Näheren Kenntniss der in dem Baikal—See Vorkommenden Neideren Krebse aus der Gruppe  
 der Gammariden von Dr. B. N. Dybowsky.
- Presented by Mr. John Brazier, C.M.Z.S. :—  
 Localités des Îles Australiennes, des Îles Solomon et d'autres Îles de la Mer Sud.  
 Notes on Mollusca of Port Jackson.

## APPENDIX V.

## ATTENDANCE of the Trustees, 1881.

<i>Official Trustees.</i>	
His Honor the Chief Justice .....	0
The Honorable the Colonial Secretary .....	0
The Honorable the Colonial Treasurer .....	0
The Honorable the Attorney General .....	0
The President of the Colonial Medical Board .....	0
The Surveyor General .....	0
The Auditor General .....	3
The Colonial Architect .....	0
The Collector of Customs .....	0
<i>Crown Trustee.</i>	
The Honorable Sir Alfred Stephen, C.B., K.C.M.G., M.L.C. ....	13
<i>Elective Trustees.</i>	
Belisario, John, Esq., D.D.S. ....	5
Bradley, H. H., Esq. ....	10
Cox, James C., Esq., M.D., C.M.L.S. ....	24
Fairfax, James R., Esq. ....	3
Hunt, Robert, Esq., Deputy Master of the Royal Mint .....	41
King, P. G., Esq., M.L.C. ....	4
Liversidge, A., Esq., F.G.S., Professor of Geology, Sydney University .....	28
Mackay, Patrick, Esq. ....	1
Moore, Charles, Esq., F.L.S. ....	4
Norton, James, Esq., M.L.C. ....	14
Roberts, Alfred, Esq., M.B.C.S.E. ....	25
Stuart, Alexander, Esq., M.P. ....	2
Wilkinson, Charles Smith, Esq., F.G.S. ....	16
Woods, the Rev. J. E. Tenison-, F.L.S. ....	0

CHARLES R. BUCKLAND,  
*Secretary.*

APPENDIX VI.  
DONATIONS.

## MAMMALS.

	<i>PRESENTED BY</i>
An Echidna— <i>Tachyglossus hystrix</i> .....	Mr. C. H. Simpson.
<i>Cuscus orientalis</i> .....	Captain Brodie.
Skull and lower jaw of Fiji aboriginal, and shell <i>Ovulum ovum</i> , which had been buried with the dead man .....	} Through Dr. A. Roberts.
<i>Hypsiprymmodon moschatus</i> .....	Mr. R. C. Mciklejohn.
<i>Halmaturus dorsalis</i> .....	Mr. Chas. Moore, F.L.S.
A <i>Platypus</i> — <i>Ornithorhynchus anatinus</i> .....	Capt. Gardner.
White rat— <i>Mus decumanus</i> , albino .....	Mr. P. Smith.
Bandicoot— <i>Perameles nasuta</i> .....	Mr. J. Ponsonby.
<i>Halmaturus ualabatus</i> .....	Mr. W. H. Smithers.
An Echidna, <i>Tachyglossus hystrix</i> .....	Mr. E. C. Cousins.
A Monkey— <i>Maccacus</i> sp. ....	Mr. Stringer.
A water-rat— <i>Hydromys chrysogaster</i> .....	Mr. J. A. Henderson.
Skin of flying mouse— <i>Acrobates pygmaea</i> .....	Mr. R. C. Beck.
Native cat— <i>Dasyurus viverrinus</i> .....	Mr. M. A. MacDermot.
<i>Halmaturus thetidis</i> .....	Mr. F. T. Matthews.
Skull of Rotumah native chief .....	Dr. P. Hope Lewis, R.N., H.M.S. "Cormorant."
<i>Scotophilus morio</i> .....	} Masters Barnard.
<i>Miniopterus Australis</i> .....	} Mr. C. R. Barry.
<i>Taphozous</i> , sp. nov. ....	} Mr. J. Hoochie.
Malformed hoof of a horse .....	} Masters Barnard.
<i>Belideus taguanoides</i> .....	} Mr. Richard Loughlan.
White rat—albino of <i>Mus decumanus</i> .....	} Mr. Richard Loughlan.

## BIRDS.

A hawk— <i>Ieracidea orientalis</i> .....	Mr. H. R. C. Bird.
Five <i>Ocyphaps lophotes</i> .....	} Mr. Stringer.
Four <i>Leucosarcia picata</i> .....	} Lieut. Richards.
Collection of birds in spirits .....	} Mr. H. R. C. Bird.
A swift— <i>Acanthylis caudacuta</i> .....	} Mrs. J. W. James.
Young ostrich— <i>Struthio camelus</i> .....	} Jas. Barnet, Esq., Col. Architect.
Young penguin— <i>Eudyptula minor</i> .....	} Mr. F. J. Muir.
A semi-adult penguin ,, ,, .....	} Mr. A. Capc.
A tern— <i>Sterna</i> sp. ....	} Mr. Todhunter, P. & O. S. N. Co.'s Service.
Moa bones .....	} Mr. John Brazier.
Nestling of <i>Calyptorhynchus funereus</i> .....	} Dr. Coppenger, R.N.
Three nests of Indian weaver bird, <i>Ploceus</i> sp. from the "Elephanta Caves," Bombay .....	} Mr. J. A. Thorpe.
Six eggs of <i>Porphyrio vitiensis</i> .....	} Rev. Geo. Brown.
<i>Micropterus cinereus</i> .....	} Mr. Gale.
<i>Chloephaga</i> , ( <i>Bernicla</i> ) <i>puliocephala</i> .....	} Mr. H. R. C. Bird.
" " " " ) <i>antarctica</i> .....	} Mr. J. Stringer.
<i>Stercorarius antarcticus</i> .....	} Mr. Wm. Clohe.
<i>Anthus Australis</i> .....	} Mr. S. Robinson, P.M.
<i>Donacicola spectabilis</i> .....	} Miss Lee.
Tropic bird— <i>Phaeton phoenicurus</i> .....	} Mr. Chas. Moore, F.Z.S.
<i>Falco frontatus</i> .....	} Mr. Jas. Ramsay.
A finch from India— <i>Estrela</i> sp. ....	} Mr. J. A. Thorpe.
An English woodpecker— <i>Picus viridis</i> .....	} Messrs. Shaw & Blunden.
A crested shrike— <i>Falcunculus frontatus</i> .....	} Rev. Geo. Browne.
<i>Cacatua galerita</i> .....	} Mr. Wm. Woods.
<i>Ara aracana</i> .....	} An
<i>Podargus strigoides</i> , nestling .....	} An
Thirteen skins of birds .....	} An
Seven skins of birds .....	} An
Two finches— <i>Donacicola spectabilis</i> .....	} An
A crane— <i>Grus Australasianus</i> .....	} An

## FISHES—continued.

Two Monacanthus sp. ....	Dr. A. Gordon.
One Eupeneus sp. ....	Mr. H. Newcombe.
One Batrachus sp. ....	
One Opisthognathus jacksonensis .....	Through Dr. Roberts.
Teeth of a large ray .....	Captain A. Onslow, R.N.
A Tench, <i>Tinca vulgaris</i> (introduced).....	Mr. Brown.
A <i>Chrysophrys sarba</i> .....	Inspector Seymour.
Flying fish— <i>Dactylopterus orientalis</i> .....	Mr. David Tomson.
<i>Elacate nigra</i> .....	Mr. J. Hoken.
A blue groper— <i>Cossyphus</i> sp. ....	Mr. Eastway.
A <i>Lethrinus</i> sp. ....	Master Lewis.
A golden carp— <i>Carrasius auratus</i> .....	Mr. M. A. H. Fitzhardinge.
<i>Chilodactylus vittatus</i> .....	Mr. E. D'Arcy Towns.
One <i>Novacula</i> sp. ....	Mr. Kohler.
One <i>Aploactis milesii</i> .....	Mr. Eastway.
One <i>Lethrinus</i> sp. ....	Mr. Thos. M'Lellan.
A wobblygong shark— <i>Crossorhinus barbatus</i> .....	Master E. Thurston.
Cod— <i>Scorpoena cardinalis</i> .....	Mr. Jas. Brown.
Box fish— <i>Aracana lenticularis</i> .....	Inspector Seymour.
Sucker fish— <i>Echemis remora</i> .....	Mr. Chas. Hastie.
An angel shark— <i>Rhina squatina</i> .....	Chief mate of s.s. "Illawarra."
A sea leather-jacket— <i>Monacanthus ayraudii</i> .....	
An eel— <i>Muraena bagio</i> .....	Mr. A. D. Taylor.
Box fish— <i>Aracana lenticularis</i> .....	Mr. A. Cox.
Horse mackerel— <i>Auxis</i> sp. ....	
Two leather-jackets— <i>Monacanthus megalurus</i> .....	Mr. M. Asher.
Porcupine fish— <i>Dicotylichthys punctulatus</i> .....	
An "Old maid"— <i>Scatophagus multifasciatus</i> .....	Mr. Jas. Ireland.
Two fish— <i>Opisthognathus jacksonensis</i> .....	Mr. Edward Woomer.
Flying gurnard— <i>Trigla kumu</i> .....	Mr. W. P. M'Lean.
" perch— <i>Neoanthias guntheri</i> .....	Mr. J. Kohler.
An angel shark— <i>Squatina angelus</i> .....	Inspector Seymour.
Flying gurnard— <i>Trigla kumu</i> .....	Mr. A. Kelson.
A "Beardy"— <i>Pseudophysis</i> sp. ....	Mr. F. Thomas.
A "Maori"— <i>Coris lineolatus</i> .....	Mr. ———
A "Sarjeant Baker"— <i>Aulopus purpurissatus</i> .....	Inspector Seymour.
Two flying fishes— <i>Dactyloptera orientalis</i> .....	
Two <i>Neptomemus brama</i> .....	Mr. H. Newcombe.
One <i>Plectropoma semicinctum</i> .....	Mr. J. F. Caldwell.
One <i>Fistularia serrata</i> .....	Mr. Polman, C.S.R. Co.
Jaw of a Port Jackson shark— <i>Heterodontus philippi</i> .....	Mr. J. Moore.
One large eel— <i>Muraenesox cinerea</i> .....	Mr. L. V. Miller.
Head of blue pointer shark .....	Inspector Seymour.
Three herrings— <i>Clupea</i> sp. ....	Mr. J. Poolman.
The jaw of a Port Jackson shark— <i>Heterodontus philippi</i> .....	Mr. J. J. Josephson.
A leather-jacket— <i>Monacanthus ayraudii</i> .....	
One fiddler ray— <i>Trigonorhina fasciata</i> .....	Mr. E. M. Betts.
One <i>Cheilodactylus vittata</i> .....	Mr. R. B. Hartley.
One cat fish— <i>Copidoglanis tandanus</i> .....	
Two herrings— <i>Clupea</i> sp. ....	Mr. G. R. Reynolds.
One eel— <i>Muraenesox cinerea</i> .....	Mr. Jos. Fisher.
One wobblygong or bearded shark— <i>Crossorhinus barbatus</i> .....	Mr. Benbow.
One leather-jacket— <i>Monacanthus</i> sp. ....	Mr. C. J. Burns.
One fish— <i>Monocentrus japonicus</i> .....	Mr. Summers.
One flying gurnard— <i>Trigla polyomata</i> .....	Mr. Stephons.
One frog fish— <i>Antenarius commersonii</i> .....	Lieut. J. C. Farie, R.N.
One flying fish— <i>Exocoetus</i> sp. ....	
One jumping fish— <i>Periophthalmus</i> sp. ....	Mr. L. Parchetta.
One fish— <i>Serranus</i> sp. ....	
One coral fish— <i>Dasyllus aruanus</i> .....	
One porcupine fish— <i>Dicotylichthys punctatus</i> .....	

