- From M. Bottelier (Belgium)—Specimens of flax.
- From the Executive Commissioner for Belgium (Melbourne International Exhibition)—Specimens of pottery, iron, leather, papers, chemical products, starches, cardboard, cement, copper in sheets and dishes, numerous specimens of glass.
- From the Executive Commissioners for South Australia, M.I.E.—Specimens of soils, barks, and cereals.
- From the Executive Commissioner for Ceylon, M.I.E.—Specimens of coffee, cereals, plumbago, woods, tobacco.
- From Messrs. De Grauw, Aynar, and Company (America)—An exhibit of oars.
- From Professor Pirz (America)—A collection of chemicals.
- From Messrs. Morris, Wheeler and Company (America)—An exhibit of nails.
- From the Executive Commissioner for the Netherlands, M.I.E.—Specimens of blue, charcoal bricks, chicory, zinc, and oil.
- From G. W. Kieffer (the Netherlands)—A series of imitations of marbles and wood.
- From Messrs. Christofle and Company (France)—Specimens of nickel.
- From M. Guerlain (France)—Specimens of soap and perfumery.
- From A. F. Mercier (Melbourne)—Specimens of Mauritius woods.
- From Mr. R. Magrath (N.S.W.)—Specimens of soils.
- From Messrs. Stephens and Kyle (N.S.W.)—Specimens of bricks.
- From Mr. L. Fountain (N.S.W.)—Specimens of minerals.
- From Mr. Milton (N.S.W.)—A trophy of corks, and of ornamental cork-cutting.
- From Mr. Gardner (N.S.W.)—Specimens of printing.
- From Mr. Stratton (N.S.W.)—Two carved miniature chairs.
- From Mr. Rudder (N.S.W.)—Specimens of minerals.
- From Messrs. F. C. Calvert and Company (Manchester)—A collection of the commercial forms of carbolic acid, together with samples of numerous carbolic acid preparations.
- From Messrs. Gillott and Company (England)—Specimens of pens in all stages of manufacture.
- From Mr. Jefferson Read (England)—An exhibit of arcanum plated-ware.
- From Messrs. MacBrair Bros. (Sydney)—Two show stands.
- From Mr. J. Unite (London)—A model of a hayrick and cover.
- From the Honorable the Colonial Secretary—A show case.
- From the Worcester Royal Porcelain Company (England)—A collection of their manufactures in various stages, together with samples of the raw materials used.
- From Messrs. Lobeck and Company (Germany)—A collection of vegetable products.
- From Signor Giorgi (Italy)—Specimens of majolica-ware.
- From Messrs. John Brown and Company, Limited (Sheffield)—A very massive and interesting iron exhibit, comprising a huge boiler-end plate, tires, 9-in. armour plates, and other specimens both numerous and valuable.
- From Messrs. Lloyd and Lloyd (Birmingham)—A set of wrought iron tubes.
- From the Department of Mines (Victoria)—Maps of Victoria, plans, &c.
- From the Nagpur Museum (India)—A collection of agricultural, forest, mining, &c., products consisting of cereals, oil seeds, drugs, spices, fibres, yarns, cottons, gums, resins, dyes, woods, barks, soils, minerals, &c.
- From the Executive Commissioner for India, (M.I.E.)—Specimens of inlaid metal ware, Indian fabrics of wool, muslin, cotton, silk, lace, embroideries, brocades, &c., over 100 samples; pottery, brassware, domestic utensils, articles used in temple worship, matting, leather work, raw silks, fibres, cordage, coir ropes, &c.; native jewelry, stoneware, ruler knife-handle, paper knives and weights of agate; ivory paintings, inlaid woodwork, ebony and sandal wood, papier-maché work, native paintings, enamel work, tanned skins, pith hats, model of a mosque in pith, marble carvings, coffee berries, lacquered ware, hookah and stem, oil paintings, chintzes, models of agricultural implements, pictures of Indian scenery, blue twist, steatite cups, tobacco (raw and manufactured), cinchona barks, collection of indigenous woods, samoran, photographs, figures of natives representing various castes.
- From Mr. Chisholm (India)—Samples of coffee.
- From the Executive Commissioner for the Straits Settlements, (M.I.E.)—Specimens of minerals, tin splash, models of boats, soils, mats, slippers, fibre, woods, goblet, cup and tray of tin, model of a barrow, tea, guttapercha, sleeping mat, papier-maché vase, brass ware (native), gambier, rubber, gum, copal, tapioca, spices, vegetable tallow, dragon's blood, incense, sticks, part of a guttapercha tree, rattan, tin ores, hats, rhinoceros horn (carved), sandals, cocoanuts, native papers, coolie receipts, box for betel-nut and gambier, damar resin of various kinds.
- From Mr. G. Sarfatti (Italy)—Specimens of liquorice root, asbestos rope, salt, sulphur, galvano root, wire netting, tobacco, sunach, rice, artificial leather, straw, tapestry, oils.
- From the Australian Museum (on loan)—Samples of wool, cables, and model of a spinning machine.
- From Mr. Patterson (N.S.W.)—Specimen of building stone.
- From Box's Patent Ball Castor Company (England)—Specimens of ball castors.
- From Messrs. Gostling and Company (London)—A large exhibit of window mullions, vousoirs, kerbs, balustrades, &c., in Portland cement.
- From Messrs. Mander Brothers (England)—A collection of varnishes and colours.
- From Mr. Herrenschmidt (N.S.W.)—Antimony ores.
- From Messrs. Breithaupt and Son (Germany)—Diagrams of mathematical instruments.
- From the Societa Terra Bolari (Italy)—Specimens of ochres and other earthy pigments.
- From Jas. Thompson and Company (England)—Specimens of fillet cards in Swedish iron wire.
- From La Société Anonyme de la Fabrique de fer d'ougrée (Belgium)—An exhibit, with show case, of specimens of iron.
- From the British and Foreign Blind Association—An exhibit showing methods for teaching the blind.
- From Daniel de Pass (England)—Specimens of guano.
- From Thos. Farmer and Co. (London)—Chemicals.
- From the Geographical Bureau, Tokio (Japan)—A collection of maps and reports.
- From Messrs. Chance Brothers (England)—Specimens illustrating the manufacture of window glass.
- From F. Raminé (Hamburg)—Anatomical models.
- From J. Borgfeldt (Germany)—Specimens of cork carvings.
- From Messrs. Askham Brothers and Wilson (England)—Specimens of steel.
- From Mrs. H. Vansittart (England)—Model of a ship's screw propeller.
- From J. Trant Fischer (Sydney)—Specimens of Indian tea seeds.
- From Mr. Alfred Roberts, M.R.C.S.E. (Sydney)—Specimens of tea.
- From L. Nicolls (England)—An exhibit illustrative of the manufacture of cricket bats.

## APPENDIX V.

## List of Specimens purchased :—

- |   |   |
|---|---|
| <p>From Mr. Van Derkelen (Belgium).—Specimens of imitation delft ware.</p> <p>From Messrs. M'Ewan and Company—Specimens of Irish Belleek-ware.</p> <p>From the Japanese Court, M.I.E.—A magic mirror.</p> <p>From Mr. Schulze (Germany)—<br/>Models of agricultural implements, specimens of German ironware.</p> <p>From the Ceylon Court, M.I.E.—<br/>Model of an oil-pressing machine ; also, a collection of Ceylon woods.</p> <p>From Messrs. Pfaff, Reichenbach, and Company—Specimens of German imitation stoneware.</p> | <p>From G. Sarfatti (Italy)—Specimens of raw and waste silk, whetting-stones, varnishes, starches, ozokerite, hemp, lead and shot in various stages of manufacture, paper, bent wood in form of wheel, cancos and shells, lava carving, spun glass and beads, hand-made lace, alabaster, pottery, table of volcanic cement.</p> <p>From Messrs. Webb and Sons—Specimens of glassware.</p> <p>From Messrs. Christoffe et Cie. (Paris)—A complete series of electrotype reproductions of the ancient Roman works of art discovered at Hildesheim, Germany, in 1868.</p> |

1882.

NEW SOUTH WALES.

## SYDNEY FREE PUBLIC LIBRARY.

(REPORT FROM TRUSTEES, FOR 1881.)

Presented to Parliament by Command.

The Trustees of the Free Public Library to The Minister of Public Instruction.

Sir,

Sydney, 10 March, 1882.

I have the honor to transmit to you the Eleventh Annual Report of the Trustees, for the year 1881.

On reference to Appendix B it will be seen that the total number of visits to the Library during the year was 136,272, being an increase of 1,810 upon last year, and a larger number than in any preceding year, except in 1879, during which period the International Exhibition was open. It is extremely gratifying to the Trustees to be able to report that so large a use has been made of the benefits provided by this Institution for the improvement and advancement of education; and they feel assured, from the results now shown in the Appendices to this Report, that if better accommodation could be afforded to students and readers who daily attend at the very inconvenient and overcrowded reading-room of the Reference Department, that the great power of advancing the higher branches of education which Free Libraries are now universally acknowledged to possess would soon be fully realized in this, as it has been in other parts of the world.

The Trustees cannot but regret that anything should have occurred to delay the progress of the building of a new Library upon the land which has already been secured for the purpose in Elizabeth-street.

In August last, The Hon. Sir John Robertson, K.C.M.G. (then Minister of Public Instruction), handed over to the Trustees an iron building in Macquarie-street, recently obtained by the Government, for the use of the Lending Branch; and during that month the whole of the books belonging to the Branch were removed there after proper alterations and repairs of the building had been made. The shelf space vacated by these books will now be made available for the reception of about 5,000 more volumes for the Reference Library, and so soon as these are received it will be, however much such a course is to be regretted, the duty of the Trustees to discontinue the purchase of any more books for this Department, unless some arrangement, concerning which the Trustees have no information at present, can be made for additional accommodation.

The total number of volumes in the Lending Branch on the 31st December was 14,687, and the number of volumes borrowed during the year reached 57,802; or, 20,571 in excess of the previous year. The number of ticket-holders registered was 3,137, being an increase on the last year of 568.

Out of the volumes issued in the year 17 only are missing; owing to incorrect addresses having been given by the borrowers to whom these books were lent. This makes a total loss from the Lending Branch since the day of opening, on the 3rd July, 1877, of 57 volumes; but it is probable that some of these volumes may yet be recovered, as several missing books have from time to time been returned by others than the borrowers, on their learning the risk they ran by detaining Government property.

When it is considered that the facilities for obtaining books at this Library are perhaps larger than those offered by any similar Institution, and that it is less possible in a city such as this, with an unusually large proportion of visitors from foreign countries, as well as from the neighbouring colonies, to insist upon those securities for the safe custody of books which may be obtained elsewhere, the Trustees do not regard this loss as one of a very serious character. It must be borne in mind that at this Library large numbers of volumes are issued on the personal security of applicants, who may be, and in many cases are, entire strangers to the Trustees, or to the gentlemen who are entrusted, in accordance with the rules, with the privilege of recommending borrowers.

The number of books missing from the Reference Library during the year is 4. (*See Appendix F.*)

The total number of volumes added to the Institution during 1881 was 5,223, being 2,536 to the Reference Library, and 2,642 to the Lending Branch; and the total stock, as detailed under their various classes in Appendix A, is 51,163.

In the early part of January last the Trustees received from your Department a communication transmitting a correspondence from the Wollongong School of Arts and the Plattsburg Mechanics' Institute, asking for the loan of any duplicates or unused books, and suggesting that books should be lent in this manner, in parcels of about 200 volumes at a time, to the various Schools of Arts in the Colony.

To this communication a reply was sent to you, stating that though the Trustees highly approved of the proposal to issue books for the country in the manner suggested, yet the want of proper convenience and the overcrowded state of this Institution rendered it impossible for them to recommend the carrying out of this work until a new Library was erected, or some better accommodation provided for issuing books from the Lending Department.

As the Lending Branch has now been removed to a more convenient and commodious building, the Trustees will probably feel themselves in a position to recommend to you when submitting their next Estimate, that some provision be made for carrying out this suggestion; but in order to accomplish this desirable extension of the advantages of the Institution it will be essential that additional assistance should be first provided.

On the 12th August the Trustees received an application through you from the Acting Secretary of the Technological, Industrial, and Sanitary Museum of New South Wales, asking that the whole of the English Specifications of Patents might be transferred to their care.

At a special meeting held on the 16th August, it was resolved, after mature consideration—"That the Trustees are not prepared to recommend the transfer of the Specifications of Patents to the custody of the Technological Museum, &c., unless precautions are taken for the care of the same, and for their being placed under a competent Librarian, with liberty to the public to inspect at reasonable times; and in the event of the Technological Museum ceasing to exist, that the books may be returned to the Library."

The management of the Technological Museum, under these conditions, declined to accept the offer; and the Trustees, now that they have shelf-room for these valuable documents in the Lending Branch, think that it will be more to the advantage of those seeking the use of them that the Patents remain in the Library. There they will be immediately available for all who desire to peruse them; and they will be under the care of a competent staff of attendants whose duty it is to facilitate reference, and to preserve the volumes.

During the year several donations have been received from various persons, to whom the thanks of the Trustees have been conveyed, and a complete list of these gifts will be found in Appendix G.

Although many books have been published in the Colony, and a copy of each work should have been presented to the Library under the provisions of the Copyright Act, only two books and a pamphlet have been actually received during the year; and the Trustees will feel it their duty to recommend some change in the arrangements now existing, in order to prevent the continuance of this state of things. This will probably be done when the next Estimates are being prepared.

In Appendix H to this Report is a list of books either printed in or specially relating to Australasia, which will be found, it is believed, to be larger than any similar collection in other Libraries. The Trustees have caused this rough list to be prepared with the view of printing, as soon as the work can be carried out, a complete catalogue, giving the particulars in detail of each work; but in the meantime it is thought that the list printed in this form will be of interest to the readers of the Library, and to other institutions to which this Report may be sent.

The total number of days that the Reference Library was opened, including Sundays, was 356; and the total number of days that the Lending Branch was opened, including Sundays, was 343.

The average number of volumes used on Sundays was for the—

Reference Library, from 2 to 6 o'clock p.m.	...	...	...	...	154
Lending Branch, from 2 to 6 o'clock p.m.	...	...	...	...	30
Total	...	...	...	...	184

The average number of volumes used on week days was for the—

Reference Library, from 10 o'clock a.m. to 10 o'clock p.m.	...	...	...	491
Lending Branch, from 10 o'clock a.m. to 9 o'clock p.m.	...	...	...	164
Total	...	...	...	655

The total number of visits to the Institution since it was first opened to the public, on the 30th September, 1869, has reached 1,124,614.

In closing the Report the Trustees have much satisfaction in recording the particulars which show the successful development of an Institution so widely useful in ministering to the intellectual needs of all classes.

I have, &c.,  
**CHARLES BADHAM,**  
 Chairman.

## APPENDIX A.

RETURN of the number of Volumes in the Free Public Library on the 31st December, 1881.

Synopsis of Classification.	Reference Department.	Lending Branch.	Total.
Natural Philosophy, Science, and the Arts .....	3,836	1,833	5,669
History, Chronology, Antiquities, and Mythology .....	3,539	1,436	4,975
Biography and Correspondence .....	2,442	1,589	4,031
Geography, Topography, Voyages and Travels, &c. ....	3,097	1,740	4,837
Periodical and Serial Literature .....	9,204	.....	9,204
Jurisprudence .....	1,628	340	1,968
Theology, Moral and Mental Philosophy, and Education .....	2,090	694	2,784
Poetry and Drama .....	1,101	364	1,465
Miscellaneous Literature and Collected Works.....	3,210	2,708	6,008
Works of Reference and Philology .....	2,988	.....	2,988
Patents .....	75	3,893	3,968
Duplicates and unbound Volumes .....	1,195	.....	1,195
Pamphlets .....	2,071	.....	2,071
Total number of Volumes .....	36,476	14,687	51,163

## APPENDIX B.

RETURN of the number of Visits of Readers to the Library, the number of Days the Library was open to the Public, and the AVERAGE NUMBER OF VOLUMES USED ON SUNDAYS AND ON WEEK-DAYS.

Total number of VISITS to the Reference Library .....	92,243
Do. do. Lending Branch .....	44,029
Total .....	136,272
Total number of Days that the REFERENCE LIBRARY was open (including Sundays) .....	356
Total number of Days that the LENDING BRANCH was open (including Sundays) .....	343
Average number of VOLUMES used on SUNDAYS—	
Reference Library (from 2 to 6 o'clock p.m.) .....	154
Lending Branch (from 2 to 6 o'clock p.m.) .....	30
Total .....	184
Average number of VOLUMES used on WEEK-DAYS—	
Reference Library (from 10 o'clock a.m. to 10 o'clock p.m.).....	491
Lending Branch (from 10 o'clock a.m. to 9 o'clock p.m.) .....	164
Total .....	655

## Summary of Visits to the Library, 1869-1881 :—

1869 (3 months—1 Oct. to 31 Dec.) .....	17,006	1876 .....	72,724
1870 .....	59,786	1877 .....	124,688*
1871 .....	60,165	1878 .....	117,047
1872 .....	48,817	1879 (Exhibition open).....	152,036
1873 .....	76,659	1880 .....	134,462
1874 (11 months) .....	57,962	1881 .....	136,272
1875 .....	66,990		

\* Lending Branch first open.

## APPENDIX C.

RETURN of the Class of Books Borrowed from the LENDING BRANCH from 1st January to 31st December, 1881.

No. of days open.	No. of Tickets issued to Borrowers.	No. of Borrowers' Visits.	Synopsis of Classification of Reading.	No. of Volumes read.
343	3,187	44,029	Natural Philosophy, Science, and the Arts .....	5,704
			History, Chronology, Antiquities, and Mythology .....	4,289
			Biography and Correspondence .....	5,097
			Geography, Topography, Voyages, and Travels.....	7,423
			Jurisprudence.....	694
			Mental and Moral Philosophy, &c. ....	1,731
			Poetry and Drama.....	1,397
			Miscellaneous Literature and Prose Works of Fiction .....	31,453
			Patents .....	14
			Total .....	57,802

## APPENDIX D.

RETURN of the Class of Books read, the number of VOLUMES USED, and the number of VISITS to the LIBRARIES, on SUNDAYS during the year 1881.

No. of Sundays open.	No. of Visits.	Daily average of Visits.		No. of Volumes Issued.	Daily average of Volumes Issued.
REFERENCE LIBRARY.					
51	5,485	107	Natural Philosophy, Science, and the Arts .....	1,137	22

Total.....				1,500	30

## APPENDIX E.

## LIST OF OFFICERS.

*Trustees.*

The Rev. Charles Badham, D.D., Professor of Classics and Logic in the University of Sydney (*Chairman*).

W. B. Dalley, Esq., Q.C.

W. A. Duncan, Esq., C.M.G.

Edward Greville, Esq.

The Hon. Sir W. Macarthur, Knt., M.L.C.

The Hon. W. Macleay, F.L.S., M.L.C.

The Hon. James Norton, M.L.C.

W. J. Stephens, Esq., M.A.

The Hon. John Stewart, M.L.C.

His Honor Sir John George L. Innes, Knt.

*Principal Librarian* :—Robt. Cooper Walker.

*Assistant Librarian and Compiler* :—D. R. Hawley.

## LENDING BRANCH.

*Librarian* :—E. G. W. Palmer.

*Assistant Librarian* :—Edward O'Brien.

*Entry Clerk* :—A. A. Richardson.

## APPENDIX F.

BOOKS missing from the Lending Branch on the 31st December, 1881.

*During 1878.*

Hallam's Remains, in Prose and Verse.

Pauli's Alfred the Great.

Chambers's Miscellany, vol. 10.

Bunyan's Pilgrim's Progress.

Greenwood's Low Life Deepse.

Timb's Abbeys, Castles, &c., vol. 2.

Therry's New South Wales.

*During 1879.*

Trollope's New South Wales and Queensland.

German University Life, by Steffens.

Tytler's Tales of Many Lands.

Forbes's Two Years in Fiji.

Denison's Vice-regal Life.

Fletcher's American War.

*During 1880.*

Fenwick and Baker's Subterraneous Surveying.

Franc's Emily's Choice.

Hogg's The Microscope.

Tyndall's Fragments of Science.

Saxby's Rock-bound.

Bradley's Mr. Verdant Green.

Scott's Tales of my Landlord.

Jenkins' Gin's Baby.

Thackeray's Four Georges.

Kelly's History of Russia.

Eaton's Rome in the 19th Century

De Quincey's English Mail Coach.

Thackeray's Roundabout Papers.

Trollope's La Vendée.

Gickie's Life : a Book for Young Men.

Chambers's Information for the People.

Duncan's Tales of Scottish Peasantry.

Plutarch's Lives ; by Langhorne.

The Adventurer.

Scott's Monastery.

Out of the Depths.

Inglis's Sport and Work on the Nepal Frontier.

Collins's Dead Secret.

Grote's Life of Grote.

Trollope's Orley Farm.

Ramsayer's Four Years in Ashantee.

*During 1881.*

Bannerman's Metallurgy of Iron.

Collins's The Dead Secret.

Disraeli's Tancred, 3 vols.

Duffy's Ballad Poetry of Ireland.

Fregtag's The Lost Manuscript, 3 vols.

Goodwin's Transfusion, 3 vols.

Jarnae's Electra, 3 vols.

Long's Naked Truths of Naked People.

Trollope's Can you Forgive Her, vol. 1.

BOOKS missing from the Reference Library during 1881.

Fowler's Lights and Shadows.

Pync's Perspective.

Mechanics' Friend.

Mechanics' Guide.

## APPENDIX G

## APPENDIX G.

LIST of Donations during the year 1881 ; received from the following:—

- Australian Museum. Guide to Australian Fossil Remains, by G. Krefft. (Five copies.)  
 ,, List of the Australian Longicorns, by F. P. Pascoe. (Five copies.)  
 ,, Catalogue of Australian Land Shells, by Jas. Cox, M.D. (Five copies.)  
 ,, Catalogue of specimens of Snakes in the British Museum.  
 ,, Catalogue of specimens of Lizards in the British Museum.  
 ,, Catalogue of the Tortoises, Crocodiles, &c., in the British Museum.  
 ,, Fragmenta Phytographiæ Australiæ, F. Mueller. 3 vols. Svo.  
 ,, General History of the Dichlamydeous Plants, by C. Don. 4 vols. 4to.  
 ,, Report on the Geology of Cornwall, Devon, &c., by H. F. De la Beche. 8vo.  
 ,, Report on the Branchiopoda, by R. H. Dall.  
 ,, Annual Report of the Trustees of the Museum of Comparative Zoology, at Harvard College. (Three copies.)  
 ,, Traité élémentaire de paléontologie, par F. J. Pictet. 3 vols. Svo.  
 ,, Poets and Prose Writers of New South Wales, by G. B. Barton. (Five copies.)  
 ,, Philosophical Transactions of the Royal Society, London, 1835-52. 19 vols. 4to.  
 ,, Catalogue of the Coleoptera of Australia, by G. Masters. (Two copies.)  
 ,, Catalogue of the stalk and Sessile-eyed Crustacea of New Zealand, by C. J. Miers.  
 ,, Catalogue of the Minerals and Rocks in the Australian Museum, by G. Krefft. (Two copies.)  
 ,, Le Règne animal distribué d'après son organisation, par G. Cuvier. 4 vols. Svo.
- Adelaide Philosophical Society. Transactions and Proceedings, 1878-79.
- J. C. Beal, Esq. Acts of the Parliament of Queensland, 1880.  
 From Brisbane. Ich Dien.
- D. Buchanan, Esq. Specimens of Australian Oratory.
- James Barnett, Esq. International Exhibition, Sydney. References to the plans.
- Alexr. Bruce, Esq. Scab in Sheep.
- John Brazier, Esq. Localités des Iles Australiennes, &c.  
 ,, Notes on recent Mollusca found in Port Jackson.
- J. T. Blanchard, Esq. Essays and Addresses.
- Dr. J. Le Gay Brereton. Vaccination Quackery.  
 ,, Slavery in the United States.  
 ,, Results of Vaccination.  
 ,, Small-pox by re-vaccination.  
 ,, Small-pox and Vaccination in London.  
 ,, Vaccination. (3.)  
 ,, Vaccination described.  
 ,, Vaccination mortality.  
 ,, The Vaccination Question.  
 ,, Facts concerning Small-pox.  
 ,, Rise and spread of Vaccine Dogma.  
 ,, Benefits of Vaccination.  
 ,, A Little Proclamation.  
 ,, The Perils of Vaccination.  
 ,, Anti-vaccination in a Nut-shell.
- R. D. Christie, Esq. Coe-e-c. Nos. 23, 24.
- J. J. Calvert, Esq. Journals of the Legislative Council, 1879-81. 4 vols. Fol.
- C. M. Clode, Esq. Memorials of the Guild of Merchant Tailors.
- Cobden Club. Reciprocity Craze, by G. W. Medley. (Three copies.)  
 ,, Protection again. (Twelve copies.)  
 ,, Handful of Hard Sense. (Twelve copies.)  
 ,, General Meeting of the Cobden Club. (Twelve copies.)  
 ,, Free Trade v. Reciprocity. (Twelve copies.)  
 ,, List of Members, and Committee's Report. (Two copies.)  
 ,, Correspondence relative to the Budgets. (Two copies.)  
 ,, Free Trade and English Commerce. (Twelve copies.)  
 ,, History of Free Trade in England. (Twelve copies.)  
 ,, Western Farmer of America. (Twelve copies.)  
 ,, English Land and English Landlords. (Two copies.)  
 ,, Richard Cobden. (Two copies.)  
 ,, English and Irish Land Questions. (Two copies.)  
 ,, Cobden's Political Writings. (Two copies.)  
 ,, Systems of Land Tenure in various countries. (Two copies.)  
 ,, The Landed Interest.
- F. H. Dougal & Co. Index Register to Next of Kin, &c.
- Dundee Free Library. Report of the Committee, November, 1880.
- D. Eglinton, Esq. Catalogue of the Books in the Library of the Brisbane School of Arts.
- John Garrett, Esq. Works of W. Hogarth. Fol.  
 ,, Puseyism, by the late Lord Macaulay.
- W. R. Guilfoyle, Esq. The A. B. C. of Botany.  
 ,, Australian Botany.
- H. F. Gurner, Esq. List of Works relating to Australia.
- C. A. Goodchap, Esq. Railways and Tramways of New South Wales. Report, 1880.
- J. Hector, Esq. Fifteenth Annual Report of the Colonial Museum, &c., New Zealand.  
 ,, Palaeontology of New Zealand. Part 4.  
 ,, Studies in Biology; by F. W. Hutton.  
 ,, Meteorological Report. 1880.  
 ,, Reports of Geological Explorations, New Zealand, 1879-80.
- C. E. Hotham, Esq. Catalogue of Exhibits in the New South Wales Court, Melbourne, 1880. (Two copies.)
- W. J. Haggerston, Esq. Catalogues of the Central and Juvenile Lending Departments of the Newcastle-upon-Tyne Public Library.
- R. C. Harding, Esq. Almanac Diary, Year Book, &c. Napier, 1881.
- J. H. Heaton, Esq. A Parcel of Dutch MSS. (copies of Diaries of Dutch Navigators.)

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

FREE PUBLIC LIBRARY.

(PETITION IN FAVOUR OF BENEVOLENT ASYLUM SITE—CITIZENS OF SYDNEY.)

---

*Received by the Legislative Assembly, 11 October, 1882.*

---

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in  
Parliament assembled.

The humble Petition of the undersigned Inhabitants of the City of Sydney,—

HUMBLY SHOWETH :—

That your Petitioners have heard with unfeigned satisfaction that a proposal has been made to your Honorable House to erect a Free Public Library on the site of the Benevolent Asylum.

Your Petitioners are of opinion that no more eligible position is available in the City of Sydney, being close to the main centre of population.

Your Petitioners therefore pray that your Honorable House will agree to the proposal to erect the Free Public Library on the site abovenamed.

And your Petitioners, as in duty bound, will ever pray.

NEW SOUTH WALES.

---

## THE ART GALLERY.

(PETITION IN FAVOUR OF SUNDAY OPENING—RESIDENTS OF NEWCASTLE.)

---

*Received by the Legislative Assembly, 26 September, 1882.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Residents of the City of Newcastle and adjacent parts,—

RESPECTFULLY SHOWETH :—

1. That your Petitioners highly approve of a portion of the public moneys being expended in establishing and maintaining such Institutions as the Public Libraries, Museum, and Art Gallery, believing that if rightly utilized they will tend greatly toward the higher education and moral advancement of the people.

2. That the ordinary occupations of the great body of the community leave little or no opportunity of visiting such Institutions as the Museum or Art Gallery during the week, and that, unless the same be opened during suitable hours on Sunday, the main object of their formation will be lost to those whom they are intended to benefit.

3. That your Petitioners approve of what has already been done in respect to opening the Public Libraries and Museum during certain hours on Sunday, and would strongly pray your Honorable House to give effect to the motion submitted by Mr. Copeland, and so extend the same privilege in respect to the Art Gallery.

And your Petitioners, as in duty bound, will ever pray.

*[Here follow 985 Signatures.]*

---

Similar Petitions received :—

On 26 September, from Residents of Armidale and neighbourhood ; 171 signatures.  
 „ 26 „ from Residents of Sydney and adjacent parts ; 23,011 signatures.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ART GALLERY.

(PICTURE PRESENTED BY T. WOOLNER, ESQ.)

*Ordered by the Legislative Assembly to be printed, 13 October, 1882.*

The Colonial Secretary to The Minister for Public Instruction.

Sir, Colonial Secretary's Office, Sydney, 3 October, 1882.  
When I was in England, Mr. Woolner the Sculptor (whose acquaintance I formed in Sydney in 1854) consulted me as to his intention of presenting to the Colony a picture by J. M. W. Turner. Mr. Woolner has been for many years a collector of pictures, and especially a student of the great works of Turner, and I assured him that the gift he proposed to make to the Colony would be received as one of great value.

2. The Picture was shipped on the "Sophocles," and I now enclose Mr. Woolner's letter presenting it to the Government, and a copy of my letter in reply. I think the Picture should be handed over to the Trustees of the Art Gallery.

I have, &c.,  
HENRY PARKES.

[Enclosures.]

T. Woolner, Esq., R.A., to The Colonial Secretary.

Sir, 29, Welbeck-street, London W., 27 May, 1882.  
Wishing to mark my remembrance of the kindness and hospitality received from the inhabitants of Sydney during my visit in 1854, I shall esteem it an agreeable honour in being permitted to present the Government of New South Wales with a work by Joseph Mallord William Turner, R.A., entitled "London—Autumnal Morning," exhibited by him at the Royal Academy of Arts in the year 1801, being the second year of the Artist's Associateship, and the year before his election as an Academician.

It may add to the interest of the picture if the Government will also accept a somewhat faded drawing of an earlier date by him, of the same subject, and from a similar point of view.

I have, &c.,  
THOMAS WOOLNER.

The Colonial Secretary to T. Woolner, Esq., R.A.

Sir, London, 30 May, 1882.  
I have the honour to acknowledge the receipt of your letter of the 27th instant, informing me of your desire to present to the Government of New South Wales a Picture by the late J. M. W. Turner, R.A., entitled "London—Autumnal Morning."

2. On behalf of the Government, I have much pleasure in accepting your valuable gift, which will no doubt be placed in the Gallery at Sydney, as an important addition to its Art Treasures.

3. I am sure the people of the Colony will fully appreciate the generous and graceful act by which you have recorded your remembrance of your visit to Sydney twenty-eight years ago. An interest will attach to the Turner Picture from the circumstances which have led to its presentation, and your name in association with it will be held in public respect as an eminent Contributor to the wealth of our Art Gallery.

I have, &c.,  
HENRY PARKES.

1882.

NEW SOUTH WALES.

BALMAIN EAST—*Gazette*, 6 June, 1882.  
NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
(L.S.) Lord AUGUSTUS LOFTUS), Knight Grand  
AUGUSTUS LOFTUS, } Cross of the Most Honorable Order of  
Governor. } the Bath, a Member of Her Majesty's  
Most Honorable Privy Council, Governor  
and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper circulated in the Metropolitan Police District, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee

simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided. And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land, the property of John England, situated at Balmain, parish of Petersham, county of Cumberland, containing by admeasurement twenty-five and a-half perches: Commencing on the north-east side of Nicholson-street, at the westernmost corner of land purchased by the late Mr. Burnicle, now the property of the Department of Public Instruction; and bounded thence on the south-east by part of the north-west boundary of that land bearing north-easterly one hundred feet to the southernmost corner of lot fourteen; on the north-east by part of the south-west boundary of that lot bearing north-westerly twenty-six feet; thence by the terminus of a lane bearing south-westerly ten feet; thence by a line bearing north-westerly and parallel to Nicholson-street aforesaid forty-eight feet to a reserved road twenty feet wide; on the north-west by the south-east side of that road bearing south-westerly ninety feet to Nicholson-street aforesaid; and on the south-west by the north-east side of that street bearing south-easterly seventy-two feet six inches, to the point of commencement.

In testimony whereof I have hereunto set my Hand and caused the Great Seal of the Colony to be affixed, at Government House, Sydney, this second day of June, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

BREEZA—*Gazette*, 4 July, 1882.  
**NOTIFICATION OF RESUMPTION OF LAND UNDER**  
 44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
 to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
 SPENCER LOFTUS (commonly called  
 Lord AUGUSTUS LOFTUS), Knight Grand  
 Cross of the Most Honorable Order of the  
 Bath, a Member of Her Majesty's Most  
 (L.S.) Honorable Privy Council, Governor and  
 AUGUSTUS LOFTUS, Commander-in-Chief of the Colony of  
 New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by the "Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Naroi Independent" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School, and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the *Government Gazette*, and in a newspaper circulated in the Police District of Gunnedah, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land containing 1 acre 2 roods 14 perches, situate in the county of Pottinger, parish of Breeza, town of Breeza, being allotment 1 of section 5 originally granted to F. R. Ferrier: Commencing on the south-eastern side of Birch-street, at its intersection with the south-western side of Maitland-street; and bounded thence on the north-west by Birch-street bearing south 68 degrees west 5 chains and 30 links to Brainard-street; on the south-west by Brainard-street bearing south 22 degrees east 3 chains; on the south-east by a line bearing north 68 degrees east 5 chains and 30 links to Maitland-street aforesaid; and on the north-east by that street bearing north 22 degrees west 3 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of June, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,  
 F. B. SUTTON.

GOD SAVE THE QUEEN!

CAMDENVILLE—*Gazette*, 19 May, 1882.  
**NOTIFICATION OF RESUMPTION OF LAND UNDER**  
 44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
 to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
 SPENCER LOFTUS (commonly called Lord  
 AUGUSTUS LOFTUS), Knight Grand Cross  
 of the Most Honorable Order of the  
 (L.S.) Bath, a Member of Her Majesty's Most  
 Honorable Privy Council, Governor and  
 AUGUSTUS LOFTUS, Commander-in-Chief of the Colony of  
 New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by the "Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in "The Sydney Morning

Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith. And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper circulated in the Metropolitan Police District of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to, as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Camdenville, Newtown, in the parish of Petersham, county of Cumberland, containing 1 acre 2 roods and 14 perches, or thereabouts, including allotments 24 to 31 of section 3, of Camdenville subdivision, together with 16 perches situated on the north-east side of allotments 28 and 29: Commencing on the south-east side of Laura-street, at the northern corner of allotment 32, being a point bearing north-easterly and distant 541 feet from the intersection of that street with the north-east side of the Edgeware Road; and bounded thence on the north-west by that side of Laura-street bearing north-easterly 186 feet 6 inches to land of G. Aleock; on the north-east by that land and a continued line, in all bearing south-easterly 374 feet 2 inches to Wells-street; on the south-east by the north-west side of that street bearing south-westerly 185 feet to the eastern corner of allotment 23; and thence on the south-west by the north-east boundaries of allotments 23 and 32 aforesaid, bearing north-westerly 370 feet, to the point of commencement,—being the land said to belong to Mr. Myles M'Rae.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourth day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

F. B. SUTTON.

GOD SAVE THE QUEEN!

**NOTIFICATION OF RESUMPTION OF LAND UNDER**  
 44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
 to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
 SPENCER LOFTUS (commonly called  
 Lord AUGUSTUS LOFTUS), Knight Grand  
 Cross of the Most Honorable Order of  
 the Bath, a Member of Her Majesty's  
 (L.S.) Most Honorable Privy Council, Governor  
 AUGUSTUS LOFTUS, and Commander-in-Chief of the Colony of  
 New South Wales and its Depen-  
 dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by the "Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School, and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper circulated in the Metropolitan Police District, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel situated at Croydon, in the parish of Concord, county of Cumberland, forming part of the Windsorville subdivision, containing by admeasurement one acre three roods and two perches more or less: Commencing on the northern side of Boundary-street, at its intersection with the west side of Buckenbah-street (formerly Young-street), and bounded thence on the east by that side of Buckenbah-street bearing north thirty-one minutes west, three hundred and twenty feet; thence on the north by a line bearing south eighty-nine degrees twenty-nine minutes west, two hundred and thirty-eight feet nine inches, to the eastern boundary of Anthony Hordern's estate; thence on the west by part of that eastern boundary bearing southerly three hundred and twenty feet to the north side of Boundary-street aforesaid; and thence on the south by that side of that street bearing north eighty-nine degrees twenty-nine minutes east, two hundred and forty-two feet, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-ninth day of December, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection there-

with: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette, and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Maitland Mercury" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Police District of Maitland, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony, and his successors on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land being allotments 16 and 17 of section 16, situated in the town of East Maitland, parish of Maitland, county of Northumberland: Commencing on the south-east of William-street, at the north corner of allotment 18; and bounded thence on the north-west by that side of that street bearing north 45 degrees east 2 chains; thence on the north-east by the south-west boundary of allotment 13 bearing south 45 degrees east 5 chains to the north corner of the Roman Catholic Church site; thence on the south-east by part of the north-west boundary of that site bearing south 45 degrees west 2 chains; and thence on the south-west by the north-east boundary of allotment 18 bearing north 45 degrees west 5 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this nineteenth day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

MERRIWA—Gazette, 2 June, 1882.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called Lord  
AUGUSTUS LOFTUS), Knight Grand Cross  
of the Most Honorable Order of the  
(L.S.) Bath, a Member of Her Majesty's Most  
AUGUSTUS LOFTUS, Honorable Privy Council, Governor and  
Governor. Commander-in-Chief of the Colony of  
New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Maitland Mercury" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Cassilis, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act for an estate of inheritance in fee simple, in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction

as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate in the village of Merriwa, parish of Merriwa, county of Brisbane, containing 1 acre, and being allotments 13 and 14 of section 10: Commencing on the northern side of Mackenzie-street at its intersection with the eastern side of Dutton-street; and bounded thence on the west by the latter street bearing north 5 chains; on the north by the southern boundary of allotment 12 bearing east 2 chains; on the east by the western boundary of allotment 15 bearing south 5 chains to Mackenzie-street; and on the south by that street bearing west 2 chains, to the point of commencement.

In testimony whereof I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this nineteenth day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

MOUNT PLEASANT—Gazette, 8 August, 1882.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
(L.S.) Cross of the Most Honorable Order of  
AUGUSTUS LOFTUS, a Member of Her Majesty's  
Governor. Most Honorable Privy Council, Governor  
and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the Gazette, and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Penrith Argus" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Penrith of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto, or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to, as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of W. Baker's (now Graham's) 140 acres, containing by admeasurement, 2 acres, more or less, situate at Mount Pleasant, in the parish of Castlereagh, county of Cumberland: Commencing on the east side of Proctor's-lane, at a point south, and distant 28 links from the north-west corner of W. Baker's (now Graham's) 140 acres; and bounded thence on the west by part of the eastern side of that road or lane, bearing south 36 minutes east 5 chains; thence on the south by a line bearing north 89 degrees 24 minutes east 403 links; thence on the east by a line bearing north 36 minutes west 493 links; and thence on the north by a line bearing north 89 degrees 36 minutes west 403 links to the point of commencement.

In testimony whereof I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this third day of August, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
(L.S.) Cross of the Most Honorable Order of the  
AUGUSTUS LOFTUS, Bath, a Member of Her Majesty's Most  
Governor. Honorable Privy Council, Governor and  
Commander-in-Chief of the Colony of  
New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District

wherein the said land is situated, that is to say, in the "Cumberland Mercury" newspaper, declare that the parcel of land, hereinafter particularly described, has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed, with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Parramatta of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors on behalf of Her Majesty for the purposes of the said Act, for an estate of inheritance in fee simple in possession freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification, that is to say:—

All that piece or parcel of land comprising 37½ perches, situate at Parramatta South, parish of St. John, county of Cumberland: Commencing on the southern building-line of Macquarie-street, at its intersection with the eastern side of 1 acre 1 rood 3¼ perches appropriated for Railway purposes, also being a point bearing south 84 degrees 25 minutes east and distant 68 feet 6 inches from the north-eastern corner of W. Mar's 2 roods 21 perches; and bounded thence on the north by that building-line bearing south 84 degrees 25 minutes east 100 feet and 3½ inches; on the east by a line bearing south 6 degrees 20 minutes west 133 feet 7 inches; on the south by a line bearing north 81 degrees 30 minutes west 57 feet 1 inch; and on the west by a line dividing it from part of the aforesaid appropriation bearing north 11 degrees 40 minutes west 139 feet 3 inches, to the point of commencement,—being the land known as the site of the Parramatta School of Arts.

In testimony whereof I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourth day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.  
GOD SAVE THE QUEEN!

PYRMONT—*Gazette*, 27 Jan., 1882.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
(L.S.) Cross of the Most Honorable Order of the  
AUGUSTUS LOFTUS, Bath, a Member of Her Majesty's  
Governor. Most Honorable Privy Council, Governor  
and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Metropolitan Police District of this notification of the said land being so resumed the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction, as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Pyrmont, parish of Alexandria, county of Cumberland, containing by admeasurement 1 rood 18¼ perches: Commencing on the south-eastern

side of John-street at its intersection with the north-eastern side of Mount-street and bounded thence on the north-west by that side of John-street bearing north-easterly 160 feet 10 inches; thence on the north-east by a line at right angles to that street bearing south-easterly 99 feet; thence on the south-east by a line parallel with John-street bearing south-westerly 160 feet 10 inches to the north-eastern side of Mount-street aforesaid; and thence on the south-west by that side of that street bearing north-westerly 99 feet, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twentieth day of January, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

NOTE.—This notification is published in lieu of that which appeared in the Government Gazette of 11th November, 1881, an error having been made in stating the area as 1 acre 18½ perches, instead of 1 rood 18½ perches.

SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
(L.S.) the Bath, a Member of Her Majesty's  
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor  
Governor. and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by the "Lands for Public Purposes

Acquisition Act," by this notification, published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Metropolitan Police District of this notification of the said land being so resumed the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever: And that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land, being allotments Nos. 1, 2, 3, and part of allotment No. 30 of section 8 of South Kingston subdivision, containing by admeasurement about three rods and twenty-two perches, situate in the parish of Petersham, county of Cumberland: Commencing on the eastern side of Holt-street, at the north-west corner of allotment No. 4, being the north-west corner of land resumed for Public School purposes by Gazette notice of the 22nd February, 1881: and bounded thence on the north-west by that side of Holt-street bearing north-easterly to its intersection with the southern side of Cambridge-street; thence on the north-east by that side of that street bearing south-easterly one hundred and ninety-eight feet; thence on the south-east by a line bearing south-westerly to the northern boundary of land resumed aforesaid; and thence on the south-west by part of the northern boundary of that land bearing north-westerly one hundred and ninety-eight feet to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirty-first day of January, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

SUMMER HILL—Gazette, 7 Feb., 1882.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called Lord  
AUGUSTUS LOFTUS), Knight Grand Cross  
of the Most Honorable Order of the  
(L.S.) Bath, a Member of Her Majesty's Most  
AUGUSTUS LOFTUS, Honorable Privy Council, Governor and  
Governor. Commander-in-Chief of the Colony of  
New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith, and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Metropolitan Police District, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of

Public Instruction, as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of James Bartlett's subdivision, situate at Summer Hill, in the parish of Petersham, county of Cumberland, containing about two acres and eighteen perches, as shown on plan No. 758 deposited in the Registrar General's Office: Commencing on the north side of Herbert-street, at its intersection with the west side of Moonbi-street, and bounded thence on the east by the west side of Moonbi-street, bearing north five degrees thirty-four minutes west, three hundred and sixty-nine feet four inches to the south side of Junction Road; thence on the north by the south side of that road bearing north eighty-seven degrees thirty minutes west, two hundred and fifty feet to the east side of Bartlett-street; thence on the west by the east side of that street bearing south five degrees thirty minutes east, three hundred and seventy-three feet four inches to the north side of Herbert-street aforesaid; and thence on the south by that side of that street bearing north eighty-six degrees thirty-eight minutes east two hundred and fifty feet six inches to the point of commencement.

In testimony whereof I have hereunto set my hand and caused the Great Seal of the Colony to be hereto affixed at Government House, Sydney, this thirty-first day of January, in the year of Our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTON.

GOD SAVE THE QUEEN!

TEMORA—Gazette, 2 June, 1882.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called Lord  
AUGUSTUS LOFTUS), Knight Grand Cross  
of the Most Honorable Order of the  
(L.S.) Bath, a Member of Her Majesty's Most  
AUGUSTUS LOFTUS, Honorable Privy Council, Governor and  
Governor. Commander-in-Chief of the Colony of  
New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Temora Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Young, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto, or conferred by the said Act, shall be vested in the Minister of Public Instruction, as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land, situate in the town of Temora, parish of Bundawarrab, county of Bland, containing 1 acre, and comprising allotments 1, 2, 3, and 4 of section 7: Commencing on the north-eastern side of De Boos-street, at the western corner of allotment 5; and bounded thence on the south-west by that street bearing north 27 degrees west 4 chains; on the north-west by Parkes-street bearing north 63 degrees east 2 chains and 50 links to a lane; on the north-east by that lane bearing south 27 degrees east 4 chains; and on the south-east by the north-western boundary of allotment 5 aforesaid bearing south 63 degrees west 2 chains and 50 links, to the point of commencement.

Also, all that piece or parcel of land, situate in the town of Temora, parish of Bundawarrab, county of Bland, containing 1 acre, and comprising allotments 17, 18, 19, 20, of section 7:

Commencing on the south-west side of Aurora-street, at its intersection with the south-east side of Parkes-street, being the north-east corner of allotment 20; and bounded thence on the north-west by that side of Parkes-street bearing south 63 degrees west 2 chains 50 links to a lane; on the south-west by that lane bearing south 27 degrees east 4 chains; on the south-east by the north-western boundary of allotment 16 bearing north 63 degrees east 2 chains 50 links to the south-west side of Aurora-street aforesaid; and thence on the north-east by that side of that street bearing north 27 degrees west 4 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this nineteenth day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

F. B. SUTTON.

GOD SAVE THE QUEEN!

Governor. and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School, and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette* and in a newspaper circulated in the Metropolitan Police District, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony, and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto, or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification—that is to say:—

All that piece or parcel of land forming part of the Banks Hill Estate, being the property of Mr. W. Stephen, containing by admeasurement 2 acres 1 rood and 16 perches, more or less, situated at Banks Meadow, parish of Botany, county of Cumberland: Commencing on the western side of Brighton-street, at the north-east corner of allotment No. 35 of the original subdivision of the estate, being a point bearing north 34 degrees 50 minutes west, and distant 177 feet 6 inches from the north-

west corner of James C. Phelps's 53 acres, and bounded thence on the east by that side of that street bearing north 10 degrees 45 minutes west 267 feet; thence by the south boundary of allotment No. 45 bearing south 88 degrees 20 minutes west 376 feet; thence on the west by the eastern boundaries of allotments 42, 40, 38, and 36, bearing south 5 degrees 30 minutes east 265 feet; and thence on the south by the north boundary of allotment 35 aforesaid bearing north 88 degrees 20 minutes east 400 feet, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of August, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,  
F. B. SUTTOR.

GOD SAVE THE QUEEN!

44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honor-  
to wit. } able Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called Lord  
AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
the Bath, a Member of Her Majesty's  
(L.S.) }  
AUGUSTUS LOFTUS, Most Honorable Privy Council, Govern-  
Governor. nor and Commander-in-Chief of the  
Colony of New South Wales and its  
Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purposes of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now therefore I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me, by the "Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Corowa Free Press" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith; and that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette* and in a newspaper circulated in the Police District of Albury of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public

Instruction of the said Colony, and his successors, on behalf of Her Majesty for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land containing 1 rood 30 $\frac{3}{4}$  perches, situated at Corowa, parish of Corowa, county of Hume, being allotments 5 and 27 of section B, originally forming part of portion 35: Commencing on the eastern side of Riesling-street, at the south-western corner of the Public School site of 2 roods 36 perches, and bounded thence on the west by that street bearing south 10 degrees 1 minute east 75 links; on the south by the northern boundary of allotment 4, and a line in all bearing north 79 degrees 59 minutes east 3 chains and 35 links; on the east by a line bearing north 10 degrees 1 minute west 3 chains 66 links to Murray-street; on the north by that street bearing south 79 degrees 59 minutes west 85 links; again on the west by the eastern boundary of 2 roods 36 perches aforesaid bearing south 10 degrees 1 minute east 2 chains and 91 links; and again on the north by the southern boundary of that land bearing south 79 degrees 59 minutes west 2 chains and 50 links, to the point of commencement,—being land said to be the property of Mr. Leyser Levin.

In testimony whereof, I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of August, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

F. B. SUTTON.

1882.

## NEW SOUTH WALES.

**IMMIGRATION:**

(REPORT FROM AGENT, FOR 1881.)

Presented to Parliament by Command.

## The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 17 February, 1882.

I have the honor to submit, for the information of the Colonial Secretary, my Report on Immigration for the year 1881.

The Immigration Regulations of September 19th, 1876, were cancelled on 27 January, 1881. On the 14th March following, other Regulations were promulgated, under which immigrants were selected by the Agent-General in London, no passage certificates being granted in the Colony.

These Regulations were subsequently cancelled by the publication of "Regulations for the management of Immigration," dated December 22, 1881, to take effect on and after January 1, 1882.

During the year 1881 only seven ships have arrived, with 2,577 immigrants, of whom 2,429 were nominated in the Colony; the remaining 148 were selected by the Agent-General in London.

The immigrants by these several ships arrived in good health, therefore it was not found necessary to place either one of the ships in quarantine.

During the outward voyage, the deaths recorded in the seven ships were only those of two adults and sixteen children under twelve years of age.

Although there were 951 women, including a few widows and their children, received at the Immigration Depot, only 147 of the single women were found willing to hire as domestic servants; these obtained wages at an average of nearly 9s. per week.

Only three married couples and twenty-five single men were willing to hire; all others were either forwarded at their own request into the country districts, or were at once taken by their relatives or friends who had sent for them.

The Appendices herewith annexed give full information in detail relative to the Immigration during the past year:—

A.—General statistical information.

B.—Nationality of immigrants.

C.—Religious persuasions.

D.—Educational attainments.

E.—Trades and callings.

F.—Distribution of the immigrants into the country districts by steamer and by rail.

G.—Residences of depositors to whom passage certificates have been issued.

It may perhaps be desirable to give a short summary of the operations of the Immigration Regulations of September, 19, 1876.

Under these Regulations a payment of £2 was required for adult immigrants. The last deposit on account of such immigrants was made on the 27th January, 1881.

The total number nominated in the Colony was 12,076 individuals, one-third of whom were either unwilling or unable to take advantage of the certificates sent to them by their friends.

The number arrived under these Regulations has been—

Married people	...	...	...	...	...	...	...	...	6,088
Single men	...	...	...	...	...	...	...	...	5,923
Single women	...	...	...	...	...	...	...	...	4,703
Children under twelve years of age...	...	...	...	...	...	...	...	...	5,936
								Total...	22,650
Of whom were nominated in the Colony	...	...	...	...	...	...	...	...	8,288
Selected by the Agent-General	...	...	...	...	...	...	...	...	13,428
Selected at New York	...	...	...	...	...	...	...	...	934
								Total...	22,650

## Their Nationality was—

From England and Wales	...	...	...	...	...	...	...	11,472
Ireland	...	...	...	...	...	...	...	8,448
Scotland	...	...	...	...	...	...	...	1,846
America and Canada...	...	...	...	...	...	...	...	461
Other Countries	...	...	...	...	...	...	...	423
							Total...	22,650

## The Religion of the Immigrants was—

Protestants of all Denominations	...	...	...	...	...	...	...	14,552
Roman Catholics	...	...	...	...	...	...	...	7,894
Other Persuasions	...	...	...	...	...	...	...	204
							Total...	22,650

The larger number of the 16,714 adults, being all over twelve years of age, viz., 15,179, were able to read and write, leaving only 1,104 who could neither read nor write, and 431 who could not write but who were able to read.

## The Trades and Callings of the 8,967 adult males may be thus classified:—

Agricultural and other labourers	...	...	...	...	...	...	...	5,421
Miners...	...	...	...	...	...	...	...	532
Building trades	...	...	...	...	...	...	...	1,088
Iron	..	..	..	..	..	..	..	630
Clothing	..	..	..	..	..	..	..	260
Provision	..	..	..	..	..	..	..	137
Manufacturing trades	...	...	...	...	...	...	...	169
Sundry other trades, or not specified, being chiefly boys from twelve to sixteen years of age	...	...	...	...	...	...	...	730
							Total...	8,967

Of the 4,703 single women who were received at the Depôt from the ship, only 1,617 were willing to engage as domestic servants, at an average rate of wages of nearly £24 per annum.

More than one-half of the married people and single men left their respective ships immediately on arrival, without notifying their proposed destination; the remainder were forwarded at their own request into the Country Districts, viz. :—

By steamers to Coast District	...	...	...	...	...	...	3,894
By rail to the North	...	...	...	...	...	...	1,463
"    South	...	...	...	...	...	...	2,645
"    West	...	...	...	...	...	...	2,819
Suburbs of Sydney	...	...	...	...	...	...	54

Total to whom free passes by railway and by steamer were granted... 10,875

I have the honor to be,

Sir,

Your most obedient servant,

GEORGE F. WISE,

Agent for Immigration.

## NEW SOUTH WALES.

## IMMIGRATION.

(REGULATIONS.)

Presented to Parliament by Command.

Colonial Secretary's Office,  
Sydney, 27th September, 1882.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to direct the publication, for general information, of the following Regulations for the promotion of Immigration.

HENRY PARKES.

## REGULATIONS FOR THE MANAGEMENT OF IMMIGRATION.

1. All Immigrants shall be selected by the Agent-General, or by such persons as he may appoint for the purpose, under instructions from the Colonial Secretary, which instructions shall not be contrary to these Regulations.

2. The selection of Immigrants shall be limited to such adult persons as can pay towards the cost of their passage to the Colony the following sums respectively:—

Married Couples and Single Men—Five Pounds for each person;  
Single Women—Two Pounds for each person.

And such selection shall be made from the populations of England, Scotland, and Ireland (with the exception mentioned in clause 5), in such manner as shall prevent a preponderance of Immigrants from any one of the three Kingdoms according to the proportions shown to exist in the Colony by the Census Returns of 1881. But in the case of families, children under three years of age, in charge of their parents, shall be free, and children between three and fourteen years shall be admitted at half the amount payable by adults.

3. All Immigrants must be of sound mental and bodily health, and of good moral character, and shall consist either of married couples not exceeding thirty-five years of age (with or without children), or of unmarried men and women not exceeding thirty years of age; and shall be selected from the classes of mechanics, farmers, miners, vine-dressers, labourers, and domestic servants, with a special view to the industrial callings of the Colony, and the fluctuations affecting those callings as reported from the Colony from time to time, not excluding small working capitalists in any branch of Colonial industry.

4. The proportion of unmarried men shall not exceed one-third of the whole number of adult Immigrants

5. A proportion of the Immigrants, not exceeding 10 per cent. of the whole, may be natives of other European countries, who shall answer to the physical, moral, and industrial descriptions embodied in these Regulations.

6. The Immigrants must be brought out in ships chartered for that purpose by the Agent-General on behalf of New South Wales (except as provided for in next following section), and under such regulations as he may make and prescribe for their moral and sanitary condition during the passage, subject to the approval of the Colonial Secretary.

7. The Agent-General may, however, make special arrangements at any time for the embarkation of Immigrants at a foreign port, adopting all due precautions to ensure the application of these Regulations, as far as may be practicable, in any such case.

8. No advantage will be allowed in respect of any person brought out as a cabin or intermediate cabin passenger.

9. All deposits of money on account of the passages of Immigrants, except as provided for in next following section, shall be paid to the Agent-General in London, and shall be accounted for by him on behalf of the Government of New South Wales.

10. To meet the public convenience, persons resident in the Colony who may desire to introduce Immigrants in accordance with these Regulations, shall be entitled to nominate such Immigrants, and to deposit on trust with the Agent for Immigration at the Immigration Office, Hyde Park, Sydney, between the hours of 10 a.m. and 2:30 p.m. on each lawful day, and in the country districts with the Clerks of Petty Sessions, during the usual office hours, the necessary sum or sums. Such nominations will be subject however to the approval of the Agent-General, and the rules of selection prescribed by these Regulations, as in cases when no such nominations have been made.

11. In the event of any person or persons nominated in the Colony for a passage declining to emigrate, or not being able to comply with the conditions required by these Regulations, or in case the amount deposited shall exceed that required for the number of Immigrants actually introduced, the amount deposited, or the amount in excess, as the case may be, will be returned to the depositor upon the receipt in the Colony of the Agent-General's report recommending its repayment. But if any attempt of fraud or concealment be made by the depositor or by the nominee under the certificate, the deposit will be forfeited.

12. No money paid by persons resident within the three Kingdoms on account of any passage or passages will be returned should the person or persons making such payment not avail himself or themselves of the passage or passages so provided; but the Agent-General, in cases where circumstances satisfactorily explained may prevent embarkation on the ship first arranged for, may authorize a passage or passages by a succeeding ship.

13. Married couples and children, and single men, shall be entitled to remain on board seven clear days after the ship drops anchor in Port Jackson.

14. Unmarried women shall be received into an Immigrant's Home, in Sydney, and shall be allowed fourteen days to enable them to obtain suitable employment.

15. Immigrants desiring to proceed into the Country Districts within four clear days of their arrival will be allowed free passes by Rail and by Steamboat.

16. The Clerks of Petty Sessions on receipt of any deposit under these Regulations will immediately remit the amount to the Agent for Immigration at Sydney, with a statement of the number and description of Immigrants whom the depositor wishes to introduce.

17. The passage certificate must be forwarded by the depositor to the nominee, who in every case must produce it within twelve months from the date thereof to the Agent-General in London.

18. Forms of application, as well as all other information for the guidance of depositors, can be obtained from the Clerks of Petty Sessions in the Country Districts, or in Sydney, at the Office of the Agent for Immigration.

19. A quarterly report shall be prepared, under the instructions of the Colonial Secretary, giving an account of the state of trade and industrial operations, and of the progress of the Colony generally; and copies of all such reports shall be regularly transmitted to the Agent-General, in January, April, July, and October of each year, for his information and guidance, and copies shall also be laid before both Houses of Parliament.

20. Should the age of any intending Immigrant exceed the limits prescribed in section 3, the sum payable on his or her account shall be fifteen pounds.

21. These Regulations shall take effect on and after the 30th September, 1882, and the Regulations published in the Government Gazette of the 22nd December, 1881, are hereby cancelled.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MR. WISE, IMMIGRATION AGENT.

(REPORT OF, ON CASE OF MRS. HAYES.)

*Ordered by the Legislative Assembly to be printed, 7 November, 1882.*

5. MR. McELHONE to ask THE COLONIAL SECRETARY,—In reference to a large sum of money subscribed by the public for a Mrs. Hayes, whose husband was killed on or about the time of her arrival in the Colony, and balance of which money is now in the hands of Mr. Wise, Immigration Agent,—Will he take steps to compel Mr. Wise to hand over the portion held for her, as per his report shown to me, to Mrs. Hayes without delay?

AN APPEAL TO THE CHARITABLE.

ALTHOUGH the public are too often called upon to alleviate the sufferings of destitute persons, the present special case appears to commend itself so strongly to all classes that it is hoped an immediate response will be the result of the appeal now made.

In the ship "Clyde," which arrived on Thursday last, there was an immigrant, Mrs. Hayes, with her family of six children, four of whom are under six years of age. Her husband arrived about twelve months ago, and had saved sufficient money to pay for the passages of his wife and family. He was in the service of Mr. M'Mahon, of Ulladulla.

On the Monday previous to the ship's arrival he told his employer that he was in very low spirits, in consequence of several remarkable dreams which had disturbed him, and he feared that something fatal would happen to his wife and family. That same afternoon Hayes was thrown from his horse, and died on the following morning from concussion of the brain. Mr. M'Mahon gives him a very good character, and states that he was an industrious man; he also tells me that Hayes was much respected in the district, in which he has resided for the past twelve months.

His sudden death leaves his widow in absolute destitution, in a strange land, with her six young children to support. As she is utterly unable to provide for her helpless family, I venture to ask for pecuniary assistance, and will most carefully disburse any amount that may be entrusted to me for the benefit of herself and family.

GEORGE F. WISE.

On Mrs. Hayes' arrival, as an assisted immigrant, having been sent for by her husband, I had unfortunately to inform her that he had a few days previously been accidentally killed. Finding upon inquiry that she was absolutely penniless, I, in my *private capacity*, made an appeal to the public (copy annexed), in which I undertook that the money collected should be most carefully disbursed by me for the benefit of the widow and her family—the two eldest (her step-children) aged sixteen and fourteen; the other four, aged six, five, three, and two years, were her own children.

The result was that the sum of £339 3s. 10d. was subscribed and entrusted to me; it has been thus disbursed:—

	£	s.	d.
Paid for clothing for Mrs. Hayes and family ... ..	27	7	6
Paid for furniture purchased by Mrs. Hayes ... ..	41	0	0
Cash to the two step-children, £10 of which was given by them to Mrs. Hayes ... ..	20	0	0
Paid expenses in Sydney and for cost of conveyance of herself and family and furniture to Ulladulla; also paid for advertising, postage, &c. ...	12	7	8
Deposited in Sydney Savings Bank to credit of the two step-children, £40 each, for them to receive with accrued interest on each one attaining the age of twenty-one years ... ..	80	0	0
Total expended ... ..	181	5	2
Balance to credit of the "Trust Account" in the Bank of Australasia ...	157	18	8
	£339	3	10

How this balance of £157 18s. 8d. is to be used on behalf of Mrs. Hayes and her young family, according as she determines, either to return to Ireland, or to remain in the Colony, has been explained on her behalf to Messrs. Slattery & Heydon, so far back as *April last*, when an account of receipts and disbursements was also given to those gentlemen.

The proposal I *then* made was, that after providing for the expenses to be incurred in complying with her request, that she should be sent back to Ireland, I would remit the remaining balance of the £157 18s. 8d. for her to receive on her arrival in Ireland, *or* in case she should determine to remain in the Colony, she should receive from the Trust Fund £2 *per week*, until it was exhausted, to which proposal, up to this present date (Nov. 6), I have not received any reply.

Mrs. Hayes has not exhibited sufficient prudence in the management of a *further sum* of £150 chiefly obtained indirectly through me, and received and expended by her in about fourteen months, to justify my entrusting to her the full amount of the present balance, which was intended as much for the support of her family as for herself.

I submit that I have acted, not only in the way most conducive to the interests of Mrs. Hayes and her family, but that I have also had a due regard to the wishes of a large majority of the subscribers.

I have been and am most anxious to be relieved from the responsibility of the trust which has been cast upon me; and I would willingly adopt any more satisfactory plan than that which I have already indicated as to the disbursement of the present balance of £157 18s. 8d.

GEORGE F. WISE,  
Agent for Immigration.

6 November, 1882.

1882.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

## IMMIGRATION.

REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIPS "FORFARSHIRE" AND "SAMUEL PLIMSOLL."

---

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.*

---

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “(1.) Copies of all Reports, since 1875 to date, from the Agent-General, the Health Officer, and Agent for Immigration, to the Government, relative to the Despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “(2.) That similar Reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “(3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

---

## IMMIGRATION.

The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, London, S.W., 10 March, 1882.

I have the honor to inform you that the ship "Samuel Plimsoll," of 1,444 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 3rd April next.

The rates are as follows, viz. :—

	£	s.	d.
250 and under 275 ... ..	16	5	0
275     "      300 ... ..	15	14	9
300 and upwards ... ..	15	2	6

I have, &c.,  
SAUL SAMUEL.

The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, 3 April, 1882.

With reference to my letter of the 10th ultimo, announcing the engagement of the "Samuel Plimsoll" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, Mr. G. S. Eadson, first voyage, 14s. on each emigrant landed alive; to the master, the first mate, the second mate, and the person who serves out the provisions, 4s. on each emigrant landed alive—to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; the schoolmaster, £5; the matron, £40; sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, £3 each.

I have, &c.,  
SAUL SAMUEL.

The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, London, S.W., 21 April, 1882.

Referring to my despatch of the 10th March last (No. 10 Emigration—82), reporting the chartering of the ship "Samuel Plimsoll," I have now the honor to advise you of the sailing of that vessel on the 6th instant, with 405 emigrants on board, equal to 334½ statute adults, and to enclose :—

1st. Alphabetical list of emigrants, giving their names, ages, and occupations; also the total sum received by the Emigration Officer, in cases where insufficient or no deposits were made in the Colony for relatives desirous of accompanying their respective families, including payments for general assisted applicants, which amount has been paid into the Bank of New South Wales.

2nd. A return of emigrants embarked, distinguishing the nominations made in the Colony, general assisted, sexes, adults, and children, together with numbers of the various nationalities.

3rd. A certificate of Dr. G. S. Eadson, relative to his examination of the emigrants before embarkation, also of the medicine chest, provisions, and the accommodation provided for their use during the voyage.

I have, &c.,  
SAUL SAMUEL.

The Agent for Immigration to The Principal Under-Secretary.

Sir, Immigration Office, Sydney, 12 July, 1882.

I have the honor to report the arrival on the 1st instant, of the ship "Samuel Plimsoll," from Plymouth, with emigrants, having left that port on the 6th April, thus completing the voyage in 86 days.

The contract price as per charter-party, is at the rate of £15 2s. 6d. per statute adult.

2. The "Samuel Plimsoll" arrived in port in very good order. All the arrangements for the comfort and convenience of the immigrants were most satisfactory. This vessel is in every way admirably adapted for the conveyance of immigrants.

3. The immigrants consisted of 64 married couples, 115 single men, 38 single women, and 126 children.

Their nationality is noted in the margin.

Only 11 of the immigrants were nominated by friends in the Colony, the deposit on account of whom amounted to £47 10s.; the remaining 396 were selected by the Agent-General in London; these paid on account of passage, the sum of £1,610; thus making a total paid towards the cost of passage of the immigrants by this vessel of the sum of £1,657 10s.

4. Herewith is annexed an abstract return of the disposal of the Immigrants. During the voyage there occurred 3 deaths and 5 births.

5. On examination by the Board of Immigration of the single women at the Dépôt, and of the married people and single men on board the ship, all expressed themselves well satisfied, both as to the sufficient quantity, and the good quality of the provisions issued to them during the voyage.

6. The single women were, as usual, received at the Dépôt, from whence the greater number were discharged to their friends, leaving only 4 for hire as domestic servants; these were immediately engaged at an average rate of wages of 9s. 6d. per week.

English .....	270
Irish .....	55
Scotch .....	77
Other countries .....	5
Total .....	407

7. A large proportion of the immigrants left the ship on the first and second days after arrival without notifying their proposed destination; the remainder were provided with passes by Railway and by steamers as per following:—

## SUMMARY.

Why proceeding.	Married.	Children.	Single Men.	Single Women.
Hired ... ..	6	6	27	3
To or with friends ... ..	2	3	11	2
Seeking employment in districts selected by themselves ...	1	3	.....	.....
General Total—Souls... .. (73)	9	12	38	5

These were forwarded to 23 localities in various parts of the Colony.

8. The surgeon-superintendent, George S. Eadson, Esquire, appears to have discharged his duties in a most satisfactory manner; he is therefore recommended as entitled to receive the promised gratuity, as per letter of instructions from the Agent-General, of 14s. per head on the immigrants landed alive, also to receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. The surgeon-superintendent reports of the matron, Mrs. Louisa Eagar, that "she performed her duties in an efficient, kind, and considerate manner"; it is therefore recommended that she receive the promised gratuity of £40, as per letter of instructions from the Agent-General, also to receive the usual certificate entitling her to the further sum of £30 towards the cost of her return passage to England.

10. The surgeon-superintendent reports that every assistance was rendered to him by the master and officers of the ship; it is therefore recommended that the usual gratuity of 4s. per head on the immigrants landed alive should be thus distributed, viz. :—To the master, 1s. 6d. per head; to the chief officer, and to the officer who served out the provisions, each 1s. per head; and 6d. per head to the second officer.

11. Other gratuities as per letter of instructions from the Agent-General, are recommended to be paid as follows:—To the schoolmaster, £5; water-closet constable, £5; engineer, £5; cook, £5; cook's assistant, £3; baker, £3; 2 sub-matrons, £6; 9 ordinary constables, £27; lamp constable, £3; hospital assistant, £3—total, £65. Also, on the special recommendation of the surgeon-superintendent, the sum of £5 and of £4 respectively to each of the 2 nurses whom he found it necessary to appoint.

12. The surgeon-superintendent reports that "beyond coughs, colds, and diarrhoea, there was no sickness of importance, and that the health of the immigrants was fairly good."

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

Ship "Samuel Plimsoll" arrived at Sydney, 1st July, 1882.

Government Immigration Office,  
Sydney, 12 July, 1882.

GEORGE F. WISE,

Agent for Immigration.

The Agent for Immigration to The Principal Under-Secretary.

Sir,

Immigration Office, Sydney, 27 January, 1882.

I have the honor to report the arrival on the 16th instant, of the ship "Forfarshire," with immigrants; the "Forfarshire" left Plymouth on the 22nd October, thus completing the voyage in 86 days.

The contract price, as per charter-party, is at the rate of £13 18s. 6d. per statute adult.

2. The "Forfarshire" arrived in port in a cleanly condition; the ventilation however in the compartments occupied by the immigrants was very deficient, especially in that of the single women. The Acting Health Officer, Dr. Goode, officially called my attention to this matter, he writes, "The ventilating shaft in the single women's compartment, is to a great extent rendered useless by having some perforated zinc spread across its entire area, the air in this compartment was, at the time of my inspection, very hot and close, although the day was cool and a steady breeze was blowing.

"The air in the two compartments, occupied by the single men and married people, had no means of escape provided at the aftermost bulk-head, and the atmosphere in their vicinity was in consequence foul and heavy.

"I called attention to the effect of the use of the zinc in impeding the ventilation of the single women's compartment on a previous occasion." I noted the complaint made by the Acting Health Officer in my report of the arrival of the ship "Nineveh," 15th October, 1881.

3. The immigrants by this vessel consisted of 66 married couples and 1 widow with their 162 children, 51 single men, and 58 single women.

Their nationality is noted in the margin.

English .... 251  
Irish .... 105  
Scotch .... 38  
Other countries .... 10  
404

The larger number of the immigrants by this vessel obtained passages from the Agent-General under the Immigration Regulations of the 14th March, 1881, and paid a total deposit of £1,390. The remainder were nominated in the Colony, on whose account, the further sum of £262 was paid, making a total of £1,652, paid by or for the immigrants towards their cost of passage.

4. Herewith is annexed an abstract return of the disposal of the immigrants.

During the voyage there occurred 2 births, also 5 deaths, viz., 1 adult and 4 young children.

5. On examination by the Board of Immigration of the married people and of the single men on board the ship, and of the single women at the Dépôt, all expressed themselves well satisfied with their treatment during the voyage.

6. The single women were received at the Dépôt, the larger number of whom were handed to their friends, leaving only 13 for hire; these were engaged on the hiring day as domestic servants at an average rate of wages of 9s. 6d. per week.

7. Free passes by railway and by coasting steamers were granted to 120 of the immigrants who desired to proceed into the country districts, as noted in the following:—

SUMMARY.

Why proceeding.	Married.	Children.	Single Men.	Single Women.
Hired	5	7	1	1
To or with friends	4	13	14	8
Seeking employment in district selected by themselves	12	28	4	2
General Total... (120)	21	48	19	11

These were forwarded to 26 different localities in the country districts.

The remainder of the immigrants, viz. :—284 left the ship without notifying their proposed destination.

8. The surgeon-superintendent, Richard Dawes, Esquire, appears to have given every satisfaction in the discharge of his duties, it is therefore recommended that the promised gratuity, as per letter of instructions from the Agent-General, of 18s. per head for this his ninth voyage in charge of immigrants, be paid to him; also that he receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. The surgeon-superintendent reports of the matron, Miss Chicken, that "she was very attentive and kind in the discharge of her duties," it is therefore recommended that the gratuity of £40, as per letter of advice from the Agent-General, be paid to Miss Chicken, for this her seventh voyage in charge of female immigrants; also, that she receive the usual certificate entitling her to the sum of £30 towards the cost of her return passage to England.

10. The surgeon-superintendent reports favourably of the good conduct of the master and officers of the ship; it is therefore recommended the usual gratuity of 4s. per head on the immigrants landed alive be thus distributed:—1s. 6d. per head to the master of the ship, 1s. per head each to the first mate and to the third mate who served out the provisions, and 6d. per head to the second mate.

11. Other gratuities, as per letter of instructions from the Agent-General, are payable as follows:—To the schoolmaster, £5; engineer, £5; cook, £5; water-closet constable, £5; cook's assistant, £3; baker, £3; sub-matrons (3), £9; ordinary constables (9), £27; lamp-trimmer, £3; hospital assistant, £3—total, £68. Also on the special recommendation of the surgeon-superintendent a gratuity of £5 to the head nurse, and of £3 to the second nurse.

12. The surgeon-superintendent reports that the principal diseases which occurred during the voyage were, "bronchitis, debility, and eruption amongst the children from teething."

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

IMMIGRATION.

REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "ORONTES.")

---

*Ordered by the Legislative Assembly to be printed, 13 September, 1882.*

---

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “(1.) Copies of all Reports, since 1875 to date, from the Agent-General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “(2.) That similar Reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “(3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

---

## IMMIGRATION.

## The Agent for Immigration to The Principal Under-Secretary.

Sir,

Immigration Office, Sydney, 6 September, 1882.

I have the honor to report the arrival from Plymouth, on the 19th ultimo, of the ship "Orontes," with immigrants, having left that port on the 18th May, thus completing the voyage in ninety-three days.

The contract price, as per charter-party, is at the rate of £13 7s. 6d. per statute adult.

2. The report on the arrival of this ship has been delayed in consequence of an investigation required to be held by the Board of Immigration, relative to the Surgeon-superintendent having suspended the matron from her duties, after arrival of the ship at the Quarantine Station.

The Board has held three meetings; the evidence taken at such meetings has been forwarded to the Honorable the Colonial Secretary with the decision of the Board; this will be further noticed in the paragraph of this report which relates to the matron.

3. In consequence of there having been several cases of measles during the voyage, the ship was, on arrival, placed in quarantine by the Health Officer, and was released therefrom on the 23rd ultimo.

4. The ship, on arrival from the Quarantine Station, was in a cleanly condition and in good order. All the arrangements for the comfort and convenience of the immigrants were very satisfactory.

5. The immigrants by this vessel consisted of 54 married couples, 127 children, 103 single men, and 76 single women.

Their nationality is noted in the margin.

English	235
Irish	96
Scotch	81
Other countries	2
Total	414

In addition to the sum of £615 paid by depositors in the Colony, a further sum of £1,089 10s. was paid direct to the Agent-General in London, making a total of £1,704 10s. paid by the immigrants or by their friends towards the cost of their passage.

6. Herewith is annexed an abstract return of the disposal of the immigrants.

During the voyage there occurred nine births and four deaths.

7. On examination by the Board of Immigration of the single women at the Dépôt, and of the married people and single men on board the ship, all expressed themselves well satisfied, both as regards the sufficient quantity and the good quality of the provisions issued to them during the voyage.

8. The single women were, as usual, received at the Dépôt, from whence the greater number were discharged to the friends who had sent for them, leaving only fourteen who, on the hiring day, readily obtained employment at an average rate of wages of 10s. per week.

9. Free passes by railway and by steamer were granted to those immigrants who desired to proceed into the country; they were forwarded to twenty-two different localities.

## SUMMARY.

With reference to the 107 immigrants who received free passes.

Why proceeding.	Married people.	Children.	Single Men.	Single Women.
Hired	15	31	20	2
To or with friends	.....	9	5	6
Seeking employment in districts selected by themselves	.....	.....	4	.....
General, Total 107	15	40	29	8

10. The Surgeon-superintendent, Charles H. Gibson, Esquire, appears to have performed his duties in a satisfactory manner; it is therefore recommended that he receive the gratuity of 16s. per head (in accordance with the letter of instructions from the Agent-General) on the immigrants landed alive, for this his eighth voyage in charge of immigrants; also, that he receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

11. With reference to the matron, Miss Chieken, the Surgeon-superintendent reported as follows:—  
She discharged her duties "inefficiently"; "suspended 21st August, 1882. (Vide Surgeon's Journal.) I advise, however, payment of her gratuity in full."

Having submitted this report to the Chairman of the Board of Immigration, together with Dr. Gibson's subsequent letter referring to his journal, in which he stated that a record of the details to take action relating to her suspension from office was fully given, it was considered necessary that the Board should investigate as to the alleged act or acts of disobedience and insubordination.

The result of such investigation was that—

"It was unanimously agreed that, considering the admitted good conduct of the matron during the voyage, we are of opinion that the Surgeon-superintendent was too hasty in visiting so severely this one act of disobedience to his commands; and therefore, without censuring him (because he undoubtedly under rule 9 is the ultimate authority), we recommend that the matron be paid her gratuity, and we see no reason why she should not be continued as a permanent matron.

C. K. MACKELLAR, M.B.,  
Chairman of the Board of Immigration.

JOHN F. SHERIDAN,  
ALFRED H. STEPHEN, M.A.  
GEORGE F. WISE."

In view therefore of the decision of the Board of Immigration, it is recommended that the matron should receive her gratuity of £40 for this her seventh voyage in charge of female immigrants, also that she receive the usual certificate entitling her to the further sum of £30 towards the cost of her return passage to England.

12. Dr. Gibson reports favourably of the conduct of the master and officers of the ship, towards the immigrants; the usual gratuity of 4s. per head on the immigrants landed alive (as per letter of instructions from the Agent-General) is recommended to be thus distributed:—To the master, 1s. 6d. per head; to the chief officer, and to the officer who served out the provisions, each 1s. per head; and 6d. per head to the second officer.

13. Other gratuities, as per letter of instructions from the Agent-General, are recommended to be paid as follows, viz.:—To the schoolmaster, £5; water-closet constable, £5; engineer, £5; cook, £5; cook's assistant, £3; baker, £3; sub-matrons (three), £9; ordinary constables (ten), £30; lamp constable, £3; hospital assistant, £3—total, £71; also, on the special recommendation of the Surgeon-superintendent, the sum of £5 and of £3 respectively to each of the two nurses whom it was found necessary to appoint.

14. The Surgeon-superintendent reports that "measles was the principal disease which occurred during the voyage."

I have, &c.,  
GEORGE F. WISE,  
Agent for Immigration.

Ship "Orontes" arrived at Sydney, 19th August, 1882.

The Agent-General to The Colonial Secretary.

Sir,

5, Westminster Chambers, London, S.W., 5 May, 1882.

I have the honor to inform you that the ship "Orontes," of 1,318 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 15th instant.

The rates are as follows, viz.:—

	£	s.	d.
If 250 and under 275 statute adults...	14	17	6
„ 275 „ 300 „ ... ..	13	17	6
„ 300 and upwards „ ... ..	13	7	6

I have, &c.,  
SAUL SAMUEL.

The Agent-General to The Colonial Secretary.

Sir,

5, Westminster Chambers, 15 May, 1882.

With reference to my letter of the 5th instant, announcing the engagement of the "Orontes" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The

The undermentioned gratuities have been promised, on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the Surgeon-superintendent, Chas. H. Gibson, Esquire (eighth voyage), 16s. on each emigrant landed alive; to the master, the first mate, the second mate, and person who serves out the provisions 4s. on each emigrant landed alive—to be divided as the Surgeon-superintendent recommends, subject to the approval of the Government; to the school-master, £5; the matron, £40; sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the man in charge of the distilling apparatus, £5; hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, £3 each.

I have, &c.,  
SAUL SAMUEL

The Agent-General to The Colonial Secretary.

Sir,

5, Westminster Chambers, London, S.W., 2 June, 1882.

Referring to my despatch of the 5th May last (No. 18 Emigration—82), reporting the chartering of the ship "Orontes," I have now the honor to advise you of the sailing of that vessel on the 18th ultimo, with 409 emigrants on board, equal to 341 statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, and occupations; together with the total sum received by the Emigration Officer for passage money of applicants selected by me, and in cases where insufficient or no deposits were made in the Colony, on account of relatives desirous of accompanying their respective families; which amount has been paid into the Bank of New South Wales.

2nd. A return of the number of emigrants embarked in the "Orontes," distinguishing those nominated in the Colony from the applicants selected in this Country, also showing their various nationalities.

3rd. A certificate of Dr. C. H. Gibson, relative to his examination of the emigrants before embarkation, also of the medicine chest, provisions and the accommodation provided for their use during the voyage.

I have, &c.,  
SAUL SAMUEL

[3d.]

## IMMIGRATION.

### The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, London, S.W., 2 June, 1882.  
I have the honor to inform you that the ship "Northern Monarch," of 1,230 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 19th instant.

The rates are as follows, viz. :—

	£.	s.	d.
If 250 and under 275 statute adults... ..	14	17	6
" 275 " 300 " ... ..	13	17	6
" 300 and upwards " ... ..	13	7	6

I have, &c.,  
SAUL SAMUEL.

### The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, 19 June, 1882.  
With reference to my letter of the 2nd instant, announcing the engagement of the "Northern Monarch" for the conveyance of emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list. The undermentioned gratuities have been promised, on condition that the several parties have performed their duties to the satisfaction of the Government, viz. :—To the Surgeon-superintendent, Richard Dawes, Esquire (tenth voyage), 18s. per head on each emigrant landed alive; to the master, the first mate, the second mate, and the person who serves out the provisions, 4s. on each emigrant landed alive—to be divided as the Surgeon-superintendent recommends, subject to the approval of the Government; to the school-master, £5; the matron, Miss Bant, £40; sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the man in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I have, &c.,  
SAUL SAMUEL.

### The Agent-General to The Colonial Secretary.

Sir, 5, Westminster Chambers, London, S.W., 30 June, 1882.  
Referring to my despatch of the 2nd instant (No. 22 Emigration—82), reporting the chartering of the "Northern Monarch," I have now the honor to advise you of the sailing of that vessel on the 22nd instant, with 407 emigrants on board, equal to 335½ statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, and occupations; together with the total sum received by the Emigration Officer for passage money of applicants selected by me, and in cases where insufficient or no deposits were made in the Colony, on account of relatives desirous of accompanying their respective families; which amount has been paid into the Bank of New South Wales.

2nd. A return of the number of emigrants embarked in the "Northern Monarch," distinguishing those nominated in the Colony from the applicants selected in this Country, also showing their various nationalities.

3rd. A certificate of Dr. R. Dawes, relative to his examination of the emigrants before embarkation, also of the medicine chest, provisions, and the accommodation provided for their use during the voyage.

I have, &c.,  
SAUL SAMUEL.

### The Agent for Immigration to The Principal Under-Secretary.

Sir, Immigration Office, Sydney, 29 September, 1882.  
I have the honor to report the arrival, on the 14th instant, of the ship "Northern Monarch," with immigrants from Plymouth, having left that port on the 22nd June, thus completing the voyage in eighty-four days.

The contract price, as per charter-party, is at the rate of £13 7s. 6d. per statute adult.

2. The "Northern Monarch" arrived in port in a very clean and satisfactory condition. The lofty 'tween decks are a great recommendation in favour of this vessel.

3. The immigrants by this vessel consisted of 52 married couples, 125 children, 103 single men, and 72 single women.

Their nationality is noted in the margin.

English ....	245		In addition to the sum of £510 deposited by friends in this Colony, the further sum of £1,110 was
Irish ....	100		paid direct to the Agent-General in London, thus making a total of £1,620 paid by the immigrants them-
Scotch ....	49		selves or by their friends towards the cost of their passage.
Other coun-tries ....	10		
Total	404		

4. Herewith is annexed an abstract return of the disposal of the immigrants.

During the voyage there occurred two births and five deaths.

5. On examination by the Board of Immigration of the married people and of the single men on board the ship, and of the single women at the Dépôt, a few of the latter complained of the quality of the bread and of the meat, but the married people and the single men expressed themselves well satisfied, both as to the quantity and as to the quality of all provisions issued to them.

6. The single women were, as usual, received at the Dépôt, from whence the greater number were discharged to their friends, leaving only seven for hire; these readily obtained engagements as domestic servants, at an average rate of wages of 10s. 3d. per week.

7. A large number of the immigrants left the ship on the first and second days after arrival without notifying their proposed destination; others were provided with free passes by railway and by steamers as per following

These were forwarded to twenty-nine localities in various parts of the country districts.

8. The Surgeon-superintendent, Richard Dawes, Esquire, appears to have given every satisfaction in the performance of his duties; he is therefore entitled to receive the promised gratuity (as per letter of instructions from the Agent-General) of 18s. per head on the immigrants landed alive, for this his tenth voyage in charge of immigrants; also, to receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. The Surgeon-superintendent reports of the matron, Miss Bant, that "with reference to her department, she fulfilled her duties with satisfaction and with great attention to the sick"; she is therefore entitled to receive the promised gratuity (as per letter of instructions from the Agent-General) of £40, also to receive the usual certificate entitling her to the further sum of £30 towards the cost of her return passage to England.

10. The Surgeon-superintendent reports favourably of the conduct of the master and officers of the ship; it is therefore recommended that the promised gratuity of 4s. per head on the immigrants landed alive should be thus distributed, viz. :—To the master, 1s. 6d. per head; to the chief officer, and to the officer who served out the provisions, 1s. each per head; and 6d. per head to the second officer.

11. Other gratuities payable are as follows, viz. :—To the schoolmaster, £5; water-closet constable, £5; engineer, £5; cook, £5; cook's assistant, £3; baker, £3; sub-matrons (three), £9; ordinary constables (eleven), £33; lamp constable, £3; hospital assistant, £3—total, £74; also, on the special recommendation of the Surgeon-superintendent, the sum of £5 to the nurse whom he found it necessary to appoint.

12. The Surgeon-superintendent reports that debility, rheumatism and bronchitis were the principal diseases which occurred during the voyage.

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

IMMIGRANT SHIPS "SMYRNA" AND "CAMPERDOWN."  
(CORRESPONDENCE.)

---

*Ordered by the Legislative Assembly to be printed, 12 October, 1882.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated the 7th September, 1882, That there be laid upon the Table of this House,—

“Copies of all correspondence between the Surgeons-superintendent of the Immigrant ships ‘Smyrna’ and ‘Camperdown’ and the Agent for Immigration, on the occasion of the visits of the said ships to this port in 1878 and 1880.”

(*Mr. Tarrant.*)

---

## IMMIGRANT SHIPS "SMYRNA" AND "CAMPERDOWN."

The Agent for Immigration to The Surgeon-superintendent, ship "Smyrna."

Sir,

Government Immigration Office, Sydney, 27 August, 1878.

Henceforth rations for the immigrants will be forwarded daily, similar in quantity to that this day sent for 378 adults, namely:—Beef, 378 lbs. ; bread, 567 lbs. ; sugar, 567 ozs. ; tea, 94½ ozs. ; butter, 189 ozs. ; potatoes, 378 lbs. ; salt, 189 ozs. ; soap, 189 ozs. ; also vegetables, onions, turnips, cabbage, &c.

In addition to the above supplies will be forwarded in a separate package addressed to Dr. M'Nish ; also in another package rations for the Assistant Surgeon, and the two police.

Should extra supplies be required for the sick or for the children you will be pleased to forward me a requisition for the same and state whether in consequence of such extra supplies being sent any and what deduction should be made from the usual daily rations. Dr. Alleyne informs me that he has arranged with Mr. Carroll, the Superintendent of the Quarantine Station, for the supply upon your requisition of milk of the best quality for the children.

Should any of the supplies forwarded be found to be of inferior quality you will be pleased to inform me thereof without delay.

The steamer is engaged to deliver the rations each day at the Quarantine Station between 8 and 9 o'clock A.M. Should there be any delay you are requested to communicate with me by letter and to make a specific complaint.

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Surgeon-superintendent, ship "Smyrna," to The Agent for Immigration.

Sir,

Ship "Smyrna," Sunday, 8 September, 1878.

I have again to draw your attention to the deficiency in the supply of rations.

1. For the last six days we had received 4 lbs. instead of 6 lbs. of tea ; on the 27th Aug., none came.
2. No vegetables supplied on the 6th ult.
3. Six loaves bread less than scale on 7th.
4. To day ninety-six loaves bread short.
5. The meat is of the poorest quality. Dr. Alleyne visited us to-day and spoke hopefully as to the prospects of our being released at an early date.

I have, &c.,

C. H. GIBSON.

The Surgeon-superintendent, ship "Smyrna," to The Agent for Immigration.

Sir,

Ship "Smyrna," 9 September, 1878.

I have to inform you that the provisions did not arrive at the Quarantine Wharf this morning until 11 A.M. You will see by the enclosed papers that the deficiencies are daily becoming greater. The contractor evidently put up the different articles without reference to scales or weights. His mistakes are however always in his own favour. Complaints to-day were both loud and numerous amongst the immigrants, and as they naturally expect me to remedy the insufficient food supply, my position is in the highest degree unpleasant. Several openly announced their intention of breaking bounds to buy bread. In my judgment the stores supplied yesterday and to-day are inadequate, and I can understand active hunger being the result. I may add that yesterday I called Dr. Alleyne's attention to the facts stated above.

I have, &c.,

CHAS. H. GIBSON.

The Agent for Immigration to The Surgeon-superintendent, ship "Smyrna."

Sir,

Government Immigration Office, Sydney, 10 September, 1878.

In reply to your letter of the 8th inst., stating that on many occasions the rations forwarded to the immigrants have been deficient in quantity, I herewith annex for your information a memorandum of the rations ordered to be forwarded *each* day, for which several quantities the contractor holds the receipt from the man in charge of the special steamer, and by whom the rations are delivered to the Superintendent of the Quarantine Station. A counterpart of this order is now forwarded to the Superintendent of the Quarantine Station.

Under these circumstances I am at a loss to reconcile the statement that on one particular day no tea was received, and on another day ninety-six loaves of bread were deficient, &c. As to the meat being of inferior quality, the full price is paid to the contractor and he is required to supply accordingly. In future should there be any less quantity of provisions than what is stated (as per account herewith) to be the daily supply, I would request you to refer to Mr. Carroll, the Superintendent, that he may refer to his own letter and note where the deficiency exists.

I am, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Agent for Immigration to Captain Halstead.

Sir, Government Immigration Office, Sydney, 14 September, 1878.

I herewith enclose an account amounting to £6 3s., in payment for the large deficiencies of rations which have been received by you for conveyance to the Quarantine Station, but which have not been there delivered. I hold your receipt for these supplies delivered to you by the contractor. I therefore require that you will either prove the delivery of the supplies, or that you will deduct the amount, viz., £6 3s. from the sum payable to you by me on account of charter of steamer.

I have, &c.,  
**GEORGE F. WISE,**  
 Agent for Immigration.

[Enclosure.]

September 11, 1878.

Mr. Halstead, bought of James Kidman (late C. Kidman & Son),—

			£	s.	d.

				£6	3 0

Captain Halstead to The Agent for Immigration.

Dear Sir, 16 September, 1878.

In reply to your communication of the 14th, claiming from me the sum of £6 3s. for rations short delivered at the Quarantine Station, I beg to state that I do not recognize the claim, and certainly don't intend to pay it. All the goods received by me from Mr. Kidman were duly delivered and I hold the Superintendent's receipt for the same; my receipts to Mr. Kidman do not vouch for quantities and weights, and I never held myself responsible for such.

This amount of £6 3s. was subsequently paid by Capt. Halstead.

I am, &c.,  
**JAMES HALSTEAD.**

The Surgeon-superintendent, ship "Smyrna," to The Agent for Immigration.

Sir, Ship "Smyrna," 10 September, 1878.

I have to inform you that the provisions did not arrive at the station this morning until 9-15 a.m., thereby delaying the breakfast-hour until 10 a.m.

In company with Mr. Carroll I saw the provisions weighed with the following results:—Meat, 60 lbs. short weight; potatoes, 47 lbs. short weight; sugar, 7½ lbs. short weight; soap, 2 lbs. short weight; butter, 1 lb. short weight. The amount of tea was correct, according to scale, for the first time since the Government undertook the rationing of immigrants.

I am, &c.,  
**CHAS. H. GIBSON.**

The Agent for Immigration to The Surgeon-superintendent, ship "Smyrna."

Sir, Government Immigration Office, Sydney, 11 September, 1878.

I thank you for your letter of the 9th instant this day received. I cannot account for the extraordinary deficiencies in the rations of which you have given me a detailed account. I will look into this matter at once, and will write you to-morrow. In mean time as I have now furnished you with a memo. of the daily supplies ordered, and as Mr. Carroll has each day a counterpart of such order, an error should be at once detected and rectified.

I have now forwarded, addressed to yourself, an extra supply of such rations as were deficient in quantity on Monday last, as per memo. in margin.

As to any deficiency in meat the contractor assures me that he invariably gives 10 per cent. of weight additional to that ordered.

It might perhaps be well to notify to the immigrants that if they break bounds of the Quarantine Station, as some of them have intimated to you their intention of so doing, they will be liable to imprisonment for one or more months.

Porter, wine, and candles have also this day been forwarded for the use of the sick on shore, addressed to Mr. Carroll.

I have, &c.,  
**GEORGE F. WISE,**  
 Agent for Immigration.

Additional supplies for Thursday:—  
 Medical stores to Mr. Carroll.  
 Stout, 4 doz. qt. bottles.  
 Port wine, ½ doz.  
 Lamp candles, 10 packages (4 hours.)  
 For Police:—  
 Tobacco (best) 1lb.  
 Candles, 4lbs.  
 Matches, 6 boxes  
 Extra supplies, addressed to the Surgeon-Superintendent for use of Immigrants.  
 Bread . . . . 45lbs.  
 Vegetables 70lbs.  
 Tea . . . . . 2lbs.  
 Sugar . . . . 20lbs.  
 Soap . . . . 2lbs.

The Surgeon-superintendent, ship "Smyrna," to The Agent for Immigration.

Sir, Ship "Smyrna," Spring Cove, 11 September, 1878.

I have to acknowledge receipt of your letter bearing date September 10, 1878, one paragraph of which directs that for the future Mr. Carroll is to be referred to should there be less quantity of provisions than what is stated (per scale) "to be the daily supply." I know nothing of the business relations of the contractor and steamboat man, nor do I attach the least importance to the fact of the former holding the latter's receipt for stores; one is the servant of the other and probably signs such receipt as a matter of course,

course. With regard to the ninety-six loaves of bread reported to me to be deficient, there will be proof forthcoming that will satisfy you that I am not in the habit of making assertions without ample proof of their soundness.

Your letter, dated August 27th, instructs me to inform you without delay, "should any of the provisions be found to be of inferior quality;" this I have done in the case of meat only, which I reported to be of the poorest description. Your assertion, in reply to such report, that the contractor is paid the full price, and is required to supply accordingly, is not an answer to a medical officer instructed previously to report on the quality of provisions. I have again to inform you that the meat is very poor and bony—the sheep being almost skeletons.

I shall of course continue in the interests of the Government to see to the weighing of the provisions.

I have, &c.,  
CHAS. H. GIBSON.

---

The Surgeon-superintendent, ship "Smyrna," to The Agent for Immigration.

Sir,

Ship "Smyrna," Spring Cove, 12 September, 1878.

I am in receipt of your letter bearing date September 11th, 1878.

I am glad to be able to report that the supply of provisions to-day was in accordance with scale furnished from your office, and that the extra supplies forwarded to meet deficiencies reported on Monday tallied with the amounts marked on margin of your letter. The meat appeared to be of good quality. The provision steamer did not arrive off wharf until 9.15 a.m.

I have, &c.,  
CHAS. H. GIBSON,  
Surgeon-superintendent.

Sir,

"Petty's Hotel," 2 October, 1878.

In reference to the requisition signed by me, and presented at your office for settlement by R. Jamieson, master of the immigrant ship "Smyrna," I have to inform you,—

1. That the champagne (13 pints) and soda-water (3 dozen) were ordered by me as necessaries for the saving of life in the case of two immigrants who suffered from severe and aggravated vomiting.
2. The candles (— packets) were used in Quarantine, none having been supplied to the ship by the contractor.
3. The tea and sugar were also issued in Quarantine to make up the deficiency supplied by the contractor.

I may inform you that the captain has on board two cases of soap (2 cwt.) supplied by your office on my requisition.

I am, &c.,  
CHAS. H. GIBSON,  
Late Surg.-supt., ship "Smyrna."  
Ship "Smyrna."

RECEIVED from Capt. Jamieson for use of emigrants the following articles during voyage and while in Quarantine:—13 pints champagne, 36 bottles soda-water, 34 packets candles (each 4 lbs.), 2 tins milk, 30 lbs. tea, 13 lbs. sugar.

Sydney, September 26th, 1878.

CHAS. H. GIBSON,  
Surgeon-supt.

---

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Spring Cove, Sydney, 9 June, 1880.

In accordance with your request I have the honor to transmit herewith a certificate of the nominal list of deaths during the passage of the ship "Camperdown" from Plymouth to Port Jackson.

I am, &c.,  
CHAS. H. GIBSON,  
Surgeon-supt.

[Nil return.]

---

The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 11 June, 1880.

On Wednesday last a letter was handed for you to Mr. Carroll, marked "immediate," requesting you to furnish me with a nominal list of deaths during the voyage. I request that you will reply to that letter without further delay, also inform me of the names of the immigrants who have died at the Quarantine Station.

I have, &c.,  
GEORGE F. WISE,  
Agent for Immigration.

---

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Sydney, Spring Cove, 12 June, 1880.

I am in receipt of your second letter, which assumes that I failed to acknowledge receipt of your first; such assumption is incorrect, as your communication and the request relating to the nominal list of deaths was promptly attended to, and the letter handed to Mr. Carroll in the usual way.

I enclose herewith a second list. The name of the single man who died on board here on the 10th was Patrick Donlan, and the cause of death, consumption.

I have, &c.,  
CHAS. H. GIBSON.

The

The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Immigration Office, Sydney, 14 June, 1880.

Memorandum of instructions for the guidance of the Surgeon-superintendent of the ship "Camperdown." It is particularly requested that in case of extra supplies or medical comforts being required for the use of the Immigrants,—

That the Surgeon-superintendent shall address himself direct to the Agent for Immigration, specifying exactly the articles required, the quality, and the quantity.

The Surgeon-superintendent should understand that his written requisition can in no case be complied with until the day after the order has been received by the Agent for Immigration.

If requisitions are made for unspecified quantities, the order will be returned to the Surgeon-superintendent for further and correct information.

G. F. WISE,  
Agent for Immigration.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," in Quarantine, 15 June, 1880.

I am in receipt of your memorandum of instructions of June 14th, 1880.

I have to inform you that up to this date I have not found it necessary to apply for extra supplies of medicines or medical comforts. I transmit herewith a requisition for eggs and *milk*. I have been informed by Alexander Goodwin that he has neither sent or received money by letter.

No order for  
milk received.—  
G.F.W.

I have, &c.,

C. H. GIBSON,

Surgeon-superintendent.

Ship "Camperdown," in Quarantine, June 15, 1880.

Surgeon-superintendent requisition for meal comforts for the use of the immigrants:—

12 hen eggs perfectly fresh.

2 quarts of good cod-liver oil.

C. H. GIBSON,

Surgeon-superintendent.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Watson's Bay, 19 June, 1880.

I enclose herewith requisition for extras which I may be in want of any moment. You have omitted to furnish me with a scale by which to check the provisions supplied daily by the contractor. By referring to my journal, ship "Smyrna," you will I trust see the importance of at once sending me one. On my last visit here in that ship, I had occasion almost daily to call your attention to glaring deficiencies in the stores, on one occasion to the extent of 96 loaves in the bread item alone.

The captain (Paton) informs me that he does not consider himself responsible for supplying coal, candles, or water, or the use of the medicine-chest for the immigrants. He is also of opinion that his obligations to supply wine and beer for myself and the matron ceased on the termination of the lay-days. If his opinion be correct will you be good enough to send me supplies of the above. As the period of our detention here appears to be indefinite, I must ask you to send mattresses for sixty single women. I informed Dr. Alleyne a few days ago that for a short time the girls could dispense with them, but under our changed circumstances with regard to release, I think it inexpedient to ask them to dispense with beds any longer. They are all supplied with blankets and counterpanes.

As there appears to be some irregularity in the Postal system, especially with regard to the transmission of letters from a Quarantine vessel, I request that you will kindly acknowledge receipt of this communication at your earliest convenience, and when doing so I would like to be informed as to the fate of the (2) nominal lists of deaths you were anxious about. I received the cod-liver oil this morning, but no eggs.

I have, &c.,

C. H. GIBSON,

Surgeon-superintendent.

Surgeon's Requisition for medical comforts for the use of the immigrants on board the ship "Camperdown," June 19th, 1880:—

- 1 dozen fresh hen eggs.
- 1 ,, pints of stout.
- 6 bottles of pale brandy.
- 6 ,, of port wine.
- 6 pounds of arrowroot.
- 1 dozen 6-oz. phials for dispensing purposes.

C. H. GIBSON.

The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 19 June, 1880, 12 o'clock.

Your letter of this day's date is just now delivered.

I enclose the scale, shewing the daily quantity of provisions to be issued, which will enable you to check the provisions supplied by the contractor.

There is no time to discuss the extraordinary claims now made for the first time by the captain of the ship, as to the supply of coals, candles, and water. Coals and water have been ordered to be sent this afternoon by special steamer.

A box of 40lbs. of candles is now sent; you will be pleased to make further requisition for candles as required.

You must necessarily obtain your requirements of medicine from your medicine-chest as heretofore. Surely the captain will not refuse leaving the matter for future settlement.

I

I have ordered two special rations to be sent daily for the use of the matron, and will send two dozen in lieu of one dozen pints of stout as ordered, the extra dozen being for the matron.

The captain is bound to continue to supply you as heretofore, under clause 17 of the charter-party.

Sixty single mattresses, pillows, &c., are herewith forwarded.

Your letters, the one relative to deaths on the voyage, and the second, giving the name of the man who died at the Quarantine Station, have been duly received.

The supplies as per your requisition of this day will be delivered at the ship to-morrow morning. Enclosed is the list of what you should then receive.

I am, &c.,

GEORGE F. WISE,  
Agent for Immigration.

### The Surgeon-superintendent, ship "Camperdown," to the Agent for Immigration.

Sir,

Ship "Camperdown," Watson's Bay, 20 June, 1880.

I am in receipt of yours of June 19th, and have to inform you of the arrival of the several articles mentioned therein. The single women unanimously refused to use the beds forwarded, alleging that they were soiled, &c. I consequently instructed the matron to store them in the hospital. The candles sent are quite useless, as they do not fit our lamps ("Emigration Pattern"), and to use them in any other lamps, or as naked lights, would be a breach of the Emigration Regulations of a culpable nature; under these circumstances I shall store those forwarded and requisition the captain to supply candles of a proper size, &c., and direct him to charge the Government. With regard to my use of the medicine-chest, I have to inform you that my letter directing attention to the matter only dealt with the case in a purely business aspect. The captain has never in any way attempted to interfere with my use of the chest since the expiration of the lay-days, and is quite willing, now that he has asserted his claim (legal), to allow that matter to stand over for future settlement.

A reference to the charter-party will show you that the matron is entitled to a reputed quart of ale daily, and not a pint (imperial) or otherwise as your letter conveys. The question of my own supply of wine, beer, &c., is entirely a matter for your own settlement. I believe, however, that your belief as to the captain's liability for such supplies to me is erroneous. He is, I fancy, owing to my being on the ship's articles, bound to board and maintain me suitably at his table, but not supply me with beer and wine, as per scale of agreement (my) with the Government. I have to thank you for acknowledging the receipt of my list of deaths, &c.

I enclose herewith a requisition.

I am, &c.,

CHAS. H. GIBSON,  
Surgeon-supt.

Surgeon's Requisition:—

REQUIRED for the use of the immigrants on board the ship "Camperdown," the following:—

40lbs. of loaf-sugar for the infants and younger children.

C. H. GIBSON,  
Surg.-supt.

20th June, 1880.

### The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 21 June, 1880.

Having been informed that previous to the arrival of the ship in harbour all the mattresses belonging to the single women's compartment were either thrown overboard or otherwise destroyed, I have to request that you will be pleased to inform me if such was the case; and, if so, by whom was such a destruction of property either authorized or permitted?

Query? Also was the bed-ticking destroyed as well as the bedding?

I have, &c.,

GEORGE F. WISE,  
Agent for Immigration.

### The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 21 June, 1880.

I thank you for the information contained in your letter this day received as to the late arrival of the provision boat. The contractor has positive orders that he must leave the Circular Wharf at 6 A.M. and proceed direct to the ship. These orders were repeated to him daily. You will be good enough to inform me should there be any continued delay in the delivery of the daily supplies.

Coal, candles, and water were supplied in consequence of your letter of the 19th inst. No particular sized candles were asked for. Had your requisition been more definite the order would if possible have been complied with. You will oblige by keeping intact the two boxes of candles sent, as you state they are useless; they will be returned to the contractor and for the candles which you require. You will be pleased to continue to obtain the same from the captain.

Your requisition for 40 lbs. of loaf sugar for the infants is complied with only to the extent of 20lbs. and the Health Officer (Dr. Alleyne) desires me to request you to inform him why so large a quantity as 40 lbs. is required for the young children.

As to the porter forwarded on Saturday for the use of the matron, I distinctly said that "the extra dozen pints of porter was for the matron." My letter can convey no other meaning than that one dozen pints stout was for the matron. I am not responsible if either you or the matron consider that my letter conveys any other meaning than that which was so distinctly written.

The sixty beds sent to the ship on Saturday were severally examined before they were forwarded; some few of them were mattresses that had never been used. No fault could fairly be found with the remainder.

I must remind you that until Saturday morning last, June 19, you had never informed me that beds were required by the single women.

I have, &c.,

GEORGE F. WISE,  
Agent for Immigration.

The

The Surgeon-Superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," 21 June, 1880.

I have to inform you that the provision boat does not arrive here until 8:15 o'clock and often even later. This does not permit of the people having breakfast until after 9:30 A.M.

The ship's butcher is always here at 7 o'clock sharp, and I see no reason why the contractor should be allowed to regulate his own time, seeing that a large number of people are interested in the matter.

The provisions are of good quality and correct in quantity.

I have, &c.,

CHAS. H. GIBSON,

Surgeon-superintendent.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," June 23, 1880.

I am in receipt of your two letters, dated June 21st, with regard to the single women's bedding. I never stated either orally or in writing that all the mattresses had been thrown overboard.

Twenty were so dealt with—fifty were so dealt with, but the tickings retained.

Fifty remain and are in use in the single women's compartment. In a previous letter I informed you the reason why I did not consider it necessary to apply to the Government for fresh bedding, viz., because Dr. Alleyne informed me that our detention would only extend over a few days or so.

With regard to the candles, my omission to say anything about size or pattern, was because I assumed that as Immigration Agent you would probably be aware of the kind of candles required. I have handed the matron the dozen of stout; my remarks relative to that matter were intended to convey to you the nature of the clause in the charter-party as to her ale allowance.

I am, &c.,

C. H. GIBSON,

Surgeon-superintendent.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," June 23, 1880.

I sent you a letter last evening by Dr. Foucart, but in the hurry of writing, owing to the vaccination instructions received from Dr. Alleyne, which called for immediate attention, I omitted to answer one of your queries, viz., by whose authority the beds were thrown overboard or destroyed. I may now inform you that such action was taken by the matron without my knowledge. Some of the beds thrown overboard belonged to children who had had measles, and not anticipating quarantine she did not think she was doing much harm. I believe she acted without any bad motive, although her action was thoughtless. Mrs. Sweedale gave birth to a daughter on the 21st.

The provision boat was late, viz., not arriving until 8 a.m. on the 22nd. It was in good time this morning.

I enclose requisition for medicines.

I am, &c.,

C. H. GIBSON.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Watson's Bay, June 24, 1880.

I received the medicines ordered yesterday. The provision boat arrived in good time yesterday and to day.

I enclose requisition. The condensed milk is for a baby who refuses all other nourishment. The captain informs me that he has expended the coals sent a few days ago.

I am, &c.,

C. H. GIBSON.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Watson's Bay, June 25, 1880.

I have to inform you that there were the following deficiencies in the provisions this morning—

Meat, 10 lbs.

Milk, 2½ gals.

The boat arrived in good time. I ordered Swiss milk, Milkmaid brand, in my requisition of yesterday; instead of this the contractor sent the American Eagle brand, which I do not consider good. This kind is considered by the profession in England to be the poorest in the market. The child I require the condensed milk for will take no other nourishment, and its life may be said to almost hang upon a thread.

I enclose two papers taken out of letters by mistake, also a letter for a "S. Plimsoll" immigrant.

I am, &c.,

C. H. GIBSON.

I shall keep the Eagle (3 tins) milk, and the candles for you to return to contractor. Hope to get the Swiss to-morrow.—C. H. GIBSON.

## The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

See copy of reply  
herewith.

Sir,

Immigration Office, Sydney, 26 June, 1880.

Referring to your complaint of deficiencies in quantity in the delivery of meat and of milk, also in respect of the preserved milk, I immediately communicated with the contractor, and for your information I forward his reply.

Dr. Foucart has this day called, and in your name has signed a requisition that the daily meat ration should consist of 200 lbs. beef and 160 lbs. mutton. You are of course aware that the waste in mutton is very considerable. I fear therefore that, although asked for by you, complaints of want of sufficient weight of cooked meat will be made.

Although the immigrants on board the ship are only entitled to 335 lbs. meat, the contractor has hitherto supplied, as per my order, for 340 adults, viz., 340 lbs. I have now given orders that he should supply, as per your requisition per Dr. Foucart, 200 lbs. beef, 160 lbs. mutton, ; and this supply the contractor has orders to forward *daily* until I receive further requisition from yourself on the subject.

I am, &amp;c.,

GEORGE F. WISE,

Agent for Immigration.

## Memo. from Mr. J. Kidman to The Agent for Immigration.

Dear Sir,

25 June, 1880.

*Re* "Camperdown provisions" I have sent to the Fresh Food and Ice Company about the milk, and had been informed that 14 gallons were delivered, and that no mistake on their part could occur, as it is checked by two people before leaving them.

The meat, I am quite positive, 22 lbs. over the quantity required, were delivered, viz., 362 lbs. I never cut off a few pounds from a quarter if within a little of the weight ; I much prefer sending 20lbs. or so over to 1 lb. short.

The "Eagle brand" milk was sent because it is supposed to be the very best brand imported but as you desire the "Milkmaid" instead I will always send it in future.

The matches were forwarded along with the rations yesterday.

Yours, &amp;c.,

JAMES KIDMAN.

P.S.—I will send the  $2\frac{1}{2}$  gallons milk extra to-morrow morning.—J.K.

## Dr. L. Foucart to The Agent for Immigration.

Sir,

Sydney, 26 June, 1880.

Please to send 160 lbs. of mutton with 200 lbs. beef daily to the immigrants on board of the ship "Camperdown."

(For Dr. GIBSON,)

L. FOUCART.

## The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," 28 June, 1880.

I have the honor to acknowledge receipt of your letter of June 26th.

Referring to the enclosure contained therein from Kidman, I have to inform you that the contractors' representative on board here is daily present when the weights are checked, and that he is satisfied that the deficiencies reported by me are correctly stated.

I do not consider that it is a part of my duty to construct a theory as to the causes that have to do with the short weights, or to explain why provisions should lose weight in transport from the Ice-house, Sydney, to the ship "Camperdown."

Dr. Foucart will hand you a requisition for a few articles that I require for the use of the immigrants.

I am, &amp;c.,

CHAS. H. GIBSON,

Surgeon-superintendent.

## The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," 29 June, 1880.

I have to inform you that the vegetables to-day were deficient to the extent of 25 lbs.

I received, in answer to requisition dated 28th instant—Brandy, 3 bottles ; arrowroot, 2 lbs. ; and 3 tins of milk.

The castor-oil and spirit of juniper did not come to hand. The absence of the latter medicine is a serious matter, and may prejudice the life of the patient it was ordered for, his state being critical. No mutton reached the ship yesterday for the immigrants, the entire ration being beef.

I am, &amp;c.,

CHAS. H. GIBSON.

## The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," Watson's Bay, 30 June, 1880.

I have to inform you that the castor-oil and juniper arrived this morning, and that I have called Dr. Foucart's attention to the importance of my requests for medicines being more promptly attended to in future.

The

The vegetables to-day were deficient to the extent of 26 lbs., and 60 lbs. of the potatoes (this morning's supply) were softened and semi-rotten. Kidman's representative was present at the examination and is quite satisfied as to the matter. I append requisition.

I am, &c.,  
CHAS. H. GIBSON,  
Surgeon-superintendent.

REQUIRED for the use of the immigrants the following :—

Six (6) fresh eggs.  
Syrup of squills, 1 pint.

C. H. GIBSON,  
Surgeon-superintendent.

NOTE.—Dr. Gibson appeared before the Royal Commissioner appointed to inquire into the management of the Quarantine Station, and in support of his sworn evidence he handed to the Commissioners a letter purporting to be a copy of the actual letter dated 30th June, 1880, addressed by himself to the Agent for Immigration, in which document he inserted the following paragraph :—

"If I have a case, and I honestly believe that life has been prejudiced by the non-arrival of medicines requisitioned for, I shall decline to give a certificate, and advise the Coroner to hold an inquiry. For the future Dr. Foucart will countersign all my requisitions."

*This paragraph is not in the original letter, copy of which is given above.*

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

Ship "Camperdown," 8 July, 1880.

I beg to recommend that the 4s. gratuity to the officers be divided amongst them as follows :—

	s.	d.
Captain Paton ... ..	1	6
Chief officer ... ..	1	0
Second officer ... ..	0	6
Storekeeper ... ..	1	0

I omitted to put on the blue paper the name of my nurse during the voyage. This I now do—Mrs. Snary—and I recommend that she be paid a gratuity of £3.

I am, &c.,  
CHAS. H. GIBSON.

The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 9 July, 1880.

It having been reported to me that a very serious breach of the Quarantine regulations occurred during the detention of the "Camperdown" in quarantine, it will be necessary that a meeting of the Immigration Board should be held for the purpose of considering the same in connection with the gratuities payable to yourself, and also to the master and officers of the ship.

Your presence at such meeting will be required; I will therefore notify to you the day as soon as the Board has fixed the time of their meeting.

I am, &c.,  
GEORGE F. WISE,  
Agent for Immigration.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

"Petty's Hotel," Sydney, 9 July, 1880.

I have the honor to acknowledge receipt of your letter of this day, in which you tell me that it has been reported to you that a very serious breach of the Quarantine Regulations occurred during the detention of the ship "Camperdown," in quarantine, which may affect my gratuity. I request that you will at once furnish me with the specific charge which you propose raising against me before the Immigration Board, which you are convening to consider the case.

In full reliance that the inquiry already held by the Board of Immigration had dealt with every question that could affect me or my character and position in the Service, I accepted an appointment and made arrangements to leave town to-morrow, and therefore my attendance before the Board which you require can only be at great personal inconvenience and loss to me.

I need hardly say however that I am far more desirous to prevent the possibility of any attempted stigma on my reputation as a Surgeon-superintendent, than I am solicitous about the money effect of the proceedings which I respectfully submit are being initiated by you rather late in the day.

I am, &c.,  
C. H. GIBSON,  
Late Surgeon-supt., "Camperdown."

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

"Petty's Hotel," 12 July, 1880.

As I have not been honored with any acknowledgment of my letter of the 9th instant—one of great importance to me—I have this day addressed the Honorable the Colonial Secretary on the subject of your proposed inquiry, and have requested that it may take a wider scope.

I am detained here at great loss and inconvenience, and am virtually a prisoner by your attempt to involve me in an inquiry as to a charge, the nature of which you have omitted specifically to inform me of,  
and

and which you are pleased to say may affect my gratuity. I have to call to your remembrance the fact that on the morning of the 9th instant you asked me as to the disposal of the gratuity, where it was to be sent to, &c., and asked me to call on the morning of the 10th to sign the vouchers, &c.

I am not at all disposed to submit to your very arbitrary dealing with me. In my judgment I am entitled to your courteous consideration, and I consider that it is unjustifiable to detain me longer in Sydney.

I am, &c.,

C. H. GIBSON,

Late Surgeon-supt, ship "Camperdown."

The Agent for Immigration to The Surgeon-superintendent, ship "Camperdown."

Sir,

Immigration Office, Sydney, 14 July, 1880.

Referring to my letter of the 9th instant, concerning a serious breach of the Quarantine Regulations which it is alleged had occurred during the detention of the ship "Camperdown" in Quarantine with Government immigrants under your care and supervision, I have the honor to state that the Board of Immigration have this day met, and having carefully considered the question, is of opinion that the matter is one which does not come under its jurisdiction.

The gratuities will therefore be payable in accordance with the letter of advice from the Agent-General.

I am, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Surgeon-superintendent, ship "Camperdown," to The Agent for Immigration.

Sir,

"Petty's Hotel," Sydney, 15 July, 1880.

On the 9th instant you wrote informing me that you had convened a meeting of the Immigration Board to consider certain alleged breaches of the Quarantine laws affecting my gratuity, and intimating that you required my presence at such meeting of which you would notify me.

On the 10th instant I begged that you would apprise me of the nature of the infringement of the Regulations. To my letter you did not send me any reply, and I waited in town a considerable inconvenience and expense, in full expectation of this courtesy at the least. Yesterday I received yours of the 14th instant, informing me that in contravention of your promise to notify me of the day fixed for my attendance, the Board of Immigration had met without my presence and carefully considered the question affecting my professional character, and had come to the conclusion that the matter which you do not even now disclose is not under your jurisdiction.

I complain of these most irregular proceedings. In the first place you should not have convened a meeting of the Board to consider a question outside its jurisdiction.

Secondly, you were not justified in prejudging that my gratuity could be affected by any such matter, but having done so, I presume to say that you were still further wrong in holding a Board meeting behind my back without giving me the opportunity of being present, which you said was essential. I shall not make claim for money compensation which I might fairly do for my detention, but I cannot allow your proceedings to rest here. My aim on each occasion of visiting this port in charge of immigrants has been to uphold and maintain the efficiency of the Service so far as I could; my exertions however have been thwarted, and the treatment my suggestions have met at your hands, and your proceedings altogether, justify me in saying that either you are ignorant of the rules and regulations of your department, or you have acted with an animus against me unworthy of the head of it.

I shall forward a copy of this letter to the Honorable the Colonial Secretary, and

I have, &c.,

CHAS. H. GIBSON,

Late Surgeon-superintendent, ship "Camperdown."

1882.

---

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

IMMIGRANT SHIP "ORONTES."  
(CORRESPONDENCE.)

---

*Ordered by the Legislative Assembly to be printed, 18 October, 1882.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 19th September, 1882, That there be laid upon the Table of this House,—

“Copies of all Correspondence which took place between the Agent for Immigration and the Surgeon of the Immigrant Ship ‘Orontes,’ upon the occasion of the recent visit of that vessel to this port.”

(*Mr. Tarrant.*)

---

IMMIGRANT SHIP "ORONTES."

---

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir, Immigration Office, Sydney, 21 August, 1882.  
I herewith forward to you by Dr. Beattie, the Assistant Health Officer, a packet of letters which you will oblige by distributing to the immigrants to whom they are addressed.  
The Assistant Health Officer has doubtless informed you that all requisitions for medicines and demands for medical comforts are to be transmitted direct to himself.

I shall be glad to hear from you as to the probable date of the release of the ship from Quarantine; also, be pleased as soon as possible to furnish me with a nominal list of deaths during the voyage.

I am, &c.,

GEORGE F. WISE,  
Agent for Immigration.

---

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir, Ship "Orontes," Spring Cove, 21 August, 1882.  
I have the honor to inform you that I this day, with the captain's concurrence, suspended from further discharge of her functions as matron, Miss Chicken, for insubordination, disrespect to Captain Bain, and disobedience of orders. A record of the details which induced us to take such action you will see in my journal in the course of a day or two, our detention here being likely to end then. We appointed, as acting Matron, *pro. tem.*, E. Smith, one of the sub-matrons. I enclose herewith a nominal list of deaths, &c.

I am, &c.,

CHAS. H. GIBSON,  
Surgeon-superintendent.

---

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir, Immigration Office, Sydney, 25 August, 1882.  
In adverting to the unprecedented course adopted by you at the meeting of the Board of Immigration, held on the 24th instant, on board the ship "Orontes," viz., that of placing one of the immigrants, in the immediate presence of the Board, with instructions to take written notes of the proceedings for your information, and the Board not deeming it desirable to discuss the subject at the time, preferring to adopt the course of asking for your written explanation,—

The object of this communication is to request that you will inform me, for the information of this Board, the reasons for your having given such instructions on the occasion referred to, also the reasons for your having so acted without first having obtained the permission of the Board.

I have, &c.,

(For and on behalf of the Board of Immigration),  
G. F. WISE,

Member of the Board and Agent for Immigration.

---

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir, Ship "Orontes," Neutral Bay, 25 August, 1882.  
I have received your letter of this day, and in reply to the request you prefer at the instance and on behalf of the Board of Immigration, I have the honor to say I desire primarily to express my regret that in the hurry of the moment I did not inform the Board of Immigration of my wish to have notes taken of its proceedings, and also that I did not ask permission to employ Mr. Barnett, who, although an immigrant, is a competent reporter.

My appointment of Mr. Barnett without these preliminaries was an indiscretion for which I desire to apologize, and I beg that the Board will also accept my assurance that in the unusual course pursued I intended no discourtesy. I deemed it right in my protection to ensure an accurate record of proceedings which were probably only preliminary to another inquiry which may have to be held.

It is of course unnecessary for me to give you the reasons which influenced me, but it is due to the Board of Immigration that I should inform its members, who may not be aware of the fact, that on nearly every occasion of my visiting this port as Surgeon-superintendent I have been subjected to reprimands and hectoring instructions from you, and to threats of inquiries which have either never been held or have been adjudicated upon in my absence, and I therefore determined on this occasion to be prepared, in case of a recurrence of these annoyances, to trace their origin accurately.

It has, as you are aware, been my duty to write to the Government, and to criticise your administrative capacity, and I have keenly appreciated the studied slights ever since experienced at your hands.

I have felt that you have never supported me in the always arduous and sometimes unpleasant duties which I have honorably and energetically carried out.

I have, &c.,

CHAS. H. GIBSON,  
Surgeon-supt., ship "Orontes."

---

The

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 26 August, 1882.

A meeting of the Board of Immigration will be held at the Immigration Office, Hyde Park, on Monday next, the 28th instant, at 2 o'clock p.m., for the purpose of investigating the charge made by you as Surgeon-superintendent of the ship "Orontes" against Miss Chicken, late matron of the female immigrants on board the said ship.

The Board of Immigration request your attendance at this meeting.

I am, &c.,

GEORGE F. WISE,  
Agent for Immigration.

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 26 August, 1882.

The written report which you handed to me is incomplete; I request that you will fill in thereon the desired information, and return the same to me on Monday morning next.

I am, &c.,

GEORGE F. WISE,  
Agent for Immigration.

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir,

Ship "Orontes," 26 August, 1882, 10 A.M.

I beg to inform you that all the immigrants, except the following, have left the ship, and they may go to day:—2 families, 8 children, 2 infants, 2 single men.

I am, &c.,

C. H. GIBSON,  
Surgeon-superintendent.

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir,

Ship "Orontes," Neutral Bay, 28 August, 1882.

I beg to inform you that only two families and three single men slept on board last night, and that the two families, equal to twelve souls, proposed leaving at 10 a.m. this morning. The single men, I believe, are waiting for passes.

I am, &c.,

CHAS. H. GIBSON,  
Surgeon-supt.

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir,

Ship "Orontes," Neutral Bay, 28 August, 1882.

I have the honor to transmit herewith, duly filled up as requested, the Surgeon's Report\* on the immigrant ship "Orontes."

I am, &c.,

CHAS. H. GIBSON,  
Surgeon-supt., ship "Orontes."

\*Sent to Agent-General for the Colony.

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 29 August, 1882.

Your presence is requested at the adjourned meeting of the Board of Immigration to be held at the Immigration Office, on Wednesday, the 30th instant, at noon.

I am, &c.,

GEORGE F. WISE,  
Agent for Immigration.

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 31 August, 1882.

The letter from Miss Chicken, late matron on board the ship "Orontes," copy of which is here-with enclosed, was this day received by the Board of Immigration.

It is requested that you will be pleased to inform the Board as to the correctness of the statements therein made, especially as to the delivery in bulk of the medicines which are particularly specified by Miss Chicken.

The Board further request your opinion as to the claim of Miss Chicken, on account of the "extra duties" which she alleges she was required to perform.

I am, &c.,

(For and on behalf of the Board of Immigration),

GEORGE F. WISE,  
Member of the Board and Agent for Immigration.

[Enclosure.]

[Enclosure.]

Miss J. Chicken to The Chairman of The Board of Immigration

Sir, Immigration Depôt, 31 August, 1882.  
I beg respectfully to state that extra duties were imposed upon me during my late passage in the ship "Orontes," from Plymouth to Sydney.

It was the practice of the Surgeon-superintendent to give to me medicines in bulk. Such as salts, 15 lbs. at a time; large unopened jars of tincture of rhubarb; a stone jar of Gregory powder; and a very large stone bottle of castor oil; and liquid ammonia in bottles, to be mixed with other medicine, and to be distributed by me in doses to the girls at my own discretion.

I had also to attend to the lamps, which duty I had never before had imposed upon me. Lamp-constable never had them once during the whole of the passage either to light or clean.

I had also charge of a sick married woman in my hospital for upwards of a month suffering from a bad breast, with an infant of eight days old; they had to be attended to night and day; I had one of my own people to assist me. Under these circumstances I respectfully beg that the Board will be pleased to consider whether I may not be entitled to a payment for these onerous and responsible extra duties imposed upon me—duties which must satisfactorily prove to the Board of Immigration that the Surgeon-superintendent must have had implicit trust in my efficiency, and also that he had absolute faith in my discretion.

I have, &amp;c.,

JANE CHICKEN.

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir, "Aaron's Exchange Hotel," Sydney, 1 September, 1882.  
Referring to your letter of 31st August, with Miss Chicken's enclosed, I beg to state, for the information of the Board of Immigration, that it is the practice of every matron to have a stock of simple aperient medicines at hand for the use of the single women, many of whom prefer applying to the matron for such when a dose would be required, and I carried out this custom in the case of the "Orontes" at the request and desire of the matron herself, and I see no reason for any departure from this usage. The ammonia alluded to was merely a small bottle of sal-volatile intended to be used by my directions in those minor cases of hysteria to which the single women are liable, especially in the tropics.

I considered it to be inexpedient and unnecessary to employ the lamp-man in connection with the single women's compartment. I have of late never done so, as I am of opinion that a little occupation upon such household duties is not only beneficial under the circumstances, but is entirely in accordance with the matron's duties, as laid down in rule 4 of her instructions.

The married women's hospital being full, I was obliged to send a woman into the single women's hospital, where she was attended to by Mrs. Gibson, one of the single women, who, I believe, did receive some assistance from the late matron.

I do not regard these duties as either "onerous or responsible," or to be any departure from the ordinary custom, and I entirely dissent from the statement made in the last paragraph of Miss Chicken's letter.

I have, &amp;c.,

CHAS. H. GIBSON,

Late Surgeon-supt., ship "Orontes."

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir, "Aaron's Exchange Hotel," Sydney, 1 September, 1882.  
May I request that you will be good enough to send me at your earliest convenience Colonial Secretary's Surgeon's summary of the voyage of the ship "Orontes" for amendment as desired by you.

I am, &amp;c.,

CHAS. H. GIBSON,

Late Surgeon-supt., ship "Orontes."

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir, Immigration Office, Sydney, 2 September, 1882.  
In reply to your letter dated the 1st instant, received this day, I forward to you "the Surgeon's report" on the arrival of the ship "Orontes" for specific information, as required by resolution of the Board of Immigration, relative to your reply to question No. 12 of the said report, under the head "Charter-party," viz.:—"Have the conditions of the contract been faithfully observed during the voyage?"

I am, &amp;c.,

GEORGE F. WISE,

Agent for Immigration.

The Surgeon-superintendent, ship, "Orontes," to The Agent for Immigration.

Sir, "Aaron's Exchange Hotel, Sydney," 4 September, 1882.  
I enclose herewith surgeon's report\* on arrival of the ship "Orontes" with explanatory observations, relative to question 12, charter-party.

I have to call your attention to the fact that by my instructions I am invited to freely criticise all the arrangements connected with the service, and to suggest such remedies as I consider necessary to rectify defects wherever they exist. Inasmuch as all the obligations are included within the terms of the charter-party, I conceive that my remarks will be more efficacious when placed under this head than in the journal.

I am, &amp;c.,

CHAS. H. GIBSON,

Late Surgeon-superintendent, ship "Orontes."

\* Sent to Agent-General for the Colony.

## The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 30 September, 1882.

I have the honor to bring under your notice, for the information of the Colonial Secretary, certain statements made by Dr. Gibson, late Surgeon-superintendent of the ship "Orontes," to which statements I submit that the Agent-General's attention should be specially directed.

The surgeon's report, on arrival of a ship with immigrants is required to be forwarded by him to the Agent-General, and a duplicate copy is required to be handed to the Agent for Immigration. One of the printed questions to which the surgeon is required to reply is, "Have the conditions of the contract been faithfully observed during the voyage?" Dr. Gibson replied to this as follows, "Yes; so far as the owners of the ship and their servants are concerned. The conditions of agreement under which I accepted office and which are embodied within the four corners of the charter-party, have in my judgment been violated by the Agent for Immigration, and the late matron, Miss Chicken."

Upon presenting this document to the Board of Immigration, the chairman required that Dr. Gibson should make a specific charge and should explain in what way the Agent for Immigration had violated the charter-party.

A few days afterwards Dr. Gibson forwarded an amended report as follows:—

"Regarding however that portion of the voyage since the arrival of the ship, and before the obligations had terminated, I would fail in my duty did I not urge my strongest protest against the language addressed to the immigrants by the Agent for Immigration. It is subversive of discipline, calculated to prejudice the respect and authority of the captain and Surgeon-superintendent, and disparage their position.

"The evil effects of lowering the position of the captain and surgeon are by no means confined to this Port, but according to my experience lead to considerable disorder and insubordination on the outward voyages, as the emigrants at home are doubtless advised by their friends in the Colony as to this practice.

"I would also protest against the matron's journal being applied to any other use than that to which it is intended by the Agent-General (6th rule Matron's Instructions), also sections 17, 18, and 34 of the charter-party."

In reply to the surgeon's statement that the language addressed by me to the immigrants is subversive of discipline, &c., &c,—

I positively deny the truthfulness of this assertion, and am sure that every member of the Board of Immigration, one or more of whom are generally present when I address the immigrants, would confirm what I say. The purport of my speech addressed to the immigrants collectively is to inform them that I am the representative of the Government; that it is my pleasure as well as my duty to afford them every information and assistance in advising as to their future plans; that should they remain on board the ship, which they are at liberty to do for some time, they must obey the orders of the captain and of the Surgeon-superintendent exactly as they have done during the voyage; that the Board of Immigration require to be informed by themselves as to their treatment during the voyage, and any complaints then made will be investigated by the Board. If at any time any complaint were made to myself individually (which however I do not remember ever to have been the case) I should decline to receive such, and should refer the complainants to the Board of Immigration.

I think it right to note that the usual form of proceedings, when examining immigrants, has been that the chairman says to each individual immigrant, "Have you any complaint to make of your treatment during the voyage?" And occasionally add, by way of eliciting a definite reply, "Have you any complaint to make against either the Surgeon-superintendent, the captain, his officers, or the matron?" For if so such complaint should be now made that an immediate investigation may be held.

I am absolutely at a loss to understand what the surgeon can intend to convey in the statement made against myself, or in what manner he can connect any address made by me to the immigrants with the "conditions of the contract having been faithfully observed during the voyage."

Referring to Dr. Gibson's protest relative to the matron's journal he directs attention to a certain rule stated by him to be in her instructions, also to certain clauses in the charter-party; these references are absolutely valueless, as in neither one nor the other is any direct or indirect allusion made to the matron's journal nor is her journal alluded to either in any clause of the charter-party or in her instructions. The matron is required by clause 6 of her instructions to keep an account of the materials issued by her, and of the articles of work returned to her by the single women, and on receiving her appointment in England, a book entitled "Matron's Journal" is handed to her with instructions that she is to keep a written daily record of events, which journal is subsequently forwarded to England for the information of the Agent-General. This journal has, on various occasions afforded valuable information as to the discipline observed during the voyage.

The original document to which this letter refers having been forwarded by Dr. Gibson to the Agent-General I respectfully urge that a copy of this letter may also be forwarded to Sir Saul Samuel.

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

We fully endorse all that the Agent for Immigration has stated with regard to his customary address to the immigrants, and we certify that on many occasions we have heard Mr. Wise address the immigrants on board the ships; such addresses cannot by any ingenuity be construed into a reflection on the surgeon or the captain, or in the least degree as subversive of their influence and authority.

JOHN F. SHERIDAN, D.D., V.G., for 19 years member of the Board of Immigration.

S. WILKINSON, upwards of 5 years do. do.

J. MILBOURNE MARSH, for 5 years do. do.

So far as regards the "Orontes," the only ship on board which we have heard Mr. Wise address the immigrants, we endorse the statements that the sweeping charges made by Dr. Gibson are not justified, but at the same time we desire to say that we consider that the stereotyped formula of questions which it has been the custom to put to the immigrants is not a good one.

CHARLES K. MACKELLAR, M.B., Chairman of the Board of Immigration, appointed July, 1882.

ALFRED H. STEPHEN, M.A., appointed a member of the Board of Immigration, April, 1882.

The

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir,

"Exchange Hotel," Sydney, 6 September, 1882.

I am surprised that I have not heard the result of the inquiry *re* Matron's case, as I was informed by the chairman, Mr. Dean Sheridan, that the decision of the Board of Immigration would be communicated to me without unnecessary delay.

I would also like to know on what day it will be convenient to arrange about the vouchers for the payment of the gratuities, and when my certificate will be prepared.

I am, &c.,

CHAS. H. GIBSON,

Late Surgeon-superintendent, ship "Orontes."

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 6 September, 1882.

In reply to your letter of this day's date, requesting to be informed of the decision of the Board of Immigration in reference to the late investigation relative to your charge against the matron, Miss Chicken, I beg to inform you that the decision of the Board of Immigration, together with copies of evidence taken before the Board, has been forwarded to the Honorable the Colonial Secretary for his approval, and until reply thereon is received by me I have no authority to communicate such decision to yourself.

It is also requisite that I should receive authority from the Colonial Secretary before the gratuities are payable.

I am, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 13 September, 1882.

Referring to my communication dated the 6th instant, in reply to your letter of the same date, I have this day received the approval of the Honorable the Colonial Secretary to the report relative to the arrival of the ship "Orontes."

I am now therefore able to inform you of the decision of the Board of Immigration, as the result of the investigation which was held in consequence of your having suspended Miss Chicken from her duties as Matron. It is as follows:—

It was unanimously agreed that,—“Considering the admitted good conduct of the matron during the voyage, we are of opinion that the Surgeon-superintendent was too hasty in visiting so severely this one act of disobedience to his commands, and therefore, without censuring him, because he undoubtedly under rule 9 is the ultimate authority, we recommend that the matron be paid her gratuity, and we see no reason why she should not be continued as a permanent matron.

“C. K. MACKELLAR, M.B., Chairman of the Board of Immigration.

“JOHN F. SHERIDAN,

“ALFRED H. STEPHEN, M.A.

“GEORGE F. WISE.”

A further communication will be made to you so soon as the Treasury has deposited to my account the required sum to pay the several gratuities.

I am, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Agent for Immigration to The Surgeon-superintendent, ship "Orontes."

Sir,

Immigration Office, Sydney, 15 September, 1882.

Referring you to my letter of the 1st instant, I have this day been informed that the money for the gratuities has been paid to the credit of my public account; the gratuities, therefore, to yourself and officers of the ship are now payable.

I am, &c.,

GEORGE F. WISE,

Agent for Immigration.

The Surgeon-superintendent, ship "Orontes," to The Agent for Immigration.

Sir,

Sydney, 13 September, 1882.

As my engagements prevent my longer waiting here for the money due for my services as Surgeon-superintendent of the ship "Orontes," I have appointed Mr. Charles A. Laurence (of Messrs. Stephen, Laurence, and Jaques) my attorney, and he has my full authority to sign all vouchers and to receive all moneys due me by your Department, and I have the honor to request that you will respect the authority I have given him, and his receipt on my behalf will be your full and complete discharge.

I have also to request that you will hand to Mr. Laurence the usual surgeon's certificate for presentation to the Agent-General in London.

I am, &c.,

CHAS. H. GIBSON,

[Late Surgeon-superintendent, ship "Orontes."

The Agent for Immigration to The Principal Under-Secretary.

Sir,

Immigration Office, Sydney, 8 September, 1882.

The Second Report of the Royal Commission (printed 30th August, 1882) appointed to inquire into and report on the management of the Quarantine Station has only this day been seen by me.

2. The whole tenor of the evidence given thereon by Dr. Gibson, formerly Surgeon-superintendent on board the ship "Camperdown," and recently holding the same position on board the ship "Orontes," reflects so seriously on the management and conduct of the Agent for Immigration during the period that the ship "Camperdown" was in quarantine that I feel myself bound, without delay, to bring under the immediate notice of the Honorable the Colonial Secretary certain special statements made by Dr. Gibson.

3.

3. Replying to question No. 4, as printed in that report, Dr. Gibson states, "I had actually to caution the Agent for Immigration that if any deaths occurred in consequence of the neglect to supply the necessary comforts I should advise a Coroner's inquiry." This statement, although given on oath, is absolutely false. Again, in reply to question No. 48, Dr. Gibson says:—"On one occasion I told Mr. Wise that if one of those people died for want of medical necessaries I would not give a medical certificate, but would require the Coroner to make an inquiry." This statement is equally false, for, as the ship was in quarantine, Dr. Gibson could not have had, and did not have, any verbal communication with me.

4. I have appended herewith a transcript of the actual and only letter, dated June 30, 1880, received by me from Dr. Gibson, which I have placed in juxtaposition to the letter handed in by him to the Royal Commission, which he states he addressed to me (see copy of letter in appendix of Report, page 8); and I submit that as this latter letter has in fact no official existence in my Department his designedly wilful misstatement requires no further comment at my hands.

5. I respectfully request that when forwarding to the Agent-General the Report of the Royal Commission, a duplicate of this letter and of its enclosure may also be forwarded, and that the special attention of the Agent-General may be diverted to Dr. Gibson's extraordinary statements.

I have, &c.,

GEORGE F. WISE,  
Agent for Immigration.

See Appendices  
A and B at foot.

#### APPENDIX A.

Copy of the only letter received by the Agent for Immigration from Dr. Gibson, dated June 30, 1880.

Ship "Camperdown,"

Sir, Watson's Bay, June 30, 1880.

I have to inform you that the castor-oil and juniper arrived this morning, and that I have called Dr. Foucart's attention to the importance of my request for medicines being more promptly attended to in future.

The vegetables to-day were deficient to the extent of 26 lbs., and 60 lbs. of the potatoes (this morning's supply) were softened and semi-rotten. Kidman's representative was present at the examination, and is quite satisfied as to the matter. I append requisition.

I am, &c.,

CHAS. H. GIBSON,

Surgeon-supt.

Required for the use of the immigrants:—Six (6) fresh eggs; syrup of squills, 1 pint.

C. H. GIBSON,

Surgn.-supt.

#### APPENDIX B.

Copy of letter, dated June 30, 1880, purporting to have been addressed to the Agent for Immigration by Dr. Gibson, in support of his sworn evidence before the Royal Commission to inquire into the management of the Quarantine Station.

Ship "Camperdown,"

Sir, Watson's Bay, June 30, 1880.

I beg to inform you that the castor-oil and juniper arrived this morning. I have called Dr. Foucart's attention to the importance of my request for medicines being more promptly attended to in future.

*If I have a case, and I honestly believe that life has been prejudiced by the non-arrival of medicines requisitioned for, I shall decline to give a certificate, and advise the Coroner to hold an inquiry.*

For the future Dr. Foucart will countersign all my requisitions. Vegetables again deficient to-day, 25 lbs. 60 lbs. of potatoes (to-day's supply) were rotten and unfit for food.

I am, &c.,

C. H. GIBSON.

## IMMIGRATION.

(SHIP "NORTHAMPTON.")

---

*Ordered by the Legislative Assembly to be printed, 2 November, 1882.*

---

RETURN laid upon the Table of this House by the Colonial Secretary, in answer to Mr. Abigail's Question, No. 4, of the 27th October, 1882, showing,—

- “(1.) The number of Immigrants who arrived by the ‘Northampton.’
  - “(2.) The names of the single men, their nationality, and religious classifications.
  - “(3.) The same with reference to the single women.
  - “(4.) The like information about the married people.
  - “(5.) How many were nominated by friends in the Colony.
  - “(6.) Under what regulations were they brought out.
  - “(7.) What will be the cost to the Colony per head of these Immigrants?”
-

## No. 2.

## SINGLE MEN PER SHIP "NORTHAMPTON."

IN consequence of the Immigrants having been landed from the wrecked ship on Saturday evening last, the examination which is always made on board the ship was necessarily arranged to be taken at the Immigration Office. Nineteen of the single men against whose names a \* is affixed failed to report themselves to the Board; their religious classification cannot therefore be accurately given. It is, however, believed that of these men 13 were Roman Catholics and 6 were Protestants; they are so classified in the Summary.

## NEW SOUTH WALES.

**POLICE DEPARTMENT.**

(REPORT FOR 1881.)

Printed in accordance with Resolutions of both Houses of Parliament.

## The Inspector General of Police to The Principal Under Secretary.

Sir, Police Department, Inspector General's Office, Sydney, 19 January, 1882.

In compliance with the Colonial Secretary's instructions, I have the honor to submit my annual Report on the working of this Department for the year 1881.

Accompanying will be found the usual statement of the distribution of the Force.

During the past year 188 new appointments have been made to the Force, to provide the complement of men voted by Parliament, and to supply vacancies created as under:—

Resignations	...	...	...	...	...	94
Discharges	...	...	...	...	...	24
Dismissals	...	...	...	...	...	24
Deaths	...	...	...	...	...	5
Superannuations	...	...	...	...	...	23
Total	...	...	...	...	...	170

Though the number of resignations is greater than in the previous year, the above table exhibits an improvement as regards dismissals for misconduct, which have decreased by nearly one-half.

Four police pensioners died during the year, whose pensions amounted in the aggregate to £251 14s. per annum.

Nine members of the Force have been pensioned, at a total annual charge upon the fund of £716 17s. 8d. per annum, and gratuities amounting to £1,490 13s. 4d. have been awarded to ten constables under fifteen years' service, but certified to be unfit for further police duty.

A sum of £700 19s. has been granted from the Police Reward Fund, in gratuities to six widows of members of the Force.

Police Stations have been formed at the undermentioned places:—

District.	Station.
Metropolitan	Summer Hill.
Northern	Ben Lomond. Copmanhurst. Coraki.
Southern	Bowning.
Western	Cudal. Mount McDonald.
North-western	Carroll.
South-western	Milperinka & Granite. Lake Cudgellico.
Eastern	Rookwood. Springwood. Robertson.
North-eastern	Frederickstown. Bungwall Flat.
Murray	Quarries.

The Estimates for this year have provided for an increase of sixty men; but considering the very numerous demands for new stations in the country, and the rapid extension of the Metropolis, the increased force will not adequately meet the growing requirements.

The prosperity of the country, the facilities for procuring employment on the Gold-fields, Railways, and elsewhere, result in making it extremely difficult to procure the services of eligible candidates for the Police Service.

My duties have kept me so closely engaged in Sydney that I have not had the opportunity of travelling very much during the year, but in such districts as I have been able to visit I have found the police at all the stations in very efficient working order, and I am constantly assured by the Magistracy and others that the character for efficiency which the Constabulary has earned is being fully maintained.

It is gratifying to be able to record that serious crime has steadily decreased throughout the Colony, but there has been no improvement in regard to the prevalence of minor offences,—I especially refer to intemperance, and the riotous and obscene conduct which so commonly follow the former vice. That legislation will be necessary to check this growing evil each year's experience tends to confirm; and I earnestly hope that the subject will receive the consideration it deserves during the next session of Parliament.

A beneficial effect may be expected to result from the alteration in the law for regulating public-houses, though sufficient time has hardly elapsed to admit of the effect of the new Act being tested.

In administering the law dealing with disorderly offenders, it would have a more salutary effect if imprisonment was more generally inflicted without the option of fines; the latter are as a rule always paid, being frequently subscribed by the offender's associates, and thus punishment is evaded.

When such offenders are sent to gaol it should be made a punishment—not simple incarceration. It would be better to revert to the treadmill than to be without means of punishment altogether, but I believe that the only thoroughly efficacious means of suppressing what has become a serious public nuisance and a social blot will be the application of the lash to incorrigibles.

The Press, in dealing with such topics, usually point, as an "obvious remedy," to the necessity for increased police supervision; but on occasions such as public holidays, when places of public resort are thronged by people of all classes, three times the number of police available would not be too many to distribute, to ensure perfect decorum and good order.

The prevalent habits of dissipation, intemperance, and immorality amongst a certain class of young persons is a very grave matter, but in my opinion the remedy must be sought for apart from the action of the police.

In analysing as usual the causes which have led to sudden and violent deaths, the subject of Inquests and Magisterial Inquiries, I find that 13 per cent. of such deaths for the year were attributable directly or indirectly to intemperance.

The arming of the Mounted Police with the new weapons, carbines and revolvers, has been completed, adding greatly to the efficiency of the Force in that regard.

As a whole the conduct of the members of the Force has been excellent, though a Force of twelve hundred men cannot be expected to be free from ignorant, hasty, and ill-conducted members; the proportion, however, is so small that I think the exceptions to the rule of good conduct might reasonably be expected not to evoke the ill-natured comments by the Press which so generally follow any act of misconduct on the part of a policeman.

Though it is a rule of the Service not to make the Press a medium of defence from unfounded aspersions upon members of the Force, I very carefully investigate all charges, whether made in the newspapers or otherwise, against any member of the Force, and in the majority of instances the refutation is complete and satisfactory.

The services of the Metropolitan Police have been largely availed of during the past six months in connection with the Small-pox epidemic. These extra duties have been performed in a manner to call for the deserved commendation of the authorities. Members of the Force who have not had the disease of small-pox have as far as practicable been vaccinated or re-vaccinated.

Owing in a measure to the low market rates for forage, and also to the economy observed by the officers of the Department having the control of the expenditure, there will be a saving of several thousand pounds on the Contingent Vote for the year. The exact amount cannot be stated, as all claims have not yet been rendered.

I have the honor to be,

Sir,

Your most obedient servant,

EDMUND FOSBERY,

Inspector General of Police.

---

## REMOVAL OF POLICE FROM CLARENDON.

No. 1.

### Minute by Colonial Secretary.

MEMO. for the Inspector-General.—Mr. Forster has again complained in the Assembly at the withdrawal of police from Clarendon, in his district, and he alleges that disorder has arisen in consequence.—H.P.

The Inspector-General of Police, B.C., 23/11/81.—C.W.

Further police reports submitted to the Colonial Secretary herewith. I can see no necessity whatever for a police station being re-established at Clarendon.—EDMUND FOSBERY, I.G.P., B.C., 25 Nov., 1881. The Principal Under-Secretary.

[Enclosures.]

Telegram from Inspector-General of Police to Captain Battye.

Sydney, 23 November, 1881.

MR. FORSTER stated in Parliament disorder arisen at Clarendon, consequent on withdrawal of police. Make inquiries and report at once; also if any reason for station being re-formed.

Telegram from Captain Battye to Police, Junee.

Albury, 23 November, 1881.

REPORT by mail me direct to-morrow if any disorder has come to your knowledge at Clarendon; if so, give particulars.

Telegram from Senior-constable Rowe to Sub-Inspector of Police, Wagga.

Junee, 23 November, 1881.

Re your telegram, no crime or disturbance of any description has been reported to me from Clarendon since Constable Gorman's removal.

Memo. to Inspector-General of Police.

Police Department, Superintendent's Office,

Murray District, Albury, 24 November, 1881, 2 p.m.

IN reply to your telegram of yesterday, I forward reports from Mr. Sub-Inspector Casey and Senior Constable Rowe, just received, and beg to inform you that no disorder whatever has come to the knowledge of the police as having occurred at Clarendon since withdrawal of constable—in fact it is an extremely quiet neighbourhood. I have no reason to alter my opinion that a police station there is unnecessary.

E. M. BATTYE, Capt.,  
Superintendent.

Sub-Inspector Casey to Captain Battye.

Police Station, Wagga, 24 November, 1881.

I have to report for your information that no crime or disturbance of any kind has been reported from Clarendon or its vicinity since my last report. I attach a telegram from Senior-constable Rowe, of Junee Station, distant only 12 miles from Clarendon, showing that no reports have been made to the Junee police.

This continued agitation for a station at Clarendon is set in motion by a few persons who are interested in Clarendon keeping up its importance. I do not think there is any sufficient reason for the re-formation of the station at Clarendon.

Junee Station has been short-handed for some time, in consequence of which the usual patrols from that station to Clarendon have not been performed.

WALTER C. CASEY,  
Sub-Inspector.

A correspondent of the *Gundagai Times*, writing from Clarendon, states that recently Sub-Inspector Casey, of Wagga Wagga, visited that township apparently for the purpose of furnishing a report to the Inspector-General in regard to the withdrawal of police protection from there. Our correspondent complains that Mr. Casey lacks the local knowledge necessary to enable him to come to a correct conclusion, and suggests that the matter should be placed in the hands of Senior-sergeant Carroll, who has an intimate acquaintance with the locality. [Of course the Gundagai people would like Sergeant Carroll to be made a Sub-Inspector, but while he is a subordinate officer we fail to see how he could possibly be sent to undertake the Sub-Inspector's duty. Sergeant Carroll may be a good officer, but is there any one who will say he is fitted for the position he no doubt seeks, and which the Gundagai people would like to see him fill?—Ed. *W. W. A.*]

At a meeting of the Albury Municipal Council held last Thursday, it was decided to invoke the assistance of the local members of Parliament to cause the Tumberumba Railway to proceed by way of Germanton from Culcairn, instead of direct from Wagga Wagga to Tumberumba.—*W. W. Advertiser*, 22/11/81.

Senior Constable Rowe to Captain Battye.

Police Station, Junee, 23 November, 1881.

Senior-Constable Rowe begs to report, for the information of his Superintendent, in reference to the attached telegram, that no crime, disturbance, or disorder of any sort has been reported to him from Clarendon since Constable Gorman left that place. The Senior-Constable begs to state that he passed through Clarendon twice on the 15th instant, and stayed the night at Bishop's Clarendon Hotel on the 17th and 22nd instant. Everything was then quiet, and nothing whatever was reported to the Senior Constable as having previously taken place. The reason Senior-Constable Rowe has been so much lately at Clarendon is he has been in search of three offenders for stealing cattle from Mr. John Jenkins, of Nangus, in the Gundagai Police Sub-District. The Senior Constable also states he has arrested one of the three offenders referred to, and hopes to get the other two in a short time. Senior Constable Rowe is sure that had any disturbance or crime taken place at Clarendon it would have been reported to him when at that place.

GEORGE ROWE,  
Senior Constable 2372.

No. 2.

## No. 2.

W. Forster, Esquire, M.P., to The Colonial Secretary.

Sir,

Sydney, 17 July, 1882.

I have the honor to bring under your notice what appears to me and others the very great injury done to public interests, as well as to the interests of residents in the locality, by the removal and absence of police from Clarendon, in the Electoral District of Gundagai, which I have the honor to represent, and accordingly to refer you for further information on the subject to a letter which I have this day written to the Minister of Justice.

I have, &amp;c.,

WILLIAM FORSTER.

The Inspector-General of Police. B.C., 20/7/82.—C.W.

Memo.—Referred to Capt. Battye, in connection with previous papers.—E.F., Police Department, Inspector-General's Office, Sydney, 2/8/82. Capt. Battye. Forwarded to Mr. Casey, for a report from Senior-constable King, what sheep-stealing cases have been reported to him and not reported by him and what petty offences have come to his knowledge at Clarendon.—E.M.B., Capt., 4/8/82. Senior-constable King, for further report.—WALTER C. CASEY, Sub-Insp., 4/8/82. Senior-constable King, June.

## No. 3.

W. Forster, Esquire, M.P., to The Minister of Justice.

Sir,

Sydney, 17 July, 1882.

I do myself the honor to urge, as strongly as may be in my power, upon your immediate attention and earnest consideration, the great public necessity for local police at and in the neighbourhood of Clarendon, in the Electoral District of Gundagai, which has long been the subject of remonstrance and representation from the parties directly concerned, both to myself and to the Government; indeed, ever since the removal, about a year ago, of the policeman formerly stationed at Clarendon. But the subject has been of late still more strongly impressed upon me during a late visit to the district in my capacity of Member.

As already suggested, what is asked for is in fact only a restoration of a state of things which existed formerly. I have satisfied myself by closer inquiry that the removal of the policeman from Clarendon was ill-advised, and that it has been injurious to the peace and good order of the locality, as well as the interests of justice and the public generally. There can be little doubt, I have reason to believe, that the course taken was founded on partial and imperfect representations and inadequate investigation. It is apprehended that at least one policeman, to whom it is understood the matter was referred, may have a personal interest in preventing the location of police at their former station; at any rate, I am credibly informed that since the removal, the one public-house of the neighbourhood has been frequently, and especially on Sundays, the resort of disorderly persons, and a theatre for disorderly scenes, while throughout the neighbourhood petty offences have been much on the increase.

In answer to a question of mine in the Legislative Assembly, the Colonial Secretary gave as an ostensible reason for refusing to restore police to Clarendon, that no crimes were committed in that locality. But I have the honor to submit that such a statement would almost appear to hold out an encouragement to the inhabitants to commit crime, in order to obtain the benefit of police protection. But from all I have been able to learn the probability is, that whatever petty offences occur are either unknown to or are not duly reported by the police at the nearest station. Of these petty offences, the one most complained of is sheep-stealing, which is greatly favoured by the character of the district, and by the absence of police vicinity or protection.

I have accordingly the honor to express my hope that you will feel it your duty to impress upon the Government the necessity of restoring police to Clarendon, and more especially to move the Colonial Secretary towards that object.

I have, &amp;c.,

WILLIAM FORSTER.

Inform Mr. Forster that inquiry will be directed to the irregularities connected with the public-house at Clarendon. Communicate extract to the I. G. of Police. Inform Mr. Forster that this letter and another of same date are forwarded to the Colonial Secretary's Department, to which they relate, and let this be sent accordingly.—W.J.F., 19/7/82. Mr. Forster, M.P., and I.G.P., 20/7/82.

The Under-Secretary, Colonial Secretary's Department.—B.C., 24th July, 1882.—W.E.P. The Inspector-General of Police, with reference to previous papers. B.C. 31/7/82.—C.W.

## No. 4.

The Under-Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 20 July, 1882.

I am directed by the Minister of Justice to forward for your information the enclosed extract from letter from Wm. Forster, Esq., M.P., calling attention to irregularities connected with the public-house at Clarendon.

I have, &amp;c.,

W. E. PLUNKETT,  
Under Secretary.

[Enclosures.]

Extract from letter from William Forster, Esq., M.P., dated 17 July, 1882.

"At any rate I am credibly informed that since the removal [of police] the one public-house of the neighbourhood has been frequently, and especially on Sundays, the resort of disorderly persons, and a theatre for disorderly scenes, while throughout the neighbourhood petty offences have been much on the increase."

Referred to Capt. Battye for report.—E.F., 21/7/82. Referred to Sub-Insp. Casey.—E.M.B., Capt., 23/7/82.

Senior

## Senior Constable King to Sub-Inspector Casey.

Police Station, Junee Junction, 26 July, 1882.

Re the attached papers, Senior-constable King reports, that from the time he came to Junee to the present he never received any report or heard of any crime being committed either at Clarendon, Wantabadgery, or Eurongilly, or in any portion of that district, in fact, his opinion is that the said portion of the district is very quiet. During his time here the police have visited Clarendon public-house on three occasions, and on each occasion found everything very quiet. And they visited Wantabadgery public-house twice, and it was also remarkably quiet.

There are only two men stationed here, namely, the Senior-constable, mounted, and one foot man, who attends the trains. Had there been another mounted man here, Clarendon and Wantabadgery portion of the district would be oftener visited by the police.

As to any disorderly conduct or irregularities in either of the above-mentioned houses, he has never heard of, though he frequently sees several persons from that portion of the district at Junee Junction, and they have never brought anything regarding the matter under his notice. In conclusion, he begs to state that he has also visited other parts of the Clarendon district on other occasions, and heard nothing as to any crime being committed.

MICH. KING,  
Senior-constable.

Police Station, Wagga Wagga.

FOR the information of the Superintendent. I have just returned from Clarendon. I cannot hear of any crimes having been committed, hardly a case of petty larceny, and I believe the public-house at Clarendon is well-conducted, but it is not in my district.

WALTER C. CASEY,  
Sub-Inspector.

Capt. Battyc, Albury, 13/8/82.

Police Office, Wagga, 25 July, 1882.

SENIOR-CONSTABLE King will at once furnish a report on this matter:—Have any reports or crime or disorder at Clarendon reached the Senior-constable? He certainly has not forwarded the reports to this office. The Senior-constable will also report how many times he has been at Clarendon, Eurongilly, and Wantabadgery since he has been stationed at Junee.

WALTER C. CASEY,  
Sub-Inspector.

S. C. King, Junee.

Police Department, Superintendent's Office, Albury District, 23/7/1882.

FOR report by Senior-constable King, as to whether any such disorderly scenes have come to his knowledge.

E. M. B., Capt.

Mr. Cascy, Wagga.

## No. 5.

## The Under-Secretary of Justice to W. Forster, Esq., M.P.

Sir,

Department of Justice, Sydney, 20 July, 1882.

In acknowledging the receipt of your letter of the 17th instant, calling attention to the necessity for local police at Clarendon, and the irregularities connected with the public-house there, I am directed by the Minister of Justice to inform you that inquiries will be made into these matters, and that your communication of above date, and another of same date, have been forwarded to the Colonial Secretary, to whose Department they relate.

I have, &c.,  
W. E. PLUNKETT,  
Under-Secretary.

## No. 6.

## The Principal Under-Secretary to W. Forster, Esq., M.P.

Sir,

Colonial Secretary's Office, Sydney, 20 July, 1882.

In acknowledging the receipt of your letter of the 17th instant, relative to the withdrawal of police protection from Clarendon, I am directed by the Colonial Secretary to inform you that the matter has been referred to the Inspector General of Police.

I have, &c.,  
CRITCHETT WALKER.

## No. 7.

## The Inspector-General of Police to The Principal Under-Secretary.

Sir,

Police Department, Inspector General's Office, Sydney, 16 August, 1882.

Herewith I submit reports I have received on this matter; Sub-Inspector Casey is a very careful and intelligent officer, and his report may be relied upon. I have never been at Clarendon myself.

Perhaps it would be advisable that Mr. W. Forster should see the papers.

Under the circumstances, and considering the number of outlying districts where police protection is more urgently required, I should not feel justified in recommending the re-establishment of the station at Clarendon, but I will have the place constantly visited by the police.

EDMUND FOSBERY, I.G.P.

B.C., the Principal Under-Secretary. A copy of these reports might be transmitted to Mr. William Forster, M.P., or he might be allowed to see the papers as suggested by Mr. Fosbery.—C.W., 23/8/82. The papers can be sent for Mr. Forster's perusal, with a request that he will kindly return them when read.—H.P., 27/8/82. There is a letter from Mr. Forster now in the hands of Mr. Fosbery to be placed with these papers.—H.P., 30/8/82.

[Enclosures.]

[Enclosures.]

Sub-Inspector Casey to Captain Battye.

Report.—To re-establish a Police Station at Clarendon.

Police Station, Wagga Wagga, 14 August, 1882.

I HAVE to report that I visited Clarendon again on the 9th and 10th instant, and found, as I anticipated in my report of September 13th, 1881, that the diggings on the Wantiol Creek are nearly worked out and almost deserted; the public-house is closed. The small rush in Mr. M'Donald's forest paddock is quite deserted, not a single person being at work there; the reef near Clarendon has been abandoned. I find the population of the district has greatly decreased, and the place generally is of less importance, all the miners having left for other fields, and many selectors have sold out their holdings and gone away.

Not a single case of sheep-stealing has been reported to the police at any of the surrounding stations, viz., Wagga, Junee, Gundagai, or Tarcutta. No doubt many of the sheep-owners have suffered great losses during the late drought; many of their sheep died from poverty and want of water. Clarendon is a remarkably dry part of the country. I saw one owner mustering sheep, and some of the animals could hardly walk, and the men were carrying lambs in front of their saddles. There can be no doubt but that, in such a season as the one just past sheep wander away and die, and when the flocks are counted out of the paddocks the number is short; but I did not hear of one authentic case of sheep-stealing during my tour through the district. No doubt sheep-stealing is often undetected, and frequently the thieves escape conviction, through the carelessness of owners in not looking after their sheep. Stations are worked too cheaply in many cases: things are left to chance, instead of the paddocks being properly looked after by a staff of trustworthy boundary-riders. With regard to the public-house at Clarendon being the resort of disorderly persons and a theatre for disorderly scenes, I am of opinion that Mr. Forster has been misinformed by interested persons. As far as I can learn, the landlord (Mr. Bishop), one of the parties who headed the original petition for police, is a very respectable man, in comfortable circumstances, and a very unlikely person to allow the conduct complained of in his house, which is his own property. It is clean, tidy, and well kept. I have stopped there frequently. The public-house at Wantabadgery is a most wretched place, and is very far from being in accordance with the Licensing Act. Such a place would never have had the license renewed in this district.

In conclusion, I may state my opinion that the many applications for re-establishment of police station at Clarendon are got up by persons who are pecuniarily interested. For instance, one person lost £20 a year by the police giving up the miserable, dirty place they rented from him as a police station. No doubt a policeman at Clarendon would give many of the residents a greater feeling of security, but I cannot conscientiously recommend the re-establishment of the station, in face of the wants of more important places.

WALTER C. CASEY,  
Sub-Inspector.

Senior Constable King to Sub-Inspector Casey.

Police Station, Junee, 10 August, 1882.

*Re* the attached letter from the Honorable Wm. Forster, M.P., and also the Senior Constable's officers' memoes attached. He now begs to assure his officers that from the time he came here on the 23rd February last to the present time no cases of sheep-stealing or any other crime was reported to him, either by squatters, selectors, or any other persons, having taken place in the Clarendon district, and on looking over the occurrence book here for the twelve months previous to his coming here he can find no entry from that district as to any crime being committed there.

No doubt it must have been reported to the gentleman above referred to, but strange to say those parties never reported it to the police here.

As to the public-house mentioned, it is a distance of 12 miles from here, and there was never any disorderly conduct or other crimes reported to the police, as to being carried on at that place. No doubt there may be disorderly conduct carried on there unawares of the police at this station, and there being only the senior-constable mounted and one foot-man here, he, the senior-constable, cannot attend visiting the place regular, but on each occasion he went there the place was quiet, and when there, there had been no crime of any nature reported to him; if so, he would have reported it to his officers in the usual form.

M. KING, S.C.

Forwarded to Inspector-General, 15/8/82.—E. M. BATTYE, Capt., Supt.

No. 8.

W. Forster, Esq., M.P., to The Colonial Secretary.

Sir,

Sydney, 29 August, 1882.

I have the honor, in returning herewith the papers having reference to withdrawal of police from Clarendon, to express my sense of the courtesy shown in permitting me to examine them. But with reference to the subject in question, although I freely admit that many of the statements upon which the application by and on behalf of residents at or near Clarendon for restoration of the police was founded, are contradicted or discredited by the reports of Sub-Inspector Walter C. Casey and of Sub-Inspector M. King, and although I would not for a moment imply that these officers, whose characters I understand are in all respects unimpeachable, would make unfounded statements, I have yet the honor to submit that the decision of a question of this sort, involving as it does not only the suppression or punishment of actual, or prevention of apprehended or probable crimes, but the preservation of order and maintenance of a sense of security of life and property, should not turn altogether on the statistics of disorder or criminal offences, or even upon the number, at any given time, of a fluctuating population. It seems to me that the claims of a locality to police protection ought in great measure to be determined by its comparative and progressive importance, and by its relations and connection with other districts. The presence or absence of police at a certain spot may—indeed must—have its effect more or less on the habits of the people, on the settlement of the country, and on the investment and expenditure of capital and labour. This appears to me more especially the case when application is made, not for a new police station where none existed before, but for the restoration of an old one. The necessity for police must be presumed to have been once felt

and acknowledged, and I fail to perceive in the papers before me any sufficient reason assigned or to be inferred why the police were withdrawn from Clarendon in the first instance. And it is obvious that the inhabitants, after having once experienced the benefits of having even a single policeman on the spot or within easy call, are like to entertain, upon his sudden and to them unaccountable withdrawal, a feeling of defencelessness and insecurity, which even if exaggerated, is not entirely devoid of reason and foundation.

Accordingly, I have further the honor to express my hope that the matter be reconsidered, and with this view, to suggest the advisability of referring to the Magistrates of the district, whether severally or in Petty Sessions assembled.

I have, &c.,

WILLIAM FORSTER.

The Inspector-General, for any remarks he may wish to make.—H.P., 30/8/82. B.C., 30/8/82.  
—C.W.

No. 9.

The Inspector General of Police to The Principal Under-Secretary.

Sir, Police Department, Inspector General's Office, Sydney, 1 September, 1882.

Mr. Forster, M.P., has evidently not been fully apprised of the facts by his constituents at Clarendon. When the station was established there was a large population in the neighbourhood—about 500—and crime was very prevalent, there being no police between Wagga and Gundagai.

The place has, however, greatly decreased in population, and police stations have since been formed at Bethungra and Junee, on the railway line, the former about 17 and the latter 12 miles from Clarendon.

I am satisfied I could name a score of places in remote and isolated positions where police are obviously more urgently required than at Clarendon, but for which I have no men to spare.

Either the Wagga or Gundagai Bench would be the nearest, but I fail to see that the Magistrates there would be able to afford any information on the subject. As a matter of course it would be an advantage to the residents at Clarendon to have a local policeman, and it would be unreasonable therefore to expect that the Magistrates in the district would not recommend it.

EDMUND FOSBERY,  
I.G.P.

Copy of this letter can be furnished to Mr. Forster.—H.P., 4/9/82.

No. 10.

The Principal Under-Secretary to W. Forster, Esq., M.P.

Sir, Colonial Secretary's Office, Sydney, 7 September, 1882.

In reply to your letter of the 29th ultimo, further respecting the necessity for police protection at Clarendon, I am directed by the Colonial Secretary to transmit to you herewith a copy of an additional report on the subject that has been obtained from the Inspector-General of Police.

I have, &c.,

CRITOHETT WALKER,  
Principal Under-Secretary.

## The Inspector of Public Charities to The Colonial Secretary.

Sir,

Office Inspector of Public Charities, 10th May, 1882.

I have the honor to lay before you, in terms of the Act, 30 Victoria, No. 19, my sixth Annual Report on the Public Charities of the Colony which come within my inspection.

The delay in presenting this report is due to the many difficulties and delays I experience each year in obtaining returns, more especially from the Country Institutions.

One of the causes from which these difficulties arise is that each Institution assumes a different date for beginning its financial year and finds itself unprepared to meet the Inspector's requirements.

I had hoped the approval by the Colonial Secretary of a uniform system of accounts, registers and forms for returns for our Hospitals would have led naturally to a correction of the abovementioned irregularity and so have enabled me to obtain returns early in January; results have not, however, answered my expectations.

The system on which the Government Hospital Registers (and the returns based upon them) were framed, though excellent in theory and applicable to large Institutions under Government control, does not appear equally well adapted to the requirements of our country Hospitals, which are generally small Institutions under the direction of honorary committees.

The

The registers seem overweighted with details, and require, I consider, some revision.

While heartily approving the objects they had in view I expressed at the time of their issue my regret that I had not been consulted sufficiently early to recommend more simple forms for the smaller institutions.

Alterations might be made which would satisfy necessary requirements, and make the registers to be more acceptable to the Hospital Committees.

The total public expenditure last year on the Public Charities included within this Report, and without reference to grants made to the Lunacy Department, exceeded the sum of £100,000.

This large and yearly increasing outlay of public money naturally gives rise to the suggestion whether it would not be advisable that an influence and inspection larger and more effective than any the Inspector has hitherto been able to exercise on behalf of the Government should be maintained over the subsidised Charities of the Colony.

There is no necessity for any interference with their management such as would tend to weaken local interest in the various Charities, but the payment of Government subsidies might be made to depend on the Inspector's approval of the methods adopted by Committees in their administration, and especially upon their making prompt and accurate returns to him.

In Victoria the Inspector of Public Charities for a time after his appointment found himself confronted by difficulties very similar to those I have experienced, but the Government removed them by notifying that it would make the payment of its subsidy contingent on the production of the Inspector's certificate approving their accounts and management.

The remedy has proved to be well calculated for reaching Institutions largely dependent upon Government support, and which yet are managed by Honorary Boards beyond Government control. It brings the Inspector and the Committees into nearer relation with each other, lessens jealousy of his inspection, and disposes them to avail themselves of his experience.

Before proceeding to sketch out the principal operations of the past year there are two or three subjects to which I respectfully desire to direct the attention of the Government.

The Deserted Wives and Children's Act does not work satisfactorily.

It is contended that the fact of a woman or child securing the shelter of an Asylum takes away the power to inflict special penalties, and reduces the offence to one merely of debt for maintenance.

The practical effect is that men now often reckon upon the Government not suing, and thus the Act not only ceases to be a deterrent, but points a way how to evade the most sacred social obligations.

An Act is much needed making persons in fair circumstances liable for the maintenance of their infirm and destitute parents in the Government Asylums.

A curious anomaly at present exists in connection with the regulations of these Institutions.

Should a friend of any inmate offer to reimburse the Government for his maintenance the offer is not accepted, but the having such a friend renders the inmate no longer eligible to remain in the Asylum.

There is a class of persons so objectionable in their habits, so wanting in self-restraint, or so affected with special and repellent diseases, that an Asylum seems to be their natural home; when such are eligible through bodily infirmity and destitution the fact of their having friends should not bar admission, but the cost of their maintenance in the Asylum should not fall on Government.

The charities question some short time back engaged much public attention in Victoria.

At the desire of his Government the Inspector of Public Charities of that Colony submitted to it suggestions having for their object the best means for introducing an improved system of State support and supervision.

The absence in this Colony of extended Municipal jurisdiction renders it unnecessary for me to notice that portion of his Report treating of the Country Charities, but as regards the Metropolitan subsidised Charities his suggestions are applicable to our existing circumstances, and may be considered worthy the attention of the Government of this Colony.

He recommended the appointment by Government of four gentlemen, one of whom should be of the Medical profession, to constitute with the Inspector of Public Charities (to be chairman) a Council of Advice, to advise the Government on matters relating to the State supported and subsidised charities, in respect of their management and administration of relief. Any two members of such Council to have like powers of inspection as are possessed by the Inspector.

The advantage of such a Council appears to be that while ultimate decisions still rest with the Government it would be relieved of much trouble in dealing with details, and to a certain extent be protected from any objectionable pressure brought to bear on the administration of the Public Charities.

#### *The Government Asylums for the Infirm and Destitute.*

These Asylums continue to show excellent and economical management.

I would call attention to the overcrowded condition and want of means for classification in the Hyde Park Asylum for females.

The number of inmates still goes on increasing, and I cannot too strongly urge upon Government the necessity for prompt steps being taken to remedy the evils complained of.

The

The rate of expenditure at the George-street, Parramatta, Asylum does not compare favourably with that at the other Government Asylums. A portion of the excess is accounted for by the stock of clothing having been allowed in 1880 to become too reduced and requiring to be made up again, but the whole matter is worthy investigation with a view to improved economy.

The work done at the Erysipelas Hospital and Macquarie-street, Parramatta, Asylum, has been most important and creditable.

Out of seventy-eight cases of erysipelas there were only two deaths.

Cancer, ulcers, tedious cases, infectious diseases, and convalescents from the Sydney Hospital are generally sent to this Asylum, as are cases of consumption to that at Liverpool.

*General Statistics summarised.*

	Asylums at Hyde Park, Liverpool, and George-street, Parramatta.	Erysipelas Hospital <i>cum</i> Macquarie-st., Parramatta, Asylum.
Admissions ... ..	1,483	1,221
Daily average numbers ... ..	1,266	336
Average maintenance cost, exclusive of building ... ..	£12 19s. 4½d.	Gross cost, £13 12s. 8½d.

The average cost per head at the Hyde Park, Liverpool, and George-street, Parramatta, Asylums for maintenance, exclusive of cost of buildings, was last year £12 19s. 4½d.

Gross cost at Hyde Park, £13 2s. 3½d.; Liverpool, £12 15s. 7½d.; George-street, Parramatta, £17 0s. 11d.

Gross cost at the Erysipelas Hospital and Macquarie-street, Parramatta, Asylum, £13 12s. 8½d.

*Hospitals. — Sydney Hospital, late Sydney Infirmary.*

The pressure upon this Institution continued to be very great throughout the year, and but for the recently made extensions to its out-door department, and the opportunities for rapid discharges of convalescents afforded by the excellent hospitals within the Government Asylums, the wants of the community would have been very inadequately met.

Little trouble was experienced from erysipelas developed in the Hospital, the number of cases not exceeding twelve to eighteen. These were at once removed from the wards.

An observation ward for the reception of cases brought in by the police was prepared a short time back.

The payments for paupers admitted under Colonial Secretary's recommendation amounted to £5,148 0s. 3d. Total Government payments for the year to £8,688 5s. 10d.

No payment was made by the Treasury in 1881 on account of the new buildings, but £12,500 was drawn in February of this year for 1881.

*Prince Alfred Hospital.*

Unavoidable delays have occurred in opening this Hospital.

The expenditure and liabilities to completion of present contracts amount to £139,295 13s. 7d.

Payments from the Treasury have been made to extent of £100,000 towards cost of buildings.

A balance remained in the Treasurer's hands on 31st December, 1881, for fittings and furniture, of £2,474 10s. 2d.

*Country Hospitals.*

Statistics of income and expenditure of the Country Hospitals, together with tables showing their operations, accommodation, diseases treated, &c., during the year 1881, will be found in pages 11 to 15.

The returns from these Institutions are more numerous and complete than used to be rendered in former years, but continue in many instances to exhibit carelessness in compilation, rendering much correction and back reference necessary in order to reconcile the statements with one another.

As a rule the Committees of our Country Hospitals, though honest of purpose and containing within them many gentlemen of the highest intelligence, do not give to these Institutions the active supervision required. Too much is taken for granted, or left to the discretion of the superintendent or wardman.

Efficient paid secretaries are much needed, and to secure such men higher salaries might be given; the saving in other expenditure would more than recoup the outlay by securing a better administration.

At Urana a nice little hospital was built and opened last year.

A Hospital has been commenced at Kempsey, and will shortly be ready for use.

The new Hospital at Armidale was nearly completed at the end of last year, and has since been occupied.

The additions and improvements going on at Wagga Wagga, Young, Forbes, and Murrurundi at time of my last report having been completed now render those Institutions equal to the requirements of the districts to which they severally belong.

The hospital at Albury is in a very dilapidated condition, and quite unfitted to meet the demands constantly made upon it. I have addressed the Government on the subject, recommending that a special unconditional grant be made towards the erection of additional wards, &c., &c.

Albury as a Border town is under peculiar disadvantages; its collections are restricted to its own side of the Murray, while it is compelled to admit patients from either bank of the river into its Hospital.

According to the returns the hospital at North Copeland last year had one patient, one death, and an expenditure of £261. The necessity of granting further subsidy at present might be referred to the Police Magistrate of the District.

Reserves for Hospitals in some new inland townships appear to be made with insufficient consideration, being generally either too small in area or placed within the town. One I found adjoining the Public School.

*Juvenile Asylums.*

Whooping-cough and measles were present last year in most of these Institutions; the type, however, was mild, and the general health of the children otherwise good.

*Destitute Children's Asylum, Randwick.*

I have much pleasure in drawing attention to the reduced cost at which this institution was carried on.

The reduction is equal to £5 3s. 10d. on the rate for the previous year, and on the 483 State children under the Society's care represents a saving to the Government of £2,500.

The headings of expenditure under which these reductions have been made are buildings and clothing.

As the Institution is in possession of every appliance and accommodation it can require, the diminution of cost under the first of these headings may be regarded as permanent; whether that under the second will be maintained, or represents merely a great and sudden reduction in the stock in use, yet remains to be seen; in either event the effort of the management is a genuine cause for satisfaction.

The gross cost on the whole number of the children (662 daily average) was £10,992 12s. 4d., yet Government paid the Society in 1881 £14,177 14s. 5d., or £3,185 2s. 1d. more than its expenses.

