2927. Do you know his name? I do not know. I know Mr. Josephson. There are three of them altogether. It was the little red-faced one.

George Robert Cartwright Neale called in, sworn, and examined:—

2928. *President.*] I believe you had several transactions with the Casual Labour Board? Yes.

2929. What was their nature? Selling wood for them.

2930. Only wood? I think I sold one little lot of charcoal.

2931. Nothing else? Nothing else.

2932. What are you? An auctioneer.

2933. Carrying on business where? Engine-street.

2934. Will you refer to your books and give us the account of the first transaction you had with the Casual Labour Board? I fancy that was made out on account of Mr. Deering. The first lot that came down was sent

Mr.
G. R. C. Neale.
26 Mar., 1889.

- Mr. G.R.C. Neale.
26 Mar., 1889.
- sent from Mr. Deering, and the party that was cutting it used to come and get the account sales and take them to the Casual Labour Board. Until I went there on one occasion I did not know that Mr. Davies was one of the Board at the time.
2935. Give us the first account you had with the Board if you can? The first was, I think, about the 7th of May, 1887.
2936. What was that for? That was for wood.
2937. And the amount? The first cheque was drawn in favour of Hinchcliffe for £26 17s. 7d. on the 14th May, 1887.
2938. Did you say there was a previous account? I do not think there was a previous account.
2939. The first time the wood was sold for Mr. Deering? I think that was the commencement of it.
2940. You need not go back before 1887? Very well.
2941. Take the beginning of 1887, and give me the first amount after 1st January, 1887? The first time in 1887 was on 6th April. That was payable to Mr. Deering.
2942. How much was that? £2 15s. 1d.
2943. To whom was it paid? Mr. Deering.
2944. When was the next? The next payment was £14 6s. 11d., on the 14th April, 1887.
2945. To whom paid? The cheque was made in favour of Mr. Deering.
2946. And the next? £2 14s. 1d., on 15th April, 1887.
2947. And the next? I think they went from there to the National Park.
2948. When was the next cheque given? The next cheque was for £26 17s. 7d., on 14th May, 1887.
2949. Whom did you give that cheque to? That cheque was taken by the cutter to the Casual Labour Board.
2950. Who was the cutter? Mr. Hillier had the contract for cutting the timber.
2951. Did you give it to Hillier? I did. He used to come every week. Before they gave him his cheque they had to have mine. When they got my cheque they were able to check his work.
2952. Did you get any receipt for it? No, none. Of course the cheque would be a receipt of itself. It should go through the Bank to the credit of the Board.
2953. What Bank was it drawn on? The Bank of New South Wales, Haymarket Branch.
2954. What was the next cheque, the amount and date? £38 4s. 2d., on the 31st May, 1887.
2955. Whom did you pay it to? To the Casual Labour Board through Hillier.
2956. Have you the butt of your cheque-book here? No.
2957. Have you anything to show that you paid the £26 17s. 7d.? I have the butt of the cheque-book at home. I thought that was not necessary if I showed the cash-book. I can produce the bank-book with it in. It was only yesterday morning I knew of this inquiry. I can look up all these things in a few hours.
2958. Do you know Hillier? Yes.
2959. Who is he? He was a wood and coal merchant. He has moved from Sutherland to Ashfield. At the time he was there he had the first contract with the Government to cut wood.
2960. Have you got any receipt for the £38 4s. 2d.? I never got any receipt for any cheque.
2961. How did you know they went to the Casual Labour Board at all? I know Hillier went there. They said they could not pay him until I sent my cheque over. He used to come down and get his cheque once a fortnight or once a week. They said they wanted the account rendered when he came down for them. They used to give him sometimes so much on account. I think he has got a book of his own which would show what they paid him.
2962. Have you any account sales? This book here is the account sales-book.
2963. Are you giving your evidence from your book? Yes; it is copied from the sale-book into here.
2964. Did you send in account sales? Every one of them; we never omitted them.
2965. Tell me the next payment after 31st May, 1887? £66 12s. 6d.
2966. When? On 23rd June, 1887.
2967. How did you pay that? By cheque.
2968. To whom? To the Casual Labour Board.
2969. Who took it? I fancy I did myself. I went over with it because I told Hillier I would go with it myself. That is how I first came to know Mr. Davies was there. It was only on that occasion I saw Mr. Davies.
2970. When was the next payment? 7th July, 1887, £41 12s.
2971. What was that for? For wood.
2972. Whom did you pay that to? The same party.
2973. To Mr. Davies himself? I can hardly tell you that. If you want to verify this I can get the cheques, or the old butts. I can get them from the Bank, and see what Bank they passed through.
2974. I ask you to do that;—when was the next payment? 19th July, 1887.
2975. Are you quite sure this is all on account of the Casual Labour Board? Yes.
2976. How much on 19th July? £5 4s. 6d., for wood.
2977. After that? I think you will find the next amount is £40 1s. 1d., on 4th August, 1887.
2978. What for? For wood.
2979. Whom was it paid to? It was paid in the usual way to the Casual Labour Board.
2980. To any individual you can name to us? I will get you the cheques as far as that goes. I think they are all made out to the Casual Labour Board.
2981. What was the next payment? £36 3s. 10d., on 18th August, 1887.
2982. The next? £40 12s. 3d., on 2nd September, 1887.
2983. The next? £52 3s. 2d., on 23rd September, 1887.
2984. The next? I think that is the last.
2985. Nothing else? That is the lot.
2986. Since 23rd September, 1887, can I take it, you have not sold anything on account of the Casual Labour Board? I have not paid them anything. There were a few bags of charcoal I sold for them. I had paid the Casual Labour Board for a truck of wood I never got paid for, sent by Mr. Burrowes to Ashfield. I never sent the wood to the parties. I said to Mr. Davies that the charcoal and that wood would about tally. That is the only thing that has not been paid to them. The twenty bags of charcoal sold at 1s. 6d. a bag.
2987. Is that something you have not accounted for? It is.

Mr.
G. R. C. Neale.
26 Mar., 1889.

2988. When was it sold? On 21st September. I dare say it might have come down before, but I have no account of it until then. It was represented as being good. It was not good.

2989. What became of the proceeds? I got them. As I told you, I never paid anything to the Labour Board for it. The weight of the wood was given me to charge a certain party for it, and I never got paid for it. There were four trucks of wood sent to a man of the name of Hanley, at Waterfall. I billed him for it and gave an order to get the money. I sent a man for it, and he said he would sue him for it.

2990. Was that wood you got from the Casual Labour Board? No; I never got it at all. I never ordered it to be sent. I sent the bill in for it. I said, "The charcoal I have in hand will pay for the truck of wood." Twenty bags of charcoal would be £1 10s. Hanley said he would not pay. Hillier told me this. I gave him an order to collect the money. He said, "I have nothing to do with Neale at all. I did not buy the wood from him."

2991. Can you tell whether, between August, 1887, and the end of December, 1888, you received any charcoal for sale by order of the Board? That was the only lot I ever received.

2992. What was that? Thirteen hundred weight and a quarter (twenty bags). That is the only lot I ever got, and some of this was broken.

2993. Did you in every case send the account sales with your cheques? Yes.

2994. Did you always pay by cheque? Always.

2995. Do these represent all sales of timber? Yes, of wood.

2996. Except one you mention about charcoal? That is the only thing.

2997. Can you recollect any instance in which you saw Mr. Davies personally and handed him a cheque? Well, I saw him on several occasions and handed him a cheque, but what the amount was I cannot say. I think there was a £66 12s. 6d. cheque that I handed to Mr. Davies. It was only then that I knew Mr. Davies was on the Board. The man who cut the wood informed me there was a Mr. Davies there, but I did not know it was John Davies.

2998. Is there any other information you can give us as to sales effected by you on behalf of the Casual Labour Board? Nothing further.

2999. Have you anything further on your books? No.

3000. Has Mr. Davies seen you lately? About a month ago, as near as possible.

3001. What about? He asked me whether I could give him a memo. of what cheques I paid to the Casual Labour Board. I said, "I can give you a rough one." I did, as far as I could. He said, "That is about the same as I have, but I have a little more." I looked it up and found I had omitted something whilst copying from one book to the other.

3002. That was this year? A few weeks back.

3003. *Mr. Franklin.*] I cannot understand how Hanley got this truck of wood? I believe it was sent to him from the Park.

3004. That would be a loss to you if you were the salesman? If you called Hillier, he would tell you he never got paid for cutting it. I smoothed him down and said, "Think yourself lucky you got paid for what you did."

3005. You lost your commission on the wood? Yes.

3006. You were so far interested? Yes. I said I would not pay them for any more until I got the money myself.

3007. What would be your commission on the sale? Well, it would only be a matter of 5s.; it was cheap wood.

3008. So that you only lost 5s. by that transaction? Yes.

3009. Did you lose by other transactions? Yes. The trifle I lost I did not care about. Only Hillier said, "Why don't you bill these people?"

3010. Did you think, when you impounded 30s., you were justified in doing it for loss of commission? Not for loss of commission, but because I did not get paid for the wood. After this matter of Hanley's I said I would not pay for any more until I got the money. I could not summons the man for it, as I never sold it to him. I sent the bill to him, and I also sent Hillier, who was well known up there, to receive the money.

3011. Were there any other contractors for cutting wood on the ground besides Hillier? No. He had the only engine. He got nearly 3,000 tons—1,000 at 3s., the remainder at 2s. 6d.

3012. Is it not a fact that wood was sold in the stack on the ground? I know nothing about anything sold at the park excepting this one truck and another truck that went to Heathcote or Waterfall. The reply I got from Hillier was that Hanley would settle with Burrowes.

3013. *Mr. Waller.*] Where was that charcoal? It was at Darling Harbour.

3014. How did you know? I applied to Mr. Davies for some charcoal for Mr. Gillies, a wood and coal merchant. I fancy someone told me they had charcoal.

3015. About what time? I really could not tell you.

3016. Was there a written answer or application? I fancy it was Mr. Davies I talked to about it. It appears this truck of charcoal had been lying some days at Darling Harbour. It was a bad lot; the water had got into it.

3017. That is how you became acquainted with the charcoal being there? Yes.

3018. You are sure you did not get any letter about it? There may have been a letter saying it was there.

3019. You are sure there were twenty bags? Yes.

3020. Suppose you found burst bags? I would not pay for burst bags.

3021. Would not the Railway know how many bags there were broken or unbroken? Yes; sometimes they invoice them "more or less." There were either twenty or twenty-five.

3022. You say Hillier said that certain persons paid Burrowes? I made out the accounts for the wood to Hanley.

3023. You say Hanley refused to recognize you? The answer was he would settle with Burrowes.

3024. Did not you say that in some cases Hillier did not get paid, and that settlement was made with Burrowes? I did not say settlement was made with Burrowes. I did not say any of them paid.

George Frederick Want called in, sworn, and examined :—

- Mr. G. F. Want.
26 Mar., 1889.
3025. *President.*] You are one of the trustees of the National Park? Yes.
3026. Have you been a trustee long? From the commencement of the Park.
3027. When was that? About eight years ago. I cannot say the exact date from memory.
3028. Are you in the habit of visiting the Park very frequently? Yes, constantly; on the average about once a fortnight.
3029. Can you recollect the early part of 1887—the time of the unemployed agitation? Yes, distinctly.
3030. Do you recollect seeing the unemployed out there? I recollect when they were sent out there.
3031. Are you aware that in 1887 a department was created known as the Casual Labour Board? Yes, about then.
3032. Do you know who were the members? Mr. Davies was Chairman, Mr. Wells, and Mr. Houison.
3033. Did you ever meet the Chairman, or any other member of the Board with reference to putting the unemployed on any particular works? Yes; I have been referred to on several occasions as to what portion of the Park it would be well to put the unemployed on.
3034. Have you had any opportunity during the past two years of forming an opinion as to the organization and supervision of the unemployed there? Yes, a very fair opportunity.
3035. Do you know any of the staff officers who controlled them? Yes, several.
3036. What was your opinion of the system of supervision—satisfactory or otherwise? It would not have pleased me.
3037. What fault was there? A general want of good supervision. I say that advisedly. Roads that have been passed as completed under contracts within three months have shoots of different branches of trees coming up again 3 and 4 feet high, although it was paid for the stumps to be extracted.
3038. I mean more particularly as regards the organization for prevention of imposition; can you give any evidence as to that? You mean as to organizing the gangs.
3039. Quite so? The only thing was that in gangs of eight they might have four good men and four incompetent men. The gangs were not properly organized.
3040. Do you know anything of the superintendents for the district? I fancy there were three—Burrowes, M'Pherson, and another.
3041. Do you know Burrowes? Personally, yes.
3042. Do you know him sufficiently to form an opinion as to his capabilities and character? I have met him on different occasions when I have been there.
3043. What is your opinion? Do you mean as a surveyor or overseer of works?
3044. Both professionally and as a man? As a man he is a good fellow, but professionally I cannot say. He is supposed to be a surveyor. I have always found him looking after his work when I have been out there.
3045. Do you know the Holt-Sutherland Estate? I do.
3046. Are you a shareholder? I was.
3047. Not now? No.
3048. When did you part with your shares? Twelve months ago. I was an original shareholder.
3049. Did you ever see the unemployed at work on that estate? Yes.
3050. Frequently? I should think they have been there in batches from about July or August, 1888.
3051. Are there many roads on that estate? What do you mean by many roads?
3052. Are there more than one? Oh, yes.
3053. How many? I cannot say. I should think some twenty or thirty.
3054. Are you aware whether those roads were constructed by the unemployed? I should think nearly all of them. I should like to explain, if I am allowed. Sylvania is a township. The road leading to the present Noxious Trades Site was always in existence. It is what they call the Kurnell Road. Mr. Holt used it for his sheep and cattle. The only other road in existence was the road which ran from Sylvania; it is better known as Simpson's Road.
3055. Were those the only two public roads? The only two roads I know of.
3056. Are all the other roads on the private estate? There was a track from the Heathcote station which formed the road down to the head of Ewey Bay. There is a place there known as Canterbury Rock; we used to go fishing there. It was a well-known road.
3057. Are you very familiar with that part of the country? Every inch of it.
3058. Do you think that all the roads which now exist on the Holt-Sutherland Estate are necessary roads in the interest of the public? No.
3059. How many are necessary in the interest of the public? I should like to know whether you include the road of which I am trustee. That is the main road from Sylvania to the National Park.
3060. Take all the roads the unemployed have been working on, and tell us which of them are necessary roads? One road I consider is a necessary road. It is a road, if I may explain it, that has always been used in the time of the encampments. It is the main Illawarra Road, before the railway-station was there from Sydney. That is one road I consider a necessary public road.
3061. That goes right through the estate? Yes; from Sylvania to Sutherland.
3062. Tell us another? The road which I have before described as Simpson's Road.
3063. Do you know what that road is called now? I really do not know what it is called now. I think it is the Hacking Road.
3064. Is it the Port Hacking Road? I do not know about the "Port"; it is a main public road to what they call Burrameer Bay.
3065. Tell me any other necessary roads besides these two? I know no others.
3066. Is the Coronulla Road a necessary road? Certainly not.
3067. The Malvern Road, is it necessary? I should not think so. It is practically useless now.
3068. Do you recollect being out there with Sir John Robertson? I do not recollect any particular occasion, because I have been there hundreds of times with him.
3069. When particular attention was directed to these roads? No; I was never with him when any particular attention was directed to them. I joined him one day when he was riding out. I met him by appointment.
3070. What was the object of that appointment? To go to the National Park.

Mr.
G. F. Want.
26 Mar., 1889.

3071. Do you recollect any particular remarks of his with reference to these roads? I recollect he asked me what all the men were doing on the road. He said, "We ought to have something better to do for the National Park men." I said to him, "They are not National Park men." He said, "Are they Holt-Sutherland men, because, if so, I shall have a row with the Board." Not in the same words, but something to that effect. I told him they were neither National Park nor Holt-Sutherland men, but were the unemployed. He said he intended to put in a protest against the men being employed on private roads through private estates. I told him it was a public road, and that I was one of four trustees.

3072. Is that the Illawarra Road? That is the main Illawarra Road.

3073. Was that the road you were on at the time? That is the road we were on at the time.

3074. What further took place? I think he asked me whether I was a trustee of the road, and whether it was a proclaimed road. I said I was a trustee. He said something to the effect that if money was granted for a road, why did they want the unemployed to make it 2 chains wide.

3075. Is your recollection that his remarks were confined to this particular road that you were then on? I think his remarks were made as we passed on it. The camp was within half-a-mile of Sutherland, where the Malvern Road turns off. He asked whether it was Simpson's Road or Port Hacking Road. I said, "No." He said they had no right to be working on private estates, and he intended to report it to Mr. Walker.

3076. Are you aware whether he did report it? I think I went with him. I am not sure whether I did or did not; but I went to some inconvenience and saw Mr. Walker about it. Mr. Walker asked me whether I was sure they were working on private roads or estates. I said I was sure they were working on a road of which I was a trustee, for which money had been granted by the Government. Mr. Walker said, as nearly as I can recollect, "I will stop the work, and wire to Sir Henry Parkes what I have done. He can confirm it or not, as he likes." Next day he said that Sir Henry had wired back confirming what he had done.

3077. Do you know whether the work was proceeded with? Not at that time. All the men were taken off.

3078. Are you aware whether it was renewed? It was renewed and finished.

3079. But was that work on a public road? No; that was work on the Malvern Road and a main public road of which I am trustee.

3080. Is your evidence that the work that was stopped had reference to private roads as well as your own road? Yes; certainly.

3081. Do you know what brought about a renewal of the work? No, I cannot say. I merely say, from my best recollection, that was what Mr. Walker told me. I know the men were stopped working.

3082. Is the Malvern Road a private road? I think it is a dedicated road.

3083. Does it run through the Holt-Sutherland Estate? Yes.

3084. Is it a useless road? It is very useful.

3085. Do you know the Sylvania Road? That is the main road—the Government road.

3086. Do you know a road known as Venetia-street? I do not know it; I may have seen it.

3087. I hold in my hand a petition, dated 19th August, 1887, addressed to the Casual Labour Board, requisitioning the Board for men to clear, stump, and form the Malvern Road, Venetia-street, and Sylvania Road. I see your signature amongst others on the petition. Will you refresh your memory by that. Perhaps you can point out the road on the plan? Yes; I recognize my signature.

3088. Are these roads necessary in the public interest? No; I should not call them necessary roads in the public interest.

3089. Do you think that the work that the petitioners sought for was proper work for the unemployed to be set upon in the interest of the general public? No.

3090. Can you tell us how you came to sign that petition? To tell you the truth, I do not recollect signing it.

3091. Have you any recollection who brought it to you? No; I have not the slightest recollection.

3092. Do you recognize any of the signatures to it as of persons who own land there, or are interested in the Holt-Sutherland Estate? I see Mr. Reading's name, F. J. Jackson, and S. A. Want, then a director; Mr. Jamieson, part owner; Mr. Carruthers is part owner of a large estate at the Heads. I see Mr. Murphy's name; he was a publican and storekeeper at Sutherland; I also see Murphy, the manager of the Holt-Sutherland Company. Maloney is secretary of the National Park.

3093. Is Mr. Murphy interested otherwise than as manager? He is the largest shareholder in the company.

3094. Do you know any of the others? No.

3095. Do you recollect signing any other petition? No; I do not. I recollect Mr. Murphy asking me to sign a petition about one of the roads one day, and I signed it without looking at it. I think that is the only one I signed. Indeed I think I told my clerk to sign it for me, as I was in a hurry.

3096. Are you aware whether Mr. Murphy took any unusual interest in the matter? I know he took a certain interest up to a certain day—up to the time I left the company.

3097. Were you examined before the Select Committee? No; I asked to be, with reference to some evidence of Murphy's with reference to a Government road.

3098. Were you summoned? No; I was not asked to be examined. I went up on two occasions. I was told by Mr. Walker, the Chairman, that they were not going to take any more evidence. I went up with Mr. Critchett Walker.

3099. What was the evidence you wished to give before the Select Committee? I wished to give evidence before the Select Committee with reference to my being a trustee.

3100. Mr. Murphy, in answer to a question (No. 2505.) before the Select Committee, said that certain roads were initiated by memorial. "We got a memorial," he said, "signed by a large number of persons. It arose in this way: When we took possession of this estate the main Illawarra road was in a very bad condition, and we said to the trustees—Mr. Fred. Want was one of them, and it was through him it was done—'This road ought to be made';—have you any remark to make on this? I think he further says, "It was not then surveyed, and it is not shown on any map now." We said, "Suppose we make this road 2 chains wide instead of 1 chain; if we give another chain will you get it made." They said they had arranged with the Minister of Lands to do that. That was seven years ago, and it has never been done until now. I never recollect any conversation of the kind occurring.

Mr.
G. F. Want.
26 Mar., 1889.

3101. Is there any other point on Mr. Murphy's evidence you want to comment on? I recollect saying that if the unemployed made a road 2 chains wide I would be glad to be relieved of the expenditure, as far as my trust was concerned.
3102. Was there any necessity to make it 2 chains wide? Not the slightest.
3103. Has it been done? Yes; gravelled and rolled.
3104. Are you able to say whether the work on the estate has been of a satisfactory nature or otherwise? I would not have passed it as a private individual.
3105. *Mr. Franklin.*] You have had good practical experience in the formation of roads? Yes.
3106. You have had the supervision and control of matters? Yes.
3107. You know the value of ordinary-formed roads? I do.
3108. Have you any recollection of what your main road in the Park cost per chain? You refer to the Carrington Road.
3109. I take that as the best? It cost from £4 10s. to £5 per chain. It was a very mountainous road. That was the average. It ran from £3 10s. to £7 10s.
3110. Is it a better road than those made by the unemployed? Infinitely better.
3111. How much in value? Well, I should think three times as good a road. It has been there four years, and we simply keep two maintenance men on it.
3112. If your road improved the land £50 per acre, the work by the unemployed would be equal to a third? £16 10s. or £17 per acre. That is, if it had been a good road.
3113. First of all, the road is cleared? Supposed to be cleared.
3114. Not satisfactorily? Well, no. All the shoots are coming up.
3115. It has not been properly grubbed? No.
3116. They did not fill the holes with stones? They never made any holes.
3117. After the clearing was done, did they execute anything in the way of formation? Yes, the operation of formation. They crowned them by throwing either side of the road to the crown of the road to hide the faults of the road.
3118. Do you think it would be worth 16s. a chain? Nothing like it, I should think.
3119. How was your work generally done? The work was done by contract.
3120. You returned work with schedule rates attached to each contract? Yes; for clearing we paid £3 10s. an acre, and I think the unemployed got £6 10s. an acre for it.
3121. During the operations of the unemployed you did not come into competition with them? In no way. We put our men on to other works.
3122. Did you find the unemployed interfere with your prices of labour? Not in the slightest. Three of my men left to join them; but beyond that I have the same men I had at the start.
3123. What were your rates for ordinary labour? Seven shillings a day.
3124. They were good men? All picked men, perhaps with the exception of the carpenter and blacksmith.
3125. That road which came from Tom Ugly's Point was the old Illawarra Road? It was the main road to Wollongong; it passed through Heathcote and Waterfall.
3126. Was it recognized as a military road? Yes, it was. I went there with the Lancers four years ago.
3127. You do not know whether the military authorities requested a wider road there? I am certain they did not. When I say that it would naturally have come to me as the trustee of the road, and I never heard anything about it.
3128. Then the additional width of the road would be in the interest of the Holt-Sutherland Estate? I cannot say that. It would not make much difference. A road 1 chain wide would be more valuable, because if it is 2 chains wide you are giving away half a chain on either side of the road for nothing.
3129. Of course the work would be of double value because of its increased width? The road has not been formed 2 chains; it has only been formed half a chain through. Either side of the centre of the road has been formed and stumped.
3130. Say, formed for 33 feet? From 30 to 35 feet.
3131. They are usually formed about 16 feet? About 16 feet.
3132. It is formed double the ordinary width of roads like that? Double that kind of road.
3133. You said that beyond these two roads you did not think that the others were useful roads in the interest of the public? I do not say that. I say that they are not public roads. I had an interest in the estate when the unemployed started, but still I say they are not necessary roads for the public convenience.
3134. If we except those roads for which justification might have been found, all the other roads would be going to improve the estate instead of giving benefit to the public generally? I have not been over the roads, but two or three I have seen I would certainly say they are not absolutely necessary. For the sake of argument, the Corea Road is about 2½ miles. Forest Road is another road. There is a road 5¾ miles which has been cleared and formed in the usual way—the Woronora Road—to Coronulla Beach; the Forest Road is part of it. There is a branch road running from the last point of Ewey Road and Ivanhoe Road; and these roads are not necessary in the interests of the public. The two roads are 1¾ mile in length.
3135. Do you know anything about the Montrose Road; it measures about 1½ mile;—is it in the interests of the public? I should not think so; it is inaccessible.
3136. There is a road marked "Grafton-street," measuring a chain or so under 2 miles—say, 1¾ miles;—do you know how that road is formed? It is simply cleared.
3137. The Corea Road, measuring 45 chains—do you know how that is formed? It is simply cleared.
3138. That is not in the interest of the public? No; I think not.
3139. There is a road called the Burranong Road; it measures about 1½ mile;—what has been done on it? Cleared and stumped the same as the others, with the exception of those formed.
3140. There is a road running between a road and the Hacking Road called Holt's Road? I do not know that road; I have never been on it. The work on that is clearing and stumping.
3141. There is a road running eastward from the railway-line called the Boulevard Road, running down to John Connell's measured portion? I think I have seen that.
3142. That would be 4 miles to the beach;—is it cleared and stumped? It was cleared and stumped, I think, by the unemployed.
3143. You see it is a road running to one of the boundaries of a subdivision;—do you believe it to be in the interest of the public? I do not.

3144. There are three roads near Como railway station? I have never seen them.
3145. But if evidence is given that these roads have been cleared by the unemployed, do you think that is in the interest of the public from their isolated position? I cannot say, because I have never seen them.
3146. There is a road—Willaree—which is 2 miles long;—have you seen that road? Only passing round by the river.
3147. You do not know what work has been done on it? Exactly the same work as appears to have been done on all the roads.
3148. Can you say if it is in the interest of the public? No; the only public road I know is the Hacking Road.
3149. Can you see any advantage to the public in giving a frontage to the water? No.
3150. Do you think the land is improved by forming these frontages if done on an arranged plan? Certainly.
3151. Land laid out like this must be increased in value? I should think so.
3152. Do you know to what extent? Very materially.
3153. The proportion? Double.
3154. You do not think any of the roads we have been traversing are at all required in the interests of the public? No; I should say not.
3155. *Mr. Waller.*] Do you consider the Malvern Road a public or private road? I call it a public road. For instance, Mr. Cooper has sold his land at Point Piper, and the land was dedicated and handed over to the municipality. So it would be in the case of the Malvern Road. The road that I call a public road is that which runs from Tom Ugly's Point to Wollongong.
3156. Was the work done equal or better than the class of work done at the National Park? About the same.
3157. Were you ever asked by the Chairman of the Board to meet him, and I think some of the directors of the Holt-Sutherland Estate at the National Park? He was asked to meet us.
3158. He was asked to meet you? Yes, or rather he heard that we were going down, and he asked that he might be permitted to join us.
3159. Was there anything in the shape of a picnic or luncheon? Yes; there always is.
3160. At whose expense was the luncheon? Well, I should have to go a little further into particulars to explain it. Sir John Robertson, Mr. Bradley, and two or three of the other trustees intimated their intention of going to the park. This is the only occasion on which I recollect that the President of the Casual Labour Board was there. I met Mr. Burrowes, Superintendent of the Board, and he said that he heard that the trustees were going down, and that he, Mr. Davies, would like to be there. I said I would be glad if they came down. In the course of conversation, I said I had to go up and send down the usual hamper. Mr. Burrowes said, "You need not do that, it is all arranged; Mr. Kidman is going to send down. Mr. Davies has arranged it." I said I did not care about anyone catering for our party, and that unless the bill was sent to us I would not have anything to do with it. He said that would be arranged. I thought it over, and went and made our own arrangements with the man who was caretaker there. They did send some refreshment in the shape of champagne, and whisky and soda, &c., and I believe a portion of it was opened when it got there. But the trustees always kept their own.
3161. Did you instruct Mr. Robertson to provide the usual refreshment? All but the wines.
3162. Did you bring down the usual hamper at that time? Of wines only.
3163. That was provided, as usual, by yourself? Yes.
3164. In excess of that, there was wine provided by Mr. Davies? Or his overseer.
3165. You saw it? I saw it there.
3166. Did you make any remark about so much wine being provided? I think I said I wondered what it was for.
3167. Did you think it in excess of necessary refreshments? I really did not know what it was for.
3168. When you made a remark about it, did you desire to know whether it was provided by your man or not? No; I told the caretaker to keep tally of what had been used.
3169. Of whose wine? Oh, our own was all in the cottage, but they broke the bulk of the other lot, and, thinking that it might have been sent by Kidman, I said that what was not used must be returned.
3170. Did you keep a tally? Yes; I got it from the overseer.
3171. Can you remember now? I really could not. You can imagine what four or five men would consume. About half a dozen champagne and a bottle of whisky.
3172. Was there anything besides champagne in the way of drink provided? My caretaker told me ale, whisky, brandy, and soda-water.
3173. Was there any food? None that I can recollect.
3174. Do you remember how that drink was brought to the ground? By train.
3175. From the train? By one of my carts.
3176. Was it a large quantity of drink? It struck me that it was.
3177. You would pretty well know what to provide. Was there provision for twenty people? I should think thirty. For a great deal more than we had. It would all depend on the thirst they had.
3178. For thirty thirsty people? Yes, for thirty thirsty people.
3179. Can you ascertain how much bulk was broken? Only by giving you the name of the caretaker. Charles Robertson, 3, O'Connell-street, will find him.
3180. Can you state the date of that visit to the National Park? I should think it was four or five months ago. Robertson would know the date and everything.
3181. Was it this year, or 1888? It was 1888.
3182. Can you tell about the month? I cannot from memory.
3183. Do you keep a book at the National Park,—a visitor's book? No; but Robertson kept the names of everyone who went down.
3184. Do you know what became of the surplus drink? No; I cannot tell what became of it.
3185. You do not know of your own knowledge? No.
3186. Do you know whether it was left at the National Park? The caretaker got instructions from the Chairman of the Casual Labour Board what to do with it. He told me Mr. Davies told him what to do with it. I told him to take it back to Mr. Kidman's.

Mr.
G. F. Want.
26 Mar., 1889.

- Mr. G. F. Want. 3187. *President.*] Can you tell us approximately what the settlement is about these roads? On the roads themselves or in the proximity—the people who use them.
- 26 Mar., 1889. 3188. I mean the permanent settlement? The permanent settlement would be about fifty or sixty people resident on or about the roads themselves; fifty people on Sutherland township. There are travellers by Simpson's coach. He has had as many as forty people down there in a day. The residents on the different roads would be about forty or fifty families.
3189. Did you ever have any work done by the unemployed yourself? Yes; on the Park as a trustee.
3190. For your own individual use? No.
3191. Did you ever buy any firewood or timber? Never.
3192. Were you aware of any practice existing for the unemployed or the superintendents to sell it? No. The only occasion I ever heard of it was when they were deserting a camp, when Mr. Burrowes told me there was a lot of bark on the huts and I could have if I sent for it, but I preferred to have nothing to do with it.

E. M. Burrowes called in, sworn, and examined:—

- Mr. E. M. Burrowes. 3193. *President.*] What is your profession? Surveyor.
- 26 Mar., 1889. 3194. How long have you been a surveyor? The last sixteen or seventeen years.
3195. Where did you qualify for the office? In Queensland.
3196. What position did you hold there? Road surveyor for a time under the Roads and Bridges Department.
3197. For how long? For nearly twelve months I had charge of a flying survey party. I was assistant railway surveyor under Mr. Roger North. I was assistant to him under Mr. Stanley.
3198. What did you leave the Queensland Service for? I thought I could better myself here. I was one of twenty-nine surveyors got rid of in one day, so I came here thinking I could do better.
3199. How long have you been in this Colony? I am a native of this Colony.
3200. How long since you came from Queensland? It was in the year 1881 that I came down.
3201. Were you in the employ of the Casual Labour Board throughout the whole of its existence? Yes. I was appointed superintendent at the National Park on the 26th November, 1886.
3202. You are aware that the Casual Labour Board was created on 2nd May, 1887? I am.
3203. From that time until the end of its existence, am I to understand you were employed by the Board? Yes.
3204. Exclusively? Yes.
3205. Were you examined before the Select Committee of the Legislative Assembly? I was.
3206. Is this your evidence? Yes; I believe it is.

Evidence before Select Committee.

Edward Matthew Burrowes called in, sworn, and examined, 12th December, 1888:—

2628. *Chairman.*] You are stationed with the unemployed at the National Park? I am the superintendent for that district.
2629. For how long have you held that position? For over two years.
2630. Prior to the existence of the Casual Labour Board? Yes; I was appointed by Mr. G. R. Dibbs in November, 1886.
2631. Had you sole charge? Yes; I had full power and control at that time.
2632. Had you full power at the time the Casual Labour Board came into existence? Yes; I think I may say that I had full power then.
2633. When they came into existence you ceased to have full power? Yes; it was then vested in the Chairman of the Board.
2634. What do you mean by that? Well, he would give instructions to me.
2635. From that time you initiated nothing? From that time I promulgated no new work.
2636. Everything came to you in the shape of orders? Exactly.
2637. Have you received any instructions from Mr. Davies to do any work on the Holt-Sutherland Estate? Oh, yes.
2638. Carrying out his orders, will you show us on the plan you produce what roads you have cleared, formed, and ballasted? The roads coloured red on this plan are those to which you refer. I prepared this plan for you at your request.
2639. Can you give us a statement as to the total number of roads you have made together with the total length? I have here a tabulated statement, which I think will give you all the particulars you require as to these roads. (*Vide Appendix.*)
2640. That statement shows that you have made a total length of 43 miles 21 chains? Yes.
2641. *Mr. Copeland.*] The work contained in this statement represents the work done by the Casual Labour Board? Yes.
2642. It does not include any work done previously by the Holt-Sutherland Company? That is a matter which I must explain. The Holt-Sutherland Company had cleared some of the roads; take the main Illawarra Road, they had cleared and formed it in some places.
2643. You found that the work had been done? Yes; the road was cleared and culverts were made.
2644. This statement shows the additional work which you have done? Yes.
2645. Do you remember whether they had done any work on the Port Hacking Road? A good deal of work was done there. It was cleared and it was gravelled in places.
2646. How wide? From 21 to 28 feet.
2647. Does that apply to the whole of the present road? No; only a portion.
2648. Can you give the Committee any idea of the total expenditure on the whole of these roads? I can by referring to some notes which I have made. I find that up to the 1st of December last the total expenditure has been £8,413 4s. 7d.
2649. Does that include bridges? It includes everything, and it gives an average price of £2 8s. 7d. a chain.
2650. *Mr. Carruthers.*] Can you tell us how much money has been expended on the Port Hacking Road? No; I have not taken out the roads separately. 2651.

2651. On what roads has the largest amount of work been done? On the Port Hacking Road, on the main Illawarra Road, and on the Coronulla Road.

2652. They would give a total of about 800 chains? Yes.

2653. *Mr. O'Sullivan.*] You still have some men working on the ground? I have 180 men there.

2654. Working up to date? Yes; up to yesterday.

2655. What number of men have you generally had employed? For some little time I have not had so many men. When we started work down there we were very glad to find a loop-hole to get some of the men away from the park. In July, 1887, I had 4,700 men at the National Park; that was too many men to have there for unremunerative work, and I was glad to get them on to these main roads.

2656. *Chairman.*] But a number of roads shown on the plan are not main roads? A number of the roads are what you would consider main roads. The Port Hacking is a main road, the main Illawarra Road is a main road, and I should call the Worenora Road a main road when completed.

2657. That leads to Kurnell? Yes.

2658. How would you define the roads running north and south from water to water? I should call them accommodation roads—that would be the proper professional term.

2659. Have you any road upon which you had any cuttings to do with the unemployed? Yes; there is a cutting at Yowwie Creek, on the Worenora Road.

2660. Had you any bridges to make there? Yes. There is one bridge 20 feet high.

2661. What would be the length of it? 196 feet.

2662. What cutting had you to do? There is a side cutting with a face of about 18 feet.

2663. Is it through solid stone? No; it is interlaced with mullock.

2664. What gradient would it be? From the levels I have taken now, unless some alteration is made, I hope to get up at from 1 in 15 to 1 in 18.

2665. Was all the work done by the unemployed? Yes; under the Casual Labour Board.

2666. By the men you superintended? Yes.

2667. Did you see any difficulty in utilizing the men for work of that kind? None at all.

2668. What particular object is there in making the Worenora Road? It leads direct from the railway goods sheds at Sutherland to the Coronulla Beach Road, which would be the nearest line to the proposed noxious trades site.

2669. Did you survey that? I made no survey. I only took the levels of the sections of the road.

2670. You are by profession a surveyor and civil engineer? Yes.

2671. If you had been constructing this road would you have made this cutting or would you have deviated the road? I should have deviated the road.

2672. With the object of saving expense? Yes; certainly.

2673. By whose instructions did you carry the road through this part of the country where it was so difficult to make? I received instructions from the chairman of the Casual Labour Board.

2674. Did you point out to him the difficulties of the work? I showed it to him before I commenced, but I was instructed to carry out the work as surveyed.

2675. Have you any knowledge as to who surveyed these roads? I have been told—I think perhaps it was the company's surveyor.

2676. I presume he surveyed the roads under instructions from the company? I presume so.

2677. *Mr. Copeland.*] Do you know the name of the company's surveyor? Mr. Curtis; I believe that Mr. Nibbs is the Government Surveyor.

2678. Mr. Curtis surveyed most of the roads? Most of them.

2679. *Chairman.*] Are any of the roads such as you would have recommended in the interests of the Crown? Some of them I might

2680. Are there any of them which you would have objected to make, having regard to your public responsibility? Yes; some of them.

2681. *Mr. O'Sullivan.*] You can identify the Holt-Sutherland Estate on the plan before you? Yes.

2682. And you see that the great majority of the roads are on that estate? Yes.

2683. Out of the 43 miles and 21 chains referred to in your paper how many miles would not be on this estate? From 3 to 4 miles.

2684. *Mr. Copeland.*] Have you made any roads on the Government Reserves? Yes.

2685. Which of them? Part of the main Illawarra Road passes through a reserve.

2686. How many chains of that road passes through Government land? A little over half-a-mile. Sylvania Road and Boulevard Road about on the reserve.

2687. Have you done any work upon this reserve out at Kurnell? Not yet.

2688. Have you done any work on the proposed railway from Sutherland to Kurnell? No, not yet; we are waiting for a railway survey to be made.

2689. *Chairman.*] Are there any Crown lands in this vicinity upon which you could have used the unemployed without putting them on the Holt-Sutherland Estate? We are employing men now between Liverpool and here, and between Campbelltown and here.

2690. *Mr. Carruthers.*] On what roads has the bulk of the money being expended? On the main roads.

2691. Which do you call those? On the Coronulla Road, the Port Hacking Road, the main Illawarra Road, and the Worenora Road.

End of Evidence before Select Committee.

3207. *President, resuming.*] Was that evidence, which has just been read to you, submitted to you for revision? Yes.

3208. Having heard it read, do you wish now to make any correction or explanation? No; I do not think so. The answer to question 2648—the money portion of it, £8,413 4s. 7d.—was taken from the vouchers in the office—from the abstracts in the office. It was done hastily.

- Mr. E. M. Burrowes.
26 Mar., 1889.
3209. Is that evidence, which has just been read over to you, true and correct in every particular? Yes.
3210. Do you know who appointed you to the office you held under the Casual Labour Board? I consider I was appointed by Mr. Dibbs. I was under Mr. Wise, then Mr. Deering, and then came Mr. Davies and the Casual Labour Board.
3211. What were you doing when Mr. Dibbs appointed you? I was working in the Board of Health office, assisting them there. They sent for me to come up-stairs one afternoon. It was on the 28th November, 1886. Mr. Dibbs sent for me.
3212. What were you doing after that? I went out to the Park at 9 o'clock next morning.
3213. What were your duties? Clearing.
3214. Had you all unemployed there? All unemployed.
3215. Were your duties altered in any way from that time up to the time of your working under the Casual Labour Board? No, sir.
3216. How did you find out that your master was the Casual Labour Board? Mr. Davies came out and told me he had been appointed. I received no intimation from the department.
3217. Was your salary altered? Yes. About a couple of months afterwards they increased my salary from 10s. a day to £5 per week.
3218. Up to that time you had been working at 10s. per day? Yes.
3219. What was the particular district you had charge of? The National Park. That is the only place we had men.
3220. But during the whole of the time the Board was in existence? The National Park and Waterfall. We called it Southern District.
3221. You had nothing to do with any other districts? No.
3222. Nothing to do with the Northern District? Nothing at all.
3223. What were your duties whilst in the employ of the Casual Labour Board? To look after the men, regulate the work, give out the work, point out new work to be done and so on, see that the officers carried out their duties, visit from one camp to another, and be always on the move.
3224. Did you live out there? At the National Park.
3225. Under canvas? Partly under canvas. They sent me out a kind of German military hut.
3226. Who were your officers? They were Sanderson, Frazer, Underwood, M'Pherson (my head officer at the time), Walsh, the clerk and storekeeper, Springall; of course, there were dozens of other assistants and officers.
3227. Do you consider you were the senior officer in the district? Yes; I was head officer of the whole lot.
3228. Did it come within your powers to initiate works? I used to initiate them, but not without recommending them to the Chairman in some way or another. I would not start on my own responsibility.
3229. Did you ever? No.
3230. What are you engaged in now? I have been surveying and making a plan of the Holt-Sutherland roads.
3231. Under whom? Mr. Mason.
3232. Who has charge of the unemployed now? Mr. M'Pherson, my assistant, that was.
3233. How was that change brought about? I do not know; I cannot tell who brought it about; I was simply told by Mr. Mason in the office that my services would not be required. I said, "I do not understand you telling me my services will not be required." He said, "We have made other arrangements. There is only going to be one superintendent." I said, "I am that one superintendent." He said "I have made other arrangements." I said "I will not take my dismissal from you; I was appointed by the Colonial Secretary." I came down and spoke to Mr. Critchett Walker about it. I was kept on. Mr. Mason was seen about it, and I was kept on until the end of this month. No letter was written to me that the change would be made.
3234. Was any letter written to you appointing you? Yes; I have got that now.
3235. Is this the plan you referred to in your evidence before the Select Committee? Yes.
3236. Who made it? I put the roads in.
3237. Can you tell us the total expenditure on the whole of these roads up to the end of last year, or if you cannot tell us can you procure it? I cannot tell you; the nearest approach to it is in the evidence before the Select Committee.
3238. You believe that to be fairly accurate? Mr. Goodman, one of the clerks in the office, and Mr. Springall got it out for me.
3239. To whom did you consider yourself responsible? To Mr. Davies, as Chairman, but to Mr. Critchett Walker as my head.
3240. What has Mr. Walker to do with it? I was appointed by the Colonial Secretary.
3241. You never had any intimation you were to be controlled by the Casual Labour Board? No written intimation.
3242. Had you verbal intimation from anyone but the Chairman? Yes; I think Mr. Walker, on one occasion, told me I should have to go under the Casual Labour Board, which was composed of Mr. Davies, Mr. Wells, and Mr. Houison.
3243. He gave you instructions? He told me I should take my orders from them.
3244. Are you quite sure there were no written instructions? I never received any.
3245. After that you looked to the Casual Labour Board as your masters? Yes.
3246. Will you tell the Commission what system you adopted as regards ordering supplies, stores, and plant? I used to requisition the Board; there was no regular form, but I used to enter it in my letter-book, "To the Chairman of the Board.—Required, for the use of such and such work," as the case would be. He would then order the goods.
3247. As to supplies of rations, how did you order them? I never ordered rations.
3248. Then your orders only referred to plant? Yes, to plant.
3249. Did you ever order any plant yourself? Yes; I ordered some oil the other day, which the Chairman refused to pay for, from Fell & Co.
3250. Who did order then? Mr. Hibble, I believe, ordered for the Chairman. I know little of what took place in the office.
3251. How did you satisfy yourself that plant was required? I would know by the number of men I had at work.

3252. Do you take the responsibility of all the plant you ordered being necessary? I did not order it without it was necessary. I never ordered any that was unnecessary—at least I do not think so.

3253. What check was kept on the tools and plant you received? The storekeeper always had an inventory of everything and kept that posted up in his book. Mr. Springall I mean.

3254. What check had you to prevent thieving? By the men or by the officers?

3255. By the men? Nothing. If a man bolted and took his axe with him I could not help it.

3256. Did you ever have a tally of the plant? Two or three times since I have been there.

3257. Had you anything to do with the ordering of the rations? Nothing whatever.

3258. Who had to do with it? The storekeeper, Mr. Springall.

3259. Did not the requisition for rations come before you in any way? No, never.

3260. Can you tell us when plant or tools or powder was ordered from Sydney what course was adopted about the delivery? It used to come out mostly from M'Lean Bros. and Rigg, and come on to the Park.

3261. Who took delivery? They were put out on the platform, and the storekeeper came down and saw what came.

3262. Were any receipts taken? I cannot tell you.

3263. Who can tell us? Mr. Springall.

3264. Did you get any advice of the despatch of the goods? Sometimes Mr. Davies would say, "I have sent you so and so."

3265. Verbally? Verbally.

3266. Did you ever have any written information? No.

3267. Was this not a rough and tumble way of doing business? Rather so. I think I never saw any vouchers with the goods from M'Lean Bros. and Rigg.

3268. Supposing, for example, twenty kegs of powder had been ordered and fifty kegs came out to you, would you take delivery in the natural course? Yes; we would take it, thinking it came from the office.

3269. Had you any means of knowing whether the accounts that were sent in were in excess of or less than the amounts actually ordered? I would know if I ordered twenty kegs, and thirty kegs came in, that the requisition had been altered.

3270. Did cases occur in which larger amounts came out than you ordered? Yes.

3271. How did that come about? We presumed that the Chairman had sent them out. Sometimes I would order a line of picks or shovels, and Mr. Davies would curtail it.

3272. Could you tell when a large difference existed? I have known a lot of tools come out that were never ordered at all, so as to have them in store to fall back upon.

3273. What did you do with them? We kept them in the office.

3274. Was this a case when you did not requisition for them at all? Yes.

3275. Could they have been requisitioned for by anyone else? No one except the storekeeper and myself. No one else had authority.

3276. Can I take it you had no check whatever beyond your own requisition for particular goods? The storekeepers would know all these things. I never used to interfere with them. My time was taken up in surveying work.

3277. Did you consider the checking business had nothing to do with you? No; because if I had an authenticated officer to look after it it was his duty, and it was mine to supervise.

3278. Mr. Springall was your storekeeper? Yes, up to the end of last year.

3279. Was he storekeeper the whole of the time you were there? Yes; before I went out there.

3280. Do you know who appointed him? I think he was appointed by Mr. Wise. He had been out at Gordon before he came to the Park.

3281. Did you look to him entirely for checking these things? Yes.

3282. What were his duties? He was storekeeper and clerk. He would make up all the vouchers and keep the time of the men. An officer would bring in the time and he would check it.

3283. Did you check the calculation in any way? We used to make out the pay-sheets together.

3284. Did you take his statement as gospel? No; I have often found fault with him and found him wrong.

3285. Did he perform his duties, in your opinion, in a proper way? I think he was a smart and intelligent officer.

3286. Did you ever make any complaint about him? Who to?

3287. To the Casual Labour Board? No.

3288. Where is he now? He lives at Hurstville.

3289. What is he doing? He has just finished building a large hotel.

3290. How long has he been out of the employment of the Board? Since January last.

3291. What pay did he have? Ten shillings a day all the time.

3292. How long was he in the employ of the Government? I think he was a couple of months up at Gordon.

3293. During the whole of the time you were there, he had 10s. a day? Yes; he was allowed his rations of course.

3294. Is this a large hotel? Yes; it is a large place.

3295. Do you know whether it is his own? I do not know anything about it. There has been a slight coolness between us for some time.

3296. How did it arise? Through Mr. M'Pherson, my assistant superintendent.

3297. Did you have any difference with Mr. M'Pherson? Yes; because he would interfere with things had no right to.

3298. Professionally? Yes.

3299. How did he interfere? With my officers. I would tell an officer to do a certain thing and would go away, and while I was away he would alter my orders, and I objected to that.

3300. And you say your coolness with Springall arose out of the difference you had with M'Pherson? Yes.

3301. Were the duties entrusted to Springall of a responsible nature? I should say they were responsible. A man who had the ordering of the rations and that sort of thing would have very responsible duties.

3302. Were not his duties more responsible than yours? I do not think they were. They were both responsible. I do not consider his duties were more responsible than mine.

3303. However, so far as his duties were concerned and your supervision went, you were satisfied? Yes.

3304.

Mr. E. M.
Burrowes.
26 Mar., 1889.

- Mr. E. M. Burrowes.
26 Mar., 1889.
3304. Give us your own opinion ;—was he a capable and competent officer ? I think he was a competent, smart, intelligent officer.
3305. Would you take him into your own service ? No, I would not.
3306. Why not ? If I were a wealthy man I should not care about having him, because he is too sharp. He would be too sharp for me.
3307. Do you think he is a man to put in charge of a lot of money ? No, I do not think so.
3308. Or a lot of goods ? I should not care to do it.
3309. Is that opinion formed from what has arisen whilst in the employ of the Government ? It has arisen from things after he left. It has been reported to me by my officers.
3310. Do you not think, he being an officer under you, and his duties being of a responsible nature, that you did not keep quite enough check on him ? I do not think that, because I was told by Mr. Wise that there was a properly-authenticated officer out there to look after the rations. I should not have anything to do with the rations. My duties would be for field duties alone. I was to confine myself to my duties and not interfere with him.
3311. Were you not the responsible officer on whom the Board relied ? I believe I was ; but Mr. Davies always got orders from Springall or gave them to him direct. He would send to Springall, and not through me.
3312. What was the system that obtained as regards making payment to the men ? My *modus operandi* with regard to paying was, first of all, to call out on the ground all the men for clearing. On the Thursday or Friday previous to the last day of the fortnight we measured up their work to see what they were entitled to. I would make out an abstract list of the amounts due for road-clearing, ballasting, or what might be done. I would hand it in to the clerk or storekeeper for him to put in his rations and deduct that from the total amount. The final amount would be shown in a third column, and the account would be made out from that abstract.
3313. Did you send that to the Board ? There was an average-sheet sent in.
3314. Was it initialled by you ? Yes.
3315. What did your initials cover ? Only the actual work done and the gross amount earned. It had nothing to do with the rations.
3316. How did you arrive at the amount to be paid ? The rations would be deducted from the amount and the breakages, and that would leave the amount due to the men.
3317. To whom was it paid ? We used to make them up into gangs of eight. First of all we had ten ; but ten was not a good number. They would pick their own ganger. Call a man Christy for argument sake. He was paid, and had to divide the money afterwards.
3318. How did you know he had seven men ? We kept account of the rations issued.
3319. Some of the gangs might not always be of full strength ;—what system did you adopt in order to ascertain how many men you had to provide for in your pay-sheet ? I would go round and ask a man how many men there were in his gang. He would say eight, and I would see them working. Perhaps I would see five, and I would say, "How is it you are not up to your full strength ; I see you are drawing eight rations ?" They would say, "No, only so-and-so." After pay-day I would fill up their gangs to the proper strength. There was great difficulty, as the men would clear off. That has always been a difficult problem to solve.
3320. Are you aware of any case where a man has been paid as a ganger and he was not a ganger at all ? I have heard of one case.
3321. Of your own knowledge ? No.
3322. Have you been made aware of any case, and what is it ? I have been made aware of a case at Heathcote.
3323. When ? Last month.
3324. Who told you ? Goodman in the office.
3325. Who is Goodman ? Larnach's assistant.
3326. Do you know anything of a man named Flemming, whose name appears as a ganger on the numerous pay-sheets we have before us ? That is the man I spoke about.
3327. Do you know anything of Flemming ? I know the man very well. He was a labouring man in the field, and when we came to Hurstville he was taken on as a handy man about the yard. He ran messages or did anything. I was much astonished when told by Goodman about this. It led me to make inquiries. Goodman told me he appeared in Bell's Heathcote sheets. I said it was impossible. He said, "Yes, I know he has been drawing money from him as a ganger." Springall sent all the papers into the office. All the papers had been taken away ; when I was away two or three days all the papers, books, and ledgers were cleared out. They had been taken away by Springall. Mr. Goodman says by Mr. Davies' orders, but I do not know.
3328. Have you seen them since ? I have seen one book in the Casual Labour office.
3329. What is it called ? I do not know the name. It is in Mr. Springall's handwriting.

WEDNESDAY, 27 MARCH, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

Ambrose Freeman called in, sworn, and examined :—

- Mr. A. Freeman.
27 Mar., 1889.
3330. *President.*] What is your position in the Public Service ? Examiner of Expenditure Accounts in the department of the Auditor-General.
3331. Do you produce some papers relating to the Casual Labour Board from your department ? Yes.
3332. Will you describe generally what they are ? They are principally pay-sheets for wages and other expenses of the Board, to the extent of about £240,000.
3333. Have you been through these adjustments of advance papers ? I cannot say that I have looked at every one personally ; I have been through most of them.
3334. What is your experience in the department that you are in now ? I have been twenty-three years in the Service.
3335. Is there anything that seems peculiar to you in these adjustments of advance-sheets that have been presented

presented to you by the Casual Labour Board—something like forty different adjustment-sheets for £6,000 advances? Yes; they are peculiarly adjusted, inasmuch as they are exactly adjusted. There is no portion of any of the advances—no balance—carried forward.

Mr.
A. Freeman.
27 Mar., 1889.

3336. Is it an unusual occurrence to have adjustment-sheets presented in that way? Where there are a number of advances made to one individual in succession it is, I believe, an unusual occurrence.

3337. Is there anything in the vouchers that are produced to warrant this peculiar adjustment? Nothing that I can see.

3338. Were all the different vouchers apparently genuine? Yes; they are all receipted documents.

3339. Does it appear on any occasion that the Board divided a voucher so as to show that a portion of some amount had been held back for a subsequent advance, or are all the vouchers for full amounts? In every case, I believe, the vouchers to have been complete.

3340. Has the audit of these accounts been completed? No; there are several outstanding queries, and there is a matter in reference to M'Lean Bros. and Rigg under reference to the Treasury.

3341. What is that? The contracts for the supply of ironmongery to the public service generally we take to include all Government supplies, and these contracts are subject to rates of discount. M'Lean Bros. and Rigg have supplied articles to the Casual Labour Board on which they have not deducted the usual discount, and the question was referred to the Treasury as to whether they considered it right for the vouchers to pass that way. The question was raised, not on any advance to the Casual Labour Board, but on a previous payment of a similar character under Mr. Wise. There are several vouchers and payments by the Casual Labour Board that were not considered satisfactory by us until a reply from the Treasury was received.

3342. Do these vouchers cover all the payments to M'Lean Bros. and Rigg that have been made since the Casual Labour Board existed, or only recent payments? All the payments, as far as I know.

3343. *Mr. Franklin.*] Supposing that the Treasury made an advance to trustees for any purpose, in adjusting that account to the Audit Office, the adjustment might be made so as to close the advance and leave the balance for the first item of the next advance? Yes.

3344. *Mr. Waller.*] Do you remember, Mr. Freeman, if these goods were supplied by M'Lean Bros. and Rigg under the usual contract rates for the Government? I cannot say that. I don't recollect.

3345. What is the usual rate of discount under the contract rates for the Government? I cannot say from memory; I have not looked at the account for some time; but there was a rate of discount, and the price would have been different had they supplied at the Government contract rates.

3346. They supplied the Casual Labour Board at a higher rate than the Government contracts generally; they were not supplying the Casual Labour Board under the usual contract rates? No, they were not.

3347. Is the usual contract rate net, or subject to discount? Subject to discount.

3348. Always? Not always; sometimes the supplies are taken at the schedule price, and sometimes at schedule price less discount.

3349. Is it the case that M'Lean Bros. and Rigg failed to give either schedule price or allow discount? I cannot recollect at what rates they supplied the articles; but we found, on computing, that there was a loss to the Government.

3350. That the rates were higher? Yes.

3351. Considerably higher? Yes, considerably higher.

3352. There must have been a considerable difference when the Auditor-General disapproved of passing the accounts without further authority? Yes.

3353. Are you aware of a tender from M'Lean Bros. and Rigg which was in existence at the time that the Casual Labour Board was in operation? Yes. There is a tender in the office, and it is from a comparison with that particular tender that our knowledge is obtained as to the difference in the price.

3354. That applied in all cases? I believe so.

3355. Did you notice on any of these contingent vouchers of M'Lean Bros. and Rigg that a discount of 2½ per cent. had been taken off the price? I believe that was taken off in some cases, but even taking that into consideration the price would be higher than the Government rates.

3356. Would it be considerably higher? Yes, considerably higher.

3357. *President.*] Have you produced here to-day all the papers that you have in connection with the Board at the Auditor-General's Office? Yes.

3358. Are you aware whether there are any other vouchers at the Treasury? I believe that further advances have been made by the bank.

3359. Not to the Casual Labour Board, I suppose, but to the Board that took their place? Oh, that may be. At any rate there are accounts not yet rendered to the Audit Office.

3360. Can I take it that so far as you are aware all the vouchers in support of the advances to the Casual Labour Board have now been handed to us, with the exception of some half a dozen under query? Yes.

3361. Are those that are under query only M'Lean Bros. and Rigg's? No.

3362. What others are there? There are a few minor objections raised, or queries, and they have been sent to Messrs. Miles and Mason, and are not yet returned.

3363. Will you look at these four sets of papers, purporting to be vouchers, in support of four separate advances of £6,000? Yes.

3364. Looking through the vouchers for these different advances, can you say whether or not they were all in support of accounts paid immediately preceding or a long time preceding the advance? I cannot say. So long as the vouchers in these parcels amount to £6,000, no further objection would be taken.

3365. Then you do not care when the payments were made? Not so long as they supply us with vouchers for the amount.

3366. In other words, in support of an advance of 13th September, 1888, a series of vouchers might be presented taken out of the previous eight or twelve months payments indiscriminately, and in the next advance of October a number of other vouchers indiscriminately taken out might also be produced? Yes.

3367. And yet they are satisfactory? Yes. We are not supposed to know what was the reason for detaining the vouchers.

3368. Have you taken any steps to inquire as to the genuineness of the vouchers? That does not come within our province. The signature of the Chairman of the Board is our authority for the articles having been supplied.

3369. You accept that as conclusive? Yes.

Charles William Beggs called in, sworn, and examined :--

- Mr. C. W. Beggs. 3370. *President.*] Are you a partner of Mr. G. R. C. Neale, who was examined yesterday before this Commission? Yes.
- 27 Mar., 1889. 3371. Do you produce some cheques, drawn by Mr. Neale, in favour of different persons? Yes.
3372. How many cheques are there? Nine.
3373. What is the first cheque? £26 17s. 7d., in favour of T. S. Hinchcliffe, dated 14th May, 1887.
3374. Can you say what became of that cheque? No.
3375. Looking at the cheque itself, can you give us any information? Only that it has gone through my partner's bank.
3376. Is there anything to show what other bank it has gone through? Yes; the City Bank.
3377. What is the amount of the next cheque? £38 4s. 2d., dated 31st May, 1887, in favour of the Government wood.
3378. What became of that? It appears to have gone through the A.J.S. Bank.
3379. The next? £66 12s. 6d., dated 23rd June, 1887, in favour of the Casual Labour Board.
3380. Has that gone through the A.J.S. Bank? Yes.
3381. The next? £41 12s., dated 7th July, 1887, in favour of the Government Relief Works.
3382. Has that gone through the A.J.S. Bank? Yes.
3383. The next? 19th July, for £5 4s. 6d., in favour of Mr. Burrowes, gone through the A.J.S. Bank.
3384. The next? 4th August, £40 1s. 1d., paid to the Casual Labour Board, through the A.J.S. Bank.
3385. The next? 18th August, £36 3s. 10d., to the Chairman of the Labour Bureau, through the A.J.S. Bank.
3386. The next? 2nd September, 1887, £40 12s. 3d., to the Government Labour Bureau, through the A.J.S. Bank.
3387. The next? 22nd September, 1887, in favour of E. M. Burrowes, £52 3s. 1d., paid into the City Bank.
3388. They all appear to have gone through the Australian Joint Stock Bank except two? Yes.
3389. Can you say whether that mark across the cheque is your stamp or the bank's stamp? I cannot say. That probably is our stamp in a different ink.
3390. All these cheques appear to be crossed cheques? Yes.
3391. *Mr. Waller.*] Do you ever pay cheques that are not crossed? No, not as a rule, unless we miss stamping some of them.

Joseph Holden Wood called in, sworn, and examined :--

- Mr. J. H. Wood. 3392. *President.*] What are you? A merchant.
- 27 Mar., 1889. 3393. In what business? McLean Brothers and Rigg, ironmongers.
3394. What position do you hold in that company? Manager.
3395. Is that a limited company? Yes.
3396. Registered in this Colony? No.
3397. How long have you been in this Colony? Four years, or thereabouts.
3398. Is that the extent of your trade experience in this Colony? Yes.
3399. Have you been always in this line? Yes.
3400. Are you the contractors for the New South Wales Government? We have been.
3401. Are you now? Yes, in some lines.
3402. I believe your company has received a large number of orders from the Casual Labour Board? We have.
3403. Were the goods supplied according to any particular contract, or according to market price? According to the market price, I understand.
3404. Do you know how your company came to be employed in the first instance to supply the goods? I do not.
3405. Have you a schedule of prices for supplying goods to the Government? We had for the general Government contracts.
3406. And you did not supply according to these prices to the Casual Labour Board? I do not think so. I may tell you that I am not fully conversant with the working of the Government orders, but I have brought up the clerk who has charge of that department, so that he may answer any inquiries that I am not conversant with. He is better able to speak upon these points than I am.
3407. Can you tell me what your practice was as regards the delivery of the goods to the Casual Labour Board? The orders were sent in to us, and the goods were delivered. The voucher was attached to the order and sent out. The orders that we received were attached to the vouchers of the goods.
3408. Did you obtain any receipts? Yes; receipts for everything.
3409. Then you can produce receipts for all goods that have been ordered by the Casual Labour Board? Yes.
3410. Whose receipts are they generally? Oh, the various superintendents.
3411. The officers of the Board? Yes; the people out there where the goods were delivered.
3412. Something more than the railway receipts? Yes; some one in charge at the works.
3413. Have you got these receipts with you to-day? Yes.
3414. Will you tell me whether these receipts were obtained on the delivery of the goods or subsequently? Of my own knowledge I cannot answer that question, but I believe on the delivery of the goods. We would not be likely to let the goods out of our hands until we had a receipt for them.
3415. Do I understand that you cannot give me any reason why the Casual Labour Board was not supplied with goods according to the schedule prices? I cannot give you any reason.
3416. Can the clerk who is here in attendance? I do not think so.
3417. If he cannot, is there anybody in your service who can? If he is not aware of it, I do not know who else would be.
3418. At what time did you commence doing business with the Unemployed Department? Mr. Treatt, I think, had it in hand first of all. When I first became aware of the existence of such a thing as the Casual Labour Board it was under the control of Mr. Treatt. Perhaps it might not have been the Casual Labour Board then. I think it was the unemployed,

3419. When did you first become acquainted with the department called the Casual Labour Board? Oh, I cannot answer that question.
3420. Did you know any of the gentlemen connected with the Casual Labour Board? I did by sight.
3421. Can you name them? Mr. John Davies, and within the last three or four days, Mr. Hibble.
3422. Do you know Mr. Houison or Mr. Wells? I do not.
3423. When any one called in to pay the accounts of this Board, who in your company's service would they be likely to see? The clerk in charge of the department—Frank Lawn.
3424. Is he here? Yes; he is here now.
3425. Do you know Mr. Davies? Yes. I simply know him in a general way. I have called for accounts several times myself at the Casual Labour Board. I did not know Mr. Davies from anyone else, until twelve months ago.
3426. Did you ever receive a cheque from him? No, sir. The cheques have been taken to the office, and the accounts have been brought down to me to sign.
3427. You have never received a cheque personally? No; not personally.
3428. Is there any practice in your trade of paying commission to a person who brings in orders or procures custom? Oh, yes; there is such a practice.
3429. What is the general rate? Broker's commission, if the broker brings in the order—1 per cent.
3430. Do you know whether anyone else but brokers get commission;—supposing an architect or contractor brings an order, would you pay him commission? I have heard of such a thing, but it is uncommon.
3431. Do you allow it in your company? We might, if asked, reckon upon the price, but I cannot myself recall any such cases.
3432. Can you recall any case where your company has paid commission to any individual for bringing or causing orders to be brought to you? No, sir, I cannot.
3433. Nor any discount or consideration in the way of money or goods? No.
3434. Will you look at this contingent pay-voucher;—is that signed by you? Yes.
3435. Can you produce the counter receipt for that, and the issue order for the goods? Yes.
3436. Are you quite sure the orders are returned to the Casual Labour Board office? Yes. They are attached to the vouchers and sent back to the Board.
3437. Can you produce your book of accounts, or journal, or whatever it is in, which that order would be reorded? Yes. I produce my day-book, for number 681, showing twenty-eight kegs of powder, fourteen bags, Casual Labour Board account, Hurstville and the National Park.
3438. Does the note on your book show the trainage on that? Yes.
3439. How much? 14s. 6d.
3440. The contingent voucher shows 16s. 6d.? Yes.
3441. Which is right? I cannot say. I have no means of telling.
3442. Do you produce the railway receipts for these goods? Yes.
3443. What is the date of that? The 15th January.
3444. For the same goods that are in the order? Yes.
3445. Have you any other document or record in your office showing that this contingent voucher is correct? I do not know that we have. I cannot say.
3446. Will the gentleman who is here be able to tell us? Yes; he will be able to tell you.
3447. What is your practice in this day-book as regards the noting of the orders? The number of the order is entered and the goods are entered. In respect of this particular order, the number would be entered on the margin of the day-book.
3448. And that number, 681, appears written in the day-book before the particulars you have just given? Yes.
3449. Will you turn over the page of that book? Yes.
3450. Is there any other order in the margin of that page numbered the same, 681? Yes.
3451. Is that the same or another order? That would be the same order.
3452. What is the amount of the second order? Unless you have the account I cannot tell from here.
3453. What is the order? Twenty-three bags, containing forty-six kegs blasting-powder and one cask of zinc, account, Liverpool.
3454. Is not that numbered the same as the previous order? It is.
3455. Is not that an anomaly? It might not be. It may have been the same order.
3456. If we had the order itself it would clear the anomaly away? It would certainly.
3457. Now, what I want to get at is the delivery receipt for that order;—can you lay your hand on the delivery receipt for the second order, No. 681? I produce the railway receipt, dated 17th January, for twenty-three bags, containing forty-six kegs of powder.
3458. Is there anything on your books to show that you have sent in any voucher for that? Yes.
3459. Are you enabled to say that you have sent in a voucher for that? Yes.
3460. That is to say, a voucher for twenty-three bags containing forty-six kegs of blasting-powder? Yes.
3461. Will you swear that there has been one sent in? I believe so. Of course I am all at sea with regard to many of these matters. I simply sign them when they come before me.
3462. Will you look at this contingent voucher [*Exhibit E 5*] ? Yes.
3463. Will you show me the entry for it in your day-book? Yes; that is it.
3464. Will you show me the entry at page 33 of your day-book—order, 604? Yes. Casual Labour Board account of Eckersley, Liverpool Road,—eight kegs powder, thirty two coils fuse; rail to Liverpool.
3465. Will you look at the item immediately preceding that in your book? Casual Labour Board, 603 account, Hornsby Junction—eight kegs of powder, thirty-two coils of fuse—train on.
3466. Are you enabled to state whether separate contingent vouchers have been sent in respect of each of those two items? Not of my own knowledge; but I should think so.
3467. Will you look at the next item? 602, Casual Labour Board account of Woolwash Road—eight kegs of powder, forty-eight coils of fuse—to Campbelltown.
3468. Should there be a separate contingent voucher for that? Yes. There should be vouchers for all these.
3469. Will you look at these entries in your day-book, and tell me whether any one of them has been altered since they have been originally written in? Yes; they have been altered apparently.
3470. Every one of these figures has been altered? Yes.

Mr.
J. H. Wood,
27 Mar., 1889.

- Mr. J. H. Wood: 3471. There is an erasure in one instance, and in some instances they have been written over? Yes.
3472. Is it not a fact that there is not a single figure there that has not been altered? That has been altered—not erased.
- 27 Mar., 1889. 3473. Look at that by the light, sir? I think it has been erased.
3474. Will you look for the railway receipt, which will give us the particulars of this voucher No. 605? I am unable to find it. There is this receipt for the fuse;—Hornsby Junction, Liverpool,—one parcel of fuse, Campbelltown, one parcel of fuse.
3475. This receipt only speaks of a parcel of fuse. How do we know whether it was one coil or twenty coils? We don't know that.
3476. This is not an acquittance to you for thirty-two coils of fuse? When a parcel is made up it goes to the man who takes delivery.
3477. Can anybody in your office tell us whether there are thirty-two coils in it? Yes.
3478. Is there anything extraordinary in the alteration of these three sets of orders? I do not think so.
3479. You said there was only one erasure. Hold it up to the light a little. I think you will see it has been erased in three places? Yes.
3480. Will you look at the next page—35; you will see Casual Labour Board Account, Waterfall,—twenty-four kegs blasting-powder;—has that been altered? Yes.
3481. How many pages are there in that book that you have before you? 201.
3482. Looking through it, can you show me other alterations in the book? There is one erasure on page 181; there is another on page 180.
3483. Whose order is that? Mr. Springall's.
3484. Is that a private order or a Casual Labour Board order? I could not say.
3485. Is there an alteration upon it? Yes.
3486. There is another alteration upon page 103;—whose order is that? Casual Labour Board order.
3487. What is the alteration? From four to six crowbars.
3488. Then, with one exception, unless Mr. Springall's private order is an order on behalf of the Board, the only alterations in that book are in the Casual Labour Board's orders? Yes.
3489. Can you produce the delivery receipt for the eight kegs of blasting-powder? I have not been able to find it in the delivery receipts which I have here.
3490. Here is another one. Will you look at this contingent voucher [*Exhibit E 6*], order No. 579, £20 19s. 6d. Will you kindly show me the entry in your day-book for that? No. 579, Casual Labour Board account, Hornsby, eight kegs blasting-powder, three dozen coils fuse, three dozen pick-handles, two dozen mattock-handles, one dozen axe-handles.
3491. Can you lay your hand on the railway receipt for that? I cannot identify amongst my railway receipts any receipt for the contingent voucher [*Exhibit E 6*]. It is possible my clerk may be able to do so.
3492. Now, will you kindly look at this contingent voucher for six bars $1\frac{1}{2}$ octagon steel £5 11s, order No. 496 [*Exhibit E 4*], and let me see the entry in your journal for that? The entry is Casual Labour Board account, Heathcote, six bars $1\frac{1}{2}$ octagon steel, weighing 1 cwt. 3 qr. 18 lb.
3493. Can you lay your hand on the railway or delivery receipt for that? I produce the railway receipt, dated 14th August, for six bars of octagon steel.
3494. Will you look at contingent voucher [*Exhibit E 2*], no number, dated 31st August, 1888, 24 long-handle shovels at 4s.—£4 16s.; 4 hammers at 8s. 6d.—£1 14s.; total, £6 10s.;—is that signed by you? Yes.
3495. Can you show me the entry in your day-book for that;—do you know where the goods went to? I know nothing whatever about it, except that it is signed by me and the other gentlemen whose names appear upon it. There are several entries here for two dozen shovels in August. On 5th August there are two dozen long-handle shovels for Hornsby and one dozen napping hammers.
3496. The first item in that last order you mention has been altered in your book, has it not? Yes.
3497. From one to two? Yes; there are four hammers down there.
3498. But that does not correspond with this voucher [*Exhibit E 2*]? There might have been only four sent; that frequently happens.
3499. That entry you have just read is for goods sent to Hornsby? Yes; in the account at Hornsby.
3500. Does this butt in the order-book, No. 482, dated 31st July, 1888, correspond with that entry in your book? Yes, it does.
3501. Then apparently it is not the entry in support of voucher [*Exhibit E 2*]? It does not follow; we must get the entry and see whether it agrees with it before we can say that.
3502. Do I understand that that entry at page 239 of your day-book, on the 5th August, 1888, is the only entry you can produce in support of that? Oh no; there are others here, as I have before explained. Here is another voucher on the 16th of August, No. 513, Casual Labour Board, Illawarra Road, two dozen long-handle shovels, consigned to Sutherland.
3503. But that has no hammers in it? No; here is another entry, 17th August, No. 519, Casual Labour Board account, Waterfall, two dozen long-handle shovels, two dozen muck picks and handles, and half a dozen quarry picks and handles. Here is another entry, No. 524, Casual Labour Board, 22nd August, Bankstown, three dozen long-handle shovels. That appears to be all in August. Here is an entry for hammers on the 28th August, No. 553, page 261, Casual Labour Board to Campbelltown, two 7-lb. striking-hammers, two 10-lb. spawling-hammers, Woolwash Road.
3504. Is that the same entry as on the previous page? Yes; I think there is only one entry.
3505. I have got here, "Casual Labour Board, Campbelltown, two striking-hammers (10 lb.), two spawling-hammers (14 lb.);"—does that appear to be the same entry? Yes; I cannot identify that particular entry you ask for in this book.
3506. Do you think your clerk can do so? He should do so.
3507. Who had charge of this book;—had he? Yes.
3508. Do you rely upon any of these other items in your book that you have called my attention to as supporting this contingent voucher [*Exhibit E 2*]? I simply point them out to you; I don't rely upon them. I don't know whether they are part and parcel of this voucher or not.
3509. I suppose if we have in our possession vouchers signed by you for each of these other items you have mentioned from your book, it is a proper conclusion to come to that they must be independent of this voucher. [*Exhibit E 2*]? Yes, sir.

Mr.
J. H. Wood.
27 Mar., 1889.

3510. Can you, from your papers, show me the railway or any other receipt for this? Probably I can. I take it that this delivery receipt dated 14th August, for one parcel of hardware; and 17th August, two doz. long-handle shovels, both for Hurstville, are the items in the contingent voucher.
3511. Are you positive about that? No; I am not.
3512. Can your clerk give evidence on this point? Yes; he ought to be able to do so.
3513. Now will you kindly look at this contingent voucher [*Exhibit E 3, Order No. 552*] for £3 10s., dated 25th September—"six coils of Manilla rope"—That is signed by you, is it not? Yes.
3514. Will you kindly show me the entry for that in your book? I do not see it entered in the book, except this be it—one coil, three-quarter Manilla rope, order No. 552 or 553; I am not sure which—Casual Labour Board account, Rookwood.
3515. But the item in the contingent voucher I show you is "six coils of Manilla rope"? Yes; that is so. I see no other entry for rope but that.
3516. Whose writing is this, "six coils of Manilla rope," in the contingent voucher I show you? I cannot say.
3517. Do you know whether or not it is the writing of any clerk of yours—Is it Mr. Lawn's? I cannot say; I am not sure.
3518. What is the number of the order on this contingent voucher [*Exhibit E 3*]? 552.
3519. Now will you look at page 272 of your day-book? Yes.
3520. Is there an order numbered 552 on that page, the entry being "552, Casual Labour Board account office; one hamper-basket"? Yes.
3521. Is not that number the same number as is on this contingent voucher [*Exhibit E 3*], which is for six coils Manilla rope? Yes, it is the same.
3522. And this contingent voucher bears your signature? Yes.
3523. Is that the way you do business? I cannot follow up the voucher.
3524. This is a voucher that is sent in for payment to a Government Department signed by you, and it shows on the face of it six coils of Manilla rope, £3 10s., while the corresponding entry in your day-book is one hamper-basket? Yes.
3525. I have no further questions to ask you—perhaps my colleagues may have.
3526. *Mr. Waller.*] Who made the arrangement for supplying the Casual Labour Board with goods? There was no arrangement made that I know of.
3527. Who, from the Casual Labour Board, entered into an arrangement with M'Lean Bros. and Rigg to supply the goods? I do not think that any arrangement was made.
3528. Did you spontaneously send the goods without being asked? The orders were spontaneously brought to us, without our going after them.
3529. Why? I presume because we have been the Government contractors and known to sell cheaply.
3530. Was it the supposition of the Board that being Government contractors they should single your firm out to give the orders to, thinking you would treat them as a Government Department? No such arrangement was made.
3531. Was that the supposition on the part of the Board? I cannot say.
3532. Did anything arise afterwards from any member of the Board which would give you the impression that they did expect to be treated the same as other Government Departments? I would like to know what you mean by other Government Departments.
3533. I mean supplying them at the schedule prices? There was nothing to lead us to infer that.
3534. They simply came and sent you orders for goods, being satisfied to pay the same as any chance customer would for the goods ordered? I suppose so.
3535. You made no difference between them and any outside customer in the city? Oh, yes. They were looked upon as a wholesale department—they were looked upon as any wholesale buyer in the city would be looked upon. That is, the Government business is dealt with in the wholesale part of our store.
3536. Did you treat them as you would any other wholesale buyer in the city? No; not exactly in every case.
3537. Did they gain much advantage over other customers in dealing with you? I really could not say.
3538. As a matter of fact, from your knowledge of business, is it not usual in dealing with large customers to give them advantages? That is so.
3539. But in this case you are not aware that they received the usual advantages that are allowed in trade? I am not aware.
3540. Nor are you aware of any application being made for the usual allowance? No.
3541. Have you got all the documents here relative to all orders for goods supplied on account of the Casual Labour Board? They are here in this room.
3542. Have you parted with any at any time to any person? Not that I am aware of.
3543. Would it be contrary to your desire and knowledge if you found that any document had been parted with? It would be contrary to my desire and contrary to my knowledge.
3544. How did you deliver these goods to the Casual Labour Board? We sent them to the railway-station.
3545. Always? Well, for goods that had to go up country there was no other way.
3546. And you took the usual delivery-note from the railway, signed by the railway clerks? Yes.
3547. You, as usual, sent out your firm's delivery-note? There is the Government delivery-note, and that is like this.
3548. Did you deliver any goods at any place other than the railways? Not as a rule.
3549. How would you deliver goods for the other side of Manly? I presume it would be by boat, but the clerk will tell you about that. I am not posted in these matters.
3550. You do not know whether your own clerks went out direct to the camps? No; I do not know.
3551. Would your employees, whoever they might be, carters or otherwise, who delivered the goods either at the railway or at the Manly boat, take them out without receiving a receipt for the goods? It is extremely unlikely.
3552. That is the only check that the goods have been delivered? Yes.
3553. If you found such a practice obtaining in your establishment, you would very soon put an end to it, I suppose? Yes.

- Mr. J. H. Wood.
27 Mar., 1889.
3554. Have you got any carters' delivery-note books in your establishment? Yes.
3555. Have you got any here? I have none here with me.
3556. Do you think it possible that you have got some carters' delivery-books that will show the delivery of goods to the Casual Labour Board? If any of the deliveries were made by the carters we would have them.
3557. Will you be good enough to have the carters' delivery-books sent here from the dates mentioned in your subpoena? Yes.
3558. Do you know Mr. John Davies? I know him by sight. I have spoken to him on several occasions.
3559. How long have you known him by sight? Roughly speaking, about twelve months.
3560. Have you not known him before that? No.
3561. How often have you spoken to him? About half a dozen times. Once or twice in my office in the store, and once down at the Casual Labour Board Office, and I think that is about all.
3562. Can you tell me what he went to the shop about? He came always to pay accounts, although he did not pay them to me.
3563. Who took the payment? It was taken by the accountant.
3564. What is his name? M'Clintock.
3565. Is he with you now? Yes.
3566. Is he a man that you know well? Yes.
3567. And a man that you can rely upon? Yes.
3568. And the other times Mr. Davies went to see you;—what did he go about? I really could not tell you; perhaps to hunt up some orders.
3569. At the time you went down to the Casual Labour Board Office to see him, what did you go down for? I went down for money.
3570. Did you get it? No; I did not then.
3571. Why did you not get it? I suppose it was not ready. The accounts were not passed.
3572. Who did you see? Mr. Davies.
3573. Did he give you any reason for not paying? I could not say now. He was in a temper at the time. He flurried me, and I had to walk out at the door.
3574. He did not pay you? I was not paid at the time.
3575. What date was that? I could not tell you the date.
3576. Is it six months ago? Yes; about twelve months ago.
3577. Since then, have arrangements been comfortable between the Board and your firm? No; we think we have been hardly used in the matter of money.
3578. You have had a difficulty in getting money? Yes. Some of the accounts now have been owing eight months.
3579. Can you furnish us with a statement of what is still owing to you by the Casual Labour Board? Yes.
3580. Have you had reason to complain of the deductions that were made on any of the accounts, taking the commission off or discounts? I never heard of such a thing.
3581. Do you mean to tell me that he paid the accounts in full? Yes; I think so.
3582. When you sent an account (say) for £120 7s. 6d., would he give you a cheque for that amount? I could not answer that question without referring to the books.
3583. So far as you believe yourself there were no deductions on the accounts? I could not say. I do not know really.
3584. Was there any arrangement made about paying commission to Mr. Davies? None whatever.
3585. At no time? Not by me.
3586. By any of your employees? I do not think so. No one has any authority to do that but myself.
3587. I have a voucher here dated 31st August, 1888, signed, I think, by you;—is that so? Yes.
3588. Look at the foot of that and tell me whether that has been paid net? There has been 2½ per cent. deducted from that. It is written in red ink by some one—by whom I do not know.
3589. Do you think that the entry 2½ per cent. was there at the time you signed your name, "John Wood"? I do not think so.
3590. Here is another one, dated 28th August, 1888, signed also by you [*Exhibit E 4*]. Do you see anything at the foot of this contingent voucher? Yes, 2½ per cent. discount.
3591. They are all the same I may tell you—all these discounts of 2½ per cent. Is what I have mentioned information to you? I would not like to say that. It may have come before me and I have not noticed it.
3592. But so far as your memory serves you, did you believe that there was discount at the foot of these documents? No.
3593. Had I asked you without showing you that there was such a thing at the foot of the document, what would you have told me? I should probably have told you that I had never seen it.
3594. Have your clerks got permission from you to deal as they like with accounts in that wholesale manner without your authority? It might have been arranged at some previous time, and I had forgotten it.
3595. Could they have done it without your authority? No; I should have arranged it in the first instance.
3596. Would your clerks occupying positions of trust have power and authority to make arrangements with a good customer—to give him a commission on a good business—sooner than let the business slip? There are only three people in the establishment who would be likely to do such a thing. There is Mr. Payton, a partner in the business, myself, and Mr. Anderson, the manager of the retail establishment.
3597. Now, as a matter of fact—as an old business man in Melbourne and Sydney—you know that business is now cut very fine? That is a fact.
3598. And a business house would, having regard to the keenness of competition, give commission to any one who brought them an order, sooner than lose a good line? That might be.
3599. And is it not a fact that heads of departments are men of experience and knowledge, who are aware of the absolute cost of the goods, and know what they can sell them for? Yes. The smallest boy in the shop has the means of knowing the cost of goods.
3600. Is it not a common thing in business houses that these men sooner than let business pass them would cut down the price, and make arrangements with a customer? Yes; I have known that.

Mr.
J. H. Wood.
27 Mar., 1889.

3601. Could such a thing be done in your establishment without your knowledge and consent? It is extremely unlikely.

3602. How is it that that cannot be done when they can give discount by arrangement? I might have arranged the matter of discount on a previous occasion; although I do not remember about it.

3603. The vouchers brought under your notice a few minutes ago where all unpaid vouchers? Yes.

3604. I produce a voucher of the 31st August last, order No. 543, a paid voucher on which you will find 2½ per cent. is taken out, was that voucher ever brought before you? Oh, yes; it has been brought for me to sign.

3605. Are any other vouchers then in a similar condition, and you have receipted them? Yes, I have receipted them.

3606. For the amount of the account less 2½ per cent.? Yes.

3607. That being the case and seeing how utterly you forgot the system that obtained, might you not forget or not be aware of other matters of a similar nature? No.

3608. You might forget about the discount, but you would not forget about anything else of the same kind? The discount is not much.

3609. It means a good deal of money at the end of the year? Yes.

3610. Do you say that the accounts were always paid for goods delivered to the Casual Labour Board to Mr. M'Clintock? Yes.

3611. Always? Well, I cannot say that. You see my office is on the downfloor under the front shop, and I do not see everything. The accountant's office is in the wholesale store at the back, were the accounts were taken to him from the Government Departments.

3612. How could you find out? By simply asking Mr. Lawn, who is here now.

3613. You have stated more than once that you never had made arrangements directly or indirectly with Mr. John Davies or any member of the Board as regards supplying them with goods? Yes.

3614. You have never made any arrangements, directly or indirectly to supply goods, but do you know if any of your employees have made any such arrangements? No. I cannot conceive of its being possible without my knowledge.

3615. Has Mr. Lawn, your clerk, been with you ever since you have been dealing with the Casual Labour Board? Yes.

3616. Was he quite conversant with all the affairs in connection with the Board? He is quite competent to answer every question you have asked me to-day.

3617. I want to get at the system as nearly as I possibly can in which the business was carried on between you and the Board. What was the first intimation you got of goods being required? I cannot call to mind. As to the goods required, the general practice is that the order is made out by the Board and sent from them. If it is posted I open the letters personally and sort them out for the different departments, and they are taken upstairs to the several departments of the business. The transacted orders are entered first into the rough day-book, next they are looked out and sent away, and there is a voucher accompanied by the order sent to the Board. The voucher is sent out, and we get our receipt by-and-bye. The voucher is signed by the overseer who receives the goods, and the money is sent into us in due course.

3618. Do you ever get verbal orders? I cannot tell you that; they would not come to me.

3619. Who can tell? Mr. Lawn.

3620. Will you tell me what is the usual practice in business when goods are ordered either by any other house in the city, or suppose the business was by any private individual in the city, what is the general system? If they are ordered by a business house the probability is that the order is accompanied by a written order, or the written order may be sent in afterwards, although that is not always the case. The goods ordered by private customers are generally ordered verbally, and the order is taken into the salesman, who executes it in the usual way.

3621. Yes; and what do you do then? The goods are sent out, signed for, and the invoice forwarded in the usual way.

3622. How would you do for a merchant or business man ordering goods? We would look up the orders and send them in, accompanied by the invoice in this case, and get a receipt for the goods. As a matter of fact, the merchants in the town will not take goods unless they are accompanied by invoice.

3623. What I want to get at is this: Suppose you sent away all the usual written orders with the goods, would not possibly a great difficulty arise if a person chose to dispute the correctness of the orders and you had not the original order to refer to? We refer to the original order as entered in our books.

3624. But, instead of sending the original order away, would it not be more reasonable to refer to the absolutely received original order? Yes; it would be safer, certainly.

3625. Do you, as a rule, and is it a practice amongst business men to part with the original order? Never.

3626. Otherwise, you could only refer to the orders in the book as taken from the original order? Yes.

3627. If the book showed scrapings out with a knife and scratchings with a pen, would that be a satisfactory ground for you to fight upon; that is, do you think you would be in a position from that to fight a case, in the event of there being a dispute as to the order? Oh, yes; there is the evidence of the clerk. In the case of a dispute, probably the invoice would be sent in at the time, and the amount would be disputed at the time, when it would be quite within any person's memory.

3628. But supposing there was no invoice sent in, as in the case of the Casual Labour Board? Well, I should think that was very unbusiness-like.

3629. Now, how long do you take, after you transact an order for the Casual Labour Board, to send back the order you receive from the Board attached to the contingent voucher? It is a matter of practice in which I am not competent to give you an answer.

3630. Mr. Lawn can? Yes.

3631. Would you be surprised to hear, or would you think it a correct statement, that you had not sent them back for a month? I know, as a matter of fact, that accounts are sent out at the end of the month, and these vouchers come in a bundle about 2 inches thick for me to sign.

3632. What warrant would there be that the goods for the Casual Labour Board were as per order; how would the overseer or superintendent of each camp be able to know that they were right? That is a matter for the department; not for us.

3633.

- Mr. J. H. Wood.
27 Mar., 1889.
3633. You are quite satisfied that whenever you delivered the goods you got a receipt from the person receiving them? Oh, yes.
3634. Quite satisfied? Yes.
3635. I fancy you told the President some time ago that you transacted the order sent for the goods and at the same time sent vouchers with the original orders attached to the Casual Labour Board? Yes; that was so.
3636. Then, if that is the case, how is it you tell me that a month used to elapse? They might have been all made out at the same time at the end of the month. As I explained before, at the end of the month the whole file of vouchers would be signed.
3637. Perhaps you do not quite understand me. I want to know what was the practice, as a matter of business;—you say that where you failed to send the invoices when the goods were sent to the Casual Labour Board, you transacted the order and sent direct to the Board the contingent voucher with the order attached; and now you tell me that probably, and as a rule, the contingent vouchers with the orders attached would not go out until a month afterwards? It might be so.
3638. But the two things cannot agree? It might be that the accounts would not go out for a month. There are instances where goods might be supplied on the 5th of the month, and then the orders sent out on the 31st.
3639. Then we may take it that there would be no particular rule in the matter? Yes. I know that the orders were sent out for this reason, that two orders from the Casual Labour Board were incomplete. These papers were from Mr. Lawn, and I wanted to know the reason why he could not supply these orders, and his reply was that the orders were attached to the vouchers.
3640. But supposing the orders did not go out immediately you transacted the order, how would the Casual Labour Board know that the order had been executed? By the voucher and receipt.
3641. But what is to enable them to know. There is an example in one of the vouchers, of steel being sent $1\frac{1}{8}$ instead of $1\frac{1}{4}$ —there is the receipt and the railway note, but the railway note does not give the weight? The railway note ought to agree with the invoice.
3642. But, take another instance: There are two coils of rope, or two coils of wire, and that would appear on the railway note as an entry “wire” 17 cwt.? If it were charged to you 17 cwt., and it had to be paid as such, you would have all the particulars you wanted.
3643. If the railway charge is 17 cwt., and the invoice comes in showing 32 coils, and there are only 30, how is the railway receipt to teach me that you sent 32? I cannot say.
3644. Presuming that you paid by weight it would be all right, but you do not pay by weight; presuming that you paid by quantity, and the railway receipt showed quantity. Here, for instance, is a receipt—“Parcel hardware”—does that present any guide to the quantity? No.
3645. There is another receipt—“One coil of rope”? Unless the weight is there it is no guide.
3646. Here, again, is “a parcel of fuze”—is that any guide to me? None whatever.
3647. So to return to what I have said, these railway notes were valueless to the Casual Labour Board, as documents showing either the weight, number, or value of packages, unless they were supported by invoices showing what was sent. There was no guide whatever? No guide.
3648. Do you think it is a business-like plan to send out goods, small or great, without the invoices of such goods? Well, that opens up a wide field. We never send out invoices with retail goods, for instance. It is more a matter of practice than business, I think.
3649. Is it a matter of practice? Pretty much, it is.
3650. Have you anything beyond the books which you have brought to-day to show that those goods were ever ordered? I do not know of anything. Perhaps Mr. Lawn might be able to point out something to you.
3651. Supposing I disputed that particular order, have you any evidence beyond the order in the rough day-book? Mr. Lawn will be able to answer that question.
3652. This rough day-book, is it simply a book which you would place upon the counter of your clerk, and into which would be entered the orders from each of the departments from which the goods might be ordered? That rough day-book is in charge of the clerk who has charge of the Government orders.
3653. Have you got separate classes of books for the different departments? Yes.
3654. I notice in the rough day-book, page 248, August 16th, in lead pencil, the number 259—I take it that is an entry in the clean day-book? That is, in the journal or general day-book—I think it is.
3655. What set of books do you keep in the shop? There is a rough day-book or order-book, then there is a day-book into which are copied the entries in the rough day-books; there is one general day-book from which we copy into the ledger.
3656. Have you a journal as well as a general day-book? Yes.
3657. So that you have a rough day-book, a general day-book which comprises the general orders in the different rough day-books; you pass all the orders from the rough day-books into the general day-book, then into the journal besides, and after that you have the ledger? Yes, the entries are copied from the journal into the ledger.
3658. These figures here in lead pencil, I suppose, refer either to the ledger or day-book? Yes; I think to the general day-book.
3659. Would the entries in the general day-book contain all the entries in the rough day-book? Yes, the whole of them, absolutely.
3660. That being the case, when they are entered into the general day-book, what becomes of the accounts? They are transferred into the ledger.
3661. Brought into the ledger then by item? Yes.
3662. So that the ledger then is a strictly accurate record of the accounts? Yes.
3663. That being the case, supposing there were entries in the rough day-book of certain goods sold and delivered to certain people, and two or three entries appeared of the same goods in the rough day-book, would these entries in duplicate or triplicate forms be passed from the rough day-book into the general day-book, and from that into the ledger? Yes, that would be so.
3664. Otherwise it would not be correct book-keeping? No.
3665. I would draw your attention to the rough day-book, date January 10th, 1889—do you see there “order 681”? Yes.