## MOLLUSCA.

One <i>Cardium cardissa</i> .....	Capt. of mission schr., "John Hunt."
An <i>Octopus</i> .....	Dr. J. C. Cox.
A snail— <i>Limax</i> (?) <i>krefftii</i> .....	Mr. J. Kempster.
One <i>Malleus alba</i> .....	Mr. V. J. Bennett.
A <i>Cardium cardissa</i> .....	Mr. Bird, H.M.S. "Cormorant."
A <i>Helix falconeri</i> .....	Mr. M'Naugh.

## ARACHNIDA.

A spider— <i>Gasteracanthus</i> sp. ....	Master John Mann.
" <i>Mygale</i> sp. ....	Mr. H. C. Burnell.
" <i>Gasteracanthus</i> sp. ....	Mr. Jno. Parish.
Several young spiders .....	Mr. ———
A spider— <i>Nephila</i> sp. ....	Mr. J. C. Burnell.
" .....	Mr. T. Jackson.

## CRUSTACEA.

A crab, with sponge on back— <i>Hyastenus diacanthus</i> .....	Mr. A. H. Fitzhardinge.
A crayfish— <i>Palinurus hugelii</i> .....	Mr. G. Twemlow.
Six crabs— <i>Hyastenus diacanthus</i> .....	Mr. Jas. Hughes.
A collection of 20 crabs from New Caledonia .....	Dr. J. C. Cox, F.L.S.
A land crab— <i>Birgus latro</i> .....	Inspector Seymour.
Eight crabs— <i>Hyastenus diacanthus</i> —with sponges ( <i>Velluspa</i> ) growing on their backs.....	Mr. J. Hennham.
A crab— <i>Hyastenus diacanthus</i> .....	Mr. R. D. Fitzgerald, F.L.S.
" .....	Mr. H. Lane.
A crayfish— <i>Astacopsis bicarinatus</i> .....	Masters Barnard.
A robber crab— <i>Birgus latro</i> .....	Lieut. J. C. Farie, R.N., H.M.S. "Miranda."

## ECHINODERMATA.

A cushion star— <i>Anthenea tuberculata</i> .....	Mr. W. Brown.
Four specimens of <i>Salmacis globator</i> .....	Dr. J. C. Cox, F.L.S.

## INSECTA.

## APPENDIX VII

## List of Specimens received by the Trustees in Exchange. 1881.

From the Melbourne Museum.

Australian Fishes :—17 species—18 specimens.

Casts :—Permission to take 20 casts of specimens exhibited at the Melbourne National Museum.

From the Adelaide Museum.

Casts :—Permission to take 5 casts of specimens exhibited at the Melbourne Exhibition.

From Mr. Whittell.

1 Egg of <i>Tribonyx ventralis</i> .		1 Egg <i>Geopelia placida</i> .
2 „ <i>Geopelia cuneata</i> .		

From Mr. Reginald Cholmondeley.

Collection of Birds :—10 species—10 specimens.

From the Straits Settlements.

From L. Taizanowski, Esq., Zoological Museum, Varsovié.

Collection of Mammals :—9 species—11 specimens.

„ Birds :—39 species—50 specimens.

„ Shells :—32 species—302 specimens.

From Mr. J. W. Sissons.

Collection of Eggs :—7 species—7 specimens.

From Victor Schomberger, Esq.

Collection of Birds :—88 species—140 specimens.

From Mr. Campbell.

Bird :—1 specimen of *Puffinus breviceauda*.

From Mr. John Brazier, C.M.Z.S.

Technological Dictionary—3 vols.

Chenu's Manuel de Conchologie et de Paléontologie Conchylogique.

Macgillivray's Conchologists' Text Book.

Guthrie and Larnach's Illustrated Catalogue.

Owen's Palæontology.

From Professor Liversidge, F.G.S.

1 Book :—Bristol's "Glossary of Mineralogy."

From Professor Hutton.

Books :—2 vols. Macquart's "Diptères exotiques." 2 Nos. Monthly Journal of Science, Dec. /79, May /80.

Crustacea :—15 species—62 specimens.

From T. Kirk, F.L.S.

Botanical Specimens :—About 200 specimens Phænogams and Ferns.

From R. Hungerford, Esq.

Fine collection of Shells :—317 species.

From Mr. Paul Bouvier.

Collection of Shells :—102 species.

From Mr. C. F. Ancey.

Collection of Shells :—74 species.

From Dr. Schmidt.

Skulls :—60 Egyptian skulls.

## APPENDIX VIII.

## List of Specimens sent away in Exchange.

1881.—To the Netherlands Museum.

Collection of Australian Birds :—61 species—91 specimens.

Australian Mammals :—21 species—25 specimens.

Fishes :—51 species—57 specimens.

Reptiles :—13 species—22 specimens.

Monotremata :—1 species—1 specimen.

To Dr. Feistmantel, Calcutta, India.

*Ceratodus Fosteri* :—1 specimen.

To — Whittel, Esq., Sydney.

1 Egg ( <i>Casuarus bennettii</i> .)		1 <i>Nectris carneipes</i> .
--------------------------------------	--	------------------------------

To J. R. Goldstein, Esq.

Polyzoa :—41 species.

To Gustave Beck, Esq., for the Brussels Museum.

Collection of Australian Birds :—38 species—48 specimens.

Crustacea :—57 species—163 specimens.

Mollusca :—76 species—206 specimens.

To Professor Giglioli, Florence, Italy.

Aboriginal Skulls.

1 Skull, Fiji.	2 casts Tasmanian Aborigines' skulls.
1 " N.S.W.	2 " " " faces after death.

To Dr. Cauvin, Jardin de plantes Museum, Paris.

6 casts of Skulls (Aboriginals).

To S. F. Baird, Esq., Director Smithsonian Institute, U.S.A.

Collection of Australian Mammals :—15 species—16 specimens.

Reptiles :—12 species—14 specimens.

Fishes :—67 species—97 specimens.

Echinodermata :—5 species—15 specimens.

To Professor H. de Saussure, Genoa Museum.

Collection of Insects :—Hymenoptera :—60 species—100 specimens.

" " Hemiptera :—12 species—24 specimens.

" " Diptera :—68 species—126 specimens.

To Mr. J. W. Sissons, Sheffield, England.

Collection of Australian Birds' Eggs :—33 species—67 specimens.

To Professor Parker, Dunedin Museum, New Zealand.

Collection of Fishes :—5 species—6 specimens.

Mammals :—5 species—8 specimens.

Crustacea :—2 species—8 specimens.

To Dr. A. Barrallier, du " Finisterre."

Casts :—2 casts of skulls, Tasmanian aboriginals—2 casts of faces, Tasmanian, after death.

To M. L. Boutan, Esq., du " Finisterre."

Books and Maps.

(From the Department of Public Instruction.)

Copy of Report of the late Council of Education, with Map, 1879.

Two copies of Public Instruction Act and Regulations framed thereunder.

Two complete sets of Australian Reading Books.

Two complete sets Irish National Board Series.

(From the Department of Mines.)

Geological Map of Wallerawang and Hartley, Tambaroora.

Annual Reports 1876-7-8-9.

Two copies of Geological Map of New South Wales.

(From the Surveyor General's Department.)

Large Geological Map of New South Wales.

Colony Map, showing minerals.

" " agriculture areas.

Map of County of Georgiana, in folio.

" " Dampier, with reference.

" " Camden, "

One copy of each sheet published of the Trigonometrical Survey, Port Jackson.

Small Map of the Colony.

Map of the City of Sydney and environs.

Index Map County of Harden (specimen of maps on scale 4 miles to an inch).

City and environs of Bathurst. } Specimen of town maps.

Town, " " Deniliquin. }

(From the Museum.)