To the above surplus were added the public subscriptions, interest on invested funds, and the payments received from parents towards maintenance cost of children admitted direct into the Asylum.

The policy of any charitable institution being aided by Government grants (intended only to meet current expenditure) to thus accumulate a Reserve Fund, is a matter for Government and the Parliament to decide, but I would fail in my duty were I to omit calling attention to the above circumstance.

*The Benevolent Society's Asylum.*

Special precautions against the introduction of infectious diseases, to which this Institution is at all times peculiarly liable from the fact of its being a Receiving House, were adopted during the time small-pox existed in the City. Happily these precautions were attended with the desired effect.

The Board of the Society made several applications to Government during the year with a view to a decision as to the question of removing the Institution from the present site.

In accordance with public opinion an honorary consulting Medical Staff has been appointed.

*State Children's Relief Board.*

The Boarding-out Society having become merged into a Government Department; the work of placing children in homes, which for a time had been suspended, was resumed in October, and by the 31st December ninety-one children had been thus disposed of with satisfactory results.

The remarks which follow have reference to the Institutions comprised within the second part of my Report:—

I have the honor to address them to you, not merely for your information, but that they may be communicated to the Minister for Public Instruction, under whose Department the Institutions are now administered.

*Industrial Schools.*

Nautical School-ship "Vernon," and Female Industrial School, Biloea.

Both Institutions worked quietly and satisfactorily throughout last year.

The returns give a daily average number of 166 for the "Vernon," and 118 for Biloea, 19 of the latter being little boys below the age of seven years waiting transfer to the "Vernon."

The re-committals last year to Biloea were eleven, a large proportion to the discharges (33) during the same period. It is worthy of inquiry how many of these girls had been brought up in the school, and should the number be found to be considerable it may be assumed that insufficient separation exists between the young children sent to the Institution for protection, and those girls who have been detained there for vicious proclivities.

On board the "Vernon" much good work was done by the boys in refitting spars and rigging. It is in contemplation to allow certain boys from the Industrial School-ship to be received on board the "Wolverene," as a reward for good conduct and intelligence.

*The Orphan Schools.*

During the past two years a slight decrease is noticeable in the numbers of the children at both Orphanages.

In the case of the Roman Catholic Orphan School there is still overcrowding in the dormitories; in fact the maximum number which the Institution is properly able to accommodate is about 275, and every effort should be made not to allow that number to be exceeded.

Large additions to both Institutions have been in course of erection during the past year; extra accommodation to the extent of forty beds will be gained at the Protestant Orphanage, while at the sister Institution the improvements comprise chiefly new officers' and attendants' quarters, domestic offices, stable, &c.

I have again to bear testimony to the excellent provision made for the children in both these Institutions, and to the admirable economy of administration at the Roman Catholic Orphanage.

At the Protestant Orphanage the rate per head seems large; the smaller numbers of the children always place it at disadvantage in any comparison with our other Institutions, but the increased price of provisions and an error in ordering the year's supply of boots raised the cost abnormally last year.

*Mechanics'*

*Mechanics' Institutes, Schools of Arts, and Technical Colleges.*

Reports on the Sydney Mechanics' Institute and its branch, the Technical College, will be found given separately.

The operations of the country Schools of Arts are appended in tabulated form.

I found great difficulty in obtaining the information therein described, but it was at length furnished to me on the Minister of Public Instruction causing it to be notified that on a proper compliance with the Inspector of Public Charities' requirements would be considered all applications for Government subsidy in respect to these institutions.

The Schools of Arts throughout the Colony are I consider in an anomalous position owing to their comparative failure to present date as educational media, and to an evident lack of a directing influence on their behalf exerted by a power outside themselves.

Since last year the subject has acquired additional growth, and in my opinion presses for a determination. I would, if permitted, suggest the advisability of Government nominating a Board of Advice to submit a plan to the Minister. The Science Chairs at the University, the Technical College, and the Scientific Departments of the Government might each be represented on such Board, together with any gentlemen who in the opinion of the Minister might appear specially qualified to advise him on such matters.

There are signs I think already at the Sydney Mechanics' Institute that the work it has undertaken, especially in the Technical Branch, is outgrowing its means, appliances, and capabilities of proper direction, and may require a systematised influence from Government to maintain it in a healthy condition.

I have, &c.,

HUGH ROBISON,

Inspector, Public Charities.

---

GOVERNMENT ASYLUMS FOR INFIRM AND DESTITUTE.

*Hyde Park, Liverpool, and Parramatta, and the Erysipelas Hospital.*

THE good order, cleanliness, and economy of administration exhibited in these Asylums, as well as the excellent character of the relief they afford continue to merit for them my most favourable report.

At the same time it is my duty very respectfully to again call the attention of the Government to the condition of the Asylum for Females at Hyde Park.

The presence of this Institution on the site it occupies may be regarded as only of a temporary character.

At the same time the overcrowding, the unsatisfactory nature of part of the accommodation, the presence of the Immigration Department in the same building with the Asylum, the impossibility of classification or of withdrawing objectionable cases from general observation—in few words, the unfitness of the buildings and premises for their present purpose,—all seem to suggest the necessity of the immediate removal of the Institution and its re-establishment elsewhere under extended and more favourable surroundings.

Although hampered by the above described disadvantages, the success of the management has been decided, and the general health of the inmates as good as could be hoped for.

The contracts for the supply of provisions during the past year were well carried out, notwithstanding the rise in prices of meat and flour.

The average cost per head of each inmate exceeds very slightly that for 1880, as may be seen by reference to the statistics herewith.

During the whole of 1881 the Asylums were full, as well in the summer season as in winter.

Such used not to be the case, but is explainable in part by the increase of our population, and in part also by the facilities now offered for sending aged paupers to Sydney from country districts.

The want of restrictive legislation makes New South Wales peculiarly liable to the intrusion of infirm and destitute persons from the neighbouring colonies.

To meet pressing requirements, the premises at Newington have been occupied temporarily as an out-ward of the Macquarie-street Asylum, Parramatta, thus giving increased accommodation to the extent of 100 beds. No additional staff has been necessary.

	1880.	1881.
The total accommodation in the four Government Asylums for Infirm and Destitute	1,645 beds	1,745 beds
Total daily average number of inmates in the four Government Asylums for Infirm and Destitute	1,566 „	1,602 „

The Erysipelas Hospital and Macquarie-street Asylum continues to render most valuable service as an Infectious Diseases Hospital—a Hospital for Incurables, a Convalescent Hospital, and an Asylum for Infirm and Destitute. The total admissions last year were 1,221. Of these—21 women, 42 men—63 were erysipelas cases, which, with 15 cases remaining from the previous year, made a total of 78 cases treated. Total deaths from erysipelas, 2. As some of the cases were of a virulent type, and the patients in an unsatisfactory state of general health and habit, the treatment may be considered as having been eminently successful.

The management of the Liverpool Asylum is very satisfactory.

The George-street Asylum, Parramatta, exhibits good care and attention on the part of the management, but is carried on at an expenditure higher than at any of the other kindred institutions. The reasons for such difference might form ground for inquiry.

## THE SYDNEY HOSPITAL.

As mentioned in my Report for 1880, this Institution has for some time past been going through a very complicated and trying stage of its career.

During the whole of last year this was the only public Hospital in Sydney to which the Government could give recommendations for admission.

The number of patients treated in the wards exceeded by 114 that for 1880, being 2,726 against 2,612.

The resources of the Hospital were thus taxed to their extreme limits, the discharges having to be made as rapidly as possible.

About eighteen months ago the crowded state of the wards and the continuous stream of applicants for admission caused the Board to largely increase the Out-Patients Department.

More recently it became necessary, in order to gain easier access to the works in progress in connection with the new buildings, to pull down the dispensary and out-patients waiting-rooms.

In the dilemma so occasioned application was made to the Government for the temporary use of the Agricultural Hall.

In it at a comparatively small expense (£500) the Board has constructed a dispensary waiting-room, dispensary surgeons' rooms, and quarters for attendants.

During 1881 the buildings in progress to constitute the future Sydney Hospital have made fair progress. A sum of £18,339 2s. 2d. was expended on the new structure.

The new kitchen and servant's rooms are completed and occupied, and the steam laundry is in a forward condition. It will probably be three years yet before the entire work is finished or the wards ready for occupation.

Consequent on the presence of small-pox in Sydney last year heavy extra demands were made on the nursing staff.

At Government request nurses were sent from this Institution to the Quarantine Station, to the Infectious Diseases Hospital, Little Bay, and to the infected patients at Bega.

The Hospitals at Mudgee and Young were also supplied with trained nurses.

On previous occasions I have remarked on the very small amounts received at this Institution from patients, a considerable proportion of whom I felt convinced might with propriety have been made to contribute towards their maintenance while under treatment.

The sum from paying patients for 1880 was set down as £170 3s.—for 1881 it is stated as being £202 4s. 6d.; but beyond this latter amount there is one of £615 17s. 7d. received from other patients, which appears under the heading of subscriptions.

To raise our Hospitals from the position they now occupy in the public estimation—as being merely a kind of poor-house for the sick—I would suggest that Government require all receipts from patients to be specified separately, and that it notify its willingness to subsidise them £ to £ in the same manner as it now does ordinary subscriptions. In this way a more healthy spirit will be infused into the public mind, the practice of paying for benefits received become general, and in the end the calls upon the public revenue be lessened without jeopardising Hospital interests.

The public attention having been directed to the presence of erysipelas in Hospitals in consequence of events passing in a neighbouring colony, I am glad to be able to state that during the past year the cases in the Sydney Hospital were very few in number, chiefly of an idiopathic form, and attended with no bad results. As soon as erysipelas is indicated it is the custom when the condition of the patients allows to discharge him at once to the Erysipelas Hospital, and when such a course cannot be adopted to remove him to the isolated hut. On the erysipelas being overcome the patient is not again admitted to the wards till after having been sent away from the Hospital for a short time and on examination is found quite free of the disease.

## PRINCE ALFRED HOSPITAL.

THE following is a report upon the progress made towards the completion of the Prince Alfred Hospital, and upon its financial position, on the 31st December, 1881:—

The plan of the Hospital remains as last reported on. Two pavilions, designed to contain 156 beds, have been completed, and only await the necessary furniture, most of which is in a forward state. Some disappointment has been occasioned by a large shipment of horsehair having proved of very inferior quality; other, however, is being substituted by the shipper, at his own expense, and is expected to arrive by the time the Hospital will be ready for opening.

The kitchen, laundry, and mortuary buildings; the infectious wards and one gate lodge are completed, and the steam-power washing and drying machinery for the laundry, as well as the steam cooking apparatus for the kitchen, are being put together with all convenient speed.

That portion of the administration necessary for the immediate organization of the Hospital is making good progress; but, as the contract time does not expire till the month of May, 1882, the Directors cannot calculate upon its earlier completion.

The question of drainage has been satisfactorily solved by the completion by the Government of a tunnel running under the University hill and connected with the City Sewage Works. The surface and subsoil drains within the Hospital grounds have been found to work well, and a Committee of the Legislative Council has reported most favourably upon the sewage and drainage schemes of the Hospital generally.

The front administration block and the ophthalmic and operative blocks, involving a cost of £36,250, are being proceeded with; but, as the contract time for these buildings does not expire till the middle of 1883, arrangements have been made for dispensing with their use during the first year of the working of the Hospital.

The grounds, where not interfered with by the building operations still in progress, have been laid out and planted.

The Hospital will be ready for use on completion of that portion of the administration block referred to in paragraph 3. The

#### SICK CHILDREN'S HOSPITAL, GLEBE.

A DESCRIPTION of this Institution and its object was given *in extenso* in my report for 1880. They may be summarised as follows:—

The hospital contains four wards, and has accommodation for forty children—twenty males and twenty females.

There are in addition detached wards for the treatment of any infectious or contagious forms of disease which from time to time may arise in the wards, but infectious cases are not knowingly admitted.

The management is by a Board having both ladies and gentlemen on its Committee.

The administration and nursing is carried on by a trained staff of ladies, under the direction of a Committee as regards domestic routine, and of an honorary medical staff in matters connected with the treatment of the patients.

The admission ages for patients is between eighteen months and twelve years.

A rule of the Institution requires that relatives shall pay towards the cost of maintenance of patients, according to their ability.

No case proper for treatment is however refused on pecuniary considerations.

#### Statistics, 1881.

Cases brought forward from 31 December, 1880 ... ..	15
Admissions, 1881 ... ..	64
	79
Discharges, 1881, cured or relieved ... ..	37
Incurable or removed ... ..	14
Deaths ... ..	3
	54
Remaining in Hospital 31 December, 1881 ... ..	25

Showing as compared with the previous year an increase in the year's operations of 24 cases.

The usefulness of a Children's Hospital must not be estimated alone by the number of the patients passing through its wards.

It is necessary to bear in mind the classes of disease usually found in such Institutions, a large proportion, consisting of diseases of the bones and joints, requiring time to develop the effects of the medical treatment employed.

Many of the cases are of long standing, or of an aggravated form, such, in fact, as have already caused their discharge from other hospitals or wearied out the patience of friends.

Satisfactory evidence of healthy action on the part of the Committee and of appreciation of the services rendered by the Institution is to be found in the sum £174 7s. 6d. received from parents of the children for maintenance cost.

For convenience and economy of space the Medical Return of diseases treated is placed with those of the country Hospitals, page 15.

The cases under class I Zymotic,	were 7, deaths 1.

"    "    V Violence,	" 5, " ...
	79
	3

The administration of the Institution is of a high order, the accommodation very superior, and the appliances, both hospital and for ensuring the comfort and happiness of the little sufferers, most complete.

A greater number of children would be made participants of the benefits here offered were the Institution better known, and did not the high reputation of its operating staff, and the eleemosynary character of the charity there dispensed, attract some parents who might naturally be expected to place their children in a Hospital possessing special advantages, and to which they of right belong, to send them to the Sydney Hospital.

## FINANCIAL.

As might be anticipated from the small numbers treated the average cost per patient is large (£71). As the numbers increase it may be reduced, but should the Prince Alfred Hospital open Children's Wards the superior attractions of the larger Institution will I fear tend to destroy the usefulness of the Glebe Hospital by taking patients who otherwise would have been sent to the latter.

\* Score is both a Hospital and a Benevolent Institution. Of the 67 admissions only 51 became actual Hospital Patients. † The Medical Return appears to have omitted 14 patients, 13 remaining, 31/12/80. Of these 14 it seems 2 died, but the Return is silent on this point also. ‡ Of the 132 admissions only 90 became Hospital Patients during 1881; the others were simply old and infirm Paupers. NOTE.—Hospitals at Adelong, Araluen, Kiandra, and Sofala, have been closed.

Remaining in the Asylum, 31st December, 1881 ... ..	73	147	220

During the prevalence of small-pox in Sydney this Institution, as being a receiving-house for women and children, many of whom had resided in the worst parts of the city and under the most adverse sanitary conditions, was at all times peculiarly liable to have that disease imported into it.

To reduce the danger to a minimum the buildings underwent a very searching cleansing and repairs. Especial attention was paid to drainage and ventilation, and an improved system of hot-water reticulation introduced throughout the wards, bath-rooms, closets, &c.

Further to secure the safety of the inmates all new admissions were quarantined and placed under observation prior to being allowed to come in contact with persons already in the asylum, and a casualty ward, for emergency or suspicious cases, was established in connection with the Lying-in Hospital.

In the same interest it was decided for a time to close the ward for examining and prescribing for female out-patients suffering from ovarian or uterine diseases.

The out-relief department was remodelled, and a new store, in the form of a small wing, fitted up and so arranged that provisions could be dispensed to applicants resident in the city without their entering the main buildings of the Asylum.

These several precautions, together with the watchful care of the staff, tended greatly no doubt to keep the Institution free of small-pox.

Consequent on recommendations made to it by the Government, the Directors appointed an Honorary Consulting Medical and Surgical Staff. Such a step will no doubt meet with very general approval.

The want of sufficient and suitable accommodation continues to be the great difficulty of the Society.

The Directors again appealed to Government, requesting an expression of its decision on the question as to whether the present site of the Institution would be required for public purposes; also its opinion as to the advisability of erecting a new and improved Asylum and Lying-in Hospital on the present site.

In the interests of the public and of future inmates it would be well could the Society's application meet prompt reply.

Not only are the present buildings bad in plan and insufficient for the operations of the Society but delay is likely to increase the difficulty of obtaining another site conveniently accessible, spacious in area, and procurable at a moderate price.

## THE CHILDREN'S DEPARTMENT.

In regard of health the condition of the children in the Asylum during 1881 was equal to the average of former years.

No epidemic diseases broke out, but several minor complaints prevailed at different times.

Some of these were imported by new admissions, some were traceable to the life history of parents, while others were incidental to dentition, nutrition, or the treatment the children had undergone previous to their admission.

The deaths numbered fifty-seven. Details of diseases and ages are given in the Medical Return accompanying.

1881.	Diseases.														Death Ages.								
	Marasmus and Atrophy.	Tetanus.	Diarrhea.	Premature Birth.	Debility.	Peritonitis.	Bronchitis.	Pneumonia.	Cong. of Liver and Vomiting.	Uremic Convulsions.	Consenital Malformation, &c.	Typhoid Fever.	Puerperal Convulsions.	Heart Disease.	Infantile Convulsions.	Deaths.	Under 1 month.	From 1 to 3 months.	From 3 to 6 months.	From 6 to 9 months.	From 9 to 12 months.	From 1 to 2 years.	Adults.
Totals.....	31	1	4	5	1	1	4	2	1	1	1	1	1	1	2	57	13	22	3	2	3	8	6

Admissions of cases of marasmus or wasting disease were more than usually numerous owing to the number of children brought to the Asylum by the Police, "found deserted or exposed."

Some of these were moribund at time of admission.

LYING-IN

## LYING-IN HOSPITAL DEPARTMENT.

Two hundred and twenty-five women were accouched in 1881, being eight less than in 1880.  
Of the above only 50 were married.

The nationalities of the women is seen by reference to the subjoined tables:—

Places of Birth.	
England	25
Scotland	2
Ireland	31
New South Wales	144
Victoria	6
Queensland	3
France	1
Germany	2
Other Countries	11
<b>Total</b>	<b>225</b>

Of the six deaths of female adults which took place in the Asylum during the year 1881 one only occurred in the lying-in wards—a very favorable testimony to the skill and attention of the Society's Officers and Attendants.

## OUT-DOOR RELIEF DEPARTMENT.

Total cost, 1881	£844 15s. 9d.
As against, in 1880	£892 9s. 5d.

The reduction, though small in itself, is the more satisfactory as taking place during a season when, in consequence of drought, provisions had risen in price, and may be accepted as an indication of the facilities present in this Colony for gaining a livelihood by all who are disposed to employ themselves.

The financial statement of the Society is interesting, as showing how heavily it leans on the Government; how comparatively insignificant are the subscriptions it receives from the public, naturally consequent on the large Government aid, and how rapidly its very considerable Reserve Fund is accumulating.

In pointing to the Reserve it is fair also to state that the Society purposes devoting about one half to the building of a new institution expecting Government aid to like amount.

## STATE CHILDREN'S RELIEF BOARD.

Two years ago an Association, principally of Ladies, constituted themselves into a society, having for its object the placing of children found in the Benevolent Society's Asylum, in respectable homes under active supervision.

The Government countenanced the movement so far as to give it pecuniary assistance. Subsequently, by the passing of an Act on the 5th April, 1881, entitled the State Children's Relief Act, the operations of the Society became merged within a new Government department.

A board was nominated by the Colonial Secretary on the 19th April, an officer, styled the Boarding-out Officer appointed on the 9th June, regulations were framed and assented to by the Government on 2nd September, and active operations resumed in October last.

Prior to the Society suspending its work, sixty-three children had been placed in homes, two of whom had been permanently adopted.

By the 31st December, 1881, ninety-one children had been provided for, two deaths were reported, and eight children had been reclaimed by parents.

The duties of the Boarding-out officer, in addition to keeping the accounts and records of the office, comprise personal visitations of the homes of the children, inquiries into the characters of proposed foster parents, and correspondence with district visitors. Between June and December, 192 visits to children were made, sixty-one homes of applicants were inspected, and a large number (58) of District visitors' reports received.

Children have been boarded out in the following neighbourhoods:—Suburbs of Sydney, Goulburn, Menangle, Bowral, Windellama, Tarago, and Mullengallenga.

Parents contributed towards the support of their boarded-out children, £31 15s.  
Parliament has voted for this year's operations, £3,160.

## DESTITUTE CHILDREN'S ASYLUM, RANDWICK.

THE improvement noticeable in the preceding year throughout this Institution was well maintained during 1881.

I desire to report most favourably on the good order, cleanliness, and regularity which marked the administration of the Asylum, as well in matters of domestic economy as in attention to the care of the children. The ventilation of the Infants' School-room and of some of the Dormitories requires attention. In the first it is defective, and means other than by merely opening windows should be devised for securing at all times abundance of pure air for the children during the night in the dormitories.

With the exception of some cases of measles, a few cases of sore eyes, and the outbreak of whooping-cough in the last few days of the year, the health of the children was very satisfactory.

## Medical report—

In hospital, 31 January, 1880 ... ..	43	
Admissions, 1881 ... ..	822	865
Discharges ... ..	785	
Died ... ..	3	788
Remaining in Hospital, 31 December, 1881 ... ..	77	

## Description of cases—

Measles ... ..	120	
Mumps ... ..	92	
Affection of eyes ... ..	186	
Various ... ..	464	862

## Deaths—

Accidental fall ... ..	1	
Heart disease ... ..	1	
Peritonitis ... ..	1	3

For several months during the presence of small-pox in Sydney the Institution, as a precautionary measure, was closed against visitors and friends of the children; at the same time the possession of the new Receiving-house as a place of quarantine enabled the Board to continue receiving new drafts of children, and so prevented undue pressure at the Benevolent Society's Asylum.

## Report of Inspector Department Public Instruction on the school progress—

Boys ... ..	Good
Girls ... ..	Good
Infants ... ..	Very fair.

It is with sincere pleasure I beg to draw the attention of the Colonial Secretary to the reduction made last year in the rate of cost of maintenance.

The gross cost charge per head to the Government was £16 12s. 1d. for 1881, as against £21 15s. 11d. in 1880, which, on the number (483) of the State children, shows a comparative saving to the public revenue equal to £2,500.

In order to trace out more easily the sources of this reduction, I have placed side by side on page 20 the analysis of expenditure in the above two years.

Passing over smaller differences, as scarcely affecting the issue, it will be seen the diminution arises under the two items, of buildings and clothing.

The Directory now possessing every accommodation and appliance requisite for the efficient working of the Institution, the reduction under the first of these headings is likely to become permanent.

As regards the saving under the latter heading, however, I confess to a fear lest the gain prove only temporary, representing perhaps lessened stocks in use, which may require a ratable increase in the future.

In the item rations I observe there was a slight decrease, viz., £4 3s. 8d. per head in 1881, as against £4 19s. 5d. in 1880.

The gain may be a perfectly legitimate one, as, for instance, by the lessened cost for bread, which is now purchased by contract in place of being baked on the premises.

So necessary, however, is a liberal diet to children of the type usually found in our charitable institutions that attempts to reduce expenditure under the item of food must always prove exceedingly difficult, as tending to reduce either the quantity of the supply or to depreciate its quality.

In justice to the management I must add the children at the Randwick Asylum always look well nourished, and that during the last two years I have been much pleased at the marked improvement in their general appearance.

*Statistics*

Statistics.

Numerical strength on 31st December, 1880 ...	Boys. 370	Girls. 269	Total ... 639

From the foregoing statistics it will be seen the Randwick Society possesses a Reserve Fund, called a Perpetual Subscribers' Fund, of £11,235 6s. 1d., and net assets equal to £10,419 17s. 1d., together £21,755 3s. 2d.

## INDUSTRIAL INSTITUTION FOR THE BLIND.

The objects of this Society are to furnish to the industrious among the blind efficient instruction in work, convenient workshops, materials for carrying on their work, and a place where it may be advantageously sold.

From being but little known the Institution to the present time has scarcely received that liberal support from the public which its promoters had hoped for, or its truly benevolent purposes deserve. The unfinished and unsightly approach to the Sale-room may probably have deterred visitors, but this defect is now remedied. As it is an integral part of the scheme to make the Institution as nearly as possible self-supporting, it is to be hoped the work done in the Institution, which is excellent and of assured materials, will come gradually to be appreciated and more sought for.

The Committee speak in very favorable terms of the good conduct and attention of the workers.

These last year numbered seven of ages ranging from 21 to 58 years. They exhibited remarkable intelligence and aptitude in adapting themselves to new localities and employments, and much of their work done is of a very superior character as regards strength, though as might be expected somewhat wanting in finish.

Basket and mattress-making have hitherto been the chief employments; the demand for the first of these is already very fair.

Cane-chair seating, wherever orders can be obtained, is also carried on; and I saw some pretty rustic chairs made of willow among the articles exhibited for sale, also fancy baskets, flower-stands, &c.

After deducting the cost of materials, each worker gets the full price of any article made by him, and as additional encouragement the Society has supplemented hitherto the worker's earnings so as to reach a rate of 14s. per week; neither board nor sleeping accommodation is at present supplied.

The accounts of the Society have been rendered to me in such a form that I am unable to represent the period between January and December, 1881, and therefore give two periods. The return for current year is promised in regular form.

## INFANTS' HOME, ASHFIELD.

In a former report I alluded to the dangers to infant life, consequent on the practice of allowing women of tainted reputation, or who were bearing unaided the burden of maternal cares, to be discharged from the Benevolent Society's Lying-in Hospital without further supervision or assistance.

No doubt in some cases these are not required, or in others would not be accepted; but of their necessity in a large number of instances there can be no question as is proved by the high death rate of infants brought to the Infants' Home, and the eagerness with which the labours of this Society are availed of, by the many women with infants who seek admission into the Home at Ashfield.

My visits to the Institution have satisfied me that the committee of management are employing the means at their disposal judiciously and with excellent results.

The children look very well cared for, the Home is clean and orderly, and great pains seem taken to raise the self respect of the women by a kindly watchful supervision.

The elder children, under care of a nurse, attend the Public School, and when suitable homes are found are now being sent to foster parents by the State Children's Relief Board.

Owing to the absence of the Society's honorary treasurer and recent changes in the secretaryship I am not in a position to present a balance sheet showing the pecuniary position of the Society during 1881, or to give such details of its operations as I should wish to have done, but the principal amounts of income and expenditure, together with tables of admissions and discharges, medical cases, and deaths, are here set forth:—

<i>Part Income—</i>	STATISTICS, 1881.								
Subscriptions ... ..	...	...	...	...	...	...	£525	9	9
Contributing mothers ... ..	...	...	...	...	...	...	258	13	0
Interest remitted... ..	...	...	...	...	...	...	100	0	0
							£884 2 9		
 <i>Part Expenditure—</i>									
Salaries and wages ... ..	...	...	...	...	...	...	£460	7	6
Provisions... ..	...	...	...	...	...	...	669	13	3
Fuel and lighting... ..	...	...	...	...	...	...	49	18	7
Linen and bedding ... ..	...	...	...	...	...	...	20	0	0
Drugs ... ..	...	...	...	...	...	...	10	11	9
Funerals ... ..	...	...	...	...	...	...	98	0	0
Repairs ... ..	...	...	...	...	...	...	31	2	4
Secretariat ... ..	...	...	...	...	...	...	30	1	6
Interest ... ..	...	...	...	...	...	...	100	0	0
Commission ... ..	...	...	...	...	...	...	14	11	9
							£1,484 6 8		

The returns do not furnish bank balances at beginning and end of 1881, and my application for further information has not been answered.

*Table of Admissions and Discharges:—*

Deaths, 1881—Women ... ..	Nil.			
Children ... ..	...	18	20	38
Remaining in Institution 31 December, 1881—Women ... ..	20			
Children ... ..	...	30	17	47

*Table of Cases treated Medically, and Deaths:—*

1st Class.	Diseases—	Zymotic, parasitic	Cases.	Deaths.
2nd "	"	Constitutional tubercular	30	14
3rd "	"	Local—Organs of circulation	24	10
		Integumentary system	40	4
4th "	"	Developmental, nutrition	4	2
			12	8
		Totals ... ..	110	38

I would draw attention to the heavy mortality under classes 2 and 4, as showing both the disadvantageous circumstances under which the Society has to carry on its work, and the condition of the poor children when brought to it.

---

## PART 2.

INSTITUTIONS WITHIN THE DEPARTMENT OF  
MINISTER FOR PUBLIC INSTRUCTION.

---

PROTESTANT ORPHAN SCHOOL, PARRAMATTA.

THE same kindly attention to the comfort and happiness of the children, with the same favourable results mentioned in my previous reports, was again manifest at this Institution last year.

With the exception of some cases of whooping-cough, and minor forms of disease, the general health of the children was excellent.

The average daily numbers in the Orphanage again show a small decrease:—1880—daily average 233; 1881—daily average 226. *Ceteris paribus* this difference would, in itself, occasion a slight increase in the rate per head for maintenance, but other matters have combined to raise expenses very considerably. With a view to reducing the cost of making up the children's clothing and to assist the matron, two additional attendants are engaged, raising the item of wages from £5 2s. 6½d. in 1880, to £5 10s. 8½d.

The clothing item was unduly swelled from £2 8s. 1½d. in 1880 to £2 13s. 0½d. in 1881 in consequence of a mistake made in ordering more boots than were required; it will bear a corresponding reduction in the current year.

The principal increase seems to have been occasioned by the higher rates paid for food (£4 15s. 11½d. in 1880 against £5 6s. 7½d. in 1881).

	Boys.	Girls.	Totals.

Included in above are two items—£159 9s. 2d., paid Darlinghurst Gaol for making up clothing; and £200 19s., paid Parramatta Gaol for boots.

Showing average maintenance cost = £4,448 12s. 4d., or per head	£ 13 15 5
Add proportion of medical vote—£50	0 3 1½
Add proportion of Colonial Architect's vote—£141 8s. 11d., for ordinary repairs and improvements	0 8 9
	<u>£14 7 3½</u>
Deduct receipts from relatives of children for maintenance—£21 8s. 6d.	0 1 3½
	<u>£14 5 11½</u>

Articles of clothing made, 3,726; repaired, 9,512.

The overcrowded condition of this Orphanage, as well as the very insufficient accommodation for its officers and administrative staff caused Government two years ago to instruct the Colonial Architect to make suitable provision for the better working of the Institution. Building contracts to the extent of £6,150 were accordingly taken and will shortly be completed. In 1880 a sum of £1,000 was paid on account, and in 1881 a further sum of £3,300. The additions and extensions are enumerated below:—

- No. 1. New Wing to Main Building—brick.  
 Basement—2 rooms, each 20 ft. x 18 ft. x 8 ft. high.  
 Ground floor (Matron's)—2 rooms, each 20 ft. 7in. x 18 ft. x 12 ft. high.  
 1st floor (Officers') 2 rooms, each 21 ft. x 18 ft. x 11 ft. high.  
 2nd floor (Girls' Dormitories)—2 rooms, each 21 ft. 4in. x 18 ft. 4in. x 11 ft. high.  
 A staircase and lobby divides each pair of rooms.
- No. 2. Offices, extension—  
 Ground floor (Bread and flour store), 15 ft. 6in. x 12 ft. 4in. x 9 ft. high.  
 Do. (Servants' hall), 30 ft. x 18 ft. 6in. x 11 ft. high.  
 Do. (Provision store), 20 ft. x 18 ft. 6in. x 11 ft. high.  
 Upper floor, Servants' dormitories—  
 No. 1. 30 ft. x 18 ft. 6in. x 9 ft. 6in. high.  
 No. 2. 20 ft. x 18 ft. 6in. x 9 ft. 6in. high.
- No. 3. New bath-room and lavatory, 30 ft. x 20 ft. x 11 ft. high.  
 No. 4. Wash-house, 28 ft. x 20 ft. x 10 ft. 3in. high.  
 Laundry, 28 ft. x 20 ft. x 10 ft. 3in. high.  
 Linen room, 20 ft. x 20 ft. x 10 ft. 3in. high.  
 Drying loft, 56 ft. 6in. x 20 ft. x 6 ft. high.
- No. 5. Shed for carts, &c., 25 ft. x 15 ft. x 10 ft. 6in. high.  
 Stables (3 stalls), 20 ft. x 15 ft. x 10 ft. 6in. high.

In

\* Boys' teacher allowed £54 per annum in lieu of quarters and rations. Baker allowed £26 per annum in lieu of quarters.

In previous annual reports to the Government I have endeavoured to bring prominently to notice the overcrowded condition of this Institution.

The additions and extensions enumerated, although doubtless they were urgently needed, tending materially to increase the comfort of those in charge of the children, by facilitating the domestic working of the Institution, yet are not of a character to relieve the pressure in the dormitories.

On the boys' side no extra space has been gained, and only to extent of sixteen to twenty beds on that for the girls. I therefore respectfully suggest that every effort be continued to keep down the admissions into this Orphanage, and if possible reduce the numbers. That such is possible without occasioning any hardship I believe, and I am strengthened in this idea by comparing the small number of the children who leave the Institution as apprentices compared with the far greater number who are returned to friends as soon as they attain a wage-earning age.

The report of the Examiner from the Department of Public Instruction on the progress made in the school during last year is summarised below:—

Boys	...	...	...	...	...	...	Fair + (or better than fair).
Girls	...	...	...	...	...	...	Fair.
Infants	...	...	...	...	...	...	Very fair

#### NAUTICAL SCHOOL-SHIP "VERNON."

SHIP life even in harbour appears to possess especial advantages for treating youths of irregular habits and possessing minds abnormally excited.

The alternations of schooling with ship duties, of emulation with restraint, of novelty with routine, of strictness with a benificent and continuous supervision on such a school-ship as the "Vernon," all tend to make the boys on board yield themselves willingly to the discipline brought to bear upon them.

Dividing the credit of the results between the system and the judicious manner of working it I have much pleasure in again reporting most favourably on the appearance of the boys on the "Vernon," especially in matters regarding their health, smartness, and apparent cheerful submission to authority.

It seems a matter for regret that the special education taught and the opportunities given of making the boys into real sailors is not more availed of, and the more so as many of the lads themselves seem willing to take to the sea as a profession. Out of a total of seventy-two apprentices in 1881 but ten went to sea.

This deficiency in results appears attributable not to defects in the training, but rather to an absence of proper machinery for bringing the employer and apprentice within observation of each other, or is a consequence of limiting within too narrow bounds the class of shipowners who may employ the boys from the "Vernon."

The formation of a nucleus to our future Colonial Navy may tend to remove some of the difficulties hitherto existing by offering in it places to boys whose intelligence and good conduct have proved them worthy of consideration.

During last year a good deal of heavy work in new sparring and setting up the standing rigging of the ship was done by the boys under aid and direction of their instructors. The saving to the Government is considerable and the work was I am informed executed in a thoroughly satisfactory and efficient manner.

Under statistics a list is given of items which will doubtless prove interesting.

It would be very desirable that full inquiry should be made before apprenticing boys to distant places in the interior, and that an adequate surveillance be maintained during such apprenticeship. This is done with advantage with regard to the children apprenticed from the Randwick Asylum.

That there may occasionally be just grounds for apprehension lest some of the boys receive ill treatment, the history of the past only too well has proved. The difficulty however is great of providing a safeguard unobjectionable in its working and not too costly.

## FEMALE INDUSTRIAL SCHOOL, BILOELA.

THE history of the inmates during the year 1881 was happily very uneventful. The matron describes the conduct of the girls as having been on the whole satisfactory, and their health excellent, notwithstanding a few cases of whooping-cough.

The returns herewith show the numbers, the admissions, and the discharges during the year. I regret exceedingly to point out the large number of girls who were recommitted (10) and (1) returned out of a total of 27 apprenticed. To a considerable extent I fear this undesirable result is traceable to the influences exercised by the senior girls who come to the Institution bringing with them evil experiences which leaven the minds of the juniors. Of the reclamation of many of the older girls, as mentioned in my previous reports, the Matron has expressed grave doubts ; and I therefore would suggest the advisability of a more perfect separation between such girls as have been brought up in the school and those who have attained considerable age and a knowledge of vice before entering it.

Only

Only one death took place, that of a little boy under seven years awaiting transfer to the "Vernon." At the time of admission he was suffering from chest disease, to which ultimately he succumbed.

<i>Statistics, 1881.</i>		Girls.	Boys.	Total.

4 to 8 years	...	38		
8 to 12 "	...	39		
12 to 16 "	...	21		
16 to 18 "	...	24		

The daily average number in Institution throughout year—Boys, 19 ; girls, 99 ; total, 118.

The progress in the school during the year is described by the Department of Public Instruction as "Fair."

On admission a majority of the girls are lamentably ignorant as regards primary education and their previous habits indispose them to learn or make any steady and continued mental effort.

*Expenditure, 1881.*

	£	s.	d.	£	s.	d.
Salaries	625	0	0			
Rations	1,000	13	3½			
Fuel and light	89	6	10			
Medicines	13	0	4			
Forage for cows and horse	63	2	1½			
Drapery	189	8	1			
Boots	264	8	0			
Ironmongery, crockery, &c.	50	4	2			
Books and stationery	20	0	8			
Incidental expenses	42	12	0			
				2,357	15	6
Deduct received account—						
Maintenance from patients					6	0 0
					2,351	15 6
Proportion medical vote for medical officer's salary					50	0 0
					£ 2,401	15 6
Average cost per head for maintenance, exclusive of						
Colonial Architect's account					£ 20	7 1
Additional, Colonial Architect's Department—						
To ordinary repairs	616	5	7			
Furniture	70	13	10			
	£686	18	7	£	5	16 5
Gross cost per head					£ 26	3 6

These figures contrast somewhat unfavourably with those for 1880, but may be accounted for by the higher rates for provisions, and the larger outlay on the buildings.

## SYDNEY MECHANICS' INSTITUTE AND SCHOOL OF ARTS.

It is a very satisfactory circumstance in connection with the history of this Institution, which has just reached its fiftieth anniversary, that it seems yearly to be gaining to itself a larger share of the public interest at the same time that it is more closely restricting its action within the limits which constitute it an educational and intellectual medium.

A concession, likely to be attended with valuable results, was last year made by the Government to its Board.

Heretofore the amount of annual subsidy from the Government could not exceed £200, but will in future be regulated as in the case of the other Literary Institutes of the Colony, by the amount of subscriptions on the £1 to £2 principle. Consequent on this decision the Society last year gained an increase of £634 2s. 6d.

The Government also has agreed to rent the large hall of the Institution for purposes of technical education at a yearly sum of £900.

This hall was chiefly used as a means of raising revenue, and to this end was let for exhibition and theatrical purposes. It realized in 1878, £949 7s. 8d.; 1879, £1,584 12s. 8d.; 1880, £961 5s. 1d.; 1881, £897. So that the terms made with the Government appear equitable.

The agreement possesses however a double advantage, as it serves to purge the Institution of an objectionable feature of its operations, and at the same time is evidence of Government intention to acknowledge and give practical effect to the necessity of including technical instruction among the other means of its educational system.

*Membership.*—The number of subscribers for 1881 was 1,910. This is a slight diminution of the numbers enrolled in 1880.

*Reading Room.*—Much used being convenient and well supplied with papers, magazines, and works of reference. Special attendants are provided for supplying the last to readers.

*Library.*—Particular attention is paid to this department of the Institution, and large sums are annually spent in purchasing books. It is well selected and contains all the best literature of the day, besides very many costly and rare works.

The volumes number 20,776, representing 10,782 works. Having to meet popular tastes a large number of these are works of fiction; but books on all subjects are also to be found, and since the inauguration of classes on an extended scale in the Institution, works of reference have come to be much sought for by students.

*Financial Position.*

The large additions and improvements to the buildings chiefly, in connection with the branch institution known as the Technical College, has caused a debt to spring up, amounting at end of last year to £5,005 18s. 8d. It is intended to reduce this as speedily as possible, and to that end the Government subsidy will be specially devoted to the purpose, beginning at once with the amount in hand of £634 2s. 6d.

## SYDNEY MECHANICS' INSTITUTE—Treasurer's Statement for 1881, 1 January to 31 December.

## TECHNICAL COLLEGE.

FOSTERED by the liberality of the Government during the past three years this branch of the Sydney Mechanics' Institute has made rapid growth.

The grants from the public revenue for 1881 amounted to £2,000, of which sum £500 was for purchase of apparatus to illustrate teaching.

Twenty classes were carried on with fair attendance and satisfactory results.

Elementary lectures on scientific and other subjects were delivered from time to time, and were well attended. There were also lantern readings, illustrating scenery and travel, art, manufacture, science, &c.

The efforts of the Committee to present time have been cramped to some extent from the uncertainty attaching to the grants preventing them from employing teachers on guaranteed salaries.

In the permanent interests of our Mechanics' Institutes, and to meet what is becoming recognized as a public necessity, I would suggest the advisability of Government coming to some decision as to what is desirable to be done in furthering technical education—the assistance it will render Schools of Arts and the terms under which such assistance may be obtained.

On looking over a list of Classes at the Technical College the subjects appear strangely mixed up together, many of them not properly belonging to a Technical School, but coming legitimately within the functions of a Literary Institute.

A correct division and distribution of the work would be advantageous.

Some of the class-rooms appear already too small, and the night-work in the drawing classes is carried on under disadvantage from cross lights and imperfect ventilation.

The number of students enrolled in 1881 was 756, under 1,435 entries. The attendance at classes, as a whole, was good, and the general results sufficiently encouraging to warrant public recognition.

The following is a list of subjects taught last year, with entries in such class :—

Shorthand ... ..	75
Practical chemistry ... ..	63
Architectural drawing ... ..	130
Freehand drawing ... ..	171
"    "    (afternoon) ... ..	12

Sydney : Thomas Richards, Government Printer.—1882

1882.

## NEW SOUTH WALES.

## INSPECTOR GENERAL OF THE INSANE.

(REPORT FOR 1881.)

Presented to Parliament, pursuant to Act 42 Vic. No. 7, sec. 73.

## The Inspector General of the Insane to The Colonial Secretary.

Sir,

Lunacy Department, Inspector General's Office, Gladesville, 31 March, 1882.

In accordance with the 73rd section of the Lunacy Act of 1878, I do myself the honor to submit for your information a report on the state and condition of the Hospitals and other Institutions in this Department for the year ending 31 December, 1881, with appendices containing separate reports and statistical returns by the Medical Superintendents of the Hospitals at Gladesville, Parramatta, and Callan Park.

I have, &amp;c.,

F. NORTON MANNING.

On the 31st of December, 1881, the number of registered insane persons in the Colony was 2,218, and the following return shows their distribution :—

	Male.	Female.	Total.
In the Hospital for the Insane, Gladesville ... ..	404	404	808
Do. Parramatta (Free) ... ..	552	206	758
Do. Do. (Convict)... ..	18	3	21
Do. Do. (Criminal) ... ..	50	6	56
Do. Callan Park ... ..	140	.....	140
Do. Newcastle ... ..	123	107	235
In the Temporary Hospital, Cooma ... ..	62	.....	62
In the Licensed House for the Insane, Cook's River ... ..	6	132	138
	1,360	858	2,218

The number of registered Insane on 31st December, 1880, was 2,099, and the increase during the year has been 119.

Compared with the numbers in the Institutions at the close of 1880, there was an increase of 104 at Gladesville, 11 at Callan Park, 7 at Newcastle, and 3 at Cook's River; and a decrease of 1 at Parramatta (Convict), 3 at Parramatta (Criminal), and 2 at Cooma.

The increase during the year has been larger than during any former year, and 36 in excess of the average annual increase for the decennial period ending 31 December, 1881, which was 83; but it does not appear to be due to any largely increased production of insanity.

The number of patients admitted and re-admitted was only 18 in excess of the number for the year 1880, although the population, as estimated by the Registrar General, increased during the last three quarters of the year after the Census was taken, by 29,797, or at the rate of 39,729 for the year. The main cause of the exceptionally large increase was a very low death rate, which reached only 5.46 per cent., whereas the average death rate for some years past has been upwards of 7 per cent. on the average number resident.

The proportion of insane persons to the population was at the close of the year 1 in 352, or 2.84 per thousand, a proportion almost identical with that in England and Wales at the close of 1880, which was 1 in 353, or 2.83 per thousand.

The following tables show the number of the admissions, re-admissions, discharges, and deaths; the causes of insanity in those admitted and re-admitted; the causes of death; the length of residence in those discharged and in those who died; the ages; the condition as to marriage; the religious profession; and the native countries in those admitted and under care in the Hospitals for the Insane, during the year 1881.

Tables, giving particulars with regard to the patients in the Licensed House, at Cook's River, are given in a subsequent part of this report.

TABLE 1.  
SHOWING the Admissions, Re-admissions, Discharges, and Deaths, in the Hospitals for the Insane during the Year 1881.

	Male.	Female.	Total.
In Hospital on 31st December, 1880	1,276	688	1,964
	Male.	Female.	Total.
Admitted for the first time during the year	284	134	418
Re-admitted during the year	35	27	62
Transferred during the year	31	9	40
	350	170	520
Total under care during the year	1,626	858	2,484
Discharged or Removed—			
Recovered	133	73	206
Relieved	16	14	30
Transferred	34	19	53
Escaped (and not recaptured)	5	...	5
Died	84	26	110
Total discharged or died during the year	272	132	404
Remaining	1,354	726	2,080
Average number residents during the year	1,314	700	2,014

TABLE 2.  
SHOWING the Admissions, Re-admissions, Discharges, and Deaths, with the Mean Annual Mortality, and the proportion of Recoveries, &c., per cent., in the Hospitals for the Insane, for the Years 1876 to 1881 inclusive.

Year.	Admitted.		Transferred from other hospitals, &c.	Discharged.		Transferred to other hospitals, &c.	Escaped and not recaptured within 28 days.	Died.	Remaining in hospitals, 31 December, in each year.	Average number resident.	Percentage of recoveries on admissions and re-admissions.			Percentage of patients relieved on admissions and re-admissions.			Percentage of deaths on average numbers resident.

#### Admissions.

The number admitted into Hospitals for the Insane during the year was 480—319 males and 161 females; and of these, 418—284 males and 134 females—were admitted for the first time; and 62—35 males and 27 females—were re-admitted, having been at some prior time under treatment.

At the Licensed House, Cook's River, 5 males and 9 females were admitted. The total number admitted for the first time to all Institutions during the year was 432—289 males and 143 females; whilst the number re-admitted was 62—35 males and 27 females. The proportion of admissions and re-admissions to the population of the Colony was 1 in every 1,581 persons, as against 1 in every 1,618 in the preceding year. The re-admissions form a percentage of 12.55 on the total admissions.

The period of absence in the cases re-admitted to Gladesville—the Institution at which they were largest in number—was upwards of 4 years and 9 months.

In Table 3 the causes of insanity in the admissions and re-admissions are shown. To moral causes, 68 cases, or 14.17 per cent. are attributed, and to physical causes, 288 cases, or 60 per cent; whilst in 124 cases, or 25.83 per cent., no cause apparent or assigned is stated. To intemperance in drink, 54, or 11.25 per cent. were attributed; to hereditary influence, 39, or 8.12 per cent; to epilepsy, 29, or 6.04 per cent.; to congenital mischief, 24, or 5.00 per cent.; to ill-health, 20, or 3.16 per cent.; whilst a number of other causes, among which are sunstroke, privation, domestic trouble, and religious excitement, are credited with a large percentage. This table showing the causation of insanity has been adopted, with only minor alterations, from the report of the English Commissioners in Lunacy, and was given for the first time in the report for the year 1880. Continued from year to year it cannot fail, as the numbers accumulate, to be a valuable contribution towards the solution of a difficult and interesting question.

*Patients*

*Patients admitted from Ships, or soon after Arrival in the Colony.*

A certain number of cases have, as in former years, been admitted either direct from the ships in which they arrived in the Colony, or immediately after landing. No less than 12 cases of this kind were received at Gladesville, and 3 at Callan Park; and, although in any place with active immigration, certain such cases must be expected, there is good reason to believe that owing to the closure of other Colonial ports to these cases, a share beyond what is fair and reasonable falls to this Colony. An Act has been in force in Victoria for some years which prevents the landing of insane persons except the captain of the ship arranges to pay the cost of their maintenance; and during the past year the Marine Board of South Australia has decided that a shipmaster bringing an insane sailor to that Colony may not discharge him unless providing for his return to the port of shipment.

*Patients Transferred.*

The number of patients transferred during the year from one establishment to another was 53. These transfers were made for the most part for administrative reasons, and include the transfers of idiot or imbecile children to the Hospital at Newcastle especially set apart for them, the transfer of patients from the Hospital for Criminals to the free division at Parramatta on expiry of sentence or change of status, and the transfer of female patients maintained by the Government to Cook's River to replace those deceased therein. In some cases the transfer has been made with a view of affording change and variety to the patients, or to remove them from the care of officers or attendants against whom they had conceived a dislike (owing to delusions or other causes) which was likely to lead to danger or to militate against recovery. These transfers have in all cases been made by the authority of the Colonial Secretary on my advice.

*Discharges.*

The number of persons discharged from the Hospitals for the Insane was 236, and of these 206 had recovered and 30 were relieved. From Table 2 it will be seen that the percentage of recoveries calculated on the admissions and re-admissions was 42·91, whilst the percentage of those discharged relieved was 6·25. The percentage of recoveries is somewhat higher than that for last year, and compares favourably with that in English Asylums.

The percentage varied somewhat at the different Hospitals, being 40·05 at Gladesville, 46·77 at Parramatta (Free), 27·57 at Parramatta (Criminal), 50·98 at Callan Park, and 100·00 at Cooma. At Newcastle there were no discharges during the year, the patients at that Hospital being as a rule of an incurable class. In addition to the numbers discharged from Hospitals, 18 were discharged from the Reception House, 17 as recovered, and 1 relieved.

*Escapes.*

Under the provisions of the Lunacy Statute every escape, although the patient may be absent only for a few minutes, is now reported. The total number of escapes was 18, and of these the majority were only absent for short periods. One patient from Gladesville, 2 from Parramatta, 1 from Callan Park, and 1 from Cooma succeeded in eluding enquiry and remaining absent beyond the period of 28 days, during which they can, under the provisions of the Lunacy Statute, be re-taken. Three of these patients were afterwards heard of as doing well, and experience shows that few of the patients who succeed in making good their escape from Hospitals for the Insane are permanently lost sight of. Some are afterwards re-admitted under fresh orders, and some remain at large, having recovered or being so far well as to be able to gain their own living.

*Deaths.*

The deaths in Hospitals for the Insane numbered 110, and computing the mortality on the average number resident the percentage is 5·46, and on the total number under care and treatment 4·83. This rate is lower than during any preceding year, more than 1½ per cent. lower than that for the previous year, and very largely below the rate in England, where the average for the 10 years ending 1880 was 10·02 on the average number resident, and 7·65 on the total number under care and treatment.

The death rate at Gladesville was 6·25; at Parramatta (Free), 5·54; Parramatta (Criminal), 1·78; Parramatta (Convict), 4·76; Callan Park, 6·62; Newcastle, 3·47; and Cooma, 3·12, on the average number resident. The low death rate has been the chief cause of the increase in the number of patients at the close of the year, and was, so far as can be judged, due mainly to the dry mild winter, favourable to the prolongation of life in feeble people.

*Total Number under Care.*

The total number under care during the year was, in Hospitals, 2,484—1,626 males and 858 females; and in the Licensed House, 160—12 males and 148 females, making a total of 2,644—1,638 males and 1,006 females. The daily average number at the Institutions was 2,151.

*Leave of Absence.*

On 31 December, 1880, 3 female patients were absent from Gladesville and 3 from Parramatta on probation, and during the year leave of absence was granted to 13 male and 16 female patients. Of the total number, 4 males and 6 females were discharged recovered, 3 males and 5 females were returned to Hospital, and 6 males and 11 females were out on leave at the end of the year, their names being retained on the Hospital Registers. The numbers granted leave of absence on probation from the different establishments are shown in the following return:—

	On leave on 31 Dec., 1880.			Granted Leave in 1881.			Discharged Recovered.			Returned to Hospital.			Died whilst on Leave.			Remaining on leave 31 Dec., 1881.		
	M.	F.	T.	M.	F.	T.	M.	F.	T.	M.	F.	T.	M.	F.	T.	M.	F.	T.
Gladesville ... ..	...	3	3	7	14	21	2	4	6	3	3	6	...	...	...	2	10	12
Paramatta ... ..	...	3	3	1	2	3	...	2	2	...	2	2	...	...	...	1	1	2
Callan Park ... ..	...	...	...	3	...	3	1	...	1	...	...	...	...	...	...	2	...	2
Newcastle ... ..	...	...	...	1	...	1	...	...	...	...	...	...	...	...	...	1	...	1
Cook's River ... ..	...	...	...	1	...	1	1	...	1	...	...	...	...	...	...	...	...	...
	...	6	6	13	16	29	4	6	10	3	5	8	...	...	...	6	11	17

The system of granting leave of absence is, with increased experience, found to be of great service. It gives confidence to friends who consent to receive a patient much more readily when they know they can return him to Hospital in the event of his suffering a relapse, or proving unsuited for home life, and it affords a beneficial change to the patient, and in some instances acts as a check and helps to self control. Up to the present time it has been granted as a rule only for somewhat long periods, but there is no reason why it should not be tried for two or three days or a week so as to allow patients to see home and friends. In some cases of chronic insanity such a change during the quieter periods would give much happiness to the patients, and would be of use in dispelling many a morbid prejudice on the part of friends.

*Numbers Remaining and Accommodation.*

The number of patients remaining in the Hospitals at the close of 1881 was 2,080—1,354 males and 726 females; and in the Licensed House at Cook's River 138—6 males and 132 females; making a total of 2,218 at the close of the year.

In my report for 1880 I gave a return showing the dormitory accommodation in the Hospitals for the Insane, and pointed out that there were at the close of the year 330 patients in excess of the accommodation. During the year buildings have been completed and opened at Gladesville to accommodate 164, but as the increase in number in Public Institutions has been 116, there are still 282 patients in excess of the number for whom there is room.

Buildings are in progress at Parramatta, and it is hoped will be completed during the current year, to accommodate 130 female patients in addition to the number now at that Institution; but with an expected increase of something like 100 patients during the year, there will be little relief to the overcrowding which now exists in a greater or less degree at all the Hospitals.

The works at the new Hospital at Callan Park are progressing slowly, but this well-arranged and costly Institution is intended for the curative treatment of acute cases of insanity occurring for the most part within the metropolitan area, and it will be a waste of money to house within it and to crowd its wards with the accumulated cases of chronic mental disease which might be provided for in much less expensive buildings. Under the circumstances two courses appear to me to be open to the Government—

- 1st. To build a new Institution of an inexpensive character for idiot and imbecile children, to remove this class of cases from Newcastle, and to fill up the wards in that Hospital with cases of chronic insanity resulting from epilepsy, old age, and other causes; or
- 2nd. To commence a new Hospital on the site, consisting of about 350 acres, which has been purchased for Hospital purposes on the Kennmore Estate, near Goulburn, and to erect in the first instance wards intended for the chronic cases which have accumulated in the existing Hospitals from the Southern Districts of the Colony.

With the population of the Colony increasing at the rate of about 40,000 per annum, and with the experience of many former years that 3 out of every 1,000 of the population will be insane and require Hospital care and treatment, it is impossible to ignore the need for further provision for this unfortunate and expensive class.

*Accommodation for Paying-Patients.*

There is at present a great need of some special and separate accommodation for better class patients; for those whose friends though unable to pay the charges in a private Institution, willingly contribute according to their means towards maintenance in the Public Hospitals; and also for those who, now without means of their own and without friends, have been in a better position in life.

Some difference should certainly be made in the accommodation and surroundings of the former, and might with advantage be extended to the latter. It would tend to the comfort, happiness, and recovery of both classes if they were spared the association with other patients—in many cases socially and educationally their inferiors. The ordinary patients are, on the whole, as comfortably provided for in the Public Hospitals as can perhaps be expected, and those accustomed to life in the bush are certainly, so far as clothing, bedding, and food are concerned, better off than usual; but such is not the case with the classes I have mentioned, who miss greatly some of the more pleasant, homely, and civilised surroundings to which they have been accustomed. At present, the only classification is a psychological one, and the overcrowding of the Hospitals has hitherto rendered it impossible to carry out what is needful and right in the direction indicated. When the buildings now in course of construction at Parramatta are completed, it will, perhaps, be possible to set apart one of the wards at Gladesville for these patients, and the plan of the new Hospital at Callan Park includes special cottages for this class.

*The Lunacy Act.*

After consulting the Police Magistrates sitting in the Sydney Courts, and ascertaining that the accommodation in the Reception House would be sufficient, I recommended to the Colonial Secretary that the Lunacy Act should be so amended as to permit the Magistrates to remand cases of doubtful and temporary mental aberration to the Reception House instead of to the Gaol, as heretofore, and on the drafting of this amendment it was deemed advisable to make at the same time verbal amendments in three sections of the Lunacy Act, and some alterations in the provisions with regard to insane criminals.

These alterations were—

1st. To divide these prisoners into two classes—

- (a) Those under sentence, on the conviction or order of Justices ; and  
(b) Those under sentence by Superior Courts ;

and to leave to the Colonial Secretary the disposal of the former cases, with the option of sending them to an Hospital for the Insane, or the Criminal Insane, as he might deem expedient, according to the nature of the offence, or the period of sentence ; and

2nd. To make special provision for the examination of prisoners reported to be insane whilst under sentence of death.

The Act containing these alterations in the law was assented to on 19 December, 1881.

It has been necessary to call for the amendments of the medical certificates in 5 cases admitted to Hospitals for the Insane, and in 2 cases admitted to the Reception House during the year. In all these the certificates were extremely defective and unsatisfactory. In the 5 cases sent to Hospital the patients were undoubtedly insane, and the certificates were amended and approved by the Colonial Secretary, but in the 2 cases sent to the Reception House, though there was every reason to believe that the patients had been temporarily insane through drink, the insanity passed off in a few days and the patients were discharged. In both these cases the medical practitioners signing the certificates were communicated with, and the necessity for full and satisfactory certificates in accordance with the provisions of the Lunacy Act pointed out.

In two cases, J. C., admitted to Parramatta, and R. H. J., admitted to Gladesville, the admission papers were informal, and were amended in accordance with section 13 of the Lunacy Act. On examining the papers on which patients were received at the Public Institutions for the Insane, it appears that in 293 cases orders were issued by Justices under section 6, and in 176 cases requests were made under section 8 of the Lunacy Act. In 103 of these cases the requests were signed by relatives or friends, and in 63 by the Superintendents or other Officers of Public Institutions acting as official guardians.

Institution.	Number sent by order of Justices.	Number sent by request.	
		Signed by friends or relatives.	Signed by Officials, as Gaolers, Secretaries of Hospitals, &c.
Gladesville ... ..	209	80	51
Parramatta ... ..	42	9	11
Callan Park ... ..	39	11	1
Newcastle ... ..	1	3	.....
Cooma ... ..	2	.....	.....
Total ... ..	293	103	63

In 21 cases the patients came within the scope of the sections of the Act referring to criminals, and the warrant for admission was signed by the Colonial Secretary.

All the patients admitted to the Licensed House at Cook's River were received under section 8 of the statute.

The practice of examining insane persons in open court, to which I adverted in a former report, appears to have been somewhat less resorted to than formerly, but some painful scenes resulting from this practice have been made the subject of newspaper comment during the year, and it is clearly advisable that the examination should be conducted in such a manner as to avoid, as far as possible, the unnecessary excitement or exposure of persons who are the subjects of a distressing malady, and who, though under the cognisance of the law, are guilty of no offence.

I have during the year, by the direction of the Colonial Secretary, under section 44 of the Lunacy Act, examined one insane person living in a private house, and was able to report that the patient was treated with all proper care, and that it was neither necessary nor expedient that removal to an institution for the insane should be ordered.

I am indebted to the courtesy of the Comptroller-General of Prisons for the following return showing the number of persons under treatment for symptoms of insanity in prisons during the year 1881 in all gaols except the metropolitan establishment at Darlinghurst. It will be seen that the total number is 209, but that nearly half the cases were of a temporary character, and that in only 123 cases was it found necessary to sign certificates, and in 119 of these to forward the patients for hospital treatment.

In the country districts there is not at present, and in many places there cannot be for years to come, any other refuge for the insane than the prisons, and in most of those which I have had an opportunity of visiting the arrangements are but ill-adapted for the treatment of insane persons in what—with regard to their recovery—is the most precious time of their illness. The Lunacy Act limits the stay of insane persons in prisons to 14 days, and this period is not now exceeded except in cases of mental or bodily illness unfitting the patient for journey to Hospital.

In two cases during the year suicide by drowning has taken place during the conveyance of patients to Hospital. In one case the body was recovered, and the death made the subject of inquiry before the Coroner; and in the other an inquiry was instituted by the Inspector General of Police. In neither case was blame considered to attach to the constable acting as escort.

*Accidents, &c.*

The number of accidents, considering that no less than 2,484 patients have been under care in the Public Asylums, and 160 patients in the Private Asylum at Cook's River, making a total of 2,644, have been few. Two only were fatal.

Excepting minor wounds, and abrasions of an unimportant character, the following is a complete list:—Suicide by hanging, 1; choking by impaction of a piece of meat in the larynx, 1; dislocation of shoulder, 1; compound dislocation of finger, 1; fracture of thigh-bone, 1; fracture of radius, 1. Both cases of dislocation were due to accident; in one the patient fell out of bed, and the other was caused during an epileptic fit. Of the cases of fracture, one was caused by the patient's own act, and the other unintentionally by a fellow-patient. In every case of accident resulting in death a special report is made by the Superintendent of the Hospital to the Colonial Secretary, as well as to the Coroner, and full particulars of all accidents, with the result of inquiries as to their cause, are entered in the Medical Journal. Of the accidents above-mentioned two formed the subject of inquiry by the Coroner, and in three others I deemed it advisable to make special inquiries in addition to those made by the Medical Superintendent.

*Epileptics*

*Epileptics and General Paralytics.*

The English Commissioners in Lunacy have for several years past given returns showing the number of epileptics and general paralytics admitted into English Institutions for the Insane, and the following return is not without interest by way of comparison :—

Total number of Patients admitted during 1881.			Country.	Of the total number of Patients admitted during the Year 1880.						Proportion per cent. to total number of Patients admitted.					
				Number of Epileptics.			Number of General Paralytics.			Epileptics.			General Paralytics.		
Male.	Female.	Total.		Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.			
10	161	*480	England .....	5	2	7	0	1	7	5.64	0.21	5.83	5.64	1.86	4.37
			Scotland .....	1	1	2	2	..	2						
			Ireland .....	2	1	3	4	1	5						
			New South Wales .....	8	6	14	2	..	2						
			Other Colonies .....	..	..	..	1	..	1						
			France .....	..	..	..	..	..	..						
			Germany .....	1	..	1	2	1	3						
			Sweden, Norway, and Denmark .....	..	..	..	1	..	1						
			Italy .....	..	..	..	..	..	..						
			China .....	1	..	1	..	..	..						
						18	10	28	18						

\* The total number admitted and re-admitted in all Institutions for the Insane, except the Licensed House at Cook's River.

General paralysis is a well-known and frequently-seen form of disease, but in this Colony it does not bear so large a proportion to the total number of admissions as in England, being 4.37 per cent. in this Colony against 7.3 in England.

The proportion of epileptics is also somewhat less than in England. General paralysis has been seen in this Colony in natives of all the more prominent European countries, as well as in those of Colonial birth; but only one case, and that not well marked, has, so far as I am aware, been seen among the Chinese patients, and it has not been noticed in South Sea Islanders, Australian Aborigines, or other dark races.

*Changes among Officers.*

The Department has during the year lost the services of Dr. Scholes, the Medical Superintendent of the Hospital at Callan Park, who accepted a similar appointment in a neighbouring Colony; Dr. Beattie, the Assistant Medical Officer at Parramatta, who was appointed to the medical charge of the Quarantine Station; Mrs. Mary Bland, who had held the important position of Matron of Gladesville Hospital for 7 years, and left to fill the position of Matron at the General Hospital at Hobart; Mr. Dalgleish, the Dispenser at Gladesville, who resigned owing to failing health; and the Rev. G. Brown, who gave up his position as Church of England Chaplain at Callan Park, on removal from his cure at Balmain.

The resignation of their appointments by two of the Medical Officers of the Department induces me to again express my opinion that the salaries attached to the office of Medical Superintendent in the Institutions for the Insane in this Colony are inadequate to the importance of the position, and are neither a sufficient remuneration for the duties performed nor an inducement to capable junior officers to continue their connection with the Department in the hope of attaining to the position.

The success of every Institution for the Insane in a curative and in a financial point of view, as well as the estimation in which it is held by the public, must depend on the special fitness of the Medical Superintendent at its head and responsible for its management. The more I see of Hospitals for the Insane the more convinced I am that successful Hospital management is in a large degree personal, that confidence is given to or withheld from the Hospital physician just as it is with the physician in ordinary practice, and that the same qualities which insure success in private are necessary in Hospital work. A rare union of medical attainments, administrative ability, tact and zeal are required, and no amount of external inspection or control can supplement defects in this direction.

The scientific medical treatment of the patients is an essential of success. On the spirit in which an Hospital physician carries on his work will depend his moral influence, and this will leaven the whole Establishment. The comfort and happiness of the patients which tend so much to their recovery depend largely on his individual knowledge of and sympathy for them. No fixed rules, be they ever so carefully drawn or so justly adhered to, no discipline however exact, will serve instead of personal zeal and tact; and in the same way no fixed dietaries, no examination of accounts or stores, will be of full use unless the Superintendent possesses administrative ability and an earnest desire to check waste and extravagance, and to produce the best results at the lowest cost. It is to the interest of the public that the salaries attached to these important appointments should be such as to attract men in the prime of life and health and with such ability as would insure them a good income in private practice, and to induce those who have entered the service of the Department as junior officers to continue therein in view of promotion.

The whole number of changes among attendants and nurses at Institutions for the Insane during 1881 was 42, and among servants the number was 16. Of the total number who left, 36 were women and 22 men. According to returns from the various Institutions the following were the causes of leaving or dismissal:—Left voluntarily by resignation—attendants and nurses, 26; servants, 10. On account of ill-health—nurses, 5. Absconded—servants, 2. Dismissed for ill-treatment of patients—attendants and nurses, 2. Drunkenness—servant, 1. Insubordination—attendant, 1; servant, 1. Carelessness or neglect of duty—attendants, 4; servants, 1; incompetence or unsuitableness—attendants and nurses, 4; servants, 1.

The following table shows the number of changes at each Institution :—

Institution.	Dismissed.	Resigned or Absconded.	Total.
Gladesville ... ..	8	11	19
Parramatta ... ..	1	4	5
Callan Park ... ..	.....	1	1
Newcastle ... ..	.....	5	5
Cooma... ..	.....	.....	.....
Reception House ... ..	1	.....	1
Cook's River ... ..	4	23	27
Total ... ..	14	44	58

The changes, considering the total number of persons employed, are somewhat numerous, and nearly half of them, and more than half of the changes by resignation, have occurred at the Licensed House at Cook's River. Frequent changes among attendants and nurses are unfavourable to the interests of the patients, and the same may be said of the changes among servants in a less degree; since, though they are not so constantly with the patients, they are frequently placed in temporary charge of them, and should be aware of their peculiarities and how to care for and manage them. I would echo the remarks made by the Scottish Commissioners in Lunacy, in their report for the year 1880, that it is deserving of careful consideration by the administrators of those Institutions where changes occur frequently whether some addition to the wages or some increase in the comforts of attendants, nurses, and servants is not desirable.

#### Votes for Repairs and Alterations.

No vote was taken on the estimates for the current year for minor repairs and alterations to the Hospitals for the Insane, and this is now the third year that the requirements of these Institutions have been postponed.

At all the Hospitals a large amount of repairs has been carried out by the patients under the direction of the artizan attendants, or by hired labour, from the votes for incidental expenses at the Hospitals, but it has been impossible in this way to overtake the work. The repairs needed to old buildings are many, and there are now serious arrears, involving a large outlay, which, if taken in time, would have cost comparatively little. At the Hospital at Parramatta a large part of the buildings are scarcely habitable, owing to the condition of floors and ceilings, and there has been a constant fear of accidents. It is no economy to put off from year to year necessary work, and allow dilapidations to proceed to such an extent, whilst the management of the Institution is seriously interfered with by the delay.

The absence of any vote for minor alterations have rendered necessary the postponement of several works much needed for the improvement of the Institutions.

#### Cost of Maintenance.

The receipts of the Department from all sources have been £6,631 13s. 5d., or £1,110 13s. 1d. more than in 1880.

TABLE showing total receipts on account of Institutions for the Insane during the Year 1881.

Total .. ..	£ 5,778 7 9	612 0 0	194 7 9	46 17 11	6,631 13 5

The chief increase has been in the amount collected by the Master in Lunacy for the maintenance of patients. The amount for 1880 was £4,576 15s. 10d., and that for 1881, £5,778 7s. 9d., showing an increase of £1,201 11s. 11d.

The amount now collected for maintenance of patients in this Colony has greatly increased since the Lunacy Act came into operation.

The following return shows the amount collected for maintenance and the contribution per patient in New South Wales, and in some of the neighbouring Colonies :—

Year.	Colony.	Average number of Patients Resident.	Amounts paid for Maintenance.	Contribution per Patient on average Number Resident.
			£ s. d.	£ s. d.
1881	New South Wales ... ..	2,139*	6,363 7 6	2 19 6
1880	Victoria ... ..	2,810	4,189 2 3	1 9 9 $\frac{1}{2}$

1880	New Zealand ... ..	1,076	3,993 3 11	3 14 4 $\frac{1}{2}$

\* Including 125 patients at Cook's River.

The total expenditure for the year has been £73,214 7s. 9d., and the amount is made up of the following items:—General expenses, £2,395 1s. 2d.; maintenance in Hospitals for the Insane, £62,295 5s. 8d.; maintenance of Government patients in the Licensed House at Cook's River, £7,317 7s. 6d.; maintenance in Reception House, £1,206 13s. 5d.

The sum for maintenance in Hospitals is £3,785 5s. 10d. in excess for that of the year 1880, but the average number of patients resident increased by 102.

The maintenance rate has been only 6s. 7½d. per head per annum, or about 1½d. a week in excess of that for 1880, without calculating the collections, and 2s. per head per annum, or about ½d. per week less when the collections are deducted.

The maintenance rate for the year 1880 was an exceptionally low one, and the increased cost of maintenance has been due first to a rise in the contract rate for provisions, and, secondly, to the cost of stores as an outfit for the new wing at Gladesville.

The following tables give particulars of expenditure:—

TABLE showing Annual Cost of Patients in Hospitals for the Insane during the Year 1881.

Name of Hospital.	Total Number under Care.	Average Number Resident.	Total Cost.	Amount of Collections.	Total Annual Cost per Patient without deducting Collections.	Annual Cost per Patient deducting Collections.

\* First year and including cost of stores and outfit.

The cost of Government patients at Cook's River has been £7,317 7s. 6d., or at the rate of £1 2s. 6d. per week without deducting collections, or £1 1s. 6d. per week, collections being deducted.

*The Increase of Insanity.*

The following short Return shows the population of New South Wales, the number of registered insane, and the proportion of insane to population on December, 31st, 1861, 1871, and 1881:—

	Population.			Number of Insane.			Proportion per 1,000.		
	Male.	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.
31 December, 1861 .....	202,099	156,179	358,278	533	207	840	2.63	1.32	2.34
Do. 1871 .....	284,150	235,013	519,163	879	508	1,387	3.09	2.16	2.67
Do. 1881 .....	429,278	351,987	781,265	1,360	858	2,218	3.17	2.44	2.84

From these figures it appears that whilst the population has in twenty years increased 118 per cent., the number of registered insane has increased 164 per cent., and the proportion of insane has risen from 2.34 per 1,000, or 1 in 426 to 2.84 per 1,000, or 1 in 352.

Taking the decennial periods, it will be seen that from 1861 to 1871 the increase of population was 45 per cent., and of insane persons 65 per cent., the proportion of insane to population rising from 2.34 to 2.67 per thousand, whilst from 1871 to 1881 the increase of population was 50 per cent., and of the insane 59 per cent., the proportion of insane to population rising only from 2.67 to 2.84 per thousand. A considerable part of this increase is due—

- 1st. To the accumulation of chronic cases, the deaths and discharges of each year not being equal in number to the admissions. This accumulation occurs more rapidly in Australia than in Great Britain, owing to the milder climate, which tends to prolong the lives of Asylum inmates, and produces a very low death rate.
- 2nd. To the establishment of a special Institution for idiot children at Newcastle, to which idiot and imbecile persons formerly kept at home or in Benevolent or other Institutions, have been sent. Since 1871, when this Institution was opened, the number of registered idiotic and imbecile patients has exactly doubled, whilst, as before stated, the population has only increased 50 per cent. It cannot be supposed that there has been this enormous increase of idiocy. The patients existed, but were otherwise provided for, and were not numbered with the insane. On one occasion 18 patients were sent at once from the Benevolent Institution, Sydney, where some of them had long resided, and—
- 3rd. To an alteration in the standard of what constitutes insanity. There has arisen during late years a less degree of toleration on the part of the public for the vagaries of crazy and insane persons, and the teachings of modern science that insanity is a disease of the brain, has tended towards the classification of all diseases of the brain interfering with its functions under the broad heading of insanity and the relegation of the sufferers to special hospitals for treatment.

But whilst admitting that these and other causes account for a large part of the increase in the number of registered insane persons, the statistics of this Colony would seem to point to the fact that there is some real increase in the amount of "occurring insanity." The rate of this increase appears, however, to be slowly declining, and was very decidedly less from 1871 to 1881 than during the previous decennial period.

*Hospital for the Insane, Gladesville.*

The number of patients in Hospital on December 31st, 1880, was 704—335 males and 369 females. The admissions direct and from other Hospitals numbered 344—198 males and 146 females—and the total number under care was 1,048—533 males and 515 females. Of these 143—76 males and 67 females—were discharged recovered, 20—8 males and 12 females—were discharged relieved, 29—15 males and 14 females—were transferred to other Institutions, 1 male escaped and was not retaken, and 47—29 males and 18 females—died. The number remaining on the books on December 31st, 1881, was 808—an equal number of each sex—and of these 2 males and 10 females were absent on leave. The average number resident during the year was 751—371 males and 380 females. The recoveries give a percentage of 42.05 on the admissions, and the deaths one of 6.25 on the average number resident.

The statistics of the Hospital are set forth in the report of the Medical Superintendent and the tables appended thereto. A case of suicide from hanging occurred early in July, and formed the subject of a special inquiry by the Coroner, at which I deemed it advisable to be present. I concurred in the opinion expressed by the jury that no blame was attached to any one; but I thought it necessary to report to you specially on the subject, and to point out that almost all insane persons have at times suicidal impulses, and that it was greatly to be regretted that the overcrowding of the Hospital rendered it necessary to place patients to sleep in a passage never intended for a dormitory, and where the windows were of peculiar construction, and could not be fully glazed without impeding ventilation.

The accidents at this Hospital have been a dislocation of the shoulder, caused by a fall in an epileptic, and one fracture of the radius in an aged man, who was pushed by a fellow-patient and fell. I held special inquiries in these cases, and considered that no blame could be attached to the attendants in charge.

At my visits of inspection during the year I investigated all complaints made by patients which were not clearly and obviously due to delusions, and on one occasion, considering that two attendants had acted harshly and with an unwarrantable display of temper, I advised the immediate dismissal of one and a reduction in the rank and salary of another.

I have at my visits always found the Hospital clean and in good order, the bedding plentiful and in good repair, and the clothing of the patients varied, tidy, and sufficient, and my suggestions on minor matters have met with prompt attention on the part of the Medical Superintendent.

I have repeatedly examined the provisions supplied by contractors, and found them good, except that for nearly two months the contractor for meat gave very great trouble by supplying meat so poor in quality that it could not be received. As repeated fines under the conditions of contract did not cause an improvement, complaint was made to the Treasury, and the contract cancelled.

The

The new wing of the Hospital, which is situated about a quarter of a mile from the main building, was completed and handed over by the contractors about the middle of the year. It consists of two handsome blocks of buildings, each with accommodation for 82 patients, and with central kitchen, dining-room, and offices. It commands a fine and varied view, has been erected of substantial materials according to well thought out plans and in accordance with modern ideas, and has been fitted and furnished so as to be thoroughly comfortable. It was intended entirely for male patients, but the delay in completing new buildings for women at Parramatta has rendered it necessary to set apart one ward for women temporarily, and to carry out certain minor alterations to make the separation of the sexes complete. The furnishing and occupation of this new wing has required considerable care and thought, and has rendered necessary additional labour on the part of all the officers of the Hospital. At the beginning of the year fire-mains were laid round the Hospital by the Colonial Architect, and a fire-engine, with a complete outfit of buckets-stand-pipes, hose, and all necessary appliances supplied. The Medical Superintendent immediately organised a Fire Brigade from the officers and staff, and drew up rules for their guidance, as well as general directions in the event of fire. The Fire Brigade has been inspected by Mr. Bown, who reports that the engine is properly handled, that the arrangements are satisfactory, and the apparatus well kept.

The official visitors—Mr. Alfred Roberts, Dr. Alleyne, and Mr. C. J. Manning (who was appointed to undertake Mr. Owen's duties during his absence from the Colony)—have visited the Hospital 12 times during the year, and their reports, which I have had an opportunity of perusing, all express satisfaction with the general management of the Hospital, and call for no special comment.

In connection with this Hospital as having enjoyed the larger share of the benefit, I desire to put on record my thanks to the Trustees of the Free Public Library, who, through their Librarian (Mr. R. C. Walker) have placed at my disposal for distribution the whole of the magazines and other volumes not required for binding or for the shelves of the library. These magazines have been divided between the Hospitals at Gladesville and Callan Park, and have been a most acceptable gift.

At the close of the year the Hospital lost the services of Mr. Herbert Blaxland, Assistant Medical Officer, who was appointed Medical Superintendent of Callan Park.

I paid visits of inspection to the Hospital on January 17 and 23, February 16, March 14, April 19, May 12, June 8 and 16, July 2 and 30, August 22 and 25, September 16, October 3, and December 14, and on each occasion entered the result of my observations in the Inspectors' Book.

I have on several occasions visited the Hospital for special purposes, and at the close of the year, owing to the ill health of Dr. Joseph (the Medical Superintendent) which incapacitated him from duty, my visits were very frequent.

#### *Hospital for the Insane, Parramatta.*

The number of patients (Free and Convict) on the books of this Hospital on December 31st, 1880, was 780—571 males and 209 females. During the year, 60—48 males and 12 females—were admitted for the first time; 2 males were re-admitted, and 20—15 males and 5 females—were transferred from other Hospitals, making a total under care of 862—636 males and 226 females. Of this number 29—23 males and 6 females—were discharged recovered; 6—4 males and 2 females—were discharged relieved; 3—1 male and 2 females—were transferred; 2 males escaped and were not re-captured; and 43—36 males and 7 females—died, leaving 779 patients—570 males and 209 females—on the books of the Hospital at the close of the year, of whom 2—1 male and 1 female—were absent on leave.

The recoveries give a percentage of 46.77 on the admission, and the deaths one of 5.39 on the average number resident.

The statistics of the Hospital are fully set forth in the report of the Medical Superintendent, and in the tables attached thereto. The only accident of importance during the year was a compound dislocation of a finger, caused by the patient falling in an epileptic fit.

The official visitors—Mr. A. Roberts, Dr. Alleyne, and Mr. C. J. Manning (acting for Mr. Owen)—have visited the Hospital about once a month, and I have had an opportunity of seeing the reports made by them after each visit.

On January 11th the visitors suggested the employment of a shoemaker to repair boots, but it has been found more economical to have them repaired by prison labour in the Parramatta Gaol.

On July 7th the report contains a wholesale condemnation of the mode of serving the patients' dinner, and a recommendation that the system should be reconsidered by the Medical Superintendent with a view to its improvement. I am thoroughly in accord with the visitors that the mode of service is most defective, and I am glad to be able to report that an improvement has been commenced.

On September 10th the visitors pointed out that the laundry arrangements, as regards the washing and distribution of the clothes, were most imperfect, and such as ought not to exist in a public Institution. In this respect I fear little improvement can be effected until the laundry now in course of erection in connection with the new building for women is ready for use.

Some of the reports of the official visitors deal with matters of repair to the building and alterations in structural details, most of which, in the absence of votes for these services, it has been impossible to carry out.

I have visited the Hospital for the purpose of inspection 10 times during the year, generally without prior notice, and at all times found the wards in good order and the patients as a rule free from excitement. The patients have on every occasion had the fullest opportunity of making complaints to me, but such complaints have been singularly few in number, and as a rule proved to be due to delusion. On August 1st a patient complained to me that he had been roughly treated by two attendants four days before, and showed marks on his knees and elbows. As it did not appear that he had previously complained to the Medical Superintendent or Assistant Medical Officer, I made a full inquiry into the matter, and though I acquitted the attendants of the charge of using unnecessary force or harshness, it was clear that there had been a struggle, during which the patient, who was very violent, received some abrasions, and that no report of the matter had been made by the attendant in charge when the scene occurred, or by the attendant in temporary charge on the next bathing day when the abrasions must have been seen. I considered that

both

both had exhibited a very lax idea of the performance of their duties, and recommended the Medical Superintendent to severely reprimand both of them, and to make entries of this reprimand opposite their names in the Staff Register.

At my visits I have found it necessary to make various suggestions for the improvement of the Institution, and certain of these have been carried out, whilst others, such as the provision of further lavatory accommodation, additional seats in the recreation ground, and certain structural alterations, have been delayed from causes beyond the control of the Medical Superintendent.

A very considerable improvement has been made in the dress and general tidiness of the patients, and the turfing and planting of the recreation grounds, and improvements to the shelter sheds has added much both to the appearance of the wards and the comfort of the inmates. I have on two occasions visited the Farm, the management of which admits of improvement in several respects. The buildings are very defective, and the method of disposing of the earth, closet, and other manure is in some respects very unsatisfactory.

At several visits I saw the provisions supplied for the use of the patients, and on each occasion found them satisfactory in quality. The Medical Superintendent reports most favourably of the general supply by the contractor.

The number of patients actively employed, as shown by the daily reports, on the last day of each quarter has been—

	Male.	Female.	Total.
31 March ... ..	209	48	257
30 June ... ..	194	45	239
30 September ... ..	192	46	238
31 December ... ..	190	46	236

The number is still too small, and every effort should be made to induce the patients to engage in some form of occupation.

The new buildings for women, which it was hoped would be ready for occupation by the end of the year, were not nearly completed at that time, and seemed likely to take six months at least before this could be completed. I have repeatedly urged the necessity for proceeding with these works with all possible expedition. The patients have been engaged during the greater part of the year in laying out the roads, gardens, and grounds in connection with them, and it having been found desirable to drain, trench, and level a large area, a very large amount of labour has been necessary. Many of the improvements necessary at this Hospital can only be carried out at considerable expense, and by means of votes specially appropriated for the purpose; but some are within the means which are now and will soon be at the disposal of the Medical Superintendent. I hope to be able at the close of another year to report the opening of the new buildings for women, and a decided improvement in the general arrangements of the Institution.

*Hospital for the Criminal Insane, Parramatta.*

There were 59 patients—53 males and 6 females—in this Hospital on December 31st, 1880; and 21—18 males and 3 females—were admitted during the year, making a total of 80—71 males and 9 females—under care. Of these 6 males recovered; 17—14 males, and 3 females—were transferred to the Hospital for the Insane on expiry of sentence or change of status; and 1 male died, leaving 56—50 males and 6 females—on the Register at the close of the year.

The following return shows the date of admission, and the classification of these patients:—

RETURN showing Date of Admission, Crime, and Classification of Patients in Hospital for the Criminal Insane, Parramatta, on December 31st, 1881.

There has been no accident during the year, and no occurrence calling for special comment. The Official Visitors after visits paid in January and June, commented in their report on the need of some occupation for this class of patients, and this subject has engaged the attention of the Medical Superintendent. For the last nine months of the year the average number of these patients usefully employed was 25; but owing to the danger of escape, and the risk involved in placing tools in the hands of this class of patients, the Medical Superintendent has not found it possible under existing arrangements to find employment for the full number who could be usefully, and with benefit to themselves, engaged in work. When the old buildings now occupied by women have been removed, the area on which they stand, and a large adjoining space, can be set apart as a vegetable garden and cultivated by the criminal patients, affording a suitable and profitable occupation for them.

I visited this Hospital on January 27, February 15, March 21, May 17, June 21, August 12, October 20, and December 21, and at three of these visits I took care to see specially every patient on the Register. On other occasions I spoke of most, if not all the patients, and gave all an opportunity of speaking to me. I heard no complaints of harsh or unkind treatment, and the patients were as a rule quiet and orderly. The wards have been always in good order, and the airing courts which were grassed and planted last year are neatly kept. I have advised alterations to two small seclusion yards, the present arrangements of which are I consider unsatisfactory.

#### *Hospital for the Insane, Callan Park.*

The number of admissions to this Institution was 53, of which 43 were admitted for the first time, 8 re-admitted, and 2 transferred, and the recoveries show a percentage of 50·98 on the number admitted. The average number resident was 135—all males—and the death rate was 6·62 on this number.

The statistics of this Institution are given at length in the report of the Medical Superintendent, and in the tables attached thereto.

I visited the Hospital for the purpose of inspection 11 times during the year, and as I frequently found it necessary to visit the new Hospital in process of construction, I have had ample opportunities of obtaining a thorough knowledge of the general administration of the Institution, and of consulting with the Medical Superintendent on various points in connection therewith. At my various visits I found the Hospital in good order, the rooms thoroughly clean, and the patients well and comfortably clad—a large number having special suits to wear on Sunday and at entertainments.

I saw the patients at dinner on three occasions, and found the food of good quality, well cooked, and served with neatness, order, and care. The arrangement for meals has occupied the special attention of Dr. Scholes, who rightly attached a considerable importance to them in relation to the health of the patients, and to the general good order and discipline of the establishment.

The number of patients usefully employed has always been considerably over a third of the total number, and at my last visit during the year was 53 out of a total of 138. By the labour of the patients, acting under the direction of the artisan and other attendants, the Institution has been kept in a creditable state of repair, and a large amount of work carried out in the garden and grounds, which are being gradually formed and brought into order.

At most of my visits I visited the stores and saw the bread, groceries, &c., supplied by the contractor, which were as a rule thoroughly good and equal to sample. At the beginning of the year the contractor for meat gave much trouble by supplying beef and mutton of inferior quality, rendering it necessary for the Superintendent to purchase other supplies; but an appeal to the Treasury resulted in this contract being cancelled, and under the new one since taken the articles supplied have been satisfactory.

At each of my visits to the Hospital I have examined the statutory books and the case books, which have been kept with care and regularity. The amount of seclusion has been very small, and was chiefly employed in cases of epileptic excitement. At one of my visits I found a patient in restraint by camisole, and at another a patient was in restraint by muffs. In both these cases the restraint was only used for short periods, and I considered the course adopted to be necessary. In the second case the patient was an African black, unable to speak English, of vicious propensities and very degraded habits.

On several occasions I found it necessary to make special inquiries with regard to complaints made by patients, but in all such as were well founded and reasonable I saw no reason to question the decision and action of the Medical Superintendent.

The only accident of importance during the year was the choking of a patient by the impaction of a piece of meat in the larynx during dinner. The patient was able to work in the grounds, and was not deemed a fit subject for minced or liquid food. Dr. Scholes was at hand when the accident occurred, and performed tracheotomy, but without averting a fatal result. At the inquiry before the Coroner the jury returned a verdict of accidental death, and added a special rider that all proper means and care had been taken to prevent it.

Early in August a fire occurred in one of the attendants' rooms. The gas pendant came unscrewed or broke off near the ceiling, which was of wood, and immediately caught fire; happily assistance was at hand, and the fire got under before much damage was done. Hand buckets and pumps are placed in the wards in convenient situations, but there is no special fire main, and at present the pressure from the Sydney water supply which is laid on to the hospital is, owing to the height of the site, insufficient to afford any protection. I consider it advisable that an engine should be supplied and pipes arranged in connection with the underground tanks.

Early in December the Medical Superintendent (Dr. Scholes) resigned his appointment, having accepted the important position of Medical Superintendent of the Asylum for the Insane at Goodna, in Queensland, which places him at the head of the Lunacy Department in that Colony. The resignation of Dr. Scholes was a great loss to the Institution, over which he had presided for two years with ability and success, and to the Department generally. The vacancy thus caused was filled by the appointment of Mr. Herbert Blaxland, the Assistant Medical Officer at the Hospital at Gladesville.

The works at the new Hospital have made very considerable progress during the year, but their completion, unless some special efforts are made, does not appear probable within the contract time. Any delay will be fraught with trouble and inconvenience to the Department, and involve the further overcrowding of the present Hospital.

*Hospital for the Insane, Newcastle.*

On December 31st, 1880, the number of inmates was 228—124 males and 104 females; and during the year 3 males and 1 female were admitted for the first time, and 10 males and 3 females were transferred from Gladesville, making a total of 245 patients—137 males and 108 females—under care.

During the year 2 male patients were transferred to Gladesville, having become somewhat violent and unmanageable, and 7 males and 1 female died, leaving at the close of the year 235 patients—128 males and 107 females. One male patient was absent on trial at the end of the year.

The death rate shows the very low proportion of 3.47 on the average number resident, the smallest percentage since the opening of the Hospital. The number of patients increased from 228 to 235 during the year, but there was no addition to the day or dormitory space, and the wards, especially in the female division, are much overcrowded.

During the year no accident occurred, and there was entire freedom from epidemic disease.

I visited the Institution on March 23rd, May 28th, August 16th, and November 4th, and the following are copies of my entries in the Inspector's Book at these visits:—

"March 23.—I have this day visited this Hospital, and seen all the patients, 227 in number. At my last visit, 124 males and 104 females were on the Register; 2 males have since died, 1 male has been transferred to Gladesville, and 1 male and 1 female have been admitted. The numbers at present are—122 males and 105 females. I saw the papers received with the two patients recently admitted, and found them in order, and I examined these patients, and consider them fit subjects for the Institution. One of them is a pitifully deformed child, suffering from cleft palate and harelip, and so horrible in appearance that the other poor children shrink from him. The general health of the patients is good. There is complete absence of infectious disease, and the few who are sick are suffering either from slight ailments, or from disease dependent on or connected with their enfeebled condition of body and mind. No complaints of any kind were made to me, and I had pleasure in witnessing the trust and confidence displayed by the patients in the attendants and nurses, and the interest taken by the latter in their charges. I found, from the reports, that 114 were able to attend church on Sunday last, and that the number faulty in habits at night does not now number over 20 of both sexes. I saw all the patients in both male and female divisions at dinner, which consisted of Irish-stew, with an after-dish of rice and milk for the children. The meal was served with the greatest order, and the behaviour of the patients was excellent. The rooms were, as a rule, clean and in good order, but I noticed a want of paint in several parts of the Institution. The bedsteads in both divisions, the main entrance gates, the outside of the offices, and other parts, should be re-painted as soon as possible. The carpenter on the staff of the Hospital has carried out several alterations and improvements, and is now engaged in the erection of a shed in the female division, which is much required, to afford day accommodation in the part now much overcrowded with patients. I regret to find that several requisitions for furniture and for alterations and repairs, made some time since on the Colonial Architect's Department, are as yet unattended to, and the delay in carrying out alterations to the runaway pipes from the upstairs lavatories is really serious.

"I saw and signed the statutory books, from which it appears that no accident has occurred, and that restraint by muffs or other means has only been necessary in two cases since my last visit. I examined all the departmental records, saw the case books and day and night reports, and inquired from the Superintendent as to the conduct of the staff, hearing, I am glad to say, an excellent report. I consulted with the Superintendent as to the precautions against fire. The arrangements are at present defective, and the only assistance at hand is the town Fire Brigade. This body, it appears, is collecting funds for the purchase of a steam-engine, and having been allowed the use of the Hospital grounds to hold *fêtes* for collecting for this purpose, have offered to hand over their manual engine for the Hospital service. I am of opinion that this offer should be accepted, and as soon as the engine is received that the necessary suction and delivery hose should be purchased and a Fire Brigade formed from the members of the staff of the Hospital. It will be advisable also to draw up rules to be observed in case of fire, and to add these to the general regulations for attendants."

"May 28.—I have this day visited this Hospital without any prior notice, and spent the whole of the morning in a general inquiry into the working of the Institution, in seeing the patients, and in visiting the dormitories and other rooms occupied by them. The usual Saturday cleaning was in progress, and it was bathing day in the male division. There were of course the bustle and want of order incident to these operations, but the general appearance of the Hospital was satisfactory, and the patients as a rule cleanly and fairly tidy in dress. The general health was most satisfactory—there was no one in bed in the female division; and of the eight in bed in the male all were suffering either from such minor ailments as catarrh, or from paralysis and other chronic affection associated with their mental state. No one was in seclusion, and it appears that this is rarely found necessary, and then only for short periods. Three male patients were in restraint by means of muffs, and this method of treatment has been continued during the day time in two of these cases for several weeks owing to very destructive and faulty habits. I have advised the Superintendent to omit the muffs for a time in two cases (A. and J.), and in the third case (S.) the habits are so faulty and the destructive tendencies so extreme that I deem a change necessary, and, as the patient is in age and stature a man, it will be advisable to transfer him to Gladesville.

"The number of patients is now 124 male and 107 female, and the only changes since my last visit are the admission of 3 females and 2 males from Gladesville, and the death of 1 female from old age and general debility.

"The number of patients actively employed on the 27th instant (yesterday) was 37 male and 27 female; and the number shown on the night report as wet was 8 male and 11 female, and as dirty 4 male and 3 female. The latter numbers appear somewhat high, and it is most desirable, as tending to cure faulty habits, that these feeble patients should by every effort and care be induced to attend to the calls of nature before going to bed. I found the rooms clean, and every part of the bedding clean and sufficient. A very considerable improvement has been made in the dress of the smaller boys, who now look neater and better, and are more serviceably dressed than at any former time; and I learn with satisfaction that the Superintendent is about to carry out similar improvements in the dress of the more imbecile and adult male patients. At present the condition of these, especially in No. 2 yard, is not satisfactory, and will admit of considerable improvement. It appears, although this is the end of the fifth month, that the uniform for attendants asked for at the beginning of the year is not yet supplied, and there has also been great delay in completing the requisitions for patients' clothing, and the supply of boots and socks and other articles is now very short. The Superintendent reports favourably of the contractors for provisions; and I found the milk, cheese, butter, and other articles in the store good.

"The kitchen arrangements appear to be working satisfactorily, but I am not able to report in the same way of the laundry, which is wanting in cleanliness and order, and in which at mid-day there were considerable arrears of work. I have requested the Superintendent to furnish me with a return showing the number of articles washed in a week—particularising the different kinds of garments, and stating the number of laundresses, and the number of patients assisting—with a view of considering what alterations are necessary, and of introducing further labour-saving apparatus should this appear desirable. I have learned to-day that the scheme for the water supply of the city is so far settled that some preliminary tenders have been taken, and under these circumstances it will not, I think, be desirable to lay down any fire mains in connection with the present water supply, since this can never be thoroughly satisfactory, and will involve considerable expense.

"The acquisition of a hand engine, the organisation of a Fire Brigade, and the placing of fire-plugs on the rising mains from the wells and tank are, however, clearly desirable, and should be carried out with as little delay as possible."

"August 16.—I have this day visited this Hospital, and taken care to see and speak to every patient, and marking off each name in my list. I specially examined all recently admitted, and all displaying any sign of ill-health. The number is now 234—127 males and 107 females, and the following changes have taken place since my last visit:—Seven have been admitted (6 from Gladesville and 1 direct), 1 has been transferred to Gladesville, and 3 have died. The causes of death were old age, marasmus, and erysipelas; all these were males. No changes have taken place in the female division. One patient is absent on leave, his name still remaining on the books.

"I found the patients, as a rule, in excellent health, and quite free from infectious or acute disease. Seven males and 2 females were in bed, but all were suffering either from debility or from chronic ailments. No complaints of any kind were made to me, and the general appearance was one of happiness and contentment. No one was in seclusion or restraint, and from the "Medical Journal" it appears that the former is rarely found necessary, and that the latter has been employed by means of muffs only on seven days since my last visit to prevent destruction of clothing by a very demented

demented patient. The dress of the female patients was clean and tidy, and in all respects satisfactory; and that of the male patients was warm and sufficient, though somewhat unsightly and monotonous. I think further care and attention in individual cases will effect improvements in this respect in this division of the Hospital.

"The rooms throughout were clean, and the bedding in good order, but some of the hair pillows require repicking. I visited the general stores, and saw the supplies of provisions and clothing. The provisions generally appeared good, and some articles were even better than the authorised samples. The butter, however, was very salt, and not so good as it should be, and the Superintendent directed its return. In the clothing store I found a supply of Scotch twill shirts, badly cut, badly sewn, and altogether inferior to the sample, and I at once caused a remonstrance to be addressed to the Superintendent of Stores with regard to the supply of such inferior articles. They are really a waste of good material, and will not last a tithe of the time that shirts properly cut and strongly sewn should and would.

"I saw a good and sufficient dinner of meat-pie served to the patients in both divisions, together with rice and milk for the feeble and sick. The Superintendent stated that the pie was not so nice as usual, owing to the absence of the cook from illness, but it was thoroughly wholesome, though somewhat overcooked. I suggested to the Superintendent some improvement in the manner of serving the dinners, especially in the male division, and trust that I shall find my suggestions carried out at my next visit. Some matters which were long ago made the subject of requisition on the Colonial Architect's Department are unattended to, and the need of a new gas main and of an efficient drying closet are severely felt. The present drying closet has been out of order and useless for more than a year, and the labour in the laundry is greatly increased by the absence of this essential help.

"The Medical Officer has re-vaccinated the whole of the patients, and reports that in only five instances did the operation fail, and in none was there an unfavourable or severe symptom.

"I saw and signed the statutory books, and examined the medical case books and the usual departmental records.

"The Chaplains and Medical Officers have attended regularly and with sufficient frequency, and the members of the general staff, of whom the Superintendent reports very favourably, appear to be efficient in the discharge of duties often onerous and unpleasant, and are thoroughly humane and kind to the patients."

"November 4.—I have this day visited this Hospital without any prior notice, and have seen all the patients and examined all the dormitories and day rooms, as well as the kitchen, laundry, and outbuildings, and other parts of the Institution.

"The number of patients is 234, of whom 127 are males and 107 females. The changes since my last visit have been few. Two male patients have been admitted from Gladesville, and 1 direct, and 2 males have died, both being of advanced age, and for a long period inmates of the Hospital. I saw the patient admitted direct, and examined the papers on which he was received. He is suffering from advanced and chronic brain disease, and is a fit subject for the Institution.

"The patients as a rule appeared in excellent health, there is complete freedom from epidemic disease, and 7 only—all males—were in bed. These are suffering either from minor ailments, or from chronic affections connected with their mental condition. There are two or three cases of ringworm and chronic skin disease, but all are receiving attention. I was as usual pleased with the happy look of the female patients, and am glad to be able to state that the male patients, though less neat and tidy than the females, appear well and carefully attended to. In this division the issue of straw or felt hats to a number of the more helpful and cleanly, instead of the cloth caps at present worn, would much improve their appearance, and I am gratified to learn that a change in this direction is under the consideration of the Superintendent.

"The dormitories and other rooms throughout the buildings were clean and in good order, and a number have been improved in appearance by repainting when necessary. The outbuildings generally were in fair order, but the kitchen block would be much improved by re-painting. I am far from satisfied with the general kitchen arrangements, and particularly with the cooking of the meat, which appears to be roasted or boiled long before it is required, and then subjected to an obnoxious process of steaming to keep it hot until the dinner hour.

"As it was the general bathing day, the number of patients in the sewing room and laundry, and otherwise actively employed, was somewhat less than usual.

"The general grounds have suffered severely from recent storms which have destroyed a great deal of the fencing, and caused great havoc among the plants and vegetables. The fences are now undergoing repair, and the garden is being re-planted and put in order.

"I saw the female patients at dinner, which was served with commendable order and regularity.

"The statutory books and departmental records were examined and found as a rule in good order, though some of the books, and notably the Medical Journal, were not written up to date. In the case of this book, as coming within the express provisions of the Lunacy Act, I regard the omission as serious, and am particularly desirous that it should not occur in future.

"The Superintendent reports favourably of the contractors, and such articles as I saw were of good quality.

"A change has taken place in the staff by the resignation of the senior nurse, but the vacancy has been satisfactorily filled, and the staff generally appears efficient, and is reported by the Superintendent to be well conducted."

The following tables give the main statistics of the Hospital for the year:—

TABLE I.

SHOWING the Admissions, Re-admissions, Discharges, and Deaths, in the Hospital for the Insane, Newcastle, during the Year 1881.

Absent on trial, 31st December	1	0	1

I visited this Hospital on April 29 and 30, and on November 20 and 21, and the following are copies of my entries in the Inspectors' Book on these occasions:—

"April 29.—I have this day visited this Hospital, and seen all the patients—65 in number. I spoke to and specially examined each one, and gave all an opportunity of speaking to me and making any complaints. All the complaints made related to detention in Hospital, or to grievances manifestly due to delusion, except one, and in this instance the patient stated that his finger was broken whilst being placed in muffs by the attendants. On inquiry, it appeared that it had been deemed necessary to place him in muffs, owing to his violent and eccentric conduct, during one evening about two months ago. This was carried out by the sanction and with the authority of the Superintendent, and it is possible the finger may have been strained at this time, but I failed to discover any fracture, or indeed anything the matter with it at present, although it is still kept by the patient in an elaborate arrangement of bandages. This patient imagines he is worked on and influenced at night in some mysterious way, and the trifling injury to the finger is, no doubt, exaggerated and kept up by delusion.

"The patients are quiet in demeanour, and with two or three exceptions, tidy in dress. The clothing was, as a rule, sufficient and good, but owing to delay in forwarding articles from the Store Department on requisitions dated March 1st, the supply of socks is short, and a few of the patients are without them. Boots and undershirts are also needed, and I directed telegrams to be sent to the Store Department urging an immediate supply. The general health of the patients is good, and the two whom I saw in consultation with Dr. Daniell at my last visit have improved in health. One or two others have, however, failed, and a man named N— is extremely thin and ill, and seems to be falling off both mentally and physically. One patient was in restraint by muffs, owing to sudden and unprovoked assaults on both patients and attendants. In this case the muffs have been used occasionally for short periods since my last visit, and in two other cases they have been used on one occasion, and for a few hours only. I found one patient in bed, owing to a bad attack of acute recurrent insanity.

"The statutory books, which I saw and signed, are correctly kept, and the case books are in good order and written up to a recent date.

"Two patients have been admitted since my last visit, and I saw these in the office and examined into their mental condition. They are both fit cases for Hospital treatment, and the papers on which they were forwarded are correct in form.

"The dormitories and day-rooms, the attendants' rooms, laundry, kitchen, store, and other offices were all clean and in good order. The patients' bedding was plentiful and clean, but the hair pillows require re-picking and the pillow-cases repairing. In the store I examined various articles of provisions, and found all equal to sample. The Superintendent reports favourably of the manner in which the contractor is carrying out the supply. From the day and night reports it appears that the number of patients actively employed is 27, and the number attending Divine Service on Sundays 24. There is an average of 3 wet and 1 dirty every night.

"On inquiry I find that the visits of the Medical Officer and Chaplains are paid with regularity and sufficient frequency. The more quiet and self-controlled patients are permitted to attend entertainments in the town on the rare occasions when these occur, and walking parties go out on most Sundays. As the opportunities of amusement are infrequent, I have suggested to the Superintendent the advisability of allowing some of the patients under proper supervision to go out for a walk as frequently as possible, so as to afford them an opportunity of escape from the monotony of their surroundings as tending to mental quietude and restoration. I examined the departmental records, which are in good order. A new copper was fitted for the supply of bath water immediately after my last visit, and the carpenter's and blacksmith's shops have been recently completed and are now occupied.

"Several minor improvements have been made in the buildings, which are now in good repair throughout, and a large part of the space inside the walls has been laid out in flower-borders with the effect of rendering the place much more cheerful.

"The water supply obtained from the tank and well is at present sufficient, and with an ordinary season it is anticipated that there will be no necessity of carting a supply from the creek during the winter."

"November 20 and 21.—I visited this Hospital on these days, on the former examining the statutory books and the departmental records, and on the latter inspecting the Institution and seeing all the patients.

"The statutory books are correctly kept and written up to a recent date. From the Register it appears that 1 patient has been admitted—transferred from Gladsville—and 1 has died from epilepsy, and 1 has been discharged recovered since the date of my last visit. From the Medical Journal it appears that an average of about 13 have been under medical treatment, mainly for epilepsy and chronic bodily ailments. No one has been in restraint since June 11, and the instances of seclusion have been few and infrequent. I visited all the rooms occupied by patients, and found them clean and in excellent order. The beds have been recently re-mattressed, and the bedding was clean and sufficient. The patients were quiet in demeanour, although confined to the day-room and verandah by wet weather, were neatly and comfortably clothed, and with two exceptions free from all complaints.

"Two patients (F. and S.), as at former visits, made various complaints, but on investigation these resolved themselves into charges of secret poisoning and mysterious interference during sleep and on other occasions, and were clearly the result of delusions. I saw and spoke to every patient, and examined into their mental and physical condition. The general health of the patients is good; but three or four looked thin and out of health, and I deemed it necessary to examine two of them with a view to the discovery of chest or other affections. In one of these (J.) there was slight bronchitis, but in the other I could detect no sign of pulmonary or other mischief. Two patients were in bed, one owing to advanced phthisis pulmonalis with occasional and exhausting hæmoptysis, and the other from an extremely severe attack of recurrent mania. The case of phthisis requires special care and attention. Owing to the patient's extreme and frequently expressed dread of the bleeding, a special attendant is left with this patient every night.

I examined one patient (A. F.) with a view to discharge, and signed the necessary order. His health has greatly improved, and his whole aspect has greatly improved also. No delusions or hallucinations could be detected, and it is hoped the recurrent insanity from which he has suffered may with the improved physical condition hold off. I visited the laundry, kitchen, stores, and offices, and found all clean and orderly. In the general store I found a general supply of all articles of clothing, and the supplies received from prisons are, with the exception of the brushware, which is as usual indifferent, reported as satisfactory. In the provision store I found all the articles satisfactory, and the Superintendent reports very favourably of the conduct of the contractor.

As the day was so wet, the patients usually engaged in out-door avocations were not at work as usual, but it appears from the daily reports that about 30 are actively employed. The number attending Divine Service is from 20 to 24, and their conduct is spoken of as invariably decorous and correct. From the visiting book it appears that the Visiting Medical Officers and Chaplains continue to visit the Institution with commendable regularity.

The Superintendent reports favourably of the conduct of the staff under his directions, and though there has since been only five attendants instead of six as heretofore, the Institution has been working satisfactorily except on occasional emergencies.

Recent rains have caused the water supply in well and tank to be abundant, but for five months all the water used in the Hospital was carted from the creek, and it is clear that it will be necessary to deepen the well to insure a constant supply from this source.

*Reception House for the Insane, Darlinghurst.*

The number remaining in this Institution on December 31st, 1880 was 6—2 males and 4 females; the number admitted for the first time during the year was 284—185 males and 99 females; and the number re-admitted 38—21 males and 17 females, giving a total of 328—208 males and 120 females—under care during the year. Of these 17—10 males and 7 females—were discharged recovered; 1 male was discharged relieved; 303—192 males and 111 females—were transferred to the Hospitals for the Insane for treatment; 1 male was discharged to the Police Court; 3—2 males and 1 female—died; and 3—2 males and 1 female—were in the Institution at the close of the year. Of the patients sent to Hospitals, 262 went to Gladesville, 1 to Parramatta, 39 to Callan Park, and 1 to Newcastle.

I have visited the Institution for the purpose of inspection 14 times during the year, and on several other occasions to see individual patients or to make inquiries, and at all times found the Institution clean and in good order, and the patients comfortable and well cared for.

At a visit on April 23rd, I found a patient suffering from typhoid fever. He was admitted on April 13th with two medical certificates duly filled in and signed, and it was apparent that the delirium sometimes attending the outset of fever had been mistaken for mental aberration. As he could not have been removed without danger he was kept in the Institution until convalescent.

At the latter part of the year, when it was seen that the Lunacy Act Amendment Bill, which proposed the reception at this Institution of all doubtful cases of insanity sent from the Police Courts on remand was likely to become law, steps were taken to fit up additional rooms in the basement story for male patients, and to carry out some necessary minor alterations.

The Reception House now contains room for 15 men and 12 women, and this it is hoped will be found sufficient to meet the extra pressure likely to be put on the accommodation by the provisions of the Lunacy Act Amendment Act. Some addition to the present staff will, however, be necessary. I have pleasure in reporting that the general management of the Institution during the year has been satisfactory.

Observation Ward H. M. Gaol, Darlinghurst.

On December 31st, 1880, the number of patients in this ward under the provisions of section 60 of the Lunacy Act was 3, and 59 were admitted during the year, making a total of 62. Of these 30 were discharged as sane, 23 were sent to Hospitals for the Insane, the majority to the Hospital for the Criminal Insane at Parramatta, and 1 was forwarded to the Police Court. There were no deaths during the year, and the number remaining on December 31st, 1881, was 8.

The establishment of this ward, and the careful and prolonged observation to which prisoners are subjected in it has done much to defeat malingering, and to enable the Medical Officers to define with some approach to exactness the mental status and responsibility of the inmates.

In addition to the cases admitted under the provisions of the Lunacy Act, the Ward has been used for the reception of cases of doubtful insanity remanded from the Police Courts, and for cases acquitted on the ground of insanity, and awaiting the pleasure of the Governor as to their disposal.

Of such cases 10 were in the ward at the close of 1880, and 305 have been admitted since.

The

I inspected the ward on March 16th, June 7th, and September 26th, and on each occasion saw and spoke to every inmate, and gave all an opportunity of stating their grievances.

On March 16th and June 7th one inmate made a series of complaints with regard to his treatment by the Medical Officer, into which I made full inquiry, with the result that I saw no reason to think that the patient, who was a persistent malingerer, had been subject to any uncalled for hardship, or that the action of the Medical Officer had been other than judicious.

At each visit I found the ward clean and in excellent order, and the register and report books, which are kept by the warder-in-charge, were written up to date and kept with accuracy and intelligence.

*Licensed House for the Insane, Cook's River.*

The number of patients in this Institution on December 31st, 1880, was 135—6 males and 219 females. During the year 14—5 males and 9 females—were admitted direct; and 11—1 male and 10 females—were transferred from the Hospitals for the Insane; making a total of 160—12 males and 148 females—under care.

Of these 7—4 males and 3 females—recovered; 7—2 males and 5 females—were discharged relieved; and 8 females died, leaving at the end of the year 138 patients—6 males and 132 females—on the books of the Institution.

The numbers discharged recovered and relieved, each gave a percentage of 50.00 on the admissions, and the death rate was 5.83 per cent. on the average number resident. Of the deaths, no less than 5 out of 8 were due to Pulmonary Consumption.

At the close of the year, 125 of the patients were supported by the Government under an agreement with the proprietor, and 6 males and 7 females were private patients at the charge of their friends, or maintained from their own estates under the direction of the Supreme Court.

I visited the Institution on February 2nd and 26th, April 5th, June 2nd, July 7th, August 23rd, September 17th, October 3rd and 22nd, and November 30th, on all occasions except one without prior notice, and found the Institution in good order and the patients comfortable and well cared for. On three occasions I saw the patients at dinner and found the provisions wholesome and well cooked, unstinted in quantity, and served with order and care. I made inquiries as to the religious services and amusements for the patients, and found that the Chaplains as a rule attended with regularity, though, owing to some changes, no Roman Catholic Service was held for some weeks, and that the Superintendent had been careful to provide amusement for the inmates in various ways:

The only accident during the year was the fracture of the neck of the thigh-bone, which occurred through the patient being pushed off the edge of the verandah by another patient. I made full inquiry into this case and saw no reason to think there had been any want of care on the part of the nurses.

The Official Visitors, Messrs. A. Roberts and C. J. Manning, and Dr. Alleyne have visited the Institution about once a month. I have had opportunities of seeing their reports in which there are no entries requiring comment.

I have satisfaction in being able to report favourably of the general management of this Institution. The accommodation for the Government patients is satisfactory as to space, the buildings are in good repair, and have been made as cheerful, by means of painting, &c., as their style and situation will admit of. I think it necessary however, in prospect of the renewal of the license which was last renewed before my official inspection of the Institution commenced, to point out that the accommodation for paying patients admits of considerable improvement, and that some arrangements to admit of further classification of these patients in accordance with their mental conditions are desirable.

## APPENDIX A.

Sir,

Lunacy Department, Hospital for the Insane, Gladesville, 6 April, 1882.

I have the honor to submit for your information a report upon the Hospital for the Insane at Gladesville for the year 1881, accompanied by the usual statistical tables.

Having been appointed in the absence of Dr. Joseph, on leave, to the temporary charge of the Hospital on the 26th of January of this year I am not able to furnish information on its condition other than that gleaned from these tables.

On December 31st, 1880, the number of patients in Hospital was 701; of whom 336 were males and 365 females.

The admissions during the year numbered 288 patients entered for the first time; of whom 170 were males and 118 females; of re-admissions there were 25 males and 27 females, a total of 52; while 3 males and 1 female were transferred from other Institutions for the Insane.

The total number of patients under care during the year was 1,048; the average daily number resident being 371 males and 380 females, a total of 751.

The number discharged or died during the year was 240, of whom 129 were males and 111 females; of these 76 males and 67 females recovered, a total of 143; 8 males and 12 females, total 20, were relieved; 15 males and 14 females were transferred; 1 male escaped, and was not re-captured; and 29 males and 18 females died.

On the 31st December, 1881, there remained on the Hospital Register 404 males and 404 females; making a total under care of 808; of these, however, 2 males and 10 females were absent on trial, under 42 Victoria No. 7, section 82.

The percentage of recoveries has been among males 38.97 and females 46.20, making a total percentage of 42.05 among both sexes.

The percentage of those relieved on admissions and re-admissions has been among males 4.10 and females 8.27, making a total of 5.88.

The percentage of deaths has been among females 4.73 and males 7.81, of both sexes an average total of 6.25.

The number of admissions for each year since 1870 is given in the following table:—

Year.	No. of admissions.	Year.	No. of admissions.
1870	197	1876	340
1871	277	1877	433
1872	268	1878	400
1873	296	1879	333
1874	312	1880	311
1875	337	1881	344

Of the 344 patients admitted during the year, 209 were admitted by order, 80 by request of friends, 51 by request of officials and legal guardians, and 4 by transfer under orders issued by the Colonial Secretary.

There was one case of suicide by hanging during the year, the particulars of which have been already reported to you.

The only serious accidents were 2, one being a dislocation of the shoulder, and the second a fracture of one of the bones of the forearm.

During the year, on the 28th of June, the new branch building at the Hill was opened, and though intended for the accommodation of men alone it was deemed advisable, pending the erection of buildings for females at Parramatta, to make a temporary arrangement by which half of the building should be used for female patients, and the rest for males. This has been found to answer satisfactorily, but even with this accommodation the women's dormitories in the old building are still much overcrowded.

Copies of the following newspapers have been received, and our grateful thanks are accorded to the proprietors—*The Burrangong Chronicle, The Bathurst Free Press, The Bathurst Times, The Clarence and Richmond River Examiner, The Denliquin Chronicle, Dubbo Dispatch, Grafton Argus, Maitland Mercury, Riverina Grazier, Wagga Advertiser, Wagga Express, Yass Courier, Australian Churchman, Bega Gazette, Social Reformer.*

Two copies of the following country newspapers are forwarded for one subscription, and this liberality is fully appreciated:—*Burrangong Argus, Goulburn Herald and Chronicle, Grafton Observer, Illawarra Mercury, Queanbeyan Age, Southern Argus, Western Post.*

Of the Sydney papers, the *Sydney Daily Telegraph* is the only one which forwards a copy to the Hospital gratuitously.

From Mr. Fletcher we have received several parrots and other birds, while Mr. C. W. Lawson, of Mudgee, has kindly sent us two kangaroos and a wallaroo.

To Mrs. Darvall, and Mr. Terry, of Ryde, our thanks are due for large quantities of fruit, while large parcels of illustrated and other papers have been received from Mr. W. Maddocks, Sydney, Mrs. H. Brown, Hunter's Hill, Mr. S. Leigh, Mr. Fowler, and the Secretary of the Australian Club.

To Mrs. Ernest Docker are we indebted for a package of playing cards.

The following donations for amusements have been received during the year:—Mrs. V., £5; Anonymous, £2; Mrs. B., £5; Mrs. B., £1; Dr. M., £3 3s.

I have, &amp;c.,

W. C. WILLIAMSON, M.D.,

Medical Superintendent.

To the Inspector General of the Insane.

APPENDIX B.

HOSPITAL FOR THE INSANE, PARRAMATTA.

Sir,

18 April, 1882.

I have the honor to submit for your information my report upon the Hospitals for the Insane, Parramatta, for the year 1881, with the usual statistical tables. The number of patients on 31st December, 1880, was 839, thus classified—

Free male ... .. . . .	553
Free female ... .. . . .	205
Criminal male ... .. . . .	53
Criminal female ... .. . . .	6
Convict male ... .. . . .	18
Convict female ... .. . . .	4
	839

The number of patients admitted was 103, thus classified—

Free male ... .. . . .	65
Free female ... .. . . .	17
Criminal male ... .. . . .	18
Criminal female ... .. . . .	3
	103

The number of patients discharged recovered was 35, thus classified—

Free male ... .. . . .	23
Free female ... .. . . .	6
Criminal male .. .. . . .	6
	35

The number of patients absent on leave on 31st December, 1881, was 1 male and 1 female.

The number of deaths was 44, thus classified—

Free male ... .. . . .	36
Free female ... .. . . .	6
Criminal male ... .. . . .	1
Convict female ... .. . . .	1
	44

The number of Patients in Hospital on 31st December, 1881, was 835, thus classified—

Free male ... .. . . .	552
Free female ... .. . . .	206
Criminal male ... .. . . .	50
Criminal female ... .. . . .	6
Convict male ... .. . . .	18
Convict female ... .. . . .	3
	835

The total number of patients under care was 942.

The number of patients of all classes discharged recovered was 35, being at the rate of 43.20 per cent. of recoveries upon first admissions.

The recoveries upon the admission of free patients, male and female, were at the rate of 46.77 per cent.

The deaths numbered 44, representing a low rate of mortality, or 4.67 per cent. on all under care.

The average daily number resident was 836, on which the death rate was 5.26 per cent.

Some of the patients who died had reached an advanced age, and had been for many years inmates of the Institution. The oldest male patient dying during the year was 81 years of age, having been a resident only 3 months. The male patient dying who had been longest in residence was 68 years of age, having been for 29 years an inmate. The youngest patient dying was 27 years of age, with a duration of residence of 7 years.

The shortest duration of residence in the male division was a man aged 30, after 2 months' residence.

The oldest female resident was 74, with 2 years' duration of residence. The longest duration of residence was 35 years, of a woman who died at 56 years of age.

The youngest female patient who died was 36 years of age; she had, however, been an inmate for 6 years. The briefest residence in the female division was for 37 days, of a woman 71 years of age.

The average age of the men who died was 55 years.

The average age of the women who died was 57 years.

The average duration of the men's residence was 8 years and 8 months.

The average duration of the women's residence was 6 years and 6 months.

Two patients escaped, the particulars of which have already been reported.

Throughout the year the sanitary condition of the patients has been singularly good, marked by an entire absence of epidemic diseases or severe constitutional maladies.

The rate of mortality has been unusually low, being less than 5 per cent. upon all under care. No death has occurred through suicide, or by any act of violence or injury, and in only one instance did sudden death overtake a patient, which, on inquiry before the Coroner, was found attributable to apoplexy.

In conformity with instructions received by circular letter of July 11th, I commenced the re-vaccination of the staff and patients, assisted by my colleague, Dr. Beattie. Lymph was obtained from the Government Vaccine Institution, and healthy children from the neighbourhood were selected as the means of setting up direct vaccination for the patients and others, and maintaining a supply of pure lymph, as in no instance was lymph employed obtained from a patient, however healthy. Owing to the anxiety of parents at the time of the threatened epidemic of small-pox to submit their children as quickly as possible to the influence of vaccination, it soon became difficult to obtain any who had not been successfully operated upon; this, added to the scarcity of lymph at the parent institution, has deferred the completion of the re-vaccination of the whole of the inmates. A very large proportion of patients I found had been previously protected by vaccination, exhibiting the characteristic cicatrices, whilst in many instances patients resolutely refused to submit themselves to the operation. As my instructions directed me to respect the wishes of the patients to a large extent, I have not made the operation compulsory in any instance.

During the great heat of summer, and with the evident decline of the epidemic, I was less anxious to complete the operation throughout the Institution, but I trust to be able to report before long that every inmate has been successfully vaccinated.

I did not think it necessary, in the absence of direct instruction to the contrary, to prohibit the visitation of the friends of the patients during the sickly period, but great caution was exercised in inquiring the particular districts from which the visitors came, and as none appeared to have been in any way associated with infected persons or places it was not found necessary to prohibit the entrance of any person. Every precaution was taken by the use of extra disinfectants, occasional fires, and the burning of sulphur, &c., for purifying the atmosphere, and I am glad to say that throughout a period of great anxiety the health of the patients continued remarkably good. Having already furnished a report upon the progress made with the vaccination of the inmates, I need not enter more fully into the subject at present.

The conditions of the Lunacy Act have been fully and fairly carried out in the transmission of patients. I have had to point out again the necessity of sending female attendants with female lunatics, more especially upon journeys necessitating travelling by night. This having been made the subject of representation by the Inspector General of the Insane to the Inspector General of Police, measures have been adopted to secure the escort by female attendants in the future.

I have to express my sense of satisfaction at the great care and kindness with which the Police have conducted the patients to this Institution. In many instances they have been charged with the responsibility of most troublesome and violent lunatics, but in each instance the patient has reached me in good bodily condition, without marks of injury or violence, the best testimony to the humanity and care exercised by those to whose custody he had been committed.

It is with a feeling of deep regret that I have again to report upon the unfinished condition of the new Female Division. It would appear to be "hoping against hope" to express the desire that these admirable premises may soon be placed at the convenience of those whose necessities so loudly and urgently demand them. To speak of the prison remnant that now shelters the female patients in any other terms than those of disgust and amazement would be impossible; indeed, the whole vocabulary of indignation has long since been exhausted in the attempt to expose the utter unfitness of such a place for carrying out the purposes of a curative institution. I look with mingled pain and pity upon the sad prospect of our female patients being compelled to pass another winter within this dreary abode. Those only who, like myself, are called upon almost daily to contemplate this building and its surroundings can realise to the full their discomfort and hopelessness. I know that the Inspector General of the Insane and the official visitors have urged the speedy completion of the new premises with considerable energy, for, like myself, they are brought frequently to face the repulsiveness of the old premises, and to have all their sympathies awakened on behalf of those who are compelled to occupy them.

The main building remains much in the same condition as represented in my last report. The floors, more particularly in the upper range, are in so bad a condition, and have been so frequently patched, that any attempt at repairing is beyond the skill or ingenuity of the artisans, lest they should expose greater evils by entering upon the repairs of such as exist, the whole affair has to wait until the female patients can take possession of their new quarters, when the men now occupying the main building will have temporary refuge in the vacant female division. However, it yet remains to be decided whether any amount of repairing will conduce to the restoration of this structure. It is so old, unsettled in its foundations, and unpromising in every way, that it is possible it may be found a wise economy to remove it altogether, and place a modern building combining ornament with utility on the site it now disfigures.

From the dreariness and discomfort of these two buildings it is pleasant to be able to contemplate the comfort and suitability of the remaining buildings, with their well-grassed yards and flower-beds, and various conveniences.

The weatherboard division, with its large well-grassed cricket oval, and ample walks and flower-beds, is especially cheerful, and gratefully appreciated by those whose quiet and inoffensive habits entitle them to make this their home.

Whilst vast improvements have been made throughout the various recreation yards, in turfing and grassing, and laying out flower-beds, and in effecting repairs to buildings, painting, &c., much yet remains to be done. In the large recreation yard, numbered 2, the shed has been thoroughly re-shingled, several panels have been boarded up and furnished with windows, which have contributed greatly to the comfort and homely aspect of the place. Seats have been fixed in different positions of the yard, and the store-room enlarged. The whole has been nicely painted and picked out, and, when finished, this will form a very valuable addition to our means for classification. It is contemplated to fit up a lavatory in this yard, and to complete the comfort of the day-shed by laying down a tar pavement, and edging it with a brick drain to carry the water falling from the roof. With these additions, and the turf and flower-beds in good order, there will be little left to desire so far as the comfort and happiness of the patients are concerned. In all the yards now it is pleasant to observe the care and interest manifested by attendants and patients in protecting and encouraging the growth and improvement of the flowers, and in keeping the small grass lawns in a condition of neatness.

The present system of water supply will shortly be abolished, and re-placed by that about to be established by the local Municipality. By this means a much more ample distribution of water will be at all times available. This has now become more important and necessary, particularly through the wide extent over which the various buildings, with their accessories, laundries, and kitchens are scattered; and the urgent need for a large and ready storage of water in the neighbourhood of long ranges of wooden structures with the possibility of fire at some time overtaking them. I am happy to say that the supply from the new reservoir gives promise of such abundance, that in the event of fire the pressure from the mains would be sufficient to throw a heavy volume of water into and around any portion of the wooden buildings now forming so large a division of this Hospital. Good engines and many of the modern appliances employed for the extinction of fire have been supplied

supplied, and much anxiety is now spared to those who formerly had to contemplate the utterly unprotected condition of the Institution in the event of an outbreak of fire. The attendants, artisans, and out-door servants have each been instructed in the mode of handling the engine and its various parts, and the skill and alacrity the various companies formed by our staff display in their exercises lead me to believe that in any emergency we should have at hand a very useful and intelligent Fire Brigade.

The active measures adopted by the Master in Lunacy for obtaining information concerning the pecuniary circumstances of those responsible for the maintenance of the insane continue to relieve to some extent the large burden imposed upon the Government in the support of Institutions for their reception. There can be no doubt that the establishment of this system under the new Lunacy Act has aroused on the part of relatives a much wider anxiety in the interest of the insane than ever previously existed. Contributions for maintenance were formerly obtained with the greatest difficulty, and furnished with reluctance and irregularity, and yet instances were brought to light in which insane patients could be amply supported upon their own rightful property. The vigilance exercised by the Master in Lunacy has called forth an enquiring and intelligent interest on the part of the relatives and friends, which leads to their more frequent visitation to the patients, and thus confers double advantages upon the Institution and its inmates by their being more frequently exposed to public inspection and criticism, which should at all times be regarded with favour and encouragement, as tending to destroy the popular prejudice that too often exists against similar Institutions.

Large efforts are made to find suitable employment and occupation for such as are fitted for labour. Our chief means of employment of late have been in forming the roads, paths, and flower-beds for the new female division, where a great deal of most useful and permanent work has been accomplished. Here, after the builder had ceased to occupy the grounds, a large area had, as it were, to be reclaimed from waste. The native bush had to be rooted out, stumps of old forest trees removed, and the whole dug, trenched, levelled, and, finally, tastefully laid out in flower-beds and convenient paths and approaches. It may be truly said of this portion of the estate that the rose has been made to bloom in the wilderness—for in a few months the willing hands of the more robust patients, under skilled guidance and with kind and judicious attendants, have converted a scrubby swamp into a garden blossoming into beauty and fragrance.

In the farm and orchard grounds many also find congenial employment, but their exposed condition does not allow so large a number being sent as the requirements of the land demand, or the benefit of patients would suggest. Fully open to the roads, these grounds offer a ready means of escape, and without an increased and expensive staff of out-door assistants to watch and protect them it would be impossible to augment the present number of workers. I have always been greatly impressed with a belief in the singularly beneficent and curative influence exerted upon the insane when induced to work upon the land. I have seen most marked cases of long-existing melancholia yield gradually but effectually after a course of garden labour, and I am satisfied that if instead of being, as it now is, conducted with profit it yielded no other return than the restored mental health of many who labour in it, it would yet be entitled to be considered as profitable an agency in the curative methods of the physician as any in the wide range of the pharmacopœia.

The wood-yard absorbs a good number of workers, as the labour of supplying cut wood brought to the yard in large trunks or limbs is heavy and continuous.

The carpenters' and tailors' shops attract but few; our older patients are neither able nor willing to enter upon any occupation, and recent admissions have been singularly deficient in developing useful working patients.

Every attention has been paid to the amusement as well as the employment of the patients. During the year concerts and theatrical entertainments have been given, the dances have taken place every fortnight, several visits have been made to the kindred Institutions for playing cricket and return matches played here, whilst cricket is played every Saturday afternoon during the season on our own oval, which is now in excellent condition and admirably adapted for the purposes of the game.

The Orphan School Band has been in attendance weekly.

For their generous and able assistance in providing amusement I feel greatly indebted on behalf of the patients to the following amateur companies, viz., Lyceum Dramatic Society, Apollo Club, Mercantile Dramatic Society, Mr. Alfred M'Manis and Company, and the Australian Frolics.

The number of patients, male and female, employed daily is large, and distributed through various fields of labour; also in assisting in the work of the wards, but making, cleaning, &c., &c.

Some of the more useful female patients are occupied in the sewing-room, where their combined labour produces useful and profitable results.

Mrs. Brown, of Coverwell, as in a previous year, forwarded a large parcel of illustrated papers, &c., which were thankfully acknowledged.

The Secretary of the Pillow Mission kindly remembered us in the distribution of *Christmas Letters*, and forwarded a liberal supply, which gave much comfort and happiness to those on whom they were bestowed.

To the courtesy of the Secretary of the General Post Office I am indebted for an unlimited supply of old newspapers, as also to the proprietor of the *Bathurst Free Press* for one copy supplied gratuitously.

By the labour of the artisans and many convalescing patients a very large amount of valuable work has been carried out in the way of repairs and additions to various portions of the buildings, &c., and in painting and keeping in good condition the whole of the premises.

The farm grounds, orchard, and vegetable gardens have been carefully and profitably cultivated. A long season of drought has tended to reduce very largely the bulk of the various crops, and it is impossible without the employment of more paid labour to extend the area of cultivation. Our farm produces a very choice breed of pigs, which are readily bought by the butchers at remunerative prices, which yield a considerable source of profit annually.

Frequent visits have been made by the Inspector General of the Insane, and also by the Board of Official Visitors, who have examined the stores and articles of dietary, and had no cause of complaint.

The Contractors have carried out their various contracts in accordance with the conditions imposed upon them, and the articles supplied have been in conformity with sample, and of good quality.

The only change in the Official Staff has occurred by the resignation of Dr. J. A. Beattie, who was appointed Superintendent of the Quarantine Station. I have much pleasure in recording the zeal and interest displayed by him in the business of this department, and the kindness and humanity exhibited by him to the patients under his care. He has been succeeded by Edwin Godson, Esq., M.R.C.S., &c., who has displayed considerable ability in the discharge of his duties, and has entered into the work with an amount of energy and intelligence that promise to mature in the addition of a valuable officer to this branch of the Service. To both Dr. Beattie and Dr. Godson I am indebted for valuable aid and support in the discharge of the business of this Institution, as also to the various officers associated with the clerical and administrative departments.

The staff of attendants and nurses has undergone but few changes, and as a whole their duties have been discharged with zeal and fidelity, and without any instance of harshness or inhumanity to the patients. The senior female nurse resigned, after a long and faithful service to this Institution of nearly 30 years.

I am happy to state that throughout the year the discipline of the Institution has been fully maintained, and that no causes of complaint or dissatisfaction have arisen. The work to be done has, I believe, been honestly carried out, and no cause or sign of discontent has reached me at any time. The business of so large an Institution is at all times a heavy responsibility and anxiety, and is only relieved by the harmony and good will of those whose duty it is to assist in their various ways in effectually carrying it on.

In the female division, overwhelmed as it is with discomfort and numerous requirements, every care and attention have been paid to the patients, and to the matron and her subordinate staff I feel indebted for the general good health and management of that division, and the quiet and contented disposition that prevails amongst its inmates.

The usual statistical tables are appended, which I think fully exhaust every subject upon which public or professional inquiry may feel an interest.

I have, &c.,

CHAS. TAYLOR, M.D.,

Medical Superintendent.

The Inspector General of the Insane.

TABLE.

APPENDIX C.

Sir, Hospital for the Insane, Callan Park, 15 February, 1882.  
I do myself the honor to forward for your information a report upon the Hospital for the Insane, Callan Park, for the year 1881, accompanied by the usual statistical tables.

I took charge of the Hospital in succession to Dr. Scholes on December 9th, and having no personal knowledge of the Institution during the year, my report, framed only from the official records, must necessarily be less complete than otherwise would have been the case.

The number of patients remaining in Hospital on 31st December, 1880, was 129.

During the year 53 patients were admitted, of whom 43 were admitted for the first time, 8 were re-admitted, and 2 were transferred from other Hospitals. The total number under care was 182, and the average number resident 135.

The number discharged during the year was 30, of whom 26 had recovered and 4 were relieved. Two patients were transferred to other Hospitals, and one escaped and was not re-taken.

The deaths numbered 9.

The number on the books of the Hospital on 31st December, 1881, was 140, of whom 2 were absent on leave under section 82 of the Lunacy Act.

On an examination of the statistics for the year, it appears that the total number of admissions was less by 6 than during the year 1880, but the re-admissions were more numerous and formed 15.09 per cent. of the total number admitted. Of the cases re-admitted 6 had been discharged recovered, and 2 at the request of friends as relieved. One patient only was discharged and re-admitted within the year. The average time of absence of those discharged as recovered was 7 months.

The recoveries during the year give a percentage of 50.98 on the admissions and re-admissions, and the number relieved and so far restored to mental health as to be taken charge of by friends shows a percentage on the admissions and re-admissions of 7.84.

The patient who escaped was convalescent at the time, and became tired of the restraint of Hospital life before the Medical Superintendent considered it advisable to discharge him. It is known that he has since remained well, and is in active employment.

The deaths show a mortality of 6.6 on the average number resident, a proportion considerably less than that of the preceding year.

The causes of death are shown in table 4, and it will be seen that about half were due to cerebral disease. The only case of sudden death was due to suffocation from a piece of meat impacted in the larynx. In this case the Medical Superintendent was at hand within a few seconds of the accident, but was unable to save the patient's life. The case was specially reported to you, and a Coroner's inquest was held, at which no blame was considered to attach to any member of the staff.

During the year 4 patients were allowed leave of absence from the Hospital for varying periods; of these 1 was returned before the time had expired, as he had become so much worse that his friends were unable to manage him; 1 was discharged at the expiry of the time, and 2 were still absent at the end of the year.

It is to be regretted that friends of patients do not avail themselves more frequently of this system, for by it they are enabled to judge if the patient can be managed at home, and in the event of return to Hospital being necessary they are spared any fresh expense and the patient any fresh exposure. The change of air and scene is greatly beneficial to some patients, and the knowledge that they may so easily be returned to Hospital is a useful form of discipline which calls for the effort of self-control and greatly aids restoration to mental health. They are frequently able also to do some work, and so lessen the cost of their maintenance.

The general health of the patients has been good, and there has been a complete absence of epidemic disease. Under directions received from the Colonial Secretary, the patients were re-vaccinated in the months of July, September, and October, care being taken not to include those who were not in good physical health, or who showed such marked antipathy to the operation that a persistence in its performance would have acted prejudicially on their mental health. Considering that the subjects were adults and many had been previously vaccinated, a fair proportion were successful, and no ill effects ensued in any case.

No serious accident, except that already alluded to, has happened to any patient during the year.

In the report for the year 1880 my predecessor drew attention to the large proportion of the patients admitted who were new arrivals in the Colony. During the present year the number of such patients has not been so large, but in three instances the patients were received, either from the ship in which they arrived in the Colony, or a very short time after arrival.

A number of patients have been usefully occupied during the year, over fifty having been daily employed in the garden, wood-yard, laundry, kitchen, stores, blacksmith's, carpenter's, and tailor's shops. Besides making considerable improvements in the grounds, plantations, and avenues, and making minor additions and repairs to the fabric of the Institution, all the wood for the use of the Institution has been felled and cut up, and considerable help rendered in the daily work of the Hospital. A very great improvement has been made in the garden, the refuse stone and rubbish from the foundations of the new buildings having been carted to the bay, and placed under the surface soil so as to raise a considerable area formerly swept by the spring tides, and rendering it capable of cultivation. In addition to this an area of about 6 acres has been reclaimed in the same manner, and when covered with silt dredged from the harbour, will form an important and much needed addition to the garden of the Institution.

The usual Sunday Services have been regularly held by the Chaplains, and have been attended by large and attentive congregations.

The

The amusement of the patients has occupied both the time and thought of the Officers, and although difficulties exist in organising associated amusements, owing to the comparatively small number of patients, care has been taken to afford all the change and recreation possible. During the season cricket has been practised almost daily, and on most Saturdays matches have been played against local clubs, or kindred Institutions. Throughout the winter a number of patients attended the fortnightly dances at Gladesville much to their enjoyment, and frequently on Wednesdays a number enjoyed a trip down the harbour in the steam launch. Amusement was also promoted by taking advantage of associated amusements at Gladesville, by picnics, by visiting Sydney to hear the magnificent performances of the Austrian Band, or by visiting the circus.

Thanks are due to the Apollo Club, to Balmain and Burwood amateurs, and other ladies and gentlemen who kindly gave their services to produce dramatic and other entertainments, whereby many very pleasant evenings were spent.

Thanks are due to the Balmain Coldstream Band, the Petersham Band, and others for many pleasant afternoon performances.

Among donations we are indebted to the General Post Office for supplies of unclaimed newspapers, to the Public Free Library for old books or duplicate copies, and to Mr. John Keep for presents of fruit.

On handing over to me the charge of the Hospital, Dr. Scholes expressed his satisfaction with the ability and general conduct of the Officers and Staff, and during my short tenure of office, I have received efficient and willing assistance, and have reason to endorse his favourable opinion.

I have &c.,

HERBERT BLAXLAND,  
Medical Superintendent,

The Inspector General of the Insane.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

LUNATIC ASYLUMS.  
(NAMES OF PUBLIC AND PRIVATE.)

Ordered by the Legislative Assembly to be printed, 19 September, 1882.

STATEMENT in answer to Questions asked by Mr. Abigail, of the Colonial Secretary, on Tuesday, the 19th September, 1882 :—

(1.) The names of all the Public and Private Lunatic Asylums in the Colony ?

- Hospital for the Insane, Gladesville.
- "                  Parramatta.
- "                  Callan Park.
- "                  Newcastle.
- Temporary Hospital,          Cooma.
- Licensed House for the Insane, Cook's River.

(2.) The number of places visited by Dr. Roberts and the other Medical Officers respectively; the dates of such visits during last year; and whether any, and if so, what fees are received by them from the proprietors of Private Asylums, or keepers of lunatics in private houses ?

The places visited by Mr. Alfred Roberts during 1881, and dates of such visits, are :—

<i>Gladesville :—</i>	<i>Parramatta :—</i>	<i>Cook's River :—</i>
20 January,	11 January,	7 January,
17 February,	25 February,	15 February,
3 March,	9 March,	7 March,
7 April,	10 May,	6 April,
5 May,	17 June,	29 June,
9 June,	7 July,	14 July,
30 June,	7 September,	28 September.
8 July,	14 October,	
11 August,	27 November,	
29 September,	30 December.	
27 October.		

Places visited by Dr. Alleyne, and dates of such visits, during 1881 :—

<i>Gladesville :—</i>	<i>Parramatta :—</i>	<i>Cook's River :—</i>
20 January,	11 January,	7 January,
17 February,	25 February,	15 February,
3 March,	9 March,	7 March,
7 April,	21 April,	6 April,
5 May,	10 May,	28 September,
22 December.	14 October.	20 December.

Places visited by Mr. Charles J. Manning during 1881, and dates of such visits :—

<i>Gladesville :—</i>	<i>Parramatta :—</i>	<i>Cook's River :—</i>
7 April,	21 April,	6 April,
30 June,	17 June,	29 June,
8 July,	7 July,	14 July,
11 August,	7 September,	28 September,
29 September,	27 November,	20 December.
27 October,	30 December.	
22 December.		

No fee whatever has been received by the official visitors from the proprietors of Private Asylums or keepers of lunatics in private houses.

1882.

STATE CHILDREN'S RELIEF DEPARTMENT.

---

REPORT

OF THE

PRESIDENT, THE HON. ARTHUR RENWICK, M.D., M.P.,

FOR THE YEAR ENDED

5 APRIL, 1882.

---

Presented to Parliament in accordance with the provisions of Act 44 Vic. No. 24.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1882.

State Children's Relief Department,  
149, Phillip-street, Sydney, 5 April, 1882.

The President of the State Children's Relief Board to the Honorable  
the Colonial Secretary.

Sir,

In presenting my first annual Report as President of the State Children's Relief Board, I have thought it desirable to enter somewhat fully into a general delineation of the Boarding-out system, to meet criticisms to which, in some quarters, it is still subjected, and to commend it to public favour by describing its success wherever it has been honestly and conscientiously worked.

The delay in the introduction of the system into New South Wales is indicative of the slow progress which reforms, in themselves approved and unquestionably commendable, make among us. Notwithstanding the publicity which in modern days every subject obtains, and the thorough examination all topics undergo where thought and speech are free, the interval between the first advocacy of a reform and its adoption is often far too great. Some years have elapsed since, in the report which accompanied the evidence gathered by the Charities Commission, the substitution of the Boarding-out system for the Barrack system, in caring for the children of the State, was counselled. A very common consent in the Press and the public urged the change. Discussion of the subject has never wholly ceased, yet no definite movement was made in the matter till 1879, when a Society of ladies for boarding-out destitute children was formed in Sydney; was helped by a Government subsidy of £200 for that year, and the larger sum of £400 for the next year; and it was thus demonstrated on a limited scale that the system could be established here as well as in other parts of the world,—that, in short, boarding-out was feasible wherever the conditions in the community requiring its operation existed. In the first report of the Society referred to, it was stated that, up to the close of 1880, fifty-seven children had been placed in families in various districts, chiefly in the country; that the Committee had been favourably impressed with the class of persons applying for children, and gratified at finding the uniformly affectionate terms on which the children seemed to live with their foster-parents, and which justified the assumption that it was quite possible to ensure by this system "the happiness and advantages of family life."

The Society continued to labour with conspicuous success in its limited sphere, and ceased to work only when Parliament, adopting the recommendations made by the Charities Commissioners in 1874, passed, on April 5, 1881, the statute under which this Board has been appointed, and thus placed the system under regular official control. It is gratifying to be able to report that, in the experience of the Board, it has proved as fully successful and beneficial as when it was conducted by the Society, and that its prospects are so promising in New South Wales as to justify the belief that it has passed beyond the tentative stage, and that here too this mode of caring for the fatherless and "him that hath no helper" will be more and more approved in the lapse of time.

The

The principle of the boarding-out system is based on a consideration of the manner in which society is constituted. Society is made up of families. Thence it obtains its wondrous variety of aspect and development—there its activities germinate. Society is one large family, while each family is in its turn the counterpart of the whole community into the texture of which it enters. Those who are to take part in the life of the community must be prepared for it, and can alone receive proper preparation for it in the family circle. In that arena all that is enjoyed, endured, or suffered, is suffered, endured, or enjoyed in communion. Boys and girls there feel themselves to be of their own kind, and they grow up in sympathy with that kind. There are vicissitudes to encounter, privations and punishments to face; but there are also the joys of companionship, and the jealous affection of parents, who guide and fondle, compensates for much hardship. Children in a family are a part of the many-coloured life around them, and look forward to a future which shall have similar varied experiences to those of their own youth. Thus the organization of society continues much the same from age to age. Each generation follows in the footsteps of its forerunner.

The children of the necessitous who are actually or practically rendered orphans are denied their birthright of a share in family life. Charity in some form or other must come to their aid. They are fed and clothed and educated by public bounty in large institutions. That is better aid than none; and the provision thus made by the State for its orphans and its neglected and deserted children is one of the glories of modern civilization as affected by the principles of Christianity. But the life of the Asylum is not family life. Necessarily it is characterized by a rigidity of conduct. The inmates are drilled into a mechanical good behaviour, garbed in uniform, while no count is or can be taken of differences in disposition. Granting that there is kindness in the oversight, no more rigour than is necessary for the maintenance of discipline, there yet must be an entire absence of that correcting love which grieves because it must chastise. Nothing can make the barrack a true home, or lend it influences found in homes alone. "I would rather," wrote Lord Macaulay, "hear a boy of three years old lisp all the bad words in the language than that he should have no feeling of family affection; that his character should be that which must be expected in one who has had the misfortune of having a schoolmaster instead of a mother." Life in the barracks is not the changing scene which it is in the family, but a period of dull regularity in which the powers neither of the body nor the mind are fully drawn out. "Admit," says a celebrated writer on this subject, "that the workhouse is conducted in the best possible manner, that every care that can be taken is taken of these children, that the schoolmaster and mistresses are kind, zealous persons, anxious to do their best towards those placed under their care; admit all this, and yet what must be the state of a child's mind who has been for thirteen years incessantly immured within the walls of an asylum? And remember, this is not at a time when the faculties, both physical and mental, are formed, but in the early spring of youth, when the mind is in a plastic state, ready to receive and retain any impression that is made upon it; when pure air, freedom of thought and action, variety of impressions, something in the shape of childish joyousness, are necessary to bring the mind as well as the body into a healthy state." Hence children passing from the asylum into the world are constrained to learn anew, when their nature has received strong bent already by the asylum training, the lessons that the activities of society have to teach. They begin, under grave disadvantages, after an artificial discipline, to take their place in the natural order of things. And experiences combine to show that the asylum system so undermines self-reliance that the relapses into pauperdom, or descent into gross vice, in the case of children so nurtured, are in a proportion  
frightfully

frightfully large to the whole number. In this way, as the Royal Commissioners on Education say, pauperism is hereditary, and children born and bred of the pauper class furnish the great mass of the pauper and criminal population.

The boarding-out system strives to supply to children thrown upon public bounty such a share in family life as shall give them a natural training. It cannot wholly replace fathers and mothers who have died, or who have been compelled by circumstances to neglect their natural obligations; but it can rescue orphans from the colourless, stiff life of the asylum, and introduce them into select homes, where they may consort on equal terms with the children, and share in the "praise, blame, love, kisses, tears, and smiles" which diversify their path. That is what is done under the system. Every step of the process is attended with careful oversight. Certain well-ascertained conditions are essential to success; neglect of them is sure to entail shipwreck.

The homes and the foster-parents are chosen with judgment. The child is not a servant any more than the children of the house are servants. A portion of the burden of maintenance—the money portion—is borne by the State. Attendance at school and at church is stipulated for. Periodical official oversight is one attribute of the system, but even a more certain element of control is the non-official local oversight, which is never dispensed with wherever it is possible to secure it. That is the system: careful choice of homes and foster-parents, State payments, approved rules for the treatment of children, official oversight at frequent and irregular periods, and local oversight perpetually. Children so boarded-out become of the family, they take their part in the diversions as they share the sorrows of their companions; their life, rough or smooth, is the same life as those children live who are not at all the care of the State; they learn to make their own way in the world, and utterly dis sever their connection and their associations with pauperdom.

A contingent merit of the system, of no mean importance, is the local oversight to which allusion has been made. A willingness on the part of the State or of charitable organizations to undertake the control, support, and responsibility of agencies for dispensing charity relieves individuals of all but the obligation to contribute a portion of the funds. And very often even this obligation is shirked. It has not been found feasible to apportion duty between the State and the people the responsibility to give and the responsibility to manage which rests upon each. Hence our charitable organizations are in a somewhat anomalous state. It is not my office to enlarge upon this aspect of the question; yet I would point out that the co-operation of the people with the State is the keystone of the boarding-out system. The State, through its officer, may exercise the most jealous care in the selection of homes and of foster-parents; it may, through the same medium, maintain the most strict oversight of its charges; the payments from the public purse may be forthcoming with unfailing regularity; but if the local visitors fail to discharge their duty, or discharge it perfunctorily, without tact, without zeal, without a sense of its surpassing importance, and if the foster-parents cannot be imbued with a proper sense of their paternal responsibilities, the cause of boarding-out becomes a lost cause. "I feel," says Miss Florence Hill, whose name has long been honorably associated with schemes for the amelioration of the lot of the poor in England, "and feel very strongly, the importance of bringing the kind-heartedness and sympathy for the orphan, which are marked characteristics of the poorer classes, into operation in this enterprise. The children's lodging, food, clothing, and schooling may justly be paid for by the ratepayers, and any additional comforts may be contributed by the voluntary superintendent; but let the care and love of the foster-parent *be her gift,*  
that

that she may feel she is taking her part in a work of benevolence, and let the child grow up to the knowledge that it has received something from its foster-parent beyond what she *could* be paid for, and then you get something like the independence and affection of a real parent and child. This is I believe the case in England, in Ireland, in Scotland, and in France. I believe it is the absence of this *unpaid*-for care in public institutions which tends to make them so deadening to the affection of the children, who are quick in finding out that what is done for them is done for money, not for love." Under the system the State associates in its work of charity chosen members of the community, and by throwing on them a full share of the responsibility of success, educates society through them in self-reliance in this direction.

Experience in New South Wales of the system is, as has been written, so far promising. Some details of its working will be found in subsequent paragraphs. But experience is too new to supply such undoubted testimony to the merits of the system as can be found elsewhere. For such testimony, in the most ample sense, resort must be had to other countries. And the evidence is uniformly and overwhelmingly favourable. There is not, so far as I am aware, any conflict of opinion as to the desirableness of substituting family life for barrack life, in bringing up the children of the State, if it be possible to effect the substitution with some regard to economy, to the protection of children against cruelty and hardship, and to their effectual education, training, and placing in the world. And on the grounds that the boarding-out system has proved to be costly—that it encourages parents to be unthrifty—that it places children at the mercy of persons who value them only for the work they can get out of them, and that children so dealt with become indelibly impressed with the idea that they are under care, and so become paupers in grain—the system has been assailed. But the vindication has always been triumphant where the conditions essential to success have been observed. Take the question of cost for instance, which should not be paramount in a matter of this kind. In several parts of England, under the boarding-out system, the weekly payment for children placed out was 3s. 8d. each, while the cost of maintaining children in schools and reformatories was 7s. to 10s. each. In Scotland and America the relative cost of the two systems was about the same. In Victoria the expense of maintaining boarded-out children is under £15 each, as against £19 and £20 each in the boys' and girls' industrial schools, £30 in the reformatories, and £18 and £17 per head in the Melbourne and Ballarat Orphanages. And it is estimated that in the course of four or five years, as the system is developed in New South Wales, the cost of boarded-out children here will not exceed £15 each per annum, which will compare very favourably with the expense of maintaining orphaned and destitute children in any of our public asylums.

Then, as to the treatment and after-career of boarded-out children, the reports of committees and local visitors teem with proofs that they become a part of the family, and are regarded with affection; that reciprocal regard is awakened; and that the orphan ceases to realize that he is alone in the world. Out of some hundreds of testimonies to this effect I have selected the following for quotation:—

Miss Florence Hill says:—

The boarding-out system is best for children, from many causes. The child placed in a family is under parental care; it becomes familiar with the duties and pleasures of family life, and it receives insensibly that training of the temper and affections which comes from living with persons of different ages and standing in different relations to it, as father and mother, elder and younger brothers and sisters, &c. Then in the cottage home it sees frugality and economy exercised, which it never sees in large institutions where food is given to it as if it fell from Heaven, without effort on its part. No effort of its own for the sake of others is ever called forth in its daily life, nor does it see any one foregoing anything for it. No one exercises that generosity and forbearance in its behalf which are habitual in a good parent, and which have a most wholesome effect upon the child, who thus learns by example to be generous and forbearing in its turn. \* \* \* Again, children require

require constant change—they are not able to fix their attention long on one thing; but in the schools they for the most part pass their lives in their schoolrooms and a very monotonous playground, rarely going out into the roads and lanes to see fresh faces, fresh objects, and a variety of animals, all of which have a good effect upon them. \* \* \* A highly-important advantage of the boarding-out system, and one wholly wanting in schools, is that it weaves fresh home-ties about the child, and creates an interest in his welfare among his foster relatives, and a desire on his part not to lose their good opinion, which, in his after life, are probably the most efficient safeguards from going astray with which he could be surrounded.

Mr. William Anderson, another high authority on the subject in England, has written :—

The boarding-out system has all along been attended with much success, and I think the manner in which it has been carried on during more than a quarter of a century may well be taken as a test of its value. I have had excellent opportunities, extending over a lengthened period, of minutely examining its practical working; and without being prejudiced either in its favour or against it, I could not help coming to the conclusion that it was admirably calculated to arrest the progress of pauperism in its earliest stages. \* \* \* A pleasing circumstance connected with the boarding-out system is the attachment which the children bear to their nurse long after they have gone from under her roof. \* \* \* The nurses, some of whom have had boarded-out children for twenty-five years, can trace very minutely the career of almost every one of the children they have had under their care in consequence of frequent communication kept up with them. Almost every nurse has a treasured packet of letters, with photographic portraits, from former children, and on these they set a very high value. . . . On the system of inspection depends almost everything. The inspector, whose time is entirely devoted to the work, makes periodical visits to the various localities where the children are located, enquiring after their welfare, hearing complaints and suggestions by the nurses, and giving such advice as he may consider necessary.

Miss Johanna Hill, who was requested by the New York Association to bestow the closest observation upon the boarding-out system in England, thus records her opinion :—

For orphans or deserted children I shall be able to show that no plan, both for cheapness or efficiency, equals that known under the name of the boarding-out system. The children are placed in the homes of respectable cottagers at a weekly remuneration which just covers expenditure, not affording profit, and are visited by an inspector who watches over their welfare, and removes them when he considers they are not properly treated. This, however, is seldom found to be necessary, for long experience proves that it is the rare exception when the little one does not become the adopted child of the house—its welfare being as dear to the foster-parent as that of her own offspring.

Again, the same writer, commenting upon the elaborate labour-saving appliances used in the domestic work of large institutions, and their utter unsuitability for instructing young children in anything approaching home duties, observes :—

The further the life of these young people differs from that of the work-a-day world, the more difficult will they find it to accommodate themselves to its demands when they go forth into it to earn their living; and an establishment where food and every other necessary of life presents itself as a matter of course, where accomplished servants perform the difficult work, and where, above all, the children engross the care and attention of a large staff of officers to whom they have no natural duties to render in return—an establishment such as this cannot, we aver, duly prepare its inmates to take and hold their place among our working classes.

Frances Power Cobbe, who has been fitly designated one of the most earnest and vigorous of thinkers on social subjects, thus writes :—

The case of the girls is far worse than the boys, as all the conditions of workhouse management fall with peculiar evil on their natures. To mass boys together in large numbers, with no home influence or habits, and no attempt to draw out their affections, is dangerous—to do the same to girls is fatal. Among the endless paradoxes of female treatment, one of the worst and most absurd is that which, while eternally proclaiming “home” to be the only place of a woman, systematically educates all the female children of the State without attempting to give them even an idea of what a home might be. Girls want affection, want personal care, want household duties, want everything which can train them to honor the bodies and keep pure the souls which God has given them. To effect this we mass them by hundreds where they can have no individual affection, no personal care, nay, hardly a personal existence at all, save as units in a herd. . . . Out of a single workhouse in London inquiry was instituted two years ago concerning eighty girls who had left it and gone to service. It was found that every one of them was on the streets.

Colonel C. W. Grant, C.E., Chairman of a Committee of the Bath Board of Guardians, which was specially appointed to consider the operation of the system in England and Scotland up to 1879, writes :—

It is said that children reared in large institutions are listless and apathetic. Can they be otherwise? What has there been in the course of their young lives to bring out the affections. That they are totally ignorant of the world and its ways, even in the most common and ordinary matters. Is this surprising? Do these things come by magic or intuition, or are they not rather imperceptibly and gradually impressed upon the mind of a child by his own little personal practical experiences from his earliest years? How can a creature who has passed a mere mechanical life up to the age of say 14 years enter upon the practical duties or meet the practical assaults of temptation of actual life?

The Hon. Mr. Commissioner Hill, the “Prison Reformer,” while strongly advocating the boarding-out system, very properly places considerable stress upon what he terms the *kindliness* of supervision :—

We have (he says) ten ladies who have undertaken to look after the children, and we attach great value to this part of the plan; we think there can be no doubt of the great importance of securing the

the hearty co-operation of the clergymen and the ladies. Of the importance of the assistance to be derived from the clergyman of the parish there can be no doubt: his intimate acquaintance with his parishioners, the respect in which he is held by them, and his constant daily opportunities of seeing the children, either at the school or in the houses of their foster-parents, give him the means of detecting and correcting every neglect or ill-usage of the child at its outset. . . . And with respect to lady supervision there can be as little doubt, especially in relation to female children. There are numberless little ways in which their influence and assistance, and *theirs only*, can be brought to bear, and by which the comfort and happiness of the children may be greatly increased. . . . We believe we may safely trust to the kindly and womanly instincts of the ladies to interest themselves in these helpless orphans thus brought as it were to their doors, and to render them every assistance and kindness that they can require from the pure love of befriending these little ones.

Sir John McNeill, head of the Scottish Poor Law authorities, in an official report to the Home Secretary, uses the following forcible and impressive language:—

The system of boarding-out pauper orphans and deserted children, as well as the children of immoral or greatly dissipated parents, from whom it is desirable to separate them, or of parents who utterly neglect their children and allow them to go about the streets begging, has for a considerable number of years been adopted in most of the large urban parishes in Scotland, and its beneficial results have led to it being gradually extended. . . . The health of the children is greatly improved, they become more robust and active, mutual attachment generally grows up between them and the nurse or family with whom they reside, their domestic feelings are awakened or quickened, they see the struggle maintained by all around them to preserve their independence, and they learn how highly it is prized. . . . *Anything more satisfactory than the working of that system I have not to boast of in the administration of the poor law.*

Mr. Kemp, who was for twelve years Master of Wrexham Workhouse, and who was altogether opposed to the boarding-out system in Scotland and England, until he had with great care personally acquainted himself with its operation, thus records his experience:—

When I went to Scotland I was disappointed that the children were not reared in the house, but were boarded in the country. I looked upon the plan, *at first*, with no great favour, but having been requested by the House Committee to accompany the Inspector on his rounds, which I did, and looked into the practical working of the scheme—visiting the children at their homes and schools—the result being a *conviction strongly forced upon my mind* that the plan of boarding-out children was the best mode of rearing orphan children that I had yet seen, *and to this hour I have not changed my opinion*. By this plan, the family circle and influence are as far as possible restored, the domestic affections are to a large extent revived, creating an influence which, often for the good of child and foster-parent, extends through life.

Mr. P. Beattie, Inspector of Workhouse Children, at Glasgow, says:—

This practice is of long standing here, and is much liked, because it takes the mark of pauperism from the child, puts it under the social influence of a family circle, and creates ties which are very similar to those subsisting in a family. They are also put in a way of seeing how to live when they are of an age to act for themselves. In all cases we find the children healthier and more robust than when in an asylum.

Mr. D. Archer, Chairman of the Highworth and Swindon Board of Guardians, after a lengthy experience of the system, writes:—

I am happy to say that the Board of Guardians, of which I am the Chairman, will board-out all the children they possibly can. We are convinced, from experience, that proper home-training for girls is most essential for their future well-being; we therefore do our best to place out all such children with respectable cottagers, and are satisfied with the result.

Turning to the report of the New South Wales Charities Commission, to which reference has been made in a former part of this paper, I find that the many high authorities which are there quoted with reference to the boarding-out system are unanimously in favour of its adoption. And the Commissioners themselves remark upon those authorities:—“The evidence before us as to the success of the system in England, Ireland, and Scotland is conclusive; and it appears that the plan has been adopted in about seventy Unions, and is making rapid progress throughout England. Testimony is borne to its success and to its superiority over the system of congregating children in large institutions, not only by social thinkers and reformers, but by the guardians and other Poor Law administrators, who, by their practical acquaintance with the management of pauper children, are eminently qualified to form a correct opinion on the subject.”

The following is the testimony furnished by the Parochial Board of Glasgow City Parish, which had nearly six thousands of boarded-out children under control four years ago:—

Great care is taken in the selection of the families in which the children are placed, and when so placed a constant supervision is kept, and if an unsatisfactory arrangement is made the child is immediately

immediately removed. . . . The children look upon the heads of the family as their parents, and the younger branches as brothers and sisters, the best feelings of the heart are engaged, the affections are cherished and drawn out, not smothered in the child's breast as if amongst strangers. The children often return to this family home for counsel in difficulties and sympathy in distress. The holiday excursion, or any other joyous occasion, furnishes an opportunity eagerly embraced to visit their foster-parents. The Committee recommend all those who really wish to obtain information as to how these children are brought up, to accompany the Committee in their visits, and see their homes and the schools they attend. They do not certainly come in from play with the concise, demure, and well-disciplined appearance that you find in a well-managed orphanage; but, what pleases the Committee more, they appear with a buoyancy of spirit, a confidence of manner, and happiness of countenance, which shows that they are at home, are happy, and well cared for.

It will be seen that the foregoing authorities refer more particularly to the results of the system throughout England and Scotland; but it has also proved equally satisfactory in Ireland. The Dublin Protestant Orphan Society's report states that during thirty years 5,376 children were placed out with almost unvarying success; and within seven years of the foundation of the Dublin Roman Catholic Institution 500 children had been boarded-out, of whom only three or four had turned out ill, 200 were working for themselves at trades, and the remainder were in service or growing up in the families, and as the sons and daughters of their foster parents; and similarly gratifying results are chronicled in the official reports from France, Prussia, Germany, and Russia.

"In Prussia," say the Commissioners, "a Society for boarding-out neglected and abandoned children was instituted in 1845, and is working very satisfactorily. In Berlin half the pauper children are boarded-out. In Hamburgh the same system is pursued. In Russia and in France the plan has been followed with the best effect. An orphanage was founded in Paris in 1856 by the Prince Imperial, and is conducted entirely on this plan with like satisfactory results." And similar testimony is borne to the results of the system in the American States throughout which it has extended.

Mr. Adamson, who formerly held an appointment under the English Poor Board, and had large practical experience of poor law management in England, commenced his duties as inspector of boarded-out children holding strong opinions against the system, but he eventually became a warm supporter of it in consequence of his observations of its success. He has upwards of 400 children boarded-out under his care—deserted children, orphans, or motherless. He claims to have taken considerable pains to ascertain the conduct of the children when out in the world, and he says—"It is a rare thing for either a boy or a girl who has been brought up by the Parochial Board in this way to become chargeable to the parish in after life."

Mrs. Senior, formerly an inspector under the Local Government Board of England, has written some exhaustive papers and official reports upon the operation of the system in England, Ireland, Scotland, and Canada; and upon the "effect upon girls of the system of education at pauper schools:"—

One of the greatest objections to the plan of bringing up girls in large schools is that they are unable to get the cherishing care and individual attention that is of far more importance in the formation of a girl's character than anything else in the world. It is the fault of no one in particular that at a large school a girl's affections are not called out. The officers have so much routine work to get through, that it is absolutely impossible for them to give themselves sufficient time to individualise and influence the girls under their care. The inquiries I have made on all sides have convinced me that what is wanted in the education of girls is more *mothering*. Many of them who have fought their way bravely, and are doing well in life, have indicated this to me. One will say, "we were kindly enough treated, but I felt very lonely;" another, "I was very fond of Miss A., but there were so many of us to look after that she could not be expected to look after me." And so on.

Then, with reference to two common plagues of large institutions, the same lady says,—

No case of ophthalmia or ringworm was to be found among the boarded-out children whom I saw.

And again—

One very remarkable difference between the children in these homes and the children in the pauper schools is their greater brightness and trustfulness of manner, and their readiness to answer questions and tell one all about themselves and what they are doing. In all the districts that I visited I found signs of strong affection between foster-parents and their adopted children, and both here and in

the Lake District I constantly saw little girls taking care of young children and babies. My impression is that in no case had the children been taken in exclusively for the sake of the payment. The people were all earning good wages, seemed doing comfortably, and not to be in need of this source of income.

In a letter relating to pauper schools, addressed to the London Government Board, the same lady writes :—

At various dates and ages seventy-three children were placed out at nurse by the Guardians of the South Dublin Union. The seventy-three recently became ten years of age (the age at which nursing-out ceases), and the Guardians gave directions that they should be collected and placed in the poor-house. *But every one of the seventy-three has been adopted and retained by its foster-mother.*

In order to meet one objection that has been urged to the boarding-out system, I think it necessary to point out that it is wholly dissimilar from the old English apprentice system and the farming-out system. Every precaution is taken to obviate the recurrence of scandals which have been made public respecting the treatment of apprentices from some of our asylums. No child is delivered to the tender mercies of anyone indiscriminately. Oversight, instead of being accidental and perfunctory, is strict and perpetual, as has been said. Homes are selected where local visitation is possible, so that a safeguard is erected against the action of cupidity, if, after all care, mistakes have been made in the choice of foster-parents.

In this connection the late Mr. Charles Dickens, who was once an uncompromising opponent of the boarding-out system, because he assumed that it permitted the perpetration of similar abuses to those of the apprentice system which he has so vividly portrayed in "Oliver Twist," was led after due inquiry to utterly change his opinions, not only on the ground that the boarding-out method of dealing with State children bore no similarity whatever to that system which he regarded with such abhorrence, but also that it tended to effectually sever children from pauperism :—

It is not surprising (says Mr. Dickens) to find that when a child who has from birth, or from earliest youth, been reared and educated in the work-house, is sent forth to make its first start in life, it is found to be but seldom fitted for the struggle. School education it may have had, and may carry away with it a fair amount of book knowledge, but of that other knowledge of the world and of human life, which is only to be got by freedom of thought and actual contact with the world itself, it possesses no jot. . . . It would seem that the solution of a difficult problem must be in some system different from either of those in general use. If the pauper children who are entirely dependent on the State cannot be satisfactorily educated to be good citizens and useful members of society under existing circumstances, how can the desired result be more nearly approached? The only alternative system appears to be that under which the children are boarded-out with such persons as may be willing to take charge of them, and to look after their education, in consideration of the weekly amount to be received from the guardians.

Mr. Dickens then quotes copiously from a large number of official reports, and remarks with respect to them—"this evidence has been gathered from all parts of the country, and wherever the system has been tried the testimony borne to its value has been invariably favourable."

Having shown by the foregoing authorities, which have been collated from the most reliable and independent sources, that the boarding-out system has proved successful in England, Ireland, Scotland, the United States, Germany, France, and Russia, I will now glance more briefly at its results in the sister Colonies, in three of which it has been very widely adopted. When it was proposed to introduce it into Victoria its promoters met with strong opposition. It was urged that the circumstances of that Colony could not admit of the successful operation of the scheme; that it would be impossible to find a sufficient number of respectable persons for foster-parents; that the homes of those families who would probably apply for the children were in most cases not large enough to accommodate the natural members of the family; and that from the scattered character of the population it would be impossible to exercise efficient supervision over the children after they were placed out. Experience has demonstrated the fallacy of all these objections. The system has operated in Victoria upwards of ten years with great success. The majority of the public

public institutions for children have in consequence been evacuated; and at the end of 1880 (during which year nearly 800 children were placed out) there were 1,900 homes in which State children were placed either as boarders or for adoption without subsidy, while the total number of children in the asylums awaiting removal was 330. Until recently the system was worked almost wholly by associations of ladies on the voluntary principle, but it was found necessary to bring it more directly under official control, and so a staff of Government inspectors was appointed whose duties are somewhat analagous to those of the Boarding-out Officer in this Colony. This change at first created a difficulty through a mistaken belief that the Government officers were intended to altogether supersede the Ladies' Committees, by whom, as in New South Wales, the system was originally established; but the new arrangement has worked very satisfactorily and harmoniously, and, it is now generally admitted, to the increased advantage of the children. The inspectors' report for last year announced that twenty-seven committees had sent in special reports concerning the working of the system and the condition of the children in their respective districts. These committees bear testimony most emphatically to the genuine success of the system throughout Victoria, and their opinions are fully endorsed by the Government Inspectors.

Nor has the new method of dealing with these children proved less successful in South Australia or Tasmania. The Report of the Adelaide Boarding-out Society for the year 1881 sets out with an assurance that "time has only strengthened their faith in the usefulness of the system." The wards of the Society numbered 320—nearly two-thirds of whom were adopted without subsidy—so that the State was altogether relieved of the cost of their support. The reports of the Visiting Committees were extremely satisfactory, but here, as elsewhere, it had been necessary to strengthen the voluntary method of supervision by the appointment of a Government Inspector. With reference to the operation of the system in Tasmania, Mr. W. Tarleton, the Administrator of Charitable Grants, reports:—

I have made a thorough examination of the children supported by the Government under the boarding-out system in Hobart Town and its suburbs. My visits to the homes where they were placed were made without notice of my intention; thus no opportunity was afforded for preparation of any sort, and I saw both the children themselves, their domiciles, their food, their clothes, and their bedding, in their usual every-day state. You will be pleased to learn that the result of my inspection was, on the whole, exceedingly satisfactory. \* \* \* In regard to the moral and intellectual aspect of their condition, the result of my inspection has but tended to confirm my previous opinions of the superiority of this method of dealing with destitute children.

In Victoria, South Australia, and Tasmania the allowance for boarded-out children is, except in special cases, 5s. a week, the Government in the first instance providing outfits which the foster-parents are required to keep up to a given standard at their own cost.

The statute under which the boarding-out system was brought under Government control in New South Wales is entitled the "State Children Relief Act of 1881," and it became law on April 5 of that year. It provided for the appointment of a Board, consisting of nine members, termed the "State Children's Relief Board," and also of a Boarding-out Officer to carry out its provisions. The Board was appointed on April 19, and the Boarding-out Officer on June 9, 1881; and the children who had been under the control of the Boarding-out Society, and all business vested in that body, were legally transferred to this Board by authority of the Colonial Secretary, on July 7, 1881.

The work of the new Department was for some time carried on at the offices of the Colonial Secretary, the meetings of the Board being held by permission in the Executive Council Chamber; but it soon became apparent that premises would have to be obtained which could be accessible at any time to foster-parents and others connected with the children who might have business to transact with the  
Boarding-

Boarding-out Officer; to which also the children could be taken to be fitted with clothing when being boarded-out; and where the clothing might be stored, and work connected with the preparation of the outfits executed as required. It was first suggested that rooms should be obtained in the Garden Palace; but as it was evident from the peculiar character of the work of the Boarding-out Officer that it was indispensable that he should reside upon the premises, a suitable house was obtained in Phillip-street, under authority from the Government, at a rental of £200 per annum, the offices, board-room, and clothing-store being furnished through the Department of the Colonial Architect, at a cost of £184 6s.; and to this building the business of the State Children's Relief Department was transferred on Oct. 7, 1881.

The "State Children Relief Act" admits of the withdrawal of children from Reformatory or Industrial Schools, the Benevolent Asylum, every Government asylum for orphaned or destitute children, and any charitable institution that may be wholly or partly supported by grants from the Consolidated Revenue Fund, for the purpose of placing them in homes as boarders, or as adopted children or apprentices. Before the Board could proceed to place out children, however, it became necessary under the Act to make Regulations. These were submitted to the Government on August 3, 1881, and were approved by the Executive Council and had legal force on September 2, 1881. They define the functions of the Board; the duties of the Boarding-out Officer, Secretary, and lady visitors; the responsibilities of foster-parents and employers in their relationship to the children; the manner in which application must be made for children placed out in any capacity permitted under the Act; and the rates of payments to apprentices. They provide for the free carriage of the children by railway; for their moral and religious training and secular education; for reports showing their attendance at the State schools, and for half-yearly reports upon their conduct from the foster-parents. They further make provision for the maintenance of boarded-out children—the rate being, as in the other Colonies, 5s. a week for each child, except in special cases, with the same conditions as to outfits; and for the contribution by parents towards the support of their boarded-out children in such amounts as the Board may deem equitable. The Boarding-out Officer is required to inquire, when possible, into the circumstances of such parents, and, when practicable, to inspect and report upon every home before a child is sent to it, in order that there may be an additional safeguard against the selection of improper homes, apart from the recommendation of the clergyman, and magistrate or other approved person, which must always accompany applications. The Board is empowered to make deductions from the payments to foster-parents as a penalty for the improper treatment of children, in addition to the more severe penalties which are imposed under the Act; and the Boarding-out Officer has power, subject to the direction of the President, to immediately remove any child whom he may deem to be improperly treated, and to issue any additional directions to foster-parents or employers that he may consider necessary respecting the treatment or management of the children, whether provided for or not in the Regulations, and subject to the subsequent approval of such directions by the Board. In the event of any child absconding, foster-parents must at once inform the Boarding-out Officer, and also give notice at the nearest police station, and otherwise make every effort possible to recover possession of the child. The Boarding-out Officer is required to visit the children as often as practicable, and lady visitors are expected to send him returns from their respective districts quarterly, setting forth the particulars of their monthly visits, the treatment of the children, the condition of their clothing and bedding, and stating whether the children usually appeared healthy, well-clad and well-behaved; if any complaints had been made by or against them; and if they had  
regularly

regularly attended day-school, church, and Sunday-school. And it is also stipulated that Protestant children must be placed with Protestant foster-parents, and Catholic children only with persons professing the same faith. Under these Regulations, which I have summarized as briefly as possible, the Board first had power to place out children in September, 1881.

When operations were resumed in that month the Board had control of twenty-six boys and thirty-seven girls, two being girls who had been adopted without subsidy, the remainder boarders. Twenty boys and thirty-two girls have since been placed out as shown in table "A," two girls being adopted and the others boarders. One girl and two boys died during the period under notice; one boy was accidentally drowned, and three boys and five girls were reclaimed by their relatives. Thus the number of children under control on March 31 was 103, viz., forty boys and sixty-three girls. One of these adopted children has since been placed in another home as a boarder. The three adopted children are not now a charge upon the State, although they are still subject to the supervision and control provided in the Regulations. One child is entirely and seven partially paid for by their relatives or friends, and the remainder are wholly supported by the Government. In three special cases of children above three years of age the payment is 7s. a week each instead of 5s. One of these children suffers from hip disease, another has lost an eye, and is the victim of a very unpleasant physical infirmity as well, and the third is afflicted with a chronic eruption of the scalp, which requires a good deal of extra care. The two latter have greatly improved since their removal to the country; and, I may remark *en passant*, that but for the provision which has been made by the boarding-out system, all these children would probably be in hospital, as there is not another asylum for children in this Colony into which, by reason of their infirmities, they are eligible to be admitted.

I may state here that, of the children who died, the girl was a fatherless and motherless waif, in whom the germs of consumption had been sown by exposure and neglect, and there was little probability of her living when she was placed out by the Boarding-out Society, but it was hoped that she might gain strength from tender nursing and proper nourishment. The boys were infants, and the cause of death in each case was teething convulsions. I think it necessary to point out that in consequence of the Board undertaking the charge of young infants, who are not admissible either at Randwick or the Orphanages, the rate of mortality will probably be higher in proportion to the numbers under control than it is at those institutions. Infants at the breast, who may require foster-parents, and crippled children, are always boarded-out when homes can be found for them. The Board, indeed, carefully considered whether such cases should be brought within the scope of their operations, but several delicate babies who were removed from the Benevolent Asylum and placed with families in the district of Goulburn, have developed into such strong and healthy children, under the more generous influences of country life, that it was determined to incur the risk of an increased mortality rather than deprive sickly infants of the advantages which could only be conferred upon them through the medium of the boarding-out system. No permanent arrangement has yet been made for medical attendance. The general health of the children has been so good that it has not yet been required, and it has been found more economical to pay for visitation and medicine as needed than to appoint medical officers to certain districts and fix a capitation fee as in Victoria. Probably as the system extends this plan will have to be departed from.

The

The Board have had cause for gratification at the class of persons who have applied for children. And the applications hitherto have been so numerous that opportunities have been ample for choosing only the best homes and at the same time placing out more children, if it had been possible to obtain them from the Benevolent Asylum, which was the only source of supply available, until this past month, when permission to withdraw children from the Orphanages was given by the Government. There has been no endeavour to unduly force the system: the greatest care possible has been bestowed upon the selection of homes, for much depends upon the wisdom of this first step. When applications are received, signed, as required by regulation, by a clergyman and magistrate, the Boarding-out Officer visits the proposed home and makes careful inquiries in its neighbourhood into the character of the applicant. Of 100 applications which were thus dealt with it was deemed advisable to reject fifteen. The improper character of the applicants was the reason for this course in five cases, and in ten the homes were so poor that it was quite evident the children could not be maintained without the guardians being put to sore straits. I direct attention to the Appendix containing extracts from the Boarding-out Officer's reports upon the homes which were rejected because of the improper characters of the applicants. *The applications for these persons were recommended in each case by a clergyman and magistrate.* The homes which have been approved of are those of well-to-do mechanics in receipt of weekly wages, of respectable tradesmen, and farmers, and, in a few cases, of independent people. In three instances poor women have been allowed to nurse infants, but their circumstances are not straitened; and before the system was brought under official control the Boarding-out Society, guided in the only way that they could be, by the clerical and magisterial recommendations, selected three homes which, by reason of their poverty only, would probably have been rejected upon the report of the Boarding-out Officer. But the children are kindly treated, and such a mutual attachment apparently exists between them and their foster-parents that it has not been deemed necessary to remove them. It is wisely thought, however, that, in consequence of the smallness of the sum at present paid for the support of the children, which in most cases hardly covers the actual cost of their maintenance, the foster-parents should be beyond the pressure of poverty. It may indeed become matter for future consideration whether these payments should be increased.