3666. Is the item "28 kegs of powder," charged to the Hurstville account, entered into the general day-book? Yes.

3667. And from that into the ledger? It should be so.

3668. Will you look at page 128 of the same book, January 12th, 1889. There is a number there as against the order 681 on account of the Casual Labour Board—"46 kegs of powder, one cask of zinc"—are these two, apparently from the same order, from the Casual Labour Board? I think so.

3669. Will that also appear in the ledger? Yes.

3670. Would you be able to produce the order from the Casual Labour Board for No. 681? I have not got the orders—they were returned.

3671. Are mistakes often made in a book like the rough day-book? I do not see why there should be.

3672. Mistakes I suppose might arise from a customer giving a verbal order and afterwards changing his mind, telling you to give him four dozen instead of six dozen, or six dozen instead of four dozen? It is possible in such a case as that.

3673. Do alterations often occur in the rough day-book? I won't say often, but they do occur.

3674. From what causes? Well, an alteration of an order for instance. An order might come for a certain line of goods, and the quantity be altered. It might be a written order. We might get an order from a customer up country this morning, and he might suddenly change his mind, and order double the quantity or half the quantity, as the case might be.

3675. In that case, would it not be a common practice to notify the alteration in the rough day-book,—as so and so, and the reason for the second order? It is too much worry to go into all these things—life is too short for that.

3676. But when the alteration occurred through the purchaser changing his mind, would it not be worth your own or your clerk's while to show your authority for changing the order—you say no. But how can you reconcile that with the fact that it is worth your clerk's while to go to the trouble of using his knife in changing the orders in the book. It is a fact that this has been done, is it not? Yes.

3677. It is a fact that in two or three cases these figures have been scratched out with a knife? Yes.

3678. Does it not strike you that in the rough day-book it is more natural for the clerk to put his pen through an entry than to scratch it out with a knife? It would doubtless seem much more natural

3679. Then does it not strike you as peculiar that the clerk should make an erasure like that in the rough day-book? No; I do not think so. He might make a blot; or he might explain it in two or three ways.

3680. I draw your attention to page 33 in this rough day-book, dated October 16—were there not four distinct figures altered? Well, there is some scratching of the paper where those figures are.

3681. Do you think that was done simply on account of a blot? I do not think anything about it.

3682. Do you think clerks, as a rule, are so particular about rough day-books that they would take the trouble to scratch out a blot? Well, the rough day-book must be clearly written, and there must be no hesitation about the figures, because they have to go into the day-book at the end of the day.

3683. You say it is quite necessary the figures should be plain—do you call these figures plain? Yes; they are readable now.

3684. Would you be prepared to swear to this figure (*indicating one*) without any hesitation? Yes; it is "8."

3685. Can you explain what it was before? No; I cannot give the slightest opinion.

3686. Well, I could. Can you swear to the figure underneath? No.

3687. Do you call that clearly written—do you call this figure "10" clear? Yes; I take that to be quite clear.

3688. Do you not think it a most reprehensible thing for a clerk to do business in the way that it has been done here—erasing his figures by means of a knife, and then blotching figures all over, so as to make it next to impossible to ascertain what they were? No; I do not think it reprehensible; a great deal depends on his reason for doing it. He might have made a wrong entry for instance.

3689. Is it usual in any business to allow a knife to be used in the books? No; it is not. It is very seldom done in the rough day-book; it is usual in the ledger; but I should not feel inclined to rap anyone over the knuckles for it.

3690. But it is not businesslike? I admit that.

3691. Would you be inclined to get rid of a man who did such a thing? I do not know that.

3692. I suppose, however, I may take it for granted that you do not allow the books to be mutilated in the manner in which this has been mutilated; I have already explained to you my feeling in the matter before. I do not care to see it, but I should not rap anyone over the knuckles for doing it once or twice.

3693. Will you read order No. 602? Yes. "16th October, Casual Labour Board account—eight kegs of powder, forty-eight coils of fuse, to Campbelltown."

3694. Have you any doubt in your own mind that you have read those figures correctly? No.

3695. Has there been any alteration made in those figures? Yes.

3696. Has that eight kegs of powder always been eight? I should not think so.

3697. What does it look as if it had originally been? I think ten.

3698. Would you say that the forty-eight coils of fuse was originally forty-eight? Yes.

3699. You are quite satisfied now that they are as you have read them? Yes; eight and forty-eight.

3700. Did you supply anything else to the Casual Labour Board but tools, fuse, and gunpowder? I could not say. I am not acquainted with what went out there at all. I know nothing whatever about it.

3701. Mr. Lawn would know? Yes.

3702. There was an order, I think you said, from Mr. Springall? Yes.

3703. And I think you told the President that you could not ascertain whether that was on Mr. Springall's private account, or the Board's? I think I told the President I was not aware.

3704. Do you know if that account has been paid? I could not tell you.

3705. Do you think it would be a proper thing to take orders from persons in the employ of the Casual Labour Board without ascertaining whether it was for the Board, or with the authority of the Board, or for themselves only? I should say it would be decidedly improper if they gave an order for the Board. I should think that the orders from the Casual Labour Board generally came through one channel, but that could be ascertained from the clerk.

3706. You anticipate, perhaps, that Mr. Lawn could tell us? Yes.

Mr.
J. H. Wood:
27 Mar., 1889.

- Mr. J. H. Wood.
27 Mar., 1889.
3707. Of course you cannot go into these different items in the accounts? I know very little about them.
3708. Personally you would not supply on the order of the officials of the Casual Labour Board without first ascertaining whether they had authority to give the order, or the goods were for themselves or for the Board? I want to qualify that. If the employee of the Board had been in the habit of ordering the goods verbally, supported by a written order, I should say it would be quite proper to take his order if he came in at any time. It all depends upon his authority. We would not give supplies to any employee of the Board.
3709. What authority did you get in the first instance for receiving orders from the employees of the Board? I cannot tell you.
3710. Why did you adopt the system of returning the original orders to the Casual Labour Board? I presume under instructions.
3711. Do you know of your own knowledge? No. I believe the practice is adopted by another department in the Government.
3712. How can you identify any of these particular vouchers with any particular order? I cannot tell you, but I should think the number would do that. Generally speaking, I should say the number would be the mark.
3713. If you got an order, we will say dated 21st May, 1888, ordering eight kegs of powder and five coils of rope, and so on, how would that order be entered in the rough day-book? The number of the order, the department where it was to go to, if it were necessary to put that in, and the goods themselves would be placed opposite.
3714. Would you put the date of the order that you received? Not necessarily; but I really do not know.
3715. For instance, take this book. You see the 16th October entered here. I want to know whether, supposing that the 16th was the date upon which the order arrived, and the 14th the date at the head of the order, the 14th or 16th would be the date entered? Oh, we would date it as the 16th.
3716. Do your contingent vouchers disclose upon the face of them for what particular places these orders were transacted? I do not think so.
3717. We had some difficulty in finding one or two things this afternoon. This appears to be a grave omission in the clerk's entry? No; it appears to be a weakness in the entering of the books.
3718. Call it a weakness or what you like, it prevents the identification of the voucher, and makes it difficult in most cases. I will take page 33, order No. 602, which you read as being for eight kegs of powder and forty-eight coils of fuse. If the order should disclose that it was for eight kegs of powder and for thirty-two coils of fuse, which do you think would be most likely to be correct—the original order or the rough day-book? The rough day-book, because the original order may have been altered by another order or verbally.
3719. Is there anything in the rough day-book to show whether such an alteration was made or otherwise? It has been altered.
3720. Is there anything to show the authority for the alteration? No.
3721. Does not that suggest to your mind the advisability of what I said was necessary just now—that you should put in the day-book the reasons of such alteration, in place of scraping out the original number with a knife? Well, you know if you were to follow everything to its extremity you could not do any business at all.
3722. Very well. Supposing I refuse to pay you on this order, who is going to force me? We would have to get evidence as to the quantity supplied.
3723. Where are you going to get it? From the person who executed the order.
3724. You have nothing here in the Government railway delivery-notes to show that;—where then is the evidence you are going to get that you ever delivered them at all? Well, we have evidence as to the delivery of so many kegs of powder.
3725. Where? We have the railway receipt.
3726. Where? That I cannot tell you; but in a general way we would have the receipts.
3727. Supposing, as in this particular instance, you have not been able to find the cart-note for them, I ask you how you are to prove that they were supplied—how are you going to identify these contingent vouchers that in no way disclose where the goods are going to be delivered? With the delivery-note of the railways.
3728. What use is that? It is proof that the goods were delivered if they were signed for. Nobody would sign for them without their being delivered.
3729. We have got no proof of the delivery, and we have got no proof of the order having been given;—here is a case for example: There is a system obtaining between your establishment and the Casual Labour Board about the sending out of goods that makes it nearly impossible in some cases to trace the supplies, and causes a great deal of time to be wasted before you can identify your contingent vouchers with the cart-notes? It is not fair to argue from that one instance that the whole system is wrong.
3730. In a great many cases that the President asked you about—I do not know how many cases there were—you failed to identify them? But they are here marked on the railway receipt.
3731. In the absence of the original order, and the contingent voucher not showing the destination for which the goods were intended, and the contingent voucher not agreeing with what is stated on the butt of the order-book, does it not appear to be a very difficult matter to say that all these accounts are correct? No, I do not think so.
3732. If an entry appears in your ledger as from the original rough day-book, and the Board say that they had cancelled that order for the goods there described, would we find the order cancelled in the rough day-book? I think it is extremely likely, but I am not sure about that, because the goods may have been supplied before the entry went there, and in that case they would have to go through our credit-book, because having already appeared to the credit of the stock they cannot be debited to the stock.
3733. If a statement was made to this Commission that some item of these goods that you debited the Board with was a mistake and had been cancelled, where would you find evidence from your accounts of of their being cancelled? I cannot say.
3734. You know Messrs. Miles and Mason, who took over the affairs of the Casual Labour Board? Yes.
3735. Was any application made by them to you about some difficulties they had with the accounts that they wanted to have explained? Yes.
3736. What did you do for them? At once sent our clerk down to explain them.
3737. What was his name? Frank Lawn. The same clerk that I have here now.

3738. You did not send them the books in the office? He may have done so; I do not know.
3739. Has anybody been talking with you lately as to the late Board and this Commission of Inquiry—I mean anybody connected with the Board? No. Mr.
J. H. Wood.
3740. There has been no one connected with the Board up to see you about anything? Oh, some one that was examined here yesterday said he was up there. 27 Mar., 1889.
3741. Who was that? I forget his name.
3742. Larnach? No.
3743. Neale? No.
3744. Hibble? Yes. He was up there to-day.
3745. Did you see him? Yes.
3746. What was he up about? He was giving some explanation about the accounts.
3747. There was nobody else there about the accounts? I went down myself two or three times to the Casual Labour Board.
3748. Nobody has been up to your place about them? No.
3749. *Mr. Franklin.*] Do the Government furnish your firm with these contingent voucher forms? Yes.
3750. Is it not a condition of the contract for the supply of stores that all stores paid for through the Treasury are at the Government contract rates? No; I do not think so. That would depend upon what department it is. We have no contract at all with the Casual Labour Board.
3751. I am asking you whether you don't understand by the conditions of the contract, no matter where you send the stores to, if they are paid for through the Treasury, they were to come under schedule rates? No.
3752. Then, in forwarding your account, did you note at the head of your account on the voucher that the goods were not under contract, as provided by the foot-note of the voucher? No.
3753. Will you read that foot-note? Yes. "Supplies of articles or services by a contractor, but not contracted for, are required to be stated separately, with the heading note—'not in contract.'"
3754. Would it not occur to you that this note applies to all exemptions from the Government contracts, and were you exempt in supplying the Casual Labour Board? I should look upon that as relating to a different service, and altogether out of the schedule. For instance, we had the Government contract at the time of the Soudan expedition, and we supplied a great many articles that were outside the contract—articles that we got from other firms, such as Lassetter's, and then we marked these articles as being outside the contract.
3755. Then I understand that you don't consider that you were bound to supply the Casual Labour Board as coming under the terms of your contract? No.

Frank John Lawn called in, sworn, and examined:—

3756. *President.*] Are you in the employ of Messrs. M'Lean Brothers and Rigg? Yes.
3757. How long have you been there? Four years in April last.
3758. Do you recognize these books? Yes.
3759. What do you call them? The rough day-books.
3760. Who kept these books? I did.
3761. Is all the writing in these books yours? I believe in one of the day-books there might be a leaf or so not written by me, and that would be about all.
3762. Do you recognize these forms of contingent vouchers? Yes.
3763. Who filled these up? I did.
3764. Are these in your writing? Yes.
3765. Your firm did a large amount of business with the Casual Labour Board, did it not? Yes.
3766. Were you in the habit of receiving their orders and entering them in your rough day-book and afterwards making out these contingent vouchers? Yes. I did not make all of them out.
3767. Will you look at this one [*Exhibit E*], Order No. 681? Yes.
3768. Is the body of that in your handwriting? Yes.
3769. Who is it signed by? It is signed by Mr. Wood.
3770. Will you turn up the entry of that in your rough day-book? Yes. "Casual Labour Board Account, Hurstville. 28 kegs of powder, National Park."
3771. Where did you get the information from that you put in that book? From the order.
3772. Can you lay your hand on the railway receipt for that? Yes. I produce the railway receipt, 15th January, 1889, for fourteen bags, containing twenty-eight kegs of powder; and I also produce the Ordnance permit-book, showing that twenty-eight kegs of powder were ordered to be sent to this address by us. This is a copy of it. They have the receipt; that is in the name of J. Springall, National Park.
3773. Did you take these orders yourself? Well, I generally took the orders when I was there. Of course, if I were absent at all, the orders would be given to one of the other salesmen, and I would give the necessary information.
3774. Were written orders always given to you? No; not always.
3775. Who gave the other orders? Mr. Davies or Mr. Hibble.
3776. And was the entry you made in the rough day-book from a verbal order or a written one? It would only be from a verbal order in very urgent cases.
3777. Did you not ask, after getting verbal orders, to have them put in writing? I asked for that as soon as possible.
3778. And did you in all cases get the written orders? I could not say in all cases; but I do not think there was more than once or twice that we failed to get the written orders. We got them eventually before we sent the order in.
3779. Look at this contingent voucher [*Exhibit E 5*], Order No. 604—in whose writing is that? It is in one of the clerk's handwriting.
3780. Could you swear to it? No; I could not swear to it. It is signed by Mr. Woods.
3781. Will you look in your rough day-book and show me where that is entered? Yes.
3782. In whose writing is that entry in the rough day-book. Mine.
3783. Is that the way in which it was originally entered? No; it was ordered as four kegs of blasting-powder and

Mr.
F. J. Lawn,
27 Mar., 1889

and sixteen coils of fuse. The order was brought up in that way ; but before the gentleman left me he told me that he would want double that quantity, and he asked me to send the second four kegs on the next powder-day.

3784. Was that a verbal order ? I believe that this order was verbal, and that I received a written order afterwards.

3785. Do you know who the gentleman was ? I think it was Mr. Hibble ; but I could not say whether it was Mr. Hibble or Mr. Davies. I think they came in together. They said the powder was very urgently required.

3786. Did you get written orders for these afterwards ? Yes. That is order No. 604 that I produce, showing eight kegs and thirty-two coils. These are the quantities that we have the receipts for.

3787. And if the order butt I have here shows four kegs and sixteen coils, which is right ? This book is right, because we have got the usual receipts for everything in these books. I produce three railway receipts of different dates, 18th October, 1st November, and 27th October. One of those represents a parcel of fuse.

3788. Is that the only receipt that you have got for the 32 coils of fuse ? Well, I counted them and saw that there were thirty-two, to the best of my knowledge.

3789. Will you look at contingent voucher [*Exhibit E 6*], order No. 579—is that in your handwriting ? No ; it is not in my handwriting. It is for eight kegs of blasting-powder, three doz. coil fuse, three doz. pick-handles, two doz. mattock-handles, and a dozen axes.

3790. Can you show me that in your rough day-book ? Yes.

3791. Is that entry in the book in your own handwriting ? Yes ; I produce the railway receipt of 18th October for eight kegs of blasting-powder.

3792. Where shall we find the order for that ? The Casual Labour Board would have that.

3793. Did you send the original orders back in all cases to the Casual Labour Board ? Yes.

3794. Is there anything to show that there has been any alteration on that ? There is no alteration, except that I have added four bags on to the powder, which they never thought of writing on the order.

3795. Look at this contingent voucher, 25th September, 1888, order No. 552 [*Exhibit E 3*—is that in your handwriting ? Yes.

3796. Will you find that entry in your rough day-book ? Yes ; I supplied a hamper-basket, but it was returned and credited.

3797. The entry in your book is about "one hamper-basket," but this contingent voucher is "six coils of Manilla rope" ? Yes ; but I made one entry in the order day-book, "six coils of Manilla rope."

3798. Where is it ? I do not know.

3799. Now, sir, is there any entry in your book for "six coils of Manilla rope" ? No ; I can find none.

3800. Where did you get this order for six coils Manilla rope from ? I cannot recollect.

3801. Is it in your handwriting ? It is very much like it, but I could not swear that it is my handwriting.

3802. Have you any reason to doubt as to its being in your handwriting ? I have some reason, because it is not in my books. I have the hamper-basket, but that I remember was returned.

3803. Do you believe that the document I have placed in your hands is an original document or not ? I do not know how it is ; it should have been entered, but it is not there.

3804. If it is not in your handwriting is it not in the handwriting of somebody who writes very like you ? Yes ; I remember them having the rope, but it is a great mistake my omitting to enter it.

3805. Look at page 272 of your rough day-book ; is there a note of any number on that page showing the same number as contingent voucher [*Exhibit E 3*], order No. 552 ? Yes ; "Casual Labour Board 552— one hamper-basket."

3806. In whose handwriting is that ? It is in my handwriting.

3807. Now, sir, have you any reason to doubt that the writing in that contingent voucher [*Exhibit E 3*] is your handwriting ? No ; I could swear that that is my handwriting.

3808. And the entry in the rough day-book is your handwriting ? Yes.

3809. How do you explain the entry 552 in the rough day-book, which is a hamper-basket, and 552 in the contingent voucher, signed by Mr. Wood, which is six coils of Manilla rope. Can you give this Commission any information about it ? I cannot.

3810. On your oath ? No. I do not know how it has got there. I know it was written by me, that it was supplied, and returned, and that we never charged for it. The only explanation I can give is that I have sent the rope and sent the voucher, and omitted to make the entry.

3811. Will you produce to me any receipts, whether from carters, the railway office, or the steamer, for these goods in the contingent voucher [*Exhibit E 3*] ? I have only got the railway receipts here.

3812. Just look and see ? No ; there is nothing here. We might have it in the receipt-books.

3813. Have you ever been asked about this item before ? I never saw this before.

3814. Is it not an extraordinary thing that you should have before you a document, apparently in your own handwriting, for six coils Manilla rope, of which there is no record in your books ? That is what I cannot make out—I cannot make it out at all.

3815. Can you recollect anything about it. The date is the 25th September, 1888 ? No, I do not remember.

3816. Is your memory bad ? No ; but I have got a good deal to think of.

3817. I do not suppose you have got so much as I have to think of, or as any gentleman in this room has to think of. Let us have your own story about the hamper-basket. Did you get a written order for the hamper-basket ? Yes ; that is the order—552.

3818. Who sent the order ? The Casual Labour Board.

3819. Have you got the original order in your possession ? No ; it was returned.

3820. What is the history of this basket ? It was returned because it was too expensive, I think.

3821. What was the price of it ? £7, I think.

3822. Have you anything here that will show what you charged for the basket ? No.

3823. Have you any entry in the office ? I do not think so.

3824. You cannot recollect what it cost ? I know it was marked retail for about £7 ; and we had it in stock for a long time and could not sell it.

3825. You sent that basket in response to a request, and they sent it back to you ? Yes ; and we credited it.

3826. *Mr. Waller.*] Who said the hamper-basket was too dear? Mr. Hibble, I think; he brought it back.
3827. Are you sure? Well, I am not certain whether it was Mr. Hibble or Mr. Davies.
3828. You will swear it was one or the other? Well, I believe so.
3829. You believe so—don't you know them both? Yes; I know them both.
3830. Why do you say you believe? The hamper-basket may have been brought into my room when I was out. Someone told me it was brought back. It did not come back in the ordinary way.
3831. Where were the goods supplied to? The hamper was, I believe, addressed to the offices of the Board, at Goulburn-street.
3832. Would the books disclose the fact that it was directed to the office? Well, I know it went to the office.
3833. Is there the same mystery about all the goods that leave your office, as to where they are going to, as there is about this basket? No.
3834. Do you usually know when goods leave your stores where they are going to? Well, we are supposed to do so.
3835. Do you take precautions to know that they are delivered? Well, it all depends where the goods are going to. Supposing they are going to Hurstville, I enter them in the despatch-book, and state where they are going by rail.
3836. But if you were sending them to me, you would send them out without taking any note of the receipt of them? Well, we would not do it in every case.
3837. Don't your carters get receipts? Generally.
3838. But it was not done in the case of the Manilla rope or the hamper? No.
3839. Do you know the date the hamper was brought back? No.
3840. In fact, you know nothing whatever about it? Nothing beyond the fact that I sent the hamper, and it was brought back.
3841. How is it that you made the order number in the contingent voucher correspond with the number of the entry in the book as against the hamper? I could not say. All I know is we received the order for the hamper basket. It was returned and credited, and we never charged the Casual Labour Board with it.
3842. Can you show the entry of the credit in the rough day-book? No; it would be in the ledger.
3843. Who is the ledger-keeper—is he near you in the office? He is within 20 yards of me.
3844. And is it the usual plan, that you take the article to the ledger-keeper, and tell him to credit it? Yes.
3845. You were not there when the hamper was returned? No.
3846. Were you absent long? No; I was not out long.
3847. Who received it? I could not remember.
3848. Could you tell whether Mr. Davies or Mr. Hibble returned it? No; some of the employees said it was returned from the Casual Labour Board. That was all.
3849. How was it credited? I would tell the ledger-keeper.
3850. Who told you that it was too expensive? The next day, or a couple of days afterwards, when they came up, I asked why the basket was returned.
3851. Who came up? I think it was Mr. Hibble or Mr. Davies—either one or the other.
3852. And they told you what? That the basket was too expensive.
3853. Did they get another one? No. They got one a long while afterwards, but it was too little.
3854. Will you swear that there is an entry in the books crediting this particular hamper? Yes.
3855. Which book do the credits pass into first? The ledger direct.
3856. How long ago would that be? I could not say.
3857. How long would it be from the present time—speaking generally? It must have been before the end of September.
3858. Will the credit appear in a straightforward manner without any interlining. Will it be a credit that will show the thing fair and true, with the entries before it, and the other entries following afterwards in their natural order? Yes.
3859. Is it such credit as will not raise suspicion in anybody's mind as to the credit being an after thought? Oh, yes. I told the ledger-keeper to credit it.
3860. Who is the ledger-keeper? Mr. Jarrett.
3861. Did he make an entry in the book at the time? I don't know whether he made an entry in the book on that occasion; he used generally to make an entry in the book of anything of that kind.
3862. What authority had you received for supplying goods to the Casual Labour Board at all? I don't know; we got orders to do so.
3863. Who were they signed by? By Mr. Davies, the Chairman.
3864. Always by Mr. Davies? I could not say that Mr. Davies always signed them.
3865. How do you know that Mr. Davies was Chairman of the Board? I did not know until he brought two or three orders.
3866. Did you supply anything previous to that for the unemployed. Who signed that particular order? I think it was Mr. Wells.
3867. Had you any means of knowing that Mr. Wells had anything to do with the Casual Labour Board? I did know that he had.
3868. Were any arrangements made by the Board as to the delivery of goods to orders signed by the superintendents and other officers of the Casual Labour Board? Yes; I got strict injunctions to supply no goods without proper orders from the Chairman.
3869. Did you ever honor any orders without his signature? Not that I can remember.
3870. Did you know a man named Springall? Yes.
3871. Did you ever honor any of his orders? Not that I can remember.
3872. Will you turn to page 180, I think, in your rough day-book? Yes.
3873. Do you see an order there by Mr. Springall? Yes; that is a private order.
3874. Has it been paid? No; that has not been paid.
3875. You are quite sure that there was no voucher sent to the Casual Labour Board in respect of that order? Quite sure. He said he would pay it himself.
3876. What made you send back the orders to the Casual Labour Board? Mr. Davies gave an order verbally

Mr.
F. J. Lawn.
27 Mar., 1889.

- Mr. F. J. Lawn,
27 Mar., 1889
- verbally to me that we should do so. He stated that unless we sent the original orders the Board would not recognize our accounts.
3877. Do you think it is a good thing to part with the original orders? I do not.
3878. Why did you not suggest sending them invoices, as was the custom of the trade, and let them compare them with the butts? Well, we sent them back to the Colonial Architect's Office in the same way.
3879. Will you look at page 33 in the rough day-book? Yes.
3880. Do you notice these three entries there numbered 603, 604, 602? Yes.
3881. What are the orders? Eight kegs of powder and thirty-two coils of fuse.
3882. Have these figures been tampered with? Yes.
3883. What system has been adopted? It looks as if I had scraped out the number underneath and written "8."
3884. You say "it looks";—have you any doubt about it? No; it was scraped out.
3885. Why did you scrape it out? Well, that was the regular practice.
3886. Just look a little lower down—"600—ten kegs";—what was that originally? I could not say.
3887. What is next? 48. That is altered to 60.
3888. You altered that? I scraped 48 through with a pen and put 60.
3889. Can you read the 48 quite plainly? I can read it fairly.
3890. Have you any doubt that it is 48;—standing here in the light, you can see quite plainly? No.
3891. Why did you not adopt some straightforward manner of altering the orders, by passing your pen through them, instead of scraping them out? I don't know. This is only just a rough book.
3892. Whether it is a rough book or not, there is no reason why you should have been constantly using the knife? That is because the goods had been ordered verbally; afterwards they used to alter the orders by asking for twice the quantity.
3893. Why is it done by knife? I cannot say.
3894. Do you use knives as a rule in the other entries? There might be a few instances where I have used the knife.
3895. Show me them? I might find a few other entries where I used the knife here. [*Witness examined the entries.*] No; I never had occasion to alter the others.
3896. Can you see any alterations in the other entries, except where the Casual Labour Board has been dealing with you? No.
3897. Can you account for that? All the other orders are sent in by post and entered from the orders into the book; but in the case of the Casual Labour Board they had the orders in their own hands. I would enter them in, and they would come half an hour afterwards—Mr. Hibble or Mr. Davies—and constantly alter the orders.
3898. How soon would they return and make these alterations? Perhaps that day or the next day.
3899. How long was it before you commenced to transact these orders? As a rule these orders were supposed to be got away at once. I think they always were.
3900. Then what was the good of altering an order verbally to you, and you altering the order in your rough day-book, if the order was already transacted? Well, in the case of the powder, for instance. There are only one or two powder-days in a week. They would know that these alterations could be made for the next powder-day.
3901. So the alterations would only be in the case of powder? Yes; but there might be one or two other cases. Nearly all the alterations, however, were in powder.
3902. Did you often get these verbal orders? Yes, very often, and then the written ones the next day. I would never take a verbal order, except from Mr. Davies or Mr. Hibble.
3903. Have you got power to make arrangements with anybody as to concessions to be given in dealing with a firm or with people who bring you large orders? No; I would not do it unless I spoke to Mr. Wood.
3904. Did you make any agreement with the Casual Labour Board? No; I did not.
3905. You never paid commission? I never paid a shilling.
3906. Who paid the cheques for the goods? They were paid at the office by Mr. Davies. He would come to me, and I would take him into the office and leave him there.
3907. And he would go perhaps to Mr. Wood, or someone else? No; he only went to the accountant or receiver.
3908. You are quite sure there was no commission and no concession? Yes.
3909. Did you deal with this Casual Labour Board according to the schedule prices of the other Government departments? No; we did not, because most of the orders were for articles that were not under contract. They were really different, and we would have sometimes to purchase the goods elsewhere and pay a much higher price than we would get.
3910. Did you supply any other things for the office besides this hamper? Yes; buckets, and a few odd things.
3911. Anything like wines or spirits? No, sir; never.
3912. Have you private accounts with any members of the Casual Labour Board or their officers? I believe there was one private account with Mr. Hinchcliffe; and Mr. Davies got a few things.
3913. Had you an account in his name? Yes, we had an account.
3914. How does the account stand now? I do not know.
3915. Do you think that any of these private accounts would have by mistake gone upon the contingent vouchers of the Casual Labour Board? No; they could not have done that.
3916. *President.*] Have you anything beyond your books to show that the goods were ordered that were included in the various contingent vouchers? Nothing.
3917. Did you ever act on verbal orders without getting written orders afterwards? If I acted on the verbal orders I always got a written order afterwards.
3918. Then if we find contingent vouchers for goods supplied for which there is no written order, we can conclude that the goods were not ordered at all? Yes.
3919. Can you tell me how long you kept these issue orders before you sent them back to the Casual Labour Board? Well, it all depends upon how long it would take to make out the vouchers. We have often kept them to the end of the month.

3920. Have you been down to Mr. Miles's office, or the office of the Casual Labour Board, lately about any items in dispute in the accounts? Yes. They asked McLean Bros. and Rigg for a statement of all outstanding accounts, and I brought it down to them.

Mr.
F. J. Lawn,
27 Mar., 1889.

3921. Did they ask you for any explanation? They asked me about one particular line. I think it was the hamper-basket.

3922. I thought you said to me you had never heard anything about that? I never heard until lately.

3923. Then it has been inquired into? I was asked whether I knew anything about a hamper-basket.

3924. Who asked you? It was Mr. Mason or Mr. Miles; I could not say which.

3925. Did you spend some little time there with the clerk? I know Mr. Hibble, and I spoke to him.

3926. Did you go into these matters with him? No; he never asked me about them.

3927. How long did you spend there? About a quarter of an hour.

3928. Can you not tell us what particular items they inquired about? No.

THURSDAY, 28 MARCH, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

Frank John Lawn called in and examination continued:—

3929. *President.*] I want to call your attention again to this contingent voucher of 25th September, 1888, Order No. 552 [*Exhibit E 3*]—"Six coils Manilla rope, £3 10s.";—are you now in a better position than you were yesterday to give us any evidence about it? No. I simply turned up the entry for that date, and found there was an entry on that particular day "one hamper-basket, £3 10s."; but I told the ledger-keeper to credit it afterwards when we found it was returned.

Mr.
F. J. Lawn,
28 Mar., 1889.

3930. Is that all the explanation you can give? That is all.

3931. Do you know Mr. John Davies' signature. Is this it on the contingent voucher [*Exhibit E 3*]? That resembles the signature on the order received by us.

3932. Do you believe that to be Mr. John Davies' signature? I believe it to be.

3933. Do you know Mr. Burrowes' signature? I never took any particular notice of the signature.

3934. This purports to be signed by Mr. Burrowes? Yes.

3935. Have you any doubt now as to the rest of the writing in the voucher being in your own handwriting? I looked again to see if I could find any trace amongst my old papers, but could not find any papers or orders concerning it.

3936. Is the amount of this voucher [*Exhibit E 3*] the same as you have charged in your books for a hamper-basket? Yes.

3937. Is the order number on this voucher [*Exhibit E 3*] the same number as you have entered in the margin of your day-book as a hamper-basket? Yes.

3938. Have you any recollection whatever as to what led you to write in this voucher [*Exhibit E 3*] "Six coils of Manilla rope," instead of a "hamper-basket"? I remember sending the order back with a voucher for a hamper-basket; but I do not know what became of the order or the voucher. I simply credited it when returned, knowing we might never expect payment for it.

3939. Will you look at this order for the issue of stores, dated 18th September, numbered 552, signed by John Davies, Chairman? Yes.

3940. Did you ever see that before? Yes, I have. [*Original order put in and marked H.*]

3941. Did you have this before you when you made that entry in your rough day-book? I believe so. I must have had it then to make the entry.

3942. You believe you had this document before you when you made the entry? I would not swear I had this document.

3943. What is your evidence? When I made the entry I may have made it the day before and omitted to put the order number in until I got the order. Mr. Davies may have sent up for it and sent the order next day, and I simply made the entry "one hamper-basket," and left room for the order number.

3944. This is a most important matter,—it may seem a trifling one to you; you can have no object in withholding information? I simply speak the truth.

3945. It is important I should know whether your evidence or belief is that you had this before you when you made this entry in your rough day-book? I must have had this before me at the time to get the order number from. I must have had it in my hand and compared it with the book. Whether I received it a few hours before I wrote the order I cannot state.

3946. What age are you? Twenty-four.

3947. How many years have you been in business? Eight years.

3948. What was your age when you left school? Sixteen.

3949. You have had a fair education? Yes.

3950. Does it not strike you as an extraordinary thing that you should write into the contingent voucher "six coils Manilla rope, £3 10s.," when you had before you an entry in your rough day-book, an order, with a corresponding number, for one hamper-basket? Yes; it is a most extraordinary thing, and I cannot account for it.

3951. Has such a thing ever occurred before in your business experience? No, it has not.

3952. Is it not an extraordinary thing that the price you charge in your books for a hamper-basket is exactly the same as you charge for the six coils Manilla rope? Yes, it is.

3953. How many months ago is that? About six months.

3954. And do you tell me that in so short a time as that your memory is an entire blank as to this? I do not remember anything at all about it.

3955. Is this Commission to take your evidence to be that your memory is an utter blank as to how you came to treat a hamper-basket as six coils of Manilla rope? I have no entry for six coils of rope, but an entry for one hamper-basket, which I charged for and credited.

3956. Do you know Mr. Hibble? Yes.

3957.

- Mr. F. J. Lawn.
28 Mar., 1889.
3957. Has Mr. Hibble ever seen you about that hamper-basket? I do not know whether Mr. Hibble or Mr. Davies came to select it. That is the only time he said anything about it to me.
3958. Have you any recollection of mentioning these items to any of your superior officers in the firm? No.
3959. Then whatever you have written there you have written on your own responsibility? Yes; if I have written it.
3960. Have you any doubt that it is in your handwriting? It looks like my handwriting, but not having any entry in my book—
3961. Have you the slightest doubt it is your handwriting? I would almost swear it is my handwriting, but having nothing here, I cannot make out how it is there unless I saw the rope taken away and omitted to enter it, and simply sent a voucher out.
3962. Who filled the vouchers up? I filled some of them up.
3963. Did you not fill up the majority of them? I cannot say about the majority; I filled up a great many.
3964. Do you now swear that this is your handwriting. Let us have a distinct statement about it. Examine it as much as you like? Well, I can swear it is my handwriting; I never saw anything come so near to it.
3965. I think you told us yesterday that one hamper-basket was returned because Mr. Davies said it was too expensive—what was the price of that? £6 10s.
3966. Will you produce the ledger of your employers to show the entry of that £6 10s., or whatever entry there is regarding this hamper-basket? I never opened the ledger before. I have brought the ledger-clerk with me to turn it up.

[*President*.:—*Call in the ledger-clerk.*]

- Mr. W. Jarrett
28 Mar., 1889.
- William Jarrett called in, sworn, and examined (*his evidence being interposed by the President*):—
3967. *President.*] What are you? Clerk to M'Lean Brothers and Rigg. My duty is to keep one of the ledgers.
3968. You have brought the ledger up here, I believe? Yes.
3969. Will you look at the ledger and turn up the account of the Casual Labour Board for the latter half of 1888? Yes.
3970. Is this account, at page 1251 on your ledger, an account against the Casual Labour Board for the months of August and September? Page 1251 is August, and page 1252, September.
3971. Will that account show any credits you have given the Casual Labour Board? Yes.
3972. Is there a credit for £3 10s.? There is an item of £3 10s., and against it, written in pencil, the word, "Credited."
3973. Is there an amount of £6 10s. charged there against the Casual Labour Board? Yes; there is an amount of £6 10s. on 31st August.
3974. Is the amount of £6 10s. credited? It has written against it, in pencil, "Credited."
3975. How will that credit be shown? That credit order ought to have come up in a book we have kept for that purpose showing credits alone.
3976. Who keeps that book? That book is kept by the invoice clerk.
3977. What is the name of the invoice clerk? Mr. Searle.
3978. Is he in your office now? He is at present in our office.
3979. Have you got that credit-book here? No; I did not bring it here.
3980. Should those two amounts, looking at that book, appear to the credit of the Casual Labour Board? Yes; if the order came in the usual way.
3981. Can you swear whether or not they have been credited? I cannot swear whether they have been credited. My instructions are written in the book.
3982. Will that book be the guide from which you got the two debits of £6 10s. and £3 10s.? They would be in a book called the Government day-book. We keep it for nothing else than Government work.
3983. Where did you get the information for that entry, page 1252, on your ledger, as follows:—"25th September, Casual Labour Board Office, £3 10s."? Where did I get my information. I got it from the general day-book.
3984. Was it from the same book you got the information on page 1251, 31st August item, "Casual Labour Board Office, £6 10s."? Yes, the same book.
3985. This book, the ledger, you produce does not show any credits at all? No; nor the day-books.
3986. Only those pencil-marks? Yes.
3987. Do you know whose handwriting these pencil-marks are in? They are in my own handwriting.
3988. Have you any recollection about them? Yes. I recollect Mr. Lawn coming to me and saying the goods were returned and would have to be credited; would I mark it in the ledger, and he would see and get the credit through.
3989. And you considered you were carrying out his instructions by putting that pencil-mark? I just put it there as a pencil memorandum for myself.
3990. How would the gentleman who had charge of the credit-book know it would be credited? He would only know by Mr. Lawn telling him to put the credit through.

Frank John Lawn resumes his evidence:—

- Mr. F. J. Lawn.
28 Mar., 1889.
3991. *President.*] Will you look at this contingent voucher [*Exhibit E 2*], dated 31st August, 1888, for £6 10s., which I hold before you? Yes.
3992. In whose handwriting is the upper part of that voucher? Mine.
3993. You are sure of it? Yes.
3994. Is there any number for that voucher? There is no number on it.
3995. Whose signature is that on it? Mr. Woods'.
3996. Manager of your company? Yes.
3997. Have you any recollection of getting any order for that? I got orders for a great many shovels and hammers. I do not recollect that particular quantity.
3998. Will you turn up your rough day-book you have before you and find me that? No, sir; I cannot find an entry for this particular item. There is another—two dozen long-handled shovels sent to Sutherland, I do not know whether they would be the same.
- 3999.

Mr.
F. J. Lawn.
28 Mar., 1889.

3999. What is the number for that Sutherland entry? No. 513.
4000. Is that the order for the goods in this contingent voucher [*Exhibit E 2*]? No.
4001. You are sure it is not the order? Yes.
4002. Do you find any particulars in your rough day-book to justify this order of 31st August, 1888? No.
4003. Can you produce the railway, carter's, or any other receipt showing the delivery of these goods in voucher of 31st August, 1888? I could not turn up a receipt, because I have no entry in my book.
4004. Have you any recollection about it? I recollect supplying a great number of hammers and shovels, but I cannot say anything about that quantity.
4005. What is the total amount of that voucher? £6 10s.
4006. What was the value of that one hamper-basket which was said to be too expensive? £6 10s.
4007. What was the value of the other hamper-basket? £3 10s.
4008. Look at these two contingent vouchers again for £3 10s. and £6 10s., one being for six coils of Manilla rope, and the other twenty-four long-handled shovels and four hammers [*Exhibits E 2 and E 3*];—look at both carefully, and let me know whether there is any connection with these and the hamper-baskets? They are exactly the same amounts. That is all the information I can give concerning it.
4009. On your oath? On my oath.
4010. You see the items £6 10s. and £3 10s. in the ledger Mr. Jarrett brought up? No; I have not seen them.
4011. Look now in the ledger for them? Yes.
4012. Are not these items in the ledger £6 10s. and £3 10s., with pencil marks "Credited" opposite them, exactly the same amounts as in these vouchers? Exactly.
4013. Now, on your solemn oath, knowing the pains and penalties of giving false testimony, will you tell me that these two vouchers have no connection with the hamper-baskets? Not that I know of.
4014. Do you believe that those coils of Manilla rope for £3 10s., and those long-handled shovels and hammers for £6 10s., were properly charged to the Casual Labour Board and the goods delivered? They were not properly charged, or else I would have an entry of them.
4015. Who is responsible for that? I am. If the goods had been ordered I should have had a note of them in my book.
4016. Has your Company been asked to supply Messrs. Mason and Miles with a statement of the outstanding accounts due by the Casual Labour Board? I believe they were.
4017. Do you know whether the statement was supplied? I brought it down.
4018. Did you prepare it? No.
4019. Do you know who prepared it? No; but I believe it was Mr. Jarrett.
4020. The gentleman who was here just now? Yes.
4021. Did you look at the statement? No, I did not.
4022. Do you recollect whether after that statement had been sent down any further particulars were required by, or information supplied to, Mason and Miles? Yes. I forget whether I had to go down and explain something about some powder to Mr. Miles. I went down to the Board and was told he was in his office, in Hunter-street. I was shown into Mr. Miles' room, and he asked me some questions about powder.
4023. Did he not ask you about these two accounts? I could not swear that he did.
4024. How long ago is that? About a month ago.
4025. Your memory is not a bad one, is it? I have so much to think of.
4026. Do you not think it likely that two items of this somewhat sensational kind—as to which you say you have no recollection at all, but which you charge for, and get your senior officer to certify for, would remain in your memory since Mr. Miles' inquiry? There are so many vouchers at the end of the month, and Mr. Wood never looks when he signs. He keeps signing away until they are finished.
4027. Has Mr. Wood said anything to you about this matter since yesterday? No.
4028. Has he made any inquiries about it? No; I have not been in the warehouse since.
4029. Can we take it that these are samples of the rest of the vouchers that you make out—are these two vouchers for £6 10s. and £3 10s. a sample of the correctness of the other vouchers you made out? Well, I did not think there was a mistake in all my work; I cannot make this out at all; I do not think you would find many mistakes in my work; I cannot make out how this came about. I check them to the best of my ability.
4030. You surely do not claim this as a clerical mistake? It looks like it. It looks as if it was neglect on my part.
4031. Is the insertion of long-handled shovels, hammers, and rope for a hamper-basket a clerical mistake? If they had a hamper-basket they would be charged for it. I could not make a mistake and read shovels for a hamper-basket very well.
4032. Look at this original order for issue of stores, "No. 552, 10th September, 1888, to M'Lean Bros. and Rigg. Please issue the undermentioned article, viz., one hamper-basket"; signed John Davies, Chairman, with the seal of the Casual Labour Board and No. 82 Goulburn-st. on it;—~~now, with all the romance and fiction you are capable of bringing to bear on the matter, do you think it possible to make a clerical error out of that by issuing in its place two vouchers, one for rope, the other for long-handled shovels and hammers, the order being for a hamper-basket?~~ No, sir, it is not a clerical mistake.
4033. What kind of a mistake is it? The only way I can see is, I have sent the goods away and made out a voucher without entering it in the book.
4034. If it turns out that the Board was debited with £6 10s. and £3 10s., and that vouchers for these items were duly sent in, signed by Wood, your superior officer, by Mr. Davies, the head of the Casual Labour Board Department, and by Mr. Burrowes, the officer alleged to have incurred the expense—if it turns out that these two items have never been credited (as you say) to the Government, is it not something more than a clerical mistake? It looks like it.
4035. What does it look like? A great mistake on someone's part.
4036. Not more than a mistake; if you send a person an account, claiming that the goods have been delivered, and seek payment for the amount, especially in the case of a Government Department, where you know an officer is dependent on other officers, is that nothing but a mistake? It is more than a mistake, if we know the goods were never supplied.

[*President*:—*Call in the clerk who keeps the credit-book.*]

Abraham

Abraham Searle called in, sworn, and examined (*his evidence being interposed by the President*) :—

- Mr. A. Searle.
28 Mar., 1889.
4037. *President.*] What are you? Clerk to M'Lean Bros. and Rigg.
4038. What are your duties? Invoice clerk.
4039. Do you keep any books? Only the day-book.
4040. Do you have anything to do with the book called the "credit-book"? Yes.
4041. Will you let me see it? Yes.
4042. Will you open the book about August, September, or October, 1888, and see whether there is any credit there for the Casual Labour Board for items of £6 10s. and £3 10s. To save time I will call your attention to the item on page 1251 of your Company's ledger, £6 10s., and another item on page 1252, £3 10s., the first on 31st August, 1888, and the second on 25th September, 1888;—you observe against each of these items written in pencil the word "credited." I want to find out whether in your credit-book these items appear? I cannot find any credit.
4043. Are you able to state whether these two amounts have been credited to the Casual Labour Board? I cannot state that.
4044. Why? Because I do not keep credits for the Government.
4045. Who does? Mr. Lawn.
4046. This gentleman here? Yes.
4047. Do you keep that credit-book you have got in your hand? As a rule.
4048. Where do you get your information from? From the different salesmen.
4049. Did Mr. Lawn ever tell you, in your recollection, to credit these items of £6 10s. and £3 10s.? No.
4050. You swear he did not? No; he did not.
4051. Will you show me the Government day-book, 31st August and 25th September, 1888. Do you keep it? No.
4052. Who keeps it? Mr. Lawn.
4053. I suppose you have had some practice in book-keeping? A little.
4054. What is the name of the book we are looking at? The Government day-book.
4055. Is there any item of £6 10s., appearing in August, 1888? Yes. Page 267, "Casual Labour Board Account Office, to hamper-basket, £6 10s."
4056. Is that a debit? Yes.
4057. Is there another item for £3 10s. in September, 1888, page 278? Yes. "No. 552, Casual Labour Board Account Office—one hamper-basket, £3 10s."
4058. Is that a debit? Yes.
4059. Is there anything in any of the books to show that either of those accounts have been credited at any time? Both items are marked "Returned," as far as I can see, in lead-pencil.
4060. How is that marked? In blue lead-pencil.
4061. Do you know whose handwriting it is? I think it is Mr. Lawn's.
4062. Is there anything in this book to show that these two items have been credited to the Government? Nothing at all.
4063. *Mr. Waller.*] Do you see any entries made in the credit-book for credit for Government accounts? Some.
4064. None for the Casual Labour Board? There are some.
4065. What is the rule to show you, as keeper of the credit-book, what accounts are to be sent in to the Government and what are not? They do not as a rule make credit for the Government. Mr. Lawn does that.
4066. By whose orders? I cannot say.
4067. Your duty is credit-clerk in charge of the credit-ledger? Yes.
4068. Should not all credits, properly speaking, come through your book? They ought to.
4069. Have you any reason to suppose there were any instructions given by any of the firm that exception was to be made for the Casual Labour Board's accounts passing through your book in the ordinary way? No.
4070. Did it strike you as being peculiar or did you ever think of the matter? No.
4071. Has your attention ever been drawn by the ledger-keeper or any other book-keeper to the fact that credits belonging to the Casual Labour Board did not appear in your book? No.
4072. Did you make any remark when credit was given to the Casual Labour Board that they were doing an unusual thing in not giving them to you? I never had them come to me.
4073. Will you show the Commission some of the credits you have passed for the Casual Labour Board through your book? I do not think I have passed any.
4074. Is it usual for all credits given to customers to appear in that book? Yes.
4075. That book would be a true record? Yes.
4076. That book has no credits so far as the Casual Labour Board is concerned? It does not seem to have.
4077. ~~If there are credits given to the Casual Labour Board that book is not correct? I cannot say so.~~
4078. Does it strike you as peculiar that these credits fail to come through your book? They ought to have gone through the book in the proper manner.
4079. Does it strike you as peculiar that they do not? Yes.
4080. You never heard there was credit to be given or that it had been given? No.
4081. *President.*] Recall the ledger-clerk.

William Jarrett recalled, evidence further interposed :—

- Mr. W. Jarrett.
28 Mar., 1889.
4082. *President.*] I want to call your attention again to these pencil marks. Have you ever seen them before to-day? I noticed them when going through the books every month.
4083. How long ago? About the beginning of December I had instructions.
4084. What instructions? Mr. Lawn gave them to me.
4085. What were they? I wrote this word "Credited."
4086. And that other word "Credited"? Yes.
4087. Are you aware that neither of these items appear in the credit-book? I am certain that they are not in the credit-book.
4088.

Mr.
W. Jarrett.
28 Mar., 1889.

4088. Do you know of any application ever made to you by Messrs. Mason and Miles for a statement of the outstanding accounts? Yes.
4089. Do you know whether such a statement was prepared? Yes.
4090. Who prepared it? I prepared it myself.
4091. Were these items in it? These items were not in it.
4092. How comes it then they are charged against the Government in your ledger and yet omitted from the statement of account? It is carelessness on Mr. Lawn's part in not putting the credit through the book.
4093. Is that the way you have the books kept in your establishment? It is an oversight on his part. The credits are usually made at once.
4094. Are you aware that after this statement of accounts was furnished Messrs. Mason and Miles sent back for some further information? Yes.
4095. Will you look at a letter I hand you, 15th February, 1889, addressed to your company, from Messrs. Mason and Miles;—have you ever seen it? Yes.
4096. Will you look at the second page of it—in the margin you see some pencil marks;—do you know whose they are? They are my own.
4097. What is marked against 31st August, Hurstville? "No account."
4098. And 25th September, Hurstville, £3 10s.? "No account."
4099. Is that true? Yes.
4100. Look at contingent voucher [*Exhibit E3*], whose signature is that? Mr. Wood's.
4101. Look at this voucher [*Exhibit E2*] for £6 10s., whose signature is that? Mr. Wood's again.
4102. Do you still say there is no account for those items? I marked that letter, "No account" because I had the word "Credited" alongside of the amount. That is as much as there being no account in the book.
4103. You still say there is no account against the Board? No; there is not an account.
4104. Are these vouchers correct or incorrect? I should say they are not correct. They are supposed to be "nil."
4105. How comes it that Mr. Wood signs them and sends them in to the Government? They were taken down to him with another big bunch of these vouchers and he signed them along with the rest. He takes Mr. Lawn's word for it.
4106. Are you consulted at all before he signs? No. Mr. Lawn takes them to Mr. Wood himself.
4107. This gentleman here? Yes.
4108. Where did you copy these particulars from that are in your ledger-book:—"Casual Labour Board Office, £6 10s.?" I got it out of the general Government book.
4109. Will you look at the general Government book? Yes.
4110. There you have this:—"One hamper basket, £6 10s.?" Yes; Casual Labour Board Account Office, one hamper basket, £6 10s.
4111. Is there any connection between that and twenty-four long-handled shovels and four hammers? None whatever.
4112. What is the entry in the Government day-book from which you got the item entered to the Casual Labour Board Office, £3 10s.? "Casual Labour Board Account Office, one hamper-basket, £3 10s."
4113. Is there any connection between that and six coils of Manilla rope? No.
4114. What is the number of that order in the Government day-book? 552.
4115. What is the number of the order on this contingent voucher [*Exhibit E3*]? The order is 552 again.
4116. The numbers are the same? The numbers are the same.
4117. The amounts are the same? The amounts are the same.
4118. The items are different? The items are different.
4119. Have you any knowledge of it? No.
4120. Have you ever heard of them before? I heard of £6 10s. and £3 10s. from Mr. Lawn when he told me to credit them. I put a mark against them for my own guidance.
4121. *Mr. Waller.*] This book is the Government day-book? Yes.
4122. In whose writing is this £6 10s. and £3 10s.? Mr. Lawn's
4123. Where is that information procured from? It would be from an entry in the rough day-book that Mr. Lawn keeps for the purpose.
4124. Suppose it is not in that book? Then I could not say it would be in any other book. These are the only two books we have.
4125. Is the rough day-book supporting evidence of the Government day-book being correct? We take it as such.
4126. Is it usual to put things in the Government day-book which you do not find in the rough day-book? No; I believe Mr. Lawn enters them in the rough day-book first.
4127. How long have you been with M'Lean Bros. and Rigg.? Going on for five years.
4128. Did you ever, in your experience, know a case similar to this crop up; there is an entry in one book for which there is no supporting evidence in another book? No; I never knew it before.
4129. Do you believe that if you searched through you would find such an omission? There is no such an omission as I know of.
4130. The entry is not in the rough day-book, but you still find it in the Government day-book? No; so far as I know there is no other case.
4131. Is it usual in the book-keeping department of M'Lean Bros. and Rigg to make entries in pencil? No, it is not usual.
4132. Can you open this ledger, going back from page 1251, and find any other of like character to that in pencil? No; there are no entries like that.
4133. Do you possess a book in the establishment called a "Returns" book? We use the credit-book.
4134. The credit-book we have been just looking at? Yes.
4135. Have you any book which shows so much wire or other things returned to regular store—a book to balance the store account? We use the credit-book for that purpose.
4136. For goods passed into the store? It is understood they are back into stock.
4137. How is the storekeeper of a particular store-room to be responsible for his goods, after going out and coming

Mr.
W. Jarrett.
28 Mar., 1889.

coming back, and having no entry to show that they ever came back ;—how would you make him responsible. I will put it more plainly. Take this particular case, where there is no entry in your credit-book for returned goods ; how can you make him responsible for their having been returned ? The storekeeper himself may keep a book.

4138. Will you swear he does ? I do not know whether he does or not.

4139. Do you think it likely that Messrs M'Lean Bros. and Rigg are so slipshod in their management that they are unable to say by their store-books what is in stock and what is out ? The storekeeper himself may have a book ; I cannot say.

4140. You think it probable that he has ? It is very likely he has.

4141. Did you ever sign a credit-note of the Casual Labour Board and support the credit again in the ledger ? That is out of my line altogether.

4142. Have you ever been called on to do so ? No.

4143. When was that writing put in, "credited" ? It is found now that it was put in at the beginning of last December. As far as I can recollect it was after I returned from Melbourne that he came and spoke to me.

4144. You have a clear recollection of it ? Yes.

4145. What room were you in ? In the office, at the ledger.

4146. What peculiar circumstance was there to bring it to your memory now ? I was entering up the Government account for one thing.

4147. Why has it ever since remained in pencil ? I never bothered about it. It was Mr. Lawn's oversight.

4148. Is it not a common practice where you want to draw attention to an item and are confined for space to put it in red ink ? We do not use red ink.

4149. Do you always write as lightly as that in pencil ? Yes.

4150. Is that a fair specimen of your writing in pencil ? Yes.

4151. Was this other entry made the same day ? At the same time.

4152. How did Mr. Lawn come up to you ? He came up to me in the ordinary way ; told me to turn up the Government account and look up these two accounts. He said they had been credited. I understood he was to go straight away and credit them.

4153. Did you make any demur ? No. It was at the beginning of December he told me that.

4154. Did it not strike you as strange that it should be from the 31st August to December before you should be told to put in credits for a class of goods like hamper-baskets ? It did.

4155. It struck you as being peculiar ;—did you make any remarks about that ? None whatever.

4156. You did not say, "Why has this length of time elapsed between the purchase and the credit ?" No.

4157. Is that the usual way ? No. Anything like that is supposed to come in at once.

4158. Have you any other items that Lawn has given you to give credit for months after the purchase ? I do not think so.

4159. This is a solitary case ? A solitary exception.

4160. *President.*] Is there any commission on sales given to clerks in your establishment ? No commission at all.

4161. Did you ever see Mr. Miles ? Yes ; a week or ten days ago.

4162. Do you recollect what you told him about these items marked no account ? As far as I can recollect, I do not think I said anything about them. A clerk there drew my attention to the amounts, £6 10s. and £3 10s.

4163. Did you not say you had no record of it ? No.

4164. Are you certain of that ? Certain.

4165. What is the name of your storeman ? Johnston Ashton.

4166. Is he at the shop in George-street ? He is.

4167. Is he responsible for any goods returned ? Well, a certain class of goods. The salesman is held responsible for small amounts. He is responsible for bulk.

4168. Does he keep a book of returns ? I cannot say.

4169. How long has he been in your employ ? He has been there the same time as myself.

Frank John Lawn resumed his evidence :—

Mr.
F. J. Lawn.
28 Mar., 1889.

4170. *Mr. Waller.*] Did you often meet Mr. Davies ? Only when he came in with the orders.

4171. Do you know him particularly well ? No.

4172. Have you seen him any number of times since the late Casual Labour Board has been abolished ? I met him one day in George-street. He shook me by the hand, asked me how I was getting on, and passed on.

4173. Have you had any conversation with him with reference to these accounts ? None.

4174. Did Mr. Davies often alter the orders ? Sometimes.

4175. Who else ? Mr. Hibble and Mr. Davies.

4176. Referring to these hamper-baskets—the date for the £6 10s. hamper on the contingent voucher is 31st August, and that for the £3 10s. hamper is 25th September—what are they ? They are large baskets.

4177. Are they known as picnic-baskets ? I know them as hamper-baskets, but they are picnic-baskets, and fitted up with knives and forks, &c.

4178. Have they flasks ? They have compartments for them.

4179. Regular picnic-baskets ? Yes.

4180. Have you generally a good memory or a bad one ? I never had it taxed before.

4181. Do you find you make omissions and forget to correct them ? A few.

4182. Are you found fault with by your employers for being a careless clerk ? They never say anything to me.

4183. Would not the inference be, if you are not found fault with, you are a pretty careful clerk ? Yes.

4184. And your memory is not bad ? I think not.

4185. I ask you, is it not a peculiar thing that your memory, which is a blank as to how you obtained the order for making out the contingent voucher, is yet so good that about the month of December, some months after the order, you were able to recollect these baskets were returned ? I believe Mr. Davies or Hibble would remind me that the baskets were returned.

Mr.
F. J. Lawn.
28 Mar., 1889.

4186. When were they returned? I cannot say; it may be a couple of weeks afterwards.
4187. Then you had a return three or four days after the purchase, and never mentioned about a credit until December? No; I forgot about it, and they jogged my memory.
4188. Are you quite certain now how these hampers went out? I am not quite certain.
4189. Are you certain how they came back? No.
4190. How are you certain you were told to credit them? I was told afterwards to credit them, perhaps when they were up with some orders. I asked them why they returned the hampers, and they said they were too expensive.
4191. Yesterday afternoon you said that one basket was sent back because it was too expensive? And the other one I sent was too small.
4192. Where did these two picnic-baskets finally go to after they came back? I cannot say.
4193. Did you put them into the store? They went back into stock.
4194. *President.*] Do you know of your own knowledge they went back? Yes.
4195. You saw them? Yes.
4196. *Mr. Waller.*] Is it not in your evidence that you found them there, but how they came there you do not know? Yes; I thought it was Mr. Hibble who brought them back.
4197. Do you know who brought them back? No.
4198. Where did you find them? In my room.
4199. *Mr. Franklin.*] You are speaking of two baskets now? Yes.
4200. *Mr. Waller.*] Which came back first? The £6 10s. one.
4201. Where were the goods usually delivered? At the railway.
4202. Did you deliver the goods? We sent them either to the railway or to the Port Jackson Steamship Company's wharf.
4203. Did you deliver by carts? All our own carts. We delivered to the Manly steamer wharf, Port Jackson sheds, No. 1. Jetty.
4204. How did you get them there? By our own carts.
4205. What was the rule of your carters when they delivered goods? They got a receipt.
4206. In a book? In a slip of a book, because with a book the slips might be torn out. Suppose we sent goods to-day and again next week, the men who signed for the stuff might take one out.
4207. What became of the carters' receipts? We have them. We have the receipts of everything that went from our place and was charged for, excepting the powder, which was delivered by the Ordnance Department.
4208. How are you able to fix on or about the date these baskets were returned? I should think they were returned a week or so after they were supplied, or perhaps not so long.
4209. Will you swear it was not three months? I will swear they were credited before three months afterwards.
4210. Will you swear it was six weeks afterwards? I cannot.
4211. You cannot swear you saw them returned? They came back.
4212. Why did you not credit them at once? I forgot.
4213. Have you often forgotten to give credit? I have often forgotten to give credit until I was reminded about them.
4214. Then the evidence of the last clerk that he has not got credit in the same way would be incorrect? There are very few credits to make. I may make one or two. If the book is close by, I make it. If it is not, I don't bother.
4215. How do your customers like that system? They don't pay the accounts, I suppose.
4216. Do they object to the amounts because you have not given them credit? No one ever had occasion to say so that I can remember.
4217. You say you give credit if the book is handy, if not you don't bother? I very seldom give credits.
4218. Have you charge of these baskets now? No.
4219. How long were they in your possession after they were brought back? I put them into stock.
4220. You are responsible for them now? I am not responsible for them.
4221. Who is? No one. They are put into stock. Any salesman can sell them.
4222. Do you mean to tell us that the management of M'Lean Brothers and Rigg is such that goods are taken out and sold, put into stock again, and no one is liable for their being put into stock? No; they take stock every June.
4223. What happens between January and June as regards things that come in? I have my own work to look after.
4224. Do you tell us that Messrs. M'Lean Brothers and Rigg's business is so managed that when goods are sold to customers and are returned there is no check by which any person in their employment can be made responsible for goods returned to stock? Yes; the salesman is.
4225. Who was the salesman in this case? I was.
4226. Were you liable? Yes.
4227. Had you no book to enter them in. Is there no check as to goods that have been brought back? Only by the salesman knowing they have been brought back.
4228. *President.*] Have you those baskets now? We have some of the same sort.
4229. Do you know whether Mr. Davies had any baskets on his own account? I cannot say.
4230. You have heard that no credit has been passed for these two items? Only by me.
4231. You have heard the evidence that no credit has been passed in the books? It is an oversight on my part.
4232. So far as your books are concerned there is still liability on the part of the Government for the items? No; there is the mark "credited" put to them.
4233. But you have seen the vouchers that have been sent into the Government? Well, if we were paid that amount we would not know what it was for; we would have to ask.
4234. *Mr. Waller.*] Do you remember my asking you this. In reply to a question as to the entries in the ledger you said "yes" to this. I said, "If those entries are not in the book in a straightforward manner, line after line in their proper place, they will be cooked"? I do not remember you saying that. I said they ought to be. The President said I had better bring the ledger down with me.
4235. I distinctly asked if they did not appear in their proper place line after line they would be cooked, and your answer was "yes"? I did not understand what you were saying.

- Mr. F. J. Lawn.
28 Mar., 1889.
4236. On page 267 in the general daybook, whose writing is it? Mine.
4237. What is it? "Returned."
4238. There is another entry for £3 10s., whose writing is that in? Mine too.
4239. Can you show in the whole of that book where you have ever made a similar entry in pencil for goods returned? No; I cannot see any.
4240. Who keeps that book? I do.
4241. Why did you deviate from your usual practice of putting in entries in ink? I had no particular rules. I never had any rule laid down to me to put them in in ink.
4242. Why did you deviate from your practice? I suppose those are about the first cases in which I have had returns given to me.
4243. Do you remember when you wrote that? A little while after they were returned I suppose.
4244. If you put that credit in immediately after the baskets were returned, how was it when your book was posted that they were not posted too? I cannot say.
4245. Whose fault was it? It was Mr. Jarrett's fault.
4246. If it was not written before the book was posted, what was the good of writing it after the book was posted? I suppose I was looking through it for some other information.
4247. Would it not have been a good thing to have gone up and had it posted? I suppose I intended to put the credit through, but forgot.
4248. Is it a usual thing for you to keep running through your books, seeing what is posted and what is not? No; the book is taken away about once a month to get it posted.
4249. So as a matter of fact, you did not place that entry there when they were returned? I cannot say I made that blue pencil mark immediately they were returned, but seeing they were charged in the book, and knowing they were returned, and going through the book for some other information, I marked it.
4250. If you did it yesterday you would remember? Yes.
4251. It was not yesterday? No.
4252. I see the writing is a heavier hand in blue pencil? The point of the pencil is larger than a pen's.

Johnston Ashton called in, sworn, and examined:—

- Mr. J. Ashton.
28 Mar., 1889.
4253. *President.*] Are you a storeman? Yes; at M'Lean Bros. and Rigg's.
4254. How long have you been storeman? Four years.
4255. Do you keep any books showing goods returned? None at all.
4256. Is there any record kept of goods returned? Only Frank Lawn's. It depends what department it is in.
4257. In what department are they kept? I think the invoice clerk keeps them.
4258. What book is that you have brought? The despatch-book, in which I see that orders are sent away.
4259. Do you see what goods are despatched and sent out of the store? Yes, in bulk.
4260. Have you any entry in September or August showing the despatch of goods to the Casual Labour Board? No. This book closes on the 25th September, 1888, and we thought it advisable afterwards to use tickets.
4261. If goods are purchased one day and are returned two or three days afterwards, do you keep a record of them? It has nothing to do with me at all.

William Duchesne called in, sworn, and examined:—

- Mr. W. Duchesne.
28 Mar., 1889.
4262. *President.*] You are clerk in the City Bank? City Bank, head office.
4263. Will you look at this cheque for £26 17s. 7d., drawn on the Bank of New South Wales, Haymarket Branch, purporting to be signed by George Robert Neale, in favour of Mr. T. S. Hinchcliffe or bearer, and tell me whether it passed through your bank? It formed part of £55 7s. 7d. paid in by John Davies to his own account on 16th May, 1887; it was put through in the usual manner, and, of course, he received credit for it.
4264. Will you look at this cheque for £52 3s. 1d., purporting to be signed by George Robt. Neale, drawn on the Bank of New South Wales, Haymarket Branch, dated 22nd September, 1887, in favour of E. M. Burrows or bearer. Has that cheque passed through your bank? That cheque was handed in by John Davies for credit of his own account on the 26th September, 1887. We put it through in the usual manner and credited him with it.
4265. To the same account as the previous cheque? To the same person's name, but to No. 2 account; the previous one was to John Davies C.M.G. account.
4266. The cheque, £26 17s. 7d., went to John Davies No. 1 account? To John Davies only. The second account is No. 2, to distinguish between the two accounts.
4267. The second cheque went to John Davies, No. 2? To John Davies No. 2.
4268. Can you tell me how many accounts John Davies has in your bank? At the time of this transaction John Davies had two accounts.
4269. What were they called? John Davies, and John Davies No. 2.
4270. What position do you hold in the bank? Well, general clerk.
4271. In the course of business would these cheques come before you? In the course of business they might come before me; but I am able to say what has been done, because I can recognize our marks on the back of the cheques, and the cheques would not be marked unless they had been treated in the usual manner.
4272. Do you know John Davies? Not personally.
4273. By sight? I have seen him, but I do not think I should recognize him again.
4274. Are you in a position to say whether the John Davies with whom your bank does business is the Hon. John Davies, C.M.G., M.L.C., late Chairman of the Casual Labour Board? He is known to us as John Davies, C.M.G., only.
4275. Can you say from your own knowledge of the bank's arrangements what the difference is between these accounts, John Davies and John Davies No. 2? I am not aware that there is any difference, we simply credit either account in accordance with the marks on the slips. The first slip is John Davies, C.M.G.,

C.M.G., that would be paid to the credit of John Davies, C.M.G., only. The second slip is John Davies, C.M.G., No. 2, and, therefore, we should credit No. 2 account.

4276. Do you produce the deposit slip which includes the sum £26 17s. 7d.? This is the deposit slip [Deposit slip, marked G, for identification].

4277. Do you know who filled that up? John Davies.

4278. Do you know his handwriting? I know from his handwriting, and the fact that it is marked paid in by "self," shows it was paid in by John Davies.

4279. That slip shows that in addition to the cheque there were notes and gold paid in at the same time? £28 in notes and half-a-sovereign.

4280. That amount went to a private account? To a private account, and part of it for a particular purpose.

4281. Can you tell us what that foot-note on the deposit slip means? The total amount paid in was £55 7s. 7d. on the 16th May, 1887. Mr. Davies marked the slip to the effect that £50 was in special reduction of Osborne's bill, and the balance, £5 7s. 7d., to meet an account on the 18th instant. That second part is rather foggy, but we should judge it to be to meet an account on the 18th instant; but we cannot be quite clear about that.

4282. Do you know what that Osborne's bill means? I cannot answer clearly; but I should presume it was a bill drawn by or accepted by John Davies.

4283. Do you know what that C. R. £5 7s. 7d. means? I cannot understand what is the meaning of that; it is not quite clear.

4284. Do you produce a deposit slip, £52 3s. 1d.? I produce that slip. [Deposit slip marked G1 for identification.]

4285. Is there anything particular about that? Nothing unusual.

4286. Whose handwriting is that in? John Davies'.

4287. You believe it to have been paid in by himself? It is marked to the credit of account No. 2 by himself.

4288. Are you in a position to say what that No. 2 account is? Not at present; but there may be a note in the ledger that it is to operate with any special class of accounts. I am not certain. I can ascertain.

4289. Can you tell me whether John Davies is a regular customer of yours? John Davies has been for some time past, and is at present a customer of ours.

4290. Can you tell me whether his account is in funds or is in debt as a rule? It is an operative account.

4291. Is he overdrawn? Yes, overdrawn.

4292. Has he had an overdraft for any time? I cannot answer for what time without referring to the ledger.

4293. Can you say whether he has more than two accounts at your bank? These are the only two operative accounts I know of.

4294. Is there any dormant account there? There is a dormant account which is largely overdrawn.

4295. In the name of John Davies? In the name of John Davies.

4296. Can you recollect the amount of the overdraft approximately? I do not like to speak definitely, but if I am not mistaken the account is between £7,000 and £8,000 overdrawn.*

Ernest Grant Cooper called in, sworn, and examined:—

4297. *President.*] What are you? Ledger-keeper in the Australian Joint Stock Bank.

4298. Are you aware that the accounts of the Casual Labour Board between May, 1887 and January, 1889, were kept in your bank? Yes.

4299. Do you produce any deposit slips for any amounts lodged in the bank to the credit of that Board between those dates? Yes, I have several here.

4300. Do you produce six deposit slips for amounts paid in to the credit of the Casual Labour Board? Yes, for £38 4s. 2d., £113 9s., £76 4s. 11d., £40 12s. 3d., £46 5s. 11d., and £20.

4301. Have you brought any books with you? The teller's cash-book.

4302. What does that show? Simply that these deposits have been passed through.

4303. I understand that the book simply goes to prove what became of this money? Yes, that is all—simply records.

Charles Robertson called in:—

The President intimated that he would administer the oath to witness.

Witness declined to be sworn, stating that he had no evidence to give; he did not know anything about the matter, and did not know why he should have been summoned.

President.—Do you decline to give evidence?

Witness.—I want to know whether you are going to pay my expenses. I cannot come here for nothing?

President.—Are you a country witness?

Witness.—No; I am not living in the country, but I am in no one's employ, and I have to neglect my own work.

President.—We cannot allow expenses for a town witness. I wish to know whether you refuse to be sworn and give evidence?

Witness.—Oh, well, I had better come in with the rest.

Witness was then sworn and examined:—

4304. *President.*] What are you? I am a mariner, but have not been to sea for some years.

4305. Were you ever at the National Park? I held office out there. I was timekeeper and storekeeper for the National Park trustees for three years.

4306? Do you know Mr. Davies? Yes.

4307. When did you see Mr. Davies? The last time I was in the Colonial Secretary's office, a few days ago, and he was just coming out of Mr. Critchett Walker's office.

4308.

* NOTE (on revision):—I found on referring to the ledger that the overdraft of from £7,000 to £8,000 was on account of a Mr. Davies, but not the John Davies, C.M.G., about whose account I was being questioned.

Mr.
W. Duchesne.
28 Mar., 1889.

Mr.
E. G. Cooper.
28 Mar., 1889.

Mr. Charles
Robertson.
28 Mar., 1889.

- Mr. Charles Robertson.
28 Mar., 1889.
4308. Did you have any conversation? He bade me good-day, and asked me what I was doing.
4309. Did he ask you whether you had been summoned as a witness? No.
4310. When was this? It must be three months ago, previous to my leaving the Park.
4311. Do you know Mr. Want? Yes.
4312. Did you make any statement to him about anything that took place at the National Park in which Mr. Davies is concerned? Not that I am aware of. I was catering for picnics generally. I may have spoken to him about that.
4313. Will you look at this paper [*Exhibit E7*]? Yes.
4314. Do you recognize it? Yes.
4315. Whose writing is it? Mine.
4316. What is the meaning of that paper? It is the remainder of some liquor I had from a picnic I was catering for when the wines were sent down by the gentlemen themselves. That is a list of the wines that were left over and sent back.
4317. What picnic was it? I cannot tell you exactly. I think it was a park excursion, if I am not mistaken. I cannot swear positively what it was; to the best of my belief it was an inspection. It was not a picnic exactly.
4318. Did you keep an establishment there? I was in charge of the building belonging to the trustees, and I had the privilege of catering for the public at picnics in lieu of a larger salary.
4319. Do you recollect an occasion upon which Sir John Robertson, Mr. Want, and Mr. Burrowes were at the park? That is the time I sent in that stock.
4320. Who was it charged to? I had nothing to do with it. Mr. Want sent it down to me. I only catered for the food. Gentlemen used what wine they wanted, and I sent back the remainder.
4321. Do you know where the wine came from? No; it was addressed to the care of Mr. Burrowes, from Sydney, and Mr. Burrowes forwarded it to me. To the best of my recollection there was a label on the case, but I did not notice it.
4322. What does this list represent? The remainder of the wines that were there after the dinner was over.
4323. Do you know what became of it? I do not know whether I sent it to Mr. Burrowes or to Mr. Davies. Mr. Want told me to take Mr. Davies' order as relating to it, and I did so.
4324. What were those orders? To the best of my recollection it was to send it to his office in Liverpool or Goulburn-street.
4325. Did you send them? I sent them.
4326. How? I sent them by our own buggy; but I do not know whether I sent them to Mr. Burrowes to be forwarded or direct by train. I gave them to the groom and told him to take them up.
4327. To what station? Loftus.
4328. Did you put any address on them? I think so. I think I addressed them to Mr. Davies. I put some address on them most certainly. I would not swear what address it was.
4329. If Mr. Want has told us he went to give you instructions, and you said you already had instructions from Mr. Davies, is that correct? I did not tell you that.
4330. I say, if Mr. Want has told us that he went to give you instructions, and that you said you had already received instructions from Mr. Davies, is that or is the account you give us correct? I went to Mr. Want and asked him what to do with it. He said, "Take Mr. Davies' orders." Mr. Want was the managing trustee and my principal employer.
4331. You gave them at the National Park to the groom and he took them away? Yes.
4332. What is his name? Owen Duffy.
4333. Where does he live? At the National Park.
4334. Can you give us the date of that? No; I have not got it. I might have some entry in my book.
4335. Have you any recollection of the date? I cannot tell you, not even what month it was in.
4336. Can you tell us how we can find the date? By sending to the trustees for the bill I have sent in to them. That is the only way I know of.

MONDAY, 1 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

John Balfour Clement Miles recalled and further examined:—

- Mr. J. B. C. Miles.
1 April, 1889.
4337. *President.*] After you were appointed to take over the Casual Labour Board's duties, did you make any application to Messrs. Lean Bros. and Rigg for a statement of outstanding accounts? Yes.
4338. With what result? They wrote a short letter, dated 13th February, enclosing a statement of all accounts that they alleged were due to them.
4339. Did you examine that statement? I did. I examined it by the light of the accounts that I found left in the office. I found that they were charging in their statement a number of items for which I had no invoices; and I found on the other hand that I had some invoices, handed to me as unpaid, for which they did not charge.
4340. Did that strike you as being a coincidence, or did you suspect some irregular business? I did suspect some irregularity from what I had previously heard.
4341. Did you communicate with them further? Yes.
4342. And with what result? They furnished copies of such invoices as I had not, and made various explanations with regard to some of the invoices which were not included in their statement.
4343. Can you particularize any of the items? The items £6 10s. and £3 10s.
4344. To make it clear on the evidence, what were these items? The item £6 10s. was for some long-handled shovels and some hammers, and the item £3 10s. was for some coils of Manilla rope.
4345. What was the result of your inquiries? A clerk from their office attended at my office, and went through the accounts, taking particulars of them. Eventually they returned to say that they could not understand how they had been rendered, as they had no accounts in their books, and they found that the goods charged for had not been ordered.
4346. Are you quite clear upon this? Yes.

4347.

4347. Have you a clear recollection of the conversation? Yes. It was with the clerk who admitted having made out these invoices.

4348. Do you know the clerk's name? His name, I believe, is Lawn.

4349. I believe since you were examined before this Commission on the last occasion you have had an opportunity of seeing in this room the ledger, the Government day-book, and the rough day-book of Messrs. M'Lean Bros. and Rigg, as well as the credit book of that Company, and these are stated to comprise the whole of the books which that Company kept to evidence their transactions with the Casual Labour Board Department? Yes.

4350. Did you notice anything peculiar in the ledger? I noticed that the debits for £6 10s. and £3 10s. are there. The examination I heard disclosed that the items were for hamper-baskets.

4351. Were those debit entries in the ledger, in your opinion, inconsistent with the statement made to you by one of their officers that they had no record of the accounts? The statement to me was that they had no record of the accounts for long handled shovels, hammers, and the Manilla rope.

4352. Were the entries you saw inconsistent with the statement to you that they had no claims of £3 10s. and £6 10s.? Well, it was hardly consistent, for they had not the credits written in ink, which they ought to have had.

4353. You noticed in their rough day-book some alterations pointed out to you, some erasures and strikings out of figures. Did these erasures and strikings out of figures occur in regard to items that had been ordered, or were alleged to have been ordered by the Casual Labour Board? Yes.

4354. And did they occur in orders in respect to which you had noticed discrepancies between the contingent voucher and the butts of the order-book? Yes.

4355. In your opinion, as an accountant of many years experience, is that suspicious? It appears so to me.

4356. In examining the rough day-book of M'Lean Bros. and Rigg we have found, and the evidence of Mr. Wood is to the effect that, with very few exceptions, the only orders altered in that book are the orders of the Casual Labour Board? I think, with three exceptions, the only alterations throughout all the book are in connection with the Casual Labour Board orders, and many of them occur with regard to the particular contingent vouchers that you have brought under our notice. In your opinion, as an accountant and auditor, does that strike you as being extraordinary, for, if the order were afterwards increased, one would have thought the increased order would have been noted on the butt of the order-book? Yes.

4357. If you were examining, in your capacity of auditor, these accounts, and such vouchers for these accounts were produced to you, would you feel justified in passing the accounts? I would not. As a matter of fact, Mr. Mason and I have declined to pass the accounts for that reason. You understand that there are a number of other accounts, but I simply brought these as a sample.

4358. Have you a number of other accounts in addition to exhibits E, E 2, E 3, E 4, E 5, E 6? Yes, I have a number of other accounts, where there are differences of a similar character.

4359. Referring again to this rough day-book of M'Lean Bros. and Rigg, the evidence of the clerk who made these entries is that he copied the items from the orders into this book, and the items copied were in his own handwriting? Yes; I heard him say that.

4360. Did you notice that some of the alterations were erasures as well as strikings out? Yes.

4361. Did you notice that there was considerable difficulty—in fact, in some cases, almost an impossibility—in discovering what figures had been in the book before? I did; yes.

4362. Did you observe in the book that where other alterations had been made in some orders they had been struck out so as to leave an opportunity for discovering what had been there before? No; I did not observe that.

4363. In examining the book (which, I may tell you, I have done myself), I have discovered that other alterations—I will say most of the other alterations in the book have been strikings out, and the figure substituted placed above, so that the amendment could be easily identified, but in the cases of the Casual Labour Board erasures had been made, so that it was impossible to discover what was there before, except by surmise. Would that strike you, as a man accustomed to examining accounts, as being suspicious? Well, it would seem somewhat peculiar.

Thomas Wearne called in, sworn, and examined:—

4364. *President.*] What are you? I am a contractor and engineer. I am building locomotives for the Government now.

4365. Have you had any transactions with the Casual Labour Board during the years 1887 and 1888? Yes, a few.

4366. Will you detail what they were? In all I got eighty bags of charcoal for the meat-market.

4367. What is that you are looking at? A letter from the Board.

4368. Will you allow me to see it after you have read it yourself? Yes. I happened to find it yesterday.

4369. Have you had any other transactions with the Casual Labour Board excepting those relating to the eighty bags of charcoal? That is the only thing I know of. I have had a man or two from there.

4370. What became of the charcoal? I had it put in the refrigerating rooms of the meat-market at Darling Harbour.

4371. How did it come into your hands? For the carrying out of my contract.

4372. Was it consigned to you? I do not know. I won't say it was consigned to me. However, it was sold to me by the Casual Labour Board. My contract was for the meat-market at Darling Harbour, and the charcoal was in the yard.

4373. Did you pay for it? No.

4374. Have you paid for it to this day? I merely paid the freight, and I owe £5 7s. 6d.

4375. Which you are willing to pay? Yes. The Government owe me some £3,000 on other transactions, so I thought there was no hurry for a settlement of this account.

4376. Do you know Mr. Davies? Yes.

4377. Have you seen him lately? I have seen him; but I have not spoken to him further than to bid him "good morning" coming out of the train.

4378. Where do you live? I live in Sydney, but I very often go to Cabramatta.

4379. Have you had any conversation with Mr. Davies as to your being subpoenaed here? No.

4380. Have you had any claim made upon you by the present Board for this charcoal? Yes, which I have disputed.

Mr. J. B. C.
Miles.
1 April, 1889.

Mr. T.
Wearne.
1 April, 1889.

Edward Matthew Burrowes called in and examination continued:—

- Mr. E. M. Burrowes.
1 April, 1889.
4381. *President.*] Who prepared the abstracts of the pay-sheets? I prepared the abstracts of my pay-sheets so far as I am concerned.
4382. Do you recollect Flemming's name being on any of them? No, sir,
4383. What was the practice you adopted in preparing these abstracts? I used to look through them when I came into my office, and after I was thoroughly satisfied with them, I used to hand them over to Mr. Springall as accountant and clerk.
4384. And what became of them after that? Then he prepared the pay-sheets.
4385. That is to say, he copied them? He prepared an abstract from them for the men to sign the vouchers and pay-sheets. That was on a different kind of paper.
4386. What kind of paper did you use? I used to write my sheets on ordinary foolscap.
4387. Are you sure that in none of your abstracts Flemming's name appeared? No; I positively swear it.
4388. On none of the abstracts handed to Mr. Springall? No. I never put Flemming's name on any abstract, because I knew he had no right to be there. In fact, I looked upon Flemming as a common labouring man. He never came to me at all.
4389. Would Flemming's name properly appear on any pay-sheet? Yes; it ought to appear on the Hurstville sheet as a labourer or rouse-about.
4390. Do you know whether it did appear there? I could not positively swear whether it did or not; but it ought to do so.
4391. When Mr. Springall made out these pay-sheets did he bring them to you? I will tell you exactly how the thing was.
4392. I want you to tell me your whole course of practice? Yes. After I made out the abstracts I would hand them in. Sometimes I would come in late in the evening with the last of the sheets—perhaps on the very evening that they were preparing the pay-sheets. I would hand them to Mr. Springall after having examined them myself, and he would have to look them through, and proceed to make them out. As he made them out they would be laid on one side until he finished the whole lot. I would have other matters to attend to in connection with the office. When he finished—perhaps it might be at 11 or 12 o'clock, perhaps 2 or 3 o'clock in the morning—he would hand them to me in a bundle, and say, "These are ready for your signature, Mr. Burrowes." Mr. M'Pherson would hand them, as a rule, to me and say, "These are all right." I would sit at my table, as superintendent, and sign these vouchers, and they would be then rolled up or placed in an envelope, to be sent in to the Chairman of the Board for examination and correction by their officers. After that I do not know what became of them until the pay took place. I think that bears out the *modus operandi* as shown in that I see you have in front of you now.
4393. Do I understand that you accepted Springall's pay-sheets without any examination? I had to do so, sir; simply because I had not the time to go through a personal examination.
4394. Were you not the senior officer in the district? Yes.
4395. And did you not consider it was your duty to examine these pay-sheets? No.
4396. Why? Simply because I always had such implicit faith in Mr. Springall. There were so many officers assisting and superintending in the work that I thought they were sure to be correct. I would never get them until late in the evening, and then the vouchers would have to go away early next morning, in order to be in the Chairman's office previous to the pay taking place the next day. That never gave me any time to examine these vouchers.
4397. Did you accept all the responsibility for them? No; I cannot say I did.
4398. Who is responsible? I presume I am, but I cannot accept the whole of it; it is too much responsibility placed on my own shoulders. Had I been allowed another day I should have accepted the responsibility.
4399. Does it not occur to you that you were putting your superior officers in a very false position? I do not know who my superior officers were, except the Board.
4400. They would look to you for a check, and I must say they would have a perfect right to look to you, and yet you look to somebody else for the check. Responsibility must begin somewhere? Yes. Well, I look upon the responsibility as resting upon the head of the department—the Chairman of the Board. I cannot see that I undertook any responsibility in that respect. It was quite a different arrangement when I first started the work.
4401. What was the arrangement then? The arrangement was then that we had ample time to examine the work. I had a large number of men—you must bear in mind I had 4,700 under me at one time. These pays were made out up to the Saturday evening, and on the Tuesday morning these sheets had to be in. Just imagine two men having to make out the pays for 4,700, and have them into the office on the Tuesday morning, having only the time between Saturday evening at 6 o'clock and Tuesday morning at 9 o'clock to do the work. That was the responsibility that I had.
4402. Who told you to deliver them with such expedition? That was the orders from the department.
4403. Did you ever represent that the time allowed to you was not sufficient? Yes; frequently.
4404. Without any result? None whatever; except that the pay-sheets had to be in. They said we could take a man out of the ranks and use him, and we did so.
4405. I will leave this part of the inquiry for the present, while our Secretary is turning up the pay-sheets. Did your duties take you into the Casual Labour Board office often? Not very frequently.
4406. How often? Sometimes once a fortnight; sometimes once a month; sometimes not that.
4407. Can you recollect the last occasion on which you visited the Board office, before the Board ceased to exist, and can you tell us what took place, and give us, as nearly as you can, the date? I cannot give you the exact date; but I had occasion to call upon the Board just about the time that Messrs. Mason and Miles were taking possession.
4408. And what took place? I saw Mr. Davies, Mr. Hinchcliffe, and Mr. Hibble. I had occasion to see Mr. Hinchcliffe in the office. I wanted to get away for the purpose of meeting my wife. I had an appointment with her at North Shore, and I wanted to get away from the office. Of course you can understand that if a man has to meet his wife he does not want to be stuck in the office, and I said I wanted to get away. Mr. Davies wanted me to go up to the station. After a while he said, "Wait a bit," or words to that effect, and Mr. Hinchcliffe volunteered to go up with me. Mr. Davies wanted me to go to the station,

Mr. E. M.
Burrowes.
April, 1889.

station, and Mr. Hinchcliffe went with me. I went up in a cab with Mr. Hinchcliffe, at Mr. Davies' request. I then had a conversation with Mr. Hinchcliffe. He said that Mr. Mason had his knife into me. I said that was extraordinary, as I never had the pleasure of meeting Mr. Mason in my life. In going down the street in the cab, Mr. Hinchcliffe told me that Mr. Davies had received £270 as a bonus or gratuity from the Colonial Secretary's Department. He then asked me—he said he had got into a bit of a mess or something—I did not pay much attention to it—that he had got into a bit of a mess or something—I forget the exact words now—I think I have them all in the report that I made in my letter-book. At all events, the sum total was this, that Mr. Hinchcliffe wanted me to give him bogus vouchers—that he was in trouble in the office, do you see. I forget the exact words now, but he wanted me to give bogus vouchers for his deficiency—at least that was the interpretation I put upon it, do you see. Of course I declined most emphatically.

4409. Is that all? That is all I can remember at the present moment. Perhaps if you were to refresh my memory with anything, I might be able to answer you; but, at the present moment, I do not remember anything more. Mr. Hinchcliffe said something to the effect that Mr. Davies had received £270, and he did not care who sank so long as he swam. I remember that remark.

4410. Anything else, Mr. Burrowes? Well, then, there is something with reference to Mr. Hibble and Mr. Davies.

4410½. Let us exhaust this conversation. Do you recollect anything else—did he tell you as to any fix he was in? Yes, he did. He told me he was in a bit of a dilemma, you see—that he was in trouble, and that he was, as nearly as I can remember, some £270 to £280 in trouble, that he could not account for in his cash, and that he wanted me to rig out some bogus vouchers, and of course I declined most emphatically to have anything to do with it.

4411. Did he suggest any way by which you could help him? Yes; he told me that he knew I could help him out of this trouble. I felt rather indignant at him making such an offer to me, because I had never done such a thing in my life, and hope never will.

4412. Did he make any particular suggestion? No; he did not do that.

4413. Are you quite clear? I am quite clear that he made no mention of a particular way of getting out of that.

4414. Did you make a report upon the subject? Yes.

4415. Are you aware that you state there that you should bring in some drunken messenger at the Park? Yes; he wanted to make out that we had a drunken messenger at the time the Casual Labour Board came into existence—a messenger that we used to send into the office. I said I never knew him. When he wanted me to place it upon this poor old messenger, I said I never knew this messenger miscarry a message—that he always carried the messages right, and brought the answer back.

4416. Well, then, he did make a suggestion? Yes, he did make a suggestion.

4417. What about your previous evidence, in which you say you are quite clear that he never made a suggestion? I never said that I was quite clear he never made any.

4418. I understood you to say so. Was there anything further? He made some remark to the effect that this messenger had lost paper and envelopes.

4419. Then you recollect that after having your memory refreshed from the letter you wrote to Mr. Miles? Exactly, sir; that is thoroughly correct.

4420. Are you prepared to pledge your oath that the statements in that letter to Mr. Miles, in respect of Mr. Hinchcliffe, are true? I am, sir. I wrote it down immediately after leaving Mr. Hinchcliffe, and so many things have transpired since, and so many matters have come under my attention, that this passed from my memory.

4421. This statement you have made is, you must be aware, of a damaging nature? Yes.

4422. And if it is not absolutely true, it is very unfair of you to give it in evidence? I know it is, unless it is absolutely true; but I will take my oath on everything that I have stated there.

4423. Mr. Hinchcliffe has sworn that it is untrue. In the face of his oath, do you stake yours against his? I declare most honestly and conscientiously that the statements I made before Mr. Miles, which were written for Mr. Dibbs at his request, are correct. I will swear to them.

4424. You are aware that while you have the same protection as a witness here you are subject to exactly the same penalties as if you were giving evidence before the Supreme Court? Yes.

4425. And, with that knowledge, you adhere positively to your evidence? I do, sir.

4426. Have you ever had any difference with Mr. Hinchcliffe? No; none whatever.

4427. You have always been on the most friendly terms? Yes.

4428. And you are still? Well, I have not seen him since the breaking up of the Casual Labour Board. I have not seen him for some time now—not since I received notice that my services were not required.

4429. Do you recollect any other occasion on which you attended at the office when something unusual occurred? No. You mean with reference to Mr. Hinchcliffe?

4430. No; I say something unusual? Yes, I do; when I was called upon to sign certain vouchers.

4431. Let us have the whole of that interview, please? I was called upon to sign certain vouchers by the Honorable John Davies —

4432. Will you give us, as nearly as you possibly can, the date? I cannot give you the date.

4433. Will you give it, as nearly as you can, and state the actual conversation, detailing to us every word, as nearly as your memory will permit? Yes; you have no objection to my referring to my book?

4434. No, if it is a note made by you at the time? Well, very nearly at the time. About the beginning of October, in the year 1888, I was called upon by the Honorable John Davies, who placed before me some five or six vouchers to be signed. He stated that they were correct. Mr. Hibble, the clerk in the office, handed them to me. I said, "Well, I would like to check these with our storekeeper." Mr. Davies replied that it was all right. "That's all right," he said. I signed them, of course, naturally enough, on the representation of Mr. Davies. I did so in the presence of Mr. Larnach, who was likewise a clerk in the Board office. Mr. Hibble said to me, "These things that you signed were for Davies' hamper-basket." I think the date of the voucher was the 31st August, 1888. I am not quite certain. It was about that time. Twenty-six long-handle shovels and three napping-hammers.

4435. Do you recollect anything further that took place? Yes. There were several vouchers placed in

Mr. E. M.
Burrowes.
1 April, 1889.

front of me for my signature, as the officer incurring the expense. I demurred, as I have said, to signing them, and Mr. Davies, the Chairman, told me it was all right. They were initialled by Mr. Hibble, the clerk, and they were initialled as correct. After I had signed them and gone downstairs, Mr. Hibble, in the presence of Mr. Larnach, said, "Do you know what you signed for?" You signed for the hamper-baskets that Mr. Davies had. I said, "Had I been aware of that fact I should never have signed for them."