Collection of Australian Fishes :—43 species—50 specimens.

Shells :—69 species—146 specimens.

Australian Insects :—200 species—450 specimens.

Insects (Duke of York's Island) :—15 species—37 specimens.

Lepidoptera from Port Darwin :—26 species—46 specimens.

Lepidoptera from New South Wales :—11 species—20 specimens.

To Colin Browning, Esq., Curator Nagpur Museum, India.

Collection of Birds :—75 species—85 specimens.

Fishes :—20 species—24 specimens.

Mammals :—13 species—13 specimens.

Reptiles :—9 species—10 specimens.

Collection of Crustacea :—36 species—74 specimens.

To H. H. Locke, Esq., Economic Museum, Calcutta, India.

Collection of Birds :—51 species—56 specimens.

Mammals :—12 species—12 specimens.

Reptiles :—10 species—11 specimens.

Fishes :—19 species—21 specimens.

Crustacea :—33 species—73 specimens.

To the Berlin Museum, through Dr. O. Finsch.

Collection of Birds :—144 species—168 specimens.

Collection of Ethnological specimens :—40 photographs.

1 Native's head, Lord Howe's Island (cast).

2 " faces, Tasmanian (cast).

2 " skulls, " "

2 New Zealand carved bones. "

1 " carved octagon block.

2 " Tiki.

4 New Zealand flax-beaters.

2 " spear-heads.

8 " stone adzes.

2 " sling-stones.

1 " stone club.

1 ancient bell (Malay).

Collection of Fishes :—27 species—35 specimens.

Crustacea (fresh-water) :—Astacopsis serrata.

Reptiles :—8 species—12 specimens.

## To Professor M'Coy, National Museum, Melbourne.

Collection of Fishes (N.S.W.) :—Dry specimens :—7 species—7 specimens. Spirit specimens :—58 species—80 specimens  
 Collection of Fishes handed over during the Melbourne Exhibition :—13 species—17 specimens.  
 Collection of Crustacea :—45 species—83 specimens.  
 Amphipoda :—20 species—20 specimens.  
 Echinodermata :—28 species—62 specimens.

## To R. Hungerford, Esq., Hong Kong.

Collection of Shells :—145 species—349 specimens.

## To Paul Bouvier, Esq., Marseilles, France.

Collection of Shells :—124 species—298 specimens.

## To C. F. Ancey, Esq., Marseilles, France.

Collection of Shells :—89 species—224 specimens.

## To Professor Kirk, F.L.S., Wellington, N.Z.

## Books :—

Exotic Ornithology—Scater and Salvin; 13 parts.  
 Australian Land Shells—Cox; 1 copy.  
 " Longicorns—Masters; 1 copy.  
 Flora Sylvatica, Southern India, parts I and II.  
 Transactions Linnean Society, vol. XVI, parts I and III.  
 " Zoolog. " " VII, complete.  
 " " " " VIII, complete, except part I.  
 " " " " IX, complete.  
 " " " " X, parts I and II.  
 Zoology of " Erebus" and " Terror," vol. I.  
 History of British Fishes—Yarrell, 2 vols., complete.  
 Fragmenta Photographica Australiæ—Mueller, vol. I, parts 1, 2, 4, and 5.  
 Transactions Linnean Society, vol. XXVII, parts I and II.

## To Dr. J. C. Cox.

Books :—Proceedings of the Zoological Society of London, 1830-36

## To the Free Public Library.

## Books :—

Guide to Australian Fossil Remains in Australian Museum—Kreffit—5 copies.  
 Catalogue of Australian Land Shells—Cox—5 copies.  
 List of Australian Longicorns—Masters—5 copies.  
 British Museum Catalogue : Snakes—1 copy. Lizards—1 copy. Tortoises and Crocodiles—1 copy.  
 Fragmenta Photographica Australiæ—Mueller—3 vols.  
 Don's Gardner's Dictionary—4 vols.  
 Geological Report on Cornwall, Devon, and W. Somerset (De la Bèche)—1 vol.  
 Mus. Comp. Zool., Harvard. Vol. III, No. 1, Brachiopoda (Dall.)—1 vol. Annual Reports, 1870—3 copies.  
 Paléontologie (F. J. Pictet)—3 copies.  
 Poets and Prose-writers of N.S.W. (Barton)—5 copies.  
 Royal Society (Lond.) Phil. Trans. from 1826 to 52 (various)—39 parts.  
 Cat. of described Coleoptera of Aust. (Masters)—Part I—2 copies.  
 " " " " II 1 "  
 " " " " III 2 "  
 " " " " V 7 "  
 Stalk and sessile-eyed Crustacea of N.Z.—Cat. Col. Mus., N.Z. (Miers)—1 copy.  
 Cat. of Minerals and Rocks in Collectn. Aus. Mus. (Kreffit)—2 copies.  
 Cuviers Règne Animal—4 vols.

## To Professor Hutton.

## Books :—

Poli's Testacea utriusque Siciliæ—2 vols.  
 Philosophical Society of N.S.W., 1862-5—1 vol.  
 Royal Society of Van Diemen's Land, 1848-51—1 vol.  
 Royal Society of Tasmania, 1871—1 vol.

## To the Royal Society of New South Wales.

Appendix to Benj. Anderson's Journey to Musadu.  
 Australian Fossil remains in Australian Museum, Guide to (Kreffit.)  
 " Land shells, Catalogue of (Cox).  
 " Longicorns, List of (Masters).  
 Fosforoscenza del Mare, Giglioli.  
 Geological Survey of Great Britain and of Museum of Practical Geology (Lond.), Memoirs of :—  
 Vol. I, Vol. II, Parts I and II.  
 Geology, Part I. Iron ores, &c.  
 Mining Records.  
 On the Tertiary Fluvio-marine formation of Isle of Wight.  
 Geological Survey of United Kingdom, Memoirs of. Decade I-IV, V-VIII.  
 Literature in N.S.W. (G. B. Barton.)  
 Pentacrinus Europæus, Memoirs on. (J. V. Thompson.)  
 Poets and Prose-writers of N.S.W. (Barton.)

## To Baron Maclay.

1 cast of Skull of Cape York aboriginal.

## To John Brazier, Esq., C.M.Z.S.

Linné Systema Naturæ—10 vols.  
 Transactions of Zoological Society, London—vols. V., VI.  
 Poets and Prose-writers of N.S.W. (Barton.)  
 Literature in N.S.W. (Barton.)

APPENDIX IX.  
List of Specimens purchased.  
For Cash, by Curator.

2 Eggs of <i>Menura victorica</i> .	1 <i>Anous panaya</i> .
1 <i>Peneus canaliculatus</i> .	1 <i>Pomacentrus</i> sp.
5 <i>Upeneus</i> sp.	2 <i>Pterois</i> .
2 <i>Pagrus unicolor</i> .	1 <i>Trachypoma macrostoma</i> .
1 <i>Cheilodactylus vittatus</i> .	1 <i>Tetrodon</i> sp.
4 <i>Platycephalus</i> sp.	6 <i>Pempheris compressus</i> .
3 <i>Thynnus</i> sp.	6 <i>Ocydromus sylvatica</i> .
1 <i>Synaptura nigra</i> .	4 <i>Sterna fuliginosus</i> .
1 <i>Lethrinus</i> sp.	1 <i>Strepera crissalis</i> .
26 <i>Hemirhamphus intermedius</i> .	5 <i>Rammina dentata</i> .
36 " <i>regularis</i> .	9 <i>Belone ferox</i> .
1 <i>Labrichthys</i> sp.	1 <i>Heathen god</i> .
1 <i>Chironemus</i> sp.	1 <i>Chiloscyllium furvum</i> .
4 <i>Synaptura nigra</i> .	1 <i>Aracana lenticularis</i> .
1 <i>Arnoglossus</i> sp.	1 <i>Histiogaster recurvirostris</i> .
1 <i>Scylla serrata</i> .	1 <i>Ninox</i> sp.
5 <i>Neptunus pelagicus</i> .	1 <i>Malurus elegans</i> .
1 <i>Saurus myops</i> .	1 " <i>splendens</i> .
1 <i>Cyclopsitta diophthalma</i> .	Small Collection of Recent and Fossil Shells.
1 <i>Ceyx solitaria</i> .	1 <i>Astacopsis</i> sp.
2 <i>Todopsis wallacei</i> .	1 Coll. of Coleoptera (100 selected specimens).
1 " <i>cycanocephala</i> .	2 <i>Aulopus purpurissatus</i> .
1 <i>Arses</i> sp.	1 <i>Trigla polygomata</i> .
1 <i>Platyercus eximius</i> , var.	Samples of Tin Ore—chiefly Crystals.
1 <i>Phascogale</i> sp.	1 <i>Chrysophrys sarba</i> .
1 <i>Platyercus spurius</i> .	1 <i>Girella simplex</i> .
1 <i>Anellobia lunulata</i> .	1 <i>Casarea tadornoides</i> .
3 <i>Meliornis sericca</i> .	2 <i>Nettapus albipennis</i> .
2 <i>Eopsaltria capito</i> .	2 <i>Fulica australis</i> .
2 " <i>chrysorrhous</i> .	12 <i>Mugil peronii</i> .
1 <i>Myzantha melanophrys</i> .	2 <i>Scorpaena cardinalis</i> .
1 <i>Pachycephala glaucura</i> .	1 <i>Platycephalus fuscus</i> .
1 <i>Cuculus insperatus</i> .	1 <i>Aulopus purpurissatus</i> .
1 <i>Barracoota</i> , <i>Thyrsites atam</i> .	1 <i>Mytilus latus</i> .
1 <i>Synoicus australis</i> .	4 <i>Spatula rhynchotis</i> .
1 <i>Pygopus</i> sp.	2 <i>Nyroca australis</i> .
2 <i>Hoplocephalus</i> sp.	4 <i>Clupea</i> sp.
1 <i>Typhlops</i> sp.	1 <i>Beryx affinis</i> .
9 <i>Astacopsis</i> .	1 <i>Platyercus eximius</i> .
12 <i>Mugil grandis</i> .	1 <i>Trichoglossus multicolor</i> .
1 <i>Aulopus purpurissatus</i> .	1 <i>Halcyon pyrrhopygia</i> .
2 <i>Beryx affinis</i> .	1 <i>Erythrogonys cinctus</i> .
1 <i>Chrysophrys australis</i> .	1 <i>Oreocia gutturalis</i> .
1 <i>Platycephalus fuscus</i> .	1 <i>Artamus personatus</i> .
1 <i>Aulopus purpurissatus</i> .	1 <i>Myzantha flavigula</i> .
2 <i>Acanthorhynchus superciliosa</i> .	1 <i>Ptilotis pennicillatus</i> .
1 <i>Myzomela obscura</i> .	1 <i>Cyclopsitta</i> sp.
2 <i>Sittella leucocephala</i> .	1 <i>Ptilopus iozonus</i> .
3 <i>Malurus melanocephalus</i> .	1 <i>Haplodactylus</i> .
1 <i>Acanthiza reguloides</i> .	1 <i>Serranus ocellata</i> .
1 <i>Gerygone fusca</i> .	2 <i>Lates</i> sp.
1 <i>Ptilotis ornatus</i> .	1 <i>Platycephalus fuscus</i> .
1 <i>Atrichia rufescens</i> .	1 <i>Rhinobatus granulatus</i> .
1 <i>Monarchella saxicolina</i> .	1 <i>Morelia spilotes</i> .
1 <i>Chilodactylus</i> sp.	1 <i>Vernicella annulata</i> .
1 <i>Saurus</i> sp.	1 <i>Ptilotis vittata</i> .
2 <i>Cossyphus</i> sp.	1 <i>Glyciophila albifrons</i> .
1 " " "	1 <i>Ptenocercus rufescens</i> .
1 <i>Atypichthys strigatus</i> .	1 <i>Sphenacacus gramineus</i> .
1 <i>Apogon</i> sp.	Collection of Birds—21 species, 40 specimens.
1 <i>Falco melanogenys</i> .	1 <i>Medallion of Cuvier</i> .
1 Egg of <i>Rallus pœcilopecterus</i> .	