The majority of the homes seem to afford a happy realization of the boarding-out system. They are situated in healthy country districts, and the children placed in them appear to have fallen very readily into the family life, after the first natural strangeness to it wore off. Of course exceptions have arisen, as they must always arise, but the Appendices to this Report show that the guardians generally are well satisfied with the children allotted to them; while the observations of the Boarding-out Officer and lady visitors, and the statements of the children themselves, warrant the belief that the foster-parents are kind and fully alive to their responsibilities. In the few cases in which the reports upon the children are "indifferent," "bad," and "unsatisfactory," the explanations subsequently afforded, and noted in an Appendix, show that the alleged misconduct was nothing more serious than faults natural to wayward childhood, and that only in two cases had there been anything like inherent viciousness to complain of. Indeed, the fact that it has not yet been found necessary to return any of the children to the asylums is some proof that these waifs who have, for the most part, either been gathered from the streets or been without parents from infancy—or worse still, had parents of very bad character—can, with the exercise of a little trouble and forbearance and judicious kindness, be made amenable to proper paternal control. It is always impressed upon the guardians that the object of the system

is

is not to "coddle" the children; that while they are to be allowed reasonable opportunities for amusement or recreation they must also be properly instructed in household work, in fact qualified as far as they may be in their youth to go out into the world and fight the battle of life with credit to themselves and advantage to the commonwealth. There has been no reason to suppose that this privilege of using the children has yet been abused. I wish here to direct attention to the school reports which are appended; they afford additional testimony that the children are well looked after at home, judging from the condition in which they are as a rule sent to school, and also because they show that the school work has been fairly satisfactory. It should, of course, be taken into account, when instituting comparisons on this head, that these children have so far been selected from an institution which, by reason of its character as a receiving house only, does not educate; and as they were, with few exceptions, in the first instance taken from parents who had utterly neglected their responsibilities, or from the highways and byways, the schoolmaster had, in most cases, perfectly raw materials to work upon. Future reports will no doubt show better results; as it is apparent that the children, as a whole, attend school with very fair regularity. In a few instances the attendance has not been so regular as it should have been, but, with two exceptions, the explanations afforded by the foster-parents, endorsed by the lady visitor and Boarding-out Officer's inquiries, and set forth in the "notes" appended to the reports, are considered satisfactory. In the exceptions mentioned the guardians have been communicated with, and informed that a penalty would be inflicted in the event of any similar breach of the Regulations. These school returns will be received half-yearly, and the attendance of the children closely watched in order that any defection may be remedied. In those cases in which reports are not now given, the children are yet too young to be educated.

The Board commenced operations without a Parliamentary vote of money, and consequently without funds. There was a balance of £28 8s. 7d. in the Bank of New South Wales to the credit of the Boarding-out Society, which, under the prevailing method of keeping the Government accounts, had to be paid into the Consolidated Revenue Fund. The "State Children Relief Act," however, provides for a contingency of this character; and accordingly the Board received an advance from the Colonial Treasurer of £500 in July, 1881, and a further advance of £404 10s. to meet the liabilities of last year; and in December Parliament voted £3,160 for the services of the State Children's Relief Department during 1882. It is hoped that this sum will be sufficient to cover the present year's expenditure. The expenses at the outset must necessarily be somewhat heavy, as several charges have had to be incurred which will only be requisite again in a much smaller degree. And the whole cost, distributed as it is among the small number of children at present under control, makes the charge for each child appear excessive, but this amount per child will diminish in proportion as the number of wards increases, as has been said. The expenditure incurred from December 31st, 1880 (the period of the Boarding-out Society's last annual report), till March 31st, 1882, is shown in detail in the annexed balance sheet [Appendix F].

It will be necessary to appoint a clerk or secretary as soon as money is available for that purpose. The Boarding-out Officer is made responsible by the Act to the Government and to the Board for the proper treatment of the children and the judicious selection of the homes, and it is not possible that these functions can be efficiently discharged in the future, while the greater part of his time is occupied as it is at present, in the performance of the clerical work of the Department, which does not properly belong to his office. It appears

appears to be indispensable that this officer should devote his whole time to visiting the children and selecting suitable homes. On the 31st of March there were nearly 150 new homes available, in addition to those now under control; and before these can be approved or otherwise, the applicants will, except in a few instances in which they are personally known, have to be visited, and the usual inquiries made with respect to them. The information furnished in Appendix E shows very clearly that it is not safe to grant an application until these conditions have been complied with. Since the Board notified in September last that they were prepared to place out children, applications have been received at the rate of thirty a month. I may mention that the vote for boarded-out children in Victoria last year exceeded £20,000, and the expense of the administrative staff was upwards of £2,000.

The lady visitors who have been appointed in most of the districts in which children are placed appear to be affording very valuable help. Their reports contain details which show that their duties, voluntarily rendered, have been conscientiously performed. I have in a former part of this Report dealt so fully with this element in the system that I do not purpose referring to it here, further than to say that the Board seem to have been fortunate in securing these coadjutors, whose work, when it is faithfully performed, is invaluable. Some details of their reports have been summarized and tabulated in the Appendices, but much additional information has been furnished which indicates that they have made the children's welfare a matter of particular attention, and that their efforts in this direction have been met in a very proper spirit by the guardians. The supervision exercised by the Boarding-out Officer has also been as close as his other work has permitted. The particulars of every visit to a child or to an applicant are carefully recorded in the books of the Department, from which it appears that 400 visits have been paid to applicants and children, the majority of whom reside in localities far distant from the centre of operations, during the nine months of his official service terminating with the period of this Report.

As regards the constitution of the Board, I may state that it was appointed by the Governor and Executive Council, the members in the first instance being the Hon. Arthur Renwick, M.D., M.L.A., (President), Lady Allen, Mrs. Mary Ischam Garran, Mrs. Marian Jefferis, Mrs. Mary Elizabeth Windeyer, Miss Mary Stuart, the Hon. Sir Joseph George Long Innes, Knt., M.L.C., and John Rendell Street, Esquire, J.P.; and Lady Jennings was similarly appointed subsequently to the only vacancy in the Board. Mr. Sydney Maxted, who had already had considerable experience in the management of State children, was appointed Boarding-out Officer by the Government, upon the recommendation of the Board, after consideration of the testimonials of the various candidates for that office. The Board regretted, in the beginning of October last year, to lose the assistance of Mr. Street, one of its most valuable members, who was compelled to resign his office, solely in consequence of the inconvenient hour at which it was found necessary to hold the meetings. His resignation was accepted by the Government on October 7th, 1881. Since the Board was constituted it has held thirteen meetings, at which the members attended as follows:—the President, 13; Lady Allen, 10; Mrs. Windeyer, 10; Mrs. Garran, 8; Miss Stuart, 7; Lady Jennings, 3; Mrs. Jefferis, 1; Mr. Street, 4; Sir J. G. L. Innes, 1. Miss Stuart was absent from the Colony until August last year, and Mrs. Jefferis was similarly absent until March, 1882.

It was hardly to be expected that any Act or code of rules that could be framed for the administration of an entirely new department,  
in

in which it was necessary to provide for many matters of detail, could be perfect at the outset; and it has been found that both the Act and Regulations under which the State Children's Relief Department was created require to be amended in several particulars. So far they admit of the business of the department being carried on efficiently in the most essential points, and they are sufficient for the protection and oversight of the children who have been brought under the operation of the boarding-out system. But there are some matters which will have to be provided for by future legislation if the system is to be as perfect and as equitable for all the parties concerned in its administration as it may be. It has been found that the laws relating to child desertion in this Colony are so defective that the provision made in the Regulations framed under the "State Children Relief Act" for compelling parents to contribute towards the support of their boarded-out children is practically inoperative, as it may be evaded by a very simple process. It appears that any person who has contracted with the Board for the payment of a certain sum for the support of his boarded-out child has only to refuse to pay, and he cannot be dealt with otherwise than as a common debtor. The Regulation enacted that non-payment of these charges should, in law, be child desertion. But the Attorney-General has ruled that this Regulation, is *ultra vires*; because any person who places a child in an Asylum or with the Board under an undertaking to pay for it, has *legally* provided for it, although he may never pay a penny. The Board has at present four children under control whose mother is dead, and whose father, there is every reason to suppose, is well able to pay the full charge of five shillings a week for each child. He undertook to do so, but has neglected to pay for upwards of eighteen months. He now owes nearly £80. His property is secured, and if he should be proceeded against as he might be in the District Court, he has the easy alternative of clearing off his arrears through the medium of the Insolvency Court. The law should clearly be so altered as to make defaulters such as this amenable to punishment for child-desertion. There is another common practice which can only be suppressed by legal enactment. In the case of eight applications to board-out children, which have been inquired into by the Boarding-out Officer during the past eight months, women have left their illegitimate children with poor people whom they have tempted to take charge of them with an offer of a substantial weekly payment. These mothers generally pay a fortnight's or a month's charges in advance, then disappear, and it is impossible to trace them. It then only becomes necessary for the guardians to hand such children over to the police, and the cost of their future care falls upon the State. This kind of evasion of paternal responsibility is also, it seems, not child-desertion in law, but merely a matter of common debt. Again, the "State Children Relief Act" provides that boarded-out children must be apprenticed at the age of twelve years, while the "Public Instruction Act" requires them to attend school until they are fourteen years of age. The Board have consequently been compelled, in order to bring their Regulations into harmony with the measure last-named, to provide that their apprentices must attend school not less than seventy days in each half-year during the first two years of their period of service. It is reasonable to suppose that this anomaly will have to be obviated by the exemption of State children from school after their apprenticeship, or by fixing the commencement of their service at their fourteenth year, as otherwise few people will be found to engage them, and the Board will have to fall back upon the objectionable alternative of returning them to the asylums when their period of boarding-out has expired. Only two children have yet been apprenticed; and it says something for the success of the boarding-out system that one of them has been taken by the guardians with whom she has been boarded upwards of a year, and the other by a neighbour with whom she has

been in close intercourse during the whole period of her boarding-out. She also would have remained with her foster-mother, a widow, only the latter married and left the district. It has further been found necessary to suggest better provision than there is at present for preventing dissolute parents from annoying the guardians of their children. Some of these parents have paid periodical visits to the homes from the gaol and the poorhouse, and have caused such general annoyance that the foster-parents have in several instances threatened to give up the children, and in one case have actually done so. The defects and difficulties which I have here pointed out, and which are decidedly obstacles to the perfect success of the boarding-out system, can only be remedied and removed by legislation; and it is, I think, within my office to suggest that it would be well for such steps in that direction as may be necessary to be taken with as little delay as possible. It is hoped also that in any amendment of the laws relating to State children, the Board will have power to establish cottage homes. It has been demonstrated that these can be worked most successfully and economically in conjunction with the boarding-out system; and they constitute an admirable method of providing for whole families whom it may not be desirable to separate, and for other children of the State who may not be suitable subjects for boarding-out, such as cripples, or children otherwise physically afflicted, who cannot readily be provided for in private homes, even when an increased rate of payment is offered. Little ones of this class are now practically excluded from our public asylums for destitute children. These homes, each containing not more than from eight to ten inmates, might easily be established in healthy country districts, in charge of kindly nurses, where they would be as completely under official and voluntary supervision and control as the homes of boarded-out children. And the cost to the State of children thus placed out would not exceed the cost of a similar number of healthy children maintained in a public institution. One cottage home, having nine healthy inmates, has been very successfully carried on for several years by Mrs. Jefferis, a member of this Board, at a cost not exceeding £15 per child per annum.

The Appendices to this Report contain particulars of so much interest that I earnestly recommend them for perusal. They afford information upon many matters affecting the children's treatment and welfare, such as could not well be set forth in a general summary. And they bring out one point prominently, namely—that the safeguards which surround these children are so numerous that it is hardly possible for them to be ill-treated or neglected to any material extent without detection following almost immediately. It may perhaps be an objection that these Appendices embrace details which it would have been well to confine to the records of the Department; but it will be seen by reference to the "State Children Relief Act" that the publication of some of them for the information of Parliament is necessary under section 12 of that statute; and it is further desired that the fullest publicity shall be given to the business of the Department, in order that the method of dealing with State Children under this Act may be fully and fairly understood, and in the belief that such publicity is one of the best aids that can be given to the boarding-out system.

I desire, before concluding, to acknowledge the help that has been received from the management of the Benevolent Asylum. And I have no doubt that similar assistance will be accorded by the heads of other institutions from which it may become necessary to remove children from time to time as the system extends.

I have also to express my sense of the valuable services which have been rendered by the Boarding-out Officer in the discharge of his onerous and multifarious duties. Mr. Maxted, from the inception of the  
the

the system, has manifested the utmost enthusiasm for its proper initiation and development, and both in connection with the clerical and practical labour associated with the working of this Board has displayed talents and industry of no ordinary character.

I may add, in conclusion, that the various Appendices to this Report contain all the information required by the "State Children Relief Act," and will, perhaps, afford the most satisfactory proof of the earnest attention paid by the Board to the duties involved in the provisions of this Act, as well as the general success of the first year's history of the Board's efforts to promote the boarding-out system in this Colony.

I have the honor to be,

Sir,

Your most obedient Servant,

ARTHUR RENWICK,

President of the State Children's Relief Board.

## APPENDIX A.

RETURN of Children placed out from December 31, 1880 (period of Boarding-out Society's last annual report), to March 31, 1882.

	Boys.	Girls.	Total.
The children placed out on Dec. 31, 1880, numbered .....	22	29	51
Placed out by Boarding-out Society in Jan., 1881 .....	4	5	9

Do do do March, ,, .....	2	0	2
	—	—	—
	46	69	115
	Boys.	Girls.	
Died, from Dec. 31, 1880, to March 31, 1882 3 1 = 4 }	3	1 = 4	12
Returned to parents during same period ... 3 5 = 8 }	3	5 = 8	
	—	—	—
Leaving placed out on March 31, 1882 .....	40	63	103

Of these children 100 are paid for as boarders, viz., 10 at 7s. and 90 at 5s. a week ; and 3 are adopted without subsidy.

Parents contribute towards the support of 8 of the boarded-out children, and the remainder are wholly supported by the State.

Of the children who died, 1 boy was accidentally drowned; 2 infants, 4 and 6 months old respectively, died in convulsions; 1 girl died from consumption, the result of exposure and neglect before being placed out.

\* Operations were suspended from March till September, 1881, pending the transfer of the business of the Boarding-out Society to the State Children's Relief Board.

NOTE.—This return only includes children under control at the period of the Boarding-out Society's annual report, and since placed out by the State Children's Relief Board. Similar information with reference to the children previously dealt with was contained in the Society's report.

## APPENDIX B.

TABLE showing the Ages at which the Children have been placed out.

EXPLANATORY NOTE.—APPENDIX D.—It will be seen by reference to this appendix, that the great majority of the children hitherto boarded out have been collected from the class known as "casuals"—children who are not only predisposed to physical infirmities natural to dissipated and immoral parents; but who are usually most difficult to manage, from the fact that they are generally taken from the streets or from ill-governed homes.

The information contained in the last three tables extends over the full period of the operation of the Boarding-out system in this Colony, no similar particulars having previously been published.

## APPENDIX E.

[EXTRACTS from Boarding-out Officer's Reports upon applications. Initials are fictitious. Correct names are entered in Report Book.]

A.B.—Applicant wants girl, aged nine years, as boarder. Keeps small roadside store,  $\frac{1}{4}$  mile from school,  $\frac{1}{4}$  mile from church. House fairly well furnished, contains four rooms. Child to sleep in separate bed in applicant's own room. Very unfavourably impressed with this woman. When I visited her she was very much under the influence of drink, and was drinking ale with two men—apparently bushmen—in the shop, one of whom passed her money as she opened a bottle of ale. \* \* \* \* \* Appears to me to keep a house for sly grog-selling. Police suspect her of this practice. \* \* \* \* \* [Memo.—This suspicion was subsequently confirmed.]—Application recommended for refusal.

C.D.—Wants two boys as boarders. Comfortable home, and applicant apparently respectable. \* \* \* A very plausible woman. \* \* \* \* \* One neighbour speaks well of her, two the contrary. \* \* \* \* \* Represented that she is not a respectable woman, that she drinks and gambles, and has kept until very recently a lodging-house of the lowest possible description for immoral purpose. \* \* \* \* \* Police confirm this report.—Recommended for refusal.

E.F.—Applies for a boy boarder. Home very poor one. Woman's face marked as if from blows. Breakfast when I called consisted of bread and dripping, and tea without milk. Two neighbours give this home a very bad reputation. One person states applicant has a child in gaol. Police say that one of applicant's children is in a reformatory for robbery, and that another has recently been sentenced to a fortnight's imprisonment for theft; further that applicant is a wife-beater.—Recommended for refusal.

G.H.—Applies for two children, boy and girl, as boarders. House very dirty. My inquiries elicited from two neighbours some serious imputations upon the morality of this family. Six persons—two of them respectable storekeepers—whom I inquired of, all say applicant and daughters not respectable people. Police do not know anything of this home.—Recommended for refusal.

I.J.—Wants four children as boarders. A leading resident, a neighbour, says ——— is very often drunk, and that his wife is seldom sober; also that she is in other respects a most immoral character. Applicants are in very good circumstances. Similar information supplied by two other respectable persons. Proceeded to the home, and saw sufficient evidence that it was a most unfit place for children. The woman appeared to be on the verge of delirium, apparently from drink, and had certainly been drinking heavily very recently. Her general reputation is very bad.—Recommended for refusal.

NOTE.—The applicants above-mentioned were certified by clergymen and magistrates to be fit persons to have the charge and care of children.

\* A considerable portion of this clothing is in stock. The average cost per outfit of the children sent out has been about £2 7s. 6d. † Incidental expenses include:—Books of Department, £8 11s. 2d.; clerical assistance, £11; expenses of boarded-out children when under conveyance to destinations, £4 15s.; painting signboard, £1 17s. 6d.; three funerals, £7 5s.; cartage of children's boxes, £2 11s.; instrument for child suffering from hip disease, £11 10s.; bibles, £3; money orders and duty stamps for foster-parents' payments, £4 0s. 11d.; sundries, £7 4s. 3d.

## APPENDIX G.

## EXTRACTS from letters upon the working of the Boarding-out System.

Canon GUNTHER, M.A., Parramatta:—

\* \* \* As I had seen and heard a good deal about the boarding-out system in England, I looked forward to its introduction here with much pleasure. It is, I consider, working admirably. The children boarded-out in Parramatta whom Mrs. Günther visits appear very favourably placed. Their foster-parents are doing their duty faithfully, and the little people are all bright, happy, and contented. So long as proper care is exercised in the selection of homes, and a proper supervision exercised over the children, I have no doubt the system is the one best calculated to produce healthy, domesticated, and useful members of society.

Mrs.

Mrs. F. B. SUTTON, Bradwardine, Bathurst :—

\* \* \* From what I have seen of the boarding-out system, I consider it a much more desirable method of bringing up the State children than that of keeping them in any large institution. The children under my notice are happy, well fed and clothed, and answered any questions without the least restraint. When children are reared in these country homes, their natural affections are brought out, and they are likely to become useful, respectable men and women.

Mrs. M. A. BADGERY, Sutton Forest :—

\* \* \* In the case of the children boarded-out in this district the system answers admirably, and the foster-parents are evidently fond of their charges. To see these little ones playing happily in the cottage and the orchard makes one think with pity of the poor little waifs herded together in a large asylum without the comfort of a motherly sympathy.

Mrs. RICHARD CONOLLY, Goulburn :—

\* \* \* My first inducement to take any part in the work of the boarding-out system in New South Wales was its similarity to that of our cherished Protestant Orphan Society in Dublin, where the orphans of our respectable Protestants of a humble class were taken and provided for—not in pent-up asylums, but amidst the sunny hills and verdant meadows of the beautiful county Wicklow. There, safely located in the houses of chosen Protestant farmers, they were brought up as members of the family, carefully sent to Sunday and weekly schools, and inspected by clergymen sent from the Society. I give my most hearty approval to the system of boarding-out when carried forward under due inspection. I consider that wherever a Branch of the Society is established, there should be a lady visitor as well as the Government Inspector, to unite in their labours amongst both the children and the foster-parents; and I feel assured that the Government of the country could not have adopted a more salutary resolution for the training of the rising generation than that from which emanated the Boarding-out Institution. \* \* \* Having been requested to give a statement of my opinion as to the working of the boarding-out system at Goulburn, I can most unhesitatingly answer in its favour, and my opinion is confirmed by the satisfactory evidence of the friends and Inspectors who have visited us from Sydney. We are favoured with a fine healthful climate here, and this, in addition to the care, cleanliness, comforts, and caresses which the little ones receive from their foster-parents, soon renders them different-looking children from those who come down to us from the asylum. One tiny creature who really did look like death, insomuch that the Manager was ashamed to send her, is now one of the gems of our flock—a fine active little woman; and, more than all that can be said of their improved looks, is the improvement in the development of their affections. When they are first brought to us, it is painful to see the passivity with which they will go to any strange nurse. Try the experiment now, and the change will soon be found—clinging to their “mothers,” it will at once be seen that they have found a friend. We have now forty-eight children and twenty-seven nurses in Goulburn. Three of this number have proved unruly, but this is a very small item to weigh in the balance against the large amount of real good effected and happiness bestowed by the working of the boarding-out system in Goulburn.

Rev. R. J. ROSS EDWARDS (C.E.), Tarago :—

\* \* \* I am very glad to be able to give my testimony as to the very successful working of the boarding-out system in at any rate this part of the country. As clergyman of this parish (which includes Windellama, Mullengullenga, &c.), I am constantly seeing the children boarded-out in this district, and can testify, from personal observation, that in every case which has come under my notice they are well cared for, carefully taught, and most happy and contented. Where possible they all regularly attend church and Sunday-school. So far, at least, the system has here been a great success.

Rev. HERBERT TAYLOR (C.E.), Deniliquin :—

\* \* \* I forgot to tell you why I take an interest in the boarding-out system. It is this :—My mother, who lives near Melbourne, has been for some time past the honorary secretary of one of the ladies' committees, and I have heard from her from time to time such wonderful accounts of the change in the health and appearance and happiness of the children boarded-out there, that I feel sure the work is one which every Christian should try to further and help.

Mrs. JOHN KEEP, Broughton, Leichhardt :—

\* \* \* I can speak in the highest terms of the home at Mrs. Foley's. Both Mr. and Mrs. Foley are exceedingly kind, careful, and judicious in their treatment of the children entrusted to their care, evidently taking great interest in them. The children are much improved, the boys, who were delicate presenting now a healthy, manly appearance, and all looking bright and happy. I only hope there are many homes as suitable as this one I have the pleasure of visiting, then the system must assuredly answer.

Mrs. EDITH CROPPER, Lake Bathurst, Tarago :—

\* \* \* I may safely say that, as far as this district is concerned, the method answers very well, as the homes chosen are good ones, and the children have therefore every chance of becoming useful members of society.

Rev. EDMUND B. PROCTOR (C.E.), Bungonia :—

\* \* \* I have much pleasure in recording my opinion of the system of boarding-out State children in private families. In those cases which have come under my notice I believe it is proving itself a success. Whether the State children I know are in exceptionally good homes I know not, but all I see of them shows them to be happy and growing in intelligence. It is a comfort to see these children in their country homes treated, as in all the cases under my observation, like children of the house. They all speak affectionately of their foster-mothers, and bid fair to be useful members of the community. I believe this system will make their desertion a blessing, for it will bring them under wholesome moral training, and develop their minds and bodies in a healthy manner. I think if the clergy and others on whom the Government depend for information will fulfil the trust reposed in them, and without scruple refuse to recommend any but unexceptionable people, and unhesitatingly report any case where the children are not treated according to the above principles, so that they may immediately be removed in that event, that the system cannot help being the greatest blessing to the poor little unfortunates.

F. NORTON MANNING, Esquire, M.D., Inspector General of Insane :—

\* \* \* I am well disposed towards the boarding-out system for children. It commends itself to one's common sense \* \* \* You have my best wishes for its success.

Mrs. HUGH TAYLOR, Parramatta :—

\* \* \* I can only say from my experience as one of the lady visitors, that I consider the boarding-out system an excellent one. The children are properly cared for, taught to be self-reliant and industrious, and I doubt not will, when they grow up to be men and women make useful colonists.

The Venerable ARCHDEACON PUDDICOMBE, Goulburn :—

You ask me for my opinion upon the operation of the boarding-out system, of which you truly say I have had good opportunity to judge.

It is expressed in a few words. As to the general effect of the system upon the character of those whom it is intended to benefit, I am fully persuaded that the influences brought to bear upon young children in well selected homes are far more likely to mould them into intelligent, useful citizens than the necessarily artificial methods of our large benevolent establishments; and as to the actual treatment of children boarded-out in this locality, I have been at some trouble, since receiving your note, to visit those whom I do not usually see in my parochial rounds, and am glad to be able to state that in almost every case the little ones appear well cared for and quite at home with their foster-parents; indeed, the affection exhibited by and shown towards the little forlorn children marked them out at once as objects of special care.

The one danger of the system—that of unkind or improper persons being recommended for the care of children—may, I think, be minimized by the choice of wise and firm lady secretaries, and by keeping before Magistrates and Ministers of Religion the responsibility they have as referees, and the beneficial influence they may exert by regularly inquiring after the children entrusted to those whom they may have recommended. We are fortunate here in having a most active and suitable lady secretary, and a very careful acting Police Magistrate.

Rev. JOHN SHAW, St. Paul's, West Maitland :—

The boarding-out system initiated in this Colony by the State Children's Relief Department has not been sufficiently long in operation to pronounce with certainty as to its results, but its present aspect is promising. Results in England have proved satisfactory, and the same thing may be looked for here under our more favourable conditions. The recipients of our State children and their foster-parents are mostly in more advantageous circumstances than similar persons in England, while the greater comfort and variety of colonial homes is likely to act still more beneficially upon the children. I have found that wherever the system becomes known it commends itself to every one, and especially to those with whom the children can be most suitably placed. The object would seem to be to make home children of them, so that they may have the same chances in life as children of a well brought up family. This is facilitated by the feeling mentioned above, and by the generally kind disposition manifested, so far as I have seen, towards the children themselves. As a rule there appears to be no prejudice against them personally, nor any jealousy of the visitors appointed by the Department. The prospects of the system, so far as it has come under my observation, are most hopeful. Its success will depend upon an able central administration, conscientiously seconded in the various localities; and perhaps I may be permitted to testify to the diligent, thoughtful, and humane spirit in which, by personal experience, I have found the system is being worked.

Mrs. ONSLOW, Camden Park, Menangle :—

I have only three children under my charge, and therefore my experience is limited, but these three are all progressing most satisfactorily. Of one, a little girl of six, Jessie Barber, I had some complaints from the foster-mother, Mrs. Hourn, who expressed a wish to part with her; but when I spoke to her on the subject she said she had changed her mind, that "the poor little thing was becoming much more tractable," and that both she and her husband should be very sorry to give her up. Thomas Ralston is boarding in the same family, and both the father and mother are very much attached to him. These children are both bright and intelligent, and look quite happy. Little Henry Foreman, though in a less prosperous home, is, I think, even happier. His foster mother, Mrs. Wood, took him to fill the place of a little boy she lost. He comes with his new mother to see me, and is on most easy terms with her, calling her "Mammie." She evidently makes a great pet of him, and I should only fear that he may run a risk of being over-indulged; but I think children are rarely much hurt by indulgence. She asked me if I thought she might take him with her for a trip to the Richmond, as she did not like to leave him behind, and was going to see one of her children, and she thought it would be a nice change for him. I replied that I felt sure no objection would be made. The three children are always nicely dressed, and have no look of being charity children. I am deeply interested in the success of this system. I do not think it is generally known, but before any movement was made to commence it in this Colony, my husband, the late Captain Onslow, made various attempts to induce the Government to introduce it. He and I were both of opinion that by its introduction a great benefit would be conferred upon the community.

APPENDIX H.

TABLE showing Names, present Ages, and other particulars concerning all Children hitherto placed out under the Boarding-out System.

Names of Children.	Ages.	When placed out.	In what capacity	Whence received.	How disposed of.	On what date.	Foster-parents' Reports upon Children's Conduct.	Names of Foster-parents.	Where residing.
Aubrey, Jessie	10	17 Aug., 1880	Boarder	Benevolent Asylum			Pretty good	William Butt	Bungonia.
Austin, Evelyn	9	19 Oct., 1881	"	"			Generally good	Margaret Erskine	Parramatta.
Austin, Ada	6	19 "	"	"			"	"	"
Barber, Jessie	7	11 May, 1880	"	"			Passable	John Hourn	Menangle.

## EXPLANATORY NOTES, APPENDIX H.—GENERAL RETURN.

In the forms from which this table is compiled there is a column containing the following question,—“Has the child complained of ill-treatment at any time?” The answer has invariably been “No”; excepting in one case, in which, although there was no evidence that the child had been ill-treated, the relationship existing between her and the guardian was considered so unsatisfactory that she was removed to another home, in which she is doing well.

It is very difficult to discover the correct ages of the children who are collected from the streets, or deserted by parents, or placed in the asylum by the police. This fact is drawn attention to because a number of children who are in this Appendix stated to be at present 5 years and 4 years old respectively, and are passed elsewhere as “too young to attend school,” are apparently mere infants. In ordinary cases a child five years old might attend school half-time.

Jessie Barber, aged 7; conduct passable. Said to have been disobedient, untractable, and of unpleasant habits. Foster-parent at one time determined to return her, but she has so much improved recently that the last verbal report to the Boarding-out Officer was very satisfactory.

Mary Ellen Byred, 11; conduct good. When first placed out was uncontrollable, untruthful, and dishonest. Absconded twice. Reports during last half-year have been good.

Maud Bunce, 5; conduct bad. Details: Disobedient, untruthful, and sullen. Attention is directed to the age of this child.

Jane Laing, 12; conduct only passable. Is to be apprenticed immediately to her foster-parent. Has always been a difficult child to manage. Faults: Sullenness and disobedience, and disinclination to attend school.

Thomas Murdoch, returned as 10, apparently older. Conduct very bad. Seems to be an incorrigible boy. Absents himself from school repeatedly, stays out at night, uses bad language, and sets all authority at defiance. Particular trouble has been taken with him by the lady visitor, clergyman, and foster-parent, but without success. Is to be removed at once to another home, where he can be subjected to stricter discipline. Rev. John Shaw, of West Maitland, who has displayed much capacity for dealing with these children, has taken the case in hand.

Francis Murdoch, 8; conduct bad. Brother of Thomas Murdoch. Has similar faults, but in a lesser degree. Is also to be removed.

Walter Miller, 9; conduct very unsatisfactory. Sullen, disobedient, and untruthful. Was improving at date of last report. Is with a careful and judicious foster-parent.

Roderick Miller, 7; brother of former. Similar report, and in same home.

Emily Polson, 13; conduct only passable. Is to be apprenticed immediately. Faults: Sullenness, disobedience, wilfulness. Said to be an excellent little housekeeper and manager.

Maudina Simpson, 5; conduct indifferent. Faults: Unclean habits and untruthfulness. Attention is directed to the age of the child.

Amelia Gillespie, 15.—This child is badly crippled from hip disease, hence the advanced age at which she is under control as a boarder.

APPENDIX I.

ABSTRACT of Lady Visitors' Reports upon Children at present under control.

Name of child.	Name of Visitor.	District.	Did child appear clean ?	Did the child appear healthy ?	Did the child appear well clothed ?	Did the child appear well behaved ?	Did the child appear kindly treated ?	Did the Lady Visitor think the sleeping accommodation sufficient ?	Were any and what complaints made to the Visitor by or against the child ?	Does the child regularly attend Church ?	Sunday-school ?	Day-school

## EXPLANATORY NOTES.—APPENDIX J.—ATTENDANCE AT SCHOOL.

For ages of children generally stated to be "too young to attend school," see Appendix H.

In consequence of the dates on which many of the children were placed out, a number of the reports are for a portion of the half-year only. More instructive returns will be submitted in future reports.

Agnes Bates, aged 6.—In consequence of tender age is allowed to attend half-time for the present.

Cook Catherine, 5.—Ditto ditto ditto. Child also suffers from scrofulous scalp, which at certain seasons necessitates her absence from school.

Dulcie (10) and Rebecca Griffiths (8).—In consequence of great distance from school are permitted to attend half-time.

Maud Eliza Griffiths, 5.—Child so young and school so far off that she is exempted from attendance at present.

Isabella Laing, 12.—Foster-parent has been directed to send child to school more frequently. Child is well advanced.

Jane Laing, 10.—Frequent attendance impossible through illness. Suffers from blood-spitting and fainting fits. Is well advanced.

Annie Martha Lee, 10.—Foster-parent has been directed to send child to school more frequently.

Alfred O'Flaherty, 5, John O'Keefe, 4, Elizabeth O'Keefe, 5.—Children so small that frequent attendance is not insisted upon.

Emily Polson, 13.—Foster-parent was informed that the Board would inflict a penalty if the child did not attend more frequently.

Madeline Lane, Frances Murdoch, Robert Murdoch.—Placed in the one family. To be removed to another home. Children are robust and healthy, but are not sufficiently clad, and are allowed to attend school generally in a very slovenly manner. Their foster-parent is very poor. This home was selected before applications were subjected to official investigation.

Henry Stuart, 7.—Foster-parent has been informed that child must attend more frequently.

Edward Trevenan, 11.—Regular attendance at school necessitates a walk of 7 miles daily. Half-time consequently only insisted upon.

John Walkley, 8.—School nearly 3 miles off. Half-time attendance only directed.

Edith and Florence Thompson.—Were absent in the country some weeks on a visit, by permission.

Thomas Murdoch.—See notes to Appendix.—Small average caused through absence from sore eyes.

Jessie Aubery, 10.—Has attended school regularly since December.

1882.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## GOVERNMENT ASYLUMS FOR THE INFIRM AND DESTITUTE.

(REPORT FOR 1881.)

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.*

## The Manager of the Government Asylums to The Principal Under-Secretary.

Sir,

Sydney, 29 May, 1882.

I have the honor to transmit the returns of the expenditure of the Government Asylums for the Infirm and Destitute, and to report, for the information of the Honorable the Colonial Secretary, on the working of those Institutions for the year 1881.

2. The admissions during the year exceed those of 1880 by 241, and this large increase of inmates has, during the winter months, taxed the accommodation capabilities of the Asylums to their utmost extent; but the temporary occupation of the premises at Newington, which were recently purchased by the Government, prevented any serious inconvenience.

3. The daily average of inmates in the four Asylums for the year 1881 has only exceeded that of the former year by thirty-seven inmates, and therefore it cannot be said that, so far as the Asylums statistics may be taken as evidence, pauperism throughout the Colony is very much on the increase. The admissions during the winter months should not be considered as the test so much as the general daily average number; and furthermore, the increased numbers may be fairly attributed, in a great measure, to the patients transferred from the Sydney Hospital to the Asylums in consequence of the overcrowded state of that Institution, and its inability to accommodate patients while the new buildings are in progress. As many as 523 persons were recommended for admission by the Secretary of the Sydney Hospital, and although some were properly asylum cases, a large proportion should have had the benefit of such skilled treatment as the Sydney Hospital, with its large staff of medical practitioners and trained nurses, could bestow; the care of the sick is very good and effective in the Government Asylums, but when the Sydney and Prince Alfred Hospitals are completed the asylums should not be so largely used for purely hospital cases.

4. When the Asylums were taken over by the Government from the Benevolent Society in the year 1862, the indoor patients numbered 624, while on the 31st December, 1881, there were 1,566 inmates in the four Asylums, and these were wholly belonging to the infirm and destitute class, no other persons, except those requiring hospital treatment, being considered eligible for admission to the Asylums.

5. It is generally thought that persons are admitted simply on the grounds of destitution, but destitution alone has never been recognized as giving a claim to admission. Infirmity or inability to work has always been regarded as a concomitant ingredient in the claim for relief.

6. In my report for the year 1880 I stated that the Asylums afforded accommodation for 1,645 inmates. During the past year the number increased to such an extent that, at the approach of winter, the occupation of Newington House, on the Parramatta River, was authorized for the temporary accommodation of the surplus inmates, and provision was made for the reception of 100 men. This additional accommodation prevented the overcrowding of the Asylums for men, and the comfort and well-being of the male inmates were thus secured.

7. The Hyde Park Asylum for Females has been overcrowded during the whole year, and has had a daily average of 275 inmates, and frequently 290, while the building has never been considered fit to accommodate more than 250. Additional accommodation for the old women is urgently needed, as not only is the risk to the inmates from overcrowding daily increasing but many deserving applicants are obliged to be refused who, were there sufficient room, ought to be admitted.

8. The old women have been subjected to much privation during nine months of the past year by being kept within the walls of the building, and deprived of the visits of their children and friends in consequence of the outbreak of small-pox. Many left the Asylum, and preferred to submit to hardships outside rather than to be shut up in so confined a space with the above deprivation.

9. The management has been satisfactory, and, with the above exception, the old women have had a comfortable home. No serious illness occurred, and the small number of deaths (forty-eight) during the year, as compared with seventy-one in 1880, and 70 in 1879, proves that great care has been taken of the invalids. Their detention in the building, and consequent freedom from the evil associations of the city and its public-houses, may in some measure have been the cause of their better sanitary condition.

10. The Liverpool Asylum has had during the year a daily average of 724 inmates, as against 731 for the previous year. It is my practice to admit all consumptive cases to this asylum. Its large and well-ventilated wards, and its usually healthy and pure state of the air, render this institution a very suitable one for consumptive, asthmatic, and bronchial cases.

11. The deaths in the Asylum, though the hospital wards were continually full, with a daily average of 230 inmates, were only nine in excess of those of the previous year; and when it is considered that during the winter and summer months the foul state of the river causing the whole atmosphere to be tainted, added very considerably to the discomfort and positive ill-health of the inmates, especially those suffering from the above diseases, it is surprising that the deaths were not much more numerous.

12. The general management of the Liverpool Asylum has been carried on as usual, most satisfactorily,—the food good, the clothing ample, clean and well-made, trousers, coats, jumpers, boots, &c., being made by the inmates; the keeping of cows has proved a great success, and the large daily supply of fresh milk has enabled the Surgeon-Superintendent to provide his consumptive cases with a proper and plentiful diet.

13. A fire-engine has been supplied by the Government, and a proper house erected, and, though it is hoped that it may never be required, its presence in the establishment assists to make this Asylum perfect in all its requirements.

14. The Parramatta Asylum has sheltered 261 inmates during the past year as against 263 in 1880. The building has never been considered a suitable one for the purpose of an Asylum, but great attention has, as usual, been paid to the good order of the Institution and the comfort of the inmates; the small number of deaths (thirty-three) during the year evidences the care and attention bestowed upon the old people.

15. The Macquarie-street Asylum, better known as the Erysipelas Hospital, at Parramatta, fills an important position amongst the Government asylums. Though very largely used as an Asylum similar to those at Sydney, Liverpool, and George-street, Parramatta, it also comprehends the functions of an hospital, in which large numbers of cases of infectious diseases are received. It is satisfactory to know that there is one Institution in the Colony which will open its doors to all cases of infection, whether they be erysipelas, leprosy, scarlet fever, measles, cancer, &c., and while the rules of the Sydney Hospital deny admission to any case of infection the afflicted person can immediately obtain admission to the Macquarie-street Asylum.

16. The marked success which has attended the treatment of erysipelas should be especially noted, because so much has been said about the hospitalising of Institutions, rendering it necessary even to pull down hospitals because the disease of erysipelas has taken possession of the stone walls.

17. In the year 1880 seventy-four cases of erysipelas were admitted into the Macquarie-street Asylum, and cured, with the exception of two cases which were nearly moribund on admission; in 1881 seventy-six cases were admitted and all cured, except two who died. So that out of 150 cases of erysipelas—and many of them very severe, being accompanied by delirium tremens to such an extent that patients were subjected to partial restraint—only four deaths resulted; no inconvenience arose to the other inmates of the Asylum. Erysipelas did not in any one instance show itself in the Asylum which could be attributed to infection. The treatment of erysipelas at the Macquarie-street Asylum proves that the mode is very effective, and also that the disease is not of so infectious a nature as it appears to be considered at the Sydney and Melbourne Hospitals. I am inclined to report strongly on this matter, because it is demonstrated, at the above Asylum, that the disease is, even in its worst stages, easily subdued.

18. The three Chinese lepers, for whom the buildings at Little Bay were erected, were removed to the Macquarie-street Asylum, and thence to what is known as the Lepers' Home, at Newington. They inhabit a cottage and are sufficiently isolated to prevent any fear of infection. They appear to be gradually succumbing to the fearful disease, their feet and hands being quite shapeless; they have periodical attacks of severe illness, which are only controllable by the free use of the gurgon oil.

19. The total expense for the maintenance of the 1,266 paupers for the past year, exclusive of the Macquarie-street Asylum, was £16,428 9s. 9d., showing an average expenditure of £12 19s. 6½d., or 3s. 4d. per head more than for the previous year on the average expense per head.

20. The expenditure for the Macquarie-street Asylum, which might now be fairly included in the general expenditure, but which is kept separate for the sake of comparison with that of former years, was £4,582 8s. 9d., or £13 11s. 11½d. per head, showing an increase of 11s. 9½d. per head; this additional expense is to be attributed to the increase of salaries and allowances, and to a slight increase under the head of clothing.

21. The travelling expenses have been particularly heavy during the past year; so many paupers have been brought from the out-lying parts of the Colony and the expense charged to the Asylums vote, which should not properly be included in the cost of maintenance; when it is considered that 1,100 paupers were admitted to the Macquarie-street Asylum alone the expenses of their transmission forms an important item in the tables of expenditure.

I have, &c.,

FREDERIC KING,  
Manager.

1882.

NEW SOUTH WALES,

## SYDNEY HOSPITAL. (BY-LAWS.)

Presented to Parliament, pursuant to sec. 10 of Sydney Hospital Act of 1881.

Colonial Secretary's Office,  
Sydney, 16th June, 1882.

### SYDNEY HOSPITAL.—BY-LAWS.

THE following By-laws, made by the Board of Directors of the Sydney Hospital, under the 10th section of the "Sydney Hospital Act of 1881," having been approved by his Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above cited Act.

JOHN ROBERTSON.

#### BY-LAWS MADE IN PURSUANCE OF THE PROVISIONS OF THE SYDNEY HOSPITAL ACT.

##### Establishment, plan, and objects.

1. The aid afforded by the Institution known as the "Sydney Dispensary" having been found inadequate to the growing wants and necessities of the sick poor of the City of Sydney, and it having been determined that its usefulness should be extended by the formation of a General Hospital in connection with it, it was resolved in the month of July, 1845, "That the above-named Institution should be re-constructed under the name of the 'Sydney Infirmary and Dispensary,' and that the sum of £1,200, then invested in the Government Debentures and in the Savings' Bank, be invested, in the name of the Trustees, in some eligible security as a permanent endowment, the interest of which should be applied to the general purposes of the Institution, and which should be known by the name of 'The Dispensary Endowment Fund.'" Subsequently, in accordance with arrangements made with the Government, the Institution received a grant of the land on which the hospital stands, and was incorporated on 15th November, 1881, under the name of the Sydney Hospital.

2. The Sydney Hospital combines in its plan and objects the following purposes:—

Firstly. A hospital for in-patients afflicted with acute diseases, whereby medical and surgical advice and medicines are gratuitously administered to such persons as are unable to procure the same at their own expense, and are recommended by the Governors of the Institution.

Secondly. A hospital for indigent in-patients received by order of the Government, and for whose support provision shall be made by the Legislature according to their actual cost to the Institution.

Thirdly. For the reception, so far as it shall not interfere with the primary object of the Institution, viz., the relief of the really necessitous, of patients suffering from acute diseases, who may be able by themselves, their friends, or employers, to pay such sum per day as the Board may from time to time appoint.

Fourthly. For the reception of accidents and urgent cases at all hours of the day or night without a recommendation—subject to payment by those who are able to pay.

Fifthly. A dispensary for providing advice and medicines to indigent out-patients.

Sixthly. Providing at their own habitations advice and medicines for indigent patients within a limited distance of the hospital who may be too ill to attend as out-patients.

Seventhly. A clinical school for the instruction of students in medicine, surgery, &c.

Eighthly. The training of nurses for attendance on the sick.

##### Common Seal.

3. The Common Seal of the Corporation shall be kept at the hospital in a box, having two different locks; one key shall be kept by the President, and the other by the Treasurer or some honorary officer or Director specially appointed by the Board for that purpose.

4. The Common Seal shall not be affixed to any deed, instrument, or writing, except by the order of the Board of Directors at a meeting duly constituted, and for which meeting notice to make such order has been given.

##### Qualification and privileges of Governors and Subscribers.

5. Every benefactor of £50 or upwards at any one time, or within twelve months, becomes a Life Governor.

6. Every person making to the institution a bequest of £100 or upward may nominate a Life Governor; in the event of no such nomination being made any one of the Executors specially selected, named in the will, shall be entitled to the privilege of a Life Governor.

7. The minister of any congregation contributing within the period of two years by one or more collections £50 or upwards shall be a Life Governor.

8. Any society or public company subscribing £50 or upwards in one sum may nominate a Life Governor.

9. Every annual subscriber of £2 or more becomes a Governor so long as the subscription is continued.

10. Governors contributing £2 annually, and Life Governors, shall have the privilege of recommending one patient to the hospital during the year.

11. Governors subscribing £5 annually shall have the power of recommending three patients to the hospital during the same period. Governors subscribing £10 may recommend six patients.

12. Governors subscribing £30 or upwards annually, shall have the privilege of having one patient always in the hospital provided there be a vacant bed.

13. Governors and Life Governors shall also have the privilege of recommending six patients to the dispensary annually.

14. Subscribers of £1 shall have the power of annually recommending six patients; those of ten shillings, three patients; and those of five shillings, one patient to the dispensary only.

15. Governors and subscribers shall, at the Annual or a Special General Meeting, elect the President, Vice-Presidents, Treasurer, and Directors, as hereinafter provided.

16. Governors and subscribers shall be entitled to vote in the manner following, viz.—An annual contributor of £1 to have one vote; of £2, two votes; of £5 and upwards, three votes; Life Governors three votes, such votes being cumulative.

17. No Governor or subscriber shall be entitled to vote in any election who has not been a contributor for at least three months preceding, but Life Governors shall be at once entitled to every privilege.

18. No Governor or subscriber shall vote on any point wherein he is personally interested.

19. Governors and subscribers residing at a distance of ten or more miles from Sydney may at the Annual or any Special General Meeting, and at all balloting meetings, vote by proxy.

20. Every firm, partnership, or association of persons combined for the purpose of subscribing to the funds of the Hospital, may exercise the privileges already described, through some one member of the firm, partnership, or association to be named in writing by themselves.

21. Any Governor being absent from the Colony, may, by power of attorney containing the necessary powers, exercise all the privileges to which he would be entitled if personally present; but such power of attorney shall be exhibited to the Board of Directors for record.

22. The annual subscriptions shall be payable in advance for the current year, commencing on the first of January; and no Governor or subscriber shall be entitled to any qualification or privilege whose subscription shall be more than six months in arrear.

23. No salaried officer, pupil, or servant of the Institution subscribing thereto, shall have any of the privileges of a Governor or subscriber.

#### Benefactors.

24. The names of all benefactors who may have subscribed or bequeathed £50 and upwards in one sum to the Institution shall be annually printed and circulated with the Report of the Institution, and shall be painted on a board to be placed in some conspicuous part of the building. All clergymen collecting contributions in one year to the amount of £50 shall be included in the list of benefactors, whose names shall be annually printed and painted on the board.

#### Constitution and management.

25. The governing body of the Institution shall be a Board of Directors, which shall consist of the President, the Vice-Presidents, the Honorary Treasurer, and of twenty-two Directors, ten of whom shall be elected by the subscribers and Governors as hereinafter directed, ten of whom shall be nominated by the Government, and two shall be elected as hereinafter provided by the Honorary Medical Officers of the hospital.

26. The management of the Institution shall be entrusted to the Board of Directors, which shall meet monthly; and the Board from its own body shall appoint, in the manner hereinafter provided, at the earliest possible period, after each Annual General Meeting, and as soon as the Board itself is constituted by virtue of the Sydney Hospital Act, a House Committee, a Building and Repair Committee, Finance Committee, and such other Committees as may from time to time be necessary, with such powers, privileges, provisions, and conditions as may be required for the due discharge of their purposes, and to carry out the objects of the hospital. The President, Vice-Presidents, and Treasurer of the hospital shall be *ex officio* members of the committees so appointed by the Board.

#### Election of Officers.

27. The election of a President, two Vice-Presidents, ten Directors, Honorary Treasurer, shall be vested in the general body of Governors and subscribers, and except as hereinafter mentioned, shall be made at the annual or a special general meeting, by vote of the Governors and subscribers then present.

28. In the event of more candidates being nominated than there are vacancies, such election shall be determined by ballot, at a special meeting, on a day then to be fixed.

29. The qualifications of persons offering themselves as candidates shall be examined at a meeting of the Board, to be held fourteen days previously to the day of election.

30. The Board shall appoint five or more Governors to superintend the ballot, not less than three of whom must be constantly present during its progress, and five Governors must be present at its close to determine the result. The Board shall have power to make all other necessary regulations for conducting such elections.

31. All persons entitled to ballot are to tender their votes in person, excepting Governors and subscribers residing at a distance of ten or more miles from Sydney who may vote by proxy in the following form:—

“ I hereby authorise \_\_\_\_\_ a Governor  
of the Sydney Hospital to ballot for me at the election  
for \_\_\_\_\_, to take  
place on \_\_\_\_\_, ”

(Signed)

32. In case of any objection being made to a vote tendered either in person or by proxy, the question shall be referred to the scrutineers, and the decision of the majority of them shall be final. In case of persons acting under power of attorney, the submission of such power, as already provided, shall be sufficient authority for permission to vote.

33. The Board shall have the power temporarily to supply any vacancy until a General Meeting, if they shall think it indispensable to do so.

#### General management.

34. The Board shall meet monthly or oftener, as occasion may require, on such day and at such hour as they may appoint, with power to adjourn from time to time—six to be a quorum.

35. The President, or in his absence one of the Vice-presidents, shall preside at all meetings; and in case of their absence the majority of those present shall appoint their own Chairman.

36. Four of the Directors appointed to the Board by election of the subscribers and Governors shall retire annually, the retiring members shall be those who have attended the fewest meetings during the year, and where a doubt shall exist as to the Directors to retire, the Board shall determine the matter by lot; but such retiring members shall be eligible for re-election.

37. The Honorary Consulting and Honorary Medical Officers shall have the privilege of attending and giving their opinion and advice at all the meetings of the Board and House Committee, and from their number one Honorary Physician and one Honorary Surgeon shall be by themselves selected annually, who shall be entitled to vote and shall possess all the privileges of ordinary members of the Board.

38. The Board of Directors shall have the general management of the affairs of the Institution subject to the control of the general meeting of the Governors and subscribers, with full power to appoint, remove, or dismiss all officers of the Institution, and the same officers to dismiss and remove, and other or others to appoint; to examine and discharge tradesman's bills after approval by the House Committee; and after due notice to frame, alter, or amend any Rules and Regulations, such new rules, alteration, or amendment not being inconsistent with any of these By-laws; they shall attend to the state of repair of the premises, carry into effect the directions of general meetings, and attend generally to all matters affecting the welfare and interests of the Institution.

39. The Board may also appoint such other committees as may, from time to time, be desirable to carry out the objects of the Institution.

40. Notice of all the Board meetings shall be sent to each of the Directors, which notice shall state any business of a special nature to be brought forward.

41. A special meeting shall be summoned at the desire of the President, or, in his absence, one of the Vice-Presidents, or of any five Directors;—the earliest possible notice thereof, stating the cause of the meeting, shall be sent to each Director.

42. Every question may be decided by the majority present—the Chairman having also a casting vote when the numbers are equal.

43. No person, except the Secretary, Chairman, or other authorised person shall enter anything in the minute books, and all interlineations or erasures in the fair minute book shall be noticed by the Chairman, who shall insert his initials in the margin opposite such interlineation or erasure when he signs the book.

44. No Director shall be at liberty to perform any service for, or to enter into any contract with the Institution, or to supply any article for its use, for which he may receive pecuniary compensation.

45. No Director shall act as Chairman, or vote at any Board or committee meeting while or when any question relating to his own conduct or individual interest shall be discussed or decided.

46. The Board under the advice of the Honorary Medical Staff shall regulate the diet of the patients.

47. The following officers—Secretary, General Superintendent, Honorary Medical Officers, Resident Medical Officers, District Medical Officers, Lady Superintendent of Nurses and

Matron shall be appointed by the Board only, and their duties shall be clearly defined by the Rules and Regulations. The other paid officers and servants may be appointed by the House Committee.

49. There shall be a general inspection of the Institution by the Board on the Board days in the months of January, April, July, and October; and a report of the different inspections shall be entered in a book provided and kept for that purpose.

49. Any Director shall have access to the books of the Institution during business hours.

50. At all meetings of the Board and committees, every Governor in speaking shall address the Chairman.

51. The Chairman shall, at all meetings of the Board or committees, decide upon every question of order, but if two Directors offer to speak at the same time, the Chairman shall direct which of them shall proceed, and any Governor speaking to order shall be heard first.

52. The minutes of the House Committee shall be read at each Board Meeting. The Minutes of any sub-committee shall be read at the request of any three Directors then present.

53. For the proper discharge of business and the general management of the Hospital the Board shall from time to time make Rules and Regulations not inconsistent with the provisions of the Sydney Hospital Act.

House Committee.

54. The House Committee shall consist of not more than seven members (exclusive of the Honorary Officers), to be elected by ballot by the Board as already provided, and shall meet on every Monday at noon, or at any other day or time in each week that may be appointed for that purpose with power to adjourn from time to time—five to form a quorum.

55. The House Committee shall, immediately after their appointment, elect their own Chairman; and in his absence any other member of the committee may be appointed Chairman for the then present meeting.

56. The House Committee shall regulate the several departments of the Institution, and conduct and manage its affairs in every respect, subject only to the control of the Board.

57. The House Committee shall have power to appoint sub-committees for special purposes, a report founded on whose proceedings, and signed by the Chairman, shall if deemed necessary, be made and entered on the minutes of the House Committee.

58. The House Committee shall attend to any complaint that may be presented; and regulate the rations, wages, and duties of servants; see that the various duties are performed by all the paid officers and servants of the Institution, and receive and determine any application for admission to the Institution as pupils, under the regulations hereinafter prescribed.

59. The House Committee may, upon sufficient cause, dismiss any salaried officers and servants not appointed by the Board, and may suspend any salaried officer until the decision of the Board can be obtained, with the power, in the meantime, of appointing a person properly qualified to officiate in the room of the person so suspended.

60. The resolutions of the House Committee relative to the ordinary business of the Institution shall be carried into execution without waiting for the confirmation of a subsequent House Committee.

61. The ordinary business of the meetings of the House Committee, according to the Chairman's business paper, shall be completed before any new matter be gone into.

62. The House Committee shall, after due examination of the accounts, recommend them to the Board for payment; but, in cases of emergency, may direct the immediate payment of any account, such payment to be reported at the ensuing meeting of the Board.

63. The House Committee shall make all contracts for supplying the Institution with provisions and other stores; and all contracts shall be made after public advertisement, subject to the approval of the Board of Directors.

64. Security shall be required for the performance of all such contracts.

65. The House Committee shall, or may order all repairs or alterations that may be considered necessary, which, if of an important nature, shall be carried out through the Building Committee.

66. No buildings, repairs, or alterations, which shall exceed in expense one hundred pounds, shall be carried into execution without the approbation of the Board, with the exception of such matters as shall be referred to the Permanent Structure Committee.

Permanent Structure Committee.

67. Until the hospital building now in course of erection is completed, a committee, consisting of the ex officio members and seven Directors, to be elected by ballot at the first meeting after the Annual General Meeting shall constitute the Permanent Structure Committee, three to form a quorum. The committee shall, at its first meeting elect a Chairman for the ensuing year.

68. The committee shall take all the necessary steps connected

with the erection of the new hospital building, but shall submit through their Chairman, a progress report at each monthly meeting of the Board.

Building and Repair Committee.

69. The Building Committee to be appointed by the Board, shall consist of five members, three of whom shall form a quorum. They shall at their first meeting elect a Chairman for the ensuing year.

70. They shall, at least twice a year, attended by the Architect, examine the Institution, and the out-buildings, gardens, and every part of the premises, and present to the House Committee a written report of the state and condition thereof, accompanied by any recommendations for repairs or improvements which they may deem advisable.

71. They shall have the superintendence and control of all buildings, works, machinery, and apparatus, and shall have power to order repairs and to give such instructions as may be necessary to prevent loss or damage, or by the delay of which, until the next meeting of the House Committee, any inconvenience might be caused.

72. In cases of emergency, the Chairman, in conjunction with the Architect, or the Chairman alone, shall have the power to give such directions as shall be deemed requisite.

73. They shall also, once in every year at least, inspect the stock of old materials, and cause such articles as they shall consider no longer required for service to be sold, and the proceeds thereof paid to the Treasurer.

Finance Committee.

74. The Finance Committee, to be appointed by the Board of Directors, shall consist of five members, three of whom shall form a quorum. They shall at their first meeting elect a Chairman for the ensuing year.

75. The committee shall examine all accounts and report them for payment once a month, or oftener, such accounts having been first passed by the Secretary, as agreeable to the terms of the contracts. Should any difficulty arise in passing an account, it shall be referred to the determination of the next meeting of the House Committee.

76. The committee shall examine the receipts and vouchers and compare them with the payments made by the Treasurer.

77. The committee shall quarterly examine the accounts of the Treasurer and of the several Bankers, in order to ascertain and certify whether the income and receipts of the Institution have been duly paid in; and shall annually report to the Board the amounts received and sums due to the Institution, under their respective heads.

Honorary Treasurer.

78. There shall be an Honorary Treasurer, to be elected at the Annual or a Special General Meeting, who shall call for payment of all monies due by annual subscribers and others, and shall keep regular accounts thereof, wherein the names of subscribers, donors, and testators shall be entered, as well as the sums of money respectively given by them, and the purposes for which the same shall have been subscribed, given, or bequeathed.

79. He shall, immediately on receipt thereof, place the funds in such one or more of the Sydney Banks as the Board may from time to time appoint, in the name of the Sydney Hospital, and all payments ordered by the Board or House Committee shall be made only by cheque or cheques, signed by the Treasurer, President, or one of the Vice-Presidents, and countersigned by the Secretary.

80. He shall not pay accounts or salaries other than those provided for in By-law 79, until the same shall have been submitted to the Board for inspection, and shall have been approved and signed by the Chairman, and he shall take legal vouchers for all monies paid by him.

81. He shall make up a quarterly statement of his accounts, to be laid before the Board at their monthly meetings in May, August, and November; and he shall also make up yearly a statement of his accounts, as on the thirty-first day of December, charging himself with the whole of the money he has received during the year, taking credit for all he has paid away, and showing the exact balance; which account shall be examined, compared with the vouchers, and certified by the auditors appointed by the Board for that purpose, and laid before the Annual General Meeting, together with an approximate balance sheet showing the assets and liabilities of the hospital as on 31st December.

82. The Honorary Treasurer upon his acceptance of office shall ascertain that the respective amounts standing in the various public funds and securities, as entered in the books, are correct, and he shall report to the House Committee the correctness thereof as soon after his appointment as possible.

Secretary.

83. The Secretary shall attend all meetings of the Board, House, and other Committees, read and take minutes of all proceedings thereat, and carry into effect all orders of the Board and sub-committees, and be subject to the Rules and Regulations made by the Board.

General Superintendent.

84. The duties of this officer shall be determined by the Board, and be defined by the Rules and Regulations.

#### Honorary Consulting Medical Officers.

85. There shall be as many Honorary Consulting Physicians and Honorary Consulting Surgeons as may be from time to time appointed by the Board, who shall give their advice and assistance, when required by the Honorary Medical Officers.

86. They shall be selected from those who have served the Institution as Honorary Medical Officers for a period of eight years.

87. In the event of any Honorary Consulting Medical Officer being re-elected as an Honorary Medical Officer, he shall, *ipso facto*, cease to be an Honorary Consulting Medical Officer.

#### Honorary Medical Officers.

88. There shall be four Honorary Physicians, who shall be duly qualified by the possession of a degree of medicine from a British, Irish, or Australian University.

89. There shall be four Honorary Surgeons who shall possess a degree in surgery or a surgeon's diploma from some University or College of Surgeons in the United Kingdom of Great Britain, Ireland, or Australia.

90. There shall be a senior and a junior Honorary Ophthalmic Medical Officer, who shall possess qualification similar to those required for the Honorary Physician or Surgeons, and who shall attend on the patients affected with diseases of the eye, ear, and throat, under such Rules and Regulations as shall hereafter be made by the Board.

91. The Board may, from time to time, create such other honorary medical and surgical, ophthalmic or other special offices, as the state of the requirements of the hospital may seem to demand.

92. No one shall be eligible as an Honorary Physician or Surgeon, or Ophthalmic Medical Officer, unless he shall produce a certificate from the New South Wales Medical Board.

93. The Honorary Physicians and Honorary Surgeons shall be appointed for a period of four years, but one Physician and one Surgeon shall retire every year, the Physician and Surgeon, retiring being those who have served four years, or, in case of death, resignation, or removal, the person or persons who may have been chosen to succeed them. The Honorary Ophthalmic Medical Officers shall retire alternately each second year, but shall be eligible for re-election.

94. The beds in the medical wards of the hospital, shall be divided equally among Honorary Physicians and those of the surgical wards among the Honorary Surgeons, and all vacancies therein shall be re-filled in the order of their occurrence. Until the new hospital is completed the ophthalmic patients shall be arranged by the Board, under the advice of the Honorary Medical Staff, in such manner as may be best adapted to the circumstances of the hospital.

95. Clinical lectures shall be delivered by such of the Honorary Medical Staff, as may be appointed by the Board, at such hours under such rules as may hereafter be determined.

96. Lectures and instruction shall be given to the nursing staff by the Honorary Medical Officers and the Resident Medical Staff, in accordance with the rules therefore provided by the Board.

97. The Honorary Medical Officers shall annually deliver to the Board a medical report made up to the 31st December of each year, which report shall afterwards be laid before the general meeting.

#### Resident Medical Officers.

98. There shall be as many resident medical officers as may be appointed by the Board and for such periods, with such duties and under such conditions as shall be determined by the Rules and Regulations.

#### Medical Students

99. Subject to the provisions of the Sydney Hospital Act and such Rules and Regulations as shall be made by the Board of Directors, medical students shall be admitted to the various departments of the Hospital.

#### Nursing and Training Staff.

100. There shall be a nursing and training staff of head nurses and nurses, which shall be under the control of a Lady Superintendent and Matron, who shall possess certificates of having been duly trained and qualified for her position.

#### General Meetings.

101. The Annual General Meeting of the Governors and Subscribers of the Institution shall be held on a day appointed by the Board, in the month of January or February, when the business shall be transacted in the following order:—

1. The annual report of the Board relative to the operations and general state of the Institution, and the annual report of the Honorary Medical Staff, to be read.
2. An abstract statement of the income and expenditure, for the past year, duly audited, to be received.
3. Communications from the Board or from the officers to be received.
4. Election of office-bearers.

5. Election of Governors to fill vacancies in the Board.

6. Business of which notice has been given.

102. All General Meetings shall be called by advertisement, and none shall be deemed duly constituted unless fifteen Governors be present.

103. In case a sufficient number of Governors to constitute a meeting should not have assembled at thirty minutes after the time appointed for a General Meeting, it shall lapse, but another meeting for the same purpose shall be called within one month, in which case the existing Directors and officers shall remain in office until their successors be appointed.

104. A Special General Meeting shall be called whenever ordered by the Board, or whenever a requisition to that effect, signed by not less than fifteen Governors, stating the propositions to be submitted, shall be presented to the Secretary. The cause of such meeting shall be specified, and not less than seven days' notice given—if practicable.

105. The report, as adopted, shall be printed for circulation, with an alphabetical list of the Governors and subscribers.

#### Auditors.

106. At the Board Meeting to be held in December of each year three Governors shall be appointed auditors, two of whom must sign the balance sheet.

107. At their first meeting for examination of the yearly accounts, the Treasurer shall lay before them a written statement of his receipts and payments for the year preceding, together with an account of all funds and monies belonging to the Institution, and furnish from time to time such vouchers and information relative thereto as may be required by them.

108. They shall, with the assistance of the Treasurer, prepare and lay before the Board, in the month of January or February in every year, a statement of the receipts and expenditure up to the last day of December immediately preceding.

#### House Visitors.

109. The House Visitors, to be appointed by and from the Board, shall in rotation visit the Institution with full power to examine into every part of it, and of the Medical School.

110. They shall keep a register of such occurrences as may be deemed of sufficient importance; and, on the next succeeding meeting of the House Committee, shall make a written report of the same, with such suggestions as they may judge expedient.

#### Funds of the Institution.

111. All legacies, donations, or subscriptions of £50 and upwards, unless specially directed, shall be invested in Public Stocks, Government, City, or Real Securities, in the names of the President, Vice-Presidents, and Honorary Treasurer.

112. No part of the property of the Institution which now is, or any time hereafter may be, so invested, shall be sold out or disposed of except upon an order of the Board (specially summoned), and signed by six Directors at least present at such Board.

113. The expenses shall be defrayed as much as possible from the annual subscriptions, dividends, and interest of the funded and other property, and income of the Institution.

#### Samaritan Fund.

114. The unclaimed monies of all deceased patients shall, at the discretion of the Board, be paid into the Savings' Bank, or otherwise invested to form a fund to be called the Samaritan Fund.

115. This Fund shall be kept entirely distinct from the General Funds of the Institution.

116. The Treasurer of the Institution for the time being shall be the Treasurer of this Fund.

117. The sole object of this charity shall be the relief of patients on leaving the Institution, recommended by or through any one of the Honorary Medical Officers, House Visitors, Honorary Treasurer, or Secretary.

118. Such recommendations to be presented to the House Committee, with whom shall rest the power of determining the merit of the petitioners, and of distributing the funds of the charity.

119. The funds of the charity shall be devoted to the following purposes:—

- For forwarding poor patients to their homes.
- For the relief of poor patients by giving them the means of subsistence for a few days after their discharge.
- For the temporary assistance of poor convalescent patients requiring further medical aid as out-patients, on leaving the Institution.

120. In extreme or urgent cases the Honorary Treasurer or the Secretary may authorise assistance from this Fund.

I certify that this is a true copy of the By-laws as passed by the Board of Directors of the Sydney Hospital.

ARTHUR RENWICK,

9th February, 1882.

President.

1882.

NEW SOUTH WALES.

VACCINATION.

(REPORT FOR 1881.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Principal Under-Secretary.

Sir,

Sydney, 18 June, 1882.

I have the honor to forward herewith the Annual Vaccination Return for the year 1881.

I have, &c.,

H. G. ALLEYNE,

Medical Adviser.

TABLE A.

RETURN showing the number of Persons Vaccinated by the Government Vaccinators in Sydney and Suburbs during the year 1881.

Medical Adviser.

1882.

NEW SOUTH WALES.

NAUTICAL SCHOOL SHIP "VERNON."

(REPORT FOR THE YEAR ENDED 30 JUNE, 1882.)

Presented to Parliament by Command.

The Superintendent, N.S.S. "Vernon," to The Under-Secretary of Public Instruction.

Sir, N.S.S. "Vernon," 12 July, 1882.

I have the honor to submit the usual Annual Report of the Institution under my charge for the year ended 30th June, 1882.

2. The health of the boys continues in the same satisfactory condition as mentioned in my former reports, although for the first time in seven years I have to record one death, that of a poor fellow who had for some time been suffering from heart disease, a complaint to which he finally succumbed. With this exception no sickness of any importance has occurred, amongst an average daily ship's company of 203 officers and boys.

Altogether twelve cases have been under treatment, seven from sickness, five from wounds, and these are made up as follows:—Heart disease, two; shingles, two; scabies, one; fever, one; retention of urine, one; paralysis of bladder, one; contusions, three; cuts, two. At the present date we are quite free from sickness. Taking into consideration the class from which the boys are recruited, and the condition in which they arrive—the majority suffering from the effects of filth, exposure, insufficient food, &c.,—the sanitary condition of the Institution seems to be capable of but little improvement.

3. The expenditure per head has been somewhat higher [than was the case last year, the cost then being £23 13s. 10d., while for the last twelve months it was £24 8s., an increase of 14s. 2d. This is to be accounted for by the increase of the price of provisions and the expenditure incurred in almost entirely re-rigging the ship, which entailed a heavy expense for new masts, yards, ropes, &c., not likely to occur again for many years. Clothing has cost 7s. 3d. less each boy, and the amount paid in salaries shows the substantial reduction of £2 7s. per head upon last year's account, and is less than half the cost of many preceding years, while an effective supervision is maintained over the boys, they being constantly both night and day under the care of a responsible officer. By reference to former annual reports it will be seen that with a single exception, alluded to above, the gross cost is considerably less than in any preceding year since the establishment of the "Vernon."

4. A steady increase seems to have set in of late years in the numbers entering and leaving, and during the twelve months just ended, more boys have passed through the ship than in any former year. Admissions amount to 118, and discharges to 95; the total number of boys who have been on board during the year being 283. Of the 118 admissions, 101 have been new committals, the remainder having been returned under the conditions specified in table 1. The following list of Police Courts shows the committing Benches in various parts of the Colony, and the number sent from each:—

Sydney Courts.		Number of boys sent from each Police Court.	
Water Police .....	37		Central Police..... 20
Suburban Courts.			
Redfern .....	5	Newtown..... 8	
Country Courts.			
Albury .....	1	Grafton .....	1
Armidale .....	1	Maitland .....	3
Burrowa .....	1	Murrurundi .....	4
Campbelltown .....	1	Mudgee .....	1
Cobar .....	1	Mossgiel .....	1
Cowra .....	1	Newcastle .....	4
Dubbo .....	2	Paterson .....	1
Goulburn .....	2	Quirindi.....	1
Gosford .....	2	Walgett .....	1
Gunnedah.....	1	Wilcannia.....	1

This gives thirty-one from the country, and seventy-one from Sydney and its suburbs.

Particulars as to  
percentage.

5. I have compiled a return showing particulars with regard to the parents of the 101 children who have been sent here during the year. This is made up from the *précis* of evidence taken in each case when the boys are tried. It is as follows:—

Mother a prostitute; child illegitimate.....	1	Father dead; mother a prostitute .....	5
Father deserted; mother living with Aboriginal .....	1	Mother dead; father unable to control .....	12
Father dead; mother married a Chinaman .....	1	Father dead; mother a drunkard .....	5
Father dead; mother in gaol .....	1	Mother in gaol; father unable to control .....	3

People when able  
to contribute  
made to do so.

Machinery for  
compelling  
people to pay  
too cumbersome.

Interest still  
taken in the  
"Vernon" by  
"old boys,"  
many of whom  
visit and write  
to us.

Boys formerly  
inmates now  
holding good  
positions.

Officers pleased  
to find they are  
regarded in a  
friendly light by  
former inmates.

These people are, when able, made to contribute towards the support of their neglected children; but the greatest difficulty is experienced in getting anything from them, and the time lost in taking legal proceedings to compel them to pay is very great, and is hardly repaid by the results gained. Last year I obtained £150; this year the largest contribution yet made was paid into the Treasury, £218. This is a decided improvement, but still does not nearly amount to sufficient.

6. During the year we have had many visits from "old boys"—some of whom are still serving their apprenticeship, while others have long completed their time. One had left the vessel as long back as 1872; another, a frequent visitor to the ship, was apprenticed in 1873, served his time faithfully, and has for the last few years held a responsible and lucrative position in the Government service; another one, sent here in 1872, and apprenticed in the usual course for two years, has for sometime had a shop in Sydney, where he lives with his wife and family. In addition to visits to the ship, a large correspondence has been kept up with boys who have left the Institution, and it is gratifying to the officers of the vessel to find that so kindly a feeling is entertained towards them by lads who were at one time under their care. A few from the many letters recently received are here given, just as the boys wrote them, but with names omitted:—

Dear Sir,

It is now 12 months since I wrote last, and I think I am improving a little. I have got a very good master and Mrs.; they are both very kind to me. I like bush life better than if I were in the town. I am very thankful to you Captain for getting me such a good master. 2 years of my time is up, and I have twelve more months to serve. We are very busy out mustering in the bush just now. We have had a very severe winter and summer, and most of the squatters have lost a good deal of cattle. There has been no grass for them to eat. I heard that some of the officers had left. I suppose Mr. Gorman is still on board. I saw some of the Vernon boy in Dungog and Maitland when I was down with Mr. C—, and now, dear sir, I will say good night, wishing you and Mrs. Neitenstein are quite well, and all the boys.

I remain yours truly,

E.N.R.

Dear friend,

I now take the pleasure of writing you these few lines, hoping to find you in good health. I am getting to like the place where I am. Mr. W— is very kind to me. It is very nice place where I am. Mr. — is never grumbling with me, I always do what I am told, and I do it with a will. I have had plenty of work to do lately. This is all I have to say at present.

I remain your affectionate friend,

G.I.H.

Dear Sir,

I take the trouble of writing you these few lines hoping to find you all well as it leaves me at present. Sir, give my respects to Misses Neitenstein, Mr. Mason, Mr. Gorman, and also to the bostswain. I am kindly treated; I like the place very well and they are very kind to me all round the neighbourhood; I am never pleased to hard work, and I hope my dear brother is behaved himself during the time he has been there, and it is hoped so to further orders. Sir, tell my brother to write to his parents if they have sent their address. Dear Sir, this is all I have to say at present.

I remain yours, truly,

J.L.

My dear Sir,

As it is your wish that I should write to you, I now have the pleasure of doing so. I like this place very much and they are all very kind to me; I am learning to ride and to milk; I also learn my lessons every day. I hope you are quite well and also all the officers on board, and I thank you very much for all your kindness to me while on the ship. When I improve in my writing I hope to be able to write to you often and let you know how I am getting on. Now I must conclude, and remain, dear Sir,

Yours respectfully,

A.A.

Dear Sir,

I received your letter on last Friday; I am glad you are all well; I am getting on very well myself at present, I have been six this last week and was not able to do my work, but I am better now; it is very hot here now. I thank you for giving my letter to P— which I asked you to do for me; my master and misses was glad to see that you answered my letter. Will you please give this letter to P—, also to. I do believe there was some one came for me but I was gone away, it was too late to see me. I suppose you have got the same quantity of boys on board that you had when I was on. I suppose you know that M— has gone back to Sydney this two months ago. I suppose you have plenty of rain in Sydney; here we have very little. So now I conclude with my kindest love to you all.

I remain, your truly friend,

W.I.M.

My dear Mr. Neitenstein,

And I hope you are well as it leaves me at present, and I like the place very well, and Mr. M— let me go to the races and to the show and L— is living about 3 miles from me. We are planting our winter potatoes now, and Mrs. M— is very kind to me, and I am learning to milk. They keep a few cows and it is a nice quiet place, and their is no larrikins about their, and I go to church now and again. This is all I got to say at present.

J.E.

Most honoured Sir,

Amboyna Island.

I write these few lines hoping to find you in good health as it leaves me at present; I'm very sorry for not writing before but it can't be helped and I do so now. In six months my time will be up, but I intend to stop here a long time as I am with a kind and good master. We had a very heavy passage after we left Sydney; we have made eight or nine trips around the islands since. We were one month and a half from Sydney to Singapore, and she is a fine barque. I am on board one of the Captain's schooners now keeping a watch and learning navigation, which I will soon know. I hope you oblige me a little, sir, as you often did, by writing a few lines to my poor mother, as I forget the address, to let her know how I am getting on and will be home soon. Remember me also to Mr. Mason, Mr. Gorman, and the boatswain, and I thank them very much for their kindness to me while I was on board. If you would like to write a few lines back I will give you my address with the greatest of pleasure. I have no more to say at present.

I remain, yours truly,

J. M'G.

Dear

Dear Captain,

I am very sorry I have not written before as I haven't been able to write well. I think no boy could be sent to a better place. I have a good master and mistress, not like some master good and Mrs. bad. I have plenty of everything. I asked for anything I get it. I hope you are quite well and Mrs. Neitenstein. Give my kind respects to Mr. Gorman. I have learnt to plough, milk, ride, swim, preserve fruit, cure bacon, make mushroom ketchup. I can garden pretty well. I now have £15 in the bank, which I think no boy in B— has. I was very sorry to see that the main top didn't win the race. We were coming on board only master couldn't get away, so we might come next year. I am in the accidents sometimes like on ship. When I first came up here I could not agree with the townspeople, they used to complain about something or other. It is beautiful to see the snow in winter, it is very cold and frosty of a morning. I like my place very much, they are very kind. I have a good place and I like them. I thank you very much for sending me to such a place. We live in the prettiest place in the town, and ask Mr. Gorman to write and tell us how there getting on.

O.F.Y.

Captain Neitenstein,

I now take the pleasure of writing to you these few lines to find you in good health as it leaves me at present. I am getting on all right, and K— and S— is getting on all right too. I like my master and misses very well. I hope you are getting on all right, and Mr. Maison, and Mr. Gorman, and all the boys. K— and S— is learning to ride. K— is learning to milk the cows. That's all I have got to say at present.

Remain your affection friend,  
W.H.

My dear friend, Captain Neitenstein,

I now take the pleasure of writing these few lines hoping to find you in good health as it leaves me and S— at present. We are getting on all right, and I hope you are as well as us. I like the bush very well. Me and Smith is learning to ride. Mrs. P— and Mr. P— are very kind to us. I hope Mr. Masson and Mr. Gorman be getting on all right. We had nice rain up here; it is very hot up here. W— H— is all right. That is all I have got to say at present.

I remain your affection friend,  
W.K.

Dear Sir,

It is a long time since I have wrote to you, so I am now going to write a few lines to tell you how I am getting on with Mr. —. I am growing tall now, and I will soon be able to stick a buck-jumper now. The other day when I was out at one of the selections they was trying to put some horses in the yard, and every minute the horses went near the gate of the yard they would break back, for there was not enough hands to keep them up. I was down at the well, and a yellow fellow lent me his horse to help them, and I got on, and off I went, and there was a dead tree laying down on the ground, and I tried to slew him off the tree, but I could not for I was going too quick, and the horse jumped right over the tree with me on his back, and Mr. — was standing at the well looking at me, and he said I never moved a inch off my saddle so that is a good sign I will soon be able to stick a buckjumper. I am quite well at present, and so are my mates. This is all I have got to say at present, so I remain,

Yours truly,  
A.S.

My dear Sir,

I take the pleasure of writing you these few lines, hoping to find you in good health. I am in good health myself. I would like to know how all the boys are getting on. I hope they are all in good health. I have learned a lot of things since I have been away from the "Vernon." I would be very glad to know all the boys are getting on. I hope all the Officers are well. I hope none of the boys are sick. I have never be sick myself since I have been here, and I hope I never do be sick whilest I am there. I have never forgot my prayers that I was learnt there, and I always do say them every night when I am going to bed. I am very glad that I was learnt to read and write. I can read and write very well. When I went to the "Vernon" I couldnt neather write nor read, and I am glad that I went there. This is all I have to say at present. I would like to know how all my friends are getting. I can ride very well since I came here. This is all I have to write, my dear Sir,

J.M.

My dear Sir,

I hope you are in good health, as it leaves me at present. I would like to know how you and all the officers are getting on. My time will be done in six months, and I hope I shall see you all. I like my master and Miss well, and the place, well it is a wild bush where we are liveng. I am riding horses every day very near, and I go to Dungog one day every week. I hear from my father and mother now and again, and there is two bushrangers brake out up near G—. They robbed one man of forty pounds. This is all I have got to say at present.

I remain,  
Your affectionate Friend,

J.M.

Captain Neitenstein.

Dear Sir,

With thanks I acknowledge the receipt of your letter. I feel very much obliged to you for writing to me. I have not much time for writing myself, as there is always plenty of work on a farm. I am in good health at present; this part of the country agrees with me grand, and with plenty to eat and a good employer I think I shall be able to run my time very comfortable. I can truly say I am truly sorry for all I have done in the past, and for all the sorrow and trouble I caused others, but as the old saying puts it "never to late to mend," I will try in the future never again to get myself into trouble and to grieve those I love best. I am sorry to hear you have increased in numbers and that boys will be so foolish. Please remember me kindly to all on board, and with best wishes to you and yours,

I now remain,  
Yours respectfully,  
H.A.E.K.

P.—.

Dear Sir,

I now write you these few lines, hoping that you are quite well, as I am myself at present. I was happy to see you look all right when I saw you in Sydney last fortnight. I am getting on nicely up here. It is very cold up here, and I suppose you feel the cold down there worse than it is up here. I was fifteen last Sunday week. I might come down some day. I have no more to say at present. I now must conclude with my best respects to the Captain and all on board, and except the same Mr. Mason from your sincere friend,

W.J.

7. When the weather has proved favourable, the boys have been landed in Balmain on Sundays and marched to their respective places of worship. On wet days the Church of England service has been conducted on board by myself. In addition to this, prayers are read night and morning, and a number of ladies and gentlemen conduct religious instruction on board at frequent intervals—127 visits were made to the ship during the twelve months. The Rev. Mr. Tress, who for some years has ministered to the Protestant inmates, this week has paid us his last visit, having left the neighbourhood, much to the regret of all on board. The interest he has taken in the Institution and his kindness to the boys have at all times been very great, and have much conduced to the well being and good order of the Institution. The Reverend Messrs. Muraire and Tressallet continue to visit us on behalf of the Roman Catholic children, and have always been ready to afford us assistance and advice, for which I tender my best thanks.

Religious instruction.

8. A large schoolroom has been constructed since my last report in the lower hold of the vessel, and is a great improvement in every respect upon the main deck saloon formerly used, which was not nearly large enough. Our present schoolroom is 40 feet long, 38 feet wide, 10 feet high, and is fitted with the usual school appliances. Light and air are admitted from two hatchways at each end, and also from six large ports or windows cut in the side a few feet above the water. The school, as heretofore, is conducted upon the half-time principle, and the system pursued the same as in the Public Schools ashore. Most of our recruits are unable to read or write when coming on board (*vide* Table 7), and in the short space of time the

School.  
New schoolroom.

Majority of boys only remain twelve months on board, and are then provided with a situation.  
Report of Inspector.

the majority remain—twelve months—very much cannot be done; but the results obtained will be best seen from the report hereunder of Mr. District Inspector M'Creddie, who inspected the school upon the 1st and 2nd June last:—

*First Class.*

Reading, fair (meanings, &c., tolerable).	Attention, fair.
Writing, upper, very fair; lower, tolerable.	Mental effort, fair.
Dictation, moderate (spelling, defective).	Mental culture, tolerable.
Arithmetic, tolerable.	General proficiency, tolerable to fair.
Singing, fair.	

*Second Class.*

Reading, tolerable.	Singing, fair.
Writing, fair.	Attention, very fair.
Dictation, tolerable to fair.	Mental effort, fair.
Arithmetic, tolerable.	Mental culture, tolerable.
Grammar, not taught.	General proficiency, tolerable to fair.

*Third Class.*

Reading, tolerable (spelling, meanings, &c., moderate to tolerable).	Attention, very fair.
Writing, fair.	Mental effort, fair.
Dictation, tolerable.	Mental culture, tolerable.
Arithmetic, tolerable.	General proficiency, tolerable to fair.
Singing, fair.	Organization, very much improved by the new school-room, which is commodious and suitable.

Drilling regularly prosecuted.  
Inspection by Superintendent of drill.

9. Besides the studies pursued in school, which every boy attends three hours daily, the usual drills have been regularly engaged in, with much advantage to the boys both physically and morally. Manning yards, crossing yards, boat-drill, sailing and pulling, cutlass and small-arm exercises, drilling at fire quarters, have been regularly prosecuted, and the light infantry exercise has been systematically taught on the parade ground facing the vessel on Biloela. On the 21st ultimo, Captain Strong, Superintendent of drill, inspected the boys at battalion drill, and complimented them upon the steady and effective way in which the various evolutions were carried out.

Usual ship's work.

10. In addition to the above, the ordinary work in connection with keeping a large ship in order has had to be performed, and has involved a considerable amount of industrial training, as will be understood upon perusal of the following table, giving particulars of the amount of labour done by the officers and boys during the year just ended, with its estimated value:—

Estimated monetary value of boys and officers work.

	£	s.	d.
Jumpers made, 206, at 2s. ... ..	20	12	0
Trousers „ 503, at 2s. ... ..	50	6	0

<b>Total ... ..</b>	<b>£1,363</b>	<b>9</b>	<b>0</b>

Exceptionally heavy nature of the ship's work.

In connection with the above, I would desire to draw attention to the unusually heavy nature of the seamanship work performed by us. The ship was stripped to her three lower masts; the old mainmast found to be rotten was taken out and a new one stepped; new foreyard was made out of the old mainmast, while the condemned foreyard afforded material for the construction of a spar to replace an unsuitable topsail-yard, which in its turn was made into a topgallant-yard, and so on. The lower and topmast rigging has been turned in and served afresh; new lifts, foot ropes, and braces have been fitted, and the work aloft generally overhauled. This has all been done by ourselves without any outside help (excepting a man for a short time to assist the carpenter), and nautical men will appreciate the heavy labour involved in carrying out the above, which was a work of no ordinary occurrence or description.

All refitting done by ourselves.

Boys kept fully employed.  
Library.

11. It will be seen that the boys are kept fully occupied during working hours, but the necessity for recreation has not been overlooked. The former schoolroom has been converted into a library and reading-room, where the lads are permitted to read any book they please from the varied description in stock, now numbering 200. The stock is shortly to be increased to 240 volumes, by the addition of some *Graphics*, *Illustrated London News*, &c., now being bound in Darlinghurst Gaol. Chess, draughts, dominoes, &c., are also played here; while cricket, football, rounders, and other games form the outdoor amusements, which are engaged in on Cockatoo Island, and occasionally at Redbank, Lane Cove. Boating excursions usually take place at intervals to some of the numerous quiet spots in the harbour, where the boys can swim and land for a game; and fortnightly, during the season, net fishing has been successfully carried out on the shores of Middle Harbour—sufficient fish being caught to feed all hands engaged, often nearly 100. The various regattas have also been attended; the firing parties being furnished from among the boys. A new departure from

from the usual series of amusements, partaking of an educational as well as of a recreative nature, has recently been introduced with gratifying success. One end of the new schoolroom has been fitted up with a platform screen, laboratory, &c., and here has been given every Wednesday since the commencement of the long evenings a series of lantern readings upon such subjects as "London," "Scotland," "Natural Phenomena," "Ireland," "The Tower of London," "Westminster Abbey," "Ship-building," "Practical Mining," &c. The eighteenth lecture of the series will be given to-night upon the British Museum. These lectures are illustrated by collections of photographic views generously lent us by the Technical College Committee of the School of Arts and Mr. Hurwood, of Sydney, and are exhibited by means of the ship's oxy-hydrogen by-unial dissolving view apparatus lately purchased in London with the prizes won at several of the regattas held in Sydney, supplemented from the vote for the ship by the permission of the Minister of Public Instruction. All these amusements form very powerful incentives to good conduct, as no "bad boys" are allowed to participate.

Winter course of lectures.

12. During the year seventy-five have been apprenticed, of which number twenty have gone as sailors on the "Wolverene." Captain Symons gives all these lads a good character with one exception, who is classed "indifferent, but improving." Ten more are now being prepared for the same service and will leave this ship when they have been twelve months on board.

Number apprenticed, 75.

13. During the period that the "Vernon" has been established as an industrial school, since the 6th May, 1867, 1,130 boys have been taken from the streets, &c., and sent here. Of these 942 have been apprenticed or discharged to relatives, leaving 188 now on board. From masters of boys who are still serving their apprenticeship I have lately received a large number of reports of a most favourable character in reply to my inquiries as to the conduct of their apprentices during the year. The results of these reports are as follows:—177 good, four indifferent, six absconded, eleven boys returned with indentures cancelled, and of twenty-three no report has yet been received.

Conduct of the boys sent to H.M.S. "Wolverene."

Resumé. 1,130 boys on board during the fifteen years.

Results of circulars recently sent out.

Those marked "no report" have been referred to the Inspector-General of Police, and I have no doubt that the number of "goods" will be increased as the result of his inquiry, as masters often allow replies to my circulars to stand over for a time and forget all about them. Last year out of twenty-three "no reports" referred to the police twenty were found to be doing well to the satisfaction of their employers. Of the eleven indentures cancelled two were returned for the purpose of being discharged to their fathers, and five were sent back by their master (who was about to leave his residence) and suitable situations were found for them elsewhere.

Personal supervision the most effective.

13. Perhaps the best proof of the manner in which the Institution has performed its task in reclaiming the vicious youngsters of the colony will be afforded by a perusal of the following letters lately received from masters of boys, taken from amongst a large number in my possession; and it should be borne in mind that the majority of these lads were convicted for various offences prior to being sent here, some three times, and several five or six times. Names are omitted otherwise the letters are given as written. (These letters have been copied by several of the boys now on board, and are presented as specimens of their handwriting for your inspection—some of these lads were unable to read or write when coming on board, and the remainder have improved.)

Best practical proof of success from opinions of masters of boys.

Specimens of handwriting of present inmates now submitted.

"I have paid into the Dungog Branch Saving Bank the sum of £8 9s. credit; the boy continues to behave himself well, but like all boys he requires looking after strictly and carefully. I have no hesitation in saying that the training they receive on board your ship is a good domestic one, when you take into consideration the rif-raff you have to deal with, it is something very superior to what is understood as a prison training."

"S. is getting on very well indeed; in fact one of the best boys I ever had. He is very happy and contented. I don't suppose he will leave me when his time is up. I have the pleasure to state that my apprentice is nearly a man, and he is doing very well."

"My dear Sir,—Your boy appears to have taken it for granted that he might come and spend to-day with you, but as he did not ask me until late last night I did not think it desirable without knowing if you approved, and how he was to reach the ship in case he might fall among thieves. He would now like to come to see you on Sunday next; I have no objection if you have none, and will kindly advise me how he is to reach the vessel and leave it so I may check the time he is absent.—W.W."

"He is a very good boy, and if I had more work for him would be valuable. It is not a bad feature in him wishing to pay you a visit.—Yours truly, P."

"The boy G.C. has turned out well. He is strictly honest and truthful, and he was home for a week early this month and returned here as agreed. His mother wished to see him and I agreed to his going."

"The lad S.H. is on a station with my son near W——. He is also a good boy. I will request him to write to you shortly, and he is quite well in health."

"I am happy to state that he has conducted himself well since his arrival. He is an earnest and a painstaking boy, and I believe he will be a good and useful member of Society."

"I have to state that my apprentice has given me general satisfaction since he has been under my care; I may also state that the boy will write to you in the course of a few weeks."

"I am very much pleased with him. He is a very truthful, well-spoken, and honest boy."

"I must say our apprentices have conducted themselves well. I find them willing, obedient, honest, truthful, and obliging. They are learning their work fast."

"He has behaved himself very much during the year, doing principally all he has been told; he having attended his church and sabbath school very well to my satisfaction. There has been £5 4s. deposited in his name in the Savings' Bank of New South Wales."

"I have the honor to inform you the boy J.T. has conducted himself very well since he has been in my service; he is a very nice lively boy."

"I have to inform you that the lad P—— has conducted himself very well indeed, that I have no trouble whatever to the present."

"I cannot speak too highly of the boy; he has evidently had good training; he is well-behaved and the perfection of cleanliness next godliness."

"Dear Captain Neitenstein,—I have been very busy during the last few days and quite unable to write to you. Many thanks for your last letter and its enclosure, I need scarcely say that I am heartily glad of your success with the lad. Although indirectly I had learned before you wrote that your success was acknowledged by every one. I read your note, or at least part of it, to boy F——, and he said he half wished himself back again on board the old ship; only half, however, for the choice was given to return or to stay here, and he decided to let well alone. The day after we received his articles he received a nasty kick from one of the horses. This laid him up for a few days and he is not quite well yet. I have made arrangements now for his attending school in the afternoon and I think from what little show he has already made that he will get on very well. We have ourselves given him occasional lessons, but home work, in a matter of this kind, is almost necessarily characterised by less discipline than work under a stranger. He attends school therefore regularly now from 2 to 4 p.m. He will write to you presently. He says 'he wants to improve a little in his writing and spelling.' The *Boys' Own Paper* has incited in him a little ambition to be better educated than he is. I enclose his new indentures which were signed last week. He is quite satisfied he says and so am I. I am very pleased to inform you that he has been a very good boy."

Conduct of a boy over 4 years away.

"I have great pleasure in reporting favourably. He has conducted himself with as much propriety as I could reasonably expect, and is apt at taking up the business. He attends both Church and Sunday School with punctuality and is somewhat attentive to his book after the business of the day is over."

"I

"I have to inform you that my apprentice left me when his time expired. After an absence of three or four weeks he returned to me, and is now employed by me on weekly wages."

"I beg to state that my apprentice has conducted himself very well up to the present. I have no complaints to find. With regard to his wages, I have paid the lad himself up to the 15th of last month. The boy is going to write to you himself."

"My apprentice W.J.H.M. is giving me satisfaction; his general conduct has been good and in every way meets my approval."

"My late apprentice P.P.M., whose indentures expired in October last, has been in my son's employment since, but has now returned to his friends in Sydney."

"That my apprentice G.B. has conducted himself to my satisfaction in every way."

"My apprentice is giving me every satisfaction; he is careful and painstaking."

"Of my apprentice W.V. I have the pleasure to state the lad's conduct is satisfactory."

"I have much pleasure in informing you that I am much pleased with B's. conduct since he has been with me. I find him useful about the house, he is always respectful, and I think he prefers indoor to outdoor work. I paid him in the sum of £5 4s., being wages for the year 1882 to his credit to day, which brings his balance up to £7 7s. 7d."

"The boy has suited me well up to the present day, and does anything I tell him with a good will; he grows well and is fine strong boy now. I have put three years' wages in the Savings' Bank for him, and I beg to state that I have settled with him."

"I have to state that his conduct has been very good, and he seems very anxious to do his work well. If his good conduct continues until the time his apprenticeship is ended, it will afford me much pleasure to give him a good situation or procure him one with another master, which I would have no difficulty in doing."

"My apprentice has behaved satisfactorily while he has been in my employ. I have placed £5 to his credit in the Savings' Bank."

"J.M. has conducted himself so far very well, and has considerably increased in height and weight since he has been here."

"I have much pleasure in stating that he is quite well in health and is a really good boy, and I am very much pleased with him."

"His conduct has been good and I have found him willing and obedient."

"I have much pleasure in stating my apprentice E.G. has conducted himself very well since he has been with me."

"His term expires with me on the 26th of June, 1882, and I believe it is his intention to return to Sydney, and reside with his aunt. Owing to business and other matters I have neglected to deposit anything in the Bank to his name, but at the expiration of his term I shall pay him the full interest included, viz., wages £15 18s., and interest £1 13s. 4d. Kindly let me know if this is correct. I requested the lad to write and he informed me he had done so."

Tables.

14. Eleven tables giving particulars in connection with the Institution are appended.

15. I must again tender my best thanks to Mr. Fosbery, Inspector-General of Police, for the assistance he has so kindly at all times afforded me, and my acknowledgments are also due for donations of fruit, lollies, money (regatta prizes) loans of scientific apparatus, &c., to Mrs. Hoskins (London), wife of Admiral Hoskins, R.N., the College Committee of the School of Arts, Mr. Hurwood, Messrs. Leader & Stack, Mr. H. Taylor, J.P., the Committees of the National, Balmain, and Lane Cove Regattas, and Mr. Watson, of the Bald Rock Ferry, Balmain.

16. In conclusion, I must express my acknowledgments to the officers of the vessel for the ready way in which they have lent me their cheerful co-operation.

I have, &c.,

FREDERICK W. NEITENSTEIN.

The Superintendent, N.S.S. "Vernon," to The Under-Secretary of Public Instruction.

Sir,

N.S.S. "Vernon," 31 July, 1882.

Adverting to my Annual Report, dated the 10th instant, I have the honor further to report (with reference to that paragraph, No. 13, dealing with the conduct of boys apprenticed) that I have this day received from the Inspector-General of Police accounts of visits made by the police to those masters who had not replied to my circulars up to the date of compiling the report. The result of these visits has been that twenty-one boys were found to be reported as "good," one boy (now out of his time) as "fair," and one "absconded." The latter had been away from the Institution two years and nine months when he absconded from his master in May last.

I have, &c.,

F. W. NEITENSTEIN.

## The Schoolmaster to The Superintendent, N.S.S. "Vernon."

Sir,

N.S.S. "Vernon," 30 June, 1882.

I have the honor to furnish you my report of the school under my charge, for the year ending June 30th, 1882. The school is conducted, as before, on the half-time system, and considering the class of boys, and the limited time they are under tuition, the results are fairly satisfactory. All the prescribed subjects, except drawing, are taught, and the Inspector's reports describes the attainments as "Nearly fair." Vocal music has been taught during the year, and singing in three parts is very fairly performed. A considerable portion of the school can sing nearly at sight.

A new and commodious school-room has been completed, and by increased accommodation and much improved ventilation, adds considerably to the comfort of the boys, and facility for maintaining discipline.

The conduct of the boys as a whole has, during the year, been good, and most of them evince a desire to improve.

I have, &amp;c.,

JAS. W. BALL,

School-master.

**Commission.**

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth,—

To Our trusty and well-beloved—

JOHN RENDELL STREET, Esquire, Vice-President of the Sydney Infirmary, President; PHILIP SYDNEY JONES, Esquire, Doctor of Medicine; HENRY NORMAN MACLAURIN, Esquire, Doctor of Medicine; FREDERIC NORTON MANNING, Esquire, Doctor of Medicine; and FRANCIS HIXSON, Esquire, President of the Marine Board of New South Wales;

Greeting :

KNOW you, that We, reposing great trust and confidence in your zeal, industry, discretion, and integrity, do by these presents authorize and appoint you to make a full, diligent, and searching inquiry into the management of the establishment known as the Quarantine Station at the North Head of Port Jackson, including the Hulk "Faraway," commencing from the date of the recent outbreak in this city of the disease known as Small-pox, on or about the first day of June last past: And We do by these presents give and grant to you full power and authority to call before you all such persons as you shall judge necessary, by whom you may be better informed of the truth in the premises, and to inquire of the premises by all other lawful ways and means: And Our further will and pleasure is that you, after due examination of the premises, do and shall, within the space of three months after the date of this Our Commission, or sooner if the same can reasonably be, certify to Us, in the Office of the Colonial Treasurer of Our Colony of New South Wales, under your hands and seals, what you shall find touching the premises: And We hereby command all Officers and Servants of the Government, and other persons whomsoever within Our Colony of New South Wales, that they be assistant to you in the execution of these presents: And We give you power at your discretion to procure such clerical or other assistance as may be absolutely necessary for enabling you duly to execute this Commission, and We appoint you the said JOHN RENDELL STREET to be President.

In testimony whereof, We have caused these Our Letters to be made Patent, and the Great Seal of Our Colony to be hereunto affixed.

Witness Our right trusty and well-beloved Councillor, SIR AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS (commonly called LORD AUGUSTUS LOFTUS), Knight Grand Cross of Our Most Honorable Order of the Bath, Our Governor and Commander-in-Chief of Our Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this thirteenth day of September, in the year of Our Lord one thousand eight hundred and eighty-one, and in the forty-fifth year of Our Reign.

AUGUSTUS LOFTUS.

(SEAL.)

By His Excellency's Command,  
JAMES WATSON.

Entered on record by me, in REGISTER OF PATENTS, No. 11, pages 359-60-61-62, this thirteenth day of September, one thousand eight hundred and eighty-one.

(For the Colonial Secretary and Registrar of Records),  
CRITCHETT WALKER,  
Principal Under Secretary.

## REPORT.

To His Excellency the Right Honorable Lord AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

We, Her Majesty's Commissioners, appointed by Letters Patent under the Great Seal of the Colony, dated the 13th day of September, 1881, to make a full, diligent, and searching inquiry into the management of the establishment known as the Quarantine Station at the North Head and the hulk "Faraway," have the honor to submit to your Excellency the following Report :—

In the middle of June last the Government found itself confronted by an outbreak of small-pox, with a population to a very large extent unprotected by vaccination and having an extreme and not unnatural dread of the disease. In this emergency the Government was unable to avail itself of the advice of the Health Officer, who was absent on sick leave ; but a meeting of certain Heads of Departments was held at the Treasury, and it was decided to make use of the Quarantine Station for the purpose of isolating the patients afflicted with the malady, and those who had been in direct communication with them. In the absence of any special small-pox hospital no other course appears to have been open to the Government.

The staff at the Quarantine Station at this time was small, the supply of clothing and stores insufficient, and the general organization in many respects unsuited to the occasion. Under these circumstances the immediate transfer thither of the patients and their friends appears to have been somewhat hasty and unadvisable ; to have led to the mixing of persons afflicted with small-pox with others who were free from the disease ; to the employment of inefficient means of transport, both through the streets and to the station by steamer ; and also to considerable discomfort for some days at the Quarantine ground itself.

In deciding upon sending the sick persons and those who had been in communication with them to the Quarantine Station, the Government seems to have been actuated by a desire that they should suffer as little discomfort as possible during their sequestration, and be treated with every possible care and consideration, as well as with the utmost liberality with regard to supplies both of clothing and provisions. The Treasurer, in reply to an inquiry from the Health Officer as to the scale of rations to be adopted in provisioning the people at the Quarantine Station, stated in a minute dated the 20th June :—

"I do not think under the circumstances, as these people are placed in the Quarantine grounds for the protection of the public health, that any scale of rations should be fixed, but on the contrary they should be treated in the most liberal manner. Let the articles supplied be of the best quality, and let them be supplied with every necessary comfort."

and the Under Secretary in his evidence (p. 5) produced a telegram sent to the Superintendent at the Quarantine Station on the 14th July, which stated that—

"The Government desire to make the patients and other persons as comfortable, and to be as well treated as possible."

Immediately

Immediately it was decided to send the sick to the Quarantine Ground a large supply of stores was ordered and despatched, and it will be seen by the evidence of Mr. Hopkins, the Superintendent of Stores (p. 12), that all requisitions for clothing and stores were promptly supplied. It does not appear that any requisition for clothing, medical comforts, or provisions of any kind was unattended to, while the lists of stores appended to this Report show that the supplies were liberal, if not lavish.

We consider that the order issued from the Treasury to quarantine Drs. Clune and Caffyn, the medical men connected with the epidemic in its early stage, was a grave mistake; and we are further of opinion that it was unwise to employ these gentlemen in the medical charge of the Quarantine Station, as they could scarcely be expected to discharge with zeal and energy duties which devolved upon them in consequence of what they considered an unjust incarceration. At the same time it is shown by the evidence that both Dr. Clune and Dr. Caffyn undertook the duties pressed upon them, and in the case of the former, that Dr. Spencer was taken down to the Quarantine Station by Dr. Alleyne to take charge of the Hospital Enclosure in his place, but Dr. Clune having stated that he was doing all in his power for the people and would continue to do so, the change was not made. (*See No. 2,172 and following questions, also 2,761 and 2,771.*)

The removal of the patients and others from their homes to the steamer "Pinafore" devolved upon the Police Department, and although the officers appear in some instances to have been somewhat peremptory in their summons, and did not always make it clearly understood that removal to the Quarantine Ground was optional, we find that on the whole they acted humanely and considerately. Some cases of hardship undoubtedly occurred, owing to the imperfect arrangements which existed, as well as to the extreme dread of the disease, and to the fact that the police themselves were not then protected by re-vaccination and might have endangered the public health had they placed themselves in immediate contact with those infected.

Complaints have been made of the removal of sick persons in the early morning or late at night, and during the cold weather such a course was open to objection, but the police in this particular acted under the advice of the Health Department, and the plan was adopted to lessen the risk of spreading the disease, and also to prevent the alarm which at that time would certainly have been created by the conveyance of small-pox patients through the streets of the city during business hours. The vehicle purchased in the first instance for conveying patients to the wharf was not of the most suitable description, but the ambulance since provided has been found well adapted to the purpose, and since the organization of the Ambulance Corps there has been no ground for complaint in connection with the removal of patients.

It is in evidence that three persons, Mrs. Bonnor, Mrs. Kelly, and Constable Cook, were removed from their homes by the police, and sent to the Quarantine Station as sufferers from small-pox, and that it was afterwards discovered they were not infected with the disease. Each of these persons was examined by a medical man, employed by the Health Officer, prior to removal—the two former by Dr. Spencer, and the latter by Dr. Hodson (*See questions 977, 1010, 1025, and 464*), and the police in removing them only acted under the orders they had received. (*See question 406.*)

The transport of the patients and others from the wharf at Woolloomooloo to the Quarantine Station was within the department of the Health Officer, but the steamer "Pinafore," provided for his use, although the best boat available at short notice, was in our opinion in many respects unfit for the purpose. We think that a more suitable vessel should have been subsequently provided as suggested by Dr. Alleyne. (*See question 2886.*) The statement of Mr. Guildford, that Dr. Caffyn, at the time of Mrs. Guildford's conveyance by the "Pinafore," said "Shove her under the seat," is expressly denied by Dr. Caffyn and two other witnesses, and we believe that Mr. Guildford is mistaken on this point.

It appears that on two occasions, patients, viz., Mrs. Monahan and child, Mrs. Fisher and Edward Verdich, were taken to the Quarantine Ground in an open boat towed by the "Pinafore"; and although it was certainly necessary as far as possible to separate the presumed healthy persons from those suffering from small-pox during their transit to the station, we are of opinion that the conveyance on a winter morning of sick persons in an open boat, stated to be in a leaky condition, was most improper.

The Quarantine Station is divided into two parts, called respectively the "Healthy Ground," consisting of first and second-class accommodation, and the "Hospital Enclosure," to which the sick women and children were sent. We have taken the evidence of persons who were placed in both these divisions, and after a full consideration of their statements have come to the conclusion that many of the complaints respecting the condition and management of the Station were frivolous and had little foundation in fact, whilst a number of them were grossly exaggerated, and seem to have been made with the ulterior object of obtaining increased compensation from the Government. It must be remembered that the persons who preferred these complaints were entirely without occupation, dissatisfied at their removal from their homes, and in a mood to be captious and fault-finding. (*See questions 1436-7 and 2430-1, also 1787-9.*)

Among the chief complaints for which some ground existed during the early occupation of the Station was the deficiency of certain necessary articles which could not be immediately procured; and it is clear that Mr. Carroll, the Superintendent of the Station, with many things in his store which were in demand, frequently refused to issue them, and generally displayed a niggardly spirit in supplying the various wants, thus disregarding the instructions of the Government to treat the people at the Station with the greatest liberality, and to a great extent rendering nugatory the provisions which had been made for their comfort.

We find that the food was at all times plentifully supplied and fairly distributed, and, though sometimes coarse, was generally good and wholesome. We think it might have been more varied in character, and that fresh milk and vegetables should have been more liberally supplied. It has been shown that the rations for the police were supplied to them separately, and the allegations made that they, whose duty it was to distribute the meat, kept the best portions for themselves is not borne out by the evidence.

The bedding and clothing appear to have been sufficient but not always suitable, and at times there was a scarcity of minor articles, especially for the use of women and children, which was almost inevitable, considering the circumstances under which these people were taken from their homes, and the difficulty of at once establishing a complete and thoroughly supplied store.

The

The houses at the Quarantine Station—as we are able to state from personal examination—are in good condition and fairly comfortable. In our opinion an earlier and more general use of the buildings in the Cabin Enclosure would have admitted of a better classification of the families, and tended to mitigate some of the discomforts experienced. It has, however, been pointed out to us by the Health Officer that he felt obliged to reserve these buildings in view of certain contingencies which might have arisen, and to enable him to establish a proper classification of quarantined persons with a view to their release. Shortly after the occupation of the ground the water supply in the creek and tanks failed, but a sufficient quantity for all purposes was sent from Sydney, and a floating tank kept in reserve near the ground.

The issue of stimulants appears to have been extremely, and we think unnecessarily, liberal throughout, but although until lately no proper supervision was exercised over the issue it has not been shown that this liberality was abused. Charges of inebriety have been preferred, but have not been substantiated by the evidence.

We regard the case of Constable Cook—sent down to the Quarantine Station, as before stated, through an error in the diagnosis of his illness, and placed in a tent in the healthy ground—as one of great hardship, and we believe that, although there were difficulties in dealing with him while he was supposed to be afflicted with small-pox and liable to convey infection to others, he might have received more consideration and been made more comfortable by Mr. Carroll, the superintendent. His conduct at first was, no doubt, insubordinate, and militated against his speedy release. During the latter part of his stay he was employed on police duty.

The people in the Healthy Ground would have been rendered more comfortable and contented had Dr. Caffyn, who was in charge, understood and acted upon the responsibilities of his position, and displayed greater tact and more power of organization.

Turning to the Hospital Enclosure, we find that the sick women and children—except during the first few days, when the arrangements were incomplete—were well nursed and cared for, and furnished with every comfort necessary, and that all requisitions on their behalf were promptly attended to by the authorities. The Nurses sent from the Sydney Infirmary seem to have been efficient and careful. Appended to this Report is a list of the articles supplied by Miss Osburn under the direction of the Health Officer. (*Appendix C.*) We regret, however, to be obliged to state that Dr. Clune, who was in medical charge of this department, does not appear to have discharged his duties towards the patients under his care in a manner which might have been expected from a gentleman in his position. From his own evidence (*see No. 1644 and following Questions*) and from the evidence of Nurse Meyler (*Questions 2614, 2627, et seq.*), it appears that he seldom or never went into the sick wards, and that he left the treatment of the patients almost entirely to the nurses, and did not think it necessary to take their temperature, to feel their pulses, or to take other steps which should have been a portion of his duty as medical officer. As was remarked by one of the nurses (*see Question 2700*), “if medical skill could have done them any good they certainly did not get it.” It has been affirmed by some of the witnesses that Dr. Clune was on several occasions under the influence of drink, but the evidence on this head does not carry conviction to our minds. It is, however, clear that from some cause or other he  
did

did not perform his medical and other duties in the Hospital Enclosure during the greater part of the time he was there. Dr. Clune seems to have been suffering from great mental depression, and to this probably was due the neglect which undoubtedly did occur.

With regard to the general management of the Hospital Enclosure, it is shown that a number of coffins, sent from Sydney, were allowed to remain inside the fence, exposed to the view of the patients, which we consider to have been highly reprehensible and cruel in its effects upon the feelings of the sick women and children. It is also in evidence that on more than one occasion patients brought to the enclosure, instead of being carried at once into the ward were kept waiting at the gate for a considerable time in the open air and in close proximity to these coffins. These matters were clearly under the control of Dr. Clune, as medical officer in charge. (*See questions 2662-3 and 1127.*)

The state of affairs on board the "Faraway" appears to have been in every way deplorable. We direct special attention to the evidence given by Joseph Rogers, pp. 34-5, and by Edward Verdich, pp. 46-7. Their testimony, which bears the impress of truth, is of a most painful description. Some of the patients on board this ship appear to have been left without nursing; to have been allowed to wander about and injure themselves at night, and even to go on deck in a naked state in their delirium; to lie for days in their evacuations; to be without any medical comforts, and indeed without any food, except such as was prepared for them by the voluntary and unskilled efforts of the convalescent patients—in short to have been without any of the comforts, attendance, or care which should have been accorded to sick people. Mr. Walsh, who was in charge of the "Faraway," was unqualified as a medical man, and was sent there by the Health Officer some time prior to the outbreak of small-pox, at the charge of a mercantile firm in Sydney upon the arrival of a ship consigned to them, having a number of Chinamen on board, some of whom were afflicted with small-pox. It seems that the previous services rendered by Mr. Walsh in similar situations had satisfied the Health Officer that he was sufficiently competent for the position, and in view of the difficulty in obtaining a duly qualified practitioner to undertake the duty he was allowed to remain until it was reported by Mr. Carroll that he was drinking, when steps were taken to provide a substitute. (*See No. 2,814 et seq.*) Mr. Walsh was at first unprovided with attendants and had to depend for assistance upon the voluntary services of the convalescent patients, and there was a great scarcity of proper bedding, medical comforts, and appliances necessary for the treatment of sick persons. In respect to this deficiency it is difficult to say where the blame rests, the evidence given by Mr. Carroll and Mr. Walsh (*see 825 and following questions, also 1872-8, and 1962, et seq.*) being very conflicting on this point; but with regard to the want of attendants or nurses it is clear that these should have been sent to the "Faraway" when patients were first taken there, and we cannot too strongly condemn the management which led to the results already described. We find it impossible to believe that the true state of matters on board the "Faraway" could have been reported to the Health Officer by Mr. Carroll, to whom it must have been to a great extent known.

In connection with the "Faraway" we may refer to the case of John Hughes, who stated that he was not suffering from small-pox at the time he was sent on board.

The

The medical members of the Commission, after a personal examination of this man, satisfied themselves that he has had the disease recently in a modified form. His conduct and manner when giving evidence were sufficient to convince us that he is a reckless and insubordinate man, and in view of the necessity of preserving discipline at the Quarantine Station we think that putting him in irons was not only justifiable but necessitated by the circumstances of the case. At the same time, had Mr. Walsh, the officer in charge, been equal to his position and obtained the respect of those under his care, the restrictions employed would probably not have been necessary.

Certain printed regulations for the management of the Quarantine Station, dated as far back as 1854, of which only a few copies appear to have been in existence, have been placed before us and are published as an appendix to this report. These are stated by Dr. Alleyne to have been obsolete for some years. He says, p. 87 (*Question 2744*):—

“ They were intended for immigrant ships under conditions which never occurred; they were drawn up under the idea that certain buildings would be erected and certain appointments made, which were never carried out.”

They were certainly not applicable to the circumstances attending the recent occupation of the Quarantine Station. Mr. Carroll appears to have taken some of them for his guidance and acted upon them, and to have ignored the others. Proper regulations for the management of this establishment should no doubt have been in existence, and these with a few alterations might probably have been made suitable to the altered state of affairs, and thus saved a large amount of trouble and misunderstanding.

Mr. Carroll, who appears to have been appointed storekeeper at the Quarantine Station forty years ago, has of late years occupied the position of Superintendent of Quarantine, and has had duties imposed upon him altogether beyond his capacity. We give him credit for having been actuated by a zealous desire to economise the stores entrusted to his care, but his defective education, his brusque manner, and his want of consideration for the residents at the Quarantine Station show that he was quite unsuited for the position he occupied, while an examination of the stock book which he produced when giving evidence has convinced us that he is not qualified to carry out efficiently the duties of a storekeeper.

Respecting the telegraphic communications from the Quarantine Station, we find that Mr. Carroll, following what he conceived to be the letter of the instructions he received from the Treasury (*See telegrams in evidence, pp. 7 and 8*), exceeded the intentions of the Government and curtailed and in some cases withheld the messages entrusted to him for transmission to Sydney.

Prior to the appointment of Dr. Beattie as Medical Superintendent of the Quarantine Station the burials appear to have been performed without any religious observance. Mr. Carroll shelters himself under one of the regulations previously referred to, which provides that the Superintendent is not to go inside the boundaries of the Quarantine ground; while the police give as a reason for the non-performance of the funeral rites the difficulty experienced by them in ascertaining at the time the religious denomination to which the deceased person belonged. Since Dr. Beattie has taken charge the burial service has been read over the grave of each patient. Complaints have been made that the graves were not dug to a sufficient depth, but these we do not find to be substantiated except in one or two instances. In connection with this subject we may observe that a painful scandal occurred during the conveyance of Mr. Rout's body to the Quarantine Station arising from the fact that

one at least of the undertaker's men was in a state of intoxication. These men were supplied with spirits by the undertaker to induce them to perform a disagreeable duty which it was difficult to find anyone willing to undertake. (*See questions 455-7 and 2497.*)

With regard to the complaints of lengthened detention at the Quarantine Station, we have the evidence of Dr. Alleyne (*see No. 2803 et seq.*) as to the reasons which influenced his action in a number of instances. At the same time we think an effort might have been made to procure the earlier release of some of the persons from the Healthy Ground.

It is to be regretted that in the frequent visits paid by the Health Officer to the Quarantine Station he did not think it necessary to obtain information from other sources than Mr. Carroll, who was in our opinion ill qualified to judge of the actual state of affairs existing in the Hospital Enclosure and on board the "Faraway," and did not appreciate the importance attaching to an accurate and detailed representation of such matters as came within his cognizance, and who was besides not on good terms with the medical officers in charge. Dr. Alleyne appears to have placed too much reliance on Mr. Carroll's reports and to have had no personal communication with the medical officers. He gives as a reason for the line of conduct he pursued that at first his boatmen were not thoroughly vaccinated, and that he was fearful of being himself the means of spreading the disease in town. (*See questions 2792-4.*)

We think the principle adopted by the Government of leaving the remuneration of officers and others engaged in quarantine work for after consideration was ill-advised, and that it would have been much better in making arrangements to have clearly defined the terms on which they were engaged and the payment they were to receive.

Since the appointment of Dr. Joseph Beattie to the charge of the Quarantine Station, Dr. Robert Beattie to the "Faraway," Dr. Day to the Hospital Enclosure, and Sergeant Logan to the charge of the Stores, there have been no complaints, and the different departments appear to have been conducted satisfactorily.

In conclusion, while we strongly condemn the failure to make earlier provision for the proper treatment of the unfortunate patients sent on board the "Faraway," we are unable to endorse the sweeping charges of neglect and mismanagement which have been so freely advanced in connection with the Quarantine Station. Some of the steps taken at the outset, and the appointments made, have been shown in the light of after experience to have been ill-judged, but the evils which arose out of them have been remedied by the prompt and vigorous action since taken by the authorities, and the result has been the reorganization of the Quarantine Station upon a satisfactory basis.

Given under our hands and seals this 11th day of January, 1882.

(L.S.)

J. R. STREET (PRESIDENT.)  
P. S. JONES, M.D.  
H. N. MACLAURIN, M.D.  
F. N. MANNING, M.D.  
FRANCIS HIXSON.

QUARANTINE COMMISSION.

MINUTES OF EVIDENCE.

WEDNESDAY, 21 SEPTEMBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
CAPTAIN HIXSON,

MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Haynes Gibbes Alleyne, Esq., M.D., sworn and examined:—

1. *President.*] You are the Health Officer of Port Jackson, Dr. Alleyne? Yes.
2. And have charge of the Quarantine Station and matters in connection therewith? I have a supervision over the ships with their crews and passengers and other persons while they are in Quarantine. There is a man in charge, Mr. Carroll. He is the storekeeper, and is considered superintendent; he is under the Treasury. I do not sign his vouchers, but I sign those of his son.
3. You have not the complete charge? When people are in quarantine I direct certain things to be done.
4. Were you connected with this duty at the time small-pox broke out in this City in June last? Yes, I was.
5. Of whom did the staff at the Quarantine Station consist of at the time of the outbreak? Mr. Carroll, two boatmen, and Mr. Carroll's son, who is caretaker of the "Faraway" when there is no infection.
6. I think Rout was the first person moved to the Quarantine Station, was he not? Well, he was moved there when he was dead; he died in Sydney. My recollection of it is not very clear, for I was out of health at the time, and had got a week's leave of absence. I was under the impression that some persons had been taken down there before.
7. When you returned after your leave of absence what was the condition of the Quarantine ground? I think it was on Tuesday afternoon that I obtained leave, and I returned on Friday, when Dr. Goode, who had been acting for me, said to me, "We are going to send a lot of people down there to-morrow." That was on Friday morning; and I said, "They will be left on the beach without Carroll knowing anything about it"; and he said, "There are lots of provisions there." I am not sure that I am correct about the date.
8. You were told by Dr. Goode that the Government were going to send a number of persons to the Quarantine Station, and you asked what provision had been made for them? Yes; I directed Dr. Goode to go down at once, and indicated to him the steps to be taken. This was on Friday. During that night Dr. Caffyn came to me and said he was ordered to go down to the Quarantine Station. The next morning, Saturday, I went down myself.
9. In what condition did you find the people there? I found them all together in what is now called the enclosure.
10. That would be on the 18th? Yes.
11. And you found they had not been placed as you directed? Yes, there was some misapprehension. There was only one sick person then (Mrs. Guildford), whose husband particularly wished to be with her, and I offered no objection. Dr. Clune was there when I went down. He wanted a particular man named Liversay for a servant; I told him to pick any man he liked, and he chose him ultimately.
12. Can you tell us who were in the enclosure when you visited it on Saturday? I have not the papers with me and I cannot say. There were more people there than I contemplated; they were all there together. I had them at once separated, and the sick persons and those necessary for their attendance put in the enclosure and the others put into the building outside. I gave instructions to have this done; I did not see it myself. I gave instructions to Mr. Carroll and Dr. Caffyn.
13. *Dr. MacLaurin.*] Dr. Caffyn was put outside the enclosure and Dr. Clune inside? Yes. A Chinaman and the male sick were on board the "Faraway." The enclosure was for women, and women only had been in, with the exception of Mr. Guildford and persons who had been sent in to wait on the others. I do not know that anyone except a sick Chinaman and four of his countrymen, who were not sick, was on board the "Faraway."
14. *President.*] You did not go on board the "Faraway" that day? No. I believed that provisions had been amply arranged for without my going, and I would not have gone on board and come away without special authority to do so, but I asked Dr. Clune what he wanted, and he gave me a long list of medicines and other things, which was taken down by my clerk. Dr. Clune called the list over to Dr. Caffyn, and Dr. Caffyn gave the list to my clerk.
15. And you sent that list to the Colonial Storekeeper? I think I am correct in stating that the whole of the things were sent down that afternoon; they were sent down in the steam-launch. Dr. Clune complained that he had no nurse. I had already arranged about a nurse, but could not get her vaccinated before the next morning, but she went down in the afternoon on Saturday. By the time I got back to the Infirmary I found she had gone down. Miss Osborn had suggested that there were certain necessary things which might not have been thought of, and she would send them down by this nurse, who was to send word every day what more was wanted. At that time we had not telegraphic communication with the station,

Dr. Alleyne  
21 Sept., 1881.

Dr. Alleyne.  
21 Sept., 1881.

station, but the men were fixing it, and it was at work within twenty-four hours. That was the arrangement made, the nurse was to telegraph to Miss Osborn for anything that was thought necessary. I did that on my own authority.

16. When did you next visit the ground? The next day, and from that time at least two or three times a week, more or less.

17. And how did you find matters there;—did you find any change? Well, I do not remember that I heard any complaint from Mr. Carroll or through him, but as my men were not well vaccinated I did not land at the ordinary landing-place, but went to another place where Mr. Carroll met me. Formerly I was in the habit of landing and speaking to the doctor, but in June, twelve months before, objections were raised on the subject of my going to the Quarantine ground, and then mixing with people in town. I therefore took this precaution; this and the fact of my men not being thoroughly vaccinated, and my fear of spreading the disease in town were my reasons for my not adopting my usual course, I did feel that there was a good deal of risk in taking these men there, and I am of the same opinion still.

18. What report did Mr. Carroll make to you on the Sunday as to the condition of the people on the ground? I think he reported that all was going on well, except that the Chinaman brought from Waterloo was likely to die.

19. Mr. Carroll did not report to you that the people were in want of anything special? No; Mr. Carroll's instructions were to see the doctors, whether there was one or twenty of them, and take their report as to what was wanted, to supply any articles that were necessary if he had them in store, and if not to let me know.

20. *Captain Hixson.*] In the event of the medical men wanting anything from Sydney, could they always get it when they wanted it? Yes, they always did, unless the requisition came after sun-set; they got them as soon as they could be procured; there was no time lost whatever.

21. If a medical man saw that anything was wanted he had only to apply for it and get it as soon as he had done so? Yes, it was Carroll's ordinary routine duty to ask the medical men if anything was wanting.

22. *President.*] I suppose those were your verbal instructions to Carroll? That was his regular routine duty ever since he was there.

23. Have any complaints reached you from these people that they were not supplied with these stores? Sometimes the things had to be made, and could not be sent at once, but they were always ordered at once.

24. Do you happen to know what description of bedding there was to receive the people when first sent out;—was there sufficient bedding accommodation? I believe there was no want of bedding and blankets; but I heard from Dr. Goode that a large quantity of bedding had been sent down. I had previously written, asking that everything of that kind might be sent.

25. *Dr. Manning.*] Have you any list of the goods and material at the Quarantine Station in store? I have often asked for it, but could never get a list.

26. Did you ask Mr. Carroll for a list? No, I did not; I asked him frequently if he had sufficient stores, and he always replied, "Plenty."

27. Do you consider it part of his duty to keep a proper list? Undoubtedly.

28. *President.*] Do you know, of your own knowledge, what water supply they had there? I believe they had plenty of water at first; they did not apply for water till some time afterwards. The creek which used to supply them ran dry in consequence of the dry season, and when the tanks were dry a steam tank was sent down. There is now a floating water-tank anchored at a safe distance both from the hospital on shore and the "Faraway."

29. Did you experience any difficulty in getting your work carried out in consequence of the disinclination of persons from the scare of small-pox to do it, at that time? No, I cannot say that I did, except in getting efficient persons to act as attendants.

30. Was there an ample supply of food there? I am not aware from my own knowledge. The order was that there should be no restriction whatever.

31. Was there furniture and cooking utensils? Yes, in some of the buildings on the ground, which could have been used if required.

32. *Dr. Manning.*] Are there cooking stoves in the buildings? In the enclosure there is a good military kitchen with proper appliances for cooking.

33. *President.*] There were houses for the people to go to? I believe there was not sufficient house accommodation in the way it was arranged. I think they should have taken the large pavilion for the sick, and then as they became convalescent they could have been removed to tents. Instead of this the sick were put into the small building.

34. By whose authority was this done? Dr. Clune, I suppose, made the arrangements. To his discretion everything was entrusted.

35. *Dr. MacLaurin.*] Do you say that the house accommodation would have been sufficient if it had been properly distributed? I do not think it would.

36. Did Dr. Clune know that he had full power to distribute the patients as he liked? Yes, Dr. Clune on one occasion sent to ask whether he had charge of the nurses and I wrote a pencil message in reply, stating that he had supreme power and was responsible. I sent that memo. back by Carroll, who brought the inquiry to me.

37. *Dr. Jones.*] You do not know of your own knowledge that Dr. Clune was the sole occupant of the large pavilion? No.

38. *President.*] Do you know what arrangements had been made for providing the people with fire and fuel? There is coal there, and a certain quantity of wood was ordered to be sent down every week.

39. There were a number of persons outside the enclosure. Can you give us any idea of the accommodation outside? The accommodation would have been ample under proper arrangements if the people had been soldiers or single people, but there were families there under peculiar conditions, and the accommodation was more cramped than it otherwise would have been.

40. *Dr. Manning.*] Was there any restriction as to the use of the buildings outside the enclosure? There were other buildings at some little distance which were made for first-class passengers from quarantined vessels. One of these was occupied, but the others I was reserving for contingencies. I have since used them for classifying the persons about to be released.

41. Who had charge of the arrangements outside the enclosure? Dr. Caffyn.

42. And was he aware that he had full charge of the arrangements outside the enclosure? I think so, except that he had not leave to occupy the reserved buildings.

43. *President.*] Did any complaints reach you about this time of the treatment of these people—were any complaints brought to you personally? No, except from the medical men of their enforced quarantine; they were very angry and sore at their detention. I did not send them there, and I am opposed to quarantining medical men; but as they were there and I could get no other doctors to replace them, I could not take steps for their release. I was extremely anxious to release them, especially Dr. Caffyn, who was quarantined through an act of kindness to me.

Dr. Alleyne.  
21 Sept., 1881.

44. Did you receive any complaints that one or other of the doctors had been supplying the patients with wine and other things from his own stores, from the inability to obtain Government stores? I had no complaints of that kind. I endorsed every recommendation for wine and beer, and I consider that the quantity of these articles supplied was large.

45. Did you receive any complaints by telegram, or requisitions by telegram, from either of the medical men? The requisitions all came by telegram through Carroll.

46. *Dr. Manning.*] Did you get any complaints made direct to you by telegram from the doctors? Sometimes complaints were made that the articles ordered had not been sent.

47. And what steps did you take on such occasions? I always sent to the storekeeper or contractor to know why the things had not been sent.

48. Did you find that they had been sent? The storekeeper or contractor always satisfied me that the things were sent as soon as they could be procured.

49. *President.*] Did you ever give instructions to Mr. Carroll that he was to alter, condense, or suppress telegrams sent by people at the Quarantine Station to you? I never gave authority or directions to Carroll to alter or withhold telegrams. On one occasion, after the quarantine had been going on for some time, Carroll told me he had expunged certain words from two of Dr. Clune's telegrams, both on the same day. I told him he had done a very improper thing. He said he had instructions from Mr. Eagar, and I informed him that he must have been mistaken. He led me to suppose he had received these instructions by telegram.

50. How long have you been Health Officer in Port Jackson? More than 29 years.

51. And how often have you had leave of absence? Never at all, except for two or three days when I was sick, as I have mentioned.

THURSDAY, 22 SEPTEMBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
CAPTAIN HIXSON,

MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Hon. Geoffrey Eagar sworn and examined:—

52. *President.*] You are Under Secretary for Finance and Trade? I am.

53. And the management of the Quarantine Station and the "Faraway" is in your department? Yes.

Hon.  
G. Eagar.  
22 Sept., 1881.

54. Dr. Alleyne, I suppose, is the officer who is directly responsible to your department for the management of the station? The Quarantine Station is under the direct management and control of the Health Officer, whose duty it is to report, as occasion requires, to the Treasurer.

55. What is Mr. Carroll's duty? He is resident Superintendent and Overseer of Stores.

56. During the time you have held your present office have you had any previous experience of the outbreak of small-pox? At the end of 1876 and the early part of 1877 there was a case on the arrival of the "Brisbane," from Cooktown, and also a case at Miller's Point.

57. Can you tell the Commissioners what steps were adopted at that time by the Government for the suppression of the disease? Perhaps I may state, a little at large, the facts of the case: The "Brisbane" arrived here on 10th December, 1876, and on the statement of the captain obtained pratique and came up to a wharf. On or about the 13th of the same month, after she had come up to the wharf, a case of small-pox was found on board. She was immediately ordered down to the Quarantine Station with her crew and such passengers as could be found; and she remained in quarantine until, I think, the 22nd January, 1877. Shortly after she was placed in quarantine another case of small-pox was found in a house at Summerbell's or Marsden's Wharf, Miller's Point, in the immediate vicinity of the place where the "Brisbane" had been moored; the afflicted person was a member of the Holden family. The patient was taken to the Quarantine Station, and other members of the family who developed symptoms of small-pox were subsequently taken there. Summerbell's Wharf, with a portion of the surrounding buildings, was placed under strict quarantine; and, as a consequence of the energetic treatment of the complaint, and the effectual isolation of all suspected places, no further cases of small-pox occurred. I should mention the fact that some members of the Holden family died, and were buried at the Quarantine Station.

58. You consider that the steps taken were effectual in preventing the spread of the disease? I do; I think they were most effectual. The steps taken were recommended by the Health Officer, and concurred in by the then Treasurer, Mr. Alexander Stuart, M.P.; and from that time to the recent outbreak there was no known case of small-pox in the city. I should also mention that about the same time some cases of small-pox appeared on board H.M.S. "Wolverine," and other of H.M. ships then lying in the harbour, when the active steps taken by the authorities on board were equally effectual in stamping out the disease.

59. Are you aware that at the time of the recent outbreak a very large proportion of the population of Sydney were unvaccinated? I am only aware of it by report, but not as a matter of fact; it did not come under my knowledge.

60. But was not a report received from the Government to that effect? Yes, I think such a report has been received.

61. Can you tell us what instructions were given by the Government to the Health Officer, or in connection with the Quarantine Station, directly the recent outbreak of small-pox occurred? The first case of small-pox was that of the child of Mr. On Chong, on 25th May, but what I may term the outbreak of the disease dates from 15th June, when the authorities learned that a case of small-pox had occurred in the family

Hon.  
G. Eagar.  
22 Sept., 1881.

family of Edward Rout, at Surry Hills. The Treasurer was absent from Sydney for that day. He had started in the morning for the Mountains, and on reaching Granville saw the *Herald*, and immediately telegraphed to me requesting me, in conjunction with Dr. Alleyne, to take all necessary steps to deal with the case. Nothing was done on that day beyond placing the house in strict quarantine. On 16th June a meeting was summoned at the Treasury, consisting of Mr. Superintendent Read (the Inspector General of Police being out of town) Captain Hixson, and Dr. Goode, the Health Officer being unwell, when it was reported to the Treasurer that the house had been duly placed in quarantine; and it was decided that the patient as well as the other inmates of the house should be removed to the Quarantine Station. We were then without any means whatever of removing patients from the houses where the disease occurred, and the first arrangement was to purchase an omnibus and horses from the Omnibus Company, and hire the steamer, "Pinafore," with the view of conveying the patient to the Quarantine Station. The patient, Mr. Rout, however, died on 16th June, and on the same night the body was placed in a coffin with quicklime, removed to the station, and there buried. The other inmates of the infected house were removed to the station on 16th and 17th June. That was the first case. We found very great difficulty in getting any one to attend in that case.

62. Owing to the scare? Owing to the natural as well as expressed reluctance of persons to come in contact with the dead body. During 15th and 16th June, Mr. Superintendent Read and myself, with the advice of Dr. Goode, acting for Dr. Alleyne, took such steps as appeared to us necessary, that is to say, as regards the quarantining of infected houses, and the removal of patients, always having the assurance that the patient was capable of being moved. I should here state that on 14th June the Health Officer obtained a week's leave of absence on account of ill-health, but resumed duty on the afternoon of 16th June.

63. Are you prepared to give us a list of the persons moved to the Quarantine Station? I now hand you four lists prepared by the Health Officer. No. 1 is a return of sick persons taken to the Quarantine Station; No. 2 a return of persons taken there who were presumed healthy; No. 3 a return of the patients who died; and No. 4 a return of the persons who have been released up to 21st inst. (*Appendix B.\**) I may state that in the first instance, when the Government had no idea of the subsequent spread of the disease, they determined to carry out the principles adopted in 1876 and 1877, that is to say, to send away the patient at once and quarantine the house. The Government however saw that if they continued the practice of sending away also persons from the same house, presumed healthy, there would not be sufficient accommodation to receive them; and after a certain time, when the sick and well sent to the station numbered 61 persons, they decided only to remove the patient, to quarantine the house, and to keep there the persons presumed healthy who were left behind. But whenever persons have been left behind in a quarantined house, an endeavour has been made to persuade them to be vaccinated and to go to the Sanatory Camp at Long Bay, and a number of persons have availed themselves of that mode of treatment.

64. Were these people sent down to the Quarantine Station separately, or upon separate advice as to each person, or under a general direction. I am speaking of the infected people and those who were suspected of having the disease? Under a separate direction in each case.

65. *Dr. MacLaurin.*] You have not given authority to convey any person to the Quarantine Station against his or her will? My impression is that the Government were prepared, if necessary for the public safety, to take them down with or without their consent, but that their consent was obtained. Of course I was not the executive officer—the constabulary were employed to remove these people. My impression is that their consent was obtained in every case. The persons capable of giving this information are the police.

66. *President.*] It appears in a statement published in the Press that Dr. Clune had an interview with you and remonstrated with you against his being sent to the Quarantine Station? Yes, he had an interview with me.

67. And remonstrated with you? Undoubtedly he did.

68. And you had taken advice, I suppose, that it was necessary he should be sent? I had the authority of the Treasurer.

69. These two medical men, Dr. Clune and Dr. Caffyn, formed an exception then to the practice of obtaining the consent of persons sent to the Quarantine Station, and their cases being different from the others were treated differently, as they had actually been in contact with persons known to be infected? Yes, or known to be in the immediate vicinity of persons infected.

70. What is the principle which the Government adopted in selecting persons to send down to the Quarantine Station? The Government considered that they had a right under the statute and in the interest of the public health, to remove persons who were infected or in the immediate vicinity of infection, from the place of infection, so as to isolate them from the rest of the community. But practically the Government never assumed to remove to the Quarantine Station all the persons in the infected houses. Some of the persons removed to the station, including both the patients and the presumably healthy persons in the respective houses, were in comparatively humble circumstances, residing in localities unfit for human habitation, some of which have since been destroyed or directed to be destroyed under the City Improvement Act. In these cases it may be presumed that the parties went willingly to the Quarantine Station, because they were removed from a scene of squalor and distress to a healthy locality, where they were supported at the cost of the Government, and from which the bulk of them have returned healthy. I may state that there are at least half-a-dozen cases where the disease has broken out in a house and the parties have been left there without interference on the part of the Government beyond quarantining the house and keeping up a constant observation of the patients by means of the Government medical staff. In the cases referred to the patients and their friends objected to go, and were not pressed to do so.

71. Then I understand that the cases of Dr. Clune and Dr. Caffyn were considered special cases, and these gentlemen were sent to quarantine under special direction of the Government, and as the Government considered for the preservation of the public health;—is that the fact? Yes, as they had had been in contact with and in attendance upon small-pox patients. In speaking of special authority, I mean no more than the authority which is conferred upon the Governor and Executive Council by 3 William IV, No. 1, under which their orders for the removal or treatment of persons afflicted with an infectious disease have the force of law.

72. What orders or directions respecting stores, clothing, &c., were issued from your office, Mr. Eagar? Immediately after the occurrence of the case of small-pox in the Rout family the Health Officer addressed

\* This return has since been made up to 17th November, 1881.

## QUARANTINE COMMISSION—MINUTES OF EVIDENCE.

a letter to me in my official capacity, on which the Treasurer made a minute, and I request permission to read this letter. It is as follows:—

Dr. Alleyne to The Under Secretary for Finance and Trade.

Sir,

I have the honor to request that I may be informed what scale of rations should be adopted in provisioning the people at the Quarantine Station?

Sydney, 19 June, 1881.

I have, &c.,  
H. G. ALLEYNE.

Hon.  
G. Eagar.  
22 Sept., 1881.

*Minute of the Colonial Treasurer on the above.*

I do not think, under the circumstances, as these people are placed in the Quarantine grounds for the protection of the public health, that any scale for rations should be fixed, but on the contrary they should be treated in the most liberal manner. Let the articles supplied be of the best quality, and let them be supplied with every necessary comfort.—J. W., 20/6/81.

In arriving at this conclusion the Treasurer felt that as these persons, without any fault of their own, were placed in circumstances of possible difficulty and inconvenience for the public benefit, they were entitled to the best treatment and to every comfort which the Government could afford. I communicated this to Dr. Alleyne, also to Mr. Kidman, the contractor for stores, and also to Mr. Hopkins, the Superintendent of Stores. I told them of the liberal intentions of the Government and that everything supplied was to be of the very best quality.

73. Perhaps you can supply us with copies of Mr. Kidman's and other contractor's accounts for provisions and medical comforts? I shall be happy to do so when they are rendered. I should add that my action as Under Secretary was only casual. Mr. Carroll, as Superintendent, sent in his daily requisition to Dr. Alleyne, and the things were sent direct to the station.

74. *Captain Hixson.*] Did any complaints reach you from persons at the Quarantine Station? I will read some telegrams which I sent to Superintendent Carroll:

Telegram to Superintendent Carroll, Quarantine Station, on 29 June, 1881.

A stock of brandy, wine, ale, and porter will be sent you to-morrow, from which you will supply requisitions from the medical men daily, and keep a strict account of same.—G. EAGAR.

Telegram to Superintendent Carroll, Quarantine Station, on 4 July, 1881.

You complain through Dr. Alleyne that yesterday's supply of fresh milk for the sick had not been sent down. If not, it would appear to be your own fault. You have merely to order from Mr. Kidman, and your wants will be at once supplied. Let me know how the case stands? You must either give a daily order, or a standing order for a certain daily quantity. The policemen's rations have not been ordered. Reply at once.—G. EAGAR.

Telegram to Superintendent Carroll, Quarantine Station, on 14 July, 1881.

From this date order what Dr. Clune requires for himself and the women's hospital separately, and Mr. Kidman will deliver them distinct from other supplies. It is your own fault if you do not order what is required. The Government desire to make the patients and other persons as comfortable, and to be as well treated, as possible. Let this be shown to Dr. Clune.—G. EAGAR.

In submitting these telegrams to the Commission, I wish to point out that they were not sent by the head of the Quarantine Department to the Superintendent, but from the Under Secretary of the Treasury. The only occasions on which I individually as Under Secretary have known of any complaints whatever have been, as far as I can remember, these two occasions.

75. Have you ever had any complaints of delay in getting the things sent down to the station? Speaking from memory, I think there were two occasions when the steamer was late. In one case she arrived late in the day, and in the other case, as I understood the explanation, she was sent down on the Saturday to avoid going down on the Sunday.

76. Did bad weather at any time interfere with the transport of provisions? I have only personally known two cases; but I have heard it said that the state of the weather past the Heads has caused delay; of course I only received the telegrams sent to me, and not those sent to Dr. Alleyne.

77. *President.*] Did you give your consent at any time to the suppression of telegrams sent from the Quarantine Station? Certainly not.

78. Or the alteration of telegrams? Certainly not.

79. *Captain Hixson.*] Was there any restriction as to the sending of telegrams from the Quarantine Station? They were all ordered to be sent through Carroll; that was considered necessary both by Dr. Alleyne and myself as a matter of discipline, and for the proper carrying out of the quarantine regulations.

80. But no order was given for withholding any telegram? So far from that I should have considered myself in the highest degree culpable if I had given such an order. I will lay before the Commission copies of all the instructions which I gave upon the subject.

81. *Dr. Manning.*] You heard no complaints except those made by telegram until the complaints appeared in the public Press? No, not until I noticed those in the public Press, and no one was more astonished than the Treasurer and myself at the nature of those complaints. We had no reason whatever to believe that the intentions of the Government were not properly and faithfully carried out.

82. Then I understand you to say that all action in this matter was taken under medical advice, as regards the quarantining of people, and that your adviser was Dr. Goode? Yes, for what was done on 16th June.

83. Subsequently, after the return of Dr. Alleyne, you were advised by him? Always. Dr. Alleyne's course was very methodical and business-like; he always reported every case in writing to the Treasurer, and the action he proposed to take.

84. Did it come within a part of Dr. Alleyne's duty to take the care of small-pox cases occurring in Sydney? I consider it is within his duty as Medical adviser to the Government, an office which he held in addition to that of Health Officer.

85. Were any steps taken to ascertain the state of preparation at the Quarantine ground for the reception of patients? I presume so; that is a matter for the Health Officer to look after; he visited the Quarantine Station for that purpose.

86. How was Mr. Carroll informed that they were coming? Those were all matters arranged by Dr. Alleyne, of which I have no personal knowledge.

87. *Dr. MacLaurin.*] Did not you or some other authority cause a quantity of bedding and other requirements to be sent down to the station before the first batch of patients were sent there? At the meeting on the 16th instant, a large quantity of bedding, fifty tents and fittings, and three baths, in addition to provisions and clothes, were directed to be sent to the Quarantine Station, and were so sent by special steamer on the afternoon of that day, before the arrival of the patients there.

Hon.  
G. Eagar.  
22 Sept., 1881.

88. *Dr. Manning.*] Were any special instructions sent to Mr. Carroll in connection with the small-pox patients? Not by me; they would necessarily come from Dr. Alleyne.
89. Were directions for extra stores issued before the patients were sent down? I presume so.
90. Does Carroll receive instructions direct from the Treasury or through Dr. Alleyne? From Dr. Alleyne direct, except on those occasions when I have addressed him as Under Secretary in reference to matters of complaint, &c., and this only since June last.
91. *President.*] In the event of your instructions for the comfort of the people at the Quarantine Station not being carried into effect, what officer was responsible for their neglect? Undoubtedly the Health Officer; he made regular weekly visits to the station—often three in a week.
92. Who had the management of the removal of persons from the infected houses to the Quarantine Station? The police, and latterly the ambulance corps under the Board of Health.
93. Did any instructions issue from your office that patients should be conveyed down to the Quarantine Station in open boats, towed behind the steamer? Not to my knowledge, or that I recollect.
94. *Dr. Manning.*] Have you any knowledge of the amount of stores and the sufficiency of stores kept at the Quarantine Station? I have no knowledge whatever.
95. Then you have no knowledge of Carroll's furnishing or keeping lists of these stores? I consider it his duty to do so, and to furnish them to the Health Officer.
96. *President.*] The telegrams that you handed in just now—are they replies to other telegrams? Yes.
97. From whom? From Carroll.
98. Then was that the ordinary mode of communication between Carroll and your department, or should these telegrams have passed through the Health Officer? No; the bulk of them go through the Health Officer. There were occasions when authority had to be asserted, and when the communications came with more weight from me; I speak exclusively with reference to the action taken since 15th June.
99. *Dr. Manning.*] Had Carroll control over the "Faraway" as well as the Quarantine ground? Yes.
100. And was he responsible for the provisions there as well? Undoubtedly.
101. And for all reports coming from there? Yes.
102. Who signs Carroll's vouchers for his pay? They are signed by Dr. Alleyne, I think; I am not sure.
103. *Captain Hixson.*] You do not sign his vouchers? Certainly not.
104. You told us, Mr. Eagar, about the supplies that were sent down to the station from time to time;—can you tell us anything about the nurses or servants for the sick people there? I know that two nurses were supplied by Miss Osborn.
105. Was that at an early stage of the outbreak? I could not say; all these matters were managed by Dr. Alleyne. I know that two nurses were sent down by Dr. Alleyne, and I think two male attendants for the "Faraway."
106. And whatever was recommended to you by Dr. Alleyne was attended to at once? I do not recollect a single refusal on the part of the Treasury to any one of Dr. Alleyne's recommendations.
107. I suppose this outbreak came rather suddenly upon you, when the Quarantine Station was unprepared for the reception of such patients? Most suddenly, and undoubtedly when the station was at the moment in a state of unpreparedness. I may state to the Commission that the Quarantine ground was never intended for a small-pox station; it was intended for the reception of persons coming from a distance in ships to this port.
108. *Dr. Manning.*] Upon whose recommendation was this station used as a small-pox station? Always on the recommendation of the Health Officer, approved by the Treasurer.
109. *President.*] Are you aware whether it has ever been brought under the notice of the Government that the Quarantine Station is quite unsuitable for the reception of small-pox patients, and that it is desirable that other accommodation be provided? The unsuitableness of the station for general quarantine purposes has been brought under the notice of the Government by the Health Officer, and a new station at Broken Bay has been recommended, but it has not been noticed as far as I can recollect as especially unsuitable for a small-pox station.
110. Have you any plan of the Quarantine ground? Yes; I produce a plan with the remark that it is for inspection only.
111. Are the whole of the buildings shown on this plan? Yes.
112. Have you any plan of the "Faraway"? No, but I will endeavour to procure one.
113. *Captain Hixson.*] Now as to the classification of the people at the Quarantine Station—under whose authority was that done. Can you tell us? I consider that the entire arrangements of the Quarantine Station are under the control and management of the Health Officer, subject to his report to and the approval of the Minister. We know nothing of the details except they are communicated to us by that officer.
114. Can you tell us anything of the condition of affairs there now. Have you reason to believe that the people are comfortably located there, or not? Having no personal knowledge of the facts, I have only reason to believe so from the daily bulletin of Dr. Beattie, the medical officer in charge, who reports that the people are very comfortable and well attended to.
115. Can you tell us how long Dr. Beattie has been there? I think about a fortnight.
116. Will you kindly tell us what was the occasion of Dr. Beattie being sent there? The repetition of the complaints made through the public press induced the Government to determine upon three things—first, to appoint a Commission of Enquiry, a Royal Commission to enquire into the whole affair; next to suspend Mr. Carroll, pending this enquiry; and thirdly, to fill up the position for which the Parliament had voted a salary, viz., that of Medical Superintendent in charge of the Quarantine Station, but which had not been filled up until the appointment of Dr. Beattie.
117. Dr. Beattie then did not really supersede any other gentleman? Certainly not; he occupies an entirely new appointment.
118. What provision has been made by Parliament for that officer? £300 a year and quarters, with light and fuel.
119. Who, so far as you know, had the resident charge of the Quarantine Station until the appointment of Dr. Beattie? Mr. Carroll, subject to the supervision of the Health Officer.
120. Were not these two doctors—Dr. Clune and Dr. Caffyn—there for a time under orders from the Government to attend upon the patients? Dr. Clune and Dr. Caffyn, being both in quarantine at the time, were informed that their professional services would be utilized and paid for liberally by the Government; and in that capacity, as officers of the Government, their reports should properly come through the Superintendent.

121. Then, I presume, any recommendations made by those gentlemen would be attended to by the Government? Their recommendations would come through Dr. Alleyne, and would receive the most favourable consideration.

Hon.  
G. Eagar.

22 Sept., 1881.

122. I mean that if either of those two gentlemen saw anything wanting, and applied to the Government, it would be supplied at once? Certainly.

123. *Dr. MacLaurin.*] Those gentlemen could not communicate directly with the Government, but only through Mr. Carroll? Yes.

124. *President.*] Are the duties of the Health Officer defined by Act of Parliament? Yes, by the Act 3 William IV No. 1 and subsequent statutes.

125. *Dr. Jones.*] Was it by direction of the Treasury that certain buildings were kept vacant on the Quarantine ground? No; they were recommended to be kept vacant by Dr. Alleyne but the Treasurer often objected, and finally directed their use.

126. *Captain Hixson.*] You told us that Mr. Carroll was suspended. Will you kindly tell us why the Government thought it necessary to suspend him? Owing to the serious complaints reported in the public Press, which attained so much significance that it was thought necessary to suspend him pending the enquiry.

127. Have you appointed anyone to take charge in the meantime? We have appointed a very respectable senior constable to perform his duties.

TUESDAY, 27 SEPTEMBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPT. HIXSON,
MR. STREET.		

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Hon. Geoffrey Eagar attended, and made the following further statement in evidence:—

Mr. President,—Referring to my answer to question No. 79 in my previous evidence, I desire to be re-examined for the purpose of placing before the Commission copies of the instructions sent by me to Mr. Carroll in reference to the transmission of telegraphic messages and mail communication between the Quarantine Station and Sydney. In dealing first with the mail question, I desire to state that on or about 27th June Mr. Charles Hayes, the Secretary of the Exchange, waited upon me, and in his capacity as a member of the Borough Council at Manly called my attention to the circumstance that during previous quarantining of vessels it was certain that persons had been, unknown to the authorities, brought by boatmen from the station to Manly Beach. He thought it was wrong, under such circumstances of quarantine, that such communication should be permitted, and on behalf of the Council specially called my attention to the danger of such a course while the small-pox was here. As the result of this interview I telegraphed down to Mr. Carroll, stating that no mails must go from Sydney to the Quarantine Station *via* Manly, or from the Quarantine Station to Manly, upon any pretence whatever. Concurrently with that action, and with the view to provide means of mail communication between Sydney and the station, I sent a minute to the Secretary of the Post Office Department, as follows:—

Hon.  
G. Eagar.

27 Sept., 1881.

It is stated that the stoppage of mail communication between Sydney *via* Manly and the Quarantine Station (although imperatively necessary at this critical time) is attended with much inconvenience to the persons who are compelled to remain there.

I am to suggest, that to meet the difficulty, a mail for the quarantine station might be made up daily, and sent to the station by Mr. Kidman's launch.

Communication might perhaps be made to that gentleman, who is the Government contractor, taking down provisions daily.

G.E., 2/7/81.

Under this minute a daily mail has been sent from Sydney to the Quarantine Station in the launch of Mr. Kidman, the contractor, and this practice still continues. Then I may say that, after consultation with Dr. Alleyne, it occurred to me that there was equal danger in letters coming from the Quarantine Station to Sydney, as I understood that there were no means by which these letters could be thoroughly and effectually fumigated, and telegraphic communication between the Treasury and the station having recently been renewed, I informed Dr. Alleyne that all the persons at the station were at liberty to use the telegraph wire free of any cost. About the 23rd June, Dr. Alleyne reported to me that telegraphic messages had been delivered direct by the senders or otherwise than through Mr. Carroll, to the telegraph operator at the station, which was considered an improper thing, and I will state the reason why the station then comprehended three divisions, the "Faraway" containing the male patients suffering from small-pox, an enclosure called the women's hospital, also containing persons suffering from small-pox, and a third portion of the ground to which the people were removed who had been in contact with small-pox patients. It is obvious therefore that if any one out of these three divisions had communicated personally with the telegraph operator, the risk of spreading the disease would have been largely increased. I understood that the proper mode of conveying these messages to the operator was by Mr. Carroll proceeding to the respective places, and at a safe distance, taking down any message which might be proposed to be communicated. On the 23rd June I sent down the following telegram, No. 1,405, to Mr. Carroll:—

Telegram to Superintendent Carroll, Quarantine Station, on 23 June, 1881.

Dr. Alleyne reports that telegraphic messages have been delivered direct by the senders, or otherwise than through you, to the telegraph operator. This is a gross breach of discipline. You and the operator are both to understand from this telegram that no message is to leave the station, by wire, unless it comes through you.—G. EAGAR.

The Commissioners will see from this telegram that there was no limit as to the intercourse by wire imposed upon the people at the Quarantine Station, but they had to deliver their messages or send their messages to the operator through Mr. Carroll. Then on the following day, for reasons which I shall presently explain, I sent two messages to Mr. Carroll, Nos. 1407 and 1410:—

Telegram to Superintendent Carroll, Quarantine Station, on 24 June, 1881.

No message is to be sent from station to Sydney or elsewhere, about Mrs. Rout's child or any other case, except to the Treasury or to Dr. Alleyne.—G. EAGAR.

Telegram

Hon.  
G. Eagar.

27 Sept., 1881.

Telegram to Superintendent Carroll, Quarantine Station, on 24 June, 1881.

THE doctors are not allowed to telegraph to the Press and the Infirmary. I repeat the order already sent you this forenoon, that no messages are to be sent from the station except to the Treasury and to Dr. Alleyne.—G. EAGAR.

And on the 8th July I sent the following telegram, No. 1451 :—

Telegram to Superintendent Carroll, Quarantine Station, on 8 July, 1881.

DOCTORS cannot telegraph to other doctors state of patients.—G. EAGAR.

My reasons for sending these later telegrams, as far as the doctors are concerned, were these :—That these gentlemen went down to the station unwillingly, no doubt, but with a promise of being paid by the Government for their professional services there, and that, after their arrival, Dr. Clune was placed by Dr. Alleyne in charge of the women's hospital, and Dr. Caffyn was placed by Dr. Alleyne in charge of the ground where the presumed healthy people were encamped; therefore I regarded these two medical gentlemen, for the time being, as public officers, and by these telegrams I conveyed to Mr. Carroll the fact that, as public officers, they were subject to the rule which governs all public servants—that they were not allowed to make any statements to the public or to the Press upon official matters without sending them through their superior officer. Acting upon this well known rule of the service, I limited the doctors' official reports to that extent—that they must be made either to Dr. Alleyne or to the Treasurer. I may say that I am not aware of any instance where the persons residing there did not use the telegraph for private purposes. I believe Dr. Caffyn and Dr. Clune both used it for private purposes. My intention was not to limit them in that respect, but to keep them to the rule of the service, that the Government should be the first to receive information upon official matters. In reference to this matter, I will quote some questions that were asked in the Legislative Assembly on the 4th and 18th August. On the 4th August Dr. Renwick asked the Colonial Treasurer several questions, the material one being this :—

"(3.) Is Dr. Clune employed professionally at the Quarantine Station; if so employed, on what terms have his services been engaged? *Ans.* Yes, upon terms hereafter to be agreed upon. "On the 18th August Mr. McCulloch asked the Colonial Treasurer in reference to Dr. Caffyn—"Is he employed there professionally; and, if so, on what terms is he engaged?" and received a reply in the same words: "Yes, upon terms hereafter to be agreed upon." I may say in addition to this that I saw Dr. Clune personally at the Treasury on the afternoon of the night on which he was taken down to the Quarantine Station, and after expressing my sympathy with him in the necessity of his going there I distinctly told him that he would be placed in charge of the women, and would be handsomely paid for his services. I do not hesitate to say that I consider those rules were necessary to the proper management of the Quarantine Station, and they have remained in full force and without being altered to the present day.

128. *Dr. MacLaurin.*] I understood you to say that there was no restriction whatever placed upon private telegrams? None whatever, except the obligation to communicate the telegram to the operator through the Superintendent.

129. *President.*] Under the 11th section of the Quarantine Act, 17 Vict., No. 29, the Governor with the advice of the Executive Council is empowered to make rules and regulations. Have any regulations been framed under that particular clause in the Act? No special regulations that I am aware of.

130. *Dr. Manning.*] Are there any regulations for the management of the Quarantine ground? There may be but Dr. Alleyne is the best authority on that point.

131. *President.*] Can you explain to the Commissioners when the change in the title of the officer took place. Under 3 William IV, No. 1, provision is made for the performance of the duties relating to quarantine under a superintendent, but under the Act 17 Victoria, No. 29, these duties devolve upon the Health Officer? I am unable to explain that, as I was not then engaged in the Public Service.

132. Do you think it possible the records in your office will show that such a change took place on the passing of the Act? The records in the Colonial Secretary's Office might show it. These Acts were passed before the establishment of responsible Government.

Edmund Fosbery, Inspector-General of Police, sworn and examined :—

E. Fosbery,  
Esq.

27 Sept., 1881.

133. *President.*] You are the Inspector-General of Police? Yes.

134. The Commissioners wish to ascertain from you what instructions you received from the Government with reference to the conveyance of persons infected with small-pox from their homes to the Quarantine Station. We understand that some directions were given to you to take the necessary steps for the removal of these people? There were no written directions given in the matter that I can remember, but each case was dealt with as it occurred.

135. And you deputed one of your officers to carry out the work? Well, I was out of town when the first patients were removed, I think, and an omnibus was purchased by the Treasury authorities for the removal of the patients.

136. That was not done by your directions? The details were carried out by the police. I think Superintendent Read would be able to give you better information on that point. As regards their actual conveyance, I may say that I had an ambulance built some years ago under special medical supervision, and when the cases became rather numerous I suggested that this ambulance should be given over for small-pox purposes, and it was so given over, and the omnibus was discontinued.

137. In the removal of these small-pox patients did you act generally on the instructions given by the Government, or in each case upon the advice of some medical officer? I think that in all the police did they were set in motion by the Medical Adviser to the Government, Dr. Alleyne; he was the means of communication with me.

138. And directions were given by him in each case? Yes; the instructions were entrusted to the various officers of the police in whose divisions the cases occurred, and as a rule they personally superintended the removal of the patients.

139. *Capt. Hixson.*] When the disease first broke out I think you say that you were out of town? In the first case, which was that of a Chinaman's baby, the house was simply quarantined. I was requested to quarantine the house, and I did so; there was no removal there. Rout's case occurred while I was out of town on business.

140. And then the Government obtained the assistance of Superintendent Read? He received instructions from the Government for that day, or two days; I forget which. E. Fosbery,  
Esq.
141. And when the first lot of people were collected and sent to Quarantine, Superintendent Read was acting, was he not? He received instructions for these early patients for a day or two; but whether or not, he would know all about it, because he carried them out. 27 Sept., 1881.
142. But I want to know whether for that day or two Superintendent Read represented you? He did to a certain extent, because he was the senior officer in town.
143. *Dr. Manning.*] In every case the police have acted upon definite orders from the medical officers? I cannot say. Sometimes they had orders from the Treasury, but as a rule these orders came from Dr. Alleyne. In some cases I may have been put in motion directly by the Treasury, but generally by Dr. Alleyne.
144. Or by Dr. Goode, acting for Dr. Alleyne? No; I never received instructions from Dr. Goode.
145. So far as you are aware the police have never acted upon orders from the junior medical officers acting under Dr. Alleyne? I am not aware that they ever acted under the orders of any other doctor than Dr. Alleyne.
146. *Captain Hixson.*] Did it ever occur to your knowledge that any of the persons taken to the Quarantine Station objected to go, and that force had to be resorted to to get them out of their houses? I think a great many of them objected to go, but that is only what has been reported to me, which is as far as my knowledge extends. The police were directed to use all means of persuasion to induce them to go, and I am not aware of any case in which a person was removed absolutely against his will or by force.
147. *Dr. MacLaurin.*] Then the orders you gave were not to use force? I do not know that I ever gave any order; that was the general understanding.
148. *Captain Hixson.*] You never heard that there was any trouble in getting the people to go? Well, I heard that there was some little trouble with a Chinaman at Druitt Town. I saw in the papers that some force was found necessary, but that was the only case where anything approaching to force was resorted to, and that was reported to me. In that case it was after dark, and as the man would have escaped surreptitiously and spread the disease, it was the imperative duty of the police to prevent him from getting away. That was a very exceptional case. The officers on that occasion were Inspector Anderson and Sub-inspector Larkins.
149. And that is the only case that you know of where force was used? In which I ever heard of force having been used.
150. *Dr. MacLaurin.*] You never authorized the use of force? Most certainly not.
151. *Dr. Jones.*] I judge from your evidence that you are not aware that any special directions were received from the Treasury or Dr. Alleyne as to the manner in which patients should be removed to the Quarantine Station? Oh yes; but you must bear in mind that there was necessarily a good deal of irregularity in the means of communication on this subject. Sometimes the directions were given in writing and sometimes verbally, but each case was dealt with *per se*, and it is impossible to recall the instructions which might or might not have been given in each case.
152. There was no special direction given as to the way they should be taken across the water? No; the duties of the police ceased when they arrived at the wharf, and instructions were given by me that the utmost consideration and tenderness should be shown to all; that was most specially insisted upon.
153. Do you know who took charge of them when they leave the wharf? No, I know nothing of that.

Senior-Sergeant Lenthall, sworn and examined :—

154. *President.*] Will you tell us when your connection with these small-pox cases first commenced? The first case I had anything at all to do with was a man named Verdich, in Sussex-street. I had also to do with the removal of the Monahan family. Senior-Sergt.  
Lenthall.
155. Was that the first case with which you were connected? That was the first case, when I was on ordinary street duty. 27 Sept., 1881.
156. What was your first action in that case? Simply seeing to his removal—seeing from the outside of the house that he was properly removed, and giving instructions. Inspector Anderson was present at the same time in charge.
157. What mode was adopted for his removal? He was covered with blankets when he came down; he walked down the steps himself. I gave him, by the doctor's directions, some brandy, and he then got into the ambulance which was then being used for the removal of small-pox patients.
158. Did he express any objection to leave his home at the time? None; I believe he was perfectly willing to go. I may say that the first special connection I had with this business was on 13th August, when I took charge of the removal of small-pox patients, and all the duty in connection with it. On that day I was directed to place myself under the orders of Dr. Alleyne and Dr. Foucart.
159. What were the directions you received at the time you were specially told off to attend to this duty? To place myself under the orders of Drs. Alleyne and Foucart, and act under their directions.
160. And have you since assisted in the removal of other infected people from their homes? Yes; all that have been removed since have been removed under my directions, and under my personal supervision.
161. Have you heard much dissatisfaction expressed at their removal from their homes by any of them? None have been removed who have not previously expressed their willingness to go.
162. Is it the case that a number of persons infected with small-pox still remain in their houses, and have not been removed? Yes.
163. Do you know the reason they have not been removed? Simply because of their objection to be removed.
164. Do you know that persons who have been in contact with these people are also remaining in infected houses for the same reason? Yes; but of late, within the last fortnight or a little more, perhaps, a number of people have been removed from their houses to the camp at Little Bay, and even then only on their expressing their willingness to go.
165. Was there any person in the omnibus with Verdich? I do not think so.
166. Do you know what provision was made in the omnibus for his comfort? No, sir; it was dark, and I never saw inside the omnibus.

Senior-Sergt.  
Leuthall.  
27 Sept., 1881.

167. Do you know the course adopted with regard to patients sent away by the omnibus, or since that time? Since the formation of the Ambulance Corps, a special conveyance has been provided, and the ambulance men assist the patients or carry them, if necessary, and place them in this conveyance, keeping them well covered with blankets. This conveyance is a closed one, ventilated at the top; there are seats inside, and a wire mattress for the patients to lie on if they are too weak to sit up; if they are very ill one of the ambulance men rides inside the conveyance with them. They have been removed to Cowper Wharf, Woolloomooloo, and there placed on board the "Pinafore," the ambulance men assisting them and giving them over to the charge of Dr. Spencer; and in bad cases where attendance is required a nurse has been sent up with Dr. Spencer from the Quarantine Station. In any case where the patient has been weak I have had the bedding he has been using in the house removed with him, in order that he might lie comfortably in it, both in the conveyance and on board the "Pinafore."

168. Your duties cease from the time you leave them at the wharf? Yes; before I have left them I have always seen that the curtains in the cabin of the "Pinafore" were closed, and seen, from a safe distance, that they were comfortable before they left; and in most cases, especially lately, since the appointment of the medical staff, a doctor has also been present at the removal of patients, and certified to their being in a fit state to be removed.

169. *Capt. Hixson.*] Did you ever know patients to be put into open boats to be sent down to the Quarantine Station? Never, since I have had anything to do with it.

170. *Dr. Jones.*] Do you receive any directions from the doctor as to the manner in which patients are to be removed? None that I can remember.

171. *Capt. Hixson.*] Then, so far as you know, all the patients that have gone to the Quarantine Station have gone down in the "Pinafore"? Yes.

172. Have you known suspected persons—healthy persons—go down in an open boat? No, sir; all the patients I have had to do with have been very ill.

173. Have you known open boats to be used in cases of death—how are the coffins taken down? They have been taken on board the "Pinafore." I think there have been three cases of death that I have had to remove in the "Pinafore"—two children and a man who died in Sussex-street.

174. Have you ever known persons to go down in the same boat as a coffin? No.

175. So that the only person who could have been in the boat would be the boat's crew? Yes.

176. You know that some coffins have been taken down in an open boat? I do not know it.

177. From your experience, can you say whether any suffering or unusual inconvenience has occurred to people who have been under your charge in their conveyance to the wharf? On the contrary, persons who have since returned have expressed themselves very thankful for the treatment they received.

178. There have not been any stoppages or delays? None.

179. Then we are to understand that the arrangements for the removal of patients from their houses, taking them to the wharf and putting them on board the "Pinafore," and sending them to the Quarantine Station are now perfect? Yes.

180. Have they always been sent to Woolloomooloo? Yes.

181. Have delays never occurred in bad weather? No, sir; I have had the order for removal countermanded on more than one occasion on account of the inclemency of the weather.

182. Have the removals taken place during night-time? Not lately; they used to be removed at 5 o'clock in the morning, but now they are generally removed more towards mid-day—about 10 or 11 o'clock.

183. Will you explain to the Commission how the conveyance of patients down to the "Pinafore" is managed. You get your instructions, and how are they carried out? I generally get instructions from Dr. Roberts that a patient is to be removed from some infected house, and Dr. Alleyne is communicated with, who gives directions for the "Pinafore" to be at an appointed time, of which I am informed, at the wharf. I then arrange to have the ambulance men in from the station at Botany with the conveyance at the house in sufficient time to allow us to get the patient down to the wharf to meet the "Pinafore." A doctor is present and visits the patients, generally one of the medical staff, told off, I suppose, by Dr. Roberts, and I am also present myself, and I then see that the men carry out the doctor's orders in covering up the patient and removing him as I have stated.

184. What part does Dr. Spencer take in it? He takes charge of the patients on board the "Pinafore."

185. He goes up in the quarantine boat and takes charge of the patients at the wharf? Yes, and accompanies them to the Quarantine Station.

186. *President.*] Have you ever heard of persons being removed from their houses by force? Certainly not.

187. In no case? In no case; and I have heard the very reverse.

188. *Dr. Manning.*] Had you the removal of a man named Hughes? No.

189. You have stated that you had instructions to obey the orders of Drs. Alleyne and Foucart? Yes.

190. Have they given you verbal instructions in each case? Yes, in each case as it occurred; in fact I have gone to Dr. Alleyne generally and he has arranged with me what to do.

191. So that you had definite orders from Dr. Alleyne as regards the removal of each patient? Yes, until Dr. Roberts took charge.

192. And you have never acted on the orders of the junior medical officers, or the medical staff now employed, as to the removal of patients? As to removal, certainly not.

193. *President.*] Do you know whether patients have been kept waiting any time at the wharf for the "Pinafore"? Not more than a quarter of an hour or twenty minutes on one occasion; that is the greatest delay that has ever occurred since I conveyed patients down to the wharf.

194. Was any reason given for the delay at that time? The master said he had been delayed in starting away from the Quarantine Station.

195. *Capt. Hixson.*] During that delay what was done with the patient? He just remained in the conveyance. A man was inside with him attending to him, and he was lying down as comfortably as he would have been in his bed.

196. He was not taken out of the ambulance conveyance? No, the doors were not opened till he came alongside.

WEDNESDAY, 28 SEPTEMBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPT. HIXSON,
	MR. STREET.	

JOHN RENDELL STREET, Esq., IN THE CHAIR.

William Henry Goode, Esq., M.B., sworn and examined:—

197. *President.*] Did you act as *locum tenens* for Dr. Alleyne during his temporary absence from his duty in June last? Yes, I did duty for Dr. Alleyne. Dr. Goode.
198. For how long; on the 15th, 16th, and 17th June, was it not? I cannot state the dates positively, it was about that time. 28 Sept., 1881.
199. Can you inform the Commissioners what was the nature of any advice which you tendered to the Government during the time you acted for Dr. Alleyne—I mean with reference to sending people out to the Quarantine Station, and the treatment of small-pox patients? I did not advise very much upon that. It was the time that Rout died, I think; I went down to the Quarantine Station; I did not land there, and gave instructions to Mr. Walsh, who was in charge of the "Faraway," to send in a requisition for whatever he wanted, and told him that some patients were about to be sent on board the "Faraway" and that he was to send a requisition for any medicines or anything he wanted. I particularly asked him if he wanted any wines or stimulants, and if so to send for them. I also advised him to get rid of some Chinamen who were in the "Faraway," patients who were convalescing from small-pox; they were sent to the Quarantine ground, and the ship got ready for other patients. Afterwards I went with Superintendent Read to see about arrangements for burying Rout, and got quicklime for the disposal of the body; and I also sent a policeman with a requisition for medicines to Senior, the chemist; this requisition I believe had been approved by Dr. Alleyne. When I went down that day I saw Mr. Carroll, and some few persons who had been in contact with sick persons had already arrived at the station; and as I came away a steamer passed me with a lot of bedding, clothes, tents, and other things for about fifty persons. I will not be particular as to the date; that was the first batch.
200. Did Mr. Carroll make any representation to you as to the want of preparedness at the Quarantine Station for the reception of these people? Not that I recollect; I told Mr. Carroll where the sick were to be put.
201. I mean more particularly with regard to stores, cooking utensils and so on? What he said, I think, was that some of the things that were being sent down he had already on hand; but it is so long ago that I forget exactly what he said.
202. Mr. Carroll did not make any particular objection to the people coming before he was ready for them? No; he did not say anything about that to me.
203. He did not say that the people would suffer from the want of any preparation for their necessities? No; anything he said to me I reported to Dr. Alleyne; but I am not aware that he asked me to send down anything particularly, except medicines. The requisition was sent from the "Faraway" to Carroll and copied out by him.
204. You were present at the meeting held at the Treasury on the 16th June? Yes.
205. On that occasion did you give the Government any advice respecting any persons specially to be sent down there—patients or others? I remember there was a sick Chinaman, Won Ping, and I think I recommended that he should be sent down.
206. Did you advise the Government respecting a man named Hughes, that he should be sent down? I do not remember Hughes by name.
207. He was sent down on the 17th, the day after the meeting at the Treasury? If the case had been reported as a case of small-pox I have no doubt I recommended that he should go down. I do not remember the man by name.
208. Did you make any recommendation that Dr. Caffyn should go down? I recommended that Dr. Caffyn should be employed to visit suspected cases in town—that he should be retained in town to visit people suspected of having small-pox. Dr. Clune too was mixed up with the small-pox business, and Superintendent Read reported at that meeting that he could not be found. I recommended them to find out where he was, and I am not certain that I did not recommend that he should be employed in the same duty as Dr. Caffyn, to visit cases that were reported to be cases of small-pox in Sydney.
209. Did you make any recommendation that Dr. Clune should be employed at the Quarantine Station? I am not certain; I think I recommended that both of them should be employed as I have stated, and that as they had already seen small-pox cases they should be retained to verify such cases. I did not recommend that they should be sent to the Quarantine Station as infected persons, but that they should be employed in visiting persons reported to be suffering from small-pox, out of quarantine.
210. On the occasion of your visit to the Quarantine Station did you give Carroll any special instructions with regard to the care of these people? I told him that the Chinaman from Waterloo was to go on board the "Faraway," and I gave him Dr. Alleyne's instructions about the ground. I did not know much about the ground myself. I told him where the people who had not small-pox but were supposed to be infected were to go, and I told him about the number I thought were coming down. I may say that at the meeting at the Treasury it was decided that provisions, clothing, and tents for fifty persons should be sent down.
211. *Dr. Manning.*] At the meeting at the Treasury did you recommend the use of the Quarantine Station for small-pox patients? No.
212. Or did you as Dr. Alleyne's representative concur in its being so used? No; I was under the impression that all the sick would go on board the "Faraway." I did not know that any persons would ashore there.
213. *Dr. MacLaurin.*] Then I suppose it was assumed that the Quarantine ground was the only place that could be used for the reception of small-pox patients? I did assume that. I did not know that any other place was thought of. I thought the "Faraway" was going to be used for both male and female patients afflicted with small-pox; in fact I gave Walsh instructions about a woman that I heard was going down that night.
214. Do you know how long Walsh had been in the "Faraway" when you went down? No.

- Dr. Goode. 215. *President.*] How long had these patients been in quarantine at the time of your visit? They could not have been there long, very likely not an hour.
- 28 Sept., 1881. 216. *Dr. MacLaurin.*] That was the day after the meeting at the Treasury? It must have been the same day.
217. The first patient went on the 17th? But these people were not patients.
218. *President.*] Did your connection with the small-pox business cease when Dr. Alleyne returned to his duty? Yes.
219. And you have had no further connection with it since? No.
220. *Dr. MacLaurin.*] You did not recommend that Dr. Clune and Dr. Caffyn should be detained at the quarantine station? No; I did not recommend that they should be sent to the station as patients or suspected persons, but that they should be kept in Sydney to verify supposed cases.
221. *Dr. Jones.*] Why was it necessary that Dr. Clune should be found if he was not to be sent down? In order that he might be kept under supervision.
222. Not with the view of sending him to quarantine? No.

William Oliver Hopkins, Esq., Superintendent and Inspector of Stores, sworn and examined:—

- W. O. Hopkins, Esq. 223. *President.*] Have you been required to supply any stores or provisions to the Quarantine Station since the outbreak of small-pox? Yes.
- 28 Sept., 1881. 224. From whom did you receive your orders? In the first instance, for the first supply, from the Colonial Treasurer.
225. And afterwards? After that, by requisitions from Dr. Alleyne.
226. Are you prepared to give the Commissioners a list of the stores supplied to the Quarantine Station from the 16th June to date? I will furnish a list. (*Appendix D.*)
227. Are you aware that any delay at any time took place in forwarding these stores, after the requisitions came in? No; in nearly every instance I have personally attended to the requisitions, and sent the goods to be supplied within perhaps twenty-four hours, or the next day.
228. Do you know whether any stores had been sent to the Quarantine Station prior to the 16th June, the day on which the people first went down? I have no list of the goods supplied previous to that date.
229. Are you in the habit of receiving periodical returns of the stores in stock at the Quarantine Station? No, I am not.
230. Are you able to give us any information as to what supply of stores is usually kept there? No, I cannot give you the information.
231. Have you ever inspected them? No.
232. *Dr. Jones.*] You have no idea what stores were there prior to this outbreak? No.
233. *Dr. Manning.*] Have the supplies of medical comforts, wines and spirits, been ordered through you? Only in the first instance, on the 16th June I sent down a small quantity of brandy and port wine.
234. Then what other articles were supplied besides brandy and port wine? A full supply of provisions.
235. Sago and oatmeal and those sort of things? Yes.
236. Can you tell me how the provisions have been supplied since that time? No.
237. *Dr. MacLaurin.*] Can you tell us in what way the stores are expended by the superintendent? No, I cannot say.
238. Has there been any check on the expenditure of goods at the Quarantine Station at all? Not that I am aware of.
239. *Dr. Manning.*] Can you tell us if any delay occurred at any time in procuring articles of special sizes or special kinds? No, I am not aware of any delay. I think I may safely say that all the clothing has been supplied within 24 hours from the date of the receipt of the requisition.
240. *Captain Hixson.*] Have you heard any complaints about the quality of the things that have been sent down? No official complaints; rumours have reached me through the papers.
241. Then the only knowledge you have of anything of the sort is from what you have seen in the public papers? Just so: I am quite sure no grounds of complaint have existed so far as the quality of the things sent down is concerned, because I personally selected them myself. They have comprised purchases from the best houses in town, Farmer's, Prince, Ogg, & Co., Bull, Price, & Co., Jamieson, Hordern, and David Jones & Co. It has just occurred to me, in reference to Captain Hixson's last question, that a complaint did reach me that some sheets were too coarse; but upon reference to the requisition I find that the word "coarse" was used.
242. Did you receive any special orders with regard to the supply of articles to the Quarantine Station from the Treasury? In the first instance, on the 16th June, the Treasurer instructed me to prepare a list of provisions and to be somewhat liberal in the supply, not to adhere to any ration scale; and subsequently I received from the Treasurer verbal instructions to let the supplies be of good medium quality, or the best of their kind.
243. And is it your opinion that the provisions and stores have been supplied liberally or otherwise? So far as my department is concerned I think the supplies have been quite lavish; the invoices that have been received up to the present time come to £1,200, and there are more to come in yet. That is exclusive of provisions since the 16th June.