4436. Anything else? No; I do not think there is anything else.

4437. Who was present when Mr. Davies asked you to sign them? Mr. Hibble, Mr. Larnach, and Mr. Hinchcliffe.

4438. Were all these gentlemen within hearing? They should have been; it was only a small room.

4439. Who was closest? Mr. Hibble and Mr. Larnach—in fact, I signed them on Mr. Larnach's table.

4440. Do you recollect how many vouchers there were? There were four or five.

4441. How long afterwards was it when Mr. Hibble told you what they were for? About an hour.

4442. Who was present when he told you? Mr. Larnach.

4443. Anyone else? No—in fact, I do not know whether Mr. Larnach was present then.

4444. What book is that you have been reading from? It is my private diary.

4445. Have you any objection to let me see it? No.

4446. Is this what you were reading from just now? Yes.

4447. Do you say that you made this note about the time of the conversation? Yes.

4448. You are sure of that? I can positively swear to it.

4449. Can you tell us whether that was one of the vouchers that was handed to you? I could not positively swear to it.

4450. You are not certain? Not of that one.

4451. That is signed by you? Yes; that is my signature. I believe that is one of them [*Exhibit E 4*].

4452. Were you in the habit of signing these vouchers generally? I was generally in the habit of signing these vouchers when they came into the office at Hurstville after they had been initialled by Hibble. I would never sign them unless they bore his initials.

4453. Are these his initials in red ink? Yes. I never signed a voucher unless it was initialled.

4454. Looking at this voucher, are you prepared to say whether you signed it at your own office or at the office of the Board? Well, now—

4455. Is there anything on it to suggest to you that this was not signed as the others were signed? Yes. There is the stamp of the Casual Labour Board, Southern District. According to my idea, however, that could be very easily put on after I signed.

4456. In that stamp you recognize the impression conveying that you signed it at your own office? Yes. That is the impression I have upon it. If it had been at my office, I presume that my clerk would have initialled it instead of Mr. Hibble.

4457. Now, looking at this voucher [*Exhibit E 5*], is that signed by you? Yes.

4458. Is there anything about that to indicate that it was signed out of your own office? Yes; the absence of the stamp.

4459. Do you believe that is one of the vouchers you were asked to sign on the special occasion you have referred to? I do.

4460. Did you sign that voucher without making any inquiry? Yes, certainly, after I was told by the Chairman that it was correct.

4461. Do you think you ought to have signed a voucher without knowing whether it was correct or not? I would sign it as coming from my extreme head.

4462. Without knowing whether it was correct? Yes, after Mr. Davies told me it was all right.

4463. Then what is the object of getting your signature? It means that I sign as head of that department. I certify that the amount charged on the voucher is correct, and that the service has been given.

4464. Then am I and my colleagues to take it that you are ready to put your signature on any document like this without looking into it, and on the *ipse dixit* of anybody? Well, you are bound to do it at times. There is no tradesman in Sydney but would have done the same thing. Mr. Davies tells me it is correct; Mr. Hibble tells me it is correct; the storekeeper tells me that it is correct. I don't believe that there is a head of a department in Sydney who does not sign in the same way.

4465. Do you recollect how many vouchers were shown to you on that occasion? I think four or five—there might have been six. All the other vouchers I signed ought to bear the impress of the Casual Labour Board, Southern District. If they don't, they must have been signed in the office in Sydney.

4466. Is that seal kept at the Southern District office? Yes; it never leaves the office.

4467. Has it never left it? To my knowledge, it has never left the office.

4468. Now look at these two vouchers. This is contingent voucher, order No. 552, 25th September, six coils of Manilla rope, £3 10s.; and this other one is contingent voucher, dated 31st August, 1888, twenty-four long-handle shovels, £4 16s., and four hammers, £1 14s., total £6 10s.;—are these signed by you? Yes, they are. This one here, I recognize it now. This is the one that is supposed to represent the hamper. I remember the voucher as well as anything.

4469. You recognize both these vouchers? Yes. I recognize this voucher, and the other was one that accompanied it at the same time.

4470. What have you to say about them? I simply say that Mr. Hibble and I signed them.

4471. Look at the signatures and see if they are exactly the same? Yes; these vouchers are the ones I signed in the office, at Mr. Davies' request, when he told me that they were perfectly correct. This is the one Mr. Hibble told me that represented the hamper-basket that Mr. Davies got to proceed to the Melbourne Exhibition.

4472. You better be careful in what you say? I am careful, because I know I am speaking the truth. Mr. Larnach was present in the office at the time I put this signature to it.

4473. Do you know anything about the £3 10s. voucher? No. I remember the voucher; I remember looking at it at the time. I turned them all over, and Mr. Davies said they were perfectly correct.

4474. Are we entitled to assume, from seeing your signature there, that in the ordinary course they should represent goods that went out to the district of which you had charge? Exactly.

4475. Otherwise you should not have been asked to certify for them? No. I would not have certified for anything that was not in my own district.

4476. Then may I take it that you signed a certificate of the correctness of these vouchers—in other words, that you lent your hand to a fraud on the Government without making any inquiry? I beg your pardon. I asked Mr. Davies, the head of the department, if they were correct, and he said, “Yes, they are perfectly correct.”
4477. Then if I were your superior officer, and asked you to commit a felony, you would do it? No, I should not. If you were the head of my department, and asked me to sign a certain document, upon your bearing the responsibility I would do it. I am a subordinate officer to you.
4478. Can you say whether these vouchers were signed by Mr. Davies before you signed them? I can positively state that they were, otherwise I would not have signed them. I would not have signed anything in his office without seeing his signature.
4479. Do you think all the vouchers you saw on that occasion were signed by Mr. John Davies? Yes; as regards all others, if I got my storekeeper and clerk to initial them, I signed them.
4480. Do you state that all the vouchers which you were asked to sign on this occasion were signed by Mr. Davies? To the best of my belief they were.
4481. Do you swear positively that they were? I do. I was so indelibly impressed with what they contained that I remember every instance.
4482. And you say that you found out within an hour from one of the clerks in the office, that you had signed something that was incorrect? Yes. I will tell you how it was that I found it out. I was going up to the bank; I expected some money for myself. I noticed the peculiar amiability of Mr. Davies on that occasion. He said, “I have got some vouchers here I want you to sign.” Previous to signing them I said, “I suppose they are all right?” “Yes,” he said, “they are all right.” Mr. Larnach was sitting there, and afterwards, previous to going to the bank, I saw Mr. Hibble. He said, “Do you know that you have signed in the presence of Mr. Larnach for that hamper?” I said, “By God, if I had known I would never have signed for it.”
4483. Did you ever take any steps to recall what you had done? I simply mentioned to Mr. Hibble and Mr. Larnach that if I had known it I would never have done it.
4484. Did you not conceive it to be your duty, as a citizen, to say nothing of your being an officer in a Government department, to immediately take steps to recall what you had done? I did. I mentioned it to one or two that I had been led into such a fix. I mentioned it to Mr. Sydney Want, to Mr. Frederick Want, and others, that I should not have done it had I known.
4485. In a serious matter like this, did you take no other steps, when you had to support your testimony the evidence of those gentlemen in the office? I do not see what I could have done by myself.
4486. Well, you had Mr. Larnach’s evidence to confirm yours. Do you think Mr. Hibble will confirm what you have told us here to-day? I do not think he can do otherwise.
4487. Will Mr. Hinchcliffe confirm it? If he speaks the truth he will.
4488. What are your relations towards the members of the Board? I have no relations.
4489. Were they friendly or otherwise with Mr. Davies? Mr. Davies was friendly up to the end of October last.
4490. With Mr. Houison? Mr. Houison and I have had one or two bits of rows.
4491. With Mr. Wells? I have had one or two bits of rows with Mr. Wells.
4492. Are you aware that at one time a member of the Board recommended your dismissal? Yes.
4493. Do you recollect what time that was? I think that was in the early part of the arrangements.
4494. Do you know who the member of the Board was? Mr. Wells, I believe.
4495. Do you know what was done on that occasion? I know something about it.
4496. You were not dismissed? No.
4497. Was any complaint made officially? I do not know; I cannot say. It was never conveyed to me officially if there was any.
4498. Did the Hon. John Davies ever make a complaint? Never. He made a remonstrance with me about November last.
4499. Did Mr. Houison ever complain about you? Yes; and I have complained about him.
4500. What did you complain of him about? Well, simply when he got on to me at Waterfall about a certain bit of road, I told him that he was not in a sufficiently sober state to remonstrate. We had a few words, and I got my way. That was at the commencement of the arrangement. Mr. Gordon was present, the party that was with Mr. Deering when he had charge of the unemployed previous to the Board being formed. Mr. Houison made some complaint about the road, but he was too intoxicated for me to take any notice of it. We went into the hotel, and had one or two more refreshers there, and afterwards we got into the train and came down together, I getting out at Loftus Junction, and he going on to Sydney.
4501. You had one or two more refreshers then? Yes; I had one or two. I was perfectly *compos mentis*.
4502. Was it while you were on the road that he made the complaint? Yes. He made one or two suggestions. We afterwards went into the hotel—Mr. Palmer, Mr. Gordon, Mr. Houison, and myself.
4503. And you, being of opinion that Mr. Houison was the worse for liquor, after that went and had one or two more refreshers with him? Yes.
4504. Your evidence then is that you, finding your superior officer the worse for liquor, went with him to have more. Do you think that was a proper thing to do? I will say that I did not consider him to be quite *compos mentis* altogether on the works. We went to the hotel and afterwards caught the train. I got out at Loftus Junction, and he went on to Sydney.
4505. By himself? In the company of these gentlemen.
4506. You say that Mr. Palmer and Mr. Gordon were there;—were they in the same state? They were largely in, but I would not say that they were drunk.
4507. Mr. Houison was not sufficiently sober to instruct you? That was so.
4508. Do you know any other occasion of that kind? On the occasion of the Select Committee’s visit to the Holt-Sutherland Estate, in the beginning of December, I went over the estate with them. Afterwards I saw Mr. Wells and Mr. Houison at the hotel. Mr. Houison came out and said, “You have been over those roads on the Holt-Sutherland Estate with the Committee?” I said, “I have,” and I commenced to tell them what I said about the roads. He said, “I don’t believe it; it is a b—y lot of lies.” I turned to Mr. Wells and said, “Mr. Wells, Mr. Houison is not in a fit state to go over the ground with me,

Mr. E. M. Burrows.
April, 1889.

Mr. E. M.
Burrowes.
1 April, 1889.

me, and the man that accuses me of lying I decline to go over the ground with." Mr. Lunny, the publican at Sutherland asked me what was the matter, and I said, "This man has accused me of lying, and I will see him damned before I go out with him." I am pretty rough. He said, "What is the use of taking it like that." Mr. Wells asked me to go back. I said, "I did not want to go back after having been insulted like that." He said, "Oh, don't take any notice of Dave." He also said, "Dave Houison is a little bit excitable; come back"; and I went back, and Dave Houison apologised. He said, "You can't stand any borax." I said, "No; I cannot stand borax." He said, "You know I did not mean anything." I said, "I did not know about that; this is not the first occasion that you have insulted me," but he said, "It's all right, come along." I went over the ground then, but we only went over certain roads. We went over the Port Hacking Road and another road. After a few hours spent in this, we returned, but we had not time to see half the work which was done there, and I have not seen him since then.

4509. You say that on two occasions he was so much affected by liquor as to be incompetent to give you proper instructions? I do. Mr. Houison has only been on the ground three or four times since he has been a member of the Board.

4510. I want to go back now to these vouchers. Did you consider when you saw Mr. Hibble's initials upon them that they were correct? I considered that they were absolutely correct; that he had drawn the orders out; that he had initialled them, and that the orders had come in from the contractors all right.

4511. Would Mr. Hibble know about the delivery of the goods? I do not know.

4512. When goods were ordered, who would get delivery of them? The storekeeper wherever they were sent to. The storekeeper or overseer would report upon them. They would be reported on by Mr. Springall at Hurstville, and by the overseers at Bulgo, Campbelltown, and Waterfall.

4513. Would that come under your notice? No, decidedly not; I am the supervising officer.

4514. Would anyone at the Casual Labour Board Office be advised as to the despatch of those goods? I am not aware of anyone. They would advise the storekeeper who sent in the requisition for the goods.

4515. Could he requisition for anything be liked? Decidedly.

4516. You knew nothing about them? Nothing. If I wanted anything, I would send word to Springall.

4517. You knew nothing of the delivery? No.

4518. Then if fifty kegs of powder were ordered you would know nothing of it? No; if I were up at Liverpool I might send word to Springall, if I wanted a ton or half a ton of powder, but the requisition would go through in the proper form. I have on one or two occasions sent word to the head office that I wanted these things, but I never got them any quicker.

4519. And if these requisitions are sent out by other people than yourself, the goods may be delivered to other people than yourself? No; in every case the goods are checked by the contingent voucher.

4520. And that voucher bears your initials or signature? Very true, it bears the initials of the responsible officer, and underneath it bears the signature of the officer incurring the expense.

4521. So that you, as being the officer at the head of the district, represent to the Audit Office or the Treasury, as the case may be, that these vouchers are absolutely correct? Yes.

4522. And yet you say that you had no responsibility for requisitions or anything else? No; the records will prove that.

4523. Now, what would Mr. Hibble's initials convey? They would convey this, that Mr. Hibble had the order-book, and that he could give the order for what he very well pleased. His signature or even initials going to M'Lean Bros. and Rigg would fetch the whole shop down.

4524. Did you make any statement to the late Colonial Secretary? I did. You have got it in your hand now, sir.

4525. Did you make it in writing? I made it first to Mr. Miles.

4526. Did you see the late Colonial Secretary? I did.

4527. Did you make any verbal statement to him? I did.

4528. What did he ask you to do? He asked me to write the letter that you have got now before you, and to hand it to Mr. Miles for him.

4529. Do you know whether any of the other officers of the Casual Labour Board made any statements? I do not know exactly what you mean.

4530. Were you present when Mr. Hibble was at the Colonial Secretary's office? I was.

4531. Did he make any statement? Yes, several statements.

4532. Is this the statement you made to Mr. Miles? Yes; this is the statement. [*Statement put in and marked I.*]

4533. I want to go back to that conversation at the Casual Labour Board office;—you say in that letter which I have just handed to you, that it was in reference to some electoral rolls that you were asked to go to the railway-station with? Yes, I believe it was. I was asked to take these rolls up.

4534. You say you believe it was—are you not certain? Yes; I am certain.

4535. Were you ever in a cab with Mr. Hinchcliffe? Yes; he went up to the station with me with these electoral rolls.

4536. Do you swear that Mr. Davies asked you to drive up to the station with him? Yes.

4537. And did you drive up? Yes. At the same time I wanted to go across to my wife at North Shore. I was to meet her there.

4538. Mr. Hinchcliffe has sworn, in answer to this question, "Do you remember Mr. Davies asking you to take the rolls and drive up to the railway-station? No; I do not think he did"; and again, in answer to the question, "Did you drive up? No." Is that evidence true or false? It is false. Mr. Hinchcliffe was present, and we handed them on to the railway-station platform.

4539. I asked Mr. Hinchcliffe as follows:—"Did you ever go to the railway-station in a cab with Mr. Burrowes?" He replied, "Mr. Burrowes has often been in the office. I cannot say for certain. I might have done so." I asked, "Do you recollect in the latter part of January being at the office with Mr. Davies, when reference was made to taking electoral rolls to the railway-station?" He replied, "There were electoral rolls taken to the various works, but I do not recollect anything about one particular occasion. It was usual to send the electoral rolls out to the works, and let the men come in to vote." I asked, "Did you ever speak to Mr. Burrowes with reference to the appointment of Mr. Mason as a member of the Inquiry Board?" He replied, "Yes." I asked, "Do you recollect when that was?" He replied, "It would be shortly after Messrs. Mason and Miles were appointed." I asked, "Do you recollect making any remarks to Mr. Burrowes to the effect that Mr. Mason was thoroughly investigating the working and

Mr. E. M.
Burrowes.
April, 1889.

and the business of the Board?" He replied, "No. I told him I thought the new Board was going to be very economical. That was the remark I made." I asked "Did you ever speak to Mr. Burrowes about being short in some cash?" He replied, "No." I asked, "Did you ever suggest to him to claim that certain vouchers had been lost?" He replied, "No. Any such statement is untrue. It is untrue. There were no vouchers lost that I am aware of. If there were a cash voucher lost the value would simply come out of my pocket, as I was answerable for the money. If it were a cheque voucher it would not be so." Now, is all that correct or incorrect? Mr. Hinchcliffe told me that he wanted me to rig up bogus vouchers. He told me that he had to borrow money from a friend that you (he said) know very well; that he had asked John Davies to assist him, but John Davies declined, saying that he did not care a d—n who sank so long as he swam.

4540. I further asked Mr. Hinchcliffe—"Did you ever use such an expression to Mr. Burrowes as, 'Mr. Mason has got his knife into you.'" He replied, "I never used such an expression";—is that evidence true or false? It is false.

4541. Do you tell me that Mr. Hinchcliffe's evidence on these matters is false? It is false. I never went so far as to ask Mr. Mason about that purposely.

4542. I want to go back to the pay-sheets; will you look at the abstract of payments made from the 4th November to the 17th November? Yes.

4543. Is that in your handwriting? No; that is in Mr. Springall's.

4544. Will you look through that, and tell me whether Flemming's name occurs there at all? In my writing?

4545. In any person's writing; is the whole of that in Springall's handwriting? So far as I have gone, with the exception of one page, it is all in Springall's writing. One sheet is in M'Leod's handwriting.

4546. Is Flemming's name in any of these abstracts? I cannot come across it.

4547. Would these abstracts, in the ordinary course of your business, be shown to you? No; not necessarily.

4548. Do these abstracts bear any note to show that they have been before you? They are the abstracts to compare with the pay-sheets for every letter.

4549. What I want to get at is, where did your responsibility begin as regards these, and where did it end? As regards these that bear my initials, I will show you.

4550. Is that the only one that bears your initials? That is the only one. M'Leod's is the only pay-sheet that bears my initials.

4551. Will you look at this, headed "Public Relief Works, Heathcote Agricultural, abstract of payments to contractors and others employed, from the 4th November to the 17th November, 1888";—is that the original pay-sheet which would be sent in to the head office? Yes.

4552. By whom would it be sent in? It would be sent in a letter or blank-cover; sometimes with and sometimes without a letter.

4553. Will you look at that, and tell me whether it represents the whole or any part of the rough abstracts that you have got before you? It includes a part, but not the whole.

4554. Would the information that is given in this pay-sheet, as sent in to the Casual Labour Board office, be obtained from those rough abstracts that you have in front of you? Yes; all the information would be obtained from these.

4555. Is there any discrepancy of an important nature, that you discern, between the pay-sheets sent in to the Board office and the abstract before you? Yes; there is the insertion of a man named Flemming, between Blackall and Robinson. He has drawn £18 1s. 5d. The total amount is £23, and there is a deduction of £4 18s. 7d. for rations, leaving £18 1s. 5d. as the actual cash paid, purporting to be to Flemming and gang.

4556. Can you give this Commission any information whatever with respect to that man's name appearing on this pay-sheet. Is it correct or incorrect? I believe it is incorrect.

4557. Can you give any explanation as to this matter? No; because this overseer (Mr. Bell) was not working under me.

4558. Do you know if Flemming was a ganger at any time? I never remember him as a ganger.

4559. If we find him constantly on these pay-sheets, with a considerable amount opposite to his name as having been paid as a ganger, is it correct or incorrect? Incorrect. The man has never been anything else but a labourer.

4560. Where is Flemming—can you find him? No. If Mr. Miles or Mr. Mason had taken my advice they would have had him close enough by this time; but they seemed to take little notice of what I said or what my friends said.

4561. Look at this pay-sheet: Number 1,356, Heathcote Agricultural—do you see Flemming's name there? Yes. The total amount is £20 18s. 6d., and there is £5 4s. for rations, leaving £15 14s. 6d. cash paid.

4562. Is that correct? No.

4563. And yet you certified to it? How could I do otherwise. Place yourself in my position. You must trust to your officials. I had to do it.

4564. I should be very sorry to do it. Did you prepare these abstracts? All these abstracts with my initials to them are mine.

4565. E. M. B. Are those your initials? Those are mine.

4566. Will you look at this pay-sheet: Heathcote Agricultural, No. 1,595, abstract of payments, 18th November to the 1st December, 1888. Is Flemming's name there? Yes.

4567. Is it correctly there? No; it is not correctly anywhere. He is put down as a stonebreaker. He appears on the list, 240 cubic yards for the fortnight's work. To receive that, he must have been a ganger. He is put down for £24, and deducting the £4 11s. for rations, £19 9s. is the actual cash paid.

4568. Do you believe that at that time the man was in your employment? Yes. He was grooming my horse, and knocking about the yard.

4569. That is signed by you too? I do not know whether you look upon it as a grievous complaint, but as head of that department I signed them after they were initialled by other persons.

4570. Will you look at this pay-sheet—Heathcote Agricultural, No. 1,323, from the 26th August to the 8th September—does Flemming's name appear there? Yes.

4571. For what? For 186 yards, for which he was entitled to £20 18s. 6d., and deducting £5 6s. 2d. rations, the amount of cash paid, £15 12s. 4d. It is signed by Flemming, the last name on the sheet.

- Mr. E. M. Burrowes.
1 April, 1889.
4572. Is that correct? No, decidedly not; it is false.
- 4572½. You believe that the Government have been wrongfully deprived of these amounts? I do.
4573. What do you think this man should have been entitled to receive? If the man got from £2 to £2 4s. it would have been all that he was entitled to.
4574. Here is another, will you look at it? Yes. Heathcote Agricultural, 21st October to 3rd November.
4575. Do you see Flemming's name there? Yes; 240 yards at 2s., £24; rations, £5 4s.; cash paid, £18 16s.
4576. Is that true or false? It is false, although my signature is at the bottom of it.
4577. Your explanation then is that the documents were brought to you by Springall at the last moment, and that you signed them off-hand without making any inquiries? Decidedly, after I saw them drawn up by four or five officers who had nothing to do but to check them. That is how I am placed in such an invidious position, because I have to sign for every man's wrongs.
4578. Will you look at this same pay-sheet—you will see payments, £10 10s., Hay, and £10 10s., Hamilton? Yes.
4579. Is that correct? I believe it is correct.
4580. Could you certify to this being correct? Yes.
4581. How do you know that those names are correct when Flemming's is incorrect? Because Flemming was at my individual work, whereas Hay and Hamilton were doing carting.
4582. Will you look at No. 1,114, Sutherland-Loftus pay-sheet, 17th June to 30th June;—do you see Flemming's name there? Yes. There is J. Flemming and gang, £18 12s.; rations, £4 6s. 8d.; leaving £14 5s. 4d. cash paid.
4583. Is that correct? I could not swear to that, but I do not believe it is.
4584. Did you ever know Flemming as a ganger? No; I never did.
4585. Here is another—No. 1,230, Heathcote Agricultural, 29th July to 11th August, 180 cubic yards at 2s. 3d., £20 5s.; rations, £4 6s. 8d.; cash paid, £15 18s. 4d.;—is that correct? That is not correct. To draw this to a conclusion, I can positively swear that this man never did any of that kind of work, and never did any kind of work similar to that returned in these vouchers.
4586. If we find on examining the pay-sheets the name of Flemming as a ganger, can we then, in your opinion in every case, reject it as untrue? Yes.
4587. You say you have not attended the pay-table for months and months;—did you attend any of these pays? No; none of these pays. I never attended yet at Heathcote.
4588. Are you prepared to state that all of these pay-sheets with regard to the other amounts are correct? So far as I am personally acquainted with them, this is the first instance of anything wrong that has come within my knowledge.
4589. When did you first become acquainted with this? About the beginning of January this year. That is the first time I became acquainted with it, and I should have been in utter ignorance of the fact had it not been for Mr. Goodman. I went to Mr. Bell, Mr. Sandon, and others after hearing about it.
4590. Will you look at the abstract of payments to contractors and others, employed from the 14th August to 27th August, 1887, at the National Park relief works. Is Flemming's name on that? Yes. James Flemming and three men—amount earned, £8 15s. 6d.; rations, £2 12s. 2d.; cash paid, £6 2s. 4d.
4591. Will you look at the original pay-sheet for Waterfall between the same dates,—the 14th August to the 27th August? Yes.
4592. Is the name of Flemming on that? Yes. James Flemming, £3; rations, 15s.; cash paid, £2 5s.
4593. Do you think these are the same men? Yes.
4594. Each of these bears your signature? Yes; each of them.
4595. The signatures on the Waterfall pay-sheet appear to be witnessed by Cheney, who is a detective, and the probability is that if a man had come forward for pay while he was there, and represented himself as a ganger, when he was not a ganger, he would have been detected? He might have been there as an ordinary labouring man; so that payment is probably correct and the other is incorrect.
4596. Do you recollect on any occasion meeting Mr. G. F. Want at the National Park? I have met Mr. Want there on many occasions.
4597. Do you recollect meeting him officially on any occasion? I do not remember.
- 4597½. Do you recollect any occasion on which the Chairman of the Board went out to meet him? I met Mr. Want and the Chairman of the Board on so many occasions.
4598. Do you recollect making any request to Mr. Want upon instructions, as you alleged, from the Chairman of the Casual Labour Board? Yes. Do you allude to road works or picnics?
4599. Do you recollect any occasion upon which you made a request to him about a picnic? Well, I was requested by Mr. John Davies to consult Mr. Want. Mr. Davies was about to give a picnic to Sir John Robertson and some others of the nobility, so I was asked if I would suggest what wines would be required, and to consult Mr. Fred. Want about it.
4600. Who asked you? John Davies. I asked Mr. Want, and he told me what he thought would be the best thing to get. I made out a list, and it was approved of. There were one or two slight excisions.
4601. You settled the list with Mr. Want? Oh, yes; we arranged it.
4602. And submitted it to Mr. Davies? Yes. Mr. Davies said he was not much of a judge of this kind of thing.
4603. And was it obtained? Yes; I obtained it from Mr. Kidman.
4604. Which Mr. Kidman? Mr. James Kidman.
4605. At which shop? At the George-street shop.
4606. Do you recollect what it came to? I never asked them that. I do not recollect to this day what it came to.
4607. Did Mr. Davies tell you to take the order to Mr. Kidman? Yes, he told me.
4608. Was any order-form filled up for it, I suppose it was a private order of Mr. Davies? I considered it such at the time.
4609. Then it was an order on his private account? I thought so at the time.
4610. Have you any reason to think differently now? Only remarks I have heard dropped. I do not know for

Mr. E. M.
Burrowes.
1 April, 1889.

for a positive fact. I was under the impression that Mr. Davies was giving this picnic to a few of his friends, and he asked me, as I was a judge of these things, to order them.

4611. Do you know what year this was? The year 1887.

4612. Then up to the present moment you have no reason to suspect but that it was the private order of Mr. Davies? Oh, no.

4613. Did you go to the picnic yourself? I was there; I spent the evening there. I did my duty, and in the evening I was sent down to attend the banquet at the Loftus pavilion.

4614. How many were there? I suppose from twelve to fifteen. I could not mention all their names.

4615. I suppose you know nothing about the payment of this? No.

4616. Do you know what became of the residue of the stuff that was sent down—of your own knowledge? The greater part of the residue remaining after the picnic Robertson made out a list of, and I sent it in to Mr. Davies in Sydney. He said that it was his.

4617. And for aught you know to the contrary it was his private property? I do not know, and could not tell you.

4618. Do you know anything about the stores;—can you say whether any particular individual drew more or less rations than he was entitled to? No; I could not say. I had nothing to do with the stores. I do not know what was drawn or what was not drawn.

4619. Who can tell us? Mr. Springall, the storekeeper, and George Johnson, the assistant storeman.

4620. If George Johnson and Mr. Springall thought fit to take stores for themselves in large quantities, who can give us any information? Nobody else could that I am aware of.

4621. You hold yourself clear of all responsibility as regards these stores? Yes.

4622. You say you had nothing to do with them? Nothing at all.

4623. Do you know anything about Mr. Springall now? Nothing, except that he is living down at Coronulla Beach.

4624. Do you know how long he was in the employ of the Government? He was under the Government three months in 1886, previous to going out to the Park. He would be in the employ of the Government a little over two years.

4624½. What was his pay? 10s. a day.

4625. Is he a married man? Yes. He has lost his wife since he has been out there. He has got grown-up children and one married daughter.

4626. Do you know whether the storekeepers kept books? Yes.

4627. Do you know where the books are? They were sent in to Mr. John Davies on the last day of last year, or on the first day or second day of January this year.

4628. I want to examine those books. Do you know anything of some firewood which was sent to a man named Underwood, at Ashfield? Yes; Underwood wrote to me, asking if he could have a truck of firewood sent to him. It was sent to him. I acquainted Mr. Neale of the fact, and asked him to send to Underwood and charge him the same price as he was getting from other people. He was to collect the money.

4629. Is that all you know about it? That is all I know about it. I do not know whether it has been paid or not.

4630. Do you recollect any remark being made that he need not pay? No.

4631. Were you out at the works when the Casual Labour Board took over these unemployed? Oh, yes. I have been there since November, 1886.

4632. When did the Casual Labour Board take office? About the 2nd of May, 1887.

4633. Can you tell us whether there was any large amount of plant or stores in hand then, or if you cannot tell us, can you tell us who can? I cannot tell you what amount there was at that particular time; but Mr. Springall could tell you, or Mr. Johnson, or any of the overseers.

4634. Do you know anything of the stores that were in hand? No, sir; nothing at that time.

4635. Were you camping at the National Park at that time? Yes.

4636. Who was responsible then? Mr. Springall. I camped by myself then.

4637. Can you not give us any information as to what became of the stores? No; you see that was a very busy time.

4638. You mentioned Mr. Goodman, what was he? He was simply a ganger then; but more recently, since November and December last, he has been connected with us at Hurstville.

4639. Before that he was a ganger? Yes.

4640. What is he doing now? He is assistant storekeeper—assistant to Mr. Larnach.

4641. Was he under the Casual Labour Board during the whole time of its existence? Yes; as a labourer.

4642. What arrangement was made as regards your personal expenses? You mean travelling expenses.

4643. Your personal expenses. What you charged above your claim for salary and rations? Of course my salary was raised from 10s. a day to £5 5s. a week, or 15s. per day, and then my rations amounted to 1s. 1d. Under the new tariff that amount was not included in the salary. It was put in by contingent voucher by Mr. Davies' orders. Well, my contingent voucher was to cover my assistant and the surveyors under me. I said to him, "I rather object to my vouchers having to cover Mr. Springall's, Mr. Sander-son's, and Mr. M'Pherson's allowance, because the Auditor-General might think the whole amount was in respect of myself." I rather objected to carry these men's burdens on my vouchers, and so after that I commenced to carry my own. We each put our amounts separate.

4644. Did you send them in regularly? Every fortnight.

4645. Can you give me any idea of what your fortnightly claim was? Well, recently I had so much travelling, it would amount to from £5 to £7. I would have to go to Liverpool, Campbelltown, Eckersley, and sometimes I would have to include the rations for these men.

4646. Would your claim appear on the contingent voucher correctly? Yes.

4647. You say that they averaged over £5 a fortnight? Yes; £5 or £6.

4648. Would that be merely for personal expenses—hotel expenses and travelling? Yes, and rations.

4649. Was any complaint ever made about the amount? No.

4650. Do you know if any complaint has been made since the Board ceased to exist? I am not aware of any.

4651. Have you since the Board ceased to exist been receiving personal expenses at the same rate? No; they

- Mr. E. M. Burrowes.
1 April, 1889.
- they objected the other day to my claim for money actually out of pocket. They objected to pay me, and I had to go without expenses that had been incurred. I rather demurred against this, but they said that M'Pherson did not make the same charges. I demurred because I considered that my expenses when I was ordered into town ought to be paid.
4652. What course was adopted with regard to rations, as to advising the Board what was required, and as to the amount of rations ordered, received, and issued? At the end of every month Mr. Springall used to send in a list.
4653. To whom? Sometimes through me, he used to send the list in to the Chairman. Sometimes Mr. Springall himself would send the list, but on more frequent occasions it would be sent through me. Take this occasion. Here is a letter written on the 1st August, 1887, from the National Park Government relief works—"Sir,—I have the honor to forward you vouchers for the fortnight ending 30th July, also contingent vouchers. Item groceries 11s. was omitted from the list. You are requested to put it in now.—E. M. BURROWES, Superintendent. To John Davies, Esq." Attached to that is rations ordered, rations received, and rations issued. But this has nothing whatever to do with me.
4654. Do you take no responsibility for the correctness of this ration-sheet? No; certainly not.
4655. Is it correct? I believe it is correct.
4656. Would you have signed it if it was not correct? I don't believe I would, because Mr. Springall showed me the list of rations by Kidman, and they compared with the number received. So far as this item groceries is concerned, it was for the entertainment of Mr. Varney Parkes. He came unexpectedly upon us. The rations were not sufficiently good to entertain people that came, and we had to send for others.
4657. With regard to personal expenses, is this statement here one of your claims, amounting to £7 11s., in which rations, railway fares, cab-hire, paper and envelopes, and the carriage of packages are charged? Yes.
4658. Do you always pay your railway fare? No; I got a free pass.
4659. What is that one there? A return ticket to Liverpool. That was at a time I had not a pass.
4660. There is another—rations, forage, expenses Liverpool, £1 2s.—what are the fares in that? These are the fares of men that have come to me.
4661. Do you say that all these items charged for your fortnightly expenses were for actually necessary payments? Yes. I signed a declaration to that effect every fortnight.
4662. When you sent in any requisitions yourself, how did you know that they were complied with? Well, I did not know they were complied with until I went out to some of the camps. I would say that I sent in for them, and if they had not got them they would say so. That would necessitate dropping another note to the office.
4663. How did the overseers know that they got what you required? They would know when they got them.
4664. Who would order these things? I would order them, and Mr. Springall, and sometimes Mr. Davies.
4665. Were these orders conveyed by letter or verbally from you? They were generally written.
4666. Would it not be possible for an order to be sent in for an enormous amount of goods—largely in excess of what was required, which would really go into somebody else's pocket or somebody else's place? I do not think so.
4667. Would it not be possible under the arrangements existing that Mr. Davies could send these goods where he liked? Yes.
4668. And would it not be possible for anybody to send large quantities of the goods to other places than they were intended for? Yes.
4669. And the goods might go there and nobody be a bit the wiser? Yes.
4670. And the same with regard to rations? Yes. Well, the rations would be delivered where they were ordered for. If they were ordered for the railway-station they would be delivered there.
4671. During the time you have been connected with the Board, have any cases of imposition come under your notice? Imposition! I do not know what you mean.
4672. It is an English word. I will be bound to say you would know if I imposed upon you. You were an officer of the Board, the senior officer in that district. We will assume that, as such, you were responsible for something. During the time that you were this responsible officer, did any cases of imposition come under your notice, where your employers or the Government were being robbed or imposed upon? I cannot say directly that I know of any particular case.
4673. Do I understand that you relieve yourself of all responsibility in connection with the southern district, except the professional part of the work? Yes.
4674. You assume that you were placed there entirely as professional supervisor, and not responsible for any details at all? Not for the rations.
4675. Have you any letter or memorandum or minute appointing you to the office you held? I have.
4676. I would like to see it. This is a copy of memorandum dated 28th November, 1886, under which you took office? Yes. It reads as follows:—"National Park.—Memo. for approval.—I would suggest that Mr. Burrowes be placed in charge of the whole of the men on the National Park, with full power and control over them. Mr. B. is a surveyor, and has had experience with men in field-work. If this is approved of, Mr. Newstead's services can be dispensed with, and he can be paid up to date. He might be paid at the rate of 10s. per day and rations.—(Signed) C.W. Approved.—G.R.D."
4677. Was that the first appointment you held? No. I held an appointment in the office of the Medical Adviser of the Government.
4678. Did you hold that office when you got Mr. Walker's appointment? Yes.
4679. What salary were you getting then? Seven or eight shillings.
- 4679½. How long had you been there? Well, through Mr. Walker's influence, I was put in temporarily there until something turned up.
4680. Were you then in a needy way? I was indeed.
4681. After getting that letter, and after the Casual Labour Board was appointed, did you get any other document appointing you to the Casual Labour Board? No.
4682. Did you get any other instructions? No; only verbal instructions.
4683. I suppose you notice that that letter that you have shown me covers the supervising of the men? Yes.

Mr. E. M.
Burrowes.
1 April, 1889.

4684. It gave you control over the men ;—did you have any checks or take any precautions to regulate their affairs? The words I used when I was informed of this were, "If I am going to take charge of these men I wish to be relieved of all monetary responsibility before I have charge of the men in the field-work."

4685. Who did you say that to? I said it to Mr. Dibbs in the presence of Mr. Walker. I was sent up then to Mr. Ninian Melville and Mr. Wise for my instructions.

4686. How did you become aware that you were to look to Mr. Davies for instructions? Mr. Walker told me so. I knew Mr. Davies would not come out there to assert his authority.

4687. Did Mr. Davies, or anyone, give you authority to regulate the works in the district? Yes.

4688. With regard to the supervision of details? No; in all matters of detail they went to Mr. Springall.

4689. Did you exercise any precautions at all? No; I had such undoubted confidence in Mr. Springall that I thought he was a thoroughly fit man to go on with the thing. I found quite enough to do in attending to the field-work without attending to any details.

4690. Did you ever hear that Mr. Wells had recommended your dismissal, and that Mr. Davies begged that you might be allowed to remain? I did hear something about it, but I placed little credence in the thing. I never bothered my head about it.

4691. When did you hear about it? When this thing occurred.

4692. Did you and Mr. Davies get on very well? Yes.

4693. Had you ever any words, or was there any want of harmony between you and the Chairman? No. 4694. Was he friendly towards you? He was very friendly, indeed.

4695. What did he call you when he addressed you? He used to call me Ned and Burrowes.

4696. Have you any reason to think that his opinion about you has altered? I have great reason; and then nothing was too bad. He gave me credit for giving the information to Messrs. Walker and O'Sullivan and the other members of the Select Committee. You asked me the other day, Mr. President, whether I had ever had anything to do with the works in any other district, and I said no; but I recollect since that I was called upon by the Chairman of the Select Committee to report upon certain roads on the Hornsby Estate.

4697. Can you fix about the date? About the end of November,

4698. Now, you say that up to that time you had been on the best of terms with Mr. Davies? Yes.

4699. And so far as you knew he entertained no feeling against you? No.

4700. Were you ever up at his private house? Yes; on two occasions. One night I slept there, and on the other occasion I spent the evening there.

4701. Was there much interval between these times? There was an interval of about a fortnight.

4702. What time would that be? It was previous to the starting of the Campbelltown roads.

4703. I want to know about the time? I cannot remember; it is some few months ago.

4704. Was that on an invitation from him? Yes; he asked me to stay there because there was no camp in the district.

4705. At that particular time he was on the best of terms with you, and had no feeling against you? No.

4706. I have got in my hand a series of letters written, apparently, in August, 1888. From the correspondence it appears that some sharp letters had been written by the Chairman of the Board. I will read an extract from this of 14th August, 1888:—"I have to inform you that Underwood wrote to me direct, at my request, therefore you had no occasion to be annoyed, but I am very much annoyed. I have, &c." Then again, on 16th of August, 1888, he writes pretty sharply to you, saying that some time previously he had given instructions to proceed with certain work, and asked you why you had not carried out his instructions. Then there is the 20th August—that same month—*re* main road, Leumeah. He says that upon receipt of your communication, he telegraphed to you, and you do not appear to have received it. Then on the 27th August, he says, "I learned that you had paid no attention to my instructions; that gangs of men had been employed clearing and forming in a direction opposite to my instructions, in consequence of which an amount of expenditure without authority is worse than wasted." That shows that the relations between you were somewhat strained? Oh, no; not at all. I paid little attention to his letters, because he was most friendly when we met.

4707. What is this work at Leumeah. Is that where Mr. Davies lives? Yes.

4708. What is the name of that road? I call it the Leumeah and Eckersley Road; but he calls it the Campbelltown and Eckersley Road.

4709. Leumeah is a station, is it not? It is a platform at Mr. Davies' house.

4710. Mr. Davies' platform? Yes.

4711. Any other house there? Not within some distance.

4712. Here is the letter of 20th August, in which he speaks of the new road to Leumeah;—does that road begin at his house, or does it pass his house? It commences on Mr. Davies' property, and then runs away in an easterly direction.

4713. This letter states that he telegraphed to you to proceed with the road through the reserve, and he adds that upon his paying a visit to the works he found that the men were carrying on the old road; and that he told the overseer under you to proceed in the other direction? If we had carried out Mr. Davies' instructions, the road would have gone through Messrs. Phillips' property. The road, as we got it, branched at a right angle off from the road, and then took a northerly detour into the common, which Mr. Davies objected to, as he considered that it was not the most direct route. Some time afterwards I asked Messrs. Phillips for permission to go through their property, which they gave me. Mr. Davies then instructed me to carry it easterly through the reserve.

4714. However, about that road, you appear to have had some difference with Mr. Davies? Just because it did not benefit himself and his friends sufficiently. We wanted to take it through Government property. He wanted to take it through private property.

4715. Do you say that after these angry letters he would meet you on friendly terms? Oh, yes; since that time he has taken tea at my own private house.

4716. It has been stated to us that you kept an account or schedule of the plant, tools, and so forth in your district? Whoever told you that told you what was incorrect.

4717. Do you hold yourself responsible for the plant? Decidedly not.

4718. About this Holt-Sutherland Estate—did you prepare that plan that is attached to the Parliamentary evidence? Yes.

4719

- Mr. E. M. Burrowes.
1 April, 1889.
4719. Is it correct? As nearly as possible. It is not so correct as I would like it to be.
4720. Did you have anything to do with the initiation of this work on the Holt-Sutherland Estate? No; the roads were all done by letter.
4721. Did you ever see or hear anything of a petition got up for starting the work? I have seen the originals, and took copies of them.
4722. You reported upon them, I suppose? I was told to do that.
4723. Did you report upon them all? Not upon the Port Hacking Road and Coronulla Road. I proceeded with them. There is the original letter, where the leaf is turned down. A slight report is made about it.
4724. Do you know now all the signatures to those petitions? I have seen them.
4725. Do you know anything of the circumstances which led to these memorials being presented? No.
4726. Do you know Mr. Jamieson? Yes.
4727. Do you know whether he had any connection with the Holt-Sutherland Estate? I always imagined that he had, but he told me that he had not.
4728. Have you ever seen him out there? I have been out there with him, in company with Mr. Davies.
4729. How often? Twice or three times.
4730. What object took them out there? His object was to inspect this crossing-place at Ewey Creek on the first occasion, to look at a piece of land on Coronulla Beach on the second, and to go over the estate with Mr. Davies.
4731. Driving? Oh, yes; driving.
4732. Did they invite you to attend the party? Yes; I knew every inch of the country, and they asked me to join them.
4733. Was any inquiry made about these roads? They asked about where this road was going to and where that road was going to, and said that this was very nice and that was very nice.
4734. Did Mr. Jamieson appear to take a great interest in the work? Very great interest, and was thoroughly pleased with everything he saw.
4735. Do you know Mr. S. A. Want? Sid Want?
4736. I choose to call him Mr. S. A. Want? I have seen him at Mr. Fred. Want's cottage.
4737. Do you know Mr. Carruthers? I do.
4738. Have you ever seen him out there? Yes.
4739. Have you ever spoken to him about these roads? Yes; he has spoken to me about the Port Hacking Road.
4740. Is that the road that is 2 chains wide? The Main Illawarra Road is 2 chains wide.
4741. Did he speak of any others? No.
4742. Did you know Mr. Murphy, the manager of the Holt-Sutherland Estate? Yes.
4743. Do you know where he lives? No.
4744. Did you ever see him out there? Yes.
4745. Frequently? Yes, hundreds of times.
4746. Did he appear to take much interest in this work? Yes. I have had letters from him about it.
4747. Did you forward these letters to the Board? No. They were sent to me privately. I never handed them in to the Board.
4748. Have you any objection to allow this Commission to have them? No. There is nothing in them but what has reference to the roads.
4749. They all refer to the roads? Every one of these letters has reference to the roads.
4750. To all the roads? To the roads made. They were marked private, and I have, up to the present, treated them as confidential; but as the Commission requests me to produce them I will do so.
4751. I ask you to bring these letters here, and produce them to us to-morrow at 2 o'clock? Yes.
4752. Do you know whether any work was done by the unemployed in your district, in cutting wood, sleepers, building cottages, or clearing allotments, for private individuals? No.
4753. Do you know of any cases where they have sold wood to private people, or given free labour? No.
4754. Or where there has been any return of goods gratuitously, or anything of that kind? No. I know of this, that one man, who was a bricklayer, was engaged by Mr. Want to put up a chimney. Mr. Want paid him separately, and we did not pay him.
4755. Is not Mr. Want's place alongside the National Park? He has got a cottage there.
4756. Was that built by the unemployed? God bless my soul, no.
4757. Were you aware of any sales of firewood that had been made by the men under your charge? No. Nothing except what was sold through Mr. Neale.
4758. Who had to do with these sales;—who was responsible for sending the wood? Mr. Elton was the clerk who sent it.
4759. What was it—only firewood? Only firewood and charcoal. We made the charcoal and sent it to Sydney. I believe it was sold to Mr. Wearne.
4760. Was any record kept of the firewood that was sent in to Mr. Neale? Yes.
4761. Where shall we find the record? In the Casual Labour Board Office.
4762. What kind of a record is it? A list giving the number of the trucks and everything.
4763. Would it be sent by railway? Yes.
4764. Was that done under your supervision? Yes. It was sent on to Neale.
4765. That was something you *did* attend to. With reference to these vouchers that were signed by you, am I to take it that it was a mere matter of form your signing them? Yes.
4766. You did not guarantee their correctness? No. You can imagine supervising 4,500 men. What time would I have to supervise if I attended to these pay-sheets.
4767. Did you make that plain to the Board? Oh, I grumbled and growled.
4768. I believe that complaints were frequently made by the men to the Casual Labour Board of you and other officers;—are you aware of that? No.
4769. Oh, you have reported upon them;—here is a complaint made by a man named Frederick Cook, a ganger, dated 11th July, 1887;—I suppose you were bound to have men grumbling; when you had a large number under you, may I take it that various complaints came before you at different times for report? Oh, yes.
4770. What course used you to adopt with regard to them? I used to give the thing every consideration, and go into the matter as far as I could.

4771. Here is apparently a complaint by one W. M. Robertson;—you complained of his working on the Sabbath, and your complaint seemed to be that he wanted to build a meat-house on the Sabbath;—do you recollect the occasion? I remember it.

4772. Do you recollect the man—what became of him? He was a drunken brute. I had to dismiss him for drunkenness.

4773. Could you put your hand on any document that bears his signature? It ought to be on the pay-sheet.

4774. Were you at various times asked to report upon the propriety or otherwise of initiating work? Yes.

4775. Did you, in those cases where you had to report, visit the locality? Oh, decidedly.

4776. Always? Yes.

4777. Did anybody ever speak to you or write to you with a view of your commencing or getting any particular work completed? No, never.

4778. Did you ever borrow money from any of the men? No.

4778½. Are you sure? Oh, I have known Mr. Walsh, when we have been travelling together, borrow money from me; and then on another occasion I have borrowed from him. He might lend to me and I might lend to him.

4779. Did you ever borrow from anybody else? I am not a bank; but if I do borrow from anybody I like to return it again.

4780. These borrowings from Walsh, what would they be? They might be a pound or two—never more.

4781. Was it a common practice of yours to borrow? Decidedly not.

4782. Did you ever borrow from any of the other officers? I borrowed of Mr. Davies, and so would Mr. Hinchcliffe, and so would Mr. Hibble do the same thing. Mr. Hibble now owes me money.

4783. Can you tell us anything about the charges for rations, as to whether or not cartage or trainage was charged on the delivery of rations? I know that Kidman delivered the rations wherever they were ordered for. If they were ordered for Campbelltown he would deliver them there; if they were ordered for Hurstville they would be delivered at Hurstville.

4784. Are you quite sure that Kidman paid all the expenses to the places where they were ordered? Yes.

4785. Am I to understand, with reference to this man Flemming, that you never knew that he was charged upon the pay-sheets until quite recently? Never until the beginning of January.

4786. You swear that? I swear it most positively. I always thought the man was on the sheet as a day labourer.

4787. Can you give us any evidence as to whether goods that we find were ordered were delivered or not? No.

4788. You have prepared a list, I believe, of the work done on the Holt-Sutherland Estate? I have.

4789. Is this it [*Exhibit G*], to your evidence before the Select Committee? Yes.

4790. You say that every road on the Holt-Sutherland Estate is not mentioned there? Yes; there is one not mentioned.

4791. What is it? I cannot say from memory; but there is another road.

4792. Where can we get a list of all the roads constructed there by the unemployed? I can give you one.

4793. Will you bring it to-morrow? Yes.

4794. Do you know anything about Unwin's Bridge Road? Yes.

4795. Did you have anything to do with it? I started it; but it was taken out of my hands by David Houson, and put into M'Pherson's.

4796. Then M'Pherson could give some evidence about it? Yes.

4797. Were you and M'Pherson good friends? No; far from it.

4798. Have you quarrelled? I cannot say that we ever fell out; but I have not been on speaking terms with him for months now. First of all he opened some private letters of mine when I was away, and when I came to the camp I objected. He said he was sorry for having done so. A fortnight after that I was at Campbelltown, and when I came back I found they were opened again. I was greatly annoyed, and expressed my annoyance in unmistakable terms. He did it a third time, and I threatened to kick him.

4799. How long ago is that? About five or six months ago. He has always been trying to get into my shoes ever since I was appointed. I recommended Mr. M'Pherson to be appointed assistant. I had too much to do. I had to work Sundays and Saturdays—all night sometimes—to get sufficient work for the men to go on with. He was working with Springall and the others to get me out of the position, and naturally enough I resented this.

4800. Here is a report, prepared apparently by you, dated 12 November, 1888, speaking of the Woronora Road, the Peakhurst Road, the Eckersley Road, and the Woolwash Road;—what was this report prepared for? It is a report made by me consequent upon something that had been said to me by the Chairman of the Casual Labour Board.

4801. Does that give information as to what roads you had dealt with outside the Holt-Sutherland property? Oh, no; it is only just a patch, and very disjointed.

4802. These are three papers, which Mr. Mason informed us in his evidence Mr. Larnach handed to him;—can you give us any information about them? Yes; I can give a little. The letter dated 25th January, 1889, signed by George Johnson, storeman, refers to some rations I do not think Springall was entitled to. The other document is a document to Mr. Johnson from C. Walsh, telling him not to send certain rations, countermanded by Springall. The next is a letter of the 12th November, 1888, signed by J. H. Springall to G. Johnson, assistant storekeeper.

4803. Have you any reason, from your observation or your knowledge, to suspect that there was any connivance between Mr. Johnson and Mr. Springall? Well, I can hardly say. I never knew of any.

4804. Do you believe Mr. Johnson is a reliable man? I believe so.

4805. You cannot give us any information about any stores that were at the National Park when the Casual Labour Board came into office? No; I cannot.

4806. When did you see Mr. Davies last? I saw him in Mr. Ormiston's room here last week.

4807. When did you see him to speak to last? The day I received my dismissal from Messrs. Mason and Mills.

Mr. E. M.
Burrowes.

1 April, 1889.

- Mr. E. M. Burrowes.
1 April, 1989.
4808. Did you receive it through them? I did. I was asked to go three times. He said, "Good day, Mr. Burrowes." I said, "Good day," and away he went.
4809. Have you any reason to suspect that his feelings against you have changed very much within the last month or two? Yes; because when Mr. Dibbs sent for me he sent for Mr. Miles too. Mr. Miles said to Mr. Dibbs, "Davies says that Burrowes is a very bad man." He said, "One would have thought he would have got rid of him before this if he was such a very bad man." Mr. Miles laughed it off, and, in the presence of Mr. Dibbs, Mr. Slattery, and Mr. Fletcher, talked about the matter.
4810. You were threatened with dismissal once, and what advantage was it keeping you there? I suppose he thought he had got an able assistant, who could get plenty of oysters to send in to him.
4811. Did you attend to him in that respect? Oh, yes. I would send a man to get oysters for him occasionally.
4812. Have you any grounds for believing that he has become seriously changed in his opinion of you? I have.
4813. Why? I do not know why; and I do not care very much. I don't consider that Mr. Davies is one of my equals in any shape.
4814. Who attended to the pay-sheets? Mr. Springall, Mr. Goodman, a man named Davey, and one of Springall's assistants in the stores, Mr. Johnson.
4815. Can you tell us from your own knowledge of routine whether Mr. Springall's pay-sheets would come in examined or not? I always understood that Mr. Springall took particular care in making out the pay-sheets.
4816. Don't you see the singularly false position in which you place the members of the Board. They tell us they paid on your voucher; you tell us that you paid on Mr. Springall's? I simply signed as head of the department.
4817. Do you think that Mr. Davies or any member of the Board was aware, when you signed your name on these vouchers or pay-sheets, that it was purely as a matter of form? Mr. Davies, Mr. Deering, Mr. Wise, or anybody in the same position, would have had to do as I did.
4818. Do you think that Mr. Davies was aware that you did not concern yourself at all about the checking of these things? I think Mr. Davies was aware.
4819. Do you think Mr. Wells was aware of it? Mr. Wells had not the time to trouble about these things.
4820. Can you tell us whether you were present on any pay-days? Not for months. I used to be present at the pay-days when we held them at the National Park.
4821. How many there? During the Casual Labour Board's existence, I never attended the pays at any camp since.
4822. Can you tell us who should know whether a man was a ganger or not, and what pay he should receive on each pay-day? It would all depend upon what works he was employed.
4823. Holt-Sutherland? Johnson would know that.
4824. I suppose Mr. Hinchcliffe cannot be charged with any knowledge of a matter of that kind? I have been rather led to believe that he had, and Hibble too.
4825. Was it likely that these two gentlemen on a pay-day would know that a certain man whose name appeared upon the sheet was or was not a ganger? Oh, no. The overseer of each particular camp would vouch for his men.
4826. Who would be the overseer of this Heathcote work? Mr. Michael Bell and Mr. Sandon.
- 4827-8. Would Michael Bell be present on the pay-days? Oh, yes.
4829. If Michael Bell was present on a particular pay-day, and saw a man get £20, knowing at the same time that he was not a ganger, would he not in the ordinary course of business call attention to it? And so he did to Mr. Goodman, but not to me. Mr. Bell, however, was under the impression that this man was drawing the money to pay the sailmakers and labourers at Hurstville. Instead of that, he was drawing for a different purpose altogether.
4830. Do you know who used to go round with these payments? Mr. Hibble and Mr. Springall always. Mr. Hinchcliffe would pay at Sutherland, and then go on by the afternoon train to Hurstville.
4831. Were any members of the Board present? Yes; Mr. Davies generally travelled with Mr. Hinchcliffe.
4832. Does it not strike you as a marvellous thing that a man should go up and represent that he was a ganger with seven men under him, when there were people there watching the pay-knowing the contrary? Yes, it does. It knocked me "kite high" when I heard of it.
4833. Who do you say would be responsible for it? I should tackle Mr. Springall, because the man was actually working under him.
4834. If the man Flemming has been represented on twenty pay-sheets as a ganger with seven men under him, I suppose, in the ordinary course of events, in addition to getting the wages of seven men, he would get the rations of seven? Yes; that was deducted. But from what I have heard from the storeman, these rations were never issued.
- 4835-6. Then you are of opinion that there was a fraud committed to the extent of the wages, but not to the extent of the rations? Yes.
4837. But although the rations might not have been supplied to Flemming and the seven men, the Government contractor would have supplied the rations to the store? I should think so.
4838. So that there is a missing link somewhere? Yes.
4839. Do you know anything about Coleman, timekeeper at the National Park? Yes; he was a very good man. He got sacked through having some misunderstanding with Mr. Davies and Mr. Springall. He got sacked ignominiously. I put him on again. I believe Mr. Springall was to blame on that occasion, and so did every other officer. I put him on again at Liverpool.
4840. Do you know a man named M'Intyre? He was in Wood's employ on the Heathcote section.
4841. Do you know Mr. Sanderson? Yes.
4842. What are your relations with him—friendly or otherwise? I saw him to-day coming out of the Metropolitan Hotel. He threatened to sue me on behalf of the Casual Labour Board for a sum due to him. He wrote some letters to the papers about not getting his money.
4843. Did you ever hear of Mr. Davies being informed of these irregularities in the pay-sheets? I give you my word that I never heard about them until the first week in January.

4844. Did you know anything of a man named Yule? He was a man we had dismissed for incompetency. He was a seafaring man, and a great friend of Mr. Springall's. He might have been a good man if he had only kept sober.

Mr. E. M. Burrowes.
1 April 1889

4845. Do you recollect any complaint that Robertson made to Davies about irregularities? I do not remember about irregularities. I remember about some bad language and trivial things.

TUESDAY, 2 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

Edward Matthew Burrowes called in and examination continued:—

4846. *Mr. Franklin.*] Is this plan the plan in your evidence before the Select Committee? Yes.
4847. You stated to the President that you are a civil engineer? Yes.
4848. In both capacities, were you engaged to take charge of the work of the Casual Labour Board? Yes.
4849. You knew they were responsible duties at the time you took charge? Yes.
4850. That was since May, 1887? Since the 2nd May, 1887.
4851. What experience had you on work as a civil engineer before that? I was at Sanga, in Brisbane, on the railway line, in construction and survey, and previous to that I was in the Roads and Bridges Department, in charge of a flying survey.
4852. You had really done practical construction in roads? Oh, yes; I had constructed roads there, but not before I was road surveyor.
4853. In taking over the duties, you were aware you would be the professional head of the department? I was.
4854. And that you would at all times have gentlemen to refer to for advice in works you were to undertake? Yes.
4855. Those two gentlemen were Mr. Wells and Mr. Houison? Yes.
4856. Those two gentlemen were senior engineers in the Government service? Yes.
4857. Were you at all times appealed to as to the nature of the work you were to undertake? No.
4858. In what way were you moved in order to direct works? By direct communication from the Chairman.
4859. By letter, or verbally? Sometimes by letter, sometimes verbally.
4860. And there were propositions that you should examine and report upon projected work sometimes? Sometimes, not always.
4861. Did you not as a rule submit a report to the Chairman upon works, either verbally or by letter to the Board, as to probable work and probable cost? I have at times.
4862. As an engineer, you know it is the rule? Things were not always carried out strictly in accordance with professional etiquette.
4863. You knew that roads should be submitted to you for your report? They were in some cases.
4864. Did you always obtain approval in commencing works? Yes, as soon as the Casual Labour Board came into existence. The instructions from the Chairman were that I was to commence nothing without his authority. That has always been carried out.
4865. Were those approvals conveyed to you by letter? He would come out and go over the place, and say go on with this or that.
4866. The professional members of the Board were not very frequently on the works? The professional members were not; I could almost tell you the times they were there.
4867. You are not aware whether they endorsed the orders you received from the Chairman? I cannot say—in fact, I have been told by the Chairman not to take any notice of them.
4868. Would you not have felt more secure if you knew the work had professional sanction by the Board? Nothing would have given me greater pleasure as a professional man. It would have relieved me of a great amount of responsibility had they done so.
4869. You never threw any obstacle in the way of their seeing what you did? I have asked them to come out. They have made arrangements to come out, but have not kept those appointments.
4870. But you did sometimes receive direct instructions from the professional members of the Board? On one occasion I had to hand certain things over to Mr. McPherson. Afterwards I never interfered with the portion of work given to him, in any shape or form.
4871. You do not remember an instance where you deviated from instructions given you? No, certainly not. I believe I am too good a disciplinarian.
4872. Do you remember some case of complaint by Mr. Wells? Mr. Wells' complaints generally came in a most extraordinary manner. Perhaps the least said the soonest mended on the matter.
4873. What are we to understand? When he has come out he has never been in a fit state to give instructions properly.
4874. You are making a charge? I am not making any charge.
4875. He must have come out to assist you? I have never received any assistance from Mr. Wells or Mr. Houison. From Mr. Houison on one occasion, but from Mr. Wells never.
4876. Did this occur almost immediately that you were appointed. You do not remember either of these members conferring with you as to recommending works? Only Mr. Houison went out with me once to Cook Park. We checked Mr. Sanderson's measurements, and found them perfectly correct, so far as the levels were concerned.
4877. Well, under such circumstances, as an engineer, did you consider yourself competent to professionally advise Mr. Davies as to projected works? Decidedly.
4878. You had no hesitation in undertaking the responsibility? None whatever. I was appointed with full power and control, and I have always carried out my professional duties to the best of my ability.
4879. The Southern District was considered a large division? Very large.
4880. What proportion of the £240,000 did you expend on work, rations, and stores? The greater portion.

Mr. E. M. Burrowes.
2 April, 1889.

- Mr. E. M. Burrowes.
2 April, 1889.
4881. What proportion? Fully two thirds of the whole expenditure.
4882. That would be £160,000? About that.
4883. How much did you expend at the National Park? I cannot tell you from memory. It would require a lot of going into.
4884. You never kept a record? No.
4885. What other works were there? About thirteen other camps.
4886. Name them? The nearest to the city was Unwin's Bridge Road, where there were forty men; Cook's Park, 150 or 200; Holt-Sutherland Estate, 700 or 800; National Park, at one time, 4,500—you might put the average number down at that time at about 2,000—Como Road, 100; Peakhurst, George's River, 100 or 120; Woronora River Road, 150; Heathcote, 200; Liverpool Road, 130; Campbelltown, about the same; Woolwash, 35; Waterfall, about 220 altogether; Camp Creek, 80; Bulgo, 80; Waterfall Garie, 80; and Meadows, 150.
4887. You would have the Commission believe that the aggregate of these men would be the number under your command? You can take them at about the number.
4888. In what way would they fluctuate? In July and August I had nearly 5,000 men. Shearing took place up the country and we got rid of a lot. Public works up country also took a number away. By the end of last year there were 1,500 or 1,800 men left; perhaps 2,000.
4889. I should like you to give a mean. Over that area, what would you have to supervise? I suppose you may take it at about 2,000 men.
4890. You were the senior officer in charge of the Southern District? I was superintendent.
4891. You know as district engineer the other officers were subordinate to you and under your control? Yes.
4892. You also know what the general rule is with regard to public works as to supervision? Yes.
4893. That having advised the nature of the works to be constructed, and the funds having been provided, that the engineer in charge is responsible for the whole expenditure until final acquittances are given? Well, they hold us responsible, but whether we are so or not I cannot say.
4894. Do you know that to be the rule? I believe it is, but when you are subservient to a Chairman you have to obey the Chairman's orders. Had we had a professional Chairman things would have been different.
4895. Having such complete authority and control over subordinate officers it is a rule for the engineer to finally sign all vouchers in connection with the work and to accept every responsibility? I cannot say you accept every responsibility.
4896. Well, there could be no other authority, you see? I simply signed vouchers on the strength of my authenticated officer. Every head of the department has to do that. He cannot swear to every voucher he signs.
4897. I am referring to an officer who is absent, and whose report must be relied upon for the district which he supervises. You know it to be the rule? It is the rule, I know.
4898. Would it be so all the world over? I believe it is when the person is in charge.
4899. Would any laxity in the making of minor returns to you be immediately noticed and reported to head-quarters? Yes, by me.
4900. Would you report them to head-quarters? Oh, yes; I should report them. I have always done so. I have summarily dismissed them.
4901. Have you had occasion to? Oh, yes; I have summarily dismissed them.
4902. Were your reports always attended to? Yes, always confirmed; but there was an exception in one case. In one case a man was assistant-overseer, and Mr. Davies took my assistant-superintendent's word against mine and kept the man on. He was reported to me as being an habitual drunkard; but Mr. Davies put him on again. That is one of the matters that led to coolness between Mr. Davies and I. It was like taking my assistant's word before mine. He was reported to me, not only by the police but by other overseers, and I felt hurt in the matter.
4903. The expenditure would be your greatest responsibility? It was a great responsibility.
4904. What checks would there be over the payment of money for wages, general accounts in the camp, and the issue of stores and rations? In the issue of stores and rations I accepted no responsibility.
4905. You say it is usual for the superintendent to take that responsibility? I never saw the stores, excepting when I ate them.
4906. But if the stores were placed in your charge? I could not have looked after them. If I looked after the field-work properly it would be impossible for me to look after the rations as well. I have never had a day's leave, from November, 1886, until now.
4907. Then there was divided responsibility? There was divided responsibility, and it was always understood to be so.
4908. It was a complete deviation from all the rules as to district supervision? I simply signed for them as the head of the department. They were laid before me as being correct, and I signed them.
4909. You could not have control over men unless they were responsible to you for all returns? When you have an authenticated officer handed to you to take charge, and they say this is correct and that is correct you sign it, you have sufficient confidence in them. If not you get rid of them. That has been my position.
4910. You have stated you have not that confidence? At that time I had confidence. My confidence was shaken in the beginning of last January.
4911. Up to that time you were satisfied with the system of check you had adopted? Yes, up to the beginning of January this year.
4912. Of this year? Yes.
4913. You had no reason to suspect that things were not going right before that? No; none at all.
4914. Under that belief you did not hesitate to attach your name to every document placed before you? Not every document. There are documents I have refused to sign.
4915. Can you name them? No; I cannot name them.
4916. The dates? No; I cannot. Mr. Davies has them in his department.
4917. I am speaking of your district? That would be my district. They would not ask me to sign documents belonging to another district.
4918. Do you want the Commission to understand they were offered for signature to you in your camp? No; in the office.
- 4919.

Mr. E. M.
Burrowes.

2 April, 1893.

4919. I am speaking of documents laid before you by officers in your own camp? There are documents I have refused to sign. I have said, "I know nothing about them, you had better take them to those who ordered them."

4920. Suppose you had not time to look into the whole of the vouchers before you. I suppose you know that when you sign your name as officer incurring the expense you are responsible? I believe I am; but I signed them as head of the department. How could I see to details when I was travelling about—perhaps not at head-quarters more than two days in a fortnight. If papers were handed me to sign, and I am told by my officers, assistant-superintendents and store-keeper, "these are correct," I sign them to facilitate business. I have to take my officers' word for their being correct. They were appointed by the Government.

4921. Did you feel you had not any right to interfere or check what they were doing? I felt it was my duty to do so, but time would not permit me to go into minutiae.

4922. Time would have permitted you to have got more officers? I think they were the best that could be obtained.

4923. Did you complain that the staff was not sufficient to carry on the whole of the work? I have asked Mr. Davies, but he has cut the officers down indiscriminately. Mr. Davies had no idea of their necessity.

4924. Did you tell the other members of the Board? I only thought it the business of the Chairman.

4925. I ask you whether you ever distinctly told him you had not sufficient time? I have told him.

4926. You had your reasons? My reasons were, I thought more supervision necessary.

4927. You have reported that? Yes.

4928. But you have told the President that you were satisfied, under these circumstances, that your returns were furnished satisfactorily, and were correct? I believed they were when I sent them in.

4929. You were not aware until recently there was anything wrong? No.

4930. You say distinctly you could not give time to look into the whole matter and satisfy yourself your vouchers were correct before they were sent into the Board? No.

4931. Had you requested that better supervision should be made? I asked to have one of the officers sent from the office in order that I might have more experienced men round me.

4932. Holding such a responsible position, you were frequently appealed to by the residents for work they required? For all sorts of things.

4933. You know the people intimately? Not very intimately.

4934. There are very few living there? There are a good many scattered about.

4935. How many? I cannot tell you.

4936. Between the sea-coast and the railway? Not many.

4937. You would have no difficulty to recognize any one you have seen connected with the Holt-Sutherland Estate? I know most of them I think.

4938. Do you know the shareholders? Not personally. I know some of them.

4939. You know Mr. Murphy? Yes.

4940. Mr. Jamieson? Yes.

4941. Mr. Sydney Want? Yes.

4942. Mr. Prince? I know who he is.

4943. You have seen the petition for work to be done there;—did you notice the names of the trustees of the Holt-Sutherland Estate on it? I don't know who the trustees are.

4944. You know the names of the shareholders? Yes.

4945. Did you see their names? Yes.

4946. As signatories to a petition for work to be done on the estate? Yes.

4947. Were you at any time influenced by any of these gentlemen to push on work on the Holt-Sutherland Estate? I have been asked to push things on by Mr. Murphy, as a lot of letters I have received will show.

4948. Have they not asked you to bridge certain roads? Mr. Murphy has—no one else.

4949. No one but him? No.

4950. Do you know that he is the largest shareholder? I do not know.

4951. He took great interest in the estate? Rather too much so. I had to report him to Mr. Davies for interfering with my officers, and it led to a little coolness between us.

4952. Who was it you reported? Mr. James Murphy. You can see the letter in which Mr. Murphy replied and told me he would not interfere again.

4953. Will you look at the plan, Appendix 9, to your evidence before the Select Committee. This shows the boundaries of the Holt-Sutherland Estate;—do you know the entire area? About 13,000 acres.

4954. The roads coloured pink and yellow show the roads, cleared, formed, or ballasted, as the case may be? This plan was got up in a hurry for the Select Committee that visited there. These roads were run in hastily, and may be a little out of their true line; but as near as possible they are correct.

4955. These roads running directly north and south are approximately correct, and the junction points are correct? As near as possible.

4956. Take the plan as a diagram, that would agree with the tabulated statement you have made, and which appears in the evidence of the Select Committee; that gives 43 miles 21 chains of roads formed on the Holt-Sutherland Estate? Yes; those are the distances approximately, but not exactly.

4957. Take them together, do you think it will very much alter the distance of 43 miles? I think it may make it a little more.

4958. Which of those roads do you think were done in the interest of the public? The Main Illawarra Road.

4959. The length of that is represented as 330 chains? Yes.

4960. What would be the next road? The Port Hacking Road.

4961. That is 320 chains? Yes.

4962. Beyond those? The Coronulla Road is an important road. It is the main road to the beach, which is a glorious esplanade.

4963. What influence was used to get the Coronulla Road made? None that I know of. From my knowledge of the estate I thought it was a road I could recommend as being a splendid outlet for our labour.

4964. It has not led to any settlement? Mr. Springall is building a large hotel there.

4965. That is the only improvement? That is all.

4966. That is 180 chains long? About that.

4967.

- Mr. E. M. Burrowes.
2 April, 1889.
4967. Will you tell me what you gave for clearing? It varied from £5 10s. to £12 10s. per acre.
4968. Give me a mean. Would £8 per acre be a mean? I suppose it would be about £8 per acre.
4969. These roads have been cleared varying in width from a chain on the Port Hacking to 2 chains on the Main Illawarra Road, and 1 chain 50 links over most of the roads, excepting three roads not mentioned? Yes.
4970. The total of that would be 514 acres of cleared road on the Holt-Sutherland Estate? Yes.
4971. Now, with regard to the gravelled portions of the roads, can you tell me what price you paid for ordinary gravelling? About 15s. a chain.
4972. What width? It varied in width. Sometimes 21 feet, sometimes 42.
4973. It is 42 feet on the Illawarra Road? Yes.
4974. Can you give me a mean—what would be the gravelled portion on the Port Hacking Road? 28 feet.
4975. What would be the depth of the gravel? 6 inches.
4976. There are 892 chains of gravelled road of various widths shown on the tabulated statement;—is that an average depth of 6 inches all over? Yes.
- 4976½. How was that gravel obtained? It was generally taken out wherever we could come across it, when there was a good bed of it. We took out the best of the gravel, and rejected the inferior. All the country is of a gravelly nature. The mean of the lead would be from half to three-quarters of a mile—from Huntsman Hill to Sylvania. We had to carry it from half to three-quarters of a mile.
4977. Was it drawn by the load? Sometimes so much per load.
4978. How may the gravel be estimated? Say three-quarters of a yard to the load. They were simply the ordinary tip-carts.
4979. You paid the ordinary rates of wages? We gave them 9s. and 10s. a day for a long time.
4980. Could you get carters at 9s. a day? They were glad to come for it.
4981. Is that allowed in the pay-sheets? Yes.
4982. Does that evidence refer to ballasting? We never did any special ballasting. It was all broke up out of stones on the road. I never went into separate ballasting. I put a couple of old men and boys on to break it up.
4983. What would be the price of that? From 1s. 9d. to 2s.
4984. It is a cheap rate? It is only sandstone.
4985. You had forty-five culverts? Sometimes they were pipe culverts, and other times timber culverts.
4986. Can you tell me what the thirteen culverts are on the Port Hacking Road? Some are wood, and some pipe.
4987. Can you give me the cost? A pipe culvert used to cost 30s.
4988. What size of pipe? Twelve inches.
4989. How many timber culverts? I cannot remember.
4990. Can you tell me the cost of each? No.
4991. What was about the cost of the timber culverts? It depended on the width—about £1 per foot lineal.
4992. On the Main Illawarra Road—you remember the work is described as being good work—there are eight culverts—how much were they each? They are all pipes. Some are double-pipe culverts. There is one stone culvert, but that cost about £16 or £18.
4993. Can you tell me what the culverts cost on the Main Illawarra Road? Well, the double one, £3; the single one, 30s.
4994. We are speaking of the labour now? Yes.
4995. It took that £3 and 30s. on labour? Yes.
4996. On the Coronulla Road, the same? They are wooden culverts. One culvert there I gave £24 for. It is a rather expensive culvert. It is before you come to the beach.
4997. On the other roads there are fifteen other culverts;—are they to be taken as the same? They are nearly all pipe culverts there.
4998. There is a bridge on the Port Hacking Road? Over Gawley Creek.
4999. What is its value? It cost £95.
5000. There is another in Burrannear Road;—can you tell me its nature? It is just a wooden culvert; it cost £12.
5001. In Woronora Road? Dent's Creek bridge, 94 feet long; it cost £94.
5002. What sort of timber? Ironbark. I have some of the tickets for the work here.
5003. What are these papers called? They are the pay-sheets. This paper is what the money was wrapped up in, in order that the ganger could show the other men what he actually received and what he had to pay for rations.
5004. These show progressive certificates of this particular work? Yes.
5005. All these roads on the Holt-Sutherland Estate have been cleared under your supervision? Up to within the last two months.
5006. In all cases with the approval of the Board? Mr. Wells went over part of the Main Illawarra Road with me.
5007. Did Mr. Wells give any reason why that road should be so widely cleared and formed? The first time Mr. Wells was rather excited, and told us to stop it. I stopped the road. He said we were trespassing on the Roads and Bridges Department. It was only stopped for about twenty-four hours, when Mr. Davies told me to go on with it. I went on with it. Next time Mr. Wells came out he said, "I thought I told you not to go on with that road."
5008. Did Mr. Wells tell you it was a scheduled road in the Roads Department? It was vested in trustees, he told me.
5009. As a trust road, had it a width of 1 chain? I do not think so. It was a 2-chain road.
5010. Do you remember some correspondence in which the trustees of the Holt-Sutherland Estate offered you an extra chain width if you would form the road that width? That was with reference to the Port Hacking Road.
5011. Then taking your tabulated statement giving the whole of the work done, the evidence that you gave as to £8,413 being the total expenditure is correct? I believe it is as near as I can get it out. I believe that was up to November, 1888.
5012. But the cost of the work may be found from the prices you have given me? I think so.
5013. The calculation was made by Mr. Goodman and Mr. Springall? Yes. I believe it was correct. It is a careful approximation.

Mr. E. M.
Burrowes. A
2 April, 1889.

5014. If we use your figures, take the length of the roads formed and the width gravelled—if his are more than yours, would that be the money expended on the Holt-Sutherland Estate? Yes.
5015. You believe then it is as nearly correct as possible? I think so.
5016. You are sure of the price for carting—did you give larger prices? At one time I gave them 2s. 6d. a load, and found they were making 12s. 6d. a day. When they had a long lead they had 12s. 6d. a day. When they had a short lead we gave 9s. a day. They sometimes had a long lead on the Port Hacking Road.
5017. That is a long road? But we had the gravel in different places. It is all of a gravelly nature. The Port Hacking Road and the Main Illawarra Road were well supplied with gravel.
5018. You have partially prepared a true survey of the whole of this? Yes; I will show it to you.
5019. What is the scale? 10 chains to the inch.
5020. Who ordered this survey? It was ordered by Mr. G. R. Dibbs, the then Colonial Secretary. First of all, it was ordered by Mr. Mason. Then I was told my services were not required. I called on Mr. Dibbs, who said, "You go on with your work," and Mr. Mason was notified to that effect.
5021. When did you commence the survey of the Holt-Sutherland Estate? On the 4th of March of this year.
5022. And kept at it continuously? No; I was knocked off on the 18th.
5023. In what way? I was told that these plans were not required.
5024. Did you receive instructions in writing? No, verbally from Mr. Mason.
5025. Did he inquire into your work as far as it had progressed? No.
5026. Did he not ask you for field-books or any information? No.
5027. Have you these field-books? Yes.
5028. Will you give them to this Commission? Yes.
5029. I suppose you know it is usual, within a small radius of the city, for speculators to buy up forest land and divide it for the purpose of sale? Yes.
5030. And the improvement they make is simply clearing lines of road? Yes.
5031. And that clearing generally is of a very superficial character? Yes. Yankee grubbing they call it.
5032. Is the work on the Holt-Sutherland Estate superior to that? Yes; it has been very well cleared.
5033. Do you consider that these roads, forming fronts to different subdivisions, would improve the value of the estate? Undoubtedly.
5034. And more especially where the roads are gravelled, drained, and culverted, as shown by your statement? Yes.
5035. It would very much increase the value? Yes—before it was a *terra incognita*.
5036. What was it like? Dense heavy timber. Some of it was splendid ironbark country—the Main Illawarra Road and the Forest Road.
5037. Heavily timbered? Yes, the last road especially.
5038. Then your work is an improvement much in advance of what would be done by private speculators? Undoubtedly.
5039. To what extent is it an improvement in the value of the land? A hundred per cent.
5040. In absolute value? Yes.
5041. Did it occur to you you were doing something greatly in the interest of the owners of the property? I do not know that I can answer that. I had my instructions from the Colonial Secretary. I did not care. If he told me to pull down St. Andrew's Cathedral, I would pull it down.
5042. Did it not occur to you that someone might object? I thought of that.
5043. Did you object? I was ordered to do these things. I was only a servant. I had to obey orders. It would not have made much difference if I had objected.
5044. You felt you were doing a great benefit for someone else other than the public? Yes.
5045. It is an improvement you say of 100 per cent? Yes.
5046. *President.*] I asked you yesterday with reference to some letters. I asked you to produce them. They were letters from Murphy to yourself. Have you brought them with you? Yes.
5047. Do you produce eighteen letters? Yes.
5048. Letters from Mr. Murphy to yourself? Yes. [*Letters put in and marked I 4 to I 25.*]
5049. Amongst some of the letters you have handed me I see a letter from Mr. Murphy to yourself marked private? Yes.
5050. Can you give me any idea of the date of that? Yes. It was about October or the beginning of November, 1888.
5051. What is the progress committee of Sutherland? It is a body of settlers who hold meetings out there. They have not a municipal council, but they try to make people believe that they are a body superior to them. If there are any complaints to make, or any deputations to Ministers, they do it.
5052. I see another letter you have handed in from Mr. Murphy, dated "Saturday night";—can you give me an idea of the date approximately? From the places he speaks of it would be about September, 1888.
5053. Amongst the letters is one from Mr. Murphy, dated 4th October, 1887, to Buller—who is that? That is one of my late overseers. He is now in England.
5054. What is that note on the letter? It is, "To E. M. B. Sir,—Am I to take notice of that letter. Reply to bearer."
5055. Is that in Mr. Buller's handwriting? Yes.
5056. What action did you take on that? Oh, that road was cleared.
5057. Do you recollect what action you took? The road was cleared.
5058. I also find amongst the letters one from Mr. Murphy to one Napier, 16 June, 1888? That is to one of my late overseers.
5059. Where is he? He is up country now. He was dismissed for drunkenness.
5060. Have you been able to find any other letters you received from Mr. Murphy? No; I think that is all I have got. I used to be annoyed by the number of letters I got from him.
5061. I show you the copy of a letter you wrote to Mr. Murphy from the press-copy letter-book, in answer, it would appear, to a letter you received from him? Yes; I used to get many letters, and throw them into the waste-paper basket. I did not take much notice of them at first. Afterwards I kept them.
5062. Did you always copy the letters you wrote to him? No.
5063. Are you intimate with Mr. Murphy? Oh, yes.
5064. Very intimate? We were always very friendly. We always have been—with the exception of a little misunderstanding we had about him interfering with one of my overseers.

- Mr. E. M. Burrowes.
2 April, 1889.
5065. Was he your senior officer? Mr. Murphy! No, he had nothing to do with me.
5066. Was he a salaried servant of the Government? Not that I am aware of.
5067. I ask that, because some of these letters are rather mandatory in their terms, as though he held some superior office to you? You would imagine so from his letters.
5068. Did you bring these letters under the notice of your superior officer? I did.
5069. About what time? About the beginning of September, 1888.
5070. Did you write to the Chairman about it? I did.
5071. Do you think you could lay your hand on the letter in your book? I do not know whether I made an entry in the letter-book, but I ought to have done so.
5072. Is there any other letter-book besides this one? No; it is my own private book.
5073. Did you keep copies of all the letters you sent? Not all. I wrote letters at all manner of places.
5074. Have you reported to the Chairman receiving the letter from Mr. Murphy, marked private [*Exhibit I 19*] ? Yes.
5075. *Mr. Waller.*] Did you check the abstract pay-sheets as against the original pay-sheets made out? No, not always.
5076. Are the documents we have presented to us here, called abstract pay-sheets, the first documents relating to the men employed at the different works? Yes, they are the first documents. The pay-sheets are prepared from them.
5077. They are the first? Yes.
5078. You did not check them with the pay-sheets? I always checked the ones I had. I saw they were correct before I handed them out.
5079. You did not check all of them with the pay-sheets? No; I never had time to do it.
5080. Did you make Mr. M'Pherson responsible for the accuracy of the pay-sheets? Only what he was looking after himself, for the particular portion of the district which he had control over.
5081. How did you make Mr. M'Pherson responsible? Simply that the Chairman looked to him.
5082. I am asking you? I told him I would not interfere with that portion of the district he had supervision over.
5083. Is it in writing? He had letters telling him that that portion of the district was his own. He was also informed by the Board.
5084. Did you tell Mr. M'Pherson, in writing, that you would hold him responsible for the accuracy of the pay-sheets, for the men who were at work in his district? I believe I did send him a memorandum to that effect.
5085. Was it copied in the letter-book? I do not think that the letter-book was in existence at that time.
5086. You stated yesterday to the President that you signed hundreds of vouchers without knowing their contents? There is no doubt about it.
5087. Can you particularise some of them? Vouchers for the ordinary pay-sheets, for the Government contractors, for rations, for M'Lean Bros. and Rigg, for Harwood & Co.
5088. Who were they? Mr. Davies used to buy a tremendous lot of stuff from them.
5089. Shortly, might we understand that you never examined the vouchers? I never examined the vouchers.
5090. You signed them all, taking it for granted they were correct? All being authenticated by my officers.
5091. Name those officers? Springall, M'Pherson, Bell, Walsh, Underwood, Sanderson, and all the officers in charge of the camps.
5092. Would that statement include sub-storekeepers? No; I should not take any notice of sub-storekeepers. I looked upon them as very subordinate officers.
5093. Were you actually without knowledge of the quantity of goods delivered to the different camps? Yes; I did not know what goods were delivered there.
5094. For all you knew statements as to the delivery of goods might have been fictitious—utterly false? There would have had to be collusion between the officers and overseers.
5095. For all you knew? Yes; there might be.
5096. Did you consider Mr. Wells and Mr. Houison as your superior officers? Decidedly.
5097. Had you power without reference to those officers to construct or lay out works? If I had instructions from the Chairman.
5098. Without reference to them? Oh, yes.
5099. You would not feel yourself called on in any shape or form to refer to them about works for which you received instructions from the Chairman? No; not if I received instructions from the Chairman.
5100. Suppose these two professional gentlemen found fault with your work, what position would you be in? I have on one or two occasions been placed in a very invidious position. At one time Mr. Wells told me to alter a bridge; Mr. Davies said "Do not bother about it; never mind it." There was the invidiousness of the position. It was the Gawley Creek bridge.
5101. Is there any other case? That is the only bridge, I think.
5102. While on the subject of Mr. Wells, I would like to know whether, from the way you answered Mr. Franklin, the Commission are to understand that when Mr. Wells visited the works he was in an unfit state to give you instructions, because of being in liquor? He was on one or two occasions.
5103. Only one or two occasions? Yes.
5104. You made the same statement regarding Mr. Houison? I did.
5105. On how many occasions have they been unfit? I have only seen Mr. Houison out there three times, and twice out of that he was unfit to do work.
5106. Mr. Wells? I think he has been out there five or six times.
5107. Out of that number of times? On one or two occasions he has been a little bit elevated.
5108. When you say "elevated," you do not consider he was in a proper state to be a judge of work? I did not consider he was in a proper state.
5109. On these occasions, who were present besides yourself? Duffy, the trustees' coachman, was present on one occasion.
5110. Where does he live? At the National Park.
5111. What is his Christian name? It is Owen Duffy.
5112. Anyone else? On another occasion Mr. Gordon, Mr. Palmer, and Mr. Hanley.

Mr. E. M.
Burrowes.

2 April, 1889.

5113. Where do those gentlemen live? I cannot tell you. Palmer and Gordon are both Government officers. Mr. Wm. Hanley lives at Camp Creek, Helensburgh.
5114. On the occasion that Mr. Houison was present at the works, who was there then? Mr. Wells was present. Lobb was the coachman, and there was a publican of the name of James Luny at Sutherland.
5115. Can you fix in any way the time of the visits of Mr. Wells? Mr. Wells and Mr. Houison visited the day after the visit by the Select Committee.
5116. What was the second occasion? That is months and months ago. I cannot tell you.
5117. Twelve months ago? It might be twenty months.
5118. Now, as regards the occasion when Mr. Houison was there? That was the day after the Select Committee visited the place.
5119. The next occasion when Mr. Houison was the worse for drink? That was up at the Waterfalls.
5120. Who was present then? Hanley was present. Besides Mr. John Davies can bear me out in this if he likes. He has spoken to me several times on the matter.
5121. About his being the worse for drink? Yes.
5122. Can he also give similar evidence as to Mr. Wells? I should think he could if he chose.
5123. When was Mr. Wells the worse for drink at the National Park. Was that the day after the visit of the Select Committee also? No; that was over twelve months ago.
5124. Now you are quite satisfied in making these statements that these gentlemen were obviously the worse for liquor? Yes.
5125. I understood you told the President yesterday that you personally did not make any requisition for plant? I have on dozens of occasions asked for plant.
5126. Personally? Yes.
5127. In writing? Sometimes in writing, sometimes verbally.
5128. Was it not the practice for requisitions to be made by others than you? Yes.
5129. Did the store-keepers, other than Mr. Springall, make these requisitions? They have in the country districts like Campbelltown, but they have always been cautioned not to do so.
5130. Who would be the store-keepers in the country districts? Turner, Underwood, Boyldon.
5131. Who would sign the contingent vouchers for these requisitions? I would.
5132. Without having previous knowledge of what was ordered? We would get word from the officer who got it that he had received so and so, and the store-keeper would inform me it was correct; or else Mr. Hibble, as officer issuing the things, would initial them before they came out to me. Vouchers would be initialled before they came to me from the head office—that was the only guarantee to me they were correct.
5133. If Mr. Springall ordered goods without your knowledge, and chose to swear that these were ordered under your instructions, how could you prove it was not so? Simply because I have the initials of Mr. Springall and Mr. Hibble.
5134. I do not think you quite understand my question. You say Mr. Springall was in the habit of ordering goods, and that you did not know anything about it? Yes.
5135. I say now, if Mr. Springall and Mr. Davies chose to say all goods were ordered under your instructions —? I should say it was false, because I was not always there. That could be proved, because you have only to look at my contingent vouchers or diary, and you would see where I was. If I was at Liverpool or Campbelltown, I could not issue those orders for these things.
5136. You signed the vouchers because they bore the initials either of Mr. Hibble or some responsible officer at the head office? Yes; they vouched for the accuracy of these things.
5137. How would the head office receive the order for plant? The orders emanated through the Chairman or Secretary.
5138. Did the Chairman initial these? There was a paper drawn under my notice of some oil from Fell & Co. You will see a memo. in writing that no one had authority to order any goods, excepting himself or the Secretary. Mr. Mason could give you the papers or correspondence that would bear out what I have tried to explain. That was wood-preserving oil.
5139. What was it used for? To keep the white ants from getting into the wood.
5140. Where was it used? On the Holt-Sutherland Estate. Mr. Davies said he did not order it, but he did order it. It has since been paid for within the last week.
5141. How many gangers were there on the works altogether? Oh, we had hundreds. Every eight men had a ganger.
5142. Is there any way by which the Commission can get hold of the names of the gangers? They are in the books.
5143. There are certain names in the books. We want to know who the real gangers are? If you show the names to me I can tell you. You see the gangers used to shift about.
5144. Have you no record of your own? Only the abstracts. The store-book is the best book to get a list of the gangers out of. They drew the rations and were charged for them. You know every ganger on the field in that way.
5145. Is there any book or document to show what gangers are dismissed? You would know them by change of the ganger. Suppose Brown was the ganger this week, it would be Jones, late Brown, next week.
5146. It was always done so? Yes.
5147. You just spoke about rations. Can you explain why the rations list does not agree with the rations column for receipts and delivery? The store-keeper can tell you that; I could not.
5148. In connection, yesterday, with what you drew for personal expenses, I think I heard you mention that some of those expenses were incurred on account of charges for board and residence? Yes.
5149. Where was this board and residence? At Liverpool and Campbelltown—hotel expenses.
5150. On what occasions? Every fortnight.
5151. Inspections? Yes.
5152. Carrying out your duty as Inspector? Yes.
5153. Was the Board aware you had to go to hotels? Yes, decidedly.
5154. Was there any provision made whereby you could go to the works and obtain your dinner or lunch or what you might want there? If it happened to be dinner-time when I got to a place I would have dinner.

- Mr. E. M. Burrowes.
2 April, 1889.
5155. Was there any absolute necessity for you to go to an hotel? Yes; there was not any place for me to sleep.
5156. How long did it take you to go from your own camp to Liverpool? A day; sometimes I could not get back. It took a couple of hours from Sydney.
5157. What prevented you coming back? I had three camps in one district. I could not do them all in a day.
5158. Was there no place respectable enough for you to stop at? Yes, but if I got into an officer's bed he would have to sleep on the floor.
5159. Could you not have provided a bed for yourself? If I did that I should have had to have a bed in every camp. The expense incurred was very limited. Besides it would have placed me in too familiar a position with my officers. I think the more an officer keeps away from his subordinates the better.
5160. You have said you have lived a great deal in the bush which accounts for any brusqueness in your manner? Yes.
5161. Do not the general managers and overseers frequently have to go and sleep at the out-stations? Yes. I have had to do it myself, but still I think on relief works the less the officer-in-charge mixes with his men the more he is respected.
5162. What was your ration allowance per day? The same as the men.
5163. Were you allowed a cook? We had a cook when all camped at the Park. The same cook cooked for about fifteen or sixteen of us.
5164. You had separate quarters of your own? Only a sleeping-place. I used to dine with the men.
5165. You had a regular mess? Yes, a regular mess.
5166. Referring to these letters you produce. Have you any other letters from any person other than Mr. Murphy of a like character referring to the roads or the Holt-Sutherland or the Hornsby Estates? No; none.
5167. Have you any other letters from Mr. Murphy? Not that I am aware of.
5168. Will you look and see, and if you have will you bring them? I will.
5169. There are letters which must be antecedent to these you bring? I used to throw some in the waste-paper basket as I received them.
5170. You understand my question. Not only letters having regard to the land but having any reference to the Casual Labour Board? Any correspondence I have you shall have.
5171. Do you, of your own knowledge, know whether the Chairman or any member of the Board has received any letters from Mr. Murphy? I could not say.
5172. Or from any other person? I think Mr. Larnach told me he was going through some papers in the office and came across a letter from Mr. Burns about the roads, which he gave to Mr. Miles.
5173. Have you reason to know that any other person has received a letter? I know Mr. Walsh has received letters from Mr. Murphy. He was a friend of Mr. Murphy's.
5174. You don't know about anyone else? Not that I know of, beyond what I gave you of Napier's and Buller's.
5175. Did you ever receive anything from Mr. Murphy, or any promise that you should receive any gratuity or any payment in any shape or form, for helping him to carry out his many requests contained in these letters? I never received anything.
5176. Did you receive any promise? Never.
5177. In any shape or form? None whatever. Mr. Murphy has never dared to suggest anything. All that I have done is that I have applied for a piece of ground of 5 acres. It was promised I should get it at £2 per acre. It was full value for it.
5178. Can you name it? Five acres at Gunnamatta Bay. I applied to the Board of Directors the same as anyone else would.
5179. Did you apply for that land from your own knowledge of it? I applied for it simply because it was deep-water frontage in Gunnamatta Bay, and know that it will be valuable by-and-by.
5180. Did Mr. Murphy know that you had applied for it? Not until I had applied for it.
5181. Have you got it? Not yet. I hope to get it.
5182. When was the application made? In November last.
5183. Have you a press copy of that application? No.
5184. What is the usual charge they make for land of the same quality? From £1 to £2 per acre. About £2 is the highest price they get. I have the promise of a lease at £2 per acre. I think it is as much as it is worth.
5185. Do you know whether any other member of the Casual Labour Board has any interest in land on the Holt-Sutherland Estate? I know Mr. Davies and Mr. Jamieson were to get thirty acres between Gunnamatta Bay and the ocean. Mr. Davies told me he had applied for it.
5186. Is that thirty acres each? No; between them, adjoining the Government reserves and Coronulla.
5187. Have they got it now, or is it applied for? I cannot tell you. I know he applied for it. Mr. Davies asked me to go down, and I showed him the land. Next time he came, Mr. and Mrs. Jamieson came and had a look at it. They were all pleased with it, and said they would apply for it jointly. I asked them afterwards if they had applied for it, and they said yes.
5188. Do you know anything as to the terms on which he applied for the land? I cannot tell you.
5189. Do you know whether any other members of the Board have applied for land there? The only party I know of is Mr. Springall. He has land on the Coronulla beach, where he has built an hotel.
5190. He has the land? He is living there.
5191. Do you know what he is paying there? He is paying £3; but it is the pick of the whole estate. He has five or ten acres.
5192. Do you know when he became possessed of the land? At the end of last year or the beginning of this. He has built on it.
5193. Do you know on what terms Mr. Springall was with Mr. Murphy? I cannot tell you.
5194. Do you know whether they knew each other? They knew each other.
5195. You do not know any other person in the employment of the Board that has got land? No.
5196. Mr. Kidman was the contractor for rations? Yes.
5197. Would it have been an easy matter for Mr. Kidman, if he had felt so inclined, to have debited the Board with more rations than he supplied? Not without collusion with the store-keeper. All rations must emanate from Mr. Springall or Mr. Larnach.