From Baron MacLay.

2 *Dyphillodes chrysoptera*. | 2 *Dasyptilus pesquetii*.

From Mr. Charles Blake.

10 specimens of Gold on Opal and Mica schist.

From Mr. Latham.

1 Luth, *Dermatochelys coreacea*.

From Mr. Thompson.

5 *Podiceps cristatus*. | 2 *Stringops habroptilus*.

From E. Vickery & Co.

11 Clubs.	1 Model of a Double Canoe.
25 Clubs.	3 Clubs.
5 King Clubs, flat-headed (carved).	1 Bow and 4 Arrows.
4 Throwing Clubs.	5 Earthenware Vessels.
5 Long Staves.	1 Gourd.
2 Club-like Walking-sticks.	2 Oil-dishes.
9 Large Spears.	1 Food-hanger.
2 Pillows or head-rests.	1 Stone Adze.
1 Wooden Dish for oil.	1 Wooden Adze.
1 Kava Dish.	2 Caulking Tools for canoe.
3 Spirit "Bures" of Coir (cocoa-nut fibre).	3 Tapa-beaters.
3 Women's Sulu.	2 Spears.
5 Large Fans.	5 pieces Pottery of red Earthenware.
2 Necklaces of Whales' Teeth.	1 piece of Iron Ore.

From

## From Mr. Ward.

1 *Pentacrinus, caput-medusæ.*

## From G. Warrington.

1 *Voluta magnifica.*  
1 *Belone ferox.*2 *Voluta magnifica.*

## From Mr. Ellis.

1 Greenstone Adze (Nephrite).

8 specimens of Gold-bearing Quartz.

## From T. Stephenson.

1 small Greenstone Adze (Nephrite).

## From Mr. Goodwin.

1 *Lynx* (American).  
1 Panther.  
1 Native Cat (South American).1 Prairie Dog.  
2 *Anser rossii.*  
Collection of Birds—12 species, 20 specimens.

## From Mr. Cole.

4 Skulls of Aborigines.

## From Mrs. W. E. Armit.

10 Spears.  
45 Spears (barbed and ornamented).  
3 Yam-sticks.  
2 flat-pointed Spears.  
5 long Spears.  
7 Fish Spears.  
3 Shields of *Erythrina* wood.  
9 Throwing Sticks.  
12 Knives of hoop iron.  
7 Hatchets of horse-shoe iron.  
5 Glass Knives.  
4 Stone-bruisers.  
5 Stone Axe-heads.  
1 Chisel made from an iron bolt.  
1 Pouch Belt and pipe.  
Native Beeswax.  
1 Case of Needles of Bone.  
White earth for painting.  
Fire-sticks, &c.  
Needles, Tools, &c.  
2 Bone Needles.  
Kangaroo Fibulae.  
1 Knife or Saw.  
1 Flint-bladed Knife.

## APPENDIX X.

## LIST OF SPECIMENS COLLECTED BY THE MUSEUM EMPLOYÉES

By K. Broadbent.

Collection of Birds :—42 species—70 specimens.

Collection of Fossil Bones.

115 specimens of bones of Kangaroos. 31 specimens of bones of Diprotodon. 1 portion of lower jaw of Nototherium. 2 lower jaws of Wombat. 1 tibia of a Bird.	4 vertebrae of a Crocodile. 1 lower jaw of Procoptodon. Numerous fragments of water-worn bones and fossil wood.
---	---

Mollusca :—A shell. (dead *Helix*.)Eggs of Birds :—3 eggs of *Mirafra horsfieldii*.

Collection of Mammals :—9 species—26 specimens.

By A. Morton (Assistant Taxidermist).

*(At the Solomon Islands.)*

Collection of Mammals :—4 species—25 specimens.

Collection of Fishes :—66 species—203 specimens.

Collection of Reptiles :—8 species—18 specimens.

A Batrachian :—1 species—1 specimen.

Collection of Arachnida :—3 species—3 specimens.

Collection of Echinodermata :—8 species—14 specimens.

Collection of Birds :—59 species—167 specimens.

Collection of Skulls (Aborigines) :—17 specimens.

Collection of Ethnological Specimens :—13 specimens.

Collection of Minerals :—6 specimens.

Collection of Crustacea :—1 species—1 specimen.

Collection of Mollusca :—26 species of land, and 20 sp. fresh water, in all about 500 specimens.

By J. A. Thorpe (Taxidermist).

Collection of Birds :—38 species—80 specimens.

By J. Wintle.

Collection of Birds :—32 species—55 specimens.

Collection of Mammals :—5 species—8 specimens.

Human Remains of 4 individuals.

## LIST of Mollusca dredged off Point Piper, Rose Bay, Shark Point, Vaucluse, Green Point, and Watson's Bay.

		Gasteropoda.	
	Specimens.		Specimens.
1. Murex territus, Reeve	1	39. Clathurella pustulata, Ang. ; young	1
2. Urosolpinx Hanleyi, Angas ; 2 dead	6	40. " bilineata, Ang. ; dead	22
3. " Tritoniformis, Blan. ; dead	2	41. " rufozonata, Ang. ; dead	2

APPENDIX XI.

LIST OF SPECIMENS CURED AND MOUNTED AND OTHER WORK DONE BY THE TAXIDERMISTS AND ARTICULATOR.

Mammals.

7 Seals, <i>Zalophus cinereus</i> .	1 Dog, from New Guinea.
1 Javanese deer, <i>Tragulus javanicus</i> .	1 Group of Seals, <i>Zalophus</i> .
1 Seal, <i>Zalophus cinereus</i> .	Skin of Mongouse.
1 <i>Peragalea lagotis</i> .	A Mongouse.
1 <i>Halmaturus</i> sp.	1 American Wild Cat, <i>Chaus</i> sp.
1 Tapir (juv.), <i>Tapirus terrestris</i> .	A Monkey, <i>Cercopithecus</i> sp.
1 <i>Halmaturus dorsalis</i> .	A Wallaby, <i>Halmaturus crassipes</i> .
1 Marmot, <i>Arctomys monax</i> .	1 Lynx, <i>Felis lynx</i> .
1 Lemur sp.	1 Puma, <i>Felis concolor</i> .
2 Lemurs from Madagascar.	1 Coyette or Prairie Dog.
1 Bandicoot, <i>Perameles nasuta</i> .	1 Canada Lynx, <i>Felis canadensis</i> .
1 <i>Phascogale pennicillatus</i> .	1 Monkey.
1 <i>Halmaturus ualabatus</i> .	1 Flying Fox, <i>Pteropus</i> sp.
1 <i>Mus decumanus</i> , albino.	2 Seals, <i>Zalophus cinereus</i> .
4 <i>Halmaturus papuensis</i> .	1 Albino Pademelon, <i>Halmaturus thetidis</i> .

Birds.