Stephen Mannington Caffyn, Esq., M.R.C.S. and L.R.C.P., sworn and examined:—

- Dr. Caffyn. 244. *President.*] Your first connection with these small-pox matters seems to have been your attendance on the Rout family in June last? Yes.
- 28 Sept., 1881. 245. You saw Rout on the 14th June, did you not? Yes. I am not quite sure about the date, but I saw him first.
246. What was your reason for calling upon him? I was in Sydney for the day, and I called upon Dr. Alleyne, whom I had known ever since I came to the Colony. He was very busy when I called, and pointing to a lot of letters before him said, "See, I have got all that to attend to." One of the letters was not opened; it was from Dr. Clune, about a case of small-pox. I said, "Shall I go for you?" and he asked me to look after the case for a day or two, which I did, and visited the house.

1103

247. And on the following day you visited the house and vaccinated the persons in it? No; I went to the house and supplied them with provisions each day until the day I was quarantined. Dr. Caffyn.
248. Will you tell the Commissioners the mode in which the intimation was conveyed to you that you were required to go to quarantine? I saw Dr. Alleyne, and he asked me to take a message to Superintendent Read with reference to some matter, which I forget now. I went to the Police Station and a reporter from some paper came up to me and said, "Have you heard that you are to go to Quarantine?" That was the first I heard of it. I thought it was a mistake, but he assured me that it was quite true. I immediately went back to Dr. Alleyne and asked if it was true, and he said, "Yes, I don't see how you can get off." I then went to Superintendent Read and found him in George-street, in front of an undertaker's. I asked him if he knew anything about my going to Quarantine, and he said "Yes," and turning round to some one I did not know, added, "This gentleman will tell you all about it." As soon as my name was mentioned this other person flew across the pavement and ordered me off in the most rough way, and said if I did not take myself off he would give me into the custody of the police. I explained to him that I was quite clean and had no small-pox about me, and he told me I was not to dare to speak to him again. I turned to Superintendent Read and asked him who he was, and Superintendent Read said he was the acting representative of the Government in this Colony. He said if I did not prepare at once to go to the Quarantine Station he would have no more nonsense but give me into the custody of the police and have me sent to the station at once. 28 Sept., 1881.
249. Did you hear who this gentleman was? I heard it was Mr. Eagar. I went back to my lodgings, and afterwards went to Dr. Clune and asked him if we were to go into Quarantine, and he said he had just had a message and we were not to go that night, but we should be called upon to go the next morning and we could go to bed and have a good night's rest. I went to bed, and about 11 o'clock I heard a loud knocking at the door, and a constable called out that the boat had been waiting two hours at the wharf. I went down, and between 11 and 12 o'clock went on board the "Pinafore."
250. Do you consider that you were forcibly removed to the Quarantine Station? Oh, yes. I had no option in the matter.
251. *Dr. MacLaurin.*] What day was it on which you had the interview with Superintendent Read and the other gentleman? I think it was the 16th, the day that Rout died.
252. *President.*] On your arrival at the Quarantine Station did you receive any instructions that you were to take charge of the healthy persons there? Not upon our arrival. We waited till a quarter past 1, and were then shown, into the hospital enclosure, the whole of us, into an empty house. We managed to get a couple of blankets, which were wet through, and a mattress, and we then extemporised a bed, and got to bed about half-past 2 o'clock. I had no instructions in the morning as to what I was to do. I did not know who was in charge and who was not until Dr. Alleyne came down on the following day, the 18th, the second day after our arrival. Then Dr. Alleyne found a mistake had been made, and that the sick and healthy people had been placed together.
253. After that did you receive any instructions? Yes; that I was to take charge of the healthy people, and leave Dr. Clune to attend to the sick people in the enclosure.
254. From whom did you receive those instructions? From Dr. Alleyne, verbally.
255. What portion of the building was set apart for you to reside in? A little two-roomed cottage at the extreme north end, marked "Doctor's Quarters," on the plan (*referring to plan*).
256. About how many persons did you find at the station on your arrival there, do you remember? I am unable to say. Some more came the next morning. We did not see any of the people the first night, we simply got our luggage up as well as we could.
257. Who went down in the steamer with you? Dr. Clune, Mrs. Rout and family, Mr. Hughes, the Druitt Town Chinaman; and behind the steamer a boat was towed, in which was a coffin, and four drunken men sitting on the top of it.
258. *Dr. MacLaurin.*] Who were the four men? Four undertaker's men, sent by Shying.
259. *Captain Hixson.*] Did these men who you say were drunk behave in an unseemly manner? Yes, they behaved in a terrible way. They refused to carry the coffin; they behaved very badly, and in the presence of the wife of the deceased. Ultimately, I believe, the men from the "Pinafore" carried it up.
260. This came within your own knowledge? Yes; I saw it.
261. Have you any idea how the men were made drunk? I know that spirits were given to them because they had an unpleasant duty to perform.
262. Do you know whether there was a difficulty in getting persons to act in that capacity? I believe there was some difficulty in getting them.
263. In fact there was a scare about small-pox? Yes, but some of those men were very useful afterward.
264. *President.*] What was the greatest number of people you had charge of in your portion of the ground? Twenty-six I think was the greatest number.
265. Can you inform the Commissioners what steps were taken to provide for the necessities and comforts of the people in the Quarantine ground? Provisions came down in the morning, and the police had the distribution of them. I must say there was a great lack of everything in the way of comforts, in fact there was nothing of the kind. I can best give you an idea of it by telling you that my own food was cooked on an old piece of iron hoop which we transformed into a grid-iron; that was an index to what we suffered for three months.
266. Had you a sufficiency of food? Yes, of the kind.
267. *Captain Hixson.*] Did you ever remonstrate with any one about it? Yes, but there was always a fight about it. It is difficult to give you an idea of the difficulty in getting things. You had to be very friendly with the persons to get anything; absolute requirements were not attended to.
268. *President.*] Did you make any complaints about it? I wrote many telegrams, but they were never sent.
269. What did you do with them? I gave them to the telegraph operator.
270. *Captain Hixson.*] What did he say to you? He said, "All right; I will take them to Mr. Carroll."
271. And who do you think stopped them? Well, I suppose Mr. Carroll; he was entrusted with the duty of sending them.
272. To whom did you telegraph? To Dr. Alleyne, four or five times a day at one time. I was very ill for about a week; in fact I hardly thought I should live and I telegraphed to him to that effect, and asked him in the strongest way I could to let me out, and I am sure those telegrams never reached him, because I have known him personally for a long time, and I am quite sure he would not have disregarded such appeals.
273. *Dr. Manning.*] Had you any interview with Mr. Carroll? I saw him every day. 274.

- Dr. Caffyn. 274. Did you remonstrate with him about the insufficient provision for your comfort? Yes; I constantly pointed it out to him. Upon one occasion the head of the police there came to me and told me that the grave-diggers were walking about among the healthy people in the same clothes they had on when they had buried the dead. He said his men objected to this. I went to Mr. Carroll and mentioned this to him, and he said, "Oh yes, I dare say they are." "Well," I said, "That is not right," and he said, "Why don't you alter it then?" I said, "It is not my duty, I have not the charge of the clothes." Then he said, "Why don't you report it to Dr. Alleyne?" I said, "You have dozens of suits; why not supply them; I can only report the matter to you?" and he said, "Report it to Dr. Alleyne." I then sent a telegram to Dr. Alleyne as follows:—"The two grave-diggers want two suits. Are they to have them from the store, or will you send them. Mr. Carroll will not give them to me?" I took this telegram into the store, and it was taken down and shown to Mr. Carroll. Mr. Carroll tore it up and said, "Doctor, take two suits and say no more about it." I said, "That is all I want," and I took two suits and then went back and got shirts, and I made the men have a bath and put them on. That was at 11 o'clock. At 2 o'clock, Dr. Alleyne came down to the small bay, and saw Mr. Carroll. At 4 o'clock I had a telegram worded in this way:—"On no pretence whatever are you to go into Mr. Carroll's store again; if you do you will be re-quarantined." 275. *Captain Hixson.*] Who was that from? From Dr. Alleyne to me. I thought it was a very hard message to send to me, because Carroll's store was where we went to get our letters; it was the only place we could go into on the beach; so I went down to ask the reason of this extraordinary telegram, and at last I asked Mr. Morgan, the telegraph operator, who was on very confidential terms with Mr. Carroll, and he said Mr. Carroll had reported that I had stolen two suits from the store, and he said he was perfectly sure of it. I went to Carroll and asked him if he had done so, and he said he had. I said, "But it is a lie," and he said he did not care about that, he would say I did. I was very angry, and I telegraphed to Dr. Alleyne to say, "The suits Mr. Carroll mentioned to you were given to me by his own hands for the grave-diggers." This telegram was not sent. How I know it was not sent is, because when I got to Sydney, Dr. Alleyne sent for me and I asked him about this matter, and that was the very first explanation he had heard upon the subject. So that he could not have received that telegram.
276. *Dr. Manning.*] Was Mr. Carroll always discourteous to you? Yes, always, until the last two or three days.
277. Can you tell us the date of that telegram? No, I am afraid I cannot.
278. Had you any personal communication with Dr. Alleyne after the first occasion? No, I telegraphed to him several times, and said I had particular business, about which I wished to see him. My real business was to get out, and I was sure that if I could see him he would let me out, but I never could see him at all. Then I asked Mr. Carroll, and urged him in every possible way just to let me see Dr. Alleyne once, but he never gave me the opportunity.
279. Were the police under your orders? No.
280. *Captain Hixson.*] You have told us that you landed at the Quarantine Station at about a quarter-past 1 on a certain morning? Yes.
281. And that there was no one there to receive you or to give you instructions as to what you were to do? No.
282. And that you got a bed? A mattress and two blankets.
283. Whom did you see the next day? The police at 10 o'clock brought us some coffee, and we saw Mr. Carroll I think once or twice during the day.
284. And what occurred the next day? The next day Dr. Alleyne came down and I was called out, and was the only person who went to see him.
285. Did you see Dr. Alleyne after that? No, I did see him once after that during my stay, but only for a second, and I had no opportunity of saying what I wanted to say to him.
286. However the state of affairs is, as you have mentioned, that on the third day after your arrival you saw Dr. Alleyne and then he told you that you were put in charge of the healthy people? Yes.
287. And how long did your interview with him last? About half an hour.
288. And then, when did you see him afterwards? I saw him once during my stay there. I asked the police to let me know if Dr. Alleyne came down, and then I went up to my house and sat down to read. I could not see from my house the place where the boats come in. The policeman I had asked to tell me, called out, "Run and tell Dr. Caffyn that Dr. Alleyne is coming." The man who brought the message made a mistake and told me Dr. Alleyne wanted me. I was so delighted that I ran down and said, "Where is he?" and the policeman said, "He is at the little Bay." We then ran down through the scrub as fast as possible, and when we came to the place Dr. Alleyne said to me, "How dare you come here, sir? If you break orders the people under you will do the same." I tried to explain, but he would not hear me, and said, "Go back to the store at once and I will follow you." He followed me and came over to the station, and just asked me one question about something he wanted to know, and I lost the only opportunity I had of saying what I wanted to say about my treatment.
289. So you only saw Dr. Alleyne on this one occasion, after he had put you in charge of the healthy persons? Yes.
290. To whom do you attribute the neglect from which you appear to have suffered while you were there? I do not know. I do not think Dr. Alleyne knew one half or a thousandth part of the suffering that was being endured there.
291. Then who was responsible for it, do you think? I think Mr. Carroll had far too much power.
292. In your capacity as medical officer in charge of the healthy people, if they had any wants which required to be supplied to whom did you apply? To Mr. Carroll.
293. And were your requirements met? Yes, they consisted chiefly of jam and little things of that kind. Sometimes I got them and sometimes I did not. There was a lot of jam, and during the last fortnight it was supplied to the people at my request. Before that time they had very few wants. There was no sickness and they had simply to take their share of the food that came down. There were three or four cases of debility, and I gave them a bottle of beer now and then, which they appreciated the most.
294. *Dr. MacLaurin.*] But you got what you required for them without difficulty? Oh yes.
295. *Captain Hixson.*] When you spoke of the difficulty you had in getting clothes for the grave-diggers I was led to believe that you had the same difficulty in getting other supplies. Was that the case? No. I had all the spirits and beer that I liked to order, always. It was not a large supply that we wanted, but anything in that way that I ordered I always had,

296. I suppose at the interview you had with Dr. Alleyne he gave you instructions? Yes, at the first interview. Dr. Caffyn.
297. What was the nature of those instructions? I think they only consisted of vaccinating the people and looking after them. 29 Sept., 1881.
298. Do you mean something to this effect: That Dr. Alleyne had a consultation with you as to the necessities and comforts of the people under your charge? That would imply more than I want to say, because Dr. Alleyne only said, "You will take charge of the healthy people and have them vaccinated."
299. *President.*] What provision was made for attendance upon you. Was a servant allowed you? Yes, a woman was allowed to cook for me.
300. And had she the necessary cooking utensils? No, that was a sore point with us there, she had no proper utensils.
301. Did you ask Mr. Carroll for them? We were constantly applying to him and could not get them. During the whole time I was there my meat was cooked on an old piece of iron hoop.
302. To whom did you make your requisition? To Mr. Carroll.
303. *Dr. Manning.*] You had no difficulty in getting provisions, but you had a difficulty in getting clothing and cooking utensils? Yes.
304. If any of these people wanted clothing or stores did they apply to you for them? Yes.
305. Mr. Carroll did not issue them to the people except through you. Do I understand that? Sometimes he did and sometimes not; there was no rule about that.
306. It has been stated that one towel had to last a man from 75 to 76 days at the Quarantine Station. Are you aware that there was a want of towels there at that time? I sent an order for a towel and Mr. Carroll sent me a piece of coarse sacking—a piece of a bag.
307. And were you enabled to get towels? Yes. When I complained about it he gave me some beautiful towels.
308. Did any person complain to you that he had been kept for 75 or 76 days with one towel? Every day I was receiving complaints of that kind.
309. And when you mentioned these complaints to Mr. Carroll what did he say? He simply declined to give them.
310. Did he say he had not got them? Sometimes, and sometimes he said he would not give them without an order from Dr. Alleyne. It appeared to me that Mr. Carroll looked upon the stores as if they were his own private property, and had a miserly love for them. You could get nothing out of him except by dragging it from him, as it were, by main force. On one occasion, when Hughes swam ashore, he was without clothing of any kind until I begged some from the people on the hill, and gave him also some of my own. The man himself, and the police and I, asked Mr. Carroll for clothing for him, and he declined each time to supply it, although he had abundance in store.
311. *Dr. Jones.*] When you applied to Mr. Carroll for things was there a flat refusal on his part to supply them? I do not remember a flat refusal but I remember that I could not get them; there was always some excuse or other.
312. During your first interview with Dr. Alleyne was anything said about compensation to you? Oh, yes; I was assured that I should be fully compensated for my loss.
313. And you considered yourself, I suppose, from that moment in the Government service? I was, *volens volens*.
314. You could have declined to act? I beg your pardon; Dr. Clune and I were told that if we refused to act we should be kept there all the same.
315. *President.*] Did you communicate any of your requisitions to Dr. Alleyne direct, either by telegram or otherwise? Never otherwise; I had no opportunity. I think not; I communicated direct with the Treasury, but not with Dr. Alleyne, except, I think, once or twice, when I wanted some medicines.
316. You did not communicate direct to Dr. Alleyne that you were short of cooking utensils or furniture? I sent many telegrams complaining of the general want of comforts, and asked to be allowed to go into one of the houses that were well furnished. My house was very uncomfortable and I thought I might have had the use of one of the others, which were fitted up with every comfort in the way of beds, carpets, and so on, but I was not allowed.
317. Whom do you blame for not being allowed to occupy one of those houses? I do not know. Mr. Carroll, I presume, who had charge of them, because they have been thrown open since.
318. You say you have sent some requisitions to the Treasury in some instances; were they answered? Yes; they were attended to at once.
319. Were all the requisitions you sent to the Treasury supplied at once; were there no cases of refusal or delay? I do not remember any case of refusal. I made no complaints about my own wants, only for those of the people. I knew it was useless to telegraph any complaint.
320. You did not send a requisition for cooking utensils? No.
321. Did you know that they were on the ground? Yes, I knew they were.
322. *Dr. MacLaurin.*] Did you send a formal demand to Mr. Carroll for cooking utensils? Yes; he made some excuse, and in the long run refused.
323. Were there cooking utensils for the people in their cooking-house? Yes, but they were not well supplied; there was a great want of cooking utensils, and people had to make shift—what I mean is, such as cooking several things in the same saucepan, and so on; they were always complaining to me about it.
324. There were too few saucepans in the cooking-house? Yes.
325. Were there saucepans in the store? Yes.
326. Did you point out to Carroll that there were too few saucepans in the cooking-house for the people? Yes, now and then. They would get one occasionally, when there was a good deal of fuss about it.
327. *President.*] Do you know whether these telegrams to Dr. Alleyne were ever sent? I cannot say. I did not like to ask him afterwards. My impression was that they did not go. Sometimes I sent several in the course of the day imploring to be released.
328. *Dr. MacLaurin.*] Was anything said to you about restricting your use of the telegraph wire? We were told that all telegrams should be shown to Mr. Carroll, and if approved of by him would be sent. That was the only restriction I heard of.
329. Was this told to you by word of mouth or in writing? By word of mouth.
330. By whom? By Carroll, and also by the telegraph operator.

- Dr. Caffyn. 331. *Dr. Jones.*] Do you know of your own knowledge of any patients having been taken to the Quarantine Station in open boats? I am not aware of any.
- 23 Sept., 1881. 332. *Captain Hixson.*] With regard to your residence there, how long were you there altogether? About sixty-three days, I think.
333. Were things as uncomfortable there during the latter part of your stay, or did they improve? They improved a little. I was not there after the great change was made.

THURSDAY, 29 SEPTEMBER, 1881.

Present:—

DR. JONES,	DR. MANNING,
DR. MACLAURIN,	CAPT. HIXSON,
MR. STREET.	

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Lucy Osborn, Lady Superintendent, Sydney Infirmary, sworn and examined:—

- Miss Osborn. 334. *President.*] You received some communication, Miss Osborn, from the Government with reference to matters connected with patients afflicted with small-pox at the Quarantine Station? Yes, the Government applied to me at the first outbreak to know if I could supply them with nurses for persons really afflicted with small-pox; and I said yes, and immediately prepared to do so. I think it was on Saturday, the 18th June, that I sent them the first nurse, Mary Meyler.
- 29 Sept., 1881. 335. She went down on Saturday, 18th June? Yes.
336. Have you supplied any other nurse since then? Yes, the following Saturday, there being more cases, I was asked to supply another nurse as night nurse.
337. From whom did you receive this requisition? From Dr. Alleyne; he always came or wrote to me.
338. When did this second nurse go? On the following Saturday, 25th June, I think.
339. What was her name? Louisa Hollis. With the first nurse I also sent a servant, Louisa Wilson; it was understood she was to do the cooking and washing for the patients and nurses.
340. Did you receive any further requisitions from the Government with reference to the supply of clothing or any other articles for them? I was especially requested to send with nurse Meyler, and Louisa Wilson who went with her, bed-clothes and other articles, and a few things for the patients. But they were chiefly things the nurses would be likely to require. We thought perhaps there would not even be food for the nurses, and I supplied them with enough to last them two or three days; it was on Saturday, and they would not be able to get much on Sunday. I gave them such things as crockery, knives and forks, sauce-pans, and things of that kind. Some of these were supplied out of our own stock, which I did not put down, because they were on hand and were not all new. It was done in a great hurry, and we sent whatever we could. I sent also three ponchos, or rather three blue blankets, which nurse Meyler was to make into ponchos, as it was necessary to have something to wrap round the patients in cold weather. I have brought with me a list of the different articles supplied to the Quarantine Station by Dr. Alleyne's order. (*Appendix C.*)
341. Does that list contain the whole of the articles sent to the Quarantine Station? Yes, except some trifles I supplied to the nurses. I supplied them just as Dr. Alleyne sent for them.
342. I suppose you were in frequent communication by telegram with the nurses? Yes, I had at least one telegram every day. When Mrs. Guildford was there and Hughes' child I used to get two.
343. Did they complain of the thing in any way? No. I have had no complaints from nurse Meyler, except in reference to Dr. Clune, and I cannot say that was a true complaint. Her first complaint was that he did not go into the room to see the patients when they were very sick, and she was very desirous of his assistance. Then she said she had too many patients who were convalescent, and she had nowhere to put them, and she wanted to use the large building there is there—a kind of shed.
344. Was any special reference made to Dr. Clune in her telegram? Well, I had a great many telegrams backwards and forwards. Nurse Meyler did not exactly make a complaint. Dr. Alleyne heard things, and came to me and asked me to get it out of her, and I had in fact to drag it out of her.
345. You do not remember the exact terms of this particular telegram from the nurse? No, I do not think I do.
346. Have you seen the Quarantine ground at all—do you know the position of the buildings upon it? Yes; I have been there. A portion of the long shed was occupied by Dr. Clune for himself. (*Witness indicated on the plan submitted to her the position of the building referred to.*)
347. *Dr. MacLaurin.*] What you mean by the long building is what is called on the plan the male hospital? Yes, I think it must be.
348. Do you know if the other portion of that building was occupied? No, I think there was nobody in it; the doctor had a servant, and I imagine he lived in that portion of the building.
349. And did nurse Meyler report to you that she had obtained possession of this building for the patients? Yes, afterwards she reported to me that much better arrangements had been made.
350. *Captain Hixson.*] Did you ever hear why Dr. Clune refused to let the patients go into that building? No; the nurse said he would not listen to her.
351. Did the nurse from whom you received the telegram request that she might be allowed to put the convalescent patients into that building? Yes; she said she asked Dr. Clune if she could put the convalescing patients there, and he would not listen to her.
352. Did you hear the grounds of his refusal? No; I do not know it.
353. *President.*] Did you receive any other complaint of Dr. Clune from the nurse with respect to any want of attention or any other matter except the giving up of this building? No. I was asked by Dr. Alleyne to find out from the nurse how much spirits they used, as he thought the supply for that portion of the ground was excessive; and as I object to the nurses taking any, I told nurse Meyler to be very careful what she said to me, and to state distinctly if they were taking any. From her answer I learned that when one of them was ill—either Hollis or Wilson—I had them revaccinated before they left Sydney—she had had a little wine, but none of the others had any, and since that time none had been used at all.
354. *Captain Hixson.*] Do you know whether an excessive quantity of spirits was used or not? I do not.
- 355.

355. Do you know what quantity of wines or spirits were supplied to Nurse Meyler for the use of patients in the infected ground? No; very little was used; the patients did not take it.

356. *President.*] What you mean is that the nurse reported to you that there was very little consumption of spirits and wine by the patients? Yes.

357. *Capt. Hixson.*] At the same time there was a complaint from Dr. Alleyne that there was an excessive quantity of wines and spirits used for this particular place? Yes.

358. *President.*] Was the clothing and bedding which you sent down of good quality or of coarse material? Dr. Alleyne's order to me was to supply the same description that we used in the hospital, and I did so in every case, except in that of pillow-cases. In the hospital we use linen pillow-cases, which last so much longer; but as these supplied to the Quarantine Station were not intended for lasting use we made them of the same material as the sheets. In every other respect they were made like the hospital pillow-cases.

359. Did Dr. Alleyne ask you to exercise economy in sending these things, or to send an abundant supply? No; he said, "Make them as comfortable as you can," always.

360. You sent down sheets, I suppose? Yes.

361. Were they of the same material as those used in the hospital? Quite as good as we had in the hospital; we sent to the same houses and got the same kind of twilled sheeting.

362. Had you any complaints of the quality of these things from anybody? No, none at all. You will understand that at first I was only supplying the people inside the enclosure, and had nothing to do with the people outside; but latterly Dr. Alleyne came to me and said there had been complaints about the sheets, and would I send sheets to Mr. Carroll. Before that I had always sent them addressed to Nurse Meyler, to the women's hospital in the enclosure, but afterwards I had to send them addressed to Mr. Carroll, so I supposed they were for the use of persons outside the enclosure.

363. The sheeting then which you sent you consider was suitable to persons suffering from small-pox? Yes. It was very soft, and such as would be used in any hospital. We supplied, in addition to the other things sent down, almost cart-loads of old rags. I went to all my friends up and down and begged everything they could spare.

364. *Capt. Hixson.*] You appear to have had frequent intercourse with Dr. Alleyne about these things? Yes.

365. Always, I suppose, on the subject of the wants of the Quarantine patients? Yes.

366. And what appeared to be the inclination of Dr. Alleyne—was it to make these people as comfortable as possible? Yes; he was always in a great hurry, and wanted me to send the things down before I had time to get them made up.

367. This nurse you have referred to—did she volunteer to go? Well, I don't think you could call it volunteering. I always say to a person I consider suitable, "There is such and such an appointment—will you take it?"

368. Then, if they did not actually volunteer they made no objection to go? Oh, no.

369. Did you think they were suitable for the duty you sent them to perform? Very much so.

370. Have you had any reason to alter that opinion? No.

371. *President.*] Did you have a list of the patients there? I was informed of the number from time to time, but not every day; it fluctuated very much.

372. Did you consider at the time you sent these things down that there was a sufficient supply of things necessary for the patients there? Yes, I think there was abundance.

373. Do you think that from any deficiency of sheets sent down it was necessary to keep any of the patients in blankets only? No; I am only speaking of the enclosure.

374. You do not know of anything of that sort in connection with the patients in the enclosure? Oh! no; because the nurse would have sent me word in a minute if there had been anything of that kind.

375. *Captain Hixson.*] Had you any difficulty in communicating with the nurse when she was there—was there any obstruction to your communication? No; it was rather awkward. The way it was done was this: Nurse Meyler would write down what she wanted to say, and then she had to read it to a person outside who would take it to the telegraph operator. This person does not write it down, but merely trusts to his memory, and in that way the messages become implicated.

376. Do you mean that this is done designedly? Oh no, I have no reason to think that.

377. *Dr. MacLaurin.*] Who was the person sent on such occasions to receive the message? I think a constable—any person who was convenient; Mr. Carroll I know sometimes did it; but afterwards Dr. Alleyne said he would see that the messages were written down.

378. *Captain Hixson.*] Did you ever hear of any scarcity of cooking utensils? Not in the hospital department.

379. Or comforts in the way of towels and things of that sort? No, I have not heard of any scarcity.

380. Did you hear of any complaints about the quantity or quality of food? No, not for the enclosure. I found when I went down with the first nurse—I took her down myself—that there was no milk except condensed milk. I thought that was a very bad arrangement, and when I came back to the Treasury I went and saw Mr. Kidman, the contractor, and told him he must supply cow's milk every day, and he said he would get it from Manly. Sometimes on Sunday they were short of milk, but that was remedied. That was the only thing complained of.

381. So that there do not appear to have been any complaints of an important character in this respect? No; I asked the nurses, after these reports appeared in the papers, whether they had been uncomfortable in any way, and they sent me most decided answers that they had been most comfortable.

382. *President.*] Did they say anything about the patients? Yes, that they had been well attended to.

383. That was the portion of the Quarantine ground of which Dr. Clune had charge? Yes.

384. *Captain Hixson.*] Did you know the number of the persons who were in this enclosure? No, not always. In the last telegram I had from the nurse she gave me a list of the persons who had left that morning, and ended with these words, "that leaves us with seven children in the enclosure." There were a great many more than that with convalescents as well.

George Read, Superintendent of Police, sworn and examined:—

385. *President.*] Can you inform the Commission what action you have taken in reference to the removal of patients afflicted with small-pox since the outbreak of the disease in June last? When the disease first made its appearance I both received and gave instructions on the subject.

Miss  
Osborn.  
29 Sept., 1881.

Supt. Read.  
386. 29 Sept., 1881

- Supt. Read. 386. Will you state, in the first place, the nature of the instructions you received? My instructions were to make every possible effort, so far as police action was concerned, to stamp out the disease, and to treat all small-pox patients with every care and consideration; to isolate all houses in which, from information communicated to the police, there was reason to believe that small-pox existed; and in carrying out instructions with regard to the removal of patients, to take every possible care to prevent them from coming in contact with any of the public.
- 29 Sept., 1881. 387. When did you first receive your instructions? Almost simultaneously with the outbreak of the disease.
388. You attended a meeting, I think, at the Treasury, on the 16th June last? Yes.
389. And I suppose your connection with the outbreak really commenced at that time? Yes; a day or two previous to that I took some action with regard to the isolation of premises.
390. Then can you inform the Commission what were the arrangements made by the police under your direction for carrying out these orders? I accompanied the Under Secretary for Finance and Trade to purchase an omnibus and horses, and the omnibus was used for the removal of patients until a better vehicle was obtained.
391. And were instructions given to treat the patients with consideration, or in the event of their declining to go into Quarantine, that they were to be removed by force from their homes? We were instructed to treat the patients with every care and consideration, but on no account were we to remove them without their consent.
392. So far as you know, was that practice carried out in all cases? It was. I only know of one exception—that of Constable Cook. He partly objected, not to go to Quarantine, but to go on board the "Faraway."
393. Was the same principle applied to those who might be called suspected persons, but who were not really suffering from the disease? I am not aware of any instance in which a person has been removed without his or her consent.
394. Do you remember the circumstances connected with the removal of a man named Hughes to the Quarantine Station? I remember his being removed.
395. Do you know whether his consent was obtained? Yes; he expressed himself willing to go to myself.
396. Who reported to you Hughes's condition, and the necessity for his removal to the Quarantine Station? The police reported to me that he was suffering from small-pox, but I cannot distinctly remember how the instructions came to me to send him to the Quarantine Station. Dr. Alleyne's instructions were sometimes given verbally to myself or some other officer of the police, or through the head of the department—the Inspector General of Police; but in no instance, as far as I can remember, was any patient removed to the Quarantine Station without Dr. Alleyne's instructions.
397. Can you tell us what medical gentleman set the police in motion with regard to Hughes? Dr. Caffyn certified that he was suffering from small-pox; it was upon his report that the house occupied by Hughes was quarantined.
398. *Captain Hixson.*] I suppose Dr. Caffyn did not give the instructions direct to the police? No, not in the matter of isolating the house. When a medical man employed by the Government certified that a person was suffering from small-pox we did not wait for instructions from Dr. Alleyne to isolate the house, because he might be at the Quarantine Station, and there would be considerable delay.
399. Were you aware that Dr. Caffyn was at that time acting as a Government officer? Yes; I had been in frequent communication with him.
400. Then what course would be adopted, when a house had been isolated, in dealing with the case altogether? We should wait for the instructions of the Government Medical Adviser before we took any further action than isolating the premises.
401. Then, was that the practice—that on the police having information of the disease existing in a certain house, the house was isolated, in the first instance, and further instructions waited for? Yes. Perhaps it is proper that I should say that when the disease first made its appearance, so far as I can remember, the question was never raised whether patients suffering from small-pox should be sent into quarantine or not. If they were willing to go, it was understood that they would be sent as a matter of course.
402. The public mind was somewhat troubled at the time—there was a great scare at the time, was there not? There was.
403. *President.*] Did you know that Dr. Goode was acting for Dr. Alleyne for a day or two, owing to Dr. Alleyne's being ill? I heard so.
404. Did you receive any instructions from Dr. Goode during that time? I do not think I did.
405. You received no instructions from him as to Hughes? No.
406. *Dr. MacLaurin.*] Do I understand you that it was the practice in all cases that were certified to be small-pox cases, to remove the patients to the Quarantine ground if they were willing to go, even although in some particular cases there might not have been special instructions from the Medical Adviser of the Government? No, I do not say that; it was understood that all cases should be sent, and the question was never raised whether they should be sent or not, but none were sent on police responsibility. The instructions of the Government Medical Adviser were, in every instance, first obtained.
407. *President.*] Do you know whether at the meeting at the Treasury on the 16th June, which you attended, any order was given that Hughes should be sent to Quarantine—was the case reported at that meeting as either a case of small-pox or a suspected case, and one that should be removed? I do not remember Hughes's case being mentioned at that meeting; it is possible, I was only there for a short time.
408. *Captain Hixson.*] The fact is that at that meeting the question was discussed whether the people should be sent or not, and the question arose as to how they should be sent, and as to the purchase of vehicles? I have no recollection of its being discussed whether they should be sent or not, but I distinctly remember that the best means of sending them was considered; not whether they should be sent, that seemed to be a foregone conclusion, but the mode of sending them.
409. *President.*] Had you any communication with Dr. Clune personally with reference to his going to the Quarantine Station? I do not think I had personally, but I sent him a message to the effect that it had been determined by the Government that he should go into Quarantine, and that he was expected to be at the Woolloomooloo Wharf to go down in the launch "Pinafore," and he was there accordingly.

410. Did you give any instructions to your subordinates with reference to his removal in the event of his refusing to go? I gave no such instructions, nor should I have presumed to do so unless I had been very explicitly instructed to do so by the Government. Supt. Read:  
29 Sept., 1881.
411. Then, so far as you know personally, there was no objection to go on the part of Dr. Clune? He made no formal objection, but I saw him on the wharf just before the "Pinafore" left, and he seemed unwilling to go, and seemed to think it a hardship and grievance.
412. *Dr. MacLaurin.*] Were you prepared to send him down against his will? I was not.
413. Was he told that there was any intention to take him down against his will? No.
414. Did Dr. Clune consent to go into Quarantine? I cannot say that he did; he went; that is all I know; unless the intimation given to him that the Government were determined that he should go to Quarantine, and that he was expected to go, might be construed into a consent on his part; he came to the wharf and he went on board.
415. Did he come by himself? Yes.
416. But he expressed himself unwilling to go? I cannot say that; he intimated that he regarded it as a grievance and a hardship. He did not say,—“I don't want to go,” in so many words.
417. *Dr. Jones.*] I did not clearly understand you whether you received any definite instructions from the Medical Adviser to the Government to take Hughes to the Quarantine Station or not? I do not remember, but I am quite certain that instructions must have been received either verbally or in writing by some officer of the police or by the Inspector General.
418. You do not know whether they came from Dr. Alleyne or from Dr. Goode? I think they must have come from Dr. Alleyne; I do not remember any from Dr. Goode.
419. *President.*] Who authorized you to send that message stating that Dr. Clune was to go to the Quarantine Station? I think the Under Secretary to the Treasury, Mr. Eagar.
420. Were those instructions communicated to you verbally or in writing? Verbally.
421. *Captain Hixson.*] The majority of the instructions given at that time—were they verbal or in writing? Verbal.
422. *President.*] Where were these instructions conveyed to you? At the Treasury; that was the day of the meeting at the Treasury. I was there on two or three occasions on that day, and I was informed, I think by the Under Secretary for Finance and Trade, that Dr. Clune would have to go.
423. *Captain Hixson.*] I suppose there were a great number of orders about the same time on the same subject, and it is difficult for you to remember? I could not be very distinct in my recollection of the subject. I had instructions about a great many matters on the same day.
424. *President.*] Had you any personal communication with Dr. Caffyn with reference to his being sent to Quarantine? I caused him to be informed that he would have to go.
425. From whom did you receive instructions to take that step? From the Treasury, but from whom I could not say.
426. You received no written instructions from any medical officer? No written instructions; but I am not quite sure that Dr. Alleyne himself did not inform Dr. Clune that he would be required to go.
427. But your instructions to inform Dr. Clune that he would be required to go were received from the Treasury? Yes, at the Treasury; but whether from Dr. Alleyne or the Under Secretary I cannot say. I remember that he was not at the wharf at the time he was requested to be there, and I had to send an officer to tell him to come to the wharf at once, as the steamer was about to leave.
428. Were you prepared to remove Dr. Clune by force in the event of his refusing to go? Most certainly not.
429. Do you think he understood that he would be removed by force if he objected to go? I cannot say.
430. He did not make any objection to you personally? No, except that he was evidently disinclined to go. From what he said I inferred that he did not like going.
431. Were your instructions, Mr. Read, to send these gentlemen down with or without their consent? I was not instructed to use any force; there was not the slightest intimation that any force was to be used.
432. And, having received instructions that they were to go into quarantine, you did not consider it part of your duty to send them whether they consented or not? No.
433. If they had said decidedly that they would not go? Then I should have left the matter and informed my superior officer. I should have used no force.
434. Do you think, with reference to patients generally, that every arrangement was made, as far as it was possible to make it, for the comfort of these people in their removal from their homes? In view of all the circumstances I do not think that anything more could have been done. It was not perhaps apprehended that the disease would spread to any very large extent, and we were sanguine that the steps we were taking would speedily stamp it out.
435. Were people taken from their homes in the night-time to the "Pinafore"? After dark, as late as 8 or 9 o'clock.
436. I think you are aware that the weather was very cold at that time? The weather was cold, but they were not removed in really rough weather. In two or three instances the removal was deferred in consequence of the state of the weather.
437. *Captain Hixson.*] Can you tell us why the hours of darkness were chosen in these instances? I understood that they were chosen mainly to avoid having a crowd about the patients when they were removed from their dwellings, and when they were placed on board the launch, so as to lessen the danger of infection.
438. *President.*] Do you know that people were kept waiting for any length of time at the wharf for the "Pinafore"? On one occasion I think there was considerable delay in the arrival of the boat; she was not punctual.
439. And where were the patients during that time? In the omnibus, and well wrapped up in blankets or rugs—I forget which. I know we supplied a large number of blankets and rugs from the police store for the purpose of keeping them warm.
440. *Dr. Jones.*] From your own knowledge, were any patients placed in open boats at the wharf, or were they all put on board the "Pinafore"? I think in two or three instances, where a considerable number of persons had occupied the same house with the patients, and were being sent down in the same boat, that the patients were put into a whale-boat and towed down.

Supt. Read, 441. The patients, not the suspected persons? The patients, I think, to the best of my recollection. There were two or three instances where that was done to separate them from the other persons.

29 Sept., 1881. 442. Do you happen to remember the names of the patients who were sent down on these occasions? I do not.

443. *Captain Hixson.*] So that the suspected persons were on board the "Pinafore," and the patients in the whaleboat? Yes, that is my recollection.

444. *Dr. Jones.*] Did you see the patients put into the whaleboat? I cannot remember.

445. *Captain Hixson.*] Was any medical officer present, do you remember, on those occasions? I think on almost every occasion a doctor was present. After Dr. Clune and Dr. Caffyn went to the Quarantine Station, although I was not at the wharf I was informed on several occasions that a doctor was on board.

446. So it appears from your impression that there was a medical officer present who sanctioned this proceeding? Yes.

447. You do not remember who it was? I cannot remember. I was only at the wharf on one occasion. My recollections are chiefly with regard to the instructions the police received from the Government Medical Adviser.

448. Do you know whether any suffering was occasioned by the transport of sick persons from their houses to the wharf to be conveyed to the Quarantine Station in the "Pinafore"? I received no complaint either directly or through any member of the police force.

449. You believe, then, that the people were transported in the most comfortable manner available? I think so. The omnibus was a fairly good vehicle; the springs were good, and it was driven slowly.

450. *President.*] Was any preparation made in it for patients to lie down if they required to do so? That was done in two or three cases. A mattress was laid down on the floor.

451. Was that on the occasion that the patients were kept waiting for the boat? I cannot remember.

452. *Captain Hixson.*] Were the horses that were used for this conveyance unfit for the work they had to do? Well, they were not by any means first-class horses; but I do not remember that they objected to walk on any occasion.

453. Did they ever jib? I do not remember that they did. One of them was rather an inferior animal, and I dare say he would if he had been by himself; but there were two horses, and there was not much difficulty.

454. *President.*] Were you at the wharf when Rout's body was sent down by the "Pinafore"? Yes.

455. Were not some of the undertaker's men who went with the body under the influence of drink? One of them I considered was considerably the worse for liquor, and he asked his employer for more and he got it.

456. *President.*] Did he give any reason? He said he would not do any more work unless he got it; that a certain promise had been made to him, and he insisted upon its fulfilment.

457. Then it appeared necessary to fortify these men with drink before they would go on with their duty? Yes.

458. *Dr. Manning.*] You did not personally superintend the removal of Mrs. Guildford? No.

459. *President.*] Did you on one occasion, in company with Mr. Eagar, meet Dr. Caffyn in the street, and hold any communication with him? I remember meeting him, I think in George-street South, when I was in company with Mr. Eagar, and we were making arrangements for the burial of Mr. Rout.

460. Can you tell us what took place on that occasion—what communication there was between yourself and Dr. Caffyn, or between Mr. Eagar and Dr. Caffyn, as far as you heard it? I really cannot say what it was, but there was some slight difference between Mr. Eagar and Dr. Caffyn. Mr. Eagar spoke rather sharply to him about some matter, but I do not remember at this time what it was.

461. Was any communication made to Dr. Caffyn by you or Mr. Eagar that he had to go to the Quarantine Station? No; Dr. Caffyn did not appear to know who Mr. Eagar was, and Mr. Eagar informed him, and then Dr. Caffyn apologized for something he had said which was not quite courteous.

462. *Captain Hixson.*] Did you consider Mr. Eagar's manner offensive to Dr. Caffyn? He spoke sharply, but I cannot say it was altogether offensive. It appeared to me that Dr. Caffyn was a little rude, and that the rebuke from Mr. Eagar was not altogether undeserved; that was my impression. With regard to the removal of patients, I should like to say that in every instance preliminary arrangements were necessary, and they could only be made by the direction of Dr. Alleyne. The course of procedure was for Dr. Alleyne to communicate with the Superintendent of the Quarantine Station, instructing him to send the launch "Pinafore" to the Woolloomooloo wharf at a particular time, and we were covered by that arrangement in conveying the patient there. We were informed that Dr. Alleyne had given these instructions, and the patient was taken to the wharf at the time appointed.

---

Thomas Cook, police constable, sworn and examined:—

Constable Cook. 463. *President.*] You were removed to the Quarantine Station some time, I think, in June last? On the night of Saturday, 18th June last.

29 Sept., 1881. 464. What communication did you receive from any person stating that you would be required to go to the Quarantine Station? Well, I felt sick from a cold that day, and I went to Mr. Inspector Johnson's office at the Cumberland-street station, and he told me to wait a little. I waited a little and saw Dr. Hodgson, who examined me and said my symptoms were like those of small-pox. I told him I did not think there was any small-pox the matter with me. He said he did not know, but would go and see Dr. Alleyne, and I expected that he and Dr. Alleyne would examine me and I should know the result. The next thing I heard was a constable come into the room and fumigated the place; he said he had orders to do it; and about 3 o'clock in the morning I was told that I had orders to go to the Quarantine Station.

465. Prior to this had you had any communication with persons afflicted with small-pox? No, sir.

466. Had you been in contact with them at any time? I was on duty outside the house from which Hughes had been removed.

467. Was it part of your duty to see that the house was kept free from communication with anyone? Yes.

468. Did you go into the house yourself? No, sir.

---

TUESDAY,

TUESDAY, 4 OCTOBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPTAIN HIXSON,
MR. STREET.		

JOHN RENDELL STREET, Esq., IN THE CHAIR.

S. M. Caffyn, Esquire, M.R.C.S., called in and further examined:—

469. *President.*] Arising out of the last answer you gave on your previous examination before the Commission, I wish to ask you now what you meant by the great change which you say was made after you left the Quarantine Station? In alluding to the great change I merely referred to matters of hearsay, and not to anything which came within my own knowledge. Dr. Caffyn.  
4 Oct., 1881.
470. Can you tell the Commission what, in your opinion constituted the principal grounds of complaint on the part of those persons who were under your charge at the Quarantine Station? I think I would classify them under the heads of—want of proper sleeping apartments; the quality of food; the scarcity of clothing; the scarcity of cooking utensils and towels; and perhaps the greatest of all troubles, the means of communicating with their friends in Sydney.
471. Can you tell us in what the defects in the sleeping accommodation consisted? The rooms occupied by the people were very large, divided off for separate families only by blankets and sheets hung up, so that there was really very little privacy, of which complaints were made to me by the women, and I think the houses were very draughty. The Druitt Town Chinamen were under canvas; there were buildings they might have occupied. During a part of the time there were very heavy storms and the tents were blown down, and they suffered a great deal of discomfort in consequence.
472. Were the houses water-tight? Some were, and some were not.
473. *Dr. Jones.*] Were there no wooden partitions at all? None whatever.
474. *President.*] Can you tell the Commission which houses were not water-tight? I referred to a row of three houses in front of the middle cooking-house.
475. Did you report the condition of these houses to anybody? I did to Mr. Carroll, but not officially; I talked over with him the fact of their not being water-tight.
476. You made no official report to Dr. Alleyne? No.
477. Had the people sufficient bedding and bed-clothing? Most of them had. The Chinamen from Druitt Town most certainly had not for several nights. I secured for them some of the blankets that had been used for partitions between the married couples, and gave them one from my own bed.
478. Did you make any application for blankets from the stores? Yes, but it was late in the afternoon, and they were not supplied.
479. *Captain Hixson.*] Were they supplied afterwards? Yes, two days afterwards.
480. *President.*] Was the bedding of good quality? Yes, they were blankets stamped with the Government mark for Aborigines.
481. Were the sheets of good quality? Yes.
482. *Dr. Manning.*] Were the Chinamen the only people in tents? Constable Cook was in a tent and two other Chinamen who had been removed from the "Brisbane" were also in tents. Those were all the people under my care.
483. Do you think a less exposed situation could have been found for those tents? No, not if they were to be kept separate from the other people, which was very desirable.
484. Was there overcrowding in the buildings as well as want of privacy? In some of them; one house was very crowded. But it was not so much overcrowding that was complained of as the absence of partitions and the want of privacy.
485. *President.*] How many persons were in the house that was overcrowded? Twelve, I think; I am not quite sure.
486. Do you remember the size of the building, or about the size? Was it a one-roomed house? Yes.
487. After the blankets were supplied to the Chinamen at your request were there any further complaints of the insufficiency of bed-clothing? Not that I remember.
488. Did you report to Dr. Alleyne officially the overcrowding of the people and the want of privacy in these rooms? Not in so many words as far as I can remember. The purport of my telegrams was to request that other houses might be thrown open for them. Mr. Carroll had the power of opening fresh houses, which was very necessary when we first went down there. I applied to him, but he was reluctant to have them opened.
489. Did you state the case to Dr. Alleyne in your official report and require further house accommodation? I am not able to say positively; it is so long ago, and I kept no copy of my telegrams.
490. *Dr. Jones.*] How many of the houses shown on the plan were occupied? Latterly, the whole of them.
491. Which of these houses did you desire to have thrown open? One of the two that were closed. Two of them were occupied by the police, two were closed, and two were used by my people.
492. Was there any deficiency in the water supply, either for cleansing or drinking purposes? During the latter part of the time I was there they had to carry the water up hill for some distance, but before that there was an abundant supply from the tanks.
493. There was no deficiency of water? No.
494. *Dr. Manning.*] Had you been in the Government service in any way previously? I was in charge of the "Java" when she was in quarantine.
495. Were you acquainted with the ordinary routine in obtaining stores, so that your requisitions were sent in in proper form? No, and I may have been guilty in that respect to a certain extent, but I was under the impression that it was no use to apply. I was strongly impressed with that idea.
496. *President.*] Referring to the quality of the food, can you explain to the Commissioners more in detail what was complained of? The bread was complained of a good deal at one time, but after the complaints that was considerably improved.
497. *Captain Hixson.*] Was the bread complained of because it was not of good quality, or because it was stale? The quality was complained of, but that was quickly altered.
498. To whom was the complaint made? To the Treasurer by telegram.
499. Through Mr. Carroll? Yes.

- Dr. Caffyn. 500. *President.*] What other articles were complained of? The meat was not good. The people were constantly complaining, and saying to me, "There, doctor, look at that. Can I give my children that?" I refer particularly to one man (Monahan) and his family, who every day I visited the house complained of the meat and the want of variety in the food.
501. *Captain Hixson.*] Can you give us any idea of the variety? It was simply beef and mutton.
502. *President.*] How was it served out? By the police; there was no regular distribution. Mr. Carroll would say to a policeman, "Just cut that up for the people."
503. So far as you could judge, was it distributed fairly? Yes.
504. *Captain Hixson.*] Did you get any vegetables? Yes; there were potatoes, and sometimes a few turnips, but, as a rule, there was a scarcity of vegetables the whole time.
505. Was any rice given to you? No. I never saw any distributed; I saw it in sacks in the store.
506. Was there butter? Yes.
507. *President.*] Were there any complaints of these other articles? No; the particular complaints were the want of variety and the want of bacon.
508. Did you ask for any bacon? Yes, but that was looked upon as a luxury only for the doctor and other favoured persons.
509. Was there any complaint as to the quality of the tea or sugar? No, I never heard any.
510. Were you provided with coffee? No, only tea.
511. Did you get milk? Yes, condensed milk.
512. Was that supplied during the whole of your stay, or did you get fresh milk? No; I succeeded on one occasion in getting some fresh milk for a baby.
513. To whom did you apply for bacon? To Mr. Carroll; they were always complaining, and I asked him.
514. *Dr. Jones.*] Was your complaint of the meat that it was coarse in quality, or that it was tainted? No, it was not tainted. I am speaking more of the constant complaints that were made, and not giving my opinion, as I am no judge of meat.
515. *Captain Hixson.*] Was bacon supplied at your request? No, not to the people.
516. Then they never did have any bacon? No, unless as a treat they had a piece given them.
517. *President.*] When these complaints were made did you consider them reasonable or otherwise? There was a disposal on the part of some of the people to complain unnecessarily, I think; but as a rule I think they had a great deal to complain of.
518. In respect to food? Well, I hardly think so; I think the food was abundant, and what people in England would have been very glad to get, but there was a want of variety.
519. *Captain Hixson.*] Looking back at it calmly, after your stay in town do the complaints made by the people appear to have been as reasonable now as they did at that time, in respect to the food supplied to them? I think perhaps the abundance there was should have covered the want of variety.
520. Do you think that people living under the ordinary conditions of civil life would have complained of the food that was sent down there? People living under the ordinary conditions of life would have been able to supply themselves with many little comforts which go to make up the happiness of life, such as jam, bacon, and things of that kind, the want of which was a great source of complaint with the people under my charge.
521. *President.*] In your previous evidence you said that you were able to procure greater luxuries during the last fortnight that you were there;—how do you account for this change? Well, I believe it is generally found in such cases that before you leave you are made very comfortable; the latest impressions, I suppose, are considered to be the most lasting.
522. Was Mr. Carroll suspended during your stay at the Quarantine ground? No.
523. Perhaps you will explain in what way you alluded to the scarcity of clothing? The clothing was not distributed to the people. The grave-diggers always had a difficulty in getting proper clothes, so that they might be safe in going among the other people. Then I had great difficulty in getting clothing for the Druitt Town Chinamen; they constantly complained that they had not clothing enough. We had to destroy a great deal of clothing belonging to the people during my stay at the Quarantine Station, and this was not replaced from the store as it might have been.
524. You were aware that there was a sufficiency of clothing in the store? Yes, an abundant supply.
525. And you made application for clothing? Yes, constantly.
526. Were your applications refused? Yes; one thing would be given, and the rest refused.
527. Did the Europeans under your charge have a sufficiency of clothing? Some of them complained of the great want of clothing; and for a whole month we were unable to get boots for the women and children. I was often threatened by these people that unless they were supplied with boots at once, they would go to Manly for them. They also said that no Government would think of prosecuting them for going there when they had no boots to put on. This was complained of by me as often as twice a day to Mr. Carroll, and to the Treasurer.
528. *Captain Hixson.*] By telegram? Yes.
529. *President.*] Did you receive any answer from the Treasurer to these telegrams for boots? Yes; the boots came at length, I think I am right in stating, ten days after the application.
530. Was any reason given by the Treasury for the delay? No. One of the reasons given by Hughes for his swimming ashore was that his children were not supplied with boots, although when I found them in Sydney they were almost without clothing.
531. *Dr. Jones.*] Do you know whether there is any rule in force at the Quarantine Station which makes it compulsory that all the requisitions for food or clothing should be sent to Mr. Carroll in writing? No, that was not the mode in which we applied.
532. You never heard of such a rule? No, with the exception of stimulants, and then I sometimes did and sometimes did not.
533. *Dr. Manning.*] There appears to have been an unpleasant abundance of coffins? No doubt; they did abound; they were lying in heaps about the place. I could not give you an idea of the numbers that came down. It seemed to me that when they had a spare place on board a boat they put a coffin in; that is what I gathered from the way they were packed in here and there; they were lying some on one side of the fence that separates the hospital enclosure from the healthy ground, and some on the other.
534. They were in full sight of anybody? Yes.

535. Was no effort made to keep them out of sight? No, not the slightest.

536. *President.*] Was that remedied before you left? I did not notice the same bulk of coffins when I left.

537. *Captain Hixson.*] Did you make any remonstrance about their not being removed, or covered and kept out of sight? No, we got very tired of making remonstrances.

538. *President.*] With reference to the removal of Mrs. Guildford, were you present at the time she was sent down in the "Pinafore?" Yes; I came up to the hospital enclosure with her; I had a telegram from Dr. Alleyne to come up.

539. Was any other medical man on board? No.

540. There has been a statement in the public Press that some medical gentleman requested them to "shove her under the seat." Can you say anything in explanation of that statement? Yes. I saw Mrs. Guildford brought on board by her husband, who carried her with great difficulty from the steps to the "Pinafore." I did not offer to help him, because my orders were not to place myself in contact with her in any way, but simply to see that her comfort was attended to. She was brought on board in blankets, and no word passed my lips from the time she came on board until she arrived in quarantine, and I have never spoken to Mr. or Mrs. Guildford from that time until I left the Quarantine Station.

541. Did you hear those words used? No; and I have since telegraphed to Dr. Beattie to request him to ask the two men who were on board the "Pinafore" at the time if they heard me use any such expression, and I received the following telegram in reply:—

Telegram from Dr. Beattie to Dr. Caffyn.

Quarantine Station, 30 September, 1881.

DEAR SIR,—In reply, Maher and Hughes, "Pinafore" men, have both left here, and both denied before leaving that you used the expression ascribed to you; they added, for information of the Treasury, that you could not have spoken so without their hearing.

542. *Captain Hixson.*] Do you believe that such words were uttered by anyone? No, I am sure they were not.

543. *President.*] So far as you saw, was every provision made for Mrs. Guildford's comfort on board the "Pinafore?" There was no bed for her to lie on; that was the only thing that was required; she was thoroughly well wrapped up and protected from the weather; there was no mattress, and she was put on a form—a bench in the stern of the "Pinafore," inside the curtains.

544. *Captain Hixson.*] I think you told us that you had a telegram from Dr. Alleyne to come up. Was that in reference to the case of Mrs. Guildford? Yes.

545. In fact it was your business to see to her comfort as much as possible? To see her brought down to the Quarantine Station—that is what I was told.

546. And did you do so? Yes.

547. Was she hurt in any way by her transit down? Oh, no; not at all.

548. Did you hear of her experiencing any ill-treatment at the time, during her passage down? No; I never did.

549. That is all you know of the circumstance what you saw in the papers? Yes.

550. *President.*] Did her husband make any remark to you at the time? No; he never spoke to me.

551. *Captain Hixson.*] Was Mrs. Guildford conveyed down expeditiously and comfortably, as far as you can remember? Yes; as comfortably as could be across the Heads.

552. There was no delay whatever? No delay at all.

553. *President.*] How was she removed from the "Pinafore" to the hospital enclosure? She was put on a stretcher and carried up by the men. I am not able to say whether it was by the "Pinafore" men, or the grave-diggers.

554. Did her husband assist in carrying her up? I do not know.

Thomas Cook, police constable, called in and further examined:—

555. *President.*] At what time did you go to the "Pinafore"? It would be about 4 o'clock in the morning that I went on board the "Pinafore." I asked the engineer where he had orders to take me, and I was told to the Quarantine Station. My object was this: If he had said to the "Faraway," I did not intend to go at all, because I knew that was the place where there was small-pox, and I had a great dread of going there. When he said it was to the Quarantine Station I went on board.

556. You consented to go to the Quarantine Station? Well, if any gentleman had asked me whether I would leave my wife and family and go to the station, I don't think I should have wanted to go.

557. Did you feel that you were going under compulsion? Yes; I felt that at the time.

558. And you felt that if you had refused you would have been compelled to go to the Quarantine Station? Yes; that was my impression.

559. On your arrival at the Quarantine Station what took place? A small boat with Mr. Carroll in it pulled towards us, and Mr. Carroll spoke to the captain first, and said, "How many have you on board?" The captain of the "Pinafore" said he had only one man, and Carroll asked whether I was a European or a Chinaman, and he said a European, and my name was Cook. Then says Carroll, "I have orders to put you on board the 'Faraway;' you have small-pox." I said, "Mr. Carroll, I have not, and I don't intend to go on board the 'Faraway.'" He then went away, and returned after a short time, and I again refused, and said I would not go on board the "Faraway," where I knew the small-pox really was; Carroll went away again and left me till daylight, and then came back and asked me would I go, and I again refused, and he said he would send a messenger to Sydney, and I saw a man leaving in a boat.

560. Were you on board the "Pinafore" all this time? Yes; and to the best of my knowledge about 3 o'clock the same day, it was Sunday, Mr. Carroll came with a piece of paper in his hand, and he says, "Cook, you have small-pox; Dr. Alleyne says it, and you must go on board the 'Faraway,'" and I refused again. Then all the constables gathered together under the jetty, and Senior-constable Maguire called out, "Cook, will you go on board the 'Faraway?'" and I said "No" again, and he said, "We have orders to put the handcuffs on you and put you on board"; then I made use of the expression, "By Jesus Christ, I am confident I have no small-pox, and I will sooner die than go on board that 'Faraway'"; I said, "If you get any other doctors to come and see me, and they say I have small-pox, I will willingly go," but only one man had seen me and I did not think much of his examination. "If another doctor,"

Dr. Caffyn.

4 Oct., 1881.

Constable  
Cook.

4 Oct., 1881.

Constable  
Cook.  
4 Oct., 1881.

I said, "says I have small-pox, I will go without any resistance." One of the constables then said, "What can be fairer than that?—if another man sees him he is willing to go." I did not hear him say that, but I am told that those were the words used. I saw the constables having a consultation; then they went away and left me till the following morning about half-past 9 or 10 o'clock in the "Pinafore" all the time. Then Mr. Carroll waved his hand for the captain of the "Pinafore" to draw alongside, and he told me to come out, and pointed to a tent on the beach and said, "You can go into that, Cook, until we see better about you, and remember that you are not to have any communication with any men on this ground till I give you further orders." I said, "All right, sir," and went into the tent, and I was there for about three weeks I think.

561. Did any doctor see you on that day? Dr. Caffyn came down, but he did not come into the tent. He said I was to keep quiet for a few days and he would see me again and let me know what was to be done. I would not swear that it was the following day that he saw me, but it was either the following day or the day after that that Dr. Caffyn came inside and examined me. He said he did not know, but I was just to keep myself quiet. Then the following day he examined me again, and said there was no small-pox the matter with me, but he was sorry for the way I was suffering from a severe cold. I was very anxious to get away out of the tent, and he informed me on three different occasions that he had telegraphed to Sydney to Dr. Alleyne about me, and he stated that one of the telegrams was as follows: "I recommend Cook's removal to one of the warmer houses, where I can treat him for his cold." He told me that he considered the tent was not a fit place for me, and he could give me no medicines while I was living in it as they would only make me worse. He said that on several occasions. But about the end of the third week Dr. Caffyn said to me, "Well, Cook, if they don't let you up to-morrow I will take it on myself to let you go up," meaning I was to go up among the other constables where there were some houses; and consequently the next day he said, "Cook, you can go up." At this time Dr. Alleyne was down in his boat round at Carroll's wharf, and Carroll was going down to him.

562. At what time was that? About dinner-time on the day that Dr. Caffyn told me to go up the hill. I had started to go up, and had carried part of my things about 50 yards, when Carroll's boat went past, and he saw me and sang out "Go back." I pretended not to hear him at first, and he sent a man up to me, and came running up himself and said, "Dr. Alleyne says you have to wait here until he gives you orders to go away." Then I said, "It is very hard for me to go back here again and nothing the matter with me." He said, "No matter, that's the order, and you will have to obey it." And I went back into my tent again, and was there for a few days more till the day before the arrival of the Druitt Town Chinaman. The night before that Carroll told me I could go up among the other constables. He seemed to have allowed me a little more freedom that day; and I went up and was one night with the other constables, when the eight Chinamen from Druitt Town came down. My uniform clothing had been sent for then, and I said I would do duty willingly and be glad of the change. I was told that my duty would be to look after the eight Chinamen, and see that they did not mix with the healthy people or come up from that part of the ground. I understood that I was to be living in the house and doing this duty; but there had been three tents pitched for them, and I was ordered the first night to go and live in one of those tents beside the Chinamen. I did not like it; I would have done the duty, but I did not like to go and live among the Chinamen because it was rumoured that they were infected with small-pox. I knew I had done some things against the regulations, such as taking the revolver, and I did not wish to disobey orders, but I wanted to get out of sleeping in the tent. Senior-Constable Maguire told me I must take my bed out and put it in the tent beside the Chinamen; then I refused to do it, and I took my bed outside. He said, "You refuse;" and I said "Yes; I can't see why I should have been kept down there all this time, and now there are Chinamen supposed to be infected and I am told to go down among them. There is only one other married constable besides myself, and you might have picked some one else." He said, "Do you refuse?" I said, "I do not refuse to do the duty, but I refuse to go and live among the Chinamen." I knocked about all that night at a respectable distance from the Chinamen to see that they did not go near the other people, and on the following day one of the senior constables sent a telegram to Superintendent Read that I had refused to go into this tent. There was a telegram in answer to it stating that a constable, without mentioning any name, was to do duty over the Chinamen, and a tent was to be pitched at a respectable distance from them, and that this constable's duty was to see that they did not escape and mix with the other people. I did not refuse, as the tent was to be pitched at a respectable distance, and we drew lots and it fell to my lot to look after them.

563. How long did you remain in quarantine after that? I forget the date; I know I was seventy-six days there altogether.

564. And from that time you were employed in performing your duties as a constable? Yes; during that time I had a very bad throat.

565. I suppose that completes the history of the case? Yes.

566. During the time you were on board the "Pinafore," what provision was made for your meals or comfort in any way? None that I am aware of.

567. What did you do for your meals? Well I did not feel as if I could eat anything; the engineers of the boat had their meals, and I had a cup of tea with them.

568. Had you any bed-clothes? Yes, I got a couple of blankets and a mattress.

569. Where from? From the shore; I got them on the Sunday night.

570. What protection had you from the weather on the Saturday night—nothing but your clothing? I had my overcoat.

571. Did you feel the cold severely during your removal from Sydney to the Quarantine Station? Yes, I felt the cold very severely; I could scarcely walk down to Woolloomooloo; I felt it severely all the way and coming out of a warm room with the smell of sulphur made it worse.

572. Were you offered any conveyance? The sergeant said when I was inside,—“Will you be able to walk?” and I said, “I think so.”

573. If you had refused some conveyance would have been offered to you? I suppose so.

574. Was the tent roomy and comfortable? It was anything but that.

575. Had you a sufficiency of bed-clothes? No, I had only two thin blankets and a mattress.

576. What was your mattress placed upon? On one of those military beds.

577. How were you provided with food? Well, the food I got at first was good enough for a healthy man, but I did not feel as if I could eat at all then.

Constable  
Cook.  
4 Oct., 1881.

578. What did it consist of? Meat, bread, and potatoes, sugar and tea.
579. Was this cooked for you? No, Sir.
580. Were you provided with the means of cooking it yourself? Yes, I had a frying-pan, and then I got a saucepan to cook my meat and vegetables in, and I asked for something to make tea in, and Carroll said,—“You have got all I have to give you; there will be something by-and-bye, and you will get it when it comes.”
581. Then you were not treated as a sick man? No. When I told Dr. Caffyn I could not eat the food he ordered me a pint of beer, and I got a pint of beer for five or six days.
582. *Dr. Jones.*] Were you furnished with materials for making a fire? No; I used to put two stones together in the ordinary way of bush cooking.
583. You had to provide yourself with firewood? Yes; one day two constables brought down some, but there were plenty of sticks on the beach which I used to gather.
584. *Dr. Manning.*] Had you any appliances for washing? No; I used to wash my face in the frying-pan.
585. Had you no basin? I got one afterwards.
586. Were you supplied with towels? There was a piece of towel or something or other given me, but it would not dry anybody; I used to dry myself on my shirt.
587. *President.*] Did you ask Mr. Carroll for any? Yes, repeatedly; he said that was all he had to give me, and one day I caught him out in a lie, for when Mr. Benson, the Custom-house officer, came and asked for a towel, I saw Carroll give him one.
588. *Captain Hixson.*] Were they coercing you to go on board the “Faraway” at this time? No, I was never asked to go on board the “Faraway” after I landed.
589. *Dr. Manning.*] How long had you been in the Government Service? Since the 2nd May. I had been for nine months postmaster at Minni.
590. You know the usual mode of sending requisitions for articles required employed in the Government service? Yes, I know the mode of obtaining articles such as are required at a post office.
591. *Captain Hixson.*] But I suppose you had no stationery or means of sending requisitions, and the only mode you could adopt was to ask Carroll verbally? That was all.
592. Then there was no attempt to get you on board the “Faraway” after you had once got on shore, and gone into the tent? No; no one ever asked me to go on board the “Faraway.”
593. *President.*] Who brought your food to you? The constables used to fetch it and lay it on some boards that were there, cooee to me, and go away, and then I went for it.
594. They appeared frightened to go near you—was that the case? I don't know whether they were frightened, or whether those were their orders. Even after Dr. Caffyn had stated that I was free from any disease like small-pox, Carroll would not allow them to mix with me.
595. How do you know that? Because if any of them came near Carroll would order them away.
596. *Captain Hixson.*] With regard to the pistol that you took down, did you attempt to make any show with it to frighten people in any way? I believe the engineers could see it, but no one on shore saw it, because I never presented it to any one.
597. Then the people at the Quarantine Station did not know that you had a pistol? No, they did not know after I got ashore that I had a pistol.
598. Then the only way in which you defied authority there was to refuse to go on board the “Faraway,” and to refuse to sleep in a tent alongside the Chinamen? Yes, I refused both of those orders.
599. Did you have any row there with anybody except on those two occasions? I had a bit of a row with another man.
600. Did you have any disturbance with Mr. Carroll? No, he is a man that won't allow any disturbance with him.
601. *President.*] Will you explain what this something given to you in the place of a towel was? It was like the outside covering of a bag, but not so coarse; but too coarse to wipe a man's face on.
602. Have you ever seen the same material used for towels? No; and I have been brought up to mining where they use pretty coarse material, but never so coarse as that.
603. *Dr. Manning.*] And was that the only towel you got all the time you were there? Yes.
604. And you made repeated applications? I never applied after I went up the hill.
605. Had the other constables proper towels? Yes.
606. Did you send any telegrams while you were there? Yes.
607. Through whom? Mr. Carroll.
608. Were they received? Well, some were.
609. How do you know that any of them were withheld? I know since I came home that my wife did not appear to have got some news that I sent her.
610. Did those telegrams which she did not receive contain any complaints? Yes; but Carroll used to say frequently when I took him a telegram, “Look here, Cook, that can't go; it is no use.”
611. Why could not they go? Because there was something in them which he considered offensive.
612. *Captain Hixson.*] He thought they were complaints about the place? Yes, I suppose so; he called out several times, “I have received a telegram from Dr. Alleyne that no telegram is to be sent except through me, and if I find out the operator sending one through any one else I will show him what I will do.”
613. Then there was an examination of all telegrams by him? Yes.
614. If he objected to anything in a telegram would he strike it out? Well, I don't know that he would strike it out; but if there was anything in it he didn't like he would return it. On one occasion I wrote to my wife that I was in a tent and very cold and it was not small-pox that was the matter with me, and in that telegram I was made to state that I was in a good house; he sent it back and I had to write out a fresh one.
615. Then he made you alter the telegram until it suited him? Yes, that is it.
616. *President.*] What was the telegram that was sent? To the best of my belief it was: “I am in a good house, and the doctor has said there is no small-pox, and I am getting on all right”—something to that effect. I knew that it was bosh, but I was glad to let anything go to let my wife know that I was in the land of the living.
617. Who altered the words or suggested them to you? I believe I altered them myself.
618. Do you remember any other instance of a telegram that you had written being altered or kept back? Well, there was one other telegram. I wanted to send to Sub-Inspector Johnson, asking him to try and get

Constable  
Cook.  
4 Oct., 1881.

get my removal. I wanted to get removed from the tent, and I made out I was quite fit for duty. I honestly state now that I was not fit for duty, but I wanted to get away from where I was. Carroll said it was no use to send that telegram, as Sub-Inspector Johnson had no more power over it than I had, and he returned it to me.

619. *Dr. Jones.*] Did you modify that telegram? No; he meant that I could not send it all. Then I used to send telegrams frequently for my wife to receive my pay and to say I was getting on well, and all that.

620. *President.*] Were they sent? Yes.

621. Is there anything else you saw there in connection with want of care towards yourself or any one else? There was a case in connection with Dr. Caffyn and another with Dr. Foucart. When I had got ashore and was in the first tent by the beach, I had a very bad ear-ache and I sent for Dr. Caffyn to give me something, and he said he could not treat me for my cold while I was living in the tent, as it would only make me worse. Another time I went to Dr. Foucart, when I was in the other tent doing duty. I could eat no solid food for three or four days, and Dr. Foucart gave me some arrowroot. I asked him for some medicine, and he showed me some empty bottles and said, "This is what they call a dispensary."

622. *Dr. Manning.*] Did Dr. Foucart say he had asked for medicines? Yes, he said, "I have asked for medicines, and this is the result." He said, "They won't even send me a newspaper."

---

THURSDAY, 6 OCTOBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

William Henry Keats, Custom-house boatman, sworn and examined:—

W. H. Keats. 623. *President.*] You were sent to the Quarantine Station in June last, I believe? Yes, on the 16th June.

6 Oct., 1881. 624. During the time you were there were you in the healthy enclosure? Not at first; I was put into the hospital enclosure at first. I protested against this, and Mr. Carroll said he had orders to put me there.

625. How long were you in the hospital enclosure? We slept there two nights.

626. Who do you mean? There were twenty-six of us; Mrs. Hughes went down with us, six children, three single men, and me and my wife and three children.

627. And Mr. and Mrs. Guildford had been lodging at your house? Yes.

628. And Mrs. Guildford was sent down the same night? No, not the same night, the next night; that same night Mrs. Rout and Mrs. Cane came down, and the body of Mr. Rout. Mrs. Cane and Mrs. Rout were put in the enclosure with us, and they did not shift their clothes for a fortnight afterwards.

629. How do you know that? Because I had the burning of them afterwards. Mrs. Rout's child got the small-pox first, and Mrs. Hughes's child got it, and then they burned Mrs. Rout's clothes.

630. Did you receive every care and attention while you were in the hospital enclosure? Yes.

631. You had all that was necessary? Yes.

632. And you were removed to the healthy enclosure the third day after you arrived? Yes, the third day.

633. And was the same care and attention shown to the people in that enclosure as there was in the other? Yes, we had nothing to trouble about until we were coming away, except that the meat and bread were not very good.

634. In what way was the meat bad? It was mostly covered with blood on the outside about the neck, not properly cleaned. The policemen cut it up, and they got the best part of it. They used to bring it half way up the hill and leave it on a rock, and cooe for the people to come and take it, and sometimes when the cooe was not heard it would be left there two or three hours, and would be covered with sand and want washing when they got it. This happened when we were not allowed to go down to the beach because policeman Cook was there; at other times we were allowed to go down.

635. Did you make any complaints about the quality of the meat given to you? I would not take it once or twice. I used to have fowls and bacon sent down from Sydney and go without it sometimes.

636. What was the nature of the treatment you had to complain of before you left? The children had to go out without chemises, the missus had no stays, and I had no drawers. They were telegraphed up for I know, because I used to take the telegrams down for the doctor.

637. Did you make any application to Mr. Carroll for these articles of clothing? Yes, two or three times; he said he had none in store. The hats had no ribbons nor elastic—untrimmed—just as they came out from England.

638. What was done with your own clothes? All burned.

639. Were you supplied with clothes before you left the ground—were you deficient of clothing before you left? Yes, from Monday to Thursday.

640. And were you supplied on Thursday? Yes.

641. *Dr. MacLaurin.*] So that you were burning your own clothes from the Monday to the Thursday? Yes, some on the Monday and the balance on Thursday, when we were supplied with Government clothing. When we were coming away we met the boat with the things.

642. *Dr. Jones.*] But were those things for you? I don't know.

643. How long was it after you had changed your clothes before you left for Sydney? Only two or three minutes.

644. *President.*] In other respects did you receive everything you applied for? Oh, yes.

645. How did you arrange about your cooking? We had two small saucepans and a kettle, and we had to make a cooking-place with bushes in the open air; there were seven in our family.

646. Did you apply to Mr. Carroll for other cooking utensils? Yes.

647. And what reply did he make? He said he had not got them, but a few days before we left he asked us if there was anything we wanted.
648. What did you ask for;—do you remember? Saucepans, two or three times.
649. Did you ask for any other articles? No, I do not remember anything else.
650. What appliances had you for washing? Very good; there was a big copper, and a large bath for washing in; we had a tub for each family.
651. Where did you sleep during the time you were there;—will you point out on the plan (*exhibiting plan of Quarantine Ground to witness*) which of the buildings you occupied? It was the third house in the healthy ground.
652. How many people occupied that house when you were in it? Me and my wife and three children and three single men.
653. Was there any division in the building? There were three blankets for a partition.
654. Had you plenty of room? Plenty of room, sir.
655. And there was sufficient privacy with those blankets for decency? Oh, yes, sir.
656. Had you plenty of blankets? Yes.
657. And beds? We had one bed for myself and wife, and one for the children; we had three bedsteads put together and the two beds on the top of them.
658. *Dr. Jones.*] Were there no wooden partitions in the building at all? There are no wooden partitions in any of those buildings.
659. *President.*] Were you supplied with towels? No, sir, we had no towels; we took our own down with us.
660. Did you make application for any? No; some of the others did, but could not get them.
661. You spoke of the quality of the bread;—what was the matter with it? Well, it was very dark, and when it was cut it would crumble under the knife. I spoke to Mr. Carroll about it, and he said he could not get any better. He said he could not eat it himself. Mr. Carroll's men used to send for their own.
662. Were you supplied with milk? Yes, condensed milk.
663. Did you require to send any telegrams to people in Sydney? I did want to send one once, but Mr. Carroll would not send it.
664. How do you know? Because I could not get any answer.
665. What was the nature of the telegram you sent to Sydney? It was to the missus's cousin; I wanted to see if he could go and get us released.
666. Was the building you occupied water-tight? Yes.
667. Was there any rough weather while you were there? Oh, yes, it was raining and blowing; the house was very draughty, but the rain did not come in; but the room we had had galvanized iron on the top of the shingle; the others had no iron, and the shingles leaked.
668. *Dr. Jones.*] Had you abundance of water for purposes of cleanliness? Yes; but we had to go down to the creek to get it; it was always running there.
669. There was abundance of it? Yes.
670. *President.*] Is there any other matter of complaint with reference to the treatment of yourself or the people down there that you wish to mention to the Commission? No, that was all the complaint I had—putting us into that enclosure and keeping us there when there was small-pox there, and keeping Mrs. Rout and her children there with their clothes on so long when they had small-pox.
671. Did any medical man see you on the night of your arrival on the ground? I don't know whether Dr. Caffyn came that night or the next morning.
672. *Dr. MacLaurin.*] What time did you get down? About 5 o'clock in the evening.
673. *Dr. Manning.*] How long were you there? Seventy days.
674. And you spent all but three days in the healthy ground? Yes.
675. Did you or any of your family suffer from sickness at that time? I had a bad hand from vaccination.
676. But you were not sick in any other way? No.
677. Did you make any complaint to Dr. Clune that you had no small-pox, and that you ought not to be in the hospital enclosure? No. Six of us were vaccinated from a child which two days afterwards was sent into the enclosure with small-pox; that was Rout's child.
678. *Dr. MacLaurin.*] What became of that child? It is well, and home long ago.
679. *President.*] Had you any symptoms beyond those of vaccination? I had a very bad hand with five sores on it.
680. *Dr. Manning.*] Did Dr. Caffyn attend you at that time? No, I did not apply to Dr. Caffyn; I poulticed it and attended to it myself.

W. H. Keats.  
6 Oct., 1881.

John Hughes, sworn and examined:—

681. *President.*] Will you tell us the circumstances connected with your removal to the "Faraway"? For certain reasons I went to Dr. Clune and asked him what was the matter with me. I asked him if the disease I had was the King's Evil. He looked at me and said it was not the King's Evil. Then I said, "Is it small-pox I have got?" The gentleman then examined me and said, "No, it is not small-pox, Hughes; if you will tell me where you live I will call upon you at a certain time to-morrow morning." I told him I lived in Underwood-street, next Ebsworth's Wool Stores. When I told him that he said, "I will fetch a couple of doctors down to examine you." That night two constables came and knocked at my gate and called out "fire!" I got up—I belonged to the fire brigade at the time—and said, "Where is the fire?" They laughed at me, and asked me if any one was sick on my premises—was my wife sick or the children? "No," I said. "Are you sick?" they said. I said, "I look like a sick man, don't I?" The constable struck a match and looked at me then, and said, "Small-pox—that will do—quarantine." I said, "Small-pox, is it; when will I see the Health Officer?" He said, "He will be here to-day." With that statement Dr. Caffyn came down and stood about 150 yards from me; this was about the middle of the day. He came to the gate first and then rushed away from me like a madman. Then he says to the men, "Keep off! keep off!" poking out his stick. When I came down I said, "I want to see the Health Officer"; and he said, "I am he, I am a doctor." When he said that I turned round and swore at him, and I said, "I was at Dr. Clune's," and he said, "Dr. Clune is not in Sydney." Then I fetched the paper

J. Hughes.  
6 Oct., 1881.

that

J. Hughes. that Dr. Clune gave me to get some medicine, and he said, "I can't see Dr. Clune's name on it," and my wife said, "If you can't you are no doctor." "Oh, yes," he said, "there is the number of the place; Dr. Clune is in Sydney." Then he said, "Constable, Hughes' house is quarantined; if anyone goes in he is quarantined." The next notice that came down was for my wife, that she had to be ready in 5 minutes to go to the Quarantine Station.

6 Oct., 1881.

682. And what steps were taken then for your removal? When the constable came and told my wife she was to be ready in five minutes she said, "I am not going without my husband."

683. Did you consent to go? No, sir.

684. Do you mean you were removed? I was removed by force.

685. Did you resist? No, I was there by myself; it was 10 o'clock at night when they called upon me, and my wife being there already, I thought it was best to go.

686. Did you refuse to go? No, I did not; my wife and children were there.

687. You went down in the "Pinafore," then, I suppose? I did.

688. And where were you placed on board the boat? In the aft cabin of the "Pinafore" with the five Chinamen; my wife and children went down before.

689. Where were you taken? I was taken down with Mrs. Rout and five Chinamen and an undertaker and Keats. Dr. Clune and Dr. Caffyn were in the same boat. When we got to the wharf at the Quarantine Ground they all went ashore except myself and the five Chinamen. When I saw that I walked ashore. With that Mr. Carroll came up and asked, "Where is this man from Underwood Place?" and I told him, "Here"; and he said, "You have got to go on board the 'Faraway.'" When I went on board the "Faraway" he sang out, "Walsh" three times to the doctor on board, and when he came we went up. I was the first man who went on board, and when I got on board he took me down below and said, "There's your place."

690. What place was this where you were shown? Forward on the main deck.

691. And what accommodation was there for you? There was one military bed.

692. Was the place comfortably provided? There was one bed; I laid on the bed, and the five Chinamen laid on the floor.

693. Had you a mattress and blankets? Yes, there was mattress and blankets; but there were no beds for the five Chinamen.

694. Did Dr. Walsh see you then? He looked round the place, and took me for a Chinaman at the time.

695. What did he say to you? In the morning he called the men to get up—those that were well. One of the Chinamen got up and lit a fire. I went aft and said to the doctor, "When does the Health Officer come on board to see all the patients whether they are sick or not?" He said, "When he likes," and I turned to him and said, "It is very hard for a man to be put here as a case of small-pox when there is nothing the matter with him."

696. What did he say to that? He said, "Can you cook?" I said, "No; I never cooked in my life." He said, "Do you think you could fry a steak?" and I said, "Yes."

697. And were you employed as cook? Yes, by Dr. Walsh's orders, to cook for him and those who come on board.

698. Did Dr. Walsh make any examination of you to see if you were unwell? Yes, he examined me and overhauled me, and made me take my shirt off. I said I was sent on board for small-pox, and I had got no small-pox, and he says, "Hughes, you have no small-pox," and I said, "I want to get ashore to my wife and children."

699. Did you continue to sleep in the same place with the five Chinamen? No, sir, Mr. Walsh took me aft and I slept by myself till a man named Verdich, a German, came on board, and he slept right opposite to me; he had the small-pox.

700. *Dr. MacLaurin.*] Had you a cabin? No, we were aft between decks.

701. *President.*] How long did you occupy the same compartment with this sick man? Two nights, until I heard him groaning. Then I rushed up into the cabin to Mr. Walsh, and says, "I won't sleep there any more." Walsh then turned round and said, "Why?" "Because," says I, "I have not the small-pox, and I am not going to lie by the side of a man that is dying;" then he pointed to a place in his own cabin, right opposite his own couch.

702. And did you remain there afterwards for the time you were on board? I remained there to save Mr. Walsh's life.

703. What do you mean? The five Chinamen started up and threatened to kill him. I remained there till Mr. Beattie came.

704. During the time you were on board the "Faraway" were you well treated? No.

705. In what way were you badly treated? I got the neck of a bullock for one week, dog's meat I call it.

706. Was there better meat on board? There was nothing but that; there was better meat on shore. I said to Mr. Carroll's son, "Do you think you are feeding dogs or pigs?" and he laughed at me. The next day Mr. Walsh sent word he wanted a leg of mutton, but it was never sent and we had still the same beef. He says to Carroll, "Mr. Carroll, your rations are just the same as a Chinaman's." I got on the gangway then and I says, "If that's the way you are going to live I am going ashore." That night I jumped overboard and went ashore; there were four policemen standing near the enclosure gate; then I started and swam back to the "Faraway" again. The next time I said, "Walsh, I am going to take the boat," that was the next night. Walsh says to me, "Don't you be foolish; mind if you do they will put you in irons." I said, "I don't care for the irons or for them, I want to see my wife;" with that I goes ashore with a plank from the boat. When I took the plank up Mr. Carroll came to the side of the "Faraway" and said, "Walsh, the boat's down, did Hughes go ashore by that boat?" He turned round and said, "No, I don't know how he went ashore." Carroll turns round and says to Dr. Walsh, "Then you are drunk, and don't know anything." Says Walsh, "If I am drunk get the Chinamen to pull this boat up; I can't."

707. *Dr. Manning.*] Where were you at this time? I was on board.

708. *President.*] Had you any wines or spirits allowed you on board? There was one bottle of brandy allowed for three days for the doctor and patients.

709. *Dr. MacLaurin.*] Where were you when Mr. Carroll came on board? I was standing aft by the gangway.

710. *President.*] How long did you stay on shore before you came back? About an hour; it was about 9 o'clock at night when I went up to see my wife; I knew the tent she was stopping in. 711.

711. Did any one interfere with you? A young woman who was cooking ran in to the doctor and said, "Doctor, doctor, Mr. Hughes has swam ashore and is going to murder his wife; he has got a revolver and a knife 18 inches long." I had nothing of the sort about me. I had a coat and singlet on, and my trousers and hat, and my boots. I was wet in front, but the other part was dry.
712. How did you get back to the "Faraway"? I went back on the plank again.
713. Was there any attempt to detain you on board? There was no one up; they were all sick except the Chinamen, and they go to bed at 6 o'clock.
714. Did not Dr. Walsh know? No, he did not.
715. Then Carroll came alongside in his boat? Yes.
716. What time was that? About 10 o'clock at night; then I went below and had a sleep; in the morning our grub was fetched for us, and there was nothing said for two days afterwards, when Carroll came and said, "Do you know what time Hughes went ashore?"
717. How long did you remain on board after this? About five days.
718. Up to that time no force had been used towards you? No.
719. What took place next? The next thing I saw my wife standing on the shore pointing to the tent. Then I went to Dr. Walsh, and said, "It is hard for a man to be treated in this way when there is nothing the matter with him, to see his child dying before him and not to get near her," and he said "Hughes, I can't help it, if I could I would; I see it is touching you," and I said "I am going over to them," and he said, "No, stop on board." With that I stopped on board that night, and then I said, "Walsh, I am going ashore." Mr. Carroll then came to the side of the ship, and said, "There is another case of small-pox," and I said, "May I go ashore?" and he said, "No." Then says I, "I will be ashore before you." When Carroll got on shore, he said to Senior-constable Sullivan, "Put the handcuffs on that man."
720. Where were you then? I was on shore.
721. Before Carroll? Yes; I swam ashore that time.
722. Did the constable do so? He said, "No, I won't, without I get orders from my superintendent." With that I says, "I want to see my wife." Carroll says, "You can go up, but don't touch her hand," and I said, "All right, I won't touch her hand."
723. Were you allowed to go and see your wife? Yes; and then he said, "There is your tent," the same tent that Cook had. I turned round and asked him if he had got a pair of trousers, and he said he had not. I asked him for a shirt or a coat, and he said he had got none. I went to the tent, two constables had made a big fire for me, and I sat up all night, drying my clothes with a blanket wrapped around me. While I was there Dr. Caffyn came up, and he fetched me down a pair of trousers and shirt.
724. How long did you occupy that tent? Only that night.
725. Where did you go the next day? I asked Carroll could I see my children, and he said, "Not without an order from Dr. Alleyne," and I says, "I will see them without any order from Dr. Alleyne." Dr. Caffyn brought them down to about 3 yards from me, and put a big onion between us to keep my breath, he said, away from them. They were allowed to talk to me, but I was not allowed to touch them. Then he sent down to the store and got some carbolic acid; then I went over to the enclosure. I asked Carroll if I might go, and he said, "No," and I said, "Yes, I will," and when I went there Dr. Clune said, "I will have to go down and state about your being here; you have been seen by Carroll and two of the constables."
726. *Dr. MacLaurin.*] How long did you remain in the enclosure? That was on the Monday night; I remained all Monday night and all Tuesday.
727. And nobody interfered with you? No.
728. *President.*] Had your wife small-pox? No, sir. One of my children was vaccinated by Dr. Caffyn from Mrs. Rout's child who had small-pox and got the disease from her, and I believe that was the cause of her death.
729. What did you do then? On the Tuesday evening there was twelve policemen ordered to go into the enclosure and put me in irons. They handcuffed me behind my back; that was on the wharf. I said, "What are you going to do now?" They said they were going to put the leg irons on me, and they did.
730. Were you resisting very much at this time? No, sir. I stood quietly while they put the irons on my legs.
731. And while they put the handcuffs on? Yes.
732. Were you taken on board the "Faraway" again? Yes, the same evening.
733. Were the irons removed from you then? No; I stood at the gangway with my hands handcuffed behind me and asked them were they going to send a black boy or a Chinaman to feed me. Senior-constable Sullivan said, "Take those irons off his hands," and I was left with my leg irons on all night, and I sat up all night and polished them through with my pocket-knife. Next morning I tied them up under my trousers and got up on deck. My wife was waving to me from the shore, and Mr. Carroll sent his boat off to ask Walsh if Hughes had got his irons off, or both on one leg. Then the same night he comes alongside and sings out to Walsh, "There is a policeman to come on board to look after Hughes." The policeman came on board. I heard the chains rattle, and I said, "What are those," and he produced a pair of "madman's muffs," which he showed me. I said, "Are they for me? You will never get them on me, or you and I will have a swim for it."
734. Were any irons put on you that night? No; he could not put them on me, because I would not allow him to touch me. The next morning Carroll came alongside and he said, "Constable Grainger, you have not done what you were told," and I consented to allow the irons to be put on me, on the understanding that they were to be taken off after three days.
735. Were they taken off on the third day? On the third day Mr. Carroll came alongside, and he said he had tried his best, and he would not have done what he had only for the way I and my wife had insulted him. Then he said the irons could be taken off, which they were.
736. And no further restraint was offered to you? No.
737. Were you still performing your duties as cook? Yes; I was cooking the whole five days the irons were on.
738. And during these five days had you everything you wanted in the way of food? I had the food, but I had to cook it for the others, the Chinamen used to cook for themselves, and the German used to make rice custards for himself.
739. All this time where did you sleep? I had a very good bed in the cabin.
740. Had you any sheets? No; I never knew what a sheet was till Mr. Beattie came on board, and not till five days after that.

J. Hughes.  
6 Oct., 1881.

- J. Hughes. 741. How long were you on board the "Faraway" altogether? Twelve weeks.
- 6 Oct., 1881. 742. *Dr. Manning.*] You were cooking from the day you went on board till the day you left? Till the day Mr. Walsh left.
743. And you received a certificate that you performed your duties satisfactorily? Yes, I produce a certificate from Dr. Walsh to say that I performed my duties satisfactorily from the 18th June to the 18th August.
744. There was no one on board to cook for the sick only you? No.
745. *President.*] After the irons were taken off did you remain on board the "Faraway" for the rest of your time? Yes.
746. You never went ashore again till you were released? No.
747. *Dr. Manning.*] Had the sick people sheets on board? No; nobody had sheets till Mr. Beattie came.
748. *President.*] Had you plenty of bread and vegetables on board? We used to get 3 lbs. of potatoes and vegetables every day, and cabbage about once a month.
749. Was your bread good? Sometimes it was very good, and sometimes it was wet.
750. Had you any eggs? We had three for each man for one week.
751. Had you milk on board? Yes; a tin of condensed milk every second day.
752. *Dr. Manning.*] You had no fresh milk? No.
753. *President.*] You had tea and sugar I suppose? Yes.
754. Any coffee? No sir, without Mr. Walsh ordered it for his own use.
755. Had you a sufficient quantity of food for yourselves? No, we had not.
756. There was a stint of it? Yes.
757. *Dr. Manning.*] What were the sick fed on? Beef, just the same as if they were well.
758. How was it cooked? Boiled or fried; I made beef-tea and soup for the patients sometimes, but it was optional with me whether I did it or not.
759. *President.*] Had the patients on board any medical comforts, such as sago, arrowroot, or wine? They had no sago and no arrowroot; they had a bottle of wine pretty regularly.
760. Had they jellies? No, sir.
761. *Dr. Manning.*] Did the sick people complain of not having better food? Yes, there was one man, a German named Verdich, who said he was not properly treated at all.
762. *President.*] Was there any person to nurse the sick in any way? No, not till the last man died, which was just before Dr. Walsh left; then a man named Evans came on board to nurse them; previous to that there was no one.
763. *Dr. Manning.*] Were there closets for the use of the patients? Yes, there were three closets on deck.
764. *President.*] Had the patients to go up to these closets on deck? Yes; there was a sort of a night-stool used, but there were complaints about it, and the patients had to go up to the closets on deck.
765. Who took the medicines to the patients? Mr. Walsh.
766. Who took them their food? I did.
767. What arrangements for washing were there on board? Those who liked had to wash for themselves in water; there was no carbolic soap.
768. *Dr. MacLaurin.*] Who washed the faces and bodies of the patients? They would have to do it themselves.
769. *Dr. Jones.*] Was there plenty of water? Yes.
770. *President.*] Who changed the beds of the sick people? Nobody.
771. Were they left in the same clothes they came on board in? From the day they came on board till the day they died they had the same clothes on.
772. Was there no removal? No removal at all.
773. *Dr. Jones.*] I suppose the bed-clothes might be changed without your knowing it? No, they could not; they would have to send to Carroll for a change, and I should see it; there were no other clothes on board except what were used.
774. No clean blankets or sheets? No, sir; every patient that came they gave him three blankets and no more; I had the same three blankets all the time.
775. Now, can you tell us something about Harris, the man who died;—how long was he on board before he died? Four or five days.
776. Where did he sleep during that time? Just below the cabin where I slept, when I was shifted from the Chinamen—aft, between decks.
777. Was the place closed in? No, sir, it was open at the top, with two windows on each side.
778. Was it boarded round? Yes, boarded round like a cabin.
779. Who attended to him while he was sick? Me and Verdich. Verdich and Forest slept in the same compartment with him.
780. And did Harris die there? He did.
781. Can you tell us any of the circumstances connected with his death. When was it known that he was dead on board? It was known the next morning.
782. Was it supposed he had been dead some time before it was discovered? Yes.
783. Why do you suppose that? The man was cold when I went to him.
784. What time in the morning was that? Between 8 and 9 o'clock.
785. When did you see him previous to that? The evening before at about 6 o'clock; the last words I heard him say were, "My poor father—my poor mother."
786. Did he give you the impression that he was dying that evening? Yes, I thought so the day before.
787. Had you any conversation with Dr. Walsh about him? Yes; I said, "Doctor, I think this man is going to die," and he said, "If he doesn't die to-night I will eat my hat," and the next morning he was dead.
788. *Dr. Jones.*] Who discovered that the man was dead? The boy Forest.
789. *President.*] What time did he report this? I could not tell you because the clock was stopped; I think it was about half past 8.
790. Was there anything peculiar in Harris's appearance after his death? No; his face was right enough, except the pustules on it, regular balls of matter. The policeman who was on board watching me heard the money rattle and said to the doctor, "There is money on that man; you ought to see what money

money he has got." The doctor said, "His money has nothing to do with me." Everything that he wore was put into the coffin with him, with the exception of his trousers, which were put up with his bedding and sent ashore to be burned. J. Hughes.  
6 Oct., 1881.

791. Did you get small-pox on board? No.

792. *Dr. Jones.*] Did you come direct from the "Faraway" to Sydney? No, I went ashore to the healthy ground and remained there thirteen days.

793. *President.*] Was the "Faraway" lighted at night? She had two lights, that is all.

794. Who used to attend to them? Mr. Carroll; he used to put kerosene in them.

TUESDAY, 11 OCTOBER, 1881.

Present:—

<p>DR. JONES, DR. MACLAURIN,</p>		<p>DR. MANNING, MR. STREET.</p>
<p>JOHN RENDELL STREET, Esq., IN THE CHAIR.</p>		

S. M. Caffyn, Esquire, M.R.C.S., further examined:—

795. *President.*] I think you saw Hughes prior to his removal to the Quarantine Station? Yes. Dr. Caffyn.

796. What was the nature of the examination you made of him? The house occupied by Hughes is in a yard at the back of a wool store. I went to the gate and rapped on it with my walking-stick. Hughes came out, and I asked him if any one was ill there, and he said, "I am the man." I saw it was he, because his face was covered with pustules, and I asked him a few questions about his illness, and left him. 11 Oct., 1881.

797. What distance were you from him at the time? I suppose I may possibly have been 9 or 10 feet from him; I could reach the gate with my stick, which will give you an idea of the distance.

798. You considered then that you were sufficiently near to be enabled to diagnose his case? Oh yes, I had no doubt of it; I may say that the disease had arrived at that stage that there was no possibility of doubting it; it was in the pustular stage, and his face was entirely covered with pustules.

799. And you ordered his removal to the Quarantine Station? Yes; I recommended it.

800. Did you examine Constable Cook at the time he was in the tent on the beach? Yes, every day.

801. Did you take him under your treatment? Yes, he was under my treatment the whole time.

802. During the time of your attendance upon Cook did he make complaints to you about his treatment? Yes, he was constantly complaining each morning I saw him.

803. Was it in reference to his food that he complained, or his compulsory detention? Both matters were subjects of complaint with him; he also complained that he had no cooking utensils.

804. Were you enabled to get these complaints remedied? Ultimately; I had some difficulty about it; I think he was a week without cooking utensils. I may mention, in explanation of that that I think it was looked upon rather as a criminal matter in the eyes of Mr. Carroll that he had declined to go on board the "Faraway"; and this was probably the reason for his being deprived of certain things which he would otherwise have had; that was the impression I had after talking with Mr. Carroll.

805. Did you make any complaints about the treatment of Cook? I constantly asked for things for him, and I gave him a bottle of beer each day more to keep him quiet than anything else; the man had a severe cold at the time.

806. *Dr. Jones.*] Did you report after your first visit to Cook that he was not suffering from small-pox, but that he had only a severe cold? Yes, I reported that I could see no symptoms of small-pox. I reported that frequently to Dr. Alleyne, and that I thought he might be allowed to go up among the other people and get his food.

807. Did you do that from the commencement of his stay there? I think it was on the second day; I thought it best to watch him for one day.

808. *Dr. MacLaurin.*] How did you make your reports? By telegram.

809. *President.*] Do you know whether Dr. Alleyne received those telegrams? No, I am not aware.

810. *Dr. Jones.*] Did you report from day to day to Dr. Alleyne to that effect? If I did miss a day that was the exception. I reported constantly that the man had no small-pox, and I particularly recommended that he should go among the other men, because that would have removed the principal difficulty, as he was living in a tent while he was suffering from a severe cold.

811. And no attention was paid to your suggestion? No.

812. *President.*] Do you consider that a tent was a proper place for a man who was suffering from such a severe cold? I do not.

813. *Dr. Manning.*] Had you sufficient medicine there? Yes.

814. And when you left was there a sufficient stock in store? I may explain that I never wanted any medicines except castor-oil and aperient medicines of that description, and the last of my medicine was used the day before I left.

815. So that you left none behind you? No. May I be allowed to mention that I was very ill myself all the time I was at the Quarantine Station; that will explain my desire to get away.

William Walsh, Esq., qualified to act as an Assistant by Society of Apothecaries, London, 1838, sworn and examined:—

816. *Commissioner.*] You were in charge of the "Faraway" in June last, at the time some people were sent on board suffering from small-pox, were you not? Yes. W. Walsh,  
Esq.

817. Do you remember a man named Hughes being sent on board the "Faraway" at that time? Yes, he was sent on the night of the 17th June. 11 Oct., 1881.

818. Had he small-pox at the time? I did not treat him as a case of small-pox.

819. Did you consider it a case of small-pox? I did not; I had my doubt about the case.

820. Was he treated as a hospital patient? He received no treatment at all.

821. What day did you first go on board the "Faraway"? On the 28th July, in the morning.

- W. Walsh.  
Esq.  
11 Oct., 1881.
822. And what day did you leave? On the 18th August; I was 118 days on board.
823. In what capacity was Hughes engaged on board? He was simply a patient; he was not engaged in any capacity at all.
824. Had he any duties to perform on board? Only what he took upon himself to do gratuitously, such as cooking and so on. I told him he would have to cook for himself or go without it.
825. What staff had you on board at the time? None at all. There was myself alone.
826. Had you no servants at all? No, they were taken away from me. I had three Chinamen before, but they were taken away the day previous to the reception of Hughes and party.
827. Were there no nurses for the patients? None.
828. What provision was made for the patients then? None but what I made myself. I had to do the duties of nurse, cook, and doctor.
829. Had you ample food on board? No, far from it. I could give you instances when I have been four or five days without food even myself.
830. Was that before or after 17th June? It was before the reception of these people.
831. Had you abundance of bedding on board for the patients? No; a bed and pillow, with two blankets, was sent for each person who came on board. I might get an extra one if I asked for it, but that was the regulation allowance.
832. By whom were they sent on board? By Superintendent Carroll.
833. Had you sheets sent on board? None; he said he had none in the store; they were not allowed; there was a mattress and pillow, mostly made of flock, and two blankets.
834. Were there pillow-slips? No.
835. No bed-linen at all? None at all.
836. Did you make application for any? Oh, yes; frequently.
837. And what reply did you receive? That there were none in store; they could not be got.
838. Did you make any applications to Dr. Alleyne? Yes, but they were sent back; everything had to go through the Superintendent. I was only allowed to telegraph, not to write; in fact I was forbidden to write to my own family.
839. Did you ever apply for assistance in the way of nurses or servants? Frequently. I reported to the Health Officer that I needed assistance. I did not do that until the three men who were so ill were sent on board; I had expressed a wish to the same effect before, though I got no answer.
840. Of which three men are you speaking? The first man was named Harris, the next, Parkes, and the third, Hutton.
841. After these three men were sent on board did you get any further assistance? No, although every day the boat came alongside I sent a message to Dr. Alleyne to say that I was ill from anxiety and want of sleep, and that he must send assistance. I got no reply to that for three days, and then a man named Evans was sent down, but the last man, Hutton, had died prior to his arrival.
842. *Dr. Manning.*] Then from 17th June to 13th August you were absolutely without help? Yes, except such as the other men afforded, but what they did they did of their own free will; I had no control over them.
843. You had no assistance except such as the convalescent patients afforded you? Nothing beyond that.
844. Had you any medical comforts in the way of sago, rice, or arrowroot? We were allowed preserved milk and rice, and occasionally a little flour, but milk and rice were the principal things. Sometimes there was a little port wine, and when I had it I used to give the patients a liberal allowance of it as far as it would go, and sometimes we had a bottle of brandy, and I used to give the men who helped me some of it, as they complained of the unpleasant nature of the duty they had to perform.
845. Had you any eggs? Occasionally.
846. Did you get as many as you asked for? No, sometimes we would get them once or twice a week.
847. How were the sick persons provided with their food? Hughes and Verdich used to be very kind in providing for them; in boiling rice and making beef-tea for them.
848. And did they carry this to the patients? Yes, they were very kind; they used to feed them and act as nurses too.
849. Had you a supply of medicines on board? No, not at first; I sent a requisition for medicines and they were not supplied until the removal of the three Chinese. On the 17th June Dr. Goode came and said I was to be prepared to receive six small-pox patients, and I said I was in urgent want of medicines and I sent a requisition ashore but I got no answer, though I asked the superintendent daily; he said no medicines had come. I said, "You will drive me mad; how can I treat these persons without medicine?" In about ten days I got an answer to say that the medicines could not be furnished because the telegraph operator did not understand Latin and I must write the requisition in English.
850. Do you say that you did not receive any reply for ten days after your application? Yes; and the reply was that I must write it in English because the telegraph operator did not understand Latin.
851. But where was this requisition kept all this time? I do not know, but it came back to me.
852. Do you know whether it had been sent up to Sydney? I cannot say.
853. *Dr. Jones.*] Did you send the requisition to Carroll? Yes, it was sent ashore; Carroll had it.
854. Do you know of your own knowledge that it got into Carroll's hands? Yes, because I gave it to his son. I wish to explain that when the medicines did arrive, which was about a week after I sent the requisition, I did not get all the medicines I sent for.
855. *President.*] Were you supplied with all the necessary articles for sick people, in the way of night-pans, urinals, and so on? There was only one thing properly adapted for the sick, a *commode*, as it is termed.
856. Had you feeding-bottles, tumblers, and things of that kind? No. We had tumblers and cups and saucers in the cabin, and pannikins and things of that sort; no medicine glasses or feeding-bottles or any thing of that kind.
857. What provision was made for the night watching of the sick? No watch at all, except what I kept myself. I had to be up and on deck constantly to attend to the lamps, for I had to be responsible for them. I never knew what it was to have my clothes off beyond my drawers all the time I was there.
858. What conveniences were there for washing the sick—for washing their persons? There were two baths and three or four zinc wash-tubs.
859. *Dr. Jones.*] But those patients who were confined to bed;—what provision was there for their cleanliness? None at all, except what we provided for them; the men were very kind in attending to them and washing them occasionally—Hughes, and Verdich and Forest.
- 860.

860. *President.*] Was there any provision for keeping the ship clean? I used to make the Chinamen wash the decks and did some of it myself.

861. How frequently was this done? We washed the decks down every morning, and they would be scrubbed about twice a week.

862. Did you make any classification of the people on board, so as to keep the small-pox patients separate from the others? There was no further classification than this: we kept the Chinamen in the fore part of the ship, the fore-castle they call it, and the Europeans aft in the half deck.

863. And was this classification continued after they were convalescent? Yes, I had an order come on board once that the Chinamen should not be allowed abaft the mainmast, and no Chinaman that had had small-pox should be allowed in the cabin.

864. How was the place cleaned where the sick patients were kept? I used to get the young men to assist me, and when the patients passed their evacuations to clean it up. I considered that was my duty.

865. *Dr. Jones.*] Did you consider that the ship was overcrowded? No, she is a large roomy ship, and if the store-room had been knocked down you might have kept twenty patients there.

866. *Dr. Manning.*] What was the greatest number you ever had? I think there were thirteen of us at one time.

867. *President.*] Do you remember the case of a man named Harris who died on board? Yes.

868. Where was he berthed? Aft.

869. Who occupied the same apartment? A man named Parkes was there for some time.

870. Did they both die? Yes.

871. Was anyone present when Harris died? Well, I was up and down with him the whole time; I never left him for any length of time. I was up and down every three or four hours during the night and gave him such attention as I could, till at last I got so exhausted from want of sleep that I could have gone to sleep standing up.

872. When these men that recovered from small-pox altogether became convalescent, had you any means of providing them with fresh clothing? No, I made repeated applications, but could get none from the store. I supplied three men with hats myself; I gave one of them my own, and sent to my wife for two of my sons, for the others.

873. Is it a fact that Hughes was rather a troublesome patient on board and made several attempts to escape from the vessel? He got ashore twice.

874. What distance was the "Faraway" from the shore? I should think 200 or 300 yards from the shore; when she was tailed in by the sea she would be very close to the shore; I dare say you could swim there in a couple of hundred strokes.

875. Was he brought back from the shore on each occasion? Yes, on both occasions.

876. And he was placed in irons? Yes.

877. And were they retained on him for any length of time? I think he was four days in irons.

878. Do you know by whose orders they were placed on him? I believe the Superintendent ordered it; I don't know by whose instructions; he was kept in irons from the 26th to the 30th.

879. Was Hughes' conduct such as in your opinion rendered it necessary to keep him in irons? No, I think not; I could have managed the man very well; he was very excited, but he never threatened me.

880. *Dr. Manning.*] Who gave the order to take the irons off? The Superintendent came alongside and ordered them to be taken off, and it was done.

881. Did he still do his work on board? Yes; he still cooked for me, with his leg-irons on.

882. Before escaping from the ship did he ask to be allowed to go on shore to see his wife and family? His principal desire was to see his children; they had no boots nor shoes, and he seemed to be very excited and said he would go on shore. I told him what would be the consequence and that they would bring him back in irons, but he said he did not care, he would go.

883. When he went ashore did he go to the healthy ground or to the infected ground? I could not say; the first time it was in the night and I could not tell where he went; the second time he was no sooner ashore than he was surrounded by the police and put in irons.

884. *President.*] Did you see any undue violence or cruelty used towards Hughes? No; I did not see anything; the police put their hands on his shoulders, but I did not see any unnecessary violence or anything that you could call brutal.

885. *Dr. Manning.*] When he escaped the second time one of his children was ill with small-pox? Yes; I believe so.

886. Did he ask to be allowed to go and see that child? He expressed a desire to go on shore to see the child buried.

887. His wife who was nursing the child had no small-pox? No; I could see her nursing the child, and could tell with a good glass that she was Hughes' wife; they could even converse together on a quiet night.

888. There was no reason then, if Hughes asked permission, why he should not be allowed to go ashore to see his wife and child? I could not see any.

889. Do you wish to make any further statement with reference to matters which occurred on board the "Faraway"? Yes; there was a Chinaman, Fi Yung, sent on board the ship one night along with two men, Su Chong and Won Ping, who had malignant small-pox, and on the following day I received orders to send the man ashore, and the boat came and took him ashore and he was placed in a tent on the beach. After remaining there a few days (three or four) he was sent up among the healthy people.

890. From whom did you receive the order to send him ashore? The Superintendent.

891. All your communications came from Mr. Carroll? Yes.

892. *Dr. Jones.*] Do you know whether Hughes asked permission to go ashore? He asked if he might be allowed to go and Carroll refused.

893. *President.*] Then you had no scarcity of food after the 1st June? No; I cannot complain; it was coarse food, but such as it was there was plenty of it. I never ate the ship's rations; I lived entirely on what my wife sent me.

894. Do you consider that this food sent on board the "Faraway" was equal to that used on shore in other parts of the Quarantine Station? I have heard it said by the police that our food was the refuse of that; I have frequently said that it was not proper food for sick people; the bread was frequently wet and sodden with the rain, and sometimes the Superintendent instead of leaving it on the gangway would throw it into the quarter boat, which was dirty and had rain-water in it, and sing out to the Chinaman to go and take it up.

895. Did that happen frequently? Yes, several times.

William

W. Walsh,  
Esq.  
11 Oct., 1881.

William Douglas, sworn and examined:—

- W. Douglas. 896. What is your occupation? I am a sawyer, employed at Forest's, timber merchant, at the corner of Bathurst and Sussex streets.
- 11 Oct., 1881. 897. Were you sent on board the "Faraway" on the 25th July last? I do not know the day of the month exactly, but I was sent on board the "Faraway."
898. Did you receive good treatment on board and every comfort that you desired? I do not know properly what good treatment for a sick person is, that is the first time I was sick.
899. You had nothing, so far as you know, to complain of in the way you were treated? No; Verdich treated me very well.
900. How long were you in bed after you went down? I forget how long.
901. Who attended to you when you were in bed? Verdich.
902. Have you any complaint to make about your treatment on board? I had one shirt and one pair of trousers on all the time till Dr. Beattie came on board and he gave me one of his own shirts.
903. Did you apply for clothes? I said to Dr. Walsh that I would have to send to Sydney for some clothes, and he said he would get some for me.
904. Have you any other complaint to make? No.
905. What did they give you to eat and drink when you were sick? Bread and butter and tea.
906. Who brought it to you? Verdich.

William Clark, sworn and examined:—

- W. Clark. 907. *President.*] What is your occupation? I am a fruiterer.
- 11 Oct., 1881. 908. You were sent on board the "Faraway" on 14th August, suffering from small-pox? I was.
909. During the time of your stay there had you anything to complain of in the way you were treated on board? No, I had nothing particular to complain of after the first two or three days after my arrival when Dr. Beattie came on board.
910. Had you plenty of food supplied to you? Plenty of everything.
911. Was your bedding of good description? Yes, I had mattress, sheets, and blankets.
912. From the time of your arrival? No, not till Dr. Beattie came; I was on board three days before he came.
913. Were you kept in bed for any length of time after your arrival? No, there was no necessity.
914. *Dr. Jones.*] You were not very ill? No; the worst of my illness was over before I left Sydney. After Dr. Beattie came on we had everything we could wish for; there was nothing you did not get if you asked for it.
915. *Dr. Manning.*] Before that time can you state what were the chief wants on board the "Faraway"? Well there was almost everything wanting. The doctor used to apply for things, and the answer he got was, they would see and get them from Sydney.
916. Did you ask Dr. Walsh for medicines? I did, and he said he had none on board.
917. Did you ask for anything else? No.
918. Did you hear the other people asking for clothes, or for anything? They were asking every day; I had no occasion, because I had sufficient clothes.
919. *President.*] Did you suffer any discomfort while you were being sent down, from the time you left your house till you got on board? None at all.

Joseph Rogers, sworn and examined:—

- Jos. Rogers. 920. *President.*] What is your employment? I am a quarryman, working at Pymont.
- 11 Oct., 1881. 921. You were sent down to the "Faraway" in August last? Yes.
922. During the time you were on board the "Faraway" had you any complaints to make of your treatment? Yes, I had.
923. What were they? Well, in the first place we had not proper food for a sick person, or even for a healthy one. When I came on board, which was, I think, on 13th August, I was received by Dr. Walsh and Constable Grainger, and was put down below. Dr. Walsh said, "I have no bed for you." I had a blanket of my own and I laid down on a stretcher on which, I was afterwards told, O'Dougherty (or Parkes) had died: the smell was very bad. There was a man named Hutton came on board at the same time, and Dr. Walsh asked us if we had had any breakfast. I said I had had some before I came, and he brought Hutton down some bread and butter which he declined to eat; the bread was stale and 2 inches thick, and the pannikin was rusty. After that I did not see Dr. Walsh for some hours, but about half-past 1 o'clock, feeling faint and wanting something to eat, I asked the boy, who was going up to see the doctor, but no one came to see me for a whole hour, and then Hughes came half-way down the steps and I said to him, "Is there any chance of getting something to eat?" and he said, "You will get nothing before 4 o'clock," and about 5 o'clock Dr. Walsh brought me a plate of soup.
924. At what time of the day did you come on board? I left my home at Pymont about 8 o'clock in the morning; I think it must have been about 10 o'clock when we got there.
925. Were you properly treated after that? Well, a man named Hutton in my compartment was delirious and would not stop in his bed. Dr. Walsh came and asked me if I had had any sleep, and I said "No," and he gave me a draught, but it did not make me sleep. The man Hutton was walking about in a delirious state, and coming to my bed every now and then, walking about among a number of empty bottles knocking himself about.
926. Was there nobody in charge of him at all? No; only Dr. Walsh would come down every hour or two hours, and I would sing out to him when I saw Hutton going on deck. But the man was walking about till 12 o'clock at night. And then my coat was hanging on the bed, and he took it for his wife; I told him not to take it down, and he said if I would not let him have it he would take me out of bed. Then I spoke to Dr. Walsh, and he put me into another apartment.
927. Did you see Hutton get any meals? I saw him get just the same as myself, and he could not eat anything.

928. Did you see any medicines given to him? No, I don't think I ever saw any medicines on board, except the black draught the doctor gave me.

929. Did you see Hutton get any wine or beef-tea, or anything of that kind? No, I did not, sir.

930. Did you ever have any beef-tea or wine given to you when you were sick? I did not. In Dr. Walsh's time I had nothing more than a plate of soup or a plate of rice and bread and butter.

931. Who brought them to you? Dr. Walsh brought them to me the evening after I came on board; after that it was one of the patients, but I would not say whether it was Hughes or the boy Douglas; he brought me down a plate of rice half-cooked.

932. *Dr. Manning.*] Was there any milk with the rice? I could not say. I think we had some condensed milk, but it was very dry if there was any milk.

933. *Dr. Jones.*] Did you see whether Hutton sustained any serious injury during his delirium? Well you see I left that apartment—Dr. Walsh told me to roll up my bed, and I went to another apartment.

934. But before you left did Hutton sustain any injury? Yes, I saw him scratching his legs.

935. *President.*] Was the food supplied to you on board of good quality? After Dr. Beattie came it was very good. I consider Dr. Beattie done his best, but it was some time before he could get the things from Sydney. I did not see Hutton again until the Tuesday afternoon afterwards, when he died. When I went up to see him he was lying on the floor by the side of his bed quite naked, without even a shirt on, with a blanket on the top of him. I spoke to him, but he was too far gone; he was tearing his arms, and the blood was running down his face, and he would not answer me in any shape or form; that was about two hours before he died, but I could not state the time exactly. Superintendent Carroll came alongside and said, "How are the sick patients?" and Dr. Walsh said, "I will go down and see," and he came up and said "The man is dead." I saw him two hours before, and he was in great agony, tearing and scratching himself.

936. Had you sheets and pillow-cases to your bed when you first went on board? I had not.

937. And after Dr. Beattie came on board you were provided with them? As soon as he could get them I had sheets, and pillow-cases, and changes, but he could not get them at first. Dr. Walsh gave me two blankets and a bed and a pillow without any case, and he went and picked up two more pieces of blanket, and said, "These will keep you warm."

938. Do you think Dr. Walsh did all he could for your comfort, considering the appliances he had on board? Well it is hard for me to say, considering I was not on deck at the time, but I think Dr. Walsh might have done a lot more.

939. In what way do you think he was deficient? Well, I fancy he had a little too much brandy, but I think the Superintendent was a lot to blame for what we had. Dr. Walsh did not give a proper order. When Carroll came alongside, and said, "What do you want?" he said, "I want anything and everything you have got."

940. Did you see Dr. Walsh write out the requisition? I only saw him give it; I did not see him write it, and I don't know what was in it.

941. How often did Dr. Walsh come to see you? He would always come down just after tea, and perhaps once or twice a day.

942. Did he ever come to see you during the night? No sir, he did not.

943. Do you know if he attended any of the other sick people, Hutton for instance, during the night? I don't know; Hutton was in another apartment, but I could hear him walking about in the night.

944. Were you very ill yourself? No, I was convalescent so far as strength was concerned when I went down.

945. Do you consider that you had as much attendance as you required? Well, with regard to attendance, I did not require it, if I had only had proper food. I could not swallow the food he gave me without soaking it in my tea. I did not want attendance, as I was strong enough to get up if I wanted anything. I may say that I was about eighteen or twenty days there before I had a change; of course Dr. Beattie could not get it as soon as he came, but he done his best to get it; he made me comfortable after he came. When Dr. Beattie came on board the apartments were very small, and several of us were in one convalescent department, and he worked like a man and pulled down the partition and made more room for us; the ship was very dirty and he worked at it and cleaned it himself.

946. *Dr. Manning.*] How long were you on board the "Faraway" altogether? I went there on the 13th August, and I left on the 15th September, I think.

947. How long were you in the healthy ground before you came to Sydney? I went on shore on the 15th and came to Sydney on the 27th, I think, but I won't be positive about the date.

948. *President.*] Had you everything you wanted in the healthy ground; were all your requirements supplied? Yes, I had nothing to complain of at all once Dr. Beattie came and took charge of the Quarantine Station.

WEDNESDAY, 12 OCTOBER, 1881.

Present:—

DR. JONES,	}	DR. MANNING,
DR. MACLAURIN,		MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Miss Sarah Windrom sworn and examined:—

949. *President.*] You went down to the Quarantine Station, I think, in August last? Yes sir.

950. You went for the purpose of nursing your sister, who was ill with small-pox? Yes, my sister and brother.

951. And you remained there about a month? I was five weeks and two days there.

952. Your brother and sister were sent back, I think? No, they are not back yet; I had a telegram this morning to say that they will be there for a fortnight; I can't think why they are kept there.

953. Which portion of the ground were you in during the time you were there—in the hospital enclosure? Yes.

Miss  
Windrom  
12 Oct.,

Miss  
Windrom.  
12 Oct., 1881.

954. That is where the sick people are? Yes.
955. How many people were in the same building with your brother and sister? They were by themselves mostly till Mrs. Forster went down.
956. During the time you were there was every care shown to your brother and sister? The first day we went down the nurse was very unkind—Nurse Meyler. I went down with the intention of nursing my brother and sister, and when I got there she was very saucy, and asked me what I wanted there. She spoke to Mr. Carroll, and asked if I was to go into the place, and he said I was. She was very unkind until she knew that Mr. Guildford was a friend of mine, and after that she was very very kind to my brother and sister and myself.
957. Had they everything in the way of medical comforts? Yes, as far as I could see.
958. Did the doctor see them frequently? Yes, I think Dr. Day went in morning and night to see them.
959. Was Dr. Day there when you went down? No, Dr. Clune was there when I went there first, but he left on the following day, and Dr. Day took his place.
960. And when your brother and sister required medicine I suppose there was no difficulty in getting it for them? No, everything they asked for the nurses got for them. Nurse Hollis was very very kind to them.
961. Had they everything they required in the way of food? Yes.
962. Was it such food as was suitable for sick persons? Yes; they got beef tea, port wine, and brandy; I do not know whether they got eggs all the time, but they had when they required them, and the nurse thought they were able to eat them.
963. Had they comfortable beds? Yes.
964. With sheets and pillow-cases? Yes.
965. Were these frequently changed? Oh yes, their clothing was changed.
966. Have you any complaint to make of the management of matters down there—anything that you saw yourself? There was one thing I did not care much about—when I was moved to the healthy ground the doctor put me and Mrs. Kelly into a place by ourselves; there was nobody but policemen there.
967. Can you point out on this map (*exhibiting map to witness*) where you were put when you went to the healthy ground? We were in the second-class healthy ground in a small building next to the two at the end occupied by the police.
968. Do you remember the day on which you went to the healthy ground? No, I do not.
969. Do you remember how long you were there? We came out of the enclosure on the Thursday, and we were in the healthy ground till the Saturday of the next week; we were there a week and two days.
970. Is that the principal complaint you have to make, that you were kept in this building with Mrs. Kelly, and thus isolated from the others? Yes.
971. Did you make any complaint about it? Yes, I complained to Dr. Foucart himself; Mrs. Bonnor had no small-pox, nor Miss Cora Trevoe, and they were put with the other people in a first class building.
972. And what did Dr. Foucart say? He said it was because we had no small-pox.
973. While you were in the healthy ground had you good food supplied to you? Yes, I had the best of everything.
974. There was no scarcity of food or clothing? There was no scarcity of anything after we left the enclosure, I had everything I could want.
975. Were there proper conveniences for washing? We had to get along the best way we could; when we were in the healthy ground we had only one change, but the doctor said that was because we were leaving so soon.

Mrs. Elizabeth Bonnor, sworn and examined:—

Mrs. Bonnor.  
12 Oct., 1881.

976. *President.*] You were sent down to the Quarantine Station in July, I believe? Yes, on the 15th July.
977. Do you remember by the order of what medical man you were sent there? Dr. Spencer was the doctor sent to see me; he was not my own medical man.
978. How were you sent from your house to the station? I was taken in an omnibus from our house in Harris-street, Ultimo, to Woolloomooloo Bay.
979. What time of the day was that? It was before daylight, I could not say what hour; it was towards morning, because it was break of day when we were passing the Park.
980. What sort of weather was it at the time? It was nice calm weather.
981. Was the "Pinafore" ready for you when you got there? No, we had to wait some time, I should think fully half an hour if not longer.
982. Did you remain in the omnibus while you were waiting? Yes.
983. Were you very ill at the time? Yes, I was suffering from a violent cold.
984. Were you lying down in the omnibus? No, I was not; I was able to walk to the omnibus.
985. And what provision was made for your comfort on board the "Pinafore"? I had only a seat to sit upon.
986. Were there other people on board with you? Mrs. Kelly was with me, and Dr. Spencer came on board.
987. There were no other passengers? No.
988. On your arrival at the Quarantine Station where did you go to? I was taken to the enclosure; the nurse met me at the gate and took me up and showed me into the ward, and said that was my place; and then I walked across to the further bed of the two and sat down; it was a miserable looking place, and she said she would go and look for some seats. Just as she went the doctor came and said, "The patients are come, let me see them," and I got up, and he came and looked at me and said, "This person has not got small-pox—another mistake." He said we were not to go in there, but to come out, and tents would be erected for us, and we came out and sat on the grass while the tents were being erected, and the nurse never asked us if we wanted anything to eat, but the doctor brought me a cup of tea and a couple of biscuits.
989. What time in the morning was this? About 7 o'clock in the morning, or perhaps a little later. I was never asked by the nurse whether I would have anything to eat until dinner-time came. I sat on the grass till about 11 o'clock before I got into my tent. Then I had a bath, and just after that they brought my dinner.

990. How long did you remain in the tent altogether? Until I was removed out of the hospital enclosure; that was over seven weeks—nearly eight weeks. After I had been there three weeks I had my tent removed. It nearly faced the ward door, where there were some very bad cases, and the stench was very bad, and I spoke to the doctor and he had my tent removed so that it did not face the ward. Mrs. Bonnor. 12 Oct., 1881.

991. What attendance had you while you were there? I had no attendance for the first fortnight, except that my food was brought to me by a girl. A tin plate and a pint mug was what I was served with for each meal; they never asked if I wanted any more; the food was very poor and very rough. The girl was called Louey; she was the cook. The nurse brought it once or twice, but I objected to her as she had been attending Mrs. Monahan's little girl, who was very ill.

992. Who was this nurse? Nurse Meyler. I never asked her for a thing, and she never asked me if I wanted anything. Once I asked her for a stocking and she said I could wash what I had.

993. Had you a change of clothing with the exception of stockings? I had two changes with me but she did not know that, and she never asked me if I wanted a change.

994. At this time were you really ill? Well, I was very weak on account of the excitement and worry; still I was not confined to my bed. I did for myself all the time I was there. When I had been there a fortnight I washed for the doctor; he asked me if I had any objection, and I said I would do anything to keep my mind occupied. Mrs. Kelly and I washed for the doctor several times.

995. And did this condition of things last the whole time that you were in the hospital enclosure? No; for about a fortnight I was receiving food from the cook. One day she brought me some jam, and when I looked at it I could not touch it and said I would rather have dry bread, and I spoke to the doctor and he said I was to have eggs, and I believe he spoke to the cook.

996. And after this was there any improvement? I received two eggs one morning, and then I did not get any more until I spoke to the doctor, and he said he would see that I got proper nourishment. But afterwards Mrs. Hughes and I agreed to cook our own food if we could get a saucepan. I went to the gate and asked Mr. Carroll for one and he gave us a saucepan, and after that we cooked for ourselves.

997. Was the food supplied after that of good quality? Yes, and it was very much better still after Dr. Clune came to Sydney.

998. Were you in want of clothing at all except the stockings that you asked for? No; of course I could wash for myself. I had only one dress; I wore that till I left the enclosure.

999. Did you make any application for clothing? I did once to the doctor, and he said he had telegraphed to Sydney for clothes, but they did not come for a week after.

1000. Had you towels? I had one towel, and I had to wash it myself, and one sheet.

1001. Was that for the whole time you were there? Yes; the first week I got an old hospital sheet, and no pillow-slip; then the nurse brought me a new sheet and a new pillow-slip, and I kept them all the time.

1002. What conveniences had you for washing—had you plenty of water? There were only two tanks on the ground; of course, just after the rain there was plenty, but when the rain was scarce the water was scarce, and they had to drag it up to the ground.

1003. Do you remember what day you were removed from the hospital enclosure to the healthy ground? It was eleven days before I came to Sydney; I came to Sydney on 17th September.

1004. Was there any improvement in matters there? Yes, the greatest improvement.

1005. Were you in the first-class enclosure? Yes; I had a very nice bedroom there.

1006. Who was in charge of the healthy ground at the time you were removed from the hospital enclosure? Dr. Foucart for the first two days, and then Dr. Beattie came.

1007. Before you were moved out of the hospital enclosure did you have a good wash and a change of clothes? Our clothes were not changed till we went out; we had had a good wash in the morning, and put on clean linen, and when we got into the healthy ground we changed our clothes and put on everything new, and our clothes were put out on the green in a heap and burned; I think they were burned the next day.

1008. With regard to these matters of discomfort to which you have alluded, did you make any complaints about them to anybody? I had no one to complain to except the doctor. Dr. Clune said he would try what he could do, but they would not listen to him; he had as much to complain of as I had; he said he had sent telegrams and did not know whether they had been received, as he had received no answer to them.

1009. Dr. Manning.] When you went down, Mrs. Bonnor, were you told that you must go? I was not asked whether I would go.

1010. But you were told you must go? Yes; my private medical man came to see me about 11 o'clock, and I suppose he reported it as a case of small-pox; half-an-hour afterwards Dr. Spencer and the police came, and Dr. Spencer came upstairs and looked at me.

1011. Who told you you must go to the Quarantine Station? At about 12 o'clock I got a message from the police to say that the 'bus would be there at 6 o'clock, and I must be ready to go to the Quarantine Station.

1012. You did not refuse to go? I thought it would be of no use.

1013. President.] Did you consent to go? There was nothing said whether I consented or not.

1014. Dr. Manning.] Did I understand you that you had no stockings except that one pair? Only one pair, and I could not put my boots on my feet were so sore.

1015. And when you washed those you had to go without? Yes; it was Nurse Meyler I asked for stockings, and a few days after Nurse Hollis came and said, "You have no stockings," and she said, "Can you make a pair?" and she gave me a piece of calico, and we made our own stockings.

1016. You saw Dr. Clune frequently? Oh, yes, every morning; if I did not see him he would call out to me to come out in the fresh air and not to stop in the tent.

1017. He was very attentive to you? Yes, sir; he was very kind to me.

1018. Dr. Jones.] Did you make any complaint to Dr. Clune that you had no change of underclothing? No, not to Dr. Clune about underclothing; I did about my dress; I had only one dress. The first night I was there the doctor brought a tonic to my tent and said I was to take it with a tablespoonful of water, and I said, "Where shall I get it, I have no water?" and he said, "That is cruel, they ought to have seen that you had water," and he went away and sent his man with a black bottle of water and a cup.

1019. Was your tent weather-tight and comfortable? It was very wet in wet weather; I used to feel the wet more from the dew than the rain.

Mrs. Bonnor. 1020. What kind of tents were they? Round bell tents, with a pole in the centre. There was one rough night when we thought we should have lost the tent; we had to get up and tighten it. I considered it a great hardship that I was kept in the enclosure with the people suffering from small-pox when I was told that I had no small-pox myself. I think the nurse was very untidy in leaving the dirty cloths that came from the patients lying about the ground. I could smell the smell of burning hair, and I was told it was Mrs. Fisher's hair that was being burnt; she died just previous to my coming down.

Mrs. Mary Kelly sworn and examined :—

Mrs. Kelly. 1021. *President.*] Where are you living, Mrs. Kelly? I am living at 11, Robertson-street, off Pitt-street, now; I lived in Washington-street when I was taken to the Quarantine Station.  
 12 Oct., 1881. 1022. You went down to the Quarantine Station on the 16th July I believe? Yes.  
 1023. Were you suffering from small-pox? No.  
 1024. What doctor saw you and recommended your removal? Dr. Spencer.  
 1025. Were you ill at the time—was any other doctor attending you? I was ill with a cold; Dr. Gordon was attending me. A girl, in passing my house, noticed an eruption on my face, and asked what was the matter with me. Half-an-hour after the police and Dr. Spencer called at my house, and saw Mrs. Dillon, who shared the house with me. When the policeman came he said, "I want the woman who is sick." I said, "There is no woman sick here," and he said, "Well, the woman with pimples on her face"; and Dr. Spencer said, "Come out here and exhibit yourself." I came to the door-step, and he looked and said, "Come out here," and I said, "No, I won't come into the street," and the policeman said, "It is rather cold, doctor." Then they came to the back entrance, and I unhooked my dress and showed them my neck and arms, and the doctor asked me if I was suckling a baby, and I said, "No; I was just married, and had no children."  
 1026. Did he make any further remark to you at that time? I showed him the medicine I had from Dr. Gordon, and no further remark was made. I said to the policeman, "Do you think I will be quarantined?" and he said, "No," and a short time afterwards they came and closed the place up.  
 1027. What time of the day did the doctor come to your house? About 5 o'clock.  
 1028. That was the day before you went to the Quarantine Station? Yes. At 11 o'clock that night a policeman or sergeant came and said, "Every one in the house get ready for the Quarantine Station in the morning," and at 5 o'clock in the morning a constable rapped at the window and said, "Only the one that is sick is to go." I said, "I am the woman that is sick, and there is not much the matter with me." I dressed myself, and the 'bus came for me at about 7 minutes to 6, and I went down to Woolloomooloo and went on board the "Pinafore."  
 1029. Did you make any objection to go? No, because I thought I was compelled to go. I began to cry, and my husband said, "Don't cry, there is good news from the Quarantine Station."  
 1030. You did not consent? No; I looked upon it as an order, and I got ready to go.  
 1031. And how did you get down to Woolloomooloo Bay? I was conveyed in the 'bus.  
 1032. Were you kept waiting at the wharf? Yes; it was dark when we went down, and it was daylight before we left in the boat.  
 1033. And Mrs. Bonnor went on board at the same time? Yes; she was in the 'bus when it came to my house.  
 1034. There was nobody else on board the boat? No; except Dr. Spencer.  
 1035. Well, when you got to the Quarantine Station where did you go? Two men were there with a stretcher, and offered to help me out, and I said, "No thank you, I can walk."  
 1036. And did you walk up to the hospital enclosure? Yes. Nurse Meyler came down, and said, "Who are you? Oh," she said, "a fresh case and not a very bad one," and she showed us into the ward. Mrs. Bonnor was with me.  
 1037. Did you remain in the ward long? Only about 5 minutes, when Dr. Clune came and said, "This woman has got an eruption of the skin; let her go out, and I will have a tent erected for her."  
 1038. And was the tent put up for you? Yes; and one for Mrs. Bonnor.  
 1039. When was the tent erected? About 11 o'clock, and I sat on the grass till then.  
 1040. Were you provided with breakfast? The nurse never asked me if I wanted it or not, and while she was talking to us the cook called out and said, "Come and have your breakfast, and never mind those things;" and the doctor said, "That is very hard," and he brought out two cups of tea and some bread and butter, and put them down on the ground, and we eat them there.  
 1041. Were you feeling ill at the time? No; I had a day's washing the day before, and was quite well. The night before I went down I did not think I should be sent, and I was folding the clothes and singing, and the policeman made the remark to my husband, "Your wife is not very ill when she is singing like that."  
 1042. How long did you remain in the tent? Eight weeks, till I was removed to the healthy ground.  
 1043. Can you tell us something about the treatment you received during the time you were in the tent? When I first went down the treatment was very bad. In the morning for breakfast we generally had a pint of tea and four pieces of bread and butter—two rounds cut in two—and for dinner generally some meat and vegetables and a pint of tea.  
 1044. Did the doctor visit you? Dr. Clune used to come to me every morning for three days, and the third day I was quite well.  
 1045. Did he give you any medicine? He gave me one tonic in a cup.  
 1046. How far were the tents from the hospital where the sick people were? The nearest tent would be about 10 yards; there was about 5 yards between that and Mrs. Bonnor's, and about the same from mine to Mrs. Hughes'.  
 1047. *Dr. MacLaurin.*] Then there were four tents there? Yes.  
 1048. *President.*] Was the food supplied to you of good quality? It was good, but rough and plain.  
 1049. And had you a sufficiency of it? Not at first; I complained to Dr. Clune that I was hungry, and he gave me some condensed milk and biscuits out of his own store.  
 1050. What arrangements had you for washing there? There was a tub to wash our faces in, and they gave us a larger one to have a bath in; and when I had been there a week Dr. Clune said if I wanted something

something to do I might wash their clothes ; and we boiled the clothes in one tub and washed them in the other for Dr. Clune and his men.

1051. Had you a sufficiency of bed-clothing ? Yes, I had a mattress and sheet, and a pillow and a pillow-case, and four thin blankets.

1052. And was the sheet frequently changed ? I had to wash it ; the nurse told me if I wanted another sheet I was to go to her for it, but she was disagreeable, and I did not ask her for it.

1053. *Dr. Manning.*] Had you a brush and comb and all necessaries of that kind ? No, I had a comb that had been used by somebody else, and had some initials scratched on it.

1054. *President.*] Did you ever make application for these things ? I asked Dr. Clune for underclothing, and he said he would try and get the things for me.

1055. *Dr. Manning.*] Had you any difficulty in getting boots ? Yes, and Dr. Clune took his boots off, and gave them to me to wear.

1056. How long were you without boots ? About five days, I think.

1057. And you asked for boots repeatedly ? Yes, I went there on the 16th July ; and on the 9th August I asked for some boots, and seven days after I asked again, and five days after that I asked again for boots.

1058. *President.*] And what answer was given to you ? Mr. Carroll said, "It will do you good to go without boots," and I said, "That is not very gentlemanly, I have not been used to go without boots."

1059. Did Mr. Carroll go into the enclosure ? No, he came to the gate, and we talked to him over the fence.

1060. Did you apply for them to Dr. Clune ? Yes, he said, "They won't answer my telegram."

1061. Did you apply to Mr. Carroll for underclothing and boots ? Yes, he said the only boots he had in store were men's boots, which would be of no use to me, and he had no underclothing, and that I should ask Dr. Clune to telegraph for them.

1062. Did you telegraph while you were there ? Yes, I telegraphed to my husband.

1063. Was your telegram received ? Yes. I was not allowed to telegraph to my husband to say that I was not suffering from small-pox, but the other telegrams I sent were all forwarded. I never received one from my husband ; he was quarantined here in a house for seven weeks. I asked him why he did not telegraph to me, and he said the police told him they would not be troubled about it ; he got mine I know, because I telegraphed to him that I was quite well and running about. There was a parcel of clothes came for Mrs. Bonnor and me, but there was no underclothing in it ; we used the other things, but we left them when we came away.

1064. Then after you had been in the hospital enclosure for some time you were put into the healthy ground ? Yes.

1065. What sort of treatment did you get there ? Very good ; everything we wanted we had.

1066. Who was in charge of the healthy ground ? Dr. Foucart, and Dr. Beattie came two days afterwards.

1067. Is there anything else that you wish to state with reference to matters down there ? No, I think not.

1068. Did you see any coffins lying about the hospital enclosure ? Yes, there were a dozen lying about just inside the gate, and in a small two-roomed house there which was filled with them ; there were a dozen at the gate of various sizes, little and big, for I used frequently to look into them.

1069. How long did they remain there ? They may have been there a fortnight, perhaps not so long ; they were there in Dr. Clune's time ; and when Dr. Beattie came he said he was so disgusted that he would have them removed out of sight.

1070. Did you ever hear any one complain to Dr. Clune about them ? No, I never did ; I had a seat made out of the lid of one, and I had another turned over so that we might get on it and talk to Mr. Carroll over the fence.

1071. Was the gate you speak of the gate through which the sick people had to pass ? Yes, they could not pass without seeing them ; there was a stack of them as high as the fence.

1072. *Dr. Jones.*] Do you consider that while you were being conveyed from your house to the Quarantine Station you were made as comfortable as possible under the circumstances ? Yes, I was very comfortable ; the gentleman who was driving the bus asked me if I wanted any more rugs, and I said "No, thank you."

1173. You were made as comfortable as possible ? Yes.

Mr. George Guildford sworn and examined :—

1074. *President.*] What is your occupation ? Butchering is the last thing I have been engaged in.

1075. Where do you live ? At 186, Cumberland-street.

1076. Your wife was sent to the Quarantine Station suffering from small-pox in June last ? Yes, on 17th June.

1077. Can you tell the Commission the circumstances connected with her removal. What notice did you first receive that she would be required to go there ? I got notice about 1 or 2 o'clock on the Friday, the same day she went.

1078. What doctor had seen her ? Dr. Mackay saw her on the Monday, and Dr. Hunter on Tuesday, and Dr. Dansey and Dr. Hunter saw her on Wednesday ; on the Thursday, after the house was quarantined, Dr. Hunter again saw her ; then Dr. Caffyn arrived about half an hour afterwards and knocked at the door, and made them all stand out in the room and shut the door. Then he came through the house and down the passage, and down the back stairs to the basement room. I was coming out of my wife's room, and he poked his stick against my chest and made me stand back out of his reach. He went to the door, but he could not see into the room, because it was very dark, and you had to be in the room before you could discern any object in it. He said "Turn over, turn over," and immediately went up the back stairs, through the passage, and out of the house, as if he were mad. That was on the Thursday, 16th June, Keat's family were removed from the same house on that day, and they told me I would have to go to Quarantine, and I said, "No, I will stop with my wife." After they went away I was left alone with my wife. I sent to Dr. Hunter that night for a sleeping draught. He said to me before that, "Don't fear ; I will see that you get medical attendance." I don't know whether the draught was got from Dr. Hunter ; the police gave it to me at the door ; in fact, they gave me everything I asked for.

1079. What time did you receive notice that your wife had to be removed ? I think it was 1 o'clock on Friday, the 17th.

1080.

Mrs. Kelly.  
12 Oct., 1881.

Mr. G.  
Guildford.  
12 Oct., 1881.

- Mr. G. Guildford. 1080. Did you consent to her being sent down? I went up and asked her, "Will you go to Quarantine?" and she said, "Yes, I think I should be better there than here," and I said, "Get ready then."
- 12 Oct., 1881. 1081. What time did the conveyance come for her? About a quarter past 3 o'clock, as near as I can tell. Then I asked the constable at the door whether there was any one to assist me in carrying her out, and they said no; and I said, "All right, I will manage it myself." So I went and rolled her up in the blankets and sheets, and I had a job to carry her up the back stairs. I had to take two rests going up. I carried her out to the omnibus, and had a job to get her into it and to pull her over the bed.
1082. You had no assistance at all? No. I had to cover up her face so that no one should see her, she was such a sight.
1083. Was there a bed in the omnibus? Yes, I put in the bed and pillows for her.
1084. And then you went with her to Woolloomooloo Bay? Yes. We were two hours and a half at least waiting for the "Pinafore." It must have been that, because we did not arrive at the Quarantine Station till 9 o'clock at night. Acting Superintendent Read and Inspector Waters were very kind, and kept asking me if I wanted anything. Then I carried my wife down and laid her on a seat. As I was carrying her down I felt the steps were slippery from the water, and the blankets got under my feet. I was not very strong at the time, and one of the engineers—Maher, I think it was—came and got hold of the blanket, and the doctor said, "Don't touch anything," and Maher said, "I am not frightened; I have kept a boarding-house myself." Then I laid my wife on a seat while I went to fetch the bed out of the 'bus.
1085. What doctor was that? Dr. Caffyn. I got the bed out and placed it in the boat. I was carrying two feather pillows, and one of them fell overboard, and then I placed her on the bed, and he said, "Shove her under the seat; shove her under the seat."
1086. Who said that? The doctor. I didn't know him at the time.
1087. You have seen a statement in the papers, I suppose, from Dr. Caffyn, denying that that was said? Yes.
1088. And you still persist in stating that he used those words? Yes; in fact I wrote a letter about it, and took it myself to the *Sydney Daily Telegraph* and the *Sydney Morning Herald*, and they both declined to insert it.
1089. Was the pillow recovered that you dropped overboard? No, no one in the boat picked it up.
1090. Was your wife conveyed comfortably from that time on board the "Pinafore"? Yes; I kept her well wrapped up and kept moistening her lips.
1091. Upon your arrival at the Quarantine Station what occurred? Well no one would help me to carry her. There was a stretcher provided, and two of the engineers of the "Pinafore" assisted me to put the bed with her on it on to the stretcher; then there was a wordy dispute who should help me to carry her up, as I could not carry her myself with the stretcher.
1092. Who was this dispute with? I think it was between Mr. Carroll and the "Pinafore" men; and finally the "Pinafore" men agreed to help me to carry her, and we arrived at the door of the hospital in the enclosure.
1093. *Dr. Manning.*] Will you point out on this map (*exhibiting map to witness*) where your wife was placed? My wife was taken to the building marked "Female Hospital," inside the hospital ground.
1094. *President.*] And who met you there to show you where she was to be placed? Dr. Clune was there and Mr. Keats. There were no beds provided in the place, only iron bedsteads, so Mr. Keats fetched two mattresses, one for me and one for my wife, and blankets; I carried them in and put them on the bedsteads, made the beds, and then carried my wife in. Dr. Clune came to the door and handed me an egg and fetched some port wine and a drop of brandy, and put a bucket of water and a tin of milk inside the door; at least I don't know whether he put them there himself.
1095. Did you see anything of the nurses? There was no nurse there at all at this time. They told me to shut the doors and windows; I asked for a *commode*, but I could not get one till the morning; I was told I would get everything in the morning. It was very awkward not having one that night, because I had to use a cloth or something instead and put it under the tap afterwards.
1096. Was there any other furniture in the place besides those military bedsteads you spoke of? No.
1097. Were there no chairs? No, no furniture at all.
1098. Was there a fire-place in the room? No; there was only a fire-place in the cooking-house and the nurses' room and the dead-house.
1099. Was the building in which your wife was placed weather-tight? Yes, it had galvanized iron over the shingles.
1100. Was it draughty? Yes; but that was in her favour rather than not with a nice breeze blowing. I used to keep the windows open to get as much air as I could. There was a wooden partition in the middle of the room which made two apartments 15 x 30, and we were in one of them; there were great cracks in the partition and you could see through them.
1101. How long did you remain in this place? Well, my wife remained there for three weeks. The next morning Dr. Clune came to the window and asked how she was, and gave me a linseed poultice, and a carbolic spray to spray all over her; I sprayed over her and put the poultices on her face.
1102. How was your food brought to you? They put a steak on a plate and brought it to the door (that was in the morning), and nurse Meyler came down from Sydney that day about dinner-time and she brought everything we required. She came into the ward and turned the bedclothes down—I suppose she had never seen a case of small-pox before—and it gave her a start, and she said, "I am sent by the Lady Superior to nurse you, Mrs. Guildford"; then she turned round to me and said, "Are you Mr. Guildford?" I said, "Yes"; and she said, "I am sent down to nurse her—will you watch day or night?" and we agreed she was to nurse my wife in the day and I at night.
1103. Do you remember the words the nurse made use of when she turned down the bedclothes? Yes. She said, "Isn't it awful?" Nurse Meyler went away, and did not come back again. Dr. Clune came down and said would I look after my wife for a few days as the nurse had just been vaccinated, and she had only one dress, and he wished to see whether the vaccination would take. I said, "Oh, yes"; but I pointed out that I had been so many days and nights watching before I left Sydney and I wanted rest. Well I nursed my wife day and night till the following Saturday.
1104. During that time did you get all that was necessary? Everything that was required, the nurse used to fetch what was wanted, and the cook used to come with her and leave it at the door; of course they did not come in, as they were told to keep away from me; but everything that was required they gave me. I took a good many clothes down; I had three suits of clothes for myself, and three changes for my wife.

I changed my wife's bed and bed-clothes every day, and destroyed them every day. About the end of this week, on the Friday, a week after I went down, the nurse brought me some sheets that were very rough, and when they were put on the missus complained of their rubbing the sores, and Dr. Clune said to the nurse after a bit of consultation about it, "You had better go and take the sheets off my bed;" and she said, "No; I will take them off my own," and she did, and brought them.

Mr. G.  
Guildford.  
12 Oct., 1881.

1105. How long were these rough sheets left on? Oh not very long, a few hours; they could not find a night-gown this day, and the nurse fetched her own night-gown; this was on the Saturday. Then I fell sick on that Saturday, and I said to Dr. Clune, "You will have to send somebody to nurse my wife," as I was getting bad; that was the ninth day after I went down. He said, "There is another nurse coming down to-day, because Nurse Meyler had taken charge of a sick child at the other end of the ward. I said, "You must send somebody," and from that time the nurses took charge of my wife. I fell sick on the Saturday, and on the Sunday I got out on the grass, and with the help of an attendant put up a tent outside the hospital door. I felt ill, and could not sleep or eat, and I went into that tent, and I never got up till fourteen days after.

1106. How were you attended to? I was attended to first-class; the nurses took charge of me and brought me my meals and washed me, and did everything for me.

1107. Did Dr. Clune see you frequently? He came to the back of the tent; he never came in to see me.

1108. And you got medicines? Yes. I got tonics, gargles, and so on; I don't know whether he ordered them.

1109. Was he visiting your wife during the whole time you were nursing her? He never came into the ward; he looked through the window every day and saw her.

1110. *Dr. Manning.*] How often did he look through the window? Once a day. On the 14th day I got up, and I asked the nurse if she would ask the doctor if I could have a tent with my wife; she had been up a week before me.

THURSDAY, 13 OCTOBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

George Guildford called in and further examined:—

1111. *President.*] Did you obtain the tent you asked for for yourself and wife? Yes; but I could not get it put where I wanted it; it was erected in the most exposed part of the ground.

1112. Was it dry? No; it was wet from the slope of the ground.

1113. Was any reason given you why it was not erected in another part of the ground? No, they gave no reason, but the nurse said the doctor would not allow it to be put up near his quarters. We had southerly bursters, and the wind used to beat the rain right through the tent, and I had to put blankets over my wife.

Mr. G.  
Guildford.  
13 Oct., 1881.

1114. How long did you occupy that tent? About three weeks in the same position. One night, a few days after I had been in it, one of the attendants came and said, "That tent will blow down before the morning." I was too weak to do anything to it myself and I got into bed, and I said, "Why didn't you fix it properly before dark?" About 1 o'clock in the morning it blew so hard that it flapped the tent against the bedstead, and knocked a hole in the tent, and my wife persuaded me to go into the hospital, so I walked her to the hospital, and the nurse and me carried the bed and put her in.

1115. Did you remain there that night? We remained there till the morning; on the other side of the partition there was Miss Monahan, Mrs. Fisher that is since dead, and Mrs. Hodgkinson. Of course in a place like that the stench was something frightful for healthy people, and when the nurse brought my breakfast in the morning I could not touch it. She said there was no other place to go to, and that we could not go into the big room because it was occupied by the doctor.

1116. Where did you go then? The doctor's attendant (Liversay) came and told us that Carroll said we were either to stop in the tent or go to the hospital. I made some remark, I don't recollect what it was, and I got up and took some old strings from the tent I occupied when I was sick and made our tent fast, and we lived in it until there was some dispute about the food.

1117. Did you have any conversation with Dr. Clune about this tent? Yes, he came in the morning, and I said he ought to be ashamed of himself, and that he should have made his man fix the tent, and that he allowed him to be master instead of himself. After the dispute about the food we lived in the tent that had been occupied by Mrs. Kelly and cooked our own food. After that we had no complaints about the food.

1118. Was there proper accommodation in the hospital enclosure, in the way of water-closets connected with the buildings? Oh, yes, there were six water-closets in the enclosure.

1119. And what provision was made for those people who were in tents in the enclosure? We were all in tents except the sick people—all the convalescent people.

1120. Had you a *commode*? Yes.

1121. *Dr. MacLaurin.*] While you were sick in the tent were you provided with a *commode*? Yes.

1122. *President.*] And how often was it taken away? Directly after it was used.

1123. Had you a urinal there? Yes, one of those hospital pans.

1124. Was that always emptied? Yes, the moment any patient had done with it.

1125. Did you see any coffins lying about the ground there? Yes, there were a dozen lying about the gate, and Charles Cornelius, one of the attendants, and me, carried them and put them into the dead-house.

1126. Were there any others lying about the ground? There were a dozen more came up after that, and they were left in the same place by the gate.

1127. How long were they left there? I dare say a week, or perhaps a fortnight; over a week I know. They were stacked in a heap alongside the fence, and at Dr. Day's request they were put behind the gate out

- Mr. G. Guildford.  
18 Oct., 1881.
- out of sight; then there was some dispute about them, and we carried them and put them into the old tent where I lived in the exposed part of the ground. Mrs. Fisher laid on a stretcher by the gate for three-quarters of an hour when she was brought down from the healthy ground after she took sick alongside of the heap of coffins. One of the attendants was stripped and ready to carry her up, but the other attendant would not help on account of some dispute about clothes. I said, "I will go and carry her up an inch at a time," and I threw off my coat and went down, but when I got there Mr. Carroll had sent a man in, and that man assisted to carry her up.
1128. *Dr. MacLaurin.*] Who carried her down to the gate? The two men who were employed to carry patients from the boat carried her down from the healthy ground, and the men inside the enclosure refused to carry her to the hospital; the nurse went and carried the little child and gave it to my wife to hold, and left the woman lying there.
1129. *President.*] Did you send any telegrams while you were there? Yes.
1130. Were those telegrams always received by the persons to whom you sent them? Yes, they were always received—any telegrams that I sent.
1131. Did you hear any complaints from the people there about telegrams not being sent? I have heard people complain; I don't know whether they had any grounds for complaint.
1132. Is there any other statement that you wish to make? No; after we went to the healthy ground there were no further complaints.

John Joseph Monahan sworn and examined:—

- Mr. J. J. Monahan.  
18 Oct., 1881.
1133. *President.*] What is your occupation? I am Registrar of Births, Deaths, and Marriages at St. Mary's Cathedral.
1134. Under what circumstances were you sent down to the Quarantine Station—why were you sent there? My daughter was reported to have the small-pox, and her mother with her babe was sent down with the sick child.
1135. What part of the Quarantine ground did you occupy when you went down? The portion I believe set apart for first-class passengers.
1136. Have you any complaints to make of the treatment of yourself and your wife and children while you were there? Yes, we were not treated well; when I first arrived there was no provision for myself or my family; we arrived very early on a cold, bitter morning, and no provision was made for our reception.
1137. At what hour did you arrive? I think it was about 8 o'clock.
1138. Had you a house provided for you to go into? No; about an hour and a half, or it might be two hours after we arrived we were shown into a house.
1139. Who met you on your arrival? The Superintendent, Mr. Carroll, and four or five policemen.
1140. Did they tell you where to go? They pointed to a tent where my wife and child were, and I went there and found them without fire or any comfort, and very cold and wet.
1141. *Dr. Jones.*] You did not go down with your wife then? No, I went on the following morning.
1142. *President.*] Then you were shown into the first-class ground? Yes, I was put in the centre building in the first-class enclosure.
1143. What doctor was in charge of that ground at the time you went down? Dr. Caffyn.
1144. *Dr. Jones.*] Were all the other houses in the first-class enclosure occupied? There were no houses occupied, with the exception of the centre building, which was occupied by my family and the Fishers. We were shown into this house, and the room we were shown for our accommodation, considering my family, was miserably small. On that Sunday morning we had to procure our own firewood, which was lying about in the bush; I had to carry the provisions from the store to where we lived up a very steep hill, with the assistance of my little boy, after the first week. Mrs. James Fisher and Peter Fisher's infant after, I think, eight or ten days got the disease, and were sent into the hospital enclosure. The Fisher family were thus isolated from my family, and their being isolated threw all the work upon me; I had to carry all the provisions, and I felt it very much, as the hill was so steep and rocky.
1145. What was the distance? It must have been considerably over a quarter of a mile, the way we had to carry them.
1146. *President.*] Were you able to get what provisions you required from Carroll's store? Yes, we got abundance of provisions.
1147. And were they of good quality? No, the quality was very inferior—the beef and the bread and the butter.
1148. Were you amply supplied with bedding and bed-clothing? Yes, we had plenty of mattresses and blankets, but no sheets or pillow-cases or things of that kind.
1149. Did you make any application for them? No, sir.
1150. Did you make any complaint at all about not being supplied with these articles? No; I made no complaint because I understood from parties who had been there previously that it would do no good.
1151. Are there any other matters that you would like to mention to the Commission? I made application for clothing and boots for my children to Dr. Caffyn, and I also applied to him for medicines, and he invariably told me that he had no more power than my child.
1152. Did he refer you to anyone? No.
1153. Did you afterwards get clothing and medicines? No, I never got any medicines since I made the application; about the 4th or 5th day after we got there he gave us some pills and castor-oil for the children, but when I asked him about a fortnight after he told me he could not get any.
1154. Did Dr. Caffyn visit your family frequently? Yes, during the earlier part of the time, but latterly for the last three weeks he did not come so frequently.
1155. Were any of your family ill during that time? No.
1156. *Dr. Jones.*] You did not require medical attendance during that time? I did not.
1157. Had you any difficulty about sending telegrams to your friends in Sydney? No, all my telegrams went, and I felt very grateful for that privilege.
1158. *Dr. Manning.*] Was your wife with you all the time? Yes.
1159. What family had you? My wife and five children.
1160. *Dr. Jones.*] Where were your wife and child before you went down? The first morning she went down

down she was sent to the hospital enclosure with the sick child, and remained there till about 6 o'clock that afternoon; then she was taken away and put in the tent on the beach till I arrived.

1161. Had you any change of clothing while you were there? On the 8th day I got a suit of clothes.

1162. Did your wife and children get a change? No, with the exception of my eldest daughter, she got none; in fact I had to send to Sydney for clothes and necessaries for them.

1163. *President.*] What arrangement was made for the washing of your clothes and those of your family during the time you were there? There were no arrangements; we had to do the best we could. On the second or third day after our arrival in the enclosure Dr. Caffyn called and said we were all to get our clothes washed. We told him we could not wash them as we had no change, and he said we must do it, and it was his duty to stand over us and see it done, but he would not do that, he would leave it to our honor; so my wife put the children to bed while she washed their clothes, and they were kept in bed the better part of three days, the weather being so moist.

1164. Had you plenty of tubs and appliances? Yes, the tubs were rather small; while my wife was getting her clothes washed I had to put a blanket over her and then my overcoat, and on the top of that another blanket, and keep her like that till her clothes were dry; she was sick with something like bronchitis for the better part of a week.

1165. Had you plenty of cooking utensils? Not plenty, we were rather short; we had one knife and fork for the family, and one cup and saucer for four weeks.

1166. Did you ever apply to Mr. Carroll for these things? I did; I applied to him for clothes, and he referred me to Dr. Caffyn; when I applied for knives and forks he used to say he had sent to Sydney for them and expected them to-morrow, always to-morrow, but it was four weeks before we got them.

1167. Is there any other matter you wish to mention? I wish to mention the way my wife and child were sent down. On the morning she was going away, Sub-Inspector Mackay called and was very rough. I had no idea how the child could be conveyed; he came and rattled his whip against the palings, and I went to the door to ascertain how the child was to be removed; I was under the impression that there would be something like a stretcher provided, and the child would be placed on it; and I asked Sub-Inspector Mackay how she was to be removed, and if there was anyone to assist me, and he said, I was to bring her out, and not keep him waiting all day. Well, I got a couple of blankets round the child and a shawl, and carried her out; and in place of having the coach alongside the door it was left 20 yards up the street, and I had great difficulty in carrying the child and placing her in the coach, and there was another patient—Mrs. Fisher—in the coach at the time my wife and child were placed in it, and conveyed with them to Woolloomooloo Bay. Knowing the character of this Mrs. Fisher previously, after I had learned who she was, and that my wife had to go in the same coach, I felt it very much.

1168. Did you protest against your wife going in the same coach with her? I did not protest, but if I had known who she was I should have done so.

1169. How did your wife and child go down to the station? They were brought down in a whale-boat behind the steamer.

1170. Did you see that? I did not.

1171. *Dr. Manning.*] How did you go down? I went in the "Pinafore."

1172. *President.*] Did you consent to your wife and child going to the Quarantine Station? I did not; I had no option in the matter.

1173. Were they asked if they would go? Inspector Anderson called to ascertain whether Mrs. Monahan or myself would go with the sick child; Mrs. Monahan asked if she would be allowed to wait and attend on the child and nurse it at the station, and Inspector Anderson said he thought probably she would.

1174. Did you yourself consent to go down to the Quarantine Station? Yes; I demanded to go; my wife and two children having gone the previous morning I wished to go.

1175. *Dr. Jones.*] Your family and the Fisher family occupied the same building? Yes.

1176. And you were the only occupants of a first-class building during the whole time? Yes.

1177. *Dr. Manning.*] How long were you there? I arrived on the morning of the 10th July, and I left on the 6th August.

1178. And your wife came back with you? Yes.

Mrs. Isabella Monahan sworn and examined:—

1179. *President.*] You went to the Quarantine Station with one of your children in July last? Yes, on the 9th July.

1180. What notice did you receive that you were required to go? A few hours notice; the house was quarantined about 6 o'clock in the evening; I was out in the town on business, and on my return found the house quarantined. Shortly after a policeman came and asked me if I was the missus; I did not know what he meant at first, and when I said yes, he explained what he was there for, and said I might go in. There was another lady with me, and he said she would be quarantined too if she went in. Shortly after that Mr. Anderson came, and said the child would be taken away at 6 o'clock, and who would go with her.

1181. Where were you living then? In Sussex-street. I said I would go with her, and asked him if I would be allowed to attend to her, and he said he was not sure but he thought so. I wanted to know whether I should take clothing with me, and he said he thought all the clothing would be destroyed, and I had better go just as I stood.

1182. And what time was the omnibus sent? I think it was about 6 in the morning; it was not daylight, and a bitter cold morning.

1183. Was there anybody else in the omnibus? Yes, Mrs. Fisher, who died in Quarantine since.

1184. Upon your arrival at Woolloomooloo Bay were you detained for any time waiting for the steamer? No; the steamer "Pinafore" was there and a small boat half-full of water; it was soaking wet when we got into it.

1185. Were you told to go into the boat with your sick child? No, sir, I was not told; but I said, "If the child goes in it I must go." She was delirious, and might have fallen over.

1186. *Dr. Jones.*] But who said the child must go in the boat? Mr. Mackay, I think; some gentleman said she was to go in the boat.

1187. *Dr. Manning.*] And you went with the child to take care of her? Yes, and I had to carry her out of the 'bus into the boat; no one else seemed inclined to do it.

1188. *President.*] And you were towed down behind the "Pinafore"? Yes.

Mr. J. J.  
Monahan.

13 Oct., 1881.

Mrs.  
Monahan.

13 Oct., 1881.

- Mrs. I.  
Monahan.  
13 Oct., 1881.
1189. Did you get wet going down? I did not get wet, but the boat was damp and I was very cold.
1190. Do you know why you were sent in the boat and not on board the "Pinafore"? No, the captain said he would have taken me at one end of the "Pinafore," but he would not be allowed to do it. I believe the boat was only used once after that.
1191. *Dr. Jones.*] Was Mrs. Fisher sent down in the boat with you? Yes, she could not sit up; she laid down in the boat.
1192. Was anybody else in the boat beside Mrs. Fisher, yourself, and child? No, except the babe.
1193. Were any blankets or rugs given to you to take in the boat with you? No, I brought blankets myself.
1194. *Dr. Manning.*] Who put Mrs. Fisher into the boat? Her husband.
1195. Who went down in the "Pinafore"? Two Mr. Fishers, Mrs. James Fisher, and four children.
1196. *President.*] When you got to the Quarantine Station did you carry the child up yourself? No, sir, I could not; we waited some time and there was a stretcher brought, and two men carried her into the enclosure. I said I wished to go with her, but I was kept there for half an hour and then I was allowed to go with my youngest child; I said I would like to go into the hospital enclosure, and the nurse said, "No," I must go into a tent by myself, and there was a message came to say that I was to go into a tent in the healthy ground, which I did, and remained there till Mr. Monahan came the next morning.
1197. Did any doctor come down in the "Pinafore"? Not that I am aware of.
1198. Did any doctor meet you when you got there? No, I do not think so.
1199. Had you any difficulty in getting clothes there? A great difficulty; I was there for seven weeks and I got one dress, no stockings; I got only one dress, a chemise, and a petticoat that I could not wear.
1200. Did you make any application for the articles of clothing you required? Yes; Dr. Caffyn made a list of them.
1201. Did you make any application to Mr. Carroll? No, I did not. Mr. Monahan may have done; I believe he did.
1202. What reply did Dr. Caffyn make when you applied to him? He said there must be some mistake—he had sent for them.
1203. When you were leaving, were you supplied with plenty of clothing? No, I was ashamed to appear in Sydney.
1204. What things were given to you? A very common dress, such as I had never worn before, two calico petticoats, a hat, two men's red neckties, which I could not use, and a pair of blucher boots—two odd boots. I said I could not wear them, and Mr. Carroll came afterwards and brought me a pair of basil slippers. That is what I wore. I was without any stays or flannels, or shawl, or anything. A pair of men's socks were given me the day I left, and those were the first change I had since I went there.
1205. Did you make any complaint about the clothes they were giving you? Yes I did when I found I was going to Sydney.
1206. Did they give you any reason for not giving you better clothes? They said the people who had left the day before had picked out all the best of the things.
1207. Were you told that if you waited some time you would get better things? I was when I was partly down to the steamer, and my husband and children had gone on board.
1208. *Dr. Jones.*] Did you not go in the same boat with your husband? I did; I insisted upon going, and the blucher boots were sent to me on board. I was told I had better wait and see if Mr. Carroll had not something better in the store, but I said I would not, as my husband was going away in the steamer.
1209. Have you anything special that you wish to state in reference to your treatment at the Quarantine Station? The food was very rough, and such as I was never accustomed to, and I could not use it.
1210. You had a sufficiency, but such as you could not eat? Yes; there was a great deal went to waste because we could not eat it.
1211. Did you get jam and things of that kind for the children? I got a tin of jam every day, and sometimes two, among fourteen people. I had a very small room for myself and family—no sheets nor pillow-cases, or brushes or combs, or anything of that kind, and no milk for the children, only preserved milk.
1212. Had you any towels? We had a piece of coarse stuff such as they put outside the windows; we could not use it, it was so rough.
1213. *Dr. Jones.*] How long was your child in the hospital enclosure? Eleven weeks, I think; I would not be sure.
1214. And then she left and joined you in the healthy ground? Oh, no; she was there three weeks after I left.

Mr. John Carroll sworn and examined:—

- Mr.  
J. Carroll.  
13 Oct., 1881.
1215. *President.*] What appointment have you held under the Government? Superintendent and overseer of stores at the Quarantine Station.
1216. How long have you held that appointment? Forty years on the 16th of next month.
1217. Whom do you look upon as your superior officer, and to whom do you consider yourself responsible? Dr. Alleyne.
1218. You had, I suppose, a general charge of the station, including the care of the stores? Yes.
1219. To whom used you to render your periodical returns? To the Treasury.
1220. Who used to sign your vouchers? Dr. Alleyne.
1221. How did you get your stores? On requisition, from the Superintendent of Stores.
1222. Were you in the habit of keeping a regular return of the stores supplied to you? Yes.
1223. Had you a list of the stores in hand at the time the small-pox patients were sent down there? Yes.
1224. I suppose you could furnish a copy of that to the Commission? Yes.
1225. How frequently did you send your returns of stores to the Treasury? Not very often; when they were called for.
1226. You were not in the habit of sending in a half-yearly return? No; I merely sent in a return when it was asked for. The quantity of stores was very small, except when there were ships in Quarantine.

1227. Do you remember the date of your last return? No; it was two or three years ago.
1228. What notice did you first receive that small-pox patients would be sent to the Quarantine Station? About three or four hours.
1229. That is from the time you received notice until their arrival? Yes; say a few hours.
1230. Was it time enough for you to have increased your stock of stores prior to their arrival? No; there were plenty of ordinary stores there—such as beds, mattresses, and blankets—they are always on hand.
1231. How was the information that small-pox patients were coming down communicated to you? By Dr. Goode, who arrived for the purpose of examining a vessel that was in Quarantine.
1232. What time of the day was that? After dinner.
1233. And the first patients arrived—at what hour? They arrived some time that afternoon.
1234. What did Dr. Goode say to you? He told me there was a lot of patients coming down from Sydney, and to have a place prepared for them inside the enclosure.
1235. Were you in charge of the "Faraway" in addition to the Quarantine Station? Yes; but when once I put patients on board the "Faraway" I had nothing more to do with them, except to put their rations on board, and attend any time the doctor called me.
1236. What did your staff consist of? Two boatmen and the caretaker of the "Faraway"—three altogether.
1237. When did the police first arrive at the station? I cannot give you the date. I will bring it when I come again.
1238. What position did you occupy in relation to them. Did you consider them under your direction? Yes; they are supposed to be.
1239. What number of policemen had you there? Thirteen.
1240. Was there any head among them? There was Senior-Constable Sullivan and twelve constables.
1241. *Dr. Manning.*] No sergeant or officer? No, sir.

Mr.  
J. Carroll.

13 Oct., 1881.

TUESDAY, 18 OCTOBER, 1881.

Present:—

DR. JONES,	DR. MANNING,
DR. MACLAURIN,	CAPT. HIXSON,
MR. STREET.	

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Mrs. Nora Rout, sworn and examined:—

1242. *President.*] When did you go to the Quarantine Station? On the 16th June.
1243. And how long did you remain there? Ten weeks and a day.
1244. Have you any complaints to make with reference to the treatment you received while you were in the Quarantine ground? The only thing I had to find fault with was that the children were very short of clothing; they had no changes.
1245. Did you make application for change of clothing for them? Yes, I did several times to Dr. Caffyn.
1246. Did you make application to anybody else—to Mr. Carroll? No.
1247. What reply did Dr. Caffyn make to your application? He told me Mr. Carroll said there was none in the store.
1248. Had you any complaints to make with reference to the food you received while you were there? We had plenty of food; it was plain, but there was plenty of it.
1249. Had you anything to complain of with reference to the accommodation provided for you? I had no fault to find with the house we were living in; there was no one in the house but myself and Mrs. Hughes's children. We had sufficient blankets and mattresses, but no sheets or pillow-cases.
1250. Were you in the healthy ground the whole of the time? No; we were taken to the hospital enclosure on the Thursday, and remained there till the following Saturday, and from that time we were in the healthy ground.
1251. Have you any further complaints to make with reference to anything at the Quarantine Station? No; the only fault I have to find is with the treatment I received at home before I went to the Quarantine Station.
1252. To what do you allude? The treatment of Mr. Rout before he died. There was no medical man to see him; there was only one bottle of medicine sent, which was not half enough for him. I had nothing to give him but cold water on the day he died.
1253. On what day did he die? On the 16th June.
1254. The day you went to the Quarantine Station? Yes.
1255. And the house was quarantined on the 14th? Yes; he was craving for a medical man to come to him, but no medical man was sent.
1256. Did you tell any one of this? Yes; before we were quarantined Dr. Clune and Dr. Caffyn were both there, and Dr. Clune asked if he was to attend to him, but Dr. Caffyn said no, he would see to that.
1257. And from that time to the time of his death no doctor came near him? No.
1258. *Dr. Manning.*] Had you no means of getting sufficient milk and other things for him? No.
1259. *President.*] Did you communicate with the police in charge of the house and say that you wanted a doctor? The people of the house did. Mr. Keen said it was not for him to say whether Mr. Rout was dead or not; it required a medical man to say that, and one should be sent. Mr. Rout died at 10 minutes past 3 o'clock, and we were left till half-past 9 o'clock, when the omnibus came to take him away, and I declined to leave the house until some medical man was sent to certify whether Mr. Rout was dead or not.
1260. Was any medical man sent? No; I waited till the grave-diggers were sent in, but no medical man came.
1261. *Dr. Jones.*] From whom did you receive the bottle of medicine? From the constable who was sent I suppose by Dr. Caffyn; it was sent on the Tuesday.

Mrs. Rout.

18 Oct., 1881.

- Mrs. Rout. 1262. You do not know who sent it? No.
- 18 Oct., 1881. 1263. Have you any complaint to make as to the manner in which you were removed from your house to the wharf? No.
1264. *Captain Hixson.*] Did you hear of any reason why a medical man did not come to see your husband? No; I did not.
1265. All you knew was that you could not get the attendance of a medical man? I could not. Dr. Clune would have seen to him; he offered to do so.
1266. To whom did he make the offer? He asked Dr. Caffyn if he should attend to him—they were both standing at the door in the presence of Mrs. Keen and myself—and Dr. Caffyn said he would see to him.
1267. *Dr. Jones.*] Did you see Dr. Caffyn to speak to him? I saw him through the window.
1268. But you had no opportunity of speaking to him? Not till we got into Quarantine. I saw him vaccinating the children with their arms through the fence.
1269. *President.*] You have spoken about the difficulty you had in getting changes of clothing. Did you complain of the scarcity of clothing, or that you were unable to get any? I was a week down there with the clothes I had on when I nursed Mr. Rout before he died before I got any change. I only had one dress; being in such trouble I did not think of taking more than one suit. At the end of a week Dr. Caffyn brought me some clothes, and I burned the others. There were four children; I lost one of them, and the other three had no changes at all—no linen.
1270. Had they the same clothes they wore in the house where their father was ill? Yes.
1271. How long did they wear those clothes before they got any changes? About a week, when a suit was given to them; but I had to put them to bed while I washed their shirts. On a warm day I used to let them go out without any clothes on. I was all day looking after their feet, what with splinters and lumps from the rocks.
1272. Had you a sufficiency of clothing given to you when you were coming up to Sydney? I had no petticoats given me; only a chemise, a dress, a shawl, and a hat. I asked for some men's flannels; I said I could manage with them for the children, but Mr. Carroll said there were none in the store.
1273. Then these matters of which you have spoken form the whole subject of your complaint? That is all.

Edward William Verdich, sworn and examined:—

- E. W. Verdich. 1274. *President.*] You were sent to the Quarantine Station I believe on the 10th July? Yes.
- 18 Oct., 1881. 1275. Did you go on board the "Faraway" that day? Yes.
1276. How long did you remain on board the "Faraway"? Nine weeks and four days, sir.
1277. Have you any matters of complaint to state to the Commission with reference to the treatment of yourself and others while you were there? I arrived on the 10th July in the morning, in an omnibus without any seats, and I had to sit on a narrow ledge a few inches wide, so that I got jolted and knocked against the omnibus from one side to the other, and then I was put into a whaleboat at Woolloomooloo which was leaky; I could see the water coming in, and it started raining when we got near the station, and one of the engineers threw me a blanket, but I was unable to keep it over me; the whaleboat was towed behind the "Pinafore;" I had one blanket on me but I could feel the rain coming down my neck. I got to the "Faraway" and went down below, and I was told by Dr. Walsh to turn into bed; he asked me if I had had any breakfast, and he brought me a cup of tea and a piece of bread and butter. I drank part of the tea but I could not eat the bread and butter because my throat was sore. Dr. Walsh said to me, "I can tell you you have got into a rough place, but I shall try and do the best I can for you, and I hope we will pull you through; we have no conveniences of any kind and I am just as badly off as you are." After that I was left to myself till dinner-time when he brought me a plate of soup, and at the same time brought me some medicine, and told me to take a teaspoonful night and day every four hours. At night time I was feverish and was a little out of my mind, and did not know anything about myself until the morning.
1278. Had you no person attending to you at all that night? No; Hughes slept in the same compartment a part of the night, but the next night I was worse still and there was nobody there, and after 10 o'clock the lamp went out and it was quite dark, and in the morning I found myself at the end of the bed with my nose on the iron, but I managed to get under the blankets again. I stayed two more days in bed and saw Dr. Walsh every day, and on Thursday morning; that was the fourth morning; he brought me some hot water and told me to wash myself all over and come on deck and I did so, and I had the same shirt on that I had come on board with. I had some clean clothes packed up to take with me before I left Sydney, but the constable told me to take nothing as I would get everything there.
1279. How long did you wear that shirt that you went down with? I wore it till Harris died and then I threw it overboard, and then I had none for three days, and Carroll brought me a blue jumper and a pair of moleskin trousers, which I wore till Dr. Beattie came and gave me an undershirt.
1280. *Dr. Jones.*] How many days did you wear that shirt? From the 10th July to the 7th August, but I washed it a couple of times.
1281. *President.*] During the whole time you were ill had you any one to attend upon you? They brought me a cup of tea at meal times; one day they brought me some rice, but it was only half boiled.
1282. Was there any one to make your bed for you? No; I shook it up myself every day.
1283. Had you any sheets given to you for your bed? No; I never saw a sheet until about a week after Dr. Beattie came; I never had a towel to wipe myself with. One day he brought me down an old rag, greasy from the table, and I washed that and used it till Dr. Beattie came. I never saw a comb all the time and could not get my hair combed, and I had to go three days without trousers at the time Harris died. The doctor said, "If you put him in the coffin you will get some new clothes," and I helped to carry him down to the coffin; and when Carroll came alongside and the doctor asked him for some clothes he said he would send to Sydney for them. The next morning he said we would get them to-morrow, and the morning after that he went to the store and brought them over.
1284. *Dr. Manning.*] What did you do when you had no trousers? I had a blanket on.
1285. *President.*] When you became convalescent did you assist to nurse the other persons on board? I was the only one that did what little was done for them, cooking things for them. Sometimes they would eat them, and sometimes not.

E. W.  
Verdich.

18 Oct., 1881.

1286. Was any better provision made for them on board than there was for the others? No, not at all; they did not get any change of bedding, and were left to make their motions in bed when they could not get up, and left to lie on the same bed; and when they were able to stand up they were told to go on deck and do what they required. The first patient, who came about a fortnight after me, was the boy Douglas, and he only remained four days in bed, the same as me.

1287. *Dr. MacLaurin.*] You considered yourself well then four days after you went on board the "Faraway"? Yes; I was a little weak, but quite well.

1288. And how long were you ill before you went down? Two days. I was not ill; I had only a little headache.

1289. So that you were only ill six days altogether? Yes.

1290. *Dr. Manning.*] Did you get eggs, or things of that kind, when you were ill? I never saw any eggs; we got milk for our tea, and sometimes we did not get milk.

1291. Did you get beef-tea? Only what we boiled out of the beef they sent us; nothing in tins, or anything of that kind.

1292. *Dr. Jones.*] Did you get any wine or spirits? Sometimes Dr. Walsh would offer me a glass of spirits, but I did not care about it. I got brandy once or twice while I was sick. The doctor said I must take it, as it was good for me.

1293. You have said that you knew patients to lie in their evacuations? Yes.

1294. How long have you known them to do that? Harris laid two days like that; he was insensible, and the night before Dougherty (Parkes) died I observed he had done his motion in the bed, and I told Dr. Walsh, and said there was an old mattrass down below, should I get it? and he said, "Yes, if you think it will do him any good," and I got it and put it on the top of the other.

1295. *President.*] Was there any disagreeable stench? Yes. When Harris and Dougherty came on board I slept below with them, and Douglas too; there were four of us, and the stench was so bad that I and Douglas could not sleep, and we went up on deck, and put our beds on the top of the hatch; and while we were there the sick men came up in the night-time when they wanted to go to the closet, and woke us up, and I had to go and help them down. Harris came up once afterwards; he was delirious; and Hutton came the second night after he came on board, about midnight; I was asleep, and I was woke up by a noise, and there he was, standing quite naked, and looking over the gangway. I got up and got him away from the gangway, and called Dr. Walsh, and he sent him to bed, and put an ice-chest before the opening to stop him from getting out again.

1296. *Dr. Manning.*] Who cleaned the ship at this time? We washed the decks. We were promised if we cleaned the ship outside we would be sent away in a few days; but it was four or five weeks before we went.

1297. *Dr. MacLaurin.*] Who promised you that? Carroll; he would say we would get away to-morrow, always to-morrow; many a time he has told us that. He used to say those were his orders from Dr. Alleyne that we were to go ashore to-morrow; and then at last he said, "I won't tell you any more, because I can't send you ashore."

1298. *Captain Hixson.*] How often did you see Carroll? I saw young Carroll every morning, and sometimes his father was with him, and whenever the sick people were brought he would always come over and tell us.

1299. You never saw Dr. Alleyne? No; I would not know him if I saw him.

1300. *Dr. Manning.*] Was Dr. Walsh kind and attentive to the patients? Sometimes, and sometimes he spoke very roughly. The Sunday Harris died we got him into the coffin and thought we were going to get him ashore that day, but Carroll came and said he could not take him till the morning, and he was left on deck all night; and late at night Dougherty came up and went round the deck, and I went after him to see where he would go to, and he stood looking at the coffin, and I said he had better go down or he would get cold, and I got him down; and then I went to bed, and afterwards I saw him up again looking at the coffin, and I said, "This won't do, you will catch cold," and he said, "I have a got blanket over my head"; then I went and told Dr. Walsh, and he said, "Dougherty, if you don't go down I will tie you to your bed," and Dougherty went below after that and stopped there.

1301. Did you consider that Dr. Walsh was always sober during the time you were on board? Whenever he had any brandy he would drink it, but I never knew him that drunk that he could not stand up.