5198. Could the head storekeeper have issued orders for rations for men who did not exist? It is just possible he could have done such a thing.
5199. Is it not possible in a case like that of Flemming's, who was returned as a ganger, which you say he was not, that Springall would have to make a return for rations for a gang under Flemming, or else it would be apparent on the pay-sheet that there was a fictitious ganger? He could do such a thing.
5200. Is it probable? It is probable it has been so. Kidman would get an order for the rations he had to send, and the storeman could manipulate that as he chose.
5201. If Springall returned on the pay-sheets a larger number of men than were drawing rations would not of necessity attention be drawn to the fact from there being less rations required than there were men at work? Yes; it could be done that way by putting fictitious numbers.
5202. Suppose this man Flemming appears regularly as having under him the usual gang of seven men, and the rations return shows only rations for a certain number of men less than seven, would not that create suspicion in the mind of the checking clerk? Unfortunately the checking clerk has also been the storekeeper. He has been checking clerk and storekeeper.
5203. He could not be checking clerk at the head office? Not at the head office.
5204. The storekeeper would order (say) 100 rations; if he only had eighty men he would have twenty rations in hand? Yes.
5205. If he sent in pay-sheets for 100 men and only showed he was using eighty rations, would not the question arise: "What did the other twenty men live on if you are not getting rations for them"? He would always order rations slightly in excess of the men he had, or else the exact number.
5206. If he ordered rations for a less number of men than he returned, would he not have been "bowled out" in the case of Flemming? He would not do so.
5207. Could anyone else other than Springall order rations? I could do it, but I never did.
5208. Who took delivery of the rations and plant, and all things that came to the camp? Springall, as storekeeper.
5209. For all the camps? No; the overseers.
5210. Springall took delivery for what camps? The National Park.
5211. Who for the other camps? The overseers.
5212. How many might there be? Twelve or thirteen different camps.
5213. Who took charge of the goods when they were delivered? The storemen.
5214. That would be the petty storemen? The storemen for the overseers' camp.
5215. Who was held responsible for the safe custody of the goods? The overseers.
5216. And the correct delivery? The overseers.
5217. Did you ever take stock? We got stock lists done.
5218. Who took stock? The overseers.
5219. Who checked the correctness of the stock account? Sometimes Mr. Springall went to these camps. It was part of his duty to visit them.
5220. What it pretty much amounted to was, Springall the head, Springall the middle, and Springall the tail? Yes.
5221. His own orderer and his own checker? He was head of the commissariat branch.
5222. No one to check him? No.
5223. So that if Mr. Springall was honest it was a good thing for the public; if dishonest, it was a bad thing for the public? It is for you gentlemen to say whether he is dishonest.
5224. Did the persons who delivered these things get a delivery-note signed by the receiving storekeeper or overseer? As a rule they would have to sign the railway invoice.
5225. Did the railway give them the other half of the delivery-note? I believe so.
5226. What became of that? I cannot say. I have often had to pay out of my own pocket.
5227. In cases where you did not have to pay out of your own pocket? They were marked on the invoice.
5228. They would be filed? Yes.
5229. Did you see them come into the head office? I have seen them.
5230. Would you be able to get hold of the delivery-note? I should think so. It is only a matter of asking the clerk for them.
5231. What was the result of the month's stocktaking? It was reported to the Chairman.
5232. What I mean is, did you find much less stock—any that was not accounted for? Of course there was a good deal that was returned as worn out. They were returned into the store. There are tons of old things out there.
5233. Was there any complaint that the stores were excessive? I never heard the Chairman say whether they were excessive or not.
5234. You never heard any remarks that you were too generous as to the use of tools? Sometimes we have sent in a requisition for twelve dozen, and they have sent us out six dozen. Sometimes we have sent in for six dozen, and they have sent us out three dozen. Sometimes they sent us more.
5235. Then instead of finding fault with the requisitions you sent they have sent you more? Yes.
5236. Was that a common occurrence? Frequently.
5237. Would the same thing refer to powder? To powder especially. On one occasion I knew of my overseer having thirty-five kegs there; I objected to it, and I had a magazine built in a cave.
5238. Is the Commission to understand from you that so far from a reprimand issuing from the Board for excess or extravagance in the use of tools, your orders were very often increased? That is quite right.
5239. Do you know whether these orders were altered by being increased or decreased by verbal orders at the different places the goods were got from? I do not know. I did not go to the contractor's places; I did not do business with them.
5240. Do you know of Springall beyond what you have told the Commission. Was he a man well to do? He was not.
5241. You do not know yourself? No.
5242. Do you know anything about his circumstances now? Well, I heard him say to-day that he was a poor man, but I do not see how that could be.
5243. Whom did he say that to? To Mr. Larnach and myself,

Mr. E. M.
Burrowes.
2 April, 1889.

5244. What brought the conversation up? He came up to Larnach, outside; he said Larnach had been saying this thing and that thing about him, and libelling him. He was not worth powder and shot, or he would put him in Darlington.
5245. To prevent any misunderstanding in your evidence, I want to ask you plainly, do you wish the Commission to understand there was no check whatever as regards the ordering of goods by the head storekeeper? The storekeeper would have to check the goods when they came out.
5246. I asked you whether there was any check to prevent the storekeeper ordering what goods he liked? He ordered what goods he liked.
5247. That is distinct? Not distinct from the Chairman, but through him.
5248. I want to put on record whether your answer is there was no check as to the requisitions he chose to make for goods required. All he had to do was to send it through the Chairman? Yes, that is so.
5249. There was no check? No.
5250. How many storekeepers were there employed under the Casual Labour Board? I call them storemen. Mr. Springall would be the storekeeper.
5251. Under Mr. Springall, how many storemen were there? He had one storeman at the camp, Johnson; Mr. Tait at Waterfall; Mr. Hunt at Bulgo; Mr. Munce at Liverpool; Mr. Turner at Leumeah; and Mr. Scott at Cook Park.
5252. Could these storemen send in requisitions so long as they sent them to the Board or through the head storekeeper? Through Mr. Springall.
5253. How long after the delivery of the goods at the camp was it that you signed the contingent vouchers? That I cannot say. Sometimes almost immediately; otherwise with the monthly bills. They sent them out once a month.
5254. It might be a month? Anything ordered in October would come in November.
5255. Did you ever refuse to sign them? Mr. Springall has told me he did not remember what certain of them were for, and I have refused to sign them.
5256. Have you any numbers of the vouchers you refused to sign? No.
5257. Nor the dates? No.
5258. Only on one or two occasions? I suppose it would be about that.
5259. Now as regards your own duties. You were superintendent? Yes.
5260. You are a civil engineer? Yes.
5261. Qualified? Yes.
5262. Are you equally qualified, as an engineer, as Mr. Wells is? Yes, just as much as Mr. Wells.
5263. Not merely as a surveyor? No.
5264. Did you ever originate any work under the Board? Yes; all those bridges are my own design.
5265. Laid out, measured up, and made the calculations as to cost? Yes.
5266. The cost of the bridges would be made up before? Yes; I made out the price before.
5267. Who checked the correctness of your work? What do you mean?
5268. You say you laid it out, measured it up, and made the estimates? The check could be done by the clerks making out the pay-sheets.
5269. What knowledge would they have of the correctness of your figures? They were educated men who understood what was put before them.
5270. Would they be able to check your calculations? The figures alone would be enough for that. If any one wanted to check the work the professional heads of the department could have come out and measured it up.
5271. As a matter of fact, was it checked? No, it was not.
5272. So you were actually your own judge and jury? So far as the work is concerned.
5273. There was no check whatever? No; in my appointment I had full power and control.
5274. Is there any book or document that would show the Commission the weekly or monthly return of the men employed by the Casual Labour Board? There are books to that effect; there were up to the time they were taken out of the office.
5275. Would they show the number employed at the different camps? Yes.
5276. I am referring to books other than the pay-sheets? I am, too; there is a book to the effect.
5277. How often was the record taken? Every fortnight.
5278. You know that? I do.
5279. Who made it? Each overseer would send a list to me. I use to hand it to the clerk to enter up the names of the men in each individual camp.
5280. What became of the original lists sent down? When I came back from Campbelltown at the end of the year all the papers were taken out of the office and handed in to Mr. Davies. Everything was commenced *de novo*. It was done without my knowledge or consent.
5281. You know Mr. M'Pherson well? He was a querulous ill-tempered little fellow.
5282. One of the unemployed? Yes, I believe so; at Gordon.
5283. One of those seeking employment? He represented himself as being a man of large means—wealthy—worth £20,000 or £30,000.
5284. Was he an unemployed? I was told he was.
5285. Was he a professional man? I believe he was a surveyor.
5286. I want you to tell me whether M'Pherson was taken out of the ranks of those seeking employment from the Government because he could not get proper employment? I cannot tell you, but I was informed to that effect.
5287. He was a surveyor? Yes.
5288. Qualified? I believe so.
5289. Was he a reliable man? I would not look upon him as a reliable man.
5290. Why? For the simple reason that when he came to me his work was confined to surveying portions of acres and 2 acres for the men to clear. I recommended him to the Chairman to be appointed assistant, with the increased rate of remuneration. He was then raised to 10s. a day. Then he had certain work allotted to him to see to the stone-breaking and the making of roads; but I found him unable to calculate a heap of stones. That rather lowered him in my estimation. I know he was a good surveyor, because I checked some of his work, but he had no idea of road-making.
5291. Would not any man with a knowledge of surveying be able to calculate cubic yards? Well, he could not.

5292. How did he come to you in the first instance? He was sent to me by Mr. Davies. He brought a letter introducing him.
5293. Requesting you to find him employment? Yes.
5294. Anything you could? As a surveyor.
5295. Have you got the letter? It is amongst the records.
5296. You mentioned yesterday that you ordered the wines used at the picnic on the Holt-Sutherland Estate? Yes.
5297. They were got from Kidman's? Yes.
5298. Who did you order him to charge them to? Mr. Davies.
5299. As of the Board, or for Mr. Davies not of the Board? I ordered them for Mr. Davies of the Casual Labour Board.
5300. Did you understand that you were ordering them for Mr. Davies for his own private charge, or to be charged to the Casual Labour Board? I never gave it a thought either one way or the other.
5301. Do you know whether Mr. M'Pherson had much to do with the roads on the Holt-Sutherland Estate? Not on my side at all.
5302. Not on your side at all? Only the last month or so, since I was relieved, superseded, or started surveying; I don't know which you call it.
5303. Have you got any letter-book with replies in it to any letters from Mr. Murphy, other than the letter-book now in our possession? No.
5304. I think you told the President a short time ago that you brought under the notice of the Board these letters you have shown us to-day, that you received from Mr. Murphy? I have shown them to Mr. Davies.
5305. Do you mean to the Board as a Board or to Mr. Davies? I mean to Mr. Davies. He used to come out once a fortnight, and I would show them to him. I would say, "Here is another letter from Mr. Murphy."
5306. What was the result? Oh, not much result; of course Mr. Murphy used to see Mr. Davies in town. He only laughed about it. At last I used to put Mr. Murphy's letters behind an ink-stand there, and when they got large enough tie them up. Before that I threw them away. I had hundreds of other letters.
5307. Whom did the hundreds of other letters come from? From my own friends.
5308. You are lucky to have so many friends? I rather think it is objectionable at times.
5309. You are sure they did not come from people referring to the Casual Labour Board? If they did they would not be torn up. They would be amongst the records.
5310. Did I understand you reported Mr. Murphy once? To Mr. Davies.
5311. To him as the Casual Labour Board? I only reported him to the Chairman. I never wrote to Mr. Davies privately.
5312. Did you report in writing? I wrote to Mr. Davies.
5313. Is there a press copy of the letter? I do not know whether I kept a copy of it. I wrote and told Mr. Davies that Mr. Murphy was always interfering with the overseers. He spoke to him, and Mr. Jamieson also spoke to him.
5314. Mr. Jamieson was spoken to by whom? Mr. Jamieson was spoken to by me.
5315. Why? Because Mr. Jamieson was present at the time and overheard, and he said he would put a stop to it.
5316. What was the result of the report? The result was that Mr. Murphy used to go round and tell them that they should not do this, and that in a dictatorial manner.
5317. You do not understand my question. I ask what was the result of your reporting Mr. Murphy to Mr. Davies? The result was that letter I received from Mr. Murphy saying he was sorry he interfered.
5318. That is the letter dated the 8th September last? Yes.
5319. He has not given up writing to you? No; he cannot help it.
5320. Are you on friendly terms? I have not seen him for the last six months or so.
5321. Does he know you have got these letters? I do not know whether he knows or not.
5322. Does he know you are brought here to-day? I have not seen him to speak to since last year.
5323. Will you undertake not to mention to Mr. Murphy or anyone else outside this room that you produced these letters? I will undertake that.
5324. Or mention that you have kept them? I do not mention anything that takes place in this room when I get outside.
5325. When you wrote letters to the Chairman of the Casual Labour Board, how did you address them? The Hon. John Davies, Chairman of the Casual Labour Board.
5326. They always became the public letters of the Board? Yes. I do not think I have written more than two private letters to Mr. Davies in my life.
5327. Was that the usual practice of addressing letters? Yes; that was the usual practice.
5328. *President.*] Will you look at the letter in the press-copy book, dated 8th September, 1887, addressed to John Davies, C.M.G. That is marked private and confidential? Yes.
5329. Is that press-copy in your hand-writing? It is my hand-writing.
5330. Do you know where the original is? No.
5331. Have you seen it since it went out of your office? No.
5332. Read that letter?

[Private and Confidential.]

My dear Sir,

Mr. Want came out yesterday expressly to see me relative to the roads now being cleared on the Holt-Sutherland Estate, as their being cleared might get Mr. Walker into trouble, although authorised, as they are said to be running through private property.

Kindly see Mr. Walker and ascertain if these roads are to be stopped forthwith, or if I am to proceed with them. Please see petition dated 19th August, 1887, No. 87/833, of 22/9/87. You will see who the petitioners that have signed. The box will be forwarded to you immediately Robinson the caretaker sends it up to me. Mr. Want told him yesterday to send it up to me.

John Davies, Esq., C.M.G., 8/9/87.

Yours obediently,
E. M. BURROWES.

5333. Will you look at this original petition, dated 19th August, 1887—is that the petition you refer to in the letter? Yes.

5334. Is that signed by Mr. G. F. Want? Yes.

5335.

Mr. E. M.
Burrowes.
2 April, 1889.

- Mr. E. M. Burrowes.
2 April, 1889.
5335. Do you know his signature? Yes.
5336. Do you recollect whether Mr. Want knew much about this matter? I do not think he knew much.
5337. How was it he went to see you on that occasion relative to these particular roads? He was out at the park, and spoke to me about it.
5338. You say he came out expressly to see you? I might put that in the letter.
5339. Do you know what took place? He told me it would get Mr. Walker into a mess about these roads. Of course he did it in a private way; if I thought Mr. Walker was likely to get into any row, I would try and prevent it.
5340. Are you satisfied that the Chairman of the Board got that letter? I am satisfied; I remember him speaking to me about it afterwards.
5341. This petition I hold in my hands has the official stamp of the Colonial Secretary on it? Yes. [*Petition put in and marked I 26.*]
5342. Have you any recollection of the occasion you refer to of Mr. Walker getting into trouble or what the roads were that were authorised? I suppose simply that he recommended them.
5343. What is the box you refer to in the concluding paragraph? The box has reference to the balance of the wines sent to Mr. Davies when Sir John Robertson and his party were out there.
5344. Can you say whether Mr. Want knew what was going on on the Holt-Sutherland Estate? Mr. Want has often said to me, "There will be a devil of a row over these roads yet."
5345. I see another letter [*Exhibit I 11*] dated 16th July, 1888, which Murphy wrote to you. In it "I notice you are forming the road to Fred. Want's cottage";—is that a private road? It was the Ewey Road. The reason they say "Want's Road" is because his is the nearest house to it in the neighbourhood.
5346. Had you anything to do with Unwin's Bridge Road? I just started the work, and Mr. David Houison and Mr. M'Pherson did the rest.
5347. In the report of Mr. Houison on that road, dated 19th September, 1887, you will notice that Mr. Houison says that temporary repairs to a certain bridge would be to throw money away and lead to the claiming of compensation against the Government;—can you tell me whether that work has been done? Nothing was done to the bridge, only to the road; it is a decidedly dangerous bridge.
5348. You notice the name of Mr. Carruthers there; do you know him? Yes.
5349. Did he interest himself about the roads? The only road he ever spoke to me about is the Port Hacking Road.
5350. In your report of the 12th November last, made to the Chairman of the Board, you report upon the various roads cleared and formed under your immediate supervision through the Holt-Sutherland Estate; are there other roads there besides those, that the unemployed have done? Oh, yes.
5351. From your own knowledge, are you able to state whether more plant and rations were at any time sent than ordered? Not rations; there were goods.
5352. If, for example, the Commission find a discrepancy between the vouchers and the corresponding butts of the order-book, that would show a larger supply of goods in the voucher than were ordered according to the butt;—what would become of the surplus? It ought to be accounted for.
5353. Did you have any instance of a larger number of goods coming out than ordered? We have had a surplus there, but often the storekeeper would order an allowance for the next day. He ordered the rations daily. He would order less for to-morrow if he found he had over the supplies of to-day.
5354. Do you know whether Springall had a banking account? I cannot tell you.
5355. Is it an elaborate house he has built? It is a nice place.
5356. What would it cost? It would make a hole in £2,000.
5357. Do you know whether he has borrowed money on it? I do not know anything about it.
5358. Can you tell us who can give us information as to the quantity of charcoal and sleepers sold from time to time? The sleepers were sold to the Roads and Bridges Department. The timber and charcoal were sold by Neale, and the invoices were sent by me to the office.
5359. Would you make out the invoice? No; they would be made out by Mr. Elton, the wood clerk.
5360. I read to you a certain portion of the evidence of one of the previous witnesses before this Commission relative to you: that, and several other portions of the evidence, tend to affect your character and professional reputation. Can you give this Commission any references? In the city?
5361. Anywhere? Yes; in Queensland or here if you like. I am pretty well known here. What are the particular lines you would like?
5362. People who know you well. You say you are a native of this place? You could inquire from G. E. Crane, merchant; G. L. Carter, late Member for South Sydney; or Robert Fowler, late Mayor of Sydney; or you could write to the Hon. J. R. Dickson about me.
5363. Have you any testimonials from previous employers? I have my credentials from the Queensland Government.
5364. These testimonials are in reference to your qualifications as a surveyor? Just so.
5365. Did you often feel sore with the members of the Board? Yes, I have; on more occasions than one. It has been a matter of a very serious nature.
5366. Have you not rather a strong feeling against them? No, I have not. I saw Mr. Wells no later than yesterday. He stopped me and shook hands with me.
5367. You heard me read portions of evidence relating to some complaint as to delay in returning pay; also with reference to your professional reputation; and also as to your character for truthfulness? I would much rather leave you to decide whether I am truthful or not.
5368. As to your professional capacity and qualifications? I consider myself professionally qualified, much better than Mr. Wells. Neither Mr. Wells nor Mr. Houison are fit to do their duty.
5369. As to the dispute? It was with reference to an overseer that was reported for being drunk. Men have been discharged when as sober as I am now. I have known Mr. Davies dismiss a man for coming out of an hotel, when he had been in to get a pound changed to pay his men.
5370. You have thrown out some doubt as to the sobriety of Mr. Wells—did you ever see the Chairman the worse for drink? No. That is one thing I will say, he is thoroughly conscientious in that respect—thoroughly.
5371. A witness in another part of his evidence says you could not give proper supervision to road works? I would have you take into consideration that I had thirteen or fourteen different camps to supervise. How could one man do it? For that reason I asked for assistants to be appointed under me.

5372. On the occasion of one complaint, it is stated you were brought into the office and the complaining member of the Board gave you a severe talking to, but that the Chairman recommended you should be kept on? And in a semi-unconscious way he did it. I was written to to come in. Mr. Wells was there, and he got roaring at me. I looked at him, and asked him what he meant, and who he was talking to. Mr. Davies spoke to him and asked him to moderate his tone. I told him I had not come in to be bullied. Anyone would have thought he was talking to a lot of soldiers 10 miles away. Then he apologised, and spoke to me very quietly. It is not once he has apologised to me, but half a dozen times; and it is not nice for a Commissioner to apologise to one of his subordinates.

Mr. E. M.
Burrowes.
2 April, 1889.

5373. A witness was asked in the course of his evidence to detail your duties, and he did as follows. [*Reads the evidence.*] Is that correct? Everything, except the rations.

5374. Then in another part a witness stated that the Board was entirely dependent on you for the correctness of the vouchers? I suppose they would be. I was the only officer—the superintendent.

5375. Have you ever received any gratuity from any member of the Board? Never.

5376. No present at all? No.

5377. Have you ever been spoken to as to the evidence you were going to give before this Commission? By whom.

5378. Anybody? No.

5379. I think you told me that Mr. Davies first found fault with you a little time before the Select Committee? Yes.

5380. Before that everything went on smoothly? Oh! yes, grand.

5381. Grand? Yes; we went along smoothly.

5382. You admit you have a strong feeling against him now? Not particularly strong. I have no particular ill-feeling against him at the present moment. I think it was an unfair thing for him to tell Miles and Mason I was a very bad man.

5383. *Mr. Franklin.*] Will you look at these lithographs—they are lithographs of subdivisions on the Holt-Sutherland Estate. From what is shown on them, can you point out on the general plan where this land is situated. The subdivisions shown on this sale plan are enclosed in parallels formed and bounded by roads;—On the south by Forest Road; on the east by Sylvania Road; on the north by Box Road; and on the west by the Illawarra Line and the National Park. The frontages of these subdivisions are on the roads formed by the Casual Labour Board? Yes.

5384. Most of these roads are very well made? Yes.

5385. The roads that are formed within the subdivisions of the sale plan are formed and drained? Yes.

5386. Are any gravelled? The Main Illawarra Road is gravelled, and also others.

5387. Where they are gravelled are they not exceedingly well done? The Illawarra Road and the Port Hacking Road are the best.

5388. They have been described as "park roads"? They have a very fine appearance indeed.

5389. I suppose some of the roads have been rolled? Yes.

5390. Is it usual to roll roads in a country district? It was simply a little fad of Mr. Davies'. Mr. Murphy sent the roller out.

5391. It is a thing that is not done generally? No, it is not done generally.

5392. With regard to the bridges;—some of them, I am told, are very substantial structures? Yes.

5393. Were they built by contract? They were given out to one or two gangs employed to do the work.

5394. You furnished the design? Yes.

5395. And on their completion you certified to their correctness according to your design? Yes.

5396. *Mr. Waller.*] In your evidence before the Select Committee, in answer to question 2672, you made objection to certain roads, and said you would have deviated from a road with the object of saving expense? That was with reference to the Woronora Road.

5397. Did you call the attention of the professional heads of the Board to your objection? I could never get them out there.

5398. Did you call attention? Yes.

5399. In writing? They took no notice of it.

5400. Do you know a man of the name of Hanley, a publican? Yes.

5401. Did he ever pay you for any wood? Never.

5402. Was any wood sent to him? Two or three trucks were sent.

5403. What did the value come to? 5s. a ton.

5404. How many tons to a truck? Four.

5405. Do you know whether he ever paid for it? Mr. Neale was the party to look after that.

5406. Did you send it direct? It went by the wood clerk at the National Park. He is a Government employé.

5407. Did you ever see Mr. Varney Parkes out at the National Park? Only on two occasions.

5408. Did you ever see him on the Holt-Sutherland Estate? No.

5409. Did you ever see Sir Henry Parkes on the estate? No.

Joseph Henry Springall called in, sworn, and examined:—

5410. *President.*] What are you? A master mariner.

5411. What are you doing now? Building an hotel at Coronulla Beach.

5412. Is it occupied by you? Not at present.

5413. Used as an hotel? It is not open yet.

5414. Have you a license? A conditional license.

5415. On whose property is it? The Holt-Sutherland Estate.

5416. Have you a lease? I have an agreement for a lease—a conditional lease.

5417. Did you have anything to do with the Casual Labour Board? Yes.

5418. What was your office? Clerk and storekeeper.

5419. How long? Two years and eight months.

5420. Were you in that capacity before the appointment of the Board? Yes.

5421. In what district? Two months at Gordon, under Mr. Wise. In September, 1886, I was sent to the National Park, to open up relief works there.

Mr. J. H.
Springall.
2 April, 1889.

Mr. J. H.
Springall.
2 April, 1889.

5422. Before you went to Mr. Wise, were you in the Government employ? No; I was in that of the Colonial Sugar Company.
5423. How long? Six months.
5424. What were you doing there? Chief officer of the "Terranora."
5425. What were your duties under the Board and Mr. Wise? To order and issue the rations of the men and keep all accounts under Mr. Wise.
5426. What under the Board? Similar to what I did under Mr. Wise; there was no change whatever.
5427. Where were you located during the time that the Board was in existence? I was at the National Park and Hurstville.
5428. All the time? Yes.
5429. In a tent? Part of the time in a tent, and the rest in Mr. Hodge's hotel, until office was shifted to Hurstville.
5430. Where were the stores kept? First part in tents, and then in the stable and coach-house at the back.
5431. Was anyone living with you? Mr. M'Pherson, the surveyor.
5432. The whole of the time? Not exactly the whole time. I think I had been there two months when he came out as surveyor.
5433. Was Mr. M'Pherson there the whole of the rest of the time? No.
5434. Had you sole charge of the stores? Yes.
5435. Who gave the orders for stores that were wanted? I did.
5436. On your own responsibility? Yes.
5437. How did you arrive at the amount required? By the number of rations issued the day before, and by the returns from the different camps.
5438. Did you have a store-book? Yes.
5439. Were you out there when the Board took over the office from Mr. Deering? Yes.
5440. Were there any surplus stores there? I always kept from one to two days' supply in hand in the event of men being sent out unknown to me.
5441. The Board was appointed on 2nd May, 1887;—can you tell us whether there was any surplus plant or stores belonging to the Government when the Casual Labour Board took the works over? Only the tools the men were using in the field, and one or two days' rations.
5442. Do you know of any crockery? That came from the Immigration Depôt, and there was some sugar from Carlingford.
5443. Anything else? Some fish and rice.
5444. Do you know the quantity? Nineteen bags of sugar, two cases of tinned herrings, eleven bags of rice, and some crockery.
5445. Were there any bedsteads? No bedsteads; tables and trussels.
5446. Did you take over the stores? They were sent to me from Sydney.
5447. Sugar, crockery, rice, tinned fish—what became of it? I kept it in the store some time. One day Mr. Davies told me I could issue the fish and rice amongst the men. The sugar and the crockery I was ordered to send to Sydney.
5448. Did you send it? It went first to Hurstville, and was sent from Hurstville to Sydney.
5449. Back to the grocer's? No; addressed to Mr. Davies, at the Board Office.
5450. What else? Nineteen bags of sugar and two cases of crockery went back to Mr. Davies.
5451. What office? The Casual Labour Board, Goulburn-street.
5452. Have you seen them since? No.
5453. Never returned to you? Never.
5454. *Mr. Franklin.*] What was the weight of them? 70 lb. each.
5455. *President.*] Who was Johnson? Assistant storeman; he lived at the back of the hotel; he served the rations out.
5456. Had he access to the stores? Oh, yes, all day.
5457. Where is he now? On the Illawarra Road, in the camp at present.
5458. What is he? Storeman, I think.
5459. Whose duty was it to fill up the pay-sheets? The particulars were given me by Mr. Burrowes; I used to correct them and make up the pay-sheets from his drafts.
5460. What became of them then? They were sent to the office.
5461. Did you refer them back to Burrowes? They were drawn out, given to Mr. Burrowes, who read them through and signed them, then rolled them up and sent them to Sydney.
5462. Did you ever send them direct? No.
5463. Was he not away? Not on pay-nights. He was there the day the vouchers were made up. He might be away two or three days previously inspecting the work and valuing it.
- 5463½. Who was judge as to the amount of goods wanted? No one but myself. I had a scale of rations to issue.
5464. Did you depend upon the reports that came in as to the number of men? I depended on them, and also on the pay-sheet, showing the number of men being paid. I used to get papers down from the officers every day. From that order, unless they stopped anything, I sent the rations up next day.
5465. Who took delivery? The storekeepers at the different camps.
5466. Who took delivery of what came from Kidman? I took delivery at the National Park.
5467. Were you responsible? I was responsible for the whole of the camps.
5468. Were you on the pay-sheet yourself? Yes.
5469. What rations did you draw? I drew my own rations.
5470. Only for yourself? There was Mr. Burrowes and the whole of the staff.
5471. Used you to draw for the whole of the staff? The cook used to draw for them.
5472. How many? Sometimes seven, sometimes eight. There was no stated number. We used more rations one day than others.
5473. Is this one of the store-books? That is one.
5474. Is that your handwriting? Yes.
5475. Did you keep any other books? A book half the size of that, showing the daily issue.

WEDNESDAY,

WEDNESDAY, 3 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

Joseph Henry Springall called in and examination continued:—

5476. *President.*] You spoke of another book besides the store-book? It showed the number of rations received and issued.

5477. Who kept it? I did.

5478. What became of it? It was sent to the office with the other books.

5479. Will you tell us how you made up the pay-sheets that were sent into the Board? They were made up from draft sheets supplied to me by Mr. Burrowes after he had been round the ground measuring the work and putting the values upon it.

5480. Was Mr. Burrowes the only one who supplied you? Mr. Burrowes and Mr. M'Pherson. I got from him all the work connected with the Waterfalls, Liverpool, Campbelltown, Cook Park, Heathcote, and the Holt-Sutherland Estate and other camps.

5481. Did any one else send you particulars? No.

5482. Where did you get the information as to the number of men who had to be provided with rations? From the men who came every day. A man would be asked the question as to the number of men in the gang. According to the number of men in the gang he drew rations, and that was marked in the daily issue-book.

5483. Were these the unemployed men that came to you? Yes.

5484. Came to you direct? One man was appointed from the gang. They were supposed to have eight men in each gang; sometimes there were seven; sometimes as low as four. When they got to four we broke them up and put the men into a gang of eight. When a man came and said he wanted rations for eight, he got eight rations. They were given to understand they would have to pay for all the rations they drew. What they drew was marked on the book to their account.

5485. Had you any means when a man came to you and represented that he was a ganger of knowing whether he was correct in his statement? If I had any doubt I would send for the overseer, and ask him how many men he had, and how many rations he wanted to draw.

5486. Who were the overseers? Walsh was the name of one. Bell was another.

5487. Who was Bell? He had charge of the Agricultural Department.

5488. Where is he now? At the Meadows, I believe.

5489. When did you see him last? Some two months ago.

5490. Is this the book you spoke of? Yes.

5491. Who kept it? I kept it. There should be another one showing the months previous to that.

5492. This is a full record? A full record of the number of rations received and issued.

5493. Did anybody ever go through that with you? The books were always there. Mr. Hinchcliffe, Mr. Burrowes, and Mr. Gordon have looked at the books.

5494. Where did you get the information from you put down here, under the heads meat, potatoes, bread, butter, and so on? That is the scale allowed.

5495. Did you enter them in this book? Yes, as I delivered them.

5496. What, in that very neat way? Yes.

5497. As the rations were issued you entered them then and there? Yes; I posted my books up every night. That is the only book I kept.

5498. Look at these five pay-sheets? Yes. They are pay-sheets for Heathcote and Sutherland-Loftus Road.

5499. They are dated 18th November to 1st December, 1888; 26th August to 8th September, 1888; 29th July to 11th August, 1888; 9th September to 22nd November, 1888; and 17th June to 30th June, 1888;—are they not? Yes.

5500. In whose handwriting are they? Principally in my handwriting. There are some written by another man.

5501. Show me one written by another man? Heathcote, from 26th August to 8th September. That is written by another man. It is Wm. Davey's writing.

5502. The whole of it? Two sheets of it; the rest of the sheets is mine.

5503. Did you see all the men mentioned here paid? Yes.

5504. And the signatures on the different sheets, J. H. Springall, and the initials on one, J.H.S., are your signatures and initials witnessing payment? Yes; they are initialled that way. That is my handwriting.

5505. I suppose we may take it they were all paid? Yes; I actually saw them paid.

5506. If a man named Brown came up and said his name was Brown, and that he represented six others, did you pay him? The overseer was standing at the door, and if I had any doubt I referred to him and said, "Is this the man mentioned in the pay-sheet?"

5507. Who would be the overseer for Heathcote? Mr. Bell.

5508. Was Mr. Bell present on every pay-day? Yes.

5509. Did you ever ask him any question? I knew pretty well all his men.

5510. Where did you get the information from from which you prepared these sheets? The work was given by the overseers to Mr. Burrowes. He supplied me with the information, and I made out the sheets from the information supplied.

5511. You know these papers better than I do. I show you what purport to be some draft abstracts between 26th August and 8th September, 1888. Will you look at them and lay your hands on the particulars from which you prepared that pay-sheet? Here is one. This is a draft sheet.

5512. In whose writing is that? It is my writing.

5513. Then you prepared this original pay-sheet from a draft in your own handwriting? This is a draft I made before making out the draft sheet. The work was given to me on a slip of paper by Mr. Burrowes. Then I prepared this draft sheet. After I prepared one sheet I gave it to the clerk, Wm. Davey, and he then would write the vouchers. After I had finished the whole of the draft sheets I would commence writing the vouchers myself.

5514. In whose writing is this? It is the clerk's.

5515.

Mr. J. H.
Springall.

3 April, 1889.

- Mr. J. H. Springall.
3 April, 1889.
5515. Is this the only document you prepared it from? Yes.
5516. It should be a copy of it? Yes.
5517. Is it? Yes.
5518. Do you notice this draft ends with Yates' name? Yes.
5519. Does this pay-sheet end with Yates' name? No—Flemming's.
5520. Read it? "James Flemming, seven men, quarrying and breaking, 186 cubic yards, 2s. 3d., £20 18s. 6d.; £5 6s. 2d. deducted, rations; cash paid, £15 12s. 4d."
5521. From where did you get that information? From a slip of paper supplied to me by Burrowes.
5522. You swear that? Yes.
5523. Have you the papers? They are in the office, I expect. This man Flemming was a man employed by Burrowes to look after his horse.
5524. Did he have seven men to look after him? The other men were in different parts of the field. They were all merged into the one gang. Flemming drew their money and paid them.
5525. Was Flemming looking after a horse at Hurstville? Yes.
5526. Where were the other seven men? Employed at different places about the park and Heathcote.
5527. What is this 186 cubic yards? It is road-metal.
5528. Is there any road-metal required in looking after a horse? No.
5529. Is that correct information on that pay-sheet? It is not correct.
5530. Is it false? It is as I was told to put it down.
5531. By whom? Mr. Burrowes.
5532. Do you swear that? Yes.
5533. Did you see this man Flemming come up and get that amount? I saw him come up and receive the money at Heathcote.
5534. Do you know Flemming? Yes.
5535. Did you know him then? Yes, I knew him.
5536. He was at Hurstville looking after the horse? He was a general rouse-about—a man to assist in the camp and do anything that he was required.
5537. Who was responsible for the accuracy of these pay-sheets? I suppose I was; I made them out.
5538. And knowing what you knew of Flemming's occupation you put him down with seven men for breaking 186 cubic yards of stone? Yes; I put it down according to instructions.
5539. Did you know it to be true? No.
5540. Did you know it to be false? I knew it was incorrect.
5541. You were in a responsible position there? Yes.
5542. You knew the members of the Board looked to you, and that you were to see that the duties of your office were properly carried out? Yes; I think they did.
5543. Yet you found it consistent with your duty to put what was a lie upon paper? [No answer.]
5544. Aye? Well, it is certainly not a true statement of the work done.
5545. Do you swear that Flemming received that amount, £15 12s. 4d.? Yes.
5546. Where is Flemming now? At Coronulla Beach. He left at the new year.
5547. Do you swear that Flemming had a gang of seven men under him? The money was paid to him to pay the men working in different parts of the park.
5548. Now, sir, on your solemn oath, was Flemming a ganger at all? No, he was not a ganger.
5549. When did you find that out? When he was shifted to Hurstville.
5550. Before or after you made the payment? After I made the payment.
5551. What is the date of that pay-sheet on which his name as a ganger appears? 26th August to 8th September, 1888, Heathcote relief work.
5552. Look at the same sheet, on which Flemming as a ganger with seven men appears. It appears F. Seymour, as a ganger with ten men, was paid £14 6s. 5d.;—do you know Seymour? Not personally.
5553. Do you know whether he was a ganger? Yes, a ganger under Bell.
5554. How many men? Eleven altogether.
5555. Are you quite sure? From information given me by Bell he had eleven men.
5556. What is this on that sheet? C. Sandon, one cart, twelve days.
5557. Who is Sandon? A carter employed on the works drawing rations, and also doing carting work there.
5558. Where is he now? On the work, I expect.
5559. Is that the Sandon that used to drive the Paymaster about? Only one trip that I know of.
5560. Is that the same man? One time he drove him to Waterfall, when Lobb was drunk and grossly abused Mr. Davies.
5561. "One cart";—is that Sandon's cart? Yes.
5562. Was he amongst the unemployed? Yes.
5563. Where did he get the cart from? Bought it, I suppose; I do not know.
5564. I want to come back to this item, "Flemming and seven men";—tell me again where you got that information from? Mr. Burrowes.
5565. How would he give it to you? In writing, on a slip of paper.
5566. What sort of paper? A small scrap of foolscap.
5567. You found out afterwards that he was not a ganger? Yes.
5568. How long afterwards? After I found out, and when I spoke about the matter. I put it down that his breaking road-metal, 186 yards, was because Mr. Burrowes did not want it to appear that he was to look after his horse.
5569. Was Mr. Burrowes present on the pay-days? No; I could never get him to come in. He always had some excuse. He was going to some different part of the field.
5570. When did he tell you to put Flemming down as stone-breaking? It must be at the time the pay-sheet was made out.
5571. Then your statement is that it was put there, and in that way, because Mr. Burrowes told you? Yes. [Pay-sheet from 26th August to 8th September, 1888, put in and marked J.]
5572. Look at this pay-sheet—"Heathcote Agricultural, 18th November to 1st December, 1888"? Yes.
5573. Is that your handwriting? Yes.
5574. Did you witness the receipt of these payments? I did.

5575.

Mr. J. H.
Springall.
3 April, 1889.

5575. Did you see the money paid to Flemming? Yes; I was there.
5576. What is the amount of work done and the money paid? 240 cubic yards at 2s., £24 earned; £4 11s. deducted for rations; £19 9s. received.
5577. Was that a payment to Flemming alone? Yes.
5578. For his own work? No; for men employed with him.
5579. Does that pay-sheet show that? No, it does not.
5580. Is that a true or a false pay-sheet? It is a true one. I do not know anything about it being false.
5581. Did you see Flemming sign that? Yes.
5582. You notice that is in November, 1888—that is, two months after the last one I showed you? Yes.
5583. What was Flemming then? He was looking after Mr. Burrowes' horse.
5584. Was he stone-breaking? No.
5585. Have you got there stone-breaking 240 cubic yards? Yes. There is the same explanation of this as for the other.
5586. Is that pay-sheet true or false? From information supplied to me, it is correct.
5587. Then that is correct—240 cubic yards stone-breaking, Flemming? As far as I know.
5588. And yet he was looking after Mr. Burrowes' horse? Yes.
5589. Come, Mr. Springall, you do not mean to tell me that this is a true statement on this pay-sheet? No, it is not true; he was not stone-breaking.
5590. Then it is false? It must be in that case, because he was looking after Mr. Burrowes' horse.
5591. In whose handwriting is this document I now put before you? My own.
5592. Is it the draft abstract of the payments from which you prepared this pay-sheet? Yes.
5593. Look at that draft, and tell me where the name of Flemming occurs in it? It does not occur.
5594. Then where did you get the information you put in the pay-sheet which was sent into your senior officer? I cannot say whether I got it from Mr. Burrowes or Mr. Bell.
5595. Was it not entirely the result of your own manipulation? No, it was not.
5596. Am I and are these gentlemen here to take it as your evidence that that item of Flemming, and that payment £19 9s. in this pay-sheet, and the other items I have just put before you, were put in on the suggestion of somebody else, and were not pure imagination on your part? It is not a concoction. I got the information from Mr. Bell or from Mr. Burrowes. I did not put it in on my own account.
5597. If Mr. Burrowes swears he knows nothing about it, and if Mr. Bell gives similar evidence before this Commission, what do you say then? I should say that Mr. Burrowes is telling a falsehood.
5598. What of Mr. Bell? I do not know of Mr. Bell, because I got in writing only the amount of work done, but it came through Mr. Burrowes afterwards. [*Pay-sheet, 18th November to 1st December, 1888, put in and marked J 1.*]
5599. Will you look at this pay-sheet—Heathcote agricultural, 29th July to 11th August, 1888;—is that your handwriting? Yes.
5600. Was the payment witnessed by you? Yes.
5601. Read the entry? "J. Flemming, 180 yards, at 2s. 3d., £20 5s. earned; £4 6s. 8d. rations; £15 18s. 4d. cash paid."
5602. Look at this paper I put before you—what is it? It is the draft-sheet from which I prepared the pay-sheet.
5603. In whose handwriting? Mine.
5604. What is the last name on the draft-sheet? F. Seymour and ten men.
5605. What is the name immediately preceding Flemming on the original pay-sheet? "F. Seymour."
5606. Then the name of Flemming has been added to the original pay-sheet after the draft? Yes.
5607. By you? Yes.
5608. In your handwriting? Yes.
5609. Does that name of Flemming there represent Flemming himself or a gang? Flemming and a gang.
5610. What was he doing then? Looking after Mr. Burrowes' horse.
5611. Is the statement on this pay-sheet false? Yes, false.
5612. False to your knowledge? Yes, false.
5613. To your knowledge when you put it there? No.
5614. When did you find it was false to your knowledge? I made inquiries about the matter afterwards, and I was told to put it in there with the other men. Mr. Burrowes told me.
5615. If Mr. Burrowes tells a different story, is he telling a falsehood? He told me to put him down in charge of the men rousing about.
5616. How often was Mr. Burrowes down there when the pay-sheets were being made out? He was always there.
5617. If he says he was not? He is telling an untruth. [*Pay-sheet, 29th July to 11th August, put in and marked J 2.*]
5618. Look at this pay-sheet—Sutherland, Loftus Road, 17th June to 30th June, 1888? Yes.
5619. Is that your handwriting? Yes.
5620. Does the name of Flemming appear here? J. Flemming and five men.
5621. Who received that payment? Flemming received the payment. There is his signature.
5622. Can you make Flemming out of that? That is the way he wrote it.
5623. Look at the signature on the other pay-sheets where Flemming signed, and tell me whether you think there is any resemblance to this;—now, sir, who signed that name? Flemming—I swear it.
5624. Is that sheet all in your handwriting? Yes.
5625. There is a note—"Paid by Thomas Hinchcliffe"? That shows he was present. These initials showed I witnessed it. I wrote this and witnessed the men mark it.
5626. Who witnessed the payment to the others? I did.
5627. Look on this paper I put before you and tell me what it is? The draft sheets from which the pay-sheets were made out.
5628. Is the name of Flemming on that? No; I do not see it there.
5629. Where is the name James White on the draft? Here it is.
5630. You do not find the name of Flemming there? No.
5631. Do you find the names of the others? Yes.
5632. Read what there is here on the original pay-sheet? "James Flemming and five men, 72 days, 3s. 6d. a day, £12 12s.; two men, 24 days, 5s. a day, £6—total, £18 12s.; £4 6s. 8d., rations; £14 5s. 4d. paid." 5633.

- Mr. J. H. Springall.
3 April, 1889.
5633. Is that pay-sheet true or false? It is correct as far as I know.
 5634. What was Flemming then? Working at Sutherland.
 5635. Was he a ganger? Yes, at that time.
 5636. Had he seven men under him? Yes.
 5637. Will you swear that? Yes, I will.
 5638. Look at this pay-sheet—Heathcote Agricultural, 9th September to 22nd September, 1888? Yes.
 5639. In whose handwriting is it? Mine.
 5640. Whom were the payments made by? Mr. Hibble.
 5641. Is there an entry of the name of Flemming there? Yes.
 5642. The last name on the sheet? Yes.
 5643. Read it? "James Flemming, ballasting, quarrying, and breaking, 186 yards at 2s. 3d. per yard, £20 18s. 6d.; £5 4s., rations; £15 14s. 6d., cash paid."
 5644. Look at this paper. Is it the draft sheet? Yes.
 5645. Does the name of Flemming appear on the draft sheet? No.
 5646. Where did you get the information from? From Mr. Bell.
 5647. In whose handwriting is that? Mine.
 5648. If Mr. Bell tells us he knows nothing about Flemming, where can you have got your information from to put Flemming on this pay-sheet? [*No answer.*]
 5649. You should not hesitate. If you give him there as a quarryman there should be no hesitation? I am considering where the man was working. I either got the information from Mr. Burrowes or Mr. Bell.
 5650. If this is not true, where then was he working? At the time he was working at the National Park, at Heathcote.
 5651. What is that entry on the pay-sheet you signed—what does it represent? Ballasting, quarrying, and breaking, 186 yards, at 2s. 3d.
 5652. Was that for Flemming? No, for a gang.
 5653. He is represented on the pay-sheet as a ganger? Over eight men.
 5654. Does it show that? No.
 5654½. What was Flemming then? That is what I am trying to recollect, whether he was working down there or at Hurstville.
 5655. Is there any other case on that pay-sheet, or on any other pay-sheet, where a man's name appears without appearing on the draft abstract? I was not aware that he did not appear on the abstract.
 5656. When did you become aware of it? Only just now.
 5657. Did you not hear about this before? Yes; I have heard two or three rumours about it.
 5658. I would like to know whether this is the first intimation you have had that his name does not appear on your abstract? This is the first information.
 5659. What explanation can you give of it? I cannot give any more than I have already given.
 5660. Is this pay-sheet correct or incorrect? To the best of my knowledge and belief it is correct.
 5661. Although you have got in it a charge for Flemming for 186 cubic yards of stone-breaking? Yes. [*Pay-sheet 9th September to 22nd September, 1888, put in and marked J 4.*]
 5662. Look at this pay-sheet—Heathcote Agricultural, 21st October to 3rd November? Yes.
 5663. In whose handwriting is that? In mine.
 5664. All of it? Yes, excepting the signatures.
 5665. Who witnessed the payment? It was paid by Mr. Larnach.
 5666. Does the name of Flemming appear on that? Ballasting and breaking, 240 cubic yards, 2s., £24; £5 4s. rations; £18 16s. cash paid.
 5667. What does that show you? 240 cubic yards by him or his gang.
 5668. It shows there was a gang of how many men under him? Six or seven men.
 5669. Was he a ganger at that time? No, he was not.
 5670. What was he? He was at Hurstville attending to a horse.
 5671. Did you know this at the time this was paid? Yes, I knew it at the time.
 5672. Is this pay-sheet true or false? It is false according to that item.
 5673. You knew it to be false at the time? Yes, I did.
 5674. You were in a very responsible position there, and you deliberately passed into your senior officers a document that was false, which led to the Government being deprived of at least £18 in this particular case? I knew he was constantly working. I knew he was at Hurstville.
 5675. You have now an opportunity of making any explanation? I can say no more than I have already said. [*Pay-sheet 21st October to 3rd November put in and marked J 3.*]
 5676. I do not wish to take up the time of the Commission by producing to you several more of these pay-sheets, but I state that there are many more of these cases in which the man Flemming appears as a ganger for Heathcote Agricultural, and his name does not occur at all on the draft abstract;—what do you say to that. Does the occurrence of his name on every original pay-sheet appear to you to be correct or incorrect? The same explanation applies to one as to all. He was employed at Hurstville as a general rouse-about and to look after a horse.
 5677. Then the whole of the Heathcote sheets with the name of Flemming appearing as a ganger, receiving money for himself and seven or eight men, as the case may be, and which are in your handwriting, are false? Yes, as far as Flemming is concerned, for being a ganger and the work he has done.
 5678. You knew that when you made them out? I spoke about the matter, and that is the explanation I got.
 5679. As to some of them you knew them to be false when you made them out? Some of them.
 5680. Then you lent yourself to a swindle? I did not mean to.
 5681. If you put on the pay-sheets for which you were responsible the name of a person as a ganger who did not exist as a ganger, and put there a sum of money he was not entitled to receive—if you put that down knowing it to be false, did you not lend yourself to a swindle? I cannot say I lent myself to a swindle. I lent myself to a false statement. 5682.

NOTES (on revision):—Q. 5654.—*Add*, "a column of figures upon the right-hand side of voucher, under the heading of 'Men in gang,' shows the number." Q. 5675.—*Add*, "The Government have not been deprived of any money through me, for I knew that Flemming and the other men were working in different parts of the works. Flemming was at Hurstville, attending to Mr. Burrowes, and drew the money to pay these men. The statement is altogether wrong about the quantity of stone-breaking, but is an equivalent to day-work at 3s. 6d. per day. Day-work was not shown, as the members of the Board objected to men being employed by the day." Q. 5680.—*Add*, "I did not look upon it as a swindle."

Mr. J. H.
Springall.
April, 1889.

5682. If it is not a swindle, what is it, I suppose you know the English language well enough to know what is the meaning of a fraud and what is not, if the man had not done the work at all and you knew it, it would be a fraud; but this was payment for services rendered? The man was working on the ground.
5683. I leave this part of the question, because I have your evidence that every one of the pay-sheets on which Flemming's name appears as a ganger, or was being paid for ganger's work, is false;—is it not so? Yes.
5684. You are not bound to answer this question: Who received the money? Flemming did himself.
5685. You are not bound to answer this question: Did Flemming pay you any part of the money—any part of the money received? Yes, his own wages. I have been taking care of his money this last twelve months—since his wife died.
5686. You are not bound to answer this question: Did Flemming pay you back all the money he received whilst the Heathcote pay-sheets were going on? No, he did not.
5687. You are not bound to answer this question: How much did he pay you back? Sometimes 25s., sometimes £2. He asked me to take care of the money for him.
5688. You are not bound to answer this question: How much money altogether have you got back from Flemming? Between £20 and £22.
5689. Nothing more than that? Nothing more than that.
5690. Who dealt out the rations to Flemming? He drew his rations at Hurstville, and when at the National Park from the store.
5691. Would Flemming receive rations as a ganger in accordance with what appears on the pay-sheet? He would not; he only received his own rations whilst at Hurstville, and the other men drew their own rations from the store they were issued from.
5692. On several of these pay-sheets I have put before you lately he represents himself and seven men, a party of eight;—would he receive rations for one or for eight? For himself; and the men working in park would receive theirs separately.
5693. I ask the question: He represented himself falsely as being a ganger? He did not represent himself at all.
5694. You represented him? I have.
5695. Falsely, as being a ganger on the pay-sheets;—was that falsehood continued in dealing out rations to him? No; the rations were taken by these odd men.
5696. What do you mean? By the men working on the roads breaking stones.
5697. Who said they were working at all? I cannot swear they were working; I did not see them.
5698. Is not this pure fiction from the start to the finish? It is a lie as far as his name is concerned.
5699. As far as the men said to be under his charge are concerned? No; I do not think it is.
5700. Will you give us the names of the persons working with him; refer to any document on which you can find the names? I have no papers now. In January I packed the papers up and sent them to the office.
5701. If Mr. Bell swears there were no men at all working with Flemming, and Flemming was not working, is he likely to state the truth? I do not think Mr. Bell would tell a lie from what I know of the man.
5702. Look at this book showing the daily issue of rations;—in whose handwriting is it? Mine.
5703. Look at page 232;—do you see the name of Flemming there? Yes; between the 10th September and the 22nd September.
5704. What year? 1888, I think it is.
5705. Does the name of Flemming appear on that page? Yes; No. 37.
5706. How many rations did he receive? Seven.
5707. Is that true or false? It is true.
5708. Did Flemming represent seven men on that day? He must have done, or else he would not be down there.
5709. Look at the pay-sheet,—Heathcote Agricultural, 9th September to 22nd September, 1888;—that covers the same dates as the ration-book? Yes.
5710. Is Flemming's name down there? Yes.
5711. In your handwriting? Yes.
5712. Is that a true or false pay-sheet? [No answer.]
5713. What is this other paper? The draft pay-sheet.
5714. Is his name on that? No.
5715. What is the entry on the pay-sheet 9th September to 22nd September? "J. Flemming, ballasting, quarrying, and breaking 186 yards, 2s. 3d., £20 8s. 6d.; £5 4s., rations; cash paid, £15 4s. 6d."
5716. Where was Flemming then? At Hurstville, attending to the horse.
5717. Is that statement on the pay-sheet true or false? False as regards stone-breaking.
5718. Is the statement in the book true or false? It is true for the number of rations drawn.
5719. Then the Heathcote pay-sheet I have just shown you as to the ganger is false; but the statement in the ration-book is true? These are the men who are under Flemming for working, and Flemming drew his rations at Hurstville.
- 5719½. If you find in the ration-book the name of Flemming representing seven men, during the same time, is this pay-sheet true or false? It will be true, because rations were drawn by the men and charged to them. He drew the money to pay them.
5720. Then it is only the pay-sheets that are false, and the ration-book is true? Yes; the ration-book will be correct as to the number of rations drawn.
5721. Were the duties you took over from the old administration the same duties as you had under the Casual Labour Board? Yes, just the same.
5722. Did you receive any special instructions from the Board when it was created, or from any member of it? At that time I was keeping a store, and I had to give the store up.
5723. Do you know anything about a bedstead out there that belonged to the store that you told Mr. Larnach about? I know nothing about it.
5724. How often did the members of the Board or any member go out to your place? Every fortnight. Sometimes Mr. Wells was there; sometimes Mr. Houison.
5725. Was Mr. Davies there? Every pay-day.

5726.

NOTE (on revision):—Q. 5694.—Add, "I put his name down so that he should draw the money instead of the whole gang appearing at the pay-table." Q. 5698.—Add, "In being reported as ganger of a party of stonebreakers."

- Mr. J. H. Springall.
3 April, 1889.
5726. Do you know him? Yes.
5727. Well? Only since he has been connected with the Board.
5728. Are you on good terms with him? Yes.
5729. Has he ever been angry with you? No.
5730. Ever reported you? Never.
5731. Was your attention ever called to the state of the ration account being unusually high? Never.
5732. Were you ever called on to reduce it? Never.
5733. When the Board came into existence, can you tell us who took over the plant and tools and such like out there? No one came down to take them over at all.
5734. Do you know whether any list was kept? I kept a daily store-book.
5735. What became of that? I left it in the office at Hurstville, for Larnach's information.
5736. When you received tools, do you know what became of them? The tools to the men would be issued and returned.
5737. When goods were wanted from Sydney, who ordered them? I sent in a requisition to Mr. Davies.
5738. Direct? Yes.
5739. How did you arrive at the amount you required? By an order from Mr. Burrowes to order so many tools.
5740. And the rations? By the number I had issued the previous day.
5741. How did you arrive at it? From the number I issued in the store. I sent it direct to Mr. Kidman.
5742. Did you communicate direct with any other tradesman? No.
5743. With M'Lean Bros. and Rigg? No.
5744. Did you get anything from them? Yes; I am getting things now, on my own account—not for the Board.
5745. When stores were sent out to you, who took delivery? I did.
5746. Where? On the ground when they came from the railway station.
5747. Who was at the railway station? Only the railway officials, who would notify me that goods were there for the Relief Works. The greater part I sent for.
5748. What was the name of the person you sent? Sometimes one carter, sometimes another.
5749. Then of the stores, plant, and powder, you took delivery? Yes.
5750. Were they ever more than you ordered? A great deal more than I ordered; I have ordered five kegs of powder and received ten kegs.
5751. Anything else? I have ordered a dozen mattocks, and I would get a case sent out. The same with handles.
5752. Did it often occur? I think nearly always.
5753. Did you tell Mr. Davies they were sent out? Not until after I had received them. Then I sent to the office saying I had received them.
5754. What notice was taken of the amount being larger than you ordered? None that I am aware of.
5755. Did you give any receipts for these goods? I would advise them in Sydney that I had received them.
5756. To no one else? No.
5757. How did Kidman deliver rations? He sent them down by train.
5758. According to your order? Yes.
5759. No one intervened between your order and Mr. Kidman? No.
5760. If you ordered goods for 4,000 men more than were there? I did not do that.
5761. If you liked to be dishonest? If I had liked to have been dishonest I could have been, but I never did that.
5762. Were you ever called on to account for the large amount of rations? No; I was always told by Mr. Davies to keep an abundant supply on the ground, and not let the men complain. The first time there was great complaint from the men that they did not get sufficient meat, and it was altered.
5763. Who was your storekeeper? Johnson.
5764. Did he have anything to do with ordering goods? Never.
5765. Can you tell me whether he did? I am not aware that he ordered any; if he did, he did it without authority.
5766. Are you on good terms with him? Yes.
5767. Have you seen him lately? Only once since I left the works.
5768. Was he aware that this Flemming swindle was going on? No.
5769. Had you anyone else out there besides Mr. Johnson? At one time we had three men assisting him—Davey, Hunt, and Jacob.
5770. Did you make up these vouchers as a rule? Yes.
5771. Did you keep the time? Not when there was a large body of men on the field. There was a time-keeper named Christy. He kept the time. He used to go round and visit the gangs every day, but the men being on piece-work there was no time to keep.
5772. What did you do with the pay-sheets after the money was paid? I did not see them. Mr. Hinchliffe took possession of them.
5773. Are you and Mr. Burrowes on good terms? Yes.
5774. You have made a serious charge against him? I have.
5775. It rests between him and you? I am only speaking the truth.
5776. Did he ever find fault with you? No; he never interfered with me in any way.
5777. Did Mr. Davies complain about you? One time—three months ago—the vouchers were written badly and blurred. They were sent back to be re-written.
5778. Did you go to the head office many times? No; I was sometimes months without seeing it. I was only there four times since the Board was in existence.
5779. The only place you sent orders direct to was Kidman's? Yes, the only place.
5780. Do you know anything about any goods or timber being sent away from the camp belonging to the Casual Labour Board? That was wooden posts and rails.
5781. Do you recollect some time ago removing a lot of papers from Hurstville? Yes, in January.
5782. By whose orders? Mr. Davies'.
5783. Where did you take them to? The office in Goulburn-street.
5784. Where was Mr. Burrowes? In the office at the time I packed them up.

Mr. J. H.
Springall.
3 April, 1889.

5785. Are you sure? Yes.
5786. Did he complain? He never offered any remark. I told him what I was going to do, and who had given me instructions to do it.
5787. Did Mr. Burrowes complain about your removing any papers? Never.
5788. Do you know a man of the name of Hanley at Waterfall? Yes.
5789. Do you know anything about a dealing of wood with him? No.
5790. You said you were originally in the employ of the Colonial Sugar Company;—what did you leave for? Because the vessel was laid up. I was an officer.
5791. What wages did you get? Ten pounds a month.
5792. When did you go to the Government? I was walking about for some little time.
5793. You were really unemployed? Yes.
5794. Then you say Mr. Wise sent for you? I knew a Mr. Drew at a time there was a vacancy at Rookwood. Mr. Drew sent me to Mr. Oxley. He gave me a letter to Mr. Wise. I delivered the letter, and Mr. Wise sent for me to go to Gordon.
5795. You were amongst the unemployed at the time? I did not solicit employment. It was offered me. I had nothing else in view.
5796. Are you a married man? Yes.
5797. Had you no employment? Not at the time.
5798. Were you hard up? No.
5799. What were you living on? On money I had saved whilst in employment. I had £100 by me.
5800. Did you spend it? I had £100 by me when I went to the employment of Mr. Wise.
5801. You had £100 saved. Yes.
5802. How much did you get with Mr. Wise? Six shillings a day. My duties were as an assistant at Gordon.
5803. And under the Board? Ten shillings a day.
5804. Have you any family? Yes.
5805. How many? Six children.
5806. I think you told us you were the owner of an hotel? I am building one.
5807. How much will it cost you? It will cost £1,500. I have borrowed £650 from Mr. Alt.
5808. Have you paid any cash? I have been paying cash as my bills have become due.
5809. How much have you paid? Altogether £1,200.
5810. In cash? Yes.
5811. Then you had £100 when you began, and you have paid away £1,200; that is £1,300? Oh, no, not at all. That £100 is in the £1,200 paid away. I had £100 when Mr. Wise employed me; I was in the service two years and eight months; during that time I put by £280. My son was employed there, and I got £21 off him, money he had; he was messenger; and I borrowed £650 from Alt & Co.
5812. You had got £1,200? Yes, about that.
5813. That includes £100 you saved? Yes.
5814. Where have you earned £1,100? I have not earned it.
5815. I asked you how much you had paid away, and you said £1,200? That is in payments.
5816. Now, in order to pay it away you must have had it. You say you had £100 before you started with the Labour Board; you saved £280 out of the Government; as to the balance, where did that come from? £650 I borrowed from Alt & Co.; £60 another person has lent me, for which he has my acknowledgment; and there was £21 from my son, money he had put by.
5817. Anything from Flemming? I have Flemming's money, between £20 and £21.
5818. Are you correct about that amount? Yes.
5819. Do you keep any books? No.
5820. Do you keep a banking account? The Government Savings Bank and at Barrack-street.
5821. How much have you there now? Nothing; I have drawn it out.
5822. Any other bank? The Bank of New South Wales. I am owing them £25.
5823. Have you an overdrawn account there? Yes.
5824. How long has it been in existence? One week. I had no money to pay wages with. I asked Mr. Thompson to advance me £50 until I could borrow it from Mr. Alt. I have paid £25 of that back again.
5825. For how many months has that account been at that bank? Two months.
5826. Did you ever hear of any goods being sent to Mr. Davies? Never.
5827. Did you tell Mr. Larnach about a bedstead being sent? I don't remember speaking to him about it. I do not know anything about it.
5828. Mr. Larnach says you had orders from Mr. Davies to send a bedstead to him? That was a wire mattress sent to the office in Goulburn-street. We had three wire mattresses sent out. Mr. Davies said as he had to stop sometimes in the office he would like to have it there to sleep upon.
5829. *Mr. Franklin.*] In your position you were stationary nearly all the time at one place? Yes.
5830. The circle which the men were engaged in was small, extending on the one side or the other for 4 or 5 miles? About 6 miles. From National Park to Campbelltown—Waterfall and Port Hacking Road.
5831. Being there you were personally acquainted with most of the men about the place? Yes.
5832. You would know about a man being employed as "rouse-about" like Flemming? I know him well. I have him in my employ. He is an old feeble man. He was given the work he was doing because it was light employment. When I was going to leave I said to him, "I am going to keep an hotel, and you can come out if you like and have charge of the stables." He agreed to do so.
5833. Being feeble he was put to look after Mr. Burrowes' horse at Hurstville? Yes.
5834. How far is Hurstville from where you were? Six or seven miles.
5835. His duty would be that of caretaker? Keeping the office clean and anything he was told to do.
5836. What business would he have at your place, the National Park? None whatever. He was sent to the National Park at the same time that we shifted the office.
5837. Was it part of his duty to drive Burrowes over? I did not know that he did drive Burrowes over.
5838. Where were the wages paid? Generally in one of the tents in the park. When Flemming was paid he was paid in a tent on the Illawarra Road,—the store tent. The payments at Heathcote were made at the station.
5839. What were the payments for? He went down to get the money for these men.

Mr. J. H.
Springall.
3 April, 1889.

5840. Do you say there were men? I believe there were men. I do not know from my own personal knowledge.
5841. Did you put a charge on the pay-sheet for men you knew nothing about;—you have been asked to state who those men were? I could not state who the men were. I merely know some were breaking stones, and some clearing the roads.
5842. You say you were acquainted with the men in the circle in which you resided—it was your duty to know them;—did you not know them? No; only as far as giving the rations was concerned.
5843. Who returned the amount of work they were doing? It was returned to me on slips of paper by Mr. Burrowes, to put these men down as having done this work.
5844. You charge Mr. Burrowes with making this arrangement for you to carry out? I do.
5845. Clearly? Clearly.
5846. You do not know the men? I do not.
5847. You believe the men did exist? I cannot say that.
5848. You said you knew all the men? At one time we had 3,100 men there. It is impossible to know them all. I could not go round the field inspecting everything. That was left entirely to the overseers.
5849. But the men who come in to fill up contingencies are better known than the general men? They are known to the overseers.
5850. They should be known to the Paymaster better than those in the gangs;—did you know the men when you entered their names up? No, I did not.
5851. Can you tell me why Flemming appeared on the pay-sheet as working under Bell instead of the general establishment sheet? Because the work was done in Bell's district.
5852. Was there a reason why Flemming's name should appear as working as a ganger instead of under Mr. Burrowes? No. It would show the actual number of men employed at Hurstville instead of the number it did show.
5853. Was Mr. Burrowes authorized to employ such a man? I cannot say.
5854. Do you recollect any arrangement being made that Flemming should be charged as working, and his services given to Mr. Burrowes? Nothing was said to that effect.
5855. When you issued rations to the gang, did the recipient initial your book? We used to issue a ticket. Each ticket was numbered according to the gang. They would draw rations one day and a ticket would be given to them. The next day, when they drew the rations, they would return the tickets into the store.
5856. Were these tickets kept? Yes; I had a board with nails driven in, and each nail numbered to agree with the ticket.
5857. Then if they were discharged they would agree with the issue? Every day.
5858. And then the tickets were reissued? On the following day. If any tickets remained in the store we knew the rations were not issued.
5859. Can we ascertain easily the correct amount of rations issued on the Holt-Sutherland Estate? I think you could.
5860. From first to last—for men working on the Holt-Sutherland Estate? I do not think you could. There are the Port Hacking and Illawarra Roads; but yes, I think it would show that.
5861. Would the rations represent the number of men employed there? Yes; the rations might be a few more than the number of men.
5862. How many more? About 1 per cent. Sometimes in a gang of eight, one man would leave, and they would still draw the eight rations for a fortnight; but the eight rations would be paid for.
5863. We might take the rations to correspond with the number of men, less 1 per cent.? Yes; about that.
5864. After you had made out the pay-sheets, did you place them before Mr. Burrowes? After the pay-sheets were written out I took them to the copying press, and passed them to Mr. Burrowes for his signature. He laid them on his desk, bundled them up, and I did not see them afterwards.
5865. How many names on a sheet? Eight or nine on a sheet; sometimes three, or five, or seven on a sheet; sometimes twelve.
5866. Were there fifty or sixty sheets? At one time more than that.
5867. Did he get sufficient time to run them down? He used to read them through as he signed them. Sometimes he only turned up the corner and signed them.
5868. Would he notice a name so familiar to him as Flemming? He never remarked to me about the name, other than the statements I have already made.
5869. I think you said it was under Mr. Burrowes' instruction that the name was put on? He said, "Put him down as a ganger representing eight men."
5870. The payments are made out for eight men—for work done and measured out. How did you see to the measurements? Mr. Burrowes went out, measured the ground, prepared it, and handed it to me.
5871. That would be a return as to the measurements? Yes.
5872. Do you consider a measurement of the value of £15 or £20 a good measurement for a fortnight? Yes, for a gang.
5873. How is it you did not get a measurement for an item such as breaking metal on the general measurement sheet? That measure was put down at an average or mean at 3s. 6d. per day.
5874. There were other men breaking stones? I got a measurement for that. Sometimes I would work it up to see whether it was paid correctly.
5875. Was it not a rule to have the length, breadth, and height of the heap of stones given to you? Yes.
5876. And all payments were made on such measurements? Yes.
5877. Excepting in Flemming's case? Yes.
5878. You had no measurements in that case? No.
5879. If you had not had instructions to put down the item in the sheets you would not have put it down? Not without measurement.
5880. Was it not a rule to pay Flemming on the Hurstville pay-sheet as a day labourer? He was never paid on the Hurstville pay-sheet. He always came to the Park, when I was at the Park, either at the Illawarra store or at Heathcote. Heathcote is at the National Park.
5881. During the time you were paying Flemming for the work, was he not on the sheet for services rendered as a labourer? No.

5882.

5882. You were not to suppose he would draw £23 or £24 a fortnight? I did not suppose that would be work that one man could do.
5883. There would only be that one man? If I were told there was one man only I should not have put it down; but I was told there were seven men's work to go down with him, and I made no question about the matter.
5884. You have said that when you started at this work you were getting 6s. a day? At Gordon, for two months.
5885. You found it small pay for a large family? Yes.
5886. It was afterwards increased to 10s a day? To 10s. a day and rations.
5887. How long were you in receipt of it? Two years and eight months.
5888. When did your employment cease there? On 6th January last.
5889. You still live in the district? In the Coronulla district, on the land I have leased.
5890. How long is the lease? For a term of fifty years from the Holt-Sutherland Estate.
5891. Have they any fixed terms? £3 per acre. I took a block of 5 acres from them.
5892. I suppose you have selected a specially good block? I went there, saw this site, and selected it.
5893. £15 ground rent to pay a year? Yes.
5894. Do you consider letting you a water-frontage at £3 per acre any concession? None whatever.
5895. It is only the usual terms? Yes. There is plenty there to be leased on the same terms.
5896. Have you entered into the lease? I have an agreement. When I get my license for the house I am to have a proper lease.
5897. Have you ventured to build such an establishment on such a tenure as that? I have the authority for a lease issued by the directors.
5898. You have expended £1,500 cash? It will cost that.
5899. Will you describe the building? It is a wooden building. I can show you a plan of it. It is 85 feet by 42 feet outside; inside, 71 feet by 35 feet; weather-board studded; the out-buildings are a kitchen and stabling.
5900. What size is the kitchen? 20 feet by 12 feet. The stabling is of bush timber, covered with galvanized iron. The hotel is a two-storey building. On the ground floor there is one bar, and three sitting-rooms and three bedrooms; altogether eight rooms on the ground-floor. The inside is lined with Baltic pine, $\frac{1}{2}$ -inch tongued and grooved, with $\frac{3}{4}$ -inch tongued and grooved board for the ceiling.
5901. You say with the exception of £650, you have borrowed from Alt, the other is money you have provided? £60 I have borrowed, and the other is money I have saved.
5902. You know the dimensions you have given me make a large building? It is a large building. I drew out my own plans for it and paid my men daily wages.
5903. What wages? Carpenters, 10s. a day. I paid a man £3 10s. for putting up the chimney in the kitchen. There is no other fireplace in the building.
5904. What are the doors and windows? Ordinary doors and windows.
5905. Have you done anything in the matter of the ground? I have cleared it and got it fenced in.
5906. At what price? £3 per acre. I asked a man what he would do it for.
5907. You know the general clearing cost the Board £8? Mine is not stumped. I left the timber in the ground. It is small timber—small oak.
5908. This includes internal fittings? There are only four shelves and a counter in the bar.
5909. This building will very soon consume your £1,500; what about furniture? I can get the furniture from Lawler's. I have my own furniture at present.
5910. Would not the building represent security for the money you have borrowed. What security can you give for the furniture? I shall have to borrow some more money.
5911. How much? I shall require £200 more.
5912. Do you think it will furnish a place of that dimensions? I have £250 worth of furniture myself.
5913. I suppose you gathered it together before you went there? I had it before. I always had a good house of furniture. I have been a master of a vessel. I was in receipt of £20 per month as master. I have never been hard up. That was three months before I was mate of the vessel.
5914. *Mr. Waller.*] What is this book? The daily issue ration-book.
5915. Is it correct? Yes.
5916. How do you know it? I wrote it up every day myself. It is correct according to the rations issued.
5917. What did you check it against? A book they had in the store. The issue of rations was sent into me and I copied it into this one.
5918. How did you make up the money value of the rations to the men? By a charge per man—1s. 1d. for each ration.
5919. Will you read page 232? Number 37, name Flemming, 7 rations; total 98 rations, from 10th to 22nd September.
5920. How much does it come to? £5 6s. 2d.
5921. Look at pay-sheet marked "J 4," 9th to 22nd September, is the name Flemming there? Yes.
5922. What is the value of the rations? £5 4s.
5923. How does that agree with what the correct amount ought to be? There are two rations short.
5924. Turn to page 240? Yes.
5925. Do you see Flemming's name there? Yes.
5926. What is the value of the rations there? £4 11s. 9d.
5927. Turn to the press-copy letter-book for the pay-sheet for the corresponding date? Yes.
5928. Whose writing is it? Mine.
5929. Is it a true copy of the sheet? Yes.
5930. What is the value of the rations there? £4 12s. 6d.
5931. What is the difference in the amount? Ninepence.
5932. Did you charge these rations against the gangers for the gangs? Yes.
5933. Did you charge them against A, B, C, D, E, or against particular names? I charged them against men representing a gang.
5934. In all cases? In all cases.
5935. Will you look at page 255 in the rough book, fifth entry from the bottom;—what do you read there? Stone-breakers, eighty-four rations.
5936. Is that a christian name or a surname? Neither the one nor the other.

Mr. J. H. Springall.

3 April, 1889.

Mr. J. H.
Springall.
3 April, 1889.

5937. Who is it charged against? Flemming's gang or a gang Flemming represented.
5938. Did you always charge against the gang Flemming represented as stone-breakers? Not always.
5939. Why did you deviate from your usual course of using the man's name here? Because they were entered as stone-breakers.
5940. What is Flemming's christian name? James.
5941. What was he then? He was working at Hurstville.
5942. What as? As a general "rouse-about" to Burrowes, looking after his horse.
5943. Then why did you charge him as stone-breakers? Because these are seven men with Flemming.
5944. What is the total amount of rations issued? Eighty-four, of the value of £4 11s.
5945. Does this pay-sheet correspond with the entry in the book you have before you? Yes.
5946. Do you find the name of Flemming on it? Yes.
5947. Is that the same Flemming that appears as a stone-breaker? Yes.
5948. What is the value of the rations? £5 4s.
5949. What is the difference between that and what it ought to be? 13s.
5950. Which is correct of those charges for rations—that in the book or that on the pay-sheet? They are both correct.
5951. But Flemming is drawing one ration at Hurstville and seven men are drawing at the Park? The difference represents Flemming's rations.
5952. Why does not it appear in the book so that if you were dead and gone a person could comprehend what the book is meant for? It is to keep a record.
5953. In what pay-sheet shall we find that Flemming has drawn a single ration to balance your books? In none of them.
5954. How can that explanation be satisfactory when the pay-sheet shows a lower amount when there ought to be a greater, and *vice versa*? I cannot say.
5955. As it sometimes shows a greater and sometimes a less amount, your evidence is hardly satisfactory? If the men were working in the Park, Flemming's rations are charged to these men.
5956. Will you show me where the seven men's rations are charged as seven men's rations, or charged as eight men's rations, and come out accordingly. Pick your own entry. I am taking all those I brought under your notice just now? That is the only explanation I can give. Seven men would be drawing their rations below, and Flemming's added to it make it even. Sunday is not reckoned. He never drew any rations on a Sunday.
5957. On page 232, Flemming is charged for fourteen rations, not twelve, and not only Flemming, but many other names are charged for fourteen rations—Canard, Barkley, French, and so on. Were they ever charged for any greater number than fourteen? No; a single man was not.
5958. Do you know a man of the name of Cox? I know there was a man of that name there.
5959. What was he? One of the gangers.
5960. He has been charged for sixteen rations? Then he has drawn extra rations. There was no restriction. They could draw as many rations as they liked. Perhaps a man was drawing one or two extra.
5961. Who would pay for them? The man who drew them.
5962. If not the man? The man whose name is against them.
5963. Flemming has been charged fourteen days, gives a total of fourteen days for seven men's rations—What does it come to? £5 6s. 2d.
5964. You have charged £5 4s. Your explanation is because he has drawn his own rations at some other place and that that makes the difference? Yes.
5965. Take one man's rations for 14 days? It is 15s. 2d.
5966. How does that agree with your book. Is your explanation satisfactory to yourself? No, it is not.
5967. Is there any use in my going *seriatim* through these discrepancies? I cannot explain them any better than I have done.
5968. As a book-keeper, does that explain it at all. Would it be a satisfactory explanation to you? I do not consider it satisfactory at all.
5969. Are we, in the face of the few items I have drawn your attention to, which you acknowledge to be incorrect and cannot explain in a satisfactory manner, to take it as a true and faithful record of the transactions of the ration department in the Casual Labour Board? Yes, sir.
5970. You think we can safely? I do not say there are no mistakes: there are errors in it.
5971. If there are errors, how can we take it as a faithful record of the transactions. Can you give any idea as to the number of errors that occur? No; I did not know that these occurred.
5972. You do not know whether there are a few or many? I do not think there are many.
5973. If I had asked you a few minutes before if there were errors, what would you have said? I should say there would possibly be errors.
5974. Are these entries as correct as the pay-sheets? The entries on the pay-sheets were made from the book.
5975. Then where one is wrong the other is wrong. There is no more reliance to be placed on the one than the other? Yes.
5976. Do you know Flemming, the ganger? Yes.
5977. How many? There is only one.
5978. What is his christian name? James.
5979. Does he appear in the pay-sheets as James? Always.
5980. Will you look at the pay-sheet from 14th to 27th August, 1887;—do you see Flemming's name there? Yes, in the Waterfalls district.
5981. Where was he working at that time? I cannot say, unless he was working at the Waterfalls.
5982. Where do you think he was working? At the Waterfalls.
5983. Was he working as a general "rouse-about" or as a ganger? He was working at day-work.
5984. Do you see James Flemming there? I see James Flemming in the margin; and Flemming signed it.
5985. Why does it not appear there as T. Flemming? I cannot say.
5986. Who wrote that? It is my own writing.
5987. Is that the usual way you write his name? It is not.
5988. Why did you make the difference on that occasion? I do not know how it came about. 5989.

NOTE (on revision):—Q. 5952. Add "I knew by the ration-book that seven men drew rations in National Park, and that Flemming, having drawn his at Hurstville, was entered with the Hurstville rations." Q. 5966. Add "The full amount of rations was not always drawn by the men; this will account for the apparent discrepancy."

Mr. J. H.
Springall.

3 April, 1889.

5989. Do you think it possible that it was to prevent T. Flemming, the day-labourer, and J. Flemming, the ganger, being mixed up? No.

5990. Would there be anything peculiar in J. Flemming appearing as a labourer and as a ganger on the same pay-sheet? That is August, 1887; I do not know where he was working then.

5991. You do not know anything about it? I was never up till that time at the Waterfalls.

5992. While on the subject of Flemming, the ganger, Flemming, the rouse-about, Flemming, the groom, and Flemming, the day-labourer, I would like to ask you how it is you were distinct in your answer to the President a few minutes ago, that on a certain occasion when Flemming drew as a ganger you were positive he was a ganger? Because I know the man was working then in the camp with the men who were keeping the camp clean. There were certain men told off to keep the camp clean, and that was his work.

5993. Was he returned as a ganger on those occasions or as a stone-breaker? He was returned as a day-labourer.

5994. This particular occasion—on the pay-sheet, Loftus Road, 17th to 30th June, 1888—does Flemming's name appear on it? Yes; here is his name—Flemming and five men, seventy-two days.

5995. As what? It does not state.

5996. He was a ganger? He was a ganger over them. His name was put down to draw the money for these men.

5997. Was that subsequent to your finding out, on the 26th August, he was not a ganger at all? He was a ganger at this time.

5998. You satisfied yourself you were not being made a "cats-paw" of at the time you made out that pay-sheet? No more than his name was returned to me, and I put it down.

5999. If Mr. Burrowes swears positively that the man was never a ganger at any time during the time of the Casual Labour Board? He swears what is wrong.

6000. I want to clear up this matter about the abstracts of the pay-sheets and the pay-sheets themselves. You know the difference between the two documents;—did you make up the pay-sheets from the abstracts? Yes.

6001. Did you make the abstracts from anything? From a document similar to this—supplied by Mr. Burrowes from information obtained by him from the overseers.

6002. What became of them? They were tied together and were dated at the back, and hung up on a nail in Mr. Burrowes' office and mine at Hurstville.

6003. Eventually what became of them? I left them in Mr. Burrowes' office.

6004. Did you send them to the head office? For the last twelve months.

6005. Did you send the previous twelve months? They were in the office.

6006. Why did you send the last lot? Mr. Davies told me to send them up. I made them up—not straightaway dates—a twelve months lot.

6007. Why did you send the latter twelve months? I had no reason.

6008. Have you any reason to suppose they have been lost since? No.

6009. I think you told the President that you placed the name of Flemming on the pay-sheets under written instructions from Mr. Burrowes? Yes; the name of Flemming.

6010. On every occasion written instructions? Not on every occasion. After he first explained, I followed it up, and did it the same way afterwards. He knew the name was on the sheet.

6011. When did you first discover you were aiding and abetting in a fraud? About the month of August or September.

6011½. Having made that discovery, what did you do? I did not do anything.

6012. Nothing? Nothing.

6013. As book-keeper and storekeeper, did you feel called on to do anything? The name should certainly appear for the work he had done.

6014. As book-keeper, having discovered you were a party to a fraud, did you not feel called on to take some steps? I ought to have refused to put his name down.

6015. As an honest man, could you continue to put it down? No, I could not.

6016. Was it writing a lie regularly? It was while the man was employed at Hurstville.

6017. Would you have much reliance on a man's statement who would continue to do a thing like that? I should doubt it.

6018. You did it between the 26th August, 1888, and the 29th December, 1888? I know there were wrong statements put down on that sheet.

6019. Did it ever strike you that there was a possibility of this thing being "bowled out"? Yes, it did.

6020. That being the case, did it never strike you that it was a good thing to adopt the old adage and look out for number one? I can clearly understand I ought to have done it.

6021. Did it strike you? It did; I did not like doing what I was doing.

6022. That being the case, and being a man of intelligence, a paymaster and a mariner, did it not strike you it would be a good thing for the sake of your own skin to have kept those valuable documents in Burrowes' handwriting authorizing you as an officer to commit a fraud? Yes; I should have done it for my own protection.

6023. Do you think it likely that any man going in for a fraud, under the written authority of his superior officer, would be such a fool as to throw away the only document that could sheet home to his superior officer the evidence that he authorised the fraud? I did not know but that the papers he signed were all tied up together, and each set kept separately.

6024. Do you usually, when you pay a man money, hand him back the receipt? No.

6025. Do you think it likely Mr. Burrowes would be such a fool as you want me to believe you were, and after you handed it back keep the document? I say I made it fast with the other papers in the office.

6026. Do you think he would be such a fool as to leave these documents about, and let them go against himself? No, I do not.

6027. Do you expect me, or anyone else with common sense, to credit the story you are now telling? It seems a funny story, but it is true.

6028. Do you expect me to believe it? I would wish you to believe it.

6029. It is now a matter of oath against oath: You and Mr. Burrowes. Is it not? Yes. 6030.

NOTE (on revision):—Q. 5998. Add "I had no idea I was being made a catspaw of." Q. 6011. Add "I did not consider it a fraud, or I never would have put his name down."

Mr. J. H.
Springall.
3 April, 1889.

6030. On which side appears the most colour of truth. Yours, that you did it under written instructions to you, and deliberately left the proof to be taken away? Unfortunately it will go against me.
6031. And his is that he never directly or indirectly instructed you to do it, and never knew that it was done, and he swears that Flemming was not a ganger? It is against me entirely.
6032. Are there any documents or books which will give this Commission a return weekly or monthly of the men employed by the Casual Labour Board? Only the book with the different names in as they were sent to the works.
6033. How often did that list come in? Every month. A list of the names was sent down with the men.
6034. Is there any list or return of the gangers? There is no list.
6035. Could you at any time without the knowledge of Mr. Burrowes have returned a greater number of men through your ration-book than were in existence. Did he check your book? No.
6036. What was there to prevent you being able to do that? There was nothing to prevent me from doing that if I had felt disposed to do it.
6037. Who examined your ration-book? Mr. Davies. When the paymaster came down I had them open for examination.
6038. Who did examine them? No one.
6039. Were they ever examined? Never.
6040. They were laid out with an air of honesty for examination for any gentleman who chose to examine them? Yes.
6041. I hold here a paper-covered book purporting to be a book showing the rations ordered and received. Was that the book you had at the commencement? No; I had another.
6042. What date does this commence? In May, 1888.
6043. When did you make the entries? At night.
6044. Where did you take them from? From the daily ration-book.
6045. This book appears to be very neatly kept, but you have omitted any year, whether it is the year one or 1889, you have omitted to show? It is the year 1888.
6046. How can you identify it as being 1887 or 1889? There is no year marked on it.
6047. Do you call that the store-book? No, I do not.
6048. I suppose that book is about as reliable as your other books? That book was kept the same as I kept the others.
6049. Is that so? This is a correct number of the rations issued and received.
6050. That shows the amount of rations ordered, delivered, and given out? Yes.
6051. Will you explain how it is that the amount of rations ordered and the amount delivered will not agree? Because in some cases the amount of rations delivered exceeded the amount ordered.
6052. They are ordered one day and received the next? The rations I received to-day were the rations I ordered yesterday.
6053. If you ordered 400 on a Tuesday, why should their delivery next day be 600? I do not know.
6054. What is this paper? An abstract from the ration-book for the month of July.
6055. Is it correct? Yes.
6056. I see the rations ordered on Monday, 4th July, were 2,250; the rations delivered 3,100? Very likely men were sent down from Sydney to the Park and rations sent with them that were not ordered by me, and I have certified they were received. If they sent men from the office they would send the rations with them. I would know nothing of it until I received word from Kidman.
6057. Where were they kept? In the store.
6058. How would they be sent down? If 200 men were sent down, Mr. Davies would send an order to Mr. Kidman to send the rations, and they would come down with the men.
6059. Who advised you? The clerk in the office. One of the men would bring a letter with the number of men and the names, and the rations would be sent with them.
6060. Did they do that? Nearly always.
6061. How would you know that was done? I would get the receipts, and I would see that more rations had been ordered, and what they were ordered for.
6062. From your own knowledge, you do not know whether they were sent down or not? Whenever they came down they were weighed.
6063. These may not have been weighed that were given to the men by Kidman? No; Kidman sent them down to me.
6064. You would therefore receive this extra amount of rations? Yes; the rations were sent down in bulk, and I would issue them when they came to the ground.
6065. How is it that in hardly any case the rations ordered and the rations received agree? I cannot say.
6066. Does it strike you as peculiar? The rations I received on the Tuesday were ordered on the Monday. The amount received on the Tuesday would correspond with that ordered on the Monday.
6067. There are 6,200 ordered on a Friday? That is a double day.
6068. You only got 3,100 sent to you; can you explain that? I cannot.
6069. You only issued 3,000 altogether? The surplus is left over.
6070. You ordered on Tuesday, the 5th, 2,900; you only received 2,250? Those latter would be ordered the day before.
6071. The Friday lot would come in on Saturday, I see? Yes; the rations ordered on the Friday would come in on the Saturday.
6072. On Wednesday the 13th, you ordered 2,660 rations; they would be delivered on the Thursday? Yes.
6073. But you got 2,700? Then I had forty sent down more than was ordered. Perhaps forty men were sent down.
6074. On the Thursday, 2,514 ordered, but 2,515 received on the Friday; on the Friday, 5,031 ordered; they delivered 5,030; on the Saturday, the 16th, 2,530 ordered, and on the Monday you got 2,575? There might have been men sent down and extra rations sent with them. I did not order the rations, but still they have been received.
6075. Do you not think that under that system with the explanation you give us now, that it would be very easy for an overcharge of rations to be made without anyone being the wiser? I do not think it would.

6076.

NOTE (on revision):—Q. 6068. Add "If 6,200 rations were ordered on Friday, I received them on Saturday, and the 3,100 must refer to the rations received on Friday." Q. 6069. Add "The 3,000 would be issued on Friday."

Mr. J. H.
Springall.

3 April, 1889.

6076. If these bags of sugar and crockery that were left at Goulburn-street under Mr. Davies' order had left Goulburn-street, would you know of it? Not after they got to Goulburn-street.
6077. Who was in charge of the Goulburn-street office? Mr. Davies was the head there. They were addressed to Mr. Davies, Chairman, Casual Labour Board, Goulburn-street.
6078. What became of them afterwards? I do not know. I received his acknowledgment afterwards that he received the sugar.
6079. In writing? I think so.
6080. Where was the principal store for the Casual Labour Board? Down at Hurstville when I was in charge.
6081. Were you the chief storekeeper all the time? Yes.
6082. Responsible for all the goods? I was responsible; but Mr. Burrowes used to order stores from Liverpool, and Mr. M'Pherson used to order for Waterfall and Bankstown. Many times I have spoken to them about the matter.
6083. Do you know that of your own knowledge? An overseer has written to say he has received a certain amount of tools that I know were never ordered.
6084. If these gentlemen swear they did not do anything of the sort, how then? They swear falsely.
6085. You have no documents? Nothing more than has been sent to you.
6086. Had you anyone to check the honesty of the returns sent to you in the first instance? No one whatever.
6087. The original slips might have been bogus slips? They might.
6088. Have you any reason to believe they were bogus slips? From what I have heard and seen I think some of them must have been bogus slips.
6089. Do you think you were innocently made a tool of? I can see it is possible that I have been.
6090. You are not a suspicious man naturally? No; I put too much credence in people.
6091. But still, on the 26th August, when you found you had been made a tool of, by giving in a return that Flemming was a ganger, it did not strike you you might be doing the same in some other case also? No.
6092. Did you ever report that to Mr. Davies or anyone else? No; I have not seen Mr. Davies once.
6093. You have kept perfectly silent over the matter? Yes. I have had no communication with anyone.
6094. Have you been friendly with Mr. Burrowes at the same time? Until last week.
6095. Did you ever imagine you might get into trouble about the matter? Not until I heard rumours.
6096. What rumours? The first was about Flemming; the second was that I had made £3,000. I accuse Mr. Burrowes of spreading that report. He denied it, and said he had not done anything of the kind.
6097. When was that? It is about a month ago since I spoke to him about it.
6098. Where? At Hurstville.
6099. What was the rumour about Flemming? That Flemming had been drawing money; that the money had been given to me, and that I had been giving it to Mr. Davies and Mr. Hinchcliffe.
6100. When was this? About a month ago.
6101. Who told it you? I heard it from a party in the street.
6102. Parties or lamp-posts? No.
6103. Give us the names? Mr. Hibble told me.
6104. That is one party; can you give another? That is the only one.
6105. Mr. Hibble is the party? Yes.
6106. There was some foundation for the rumour? No.
6107. Did you not receive some money? I had received Flemming's wages.
6108. Did you receive any money from Bell? No.
6109. How was it Flemming could only bring himself to part with such a small portion of the large amount he received on the ground? He paid the men on the ground.
6110. What was the particular reason he should trust you with the money; did you know him before? No; I did not know him until his wife was dead.
6111. Did you give him any interest on his money? No; I have given him no interest.
6112. How was it that the man came to you? I have had as large a sum as £200 in money by me. I put up a notice that I would take care of their money.
6113. Why did you undertake this trouble? For the good of the men.
6114. What bank did you pay it into? No bank. I proposed that a clerk should be sent down there to receive any money which the men might wish to deposit in a bank.
6115. Your story is that you took charge of £200 in an unguarded tent? I was not fool enough to tell people that I had got it there.
6116. You posted outside that you had got it? I did not. If a man came to me an hour or two hours afterwards and asked for the money again, I have said, "Do you think I keep the money in my tent? It is not safe here. They would cut my throat if they knew I had it here."
6117. But you did take charge of it for no earthly benefit to yourself? No benefit to me.
6118. Ran the risk of being robbed? I did not consider it a risk.
6119. You ran the risk? I ran the risk.
6120. You ran the risk of being accused of being a robber if you could not produce it? They would have known it all over the camp if I had been robbed. I have never had a man on the field raise his hand against me. Others have had to go about with revolvers in their pockets.
6121. Have you returned all the money? When I got the money I gave them a receipt; when they wanted it back they brought back the receipt and I gave them the money.
6122. Who took stock of the tools in your possession? No person.
6123. Did they ever take stock? They never took stock.
6124. The Board only had your own statement? Only my own statement.
6125. What class of men were the under-storekeepers? Men I could place reliance on.
6126. Taken from the unemployed? Taken from the unemployed.
6127. What reason had you to place reliance on them? From their actions. There were some good decent men amongst them.
6128. Would you place reliance on Mr. Burrowes? I would have then, but not now.
6129. Might not the same apply to some of the other men? Yes.
6130. Had you any testimonials as to their previous character? None.