A Penguin, <i>Eudyptula minor</i> .	2 <i>Dyphyllodes chrysoptera</i> .
An Ostrich, <i>Struthio camelus</i> .	2 <i>Dasyptilus pesquetii</i> .
1 <i>Hieracidea orientalis</i> .	1 Finch ( <i>Estrilda</i> sp.)
4 <i>Ocyphaps lophotes</i> .	8 Small Birds.
1 Penguin, <i>Eudyptula minor</i> .	1 <i>Falcunculus frontatus</i> .
4 Birds.	15 Birds.
5 " (skins remade).	5 <i>Podiceps australis</i> .
Group of 2 <i>Ephthianura aurifrons</i> with nest.	2 <i>Stringops habroptilus</i> .
1 <i>Donacicola spectabilis</i> .	1 <i>Falco frontatus</i> .
1 <i>Falco</i> sp.	2 <i>Donacicola</i> sp.
1 <i>Donacicola</i> sp.	1 <i>Cacatua galerita</i> .
1 <i>Stercorarius antarctica</i> .	1 Macaw. <i>Ara aracana</i> .
1 <i>Brenta</i> sp.	2 <i>Climacteris picumnus</i> .
1 <i>Micropterus cinereus</i> .	2 <i>Chthonicola sagittata</i> .
1 <i>Pandion leucocephalus</i> .	5 <i>Pardalotus punctatus</i> .
1 <i>Merodias pacifica</i> .	2 <i>Rhipidura albiscapa</i> .
1 <i>Donacicola castaneothorax</i> .	4 <i>Sittella pileata</i> .
1 <i>Pyrhula vulgaris</i> .	2 <i>Myzomela nigra</i> .
1 <i>Phaeton phoenicurus</i> .	4 <i>Pomatorhinus temporalis</i> .
2 <i>Bernicla poliocephala</i> .	2 <i>Petroica superciliosa</i> .
1 <i>Micropterus cinerea</i> .	2 <i>Sittella leucocephala</i> .
1 <i>Ardea novae-hollandiae</i> .	2 <i>Gerygone albogularis</i> .
1 <i>Lobivanellus lobatus</i> .	2 <i>Pomatorhinus ruficeps</i> .
2 Terns, <i>Onychoprion fuliginosa</i> .	4 " <i>superciliosa</i> .

Birds—*continued.*

1 Finch, <i>Donacicola spectabilis</i> .	2 Flycatchers.
1 <i>Oreocincla lunulata</i> .	3 <i>Fosterops strenua</i> .
7 <i>Calipepla californica</i> .	Group of Lyre Birds.
2 <i>Nettapus albipennis</i> .	Group of Regent, Rifle, and Bower Birds.
2 Coots, <i>Fulica australis</i> .	2 <i>Myzomela</i> .
1 <i>Ninox boobook</i> .	1 <i>Platycercus eximius</i> .
1 <i>Grus australasianus</i> .	1 <i>Trichoglossus multicolor</i> .
1 Duck ( <i>Dendrocygna vagans</i> ).	1 <i>Psittacus erythacus</i> .
1 <i>Calyptorhynchus funereus</i> .	7 <i>Calipepla californica</i> .
1 <i>Callocephalon galleatum</i> .	1 <i>Myiagra</i> sp.
Group of 3 <i>Malurus splendens</i> .	4 <i>Piezorhynchus vidua</i> .
2 <i>Malurus elegans</i> .	4 <i>Rhipidura rubrofrontata</i> .
2 <i>Turaccena crassirostris</i> .	2 <i>Myzomela pulcherrima</i> .
2 <i>Halcyon</i> sp.	1 <i>Ninox boobook</i> .
1 Parrot, <i>Psittacus erythacus</i> .	25 Birds.
6 Ducks. ( <i>Nyroca australis</i> ).	2 <i>Anser rossii</i> .
2 Flycatchers.	1 Stilt, <i>Himantopus leucocephalus</i> .
1 Pigeon <i>Ptilopus</i> .	26 Birds (skinned).
1 <i>Myzomela pulcherrima</i> .	48 "
3 <i>Monarcha ugiensis</i> .	2 "
5 Flycatchers.	8 Birds (remade).
1 <i>Calornis</i> .	1 Black Cockatoo, <i>Calyptorhynchus funereus</i> .
1 <i>Monarcha</i> .	An Owl. <i>Athene boobook</i> .
1 <i>Myzomela pulcherrima</i> .	9 Birds (spirit specimens).

## Fishes.

1 <i>Cossyphus</i> sp.	1 <i>Trigla kumu</i> .
1 <i>Heterodontus galeatus</i> .	1 <i>Histioglossus recurvirostris</i> .
1 <i>Aracana lenticularis</i> .	A Flying Gurnard, <i>Trigla polyomata</i> .
1 <i>Gempilus serpens</i> .	1 <i>Platycephalus fuscus</i> .
1 <i>Chrysophrys sarba</i> .	1 <i>Chrysophrys sarba</i> .
1 <i>Callorhynchus antarcticus</i> .	1 <i>Crossorhinus barbatus</i> .
1 Gold Carp. <i>Cyprinus auratus</i> .	1 Large Eel. <i>Muraenesox cinerea</i> .
1 <i>Lethrinus</i> sp.	1 <i>Aulopus purpurissatus</i> .
1 <i>Saurus myops</i> .	1 Black fish, <i>Gerella simplex</i> .
1 <i>Monacanthus ayraudii</i> .	1 Shark, <i>Ginglymostoma</i> sp.
1 <i>Lethrinus (chrysostomus ?)</i> .	1 Large Eel. <i>Muraenesox cinerea</i> .
1 <i>Neonanthias guntheri</i> .	1 Large Ray. <i>Trygon pastinaca</i> .

## Reptiles.

1 Large Luth. <i>Dermatocheilus coriaceus</i> .	1 Crocodile, <i>Crocodilus biporcatus</i> .
1 Small Crocodile, <i>Crocodilus biporcatus</i> .	

Crustacea :—1 Large *Scylla serrata*.

## Skeletons.

1 Giant Petrel. <i>Ossifraga gigantea</i> ]	Numerous skeletons cleaned and stored.
---	--

## Casts and Moulds.

22 Moulds of remains of Fossil Animals.	10 Casts of Greenstone Tikis.
3 Casts of <i>Epiornis</i> Egg from Madagascar.	6 Moulds of " " "
2 Casts of Tasmanian skulls.	2 Casts and 1 mould of Moa sternum.
1 Skull of a Gorilla.	Pelvis of <i>Doprotodon</i> (restored).
1 Lower jaw of do.	Mould of Cave Bear's head.
20 Casts from moulds obtained in Melbourne.	2 " " lower jaw.
1 Mould of human skull.	2 " " of large Tiki.
3 Skulls of Australian natives.	2 " " small " "
1 Greenstone Tiki.	6 Casts from the Tikis.
1 Stone club head.	

## Photographs.

3 Negatives of Fish.	2 Negatives of <i>Neonanthias guntheri</i> .
1 " of Australian native.	10 Negatives—Geological subjects.
3 Prints of New Guinea native boy.	20 Prints " " "
4 " of <i>Doprotodon</i> Pelvis (restored).	15 " of Wellington Caves.
2 Negatives of " "	23 " " " "
2 Prints of <i>Lethrinus</i> sp.	21 " " " (mounted)!
1 Negative " "	

## APPENDIX XII.

LIST OF SPECIMENS OBTAINED DURING THE DREDGING EXCURSION TO PORT STEPHENS,  
NOVEMBER, 1880.

## A. VERTEBRATA.

## Mammals.

*Aretocephalus cinereus*. One adult; 15 young from the Seal Rocks and adjacent coast.  
1 *Delphinus* species.

One specimen, about 6 feet in length, harpooned off Seal Rocks.

## Birds.

2 Eggs of *Nycticorax caledonicus*, from island in Port Stephens.

## Fishes.

Percidæ—*Arripis salar*. *Therapon cuvieri*.  
Sparidæ—*Girella tricuspidata*. *Chrysophrys sarba*, Forsk. *Chrysophrys australis*, G. T. H.  
Scienidæ—*Otolithus taraglin*, MacL.  
Carangidæ—*Temnoilon saltator*, Blh. *Caranx georgeanus*, Cuv. et Val.  
Trachinidæ—*Sillago ciliata*.  
Mugillidæ—*Mugil dobula*, G. T. H.

NOTE.—The small forms brought up in the dredge have not yet been worked out.