1302. But you thought he was under the influence of liquor? Yes, by his talk, and the way he would tell old stories.

1303. *Dr. Jones.*] But you did not see him drunk? I never saw him take that quantity that he would get drunk from at one time—oh, no.

1304. *Captain Hixson.*] Did you notice what quantity of brandy would come on board at one time? Yes; sometimes it would come every other day; sometimes every three days; it all depended upon Carroll; he would say to Dr. Walsh, "If you be a good boy I will bring you a bottle of brandy to-morrow," and at other times he would say, "I have got none." There used to come two bottles of porter and one of beer at a time, never more than four bottles, sometimes every other day; it all depended upon whether they had it in the store.

1305. Did you get any? Dr. Walsh sometimes offered me a glass, but I did not care for it.

1306. Were the sick or the convalescent people on board given a portion of it? There was nothing regular given, only when Dr. Walsh asked them; all the beer and the brandy and port wine went to the cabin. When the sick people got port wine I had to go to Dr. Walsh and ask for it, and then I had to pour it down.

1307. *Dr. Jones.*] There was no regular ration of spirits or wine I suppose? No, the Chinamen went aft several times with half-a-crown and wanted to buy a bottle of beer for their sick men, and they got two or three bottles given to them.

1308. *President.*] Is there anything else you would like to state as to matters connected with the "Faraway" before you complete your evidence? There were four healthy Chinamen there, and they were all in the same compartment with the sick ones; they never had small-pox, and they did not get it there.

1309. How long did you remain in the healthy ground after you went ashore? I was 9 weeks and 4 days in the "Faraway," and I was 11 weeks and 2 days away altogether.

1310. Is there anything with reference to the management of the healthy ground about which you have any complaint to make? No, they did everything to make us comfortable.

1311.

- E. W. Verdich.  
18 Oct., 1881.
1311. Who was in charge of the healthy ground when you were removed to it? I suppose Dr. Beattie was when we went to the cabin enclosure.
1312. *Capt. Hixson.*] Will you explain how you were taken ill, and what was the reason of your going to the Quarantine Station? On the morning of Saturday they sent a policeman to see me, and he asked if I was sick; I had a rash coming out that looked suspicious. At the same time my partner went to see my lodge doctor; I had taken some opening medicine, and I felt quite well when that rash came out. I sent for my lodge doctor, but he did not come until after the Government doctor had been. The Government doctor came up to the gate—I was standing inside—and told me to come forward, and not to come too near him; then he looked at me and said "All right" and went away. Two minutes afterwards, Dr. Riedervaldt came and looked at me and said, "I believe you have got small-pox," and I said the other doctor had come and he had better go out, and he went down the stairs and left.
1313. *President.*] Did you then consent to go to the Quarantine Station? There was no consent asked; I was told to be ready to-morrow morning; I could not go anywhere or speak to anyone; there was a policeman outside the door.
1314. You did not refuse to go? I was never asked; I was told by the policeman if I wanted anything I was to ask him; I said I wanted medical attendance, and he said I could not get that.

Michael Maher, sworn and examined:—

- M. Maher,  
18 Oct., 1881.
1315. *President.*] You were employed on board the "Faraway," were you not? Yes.
1316. In what capacity? As master.
1317. And you were employed in taking patients from the Woolloomooloo wharf to the Quarantine ground? Yes.
1318. Do you remember Mrs. Monahan being towed down behind the "Pinafore"? Yes.
1319. Was any doctor on board the "Pinafore" on that occasion? No.
1320. Do you remember Verdich being towed down? Yes.
1321. Was any doctor on board then? No.
1322. Do you remember Mrs. Guildford being taken down? Yes.
1323. There was a doctor on board then, was there not? Yes, Dr. Caffyn.
1324. It has been stated in the press that Dr. Caffyn said to the people on board the "Pinafore," "shove her under the seat";—did you hear those words used? No, nothing of the sort, because when Mr. Guildford was coming down the stairs the blanket got under his feet and would have tripped him, and I went to help him and Dr. Caffyn told me to come away; and I said "No, I am not frightened," and I went and helped Mr. Guildford on board with his wife.
1325. Then if any remarks, such as those I have alluded to, had been made, you would have heard it? Yes, because I was standing quite close to him, within a yard of him. Reynolds the policeman was on board at the same time.
1326. Did you see anything to complain of in the treatment of people as they were conveyed to the ground on board the "Pinafore"? No; I always did anything for them they wanted, as far as I could.
1327. Are you still employed in the "Pinafore"? No.
1328. When did you leave her? On the 14th of last month.
1329. *Captain Hixson.*] You went down in her in the first instance? Yes.
1330. And you were employed there until the 14th September? Yes, in charge of the boat.
1331. When did they first begin to have a doctor on board during her trips? That I could not tell you.
1332. *President.*] But after the practice was once commenced it was continued, was it not? Yes, that is the reason I left, on account of the doctor, because he was so dirty.
1333. Did you resign your situation on that account? Yes, and moreover the treatment we got.
1334. In what way had you to complain of the treatment? If I asked for clothes I could not get them; I was three weeks without them, till I sent up to Sydney and got them.
1335. Did you apply to Dr. Spencer for a change of clothes? No.
1336. To whom did you apply? To Mr. Carroll, and he said he had none in the store, but he would get some to-morrow; he used to put us off in that way from day to day, and I said, "We must go and see Dr. Alleyne ourselves," and then he called us over and gave us a suit of clothes; that was after I had sent to Sydney for some. He kept us three weeks smoking tea leaves, because we could not get tobacco, and we had nothing to boil anything in; we had to scrape the paint off a paint-tin and use that.
1337. *Captain Hixson.*] Did you apply for cooking utensils? Yes, we applied to Mr. Carroll as soon as we went down; that was our master's orders; Captain Hixson gave the order.
1338. *President.*] You have alluded to Dr. Spencer being so dirty;—can you tell us how that was? He was there five days and would not wash himself, and he was fifty-one days with the one shirt on; when Mr. Carroll gave him a Crimean shirt he took off the one he had on, put on the Crimean shirt, and then was about to put on the dirty one over it, and I told to leave it there and I would wash it, and I washed it for him.
1339. *Captain Hixson.*] Where did he sleep? Down below with us, because there was no other place to sleep; it was not in the cabin, it was down below in the hatch; it was not caulked, and in wet weather we had to sit up with blankets over us; Dr. Clune got wet blankets to sleep in the same as we did.
1340. *President.*] Is there any other matter connected with the Quarantine Station, or that came under your observation, that you wish to state to the Commission? No, sir.
1341. *Captain Hixson.*] What was the reason of Verdich's being towed behind the "Pinafore" in the whaleboat;—why did not you take him on board? That was the order, and we had to obey it; we were ordered to get the long-boat up and tow Verdich down in it.
1342. From whom did you receive that order? From Carroll; we had a telegram to get the long-boat up and tow him down in it.
1343. *President.*] Do you know whether the boat was dry? No, it was not, and when it started raining I got a blanket and threw it over Verdich.
1344. *Captain Hixson.*] There was no reason why he should not have been taken down in the "Pinafore," was there? No, I have taken worse cases down.

1435. Had you orders to tow Mrs. Monahan down? Yes, we had orders from Mr. Carroll, and the Inspector here told us to put her in the boat; Mr. Dawson went and got some planks, and I pulled the boat out and put the planks in the bottom of it, and some bags and sacks on them. M. Maher.  
18 Oct., 1881.
1436. *President.*] Was the boat wet at the time? Yes, it was leaky.
1437. Was anybody in the boat with Mrs. Monahan? Yes, Mrs. Fisher, Mrs. Monahan's girl, and little child.
1438. There was no one in the boat to take care of her? No; because I used to pull the boat up close.
1439. Do you remember who went down in the "Pinafore" at the time Verdich was towed behind her? I would not be sure—I think it was Mr. Monahan.
1440. *Captain Hixson.*] But you are quite sure you had healthy people in the boat when Verdich was towed down? Yes.
1441. *President.*] It has been stated that once or twice people have been kept waiting for the "Pinafore"? Yes, once we broke our wheel chains and had to repair them, and that delayed us half an hour.
1442. Was that the only time you were behind the appointed hour at which you were ordered to be at the Woolloomooloo wharf? Yes.
1443. *Captain Hixson.*] Were you ever prevented from crossing the Heads by bad weather? Yes, about four times.
1444. What inconvenience did this delay cause arising from bad weather? None at all that I know of.
1445. Did it prevent the rations from coming down? No, only the sick people, because the ration boat is all covered over.
1446. Then, so far as you understand, the rations were never delayed? No, never; they always went down every day.
1447. But you were delayed sometimes by bad weather? Yes, four times.

Frederick Jefferson sworn and examined:—

1448. *President.*] You were sent down to the Quarantine Station on the 16th June last? Yes. F. Jefferson.  
18 Oct., 1881.
1449. And did you go direct to the healthy ground there? No.
1450. You went first to the hospital enclosure? Yes.
1451. How long were you kept there? I was there one night and part of a day; I am not quite sure.
1452. And then you were removed to the healthy ground? Yes.
1453. How long did you remain in the healthy ground? About ten weeks.
1454. Have you any complaint to make of the treatment you received while you were at the Quarantine Station? No.
1455. Were you able to get such changes of clothing as you required? I never asked for any; I had two complete suits with me.
1456. Were you well provided with food? I had plenty to eat, sir.
1457. And what sleeping accommodation had you? It was rough, but substantial; I had plenty of blankets.
1458. Was the house you were in watertight? No; in rainy weather the wet used to come through the roof.
1459. Had you any sheets for your bed? No, none of those things.
1460. What is your occupation? I am a labourer; I was a seafaring man, but I am working on shore now.
1461. Then considering the circumstances under which you went to the Quarantine Station you have no complaint to make of the treatment you received there? No, not as far as I am concerned.
1462. Do you wish to tell us anything in connection with the Quarantine Station? No.
1463. Why were you sent down there? There was a person sick in the house where I was boarding in Cumberland-street, Mrs. Guildford, in Mr. Keat's house.

Thomas M'Keown sworn and examined:—

1464. *President.*] You were sent to the Quarantine Station on the 16th June? Yes. T. M'Keown.  
18 Oct., 1881.
1465. You lived in the same house as Mrs. Rout? Yes.
1466. Were you on your arrival at the Quarantine Station placed in the healthy ground? We were placed in the hospital enclosure where the infected people were placed, but there was no one there at the time.
1467. How long did you remain there? Two days.
1468. And then you were removed to the healthy ground? Yes, and we remained there till the 26th August.
1469. Have you any complaint to make of your treatment while there? Yes; we got there about half-past 1 o'clock and there were no provisions of any kind. I got nothing to eat until dark the same evening, and after two or three weeks we were stinted in all provisions; after that we were treated very fairly as to provisions. I was there seven weeks and had no boots, and I was walking about almost barefooted; I applied for boots and could not get them for three or four weeks; I told the doctor, and he said he had telegraphed several times about them.
1470. Had you good sleeping accommodation? Yes, the sleeping accommodation was very fair.
1471. Had you plenty of clothing? Yes.
1472. Is there any other matter connected with your stay there that you wish to state? My wife was laid up there and Dr. Caffyn ordered her some porter, and I asked him for it two or three times, and he said he had never received it.
1473. Did he give you any reason why it could not be got? He said it was not there, but I think the same morning he got some for himself.
1474. How do you know that? I would not be certain whether it was the same morning or the following morning he had it; he used to get about seven bottles almost every day of different kinds of liquor.
1475. Did your wife get any change of clothing while she was there? No; she got a change when she was coming away.

- T. M'Keown. 1476. Did you take clothes down with you? Yes sir.  
 18 Oct., 1881. 1477. *Captain Hixson.*] Did you ask for clothes for your wife? No, I did not.  
 1478. *President.*] You asked for boots, did you not? Yes, my wife did not use the boots that were got for her; they were big strong leather boots. I used the pair given to me.  
 1479. *Dr. Manning.*] You said the doctor got seven bottles of liquor almost every day? Yes; about seven.  
 1480. What did he do with them? I could not say.  
 1481. *President.*] Did any of the people in the healthy ground receive from the doctor supplies of wine or spirits? No, my wife had a couple of spoonfuls of brandy, that is all.  
 1482. *Captain Hixson.*] What do you think became of those bottles? I could not say.  
 1483. *Dr. Manning.*] Where did the doctor get them from? They were sent up from the store.

THURSDAY, 20 OCTOBER, 1881.

Present:—

DR. JONES,	DR. MANNING,
DR. MACLAURIN,	CAPT. HIXSON,
MR. STREET.	

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Louis Foucart, Esquire, M.D., C.M., L.R.C.S., F.R.C.S.E., Assistant Health Officer, sworn and examined:—

- Dr. Foucart. 1484. *President.*] You are a legally qualified medical practitioner of the Colony? I am; I am also assistant Health Officer of this port, and have been acting in that capacity for the last five years.  
 20 Oct., 1881. 1485. You were down at the Quarantine Station some time, were you not? Yes.  
 1486. How long were you there? I went there on 20th August, and was released on the 11th of this month.  
 1487. Did you take charge of the healthy ground? My instructions were to go and examine the healthy people that were ready to come away, and then to come back to town. I was requested to go for two or three days only, and was detained nearly two months.  
 1488. Can you tell us the reason of your detention? I cannot say positively, but I presume to take charge of some fresh convalescent patients. I was unable, in consequence of my detention, to sign some important deeds, and have become involved in some litigation in consequence.  
 1489. Did you remonstrate against your detention? Yes; I was told to go for two or three days, instead of which I was kept there two months. Had I been aware of the probable detention I would have signed the deeds beforehand.  
 1490. To whom did you address your remonstrances? To Dr. Alleyne's clerk anent the deeds, and then to himself, and then to the Under Secretary, Mr. Eagar, and he telegraphed to me that he had applied to Mr. Watson, who gave my solicitor permission to send the deeds on the 6th instant to me to sign, but they were never forwarded to me whilst in quarantine.  
 1491. Were you requested to undertake any medical supervision of the place? I was merely asked to examine the people who were ready to come away, but when there, in my official capacity, I took charge of the healthy people.  
 1492. But afterwards did you receive instructions to remain in charge? I received no further instructions for some time, but I was told to remain where I was, and that I should be released in a few days, but some time afterwards I received official instructions that I was to be placed in charge of another lot of convalescent persons.  
 1493. In what way did you receive this information that you were to remain longer? By a letter from Dr. Alleyne, which I have, and verbally.  
 1494. Did he in that letter give any reason for your detention there? Nothing beyond what I have already stated. I was always told that I should be released in a few days, and these few days went on for weeks and months. I afterwards received a letter from him requiring further duties from me.  
 1495. Was the request to you to go down to the Quarantine Station to examine these people made to you by letter or verbally? Verbally. I was requested by Mr. Eagar to examine some people here, and I had an engagement with him at his office at 9 o'clock on Saturday morning to see him, with the object of superintending the disinfection of some houses. But on Friday night I was called by Dr. Alleyne, who told me that it was imperative upon me to go down to the Quarantine Station at 10 o'clock the following morning, Saturday, in order to release a number of persons that were healthy to see if they were fit to come away, and then I should be released myself, which would occupy two or three days.  
 1496. Was any medical gentlemen there when you went down? Yes; Mr. Caffyn.  
 1497. And you gave an order for his release? Yes.  
 1498. And when did any other medical gentleman arrive there after Dr. Caffyn had left? Mr. Beattie came about the 9th September.  
 1499. And you were there a month after Dr. Beattie went down? Yes.  
 1500. Did you perform any duties during that month? Yes, I examined all the people that were sent up here; there are now only five patients altogether remaining there. I instructed Dr. Beattie in the Quarantine duties and regulations, and also Sergeant Logan.  
 1501. And during that time you received no further instructions from the Government or anybody, to take any further charge of the place? Yes, as to the duties above stated; I also received a telegram from Dr. Alleyne three or four days before Dr. Beattie came down, asking me what medicines I required, as a certain number of persons would be placed under my charge, and I took medical charge of the places and said I should require a medicine chest; the people I took charge of were those that were released from the hospital enclosure and the "Faraway."  
 1502. Can you tell us what condition of things you found when you got there? I found the people all dissatisfied.  
 1503. Did they explain to you the reasons for their dissatisfaction? Yes, they complained of the accommodation; they complained of the quality of the food supplied to them, and that no one would come down

down and listen to their complaints; and they complained of their detention; that they were not allowed to communicate with their friends except by telegrams which were inspected; and that Dr. Alleyne never came down to see them. Dr. Foucart.  
20 Oct., 1881.

1504. From your personal observation did you consider those complaints reasonable? I consider the complaints with regard to the food reasonable.

1505. Will you explain in what way it was not up to the mark? The meat was generally very tough and of inferior quality, the other things were passable.

1506. Was the bread of good quality? Yes, pretty fair; the bread whilst I was there was good.

1507. Were they supplied with milk? Yes.

1508. Fresh or condensed? Both; fresh milk for the children, and condensed milk for adults.

1509. Did you think they had a sufficiency of clothing given to them? Oh, yes, whilst I was there.

1510. Were the houses sufficiently comfortable for them? They could have been made more comfortable. There was a great deal of excitement and irritation among the people, and they were highly dissatisfied; the following or second batch of people released were made much more comfortable. These people, of whom I had the care in the healthy ground, were all convalescent, people undergoing a certain probation. I had nothing to do with the infected ground.

1511. Were there any cases which you were unable to treat for want of medicines? No; there were only about five cases of persons who came to me for medicine: Constable Cook, whom I treated for a cold; Hughes who wanted some seidlitz powders, which I gave him, having then had the medicine chest; Mrs. Rout, who asked me for some female pills which I had not to give her—I offered to send for them, but she told me afterwards she did not require them; and two or three policemen who came to me for opening medicine, which I gave them.

1512. Then the want of medicines did not occasion you any serious inconvenience? No; the people being all of them healthy.

1513. Is there anything else with reference to the management of the Quarantine Station during the time you were staying there that you wish to mention to the Commission? Yes, with regard to the accommodation provided for the people when I went there, the rooms were large and cold and draughty; the people objected very much to these houses. When I went down I found the people in wards on the healthy ground, after which they were removed to the cabin enclosure, where they had separate rooms, and were far more comfortable. (*Witness pointed out the position of the houses referred on the plan of the Quarantine Ground.*) I occupied the house marked "Doctor's Quarters."

1514. Did you make any application to have those people moved down to the cabin enclosure? It was no use then to make an application as they were just going away; the order came from the Colonial Treasurer, through Dr. Alleyne, immediately after the release of the first party, three or four days after my arrival.

1515. Is there anything else you wish to mention with regard to the management of the ground? The people who were there when I first went were the most dissatisfied of all; they were of course very much dissatisfied with their continued detention; they were to have gone away at the beginning of the week, and I detained them a day or two longer because one of the children showed a suspicious eruption, and that may have made them more dissatisfied. Besides the weather was too moist and boisterous to justify me in allowing women and children at that time to walk through the bush half a mile to Collins' flat to embark.

1516. *Dr. Manning.*] Who obtained the clothes for these people to come to Sydney in—by whose orders were they obtained? Mr. Carroll.

1517. Then if there was any deficiency of clothing for them to come to Sydney, in whose fault was it? It would be the fault of the contractor, that is supposing Carroll to have ordered the proper quantity.

1518. Did you give any list of clothing to Mr. Carroll? Yes, I did better; I engaged Mrs. Keats to ascertain what the women wanted and to get their measure, and she gave me a list of all that they wanted, with their respective measurements.

1519. How long was that before the people went away? About three or four days.

1520. Did these clothes arrive before the people went away? Carroll told me he had them all in the store.

1521. So that if there was a deficiency of clothing when the people went away it was not your fault? No; but afterwards, to make sure that everything was there, I told Carroll to make an inspection and verification of them in accordance with the list, and he came back with a list of a few things more that were wanting, and I sent for them.

1522. Did those things arrive in time? As far as I know they did, so Carroll reported to me.

1523. So that you had all that was required? No, there were some few things wanting when the people were being clothed.

1524. *Captain Hixson.*] Did the people express any dissatisfaction at the clothes that were given to them? Yes, they wanted some more things, and complained that some of the things did not properly fit them.

1525. *President.*] Were they told that if they waited a little longer they would get a better supply? Yes, I repeatedly pressed them to do so.

1526. But I suppose they were in such a hurry that they would not wait? Yes, some of them said they would go if they had only a blanket to cover them; they wanted so to get away from the ground.

1527. Can you tell us how soon after your arrival Mr. Carroll was relieved from his duties? It was on the 9th September that Dr. Beattie arrived, and I think it was on the 7th that Carroll was suspended, by the arrival of Sergeant Logan.

1528. *Captain Hixson.*] So far as you could observe, did you take any objection to Carroll's doings while you were there? No, except a few articles of clothing that were wanting, as I have stated.

1529. Did he appear attentive to his duties? Yes, always sober and at his post, invariably.

1530. There have been great complaints of niggardliness and stinginess in dealing out the stores; did you notice anything of the kind? He has always been very saving of the Government property, exceedingly so.

1531. Do you happen to know if he had stores on board with which he could have made the people more comfortable if he had given them out? I had no idea what stores he had, because I had no access to his books, and my going into his store was an intrusion, so I could not say; the store seemed to be filled. If I gave him instructions to do anything he always did it to the best of his ability.

1532. And so far as your experience goes you had no fault to find with him? I have had, in my official capacity, five years' experience of him, and I have had no fault to find with him; but that is his peculiarity, saving the Government property as much as he can. This was his first experience of having people sent  
down

- Dr. Foucart. down from Sydney ; it was an entirely different system to that to which he had been accustomed, and he was not at all acquainted with the *modus operandi*—he was taken aback, no doubt.
- 20 Oct., 1881. 1433. So far as you were personally concerned you had no complaint to make, and you got everything you wanted? I have no complaint to make of Mr. Carroll; I got everything I wanted, except on that single occasion, when the first batch of people came away. All the others were well supplied and perfectly to their satisfaction, because I saw all the things they required correctly measured and tried on and given to them myself, they being then under my immediate care.
1434. With regard to cooking utensils and things of that kind, were any complaints made to you? I heard complaints about a cooking stove being broken, but that, I have no doubt, was done purposely.
1435. *Dr. MacLaurin.*] Do you know that the stove was purposely broken? I found one of the stoves broken when I went there, and of course that was a drawback to the cooking; some one must have done it.
1436. *Capt. Hixson.*] Did you know any reason for their discontent? They had nothing to do with themselves—they had no occupation, and therefore encouraged each other in making all sorts of complaints. There was very little space, they were confined within narrow limits, and their whole thoughts were about their grievances. Most of the complaints were either imaginary or very puerile, their detention being the chief subject of complaint. They had no supply of moral or intellectual food in the form of books.
1437. Did you know the people to make idle or unnecessary complaints? Very often.
1438. *President.*] If you have any further statement to make we shall be very glad to hear it? I found the grave-yard a great objection. When I went there the smell was very offensive; the people were complaining, and certainly they had grounds for complaint, with all the small-pox graves so near them. I found the grave-diggers were burying the bodies so that there was not more than 14 inches of soil on the top of the coffins, so it was reported to me. I went there and found the stench overbearing, and I had the graves covered with lime and banked over with clay; and I employed a very intelligent man, Constable Cook, to go with me and sound the ground round about; the result was that we found an excellent grave-yard at some distance from the ground which had a south-eastern aspect with a fall in the right direction, towards the south-east, and with about 14 feet of soil all through it. So I recommended that spot as the place for a new cemetery. My recommendation was adopted and we shut up the old cemetery.
1439. *Captain Hixson.*] Was the old grave-yard which you spoke of first so rocky that the graves could not be dug to a proper depth? No, I do not know that it was rocky; the grave-diggers told me it was full, so many people had been buried in it.
1440. *Dr. Jones.*] What distance were the graves from the enclosure of which you had charge? About 4 chains from the buildings on the healthy ground, and at a higher elevation, so that the drainage percolated towards the houses. The piece of ground I selected for a grave-yard is about 100 paces square, much further to the east; the fall of the ground is in the opposite direction to the houses, with the hill between and there is now a road to it well made.
1441. *Captain Hixson.*] Who do you consider was responsible for the condition of things in the old grave-yard? I am sure I could not say.
1442. You state that you found the grave-yard so offensive that you went further and found a suitable place for a new grave-yard, and that the burials took place there afterwards? Yes.
1443. Did you consider it your duty to effect this improvement? I did not do it without permission; I have no power to act on my own responsibility. I immediately telegraphed to Dr. Alleyne, my senior officer, the state of affairs, and told him I had found a much more suitable site, and he sent me back a telegram to say that he had obtained permission from the Executive to adopt such a site as I might choose.
1444. Could the medical man who was there before you have corrected the abuse in the same manner as you did? I do not like to answer that question, as I do not care to criticise other people's actions.
1445. *President.*] The same means were open to him as to you? Yes.
1446. Do you know whose duty it was to see that the grave-diggers dug the graves to a proper depth? That would depend entirely upon who Dr. Alleyne would order to superintend them.
1447. During the time these graves were dug it was some person's duty I suppose? Yes, but I was locked up in solitary confinement in quarantine in On Chong's house in Sydney at that time so that I cannot say.
1448. Did you see any empty coffins lying about the ground when you were there? No, I did not.
1449. Have you any further remarks to make? I think if the present landing-place were lengthened about 20 feet or more it would give great facilities to the landing of persons and stores. The landing at the present pier is interfered with by a large rock.
1450. *Dr. Manning.*] Could the "Pinafore" always get alongside the present jetty? No, not at low water.
1551. And when she could not get alongside the present jetty how were the passengers and sick persons landed? By boat. There is another thing I may mention: At present the Government are at a great expense in sending water-tanks down to the Quarantine ground, and a good deal of inconvenience is caused by the want of water, which could be avoided by making provision to store the water on the ground; there is abundance of water there if there were only some means of collecting it; there is a running creek of the most beautiful water, and there are two places where ponds or reservoirs could be made with advantage whereby there would be abundant storage of water for the requirements of the station without sending to Sydney for it.
1552. *President.*] Did not the creek you speak of run dry a short time ago? It run dry once during a very hot summer, but it would provide an ample supply if ponds were made to hold the water.
1553. Would not the drainage from the old grave-yard go towards the creek? No, it would not affect the creek.
1554. Was there water in the creek when you went there—in August or September? Yes, it was running; it runs the greater part of the year; it is beautiful water and there is every facility for storing it. The next point to which I would call your attention is the fact that the presumed healthy people and stores are brought to the ground between the hospital enclosure and the "Faraway," exposed to infection on either side. I would recommend the removal of the "Faraway" to a bay further north so that she might be anchored opposite the boatmen's quarters where there is good anchorage, and that a more suitable situation should be found for the hospital. The site I should recommend would be south of the doctor's quarters, and to which there is an isolated path at a distance from the healthy houses. I would also make a recommendation with reference to the conduct of affairs at the Quarantine Station.
- With

With regard to the issue of stimulants I would call your attention to the irregular supply; an indiscriminate, and in many cases unnecessary, issue of stimulants, has been going on pretty lavishly during my stay there, which has resulted in a good deal of discontent; everyone wants more than his neighbour, and a good deal of dissatisfaction and annoyance has been caused thereby.

1555. *Dr. Manning.*] Will you explain what the present system is? There is no system at all. I recommend that a record should be kept of every bottle of brandy or beer disposed of, to whom it is given and for what purpose; I have found several persons tipsy there at times.

1556. *Captain Hixson.*] Were those persons employés or Quarantine people? Quarantine people.

1557. *Dr. Manning.*] Who was responsible for the issue of the spirits that made these people tipsy? I would rather avoid answering that question.

1558. *President.*] Did you order them? No, certainly, and I do not use them myself; I am almost a teetotaler.

1559. Who had charge of the spirits on the ground? As soon as Dr. Beattie came they were under his charge. Prior to that they were under Mr. Carroll's charge. Mr. Day, in the enclosure, had charge of what he drew from Mr. Carroll.

1560. *Dr. Jones.*] There is no regular spirit ration served out? No, and I think there ought to be something of the sort. I have several times advocated the keeping of a book in which there should be an entry of all stimulants issued, with the names of the parties receiving them. In that way we should know what we were doing.

1561. You say you have seen people tipsy down there? Yes.

1562. Who had charge of the spirits at the time you saw these people tipsy? I would rather avoid answering that, as that would bring a charge against a brother practitioner.

1563. *Captain Hixson.*] But we sit here to find these things out? Well, the people that I saw tipsy must have got the spirits in the enclosure. I do not know who gave it to them.

1564. *Dr. MacLaurin.*] At the time you saw these persons tipsy the charge of all the spirits was under Mr. Day? Yes; but I cannot say who gave them.

1565. *Captain Hixson.*] Have you ever known any persons to be tipsy whose duty it was to take care of the station? I charged one man with being a little tipsy who was employed on the station, and he admitted the fact, but he said he had smuggled the spirits.

1566. *President.*] Who was that man? He was one of the constables.

1567. *Captain Hixson.*] Did he commit any abuse while under the influence of drink? No, I cannot say he committed anything remarkable, but I saw he was tipsy.

1568. *President.*] What system existed for the issue of spirits at the time Carroll was in charge? He had the spirits entirely under his care, and he gave out brandy or beer, according as he received instructions from Dr. Alleyne, or upon requisitions from the doctors in attendance.

1569. Did you see any abuse in the use of spirits at that time? No, but I saw that the people were continually pestering him for spirits. He complained to me frequently of the annoyance.

1570. *Dr. Manning.*] Did not Carroll issue spirits on the requisition of the medical officers there? Yes, he told me he had received requisitions from them and supplied them.

1571. And such stimulants as you required for the people in your charge, how did you obtain them? From Mr. Carroll. I obtained them by requisition.

1572. And you think that system is now no longer in existence? No. Then, with regard to the police, I would advise that before they are sent down to the station, their duties should be defined, and that they should be placed under a sergeant, who should be under the control of the Health Officer in charge of the Quarantine Station. I think, also, that there ought to be instructions as to separation of the presumably healthy people and those who are convalescing.

1573. *Dr. MacLaurin.*] Did you see the healthy and convalescing people mixed up together while you were there? Yes—the presumed healthy people with those who were undergoing probation.

1574. Since when did you see them mixed together; was it during the whole of the time you were there, or at certain periods? At certain periods during the latter part of my stay when the station was no longer under my control.

1575. *Dr. Jones.*] Since Mr. Carroll's suspension? Yes.

1576. *President.*] In your opinion is the position of the ground a suitable one for a Quarantine Station? It is not at all a suitable one for a small-pox station.

1577. For general quarantine purposes do you consider it a suitable one? I think that with the improvements I have suggested it would be very suitable for small-pox in ships, but not as a place to send small-pox patients to from Sydney. I think, too, that the boundaries of the Quarantine ground should be defined by a fence, so as to prevent pedestrians from Manly Beach from straying in ignorance on to it. I further recommend that a dispensary be fitted up in the doctor's quarters, also a dispensary in the hospital enclosure, and a medicine chest on board the "Faraway"; also that all the houses on the upper healthy ground have blinds fixed on every window, and that folding division screens be supplied to every bed; and that a well selected library with a plentiful supply of Bibles, prayer-books, and hymnals, be kept on the station for the use of the quarantined people.

Mr. John Carroll called in and further examined:—

1578. *President.*] Are you now prepared with a list of stores on hand at the time when the patients were first sent to the Quarantine Station? Yes (*handing in book to President*).

1579. Did Dr. Alleyne ask you at any time to furnish him with a list of the stores? No.

1580. At no time? At no time.

1581. Did he ever ask you if you had a sufficiency of stores for the people? No, he never asked me the question.

1582. Can you tell us why Dr. Clune occupied the large pavilion in the enclosure? Dr. Alleyne ordered him out of the house where he slept the first night, and put two of the nurses there. I told Dr. Clune he had better go into the large building where he would be more comfortable than in a tent.

1583. Was there no other house for the doctor to go into? No, there was only the house where he slept on the first night into which the nurses were put.

1584. Some complaint has been made of the delay which took place in transferring the people from this ground into the first-class ground? I could not do it without orders; once Dr. Alleyne gave me orders I did it.

1585.

Mr. J. Carroll.  
20 Oct., 1881.

- Mr. J. Carroll. 1585. Did Dr. Alleyne tell you at any time that you were not to make use of these quarters? Yes; he did.
- 20 Oct., 1881. 1586. *Captain Hixson.*] And did he tell you to make the change when you did? Yes.
1587. Then what you did was in consequence of Dr. Alleyne's order? Yes.
1588. On the 16th June a number of persons, sick and healthy, were put into the hospital enclosure;—Can you tell us why they were put there all together? The houses were all empty, and when the patients came down they were put into the hospital enclosure, and the next day they were removed to the healthy ground; they were all healthy people then; there were no sick.
1589. Where was William Keats placed when he went down? In the hospital enclosure for one night.
1590. And Mrs. Keats;—was she placed in the same enclosure? She came on the following day, and the healthy people were removed out of the enclosure before she came. They were never mixed together, the sick and the healthy.
1591. The day on which Keats was sent down was Thursday? It was the 16th, I know.
1592. Is it not a fact that Keats and the others remained in this enclosure with the sick people, Mrs. Guildford and others, until the Saturday? No, they did not.
1593. Do you remember Dr. Alleyne visiting the place on the Saturday? I do.
1594. Did he not then order the separation of the people? Yes, he did.
1595. Then they must have been all together? Yes, I believe you are right; they were.
1596. How was it that you did not remove them directly Mrs. Guildford, the sick person, was brought down to the enclosure? They were removed immediately after.
1597. It was on the following day, was it not? Mrs. Guildford came down there at night, and they could not be removed with the children till the morning; it was done as soon as it could be done.
1598. Have you any rules, printed or otherwise, for the management of the Quarantine Station? Yes; I gave them to Dr. Beattie. I can bring them next time I come.

TUESDAY, 25 OCTOBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPT. HIXSON,
MR. STREET.		

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Michael Joseph Clune, Esq., M.A., M.K.Q.C.P.I., and L.R.C.S.I., sworn and examined:—

- Dr. M. J. Clune. 1599. *President.*] You are a legally qualified medical practitioner of this Colony? Yes.
- 25 Oct., 1881. 1600. Can you inform the Commission under what circumstances you went to the Quarantine Station in June last? I think it was about the 14th June I was called upon by Mrs. Rout. She described the symptoms that her husband was suffering from, and it struck me they were very much like small-pox, and I expressed myself in such a way that she was led to believe it was. I said I could not possibly go to see him that night, not being very well myself, but that I would go the first thing in the morning. I asked her if her husband had been working anywhere near On Chong's house.
1601. What we want to know more particularly is the action taken by the Government in connection with your removal to the Quarantine Station? I saw Mr. Rout the next morning, and pronounced it to be a decided case of small-pox. I communicated this to certain medical gentlemen, and they did not seem to care about seeing the case for fear they should be sent to Quarantine. I called at the Australian Club to see Dr. Alleyne, but he was not in, and I wrote a note to him stating that a case of small-pox had occurred in Bellevue-street and would he kindly see the case. In the afternoon I received a note stating that Dr. Caffyn would see the case instead. Dr. Caffyn accompanied me to the house at about 4 o'clock, and agreed with me in my diagnosis. When I offered to continue my attendance, he told me in the presence of Mrs. Keen and Mrs. Rout that he was acting under the authority of Dr. Alleyne, and that I could not do so, inasmuch as the house was to be quarantined, and he would take charge of and be responsible for the case, or the Government would take the case in hand, or words to that effect, and I saw no more of the case. The following day, or a day or two after—I think it was on the 16th June—about noon, I was waiting in the police yard to get some lymph, in company with Dr. Sedgwick, of Newtown, and whilst there Superintendent Read touched me on the shoulder and informed me it was the intention of the Government to have me removed to the Quarantine Station. I told him I would not go—that the Government could not remove me. Some conversation took place between Dr. Sedgwick and myself and a solicitor there, and they advised me not to go—that the Government could not take me. Superintendent Read then asked me to go to the Treasury, and I went there about 1 or 2 o'clock. While there Mr. Eagar informed me that I would have to go to the Quarantine Station, that there was no alternative, the Executive had determined to send me. I protested strongly against this treatment, and when I informed him that I would not go, he replied, "If you do not go we will force you to go, but we like to put it to you in a gentlemanly and polite way." After I left the Treasury one of the inspectors said he regretted very much the state of things. Immediately afterwards, I met Dr. Alleyne and told him the result of the interview I had just had with Mr. Eagar, and asked him if they could take me or whether it was their intention to take me. He gave no reply, and shook his head. About 9 o'clock I think that night Inspector Mackay called upon me at my house and told me I might rest that night, and that in all probability I should not be removed before the morning. Subsequently, about an hour afterwards, a detective in plain clothes called upon me and told me that Superintendent Read had sent for me. I was then about to go to bed. I refused to walk, and said if it was the intention of the Government to take me he would have to get a cab for me. He told me to take a cab, and Superintendent Read would see to it. I made no resistance at that time beyond stating that I objected to go. My wife was terror stricken, and almost paralyzed with fear when the policeman came to take me. I asked whether they intended to take me, and he said "Yes," and I made no further resistance lest the scene might cause further alarm to my wife.

1602. Were you under the impression that if you had refused to go they would have removed you by force? I felt quite sure from what Mr. Eagar had said to me that they intended to take me by force; he told me so—that he would force me to go; in fact, I was told during the day that if I attempted to escape they would arrest me; the policeman told me so in answer to my inquiries, but I do not know the names of the different policemen.

1603. *Dr. MacLaurin.*] In fact you were told by Mr. Eagar that your consent was not required? Yes.

1604. *President.*] Then I suppose you went down to the "Pinafore"? Yes. I went to the "Pinafore"; there was a great deal of confusion there; it was a very dark night, and I think it was about half-past 10 o'clock when we got there, and we waited an hour and a half at the wharf; it was very cold.

1605. There were other people who went down at the same time, were there not? Yes; there were several Chinamen and Mr. Rout, and Mrs. Keen, and Dr. Caffyn. I could not say how many there were, it was so dark.

1606. And what occurred upon your arrival at the Quarantine ground? We were detained in the cold for an hour and a half or two hours.

1607. How long were you going down? I could not say; it was about 2 o'clock when we got to bed.

1608. Who received you at the Quarantine Station on your arrival? After waiting for an hour and a half, Carroll came down from the house where he lived and he gave me a mattress, either one or two, two pillows, and two blankets, which were quite wet, but no sheets.

1609. Was it raining at the time? Not at this time. I carried my trunks up the heights, and then came down for my bed; it was pitch dark, but I managed to get a light and a candle. I had an iron stretcher, but no furniture except a table.

1610. What room did you go into;—Can you point out the building on this plan (*exhibiting plan of Quarantine ground to witness*)? I went into the building marked as the doctor's quarters in the hospital enclosure; it is a small two-roomed cottage (*indicating position of cottage on plan*); it contained, I think, two iron stretchers and a table.

1611. Was there any washstand or other furniture? No, not in my room, but there was one in Dr. Caffyn's, but there was no crockery with it.

1612. How long did you remain in those quarters? I was turned out the second day; I slept there two nights; I had no attention the first night at all; I wanted a drink of water and a towel, but I could get no comfort at all, or even a match, and had the greatest difficulty in getting a light. Dr. Caffyn also I think remained two nights in the same quarters. We wrote a letter the following morning stating our grievances to the Colonial Secretary; but Carroll having promised better attention, we withdrew the letter. During the two days we lived there our food was of a very rough description; it was as hard as stone, and we had scarcely any cooking utensils to cook it with.

1613. Was any servant allotted to you? I do not know; but Mrs. Keats, one of the suspected cases, was very attentive; she attended to our wants in the day-time. I think it was on the morning after we got there I went down to Carroll to take a walk, and to my surprise found myself blocked in on every side. I remonstrated with Carroll—the previous night being very dark I did not see the gate—and he laughed at me, and said I must stop where I was, and I would probably stop there for six months. The area of the enclosure is about  $1\frac{1}{2}$  acre; I don't think it is 2 acres; there are a great number of buildings on it; he told me I was certainly imprisoned for six months, and probably a little more.

1614. Did you have any communication at that time with any Government officials—with Dr. Alleyne or anyone? I will come to that. I requested Carroll to speak to Dr. Alleyne, and said I would not stay there; I got violently excited when I found myself locked in, and Carroll laughing at me and telling me it was no use making a noise, I would certainly be there six months, and probably more.

1615. Can you tell us now when you first saw Dr. Alleyne? He came down, I think, the same day Mrs. Guildford came, on the Saturday; he did not come into the enclosure; he was about 50 yards from it. I tried to get a conversation with him, but we were so far apart, with the wind blowing straight towards me, that I could not make him hear anything. The words that I uttered, so far as I can remember, were that it was his place to be there and not mine. I was very violently excited at the time; he never, so far as I can remember from the words I could catch, offered me any assistance whatever.

1616. Did Mr. Carroll make any communication to you from Dr. Alleyne after he had left? Yes, he did; he said that Dr. Alleyne had come down to liberate me; he had some man with him named Spencer—I do not know whether it was Dr. Spencer or not—that he had brought down to take my place; but he never did. I suppose the words that I uttered annoyed him very much, when I found myself locked in and could get no relief.

1617. What was the object of sending a medical man to relieve you;—were you in charge at all? I will tell you: I think it was the night Mrs. Guildford came down—the 17th. I was staying inside this little cottage trying to make a fire; we had no fire-irons or place to put the pots on. When the patients arrived Dr. Caffyn said that I must go out and attend to Mrs. Guildford. I refused to do so, and said I did not come down to do work; I was not well enough; I was very low-spirited at the time. Dr. Caffyn then left the room, and immediately afterwards returned; I walked out and saw the woman put into the hospital—you could hardly call it a hospital because there was no accommodation. I did this from a pure feeling of humanity, for I still maintain that I was there against my will and I wanted to get away. On returning to the cottage Dr. Caffyn sprayed me all over; it was very unpleasant; I seemed to be avoided by everybody. He retired to his room on hearing that there were no supplies for Mrs. Guildford; there was no wine or medical comforts of any kind that night for her within the enclosure; there was no medicine or concentrated liquid food for patients or stimulants. Having received a supply from Sydney that day from a friend comprising wine and spirits, preserved milk and biscuits, I handed them over to Mrs. Guildford as she required them. I could not say when the Government supply came, it was two or more days after that, but at this time she was using my wine and other things.

1618. Did you consider at this time that you were acting officially? No, I was acting from feelings of humanity.

1619. Did you receive any intimation that you would be paid for your services? Yes, I was told that if I did the work I should be paid; I think it was Carroll who said so; I said "I am not fit for it."

1620. Was anything said at the Treasury about your being paid for your services? Yes; I think Mr. Eagar said if I went into the enclosure I would be paid for my services, but I said I would not go into the enclosure as my health was not equal to it. The following day, the 18th I think it was, the people in the enclosure, about twenty-five of them, complained of the danger and risk of infection from this little hospital ward which was only 8 or 10 yards distant from them.

1621.

Dr.  
M. J. Clune.  
25 Oct., 1881.

Dr.  
M. J. Clune.  
25 Oct., 1881.

1621. Will you now let us know the conversation between yourself and Mr. Carroll after Dr. Alleyne had left? I could not exactly say whether it was before or after. They decided to remove the presumed healthy people what they call the suspected cases from the enclosure. About noon that day after these twenty-five persons had been removed, Carroll and Dr. Caffyn seemed to be talking together for some time, and turning suddenly round, I observed Carroll pointing to me; almost immediately afterwards he came with a telegram in his hand, and said to me, "I am sorry for you; you must stop here." I protested against it, and said my health was not equal to the task. He said, "It cannot be helped; I must obey orders; this is Dr. Alleyne's telegram to the effect that you must remain here."

1622. *Dr. MacLaurin.*] Where was this? In the enclosure; I told him it was very hard that I, a private medical man should be treated in that way, and that as Dr. Caffyn was acting as a Government Medical Officer I thought it was his place to be there and not mine, and that I would go out to the healthy ground, but all my efforts to get released from the place were in vain, they seemed determined to keep me there.

1623. Was that the only communication made to you by Mr. Carroll informing you of the nature of this telegram? Yes, that was all at that particular time.

1624. Was there anything further said about your taking the supervision of the patients in this enclosure, and receiving remuneration for your services? No, not at that time; I have not the remotest remembrance of anything else; I was telegraphing every day and the telegraph operator was in the habit of informing me that my telegrams were not only mutilated but that in many cases they were never sent.

1625. *Dr. Jones.*] To whom did you telegraph? I telegraphed every day to my wife to say I was quite well, though probably at the time I was scarcely able to move. I telegraphed also to Dr. Renwick to say that I was not well and that I was continually treated as a criminal; I had to put it as mildly as possible or the telegram would not go. I knew from what I had heard that if I said I was unwell the message would not be sent. My object in telegraphing to my wife that I was quite well was simply to let her know that I was alive. I also telegraphed to Mr. Buckland to telegraph to my father-in-law to tell him that I was well, but was still treated very badly.

1626. And you were informed by the telegraph operator that some of these telegrams were never sent? Yes.

1627. Were any of the telegrams from Dr. Alleyne to Mr. Carroll ever communicated to you? Yes, they stated that I was to have everything I required.

1628. There was a telegram to this effect:—"From this date order what Dr. Clune requires for himself, and the women's hospital separately, and Mr. Kidman will deliver them distinct from other supplies; it is your own fault if you do not order what is required. The Government desire to make the patients and other persons as comfortable, and to be as well treated as possible. Let this be shown to Dr. Clune";—was that shown to you? Yes, that anything I required for the patients should be provided; that was read to me, but that was all I saw of it.

1629. But all the telegrams to your family were suppressed? Yes, even those to my wife, except when I said I was quite well; I knew that otherwise they would be suppressed; I was informed by the telegraph clerk that most of them did not go.

1630. Then the telegrams to your wife were sent? Yes, some of them, but those in which I stated my grievances and that I was treated as a criminal were not sent. I was informed that Carroll used to detain these, and when Dr. Alleyne came down to the station, which was not very often, or within a gun-shot of the station, Carroll would take the boat and go down to meet him and show him my telegrams, so I was told by the telegraph clerk.

1631. Do you remember any particular telegram that you know was not sent? I received a letter while I was at the station from an old college friend, to say that he had seen Sir Henry Parkes about my treatment, and Sir Henry Parkes had told him that I should be well treated. I sent a telegram the following morning to my wife:—"Please see Sir Henry Parkes, who promised Mr. Dillon that I should be properly treated." That telegram never reached my wife.

1632. You have not a copy of that telegram? No, it was destroyed; they took everything from me. Then I remember sending one to Dr. Renwick, when I was completely broken down, to say that I had been suffering from nervous exhaustion for the last four or five weeks, and asking him to see to my condition of health and speedy release. I think Dr. Renwick received some telegram, but as to the wording of it I cannot say.

1633. *Dr. MacLaurin.*] But the first telegram to your wife, asking her to call upon Sir Henry Parkes, was not sent at all? No. Then I sent a telegram to Mr. Buckland and several others.

1634. *Dr. Jones.*] And you have ascertained since that these telegrams were not sent? Yes; some were mutilated and some were not sent at all; the one to Mr. Buckland was sent in a mutilated form.

1635. *President.*] Will you try and remember as near as you can the wording of that telegram? It was, as near as I can recollect: "Please tell my father-in-law that I am well, but still badly treated."

1636. Have you any knowledge of the form in which that telegram was received by Mr. Buckland? Yes, Mr. Buckland preserved it for me. It merely stated in four words, as near as I can remember, "The doctor is quite well."

1637. Have you seen the telegram received by Dr. Renwick? No.

1638. Then you do not know in what form that was received? No.

1639. But you have reason to believe that it did not reach him in the form in which you sent it? I am almost certain of it. I had a copy of every telegram, but they destroyed everything I had. They turned me out of the enclosure with the suit of clothes I had on, and my books and instruments and clothes that I had in the enclosure were taken away from me. I do not know whether they were destroyed or not—I was told they were.

1640. You have not since recovered them? No.

1641. Did you during the time you were there take any charge of the sick? The morning after Mrs. Guildford came Dr. Caffyn had cleared out with twenty-five of the people, and I was left in the enclosure with Livesay, the undertaker's assistant, and Mr. Guildford and his wife, and I think a nurse. Nurse Meyler came down to take charge of Mrs. Guildford.

1642. Did you undertake the medical charge of Mrs. Guildford? I saw her food brought to her, and I thought I ought to do something for her, but I did not do it for the sake of remuneration.

1643. Did you at any time consent to take charge of the people within that enclosure? No, I do not know that I ever willingly took it, it was forced upon me. I simply telegraphed to Sydney when I saw  
my

Dr.  
M. J. Clune.  
25 Oct., 1881.

my name was not mentioned in the papers and Dr. Caffyn's name was mentioned every day, that I was in charge of the enclosure with the object only of pointing out that I was detained there. I was supposed to be in the healthy ground ; all the time my letters came there for me with Kidman's groceries.

1644. *Dr. Manning.*] But then you did willingly or unwillingly take charge of the sick? I took charge of the sick because I was forced to take charge of them ; I did it unwillingly.

1645. And did you treat them as ordinary patients? I tried to do so.

1646. It has been stated that you saw Mrs. Guildford only through the window, and did not go in to see her? If you saw the little place where she was you would easily understand that ; it had four windows and two doors facing east and west, and her bed was close to an open window. I went into the wards I suppose half a dozen times altogether. I gave the nurse who came to look after her the form of treatment to be adopted.

1647. Did you go inside to see her during the whole course of her illness? I do not think so. I was very unwell just as she came there ; the next day, after the excitement of my interview with Carroll, I seemed to get into a state of melancholy almost immediately ; my nervous system seemed to be completely shattered.

1648. Had you any other patients besides Mrs. Guildford? Yes, I remember as many as six in the rooms at one time ; every time I went into the room I was sick at once.

1649. Then you did go inside and see the other patients? I went in four or five times altogether ; there was no necessity, the windows were standing open all the time ; the patients were all wrapped up, and sometimes with poultices on their faces, and there was very little to be done, except to keep them up and nurse them and sponge them day and night, which it was the duty of the nurse to attend to.

1650. Then your treatment consisted in directing the nurses how to treat them? Yes.

1651. Did you not think it was necessary to go closer to them, to feel their pulse and examine them more particularly? I was so unwell that I was quite unable to do so.

1652. Did you see Mrs. Fisher when she was in the ward? I was too unwell at the time ; the nurses simply came to me for directions ; she was half dead when she came in. I remember sending a telegram to Dr. Alleyne, stating that she had come down in a very low typhoid state, and that the nurses were unremitting in their attention to her, and that stimulants were freely administered.

1653. *Dr. MacLaurin.*] Who took her temperature? The nurse ; she had my thermometer ; I was thoroughly unfit at the time ; I was completely broken down and scarcely able to move.

1654. *Dr. Manning.*] Did you report to Dr. Alleyne that your health had completely broken down? Oh yes, several times ; I sent messages down frequently by Livesey and Cornelius, the undertaker's assistants.

1655. *Captain Hixson.*] Did you ever ask to be relieved from your duty? Frequently, with tears in my eyes, because I was thoroughly unfit for it ; the police and everyone there knew it.

1656. To whom did you make the request? To Carroll, and the reply I received was even if I were relieved I should still be kept in the enclosure till the last case was convalescent, and should be afterwards detained forty-two days in the healthy ground.

1657. Did you ever send a communication to that effect to Sydney? I asked Livesey, who was supposed to be my attendant, to telegraph to Sydney to say that I was completely exhausted, and could see no more patients.

1658. Did you ever state in your communications to Sydney that you were too unwell to attend to any more patients, and ask for another medical man to be sent down? That was the purport of the messages ; they were not in writing, but *viva voce* ; Livesey and Cornelius used to go to the fence and tell Carroll that I was completely exhausted and broken-hearted, and request the telegrams to be sent.

1659. *President.*] Did Dr. Alleyne make any effort to supply your place with another medical man? I do not remember it.

1660. Shortly after you went there was any message delivered to you to the effect that if you were unfit some other medical man would be found to do your duty? No, after Dr. Alleyne left the station, some one—I could not say whether it was Dr. Caffyn or one of the policeman—told me over the fence that there was something wrong, and that had I kept my tongue quiet Dr. Spencer might have been sent down to take my place. I think Dr. Spencer was there with Dr. Alleyne ; there was somebody in the cabin with a white hat who might possibly have been Dr. Spencer.

1661. Did you ever send any communication to Dr. Alleyne with reference to the respective duties of yourself and the nurses, as to who had charge of the place? No, Carroll did that, assuming that I was broken down, and unfit for work ; they all knew that, everyone on the ground, the nurses and the patients. Carroll came to me and said, "I would not allow that nurse to speak to me in that way." I did not care what they said to me, I was so low—and he asked Dr. Alleyne who was to be master of the situation, or something like that, and Dr. Alleyne said, stamping his foot, "I would put down the nurses ; what is the matter with the man?" intimating that I was in charge ; that is what Carroll told me. Dr. Alleyne said, "There must be something wrong, or nurse Meyler would not treat him in that way." She treated me very badly all through ; she was always with Carroll talking to him at the fence.

1662. You mean that she was disrespectful? Most disrespectful ; I think her treatment broke me down more completely than anything else at the Quarantine Station. When she came there first I kept her out of the ward, because she told me she had not been vaccinated for twenty years. Dr. Egan had vaccinated her, but it had not taken at all. I waited simply to see what the effect of it would be, and after it failed to take she went into the ward of her own accord, and took charge of the patients. She and Carroll seemed to be in close communication from that moment. Scarcely a day passed without close communication between them, and from that day she became grossly insolent to me. The words she uttered were, "She had put down many doctors before, and she would take care I should not be master ; that she had not come down there to be under me at all." When Dr. Alleyne heard of the treatment I got from this nurse he said, "He must be a strange kind of man," or "there must be something wrong about him to allow this nurse to treat him so."

1663. *Dr. Manning.*] And Carroll, who was her particular friend, brought this message to you? Yes ; in fact I was led to believe by Carroll that Dr. Alleyne was persecuting me all through.

1664. *President.*] I wish to know whether you sent a message to Dr. Alleyne to know whether you were to take charge or the nurses? I would not say. I would not doubt it, but I do not remember it.

1665. Did you ever receive a pencil memorandum in Dr. Alleyne's handwriting stating that you had supreme

- Dr. Alleyne may have sent me lots of messages and I would be sure that Carroll would never deliver them.
1666. *Captain Hixson.*] How often did you see Dr. Alleyne? I saw him once only, when he was about 40 yards away from me.
1667. *Dr. Manning.*] Was he in the enclosure at the time? No, he came down on the Sunday.
1668. *Dr. MacLaurin.*] That was about the 18th? Yes; I could not say the date exactly.
1669. Did Carroll convey to you the purport of that message from Dr. Alleyne—that you alone were responsible and had supreme charge of the place? I have no recollection whatever of that; the only thing I recollect is that, previous to the close intimacy between Carroll and Nurse Meyler, Carroll told me that Dr. Alleyne said, "I must be a very strange man," or that "there must be something wrong" for me to allow the nurse to treat me in that way.
1670. *Dr. Manning.*] How long were you at the Quarantine Station altogether? From 16th June to 17th August, I think.
1671. And did you continue to do medical duty up to the time you left? I tried to do it, but I was quite unfit; I sent the two undertaker's assistants to Carroll to ask him to telegraph to Sydney that I was quite unfit and incapable of undertaking the duty.
1672. *President.*] What arrangement was made for the occupation of the buildings down there;—you did not continue to occupy the small building marked "Doctor's Quarters"? No; Carroll came to me with a telegram and said, "I regret very much, but you must turn out of this place, and I must put you in a tent." I said, "I am not well enough to go into a tent"; but as it was useless to make any objection, I gave way and said nothing more. The next day Carroll said that Dr. Alleyne was very sorry to treat me in that way, and that he would put me in the pavilion.
1673. Did he give you any reason for turning you out? No, and nurse Meyler went into the place I had occupied; it was taken for the nurses.
1674. And you remained in the large pavilion? I remained without any fire-place or furniture of any kind.
1675. And where were the patients put to at this time? Into a small two-roomed building.
1676. Was not that building rather crowded with patients at times? When they became convalescent I had to get some tents for them; we had sufficient room to put up five tents close to each other, and as soon as the patients were able to get out of bed we put them into the tents and put others in their places; there have been six cases at once in this two-roomed cottage.
1677. *Dr. MacLaurin.*] You are referring to the building marked "Female Hospital" on the plan (*exhibiting plan to witness*)? Yes.
1678. *Captain Hixson.*] Then you had no option in the matter? No.
1679. *President.*] And at this time you occupied the building called the "Male Hospital"? Yes.
1680. *Dr. Jones.*] Would not it have been a much better arrangement for the patients to have been put into the large building? I had no voice in the matter at all, nothing that I suggested had any effect.
1681. Did you suggest that that arrangement should be made? Yes, I suggested it frequently.
1682. *Captain Hixson.*] Would you have preferred to leave that large building and to go into some other place so that the patients might have had more accommodation? Yes, I hated that large place; I only stayed there a fortnight, and then went into the tent, which I occupied till I left. I may remark that I made several appeals to Carroll—scarcely a day passed without my doing so—to allow the patients to have the kitchen, as there was a fire-place there and ovens, and as the nurses had a two-roomed cottage with a fire-place there was no necessity for them to have both places. They had the kitchen and the cottage, and there was no other place with a fire-place left. We had to make fires in the open air, and some one used to get under the fence at night to get the drift wood from the wreck to make our fires with. I appealed to Carroll for one of those places every day, but he did not promise to do it until the day before I was liberated.
1683. *Captain Hixson.*] But as the medical man in charge could not you order it? I had no authority whatever; they simply laughed at me.
1684. *President.*] Was there no billet-wood supplied for your use? No, a bag or half a bag of coal was allowed every day; what little firewood we did get was from the scrub that was growing in the enclosure, but as that did not supply enough fuel for our use we had to get wood from the wreck of a vessel; there was no billet wood supplied at all; we sat night after night in the open air; sometimes the attendants broke up a coffin and used it for fuel.
1685. *Dr. Manning.*] Do I understand that you suggested to Carroll that the Male Hospital, in which you were living, should be appropriated for the patients, and that he refused? He did not exactly say he would not do it, but it was not done.
1686. *President.*] Had you any deficiency of cooking utensils? In the enclosure we had a great deficiency until a day or two before I left, when we got a camp-oven. Our food was sent to us in a very rough state, and we had to use a bucket to cook our beef in. We had only a few other utensils, and had to make them do for everything.
1687. You used a bucket to boil your beef in? Yes, and I think for roasting too. We could scarcely do our cooking on account of the scarcity of cooking utensils.
1688. How were you provided with bed-clothes? Latterly I got some sheets and some more blankets; they were not very good. They were marked "N.S.W. Aborigines."
1689. How long were you without sheets—some weeks? No, I don't think so long as that; but if I asked for supplies of anything I could not get them. I used to be treated with the greatest indifference. If I asked for a suit of clothes for a convalescent patient, a week or probably a fortnight would elapse before I would get them, and then some article would be deficient. I appealed to Carroll several times for under-clothing for the women, as they told me they had had no change for five or six weeks, and had to take their clothes off at night and wash them.
1690. Was the food supplied to you of good quality? I got a telegram away to Mr. Eagar. I think that was the only telegram I got away, and how I got it away was this:—The telegraph operator told me that the bread and meat were so bad that he allowed the telegram to go; he was interested in the message, and it went. He told me Carroll kicked up a row with him for sending that telegram. When I left the enclosure Carroll gave me only two cooking utensils, one was a pot or kettle and the other was a pan.
1691. Did the patients complain that they were short of these things? Yes. I used to struggle to get down and ask for them, but I was only laughed at.

Dr.  
M. J. Clune.  
25 Oct., 1881.

1692. Was there any complaint about the scarcity of towels? Yes.
1693. Did you suffer inconvenience from that yourself? Yes. I suffered inconvenience all through. Towards the end of my stay there, of course the women being there used to wash for me. The nurses gave orders that they were not to cook for me.
1694. How do you know that? My attendant, Cornelius, told me so. Livesey quarrelled with Carroll about something, and then Cornelius was appointed my servant, and after some time it appears that Nurse Meyler told him that my food was not to be cooked in the kitchen any longer. I appealed to Carroll, and he said the nurse was right, inasmuch as the cook came down to cook for the patients only, and not for me.
1695. *Captain Hixson.*] The assumption being that your own man servant was to cook for you? Yes.
1696. *President.*] Were you able to get medical comforts for the patients and yourself if you required them? After the first week I was, but I had great difficulty in getting the particular articles I required. I was constantly applying for them.
1697. And stimulants? Yes, but I heard that there were three or four times the quantity of medical comforts issued after I left the enclosure. For instance, I got eighteen eggs for the daily supply, and afterwards the number was considerably increased.
1698. Did you requisition for these things daily? Yes; if I asked for anything Carroll would immediately say he had not it, but he would telegraph to Dr. Alleyne. I remember once asking for a little ham. A policeman told me he had seen some on board the ration steamer and Carroll said it had fallen overboard.
1699. I suppose all these requisitions were made verbally? Yes, verbally; after the second week I was completely broken down and had no control whatever.
1700. *Dr. Manning.*] How were the comforts for the sick obtained? For the first fortnight or three weeks I was continually sending to Sydney for medicines and medical comforts and such things as Condy's fluid, carbolic acid, and other medicines that I required, and they came down pretty regularly.
1701. But I am speaking of the daily supply of medical comforts—eggs and things of that kind? My attendant would go down to get them and Carroll would hand over the supply that he considered necessary, and would give a portion for the nurses and a portion for the convalescent people.
1702. But did you not send a daily requisition for these things? I did for a time and then my man continued it.
1703. Did you make a daily order for wines and stimulants? My man did; I was unfit to do it.
1704. But he did it under your directions? Yes; he used to come to me and ask what quantity should be ordered.
1705. And are you aware what quantity was sent? I could not say.
1706. Who distributed it after it came into the enclosure? The bottles were ranged along the side of the room in which I was living and when the nurses came for the wines they required for the sick people they were given to them, and the convalescent persons who required stimulants obtained them in a similar way.
1707. You gave them by the bottle? Yes, one bottle would have to do for two or three days; I had no means of measuring the quantities; I had only one tumbler.
1708. And you had no check beyond that? I cannot say; I was too unwell to know; I had my doubts as to how the things were used.
1709. Whenever the nurse came and asked for wine you gave it to her? Yes.
1710. And whenever the convalescent persons asked for porter they got it? Yes, they did not get much.
1711. We have it in evidence that the quantity of stimulants used at this time was large? About two bottles of wine, two bottles of porter, a bottle of beer, and one of brandy, were the utmost that were used for one day; that is the nearest approach to it that I can give; sometimes it would be much less. There were between 20 and 30 persons on the ground at that time.
1712. *President.*] Did you consider it a part of your duty to look to the distribution of wines and spirits? Yes, if I had been well enough I might.
1713. *Captain Hixson.*] Do you remember ever seeing any drunkenness there? I do not remember seeing any.
1714. *President.*] Either among the convalescent patients or the servants? Well, I saw a great deal of quarrelling, but I could not say whether it was from the effects of drink or not.
1715. Can you say who they were that you saw quarrelling? I had my doubts who they were, but I must candidly confess that during the day I do not remember seeing anyone drunk, though if they had taken all the bottles I was powerless to prevent them.
1716. *Dr. Jones.*] There was practically no check upon the consumption of stimulants? Yes, there was a check; my presence in the room was a check; but what they may have done when I was out I cannot say. There was no furniture in the place or anywhere to put the bottles away.
1717. *President.*] It is stated in evidence that there were a large number of coffins lying about;—did you see anything of them? Yes, I was sick of them. The first thing I saw in the morning was a coffin. I went down to Carroll and said to him, "If you have any feeling left in you remove those coffins; it is bad enough for the poor people to be treated as they are," and he said, "Oh, I can't help it; those are my orders to leave them there. We will put them in the little house up there"—meaning the dead-house. Up to the time of my leaving I had to stand on a coffin to get my telegrams sent. I requested Carroll to remove them, and he laughed at me, and he pointed out one to me and said, "That will be a good one for you. I will keep it there for you."
1718. *Captain Hixson.*] Were they both inside and outside the enclosure? No, they were inside the enclosure. He used to order them to be thrown over the fence.
1719. Could you not have told the grave-diggers to remove them? Yes, so I did. There was no other place to put them only a small building, an old store for holding these things, and that was crammed full. The grave-digger told me he would put them under the rocks so that the women should not see them.
1720. *President.*] How long were they left there exposed to the gaze of the patients? During the whole time I was there; there were always some there. When I left the enclosure I had a policeman given to me to look after me, and we erected a tent on the flat where the Chinamen had been, and we slept in this tent and made a fire outside. And Carroll stripped me of my clothes, and gave me a pair of navy boots, a pair of trousers about half-a-yard too long for me, a short coat, and a crincoan shirt, and marked out two wooden rails as the distance where I was to walk. He allowed me about 130 yards.

Dr.  
M. J. Clune.  
25 Oct. 1881.

1721. *Dr. MacLaurin.*] Could not you have telegraphed to Sydney and got some of your own clothes at this particular time when Mr. Carroll stripped you and gave you those things; you knew beforehand that you were going to be released from the enclosure? I thought when I was released from the enclosure and put into the healthy ground that I should be allowed to take my portmanteau with me, which had a lot of clothes in and had never been opened, but everything was taken from me when I left the enclosure, and then I was dressed as I have described, and allowed about 130 or 150 yards to walk in. I was very unwell then, and I asked for some stimulants, and Carroll said he had none in the store. I asked for arrowroot and cocoa, and he said he had none; but I was informed by the police that there was plenty in the store. The following day he gave me some arrowroot; the people above me in the healthy ground cooked some for me—Mrs. Keats and Mrs. Rout cooked it—but this was subsequently stopped. The message I received from the police when I asked for some arrowroot to be made for me was, that an order had come from Dr. Alleyne—though I don't think he could have been so cruel as to give it—that no one was to do anything for me, or approach me, or he would be detained in Quarantine three weeks longer; consequently I was deprived of the arrowroot that night, and had to eat what I could cook for myself. When I applied to Carroll during the wet weather for clothes, he told me he had applied for coats and hats and other things and could not get them; but I was told by the police immediately afterwards that the store was full of them—that everything I asked for was in the store. On this occasion I asked for a hat for an undertaker's assistant, some trousers for the attendants, and some boots for the women, and he said he had not them, though I was told there were hats, and boots, and clothes of every description in the store.

1722. *President.*] How long did you remain in the healthy enclosure? About five or six days; I was very unwell when I was there, so unwell that I was continually vomiting.

1723. *Dr. Jones.*] Is it not a fact that Nurse Meyler asked permission to take the convalescing patients into the large ward which you occupied—the male hospital as it is called? I had no authority; it would be all the same; I do not remember it, but she may have asked me; if she did it might have been a week before I left; she never asked me before; I have no recollection of it.

1724. You were not occupying that building a week before you left? No, not for some weeks.

1725. I mean did she ask you during the time you occupied it? No, I have no recollection of it; in fact, so far as my authority in the world was concerned, I was simply a unit. Carroll was master of the situation. I had no authority at any time.

1726. *President.*] Did you see Mrs. Bonner and Mrs. Kelly there, and were they in your opinion suffering from small-pox? No; I saw them on their arrival, and moved them from the ward into a tent, being of opinion that they had not small-pox, and I immediately telegraphed to Sydney that they were suffering from skin disease.

WEDNESDAY, 26 OCTOBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPT. HIXSON,
MR. STREET.		

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

George Logan, Sergeant of Police, sworn and examined:—

Sergt. Logan. 1727. *President.*] What is your rank in the force? Sergeant of Police.

1728. When did you take charge of the Quarantine Station? On the 7th September.

1729. By whose directions? The Under Secretary, Mr. Egar.

1730. Can you tell us if you found the stores well supplied at the time you took charge? Yes, fairly supplied with the leading articles; the minor articles were deficient.

1731. How many persons were on the ground when you took charge? Sixty-nine, including officials all told.

1732. *Dr. Manning.*] Does that include the "Faraway"? Yes.

1733. *President.*] Were you well supplied with wines and spirits for these people? There was sufficient for a few days' consumption.

1734. By what mode did you issue the stores generally—by requisition or otherwise? There was a mess, so to speak, for each party, and we ascertained what they wanted for each day and issued it; of course the wines and spirits were ordered by the doctor. Dr. Day was in charge of the enclosure, Dr. Beattie in charge of the "Faraway," and Dr. Foucart in charge of the healthy ground. Dr. Spencer was in the "Pinafore" at the time.

1735. The wines and spirits, then, were issued on the order of these medical men? Yes.

1736. *Capt. Hixson.*] You did not issue them without an order from a medical man? A verbal order.

1737. *President.*] Was there a large consumption at that time? About three bottles of brandy, the same number of port or sherry, and from twenty to twenty-four bottles of ale or porter was about the daily issue at the time I went down, when there were sixty-nine people there. It is something similar, I believe, since Dr. Beattie took charge.

1738. Dr. Beattie succeeded Dr. Foucart? Yes, he took medical charge of the whole place; he came two days after me; I had charge of the stores on the 7th and he came on the 9th September.

1739. Were there any store books kept, do you know? Not to my knowledge, not before I went; since I have been down I have kept store books.

1740. Were there any handed over to you when you took charge? No.

1741. Did you take stock of the stores on hand? Yes, that was the first thing I did when I went down.

1742. *Capt. Hixson.*] Can you give a list of them? I have already supplied it.

1743. *President.*] How are these verbal orders entered;—do you keep a book for that purpose? Yes, they are entered in my book against each party.

1744. Does the doctor furnish you with a list of the people requiring these things? They are in lots in each place, and the doctor orders so much brandy or so much porter for each, and I issue it. I submit the issue book for the doctor's information weekly, and he initials it. 1745.

1745. Was the same system in force prior to Dr. Beattie's taking charge? I was only there two days before Dr. Beattie, and I think there were no books kept. Sergt. Logan.
1746. Which articles did you find especially deficient? In the matter of groceries, there were pickles and sauce, coffee, cocoa, starch, blue, canned meat, and canned fish, baking powder, curry powder, capers, lime-juice, and sardines; these were wanting. 26 Oct., 1881.
1747. Did you apply for these things? Yes, when they were asked for; I had the most of them in the course of a couple of days.
1748. They were most of them promptly supplied? Yes.
1749. What articles of clothing were wanting? Braces for men's trousers, belts, boot-laces, collars and neckties, needles and thread, and perhaps two or three odd things.
1750. How were you supplied with towels? There were about twenty as near as I can remember, but we got a further supply down at once.
1751. Did the people complain of the deficiencies, or were they well supplied? A good many of them complained.
1752. Did they complain of the want of towels? I had them supplied in a day or two; Dr. Beattie brought them down himself.
1753. *Capt. Hixson.*] Were there combs and hair-brushes? No, neither combs nor hair-brushes.
1754. *Dr. Jones.*] Were there sheets and pillow-cases? Yes, there were plenty.
1755. *President.*] Were the people on the ground generally well supplied with cooking utensils? They were fairly supplied I think, generally, with the exception of frying-pans; there were only one or two of them in store.
1756. Were complaints made to you by the people at the Quarantine Station that they had been short of these things prior to your going down? Yes, there were general complaints.
1757. What were the particular articles complained of as being deficient? Some of them complained of the want of cooking utensils, others such things as pepper for instance, principally little things; the leading articles were plentiful.
1758. *Capt. Hixson.*] Did you remedy these wants on your arrival? Yes, at once; of course I did not find out everything in one day, but in the course of two or three days I had them all supplied.
1759. Had you any difficulty in doing so? Not the slightest; they were promptly supplied when telegraphed for.
1760. Then in point of fact the people could have been made comfortable if proper means had been adopted to make them so? Yes, if sufficient things had been in the store; they would grumble as much about a trilling thing as they would of anything greater.
1761. *Dr. MacLaurin.*] How many people are there now on the ground, including the police? Thirty-nine.
1762. How many police were there? Eight. There were four doctors, six attendants, including cooks, two grave-diggers, the telegraph operator, and fifteen patients.
1763. *President.*] During the time you have been there have you seen any people tipsy on the ground? I have not, sir.
1764. Have you ever seen any of the attendants tipsy? I have not.
1765. Or any of the constables? Nor any of the constables.
1766. Has it been reported to you that any of them were so? It has not, but I heard casually that one of them was; it was simply a question of opinion; I did not see anything of it myself, nor was it brought under my notice; that was the day I went down. I do not think any person has been tipsy since I went down there.
1767. *Dr. Manning.*] Were you down there before you took charge? No, sir, I never was on the ground.
1768. *President.*] Is it possible that spirits may have been smuggled on the ground unknown to you? Oh, it is possible, there is no fence, but I do not think so.
1769. *Dr. Manning.*] Then you have no vouchers to show for your issue? I have my book initialled weekly by the medical superintendent.
1770. But that does not constitute a voucher? No.
1771. So that you have nothing to show for the issue you make? I have the entries every day.
1772. How do you send in your requisitions for stores? For groceries and such articles I send to Mr. Kidman by telegraph; for other things I telegraph to Dr. Alleyne.
1773. *President.*] What check have you that they are supplied? A telegraph ticket accompanies the groceries; the Colonial Stores Department are not so particular; they do not always mention minor articles, but when that is not done I make a list and report it. All Mr. Kidman's supplies have a delivery ticket, which is signed there and then.
1774. Have any burials taken place while you were there? Yes, three.
1775. Whose duty was it to see that the graves were dug to a proper depth? I considered it my duty.
1776. Have you seen that the graves were dug to a sufficient depth? Yes, 10 feet.
1777. Where was that? In the new burial-ground.
1778. *Capt. Hixson.*] Do you know whether in the old burial-ground there was a difficulty in sinking the graves to a sufficient depth on account of the rocky nature of the soil? No, it appeared to me to be nearly all sand.
1779. We have had complaints that the graves were not deep enough? I have not seen a grave dug in the old burial-ground, but it appears to me to be all sand.
1780. Did you ever notice any offensive smell from the old burial-ground? I did not, sir.
1781. *Dr. Jones.*] When you speak of the new burial-ground, do you mean the one selected by Dr. Foucart? Yes.
1782. *Captain Hixson.*] Did you notice any coffins exposed on the ground when first you went down? They were in the enclosure; of course I had no access to that place. Some days after I went down I asked Dr. Day whether coffins had been exposed at any time since he was there, and he said no; a portion of a coffin-lid—which did not look like a coffin at all—was placed for provisions to be placed upon.
1783. *President.*] Who took charge of the funerals down there? Dr. Beattie; he accompanies the body to the grave and reads the burial service over it, and of course I see that the grave is properly filled in.
1784. Do you know whether in the old burial-ground lime was put in the graves and that they were banked up and covered with clay? They had the appearance of lime having been used about them and they were banked up; there were no burials there after I went down. Quick-lime is put into the coffin and when the coffin is lowered a bag of lime is scattered over it. 1785.

- Sergt. Logan. 1785. Do the people at the Quarantine Station now appear comfortable and satisfied? They do; I have heard no complaints since Dr. Beattie took charge.
- 25 Oct., 1881. 1786. And do you consider that they are well supplied with all the necessaries of life? I do.
1787. *Captain Hixson.*] Did you find that the people down there are apt to grumble at trifles? I did at first, some of them were very much inclined to grumble and make the most of minor grievances.
1788. And was there great reason for their grumbling? I could hardly say; they grumbled at many little things; for instance, if they wanted needles or thread, or a bottle of pickles, or anything of that sort.
1789. I suppose the main cause of their grumbling was their detention there? Yes; some of them grumbled at being kept down there, others that they had not sufficient food, and some that they had not sufficient clothes, or dresses, and so on.
1790. *President.*] Of the fifteen patients there now how many are sick and how many presumably healthy? There are four children in the enclosure, and I think they will be in the healthy ground about the end of the month. Mr. Denford and his three children, whom I include among the patients, were sent down there because there was not room for them in an infected house in Pymont; they have been there some fourteen days, and of course the danger is past; they are now in the healthy ground. The children are in the cabin enclosure, and Mrs. Foster, who is slightly idiotic, and Dr. Beattie does not like to send her to Sydney without some one to take care of her; steps are being taken to accommodate her in Sydney.
1791. *Dr. MacLaurin.*] On board the "Faraway" what assistance has Dr. Beattie? Two attendants and two recovered patients; they are now employed in cleaning and painting the "Faraway."
1792. *President.*] Is there any restriction upon the sending of telegrams from these people to their friends? There has been none since Dr. Beattie took charge.
1793. And they are now in the habit of sending communications to their friends by telegram? They are sir.
1794. What is about the present issue of wines and spirits? About two bottles of brandy, two bottles of wine, and perhaps six or eight bottles of ale or porter.
1795. Are those issued in the same way on the order of the doctor? I have Dr. Beattie's order for them all, and they are entered in a book.
1796. Then you have no knowledge to whom they are issued? I enter them all in a book and charge them to the parties. But Dr. Day is in the enclosure and I cannot say whether he allows his attendants spirits or not; I daresay he does there, and Dr. Robert Beattie, of the "Faraway," I cannot say whether he does or not.
1797. Are there any wines or spirits supplied to the attendants in the healthy ground? No sir, but there are men at work who get a bottle of porter a day while they are at work; one man recently discharged from the "Faraway," who is employed whitewashing, gets a bottle of porter daily.

Mr. John Carroll called in and further examined:—

- Mr. J. Carroll. 1798. *President.*] Have you brought with you the copy of the Regulations of the Quarantine Station, of which you spoke the last time you were here? Yes. (*Producing copy of Regulations. See Appendix E.*)
- 26 Oct., 1881. 1799. The stock-book you produced the other day, is that the only one you have? That is the only one.
1800. You were not in the habit of keeping any other book? No.
1801. Did you keep a book showing the issue of stores day by day? Yes, there was not much issued; the immigrant ships did not require much.
1802. But since the outbreak of small-pox there has been a large issue of stores? The principal part of these stores were sent down direct to each doctor, and signed for by each doctor as he got them, and I never knew what was in them; there was merely a parcel directed to each doctor.
1803. What system was there for the issue of stores? That was the only system, the stores were marked for each doctor, and nothing was said as to what was in each parcel.
1804. But a great many stores must have come into your hands after the small-pox outbreak, before Sergeant Logan came down, when you had charge,—what mode was adopted then for the issue of the stores daily? Do you mean medical comforts and things of that sort?
1805. Yes, clothing and stores generally? The rations were sent out every day to the enclosure, and the same to the healthy ground, and the same to the "Faraway," and the same to the police.
1806. *Dr. MacLaurin.*] Supposing a man wanted a towel for instance? Of course it would be sent to him at once; the doctor would send an order for it, a verbal order; towels and sheets and things of that kind would be sent out just as they were wanted; there would be no requisition taken from the hospital enclosure or the "Faraway" without being fumigated.
1807. *President.*] Did you enter these things in a book as they were issued? No, they were given out to the people at once.
1808. Then there is no record of how these things were issued? No record at all.
1809. *Dr. Jones.*] Were the requisitions from the healthy ground in writing? They were not. Dr. Caffyn would come to me himself and say he wanted a suit of clothes, and take them away at once.
1810. *President.*] Did you receive any telegram from Mr. Eagar telling you that you were to supply Dr. Clune with anything he might require for himself and the women's hospital? Yes, I did, and he got everything he required, and it is his own fault if he did not get them, because he would never ask in a proper manner; he was always crying and grumbling; I don't think he knew what he was doing half the time he was there; it was impossible to tell from the state he was in whether he was drunk or not.
1811. In your opinion, was Dr. Clune ever intoxicated while he was there? In my opinion he was several times.
1812. Was the quantity of stimulants at that time issued to the hospital enclosure very large? Very large at times; about 17 bottles every day—brandy, port and sherry wine, and ale and porter.
1813. And how many people were there in the enclosure at the time? I could not exactly tell you how many; but I know the liquor was only allowed for the sick people, it was for no other person; so that if he took proper care of it it could not all be consumed.
1814. Do you know the actual quantity of spirits sent into the enclosure every day, and the quantity of ale and porter? No; I could soon tell you from my books; there were 16 or 17 bottles altogether sent in.
1815. *Captain Hixson.*] How many bottles of spirits do you think were sent in every day? Generally three or four bottles of brandy every day went to the hospital enclosure,

Mr. J. Carroll.  
26 Oct., 1881.

1816. *President.*] Did you ever report this to Dr. Alleyne? Yes, frequently.
1817. Did you ever report to him that you thought Dr. Clune was under the influence of liquor? Yes, I did, and I told him I thought the consumption of liquor was very large.
1818. *Dr. Manning.*] You said that you considered Dr. Clune did not know what he was doing half the time he was there. Do you think he was drunk then? I believe he was, either drunk or mad; I believe he was out of his mind half the time.
1819. Did you tell Dr. Alleyne this? I did.
1820. Did you suggest to Dr. Alleyne that somebody else should be placed in charge? I did, about a week or ten days after he went down.
1821. *Captain Hixson.*] And what was the result of your suggestion? I never heard any more of it. I suppose Dr. Alleyne thought he could not help himself, and that he would have to keep him there if he could not get another doctor in his place; he was unfit to be looking after the people.
1822. *President.*] Did you see Dr. Clune frequently while he was in that enclosure? Yes, at least half a dozen times a day or more.
1823. And did you form the conclusion from that that he did not look after the people? He did not; I am on my oath, and I will swear that he never did look after them; he repeatedly told me he was not able to do it.
1824. Do you remember at any time making an observation of this character to Dr. Clune—that he would be there for six months? Never.
1825. Did you ever point out a coffin to him and say, "There is one for you?" Never in my life; the coffins were put into the enclosure, and it was his duty to see them put into the large store, so that no one could see them; it was his duty and not mine.
1826. *Captain Hixson.*] Did you see the coffins exposed in the enclosure? I did, repeatedly, and told him to have them put into the store.
1827. *President.*] Is it not a fact that Dr. Clune frequently stated to you that his health was such that he was unfit for the work, and that somebody else should be appointed in his place? He certainly did.
1828. And what did you say to that? I reported it to Dr. Alleyne; every complaint he made to me I reported to Dr. Alleyne.
1829. Do you remember getting a telegram brought to you from Dr. Clune to Dr. Alleyne stating that his health was completely broken down? Yes.
1830. Did you send it? Yes.
1831. In the same form in which it was written? Yes, in the same words. Very often he used to bring me down telegrams, and 5 minutes afterwards call and ask me not to send them, because they were written in such an improper way.
1832. In what way were the telegrams communicated to you? Through the operator, or one of the police would go up to the gate and bring them down to me, and if they were proper telegrams they would be sent to Sydney.
1833. What do you mean by proper telegrams? Well, if there was anything objectionable in a telegram I requested Dr. Clune to erase it.
1834. Can you give us an instance of a telegram which you thought it was necessary to have altered? I could not recollect the words, but I know there used often to be very objectionable matter in them, about his wife and matters, which had nothing to do with the message; the Government had nothing to do with his wife.
1835. How did you arrive at the knowledge that these telegrams were objectionable. Had you any principle to go upon. Cannot you remember any particular telegram that you considered objectionable? Dr. Clune would send a telegram to say, "I want a doctor sent down here, as I am not fit."
1836. Did you consider that objectionable? No; that was sent. Another time he would send one to say that he wanted to go down to the beach to bathe; of course I would not send that.
1837. *Dr. MacLaurin.*] That was a breach of the regulations, and therefore could not be sent? Yes.
1838. *President.*] Had you any rule to guide you as to the nature of the telegrams that could be sent to Sydney? No, I had not.
1839. Then it was entirely at your own discretion whether a telegram was sent or not? Yes.
1840. Do you remember any one of Dr. Clune's telegrams containing a statement to this effect: "I am treated like a criminal"? Yes, I do.
1841. Did you have those words telegraphed? No, because he was not treated as a criminal.
1842. Then you considered that an objectionable telegram? Yes, and I consider that I should have been censured if I had sent it. My instructions from Dr. Alleyne and Mr. Eagar were to be very careful about the telegrams I sent.
1843. *Dr. Manning.*] Did Dr. Alleyne at any time give you orders to alter, condense, or suppress a telegram? Never.
1844. *President.*] Do you remember informing Dr. Alleyne on one occasion that you had taken some words out of one of Dr. Clune's telegrams before sending it up? Yes, I did.
1845. What did Dr. Alleyne say? He said I had a right to do so; it was a telegram sent to Mr. Buckland.
1846. What was the nature of Mr. Eagar's order to you about telegrams? To be careful about the telegrams I sent.
1847. Were those telegrams—the one telling you to be careful, and the one you alluded to the other day that doctors cannot telegraph to other doctors the state of patients—the only two you received on that subject? Yes.
1848. Did you consider they contained sufficient authority to allow you to expunge words from any telegram? I think so; at least that was my impression.
1849. *Dr. Manning.*] And you thought you were justified in suppressing any telegrams containing requisitions which would involve a breach of the regulations? Yes, I did.
1850. *President.*] Did you ever suppress any telegrams sent by Dr. Caffyn? I never did; he used to send long telegrams to Dr. Alleyne about being released, and used to communicate with Dr. Alleyne about family matters.
1851. *Dr. Manning.*] Were all those telegrams sent? No, they were not all sent; I often requested him not to send them, and he said at once he would not.
1852. *President.*] Before declining to send these telegrams did you communicate with Dr. Caffyn? I did always; I sent for him and said, "Dr. Caffyn, this is a very long telegram, and will not serve you in the least; you had better not send it"; and he would say, "Well, Mr. Carroll, I will not send it." 1853.

- Mr. J. Carroll. 1853. Do you remember his sending a telegram saying he was so ill that he thought he could hardly live another week? Yes.
- 26 Oct., 1861. 1854. Did you send that telegram? I did, because when Dr. Alleyne came down I used often to ask him as a favour to let Dr. Caffyn out of quarantine for the sake of his family, and I wanted Dr. Alleyne to go up and see him; and it would have been better if Dr. Alleyne had come up and seen the doctors on the ground; it would have saved a great deal of bother.
1855. *Dr. Manning.*] Whenever there was any complaint in a telegram did you consider it necessary to stop it? If I thought it was an improper one. Dr. Alleyne used not to come to the ground, he used to come round to the place where I kept my boat.
1856. *President.*] Did Dr. Caffyn ask to go down there to see Dr. Alleyne? Yes, he did, and I frequently begged Dr. Alleyne to see him, but he always told me to communicate with him.
1857. Did you ever decline to send a telegram given to you by Constable Cook? Never; that man was well treated on the ground though he says he was not.
1858. *Dr. Manning.*] Were all the telegrams written by the nurses in the Infirmary sent? Yes, they were all sent; I had strict orders from Dr. Alleyne to send them.
1859. *Captain Hixson.*] And what was the mode of sending these telegrams. Did the nurses tell a policeman outside to take them down? No, the nurses sent for me, and if the telegraph operators were not busy I sent one of them up, and if they were busy I sent one of the policemen.
1860. *President.*] Have you copies of the telegrams you refused to send? No, I would tear them up at once, I did not keep them; sometimes the people would request me not to send them when I told them they were objectionable.
1861. Do I understand you to say that before altering telegrams at all you obtained the consent of the parties bringing them to you? Yes.
1862. *Dr. Jones.*] In all cases, not only in the case of the doctor's telegrams but those of the patients also? Yes. I never tore one up without their consent; I had no interest in them.
1863. *President.*] Were the people well supplied with beds and bed-clothes? Amply supplied with bedding, that was the best thing on the ground; they had plenty of mattresses and blankets.
1864. And sheets? And sheets.
1865. Were all the people supplied with sheets? No, only the sick; but if any of the people in the healthy ground applied for them they got them.
1866. *Captain Hixson.*] Dr. Clune tells us the blankets he got were wet. Was that the case? They were not, because I was there myself and supplied them out of the store, and if they were he had only to ask for others and get them.
1867. *President.*] Were the Chinamen from Druitt Town supplied with bed-clothes? Plenty of them; they had mattresses and blankets and pillows.
1868. Do you know that Dr. Clune took some of the blankets used as partitions between the married couples and some of his own and gave them to the Chinamen? He had no occasion to do so; there was always a large supply in the store—four or five hundred blankets.
1869. Did he make application to you for blankets for these Chinamen? No; the man scarcely ever asked for anything unless I went to him and asked him if he wanted anything.
1870. Did Constable Cook complain that he was short of blankets? Never.
1871. Do you know what blankets he had in his tent? Three or four. He could have had as many as he wanted, for his tent was only 200 yards from my store.
1872. Were sheets supplied to the people on board the "Faraway"? Plenty; large bundles of them.
1873. *Dr. MacLaurin.*] When were they sent on board the "Faraway"? They were never short of sheets in the "Faraway." Dr. Beattie will bear me out in that.
1874. *Captain Hixson.*] But when Dr. Walsh was there were there any sheets? If he asked for them he had them. I do not know whether he asked for them.
1875. What you mean is he could always have had them if he had asked for them? Yes.
1876. *Dr. Manning.*] Dr. Walsh informs us that he asked for sheets, and was told that there were none in stock. Is that true? It is not, sir. I had great trouble with Dr. Walsh.
1877. It is said that there were no sheets on board the "Faraway" during the entire time Dr. Walsh was there;—is that true? I am certain it is not true.
1878. Did you send sheets on board the "Faraway" when Dr. Walsh was there? I did. I sent him what I had, but there was not a large stock in the store.
1879. *Captain Hixson.*] How had you trouble with Dr. Walsh? He drank very hard. I had to stop his liquor from him regularly.
1880. Did you report this to Dr. Alleyne? I did. Then of course he got liquor for the patients, and what he did with it I do not know. Certainly Dr. Walsh had a great deal to put up with from the want of attendants. Dr. Alleyne said as soon as he could get a suitable man he would send him, and the day Hutton died an assistant was sent down.
1881. *President.*] You say you had plenty of towels on the ground for the use of the people? We had not many at first, but afterwards a large quantity came down, and when I had not towels enough I gave the nurses a lot of coarse sheets to cut up for them.
1882. Do you remember Dr. Caffyn asking you for a towel? Yes; I supplied him with not one but two or three.
1883. That was on the first occasion? Yes.
1884. What sort of towels did you supply him with? A proper towel, fit for any gentleman to use.
1885. It has been stated that the towel you gave to Dr. Caffyn was a piece of coarse sacking? Nothing of the kind; it was a towel fit for any gentleman to use.
1886. Did you ever refuse to give Dr. Caffyn towels when he asked for them? Certainly not; he was supplied with everything he asked for, medical comforts and everything else.
1887. Do you remember Constable Cook applying for towels? Yes, he got a proper towel.
1888. Did he only get one? That is all; he only asked for one.
1889. *Captain Hixson.*] Did you think one was enough? Certainly not, if a man was down there a long time; he should have asked for it; he was close to me, and had less to do than I had.
1890. *President.*] Then the towel you gave Constable Cook was not a coarse piece of sacking? No, it was not.

1891. Was it one of those you described as being cut out of a coarse sheet? No, it was not. Those were given to the nurses for kitchen towels. Mr. J. Carroll.

1892. *Captain Hixson.*] How often were you applied to for towels? They were asking me for them at all times. 26 Oct., 1881.

1893. How many did you issue do you think? Perhaps a hundred.

1894. *President.*] Do you remember Dr. Caffyn applying to you for clothes for the grave-diggers? I do. 1895. And do you remember Dr. Caffyn sending a telegram to Dr. Alleyne to this effect: "The two grave-diggers want suits. Are they to have them from the store. Mr. Carroll will not give them to me?" I think he did, but at the same time he went into my store and walked up to the case where the clothing was and took the suits himself, and I said he should not take them without an order from Dr. Alleyne, because those clothes were for the people who were going away. He took the suits in spite of me, and I told him I would report it to Dr. Alleyne.

1896. Did you report this to Dr. Alleyne? I did.

1897. *Captain Hixson.*] Did you say he had stolen the suits? No, I did not; he took them.

1898. *President.*] Did you ever admit to Dr. Caffyn that you had used the word stolen? No, never. I did nothing of the kind.

1899. *Captain Hixson.*] Did he ask you for these suits a day or two before he took them? Yes, and I told him Dr. Alleyne's orders were that those suits were for the use of the people that were leaving.

1900. But did you know the purpose for which Dr. Caffyn wanted them? When he told me I did, but when I had an order from Dr. Alleyne I could not give them; he should have written to Dr. Alleyne.

1901. Did you know that the reason Dr. Caffyn wanted these suits was to prevent the grave-diggers from walking about among the healthy people in the clothes they had worn when burying the dead? Yes; but Dr. Alleyne's orders were that the suits of clothes in which they buried the dead should be hung on a tree and put on again when they buried another person, and that they should wear their own suits in the meantime.

1902. Had they two suits to enable them to do this? Yes, half-a-dozen suits.

1903. Did you know that? Yes, and they knew it too.

1904. *Dr. Jones.*] You say they had half-a-dozen suits each? Yes, from time to time.

1905. *Dr. MacLaurin.*] But had they two suits at the time? Yes, and they were supposed when they interred a corpse to take off the clothes they wore and hang them on a tree, and use them again when they required them.

1906. *President.*] Did you remember Dr. Caffyn coming to your place and writing a telegram to this effect: "The suits Mr. Carroll mentioned to you were given to me by his own hands for the grave-diggers?" That telegram was received and was sent.

1907. Had you any falling out with Dr. Caffyn when he was down there? No, but he was a strange man to deal with; he had very little discipline, he was always breaking the bounds.

1908. *Dr. MacLaurin.*] You mean he was breaking out of the Quarantine Station? Yes, he used to be frequently coming down to the fence and talking with Dr. Clune, and that he was not allowed to do, and going down to the beach, which was anything but strict discipline; we had very often words over this. My orders from Dr. Alleyne were very strict on that point.

1909. *President.*] Were the regulations you have produced to-day shown to the doctors on their arrival at the Quarantine Station? They were not; that is the only copy I had. I have applied for them repeatedly for the last ten years.

1910. *Dr. Manning.*] Then so far as you know the doctors were not aware of the contents of these regulations? They had no copy of them.

1911. *President.*] Did you ever communicate to the doctors the nature of the instructions in these regulations? I told them repeatedly where their bounds were, and that they were not allowed to communicate with each other.

1912. Did you tell Dr. Caffyn that? I did repeatedly; but when he did not think I saw him he would run away to the fence and talk to Dr. Clune.

1913. Did Dr. Clune complain that his wants were not supplied there? Never; he was amply supplied.

1914. *Captain Hixson.*] Did he never complain to you of the want of cooking utensils? Never; he had a comfortable little house to live in. Of course he was turned out of that house for the nurses to go in, and Dr. Alleyne said he was to go into a tent, but I put him into the male hospital.

1915. Did Dr. Clune occupy this place where you put him to the inconvenience of the patients? He did; that ought to be used for the hospital.

1916. *President.*] Do you remember the occasion when Hughes swam ashore and was without any clothes? I do.

1917. Did anybody ask you to supply him with clothes? No one asked me to supply him with anything.

1918. But did you supply him with clothes? I was never asked.

1919. But if you saw a man at the station without any clothes did not you consider it your duty to supply him? Well, if he had asked me he could have had them.

1920. It is stated in evidence that Hughes was on shore absolutely without clothes? I was not aware that he was there without clothes; he swam ashore before without any clothes to his back, and he might have done so then for what I knew.

1921. But is it not a fact that Dr. Caffyn asked you for some clothes for Hughes at that time? He never did.

1922. Was Dr. Caffyn in the habit of making constant applications for clothing? He was not.

1923. And did you constantly refuse to supply him? I did not.

1924. Were you aware that for a long time the women and children were unable to get boots? It was his own fault—he did not send for them; the regulations say the doctors should send a requisition for everything that is required.

1925. But were you not aware that the women and children were short of boots? I was not; it was very seldom I went among them; I had quite enough to attend to my own duties. There were a lot of people placed in quarantine, and I had to go down to them.

1926. Did not Dr. Caffyn complain to you as often as twice a day that the women and children were without boots? He did not, and it was his duty to apply for them from Sydney himself; he had a great deal

- Mr. J. Carroll deal less to do than I had. I was down at my store at 6 o'clock every morning, and it was seldom I finished my work before 9 or 10 o'clock at night.
- 26 Oct., 1881. 1927. Were there plenty of clothes sent on board the "Faraway" for the people there? Plenty of clothes for them.
1928. Had you any applications made to you to send clothes on board the "Faraway," so that the people there might have changes of clothing? Not till Dr. Beattie came.
1929. *Captain Hixson.*] Will you tell us the system of communication between you and the "Faraway"? Either my son, who is caretaker, or myself, visited her twice a day.
1930. What do you mean by "visiting her";—did you go on board? No, I went alongside; I dare not go on board.
1931. But you went close to the "Faraway"? Yes.
1932. Did the people on board make any complaints? They made no complaint; their provisions were taken to them every morning, and laid on a platform at the bottom of the ladder.
1933. So that you never went on board the "Faraway"? Never.
1934. *President.*] Do you know anything of Mrs. Kelly being short of boots at one time? I do, very well; and I told her to get Dr. Clune to write a requisition and send it to Sydney for a suit of clothes for her, and it was his business to do it; she was under his charge and not mine.
1935. Did Dr. Clune apply to you for boots for Mrs. Kelly? He never did.
1936. Did you ever say to Mrs. Kelly that it would do her good to go without boots? Never.
1937. Did you ever tell her that the only boots in the store were men's boots? I dare say I did.
1938. And that you had no underclothing in the store? I dare say I did.
1939. Do you remember her sending a telegram to you to be forwarded, stating that she was not suffering from small-pox? Yes.
1940. Did you send that telegram? Yes, it was sent. When a patient was sent from Sydney Dr. Clune would leave that patient for half an hour at the gate before moving her into the hospital; he would have an argument with Dr. Caffyn to see whether it was small-pox or not, and keep the woman waiting. I told him that had nothing to do with it, and that the woman ought to be moved into the hospital at once, no matter what disease it was.
1941. Then you told these people if they wanted clothes or boots they should get Dr. Clune to make a requisition for them? Yes.
1942. How was Dr. Clune to make such a requisition? He should write a telegram and I would copy it and send it up to Sydney.
1943. And did not Dr. Clune send this requisition to you? I think he sent for them and they were packed in bags and left in the shed on the following day.
1944. You remember Keats, the Government boatman, being down there? Yes.
1945. Did Keats ever apply to you for clothes? He never did till he was going away. Those two doctors never agreed, and it caused a great deal of annoyance and bother.
1946. Do you know that there was any ill-feeling between the two? I am certain there was.
1947. What evidence of that had you? From the way they used to speak to one another.
1948. Were the provisions ever complained of? Very seldom; the meat was sometimes.
1949. And the bread? Sometimes, but on the whole it was very fair.
1950. Did you think the complaints of the meat and bread were reasonable complaints at the time they were made? No, I thought it was very fair considering it was contract meat; of course there were not first-class joints such as you would get at a butcher's shop in Sydney.
1951. Did you consider the complaints about the bread were reasonable? For two or three weeks it was not very good; generally it was very fair.
1952. Did you know that the bread sent on board the "Faraway" was in the habit of getting wet sometimes? I am certain it never did.
1953. Did you always take the bread yourself? Myself or my son, and I never heard the least complaint about it.
1954. You went sometimes with the provisions to the "Faraway"? Once a day, either myself or my son went.
1955. Did you ever put the bread into the quarter boat? Sometimes; but there was a man to take it, and in very rough weather it was handed up to him. I am certain it was never damaged.
1956. And do you not think it got wet on some of these occasions? I don't think it; it was handed up in a small bag.
1957. Had you anything in the boat to protect it from the weather? There was always a piece of tarpaulin in the boat.
1958. Was there any difference between the meat sent on board the "Faraway" and that used on shore? Not the least; it was the very same meat.
1959. But was any distinction made by picking out the best pieces? The only distinction made was perhaps to the Chinese. The neck would perhaps be given to them and a good piece for the Europeans and the doctor himself; that was the only distinction made.
1960. Do you remember Dr. Walsh ever saying to you that his rations were just the same as a Chinaman's? No; he had no occasion to say it; he always got a good piece of meat for himself.
1961. At the time when you say the bread and meat were not very good did you make any complaint about them? I did to the Treasury and to Kidman the contractor both.
1962. Had you a sufficiency of medical comforts in your store? Plenty.
1963. Did you send any of these on board the "Faraway"? Plenty—such as were required.
1964. Such as sago, arrowroot, and things of that sort? Whenever the doctor applied for them.
1965. But did he make application for them? Very seldom; he was very dilatory in doing so, and when I checked him for it he said he had made arrangements with Dr. Alleyne before he left Sydney for what things he wanted every day. Dr. Alleyne was always very liberal in supplying things for the sick, and if Dr. Walsh did not get what he wanted it was his own fault.
1966. When the meat was brought down there who used to distribute it to the people? I used to see to it.
1967. Who cut it up? One of the policemen.
1968. Well, was it not possible for the police to keep the best pieces for themselves? I don't think it.
1969. But did you see that a fair proportion was sent to each? Yes, I did. There might be a little difference sometimes, but it was distributed as equally as could be.

## QUARANTINE COMMISSION—MINUTES OF EVIDENCE.

1970. Do you know if they had any medicines on board the "Faraway"? It was Dr. Walsh's duty to send for what he required. There was no supply on board except what he sent for; in fact there was no medicine on the ground except what the doctors sent for. Mr. J. Carroll.  
26 Oct., 1881.
1971. Do you remember Dr. Goode telling Dr. Walsh about the 17th June last that he would have to be prepared to receive six small-pox patients? He mentioned some small-pox patients, but I don't think it was such a large number as that.
1972. Do you remember Dr. Walsh's saying he was in urgent want of medicines, and sending a requisition? I believe he told Dr. Goode, but that was not the proper way. He should have sent a requisition. Perhaps Dr. Goode forgot it.
1973. Is it not a fact that Dr. Walsh told you daily he was in want of these medicines? He never told me, because whatever medicines he wanted, if he made a requisition, I sent it to Dr. Alleyne. I took it down in my book whatever he required.
1974. Is it not a fact that at this time Dr. Walsh made a requisition? He did, for some of the things.
1975. And after that did he not tell you daily that he was in want of medicines? Well, I told Dr. Alleyne to send them, and they were sent to him.
1976. But do you know how long it was after he first told you that he wanted them before they were sent? I do not know. It would be three or four days sometimes.
1977. Can you account for the delay? No; the doctors were often told to send for things three or four days before they were required, because it was not always so easy to get them down from Sydney.
1978. Did Dr. Walsh ever write a requisition in Latin, and the telegraph operator had a difficulty in reading it? Yes, it was sent ashore in a tin-pot, and I had to fumigate it and then could not make it out.
1979. *Dr. Manning.*] And how soon was it sent back to Dr. Walsh? Half-an-hour afterwards.
1980. Is it true that it was not returned to Dr. Walsh for ten days, and then returned with a request that it should be written in English? Nothing of the kind. He was told the operator could make nothing of it. Then I sent my son back with the memorandum and had it written in English and forwarded it to Sydney immediately.
1981. *President.*] How long after that was it that the medicines were sent—do you think it was ten days? No, it was not—about two days. There has never been any mistake since Dr. Beattie came on board. Everything is brought regularly. There have been no complaints since he came.
1982. *Dr. Manning.*] Can you tell us what stores were on board the "Faraway" in the way of commodes, medicine glasses, feeders, and so on? There was a large number of them on board.
1983. Are you aware whether the stores were removed from the "Faraway" after she was used as a hospital ship on a previous occasion? No, they were left on board; there was a large quantity of things on board.

THURSDAY, 27 OCTOBER, 1881.

Present:—

DR. JONES,	DR. MANNING,
DR. MACLAURIN,	CAPT. HIXSON,
MR. STREET.	

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Mr. John Carroll called in and further examined:—

1984. *President.*] Complaints have been made that the people at the Quarantine Station were short of cooking utensils;—do you know if that was the case? They were at first, till some were sent from Sydney; it seems that the cook-house there merely had ordnance boilers, four or five of them, and they are only fit for making soup in; there was no means of roasting meat there at all. Mr. J. Carroll.  
27 Oct., 1881.
1985. Whose duty was it to make application for these things? The doctor in charge of the healthy ground and the doctor in charge of the hospital, both of them.
1986. And did they make application to you for these things? Not for some time, and as soon as they did the things were sent to them.
1987. Do you know that Dr. Caffyn had nothing to cook his provisions in? He might have been three or four days without a grid-iron, which had to be sent for from Sydney, but he had plenty of pots and pans; he had a frying-pan and saucepans in his house.
1988. Dr. Caffyn has told us that his meat was cooked on an old piece of hoop-iron all the time he was there? It could not be, because Mrs. Keats cooked for him, and many a time he stated what a good cook she was; he had a grid-iron sent to him three or four days or perhaps a week after.
1989. *Dr. MacLaurin.*] Did you see it? I did, I saw it when it came down.
1990. *Capt. Hixson.*] And he complained to you about wanting a grid-iron at a certain time? He did, and he sent for it himself to Sydney.
1991. How long was it before it arrived? It might be four or five days.
1992. And you are quite sure he had other cooking utensils, and that the grid-iron was the only thing he was short of? Yes.
1993. *President.*] Did you receive applications from other persons for cooking utensils? They were from the hospital enclosure, not from the healthy ground.
1994. And were they sent into the hospital enclosure? They were; they were never taken into the store at all.
1995. Was any formal demand ever made by Dr. Caffyn for cooking utensils? That was the only thing, a grid-iron.
1996. And did you refuse to supply them? Certainly not.
1997. Did he ever tell you there were not a sufficient number of saucepans in the cooking-house? He never did.
1998. *Capt. Hixson.*] Did you supply him with any while he was there? Whatever he asked for he got; he had one of these large cooking-houses for the purpose of cooking for his people.
1999. *President.*] Did Keats ever apply to you for cooking utensils? No, it was not his place to apply for

- Mr. J. Carroll. for these things ; Dr. Caffyn was in charge of the healthy people, and Dr. Clune in charge of the hospital enclosure ; and they had a right to make requisitions for whatever they required.
- 27 Oct., 1881. 2000. Do you remember Keats asking you for saucepans ? I do not ; whenever I spoke to Keats he always said he was quite comfortable.
2001. Were the people supplied with a sufficient number of knives and forks, cups and saucers, and those sort of things ? Not at first ; they were not in the store till they were sent out from Sydney.
2002. Do you remember Monahan complaining that he had not enough knives and forks ? He did, and he was supplied as soon as they came up from Sydney.
2003. Do you know how long it was from the time he first made his application before he was supplied with them ? It might be three or four days.
2004. Do you think it was four weeks before he got them ? Certainly not.
2005. Had you any brushes and combs in the store for the use of the people ? No.
2006. Did anyone ever apply to you for brushes and combs ? They did, but I told them to apply to the doctor, and ask him to send a requisition to Sydney for them.
2007. Did the doctors ever apply to you for them ? No, I do not think so ; there were none ; they were never kept in the store.
2008. Do you remember Maher of the "Pinafore" applying to you for clothes ? I do very well, and he got clothes. I had a great deal of trouble with him ; he swam ashore half a dozen times. He was very abusive ; he would tell me I could go to a certain place, and he would do as he liked, and I might tell the police the same ; he did not care about them nor me either.
2009. Do you know if he was kept three weeks without clothes after he had applied for them ? He was not.
2010. Did you put him off from day to day, saying that you would give him some on the following day ? I might, if I thought he required them, for he was continually asking for clothes.
2011. *Captain Hixson.*] This man was sent down by Mr. Halstead, the owner of the steamer, and not by the Government, was he not ? Yes. When he applied to Dr. Alleyne he was told that Mr. Halstead, the owner of the "Pinafore," was the proper person to apply to.
2012. *President.*] Had Mr. Halstead any opportunities of communicating with the boat ? Yes, he had ; his ration boat was anchored some distance from the wharf, and could bring anything he required for the "Pinafore."
2013. Then do I understand you that you did not consider it your duty to supply Maher with the things he asked for ? I did not, though I did so on more than one occasion when I saw he wanted them ; he had no reason to complain.
2014. *Captain Hixson.*] You mean that you considered Maher to be differently situated from the people at the Quarantine Station, and that you had no right to supply him ? No, I don't think I had ; in fact Dr. Alleyne told me I was not.
2015. *President.*] You did not get instructions to supply Maher and the other man with what they wanted ? No, only with beds and provisions.
2016. Did they apply to you for cooking utensils ? No, they did not require them ; all those things were on board their vessel ; they were supplied by Mr. Halstead.
2017. Did they ask you for tobacco ? Yes, they got tobacco regularly, every time they asked for it.
2018. Were you present when Constable Cook came down to the Quarantine Station ? Yes.
2019. What were the instructions you issued with regard to Cook ? He was to go on board the "Faraway" at once.
2020. Did you communicate that to Cook ? I went alongside the "Pinafore" and told him so.
2021. Did he refuse to go on board the "Faraway" ? He refused to go on board, and threatened to shoot me if I went near him.
2022. Had he a revolver in his possession ? He had, and it was taken from him by the police the next day.
2023. Did he show it ? He did, but I believe it was not loaded.
2024. At the time he threatened to shoot you had he the revolver in his hand ? He had.
2025. *Dr. MacLaurin.*] Did he point it at you ? Well it was night, and I could not see at all.
2026. *President.*] What steps were taken then ? He was ordered to remain on board the "Pinafore" till I communicated with Dr. Alleyne. I did so, and then he was ordered ashore by Dr. Alleyne, and put into a tent on the beach.
2027. Were you present when the constables told him he would have to go on board the "Faraway" ? Yes, I was.
2028. Did you hear them say that if he did not go on board they would put the handcuffs on him ? Yes.
2029. What reply did he make ? He said he did not care ; he would not go on board for any of them.
2030. On what day did he arrive at the Quarantine Station,—was it on the Friday or Saturday ? I do not know the day of the week ; it was 8 or 9 o'clock at night.
2031. And how long was he kept in the "Pinafore" ? Until the next day.
2032. Did you say that a tent was provided for his reception ? Yes, it was all put up—an ordinance tent.
2033. Was it provided with bed and bedding ? He had an iron bedstead, mattress, pillows, and three blankets, and could have had more if he had asked for them.
2034. Whose duty was it to see that he got his food regularly ? A constable was told off for that purpose.
2035. *Captain Hixson.*] Do you know his name ? Three of them used to take turn-about.
2036. Do you know whether this constable attended properly to the man ? I never heard any complaint.
2037. Then is this the case, that when Cook refused to go on board the "Faraway" a tent was put up for him on the beach and a constable told off to attend upon him ? Yes, that is the case.
2038. *Dr. Jones.*] Did the constable go near him ? He brought his things and laid them down at a certain place near the tent, and then Cook came and took them away ; those were the rules that were laid down.
2039. *Dr. MacLaurin.*] Did Cook seem to be very sick ? He did not ; but Dr. Caffyn ordered him a bottle of beer every day for six days.
2040. *Captain Hixson.*] He was not helpless ? He was not.
2041. He was supposed to have small-pox at the time ? He was supposed to have it.
2042. And I suppose the man attending him did not like to go too close to him for fear of infection ? Yes, that was the reason ; the things were laid down at a certain place, and he was as well able to go for them as I am at this moment.

2043. Can you tell us the sort of food provided for Constable Cook at this time? He got bread, meat, tea and sugar, jam, anything that was in the store that he asked for; butter, preserved milk, anything he asked for. Mr. J. Carroll.  
27 Oct., 1881.

2044. Did you see him frequently or only occasionally? Half a dozen times a day, at least; I could see him from the store. The man was scarcely ever in his tent all day; he was about in the ground prescribed for him.

2045. Do you know whether he got sufficient bedding? Yes, I do, sir.

2046. How do you know? Because he never asked for more.

2047. Did he ask for anything? He did, often.

2048. Do you remember anything he asked for? He would call over to me if he wanted a tin of jam or a stick of tobacco, and I would take it and lay it down near him myself.

2049. Do you remember his being very hard up for towels? No, he was not; he had a couple of towels served out to him.

2050. When? A couple of days after he went into the tent, I believe; of course, being so close to me, he could ask for anything he wanted, and if I did not give it to him I was to blame.

2051. *President.*] You remember Hughes coming down to the Quarantine Station and being put on board the "Faraway"? Yes, I do.

2052. Did you accompany him to the "Faraway"? Yes, and gave him into the charge of the doctor.

2053. Were you aware that he went ashore after he had been on board the "Faraway" some time? Yes, he swam ashore from the "Faraway."

2054. How were you first informed that he was on shore? Dr. Walsh informed me.

2055. And what steps did you take to have him put back again? I had him arrested and put in a tent till I reported the matter to Dr. Alleyne, and he ordered Hughes to be put on board the "Faraway" immediately.

2056. Did you hear of his alarming the people on shore in any way? Yes; he was in the enclosure where his wife was, and alarmed all the people there. Some of them went out of their tents and went to Dr. Caffyn's quarters and reported the matter to him.

2057. When you had him taken back to the "Faraway" did you go alongside the "Faraway"? Yes, I did.

2058. And what did Dr. Walsh say to you? He said he could not do anything, and that the man would go ashore again. Hughes told me himself that he would go again, nothing would keep him.

2059. *Dr. Manning.*] Was there any reason why he should not go to see his wife? There was every reason; he was under a penalty under the Quarantine regulations—two years, I believe, in gaol.

2060. But he was going from an infected place to an infected place? The regulations state distinctly they are not to go from one part to the other.

2061. *President.*] After that did Hughes ask you to be allowed to go on shore? Yes he did, repeatedly, and whenever he did I always reported it to Dr. Alleyne, and he said he would get him ashore as soon as he could.

2062. Did you tell the constables to put handcuffs on him? Yes, they were ordered to be put on by Dr. Alleyne and the Inspector General of Police, because the police would not have done it for me without an order from the Inspector General. I sent a telegram to Sydney and got an answer back, at least the officer in charge of the police got an answer.

2063. Did you allow Hughes to go and see his wife? No, certainly not.

2064. Did you tell him that he might go, but that he must not touch her hand? No; he said he would go in spite of any one, and the police went up and arrested him at once.

2065. *Dr. Jones.*] That was the second time he went on shore? Yes.

2066. *President.*] While he was there were his children brought to see him? I do not know; they were in the healthy ground under Dr. Caffyn's charge.

2067. While Hughes was on shore did he ask you if he might go to the healthy enclosure? No, he never asked me; if he had I could not have given him leave.

2068. You are aware that leg-irons were afterwards put on him? Yes.

2069. Did you receive special instructions to do so? Yes, from the Inspector General and from Dr. Alleyne; the telegram from Dr. Alleyne was endorsed by the Inspector General.

2070. How long were these irons kept on? Two or three days.

2071. And how did you get instructions to remove them? The officer in charge of the police got instructions from the Inspector General.

2072. What means had you of lighting the "Faraway"? Kerosene oil.

2073. And who attended to the lights? The doctor's attendant on board.

2074. *Captain Hixson.*] Do you know how many lamps there were on board? Four or five; there was a good supply of lamps and some spare ones, and candles were supplied as well to the doctor.

2075. How do you know that? Because I sent them to him, a pound of sperm candles every second day.

2076. *President.*] Was the "Pinafore" under your orders? Oh, yes.

2077. And was Dr. Spencer? Yes.

2078. Do you know whether any patients suffering from small-pox were ever sent down from Sydney in open boats? They were.

2079. By whose orders was that done? That was done by the authorities in Sydney; I know nothing about it.

2080. Did you receive orders to send a boat up for that purpose? I did, from Dr. Alleyne.

2081. What was the nature of the order you received? The boat was to accompany the "Pinafore" for the purpose of bringing a patient down.

2082. Did you get any special instructions with regard to Mrs. Kelly and Mrs. Fisher being brought down in an open boat? No, I did not.

2083. Or Verdich? No, I did not; all the instructions I received were to send an open boat down.

2084. Was it the same boat? Yes.

2085. Was it watertight at the time? She might leak a little, but I think she was in a fit state if she was properly attended to.

2086. There were a great number of coffins taken down to the Quarantine Station, were there not? There were.

2087. Who ordered them? Dr. Alleyne, and there were more than were required, and I told Dr. Alleyne so; he sent down twenty-four—twelve of them were children's coffins.

- Mr. J. Carroll. 2088. Is that the full number of coffins that were sent down? It was not; there were a lot in the store-room besides.
- 27 Oct., 1881. 2089. How many were sent down since this outbreak of small-pox occurred? At least thirty or forty.
2090. Are they still there—those that have not been used? Yes, they are there still.
2091. Whose duty was it to see that the graves were properly dug? The police always attended to that; they did not dig the graves, but they saw that the grave-diggers did it properly.
2092. *Captain Hixson.*] How did it become the duty of the police? They were ordered by Dr. Alleyne; they were there to assist whenever they were required; they had nothing else to do.
2093. Did you order the police to do this duty? I did by Dr. Alleyne's orders.
2094. *President.*] Did you give orders about the depth of the graves? They were 6 or 8 feet deep, as deep as they could be.
2095. Do you know that they were dug to that depth? I do not know, I never saw the graves; the police told me they were.
2096. Who was in charge of the burials? Senior-constable Sullivan.
2097. *Captain Hixson.*] You say you never saw the graves;—did you not attend when burials took place? Certainly not, that was the doctor's business; I was not supposed to go near them.
2098. *President.*] Who made the arrangements for the burial of these people? They were conveyed from the wharf by the grave-diggers up to the burial-ground, and the constable accompanied them.
2099. And what service was performed at the burial? No service at all.
2100. Did no one read the burial service? No.
2101. But who had the general duty of supervising these things at the Quarantine Station? The doctors.
2102. Then you did not consider it a part of your duty to see that the burials were performed decently? No, I am not supposed to go near them.
2103. *Captain Hixson.*] Why—for fear of infection? Yes. I am merely supposed to go as far as the boundaries of the healthy ground—the boundary pillars—and communicate with the doctors.
2104. *Dr. MacLaurin.*] And you were not supposed to go into the burial-ground, as it was infected ground? Yes.
2105. *President.*] When these bodies were carried to the grave-yard, did they pass anywhere near to the healthy ground? They did. The people were supposed to be in their houses when the coffins passed.
2106. How near to the houses did the coffins go? About 100 yards.
2107. Were they not nearer to the houses at any time than that? Not if they went the right way. The doctor's orders were that all the people should be in their houses when the coffins went by.
2108. But the fact is that these coffins were carried to the grave-yard through the healthy ground? Yes, they were. There was no other way to get there.
2109. *Captain Hixson.*] Did the question ever arise of reading the burial service over these unfortunate people who died? No, no question of it ever arose; the fear of infection was so great that no person would go near them.
2110. *President.*] How did you arrive at the conclusion that it was the duty of the doctors to attend to the funerals? It is in the regulations; it has been always the case at any rate. It says in the regulations that the superintendent is not allowed to go outside the boundaries for fear of bringing infection to the people, and of course if I keep inside the boundaries I cannot go near the graves.
2111. Is there a boundary-line between the burial-ground and the healthy quarters? No, there is not. The burial-ground is in the healthy ground, but I am not allowed to go there for fear of infection.
2112. At the time that any funeral is taking place had the people in the healthy ground access to the burial-ground? Yes.
2113. They were allowed to go there? Yes.
2114. *Dr. Jones.*] And you could go there? No, because my residence is outside the Quarantine ground; I am only supposed to go to the boundary pillars to communicate with the doctors.
2115. *President.*] But is it not a fact that this building where Dr. Caffyn was living was inside the healthy ground? Yes, they are all inside the boundary pillars.
2116. Was it ever reported to you that the graves were not dug to a proper depth? It was not.
2117. Did you ever hear that the bodies buried in the old burying ground were so close to each other that it was almost impossible to dig the graves properly? I never did. There was plenty of room; there is a large space of ground where there never was a corpse.
2118. What is the area of the old burial-ground? Four or five acres, or more.
2119. *Captain Hixson.*] But we have been told here that there was an objection to the old burial-ground and that Dr. Foucart had selected a new one? Yes, he did.
2120. Then which are you referring to? The old ground.
2121. How many bodies do you think have been buried there during the last forty years? That has not been the burial-ground all the time I have been there. I don't suppose there have been more than 100 burials in that ground at any rate.
2122. Did you ever hear complaints of any smell or unpleasantness from the old ground? No, and I have been over it often and often.
2123. *President.*] Did you ever see a grave opened in the old burying-ground? Often.
2124. What was the depth of them? About 8 or 10 feet.
2125. What was the nature of the soil? Soft sandy soil.
2126. Was there any rock? No, unless there might be small pieces here and there that could be easily dug up with a spade.
2127. Do you think there was any necessity removing the burial-ground? No, I do not; it was a hobby of Dr. Foucart's.
2128. *Dr. Jones.*] Did the water percolate towards the healthy ground in wet weather? It might when there was very heavy rain. There was plenty of room to bury people in it for the next twenty years.
2129. But it is a fact that the level of the old burying ground is above that of the healthy ground? Yes.
2130. *Captain Hixson.*] In fact the slope of the old burying ground goes towards the healthy ground? Most of it goes towards the sea; very little of it goes towards the ground.
2131. *Dr. Manning.*] You said that Dr. Spencer was under your orders. Did you consider Dr. Walsh and

and Dr. Clune and Dr. Caffyn also under your orders? Every person on the Quarantine Station is supposed to be under my orders. Mr. J. Carroll.

2132. Did you ever point out to Dr. Caffyn and Dr. Clune that everything they required was to be requisitioned to you? Yes, and Dr. Caffyn has been in quarantine before and ought to know it. 27 Oct., 1881.

2133. *Captain Hixson.*] Were they in the habit of sending requisitions to you? They would send them to Dr. Alleyne.

2134. *President.*] The question I asked you was: Did you ever point out to Dr. Caffyn and Dr. Clune that they were to requisition you for what they required for the people under their charge and that they would be supplied with what was necessary? No, I told them they would have to requisition Dr. Alleyne.

2135. Were you present at the time that Dr. Alleyne had an interview with Dr. Clune on the ground; that was on the first Saturday? Yes, I was.

2136. Did you at that time hear Dr. Alleyne ask Dr. Clune to take charge of the patients in the hospital enclosure? Yes, I heard him order him to do so.

2137. How far was Dr. Alleyne then from Dr. Clune? Dr. Clune was on the hill in the enclosure and Dr. Alleyne was on the flat near the store, and they had to speak pretty loud to understand each other.

2138. In your opinion did Dr. Clune understand what Dr. Alleyne said? He did, but he did not seem willing to do it; he said he had no business to be there at all.

2139. Did you hear Dr. Clune consent to do the work? He did not consent.

2140. Did he refuse to do it? He did not refuse, but he grumbled at it.

2141. *Captain Hixson.*] He agreed to do it under coercion? Yes.

2142. *Dr. Jones.*] Did you hear Dr. Alleyne say anything about his being paid? He said he would be well paid for his labour.

2143. *President.*] Do you think it was clearly understood on that occasion that Dr. Clune was to take charge of the hospital enclosure? Yes, I do.

2144. Did he consent to do that? He did not refuse to do it, and the dispute was between Dr. Caffyn and Dr. Clune, because Dr. Clune thought Dr. Caffyn should have taken charge of the sick, and he of the healthy people.

2145. *Captain Hixson.*] Did these gentlemen have any altercation on the subject? Yes, they were always at it.

2146. *President.*] Did Dr. Caffyn consent to take charge of the healthy ground? Yes, he was very willing.

2147. Did you hear anything said about paying him? No, I don't think so; of course he knew he would get paid; that caused a great deal of jealousy between the two doctors.

2148. Did Dr. Clune offer to take charge of the healthy ground? Yes, he said he would do that at once; he did not want to take charge of the hospital enclosure, because he remarked that Dr. Caffyn was sent down as a Government doctor and he was not.

2149. Were you informed at any time that Dr. Clune had stated that the large building he occupied ought to be used as a hospital for the sick people? No; he always objected to leave it.

2150. Was he ever asked to leave it? I suggested it several times to Dr. Alleyne that the large building he occupied should be given up for the sick people, and that Dr. Clune should live in a tent.

2151. *Captain Hixson.*] What was the result? I never heard any more of it.

2152. *President.*] Were any of these houses on the Quarantine Station not watertight. Some of them.

2153. Were they in the healthy ground? Yes, the houses in the hospital ground were new buildings.

2154. Did you ever make any application to have them repaired? Yes; but it could not be done while the patients were in quarantine.

2155. I suppose the Quarantine Ground was originally intended for the use of ships only coming in from foreign ports? Yes.

2156. And the articles you were supplying from your store were such as would be required by passengers and others landing from those ships? Yes.

2157. And it was considered, I suppose, that people coming from ships in that way would be possessed of many articles of their own which need not be kept in the store? Yes.

2158. As soon as you found out that people were sent down from Sydney not possessed of such articles, did you take means to have them supplied? I directed the doctors to apply for them.

2159. *Captain Hixson.*] And I suppose you sometimes sent requisitions yourself apart from the doctor's requisitions? Yes, sometimes.

2160. What was the nature of those requisitions? Perhaps for mattresses and blankets.

2161. *Dr. Jones.*] Did you at any time, while Dr. Clune and Dr. Caffyn were in charge of their respective enclosures, show them these regulations (*See Appendix*)? No; I had only that one copy.

2162. Did you communicate to them the substance of them? Yes, and I knew Dr. Caffyn read through those regulations in quarantine, but Dr. Clune did not.

2163. But you communicated to Dr. Clune the substance of them? Yes, I did.

2164. *Captain Hixson.*] Some reference was made yesterday to drunkenness. Did you ever yourself see anyone drunk about the station during this late epidemic? No, unless Dr. Walsh and Dr. Clune.

TUESDAY, 1 NOVEMBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
CAPT. HIXSON,

MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

John Spencer, Esq., M.R.C.S.E., and L.S.A. London, sworn and examined:—

2165. *President.*] You were employed by the Government in connection with the outbreak of small-pox, were you not? Yes. Dr. Spencer.

2166. In what capacity were you employed? Dr. Alleyne asked me to visit the sick, and I was first occupied among the Chinese in Waterloo; afterwards in visiting reported cases of small-pox. 1 Nov., 1881.

2167.

- Dr. Spencer. 2167. Were you further employed in any way? No, I visited cases that were reported to me.
- 1 Nov., 1881. 2168. And during the time that you were employed did you reside on board the "Pinafore"? No, I joined the "Pinafore" after I had been visiting the people. About 10 or 11 o'clock on a Saturday, some time in July, Dr. Alleyne said I must go down with the sick in the "Pinafore," and remain in the fore part of the vessel so as not to come in close contact with them, and that a special order would be obtained for me to return; that order did not come. I may mention that I was extremely ill on board that vessel. I was seventy-two days on board the "Pinafore," and was suffering very much during that time.
2169. Can you tell us why you remained on board so long? I must tell you that Dr. Alleyne asked me if I was willing to go into the enclosure. I said I was willing, but unable. I was ill at the time, so ill that I really thought I might not get over it.
2170. Was that said with a view to your taking charge of the patients? Yes, to take Dr. Clune's position.
2171. Do you remember about what time that was? It was about, I think, three or four weeks after I was first sent on board the "Pinafore," I cannot say exactly.
2172. Did you accompany Dr. Alleyne to the station when the patients were first sent to Quarantine? I went down at first I believe with the object of stopping at the Quarantine Station, but after Dr. Alleyne got ashore he made some other arrangement, and said I was to return, and he would find me some employment in Sydney.
2173. *Captain Hixson.*] You did not go ashore then with Dr. Alleyne? I did not go ashore.
2174. *President.*] Then you do not know personally what steps Dr. Alleyne took for the care of the ground further than that he told you your services would not be required down there? That my services would not be required, and that he would find me employment in Sydney. From that time I was employed in visiting the sick or cases that were reported and reporting upon them.
2175. Do you remember the date when you first went on board the "Pinafore"? It was on a Saturday, and I think it was the 18th or 19th, but I am not positive about the date; I know that it was on a Saturday.
2176. About a month after you were first engaged? Yes, about a month.
2177. Can you tell us why you remained so long in the "Pinafore," and why you did not live on shore during that time? Those were my instructions; my clothes were ordered to be taken off as soon as I got on board, and I felt the cold bitterly. I have always been accustomed to wear flannel, and I got nothing but a cotton shirt. I could not get sufficient clothes; I was wearing a gaol shirt and shoes, and everything of that class were given me.
2178. By whom were they given to you? By Mr. Carroll.
2179. You have not told us yet why you remained on board so long? Well, my belief was that I should get an order to return.
2180. *Captain Hixson.*] You thought you would be released sooner by remaining on board the "Pinafore" than if you went to the Quarantine Station? Yes, that was my impression.
2181. *President.*] Did you ever apply to leave the vessel? I did not apply for this reason—I thought by remaining in the vessel I might get my release sooner. I was never requested to go ashore.
2182. You were desirous then of being released from your duties? I was most desirous.
2183. Did you have any communication with Dr. Alleyne in reference to your desire to be released? Only on the occasion when I was asked by telegram whether I was willing to go into the enclosure.
2184. Then that was the second occasion on which you were asked to go into the enclosure? No, I was only asked once.
2185. But you said said that when you first went down with Dr. Alleyne it was with the object of going into the enclosure? Yes, but I had orders to return. Dr. Alleyne, now I recollect, asked me to go into the enclosure three or four weeks after I had gone down there.
2186. Did you prefer remaining on board the "Pinafore" to going ashore and taking charge of the patients? Well I was too ill to undertake the duty, and I did not like going ashore at the time.
2187. Did you ever apply to be allowed to have a tent on shore to live in? No.
2188. Can you tell us why the clothes you wore down to the "Pinafore" were all taken from you? I had a paper in my hand from Dr. Alleyne to this effect: "Supply Dr. Spencer with a new suit of clothes." As soon as I arrived I handed this to Mr. Carroll, and he brought the things down to me, and I took everything off and put them on.
2189. Did you receive any further supply of clothing during the time you were in the "Pinafore"? I think once I had a flannel shirt.
2190. But with that exception you received no other clothing? No other clothing.
2191. Then you wore that suit the whole time, seventy-two days? Yes.
2192. What arrangements had you on board for getting your clothes washed? There were no arrangements made all.
2193. *Dr. Manning.*] Can you give us any reason why your own clothes were taken away, and an order given to you for a new suit? Not the slightest.
2194. *Captain Hixson.*] Had you been in contact with people suffering from small-pox? No.
2195. *Dr. Manning.*] Did this occur when you first went to the "Pinafore"? When I first went down early in the morning, I handed to Mr. Carroll the order from Dr. Alleyne to supply me with a new suit of clothes.
2196. Was any explanation made to you when this piece of paper was handed to you? Not a word, not a syllable was said.
2197. *Dr. Jones.*] Did Dr. Alleyne hand you the paper? Yes, he gave it to me at the Australian Club.
2198. *Dr. Manning.*] Then who told you to take off the clothes you had on and put on the new suit? Mr. Carroll must have done that, because he handed me the clothes.
2199. *Dr. MacLaurin.*] Did you ask for a new suit? No, I did not want a new suit, my clothes were very nice clothes.
2200. *Dr. Manning.*] And what became of your own clothes? They were taken away and burned.
2201. *Captain Hixson.*] Are you quite sure you had not been in communication with cases of small-pox? No, I do not believe I had.
2202. *Dr. Jones.*] Had you not been called upon to see cases that were suspected? Yes.
2203. *President.*] Do you think it was intended to keep you clothes only until your duty on board the "Pinafore" was over, and then return them? They did not subject them to any disinfecting process, because their object was to destroy them.

1213

2204. *Dr. Manning.*] When you went on board the "Pinafore" the first day, did you understand that you were only going for the one trip? I understood that I was to have a special order to return. Dr. Spencer.
2205. And when did you expect to get that special order? I expected it would be on the following Monday or Tuesday; I did not know when. 1 Nov., 1881.
2206. *President.*] Were your instructions given to you in writing or verbally? Verbally. Dr. Alleyne went away to the House to see the Minister to get the special order, and they had all gone to a ball.
2207. *Dr. Manning.*] Was any arrangement made with you either at your interview with Dr. Alleyne or at any subsequent time with regard to the rate of remuneration you were to receive? I was to be paid liberally.
2208. But no definite arrangement was made as to the exact sum? No.
2209. And when were you informed that you were to be treated liberally? When I was engaged.
2210. But was that at the time you were engaged to visit reported cases of small-pox in Sydney, or when you went on board the "Pinafore"? When I was first engaged the arrangement was that I should be treated liberally.
2211. Was any subsequent arrangement made? No.
2212. *Captain Hixson.*] Then you were engaged for any duties upon which Dr. Alleyne might employ you? I was engaged purposely to go down with the sick, as Dr. Alleyne said it was necessary for a medical man to be on board, and I went up and returned many times, two or three times a week.
2213. *President.*] You have stated that you expressed a desire to be relieved from your duties on board the "Pinafore"? I stated several times that I was very ill.
2214. Did you apply to be relieved from your duties? I did not know whom to apply to; I had no opportunity of applying.
2215. Did you not see Dr. Alleyne again after that? No, I did not see him.
2216. What communication did you receive from him? I received a telegram to this effect—"Are you willing to attend to the sick in the enclosure, and take the duties of Dr. Clune"?
2217. What reply did you make to that? I said I was sick, that I was not able to attend to the duties.
2218. Did you send that reply back by telegram? I gave it to Carroll; he took it down and I believe he sent it.
2219. During the time you were on board the "Pinafore" from whom did you receive your orders as to matters connected with your duties? From Mr. Carroll. This would be the order to the engineer: "Get steam up and, Doctor, you will go with her." She generally went off at 6 in the morning.
2220. *Captain Hixson.*] Were those instructions given personally or by letter? Personally.
2221. So that you frequently saw Carroll? Yes, but I was not very near him; he spoke from a distance sometimes from the wharf, which was a long way off.
2222. *President.*] Are you still employed in the same capacity? I have just got my release to-day.
2223. Under what circumstances did you obtain your release from your duties? I had orders to attend here on a certain day, that is to-day.
2224. But did that terminate your agreement with the Government? No, I had twenty-one days in the healthy ground before I could be released.
2225. Did you receive any notice from the Government that your duties would terminate at any time? No.
2226. Then under what circumstances did you go into the healthy ground to undergo this period of preparation for release. Who instructed you to go into the healthy ground and remain there for twenty-one days? I have not the slightest remembrance.
2227. *Dr. Manning.*] Have you been employed by the Government on former occasions? Yes, I was five years visiting surgeon to H.M. Gaol at Port Macquarie.
2228. And when did your connection with that institution cease? About two years ago.
2229. When the gaol was disestablished? Yes.
2230. *President.*] Do you remember visiting Mrs. Bonnor's residence on one occasion? Yes, I went there I think on the Monday.
2231. Did you go there with the view of ascertaining whether Mrs. Bonnor had small-pox? I received a card with the name of a doctor on it, a qualified doctor, and I went and saw her; she mentioned that a doctor had been there, but that he was afraid to go near her.
2232. How close did you go to Mrs. Bonnor on that occasion? To the bedside.
2233. And you were able to ascertain that she was suffering from small-pox? My opinion was that she was suffering from small-pox.
2234. And you directed the police to take her into quarantine? Yes.
2235. Did you also see Mrs. Kelly? She was taken the night before I went to the "Pinafore."
2236. And did you make an examination of her? Yes; my opinion was that she was suffering from small-pox.
2237. And you ordered her to be removed also? I did not order these parties to go down, I reported them.
2238. *Captain Hixson.*] To whom did you report it? I wrote the report and left it with the police.
2239. Did you ask Mrs. Kelly to come out into the street? No, she was at the door.
2240. Did you go into her house? I did not, I remained outside.
2241. And you were sufficiently close to enable you to form the opinion that she was suffering from small-pox? I was.
2242. *President.*] During the time you were on board the "Pinafore" were any patients towed behind the steamer in open boats? No, there were not.
2243. *Dr. Jones.*] You accompanied Mrs. Kelly and Mrs. Bonnor, did you not? Yes, but I remained in the fore part of the vessel according to Dr. Alleyne's instructions.
2244. *President.*] And after that day did you have medical charge of the people who were being removed in the "Pinafore," and attend them during their passage down? Yes; on two occasions I carried children in my arms, holding them during the whole passage, because I thought it was not right to leave them as there was no convenience for them, and I nursed them myself the whole way.
2245. Do you consider that every precaution was taken and everything done to make their passage as comfortable as it was possible to do? I do.
2246. *Captain Hixson.*] Did you hear any complaints from them while they were being taken down? Not a syllable.
2247. *President.*] We have it in evidence—and are anxious that you should have an opportunity of knowing

- Dr. Spencer. knowing that it is in evidence—that while you were on board the “Pinafore” you declined to wash yourself; that you wore one shirt fifty-one days, and that when a Crimean shirt was given to you you took off the one you were wearing, put on the clean shirt and were about to put on the dirty one over it;—is that the case? It is quite untrue; I may mention that I had three shirts, a flannel one, a Crimean shirt, and another; I forgot that circumstance.
- 1 Nov., 1881. 2248. Did you hear the men complain that they declined to remain on board with you because you were in a dirty condition? No.
2249. You knew Maher on board the “Pinafore”? Yes.
2250. *Captain Hixson.*] Do you know under what circumstances he left the vessel? Yes, he was incapacitated for his duty; he jumped overboard under the influence of drink, and swam out to the “Faraway.” Carroll brought him back the next day. He came and said, “Where is Maher?” I said, “I have not seen him.” Mick was coming down the rocks, and Carroll said, “Haul the boat off and don’t go ashore any more.” The next morning he was ordered up, but he wanted to go to the wharf to get coals and water. Constable Sullivan said, “If you go on shore I have orders from the Inspector General of Police to put you in irons; I have got those instructions from the Inspector General of Police and not from Mr. Carroll.”
2251. Had you often seen Maher under the influence of drink? Yes; a telegram came down to me to report the state he was in.
2252. Where did Maher obtain the means of getting drunk? First of all he got some from Mr. Carroll; then he went to the “Faraway” and got some there; and then he got some from the enclosure.
2253. *Dr. MacLaurin.*] From whom did he get it in the enclosure? Well, it was said that he got it from Dr. Clune, but I did not know whether that was the case or not.
2254. *Captain Hixson.*] Had he such a craving for drink that he would go anywhere for it? He had a dreadful craving for it and would do anything for it. I may tell you that he knocked me down once and the policemen standing on the wharf saw it. Whenever he had to take a body ashore from the “Faraway” the “Pinafore” was employed for that purpose; he used to get spirits there, and then when he landed it he got spirits again.
2255. *Capt. Hixson.*] I suppose it was found necessary to fortify him with spirits before he would come in contact with the corpse;—is that the case? Yes. He was always ill or pretended to be ill, and a great deal of sympathy was extended to him. He seemed to want spirits.
2256. Then you give us to understand that he would take advantage of every opportunity to get drink? Yes.
2257. Did you often see him drunk? Well, he took it to excess.
2258. Did you see anybody else drink on board the “Pinafore”? There was a young man on board who used to drink with him, but I don’t think he drank to excess.
2259. *President.*] Were you allowed stimulants on board? I believe I was, but I never had them.
2260. *Capt. Hixson.*] Did stimulants come on board for you? I do not know whether they came for me, but I passed them.
2261. Can you tell us what quantity came on board, say during a week? None have come on board since Dr. Beattie came, except half a bottle, which was brought by Sergeant Logan on one occasion when the weather was very rough.
2262. *President.*] You were asked by Dr. Alleyne to report upon Maher’s condition? Yes. I said he had a cold. I did not like to say he was drinking in his presence. I was afraid to do that; he was a dangerous man.
2263. *Capt. Hixson.*] Can you say whether he left the “Pinafore” of his own accord or was turned away? When he had orders to haul off from the shore and was not allowed to go ashore when he liked, he could not get his grog then.
2264. *President.*] Did he then resign his situation? Yes. When he found he could not get these indulgences he resigned.
2265. During the time you were on board had you to take your meals with this man and his mate, or were arrangements made for your meals separately? There was no arrangement made at all. When the food was cooked he took three plates, gave one to me and one to his mate, and took one himself.
2266. Then you had to depend upon him entirely for your food on board? Yes, I had; but I could have done it myself.
2267. *Capt. Hixson.*] Did you have any altercations with the people on board the “Pinafore,” or did you live peaceably? Well, this man knocked me down one day; I gave him no provocation, and do not know what he did it for. I believe he did not know what he was doing.
2268. *President.*] Did you make any report to Carroll that this man was in the habit of getting drunk and becoming violent in his conduct? No. It was witnessed by everyone on the wharf, and I thought it was not necessary to say any more.
2269. Are you going back to the Station? No.

---

Senior-constable James Sullivan sworn and examined:—

- Senior-constable Sullivan. 2270. *President.*] On what day did you go to the Quarantine Station? On the 24th of last June.
- 1 Nov., 1881. 2271. And you have been there ever since? Yes.
2272. Were you in charge of the police on the ground during the time you were there? Yes.
2273. Subsequently to the beginning of June last did you hear of any complaints among the people as to their treatment on the ground? There were a few.
2274. Were they complaints which were in your opinion of a reasonable character or otherwise? Some of them were.
2275. What do you consider the chief ground of complaint that appeared to you to be reasonable? Some of the women complained of a want of change of clothing. They did not appear to have enough.
2276. *Dr. MacLaurin.*] Did they complain to you? No. That is what I heard *en passant*.
2277. *President.*] Did you observe anything that appeared to you to be a hardship to the people there? No. It is the way the place is laid out, the way the houses are situated, and the rough state they are in—one large room without partitions for families. That was the main complaint, I think.
2278. During the time you were there was it a portion of your duty to see to the burials of the people who

who died? I did it, not because it was a portion of my duty but to assist Mr. Carroll more than anything else.

2279. It has been stated that the graves were not dug to the usual depth. Did you observe anything of that. No, sir. I think that is false. I saw them, everyone, except that of an infant, and they were all I think 5 or 6 feet. On one occasion I went down to see a grave and it was not deep enough, and I sent to the grave-diggers and told them to deepen it 2 feet. But there was one occasion when I was told that the grave of an infant had not been dug deep enough.

2280. Did you ever experience any disagreeable smell from the grave-yard? Never, and the police quarters are about 135 yards from the place.

2281. Did the grave-yard appear to you to be full, so that there was no room for more graves? No, but there had been no uniformity, and sometimes in digging a grave they would come across a coffin. In such cases we widened the grave so that the second coffin might be laid alongside the first. I noticed that in two instances only; they had been dug in a hurry.

2282. Was there any difficulty in sinking to the proper depth from the presence of rock or stone? No; it is sandy soil.

2283. Did you notice any intemperance on the ground while you were down there? Never, except on one occasion.

2284. Was there much breaking of bounds? No, sir; I never had occasion to report a case. I recollect Dr. Foucart remarking one day that he thought one of my men was intoxicated, but he was entirely mistaken; it was the man's manner; he was a total abstainer, but of a very excitable temperament.

2285. Dr. Foucart has stated that this man informed him that he had smuggled spirits on to the ground;—did you hear that? No; he could have done so, there are plenty of boats going by; I don't say it could not be done, but I never saw it.

2286. Did you attend the funerals personally? I did, every one, except one—that of an infant; as I have mentioned, either I or Senior-constable Mackay invariably attended.

2287. Was any burial service read at these funerals? No; we did not know to what denominations the people who were buried belonged to; in some cases we did not even know their names, and only got them the next day from the papers. Then I got their names and ages put up on wooden boards about 4 x 2 feet. We had them on stone at first, but we found that too tedious to continue, and we used wooden boards.

2288. You remember Hughes swimming ashore? Yes.

2289. Did you receive any instructions to put him in irons? Yes.

2290. From whom did you receive those instructions? From Dr. Alleyne, and also from the Inspector General of Police. The minute was sent by Dr. Alleyne to the Inspector General's Office, signed by him, and forwarded to me through Mr. Carroll.

2291. Did Hughes give much trouble down there. Was he violent at all? No, not while he was on shore, not at all.

2292. Did you ever see Maher of the "Pinafore" intoxicated? I did on one occasion.

2293. Was that on board or on shore? Well, both; he came ashore and was very abusive to Mr. Carroll; afterwards he went into the bush to sleep off his drunkenness, and we found him and sent him on board.

2294. Did you ever see him use any violence to Dr. Spencer? No.

2295. I suppose the "Pinafore" was in sight of the shore and you could pretty well see what took place on board? Yes, about 50 yards.

2296. Could you see her from the police station? No; that is 460 yards away up a steep hill; but we were always down on the beach. Some of the men would be there if I was not there myself.

2297. You had an opportunity of seeing the quality of the food sent down there. The police generally had the duty of cutting it up prior to its distribution? Yes.

2298. Did you consider the food to be generally of good quality? Yes, generally.

2299. And did you consider the distribution among the people down there was a fair one? Yes.

2300. Did the police get a better share than the others? We got ours separately; every other day a quantity of meat was sent down marked "police"; on one occasion the side of a bullock was sent down and we had to take our proportion of it, but generally the groceries and all other articles were sent down for us separately.

2301. You do not consider that any favouritism was shown in the distribution? No.

2302. And you do not think that when this side of beef was sent down the police got the best part? Not intentionally; but I had not a butcher among the men, and they were not skilled in cutting it up.

2303. On some occasions you had to carry the meat for a patient—Cook, for instance, and leave it on a stone at some little distance from his tent? Yes.

2304. Was it ever left in such a way that it remained there for some little time? No, I do not think so, because the board where it was laid was close to his tent.

2305. Did you know that the meat for the other patients was left on a stone at some distance from them? They used to come down for it themselves, and of course if they did not come it was left; we made a table afterwards.

2306. Was any notice given to the people that the meat would be cut up at a certain time, and that they had to come and get their supplies? Yes, directly the ration boat came in they knew they had to come soon.

2307. *Dr. Jones.*] But was not it the practice to cut up the meat and leave it on a stone, and then cooe to the people? Yes, there was a large smooth slab of rock where it was left, and then they came and took it away; but that was for some of the patients in the second-class quarters.

2308. *Capt. Hixson.*] Is this rock you speak of an objectionable place to put meat on? Oh, no; it is a large bald-faced rock, perfectly smooth, and it could not retain any dirt or sand.

2309. It was there, I suppose, because the people who took it could not go outside the boundary? Yes.

2310. *Dr. Jones.*] What means were used to inform the people that the meat was there? We would cooe to them, and they would answer and come and get it.

2311. You waited till they did answer? Yes; of course they might be engaged in getting firewood or something, and then it would remain on the rock.

2312. *Capt. Hixson.*] Did you notice any great scarcity of cooking utensils? Yes; there were not sufficient; it was more the places to cook in and the way they were fixed—three very rough galleys with large boilers in them.

Senior-  
constable  
Sullivan.  
1 Nov., 1881.

2313. It appears then that there were certain articles deficient? Yes.
2314. *President.*] Did it ever come within your observation that Carroll was disinclined to give the people the articles they applied for? Well, he used to say he would give them the articles when he got them from Sydney.
2315. Are you aware whether he ever refused to give people articles they applied for that he had in the store? I do not know what he had in the store; it was a kind of sanctum; he objected to anyone going into it.
2316. *Capt. Hixson.*] He appeared to be unduly careful of the stores under his charge? Yes; he never left the door for an instant without locking it.
2317. Did you have any difficulty in getting what you wanted from Carroll in the way of stores? We never required any; our supplies were sent separately by Mr. Kidman.
2318. Did you ever want towels? No; we had to bring those ourselves.
2319. *President.*] You were not in the habit of obtaining your stores from Mr. Carroll then? No; they come direct from Mr. Kidman, and I signed for them when they came; the rations came the same every day.
2320. *Capt. Hixson.*] Did you hear many complaints on the ground to the effect that people could not get stores from Mr. Carroll? I did; I heard complaints all round, but I could not particularize one more than another; the people seemed dissatisfied and uncomfortable.
2321. Did you think those complaints were reasonable or unreasonable? Some of them were reasonable, and some were not; I believe they could have had more of the luxuries of life if Mr. Carroll had asked for them, such as eggs, cocoa, and so on; they seemed to have sufficient tea and sugar, butter, beef, and bread.
2322. *President.*] You had opportunities of seeing Dr. Caffyn during the time he was there? Yes.
2323. Did you consider that he did all in his power to make the people comfortable and provided with necessaries? I did; he was exceedingly attentive.
2324. *Capt. Hixson.*] If the people in his charge were uncomfortable, to whom do you attribute the fault? I should think it must be someone in Sydney; he had no medical comforts or medicine chest; nothing but what was in the store.
2325. Was there any sickness in that part of the Quarantine ground of which Dr. Caffyn had charge? There was not, with the exception of two cases that broke out, which were immediately removed to the hospital enclosure.
2326. Are you aware whether Dr. Caffyn was in the habit of requisitioning direct for such things as he required? No; I think he used to apply for them through Mr. Carroll; I am sure he did not requisition direct.
2327. Did Mr. Carroll's duties appear to you to be of a very onerous character? Well, he made them onerous himself; he would not allow anyone to help him; he took the whole responsibility upon himself; for instance, he would keep the mail-bag a long time without allowing one of us to help him to open it; the man who is there now appears to get through the duties easily enough.
2328. You think then he could have made better arrangements for the comfort of the people if he had not taken so much upon himself? Yes.
2329. Do you remember what was the greatest number of people he had to do for? About 112, I think, at one time.
2330. And what is about the number now? I suppose about forty; I don't think there are forty all told, doctors, policemen, and all.
2331. Is there a marked improvement now in the comfort of the place from what there was at first? Oh, yes.
2332. When did you notice that this improvement first came about? After Dr. Beattie came down; he appeared to get everything he asked for.
2333. Do you know whether Carroll could not get what he asked for? No, sir; I could not say; I know the things did not come.
2334. Did you find Dr. Beattie more accessible, in the way of procuring things, than Mr. Carroll? Yes; if people want things they go to the store and get them, and if they are not in the store they are sent for from Sydney.

THURSDAY, 3 NOVEMBER, 1881.

Present:—

DR. JONES,		DR. MANNING,
DR. MACLAURIN,		CAPT. HIXSON,
MR. STREET.		

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Mr. Louis Joseph Coghlan, Telegraph Operator, sworn and examined:—

- Mr. L. J. Coghlan. 2335. *President.*] You are in charge of the telegraph office at the Quarantine Station? Yes.
2336. How long have you been there? Going on for five months, sir, but I have not been in charge five months yet.
- 8 Nov., 1881. 2337. How long have you been in charge? Since the 27th August.
2338. During the whole time you have been there you have had an opportunity of seeing the telegrams sent through the office? Yes.
2339. Were there many sent by the patients on the ground to their friends in Sydney? Yes.
2340. Did you receive any orders with reference to the withholding of telegrams sent by the people? Yes.
2341. Can you tell us the nature of those instructions? I received instructions from Mr. Carroll to show him all the telegrams that came from the patients on the ground, as he had instructions from the Under Secretary to see all telegrams passing through.
2342. Then it was your practice so show all telegrams to Mr. Carroll before they were despatched? Yes.

2343.

Mr.  
L. J. Coghlan.  
3 Nov., 1881.

2343. Were any of these telegrams withheld? There were some by Mr. Carroll's orders.
2344. Was Mr. Carroll in the habit of altering telegrams sometimes? Yes, sir.
2345. Do you remember the nature of the telegrams that were either withheld or altered? They were those concerning small-pox.
2346. Then, with that exception, the telegrams, went freely? Yes, sir.
2347. We should like to know a little more particularly of the telegrams concerning small-pox? Some telegrams came down out of the enclosure from persons stating that they had not got small-pox, and I showed them to Mr. Carroll, and he said, "This is not allowable." I said, "I have received no instructions from the head of my department to withhold telegrams"; and he said he had received instructions from the Under Secretary, but I never saw a telegram to that effect.
2348. But such a telegram may have been sent by the operator then in charge without your knowing it? Yes, sir.
2349. Was any telegram relating to small-pox sent after this? Yes.
2350. Can you tell us the nature of that telegram? One was sent by Mrs. Bonnor to her friends, stating that she had not small-pox. It was sent without being shown to Mr. Carroll.
2351. Did anything occur in consequence of that telegram being sent? Yes; there was a paragraph in the paper about it.
2352. Was it after that you received instructions not to send any more telegrams without showing them to him? No, before that.
2353. Did you receive any further instructions after that telegram appeared in the Sydney papers? No, nothing further, only Mr. Carroll told the other operator and myself to show them all to him.
2354. Then you never saw any telegram either altered or kept back, unless it was from patients regarding small-pox? No, only those.
2355. *Dr. Jones.*] Why was an exception made in the case of Mrs. Bonnor? Well, the other operator thought it was not right that patients not having small-pox—and the doctor saying so—should not send messages to their friends to say they were not sick. I was not in the office at the time that telegram was sent.
2356. Where is that operator now? In the Sydney office.
2357. *Dr. MacLaurin.*] That is, he told you that was his idea? Yes.
2358. *Dr. Jones.*] Were all the messages delivered to you in the first instance before Mr. Carroll saw them, or did Mr. Carroll see them first? In some cases I saw them first, and in others he did; the police used to take them from the enclosure and bring them to me and to Mr. Carroll, whichever was the nearest. Sometimes Mr. Carroll would be in the store and they would be brought to me, and I would take them to Mr. Carroll.
2359. Have you any idea of the number of telegrams that came from the patients every day? In those times there were about twenty-five.
2360. *President.*] Was there any other restriction placed on the sending of telegrams by the patients? Yes; they should not be too long, all repetitions should be avoided.
2361. Otherwise the patients were allowed to telegraph freely to their friends? Yes.
2362. *Capt. Hixson.*] Did you ever hear any complaints about not being allowed to telegraph? No, sir; except one from Dr. Clune.
2363. In reference to what telegram was that? I cannot remember the wording of it, but it was to Sir Henry Parkes, to get Dr. Clune out of the enclosure. He asked me to take the telegram down, and I did so, and then a few minutes after he asked me to tear it up.
2364. How did you get intercourse with Dr. Clune? He used to come to the fence.
2365. And speak to you from the inside of the enclosure when you were on the outside? Yes.
2366. He asked you not to send it? He asked me not to send it.
2367. Do you know anything of a telegram that was partially sent—a certain portion of it being erased and not sent? Yes.
2368. What part of it was rubbed out? That referring to the patients with small-pox.
2369. What was it? I do not remember it now. About seven or eight words were rubbed out.
2370. By whom? By Mr. Carroll.
2371. Do you know why Mr. Carroll rubbed those words out? The only reason he gave me was that he had received instructions from the Under Secretary to do so.
2372. To prevent information going up from the patients which he considered objectionable? Yes.
2373. *President.*] Do you remember any portion of a telegram from Dr. Clune worded as follows:—"All right, but still treated as a criminal." Do you remember a telegram to that effect? I remember a telegram in which he referred to himself as being kept like a prisoner.
2374. Was that telegram sent? No.
2375. Why was it not sent? Mr. Carroll ordered me not to send it.
2376. Did Dr. Clune ask you to withhold it? Yes, afterwards, either to tear it up or withhold it.
2377. *Dr. Jones.*] As far as you can remember, were there replies received to most of the telegrams sent to the patients? No; there were no replies at all, except in three or four cases.
2378. *Capt. Hixson.*] As a rule there were far more sent to Sydney than from Sydney to the Quarantine Station? Yes; about twenty telegrams more were sent to Sydney than were received at the station.
2379. *President.*] Was any charge made to the patients for sending these telegrams? No, they were free.
2380. When was the telegraph office first opened down there? On the 23rd June.
2381. And what hours was it kept open? From half-past 8 o'clock in the morning till 10 o'clock at night, and sometimes I used to keep it open all night.
2382. You had many opportunities, I suppose, of seeing Dr. Clune and talking to him across the fence? Yes, two or three times a day.
2383. How far were you from the fence when you used to talk to Dr. Clune? About 5 yards.
2384. Did he appear to be labouring under great excitement while he was there? Yes.
2385. Did he appear ill? He told me he was ill, but he did not seem ill at the time.
2386. What was the impression you formed from the state of Dr. Clune? I thought it was through his being confined, and being anxious to get away from the enclosure; sometimes he was nearly crying when he came down to the fence.
2387. And you thought the excitement arose entirely from his being detained in the enclosure? Yes; he said he was forced to go there, and was always talking about losing his practice in town.
2388. Did it ever occur to you that Dr. Clune was intemperate? No, sir, it did not; but after he came out of the enclosure I formed a slight idea, while he was on the flat in front of my office. 2389.

- Mr. L. J. Coghlan. 2389. Did you ever see him intemperate there? No; but he looked very much like it, though I could not say he was.
- 3 Nov., 1881. 2390. *Capt. Hixson.*] During your intercourse with Dr. Clune—and you say you saw him two or three times a day and talked to him across the fence—did it appear to you that he took an interest in the patients under his charge in the enclosure? I could not say.
2391. There has been a complaint that coffins have been unnecessarily exposed;—did you see anything of that? Yes.
2392. Will you tell us what you saw? I saw six large coffins leaning against the fence near the gate, and some small ones, I believe, inside of them.
2393. And how long were they there—do you remember? A good week, to my knowledge.
2394. I suppose they were passed into the enclosure from the outside? Yes, they were passed in there from the vessel that brought them from Sydney.
2395. Whose duty do you think it should have been to take them away? I believe it was Livesey and Cornelius who should have taken them away from the gate; they were the attendants inside.
2396. Can you tell us why they did not do so? No, I could not.
2397. Under whose orders would those men be? Under Dr. Clune's.
2398. And I suppose if Dr. Clune had given an order to the grave-diggers to remove them they could have been taken away at once? Yes.
2399. The people outside could not of course reach them? No; they would not be allowed to touch them on any pretence whatever.
2400. The responsibility rested entirely with the people inside the enclosure? Yes.
2401. *President.*] Was it made the subject of remark among the people outside that these coffins were left exposed to view in that way? Yes.
2402. *Capt. Hixson.*] What took place with reference to those remarks? Two or three of the men said it was a shame to see them lying there, and that they ought to be removed out of sight.
2403. Did they appeal to anyone to have that done? No, not to my knowledge.
2404. Then all you heard were complaints, and nothing was done? Well, they could not do anything, except through the people inside the enclosure.
2405. Did you see other coffins lying about, because we have it in evidence that when goods were sent down to the Quarantine Station, if there happened to be any spare room a coffin would be packed in. Did you see anything of coffins sent down indiscriminately in that way? No.
2406. And I take it that from your position you saw almost everything that came down? Yes; my office is opposite the stone jetty.
2407. *Dr. Jones.*] Did Mr. Carroll, or anyone else outside the enclosure, expostulate with Dr. Clune about these coffins lying about? Not to my knowledge.
2408. Who supplied you with your necessities? Mr. Carroll.
2409. *Dr. Jones.*] Did you have any trouble in getting what you wanted? No, sir.
2410. *Capt. Hixson.*] Do you know of anyone else who had difficulty in getting what he wanted? No; I was in the store a great part of the time.
2411. Do you know whether the people down there were prone to complain—whether they would complain at trifles or not? They would complain at the least trifle at all.
2412. Did it come under your personal observation that any great hardships were suffered by any of the people there? No.
2413. And you are about the healthy ground and all through it? Yes.
2414. Do you go into any other part? No, only the healthy ground and the cabin enclosure.
2415. *Dr. M'Laurin.*] In fact, all over the ground, except the hospital enclosure? Yes.
2416. *President.*] Did Dr. Clune send requisitions for articles for the patients through your office? Yes, through Mr. Carroll.
2417. Was he in the habit of sending them frequently? Yes, through Mr. Carroll.
2418. Did Dr. Caffyn send many? No, not many; I do not remember any requisitions from him; he may have sent them through the other operator.
2419. Was there much delay in sending these requisitions? No.
2420. How many do you suppose you sent for Dr. Clune? A great number; I cannot remember exactly how many.
2421. And were they for medicines? No.
2422. What were they for principally? The messages I took from him were generally to his wife; I never received any requisitions for medicines from him; they were signed by Mr. Carroll.
2423. But a large number of requisitions were sent on behalf of Dr. Clune by Mr. Carroll? Yes.
2424. And you say there was no delay in sending them? No.
2425. Did you ever notice whether these things came down promptly by the steamer? Yes, except on one or two occasions since Mr. Logan has been there.

Joseph Aloysius Beattie, Esq., L.K. and Q.C.P., and L.R.C.S., Ireland, 1878, Medical Superintendent, Quarantine Station, sworn and examined:—

- Dr. J. Beattie. 2426. *President.*] You are a legally qualified medical practitioner of New South Wales? Yes.
- 3 Nov., 1881. 2427. And you went to the Quarantine Station on the 9th September, I think, as Medical Superintendent? Yes, on the 9th September,
2428. From whom did you take the charge? From Dr. Alleyne.
2429. Was any local doctor on the ground? Dr. Foucart was there and Dr. Spencer, and Dr. Day in the hospital enclosure, and Dr. Robert Beattie in the "Faraway." I did not take over the charge then formally from Dr. Foucart. Dr. Alleyne instructed Dr. Foucart to show me round and make me acquainted with the routine of the station and the situation of the different people in the healthy ground, the cabin enclosure, and the hospital enclosure.
2430. Did you find much dissatisfaction among the people in the healthy ground at the time you took charge? There was considerable dissatisfaction.
2431. What did their principal complaints consist of? Well, they were so numerous and so diverse that they comprehended everything. Some of them were very frivolous, and such as persons would make who are anxious to find fault,

Dr. J. Beattie.  
 3 Nov., 1881.

2432. Did you take any steps to remedy these complaints? Yes.
2433. What was the nature of the more grave complaints made by the people there? That they could not get the necessary supply of underclothing, and with regard to certain articles of food.
2434. What steps did you take to have these complaints remedied? I supplied everything that was asked for, not being particular as to whether they were really necessities or luxuries.
2435. Did you find the means of supplying these things on the ground, or had you to procure them from Sydney? We obtained, of course, a daily supply on shore, but we sent to Sydney for clothing and underclothing as we required them.
2436. *Captain Hixson.*] Did you find the place reasonably well supplied? Yes, fairly supplied.
2437. *President.*] Were the articles, the want of which these people complained of, actually in the store? No, not all; that is to say, boot-laces, thread, and little things of that sort were not. I should not consider them essential, but the people down there were of a class that would never be satisfied; and when they saw the papers taking up their cause they asked for everything, and it was perfectly impossible to satisfy them.
2438. *Captain Hixson.*] You think then that the reports in the papers tended to make the people discontented? Certainly.
2439. From what you saw in the papers that came under your notice do you think those reports were exaggerated? I think they had a basis of truth, but for the most part they were exaggerated and absurd, and some of them utterly untrue. The statements with regard to the coffins and the inconvenience suffered by Dr. Clune and other people there were grossly exaggerated.
2440. In speaking of coffins, you allude to the statement that appeared in the public Press? Yes.
2441. Did that come under your observation? No. I am talking of what I heard from Dr. Day and others on the station.
2442. *Dr. MacLaurin.*] You mean that there was plenty of time to have removed the coffins and put them out of sight? Yes; the statement in the Press was entirely untrue. Of course I have no personal knowledge of matters connected with the enclosure, but I only give that as an example of the exaggerations.
2443. *President.*] How were you in the habit of obtaining the things you required for the people there? By sending the Superintendent of Stores round, or going round myself and ascertaining if anything was wanting; for instance, a woman might require a chemise, or a pair of stockings, or shoes, and then sending a requisition to Dr. Alleyne, who sent them up with all the despatch possible.
2444. Was there any delay in sending these things up? No, not an unreasonable delay; of course the weather and other things had to be taken into consideration; there might be a little delay from some unforeseen circumstance occasionally. So far with regard to clothing; then with regard to food, our rations are sent down every morning by Kidman in the ration boat.
2445. *Dr. MacLaurin.*] When you took charge did it seem to you that the provisions then supplied were abundant in quantity? Yes.
2446. Did they seem to be of good quality? Yes.
2447. *President.*] In your opinion were they distributed fairly among the people—the meat and other articles of food—since you have been there? Certainly. I believe there has been an ample supply of the necessities of life; of course a man might ask for pickles, or chutney, or things of that kind which would not be in the store; in fact they were continually asking for little things, some of which were not in stock.
2448. *Capt. Hixson.*] Then you formed the opinion when you went there that things were not so bad as they had been represented to be in the Press? Yes.
2449. *President.*] Did you find it necessary on your arrival to make any further regulations for the distribution of rations to the people in the enclosure? I did, not with a view to their more impartial distribution, but to obtain a more accurate record of what had been distributed; for instance, before that a bottle of brandy might be given between four or five patients, but now we measure it out, 2 ozs. of brandy for each patient, and this is entered in the issue book by the Superintendent of Stores, and checked and initialled by me each week.
2450. From what you saw of the distributions of provisions at the time you went down there, did you form the opinion that the people had been treated unfairly in the distribution of these articles? No, but I gave little credence to the representations of some of the people there.
2451. A large number of the buildings were occupied at the time you went down I suppose? Yes.
2452. And in some instances different families were occupying the same building, were they not? Yes, but of course in different rooms.
2453. Do you consider that a proper separation of these rooms was made for the purposes of decency and isolation? I do; there could be no reasonable complaint made of the arrangements in the cabin enclosure, and during my residence there I do not believe there were different families occupying the same building in the other portion of the healthy ground.
2454. Have you noticed any intemperance since you have been there? No, I have not myself seen anybody drunk, nor has the Sergeant of Police reported a case of that kind to me. I do not think anybody has been drunk from drink obtained from the store since I have been there, and I made very minute inquiries.
2455. Then you think if there had been any intemperance it would have come under your knowledge? Yes, either to my knowledge or that of the Sergeant of Police, Mr. Logan.
2456. *Dr. Jones.*] Was Mr. Carroll suspended prior to your going down to the Quarantine Station? I believe so.
2457. *President.*] Then he was not performing any official duties when you went down there? I saw him in the store for some time after I went down there.
2458. *Dr. Jones.*] But he was not acting officially then? He was suspended I believe, but I have always found him ready to supply any information that I asked for to the best of his power up to the present time.
2459. *Capt. Hixson.*] From what you saw of him, did he appear to take an interest in what he was doing? He appeared to take a very lively interest in it, but he acted upon some old-fashioned notion of placing an undue value upon the articles under his care.
2460. *President.*] Had you any previous knowledge of Mr. Carroll and the performance of his duties at the Quarantine Station? Yes; in 1878 I had a number of immigrants there under Mr. Carroll's care, and I saw how he treated them.

- Dr. J. Beattie. 2461. And what was the nature of his treatment? I thought it was very fair.
- 3 Nov., 1881. 2462. Can you tell us the circumstances under which your connection with the Quarantine Station commenced on this occasion? Yes. In answer to an advertisement which I saw in the papers I applied for the appointment of Medical Superintendent, and received it from the Government.
2463. You have had an opportunity of seeing the burial-ground at the Quarantine Station? Yes, every day.
2464. Have you seen any of the graves opened in the burial-ground? Not in the old burial-ground.
2465. You have in the new? Yes.
2466. To what depth were all the graves dug? To a depth of 10 feet in each case.
2467. Is there any rule as to the depth? Yes, and there is a policeman to measure it.
2468. Then it is one of the regulations that the graves should be 10 feet deep? Yes. I may mention that when the coffin is lowered into the grave chloride of lime and slack lime are used.
2469. The practice of burying in the old burial-ground has been discontinued, has it not? Yes. I may state for the information of the Commission that the number of burials since the present epidemic occurred, from 16 June to 27 September, has been seventeen; of these fourteen were in the old burial-ground and three in the new; I attended these three burials myself. Five of the persons died in Sydney, six died in the "Faraway," and six in the hospital enclosure. In the case of nine of them it was not ascertained whether they had been vaccinated or not, seven had never been vaccinated, and one, a child, Maud Hughes, was vaccinated on the ground a few days before her death.
2470. Did you ever notice any offensive smell from the old burial-ground, or anything objectionable in connection with it? Nothing whatever.
2471. At the funerals that have taken place since you have been there, has any funeral service been read? Yes, in all cases.
2472. By whom? By myself.
2473. When you went down to take charge of the Quarantine Station, did you receive a copy of the printed regulations for your guidance? Yes. I was told verbally by Dr. Alleyne how the place should be conducted, what I was to do as Medical Superintendent, and how I was to act generally. I received printed instructions afterwards, but in the beginning Dr. Alleyne told me that in an emergency of this kind he depended more upon the discretion of the officer in charge than upon the printed regulations.
2474. Do you know the date of those printed regulations;—were they of recent date? I received a recently published copy of an Act relating to the Quarantine laws, and also an old pamphlet from Dr. Alleyne's clerk. (*See Appendix.*)
2475. Are there any other copies of that pamphlet in existence at the Quarantine Station? I saw one with Carroll at the Station, and I saw one at Dr. Alleyne's house in Fort-street. He gave me half-a-dozen copies of the recently published Act of Parliament, and Logan and the other officers I believe have each one.
2476. What classification is made of the patients on the ground? The classification of the persons on the ground since I have been there, and I believe always, has been into healthy, convalescent, and those actually suffering from infectious disease.
2477. What arrangements are made for the separation of these people into classes? Those regarded as sick from infectious diseases are placed in the hospital enclosure under medical care, or in the hospital ship "Faraway," the males in the ship and the females and children in the enclosure, by which means in both cases perfect isolation is obtained. Then with regard to the convalescents, they are placed in the healthy ground or in the cabin enclosure, apart from those who have never been ill but who may be suspected, who are presumed healthy but are under observation.
2478. Since your time has the separation of these people been properly observed? Yes.
2479. Has there been any breaking of bounds to any extent? No, not to any considerable extent.

George Henry Livesey sworn and examined:—

- G. H. Livesey. 2480. *President.*] Under what circumstances did you first go down to the Quarantine Station? To remove Mr. Rout's body from Bellevue-street.
- 3 Nov., 1881. 2481. Did you accompany it to the Quarantine Ground? All I had to do was to take it to the pier.
2482. When did you first go to reside at the Quarantine Station? On the night of the 16th June.
2483. And how were you employed there? I was not employed there—I was engaged by Mr. Shying; I undertook to take Mr. Rout's body down to the ground; I did not undertake to bury it, but I had to do it at 1 o'clock in the morning.
2484. Had you any assistance? Yes, I had one man.
2485. And you two dug the grave? Yes.
2486. How deep did you dig it? About 3 feet 6 inches—as far as we could get with an old spade; we had no pick.
2487. From whom did you receive your instructions? From Mr. Shying, and afterwards, at about half-past 11 o'clock at night, from Mr. Carroll. I told Mr. Carroll I had nothing to do with burying the body, and that Mr. Shying told me there would be a grave already dug.
2488. Did Mr. Carroll come out and superintend the burial? No; Constable Maloney went up.
2489. Did any one else go near the grave while the burial was taking place? No. There was only me and my mate who came down with me from Mr. Shying.
2490. Were you supplied with stimulants? No.
2491. Did you not have anything to drink? No, sir.
2492. Did you take any down with you? I took nine-penny-worth of rum with me.
2493. At what time did you finish the burial? About 4 o'clock in the morning.
2494. Did you go down in the boat which contained Rout's body, or did you go down in the "Pinafore"? I sat on the coffin in the boat; there was no other place to sit.
2495. There was only one other man in the boat with you? There were two.
2496. Were they both sober at the time you went down? Yes, both of them.
2497. And were you sober? Well, I was not quite. Mr. Shying made a fool of me. I had to go up a garret to get Mr. Rout's body down, and he promised to give me two bottles of brandy to take with me; and when I got to Woolloomooloo Bay, and got the coffin into the long boat, and got out again and disinfected

G. H. Livsey.  
3 Nov., 1881.

disinfected the cart in which the corpse came in, he brought me an empty brandy bottle and placed it on a log of wood. I took it up and asked him if that was what he promised to give me, and he said "It is full of brandy," and I threw it at him in the middle of the road. Then one of his partners, I think it was, went and brought me one, and I remained in the long boat till the steamer sailed.

2498. *Dr. MacLaurin.*] Then you had a bottle of brandy besides the ninepenny-worth of rum which you had before? Yes.

2499. *President.*] After that you remained at the Quarantine Station? Yes, that was on the Thursday night, and on Friday I remained at the Quarantine Station; and then on Saturday Dr. Alleyne asked me if I would go into the enclosure and attend upon Dr. Clune, and he promised me 12s. 6d. per week or something handsome if I would go.

2500. And how long did you remain there? Till the 9th September. On the 29th June I received Mrs Hughes and her infant into the enclosure.

2501. Had you any other duty to perform besides your attendance upon Dr. Clune? There was no other attendant but me. I had to draw the rations, carry wood and water, and attend upon the two nurses there. I did that to pass my time.

2502. Was there not another man named Cornelius there? Yes, but he did not come till five weeks after.

2503. Did you receive any instructions from Dr. Clune to remove the coffins that were left in the enclosure near the gate? Yes, sir.

2504. And did you remove them at once? I removed them as soon as I could get time to do it. When the patients were in the ward in the middle of the day I could not move them without their seeing them; I had to move them at night.

2505. How long were they left near the gate? Well, the first dozen were left about eight hours.

2506. Was there another lot left a longer time than that? Yes, there were two dozen that were left there about three days; there was no place to put them until we put up a tent for them; at least we did not put up the tent—it was the tent Mr. Guildford stopped in when he came out of the hospital.

2507. Then the only reason why they were left exposed was because you had no place to put them in? Yes, the dead-house was full of them.

2508. And was not it possible to have had another tent put up for them? We did not put up a tent for them—we put them in Mr. Guildford's tent the day he came out of it.

2509. *Captain Hixson.*] Could not you have covered them over? We had nothing to cover them with; even at the funerals we had no rope to lower the coffins with.

2510. *President.*] Did Dr. Clune request you to have these coffins removed? Yes, as soon as possible, and so did Dr. Day.

2511. Your principal duty then was to attend upon Dr. Clune? Yes.

2512. Was Dr. Clune out of health when he was there? Yes, after five weeks, when Mrs. Fisher came, his health failed him very fast; I could not get him to do anything.

2513. But up to that time was he attentive to his patients? Very attentive, but after that the nurses did not want him to go near the patients; they said they only wanted instructions from him.

2514. But before that time he used to attend them? Yes, he went to the doors and windows to see the patients.

2515. Did not he go inside? He did about four or five times; I had to beg and pray him to go inside.

2516. Had he a disinclination to go inside? Yes, he was failing in his head; every day he got worse.

2517. *Dr. MacLaurin.*] Was he getting thinner? He was getting thinner, so that he could not do anything.

2518. *President.*] Did he give you as his reason for not going inside to see the patients that he was afraid of getting small-pox himself? He was telling me day and night that he wanted to get away; he used to wake me up in the middle of the night and asked me to take a telegram to Mr. Carroll.

2519. But did he assign as a reason for not going inside to see the patients that he was afraid of getting small-pox? Well, I believe he was afraid.

2520. But did he tell you he was afraid? No, he never told me.

2521. Did Dr. Clune appear to be greatly excited at this time? Yes, about the latter end of July he began to get excited. I could not get him to do anything. I removed him out of the house into a tent; I thought that would be better for him; he was failing in his head.

2522. What allowance of wines, spirits, and beer did you receive every day? We got about eight or ten bottles altogether—one bottle of brandy, three of port wine, and about four of porter or ale, according to the number of the patients.

2523. Did you receive a liberal supply for your own use and the use of Dr. Clune? No, sir.

2524. Did you draw the supply for yourself? No, it was drawn for the enclosure.

2525. But did you receive it from the store? Yes, from Mr. Carroll; some days nothing, and others so many bottles; it was under my charge, and I gave it out under Dr. Clune's instructions.

2526. Did Dr. Clune make use of it himself to any extent? No, sir.

2527. From your observation of Dr. Clune, do you consider that he was always quite temperate during the time he was in the enclosure? He was, sir; I never knew Dr. Clune to taste a drop during the whole twelve or thirteen weeks he was in the enclosure. A gentleman sent him a dozen of different sorts of wines and spirits from Sydney, and they were left when we came away.

2528. *Captain Hixson.*] Is Dr. Clune a teetotaler? I could not tell you.

2529. Did the nurses work amicably with Dr. Clune? They did for about five weeks, and then they turned against him; they used to throw stones on to the verandah next his room.

2530. *President.*] How do you know that? Because I slept in the same room, and I chastised them for it.

2531. You mean that you reprimanded them? Yes, I told them if they wanted to see him to come to the door.

2532. *Captain Hixson.*] Then they threw stones on to the verandah because they wanted him? Yes. There is a verandah round the cottage, and they kept throwing stones on to it; I suppose they wanted the doctor and they would not come to the door; they would not speak to me for many a week after that.

2533. Why would not they speak to you? I cannot tell you any reason.

2534. *President.*] Did they appear to get on well with Dr. Clune for the first five weeks? Yes, for the first three weeks he used to go and get his meals with them.

2535. Do you know why that was discontinued? I do not, sir.

G. H. Livesey. 2536. *Captain Hixson.*] You say you had charge of the stimulants supplied for the enclosure;—how were they distributed? Mrs. Guildford used to have a bottle of port wine in the morning and a bottle at night; if the nurses wanted any for the patients they used to get it, a bottle in the morning and one at night; and if we had a death I used to take about half a bottle of brandy in my pocket for the grave-diggers.

2537. Did you ever see anybody drunk there? I did not.

2538. Not the whole time you were there? Not the whole time I was there.

2539. Have you any complaints to make of your treatment there? Yes, about being kept without trousers. The trousers given to me by Mr. Carroll were too small for me and I gave them to Cornelius, as Mr. Carroll would not take them back because they had been in the enclosure, and he kept me for a fortnight with an aboriginal blanket wrapped round me, and without a coat; and every time I went out to bury any one that died I jumped into the sea, and had no clothes to put on when I came out, because I had to burn what I had been wearing. Dr. Clune and Dr. Day insisted upon this, and refused to allow me to go near them until I had fresh clothing.

2540. *President.*] What clothes did you take down with you? I took three suits; the first suit which I wore when I took down Mr. Rout's body I burned at a quarter to 4 in the morning, after the burial was over.

2541. *Dr. Manning.*] Then after every burial you burned a suit of clothes? Yes.