6131.

NOTE (on revision):—Q. 6083. Add "by me." Q. 6086. Add "All M'Lean Brothers' vouchers were checked in the office, Goulburn-street, previous to being forwarded to the Superintendent. Q. 6121. Add "Yes" before "when."

Mr. J. H.
Springall.
3 April, 1889.

6131. Simply your general good judgment of human nature? Yes.
6132. If these men had been willing and desirous, could they have committed frauds? Not without my knowing it. As an instance: one time Christy was a time-keeper, a ganger received money and was told to pay it to Christy. Christy was asked whether he could account for it; he could not, and he was dismissed. That is the only instance I know of in the field where men have been put down for work they have not done.
6133. Who saw the copies of the abstract pay-sheets? M'Pherson, Burrowes, Goodman, and I did; whoever might be in the office. I have been as long as thirty-five hours in my chair and never got up to my meals.
6134. Did this name of Flemming slide through all these gentlemen's inspection without their being able to see the peculiarity, without their seeing that the pay-sheets and the abstracts did not agree? It has done seemingly.
6135. You say that M'Pherson, Burrowes, and Goodman saw the pay-sheets? Yes; the abstracts were always hanging in the office, and the press copy-book was there.
6136. When did you see Mr. Davies last? I think the week before last, in King-street; not to speak to.
6137. When to speak to? In January.
6138. Did you ever write to him or receive letters from him? No.
6139. Have you had any talk with him, or with anybody else, as regards this inquiry? No.
6140. Directly or indirectly? No.
6141. What did you say to Larnach? I accused him of the reports. I told him I had heard of the reports he had spread about me, and would make him prove them. I also threatened him with an action.
6142. Who told you? Burrowes told me Larnach said them, and Larnach told me Burrowes said them. A man of the name of Drew said to me: "I saw the two conspirators in town—they had nicknamed Burrowes 'Pigott'—going along there." I said, "Who do you mean." He said, "Larnach and Burrowes." It was M'Pherson first told me they called Burrowes Pigott.
6143. What time? About a month ago.
6144. Was Burrowes your superior officer? He had charge of one department; I had charge of another.
6145. Did you look upon him as your superior officer? I looked upon him as my equal.
6146. You were working independently? Yes.
6147. That being so, what inducement was there that you should commit these frauds? It was merely because I knew Flemming was working there. I knew he had been taken to task for the number of men employed at Hurstville. It was to keep the man on the pay-sheets.
6148. You did not make anything out of the little transaction yourself? No; I have never made anything.
6149. Why did you leave? I told Mr. Davies about the hotel, and that I should leave at the end of the year. In November, when I found out I could not get in, I asked him if I could remain on longer. He said Mr. Larnach was going to take my place, and as I had given in notice I must abide by it. He told me to send in all papers—he had some doubt about Mr. Larnach—so that they should not be manipulated in any way.
6150. What was your pay? 10s. a day.
6151. What did it amount to in the gross? About £402.
6152. Are you a married man? Yes.
6153. Any children? I have children, but no wife.
6154. How old are the children? They are 12, 14, 17, 19, 21, and 23.
6155. How many are boys, and how many are girls? I have only one girl and a boy at home.
6156. Where are the others? The eldest son is at work at Wollongong; the second one at Kempsey; the third son I have as a messenger; one daughter is married; another is living with a friend; and I have a little boy at home.
6157. What did your weekly expenses come to for yourself and family? I had but little to pay for rations, and 15s. for rent.
6158. What might you put it down as? 30s. or 35s. a week.
6159. Take 35s. a week for the time from the gross amount? That is about £200. That is £200 off £400.
6160. You told the President that you spent £1,200? When I went to the Park there were no stores at Sutherland. The first day the men asked where they could buy candles, tobacco, and soap. Mr. Wise gave me permission to have a store, but on no account to sell anything that the Government supplied. I kept that store until the Casual Labour Board was appointed. Some weeks the takings were good. The men got things and used to pay me every pay-day.
6161. You gave the President £280—£21 from your son; £22 from Flemming; £60 borrowed; £650 from Allt; the total came to £1,101? I had £100 when I started.
6162. You are calculating the money you saved during the time you were under the Board. Now you see what you received is reduced by £200? That is the outside. I have not spent £200.
6163. You have not accounted for anything like the money you spent since? I cannot keep all these things in my head at the present moment.
6164. But you must have had the money in your pocket to have spent it. You borrowed from Allt & Co.—which partner did you see? Mr. Tulloch.
6165. When did you know him? I have known him for years. I told Mr. Tulloch what I was going to do and asked him to advance the money. He said any money I wanted I could have off him. I had £400 at first and £200 afterwards.
6166. What security did you give? I gave him security on the place which I was building.
6167. What is the contract? I had no contract.
6168. What will it cost? I reckon £1,500.
6169. Where are you going to get the balance of the money? When I get a license and get the place open I can get more money from Mr. Allt.
6170. Have you any other banking operations? None.
6171. You say you have borrowed £650 from Tulloch without a license? I have a conditional license.
6172. Without any real tenure of the land; with a building being finished and therefore uninsured? I had it insured. I insured the timber as it went on the ground.
6173. Without security they would lend you the money? Yes, they did. 6174.

NOTE (on revision):—Q. 6147. Add "I have several times stated I did not consider them frauds."

Mr. J. H.
Springall.

3 April, 1889.

6174. From whom did you get the land on the Holt-Sutherland Estate? From Mr. Murphy.
6175. When did you get it? In October.
6176. When you opened the banking account at the Bank of New South Wales, did you open it with a cheque? I paid in as a first cheque the £200 that I borrowed, I paid in another £200, and I have drawn another from Alt of £250—£200 in a cheque and £50 in cash.
6177. How did you make your payments to the people? When they sent their account in I paid them.
6178. How? By cheque and cash.
6179. On what bank? The Bank of New South Wales.
6180. What office? Haymarket branch.
6181. You have a regular cheque-book? Only one.
6182. Will you produce it, please? Yes.
6183. You swear you never paid any other men as gangers in the same manner as Flemming, either through instructions from Mr. Burrowes or any member of the Board? I will swear it.
6184. If it is found out you did it? Well, it was done without my knowing anything about it.
6185. Why did you not put Flemming's name on the abstract? I am sure I cannot say why it was not done.
6186. Why did not you do it after you found out that you were doing what was wrong? I did not look at it in the serious light it is looked at now.
6187. Where does Bell live? At Hurstville.
6188. Where do you live? At Coronulla beach.
6189. Do you ever see Flemming? I saw him the night before last.
6190. How far is he from you? He is working for me.
6191. In what capacity? Looking after the stables.
6192. He is a "rouse-about"? A "rouse-about."
6193. A ganger too? He asked me whether he could come with me, and I gave him the privilege of coming.
6194. He is living in your house? No; in a tent.
6195. What wages do you give him? I have not paid him anything yet.
6196. What shall you pay him? I shall give him 15s. a week.
6197. Have you any money belonging to him? I have taken it for this building.
6198. You are taking the use of his bones and sinew, and money, and giving him nothing in return? I shall pay him.
6199. Is he a partner? No; it is entirely my own venture.
6200. Flemming has consented to give up absolute employment, good pay, drawing wages £20 a fortnight, and rations for seven men, and has gone down to this beautiful spot to work for you for nothing a week but a promise hereafter? I shall pay the man for the work he has done.
6201. He is working on a promise to pay? He is not the only man who does it.
6202. He is the only man who would give up £20 a fortnight and go to work for nothing? He is not giving up £20 a fortnight. He had to pay his men.
6203. Have you ever mentioned these rumours to Flemming? No; it is a thing I do not like to talk about. It does not lose by talking about.
6204. Then you can give me no reason for not putting Flemming's name on the abstract list? No; it is an oversight on my part that it is not there.
6205. Why did you put the other men on? Because they were returned as having done work on the ground at labouring or stone-breaking. This man was employed in another place, and the men were employed in different parts of the field.
6206. You said that until to-day you were not aware that Flemming was a ganger? I could not say I did not know he was a ganger. I remembered he was a ganger, but not a ganger after he removed to Hurstville.
6207. I ask you how you reconcile that answer? He was not a ganger after he was shifted to look after the horse.
6208. Did one man or anyone come for the rations, or did the ganger come? One man of the gang; sometimes the ganger. The gangers came.
6209. How did they get them out? By bringing the mess utensils.
6210. Then Flemming came for the rations for the seven men? One of the seven men came.
6211. Then there was a difference between Flemming's case and that of the other men. Did Flemming send his men in? One of the men that Flemming paid came for the rations.
6212. Did the same man always come? Some days one man would come; other days another.
6213. Did not that strike you as peculiar? No. Sometimes a man would consider it a relief to come for the rations instead of going on working.
6214. Did a man bring back a cart-note from the railway? There was no cart-note at all.
6215. Who was it you advised in Sydney of the receipt of goods? Mr. Davies.
6216. Were you ever in Mr. Kidman's employment? Never.
6217. When you were selling out their goods? The Casual Labour Board objected to my having a store.
6218. You were never in Mr. Kidman's employ? Never.
6219. Did you ever act as his agent? Never.
6220. *President.*] When did you give up the store? In August, 1887, shortly after the Board was appointed. No; it must have been in June. I gave up the store in June.
6221. Was there a camp out there known as Walsh's camp. Were you keeping the store then? Yes.
6222. Was that before or after you bought this place? Before. That camp was in existence nearly two years.
6223. Did you have an account with Kidman? Yes; for rations sent out to me for my men working on the ground.
6224. When did you have that place? I started the place on November 12th.
6225. How many men had you then? Seven altogether.
6226. Did you get your rations through Kidman? Yes.
6227. On a private account? Yes.
6228. Have you paid it? Yes; I have a receipt, £27; I paid him on the 31st December.
6229. Who received those rations? They were sent down with the rations that were forwarded to Walsh's camp.
6230. Who received them? Jobnson.
6231. At the same time as the Government rations? At the same time.
6232. Had you anything to do with a man named Edwards? Yes.
6233. Who was he? He was a man working on the Coronulla Road.
6234. Did you send him rations? They went out.

- Mr. J. H. Springall.
3 April, 1889.
6235. Did you ever countermand rations? Yes; I found out that the gang was living in the tents and the rations charged to me, drawing them from the store.
6236. Did you send the rations to them afterwards? Not afterwards.
6237. Who was Walsh? He was an overseer on the Illawarra Road.
6238. Do you know whether he stopped the rations? I do not think he did.
6239. What month was that? The month of November, 1888.
6240. You stopped the rations and refused to let them have them? When I found they were not working.
6241. Did you not send them on afterwards? No.
6242. Quite certain? Yes.
6243. Look at this order [*Exhibit I 2*]"—“Do not send any rations to Edwards' gang until further notice, as he is off our works at present?” Yes.
6244. Whom was that sent to? Walsh.
6245. He has sent rations to this gang as usual? I will explain that. I asked Burrowes if there were any men I could get. The clerk asked if Walsh had anyone he could recommend to clear that ground. Walsh said he had no one only Edwards' gang, and he recommended them. I could make arrangements with them to clear the ground. I saw one man of the gang, but would not make arrangements with them. On the Monday they went to work and worked two-thirds of the day. They cleared a place 80 by 60, and I paid them 30s.
6246. Do you know a man named Coleman? Yes.
6247. Do you know where he is? No.
6248. Do you know P. M'Intyre? No.
6249. Do you know J. P. Wood? No; there was an Alfred Wood on the ground.
6250. Do you know W. M. Robertson? Yes.
6251. Where is he? I think he has cleared now.
6252. Do you know a man named Yule? Yes.
6253. Where is he? He is at sea, I think.
6254. Did you ever sell them any rations? I have sold them grocery goods when I had the store.
6255. Since? Never.

Charles Sandon called in, sworn, and examined:—

- Mr. C. Sandon.
3 April, 1889.
6256. *President.*] What are you? I have been carting on the park. My occupation is droving.
6257. Were you employed by the Casual Labour Board? Yes.
6258. What doing? Carting.
6259. Do you know Mr. Hinchcliffe? Yes
6260. Do you know what office he held? Paymaster.
6261. Did your duties at the park or Hurstville bring you into contact with Mr. Hinchcliffe at all? I have driven him a few times.
6262. Any number of times? Only on odd days.
6263. Any one else with him? At one time Mr. Davies was with him.
6264. Did you drive him with Mr. Springall? I do not think I did. I do not remember.
6265. You do not recollect whether Mr. Springall was with him? No, I do not.
6266. Did you drive him when he had a considerable amount of cash with him? I could not say. Of course he went round to the Waterfall to pay there.
6267. At the different times that you drove him, do you remember anything happening or being said that struck you as being peculiar? I never heard anything take place at all. The reason that I drove him that day was because he and Lobb had a few words.
6268. Lobb was a man in the habit of driving? He used to drive them regularly.
6269. You do not recollect any peculiarity or anything being said? No.
6270. Do you know what the words were he had with Lobb? Whilst I was driving away, Mr. Davies was getting into Lobb's trap. I drove away, but looked round, and Mr. Davies beckoned.
6271. Do you know Mr. Wells? No; but I have seen him.
6272. Have you seen him out there? Yes.
6273. Have you ever driven him? Never.
6274. Do you know Mr. Larnach? Yes.
6275. Has he ever spoken to you about anything that took place whilst you were driving any of the officers of the Board? No.
6276. Did your duties extend to carrying goods from the railway-station to the store? Yes.
6277. Were you in the habit of going to the railway and taking delivery? Yes.
6278. Did you sign the railway receipts? Yes; at Loftus.
6279. Who did you deliver the goods to generally? To Mr. Bell.
6280. Had you anything to do with the rations? Yes.
6281. What? I used to help to put the rations into the carts and take them to the men.
6282. Do you know a man of the name of Flemming? Yes.
6283. When? I have seen him up at the pay-tables.
6284. Do you know what he got? I never took notice. It was seldom I went inside. I had the cart outside. I have seen Flemming at Heathcote.
6285. *Mr. Waller.*] Do you know what capacity Flemming was in? I cannot say.
6286. Was he a ganger? I cannot say.
6287. Have you seen Larnach lately? I saw him a short time ago; three or four days ago.
6288. Did Larnach tell you anything about the trouble that was on? No. I did not know anything about it until yesterday afternoon.
6289. He did not say anything to you about this Commission? No.

Michael

NOTES (*on revision*):—Q. 6244—I understood the question to be “Who sent the order?” when I answered Walsh. The order was sent to Johnson at the Illawarra Road store. Q. 6245—I asked Burrowes if he could recommend me a gang, working upon the Coronulla Road, who could clear a portion of my ground, he referred me to Overseer Walsh who recommended this gang of Edwards' to me; I gave him clearly to understand this was my own private work; he told me this gang had finished their section and I could make arrangements with them; two of the men worked part of a day but would not do any more as the rest of the gang were away drinkin I paid 30s. for clearing a piece of land about 80 ft. by 60 ft.; when I found they had stopped work I stopped their rations. Q. 6251—I said I think he is working in a store in Sussex-street, the South Coast and West Camden.

Michael Bell called in, sworn and examined :—

6290. *President.*] What are you? I am agricultural overseer at the National Park.
6291. How long have you been in the employ of the Board? Nineteen months.
6292. Nearly the whole of the time they have been in existence? I went to the National Park in 3 April, 1889.
6293. When did you cease your duties? I am still at the Park.
6294. When did you give up under the Casual Labour Board? On 30th March they went out of existence.
6295. You were in their employ up to the end? Yes; I am there yet.
6296. What particular branch did you have? The agricultural portion—sowing the grass-seeds, planting the trees, and so on.
6297. Where? In the National Park.
6298. Had you a man named Flemming in your employ? No, I never had a man named Flemming.
6299. I suppose this pay-sheet should be true? Yes.
6300. Whose writing is it? It is Springall's I should say. It is like his.
6301. Did your work come in the Heathcote portion? Some in the Heathcote portion and some in the Meadows.
6302. Would the Heathcote Agricultural be your work? Yes.
6303. We have had a number of pay-sheets produced to us in the course of the evidence which has been given here, especially Heathcote Agricultural pay-sheets, and in those pay-sheets occurs the name of Flemming as a ganger for £15, £20, and so on. Can you give us any information about that? That man Flemming was Mr. Burrowes' groom down at Hurstville; he was paid at my tent at Heathcote, but he was never directly under me.
6304. Then was he properly paid on your sheet? No; I objected to it.
6305. When did you find out he was paid on it? Of course I was always at the pay-table and called my own men in, and I think the whole of the time I was at Heathcote he was on my sheet. Certainly he was not put on my pay-sheet by me.
6306. Were you present at every pay? I think I was.
6307. Would you be present when Flemming would be called up? Yes.
6308. Did you ever notice or remark about Flemming being called up on these occasions and getting these large sums? Yes.
6309. Did it strike you as being unusual? Mr. Davies' object was to keep down the expense of the agricultural portion as much as possible. Of course I wished to carry out Mr. Davies' idea as much as possible. I objected to Flemming being put on my sheet, but that did not appear to keep him off. It rose my sheets up to such a large amount.
6310. Whom did you object to? The clerk and Mr. Springall.
6311. Can you tell me what the result of your objection was? Well, it was not left off. The reason given was that it was the most convenient place to get paid in, although he could have gone to the main camp at Sutherland, instead of coming to me 8 or 9 miles off.
6312. That was what Springall said? No. He said it was as convenient for him to come there as to go anywhere else.
6313. Your objection was always made to Springall? Yes.
6314. Did you object to anyone else? No.
6315. Did you object more than once? I cannot say. I think it was a general objection. Nearly every time I said, "What do you put him on my sheet for," just as one officer would to another. I never made any official objection to it.
6316. Did you notice that he was appearing as a ganger? Yes. It was only the gangers that drew money.
6317. Had you any reason to doubt that he was a ganger? I never inquired whether he was a ganger. My impression was that he was the head of the staff that was employed at Hurstville—sail-makers and storemen. I thought that the money was drawn for them until the last pay.
6318. Do you know now what that money was drawn for? No, I do not.
6319. What was the nature of the document you supplied to Springall to enable him to prepare the pay-sheets? I entered the men's names; at the beginning there would be February 23, and so on for the fortnight; there were twelve days and twelve lines; if a man missed a day there was a cross; there was just a stroke for a full day's work.
6320. Did you know what Flemming was? I knew what he was doing. He was supposed to be looking after Burrowes' horse.
6321. Was he an old man? Yes, an old man.
6322. He appears on a very large number of Heathcote pay-sheets as a stone-breaker, as though in charge of a gang? He never broke a stone under me.
6323. Of your own knowledge, can you give us any information about this business? I do not know. He never broke stones. He was never employed by me. He was employed at Hurstville the whole of the time I was at Heathcote, I knew him as groom to Burrowes.
6324. Do you know when he left Burrowes' employment? Six weeks or two months ago.
6325. Have you any reason to suspect there was collusion between Flemming and Mr. Burrowes? I do not think there was anything of the kind.
6326. Between Flemming and Springall? I have no reason or proof to suspect anything. I thought he was drawing the money to pay the sail-makers and repairers of tents.
6327. You knew sufficient of him to know that the stone-breaking entry was not right? He never broke a stone to my knowledge. He was never under me.
6328. Do you know whether Flemming received the money absolutely? Yes; he always took the money away.
6329. You have no reason to think that the money was withheld from him? No; he always got the money. In the early days the gangers would draw the money; the men would keep on with their work, and the ganger would slope with the money. After that the rule was made that two men were to come up with the ganger to the table and shepherd him until the money was divided. Flemming never had any one with him to see him take the money. He always came and went away singly.
6330. He was an exception to the rule? Yes, an exception to the rule.

Mr. M. Bell.

6331.

- Mr. M. Bell. 6331. Would the day be far advanced before the pay was finished? Oh, no. At Heathcote the pay would be over in three-quarters of an hour.
- 3 April, 1889. 6332. Did Flemming remain at Heathcote or return to Hurstville? He returned by the first opportunity.
6333. Have you known him to stay all night? That was before the main camp was shifted down to Hurstville. He was at the Park then.
6334. Did you know him stop with Springall? I believe he is in Springall's employ now.
6335. Do you know anything about this hotel he is building? I have been down to the place twice. I went down to advise him as to the position of the house. I went down after the ground was cleared and confirmed my opinion.
6336. Do you know the extent of his land? I believe it is five acres.
6337. Have you any knowledge of the nature of the building? By the plan, I should say it would not cost less than £1,800.
6338. Was that what you have judged from the plans you have seen? That is, if he has carried them out. I have not seen the building.
6339. Was it generally thought he had been a saving man since he had been in that position? He was not an expensive man or anything of the kind, and his boy was also employed there as messenger.
6340. *Mr. Waller.*] Were you in the employ of the National Park people before you joined the Board? No; I was with Mr. Moore in the Botanical Gardens.
6341. Did you go direct to the Casual Labour Board? I was at the Adelaide Exhibition, and after I came back I was sent to sow seed and plant trees after the unemployed had prepared the ground.
6342. You said just now that you were under the impression that Flemming drew money for the payment of wages due to the sail-makers? And there was a yard-man, a man who had charge of the tools, and another or two odd hands on the works.
6343. Mere rouse-about? Just so. You might call them that.
6344. Supposing your idea was erroneous, to whom else could he turn the money over? I don't know who else. There was no gang.
6345. Can you state positively that Flemming was not a ganger engaged in quarrying, stone-breaking, or anything of that sort? Certainly; never all the while I was at Heathcote.
6346. If his name appears as a ganger is it a fraud? Well, I do not know what the money was charged for.
6347. If his name appears as a ganger over quarrying men or stone-breakers? So far as being a ganger, he was drawing the money legitimately to pay a gang.
6348. Supposing he was drawing the money to pay sail-makers and others? Precisely.
6349. Did you ever ask Springall to put Flemming's name down on the pay-sheet? Never. I objected to it.
6350. The evidence is that either you or Mr. Burrowes did tell Springall to put it on? It was certainly not me.
6351. Do you know whether there were any other men in the same position who were drawing money as gangers? No other on my pay-sheet.
6352. Do you know of any other? No other on my sheet.
6353. Have you any reason to suppose that there was any other in any other part of the field? No, I have not.
6354. Were the transactions carried on for the payment of wages so loosely, as regards arrangements, as to make it easy for persons to pretend they had gangs when they had not? It could not be done without the knowledge of the officers in charge.
6355. There must have been collusion? Yes; if anything of the kind took place.
6356. *President.*] What books are those you have with you? Simply to show that I never had a man of the name of Flemming on my works.
6357. We are sitting here to inquire into the working of this Board; might I ask you whether, during the time you have been connected with it, you have become aware of any irregularities or misappropriations of moneys? No. I was not in communication with the office. Simply at the end of the fortnight these sheets, with the names of the men and the time, were given in, and I had nothing further to do with them.
6358. No other irregularity, excepting Flemming's? No other.

THURSDAY, 4 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

George William Marshall Johnson called in, sworn, and examined:—

- Mr. G. W. M. 6359. *President.*] What are you? A butcher by trade.
- Johnson. 6360. Were you employed by the Casual Labour Board? Yes.
- 4 April, 1889. 6361. When were you appointed? At its commencement.
6362. Do you recollect when that was? Two years and eleven months ago.
6363. Were you unemployed yourself then? Yes.
6364. Who appointed you? I was speaking at the statue when Mr. Wise told me a person named Alcroft wanted me to see him at the railway station, and assist him in calling out the tickets of the men.
6365. Was that before your appointment by the Board? Yes, long before.
6366. How long had you been in the ranks of the unemployed before that? Three days.
6367. Were you actually speaking at the statue when you were sent for? No; we came here to wait upon Mr. Dibbs. I spoke to Mr. Dibbs and told him there were many men who told me they had no home nor food, and he made some arrangements for the men to get some food. He said we were to call at Mr. Wise's office at 6 o'clock in the evening. We called there and got food on that occasion.
6368. Had you personal knowledge of many of the unemployed? Yes. 6369.

Mr. G. W. M.
Johnson.
4 April, 1889.

6369. You acted as spokesmen for them? Yes.
 6370. Had you been on any deputations? Yes.
 6371. On how many occasions? Twice.
 6372. Where did you have your meetings? At the Queen's statue.
 6373. Were you there on many occasions? Only twice.
 6374. Do you remember the time when the Unemployed Department was shifted from Mr. Wise to the Casual Labour Board? Yes.
 6375. What were you then doing? I was assistant storeman at the National Park at Mr. Hodge's hotel.
 6376. Was that in May, 1887? Yes.
 6377. Who was the other storeman? Mr. Springall was the head. I was the assistant.
 6378. How long did you remain there? Up till about six months ago.
 6379. What did you give it up for? I did not give it up. I was moved from there to Sutherland and the store was moved with me.
 6380. Are you still under the Board? Up to last Saturday.
 6381. Then you have really been under the Board the whole time of its existence? Yes.
 6382. Were you out at the National Park with Springall? Yes; from May, 1887, up to six months ago.
 6383. The whole of the time Springall was there? Yes, until Larnach came out.
 6384. Was that about two months ago? About three months ago; perhaps not so long.
 6384½. Were you out there at the time that the Unemployed Department was removed from Mr. Wise to the Casual Labour Board? Yes.
 6385. Were you informed of the change? Not officially.
 6386. How did you find it out? By the newspapers. I saw that the Government intended to create a Casual Labour Board, and that Mr. Davies was to be the head of it.
 6387. Did you keep any record of the stores that were on hand when the Casual Labour Board came into office? The stores were received from day to day.
 6388. At the time that Mr. Wise handed over the duties, were there any stores that belonged to him? Not at my store.
 6389. Were there any surplus stores at all? Not at my store. There was stuff that came in after the Board was in existence.
 6390. Was there nothing in your store when the Board took it over? No.
 6391. Was that Mr. Springall's store? Yes.
 6392. Do you know of there being any sugar, rice, fish, and crockery there when the Board took over duty? They came up after the Board was in existence.
 6393. From where? I have no idea.
 6394. How much? Twenty-two bags of sugar, eleven bags of rice, and I think three boxes of fish—herrings.
 6395. What became of that? The fish was eaten by the officers, and some distributed to the men. The rice was also distributed in the same way with the exception of three or four bags that remained. Some of the sugar was sent away, and the remainder when the office was removed from the Park to Hurstville was sent to Hurstville.
 6396. You say "sent away"; where to? Two bags of it was sent to Mr. Burrowes.
 6397. Where did the twenty bags go to? The remainder of the sugar went to Hurstville. We might have used a bag or so occasionally.
 6398. Where did the bulk of the sugar go to? To Hurstville general store.
 6399. Who had charge of it? Mr. Springall.
 6399½. How far was your store from Mr. Springall's? About 7 miles.
 6400. I understood you were in the same store? When Mr. Springall was removed from the Park to Hurstville I remained at the Park. The head office was at Hurstville.
 6400½. Then the bulk of the sugar went to Hurstville? Yes. I do not know what became of it.
 6401. You say there were 7 miles between the store at the National Park and that at Hurstville? Yes.
 6402. When did you give up the store at the National Park? Six months ago.
 6403. How long had the store at Hurstville been in existence? Eight or nine months.
 6404. Then was the store at the National Park taken over to Hurstville? No; I still carried on the store there.
 6405. Were you the only person at the National Park? No; I had an assistant at the time—Wm. Roberts.
 6406. How long were you in the same store as Mr. Springall? From the time it started until Springall was removed to Hurstville.
 6407. How long? About two years.
 6408. Then you were with him at the Park during the time the Board was in existence? Yes.
 6409. What were your duties? To receive and issue the stores.
 6410. Did you keep any record? Yes; some books.
 6411. What kind of books? Books with the names in of the men who received the rations, and the amount issued to each gang, and another book showing the amount of stuff received from Mr. Kidman.
 6412. What became of them? They are at the office.
 6413. Were they in your handwriting? Some of them. Some not.
 6414. In whose handwriting are others? Some in the handwriting of a man named W. Davey.
 6415. From where did you get the information to put in the books? I had to send my book up weekly for Mr. Springall to charge the rations.
 6416. Had you the sole disposal of the stores? Yes.
 6417. Did you do what you liked with them? Not what I liked. I issued them to the men. I only had a certain amount to issue.
 6418. Could you not issue them to anyone? Only to the names and numbers that I had in the book.
 6419. Could you not if you liked? No; I could not. They were Government rations.
 6420. What was to prevent you if you had liked to be dishonest? The check Mr. Springall had against me.
 6421. What check? A daily check,

- Mr. G. W. M. Johnson.
4 April, 1880.
6422. What particular camp or work did your stores control? The majority of the places ;—The Deer Park, Heathcote, Como, and the National Park.
6423. Were these the only places your stores controlled? Yes.
6424. How did you know the number of men you had to supply? By the daily issue. I had a book, showing the names of the gangs and the numbers, going from one up to what number there might have been.
6425. Had you a book, for example, for Como? No; it was all in one book.
6426. Where did you get the particulars from that you put in the book? From Springall.
6427. Did he give you fresh numbers as the men came out; what kind of a book was it? A book with a paste-board cover.
6428. Was that the record on which you supplied the rations? Yes.
6429. Did you send it in every night? Yes.
6430. Did Springall ever alter it? No. He took the particulars from my book and entered them in another book—his own book.
6431. Can you tell by looking at it the names of the men working at Como, at Deer Park, and at Heathcote? Yes.
6432. Did you ever see the pay-sheets? Several times. I have sat at the table and called the names of the men out, and showed them where to sign their names as they received the money.
6433. Were you present on pay-days? Since the store was removed to Hurstville Mr. Davies came up, and required a witness.
6434. If I show you the pay-sheets, can you tell me whether you were there? By my signature on them, not without.
6435. Had you had much to do with men before you were on these works? No.
6436. What trade did you say you were? I am a butcher, but I have not done anything at it for eight years. I had been working at an iron-works.
6437. Is this your first experience with a large staff of men? Yes.
6438. Do you know Mr. Burrowes? Yes.
6439. Do you know a man who used to look after his horse? Yes.
6440. What was his name? John Cuthbert.
6441. Any other man? O'Neill;—two of them.
6442. At different times? Yes.
6443. Any other man? A man of the name of Flemming.
6444. Do you know his christian name? No.
6445. What kind of a man was Cuthbert? A very old man.
6446. Able to do hard work? No, not laborious work; but one of the O'Neill's was a robust man.
6447. What about Flemming? He was an old man.
6448. Able to do much work? No; he was troubled with asthma.
6449. Was he able to do work like stone-breaking? He might be able to do stone-breaking, but he would not make much at it.
6450. Was Cuthbert an aged man? Yes.
6451. Was Flemming an aged man? Yes.
6452. What age was Cuthbert? About 65 or 66.
6453. What age was Flemming? About 56; he might be more.
6454. When did you see them first? Cuthbert came up when I was at the store at the National Park.
6455. Do you know on what pay-sheet we should find their names? Cuthbert has not received any money to the best of my knowledge for eighteen months.
6456. Nor any rations? If he came to me for rations it was whilst Mr. Burrowes was at the Park, but not since Burrowes has been at Hurstville.
6457. What about Flemming? Flemming has been working up to about three or four months ago.
6458. Working for Burrowes? At Hurstville, looking after his horse, running messages, and so on.
6459. On what pay-sheet should we find his name? I should think you ought to find his name on the Hurstville pay-sheet, or on the Sutherland sheet. I cannot say.
6460. Was there any other pay-sheet out there? No.
6461. Was Heathcote a paying-place? No.
6462. Should he be on the Heathcote pay-sheet? I cannot say.
6463. Who was at Heathcote? Mr. M'Leod.
6464. Who was at Heathcote Agricultural? Mr. Bell.
6465. What was the difference? There were different overseers.
6466. Do you know Springall's handwriting? Yes.
6467. Look at that pay-sheet, Heathcote Agricultural, and see if the name of Springall is there? That is Springall's handwriting.
6468. What is this name "Flemming" on this [*Exhibit J 1*] pay-sheet? That is not the same man.
6469. How do you know? That is the name of a ganger.
6470. How do you know it is the name of a ganger? There were eight men belonging to that gang.
6471. Have you seen Flemming's signature? Yes. That is not like it. He is a good scholar.
6472. Have you any writing of his? No, but I know his handwriting.
6473. Here is his name again on pay-sheet J 2. Do you know anything of that? I should take that to be the same man as is named in pay-sheet J 1.
6474. Look at this pay-sheet, J 3? The J. Flemming on pay-sheet J 3 corresponds with that on J 1.
6475. Here is another pay-sheet; what do you say to that? I fancy I recollect a ganger of that name. Flemming was over a gang once. He used to draw the money.
6476. Do you know him well? Yes, very well.
6477. Where is he now? I have not seen him for two months.
6478. When did you see Springall last? On Friday week.
6479. Where was that? At the Railway Station.
6480. When was it Flemming had a gang, and where did he work? At the National Park.
6481. How long? Until they shifted to Hurstville.
6482. Was that the same Flemming that Burrowes had? The same Flemming.

Mr. G. W. M.
Johnson:
4 April, 1889.

6483. I understood you to say another? There are several Flemmings there.
6484. Did Flemming who used to look after Burrowes' horse ever have a gang? Yes.
6485. How long? For two or three pays.
6486. What were they doing? Gathering up stones or stumps.
6487. The same man? He has only looked after the horse since they went to Hurstville. He was also running messages at Hurstville.
6488. Do you think the Flemming you see on these pay-sheets is the same man that was looking after the horse? I do not think so.
6489. Suppose Springall tells us it is? It might be possible, but I have no idea; I am not at the camp. Of course I cannot swear to anything I did not see.
6490. How many months were you in the same store with Springall? For two years and three months, at the same camp and on the same ground. I worked with him from the commencement for about that time.
6491. What pay did you get? At the commencement 5s. a day and food. It was £3 10s. a fortnight, Sundays included.
6492. How much when you finished? 49s. a week.
6493. Seven shillings a day? Yes.
6494. Did you live in the same tent as Springall? No; in a tent of my own.
6495. By yourself? Occasionally, when there was anyone helping in the store who had not got a tent, I would put them up a place to sleep in my tent. It was only 20 yards from Springall's tent.
6496. Do you recollect November last;—where were you then? At Sutherland.
6497. Where was Springall? At Hurstville.
6498. Where was Walsh's camp? About 2 miles from my camp, in the Sutherland district.
6499. Do you recollect getting any orders from Springall to send him some rations? Yes.
6500. Do you recollect anything particular about it, as to whom they were to be charged to? To Mr. Springall.
6501. Did you charge them to Springall? Yes.
6502. In your books? Yes.
6503. What book? A book I kept at the store, and sent to Hurstville.
- 6503½. What is its name? The store-book.
6504. The Government store-book? Yes.
6505. How did you charge it? Joseph Henry Springall, so much on such a day. He sent me in a note to send enough tea and sugar for a week, and meat and bread for a day.
6506. Do you know whether he paid for those rations, or was he charged for them? I know nothing of that.
6507. Look at this document; is that your handwriting? No; it is my signature.
6508. Who made it out? A man of the name of Davey.
6509. Where is he? At Sutherland.
6510. Where did he get the particulars from? From my book.
6511. What became of the book; we have been unable to find it? It remained at my store until Saturday.
6512. Is it there now? I cannot say. I left on Friday, and told Mr. Davey to send all the books to Hurstville.
6513. Is that the store-book you kept all along? A considerable time.
6514. It contains, I suppose, the names of a lot of different people? Of a lot of the gangers.
6515. For how long? Nearly two years.
6516. Do you know a man named William Robertson? What was he? I know two by that name.
6517. Where were they? One came up at the beginning, with the first lot of men, as one of their agitators.
6518. Was he one who used to talk at the Statue? Yes.
6519. Would you know his signature if you saw it? I would not know either of their signatures. One was a very drunken man. The other was a very sober one.
6520. Do you know a man named Coleman? Yes. He was a ganger. I have no idea where he is now.
6521. Do you know M'Intyre? No.
6522. Do you know Woods? No.
6523. Do you know Yule? Yes.
6524. Where is Yule? I saw him nine days ago in George-street.
6525. Did you ever hear of Yule doing anything wrong? He was called to account for something.
6526. You say you used to receive the stores. Where did you receive them? Whilst at the Park, at Loftus.
6527. Who from? Goodman.
6528. From any other person? No.
6529. Did you receive the plant and tools? Yes.
6530. Where from? From M'Lean Bros. and Rigg.
6531. From any other person? Not that I know of.
6532. Had you far to go to the railway station? It was only about a minute's walk from my store.
6533. Who signed the receipts? There were no receipts. They came up in a van and the train left it behind and went away.
6534. How did you know what you should receive? I used to count the bread and weigh the other things and take them into Mr. Springall.
6535. When tools came out, did you sign receipts for them? No.
6536. How did you know when anything was coming out? The train used to bring out a truck load.
6537. Did it whistle? Yes. Springall used to say when the goods train came, "Go down and see if there is anything in it for us."
6538. Beyond that you never knew when anything was ordered? No.
6539. What are you doing now? Nothing.
6540. Have you been discharged? Yes.
6541. When? On Saturday.
6542. *Mr. Franklin.*] You know nothing of the Hurstville store? Nothing, only I used to take my books there on a Saturday and send down a man for the stuff I issued.

- Mr. G. W. M. Johnson.
4 April, 1889.
6543. That was your weekly statement? No, nightly statement.
6544. You made a weekly statement also? Yes; I took my books down weekly.
6545. You were asked whether you know anything about surplus stores at the time the Board took charge? Yes.
6546. Some portion of them were sent to Hurstville? Yes.
6547. Were such stores as sugar issued from the Hurstville store in small quantities? Not that I know of.
6548. You know they were not issued? They should not be. There were two or three men working there, and they used to get their daily allowance.
6549. You have not stated the total number of bags that were sent to Hurstville? I think fifteen.
6550. What weight were they? About 70 lb. each.
6551. Over 1,000 lb. weight of sugar? Yes.
6552. How many men were there about Hurstville? Two sail-makers, Burrowes, Springall, and Frank Springall—six altogether.
6553. Were they supplied with rations by you? No; at Hurstville. I do not know how they got them.
6554. Do you think they were delivered direct from Kidman? I think they might have come up separate.
6555. You delivered the sugar without regard to the general consumption, I suppose? Yes.
6556. Do you remember whether it was stated that the sugar was consumed by the men at Hurstville? It was never stated, to the best of my knowledge.
6557. Do you think that the books kept at Hurstville were kept in the same way as you kept yours? I should think so.
6558. Then, if the sugar was consumed there, it would show a reduction for a great number of days? Yes.
6559. You know the men engaged there intimately? Yes.
6560. Do you wish the Commission to understand that, besides the Flemming the President asked you about, there is another Flemming a ganger? There are several men on the works who have the same names.
- 6561-2. Was there a Flemming drawing rations from you and giving you receipts? No one gave me receipts. I used to have tickets with a number on. The name was numbered. If he did not have a ticket I could not give the man his rations.
6563. Did you take the name of the man who had the rations? There were eight, nine, or ten men in a gang. I had the name of the ganger.
6564. If you issued all the rations you had a record? The record would be in the book.
6565. Which book? In my store-book.
6566. During the time you were at the National Park, Mr. Springall was residing close to you? Ten yards away.
6567. He would be chief store-keeper? Yes; I was only storeman at that time.
6568. Would you know the quantity of stores issued every day? Yes.
6569. You are quite certain that your system of book-keeping was perfect? Yes, very correct.
6570. If the number of stores issued did not tally with the number of men in each gang, that would be accounted for as giving one or two extra rations as required? Yes.
6571. Who knew how many rations were issued to each gang and the exact number that should be deducted? A man would have the ticket. I would ask him his name and number, and how many rations he required. He might say six or eight. I should put it down, on the date of the month, so many rations, the figures eight or ten or whatever it might be.
6572. Having made these issues, did you inform Mr. Springall of the number issued to the men? I would take in the book in the evening and perhaps read out the names of the men to whom they were issued. I would leave him the book and go out.
6573. Do you know Springall's daily clearance-book? Yes.
6574. The tabulated statement? Yes.
6575. Your figures should be the same as that tabulated statement? Yes.
6576. There should be no chance of a mistake? No chance of a mistake.
6577. Did Mr. Robertson interfere with your books in any way? He used to keep them when I was busy.
6578. Simply make entries? Yes, the amount of rations to each gang. I had nearly five thousand men there.
6579. You say the operation to make up the daily consumption was simple? Yes.
6580. It was simply copied from the daily record? Yes.
6581. You were in the camp on the Illawarra Road? Yes.
6582. Was there a camp on the Holt-Sutherland Estate? Yes.
6583. Did you issue the rations for the men there? Yes, and the Park as well.
6584. Did you keep the two amounts distinct? Yes.
6585. Would the number of rations you have issued to the estate represent nearly the number of men engaged there during the whole time? Yes.
6586. Do you know whether it was the practice to take rations in excess? Yes. Sometimes gangs with five men would take rations for eight.
6587. In fifty men, how many would draw extra rations? I do not know. Perhaps only one or two gangs. Some of the men were satisfied with their rations.
6588. Would it be only a small percentage? About 5 per cent. I should think.
6589. Making that deduction, we might say that the rations issued would show the total number of men employed there? Yes.
6590. Do you think the Commission can have your book? Yes; if I can get an order to that effect. I dare say it is still at the office at Hurstville. I can also let you have a book showing the amount of stuff received daily from Kidman.
6591. I suppose you knew most of the gentlemen interested in the work of the Holt-Sutherland Estate? Yes.
6592. Were they satisfied with the work you did? I never heard any complaints. Only on one occasion.
6593. Were there any people living on the estate? Yes. A man of the name of Wiggins. Another man whose name I forget.
6594. Do you know Mr. Murphy? Yes; I think so, but I have only seen him twice in my life.
6595. Were there any surveyors belonging to the estate to mark out the work there? Not to my knowledge.

6596. You had nothing to do with the works? No.
6597. You saw the members of the Board when they were there? Yes. They used always to come and examine the stores. Mr. Davies always asked me whether there were any complaints. If there were any I used to tell him.
6598. Did he take steps at once to rectify them? Yes.
6599. Did you see the other members? I saw them, but it was not often they came. I saw Mr. Hinchcliffe and Mr. Hibble.
6600. Mr. Wells and Mr. Houison? They never both came. I saw one at the National Park.
6601. You are sure your check on the rations would not admit of an error? I might have made a mistake in one issue; that was with reference to a ganger of the name of Edwards.
6602. Yours was the rough book; the record kept by Mr. Springall would be permanent? Yes.
6603. Did you ever check them? Only on one or two occasions when Mr. Springall read them out. If Springall found a mistake with my issue, he would ask me the reason of it.
6604. You think the figures in the rough book should correspond with the final entries by Mr. Springall? Yes.
6605. *Mr. Waller.*] What was the date when this sugar was sent away? I have no idea.
6606. Do you know of your own knowledge whether it was disposed of in the manner stated? Yes; I was the party who disposed of it.
6607. You are certain? Yes.
6608. All these stores? Yes.
6609. Was it about June, 1887? We only finished up the rice the other day. I should think it was about that time.
6610. Was there anything else that came through your hands? Sugar, rice, fish. Of course tea, sugar, butter, and bread came daily.
6611. Any tools? Yes, a quantity of axes, spades, mattocks, handles, and so on.
6612. All these things came to you? Yes, from M'Lean Bros. and Rigg's.
6613. Will your store-book show the number of ration tickets? Yes.
6614. How does your store-book refer to the rations and tickets? It shows the number of the gang, the name of the gang, and the amount of rations in front of each name.
6615. The work they are doing? No.
6616. Are the tickets numbered consecutively? Yes.
6617. Do you refer to them in the store-book? Yes.
6618. You can identify any rations by the tickets issued for them? Yes, in all cases, with the exception of the carters.
6619. What became of these tickets? I have a lot of them at my camp now. They are small tin tickets.
6620. What camp? Where I was staying up to Saturday.
6621. Have you not delivered them up now that you are out of the Board's employ? I have not been there since Saturday.
6622. Who is responsible for the tickets? I am.
6623. I should think you should let your responsibility cease? I have been unable to attend to the matter on account of the illness of my wife.
6624. Have you a family? Three children—one, seven; one, four; one, only twenty-six days.
6625. Where have you been living? In Pymont.
6626. Has your wife been living there? Yes.
6627. What wages did you say you had? Forty-nine shillings a week.
6628. And rations? I had to take the wages, less 7s. 7d. a week.
6629. What rations did you get? Fourteen the fortnight.
6630. What did they consist of? Tea, $\frac{3}{4}$ oz.; sugar, 4 oz.: potatoes, 1 lb.; bread, $1\frac{1}{2}$ lb.; meat, $1\frac{1}{2}$ lb.; salt and pepper.
6631. Per what? Per day.
6632. The price of that was what? One shilling and a penny per day.
6633. How much per week did you get in cash besides that? £2 1s. 5d.
6634. How were you paid? Fortnightly. Sometimes by cheque, sometimes in gold.
6635. Where did you get the money? At the office where I had my camp. The Illawarra Road camp. Mr. Davies paid us there.
6636. Mr. Davies personally? Mr. Hinchcliffe or Mr. Hibble sometimes.
6637. Mr. Davies was always there? Always.
6638. Did you receive the money personally? Yes.
6639. Who weighed your rations out? I gave them to the cook.
6640. Who weighed out yours? Only myself.
6641. You were the checker of your own rations? Yes.
6642. What rent did you pay for your own house? £1 3s.
6643. Did you save much money? None at all.
6644. Have you got a banking account? None at all. I am in want of work badly.
6645. Were you not able to save money? My wife has been ill all the time I have been away. I have a big account to pay to Dr. Muskett now.
6646. Do you know the gangers on the pay-sheet? Yes.
6647. Name a couple of the gangers? Adams, Taylor, Murphy, Morgan, Martin.
6648. Where were they working? At Sutherland.
6649. All of them? Yes.
6650. What class of work were they engaged in? Road-making.
6651. Quarrying? Yes.
6652. How many men of the name of Flemming were there? There may have been one or two, perhaps more.
6653. I do not want perhaps? I recollect there were two.
6654. What were their christian names? I do not recollect their christian names. I know one personally, the one working for Burrowes.
6655. Did you know the other man by sight? I cannot say.
6656. Can you tell me whether he was a dark or fair man? One was a dark man.
6657. Tall or short? I cannot tell you.

Mr. G. W. M.
Johnson.
4 April, 1889,

6658.

- Mr. G. W. M. Johnson.
4 April, 1889.
6658. Old or young? I cannot tell you.
6659. Still you know there were gangers of that name? Yes.
6660. Where were they working? At the Park.
6661. What site? The National Park.
6662. What dates? I cannot say.
6663. The year? Last year.
6664. During 1888? Yes.
6665. Previous to that? I cannot say.
6666. All throughout 1888? Yes.
6667. What opportunity had you to see them? Coming for their rations.
6668. Did they always come for their rations? The gangers always came.
6669. Did they come half the time or three-quarters of it? It might be all the time.
6670. Simultaneously with Flemming, the groom? I cannot say. I cannot give you a definite answer without having the book by me.
6671. Was Flemming the groom working as a ganger during 1888? Yes.
6672. If the other Flemmings were working during the same time they would be working simultaneously with each other? I should think they would.
6673. The gangers you say always came for the rations? Not always.
6674. When did they not come? Sometimes they might send up two of their men.
6675. As a rule they came? Yes.
6676. Daily? Yes.
6677. It would be fair to suppose they would come five days out of the six? Yes.
6678. How many gangs did you give rations to? To 180 gangs on one occasion when I had nearly 5,000 men there.
6679. You can remember a large number of the names? Yes.
6680. How many? I could remember sixty or seventy names out of the hundred.
6681. How many of them would you know if you met them in the street? Nearly every one I have seen come to the store.
6682. Do any of them owe you money? No.
6683. Yet you would know them? Yes.
6684. Then why is your memory such a blank regarding the two Flemmings? At that time I had so much of the work to do that I could not take notice of the people so much. How I came to know them is that on several occasions I was asked to come and see whether any of the men in the new gangs had been there before, and if they had to pick them out. That is why I can recollect them so well.
6685. How is it if you do not recollect these two men your memory would be good enough to recognise them? Because there were so many there in 1888.
6686. You say you know a large number? I dare say within the last six months sixty or seventy gangs are familiar to me.
6687. If you had two or three gangers each rejoicing in the name of Flemming, and you are so uncertain as to their appearance, how is it you can be certain you did not pay some men two or three times over? I had the tickets to go by. That was why the tickets were introduced.
6688. How could you identify these Flemmings? By their Christian names.
6689. What are their Christian names? James, one; F., the other.
6690. What is the third man's name? I did not know there was a third man.
6691. You cannot remember what the other Flemmings were like? I have not known them so long as I have known this Flemming.
6692. While he was working under Mr. Burrowes? Yes, working under Mr. Burrowes.
6693. When did the Flemmings leave you? I cannot say whether I have issued any rations to the Flemmings since I have been there or not. If I had my books I could easily see.
6694. Did these mysterious Flemmings ever sign their names? None ever signed their names with me only when I was a witness to the paying of their money.
6695. Were you ever a witness to the paying of money to Flemming? Never.
6696. How did you become acquainted with his handwriting? I have seen private letters to him.
6697. You were pretty intimate with him? Yes; he has slept in my tent.
6698. When did you see him last? Three or four months ago.
6699. Where does he live now? I have no idea.
6700. Do you know where Springall is living? Yes; I think they call it Walsh's Camp. He is building a large hotel at Coronulla Beach.
6701. Do you think Flemming is about that district? He may be. I do not know.
6702. If we have it in evidence that Flemming the groom never was a ganger over men quarrying and road-making, what should you say to your evidence that he was? To the best of my knowledge I believe he was a ganger.
6703. Why? Because I have seen him paying out the men.
6704. Have you seen him paying the wages of a gang? I have seen him come out with the money in his hands.
6705. You have seen him come out to pay the men? Just outside the place. Every man came to receive his own money, because sometimes the gangers ran away with the money. It was the rule for two of the men to come up and see the ganger paid.
6706. Then you had a whole army of men there? There were 5,000 or 6,000 men there sometimes. They were all there.
6707. They would all knock off working and come up? Yes.
6708. All came to the tent? Two with the ganger, that made three.
6709. You do not know what Flemming's gangs were doing? Odd work on the roads.
6710. How long were they doing it? A long while.
6711. Were they clearing? I do not think they were clearing. They were all old men.
6712. Did you know Flemming as a ganger? Yes; he was taken on to collect tools.
6713. He was not a ganger if he was collecting tools? That was not his only work.
6714. How long was he groom to Burrowes? From the time he came to Hurstville.
6715. How long? Four or six months.

Mr. G. W. M.
Johnson,
4 April, 1889.

6716. In what year? Last year.
 6717. Before that? Not before that.
 6718. When did your acquaintance commence with him? Shortly after he came to the Park.
 6719. Before he was a groom to Burrowes? Yes.
 6720. Whose supervision was he under besides Burrowes? Oh, some of the overseers. There are so many of them.
 6721. Did Flemming work himself, with the gangs? Yes. All the gangers worked.
 6722. If his name appears on the pay-sheets during the last four or six months in 1888 as a ganger, could he have been in the double position of working with his gang and acting as groom to Mr. Burrowes? No. Because, as a groom, he would have to be at Hurstville all the time.
 6723. Do you know a man of the name of Wren? Yes.
 6724. What was he? I only knew him as an English gentleman.
 6725. What was he? Book-keeper.
 6726. Whom was he responsible to? To me for the booking.
 6727. Can we see his handwriting? Yes; a good deal of it.
 6728. Did he weigh the stores out or you? I did always.
 6729. Who is Roberts? I cannot say. There are two Roberts; but I think one is Robertson.
 6730. Who is Roberts? A young chap who used to help men in the store as well. There were five in the store, four beside myself.
 6731. Give the names? Roberts, Richardson, Jones, Wren, and myself.
 6732. You never signed any carter's notes for goods delivered? No.
 6733. Did any of the other four? No.
 6734. Were there any regular returns kept and sent in to the head office, either weekly or monthly, of the number of men employed? Yes.
 6735. Regularly? Regularly.
 6736. We have not seen any? They were collected from me every month.
 6737. What information did they give? The number of the men employed and the names of the men on the ground.
 6738. What was the largest number you ever had at work? 5,000; and the smallest, thirty-seven men.
 6739. Give an average all through from the commencement to the finish? I should think there would be an average of 300 a day.
 6740. That would be 2,100 a week? Yes.
 6741. What became of these returns? I do not know.
 6742. Were they made out in a book? Mr. Springall gave me a lot of slips of paper to give to the gangers. We told them to bring the names of the gangers and all the men working under them, as the Board required to know how many men there were.
 6743. Who got the returns? They were given to me and I took them to Mr. Springall.
 6744. What became of them? I do not know.
 6745. Did you see them at the head office? No.
 6746. These extra stores you sent to Burrowes. How did you put them down in your book? I did not put them in the book at all.
 6747. Made no entry of them at all? No.
 6748. How can we find out how you gave the extra stores, and what quantity? I only sent what I was told to.
 6749. Who told you? Mr. Burrowes.
 6750. You passed them out of the stores without any record? Yes; I did not know the difference.
 6751. Did you ever send anything else to Burrowes in the same way? No.
 6752. How often have you sent extra supplies to Burrowes? Only once.
 6753. Suppose he said you never sent these extra stores, how could you prove you did? I have no proof; only I know I sent them.
 6754. If an inspector came and found that the stores were short, you could only say that you sent them to Mr. Burrowes? That is all.
 6755. Would not that be a peculiar position to be placed in? Being the first time I did not know I had no right to do it.
 6756. Did any one else make demand for extra stores? No one else.
 6757. Did it not seem strange to you that Burrowes should make the demand? He told me it would be all right.
 6758. Were they beyond his rations? I did not supply him with rations at all. It might be his supply for all I knew.
 6759. What did you give him during the two years? I only gave him two bags of sugar and a bag of rice.
 6760. No flour, no fish? He might have had some fish at the table. I never gave him any directly.
 6761. Did you give them to any one in the camp? I gave them to the cook.
 6762. These were extra—not charged for? They were not entered in my book.
 6763. What was the date? I have no idea.
 6764. What was the year? It was 1888.
 6765. Clearly? Clearly.
 6766. In the first quarter of the year? I should think it would be.
 6767. Between January and April? Perhaps.
 6768. Is your memory no clearer now about these other Flemmings? My memory is no clearer about them. If they came in and spoke to me I might know them.
 6769. How often would you issue rations to them? Every day.
 6770. How long? As long as they were on the list.
 6771. How long? I cannot say.
 6772. Six months? I cannot say.
 6773. How often would you see them—a hundred or a hundred and fifty times? I should think so.
 6774. And yet not know whether they were dark or fair? No. I might know the man if I met him in the street and he spoke to me. I have seen nearly every man in his turn when he came for rations.
 6775. *President.*] Do you know Springall well? Yes.
 6776. Are you on good terms? Friendly terms; never nothing else.
 6777. Always? He always treated me well.

- Mr. G. W. M. Johnson:
4 April, 1889.
6778. Do you know whether he ever received any money from the men? Not to my knowledge.
6779. Do you know that he received money in large amounts from the men? Not that I know of.
6780. Did you ever hear of his giving notice to the men about their paying money to him? I have known him have a notice that if any man wanted to have money deposited in a bank he would deposit it for him and would give a receipt for it.
6781. Do you know whether he received money in that way? I have never known it. Several men came to the store and said they lost money out of their tent, and they would like Springall to mind it for them. I said I would tell Springall about it. I told him, and he said he would keep any money they wanted to save up. He would save it for them.
6782. Did you know Flemming well at that time? Yes.
6783. Do you know whether Flemming gave him any money? I do not.
6784. You never heard anything about it? Never.
6785. Was everything perfectly straightforward whilst you were there? Yes.
6786. Perfectly straight? Yes; the whole time I was there.
6787. Are you on good terms with Mr. Burrowes? Yes.
6788. Do you know Mr. Larnach? Only for a short time.
6789. Had you ever any differences with him? Yes, with Larnach.
6790. What about? On one occasion he sent up a note to know how it was I was 148 rations short, and wanted to know what became of them.
6791. What did become of them? I was never short at all. During the fortnight I had received 146 more than I had issued, and he asked me for an explanation as to what became of them, and where they were.
6792. Was he your superior officer? Yes.
6793. Did you give him the information? Yes.
6794. Were there any other complaints made against you? That is the only complaint.
6795. Was there any complaint about irregularity? No; I was never absent at all.
6796. I am not speaking of yourself, but whether you are aware of any irregularity? No.
6797. In whose service were you previously? With D. and W. Robertson, iron merchants.
6798. How long were you there? Four years and seven months.
6799. When did you leave there? I left on account of slack work.
6800. Were you discharged? They said some of us would have to take a holiday until work got brisk. I took a holiday and never got back.
6801. Suppose there is an amount deducted on a pay of £4 11s. for a fortnight, how many rations would that represent? About eighty-four rations.
6802. How many men would that be? Seven men.
6803. How long is it since you paid Flemming the groom? I never paid him at all.
6804. Since you issued him rations? I dare say it is over six months since I issued any rations to Flemming.
6805. What sheet shall we find his name in? In the National Park sheet, or you may find him in the gang of John Baker.
6806. He may not be on the sheet at all? He may not.
6807. Where is Baker? He was at the Park until the other day.
6808. What is he? He is working in a gang.
6809. And he was at work at the National Park until lately? Yes.

Alfred Hibble called in, sworn, and examined:—

- Mr. A. Hibble.
4 April, 1889.
6810. *President.*] What are you? A clerk.
6811. Were you in the employment of the Casual Labour Board? Yes.
6812. What position did you occupy? Just simply a clerk in the office.
6813. Were you first clerk, or what? Well, I was second in command, under Mr. Hinchcliffe.
6814. Who appointed you? The Board.
6815. Do you recollect when? About June, 1887.
6816. What had you been before that? I was in business for myself before that.
6817. What business? It was a hay and corn business—agency and produce.
6818. Why did you give up that business? I went broke on it because it did not pay.
6819. When appointed were you out of employment? Yes; I had no occupation.
6820. Did you make any application, or how did they become aware of you? I applied for it.
6821. How did you become aware there was a vacancy? Mr. Foster told me he believed there would be a vacancy, and told me to apply for it. He recommended me to Mr. Davies. It was on his recommendation that I got the post.
6822. What was the salary? £3 a week,
6823. All through? 6s. a day and 6s. a night.
6824. Was your salary the same right through your employment from June, 1887, up to the present time? My actual salary was.
6825. What did it begin with? 6s. a day.
6826. How was it increased? By these allowances. That was why I took it. I had special allowances,
6827. What were they? Seeing the men off every night at the railway station. I had full charge of looking after them by the railway. If that were done after 6 o'clock at night, I had a special allowance for it.
6828. These special allowances did not come every day? Almost every day in the week.
6829. When did you get paid? Every week.
6830. Who paid you? Mr. Hinchcliffe.
6831. How? By cash. On two or three occasions I have had a cheque.
6832. He paid you out of the petty cash? Out of his cash account.
6833. Will you tell us what your duties were in the office? When I went there I had to make out a statistical return for Parliament of all the unemployed—where they came from, how they were dealt with, and everything. That took me about three months. I was partly appointed for the purpose of making this out. When I got that finished I used to register the men as they came in. Mr. Josephson was supposed to do it, but I was always there to do the best part of it. I made out the returns and sent them away to the different works. After that I was moved upstairs. That was about September, 1887. I took charge of the books, and I ordered nearly everything that was required. If any tools were wanted, I would make out the order if I should be in the office.

6834. Anything else? No. Those have been my duties down to the present day. That is what I am Mr. A. Hibble doing now. The correspondence I always did.
6835. Who would be sitting in the room with you? Larnach, Hinchcliffe, and Mr. Davies, and the other 4 April. 1889. members of the Board when they came in.
6836. Did you consider yourself the accountant of the establishment? No; Mr. Hinchcliffé was. I had nothing to do with the cash.
6837. Who kept the books? I kept the books from the time I went upstairs.
6838. Do you know this book? Yes.
6839. What is it? The rough cash-book. It was kept there before I made a copy of it.
6840. In whose handwriting is this one? In Mr. Hinchcliffe's, and some of it my own.
6841. Do you know what became of the rough cash-book? Mr. Miles had it. I handed it over to him.
6842. Can you tell us up to what date the rough cash-book went? Up to the end of last year.
6843. What year? The year 1888; I do not think there were any entries after that.
6844. Can you tell us about the time you copied it? I can from the old book.
6845. Can you tell us approximately? It was about September or October, 1887.
6846. Not last year? It was a month after I started upstairs. I wrote it up. You can see where I struck a balance.
6847. Did you have much time there? No; I was kept always on the push. If I had not one duty to perform I had another—checking pay-sheets or making out something.
6848. Did you still go on using the other book? Yes.
6849. Did you use the rough cash-book up to the other day? Yes, up to the end of last year.
6850. Who made entries in the rough one? In September, 1887, or afterwards, I did.
6851. Where did you get the particulars from? From the cheque-book. When Mr. Hinchcliffe paid vouchers he would hand them over.
6852. When did you post up from the rough cash-book to this one? I kept them always going.
6853. Regularly? Pretty regularly.
6854. You were never in arrears? I was at the time Mr. Walker's Select Committee was on.
6855. How many months in arrear? From September to December.
6856. Three months? Three months.
6857. Was that the largest arrear you had? The largest I ever had. I always kept it up afterwards.
6858. Are all the entries in this cash-book taken out of the rough cash-book? No, they are not.
6859. What is there that is not in the rough cash-book? The accounts paid to the bank by the Chairman are taken out of the bank-book.
6860. Give me an instance? These credits would not appear in the rough cash-book.
6861. Where did you get the credits from? From the vouchers from the Treasury.
6862. Did you get all the credits from the Treasury? No; some of these credits are payments by cheque. When the Board first started several refunds came back.
6863. Were other credits from the bank-book? There is one—"Davies, June 7, £38 4s. 2d."; that comes out of the bank-book.
6864. Did you have any knowledge of that before you saw the bank-book? No.
6865. Would you make any inquiry? I would ask what it was for.
6866. Can you tell me what it was for? Some for firewood and some for sleepers.
6867. Where are the accounts? I never saw them. I knew they came from a man named Neale, an auctioneer, who sold the firewood.
6868. Did he pay you the money? No.
6869. Did you receive the money on behalf of the Board? Not from Neale. Mr. Hinchcliffe handed me £20 one day, which he had received on account of M. Roberts bridge at Ryde.
6870. Is that the only money you have received? That is the only money I have received.
6871. When you saw the bank pass-book with these credits in, did you make any inquiry what they were for? I asked, in the first instance, why they appeared in the bank-book, and pointed out that it was irregular, and that any money received for the Government must be paid into the Treasury.
6872. How did you know that? I knew that that was the rule.
6873. Did you know it then? Yes.
6874. I notice other items of the same character. Is this £38 4s. 2d. put down as John Davies copied from the bank-book? Yes.
6875. Does it appear as "John Davies"? Yes; you will find them all there.
6876. Were you examined before the Select Committee? No.
6877. Is there any petty-cash book kept? No book whatever. This book and the old one are the only ones kept.
6878. There are no entries for petty cash here? Yes, here is one, "May 11, petty cash £3."
6879. Then the inner column is the petty-cash column;—where did you get the numbers from? From Mr. Hinchcliffe, from the vouchers.
6880. Are there vouchers in existence? Yes.
6881. For all the petty cash? For everything in that book.
6882. Then Mr. Hinchcliffe had charge of it? Certainly.
6883. Are you and Mr. Hinchcliffe on good terms? We are friendly. We are not bad friends, and not thick friends. I never see him outside the office.
6884. Do you know who would make these petty-cash payments? We all made them.
6885. If you wanted money? We must get it from Mr. Hinchcliffe.
6886. If you wanted to make a payment, and had no cash, how did you set to work to get it? We could not make it until the contingent voucher came in.
6887. No matter how small. Suppose you took a cab? I would go to Mr. Hinchcliffe and tell him I wanted half-a-crown, and he would give it me; but I never got more than 2s. 6d. all the time I was there.
6888. He had charge? Yes; he was a Government official to take charge of the money.
6889. You had nothing to do with it? Nothing whatever.
6890. When did you see Mr. Davies last? Yesterday morning.
6891. Have you seen him frequently lately? Sometimes when he has come down to see Mr. Larnach; Larnach owes him some money, and he came to get it nearly every fortnight. 6892.

- Mr. A. Hibble.
4 April, 1889.
6892. How much? About a £1, I think. Larnach paid him 12s. 6d., and said he would see him at the devil before he got the rest.
6893. Did you owe him any money? No.
6894. On these occasions that you met him, did he talk to you at all? No.
6895. Did he ask you anything about the Casual Labour Board? No; I would not have spoken to him about that.
6896. He said nothing to you about being examined before this Commission? He asked me whether I had been examined. I told him no, I had not been examined yet.
6897. What did he remark on that? Nothing at all.
6898. Was that the only occasion he spoke of the matter? No; he asked me whether Mason had been examined; that was on the day he asked Larnach also.
6899. Have you any feeling towards him? No feeling excepting that we are friends.
6900. Very good friends? He has been a good friend to me.
6901. No ill-feeling? I never had any occasion to have any ill-feeling.
6902. Did you always work in harmony with the other officers? Always.
6903. With the Chairman and the other members? I do not think I ever had a cross word with anybody in the whole employ.
6904. No complaint was made of you? None; that I can faithfully say.
6905. Did you have anything to do with the ordering of plant? I used to order pretty well everything.
6906. Did you keep the order-books? Yes; but they were always open. Anyone might write an order out.
6907. Were the orders usually in your handwriting? Nearly all of them.
6908. What course was adopted when plant was wanted? They sent in a requisition from the National Park, or wherever it might be, to the Chairman of the Board; or if there was not a requisition, Mr. Oxley or Mr. Burrowes, or a superintendent, might be in the office and ask to have such a thing, and Mr. Davies would ask me to order it; or one of the members of the Board visiting the work would see that they wanted so and so for the works, and send it out.
6909. Would you fill up an order? In most cases.
6910. They were written orders? Yes.
6911. If they were not written at the time? We would give them afterwards.
6912. When was any order given that was not written? None were given that I know of.
6913. The practice was to have everything in writing? Yes; the orders were returned and invoiced as they came back.
6914. Who signed them? The Chairman; but Mr. Hinchcliffe signed some of them.
6915. Who generally took them out? I took some; Mr. Larnach and the messenger. I suppose I took seven-tenths of the whole.
6916. Did the members of the Board ever take them? Mr. Davies did.
6917. Frequently? Yes.
6918. Where to? M'Lean Bros. and Rigg's and Harwood's, for tools.
6919. After the orders for issue went out of the office, did the office have any intimation they were complied with? The only intimation was when the vouchers came down certified to by the superintendent. He put his signature to it that he had received the goods.
6920. Was that the first intimation you had of the receipt of the goods? In most cases.
6921. Did the head office communicate with any of the districts that goods had been sent out? On some occasions.
6922. Did they generally? Not generally.
6923. Can you tell me what knowledge the superintendent in charge of any district would have that goods were going out to him, and the amount of goods? They would order them themselves; if not by letter, verbally in the office, and they knew that the goods would come out at once.
6924. Would they wait at the station day after day until they arrived? No; the storekeeper would look out for them.
6925. The head office did not send any letter or communication that goods had been sent? Not on every occasion.
6926. The first intimation you had was the receipt of some contingent voucher from the person who supplied the goods? That was the first thing we knew of the delivery of goods ordered from M'Lean Bros. and Rigg. They sent in the order for the goods with the voucher attached to it.
6927. That was the first intimation that the goods were sent? Yes.
6928. Was the order attached in every case? In all cases.
6929. How came it the original order was attached;—did they part with the order they had received? I believe there is some rule they must do so.
6930. When the voucher came back with the order attached to it, what was done? It was sent out to the superintendent to get him to sign it if he received the goods.
6931. What was then done? He signed it, certified to it, and then the voucher came back to the office for payment.
6932. Then you paid? Well, the amounts would be computed.
6933. Were they seen by anybody else? By the Chairman.
6934. Did you have anything to do with them? I would compute the amounts, or sometimes hand them to Mr. Larnach.
6935. What did you do? Just see that there was no mistake in the amounts charged. There would be a dozen so and so at such a price. We would just see that it was correct.
- 6936-7. Had you charge of the order-book? Not exactly charge. It was not under my direct control.
6938. When the voucher came back signed by the superintendent all you did was to check the computation? Yes.
6939. Did your responsibility stop there? I only checked the amounts.
6940. The figures were not many? No; very few.
6941. Did you initial the vouchers? Yes.
6942. And what did your initials cover? Just the computation.

6943.

Mr.
A. Hibble,
4 April, 1889,

6943. Who instructed you as to what you were to do with them? Mr. Hinchcliffe gave them to me to compute.
6944. What were your instructions? To check them and see that the calculations were correct.
6945. Did you ever satisfy yourself as to whether the orders were correct? In some instances.
6946. How many instances? Sometimes I would not see the vouchers at all.
6947. In how many instances did you consider it your duty to see that the vouchers were correct with the orders? Very few; one out of a dozen orders.
6948. You then went beyond your instructions? It would only be done in the routine of business. They ought all to have been done that way.
6949. Were your instructions then limited to checking the computations? Yes.
6950. But in some cases you went on to examine them with the orders? Yes.
6951. And there you went beyond your instructions? In that respect I did.
6952. Did you consider yourself responsible for the correctness of the orders? No.
6953. Then why did you examine them in these few instances? In one instance in particular I found the order-book had been altered.
6954. Then your duties were not confined simply to looking at the figures if you took that on yourself? I did not say that I did. I look at it that my responsibility ended when the goods were certified to by the superintendent.
6955. Did the voucher go out of the office at once? Yes.
6956. Did you do what you did before it went out of the office in the first instance? Once or twice.
6957. Did you ever compare these orders with the butt of the books? Once or twice only.
6958. Why did you do it then? Because we ordered a lot of goods to be sent to a certain place, and afterwards we found we had a lot of the same things in stock and struck them out.
6959. When were these vouchers submitted to the Chairman for signature? After being signed by the superintendent they would remain until paid.
6960. When did the Chairman sign? Not until they were ready to go to the Treasury.
6961. Did he sign them before or after they were paid? I cannot tell you as to all instances, because I had nothing to do with the paying. I believe myself that he signed after they were paid.
6962. Then at the time they were paid the only names that appeared on them would be the superintendents, the person who claimed payment, and your initials? Yes.
6963. But not the Chairman's? As I said, I cannot tell you, because after I checked them I might never see them again.
6964. Why do you say you believed they were not signed by him until after payment? Because when we made up the money to square off the advances I have seen the Chairman sign them.
6965. Do you know whether Mr. Davies was aware that all you did was to check the computations? I believe he was.
6966. Was he present in the room when Mr. Hinchcliffe instructed you to take up that as part of your duties? I cannot say, but he knew I did it.
6967. Did he know that your initials only certified as to the correctness of the figures? Yes, because I have spoken to him on the matter.
6968. What did you say? On one occasion I initialled something that Burrowes had signed for, and the voucher turned out to be wrong. The parties came in about it. I was asked by Mr. Davies whether I initialled it. I said, "Burrowes signed for the receipt of the goods, and I initialled for the computations only."
6969. Can you tell me the date of that? It was some time ago.
6970. Would it be many months after your employment there, or only a few months ago? It would be fully twelve months ago.
6971. From that you consider that Mr. Davies was perfectly aware that your initials only covered the computations of the figures? Yes. I explained to Mr. Davies that I initialled the pay-sheets in the same way.
6972. Then I may take it that your initials did not show that the articles had been ordered or that they had been sent in? No.
6973. Did the Chairman know that? Yes.
6974. Are you aware whether anybody compared the vouchers with the butts you had in the office? No.
6975. That would have been the proper check? I believe Mr. Larnach did it on several occasions; but that was before I had anything to do with the order-book, and when Mr. Lanarch had full charge of it.
6976. You do not think anyone in the office compared the vouchers with the butts of the order-book? I do not think so.
6977. When an adjustment for an advance of £6,000 was sent in to the Government, who had the compiling of the vouchers to make up the advance? Larnach.
6978. Did you? Not until Larnach left the office.
6979. How long ago was that? The 1st January this year. Before that it was out of my province altogether.
6980. How many did you make up after 1st January last? We always make up the exact amount of £6,000.
6981. How did you manage it? We got the numbers, wrote down the amounts, and then added them up. If it was short, we added to them, and if too much, took them away, until it came to what we wanted.
6982. Suppose when you added them up you found you had vouchers for £6,001 19s. 9d.? If we had any more vouchers in the office, we would see whether there were a couple or three smaller ones which would make up the exact money. If not, the matter would stand over until the vouchers came in. We always had some £2,000 to work upon. I know one instance where we had nearly two £6,000 advances to work on at the same time.
6983. Then I suppose if you added up the vouchers and they came to an amount in excess of £6,000 there would be some manipulation? If we could not make up the money, we let the matter stand over. We were never tied to time.
6984. Were you present in the room when Laranch made up these adjustment of advance returns? Almost always.
6985. Did he speak to you about them? Yes; he used to think it a wonderful piece of work when he had managed it.

6986.

Mr.
A. Hibble.
4 April, 1889.

6986. How long did it take him? I have seen it take him a week; but I have got it out in an hour or so.
6987. There are some forty batches of £6,000, and in every case there is the exact amount of vouchers to make up the £6,000? Yes, it was not as if we had only one £6,000 at the bank. We were always in advance.
6988. You had no trouble in the matter? No.
6989. But Larnach has taken a week? Yes.
6990. Have you ever heard him ask for vouchers to make up the amount? Yes; I have heard him ask Hinchcliffe to make up the vouchers out of his books.
6991. Do you know of any mistake? Only one. A cheque of £6 17s. 6d., but it was only £6 7s. 6d. It was entered down, copied, and passed into the Treasury. They did not find it out until it got to the Audit Office. It had to be squared up afterwards.
6992. Are these documents you used to make up called recapitulations of vouchers? Yes.
6993. Was this particularly Larnach's duty? It was about all he had to do.
6994. Had Mr. Hinchcliffe anything to do with it? After Larnach made it up in the rough Mr. Hinchcliffe copied it.
6995. Were you and Larnach on good terms? I never had any word with him in my life.
6996. On these occasions when Mr. Larnach used to take some considerable time to make up the returns, can you say whether he asked frequently to be furnished with vouchers to make up the amount? No.
6997. Do you know why he took such a long time? Because he would be fogging half his time to get them right.
6998. Who sent the account to the Auditor-General? The responsible head of the department.
6999. Mr. Davies? No; Mr. Hinchcliffe had to deliver them.
7000. Had Mr. Hinchcliffe anything to do with the accounts except the petty cash? Yes. Not with the cash-book.
7001. Did he examine it? I believe he did.
7002. Did Mr. Davies examine it? I do not think he could have done so if he had tried. I do not think he was well enough up in figures.
7003. When Mr. Hinchcliffe wanted money for petty cash, do you know how he arrived at the amount he wanted? Only by his books.
7004. Did he ever compare his petty cash with your book? Never to my knowledge.
7005. Did he keep a petty cash-book? Never to my knowledge.
7006. Or any memorandum of any kind? He had a rough diary of petty expenses.
7007. Who kept the ledger? I did.
7008. Who made out the cheques? Mr. Hinchcliffe.
7009. Always? No; on one occasion when he was in Melbourne I made them out.
7010. Do you know what was the largest amount of petty cash in the office at any one time? Whatever the largest cheque is drawn for. The largest one £150, but you could not call it a petty cash cheque. It was drawn at Centennial time to make payments, but it did not remain in the office more than two days.
7011. Was that the largest? Yes.
7012. What were the others? £100, £75, £25.
7013. Mr. Hinchcliffe says from £50 to £100? It never exceeded £100, excepting on that one occasion, as far as I know.
7014. I think he stated in his evidence that he never had in hand as petty cash more than £100;—would that be about correct? No; he must be wrong, as the book shows different to that. He must be a lot out there.
7015. Look at page 80 of this cash-book [*Exhibit E 8*]; what is the balance to the credit of petty-cash there? £390 18s. 3d.
7016. On what date? On July 27th.
7017. What is the entry on the debit side of the cash-book? The other side shows a cheque obtained for petty cash £100.
7018. According to this book then on the date that petty-cash cheque for £100 was obtained there should be £390 18s. 3d. of petty cash in hand? Yes.
7019. Can you understand that? Mr. Hinchcliffe should have had that money in his box.
7020. This showed then that there was £490 18s. 3d. in hand? Yes.
7021. Is not that an extraordinary thing? Yes, it is; but it was no business of mine.
7022. Did you know of it? I did.
7023. Did you not consider it part of your duty to mention it to him in the interests of your employers? I could never tell what vouchers he had in his possession. I did not know but that he had vouchers for all that money.
7024. It does not require a skilled accountant to see that it was a strange thing that £100 should be drawn for petty cash when there was £390 18s. 3d. in hand? He might give me £200 of vouchers to enter up.
7025. Is it not irregular on the face of it? Yes.
7026. Has your attention been called to it? Yes.
7027. By whom? By Larnach.
7028. During the time this was going on? Yes.
7029. How long ago is it since Larnach drew your attention to it? I cannot say; about six or seven months ago I should think.
7030. I have just taken one instance; I have no doubt there are many others, where large cheques were drawn for petty cash, when the book showed already a large credit to petty cash. Were you aware of that? No, because I could not tell how the vouchers stood. In one instance I spoke to Mr. Hinchcliffe on the matter.
7031. What was the balance in hand then? I believe, from £250 to £300. He told me himself.
- 7031½. Of the office money? Yes, and he said he was that much out of pocket by being Secretary in charge of the cash.
7032. How? He said he had paid vouchers which had been sent up to the Park and never returned.
7033. When did he tell you that? At the beginning of the year. 7034.

NOTE (on revision):—Q. 7002.—For “I,” &c. to “tried,” read “it was not in his province to do so.” Add “and certainly he was not the accountant.” Q. 7014.—Add “taking his vouchers into consideration.” Q. 7025.—Add “not entering up the vouchers at once.”

Mr.
A. Hibble.
4 April, 1889.

7034. Of this year? Yes.
7035. Did you ever hear of him being short in his cash before? He never told me he was short.
7036. Was he to your knowledge? According to the books I knew he must be short.
7037. You knew he was? I could not swear he was.
7038. Were you not responsible for the books? Yes.
7039. To Mr. Davies, your superior officer? Yes.
7040. Was it not your duty when you noticed what appeared to be a grave irregularity to call Mr. Davies' attention to it? It looked like an irregularity, but I could never tell what vouchers Mr. Hinchcliffe had in hand.
7041. Did you not see the danger you were running—when it might be said you and somebody else were in league? It never appeared to me like that before.
7042. It never appeared to you in that light? It never did.
7043. Were you much with Mr. Hinchcliffe? Never outside the office.
7044. Is he a married man? Yes.
7045. Were you ever at his house? Only once.
7046. Did you ever hear of his borrowing money? Never.
7047. Did he ever borrow any money from you? No.
7048. Do you know how he made up the amount he was short in his cash? He told me he went to his bank and drew it.
7049. What is his bank? The London Chartered Bank of Australia, Oxford-street Branch.
7050. Do you know Mr. Burrowes? I do.
7051. How did he and you get on together? I always thought he and I were friends until I found out differently lately.
7052. When was that? Since the beginning of the year. Since he and Larnach got together.
7053. How did you come to think that the relations between you were different? Because I heard of some remarks he passed about me.
7054. What was that? He passed a remark to someone else and I heard it from them. The reference was to several things of a private nature.
7055. Unpleasant matters? Yes. From that time I have not spoken two words to him.
7056. Up to that time? We were friendly.
7057. Can you recollect about what time it was when this change took place? It was the new year.
7058. What was the month or date of the month? It was about the first week in January.
7059. Since that day has the relation between you been much strained? Yes, very strained.
7060. Are you aware of any irregularities that Mr. Burrowes has committed? I know of a good many.
7061. In what way? I look upon him as a most untrustworthy person.
7062. I do not want your opinion. I want to know whether you were aware of any irregularities? I knew that he borrowed money off the officers on the works, even the ordinary workmen or day labourers; that he never repaid them, and that the men ran after him, and could not get the money from him.
7063. Anything else? I know of the instance of a man named Rutherford. He borrowed £16 or £17. He promised him that he should have a contract.
7064. Anything else? He did an exactly similar thing with a publican at Liverpool, and I know of one glaring instance at Woronora River.
7065. A professional irregularity? He certified to certain work being done which I do not believe was done.
7066. Have you anything else against him? Nothing else that I know of.
7067. Do not hesitate to tell us everything you know. We are here to elicit the truth in the matter? I know of one instance of his giving a fraudulent cheque, and of there being a warrant to arrest him. It was only through Mr. Davies that he got out of it.
7068. What was that? We were going to the instalment of Lord Carrington together. I could not go because I had no dress-clothes. He passed the same remark. He went to a tailor and got a new suit, and gave him a cheque. This cheque was worthless, and the tailor came after him.
7069. Who was the tailor? A tailor named Jones. He passed it on to Price. It was Price that came after Burrowes. It was only through the interference of Mr. Davies that he was not arrested.
7070. Do you say that a warrant was issued? To the best of my belief there was.
7071. Are you and he Freemasons? Yes.
7072. Do Masons generally speak of their brother-masons like this without just cause? Not without just cause.
7073. If he has spoken of you much after the same manner that you have spoken of him, which of the two masons are we to believe? I do not know. He has spoken of me in a worse way than I have spoken of him. I only speak the truth.
7074. What was the date of the first complaints you heard against Burrowes? The first complaint was from the man Rutherford, shortly before Christmas.
7075. Up to Christmas last you had the highest opinion of Burrowes, and had not noticed any irregularities on his part? I had a good opinion of him privately, but not as to his work.
7076. Not being a surveyor, you cannot give us your opinion as to that? I am only speaking as to his neglect of work.
7077. From December last then these complaints came in. Have you bestirred yourself to look after them? No; I would not walk across the road to inquire about them.
7078. Did the complaints come to the office? People have told me.
7079. Did you invite them in any way to tell you? I never invited anybody to express an opinion.
7080. Do you know anything about the expenses Burrowes used to draw? I know he used to draw very heavy expenses.
7081. What would they come to? Sometimes £4 a fortnight; sometimes £6.
7082. Was your attention particularly called to them? Mr. Davies was always calling attention to the matter, and asking what he did. His excuse was, that if he was not allowed to travel he could not look after the works.
7083. Have you made any statement to the late Colonial Secretary recently? Yes; he asked me about some things that were ordered.
7084. Where? In the Colonial Secretary's room.
7085. On any other occasion? I have never seen him before or after.

7086.

NOTES (on revision):—Q. 7036—Add "unless he had vouchers." Q. 7068—Omit "because I had no dress clothes. He passed the same remark."

Mr.
A. Hibble.
April, 1889.

7086. Was your statement a verbal or written one? Verbal.
7087. What was it about? About two hamper-baskets that were bought.
7088. Do you know Larnach very well? I know him by working with him.
7089. Have you had any unpleasantness with him? Never a word. I never had any unpleasantness with him, because I was never friendly with him.
7090. Did he do his work properly? He had very little to do. Hardly anything at all.
7091. Was any complaint made of him that you are aware of? Mr. Hinchcliffe complained to me on many occasions, and he was reported for being drunk. The general report also came in that he would never pay, and that he used to borrow money from the men.
7092. How often did he go out to pay the men? About once a week.
7093. Did he continue to go after the complaints were made? Mr. Davies cautioned him and said he must not do it; but he answered, "Oh, I shall be all right."
7094. Did you ever see him the worse for liquor? Yes; I have had to pay for a cab to take him home, and he did not pay me back again.
7095. Did you often see him the worse for drink? No; he could stand a lot of it.
7096. Did he ever appear at the office the worse for liquor? One day he was dead drunk, and I got a cab and sent him off home.
7097. Did the Chairman or any member of the Board know it? Mr. Wells knew it. I do not think Mr. Davies did.
7098. Were you ever out making pays? Oh, yes; I used to go out somewhere every week and make the pays.
7099. Who went with you? William Cheney, one of the constables. Sometimes no one at all.
7100. What amounts did you pay away? Sometimes very small amounts. I should say from £50 to £800.
7101. How many times have you been out to make the pays? I can hardly tell you. Hundreds of times.
7102. Did you often go by yourself? Very often.
7103. Did you ever go with Mr. Houison? Once to Hornsby.
7104. With Mr. Wells? Never.
7105. With Mr. Hinchcliffe? Yes.
7106. How often? I would go part of the road with him sometimes. He would branch off one way and I would go the other.
7107. Did you ever go with Mr. Davies? Yes.
7108. How often? Plenty of times.
7109. Was it exceptional or otherwise that Mr. Davies went? He always went.
7110. Would he always go with you? He would go to Narrabeen or the National Park; those were the largest pays. Perhaps I would go to the small ones.
7111. Did the staff in the head office work harmoniously. Yourself, Hinchcliffe, Larnach, and Josephson, did you always pull together? Yes; we never had any wrangling.
7112. In fact, up to recently, was there excellent harmony prevailing? I could not say that there was.
7113. Jokes used to be passed? Oh, yes; we had jokes.
7114. You used to talk of the Chairman as "John"? I never did.
7115. I do not mean when he was present? I have heard others do it; Larnach used to call Mr. Hinchcliffe "Tom."
7116. I merely mention this to learn whether everything was going on very nicely. Joke-cracking and harmony prevailing amongst the staff up to December? Yes.
7117. But all of a sudden each has turned round on the other? I do not think that.
7118. Has not everyone something to say against the other? I do not think so.
7119. Have you not something to say against Burrowes? I have said what I know.
7120. And against Larnach? Yes.
7121. And have not Burrowes and Larnach spoken against you? Yes. But Larnach was never in that "little party." There were Hinchcliffe, Cheney, Tindall, and myself. Larnach was never associated with us in that respect.
7122. Was Burrowes a popular man whilst you were on good terms with him? Some of them did not agree with him.
7123. Who did not? I do not think Mr. Wells or Mr. Houison had a good opinion of him.
7124. Who else? Well, Mr. Davies had not during the last nine months.
7125. How do you know? I am speaking as to the carrying out of his work. Mr. Davies was continually writing to him, complaining that he was not carrying his work out satisfactorily.
7126. That was during the last nine months? Yes.
7127. Did you ever hear of Burrowes being threatened with dismissal? Yes.
7128. Why was he not dismissed? I believe Mr. Davies took compassion on his wife and family, that is as far as I can see.
7129. Do you know whether Mr. Davies had any illfeeling towards Mr. Burrowes? I do not think so from what I have seen of them together.
7130. Do you mean from what you have seen of them in the office? Yes; I have seen them hundreds of times.
7131. Did they seem friendly? Yes.
7132. Did you hear Mr. Davies speak familiarly to Burrowes? Never too familiarly. I have heard him give him a good slating. I have heard him tell him that he would not believe his oath on all the bibles in Sydney.
7133. When was this? When he found him out in deliberate lies he was telling last November. It was about the inspection of the Woronora Road. He found out that Burrowes had misled him altogether on the matter, and he wrote a sharp letter to him.
7134. About these items in the cash-book receipts in the name of Mr. Davies. Did you ever see the account sales? No.
7135. Or the cheques from Neale? No.
7136. Did you ever hear anything of them? No.
7137. Who got the cheques? Mr. Davies, I believe.
7138. Did you see them? No.
7139. Did Mr. Davies tell you he kept them? Yes; I asked him, and he told me he had received the money.

7140.

7140. When was that? Mr. Hinchcliffe joined in the conversation. He said to Mr. Davies, "You must exonerate me from this." The Chairman said yes, he would exonerate him from it.
7141. Were you present? Yes; I asked for instructions about them.
7142. Did you ask to be exonerated? No. It was Mr. Hinchcliffe who asked to be exonerated.
7143. What had Mr. Hinchcliffe to do with it? He did not want to take the responsibility.
7144. What was Mr. Hinchcliffe? Secretary of the Casual Labour Board.
7145. Anything else? And Paymaster; I simply made the books up for him.
7146. Who used to arrange for the payment of the accounts? Mr. Hinchcliffe would draw out the cheque.
7147. Were they signed at any regular time? At no regular date. They were made up at any time.
7148. Then when the accounts came in for consideration what did they go through? Mr. Hinchcliffe would have possession of them. Sometimes the cheques were drawn out and sent to the people.
7149. Do you recollect whether, when the Casual Labour Board ceased to exist, and Messrs. Mason and Miles came into office, there were any outstanding accounts? Yes, a lot of them.
7150. What was done with them? Mr. Hinchcliffe handed them to Mr. Miles.
7151. Can you identify any of these accounts? If I had anything to do with them I could.
7152. Look at this account [*Exhibit E 4*];—do you recollect it? I see my initials on it. I must have initialled it.
7153. What do those initials mean? Just that the computation is correct.
7154. Has that account been paid? No; it is not receipted yet.
7155. Was it usual for Mr. Davies to sign the accounts before they were paid? That, as I have explained, I cannot say.
7156. Did you not say it was the rule for him to sign them afterwards? I did.
7157. Did you take any pains to see whether this account was correct or not? No further than to see whether the computation was correct.
7158. Did you look at the order-book? Not that I am aware of.
7159. Look at this contingent voucher [*Exhibit E 5*];—did you ever see that before? It has my writing on it.
7160. Is it signed by the Chairman? Yes.
7161. Do you know anything of it beyond that you checked the figures? I then gave it back to Mr. Hinchcliffe.
7162. Mr. Hinchcliffe left the office before you did? Yes. I have not left yet.
7163. Did he give you any information about any outstanding accounts? No. The day Messrs. Mason and Miles came into power he took them down to Mr. Miles' office. He let some get astray. We cannot find them to the present day.
7164. Look at these contingent vouchers [*Exhibits E and E 6*];—have you seen them before? One of them. Exhibit E is not initialled by me.
7165. Who told you to take off the 2½ per cent. discount? It is a recognized practice.
7166. Who told you originally? Mr. Larnach used to take it off before I did, and I continued the practice.
7167. Then, you took over the vouchers from Larnach? Yes, from the 1st January, when he left.
7168. Look at this contingent voucher [*Exhibit E 3*];—has that been before you? Yes; it has my writing on it.
7169. Whose writing is the word "Hurstville"? I cannot say. It looks like the writing in the body.
7170. Do you know anything about it? Nothing, excepting that it has gone through my hands and that I have computed it. It has been attached to some others.
7171. Is there anything difficult in that requiring computation before you initial it? No.
7172. Did you compare the books with this voucher? Not that I know of. I cannot swear I did not.
7173. Look at this contingent voucher [*Exhibit E 2*];—has that been before you? Yes; it is initialled by me.
7174. Is it signed by Mr. Davies? Yes, and by Mr. Burrowes.
7175. So also is the previous one [*Exhibit E 3*]? Yes, both of them were so signed.
7176. What do your initials mean here? That the computation is correct.
7177. Have you ever seen these two since you initialled them? Mr. Miles showed me one of them in the office.
7178. Will you tell me what you know about these two vouchers [*Exhibits E 2 and E 3*];—give me their history? I know nothing of them excepting what is upon them.
7179. Did Mr. Davies ask you in the presence of Mr. Burrowes for some vouchers that wanted his signature? Never.
7180. Did you ever take four vouchers of M'Lean Bros. and Rigg's and hand them in for signature to Mr. Burrowes? No; they were always posted out to the works.
7181. Did you ever give any explanation to Burrowes or anyone else as to what the meaning of these two vouchers was? No.
7182. Did you ever give any explanation about either? No; I have never spoken to anyone about them at all.
7183. Whose writing is this on this order for the issue of stores, 10th September, 1888, No. 552, "one hamper-basket"? Mine.
7184. Who is it signed by? Mr. Davies.
7185. Who told you to order that? Mr. Davies.
7186. When? On that date, I think. On the 10th September, 1888.
7187. What was done with it? I got a cab and took the basket to the office.
7188. What kind of a basket was it? A tall wicker-basket full of all kinds of things—plates, knives, and forks.
7189. A picnic-basket? Yes; one suitable for three or four people.
7190. What did it cost? I forget the price.
7191. What became of it after it was brought to the office? I gave it to Mr. Davies. I never saw it afterwards.
7192. Did you see any other basket afterwards? No.
7193. Are you certain? Yes; I believe there was one, but I never saw it.

Mr.
A. Hibble.
4 April, 1889.

7194.

NOTES (on revision):—Q. 7156—Add "but as he was leaving office he signed all papers." Q. 7163—Omit "He let."