## B. INVERTEBRATA.

## Crustacea.

<i>Achaeus lacertosus</i> , Hasw., Nelson's Bay	<i>Melita australis</i> , Hasw., Port Stephens
<i>Oncinopus subpellucidus</i> , Stimps., Nelson's Bay	<i>Atylus monoculoides</i> , " "
<i>Microhalimus deflexifrons</i> , Hasw., "	<i>Harmonia crassipes</i> , " "
<i>Huena bifurcata</i> , Streets, "	<i>Mocra Ramsayi</i>
<i>Paramithrax spatulifer</i> , Hasw. (new sp.), Nelson's Bay	<i>Moera rubro-maculata</i> , Stimps.
<i>Hyastenus diacanthus</i> , De Haan., Broughton Islands	<i>Megamoera subcarinata</i> , "
<i>Micippa spinosa</i> , Stimps., Nelson's Bay	<i>Amphithoe</i> sp. n.
<i>Tiarinia elegans</i> , Hasw. (new sp.), Broughton Islands	<i>Amphithoe</i> sp. (?)
<i>Actaea granulata</i> , Aud., Port Stephens	<i>Colomastix Brazieri</i> , Hasw., Broughton Islands
<i>Actaea peronii</i> , M.—Edw., "	<i>Cyrtophium dentatum</i> , Hasw., "
<i>Chlorodopsis areolatus</i> , M.—Edw., Port Stephens.	<i>Cyrtophium hystrix</i> , " "
<i>Pilumnus rufopunctatus</i> , Stimps., "	<i>Cyrtophium parasiticum</i> , " "
<i>Pilumnus vestitus</i> , Hasw., "	<i>Icilius australis</i> , " "
<i>Pilumnopeus serratifrons</i> , Kinahan, "	<i>Xenocheira fasciata</i> , " Port Stephens.
<i>Hexapus sexpes</i> , Fabr., "	<i>Iphimedia ambigua</i> " "
<i>Thalamita sina</i> , M.—Edw., "	<i>Megamoera</i> n. sp. " "
<i>Hymenosoma varium</i> , Dana, "	<i>Anonyx</i> n. sp. " "
<i>Phlyxia crassipes</i> , Bell " "	And several other undescribed species of Amphipoda.
<i>Phlyxia orbicularis</i> , Hasw., "	<i>Sphacroma aspera</i> , Hasw., Port Stephens
<i>Cryptodromia lateralis</i> , Gray, "	<i>Cymodocea pubescens</i> , M.—Edw., Port Stephens
<i>Dromia excavata</i> , Stimps., "	<i>Calyptura carnea</i> , Hasw., "
<i>Dromia sculpta</i> , Hasw., "	<i>Haliophasma maculata</i> , Hasw.
<i>Lyrcidus tridentatus</i> , De Haan, "	<i>Paranthura australis</i> , "
<i>Porcellana dispar</i> , Stimps., "	<i>Paranthura</i> sp.
<i>Pagurus setifer</i> , M.—Edw., "	<i>Stenetrium armatum</i> , Hasw., Broughton Islands
<i>Galathea australiensis</i> , Stimps., "	<i>Cilicoca hystrix</i> , Hasw. (new sp.), Broughton Islands
<i>Galathea magnifica</i> , Hasw. (new sp.), Broughton Islands	<i>Cilicoca spinulosa</i> , Hasw. (new sp.), Port Stephens
<i>Gebia spinifrons</i> , Hasw. (new sp.), Port Stephens	<i>Cymodocea tuberculata</i> , Hasw. (new sp.), Port Stephens
<i>Gnathophyllum fasciolatum</i> , Stimps., "	<i>Cirolana lata</i> , Hasw., (new sp.), "
<i>Alpheus</i> sp., "	<i>Apeudes australis</i> , Hasw. (new sp.), "
<i>Alpheus</i> sp., "	<i>Paratanais tenuicornis</i> , Hasw. (new sp.) "
<i>Amaryllis brevicornis</i> , Hasw., "	<i>Arcturus brevicornis</i> , Hasw. (new sp.), Broughton Islands
<i>Lysianassa</i> sp., Broughton Islands	<i>Æga</i> sp. ? Broughton Islands
<i>Ampelisca australis</i> , Haswell, Port Stephens	<i>Caprella</i> sp. ? Port Stephens
<i>Cyproidia ornata</i> , Hasw., "	<i>Proto</i> sp. ? " "
<i>Leucothoe commensalis</i> , Hasw., "	<i>Protella</i> sp. ? " "

Arachnida :—Several species of Pycnogonida.

## Annelida.

<i>Eunice</i> sp., Nelson's Bay.	<i>Polynoë</i> sp. n., Broughton Islands
" " "	<i>Polynoë</i> sp., Port Stephens
" " "	<i>Cirratulus</i> sp. "
" " Broughton Islands	<i>Aphrodite</i> sp. "
<i>Terebella</i> sp., Nelson's Bay	<i>Glycera</i> sp. "
<i>Terebella</i> sp. n. "	<i>Pectinaria</i> sp. n. "

Turbellaria :—*Nemertes* sp.

## Tunicata.

<i>Ascidia tinctoria</i> , Nelson's Bay	<i>Cynthia</i> sp., Nelson's Bay
---	----------------------------------

## Polyzoa.

A very large series, containing many new genera and species.

## Echinodermata.

<i>Synapta</i> sp., Port Stephens	<i>Comatula</i> , sp.
<i>Cucumaria pentagona</i> , Q. et G., Port Stephens	<i>Strongylocentrotus eurythrogrammus</i> , Val.
<i>Thyone spinosa</i> " "	<i>Echinocardium australe</i> , Gray
<i>Stichopus</i> sp. " "	Many species of <i>Ophiuridæ</i> , belonging to several genera
<i>Comatula</i> sp.	

## Actinozoa.

<i>Balanophyllia buccina</i> , Tenison-Woods, Broughton Islands	And several other species.
<i>Deltocyathus rotæformis</i> " "	Several species of <i>Gorgonidæ</i>
<i>Heteropsammia elliptica</i> (?), " "	

## Hydrozoa.

A good many species of Hydroid Zoophytes, of the genera *Sertularia*, *Sertularella*, *Aglaophenia*, and *Thujaria*.

## Spongiada.

A large series of siliceous sponges, containing many species.

C.

C. MOLLUSCA.

## APPENDIX XIII.

LIST OF FOSSIL ANIMALS, THE REMAINS OF WHICH ARE REPRESENTED BY BONES FOUND IN THE  
CAVES AT WELLINGTON, N.S.W.

## Mammals.

Diprotodon Australis, C. III. and IV.	Sarcophilus, C. III.
Sthenurus, 2 sp., C. III.	Dasyurus, 2 sp., C. III.
Protomnodon, og., C. III. and IV.	Phalangista, C. III.
Protomnodon anack, C. III. and IV.	Thylacoleo carnifex, C. III. and IV.
Protomnodon sp.	Portion of an upper jaw and several lower rami.
Palorchestes sp., C. IV.	Echidna, C. III.
Macropus several sp., C. III. and IV.	Shoulder-blade and claw bones.
Halmaturus several sp., C. III.	Ornithorhynchus, C. III.
Betongia.	One claw bone only.
Thylacinus sp., C. III. and IV.	Mus, several sp. C. III. and IV.
Phascalomys, C. III. and IV.	

## Birds.

These are represented by portions of the tarso-metatarsal bones, belonging to carinate birds; a portion of the tarso-metatarsus of a bird allied to the Emu; one or two doubtful unguinal phalanges, probably raptorial; and a sternum of a small carinate bird. C. III. and IV.

## Reptiles.

Vertebrae of a large lizard, Hydrosaurus sp.; jaws of a lizard allied to Cyclodus, vertebrae of the same.  
Jaws of small lizards. C. III.

## Mollusca.

Remains of 2 species of Helix, tolerably perfect. C. III., 1 sp.; C. IV., 2 sp.  
(There are also over 1,000 specimens of Fossils not yet determined.)

## LIST of the Fishes found in the fresh waters of the Richmond River District.

Percidæ.		
1. Lates colonorum Guth., several varieties from different localities.	7. Mugil dobula.	
2. Oligorus macquariensis, Cuv. et Val., from the creeks and headwaters of the Richmond River.	8. Mugil sp.	
3. Gerres sp.	Siluridæ.	
	9. Copidoglanis tandanus, Mitchel.	
Sparidæ.		
4. Chrysophrys sarba.	10. Arius Australis, Guth.	
	Scombresocidæ.	
Triglidæ.		
5. Centropogon robustus, Guth.	11. Hemirhamphus intermedius.	
	12. Arrhamphus sp.	
Trachimidæ.		
6. Sillago sp.	Clupeidæ.	
	13. Clupea richmondia, Macl.	
	Murænidæ.	
	14. Anguilla australis, Richardson.	

## Crustacea.

1. Astacopsis serrata.	3. Palæmon ornatus.
2. Astacopsis sp.	

In addition to those found in the fresh water, many of the ordinary salt water species were obtained.

ED. P. RAMSAY,  
Curator.

## TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM REPORT FOR 1881.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this the Second Annual Report of the Committee of Management of the Technological, Industrial, and Sanitary Museum.

1. The business of the Museum has been conducted by the same Committee as in the previous year, 1880, namely, Mr. Alfred Roberts, M.R.C.S.E., Professor Liversidge, F.G.S., and Mr. Robert Hunt, Deputy Master of the Royal Mint—Mr. C. R. Buckland still acting as Secretary. Early in October, Mr. J. H. Maiden was appointed temporarily to classify and arrange the collected specimens, and generally to perform the duties of a Curator. Mr. Maiden, who possessed very high recommendations from gentlemen connected with similar institutions in England, has had the entire control of the arrangement of the Museum, and the results of his work are very satisfactory to the Committee.

2. At the commencement of the year several thousand circulars were distributed to exhibitors at the Melbourne Exhibition and others, setting forth the objects of the Museum, and soliciting donations. In response to these and previous circulars a large number of valuable specimens have been obtained, a list of which appears in Appendix III. The work of packing the specimens obtained at the Melbourne Exhibition was entrusted to the Acting Secretary, who also received instructions to note any articles worthy of purchase. Few purchases, however, were made, the Committee not being at that time in possession of the necessary funds. Some valuable presents were made to the Museum, through the Executive Commissioner for New South Wales, by Commissioners representing foreign countries and the Colonies. A few exchanges have been effected through the medium of the Australian Museum, collections of Natural History specimens having been sent in return. Further donations have been received from Europe, also some valuable purchases ordered from exhibitors at the Melbourne Exhibition.

3. The Committee, having ascertained that an International Medical and Sanitary Exhibition was to be held in London in July, took steps to have the Museum properly represented, and on the Government allowing the Agent General to act for the Committee, a sum of £100 was sent to him with a request that he would use his best endeavours to further the objects of the Institution, and purchase articles of special interest. Two cases of specimens and pamphlets have been received, and it is expected that others will follow.

4. The south-western portion of the Garden Palace has been enclosed and set apart for the purposes of the Museum. Over 30,000 feet of ground space are thus available for the display of the valuable collection of specimens, and the whole of this will be utilized. In connection with the Museum there will be a library of reference and reading-room, a chemical laboratory, and work-room. It is intended to employ the laboratory for the prosecution of original chemical and physical research, with especial reference to the utilization of the products of New South Wales and Australia generally. Analyses and examinations of colonial products, with a view to ascertaining their adaptability for economic purposes, will also be made at the instance of inquirers. The necessary chemicals and appliances for use in the laboratory have been ordered from England.