2542. *Captain Hixson.*] Did you know of any order to take your clothes off after every burial and hang them up on a tree, in order that they might be used again? No, sir; they would not allow us to take them into the enclosure, but made us burn them at once.

2543. *President.*] Had you ever the digging of other graves besides Rout's? Yes.

2544. To what depth were they dug? They average from 12 feet to 6 feet; there were some as deep as 12 feet.

2545. Were any of them less than 6 feet? Nothing less, except Harris' and Rout's.

2546. Why were they not dug to the same depth? Because we had not the implements; we could not get down through the rock without a pick.

TUESDAY, 8 NOVEMBER, 1881.

Present:—

DR. JONES,  
DR. MACLAURIN,

DR. MANNING,  
CAPT. HIXSON,

MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Miss Mary Meyler, Nurse at the Quarantine Station, sworn and examined:—

Nurse Meyler. 2547. *President.*] You went to the Quarantine Station I think on the 18th June last? Yes.

8 Nov., 1881. 2548. How long after that was it before you took charge of the infected portion of the ground? I took charge when I went in.

2549. Was it not three or four days after your arrival that you took charge? Yes, before I went into the ward—it was more than three or four days, it was seven days; I went on the Saturday, and I went into the ward that day week; it was seven days.

2550. Why was it that you did not take charge at once? Dr. Clune advised me to remain out of the ward as the vaccine had not taken; I was vaccinated the morning I arrived; I wished to go in, but I was advised by the doctor not to do so as he said it was rather risky; but although I did not go into the ward I considered that I had charge of Mrs. Guildford, and attended to her wants by sending in what she required.

2551. How long did you remain on the ground altogether? I was in the enclosure not quite eighteen weeks—within a day or two of eighteen weeks.

2552. And during that time you had charge of the whole of the patients that were put into that ground? Yes.

2553. Did you find the place well provided with stores and provisions when you first went down there? Yes; not quite so well as I would have wished it to be; I took a great many things down with me, linen and stores, and Mr. Carroll supplied me afterwards; what he had not on the ground he sent to Sydney for.

2554. Had you any difficulty in getting the articles you required? No, none at all.

2555. How did you obtain the things that were necessary for the patients? I asked Mr. Carroll for them.

2556. And were they all supplied to you promptly? Oh yes.

2557. Did you make the requisitions to Mr. Carroll personally? Yes.

2558. How was it you did not make them to the doctor? Well there were some things that it was necessary that I should ask for; medicine and clothes and things of that kind were in the doctor's province.

2559. And what was the nature of the things that you considered it was in your province to apply for? Cooking utensils, crockery, linen, and things of that kind.

2560. Then for such things as medicine and clothing you considered it was only necessary to ask the doctor to make application for them? Yes, and wines and spirits.

2561. How was the food supplied to you? It was sent up every morning.

2562. On whose requisition? I gave the order for it; of course there was another nurse.

2563. Then it was supplied on the application of nurse Hollis and yourself? Yes, we took day and night duty by turns, a fortnight each, and whoever had the day duty gave the order for such provisions as were necessary.

2564. What was the quality of the provisions supplied to you;—was it generally good? Yes, very good.

2565. Did you ever hear any complaints among the patients about the provisions? On one or two occasions they complained of the bread not being very good, but there was an improvement in that shortly afterwards.

2566. In your opinion were the complaints of the bread at that time reasonable? Yes, they were. Nurse Maylor.
2567. I suppose there was no stint whatever in the supply? Oh, no.
2568. Had you all the proper appliances for nursing the sick? Oh, yes; if I asked Mr. Carroll for any things that were not in the store he sent to Sydney for them. 8 Nov., 1881.
2569. Were the bedsteads and beds and bedding of good quality? Yes.
2570. Were the houses for the patients watertight and of good construction? Yes; very good.
2571. And were the conveniences for cooking all that were required? Yes.
2572. Had you a good supply of medical comforts for the patients? Yes.
2573. Such as sago, arrowroot, beef-tea, and so on? Yes.
2574. Were these articles supplied on the ground, or were they sent down from Sydney? When the supply I took down was used up we got the things from Mr. Carroll.
2575. Were there any complaints from Mrs. Guildford about the quality of the sheets supplied to her? Yes; on one occasion she had some very poor sheets; they were coarse like canvass, and I made application for some finer ones.
2576. *Captain Hixson.*] How long were the coarse sheets in use? Only about a day, I think.
2577. Where were the coarse sheets obtained? I do not know; I got them from Mr. Carroll.
2578. Were the patients crowded in the hospital building at any time during your stay there? Oh, no; the hospital was not crowded.
2579. Never at any time? Never; when the patients were very sick they slept in the hospital, but when they became convalescent they were placed in tents by Dr. Clune's orders. I said I wished them to be placed in the larger or male hospital occupied by Dr. Clune, but he objected, and ordered them to be placed in tents.
2580. What was the largest number in the hospital at one time, do you remember? The hospital was partitioned into two rooms or wards; there may have been three bad cases in at one time—I mean three bad cases in each room; I don't think there were more than six at the most.
2581. Did you think there was sufficient space for sick people in the building? Yes, I did.
2582. *Dr. Jones.*] Had they as much space as they would have in a general hospital? Yes; a great deal more.
2583. *President.*] Were you in the habit of taking telegrams from the patients to be sent to their friends in Sydney at any time? I have done so.
2584. To whom did you give them? Sometimes the operator and sometimes a policeman came for them.
2585. And do you know whether those telegrams were sent? I think so, because they had answers to them.
2586. How did they receive the answers—by letter? Yes, their friends wrote to them.
2587. Did you ever hear that telegrams taken in that way from the patients were not sent? No.
2588. Do you know anything about coffins lying about the ground inside the hospital enclosure? Yes; they were left inside, but they were put into the house as soon as possible.
2589. How long do you think they were left there exposed to view? Some days, I think.
2590. Do you know why they were not put under cover and out of sight at once? I think the man who was supposed to carry them up was too lazy.
2591. Whose duty was it to carry them up? George Livesey's; he was sent in to wait upon Dr. Clune and make himself useful.
2592. Had you any other male attendant in the enclosure who could have done it? Not at that time; we had afterwards.
2593. But at that time there was no body else? No.
2594. Were these coffins in sight of the patients as they were being conveyed into the enclosure? Yes, they were not far from the gate, a little under the shadow of some rocks.
2595. Were any complaints made to you of their being exposed in that way? I never heard any one complain.
2596. Whose duty do you consider it was to order them to be put out of sight? Dr. Clune's.
2597. What quantity of wines and spirits were issued to you while you were in the enclosure? When we wanted wines and spirits we asked the doctor for them; there would be about a bottle of wine required every twenty-four hours and a bottle of brandy perhaps every third or fourth day.
2598. You are speaking of the wines and spirits issued to the patients? Yes.
2599. Do you know what quantity was sent to the enclosure altogether? No; I used to see great quantities carried up.
2600. Where did you obtain your own supply? From the doctor.
2601. *Dr. Manning.*] Did you receive any definite instructions from the doctor as to the quantity to be used for the patients? No, Dr. Clune did not give any instructions.
2602. Then was the quantity of wine or spirits to be given to each patient left entirely to your discretion? Yes.
2603. Did Dr. Clune order wine or spirits for each patient, or was that left to your own discretion? Yes.
2604. Then you exercised your own discretion as to the necessity of giving wine or spirits to the patients and as to the quantity to be given, and Dr. Clune exercised no control over it? Yes.
2605. Did you ever see anyone on the ground under the influence of liquor? I have seen Dr. Clune.
2606. On more than one occasion? Yes.
2607. Can you give us any reason for supposing that he was under the influence of drink? We have gone to him on one or two occasions to ask for wine and he had to hold on to the verandah-post and looked very stupid.
2608. *Captain Hixson.*] Did you ever see him drunk? I have on several occasions.
2609. Did not he mess with you at one time? Yes.
2610. Did he drink then? He used to take ale or porter.
2611. You have seen him take that? Yes.
2612. How long did you mess together? A week.
2613. Why was that arrangement broken up? The other nurse came and we had to take night and day duty and we wanted the cottage for her.
2614. *President.*] What terms were you on with Dr. Clune? Well, I considered that Dr. Clune neglected the patients and I told him so on several occasions; I had a great difficulty in getting the patients conveyed into the ward from the gate.

- Nurse Meyler- 2615. Were you aware that Dr. Clune's health was very much broken at that time? No sir, I was not.  
 2616. Did he appear to you to be suffering from illness? Not at all.  
 8 Nov., 1881. 2617. Did he at any subsequent period during his stay? No.  
 2618. Do you think he was suffering from mental excitement from being detained in the enclosure? Yes, he complained very much of being kept in the enclosure.  
 2619. *Capt. Hixson.*] Did he ever complain of ill health during that time? Not to me.  
 2620. *President.*] Did his health appear to be failing? Not at all.  
 2621. *Dr. Manning.*] You were in the habit of telegraphing to Miss Osborn, were you not? Yes.  
 2622. Did you mention to Miss Osborn in any of your telegrams that Dr. Clune was under the influence of drink? No.  
 2623. Did you complain in those telegrams that Dr. Clune did not take sufficient care of the patients? Yes.  
 2624. Why did you not also mention that he was under the influence of liquor? I did not like to do so.  
 2625. Had you any inquiries from Miss Osborn on this subject? No.  
 2626. *President.*] Did it occur to you that his indulgence in spirits incapacitated him from attending to the patients? I think so.  
 2627. *Dr. MacLaurin.*] How often did Dr. Clune visit the patients? Sometimes he came to the window.  
 2628. Did he go to the window daily? No, sometimes not for two or three days.  
 2629. How often did he go into the ward? Never to my knowledge.  
 2630. Did he ever make any examination of the patients? Not to my knowledge.  
 2631. Did you report to him the state of the patients every day? Yes.  
 2632. How often—once or twice a day? According as it was necessary; if I saw any change I told him.  
 2633. *President.*] Did you ever apply to the doctor to go into the ward to see the patients? Oh yes, I did on several occasions.  
 2634. And what did he say? That he did not feel well, or that he did not like to go in on an empty stomach.  
 2635. You have had a great deal of experience in seeing doctors attend upon patients, have you not? Yes.  
 2636. Can you give us any reason that occurred to your mind why Dr. Clune objected to go into these wards? I dare say he was frightened of the small-pox—that is the only reason that occurs to me.  
 2637. Did that occur to you at the time? Yes, I thought so.  
 2638. Did the patients ever wish to see the doctor? Yes, and wondered why he did not come in to see them.  
 2639. And did you let the doctor know it? Yes.  
 2640. What did he say to that? He said he could not do anything more for them if he did go in, everything was being done that could be done.  
 2641. Was it not of pressing importance during the illness of some of them, especially some of those who died, that he should go in and see them? Yes, I thought so, and I asked him to go in.  
 2642. *Dr. MacLaurin.*] How often did you see Dr. Clune make a personal examination of any patient there? I do not recollect seeing Dr. Clune make a personal examination of any patient; he used to come to the window.  
 2643. And as you were on duty half the time if he had gone to a patient's bedside you must have seen him? Yes.  
 2644. *Capt. Hixson.*] In your opinion he appears to have failed altogether in his duty as medical man in charge.  
 2645. *President.*] Did he ever complain to you of being detained in the hospital enclosure? Yes.  
 2646. And did he ever complain of being in want of the necessaries of life? No; his complaint was about his being kept in the enclosure like a prisoner. On one occasion he said to me that his expenses in Sydney were £60 a month, and that if the Government gave him £100 a month he would consider himself paid.  
 2647. Did you ever hear of his complaining to anyone about cooking utensils? He could not, because the girl, Louisa Wilson, cooked and washed for him all the time he was down there.  
 2648. Were you in the habit of taking the temperature of the patients? Yes.  
 2649. Did you make any report of that to Dr. Clune? Yes.  
 2650. *Dr. Jones.*] Did you make a daily report to Dr. Clune of the temperature, pulse, and general condition of the patients? Yes, of the temperature and state of the patients, but not of the pulse.  
 2651. And Dr. Clune then gave you directions as to the treatment to be carried out? Yes; he told me the dressings to put on, and prescribed the medicines.  
 2652. Is it not a fact that Dr. Clune was in a state of great mental excitement from anxiety? Yes.  
 2653. And may you not have mistaken that for inebriety? I may.  
 2654. *Capt. Hixson.*] How did he appear to spend his time? Sitting and lying about.  
 2655. And reading? Yes, sometimes.  
 2656. You say you saw great quantities of spirits carried into the enclosure;—have you any idea how they were used or by whom? No, I have not; there were a great many people there at one time.  
 2657. What has been the greatest number at any time;—do you know? There have been over thirty.  
 2658. Did you ever hear any persons inside the enclosure complain that they could not get stimulants? No.  
 2659. *President.*] Do you recollect anything about Dr. Clune complaining that you were interfering with his duties and usurping an authority to which you had no right over the patients and the hospital enclosure generally? No.  
 2660. Was that ever said to you? No.  
 2661. Were you always respectful in your manner to Dr. Clune? Yes, always. Sometimes, when he failed to attend to the patients, I was very cross to him, and I used to say it was a great shame that patients should be left down by the gate for nearly an hour.  
 2662. Did you ever speak disrespectfully to him? No, but I may have spoken sharply to him when he neglected his duty. I said I was sure Dr. Alleyne did not know how he neglected his duty, and that if he had a spark of manliness in him he should have helped to carry the patients up to the ward himself, instead of leaving them by the gate exposed to the sun and rain.  
 2663. *Dr. MacLaurin.*] Were they left for an hour by the gate exposed to the sun or rain? Yes, Mrs. Fisher and baby Fisher were, and on one occasion a girl named Hodgkinson came, and there was some difficulty in getting her up from the gate, and instead of taking her into the ward they left her on the verandah, and it was rather a damp morning.  
 2664. *President.*] If Dr. Clune had stated that you were grossly insolent to him, would that be correct? Not at all.

2665. Did you ever make use of the words—" You had put down many doctors before, and you would take care he should not be master, and that you had not come down there to be under him at all"? No. On one occasion he was speaking of Dr. Caffyn, who he said ought to have been in the enclosure instead of him, and remarked that Dr. Caffyn would have given his orders to the nurses and kept away from the patients himself. I told him that whatever doctor was in the enclosure I should see that he did his duty, and that I was not afraid of any doctor. Nurse Meyler.  
8 Nov., 1881.
2666. Were you frequently in communication with Mr. Carroll and down at the fence talking to him? Whenever I wanted him; sometimes I would not see him for three or four days, on some occasions for a week or ten days.
2667. But were you in the habit of going down to the fence and talking with Mr. Carroll more frequently than was necessary? I never went unless I wanted something.
2668. *Dr. MacLaurin.*] Would it be correct to say that you were always at the fence talking to Mr. Carroll? Not at all, sir.
2669. *President.*] On how many occasions did you consider it necessary to speak to Dr. Clune about neglecting his duties, and threaten to report him to Dr. Alleyne? It was only on one occasion that I threatened to report him to Dr. Alleyne, but I spoke to him about the neglect of his duty on several occasions.
2670. *Capt. Hixson.*] And I suppose when you did speak it was in the interest of your patients, and you thought they wanted looking after? Yes.
2671. *President.*] Did you ever ask distinctly to have the convalescing patients put into the building occupied by Dr. Clune? Yes; to allow them to sleep there and to have a dining-room made for them.
2672. *Capt. Hixson.*] Would they have been more comfortable there than in the tents? Yes; the tents are very uncomfortable, especially in stormy weather.
2673. *President.*] What reply did he make to your suggestion? He said he would have no place to go into himself.
2674. Who dispensed the medicines? Dr. Clune.
2675. *Dr. Manning.*] With reference to the two or three occasions on which you considered Dr. Clune to be intoxicated, did they occur within a few days or at long intervals? Not at long intervals.
2676. Were they during the earlier part of his stay at the Quarantine ground or towards the end of it? During the whole of his stay. I have thought on several occasions that he was under the influence of drink from his manner and appearance.
2677. *Capt. Hixson.*] Did you ever speak to any one about it? Only to the other nurse. Mr. Carroll asked me if I thought he drank, and I said I was sure he did.
2678. *President.*] Do you remember the occasion of which you spoke—about his holding on to the verandah-post? Yes.
2679. What time of the day was that? In the afternoon, I think.
2680. At that time Did Dr. Clune's health appear to you to be such as to render him weak? No, not at all; he could eat heartily, and if his health had been so bad he would not have been able to eat so much.
2681. *Dr. Jones.*] Did you know Dr. Clune by sight before he went down to the Quarantine Station? I fancied I had seen him at the Infirmary on one or two occasions.
2682. *President.*] Have you ever noticed any smell of spirits about him? No; I did not go sufficiently near him. He liked me to keep at a safe distance from him; he was afraid of infection.
2683. *Dr. Manning.*] When you wanted him at night were you in the habit of throwing stones to call him? Yes, I have done so.
2684. Why was that? Because I thought he did not like our coming near the house.
2685. Did he ever give you instructions not to come on to the verandah if you wanted him? No, he never did.
2686. Then you only suppose that he had that objection? Well, he always kept such a distance from me himself.
2687. *Dr. MacLaurin.*] He kept to windward of you, I suppose? Yes.
2688. You threw stones, I suppose, only when you wanted to see him on business connected with the hospital? Yes; once or twice at night.
2689. *President.*] What sort of a character did the doctor's attendant, George Livesey, bear? A bad character indeed.
2690. Was he ever under the influence of liquor? Well, I could not say that I have seen him tipsy.
2691. How was his conduct bad then? When he spoke to me on two or three occasions he was very rude, and he came once close to the hospital where he could see in, at a time when the female patients were getting in and out of bed; I asked him to go away, and he was very rude.
2692. Was it possible for any one outside to see into the ward? Yes; he could see very plainly from where he was.
2693. Then you consider that he was improperly in that portion of the ground? Yes.
2694. *Capt. Hixson.*] Did he ever make use of bad language? Yes.
2695. Did you hear him? Yes; I asked him on one or two occasions not to make such a noise.
2696. Do you believe the patients under your care were reasonably well attended to, as well as could be expected under the circumstances? Yes.
2697. *President.*] And did you always find Mr. Carroll attentive in supplying what they required? Yes, most attentive.
2698. *Dr. MacLaurin.*] Was there, at any time, any difficulty in getting the things you required? I have had to wait a couple of days while things were being sent from Sydney, when we first went down; there were a great many things we had to send for.
2699. Did Mr. Carroll afford you all reasonable assistance in carrying out your duties? Yes, always.
2700. *Dr. Jones.*] Do you consider that any of the patients suffered from Dr. Clune's so-called inattention? I do not know whether they suffered, but if medical skill could have done them any good they certainly did not get it.
2701. *President.*] Did you ever notice Mr. Carroll uncivil or rude to any one in the enclosure? No, never.
2702. Did you receive books and newspapers for the amusement of the convalescent patients, and the people in the infected enclosure? Yes.

- Nurse Meyler. 2703. And were you in the habit of reading the articles in the papers reflecting upon the management of the Quarantine Station? Yes.
- 8 Nov., 1881. 2704. Were you of opinion that those remarks were justifiable or not? Not at all; most unjustifiable.
2705. *Capt. Hixson.*] In what way? They were untruthful.
2706. Untruthful or exaggerated? Both.

Michael Joseph Clune, Esq., M.R.C.S., further examined:—

- Dr. Clune. 2707. *President.*] We understand that you are desirous of adding something to your previous evidence? Yes; I have here a copy of the telegrams I referred to. The first is one which I sent to Dr. Alleyne; it is in the handwriting of my attendant Cornelius:—
- 8 Nov., 1881.

I AM not able to see any more patients; my health is completely broken down; I feel quite exhausted.

The next was to Mr. Buckland as follows:—

SATURDAY.—Kindly telegraph to my father-in-law, and say I am well, but badly treated.

And the third was either to Mr. Garvan or Mr. Day, I forget which:—

SATURDAY.—I am quite well; still treated as criminal.

2708. *Dr. MacLaurin.*] Were they all three sent? No, they never arrived in that form at all. The second telegram was received in the following form:—

KINDLY telegraph to my father-in-law saying I am well.

I produce that telegram (*producing telegram as above*). Mr. Buckland kept it for me.

2709. Did you sanction that alteration? No, the telegrams were taken down by Cornelius. I was very unwell, and unable to write at the time.

2710. *President.*] Is there anything else you wish to state? I should like to satisfy the Commission as to my treatment if you will put a series of questions to me. I broke down after the second week, and was thoroughly unfit, and quite exhausted.

2711. With reference to the books you alluded to in your last examination as having been destroyed, have they been restored to you? No; this book from which I am quoting was one that was kept partly by myself, and partly by Cornelius, my servant, which I found was not destroyed with my other effects at the Quarantine Station; there was also another note-book, containing slips of telegrams, which I cannot find. With reference to my answer to question 1643—"Did you at any time consent to take charge of the people within that enclosure?" I wish to add that Dr. Caffyn called upon me one day, and said that Sir Henry Parkes demanded from him the daily bulletin as to the condition of the patients. He was in the habit of sending a report of the patients to the papers, in which my name was omitted, and I felt that as the burden of the work was put upon me I should like to let my friends know where I was, as the inference which would be drawn from the reports was that Dr. Caffyn was in the hospital enclosure instead of myself, and that I was in the healthy ground.

2712. Referring to these books that were destroyed did you ever make an offer to Mr. Carroll of a sum of money to preserve them from being destroyed? No, I have not the slightest recollection of such a thing, and I believe the books are there still. Carroll said to me when I was coming away: "I have treated you very indulgently, and I hope when you go back to Sydney you won't speak badly of me. You go and see Dr. Alleyne, and he will probably give you your books."

2713. Can you tell us on what occasions particularly Nurse Meyler was disrespectful to you? I think the first time was on the 6th July.

2714. Can you give us an instance of the language she used which you considered disrespectful? On the afternoon of the 10th July I asked Miss Hodgkinson if she had dined, and she said yes she had dined at 3 o'clock, which they considered late. I immediately went to the cook and asked her if she could not give the convalescent patients their dinner earlier. Immediately after that the nurse came up and told me I had nothing to do with the patients' food, and that I was a mean selfish fellow. I may say that I always looked upon her as being under the influence of Carroll, and whenever she left Carroll, after talking to him at the fence, I always expected her to return an answer not only displeasing but painful to me. One time when I spoke to her she said, "You ought to have an operation performed; your brain is too big for your skull." Those were the exact words she used. If I spoke to her and asked her if I could do anything for her she would turn round and say I was not a gentleman. On one occasion I went to the fence and saw her and Carroll in conversation, Mrs. Bonnor, Mrs. Kelly, and Mrs. Hughes, I think being present. I requested Carroll to give the kitchen for the use of the patients as they complained that they were exposed to the night air and to the sun during the day whilst cooking; and I happened to say in the course of my remarks, "these ladies," referring to Mrs. Bonnor, Mrs. Kelly, and Mrs. Hughes, whereupon Nurse Meyler turned round upon me and said in the most insolent way and with a grimace that after that I should not call her "lady," and that if I called her a lady she would consider herself insulted. She said some very hard words then and I appealed to Carroll; Carroll said nothing at the time, but the following day he told me to be careful of the nurse for she was "a regular nipper," and that I was "a softie, or too soft, as I allowed the nurse to have her own way at the outset"; those were his own words. He also said that a man in my position ought to take stimulants. I asked him to telegraph to Dr. Alleyne about her conduct towards me and he said he would. On one occasion I sent her a message after dark. I was walking with my attendant up and down the interior of the pavilion when the nurse burst open the door and asked me what I meant by sending orders by my attendant. She never came and delivered a message to me personally, she would always throw stones; my verandah was full of stones on one side; there were twenty or thirty stones lying on the verandah.

2715. *Dr. MacLaurin.*] You could have managed to get some one to sweep them off, could you not? I was too ill to do anything; they could have kicked me about as they liked.

2716. *President.*] Is it not a fact that about this time Nurse Meyler complained that you did not pay so much attention to the patients as they required? She never said that to me personally; she may have said it to others; she knew the struggles I made for what little I did. Nurse Hollis was extremely kind to me all through my illness. She said, "All we want you to do is to go to the window and tell us what to do," and I was not able to do much more.

2717. Do you remember patients lying at the gate for any length of time before being taken into the enclosure? Yes; Carroll did not send a man to take them up.

2718. Can you tell us why they were not carried at once into the ward? One of the men refused to carry them into the ward unless he had a new suit of clothes. Dr. Clune.
2719. *Dr. MacLaurin.*] Had you no men inside the enclosure who could have carried them up? Yes 8 Nov., 1881.  
there was Cornelius, and Livesey, and Guildford.
2720. Did you order them to carry them up? I ordered Livesey, and begged him to do it, and he said it was not his duty and gave it up that moment.
2721. *President.*] Did you give instructions to the men on one occasion that they were not to take a patient into the ward, but leave her on the verandah? No, I never said such a thing.
2722. Was it ever reported to you that one of the attendants was in the habit of going where he could see through the windows into the female ward? Never. I do not think he would care to look in, considering the smell there was there.
2723. *Dr. MacLaurin.*] We have it in evidence that you were seen on several occasions to be under the influence of spirits? I can hardly conceive any person accusing me of that; it is absolutely false. I received from a friend in Sydney, on the morning after my arrival, an assortment of wines and spirits, as follows:—One bottle of dark brandy, two bottles of whisky, two of Hennessy's brandy, two of old port, two of sherry, and a bottle of champagne.
2724. What did you do with them? I think during the first two or three days five bottles were used by Mrs. Guildford and other patients; the remainder I placed against the wall in my room, and they were there when I left.
2725. You did not drink any yourself? One day, when I felt very low, I took two glasses of port wine.
2726. Were you in the habit of drinking the wine supplied every day? No, I could not drink it.
2727. Were you in the habit of drinking the spirits supplied every day? No; the only thing I took on one or two occasions was a glass of ale at dinner, which made me very ill, and I never repeated it.
2728. *Capt. Hixson.*] Was that when you dined with the nurses? No; I only dined with the nurse for a week.
2729. *Dr. MacLaurin.*] We have it in evidence that on one occasion you were obliged to hold on to the verandah-post to prevent yourself from falling? I have not the remotest recollection of such an occurrence, and I deny the possibility of such a thing. I never was intoxicated in my life. I may state that up to the time I came home I do not believe I have taken a wine-glassful of brandy at one time in my whole life. If I took a teaspoonful of brandy I would have to lie down. I was never inclined to drink.
2730. *Capt. Hixson.*] How many bottles of your private supply did you leave there? About six or seven bottles, fully, were there when I left; I kept them in reserve, in case the supply on the ground should run short, which it frequently did.
2731. *Dr. MacLaurin.*] Do you remember the occasion on which Dr. Alleyne came down to the Quarantine Station and had an interview with you, shortly after your arrival there? Yes; I was annoyed with Dr. Alleyne, inasmuch as I heard from Carroll that he had locked me up.
2732. Did you hear what Dr. Alleyne said to you at the time? No; I was 40 yards away from him, and the wind was blowing from me to him.
2733. Did he appear to be speaking to you? Yes, he said something to me.
2734. Could you make any intelligible meaning out of what he said? No, not a word.
2735. Did you make any reply to him? Yes, I said to him "You ought to be here, and I in your place," or in the healthy ground.
2736. Had you any reason to suppose there was any person prepared to take your place if you had expressed an unwillingness to remain in the hospital enclosure? Not at that time, but I was told subsequently that if I had kept quiet probably Dr. Alleyne would have put Dr. Spencer in my place.
2737. When did you hear that from Mr. Carroll? I think it was almost immediately after the steamer had passed round the corner.
2738. Before Dr. Alleyne had left? No; he had gone at this time.
2739. When you were in charge of the hospital enclosure did anyone inform you that there was in existence a set of regulations for the Quarantine Station? I heard that there were printed regulations on the ground, but I was not aware of them until about a week after I was locked in.
2740. Did anyone explain to you the nature of those regulations? No.
2741. Were you ever supplied with a copy of them? There was a copy placed in the pavilion before I broke down. I do not know who placed them there.
2742. Did you read them? No; I was too unwell to read anything.
2743. Did you pay any attention to them whatever? No; I did not.

THURSDAY, 10 NOVEMBER, 1881.

Present:—

DR. JONES, DR. MACLAURIN,		DR. MANNING, CAPT. HIXSON, MR. STREET.
------------------------------	--	--

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

H. G. ALLEYNE, ESQ., M.D., HEALTH OFFICER, FURTHER EXAMINED:—

2744. *President.*] We have had a copy of the printed regulations for the guidance of the person in charge of the Quarantine station handed to us. Do you know whether these regulations are still in force or not? I have considered them almost obsolete for years past; they were intended for immigrant Dr. Alleyne.  
ships under conditions which never occurred; they were drawn up under the idea that certain buildings 10 Nov., 1881.  
would be erected and certain appointments made, which were never carried out. The only attempt towards making these appointments was the putting a sum of £18 on the Estimates for a nurse, but this sum was found totally inadequate to induce any one to apply for the situation.
2745. Have any printed rules been issued since the date of these regulations? No. I was always in favour of dealing with each ship upon its own merits, and in accordance with the conditions under which she

Dr. Alleyne. she arrived. The first thing I do upon the arrival of a ship is to make a written report stating when she arrived, who was her commander, how many people she had on board; the conditions of health during the voyage, and so on; and if I thought it necessary to put her in quarantine I give instructions as to what should be done with her, and I make a recommendation to the Minister that she should be detained in Quarantine until I can report further upon her. Each ship has been dealt with upon its own merits, and in accordance with the attendant circumstances by a written report to the Government.

10 Nov., 1881.

2746. Are your instructions to the medical officer on board conveyed in writing also? No, verbally.

2747. Then you have not thought it necessary to issue any further regulations for the management of the Quarantine Station? No, and I do not think it is advisable; I think it is better to deal with each ship that comes in upon its own merits.

2748. What arrangements have you made for the conveyance of patients from Sydney to the Quarantine Station? The only alterations I have made in the arrangements which were made while I was ill has been that a medical man should see each patient before he embarked, and accompany the patient to station, and that a nurse should also be with the patient.

2749. Did you make any arrangement for a doctor to accompany the patients in the "Pinafore"? I did as soon as I could.

2750. Did you ever give any instructions for patients to be sent down in open boats towed behind the "Pinafore"? I do not recollect doing anything of the kind; but I consider that such a thing may be necessary to-morrow. The "Pinafore" is a very inefficient mode of conveyance, and if there were half-a-dozen patients to be sent down to-morrow, three or four not being infected, and the others absolutely infected, I should consider it prudent, there being no other means of separating them, to have a boat towed behind the steamer, and to put the infected persons in the boat and the uninfected in the "Pinafore," or *vice versa*; the boat would be just as good for the infected persons as the "Pinafore"; I would separate them as far as I could; and a good boat would afford as much shelter as the "Pinafore."

2751. Do you remember sending instructions down to the Quarantine Station to send up a boat with the "Pinafore"? I do not recollect it; but it is possible I may have done so under certain circumstances.

2752. In the event of your sending such instructions who would be the person responsible for carrying them out? Mr. Carroll of course.

2753. Were you made aware that on one occasion two women (one very ill) and two children (one very sick) were sent down in an open boat towed behind the "Pinafore" across the Heads during the night? No; it may have been so; there are various conditions connected with the sending down people to the Quarantine Station which I know nothing about, such as the state of the weather, the tide, the difficulty in getting the patients down to the steamer, and the desirableness of avoiding this when people are about the streets.

2754. Was it reported to you that Verdich was taken down in an open boat towed behind the "Pinafore"? No; I do not remember that there was any reason for his being taken down so; his was a very mild case; and I do not remember having heard that he was so taken down.

2755. Did you give instructions that he should be taken down in an open boat towed behind the "Pinafore"? I do not remember the conditions of Verdich's removal.

2756. On the occasion that these women and children were towed down in a boat behind the "Pinafore," have you any recollection that you gave instruction to have a boat sent down purposely to take them? No.

2757. Are you aware that the whaleboat used for the purpose was in an old and leaky condition? No; I believe that boat was used for taking down the body of Route in the first place, but what her condition was I do not know.

2758. If it were a fact it was in a leaky condition whose duty was it to have reported that fact to you? Carroll's, because he was in charge of the Government property.

2759. Do you know whether on the arrival of the boat at the Woolloomooloo Wharf the police would have any option as to putting the patients in this open boat, or whether it would be left to the medical officer. Who would be in charge of the embarkation of the patients if no medical officer was present? The police, of course; there would be nobody else present. I directed the police to see Dr. Spencer and ask him to accompany the patients from their houses to Cowper's Wharf. The reason I pitched upon him was that I knew he was a hardworking person, and never objected to do whatever he was asked to do. I sent to him two or three days after the outbreak; he was the first person I sent to.

2760. Did you take him with you the first time you went down to the Quarantine Station? Yes.

2761. Did you take him down with the intention of replacing Dr. Clune? Yes; I was told that Dr. Clune would not engage with the Government as medical officer, and I instructed my clerk to find out Dr. Spencer and ask him to come down with me as early as possible the following morning; and when he came I said to him, "I want you to go down to the Quarantine Station with me and remain there if necessary, and if not I will bring you back."

2762. Can you tell us what took place at your interview with Dr. Clune that afternoon. How far apart were you? I am a bad judge of distance; I was standing in front of the store and he was within the fence of the enclosure. I was told that he did not wish to take charge of the patients, and I had a man in my launch who would have taken his place. But when I asked Dr. Clune he said, "I am doing all in my power for these people, and I do not want anybody." He said he was working most energetically and doing all he could, and that he would continue to do so.

2763. Was anyone with him at the time? Yes, Dr. Caffyn was near me and Mr. Carroll also, and I sang out to him as loud as I could. So I took Dr. Spencer back with me.

2764. Could you hear him distinctly? Oh yes.

2765. And do you think he could hear you also? From the answer he gave me he must have heard me. Then I asked him what he wanted, whether he wanted medicines or anything else, and he said, "I want a nurse." I told him I had arranged for that the previous evening. I expected that the nurse would have been down before me, but she was delayed. Then I asked him what more he wanted, and he began to tell me what medicines he wanted. I could not hear him very well, and I asked Dr. Caffyn to go up to him and ascertain what they were and what quantity he wanted.

2766. Dr. Manning.] Can you tell us any other things that he asked for? He did ask for other things, and I believe the medicines and all the things he asked for were sent down the afternoon of the same day.

2767.

2767. *President.*] Was the wind blowing strongly at the time? No; I think it was a fine forenoon.

2768. *Capt. Hixson.*] Did Dr. Clune say anything to this effect: That he thought you ought to be inside the enclosure and he outside? No, I heard nothing of the kind.

2769. *President.*] We have it in evidence that he called out that you ought to be inside and he outside? I never heard him say so, and if he had said it I think I must have heard it.

2770. Was he not very much excited at the time? Yes, he was excited; but I was not angry or annoyed at his excitement, because the man was in a very peculiar position, and he had enough to make him excited.

2771. *Capt. Hixson.*] If you had considered it better for the public interest, would you have taken Dr. Clune away and put Dr. Spencer in his place? I should have put Dr. Spencer in charge of the enclosure, but that Dr. Clune said he was doing all he could for the people and would continue to do so.

2772. *President.*] Did you make more than one visit to the hospital ground during the time Dr. Clune was there? I never had a second interview with Dr. Clune; I had with Dr. Caffyn.

2773. On that occasion did Dr. Clune make any direct request to you to be liberated? Not on that occasion.

2774. Afterwards did you send down to Dr. Clune any written or printed instructions respecting his duties? Not that I remember.

2775. Do you consider that Dr. Clune knew he was in charge of the patients in the hospital enclosure? Yes; and I consider it extraordinary that he should send me a message asking whether he was in charge of the nurses. I wrote back, as a matter of course, "You are in charge and responsible for the management of the enclosure," or words to that effect.

2776. Did you receive any telegram from Dr. Clune subsequently, stating that he was sick and wished to be relieved? A few days before he left I received a telegram to the effect that his health was much impaired.

2777. Did you hear from any other quarter that his health was improved? No. I did not reply to that telegram.

2778. Do you remember a telegram from him to this effect: That he was too unwell to attend to any more patients, and that another medical man would have to be sent down? I do not remember it; I recollect receiving a message to the effect that his health was much impaired.

2779. Was that the only telegram you received about his state of health and his desire to be relieved? That is the only one I remember.

2780. Were you ever informed that he was not attending to his duties in the enclosure? I did hear complaints from the nurses on more than one occasion that he did not attend to his duties, and that they were distressed about it; I remember Carroll telling me about it once, but I heard of it from other persons.

2781. I suppose you had some conversation with Miss Osborn occasionally about the Quarantine Station? Yes.

2782. Did she ever tell you that it was reported that Dr. Clune was not attending to his duties? I sent to her from time to time to know if she could supply articles which Dr. Clune had sent for; but the only time I recollect asking her anything about the behaviour of Dr. Clune and the nurses was on one occasion when some reference was made either in Parliament or in the papers to certain complaints on the part of the patients. I then sent to her and said the Treasurer was anxious to know whether these people had got all they required, and I should be glad if she would obtain the information for me, that I might submit it to the Minister, and she did so.

2783. Was anything stated in that report from Miss Osborn having reference to Dr. Clune's inattention to his duties? There may have been, but I do not remember.

2784. What was the nature of the report which Carroll gave you respecting Dr. Clune? Carroll reported, after the quarantine had been going on for some time, that Dr. Clune and the nurses did not get on, and that the nurses complained that he was not doing his duty.

2785. Did he make any other report to you respecting Dr. Clune's conduct; did he ever report that Dr. Clune was under the influence of liquor? I do not believe he ever made a report to that effect.

2786. Did he ever make a report to you that the consumption of liquor down there was very large? He did, and the fact was I thought so myself, and I inquired of certain friends, who I thought might know Dr. Clune, as to his habits; but from the representations they made, I came to the conclusion that the large consumption did not arise from Dr. Clune's consuming it, but that Dr. Clune, not being a man who was used to have a number of persons under his control, was in the habit of giving stimulants to the servants and others for the purpose of making things work smoothly.

2787. Did Mr. Carroll report to you then, or at any time while Dr. Clune was there, that he thought Dr. Clune was either drunk or mad, and that he thought he was out of his mind half the time? I do not think he reported that Dr. Clune was drunk, but I think he said he was off his head.

2788. Did Mr. Carroll ever suggest that some other medical man should be placed in charge? I do not remember that he did; but had he done so I could not have acted upon his suggestion, as I had no one else to send down.

2789. The following questions were put to Mr. Carroll when he was examined by the Commission:—

1815. *Capt. Hixson.*] How many bottles of spirits do you think were sent in every day? Generally three or four bottles of brandy every day went to the hospital enclosure.

1816. *President.*] Did you ever report this to Dr. Alleyne? Yes, frequently.

1817. Did you ever report to him that you thought Dr. Clune was under the influence of liquor? Yes, I did, and I told him I thought the consumption of liquor was very large.

1818. *Dr. Manning.*] You said that you considered Dr. Clune did not know what he was doing half the time he was there. Do you think he was drunk then? I believe he was either drunk or mad; I believe he was out of his mind half the time.

1819. Did you tell Dr. Alleyne this? I did.

1820. Did you suggest to Dr. Alleyne that somebody else should be placed in charge? I did, about a week or ten days after he went down.

1821. *Capt. Hixson.*] And what was the result of your suggestion? I never heard any more of it. I suppose Dr. Alleyne thought he could not help himself, and that he would have to keep him there if he could not get another doctor in his place; he was unfit to be looking after the people.

Have you any remarks to make upon that evidence beyond what you have stated—that you could not get anyone else to go down? I did not know of any suitable man at that time who would have gone down.

2790. Did Miss Osborn report to you, or have you been otherwise informed, that Dr. Clune never went to the bedside of a patient, or felt the pulse, or took the temperature of a patient during the whole time he was in the enclosure? I do not remember having heard that from Miss Osborn, but I have heard so from other quarters.

- Dr. Alleyne. 2791. Did you make any communication to Dr. Clune to the effect that you had been so informed? No; because I could not believe that any medical man could have so acted, and I would not take action upon what I considered an idle rumour.
- 10 Nov., 1881. 2792. In your former evidence I think you gave us your reason for not communicating directly with the doctors? Yes; I thought it was a serious consideration in the public interest that I should not run the risk of bringing infection into the city.
2793. Did not the reports which reached you respecting Dr. Clune induce you to reconsider your decision? No, I acted upon the same principle throughout.
2794. Did you not see Dr. Caffyn who was in charge of the healthy ground, as that consideration would not apply to him? My reason for not seeing him more frequently was that I knew his principal reason for wishing to see me was to communicate to me his private grievances, and though I pitied him much I had no time to indulge in sympathy which would have been useless.
2795. Can you give us any reason why both Dr. Caffyn and Dr. Clune were kept so long at the Quarantine Station? They had to stop there till somebody was sent to relieve them; as soon as I was able to obtain the services of other medical men they were relieved.
2796. Was Dr. Caffyn in the habit of sending you long telegrams about his release, and about family matters? Yes; I was particularly sorry for him, because he had got into this trouble through an act of kindness to me.
2797. Did he send you a telegram to say he was so ill that he could not attend to his duties? Yes; he wanted to get his wife down, and I could not listen to that because I was anxious not to make any further complications; I received several other distressing telegrams from Dr. Caffyn, which were distressing to me, because I had a great regard for him, but I was unable to help him.
2798. Do you remember receiving a telegram from Dr. Caffyn as follows: "The two grave-diggers require suits; are they to have them from the store, or will you send them? Mr. Carroll will not give them?" I do not remember it; but I am quite certain that I never received a telegram containing a requisition that I did not attend to at once. In fact it was a positive order that these men, after performing their duties of coffining and burying a corpse, should receive a new suit of clothes each; that was a condition of their work. That order was given to Carroll, and has been one of the ordinary rules of the ground.
2799. Were your instructions respecting the clothes to this effect: That the suits of clothes in which these men buried the dead were to be hung up on a tree and put on again when another burial took place, and that they were to wear their own clothes in the meantime? No, the orders were that the clothes were to be burned.
2800. Dr. Jones.] On each occasion? Yes.
2801. Captain Haxson.] You never gave an order that would lead to such a practice as that? No.
2802. President.] Did Carroll report to you that Dr. Caffyn had stolen two suits of clothes out of the store? He did not report to me the circumstances to which you allude in an insolent manner, or make use of such a term as stolen; but he did say that Dr. Caffyn had during his absence taken some clothing from the store for the use of the people at the Quarantine Station under his charge, and he asked me to interdict such a practice. On my return to Sydney I communicated with Dr. Caffyn to the effect that he must not go into the store without Carroll's knowledge and sanction.
2803. Upon what principle did you act in releasing people from Quarantine? My ordinary principle is this, that if I am satisfied that the healthy people have been separated from the sick for twenty-five days I recommend their release.
2804. Are you aware that a man named Jefferson was there for ten weeks, and that Hughes was there for twelve weeks? I am aware that people were there much longer than I consider necessary, the reason being that the houses which they had left in Sydney were not prepared for their reception.
2805. What do you mean by the houses not being prepared to receive them? The houses had to be washed and cleansed and disinfected and refurnished to a certain extent.
2806. Whose duty was it to carry that out? The Government, acting under the advice of the Board of Health, and by the officials of that board.
2807. We have it in evidence that Cook was at the Quarantine Station seventy-six days, and that he never had small-pox;—can you give any reason for that long detention? He was kept there on police duty.
2808. Can you give us any reason why he was kept so long in a tent on the beach? He was reported to be a very insubordinate man, and on that account I did not think it advisable that he should immediately be put among the other people; he was therefore kept in isolation until he was reported to be conducting himself in a more reasonable manner; he was then put on duty to keep guard over some Chinese.
2809. Do you know anything of a man named Keats who was there seventy days, and during the whole of that time, with the exception of three days, was in the healthy ground? He was kept there for the same reason as the others, until the house he had left in Sydney was prepared for his reception.
2810. Did the same reasons apply to the detention of Mrs. Kelly, Mrs. Bonnor, and Mrs. Rout? No; they had been in the hospital enclosure, and were compelled to remain there until the houses occupied by the presumed healthy people were vacated and ready for them.
2811. Are you aware that Verdich was nine weeks and four days on board the "Faraway," and was altogether in Quarantine eleven weeks and two days? The same reasons applied to him as to Mrs. Bonnor and Mrs. Kelly, except that he was on board the "Faraway" instead of in the hospital enclosure.
2812. Would it not have been possible to have provided tents for Mrs. Bonnor, Mrs. Kelly, and Mrs. Rout, at an earlier date, and placed them in the healthy ground? They could have been provided with tents, but if they had been placed on the healthy ground it would have been impossible to have prevented them mingling with the healthy people and thereby protracting their quarantine.
2813. Did you recommend the appointment of Dr. Walsh to the "Faraway"? He was on the "Faraway" before the outbreak of small-pox commenced. I received notice from Messrs. Bright Bros. and Co. that a ship was expected to arrive infected with small-pox, and it was necessary that I should get a doctor, and after communicating with two or three gentlemen I was obliged to take Mr. Walsh, failing to find anyone more suitable.
2814. Do you know whether Dr. Walsh was ever employed by the Government before? Yes; he was in quarantine before, and was also dispenser at the gaol and the Hyde Park Asylum.
2815. Were you aware that Dr. Walsh was an unqualified man? Yes.
2816. What arrangement was made respecting his payment? I do not know that there was any arrangement, but probably Bright Bros. and Co. were to give him one guinea a day for services on their account.
- 2817.

2817. Was any fresh arrangement made with Dr. Walsh when the outbreak of small-pox occurred in Sydney? No; it was left for future arrangement.

2818. What was the cause of the removal of Dr. Walsh? I heard that he was intemperate, and I set to work to get another man, and when I got another man I sent him in his place, and put Mr. Walsh in a tent on shore.

2819. What were Dr. Walsh's duties on board the "Faraway"? He was to take care of the people there. I have known him do very good work on former occasions; in fact he was a most valuable man to me formerly.

2820. Was Dr. Walsh provided with any attendants or nurses? At the time of the outbreak he was provided with four Chinese to attend on himself and one Chinese patient.

2821. Was any nurse sent down? No; he said he would not have a nurse there.

2822. Do you know whether these Chinamen were actually employed in the capacity of servants or nurses on board the "Faraway"? I have reason to believe so. Then Hughes was there, and as he was not sick I recommended that he should be employed as cook, and be paid for his services.

2823. Do you know that no other person was sent down as an attendant or nurse between the 17th June and the 13th August? Yes, I do; I think the first telegram I got from Mr. Walsh was on the 13th August, that he must have an attendant. I lost no time, and telegraphed to Carroll to ask him to see if there was anyone who would act in the mean time, and I got an answer that there was no one who would do the work. But the next day I got a man named Evans, and sent him down, and he is there now.

2824. Is it a fact that Dr. Walsh asked frequently that he might have further assistance? No; I think that was his first application on the 13th August, and I think it was on the 15th that I sent down the man I have mentioned (Evans). The first time I heard anything about it was when Hughes was put in irons; I imagined that he was paid from the commencement, and that the Chinamen were also paid.

2825. *Dr. Manning.*] Did you give any definite instructions either to Mr. Carroll or to Dr. Walsh to engage Hughes or the Chinamen? Yes, the rate of wages was not alluded to, but it was clearly understood they were all engaged.

2826. *President.*] Did Mr. Carroll report to you that Dr. Walsh had stated that he was very ill from anxiety and want of sleep, and that some assistance must be sent to him? I only recollect the occasion, the 13th August to which I have referred, and I sent him a man a day or two afterwards.

2827. Are you aware that there was an absence of commodes, feeding-glasses, and other appliances for the sick on board the "Faraway"? No, I never heard of any wants whatever. When Mr. Walsh came to Sydney I heard for the first time of his wants, and from my knowledge of what was on board the "Faraway" and on shore, I consider that there was an ample supply of everything.

2828. Did Mr. Carroll report to you that Dr. Walsh was often drunk, and that he had to stop his liquor? He reported it once, and said I had better get another man. He said to me one afternoon, "Walsh is drinking," and I said, "I am sorry for that, for he is a very useful man," and the moment I got back to Sydney I took measures to supply his place; that was the first time I heard of it.

2829. Did Mr. Carroll report to you that he had a great deal of trouble with Dr. Walsh? I knew very well that the men were not *en accord*.

2830. *Dr. Manning.*] Did Carroll report to you that he had stopped his grog regularly? No, but I told him to curtail his allowance of wines and spirits.

2831. Did you have any intercourse with Dr. Walsh or have any conversation with him when he was on board the "Faraway"? No, I had no *vivâ voce* communication with him.

2832. *Capt. Hixson.*] You frequently went down to the Quarantine Station? Yes.

2833. How often did you go? Two or three times a week.

2834. From whom did you take your reports about the "Faraway"? From Carroll, except that on two or three occasions I received telegrams from Mr. Walsh.

2835. *President.*] Was there any reason why Dr. Walsh should not have telegraphed freely to you—was any restriction placed upon his sending telegrams as he liked? None whatever.

2836. Was Hughes sent on board the "Faraway" with your knowledge? No.

2837. Do you know by whose orders he was sent on board? I do not know.

2838. When did you first discover that he was on board the "Faraway"? I think it was the Monday or Tuesday after he went down—about the 22nd or 23rd.

2839. Was it reported to you that Hughes had not small-pox at all? Yes, it was reported to me by Carroll that Dr. Walsh said he had not small-pox; and that was the first intimation I had that there was such a person on board the "Faraway" or at the Quarantine Station at all.

2840. We have it in evidence that Hughes was down there for twelve weeks;—can you tell us why he was there so long? We could not take him ashore until the healthy people had gone.

2841. Did you order him to be placed in irons? Yes, on one occasion I did.

2842. Can you tell us the reason? He had broken out, I think, on the 16th July; he swam ashore from the "Faraway," went into the enclosure, and frightened the women out of their lives. Carroll telegraphed to me, and I ordered him to be put back into the ship. The next day I received a telegram to this effect: "Hughes has disappeared; cannot be found anywhere; must have gone to Sydney." I at once got into a cab and went to the police office; saw Mr. Fosbery, and asked him to employ as many policemen as he could to find him and get him sent back. And some time the next day I got another telegram, to say that Hughes had appeared on the deck of the ship, and said that he had never been out of her. I heard nothing more of him until about the 25th, when I got a telegram stating that "Hughes had swam ashore again, and been up to the enclosure," and I telegraphed back, "Have him put back again," and received the reply, "He won't go on board; we have put him in a tent." When I got this telegram I was very much concerned; and of course it was necessary for the man's safety, and also for the safety of the other people, that he should not be allowed to do as he liked, and that he should be under control. It would have upset the whole discipline of the establishment and protracted the quarantine to an indefinite time if this man had been allowed to do as he liked. I now hand in a telegram, containing minutes from myself and the Inspector General of Police, in reference to this matter:—

Telegram from Superintendent Carroll, Quarantine Station, to Dr. Alleyne, on 25 July, 1881.

JOHN HUGHES swam ashore from the "Faraway" about 5 p.m., yesterday. Have put him into a tent on the beach with policeman in charge, as he refused to return on board. Awaiting instructions,

Dr. Alleyne.  
10 Nov., 1881.

Dr. Alleyne. I recommend as a matter of necessity that the man Hughes be put in leg-irons by the police, and taken on board the "Faraway" at once.—H. G. ALLEYNE. I wish the above recommendation to be acted on without delay.—H. G. A.  
 10 Nov., 1881. The senior constable in charge of the police at Quarantine will carry out Dr. Alleyne's instructions at once.—EDMUND FOSBERY, I.G.P., 25 July.

Carried out the foregoing instructions at 4:35 p.m. on the 26th of July, 1881.—JAMES J. SULLIVAN, Senr. Const.

2843. Was there any objection to Hughes' going to see his wife and child, they being in the infected ground, and he being in an infected ship? There was great objection; it was a matter of discipline; I could not have allowed such a thing for a moment. Moreover, there was no room for his accommodation in the hospital enclosure, and he would undoubtedly have gone into the healthy ground where his children were and thus protracted the quarantine indefinitely.

2844. *Capt. Hixson.*] Did he ask permission to do so? No, and if he had I could not have given it; it would have been subversive of all discipline to have allowed it.

TUESDAY, 15 NOVEMBER, 1881.

Present:—

DR. JONES,	DR. MANNING,
DR. MACLAURIN,	CAPTAIN HIXSON,
MR. STREET.	

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

H. G. Alleyne, Esq., M.D., Health Officer, further examined:—

Dr. Alleyne. 2845. *President.*] Under what circumstances was Dr. Foucart sent down to the Quarantine Station? He was sent to relieve Dr. Caffyn.

15 Nov., 1881. 2846. Dr. Foucart considers that he was almost entrapped into remaining at the Station—that he was informed he was only to be detained there some two or three days, and that he was kept there for two months? I believe that I did say to him that his detention at the Quarantine station would probably only be a few days, but the necessities of the service rendered it longer, and being a Government Medical Officer and no other person to take his place, I do not see any reasonable grounds of complaint.

2847. Can you tell us why he was detained so long? He was detained there as long as I thought he was useful, and when I thought there was no further necessity for his services I wrote to the Government recommending that Dr. Foucart should be brought to Sydney, as his presence at the Quarantine Station was no longer needed; I should have kept him on there if I had considered that his services were required.

2848. Can you tell us why he was detained there a month after Dr. Beattie went down? I can only say that I thought it necessary, but the moment I became convinced that his services were no longer required I recommended that he should be withdrawn.

2849. Can you tell us the circumstances under which Dr. Spencer went down there? On its being necessary to send down two women who had no friends or relatives to accompany them, I thought it so desirable that a medical man should accompany them that I directed that Dr. Spencer should go down in the "Pinafore" with them, notwithstanding that this left me without any medical assistance in Sydney.

2850. Did Dr. Spencer consider that he was to come back to Sydney after that trip? I think he did but I did not intend him to come back. I think I got a telegram from Mr. Carroll stating that he had given Dr. Spencer a suit of clothes, and asking if he was to come back. To this I replied "No," because I thought it was the best thing he could do to remain in the boat so as to be able to go down with the patients every time. Finding that this difficulty—having to send down patients who had no friends to accompany them—a very serious matter, I did not intend to allow Dr. Spencer to come back. I never told him that but for the reason I have stated I determined not to relieve him from that duty.

2851. Can you tell us why he was detained for seventy-two days on board the "Pinafore"? He was there in the performance of the same duties for which he was engaged the very first night.

2852. Was he asked to go into the enclosure? He was—I forget by whom, whether it was Dr. Clune who made the proposition or who made it; but my answer to that was—first, that he was necessary where he was, and in the next place I thought, although I had a great regard for Dr. Spencer, and considered him a valuable man under certain conditions, that he was hardly the man to whom I should like to entrust the particular duties which devolved upon the officer in charge of the hospital enclosure. He was a good man to attend upon small-pox patients, as good a man as I knew, but I did not wish him to be in a position to undertake cases which might possibly occur in the enclosure. Afterwards Dr. Caffyn urged that Dr. Spencer should be sent to relieve him, but I could not consent to that, even if I had been able to find a man to take Dr. Spencer's place, which I was not, because he had been in the "Pinafore," within range of small-pox contagion, and ought not to be allowed to come in contact with the healthy people. Dr. Spencer was very anxious to go and relieve Dr. Caffyn, but I could not consent to that arrangement. In the first place I could not supply his place, and in the next place his presence among the healthy people would have commenced a new period of quarantine for the people in the healthy ground.

2853. Did you ever receive a message from Dr. Spencer that he was ill and wanted to be relieved? I did receive a message that he was ill, and I went down to make inquiries. If I had found him really ill and in want of medical attendance I should have had him transferred to a house on shore and attended to, but that was not the case. No doubt he was uncomfortable as any man must have been in such a position, but I could not on that account put him in charge in the place of Dr. Caffyn. I do not remember that he said that he wanted to be relieved; he said that his health would not then permit him to undertake Dr. Clune's duty.

2854. Did he make any application to be placed on shore in a tent? I do not remember that he did; all I can recollect his saying was that he was willing to undertake Dr. Caffyn's duties.

2855. Can you tell us why it was considered necessary to destroy Dr. Spencer's clothes? It is the regular rule from which I would not depart for any consideration; he had been within range of small-pox contagion.

2856. So long as he remained on board the "Pinafore" did you consider it necessary that his clothes should be destroyed? The clothes that he wore on board the "Pinafore" were taken away when he went on shore and destroyed.

2857. He states in evidence that his clothes were taken away from him when he went on board the "Pinafore"? Carroll destroyed his clothes when he went down to the Quarantine Station, thinking no doubt that he was to be employed there, and informed me by telegram that he had done so, and asked me what was to be done with Dr. Spencer, to which I replied, "Let him remain where he is." Dr. Alleyne.  
15 Nov., 1881.

2858. Then you did not give any orders to have his clothes destroyed? No, I did not.

2859. He states in evidence that when he first went down you gave him an order to get new clothes? I never gave him an order, but he did get new clothes from the store when he went down, from Carroll.

2860. He states that when he went down you gave him an order for a new suit of clothes? He is in error.

2861. This is what he states in evidence :—

2194. *Dr. Manning.*] Did this occur when you first went to the "Pinafore"? When I first went down early in the morning, I handed to Mr. Carroll the order from Dr. Alleyne to supply me with a new suit of clothes.

2195. Was any explanation made to you when this piece of paper was handed to you? Not a word, not a syllable was said.

2196. *Dr. Jones.*] Did Dr. Alleyne hand you the paper? Yes, he gave it to me at the Australian Club.

2197. *Dr. Manning.*] Then who told you to take off the clothes you had on and put on the new suit? Mr. Carroll must have done that, because he handed me the clothes.

2198. *Dr. MacLaurin.*] Did you ask for a new suit? No, I did not want a new suit; my clothes were very nice clothes.

2199. *Dr. Manning.*] And what became of your own clothes? They were taken away and burned.

I think he is altogether in error and must have been mixing up something else in his mind. I do not think I saw him before he went down. I had had a very fatiguing day, and had not been to bed the night before. All I can recollect is that when the inspector came to me about these women I decided that some doctor must accompany them, and directed him to tell Dr. Spencer to perform the duty.

2862. Was Dr. Spencer instructed to remain in the "Pinafore"? I did not instruct him personally, but Carroll thought that he should remain there.

2863. Were any orders given to see to his comfort on board? Yes; I told Carroll repeatedly to make him as comfortable as was possible under the circumstances. Every time I went to the Quarantine Station I asked Carroll how Dr. Spencer was getting on, and told him to make him as comfortable as he could.

2864. Was any definite arrangement made as to the remuneration he was to receive? No, none at all.

2865. Why was that not done? It was thought better to leave it for future arrangement; and I am certain that the doctors are much better off than they would have been if I had recommended anything definite at the time. I told him I was sure that he would be treated liberally by the Government, but I could not say what he would receive, and I advised him not to press me to say it.

2866. Dr. Spencer states in evidence that he received a telegram from you to this effect :—"Are you willing to attend to the sick in the enclosure, and take the duties of Dr. Clune?" I believe he did; and I believe I have a telegram from Dr. Spencer to the effect that his health would not admit of his taking Dr. Clune's duties.

2867. Was there any objection to Dr. Spencer's going ashore at that time, between the trips of the "Pinafore," and remaining on shore? Yes, the place was overcrowded, and there was no one to attend upon him. We could not put a man in a tent and isolate him without putting a guard over him, and that would have required three or four constables.

2868. Did Dr. Caffyn report to you, two days after Constable Cook went down, that Cook had not got small-pox? Yes, he did shortly after he went down.

2869. Was any action taken upon that report? Cook was moved ashore and put into a tent, and it was reported to me that he was inclined to be insubordinate, in fact he was very insubordinate. After a time I sent him to do police duty to look after some Chinamen. It was reported to me that he used to go down and mix with the other people, and I had to get the Inspector General of Police to write to the constable in charge at the Quarantine Station, to say that Cook had to live in the tent where his duties had to be performed, which were to look after some Chinamen.

2870. And but for the reasons stated he would have been sent up at an earlier date to the healthy ground where the other police were? Yes.

2871. In your former evidence you stated that you had been in the habit of visiting the Quarantine station two or three times a week. Have you continued that practice up to the present time? Yes; sometimes it is more than that and sometimes less. I was there on Sunday. I have been there to-day; and shall go again the day after to-morrow.

2872. Prior to the circumstances that have occurred since the outbreak of small-pox did you consider that Carroll discharged his duties satisfactorily? Yes. He is not a very bright man, but according to his ability he discharged his duties well.

2873. *Capt. Hixson.*] I suppose before this outbreak of small-pox he had never been accustomed to such duties as he has had since to perform? No, he never expected such a state of things, and no arrangements were made for it. There was an occasion on which a lot of people were sent down from Sydney when the "Brisbane" was sent to quarantine, which was in the latter end of 1876 or the beginning of 1877, but no sick people were sent down.

2874. *Dr. Manning.*] Is it the case that on a former occasion Carroll was suspended for neglect of duty? He was suspended a long time ago, but I did not think there was any ground for the charge made against him. Mr. Wise made some charge of disposing of some blankets in an unauthorized manner. A Board was appointed to inquire into it, and they came to the conclusion that he did dispose of the things, but that he did it under the impression that he had a right to dispose of them.

2875. And was it not part of the charge that some of the bedding so disposed of was infected? Yes; but I do not think that was the case, because I was in the habit of seeing the infected bedding burned.

2876. Do you consider the officials at the Quarantine Station bound by the regulations for the management of the ground, a copy of which we received the other day? They could not carry them out if they were; they were intended to apply to a condition of things which does not now exist and never has existed.

2877. *Dr. Jones.*] It would appear that some of those regulations are carried out? Yes, these comprise certain general regulations which do apply.

2878. *President.*] We do not know whether it has been made quite clear who gave the orders for patients to be towed down behind the steamer in open boats to the Quarantine Station;—can you tell us? I have a memorandum here containing some instructions I gave for the conveyance of the sick people (*Reads*): "Separate conveyances should be provided for the sick and suspected people; they should not be put on board in the same place."

- Dr. Alleyne. 2879. *Dr. Manning.*] Can you tell us when these people were embarked at Woolloomooloo Bay, who was responsible for their being put in the proper part of the steamer? The police undertook that duty.  
 15 Nov., 1881. 2880. But the police deny all responsibility after the patients have been taken to the wharf. We have the evidence of the master of the "Pinafore," that he received instructions from Carroll to have the people put into a small boat. This is what he has stated in evidence :—  
 1831. *Captain Hixson.*] What was the reason of Verdich's being towed behind the "Pinafore" in the whaleboat ;—why did you not take him on board? That was the order, and we had to obey it; we were ordered to get the long-boat up and tow Verdich down in it.  
 1833. From whom did you receive that order? From Carroll; we had a telegram to get the long-boat up and tow him down in it.  
 Probably Carroll received instructions from some one to do so. But I must say—although I do not remember Verdich's case—that if it were a fine afternoon, and there were two or three healthy people going down and one sick man, I should put the sick man in the boat, and the others in the "Pinafore," or *vice versa*, put the healthy persons in the boat and the sick man in the steamer.  
 2881. *Capt. Hixson.*] But the question we are now asking you is: Did you send orders to that effect? It is impossible for me to remember; I do not know whether I did or not. I should do that at this moment as the best thing to be done with the imperfect arrangements we have.  
 2882. *Dr. Manning.*] That is supposing the weather to be fine? Yes; I would not let them go otherwise.

Captain Francis Hixson, President of the Marine Board and member of the Commission, sworn and examined :—

- Capt. Hixson. 2883. *President.*] You were present, I believe, at the meeting at the Treasury at the first outbreak of small-pox, when arrangements were discussed? I was.  
 15 Nov., 1881. 2884. Can you tell us under what circumstances the "Pinafore" was engaged? I can. At the meeting at the Treasury to which you refer the outbreak of small-pox was under discussion, and the public mind being very much excited, it was felt that it was necessary to remove certain people out of the city as soon as possible. There was a report current that if the Government had removed On Chong's family in place of allowing them to remain in George-street the disease would not have been disseminated. There was therefore a great scare, and it was thought necessary to remove the people at once, and I was instructed to procure a steamer for that purpose. I went immediately in quest of a steamer, and I made arrangements with Mr. Halstead, the proprietor of certain steamers, to send a vessel called the "Britannia," which he offered at the rate of £5 per day. The vessel was wanted at once, and he said he was not quite sure that he could get her, but if not he would send the "Pinafore" at £3 a day. I told him I wanted the "Britannia," and that she was to be at the wharf at 2 o'clock that day. But at the time mentioned instead of the "Britannia" the "Pinafore" was there, and Mr. Halstead's excuse was that he had not had time to get the "Britannia," which was a much better boat, larger and more suitable for the purpose, in which the patients could have been made much more comfortable. However, the patients were brought to the wharf by the police, the "Pinafore" was there to receive them, and there was no help for it.  
 2885. *Dr. Manning.*] And the "Pinafore" having been once engaged no alteration could be made? No, the way to have relieved the "Pinafore" would have been to have engaged another boat, and to have kept the "Pinafore" in Quarantine some considerable time before she would have been considered clean by the Health Officer, and all that time, of course, her expense would have been going on.  
 2886. *President.*] Did you ever receive instructions from the Government to make some better arrangements for steam vessels to convey passengers after the "Pinafore" had been employed for some time? I once had a discussion with Mr. Eagar and Dr. Alleyne in reference to the matter, because when bad weather came on the "Pinafore" was unable to cross the Heads. We then made special arrangements for Mr. Halstead to send another and a large steamer, the "Defiance," but he wanted, I think, £10 a day for her services, and that was considered so great an expense that the arrangement was not closed. Then, as fine weather set in, the services of the "Pinafore" were retained.

WEDNESDAY, 16 NOVEMBER, 1881.

Present:—

DR. JONES,  
 DR. MACLAURIN,

CAPT. HIXSON.  
 MR. STREET.

JOHN RENDELL STREET, Esq., IN THE CHAIR.

THE Commissioners met this day at the Treasury at 3 p.m., and the telegraph line having been placed at their disposal by the Hon. G. Eagar, the following evidence was wired to and fro :—

In anticipation of this mode of taking evidence the following telegrams had already been sent from the Quarantine Station to the Treasury, addressed to the Under Secretary, and were handed to the Commissioners on their arrival by that gentleman :—

- Dr. R. E. Beattie. "Sir,—I have the honor to request that you will have the goodness to favour me by bringing this communication under the notice of the Quarantine Commissioners, with a view to my being informed of their desire on the subject. Being aware that most of the sensational statements relating to quarantine which recently obtained currency through the Press were exaggerated and unreliable, and in many cases absolutely untrue, the possibility has occurred to me that similar statements relating to the period of my superintendence on board the 'Faraway,' may, through ignorance or less excusable cause, have been made during the progress of the inquiry. I feel sure that should any such assertions have been made, the Commissioners would, as a matter of course, under ordinary circumstances have required my evidence; fearing, however, lest the infectiousness and peculiarity of my situation on board the 'Faraway' may have been present to these gentlemen, and deterred them from following the usual course, I beg to state that should any such unfavourable assertions as I have indicated been made, I am most anxious that my evidence on such points at least be taken by telegraph, as I am fully confident of being able satisfactorily to show that  
 in
- 16 Nov., 1881.

in carrying out the comprehensive and efficient instructions of Dr. Alleyne, nothing was left undone to secure the well-being and comfort of those on board. Any suggestion which appeared likely to add to their comfort received at once that consideration and approval as will be manifest from his communications to me touching the welfare of those in my charge.—ROBT. E. BEATTIE, Medical Superintendent, Hospital-ship "Faraway."

Dr. R. E.  
Beattie.  
16 Nov., 1881.

"With due respect, permit me to request that the purport of this telegram be communicated to the Royal Commission appointed to inquire into and report upon matters and complaints connected with the quarantine enclosure. On the 12th of August I took charge of the enclosure, with special instructions from Dr. Alleyne to provide every comfort and supply every reasonable want which the inmates might require. The Under Secretary and Dr. Alleyne have responded promptly to every requisition forwarded by me. On one occasion I thought a patient would benefit by champagne; Dr. Alleyne at once complied with my request, and the same day sent the wine. Carroll, the late superintendent, I must say was praiseworthy in seconding my wishes; on all occasions was respectful and obliging; he particularly wished me not to send George Livesey for anything, as he had no confidence in him, as he often sent for things without the consent or knowledge of the doctors in charge of the enclosure. As regards myself, I accept the responsibility, and court every inquiry, and shall be happy to answer any questions the Commission may honor me by asking. I may remark that I was precluded from replying to charges made by the Press, and Dr. Clune's animadversions. Many of the charges were untrue and without any foundation, and matters misrepresented. I do not know whether the Commission will think as I do—that a latent or ulterior object is in view on the part of those bringing them. Two or three patients have consented to come down owing to the advice of those who have been under my care, and have gone home recovered. If I were afflicted with variola there is no place I could prefer coming to than the enclosure—picturesque, healthy, and every accommodation and comfort, attended by two excellent nurses selected by Miss Osborn. Result of cases under my charge, attributed to the advantages above named, is one death out of fifteen; many of them serious cases."—DR. DAY.

Dr. Day.  
16 Nov., 1881.

President to Robert E. Beattie, Esq., L.K. & Q.C.P.I., Medical Superintendent, Hospital-ship "Faraway":—

2887. In reply to your communication, the Commissioners desire to know from you, whether, on your taking charge of the "Faraway," you found her clean and well provided with the appliances and comforts considered necessary for sick people, or otherwise. And if, since you have been on board, all your requisitions have been fully and promptly attended to. And further, if the people on board are now provided with everything necessary for the comfort and well-being of people situated as they are? In reply to your questions, I have to state that on taking charge of the "Faraway" I did not find her quite clean, but it was explained to me that the irregularity of persons and things was in part due to the moving of articles during lime-washing, which was done shortly before, and the marked reluctance of those on board to do anything towards their own cleanliness, together with a horror of interfering with the compartment in which some deaths had very recently occurred. There was no one confined to bed when I arrived requiring such comforts as are understood as necessary for the sick; there was, however, a supply of medicines and stimulants sufficient, in the opinion of my predecessor, but which I thought well to enlarge. There were complaints of want of clothing, which was, I believe, on the way here. Since taking charge, all my requisitions have been fully and promptly attended to, and to the satisfaction of the patients, and all who have been on board since, as well as those at present here, are not only well but liberally provided for in every way, and, apart from their isolation, are better off and less restrained than, I believe, they could be in any hospital. I am aware of all on board being provided for regarding food, &c., exactly as I have been myself, and personally I have no fault to find.

Dr. R. E.  
Beattie.  
16 Nov., 1881.

2888. When you joined the ship, were the necessary appliances for nursing sick people to be found on board, and was there a sufficient number of attendants? The appliances essential for nursing sick people were to be found on board when I joined, but some articles affording facility and greater comfort in the treatment of sick persons were wanting. There were, as I have said, none actually requiring these at the time, and may add that the articles used by those who had been sick were destroyed on the recovery or death of the patient, including the patient Hughes, who was under pay as an attendant. The number of attendants was sufficient, and it has not been found necessary to increase them.

To Henry Day, Esq., M.R.C.S. in charge of the Hospital enclosure:—

2889. In reply to your communication the Commissioners desire to be informed whether, on taking charge of the hospital enclosure, you found dissatisfaction existing among patients and others therein, and, if so, what in your opinion was the cause of this dissatisfaction, and whether you consider it reasonable or otherwise? George Livesey was constantly endeavouring to cause dissatisfaction amongst the inmates of enclosure; upon one occasion upon remonstrating he was insolent, insubordinate, and threatening; I had to request the Police to be prepared for any emergency. So far from any complaint being made, Guildford leaving the enclosure with others wished to send telegram signed by all expressing their satisfaction at their treatment while in the enclosure with me.

Dr. Day.  
16 Nov., 1881.

2890. Are we to understand from your message that when you arrived in the hospital enclosure there was in your opinion no reasonable ground of complaint among the patients? No ground for complaint.

To Miss Louisa Hollis, Nurse, Hospital enclosure:—

2891. Are you in possession of any facts which would justify you in forming the opinion that the patients in the hospital enclosure during the time you have been there have been in any way neglected or improperly treated? In my opinion Dr. Clune did neglect the patients in not coming to see them when asked, but they were never improperly treated.

Nurse Hollis.  
16 Nov., 1881.

2892. Did Dr. Clune's neglect of the patients in your opinion arise from intemperance? Sometimes.

2893. How often have you known Dr. Clune to be the worse for liquor? Three times I am sure.

To

To C. E. Cornelius, Attendant, Hospital Enclosure :—

- Attendant  
Cornelius.  
16 Nov., 1881.
2894. Have you ever observed any instances of disrespect on the part of the nurses towards Dr. Clune ; if so, give particulars ? I have seen disrespect on part of Miss Meyler towards Dr. Clune, which arose from her opinion that he was neglecting the patients.
2895. Did you at any time refuse to carry patients up from the gate into the wards ; did you refuse to place coffins under cover when desired to do so ? I never refused to carry patients or coffins.
2896. Statements have been made reflecting upon Dr. Clune's sobriety. Have you ever observed him to be intemperate at the Quarantine Station ? I have seen him once the worse for liquor, but had not many opportunities of observing him.

THURSDAY, 17 NOVEMBER, 1881.

Present :—

DR. JONES,	CAPTAIN HIXSON,
DR. MACLAURIN,	MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

Police Inspector Robert Anderson sworn and examined :—

- Inspector  
Anderson.  
17 Nov., 1881.
2897. *President.*] You were present, were you not, at the Woolloomooloo wharf on the 9th July last, when Mrs. Monahan was taken down to the Quarantine station ? No, Sub-Inspector M'Kay was present on that occasion.
2898. Were you present on the following day when Verdich was sent down ? Yes, I took him down to the wharf on the 10th July and Mr. Monahan and his family.
2899. Verdich was put into an open boat and towed down behind the steamer ? Yes.
2900. By whose directions was he put into the boat ? By Dr. Alleyne's.
2901. And how did you receive your instructions ? Verbally from Dr. Alleyne.
2902. To yourself personally ? Personally to myself.
2903. And where did he give you those instructions ? I am not sure whether it was at the Australian Club or at his own house.
2904. At any rate you knew from him that Verdich was to go down in an open boat ? Yes.
2905. Do you remember the exact terms in which those instructions were given to you by Dr. Alleyne ? I could not employ his language exactly, but it was that Mr. Monahan and his family were to go in the "Pinafore" and Verdich was to go in the boat to be towed behind the "Pinafore"; I did not know whether it was a whaleboat or not, I think it was.
2906. Were you present on any other occasion when anyone was sent down to the Quarantine station in an open boat towed behind the steamer ? No, I do not think so.
2907. Can you inform the Commission whether in all cases where the police were directed to remove patients the removals were carried out with the least injury to the patients and with every consideration for their comfort ? Yes, every kindness was shown to them. Superintendent Read was very particular about it, and he left it to our discretion to give them brandy or anything else they might require. In every case I went down to see whether they had sufficient covering, and I always sent them rugs or blankets, or anything that was necessary. In Verdich's case I remember that he had a rug and a blanket and there were several other cases ; a child named Woods had two blankets.
2908. *Capt. Hixson.*] Did you at the time understand the object in view in sending Verdich and Monahan in different boats ? I understood that it was to prevent contagion.
2909. It was not considered safe to put the sick patients and the healthy people in the same boat ? No, Dr. Alleyne said so. In Verdich's case the pustules were fully developed, and he said it would not be safe to put Verdich in the same boat with Monahan and his family.
2910. And that was the reason Verdich was put into a boat and towed behind the "Pinafore" ? Yes.
2911. *Dr. Jones.*] Was the weather bad on that occasion ? It was a cold morning.
2912. Was it wet ? There was just one slight shower before we got to the wharf.
2913. Had Verdich sufficient clothing ? Yes.
2914. But there was no covering over the boat to protect it from the weather ? No ; it was an open boat, but I don't think any rain fell after they left the wharf.
2915. *Captain Hixson.*] Did it appear to you that there was anything inhuman in sending Verdich down in an open boat in that manner ? Well, the boat was half full of water, and it took about twenty minutes to bale her out. I told Dr. Alleyne of it, and I think the Superintendent wrote a memo. about it.
2916. Was that with the view of condemning the boat ? To get a more suitable boat. I said the boat ought to be covered.
2917. Do you know whether the memorandum of the Superintendent had any effect ? Well, I never saw the boat employed again, I think.
2918. *President.*] You superintended the sending down of a number of persons to the Quarantine Station at different times, did you not ? Yes.
2919. Did those persons always go voluntarily ? Yes, always.
2920. Was there any case in which they refused to go ? In the case of Mrs. Woods, she refused at first to let her child go, and Dr. Alleyne requested me to go and reason with her and get her consent. At first she was very reluctant to part with the child, but I pointed out what Dr. Alleyne had told me that there were two experienced nurses at the Quarantine Station, and that she could not get medical attendance at her own house in Sydney, and by sending her child down to the station she would prevent contagion. I pointed this out to Mrs. Woods in the most considerate way, and she promised to let the child go the next morning. I promised to bring blankets for her and to make her as comfortable as possible.
2921. *Dr. MacLaurin.*] And then at last Mrs. Woods consented ? Yes, she consented quite cheerfully.
2922. Were your instructions to remove the patients against their wishes ? Oh no, and although the child died Mrs. Woods afterwards thanked me for the kindness I had shown her. There were other cases where  
the

the people did not consent at first. There was Mr. Moet, who would not consent to let his wife go down at first, but when I spoke to him he gave his consent principally on the ground that it was dangerous to the neighbourhood to allow her to remain where she was.

Inspector Anderson.

2923. *President.*] But in no case was anyone sent down without their consent having been obtained? Certainly not; none of the persons were sent without their consent. I did the same with a person at Croydon whose name I forget now.

17 Nov., 1881.

Sub-Inspector Alexander M'Kay sworn and examined :—

2924. *President.*] You were, I believe, at the Woolloomooloo wharf on the 9th July last when Mrs. Monahan and her child were sent down to the Quarantine Station? I was.

Sub-Inspector M'Kay.

2925. Were they put into an open boat and towed down behind the "Pinafore"? They were.

17 Nov., 1881.

2926. By whose directions? I understood that the boat came down for that purpose.

2927. Did you receive any instructions about it before you went there? I did not, sir; but I may remark that before they went into the boat—that is, Mrs. Fisher and the girl Monahan, and her mother—the boat had to be baled out.

2928. From whom did you ascertain that they were to be put into the open boat? From the hands on the "Pinafore." I had no instructions whatever with regard to their conveyance; I had simply to take them to the wharf.

2929. Did they object to go in that boat? No; there were no objections that I heard from anyone. Seeing that the boat wanted baling out, I sent a policeman down to the Woolloomooloo lock-up to get some blankets for them and put them into the boat before they got in; they had blankets besides, but these were for them to sit upon and to put under their feet.

2930. Were you present on any other occasion when people were sent down in a boat towed behind the steamer? I was present when the girl Hodgkinson was sent down; I removed her.

2931. What was the date of her removal? The 11th July, I think.

2932. Was she put into an open boat and towed behind the steamer? No; she was put on board the "Pinafore"; I do not know by whose direction that was, but the hands in the "Pinafore" told me she was to be set in the stern of the steamer.

2933. Was any doctor present on either of those occasions? No; there was no doctor on either occasion, that I know of.

2934. *Dr. Jones.*] There was no doctor on board the "Pinafore"? No, I did not see any doctor. I only saw two hands working the "Pinafore."

2935. *President.*] Did any of the people with whose removal you were connected make any objection to go to the Quarantine Station? No, they never refused to go, none of them.

2936. Did you accompany Mrs. Fisher and Mrs. Monahan in the omnibus down to the wharf? Yes, I walked down by the side of the omnibus the whole way.

2937. Did Mrs. Monahan make any objection to go in the same conveyance as Mrs. Fisher? No, I do not recollect that she did.

2938. *Capt. Hixson.*] If she had, would you have heard of it? I think so. I do not remember any objection being made. My instructions were to go from the Glebe round by Pyrmont Bridge Road.

2939. *President.*] When you went to their house for the Monahans did you tell Mr. Monahan to bring his wife out and not to keep you waiting all the day? Oh, no. He was in a low flat under the kitchen, and was very noisy and annoyed at his wife going away and leaving him with so many children, and I told him to let the child come, and his wife very kindly wrapped the child up and carried her to the 'bus.

2940. Then your manner was not rough on that occasion? No, sir; no more than it is at this moment.

2941. Mr. Monahan stated in his evidence that your manner was very rough; that you rapped on the palings with your whip, and told him not to keep you waiting there all day? No sir, he was very noisy and could be heard across the street, and I dare say I told him to be quiet, but I was no more rough than I am at this present moment.

2942. Is there anything else that you would like to state? Only that the morning we took the girl from Macquarie-street we had to wait at the wharf for more than half an hour before this little boat came to take her away.

2943. *Captain Hixson.*] Did you hear why the boat was late? No, I did not.

Mr. William Benson, tide-waiter, Customs Department, sworn and examined :—

2944. *President.*] We have been informed that you have some evidence you desire to give in reference to matters connected with the Quarantine station? Yes, relative to myself.

Mr. W. Benson.

2945. When did you first go to the Quarantine station? I was on board the steamer "Ocean" from China via the Eastern ports, on the 26th June until the following Saturday, the 2nd July, when the ship proceeded to Melbourne.

17 Nov., 1881.

2946. Where did you go then? I was then taken off the ship by Mr. Superintendent Carroll and placed in Quarantine ground.

2947. In what is known as the healthy ground? I was landed at the jetty and then taken to the healthy ground.

2948. Have you any complaints to make of your treatment on board the "Ocean"? Not at all, sir. I was treated with urbanity and civility by the captain in every respect, except that he did not like Government officials. There was a police constable named Glassington, who was taken in the boat with me, but he did not go on with me to the Quarantine station; he came with me from the ship to the jetty, and then a telegram came down that Glassington was to be isolated outside the Quarantine boundary, so Mr. Carroll told me while I was in the boat. I wished to accompany Glassington and remonstrated with Mr. Carroll about it, but he said his telegram had only reference to Glassington, and had no reference to me whatever. I protested against being placed in the Quarantine ground, as I considered that my health was in danger, and as a man who had been on board the same ship with me had been put outside, I thought it was an indignity to me and that it jeopardised my life to put me inside.

Mr.  
W. Benson.  
17 Nov., 1881.

2949. To whom did you make that protest? To Mr. Carroll in the boat at the time, before we landed; he said he had no alternative, and that his instructions were to land me there. I was taken up to the store, provided with a coir bed, a mattress, and three blankets; some provisions were given to me, and I was marched up to the police camp, where I remained in strict compliance with all Quarantine regulations until the day I was liberated.

2950. When was that? I was liberated on the 27th August, by the orders of the Colonial Treasurer, to whom I had telegraphed a week previously.

2951. *Captain Hixson.*] How long were you there? I was fifty-seven days at the Quarantine station, after having been six days doing duty on board the "Ocean." I was living with two senior constables and the telegraph operator; I slept in the same room with them.

2952. Do you happen to know on what day Glassington was liberated? On the same day that I was. He came up in the same steamer.

2953. Then what was the difference between your treatment and his;—was he not in Quarantine as well as you? He was not inside the Quarantine boundary.

2954. Was he allowed his liberty? No.

2955. Then the difference between you was this: You were in the police camp and he was living with Mr. Carroll's boatmen? He had a tent; I think he was living by himself.

2956. *President.*] Will you tell us what causes of complaint you had during the time that you were on the ground? I had to go down to the beach every day to get my provisions, and had to go in very close proximity to the hospital-ship "Faraway," which was about 160 yards off. The police constables as a matter of kindness cooked for me, which they had no right to do, but I had to go down to the beach every day in close proximity to where there were small-pox patients, and where they were burning clothes. I did not like it and did not feel very comfortable over it; I was not timid, but I felt that I was in a wrong position.

2957. You thought you were running an unnecessary risk? I did, and in fact I kept myself aloof from everyone as much as I could, so much so that I was considered unsocial, but I did it for protective purposes.

2958. Was any reason given for your long detention on the Quarantine ground? Dr. Caffyn said he had strict instructions from the authorities to vaccinate everyone on the ground. I told him I had been vaccinated three times before, and I refused as there was no law to make it compulsory, and I did not think it was necessary. I also telegraphed to the Health Officer to the same effect, and stated that I would only submit as a matter of discipline.

2959. And you attribute your long detention there to your refusal to be vaccinated? I thought it had a great deal to do with it.

2960. *Dr. MacLaurin.*] Did Glassington also refuse to be re-vaccinated? He was vaccinated before he left Sydney, I believe.

2961. Was he detained as long as you were? Yes, he left the same time that I did. He was not under the same restrictions.

2962. But if you, who refused to be vaccinated, and he who had been vaccinated, were kept there the same time, is it likely that that had anything to do with it? I was told so, and I was told that I should be kept there for an indefinite time if I refused to be vaccinated.

2963. *President.*] Who told you that? Dr. Caffyn.

2964. Were you well lodged. Had you a comfortable house to live in? The house was very comfortable; there was plenty of ventilation; the bedding was very rough; there was nothing but three blankets.

2965. Had you no sheets? No, Mr. Carroll said he had none.

2966. Did you not apply to Dr. Caffyn to get you some? I spoke very little to Dr. Caffyn.

2967. Why was that? I had my own private reasons. I thought that the least symptoms of illness on me would be diagnosed by Dr. Caffyn as small-pox, and then I should be put on board the "Faraway."

2968. *Dr. MacLaurin.*] And you kept away from him as much as you could? I saw him about once a day, but I was not on terms of social intimacy with him at all.

2969. *President.*] Were your provisions of good quality? They were the same as the police provisions, very rough; the bread was very bad and the meat was very coarse.

2970. Was there a sufficient supply of them? Oh yes, there was any quantity of them.

2971. Were you supplied with beer or spirits? No sir, I never required any stimulants all the time I was on the Quarantine ground. I had six tins of preserves, which Mr. Carroll gave me, and a little preserved milk.

2972. Is there any other subject of complaint which you wish to mention to the Commission? Dr. Caffyn told me he had strict orders to vaccinate everyone and threatened that if I did not submit he would use compulsion; he said it would be worse for me if I did not submit as it would detain me there for an unlimited time. My reply was that I did not consider myself a patient of his and I did not consider that I was in any way within the Quarantine regulations, and I thought it was a mistake my being placed in quarantine at all.

2973. Was there any case of small-pox on board the "Ocean" while you were there? No, there was not a single case on board of any disease whatever that I knew of.

2974. Were you provided with towels? No, I had towels of my own; I think Mr. Carroll gave me one that I asked for and I left it behind me. All my things were destroyed and my buttons, my watch and chain, and some coins that I had were put into carbolic acid. What I complain of most is that I was unjustly treated after doing my duty as a Customs official. Although the police were very kind it was an indignity for me to have to associate with these men and listen to their rough conversation. And not only that but these men were in daily communication with others who were infected. They had to go to the gate and take messages from persons inside the hospital enclosure. The grave-diggers too were not far off from me, only about twenty yards, and when any of them came near me I told him to keep as far off as he could.

2975. Did you ever represent this state of affairs to Dr. Caffyn? No, he knew how I was situated, but I begged Mr. Carroll as the Superintendent to apply to the Health Officer to get me released. He told me he had frequently represented my case; and at last after fifty-five days detention I telegraphed again to the Colonial Treasurer and begged him to release me, as I was still a healthy man, not knowing what day I might become a victim; he immediately replied that my case was under consideration and a week afterwards I was released.

2976. *Dr. MacLaurin.*] Did you ever ask Dr. Caffyn to remove you to a part of the ground where you would be less exposed to infection? I did not sir.

2977. *President.*] But you did ask Mr. Carroll? Yes, I asked him repeatedly to be allowed to go with Glassington and I believe if I had both Glassington and I would have been released in three or four days; but Mr. Carroll said he was acting under higher authority than his own and that he could not do it.

2978. But if that was your impression how do you account for Glassington being kept there so long? I cannot say, perhaps some persons higher in authority can tell you that.

2979. Was any opportunity afforded you of sending telegrams to your friends? Yes, I could have sent letters if I had wanted to send them. I was allowed to send telegrams, and I believe all I sent were forwarded.

2980. *Dr. MacLaurin.*] They were not altered in any way? No, there was no mutilation in any of my telegrams. I was offered an opportunity on one occasion if I wanted to correspond with any one in Sydney, and I know that not only one but numerous letters were sent, though not by officials, and I am not surprised that small-pox has disseminated through the city in the way it has.

2981. *President.*] What makes you think that? Well the letters alone would do that unless they were fumigated.

2982. Can you tell us how those letters were sent? I cannot say, but I know that numerous letters are sent.

2983. But you can surely account in some way for the way in which they are sent? If people will break the laws they can send letters; the persons who bring the patients down are in constant communication with Sydney; I do not say they take letters, but they can do so.

2984. Did you find Mr. Carroll at all times attentive and courteous in his manner to the people on the ground? To me he was always civil, and anything I asked for, such as tobacco, matches, or jam, or any little thing of that kind, he was always willing to give, and was very courteous to me.

2985. Have you any complaint to make of the conduct of any of the other officials on the ground? No, it is not a complaint I am making myself now, only I think that an injustice was done to me.

2986. Did you ever see any one drunk on the ground, either among the officials or the people in the healthy ground? I saw no one drunk, except once, but I know there was a large supply of drink sent there on different occasions.

Police constable Peter Robbins, sworn and examined:—

2987. *President.*] You were engaged for some time, were you not, in removing patients from their homes to the Woolloomooloo wharf? I was, sir.

2988. Do you consider that every care and consideration were shown for the comfort of the patients on the occasion of those removals? I do, on every occasion. I commenced on the 18th June with the removal of Mr. and Mrs. Guildford. I took them from their house at 4 o'clock in the afternoon and we got down to the wharf at 20 minutes past 4, and I was kept there with the 'bus and horses until 20 minutes to 8 o'clock before the boat came alongside. 'Twice I went to an hotel and got some brandy for Mr. Guildford; Mrs. Guildford would not take any.

2989. Did all the patients removed by you go voluntarily? They did, sir.

2990. You did not find any case of refusal? No; on the 9th July Mrs. Monahan went down in the 'bus and also Mrs. Fisher.

2991. Did you see them placed in the boat? Yes.

2992. Did any of them complain? There were complaints that the boat was half full of water; that was the boat that was towed behind the steamer.

2993. Were any blankets placed on the boat for the comfort of the patients? I did not see any.

2994. Did you hear any directions given to Mrs. Monahan to go in the boat, or to Mrs. Fisher? Yes.

2995. Who told them to go in the boat? I think it was Sub-inspector Mackay, or else one of the men belonging to the "Pinafore."

2996. Were you there when Verdich was taken down? Yes.

2997. Was any objection made to his going in the boat on that occasion? No, sir.

2998. What sort of weather was it when the Monahans went down? It was blowing stiffly.

2999. Was it raining? Yes. There were some blankets in the 'bus, and I offered them to Mrs. Monahan, but she refused them.

3000. You went down, I think you said, with the Guildfords? Yes.

3001. Did you see Mrs. Guildford put on board? I did.

3002. Did you hear Dr. Caffyn say to anyone, "Shove her under the seat"? No, sir, and I was standing within a yard or two of him; he ordered her to be put into the cabin with her husband.

3003. *Capt. Hixson.*] Was any roughness shown towards her? No; no one went near her, except her husband, from the time she left the house till she got on board.

3004. *President.*] Did you hear Mr. Guildford use any rough language towards Dr. Caffyn? No, he only spoke about being kept waiting so long, that was all.

3005. Do you think it is possible that such words as "Shove her under the seat" could have been used without your hearing them? I am certain they could not; I was nearer to Dr. Caffyn than either Mr. or Mrs. Guildford.

3006. Do you think the patients suffered from being kept waiting at the wharf? I believe Mrs. Guildford did; she appeared to be in a very weak and low condition, and the weather was very cold.

3007. *Capt. Hixson.*] Where was she during the time they had to wait? In the 'bus at the wharf.

3008. And I suppose she was made as comfortable as she could be in the 'bus? Yes, there were three blankets in the 'bus with her, I think.

3009. *President.*] Were you down at the wharf when Rout's body was taken down? No sir.

Mr.  
W. Benson.  
17 Nov., 1881.

Constable  
Robbins.  
17 Nov., 1881.

## APPENDIX E.

## QUARANTINE Regulations to be observed in the Harbour of Port Jackson, New South Wales.

1. There shall be three grades or classes of Quarantine which shall, as far as practicable, be comprised under the following heads, and the Health Officer or other person appointed for the purpose shall have the power, subject to the confirmation of the Governor General and Executive Council, to place any vessel (requiring the same), her crew, and passengers within any of the before-mentioned grades. And the course pointed out by the regulations applicable to each grade shall be carried out by the Superintendent of Quarantine, and shall also be adopted by the surgeon, master, officers, crew, and passengers of any vessel so placed in Quarantine.

(1st.) When virulent disease exists at the time of the arrival of the ship.

[Vessels placed in Quarantine under this clause will remain for an indefinite period, which will entirely depend on the continuance of disease and general health of the persons.]

(2nd.) When disease exists at the time of the arrival of the ship, which does not require a separation of the healthy from those diseased; or when there may not be any present existing disease, but from its recent occurrence precautionary measures are requisite for cleansing and purifying the vessel.

[Under this clause a vessel may be detained for a period not exceeding twenty-one days, unless fresh cases appear to render her longer detention necessary.]

(3rd.) When vessels may arrive from proclaimed ports or from places in which virulent disease has existed, but which has not made its appearance during the voyage.

[Under this clause vessels will not be detained for a period exceeding seven days, provided nothing which would render longer detention necessary occurs in the meantime, and that a satisfactory certificate is produced to the Superintendent of Quarantine, that all necessary measures for cleansing and purifying have been taken.]

*Regulations under the First Grade.*

2. On the arrival of the vessel at the usual anchorage in Spring Cove, the sick are immediately to be removed to the hospital-ship "Harmony," with such attendants only as may be requisite for the care of the patients.

3. If there shall be no surgeon in charge of the hospital-ship, the surgeon of the vessel must repair on board and remain in attendance on the sick.

4. Should there be no surgeon attached to the vessel one will be provided by the Government.

5. Should the surgeon of the vessel repair on board the hospital-ship in charge of the sick, a surgeon will be provided, if necessary, to take charge of those who may be free from disease, who will be located on the healthy ground.

6. As soon therefore as this surgeon shall have been appointed, or in the event of such appointment being unnecessary in consequence of the surgeon of the vessel not requiring to proceed on board the hospital-ship in charge of the sick, the healthy people shall be landed and shall occupy the buildings appropriated for their accommodation, the single females being placed in charge of the matron in the buildings situated on the Point, the married persons and the single males occupying the other buildings situated in the centre of the ground.

7. As soon as the passengers shall have been removed from the vessel, the master shall cause all the bed-fittings to be taken down and removed to the shore for the purpose of being cleansed, the tween decks to be washed with lime or other disinfecting agent, and every possible ventilation given to the hold and decks of the vessel by the use of swing stoves, &c., until a general purification of the ship shall have been made.

8. The crew and cabin passengers may, if healthy, remain on board the vessel, but in the event of the sickness of any one of them, he or she is at once to be conveyed on board the hospital-ship.

9. The clothes of all the cabin passengers, officers, and crew of the vessel must be landed and carefully cleansed, under the inspection of the Medical Officer, and the beds and bedding used during the voyage must be burned, the value thereof being first assessed by the Superintendent of the Station and the surgeon, or some officer of the vessel.

*Regulations under the Second Grade.*

10. On the arrival of the vessel at the usual anchorage the master shall cause the whole of the passengers with their luggage to be landed, and the people shall be placed in the buildings appropriated for their accommodation, separating the single females from the other persons, in the manner pointed out in clause 6.

11. The same course is to be pursued with reference to the cleansing and ventilating the vessel, and also in regard to the destruction of the beds and cleansing of the apparel, as is provided for in the preceding Regulations in respect to the first grade.

*Regulations under the Third Grade.*

12. On the arrival of the vessel at the usual anchorage, the master shall cause all the wearing apparel and beds belonging to the officers, passengers, and crew to be landed and cleansed. He will also see that the vessel is cleansed and fumigated.

13. In this case it will not be necessary for the passengers to occupy the buildings, as they can return on board the vessel each night; neither will it be requisite for the bed places to be taken down, or the beds and bedding destroyed.

*Hospital*

*Hospital-Ship.*

14. The surgeon in charge of the hospital-ship shall cause the patients labouring under different descriptions of disease to be placed in separate wards as far as practicable.
15. Whenever a patient is sent from the shore or from a vessel to the hospital-ship, he will be immediately examined and placed in the ward allotted to the disease under which he labours, his person being previously cleansed and his clothes changed.
16. The surgeon will appoint wardsmen and nurses, who may be allowed to come on board with the patients for that purpose.
17. He will see that order and cleanliness is observed by the patients and attendants.
18. He will not allow any communication to be made by any on board with any one outside the vessel.
19. He will cause morality to be observed on board.
20. The Superintendent of Quarantine will communicate with him twice in each day, morning and afternoon, when it will be expected that he will have his requisition prepared for any article he may require, as also his report to the Health Officer of the state of the patients.
21. He will take care to have a day's provisions always in advance, in case of a difficulty existing in the way of communicating with Sydney.
22. He will be responsible that all articles drawn for him from the stores are returned or satisfactorily accounted for.
23. Should he require to communicate with the Superintendent at any other time he will have the ship's bell rung as a signal.
24. He will keep a regular diary or log book, which must be written up daily.
25. Besides his daily journal or log, the surgeon will keep a medical register, to contain a detailed history of every case of disease, with the treatment employed, and a daily entry of the diet and extras prescribed.
26. On the admission of each patient his case is to be entered in this register, which is to be daily written up. Each subsequent report should refer to the symptoms of the preceding day, and the action of the remedies prescribed should be specially noted.
27. He will make a daily return in the form attached to these Regulations of the state of all the cases under his charge.
28. The surgeon will regularly visit the wards twice a day—in the morning at 8 o'clock in the summer, and at 9 o'clock in the winter; and in the evening between 8 and 9 o'clock, throughout the year; at which hours the patients are to be prescribed for, the prescriptions being written with ink in the "Daily Prescription Book" by the bedside of the patient.
29. He will make a requisition in a form that will be provided for him of all his requirements for the sick under his charge, either on account of medicines, medical comforts, fruit, or any other necessary, which requisition he will be required to have in readiness for the morning visit of the Superintendent of Quarantine.
30. Wines or spirits, if indispensably necessary in any case, may be administered under the vigilant superintendence of the medical officer, who will be held responsible for the due custody of these, as well as of all other articles in store, such as tea, sugar, &c.
31. He will see that the hospital clothing is carefully washed, and that no dirty or soiled clothes, particularly those belonging to deceased persons, are allowed to remain longer than may be absolutely necessary before being cleansed.
32. The wards are to be ventilated according to the state of the weather and the diseases of the patients; for this duty the surgeon is responsible—injudicious ventilation being hurtful.
33. The custom of washing floors and covering them with sand is positively forbidden. Dry rubbing with a brush mounted on a heavy block is to be substituted. The floors are never to be washed unless under the special direction of the medical officer. The sides of the ward may, however, be cleansed with soap and water.
34. The wards, whenever the surgeon may think necessary, are to be fumigated.
35. There shall be a clear space of 3 feet on either side of each bedstead.
36. Persons dying on board the hospital ship must be removed at daylight each morning to the Quarantine ground, and notice must be given to the Superintendent whenever a death takes place, so that persons may be warned not to interrupt the funeral party on the way to the burial-ground.
37. The surgeon will take care that no wilful destruction of the Government property takes place on board the hospital-ship, and that the foregoing regulations are strictly adhered to.
38. He will report the name of any person committing a breach of any of them.

*Duties of Wardsmen and Nurses.*

39. They are to take charge of the bedding and utensils, and other hospital stores, for which they are responsible to the surgeon, who is responsible to the Government for any damage or loss.
40. To take charge of and be responsible for the wearing apparel or other property of every patient admitted to the hospital.
41. To ticket the boxes or parcels thereof, and to prevent the patients having access to them without their permission.
42. To superintend the cleansing of the wards early every morning, and oftener when necessary, taking care that every nuisance be removed as soon as possible.
43. To see that every patient has his, or her, face and hands washed, and hair combed, and that they are otherwise properly cleansed, before the surgeon visits the hospital; that those patients who are able to sit up, fold up their beds every morning by 6 o'clock in the summer, and by 8 in winter; that they separate the bedding and air it every day for two hours in fine weather; and that they render every assistance to their sick companions, which the attending medical officer may think compatible with their state of health. By due attention to this rule a small number of sick attendants will suffice to afford every attention to the patients.
44. To go round at the hours fixed by the surgeon for administering medicine and nourishment.
45. To see that the patients punctually receive the same.

46. To see that order and regularity are preserved, and that no patient leaves his ward who has not received the surgeon's permission to do so.

47. As quietness is indispensable in hospitals, every duty should be performed with the least possible noise, more especially at night.

48. Every patient must be in bed by 8 o'clock in winter and by 9 in summer; and no conversation must be permitted after that time.

*Healthy Ground.*

49. Persons landed under the first or second grade of Quarantine Regulations will occupy the buildings as follows:—

Married men and their families—the houses situated in the centre ground.

Single men—in the same buildings if there is sufficient room; otherwise in tents on the open ground in front of the buildings.

Single females—will occupy the buildings on the Point, and the matron the small building overlooking those occupied by the single females.

50. The surgeon will direct the constables to enforce the same discipline as has been carried out on board the ship during the voyage.

51. He will make an inspection of the persons entrusted to his charge twice a day, taking care that, in calling over the roll, any person absenting himself is reported to the Superintendent.

52. At his daily examination he will carefully examine any person complaining, and, if he shall deem it advisable, remove him to the convalescent hospital, with a view of ascertaining whether such person may be afflicted with the prevailing epidemic. If he find such to be the case he will cause his removal to the hospital-ship.

53. He will make a daily requisition for provisions, and other necessaries for the use of the people; taking care that he is always provided with sufficient for one day in advance, in case of communication not being had with Sydney.

54. He will cause the rations to be served out daily at 7 a.m.

55. He will appoint persons to cook the meals, in the absence of the cook and cook's assistant who acted on the voyage.

56. He will see that the meals are cooked in a proper way, and that they are served at regular hours.

57. On receipt of the rations from Sydney, he will cause them to be divided, sending a proper quantity to the matron in the single females' ground for the use of herself and those under her charge, and removing the remainder to the store-room appointed for that purpose, to be ready for issue on the next morning.

58. He will see that, as soon as possible, all the clothes that have been worn, and those remaining in the boxes of the persons detained on the ground, are properly cleansed and washed, and repacked in the boxes after having been duly inspected by him.

59. He will be responsible that the matron makes an inspection, each day, of the persons entrusted to her charge, and that the female apartments are carefully locked before he retires to rest for the night.

60. He will in like manner be responsible that the cleansing of the clothes belonging to the single girls is carried out with the same strictness as is required in the centre ground.

61. He will not allow any communication to take place between the single women and the other immigrants.

62. He will caution the persons entrusted to his care not to stray beyond the boundaries of the ground appropriated to their use, which are marked by white stones.

63. He will allow no riotous conduct, quarrelling, or fighting, to take place, and he will report, for the information of the Superintendent, the names of any persons so offending.

64. He will not allow any wilful destruction of property, or any damage to be done to any of the buildings, and he will report the names of those persons who may so offend.

65. He will occupy the small building appropriated for his use, overlooking the buildings occupied by the persons under his charge.

66. He will make a daily report to the Health Officer, in the form appended to these regulations, and he will be careful to mention what cases are under his supervision in the convalescent hospital.

67. He will permit no communication whatever between the persons under his charge and their friends, unless in the presence or with the authority of the Superintendent of Quarantine.

68. He will make frequent visits to the vessel from which the people have been landed, and see that the ship is being cleansed and fumigated in a satisfactory manner, and that the persons remaining on board are not affected with the prevailing epidemic.

69. As soon as he shall receive an order for the embarkation of the people, he shall see that all the beds and bedding are destroyed, with the exception of those articles of bedding which may have been carefully washed under his inspection.

70. Before the embarkation of the persons entrusted to his charge, he will cause the whole of the buildings to be carefully cleansed and whitewashed, to the satisfaction of the Superintendent.

71. He will be called upon to give a receipt for any articles he may have drawn from the Superintendent, and as he will be held answerable for the due return of them, he must, before leaving, obtain a satisfactory certificate to that effect from the Superintendent, or account for the deficiency that may exist.

*Regulations for vessels which may arrive from places in which disease is prevalent, but which has not made its appearance during the voyage.*

72. Passengers landed under the third grade will be required to land their baggage and bedding, and commence washing every article, to the satisfaction of the surgeon, if there shall be one belonging to the ship on the ground, or in the absence of any one so appointed, to the satisfaction of the Superintendent of Quarantine.

73. They will not, except under a special order, be permitted to occupy the buildings, but will return at night to their vessel.

74. They must not stray beyond the marked boundaries of the ground.

75. They must not hold communication with any one from the shore, unless in the presence and with the permission of the Superintendent.

*General*

*General Regulations.*

76. The boundaries of the Quarantine ground are distinguished as follows :—Those on the shore by white stone pillars, and those on the water by a line bearing N. 20° W. from the Flagstaff situated on the Rocky Point facing the southern boundary of Spring Cove, to the Rocky point facing the northern boundary of Little Manly Beach ; and also all that portion of the North Head bounded by the entrance to Port Jackson, situated between the Flagstaff Point and the *Obelisk*.

77. Any person found wilfully damaging any of the buildings, fences, or any other portion of the Government property, shall be liable to a penalty not exceeding £20.

78. The management of the Quarantine ground, and the disposal of the people subjected to the performance of quarantine, shall be vested in the Immigration Agent and Health Officer, subject to a reference to the Immigration Board in any case of difference of opinion.

79. Upon ordering a vessel into quarantine, the Health Officer shall give a notice, in duplicate, to the master of the vessel, in the form attached herunto, stating the grade or description of quarantine in which he has placed such vessel ; and unless the order of the Health Officer is cancelled by the Governor and Executive Council, the vessel, officers, crew, and her passengers shall be subject to the regulations applicable to such grade of quarantine, and the superintendent, master, crew, and passengers shall be bound to obey, and be held liable for any breach of the regulations so applicable as aforesaid, under a penalty, in each case, not exceeding £20.

80. The master of any vessel detained in quarantine shall cause a yellow flag of not less than six breadths of bunting to be hoisted at the main-top-mast head, which flag shall be kept flying between the hours of sunrise and sunset, but between the hours of sunset and sunrise a lantern shall be hoisted in the same place, and a light shall be kept burning until sunrise, under a penalty not exceeding £20.

81. The master of any vessel placed in quarantine shall warn all boats attempting to approach the vessel to keep off, and shall take care that no person holds communication with the passengers or crew of the vessel, except in the presence of and with the permission of the Superintendent of Quarantine, under a penalty not exceeding £20.

82. The master of any vessel placed in quarantine shall, as soon as practicable, deliver to the Superintendent of Quarantine his mails, under a penalty not exceeding £20.

83. Boats from vessels in quarantine shall go direct from the vessel to which they belong to the place appointed for them to land, and on their return they shall go direct to the ship. They shall not be allowed to pull about the harbour in any other direction, under a penalty not exceeding £20.

84. Should more than one vessel be placed in quarantine at the same time, the people of one vessel shall not be allowed to communicate with those of another, but they shall be restricted to the boundaries which shall have been allotted to each of them, under a penalty not exceeding £20.

85. Persons in quarantine must not communicate personally with any one from Sydney or elsewhere, except with the permission and in the presence of the Superintendent, under a penalty not exceeding £20.

86. Persons wishing to visit their friends in quarantine must, on their arrival at Spring Cove, report themselves to the sentry stationed on the nearest point ; or, in the absence of a guard, to the Superintendent, who will afford them every facility for seeing and communicating with their friends : but they must, on no pretence, attempt to hold communication with those in quarantine except in the presence of the Superintendent, under a penalty not exceeding £20. And anyone not already in quarantine who may pass within the boundaries will be detained in quarantine, and the circumstances reported to His Excellency the Governor General.

87. The hospital ship is not to be approached by anyone except in the presence and with the permission of the Superintendent, under a penalty not exceeding £20.

88. The Superintendent shall make a periodical visit every night and morning to the hospital ship, to any vessel detained, and also the boundaries of communication in the convalescent ground, for the purpose of receiving the several reports and requisitions of the persons in charge.

89. He shall attend at all other times in the event of signals for that purpose being made.

90. On the arrival of any vessel at the quarantine ground the Superintendent shall request the master to deliver to him the notice addressed to the Superintendent of Quarantine given to him by the Health Officer, which document shall be a sufficient authority for the Superintendent of Quarantine to carry out all the regulations applicable to the grade mentioned in said notice, without further instructions from the Government.

91. The Health Officer will report to the Government the course taken by him in respect to each vessel so detained.

92. The Superintendent of Quarantine shall not permit any spirits or other strong liquors to be landed at the quarantine ground, or taken on board the hospital-ship, except with the concurrence of the Health Officer.

93. On the arrival of a vessel at the quarantine ground, the Superintendent shall cause a copy of these regulations to be put on board, and also a copy of the several Acts of Council applicable to the performance of quarantine.

94. The Superintendent shall give notice to all persons in quarantine that any letters which they may wish to send to their friends must be delivered to him before noon of each day, or they will not be sent until the following day.

95. The Superintendent shall keep a regular diary, in which the occurrences of each day shall be carefully noticed.

96. He shall also keep a register of the deaths that may take place in the form herewith appended.

97. No release from quarantine will be granted until the master or medical officer shall give a certificate to the following effect, viz. :—That no new case of the prevailing epidemic, or of any other infectious or contagious disease, has occurred among the people under their charge since the one last reported, and that all the measures directed to be taken for the cleansing and purification of the vessel and her contents, and of the baggage and bedding of the passengers and crew, have been completed, and that the quarantine has been strictly kept.

*Form of Certificate to be given by the Surgeon in charge of Persons landed from the Ship at present in quarantine.*

I, \_\_\_\_\_, being the surgeon in charge of the persons now in quarantine, and previously landed from the ship \_\_\_\_\_, do certify that no new case of the prevailing epidemic or of any other infectious or contagious disease has occurred amongst the people now under my charge since the one last reported to me, and that all the measures directed by the regulations have been taken for cleansing and purifying the vessel and her contents, and also the wearing apparel of the crew and passengers; and that no communication has taken place between any other persons affected with disease and the persons under my charge; and that the quarantine regulations have been strictly upheld.

Spring Cove, \_\_\_\_\_ 18 \_\_\_\_\_ Surgeon in charge of the ship \_\_\_\_\_

Quarantine Station,  
Spring Cove, 18 .

THE following articles of medical comforts and other stores are required for the persons now under my charge :—

Names of articles.	Quantity now required.

Surgeon in charge of

To the Superintendent of Quarantine.

*Notice to the Master of the Ship.*

Sir,

You will immediately proceed, with all necessary despatch, with the vessel under your command to Spring Cove, and deliver the enclosed notice to the Superintendent of Quarantine whom you will find in charge there.

I am, Sir,  
Your obedient Servant,

Health Officer.

To the Master of the Ship

NOTICE REFERRED TO.

To the Superintendent of Quarantine at Spring Cove.

Sir,

I hereby give you notice that, subject to the approval of His Excellency the Governor General and the Executive Council, I have this day placed the ship \_\_\_\_\_, her officers, crew, and passengers in Quarantine, and this shall be sufficient authority for you to carry out the Regulations applicable to grade of your printed instructions.

I am, Sir,  
Your obedient Servant,

Health Officer.

Sydney Harbour,  
of \_\_\_\_\_, 185 .

No. XXIX.

An Act to Amend the Quarantine Laws in certain particulars. [Assented to, 24th October, 1853.]

**Preamble.** WHEREAS the laws relating to Quarantine require amendment, as hereinafter provided: Be it enacted by His Excellency the Governor of New South Wales, with the advice and consent of the Legislative Council thereof, as follows :—

Every Commander, Master, &c., of any vessel arriving from parts beyond seas truly to answer questions put to him by pilot, &c., as to health of crew and passengers.

I. Every Commander, Master, or other person having the charge of any vessel arriving at any Port in the said Colony, from parts beyond the seas, who shall neglect or refuse to give to the Pilot, Health Officer, or person boarding or conducting any such vessel as aforesaid, such written paper as is required by the fourth section of the Quarantine Act, passed in the third year of the Reign of His late Majesty King William the Fourth, or who shall deliver any such written paper as is required by the said enactments with any false statement contained therein, or who shall wilfully omit to make therein any statement required by the said Act, or who shall make any false answer to any such questions which may be put to him by such pilot or person boarding or conducting such vessel as aforesaid, shall be guilty of a misdemeanour, and shall on conviction be imprisoned, with or without hard labour, for any period not exceeding two years, or fined in any sum not exceeding three hundred pounds at the discretion of the Court or Judge before whom he shall be convicted.

and failing so to do to be deemed guilty of a misdemeanour.

Surgeon, dispenser, &c., truly to answer all such questions as to health of crew and passengers.

II. The surgeon, dispenser, or other medical officer of every such vessel, shall truly answer all such questions as shall be put to him by such pilot, health officer, or other person as aforesaid, touching the health of the crew and passengers of such vessel during the voyage, and the cause or causes of the death of any person who may have died on board, or of any of the passengers or crew who may have died on shore in the course of the voyage, and touching the existence of any infectious or contagious disease at any port or place from which such vessel shall have come, or at which it shall have touched.

and failing so to do to be deemed guilty of a misdemeanour.

III. Any such surgeon, dispenser, or other medical officer who shall refuse to answer such questions as shall be put to him, or shall make any false answer to any question put to him as aforesaid, shall be guilty of a misdemeanour, and shall on conviction be imprisoned, with or without hard labour, for any period not exceeding two years, or fined in any sum not exceeding three hundred pounds, at the discretion of the Court or Judge before whom he shall be convicted.

Words "person boarding any such vessel" to be held to apply to the health officer, &c.

IV. The words "person boarding any such vessel," as the same are used in the said in part recited Act, shall be held to apply to any health officer appointed by the said Governor, and to any other person appointed by the said Governor to board any vessel arriving in any port in the said Colony, whether such health officer or other person shall actually board such vessel or shall only go alongside the same, and demand such written paper, or put such questions as aforesaid, without such actual boarding.

V.

## APPENDIX.

V. The provisions of the seventh section of the Quarantine Act, passed in the third year of the reign of His Majesty King William the Fourth, shall be deemed to apply to all vessels and persons liable to perform quarantine, notwithstanding that no such proclamation as is mentioned in the sixth section of that Act shall have been issued. Amending provisions of 3 WILL. IV, No. 1, as to arrest of persons liable to perform quarantine.

VI. No vessel arriving in the Harbour of Port Jackson, from parts beyond the seas, except as provided by the next section hereof, in respect of vessels from the Australian Colonies, shall be brought higher up the Harbour than Pinchgut Island, nor shall any person whatsoever quit such vessel until the same shall have been boarded by the Health Officer, and admitted to pratique; and if any person shall offend against the provisions of this enactment, he shall, on conviction of such offence before any two Justices of the Peace, forfeit and pay any sum not exceeding one hundred pounds. Vessels not to pass Pinchgut Island, and persons not to quit vessels until boarded by Health Officer.

VII. The provisions contained in the last preceding clause shall not, nor shall the provision contained in the eighth section of the Harbour Act, passed in the seventh year of Her present Majesty's reign, requiring a blue flag to be hoisted and kept flying, apply to vessels arriving from any of the Australian Colonies, including New Zealand, unless at the time of the arrival of any such vessel, or within fourteen days previously thereto, there shall be or shall have been an infectious or contagious disease on board thereof; or unless a proclamation shall have been issued by the Governor, with the advice of the Executive Council, under the first section of the said recited Act, requiring in consequence of the existence of any infectious or contagious diseases in any one or more of the Australasian Colonies, that vessels arriving therefrom should be placed in Quarantine; in either of which cases the said provisions respectively shall apply to such vessels and to all persons on board thereof, in the same manner as to vessels not arriving from any of the Australian Colonies. Exemption of vessels arriving from any Australian Colony. Unless contagious or infectious disease on board at time of or shortly before arrival, or when Proclamation issued under 3 Will. IV, No. 1, s. 1.

VIII. No person shall with any boat whatever, other than the boat belonging to the Pilots, the Post Office, the Police, and the Customs, board or go alongside of any vessel arriving in the Harbour of Port Jackson from any place, other than those coming within the exemption contained in the last preceding clause, until such vessel shall have been boarded by the Health Officer, and the visiting flag shall have been hauled down; and no person other than a Pilot shall go on board such vessel from any Post Office, Police, or Customs boat which shall have gone alongside, until such time as aforesaid; and if any person shall offend against the provisions hereof, or if any master of a merchant vessel in harbour shall order, or permit, or suffer any of his boats or crew to board or go alongside any such vessel so arriving as aforesaid, for the purpose of communicating with the persons in any such vessel as last-mentioned, whilst the visiting flag shall continue to be flying at the mast thereof, every such master or other person shall for every such offence, on conviction thereof before any two Justices of the Peace, forfeit and pay a sum not exceeding fifty pounds. Prohibiting boats from communicating with vessels until visited by Health Officer.

IX. In case it shall be deemed necessary by the Governor, with the advice of his Executive Council, to appoint any Medical Officer to take charge of any of the crew and passengers of a vessel placed in Quarantine, it shall be competent to the said Governor, with such advice, to fix the amount of remuneration to be paid to such Medical Officer for his services, and to cause the same to be paid by the Colonial Treasurer; and the amount so paid shall be repaid to the said Colonial Treasurer, by the owners or agents of such vessel, before she shall be permitted to clear out and leave the port in which she shall then be: Provided that this enactment shall not apply to any vessel chartered by the Government for the conveyance of immigrants. Medical Officer may be appointed for persons in Quarantine at the cost of the owners of vessel.

X. It shall be the duty of the owners and agents of any vessel placed in Quarantine to supply the crew and passengers thereof with such wholesome and suitable provisions and medicines as shall be required by the Medical Practitioner in charge; and if such provisions and medicines are not forthwith supplied accordingly, the same may be provided under the order of the Governor, and the cost thereof, including the conveyance of the same, shall be paid by the said owners or agents into the hands of the Colonial Treasurer, before such vessel shall be permitted to clear out or leave the port in which she shall then be: Provided that nothing herein contained shall apply to or in respect of Immigrants conveyed at the charge of the Government, under Charters by which the owners are exempted from liability for the maintenance and care of such Immigrants whilst under Quarantine. Proper provisions and medicines to be supplied for persons in Quarantine.

XI. It shall be lawful for the Governor, with the advice of the Executive Council, to make such Rules and Regulations as to His Excellency and the said Council shall seem meet for observance by the Masters, officers, and crews of vessels in Quarantine, and by the passengers and all other persons whomsoever, whilst performing Quarantine on board such vessels or on shore; and by such Rules and Regulations to impose such fines or penalties not exceeding twenty pounds, in any case, as the said Governor and Executive Council shall think fit; and all such fines and penalties shall be recoverable before any two Justices of the Peace, at any time within two months after the offenders shall have been released from Quarantine. Governor and Executive Council to make regulations for observance by persons in Quarantine.

XII. A copy of this Act, and of the said recited Act, and of the Act for amending the same, passed in the fifth year of Her present Majesty's reign, shall be given by the Pilot or person boarding any such vessel to the master thereof, immediately on her arrival in any such port. Copy of this Act and of 3 Will. IV, No. 1, and of 5 Vic., No. 12, to be given to Master on arrival.

Passed the Legislative Council, this fifth day of October, one thousand eight hundred and fifty-three,—

CHARLES NICHOLSON,  
Speaker.

WM. MACPHERSON,  
Clerk of the Council.

In the name and on behalf of Her Majesty I assent to this Act.

CHAS. A. FITZROY,  
Governor General.

Government House, Sydney, 24 October, 1853.

ANNO TERTIO GULIELMI QUARTI REGIS.  
(No. 1.)

By His Excellency Major-General RICHARD BOURKE, Captain-General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, with the advice of the Legislative Council.

An Act for subjecting Vessels coming to New South Wales, from certain places, to the performance of Quarantine.

WHEREAS it is expedient that Regulations should be made to prevent the introduction of the disease called the Malignant Cholera, or any other infectious disease, highly dangerous to the health of His Majesty's subjects,

subjects, into the Colony of New South Wales: Be it therefore enacted, by His Excellency the Governor of New South Wales, with the advice of the Legislative Council of the same, That as often as the Governor of New South Wales for the time being, with the advice of the Executive Council, shall by Proclamation notify that any place or places beyond the seas is or are infected with the Cholera, or other such infectious disease as aforesaid, and that it is probable such disease may be brought from such place or places to the said Colony, then and immediately from and after such notification, all ships and vessels whatever arriving from, or having touched at, any such place or places; and all vessels and boats receiving any person, goods, wares, and merchandise, packets, packages, baggage, wearing apparel, books, letters, or any other articles whatsoever, from or out of any vessel so coming from, or having touched at, such infected place or places as aforesaid, whether such persons, goods, wares, and merchandise, packets, packages, baggage, wearing apparel, books, letters, or other articles, shall have come or been brought in such vessels; or such person shall have gone, or articles have been put on board the same, either before or after the arrival of such vessels at any port or place in the Colony of New South Wales, and whether such vessels were or were not bound to any port or place in New South Wales; and all persons, goods, wares, and merchandize, packets, packages, baggage, wearing apparel, books, letters, or any other article whatsoever, on board of any vessel so coming from, or having touched at, such infected place as aforesaid, or on board of any such receiving vessels or boats as aforesaid, shall be, and be considered to be, liable to quarantine within the meaning of this Act, and of any order made by the Governor, with the advice of the Executive Council, and notified by proclamation, concerning quarantine, and the prevention of infection from the time of the departure of such vessels from such infected place as aforesaid, or from the time such persons, goods, wares, merchandize, packets, packages, baggage, wearing apparel, books, letters, or other articles, shall have been received on board respectively; and all such vessels and boats as aforesaid, and all persons (as well pilots as others), goods, wares, and merchandize, and all other articles as aforesaid, whether coming or brought in such vessels or boats from such infected place as aforesaid, or going or being put on board the same, either before or after the arrival of such vessels or boats at any port or place in New South Wales, and all persons, goods, wares, and merchandize, and other articles as aforesaid, on board such receiving vessel or boat as aforesaid, shall, upon their arrival at any such port or place, be obliged to perform quarantine, in such place or places, for such time and in such manner as shall be from time to time directed by the Governor for the time being, by any such order made, with the advice of the Executive Council, and notified by proclamation as aforesaid; and that until such vessels and boats, persons, goods, wares, and merchandize, or other articles as aforesaid, or any of them, shall have respectively performed, and shall be duly discharged from quarantine, no such person, goods, wares, or merchandize, or other articles as aforesaid, or any of them, shall, either before or after the arrival of such vessels or boats at any port or place in New South Wales, come or be brought on shore, or go or be put on board any other vessel or boat, in order to come or be brought on shore in any such port or place (unless in such manner, and in such cases, and by such license, as shall be directed or permitted by any such order as aforesaid); and all such vessels and boats, whether coming from such infected place as aforesaid, or being otherwise liable to quarantine as aforesaid; and all persons (as well pilots as others), goods, wares, and merchandize, and other articles as aforesaid, whether coming or brought in such vessels or boats, or going or being put on board the same, either before or after the arrival of such vessels or boats at any port or place in New South Wales; and all commanders, masters, or other persons having the charge or command of any such vessels or boats, whether coming from any infected place, or being otherwise liable to quarantine as aforesaid, shall be subject to all the provisions, rules, regulations, and restrictions contained in this Act, or in any order or orders which shall be made by the Governor, with the advice of the Executive Council as aforesaid, concerning quarantine, and prevention of infection, and to all the pains, penalties, forfeitures, and punishments contained in this Act or Ordinance for any breach or disobedience thereof, or of any order or orders of the Governor, with the advice of the Executive Council as aforesaid, made under the authority thereof.

II. And be it further enacted, that it shall be lawful for the Governor, with the advice of the Executive Council, to make such order as shall be deemed necessary and expedient upon any unforeseen emergency, or in any particular case or cases, with respect to any vessel arriving and having any such infectious disease on board, or on board of which any such infectious disease may have appeared in the course of the voyage, or arriving under any other alarming or suspicious circumstances as to infection, although such vessels shall not have arrived from any place from which the Governor, with the advice of the Executive Council, may have adjudged and declared it probable that any such infectious disease may be brought, and also with respect to persons, goods, wares, and merchandize, and other articles as aforesaid on board the same; and in case of any such infectious disease appearing or breaking out in the Colony of New South Wales or its dependencies, to make such orders and give such directions in order to cut off all communication between any persons infected with any such disease and the rest of His Majesty's subjects as shall appear to the said Governor and the said Council to be necessary and expedient for that purpose; and likewise to make such orders as the said Governor, with the advice of the said Council, shall see fit for shortening the time of quarantine, to be performed by particular vessels, or particular persons, goods, wares, merchandize, or any other articles, or for absolutely or conditionally releasing them or any of them from quarantine; and all such orders so made as aforesaid shall be as good, valid, and effectual, to all intents and purposes, as well with respect to the commander, master, or other person having charge of any vessel, and all other persons on board the same, as with respect to any other persons having any intercourse or communication with them, and to the penalties, forfeitures, and punishments to which they may respectively become liable, as any order or orders concerning quarantine made by the Governor, with the advice of the Executive Council, and notified by proclamation as aforesaid.

III. And be it further enacted, that it shall and may be lawful for the Governor, with the advice of the Executive Council, from time to time as he may think fit and expedient, by any order or orders, notified by proclamation, to appoint certain stations or places within the harbour of Port Jackson, or within or near any other harbour or place within the said Colony, for the performance of quarantine under this Act or Ordinance, where all vessels liable to quarantine, and the crews, passengers, and persons on board thereof shall perform the same; and also, if necessary, to appoint lazarets and other places, where the crews, passengers, and other persons, and the goods, wares, merchandize, which shall or may be on board the said vessels, shall and may be detained and kept for the performance of quarantine.

IV. And be it further enacted, that from and after the passing of this Ordinance, every commander, master, or other person having the charge of any vessel coming from ports beyond the seas, shall give the pilot or person boarding or conducting any such vessel a written paper, containing a true account of the names of the place and country at which such vessel shall have loaded, and also of the places at which any such vessel shall have touched on the voyage out of the said Colony; and shall truly answer all such questions as shall be put to him by such pilot or other person touching the health of the crew and passengers of such vessel during the voyage, and the cause or causes of the death of any person or persons, should such have taken place on board, on pain of forfeiting the sum of one hundred pounds for any neglect or refusal to give any such paper, or for any false representation or wilful omission therein, or false answer to such questions; and if such vessel shall have arrived or come from any place which shall be notified by any proclamation or order of the Governor, with the advice of the Executive Council, as being infected as aforesaid, such pilot shall immediately give notice thereof to the commander or other person in charge of such vessel, on pain of forfeiting the sum of one hundred pounds for any neglect therein; and such commander or other person shall, immediately after such notice, hoist a signal to denote that such vessel is liable to the performance of quarantine; which signal shall be, in the day-time, a yellow flag of six breadths of bunting at the main-top-mast head, and, in the night-time, the signal shall be a large signal lanthorn, such as is commonly used on board His Majesty's ships of war, at the same mast head; and such commander, master, or other person, shall keep such signal hoisted until such time as the said vessel shall be legally discharged from the performance of quarantine; and on failure thereof such commander, master, or other person having the charge of such vessel, shall forfeit and pay for every such offence the sum of one hundred pounds; and in case any pilot shall bring, or cause to be brought or conducted, any vessel liable to the performance of quarantine, into any place which is not or shall not be specially appointed for the reception of vessels so liable, after receiving such paper as aforesaid, whereby it shall have been made to appear that such vessel was liable to the performance of quarantine, or without requiring and receiving such paper as aforesaid, unless compelled thereto by stress of weather, adverse winds, or accidents of the sea, such pilots shall, for every such offence, forfeit and pay the sum of two hundred pounds.

V. And be it further enacted, That every commander, master, or other person having charge of any vessel which shall be liable to perform quarantine as aforesaid, shall forthwith after his arrival at the place appointed for the performance of quarantine, deliver on demand to the Superintendent of Quarantine, or his assistant, or other officer authorized to act in that behalf (and which superintendent, assistant, or other officer as aforesaid, is hereby required to make such demand) his bill of health and manifest, together with his log-book and journal, under pain of forfeiting the sum of one hundred pounds if he shall wilfully refuse or neglect to do so.

VI. And be it further enacted, That if any commander, master, or other person, being in charge of any vessel liable to perform quarantine, shall himself quit, or shall knowingly permit or suffer any seamen or passenger or other person to quit such vessel by going on shore, or by going on board any other vessel or boat before such quarantine shall be fully performed (unless by such license as shall be granted by virtue of any orders made by the Governor, with the advice of the Executive Council as aforesaid), or in case any commander or other person having charge of such ship, shall not, within a convenient time after due notice given for that purpose, cause such vessel, and the lading thereof, to be conveyed in the place or places appointed for such vessel and lading to perform quarantine, then, and in every such case, every such commander, master, or other person as aforesaid, for every such offence shall forfeit and pay the sum of four hundred pounds; and if any such person coming in any such vessel liable to quarantine (or any pilot or other person going on board the same either before or after the arrival of such vessel at any port or place within the said colony), shall either before or after such arrival quit such vessel, unless by such license as aforesaid, by going on shore, or by going on board any other vessel or boat with intent to go on shore as aforesaid, before such vessel so liable to quarantine as aforesaid shall be regularly discharged from the performance thereof, it shall and may be lawful for any person whatsoever, by any kind of necessary force, to compel such pilot or other person so quitting such vessel so liable to quarantine, to return on board the same; and every such pilot or other person so quitting such vessel so liable to quarantine, shall, for every such offence, suffer imprisonment for the space of six months, and shall forfeit the sum of three hundred pounds.

VII. And be it further enacted, That it shall be lawful for any constable or other peace officer, or any other person, to seize and apprehend any person that shall, contrary to the provisions of this Act, have quitted or come on shore from any vessel liable to perform quarantine, or who shall have escaped from or quitted any vessel under quarantine, or from any lazaret, vessel, or place appointed in that behalf, for the purpose of carrying such person or persons before any Justice of the Peace.

And it shall be lawful for any such Justice of the Peace to grant his warrant for the apprehending and conveying of any such person to the vessel from which he or she shall have come on shore, or to any vessel performing quarantine, or lazaret from which he or she shall have escaped, or for confining any such person in any such place of safe custody (not being a public gaol) and under such restrictions as to having communication with any other persons as may in the discretion of any such Justice of the Peace appear to be proper, until such person can safely and securely be conveyed to some place appointed for the performance of quarantine, or until directions can be obtained from the Governor of the said Colony for the time being as to the disposal of any such person, and to make any further order that may be necessary in that behalf.

VIII. And whereas it may be necessary for the public security to prevent all communication whatever with stations or places appointed as hereinbefore directed for performing quarantine: Be it therefore further enacted, That it shall and may be lawful to and for the Governor of the said Colony, with the advice of the Executive Council, by order notified by proclamation, to prohibit all persons, vessels, and boats whatsoever, from going under any pretence whatsoever within the limits of any station which, by any order or orders of the Governor, with the advice of the Executive Council as aforesaid, has been or may be assigned for the performance of quarantine; and if any person whatsoever, after such notification of any such order or orders of the Governor, with the advice of the Executive Council, shall presume, under any pretence whatsoever, to go within the limits of any such station, he or she shall, for every such offence, forfeit and pay the sum of two hundred pounds.

IX. And be it further enacted, That if any officer or person whatsoever, to whom it shall appertain to execute any order or orders made or to be made concerning quarantine, and notified as aforesaid, or to

see

see the same put in execution, shall knowingly and wilfully be guilty of any breach or neglect of his duty in respect of the vessels, persons, goods, or chattels performing quarantine, every such officer or person so offending shall forfeit and pay the sum of two hundred pounds; and if any such officer shall desert from his duty when employed as aforesaid, or shall knowingly and willingly permit any person, vessel, goods, or merchandize to depart or be conveyed out of the said lazaret, vessel, or other place as aforesaid, unless by permission under the order of the Governor of the said Colony, with the advice of the Executive Council, or if any person whereby authorized and directed to give a certificate of a vessel having duly performed quarantine or airing, shall knowingly give a false certificate thereof, every such person so offending shall be guilty of felony; and if any such officer or person shall knowingly or wilfully damage any goods performing quarantine under his direction, he shall be liable to pay one hundred pounds damage and full costs of suit to the owner of the same.

X. And be it further enacted, That after quarantine shall have been duly performed by any vessel, person or persons, obliged to perform quarantine as aforesaid according to this law or ordinance, and to such order or orders made as aforesaid, the chief officer who superintended the quarantine of the said vessel, or person acting for him, shall, and he is hereby required to give a certificate thereof under his hand, and upon the same being approved and allowed by the Governor, with the advice of the Executive Council, then every such vessel, and all and every such person or persons so having performed quarantine, shall be liable to no further restraint or detention upon the same account for which such vessel, person, or persons shall have performed quarantine as aforesaid.

XI. And be it further enacted, That all goods, wares, and merchandize, and other articles liable to quarantine as aforesaid, shall be opened and aired, in such place or places, and for such time and in such manner as shall be directed by the Governor of the said Colony for the time being, with the advice of the Executive Council, by any such order or orders, to be made as aforesaid; and after such orders shall have been duly complied with, then, and in every such case, the officer or person in charge of the lazaret, or vessel, or other place in which the goods, wares, and merchandize, and all other articles shall have been opened and aired, shall grant a certificate to such effect under his hand; and upon the same being approved and allowed by the Governor, with the advice of the Executive Council, then such goods, wares, and merchandize, and other articles, shall be liable to no further restraint or detention either at the port or place where such quarantine shall have been performed, or at any other place within the said Colony and its Dependencies, whereto they may be afterwards conveyed.

XII. And be it further enacted, That if any person shall knowingly or wilfully forge or counterfeit, interline, erase, or alter, or procure to be forged or counterfeited, interlined, erased, or altered, any certificate directed or required to be granted by an order of the Governor of the said Colony for the time being, with the advice of the Executive Council, hereafter to be made touching quarantine, or shall publish any such forged or counterfeited, interlined, erased, or altered certificate, knowing the same to be forged or counterfeited, interlined, erased, or altered, or shall knowingly or wilfully utter and publish any such certificate with intent to obtain the effect of a true certificate to be given thereto, knowing the contents of such certificate to be false, he or she shall be guilty of felony.

XIII. And be it further enacted, That if any person shall land or unship, or shall move in order to the landing or unshipping thereof, any goods, wares, or merchandize, packets, packages, baggage, wearing apparel, books, letters, or other articles, from on board any vessel liable to perform quarantine as aforesaid, or shall knowingly receive the same after they have been so landed or unshipped, every such person shall forfeit and pay the sum of five hundred pounds; and if any person or person shall clandestinely convey, or secrete, or conceal, for the purpose of conveying any letters, goods, wares, or merchandize, or other article as aforesaid, from any vessel actually performing quarantine, or from the lazaret, or other place where such goods, wares, merchandize, or other articles as aforesaid, shall be performing quarantine, every such person so offending as last aforesaid, shall forfeit the sum of one hundred pounds.

XIV. And be it further enacted, That all forfeitures and penalties that shall be incurred by reason of any offence committed against this Act, shall and may be recovered by suit in the Supreme Court in this Colony, in which no assign or wager of law, or more than one imparlance shall be granted; and every such forfeiture and penalty shall belong and be given, two-thirds to the person who shall inform and sue for the same, and the remainder to His Majesty, his heirs, and successors.

XV. And be it further enacted, That in any prosecution, suit, or other proceeding against any person or persons whatsoever, for any offence against this Act, or any Act which may hereafter be passed concerning quarantine, or for any breach or disobedience of any order or orders which shall be made by the Governor of the said Colony for the time being, with the advice of the Executive Council, concerning quarantine and the prevention of infection, and notified as aforesaid, the statement or statements, answer or answers of the commander, master, or other person having charge of any vessel, made as hereinbefore, is directed to the pilot or person boarding or conducting such vessel, shall be given and received as evidence so far as the same relates or relate to the place from which such vessel shall arrive or come, or to the place or places at which such vessel touched in the course of the voyage, and that such vessel was liable to quarantine, unless satisfactory proof shall be produced by the defendant in any such prosecution, suit, or other proceeding; to show that the vessel did not arrive from or touch at any such place or places as is or are mentioned in the said statement or statements, answer or answers, or that such vessel, although directed to perform quarantine, was not liable to the performance thereof; and where any such vessel shall have in fact been put under quarantine at any port or place by the Superintendent of Quarantine or his assistant or other officer of the Customs authorized as aforesaid to act in that behalf, and shall actually be performing the same, such vessel shall in any prosecution, suit, or other proceeding against any person or persons whatever for any offence against this Act, or any other Act which may hereafter be passed concerning quarantine and the prevention of infection, or any order or orders which shall be made by the Governor of the said Colony for the time being, with the advice of the Executive Council as aforesaid, be deemed and taken to be liable to quarantine without proving in what manner or from what circumstances such vessel became liable to the performance thereof.

XVI. And be it further enacted, That if any action, suit, or other proceeding shall be brought or prosecuted against any pilot, superintendent, constable, or other person or persons for any matter or thing done since the twentieth day of this instant July, in pursuance of any order of the Governor of the said Colony made for preventing the introduction of any such infectious disease as aforesaid, or which shall at any time hereafter be done during the continuance of this Act or Ordinance, in pursuance of the provisions thereof,

thereof, the defendant or defendants in any such action, suit, or other proceeding, may plead the general issue, and may give this Act, and the special matter in evidence in any trial to be had thereupon, and if the verdict shall be for the defendant or defendants in any such action, suit, or other proceeding, or if the plaintiff or plaintiffs be non-suited, or discontinue his, her, or their action or suit after the defendant or defendants shall have appeared, or if upon demurrer judgment shall be given against such plaintiff or plaintiffs, the defendant or defendants shall have treble costs, and shall have the like remedy for the same as any other defendant or defendants hath or have in any other case to recover costs by law, and that no such action, suit, or other proceeding shall be brought against any person for any matter or thing done since the said twentieth day of July as aforesaid, or which shall hereafter be done in pursuance of this Act or Ordinance, but within the space of six months after such matter or thing shall have been done.

RICHARD BOURKE.

Passed the Legislative Council this twenty-eighth day of July, }  
one thousand eight hundred and twenty-two.

E. DEAS THOMSON,  
Clerk of the Council.

ANNO QUINTO  
VICTORIÆ REGINÆ.

No. 12

By His Excellency SIR GEORGE GIPPS, Knight, Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, with the advice of the Legislative Council.

An Act to amend an Act, intituled "An Act For subjecting vessels coming to New South Wales, from certain places, to the performance of Quarantine."

WHEREAS an Act was passed in the third year of the reign of His late Majesty King William the Fourth, intituled "An Act for subjecting vessels coming to New South Wales, from certain places, to the performance of quarantine;" and whereas it is expedient to amend the said recited Act in manner hereinafter mentioned: Be it therefore enacted, by His Excellency the Governor of New South Wales, with the advice of the Legislative Council thereof, That it shall be lawful for the health officers duly appointed for the harbours of Port Jackson and Port Phillip, respectively, to order any ship or vessel arriving in the said harbours, from parts beyond seas, into quarantine, provided there be at the time, or shall have been during the voyage, any infectious or contagious disease on board such ship or vessel; or provided such ship or vessel shall have touched at any port or place, during the voyage, where any such infectious or contagious disease shall have prevailed, or shall have communicated with any other ship or vessel on board which any such disease may have existed, in consequence of which danger may reasonably be apprehended to the public health, from the immediate admission of any such ship or vessel to entry: Provided that every such case be immediately reported by such Health Officer to His Excellency the Governor, at Sydney, or his honor the Superintendent, at Melbourne, as the case may be, in order that further measures may be taken, according to law, for the continuance of such ship or vessel in quarantine, or the release thereof, as may be judged expedient; and every such ship or vessel so placed in quarantine, with the contents thereof, and every person on board, whether any such person shall belong to, or have come as a passenger by such ship or vessel, or shall have gone on board the same after the arrival thereof in either of the said ports, shall be subject to the same laws, rules, and penalties, in all respects, as are in force with respect to ships, goods, or persons placed in quarantine, under the provisions of the said recited Act.

Preamble.  
3 William IV.,  
No. 1.

Power given to  
health officers at  
Port Jackson  
and Port Phillip  
to place vessels  
in quarantine.

II. And whereas it is expedient to vest in his honor the Superintendent of Port Phillip, or the chief officer resident in, and administering the Government of the said district, such and the like powers in respect to matters of quarantine, as are by the said recited Act vested in His Excellency the Governor of New South Wales, with the advice of the Executive Council thereof: Be it therefore enacted, That within the limits of the district of Port Phillip, the same powers and authority in respect to the performance of quarantine by any ships or vessels, persons, goods, wares, merchandise, packets, packages, baggage, wearing apparel, books, letters, or any other article or thing whatsoever, or in respect to the prevention of infectious or contagious disease prevailing on shore, in any part of the said district, shall be vested in his Honor the Superintendent of Port Phillip, or the chief officer resident in, and administering the Government of, the said district, as fully and effectually, and to all intents and purposes, as are now vested in His Excellency the Governor of New South Wales, with the advice of the Executive Council thereof, under the provisions of the said recited Act.

Certain powers  
vested in the  
Superintendent  
of Port Phillip.

GEORGE GIPPS,  
Governor.

Passed the Legislative Council, this fourteenth day of December, }  
one thousand eight hundred and forty-one.

WM. MACPHERSON,  
Clerk of Council.

## APPENDIX F.

MEMORANDUM of the quantities of Wines, Spirits, Beer, &c., delivered by Mr. James Kidman at the Quarantine Station, from 15th June to the 31st October, 1881 :—

26 $\frac{1}{2}$ dozen	Port Wine, quarts	650 dozen	Eggs
21 $\frac{1}{2}$ "	Sherry "	78 $\frac{1}{2}$ "	Jams
31 "	Hennessy's Brandy, quarts	122 "	Oranges
$\frac{1}{2}$ "	Krug Champagne, "	3 "	Lemons
2 "	Shiraz, "	3 "	tins Preserved Chicken
73 "	Foster's Ale, "	1 $\frac{1}{2}$ "	Ox Tongues
87 "	"Pig" Porter, "	1,601 lbs.	Bacon
2 $\frac{1}{2}$ "	Limejuice, "	48 "	Ham
12 "	Pickles	95 "	Cheese
5 "	Sardines	7 tins	Sheep Tongues
8 "	L. & P. Sauce	43 lbs.	Biscuits
14 lbs.	Lozenges	10 dressed	Fowls
1 $\frac{1}{2}$ dozen	tins Salmon	31 pecks	Green Peas.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES

---

SECOND REPORT

OF THE

ROYAL COMMISSION,

APPOINTED ON THE 13TH DAY OF SEPTEMBER, 1881, TO MAKE A FULL, DILIGENT,  
AND SEARCHING INQUIRY INTO THE MANAGEMENT OF THE  
ESTABLISHMENT KNOWN AS THE

QUARANTINE STATION AT THE NORTH HEAD,

AND THE

HULK "FARAWAY";

AND ON THE 20TH DAY OF DECEMBER, 1881,

TO INQUIRE INTO AND REPORT UPON THE GENERAL MANAGEMENT

OF THE

QUARANTINE STATION,

FROM 1 JANUARY, 1876, TO 1 JUNE, 1881;

TOGETHER WITH THE

MINUTES OF EVIDENCE

AND

APPENDIX.

---

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED.

30 August, 1882.

1882.

## REPORT.

To His Excellency the Right Honorable Lord AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, Knight, Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

We, Her Majesty's Commissioners, appointed by Letters Patent under the Great Seal of the Colony, dated the 13th day of September, 1881, to make a full, diligent, and searching inquiry into the management of the establishment known as the Quarantine Station at the North Head and the hulk "Faraway," having, on the 20th December, 1881, been commissioned to extend the scope of such inquiry so as to include the general management of the said establishment from 1st January, 1876, to 1st June, 1881, have the honor to submit to your Excellency our second Report:—

1. We have daily and continuously, by advertisement in the Sydney papers, invited evidence from the general public on the subject under inquiry, and only two witnesses have come forward, viz., Dr. C. H. Gibson (formerly Surgeon-Superintendent of immigrant ships arriving in this port), and Mr. W. G. Murray (representing the firm of Gibbs, Bright, & Co., of Sydney).

2. In submitting the evidence of these gentlemen to your Excellency, we do not consider it necessary to make any recommendations upon it, the suggestions which it embodies having apparently been largely anticipated by the action of the Government in their reorganization of the Quarantine Department.

Given under our hands and seals, this eighth day of March, 1882.

J. R. STREET. (L.S.)  
P. S. JONES, M.D. (L.S.)  
H. N. MACLAURIN, M.D. (L.S.)  
FRANCIS HIXSON. (L.S.)

Return of Quarantined Vessels from 1 January, 1876, to 1 June, 1881 .....	13
---	----

QUARANTINE COMMISSION.

MINUTES OF EVIDENCE.

FRIDAY, 10 FEBRUARY, 1882.

Present:—

DR. MACLAURIN,

DR. JONES.

CAPTAIN HIXSON IN THE CHAIR.

Charles Henry Gibson, Medical Practitioner, sworn and examined:—

1. *Chairman.*] You are a medical man, and have come to this Colony with several immigrant ships, I believe? Yes, four.

Dr. Gibson.

2. And you have had considerable experience at the Quarantine Station? Yes, about sixty days altogether.

10 Feb., 1882.

3. I presume that you come forward in response to an advertisement which appeared in the papers soliciting information on the subject? No, I have not seen the advertisement. I saw Mr. Street, the President of the Commission, and told him I should be glad to make a statement embodying my experience, and to answer any questions which he might like to put to me.

4. Will you be kind enough to make that statement now? In August, 1878, I arrived in Sydney in the ship "Smyrna" as Surgeon-Superintendent, in charge of about 460 immigrants. We had prior to our arrival several cases of scarlet and typhoid fever and diphtheria, and were consequently placed in quarantine. In the book handed to me there were certain printed regulations, but the Superintendent of the Quarantine Station informed me that many were in abeyance, and no suggestions were made by the authorities under which I could enforce what I considered effective and necessary quarantine, nor was I consulted as to the propriety of releasing the people from or continuing their detention. I found that at the station there was neither the means nor attempt to enforce the isolation of the sick from the convalescent. I inquired of the police, and was informed that they had no instructions to prevent this intermingling. While the ship was in quarantine, on Sundays, holidays, and indeed every day, boats were permitted to row round and come alongside the vessel, parcels and letters were sent on board, and the whole object of quarantine was thus prevented. During our detention I had to complain to the authorities of irregularities on the part of the contractor in sending the necessary provisions, and of deficiencies in quantities. My letters were so long unheeded that the people in actual anxiety and apprehension for themselves and their children, threatened to break all quarantine bounds to procure food, a fact which I intimated to the Agent for Immigration. The berthing arrangements in the Quarantine ground were inconsistent with decency—there were no blinds to the windows, no divisions in the rooms—men and women (that is of course amongst the married people) all sleeping in the same large compartment. There was absolutely no preparation whatever for the reception of quarantined people. There was neither disinfectant, soaps, candles, lanterns—no furniture (except bare bedsteads), no library, no means of appliances for their comfort or amusement. At last the ship was released by the health officer without consulting me as to whether it was prudent then to terminate the quarantine. Shortly afterwards the public Press reported scarlet fever at Orange, and attributed it entirely to the "Smyrna" immigrants. In June, 1880, I arrived in the ship "Camperdown" with about 400 immigrants, and the vessel was placed in quarantine, several cases of measles having occurred during the passage. Substantially the same state of things obtained throughout the period of our detention, but it is right to add that the steamship "Java" from China, with small-pox on board, was brought into Spring Cove and anchored to windward of the "Camperdown" and about a ship's length from us. Three days after this the "Camperdown" was removed to Watson's Bay (owing to the "Java" incident), and there the Sundays and holidays' visiting ensued, and the health officer's crew on more than one occasion came on board the ship and mixed with the people. Public attention was directed to this through the Press by Mr. Close, an intelligent immigrant. From Watson's Bay I had continually to make requisitions for medicines and medical comforts. These were not promptly complied with, and lives of patients were unnecessarily risked by the delay which in every aspect was inexcusable; and it certainly appeared from the attitude as well of the quarantine authorities as of the Agent for Immigration, that I was regarded as having other than the public interests, which alone I was bound to and did study. My requisitions were cavilled at, and only partially complied with, and the Agent for Immigration referred them to the health officer, and in one instance especially where I required a certain and moderate quantity of sugar a half only was sent, and the children really wanted all that was requisitioned—and I had actually to caution the Agent for Immigration that if any death occurred in consequence of the neglect to supply the necessary comforts I should advise a Coroner's enquiry. The day after I had called the attention of the medical officer to a case of scarlatina the health officer released the ship from quarantine without consulting me in any way whatever. Subsequently there was an attempt made by the Agent for Immigration to mix me up with some alleged breach of Quarantine regulations. I was informed that a Board would sit to conduct an enquiry, and I at once wrote to the Honorable the Colonial Secretary, begging that the scope of the proposed enquiry might be enlarged and embrace the whole quarantine and Immigration Regulations. From that day to this I have heard no more of the attempt to break regulations, and till now no inquiry has been held. So far I have dealt with my experiences, and now I beg permission to suggest:—1. That to ensure efficiency the quarantine must be strict and comprehensive—no intercourse whatever should be allowed with the ship while the people are on board, and directly they disembark the vessel should be well fumigated and disinfected. 2. On shore there should be proper accommodation to permit of the perfect isolation of sick from convalescent, and the buildings should be sufficient for the purpose

- Dr. Gibson. purpose, and police enforce observance of the regulations, which should be published and available to every person in quarantine. 3. The whole of the bedding of those who have been sick should invariably be destroyed—not used again. 4. The clothing should be passed through a hot air disinfectant apparatus, one of which is invariably found in every hospital of repute in Great Britain. 5. It is an absolute necessity essential to health that the buildings should be well ventilated, always kept in thorough order and readiness to receive quarantined people, that they should be cheerfully furnished and supplied with the means of intellectual and physical occupation and amusement, and beyond all things it is most important that the lavatory arrangements should be complete. 6. I am prepared to answer any questions the Commissioners may desire to put to me arising out of my statement, or incidental to the inquiry they are conducting. My whole and sole anxiety is and has been to improve the arrangements and prevent the repetition of what in my judgment have been, to say the least, great mistakes.
- 10 Feb., 1882.
5. With regard to your stay on board the "Smyrna," were your people all landed out of the ship? The married people were, and out of the single persons six or seven men were sent on board the hulk "Faraway," and five or six women accommodated on shore.
6. Then all the sick were taken ashore and the majority remained on board? All the sick and all the married people were taken ashore.
7. *Dr. MacLaurin.*] And the female sick were put into the hospital enclosure? No, there was not sufficient accommodation for them.
8. Where were they put then? In a house by themselves in the open ground, where the married people were.
9. *Dr. Jones.*] Were the male sick taken into the hospital enclosure? No; the male sick (single men) were taken to the hulk "Faraway"; but the children who were sick were taken with their mothers and fathers into the hospital enclosure.
10. *Dr. MacLaurin.*] Have you any idea how many were taken to the hospital enclosure? About fifty souls; but I have no memorandum of it.
11. And that was as many as the hospital enclosure would accommodate? No; but the building used for the sick was greatly overcrowded.
12. And the rest were put into the second class enclosure? Seven or eight convalescents were drafted from the hospital enclosure to the second cabin enclosure—the overcrowding was so great.
13. Do you think it would have been possible to distribute the patients in a better way? Yes, there were other large buildings unoccupied; I never could understand why they were not utilized. I heard that there had been some cases of small-pox in one of them, which was given as a reason for not opening it.
14. Can you point out on this plan the building into which your patients were put (*producing plan of Quarantine Ground*); whether it was the building marked "Male Hospital," or that marked "Female Hospital"? No, I cannot say from that plan; there must have been other buildings put up since.
15. Then, there was an empty building, which was left empty, which might have been used only that, as you heard, there had been cases of small-pox in it? Yes; I heard it said in a discussion between Dr. Alleyne and Mr. Carroll. I think, however, that one of the unoccupied buildings was opened to accommodate a female patient.
16. I understood you to say that some of the sick people were put into the second class enclosure? A few married convalescents from the hospital enclosure I know were put there.
17. Where were you lodged at this time? In the ship, and for the first seven days I did the duty both on board and ashore; then I represented to Dr. Alleyne that I could not do all the work, and requested him to send me some assistance, which he did. He sent some of the sick men to the "Faraway" under the care of a doctor, whose name I do not remember, and sent Dr. McNish ashore, leaving me to attend the people on board.
18. In fact, your personal observation of the people on shore did not extend over a week? Yes, it did, because Dr. McNish was taken ill, and I had to go ashore and do his duty for about forty-eight hours, and subsequently I visited the shore, to see cases with Dr. McNish.
19. And then you observed that there was communication between the people inside the Quarantine Ground and those outside? Then, and previously, I noticed that the people went out of the enclosure, and that there was no one to prevent them.
20. Were there no police there? Yes, there were two, I think; I questioned one of them, and he said it was no part of his duty—his duty, he said, was to prevent boats from coming too near.
21. Did you speak to Mr. Carroll about it? I think so. The Health Officer must have known it; indeed it would, in my judgment, be absurd to expect people of the immigrant class to remain isolated, unless compelled either by police supervision, fencing, or the fear of punishment. In New Zealand police boards are exhibited in the quarantine enclosure, setting forth that people breaking bounds will be liable to an extra month of quarantine.
22. *Chairman.*] How long were you quarantined in the "Smyrna"? About thirty-three days, within a day, I think.
23. And you say that you only saw one policeman? Two—one on board and one on shore.
24. The tenor of your complaint, then, in respect to the "Smyrna" is, that the quarantine was not strict enough? That is one complaint; the other is that I did not get a proper supply of provisions for the people. They had a meeting on shore, and threatened to break bounds to buy bread if they did not receive a proper quantity on one occasion; there was a deficiency of ninety-six loaves of bread. I wrote a letter to the Agent for Immigration, pointing out the discontent that was created among the people on this score, and telling him that they had threatened to break bounds. The Agent for Immigration acknowledged that, and several other letters complaining of deficiencies from me in the same letter, and expressed his inability to understand my statement as to the deficiency of provisions, as the contractor held the steam-boatman's receipt for the proper quantity. The deficiencies in the provisions continued notwithstanding.
25. To whom did the steam-boat man deliver the provisions? He delivered them to the second officer, the storekeeper, and sometimes to me; the bread was thrown out of the ship's boat, and the other provisions were taken ashore and weighed. The boatman, when told of the deficiencies, said "I can't help it," on almost every occasion, and that was almost daily.
26. Was the Quarantine Station in telegraphic communication with Sydney at that time? No, there was only telegraph communication between Sydney and Manly Beach.
27. *Dr. Jones.*] Was the Health Officer made acquainted with these facts at the time? Yes; I mentioned these

these matters on two or three occasions to Dr. Alleyne, and he agreed with me that they were wrong and ought to be remedied, but nothing was done. Dr. Gibson.

28. *Chairman.*] You mean that your complaints were not attended to? Practically they were not. The deficiencies in the food continued almost from day to day. 10 Feb., 1882.

29. Did you take any steps when you were released from quarantine to bring the matter before the Government? Yes, when the "Camperdown" was released I wrote to the Colonial Secretary, asking him to have the whole of the correspondence between myself and the Agent for Immigration produced, and requested twice that he would give a decision on the matter. This he has not done.

30. *Dr. MacLaurin.*] Did you keep a journal on board? Yes, and most of the facts will be found in that journal.

31. What did you do with it? I handed it over to the Immigration Agent when we got in. I have here some copies of letters which I wrote to Mr. Wise, but I think you will find most of them in the journal.

32. At all events we shall find that on such and such a day you made certain complaints, and the nature of those complaints? Yes; I had also to complain of the want of punctuality on the part of the man who brought the provisions. On one occasion I informed Mr. Wise that "all hands," the healthy and the sick, of whom a large number were children, had to wait eighteen hours, from 5 o'clock p.m. until 12 the next day, for their food, but that irregularity did not occur often.

33. *Chairman.*] Had the weather anything to do with the delay in that instance? No, the weather was fine; there was no reasonable excuse.

34. Then what you have stated with regard to the "Smyrna" you say again, to a certain extent, in respect to the "Camperdown"? Yes, to a large extent; we had no contagious sickness when we came in with the "Camperdown," or for twelve or fourteen days before.

35. Do you remember how long you were there with the "Camperdown"? We were about seven days at Spring Cove.

36. The "Java" came in while you were there with the "Camperdown," did she not? Yes, she came in in the night while we were there, and anchored about a ship's length from us, and dead to windward.

37. What provision was made for nursing the sick at the Quarantine Station at that time? No provision whatever, the mothers looked after their children.

38. The Government did not provide nurses? My instructions from the Agent General gave me the right of appointing a nurse or two for the voyage, and these continued their duties in quarantine.

39. So that there was no difficulty on that score? No.

40. *Dr. MacLaurin.*] Did the captain of the ship supply cooking utensils or things of that kind to the immigrants? Yes, but I believe he is not actually obliged to do so after the lapse of the lay days.

41. In fact, the captain is not bound under the provisions of the charter-party to supply anything after the lay days have expired? No; it is quite competent for the captain to refuse to allow the ship to provide even water or coal to cook provisions with. Even the use of the medicine-chest he has a right to refuse.

42. *Chairman.*] In the case of the "Camperdown," the people were not taken ashore? Yes, the married people only.

43. How long did they remain on shore? Six or seven days; and then the ship was released by Dr. Foucart under the authority, I presume, of the Health Officer. And when I was on shore superintending the re-embarking of these people, Dr. Alleyne appeared in his launch, and noticed a connection between our ship and the "Java"—from our bow to the "Java's" cable. After that we were sent to Watson's Bay.

44. Instead of coming up to Sydney? Yes, we did not get pratique; the quarantine was prolonged.

45. That would appear as if there was a laxity in one case, and an undue strictness in the other? I did not object to go to Watson's Bay, although it was very unpleasant for the people on board, as I think it was the right thing to do. We left two cases in quarantine when we went to Watson's Bay—a typhoid case and a case of diphtheria.

46. Had you charge on this occasion of the people who were landed as well as those left on board the ship? I had.

47. Then there were two people left behind at the Quarantine Station? Yes. I do not know what happened after we left, except that the child who had diphtheria died, and that child was one of those for whom I did not receive the nourishment I applied for until five days after the requisition was sent in. I wrote some very strong letters to the Agent for Immigration on this subject.

48. Did you get any answer to those letters from Mr. Wise? I believe not; Mr. Wise very seldom acknowledged receipt of my letters. I got Dr. Foucart, who was in attendance on the ship at the time, to countersign my requisitions in order that they might be more promptly attended to. There were some critical cases of pneumonia, kidney affections, and eye cases among the people. On one occasion I told Mr. Wise that if one of those people died for want of medical necessaries I would not give a medical certificate, but would require the Coroner to make an inquiry.

49. *Dr. MacLaurin.*] Are your complaints in respect to the "Camperdown" to be found in the journal to which you have referred? Probably they are not; but if not, they will be found in the correspondence at the time between the Immigration Agent and myself. There is one other matter I should like to mention, and that is about the beds. The "Camperdown" was released immediately after a case of scarlet fever had been detected, and some beds were some time previously sent by Mr. Wise while we were in Watson's Bay for the single women, whose beds had been thrown overboard by the matron without consulting me. The women refused to use these beds because they had been used before, and some of them were soiled. They were stored by me in the Single Women's Hospital, to be handed over to Mr. Wise when we got back. I had, however, to clear that hospital out hurriedly for the reception of the scarlet fever patient, and I put them outside, where the scarlet fever case probably came in contact with them, and I recommended to the Health Officer that for fear of infection they should be sent to the Quarantine Station and destroyed. The value of the beds would be somewhere about £2 10s. But Mr. Wise, the very morning we got in, told the chief officer—behind my back, as I considered it—to send them back at 6 o'clock the next morning. I mention this to show the interference on the part of the Immigration Agent with quarantine matters. The beds were not sent back, because I countermanded the order and told the chief officer, telling him that I would take the responsibility on myself. The next day Mr. Wise attacked me, and wanted to know why I had not sent them back. I said, "For an excellent reason; it is a medical question entirely, and I have spoken to Dr. Alleyne about it. The beds probably have been infected, and it is a mere chance that they have not been scattered all over Sydney." I believe they were sent to the Quarantine Station and destroyed.

The

Dr. Gibson. The other matters to which I have to allude before completing my evidence are the non-compliance with my requisitions for necessaries for the sick in quarantine. For instance, the sugar supplied by the contractor was moist, and having a great number of cases of diarrhoea, I wrote for loaf-sugar to the extent of 40 lbs. In reply I got a letter from Mr. Wise stating that my requisition had been supplied to the extent of 20 lbs. only, and that the Health Officer had stated the quantity applied for to be excessive, and asking for an explanation. I wrote to the effect that I was not bound by my agreement to refer to him in matters of a professional nature, but at the same time I gave him the required explanation. Dr. Alleyne told me afterwards that he had never made any such statement; and then I saw Dr. Foucart, who said that when he handed in my letter to Mr. Wise that gentleman cavilled at the quantity of sugar, and asked his opinion, which he declined to give, saying that he knew nothing about the matter. I look upon it, therefore, as a case of wilful misrepresentation on the part of the Agent for Immigration. My whole experience of the quarantine of this Colony is: That there was a total absence of system, the management (so-called) was in my judgment a muddle, the arrangements for berthing the people indecent, the isolation of the sick defective, and the quarantine inefficient and practically useless.

10 Feb., 1882.

*I now hand in the correspondence between the Immigration Agent and myself to which I have referred:—*

The Agent for Immigration to The Surgeon-Superintendent, ship "Camperdown."

Sir, Immigration Office, 19 June, 1880.  
I enclose the scale showing the daily quantity of provisions to be delivered, which will enable you to check the provisions supplied by the contractor.

There is no time now to discuss the extraordinary claims made for the first time by the captain of the ship as to the supply of coals, candles, and water. Coals and water have been ordered to be sent by special steamer this afternoon. A box of candles is now sent (40 lbs.)

You must necessarily obtain your requirements of medicines from your medicine-chest as heretofore. Surely the captain will not refuse leaving the matter for future settlement.

I am, &c.,  
G. F. WISE.

The Surgeon-Superintendent, ship "Camperdown," to The Agent for Immigration.

Sir, Ship "Camperdown," Watson's Bay, 19 June, 1880.

I this morning received the cod oil, ordered on the 15th, but *not the eggs* requisitioned for at the same time.

You have omitted to furnish me with a scale by which to check the provisions supplied daily by the contractor.

By referring to my journal, ship "Smyrna," you will, I trust, see the necessity of at once sending me a scale. On my last visit here in that ship I had occasion almost daily to call your attention to glaring deficiencies in the stores—on one occasion to the extent of ninety-six loaves in the bread item alone.

The captain informs me that he does not consider himself responsible for supplying coals, candles, or water, or the use of the medicine-chest for the immigrants now that the lay-days have expired. If his opinion be correct will you be good enough to send supplies of the above?

As there appears to be some "hitch" in the postal arrangements I must ask you to be good enough to acknowledge receipt of this communication at your earliest convenience, and when doing so I shall be glad to learn the fate of my *two* letters containing "nominal lists of death," you were so anxious about.

I am, &c.,  
C. H. GIBSON,  
Surgeon-Superintendent.

The Agent for Immigration to The Surgeon-Superintendent, ship "Camperdown."

Sir, Immigration Office, 21 June, 1880.

Your requisition for 40 lbs. loaf-sugar for the infants and children is complied with to the extent of 20 lbs., and the Health Officer, Dr. Alleyne, desires me to request you to inform him why so large a quantity as 40 lbs. is required for the young children.

I am, &c.,  
G. F. WISE,  
Agent for Immigration.

N.B.—See Surgeon's evidence re this matter.

The Surgeon-Superintendent, ship "Camperdown," to The Agent for Immigration.

Sir, Ship "Camperdown," 25 June, 1880.  
I have to inform you that there were the following deficiencies in the provisions this morning:—Meat, 10 lbs.; Milk, 2½ gallons.

The boat (provision) arrived in good time.

I ordered Swiss Milkmaid brand in my requisition of yesterday; instead of this, the Contractor sent the American Eagle brand, which I do not consider good. This variety is regarded by the profession in England to be the poorest in the market.

The child I require the condensed milk for will take no other nourishment, and its life may be said to "hang on a thread." I enclose two papers taken out of a letter by mistake; also a letter for a Plimsoll immigrant.

I am, &c.,  
C. H. GIBSON.

The Surgeon-Superintendent, ship "Camperdown" to The Agent for Immigration.

Sir, Ship "Camperdown," Watson's Bay, 28 June, 1880.

I have the honor to acknowledge receipt of your letter of 26th instant.

Referring to the enclosure contained therein from Mr. Kidman, I have to inform you that the Contractor's *representative on board here is daily present* when the weights are checked, and that he is satisfied the deficiencies reported by me are correctly stated.

I consider that it is no part of my duty a theory as to the causes which have to do with the short weights, or to explain why provisions should lose weight in the transport between the "Ice-house," Sydney, and the ship "Camperdown." The provisions to-day were of proper weight, the meat being 20 lbs. in excess of the scale.

I am, &c.,  
C. H. GIBSON.  
The

The Surgeon-Superintendent, ship "Camperdown," to The Agent for Immigration.

Dr. Gibson.  
10 Feb., 1882

Sir, Ship "Camperdown," Watson's Bay, 29 June, 1880.  
I beg to inform you that the vegetables to-day were deficient to the extent of 25 lbs. I received in answer to requisition dated 28 June—Brandy, 2 bottles; arrowroot, 2 lbs.; 3 tins condensed milk.  
The castor oil and spirit of juniper did not, however, reach me. The absence of the latter medicine is a serious matter, and may prejudice the life of the patient it was ordered for, his state being so critical that I asked Dr. Foucart to consult.

No mutton came to-day, the entire ration consisting of beef.

I am, &c.,  
CHAS. H. GIBSON,  
Surgeon-Superintendent.

The Surgeon-Superintendent, ship "Camperdown," to The Agent for Immigration.

Ship "Camperdown," Watson's Bay, 30 June, 1880.

Sir, I beg to inform you that the castor oil and juniper arrived this morning.  
I have called Dr. Foucart's attention to the importance of my requests for medicine being more promptly attended to in future.  
If I have a case, and I honestly believe that life has been prejudiced by the non-arrival of medicines requisitioned for, I shall decline to give a certificate, and advise the Coroner to hold an inquiry.  
For the future Dr. Foucart will countersign all my requisitions.  
Vegetables again deficient to-day—25 lbs. Sixty lbs. of potatoes, to-day's supply, were rotten and unfit for food.

I am, &c.,  
C. H. GIBSON.

Memo.—Ship "Camperdown."

Deficiencies and irregularities in the food supply—and medicines, &c., requisitioned for—after expiration of lay-days.  
June.—Cod oil, ordered on 15th June, arrived 19th June; eggs for sick child (who died), ordered 15th, arrived 20th June; 40 lbs. loaf sugar, ordered 20th June, only 20 lbs. sent; Swiss milk, ordered 24th June, Eagle brand sent 25th June.  
Deficiencies—Meat, 10 lbs.; milk, 24 gallons; 29th June, vegetables deficient, 25 lbs.; 30th June, vegetables deficient, 25 lbs., and 60 lbs. potatoes—rotten, decomposed, and unfit for food.

CHAS. H. GIBSON.

The Agent for Immigration to The Surgeon-Superintendent, ship "Smyrna."

Sir, August 27, 1878.  
Henceforth rations for the immigrants will be forwarded daily similar in quantity to that this day for 378 adults, viz.:—Beef, 378 lbs.; butter, 189 ozs.; bread, 576 lbs.; potatoes, 378 lbs.; salt, 189 ozs.; sugar, 567 ozs.; soap, 189 ozs.; tea, 94½ ozs.—also vegetables, onions, turnips, and cabbage, &c.

In addition to the above, supplies will be forwarded in a separate package, addressed to Dr. McNish; also, in another package, rations for the assistant surgeon and the two police.

Should extra supplies be required for the sick or for children, you will be pleased to forward me a requisition for the same, and state whether, in consequence of such extra quantities being sent, any and what deduction should be made from the daily rations. Dr. Alleyne informs me that he has arranged with Mr. Carroll, the Superintendent of the Quarantine Station, for the supply upon your requisition of milk of the best quality for the children. Should any of the supplies forwarded be found to be of inferior quality you will be pleased to inform me thereof without delay.

The steamer is engaged to deliver the rations each day at the Quarantine Station between 8 and 9 o'clock a.m.

Should there be any delay you are requested to communicate with me by letter, and to make a specific complaint.

I am, &c.,  
G. F. WISE.

The Surgeon-Superintendent, ship "Smyrna," to The Agent for Immigration.

Sir, Ship "Smyrna," Spring Cove, 9 September, 1878.  
I have the honor to inform you that the provision boat did not reach Quarantine wharf until 11 a.m. this morning.

You will see by the enclosed list that the deficiencies are daily becoming greater \* \* \* \* \*  
Complaints to-day were both loud and numerous amongst the immigrants, and as they naturally expect me to remedy the insufficient food supply, my position is in the highest degree unpleasant.

Several openly announced their intention of breaking bounds to buy bread.

In my judgment the stores supplied yesterday and to-day are inadequate, and I can understand active hunger being the result.

I may add that yesterday I called Dr. Alleyne's attention to the facts stated above.

I am, &c.;  
C. H. GIBSON,  
Surgeon-Superintendent.

The Agent for Immigration to The Surgeon-Superintendent, ship "Smyrna."

Sir, 10 September.  
In reply to your letter of the 5th instant stating that on many occasions the rations forwarded to the immigrants have been deficient in quantity—I herewith annex for your information a memo. of the rations ordered to be forwarded each day, for which several quantities the contractor holds the receipt of the man in charge of the special steamer, and by whom the rations are delivered to the Superintendent of the Quarantine Station. A counterpart of this order is now sent to the Superintendent of the Quarantine Station.

Under the circumstances I am at a loss to reconcile the statement that on one particular day no tea was received, and on another day ninety-six loaves of bread were deficient.

As to the meat being of inferior quality, the full price is paid to the contractor, and he is required to supply accordingly. In future, should there be any less quantity of provisions than what is stated, as per account herewith, to be the daily supply, I would request you to refer to Mr. Carroll, the Superintendent, that he may refer to his own letter and note where the deficiencies exist.

I am, &c.,  
G. F. WISE.

The Surgeon-Superintendent, ship "Smyrna," to The Agent for Immigration.

Sir, Ship "Smyrna," Spring Cove, 10 September, 1878.  
I have to inform you that the provisions did not arrive this morning at the Station till 9:15, thereby delaying the breakfast hour until 10 a.m.

In company with Mr. Carroll I saw the provisions weighed, with the following results:—

Sugar, 74 lbs.; soap, 2 lbs.; butter, 1 lb.

The amount of tea was correct per scale for the first time since the Government undertook the rationing of the immigrants.

I am, &c.,  
C. H. GIBSON,  
Surgeon-Superintendent.

The

Dr. Gibson.

10 Feb., 1882.

The Agent for Immigration to The Surgeon-Superintendent, ship "Smyrna."

Sir,

11 September, 1878.

I thank you for your letter of the 9th instant, this day received.

I cannot account for the extraordinary deficiencies in the rations of which you have given me a detailed account. I will look into the matter at once, and will write you to-morrow. In the meantime, as I have now furnished you with a memo. of daily supplies ordered, and as Mr. Carroll has each day a counterpart of such order, an error should be at once detected and rectified. I have now forwarded, addressed to yourself, an extra supply of such rations as were deficient in quantity on Monday last, as per memo. in margin.

As to any deficiencies in meat, the contractor assures me that he invariably gives 10 per cent. of weight additional to that ordered.

It might perhaps be well to notify to the immigrants that if they break bounds of the Quarantine Station as some of them have intimated to you their intention of so doing, they will be liable to imprisonment for one or more months.

Porter, wine, and candles have been also this day forwarded for the use of sick on shore, addressed to Mr. Carroll.

I am, &c.,  
G. F. WISE.

The Surgeon-Superintendent, ship "Smyrna," to The Agent for Immigration.

Sir,

11 September.

I have to acknowledge receipt of your letter bearing date 10 September, one paragraph of which directs that for the future Mr. Carroll is to be referred to should there be less quantity of provisions than what is stated as per scale to be the daily supply. I know nothing of the business arrangements of the contractor and steamboat man, nor do I attach the least importance to the former holding the latter's receipt for stores; one is the servant of the other, and probably gives the receipt as a matter of course.

With regard to the ninety-six loaves of bread reported by me as deficient, there will be forthcoming proof that will satisfy you. I am not in the habit of making assertions without having ample proof of their soundness.

Your letter of 27 August instructs me to inform you without delay should any of the provisions be found of inferior quality. This I have done in the case of meat only, which I reported to be of the poorest description. Your assertion, in reply to such a report, that the contractor is paid the full price and is required to supply accordingly, is not an answer to a medical officer previously instructed to report on the quality of provisions.

I have again to report that the meat is very poor and bony—the sheep being almost skeletons. I shall, of course, continue, in the interests of the Government, to see to the weighing of the provisions.

I am, &c.,  
C. H. GIBSON.

Memoranda of deficiencies in the food supply during ship "Smyrna's" detention in Quarantine—of which Mr. Wise was advised by letter almost from day to day.

August 27.—No tea.

September 3, 4, and 5.—2 lbs. tea short each day.

" 6.—2 lbs. tea short. No vegetables.

" 7.—2 " " Bread, 6 loaves short.

" 8.—2 " " " 96 "

" 9.—2 " " " 23 "

Also on the 9th—Meat, 19 lbs. Potatoes, 70 lbs. Sugar, 20 lbs.

September 10.—Meat, 60 lbs. Sugar, 7½ lbs. Potatoes, 47 lbs.

" 11.—" 61 " " 5 " " 45 "

" 12.—Correct for first time since Government undertook victualling the ship.

C. H. GIBSON,  
Surgeon-Superintendent.

FRIDAY, 24 FEBRUARY, 1882.

Present:—

DR. JONES,  
CAPT. HIXSON,DR. MACLAURIN,  
MR. STREET.

JOHN RENDELL STREET, ESQ., IN THE CHAIR.

William Gilmore Murray, Esq., representing the firm of Gibbs, Bright, & Co., formerly Bright Brothers & Co., sworn and examined:—

W. G. Murray, Esq. Yes.

24 Feb., 1882.

50. *President.*] Your firm were agents for the steamer "Brisbane" when she arrived here in April last year?

51. Can you tell us the circumstances connected with the placing of that vessel in quarantine? I am sorry that in consequence of having mislaid the notice I received of this meeting I am not prepared with the figures I should otherwise have brought with me; but my letter to the President, written in October last, gives the particulars required, and if I may be permitted I will put it in as evidence.

Sydney, 17 October, 1881.

J. R. Street, Esq., President of the Commission appointed to inquire into the management of the Quarantine Station,—

Sir,

The importance to shipping firms and to the public of certain occurrences in connection with the Quarantine Station which transpired prior to 1 June, 1881, the date from which your Board's inquiries are directed to commence, will, we trust, sufficiently vindicate our present application for the Board's consideration of the following facts. Briefly stated they are as follows:—

On 29 April, 1881, the s.s. "Brisbane" was placed in quarantine on arrival in Sydney harbour, on account of having on board a case of reputed small-pox.

Some days after the steamer was quarantined, from information considered reliable, we doubted the capability of the medical man in charge of the "Brisbane" to decide upon a doubtful case, and concluded that the supposed case of small-pox might be merely one of skin disease or other ailment.

It being of great importance that all doubt should be dispelled and the real nature of the malady ascertained, we urged a request for a medical examination of the patient by a medical commission named by the Government, and at the Company's expense.

We beg to direct the Board's attention to the fact that fifteen days elapsed before the Health Officer of Sydney made an examination of the patient. The placing of a vessel in quarantine and keeping her there for fifteen days on a mere suspicion shows great apathy on the part of those who are responsible. It is further to be noted that after the "Brisbane" had been seventeen days in quarantine the Health Officer of Sydney wrote to the Health Officer of Cooktown requesting to be informed of his reason for refusing pratique to the steamer. The latter replied on 2nd June that he had found "two quite decided cases of small-pox," notwithstanding which, not one word has been heard in Sydney of the "Brisbane's" second case. This is a remarkable fact, and suggests certain reflections.

If there was not a second case (and if there had been it would certainly have declared itself), was there any case at all?

It

It is quite notorious that certain men and women, the victims of erroneous diagnosis, have recently been sent from their own homes in Sydney into quarantine, and we abide by our early formed opinion that there was no case of small-pox on board the s.s. "Brisbane" on her arrival in April last.

In view of these facts, we think we are justified in requesting the Board to consider whether it is not in their province to make such representations to Government as shall in future prevent any vessel being placed in quarantine without an effort on the part of the Health Officers to ascertain whether any cause for detention exists; and further, whether it is necessary and in accordance with enlightened usage to retain patients in quarantine periods of time similar to that which the suspected case of the "Brisbane's" was kept,—viz., from April to September.

We had trusted that the matters herein dealt with would have come under the notice of your Board by means of the correspondence ordered to be printed by the Legislative Assembly on 15 September, 1881; but inasmuch as the dates preclude this, we have thought it expedient to acquaint your Board in an informal manner of matters of vital importance to great interests.

We have, &c.,

GIBBS, BRIGHT, & CO.,

Agents,

Eastern and Australian Steamship Co. (Limited).