- Mr. A. Hibble.
4 April, 1889.
7194. Look at contingent voucher [*Exhibit E 3*];—what is the number of the order on that? No. 552.
7195. Is that number on the contingent voucher the same as that on the order for the hamper-basket?
It is.
7196. Can you give me any explanation? Will you look at issue order 552 for one hamper-basket and your initials on the corresponding contingent voucher [*Exhibit E 3*] order No. 552, for six coils of Manilla rope? My initials are only for the computation. I took no responsibility for anything at all.
7197. Then if this issue order 552, for one hamper-basket, in your handwriting, went into a certain person, and that person sent a voucher back for 500 gallons of whisky, you would have initialled it? I initial it because Burrowes signs it and certifies he has received the goods.
7198. You initialled it although you knew that the numbers were the same and the goods different? I never turned it up.
7199. Is that all your explanation? I should not have initialled it if I had known.
7200. When did you become aware of this basket? Mr. Hinchcliffe told me about it; that Mr. Davies had taken a hamper-basket with him to the pays. That was before I got the hamper-basket at all.
7201. Was this before you got that hamper-basket mentioned in voucher 552? It must have been another, because I went and got this one afterwards.
7202. Is this really all you know about the two hamper-baskets represented in the vouchers by the long-handled shovels, hammers, and coils of Manilla rope? Mr. Miles has asked me before about the same thing, and I told him exactly the same as I tell you.
7203. Will you swear that you have never told anybody that the vouchers for the 24 long-handled shovels, 4 hammers, and 6 coils of Manilla rope were in lieu of Mr. Davies' hampers? I swear I never did.
7204. If other gentlemen swear you did? They tell what is not true.
7205. When you were in the room at the office where the other gentlemen were, have you ever heard Mr. Davies applying for petty cash? He did.
7206. Often? Not very often. On some occasions when he had been out he would apply to Mr. Hinchcliffe for cash to cover expenses.
7207. Did you ever hear anything about Mr. Davies being allowed 10s. a day? Yes. I got the authority for it myself.
7208. From whom? It was a voucher authorized by Sir Henry Parkes.
7209. When? I cannot say. The voucher will say for itself.
7210. Was it last year or this year? The cash-book will show. I see it is on December 16, 1888. The entry is £261 10s.
7211. Is that entry there because of some voucher from the Colonial Secretary? It is.
7212. Was that £261 10s. a cheque? There was no cheque drawn at all.
7213. How was it paid? It was paid in cash, as far as I know. It was given to me as a cash voucher by Mr. Hinchcliffe.
7214. Is that voucher now at the Audit Office? Either there or at the Treasury.
7215. Do you know whether the whole cash was then paid over to Mr. Davies? Not the whole amount.
7216. Do you know how much? I do not know.
7217. Do you know whether £5 was then paid over to him? I think a good deal more, because Mr. Davies had a little bye-account with Mr. Hinchcliffe and the arrears were paid over.
7218. What was the bye-account for? For expenses.
7219. What expenses? Going to the different places—say the National Park.
7220. What would be his expenses there? Hotel expenses, food, and everything.
7221. He did not stop there? He would be travelling about all day.
7222. Would he pay away more than a few shillings? You cannot go about for nothing.
7223. Had he a pass by train and tram? I suppose he had.
7224. Yet these expenses were regularly paid? Yes.
7225. In addition, were there charges sent in for cab hire? Not that I know of.
7226. No charges at all? If you went away by an early steamer you had to have a cab.
7227. Did Mr. Hinchcliffe say how this money to Mr. Davies was to be paid over? He gave it to me as a cash voucher.
7228. Was that the first you knew of it? I knew they had accounts between them.
7229. Were you present when these accounts were referred to? Yes, on a previous occasion.
7230. What was the previous occasion? Before Mr. Hinchcliffe went to Melbourne Mr. Davies asked him how he stood.
7231. Then it was a private affair? The account was kept in a book which I never saw. It was one of Lett's rough diaries.
7232. Where is it? I believe Mr. Hinchcliffe has it.
7233. Is it an official book? It is one he had on his own account.
7234. Were these accounts purely matters between Mr. Davies and Mr. Hinchcliffe? I looked upon them as a matter between Mr. Davies and the Secretary. I believe that Mr. Davies was told he would have his expenses paid.
7235. Were advances made by Mr. Hinchcliffe to Mr. Davies in anticipation? Yes; for travelling expenses.
7236. Was there any other room in the office in which Mr. Davies and Mr. Hinchcliffe could talk without you hearing? Yes.
7237. How many rooms were there in the house? Six rooms and a kitchen.
7238. Did you sleep there? Mr. Davies used to sleep there. He had a room fitted up—just roughly.
7239. Who supplied the things? The Government.
7240. Are they there now? Yes.
7241. Are you sure? I think so.
7242. Was anything inquired for and not forthcoming? There was a robbery there.
7243. Nothing since the robbery? Nothing that I am aware of.
7244. Anything about a kerosene lamp? I was not asked about that. It went in the robbery.
7245. What time was this? It was on a Sunday night twelve months ago—perhaps more.
7246. Did you get any extra allowance? Yes, whenever I worked for it. When Mr. Walker's Select Committee was on I worked three nights and two days and got £2 for it.

7247.

Mr.
A. Hibble.
4 April, 1889.

7247. Did you get any other allowance when you were making up the Parliamentary return? When I have worked on Sundays.
7248. Did you have much overtime? Only in connection with Parliamentary matters. I would have to start away and get a return out.
7249. Did you get a bonus at Christmas time? Half-a-sovereign one time. Mr. Hinchcliffe gave it me.
7250. Did Mr. Wells, Mr. Houison, or Mr. Davies give you anything? No.
7251. Nothing beyond that half-sovereign? Nothing.
7252. Did you ever pay any money into the Australian Joint Stock Bank? Yes, £20.
7253. Is that the only amount you have paid in? Yes.
7254. *Mr. Franklin.*] You said you departed from the custom of checking the vouchers with the butts and the orders? I do not think I said that.
7255. You stated that it was not your custom? No, it was not.
7256. Is it the custom through all the Government service? I believe so.
7257. It would be unusual to neglect it? If you had been in the office and seen the way matters were conducted you would have understood it. Sometimes I never saw the vouchers until they were ready for payment.
7258. If such a thing existed, was there not very bad administration? There was. Mr. Hinchcliffe was a good deal to blame for many things there.
7259. Had you frequent visits from Mr. Wells and Mr. Houison? During the former part of the time. They gave their experience and advice as to the system of administration.
7260. The former part—was that the first six months? It was when I had to work in the office downstairs. When I was transferred upstairs, I cannot say.
7261. You were not aware then? I was not.
7262. You never spoke to them, and told them what was going on? Never.
7263. Under the circumstances you will not be surprised to find that some vouchers do not agree with the orders? No, certainly not.
7264. I am not referring to these vouchers particularly? No; I am not surprised.
7265. Did you ever explain to Mr. Davies that these omissions of check were existing? I did not.
7266. Was it shown at any time that you were under-officered, and that you could not give sufficient check? I have repeatedly pointed out to Mr. Davies that I had not time to do half what was required.
7267. Was it submitted in writing to the Board? No.
7268. Was there any demand for an increase of staff? No.
7269. Did Mr. Wells or Mr. Houison inquire into the details of the official management? Mr. Houison has come round and watched me when I have been checking the pay-sheets.
7270. Did they give their approval? I always thought so.
7271. Do you know how it was arranged that Mr. Davies' signature should be sufficient on a document? I believe it was passed at a Board meeting. Mr. Hinchcliffe had to sign his as well.
7272. You are not speaking about cheques? No.
7273. You are speaking of the vouchers? Yes. They gave authority at the commencement of the Board. I have been led to believe so.
7274. Do you know whether that is on record? I do not think so. There were no minutes kept.
7275. The affairs were wholly under the direct supervision of Mr. John Davies? He and Mr. Hinchcliffe were responsible.
7276. Mr. Hinchcliffe was the responsible officer? I think so.
7277. You know you expended a large sum, £240,000 I think. Was not a large proportion represented by goods ordered and supplied through the authority of your office? Yes.
7278. And you tell this Commission that there was no check between the voucher and the butt of the order? To the best of my knowledge there was not.
7279. You know the ordering was given in your charge—it was part of your duties? I had not full charge.
7280. Having had partial charge of the book you did not check the orders with the vouchers? I admit it. I trusted to the superintendent.
7281. You will not be surprised then that there is great variation? I should not think there would be.
7282. How can you tell? I cannot tell.
7283. What you say is speculation? I cannot tell of course.
7284. *Mr. Waller.*] Why did you not enter the credits in your rough cash-book? I did not trouble about them.
7285. Why did you enter one set of entries and not the other? Simply because I had a new book. The other one was only the rough book.
7286. Is it not strange that you should enter in one book and omit in the other? When I took the cash-book over there were no entries at all for cash; and when I started it I put the cash entries in the new book.
7287. You still continued to use the rough book? To write the cheques off in the rough.
7288. You had no other reason? Except to keep the new book clean and neat.
7289. Do you know anything of the stores which Mr. Deering left over? Nothing.
7290. Do you know anything of any sugar which came to the Goulburn-street office? It never came there in my time. I never saw it if it did.
7291. Had you opportunities of seeing the petty cash-book? There was no such book at all.
7292. Had you a petty cash-box? Mr. Hinchcliffe had the key.
7293. Have you seen it? Certainly I have.
7294. Have you seen the amount of cash in it? I could not tell what was in it. I never touched it.
7295. You were aware that Mr. Hinchcliffe drew for petty-cash when you had over £300 to credit shown in the cash-book? Yes.
7296. Did you know what the balance was? No, because I never knew how things were. Mr. Hinchcliffe did not put in the vouchers in a proper way. If things had been worked according to proper routine, one would have known.
7297. Did Mr. Hinchcliffe ever tell you he was short in his cash? Yes.
7298. About the New Year? Yes.

7299.

NOTES (on revision):—Q. 7257—After “and seen the,” read “busy way matters, &c.” Q. 7280—Add “who had to sign all vouchers, and declare that he had received the goods.”

- Mr. A. Hibble.
4 April, 1889.
7299. Before or after his Melbourne trip? After.
7300. What amount? Between £250 and £300.
7301. Did you not say he said that he had to make it good by drawing on his own private account? He told me he had to make it good, and I believe that he drew on his own bank—the London and Chartered Bank.
7302. How did you get that belief? Because I have seen him draw cheques out.
7303. Will you swear he told you that he made it good? Yes, I will.
7304. Have you any other business of your own? No.
7305. Has Mr. Hinchcliffe? His wife has a business in Oxford-street—a millinery and dressmaking business.
7306. Do you know whether any money belonging to the Board was made use of in that business? I do not.
7307. Have you any reason to think it was? None whatever.
7908. What had Mr. Hinchcliffe in the way of allowances? He would be allowed half-a-sovereign when he went away and his expenses.
7309. What are his expenses? His meals.
7310. You say half-a-sovereign and his other expenses? It is a Government allowance. It is £1 by right, but they only allow 10s. in this case.
7311. Where would he get the money from? He would pay himself.
7312. Did you see the vouchers for these drawings? Yes; they went through my books.
7313. Had you any means of checking what Mr. Hinchcliffe saw fit to allow himself for expenses? None whatever. Whatever he liked to allow himself he could.
7314. As far as you know these allowances might have been bogus? I had no means of checking them.
7315. He could have taken £5 instead of 10s. if he had chosen? Yes.
7316. Was Mr. Davies in the habit of getting money for petty expenses? Mr. Hinchcliffe would hand him money for expenses.
7317. Did Mr. Davies get any other money from Mr. Hinchcliffe? Only for expenses.
7318. What sum would he have? He would say £5 or so. I believe Mr. Hinchcliffe kept a memorandum.
7319. Did he frequently get this? Not frequently in my presence.
7320. At the time this £261 10s. was paid, do you know how much money there was in the office? No.
7321. Do you know whether he got these £5 draws frequently or not frequently? I did not see them frequently.
7322. There is nothing to show whether Mr. Davies got this £261 10s. *in globo* or only £5 that was due to him? I do not know.
7323. That £261 10s. might be over or above all the drawings previously made, and entered in Mr. Hinchcliffe's private book? For all I know it might.
7324. Did you ever alter the orders at M'Lean Bros. & Rigg's verbally? I have increased them on one or two occasions.
7325. By whose orders? Mr. Davies'.
7326. Were those orders respecting powder? In some cases they were. I have ordered picks; they would run three dozen in a case.
7327. Has Mr. Davies ordered things verbally? I believe he has ordered powder.
7328. Could the superintendents order what they liked? We would have to know what it was for.
7329. Could they send in a requisition for what they liked? They might not get it. We might have it at the works.
7330. Can you give us instances of refusal? Dozens of cases. Mr. Burrowes has had his orders stopped. Mr. Davies has said he would not send the goods out. He has had the goods in stock, but would not take the trouble to look for them.
7331. How did you know they would be in stock? By looking at the stock list we got from the storekeepers. Mr. Springall used to send the sheets in every month.
7332. Who sent in the stock-sheets? Mr. Springall.
7333. He was the man you relied on? Yes.
7334. Are there any returns in the books showing the number of men employed weekly or monthly? Not that I am aware of.
7335. None? We had a register of the names.
7336. How did you know how many men were at work? We got it from the pay-sheets. We kept up correspondence with the superintendents, and they would keep us informed how many there were on hand.
7337. There was no system adopted by which regular returns were sent in? No.
7338. If we have had it stated they were sent in every fortnight? I have never seen them. They never passed through my hands.
7339. We have distinct evidence on this? I will swear they never came to the office.
7339½. What about orders for rations? They were ordered through the storekeeper.
7340. Was he the man you relied on? He would order Kidman to send out the number, and they would be deducted from the men.
7341. Who saw the orders he sent to Kidman? Nobody. He sent them straight to Kidman.
7342. His orders might be greater than the advice notes of his superintendents would make necessary? Yes; but he would have to account for them afterwards.
7343. When were the orders sent to the head office? He never sent them at all.
7344. Tell me what check there was as to the storekeeper sending orders to Kidman in excess of his requirements when the head office never saw the orders? The head office relied on the superintendent.
7345. I am speaking of the storekeeper? The way you put it the thing could be done.
7346. I will put it again. Kidman's orders never came to the head office? No, never.
7347. If the storekeeper chose to order more rations than the superintendent thought necessary, where was the check? There was no check at all until we came to the pay-sheets.
7348. Would not the storekeeper make the pay-sheets out himself? Mr. Burrowes was supposed to do it.
7349. Did not the storekeeper make them out? I cannot say. I thought Goodman and Christy made them out.

7350.

Mr.
A. Hibble.
4 April, 1889.

7350. Who was storekeeper? Springall first, and Larnach afterwards.
7351. How long was Springall there? From the beginning of the Board until the end of last year.
7352. Whose initials appeared on the sheet? I did not think they were initialled at all.
7353. Are they in Springall's handwriting? Some of them.
7354. As a matter of fact, are they not made out by him and written by him? Goodman has made some out.
7355. Are not the greater portion made out by Springall? Yes.
7356. Would there be any difficulty for Springall to manipulate the rations account if he chose to do it? If he chose to do it, certainly not.
7357. Do you know any of the gangers? Yes.
7358. Did you pay them money? Yes.
7359. Did you see a good many paid? Yes.
7360. Did you make payments to the Heathcote Agricultural? Yes; Bell was the overseer.
7361. Do you know any of the gangers there? Yes; I know Walters, Emmerson, and Williams, a blackfellow.
7362. Was Burrowes superintendent? Yes; he had full charge of the men.
7363. Had Burrowes a groom to look after his horse? I think he had.—an old man of the name of Flemming. We used to call him "Old George." He was not a groom. He was Burrowes' body-guard altogether.
7364. How long did he have him? I should say four or five months. He had another one, of the name of O'Neill, afterwards.
7365. When did Flemming leave Burrowes? I cannot say. Not until they moved the camp down to Hurstville.
7366. Was it last year? Some time at the commencement of last year.
7367. Did Burrowes pay him any wages? I think he appeared in the pay-sheets amongst the gang. When he came down to Hurstville his name appeared separately on the sheet.
7368. As a ganger? No; not as a ganger, but individually.
7369. Was he ever a ganger? There were a lot of old fellows about the camp at 3s. 6d. per day; they charged them altogether; one took the money.
7370. Say 3s. 6d. a day for eight men, how much does that come to in a fortnight? £16 16s.
7371. Take the rations off? It would come to £11 14s. 10d.
7372. Not to £20? No.
7373. Are you satisfied Flemming was never a ganger in charge of men quarrying, stone-breaking, or doing hard work? I think not.
7374. What do you think if his name appears on the pay-sheets entitling him to draw £20 or £25 a fortnight? Well, the other men must have done the work, because he could not do it.
7375. What became of the orders that came back from M'Lean Bros. and Rigg and other merchants? They were put away in a drawer.
7376. Do you think there is any probability of any of them getting out of the office? I know Larnach destroyed one batch of them. He said it was no good keeping them.
7377. Who had charge of them? I do not think anyone particularly. I drew up most of them.
7378. Was no one responsible? Mr. Hinchcliffe was responsible, because he was responsible for the whole of the office.
7379. Have you any recollection of Burrowes signing vouchers in the office? None excepting the pay-sheets. All vouchers were sent to Hurstville.
7380. Would it be possible that he might have signed them without your knowledge? Yes; if I was not there.
7381. In what time, after the orders went to M'Lean Bros. and Rigg, would they come back to the office? In about a fortnight. Say they came back twice a month.
7382. How soon after they came to you were they sent to the superintendent? The same day.
7383. When would they come back? Sometimes three or four days afterwards; sometimes not until a week afterwards.
7384. How would they be able to certify to the correctness of the orders when such a length of time had elapsed between the coming back of the order and the receipt of the goods? Because the store-keeper had his books.
7385. Who checked the store-keeper's books? He was under Burrowes.
7386. Was there any check? I do not think there was.
7387. Sending out the orders would be only a matter of form? On several occasions they have returned them, and said that the goods had not been received.
7388. If the superintendent gives evidence that he knew nothing about receiving the goods or ordering them, what are we to think? He must know he signed a declaration that they were received.
7389. You signed a declaration too? I signed no declaration; I only put my initials with regard to the computation of the figures. Burrowes put his name to the matter of the receipt of the goods.
7390. But he says he signed because there was the signature of Mr. John Davies? Mr. Davies never signed them until months after they came back.
7391. Who signed the orders before they were sent to M'Lean Bros. and Rigg? Mr. Davies did.
7392. Were the orders not then sent out to the superintendent? The goods were, but he never saw the orders.
7393. What did Burrowes sign? The voucher.
7394. What was on it? The order for the goods was attached to the voucher, but it was detached in the office.
7395. Did you send Burrowes the voucher without the order? Yes.
7396. Was there anything in that voucher to show who ordered the goods? Nothing.
7397. It simply showed that a certain amount of goods was sent to them? Yes; and if you have received them, sign for them.
7398. You say it was Mr. Larnach who discovered that system of dealing out the vouchers to the amount of £6,000? Mr. Larnach did not discover it. Mr. Hinchcliffe said that that system was adopted in the Immigration Office, and he showed Larnach how to do it.
7399. How many vouchers would you require to make up the £6,000? When the Board first started, not a dozen.

- Mr. A. Hibble.
4 April, 1889.
7400. How many would you want? I cannot tell you. Sometimes we should only want fifty or sixty. Sometimes a couple of hundred.
7401. There must be a limit to the number you would require to manipulate so as to get out £6,000? I looked upon it like playing draughts; you had to give and take, backwards and forwards.
7402. Do you know whether any other officers of the Board had private businesses of their own or in their wife's name? Only Mr. Hinchcliffe.
7403. If, as has been stated here, Mr. Hinchcliffe says he was never short in his cash, will that be true? No; because he told me he was.
7404. Would you believe the man who makes that statement? I could not believe him on that statement, because it would not be true.
7405. Would you believe him on others? He may have forgotten it, but it would be a strange thing if he did.
7406. Would you feel inclined to believe that man? I should not afterwards.
7407. Do you think you would forget such a thing? I do not think I should forget it.
7408. When did you find out the borrowing proclivities of Burrowes? Just before Christmas. He and I had a few words about it.
7409. Did any person ever come to the office about it? Dozens of people, since the Board has been a Board.
7410. Yet you were friends? I knew before he went there he was rather short of money, but he might have been trying to pay them off. The worst cases were what I have heard of late.
7411. Did they complain of his borrowing money? They did not come to the office to complain of his borrowing money. It was tradesmen's accounts. They came to ask him to pay them.
7412. When did they come about it? The general ones—say a week before Christmas.
7413. Did you still continue to have great respect for him? I had a noise with him about it. He went to a friend of mine and borrowed money in my name.
7414. How much? £6.
7415. Has he paid it since? No; I think not.
7416. Are you in a position to pay it? No, I am not in a position to pay it for him. My friend said to me. "Your friend Burrowes said that you would make it all right." He said Burrowes went to him and said that I sent him to him.
7417. When did you see Springall? Last Thursday.
7418. Did you make any remarks to Springall about Burrowes? I asked him about Burrowes.
7419. Did you tell him anything about a nick-name? I told him I heard he had a nickname.
7420. What was it? "Pigott." I said I heard he was called that name.
7421. Did you remark about anyone else? I spoke about Larnach.
7422. What about him? I said I was surprised he had turned out the way he had done.
7423. Did you tell him anything about certain rumours that were going about? Larnach came to me and said, "I think Springall has been put into a box." He has been stealing rations and all that. I told Springall about that. It is six months ago.
7424. Within the last week? No; M'Pherson was with me at the time I spoke to him.
7425. How long is it since you told him that Burrowes was nicknamed "Pigott"? In the room outside here, I said I heard they were calling Burrowes "Pigott."
7426. Was Mr. M'Pherson present? He was present on Thursday.
7427. What did he say? I do not think he said anything; only some casual remark.
7428. What was it? I could not say.
7429. Why was he here? He was seeing Mr. Critchett Walker.
7430. Did you tell Springall that there was a rumour that he had been getting money from Flemming? I did not.
7431. Did you ever see anyone besides Larnach drunk? I have seen Burrowes.
7432. When on duty? Yes.
7433. Often? No.
7434. How often? On three occasions.
7435. Can you state them? On one occasion at Cook Park. The others at Sydney.
7436. At these times was he on duty? It was in office hours.
7437. Have you seen any members of the Board drunk? I have seen Mr. Houison the worse for liquor.
7438. Where? In Pitt-street and Goulburn-street.
7439. Have you seen any other member? No.
7440. Not even the Chairman? I do not think you would catch him drunk.
7441. Did you ever see Mr. Wells drunk? No.
7442. Did you ever see him the worse for liquor? He is a man who can take a lot of liquor.
7443. Did you ever see him drunk? I have seen him carry drink, but he could go on with his work.
7444. Could he walk steadily? As straight as a rush.
7445. And speak properly? Speak all right.
7446. Did you ever see him in conversation with Burrowes, finding fault? On many occasions.
7447. State one? The first was about a road. He told Burrowes he would allow him to make no more roads, but that M'Pherson would have to have charge. Unwin's Road was complained about. In another instance he put up a bridge on the Holt-Sutherland Estate without having any support in the middle. Mr. Wells told him to take it down, and said that if he did not take it down he would be dismissed.
7448. Did Mr. Davies ever object to the loud tones in which Mr. Wells thought fit to address Mr. Burrowes? I do not think he ever did.
7449. Were all the members of the Board sober on these occasions? They were all thoroughly sober.
7450. Had Burrowes a responsible position? He had, but he tried to shuffle out of it.
7451. Could he order goods? Through the office.
7452. Could he make up the pay-sheets? Yes.
7453. Could he certify to the number of men at work? That was his duty.
7454. Could he certify who were gangers? Yes.
7455. Who was to receive payment for the gangs? Yes.

7456.

NOTES (on revision):—Q. 7406—Add "If I knew he had told me a lie." Q. 7437—After "Mr. Houison," read "slightly"; after "liquor," add "when he was on furlough." Q. 7442—Omit "a lot of." Q. 7443—Add "perfectly unaffected."

Mr.
A. Hibble.
4 April, 1889.

7456. Could he commit frauds if he liked? He had the opportunity if he was a dishonest man.
7457. Did Mr. Davies from the start distrust Burrowes? I do not think he did until he found him out.
7458. When was that? Some nine months ago, when he found some roads go wrong.
7459. What did he say? Burrowes would pass it off and tell a few more untruths and promise not to do it again.
7460. What did Mr. Davies find fault about? The Woronora Road. He was asked what it was like. He said it was 1 in 20; a good, serviceable road; he had been there, taken the quantities, and certified to it. When the members went down they found that Burrowes had never been on the road from the commencement; that the road, which was 1 in 8, was impassable; and that he had certified to an expenditure of money, but had never seen the work.
7461. Did he ever give Mr. Davies any cause to think that he was not quite straight in his expenditure? Sometimes the Chairman said with regard to his expenditure that he did not think he could have spent the money.
7462. How was it Mr. Davies left him in such a peculiar position? It appeared that the Board had not power to dismiss him, as he was appointed by Mr. Dibbs. That was why he held his position like he did.
7463. Did you take orders up to M'Lean Brothers and Rigg? I took the best part of them up.
7464. Did you ever bring anything back? A few odd things at different times.
7465. You said you brought that picnic-basket back in a cab? Yes.
7466. Who sold it to you? Mr. Lawn.
7467. Did you pick the basket? There were only two there. I took the large one.
7468. What was the price? I did not ask.
7469. Who was it charged to? The Board, I believe.
7470. Were your instructions to take it back in a cab? I was sent up for it to give it to Mr. Davies.
7471. Did you know he had had another? Mr. Hinchcliffe told me he had one before that.
7472. Did not this strike you as peculiar? He told me he wanted it because he had to go out, and several people would come out with him.
7473. Did you see him use it often? No.
7474. Did you see him use the other one? I never saw the other one.
7475. Did you look through the accounts to see the debit notes? I did not.
7476. Did you ever hear any conversation about these picnic-baskets? No.
7477. Never any remarks that rope in the one case and long-handled shovels and hammers in another represented the baskets? Never.
7478. If these statements were made in the office, it must have been during your absence? They must have been in my absence. I never heard them.
7479. Could this have taken place and you not have heard it? Not if it took place in the office proper.
7480. Will you take your oath that you never took that basket back to M'Lean Brothers and Rigg? I never took it back.
7481. Did Mr. Davies ever tell you to return it? Never.
7482. Was it returned? Never—at least I had no conversation about it.
7483. If it is sworn that you took the two away? Then it is wrong. I never took even the one away.
7484. Do you know how the other arrived at the office? I know nothing at all about it. Mr. Hinchcliffe told me that he had used it for the pay.
7485. Had Mr. Burrowes any allowances? Rations and a horse.
7486. Any other allowances? Travelling expenses wherever he went.
7487. Do you know what he got a week or a month? £4, or £8 a fortnight.
7488. Regularly? Regularly.
7489. What for? Travelling about the country. He had a big district to go over.
7490. Do you know whether at any time any of the officers of the Board received payment or gratuities in any shape or form from persons for things being done? I cannot swear to it. I have heard remarks; but I cannot say.
7491. What did you hear, and when? The first remarks were some time last January.
7492. Whom were they about? Mr. Burrowes.
7493. From whom? A gentleman at Campbelltown.
7494. What is his name? In any evidence I give, am I liable for it afterwards. I am only speaking about rumours.
7495. You are fully protected. What is the name? Mr. George Garde told me of certain roads, and that no doubt he had received some remuneration, because they were in direct violation of orders from the office.
7496. Did you hear any other rumours? About a road he put round Mr. Gannon's property at Port Hacking. Then he promised to make a road from Como, on Mr. Head's property; and borrowed a sum of money from Mr. Head, and then never performed the work.
7497. Who is Mr. Head? A partner in Geddes & Co.
7498. Where does Mr. Garde live? At Campbelltown.
7499. Have you heard any remarks about other members or officers? None whatever. I have heard talk that Mr. Davies was getting his money, but did not place any reliance in it.
7500. Have you any reason to suppose any members of the Board received gratuities? No reason.
7501. Or any other officers? No.
7502. Of your own knowledge you know nothing more? Nothing.
7503. *President.*] Can you give me any information about the large orders for powder. There are an unusual number? There was a great quantity of powder used. Mr. Franklin could see it at once. In one road there was a cutting through rock 25 feet high in one place.
- 7503½. Many of the butts of orders in the order-book are for considerably less powder than appears to have been supplied? I think you will find that Mr. Davies told them to send it.
7504. Did Mr. Wells or Mr. Houison think that the men were using powder when they had no right to use it? Every man who used powder had it charged to him.
7505. I see that Harwood & Sons' names are here—who are they? We bought a lot of second-hand tools from them.
7506. Do you know the schedule price under which the Government gets goods? M'Lean Bros. and Rigg did.

- Mr. A. Hibble. did not recognize the Board as being under the schedule. They decided that at the first start under Mr. Wise.
- 4 April, 1889. 7507. How were you paid your salary? Every week, by cash.
7508. How were the other officers paid? Mr. Larnach by cash, Mr. Josephson and Mr. Hinchcliffe by cheque.
7509. Always? Excepting on two occasions.
7510. Had you most to do with the order-book? Yes.
7511. Can you show me the orders for this voucher [*Exhibit E 2*]? No.
7512. Do you believe there is any order? No; I am positive there is not.
7513. Did you do any business privately for Mr. Davies? Nothing of any magnitude.
7514. Did you pay money into his bank? On one occasion. I could not tell what was the amount of it. It was the City Bank.
7515. Only on one occasion? Yes. I think it was £100.
7516. What was it, a cheque or cash? I think it was all in notes.
7517. Was it about the time he got the payment from the Board of £261 10s.? No; it was about twelve months ago.
7518. Was there ever any complaint made against Springall? No, excepting he was a little too crotchety with some of the men.
7519. Was there any complaint as to his selling goods? He was allowed to have a store at first, but it was stopped by Mr. Davies' instructions.
7520. Will you look at the cash-book [*Exhibit E 8*] on page 15. What is the balance in cash on 27th July, 1887? £62 13s. 2d.
7521. That is what there should have been in cash on the 27th July, 1887? Yes.
7522. When was the next drawing of petty cash, according to the book? 23th July, £100.
7523. Look at page 23? There was £97 8s. 7d. in cash on 7th September.
- 7523½. When was the next drawing? On 8th September, a cheque for £100.
7524. Look at page 27. What was the amount to the credit of petty cash on 29th September? £280 16s. 10d.
7525. When was the next drawing? 1st October, for £50.
7526. Look at page 30. What was the amount to the credit of the petty cash on 11th October? £186 16s.
7527. When was the next drawing? On 13th October, for £100.
7528. What was the credit immediately preceding 24th October? £231 3s. 4d.
7529. And when was the next drawing for the petty cash? On 24th October, for £100.
7530. Look at page 89. What was the credit to petty cash on 4th September? £416 1s. 6d.
7531. The next drawing? Was on 7th September, £50.
7532. Look at page 91. What was the credit to petty cash on 15th September? £451 11s. 4d.
7533. When was the next drawing? 17th September, £25.
7534. Look at page 93. What was the credit to petty cash on 27th September? £472 5s. 10d.
7535. When was the next drawing? The same date, £50.
7536. Look at page 97. What was the credit to petty cash on 11th October? £462 15s. 2d.
7537. When was the next drawing? On 15th October, £50.
7538. Look at page 99. What was the credit to petty cash on 23rd October? £515 4s. 6d.
7539. When was the next cheque drawn for petty cash? The same date, for £10.
7540. And you kept this book? I copied it up from the old book.
7541. Did not Larnach have some conversation with you about this Commission? Yes; at the office.
7542. What time? About 12 o'clock in the day. Mr. Cheney was in the room, and Mr. Kidman.
7543. Did he make any statements in your presence? There was a conversation in the room.
7544. What conversation? He said you had been asking him about M'Lean Bros. and Rigg. He said that he had altered vouchers for Mr. Davies, and that I would have to tell the truth the same as he did. I told him he had better mind his business, and that what he said at the Commission had nothing to do with me.
7545. Do you know of any ale, porter, or liquor coming to the offices of the Board whilst you were there? No.
7546. Do you know the handwriting of Flemming, the groom? I am not sure.
7547. Look at the name on this pay-sheet? I think it is his.
7548. Read the entry? Flemming, stone-breaking, 240 cubic yards, 2s., £24; deduct rations, £4 11s.; amount paid, £19 9s.
7549. How many men would there be if you deducted £4 11s. for rations? It would be eight men, but they stopped some of the rations. If you had the draft-sheet that would be more plain.
7550. What is the amount in cash? £19 9s.
7551. Do you think Flemming was capable of the work? I think if you turn it up you will find it embraces a month's work. I know something about it. I asked Bell. He said they were left off the pay-sheets the last time.
7552. If that is a true bill for work done by Flemming and his gang, should it not appear in the abstract from which the sheet was made out? It should, certainly.
7553. If it does not appear? Then there must be something radically wrong.
7554. If there are similar pay-sheets with the name of Flemming as a ganger, entitling him to receive large sums of money, £19, £20, and over that, and the name in every case is wanting on the abstracts, what would you say? I should say that Mr. Bell, the man in charge, has been committing a robbery because he is supposed to measure the work out.
7555. Anyone else? Springall and Burrowes.
7556. The superintendent? Mr. Burrowes.
7557. Who is responsible for the pay-sheets? Mr. Burrowes. Mr. Bell would measure the work.
7558. Have you any responsibility? No; as soon as I have paid the men I am finished.
7559. If you thought this man Flemming was receiving money as a ganger when he was not in charge of a gang, would you consider it your duty to report it? I would; but I believed at the time he was in a gang.

7560.

7560. Would you place any faith in a pay-sheet on which his name appears if it is not on the abstract from which the sheet is made out? No, certainly not. But if you go through the abstracts you will find many men omitted and put on afterwards, but if it comes to be a regular thing you could not believe that sheet.

Mr.
A. Hibble.
4 April, 1889.

7561. Is such a pay-sheet true? There are many instances of that sort on the pay-sheets.

MONDAY, 8 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

William John Tindall called in, sworn, and examined:—

7562. *President.*] What are you? A detective officer in the police force.

7563. I believe you were detailed for duty in connection with the Casual Labour Board? Yes.

7564. How long have you been under the Board? Under the present Board it will be two years next month—I think about the 3rd May. I was with the unemployed previously.

Mr. W. J.
Tindall.
8 April, 1889.

7565. What were your instructions? I reported myself to the Board. My duties were to issue tickets to the men, and to send them down for work. For instance, there would be 200 men for Narrabeen, or 100 for the National Park. We would get these men in ten or a dozen at a time into the lower room where I was engaged. Their names and particulars respecting them would be registered by the Registrar, Mr. Josephson. I would write out each man's ticket, putting his name and destination on it, and stamp it with the Casual Labour Board stamp, and give the ticket to the man. That ticket he would have to present to the superintendent wherever he went before he could be placed on the work. We would then attend at the railway station to see them off, getting their railway tickets with a requisition given by the Board, and we would see them in the train started off. I also kept a defaulters' book. Any men that were discharged from the different works it was the duty of the superintendents and overseers to send in a list to the Board. I would enter these in a book. I think there are some 800 odd in that book. They were discharged frequently for drunkenness and that kind of thing. These men I would identify if they tried to get work again. Of course they were not allowed to go on the works again.

7566. Would the observations you made on these different occasions be sufficient to enable you to identify men through the whole time? Numbers of them; but no man could go on the works without receiving a ticket through me.

7567. Your detective knowledge then enables you to do this? Oh, yes; I had mixed with them long previous to this. Numbers of the men had come from the other colonies—something like 2,000. I have had numbers of the unemployed under my observation for six weeks in the Immigration Barracks here.

7568. Was it part of your duty to attend on pay-days? I have done so occasionally when I have been ordered to do so by the Board. I have accompanied Mr. Josephson to Waterfall.

7569. Often? Not more than on three or four occasions—three occasions, I believe.

7570. Have you been anywhere else? On one occasion I went to Narrabeen, and on one occasion to Hornsby, and on one occasion to Liverpool.

7571. Were you ever at Heathcote at a pay? No, never.

7572. What is the total number of visits you have made on pay-days? Three at Waterfall, one at Hornsby, one at Narrabeen, and one at Liverpool; also one at Rookwood—seven in all, during the whole of the two years.

7573. Had you ever any special instructions given you by the Chairman of the Casual Labour Board? No, never.

7574. What is your rank in the Service? I am a senior first-class detective.

7575. Were you associated with any other officer in this business? Yes; Constable Cheney.

7576. What is his office? He is a constable.

7577. Was he present at all the pays that you were present at? No. He was not present at any of them; he went afterwards; he has been often with Mr. Josephson.

7578. Do you recollect anything about a man named W. R. Robertson, respecting whom there was some complaint or inquiry? I cannot say I do. I do not know the person by name.

7579. In June, 1887? No.

7580. Supposing a complaint had been made to the Chairman of the Casual Labour Board by the superintendent as to the conduct or style of working of any of the unemployed, would that come under you in any way? Yes; it ought to do so.

7581. Would it go to you through the Board? Yes.

7582. That is what I meant when I asked if any special matters of complaint were referred to you by the Chairman? I am not aware of any, except cases of drunkenness.

7583. Did you hear of any cases where men imposed on the Board—that is to say, represented themselves to be what they were not? No.

7584. Did you know a man named Flemming? Not by name. I might know him. You see there were hundreds of them going through the books.

7585. You said there were 2,000 of these men came from Melbourne? About 2,000 came from the different colonies.

7586. Did you keep a record of the men that went out? Yes.

7587. Can you tell me the largest number on the works at one time? About 5,300 at one time.

7588. Can you tell me the smallest number? I cannot. I think the smallest number would be at the present time. I know that returns have been made up on several occasions.

7589. Your duties were particularly in the detective branch? Yes; I am a detective. I have been nineteen years in that branch.

7590. In this Colony? Yes; in New South Wales.

7591. *Mr. Franklin.*] Was there any special necessity for your visits to the works on these few pay-days? No; I only accompanied Mr. Josephson when he had a large amount of money with him.

7592. There was no other reason? I do not know any other reason at all. I was merely ordered to go with him, and I did so. Cheney, the constable, has been with him more frequently than I have been.

7593.

- Mr. W. J. Tindall.
8 April, 1889.
7593. Had you any occasion to report any suspicious circumstances? Never.
7594. Were you often on the works? I was never on the works except on these few occasions.
7595. You were never called upon for a special report? No. We would only just go and pay the men and come back again.
7596. Were the gangers brought under your special notice? No. I had nothing at all to do with them.
7597. Can you tell us whether the men were in the habit of getting their pay through the gangers, who would attend on pay-days? I believe they should do so. The men would appoint their own gangers, and look to them for their money.
7598. Was it the custom for more than the gangers to go? I believe so. I think both gangers and men were present. I have seen them outside waiting—have seen them actually divide the money.
7599. Have you ever accompanied anybody but Mr. Josephson on these occasions? Yes; I went on one occasion with Mr. Hinchcliffe and Mr. Davies.
7600. Was Mr. Josephson alone when you accompanied him? He was. Mr. Hinchcliffe and Mr. Davies and others might be in the railway carriage.
7601. Could you specify the occasions upon which you and Mr. Josephson went out together? No; I could not. It was over twelve months ago. Mr. Cheney has been with him until the time he left.

James William Cheney called in, sworn, and examined:—

- Mr. J. W. Cheney.
8 April, 1889.
7602. *President.*] What are you? I am a constable in the New South Wales Police Force.
7603. In what branch of the Force? I am a plain-clothes constable.
7604. You assist the detective force, I suppose? Yes.
7605. I believe you did some duty in connection with the Casual Labour Board? Yes.
7606. When did you commence? It will be two years ago next month.
7607. Who instructed you to take duty under them? My duty was with Detective Tindall. I think Detective Tindall had instructions from the Colonial Secretary.
7608. You took instructions from Detective Tindall? Yes.
7609. Will you tell me what your duties were? Yes; I conducted the men into the place. Sometimes they were very disorderly, and shoved each other about; and we had a system of letting them in six or eight at a time. Then I had to accompany the Paymaster, to go to the railway station to see the men off—to see that they got away on their passes, and then I would go to the bank with the Paymaster on pay-day.
7610. What did you go to the bank for? I went to the bank to cash cheques.
7611. Did you accompany Mr. Hibble? I would go with him to assist him in the paying of the men.
7612. What did you accompany him to the bank for? When we were going to Narrabeen I would go with him to the bank. We would go to the bank first and then to Narrabeen; it would be one visit.
7613. Can you tell me what your duties were outside the office;—were you mostly in the office? Chiefly they were at the office, but I would have to attend at the railway-station when the men were going away. For instance, if a man brought a letter to the Chairman, stating that he had got work in any part of the country, the Board would grant him a free pass, and I had to go to the railway and see him off. I would also go to Bulgo and Camp Creek on pay-days.
7614. How many pays were you present at altogether? I could not exactly tell you. I do not know the exact number; but I went with Mr. Josephson every fortnight to pay the men on the Illawarra line.
7615. During the whole time the Board was in existence? Yes; until these gentlemen who were lately appointed took charge. I have not been recently.
7616. When you went to these pays, what did you do? I generally had the sheet, and called the men's names over.
7617. The gangers' names? Yes; and Mr. Josephson would pay them.
7618. Did you know the men? Yes. I did not know all of them, but I could pretty well know them.
7619. Could you tell whether a man was a ganger or not? Well, I knew some of the gangers, but not all of them.
7620. Did you exercise any detective knowledge in discovering whether a man that came up was the man on the paper, and whether he was a ganger or otherwise? Yes; I would take particular notice of them, in case they should come the double.
7621. Did you know any of the men by name? I knew some by name.
7622. Did you know a man named William Robertson? No; he was not in the pays that I attended—Waterfall, Camp Creek, or Bulgo.
7623. Did your duty ever bring you in contact with any complaints to the Casual Labour Board? No.
7624. Did you know a man named Flemming? I did not know him.
7625. Have you ever been to Heathcote? Yes.
7626. Did you know Mr. Bell? Yes.
7627. Were you ever present on any of his pay-days? No; never until last week.
7628. I am speaking of the time before the present Board was appointed? No.
7629. *Mr. Waller.*] Did you know Mr. Burrowes? Yes.
7630. What does he do? He was superintendent of the works, I believe.
7631. Do you know where Mr. Burrowes' head-quarters were? Do you mean where he lived?
7632. Yes? He lived at Hurstville.
7633. Did he live in a tent? He has a tent there, but he has a private place.
7634. What sort of a private place? I think it is a weatherboard cottage, to the best of my recollection.
7635. Is it there yet? I believe it is; I don't know about the tent.
7636. When were you there last? I was there about three weeks or a month ago.
7637. Was the cottage there then? Yes; the cottage was there then.
7638. Who lived with Mr. Burrowes? I cannot say.
7639. Were you ever there? I was there on one occasion.
7640. Did you see who lived with him? I saw some lady there—I presume it was Mr. Burrowes' wife—and I saw some children.
7641. Any servants? I could not say that.

7642. How used Mr. Burrowes to go about when he was inspecting? I believe he used to ride generally. I think he had a horse.

7643. Do you know who used to look after the horse for him? No; I do not.

7644. Did you ever see a man doing so? Not to my knowledge.

7645. Do you know the chief storekeeper there? Springall—yes. I know Springall by sight.

7646. Do you know where Springall is now? No; I could not say. He was living in Hurstville some time ago, but I could not say where he is living now. I heard that he had gone into business for himself somewhere, but I do not know where.

7647. *President.*] Do you know anything about Mr. Burrowes' character and habits? Well, I do not know much about him. From my own knowledge I know nothing of him.

7648. Do you know anything about Mr. Springall from your own observation? No; I know nothing of him, only just by seeing him at Hurstville.

7649. Can you tell me whether Mr. Burrowes was present at those pays at which you were present? No; Mr. Burrowes was not. He might have been on one or two occasions, but he certainly was not present at every pay that I attended.

7650. Was it the exception or otherwise that he would be present? I could not say that.

7651. Was he oftener present than absent? He was oftener absent than present.

7652. Do you know Mr. Johnson? No; I do not know him.

7652½. Will you look at this pay-sheet for Waterfall? Yes.

7653. Is that your signature there—Cheney? Yes; as a witness.

7654. Do you notice a man named Flemming there? Yes.

7655. Does that refresh your memory as to who Flemming is? No; I do not know Flemming. It would be difficult for me to think of every name that is there. If he had been smaller or taller than ordinary, I might have noticed him.

7656. Have you any particular knowledge of that particular person? No more of him than of anybody else.

7657. *Mr. Franklin.*] At the time the pays were made, would the money that ought to be paid on every occasion be exhausted? No; sometimes the men would not be present, and the Paymaster would bring the amount into the office again.

7658. How was the money subsequently paid to the absentees? Well, they generally came to the office for it—perhaps in a day or two afterwards.

7659. But you would not pay a ganger at the office, would you? Oh, yes. If he were not present at the pay-table, he would be told to come to the office the next day or a day or two afterwards, and he would receive his money there.

7660. Are you aware whether any difficulties arose in consequence of these payments in the Sydney office? No; there would be a complaint sometimes, but matters were generally referred to the Superintendent, who would settle them.

7661. What was the nature of the complaints? They said they were short sometimes. I have heard them frequently complain to us that they were not paid the full price, and they would be referred to Mr. Burrowes, the superintendent then.

7662. In the absence of the ganger, was it usual to send others of the gang and let them have the money? No; the Paymaster would not give it. The ganger would have to come, and his signature would have to be on the back of the sheet.

7663. Did it ever occur amongst a great number of men that the individual would be absent and never turn up at all? It could happen, but it never happened to my knowledge.

7664. Were you responsible for the payment of any of these moneys that were not paid at the pay-tables? No.

7665. Who would be responsible? Mr. Josephson, who would pay them.

7666. Did he retain the money until the persons came? He would probably hand it over to the Chairman until the persons came.

7667. These unpaid moneys must have been a large amount in the long run? I could not say; I never kept the account.

7668. You never heard how these unclaimed moneys were disposed of? No.

7669. What were your special duties? They were to accompany the Paymaster; take these men into the office, as I have explained; go to the railway station; and with Detective Tindall to stop imposition.

7670. You were not out every day paying? Oh, not every day.

7671. What were you doing on the other days? On the other days I would be at the office—or, at any rate, on a great many of them.

7672. Were there any other constables employed in connection with the Board? None, except Detective Tindall and I.

7673. Had you much difficulty in preserving order? No; only those fellows that rushed the place and broke the railings and fences down, several months since, previous to Messrs. Mason and Miles taking office. They were like a lot of wild beasts, but they were subdued afterwards.

7674. Were you supposed to recognize for the Casual Labour Board the men that were there? Yes; I knew pretty well all the crooked characters.

7675. Were not the gangers brought under your notice? No; except when Mr. Josephson was paying. I would not take particular notice of them unless they would come the double.

7676. Do you think you would know any of those gangers if they were brought face to face with you? I dare say I would know them.

7677. Were they not men who were brought specially under your notice? Yes.

7678. Is it not natural that you would be better able to pick them out than other men who had no particular reason for coming before you? I dare say. I would know the best part of them, but I do not say I would know them all.

7679. Would you know those men who have signed for pays in your presence? I believe I would. I will not swear that I would, but I think I would.

7680. Would you know particularly anyone who was very young or anyone who was very old? I think I would.

7681. Were most of them young or old? Some of them were old and some of them young.

Mr. J. W.
Cheney.

8 April, 1889.

- Mr. J. W. Cheney.
8 April, 1889.
7682. What would you mean by old? About 50. Young men, I would say from 25 to 30. Most of the gangers would be elderly men—they would probably. I believe if a party got together they would pick an old man to be over them.
7683. Do you know a man named Coleman, a time-keeper at the National Park? No; but I have heard the name.
7684. Do you know a man named M'Intyre? No.
7685. Do you know J. B. Woods, employed on the Heathcote section? No; I do not know the National Park men. I did not go there. I went to Bulgo, Camp Creek, and Waterfall.
7686. Did any police officer attend regularly at the Heathcote pays? I cannot say. I might have been there once; and I think I was at the National Park on one occasion.
7687. How many pays did you go to altogether? I cannot say how many pays I attended. I attended nearly every pay-day.
7688. What places did you attend beyond those you have mentioned? I have been to Narrabeen and French's Forest. I never went direct to the National Park. I always went further on.
7689. Can you tell me whether particular precautions were taken on pay-days to ascertain whether the men who went up as gangers really were gangers? Oh, yes; I think there would be precautions, because the overseer of the works would be there. He would take the opportunity of noticing each man as he went up—whether he was a ganger or not.
7690. Do you know who the overseer of the Heathcote Agricultural was? No; I do not know.
7691. Could you tell us the names of some of the overseers? There was Begg at Cowley Creek, and Harper at Bulgo.
7692. Could you tell us who would be overseer at Heathcote? No, I could not.
7693. Who could? I suppose Mr. Hibble. Up to recently a man named M'Leod was overseer, and before him I think a man called Walsh.

Herbert John Goodman called in, sworn, and examined:—

- Mr. H. J. Goodman.
8 April, 1889.
7694. *President.*] What is your position under the Casual Labour Board? Latterly assistant storekeeper; formerly I was working in the field.
7695. When did you go into the ranks of the unemployed? On the 5th of May, 1887.
7696. Were you actually one of the "unemployed"? I was one of the unemployed until September last year.
7697. Working in the field and receiving pay as a labourer? Yes, until September last year. In September last year I applied to Mr. M'Pherson, who was at that time over the particular road upon which I was working, and asked him whether he could get me any clerical employment, as I had always been used to that, and the gangs were rather dissatisfied with what I did.
7698. What was the result of that? The result was that Mr. M'Pherson asked me to go down to Hurstville on the following Monday to assist Mr. Springall in making up the pay-sheets.
7699. How long did you remain with Mr. Springall? Until the end of the year, when he left.
7700. Will you tell me how you used to set about making up these pay-sheets? Mr. Burrrowes and Mr. M'Pherson would bring in particulars of the work, and they would make out a draft sheet showing the amount of work done by each gang—the prices, in a great many instances, they would carry into the first column, but not always. These would be handed to Mr. Springall, and Mr. Springall would check their calculations, and he would fill in the amount of rations, powder, and fuse, and make the necessary deductions in respect of these in the third column.
7701. From whom did you get the names? From the superintendents. I may say that under Mr. Springall I very seldom had anything to do with making out the draft-sheets, and they only came into my hands to check finally, and then engross. There was one exception. There was one draft-sheet I never engrossed in my life.
7702. What was that? The Heathcote Agricultural; Mr. Bell's sheet it was called. Mr. Springall engrossed it always.
7703. Had you anything to do with the draft-sheets? Yes; from them I used to make out the clear sheets, and there is an average sheet copied from the general sheet, and I used to make out the amount of the averages from it, to show from the amount earned how much each man actually earned per day.
7704. Where did that go? To the Casual Labour Board, and from there, I presume, it went to the Audit Office.
7705. Had you the making of that out? Yes.
- 7705½. Was a copy of that kept? No; a copy of that was never kept.
7706. Look at these draft abstracts of payments made from 4th to 17th November, 1888, for different works in the Southern District, and see if you can pick out one of these that you have had anything to do with? Well, I have had to do with all of them.
7707. Look at the first sheet. Had you anything to do with that? I copied the average sheet from it afterwards. That would be all I had to do with it.
7708. Did you make out the pay-sheets for the men? I never remember making out the pay-sheets for the men, except once. I cannot tell the date of that one.
7709. Will you look at this pay-sheet of Heathcote Agricultural? Yes. [*Pay-sheet put in and marked K.*]
7710. Can you tell me who prepared that? That is Mr. Springall's handwriting.
7711. Had you anything to do with that? Nothing; except afterwards, as I told you, I had to make out the average-sheet.
7712. Will you compare this sheet with the draft-abstract before you, and see if there is any discrepancy? There is a name interposed—J. Flemming and gang, breaking 230 cubic yards at 2s.; amount earned, £23; deducted for rations, £4 18s. 7d.; cash paid, £18 1s. 5d.; signed, James Flemming.
7713. Who is it witnessed by? It is witnessed by Mr. Springall; that is his signature.
7714. Now, can you give me any explanation or any information about that? Directly, I do not know that I can give very much; indirectly, I can give a good deal.
7715. Let me have the indirect information? Flemming, this man in question, was living at Hurstville, and

Mr. H. J.
Goodman.

8 April, 1889.

and we all used to be together—the two tent-makers, Flemming, and myself. Flemming used to sleep in the iron store, and we used to sleep in the back. He used to say to me on pay-days that he was going up to get money for his old gang, leading me to suppose that a gang that he had been working with was still in existence, and that to oblige them he went and got the money. It struck me once when I was making out the average-sheets that his name was not upon the abstract, and, knowing what a liar the old fellow was, I thought he was simply amusing himself at my expense. I said to him on one occasion, "You do not get paid up the line as a ganger." He said, "Oh, yes, I do?" I said, "Your name is not on the sheet." He replied, "You must have made a mistake," or words to that effect. I still thought that he was only sticking to his former lie. After Christmas, I think it was on the 3rd or 4th of January—I think it was on a Thursday, but I forget really the actual day—I was talking to Mr. M'Pherson's groom, who was sleeping there that night—old Flemming in the meantime having left. I said casually to him, knowing that he had been working on this particular field, "Did old Flemming get paid up your way; he used to say he did, and yet I never saw his name on the sheet." He said, "Oh, he did; he used to draw a considerable amount—some £13 or £14 every turn." I then passed the matter off with him. On the following morning, first thing, I looked at the draft-sheets, to assure myself, and found his name was not there at all. I thought that there must be something mixed up. However, I waited until the Saturday afternoon, when I saw Mr. Bell, the overseer, and asked him the same question—whether Flemming got paid up at his place as a ganger. He said, "Yes, he did. I always used to complain to Mr. Springall about putting him on my sheet, and increasing the amount there." I said, "This seems a bad thing, what had better be done about it. I must tell Mr. Burrowes about it." I asked Semple who he got paid for, and he replied, "The old fellows down here."

7716. Who is Semple? Mr. M'Pherson's groom. Mr. Bell told me that he used to understand that Flemming would pay us our money. He said he was always under that impression until he saw me getting paid last Saturday. On the Saturday night, when Mr. Burrowes returned from town, I informed him of my suspicions, and together we went into the office, and I showed him that Flemming's name was never on the draft abstracts. We hunted back, I think, five or six pays, and we could look no further as the press-copy letter-book, containing the engrossments of the vouchers, had been sent into town by Springall when he left, and I have never seen that book since, and until you gentlemen showed me that letter-book I had no idea where it was.

7717. Had you any further conversation with Flemming after you discovered what the facts were about this? No. I have only seen Flemming on three occasions since.

7718. Had this Flemming that you have been speaking of ever anything to do with Mr. Burrowes? Yes; it was part of his duty to groom his horse. He was a general rouse-about about the place.

7719. Was he ever a ganger? Never that I know of; but I could not say of my own personal knowledge. I have heard from others that he was.

7720. But at the times you speak of, are you sure he was not a ganger? I am certain he was only a rouse-about.

7721. Can you tell this Commission about the dates that you made these inquiries, when your suspicions were first aroused? I think it was about the beginning of November when my suspicions were first aroused—when he first said to me that he was a ganger—and I thought of looking for his name on one of the draft pay-sheets.

7722. Was that November, 1888? Yes.

7723. Were you ever present at any of the pays? No. Mr. Springall always went up himself. I used to remain and take care of the office.

7724. Do you know how long this irregular representation of Flemming as a ganger had existed? No.

7725. Do you know how many pay-sheets it extended over? I do not. After my suspicions were finally aroused I had not a chance of looking at the press copy-book.

7726. When your suspicions were reduced to what you believed to be a certainty, did you report the matter to your superior officer? Not immediately, inasmuch as I was not satisfied in my own mind. I saw Mr. Bell on the Saturday, and waited until Mr. Burrowes came up from town on the same evening.

7727. Did Mr. Burrowes appear surprised? He did indeed.

7728. Do you recollect what he said? I do not know that I could give the exact words. I could give the substance. He said, "I always thought there must have been something of that sort going on, but I did not know in what way, because when Springall came to the Park he had nothing. He certainly has not spent much up there, but he always had a house in town as well, and I could not see where he was getting the £300 or £400 to start this hotel with."

7729. I would like to be quite clear as to what it was that first aroused your suspicions? I think the first active thing was the conversation with Semple. The other thing I merely looked upon as vapouring.

7730. Did I understand you to say that you were living in the same tent, or near the same place, as Flemming? At the back of it. I will describe as nearly as possible the position of affairs. Behind the office at Hurstville was the store, and Flemming had a place there. Behind the store was my tent.

7731. You said you made some remark to Flemming about what he went up to the pay for? Yes; he said he went up to get paid for his gang.

7732. At that time, do you know if he had a gang? I do not know of my own knowledge.

7732½. What is your belief in the matter? Well, I do not believe that he had a gang.

7733. Had he, from his position, any opportunities of getting things out of the store without anybody being any wiser? Indisputably he could.

7734. Any tools or things that were in there? Yes.

7735. Where did you get the information from from which you prepared the average sheets? From Mr. Burrowes, and occasionally from some of the overseers. The overseers prepared sometimes their own pay-sheets.

7736. Then those average sheets would not be consistent with the pay-sheets if Flemming's name was on the latter and not on the former, and the average sheets that went into the head office would contain different information to the pay-sheets that went in some time afterwards? Certainly, unless somebody interpolated the same name in the same way.

7737. When did it first occur to you to look into the draft abstracts to see whether Flemming's name was on them? Some time about the end of November, 1888.

7738.

- Mr. H. J. Goodman.
8 April, 1889.
7738. After you reported the matter to Mr. Burrowes, what action did he take? I cannot quite say of my own knowledge.
7739. What did he and you do? We went to the office immediately upon my reporting it. We turned up some of the back draft pay-sheets, and we turned up the Heathcote Agricultural amongst others, and I showed him in each instance that Flemming's name was not there. I made the remark to him that if Flemming's name was on the pay-sheet and not on the abstract it must have been put in by somebody. I also remarked that it was a strange thing that Mr. Springall always made up the sheet himself.
7740. Did you look over the copied pay-sheets? We could not do that, because the letter-book and other documents were sent to town.
7741. Who was in the habit of taking these off in the press copy-book? Mr. Springall.
7742. Did you ever take them off? No. I used to assist him by putting a pen in each page, as they were generally made up in lots of eight.
7743. However, when you went to investigate the matter with Mr. Burrowes, that book was not there? No; it had been sent to town.
7744. Do you know why it was sent to town? I understand that Mr. Springall stated that Mr. Davies had told him to take it away.
7745. Will you tell me again what passed between you and Mr. Bell; just let me have that clearly? I said to Mr. Bell, "By the way, there is something I want to ask you about: Did old Flemming draw money at your place as a ganger?" He said, "Yes, he did." I said, "For much?" He said, "Over £13 or £14—he would draw a large number of notes." I said, "He never was on the draft-sheets; this is a rum go." I asked, "Who did he draw the money for, do you know?" He said, "I always understood that it was to pay you fellows down here until the last pay-day, when I saw the Paymaster pay you on the platform here." On that particular day we were paid at the ticket office on the railway platform, so that the Paymaster could jump into the train immediately afterwards.
7746. Was any precaution taken on pay-days, that you are aware of, to ascertain whether the men that came up for pay as gangers were or were not gangers? While I was working in the field myself the overseers invariably were standing there as each man went in.
7747. And if the overseer at Heathcote, Mr. Bell, tells us that he knows nothing about Flemming, how are we to account for his being on the list? I suppose Mr. Springall must have put him there.
7748. Have you had any discussion about this matter, or conversation with anybody since you found it out? No.
7749. Did you report it any further than to Mr. Burrowes? No; I considered that when I reported it to him I had done my duty.
7750. Have you mentioned it outside to anybody? No; I do not believe I have to a soul.
7751. Do you know Mr. Davies, the Chairman of the Casual Labour Board? I just know him to speak to, that is all.
7752. Is there any person that you could name to us who can confirm what you tell us in reference to this Flemming business? There is nobody except the three I have mentioned—Mr. Semple, Mr. Bell, and Mr. Burrowes. They can confirm these conversations.
7753. Do you know where Flemming is? To the best of my belief he is at Coronulla Beach with Mr. Springall.
7754. At his hotel? Yes.
7755. Do you know whether Mr. Springall used to receive money from the men under his charge? Well, old Flemming used to tell me that he had taken his money from him at the pay-table. Springall told him that he kept his money from him to keep him from drink. He was often in a half-muddled state.
7756. Did Flemming tell you that he kept the money? Yes.
7757. Always? No, not always; on two or three occasions. On one particular occasion Flemming said he supposed Springall had seen he was a bit bad, and he said, "I will keep it from you, you old rascal."
7758. Would Springall return the money to him? From my own knowledge I can say that Springall used to give him some of the money back again, letting him have so much at a time. I believe that the very same day, when Flemming said he had not got 3d. in his pocket, I saw Springall give him 7s. 6d.
7759. In fact Springall used to shepherd him? Yes; he used to shepherd him.
7760. Did you ever hear of Springall selling goods out of the store? No.
7761. Did you ever hear of his retaining other people's money besides Flemming's? No; I do not think I did.
7761. Did you know a man named William R. Robertson? I just know the man; he was a carpenter.
7762. Did you know a man named Coleman? No; I never saw him.
7764. M'Intyre? No.
7765. Yule? No; these are all strange names to me.
7766. Have you any idea or knowledge as to what became of this money that Flemming received as a ganger? No; I have no idea. I always supposed that Mr. Springall took it from him; but I do not know. I had no proof that he did.
7767. During the time you were engaged as assistant store-keeper at Hurstville, did you become aware of any irregularity or improper expenditure of public moneys, or appropriation of goods, by Mr. Springall or anybody else? No; I cannot say that I did.
7768. What are you now? I suppose I may call myself store-keeper.
7769. Are you still out there? Yes. I am left in charge of all the tools that come in. I take an inventory of them, so that the Harbours and Rivers Department may have what they want of them.
7770. Mr. Franklin.] You say that there was established at Hurstville a sail-maker? Yes. There was one sail-maker, old Flemming, a carpenter, and myself.
7771. That would be the establishment? Yes.
7772. You show me a copy of the establishment sheet at Hurstville? Yes.
7773. This contains the names of those engaged about the house and store-yard? Yes. In addition to those I have mentioned there was young Frank Springall, who used to go messages.
7774. This does not show the name of Flemming;—how would he be paid for his day labour;—on what sheet? On the Heathcote Agricultural. He went up to Bell's Camp to be paid.
7775. Were there no other men in the same capacity as Flemming about the Heathcote camp? Well, there was old Pender, a reliable man, who knew any tool that was wanted, and who did odd jobs repairing them, carpentering, and fixing up barrows and things of that kind; an old fellow nearly seventy.

Mr. H. J.
Goodman.

8 April, 1889.

7776. Where was this money paid? Well, Mr. Burrowes, as a general rule, used to draw his in town; the others at the different camps.

7777. Was it necessary for the men who were at Hurstville to go to some other place for their money? No; they need not go unless they wished to convenience themselves by so doing.

7778. As Flemming's name does not appear on the Hurstville pay-sheet, did you say you were surprised at his going to Heathcote to get his money? Yes; because what was the object of his going up there?

7779. Then you mean to say that, as he was engaged as a groom at Hurstville, his name should have been properly on the Hurstville sheet? Yes.

7780. Can you tell the Commission how Flemming at that time got his day's wages? He always used to go up the line. I believe on one or two pays he used to go to the Illawarra Road, but generally he went to Heathcote.

7781. And he would draw for this gang? Yes.

7782. And you do not believe he had a gang? I do not believe there were any such men in existence as his gang.

7783. You have never told us where this man Flemming was paid for his services to Mr. Burrowes, as groom? It does not appear on the sheet. I can only speak of my own knowledge—that he was paid on the Heathcote Agricultural, on Bell's sheet.

7784. Will you look at this. I am showing you the Waterfall contingent sheet for wages from the 14th to the 27th August, 1887: Flemming James; twelve days, at 5s.; amount earned, £3; deducted 15s. 2d. for rations; cash paid, £2 4s. 10d.; signed, James Flemming, and witnessed by Cheney? Yes.

7785. Now, at that time, was he properly paid for day labour at the rate of 5s.? Yes.

7786. Can you tell me whether 5s. a day was the ordinary rate of wages for the services rendered to Mr. Burrowes? No; I believe 3s. 6d. a day was.

7787. Do you know the man's signature at all? Yes; I know the signature.

7788. Is this the same signature (*signature of Flemming produced*)? No; I do not think it is the same.

7789. In such a very small staff as there appears to have been at Hurstville, should you not have known how any individual was paid? I certainly knew how all those that were on the spot were paid, as I was always on the spot. I did not know how Flemming was paid.

7790. But you knew he must have been paid somewhere? Yes; I knew that.

7791. Did you not know as a matter of fact that he used to draw his money every fortnight;—if you look at Mr. Bell's sheet you will find Robertson and eight men—O'Dwyer and eight men? Yes.

7792. What is the reason his name did not appear on the sheet, especially seeing that he was paid in a gang? I thought he was telling a lie when he said he was paid as a ganger. I thought he was simply on a gang up there.

7793. You told the President that you were surprised that this man went up the line for his money? Yes; I was surprised, because I thought he should have been on the Hurstville sheet.

7794. You were surprised that his name did not appear on your sheet? Yes. The proper way would be to charge for the whole of the men in the establishment on the one sheet.

7795. Do you know whether there were any other men at the National Park engaged as grooms in charge of gangs? No; I never heard of anybody else. The only man who kept a groom was Mr. Burrowes; until latterly Mr. McPherson did so. His groom is paid separately.

7796. Do you know whether, supposing there were several men doing rouse-about work at the camp, they would be down for piece-work under a ganger? I do not know that. I certainly understood at one time that Flemming had a number of rouse-about; but I was not long at the main camp, so I do not know.

7797. Do you know whether Flemming represented a number of these rouse-about at these pays? No; at that time there were no rouse-about under him.

7798. I want to be quite sure that there were no men about the camp doing chance work, who were represented as a gang of men headed by Flemming? I cannot distinctly say that there was not; but my opinion is that there was not.

7799. You would know, because you were making out the pay-sheets there? There was not to my knowledge.

7800. Then Flemming actually lived within the store at Hurstville? Yes; within the iron building where the tools and tents were kept.

7801. Was this the only place where stores were kept? Yes.

7802. Only stores were kept there? That was all.

7803. You were acquainted with the system of issuing rations adopted by Mr. Springall? Yes. I know that thoroughly. I went, as cook, for the rations day by day for a considerable number of months.

7804. Supposing that Flemming was charged for a considerable number of rations that were not issued at all, what became of the rations? They would fall to the store-keeper, who would have them in his own hands.

7805. Would not that be likely to cause some inquiry regarding the system of issuing stores? It certainly would. It would be very hard for the store-keeper at Hurstville, when he gets in the returns from a number of camps, to send in anything of that kind. In a case like Flemming's, where Flemming was at Hurstville, and the rations were charged some other place, it would be impossible to send the rations on to that place for any length of time without exciting suspicion.

7806. Do you know how Springall used to do with the rations? No. As a matter of fact, during Springall's *régime*, I never had anything to do with the rations.

7807. I ask you how the pay-sheets, showing the total number of men paid, we will say at Heathcote Camp, and the stores issued would correspond with that number of men if it were found that there were from seventy to eighty rations not issued during the fortnight—how would that be balanced, supposing there were a check at the head office? The only way that I can explain it would be that the rations would be put in (inasmuch as the name was a bogus name), so that the amount would look right in Sydney.

7808. Supposing the voucher was incorrect and stated more than was absolutely required, there must be a greater number of rations than was necessary? Yes.

7809. And you cannot tell the Commission how these would be disposed of? No, I cannot.

7810. Do you know as a matter of fact that these rations were made to agree with the number of men? No, I do not.

7811.

- Mr. H. J. Goodman.
8 April, 1889.
7811. *Mr. Waller.*] How long did you know Flemming? I only knew him since I came down to Hurstville, in September.
7812. Between what dates? I was down at Hurstville between the 1st of September and the 31st December.
7813. And the year? 1888.
7814. Did you ever see him before that? I have seen him at the National Park.
7815. During that time, between September and December, what was his ostensible work? Cleaning Mr. Burrowes' horse and doing little odd jobs that had to be done about the place.
7816. Was he principally in Mr. Burrowes' service? Yes; but not absolutely. His principal work was to look after Mr. Burrowes' horse, but he used to do numbers of things for Mr. Springall.
7817. How many men were there in the capacity of rouse-about and sail-makers, &c.? There was myself; Goodman; Pender, carpenter; Flemming, rouse-about; Taylor, tent-maker; and Frank Springall. He was Mr. Springall's son, and he acted at first as messenger. Since the beginning of the year another tent-maker came back from Bulgo, named Larsen.
7818. What pay were you all receiving? Flemming, I believe, was getting 3s. 6d. a day; Pender, Taylor, Larsen, and myself were receiving 5s.; and Frank Springall was receiving 20s. a week. He acted as messenger, took down the ration order to Kidman's, and conveyed messages to the different camps.
7819. Had he access to the stores? Yes.
7820. In his father's presence? Either that or without.
7821. Was there any check upon him? None whatever.
7822. Could he deliver goods from the stores? I doubt if he ever did that, because I was seldom away from the place.
7823. Where did you get paid for your work? I got paid at the office at Hurstville. We have an office there, or rather a house that we use as an office. That is where the store is.
7824. And where all the pays were made? Yes.
7825. Did every man that you enumerated just now get paid at Hurstville except Flemming? All of them except Flemming.
7826. Would Springall of necessity have been aware of the fact that Flemming was the only absentee at the pay-table in the office? Oh, yes; he must have known it, because he would himself go up and witness the pays up where Flemming got paid.
7827. Who attended the pays in the office? I have seen three paymasters there—Mr. Hinchcliffe first.
7828. Who was with him? He was generally by himself.
7829. Name the others? Mr. Hibble and Mr. Larnach on two occasions. He came by himself also. They would come up by the 7 o'clock train to pay at Cook Park; then young Frank Springall would go down with the pay-slips to Cook Park, and then they would come to the Hurstville office, and be there until the Waterfall train left at 10 o'clock, when they would go on to pay there, and Mr. Springall and the other officers would go up with them.
7830. What other officers attended the pays from your office? None; Mr. Burrowes always used to go away to Liverpool on that day.
7831. Was Mr. Burrowes always absent from the pays? Yes; you see the camps up that line got paid on one Wednesday, and then Mr. Burrowes would have to go and measure up for the following Saturday, and the Liverpool camp would get paid on the next Wednesday.
7832. So that you can positively state, of your own knowledge, that Burrowes was never there on these pay-days? He was never there that I saw.
7833. You were always there? Yes, I was always there—never missed once.
7834. Do you know Cheney? Yes; he is a detective.
7835. Do you know Tindall? Yes; he is a detective.
7836. Did either of these men ever attend the pays? Cheney used to go with Mr. Josephson up the Bulgo and Camp Creek way.
7837. Any of the others? No others.
7838. Will you describe this man Flemming? He was an oldish man with a gray beard; about 63 or 64 years of age.
7839. Was he tall or short? About the medium height. I think he must have been a reddish man, but he has grown gray.
7840. How many Flemmings were there on the works? There might have been another, but I am not sure.
7841. Do you think it would have struck you if you had seen more than one Flemming? Yes; but there are certain names in the sheets representing different men. There are two or three Robertsons.
7842. How did you take precautions against two or three of the same name being one and the same? That did not come within my province. That is a question for the superintendent, who made out the sheet.
7843. You have no knowledge of there being more than one Flemming? No knowledge at all.
7844. What became of the draft sheets that the other pay-sheets were made from? They were kept in the office as a rule. I think they were sent in at the same time as the other papers.
7845. Did you ever see those draft sheets—whether they were blue paper or white paper? They were made out on ordinary paper.
7846. Were they big sheets or small sheets? Different sizes—some on little bits, as the overseers would make them out.
7847. What overseers would that be? Any overseer; and Mr. Burrowes made out some of them.
7848. What sort of paper would he use? Any kind of paper.
7849. As a rule, did he send his work in in good style? Yes.
7850. And these sheets—did he hand these to you or Mr. Springall? To Mr. Springall.
7851. Always? Yes.
7852. You never had the handling of these to make out a fair copy of them? No; I only had the abstracts.
7853. Supposing you made out a contingent voucher or pay-sheet from the abstract, would you check the names to see that they were correct? Invariably I would do so.

7854. I mean, supposing there is a pay-sheet here—Heathcote Agricultural, from the 4th to the 17th November, 1888—would you check that pay-sheet against the abstract, to see that no names were omitted? Yes; and I would check it by the net amount earned. I knew so long as I had all the men's earnings that I was correct.

Mr. H. J. Goodman.
8 April, 1889.

7855. Did you check the correctness of these amounts earned? I checked them before I engrossed them at all.

7856. That is, to see that the extensions were correct? Yes.

7857. Are all the pay-sheets correct that you made out? Correct, with a few trifling errors in calculation. I heard afterwards that there was one or two mistakes made in the extensions. On one occasion some of them were sent back. There were only two of us doing them, myself and another man, and we had been writing with a thick pen, so they sent these back to be re-engrossed.

7858. Are you prepared to swear that any name which appears upon the pay-sheet, and is not on the abstract, has been placed on it after it was in your hands? Certainly it was.

7859. That you swear to? Yes.

7860. Did Flemming draw rations? Yes; he drew rations every day.

7861. Did he draw rations for eight men? No; he drew rations for himself. He and Pender used to draw together.

7862. Is it impossible that he could have drawn for eight without your knowledge? Yes.

7863. I am referring to his name appearing as a ganger, with seven and himself;—where would he get the rations for the seven—at Heathcote? I do not know.

7864. Who was storekeeper there? I do not know.

7865. Whether he drew rations at Heathcote or not, he drew them between September and December, 1888, at Hurstville? Yes; he was drawing them there; that is a certainty.

7866. Did it ever strike you as peculiar that you were never asked to make out the Heathcote pay-sheet? No; it was only when I came to look through the average-sheets that I noticed it.

7867. You never did make out the Heathcote pay-sheet? No.

7868. Were there other pay-sheets that you did not make out? Undoubtedly. There was another clerk named Davey, and I used to make out the ones that were handed to me, and he made out the others.

7869. Do you know Flemming's handwriting? No; I do not know it.

7870. Do you think he is a man that would write a good or a bad hand? I should think a bad hand.

7871. You see his signature on the Heathcote pay-sheet, from the 4th to the 17th November? Yes. I would take that to be a fair sample of his handwriting.

7872. What was Flemming's old gang? I could not say of my own knowledge. I understood that he had charge of the rouse-about in the camp. I do not know if that is true—it is only what I was told.

7873. What did they do? They were employed cleaning out the camp at the National Park.

7874. Do you know how long they were there? They were in the camp from the time I went up on the 5th of May, 1887, and I do not know how long they were there before that. I do not think the camp there has ever absolutely ceased, but it has ceased to be a large camp for the last eight or nine months.

7875. What sort of a man was Mr. Springall? I always got on splendidly with him in the office. He is a bit gruff, and has a sharp way of speaking.

7876. Were you on good terms with him? Yes.

7877. When did you see him last? On Thursday week, I think it was. He was standing at the gate of his house.

7878. At Coronulla Beach? No; it was before he left Hurstville.

7879. I thought he left Hurstville some time ago? He left the employment of the Casual Labour Board on the 31st December, 1888.

7880. And he has been living in Hurstville ever since? Yes; he still kept the house there, but he has been at the beach himself, looking after the hotel.

7881. How far was his house from the store? About a quarter of a mile I should think.

7882. And you had constant opportunities of seeing him? Yes.

7883. Did you have any conversation with him about this man Flemming? No.

7884. Did he ever speak to you about the probability or possibility of you being called upon to give evidence before this Commission? Yes; he said to me, "Do you remember the way in which the vouchers were made out in the office?" I said, "Yes," and he added, "You remember that as an invariable rule they were all press-copied first, and then, when they came from the press copy-book, Mr. Burrowes would take them and sign them." I said, "Yes, I did." He said, "Somebody wants to make out that there was interpolations made on the vouchers after Mr. Burrowes signed them. I shall probably have you called before the Commission to say that no interpolations were made."

7885. When was this? This was on the occasion I told you of. Last Thursday week; I think that is the only time I have ever spoken to Mr. Springall since he left.

7886. Are you sure of the date? I believe it was last Wednesday, or Thursday, or Friday.

7887. Could you satisfy yourself as to the date in any shape or form, because it must have been about the time he gave his evidence before the Commission? Yes; it was on the Friday. I had my two children out there. My wife had been ill, and I had another woman looking after the children, who sent them back to me as her husband was going to repair the house. I had been down taking the children to another woman, and was then returning. It was on the evening of last Friday week I saw him.

7888. In the evening was it? Yes; it was about half-past 6 o'clock—just after dark.

7889. Was it in the store or in the house or where? He was inside the fence of his house at Hurstville last Friday week the 29th March.

7890. By-the-bye, did you know that he had been up before the Commission? I really forget. I might possibly have said, "Have you been examined?"

7891. Did he tell you that he had been subpoenaed to attend? Yes; I certainly had that impression from him.

7892. Have you seen Mr. Burrowes lately? Yes.

7893. Have you had any conversation with him regarding this Commission—regarding any evidence that you might be called upon to give? Not the slightest.

7894.

- Mr. H. J. Goodman.
8 April, 1889.
7894. You have had no conversation with him regarding Flemming's case? Certainly not. I have hardly had any conversation with Mr. Burrowes since I reported Flemming's matter to him. Once or twice when I have seen him I have asked him if he had seen the press copy-book yet.
7895. Have you had any conversation with anybody, directly or indirectly, about this matter, or any other matters connected with the Board? No.
7896. Supposing this affair of Flemming's should prove, on investigation, that he has been wrongfully receiving pay as a ganger, would it be possible for any other man to have wrongfully received pay as a ganger too? Oh, that follows as a matter of course. If one man could do a thing another could.
7897. Have you any reason to suppose it was done? No; I have no reason to suppose so.
7898. What did Mr. Burrowes say to you when the disclosures were made about the pay-sheets? He said he was sorry, but he had had suspicions lately. He wondered how Springall was able to raise sufficient money to build this hotel. He must have had at least £300 or £400, and he wondered how Springall could have saved that, when he (Burrowes) used to receive a larger salary and found it only sufficient to pay his way.
7899. Was he building this hotel when he was under the Board? Yes. I think it was about the latter end of November that he started to build it.
7900. Did he ever go out there when he was building it? Yes; he went out there once or twice before he left.
7901. By whose authority did he go out? He used to take leave himself.
7902. Without reference to the superintendent or the Board? Yes.
7903. How far is it from the office to where he was building this hotel? I have never been down there; but I have been led to believe it is about 9 or 10 miles.
7904. How often did he go down to see how his hotel was progressing? About once a week, I think.
7905. For what period? For about five or six weeks.
7906. How long would he remain away? He would go by the afternoon train—the 3 o'clock train, to Sutherland, and have somebody to drive him down.
7907. Would that somebody be one of the unemployed? No; I think not. It was a man named Lobb that would send the vehicle, but I do not know whether or not one of the unemployed was driving it.
7908. How did Mr. Springall do as regards his railway fare? He had a pass, I think.
7909. And he used this pass? I presume so.
7910. And did he draw his pay and rations for the time he was away? He took his pay and rations, and went away on an average about once a week.
7911. And when would he get back again? That evening.
7912. Did any other gentleman in the office of the Casual Labour Board take these outings? I do not know of any.
7913. You did not consider it necessary to mention this matter to the superintendent or to the Casual Labour Board? No; I did not consider it to be my business to do so.
7914. Did Mr. Burrowes ever in the course of his business require Mr. Springall during the times he was absent? No; I do not think he did.
7915. Did you ever speak to Springall or lead him to suppose that you suspected anything about Flemming? No; my first suspicions were actively aroused after he had left, and I do not know that I should have said anything to him under any circumstances.
7916. Is it possible that Flemming could have had a gang, or been in charge of a gang, from September to the time he left to occupy the position of groom and rouse-about to Mr. Burrowes? It is certainly impossible. He could not have looked after them, being down there.
7917. When was it when Mr. Bell told you that he objected to Flemming's name appearing in his pay-sheets? It was, I believe, on the 5th of January of this year. I forget the exact day; after New Year's Day, but I think it was on the 5th January that the conversation took place.
7918. Did Mr. Bell tell you to whom he had made this objection? Yes; to Mr. Springall.
7919. Did he tell you on what date he made the objection? No.
7920. Do you think constable Cheney ought to know this man Flemming by sight? I cannot say that.
7921. Was he much about the place? No; he used to be there on the pays, but he used to pass on. He was at the Bulgo and Camp Creek pays.
7922. What do you know about Robertson? I do not know anything about him.
7923. Nothing whatever? No; nothing.
7924. About what day did you speak to Mr. Burrowes about this matter of the pay-sheets? The same day I spoke to Mr. Bell. I think it was on the 5th, on the Saturday after New Year's Day.
7925. So that you really did not bring this matter under anybody's notice until the new year? I did not have this conversation with Semple until the new year, and Flemming had left.
7926. I see here Semple's name at the bottom of the Heathcote Agricultural pay-sheet [*Exhibit K*];—will you be good enough to read it? Yes; Semple J., cutting drains, 23 chains, at 7s., £8 1s.; spreading, 14 chains, 2s., £1 8s.; deduction, £2 5s. 6d., rations; cash paid, £7 3s. 6d.
7927. Would that be one man's pay for a fortnight? No; it is three men's pay.
7928. Who was that man Semple? He had been a ganger up there.
7929. Are you sure he was a ganger? Yes.
7930. Who was overseer there? Mr. Bell.
7931. Does he appear on his proper sheet? Oh, yes; he was always on Mr. Bell's sheet.
7932. See if you can find the press-copy of the same date as the voucher you have read? Yes—here it is.
7933. Whose writing is that? It is Mr. Springall's.
- 7933½. As regards these rations, who was the contractor for the supplying of them? Kidman. He delivered them at the various camps.
7934. Who took delivery of them? They were generally left at the railway station, and the storekeeper took charge of them.
7935. Were there any outside persons taking delivery of the rations? No; I think not.
7936. Who ordered the rations? Mr. Springall.
7937. Independently of anybody else? Yes.
7938. That is, he could order 1,000, 1,500, or 2,000 rations, as he liked? Yes. So far as I know he used to order the amounts asked for by the different storekeepers in the camps.

7939. How would he know what quantities to order? Sometimes the storekeepers would send down the amounts that they wanted on a particular day.

7940. Now, if a pay-sheet disclosed the pay of a certain number of gangers and their gangs, would not the pay-sheet be incomplete unless it showed that the rations for each of these men had been drawn? No; you could hardly say that. As a rule, if the amount of the deduction represented rations only we just put it in; but it also represented powder and fuse, and we could put down 5 lb. of powder and 1 lb. of fuse. Then the checking officer in the head office would be able to calculate the rations also.

7941. Would not your suspicions be aroused if a man's name appeared as a ganger, entitled to a certain amount of pay for himself and his gang, and against that name there was no debit on account of deductions made for rations and such things as would be required for clearing and so forth? Certainly. In such a case some explanation is given. An inquiry would be made how there was no debit for rations.

7942. In the column charging for rations, were there any other items to be deducted? Yes, undoubtedly; powder and fuse. For instance, if you look at the top one of these vouchers—Samuel Merry—you will see 98 R.—that is rations; so many P.—that is powder; and so many F.—that is coils of fuse. They are all put in and deducted.

7943. What ought Flemming to be charged for for his gang, 230 yards, at 2s. per cubic yard—that would come to how much? His men and he ought to earn for that £23, and he has a deduction of £4 18s. 7d. on account of rations.

7944. How many men would that represent on account of rations? That would represent ninety-one rations. If I were making out the average of the gang I should make it that it would be a gang representing seven men, and so many of them would possibly be away on the Saturday and Sunday, so that seven rations might have been stopped.

7945. Can you explain the meaning of this voucher [*Exhibit K*]:—Robertson A. and eight men, 96 days, 3s. 6d. is the rate, the amount earned £16 16s.; stone-breaking, 20½ cubic yards, at 2s., £2 1s. 4d., total earned; 128 rations, £6 18s. 8d.; cash received, £11 18s. 8d.? Yes. In that gang of Robertson's there were a number of old men paid 3s. 6d. per day, and there were also in each gang three stone-breakers. They drew rations, and the stone-breakers were put on the back of the pay-slip, and then they would add up.

7946. So that these men were paid at the usual rate of 3s. 6d.? Yes.

7947. Would it have been a simple matter in connection with Flemming's name appearing on the pay-sheet to have entered these debits on account of rations, which rations were never issued? Oh, yes.

7948. Would it have been a simple thing on the part of Kidman, if Kidman had been so inclined, and the storekeeper so inclined, to have carried on a bogus account for rations which were never delivered at all? I do not know whether it would. I suppose it could have been done. The system of ordering was this:—You sent your order each day for so many rations, and then you received from Kidman so much bread, meat, potatoes, and so forth, and the quantities received would be checked? I do not see how it could have been done. The rations must have been sent out, because if more rations had been ordered for the camp than had been sent the fact would have been noticed. I do not see how it could be done. The absolute amount of meat, potatoes, bread, and butter, representing the number of rations ordered, is sent out by Kidman every day, unless he went deliberately and sent less numbers to each camp, and even then it could not be done.

7949. But if he knew you were ordering too many for a particular camp? Then the storekeeper at the other end must have known, because he would have been receiving more bread, and everything else, than he required.

7950. Was it a fact or otherwise that complaints were made that rations were delivered short often? I have heard complaints being made of the weights being short and of the bread being bad; but I know on some occasions the weights have been over. Some days he could not send over carcasses of the exact weight.

7951. Then if it were impossible for rations to be ordered from Kidman, and those rations not to be delivered by Kidman, and if also there were only a few cases of complaint about the shortness of weight, how can you account for the rations for Flemming and gang, if Flemming was a bogus ganger and had no gang with him? I do not know, unless they were bogus rations.

7952. Who would receive the money for the bogus rations? I could not say.

7953. Who would receive the money for the rations deducted? The Government—the Casual Labour Board in the first place, and Kidman in the second.

7954. Kidman would send his accounts every month, and they were checked against what? Against the pay-sheets.

7954½. Therefore, if Kidman's accounts were rendered on every occasion and showed no debit for a certain amount of rations, would not these pay-sheets and Kidman's accounts be in opposition to each other instead of balancing? Yes; I should think they would.

7955. Would not somebody's attention have been called to the fact that Kidman was charging much less in his accounts than he was entitled to receive according to the pay-sheets? I do not know about that.

7955½. Could any man checking these accounts, and finding that Kidman's debit notes were much less against the Casual Labour Board than they ought to be, pass that over without notice? I should think not.

7956. Your difficulty is, what became of the money deducted for these men—for Flemming and his gang in respect of rations, if he were a bogus ganger? Yes; I do not see how it could be worked.

7956½. Presuming Flemming to have been a bogus ganger, presuming Kidman to have been quite clean-handed, presuming the storekeeper was the person who committed the wrong, if there was a wrong, that he ordered these rations as if Flemming and his gang were correctly on the sheets,—could he dispose of these rations, if they were delivered, without your knowledge? No; he could not. They should go straight up to Heathcote.

7957. Then does it follow that these men up there must have been a party to the swindle, if there was a swindle? I do not think that the men up there were likely to be in it. The only way that I can see would be that the number of rations too many would be sent on the last day of the order, and it would be gradually worked down again until the numbers were supplied for the next order.

7957½. That might happen once or twice, but if it occurred week after week regularly, would it not seem strange, eight rations too many coming in week after week? Well, I do not know that. The storekeeper might have allowed a few extra rations to the staff. That is the only possible explanation that I could give.

Mr. H. J.
Goodman.
8 April, 1889.

- Mr. H. J. Goodman.
8 April, 1889.
7958. Could not Mr. Springall have got these rations delivered to him without your knowledge—without their having to go to the Heathcote storekeeper, when he was able to put down a man's name, supposing he did do it, on the pay-sheets, when it ought not to be there? Oh, yes; the rations could have been delivered at his own house.
- 7958½. Without your knowing anything about them? Yes.
7959. Might he just have given instructions for Flemming's rations to be sent up to his house? Yes.
7960. Or simply to send eight rations to his house? Yes.
7961. Was his house a perfectly private house? Oh, yes.
7962. You had no right to go into it? None whatever.
7963. Who rented it? Mr. Springall rented it, and he paid the rent out of his own private means.
7964. Did Mr. Burrowes receive any rations? Mr. Burrowes never used to take any rations. He had a private house also. I believe it belongs to a market gardener.
7965. Who paid for the rent of it? Mr. Burrowes himself.
7966. Do you think it quite possible that these rations may have been delivered at the private house of Mr. Springall without the knowledge of anybody connected with the Casual Labour Board? Yes.
7967. Do you think it absolutely necessary that these rations should have been ordered and delivered in order to prevent suspicion arising when the pay-sheets were checked at the office? Most certainly, because if the discrepancy had appeared on the pay-sheets once there might have been an explanation furnished, but if it happened time after time there could not.
7968. Are any of the storekeepers, superintendents, overseers, and such like traders? Not to my knowledge.
7969. Money-lenders? No.
7970. Tobacco-sellers? No.
7971. Would it have been possible for any of these men to have traded through the medium of other people if they did not trade themselves? I do not think they could. It would have leaked out.
7972. It has already leaked out in the reports of the Select Committee? Oh, do you refer to the commencement of the Board?
7973. Yes? Oh, Mr. Springall himself kept a store then.
7974. Did anybody else keep a store? Yes; Mr. Kidman.
7975. Was there any store on Government ground close to where the camps were? There was one about 1½ mile off. They sold principally potted stuffs. I do not know whether they sold tea and sugar. I have bought there myself salmon, pickles, and cheese, and things of that kind.
7976. I would like you to give the Commission some idea, supposing that the rations for Flemming and his gang were not sent to the store proper, how they would be sent, without suspicion or knowledge arising, to Springall's house? I am afraid I cannot throw any light upon that. I cannot say how they would be sent without some person's knowledge.
7977. Did you know of any small parcels being delivered at Springall's house from the railway-station? No.
7978. What family had Springall at his place? There was his daughter, his son Frank, his younger son Percy, but he went away to Queensland with his uncle; and then there were only Frank and his daughter.
7979. Did he keep any servants? No; but there used to be a young lady stopping there.
7980. So that there would be a family of four? Yes.
7981. And I suppose a family of four, with good, healthy appetites, would consume pretty well rations for eight? Yes. I have known two do that.
7982. *President.*] Do you know a man named Johnson, who was assistant to Mr. Springall? Yes.
7983. Has he been at the store while you have been there? Not at our store. He has been at the store at the Illawarra Road.
7984. Do you know anything of Johnson? I never was intimate with him.
7985. Was there any means by which a man could buy extra rations? No; I wanted to buy some particularly on one occasion, and I had to walk down to Sutherland for them.
7986. Were you present when Springall packed these books up and sent them away to the Board office? No; I was away.
7987. Was Mr. Burrowes there? No; he was away.

Francis Jacob Josephson called in, sworn, and examined:—

- Mr. F. J. Josephson.
8 April, 1889.
7988. *President.*] What are you now? I am a clerk in the Immigration Office.
7989. Did you hold any position in connection with the Casual Labour Board? Yes; I was Registrar and Assistant Paymaster.
7990. When were you appointed to that position? When the Casual Labour Board was first appointed.
7991. By whom? Well, the fact is, I was away on leave of absence at the time, and I really do not know who appointed me unless it was Sir Henry Parkes.
7992. How long did you remain in that capacity? Twenty-one months.
7993. Will you tell the Commission what your duties were? My duties were to register the men as they came in. They were admitted in lots of from six to eight. A constable named Cheney allowed them to come in; and I registered them. Detective Tindall used to issue tickets to them, stamped with the Casual Labour Board stamp, and put their names on them, and send their names to the overseers of the different places they would have to go to. Then, when they went out, the Chairman signed a pass, and we took them up to the station and got passes for the number of men going to the different works, and they were distributed over them. When pay-day came I used to go out to pay the men, having from £400 to £900 with me.
7994. Did anybody go with you on these occasions? Detective Tindall came with me once or twice, or it might be three times. Constable Cheney always used to accompany me after that. Sometimes we had to walk the distance between the two camps—a 16 or 18 miles walk.
7995. How often did your duties take you outside the head office? About three times a fortnight, as nearly as I can remember.

7996. And what did you do when you were in the office? The registration of the men. We were always sending men out.

7997. Was the whole of your time taken up registering the men? Yes.

7998. Had you any other duties? None whatever.

7999. Who was in the office with you? Detective Tindall and Constable Cheney.

8000. In what office were the others? There was Mr. Davies, Mr. Hinchcliffe, Larnach, and Hibble upstairs.

8001. Did your duties take you into their room? No, except in the morning early, after the correspondence came in. I would go up-stairs and ask the Chairman if any men were wanted for the different works. A lot of private employers would be wanting men, and I used to find those men, and send telegrams to the employers stating what trains the men would be up by after I had engaged them.