5. It is the aim of the Trustees to make this Museum one of interest and lasting service to the mass of the population. Information will be supplied in regard to things met with in daily life by people of different avocations; and no effort will be spared to make the Museum worthy of its title as an Industrial Museum. Manufactures and technical operations of all kinds will be represented by specimens and series of specimens illustrative of each process, from the raw material to the finished article. Special attention will be devoted to Section VIII (sanitary arrangements and appliances, &c.), in the belief that a well-arranged collection of sanitary appliances will prove of very material benefit to the country.

6. The work of arranging and preparing exhibits is being rapidly proceeded with, and a considerable portion of the Museum will probably be open to the public in the course of the next six months.

7. The contents of the Museum will be arranged in fifteen principal sections, of which Sections I, II, III, IV, VI, and IX are in an advanced state of preparation.

Section I.—Animal products, comprising textile materials of animal origin, including hair, skins, leather, gut, &c.; miscellaneous animal coverings, *e.g.*, furs, feathers, down; materials for carving, &c., *e.g.*, whalebone, bone, ivory, horn, tortoise-shell.

Marine products used alone or in manufactures, *e.g.*, shells (including cameos), coral, sponges, &c.; foods, as caviare, isinglass, bêche-de-mer, and oils, fats, and wax of animal origin; animal substances employed in dyeing, perfumery, pharmacy, &c.

Section II.—Vegetable products (other than foods), *e.g.*, oils and oil seeds, including drying, non-drying, and volatile or essential oils, vegetable tallow, vegetable wax, &c.

Gums, resins, &c., including the gums and resins proper, gum-resins, balsams, kinos, caoutchouc or India-rubber, gutta-percha, vulcanized India-rubber, ebonite or vulcanite and other compounds of caoutchouc with sulphur.

Fibres: Specimens of fibres in all stages of preparation; select examples of textile fabrics of vegetable origin; fibres suitable as paper materials. Especial prominence will be given to cotton and flax, and also to native fibre plants.

Woods: Samples of timber for building and manufacturing purposes generally.

Dyes and tans: Dyes, pigments, mordants, tanning extracts, &c., of vegetable origin; specimens of the parts of plants used in dyeing and tanning.

Perfumes: Substances of vegetable origin used in their preparation.

Drugs: Parts of plants, and miscellaneous products yielded by plants and used medicinally, whether official or not.

Miscellaneous specimens of vegetable origin with uses not enumerated above; botanical specimens of special interest.

Section III.—Waste products: Substances which, either from the abundance of their occurrence or from their offensive nature in themselves, or for other reasons, may be placed in this category. The preparation of valuable commercial products from coal-tar, of useful medicinal and other substances from the eucalypti, may be cited as examples.

Section IV.—Foods, including cereals, pulse, cocoa, sugar; models, &c., of perishable vegetables and fruit; preserved specimens of miscellaneous foods of animal or vegetable origin; substances which may be considered as food-adjuncts, *e.g.*, tea, coffee, spices, &c. Tobacco, and other substances which are smoked or used as masticatories in various parts of the world, will be included in this section.

Section V.—Economic entomology: The specimens will be so arranged as to enable the public to discriminate between insects which are injurious to man and those which work for his benefit; also to show the insects in all stages of growth, and specimens of the materials which they have destroyed or injured. Where it is impossible to exhibit actual specimens, the life-history of the insects will be illustrated as far as possible by models and diagrams.

Section VI.—Economic geology: Specimens of metallic ores and of miscellaneous minerals of commercial importance and general interest. Building stones, including marbles, slates, &c., rough, hewn, sawn, or polished; stones used in decorations, statuary, monuments, furniture, &c. The uses of many specimens in this section will be shown practically by incorporating them with the building itself in the form of pillars, panels, flooring, &c. Lime, cement, hydraulic cement, artificial stone. Stones used for special purposes, *e.g.*, lithographic stones, grindstones, &c. Graphite of all qualities, with illustrations of its industrial applications. Sand, clays, and other substances used in the manufacture of glass and pottery of every description. Gems and precious stones; artificial gems, together with the materials used in their production. Shells, coprolites, &c. Mineral waters reputed to possess medicinal properties. Salt, crude nitre, &c. Mineral combustibles, *e.g.*, coal, shale, ozokerite, petroleum, and substances obtained from these, together with illustrations of their uses.

Section VII.—Educational apparatus and appliances, school-fittings, books, maps, diagrams, &c. Collections of scientific apparatus and of specimens for high schools and colleges. A collection of this kind will be of the greatest possible value to teachers, who can thus see and examine everything required in a school, and directly compare the merits of the different books, fittings, and appliances as supplied by different makers and recommended by various authorities.

Section VIII.

Section VIII.—Sanitary appliances and arrangements. Domestic, &c., architecture. Every effort will be made to render this section a complete hygienic and sanitary museum. It will take cognizance of sanitary engineering in general; designs to illustrate dwelling-houses, barracks, shelters, hospitals and infirmaries, homes and asylums, schools of all kinds, mechanics' institutes; also eating-houses, granaries, dairies, slaughter-houses, markets, factories and workshops, public baths, &c. Sanitary appliances of all kinds will be represented. The subjects of water supply, ventilation, warming, lighting, &c., will be illustrated. There will be displayed apparatus for the use of those in health, for the sick and infirm, for the preservation of life and property, and anything concerning which the hygienist will have something to say.

Section IX.—Mining, engineering, and machinery: models, plans, drawings, tools, machinery, and appliances.

Section X.—Agricultural tools, appliances, and machinery; also, soils, manures, &c.

Section XI.—Models, drawings, and descriptions of patents: special attention will be paid to those which are likely to prove of use in the Colonies, or which have been taken out in Australia.

Section XII.—Ethnological specimens: The large and valuable collection of ethnological specimens belonging to the Australian Museum, and which was shown in the Garden Palace at the late Sydney International Exhibition, will be displayed in the Technological Museum.

Section XIII.—Examples of historical furniture, and of artistic workmanship in iron and other metals.

Section XIV.—Photographs, electrotype, plaster, and other reproductions of examples of art workmanship where originals are not to be obtained.

Section XV.—Exhibition catalogues, trade journals, price lists, and descriptions of new processes or industries. The information afforded to manufacturers, merchants, and tradesmen by a collection of this kind will be of incalculable value.

8. The Committee add to this their Report the following Appendices:—I. The Annual Balance-sheet; II. Attendance of Members of the Committee; III. A List of Books and Publications received; IV. A List of Specimens presented; V. A List of Specimens purchased.

The Common Seal of the Museum is affixed, by order of the Board, this 3rd day of June, 1882.

(L.S.)

ALFRED STEPHEN,

*Crown Trustee and Chairman.*

CHARLES R. BUCKLAND,  
*Acting Secretary.*

ATTENDANCE of the Committee, 1882.

Hunt, Robert, Esq., Deputy Master of the Royal Mint.....	17
Liversidge, A., Esq., F.G.S., Professor of Chemistry and Mineralogy, Sydney University .....	14
Roberts, Alfred, Esq., M.R.C.S., E. ....	17