W. G. Murray, Esq.  
24 Feb., 1882.

With reference to the paragraph in this letter which states that "fifteen days elapsed before the Health Officer of Sydney made an examination of the patient," I may say that when I wrote that I believed it to be absolutely true, having obtained my impressions from the printed correspondence laid before Parliament. Since then, during a casual conversation with Dr. Foucart, I was informed by him that he examined the patients immediately after their arrival. I wish, therefore, to qualify that statement.

52. You state in this letter that the steamer "Brisbane" on her arrival in Sydney harbour was placed in quarantine on account of her having on board a case of reputed small-pox? Yes.

53. Do you know by whom that case was reported? It was reported to us by our agent in Cooktown—he telegraphed to us.

54. Had you a medical man on board? Yes, but I do not remember his name at the present moment.

55. Are you aware that this doctor reported to the Health Officer on the arrival of the vessel that there was a case of reputed small-pox on board? I do not remember it. Now I recollect, it was Dr. Spencer who was on board.

56. Do you remember what the captain's report was to the Health Officer? I do not, but I know what the captain told me afterwards; he said he had always protested it was not small-pox at all.

57. And you did not consider the medical man in charge of the "Brisbane" a competent man to decide upon a doubtful case? No, I did not, for this reason—that two officers on board the vessel whom I had known for many years as intelligent, truthful men gave me an account of his behaviour on board, which disclosed such filthy habits that all my confidence in him was destroyed.

58. Is it true that this vessel had been seventeen days in quarantine before the Health Officer of Sydney wrote to the Health Officer of Cooktown, asking why pratique had been refused? It is, if the information conveyed in the printed papers laid before Parliament is correct.

59. I suppose you obtained your information that the Health Officer at Cooktown replied on the 2nd of June that he had found "two quite decided cases of small-pox" from the same quarter? Yes.

60. You stated just now that since writing the statement you have handed in you had been informed by Dr. Foucart that he examined the persons on board immediately on their arrival? Yes.

61. Are you aware of the nature of his report? No, but he told me he had no doubt that the boy had had small-pox recently. I would like to draw your attention to the answer of the Health Officer at Cooktown on the 2nd June, that he had found "two quite decided cases of small-pox." Now, the second case has never been heard of; that destroyed my confidence in the report from Cooktown altogether, and convinced me that there had been no proper examination.

62. Could the vessel have put into any intermediate port? No.

63. *Captain Hixson.*] Had you any conversation with the captain or the doctor of the ship? Not with the doctor; I had with the captain.

64. And what was his explanation? He asserted that there was no small-pox on board at all, and only one case of sickness instead of two, and he was a man of great experience.

65. *President.*] Did you know anything yourself as to the nature of the sickness which this man was suffering at Cooktown? I did not.

66. Did the captain make any report to you as to the nature of his sickness? No written report, and I forget what he said; I think he said it was scabies.

67. There was a man sick at Cooktown? Yes.

68. *Dr. MacLaurin.*] He was so sick that the Health Officer's attention was drawn to him? By this Dr. Spencer. In the printed papers laid before Parliament there is a report given by a doctor whom we sent down with the sanction of the Government to supersede Dr. Spencer and take charge of the ship, and he said that after a searching examination he found no traces of small-pox in the ship.

69. What was the date of that report? I think it was dated about seventeen or eighteen days after the ship had been placed in quarantine.

70. And how long would she be coming from Cooktown to Sydney? Five or six days; I cannot give you the precise date, but it is given in the printed papers laid before Parliament.

71. *Captain Hixson.*] Who was the medical man you sent down from Sydney? Dr. Leonard; a gentleman who had evidently had small-pox severely at one time, and had the marks all over his face.

72. *President.*] Can you state the reason of the long detention of the man who was taken from the "Brisbane" and placed in quarantine from April to September? I cannot explain it; it has always been a mystery to me.

73. Was there any failure on the part of your firm to comply with the quarantine regulations in supplying food or the treatment of the passengers? Not that I am aware of; we sent everything down that was wanted.

74. *Dr. MacLaurin.*] But was there any failure to carry out the quarantine regulations? No, unless it was the detention.

75. Was there any failure on the part of the agents of the ship to carry out any of the regulations of the Quarantine Station? Certainly not; we were anxious to do everything we could, as the correspondence will show; in fact, we were continually urging the authorities and seeing Dr. Alleyne, the detention being a continual expense to us; and not only that, but the men were imprisoned all this time.

76. *Captain Hixson.*] Who were the men? Two Chinamen, one of whom was reported to be sick. It was always a mystery to me why they were kept so long in quarantine.

- W. G. Murray, Esq.  
24 Feb., 1882.
77. *President.*] When was the vessel released? On 23rd May; she was kept in quarantine twenty-four days, which we thought was monstrous, seeing that she had to call at Cooktown.
78. *Dr. MacLaurin.*] Then, while these men were on board the "Faraway" the outbreak of small-pox in Sydney took place? I believe the outbreak of small-pox in Sydney occurred the day after the vessel was placed in quarantine; it was within a day or two.
79. I was referring more particularly to the sending of patients from Sydney to the "Faraway"? No doubt that was the reason they were put on board the "Faraway."
80. While four men were on board the "Faraway" a fresh batch of patients were sent from Sydney to the Quarantine Station? Yes.
81. Might not that have had something to do with it? I cannot see it.
82. *Captain Hixson.*] As a fresh set of patients were sent down while you were on board, would it have been right to release your men, who were infected? Well, I can tell you a worse case than that, which occurred in 1876, when two men were detained for 108 days. The same steamer "Brisbane" was put into quarantine on 13th December, 1876, and seven men were kept in quarantine for 108 days.
83. Was there small-pox on board at the time? I believe there was; I had no doubt at all about it on that occasion. Again, there was another case on the 24th January, 1881, when she was placed in quarantine and three men were kept there for about eighty days, and at that time there was no talk of small-pox being in any part of Sydney. Captain Hixson may have given a reason for the detention of the men on board the "Faraway" on the last occasion, but there was no reason for keeping these men so long in quarantine on the other occasions.
84. *Dr. MacLaurin.*] Then the three occasions on which the steamer "Brisbane" was quarantined, in which you say there was extreme detention, were the 13th December, 1876, 24th January, 1881, and 29th April, 1881? Yes.
85. *President.*] I see you were also agents for the steamer "Normanby," quarantined on the 18th July, 1877; have you anything to remark about that vessel? No; because we thought the detention was not an unreasonable one; but there was one occasion on which the s.s. "Somerset," for which we were also agents, was detained thirty days; that was in January, 1879.
86. We have a statement before us that she was quarantined in March, 1879? Yes, but I have nothing to say about that occasion. I may state that what I have most to complain of is the extraordinary detention of passengers on certain occasions. I have made it my business to make inquiries as to the usages in respect to quarantine in different parts of the world, and nowhere have I heard of a detention for 108 days. I think such a detention is monstrous, and I cannot conceive anything to justify it, or even eighty days. And then the extreme uncertainty, when a vessel is put in quarantine, and every one is landed, as to the time of her detention, and the mystery that is kept up, are absurd, vexatious, and annoying.
87. *Captain Hixson.*] Have you been watching the telegrams from Victoria lately: is not the same mystery kept up there? No; they seem anxious to release every one at the earliest possible moment; I do not think any one is detained there over twenty-one days.
88. Have you not seen one or two notices lately complaining of the uncertainty as to when vessels placed in quarantine obtain pratique? I did see two, but even then the people were released very quickly. You can very well understand that a large steamer lying in quarantine involves a very heavy and daily expense, and it is of great importance to the owners to know about the time she will get out.
89. *President.*] Can you tell us the longest time that any of your vessels have been detained in quarantine after the last suspected cases had been removed from on board? I believe it was twenty-four days—the "Brisbane" on two occasions was detained twenty-four days. I do not know whether it is within the province of this Commission to make such a recommendation, but I think it would be a good thing and conduce to the health and safety of the passengers generally if all the Australian Colonies were to agree in allowing infected persons to be landed at the first port at which a vessel may call. The expense would in all cases fall upon the owners of the vessel, with the exception of the act of supervision, which the Governments, for the sake of the people in their own Colonies, would carry out. I believe that infection could be entirely prevented if proper precautions were used. Two or three cases have occurred recently in which, if that plan had been adopted, a great deal of trouble and inconvenience would have been avoided. The case of the "Garrone" is one for instance; if she had landed a few passengers at Capetown much delay and expense would have been saved. Of course they cannot be compelled to receive patients of this kind, but if the Commission were to make the recommendation, seeing that the expense would fall upon the ship, I think it would be a great advantage to all persons concerned. It seems a cruel thing to keep a single sick person cooped up among the passengers when he might be put on shore, where there would be plenty of room to isolate him, and that might be the means of saving a number of lives. Then, again, if the "Mirzapore" had landed a few patients in Western Australia it would have been a good thing for all persons on board. With reference to the period of detention, you will see that it has on several occasions been twenty-four days; formerly twenty-one days used to be considered the correct thing, and I think in Queensland sixteen days is all that is required. I think people should know the time of their release, and have some confidence that, except under some extraordinary circumstances, it will not be exceeded.

QUARANTINE COMMISSION.

APPENDIX.

RETURN of Vessels placed in Quarantine, from 1 January, 1876, to 1 June, 1881.

Names.	Date of Arrival.	Names of Consignees.	Names of Medical Superintendents.	No. of Buildings erected.	Remarks.

H. G. ALLYNE, Esq., M.D.,  
Health Officer, &c., &c., Sydney.

JOHN CARROLL.

1302

6. Your Petitioners therefore telegraphed to their agents at Hong Kong, and in consequence of such telegram the Colonial Secretary at Hong Kong sent the following telegram to the Colonial Secretary in this Colony :—

“ Hong Kong, 20 June, 1881.

“ Health Officer reports Hong Kong free from any epidemic of infectious or contagious diseases, and that, out of 3,588 Chinese he examined this month as emigrants, none were suffering from small-pox. The Governor, therefore, hopes quarantine will not be enforced against Hong Kong.”

7. Your Petitioners hired a steamer at considerable expense to intercept the said steamship “ Ocean” at the Sydney Heads and order to proceed direct to Melbourne, but owing to the supply of coal and water on board being insufficient she was obliged to enter Port Jackson.

8. On the twenty-sixth day of June, one thousand eight hundred and eighty-one the said steamer entered Port Jackson with four hundred and forty-two persons on board, principally Chinese. The said steamer left Hong Kong on the twenty-second day of May, one thousand eight hundred and eighty-one, having been previously examined by the Government Health Officer at that place, and arrived at Port Darwin, in the Territory of South Australia, on the third day of June, where she was examined by the proper Health Officer and found to be free from disease of any kind. The said steamer arrived at Thursday Island, in the Colony of Queensland, on the ninth day of June, and after being again duly examined by the proper Health Officer was admitted to pratique. The said steamer arrived at Cooktown, in the Colony of Queensland, on the twelfth day of June, was again examined by the proper Health Officer and admitted to pratique. The said steamer arrived at Townsville, in the Colony of Queensland, on the sixteenth day of June, was again examined by the proper Health Officer and admitted to pratique. The said steamer arrived at Brisbane on the nineteenth day of June, and was rigidly examined by the proper Health Officer at that place and duly admitted to pratique, the captain of the said steamer being complimented by the medical officer at the last-named place on the clean appearance of his ship and passengers. At none of the above-mentioned ports was any epidemic disease existing at the time of the said steamer’s visit. On arrival at Port Jackson the said steamer was at once boarded by the Health Officer, and found to be free from disease of any kind. Notwithstanding the facts above-mentioned, the said steamer was placed in quarantine for an indefinite time, and the crew and passengers were forbidden to land.

9. An application was then made to the Government for permission to coal. After a delay of three days, such application was granted, subject to the following conditions :—

- (1.) That only sufficient coal to take the steamer to Melbourne should be supplied.
- (2.) A hulk or lighter containing the coal should be towed to a place just outside the boundary of the Quarantine Ground, there anchored and left by her crew. The steamer to go alongside this hulk and get the coal out as best they could between sunrise and sunset.

10. In consequence of these restrictions the coaling was not completed till late in the afternoon of the second day of July. The said steamer immediately thereupon sailed for Melbourne, and arrived there on the fifth day of July. On arrival at the said port the said steamer was duly examined by the properly constituted Health Officer, and having been found free from disease immediately received pratique. Such pratique was granted in due course, and not through the negligence of any public servant or misunderstanding of any kind.

11. Some of the Chinese passengers on the said steamer travelled by railway from Melbourne to Sydney without any interference from any Government Officer. The remainder of the said passengers, two hundred and twenty-eight in number, insisted on being brought to Sydney, in accordance with the contract entered into with them at Hong Kong. The said steamer left Melbourne on the ninth day of July, and arrived at Port Jackson on the twelfth day of July. The persons on board the said steamer were thereupon again examined by the Health Officer of the Government and found to be free from disease.

12. The said steamer was, notwithstanding, again placed in quarantine on the said twelfth day of July, and detained in quarantine until the twenty-third day of the same month. The said steamer was only released from quarantine on condition that the bedding and clothing and personal effects of all Chinese passengers should be destroyed, and that, in lieu thereof, a suit of clothes and a blanket should be supplied to each Chinese passenger by your Petitioners. In order to obtain the release of the said steamer your Petitioners were obliged to comply with such order, and incurred great expense in so doing. A considerable part of the bedding and clothing, so ordered to be destroyed, had been purchased at Melbourne a few days previously.

13. In consequence of the action of the Government as aforesaid, your Petitioners have incurred an actual loss of (£1,585 16s.) one thousand five hundred and eighty-five pounds sixteen shillings, made up as follows, being moneys actually paid by your Petitioners :—

“ Ocean” arrived in Sydney, June 26 ; would have finished discharge and been in Newcastle, June 29 ; did arrive in Newcastle, July 29 ; delay thirty days.

Thirty days hire of steamer...	£1,000	0	0
Extra coal to take her to Melbourne and back, 160 tons at 20s.	160	0	0
Cost of provisions as supplied by T. Claydon	80	15	1
Cost of water supplied	14	5	0
Cost of clothing supplied to Chinese in lieu of clothing destroyed	217	15	11
Costs of docking and cleaning	113	0	0

£1,585 16 0

14. Notwithstanding repeated applications by your Petitioners, the Government have refused to make any compensation to your Petitioners in respect to the matters above stated.

15. Whether or not your Petitioners are legally entitled to compensation, they submit to your Honorable House that they have a just and equitable claim to compensation, on the following grounds :—

- (1.) That your Petitioners were carrying on a lawful business in contracting to bring Chinese passengers to this country, and all proper precautions were taken by your Petitioners to keep the said passengers in good health. The said proclamation was issued a few days before the arrival of the said steamer at Sydney, at a time when it was impossible for your Petitioners to meet its requirements.

(2.)

- (2.) That, in consequence of the great public alarm existing in Sydney at that date, unusual measures of precaution were taken, which would not have been adopted at any other time, and were under the circumstances unnecessary.
- (3.) That there is no provision in the Quarantine Act authorizing the destruction of clothing and bedding and personal effects at the expense of the owners or charterers of a ship.
16. Your Petitioners submit to your Honorable House that the said steamer would not have been placed in quarantine at any other time, for the following reasons, viz. :—
- (1.) That, at the date of the said proclamation, the said port of Hong Kong was not in fact an infected port.
- (2.) The said steamer had undergone six examinations by the duly constituted medical authorities, viz., at Hong Kong, Port Darwin, Thursday Island, Cooktown, Townsville, and Brisbane, and had in each case been found to be free from disease.
- (3.) That the said steamer was entitled, as regards pratique, to be treated as coming from a colonial coasting voyage, inasmuch as twenty-three days had elapsed since her departure from Port Darwin aforesaid, and she had called at four ports in the Colony of Queensland.
- (4.) That thirty-eight days had elapsed since the departure of the said steamer from Hong Kong, during which time there had been no case of small-pox on board, and, according to the rule of the Board of Health, even an infected ship is entitled to receive pratique after the expiration of twenty-one days from the last known case of small-pox breaking out.
17. Your Petitioners in the same year chartered the steamer "Charlton" to carry Chinese passengers from Hong Kong. The said steamer cleared Hong Kong on the eighteenth day of June aforesaid, before the issue of the said proclamation was known in Hong Kong. Immediately on the issue of the said proclamation your Petitioners telegraphed to their agents in Hong Kong to prevent the Chinese passengers from coming to Sydney, but such telegram arrived too late for that purpose, the said steamer having already cleared for Sydney with twenty-three Chinese passengers on board for Sydney. The said Chinese passengers had been previously examined and passed by the Emigration Officers and the proper Health Officer of the said port. Your Petitioners offered the said passengers a large bonus if they would cancel their tickets and remain in Hong Kong. This they positively refused to do, and insisted on being brought to Sydney according to the contract made with them.
18. The said steamer arrived at Port Darwin aforesaid on the ninth day of July, and after being duly examined by the proper Health Officer was at once admitted to pratique. The said steamer arrived at Cooktown aforesaid on the twenty-sixth day of July, and after being duly examined by the proper Health Officer was at once admitted to pratique. The said steamer arrived at Brisbane aforesaid on the fifth day of August, and after being duly examined by the proper Health Officer was at once admitted to pratique. In response to an inquiry by your Petitioners on the twenty-eighth day of July, they were informed by the Colonial Treasurer that the said steamer would be placed in quarantine on her arrival in Sydney, and, in consequence of the treatment received by the said steamer "Ocean," the said steamer "Charlton" was ordered by your Petitioners to proceed direct to Melbourne, which she accordingly did, although the machinery of the said steamer was partially disabled.
19. In consequence of the destination of the said steamer being thus altered, your Petitioners sustained heavy losses amounting to eight hundred and twenty-eight pounds nine shillings and four pence, being moneys actually paid by your Petitioners, made up as follows :—

	£	s.	d.
Time occupied in going to Melbourne and back, from Sydney Heads to Sydney, the steamer being in a partially disabled condition; 13 days at £1,000 per month	425	0	0
Cost of coal consumed, 120 tons at 18s. ... ..	96	0	0
Time occupied in taking coal in Brisbane, two days ... ..	66	13	4
Cost of victualling passengers ... ..	6	18	0
Paid for vaccinating passengers in Brisbane, to satisfy the requirements of the Victorian authorities ... ..	37	16	0
Tonnage dues in Melbourne ... ..	39	6	0
Pilotage in Melbourne ... ..	29	9	6
Customs agency fee, Melbourne ... ..	6	6	0
Amount paid to passengers in Melbourne to pay their fare by railway to Sydney, and bonus to induce them to do so ... ..	56	0	0
Freight on passengers' baggage ... ..	1	0	0
Cost of telegrams ... ..	10	0	0
Insurance on Sydney cargo to and from Melbourne ... ..	49	0	6
Water supplied ... ..	5	0	0
Total... ..	£828	9	4

20. Your Petitioners therefore submit to your Honorable House that they have suffered great hardship. Your Petitioners therefore humbly pray that your Honorable House will be pleased to appoint a Committee to consider the prayer of this their humble petition, and to report to your Honorable House whether or not your Petitioners are entitled to any and what compensation for the unmerited losses that they have suffered through the quarantining of the steamship "Ocean," and the other expenses incurred thereby, and through the destroying the bedding, clothing, and personal effects of the passengers on the steamship "Ocean," and through the determination of the Government expressed to your Petitioners as hereinbefore stated to quarantine the said steamship "Charlton," and the expenses incurred by your Petitioners in consequence thereof, and that your Honorable House may be pleased to take this case into their favourable consideration under the circumstances and for the reasons set forth in the above petition, and, if necessary, that your Petitioners may be at liberty to give evidence before such Committee in support of their claims, either at the Bar of your Honorable House or before such Committee.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this eighteenth day of September, in the year of our Lord one thousand eight hundred and eighty-two.

GEO. R. STEVENS & CO.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

LICENSING ACT OF 1882.

(PETITION OF CHAIRMAN OF MEETING AT DENILIQVIN RESPECTING.)

*Received by the Legislative Assembly, 7 November, 1882.*

To the Honorable the Speaker and the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned, residents of Deniliquin and Hay, in the District of Riverina, in the Colony of New South Wales,—

RESPECTFULLY SHOWETH :—

1. That your Petitioners are, and for many years past have been, interested as owners, lessees, or licensees of hotels and hotel property in the Districts of Hay and Deniliquin aforesaid.
2. That your petitioners' interest in the said properties first accrued under and subject to the privileges and responsibilities conferred and imposed by the "Sale of Liquors Licensing Act of 1862."
3. That many of the requirements of the Licensing Act of 1882, and in particular those in reference to the size of the room accommodation to be provided in each licensed house, will, unless the statute be declared to be a non-retroactive statute, have the effect of destroying those rights and privileges which became vested in your Petitioners under the Act of 1862.
4. That the Licensing Act of 1882 draws no distinction whatever between hotels in the metropolis and those in country towns and along the high roads of the Colony, but requires that each house shall have the same accommodation both as regards number and the size of rooms set apart for the public.
5. That your Petitioners respectfully submit that the requirements and uses of hotels in the metropolis and in the country are widely separate, and that in enforcing a strict compliance with the uniform standard a great injustice is inflicted upon the hotel-keepers and owners of hotel property in the country.
6. That in reference to the matter which appears to affect most seriously your Petitioners, viz., that of compelling the owners of houses licensed under the Act of 1862 to meet the requirements of the new Act in regard to accommodation, your Petitioners would point out that, in order to comply therewith, a very heavy outlay will at once be inflicted, for which no return can be looked, an expense which in many cases will involve the owners in debt, and in a good number of instances result in the closing of the houses, and the consequent loss of the means of livelihood to those interested.
7. Your Petitioners would also point out that under the present law no distinction has been drawn between hotels in cities and those along the country roads in respect even to the license fees payable to the Crown, although as regards the trade carried on in the houses of the two classes no parallel can be drawn.
8. Your Petitioners would respectfully submit to the consideration of your Honorable House the question as to whether the hotels in cities and in the country cannot without injury to the State and the well-being of the public be placed upon totally different footings, and as to whether the question as to the accommodation to be provided by each hotel in the country cannot with safety be left to the discretion and determination of the Licensing Magistrates or Licensing Bench appointed by the Government for the district in which such hotel is situate.

Your Petitioners, in respectfully submitting this Petition to your Honorable House, pray that the matters referred to may receive due consideration at your hands, and that upon realizing the great hardships and injustice inflicted by the present law in the violation of vested interests acquired under the earlier Statute you may cause amendments in respect of the matters complained of, and afford your Petitioners, and the hotel-keepers in the country generally, such relief as you in your wisdom may deem fit.

And your Petitioners, as in duty bound, will ever pray, &c.

For and on behalf of the Hotel-keepers in the Districts of Deniliquin and Hay,—

JOHN O. ATKINSON,

Chairman at a Meeting of Hotel-keepers held at the Globe Hotel,  
South Deniliquin, on Tuesday, the 24th day of October, 1882.

1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

LICENSING DISTRICTS OF FORBES, PARKES, AND CONDOBOLIN.  
(CORRESPONDENCE, &c., RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 25 October, 1882.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 20th October, 1882, That there be laid upon the Table of this House,—

“Copies of all papers, correspondence, and minutes in connection with the forming of the Licensing District of Forbes, Parkes, and Condobolin; and also copies of like papers in reference to the appointment of Licensing Magistrates to these districts.”

(*Mr. Cooke.*)

LICENSING DISTRICTS OF FORBES, PARKES, AND CONDOBOLIN.

No. 1.

Under-Secretary of Justice to Police Magistrate, Forbes.

Sir,

Department of Justice, Sydney, 5 January, 1882.

I am directed by the Minister of Justice to invite your special attention to the provisions of the Licensing Act of 1882, 45 Vic. No. 14, which was duly published in a supplement to the Government Gazette of 23rd December last, and came into operation on the 1st January instant, and more particularly to section 4 (a copy of which is hereunder given), from which it will be seen that Police Magistrates are empowered, pending the proclamation of Licensing Districts, to exercise all the powers and authorities of a Licensing Court. The following is a copy of the section referred to :—

4. All applications for licenses and all other matters which under this Act may be heard determined and dealt with by a Licensing Court or by a Licensing Magistrate shall be heard determined and dealt with by a Police Magistrate sitting at the Court of Petty Sessions nearest to the place where the applicant resides or where the matter arises whenever and so long as such place shall not be comprised within the boundaries of a Licensing District proclaimed under this Act. And such Magistrate while so sitting shall have and may exercise all the powers and authorities of a Licensing Court.

You will observe that under the concluding portion of section 2, *existing licenses are to be held in all respects under and subject to the provisions of the new Act*, unless otherwise therein specially provided for.

Mr. Foster thinks that, unless in cases of offences against the Act, you would do well, as far as possible, to defer action under the provisions of this Act until the Licensing Courts shall have been appointed.

I am at the same time to request that you will have the goodness to convene by circular, with the least possible delay, a special meeting of all the Magistrates resident within the Police District of Forbes, for the purpose of assisting the Minister of Justice by suggesting the names of suitable gentlemen, whether Justices of the Peace or not, as members of the Licensing Court, under section 6 of the said Act, subject to the restrictions imposed by sub-section 4 of the last-named section, which is in the following terms, viz. :—

- (rv.) Every person shall be disqualified from holding office as the member of a Licensing Court who is interested beneficially in the manufacture or sale of fermented or spirituous liquors or in any premises licensed or proposed to be licensed under this Act or who holds any license whatsoever within the meaning of this Act or is beneficially interested in any trade or calling exercised under any such license. And any person so disqualified who shall knowingly and wilfully act as a member of such Court shall be guilty of a misdemeanour.

I am to add that as the appointment of the members of the Courts is vested in the Governor and Executive Council, you will please to report, for the information of the Minister of Justice, should you see any reason to disapprove of any of the gentlemen whose names may be suggested.

I have, &c.,

W. E. PLUNKETT,  
Under-Secretary.

45 Vic. No. 14,  
section 6.

No. 2.

Magistrates and Residents of Parkes to the Minister of Justice.

Sir,

Parkes, 11 January, 1882.

We have the honor to most respectfully request you will proclaim Parkes a separate Licensing District under the Licensing Act of 1882, and that you cause Thomas Tom, Esq., J.P., Chairman of the Local Bench, to be gazetted Chairman of the Licensing Court, with any two other J.'sP. whom you may choose out of the Local Justices of the Peace attending this Court.

We have, &c.,

R. Burney, J.P.,  
Wm. C. Weston, J.P.,  
John Ward, J.P.,  
R. S. Treweeke, J.P.,  
B. Tarrant, storekeeper,  
W. H. Brigstocke, Manager, Commercial Bank,

F. Stevenson, Back Creek,  
David M'Millan, publican,  
R. H. Webb, storekeeper,  
Jas. M'Intyre, butcher,  
Thomas & Foster, storekeepers.

Inform Mr. Cooke, M.P., that steps are now being taken to proclaim Parkes and Condobolin Licensing Districts.—W.J.F., 28/4/82. Mr. Cooke, M.P., informed.—2/5/82.

No. 3.

The Under-Secretary of Justice to H. H. Cooke, Esq., M.P.

Sir,

Department of Justice, Sydney, 2 May, 1882.

Referring to letter received from certain Magistrates and residents of Parkes requesting that Parkes should be proclaimed a separate Licensing District, under the Licensing Act of 1882, I am directed by the Minister of Justice to inform you that steps are now being taken to gazette new districts, and Parkes and Condobolin will probably be proclaimed Licensing Districts.

I have, &c.,

W. E. PLUNKETT,  
Under-Secretary.

No. 4.

No. 4.

Telegram from Police Magistrate, Forbes, to Under-Secretary of Justice.

23 January, 1882.

REFERRING to meeting to be held here to-morrow to suggest suitable gentlemen as members of the Licensing Board, please inform if names should be suggested for Parkes and Condobolin as well as Forbes.

Request Mr. Sharpe, P.M., Forbes, to submit names for Forbes Licensing District.—W.E.P., 23/1/82. Telegram to P.M., 23/1/82.

No. 5.

Telegram from Under-Secretary of Justice to Police Magistrate, Forbes.

[Urgent]

23/1/82.

In reply to telegram of this day, please submit names of two suitable members for Licensing Court for Forbes District, to act in conjunction with you as Licensing Magistrate, in terms of circular of 5th instant. Court to be for Forbes for the present.

No. 6.

Police Magistrate, Forbes, to Under-Secretary of Justice.

Sir,

Court-house, Forbes, 24 January, 1882.

In reply to your circular letter of the 5th instant, requesting me to convene by circular a special meeting of all the Magistrates resident within the Police District of Forbes, for the purpose of assisting the Minister of Justice by suggesting the names of suitable gentlemen as members of Licensing Court for the Forbes District. I have the honor to inform you that such meeting was duly convened for this day, and it was unanimously agreed by the Magistrates present to submit the following names, as members of the Licensing Court for this district, viz. :—

Ernest A. L. Sharpe, Police Magistrate (official member), and William Brooke of Forbes, and James Twaddell, of near Forbes, as members of the said Court.

I have, &c.,  
ERNEST A. L. SHARPE,  
Police Magistrate.

No. 7.

Clerk of Petty Sessions, Parkes, to Under-Secretary of Justice.

Sir,

Police Office, Parkes, 24 January, 1882.

I have the honor, by direction of the Bench of Magistrates at Parkes, to inform you, that at a meeting held by them at Parkes, on the 24th instant, to suggest the names of three gentlemen to form the Licensing Court for the Parkes District under the new act, that the gentlemen named as per margin were chosen to be submitted to you as fit and proper persons to hold such Courts.

I have, &c.,  
WM. C. WESTON.

No. 8.

Bench of Magistrates, Condobolin, to The Minister of Justice.

Sir,

Court-house, Condobolin, 3rd February, 1882.

We have the honor to request, in the interest of Justice and the public generally residing in this locality, that you will be pleased as soon as time will permit, to take the necessary steps for the appointment of a Licensing Board under the new act, intituled, the "Licensing Act of 1882," at Condobolin.

There are about twenty licensed publicans whose business in respect to licensing, &c., is transacted at Condobolin, as also wine and spirit merchants and proprietors of billiard-rooms, whose journeys to Forbes would vary from 60 to 160 miles, unless the required appointment is made. We mention these facts, considering that under present circumstances much unnecessary loss of time and expense must necessarily be incurred by all parties concerned, and which under altered conditions may be easily avoided.

We have, &c.,  
CHARLES BURCHER, J.P.  
MATTHEW BOULTON, J.P.  
HUGH E. STEVENSON, J.P.  
For the Bench of Magistrates in Petty Sessions assembled.

Will Bench be asked to submit names of two eligible gentlemen to act as members of Licensing Court, Condobolin, in conjunction with Mr. Sharpe, the visiting Police Magistrate, who it is presumed will be the Licensing Magistrate, &c., of the said Court. Submitted.—31/3/82. No.—W. J. F.

No. 9.

Minute of Minister of Justice.

ASK Reginald Dowling Esq., J.P., if he will act for Forbes District?—W.J.F., 25/2/82.

Telegram accordingly, 25/2/82.

## No. 10.

Telegram from Reginald Dowling, Esq., Forbes, to Under-Secretary of Justice.

27 February, 1882.

WILL accept seat on Licensing Board, but should like to know my colleagues.

## No. 11.

H. H. Cooke, Esq., M.P., to The Minister of Justice.

Dear sir,

Forbes, 11 March, 1882.

For your information I beg to send you the newspaper extract *re* the Licensing Magistrates at Forbes. It is as near as can be what the public think, myself among them.

I expect to be in Sydney next week, and will have to see you on the subject.

Believe me, &c.,

HENRY H. COOKE.

## [Enclosure.]

Extract from the "Forbes and Parkes Gazette, Lachlan and Bogan Advertiser," Friday, 10 March, 1882.

Nor long ago the Magistrates of the Forbes District, in accordance with instructions received from the Minister of Justice, met for the purpose of electing two of their members to occupy the position of Licensing Magistrates for the year. Messrs. Twaddell and Brooke were unanimously recommended, and their names in due course were submitted to the powers that be. The gazettement of these gentlemen was naturally regarded merely as a matter of time, it being confidently anticipated that the decision of the Local Magistrates would be endorsed without questioning. Alas for the vanity of human hopes, and the futility of mundane schemes, these anticipations were not borne out, and last Friday's Gazette contained the official intimation that Messrs. W. Brooke and Reginald Dowling were duly appointed Licensing Magistrates for the (to be defined) Licensing District of Forbes. Now, we have no objection to either of these gentlemen, though some folks will say that, considering his position, the former would do well gracefully to retire; but it cannot be denied that the action of the Department in declining to appoint Mr. Twaddell, after his having been unanimously chosen by his brother Magistrates, is an insult alike to him and to the whole of the Forbes Bench. Mr. Twaddell is a gentleman of sterling worth and unblemished reputation, has lived over forty years in the district, and it is to his honor that it can be said that no more popular man lives in the neighbourhood. During all the time he has been a settler on the Lachlan he has proved himself an intelligent, upright, shrewd man, and for the position to which he was chosen none better could have been found. Why, then, we would simply ask, has the nomination of the Forbes Bench been thrown aside, whereas, in nearly every other instance, the recommendations of the Local Magistrates have been endorsed?

We have every confidence in Mr. Dowling, who is a good, worthy, sensible, man; but, in the interests of justice, we would ask why such a slight should have been cast, first upon Mr. Twaddell, and secondly upon the whole Bench. Had the other proposed gentleman's name been left out instead of Mr. Twaddell's, we should not have been surprised. Then we should have had two disinterested gentlemen altogether outside the influence of the trade. Depend upon it, some backstairs influence has been at work, and it would not be difficult to discover whence it arises.

## No. 12.

H. H. Cooke, Esq., M.P., to The Minister of Justice.

*Re* the Licensing Court at Forbes.

Sir,

Forbes, 5 April, 1882.

I am pressed by a number of my constituents at Forbes to ascertain particulars in reference to the above Licensing Court.

In compliance with a circular request from the Police Magistrate, of Forbes, the Magistrates of the district met in the Court-house on the 24th January last, "for the purpose of assisting the Minister for Justice by suggesting the names of suitable gentlemen as members of the Licensing Court, under the new Act, 45 Vic. No. 14."

There was an unusually large number of Magistrates present, the Police Magistrate in the chair. The names of Mr. James Twaddell and Mr. William Brooke were, by unanimous consent, recommended, and the Police Magistrate, Mr. Sharpe, spoke his hearty concurrence. No other names were suggested by any one for the position.

Much to the surprise of the people of the district, and without any intimation or notice whatever to Mr. Twaddell or other of the Justices, or any other person, official or otherwise, so far as I am aware, Mr. Twaddell's name was omitted in the appointment, and Mr. Reginald Dowling, J.P., was appointed instead.

Now there is no objection whatever to Mr. Dowling, he is a gentleman deservedly held in esteem; but Mr. Twaddell and his many friends feel that a most unwarrantable insult has been offered him, and the Magistrates have, to put it mildly, been made the subject of a gratuitous slight; and they have been the means of casting an indignity which not one of them would wittingly do upon that gentleman, and which I am sure, sir, you could never have intended. I question if there is a single Magistrate in the Forbes district who is more highly esteemed than Mr. James Twaddell, who has been a resident here for about forty years, and against whom, so far as I am aware, not a single word is spoken. I have the honor, as the representative of the district, to ask you to be good enough to inform me the reason why Mr. Twaddell was not appointed, after having been unanimously recommended by his brother Magistrates. Perhaps you have been made the victim of false report; if so, it is only fair to all concerned that the matter should be put right.

I may here remark that if such a course is continued with regard to the Magistracy generally, it will not be difficult to foretell the mischief which will be sure to result from such a procedure.

Awaiting your reply,

I am, &c.,

HENRY H. COOKE.

## No. 13.

Minister of Justice to H. H. Cooke, Esq., M.P.

My Dear Sir,

Department of Justice, Sydney, 17 April, 1882.

I have received your letter of the 5th instant, the complaint you urge is this,—I asked the magistrates at Forbes to suggest for my assistance the names of gentlemen suitable to act as members of the Licensing Court in that district. I acted upon their suggestion as to one gentleman whose name was given me, but not as to the other. As to this other whom I appointed you say "there is no objection whatever to him, he is a gentleman deservedly held in esteem." The whole complaint then is that having asked suggestions of these gentlemen, I ventured to ask and receive other suggestions also, and that although in acting upon all the information available I selected an unobjectionable man, I did not fix upon *both* the names suggested by the Magistrates. To this I must plead guilty to the fullest extent, and can only plead in extenuation that it has been an old failing of mine to judge for myself and act for myself where I had an important duty to perform.

I greatly regret that any friend of the gentleman whom I did not appoint should feel that a most unwarrantable insult had been offered him. Such a supposition appears to me itself most unwarrantable, and not the less so is the idea that the Magistrates have been made the subjects of a gratuitous slight,—nor can I agree with you that because two of three gentlemen are chosen to a position, where two only can be appointed an indignity is thereby cast upon the third. I at any rate had no such intention,—I simply thought, rightly or wrongly, from the information which was then available that I was selecting the two best men, and whenever I am of that opinion I fear my old failing of judging for myself and acting for myself is likely to stick to me, at the same time I must beg of you to express to any of those gentlemen who have taken umbrage my real regret that any conduct of mine should have offended them.

You can scarcely suppose that acting as a Minister of the Crown I should give you my reasons in detail for appointing one gentleman in preference to another, but I feel it due to the gentleman who was not appointed to say that had I not fixed upon the gentleman I did I should in all probability have appointed him.

With regard to the last paragraph of your letter I cannot refrain from saying that if Magistrates generally were inclined to take umbrage whenever their advice was not followed to the fullest extent, the result would be that Ministers would not feel justified in asking their advice at all, and so the country would lose much that might be valuable and useful, a result however, which from my knowledge of the general good common sense of Magistrates I am not inclined to fear.

I am, &c.,  
W. J. FOSTER.

## No. 14.

H. H. Cooke, Esq., M.P., to The Minister of Justice.

My dear Sir,

Forbes, 30 June, 1882.

I have just returned from a long trip into the back west country, and find on my return your favour *re* the Parkes and Condobolin Licensing Courts. I regret I was not at home to answer your letter, and hope if you thought I wilfully neglected you will not now think so.

I see by the Government Gazette you have made the appointments of each Licensing Court, and I am sure you have done wisely. Mr. Lachlan M'Lean would be a very good member of the Court for Condobolin, but he lives twenty miles out of the town. Mr. Stevenson is, as I told you when in Sydney, an aerated water manufacturer, but he is a thoroughly honest, sober, and conscientious man.

There is a slight error in spelling. Tom is printed *Thom*, and Stevenson printed *Stevens* in the Government Gazette. It should be Thomas Tom and Hugh Espie Stevenson. I hope to see you in Sydney on or about the 12th of July.

With best wishes for your health and happiness,

I am, &c.,  
HENRY H. COOKE.

Necessary errata published in Gazette of 11th instant. Copy herewith.—T. E. M'N., 12/7/82.

## No. 15.

H. E. Stevenson, Esq., J.P., to The Under-Secretary of Justice.

Sir,

Condobolin, 4 July, 1882.

In the Gazette notifying my appointment as a member of the Condobolin Licensing Court there is a mistake in the name, it should be Hugh Espie Stevenson.

I have, &c.,  
HUGH E. STEVENSON.

The necessary steps have been taken to correct mistake in name, and the usual notice will be published in this day's Government Gazette, of which Mr. Stevenson may be informed. 7/7/82. Seen.—W.J.F., 7/7/82. Mr. Stevenson informed. 12/7/82.

## No. 16.

Thomas Tom, Esq., J.P., to The Under-Secretary of Justice.

Sir,

Parkes, 4 July, 1882.

Adverting to your circular letter of the 28th ultimo, No. as margin, appointing me Chairman <sup>82-7,441.</sup> of the Parkes Licensing District, under the new Act, I have the honor to inform you I shall be glad to accept the same, but beg you will please have my name Gazetted correctly, viz., Thomas Tom, J.P.

I shall at once communicate with the other gentlemen appointed, and inform you, in due course, of their acceptance of the office. The instructions for necessary arrangements for the opening of the Court for dispatch of business have been given to Mr. Weston, C.P.S.

I have, &c.,  
THOMAS TOM.

The necessary steps are being taken to correct name in early issue of Gazette. Subd., 6/7/82. Seen.—W.J.F., 7/7/82. Inform Mr. Tom of errata. 7/7/82. Mr. Tom informed, 12/7/82.

No. 17.

## No. 17.

Messrs. A. Cleve &amp; Co. to The Minister for Justice.

Sir,

Condobolin, 7 July, 1882.

We beg to draw your attention to the appointment made by the Government to the Condobolin Licensing Bench.

We notice the name of a gentleman, Mr. H. E. Stevenson of this town, whose living is made entirely out of publicans, his trade being a manufacturer of aerated water and cordials.

We cannot for one moment think that the Government can have been aware of this fact when making this appointment, as no more unsuitable person could have been selected.

Of course an appointment like this enables him to more successfully compete with others engaged in the trade, who, moreover, pay a heavy license fee as wine and spirit merchants.

Trusting you will take steps to remedy this injustice,

We have, &amp;c.,

ALFRED CLEVE &amp; CO.

Acknowledge.—W.J.F., 13/7/82.

Messrs. Cleve &amp; Co.—14/7/82.

## No. 18.

The Under-Secretary of Justice to Thomas Tom, Esq., J.P.

Sir,

Department of Justice, Sydney, 12 July, 1882.

Referring to your letter of the 4th instant, I am directed by the Minister of Justice to invite your attention to errata published in the Government Gazette of 7th instant, notifying that in the Supplement to the Government Gazette of 27th June, 1882, the name "Thomas Thom" should read "Thomas Tom, Esq., J.P."

I am, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

## No. 19.

The Under-Secretary of Justice to H. E. Stevenson, Esq., J.P.

Sir,

Department of Justice, Sydney, 12 July, 1882.

In reply to your letter of the 7th instant, I am directed by the Minister of Justice to invite your attention to *errata*, published in the Government Gazette of 7th instant, notifying that in the Proclamation published in the Supplement to the Government Gazette of 27th June, 1882, the name "Hugh E. Stevens," should read "Hugh Espie Stevenson, Esq., J.P."

I have, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

## No. 20.

Thomas Tom, Esq., J.P., to The Under-Secretary of Justice.

Sir,

Bartley's Creek, Parkes, 13 July, 1882.

Referring to your circular of the 28th June last, and numbered as above, I have the honor to inform you that I have ascertained from Mr. J. G. Lackey, his willingness to act as member of the Licensing Court for the Licensing District of Parkes, but Mr. S. Smith declines to take any part in it, and has up to the present time refused to be sworn in as a Magistrate, although Gazetted as one long since. I have much pleasure in submitting for your consideration the name of Mr. Benjamin Talbot of Parkes, draper, as a gentleman in every way fitted to take Mr. Samuel Smith's place, being steady, intelligent, of good business habits, and one who does not hold extreme views, and moreover is a resident of the Town. If I may judge from the past, I would say there is but little use in appointing any person living any great distance from the town, as such seldom attend Court.

If Mr. Talbot be appointed one of the Court, perhaps it would be well to send a writ of *dedimus potestatem* addressed to Mr. W. C. Weston empowering him to administer the usual oaths at once.

I have, &amp;c.,

THOMAS TOM,

P.S.—I forgot to mention that I have spoken to Mr. Talbot, and he is willing to give me all the assistance he can, if appointed a Member of the Licensing Court.

T. T.

Ask Mr. Smith if I am correctly informed that he declines to act or to be sworn in as member of the Licensing Court, as if this be so, it would be more convenient for him to resign, so as to have the place filled.—W.J.F., 17/7/82.

Mr. S. Smith.—17/7/82.

## No. 21.

The Under-Secretary of Justice to Messrs. A. Cleve &amp; Co., Condobolin.

Gentlemen,

Department of Justice, Sydney, 14 July, 1882.

I am directed by the Minister of Justice to acknowledge the receipt of your letter of the 7th instant, making certain observations with reference to the appointment of Mr. H. E. Stevenson as a member of the Licensing Court at Condobolin.

I have, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

No. 22.

## No. 22.

The Under-Secretary of Justice to S. Smith, Esq., J.P., Parkes.

Sir,

Department of Justice, Sydney, 17 July, 1882.

Representations having been made that you decline to act or to be sworn in as a member of the Licensing Court at Parkes, I am directed by the Minister of Justice to inquire whether he has been correctly informed on this point, as if this be so, it would be more convenient for you to resign so as to have the place filled up.

I have, &amp;c.,

W. E. PLUNKETT,  
Under-Secretary.

## No. 23.

Telegram from H. H. Cooke, Esq., M.P., Parkes, to The Under-Secretary of Justice.

Mr. Benjamin Talbot has been nominated for Licensing Bench, Parkes. I heartily concur; this appointment will be appreciated here; see you Friday.—17/7/82.

Let Mr. Talbot be appointed on Mr. Smith resigning.—W.J.F., 18/7/82.

## No. 24.

Mr. S. H. Smith, J.P., to The Minister of Justice.

Sir,

Parkes, 25 July, 1882.

I have the honor to reply to yours of the 17th instant, in reference to my appointment of Magistrate to the Licensing Bench at Parkes, I beg to request that you will accept my resignation, as it is very probable that I will be leaving the district shortly, and would not be able to give my services.

I have, &amp;c.,

SAMUEL H. SMITH.

Inform Mr. Smith in terms of the circular of 6th May last.—W.J.F., 27/7/82. Mr. S. H. Smith informed, 31/7/82. Prepare Minute Paper to appoint Mr. Talbot, 7/8/82. Minute herewith, 8/8/82.

## No. 25.

The Under-Secretary for Justice to S. H. Smith, Esq., J.P.

Sir,

Department of Justice, Sydney, 31 July, 1882.

Referring to your letter of the 25th instant, tendering your resignation of the appointment of Magistrate to the Licensing Bench at Parkes, I am directed by the Minister of Justice to invite your attention to section 6, subsection 8 of the Licensing Act, which requires the resignation of an appointed member to be in writing under his hand, addressed to the Governor; any resignation may, however, be sent, under cover, to the "Under-Secretary of Justice," for transmission to His Excellency in due course.

I have, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

## No. 26.

Minute-Paper for the Executive Council.

*Subject*:—Appointment of Member of Licensing Court at Parkes, *vice* Smith, resigned.

Department of Justice, Sydney, 8 August, 1882.

I RECOMMEND that Benjamin Talbot, Esquire, be appointed to be an appointed Member of the Licensing Court at Parkes, *vice* Samuel H. Smith, Esquire, J.P., resigned.

W. J. FOSTER.

The Executive Council approve of the appointment herein recommended.—ALEX. C. BUDGE, Clerk of the Council. Min. 82/36.—9/8/82. Confirmed.—15/8/82. Approved.—A.L. 9/8/82. Gazetted.—10/8/82. Mr. Talbot, Inspector-General of Police, and Treasury informed.—10/8/82.

## No. 27.

Telegram from R. Talbot, Esq., J.P., to Under-Secretary of Justice.

10/8/82.

*Re* your telegram, please have *dedimus potestatem* sent to Mr. Weston, J.P., Parkes, to swear me in. The Prothonotary for usual action.—11/8/82.

## No. 28.

The Under-Secretary of Justice to The Prothonotary of the Supreme Court.

[Urgent.]

Sir,

Department of Justice, Sydney, 11 August, 1882.

I am directed by the Minister of Justice to request that you will have the goodness to cause a writ of *dedimus potestatem* to be forwarded to William Clifton Weston, Esq., J.P., Parkes, to empower him to administer the necessary oath to Benjamin Talbot, Esquire, as an appointed Member of the Parkes Licensing Court.

I am to add that as this application is made for the public convenience, the writ should be issued without charge.

I have, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

No. 29.

## No. 29.

H. H. Cooke, Esq., M.P., to The Minister of Justice.

Dear Sir,

Forbes, 24 August, 1882.

For several reasons I must once more beg leave to trouble you in the matter of the Forbes Licensing Court.

Do not, Sir, for a moment suppose that I fail to appreciate the force of your objection. That as a Minister of the Crown you should be expected to give your reasons in detail for your action in this case, and among my constituents I have so expressed myself; but notwithstanding these representations, I am sorry to say, a great deal of dissatisfaction still exists.

The recommendation made by the full Bench was unanimous, and with the full knowledge of the parties, and as no third person was nominated, I must with all deference to you, repeat, that I think the nomination of the Bench, under the circumstances, should have been respected to the full. Of the two, Mr. Twaddell's appointment would have been the most fitting, and had the name of the other (whose nomination by the way, I seconded) been omitted, the surprise would not have been so great.

The non-appointed nominee feels that he is materially prejudiced as to his good name and position in being thus, without any ostensible reason, refused the appointment after the publicity attending the recommendation of the Bench.

The action of the Magistrates was open and above board, and I am quite sure you personally desire nothing otherwise; but that your subsequent advisers have so acted, I have some difficulty in believing.

My addressing you on this occasion gives me an opportunity of asking you to be good enough to place me in a position of dealing with this difficulty; that Mr. Twaddell's name among his fellow magistrates, townsmen, and friends, may remain as before that unfortunate nomination—untarnished.

I have, &amp;c.,

HENRY H. COOKE.

## No. 30.

The Minister of Justice to H. H. Cooke, Esq., M.P.

Dear Sir,

Department of Justice, Sydney, 28 August, 1882.

I regret much that my former answer was not satisfactory to you and your friends at Forbes. It is impossible for me to say more or do more. If I had the inclination I could not remove these gentlemen, who have been appointed to the Licensing Court, without any fault on their part, and this you do not appear to desire.

The Bench think their nomination ought to have been had regard to and acted upon, although I was of opinion that the gentleman I recommended was the fittest to be appointed. I may be wrong, and they may be right; but it appears to be admitted on both sides that the gentlemen appointed, as well as the one who was not, are each valuable and respectable gentlemen, who would have been fitted for the position. From the information I was able to obtain at the time I made the appointment, including the recommendation of the Bench, I thought the one I appointed was the best fitted for the office; and, if I have been wrong, no one can be more sorry than I should be, for I will not yield to any man in this Colony as to the interest I take in having upon the Licensing Courts the gentlemen who will best carry out the Act.

I have taken the advice of Benches of Magistrates, in common with that of gentlemen whom I believed to be trustworthy in other positions, including a large number of Members of Parliament, and I have never allowed the recommendations of one to prevail over the other, except when I have been convinced that they were the more correct. I can never allow the recommendation of a Bench of Magistrates, even of a man I believe to be qualified, to induce me to recommend to His Excellency for appointment that person, even though qualified, in preference to another whom I believe to be more qualified; and this principle I must act upon whether the suggestion of the Magistrates has been asked by me or not; and I am quite sure that gentlemen of honor and intelligence in their position will upon deliberate consideration see that the principle I contend for is right.

I have, &amp;c.,

W. J. FOSTER.

## No. 31.

R. Dowling, Esq., J.P., Forbes, to The Minister of Justice.

Sir,

Wandary, Forbes, 2 October, 1882.

I have the honor to tender you my resignation as a Member of the Licensing Bench of Forbes. I should have done so long since had I not hoped to see an alteration in the Act on the re-assembling of Parliament. Seeing no prospect of such being the case, I can no longer assist in administering an Act in so many ways opposed to my views.

The Act may be of some good in Sydney or other large towns, but I consider very detrimental to the comfort and convenience of the travelling public in the interior, a class, I think, entitled to much consideration, as well as tending much to increase the number of shanties.

I have, &amp;c.,

REGINALD DOWLING.

The resignation should be addressed to the Governor, as required by the Act, but may be placed under cover to U.S. of this Department.—W.J.F., 5th October, 1882. Mr. Dowling informed, 6/10/82.

## No. 32.

The Under-Secretary of Justice to R. Dowling, Esq., J.P., Forbes.

Sir,

Department of Justice, Sydney, 6 October, 1882. ¶

In acknowledging the receipt of your letter of the 2nd instant, tendering your resignation as a Member of the Licensing Court at Forbes, I am directed by the Minister of Justice to inform you that your resignation should be addressed to His Excellency the Governor in terms of the Act, but may be placed under cover to the Under-Secretary of Justice.

I have, &amp;c.,

W. E. PLUNKETT,

Under Secretary.

1882.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## LICENSING MAGISTRATES AT ARMIDALE.

(CORRESPONDENCE RESPECTING APPOINTMENT OF.)

*Ordered by the Legislative Assembly to be printed, 29 September, 1882.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 25th August, 1882, That there be laid upon the Table of this House,—

“Copies of all Papers and Correspondence in connection with the appointment of Licensing Magistrates at Armidale.”

*(Mr. Copeland.)*

## SCHEDULE.

NO.	PAGE.

20. The Under-Secretary of Justice to Mr. Jackes, in reply to same. 22 June, 1882 .....	6

## LICENSING MAGISTRATES AT ARMIDALE.

### No. 1.

Under-Secretary of Justice to Police Magistrate, Armidale.

Sir,

Department of Justice, Sydney, 5 January, 1882.

I am directed by the Minister of Justice to invite your special attention to the provisions of the Licensing Act of 1882, 45 Vic. No. 14, which was duly published in a supplement to the Government Gazette of 23rd December last, and came into operation on the 1st January instant, and more particularly to section 4 (a copy of which is hereunder given), from which it will be seen that Police Magistrates are empowered, pending the proclamation of Licensing Districts, to exercise all the powers and authorities of a Licensing Court. The following is a copy of the section referred to:—

4. All applications for licenses and all other matters which under this Act may be heard determined and dealt with by a Licensing Court or by a Licensing Magistrate shall be heard determined and dealt with by a Police Magistrate sitting at the Court of Petty Sessions nearest to the place where the applicant resides or where the matter arises whenever and so long as such place shall not be comprised within the boundaries of a Licensing District proclaimed under this Act. And such Magistrate while so sitting shall have and may exercise all the powers and authorities of a Licensing Court.

You will observe that under the concluding portion of section 2, *existing licenses are to be held in all respects under and subject to the provisions of the new Act*, unless otherwise therein specially provided for.

Mr. Foster thinks that, unless in cases of offences against the Act, you would do well, as far as possible, to defer action under the provisions of this Act until the Licensing Courts shall have been appointed.

I am at the same time to request that you will have the goodness to convene by circular, with the least possible delay, a special meeting of all the Magistrates resident within the Police District of Armidale, for the purpose of assisting the Minister of Justice by suggesting the names of suitable gentlemen, whether Justices of the Peace or not, as members of the Licensing Court, under section 6 of the said Act, subject to the restrictions imposed by sub-section 4 of the last-named section, which is in the following terms, viz:—

- (iv.) Every person shall be disqualified from holding office as the member of a Licensing Court who is interested beneficially in the manufacture or sale of fermented or spirituous liquors or in any premises licensed or proposed to be licensed under this Act or who holds any license whatsoever within the meaning of this Act or is beneficially interested in any trade or calling exercised under any such license. And any person so disqualified who shall knowingly and wilfully act as a member of such Court shall be guilty of a misdemeanour.

I am to add that as the appointment of the members of the Courts is vested in the Governor and Executive Council, you will please to report, for the information of the Minister of Justice, should you see any reason to disapprove of any of the gentlemen whose names may be suggested.

I have, &c.,

W. E. PLUNKETT,

Under-Secretary.

### No. 2.

Telegram from Police Magistrate, Armidale, to Under-Secretary of Justice.

*Re* your letter of 5th instant, instructing me to convene meeting of Magistrates at Armidale for nomination of members of Licensing Court, should not meetings be convened also at Walcha and Bendemeer, as, I presume, Licensing Courts will be established at those places, and as the Magistrates there are not likely to attend at Armidale. 11 Jan., 1882.

Ask Police Magistrate to comply with terms of circular, and submit names of two members for Licensing Court, Armidale district. No decision in reference to Walcha and Bendemeer. Information should be furnished without further delay. Most urgent.—W.E.P. Telegram to P.M., 20/1/82.

### No. 3.

Telegram from Under-Secretary of Justice to Police Magistrate, Armidale.

20 January, 1882.

In reply to telegram of 11th instant, you should comply with terms of circular letter, and submit names of two members for Licensing Court, Armidale District. No decision in reference to Walcha and Bendemeer. Information should be furnished without further delay. Most urgent.

### No. 4.

Telegram from Police Magistrate, Armidale, to Under-Secretary of Justice.

20/1/82.

MEETING of Magistrates convened at Armidale, agreed to recommend Messrs. Richard Hargrave, of Armidale, grazier, and Barnard Aaron Moses, of Armidale, tanner, as members of the Licensing Court.

### No. 5.

Telegram from Police Magistrate, Armidale, to Under-Secretary of Justice.

21/1/82.

MEMBER of Licensing Court nominated is Barnett Aaron Moses, not Barnard Aaron Moses.

No. 6.

## No. 6.

## The Police Magistrate, Armidale, to Under-Secretary of Justice.

Sir,

Police Office, Armidale, 26 January, 1882.

I have the honor to report that, in compliance with the instructions contained in your circular letter of the 5th instant, I convened a meeting of all the Magistrates in the district of Armidale, for the purpose of suggesting to the Minister of Justice the names of suitable gentlemen to act as members of the Licensing Court here.

The meeting was held at noon on the 20th instant, and the result was immediately afterwards communicated to you by telegram. I thought at the time that to forward by letter, as well as by telegram, the names of the gentlemen nominated was unnecessary. I now, however, write this letter in view of the possibility that my telegram may have been overlooked or have gone astray.

The gentlemen nominated by a majority of the Magistrates present were Mr. Richard Hargrave, of Armidale, grazier, and Mr. Barnett Aaron Moses, of Armidale, tanner and manufacturer. I may add, that I see no reason to disapprove of either of the gentlemen whose names have been suggested by the Magistrates.

I have, &amp;c.,

J. MAIR, P.M.

## No. 7.

## Telegram from Mr. T. J. Kearney, Armidale, to Minister of Justice.

1/2/82.

RESOLUTION passed last evening.—Good Templars Lodge, representing members this district—three hundred, respectfully protesting against appointment of Charles Graham Wilson to Licensing Board, Armidale. Approving two gentlemen recommended by local Bench, and inviting your earnest consideration.

## No. 8.

## Telegram from Mayor of Armidale to Under-Secretary of Justice.

9 February, 1882.

As a further protest against appointment of Charles Wilson to the Licensing Board, at one of the largest public meetings held in Armidale last night, resolution was unanimously and enthusiastically carried, approving recommendation of Messrs. Hargrave and Moses by local Bench. Objections raised to Wilson: his connection as a relative with John Moore, one of the largest wine and spirit merchants in district, and his interest as auctioneer and agent in public-house property, some of which he is at present valuing, with view to transfer of license. I have been authorized to forward above to you.

## No. 9.

## R. Hargrave, Esq., to Colonial Secretary.

Sir,

Harewood, Armidale, 8 March, 1882.

It being, I suppose, the proper course for me to forward through you for His Excellency the Governor, my resignation of the office of a member of the Licensing Board for Armidale, I beg now to enclose the same to you for presentation.

I have, &amp;c.,

RICHD. HARGRAVE.

[Enclosure.]

To His Excellency the Right Honorable Lord Augustus William Frederick Spencer Loftus, K.G., C.B., &c., Governor of the Colony of New South Wales.

May it please your Excellency,—

Harewood, Armidale, 8 March, 1882.

Under Gazette notice, 1st March, 1882, No. 89, I observe that I am appointed a member of the Licensing Board for the district of Armidale.

In accordance with sub-section XIII of section No. 6, 45 Victoria No. 14, I have now the honor to resign the office to which I have been appointed.

I have, &amp;c.,

RICHD. HARGRAVE.

The Minister of Justice.—JOHN R., 13/3/82.  
13/3/82. His Excellency.—W.J.F., 15/3/82.  
17/3/82. May be filed.—W.J.F., 20/3/82.

The Under-Secretary of Justice.—C.W., B.C.,  
Colonial Secretary, for Executive Council.—A.L.,

## No. 10.

## The Bench of Magistrates, Armidale, to Under-Secretary of Justice.

Sir,

Armidale, 14 March, 1882.

With reference to circular letter to Police Magistrates of 5 January last, requesting meeting of Magistrates to be convened for the purpose of suggesting names of suitable gentlemen as members of the Licensing Court, we do ourselves the honor to point out what appears to us the extraordinary course adopted in the appointment of the members of the Licensing Court for Armidale.

The names of the gentlemen we suggested appeared to the majority the most suitable. In accordance with the circular, it was not necessary that they should be Justices of the Peace, and we confess to a feeling of very great surprise when we saw by Gazette notice that one of our nominees had been struck off and the name of another gentleman, whom the majority of the Bench did not deem suitable, substituted.

We

We are perfectly aware the appointment rests with the Government and Executive Council, but it does appear to us to have been rather unnecessary that the opinion of the Magistrates should have been asked, and then probably from some political motive ignored. We think it due to ourselves to enter our respectful protest at such treatment.

W. C. Proctor, Esq., M.P., to The Minister of Justice.

Sir,

Pitt-street, Sydney, 18 March, 1882.  
Mr. Richard Hargrave having resigned his position as a member of the Licensing Court, Armidale, I have the honor to suggest the name of Mr. Benjamin John Thomas Bray Warner, J.P., of Tilbuster, Armidale, as Mr. Hargrave's successor. Mr. Warner is a squatter, the owner of Tilbuster Station, and from his education and social standing I think he is eminently qualified for the position. Having inquired, I have every reason to believe that Mr. Warner will accept the appointment, and that it will meet with general approval.

I have, &c.,

W. C. PROCTOR.

Telegraph to Mr. Warner to ask whether he will accept.—W.J.F., 18/3/82.  
Telegram accordingly, 18/3/82.

## No. 17.

## Minute of Minister of Justice.

WITH regard to the letter of Magistrates, bearing date March 11th, but apparently received into this office April 21st, inform the writers that I regret that the gentlemen signing that letter feel aggrieved at my taking the course which, under all the circumstances, I thought best in respect to the appointment of a Licensing Court at Armidale, and still more that they should think it due to themselves to protest against the treatment they have received in not having their advice acted upon after it was asked. I can assure them that no disrespect was meant to them collectively or individually. I never meant by the circular sent to them in the first instance to delegate to them directly or indirectly the authority vested by the law and Constitution in the Minister to recommend to the Governor the persons to be appointed members of the Licensing Court, but simply to ask their assistance by suggesting the names of suitable persons for my consideration. Upon consideration of all the circumstances and information attainable, I acted upon their suggestion as to one gentleman, not merely because they had suggested him, but because on the whole I thought it best for the public interest, and I recommended another who had not been suggested by them, for exactly the same reason.

I think the expression in their letter that their opinion was "probably for some political motive ignored," is unfortunate; for although the acts of the Government are generally *political*, in the original sense of the word,—that is to say, pertaining to the general government of the State,—yet *political motives* are frequently understood to mean *unworthy party purposes*, a sense in which I feel assured the Magistrates have too much respect for themselves, while holding Her Majesty's Commission of the Peace, to attribute to the action of Her Majesty's Ministers for the time being.—W.J.F., 2/5/82.—The Bench of Magistrates, Armidale, 2/5/82.

## No. 18.

## Under-Secretary of Justice to Bench of Magistrates, Armidale.

Gentlemen,

Department of Justice, Sydney, 2 May, 1882.

With reference to your letter of the 14th March last (received at this Department on the 21st ultimo), respecting nominations made by you of members of Licensing Court at Armidale, I am directed to inform you that the Minister of Justice has written a Minute thereon, of which the following is a copy, viz. :—

"I regret that the gentlemen signing this letter feel aggrieved at my taking the course which under all the circumstances I thought best in respect to the appointment of a Licensing Court at Armidale, and still more that they should think it due to themselves to protest against the treatment they have received in not having their advice acted upon after it was asked. I can assure them that no disrespect was meant to them collectively or individually. I never meant by the circular sent to them in the first instance to delegate to them, directly or indirectly, the authority vested by the law and Constitution in the Minister to recommend to the Governor the persons to be appointed members of the Licensing Court, but simply to ask their assistance by suggesting the names of suitable persons for my consideration.

"Upon consideration of all the circumstances and information attainable, I acted upon their suggestion as to one gentleman, not merely because they had suggested him, but because on the whole I thought it best for the public interest, and I recommended another who had not been suggested by them, for exactly the same reason. I think the expression in their letter that their opinion was 'probably from some political motive ignored,' is unfortunate; for although the acts of the Government are generally *political* in the original sense of the word—that is to say, pertaining to the general government of the State—yet *political motives* are frequently understood to mean *unworthy party purposes*—a sense in which I feel assured the Magistrates have too much respect for themselves, while holding Her Majesty's Commission of the Peace, to attribute to the action of Her Majesty's Ministers for the time being."

I have, &amp;c.,

W. E. PLUNKETT,

Under-Secretary.

## No. 19.

## Franklin Jackes, Esq., J.P., to The Minister of Justice.

Sir,

Armidale, 16 June, 1882.

I wish to state, for your information, that the person you have appointed a member of the Licensing Board at Armidale, Benjamin John Thomas Bray Warner, Esq., in lieu of Richard Hargrave, Esq., is a free selector at Moree, having selected 640 acres in that district in February last. I am aware

he

he has a small station near Armidale, Tilbuster, where his family reside, but I fail to see how he can possibly comply with the conditions of the Land Act as a selector in Moree and also attend the duties of the Licensing Bench at Armidale.

I have, &c.,  
FRANKLIN JACKES.

Inform Mr. Jackes that his letter has been received, but that I have no possible interest in Mr. Warner's private pursuits, so long as they are respectable and unconnected with the sale of liquor, and that I have every reason to expect that he will properly attend to his public duties, and that it is only in case of failure in this respect that I can interfere.—W.J.F., 21/6/82. Mr. Jackes informed.—22/6/82.

No. 20.

Under-Secretary of Justice to F. Jackes, Esq., J.P.

Sir,

Department of Justice, Sydney, 22 June, 1882.

In acknowledging the receipt of your letter of the 16th instant, respecting the appointment of Mr. J. T. B. Warner as a member of the Licensing Court, Armidale, I am directed by the Minister of Justice to inform you that he has no possible interest in Mr. Warner's private pursuits, so long as they are respectable and unconnected with the sale of liquor, and Mr. Foster has every reason to expect that he will properly attend to his public duties, and it is only in case of failure in this respect that he can interfere.

I have, &c.,  
W. E. PLUNKETT,  
Under-Secretary.

LICENSING BENCH, QUEANBEYAN.

---

No. 1.

A. Cunningham, Esq., to The Minister of Justice.

Sir,

Lanyon, Queanbeyan, 19 May, 1882.

At a meeting of the Licensing Court held at Queanbeyan on the 17th instant, the Court was adjourned until Wednesday, the 14th June, for the dealing with applications for licenses and renewals. The Court at Queanbeyan is composed of the Police Magistrate (Col. Russell), Mr. Thos. Rutledge, and myself. The former gentleman is at present absent on sick leave, and not likely to be in attendance on the 14th June. Will you be good enough to inform me what course should be adopted on that day in the event of Col. Russell not being in attendance, and also if any preliminary steps are necessary in the interval, in anticipation of such a contingency.

I have, &c.,

A. CUNNINGHAM.

Inquire of Colonel Russell whether he can attend to this Court on the 14th proximo, as it cannot be held without him unless he resigns his appointment as Licensing Magistrate.—W.J.F., 23/5/82. Telegram to P.M., 23/5/82.

---

No. 2.

Telegram from Under-Secretary of Justice to Police Magistrate, Queanbeyan.

23 May, 1882.

MINISTER of Justice would be glad to know whether you can attend Licensing Court on 14th proximo, as it cannot be held without you unless you resign your appointment as Licensing Magistrate. Please reply by wire. Urgent.

---

No. 3.

Telegram from Police Magistrate, Queanbeyan, to Under-Secretary of Justice.

24/5/82.

IN reply to your telegram of to-night, it is with deep regret I beg to tender my resignation as Chairman and Licensing Magistrate of the Licensing Court, my health not admitting of attending Court-house. Please appoint Andrew Cunningham, Esq., J.P., senior, in my place for 14th of June. \* \* \* \*

---

No. 4.

Minute Paper for the Executive Council.

*Subject*:—Appointment of Andrew Cunningham, Esq., J.P., to act as Licensing Magistrate at Queanbeyan. Department of Justice, Sydney, 6 June, 1882.

I RECOMMEND that Andrew Cunningham, Esquire, J.P., be appointed to act as Licensing Magistrate for the District of Queanbeyan.

W. J. FOSTER.

The Executive Council advise that the appointment herein recommended be approved.

ALEX. C. BUDGE,

Clerk of the Council.

Min. 82/27, 6/6/82. Approved.—A.L., 6/6/82. Gazetted, 9/6/82. Confirmed.—13/6/82.  
Mr. Cunningham informed by telegrams of 9 and 10/6/82. The Inspector-General of Police and Treasury informed, 16/6/82.

No. 5.

Telegram from A. Cunningham, Esq., Queanbeyan, to Minister of Justice.

7/6/82.

At the request of the Magistrates assembled here to-day, I have the honor to call your attention to my letter of the 19th ultimo.

Mr. Cunningham's letter has been attended to. He is appointed Licensing Magistrate, Mr. G. De Salis is a member of the Court, and Mr. Rutledge's place will soon be supplied.—W.J.F., 8/6/82. Telegram to Mr. Cunningham, 9/6/82.

---

No. 6.

Telegram from Under-Secretary of Justice to A. Cunningham, Esq.

9/6/82.

IN reply to your telegram, 7th instant, your letter 19th ultimo has been attended to. You are appointed Licensing Magistrate, Mr. De Salis, a member of the Court, and Mr. Rutledge's place will soon be supplied.

---

No. 7.

## No. 7.

## A. Cunningham, Esq., to The Minister of Justice.

Sir, Lanyon, Queanbeyan, 8 June, 1882.

I do myself the honor to remind you that my letter to you of the 19th ultimo, on business connected with the Licensing Court, remains unanswered, and that the 14th June is close at hand. I believe you are aware that the Police Magistrate is still absent from duty, and also that Mr. Rutledge has resigned his office as a member of the Licensing Court.

A meeting of Magistrates was convened last Tuesday to consider this matter, and I communicated the above by wire, but unfortunately marked the telegram "to collect," which has prevented it being delivered to you, thus causing further delay at a most inconvenient time. If it were not so, I should much prefer sending in my resignation to the Governor and being relieved of these duties.

I have, &c.,

A. CUNNINGHAM.

Has not Mr. Cunningham been fully apprised, and other necessary steps taken in this matter? Note precise action already taken.—W.E.P., 10/6/82. Yes, Mr. Cunningham, J.P., was advised by telegram yesterday (9th), of action taken, and is now in full possession of information. This letter is dated 8th instant, and was posted before receipt of above telegram. Mr. Cunningham's appointment was notified in yesterday's Gazette herewith.—T.M.N., 10/6/82. Acknowledge, and repeat the action taken as above.—W.E.P., 10/6/82. Telegram to Mr. Cunningham.—10/6/82.

## No. 8.

## Telegram from A. Cunningham, Esq., to Under-Secretary of Justice.

9/6/82.

REFER to my letter, 19th May; another just posted.

## No. 9.

## Telegram from Under-Secretary of Justice to A. Cunningham, Esq.

10/6/82.

IN reply to your letter of 8th instant, telegram was sent you yesterday, apprising you of your appointment as Licensing Magistrate, Queanbeyan, and also of Mr. G. F. De Salis as a member of the Court. Urgent.

## No. 10.

## A. Cunningham, Esq., to The Minister of Justice.

Sir, Court-house, Queanbeyan, 26 June, 1882.

Having completed all the business connected with the first meeting of the Licensing Court of this district, and, in conjunction with my coadjutor, fixed on 26th July as the day for holding the first quarterly meeting, I consider it now advisable that I should tender my resignation of the office of Licensing Magistrate, and have accordingly done so in a letter to His Excellency the Governor, which I send herewith.

I have, &c.,

A. CUNNINGHAM.

P.S.—This letter has been purposely held over since the above date, that I might attend the Court yesterday.—A.C., 4th July, 1882.

[Enclosure.]

## A. Cunningham, Esq., to His Excellency the Governor.

Sir, Court-house, Queanbeyan, 26 June, 1882.

Having intimated to the Honorable the Minister of Justice that I am desirous to retire from the office of Licensing Magistrate for this district, I have the honor to request that your Excellency will be pleased to accept of my resignation of that appointment.

I have, &c.,

A. CUNNINGHAM.

His Excellency.—W.J.F., 6/7/82. For Executive Council.—A.L., 7/7/82. It appears to be necessary to appoint Mr. Willans, Clerk of Petty Sessions. The appointment will last only until the return of a Police Magistrate, when Mr. Willans will have to resign. Let Mr. Willans be appointed Licensing Magistrate for Queanbeyan.—W.J.F., 19/7/82.

## No. 11.

## WINES, BEERS, AND SPIRITS.

No. 1.

Mr. J. K. Waters, Inspector of Liquors, &c., Melbourne, to The Chief Inspector of Distilleries, Sydney.

Sir, Distilleries and Excise Office, Custom House, Melbourne, 9 September, 1881.

I have the honor to inform you that I visited Sydney last week on leave of absence, with a view of making a personal application for an inspectorship under the new Licensing Act.

I presented to the Under-Secretary (Mr. Walker) my application, with letters of recommendation from the heads of this Department and approved of by the Hon. the Commissioner of Trade and Customs, in support of my application; but I was informed that the Act was still before Parliament and nothing could be done in the matter for the present.

As I am most anxious to get an appointment in New South Wales, in consequence of my wife's health (being advised to go to a warmer climate than Victoria), I beg to apply for some appointment in your Department connected with the liquor traffic. I am an expert in distillation and brewing, and in the examination of liquors; and I am of opinion, from my own inspection, that you require a person of my class to look after the liquors now vended in your city.

For the sake of curiosity I examined samples of spirits and beer, with the following results, on the 5th instant:—

Brandies—(Two samples). Consists of colonial low wines, produced by first distillation of vineyard wash; cleaned apparently by animal charcoal; coloured and flavoured by essence of cognac.

Whiskey—(Three samples). All contained a solution of sulphate of copper (bluestone); highly deleterious.

Rum—(Two samples). Contained vitriol and bluestone.

Beer—(Two samples). Contained an infusion of tobacco juice in one place, and aloe in another.

If a person of my class is required in your Department I would be glad of an appointment. I am thirty-three years of age, and can be well recommended. A reply will oblige.

I have, &c.,

J. K. WATERS,  
Inspector of Liquors, &c.

Forwarded at the written request of Mr. Waters. The employment sought by him is not within the province of this Department, but his analyses of spirits and beer show that stricter supervision is much needed for the protection of the public from deleterious mixtures.—G.H.B., C.I.D., 14/9/81. B.C., The Under-Secretary for Finance and Trade.

No. 2.

## Minute of the Colonial Treasurer.

The Treasury, New South Wales, Sydney, 17 September, 1881.

*Subject:—Adulteration of spirits.*

THE accompanying letter from Mr. Waters, addressed to the Chief Inspector of Distilleries, discloses a state of affairs, as regards the drink traffic of the city, of a most unsatisfactory character, and one which, if true, requires immediate legislation to put a stop to, in the interests of the public health.

I shall therefore be glad if Mr. Barney will procure a sample of brandy, rum, geneva, wine, whisky, ale and porter, from the various wholesale and retail establishments in the city and suburbs, with a view to having the same analysed.

Mr. Barney must be very careful, as well as particular, in acting in this matter, and the strictest confidence and secrecy must be observed. A sample of the articles named should be obtained first, as far as such can be obtained, from each wholesale merchant, spirit dealer, and brewer in the city and suburbs, and having each sample carefully marked and numbered, and from whence obtained, and then like samples of the same articles should be obtained from a number of hotels, in different parts of the city and suburbs, ascertaining, as far as possible, by whom such goods were supplied, and the various brands (whether colonial or otherwise), and let the same be carefully marked for future reference.

I am anxious to legislate on this subject, and shall be glad if the Chief Inspector will enter into the matter fully, *and at once*, and procure as many samples as possible, with a view to submitting the same for analysis.

JAMES WATSON.

The Chief Inspector of Distilleries, &c.—G.E., B.C., 20/9/81.

No. 3.

## No. 3.

## The Government Analyst to The Under-Secretary for Finance and Trade.

Sir,

28 September, 1881.

I have the honor to report that on the 23rd inst. I received from Mr. Barney, Chief Inspector of Distilleries, six samples of spirituous liquors. At the same time I was furnished with extracts from a letter, sent by Mr. J. K. Waters, of Victoria, to Mr. Barney, in which the former stated that he had detected a variety of deleterious substances in spirituous liquors obtained by himself in this Colony. I cannot help expressing strong regret that he did not hand over the remaining portions of his samples to Mr. Barney, or inform that gentleman where he obtained them, so that the matter might have been followed up.

I take this opportunity of stating that some time ago I examined a great many samples of spirituous liquors obtained through the police, and, if water and burnt sugar be excepted, only one sample was found to contain any foreign ingredient; and even in that case I could not obtain a reliable medical authority who would have sworn in a Court of Justice that the article added was injurious or pernicious. The conclusion which I then arrived at—which has since been fully confirmed both in this Colony and Victoria—is that a large portion of the spirituous liquors retailed here is of very inferior quality, being *made up articles*, but that, as a rule, they do not contain anything which would enable me to support prosecutions under the Adulteration Act.

I attach hereto the results, so far obtained, with reference to the six samples before mentioned.

I have, &amp;c.,

CHAS. WATT,

Government Analyst.

## Samples of spirituous liquors received 23 September, 1881 :—

- No. 1. Rum.—This article was found to be of low quality; strongly acid (acetic acid); no sulphuric acid; a small trace of lead; no other metals.  
 No. 2. Pale brandy.—Contained sugar and a notable quantity of tannin. Evidently a made up article; no sulphuric acid; no metals.  
 No. 3. Whisky.—This fluid appears to have been gin turned into whisky; an inferior article; no sulphuric acid; no metals.  
 No. 4. Dark brandy.—Contained tannin and burnt sugar; no sulphuric acid; no metals.  
 No. 5. Pale brandy.—Strongly acid (acetic acid); contained sugar and tannin; no sulphuric acid; no metals.  
 No. 6. Rum.—Much burnt sugar; lead in minute traces; no other metal; no sulphuric acid.

CHAS. WATT,

Government Analyst.

## No. 4.

## The Government Analyst to The Under-Secretary for Finance and Trade.

Sir,

4 October, 1881.

I have the honor to attach hereto the results of the examination of six samples of spirituous liquors furnished to me by Mr. Barney, Chief Inspector of Distilleries, on the 27th ultimo.

I have, &amp;c.,

CHAS. WATT,

Government Analyst.

Seen.—J.W., 5/10/81.

## Six samples of spirituous liquors received 27th September, 1881 :—

- No. 7. Rum.—Absolute alcohol, 66 per cent. = 128.5 proof spirit. Contained burnt sugar; strongly acid (acetic acid); no tobacco, picrotoxia (*Cocculus indicus*), mineral acids, or metals.  
 No. 8. Pale brandy.—Absolute alcohol 42.7 per cent. = 86.7 proof spirit. Contained sugar and tannin; possessed a disagreeable odour, and appears to have been made up from spirit obtained from colonial wine. Slight trace of copper; no other metals or mineral acids.  
 No. 9. Whisky.—Absolute alcohol 54.5 per cent. = 109 proof spirit. Contained fusel-oil; no metals or mineral acids.  
 No. 10. Whisky.—Absolute alcohol 54 per cent. = 108 proof spirit. No metals or mineral acids.  
 No. 11. Whisky.—Absolute alcohol 50.5 per cent. = 102 proof spirit. Contains fusel-oil; no metals or mineral acids.  
 No. 12. Dark brandy.—Absolute alcohol 40 per cent. = 82.9 proof spirit. Contained sugar and burnt sugar; no tobacco or picrotoxia; no metals or mineral acids.

## Alcoholic strength of samples previously reported upon :—

- No. 1. Rum.—Alcohol 35.5 per cent. = 74 proof spirit.  
 No. 2. Pale brandy.—Alcohol 41 per cent. = 84.86 proof spirit.  
 No. 3. Whisky.—Alcohol 46 per cent. = 94.15 "  
 No. 4. Dark brandy.—Alcohol 51 per cent. = 103.14 "  
 No. 5. Pale brandy.—Alcohol 52 per cent. = 105 "  
 No. 6. Rum.—Alcohol 69 per cent. = 133.2 "

Alcohol by weight.

## The Government Analyst to The Under-Secretary for Finance and Trade.

Sir,

7 October, 1881.

I have the honor to report that, on the 3rd instant, I received from the Chief Inspector of Distilleries six samples of spirituous liquors, forwarded to me for the purpose of examination, the results of which I attach hereto.

I have, &amp;c.,

CHAS. WATT,

Government Analyst.

Seen.—J.W.

## Results of the examination of six samples of spirituous liquors, received October 3rd, 1881 :—

- No. 13. Rum.—Alcohol, 46.5 per cent. = 95 proof spirit; flavoured with decoction of prunes; strongly acid (acetic acid, &c.); no mineral acids, metals, tobacco, or picrotoxia.  
 No. 14. Pale brandy.—Alcohol, 33 per cent. = 69.5 proof spirit; contained tannin and much sugar; disagreeable odour; apparently made from colonial wine; also contained traces of copper and zinc (probably derived from brass taps, &c.)  
 No. 15. Dark brandy.—Alcohol, 39 per cent. = 81 proof spirit; contained burnt sugar and acetic acid; no mineral acids, tobacco, or picrotoxia; strong trace of copper.

Alcohol by weight.

No.

- No. 16. Rum.—Alcohol, 35 per cent. = 73·4 proof spirit ; contained burnt sugar ; no mineral acids, metals, tobacco, or picrotoxia.  
 No. 17. ale brandy.—Alcohol, 42 per cent. = 86·8 proof spirit ; contained much tannin ; no mineral acids ; slight traces of zinc and copper (see No. 14).  
 No. 18. Rum.—Alcohol, 34·5 = 72·4 proof spirit ; flavoured with decoction of prunes ; strongly acid (acetic and tartaric) ; slight trace of copper ; no tobacco or picrotoxia.

Alcohol by weight.

Sir,

13 October, 1881.

I have the honor to report that, on the instant, I received six samples of spirituous liquors from the Chief Inspector of Distilleries, for examination, the results of which I affix hereto.

I have, &c.,

CHAS. WATT,  
Government Analyst.

#### Results of the examination of six samples of spirituous liquors :—

- No. 19. Rum.—Alcohol, 45 per cent. = 92·32 proof spirit ; no metals ; mineral acids ; no tobacco or picrotoxia ; contained acetic acid.  
 No. 20. Whisky.—Alcohol, 36 per cent. = 75·27 proof spirit ; no mineral acids, or metals ; contained fusel-oil.  
 No. 21. Pale brandy.—Alcohol, 39·5 = 82·03 proof spirit ; no mineral acids or metals ; contained much sugar and tannin ; made up article.  
 No. 22. Dark brandy.—Alcohol, 33·5 = 72·37 proof spirit ; no mineral acids or metals ; contained less burnt sugar than most samples, probably due to its dilution (much water has been added) ; no tobacco or picrotoxia.  
 No. 23. Pale brandy.—Alcohol, 38·5 = 80·12 proof spirit ; no mineral acids or metals.  
 No. 24. Whisky.—Alcohol, 51 per cent. = 103·15 proof spirit ; no mineral acids or metals ; slight trace of fusel-oil.

Alcohol by weight.

### No. 8.

#### The Chief Inspector of Distilleries to The Under-Secretary for Finance and Trade.

Sir,

Distilleries Department, Sydney, 20 October, 1881.

Adverting to the Honorable the Finance Minister's T. M., No. 52, of 19th September, 1881, on the subject of the adulteration of spirits, instructing me to obtain certain samples for the purpose of analysis, I have now the honor to enclose the result of experiments made by Mr. Charles Watt, Government Analyst, upon thirty (30) samples of spirits procured from different parts of the city and suburbs, and forwarded by me to him.

It will be perceived that this analysis does not in any way bear out the results of the experiments made by Mr. Waters, of the Excise Department, Melbourne, on some Sydney liquors, on 5th September last, a copy of which is enclosed.

I have endeavoured to ascertain the names of the places whence the samples came, but Mr. Waters is unable to furnish any further information than that to the best of his belief they were procured either in Clarence or King street.

There

There seems to be nothing absolutely injurious to health in any of the samples analysed by Mr. Watt, no traces of mineral acids, tobacco, or picrotoxia (*Cocculus indicus*) being found in any of them, and but slight traces of lead and copper, which may perhaps be accounted for by the nature of the worm through which the spirits were run.

It will now be my duty to obtain samples of wine, beer, and porter, to be submitted to a like examination as the spirit, the results of which will be furnished as soon as the analysis is completed.

The names of the different spirit stores and hotels from which the spirit was obtained can be furnished if required.

I have, &c.,

G. H. BARNEY, C.I.D.

This report is so far satisfactory, but it would be much more so if Mr. Watt would give a fuller description of each sample, and say whether the same would be injurious to health. The names of the parties from whom the samples were obtained should be given, if only for private information, and not necessarily for publication, unless deemed advisable.—J.W., 24/10/81. The Chief Inspector of Distilleries, &c.—G.E., 25/10/81, B.C.

Mr. Watt informed. Names of persons, &c., now added, as well as the strength, by Sykes' hydro-meter, of the different samples.—G.H.B., 27/10/81, B.C. The Under Secretary for Finance and Trade.

[Enclosure.]

Analysis of Spirit.

No.	Description.	Analysis.
1	Rum, 25·7 u.p.	Alcohol 35·5 % = 74 proof spirit. Small traces of lead, also burnt sugar and acetic acid; no mineral acids or metals (except the trace of lead), tobacco, or picrotoxia ( <i>Cocculus indicus</i> ).
2	Pale brandy, 15·2 u.p.	Alcohol 41 % = 84·8 proof spirit. Contained sugar, much tannin, and acetic acid; no mineral acids or metals. Evidently a made-up article.
3	Whisky, 5·9 u.p.	Alcohol 46 % = 94·15 proof spirit. Appears to have been gin converted into whisky. Contained tannin and small quantity of sugar; no metals or mineral acids.
4	Dark brandy, 3·1 o.p.	Alcohol 51 % = 103·14 proof spirit. Contained tannin and burnt sugar; no metals, mineral acids, tobacco, or picrotoxia.
5	Pale brandy, 5·7 o.p.	Alcohol 51 % = 105 proof spirit. Contained sugar, tannin, and acetic acid; no metals or mineral acids; made-up article.
6	Rum, 33·2 o.p.	Alcohol 69 % = 133 proof spirit. Lead in traces, and much burnt sugar; no mineral acids or metals (other than the trace of lead).
7	Rum, 28·5 o.p.	Alcohol 66 % = 128·5 proof spirit. Much burnt sugar; no metals, mineral acids, tobacco, or picrotoxia.
8	Pale brandy, 13·2 u.p.	Alcohol 42 % = 86 proof spirit. Contained sugar and tannin; possessed a disagreeable odour, and appears to have been made up from spirit obtained from colonial wine; slight trace of copper, no other metal; no mineral acids.
9	Whisky, 9·2 o.p.	Alcohol 54·5 % = 108 proof spirit. Contained fusel-oil; no metals or mineral acids.
10	Whisky, 8·4 o.p.	Alcohol 54 % = 108 proof spirit. No metals or mineral acids.
11	Whisky, 2·2 o.p.	Alcohol 50·5 % = 102 proof spirit. Contains fusel-oil; no metals or mineral acids.
12	Dark brandy, 17 u.p.	Alcohol 40 % = 82·9 proof spirit. Contained sugar and burnt sugar; no tobacco, picrotoxia, metals, or mineral acids.
13	Rum, 6 u.p. ...	Alcohol 46·5 % = 95 proof spirit. Contained decoction of prunes, strongly acid (acetic acid and fixed organic acid); no mineral acids, metals, tobacco, or picrotoxia.
14	Pale brandy, 30·5 u.p.	Alcohol 33 % = 69·5 proof spirit. Contained tannin and burnt sugar, bad odour, traces of zinc and copper. Apparently made from colonial wine.
15	Dark brandy, 19 u.p.	Alcohol 39 % = 84 proof spirit. Contained burnt sugar and acetic acid; no mineral acids, tobacco, or picrotoxia; strong traces of copper.
16	Rum, 26·6 u.p.	Alcohol 35 % = 73·4 proof spirit. Contained burnt sugar; no mineral acids, tobacco, or picrotoxia.
17	Pale brandy, 13·2 u.p.	Alcohol 42 % = 86·8 proof spirit. Large quantity tannin; no mineral acids; slight traces of zinc and copper.
18	Rum, 27·6 u.p.	Alcohol 34·5 % = 72·4 proof spirit. Contained decoction of prunes; strongly acid (acetic and fixed organic acids); no mineral acids, tobacco, or picrotoxia; slight trace of copper.
19	Rum, 7·7 u.p.	Alcohol 45 % = 92·33 proof spirit. No metals or mineral acids; no tobacco or picrotoxia; acetic acid.
20	Pale brandy, 18 u.p.	Alcohol 39·5 % = 82·3 proof spirit. No mineral acids or metals; contained much sugar and tannin; made-up article.
21	Whisky, 24·3 u.p.	Alcohol 36 % = 75·2 proof spirit. No mineral acids or metals; contained fusel-oil.
22	Dark brandy, 29·6 u.p.	Alcohol 33·5 % = 70·4 proof spirit. No mineral acids or metals; contained less burnt sugar than most samples, probably owing to its dilution, much water having been added; no tobacco or picrotoxia.
23	Pale brandy, 19·9 u.p.	Alcohol 38·5 % = 80·12 proof spirit. No mineral acids or metals.
24	Whisky, 3·1 o.p.	Alcohol 51 % = 103·15 proof spirit. No mineral acids or metals; slight trace of fusel-oil.
25	Rum, 14·3 u.p.	Alcohol 41·5 % = 85·7 proof spirit. Flavoured with a decoction of prunes, contained fusel-oil, strongly acid (acetic and organic acids); no mineral acids, metals, tobacco, or picrotoxia; a fairly good rum, except a slight trace of copper.
26	Dark brandy, 19·0 u.p.	Alcohol 39 % = 81·08 proof spirit. Coloured with burnt sugar; no mineral acids, metals, tobacco, or picrotoxia.

Analysis of Spirit—*continued.*

No.	Description.	Analysis.
27	Whisky, 0.5 o.p.	Alcohol, 49.5 % = 81.48 proof spirit. Contained a small quantity of fusel-oil; no mineral acids or metals.
28	Whisky, 6.6 o.p.	Alcohol, 53 % = 106.64 proof spirit. Contained a small quantity of fusel-oil; no mineral acids or metals.
29	Pale brandy, 18.0 u.p.	Alcohol, 39.5 % = 82.03 proof spirit. Contained tannin and sugar; no mineral acids or metals; a made-up article.
30	Dark brandy, 24.8 u.p.	Alcohol, 36 % = 75.27 proof spirit. Contained sugar and burnt sugar, strongly acid (acetic acid); no mineral acids, metals, tobacco, or picrotoxia.

Alcohol by weight.

CHAS. WATT,  
Government Analyst.

EXTRACT of letter from J. K. Waters, Inspector of Liquors, Melbourne. Results of Experiments on Sydney Liquors, made on 5th September, 1881.

Description.	No. of samples.	Analysis.
Brandy .....	Two samples.....	Consists of colonial low wines produced by first distillation of vineyard wash, cleaned apparently by animal charcoal, coloured and flavoured by essence of cognac. All contained a solution of sulphate of copper (bluestone), highly deleterious. Contained vitriol and bluestone.
Whisky .....	Three samples .....	
Rum .....	Two samples.....	

Melbourne, 9th September, 1881.

J. K. WATERS,  
Inspector of Liquors, &c.

## No. 9.

## The Government Analyst to The Chief Inspector of Distilleries.

Sir,

31 October, 1881.

I have the honor to acknowledge the receipt of your letter of the 27th instant, containing a copy of a memo. from the Hon. the Treasurer, having reference to my analytical report respecting the thirty samples of spirituous liquors received from you.

It was my intention to submit a few observations upon the reports as soon as the entire work was completed, but it is perhaps better that I should do so now. In the first place, I have to state that in no case has any article been detected so obviously "injurious to health" as to enable me to recommend a prosecution under the Act of 1879. At the same time the construction of that Act, and the remote effects of made-up and inferior liquors, may be regarded more as legal and medical questions than chemical ones. In the second place, I have to observe that by far the greater portion of the samples were inferior and made-up liquors, and some of them may even be described as bad—made from imperfectly rectified spirits, &c., &c.; in fact some of them would disagree with the digestive organs like "turned beer," rancid butter, badly-prepared cocoa, and the like. The examination of the samples now under consideration has confirmed the results which I obtained some time ago in an investigation for the Police Department—namely, that as regards spirituous liquors this market is largely supplied with inferior and badly made-up compounds, but that—with the possible exception of some particular case—"noxious" or "pernicious" substances are not added either by the wholesale or retail dealers. And this is quite compatible with the statement that it is not easy to obtain even fairly good wines and spirits at the various public-houses and at the bars of hotels in this Colony. It is, perhaps, as well that I should mention that, in the extract from a letter furnished to me with your first communication upon this subject, certain persons unknown were charged with mixing with spirituous liquors, &c., certain well-known and highly-noxious substances, and this examination has had for its main object the determination whether or not any evidence could be obtained of such practices.

I have, &amp;c.,

CHAS. WATT,  
Government Analyst.

The Government Analyst. To be returned.—B.C., G.E., 9/8/82. Forwarded for the information of the Hon. the Finance Minister.—G.H.B., C.I.D., 1/11/81. B.C., The Under-Secretary for Finance and Trade.

## No. 10.

## The Chief Inspector of Distilleries to The Under-Secretary for Finance and Trade.

Sir,

Distilleries Department, Sydney, 1 November, 1881.

I have the honor to forward herewith a copy of an analysis by Mr. Watt of twelve samples of wine, particulars as to where obtained, &c., having been added.

Samples of beer and porter will now be submitted to him for examination.

I have, &amp;c.,

G. H. BARNEY, C.I.D.

RESULT

RESULT of an analysis by Mr. Chas. Watt on twelve samples of Wine submitted for examination by the Chief Inspector of Distilleries, &c.

No.	Description.	Spec. grav. of wine.	Spec. grav. of alcohol yielded.	Per-centage of absolute alcohol, by weight.	Per-centage of proof spirit.	Per-centage of acid.	Grains of acid per gallon.	Total of extract.	Remarks.
31	Port wine ..	1·0115	·9760	16·42	35·46	·48	326·0	9·70	Inferior articles; appear to have been made up.
32	do. ..	1·0084	·9780	14·75	31·99	·50	350·0	8·34	
33	Sherry ..	1·0183	·9780	14·77	25·50	·52	364·0	7·08	
34	do. ..	·9912	·9797	13·39	28·95	·67	469·0	8·10	Fairly good colonial sherry.
35	Port wine ..	1·0044	·9829	10·91	23·76	1·99	1,393·0	4·34	This article contained much acetic acid, and was more a vinegar than a wine. Inferior article; appears to have been made up.
36	do. ..	1·0102	·9784	14·42	31·22	·53	371·0	7·98	
37	Madeira ..	·9970	·9806	12·69	27·48	·48	336·0	5·62	These are all good sound wines.
38	Vin ordinaire ..	·9974	·9818	11·77	25·60	·75	525·0	4·48	
39	Claret ..	1·0052	·9828	11·00	23·87	·61	427·0	4·60	
40	Port wine ..	1·0031	·9753	17·00	36·61	·62	433·0	7·50	Very good.
41	Muscate ..	1·0102	·9798	14·00	30·26	·65	455·0	4·30	
42	do. ..	·9945	·9770	15·58	33·78	·52	364·0	4·10	

No foreign colouring matter or anything noxious was detected in any of these samples.

CHAS. WATT,  
Government Analyst.

No. 11.

The Chief Inspector of Distilleries to The Under-Secretary for Finance and Trade.

Sir,

Distilleries Department, Sydney, 10 August, 1882.

In submitting for the information of the Honorable the Finance Minister, in a collected form, the accompanying returns, showing the result of examinations by the Government Analyst of certain liquors submitted to him by me, I avail myself of the occasion to set out the causes which led to the action taken.

In September of last year I received a letter from a gentleman who had been employed in the Excise Department, Melbourne, seeking an engagement under the Licensing Act of 1882, and enclosing an analysis made by him during a visit to Sydney of certain liquors—alleged to have been purchased here—showing highly deleterious ingredients. I immediately laid the matter before the Honorable the Treasurer, and, acting upon instructions, took steps to procure from various parts of the city and suburbs samples of spirits, wines, ales, and porter, for analysis by Mr. Watt.

It will be perceived that the analysis does not bear out the prevalent idea that the spirit sold in Sydney is adulterated with drugs, &c., injurious to public health; some objectionable properties are no doubt contained in certain of the samples, but those really deleterious appear in such small quantities—as far as these experiments go—that injury to health by their consumption is reduced to a minimum. No traces of mineral acids, tobacco, or picrotoxia (*Cocculus indicus*) have been found in any of the samples, the principal foreign agents used in sophistication being burnt sugar, tannin, and water.

The imported wines present a not very creditable analysis, being principally made-up articles; nothing noxious, however, was detected in any of them. The colonial wines show excellent qualities, all being reported by Mr. Watt as "good sound wines."

The ales and porter speak for themselves; the percentage of absolute alcohol in these liquors assimilates very closely to that contained in the ordinary English beers, namely, from 5% to 6%.

Before concluding my report, I desire to point out that the comparatively limited number of samples operated upon is due to the fact that, owing to incessant and urgent calls made upon him by other Departments, Mr. Watt was not able to devote as much time to my requirements as I could have wished.

I have, &c.,

GEORGE H. BARNEY,  
C.I.D., &c.

RETURN showing the results of an examination of thirty samples of spirits submitted to the Government Analyst by the Chief Inspector of Distilleries and Refineries.

No. of Sample.	Description.	Whence obtained—locality.	Mr. C. Watt's Analysis.
1	Rum .....	Market-street .....	Alcohol 35·5 % = 74 proof spirit; small traces of lead, also burnt sugar and acetic acid; no mineral acids or metals (except the trace of lead); no tobacco or picrotoxia ( <i>Cocculus indicus</i> ).
2	Pale brandy ...	George-street .....	Alcohol 41· % = 84·8 proof spirit; contains sugar, much tannin and acetic acid, evidently a made-up article; no mineral acids or metals.
3	Whisky .....	Park-street .....	Alcohol 46 % = 94·15 proof spirit. Appears to have been converted into whisky. Contained tannin and small quantity of sugar; no metals or mineral acids.
4	Dark brandy ...	Pitt-street .....	Alcohol 51 % = 103·14 proof spirit. Contained tannin and burnt sugar; no metals, mineral acids, tobacco, or picrotoxia.
5	Pale brandy ...	George-street North .....	Alcohol 51 % = 103·14 proof spirit. Contained sugar, tannin, and acetic acid; no metals or mineral acids; made-up article.

No. of Sample.	Description.	Whence obtained—locality.	Mr. C. Watt's Analysis.
6	Rum .....	George-street South .....	Alcohol 69 % = 133 proof spirit. Lead in traces, and much burnt sugar. No mineral acids or metals (other than the trace of lead).
7	Rum .....	Barrack-street .....	Alcohol 66 % = 128.5 proof spirit; much burnt sugar; no metals; mineral acids; tobacco or picrotoxia.
8	Pale brandy ...	Harris-street, Pyrmont ...	Alcohol 42 % = 86 proof spirit; contained sugar and tannin; possessed a disagreeable odour and appears to have been made up from spirit obtained from Colonial wine; slight trace of copper; no other metal; no mineral acids.
9	Whisky .....	George-street .....	Alcohol 54.5 % = 109 proof spirit; contained fusel-oil; no metals or mineral acids.
10	Whisky .....	Clarence-street .....	Alcohol 54 % = 108 proof spirit; no metals or mineral acids.
11	Whisky .....	Waterview Bay .....	Alcohol 50.5 % = 102 proof spirit; contains fusel-oil; no metals or mineral acids.
12	Dark brandy ...	Newtown .....	Alcohol 40 % = 82.9 proof spirit; contained sugar and burnt sugar; no tobacco; picrotoxia; metals or mineral acids.
13	Rum .....	Castlereagh-street .....	Alcohol 46.5 % = 95 proof spirit; contained decoction of prunes; strongly acid; acetic acid and fixed organic acid; no mineral acids, metals, tobacco, or picrotoxia.
14	Pale brandy ...	Bourke-street North .....	Alcohol 33 % = 69.5 proof spirit; contained tannin and burnt sugar; bad odour; traces of zinc and copper; apparently made from Colonial wine.
15	Dark brandy ..	King-street .....	Alcohol 39 % = 81.0 proof spirit; contained burnt sugar and acetic acid; no mineral acids, tobacco, or picrotoxia; strong traces of copper.
16	Rum .....	Margaret-street .....	Alcohol 35 % = 73.4 proof spirit; contained burnt sugar; no mineral acids, tobacco, or picrotoxia.
17	Pale brandy ...	Sussex-street .....	Alcohol 42 % = 86.8 proof spirit; a large quantity of tannin; no mineral acids; slight traces of zinc and copper.
18	Rum .....	Sussex-street .....	Alcohol 34.5 % = 72.4 proof spirit; contained decoction of prunes; strongly acid; acetic and fixed organic acid; no mineral acids, tobacco, or picrotoxia; slight trace of copper.
19	Rum .....	Haymarket .....	Alcohol 45 % = 92.33 proof spirit; no metals or mineral acids; no tobacco or picrotoxia; acetic acid.
20	Whisky .....	Glebe Road .....	Alcohol 36 % = 75.2 proof spirit; no mineral acids or metals; contained fusel-oil.
21	Pale brandy ...	Marrickville .....	Alcohol 39.5 % = 82.3 proof spirit; no mineral acids or metals; contained much sugar and tannin; made up article.
22	Dark brandy ..	Waterloo .....	Alcohol 33.5 % = 70.4 proof spirit; no mineral acids or metals; contained less burnt sugar than most samples, probably owing to its dilution, much water having been added; no tobacco or picrotoxia.
23	Pale brandy ...	Miller's Point .....	Alcohol 38.5 % = 80.12 proof spirit; no mineral acids or metals.
24	Whisky .....	George-street North .....	Alcohol 51 % = 103.15 proof spirit; no mineral acids or metals; slight trace of fusel-oil.
25	Rum .....	Castlereagh-street .....	Alcohol 41.5 % = 85.7 proof spirit; flavoured with decoction of prunes; contained rum fusel-oil; strongly acid (acetic and organic acids); no mineral acids, metals, tobacco, or picrotoxia. A fairly good rum, except a slight trace of copper.
26	Dark brandy ...	York-street .....	Alcohol 39 % = 81.08 proof spirit; coloured with burnt sugar; no mineral acids, metals, tobacco, or picrotoxia.
27	Whisky .....	Princes-street .....	Alcohol 39.5 % = 81.48 proof spirit; contained a small quantity of fusel-oil; no metals or mineral acids.
28	Whisky .....	Erskine-street .....	Alcohol 53 % = 106.64 proof spirit; contained a small quantity of fusel-oil; no mineral acids or metals.
29	Pale brandy ...	Clarence-street .....	Alcohol 39.5 % = 82.03 proof spirit; contained tannin and sugar; a made-up article; no mineral acids or metals.
30	Dark brandy ...	King-street .....	Alcohol 36 % = 75.27 proof spirit; contained sugar and burnt sugar; strongly acid (acetic acid); no mineral acids, metals, tobacco, or picrotoxia.

Alcohol by weight.]

RETURN showing the results of an examination of twelve samples of Wines submitted to the Government Analyst by the Chief Inspector of Distilleries and Refineries.

No. of Sample.	Description.	Whence obtained. Locality.	Specific gravity of wine.	Specific gravity of alcohol yielded.	Percentage of absolute alcohol by weight.	Percentage of proof spirit.	Percentage of acid.	Grains of acid per gallon.	Total percentage of extract.	Mr. C. Watt's remarks.
31	Port wine .....	George-street .....	1.0115	.9760	16.42	35.46	.48	326.0	9.70	} Inferior articles. Appear to have been made up.

### No. 12.

The Government Analyst to The Under-Secretary for Finance and Trade.

Sir,

14 August, 1882.

As I have examined a considerable number of samples of wine, spirits, and beer, forwarded to me by the Chief Inspector of Distilleries, in consequence of instructions received from the Honorable the Treasurer, I now do myself the honor to submit a few observations partly based upon the results which I have from time to time furnished to your Department. I should state that I had previously examined many samples of "spirituous liquors" for the Inspector-General of Police, and that during the time that the samples were being examined for the Treasury Department I was also being furnished with samples by Sub-Inspector Lenthal for the Department of Justice. These examinations have had for their chief object the determination whether or not certain poisonous, noxious, or deleterious substances are contained in the various liquors supplied by publicans.

The public statements with reference to this subject are of two kinds:—

1st.—That the dealers *add* to the liquors they sell matters which are poisonous, noxious, or deleterious.

2nd.—That a considerable portion of the fluids sold consists of "white spirit" flavoured, with the addition in the cases of brandy and rum of burnt sugar as a colouring agent.

The first statement I have satisfied myself is, so far as Sydney and its suburbs are concerned, without foundation. Nevertheless it is probable that there may be isolated cases of such practices. The second statement is fact, not only here but in every other country. Alcoholic spirit is naturally colourless; and all the "grog" sold is "white spirit" flavoured, and, as before stated, with reference to brandy and rum, coloured.

Again, referring to the first statement, I should mention that I have not found a single case in which any one of the matters prohibited by the Act of 1881, and others not named in that Act, have been added. I have occasionally detected traces of copper and lead, but only such as might easily be derived from the utensils through which the spirit had passed.

It is my duty to state that a large proportion of the articles which I have examined were of inferior quality—and some very inferior; and in this remark I do not exclude some which I believe to have been imported, and which I am informed have secured public confidence. By these remarks I mean that some of the "spirituous liquors" have been prepared from badly rectified spirit, have not been properly "matured," have had an excessive quantity of burnt sugar as a colouring agent added to them, and the flavouring matters have not been skilfully applied. The articles have also, as a general rule, been liberally watered. I am often asked whether the articles supplied by publicans in this Colony contain anything "injurious to health." A little consideration will show that this is a very wide question, and one which I very much doubt whether I am justified in answering in any authoritative way; especially when that answer may be used in a legal sense as connected with the construction to be put upon the words employed in an Act of Parliament. I know from an experience of many years that few persons can take any notable quantity of alcoholic fluids with impunity, and a less number with advantage; and that those numbers are much diminished when the articles partaken of have been recently and carelessly prepared from crude alcoholic spirit, even though the fluids may not have had anything added to them which I could in a Court of Justice describe as poisonous, noxious, or deleterious. From a somewhat intimate knowledge of the character of the "spirituous liquors" generally retailed here—both home-made and imported—I would strongly recommend their use to be avoided as much as possible, and that they be regarded more as things of limited use than as articles of daily, and I fear often of hourly, consumption.

As regards the various samples of beer which have been supplied to me by the Chief Inspector of Distilleries, I have to state that they were all of fair quality—perhaps as good as can be expected, now that these fluids are brewed from malt and some other saccharine substance, such as glucose, &c.

In conclusion, I think that I ought to state that I have had the honor to submit a memo. to the Department of Justice upon the subject of this letter, as I have been informed that since the Act of 1881 the question of the quality of articles supplied by publicans is in charge of that Department.

I have, &c.,

CHAS. WATT,

Government Analyst.

Read. Have all papers in this matter prepared, with a view to their being laid before Parliament.—  
J.W., 15/8/82.

1882.

**LEGISLATIVE ASSEMBLY.**  
**NEW SOUTH WALES.**

---

**LANDS GRANTED TO AUSTRALIAN AGRICULTURAL COMPANY.**  
(PETITION—RESIDENTS OF LIVERPOOL PLAINS AND NORTHERN DISTRICTS.)

*Received by the Legislative Assembly, 24 August, 1882.*

---

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Residents of Liverpool Plains and the Northern Districts,—  
SHOWETH :—

1. That your Petitioners are deeply interested in the opening of roads through the lands granted to the Australian Agricultural Company known as Warrah and as the Goonoo Goonoo Station.

2. That your Petitioners have heard that a Select Committee of your Honorable House, appointed on the 8th day of July last to inquire into and report upon the necessity for opening roads through and making reserves on the lands granted to the Australian Agricultural Company in New South Wales, have reported to your Honorable House in favour of making such roads and reserves.

3. That your Petitioners believe that the roads recommended to be opened by Mr. District-Surveyor Dewhurst, and the reserves to be made, are urgently required in the interests of the public.

4. That your Petitioners believe that the making of such roads will promote settlement and greatly benefit all settlers in the Northern Districts.

Your Petitioners therefore humbly pray that your Honorable House will take into your consideration the Report of your Select Committee and adopt the same.

And your Petitioners, as in duty bound, will ever pray, &c.

[ *Here follow 97 signatures* ]

---

A similar Petition was received :—

On 25th August, from Residents of Liverpool Plains and Northern Districts; 42 signatures.

---

1882.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## LANDS GRANTED TO THE AUSTRALIAN AGRICULTURAL COMPANY.

(PETITION OF JESSE GREGSON AGAINST ADOPTION OF REPORT FROM SELECT COMMITTEE ON.)

*Received by the Legislative Assembly, 30 August, 1882.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Jesse Gregson, of Newcastle, General Superintendent of the Australian Agricultural Company,—

HUMBLY SHOWETH:—

1. That your Petitioner is the Agent and Attorney for the Australian Agricultural Company, and their representative in this Colony.

2. That a Select Committee of your Honorable House was recently appointed with power to send for persons, papers, and plans, to inquire into and report upon, the necessity for opening roads through, and making reserves on, the lands granted to the Australian Agricultural Company in the Colony of New South Wales.

3. That the Committee, after taking evidence, agreed to the following report, viz. :—

“Your Committee would direct your attention to the fact that by a Crown grant, dated the 20th of November, 1847, under the hand of Sir Charles Augustus Fitzroy, then Governor of the Colony, 464,640 acres of land situated in the county of Gloucester, 249,600 acres situated in the county of Buckland, and 313,298 acres situated in the county of Parry, were granted to the Australian Agricultural Company, free of all conditions and reservations.

“Your Committee having examined the witnesses named in the list (whose evidence will be found appended hereto) have come to the conclusion that the Government should open up the several roads through the lands of the Australian Agricultural Company, known as Warrah, situated in the county of Buckland, and also through the lands of the Peel River Land and Mineral Company, known as Goonoo Goonoo (and formerly granted to the A. A. Company), situated in the county of Parry, as recommended by Mr. District Surveyor Dewhurst, in the evidence given by him.

“Your Committee think it desirable that in opening up the roads so recommended by Mr. Dewhurst, the Government should also resume sufficient land for the purpose of reserves for camping, and for the purpose of allowing stock to pass on such roads, as suggested by Mr. Dewhurst.

“(Signed)

JOSEPH P. ABBOTT,

Chairman.

No. 3 Committee Room, Sydney, 12th December, 1881.”

4. That the recommendation of Mr. District Surveyor Dewhurst, referred to in the report, so far as it applies to the Australian Agricultural Company's Warrah Estate, was to the effect that the following roads are required through the estate, viz. :—

- Evid. p. 43  
App. A 2  
Evid. p. 20  
Ans. 670.  
Evid. p. 48  
App. A 2
- No. 1.—Black Creek to Willow-tree Railway Station; distance, 33 miles; width, 1.50 chains; (subsequently Mr. Dewhurst proposes width 3.00 chains). Sidings, 33 in number, each 5.00 x 1.00 chains.
- No. 2.—From proposed road No. 1 to Doughboy Village, &c.; distance, 9 miles; width, 1.00 chain.
- No. 3.—From reserve No. 499 to Black Creek; distance, 7 miles; width, 1.50 chains. Sidings, 6 in number, each 5.00 x 1.00 chains.
- No. 4.—Yarramanbah Creek to proposed road No 1; distance, 4½ miles; width, 1.00 chain. Reserve, 5 acres, at junction of Roads.
- No. 5.—Macdonald's Creek to proposed road, No. 1; distance, 4 miles; width, 1.00 chain. Reserve, 5 acres, at junction of roads.
- No. 6.—Warrah Creek to proposed road No. 2; distance, 7½ miles; width, 1.50 chains. Sidings, 6 in number, each 5.00 x 1.00 chains.
- No. 7.—From junction of proposed roads, Nos. 6 and 2, to the Company's north boundary; distance, 8 miles; width, 1.50 chains. Sidings, 7 in number, each 5.00 x 1.00 chains.
- No. 8.—Road from Miller's Creek to parish of Telford. Sidings, 13 in number, each 5.00 x 2.00 chains. Reserve, 5 acres, at intersection of this road with proposed road No. 1.

App. A 2  
Nos. 9 & 10.  
Evid. p. 4  
a. 141

5. That Mr. District Surveyor Dewhurst estimates the cost of these proposals at upwards of £18,000, which estimate he explains, does not include any claim the Company may have for compensation for damage caused by severance.

6. That your Petitioner humbly prays for the attention of your Honorable House to the following comparisons of evidence taken before the Committee :—

FIRST—As to the advisability of the proposed resumptions.

Promoters' Witnesses.

Evid. p. 1  
a. 7 Mr. Dewhurst appears to have some doubts on this part of the subject, for he says, "I have come to the conclusion that there ought to be roads through it (the A. A. Company's Warrah grant), and reserves also, *only for the expense.*"

a. 9 "I should not like to say exactly where they should be taken, I know where they should have been taken."

p. 4.  
a. 130 Asked by a member of the Committee: "Do you think, as a general thing, that the necessity for opening these roads would justify the expenditure you say it would entail?" He replies, "I could not answer that question."

Evid. p. 9 Mr. Chas. Ivory, with special means of knowledge, appears to be fairly satisfied with present arrangements, for he says as to proposed road No. 1, "I think there is great necessity for a road there. There is a road on sufferance now."

a. 337  
a. 356 As to proposed roads Nos. 3, 4, 5, 6, "I cannot say I have heard any complaints, we always had a road through the Company's land, and always made use of it in my time."

a. 347  
to  
a. 352 As to road No. 8, he thinks the road not wide enough, and that the proposed sidings are needed.

Evid. p. 12 Mr. UNDERWOOD thinks the proposed roads necessary, but although he has heard of complaints as to the necessity for them, he does not know if there is any truth in the complaints.

Evid. p. 16 Mr. A. LODER has heard frequent demands for these roads, and agrees with Mr. Dewhurst's suggestions as to proposed roads Nos. 1, 6, 7, and 8; has no knowledge, and cannot speak as to Nos. 3, 4, and 5.

a. 519  
a. 528  
a. 560 He thinks it would be convenient to the public to have roads established through the estate.

Evid. p. 19 Mr. R. WEAVER also thinks the roads are required, and gives instances of hardships having occurred for want of them. These statements are, however, flatly contradicted.

Compare—

Mr. Weaver p. 19, Ans. 624—628.	} {	Mr. Craik p. 32, Ans. 1120—1124.
		Mr. Craik p. 32, Ans. 1118—1119.
Mr. Weaver p. 19, Ans. 639—641.	} {	Mr. Fairbairn p. 36, Ans. 1281, 1282, 1283.

Evid. p. 42 Mr. A. J. STOPPS, in charge of the Roads Branch, Survey Office, produced a petition dated December, 1872, from the residents of the town of Murrurundi and Liverpool Plains praying that a road from Doughboy Hollow to the Company's west boundary, and one or more roads from south boundary to intersect the said road, should be resumed and proclaimed.

Evid. p. 36  
a. 1276 It is remarkable that with the single exception of Mr. Richard Weaver, not one of the persons who signed the petition came forward to give evidence before the Select Committee. There is evidence however that the extension of the Great Northern Railway, subsequent to the date of the petition, has entirely altered the circumstances.

Evid. p. 5  
a. 168 And Mr. Dewhurst seems to acknowledge the existence of a general state of apathy about the question.

SECOND—As to the necessity for taking these roads for the purpose of providing access for the Settlers between the Company's South Boundary and Liverpool Range.

Promoters' Witnesses.

Evid. p. 4  
a. 151  
a. 153  
a. 179 Mr. DEWHURST says it would not be easy to make a cattle road outside the Company's land along their south boundary. Cattle could be taken that way. There is a reserved road round the greater portion of the estate.

A. A. Companys' Witnesses.

Evid. p. 29 Mr. Jas. Rixon, while admitting roads to be necessary, says, "I believe they all use these roads now. If they were fenced it would take a great deal of money to keep them in repair. No amount of money the Government could give would keep these roads in repair."

Evid. p. 20 Mr. Daniel M'Grath, a selector, says, "I would rather have it as it is," and asked by the Chairman, "Would you still prefer having the road as it is?" replies: "Yes, rather than have it fenced in."

Evid. p. 31 Mr. E. C. Merewether, formerly General Superintendent for the Company, asked: "If these roads were fenced, would the public be any better off than they are now?" replies: "I am sure they would not;" and asked: "If the public requirements will be considered by the present arrangements?" replies: "Yes; as I know them."

Evid. p. 33 Mr. S. A. CRAIK, formerly the Company's Stock Superintendent, residing at Warrah, admitting that there should be a road from Black Creek towards the eastern boundary (equivalent to Mr. Dewhurst's proposal No. 2) says: "There is no need for any other road," and that if the proposed roads were fenced, the public would be in a great deal worse position than they are now. "There is no positive necessity for the branch roads proposed, looking at the small number of settlers there, the game would not be worth the candle."

Evid. p. 37 Mr. GEO. FAIRBAIRN, now Stock Superintendent for the Company, residing at Warrah, says: "I do not think the public would be any better off if the proposed roads were given and fenced." See also his answer, No. 1348; again, he says—"the road from Doughboy Hollow to Blackville will not be a benefit to the public if it is fenced, the only benefit they get from it now is the grass they get for their stock."

Evid. p. 24 Mr. S. M. SWIFT, part owner of Coomeo Coomeo Station, says, that the proposed roads Nos. 1 and 2 would be no service to him.

a. 814  
a. 843  
a. 851  
a. 852 All through his evidence he denies that any of the proposed roads would be of benefit for travelling stock purposes.

A. A. Company's Witnesses.

Evid. p. 33 M. S. A. CRAIK says there is no necessity for the proposed roads.

a. 1155  
a. 1169 Drays have gone over Warrah Creek Gap towards Scone.

He

Evid. p. 4  
a. 182 He is asked: "Bearing in mind that the A. A. Company are willing to give this track right through from Black Creek to Willow Tree, which would get rid of any claims for severance of any kind; if a cattle track was taken along outside of the estate, this road, the one the Company are willing to give, would be sufficient for the other traffic, would it not?" And replies:  
a. 182 "Quite sufficient for the other traffic; but you  
a. 183 cannot take the cattle the other way, because the country is too rough. Cattle can cross the range at Miller's Creek Gap. They can get down the country, but cannot get to Murrurundi. There  
a. 192 are three gaps, one or other of which is open to  
a. 193 all cattle on the south boundary."  
a. 194  
a. 197

a. 204 As to the road proposed up Warrah Creek (proposals Nos. 6 and 7), the people affected by it have not a great distance to go, either to get to the cattle track on the one hand, or to the Willow Tree on the other.

a. 305 It is possible for stock or horsemen to get round from Mr. Manchee's Station to Quirindi by existing tracks without going through the Company's estate; but the route indicated is not available for fat stock, because of the roughness of the country for about three miles at the south-west corner of the estate. These three miles pass through Government land almost wholly.

Evid. p. 21  
a. 689 The road proposed from Clarke's Creek to Blackville (No. 3) would not be required if you could get round the south-west corner. The country there is not accessible.  
a. 690

Evid. p. 49  
App. C. 6 Compare with above evidence Mr. District Surveyor Dewhurst's letter to the Surveyor-General, dated 15th June, 1880, in which he states that a route indicated by the Stock Inspector from Moan Gap to Black Creek is suitable for travelling stock. After describing the course the route follows, he says the road proposed will do little damage to the portions, and a "capital stock road can be opened" for the public benefit.

Evid. p. 53  
a. 1160 Further to the westward Miller's Creek Gap is available.

a. 1162 The people living on Phillip's Creek could get round the south-west corner. [See also Mr. Craik's evidence, answers 1185 to 1196, p. 34.]

Evid. p. 38  
a. 1378  
to  
a. 1384 MR. GEORGE FAIRBAIRN also speaks of Warrah Creek Gap and Miller's Creek Gaps as outlets, though scarcely passable for drays.

Evid. p. 25  
a. 831 MR. S. M. SWIFT, part owner of Coomoo Coomoo, applied for a travelling stock road round the A. A. Company's south-west corner, which he thinks would prove a most practicable route over the Moan Rock Gap. This road has been reported on favourably by the District Surveyor after inspection. [See also Report, Appendix C.]  
a. 843  
a. 859

Evid. p. 33  
a. 1162 MR. S. A. CRAIK, speaking of the same part of the district, says: "People could go round the south-west corner without trouble," although he admits it is steep—for about a mile, very steep—but it would not be an impracticable road for stock.  
a. 1163  
a. 1166

Evid. p. 38  
a. 1388  
a. 1390  
a. 1391 MR. GEORGE FAIRBAIRN states that though it would not be easy to make a road for a buggy round the south-west corner, sheep could be taken that way at the present time.

THIRD—As to the number of persons and the value of the traffic interested in the Roads proposed.

Promoters' Witnesses.

Evid. p. 2 & 3 MR. DEWHURST details the number of settlers, resident landholders, living between the Company's south boundary and Liverpool Rangs, as follows:—

a. 78	Parish of Moan	...	...	51
a. 84	„ Yarramanbah	...	...	23
a. 91	„ Towarri	...	...	18
	Total, resident landholders	...	...	92

App. A. 2  
p. 46

Or say 276 persons.

In the same Appendix MR. DEWHURST gives an estimate of the traffic anticipated for the different proposed roads.

p. 43	No. 1. Station supplies	...	300 tons
	Wool	...	400 „
p. 45	No. 4. Produce of Parish of Moan—		
	Wool	...	28 tons
	Fat Sheep	...	1,000
	Wheat	...	4,000 bushels
	Merchandise and Stores	...	15 tons
p. 45	No. 5. Produce of Parish of Yarramanbah—		
	Wool	...	30 tons
	Fat Sheep	...	1,000
	Wheat	...	2,400 bushels
p. 45	No. 6. Produce of Parish of Towarri—		
	Wool	...	50 tons
	Sheep	...	1,000
	Wheat	...	2,000 bushels

A. A. Company's Witnesses.

Evid. p. 26  
and 27. MR. JAMES RIXON, who knows Liverpool Plains intimately, and has for three successive years collected the Electoral Rolls and Stock and Crop returns, states the population of the whole of the district lying between the Company's south boundary and Liverpool Range as follows:—

	Families.	Persons.
a. 875 a. 876 a. 888 a. 889 a. 899, 900	Cattle Creek, Phillip's Creek, and Yarramanbah Creek	11 50 to 60
	Yarramanbah Creek and Miller's Creek	10 60
	Jack's Creek and Warrah Creek	5 17
	Total	26 137

Total, 137 persons, including servants and children.

This witness has known the district for thirteen years, and is confident that all the wheat grown there during the last ten years has not been more than one crop from 5 acres. "No wheat at all has been grown this year on the south side of Warrah."

Evid. p. 29  
a. 1010  
a. 1011 MR. DANIEL M'GRATH, a selector, living for the last twelve or thirteen years in the head of Warrah Creek (i.e., parish of Towarri), states that he once grew wheat, less than an acre. His neighbours, Bree and Montgomery, have also grown a "little," but none this year. No.

## No. 7. Estimated traffic—

App. A. 2  
p. 46

Sheep	...	...	...	15,000
Cattle	...	...	...	5,000
Horsemen	...	...	...	100

Compare with figures above quoted. Mr. Dewhurst's note at foot of Schedule No. 1, Appendix, A 2.

The above figures amount to a total yield of wheat from the three parishes named, of 8,400 bushels per annum.

Yet in the note to Schedule No. 1, he says, "Moan, Yarramanbah, and Towarri produce about 3,000 bushels of wheat."

Evid. p. 31 MR. E. C. MEREWETHER says that old Mr. Sevil cultivated when he first selected, "but of late it has been one year a crop, and the next year nothing." "There has been little cultivation carried on so far as my knowledge goes."

Evid. p. 33 MR. S. A. CRAIK had never heard of any wheat being grown on the ground between the Company's south boundary and the range.

Evid. p. 36 MR. GEORGE FAIRBAIRN never heard of a bushel of wheat being grown between the Company's south boundary and the top of the range.

Evid. p. 35 As to the dray traffic on the Sufferance track, Black Creek to Doughboy Hollow, Mr. Fairbairn, the Company's Stock Superintendent, arrives at its extent from the numbers of camping tickets issued. He states it as follows:—During 1877, 210 teams passed to and fro. At the end of 1877, the Great Northern Railway was extended to Quirindi, and the traffic on the Black Creek track began to fall off.

Evid. p. 35	In 1878	...	...	92 teams passed
a. 1264	In 1879	...	...	62 do.
a. 1267	In 1880	...	...	60 do.
a. 1268				

a. 1271 These figures include the traffic to and from the country lying between the Company's south boundary and Liverpool Range, which traffic he estimates at 20 teams in a year. The remainder of the traffic comes from settlers about Blackville and Yarraman. Since 1877, the traffic from and to stations west of Blackville, goes to Quirindi Railway Station.

Evid. p. 39 As to traffic other than dray traffic, he states a. 1424 "there are perhaps fifty buggies and spring carts a year" using the track.

## FOURTH—As to the facilities afforded by the Company to the public.

## Promoters' Witnesses.

Evid. p. 4 MR. DEWHURST understands that the ninety-two a. 159 people for whom these roads are to be made are now allowed to come across the Warrah estate under certain conditions.

Evid. p. 9 MR. CHAS. IVORY says "We always had a road a. 360 through the Company's land, and always made use of it, in my time. I could not say that I heard any complaints."

Evid. p. 17 MR. A. LODER says the road from Blackville to a. 563 Murrurundi has been in existence for 35 years, though not always open. He believes that when a. 564 an application was made it was usually granted, a. 565 but there were times when it was not granted.

## A. A. Company's Witnesses.

Evid. p. 29 MR. RIXON, being asked "If such roads were a. 987 made, would it not afford much greater facilities for getting produce to market than the people have now?" replies: "I believe they all use these roads now."

a. 991 Again, "I have always understood that they (the settlers) passed through," with their drays.

Evid. p. 29 MR. D. McGRATH has "never had any difficulty a. 1003 in getting backwards and forwards with his cattle, a. 1006 by asking permission." Had declined to sign a a. 1008 petition to get roads opened because he prefers to have the roads as they are. "Prefers to have the road as it is rather than have it fenced in."

Evid. p. 30 MR. E. C. MEREWETHER says that in his time a. 1044 wheeled vehicles, or persons riding, could use the Black Creek track. As to teams—a nominal a. 1046 charge was made for permission to camp and turn a. 1047 out. The teamsters were permitted to turn out a. 1048 their cattle unrestrictedly at points where there was water. Their convenience was considered.

a. 1055 Had upon one occasion called upon Mr. Farnell, then Minister for Lands, and offered to give the a. 1056 public a road along the Black Creek track conditionally that it was fenced; also offered to give a road down each of the Creeks to intersect the a. 1057 Black Creek road, but only the main Black Creek road was to be fenced.

p. 31 The extension of the railway northwards has a. 1090 since rendered these roads less necessary. There a. 1091 is less need for them now than there was. The a. 1093 people are well considered by present arrangements.

MR.

vid. p. 32  
a. 1125 to  
a. 1150  
Evid. p. 32  
MR. S. A. CRAIK states that when the company fenced the Warrah estate, an accommodation paddock was provided for the teamsters using the Black Creek track. The public, however, never used it because a nominal charge was sought to be imposed, and they were allowed to camp elsewhere on the estate free of charge.

a. 1152  
"Supposing that the officers of the Company treat the public as at the time I was there under Mr. Merewether, the public would be better off without the proposed roads, better off with the roads as they are."

a. 1154  
As to the road from Black Creek to Doughboy Hollow, the public would require it to be fenced for travelling stock.

a. 1173  
The Company have, I consider, given them (the settlers between the Company's south boundary and Liverpool Range) great consideration.

a. 1180  
a. 1181  
"My practice when at Warrah was to allow small settlers to bring both cattle and sheep through on sufferance."

p. 4  
a. 1203  
The reason the settlers have not reached their market at Scone is that the Company has been very lenient with them and allowed them to do pretty much as they liked. They would be nearer Maitland and Newcastle at Scone than at Doughboy Hollow by 20 miles.

Evid. p. 35  
a. 1248 to  
a. 1250  
a. 1249  
MR. GEORGE FAIRBAIRN explains that the system at present in force for issuing camping tickets. The teamsters have expressed satisfaction with the arrangement.

a. 1270  
Since the railway was extended to Quirindi the greater part of the traffic from and to places west of Blackville goes to Quirindi by preference.

a. 1305  
a. 1308  
a. 1310  
a. 1311  
a. 1314  
a. 1315  
a. 1316  
The people living between the Company's south boundary and Liverpool Range are permitted to take their stock to market through the Company's estate on making application. Permission has frequently been sent by letter through the post. I never refused permission to one of these people when they applied for it, and before I took charge I do not remember hearing of any person living near the range being refused permission to take stock through the run. With drays, they are allowed to travel down the creeks to the Black Creek track, and along it on the terms on which carriers use that track. If they require to camp they obtain tickets from the gatekeeper, or, where there is no gatekeeper living near, special facilities for getting tickets have been afforded.

FIFTH—As to complaints of ill-treatment imposed by the Company upon persons using the accommodation roads.

Promoters' Witnesses.

Evid. p. 11  
a. 378  
a. 381  
a. 383  
Mr. J. P. ABBOTT, Chairman of the Committee, states an instance of hardship which occurred to a man named Montgomery. He does not know the facts to be as he states them, but believes what he is told.

Evid. p. 11  
a. 390  
Mr. ABBOTT also mentions the case of a Mr. Swift, of Coomoo Coomoo, whom the Company prevented taking stock through the estate.

Evid. p. 13  
a. 433  
Mr. UNDERWOOD says he has heard people complaining about their stock, but does not know if there is any truth in the complaints. He is then asked, "Living where you do you would have been in the way of hearing of cases of the kind if they existed?" and replies, "I have heard of people being summonsed for not shutting the gates and so on, and of their being brought back again."

A. A. Company's Witnesses.

Evid. p. 37  
a. 1318 to  
a. 1325  
MR. GEORGE FAIRBAIRN explains this case, and it will be seen on reading his evidence that whatever inconvenience there was, was occasioned by Montgomery's failing to obtain the usual permission for the team to pass through the estate, a permission he knew he could have obtained.

a. 1321  
a. 1408 to  
a. 1420  
Montgomery admitted to Mr. Fairbairn that he had made use of the case to bring pressure to bear on the Government.

Evid. p. 24  
a. 701  
a. 702  
MR. S. M. SWIFT, of Coomoo Coomoo, denies that this occurred. He never applied to the Company for permission, and the Company never refused it.

Evid. p. 17  
a. 555 Mr. A. LODER says: "I have heard of instances of people being refused permission to pass through, but I am not aware of any from my own knowledge."

Evid. p. 19  
a. 613 Mr. RICHARD WEAVER has heard innumerable complaints as to the necessity for roads through the estate.

a. 624 Was himself threatened by one of the managers (Mr. Craik) to be pulled out of his buggy.

Evid. p. 19  
a. 630 When asked, "How do these people, the draymen, manage to get there now?" he says: "They have to chain their bullocks up at night, so that they shall not trespass. If they get off the road the Company's men will take them to the pound. I have known them to be chained up to the dray."

a. 640

Evid. p. 32  
a. 1124 Mr. CRAIK says he never stopped Mr. Weaver, and never thought of stopping him.

Evid. p. 32  
a. 1113 Mr. CRAIK does not believe that this alleged occurrence ever took place. He would have been likely to hear of it if it had.

Evid. p. 36  
a. 1261 Mr. FAIRBAIRN never heard of it, and does not believe it ever occurred. "I do not think it could have occurred during the last eleven years without my knowledge."

a. 1232

SIXTH—As to the damage the proposed roads would cause to the A. A. Company.

a. 110 Mr. DEWHURST says: "The opening of these roads would do the A. A. Company's estate a vast injury—immense injury. They would be very injurious to the interests of the Company," and he a. 121 explains his reason for so thinking.  
a. 138 to 140

Evid. p. 10  
a. 303 Mr. ABBOTT says: "I think the cross roads would injure the Company, but I do not think the main road from Blackville to the Willow Tree would in any way injure the estate. The other roads would of course injure the Company's property."

Evid. p. 13  
a. 580 Mr. A. LODER says: "I do not think it would be a very serious loss to the Company. It would be a loss no doubt, rather an inconvenience than a loss, but it would be a great gain to the public."

Evid. p. 30  
a. 1053 Mr. MEREWETHER being asked: "Supposing these roads were granted and fenced, would it not greatly damage the property?" replies: "I have no doubt about it. Evid. p. 32  
a. 1140 to Mr. CRAIK says the roads proposed down the a. 1143 creeks would be ruinous to the paddocks adjoining them, as they would cut off the water.

Evid. p. 37  
a. 1320 Mr. GEO. FAIRBAIRN thinks if these proposed a. 1332 to roads down the creeks were opened they would do a. 1340 the estate very great injury, and explains in what a. 1357 to way the injury would be most felt. He is cross-examined as to this.  
a. 1361

SEVENTH—As to the advantage to the public estate.

No. 1. p. 44 In the Appendix to his evidence, Mr. Dewhurst states the area of land unalienated between the Company's south boundary and Liverpool Range.

	Unalienated Acres.
Parish of Moan ... ..	24,115
" Yarramambah ... ..	10,454
" Towarri ... ..	7,942

None of which is classed as agricultural.

Evid. p. 12  
a. 427 Mr. UNDERWOOD is asked whether he thinks the want of these roads has had a prejudicial effect upon the settlement of the Crown Lands in the vicinity of the Warrah estate, and replies, "No, I do not think so." Further asked, "Do you not think good roads would induce people to take up land?" he says: "If there were good land I think they would go for it, and chance the roads."  
a. 428

7. Your Petitioner submits to your Honorable House that the evidence completely fails to support the conclusion of the Committee that these proposed roads are either advisable or necessary. That the demand for them is not made, or even supported, by the people supposed to be principally interested in them; and that it rests on an entire misapprehension as to the value of the public interests concerned, or on vague and trumped up stories and complaints, of which the only instances particularly specified are shown to be untrue.

Your Petitioner therefore humbly prays that your Honorable House will be pleased to take the circumstances into consideration before adopting the Report of your Select Committee, and to grant your Petitioner leave to be heard by counsel at the Bar of the House in opposition to the adoption of the said Report.

And your Petitioner will, as in duty bound, ever pray, &c.

JESSE GREGSON,  
General Superintendent A. A. Company.

Newcastle, 29th June, 1882.

1882.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LANDS GRANTED TO AUSTRALIAN AGRICULTURAL COMPANY.  
(CORRESPONDENCE RESPECTING PROPOSED ROADS.)

*Ordered by the Legislative Assembly to be printed, 13 October, 1882.*

The Hon. Sir John Robertson, K.C.M.G., to J. Gregson, Esq.

*Re Roads through the A. A. Company's Estate, Warrah.*

Dear Mr. Gregson,

Sydney, 13 September, 1882.

I am willing to submit to Parliament an amendment on Mr. Abbott's motion for the adoption of the report on these roads to the effect that,—The road from Black Creek to Willow-tree, about 33 miles (1½ chains wide)—the road known as the cattle track, about 18 miles (1½ chains wide)—the road up Phillip Creek (from the road from Black Creek to Willow-tree) towards Moam Rock Gap, about 6 miles (1 chain wide), together with the Great Northern and the Cuerindi branch Roads as at present in use,—be conveyed by the Company to the Government free of compensation for severance or for the fee. The intent being that with respect to the necessary fencing the Government shall act with regard to these roads in the same way as they do with roads through other alienated lands of the Colony, that is to say, where the road passes through ground fenced then the Government pay for the erection of any necessary fence, but that when the land is unfenced the Government pay nothing.

The Company also to agree that in the event of other roads being required the Company shall be placed with regard to the creation of such roads in the same position as the holders of ordinary grants with regard to the powers given to the Government under the 2nd clause of the Act 4th William 4th No. 11.

I feel that the Company may rest assured that neither this Government nor any Government following it will use the power required from the Company to make roads, &c., as above in any way adverse to its interests, except upon the clearest demonstration of their desirability or necessity in the public interest.

I am, &c.,

JOHN ROBERTSON.

J. Gregson, Esq., to The Hon. Sir John Robertson, K.C.M.G.

Australian Agricultural Company, Newcastle, 19 September, 1882.

Dear Sir John Robertson,

I am duly in receipt of your letter of 13th instant received, stating the terms and conditions of the amendment you are willing to move in the Assembly upon the further consideration of Mr. J. P. Abbott's motion for adoption of the report of the Select Committee on lands granted to the Australian Agricultural Company.

2. With reference to the road from Blackville to Willow-tree, I would wish to remark that my consent to it was on the understanding that it was to be in lieu of the existing sufferance track from Blackville to Doughboy Hollow, and it will follow as a matter of course that as soon as the new line is fenced and open for traffic no further permission to use the sufferance track will be given.

3. Subject to this explanation I have much pleasure in assenting to the arrangement proposed as stated in your letter, presuming that in the fencing of the roads the necessary gates for the Company's use are to be provided at the expense of the Government.

4. If your amendment be adopted by the Assembly, and the Government should thereupon decide upon giving effect to it, I would respectfully beg that you will cause instructions to be given to the surveyor in whose hands the marking out of the lines may be placed, to consult as far as possible the wishes of the Company in regard to the same. They are of considerable length and will to a great degree involve modifications of the Company's existing subdivision fences, and it is for this reason that I should be glad if the interests of the Company as well as the public could be concurrently considered.

5. In reference to the conditions, that for the future the Company should agree to be dealt with under the provisions of 4 William 4 No. 11, the Government will I am sure have no difficulty in consenting to a stipulation, that in the event of the Act being exercised for the purpose of deviating or substituting other roads in lieu thereof, the original road in portion of road shall revert to the Company free of charge.

6. May I be permitted to suggest, that perhaps after all the easiest and best method of dealing with the matter would be for the Government to introduce a short Bill before Parliament to carry out the arrangement now agreed to.

I am, &c.,

JESSE GREGSON,

General Supt., A. A. Co.

The Hon. Sir John Robertson, K.C.M.G., to J. Gregson, Esq.

Sydney, 22 September, 1882.

My Dear Mr. Gregson,

I have the honor to acknowledge your letter of the 19th instant, on the subject of roads through the A. A. Company's Estate (Warrah).

1. With reference to the road from Blackville to Willow-tree, what you write in your second paragraph is what I understood in our conversation previous to my writing to you on the 13th instant.

2. As to the Government providing gates for the Company's use, when the fencing off of the road (the opening of which you agree to) takes place, I must state that this would be going further than the Government have ever yet gone, and on reference to my letter before alluded to it will be seen that I referred to the practice in similar cases and suggested the same, and do not now consent to more.

3. As to your request, that the surveyor trusted with the marking out of the roads may be instructed to consult as far as possible the wishes of the Company in regard to the same, I may say that it is always the practice when taking a road through freehold land to do so, but of course though endeavouring to meet the views of freeholders, the Government reserve the right of final determination thereof.

With regard to the suggestion that the Government should introduce to Parliament a short Bill to carry out the arrangements which I suggested and which you have now agreed to, I prefer the arrangement I have suggested, and consider that the introduction or not of a Bill must be optional with the Government.

Yours, &c.,

JOHN ROBERTSON.

J. Gregson, Esq., to The Hon. Sir John Robertson, K.C.M.G.

Australian Agricultural Company, Newcastle, 26 September, 1882.

Dear Sir John Robertson,

Acknowledging your letter of 22nd instant, I would remind you, in reference to my request that gates may be allowed, that the practice adopted in similar cases involves I presume payment of compensation to the owners of the land taken for roads. In the present instance the Company are paid nothing, but are giving the land free of charge, on account of a resumption which cannot but be of damage to them, and for which they would be entitled, both legally and morally, to claim heavy compensation. Surely then the Government will do what in them lies, to prevent the roads being more than is unavoidable, a source of expense and inconvenience to the Company arising from the severance.

I am entirely in the hands of the Government as to the suggested Act of Parliament. My intention was to limit myself to throwing out a suggestion which the Government might adopt or not as they thought proper.

I am, &c.,

JESSE GREGSON,

General Supt., A. A. Co.

The Hon. Sir John Robertson, K.C.M.G., to J. Gregson, Esq.

Sydney, 28 September, 1882.

My Dear Mr. Gregson,

Your letter of the 26th instant is to hand. You are in error in supposing that compensation is given in similar cases of road proclamation through freehold land. To make a difference in favour of your Company would involve trouble, and I believe failure in obtaining a settlement. I feel sure therefore that you will waive further objection.

Yours faithfully,

JOHN ROBERTSON.

J. Gregson, Esq., to The Hon. Sir John Robertson, K.C.M.G.

Australian Agricultural Company, Newcastle, 30 September, 1882.

Dear Sir John Robertson,

On your assurance given, in your letter of 28th instant, that I am in error in supposing that compensation is given in similar cases of road proclamation through freehold land, I must waive my claim to have the gates provided at the expense of Government along the lines of road to which I have assented, on behalf of this Company. I therefore withdraw the claim accordingly.

I remain, &c.,

JESSE GREGSON,

General Supt., A. A. Co

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

ROAD THROUGH THE SEGENHOE ESTATE.  
(CORRESPONDENCE, PETITIONS, &c.)

---

*Ordered by the Legislative Assembly to be printed, 26 October, 1882.*

---

RETURN (*in part*) to an *Order* of the Honorable the Legislative Assembly of New South Wales, on the 26th September, 1882, That there be laid upon the Table of this House,—

- “ (1.) Copies of all Correspondence in reference to any and all applications for a second road through the land of Mr. Matthew Collins, Dartbrook, near Scone, with the names of the persons applying for this road; and all letters, &c., opposing the opening of this road.
- “ (2.) Copy of the plan showing the area of Mr. Collins’s land, and position of road asked for.
- “ (3.) Copies of all Correspondence, Petitions, &c., in reference to application for opening a road through the Segenhoe Estate of Messrs. White, from the people of the Rouchell and others; also Copies of all Correspondence from Messrs. White, and any and all Government Officials, against opening of a road through the Segenhoe Estate.
- “ (4.) Copy of the plan showing the area of the Segenhoe Estate, the number of roads through it, and the road asked for from the Rouchell to Scone, by Petition presented to Mr. McElhone, on behalf of the people of Rouchell.”

(*Mr. McElhone.*)

23.	Minute of the Surveyor-General with reference to the road. 14 March, 1882 .....	12
24.	The Under-Secretary for Mines to John McElhone, Esq., M.P., further reply to No. 21. 21 March, 1882 .....	13

## ROAD THROUGH THE SEGENHOE ESTATE.

No. 1.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 13 July, 1879.

I have the honor to forward you a petition numerously signed by people living on the Rouchell and other creeks, praying that the old road to Aberdeen running through Segenhoe and Blairmore might be opened. This road was used for fully forty years or more, and has only been closed lately by the Messrs. White and Hall, since the Messrs. White bought the Segenhoe Estate.

A bridge costing fully £3,000 has lately been erected at Aberdeen, and through this road being closed, it is of no use to the people, as they cannot get to it for want of this road, which would come out to the bridge. But for want of this road the people have to go miles round by way of Scone to get to Aberdeen.

I think this road has been proclaimed and opened, at any rate it has been used for over forty years, and the people have a right to it by user. I have the honor to request that you will take immediate steps to proclaim and open this road, as it is much wanted.

I have, &amp;c.,

JOHN McELHONE.

Receipt acknowledged.—G.E.H., p. U.-S., 14/7/79. The Surveyor-General.—H.W., B.C., 14/7/79.

It is recommended that petitioners be informed that a road from Rouchell Brook to Aberdeen, through the Segenhoe Estate, was formally opened for traffic on 22 January, 1869 (as *per* Government Gazette Notice attached), and the public should therefore maintain their right to the unobstructed use of the road.—R. D. FITZGERALD, for Surveyor-General, 21 July, 1879.

Inform Mr. McElhone, M.P.—H.W., 22/7/79.

[Enclosures.]

Mr. N. F. Asser to J. McElhone, Esq., M.P.

Sir,

Scone, 9 July, 1879.

Accompanying this is a petition from the inhabitants of the Rouchell Brook and other creeks and the people of Scone to the Minister, asking that the road lately closed across Segenhoe. I consider the closing up this road a great piece of injustice to the public. The petition is fully stated, but being handled about so much is not very clean. I have been deputed to send this to you, and hope you will urge the necessity of having this road re-opened.

I am, &amp;c.,

N. F. ASSER.

Petition of Residents of Scone and District, Rouchell Brook and Tributaries, to the Secretary for Mines.

The petition of residents of Scone and District, Rouchell Brook and Tributaries,—

Respectfully sheweth,—

That your petitioners and the general public have for the last thirty years uninterruptedly travelled over and used at all times a road from the Rouchell Brook and tributaries to Scone, passing through the Segenhoe Estate.

That some years back the Segenhoe Estate was purchased by Mr. White, and for some time after entering into possession he did not interfere to prevent traffic over this road until about eighteen months ago, when the road was closed by Mr. White, and the public prevented from travelling along it.

That the road closed by Mr. White is the only direct and good dray road to Scone from the Rouchell Brook and tributaries, and only about 2 miles through the estate from a place called Broad Crossing on the river Hunter to the main road, passing near Segenhoe House.

That since the road has been closed, your petitioners and the public generally in order to get on the main road to Scone have to take a very circuitous route over a very bad road, and to cross the river Hunter at a very dangerous place, and in travelling this road they have to trespass on two other estates, making the difference in distance between the road closed and the one the public are forced to travel over about 4 miles, and could by the owners of these estates at any time be stopped.

That persons in need of medical assistance could not with any degree of safety travel at night over the road the public are now forced to go, but would have to go round by way of Aberdeen, a distance of about 12 miles, and to your petitioners and the public generally it is a very great hardship to have to travel over dangerous and inferior roads, and be deprived of a road which by usage and custom they are justly entitled to travel over.

That on the Rouchell and other creeks there are about seventy families who have large interests in land on these creeks, and often have occasion to attend the Court-house, Scone, in connection with their holdings.

Your petitioners therefore respectfully request that you will be pleased to take into consideration the foregoing representations, and cause the road closed to be re-opened for public traffic.

And your petitioners, as in duty bound, will ever pray.

## No. 2.

The Under-Secretary for Mines to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Sydney, 24 July, 1879.

See No. 1.

With reference to your letter of the 13th instant, forwarding on behalf of certain residents of Scone, Rouchell Brook, &c., a petition for a road from the Rouchell Brook and tributaries to Scone, passing through the Segenhoe Estate, I am directed to inform you that a road from Rouchell Brook to Aberdeen, through the Segenhoe Estate was formally opened for traffic on 22nd January, 1869, which was notified in the Government Gazette of that date, and the public should therefore maintain their right to its unobstructed use.

I have, &amp;c.,

HARRIE WOOD,

Under-Secretary.

## No. 3.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 25 July, 1879.

See No. 2.

In reference to letter of 24th July, advising me that a road was formally opened from Rouchell Brook, &c., to Aberdeen, I have the honor to request that you will instruct the District Surveyor to mark and open this road, as the Messrs. White, now owners of Segenhoe, are likely to oppose people using it. Those who are likely to use it are poor men and afraid to tackle such rich men as the Messrs. White.

Trusting my request will be granted,—

I have, &amp;c.,

JOHN McELHONE.

## No. 4.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 7 August, 1879.

See No. 2.

A short time since I wrote you in reference to opening the road from the Rouchell to Aberdeen, and got a reply that this road was opened in 1869. I also sent you a petition numerously signed, as I thought to have this road opened.

Enclosure.

But it appears from the enclosed letter of Mr. N. F. Asser, of Scone, that I made a mistake and that the petition was to have the road opened from the Rouchell, through Segenhoe, to Scone. Mr. Asser states that this road to his knowledge was used for thirty-four (34) years until closed by the Messrs. White, who bought Segenhoe five or six years ago, and through its being closed the people have to go many miles round to get to Scone.

I have the honor to request that you will take the necessary steps to proclaim and open the road from the Rouchell to Scone, through the Segenhoe Estate, without delay, as it is unjust to allow the Messrs. White or any other person to close a road used by the public for so many years, and compel them to travel so many miles out of their way.

I have, &amp;c.,

J. McELHONE.

P.S.—I trust you will rectify the mistake, if any, caused by my letter asking to have road from the Rouchell to Aberdeen opened.

The Surveyor-General.—H.W., B.C., 8/8/79.

Mr. District-Surveyor Evans for report.—R. D. FITZGERALD, for Surveyor-General, 12 September, 1879. Transferred to Mr. VERNON.—THOMAS EVANS, 26/9/79.

[Enclosure.]

Mr. N. F. Asser to J. McElhone, Esq., M.P.

Sir,

Scone, 29 July, 1879.

I had intended seeing you when you went through yesterday evening but was busy just as the train went past. I observe by the *Mercury* to-day that you have published the reply to the Rouchell petition, which you will see yourself does not answer the petition at all but quite shirks it.

Everybody knows there is a road from Rouchell to Aberdeen, and this road is always in use; but what was asked if you read the petition, is the road from Rouchell through Segenhoe to Scone, not to be sent miles out of the way by Aberdeen. The road asked for has been in use to my knowledge for the last thirty-four years until stopped by the Messrs. White, which stoppage is a great injustice both to the inhabitants of the Rouchell and also to Scone.

Hoping you will see a little more into this matter for us,—

I remain, &amp;c.,

N. F. ASSER.

No. 5.

## No. 5.

Mr. Licensed-Surveyor J. Vernon to The Surveyor-General.

Sir,

Scone, 28 November, 1879.

With reference to your B.C. instructions to Mr. District-Surveyor Evans, dated 12th September, 1879, forwarding for report a petition from the residents of Scone and the Rouchell Brook and its tributaries for the opening of a road through a portion of the Segenhoe Estate from a point on the "road from Aberdeen to the Rouchell Brook," about 5 miles from Aberdeen, to the "road from Scone to Brushy Hill," at a point about  $2\frac{1}{2}$  miles from Scone, I have now the honor to report as follows:—

The property through which the road applied for passes is Thomas Potter Macqueen's 20,000 acres, now owned by Francis White, and is known as the Segenhoe Estate.

The statement that this road has been in uninterrupted use for more than 30 years I know to be incorrect, as a little more than fourteen years ago I had to obtain permission from the then occupiers of the Segenhoe Estate to travel this road. It was fenced across at that time, and although slip-rails were left on the track they were kept locked. Some time after this, and while the ownership of the estate was in dispute, no obstacle was offered to the use of the road, and it was not until Mr. White came into possession that it was again stopped.

I do not think, therefore, that a right to the road from long usage could be proved.

The other statements of the petition appear to be in accordance with fact, except the distance which the road would run through the Segenhoe Estate, said to be "about 2 miles." It cannot be much less than 6 miles.

Nearly half of the signatures to the petition are those of persons having little or no interest in the road.

I have enclosed a sketch to show the road applied for, and which I recommend should be surveyed <sup>Sketch.</sup> with a view to opening as a Parish road.

From this sketch it will be seen that the proposed road will run through the Segenhoe Estate its whole distance.

It will not do the estate much injury that I can see, either if opened with gates or if fenced on both sides.

Wanting this road, the people who would otherwise use it will have to travel to Scone via Aberdeen, lengthening the distance about 4 miles.

The Rouchell is a thickly populated district, chiefly agricultural. Much of the land has been acquired by conditional purchase, and therefore the people requiring this road have often to attend the Land Office and Court at Scone on business connected with their holdings. Scone, too, is a better market for the produce of the district than Aberdeen.

The traffic would be purely local.

The whole of the Segenhoe Estate is fenced. This road would cross two fences, both shown on sketch.

The cost of fencing cannot be estimated at less than 7s. per rod.

Should the survey of this road be decided upon, I think that starting from the "road from Scone to Brushy Hill" at a point (A on sketch) about  $2\frac{1}{2}$  miles from Scone, instead of the track now in use, a road can be laid out which will save a considerable distance between that point and where the proposed road would leave the "road from Brushy Hill to Aberdeen" (B on sketch). Two or three small gullies would require crossings, and one short side-cutting would have to be made.

From point B on sketch the main difficulty will be to obtain a good crossing of the River Page without going within 200 yards of the Segenhoe House, but this I think may be done.

From the Page to the Hunter no special obstacle exists. The crossing of the Hunter is considered a good one, and within a short distance of this crossing the proposed road will join the "road from Aberdeen to the Rouchell" at a point about 5 miles from Aberdeen.

In conclusion, I would recommend the survey of the road.

I have, &amp;c.,

JAMES VERNON, L.S.

I have some knowledge of this place, and recommend the survey of the road applied for, as a necessary road from Rouchell to Scone.—THOMAS EVANS, District Surveyor, 16th December, 1879.

Mr. District-Surveyor Evans is requested to lay out the road recommended by Mr. Licensed-Surveyor J. Vernon.—R. D. FITZGERALD, for Surveyor-General, 7 February, 1880. Transferred to Mr. Licensed-Surveyor Vernon.—THOMAS EVANS, District Surveyor, 19/2/80.

## No. 6.

Mr. Licensed-Surveyor Vernon to The Surveyor-General.

Sir,

Scone, 31 August, 1880.

In compliance with your B.C. instructions to Mr. District-Surveyor Evans, dated 7th February, <sup>See No.</sup> 1880, I have now the honor of forwarding you plan and book of reference of the road from the road from Scone to Brushy Hill to the road from Aberdeen to the main camp on Rouchell Brook, parishes of Scone, Macqueen, and Russell, in the counties of Brisbane and Durham.

Compared with the present track, the line of road now laid out shortens very considerably the distance between Scone and the Rouchell district. With comparatively small expense it can be made an excellent road, and when made the grant for a fifth class road will be sufficient to keep it in repair.

The public require this road, and I think by its opening no serious injury will be done to the property through which it passes. The expense of fencing would be considerable—a double line of fence for the whole distance would cost about £1,250; but as the estate is only used for grazing purposes, I am of opinion that public gates would answer all purposes, and would not make the paddocks less secure than they are at present, for it may be remarked that gates or slip-panels already exist (for private use) in the fences

fences crossed by this road; if any portion of the road requires fencing on both sides it is that between the road from Aberdeen to Brushy Hill and the crossing of the River Page, a distance of 24 chains; as this is near the homestead it would be right to confine the traffic between fences, and this is the only paddock likely to be cultivated. I should recommend therefore that fencing money be granted for this length, but that the other portions of the road be opened with public gates.

The traffic on this road will be very considerable; at present, for the want of any dray road to Scone, the traffic from the Rouchell district goes to Aberdeen; but when this road is opened the principal part of the traffic from this extensive district must be by this road to Scone.

The natural obstacles on this line of road are trifling, and can be overcome at small expense; they are—a few small gullies, which require the banks to be cut down or culverts over them, one side-cutting of about 5 chains, and the crossings of the Rivers Page and Hunter; a little clearing will also be necessary. The whole may be done and the road made fit for traffic for the sum of £125, and it will not be difficult or expensive to keep in good repair afterwards.

It is a peculiarity of the River Page that after floods the gravelly bed becomes in places a quagmire, and it is for this reason that at the crossing I marked the road of greater width as shown by diagram on plan.

See No. 7.

As there was but little detail in this survey I have plotted the plan to scale of 20, and shown by diagram particular places.

The survey was made between the 27th July and 7th August, 1880.

I have, &c.,

JAMES VERNON, L.S.

P.S.—I may state that no part of this road is within 220 yards of the Segenhoe House.

I recommend that public gates be allowed on this road, except at the 24 chains near the Segenhoe homestead, where fencing should be allowed, as recommended by Mr. Vernon.—THOMAS EVANS, District Surveyor, 28 September, 1880.

[Enclosure.]

ROAD from the road from Scone to Brushy Hill to the road from Aberdeen to the Main Camp on Rouchell Brook, counties of Brisbane and Durham.

Memorandum showing the names of the owners or reputed owners of the enclosed lands through which the abovementioned road passes, the length of new fencing required to be erected within each enclosure, and the cost thereof. Also, the length of the existing fences which will require removal, and the cost of their re-erection.

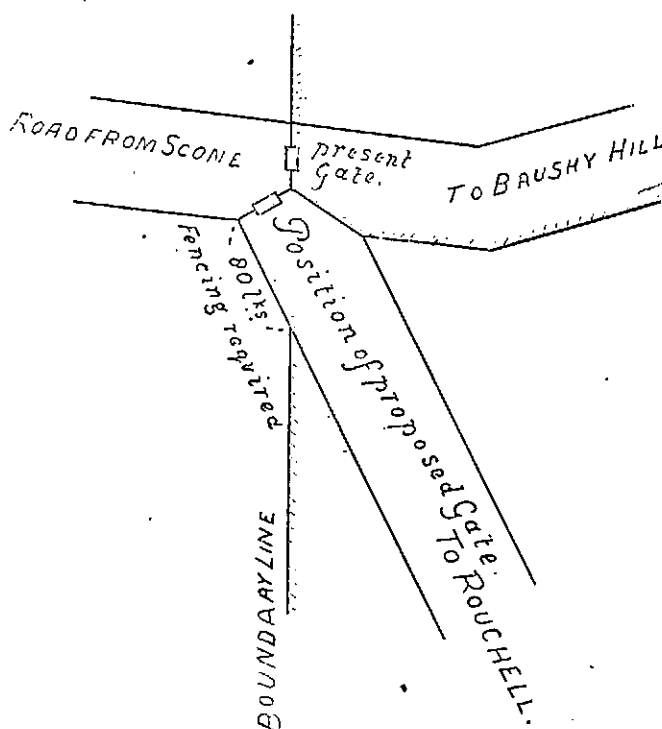

Name of Owner or reputed Owner.	Name of Occupier.	Length of Fencing required.		Cost per rod.	Total Cost.
		New.	Old (to be renewed and re-erected).		
Wm. Alex. Dumaresq....	W. A. Dumaresq ...	ch. lks. 0 30	chains. Nil.	7s.	About £1 10s., as two round posts will be required. £1,250.
Messrs. White .....	Messrs. White.....	446 39	„	7s.	

NOTE.—This is an estimate for a double line of fence for the whole length of the road. I am of opinion, however, that except perhaps for a distance of 24 chains, where the road should be fenced on both sides, it can be opened with public gates without injury to the estate. The portion of road requiring a double line of fence is referred to in the accompanying report, and the cost would be 199 rods, at 7s., = £69 13s.

The first item (W. A. Dumaresq) is required whether a public gate is erected at the place or not, as rough sketch underneath shows. On sketch the fences and gates are shown as they should be placed.

31 August, 1880.

JAMES VERNON,  
Licensed Surveyor.

## Minute for Executive Council.

## Preliminary Notification of Road.

Department of Mines, Sydney, 8 March, 1881.

THE authority of His Excellency the Governor and the Executive Council is sought for the opening of the undermentioned line of road, as shown by the accompanying plan and book of reference, in accordance with the provisions of the Act 4th Wm. IV, No. 11, viz. :—Road from the road from Scone to Brushy Hill, at the east boundary of W. A. Dumaresq's 2,500 acres, to a point on the road from Aberdeen to the Main Camp, Rouchell Brook, within T. P. Macqueen's, now J. and H. C. White's, 20,000 acres, counties of Brisbane and Durham.

E. A. BAKER.

The Executive Council advise that the line of road herein specified, which it is intended to open in terms of the Act 4 William IV, No. 11, be notified in the manner prescribed by the said Act.

ALEX. C. BUDGE,

Clerk of the Council.

Approved, A.L., 15/3/81.

Minute, 15/3/81.

Confirmed, 22/3/81.

## No. 9.

## The Honorable J. White, M.L.C., to The Secretary for Mines.

Sir,—

Sydney, 16 March, 1881.

A line for a proposed new road from the Rouchell to Scone having been recently surveyed through the Segenhoe Estate, I beg to state the following objections why the said proposed road should not be opened :—

1. A new road is not required, as the inhabitants at the Rouchell have already two roads to Scone, as shown upon the enclosed plan, one to Aberdeen and thence to Scone, the other, though not a proclaimed road, has been in use for some years, and the traffic has never been interfered with ; each of these roads runs from 6 to 7 miles through the Segenhoe Estate.
2. That the present roads have been sufficient for all purposes hitherto, and that as the population of the Rouchell has not increased for some years past, and is not likely to increase in future, owing to the limited extent of land available for settlement, the present means of outlet are sufficient for all purposes.
3. That, though the petition for a new road has a large number of names, many of the signatures are not genuine, and many names appear of persons who have no interest in the matter, but who have appended their names merely because they have been asked to do so.

4. That in deciding a question of this kind consideration should be given to the injury that would be done to the properties through which the proposed road would pass.
5. In the present instance four roads already run through the Segenhoe property, as shown upon the plan enclosed, involving a large extent of fencing and doing great injury. The proposed road would still further cut up and injure the property, as it would pass through no fewer than five paddocks; this, besides doing me an incalculable injury, would involve the expense on the part of the Government of fencing the road on both sides throughout its entire length, for the Government could hardly refuse my application for fencing under such circumstances.

The above are some of my objections to the proposed new road, and I trust due consideration will be given to them when the question comes up for decision.

I am, &c.,  
JAMES WHITE.

The Surveyor-General, B.C., 22/3/81.—T.C.B., p. U.-S:

### No. 10.

The Under-Secretary for Mines to The Honorable James White, M.L.C.

Sir,

Department of Mines, Sydney, 21 March, 1881.

I have the honor to acknowledge the receipt of your letter of the 16th instant, objecting to the proposed road through the Segenhoe Estate, and to inform you that the matter will receive consideration after the road has been preliminarily notified in the Government Gazette

I have, &c.,  
HARRIE WOOD,  
Under-Secretary.

### No. 11.

The Under-Secretary for Mines to The Bench of Magistrates, Scone.

Gentlemen,

Department of Mines, Sydney, 25 March, 1881.

I have the honor to forward for deposit in the Police Office at Scone for public inspection and information, copies of a plan and book of reference of a road which is about to be opened as a parish road, under the Act of Council 4th William IV, No. 11, from the road from Scone to Brushy Hill at the east boundary of W. A. Dumaresq's 2,500 acres, to a point on the road from Aberdeen to the Main Camp, Rouchell Brook, within T. P. Macqueen's, now J. and H. C. White's, 20,000 acres, counties of Brisbane and Durham.

2. Receipt of the plan and book of reference must be acknowledged.

3. At the expiration of one month you will be good enough to advise this Department as to whether the plan and book of reference have been duly exhibited for public inspection.

I have, &c.,  
HARRIE WOOD,  
Under-Secretary.

### No. 12.

Preliminary Notification of a Parish Road.

Department of Mines, Sydney, 29 March, 1881.

His Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make the Parish Road mentioned in the Schedule appended hereto, to be maintained at the expense of the Parishes through which it passes: Notice is hereby given, that in accordance with the provisions of the Act 4th William IV, No. 11, a plan and book of reference, showing the intended line of the road in question, are now deposited at the Office of the Surveyor-General in Sydney, and at the Police Office mentioned.

It is requested that any well-grounded objections that may exist to the formation of the road in question may be transmitted in writing to the Clerk of the Executive Council within one month from this date.

By His Excellency's Command,  
E. A. BAKER.

#### SCHEDULE REFERRED TO.

No. 13.

The Under-Secretary for Mines to The Clerk of the Executive Council.

Sir, Department of Mines, Sydney, 29 March, 1881.

In drawing your attention to the notice in the Government Gazette of even date, respecting the intended formation of a parish road, viz., from the road from Scone to Brushy Hill, at the east boundary of W. A. Dumaresq's 2,500 acres, to a point on the road from Aberdeen to the Main Camp, Rouchell Brook, &c., I am directed to request that you will have the goodness, at the end of one month from the date thereof, to inform me whether any objections have been received by you in respect of the said road, in pursuance of the notice alluded to.

I have, &c.,  
HARRIE WOOD,  
Under-Secretary.

No. 14.

The Clerk of the Executive Council to The Secretary for Mines.

Sir, Executive Council Office, 5 May, 1881.

In compliance with the request contained in the Under-Secretary's letter of the 29th March last, I do myself the honor to inform you that no objection has been lodged with me to the formation of the proposed parish road noted in the margin.\*

I have, &c.,  
ALEX. C. BUDGE,  
Clerk of the Council.

\*From the road from Scone to Brushy Hill, on the east boundary of W. A. Dumaresq's 2,500 acres, to a point on the road from Aberdeen to the Main Camp, Rouchell Brook, &c. See No. 5.

The Surveyor General.—G.E.H., p. U.-S., B.C., 5/5/81.

Mr. District-Surveyor Allworth to report on Mr. White's objections contained in enclosed letter, especially that in the first paragraph, the road referred to therein (except that part between the roads from Scone and Aberdeen to Brushy Hill) does not appear to have been known to Mr. Vernon. (See his report and tracing enclosed.) Tracing enclosed shows by blue tint the road referred to above, and by red tint the one measured by Mr. Vernon and objected to by Mr. White.—A. J. STORRS, for Surveyor-General, 13 May, 1881.

Mr. Surveyor M'Donald, for consideration and report.—J. W. ALLWORTH, D.S., East Maitland, 6 June, 1881.

No. 15.

The Bench of Magistrates, Scone, to The Under-Secretary for Mines.

Sir, Police Office, Scone, 11 May, 1881.

In reply to your letter of 25th March last, I have the honor to inform you that the plan and book of reference of the road from Scone to Brushy Hill have been duly exhibited for public inspection at this office.

I have, &c.,  
J. P. WILSHIRE, C.P.S.,  
Pro Bench of Magistrates.

ee No. 11.

No. 16.

Mr. Surveyor Robert M'Donald to The Surveyor-General.

Sir, Muscleebrook, 31 August, 1881.

Advertent to your B.C. instructions of 13 May, issued to Mr. District-Surveyor Allworth, with reference to objections lodged by the Honorable James White to a road being opened through the Segenhoe Estate, from the road from Aberdeen to the Main Camp on Rouchell Brook to the road from Scone to Brushy Hill, I do myself the honor to inform you that I have inspected the roads and tracks in public use through the Segenhoe Estate, and made inquiries from a number of selectors and others residing in the locality, and now beg to report as follows :—

The direct track now in use from the Rouchell District to Scone is that shown on the accompanying sketch, which commences on the east boundary of the Segenhoe Estate, and follows close along that boundary to the Rouchell Brook; thence following in a north-easterly direction, crossing the Hunter River, near the southern boundary of portion No. 12, parish of Macqueen; thence passing along this boundary and through adjoining selections to the north-east corner of No. 17; and thence following somewhat in the direction shown on my sketch until the main road from Scone to Brushy Hill is reached. The first portion of the road, that is, between the Segenhoe boundary and the Hunter River, appears to be merely a bridle-track, and the traffic seems to be very limited, but after crossing the Hunter the track becomes more important, and there are indications of a fair amount of vehicular traffic, made, however, only by the selectors who have holdings on the Hunter River travelling to and from Scone. I made inquiries from several persons living near the Hunter crossing as to the amount of traffic from the Rouchell by this track, and I was informed that certainly not more than fifteen horsemen travelled that way in a month, and that it was only very rarely indeed, perhaps once or twice in a year, that a dray or other vehicle was taken from the Rouchell to Scone. I believe that the produce of the Rouchell District farms is invariably taken along the main road (which is a very good one) to Aberdeen; and as this produce is principally wheat, it is, as a rule, either ground at the mill in that town, or is sent on by train to Muscleebrook, or to the Maitland or Sydney markets. In rare instances grain is carted on along the Great Northern Road, or sent on by train from Aberdeen to Scone—the railway freight between these places is only 2s. (two shillings) per ton. It can easily be understood that these instances are rare, as farmers naturally send their produce to the biggest markets in preference to sending it up country, and especially to a small town like Scone, which is well supplied from its own immediate district. The necessity for increased access from the Rouchell District to Scone does not therefore appear to be great.

The

The direct road from the Rouchell to Scone in present use (marked ABC on sketch) is on the whole a fair one; the country between the Segenhoe boundary and the Hunter River is almost level, and is quite sound. The crossings of the Rouchell Brook and Hunter River are not good, and certainly unfit and even unsafe for vehicular traffic in their present state, but this could be remedied by a comparatively small expenditure by making cuttings and forming a roadway in and out of the channels. Between the Hunter and the Page Rivers the track is a fair one, there is one rather steep hill, which could, however, easily, and with little expense, be considerably improved; the crossing of the Page River is an excellent one, and a better track could not be desired than that from this river to the Scone and Brushy Hill Road. That part of the track (just described) between the Hunter River and the Scone and Brushy Hill Road is the one referred to in the first paragraph of Mr. White's letter; it is, and always will be, necessary for the use of the selectors on the Hunter, even if the road objected to be opened.

The road surveyed by Mr. Vernon, and objected to by Mr. White, branches off from the Main Rouchell Road about  $5\frac{1}{2}$  miles from Aberdeen, crosses the Hunter at a very good crossing, and follows almost level ground, until the Page River is reached; the crossing of this river is a bad one, quite as bad as the Hunter crossing near portion No. 1, parish of Macqueen, referred to in the previous paragraph. From the Page River to the Scone and Brushy Hill Road the country is rather hilly, and the first hills from the river are of loose black soil, which becomes boggy and heavy in wet weather. In one place a side-cutting of some extent would be necessary, and several gullies would require culverts in order to make the road available for dray traffic. Mr. Vernon estimates that £125 would be sufficient to make the road suitable for traffic, but I am of opinion that twice that amount would be required to form even a moderate road.

Comparing the track in use to the road objected to, I would say that the latter is the better, as it is a trifle shorter and avoids one crossing—the Rouchell Brook. But it appears to me, after considering the whole circumstances of the case, that the advantage which the selectors and others living on and near the Rouchell would derive by the opening of this road would not outweigh the injury which must necessarily follow to the estate. As far as I can learn, the tradespeople of Scone would be the greatest gainers, as the facilities would be increased for settlers to travel to that town and do their business there. It will be noticed that more than one-half of the signators of the petition for the road are Scone residents; but their benefit in this case would mean an injury to the tradespeople of Aberdeen and Musclebrook.

It is difficult to estimate the amount of injury the opening of the road would cause. The Segenhoe Estate is a cattle run, where large numbers of high-class cattle are bred and fattened, and it is of course very much to the owner's interests that the stock should be disturbed as little as possible.

A slight error occurs in the fourth paragraph of Mr. White's letter; it is stated that the road passes through five paddocks: it should be four paddocks.

The track shown on the sketch (which accompanied the instructions) as a little distance on the east of the Segenhoe boundary is not a good one, and is not used by the residents on the Rouchell, except on rare occasions.

I have, &c.,

ROBERT McDONALD,

Surveyor.

From this report, which deals exhaustively with the subject, it appears that the track A B C at present in use will be required whether or not the road under consideration is opened; therefore, should Mr. White consent to the public having uninterrupted use thereof, I am inclined to think that sufficient accommodation will be provided for the residents of the Rouchell. The bulk of the traffic is carried on by horsemen. At some future time, should the importance of the traffic warrant an expenditure of public money to improve the road, a survey might be made; and, with the view of the best line being selected, I would further suggest that the officer entrusted with it consult with the Road Superintendent.—J. W. ALLWORTH, District Surveyor, East Maitland, 9 Sept., 1881.

Confirmation of this road cannot be recommended, as the importance of it does not appear to warrant the granting of a large sum of money for fencing in accordance with the practice of the Department in similar cases, nor the infliction of much injury upon the owner of the Segenhoe Estate, who would have four enclosed paddocks traversed if the road were established. Moreover, it has been found, upon investigation, that a road is now in use from the Rouchell to Scone through the Segenhoe Estate, as stated by Mr. White in his letter herewith.—A. J. STOPPS (for Surveyor-General), 17 Oct., 1881.

Submitted.—H.W., 1/11/81. Approved.—A.R., 2/11/81.

#### No. 17.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 14 September, 1881.

Many months ago I sent a petition from the inhabitants of the Rouchell, praying that a road from the Rouchell to Scone, through the Segenhoe Estate, should be opened. From enclosed letter of Mr. Kenneth Kennedy I understand that nothing has yet been done in the matter, although the road is much needed, and which would save the people many miles to get to Scone.

The Messrs. White bought the Segenhoe Estate a few years ago, and up to this time the road from Rouchell to Scone had been used by the people for thirty or forty years without let or hindrance; and I have been advised that, prior to the Messrs. White purchasing Segenhoe, they always claimed and exercised the right of roads through it to get to their properties higher up the Hunter.

If the people exercised their rights, they could do so by chopping the fences. But they are poor and afraid of law suits. Segenhoe is an old grant, and no doubt the grant contains the right of the Government taking roads through it. As the case is urgent, and the people are denied their just rights of using roads used for many years through this estate, I trust the Government will do their duty and open this road which is so much needed. I have therefore the honor to request that you will be pleased, with as little delay as possible, to take the necessary steps to proclaim and open this road from the Rouchell to Scone.

And I will feel obliged if you will let me know what has already been done in the matter.

Yours, &c.,

J. McELHONE.

Inform Mr. McElhone, M.P., that road was preliminarily notified 29th March, 1881, and that an objection received is now being considered by the Surveyor-General.—G.E.H., p. U.-S., 16/9/81.

[Enclosure.]

[Enclosure.]

Mr. K. Kennedy to J. McElhone, Esq., M.P.

Rouchell, 12 September, 1881.

Sir,

In the interest of a large number of your constituents, of whom I am one, I write to request your influence to have the road opened for traffic from Rouchell Road to Scone, as surveyed by Mr. Vernon. Some time ago, after a good deal of delay, the Government at length ordered a road to be surveyed from Scone through Segenhoe to the Rouchell Road from Aberdeen. Mr. Surveyor Vernon has some time since executed the survey satisfactorily; the road thus takes almost exactly the track which was freely used by everyone for many years until closed by the Messrs. White. In fact, we believe that by length of usage we could claim the road. However, we are shut out, and told that there is another road we can go, when everybody knows that that road is no road at all for vehicles of any sort, and as a proof that the Messrs. White know that very well the clergy and doctors are allowed to go by the track now surveyed, but only on sufferance. As it now is, drays to get to Scone from the Rouchell have to go all round by Aberdeen, a distance from the point on the road where the surveyed line joins of about 12 or 13 miles, when by the surveyed line it is just 8 miles to Scone. Now Scone is our head quarters for police, land, electoral, and every other business; but the Messrs. White say by their actions, for they are resisting the opening of the road, that the interest of the public is not to be studied. I may mention that the survey was ordered in consequence of a numerously signed memorial for that purpose.

In consequence of Messrs. Whites' action it seems that a surveyor has been sent to report. If, as we are informed, he was sent to consult those who signed the memorial, he has most signally neglected his duty, for he consulted but one, saying that he had no time to see any more; perhaps he is so well satisfied with the justice of the survey and of its general utility that he sees no arguing is needed.

But as he was accompanied by the Segenhoe manager, who certainly is most strenuous in his employers' interests, and loses no opportunity to second their views, we trust you to make inquiry in the proper quarter and to watch the game now going on; any impartial man will side with us we are sure, and if a memorial is needed we will send a strong one.

You will oblige by attending to this.

I shall be happy to give further information if needed.

I am, &amp;c.,

KENNETH KENNEDY.

No. 18.

The Under-Secretary for Mines to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Sydney, 16 September, 1881.

I have the honor to acknowledge the receipt of Mr. Kenneth Kennedy's letter of the 12th instant (presented by you), requesting that the road from Rouchell Road through Segenhoe to Scone may be opened, and to inform you that the road in question was preliminarily notified 29th March, 1881, and an objection to it was received, and is now being considered by the Surveyor-General. See No. 17.

I have, &amp;c.,

HARRIE WOOD,  
Under-Secretary.

No. 19.

The Under-Secretary for Mines to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Sydney, 11 November, 1881.

With reference to the letter of Mr. Kenneth Kennedy (presented by you), applying for the opening of a road from the Rouchell Brook Road through Segenhoe to Scone, I am directed by the Secretary for Mines to inform you that the confirmation of the road cannot be granted, as the importance of it does not appear to warrant the expenditure of a large sum of money for fencing it, nor the infliction of much injury upon the owner of the Segenhoe Estate, who would have four enclosed paddocks traversed if the road were established; moreover it has been found upon investigation that a road is now in use from the Rouchell to Scone through the Segenhoe Estate.

I have, &amp;c.,

HARRIE WOOD,  
Under-Secretary.

No. 20.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 12 November, 1881.

I have the honor to acknowledge letter of 11th instant, in reference to opening a road from Rouchell Brook to Scone through the Segenhoe Estate, and must say I am greatly disappointed at the refusal to open this road, and have the honor to request that the case may be again considered with a view of opening this road. See No. 19.

The road asked for I am advised was used by the people of the Rouchell and others for over forty years prior to the Messrs. White buying the property, so that they have an absolute legal right to use it, but are too poor to test the case in a Court of Law. When they have to go to Scone to select land, they have to go many miles out of their way to get there for want of this road, and in such a case the cost of fencing should not be considered against the rights and convenience of a number of people. One road through this estate, now closed, was always claimed and forced by one of the owners before purchasing. I refer to the late Mr. F. White, who I was advised always used the road referred to. Trusting this case may be again considered with the view of opening the road asked for,—

I have, &amp;c.,

J. McELHONE.

No. 21.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 16 January, 1882.

I have the honor to forward you a petition signed by seventy-seven persons, praying that you will be pleased to open the road from the Rouchell Brook to Scone through the Segenhoe Estate.

By it you will see that the statements made that only three or four persons required this road.