8002. Did you do that without reference to the Chairman? No; that was the Chairman's instructions.

8003. When you used to go on these pays, who gave you the money? Mr. Hinchcliffe gave me a cheque on the bank.

8004. Did you go down to the bank yourself and get it? No; I used to go to my lunch first, and meet him at the bank at twenty minutes past 2 o'clock.

8005. He gave you the cheque then? Yes, and I cashed it.

8006. How many pays did you go to? The whole time I was there. I could not say exactly.

8007. Tell me approximately? I might be exaggerating, or I might be a little under, but I should say, altogether, about forty.

8008. How many of these did you make without anybody being with you at all? I think about eight times.

8009. Who were present with you on the other occasions? Detective Tindall, Constable Cheney, Mr. Burrowes, and Mr. M'Pherson.

8010. Where was Mr. Burrowes present at a pay? At Liverpool. He was the one that showed me the way to the Liverpool camp.

8011. Were you ever at Heathcote? No.

8012. Had you anything to do with the accounts of the Casual Labour Board? No; nothing whatever.

8013. Did you keep the books? The register books; that was all.

8014. What did they show? The names of the men and the places that they came from, and all the particulars of the men that the Government wanted me to keep.

8015. Are we to understand that the whole of your time in the office was taken up in keeping these records? In keeping these records and paying the men.

8016. But you did not pay the men in the office? No; about three times a fortnight I paid them out at the works.

8017. The whole of the rest of your time was taken up in keeping the register? Yes, and engaging men for the country.

8018. What was your salary? £250 a year.

8019. Did you ever get any gratuity or bonus at all? No.

8020. Were you under the Board during the whole time of its existence? Yes.

8021. Were your duties at the end of your employment similar to what they were at the commencement? Yes, precisely.

8022. *Mr. Franklin.*] When the numbers of the men were much reduced your work was reduced? Yes.

8023. Did they not detach you from the office for detail work in the way of checking the pay-sheets? I did check one or two pay-sheets; but that was done down-stairs in my own room.

8024. And in checking these pay-sheets, did you compare them with the stores issued, to see that the stores issued corresponded with the number of men? I did, and I found them quite correct; all in detail.

8025. You never found any discrepancy between the stores issued and the number of men on the sheet? No.

8026. You found in every case that the order for stores on Mr. Kidman corresponded with the number of men? Yes. It was just the amount of rations to be deducted from each man's pay—1s. 1d. a day for each man's rations. That was the contract price.

8027. Do you remember which pay-sheets were particularly placed in your hands for checking? No.

8028. You do not remember that they were placed in your hands for any particular purpose to check? No; Mr. Davies came down and asked me to do that. He said that Mr. Larnach being out of the office he wanted me to check a few of these pay-sheets.

8029. In what way did you check them? By taking them out in items—so many men so much per acre, and that sort of thing, and I found them all correct. It was only twice or three times that I checked them.

8030. I am producing now the pay voucher 4th to 17th November. You checked these items with the number of men who did the work, the deductions for rations, and the cash advances? Yes.

8031. Did the check of these vouchers extend to an examination of the draft voucher from which these were compiled? I could not say that. These never came into my hands at all except on these one or two occasions.

8032. I want to ask you if you knew that these vouchers, which are acquittances for the men's wages, are prepared from an original draft, and that these are fair copies of the draft? I could not answer that question.

8033. You have not had sufficient knowledge or experience? No.

8034. You are quite sure that this was the only one placed in your hands to check? Yes.

8035. *Mr. Waller.*] Do you know anything at all about the style of check that was followed in the office? No, nothing whatever—in fact, it was no part of my duty.

8036. Your duties were not up-stairs? When I was wanted up-stairs, Mr. Hibble would call out to me "You are wanted," but I know nothing about the accountant's part of the work there.

8037. Do you know Mr. Burrowes well? I have known him for some time.

8038. Did you ever see him go to the office the worse for liquor? Well, I do not know whether he was the worse for liquor.

8039. Who else was there? Mr. Larnach used to complain about having very bad eyes, and I said to him one morning, "I think you have been down at Toohey's brewery." One morning, I think I was absent at the railway-station, and he came to the office and said he was very ill. Constable Cheney took him away, and found that he was under the influence of drink.

8040.

Mr. F. J.
Josephson.
8 April, 1889.

- Mr. F. J. Josephson.
8 April, 1889.
8040. Did he often appear to be under the influence of drink? I could not say, but his eyes looked bad very often.
8041. Mr. Hinchcliffe—how about him? I do not remember Mr. Hinchcliffe being ever under the influence of drink.
8042. Did you ever see Mr. Wells the worse for drink? I have never seen him drunk. He has always seemed to be the same to me.
8043. Mr. Houison? Well, I think I have once.
8044. Any of the others? No, sir. There were no others that I have seen connected with the office.
8045. Not even the Chairman? Oh, no. He is a regular cold water one.
8046. Have you had a business education? Yes.
8047. Have you been in many offices? I have been in the Immigration office for nine years? That is the only Government office I have been in.
8048. Do you think that the officers who were supposed to do the clerical branch of the Casual Labour Board were men who, by their sobriety, habits, close attention to business, and general fitness for their positions, would be likely to check irregularities or frauds that were likely to be enacted? Yes; I think they would.
8049. Would they detect pay-sheets coming in with dummy names upon them? I could not say that. That is for the superintendent to look to. We must pay anything that the superintendent puts his initials to.
8050. Do you think that if certain men were allowed to draw certain moneys they had no right to as gangers, and if the clerical staff up-stairs see that these men draw no rations, would suspicions arise in their minds? Well, I do not know how the clerical staff would act in that case.
8051. Just now you said that they were the right sort of men to conduct this kind of thing? I did; and I know up-stairs that they were very cute. There was many an error detected by Mr. Hibble.
8052. Would it show much cuteness if they did not suspect that these men did not live on air? I do not know. Mr. Burrowes is the responsible officer. Burrowes is responsible for the men. He signs his name to the voucher, and we take his voucher as correct. He is put into that responsible billet to look after these measurements being accurate, to make out the pays, to see that the names are correct. We do not know these men. I have known men on the works that have taken half a dozen names, and have received pay on the different works. I have never had anything happen to me like that.
8053. But if one of the clerical staff says that he checked the computations, would he not see a man in charge of a gang with nothing charged for rations? I could not answer that question.
8054. If you found a man continually drawing pay for work done, and nothing was deducted for rations, do you think that you would notice that nothing had been deducted? There is one instance—Mr. Burrowes and Mr. Larnach—whose rations are deducted from the pay-sheets and remitted afterwards.
8055. Suppose you saw a man named Campbell here, who is drawing £2 4s. 10d., and no deduction is made for rations, do you think you would notice that? I think so.
8056. Do you think if any such omission occurred, these were men who would look after these things? Yes.
8057. Do you think there was any chance, from your knowledge, of any swindling ever taking place in regard to the pay-sheets? I do not know.
8058. Do you know Mr. Burrowes' groom, a man named Flemming? No.
8059. Did you see many of the gangers? I saw every ganger I paid.
8060. Did you ever pay at Heathcote? No.
8061. Did the constable ever go out there? That I could not answer. He might have gone out once with Mr. Hibble, but I could not say for certain.
8062. *Mr. Franklin.*] Did anybody in your office ever go out to see whether the pay-sheets were checked? No; I do not think so, but I never had anything to do with the checking.
8063. Who did that? Mr. Larnach and Mr. Hibble. I never went out except on pay-days, and then I had to walk 16 or 18 miles between the places from Gawley Creek to Bulgo, and on to Waterfall. The walk was somewhat tedious, but it was through beautiful scenery.
8064. Had you any balance of money in hand after those pays? Always. Sometimes for instance a ganger might leave and not pay for his rations, and of course I used to pay on the pay-sheet and hand over the balance.
- 8065-6. You have every reason to believe that the pay-sheets were finally completed? Yes.
8067. *President.*] During the time that you were in the employ of the Casual Labour Board, did you observe or were you informed of any irregularities or improper conduct on the part of any one connected with the office, whether members of the Board or otherwise? No.
8068. Beyond the cases that you referred to? No, none whatever.

TUESDAY, 9 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

The Honorable Geoffrey Eagar called in, sworn, and examined:—

- Hon. G. Eagar.
9 April, 1889.
8069. *President.*] What position do you hold in the public service? Under Secretary for Finance and Trade.
8070. This Commission wrote to your department on 1st April last asking for certain information. It is very material in the interests of this inquiry and it will be a great saving of our valuable time and of expense to the country if you can let us have a reply to that letter? Here is the document in reply [*Document put in and marked L*].
8071. We are told that there are some vouchers, receipts, and pay-sheets belonging to the Casual Labour Board still in your department? Yes.
8072. Can you let us have these vouchers, receipts, and pay-sheets? No; and for reasons that I will explain

explain to you. At the close of the labours of Mr. Davies and the gentlemen associated with him, they were overdrawn, permitted by Government, to the extent of £12,203 10s. at the Australian Joint Stock Bank. I hold these vouchers to entitle me to recoup the advances from the Australian Joint Stock Bank. I will allow with pleasure any member of the Board to go through these vouchers at the Treasury at any time they please, but if I part with them I shall be unable to procure from the Paymaster the sum to pay to the Australian Joint Stock Bank.

Hon.
G. Fagar.
9 April, 1889.

8073. Can you tell me whether there are many of these documents? They consist of three bundles of papers. They represent £12,203 10s. not yet recouped to the Australian Joint Stock Bank.

8074. Are these all vouchers of the Casual Labour Board? Yes; official vouchers of the Davies Board.

8075. Can you tell me from your figures or your recollection what the total amount of the advance to the Board was? £240,000 in all. I think the advances commenced from May, 1887.

8076. Will you give me the names of the gentlemen of your department who will be familiar with the details of the vouchers? Mr. Corkhill and Mr. Cronin.

8077. Which of these gentlemen should be most familiar with these particular vouchers? The Examiner, Mr. Corkhill. He has gone through them and has satisfied himself they are good vouchers—in fact he could bring them here, provided he is allowed to take them away.

8078. Will you undertake on the part of your department not to part with them pending this inquiry? Certainly, I will not part with a single voucher.

8079. We are informed that the Casual Labour Board was supplied with advances of £6,000 at each time; that on each occasion—some forty occasions—they sent in vouchers for the exact amount of £6,000, neither more nor less. From your experience of the department, and as an accountant, was this at all unusual? I decline to state any opinion in reference to my personal knowledge of the accounts. I further say that in my present state of information, I am not sure, nor do I know that each £6,000 was vouched for within that limit.

8080. I do not wish to ask you any further questions? I am very glad to hear it.

Patrick Gernon Boylan called in, sworn, and examined:—

8081. *President.*] What are you engaged in now? I am an overseer on the relief works.

8082. Where? At Liverpool at present.

8083. Did you hold any position under the Casual Labour Board? Yes; since its formation. I was also employed before it existed.

Mr. P. G.
Boylan.
9 April, 1889.

8084. Where were you engaged? At the National Park, Heathcote, and the Waterfall.

8085. What were your duties? I was looking over the men in the field when they were clearing in the National Park, and at Heathcote, and after that I was overlooking road-making at the Waterfall. I was on the road from the Falls to Port Hacking, down to the sea beach.

8086. During what time were you in this district? I suppose it is eighteen months, while I was on the road at the Waterfall.

8087. Who were the officers over you? Mr. Burrowes was superintendent, and Mr. M'Pherson was assistant superintendent.

8088. Who else? No one else.

8089. Who was the storekeeper? Mr. Springall was at the National Park, and Mr. Tait at the Waterfall.

8090. Did your duties necessitate your knowing the different men in your employ? Yes; I knew the men pretty well.

8091. Had you ever anything to do with the Heathcote Agricultural district? No; I was camped at Heathcote, at work clearing bush for a considerable time.

8092. What is the difference between Heathcote and Heathcote Agricultural? I cannot tell you. There is some land there that was cultivated some years ago, but that is private property I think now.

8093. Look at this pay-sheet for Heathcote, 26th August to 8th September, 1888 [*Exhibit J*]; do you recognise in the names there those of any persons whom you know? No; that is all for carting—yes, that of Flemming.

8094. Do you notice the last name on the sheet? Yes. It is that of Flemming.

8095. Read the entry? Flemming and seven men. I know a man of the name of Flemming. He was with Burrowes, but I never knew him as a ganger; I think he was a groom for Burrowes.

8096. Was it part of your duty to be present at the pay on pay-days? Not at all times, because Mr. Burrowes used to attend to that a good deal.

8097. Was Mr. Burrowes present on all pay-days? No, not at the Waterfall. He used not to come there at all.

8098. Where used he to go? I do not know where he used to go at that time; later he used to go to Campbelltown and Eckersley.

8099. Was Mr. Burrowes present on any occasion of the Heathcote pays? Yes. Mostly when we used to go in from Heathcote to be paid at the National Park.

8100. Was Mr. Burrowes present then? He would be present at the pay.

8101. Had you anything to do with the Liverpool pays? I have been present at the Eckersley Road pay?

8102. Was Mr. Burrowes present? No.

8103. Never? Very seldom.

8104. Can you tell me from your own knowledge what are the different districts he visited on pay-days? He used to visit Campbelltown sometimes, and Liverpool whilst Walsh was at Eckersley Road.

8105. What particular district did he visit and was present at on pay-days? I cannot tell you.

8106. Can you say whether he was present on any of the Heathcote pay-days? He was present, because we all came in to the main camp at National Park.

8107. Was he present at Campbelltown? I cannot say.

8108. Was he present at the National Park pay? Yes, to the best of my knowledge.

8109. Was he present at Loftus Road on pay-days? I cannot say about the Loftus Road; I had left there then.

8110.

NOTES (on revision):—Q. 8074.—For “Davies” read “Casual Labour.” Q. 8097.—Omit “personal”; for “of the accounts” read “as an accountant.” Q. 8102.—For “No” read “Yes, occasionally.” Q. 8104.—Omit “Liverpool whilst Walsh was at.” Q. 8105.—For “I cannot tell you” read “He visited and was present at Campbelltown and Eckersley, and at National Park, where he resided.” Q. 8107.—For “I cannot say” read “Yes.” Q. 8111.—Omit whole answer, insert “That it is not true—he was present at Heathcote pays, but they were made at National Park.”

Mr. P. G.
Boylan.
9 April, 1889

8110. On how many occasions did you see Mr. Burrowes present on any pay-days? I cannot say how many. I know of about six with me at the Eckersley Road. I cannot say for certain.
8111. If we have been told that he was never present at any of these Heathcote pays, what would you say to that? He might not have been, because it was before these roads were started. It is two years or two and a half years ago that I allude to. These pay-sheets, I know nothing about. There was no road-making at the time I am speaking of.
8112. Did your duties bring you in contact with Mr. Springall at all? No.
8113. Do you know him? Yes, well.
8114. Where is he now? I am told he has started a public-house somewhere on the Illawarra line.
8115. Did you have occasion to go to the store he had charge of? I was frequently at the store—the same as any casual observer.
8116. Did you get rations from that store? I was supplied with rations from the store.
8117. On personal application? No, at the camp; with the general rations, along with the other men.
- 8118-19. Are you aware whether any rations were sold at that store? I am not aware of any such thing.
8120. Did any irregularity, or improper conduct, on the part of any of the officials come under your notice whilst you were in this district? I do not know in what way you mean.
8121. I am speaking generally, of the superintendents, assistant superintendents, store-keepers, and so forth? I can only speak of the particular line I was in myself—that was road-making. I think there was a little mismanagement in making the roads and the grades in some parts of the district I was in. It might have been done more judiciously; the work might have been done better, and money might have been saved.
8122. Do you know what taking a "tip" means? I know that it means that people get a bribe for certain work.
8123. What countryman are you? I am an Irishman.
8124. Did you ever hear of an Irishman taking a tip? No; but I suppose they would the same as other people.
8125. Do you know of any instance of any officer under the Casual Labour Board taking a tip? I do not; not of my own knowledge.
8126. Do you know of any case where any officer under the Board has carried a road in a particular direction for any consideration at the request of any private individual? I do not.
8127. Do you know how the work on these different roads, which were constructed or improved by the unemployed in the Liverpool district, originated? I do not. I do not know anything about them.
8128. May I take your evidence to be this: that everything that came under your notice, or with which you were connected during the whole time the Casual Labour Board was in existence, was perfectly straight? I do not think you can take it in that light. Let me explain in a general way. There was this road I was on myself, the Eckersley Road, a road supposed to connect the National Park with Campbelltown, down to Woronora. This road, when I was there, was laid out and cleared up a mountain. I said to Mr. Burrowes, "You will never get a road here; if you run it here it will be money lost." He observed to the men, "I thought I told you to go higher up and clear the road in such a direction." When I came on the job I was supposed to make the road, and form it, and make a track across a dam. It is rough country. When I found the sort of country I was in, I thought, "I will not employ the men on this work." I believe I wrote to Mr. Burrowes that I could give a better road. This is the answer to my letter.
- 8129-30. I see that this letter from Mr. Burrowes says that your suggestion is feasible, but directs you not to divert the gangs until he comes up, and requests that the dismissed men leave the ground. Is there anything unusual in that? There is nothing remarkable in it. I had the men there. He promised to come on Wednesday, but did not come. I had sixty men waiting behind me for work; so I put them on and opened up a road. Of course, Mr. Mason could give you better information on this matter than I can.
8131. Is that the only special thing that occurs to you to mention? Yes. Everything else was perfectly straight.
8132. Do you know anything about a road passing the property of Mr. Head or Mr. Gannon? No.
8133. *Mr. Franklin.*] You were the officer over the gangs? I was over all the men there, gangsmen included. There were eighty-six—eight in each gang.
8134. What work were you doing? I was principally engaged in clearing and road-making.
8135. How was it done? By contract.
8136. Was the work set out? Yes.
8137. Were measurements made for the fortnight's payments? We would give them a sub. on a 5-acre block.
8138. They would get the sub. without measurement? Yes.
8139. Was it your duty to certify to the visiting officer the amount of work done? No; the superintendent used to look at the work himself.
8140. Was there any actual measurement? He would look at it and say, "I will give you so much." He would consider that they had done so much work.
8141. Who measured the work out? It was measured out before they started. It was the overseer's business to see that the block was properly cleared.
8142. There was no possibility of making a mistake in regard to the return of the work in each of the contracts? There was a possibility.
8143. Did you yourself know the amounts of the advances made to the men under your supervision? It all depended. Sometimes they got more and sometimes less. It all depended on the amount of work they had done.
8144. Did you know the extent of each contract yourself? Yes.
8145. Did you know the final amount? They were getting £5 per acre.
8146. For stumping and clearing? With regard to stumping, they would leave in all the big timber; all under a foot was taken out. The holes were filled in, and matters were finished to the satisfaction of the superintendent.
8147. Have you had considerable experience in the management of men? Yes.
8148. In road construction—how was the road set out? At the Waterfalls, M'Pherson worked it out for me.
8149. Do you know what you paid for clearing before formation? Sometimes £6, £8, or £9; sometimes as high as £10. You can say from £6 to £10 per acre.
8150. Was that clearing, stumping, and filling in the holes? Yes.

8151.

Mr. P. G.
Boylan.

9 April, 1889.

8151. How did you pay for the formation? So much a chain for the formation.
8152. How much? Sometimes 30s.
8153. Would that be for ordinary formation and making everything solid? Yes.
8154. What about side-drains? Some 2s. 6d., some 3s. a chain.
8155. In rock? They were never put in in rock.
8156. Did you do side-cuttings? Yes, very deep ones.
8157. How was that paid for? By the yard.
8158. In the rock, how much? It depended on the class of work; 1s. 3d. for sandstone.
- 8159-60. How were the culverts constructed? They were of stone.
8161. What size was the drain? Some 1 by 1; others 2 by 2 feet.
8162. How were they paid for? Ninepence per lineal foot.
8163. Were they carried across the width of the formation? Yes, for the width of the formation—21 feet.
8164. Had you any bridges? No bridges.
8165. Was all this work done by contract? Yes; it was all done by contract.
8166. Do you consider that your roads were a good example of the roads made in the district? Mr. Mason told me mine was a very good road.
8167. In estimating the roads, then, might we take yours as a good example? Yes. Well, referring to the rock excavations, I know Mr. Burrowes paid more than 1s. 3d. He paid as high as 1s. 9d.
8168. Under what circumstances? Part of the rock was harder, or something of the kind.
8169. Can you give me an idea of the quantity of such rock-cutting that would come within the formation of the road for a mile? Say a chain.
8170. Do you consider that your roads were as good and as well finished as the roads on the Holt-Sutherland Estate? I do not think I was ever on the Holt-Sutherland Estate roads. I know the road that Mr. M'Pherson made at the Waterfalls is as good as any made in the Colony.
8171. Do you think that if an average is made on the prices you have given it will be a fair value? Yes.
8172. Were the other roads made under the same conditions as those in your charge? I do not think so. The roads I have seen have not been made so good as mine. They are only slummed over.
8173. Were there any general instructions issued to overseers? Yes. What I got from the superintendent. We were under his control.
8174. Were instructions given for such a piece of work? He would lay out the road so many chains for each gang, and would put a price on it. This the gang would get. It was my business to see that the gang carried out the work according to the instructions given to them. If they did not do it, he looked to me.
8175. I suppose you knew the men personally? Pretty well.
8176. Would it be possible for a man to personate another man at the pay-table? Oh, yes.
8177. Without your detecting him? I would detect him. It could not be done if the overseer was standing at the pay-table without he was a party to it. If he was a party to it, it could be done.
8178. Did you ever hear of one man personating another man at the pay-table? I have heard rumours; nothing definite.
8179. Did you ever find any great loss of tools at your works? No; I made the ganger responsible for the tools I issued. If he did not give me an account of the tools I made him pay for them.
8180. What tools would there be? Mattocks, axes, shovels, forks.
8181. How often did you find it necessary to renew those tools? Not very frequently.
8182. How long would they last a set of men steadily working? About three months.
8183. Would the tools you have mentioned be supplied to each man? Yes.
8184. Did the men return the tools to you when they left the works? Into the store.
8185. Would a complete set of tools be supplied to each man steadily working four times every year? It would be necessary to do so.
8186. What would be your system? I would supply new tools when required. If a man was working steadily with a mattock for three months he would use it up.
8187. Would the same thing apply to road construction? Road construction is different. Striking-hammers, other hammers, and jumpers last a long time. Drills will soon wear out. You can average drills at two months.
8188. Had you any particular rule as to the use of powder? We used to sell it to the gangs at so much a pound.
8189. Were they allowed to use it indiscriminately? They were allowed to use it whenever they thought fit.
8190. Would powder be used for the excavation of the rock you have given me here? Yes.
8191. What did you allow carters? One shilling a cubic yard, and upwards, according to distance; 10s. for a day.
8192. What would be the load in the dray? They used to carry yard loads. We used to measure it out.
8193. What do you say was their pay? They could make twelve shillings a day if they worked hard. They never worked for less than ten shillings. On piece-work they had one shilling per yard.
8194. *Mr. Waller.*] Did they employ horses and carts of their own? Not that I am aware of.
8195. How did you obtain the services of the men that had the horses and carts? The superintendent used to find them.
8196. Used he to get the men to come and do the work? Yes.
8197. Who arranged the price to be paid to these carters? The superintendent arranged the price. I think Mr. M'Pherson helped to do it.
8198. By whose authority were they engaged? I should think by the authority of the Board.
8199. Was any special rate authorized by the Board to be paid to these men? 1s. a cubic yard.
8200. How do you know the Board authorized it? That was what I saw on the printed rules.
8201. How long were you stationed at Heathcote? Six months.
8202. Between what dates? I cannot say; I was there at the time the Jubilee took place; I had been there about a month.
8203. Then you were there in May, 1887? Yes.
8204. That is about the time that the Board was formed. Who sent you there? Mr. Burrowes.
8205. Where were you before that? At the National Park.
8206. Under whose employment? Mr. Burrowes'.
8207. In what position? An overseer.

8208.

- Mr. P. G. Boylan.
9 April, 1889.
8208. How did you come to be employed at the beginning? I was sent out from the Government office here to the National Park. Mr. Wise had to do with it then. I was sent out from Mr. Deering's office.
8209. Were you in Government employment? I was before the Board was formed.
8210. Were you one of the unemployed? Never.
8211. You say you were there in May, 1887. When did you leave Heathcote? I went from Heathcote to the Waterfalls about four months afterwards.
8212. You were there then four or five months. In what position? An overseer.
8213. What did your duties consist of? To see that the men did the work of clearing the ground properly.
8214. Would you know the gangers over the gangs during those four months? Yes.
- 8214½. You knew them personally? Yes.
8215. Did you attend their pays? Every pay-day I came up to recognize them.
8216. Did the men go for their money as well as the gangers? One or two would come to watch the ganger.
8217. Can you give us the names of the gangers who were under you during the four or five months? I cannot; I did not keep them.
8218. Could you recognize them in the pay-sheet? I dare say I could.
8219. Did you see the men sign their names? I saw them sign their names and draw their money.
8220. Who made out the pay-sheets for Heathcote, during the time you were there? Mr. Burrowes.
8221. How were they made out? I do not know. I had nothing to do with it. Burrowes did that himself.
8222. Did he make them out from intuition, or from information given to him? He used to go over the work; he made what he called valuations; he would make out the pay-sheets afterwards.
8223. Going over the work would not tell him the names of the men? The names of the gangers were sent in every week.
8224. To whom? To the head storekeeper, and from that Mr. Burrowes got the names.
8225. They were sent in by the storekeeper at Heathcote? Yes.
8226. Were you advised as to the names sent in? I knew them all.
8227. Were there books which were called "time-books"? There were no time-books for the men on the contracts. For the day-men there were regular time-books. I never had any, because I was always over piece-work. There might have been printed books for all I know.
8228. What became of these time-books? I cannot tell. The timekeepers would deliver them to Mr. Burrowes or Mr. Springall.
8229. After they were sent in to Mr. Burrowes, were they sent back to the timekeepers? The time was taken from them every night, and then they were sent back.
8230. Do you know Mr. Springall's handwriting? Yes.
8231. Do you know Mr. Goodman's? Yes.
8232. Do you know Mr. M'Pherson's? Yes.
8233. Do you know Mr. Burrowes'? I do.
8234. Did you ever see Flemming's handwriting? Never.
8235. Did you ever see him sign the pay-sheet? Never.
8236. Did you ever see him come up to the Heathcote Agricultural district on pay-days? No; I was not in the district when that pay-sheet was made out.
8237. Do you say that Mr. Burrowes estimated the work done by simply riding past it, and looking at it? Yes.
8238. Would he give an estimate as to the cubic yards given out? No. I was clearing; that is different to road-making.
8239. Look at this pay-sheet from the 18th July to 30th July, 1887? Yes.
8240. Were you an overseer at that time? Yes.
8241. Turn to the last page of those pay-sheets. What are these men? Taylor and eleven men. He was working on day wages. Flemming is here at 4s. 6d. They were not with me.
8242. Is that Flemming, whose name is down there, the groom? I think he is.
8243. Whose handwriting is that pay-sheet? I think it is in Christy's.
8244. *Mr. Franklin.*] How were these roads metalled? 4-inch ballast.
8245. What width was it spread? 21 feet.
8246. What did you pay for the ballasting? 1s. 3d. for quarrying; breaking, 1s.; carting, 1s.; spreading, 2d.; making 3s. 5d. the cubic yard.
8247. Was it blinded afterwards? Yes, with ridge gravel, up to the same width of 21 ft. and 2 inches deep. We never put too much blinding on. If you do it wastes.
8248. What did you pay for blinding? To get, and put it on the road, and carting it, it is worth 1s. 5d.

James Kidman called in, sworn, and examined:—

- Mr. J. Kidman.
9 April, 1889.
8249. *President.*] What are you? A grocer, wine and spirit merchant, and Government contractor.
8250. I believe you had a contract with the Casual Labour Board? Yes.
8251. Do you produce that contract? This is the duplicate tender form, and this is the notice of the acceptance of the contract, dated 16th June, 1887. The letter is signed by Thos. Hinchcliffe, Secretary of the Board, to James Kidman, informing me that my tender for rations for relief works at National Park, and all other works of a similar nature within 40 miles of Sydney, excepting Rookwood, has been accepted.
8252. Does this state where the goods are to be delivered? At all places within 40 miles of Sydney. The goods had to be sent to any place they were ordered for.
8253. What was the rate of the tender? 1s. 1d. per ration.
8254. Was your tender sent in on a similar form to this one? On a similar one. Of course the Board would have the original tender.
8255. Is this the same form marked "D2"? "D2" is the same form, only this one is signed J. Kidman, and has 1s. 1d. on it besides the words "at per ration."
8256. Where did you generally deliver the goods for the Southern district? Wherever ordered.
8257. Where did you deliver the goods for Hurstville? At Hurstville. I produce a sample of a lot of orders sent to me. I take up an order, 7th December, 1888, signed by Joseph Springall to me, ordering a supply of rations to thirteen different places; a total of 2,260.
8258. Did you deliver those to the different places? Yes.
8259. Free of charge? Yes, free of charge to the Board. I paid the expense of carting and delivering myself. There is a clause in the contract requiring that.
8260. From whom were you in the habit of receiving orders? Springall, Oxley, Larnach, and sometimes the Chairman, Mr. Davics.
- 8261.

8261. Were the orders in writing? Not always. Sometimes they were given verbally. If an extra number of men went out I would be asked to send so many rations at once.

8262. What was the practice when verbal orders were given. Did you enter the orders in your books? When we got a receipt for the goods they would possibly be put on the order list for the following day.

8263. Did you in all cases where you delivered goods obtain receipts? Invariably so. We got receipts as a rule.

8264. Can you tell me by whom most of these receipts are signed? Principally by Springall and Larnach in the Southern district, and Oxley in the Northern.

8265. Will you produce to me the books in which you entered the orders? Yes; I will get them for you.

8266. Have you the books for Government accounts, and also for private orders? Yes; I produce them.

8267. Will this book show any order given by Mr. John Davies in his private capacity? Yes; it shows a number of accounts of private people, and amongst others the accounts of Mr. John Davies.

8268. I see this book shows a payment on page 116 of £37 1s. 10d.? Yes.

8269. On what date? 14th October, 1887.

8270. How was that amount made up? By items of £13, £1 13s. 10d., £1 18s. 6d., and £20 9s. 6d.

8271. Is the item £20 9s. 6d. for certain goods supplied to Mr. Davies at the National Park? Yes.

8272. When was this writing in pencil put in the book? It is not my writing.

8273. Do you know whose it is? I cannot say whose it is.

8274. Is that item amounting to £20 9s. 6d. for certain wines and liquors? Yes.

8275. Have you books containing entries of Government accounts? Yes.

8276. Which are they, and what do you call them? There is a day-book, a cash-book, and a ledger—in fact the whole of my books are entirely at your disposal.

8277. Show me the day-book;—what does this show? The quantity of rations delivered every day to each district, consisting of meat, bread, potatoes, sugar, tea, butter, salt, pepper, and kerosene.

8278. From where did you get the particulars that you have entered in this book? From the various superintendents.

8279. What was the next step as regards your book-keeping? Immediately we had the receipts for the delivery of the goods we entered them in our contract delivery-book. Then, prior to sending in our account for the goods supplied, we forwarded a tabulated statement of the number of rations supplied to the men at the different camps, to the superintendent or storekeepers who received the goods. That would be checked and returned to us, and on that we would make out our voucher. The amount of money we received from the Chairman of the Board would tally with the amount in our cash-book, and also with the amount paid into the bank.

8280. Then your records show a complete history of your dealings with the Casual Labour Board? Decidedly so.

8281. Supposing the vouchers were not all forthcoming, had been accidentally destroyed, could you supply us with duplicates? Yes, with duplicates from beginning to end. Further, I may say that I have supplied large quantities of bread, meat, butter, &c., largely in excess of what is allowed by the ration bill, which my books will prove.

8282. How often were you paid? Monthly.

8283. Regularly? Yes.

8284. How? By cheque.

8285. Who brought the cheque? Mr. Davies.

8286. Always? Yes.

8287. Were they for large amounts? Oh, yes, as high as £4,272 down to £1,805.

8288. Did Mr. Davies go up to your Oxford-street shop with the cheques? Regularly every month. I wish every department would bring their cheques up.

8289. Do you know why he brought them up? I think he used rather to like the idea of presenting me with a large cheque. It used to please him, and it did not do me any harm.

8290. Did you make him any present for it? Not I.

8291. Did you ever allow him any commission? Certainly not.

8292. It was just the pleasure of presenting you with a large cheque that took him up there? I think he used rather to like bringing them up.

8293. Have you a statement that will show the aggregate sums that have been paid to you by the Casual Labour Board from 2nd May, 1887? From May, 1887, to 31st January, 1889, I have received £53,020 0s. 1d.

8294. When did you make that summary up? A couple of days ago.

8295. In anticipation of being asked the question? Yes, and for my own satisfaction.

8296. Is there anything due to you now by the Board? No; I received my cheque yesterday for the last month.

8297. Can you tell me whether you have any account with Mr. Springall? Do you mean a private account. I have an account with him.

8298. Did you have an account with him in November, 1888? Yes.

8299. I want to know whether any of your books show an account other than this in 1888? No other than this.

8300. Is there anything that shows you what these items are? Yes.

8301. Did Mr. Springall, on or about 12th November, 1888, order certain rations—a week's rations for five men—on his own account. Have you any record of it in your books? He may have paid cash for them, and if so there would be no record.

8302. Are you able to tell me whether he paid cash or not? I cannot say.

8303. You would not sell rations over the counter? No; he would have to specify the articles.

8304. I want to find out whether in November, 1888, Mr. Springall ordered from you those articles? Well, this will settle the question. I produce a letter dated 20th October, 1886, from J. H. Springall addressed to me asking me to supply him with certain goods and stores, and to place the same to his private account.

8305. Can you tell me how long you continued to carry out that order? Up to the time he left the employ of the Casual Labour Board.

8306. Does page 217 in your book deal with this account? That and the following one.

8307. Give me the dates of the accounts you are showing me? From April, 1887, up to 31st January last.

8308.

Mr.
J. Kidman.
9 April, 1889.

- Mr. J. Kidman.
9 April, 1889.
8308. Was Mr. Springall ever in your employment? No.
8309. Had he a store under your supervision? No.
8310. Did you ever supply him with goods for sale or return? He could not return them. I have sold him goods the same as any ordinary customer.
8311. Do I understand that the arrangement he asked you to enter into on 20th October, 1886, continued up to the end of last year? Up to the 5th January, when he left the Sutherland District.
8312. Kindly read the letter he sent you? "National Park Relief Works, 20th October, 1886.—J. Kidman, Oxford-street.—As the men employed on these works require a few extra rations, would you kindly supply me with about sixty loaves, from 100 to 150 lb. of meat, and one bag of potatoes, and any other small stores I may require from time to time, and place the same to my private account, and I will settle with you when you render the accounts for same. By doing this you will greatly oblige me.—Yours respectfully, JOSEPH H. SPRINGALL, storekeeper, National Park."
8313. Had you any similar arrangement with the storekeeper at Narrabeen? I only recognized the superintendent there, Mr. Oxley.
8314. Did you supply the storekeeper of any other place like you did Mr. Springall? Possibly so.
8315. Can you let us have extracts showing your dealings with Mr. Springall during all this time? Yes.
8316. Do you know whether Mr. Davies was aware of this? I cannot say, I am sure.
8317. Did you ever hear of the Board or any other member informing Mr. Springall that he must give this up? Yes; from both Mr. Davies, Mr. Wells, and Mr. Houison.
8318. Did Mr. Davies tell you this? Yes; and asked me to take the store afterwards, and very much against my own will I did it.
8319. What did you keep? Stores and provisions similar to what were supplied as rations. It was what you might call a general store.
8320. Had Springall to do with it? Not after I took it over; he had to do with it previously.
8321. Who was in charge of it? One of my men; I forget who it was now.
8322. Did any of the rations or goods you sent out for the relief works go to that store? Do you mean under the contract. No.
8323. They did not go there in the first instance to be delivered? They might for all I know.
8324. Who would know? Well, the contract goods would not go to the store that I know of.
8325. Who would be able to tell us? Mr. Springall, I suppose.
8326. I suppose the officer in charge? Yes; all the contract goods would go straight to the Government store.
8327. Do you know whether any arrangement existed at the store out there for exchanging goods? I expect they used to exchange goods. I had my receipts for delivering them.
8328. Did you hear of goods being exchanged? Oh, yes. If they did not want bread or meat we gave them prunes, tinned milk, or anything like that. It is a recognised thing in all institutions.
8329. Suppose relief storekeepers had a lot of ordinary rations by them, could they get them exchanged for more useful goods? Decidedly so. Condensed milk, cheese, and so on.
8330. That was done? Yes; repeatedly, and is being done at the present time.
8331. The exchange would be conducted in goods? There would be no return in money. Suppose, for instance, they had an accumulation of pepper and salt; we should say it comes to 17s. 6d. We will give you condensed milk, cheese, bread, or butter up to the value of it.
8332. Did Mr. Burrowes deal with you? Yes.
8333. Has he an account yet? Yes, he has.
8334. Is it a large account? I do not see his name here, so I presume he owes nothing.
8335. Did he have large transactions with you? Oh, no; just for his family requirements.
8336. How would he pay you? I suppose he would pay the cashier.
8337. Does not your book show? Not if it is a cash transaction.
8338. Would his transactions be in cash? If he came in at the end of the month or fortnight it would show in the books that he had paid.
8339. It would say paid by cash? Yes; if it was paid in cash up at the shop.
8340. Had he a running account with you? Yes.
8341. *Mr. Waller.*] Has Mr. Hinchcliffe got an account with you? Yes.
8342. What is this book? It is the ledger for 1887 to the present year.
8343. Have you an account there in the name of Hinchcliffe? Yes; a regular account.
8344. Has Mr. Larnach an account with you? No; I do not think he has.
8345. Has Mr. Hibble? No.
8346. Have any other members of the Board got accounts besides Mr. Davies? No; I do not think so.
8347. Has Mr. Wells? Oh, yes; he has been a customer of mine for the last twenty years, and a good customer too.
8348. I shall want you to give me the accounts in full of all the persons I have been asking you of? Yes; I will get them for you. What they have had. What they have paid for and so on.
8349. How long have you known Mr. Davies? Nearly thirty-eight years.
8350. How long has he been dealing with you? The whole of the time pretty well. I am going back to the date of my birth.
8351. The other gentlemen whose names I mentioned—when did they become customers of yours? Mr. Hinchcliffe has been a customer of mine for a long time. I do not know half my customers.
8352. Can you get out from your books a complete return of the cheques received each month from the Casual Labour Board, and on what date they were received? Yes.
8353. In this cash-book, folio 116, Friday, 14th October, 1887, there is an entry—"John Davies, by cheque, £37 1s. 10d;"—will you show it in the bank pass-book? That is the Market-street shop takings; it would be included in the bank deposits of that day. If we turn up the deposit slip you will find that the cheque will be entered on the back of the slip.
8354. Have you got the duplicate bank-slip? No; I have only the total. I can get you the deposit-slip for that day.
8355. Was there a receipt? Mr. Davies ought to have the receipt. The only thing which appears in my books is that it has been paid.
8356. What was the date of the payment? 14th October, 1887.

8357. Would receipts be given at the time of that payment? Certainly.
8358. Do I understand that you said that you continued to supply Mr. Springall with goods, outside what you supplied him with as storekeeper, up to the time of his leaving? Yes; I supplied him independently of the contract with the Board, and he has paid me.
8359. What has he done with them? I do not know.
8360. At the time you supplied him with the extra goods had you also a store of your own there? Yes; just the same as I would have in Market-street or Oxford-street. It was forced on me by the Board.
8361. Can you show what goods you supplied Mr. Springall with regularly? The day-book will show it.
8362. Was there a good deal of stuff of one sort and another? I do not think it was very much.
8363. Would it be what would be required in a general store? Whatever he ordered I supplied him with.
8364. Was not this supplying of goods to Springall directly opposed to the desire expressed by the Board? They never mentioned anything about it to me.
8365. I thought they said they could not allow Mr. Springall to have a store? That referred to a store.
8366. Would the goods have been required other than for a store? I do not know what he required them for.
8367. How many tabulated statements would you have a month? One for the southern and one for the northern districts.
8368. Would these statements include all rations sent to every camp upon which any of the employed were at work? Yes; they went in every month.

Mr.
J. Kidman.
9 April, 1889.

Alexander M'Pherson called in, sworn, and examined:—

8369. *President.*] What is your position at the present time? Superintendent of the unemployed.
8370. Were you engaged with the Casual Labour Board under Mr. John Davies? Yes.
8371. From its commencement? Very shortly after.
8372. You know it commenced in May, 1887? I cannot tell you the date, but I went out about two months afterwards.
8373. What had you been doing prior to that? Nothing for a short interval. I am a surveyor by calling.
8374. Who appointed you? The Casual Labour Board.
8375. Was it the Chairman? I saw the whole of them when I went there.
8376. What was your work? I was working as a surveyor at first.
8377. Where? Out at the National Park.
8378. What did you do afterwards? I was appointed assistant superintendent.
8379. Who was your superior officer? Mr. Burrowes.
8380. Can you tell us when you were first appointed assistant superintendent? I cannot give you the date.
8381. How long did you remain in that position? Until about six weeks ago.
8382. Look at this letter. Does it refresh your memory as to when you were appointed assistant superintendent? Yes, on 12th July, 1887.
8383. And you remained so up to the time the Board was put an end to? Yes.
8384. What were your particular duties as assistant superintendent? When I went out at first my work consisted in measuring the land for clearing, and when I first became superintendent my duty was to inspect the land as it was cleared, and place a valuation on the work done, the rate per acre which was to be paid to the men.
8385. Did you work under orders given by Mr. Burrowes, or under orders given by the Board? Partly under both.
8386. Did you work harmoniously with Mr. Burrowes? Not always. When I was first appointed I refused to pass certain work that Mr. Burrowes wished me to pass.
8387. What was the result of that difficulty? He let it drop.
8388. Why did you refuse to do it? Because in the first instance I had not seen it.
8389. Where was it? A distance of 3 or 4 miles from the camp. I think the name of the man who cleared it was Wilson. The immediate reason he gave for wishing me to pass it was that the man was a freemason.
8390. After that, did you continue to have differences with him? Frequently.
8391. Principally on professional matters? Well, the principal ground of ill-feeling was about a matter in which he made a false statement about me to Mr. Davies about the payment of an overseer's salary.
8392. When was that? I cannot give you the date of it.
8393. Was it many months after your appointment? Some five or six months afterwards.
8394. What was the outcome of that? Mr. Davies censured me for what he said I had done wrongfully. I said nothing about it. Mr. Burrowes led me to believe that he would be blamed in the matter. I told him he might lay the blame on me. I did not defend myself because I thought I would be doing him a service. Some time afterwards I found that he himself had laid the complaint, and that he dealt treacherously with me.
8395. What was the difficulty? There was a rule that the overseers in charge of camps should be paid for Sundays, as they were supposed to be responsible for the conduct of the camp on that day. There was an overseer named Harper working under me. The first fortnight I forgot to put him down for fourteen days, and put him down for twelve. When making up the next pay-sheet this occurred to me, and I put him down for sixteen days to take in the two days that had been missed. We were very busy at the time. I put it down intending to tell Mr. Burrowes of it; but it slipped my memory until all was completed, when it occurred to me and I told him. I said, "I forgot to tell you about Harper." He said, "Yes, the man in charge of the camp is always paid for fourteen days in a fortnight." Before that night was out he wrote to Mr. Davies saying that I had put Harper on the sheet without his knowledge. He showed me a letter next day finding fault with what had been done. I thought that to save him the blame I would take the blame on myself, as it did not matter two straws whether I left or not.
8396. What was the next difference? We frequently had differences over the work.
8397. Did you have any serious difficulties? Not until two or three months ago.

Mr. A.
M'Pherson.
19 April, 889.

8398.

- Mr. A. McPherson.
9 April, 1889.
8398. What was that? He accused me of lying and of dishonorable conduct. I forget the exact expression. I complained to the Board about it.
8399. What was the result of your complaint? I do not know. When I found the Board were not taking much notice of it I did not think it worth my while to trouble over the matter.
8400. Did your duties bring you constantly in contact with Mr. Burrowes? No; weeks might pass without there being any official necessity for me to speak to him.
8401. Did you find him a difficult man to get on with? If you had no sense of duty he was a very pleasant man to get on with.
8402. Does your remark apply in a professional sense or in a general sense? In a general sense. If I had put his Freemason on the pay-sheet for work I had not seen, we should have got on well on that occasion.
8403. Had Mr. Burrowes anything to do with making up the pay-sheets? Yes.
8404. Are you aware of his ever putting men on the pay-sheet who were not there. Do you know what the practice was as to making up the pay-sheets? Some of the principal draft sheets were made out by me. These are the essential parts of the sheet. The fair copies were made afterwards. They could be made up by anybody.
8405. Do you know who made the fair copies, as a rule? The clerks made them.
8406. Do you know whether Mr. Burrowes ever made them up? I do not remember seeing him make any of the fair copies. Intermediate ones were made up by him, that is pay-sheets other than the regular fortnightly ones.
8407. Do you know whether Mr. Burrowes ever made up the draft pay-sheets? I do not think he ever made up the formal draft, but there were rough drafts made up by him.
8408. Can you tell us what particular draft-sheets he would prepare, and whether there were any entries of his that were incorrect or suspicious? I know of a case where he made a blunder in the computation.
8409. Do you know where a suspicious entry was brought about or made by him? No; I cannot say that I know of it. He was very careless about them, and would put increased wages down, which were generally struck out by Springall. There was one case that occurred quite recently. It involves a statement I heard from someone else.
8410. Whom did you receive it from? An overseer of the name of Campbell.
8411. You may as well let me have it? I was questioning Campbell about the cost of some fencing which was somewhat extravagant; the men were getting 2s. for the mere erection of it, when 1s. is about a fair price. He told me Mr. Burrowes agreed to give the men 2s. On referring to the previous rough draft to find out what he had paid I found that it had been altered from 2s. to 2s. 6d. in Mr. Burrowes' handwriting.
8412. Was the alteration shown? It was shown in red ink.
8413. Was there any attempt at concealment? No.
8414. Have you any reason to suppose that Mr. Burrowes profited by any of these mistakes? Well, in the strict sense of the word, I have no reason whatever.
8415. Had you anything to do with the paying of the men? For a long time I was present when the piece-work men were being paid, that was as long as the great body of them were at the National Park.
8416. Were you ever present at any of the pays at Heathcote? Never at Heathcote.
8417. At Heathcote Agricultural? You refer to the work done under Mr. Bell. I have been present on one or two occasions when Bell's men were paid.
8418. Who made the pays when you were present? Mr. Hinchcliffe; occasionally Mr. Josephson; once, I think, Mr. Larnach; and once or twice Mr. Hibble.
8419. Were these gentlemen by themselves, or were they supported by anyone else? I think Mr. Davies was present on nearly all occasions.
8420. What precaution was adopted in making these pays to prevent imposition. Every overseer was present when his men were paid to identify them, and whilst the great body of the work was centred at the Park I was present whilst the piece men were being paid; but the total number of men was so great that I could identify only a few odd ones.
8421. Do you know much of Mr. Springall? Yes.
8422. Did your duties bring you in contact with him at the store? My duties continually brought me in contact with him.
8423. Do you know what his responsibilities were? He was responsible for all the stores, including the tools and rations. It was his duty as clerk to see that the pay-sheets were made out, either by himself or under his directions.
8424. Had Mr. Burrowes anything to do with him? Yes; he had control over him.
8425. Was his work carried on under Mr. Burrowes' supervision? Yes.
8426. Do you know of any case where Mr. Burrowes diverted a road or took a road through private property at the instance of any individual? No; I had nothing to do with the roads under Mr. Burrowes' charge, excepting a fortnight he was away on leave of absence. I had so much of my own work to do that I could not give much attention to the work that he was doing.
8427. Had you anything to do with the men on the Holt-Sutherland Estate? I had nothing to do with them until lately.
8428. Do you know the work that has been done there? I know all the leading roads and all the principal roads that were being cleared, but what the quantity of each was I could not tell you.
8429. Who can show us over the work done by the unemployed out there? I suppose I am the best person to show you over the work.
8430. Who could tell us whether a certain road was done by the unemployed or was not done? I think Mr. Burrowes could.
8431. Could we rely on it? I would not believe him if anyone would crown him.
8432. Why have you such a strong feeling against him? I have found him to be a most unblushing liar. I was brought up with a prejudice against liars.
8433. Owing to concoctions made by Burrowes? No; he would tell lies to me just to keep his hand in. Nothing was too big or too small for him to lie about. He would tell me where he was going, and I would find out that it was a falsehood. He would tell me he was going to Liverpool and I would find out afterwards that he was going to town.

Mr. A.
M'Pherson.
9 April, 1889.

8434. What object would he have in that? I do not know unless it was to keep his hand in.
8435. Had you any reason to doubt his honesty? Personally I have not. He never cheated me.
8436. Do you know whether he borrowed money? I took care that he never borrowed money from me. I have been perpetually hearing of it.
8437. Did you hear of him borrowing money from the men? I have heard of that, but chiefly of his borrowing money from the overseers.
8438. Do you believe there was any foundation for the rumour? I believe it, but in the legal sense of the word I do not know it. One of the overseers told me of it the other day, a man of the name of Walsh.
8439. Was it a large sum he borrowed? £10.
8440. Do you think he made more than his salary out of the work? He must have done in some way.
8441. Why? Why, I do not think his salary would have kept him in drink and tobacco.
8442. What was his salary? 15s. a day. I once or twice saw his vouchers for expenses; I knew they could not be honestly incurred. I saw him put down 4s. for going to the Meadows. There was no place where he could spend it.
8443. Did you point this out? No; Mr. Davies knew very well where the Meadows were.
8444. Do you know what his personal expenses averaged? The voucher I saw was for about £6 for a fortnight.
8445. Did you have any personal expenses? Yes.
8446. For the same kind of work as Mr. Burrowes? Excepting when I had to pay railway fare, I never had to pay anything.
8447. How did your personal expenses compare with those Mr. Burrowes would charge? Well, he systematically concealed his from me. That was why I suspected them. You can get the vouchers and compare them for yourself.
8448. Give us relatively what they were? I think you would find that his were fivefold mine.
8449. I suppose his expenses would be made up of small amounts? I saw one recently—expense of going to Sydney 3s. 6d., note paper 3s. I believe the 3s. 6d. was spent in going to Sydney to pay 3s. for the note-paper; he would get 15s. a day; it would take the biggest part of the day to go in from Sutherland, so that the note-paper would be pretty costly by the time it was bought.
8450. Does your prejudice arise from anything else excepting his untruthfulness? Nothing else but his untruthfulness.
- 8450½. Because you do speak with considerable prejudice? Well, I was brought up with a strong prejudice against liars.
8451. Do you condemn a man *in toto* if he is a liar? Yes, certainly. I am not speaking of a man who would say a thing in exaggeration, playfully, or otherwise.
8452. Do you know how often he sent in his claim for personal expenses? Fortnightly, I think.
8453. What would be the usual things upon which personal expenses would be incurred properly? There was forage allowance for him at all times, but only latterly for myself. Then he would charge expenses for going into town. I never did, excepting railway fare.
8454. Did he have a free pass? Yes.
8455. What other expense would be properly incurred by an officer who did his duty? There was this difference between us. If I came to Sydney I had got my own house to go to. If he got his dinner here, or stopped at an hotel, he could properly charge for it. On one or two of his vouchers I saw a considerable sum for cab-hire.
8456. What had he to do with cabs? I do not know.
8457. Did his rations account go in with his personal expenses account? Yes.
8458. The one I am looking at seems to include your ration account in his? He had no right to do that.
8459. Look at it, the 17th August, 1887? He might at that time have done so. I remember now; sometimes he did charge mine.
8460. Well, in this account of personal expenses there are "eight fares paid by store-keeper, 12s."? The store-keeper would have to send the messenger to town, that was what that would be.
8461. Two press copy-books—would that be a proper expense? That would be the one you hold in your hand. Sometimes the Board would tell an officer to buy these things, and sometimes they would be supplied by the office.
8462. The rest is taken up with copying-ink, and it finishes up with cab-hire, 10s.;—what is the cab-hire? I have seen it before. I always suspected the cab-hire items.
8463. What is your opinion of the way Springall conducted his work? I had a high opinion of Mr. Springall always.
8464. Have you had any reason to doubt it? I have had no reason to doubt it, although I have heard charges made against him at the instance of Mr. Burrowes and Mr. Larnach.
8465. Do you know the system he pursued with regard to the stores he had charge of? It was always satisfactory.
8466. Had you anything to do with the Northern District? Never.
8467. Were you examined before the Select Committee? No.
8468. Did you know anything about these Heathcote pays? I was never at Heathcote when they were paid.
8469. Do you know Flemming who had charge of Burrowes' horse? Yes.
8470. What do you know of him? My first recollection of him was that he was a ganger when he employed the scavengers in the camp. I think Flemming was in charge of the men clearing up the camp.
8471. When was that? It would be in the middle of 1887.
8472. Do you know when he gave it up? No.
8473. Do you know what he was in 1888? In the latter part of 1888 he was attending to the horse.
8474. Whilst attending to the horse, did he have any men under his control or gang for them? No.
8475. Would you know this man if you saw him? Yes.
8476. What kind of a man is he? He is an old man, I should say close on 60, a labourer, and bushman.
8477. Is he a man to do stone-breaking? There is no reason why he should not do it.
8478. Do you know whether he did or not? I do not know whether he did or not.
8479. Did you ever hear of him in 1888 as a ganger representing seven men? No; unless my recollection of his being a ganger over the scavengers is correct, I do not know of his being a ganger at all.

Mr. A.
M'Pherson.
9 April, 1889.

8480. Did your duties bring you to the head office frequently? Not until lately.
8481. During the time the Board was in existence? Until, say, the middle of 1888 I would not be in the office.
8482. Then you do not know much of the staff of officers? I know them personally.
8483. Which of them did you meet the most? I came a good deal into contact with Mr. Hinchcliffe and saw him officially.
8484. Did you know him before? I knew him when he was in the Immigration Office with Mr. Wise.
8485. Was he a good officer? As far as I know.
8486. Do you know Mr. Hibble? I consider him a very capable man.
- 8486½. Do you know Mr. Larnach? He was a man who had been manager of a bank at one time. When I knew him he was sent out to the works at Gordon nominally as an overseer.
8487. What do you think about him? I was always on friendly terms with him until lately.
8488. Why did you change your feeling? Because he insulted me grossly in the office.
8489. How long ago? Six or eight weeks ago.
8490. Did you have any difficulty with him during the time the Board was in existence? No.
8491. I believe he was at Hurstville during 1888? Not in 1888, I think.
8492. Were you brought much in contact with him at Hurstville? Yes; I got on well with him until he spoke to me in an offensive manner.
8493. Are you of a sensitive disposition. Do you take offence easily? Yes; I believe so. Mr. Waller, who has known me for years, could perhaps tell you better than I can myself.
8494. Do you know a man named Johnson? He was assistant store-keeper. Latterly he was store-keeper on the works, at Illawarra Road.
8495. As far as you know, did he perform his duties properly? Yes.
8496. Have you considerable feeling against Burrowes? I have.
8497. *Mr. Franklin.*] Was Boylan under your instructions? Yes.
8498. Is he a practical man? Yes, one of the few we had.
8499. Would his description as to the nature of the works and prices be reliable? Yes.
8500. Would the description of the roads carried out under his supervision at the Waterfalls be a fair description of the kind of roads made? I should expect any description given by him to be a good description.
8501. Have you seen the roads on the Holt-Sutherland Estate? Yes. The Illawarra, Coronulla, and Woronora Roads.
8502. Were those roads generally better constructed than the one in the district of the Waterfalls? They were not as solidly constructed, and not as well finished.
8503. With regard to the clearing;—how was that done? The clearing on the Illawarra Road and on some of the by-roads was done indifferently.
8504. The formation? Some of it was grossly bad. The rest of it merely consisted in laying a lot of gravel on the road.
8505. Have you heard them called park-roads? No, certainly not.
8506. Do you know them intimately, with regard to the culverts and bridges? Yes; I have inspected them closely.
8507. Did you notice the road from Tom Ugly's Point? It is 42 feet wide.
8508. Is it metalled and gravelled? You might call it gravel, but it was chiefly clay put on in a casual manner.
8509. You would not call it ordinary ridge gravel? Certainly not.
8510. Do you think there was any extravagance in connection with any of the work? In the clearing there was gross extravagance. I drew Mr. Davies' attention to it. I know a large number of the men were being employed at day work. I set my face against it as being costly to the Government. Mr. Burrowes was always in favour of the day-work system, because it gave us no trouble. You can understand how that was if you have to measure up little bits of road; there is necessarily a good deal of trouble with it. In the day system there is only to take in the time. This work was being carried on on day work. One day Mr. Burrowes said that the men were getting on well. They had done a mile and a quarter. I knew at the time that the pay-sheets had come up to a large sum. I think £800, and I felt it my duty to draw the attention of the Board to the cost. I should think the cost would be £600 a mile for clearing only. That was based on the idea that Mr. Burrowes' statement was correct. I found he had put the quantity of work down too much. When I mentioned this to Mr. Davies—and I think Mr. Wells was also present—they were very angry, and the two of them came out shortly afterwards and inspected the roads for themselves. As the result, Mr. Wells sent for me to go into town. I went and saw him at the Casual Board Office, in the presence of Mr. Davies. I do not know whether Mr. Honison was present, but Mr. Wells ordered me to go and measure up all the work done. I was to do it at once, and let nothing else stay in the way. I went out next morning, measured the work and reported, partly by letter, and as regards the latter part by telegram. The result was that the rest of the work was done by piece-work. The highest price paid for clearing would be £8 an acre, or £160 a mile.
8511. Do you know whether any other road was commenced and carried out in the same way? I think that afterwards all the rest of the work was done by piece-work.
8512. Do you remember the date? I cannot tell you, but it would be six or eight weeks after the Illawarra Road was started.
8513. Have you seen a statement made by Mr. Burrowes as to the total expenditure on all the roads on the Holt-Sutherland Estate? No.
8514. I am showing you *Appendix G* of the Report of the Select Committee, giving a statement by Mr. Burrowes of the whole of the expenditure on the roads, 43 miles 21 chains. It shows the extent of the work done on the roads? Yes; I see the statement.
8515. Would it be right to estimate the cost of those roads upon the cost of the one you have alluded to? No. Because after that the system was stopped.
8516. Could we estimate it on the price of the work done at the Waterfalls? No.
8517. In what particulars would there be a difference? Getting the ballasting, for which I paid 1s. 3d., was paid as high as 1s. 9d. here.
8518. The work on these roads would be higher? You would find the average cost of the work much higher.

Mr. A.
M'Pherson.
9 April, 1869.

8519. I have already been furnished with the prices of the details of road construction; what I want to know is, in estimating these lengths of road, can I apply these prices; but you say that the cost of these roads in *Appendix G* would be higher? If you have a statement of the roads under my supervision you could not judge of these roads by them.

8520. What difference should I make? I should say at least 50 per cent., and further, if there were any errors in measurement it would be an important item.

8521. This statement I see was made on 12th December last year. Has any additional work been done on the Holt-Sutherland Estate since then? Yes. On the Illawarra Road and the Port Hacking Road we had men working until the 30th March.

8522. Would that be additional work to what is given in this statement? Yes.

8523. If application is made can we get the additions so as to complete this statement? Yes.

8524. Did you make out the draft pay-sheets for the work in your district? Almost invariably, and for a long time I made the measurements myself.

8525. Did the draft include all the names you wished to appear on the abstract vouchers? Yes.

8526. You extended the computations in every case? I extended them roughly. I understood the store-keeper would check them afterwards.

8527. What you placed in your statement you were satisfied you stated correctly? Yes; but I never checked them; I understood Mr. Springall would check them afterwards.

8528. Would you be surprised if you saw different names on the pay-sheet beyond those on the draft you prepared? I would.

8529. Did you ever see such a thing? Never.

8530. Would it have been wrong to have placed in additional names? I should have insisted on having a reason for it.

8531. Do you think it could occur? It never occurred in mine.

8532. Who made out the pay-sheets? Mr. Springall and his assistants. Mr. Springall would be the responsible man.

8533. Would he not check with the voucher every draft that he passed into payment? He should have done so.

8534. But it never occurred to you that any additions were made? It certainly did not.

8535. *Mr. Waller.*] Did Mr. Burrowes make you responsible for the pay-sheets? No.

8536. Did he tell you you were responsible for their correctness? No. Of course I was responsible for all that I wrote down.

8537. Did you tell Mr. Burrowes when you handed in the pay-sheets that they were correct? It was seldom that I gave them to him personally. They were nearly always handed to Mr. Springall.

8538. Was your position under Mr. Burrowes of such a nature that he might take it for granted that these pay-sheets were correct? Yes, I certainly held myself responsible.

8539. Do you know Flemming's handwriting? No, I do not. I do not think I ever saw him sign his name.

8540. Do you know Burrowes', Goodman's, and Springall's? Yes.

8541. Here is a pay-sheet [*Exhibit J*]. Do you see the name at the bottom? It is Mr. Springall's handwriting.

8542. Here is another [*Exhibit J 1*]? That is also Mr. Springall's handwriting.

8543. Here is another [*Exhibit J 2*]? That, too, is Mr. Springall's handwriting.

8544. Do you know of any other man of the name of Flemming besides the one that was groom to Mr. Burrowes? No. There might be dozens on the works for all I know.

8545. Do you think it possible, under the management that existed, for men to get paid more than once for their work? Yes, I think it was possible.

8546. Do you think it was ever done? I think it was possible. I know men have been paid for work they never did. Mr. Burrowes had a fashion of paying a man for what he was going to do, and it was not always done.

8547. Were men paid beforehand? Yes.

8548. Can you particularize one place? I could if I had the plan.

8549. What plan do you want? A plan made by myself of some cleared ground. It came about like this. I saw the pay-sheet, and saw a man down for portion 16 or 18 A. I knew I had numbered no portions in this way. I had an objection to numbering portions A B and C. I spoke to Mr. Burrowes about it. He said that was a case where he put a man on the pay-sheet expecting that he would finish the block, and that he had put someone else on, and he had put down this someone else as having finished block 18 A.

8550. Can you describe where the land was, so that we can identify it. What was the extent of the work? It was something less than 4 acres.

8551. What amount would be paid for it? It might only be for 1 acre, or something like that.

8552. Do you know of any other case where men have been paid twice for work? There is a piece of land at the Meadows, uncleared to this day, for which the men were fully paid. It is about an acre and a half.

8553. Who certified to its correctness? Mr. Burrowes.

8554. Anyone else? No one else.

8555. Is it possible that men could appear on the pay-sheet as gangers when they were not gangers? Everything of the sort is possible.

8556. Do you think it possible? I never knew of a case.

8557. Was the supervision sufficiently good? If the supervision was honest it was. If you could get the collusion of two or three people, you could go over and get all the money out of the Treasury.

8558. Who ordered the goods, rations, and plant? Mr. Springall ordered the rations

8559. Without reference to anybody? His storemen reported to him their requirements, and he ordered them from their reports.

8560. Without reference to the head office? Yes.

8561. Who ordered the plant? Sometimes Mr. Burrowes, sometimes myself, sometimes Mr. Springall, whenever it was required.

8562. Was there any check as to the quantity that would be ordered? Of course they passed through the hands of the Board. There was one case in which a firm were selling off their plant; Mr. Davies told me to buy anything suitable for the Board, and I got it for them.

8563. Were the orders economical? They were not economical. I have known stuff ordered that would not be required. Drain-pipes were ordered, and he ordered bends with them.

8564.

Mr. A.
M'Pherson.
9 April, 1889.

8564. Are they there yet? I think they have them yet.
8565. Could they not be returned? They could not be returned. I saw some of them only a few days ago.
8566. I suppose you do not know anything about the system in the office for checking the accounts? I know nothing about that.
8567. Were there regular time-books kept? Yes; the overseers kept time-books.
8568. Whom were they sent to? For a long time they were sent to Springall; but I never had anything to do with a great number of day men.
8569. Should they be amongst the books now? I really do not know.
8570. Were there returns sent in as to the number of men employed by the Board? Occasionally. There were nominal returns sent in and the men's names.
8571. How often? It was supposed to be done every three months.
8572. How was it possible to correct the pay-sheets if there were not regular returns sent in? They could compare them with the rations return.
8573. If there had been regular returns as to the number of men employed, could it not have been compared with the number of men to be paid? Yes.
8574. And the only check against the number of rations would be the return showing the number of men employed? Yes; but from the irregular habits of the men—they were here to-day and gone to-morrow—the returns prepared by the bulk of the overseers were at all times doubtful.
8575. Do you know whether any influence was brought to bear for the making of the roads on the Holt-Sutherland or Hornsby Estates? No. I never saw the Hornsby Estate at all.
8576. Do you consider the roads made on the Holt-Sutherland Estate have increased the value of it? No doubt they have done so.
8577. By how much do you think? That is a leasehold estate. I do not know the value of it as compared with freehold.
8578. It is a long lease? I believe they have about seventy years, or something of that sort, to run.
8579. Do you consider the work done there was done for the benefit of the public at large or for the benefit of private owners? The greater part of it was certainly public work. For instance, the Port Hacking Road, the main Illawarra Road, the Coronulla Road, the Woronora Road, and perhaps the Malvern Road, were public roads.
8580. What reason have you for saying that the work done on these roads was to the public advantage? The Main Illawarra Road is the chief road in connection with the Southern District. On the Port Hacking Road there are two or three coaches running to the beach, and there is likely to be a good deal of traffic on it. The Woronora Road, if properly made, would, I think, induce settlement, and bring a great deal of revenue to the railway.
8581. What are the lands on the other sides of these roads, and who owns them? I know nothing of the ownership.
8582. Are they Crown lands? The Crown lands are limited to 160 or 180 acres.
- 8582½. Then there are private lands? The Coronulla Beach Road leads to a large reserve.
8583. Would not these roads increase the value of the private lands adjacent to them? You cannot help giving improvement to property if you make any portion of the roads you increase the value of the land adjacent to it.
- 8583½. Is it true that you were unable to calculate the contents of a heap of metal? No; it is not true.
8584. Do you think you are competent to do it? Yes; and you and Mr. Cape know that of your own personal knowledge.
8585. Had you any conversation with any witnesses who were here? I had no conversation that I know of, excepting with one man of the name of Johnson. I met him, and he asked me what sort of evidence he should give. I told him to state the truth, and let everyone take care of himself.
8586. What was he? A storekeeper.
8587. Did you say anything about Mr. Burrowes? Of course; I have frequently spoken about Burrowes.
8588. Did you ever say anything about Burrowes in this building. Did you ever say to anyone he was known by the name of "Pigott?" Yes; I have spoken of him being like "Pigott."
8589. What did you say about Mr. Burrowes and Mr. Larnach? I have spoken of them as being informers.
8590. Did you say they had "turned informers and b—d up the whole affair"? No.
8591. *President.*] Who was present when you said anything about Burrowes and Larnach in this building? I was speaking to Mr. Kidman about them.
8592. Did you speak to Mr. Davies about them? Yes.
8593. What did you say? I cannot remember the exact expressions.
8594. Have you had any conversation with Mr. Davies about this Commission? No.
8595. About the evidence? No; certainly not about the evidence.
8596. Are you on good terms with Mr. Davies? Yes, very good terms.
8597. When did you see him last? Yesterday, I think.
8598. Did he express any opinion to you? No; he only questioned me as to whether certain of the roads up there were fit to travel over.
8599. Did he have any conversation about this Commission, or say anything about anything likely to crop up in the shape of evidence? Oh, yes.
8600. On what subject? He told me he understood that certain charges were made against him about his connection with Mr. Kidman—about payment for some refreshments supplied to the Park.
8601. What did he say? He said he had receipts for them.
8602. Do you know anything about these refreshments? All I know is that on one particular occasion he brought out Sir John Robertson to dine—at least Sir John Robertson did not come; and Mr. Davies brought some stuff up to the camp and was looking about for someone to pack it; and I repacked it for him, and some fellows broke the box open afterwards.
8603. Was that the time when Mr. F. Want was there? He was expected, but did not come that day.
8604. Did Mr. Davies say anything about anything else? Yes. On several occasions we had long conversations.
8605. About charges or rumours of charges? He told me about some charge made about wood. He told

told me he had paid the money into the bank and got receipts for it. I think he said the Australian Joint Stock Bank.

8606. Did he mention anything about anything else? I am not certain I am right in saying the Australian Joint Stock Bank. The conversation I had with him about the wood was at his own house three weeks or a month ago.

8607. Did you often go to his house? I was only there once. I was never there before that or after.

8608. Was there any special invitation for that time? I was out there on business. I found myself near his house at night, and I went there and stopped all night. Some months before he had asked me to go out to his house.

8609. Did he seem to express any anxiety about these rumours or charges? None whatever.

8610. Did he mention anything about picnic baskets? He mentioned something about some voucher for refreshments supplied by Mr. Kidman.

8611. Do you know a road named Gannon's Road? Yes.

8612. Who made it? The Casual Labour Board made it.

8613. Do you know the cost of it? No.

8614. Is it a private road? Well, I consider it a private road. What I know of it is this: During an interval when Mr. Burrowes was away on business my duties led me out to the road. Mr. Burrowes asked me to point out the pegs to the overseer. I could not find the pegs. I thought that the road was not required. When I came back I told Mr. Burrowes so, and that he should report to that effect. The road was afterwards made.

Mr. A.
M'Pherson.
9 April, 1889.

WEDNESDAY, 10 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

James Daniel Cronin called in, sworn, and examined:—

8615. *President.*] What position do you occupy in the Public Service? Paymaster of the Treasury.

8616. Have you had anything to do with the Casual Labour Board payments in the course of your duties? All the payments have gone through my hands.

Mr.
J. D. Cronin.
10 April, 1889.

8617. Have you recently had anything to do with examining any Casual Labour Board papers submitted to the Treasury? It is no part of my duties to examine papers.

8618. Would you have anything to do with those moneys that were enumerated in the statement that was handed in to us yesterday by Mr. Eagar? Those are the payments made to the Treasury.

8619. Have you anything to do with them? No; my payments are payments from the Treasury.

8620. Would you have anything to do with the payments of various sums of £6,000 that we are told were paid from time to time to the A.J.S. Bank, to the credit of the Casual Labour Board? Yes; they were all paid by me.

8621. Can you tell me whether they were all paid in sums of £6,000? They were all paid in sums of £6,000 to the best of my recollection, except the larger payments to the bank, such as £72,000. That of course was paid in one lump sum to the bank, to the credit of the Casual Labour Board.

8622. Do you know whether, at the time that payment was made to the bank, the account was largely in debit? I cannot say what amount was in debit at the time. I simply pay the moneys.

8623. Then your duties do not bring you in contact with any receipts? No; it is the Receiver who gets those.

8624. And you cannot give us any information as regards receipts? No.

8625. When these payments of £6,000 were made, who gave you authority for the payments? The authority in each case came by letter from the Colonial Secretary. It passed through the Examiner, and from him to me.

8626. Are there any papers now in your office under your immediate control relating to the Casual Labour Board and their payments? None whatever. All the vouchers leave me the next day after payment.

8627. Where do they go to? To the Accountant.

8628. What is the name of the Accountant? Mr. Pearson. They go then to the Audit Office; that is the routine.

8629. *Mr. Waller.*] Was not that payment for £72,000 made on account of twelve vouchers for £6,000? Yes; I think so. I am speaking from memory, of course.

8630. What is the name of the receiving officer who receives the accounts for payment? He is not called the receiving officer; he is the Examiner. They go to him for examination before they come to me for payment.

8631. Do you think it is singular from your experience that the number of vouchers, in all about forty sets, should be made up to amount to £6,000 exactly on each occasion of an advance? I would not like to answer that question; there might be circumstances that would justify it.

8632. I mean where the sums have been made up to represent £6,000 on forty different occasions;—does it not seem a strange thing? I have not given it a thought whether it was so or was not. I had authority to give the bank so much on behalf of the Casual Labour Board, and I did so.

8633. Would there seem to be any difficulty in the way of making up these amounts in this manner? To give an answer to that would be merely stating my own ideas, and I would not like to commit myself to an opinion.

Sydney Richard Corkhill called in, sworn, and examined :—

- Mr. S. R. Corkhill.
10 April, 1889.
8634. *President.*] What is your position in the Public Service? Examiner of accounts in the Treasury.
8635-6. In that position, would you have anything to do with any amounts paid into the Treasury on account of the Casual Labour Board? No.
8637. Who would be the officer to deal with that? The Receiver, Mr. William Newcombe.
8638. That is, as regards money paid into the Treasury by the Casual Labour Board? Yes.
8639. Can you give me any explanation of the items in this statement, which was handed to me yesterday by the Under Secretary for Finance and Trade? None whatever.
8640. Is there any gentleman in the Treasury who could? The Receiver or Accountant. It is made out by the Accountant. It would be received by the Receiver, and passed to the Accountant.
8641. Who is the Accountant? Mr. Pearson. Mr. Pearson and Mr. Newcombe ought to be able to give you an explanation of these different items.
8642. Will you kindly tell me what particular duties you had as regards the vouchers and documents in connection with the Casual Labour Board? Well, anything that I have had to do with their documents has been somewhat incidental, because the payments to the Casual Labour Board have been by open advances—that is, we allowed a certain amount—say £6,000—and they would give a guarantee or obligation receipt to account for the money to the Auditor-General. In the ordinary course of events we would not see the adjustment of these advances, but the Relief Works vote became exhausted, and we had to allow them an overdraft, and consequently the vouchers were sent in to the Treasury to cover the overdraft, or we would never have seen them, and that is why we have a few of the vouchers now.
8643. Is it just by the accident of the Relief vote having run out that you personally had anything to do with it? Yes; exactly.

James Kidman called in and further examined :—

- Mr. J. Kidman.
10 April, 1889.
8644. *President.*] Do you produce the documents you were asked for last evening? I produce a deposit slip of the City Bank, showing a payment to my credit of the sum of £253 6s. 7d., which includes a cheque for £20 9s. 6d. I also produce a note from the Manager of the City Bank, stating that this cheque was drawn by John Davies, but that the cheque cannot be produced without the sanction of the drawer.
8645. Was that cheque, £20 9s. 6d., in payment of the goods ordered at the National Park? Yes.
8646. Now, about these accounts of Springall's. I asked if you could furnish us with a statement of the accounts? I have got them all in rotation here.
8647. Do you produce your books showing your account with Joseph H. Springall, from April, 1887, to the 29th March last? Yes.
8648. Do these books show any settlement of the account? Yes.
8649. Commencing when? The first payment is on 3rd May, 1887, amounting to £20. Then again £66 4s. 4d. on 11th July. The next is on 8th August, £7 10s. Then on 5th September there is £9 8s. On 1st October, 1888, there is £28 10s. 11½d.; and on 31st December, £27 2s. 5d.
8650. These represent all the payments? Yes.
8651. Then can I take it that these payments represent all your dealings with Springall up to the 31st December, 1888? Yes.
8652. Is there anything outstanding? Yes.
8653-4. About how much? £2 11s. 2½d.
8655. What then was the total amount of your dealings with him between April, 1887, and December, 1888? £158 15s. 10½d.
8656. Is there anything else in your books against Mr. Springall? Nothing that I am aware of.
8657. *Mr. Waller.*] Have you got that statement showing the total payments for the Casual Labour Board? Yes; I added them up roughly. I hand in two leaves torn from my contract account-book, showing the total payments made by the Casual Labour Board between May, 1887, and the 31st December last.
8658. What is the total amount? £53,020 0s. 1d. [*Sheets put in and marked M.*]
8659. Will you furnish the Commission with the different payments for the different camps? Yes.
8660. Will you send the statement to the Secretary to the Commission? Yes, certainly.
8661. Have you got Mr. Hinchcliffe's account that you were asked about? Yes.
8662. What are the transactions? 15th May, £1 12s. 8d.; 15th December, £1 12s 4d.; 19th February, £1 15s 9d.
8663. The first two are in 1887? Yes.
8664. And the last one is in February, 1888? Yes.
8665. That finishes the whole of the account? Yes.
8666. And the total is? £4 18s. 9d.
8667. Did you bring any other documents yesterday with reference to matters in connection with the Board? Yes; I had a rough draft of my own showing that I have supplied quantities of goods largely in excess of the allowance. That is dated from May, 1887, and I found that I have supplied large quantities of potatoes, meat, bread, and butter in excess of what was ordered.
8668. And did you charge for these? No; they were over-supplies. For instance, if they wanted 2,000 loaves, I would not be particular to a few loaves; I would let them have fifty more. And the same with regard to the meat.
8669. You never charged for these over-supplies? No.
8670. Have you ever been paid for them? No.
8671. Would these over-supplies appear in your invoices or vouchers which you supplied from time to time to the Casual Labour Board, showing what you sent? They would not appear.
8672. Only the amount absolutely ordered by the Casual Labour Board would appear? Yes; my receipts for the goods delivered would show that I had delivered them.
8673. How much would the excess of goods delivered amount to? I could not say. I am not going to charge it.
8674-5. Roughly? Oh, about £500 would cover it.
8676. May we take it, then, from the statement you have just made, that you have made a loss of £500 that you would not have done had you not supplied these things over and above what was ordered? Yes; if I had adhered strictly to the ration scale I would have been that in pocket. 8677.

8677. Would you be good enough to have a correct statement made out showing the goods that you supplied over and above what you supplied as contractor—that is, for bread and meat, &c.; and could you also show, without giving yourself too much trouble, the dates of these supplies, and what camps they were sent to? Yes.

Mr.
J. Kidman.
10 April, 1889.

8678. You are perfectly positive that you have not in any shape or form charged for these extra supplies? Certainly. I did it with all the Government contracts. I always sent in a quantity in excess of what was ordered. I did it as a matter of business in my own interest. Here is my order for the encampments. They will order 3,000 loaves of bread. I will send 200 more. When these encampments are over, by giving them large quantities in excess of what I am paid for, look at the *kudos* I get for it. It is the same with the Darlinghurst gaol supplies. It is all a matter of advertising.

8679. *President.*] Where does the advertising come in? It comes in to the shop in Oxford-street. Everybody knows. They talk about these things. For instance, there are the Easter encampments. When the Volunteers leave the camp they are all citizens, and nearly all of them march down Market-street and Oxford-street. There are those unemployed supplies. There are twenty-one months for £500—about £25 per month; and what is that upon the transactions of a month—amounting to £4,272.

8680. *Mr. Franklin.*] Would this monthly abstract for the stores giving the aggregate supply tally with the number of men? Decidedly it ought to tally with the number of men.

8681. In that case, we might take it that the total amount of the rations would be equal to 984,215; that is the number of men who would take rations all the time, according to these sheets? Yes.

8682. And the amount of rations was about £53,020, a little over one-fifth of the whole money expended on the works? Yes.

8683. That represents 984,215 men, who at the minimum rate of wages of 3s. 6d. per man, would earn £172,237. Adding to the amount earned, the amount paid in rations would give a total of £225,257, out of the whole of the expenditure of the Casual Labour Board? Yes, according to your estimate, but I do not know anything about the total expenditure.

8684. In that case there would be very little provision left for the staff? Well, I do not think you look at it in the light I do. Although I have been paid by the Government, the amount has been recouped them. It is virtually the men who have paid me. I have been particularly careful as to the keeping of the accounts.

8685. Sometimes they would draw a larger quantity of rations than it was necessary to issue? Yes.

8686. Thus, if men were absent from the camp it would reduce the order of the following day? Yes; but that would make no difference in the total.

8687. *President.*] When you sent rations down to Narrabeen and other places, where did you get the receipts from? I got them from Mr. Oxley. I have got my own man there.

Alexander M'Pherson called in and examination continued:—

8688. *Mr. Waller.*] Referring to the road that you say Mr. Burrowes made on Mr. Gannon's property,—had he authority for making that road? I really don't know; he told me that he had at the time. I cannot remember whether he showed me the authority, but he told me he had authority. That was in answer to my remonstrance with him.

Mr. A.
M'Pherson.
10 April, 1889.

8689. Do you know if the road was paid for? Well, I don't know of my own personal knowledge, but I have no doubt it was.

8690. Do you know any roads of a similar character that were made? No. I have not been through many of these roads. Once or twice I have ridden across what I call by-roads, but I took no particular notice. My attention was called to this one for the reason I have explained.

8691. Were you one of the unemployed? Certainly I was not one of the unemployed in the sense in which the term is understood.

8692. Was there any reason to suppose that any of the officers you were connected with would fail to know that you were not one of the unemployed? I do not know that any of them had reason to suppose that I was amongst the ordinary unemployed.

8693. You stated yesterday that Mr. Burrowes, on two different occasions, paid for work that never was performed;—are the Board aware of that? Not so far as I know.

8694. Did you not think it came within your duty, knowing such to be the case, to have apprised the Board of the fact? Well, I became aware of the thing long after it had occurred, and in the meantime they took precautions to prevent anything of the kind occurring afterwards.

8695. I will ask you to look at this document now in my hand, No. 88/1,129, purporting to be a letter written from Parliament House, Sydney, on the 23rd January, 1888, to the Principal Under Secretary, signed William Lovell Davies:—

Sir,

I have the honor to request that you will permit the gang of unemployed now at work on the road to Port Hacking, on the Holt-Sutherland Estate, to be put on to clear and form the Government road, about 1 mile in length, running from the aforesaid road to another point of the said river, as shown in the plan forwarded in my letter of the 16th instant, before being removed from the locality.

Parliament House, Sydney, 23 January, 1888.

I have the honor to be, Sir,
Yours faithfully,

W. LOVELL DAVIES.

Critchett Walker, Esq., Principal Under Secretary.

—? Yes.

8696. Turn up the corner? Yes. Minute "referred to the Board.—C.W., 23/1/88. Chairman of the Board, B.C., initialled C.W. Recommended for approval, having a large number of men working in the vicinity—J. DAVIES, Chairman, B.C. 9/2/88. The Principal Under Secretary. Note: Returned to Colonial Secretary's Office, 10th February, 1888. Submitted, 15/2/88. For approval.—C.W., 20/2/88. Approved.—H.P., 20/2/88. Work completed.—E.M. BURROWES.—There is the stamp of the Casual Labour Board, National Park, 25/2/88." There is a further note: "To the Chairman of the Casual Labour Board, B.C., 21st February, 1888.—C.W. Will Mr. Burrowes inform W. Lovell Davies, Esq., M.P., 22nd February, 1888. Further noted that Mr. Burrowes will please proceed with this work at once.—J. DAVIES, Chairman, B.C., 22/2/88."

8697. What is on the head of this? "Gannon's Road."

8698. Is that the road that you referred to? The facts of this are consistent with this being the road I referred to, but they are not sufficiently exhaustive to enable me to say.

8699.

NOTE (on revision):—Q. 8697. Add "written in pencil and in Mr. Burrowes' handwriting."

Mr. A.
M'Pherson.
10 April, 1889.

8699. If it is the road, is it not apparent that Mr. Burrowes had full authority for doing the work? Yes.
8700. And if it is the road, do you still hold to the opinion that it is a private road? I did not say it was a private road. I said it was a road that I did not think should be made in the public interest at the time.
8701. After reading that document, is it not possible that Mr. Burrowes may have had a like authority for doing other roads of a similar nature? Certainly it is possible.
8702. Although these roads might not appear to you to be roads in the sense of public roads? Well, it would be more convenient if we understand each other as to what is meant by a public road.
8703. I will put it another way to you. Although the expenditure of money on these roads would not be to the advantage of the public? All these things are differences of degree. The road in its present state was not such as to warrant the expenditure in my opinion.
8704. I want you to tell us your reason for designating Mr. Burrowes and Mr. Larnach as informers? Well, because I had very frequently been hearing a little of various things that they have stated to various persons connected with the work, and because I know that each of them has made accusations of the gravest kind against the other, and they are now apparently for some purpose banded together against somebody else, and upon friendly terms. Men who had any self-respect could not possibly be on good terms after what they have said of each other. For instance, I have heard Larnach on three or four occasions—not on one day, but three or four months apart—state that Burrowes had committed theft and forgery; and I have heard Burrowes repeatedly speak of Larnach as a bad man; that he recognised him when he came down from Brisbane; that he knew him in Queensland; that Larnach had followed him about there touting for drinks. I have heard them continually until recently speak ill of each other.
8705. Then we may understand that you do not mean that the fact of these gentlemen coming here and giving evidence, and answering honestly the questions of the Commission, would be a fair reason for calling them informers? No. We often say colloquially things that we do not mean in their literal sense. I feel a great contempt for men banded together for some purpose against somebody else, being on friendly terms now, after what each of them has said of the other.
8706. Have you had many opportunities of seeing Mr. Larnach, Mr. Hinchcliffe, Mr. Hibble, Mr. Wells, Mr. Houson, and Mr. Burrowes during your employment with the Casual Labour Board? Yes; I have frequently seen them on duty and off duty.
8707. Have you seen Mr. Larnach the worse for liquor on duty? Yes. It was not during office hours, but he has come into the office, when I was there, intoxicated.
8708. Have you seen him in that state more than once? No; only once.
8709. Mr. Hinchcliffe? I never saw him with the slightest sign of intoxication about him.
8710. Mr. Hibble? Never.
8711. Mr. Burrowes? I have seen slight signs on him.
8712. Any of the others? No.
8713. Any of the members of the Casual Labour Board? Certainly not.
8714. Have you had frequent opportunity of seeing these gentlemen? I have seen them frequently, but I have never seen the slightest signs of intoxication upon any of them, except Mr. Larnach, and slight signs upon Mr. Burrowes.
8715. *President.*] Have you, since yesterday, looked into this return (ordered by Legislative Assembly to be printed, 8th January, 1889) of works carried out under the control of the Board, that I handed to you? Yes.
8716. Does it appear to you to be correct? In the main it is correct, subject to some little remarks which I have put in the paper I have handed to you.
8717. At the end of this memorandum you have noted some other work—is that not stated in that return? It is not stated in that. There is the road from the southern extremity of the Lady Carrington Road to Garie, impracticable, cleared about 2 miles; road from near Cornwell's on the Bulgo Road to Otford, cleared, and found unsuitable; section of the Waterfall Road, about 19 chains, formed and ballasted, and found to be too steep for traffic; culverts appear generally to be understated as to number.
8718. Where is the Audley Road? It is a road leading from Loftus Railway Platform, within the National Park, to Audley.
8719. Is the statement correct in the return—2 miles cleared? No. So far as I know, we have only cleared about half a mile.
8720. Bankstown Common;—is that correct? The work appears, by a clerical error, to be 35 acres instead of 30.
8721. Boulevard Road? That is a road leading through the Government Reserve at Huntsman's Hill. I do not quite understand the distinction between the two columns in this return. The one is headed miles of road cleared and formed, and the other is headed cleared, formed, and made.
8722. Is the Blue Gum Road correct? This is one of my difficulties about understanding these headings. This road has been cleared and they consider formed. I do not understand the use of the further terms; if making means metalling, it certainly has not been metalled.
8723. Bulgo Road? There is a statement here that since the road has been started two saw-mills have been set to work. So far as I know the mills have not been set to work; but I have not recently been at the place where they should have been at work.
8724. Campbelltown and Eckersley Road? I have not seen that road of late. I have recently had sole charge of the works, and I have not been over it at all; but I doubt if as much as 11 miles have been cleared.
8725. Does it give direct access to the coast district? That should be qualified by stating that it will give direct access to the coast district when the road known as the Woronora River Road has been completed.
8726. Coronulla Road? Coronulla Road is stated to be $2\frac{1}{2}$ miles long. I think that length is excessive.
8727. Illawarra Road? It is said it has been made from the Government punt to Sutherland, 99 feet wide. The formation, so far as I remember, is only 42 feet wide. It is said to be in thorough repair for all traffic. At the date of this report it certainly could not be said to be in thorough repair for all traffic.
8728. The National Park? The area cleared and under-scrubbed is said to be 13,800 acres. I doubt the correctness of that area, because I believe I was present when the area was computed at Mr. Burrowes' instance and by his direction, and if there has been no more reliable statements brought in since, I was dissatisfied with the way in which the work was calculated. It is said also in the remarks column that 427 acres have been planted with ornamental trees. I think that must mean planting wattle seed over that area, for I am certain that there is not that area planted with anything else. 8729.