## APPENDIX III.

## A List of Books and Publications received.

- The Library Journal, vol. vi, Nos. 7, 12.  
 The Christmas Bookseller, 1879-1881.  
 The Bookseller, June to December, 1881.  
 The Telegraphic Journal, vol. ix, Nos. 219 to 214.  
 La Lumière Electrique, vols. i to v.  
 Symons' Monthly Meteorological Magazine, vol. xvi, June to December, 1881.  
 The Mineralogical Magazine, vol. iv, Nos. 17 to 20.  
 Scientific American, June to December, 1881.  
 The British Trade Journal, 1881.  
 Journal des Fabricants de Sucre, Nos. 24 to 37.  
 The Publishers' Weekly, vol. xx, Nos. 1, 2, 9, 11-14, 17, 19, 20, 23, 25, 26.  
 Index Medicus, vol. iii, Nos. 8, 11, 12.  
 The American Bookseller, vol. xii, Nos. 2, 5-12.  
 The Literary News, vol. ii, Nos. 7, 9, 11, and the Christmas number.  
 Bulletin Telegrafico, 1881, January to May, July, August, November, December: Index.  
 The American Monthly Microscopical Journal, vol. ii, Nos. 1 to 6, No. 12.  
 Knowledge, vol. i, No. 1.  
 Colburn's United Service Magazine, 1881; June to November.  
 The Journal of Forestry, vol. v, Nos. 50 to 55.  
 The German and American Brewers' Journal, vol. v, Nos. 8, 11, 12; vol. vi, Nos. 1, 2.  
 The Papermakers' Monthly Journal, vol. xix, Nos. 1 to 10, No. 12.  
 Directory of Papermakers, 1881.  
 The Fireman, vol. iv, No. 12; vol. v, Nos. 1 to 5.  
 The Masonic Tablet, vol. ii, No. 4.  
 A Catalogue of Interesting Old Books.  
 Catalogue of Ancient and Modern Books.  
 The Monthly Magazine of Pharmacy, Chemistry, and Medicine, August, 1881.  
 The American Mail, vol. v, No. 2.  
 The British Mercantile Gazette, vol. xiii, No. 165.  
 Allgemeine-Zeitschrift für Textil Industrie, vol. iii, No. 12.  
 Deutsche Industrie Zeitung, vol. xxii, No. 25.  
 The Plumber and Decorator, vol. iii, Nos. 28 to 34, No. 36.  
 The Manufacturer and Builder, vol. xiii, Nos. 1 to 5, 7 to 10.  
 The American Architect, vol. ix, No. 284.  
 The Plumber and Sanitary Engineer, vol. iii, Nos. 17, 18, 22; vol. iv, Nos. 1, 7, 8.  
 Sanitary Engineering, vol. vi, No. 1.  
 The Boot and Shoe Trades Journal, vol. vii, Nos. 163 to 172; vol. viii, Nos. 173-190, 197 to 199.  
 The Jeweller and Metal-worker, vol. vi, Nos. 182 to 186, 188, 190 to 192, 195.  
 The Papermakers' Circular, vol. x, Nos. 108, 109, 111, 113.  
 From the Religious Tract Society, London—  
 50 Miscellaneous Educational and Religious Works.  
 From the Department of Mines, Victoria—Reports.  
 From C. Jansky, Bohemia—  
 Coloured Diagrams of Apparatus used in Physics.  
 From the Executive Commissioner for India, M.I.E.—  
 Lateral Lithotomy Operations, 1 vol.  
 From the Observatory, Tokio, Japan—  
 Meteorological Reports, 15 vols.  
 Elementary Geography of Japan, 8 vols.  
 From Her Majesty's Commissioners of Patents—A set of  
 Abridgements of Patents, 124 vols.  
 From Dr. Wm. Davis (Bristol)—A case of Educational  
 Books, 46 vols.  
 From Messrs Relfe Bros. (London)—A parcel of Educa-  
 tional Books, 14 vols.  
 Whitaker's Almanac.  
 Mitchell's Newspaper Press Directory.  
 Transactions of the Highland and Agricultural Society  
 of Edinburgh, vol. 13.  
 Der Kohlentransport und Jahrbuch für das Bergund  
 Huttenwesen.  
 From N. O. Gewerbe Verein (Vienna)—  
 A parcel of Technological Publications.  
 From the Government Printer (Melbourne)—  
 Geological, Mining, &c., Reports, 26 vols.  
 From Messrs. Oliver and Boyd (Edinburgh)—  
 School Books, 16 vols.  
 From the Educational Supply Association (Limited), London  
 School Books, 24 vols.  
 From Messrs. Bemrose & Sons, Derby—  
 School Books, 7 vols.  
 From the National Temperance Publication Depot, Lon-  
 don—Juvenile Temperance Books, 4 vols.  
 From the Chevalier Jervis, Turin, Italy—  
 Programmi del Regio Istituto Tecnico di Milano,  
 1863-4 to 1875-6, 1877-8 to 1878-9.  
 Ordinamento della Regia Scuola Minerario di Iglesias.  
 Annali del Regio Museo Industriale Italiano.  
 Programmi della Regio Scuola Superiore di Commercio,  
 Venezia.
- From the Chevalier Jervis—*continued*—  
 Relazioni dei Regii Commissarii speciali Italiani Espos-  
 sizione Internazionale di Londres, 1862, Torino,  
 Firenze, 1 vol.  
 Annali dei Regio Istituto Industriale Professionale di  
 Torino.  
 Catalogo dei Regio Museo Industriale Italiano in Torino.  
 I Combustibili Minerali d'Italia, 1879.  
 From Professor Liversidge, F.G.S.—  
 Handbooks, etc., South Kensington Museum, 44  
 vols., including:—  
 Gold and Silversmith's Work.  
 Glass Vessels.  
 Ancient and Modern Furniture and Woodwork.  
 Guide to the Museum.  
 Art Directory.  
 Science „  
 Catalogue of the Educational Division—  
 Majolica, Bronzes, Textiles, Ivories, Furniture,  
 Musical Instruments.  
 List of Buildings having Mural Decorations.  
 Catalogue of Models of Machinery, Tools, etc.  
 Catalogue of Ship Models and Marine Engineering.  
 Photographs of Paintings and Drawings.  
 Utilization of Waste Products.  
 Catalogue of Collection of Munitions of War.  
 Architecture and Sculpture.  
 Drawings of Glass Cases.  
 Food.  
 Scientific Apparatus, 2 vols.  
 Free Evening Lectures, 1876.  
 Conferences, 1876, 4 vols.  
 Science.  
 Construction and Building Materials.  
 Inventory of Casts in Fictile Ivory.  
 Catalogue of Gems and Precious Stones.  
 „ Ruled Surfaces.  
 Reproductions in Metal.  
 Photographs of Precious Metals and Enamels.  
 Inventory of Plaster Casts.  
 Photographs of Pottery, Porcelain, and Glass.

 Programma Didattico della Scuola Superiore Femminile di Torino.  
 Relazione sugli Istituti Tecnici d'Italia, 1862.

## APPENDIX IV.

## LIST of Donations.

- From the Caslon Letter Foundry Company (England)—Specimens of types and rules.  
 From Mr. August Leonhardi (Germany)—A Collection of inks, and miscellaneous articles of stationery.  
 From the Executive Commissioner for Fiji (M.I.E.)—Specimens of raw cotton, fibre, coffee, sugar.  
 From the Director of the Royal Botanic Gardens, Kew (London)—3 cases of botanical specimens.  
 From Messrs. Böing and Dormann (Germany)—A case of rock salt.  
 From the Bay of Islands Coal Company (New Zealand)—Specimens of minerals and coal.  
 From Mr. C. Jeke (N. S. W.)—Chrome ores.  
 From Messrs. C. Moore and Company (Sydney)—Samples of India-rubber manufactured by Mr. Birnbaum.  
 From Messrs. Toeh and Company (Belgium)—Specimens of slates.  
 From the Dortmund Union Iron Company (Germany)—A large and valuable exhibit (with show-case) of various kinds of iron and steel.  
 From Miss Blaxland (Sydney)—Ethnological specimens and curios from the South Sea Islands.  
 From Messrs. W. S. Holland and Company (America)—Specimens of Venetian blind laths.  
 From Messrs. Hart and Roux (Sydney)—Photographs.  
 From the Surveyor General of South Australia—A large map of that Colony, prepared for schools.  
 From H. Gruson (Germany)—Samples of iron.  
 From Mr. Heitmann (Germany)—Educational diagrams.  
 From Messrs. Rischmeyer and Company (Germany)—Collection of grinding-stones.  
 From Messrs. Burger and Heinert (Germany)—Model of a ceiling.  
 From the Neu-Stassfurt Salt-works (Germany)—A large and valuable exhibit of rock-salt and associated minerals.  
 From Mr. Otto Fennel (Germany)—Photographs of Mathematical instruments.  
 From the Westphalian Union Company (Germany)—A large exhibit of wire, and also zinc, iron, &c., in various stages of manufacture.
- From Mr. Schuppau (Germany)—A collection of seal impressions.  
 From Messrs. Reideburg & Müller (Germany)—Specimens of roofing felt.  
 From Mr. Dessauer (Germany)—Specimens of papers (in six albums).  
 From the Osnabrück Iron Company (Germany)—Specimens of iron for railway purposes.  
 From Mr. S. Jacoby (Melbourne)—Specimens of German nickel.  
 From Messrs. Alsen & Son (Germany)—A collection of cement and objects manufactured therefrom.  
 From Messrs. Pfaff, Reichenbach, & Company (Melbourne)—A large vase of German imitation stoneware.  
 From the Harkort Bridge Company (Germany)—Specimens of iron.  
 From Messrs. Jas. Reckitt & Company (England)—Specimens of starch and blue.  
 From J. Corbet, Esq., M.P., the Stoke Prior Salt-works (England)—A collection of salt in various stages of preparation.  
 From Young's Paraffine and Mineral Oil Company (Scotland)—A complete exhibit of paraffine and paraffine candles, oils, &c., obtained from bituminous shale.  
 From the Farnley Iron Company (England)—An exhibit of bricks, tiles, drain pipes, &c.  
 From the Earl of Dudley—A valuable and comprehensive exhibit, with show-case, of iron of various qualities submitted to miscellaneous tests.  
 From the British Telegraph Construction Company (England)—A valuable exhibit, with show-case, of telegraph wires and cables.  
 From Messrs. Woollams & Company (England)—Specimens of embossed and other papers.  
 From Mr. E. Stauford (London)—A large collection of maps.  
 From Mr. G. Jennings (London)—A collection of sanitary ware and appliances.  
 From Mr. G. Cochrane (England)—Specimens of papers.  
 From Messrs. Bickford, Smith, & Company (England)—An exhibit of their patent fuses.

From

List of Donations—*continued*.—

- From the Earl Granville and the Shelton Bar Iron Company (England)—A complete and valuable exhibit of iron in all stages of manufacture; also a series of the ores and coals employed.
- From the proprietor of the *Graphic* (London)—A collection of materials used in the manufacture of paper.
- From Messrs. T. C. Smith & Sons (England)—A series of wall maps.
- From Messrs. Arrowsmith & Company (England)—Specimens of Parquet flooring.
- From Messrs. Marshall & Sons (England)—Photographs of agricultural machinery.
- From Messrs. T. and C. Clark (England)—A large exhibit, with show case, of hardware furniture and other goods.
- From Mr. C. Bowman (London)—A collection of stencil plates and ink.
- From the Berthon Boat Company (England)—A collapsible yacht and canoe.
- From Mr. Samuely (Austria)—Specimens of potash.
- From Messrs. Schemales, Erbslöh & Company (Melbourne)—A collection of hats made of wood, with show case (from Austria).
- From Messrs. Roberts & Company (India)—Specimens of tobacco leaf and cigars.
- From Mr. Whitfield (West Australia)—Specimens of fibre plants, and nuts.
- From Messrs. Meyer & Henckel (Denmark)—Sample of cheese-colouring.
- From the Auckland Harbour Board (New Zealand)—Specimens of Jarral and Totara timber, showing the ravages of the torredo navalis.
- From Mr. J. E. Fletcher (New Zealand)—Specimens of timber.
- From Messrs. Ingram & White (New Zealand)—Specimens of chalk.
- From Mr. E. M' Caffray (New Zealand)—A collection of minerals and stones.
- From the Oamaru Stone Company (New Zealand)—An obelisk and pillar, and other lathe-work in Oamaru stone.
- From the Hokiangra Saw Mill Company (New Zealand)—Specimens of timber.
- From Messrs. Dejaiffe-Devroye (Belgium)—A collection of marbles.