I have already stated that the public used the road in question for forty years before the Messrs. White purchased the Segenhoe Estate, and the public have a right to this road if they liked to force it, as

per

per Sir W. Manning's decision. But I imagine the bulk or all of them are not in a position to go to the Supreme Court.

Nearly all who have signed the petition are freeholders and cultivators, and require this road to get produce to Scone, as it is several miles shorter than road via Aberdeen, which latter road is impassable now for drays.

I have the honor to request that you will be pleased to take early steps to proclaim and open this road.

I have, &c.

J. McELHONE.

Surveyor-General for a report.—A.R., 17/1/82. The Surveyor-General.—B.C., 19/1/82, G.E.H., per U.-S.

[Enclosure.]

Memorial of Residents of Rouchell, Scone, &c., to The Secretary for Mines.

We, the undersigned residents of the Rouchell, Scone, &c., beg to express our regret that our application for the opening of the road surveyed through Segenhoe from Scone to the Rouchell has been so unfavourably dealt with.

That the allegations set forth in our first memorial are thoroughly truthful and well grounded, and also to show that the statement to which your reply alludes, viz., that only a very few persons indeed would be benefited by the opening of the road, is, to say the least of it, quite incorrect. We now subscribe our names, respectfully asking that the whole matter may be again inquired into.

And your memorialists will ever pray,—

No. 22.

The Under-Secretary for Mines to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Sydney, 18 January, 1882.

Sec No. 21.

With reference to your letter of the 16th instant, enclosing a petition from certain residents of the Rouchell, Scone, &c., for the opening of a road from the Rouchell Brook to Scone through the Segenhoe Estate, I am directed by the Secretary for Mines to inform you that the matter has been referred to the Surveyor-General for a further report.

I have, &c.,

HARRIE WOOD,  
Under-Secretary.

No. 23.

Minute of the Surveyor-General.

*Road through Segenhoe.*

No new facts are brought forward in these later communications.

The Segenhoe Estate (a large one of over 10,000 acres), now the property of the Honorable James White, has had several roads taken through it. The one now under consideration traverses the estate for 6 miles and severs four fenced paddocks; consequently if the road were to be established in accordance with the practice of the Department heavy cost of fencing would be involved, or the alternative of public gates would have to be forced upon the owner.

The surveyor corroborates the statement of Mr. White that there is another direct road from the Rouchell to Scone through the Segenhoe Estate which is reported to be better and a trifle shorter than the road under discussion, the traffic upon which Mr. White has never interfered with, and it appears that under any circumstances the public would desire to keep this road open.

There are no new grounds to justify a recommendation of a departure from the decision previously arrived at.

A. J. STOPPS,

14 March, 1882.

for Surveyor-General.

Submitted.—H.W., 17/3/82. Inform.—A.R., 17/3/82. The Surveyor-General, B.C., 11/7/82.—G.E.H., p. U.-S.

No. 24.

The Under-Secretary for Mines to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Sydney, 21 March, 1882.

With reference to your letter of the 16th January last, forwarding a petition from certain residents of the Rouchell, Scone, &c., for the opening of a road from the Rouchell Brook to Scone through the Segenhoe Estate, I am directed by the Secretary for Mines to inform you that, as the surveyor reports that there is another direct road from the Rouchell to Scone through the Segenhoe Estate which is better and a trifle shorter than the one petitioned for, which under any circumstances the public would desire to keep open, and as Mr. White has never interfered with the traffic upon it, and in view of the heavy cost of fencing that the opening of the road would involve, the petition cannot be granted.

I have, &amp;c.,

HARRIE WOOD,  
Under-Secretary

## ROADS IN THE COUNTY OF GORDON.

No. 1.

Andrew Ross, Esq., M.D., M.P., to The Commissioner and Engineer for Roads.

Sir,

Molong, 15 April, 1882.

I do myself the honor to submit the enclosed letter from Mr. William Ross, complaining of an attempt being made to alter the road from Burrawong to Dilga by fencing across the same, to the inconvenience of the public.

I have to request that the necessary steps be taken at once to prevent the road being diverted in the way Mr. Ross points out, the same, it seems, being an injustice to the public.

I have to request also that you will take the necessary steps to call for a report on the state of the same road from Burrawong, Myrangle, Dilga, on to Baldarudgery, with the view of claiming Government money for necessary repairs to the same, and the requirement of the necessary culverts or bridges thereon.

Your earliest attention to this matter will oblige.

I have, &amp;c.,

ANDREW ROSS.

Inform that this is more a case for the Surveyor-General than for this Department, that the papers have been sent to him, and that local officer will be instructed to co-operate and to report on the requirement of the necessary culverts or bridges. Then send on to the Under-Secretary, after sending copy to Mr. Scarr.—W.C.B., 17/4/82.

Under-Secretary, for transmission to Survey Department. Under-Secretary, B.C., 18/4/82, Under Secretary for Mines.—B.C., 20/4/82, J.R. The Surveyor-General, B.C., 21/4/82.—G.E.H. p. U.S. Mr. District-Surveyor Fisher is requested to report.—A. J. STOPPS, for Surveyor-General, 28 April, 1882. Referred to Mr. Licensed-Surveyor Busby, for sketch and report.—E. FISHER, D.S., B.C. 10/5/82.

[Enclosure.]

Mr. Wm. Ross to Andrew Ross, Esq., M.D., M.P.

Sir,

Dilga, 12 April, 1882.

I have repeatedly called your attention to the state of the road from Cumnock (late Burrawong Cross Roads) to Baldarudgery, viz., Burrawong and Dilga; and again, on behalf of myself, my neighbours, and the public in general, beg to draw your attention to the gross imposition, mischief, and inconvenience that are being perpetrated on the public in general, but more particularly on those who have to travel the road daily, by one James Keary, an overseer for Mr. Francis Lord, at Burrawong, who is now laying down fencing stuff to fence off the only good and reasonable way—a way or road made and formed by nature—also, the nearest and best, and marked out by the late Road Superintendent Gordon many years ago, whereas the road this overseer Keary presumes to attempt to force on the public to take is not only a roundabout way, but up or down a hill  $\frac{1}{2}$  of a mile in length, and so abrupt (steep) that in no place does it rise or fall less than 1 foot in 3 to 4 feet. A sketch of this part of road I forwarded some time ago. This overseer Keary seems to make or mar roads where he thinks proper, to the benefit of neither his master or any one else. Trusting you will take the necessary steps at once to prevent this gross imposition on the country and general public,—

Yours, &amp;c.,

WM. ROSS.

No. 2.

The Commissioner and Engineer for Roads to Andrew Ross, Esq., M.D., M.P.

Sir,

Department of Public Works, Roads Branch, Sydney, 17 April, 1882.

Referring to the letter from Mr. W. Ross respecting an attempted alteration of the road Burrawong to Dilga, forwarded with yours of the 15th instant, I have the honor to inform you that it is more a case for the Surveyor-General, that the papers have been sent to him, and that the local officer will be instructed to co-operate and report on the requirements and necessary culverts and bridges thereon.

I have, &amp;c.,

W. C. BENNETT,

Commissioner and Engineer for Roads.

No. 3.

Mr. Acting-Surveyor Busby to The Surveyor-General.

Sir,

Molong, 14 June, 1882.

In accordance with instructions issued to Mr. District-Surveyor Fisher, 28th April, 1882, and transferred to me 10th May, 1882, I have the honor to report that I visited the locality in question on the 5th June, and ascertained as follows:—

1. That the obstruction complained of is caused by the owner of portion No. 115 erecting a fence along the road reserved at time of measurement.

2. The track required by Mr. Ross (shown in blue on accompanying tracing) starts at about one chain west from the junction of the reserved road and the north-west corner of portion No. 58, and runs thence in a westerly direction for about 49 chains to another point on the reserved road, about 8 chains from the Burrawong Creek.

3. The nature of the country through which this track passes is unsuited for heavy wheel traffic, part of it being of a very boggy character. It also crosses a small gully at point A on accompanying tracing, the bank on one side of which is too steep for loaded vehicles to travel.

4. The evidence as to the length of time during which the track required by Mr. Ross has been in use is very conflicting. Most of the inhabitants of the locality aver that it has been formed during the last two years, while Mr. Ross declares that he has used it for five and twenty years; but from the appearance of the track itself, I do not think that it has been under wheel traffic for more than the former length of time.

5. Although the road in question is the main road from Cumnock to Parkes, it is scarcely ever used now for any through traffic, so that the number of persons who use this road is not more than from ten to fifteen a week.

6.

See No. 1.

See No. 1.

Tracing.

6. I have carefully examined the surrounding country, but owing to its hilly nature could not find any alternative road.

7. The difference between the lengths of the track (shown by blue lines on accompanying tracing) and the reserved road (shown by brown tint) is about nine chains; but taking into account the fact that the latter offers an easier gradient, and to all appearance has been for a number of years the track in use, I have the honor to recommend that the road, as reserved through portion No. 115 at time of measurement, be retained in preference to the track required by Mr. Ross.

I have, &c.,  
W. F. BUSBY,  
Acting Surveyor.

Submitted that under this report the reserved road should not be superseded.—H. A. CROUCH,  
A.D.S. 19th June, 1882.

No. 4.

Andrew Ross, Esq., M.D., M.P., to The Secretary for Mines.

Sir,

Molong, 4 July, 1882.

Some time ago I submitted to you a letter from my brother, complaining of an obstruction or attempted diversion of the Dilga and Baldarudgery Road, in the vicinity of Burrawong Station.

The matter is a most important one, and I have to request that you will inform me if any steps, and what, have been taken in the matter? If the road is to be allowed to be diverted, to the serious inconvenience of the public, it is more than likely that it will lead to perhaps something serious; and therefore I specially warn you to take immediate action in the matter, so that "right and justice" may be done to the public. The road in dispute is one that has been in public use for years, and that some person may be sent up from Sydney to report on it at once.

\* \* \* \* \*

I have, &c.,  
A. ROSS.

The Surveyor-General, B.C., 6/7/82.—G.E.H., p. U.S.

No. 5.

The Under-Secretary for Mines to Andrew Ross, Esq., M.D., M.P.

Sir,

Department of Mines, Sydney, 6 July, 1882.

I have the honor to acknowledge the receipt of your letter of the 4th instant, respecting an obstruction of the Dilga and Waldarudgery Road, in the vicinity of Burrawong Station, and asking for a copy of the surveyor's report of the Sandy Creek Road between Molong and Cudal, and to inform you that the matters shall receive immediate attention.

See No. 4.

No connection with this case.

I have, &c.,  
G. E. HERRING,  
(For the Under-Secretary).

No. 6.

Andrew Ross, Esq., M.D., M.P., to The Secretary for Mines.

Sir,

Molong, 17 July, 1882.

I do myself the honor to submit for your immediate consideration the enclosed letter of complaint addressed to me from my brother. The contents of the letter speaks for itself, and I trust you will see the necessity of at once taking action in the matter, so that the wrong-doing, obstructions, and grievances complained of may be put a stop to.

\* \* \* \* \*

I am only waiting till Parliament meets, and I'll warrant I will know more about these all-important public matters.

It is evidently quite useless of me writing to you I can see, neither will I submit to be treated with worse than a stolid indifference to the wrong and injury inflicted on my constituents.

I have, &c.,  
A. ROSS, M.D.

N.B.—These complaints of my brother's I have in former communications brought under your notice.—A.R.

Will the Surveyor-General please say how this matter stands.—B.C., 18/7/82.—G.E.H., p. U.S. The track which Mr. Ross desires to use (coloured blue on tracing) is a departure from the road reserved at time of measurement of the land; the reserved road (coloured brown) offers superior physical advantages, as well as having been the road previously in use for a number of years. It is therefore recommended that it be not superseded by the track which Mr. Ross desires to have opened. Tracing herewith, which may probably be sent to applicant.—A. J. STORPS (for Surveyor-General), 25 July, 1882. Submitted.—H.W., 4/8/82. Approved.—A.R., 9/8/82.

See No. 3.

[Enclosure.]

Mr. Wm. Ross to Andrew Ross, Esq., M.D., M.P.

Dear Doctor,

Dilga, Molong, 15 July, 1882.

In going my rounds to-day in some of my paddocks in company with Messrs. M'Cullum's overseer, I find the Burrawong folks have not only fenced up our road in four places, but have fallen and drawn large trees in a number of places across the road from my fence to near Cumnoek.

Please take the necessary steps to acquaint the Minister for Mines of this inposition and diabolical injustice to the public to prevent egress or ingress to or from their stations or farms without going miles out of their way to do so, and a much worse road. Such work as this has been going on for some years back. The said Minister to take the necessary steps to cause these obstructions to the highway road to be forthwith removed; and if not done within ten days from this date I will not be responsible for the consequences that may happen if I am again compelled to cut my way through these obstructions, if a man but touches me to prevent me doing so, as was done two weeks ago.

Yours, &c.,  
WM. ROSS.

No. 7.

## No. 7.

Andrew Ross, Esq., M.D., M.P., to The Secretary for Mines.

Sir,

Molong, 21 August, 1882.

Having known the road complained of for upwards of twenty years, I can honestly recommend the just and honest prayer of the petitioners, and which is numerously as well as influentially signed, even by Wright, Heaton, & Co., one of the largest carriers in New South Wales.

I sincerely hope that the necessary steps will be taken to have the said road granted and proclaimed at once for the convenience of the public, and one that is imperatively demanded as public right.

I have, &amp;c.,

ANDREW ROSS, M.D.

[Enclosures.]

Mr. Wm. Ross to Andrew Ross, Esq., M.D., M.P.

Dear Doctor,

Dilga, 16 August, 1882.

In forwarding the enclosed petition for presentation by you to Parliament, I have taken precautions to have no names entered on petition but those that really require a good and proper road to and from market, &c. I could get hundreds of good and true signatures to this petition, but I have confined the signatures to those in the immediate neighbourhood, who in all business matters daily use the road petitioned for. A sketch of the various roads I attach to said petition, and hope that you will see early justice done to the petition for the public benefit. I will endeavour to see you before the House of Parliament meets.

Yours, &amp;c.,

WM. ROSS.

PETITION of residents of Cumnock, Burrawong, Myrangle, Dilga, Rocky Ponds, Baldarudgerie and surrounding district, to the Secretary for Mines.

The Petition of the undersigned residents of Cumnock, Burrawong, Myrangle, Dilga, Rocky Ponds, Baldarudgerie and surrounding district,—

Humbly sheweth :—

1. That your Petitioners desire to draw your special attention to an attempt that is now being made to close a public road in the vicinity of Burrawong Station, the said road having been in use by the public for a long period of years, and to tender this our protest against the closing or diversion of the said road.

2. We insist that the said road which passes up the hollow or gradual rise of the hill be retained as the one most suitable to meet the requirements of the travelling public and residents in the locality.

3. The road is in fair condition, being an easy and gradual rise from the Burrawong Creek until it reaches the top of the hill, whereas the lessee of the run has lately had the said road fenced across, to the great injury and annoyance of the public, in consequence of which the travelling public are now compelled to travel the hill in front of Burrawong House, which is so steep and perpendicular that it is almost impossible for teamsters to get up and down in safety with anything like a load.

4. We have further to request that an unprejudiced person be at once despatched from Sydney to report on the matter, and to define a road from Cumnock to Baldarudgerie or Rocky Ponds, viz., via Myrangle and Dilga, &c., in order that right and justice may be done to the settlers in the neighbourhood and the travelling public.

Sketch of roads attached.

5. The road in question is the main road to Myrangle, Dilga, Rocky Ponds, and Baldarudgerie to meet the Parkes and Wellington Road at or near Baldarudgerie, and to divert in the manner in various places now proposed will be the means of inflicting a serious wrong and cruel hardship upon the settlers in these localities, by interfering with them in getting their produce to market.

And your Petitioners, as in duty bound, will ever pray.

WM. ROSS, J.P.

WRIGHT, HEATON, &amp; CO.

PARMEWAN, WRIGHT, &amp; CO.

and 57 others.

## No. 8.

Mr. Wm. Ross to The Surveyor-General.

Sir,

Dilga, Molong, 31 August, 1882.

As wool season is approaching, when more traffic and heavy loads of wool will have to be forwarded on to market (Sydney), necessitating better and nearer roads than we are allowed at present to travel, as stated to you in my letter of last month (July), and in which I asked you to pay us your long promised visit, so that you may see into such matters for yourself, and at once set this roads grievance at rest.

With such fine weather as we are now having I am sure your visit would confer a great and lasting public benefit as well as a benefit to your own health.

I am, &amp;c.,

WM. ROSS.

Dr. Ross, M.P. waited on the Surveyor-General in connection with the road in question, and was informed by him personally that he could not recommend any deviation from the road as reserved in portion No. 115 (Francis Lord's), at the time of measurement of the land.—A. J. STORRS (for Surveyor-General). 13 September, 1882.

## No. 9.

The Under-Secretary for Mines to Andrew Ross, Esq., M.D., M.P.

Sir,

Department of Mines, Sydney, 14 September, 1882.

With reference to your letter, enclosing a communication from Mr. William Ross, of Dilga, complaining of obstructions on a road through portion No. 115, parish of Burrawong, I am directed by the Secretary for Mines to inform you that the track Mr. W. Ross desires to use (coloured blue on the accompanying tracing) is a departure from the road reserved at time of measurement of the land. The reserved road (coloured brown) offers superior physical advantages, as well as having been the road previously in use for a number of years; therefore the reserved road cannot be superseded by the track Mr. Ross desires.

I have, &amp;c.,

HARRIE WOOD,

Under-Secretary.

## NEW SOUTH WALES.

**LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.**  
(LAND RESUMED FOR ROADS AND BRIDGES AT CONCORD.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

**NOTIFICATION OF RESUMPTION OF LAND UNDER**  
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
to wit. } SIR AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called Lord  
AUGUSTUS LOFTUS), Knight Grand Cross  
of the Most Honorable Order of the  
Bath, a Member of Her Majesty's Most  
Honorable Privy Council, Governor and  
Commander-in-Chief of the Colony of  
New South Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the approaches to the Iron Cove and Parramatta River Bridges, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Appropriation Act of 1882," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act" do, by this notification published in the Gazette and in a newspaper, that is to say, the *Sydney Morning Herald*, circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the approaches to the Iron Cove and Parramatta River Bridges, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose

of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a Trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say,—

All that piece or parcel of land situate, lying, and being in the parish of Concord, county of Cumberland and Colony of New South Wales, being a portion of the Drummoyne Estate, a subdivision of the Five Dock Farm, originally granted to J. Harris, and containing by admeasurement, as described below, 1 rood and 8 perches: Commencing at the present intersection of Lyons' Road with the road in approach to the Parramatta River Bridge; and bounded on the south-east by Lyons' Road bearing north-easterly 1 chain; thence on the north-east by a line bearing north-westerly 6 chains to the road in approach to the Parramatta River Bridge; and on the north-west by that road bearing south-easterly 6 chains 10 links, to the point of commencement,—being the property of William J. Hobbs.

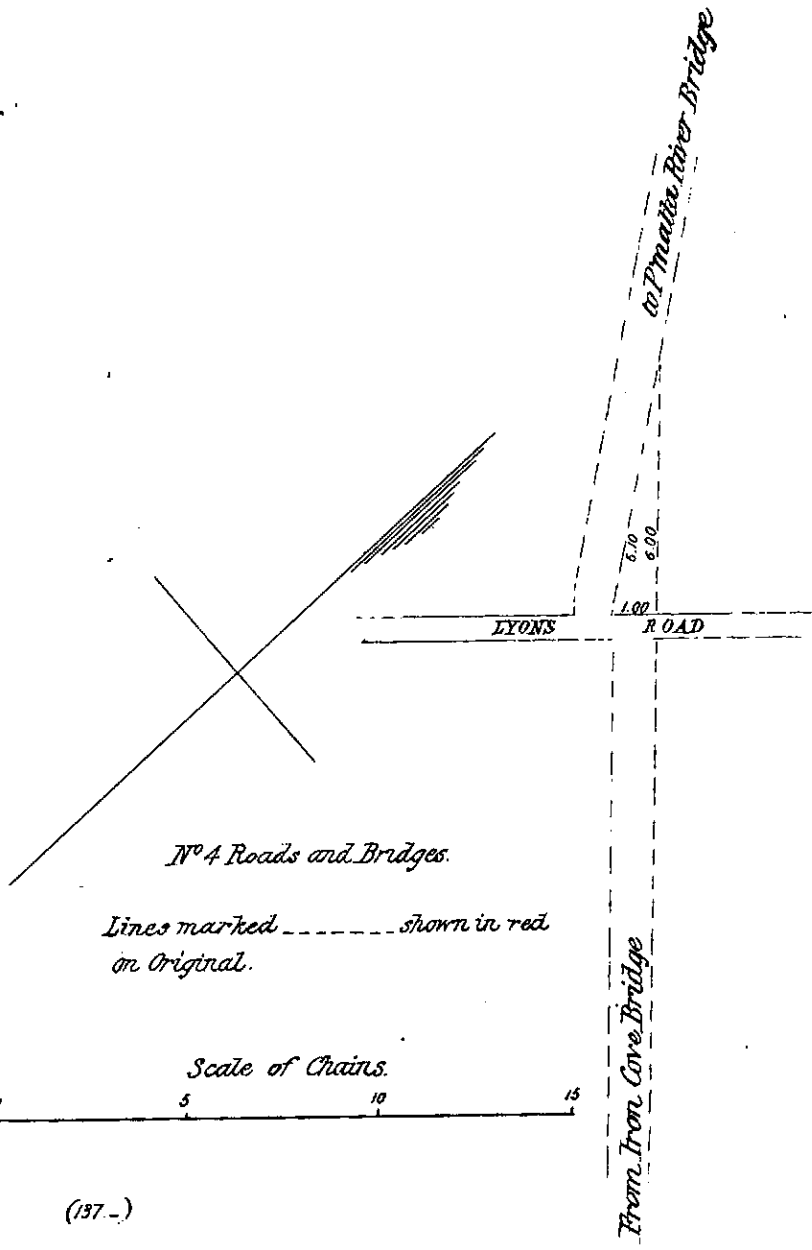

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this second day of May, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
JOHN LACKEY.

GOD SAVE THE QUEEN!

[Plan.]

*N<sup>o</sup> 4 Roads and Bridges.*

## NEW SOUTH WALES.

## STOCK AND BRANDS BRANCH.

(ANNUAL REPORT FOR THE YEAR 1881.)

Printed in accordance with Resolutions of both Houses of Parliament.

The Under Secretary for Mines to The Hon. the Secretary for Mines.

Sir, Department of Mines, Sydney, 12 August, 1882.  
I have the honor to submit herewith the Report of the Chief Inspector of Stock for the year 1881.

The amount of work performed by the Chief Inspector of Stock and the other officers in the Branch during the year appears to be satisfactory.

Although the estimated number of horses in 1881 shows a decrease as compared with 1880, it exceeds that of any previous year.

The number of cattle according to the estimate for 1881 shows a considerable decrease as compared with previous years. The Chief Inspector points out that these estimates are based upon information furnished by the inspectors, and consequently are less reliable than they would be if based upon returns furnished by stock-owners. It may be that such returns cannot be obtained unless the owners be compelled by law to furnish them, but until legislation can be had it might be desirable to appeal to the owners to supply the information, on the understanding that it will not be published in detail.

Notwithstanding the losses from drought, the number of sheep in 1881 exceeds that of any previous year. The attempt of the Chief Inspector to classify the sheep of the colony if successful will furnish most valuable information, and it is to be hoped the owners will see the advantage of supplying the several inspectors with full and accurate details. The wool clip for 1881 exceeds that of 1880 by 11,480,791 lbs.

Table showing the quantities of New South Wales wool shipped from the undermentioned ports in 1880 and 1881 respectively:—

	Sydney.	Melbourne.	Adelaide.	Brisbane.	Total.
1880.....	82,000,934 lbs.	59,907,690 lbs.	9,963,085 lbs.	446,232 lbs.	= 152,317,941 lbs.
1881.....	98,279,239 lbs.	52,415,594 lbs.	9,827,023 lbs.	3,275,976 lbs.	= 163,798,732 lbs.

As compared with 1880 the quantity of New South Wales wool shipped in 1881 from Sydney shows an increase of 16,278,305 lbs., and from Brisbane an increase of 2,829,744 lbs., while the quantity shipped from Melbourne in 1881 as compared with 1880 shows a decrease of 7,492,096 lbs., and from Adelaide the decrease is 135,162 lbs.

The comparison indicates that while the extension of our railways south and west has largely reduced the quantity of our wool sent to Melbourne, and in a slight degree the quantity sent to Adelaide, the extension of our Northern Railway has not yet had the effect of securing for Sydney the clip from the northern districts.

The inspectors appear to experience great difficulty in protecting the grass on reserves and driftways for the use of travelling stock, and in view of the large sums being expended in construction of tanks and wells to supply such stock with water, and the importance of affording the utmost facilities for the bringing of fat stock to market in good condition, it is worthy of consideration whether it would not be desirable that the boundaries of such reserves and driftways should be marked at once, so that the inspectors might more easily procure convictions of trespassers.

The number of tanks and wells handed over to the Department is 37; of these 21 have been let, 7 have been advertised for lease, 2 have been handed over temporarily to the inhabitants of Cobar, 2 have been abandoned, and 5 are completely out of repair.

According to the Inspector of Tanks the rent from those let equal 3 per cent. upon the cost of construction.

In some cases the leases of these works have been renewed at a slightly increased rent, and there appear to be reasons for believing that when the line of tanks and wells on some of the principal routes shall have been completed, so that water will be obtainable in all seasons at moderate distances apart, not only will the stock traffic be improved but the revenue from these works will be considerably increased.

When

When in addition to the works already constructed those now in hand and proposed have been completed and filled, there will be in the aggregate 1,418 miles on the following lines of road supplied with water, namely :—

Deniliquin to Hay.	} Well watered.
Hay to Wilcannia.	
Wilcannia to Hungerford.	
Bourke to Eringonia.	
Eringonia to Culgoa.	
Walgett to Narran.	
Narrabri to Moree.	} Fairly watered.
Balranald to Ivanhoe.	
Warramurtie to Lake Cobham.	
Bourke to Wanaring.	
Louth to Wanaring.	
Walgett to Baradine.	
Nyngan to Cobar.	
Cobar to Louth.	
Hillston to Carrathool.	
Cobar to Condobolin.	
Wilcannia to Mount Browne.	} Poorly watered.
Cobar to Hillston.	

The suggestions of the Chief Inspector of Stock in regard to the reservation of the natural sources of water supply appear to be worthy of serious consideration.

Although efforts have been made to bring the Pastures and Stock Protection Act and the amending Act into operation throughout the colony, the work of extermination has, owing partly to defects in the law and partly to laxity in enforcing its provisions, been far from successful. It appears to be quite clear that unless the most effective methods of destruction of vermin be carried out persistently and simultaneously throughout all the infested districts, the money expended upon this service will produce little or no benefit to the stock-owners, and the expenditure will probably be continuous, because instead of exterminating the noxious animals they will simply be kept down.

I have, &c.,  
HARRIE WOOD,  
Under Secretary for Mines.

## REPORT from the Chief Inspector of Stock for the Year ending 31st December, 1881.

The Chief Inspector of Stock to The Under Secretary for Mines.

Sir, Stock Branch, Department of Mines, Sydney, 1st April, 1882.

I have the honor to submit my report for the year ending 31st December last, and I must again state that the information which it gives, with the exception of the number of sheep, is almost wholly based upon estimates and opinions furnished by the Stock Inspectors throughout the Colony; and not (as it should be) on returns made by the stockowners themselves; and I regret to say that the information is not altogether reliable.

I trust the time is not far distant when owners will be required by law to furnish the necessary information.

### I.—THE INSPECTORS OF STOCK AND THEIR WORK.

#### 1. *The Inspectors.*

There are now thirty-eight Inspectors having charge of fifty sheep districts.

#### 2. *The Inspections during the Year.*

The total number of inspections made by thirty-seven Inspectors for the past year has been as follows :—

Of Stock	...	...	...	...	...	...	14,211
Of Reserves	...	...	...	...	...	...	1,798
Of Pounds	...	...	...	...	...	...	385
Under Pastures Act	...	...	...	...	...	...	958
Total	...	...	...	...	...	...	17,352

This would give an average of 469 inspections for each Inspector, which is a large increase over the number returned for the previous year.

#### 3. *The Horses, Cattle, and Sheep inspected.*

*Horses.*—The number of horses inspected during the year was 39,553 by thirty-three Inspectors, and in the remaining districts no inspections of horses were made.

*Cattle.*—The number of cattle inspected during the year was 613,864.

*Sheep.*—The number of sheep inspected during the year was 14,392,415. This is a very large increase on last year's inspections, and is exclusive of two districts from which no returns were received.

#### 4. *Distance travelled by Inspectors during the Year on duty.*

The total number of miles travelled by thirty-seven Inspectors was 125,148, being an average of 3,382 each per annum—a marked increase on the previous year.

5. *Prosecutions and Convictions.*

The prosecutions instituted during the past year were as follows:—

Under Sheep Act	...	...	...	...	...	140
„ Lands Act (trespasses on reserves)	...	...	...	...	...	69
„ Brands Act	...	...	...	...	...	5
„ Pastures Act	...	...	...	...	...	33
Total	...	...	...	...	...	247

The number of convictions were:—

Under Sheep Act	...	...	...	...	...	126
„ Lands Act	...	...	...	...	...	61
„ Brands Act	...	...	...	...	...	4
„ Pastures Act	...	...	...	...	...	17
Total	...	...	...	...	...	208

## II.—HORSES.

1. *The Number.*

By returns the number of horses in the Colony during the twenty-one years previous to and including 1881 was as follows:—

Year.	No.	Year.	No.
1861	251,497	1872	304,100
1862	233,220	1873	328,408
1863	273,389	1874	334,462
1864	262,554	1875	357,696
1865	284,567	1876	366,703
1866	282,587	1877	328,150
1867	278,437	1878	336,468
1868	280,201	1879	360,038
1869	280,818	1880	395,984
1870	280,304	1881 (estimated)...	364,306
1871	337,597		

2. *The different Breeds.*

*Draught.*—The number returned under this head is 12,378 thoroughbred, and 72,328 ordinary; total, 84,706.

*Light Harness.*—The number returned as thoroughbred is 9,915; and ordinary, 97,685; total, 107,600.

*Saddle.*—The number of thoroughbreds is given as 15,848; and ordinary, 156,152; total, 172,000.

3. *Horses introduced.*

*From other Districts.*—The number of stud horses introduced is 92; and stud mares, 130; ordinary, 1,440 mares, and 2,426 horses.

*From other Colonies.*—The number introduced by sea was 16 stud mares and 5 stud horses. The number introduced overland was 26 stud horses, and 24 ordinary mares, and 30 ordinary horses.

*From England and other Countries.*—The number of stud mares introduced under this head was 29, and 10 stud horses; total, 39.

4. *Horses fit for Sale.*

The number returned, as being fit for market during the present year, is 12,377 draught; 16,413 light harness; and 20,373 saddle.

Of this number it is estimated that 9,137 are really first-class animals, and specially suited for the Indian and China markets.

During the past year, from nine districts, 2,616 horses were exported to India, China, and elsewhere. Of this number 1,061 were shipped from Sydney direct, and 1,555 were sent through Melbourne.

5. *How Horses are kept.*

The number kept in paddocks is given as 259,506; running at large, 86,214; and kept both ways, 18,586.

6. *Increase and Decrease.*

In twenty-one districts the horses are increasing in number, but to no great extent. The reasons given is an increased demand, better prices, and large orders for Indian and Queensland markets.

In ten districts the number is decreasing, and the reasons given are drought, not payable; very little demand, and that the railways and tramways are taking the place of coaching and bus horses. In six districts the horses are returned as stationary, and from four there are no returns.

7. *Improvement.*

In thirty-five districts horses are said to be improving slightly. The principal reasons given for improvement are the introduction of better blood, the culling out of weedy mares and greater attention to the rules of breeding. In the remaining districts breeding of horses is so far as regards improvement, reported as stationary. The principal improvement has taken place in draught stock, and it is likely to continue, as good draught horses are now, and are likely to continue to be, in good demand, both in this Colony and Queensland.

A steady improvement is also taking place in our light harness horses, and several excellent sires of this breed have been introduced from England and America.

8. *Disease.*

In thirty-one districts the horses are reported to be entirely free from any disease. In seven districts there were a few cases of strangles, which were successfully treated by blistering, fomentation, and poulticing. In one district Cumberland Disease is reported to the extent of 1 per cent. Bleeding was tried as a remedy, but without success.

9. *Losses.*

The losses from drought, old age, hard winter, wire in chaff, and other accidents as reported, amount only to 2,060.

10. *Wild Horses.*

The number of wild horses in the Colony is estimated at 23,392, which shows a decrease on the previous year of 4,608.

11. *Other Information.*

In most of the districts it is suggested that a tax should be put on entires to improve the breed and keep down useless weeds.

## III.—CATTLE.

1. *Number.*

The returns of cattle in the Colony, during the twenty-one years ending 31st December, 1881, stands as follows:—

Year.	No.	Year.	No.
1861 ... ..	2,271,923	1872 ... ..	2,287,660
1862 ... ..	2,620,383	1873 ... ..	2,794,327
1863 ... ..	2,032,522	1874 ... ..	2,856,699
1864 ... ..	1,924,119	1875 ... ..	3,134,086
1865 ... ..	1,961,905	1876 ... ..	3,131,013
1866 ... ..	1,771,809	1877 ... ..	2,746,385
1867 ... ..	1,728,427	1878 ... ..	2,771,583
1868 ... ..	1,761,411	1879 ... ..	2,914,210
1869 ... ..	1,795,904	1880 ... ..	2,580,040
1870 ... ..	2,195,096	1881 (estimated)	2,182,226
1871 ... ..	2,014,888		

This shows a decrease during the year of 397,184.

2. *Different Breeds.*

*Shorthorns.*—The number of pure-bred and stud Shorthorns is estimated at 41,755, and ordinary, 1,004,008; total, 1,045,763.

*Herefords.*—Pure and stud, 22,229; ordinary, 177,968; total, 200,197.

*Devon.*—Pure and stud, 6,457; ordinary, 17,118; total, 23,575.

*Black Polled.*—Pure and stud, 22; ordinary, 80; total, 102.

*Ayrshire.*—Pure and stud, 163; ordinary, 415; total, 578.

*Crosses.*—Well-bred, 820; ordinary, 911,191; total, 912,011. The crosses are estimated as follows:—Shorthorn and Hereford, 430,921; Shorthorn and Devon, 71,262; Hereford and Devon, 39,848; Shorthorn and Black Polled, 120; the balance, 369,860, being unrecognizable.

3. *Stock introduced.*

*From other Districts.*—Stud bulls, 131; stud cows, 140; total, 271. Ordinary bulls, 2,821; ordinary cows, 2,389; total, 5,210. Store cattle, 32,000.

*From other Colonies by sea.*—Stud bulls, 10; stud cows, 20; total, 30. Overland: Stud bulls, 235; stud cows, 9; total, 244. Ordinary bulls, 187; ordinary cows, 215; total, 402.

*From England and other Countries.*—Stud bulls, 5; stud cows, 10; total, 15.

4. *Increase and decrease.*

In six districts the cattle are said to be increasing slightly; in one district 10 per cent., and one district, 25 per cent. In one district they are said to be stationary, and in the other thirty districts they are decreasing as follows:—In seven districts, slightly; three districts, 5 per cent.; one district, 10 per cent.; one district, 15 per cent.; one district, 20 per cent.; one district, 30 per cent.; one district, 33 per cent.; one district, 50 per cent.; seven districts, very much; six districts, considerable, and in one district to a great extent.

The principal cause assigned for the large and somewhat general decrease is that owners are clearing off cattle and putting sheep on their runs, as they pay better than cattle. The decrease is also attributable to the drought and severe winter which carried off large numbers in several districts.

5. *The "Cast" of Fat and Store Cattle.*

The estimated "cast" of fat cattle to be sent to market during the coming year is 188,865, and of store and breeding cattle, 212,960. From fifteen districts the fat cattle are principally sent to Melbourne and other Victorian markets; from three districts they are principally sent to Adelaide, and the remaining districts supply the markets in Sydney, Maitland, Mudgee, and Orange. The principal demand for store cattle comes from Victoria, and for breeding stock from Queensland, and the far north, where new country is being taken up.

6. *How kept.*

The number of cattle kept wholly in paddocks is returned as 1,428,115; on open runs, 625,992, and the balance 128,119 are depastured both ways.

7. *Improvement and Deterioration.*

In twenty-seven districts the cattle are said to be improving, in eight districts they are stationary, and in the remaining four districts they are deteriorating. The principal reasons given for the improvement are the moderate prices of good bulls, and greater attention paid by owners. The reasons given for the deterioration are carelessness of breeders, and contemplated change from cattle to sheep.

8. *Their Diseases and Ailments.*

## Pleuro-Pneumonia.

In eighteen districts on 109 runs the cattle were effected with pleuro during the past year. In seventeen out of the eighteen districts and on 102 runs out of the 109 the outbreak was only very slight; on the other seven runs it was reported as severe. In the remaining twenty-one districts the cattle are

are reported as being entirely free from pleuro. In four out of the eighteen affected districts it is reported that the cattle became infected by diseased travelling stock. In five districts they have never been free from the disease. In one district the severe winter is given as the cause, and in the other eight districts it is not known how they became infected. In thirteen out of the eighteen affected districts and on sixty-two stations inoculation was practised, and in every case *where it was properly performed* the most favourable results followed. In one district not affected inoculation was also practised as a preventive on all store cattle introduced with best results. The number of owners in favour of inoculation is given as 4,557; against it, 1,242; undecided, 1,471; and for the balance 826 their opinions are not known.

The number of owners in favour of compulsory inoculation in the case of infected herds is given as 3,831; against it, 1,831; undecided, 1,232; and the balance 1,202 are not known.

#### 9. Losses from Disease.

The number of cattle reported to have died from Cumberland disease is 452; from blackleg, 100; from tuberculosis, 50; from swellings in jaw or throat, 2,658; from ophthalmia, 4,273; and from cancer, 12; total, 7,545. From poverty and starvation 38,000 cattle are reported to have died, and 200 from casualties proceeding from poverty; the total losses for the year from the various causes being 45,745.

#### IV.—SHEEP.

##### 1. The Number.

The number of sheep in the Colony during the twenty-one years ending 31st December, 1881, stand as follows:—

Year.	No.	Year.	No.
1861	6,119,169	1872	17,873,696
1862	6,550,896	1873	18,990,595
1863	7,169,126	1874	22,797,416
1864	9,082,463	1875	25,353,924
1865	9,650,106	1876	25,269,755
1866	11,644,593	1877	21,521,662
1867	15,066,377	1878	25,479,484
1868	16,000,090	1879	30,062,910
1869	16,848,217	1880	35,398,121
1870	16,218,825	1881	36,591,946
1871	16,766,012		

#### Return of Sheep to Petty Sessions.

THE number of Sheep in the Colony at 1st January, 1882, as returned to the several Clerks of Petty Sessions for 1881, and the Increase or Decrease for the Year is as follows:—

District.	No. of Sheep, 1st January, 1881.	No. of Sheep, 1st January, 1882.	Increase, 1st January, 1882.	Decrease, 1st January, 1882.	District.	No. of Sheep, 1st January, 1881.	No. of Sheep, 1st January, 1882.	Increase, 1st January, 1882.	Decrease, 1st January, 1882.
Albury	178,801	261,650	82,849		Coonabarabran	313,843	426,865	113,022

## Increase and Decrease.

This shows a net increase for the year of 1,193,825. From the reports received of the lambing it was anticipated that the increase would have been much greater, but the heavy losses from the drought between the time when the Inspectors obtained their information with respect to the lambing, and that at which attested returns were sent in by owners, caused a very large reduction on the anticipated increase.

## Sheep in lots under 500.

The number of sheep registered under section 42 of the amended Sheep Act as belonging to owner of less than 500 was 569,320.

## 2. The Different Breeds.

## (i) Merino.

## Superfine Combing.

An attempt is here made to classify the different descriptions of sheep throughout the Colony, with perhaps, but doubtful success. But the advantages that would accrue to owners and others if correct information were obtained of the nature here aimed at are so great as to justify the attempt; and if persevered in it is believed that owners will see the benefits that would arise from the information and assist the Inspectors in compiling it.

### 3. Sheep Introduced.

From other Districts.—Stud, 30,013; ordinary, 931,127; total, 961,140.

From other Colonies, by sea.—Stud, 503.

Do. do. overland.—Stud, 11,735; ordinary, 156,520; total, 168,758.

From England and other countries.—Stud 20.

### 4. Long-woolled Sheep.

Amongst the long-woolled sheep the Lincoln is said in a large majority of the districts to give the best returns in wool and in weight of mutton, the cross-bred sheep being second.

### 5. The "Cast" of Fat and Store Sheep.

The annual "cast" of fat sheep for the ensuing season is estimated at 3,022,255; and store sheep, 4,317,659.

### 6. How Sheep are kept.

Paddocked	...	...	...	31,878,088
Shepherded	...	...	...	3,696,205
Both ways	...	...	...	1,017,653
Total	...	...	...	36,591,946

### 7. Condition of the flocks.

In thirty districts the sheep are said to be improving, the principal reasons given being improvement of runs, smaller paddocks, lighter stocking, the constant introduction of best stud rams, and more careful classing and culling.

In three districts they are said to be stationary, and in five districts they are deteriorating slightly the reasons being carelessness in breeding, overstocking, country unsuitable, bad season, and not sufficient care in classing and culling.

#### 8. The Lambing.

The general average for shepherded sheep is returned by Inspectors at  $48\frac{1}{2}$  per cent., and of paddocked sheep,  $62\frac{1}{4}$  per cent.; although this is far below the percentage of past years it is believed to be too high.

The various reasons given for the poor lambing are severe winter, scarcity of grass and water, late spring, weather cold and wet in the upland districts at lambing time, and in some districts severe frosts.

The paddocked sheep again show a better percentage than those shepherded by 14 per cent.

#### 9. The Clip.

*Lambs.*—The number of lambs shorn in the grease was 3,129,995; number washed, 155,939; total lambs shorn, 3,285,934.

*Sheep.*—The number of sheep shorn in the grease was 29,485,675; hot water and spout, 398,800; creek washed, 2,415,714; and scoured, 739,592.

The average weights of the clip are estimated as follows:—

	<i>Lambs.</i>		<i>Sheep.</i>	
	lbs. oza.		lbs. oza.	
In the grease ... ..	2	1	5	0
Washed ... ..	1	$8\frac{1}{4}$	...	...
Hot water and spout... ..	...	...	2	$12\frac{1}{2}$
Creek washed... ..	...	...	2	$12\frac{1}{2}$
Scoured ... ..	...	...	2	$8\frac{1}{2}$

The average clip all round is lower than the previous year. This has arisen through the unfavourable season experienced in the New England, Macquarie, Bogan, and Lachlan Districts.

#### Condition of Clip.

The condition of the clip is generally sound and free from burrs, grass seeds, and dust, but light in yoke.

#### The amount of the Clip.

The total amount of the clip in the Colony for the year 1881, according to the number of sheep, would be 29,485,675 sheep shorn in the grease, average clip 5 lbs. per sheep = 147,428,375 lbs.; 398,000 sheep, hot water and spout, average clip, 2 lbs.  $12\frac{1}{2}$  ozs. per sheep = 1,102,932 lbs.; 2,415,714 sheep, creek washed, average clip, 2 lbs.  $12\frac{1}{2}$  ozs. per sheep = 6,718,704 lbs.; 739,592 sheep, scoured, average clip, 2 lbs.  $8\frac{1}{2}$  ozs. per sheep = 1,858,225 lbs.; lambs, 3,129,995; lambs shorn in grease, average clip per lamb, 2 lbs. 1 oz. = 6,455,614 lbs.; 155,939 lambs, washed, average clip per lamb, 1 lb.  $8\frac{1}{4}$  ozs. = 234,882 lbs.; total clip, 163,798,732 lbs.

#### Exportation of Clip.

The clip grown in the Colony of New South Wales is exported to England, America, France, and Canada through the principal ports of three adjoining Colonies in addition to our own port of Sydney, and is very often mistaken as the produce of the other Colonies.

The following is an estimate of the clip shipped at Sydney, and also that sent across the borders and shipped by the other Colonies at Melbourne, Adelaide, and Brisbane:—

Port of Shipment.	Greasy.	Washed.	Total.
	lbs.	lbs.	lbs.
Sydney .....	92,330,393	5,948,846	98,279,239
Melbourne .....	49,242,876	3,172,718	52,415,594
Adelaide .....	9,233,039	594,884	9,827,923
Brisbane .....	3,077,681	198,295	3,275,976
	153,883,989	9,914,743	163,798,732

#### Classing the Clip.

In twenty districts the clip is reported as well classed, and in the other twenty districts it is not considered so, the reasons being owners do not think it pays, number of sheep too small to justify expense, and difficulty of obtaining competent woolsorters.

#### Improvements in Shearing—General Management of Shearing.

In nine districts great improvements are reported in the mode of washing and shearing the sheep; in eleven districts improvements have been made in the form and arrangement of the shearing-sheds; in seventeen in the yards and the mode of yarding the sheep, and generally in carrying out the shearing operations.

#### Wool-presses.

A great number of different kinds of presses are used, those most in favour being Wilding's, Williams', and Robinson's; but there is still room for improvement in the mode of pressing, especially among the smaller owners.

#### Woolpacks.

The woolpacks used are mostly Calcutta and Dundee, of various sizes, from 4 ft. 6 in. x 2 ft. 3 in. to 5 ft. x 3 ft., and the weight from 10 to 12 lbs.

On twenty-one stations the wool is dumped before leaving.

#### Ear-marking.

In thirty-two districts the owners approve of the system of ear-marking sheep; in three, the number of sheep being small, the ear-marks are not used; and in four districts the owners are stated not to be in favour of the system.

#### Tattoo-marking.

## Tattoo-marking.

This mark is being used by a good many owners on their stud sheep, and by some in their general flocks as preventive to sheep-stealing, and where it has been tried it has proved a complete success; and no doubt when better understood it will be more frequently used in that way.

10. *Diseases in Sheep.*

Not a single case of scab or catarrh has been reported during the past season, and outbreaks of Cumberland disease have also been comparatively rare and slight.

## Foot-rot.

In thirteen districts the sheep have been slightly affected with foot-rot during the year, the reasons given being neglect, depasturing on unsound runs, and marshy ground.

The remedies principally used were paring hoof, arsenic bath, and bluestone, the results being very satisfactory.

In twenty-seven districts foot-rot is considered infectious or contagious; in ten districts it is not considered so; and the remaining three districts offer no opinion.

## Fluke.

In fifteen districts the sheep were effected with fluke—thirteen slightly, and the other two to a considerable extent. The reasons were want of change and of salt, unsound sheep kept for breeding, swampy land, and poor sour country. The remedies used were sulphate of iron, salt, tar, and turpentine, and the results were very satisfactory.

In fourteen districts fluke is considered infectious or contagious; in twenty-two districts it is not considered so; and the other three districts give no opinion.

## Worms.

In six districts the sheep were slightly affected with worms. The causes given were unsound runs and low wet lands. The remedies used were salt, tar, turps and gunpowder, and sulphate of iron, the results generally being favourable.

In twenty-seven districts worms are considered infectious or contagious; in ten districts they are considered not so; and the remaining three districts offer no opinion.

## Foot-rot, Fluke, and Worms.

The following extract from the *Veterinary Journal* (London), shows that the editor, Mr. Fleming, M.R.C.V.S., one of the best authorities in Europe, is decided in his opinion that these parasites are contagious. He writes as follows:—

The day is not far distant, I trust, when all these parasitic diseases will be looked upon as we now view foot and mouth disease, lung plague, rinderpest, and other like contagious disorders. For my own part, I can see no difference between such maladies as "Hoose," "Gid," and "Rot," and those contagious scourges just enumerated. Microscopical germs produce the latter, and they are conveyed into the body by the food, air, or water the animals consume. The worms which cause the symptoms of "Hoose," "Gid," and "Rot," are not so minute perhaps, but they act in a similar manner and are controlled by the same laws. Therefore it is that I insist upon parasitic disorders being looked upon and treated as contagious in every sense of the word; and until this truth is fully recognised, we shall never get rid of them nor cease to complain of the ravages they commit. We now know sufficient of the nature and habits of these worms to combat them successfully and to annihilate them; and it only needs enlightened, unanimous, and energetic action on the part of sheep-owners, graziers, and shepherds to free their flocks from such pernicious plagues.

## TRAVELLING STOCK.

1. *Trespass on Reserves.*

In thirty-one districts the reserves and driftways for travelling stock are reported to be frequently trespassed upon by the neighbouring squatters and selectors; in seven districts they are free from trespass; and from two districts there are no reports.

The Inspectors report that they are unable to cope with the trespassers for the following reasons:—

- (1.) The difficulty of obtaining sufficient evidence to obtain a conviction.
- (2.) The fines, when any convictions have been obtained, are too light to deter the trespassers.
- (3.) The boundaries of the reserves are not properly marked, and in very many instances not marked at all.

Several of the inspectors again state that it will be impossible to protect the reserves, and keep them for the purposes for which they are dedicated, until they are properly fenced and persons appointed by the Government to look after them.

2. *Grass on Reserves and Driftways.*

In twenty districts the Inspectors report that, as a rule, there is not sufficient grass on the reserves and driftways in their districts to enable fat stock to reach the markets in good condition. In nine districts there is only sufficient in good seasons; in nine districts there is sufficient in ordinary seasons; and from two districts there is no report. It will therefore be seen that it is only in nine sheep districts there is sufficient grass on the reserves and driftways, except in very favourable seasons, to enable fat stock to reach the markets in good condition.

3. *New Roads for Travelling Stock.*

In eleven districts new roads or alteration in existing roads for travelling stock are recommended; several other districts require new roads and alterations, but say that it is no use recommending them, as the whole of the Crown Lands have been alienated.

4. *New Reserves for Travelling Stock.*

Several Inspectors recommend that reserves should be made at once on all roads leading to new railway stations, and that all water reserves should be made permanent travelling stock reserves. The Inspectors in eight districts say that new reserves are required, and several others say that reserves are much required, but that there are no available Crown Lands in their districts.

5.

### 5. *Wells, Tanks, or Dams on Droving Roads.*

In eighteen districts tanks, wells, or dams are required on the droving roads, and on some of the travelling stock reserves on or near which there is no water. In nineteen districts the Inspectors report that none are required, and from the remaining three districts there are no reports.

### 6. *Travelling Charges for Stock.*

In eight districts travelling charges on stock have been collected on ten different occasions, the total amount collected being £566 4s. 5d.

### 7. *Law relating to Travelling.*

The Inspectors are unanimous in stating that the provisions of the amended Sheep Act, relating to travelling stock, are working well, and have all but stamped out loafing.

### 8. *Sheep Travelling for Grass and Water.*

Sheep, to the number of 972,952, passed through nine districts in search of grass and water; of this number 60,452 were described as loafing sheep, the balance 912,500 were compelled to travel on account of drought.

## VI.—REGISTRATION OF HORSE AND CATTLE BRANDS.

### 1. *Brands Registered.*

The number of horse and cattle brands registered up to the 31st December, 1881, is 46,463; the number of brands registered during the year ending 31st December, 1881, were,—horse brands, 1,443; cattle brands, 1,348, equal to 1,809 applications.

### 2. *Brands Transferred.*

The transfers recorded during the year 1881 were—horse brands, 71; cattle brands, 81.

### 3. *Brands Cancelled.*

The brands cancelled (horses and cattle) in 1881 were 9.

### 4. *Addresses changed.*

The number of addresses of owners changed in 1881 was 48.

### 5. *Compliance with the Act.*

In thirty-eight districts the provisions relating to registration and other requirements of the Act are reported as being fairly carried out. From the remaining two districts no answer has been received.

### 6. *Benefits of the Act.*

The whole of the Inspectors, with a single exception, report favourably as to the advantages of the Act; it prevents "duffing," facilitates drafting, and it enables owners to quickly recover their stray stock.

Two Inspectors suggest that an index to the owners' names should be published in the Brands Directory; one that section 17 should be repealed; one that the person using a brand first should be compelled to brand on portion 1; and one that it should be made compulsory for all stock-owners to register a brand.

## POUNDS.

### 1. *Number and Inspection.*

There are 311 pounds in the Colony, a few of which have been allowed to lapse for want of poundkeepers. The whole of the pounds have now been inspected, and reported on, and copies of the Inspectors' reports have been forwarded to the several Benches of Magistrates.

### 2. *State of Yards.*

Nearly the whole of the pound yards are in fair order with the exception of thirty-five, which are reported to be very old and require renewing. They will, now that the attention of the Benches has been called to the matter, be put in proper repair.

### 3. *Keeping and Depasturing Pound Stock.*

The provision made for the proper sustenance of impounded stock according to the reports received seems to be generally satisfactory; as a rule poundkeepers have now paddocks for the stock.

### 4. *Management of Pounds.*

The poundkeepers are reported to be performing their duties in a more satisfactory manner, and the appointment of Inspectors would seem to have had a very beneficial effect.

## NOXIOUS ANIMALS.

### 1. *Amendment of the Act.*

During the past year the Pastures and Stock Protection Act has been amended in several important respects.

Superintendents are now eligible to be elected Directors. This is a very necessary alteration, as in some parts of the Colony there are very few resident owners.

The minimum number of stock qualifying owners as voters has been reduced from 100 large stock to 10, and from 500 sheep to 100. This was necessary, as the ratable minimum number of stock was altered in order to include a large number of owners and to increase the funds, especially in the coast and settled districts.

Power is also taken in the amended Act to pay for the destruction of noxious animals in other ways than by bonus.

• A provision is introduced under which an owner who fails or neglects to destroy the vermin can be prosecuted.

An assessment can now be made at any time during the year up to the maximum rates mentioned in section 6 of the amended Act, which have been raised from 5s. per 100 large stock to 25s. and from 1s. per 100 sheep to 4s. 2d.

The provision which required cheques given by the Board to be signed by the Secretary is repealed; so also is that which made it necessary that two Directors should see scalps destroyed, one Director and any person the Board may appoint being able to do this work.

The law for preventing the introduction of rabbits is made more stringent, and the penalty for introducing, liberating, or having wild rabbits is largely increased, being now not less than £10 or more than £50. Tame rabbits also must now be kept securely, under penalty for neglect.

The amended Act also contains a new clause giving the Minister power, on the representation of five owners that the Directors are failing to carry out the law, to set it in motion so that any defaulting owner may be prosecuted if he persists in his neglect.

Unfortunately, however, a proviso inserted in this clause during the passage of the measure through Parliament (declaring that owners who could show that they had expended twice the amount of their rates in destroying noxious animals on their land to be held as doing sufficient), renders completely nugatory the provision contained in the Act for compelling defaulting owners to take the necessary steps for exterminating the noxious animals, more particularly rabbits, on their land. Until, therefore, this is altered, it is feared the law cannot be enforced, and the destruction of the vermin must proceed but slowly.

It then provides a heavy penalty on persons bringing scalps from a neighbouring Colony and passing them off as having been killed in this.

It next declares trustees of commons to be owners for the purposes of the Act.

It also provides for the exclusion of hares and other animals from the operation of the law, if kept in a secure enclosure under permission from the Governor in Council.

The Parliament voted a sum of money to assist in the destruction of noxious animals, giving £1 for every £2 raised by the stockowners; and a further sum of £5,000 was voted, principally to enable effective measures to be taken in the extermination of rabbits, and to assist sparsely stocked districts, where the amount of the assessment and endowment would be insufficient to carry on operations successfully.

#### 2. *The Districts in which the Act is in force.*

The Act has now been brought into operation in forty-three districts, and in a great many cases the full amount of assessment has been levied.

#### 3. *Receipts and Expenditure under Act.*

The amount of assessment raised during the year 1881 was £17,648 19s. 10d., of which £13,782 12s. 6d. was expended; and seven districts incurred debts over and above their assessment to the amount of £2,903 16s. 4d.

#### 4. *Estimated number of Noxious Animals.*

The returns from the Inspectors estimate the number of kangaroo at 6,056,950; wallaby, 4,242,200; native dogs, 30,512; and rabbits, 5,092,050.

#### 5. *Increase and Decrease.*

In twenty districts these pests are increasing through the Act not being carried out effectively, and the want of Government supervision.

In seventeen districts they are reported as decreasing slightly, chiefly through the operations of the new Act, and from the remaining three districts no reports are given.

#### 6. *Number destroyed.*

The number of kangaroo destroyed since the passing of the Act has been 581,753; of wallaby, 43,724; of native dogs, 2,250; and rabbits, 3,999.

#### 7. *Steps taken for their Destruction.*

In sixteen districts poison has been tried for the destruction of noxious animals with satisfactory results.

Hunting with dogs, drives, shooting, and trapping has been tried in sixteen districts.

In five districts nothing has yet been done, and from three no report is given.

#### 8. *The Rabbit Pest.*

In a good many cases energetic measures have been taken in regard to this pest, and a great many rabbits have been destroyed on some runs; but on others little or nothing has been done, and as the work has not been general and simultaneous the rabbits are spreading; and if thoroughly energetic steps are not speedily taken they will before long spread all over the Colony and prove a national calamity, involving as they do pastoralists, agriculturists, and horticulturists in heavy loss and expense.

#### 9. *Amendments in Act.*

A large majority of the Boards is of opinion that all the districts should be compelled to kill simultaneously; and that the Government should exercise more supervision and subscribe pound for pound raised by owners.

#### 10. *Losses from Native and Tame Dogs.*

The losses for the past year from the ravages of native dogs was 92,152 sheep, valued at £29,038, and from tame dogs, 74,813 sheep, of the value of £39,631, a large portion of which were well-bred and stud sheep.

The great desideratum in dealing with the noxious animals pest is some mode of extermination which will be as nearly as possible self acting, and of such a character as that its use can be generally and simultaneously enforced when found effective; and the trap invented by Mr. Bishop Lyne, of Tyrie Dandoloo, a  
sketch

sketch and description of which as published in the *Sydney Mail* is given in Appendix A seems to a large extent to be of this character if it continue to prove as successful as it is reported to have hitherto been. It has too the advantage, while substantial, of being comparatively inexpensive, costing only £8 or £10, and I trust that it will receive a good trial. To admit of this, however, its adoption should be general throughout the locality in which it is built lest the kangaroos should dislike its appearance and leave their usual beat to water at other places, which are open. Then again, if tanks and wells were enclosed as here proposed, poisoned water could, as is now done with fair success in some of the dry portions of the colony, be put into troughs placed in small yards erected on the outside of the fence enclosing the tank where the kangaroos could find their way to the water while the sheep could not.

Objections have been raised to the proposed trap that there would be a risk of the sheep not coming up to the tank or well in the morning and evening while the gates were open to admit them to the water, and that if they came and found them closed they would leave at once and would not return until they had suffered so much from thirst as not only to cause them to lose condition but to make a break in the staple of the wool, whereby of course its value would be very much depreciated. To this the advocates for the use of the trap reply:—

- (1.) That the sheep, if they found the gates closed, would not leave the neighbourhood of the tank, but would hang about till they were admitted; and that this could not possibly be long as the person looking after them would visit the tank twice a day, and would see that the sheep were watered at least once a day; while sheep frequently go two whole days without water.
- (2.) That the tanks would only require to be closed for two or three weeks, and if it were found that the sheep did not come up to the tank every day to drink, hands could be put on to bring them up which would entail only a trifling additional expense.
- (3.) That this plan could be carried out in the month of January, when the fleece is in that state that a break would not be likely to occur, or if it did, would affect the wool but very little, so shortly after shearing.

Objections have also been taken to this plan on account of the expense where there are many tanks on a run; but it must be evident that if Mr. Lync's trap is successful it will be infinitely less expensive than the bonus systems, or any of the other modes now followed in destroying kangaroos as well as far less troublesome, and far more certain and effective. The enclosing of the tanks in this way would likewise protect them from injury, and would also by sheltering the water from the wind prevent a great deal of the waste which now goes on through the evaporation being very much intensified by the wind disturbing the surface of the water. Still another advantage which would arise from the adoption of this mode of dealing with the kangaroos would be that its use might be made general by regulation, and thus secure, so far as the dry part of the Colony is concerned, effective simultaneous action, and such a regulation would be easily enforced. Then supposing that this was the case fully three-fourths of the Colony could be completely cleared of kangaroos, and if so their destruction in the other fourth could be neither a difficult nor expensive matter.

(See also Appendix B, Report by the Under-Secretary for Mines on Rabbit Pest in Victoria.)

#### COMMONS.

##### 1. *Number and Extent.*

The number of commons in the Colony is 122, with an average extent of about 1,250 acres each. The number of Temporary Commons is ninety-one, with an average extent of about 2,000 acres each.

##### 2. *Number of Commoners, Stock, &c.*

The average number of commoners to each common is estimated at 200, and the number of stock at 410.

In fourteen districts the commons are reported to be used for other purposes than that of grazing commoners' stock.

#### THE MEAT TRADE.

Notwithstanding the comparatively unfavourable seasons from which the Colonies are still suffering, the exportation of frozen meat to London is making steady progress.

In several instances no doubt the meat has not turned out well, but the cause has been discovered, and will in future be avoided. With the experience now gained, the trade can be carried on with very little risk; and with the prospect that the coming season will be a favourable one, there is every reason to expect that the export of meat to London will continue to increase. It is believed, too, that markets for a portion of our surplus meat will before long be found in India, China, and Japan, and in some of the islands of the Indian Archipelago.

The export trade to London has already advanced an important step. A London Company ("The Australian") has commenced to purchase meat in the Colonies, and to freeze and ship it for London; and if such arrangements were made here, and at the other ports of shipment, as would enable this and other companies who may take the business up, to obtain a steady supply of first-class unwasted meat in good order and condition, it would not be necessary, as it has been, for stockowners to go beyond what is their legitimate business and become exporting merchants.

While we have as good cattle and sheep as any in the world, a steady supply of first-class meat can only be secured by the establishment of a dead meat trade, and having the stock killed at the different centres of the stock traffic on the lines of railway, near their own pastures, or at least near good grazing ground, where those which have been obliged to be travelled any distance can be rested for eight or ten days, and then brought quietly up and killed, free from the fatigue, starvation, and fever, to which they are now subjected under the present live fat stock trade.

Before, however, a dead meat trade can be established on a proper footing in this Colony, a suitable meat market with a commodious chill-room must be provided in Sydney, for those who would send their meat to market must have a guarantee that it will be protected from taint till it can be sold, and this can only be effected by the erection in a central position on or near the railway line in Sydney a suitable meat market like that in Melbourne, with double walls and double roof, and with cold or refrigerating store attached, in which the temperature can be maintained at from 33 degrees to 40 degrees, and where the meat can, if required, be kept thoroughly

thoroughly sound for eight or ten days or until it is sold. While again this is the case, there is not the least doubt but that so soon as such a market and store are erected in Sydney, companies will be formed in the principal inland towns on the railway lines to erect slaughtering and chilling houses, to enable this trade to be carried on. It is nothing but the want of such a market and store that keeps towns like Goulburn, Wagga, Bathurst, and Dubbo from at once commencing such establishments. Indeed companies have already been so far formed in these towns for that purpose.

Then supposing that the stock are slaughtered, as here suggested, at these centres, and the meat chilled to the bone down to (say 33 degrees, just above freezing), it would be despatched late in the day in double lined non-conducting meat trucks by special meat train, and arrive in Sydney early next morning perfectly safe and sound at all seasons of the year; for the meat could afford to lose upwards of 30 degrees of cold (that would raise the temperature to only 66 degrees, and it would seldom rise above 50 degrees) without being at all affected. On the arrival of the trucks in town they would be run into the meat market, and the meat would be turned out for sale, sound, firm, and bright, with all the goodness and flavour in it; and if it were so, any one can see that it would be very seldom indeed, with all the different outlets there would then be for the meat, that the market would not be cleared; but if it were not the unsold portion could be passed into the cold store, and instructions telegraphed to the several slaughtering centres not to kill more until the meat which had arrived was cleared off, even if it were necessary to send the meat to the cold store. It would be far more economical to keep it in this way than to keep and feed the cattle on hay as they ought to be, while there can be no question but the meat kept in the chillroom would waste less, and be infinitely superior to the meat of cattle kept hanging about near Sydney, even if they had all the hay they could eat.

The fact, however, is that with a constant supply of first-class meat, all the different branches of the meat trade would be established near the market (they could all be carried on in the city without causing any nuisance); and while the large portion of the supply was taken by the retail butchers, a good deal of the prime meat would be purchased for freezing and export; the fore-quarters of the best beef would be salted, the middling beef and mutton would be tinned, and the inferior made into soups and extracts. It would be very seldom, therefore, that much meat would have to go into the cold-room, and the market would scarcely ever be glutted.

Then while the retail butchers would have a constant supply of first-class meat cooled and set to the bone, and fit to keep sound and good in their shops for two or three days, even in the height of summer, at a steady reasonable price, the citizens would be able to obtain far superior meat to what they now get; the terrible starvation and cruelty to which the stock are subjected, as the live fat stock trade is now carried on, would be at an end; the spread of infectious and contagious diseases in stock would be checked through their collecting, herding, and travelling together in large numbers being no longer necessary; the fat stock trade would be placed on a satisfactory footing, which it is very far from being now; owners would receive better prices for their stock, and an extensive business in meat, frozen, tinned, and salted, would be established, adding eventually millions to the export trade of the Colony.

In addition to all this, a dead meat trade would add very largely to the railway traffic, and to its earnings from stock; for not only would all the fat stock then be carried to market by train, while at present a great many of them still reach it on foot, but a very large amount would be saved to that department through the meat trucks being available for all sorts of return loading, which the sheep and cattle trucks are not, except in the case of the latter, for a few classes of inferior goods; and they have accordingly to be hauled back empty, which of course is a great waste of steam-power and money.

That the fat stock suffer terribly from starvation, as the trade is now conducted, is quite notorious, and the fact has frequently been noticed in the daily papers. One correspondent writing some eighteen or twenty-four months back on this subject, says, "To show to what extent fat stock are now starved and the meat wasted and deteriorated, we will take an every-day ordinary case, and follow a bullock from the time he leaves his own pastures till he is killed at the Abattoirs; and in doing so, we will suppose that he has to travel on foot 150 miles to the railway. This will take between ten and twelve days, and during that time he, as a rule, gets very little food, less at least by one-half than he needs. Having reached the railway station, after what is equal to say two whole days' starvation, he is frightened, roused, and illused in being trucked, and after he is so, he is frequently knocked about and bruised by the stopping and shunting of the train, the trucks having only chain couplings. We will say that waiting to be trucked, trucking, and conveying to Homebush occupies another whole day—that makes fully three whole days without food, and a great deal of bad treatment; then he is one day in the sale-yards—that makes four days; after that he passes to the bare, starving paddocks between Homebush and Glebe Island, which are actually as bare as the road, and where there is, too, at times but little water; and he remains in these miserable paddocks on an average (the butchers always keep a supply of stock on hand) three days more before passing on to Glebe Island, which makes seven days without food. At the Abattoirs again he can be kept two whole days longer without food before he is killed; but supposing he is only half that time there, this would make one day more, and that brings the total up to eight whole days without food. Can anything more terribly cruel than this be conceived, or anything which would tend more to waste and deteriorate the meat? This horrible wholesale cruelty (there are at least 500 head of cattle and 4,000 or 5,000 sheep constantly starving between Homebush and the Abattoirs) has been going on for years, but lately it was more prevalent than ever, through the continued glut in the fat stock market. During the last three or four months about 2,000 cattle a week have been passing through the Homebush yards, and at the very least one-half of these have been sent to starve in these miserable apologies for grass paddocks, where there are generally four or five head of cattle for every acre of land, and such land as it is. Treatment like this is barbarous in the extreme, and any one can see that the meat of stock which has suffered in this way must lose its appearance and flavour as well as its nutriment, being little else than well-trained muscle with all the juice and flavour knocked and starved out of it."

It is believed that the evils of the fat stock trade as now conducted are here rather under than overstated, and whether the remedy be in the establishment of a dead meat trade or not, some radical change is urgently called for, principally on the score of humanity, but also for the sake of the health and comfort of the citizens of Sydney and in the interests of the owners of stock, out of whose pockets all this cruel waste comes.

## GENERAL.

1. *Artificial Grasses.*

In twenty-five districts artificial grasses have been sown during the year to a slight extent, the most successful being lucerne, rye, and Prairie.

2. *Fencing of Runs.*

The number of open or unenclosed runs in the Colony is 1,294. The number enclosed is 7,795. The number partially sub-divided is 3,677, and the number properly sub-divided, 5,412.

3. *Miles of Fencing.*

The number of miles of fencing is estimated at 914,827 at an average cost of £50 13s. per mile, making a total cost for fencing of £46,335,987 11s.

4. *Dams, Tanks, and Wells.*

The number of private dams used for stock purposes is estimated at 9,423, at an average cost of £100 12s. each. Number of tanks, 14,873; average cost each, £178; and the number of private wells used for stock purposes is estimated at 2,189, at an average cost each of £311 4s. Cost of private dams, £947,953 16s.; cost of private tanks, £2,647,394; cost of private wells, £681,216 16s.; total, £4,276,564 12s.

5. *Noxious Plants and Weeds.*

In twenty-six districts the land is reported as being slightly infested with Bathurst burrs, and in ten to a large extent; in two the land is not infested, and in the remaining two it is not stated.

In twenty-seven districts the land is slightly infested with trefoil burr; in six to a large extent; in five there is none, and two are not stated.

In twenty-three districts variegated thistle is reported to a slight extent; in eight to a large extent; seven districts are reported to be free from it, and two are not stated.

In eighteen districts black thistle is reported to a slight extent; in nine to a large extent; eleven districts are free from it, and two not stated.

In fifteen districts other noxious weeds are reported to a slight extent; in eight as plentiful and increasing; in fifteen districts there are none, and two are not given.

6. *Cost of Clearing.*

The cost of clearing the commons of noxious weeds throughout the Colony is estimated at £15,456; the Temporary Commons, £19,816; the Police Paddocks, £3,655; the travelling stock reserves, £45,533; and the droving roads throughout the Colony at £54,145; or a total lump sum for clearing the lot of £138,605.

## PUBLIC TANKS AND WELLS.

The watering places handed over by the Department of Public Works to this branch are (with a few exceptions in which they are being put to rights or are to be abandoned) in good order and repair, and during a trying season like the last have been of very great benefit to stockowners and the public, although in a good many cases they are still too far apart to afford as full and regular a supply of water for travellers, teamsters, and travelling stock at all seasons as is required.

When, however, the additional new works—the construction of which is now in hand—have been completed several of the more important droving roads will have a full supply of water at comparatively short stages, and stock will be able to take the shortest route to market at all seasons of the year. It is expected that the construction of at least twenty new works will be let during 1882.

It is satisfactory to learn from Mr. Inspector Gilliat's reports that the works which have been let will prove sufficiently remunerative to the tenants to enable a slight increase of rent to be obtained, and there is every reason to believe that not only will these works give a fair return for the outlay at the scale of rates now charged for water, but that before long these charges may be reduced.

It is to be expected also that the expense of constructing both tanks and wells will before long be considerably reduced with the aid of water augers in sinking wells and of steam and other machinery in tank and dam making.

The water auger has been used with considerable success in Victoria, and also to some extent in the south-western and western portions of this Colony, and as it is brought into more general use it will both lessen the expense of putting down wells and also lead to fewer failures in obtaining water.

The steam tank-making machinery, which has been used for some time in South Australia, is said to be a decided success, and if, as reported, tanks can be constructed in that way at an expense of 5d. per cubic yard, there is no question but that its introduction will be a great boon both to the Government and our pastoralists.

Pending the appointment of an engineer of water supply and staff, and the initiation of a proper system of damming the rivers and creeks in carrying out a general system of water supply for the Colony, I have the honor to offer the following suggestions bearing upon that most important subject:—

1. While I believe it is the case that general instructions are given to licensed surveyors to reserve the natural sources of water supply, so far as they consider necessary in the interests of the public, I would, without at all calling in question the manner in which these instructions are carried out, respectfully suggest that the Minister for Lands be moved to direct that in future no permanent or readily made permanent water supply, whether in rivers, creeks, lakes, lagoons, swamps, springs, or any other source, be alienated without his express sanction, to be granted on special report by the Survey Department with respect to the source of supply as to whether or not it is or is likely to be required for the use of the public, more especially for the use of townships, travellers, teamsters, or travelling stock.
2. I would further suggest as preparatory, to and as forming a portion of a general scheme of locking the rivers and creeks which has been suggested, that the Minister for Lands be moved to direct the district surveyors to furnish special reports on all the natural outflows or billabongs from the rivers and creeks in their districts; the height at which the flood in the rivers and creeks must be when the outflows occur; the volume of water breaking out; the distance to which it now flows; the possibility of increasing the outflow by cuttings, or by weirs, or by weirs and cuttings; the probable expense, and the possibility in these cases of leading the water into natural depressions which would form reservoirs.

See also Appendix C Report by the Inspector of Public Tanks and Wells for 1881.

I have, &c.,

ALEX. BRUCE,

Chief Inspector of Stock.

APPENDIX

## APPENDIX A.

*Effective Kangaroo Trap.*

OUR illustration is of a kangaroo trap designed by Mr. Bishop Lyne, of Tyrie, Dandaloo, which has proved remarkably serviceable in the district in which the inventor resides. It may be erected at either a tank or well. As shown by the isometrical plan at the top of the engraving a tank is securely enclosed with a substantial fence, say 9 feet high at all parts save the roadway (12 feet wide), intended for kangaroos to use, where it is only 4 feet high. The construction of the fence would of course depend upon the kind of material to be obtained. There are eight or ten low gates or flaps (which can be made to fasten up) in each side of the fence to admit the sheep to water and allow them to leave. An excavation is then made, commencing at the bottom of the 4 feet portion of the fence, say 24 feet long, 12 feet wide, and 4 feet deep at the commencement, running off to nothing at the other end next the tank (as shown); the earth taken from the excavation being thrown into an embankment outside the fence to form a roadway for the kangaroos to get up to the top of the 4 feet portion of the fence.

The trap (along with all the others in the same locality) is worked for say three or four weeks in the month of January when a man attends morning and night to admit the sheep at the gates to the tank, and when they have left the gates are closed. The kangaroos, finding no other way of reaching the water, go up the road and drop down in the excavation. Having had their fill of water they make back for the roadway, but the height (fully 9 feet) is too much for them, and they have to stop in the tank enclosure, from which they are easily driven into the killing yard, where with the exception of two or three which are used as decoys they are destroyed.

Beneath the plan of the yards there is a sketch showing the way in which egress from the tank by the roadway is prevented. Without this the trap would be incomplete, as a fence 4 feet high could be easily topped by the tripods. The sectional plan at the bottom of the engraving enables one at a glance to observe how the earthwork of the trap should be performed.

When saplings are to be got the expense of the trap will not exceed £8 or £10, and where saplings are not plentiful wire could be used for the higher portions of the fences.

It will be seen that if this plan were generally followed wherever the stock are watered at tanks or wells, or even wherever natural water could be enclosed, the greater part of the marsupials would either be caught and killed or die from thirst. It is believed that this plan can be followed in two-thirds of the area of the Colony, and Mr. Lyne deserves the thanks of his fellow-pastoralists for working it out and making it known.

## APPENDIX B.

REPORT of the Under Secretary for Mines to the Honorable the Minister for Mines upon the steps taken in Victoria for the extermination of rabbits.

Sir,

While in Victoria I made inquiries with a view to ascertain what is being done in that Colony to destroy the rabbits, and have now the honor to submit this report embodying the information acquired.

In the first place I desire to acknowledge the courtesy of Arthur Morrah, Esq., the Secretary for Lands, who kindly handed me a copy of a report he had just prepared for presentation to the Government on this subject, which reads as follows:—

“The immense destruction by rabbits of the grass and crops of selectors, landowners, Crown tenants, and others impelled the Government to adopt some measures for the extermination of the rabbits on Crown Lands, and for that purpose a sum of £10,000 was voted by Parliament for expenditure during the financial year 1881–2. In the early portion of the year 1881 the work of extermination was pursued under the directions of Crown Lands bailiffs only, and notwithstanding the distribution of large quantities of phosphorized oats resulting in the destruction of great numbers of the pests, they increased to such an extent that it was deemed advisable to greatly expand the field of operations and to carry on the work on a much wider portion of the Colony. This necessitated the organization of a small staff of experienced officers to take charge of outdoor operations, to inspect the country, engage men, and establish *depôts* for mixing and distributing phosphorized grain, &c. During the past few months this step was attended with very satisfactory results, and good work was accomplished.

“Although the work of extermination which has been carried on during the year 1882 does not strictly come within the purview of the report for 1881, yet I may mention, in view of the importance of this subject, that since February last upwards of 100 men have been employed mixing and distributing poison on Crown lands, and that over fifty *depôts* have been established in different parts of the Colony, principally in the north-western districts, such as Charlton, Swan Hill, Horsham, Drinboola, &c.

“Various experiments have been made with fair success; bran and arsenic, arsenic and chaff, and crushed wheat and arsenic have proved effectual.

“The department has offered, if the Shire Councils purchase rabbit skins at an advance of 6d. per dozen on Melbourne market prices, to recoup one half of such advance, viz., 3d. per dozen, and to defray cost of transit to Melbourne by rail. The offer having been accepted by several of the local bodies, it is believed that the destruction of rabbits will be greatly accelerated.

“As operations are now being conducted on a large scale, I doubt not that the result, so far as the destruction of the rabbits on Crown Lands is concerned, will be found satisfactory, and that, although the work of extermination must necessarily be long and expensive, the next yearly report will show a great decrease in the numbers of the pests.

“The statement to hand from the men employed, and from farmers and selectors, are most encouraging.”

I may here remark that in this work there is a divided authority which struck me as likely to retard the operation of complete extermination, but I was assured that in this respect I was mistaken.

The destruction of the pest on Crown Lands, whether under lease or not, and on reserves, is carried on under the supervision of Crown Lands bailiffs at the expense of the Government, and upon purchased lands by persons employed by the Shire Councils aided to some extent by the Government.

The Crown Lands bailiffs and the Shire officers I am informed act in concert, consequently the evils of divided authority are not felt.

The methods adopted are the laying of poison, the use of the “annihilator,” the use of traps, and the purchase of skins.

In addition to the means named the Meat Preserving Works buy very large numbers, which are preserved for exportation. The factory at Colac buys, during seven months of the year, an enormous number, for which they pay at the rate of fivepence per pair.

A very large number of persons in the Colac district—men, boys, and girls—find profitable employment in trapping rabbits during the seven months, but the factory does not buy during the close season, consequently though these contribute largely to keep down the pest they do not attempt to exterminate.

As regards the poisons used I find that in the St. Arnaud Shire phosphorized wheat was considered the most effective. The following instance was cited by the President of the Shire:—At Lake Boloke which while dry was literally swarming with rabbits, the sand-banks round the margin forming burrows, 18,000 acres were perfectly cleared by means of phosphorized wheat, at a cost of £100. In Stawell Shire phosphorized oats were used until rabbits got tired of it. In Colac Shire, after rabbits had ceased to take poisoned grain, they used carrots and arsenic prepared as follows:—1 oz. or 1½ oz. of arsenic and 1 lb. of sugar to one gallon of water boiled till the poison is dissolved, then the carrots cut into slices are put into the boiling water, and parboiled after which they are ready for spreading. In other places oats, hay, or chaff, steeped in arsenic water, have been used with good effect, but it has been found that after a time, rabbits cease to take the poisoned wheat, oats, &c., and the only way to tempt them is to change the poison and the substance with which it is mixed. In the Colac district, where the grass is especially good, it is said that carrots alone will tempt them.

In the Stawell Shire, since the grass has begun to spring, they have ceased to spread poison, and have used the “annihilator,” an engraving of which is attached to this report; a machine of the largest size costs £7.

The following are the instructions for using it—

First make a charcoal fire in the cylinder (say half-full); when well lighted attach the tube by the India-rubber coupling, and insert in the burrow, always blowing with the wind if possible. Have ready the cover, on which put some clay round the edge; then put in about one pint and a half of Ogburn's Lethiferous chemical, screw down the cover, and blow gently, taking care not to overheat the cylinder, as by so doing you destroy the gas which you want to inject. Any hole you see smoke coming from, stop at once.

The time occupied will be from five to ten minutes, according to size of burrow and number of holes. When testing do not dig out too hastily, give the gas time to do its work. Keep the chemicals damp. The bellows should be oiled once a week at least, also the pipes connected by the brass coupling taken off and cleaned frequently. The

The pest is now considered to have been exterminated in the Stawell district.

In the Colac Shire spring traps similar to rat-traps, but of a larger size, are used, and are considered the most effective mode of extermination where the rabbits refuse to take poison.

The conclusion at which I have arrived, from the inquiries made in various parts of the Colony, is, that the spreading of poison is not effective where the grass is abundant; that the poison and the substance with which it is mixed should be frequently changed; and that smoking out and trapping should not only be carried on simultaneously with the spreading of poison, but that special efforts should be made during the breeding season.

It is I think worthy of consideration whether some united action could not be taken by the Government of this Colony and Victoria, in regard to the territory on either side of the Murray which is infested with rabbits, as nothing short of vigorous and united action will effect a complete extermination of this pest, and unless completely destroyed the rabbits will be a source of continual expense and trouble in both colonies.

HARRIE WOOD.

#### APPENDIX C.

### Annual Report of the Inspector of Public Tanks and Wells for the year 1881.

The Inspector of Public Tanks and Wells to The Chief Inspector of Stock.

Sir,

I have the honor to hand you herewith my report for the past year.

1. The officers employed are three, consisting of an Inspector and two Overseers. One Overseer is stationed at Ivanhoe in charge of the S.W. Division, the other at Bourke in charge of the N.W. Division.

2. The works inspected during the year have been—five wells and twenty-eight tanks; a total of thirty-three.

3. Of works still to be inspected, there are two in course of construction, between Moree and Narrabri; one on the road from Bourke to Cobar, a dam at Parkes, and a dam at Junee.

4. The distance travelled during the year by the Inspector of Public Tanks and Wells is 5,109 miles, or an average of 425 miles per month.

5. The total number of tanks and wells completed appear to be thirty-eight.

6. Of which number thirty-seven are now transferred to the charge of the Department of Mines.

7. Eighteen works have been rented during the year, at a gross total of £637 6s. sterling, giving an average of about £35 sterling for work; or about 3% upon the estimated value per work of £1,500 sterling.

8. Two new works are being made between the Narran and Barwon; two between Moree and Narrabri, and one between Bourke and Cobar.

9. Thirty-three new works have been recommended on the following roads:—

Deniliquin to Hay ... .. 1	Baradine ... .. 1
Hay to Wilcannia ... .. 6	Cobar to Louth ... .. 3
Wilcannia to Hungerford ... .. 1	Cobar to Hillston ... .. 4
Wanaaring to Bourke ... .. 3	Cobar to Condobolin ... .. 2
Louth to Wanaaring ... .. 1	Lake Cobham to Warramurtie ... 3
Bourke to Eringonia ... .. 2	Lake Cobham to Mt. Browne ... 1
Eringonia to the Culgoa ... .. 2	Hillston to Currathool ... .. 2
Narran to the Barwon ... .. 1	

10. After careful examination of existing works, I am still of the opinion that alterations are required at those tanks where stock are allowed admission to the water. Experience appears to confirm each year the importance of protecting the conserving area from the waste caused by disturbance and pollution.

In support of this opinion, I may allude to the remarks of the Commission on the Conservation of water on the North-western portion of Victoria, published in 1881.

11. Extensive repairs have been completed at the Box Creek, Youhl Plain, and Til Til tanks on the Balranald and Ivanhoe Road.

The Box Creek tank, which had been dry from the date of its construction, was filled by the first rain after the completion of these alterations and repairs, and all three works are now full and in working order.

The 12-mile, 35-mile, and 48-mile works on the Hay and Wilcannia Road have also been put in effective working order; repairs to the Boonoonoona tank on the same road have been approved, and tenders are being inquired for. Arrangements are also being made for fencing the works from Bourke to Cobar, and the springs on the Bourke and Hungerford Road.

12. I am of opinion that all the works proposed under paragraph 9 are urgently required.

13. The best description of work for this service appears to depend in a great measure upon the character of the country. The discovery of artesian water beyond the Darling will probably lead to the adoption of boring for water supply over a large area of the waterless portion of the Colony, and it is not improbable that the employment of suitable machinery will confirm the belief that a similar source may be found between the Darling and the Lachlan. Wherever this is the case, at not too great a depth, wells are the cheapest and most efficient class of work; but where subterranean water cannot be obtained in sufficient quantity or of suitable quality, tanks must be adopted. Experience has led to the knowledge of numerous improvements in the construction of this class of work, but none that appears to me of more importance than the supplying of water to stock from troughing.

14. It has become apparent that, to obtain the full benefit derivable from these works and to secure rentals that will justify their continued construction, a more systematic course should be observed for the future, and that it will be desirable to place them at such distances from each other or from permanent water as to enable stock or traffic to pass freely, during the driest season.

Experience in this direction seems to show that on first-class roads, and where a number of dry stages have to be made in succession, the maximum distance apart should not exceed 15 miles; and on second-class roads, and where but one or two dry stages are necessary, it may be extended to 20 miles.

The information obtained with respect to evaporation at the Government tanks must for the present be considered unreliable.

It is extremely difficult to fix the average consumed per head of stock; and unless careful records of the rainfall and increase in each tank, as well as the daily or weekly decrease are kept, the results are practically worthless.

The class of labour usually employed is not favourable for careful observation, but efforts are being made to obtain more reliable returns on this important question.

Individual works other than for the supply of townships or villages, however useful for purely local purposes, attain no value, and are difficult to lease until they become part of a system connected with other works, or permanent water, at such distances as to ensure free passage in all seasons.

I have, &c.,

HARRY GILLIAT,

Inspector Public Tanks and Wells.

1882.

## NEW SOUTH WALES.

PASTURES AND STOCK PROTECTION ACT, 1880, AND PASTURES AND  
STOCK PROTECTION ACT AMENDMENT ACT, 1881.

(REGULATIONS ISSUED UNDER.)

Presented to Parliament pursuant to Act 44 Vic. No. 11, sec. 30.

Stock Branch,  
Department of Mines,  
Sydney, 13th January, 1882.PASTURES AND STOCK PROTECTION ACT, 1880, AND PASTURES AND STOCK PROTECTION ACT  
AMENDMENT ACT, 1881.

THE following Regulations have been made by His Excellency the Governor, with the advice of the Executive Council, in lieu of the Regulations published in the Government Gazette of 30th November, 1880, for carrying into effect the abovenamed Acts, and are hereby published for general information.

ARTHUR BENWICK.

## I.—ELECTION AND POWERS OF DIRECTORS.

1. The owner of 10 large stock, or the duly authorized superintendent of the owner of not less than 1,000 large stock, resident in a District, shall be qualified to vote at the elections of Directors for such District, and the voting at such elections will be cumulative, according to the scale fixed by the Schedule to the Pastures and Stock Protection Act Amendment Act, being Schedule 1 hereto.

2. Where large stock are jointly owned by two or more persons only one of such persons shall be entitled to vote at the election, and stock running together on the same run will be held to belong to one and the same owner.

3. All questions arising at elections as to the ownership or number of large stock, or the locality of any run, shall be settled by reference to the rate-book for the district.

4. The owner of not less than 10 head of large stock resident in any district, or the duly authorized superintendent of an owner of not less than 1,000 head, shall be eligible to be elected as a Director for such district.

5. The annual elections of large stock directors shall take place in the month of February at the same time and place and in the same manner as sheep directors.

6. If in any district no large stock directors or an insufficient number be elected, the Minister for Mines may appoint a sufficient number, whether possessed of the qualifications hereinbefore mentioned or not.

7. All vacancies in the office of large stock directors shall be filled up by the Boards at special meetings, of which not less than ten clear days' notice shall be given, and the members of the Board shall in all cases hold office until their successors are appointed.

8. The Board shall, among other things, fix the amount to be paid for the destruction of noxious animals; it shall assign the remuneration for work done and services rendered under or by its order; and it may employ and pay for all necessary labour to carry out the Act.

## II.—MEETINGS OF THE BOARDS OF DIRECTORS.

9. The Board shall meet for the discharge of business on the first Wednesday of every quarter, except when that falls on a public holiday, when the Board will meet on the preceding Tuesday.

10. Three members shall form a quorum, and the Board may adjourn from time to time.

11. Special meetings of the Board may be called by the Secretary at the instance of the Chairman or any other member of the Board.

12. All meetings of the Board shall be called by circular delivered personally to each member, or left at or sent by registered letter through the post to his usual or last known place of abode, stating the place, date, and object of the meeting; and every member shall receive at least forty-eight hours notice of a meeting.

13. The Chairman shall preside at all meetings of the Board; and, in his absence, the members present shall elect a Chairman from their own number.

14. A precis of Minutes of Proceedings at all meetings of the Board shall be taken by the Secretary or some member of the Board, which shall be read over to the meeting at its close, and shall be signed by the Chairman, and this precis shall afterwards be entered by the Secretary *in extenso*, in a book to be kept for that purpose. The minutes as thus entered shall be read by the Secretary at the next meeting, and, if correctly recorded, shall be confirmed by the meeting and signed by the Chairman; and such minutes shall be the authenticated orders and proceedings of the Board.

15. All owners liable to assessment shall have access to the Minute and other books of the Board at all reasonable hours.

16. At every ordinary meeting of the Board the following shall be the order of business.

- (1.) The minutes of the previous meeting shall be read and confirmed.
- (2.) The bank book, order book, and a statement of accounts shall be laid on the table, showing the moneys received and paid since last meeting.
- (3.) The correspondence and reports will be read, and if expedient, orders made thereon.

- (4.) Postponed or adjourned business, and motions of which notice has been given, will be dealt with.
- (5.) Then other business and notices of motion will be taken.

And no new business of which notice has not been given at a previous meeting shall be considered unless with the consent of all the members present.

17. At all meetings of the Board and of any of its Committees questions shall be decided by a show of hands, and in the case of an equality of votes the Chairman for the time being shall have a casting vote in addition to his vote as a member of the Board.

18. Every point of order shall be considered on its arising, and the decision of the Chairman of the meeting shall be conclusive.

### III.—LOCAL COMMITTEES.

19. The Board may appoint Local Committees consisting of not less than two nor more than five members of its own body to assist in administering the Act in certain localities; and such Local Committees shall, subject to the authority and sanction of the Board, carry out in the localities which the Board may assign to them, the following among other duties, namely:—

- (1.) They will ascertain and report to the Board whether there are any noxious animals on any of the runs in their localities; and if so, whether the owners of the runs are taking efficient measures for their extermination.
- (2.) They will recommend fit persons to receive scalps and issue certificates, and on their approval and appointment by the Board, it will issue notice in the local papers of their appointment, as prescribed by these Regulations.
- (3.) They will see that proper arrangements are made for the destruction of the scalps, and transmit to the Secretary a duplicate of the certificate of destruction granted to the person delivering the scalps.
- (4.) They will make the necessary arrangements for the carrying out and supervision of the work undertaken by order of the Board.
- (5.) They will, where required by the Board, arrange for the payment of scalps and of other work done in carrying out the destruction of noxious animals.
- (6.) They will send in monthly reports to the Board as to the prevalence of noxious animals in the portion of the district assigned to them, and the progress made in carrying out the Act, such report to reach the Board not later than the last day of the month.

20. Two shall form a quorum at all meetings of Local Committees, and all meetings shall be called and conducted as nearly as may be in the same manner as meetings of the Board.

21. The Board may define the powers and duties of the Local Committees appointed by it, and the Committees shall not act in any way repugnant to the Board, nor incur any liability, nor initiate nor transact any business beyond that authorized by the Board.

### IV.—DEFAULTING OWNERS.

22. The Board may authorize any person to enter in the daytime on any run in the district for the purpose of searching for or destroying any noxious animal, and the person so authorized shall, when required by the owner of the run, produce the authority of the Board for making such entry.

23. The Board will cause an inspection to be made, if it has not already done so, and a report to be furnished either by the Sheep Inspector for the district or by an inspector appointed by the Board, under and for the purposes of the Pastures and Stock Protection Acts, as to the prevalence of noxious animals on the several runs in its district; and shall thereupon fix and determine the time within which the owner shall exterminate the noxious animals on his run, and shall give owners notice accordingly, in the form of Schedule 2 hereto.

24. If the Board has reason to believe that any owner is failing to comply with the notice served upon him in terms of the next preceding Regulation, it will cause such owner to be served with a notice in the form of Schedule B of the principal Act and Schedule 3 hereto, to destroy the noxious animals on his run forthwith.

25. If after twenty-eight days from the date of the service of the notice in the form of Schedule B of the principal Act and Schedule 3 hereto, the owner shall in the opinion of the Board fail to comply with such notice, it may either direct the inspector to prosecute such owner for neglect, or it may issue authority to some fit person, in the form of Schedule 4 hereto, to enter upon such run and use all such lawful means as may be necessary in searching for, taking, and destroying all noxious animals found thereon, and where expedient to remove their carcases or any portion thereof.

26. Every person so authorized before proceeding to carry out the directions of the Board shall submit for its approval a statement of the means which he proposes to adopt for that purpose, and among other things he shall state particularly, how he intends to destroy the animals, whether (1) by shooting, snaring, trapping, driving, or yarding them, or (2) by poisonous food, grain, or baits, or (3) by poisonous gas, or (4) by running

down or otherwise destroying them by dogs, or (5) by digging out or closing up their holes or burrows, or (6) by destroying them or their harbour by fire; and no such person shall proceed to destroy such animals unless with the written sanction of the Board.

27. Any person intending to enter on a run by the authority of the Board shall, before doing so, give the owner of the run notice of his intention; and if any such person intends to destroy a brushwood or log fence, he shall give such owner and the adjoining owners within 2 miles of such brushwood or fence not less than fourteen days notice in writing in the form of Schedule 5 hereto.

28. No person so authorized shall, unless with the written permission of the Board, take any dogs on a run for the purpose of searching for or destroying any noxious animals, and then only after having given seven clear days notice to the owner of the run of his intention to do so.

29. On receiving notice from a person authorized by the Board that he intends to bring dogs on a run, the owner shall as far as possible remove all poisoned baits which may be on the run, and shall not during the time that the person so authorized by the Board remains on the run lay any poisoned baits thereon; and if any of the dogs so taken on a run be wilfully poisoned, the owner of the run shall be responsible for their full value, and shall besides be held and deemed to have committed a breach of these regulations.

30. The Board will in the first instance, from the moneys standing at the credit of the noxious animals destruction account for the district, pay all expenses incurred in the destruction of these animals on the runs of defaulting owners, and shall make a claim on such owners in the form of Schedule 6 hereto, for repayment of the amount so expended, and if the amount thus claimed be not paid within fourteen days of the date of the service of such claim the same may be recovered in a summary way by the Secretary or Chairman.

31. If an owner neglect to destroy the noxious animals on his land and the Board for the district in which such land is situated fails to promote the destruction of such animals, any five or more owners liable to assessment under the Act may make a representation to that effect in the form of Schedule 7 hereto to the Minister for Mines, who, if he considers necessary, will instruct the Inspector to serve such owner with a notice in the form of Schedule 3 hereto; and if the owner does not within twenty-eight days of the date of such notice comply with the same the Inspector will take proceedings against him.

### V.—DEFAULTING BOARDS.

32. If after due inquiry any Board has reason to believe that any other Board in an adjoining district is neglecting to carry out the Act, the first-mentioned Board in conjunction with some other Board or Boards whose district or districts adjoins that of the Board in default, may in terms of section 8 of the principal Act publish a notice in the Gazette in the form of Schedule 8 hereto, calling upon such last-mentioned Board to proceed within thirty days to carry out the provisions of the Act, and shall serve the Board in default with a copy of such notice; and if in the opinions of the Boards joining in this notice the Board in default shall not within three months from the publication thereof carry out the Act the Boards joining in the notice may present a Petition to the Governor in the form of Schedule 9 hereto.

33. On the receipt of any such petition the Governor may cause its substance and prayer to be published in the Gazette and in some local paper circulating in the district, and may on the expiry of thirty days thereafter issue a proclamation annexing the district for which the Board in default was appointed or any portion of such district to any of the Petitioning Districts to be treated, dealt with, and assessed as portions of such last-mentioned districts.

### VI.—RECEIPT OF SCALPS.

34. The persons taking delivery of scalps as provided by section 12 of the principal Act, shall be termed a Receiver.

35. The Boards will in such parts of the district as may be necessary appoint either one or more fit persons as receivers to take delivery of and grant certificates for scalps, and notice, in the form of Schedule 10 hereto, will be given in the local papers of the appointment of these receivers, and of the place, date, and hour at which delivery will be taken.

36. Every person delivering scalps under the Act shall together therewith hand to the Receiver a certificate under the hand of the owner of the land where the scalps were obtained, or in the case of animals killed on the land of a defaulting owner, under the hand of any one whom the Board may appoint in that behalf, to the effect that the animals from which the scalps were taken were killed on the holding and particular part of the holding mentioned in the certificate, and that such holding is in the district in which the scalps are offered for delivery.

37. Upon the receipt of any scalps and the certificate above-mentioned the Receiver will, if he be satisfied that the terms of the certificate have been complied with, and that the offer of the scalps is made in all other respects in accordance with the Act, grant a certificate for them in the form of Schedule D of the principal Act and of Schedule 11 hereto.

38. The Receiver will then and there, if he can obtain the attendance of a Director or of some person duly authorized by the Board in that behalf, destroy the scalps so taken delivery of by fire, and forward to the Secretary a duplicate of the certificate granted for such scalps, and if the presence of a Director (a second Director if the Receiver be a Member of the Board), or of a person authorized as aforesaid, cannot be at once obtained, the Receiver shall slit the near ear of each scalp without cutting off any portion of it from the tip to the root, and the scalp so treated shall, for the purpose of the certificate be deemed to be destroyed, and shall be destroyed as soon as the attendance of a Director or of a person authorized as aforesaid can be obtained.

39. All scalps which are slit in the near ear shall be held and deemed to be scalps for which a certificate has been granted, and shall if offered for delivery be seized as such, and the person offering them shall be prosecuted under section 25 of the principal Act.

#### VII.—ASSESSMENT.

40. Every owner of large stock whatever the number may be shall, between the first and thirty-first days of December in each year make and deliver personally, or transmit by registered letter through the post, to the Inspector of Stock for the district a return in the form of Schedule 12 hereto of the large stock owned by him at the date of making such return.

41. The Secretary shall on or before the first day of March in each year, prepare and submit to the Chairman of the Board an alphabetical list in the form of Schedule 13 hereto of the owners in the district possessed of ten or more head of large stock and of one hundred or more sheep, showing the number of stock possessed by each owner; and the Trustees of every common and reserve shall make a like return of the stock running on such common or reserve.

42. The Chairman will lay the list of owners together with an estimate of the receipts and expenditure of the Board for the then current year before the meeting of the Board to be held in the month of May for making an assessment, and at that meeting the Board will take the following steps namely:—

- (1.) It will fix the scale of prices to be paid as bonuses for the scalps and otherwise for the destruction of noxious animals in its district, in the form of Schedule 14 hereto.
- (2.) It will revise and where necessary correct the list submitted by the Chairman, assess the number of stock possessed by each owner, and notify in the form of Schedule 15 hereto in one or more newspapers circulating in the district, that an assessment has been made. But no teamster, carrier, contractor, or employé, who is not an owner or occupier of land in the district, shall be so assessed.
- (3.) It will consider the estimate prepared by the Chairman of the probable receipts and expenditure of the Board for the current year, and fix and determine the rate of assessment not exceeding threepence for every head of large stock, and one halfpenny for every sheep, which will be required to raise the necessary funds for meeting the expenditure of the Board for the current year.

43. Notice of the rate so made shall be published in the Gazette and in some newspapers circulating in the district in the form of Schedule 16 hereto.

44. The Board shall meet within one month of the publication of the rate in the Gazette and newspapers, and shall fix and determine the amount of assessment payable by each owner in the district.

45. The sums so payable by the several owners shall be entered in a Rate-book, prepared under direction of the Board in the form of Schedule 17 hereto, and notice that the amounts so entered are due shall be forthwith given by the Secretary to the respective owners in the form of Schedule 18 hereto, by being delivered to them personally or left at their usual place of abode, or sent by registered letter through the post.

46. The assessment as fixed and determined by the Board shall be payable on such dates to such persons and at such hours as the Board shall appoint by notice in the local papers.

47. If an owner on whom notice of assessment has been duly served shall neither lodge an appeal nor pay the amount due by him within thirty days of the date of the service of such notice, he shall be deemed a defaulter, and it shall be the duty of the Secretary or Chairman to furnish from time to time to the Board a list of the names of all such defaulters.

48. The Board shall in due course consider such list, and instruct the Chairman or Secretary to enforce payment of all rates so in arrear, and the Chairman or Secretary shall take the necessary proceedings accordingly.

#### VIII.—THE SECRETARY.

49. The Secretary shall, under direction of the Board, collect the rates and other moneys due to the Board, pay all accounts, keep the records and minutes of the Board, receive all letters, conduct the correspondence, call meetings, keep accounts, and assist in all matters connected with the administration of the

Act in the district for which he is appointed. He shall give security to the amount of £100 to the Board for the faithful discharge of his duties.

#### IX.—BANK ACCOUNT.

50. All moneys received by or on account of the Board shall be paid in due course into its Bank account; and all sums amounting to twenty pounds and upwards shall, whether in the hands of the Secretary or Treasurer or of any other member of the Board, forthwith, and not later than seven days, be paid into the Bank account and entered in the Bank-book of the Board when deposited.

#### X.—EXPENDITURE.

51. The expenditure of the Board shall be under its sole control, and all payments sanctioned by it shall be paid by cheque on its Bank account, signed by the Treasurer and Chairman, or some other members of the Board specially authorized in that behalf.

#### XI.—BOOKS AND ACCOUNTS.

52. The Board will cause such books as may be necessary to be provided, in which correct and regular accounts shall be kept by the Secretary of all moneys received and paid.

53. No resolution shall be passed by the Board incurring liability without first ascertaining or estimating its extent; and every liability incurred shall be duly entered in an order-book to be kept for that purpose, which, together with the Bank-book, shall be laid on the table at every meeting.

54. The books and accounts of the Board will at all reasonable times be open for the inspection of any of its members, and of any owner liable to assessment, and extracts may, with the sanction of the Chairman, be made from the books and accounts.

55. The Treasurer will prepare and submit for consideration and revival by the Board, at a meeting to be specially called for that purpose between the 1st and 31st days of January in each year, an account of the receipts and expenditure of the Board for the year preceding, and such account, duly audited, shall be published in the Gazette and in the local paper on or before the 15th day of February next following.

#### XII.—APPEALS.

56. All notices of appeal with respect to any assessment, or with respect to any matter in connection therewith, shall be given to the Chairman of the Board making the assessment in the form of Schedule 19 hereto not later than ten days after the service of the notice of assessment, and the appellant must at the same time hand over to the Chairman the full amount of the assessment claimed, together with a bond in the form of Schedule 20 hereto that he will pay the expense of and prosecute the appeal.

57. In hearing an appeal, the Board may issue summonses directing any person to attend the hearing, and may receive and examine evidence and otherwise conduct such appeal as nearly as may be in the manner in which appeals are by law conducted at Quarter Sessions; and the Board may also assess and tax the costs of any appeal, and the expense of witnesses attending the same, according to the rates allowed to ordinary Crown witnesses attending criminal trials in the Supreme Court, Circuit Courts, and Courts of Quarter Sessions.

58. Having heard and considered an appeal, and the evidence adduced for and against the same, the Board shall give its decision according as it sustains or dismisses the appeal in the form of Schedule 21 or Schedule 22 hereto, and such decision shall be final or conclusive on all parties concerned.

#### XIII.—MISCELLANEOUS.

59. If any person is desirous of keeping hares or other animals other than rabbits which are liable to inflict injury on the owners of land or stock, he will make an application in the form of Schedule 23 hereto to keep the same within an enclosure; and the fence of such enclosure shall be not less than 6 feet high and of such description as the Minister for Mines shall approve.

#### SCHEDULES.

##### SCHEDULE 1.

##### Pastures and Stock Protection Acts.

##### Scale of votes at elections of Directors.

By owners of—	
Not less than 10 and not exceeding 500 head of large stock .....	1 vote
Exceeding 500 and not exceeding 2,000 head of large stock .....	2 votes
Exceeding 2,000 and not exceeding 5,000 head of large stock .....	3 "
Exceeding 5,000 head of large stock .....	4 "
By superintendents of—	
1,000 head of large stock and not exceeding 2,000	1 vote
Exceeding 2,000	3,000 2 votes
" 3,000	5,000 3 "
" 5,000 .....	4 "

SCHEDULE 2.

Pastures and Stock Protection Acts.  
*Notice of time allowed owner for extermination.*  
 188 .

To  
 TAKE notice that the Board of Directors under the abovenamed Act for the District of have decided, in terms of Regulation No. 24, to allow you months from the 1st to exterminate the noxious animals on your run; and that if the work be not completed to the satisfaction of the Board within the time here specified it will exercise the powers conferred upon it by sections 8 and 9 of the Act, and cause these animals to be destroyed at your expense.

Secretary.

SCHEDULE 3.

Pastures and Stock Protection Acts.  
*Notice to owner to destroy noxious animals forthwith.*  
 188 .

To  
 TAKE notice that you are hereby required to take immediate measures to ensure the complete destruction of all noxious animals within the meaning of the "Pastures and Stock Protection Act" on the land of which you are the owner, or occupier, or person in possession or charge, and to stop up any rabbit burrows or holes on such land, and that if you do not within fourteen days from the date of the service of this notice comply with the same the Board will authorize some person in that behalf to enter upon the said land and take such other measures in accordance with the abovenamed Act as may be deemed necessary to ensure the complete destruction of such animals.

Secretary.

SCHEDULE 4.

Pastures and Stock Protection Acts.  
*Authority to enter on land.*

To  
 You are hereby authorized, with or without assistants, to enter upon any land in the sheep district of at any reasonable time during the day and search whether any noxious animals are to be found on such land, and remain thereon for such time as may be reasonably necessary to ascertain whether there are any such animals on the land; but previous to entering on land, as hereby authorized, you shall give the owner thereof notice in writing, should he require it, that you intend to enter thereon. You are further authorized, after notice as above, to take the necessary steps for the destruction of all noxious animals found on such land, subject, however, to your obtaining the approval of the Board, as provided by these Regulations, to the mode in which you propose to effect the destruction of these animals.

Dated at this day of 188 .  
 Chairman of the Board.

SCHEDULE 5.

Pastures and Stock Protection Acts.  
*Notice of intention to destroy fences.*

To  
 TAKE notice that I have obtained the sanction of the Board of Directors for the District of to the fences between and on account of their affording a harbour for noxious animals; and that it is my intention to commence to the same upon the day of at o'clock.

Dated at this day of 188 .

SCHEDULE 6.

Pastures and Stock Protection Acts.  
*Claim on defaulting owner for repayment of expenses.*

To  
 TAKE notice that there is now due and payable to the Board of Directors under the abovenamed Act for the district of in respect of the cost and expense of the destruction of noxious animals upon the land mentioned in the Schedule below, of which you are the owner, the sum of £ and that unless this amount, together with the expense of this notice, be not paid to the Secretary or Treasurer of the Board within fourteen days from the date of its service, proceedings will be taken against you for the recovery of the same in terms of section 9 of the abovenamed Act.

Dated at this day of 188 .  
 Secretary.

Schedule referred to above.

Description of the land.	Name and address of the owner.	Amount due.

SCHEDULE 7.

Pastures and Stock Protection Acts.  
 To the Honorable the Minister for Mines.

WE the undersigned owners, liable to assessment under the abovenamed Acts, have the honor to represent that of an owner, within the meaning of the said Acts, of land in the sheep district of is neglecting to destroy the noxious animals on his land, and that the Board for the district has failed to promote the destruction of such animals; and we would respectfully request that you will be pleased to issue such instructions as may be necessary to compel him to take immediate measures to ensure the complete destruction of all noxious animals on his land.

SCHEDULE 8.

Pastures and Stock Protection Acts.  
*Joint notice to defaulting Board to destroy.*

To the Board of Directors for the District of  
 TAKE notice that the Boards of Directors under the abovenamed Act for the Districts of and are of opinion that there are noxious animals in your district, with respect to which your Board is neglecting to carry out the provisions of that Act; and that we, the Chairmen of and as representing these Boards, do hereby, under section 10 of that Act, require your Board forthwith to take proper measures to insure the complete destruction of all such animals in your district.

Dated this day of 188 .  
 Chairman of the Board of  
 of of

SCHEDULE 9.

Pastures and Stock Protection Acts.  
*Petition for dismemberment of defaulting district.*

To His Excellency Governor and Commander-in-Chief of the Colony of New South Wales and its dependencies.

The humble Petition of the Boards of Directors under the abovenamed Act for the districts of and in the Colony of New South Wales, sheweth:—

That your Petitioners having had reason to believe that the Board of Directors for the district of which adjoins your Petitioners' districts are neglecting to carry out the provisions of the Act with respect to the noxious animals in the first-mentioned district, your Petitioners, in accordance with section 10 of the Act, published a joint notice in the form of Schedule 9 hereto in the Government Gazette of the copy of which is forwarded herewith, and served a copy of this on the defaulting Board on the ; that, notwithstanding such notice, the Board in default continued and still continues to neglect to carry out the provisions of the Act with regard to the destruction of the noxious animals in its district; and that a period of has expired since the publication of the notice referred to in the Gazette.

Your Petitioners therefore humbly pray that your Excellency will be pleased, in accordance with the provisions of section 10 of the Act, to annex the said district of to the districts joining in this Petition as your Excellency may see fit, and your Petitioners will ever pray, &c.

Dated at this day of 188 .

To the Honorable \_\_\_\_\_ The Minister for Mines.  
I \_\_\_\_\_ of \_\_\_\_\_ have the honor to apply under the abovenamed Acts for permission to keep \_\_\_\_\_ on my land, at \_\_\_\_\_ which I will enclose with a fence and provide gates as follows, namely—  
Applicant.

1882.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## IMPORTED STOCK ACT OF 1871.

(PROCLAMATION PROHIBITING THE INTRODUCTION OF STOCK FROM ALL PLACES OUTSIDE THE AUSTRALIAN COLONIES FOR TWO YEARS.)

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.**[Laid upon the Table of this House, as required by section 13 of the abovenamed Act.]*

NEW SOUTH WALES, to wit.

Proclamation by His Excellency The Right Honorable Lord AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief of the Colony of (L.S.) New South Wales and its Dependencies.

AUGUSTUS LOFTUS,  
Governor.

WHEREAS by section ten of an Act of the Parliament of New South Wales passed in the thirty-fifth year of the reign of Her present Majesty, intituled "The Imported Stock Act of 1871," and numbered six, the Governor in Council is empowered, by proclamation in the Government Gazette, to restrict or absolutely prohibit for any specified time the importation or introduction of any horned cattle or sheep, fodder, or fittings from any other colony or country in which there is reason to believe that any infectious or contagious disease in stock exists: And whereas by proclamation, dated the fourth day of July, 1878, it was declared that cattle and sheep might be imported or introduced from Great Britain, Ireland, Canada, and the United States of America under certain conditions and regulations therein set forth: And whereas foot and mouth disease is known to be prevalent in Great Britain: Now, therefore, I, Lord AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the Executive Council, do, except as regards horned cattle or sheep which shall have been shipped from London previous to the notification in the London Gazette of the issue of this Proclamation, hereby revoke all former proclamations under the abovenamed Act, and absolutely prohibit for a period of two years from this date the importation of all horned cattle or sheep, fodder, or fittings, from any colony or country other than the colonies of Victoria, South Australia, Queensland, Western Australia, Tasmania, and New Zealand.

Given under my Hand and Seal, at Government House, Sydney, this eleventh day of January, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
ARTHUR RENWICK.

GOD SAVE THE QUEEN!

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## WATER SUPPLY.

(WORKS FOR SYDNEY AND SUBURBS.)

*Ordered by the Legislative Assembly to be printed, 6 September, 1882.*

## QUESTION FOR TUESDAY, 29TH AUGUST, 1882.

I. MR. WITHERS *to ask* THE SECRETARY FOR PUBLIC WORKS,—

- (1.) The names of all tenderers for Prospect Dam, and the respective amounts of such tenders, and office quantities of the work to be done in the construction of the Dam?
- (2.) What is the estimated cost for completing the whole of the Dam and outlet works, exclusive of the above tender?
- (3.) The number and approximate cost of iron aqueduct or piping required on the above works from Prospect to Sydney?
- (4.) The probable cost of the Nepean and Cataract Tunnels when completed?
- (5.) The dimensions and length of the iron aqueduct required for the delivery of 50,000,000 gallons of water at the end of the open conduit from Prospect?
- (6.) The estimate of the small reservoir near Prospect, from which the Government propose to supply Sydney pending the completion of the Prospect Dam?
- (7.) Dimensions and probable cost per mile of the iron piping between the aqueduct on works Prospect to Sydney?
- (8.) The length and estimated cost of the necessary flume or pipe to connect the small reservoir with the open conduit this side of Prospect?

*Names and amounts.*

(1.) John Robb, £456,939 16s. 6d.; C. & E. Millar, £559,681 13s.; Wm. Cain & Co., £542,277 6s. 8d.; J. Stewart & Co., £481,960 14s. 2d.; Monie & Co., £473,911 17s. 4d.; Walker & Co., £565,234 2s. 8d.; George Blunt, £569,000 3s. 6d.; Rowe & Smith, £575,677 13s. 8d.; A. & R. Amos, £504,610 0s. 7d.; Nicol & Co., £768,661 5s. 11d.; John Young, £739,040 15s.; I. J. Waddington, £464,032 10s. 3d.; J. M'Guigan, £437,778 7s. 6d.; J. M. Moxon, £827,134 17s.

*Quantities.*

Clearing site, 1,610 acres; excavations, 99,640 cubic yards; filling, 2,316,500 cubic yards; puddle, 275,450 cubic yards; soiling slopes, 98,900 square yards; soiling and sodding, 24,100 square yards; rubble stone, 4,600 cubic yards; broken stone, 27,700 square yards; pitching, 84,700 square yards; fence-wall, 2,500 yards; handrail, 2,500 yards; metalling, 8,800 cubic yards; blinding, 38,700 square yards; curbstone, 6,000 yards; screenings, 1,700 square yards; concrete, 5,060 cubic yards; dressed masonry, 266 cubic yards; rubble masonry, 664 cubic yards; rubbing, 353 square yards; brickwork, 3,213 cubic yards; pitching in cement, 3,120 square yards; pitching laid dry, 3,000 square yards; rendering, 1 inch thick, 520 square yards; rendering,  $\frac{3}{4}$  inch thick, 141 square yards; cement skirting, 44 yards; 3-inch flooring boards, 6 squares; 2-inch roofing, 6 squares;  $\frac{3}{4}$  T. & G. pine, 5 squares; hardwood in scantling, 22 squares;  $2\frac{1}{2}$  hardwood boards, 3 squares; hardwood, 2 inches thick, 7 squares; wrought-iron, 420 cwt.; cast-iron, 76 $\frac{1}{2}$  cwt.; lead, 50 cwt.; double doors, 2 pairs, 5 feet  $\times$  3 feet; windows, 7, 5 feet  $\times$  1 foot 9 inches; windows, 7; trap-doors, 2; ventilator gratings, 14; earthenware pipes, 18-inch, 170 yards; earthenware pipes, 9-inch, 134 yards; earthenware pipes, 4-inch, 100 yards; painting, 750 square yards; tarring, 50 squares; coal-tar varnish, 14 $\frac{1}{2}$  squares; laying and jointing, 48-inch & 36-inch pipes flanged, 1,164 yards; laying and jointing, 48-inch spigot pipes, 342 yards; laying and jointing, 36-inch spigot pipes, 3,300 yards; laying and jointing, 10-inch spigot pipes, 16 yards.

- (2.) £14,660.
- (3.) Cannot be yet furnished, the detailed designs not being settled upon.
- (4.) Nepean Tunnel, £71,557; Cataract tunnel, £29,628.
- (5.) The answer given to query 3 will apply in this case.
- (6.) Will be supplied from the canal.
- (7.) The answer given to query 3 will also apply in this case.
- (8.) Length, 3,330 lineal yards; cost, £10,312. Laying these pipes is included in the Prospect Reservoir Contract.

1414

1882.

## NEW SOUTH WALES.

## LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(LANDS RESUMED FOR WATER SUPPLY TO CITY OF SYDNEY AND SUBURBS.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honor-  
to wit. } able Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight  
Grand Cross of the Most Honorable  
Order of the Bath, a Member of Her  
(L.S.) Majesty's Most Honorable Privy Council,  
AUGUSTUS LOFTUS, Governor and Commander-in-Chief of  
the Colony of New South Wales and  
its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879;" and whereas the lands, hereinafter described, are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District, wherein the said lands are situated, declare, that the lands, hereinafter described, have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent, further, that the legal estate therein, together with all powers, incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare, that the following is the description of the lands, hereinbefore referred to, that is to say:—

All that piece or parcel of land, situate in the parish of Menangle, county of Cumberland, and Colony of New South Wales, being part of a grant of 50 acres to Jas. Dering: Commencing at the north-east corner of a grant of 200 acres to G. M. Woodhouse; bounded thence by part of A Syms' 80 acres and J. Blackman's 50 acres, east 49 chains 85 links to the

Appin road; thence by that road southerly 32 links; thence by a line west 49 chains 85 links to the east boundary of G. M. Woodhouse's 200 acres; thence by part of that boundary north 32 links to the point of commencement,—containing 1 acre 2 roods 15 perches, said to be in the possession and occupation of Mrs. Riach.

All that piece or parcel of land, situate in the parish of Menangle, county of Cumberland, and Colony of New South Wales, being part of a grant of 200 acres to G. M. Woodhouse: Commencing at the intersection of the north boundary of said grant with the eastern boundary of land resumed for the purposes of the Sydney Water Supply, as notified in the Government Gazette of the 13th of May, 1881, No. 194; and bounded thence by the said eastern boundary of land previously resumed as aforesaid, bearing south 4 degrees 8 minutes west about 4 chains 77 links; thence by 2 chains 51 links of a curve of 8 chains 27 links radius, tangential to the last described line, the chord of which bears south 12 degrees 50 minutes west about 2 chains 50 links; thence by a line bearing south 21 degrees 33 minutes west 1½ link; thence by 3 chains 61 links of a curve of 8 chains radius, tangential to the last described line, the chord of which bears south 8 degrees 37 minutes west about 3 chains 58 links; thence by a line bearing south 4 degrees 19 minutes east about 3 chains 12 links; thence by 3 chains 56 links of a curve of 5 chains radius, tangential to the last described line, the chord of which bears south 24 degrees 44 minutes east about 3 chains 48 links; thence by a line bearing south 45 degrees 9 minutes east about 1 chain 68 links; thence by 6 chains 24 links of a curve of 9 chains radius, tangential to the last described line, the chord of which bears south 25 degrees 18 minutes east about 6 chains 12 links; thence by a line bearing south 5 degrees 26 minutes east about 2 chains 12 links to the Menangle Creek, being the boundary between G. M. Woodhouse's 200 acres and R. Withers' 400 acres; thence by that creek north-easterly about 22 chains 50 links; thence by part of the west boundary of Jas. Bradford's 50 acres and the west boundary of Jas. Derings 50 acres north 20 chains to the north boundary of Woodhouse's 200 acres aforesaid; thence by part of that boundary west 26 chains 70 links, to the point of commencement,—containing 64 acres, and said to be in the possession and occupation of M. J. Vardy.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-third day of September, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } SIR AUGUSTUS WILLIAM FREDERICK

(L.S.)  
AUGUSTUS LOFTUS, } Most Honorable Privy Council, Governor  
Governor. } and Commander-in-Chief of the Colony  
of New South Wales and its Depen-  
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette and in a newspaper, that is to say in the "Sydney Morning Herald," circulated in the police district wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs to the intent that, upon the publication of this notification in the Gazette the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purposes of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other encumbrances whatsoever, and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Minto, county of Cumberland, and Colony of New South Wales, being part of a grant of 410 acres to J. Drummond: Commencing on the south-western boundary of that grant at a point bearing south 60 degrees east and distant 21 chains 30 links from its south-western corner; and bounded thence by a line bearing north 12 degrees 33 minutes west 3 chains 33 links; thence north 23 degrees 10 minutes west 3 chains 33 links; thence north 33 degrees 47 minutes west 3 chains 33 links; thence north 44 degrees 23 minutes west 3 chains 33 links; thence north 49 degrees 42 minutes west 11 chains 94 links; thence north 33 degrees 21 minutes west 76 links to the Cowpasture Road; thence by that road north 17 degrees 24 minutes east 4 chains 14 links; thence south 25 degrees 11 minutes east 1 chain 70 links; thence south 41 degrees 32 minutes east 2 chains 56 links; thence south 49 degrees 42 minutes east 12 chains 15 links; thence south 39 degrees 5 minutes east 3 chains 88 links; thence south 28 degrees 23 minutes east 3 chains 88 links; thence south 17 degrees 52 minutes east 3 chains 88 links; thence south 7 degrees 15 minutes east 4 chains 21 links; thence north 60 degrees west 3 chains 79 links, to the point of commencement, containing 9 acres and 37 perches, and said to be in the possession and occupation of Joseph Moore.

1st. All that piece or parcel of land situate in the parish of Cook, county of Cumberland, and Colony of New South Wales, being part of a grant of 3,000 acres to A. Riley: Commencing at the north-easternmost corner of the said grant; and bounded thence by part of the eastern boundary of the same, being also the western side of the Cowpasture Road south-westerly 26 chains 51 links; thence by a line bearing north 0 degrees 22 minutes west 22 chains 88 links; thence by a line bearing north 65 degrees west 3 chains 79 links to the northern boundary of the said grant being also the southern side of the Bringelly Road; and bounded thence by part of that boundary north 87 degrees 15 minutes east 12 chains 42 links, to the point of commencement, containing 11 acres 1 rood and 9 perches,—and said to be in the possession and occupation of the executors of the late Wm. Moore.

2nd. All that piece or parcel of land situate in the parish of Cabramatta, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to John Jamieson: Commencing on the boundary line dividing that grant from a grant of 550 acres to Matthew Pear, at a point bearing south 50 degrees east and distant 26 chains 48 links from the western corner of the first-mentioned grant; and bounded thence by a line bearing north 6 degrees 13 minutes east 2 chains 85 links; thence north 13 degrees 23 minutes west 1 chain 33 links; thence north 52 degrees 36 minutes west 1 chain 33 links; thence north 72 degrees 13 minutes west 1 chain 58 links; thence north 40 degrees 16 minutes west 5 chains 65 links;

thence north 57 degrees 41 minutes west 2 chains 39 links; thence north 75 degrees 5 minutes west 2 chains 67 links; thence north 45 degrees 18 minutes west 2 chains 12 links; thence north 15 degrees 30 minutes west 2 chains 12 links; thence north 14 degrees 18 minutes east 2 chains 12 links; thence north 44 degrees 5 minutes east 8 chains 18 links; thence north 45 degrees 55 minutes west 1 chain; thence north 44 degrees 5 minutes east 5 chains 56 links; thence north 27 degrees 41 minutes east 2 chains 26 links; thence north 5 degrees 6 minutes west 2 chains 26 links; thence north 21 degrees 30 minutes west 4 chains 2 links to T. L. Peate's north-western boundary; thence by that boundary north 40 degrees east 3 chains 48 links; thence south 21 degrees 30 minutes east 7 chains 64 links; thence south 11 degrees 18 minutes west 4 chains 12 links; thence south 44 degrees 5 minutes west 8 chains 67 links; thence south 45 degrees 55 minutes east 1 chain; thence south 44 degrees 5 minutes west 7 chains 14 links; thence south 15 degrees 30 minutes east 1 chain 70 links; thence south 75 degrees 5 minutes east 3 chains 80 links; thence south 40 degrees 16 minutes east 6 chains 42 links; thence south 56 degrees 14 minutes east 1 chain 9 links; thence south 72 degrees 13 minutes east 1 chain 58 links; thence south 32 degrees 59 minutes east 2 chains 85 links; thence south 6 degrees 13 minutes west 6 chains 27 links; thence north 50 degrees west 3 chains 64 links, to the point of commencement, containing 14 acres 3 roods 21 perches,—and said to be in the possession and occupation of Thomas L. Peate.

3rd. All that piece or parcel of land situate in the parish of Cabramatta, county of Cumberland, and Colony of New South Wales, being part of a grant of 550 acres to Matthew Pear: Commencing on the boundary line dividing the aforesaid grant from a grant of 700 acres to John Jamieson, at a point bearing south 50 degrees east and distant 30 chains 12 links from the western corner of the last-mentioned grant; and bounded thence by a line bearing south 6 degrees 13 minutes west 38 links; thence south 32 degrees 22 minutes west 2 chains 45 links; thence south 58 degrees 30 minutes west 1 chain 67 links; thence south 39 degrees 13 minutes west 1 chain 32 links; thence south 39 minutes west 1 chain 32 links; thence south 18 degrees 38 minutes east 4 chains 71 links; thence south 21 degrees 20 minutes west 4 chains 77 links; thence south 13 degrees 16 minutes west 2 chains 24 links; thence south 2 degrees 51 minutes east 2 chains 24 links; thence south 10 degrees 55 minutes east 1 chain 80 links; thence north 79 degrees 5 minutes west 1 chain; thence south 10 degrees 55 minutes east 2 chains 20 links; thence south 11 degrees 46 minutes west 4 chains 64 links; thence south 1 degree 3 minutes east 1 chain 77 links; thence south 26 degrees 41 minutes east 1 chain 77 links; thence south 39 degrees 30 minutes east 1 chain 59 links; thence south 54 degrees 49 minutes east 1 chain 85 links; thence south 85 degrees 28 minutes east 1 chain 85 links; thence north 79 degrees 12 minutes east 3 chains 80 links; thence south 50 degrees 50 minutes east 3 chains 73 links; thence south 52 minutes east 11 chains 32 links; thence south 18 degrees 13 minutes east 1 chain 79 links; thence south 52 degrees 55 minutes east 1 chain 79 links; thence south 70 degrees 16 minutes east 2 chains 17 links; thence south 34 degrees 16 minutes east 2 chains 61 links; thence south 1 degree 44 minutes west 2 chains 62 links; thence south 21 degrees 16 minutes east 1 chain 56 links; thence south 44 degrees 16 minutes east 5 chains; thence by the northern boundary of the Bringelly Road, bearing south 87 degrees 15 minutes west 4 chains 2 links; thence by a line bearing north 44 degrees 16 minutes west 3 chains 27 links; thence north 21 degrees 16 minutes west 2 chains 3 links; thence north 1 degree 44 minutes east 2 chains 33 links; thence north 34 degrees 16 minutes west 1 chain 17 links; thence north 70 degrees 16 minutes west 2 chains 74 links; thence north 35 degrees 34 minutes west 3 chains 76 links; thence north 52 minutes west 11 chains 33 links; thence north 50 degrees 50 minutes west 1 chain 53 links; thence south 79 degrees 12 minutes west 3 chains 71 links; thence north 70 degrees 9 minutes west 3 chains 55 links; thence north 39 degrees 30 minutes west 4 chains 95 links; thence north 13 degrees 52 minutes west 3 chains 18 links; thence north 11 degrees 46 minutes east 4 chains 3 links; thence north 25 minutes east 3 chains 14 links; thence south 79 degrees 5 minutes east 1 chain; thence north 10 degrees 55 minutes west 3 chains 36 links; thence north 5 degrees 12 minutes east 3 chains 12 links; thence north 21 degrees 20 minutes east 4 chains 15 links; thence north 1 degree 21 minutes east 2 chains 4 links; thence north 18 degrees 38 minutes west 4 chains 29 links; thence north 19 degrees 56 minutes east 3 chains 48 links; thence north 58 degrees 30 minutes east 2 chains 18 links; thence north 32 degrees 22 minutes east 1 chain 76 links; thence north 6 degrees 13 minutes east 1 chain 15 links; thence by the aforesaid boundary line dividing a grant of 550 acres to Matthew Pear from a grant of 700 acres to John Jamieson, being a line bearing south 50 degrees east 3 chains 64 links, to the point of commencement, containing 26 acres and 3 roods,—and said to be in the possession of R. R. Terry, leased to L. Buggy, and occupied by J. Clavern. Also all that piece or parcel of land, situate in the parish, county, and colony aforesaid: Commencing on the north-western boundary of a grant of 700 acres to John Jamieson, at

a point bearing north 40 degrees east and distant 26 chains 6 links from its western corner; and bounded thence by a line bearing north 21 degrees 30 minutes west 20 chains 22 links; thence north 35 degrees 53 minutes west 1 chain 98 links; thence north 50 degrees 17 minutes west 1 chain 45 links; thence north 25 degrees 49 minutes west 2 chains 61 links; thence north 1 degree 23 minutes west 2 chains 61 links; thence north 23 degrees 6 minutes east 2 chains 61 links; thence north 47 degrees 34 minutes east 1 chain 30 links; thence south 42 degrees 26 minutes east 1 chain; thence north 47 degrees 34 minutes east 16 chains 38 links; thence north 42 degrees 26 minutes west 1 chain; thence north 41 degrees 18 minutes east 6 chains 11 links; thence north 28 degrees 47 minutes east 6 chains 11 links; thence north 22 degrees 32 minutes east 25 chains 48 links; thence north 31 degrees 39 minutes east 2 chains 29 links; thence north 13 degrees 36 minutes east 2 chains 48 links; thence north 22 degrees 30 minutes west 2 chains 48 links; thence north 40 degrees 33 minutes west 7 chains 59 links; thence north 19 degrees 23 minutes west 4 chains 48 links; thence north 1 degree 46 minutes east 4 chains 53 links; thence north 3 degrees 20 minutes west 1 chain 42 links; thence north 8 degrees 26 minutes west 13 chains 27 links; thence north 8 degrees 13 minutes east 3 chains 52 links; thence north 24 degrees 52 minutes east 3 chains 52 links; thence north 41 degrees 31 minutes east 3 chains 52 links; thence north 58 degrees 10 minutes east 4 chains 20 links; thence north 38 degrees 44 minutes east 1 chain 33 links; thence north 7 minutes west 1 chain 33 links; thence north 19 degrees 33 minutes west 8 chains 76 links; thence by the boundary line dividing a grant of 400 acres to Edward Gray, from a grant of 2,000 acres, to Barron Field, bearing east 3 chains 14 links; thence south 19 degrees 33 minutes east 9 chains 64 links; thence south 19 degrees 18 minutes west 3 chains 52 links; thence south 58 degrees 10 minutes west 4 chains 20 links; thence south 49 degrees 50 minutes west 2 chains 61 links; thence south 33 degrees 11 minutes west 2 chains 61 links; thence south 16 degrees 32 minutes west 2 chains 61 links; thence south 7 minutes east 2 chains 61 links; thence south 8 degrees 26 minutes east 12 chains 50 links; thence south 1 degree 46 minutes west 3 chains 27 links; thence south 8 degrees 48 minutes east 3 chains 30 links; thence south 29 degrees 58 minutes east 3 chains 30 links; thence south 40 degrees 33 minutes east 7 chains 64 links; thence south 4 degrees 27 minutes east 4 chains 58 links; thence south 31 degrees 39 minutes west 2 chains 82 links; thence south 27 degrees 5 minutes west 3 chains 8 links; thence south 22 degrees 32 minutes west 33 chains 8 links; thence south 47 degrees 34 minutes west 23 chains 32 links; thence south 25 degrees 49 minutes east 2 chains 48 links; thence south 50 degrees 17 minutes east 1 chain 95 links; thence south 21 degrees 30 minutes east 20 chains 47 links to the aforesaid north-western boundary of a grant of 700 acres to John Jamison; thence by that boundary bearing south 40 degrees west 3 chains 48 links, to the point of commencement, containing 43 acres and 36 perches,—and said to be in the possession of R. R. Terry, leased to L. Buggy; 20 acres 2 roods 21 perches are occupied by Mrs. Cary, and 22 acres 2 roods 15 perches occupied by L. Buggy.

4th. All that piece or parcel of land situate in the parishes of Cabramatta and Melville, county of Cumberland, and Colony of New South Wales, being part of a grant of 2,000 acres to Barron Field, 2,000 acres to J. Wylde, and 1,120 acres to T. Wylde: Commencing on the boundary line dividing the aforesaid grant from a grant of 400 acres to Edward Gray, at a point bearing east and distant 47 chains 36 links from the north-west corner of the last-mentioned grant; and bounded thence by a line bearing north 19 degrees 33 minutes west 1 chain 48 links; thence north 5 degrees 28 minutes east 2 chains 21 links; thence north 15 degrees 58 minutes west 1 chain 45 links; thence north 58 degrees 50 minutes west 1 chain 45 links; thence north 80 degrees 16 minutes west 9 chains 50 links; thence north 37 degrees west 3 chains 97 links; thence north 6 degrees 15 minutes east 2 chains 79 links; thence north 11 degrees 4 minutes west 1 chain 79 links; thence north 45 degrees 43 minutes west 1 chain 79 links; thence north 63 degrees 3 minutes west 7 chains 1 link; thence north 41 degrees 35 minutes west 2 chains 61 links; thence north 66 degrees 48 minutes west 2 chains 56 links; thence south 87 degrees 59 minutes west 4 chains 48 links; thence north 63 degrees 18 minutes west 5 chains 12 links; thence north 34 degrees 35 minutes west 8 chains 52 links; thence south 55 degrees 24 minutes west 1 chain 81 links; thence south 24 degrees 35 minutes west 4 chains 91 links; thence north 55 degrees 24 minutes east 3 chains 78 links; thence north 11 degrees 53 minutes west 1 chain 70 links; thence north 44 degrees 40 minutes west 1 chain 70 links; thence north 61 degrees 4 minutes west 3 chains 95 links; thence north 40 degrees west 2 chains 81 links; thence north 2 degrees 10 minutes east 2 chains 81 links; thence north 65 degrees 24 minutes east 1 chain 65 links; thence north 18 degrees 52 minutes east 1 chain 6 links; thence north 27 degrees 41 minutes west 9 chains; thence north 11 degrees 34 minutes west 2 chains 15 links; thence north 20 degrees 40 minutes east 2

chains 15 links; thence north 52 degrees 53 minutes east 2 chains 15 links; thence north 69 degrees east 3 chains 45 links; thence north 38 degrees 44 minutes east 1 chain; thence north 21 degrees 48 minutes west 1 chain; thence north 52 degrees 4 minutes west 5 chains 3 links; thence north 32 degrees 37 minutes west 2 chains 60 links; thence north 6 degrees 17 minutes east 2 chains 60 links; thence north 45 degrees 11 minutes east 2 chains 60 links; thence north 64 degrees 38 minutes east 3 chains 17 links; thence north 60 degrees 14 minutes east 0 chains 98 links; thence north 21 degrees 28 minutes east 98 links; thence north 7 degrees 4 minutes east 1 chain 70 links; thence north 4 degrees 49 minutes west 1 chain 24 links; thence north 23 degrees 36 minutes west 1 chain 24 links; thence north 40 degrees 30 minutes west 1 chain 76 links; thence north 18 degrees 48 minutes west 2 chains 30 links; thence north 2 degrees 54 minutes east 5 chains 29 links; thence north 40 degrees 18 minutes east 2 chains 71 links; thence north 21 degrees 17 minutes east 65 links; thence north 16 degrees 45 minutes west 65 links; thence north 35 degrees 46 minutes west 1 chain 92 links; thence north 8 degrees 14 minutes west 3 chains 42 links; thence north 19 degrees 17 minutes east 3 chains 44 links; thence north 4 degrees 51 minutes east 1 chain 50 links; thence north 24 degrees 2 minutes west 1 chain 50 links; thence north 38 degrees 29 minutes west 7 chains 9 links; thence north 15 degrees 41 minutes west 7 chains 95 links; thence north 3 degrees 54 minutes east 5 chains 12 links; thence north 27 degrees 5 minutes east 2 chains 86 links; thence south 62 degrees 45 minutes east 1 chain; thence north 27 degrees 5 minutes east 6 chains 41 links; thence north 61 degrees 29 minutes east 3 chains 69 links; thence south 84 degrees 7 minutes east 2 chains 15 links; thence north 82 degrees 38 minutes east 1 chain 83 links; thence north 56 degrees 8 minutes east 1 chain 83 links; thence north 42 degrees 53 minutes east 5 chains 15 links; thence south 47 degrees 7 minutes east 50 links; thence north 42 degrees 53 minutes east 32 chains 51 links; thence north 47 degrees 7 minutes west 1 chain 7 links; thence north 42 degrees 53 minutes east 3 chains 15 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence north 42 degrees 53 minutes east 32 chains 45 links; thence north 47 degrees 7 minutes west 1 chain 7 links; thence north 42 degrees 53 minutes east 3 chains 15 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence north 42 degrees 53 minutes east 21 chains 85 links, crossing road leading from Liverpool to Penrith; thence north 47 degrees 7 minutes west 1 chain 7 links; thence north 42 degrees 53 minutes east 3 chains 15 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence north 42 degrees 53 minutes east 30 chains 18 links; thence north 47 degrees 7 minutes west 1 chain 7 links; thence north 42 degrees 53 minutes east 3 chains 15 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence north 42 degrees 53 minutes east 9 chains 21 links to the west boundary of E. Dengate's property, being also the west boundary of a grant of 269 acres to S. Lord; thence by that boundary south 1 chain 38 links; thence south 42 degrees 53 minutes west 8 chains 27 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence south 42 degrees 53 minutes west 3 chains 15 links; thence north 47 degrees 7 minutes west 1 chain 7 links; thence south 42 degrees 53 minutes west 30 chains 18 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence south 42 degrees 53 minutes east 1 chain 7 links; thence south 42 degrees 53 minutes west 21 chains 85 links, crossing road leading from Liverpool to Penrith; thence south 47 degrees 7 minutes east 1 chain 7 links; thence south 42 degrees 53 minutes west 32 chains 45 links; thence south 47 degrees 7 minutes east 1 chain 7 links; thence south 42 degrees 53 minutes west 3 chains 15 links; thence north 47 degrees 7 minutes west 1 chain 7 links; thence south 42 degrees 53 minutes west 14 chains 18 links; thence north 47 degrees 7 minutes west 4 chains 12 links; thence south 27 degrees 5 minutes west 4 chains 56 links; thence south 21 degrees 17 minutes west 2 chains 1 link; thence south 9 degrees 41 minutes west 2 chains 1 link; thence south 3 degrees 54 minutes west 18 links; thence south 1 degree east 1 chain 36 links; thence south 10 degrees 47 minutes east 1 chain 36 links; thence south 15 degrees 41 minutes east 3 chains 45 links; thence south 21 degrees 22 minutes east 1 chain 59 links; thence south 32 degrees 46 minutes east 1 chain 59 links; thence south 38 degrees 29 minutes east 6 chains 47 links; thence south 9 degrees 35 minutes east 3 chains 60 links; thence north 70 degrees 43 minutes west 1 chain 2 links; thence south 19 degrees 17 minutes west 3 chains 28 links; thence south 5 degrees 31 minutes west 1 chain 89 links; thence south 22 degrees east 1 chain 89 links; thence south 35 degrees 46 minutes east 1 chain 59 links; thence south 2 degrees 16 minutes west 2 chains 76 links; thence south 40 degrees 18 minutes west 2 chains 6 links; thence south 30 degrees 57 minutes west 97 links; thence south 12 degrees 15 minutes west 97

links; thence south 2 degrees 54 minutes west 2 chains 10 links; thence south 7 degrees 57 minutes east 1 chain 12 links; thence south 29 degrees 39 minutes east 1 chain 12 links; thence south 40 degrees 30 minutes east 1 chain 86 links; thence south 16 degrees 43 minutes east 2 chains 54 links; thence south 7 degrees 4 minutes west 4 chains 24 links; thence south 35 degrees 51 minutes west 2 chains 57 links; thence south 64 degrees 38 minutes west 3 chains 15 links; thence south 35 degrees 27 minutes west 1 chain 95 links; thence south 22 degrees 54 minutes east 1 chain 95 links; thence south 52 degrees 4 minutes east 4 chains 80 links; thence south 31 degrees 53 minutes east 2 chains 15 links; thence south 8 degrees 28 minutes west 2 chains 15 links; thence south 48 degrees 50 minutes west 2 chains 15 links; thence south 69 degrees west 3 chains 45 links; thence south 44 degrees 49 minutes west 1 chain 63 links; thence south 3 degrees 32 minutes east 1 chain 63 links; thence south 27 degrees 41 minutes east 9 chains 53 links; thence south 18 degrees 52 minutes west 3 chains 21 links; thence south 65 degrees 24 minutes west 1 chain 85 links; thence south 33 degrees 47 minutes west 2 chains 9 links; thence south 29 degrees 27 minutes east 2 chains 9 links; thence south 61 degrees 4 minutes east 4 chains 31 links; thence south 28 degrees 17 minutes east 3 chains 54 links; thence south 4 degrees 31 minutes west 2 chains 36 links; thence south 5 degrees 15 minutes east 1 chain 35 links; thence south 24 degrees 49 minutes east 1 chain 35 links; thence south 34 degrees 35 minutes east 4 chains 74 links; thence south 48 degrees 57 minutes east 3 chains 47 links; thence south 77 degrees 39 minutes east 3 chains 47 links; thence north 87 degrees 59 minutes east 3 chains 26 links; thence south 66 degrees 48 minutes east 2 chains 67 links; thence south 41 degrees 35 minutes east 2 chains 5 links; thence south 52 degrees 19 minutes east 2 chains 61 links; thence south 63 degrees 3 minutes east 6 chains 99 links; thence south 28 degrees 24 minutes east 3 chains 73 links; thence south 6 degrees 15 minutes west 2 chains 55 links; thence south 15 degrees 22 minutes east 1 chain 47 links; thence south 58 degrees 38 minutes east 1 chain 47 links; thence south 80 degrees 16 minutes east 9 chains 47 links; thence south 37 degrees 24 minutes east 3 chains 91 links; thence south 5 degrees 27 minutes west 1 chain 95 links; thence south 7 degrees 3 minutes east 3 chains 1 link to the boundary line dividing a grant of 2,000 acres to Barron Field, from a grant of 400 acres to Edward Gray; thence by that boundary west 3 chains 14 links, to the point of commencement, containing 78 acres 1 rood 29 perches,—and said to be in the possession of J. Garner; 39 acres 0 roods 16 perches,—said to be occupied by E. Vickery; 32 acres 0 roods 17 perches,—said to be occupied by T. Briggs; 7 acres 0 roods 36 perches,—said to be occupied by A. M'Ninn.

5th. All that piece or parcel of land situate in the parish of Melville, county of Cumberland, and Colony of New South Wales, being part of grants of 296 acres to Simeon Lord and 100 acres to Josh. Sherran: Commencing on the boundary line dividing the aforesaid grants from a grant of 1,120 acres to Thomas Wylde, at a point bearing south and distant 10 chains 15 links from the south-west corner of the aforesaid grant of 100 acres to Josh. Sherran; and bounded thence by a line bearing north 42 degrees 53 minutes east 19 chains 51 links; thence north 47 degrees 7 minutes west 50 links; thence north 42 degrees 53 minutes east 26 chains 51 links; thence south 47 degrees 7 minutes east 50 links; thence north 42 degrees 53 minutes east 2 chains 57 links to the north boundary of the said grant of 100 acres to Josh. Sherran; thence by that boundary east 1 chain 38 links; thence south 42 degrees 53 minutes west 3 chains 54 links; thence south 47 degrees 7 minutes east 2 chains; thence south 42 degrees 53 minutes west 26 chains 51 links; thence north 47 degrees 7 minutes west 2 chains; thence south 42 degrees 53 minutes west 20 chains 15 links to the boundary line dividing the grants to John Wylde and Simeon Lord aforesaid; thence by that boundary north 1 chain 38 links, to the point of commencement,—containing 8 acres 3 roods 24 perches, and said to be in the possession and occupation of E. Dengate.

6th. All that piece or parcel of land situate in the parish of Melville, county of Cumberland, and Colony of New South Wales, being part of grants of 700 acres to E. Abbott, 1,300 acres to E. Abbott, and 2,000 acres to George Johnstone, called "King's Gift": Commencing on the north boundary line of a grant of 100 acres to Josh. Sherran at a point bearing west and distant 7 chains from the north-east corner of the said grant; and bounded thence north 42 degrees 53 minutes east 8 chains 79 links; thence north 47 degrees 7 minutes west 50 links; thence north 42 degrees 53 minutes east 9 chains 85 links; thence south 47 degrees 7 minutes east 50 links; thence north 42 degrees 53 minutes east 15 chains 72 links; thence north 47 degrees 7 minutes west 50 links; thence north 42 degrees 53 minutes east 1 chain 79 links; thence north 34 degrees 31 minutes east 2 chains 3 links; thence north 17 degrees 48 minutes east 2 chains 3 links; thence north 9 degrees 26 minutes east 5 chains 39 links; thence north 39 degrees 14 minutes east 10 chains 45 links; thence north 5 degrees 46 minutes west 1 chain 41 links; thence north 39 degrees 14 minutes east

2 chains 88 links; thence north 26 degrees 48 minutes east 86 links; thence north 1 degree 57 minutes east 86 links; thence north 22 degrees 54 minutes west 86 links; thence north 47 degrees 46 minutes west 86 links; thence north 60 degrees 11 minutes west 2 chains 60 links; thence north 38 degrees 15 minutes west 2 chains 68 links; thence north 15 degrees 5 minutes west 3 chains 79 links; thence north 19 degrees 12 minutes west 2 chains 1 link; thence north 27 degrees 26 minutes west 2 chains 1 link; thence north 31 degrees 33 minutes west 9 chains 21 links; thence north 9 degrees 6 minutes west 3 chains 57 links; thence north 13 degrees 21 minutes east 2 chains 31 links; thence north 4 degrees 56 minutes west 2 chains 19 links; thence north 41 degrees 29 minutes west 2 chains 19 links; thence north 59 degrees 46 minutes west 3 chains 4 links; thence north 30 degrees 57 minutes west 2 chains 54 links; thence north 2 degrees 8 minutes west 2 chains 54 links; thence north 26 degrees 41 minutes east 2 chains 54 links; thence north 55 degrees 30 minutes east 15 chains 45 links; thence north 47 degrees 11 minutes east 1 chain 44 links; thence north 30 degrees 35 minutes east 1 chain 44 links; thence north 22 degrees 16 minutes east 5 chains 1 link; thence north 22 degrees 44 minutes west 1 chain 41 links; thence north 22 degrees 16 minutes east 6 chains 1 link; thence north 54 degrees 13 minutes east 1 chain 50 links; thence north 5 degrees 33 minutes west 1 chain 28 links; thence north 14 degrees 49 minutes west 8 chains 47 links; thence north 16 degrees 47 minutes east 10 chains 66 links; thence north 46 minutes west 1 chain 80 links; thence north 35 degrees 51 minutes west 1 chain 80 links; thence north 53 degrees 23 minutes west 4 chains 74 links; thence north 15 degrees 32 minutes west 2 chains 72 links; thence north 22 degrees 19 minutes east 2 chains 75 links; thence north 45 degrees 25 minutes east 2 chains 3 links; thence north 68 degrees 32 minutes east 5 chains 71 links; thence north 55 degrees 1 minute east 3 chains 27 links; thence north 27 degrees 59 minutes east 3 chains 27 links; thence north 14 degrees 28 minutes east 22 chains 66 links to the boundary line dividing the parishes of Melville and Prospect, being also the north boundary of a 2,000 acres to Geo. Johnstone above-mentioned; thence by that boundary east 3 chains 9 links; thence south 14 degrees 28 minutes west 25 chains 75 links; thence south 41 degrees 30 minutes west 4 chains 80 links; thence south 68 degrees 32 minutes west 7 chains 9 links; thence south 56 degrees 58 minutes west 80 links; thence south 33 degrees 52 minutes west 80 links; thence south 22 degrees 19 minutes west 36 links; thence south 3 degrees 23 minutes west 65 links; thence south 34 degrees 28 minutes east 65 links; thence south 53 degrees 23 minutes east 5 chains 27 links; thence south 18 degrees 18 minutes east 3 chains 78 links; thence south 16 degrees 47 minutes west 10 chains 86 links; thence south 59 minutes west 1 chain 63 links; thence south 14 degrees 49 minutes east 9 chains 12 links; thence south 22 degrees 16 minutes west 16 chains 74 links; thence south 55 degrees 30 minutes west 16 chains 59 links; thence south 26 degrees 41 minutes west 1 chain 92 links; thence south 30 degrees 57 minutes east 1 chain 92 links; thence south 59 degrees 46 minutes east 3 chains 91 links; thence south 23 degrees 12 minutes east 4 chains 28 links; thence south 13 degrees 21 minutes west 2 chains 66 links; thence south 2 degrees 7 minutes west 2 chains 33 links; thence south 20 degrees 19 minutes east 2 chains 33 links; thence south 31 degrees 33 minutes east 9 chains 88 links; thence south 15 degrees 5 minutes east 3 chains 77 links; thence south 26 degrees 21 minutes east 1 chain 16 links; thence south 48 degrees 55 minutes east 1 chain 16 links; thence south 60 degrees 11 minutes east 3 chains 92 links; thence south 35 degrees 20 minutes east 2 chains 63 links; thence south 10 degrees 29 minutes east 2 chains 63 links; thence south 14 degrees 22 minutes west 2 chains 63 links; thence south 39 degrees 14 minutes west 13 chains 53 links; thence south 24 degrees 20 minutes west 2 chains 57 links; thence south 9 degrees 26 minutes west 6 chains 27 links; thence south 42 degrees 53 minutes west 4 chains 78 links; thence north 47 degrees 7 minutes west 1 chain 50 links; thence south 42 degrees 53 minutes west 15 chains 73 links; thence south 47 degrees 7 minutes east 1 chain 50 links; thence south 42 degrees 53 minutes west 9 chains 85 links; thence north 47 degrees 7 minutes west 1 chain 50 links; thence south 42 degrees 53 minutes west 7 chains 81 links to the north boundary line of a grant of 100 acres to Josh. Sherran; and bounded thence by that boundary west 1 chain 38 links, to the point of commencement,—containing 61 acres 2 roods 20 perches, and said to be in the possession and occupation of E. J. Weston.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-sixth day of September, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK

SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight  
Grand Cross of the Most Honorable  
Order of the Bath, a Member of Her  
Majesty's Most Honorable Privy Council,  
(L.S.) AUGUSTUS LOFTUS, Governor and Commander-in-Chief of  
the Colony of New South Wales and its  
Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879" and whereas the lands hereinafter described are required for the construction of the said works: Now, I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say in the "Sydney Morning Herald" circulated in the police district wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way or other encumbrances whatsoever, and to the intent, further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

1st. All that piece or parcel of land situate in the parish of Minto, county of Cumberland, and Colony of New South Wales, being a part of a grant of 100 acres to William Gaudry: Commencing at a point on the southern boundary of the said grant distant 4 chains 78 links, bearing north 45 degrees west from its south-east corner; and bounded thence by a continuation of the said southern boundary north 45 degrees west 3 chains 33 links; thence north 6 degrees 12 minutes west 2 chains; thence north 20 degrees 6 minutes east 4 chains; thence north 46 degrees 24 minutes east 4 chains; thence north 72 degrees 42 minutes east 4 chains; thence south 80 degrees 59 minutes east 2 chains 77 links; thence south 88 degrees 7 minutes east 2 chains 6 links to a lane leading to the Cowpasture Road; thence by that lane southerly 2 chains 24 links; thence north 80 degrees 59 minutes west 2 chains 22 links; thence south 85 degrees 52 minutes west 2 chains 99 links; thence south 59 degrees 33 minutes west 2 chains 99 links; thence south 33 degrees 15 minutes west 2 chains 99 links; thence south 6 degrees 12 minutes east 1 chain 66 links; thence south 11 degrees 51 minutes east 94 links to the point of commencement,—containing 3 acres 3 roods 11 perches, and said to be in the possession and occupation of J. Mahoney.

2nd. All that piece or parcel of land situated in the parish of Minto, county of Cumberland, and Colony of New South Wales, being part of a grant of 100 acres to Wm. Gaudry, and part of a grant of 300 acres to Henry Kable: Commencing at a point on the southern boundary of the said grant of 300 acres to Henry Kable, bearing north 45 degrees west and distant 4 chains 30 links from its south-east corner; and bounded thence south 70 degrees 29 minutes west 2 chains 57 links; thence south 84 degrees 45 minutes west 2 chains 12 links to a lane leading to the Cowpasture Road; thence by that lane northerly 2 chains 24 links; thence north 77 degrees 37 minutes east 2 chains 38 links; thence north 70 degrees 29 minutes east 8 chains 84 links; thence north 62 degrees 29 minutes east 3 chains 9 links; thence north 46 degrees 29 minutes east 3 chains 9 links; thence north 38 degrees 29 minutes east 8 chains 82 links; thence north 31 degrees 29 minutes east 2 chains 33 links; thence north 17 degrees 30 minutes east 2 chains 33 links; thence north 3 degrees 31 minutes east 2 chains 33 links; thence north 10 degrees 28 minutes west 2 chains 33 links; thence north 17 degrees 28 minutes west 2 chains 66 links; thence north 4 degrees 32 minutes east 1 chain 15 links to R. Thompson's southern boundary; thence by that boundary south-easterly 3 chains 48 links; thence south 6 degrees 28 minutes east 21 links; thence south 17 degrees 28 minutes east 1 chain 83 links; thence south 3 degrees 29 minutes east 2 chains 85 links;

thence south 10 degrees 31 minutes west 2 chains 85 links; thence south 24 degrees 30 minutes west 2 chains 85 links; thence south 38 degrees 29 minutes west 12 chains 9 links; thence south 54 degrees 29 minutes west 3 chains 70 links; thence south 70 degrees 29 minutes west 6 chains 24 links, to the point of commencement,—containing 8 acres 0 roods 35 perches, and said to be in the possession and occupation of A. Munro.

3rd. All that piece or parcel of land situate in the parish of Minto, county of Cumberland, and Colony of New South Wales, being part of a grant of 300 acres to Henry Kable; Commencing at a point on the northern boundary of the said grant bearing north 40 degrees west 21 chains 82 links from its north-east corner; and bounded thence south 26 degrees 33 minutes west 7 chains 56 links; thence south 15 degrees 33 minutes west 3 chains 66 links; thence south 6 degrees 28 minutes east 3 chains 45 links to A. Munro's northern boundary; thence by that boundary north-westerly 3 chains 48 links; thence north 4 degrees 32 minutes east 3 chains 36 links; thence north 26 degrees 33 minutes east 8 chains 39 links to the southern boundary of the estate of the late H. Bell; thence by that boundary south 40 degrees east 2 chains 12 links, to the point of commencement,—containing 2 acres 3 roods 32 perches, and said to be in the possession and occupation of R. Thompson.

4th. All that piece or parcel of land situate in the parish of Minto, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Wm. Cordeaux: Commencing at a point on the southern boundary of the said grant bearing north 40 degrees west 21 chains 82 links from its south-east corner; and bounded thence by a continuation of the said southern boundary north 40 degrees west 2 chains 12 links; thence north 26 degrees 33 minutes east 8 chains 80 links; thence north 20 degrees 31 minutes east 2 chains 33 links; thence north 8 degrees 29 minutes east 2 chains 33 links; thence north 3 degrees 34 minutes west 2 chains 33 links; thence north 15 degrees 37 minutes west 2 chains 33 links; thence north 21 degrees 39 minutes west 2 chains 89 links; thence north 6 degrees 13 minutes west 3 chains 54 links; thence north 9 degrees 13 minutes east 3 chains 54 links; thence north 24 degrees 38 minutes east 3 chains 54 links; thence north 40 degrees 4 minutes east 12 chains 76 links; thence north 54 degrees 33 minutes east 3 chains 33 links; thence north 69 degrees 3 minutes east 7 chains 96 links; thence north 58 degrees 51 minutes east 3 chains 39 links; thence north 38 degrees 27 minutes east 3 chains 39 links; thence north 18 degrees 3 minutes east 3 chains 39 links; thence north 2 degrees 20 minutes west 3 chains 39 links; thence north 12 degrees 32 minutes west 3 chains 86 links; thence north 6 degrees 40 minutes east 5 chains 45 links; thence north 25 degrees 52 minutes east 11 chains 41 links; thence north 39 degrees 37 minutes east 2 chains 24 links to the southern side of the Denham Court Road; thence by that road south 40 degrees east 2 chains; thence south 32 degrees 44 minutes west 3 chains 33 links; thence south 25 degrees 52 minutes west 6 chains 74 links; thence south 16 degrees 16 minutes west 4 chains 71 links; thence south 2 degrees 56 minutes east 4 chains 71 links; thence south 12 degrees 32 minutes east 2 chains 71 links; thence south 7 degrees 51 minutes west 4 chains 18 links; thence south 28 degrees 15 minutes west 4 chains 18 links; thence south 48 degrees 39 minutes west 4 chains 18 links; thence south 69 degrees 3 minutes west 8 chains 53 links; thence south 61 degrees 48 minutes west 2 chains 80 links; thence south 47 degrees 18 minutes west 2 chains 80 links; thence south 40 degrees 4 minutes west 9 chains 32 links; thence south 32 degrees 21 minutes west 2 chains 99 links; thence south 16 degrees 55 minutes west 2 chains 99 links; thence south 1 degree 30 minutes west 2 chains 99 links; thence south 13 degrees 56 minutes east 2 chains 99 links; thence south 21 degrees 39 minutes east 2 chains 51 links; thence south 9 degrees 36 minutes east 2 chains 75 links; thence south 2 degrees 27 minutes west 2 chains 75 links; thence south 14 degrees 30 minutes west 2 chains 75 links; thence south 26 degrees 33 minutes west 9 chains 63 links, to the point of commencement,—containing 18 acres 3 roods 16 perches, and said to be in the possession and occupation of the representatives of the late Henry Bell.

5th. All that piece or parcel of land, situate in the parish of Minto, county of Cumberland, and Colony of New South Wales, being parts of two grants of 200 acres each to S. Lord: Commencing at a point on the southern boundary of the most southern of the aforesaid two grants (which is also the northern side of the Denham Court Road), bearing north 40 degrees west 15 chains 66 links from its south-east corner; and bounded thence by the continuation of the said southern boundary north 40 degrees west 2 chains; thence north 53 degrees 22 minutes east 5 chains 94 links; thence north 45 degrees east 2 chains 34 links; thence north 28 degrees 16 minutes east 2 chains 34 links; thence north 11 degrees 33 minutes east 2 chains 34 links; thence north 5 degrees 10 minutes west 2 chains 34 links; thence north 13 degrees 32 minutes west 10 chains 32 links; thence north 8 degrees 5 minutes east 16 chains 71 links; thence north 14 degrees 6 minutes east 30 chains 41 links;

thence north 6 degrees 51 minutes east 1 chain 51 links; thence north 7 degrees 40 minutes west 1 chain 51 links; thence north 22 degrees 10 minutes west 1 chain 51 links; thence north 36 degrees 41 minutes west 1 chain 51 links; thence north 43 degrees 56 minutes west 3 chains 80 links; thence north 7 degrees 15 minutes west 9 chains 13 links to Joseph Moore's boundary; thence by that boundary south 60 degrees east 2 chains 47 links; thence south 7 degrees 15 minutes east 5 chains 36 links; thence south 16 degrees 25 minutes east 1 chain 60 links; thence south 34 degrees 45 minutes east 1 chain 60 links; thence south 43 degrees 56 minutes east 3 chains 56 links; thence south 14 degrees 54 minutes east 4 chains 15 links; thence south 14 degrees 6 minutes west 31 chains 33 links; thence south 11 degrees 6 minutes west 2 chains; thence south 8 degrees 5 minutes west 11 chains 60 links; thence south 2 degrees 41 minutes west 3 chains 57 links; thence south 8 degrees 8 minutes east 3 chains 57 links; thence south 13 degrees 32 minutes east 7 chains 80 links; thence south 3

degrees 11 minutes west 2 chains 97 links; thence south 19 degrees 55 minutes west 2 chains 97 links; thence south 36 degrees 38 minutes west 2 chains 97 links; thence south 53 degrees 22 minutes west 5 chains 48 links; thence south 46 degrees 29 minutes west 2 chains 24 links, to the point of commencement,—containing 18 acres 3 roods 24 perches, and said to be in the possession and occupation of R. H. Bloomfield.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-sixth day of September, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

1882.

## NEW SOUTH WALES.

## LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(LANDS RESUMED FOR WATER SUPPLY TO THE CITY OF BATHURST.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

### NOTIFICATION OF RESUMPTION OF LAND UNDER 44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
the Bath, a Member of Her Majesty's  
(I.S.) Most Honorable Privy Council, Governor  
AUGUSTUS LOFTUS, and Commander-in-Chief of the Colony  
Governor. of New South Wales and its Depen-  
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Bathurst, for and towards the completion of which said works public funds are available under the provisions of the "Appropriation Act of 1879;" and whereas the lands, hereinafter described, are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette and in a newspaper, that is to say, in the "Bathurst Times," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described, have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Bathurst, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other encumbrances whatsoever; and to the intent, further, that the legal estate therein, together with all powers, incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act. And I declare, that the following are the descriptions of the lands, hereinbefore referred to, that is to say:—

1. All that piece or parcel of land situate in the parish of Bathurst, county of Bathurst, and Colony of New South Wales, being part of a grant of 80 acres to R. Mortimer, portion No. 8: Commencing at the north-eastern corner of the said portion, on the Macquarie River; and bounded thence by that river southerly about 11 chains 97 links; thence by a line west 8 chains 6 links; thence by a line north 8 chains 45 links; thence by a line north 46 degrees 34 minutes west 3 chains 13 links; thence by a line west 12 chains 38 links to the eastern side of the Lagoon Road; thence by that road north 7 degrees

30 minutes west 77 links to the northern boundary of the grant aforesaid; thence by that boundary east 20 chains 30 links, to the point of commencement,—containing 9 acres 1 rood 17 perches, and said to be in the possession and occupation of Robert M'Phillamy, senr.

2. All that piece or parcel of land situate in the parish of Bathurst, county of Bathurst, and Colony of New South Wales, being part of a grant of 62 acres to James Vincent, portion No. 7: Commencing at a point on the southern boundary of the said grant and its intersection with the western side of the Lagoon Road; and bounded thence by that said southern boundary west 42 links; thence by a line north 64 degrees 28 minutes west 24 chains 27 links to the Vale Creek; thence northerly by that creek about 50 links; thence by a line south 64 degrees 28 minutes east 24 chains 51 links to the western side of the Lagoon Road; thence by that road south 7 degrees 30 minutes east 38 links, to the point of commencement,—containing 1 acre 0 roods 36 perches, and said to be in the possession of H. Neville, and occupation of W. Cornwall.

3. All that piece or parcel of land situate in the parish of Bathurst, county of Bathurst, and Colony of New South Wales, being part of a grant of 40 acres to the Presbyterian Church: Commencing on the northern boundary of said grant at a point distant 3 chains 48 links and bearing east from its intersection with the eastern boundary of the Railway land; and bounded thence by a line bearing south 64 degrees 28 minutes east 12 chains 70 links to the Vale Creek; thence by that creek northerly about 50 links; thence by a line north 64 degrees 28 minutes west 11 chains 62 links to the northern boundary of the 40-acre grant aforesaid; thence by that boundary west 1 chain 18 links, to the point of commencement,—containing 2 roods 17 perches, and said to be in the possession of the trustees of the Presbyterian Church, and occupation of Frederick Heulen.

4. All those allotments or parcels of land situate in the town of Bathurst, parish of Bathurst, county of Bathurst, and Colony of New South Wales, being allotments Nos. 6 and 7 of section No. 28, containing 1 acre: Commencing at the north-west corner of allotment No. 19; and bounded northerly by a line bearing south 41½ degrees west 5 chains; dividing it from allotment No. 5 westerly by a line bearing south 48½ degrees east 2 chains; dividing it from Piper-street southerly by a line bearing north 41½ degrees east 5 chains; dividing it from allotment No. 8, and easterly by a line bearing north 48½ degrees west 2 chains; dividing it from allotments Nos. 18 and 19, to the north-west corner of allotment No. 19 aforesaid,—and said to be in possession of James Prior Hull, and occupation of John Eyres.

5. All that allotment or parcel of land, containing 2 roods, situated in the town of Bathurst, parish of Bathurst, county of Bathurst, and Colony of New South Wales, being allotment

No. 5 of section No. 28: Commencing at the north-west corner of allotment No. 20, and bounded northerly by a line bearing south  $41\frac{1}{2}$  degrees west 5 chains, dividing it from allotments Nos. 3 and 4; westerly by a line bearing south  $48\frac{1}{2}$  degrees east 1 chain, dividing it from Piper-street; southerly by a line bearing north  $41\frac{1}{2}$  degrees east 5 chains, dividing it from allotment No. 6; and easterly by a line bearing north  $48\frac{1}{2}$  degrees west 1 chain, dividing it from allotment No. 20 to the north-west corner of allotment No. 20 as aforesaid,—and said to be in possession of Thomas O'Brien, and occupation of Thomas Swan.

6. All that allotment or parcel of land, containing 2 roods, situated in the town of Bathurst, parish of Bathurst, county of Bathurst, and Colony of New South Wales, being allotment No. 10 of section No. 68: Commencing at the southernmost corner of allotment No. 9; and bounded on the south-west by a line bearing south-easterly 1 chain along Piper-street; on the south-east by a line of 5 chains at right angles to Piper-street; on the north-east by a line of 1 chain parallel to Piper-street; and on the north-west by a line of 5 chains at right angles to Piper-street, to the point of commencement,—and said to be in the possession and occupation of J. H. Stewart.

7. All those allotments or parcels of land situated in the town of Bathurst, parish of Bathurst, county of Bathurst, and Colony of New South Wales, being allotments Nos. 8 and 9 of section No. 68: Commencing at the southernmost corner of allotment No. 7; and bounded on the south-west by a line bearing south-easterly 2 chains along Piper-street; on the south-east by a line of 5 chains at right angles to Piper-street; on the north-east by a line of 2 chains parallel to Piper-street; and on the north-west by a line of 5 chains at right angles to Piper-street, to point of commencement,—containing 1 acre, and said to be in the possession and occupation of D. Newell.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixteenth day of August, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

## NEW SOUTH WALES.

# LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(LANDS RESUMED FOR WATER SUPPLY AT PROSPECT, NARELLAN, ST. PETER.)

Presented to Parliament pursuant to Act 44 Vic. No. 16, sec. 6.

## NOTIFICATION OF RESUMPTION OF LAND UNDER 44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
the Bath, a Member of Her Majesty's  
(L.S.) }  
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor  
and Commander-in-Chief of the Colony  
Governor. } of New South Wales and its Depen-  
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and the suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee, with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales, being part of a grant of 50 acres to J. Baughan: Commencing at a point on the western boundary of the aforesaid grant, distant 21 chains 48 links from its western corner; and bounded thence on the north-east by land resumed by notification in the Government Gazette of the 10th of June, 1881, No. 227, bearing south 28 degrees 22 minutes east 5 chains 42

links; south 15 degrees 47 minutes east 4 chains 40 links; south 3 degrees 6 minutes east 1 chain 46 links to a fenced line; thence by that fenced line and its production north 56 degrees west 8 chains 18 links to the western boundary of Baughan's grant aforesaid; thence by that boundary north 25 degrees east 6 chains 66 links to the point of commencement,—containing 3 acres 0 roods 32 perches, and said to be in the possession of Gilbert Smith, and occupation of James Booth.

Also, all that piece or parcel of land situate in the parish, county, and Colony aforesaid, being part of a grant of 50 acres to J. Baughan: Commencing at the north-western corner of said grant; and bounded thence by the northern boundary of the same, bearing south 27 degrees east 15 chains 30 links; thence by a fenced line bearing south-westerly about 5 chains 50 links; thence on the south-west by land resumed by notification in the Government Gazette of the 10th of June, 1881, No. 227, north 12 degrees 38 minutes west 70 links; north 3 degrees 13 minutes west 3 chains 15 links; north 28 degrees 22 minutes west 10 chains 15 links to the aforesaid north-western boundary of Baughan's 50 acres; thence by that boundary north 25 degrees east 5 chains to the point of commencement,—containing 5 acres 2 roods 1 perch, and said to be in the possession of Gilbert Smith, and occupation of James Booth.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this third day of August, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

## NOTIFICATION OF RESUMPTION OF LAND UNDER 44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
the Bath, a Member of Her Majesty's  
(L.S.) }  
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor  
and Commander-in-Chief of the Colony  
Governor. } of New South Wales and its Depen-  
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions

of the "Public Works Loan Act of 1879;" and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette and in a newspaper, that is to say in the "Sydney Morning Herald," circulated in the police district wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Narellan, county of Cumberland, and Colony of New South Wales, being part of a grant of 1,550 acres to G. Molle: Commencing at a point on the western side of land resumed for the purposes of the Sydney Water Supply, at about 16½ miles, as per notification in the Government Gazette of the 22nd July, 1881, distant 29 chains 21 links, and bearing north 15 degrees 41 minutes east from the intersection of the said western boundary of resumed land with the south-western boundary of a grant of 1,550 acres to G. Molle; and bounded thence by a line bearing north 74 degrees 19 minutes west 3 chains; thence by a line bearing north 15 degrees 41 minutes east 22 chains 12 links to the south-western boundary of a grant of 170 acres to J. Chisom; thence by that boundary bearing south 45 degrees east 2 chains 88 links to the western boundary of the aforesaid resumed land; thence by that boundary south 15 degrees 41 minutes west 16 chains 21 links, south 74 degrees 19 minutes east 50 links south, 15 degrees 41 minutes west 4 chains 50 links to the point of commencement,—containing 5 acres 2 roods 12 perches. Also, all that piece or parcel of land situate in the parish, county, and Colony aforesaid, being part of a grant of 1,550 acres to G. Molle: Commencing at a point on the eastern side of land resumed for the purpose of the Sydney water supply, at about 16½ miles, as per notification in the Government Gazette of the 22nd July, 1881, distant 29 chains 39 links, and bearing north 15 degrees 41 minutes east from the intersection of the aforesaid eastern boundary of resumed land with the south-western boundary of a grant of 1,550 acres to G. Molle; and bounded thence by a line bearing south 74 degrees 19 minutes east 1 chain 50 links; thence by a line bearing north 15 degrees 41 minutes east 4 chains 50 links to the boundary of the said resumed land; and bounded thence by that boundary north 74 degrees 19 minutes west 1 chain 50 links south 15 degrees 41 minutes west 4 chains 50 links to the point of commencement,—containing 2 roods 28 perches. Both the above parcels of land are said to be in the possession of E. L. Moore and occupation of — Larkin.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of February, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable  
to wit. } Sir AUGUSTUS WILLIAM FREDERICK  
SPENCER LOFTUS (commonly called  
Lord AUGUSTUS LOFTUS), Knight Grand  
Cross of the Most Honorable Order of  
the Bath, a Member of Her Majesty's  
(L.S.) Most Honorable Privy Council, Governor  
AUGUSTUS LOFTUS, and Commander-in-Chief of the Colony  
Governor. of New South Wales and its Depen-  
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of

which said works public funds are available under the provisions of the "Public Works Loan Act of 1879;" and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification, published in the Gazette, and in a newspaper, that is to say in the "Sydney Morning Herald," circulated in the police district wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of St. Peter, county of Cumberland, Colony of New South Wales, being part of a grant of 400 acres to S. Terry: Commencing at a point on the eastern boundary of land resumed for the purposes of the Sydney water supply, by notification in the Government Gazette of the 10th June, 1881, No. 227, at right angles to and distant 2 chains from 12 miles 4,962 feet on the chainage of centre line of canal; and bounded thence by a line north 1 degree 27 minutes west 7 chains 57 links; thence by a line south 78 degrees 47 minutes west 4 chains 85 links; thence by 45 links of a concave curve of 57 links radius, the chord of which bears south 34 degrees 10 minutes east 45 links; thence by a line south 57 degrees 7 minutes east 2 chains 30 links; thence by 5 chains 83 links of a convex curve of 6 chains radius, the chord of which bears south 29 degrees 17 minutes east 5 chains 60 links to the point of commencement,—containing 1 acre 1 rood 2 perches, and said to be in the possession of the Misses Reddall, and occupation of J. Donaghy.

Also all that piece or parcel of land situate in the parish of St. Peter, county of Cumberland, and Colony of New South Wales, being part of portion No. 5 of 32 acres 2 roods 11 perches: Commencing at a point on the western boundary of land resumed for the purposes of the Sydney water supply, by notification in the Government Gazette of the 10th June, 1881, No. 227, at right angles to and distant 50 links from 13 miles 1,480 feet on the chainage of the centre line of canal; and bounded thence by a line south 78 degrees 47 minutes west 3 chains; thence by a line north 11 degrees 13 minutes west 2 chains; thence by a line north 78 degrees 47 minutes east 8 chains; thence by the western boundary of land previously resumed as aforesaid, south 11 degrees 13 minutes east 2 chains, to the point of commencement,—containing 2 roods 16 perches, and said to be in the possession of J. Fitzpatrick, and occupation of R. Watson.

Also all that piece or parcel of land situate in the parish, county, and Colony aforesaid, being part of portion No. 5 of 32 acres 2 roods 11 perches, and part of portion No. 11 of 35 acres: Commencing at a point on the western boundary of land resumed for the purposes of the Sydney water supply, by notification in the Government Gazette of the 10th June, 1881, No. 227, at right angles to and distant 50 links from 13 miles 2,202 feet on the chainage of the centre line of canal; and bounded thence by a line south 78 degrees 47 minutes west 1 chain; thence by a line north 11 degrees 13 minutes west 2 chains 50 links; thence by a line north 78 degrees 47 minutes east 1 chain; thence by the western boundary of land previously resumed as aforesaid, south 11 degrees 13 minutes east 2 chains 50 links, to the point of commencement,—containing 1 rood, and said to be in the possession of J. Fitzpatrick, and occupation of R. Watson.

Also all that piece or parcel of land situate in the parish, county, and Colony aforesaid, being part of portion No. 5 of 32 acres 2 roods 11 perches and part of portion No. 11 of 35 acres: Commencing at a point on the eastern boundary of land resumed for the purposes of the Sydney water supply, by notification in the Government Gazette of the 10th June, 1881, No. 227, at right angles to and distant 50 links from 13 miles 2,202 feet on the chainage of the centre line of canal; and bounded thence by a line north 78 degrees 47 minutes east 50 links; thence by a line north 11 degrees 13 minutes west 2 chains 50 links; thence by a line south 78 degrees 47 minutes west 50 links; thence by the eastern boundary of land previously resumed as aforesaid south 11 degrees 13 minutes east 2 chains 50 links, to the point of commencement,—containing 20 perches, and said to be in the possession of J. Fitzpatrick, and occupation of R. Watson.

Also all that piece or parcel of land situate in the parishes of Saint Peter and Narellan, county of Cumberland, and Colony of New South Wales, being part of portion No. 11 of 35 acres, part of a grant of 30 acres to W. Richards, and part of a grant of 3,000 acres to W. Howe: Commencing at a point on the western boundary of land resumed for the purposes of the Sydney water supply, by notification in the Government Gazette of the 10th June, 1881, No. 227, at right angles to and distant 2 chains from 13 miles 2,811 feet on the chainage of the centre line of canal; and bounded thence by a line north 11 degrees 13 minutes west 4 chains; thence by a line south 78 degrees 47 minutes west 1 chain 50 links; thence by a line north 11 degrees 13 minutes west 8 chains; thence by a line north 78 degrees 47 minutes east 3 chains 18 links; thence by 11 chains 97 links of a concave curve of 42 chains radius, the

chord of which bears south 3 degrees east 11 chains 90 links, to the point of commencement,—containing 1 acre 3 roods 5 perches, and said to be in the possession of J. Fitzpatrick, 18 perches being occupied by R. Watson, 5 perches by J. Egelton, and the balance by J. Fitzpatrick.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twelfth day of June, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-fifth year of Her Majesty's Reign.

By His Excellency's Command,  
JOHN LACKEY.

GOD SAVE THE QUEEN !

1882.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## GRENFELL WATER SUPPLY.

(REPORT OF SURVEYOR JOSEPHSON.)

*Ordered by the Legislative Assembly to be printed, 30 August, 1882.*

## Mr. Surveyor Josephson to The Engineer-in-Chief for Harbours and Rivers.

Grenfell Water Supply Camp,

Young, 30 September, 1880.

Sir,

I have the honor to report that I visited the township of Grenfell on Tuesday last, and examined the proposed sites for reservoirs on the Star and Clearwater Gullies, situated at the north-east of the town, which were perfectly dry. I may also mention the old dams were dry, except the southern one, which is frequently used for mining purposes.

The buildings in the town are constructed chiefly of timber.

Some twelve months ago a greater portion of the western end of the town was totally destroyed by fire, which has never been rebuilt; also, the new rush at "Temora" has taken a great many of the inhabitants away, thus leaving the present population about 500. These are supplied partly from their own private tanks, &c., and partly from wells which are situated at the north-west portion of the town, a cask containing sixty-three gallons costing from 9d. to 1s.

These wells are about 20 feet deep, either timbered or bricked, and were never known to be dry, having supplied the town for the last ten years.

I am of opinion that the present mode of supplying water will suffice this place for some time to come.

If there is anything more important to be done, I should certainly recommend that this survey be postponed until some future time.

Before removing camp, I should be glad to have the opinion of the Engineer-in-Chief on the subject.

I have, &amp;c.,

J. P. JOSEPHSON, C.E.

## The Engineer-in-Chief to The Under-Secretary for Public Works.

TRANSMITTED for the consideration of Mr. Secretary Lackey. It seems to me that there is scarcely any necessity to take any further action or incur any further expense in surveys for water supply for this place.

E. O. M.,  
4/10/80.

10