Mr. A.
M'Pherson,
10 April, 1889

8729. Roberts' Road, Bankstown? The length given must include the length of some minor roads that were cleared in that neighbourhood.
8730. Sutherland-Loftus Road? The length they have given here is 2 miles. That should be $1\frac{1}{4}$ mile.
8731. Unwin's Bridge Road? I think the length formed and ballasted or metalled should be stated as $1\frac{3}{4}$ or $1\frac{1}{2}$ miles, instead of 1 mile.
8732. Waterloo Road? The length stated there as 4 miles, formed and cleared, should be about 3.
8733. Waterfall and Garie Roads? It speaks of seventeen culverts and fourteen bridges. I would not call any of these works bridges myself. I do not think that they are of sufficient importance to justify the name. On the other hand, I believe the number of culverts is much in excess of seventeen, or even seventeen plus fourteen.
8734. Woronora River Road? I think the distance given there as having been cleared must include the clearing of some roads in the neighbourhood of it. For instance, a section of the Illawarra Road.
8735. Woronora Road? That road in its present state is wholly impassable for wheel traffic.
8736. Are there any other works beyond what you have noted at the foot of the memorandum that are not included in this return? I do not think there are any of importance.
8737. Can you fix about the date that you were at Mr. Davies' house at Leumeah? I cannot now, but I could by reference to the pay-sheets, I think.
8738. Was it last month? I think it was in the early part of last month.
8739. Was it before or after it became public that this Royal Commission had been appointed? Oh, it was after that it became public.
8740. What were you doing up there? I was inspecting the roads up there, and I finished late at night after the train had left for Sydney, and the overseer was there to drive me down to a point near Campbelltown. When I found myself there I went to Mr. Davies' house, as he had repeatedly asked me to go there, and I had never been. Another reason was that it suited me to go to Mr. Davies' house, because I could go early to my work. By staying at Mr. Davies' I saved myself the distance between his house and Campbelltown.
8741. Who commenced the conversation about the Casual Labour Board and this inquiry? I really do not remember.
8742. Was it at night or in the morning that it took place? In the evening, after tea.
8743. Cannot you say whether you commenced it or he commenced it? No, I cannot say.
8744. Will you give me, as nearly as you can, the words of that conversation? Oh, I cannot profess to give the words of the conversation with any reasonable accuracy at all.
8745. Can you give me the substance of that conversation? I doubt even if I can give you the substance of it. The things that chiefly impressed themselves upon my mind are the questions about refreshments, because he told me about Kidman's receipt, and he said he would show it to me.
8746. You made some reference yesterday to some firewood? Yes.
8747. What about that;—what was the conversation? About the disposal of the money.
8748. Did he commence it or did you? I really do not remember.
8749. What is the probability? I think the probabilities are evenly balanced.
8750. Did you know anything about the firewood before you went up there? I heard that Mr. Davies had been charged with appropriating moneys that had been received for firewood. I think Mr. Larnach told me that he had done so, and bearing that in mind I think it is more probable that I introduced the subject than that he did.
8751. What did he say about that? He said he had paid the money into the bank, and the books would show it.
8752. Did he tell you that he had paid all the money in. He did not use the expression "all" that I remember; but I inferred from the conversation that he had paid it all in.
8753. Have you any recollection of his mentioning the bank? Not a clear recollection, but I think he said the Australian Joint Stock Bank.
8754. Did he mention a bank? Oh, I am sure he mentioned a bank; and he also told me that it ought to have been paid into the Treasury. I told him that it would probably be the case that the money should be paid into the Board's account, but he said he found that it was not so, and the Board treated it as part of their income. He told me also that some acquittances had been given by him to the Treasury, and that any irregularity of that kind had been amended.
8755. Is your recollection of that conversation clear about the statement of his payment into the bank? I am clear that he said that the money had been paid into the bank.
8756. He told you that he had paid all the money into the bank? I am not sure about the word "all," but he conveyed the impression to me that he had paid all the money into the bank.
8757. And that he had fully discharged himself? Yes; and that he had satisfied the authorities that he was free from any misappropriation, although it was irregular in the first instance.
8758. Then the impression left on your mind was that there had been an irregularity in the first instance, but it was afterwards corrected? That was certainly the impression left on my mind after the conversation.
8759. Was any other matter touched upon that you can recall, besides the firewood and the refreshments? No.
8760. Were the characters of the officers discussed in any way? Oh, yes. He told me that Mr. Burrowes had written him a letter in December last, and he was particular in showing me this letter to point out the date of it, because it contained statements warning him of two other persons as not being his friends. This letter, he said to me, referred to Mr. Wells and Mr. Houison, although their names were not mentioned. He gave me the letter to read.
8761. Can you recollect the substance of the letter? It was something to this effect: That he was out no the Illawarra Road the other day with (I do not think he mentioned the names of the people), and, from some conversation he had with them, he wished to warn Mr. Davies that they were speaking ill of him.
8762. Do you think the letter was dated December last? I am sure it was dated December last. I think it was the 12th December. I believe it was 12 December, 1888, but I am not sure about the day of the month.
8763. Did Mr. Davies discuss the purport of the letter with you? Oh, yes; he said it was a proof of Mr. Burrowes'

- Mr. A. M'Pherson.
10 April, 1889.
- Burrowes' treachery, that at this time he had been speaking ill of him, and endeavouring to make mischief between him and his colleagues.
8764. Did you express your opinion to Mr. Davies? Yes; I agreed with Mr. Davies that it was a treacherous thing to do.
- 8764½. Can you recollect whether the question of the appointment of the Royal Commission was discussed, and the ability or qualification or otherwise of the members constituting it? No; I think he said all these things would come out before the Royal Commission, and that any statements made would have to be proved. That referred to the statements that Burrowes and Larnach would make.
8765. Had you afforded Mr. Davies any previous opportunity of knowing your opinion of Mr. Burrowes? Yes; I think Mr. Davies must have been very well aware of my opinion of Mr. Burrowes.
8766. From your previous conversations? Yes.
8767. Was there any other matter discussed that you can recall, Mr. M'Pherson, beyond the firewood, the refreshments, and Burrowes' letter. Did he touch upon any of the other officers—Mr. Larnach, Mr. Hibble, Mr. Hinchcliffe, or any of the others? No; he did not talk either of Mr. Hinchcliffe or Mr. Hibble, but I think it was on that occasion that he told me that he lent Larnach money to enable him to get a bailiff out of his house, but I am not quite sure; I think that is the occasion on which he mentioned that to me.
8768. How long do you suppose the conversation lasted? The conversation was not continuous. Mrs. Davies and her daughters were present, and he was talking of his place and his property, and I was talking of my place, and fifty other subjects would turn up in a casual conversation.
8769. Do you think that in mentioning these matters to me you have exhausted the conversation? I do not profess to have exhausted the conversation, but I have exhausted my recollection of it.
8770. Did it occur to you from anything Mr. Davies said that his feelings against Mr. Burrowes were rather strong? Yes; very strong against him.
8771. Can you say from your own knowledge how long Mr. Davies had manifested this feeling against Mr. Burrowes—how long previously? I do not think I remember him on a previous occasion expressing actual ill-will to Mr. Burrowes until the last few months of 1888. He then spoke of Mr. Burrowes as if he doubted his capacity, and doubted if he were reliable. I refer to his competency as an engineer—he doubted if he was competent to make a road, for instance.
- 8771½. Have you heard him speak disparagingly of Mr. Burrowes prior to November, 1888? I heard him on one occasion—I think it was before November—somewhere about October. We went down to inspect a road called the Woronora River Road. He said nobody but a fool would have taken the road where it was.
8772. I am speaking more particularly of disparaging statements as to character? No; I think that conversation I have told you of was the first occasion he has spoken that way of him to me.
- 8772½. Have you any reason to believe that up to November, 1888, Mr. Davies entertained any other than a good opinion of Mr. Burrowes? I do not profess for a moment that he entertained a good opinion of Mr. Burrowes. I think he looked upon him as weak and a failure, and I think he must have been aware that he was more or less dissipated.
8773. Did it ever come to your ears that he had been censured? Yes. I heard him censured.
8774. Where? In the office of the National Park. I heard Mr. Wells censure him in Mr. Davies' presence.
8775. Was the censure a severe one? If Mr. Wells had said to me what he said to him, I should have been disposed to resign at once.
8776. Was Mr. Wells excited? Mr. Wells was angry; no doubt he used hasty expressions that he would not have used on other occasions.
8777. Do you recollect what he did say? He said that he knew nothing about roads—that he was unfit to look after any road. It was rather unpleasant to me, because he said, "I will have to send M'Pherson down to look after these roads." It would be disagreeable to Mr. Burrowes to have this said to him when I was present, so I went away a little distance, and being a little deaf I did not hear the remainder of the conversation. I could see, however, that Mr. Wells was angry.
8778. Did Mr. Davies interpose? Certainly he did not interpose then.
8779. Coming now to what took place at this office recently, you told us I think in your yesterday's evidence that you had some conversation with Mr. Springall outside the door here? I do not remember saying I had a conversation with Mr. Springall, but I did have a conversation with him.
8780. While you and he were waiting to be examined? No; I think you must have misunderstood me. I was attending here one day last week at the Colonial Secretary's Office, on other business, which had nothing to do with this. When I saw Springall I went inside, and he told me he was waiting to be examined.
8781. I understood you to say that you and he were waiting as witnesses? You have either misunderstood me, or I have misunderstood you. I had a conversation with Mr. Kidman.
8782. Had you any conversation with Mr. Springall? Yes.
8783. Will you tell me what that was—the very words, if you can give them? I think I began by asking him if he was going to give evidence before the Commission, and he told me that he was. I forget now what he said about Mr. Burrowes then, but he said that Mr. Burrowes had been making some charges against him. I forget what the particular charges were that he referred to. The chief thing was that while we were talking we saw that Burrowes was standing at the door, and he nodded in a most friendly way to Springall; but Springall took no notice of him. We were talking about his house, and I asked him how things were going.
8784. Was that the occasion on which the expression "Pigott" was used? No.
8785. When was the occasion in which the word "Pigott" was used? I think that was on Monday.
8786. Where did it take place—you were in this building, I think in the ante-room? Yes.
8787. Who were present? I really do not know; I think I was saying something of the kind to Josephson.
8788. Could any one have overheard what you said? Not so far as I know.
8789. Did you use the expression "Pigott," or did he use it? I think I used it.
8790. How did it come up? A number of people connected with the department have been in the habit of calling Burrowes by that name lately.
8791. Had you heard him so called? Yes.
8792. By whom? I forget by whom I heard it used first.
8793. Can you tell us anybody? Yes; I have heard Mr. Springall call him so.

Mr. A.
M'Pherson.
10 April, 1889.

8794. More than once? Possibly on the particular occasion I am speaking of, but I do not recollect it particularly; and Hibble, I think, I have heard use it.

8795. Are you sure you heard Springall call him so? I am not perfectly sure about it, but I think I did. I have also heard Hibble, and I have heard several people, but I did not pay any special attention to it.

8796. Have you heard Mr. Davies? No.

8797. Mr. Hinchcliffe? No.

8798. Mr. Wells? No. I have not seen Mr. Wells since the Commission was appointed.

8799. Anybody else that you can recollect, except Mr. Springall and Mr. Hibble? I have heard others, but I cannot recall them at the present moment.

8800. Have you used the expression to other people? Yes.

8801. Frequently? Well, several times.

8802. Had you any reason to believe that he was giving untrue information? Certainly some of the information that he had been giving, if it was reported correctly to me, was untrue.

8803. Had you any reason to believe that he had been giving untrue information to this Commission? No; I knew nothing of what he had been giving the Commission. I had no knowledge upon that point.

8804. Do you know why they called him "Pigott"? Well, because he was considered to be an informer. He was generally untruthful, and spoke ill of those people who had been kind to him.

8805. Who do you think could show us over all the roads in the Holt-Sutherland Estate, and point out which of the roads the unemployed did—could you do it? No; I could not do it with regard to what are called bye-roads. The only person that could do that would be Mr. Burrowes.

8806. If Mr. Burrowes showed any roads as having been done by the unemployed, would you believe him? I would not believe him.

8807. Is he a proper person then to show us over them? Certainly he has the knowledge.

8808. But you say that if he points out a certain work, and says it has been done by the unemployed, you would not believe him? I would not believe him. If you refer to the Metropolitan District Surveyor the officers in his department might tell you about him.

8809. My colleagues and I want to have somebody who can give us authentic information as to what the unemployed have done on the Holt-Sutherland Estate. Mr. Burrowes you say could show us, but is there anyone else? There is one man that could help you, and that is Mr. Murphy of the Holt-Sutherland Estate.

8810. Did you know Mr. Murphy? I know a little of him.

8811. Did you see much of him? I did occasionally.

8812. Do you know if he and Mr. Burrowes were friendly? They were very friendly at one time.

8813. Do you know what caused the breach? Well, Mr. Burrowes showed me some letters that he had received from Mr. Murphy with regard to a complaint that he (Burrowes) had made to Mr. Davies, that Mr. Murphy was unduly interfering with him. The letter was handed to me by Burrowes as being an apology from Murphy. At that time I had never seen Murphy, and knew nothing of him except what I had heard from Burrowes.

8814. Do you say the breach was brought about through Burrowes reporting Murphy to his superior officers? That was the first I had heard of any breach. Previous to that they were on good terms. I might mention that I formed that impression from the way Burrowes spoke of him. He said, "I have been down to see Jim Murphy." This letter that Burrowes showed me, which he considered an apology from Murphy, appeared to please him. He was triumphing over it, saying that he had made Murphy knuckle down and go under.

8815. Do you know whether Murphy gave Burrowes any gratuities? Certainly not so far as I know.

8816. Do you know of Mr. Burrowes, or anyone else connected with the Casual Labour Board, deriving any benefit from the Holt-Sutherland Estate, or any other person owning property improved down there? I know of none deriving any benefit except Mr. Springall.

8817. Do you know Mr. Jamieson? I have met him on one occasion with Mr. Bennett of the *Evening News*.

8818. Where was it? Mr. Davies invited Mr. Jamieson, Mr. Bennett of the *Evening News*, Mr. Oxley, the superintendant at Narrabeen, Mr. Cook of the *Herald*, Mrs. Bennett, and Mrs. Cook. They were invited out, I think, to see the works at Waterfall. Mr. Davies wished me to meet him there, and I did so. Mr. Cook missed the train, and did not meet us at Waterfall, but met us afterwards on the river a mile or two above the dam.

8819. What was that—a picnic? A sort of picnic.

8820. Was that Mr. Samuel Cook? Yes; he was sub-editor of the *Herald*, but he is general-manager of it now.

8821. Do you know that he is connected with the Holt-Sutherland Estate? I am not aware; I have heard something of the kind.

8822. Did you ever hear that he was a director? No.

8823. Do you know whether Mr. Davies or Mr. Jamieson had any interest in some land between Gunnamatta Bay and the ocean? I think the land between Gunnamatta Bay and the ocean is a public reserve of about 30 acres. My present recollection of that place is, that it is a reserve. At any rate I do not know who owns it if it is not a reserve.

8824. Was Mr. Burrowes present at that picnic? No; I think he was away at Liverpool.

8825. Do you know whether Mr. Burrowes has any land there? I do not think it is at all probable.

8826. Was the taking up of land discussed at that picnic by Mr. Davies, Mr. Jamieson, or anyone else? No.

8827. *Mr. Waller.*] In this return of work carried out under the heading, miles of roads cleared, formed, and made, if formed and made means metalled, is it correct? In the first instance the Audley Road, but it does not exceed a mile and a half.

8828. What other roads would not be metalled? This Blue Gum Road has not been metalled. I do not know absolutely, but I doubt about the Illawarra Road to Liverpool being metalled; but it is possible I am altogether wrong, as it may have been metalled since I saw it.

8829. When did you see it? It is twelve months ago since I saw it.

8830. These roads on the National Park are said to have been made? If making means metalling, I do not think 10 miles have been metalled.

8831.

Mr. A. M'Pherson.
10 April, 1889.

8831. *Mr. Franklin.*] Assuming that the contract for the supply of rations is correct, would that form a proper basis upon which to calculate the total number of men employed? Yes. It was impossible under the system to avoid some waste in the rations, but subject to a correction, that might be from 3 to 5 per cent., it might show the number of men employed.

8832. *President.*] Are you a wealthy man? Not wealthy; but I have sufficient means to keep me independent of Government work if I wish.

William Newcombe and James Pearson, respectively, Receiver and Accountant at the Treasury, were called in. A statement of payments made to the Treasury on account of the Casual Labour Board was handed to them, and they were asked to supply the Commission with the documents explaining certain items therein representing sales of Government property. They undertook between them to procure the information from the Auditor-General's Office and other places.

William Mason Robertson called in, sworn, and examined:—

Mr. W. M. Robertson.
10 April, 1889.

8833. *President.*] What are you? I am a sort of Jack of all trades.

8834. Are you in any employment now? Yes, on the Tubbo Station.

8835. What are you doing there? Cooking.

8836. You have written several letters to the Secretary of this Commission intimating that you can give certain evidence with reference to matters that the Commission has under inquiry? Yes.

8837. Will you state to the Commission what you have to say? Certainly. The evidence I wish to point out is from the starting altogether. Money was paid away where it should not be paid at all. I can speak of the way that Mr. Springall manipulated the books and the pay-sheets in one way and another. They called them vouchers at that time. I pointed out to Mr. John Davies how things were being done, and how money was paid away and all that. I was paid £1 too much overtime once, and Mr. Springall told me to refund the pound. I said I would keep it. I spoke to Mr. John Davies about it, and he said I was to keep it. Mr. Springall had, at the start, a private store of his own. He cannot show a billhead for stores that were supplied to him privately; but he sold the men's rations and kept the money. I pointed that out to Mr. John Davies and to Mr. Wells. He pocketed the money. These stores were stopped, but he did not stop them altogether. He got a man named Robinson, and the stores were put in his name. Mr. Wells asked Robinson if he had the store, and Robinson said "Yes." He asked him what he was to pay Mr. Springall. That was only a quibble; the store still belonged to Mr. Springall. I drew Mr. Burrowes' attention to it. I did all in my power to show how things were being done, but I was not strong enough to get him turned out of it. Mr. Davies admitted himself that things were not right, but he took no steps in the matter. Now Mr. Springall has a public-house built out of the proceeds he made out of the unemployed. There was a man who owed Springall 28s. on this private account, but he would not pay him this money; so Mr. Springall put him down for a quarter of an acre more work than he had done, and told the man he could pay him that way. The man drew the money, but never paid him at all, but told him to go and hook for it. Mr. Sanderson can prove this. When it came to pay-day there was always a row about the rations. But Mr. Kidman was always out on that day. Nothing could be found fault with the rations on that day when everyone was looking at them, but the men had to suffer for it afterwards. Johnson used to take the things supplied for the use of the men, and carry them away to his own house in Sydney. Did I tell you about a man that was paid £3 3s. too much. He had only two days coming to him. Mr. Springall told him he would have to return the money, but the man did not do it; he cleared out. Yule and I saw him paid at the office. He had only two days coming to him, but I saw him take pound-notes from off the table. He had previously told me it was not worth his while going to the pay. Springall and Burrowes, when the stores were shifted from the National Park to Heathcote, took men on to do the work that had not horses nor anything. They went and used up four or five carts for these men, although another man had said he would take out the stuff at 10s. a day. They were getting more than that each. Mr. John Davies can tell you more than I know. There is not a single pay-sheet you can get that will give you a detailed statement of the tools sold. The men got tools when they first came out, but any fresh tools were charged to their account. That did not go in to the Board's account, but went to the private account. Johnson used to stand at the door and call the men to come, and pay these private accounts. There was M'Intyre and Woods that drew £66 as nine days pay, for eight men in each gang. The ganger did not draw it. The two men drew it between them so that it would not look so much. They were paid on the Saturday so that they could come into Sydney and enjoy themselves for the week. It was then that M'Pherson started to pull down the prices.

8838. Do you recollect anything else? There is one thing. Sanderson the surveyor can prove that a man was put down for more than a quarter of an acre of work which he never did. There are lots of things, but then they are all trifles.

8839. What were you doing there? I was a sort of everything. I was in the store, and I used to take the men out from here. I was also sent to the Heathcote stores. Mr. Springall and I could not get on together, so he turned me out of the stores.

8840. When did you go out there? The first day the work was started. I went out first of all.

8841. In May, 1887? Yes.

8842. Were you one of the unemployed? Yes.

8843. Were you one of the leaders of them? Well, apparently, I took a leading part with them.

8844. Were you one of the deputations? Yes.

8845. Were you one who used to address them? Not at the Statue, but at the gate here, when we came to see Mr. Walker, and he told us not to come here.

8846. Did you go to Parliament House? No.

8847. Was there any speechifying at the National Park after you went out? Yes; several times there was.

8848. Did you address them? No.

8849. Did you ever take steps to get up meetings out there to go into any of your grievances? I did. I spoke to Mr. Burrowes first. He said, "Take the men away, Mr. Davies might bring someone with him." When Mr. Davies came up to the store he would not listen to them.

8850. When did you leave? I left on the Jubilee; the same day.

8851.

Mr. W. M.
Robertson.
10 April, 1889.

8851. Then you were only out there a few months? That is all.
8852. What was the origin of your quarrel with Mr. Springall? The origin was when I saw what he was doing. The first row was about this pound that he gave me too much. I saw things were not being done as they ought to be. I wrote out a statement, and Mr. Wells came out on the Sunday; but he did not get in the right place in the store to find out what he was looking for. I wanted a warrant taken out to search Mr. Springall's house, but Mr. Davies would not give it to me.
8853. You were only two months out there altogether? Yes, from April until June.
8854. And all these iniquitous things you tell me of took place whilst you were there? Every one of them.
8855. How often did you have meetings of the men? When they had a grievance they would come up to the store and ask me to go down and listen to them.
8856. You were one of the moving spirits then? Not after I went to the park. I was a sort of medium. They showed their grievances to me, and after that I went to Mr. Burrowes and did what I could.
8857. Do you know a man named Harry Underwood. Had you any disturbance with him? No.
8858. Do you know John Smith? He was sent out to the stores at Heathcote with me.
8859. Do you recollect telling some men to go to Mr. John Davies and tell him that they were being swindled out of their meat? I told someone about it. That was the time they had half a pound of meat put on extra.
8860. Did you leave the works of your own accord? Yes. I never went back after I came to Sydney that week.
8861. Did you tell them you were leaving? No.
8862. Did you make any demand for back pay? Yes; I wrote twice, but never got it.
8863. How much was it? 15s. for three days.
8864. Is it still due? Yes.
8865. Have you been in employment since? Yes; I went from there to Clifton, and got on work.
8866. How do you mean that Mr. Springall manipulated the pay-sheets? He put men down for work that was never given them at all. I saw Yule draw money that was not due to him, and I drew attention to it at the time.
8867. How often did you draw Mr. Davies' attention to these delinquencies? Four or five times, and so that he could not get out of it. I wrote it down in black and white.
8868. How do you know Springall sold the rations? Because he sold them and they went into a private account. I had the making up of this account the first time I went there.
8869. Did you tell Mr. Davies that? I did. I showed it to him.
8870. Do you say you also pointed it out to Mr. Wells? Yes, and also to Mr. Houison.
8871. What did you tell them? I showed them that certain tobacco that was sent out was not the Board's at all, but Mr. Springall's.
8872. Were you ever reported to the Board? Not that I know of.
8873. Do you recollect having some disturbance about some meat-house that you were building? I gave in a report of it to Mr. John Davies. It was on Jubilee Saturday. He said he had not got time to consider it then, he was too busy. He said, "You will get your rations sent out to Heathcote separate from the others altogether." The next day being Sunday I asked two or three of the men to help me put up a place for the meat. Then I got a letter from Mr. Burrowes, carried by John Smith, telling me not to employ labour at all, and that I was to appear before the Board.
8874. Did you appear? Yes; that was the morning I saw Yule being paid too much.
8875. What did the Board say? I did not keep my time. They said that I appeared as if I had been drinking, and they would not listen to me. I saw Mr. John Davies afterwards, and said I could substantiate my statement, and that it was correct.
8876. Did you know a man named Flemming out there? I am not certain. I believe I know the name well enough.
8877. How long were you in the ranks of the unemployed? A fortnight.
8878. What were you doing before? I was a seaman.
8879. How long have you been out here? I have been backwards and forwards for twelve years. I am an able seaman. I can go in any capacity. I have been at sea for twenty years.
8880. How long were you in Sydney before you went to the National Park? Only a fortnight.
8881. What pay did you get at the National Park? 5s. a day, for seven days in the week, until I went to the Heathcote stores, and then Mr. Springall took the Sunday off me.
8882. *Mr. Franklin.*] Did Mr. Springall keep a private store? He kept things in a store that he called a private store; but still they were the same stores there.
8883. Suppose he can show receipted bills for stores for the time which you state? He cannot do so.
8884. Did you not see cases come out addressed to him? The only thing that came addressed to him was tobacco. I had the serving out of the stores at the time.
8885. If this Commission is told that stores were sent out to Mr. Springall, then you did not see them? I mean to say, that he never received a loaf of bread or a pound of butter to his own account. They came direct from Mr. Kidman's as rations. He has books that show his private accounts. They were sold for cash, and the men paid at pay-day.
8886. Have you been in Mr. Springall's private store? I have had occasion to be in it several times. I have had my accounts rendered from it.
8887. Had he such things as pickles, jams, &c.? Latterly he had.
8888. You are speaking of two months' experience? Within that two months is when he put a man named Robinson in as representing the store. Mr. Springall was not then supposed to have anything to do with it. When I spoke to Mr. Davies and Mr. Houison about it they said, "I will put a stop to that."
8889. How did Mr. Springall get the rations? They came out with the rations. He was selling these for a profit. He cannot show you a billhead for bread, meat, or butter, or anything supplied as rations. He can show you billheads for aerated waters, jams, and all that, because I have had them sent to me in mistake.
8890. Did you receive the daily supply of stores? I received them on the platform. They were carried up to the store.

- Mr. W. M. Robertson.
10 April, 1889.
8891. Did you know the quantities you ought to receive? I could not tell, because the book was not there, and you had not time to run them up. Mr. Kidman told me that for every 1,000 men he sent 100 rations over. When I was at the Heathcote store, the men who wanted extra rations got them, and those who were the last had to come away without getting any at all. I said that Johnson had no right to sell them until everyone was served.
8892. You had excess of rations sometimes? Always.
8893. How did it occur? Well, for every 1,000 men Mr. Kidman sent out 100 rations extra.
8894. Were these extra rations divided equitably? No; they were not divided, because there were a lot left. After everyone was supplied there were always rations over until we went to Heathcote, and then we could not get enough, and men who had to be supplied had to go without. Still, at the National Park there was always enough and to spare.
8895. When there was a balance left, was it equitably divided? Not in an equitable way at all. A lot of bread was thrown into a corner, and they would give the men an extra loaf as long as it lasted.
8896. So the men really got the benefit? Some of them did.
8897. You have told the President that these spare stores were taken away and sold? It was like this: whilst the men would buy them they were there to be bought; but when they were getting too stale to sell they were given away. Mr. Springall would get the money himself. He has done well out of it.
8898. Did you not find a considerable waste in the meat? No; you could not get enough of meat.
8899. In issuing in small quantities there must be great waste? That was where the loss was. You could not cut it up to the exact weight; you had to throw it in.
8900. You admit, then, that extra stores were necessary in order to give the men a fair ration? But I maintain that Springall derived a benefit from what was over.
8901. Did you see him take them? I did; and saw him take the money.
8902. Did you see him take the Government issue stores to his own stores? Yes; and they were sold from the Government place and put down to the men's account without going to the private store at all. He never had bread, meat, or butter there. There were married people living on the place coming down there getting what they wanted, but they were not rations. There were no rations for married people.
- 8903-4. Was this well known? Yes, between Johnson, Robinson, and myself.
8905. You had no share? I had nothing; Johnson, I believe, had.
8906. Did you make any overtures to Mr. Springall for something? None whatever.
8907. If he had made such terms with you, what should you have done? I do not know what I should have done.
8908. Would you have spoken against him? I do not know whether I would or not.
8909. *Mr. Waller.*] Did you say the tools were sold? Yes, mattocks and axes.
8910. Who were the owners? The Casual Labour Board.
8911. Who brought out the tools for sale? They were brought out to the Park for every gang of men that came there. When they came each man was supplied with a tool of some kind. If he broke it, and required another, then he had to pay for it. These new tools, like the stores, were not put down as against the money a man drew, but in Mr. Springall's account.
8912. In other words, do you mean that Springall got the benefit of it? He got the benefit of everything he could—even the sugar-bags; forty sugar-bags had to be kept back for Mr. Springall's house here.
8913. Was there a man of the name of Johnson with you? Yes.
8914. At that time, was there any difficulty if a man wanted extra stores to find a place in which to buy them? There was no difficulty. If a man wanted them at any time he could get them.

Henry Thelluson Sanderson called in, sworn, and examined:—

- Mr. H. T. Sanderson.
10 April, 1889.
8915. *President.*] What are you? Licensed surveyor and civil engineer in this Colony.
8916. Were you examined before the Select Committee of the Legislative Assembly on 12th December last? Yes.
8917. Is this your evidence? Yes.

[*Evidence before Select Committee.*]

2709. *Chairman.*] You are a civil engineer? Yes.
2710. Have you had anything to do with the surveying, or constructing, or supervising of any roads on the Holt-Sutherland Estate? Yes.
2711. What has been your connection with that estate? I will give the Committee what information I have:—On the 23rd September, 1887, I surveyed, for clearing, 43 chains 58 links of the Port Hacking Road—that is a Government road—from the junction of Malvern Road, going towards Port Hacking. This road is a chain wide. On the 29th September I surveyed 50 chains of the same road, from Little Tureel Point, at the end of the Port Hacking Road, going towards Doolan's Paddock. Then, on the 30th September, I surveyed a further portion of the Port Hacking Road, towards the township of Sylvania, 125 chains, to its junction with the Illawarra Road. That is a Government road. On the 1st October I surveyed 97 chains of the Malvern and Madeira Road, from the Illawarra to the Port Hacking Road. These, I believe, are private roads, 2 chains wide. At least, these are not Government roads; they are not dedicated or proclaimed. On the 2nd October I surveyed, for clearing and forming, 109 chains 30 links of the Port Hacking Road to the angle of the road at Doolan's fence. That is another portion of the Port Hacking Road. On the 8th October I resurveyed a portion of 50 chains of the Madeira Road, which is a private road, for clearing and formation. On the 12th October I made a survey of the Woronora Road, from Eton-street, Sutherland Township, to the Sylvania Road, 152 chains, for clearing, forming, and culverting purposes. That is a private road. On the 12th to 14th October, I surveyed a private road, called the Coronulla Beach Road to Coronulla Beach, and on the same date I surveyed a small private road called the Lilly Pilly Road to Ewey Bay. That is 136 chains. On the same date I surveyed another short road, called the Euronga Road, from the Lilly Pilly Road to Ewey Bay. It is 30 chains in length. On the 14th and 15th I surveyed the Boulevard Road, from the Illawarra Railway to the Sylvania Road. It is a road 137 chains in length, and 1 chain 50 links wide. On the 14th October I surveyed a small road called Eaton-street. I do not know whether that is a proclaimed

proclaimed road; it may be. It is in the township of Sutherland, 36 chains. From the 9th January to 9th April, 1888, I had instructions to superintend and take charge of the works carried on on the Holt-Sutherland Estate, to superintend the formation of the Malvern and the Madera Roads, the metalling and blinding of the Port Hacking Road, and the work generally speaking.

Mr. H. T. Sanderson.

10 April, 1889.

2712. By whom were you employed? By order of Mr. Edward Matthew Burrowes, the superintendent of the unemployed, and I presume under the instructions of the Casual Labour Board. He instructed me to make those surveys.

2713. What was the statement made to you in reference to the surveying of these roads you called private roads? There was no intimation given to me that they were private roads. I was simply ordered to make those surveys so that the roads might be cleared and the areas computed. They were simply pegged out by the surveyors of the Holt-Sutherland Estate, and in fact the scrub and timber were there when I made the survey for the purpose of enabling the men to clear and form the road.

2714. You state that these roads had already been pegged out—that is, they had been surveyed by the owners of the estate prior to your going over them again? Yes; they had been surveyed by the surveyor appointed by the manager of the Sutherland Estate. Mr. Murphy, the manager, knows the surveyors who made the survey; I do not know myself who they are.

2715. Did you survey any roads that had not been previously surveyed? No.

2716. In each instance there had already been a survey? Yes.

2717. These streets had been laid out in the subdivision of the Holt-Sutherland Estate? Yes. These roads were simply surveyed for the purpose of enabling people to have frontages to the property they bought.

2718. You were supplied with a plan of the subdivision of the estate, and you surveyed according to that plan? Yes, according to their plans; they were lithographed plans of portions of the Holt-Sutherland Estate.

2719. Then you carried out the subdivision they had already shown on the lithographed plan? Quite so.

2720. Those roads that you surveyed for ballasting were public roads, you state? No, not in all cases. I am not aware that they were public roads. I believe that with the exception of the Port Hacking Road and the Illawarra Road the others are private roads.

2721. You believe so? I am not aware, but I believe that they are merely roads designed by the manager of the Holt-Sutherland Estate for sale purposes.

2722. *Mr. McMillan.*] For purposes of subdivision? Yes.

2723. *Chairman.*] In fact, you know from your own knowledge that these roads were shown in the subdivision? I do know it.

2724. Was the road to Coronulla Beach on the subdivision? I do not think it was. I only saw the subdivision on the ground. I took notice of its junction with the Illawarra Road, and surveyed it, according to instructions, as far as the beach.

2725. You say that, although not shown on the subdivision, it was pegged out? It was pegged out, and the pegs were on the ground.

2726. Was it then pegged out by the private surveyor of the estate? I believe it was. Except the Port Hacking and Illawarra Roads, all the roads were, I think, made by private surveyors.

2727. *Mr. O'Sullivan.*] Do the majority of the roads you see marked on the map lead to Crown lands? I believe they do. They are all on private land—on the Holt-Sutherland Estate. There is, I believe, a small reserve there or two.

2728. Do you consider that these roads were laid out in the public interest, or in the interests of the proprietors of the Holt-Sutherland Estate? I should have thought in the interests of the latter. I cannot say anything else conscientiously.

2729. *Mr. McMillan.*] I take it that you simply know the individual that employed you? I do.

2730. You know nothing more? That is all.

2731. Excepting that you did the work professionally as a surveyor? Yes; I made no inquiries, and simply followed directions.

2732. *Mr. Copeland.*] You see this reserve to the south of the Coronulla Beach;—I suppose there are 400 acres in it? I presume there are about that.

2733. Can you say whether any roads have been surveyed through this reserve? Not at the time I was there.

2734. You surveyed no road? I surveyed no roads. I simply confined myself to the Coronulla Beach Road.

2735. You do not know whether any roads were surveyed through that reserve? No; there was no roads surveyed.

2736. Do you know whether the headland there is a good one? It is very fair; it is a good height above the sea.

2737. If you had been surveying for the Government, would you not have carried a road through that reserve? Yes; right through to the other reserve.

2738. You did not make any road? No; not to those Government Reserves.

2739. *Chairman.*] You simply followed your instructions? Yes.

2740. *Mr. Copeland.*] You have referred to some roads as Government roads;—can you tell me when those roads were made Government roads? The Port Hacking Road I remember for the last twenty years, and the Illawarra Road for the last ten years as the Wollongong Road *via* Tom Ugly's Point.

2741. In those cases they were old Government roads? They were old Government roads originally surveyed under Sir Thomas Mitchell.

[*End of evidence before Select Committee.*]

8918. *President resuming.*] Was that evidence submitted to you for revision? Yes; and after revision I forwarded it back.

Mr. H. T.
Sanderson.
10 April, 1889.

8919. Having now heard it read over, do you wish to make any explanation? Simply with regard to question 2727. The question is, "Do the majority of those roads you see marked on the map lead to Crown lands." The answer makes it appear, "I believe they do," but it ought to be, "They do not." They do not go in any case to the Crown lands.

8920. With this exception, is your evidence true and correct in every particular? Yes, as far as I am able to tell.

8921. Did you hold any position under the Board? Yes, I did.

8922. What position? It was that of surveyor until 9th January, 1888. The office of superintendent or overseer of works was then combined with it. That was the first time I took charge of works.

8923. When did you first come into the employment of the Board? On 10th November, 1886.

8924. Were you passed on from the old unemployed staff to the staff of the new Casual Labour Board? I was.

8925. Who passed you on? The officers were permitted to remain. There was no official intimation.

8926. Were your duties confined to the Southern District? Quite so.

8927. Who was your superior officer out there? Previous to Mr. Burrowes, a gentleman of the name of Newstead, who was superintendent at the National Park; but I believe the principal gentleman was Mr. Wise, of the Immigration Department.

8928. What was the principal work you were engaged on under the Casual Labour Board? The work up to 9th January, 1888, was surveying—making surveys of clearings for the unemployed—that is, ground for them to clear.

8929. Who instructed you to do this? The superintendent. My general instructions were to keep the men employed by surveying. I surveyed these portions out into 4-acre areas.

8930. Did you live out there? I camped out at the National Park up to 9th January, 1888.

8931. Did your duties bring you into personal contact with the members of the Board? On several occasions; whenever the Board came to visit there.

8932. Did they give you instructions on any particular occasions? No, not that I am aware of. The Chairman might have with regard to some matters connected with Cook's Park, last year.

8933. During the time you were employed there, did you observe or were you made aware of any irregularities, or any improper expenditure of public moneys? Oh, yes, of course.

8934. Was there any misappropriation of the unemployed work? Yes; I drew Mr. Burrowes' attention to the fact of the men being employed on private roads on the Holt-Sutherland Estate. He said it was no business of mine.

8935. Anything else? I also had several altercations with Mr. Murphy, who was manager of the Estate, and I used to disagree with him as to the material I put on the road. He wanted to order and direct me as to what I was to do with regard to these roads.

8936. Anything else? I drew his attention to the fact that the Government had no right to go to the expense of making these roads, and he said "Ultimately the Board will send in their account to the Holt-Sutherland Estate, and the Estate will recoup them for everything they have incurred." That is with regard to these particular items of expenditure. Of course all the other items were in the National Park, and that I did not object to. I drew Mr. Burrowes' attention to the work on the Estate, but they still continued carrying on the work and employing men in clearing the roads. It was bush, and the roads were cleared on both sides according to my survey. The cost was from £6 and £7 to £8 per acre. I have never gone into the actual cost of these roads on the Holt-Sutherland Estate, or what they would be liable for, but that is a matter that could easily be arrived at.

8937. Do you know of any other irregularities? The whole affair was irregular from beginning to end. The thing was never carried out in a proper manner. The visits of the members of the Board were like angels' visits, few and far between. They never gave any directions in any way. They came there for a bit, and went away again. Of course the Chairman always made his appearance on pay-days; he never failed to be there. And there have been great irregularities with regard to rations. The rations were very irregularly issued until I caused those for my men to be sent direct from Mr. Kidman's. Then I had an opportunity of getting their rations properly. They were mulcted of their rations before on many occasions, and were even charged for them, although they never received them. There is another matter. There is a memorandum I sent to the Secretary, which had reference to certain payments that were due to the men in the month of May, in which they were mulcted of something like £123 for work done which they were never paid for.

8938. Is there any other matter you think it proper to bring under our notice? There is a matter in which I happen to be plaintiff in the Supreme Court against Mr. Davies, late Chairman of the Board, but I do not like to go into that; it might have the effect of damaging my claim.

8939. Some matter at present *sub judice*? Yes. But I may say with regard to the issue of rations by the storekeeper, a person named Springall, as far as my knowledge goes since I have been on the works, that they have always been irregular. The men have been overcharged for rations on almost every pay, and I was rather surprised that Mr. Springall should have been retained as storekeeper when Mr. Deering had formulated a charge against him of having appropriated rations to his own purposes to the extent of £60. I was surprised he should have been retained in that position after that fact had been made known to the Chairman by Mr. Deering, who was in charge of the unemployed up to the 2nd May, 1887, when the Casual Labour Board took charge.

THURSDAY, 11 APRIL, 1889.

Present:—

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

Henry Thelluson Sanderson called in and examination continued:—

Mr. H. T.
Sanderson.
11 April, 1889.

8940. *Mr. Franklin.*] I believe you are a licensed surveyor and civil engineer? Yes.

8941. What experience have you had in civil engineering? In the railway service at home; also in construction at home under Rennie Brothers, Miller and Grainger, and under Charles Vignoles and Robert Stephenson, civil engineers.

8942. That covers a great many years? Yes.

8943.

8943. How many years would it be since you began? About thirty-four years ago. I have had experience here as well. I was engaged upon the railway service here. The first survey I made for railway purposes here was the extension of the line from Brisbane and Ipswich on to the Darling Downs. That was the Moreton Bay district then.

Mr. H. T.
Sanderson:
11 April, 1889.

8944. During that time you have had experiences in construction? I have had construction since then. I was on the Great Northern Line from Uralla to Glen Innes. Mr. Proudfoot had the contract for the line.

8945. So that you think yourself a competent authority so far as road construction goes? Quite so. I have had a great deal of road construction both at home and in this country.

8946. Have you been engaged in the Surveyor-General's Department? Yes; I was engaged under him last when the Surveyor-General was making a survey of the mineral leases between Port Hacking and Stanwell Park, up the Port Hacking River to the Summit, up nearly to Waterfall, and also to Bulgo.

8947. Then you are more than usually acquainted with the particular district in which the Holt-Sutherland Estate is situated? I might say in fact, that if I were to visit the Estate, I could point out the whole of the work done by the unemployed—public and private, including not only clearing and formation, but culvert-making as well, and gravelling and blinding.

8948. I wish now to refer you particularly to the work done on the Holt-Sutherland Estate. You surveyed the roads on that Estate? Yes.

8949. Do you know the full mileage of the roads constructed within the boundaries of that Estate? No, I do not know it. I could ascertain by computation by-and-bye from the maps and so forth, but so far as I have myself surveyed I can tell you by referring to the evidence that I have given.

8950. What is the area within which all the roads are situated? That I could not tell you. It is a very large estate. I believe it is something like 100,000 acres, or more than that, but I really do not know. Mr. Deering could give you that answer.

8951. Will you look at this map of the parish of Holt-Sutherland, county of Cumberland, being an Appendix to the Report submitted by the Select Committee of the Legislative Assembly appointed to inquire into these roads? Yes.

8952. You recognize that? I do.

8953. On this map is shown by Mr. Burrowes approximately the direction of all the roads formed by the Casual Labour Board? Yes; but I observe for instance in the Illawarra Road that it is accurately laid down on the map.

8954. That is sufficient for identification? Yes.

8955. You observe also the Port Hacking Road? Yes; I know it well.

8956. You also observe the road between the Port Hacking and the Illawarra Road, called the Malvern Road? Yes; that is the road on which I was particularly engaged.

8957. These sketch roads are shown on this map by Mr. Burrowes? Yes.

8958. Mr. Burrowes, I suppose, would be quite capable of showing them approximately. This is a map prepared by the Government, and it is correct enough to show the position of the road? I know that this road is very nearly correct. It is not quite straight, but at all events it is straight enough for the purposes that you require. It is a straight line to Sylvania Road, and then there is an angle across the Port Hacking Road.

8959. Do you believe that it shows the whole of the roads formed on the Estate? No.

8960. Can you find any omissions;—if you can I wish you would describe them? There is a road going down to Ewey Bay. And this road from the parish of Sutherland—it is called Forest Road, but it has got another name. This is a road formed by the unemployed.

8961. You know Exhibit G presented by Mr. Burrowes to the Select Committee? It is a schedule of all the roads stated to have been made on the Holt-Sutherland Estate, with the length, width, and treatment, stating whether they are cleared, formed, and ballasted, and giving the culverts and other particulars of each? Yes.

8962. Will you look down that list and say whether you are familiar with these roads or whether there are any omissions. Yes?

8963-4. What roads are given there? Port Hacking, Main Illawarra, Coronulla, Burraneer, Wotonga, Lilly Pilly, Euronga, Orara, Malvern, Karimbla, Woronora, Sylvania, Bath, Boulevard, Forest, Ewey, Corea, Station, Eton, Ivanhoe, Willaree, and Kamira. Those are stated by Mr. Burrowes to be the whole of the roads on the Holt-Sutherland Estate—twenty-two in number, and 43 miles 21 chains in length.

8965. Can you give later particulars of any additional roads that you remember? Yes; I think I can; but I do not remember any roads other than have been stated here.

8966. Can you give the exact extent of each road from your own field-notes? Yes, if I had my field-notes; but I have not got them here.

8967. If you will be good enough to furnish the Commission with that it will be very useful as a check against this? Yes. I will do so.

8968. Have you ascertained during your experience the cost of clearing and forming per chain, and ballasting and blinding per cubic yard? The cost of clearing would be £8 an acre, but there would be other expenses—superintending, &c., which would make it probably about £10.

8969. Then in estimating the value of the work £10 may be taken as the amount for clearing? £10 would be a fair amount, because the actual work would be £8, and there are other expenses attached.

8970. Formation—what would be about the cost of that per chain? 12s. 6d. would be the amount that they would get paid on the certificate of the surveyor.

8971. Draining? Draining would be included in the formation in the tables.

8972. There are no intercepting drains in addition to the formation? No; I make here a sketch showing the section of the road in illustration of what I have said.

8973. Then ballasting—what arrangement had you for that? The ballasting was from 20 to 25 feet wide.

8974. How was that paid for—by the yard? It was paid for by the load, and the average quantity to the chain, would be about thirty loads—thirty loads at 2s. 6d.

8975. Can you give any idea of the ordinary cost of pipe drains? Yes. The pipe drainage without the cost of material would be about £2 per crossing.

8976. Would that be the length from table to table—the full length of the crossing? Yes.

8977. What length could you give me for that? The length would be about 35 feet.

Mr. H. T.
Sanderson.
11 April, 1889.

8978. What other culverts had you other than these pipe drains? We called them pipe culverts; and these were 20 to 24 feet culverts. They were made so as to carry across the water-course. The culverts would probably be from 30 to 35 feet in length, by the width of formation.
8979. What are you speaking of now,—are you referring to the ordinary culvert? I am speaking of the ordinary timber culvert.
8980. What would be the cost of each of these? The cost would be from £25 to £30.
8981. All these culverts can be seen on examination of the roads? Yes.
8982. And estimated by any expert measuring them and taking their quantities? Yes.
8983. And after viewing the roads, a pretty close estimate may be made of the value of the work done? Yes. I might mention that on one road, which is called the Malvern Road, there was a cutting something like 200 yards in length, which was made under my supervision, and which, I think, cost about £100.
8984. Have you any memo. of it? I could give you the number of days upon which the men were employed upon it, and the number of carts.
8985. Will you kindly take a note of that, and if that is omitted you can give the actual cost of formation? Yes.
8986. I would also like you, if you know of any other case where there has been an extraordinary amount of work in a short length, to furnish particulars—any other portion of the road in which there has been a heavy cutting? There is nothing further upon this road except that cutting.
8987. I will ask you if you can give me, with reference to the roads, any particulars regarding the valuation—if you can particularise statements with regard to the values? Yes; I will to the best of my ability.
8988. Do you think that statement is correct that there are 43 miles of roads on the Holt-Sutherland Estate made by the unemployed? Yes; I think there would be that measurement. It might be a little more, but that is nearly correct.
8989. How long were you on these particular roads? I was on these roads from September, 1887. That was pretty nearly the time of the commencement of the work. The only work I did not see was this Illawarra Road. That was done, previous to my going there, by the Casual Labour Board, under the superintendence or charge of a man named Buller.
8990. Do you remember any exception being taken to the work on that road? I believe there was something. A man named O'Brien will give you more information than I can with regard to the roads.
8991. You do not remember any circumstance where it was pointed out that you were doing wrong in spending money on such work? I have heard something about it, but I do not remember any particular circumstance.
8992. When you entered upon that Estate to commence your surveys, did you find many roads marked? I found a good many roads simply marked out by private surveyors.
8993. Did you ascertain who the surveyors were, and under whose direction the surveys were made? Well, the lithograph disclosed the name of McChard.
8994. You are speaking of the lithograph design of the subdivision? It was a lithograph of the division which had actually been designed by the surveyor.
8995. For whom? For the Holt-Sutherland Company. All these roads with the exception of two were private roads.
8996. Will you look at two lithographs of the subdivisions of the Holt-Sutherland Estate? Yes.
8997. On looking at these two plans and referring to the scale, what area would they represent of the Holt-Sutherland Estate. I call attention to the Illawarra Road? The scale is four chains to the inch.
8998. Could you tell me as nearly as possible the extent that this lithograph would occupy of the Company's land? I do not think I could.
8999. I want you to tell me whether these two subdivision plans represent the area generally of the Holt-Sutherland Estate? I could not answer that. I think this lithograph extends from the railway line to the Sylvania Road, being nearly half the Estate.
9000. You have seen these lithographs before? Yes.
9001. And you know that the subdivisions were made for the purpose of sale? Yes.
9002. And these lithographs are dated 27th November, 1882? Yes.
9003. Do these subdivisions show the roads that have been made by the Casual Labour Board with same frontages? Yes.
9004. The roads you say were already marked on the estate before the operations of the Casual Labour Board? The roads were marked out and surveyed, and the land on each side of the roads; and the roads with the allotments upon them were shown by the surveyor.
9005. So that you carried out the work according to designs already laid down? Yes.
9006. The only work done before you took charge was pegging out? The surveyor's line would simply have pegs put down.
9007. What was done was simply professional work? Yes. There was no clearing done.
9008. You, as a civil engineer, knew that you had more to do before you could put labour upon these roads? Yes.
9009. Who directed your work as to the lines of survey? It was left to the surveyor.
9010. Who directed the work on any particular road that you commenced. You were a stranger; you must have had instructions from some one? Mr. Burrowes.
9011. He gave you instructions on the Holt-Sutherland Estate? He pointed out the roads, particularly those running from east to west, as being likely ones for construction.
9012. Were Mr. Burrowes' instructions at any time in writing? Yes; but I have got such a mass of correspondence that I do not know that I could find them. Sometimes he gave verbal instructions, and sometimes written instructions.
9013. Would you mind looking through your papers to see if you can find written instructions regarding these works? You mean with reference to this Estate?
9014. Yes? I will, if possible.
9015. Did you know at the time that you were laying out these surveys that you were working on a private estate? Yes.
9016. Your intimate knowledge of the district would lead you to know that? Yes; I had not the slightest doubt about that myself, and I mentioned it several times to Mr. Burrowes.

Mr. H. T.
Sanderson.

11 April, 1889.

9017. Did you ever verbally or in writing protest against the doing of such work? No; I did not take upon myself to do that, but I spoke to Mr. Murphy, the manager of the Holt-Sutherland Estate about that.

9018. Were you directed to refer to him for instructions? No; it was in consequence of his interference with my surveys and the sort of material I was putting on the roads, that I made the remark to him—in fact wrote to him that his interference was proof to me that the Casual Labour Board did wrong in putting the unemployed upon private roads. For instance, he found fault with the material I put on the roads.

9019. What was he? He was the manager of the Holt-Sutherland Estate.

9020. Has he any direct interest in the Estate? I believe he has. I do not know; but I believe he has a large interest, and he receives a large salary.

9021. He is Manager, so that his duties would be to embellish the Estate in order that it might realize a good price? Yes.

9022. Had he sufficient authority to order your men on the ground if he found them doing wrong? No; he had not the power to do that.

9023. You were trespassing there if you were doing work that he did not want. Did he threaten to put you off the roads? No; he would simply find fault with the material.

9024. In fact, he was directing the work? Yes.

9025. There was a man named Walsh, who was there under Mr. Murphy, irrespective of Mr. Burrowes? Yes. In fact, I was rather surprised that Mr. Burrowes did not object.

9026. Do I understand that Mr. Murphy was directing any expenditure of Government money upon any design that he wished to formulate? Yes.

9027. Do you think that there was any understanding between the Casual Labour Board and Mr. Murphy to do such work to his satisfaction, and that the Government should be refunded the cost after the work was done? I believed it was so. I put the question to Mr. Murphy one day when he was coming down the line. I asked him who was going to refund the moneys expended on the Holt-Sutherland Estate. He said, "I suppose the Holt-Sutherland Company will receive an account from the Casual Labour Board, and we will try to settle it."

9028. With such an understanding you would do your best for him? Decidedly.

9029. Have you any reason to suppose now that this was not so? The impression upon my mind now is that they never intended to pay anything at all—that they did not intend to pay for any of the works. I think they intend to put the responsibility upon Mr. Davies and Mr. Burrowes. I believe Mr. Burrowes knew that he was doing wrong, and misleading the Board all the way through.

9030. Was there any tangible excuse for doing these works—how were they initiated? I believe there were petitions and deputations and one thing or another sent in to Sir Henry Parkes after the resignation of the Dibbs Ministry. But the petitions and deputations, I think, were simply for the purpose of improving and forming public roads.

9031. You think that with the exception of one or two there was no reason in the public interest for making these roads? I am quite sure of that.

9032. You know the ground so well that you are quite sure? Yes.

9033. I point out one particular road—the Sylvania Road—where does that run to? It runs from the Port Hacking Road in a southern direction right away down to the bay. It goes through a gully. In fact you could not make a road that would be of any use on account of the gullies.

9034. From an engineering point of view, you would not make the road? Decidedly not.

9035. You think that the reason for undertaking this work was in order to carry out the design for subdivision? Yes.

9036. Does that statement refer to roads running either parallel or transversely? Yes. They were kept in this direction and treated as roads, in order that they might not interfere with the original design of subdivision.

9037. Will you name the roads that you consider in the public interest? There is the Port Hacking Road. That is a public road. The main Illawarra is a public road.

9038. Taking the Port Hacking Road, what is the extent of it? It appears to be 230 chains.

9039. You think that is a public road? Oh, I am sure that is a public road. I have travelled that road. I have seen it shown upon the Government plan fifteen or twenty years ago.

9040. Was it a Trust road, do you know? It might have been a Trust road. I rather think it was a Trust road at that time.

9041. The next road was the main Illawarra Road? Yes; that is a road $2\frac{1}{2}$ miles in length. It will save about 4 miles.

9042. Will you tell me whether that has been a long time in use? It existed as an ordinary track through the bush, about 20 or 30 or 35 feet wide.

9043. What treatment has it received? They have widened it to the full extent of two chains all the way through, and formed a great portion of it.

9044. What is the formation? Some of it is metalled, and some of it is simply formed. There is a quarry upon the hill, and they got a lot of their metal there. The road cost a great deal of money. It was in hand long before I got there—six months in fact. A man named O'Brien would give you some information about it.

9045. What was O'Brien? He is an ordinary man. I do not know whether he has been a policeman or what he has been, but he has been in the employ of the Casual Labour Board, and was made an overseer of this work.

9046. I suppose a fair estimate of this road would be that it cost double any of the other roads? More. I fancy that if you were to go into the cost of that road it would be found to be three times the cost of the others.

9047. Did it occur to you that these roads were made to give access to unimproved Crown lands? I presume they were made for that purpose.

9048. I ask you if any excuse could be offered for the construction of these other roads? No; these roads were never made with any intention of taking them to Crown lands, because there were no Crown lands, except small reserves of about 100 acres, adjoining Illawarra Road.

9049. Will you look and see how many roads there are approaching a point called Hungry Point Reserve? I cannot say how many—the only road I think is the Coronulla Beach Road. 9050.

Mr. H. T.
Sanderson.
11 April, 1889.

9050. Will you look and see if there are any roads made on that Government reserve? None whatever.
9051. Don't you think that in laying out work for the unemployed you would have been justified in making a road there? Yes. There would have been some colour for this road if it had been extended to the reserve.
9052. As a matter of fact there are no roads to any of the reserves or Crown lands, nor any attempt to approach them? No.
9053. Were you acquainted with the shareholders or directors of the Holt-Sutherland Estate? No. I only knew one of them—Mr. F. Want. I was not aware that he was a shareholder, but he took an interest in those two roads—the Lilly Pilly Road and the Ewey Bay Road.
9054. Did you think he was interested in them? Yes, because he has property on the shore of Ewey Bay. So long as that road was approaching there he had no objection to it; in fact he took an interest in it. He had a road called Montrose Road for about 90 chains—1 mile and 10 chains.
9055. Do you know if this road was absolutely formed? A portion of it was formed. It has all been cleared.
9056. Will you look at the list and tell me if the Montrose Road is there? No; I do not see it there.
9057. Therefore you will say that this list signed by Mr. Burrowes, was not complete? Yes.
9058. That is the first road that you find omitted? Yes.
9059. Do you know a road called Cowarra Road? Yes. That is not on the list. That would be about 50 chains in length.
9060. What work was done on it? It has been cleared. It might have been formed since, but I am not sure about it.
9061. You say that this road does not appear on the list submitted by Mr. Burrowes? No.
9062. Will you look on the map and see if there is another road there called Glenwood, and describe that road? Yes; it runs out of the Forest Road. That road is stated by Mr. Burrowes not to have been commenced, but it has been commenced.
9063. You have been on the Montrose Road, and you speak from your own knowledge that the work has been performed upon it? Well, I would not like to say exactly. I am not sure whether it was or not.
9064. You have a doubt between the Cowarra and Montrose Roads? I have been again and again on the Montrose Road. I am sure, from inspection, that the Cowarra Road, although marked on the plan, and coloured, is not commenced.
9065. Beyond the roads that are entered in the list, do you remember other roads sketched in the plan and coloured as further projected works which, had time permitted, would have been carried out by the Casual Labour Board? Yes.
9066. Were you directed or influenced by anybody in authority on the Holt-Sutherland Estate? No; I was not influenced in any way. I simply carried out the instructions given me by Mr. Burrowes.
9067. Mr. Murphy never attempted to do so? He attempted to interfere with me on several occasions. We could not get very good material, and he suggested that we should get it somewhere else, but to find the cartage would have been too much money. There is something which I think the Commission ought to know with regard to these roads. The carters who were employed on the Holt-Sutherland roads—at all events sixteen, seventeen, or eighteen of the carters—were living on the Estate. They were leaseholders on the Estate.
9068. And how were they selected? They merely went to Mr. Burrowes and got orders to be put on.
- 9068½. Did you put any men on who were lessees? I had not the power to put men on at all. All the power that was given to me was to discharge men who misconducted themselves. The power rested with the Casual Labour Board and the superintendent to put the men on. I understood that these were purely relief works—that the work was to be given to men who really required relief. In this case it was not.
9069. Who were these men? They were men living on the Illawarra Road—very well off, and they were continued to be employed by the order of Mr. Burrowes.
9070. You did not look upon it as an advantage to find carts immediately on the works? No, certainly not.
9071. Do you think that any of the owners of the carts were induced to take up leases for the sake of the work they got? Probably they would, but I do not know for a fact that they did.
9072. Would it be an inducement to a man, knowing that a dray and horse could be employed there, to take up a lease? I think it would be a very great inducement, but I do not know that any one did so. I know that most of them were residents on the Estate.
9073. And they were introduced to you by whom? By Mr. Burrowes. I know in particular a man named Hillier. He was a freeholder, and he had two sons working under him as carters.
9074. There could be no objection to that, I suppose? No; but they had got property on the Estate.
9075. I am afraid this is not much use unless you can tell this Commission that these carters were induced to take up leases from the fact that they would get constant employment with the unemployed? I do not know. Perhaps they might have been there before the unemployed were there.
9076. Were they paid the current rates? Yes; 12s. 6d. and sometimes 15s. per day; sometimes even they would get £1 a day.
9077. Is not 11s. very fair pay for regular work as carters? Yes, 11s. is a very fair thing, although we were paying afterwards 10s. per day. I complain of the excessive extent to which this was carried on.
9078. Did you find that these excessive rates had a demoralizing effect amongst the other paid men on the works? Yes, very much so. It caused a deal of dissatisfaction.
9079. And you represented that? Yes. I continually represented it to Mr. Davies that money was being thrown away in this way when the other poor, unfortunate men were only getting 3s. and 4s. a day.
9080. Did you often meet Mr. Murphy? Only three or four times.
9081. Was he constantly on the works? He might be there three or four times a week, but I would not see him. He would go to the Port Hacking Road—he was a frequent visitor to Mr. Walsh's camp.
9082. Who was Mr. Walsh? He had charge of a portion of the Port Hacking Road, and the Coronulla Beach Road.
9083. Do you know whether Mr. Burrowes was on very friendly terms with Mr. Murphy? I believe he was.
9084. Did he take his instructions from Mr. Murphy? I cannot tell, but I think so.
9085. Have you seen Mr. Murphy with Mr. John Davies? No; I believe some of the men told me that he was on the ground with Mr. Davies, but I did not see him.

Mr. H. T.
Sanderson.

11 April, 1889.

9086. You say that any heavy work, any cuttings that may have been done, you can furnish this Commission with particulars of? Yes.
9087. And you may at the same time refer to any works of a heavy character that you may know on the estate, so that we may see them afterwards? Yes.
9088. Some of the works were performed by contract? All the clearing on the Holt-Sutherland Estate was by contract at the rate of £8 per acre.
9089. You certified to the payment of these works? Yes; I did every fortnight.
9090. And these certificates were sent in to whom? To Mr. Burrowes. Upon these certificates being received by him, stating the amount to be received, he would furnish the Casual Labour Board with particulars, and the money would be drawn from the A. J. S. Bank.
9091. Do you know that Mr. Burrowes entered these returns in an abstract-sheet? Yes.
9092. That was his requisition for money? Yes.
9093. Did he ever refer them back to you on account of errors or anything of that kind? No; I do not think he ever did for errors. He might have referred them back to me if a man had not been paid, or anything of that kind. I know in the case of a man named Hillier there was a culvert being put on the Port Hacking Road, near the Malvern Road junction. The contract was for building the culvert, and the contractor wanted some of the men who were employed on the road to get timber. I asked the man named Hillier to assist the contractor in getting the timber down.
9094. Do you know the circumstances under which the culvert was built? It was an old culvert, which was dangerous, and it was condemned. It was let to a contractor for £20. The contractor owed Hillier 12s. per day for three days for carting timber, and I would not let Hillier have an account on the Casual Labour Board because I considered that the contractor ought to pay. I believe the contractor was paid in full, and Hillier never got his money either from the contractor or Casual Labour Board.
9095. Do you know whether the amount was drawn by Mr. Davies? I cannot tell; he made repeated attempts to get it from Mr. Davies.
9096. Do you think that money was returned in the voucher? I am not sure. But Hillier, who is desirous of being examined here, could tell you more about it.
9097. You did not yourself attend the pays? Yes; I used to attend the pays always to see that the men were paid according to my certificates.
9098. Did you attend the Heathcote pays? No; I never had anything to do with that at all. All I did at Heathcote was to survey about 400 acres.
9099. Who made the payments at the National Park during the time that you attended? A gentleman named Hinchcliffe, who was in fact Paymaster to the Casual Labour Board.
9100. Did you ever find any difficulty occur in regard to the payments? Yes; there was a great number of short payments.
9101. Were they errors made on your part? No, they were not on the part of myself.
9102. Are you aware of any short payments or over payments? I am aware that some short payments occurred under my superintendence, but that was not in the Holt-Sutherland Estate.
9103. I want to know whether, if there was an error on one pay-day, it would be put right on the next pay-day? I know with regard to short payments that Mr. Burrowes invariably told the men that if there was anything short it would be made good.
9104. Were these short payments ever made good? That I cannot say. There is no doubt that the money was drawn from the bank, as it only required the signature of the Chairman and Mr. Hinchcliffe to draw it.
9105. Did this occur often? Yes; it occurred every pay-day that men were paid short. It was a matter of general complaint, and when they went to the Casual Labour Board for redress they were told not to go there by Mr. Hibble, who was the spokesman for Mr. Davies. So they went away disgusted.
9106. Did this occur at your pay-table? Yes. It occurred at my pay-table at Cook Park, and the men were promised to be paid the balances, but they never got them.
9107. But if correct pay-sheets were drawn up there could be no deficiency? Well, the returns would be sent in and altered. These returns which came from the various offices were sent to the superintendent, and they were put into the usual form of pay-sheets by Mr. Springall, who was the store-keeper, and who made out the pay-sheets. Mr. Burrowes himself never made out a pay-sheet. He would sign his name to anything without looking whether it was right or wrong.
9108. But the pay-sheets could only be a simple copy of the drafts you prepared? Yes; they should be so, but I had nothing to do with the pay-sheets that were used at the pay-table.
9109. Were complaints made with regard to the rations? Yes, very many complaints.
9110. The men would not actually be paid short for the work they did, but on account of the rations, would they not? Yes. Several cases came under my notice in which men were paid short for work actually done.
9111. Do you know that you have returned £50 as a claim for your money, and that you were paid a less amount? Yes.
9112. Did you consider the general administration good? By no means. I consider the general administration of the Casual Labour Board irregular and decidedly unfair and unbusiness-like, and if I could use a stronger term I would do so. I consider that during the time that Mr. Deering, the metropolitan district surveyor, had charge of the relief works the men were far better paid, more work was done, and there were less errors than when the Casual Labour Board was in existence.
9113. That was rather a strange thing considering the staff that you had? There was no great staff at that time. There was simply the superintendent, myself, and the store-keeper. I am firmly convinced that under the Board there was a large amount expended, and no one knows where it has gone or what it has gone for.
9114. It would be difficult to find out? Yes. The extravagant manner in which they conducted things must have run away with a deal of money. They had cabs for the Chairman and clerk going out. They kept a permanent cab at the office.
9115. You were not fixed at the head office? No.
9116. From what you have seen, no fraudulent transactions came under your notice? I think I probably should not answer that question. None were brought under my notice during the time the Casual Labour Board was in existence.

Mr. H. T.
Sanderson.
11 April, 1889.

9117. Did you hear anything afterwards? Merely a rumour. Mr. Hillier, who has been employed by the Casual Labour Board, made use of the expression the other day that he could lay his hands on half-a-dozen of them. I asked him if he could do the same with me. He said, "No; you have certainly kept yourself clear." What he meant was, that a great deal of money had been passing to and fro in an illegitimate manner.
9118. Do you know of any direct complaint made with regard to the issue of stores? Yes; during the time I was at Cook Park the men complained to me, and in fact I discovered it to be the case, that butter was kept from the men for six weeks. I believe about 60 lb. or 70 lb. of this butter was sent, supplied by Mr. Kidman; but it went to the general dépôt, Mr. Springall's place, and never came back.
9119. Was that the Government store of which Mr. Springall had charge? Yes. Other things were kept back as well, such as sugar.
9120. If the daily supplies were correct, and supposing Mr. Kidman supplied liberally the full quantity of rations, that should not have occurred? No.
9121. You complain that in the distribution of the rations you were cut short? Yes. The men found that they were very unjustly charged for rations that they never got.
9122. Do you think they went to some other men? I don't suppose they went to other men; they were disposed of in some other way. At least, I have a good guess, anyway.
9123. Had you any faith in Mr. Springall's transactions? I had no faith in Mr. Springall in consequence of a communication I had from Mr. Gordon, who was acting for Mr. Deering. Mr. Gordon spoke of a period prior to the formation of the Casual Labour Board; and notwithstanding a report that a charge was to be formulated against him, Mr. Springall was taken on by the Board.
9124. What was the charge. Don't be afraid to give it its proper name? Well, a charge of fraud. I have no doubt it would have been made out had Mr. Deering remained in charge.
9125. You have not a favourable opinion of Springall? No.
9126. Have you any direct charge to make? No charge except this, that I had to remind him that he was overcharging the men for rations that they never received, and made mistakes in the pay-sheets.
9127. Were they mistakes in his own favour? Invariably.
- 9127½. Did he ever make a mistake in favour of the men? I do not think he did. I remembered one case where he charged a gang thirty or forty rations for three or four men.
9128. Do you know if there were any cases of short rations;—were there any amounts refunded to the Casual Labour Board? No; I don't remember anything of the kind. Of course, if there were moneys refunded to the Board that would be a reasonable excuse.
9129. It would have been the proper thing to have done? Yes.
9130. Had you any unclaimed wages at any time? Yes; I know several cases of unclaimed wages.
9131. How have they been dealt with? They have not been dealt with at all. I, myself, in one case experienced my professional services not being paid for.
9132. A great number of men were absentees at different times,—and what was done with the money that they were entitled to? I don't know myself. The money, according to Mr. Hinchcliffe, was returned to the Treasury as unpaid wages.
9133. You don't know of any system of returning unpaid wages to the Sydney office? No.
9134. Have you been long a resident in Sydney? I have been in and out of Sydney. I have been in the colonies for a long time.
9135. Do you know of any system adopted here by speculators of purchasing suburban lands adjacent to railways for the purpose of subdivision? Yes.
9136. What do they do to enhance the value of the lands? They generally make roads. They have made roads principally on the Illawarra line. These roads have been stumped, cleared, and formed.
9137. As a general rule they simply clear them to give frontages? Yes; they always do.
9138. That is done to prepare the land for the market? Yes.
9139. Having done that preliminary work, the subdivisions are made on the frontages? Yes; there is a proof of that in the Holt-Sutherland Estate, where they cannot lease the ground where the cross-roads have not been cleared, because it is timbered on both sides.
9140. You say that simply clearing the roads would enhance the value of the land? Yes.
9141. Do you think that the work done on the Holt-Sutherland Estate would have the same effect? Yes, just the same.
9142. Was it not of a superior character to that usually done by syndicates to enhance the value of their lands? A great deal more money was spent upon it than would be done by a syndicate upon an ordinary estate.
9143. Would you say that the work done on the Holt-Sutherland Estate would enhance the value of the land to the extent of 50 per cent.? Yes.
9144. And the whole of that work was done at the cost of the Government? Yes.
9145. I suppose in that case they would get double the price per acre for the leases? Probably in some cases treble, because it costs a great deal of money for a settler to do this work.
9146. You know how jealous engineers are of their reputation? Yes.
9147. Did you feel justified in carrying out such work when you knew that you were doing it for the benefit of private persons? No. I did not feel satisfied in my own mind in carrying out the work.
9148. Did you exhaust every means of protesting to the Board or to your immediate chief against the carrying out of work of that kind? No; I did not, because when I have spoken to Mr. Burrowes about it he has told me to mind my own business.
9149. Did you not feel that there must be a scandal some time or another about this? I knew that very well. And when the Select Committee sent me a summons I could not do otherwise than state what I knew to be the facts, and for doing that I gave very great offence to the Chairman, who did all he possibly could to get rid of me then.
9150. Could you give anything like a statement of the average number of men working on the Holt-Sutherland Estate? If you will allow me to refer to my notes I will do so.
9151. Mr. Burrowes makes a statement that the whole of that work for the time you have been working there—surveying the roads, clearing and forming, and making bridges and culverts, has only been £8,000. Do you think that is correct? I shall be prepared to give you that answer at another time. I think it is better to defer it, because I think there will be a discrepancy between the statement made by Mr. Burrowes and the actual state of the case.

Mr. H. T.
Sanderson.

11 April, 1889

9152. When did you take charge there? I had charge in January, but I had been surveying some months previously.

9153. So that you have got a very good knowledge? I was there from September, 1887.

9154. I am showing you now exhibit A, attached to the evidence of the Select Committee of the Assembly. It is a petition dated June 8th, 1887, signed by fifty-two members of Parliament, headed by Mr. Carruthers—a petition to the Government to clear the proposed line of railway to Kurnell. I ask you, if sanction were given to the prayer of that petition, would not the work that followed immediately afterwards obtain colour from the fact that this work had been sanctioned. Did it not occur to you that this petition for the clearing of the railway gives colour to the men being put in in large numbers upon the Holt-Sutherland Estate? Yes; I think it was so.

9155. Were you instructed to survey the line of railway? It was often spoken of as being about to be done, and Mr. Burrowes directed me to hold myself in readiness.

9156. You were perfectly qualified to do it? Yes; but I never was requested to do it. On the contrary, was set to work on these roads, and instructed to hasten their completion.

9157. Will you look at the names on this petition—there is Mr. Carruthers. Has he any interest in the Holt-Sutherland Estate, or in land in the vicinity? He might have; I know he has a great deal of land over Kogarah way.

9158. I am showing you an exhibit, also from the Report of the Select Committee, being a report from Mr. Burrowes, in which justification is made for making these roads;—will you read them and see whether you can endorse Mr. Burrowes' statement? I have read this before. Of course, it is easy to say that these are necessary roads; but I do not think so. The Woronora Road, I think, was not necessary, as the Forest Road is parallel to it.

9159. Then the Woronora Road being parallel to another was simply carrying out the design of a subdivision, and was not necessary? It was not necessary.

9160. What is your opinion as to the Sylvania Road? That is throwing money away. There is no traffic. There is no settlement down there whatever.

9161. Do you consider that these roads that were not necessary were constructed at the Government expense solely in the interest of the Holt-Sutherland Estate? I do, if they are not necessary, and that applies to the whole of the roads that are not public roads.

9162. Can you tell me, with regard to the issue of tools, what number of tools were served to a gang of eight men? A shovel each, and a pick each for road-making. There would be eight men in a gang, and for whatever tools were required a requisition would be sent in by the officer in charge of the works.

9163. How often would tools like that be renewed? If there were hard shovel work, a shovel might not last more than six weeks or two months.

9164. It would be difficult then to calculate what the consumption had been? I believe the supply has been enormous. But upon the work I was on, I had only fifty shovels sent me for ten months; but speaking generally, tools have been supplied much more liberally than is the case on railway works I have been on.

9165. Did you not send in a requisition? I sent in a requisition for what was necessary.

9166. Were you made responsible for the tools furnished to your camp? Yes, for all Government property.

9167. Did you get receipts for the tools returned in whatever state they might be? The store-keeper took in the used tools, and new ones were supplied. Then we forwarded the old ones to the main depot and got a receipt.

9168. What basis of calculation could I make so as to get the number of tools supplied to the whole of the men? It would be a difficult matter. I cannot say how many there would be.

9169. Have you any idea of the consumption with regard to the men under your supervision? There may be something amongst the papers, but I do not think you could take that as an average.

9170. Can you give us any further particulars on any matters of importance. Is there anything I have omitted? I cannot think of anything at present. If anything does occur to me I will make a memo. of it.

9171. *Mr. Waller.*] You stated you felt certain of the impropriety of spending money on what you knew to be private roads? Yes.

9172. Did you have that feeling all through? Yes, I had doubts.

9173. Will you explain how, if you had the feeling that you were participating in a wrong, you yet also state that you understood that the Government were to be refunded for the expenditure? At that time I understood from Mr. Murphy that the Government would be refunded for all the expenditure made on the Holt-Sutherland roads, and with that belief I remained on the roads, thinking there would be no harm if that were to be the result.

9174. That is hardly an explanation to my question. I want to know how it was you could feel you were participating in what you knew to be wrong, when at the same time you were of opinion that the Government would be refunded all expense incurred by the unemployed doing the work? You see you ask me a peculiar question. You say that I had a knowledge that I was doing wrong myself. I am not aware that I was doing wrong in carrying out the instructions of my superior officer. I am not supposed to know whether making a road is right or wrong. That was for the Board to decide. It was not for me to interfere with or dictate to the Board, or to my superior officer, or tell them that they were doing wrong.

9175. Allowing all that to be true, how could any wrong exist if that money was to be refunded? I was at that time, I say, under the impression that the Board would be refunded for all the work done, and having that belief I did not consider I was doing wrong in remaining myself, as far as my conscience was concerned.

9176. When were you disabused of that belief? Not whilst I was there, but afterwards, at the inquiry of the Select Committee.

9177. When? In December, 1888.

9178. Therefore, from the time you were employed by the Casual Labour Board, up to December, 1888, you had no reason to suppose there was any impropriety in the expenditure of this money? I was not satisfied whether it would be repaid or not until December, when that inquiry took place; then I was satisfied that no accounts would be rendered. But then I had long left the Holt-Sutherland Estate. I had left it in the previous April.

9179. Did you believe the statements that were made by Mr. Murphy? Yes I did believe them. I believe now that if the Casual Labour Board had rendered an account it would have been paid.

9180.

- Mr. H. T. Sanderson.
11 April, 1889.
9180. Do you believe that the money which the Casual Labour Board laid out on the Holt-Sutherland Estate could be obtained by application to the Estate? I can understand now the answer I should give. I do not believe for one moment that any shareholder, or director, or anyone belonging to the Estate, would be so dishonorable as to accept money from the Government; and no doubt it was the *laches* of the Board in not rendering the account that caused the money not to be paid.
9181. Is it too late now to render it? That is a matter of trial; I should not like to say what should be done.
9182. Have you any reason to believe, other than your own feeling in the matter, that such was the intention of the shareholders of the Holt-Sutherland Estate? I believe myself from the beginning that the Manager of the Estate had really intended to recoup.
9183. I want to know whether you had any reason or foundation for that belief? Yes, from what Mr. Murphy told me myself.
9184. That only? That only.
9185. Did he tell you this positively? I said, "This is not Crown land; these are not public roads; who is going to pay for all this." "Why," he said, "I suppose we shall have to pay when the Casual Labour Board renders an account."
9186. That you swear? Yes; he said it in a railway carriage coming down the line.
9187. When—was it last year? No, before. It would be just about the time I was making these surveys in November.
9188. In 1887? Yes, in 1887.
9189. Did he make this remark to you more than once? Only on that occasion.
9190. Who commenced the conversation? I did.
9191. How? It arose in this way. I had addressed a letter to him complaining of his interference in reference to these roads, and also asking him if he had any communication to make to me not to make it to my men, but to come to me in my camp. He knew where it was. He wrote me a reply.
9192. Have you got it? I think I have amongst my papers.
9193. If you can find it, will you produce it? Yes, I will. I do not think I have destroyed any papers at all. Well, we afterwards met. The first time I met him was at Walsh's camp, and then we had a conversation. Afterwards I met him coming down the line by railway. We were travelling in the same carriage, and he then told me what I have just now repeated. I put the question to him as to who was going to pay "the piper"—meaning who was going to pay—for all this work on the Holt-Sutherland Estate.
9194. When he gave you the answer you have just given? That is the answer he gave, and I think it was a proper answer.
9195. Do you know all the work on which the unemployed were engaged? I know pretty nearly all of it.
9196. Look at this return by the Board, of work carried out by them, you will see there is a column marked "miles of road, cleared, formed, and made." What is the meaning of the word "made"? I should presume that it meant cleared and formed.
9197. What is the meaning of the word "made"? It is superfluous. They generally put metalled instead of made.
9198. Do you think they mean metalled? Yes, it may be so.
9199. Suppose "made" means "metalled," are you in a position to state which of these roads have been metalled? No; I am not in a position to state about these roads being metalled.
9200. On 17th March this year you addressed a letter to the Secretary of this Commission. In that letter you gave a list of a number of gangers who had suffered loss at the hands of the Casual Labour Board? Yes.
9201. And as you state through the superintendent, Mr. Burrowes. Do you know whether these men have since been paid? No, they have not been paid.
9202. How do you know that? Because they have told me so.
9203. Lately? Up to the 21st January last, and then they dispersed.
9204. How was it that short payment was received;—was it by reason of not estimating the work done correctly? No; Mr. Burrowes came to me and told me that Mr. Davies, the Chairman, had stated that the payments were very large and excessive, notwithstanding that my measurements were correct, which he did not doubt. He asked me if I would consent to the men being paid short by 25 per cent., with the promise that the balance should be repaid when the works were remeasured and checked by the members of the Board. I agreed to that, and made a memo. in pencil on my return. When pay-day came I told the gangers that the pay would be received short; that the Chairman said they were making too much money, or that he might imagine that I had been measuring over and above what they were entitled to; that I did not know what his motive was; but that they intended to check my work over again, and for that reason they would have to remain with a short payment until the work was checked.
9205. Have you got the sheet upon which you made that memo. Is this your original return? That is the original return from which I made out my fair return and sent in for the work done at Cook Park.
9206. Does this return represent the pays due as referred to in your letter of the 17th March? Yes, it does.
9207. Are the amounts specified in this letter of the 17th March as follow:—Brown, £19 5s. 5d. instead of £25 2s. 1d.; Collier, £20 18s. 10d. instead of £37 1s. 5d.; A. Jamison, £21 14s. instead of £33 14s. 3d.; T. Thomson, £20 16s. 7d. instead of £21 3s. 1d.; J. Mole, £18 9s. 1d. instead of £25 6s. 10d.; W. R. Ryan, £19 18s. 4d. instead of £27 0s. 8d.; R. Campbell, £20 8s. 4d. instead of £24 11s. 9d.; W. Scott, £18 4s. 7d. instead of £26 9s. 8d.; P. Brady, £16 10s. instead of £22 12s. 6d.; A. T. Collier, £20 8s. 10d. instead of £39 5s. 9d.; this amounts in all to over £120 short payments made by the Casual Labour Board, and which were to be repaid on remeasurement of your work? Yes.
9208. Has it been remeasured to your knowledge? No.
9209. Do you know it has not been remeasured? I do know that these measurements have not been checked to present date.
9210. Were the amounts deducted from these men's wages at least 25 per cent on the amounts due? It may be that they varied, but that is the return that Mr. Burrowes consented to.
9211. You say here, in another column, amount owing by the Board, £5 16s. 8d.? That means that £5 16s. 8d. would make the amount due to the men.
9212. Which was the amount kept back? The smaller amount.
9213. So that the amounts I have read out are not the amounts kept back, but the amounts paid? Yes.
- 9214.

Mr. H. T.
Sanderson.
11 April, 1889.

9214. How is it then that there are no amounts given to the great number of names as to what was kept back? These are the amounts that were due to each ganger. They were not the full amounts, but they were paid short by the other amount.
9215. I see that quite well. But in one place you give the amount due and withheld, and in another you give the amount due and not withheld? The amounts in one case have been omitted.
9216. Then this document, as first shown to me by you, was incorrect? It was not complete, but there is a pay-sheet and a return I produce also; the original pay-sheet I made out for this particular time, with the amounts in cubic quantities for the gangs, with the amounts paid short.
9217. So I take it that this letter should be read in this way: The amount due appears on the sheet I have marked "A," and on the sheet marked "B" the amount of pay to the men withheld is shown? Yes.
9218. You also put in the original returns which endorse the statements in your letter of 17th March. [*The following documents were marked and put in:—Letter, 17th March, 1889, marked N; wages return, 9th April to 21st April, 1888, marked N 1; wages return, 7th May to 19th May, 1888, marked N 2.*]
9219. I will draw your attention now to a letter dated 29th October, 1888, number 88/498, written from Parramatta, and addressed to the Chairman of the Casual Labour Board, and signed by David Houison;—will you look at it and tell me if that is a return of the remeasurement of the particular land for which certain payments were held back? I have seen this return before. It has nothing at all to do with this land. This return had reference to work of my own. It is difficult for one engineer to check another engineer's work unless he goes over the ground.
9220. What do you mean by work of your own? This refers to measurements of work that has been done since the returns relating to the men under me.
9221. Were there any short payments on account of this work? No; they never objected to any payments after those I have given.
9222. Did the pay-sheets for which the payments were to be made on account of the work, for which these deductions were made, show the sums, as they originally appeared in your return? Yes; they were perfect duplicates of the return.
9223. Since then have you taken any means to ascertain whether the full amounts for the payment, as appearing in your original return, were withdrawn from the bank or otherwise? No. I can answer that question in another way: Mr. Burrowes came down at my request to see the men, and he told the men that the balances would be paid as soon as Mr. Houison came down and checked the work.
9224. That is not the question I have asked you. Have you any knowledge whether the full amount for the payment of your gangers, as shown to be due in your original return, was withdrawn from the bank or not? No; I have no knowledge on the matter.
9225. Have you any reason to believe it was? Except that it might have been drawn before Mr. Burrowes came to me.
9226. Are there any other cases, either of officers or surveyors, in which money was withheld, and the full amounts not paid? No; not with regard to quantities.
9227. What do you mean by that? The answer is, I know of no other case in which money has been paid short in the payment of quantities.
9228. Do you know of any case with reference to day labour? Yes, but it might be by reason of their being absentees. That would be their own fault.
9229. Have you any knowledge of the work done on the Hornsby Estate? None.
9230. On what terms were you on with Mr. Davies? I was on good terms with Mr. Davies until something occurred.
9231. I do not want to know of anything that is going on in the Court. Up to what time were you on good terms? Just previous to my having to give evidence before the Select Committee.
9232. What do you suppose is the reason for you and Mr. Davies not being on good terms? I think the cause was when he saw me at the Committee room. He and Mr. Wells were there together. He said, "What are you doing here?" in a manner I thought unfair to me. I said, "I obeyed a summons." He said, "What do you know about it?" I said, "I shall have to tell the truth." He said, "You had better be careful what you are saying." Mr. Wells walked away disgusted with the manner in which he addressed me.
9233. On what sort of terms are you on with Mr. Wells? Very good terms.
9234. How do you know he was disgusted? Because he walked away from Mr. Davies when he found him questioning me in the manner he did.
9235. Have you had any conversation with Mr. Wells about this? Yes; both with regard to that and to my being paid for my professional services.
9236. Does he consider the Board owes you money? I believe he does.
9237. You have stated that rations, as a rule, were delivered short to you;—were they made up afterwards? I do not remember them being made up afterwards. I do not think they were. Mr. Scott, the store-keeper, would be able to tell you if he were here.
9238. I notice here in a letter dated 20th August, 1888, that you make a complaint to Mr. Burrowes that you ordered 127 rations and received only 89, being 38 short; and I also notice in the ration-book of the next day that the number of rations sent was 165, which would exactly balance the day before? I suppose it was done in that case in consequence of the letter I sent; but it was an unfair thing that the men should go for one day without their food.
9239. Were there any other cases? On several occasions I had to communicate with the storekeeper. I dare say I shall be able to find documents that will bear out what I state.
9240. What means were taken by the Board for knowing the exact number of men at work at the different camps? A return was sent to the Board by the officer-in-charge every fortnight—every week very often.
9241. Was this done regularly? I can only say with regard to myself. I sent in a tabulated form of the number of men, how they were working, what they were doing, and so forth. That is the only time I got a complimentary letter from Mr. Davies, written by a man named Hibble.
9242. Have you any means at your disposal by which you can give the Commission a trustworthy estimate of the average number of men, either weekly or monthly, working for the Casual Labour Board? Do you mean since the creation of the Board.
9243. Yes? I think I can, for this reason. I know the number of gangs, and remember the portions I had to certify for, and I will endeavour to put them together for you.

- Mr. H. T. Sanderson.
11 April, 1889.
9244. I mean the total number of men engaged by the Casual Labour Board from month to month? Yes, I will try and get it.
9245. Do you know any case where a man was paid for more work than he did? Yes; I know of the case of a man named Mole; he was returned for 400 yards by a gentleman named Fraser, in a certain section, and neither shovel nor pick was put into the ground.
9246. Then if the evidence of a witness is that you have full particulars of a man being paid for a quarter of an acre more than he was entitled to that is not correct? Certainly not.
9247. You do not know of any such case? No.
9248. I do not think you understand the question. Evidence has been given to us that you could give us a case where a wrong had been done the Board by a man being returned by a certain officer of the Board as having cleared more ground by a quarter of an acre than he had done? I have no knowledge of that.
9249. Who is Walsh? Constantine Walsh.
9250. Who was he? An officer on the last portion of the Port Hacking Road, and at the National Park.
9251. What sort of a man was he? Well, he was a tall —
9252. I do not mean his appearance, but his character? I am sorry to say he was a man very much addicted to drink—very much so.
9253. Was he in a position of trust? Certainly he was.
9254. What were his duties? He had the care of the whole of the clearing on the Port Hacking Road, and he had to make out a return for the quantities these men cleared, at so much per acre—£5, £6, £7, and £8 per acre. And if I were a contractor there and on good terms with my overseer, I might say, "Put down a couple of pounds more, and I will give you so much."
9255. Was that the rumour that went about amongst the men whilst he was there? Yes; he was always drinking with the men.
9256. Was there anyone to check him? Mr. Burrowes was there to prevent fraud, but what he did Burrowes would endorse.
9257. Have you any reason, with regard to work done under Walsh, to know that he was not correct? I have no reason for suspecting anything crooked so far as quantity was concerned. It was with regard to the price per acre. I do not know what it was. It was decided by Mr. Walsh, and I was ignorant of that price.
9258. In what relation was he to you? He was below me.
9259. Were you his superior officer? I was for some time. I had nothing to do with him excepting to measure his work; he could not measure work. I had to peg out his culverts and measure his ground.
9260. Would a man unable to measure his work be capable of valuing it? It was a mere matter of putting a money value on it; it did not require much capacity in that way.
9261. Regarding these short payments, did you ever see the Board about them? Yes; Mr. Davies, several times last year.
9262. Any other member of the Board? No; they never came near me.
9263. What was the result of your interview with Mr. Davies? That the matter should be attended to as soon as the checks were made.
9264. Was Burrowes in the habit of borrowing money? Well, I know he used to very frequently.
9265. Personally? Yes; I know it for a fact. He became a debtor to Springall as soon as he came there.
9266. Did he borrow from anyone else excepting Springall? He did not borrow from me. He might from other people. I know he had £20 from Mr. Davies some considerable time ago, at the beginning of last year. Whether that was a loan or not I do not know.
9267. How did you find out that he borrowed from Springall? Well, because a gentleman named Younger told me he had mortgaged his salary to Springall. In fact he admitted to myself that he had.
9268. To you? He and Springall were great friends at one time.
9269. How did you know he was indebted to Mr. Davies? That was spoken of openly at Mr. Want's place. He asked Mr. Want for money. Mr. Want said you borrowed £20 from Mr. Davies, you cannot want any more money from me.
9270. You wrote a letter to Mr. Deering which Mr. Wells got and showed Mr. Davies. What was it about? It was a letter to Mr. Deering. Before he went out of office he had put me down at a fixed minimum salary per day, and when the other surveyors came—young surveyors—they were put on the same scale of salary as myself. I had been there from the beginning, and I wrote to Mr. Deering in a friendly way and requested him to intercede with Mr. Wells for me. That letter got into the hands of Mr. Davies, who made improper use of it, being a private letter.
9271. Do you know where it is now? I have not the slightest idea where it is. I believe that Mr. Wells got it back; but I do not know how Mr. Wells could intrust it into the hands of Mr. Davies.
9272. Why should the fact of your asking Mr. Deering a proper question create any unpleasantness between you and Mr. Davies? Simply because he chose to put a construction on a particular phrase of the letter. I did not mention his name. I simply made use of this remark, that the two other members, Mr. Wells and Mr. Houison, were gentlemen, who would recognise that a fair remuneration should be paid to an old surveyor like myself. Mr. Davies took umbrage at that. Then he said, "I am not a gentleman?" I said I did not say anything of the kind. The whole thing was dismissed, because Mr. Wells thought it unfair that anything should be made out of a private letter which should never have left his hands. He said he would not have trusted the letter to Mr. Davies if he had known what use he would have made of it.
9273. You said that Mr. Springall made improper use of his position as storekeeper, and that, in fact, he made money out of it? I should imagine he did, because he used to keep a store, sell stores to the unemployed, and charge 15 or 20 per cent. more than was charged in the shops in Sydney.
9274. Do you think that any other people derived a benefit besides Springall? There might have been two or three people in the swim for all I know of, but I did not know of any.
9275. Do you know whether any member of the Board, directly or indirectly, gained advantage that they had no right to gain? I am certain neither Mr. Wells nor Mr. Houison would soil their fingers, or do anything in that way. I have no knowledge of anything of the kind, but I have my own feeling with regard to the Chairman.
9276. Have you any reasons for doubting the Chairman? I might have, but I do not feel disposed to give them to the Commission. I would not lay myself open to libel. 9277.

Mr. H. T.
Sanderson.

11 April, 1889.

9277. No libel can lie. In any evidence you give to this Commission you are protected. It is only a question of whether it would affect your case in any way, as it has still to be tried. If so, of course, you would not say it? The fact of the whole affair is, and especially for the last two or three months, I was going to wash my hands of it. I instructed my solicitor to press my claim, and I would have nothing more to do with them, I was so annoyed at the treatment I received from Mr. Davies. But whatever I say, I do not say with any angry feeling—I am too old to do that—but with a proper feeling. But if a man will enter into a compact with the owners of private lands to do work and expend public money on the land of the owners, I think he is quite capable of doing many things which rumour says have been done. I allude to the fact of Mr. Davies being indebted to Mr. R. B. Smith, to my own knowledge, to the extent of £160 or £170 for costs, and that was to be paid off by the Hornsby transaction, carried through so improperly.

9278. Do you state that from your own knowledge? From what has been told me by Mr. Charles Smith.

9279. I wish no misunderstanding in this matter; do you state that Mr. Charles Smith has told you that Mr. Davies entered into a contract with him? No; I say that Mr. Charles Smith told me as a fact that Mr. Davies was a debtor to R. B. Smith and Smith, his uncle and himself, for £160; and also of the fact of Mr. R. B. Smith not pushing Mr. Davies for it, and leaving him indebted, and causing ill-feeling between young Mr. Smith and his uncle. Couple this with other facts that have come to light regarding the Hornsby Estate, and it would lead to the inference that has been stated, that Mr. Davies went out of the way to interest himself in getting the unemployed on the Hornsby Estate, so as to do some good for Mr. Smith, and thus pay off that balance.

9280. All you know as a fact is the indebtedness of Mr. Davies to Mr. Smith? Yes; and I know from another source that Mr. Davies has not been pushed, and has never been asked for the money, notwithstanding that young Mr. Smith has stated in broad terms that he did not consider Mr. Davies to be an honest man. He has insisted either on his uncle paying him a share of that money or dissolving company. They have not renewed their partnership. Mr. Larnach has told me that he was present when Mr. Davies, six or seven weeks after the creation of the Board, accompanied Mr. Burns all over the land at Hornsby, and that after that the unemployed were put on.

9281. Is that Mr. Larnach who was in the employ of the Board? He was—Alexander Larnach.

9282. You say that Mr. Burrowes and his friends did not pay for rations? I mean that they took care to sign contingent vouchers, put them into the Board, and get the amount of their rations back every fortnight.

9283. How do you know that? I have seen them at the pay-table.

9284. You also stated that they managed to get the best of Mr. Kidman's stores? After I got my stores direct from Mr. Kidman, instead of being sent to Hurstville to be manipulated, we got good stores.

9285. Your statement is that you knew Burrowes and his friends did not pay for their rations, but that at the same time they lived on the best of Mr. Kidman's stores? At the National Park, after the *fracas* took place, I was notified by Mr. Burrowes that I might mess alone, that I would not be allowed to mess at the table of himself and Mr. Springall. They went to live at a place called Loftus, a house they took from Hodge. There was a table there for Burrowes, Springall, and M'Pherson. I was shut out from it. The best joints, everything in fact you could wish, was sent to the principal officer, and I was excluded from it.

9286. You raise an objection in one of your notes to Mr. M'Pherson having lowered the price paid for work? From 18th January, 1887, the usual price was £5 per acre for all land in the Park, whether grass plot or timber. On the 18th June, when the Board had scarcely been in operation for any time, they issued an order taking the matter from the hands of the surveyors and putting it into those of M'Pherson, who made a reduction to such an extent that the men were scarcely able to earn anything more than rations. M'Pherson became so obnoxious that he had to go about with a revolver, and with a stalwart officer to protect him.

9287. Do you not think, being put into that position, he was bound to do the work set him? I do not think that he had to do it like he did.

9288. What do you know of his qualifications? He and I came into contact, because he abused me about something, because I did not draw a plan of something. I told him to go about his business, if he could not speak to me in a more gentlemanly way. He has a habit of speaking roughly to people and calling them all manner of names, which is offensive to many people.

9289. Still his reducing the price given for work, if he considered the price too high, could not be a very grave fault? No; but I think he went too low. In another thing he was right, that the work should be done properly and fairly, and that people should not get their money for nothing.

9290. Used they to get £5 for grass land with nothing to do on it, indiscriminately, whether there was timber on it or not? It took a long time to get rid of a block of 4 acres. Sometimes the timber was heavy.

9291. Why do you state that Mr. Springall and Mr. Davies were close friends? Because when Mr. Davies came there he was always closeted with Mr. Springall, and, in fact, they were on amicable terms.

9292. Do you think Mr. Springall made money by improper means? I have already told you he did before the Board went there. I am not certain, but I almost fancy he did afterwards.

9293. Have you good ground for supposing so? The only ground is that he has gone down to the Coronulla Beach and built an hotel.

9294. If it is true he has made money improperly, would Mr. Davies be cognizant of it? Yes.

9295. Would he have shares? I think he would, as Mr. John Davies always helped himself if he could without anyone knowing.

9296. Do you think Mr. Springall could carry on any improper practice without somebody else being aware of the fact? I do not think he could have carried it on without somebody else being aware of the fact, and whoever that somebody else was he would be entitled to be in the swim, or else he would split.

9297. Have you any suspicion who that somebody else would be in such a case? I am certain it is not the contractor, Mr. Kidman, because Mr. Kidman had his returns and was paid for a certain kind of ration. He was paid every fortnight for a certain amount charged in the pay-sheet. If he were paid over, of course he could dispose of the surplus in some way or another.

9298. Whom do you think it would be then? I do not know. It would be dangerous to say who.

9299. It is not dangerous if you have any reason? I think a cheque would be sent back for the surplus to Mr. Springall. That is my impression.

9300. Do you know a man of the name of Flemming? I do not.

9301.

- Mr. H. T. Sanderson.
11 April, 1889.
9301. Do you know a man who was grooming for Mr. Burrowes? I do not know him.
9302. In your notes here, I think you mention that returns were sent to the Board for work done during January, February, and March, 1888? I allude to the time when Mr. Frazer left the Illawarra Road and took charge of Cook Park. During the time that Mr. Frazer was there he was very much intoxicated, and he was allowed to be away on three weeks' leave to go down to Melbourne. He never took any levels or made any returns of measurements so as to enable Mr. Burrowes to pay the men. There were fourteen or fifteen gangs, and many of the men were brought into debt for rations instead of having to receive money. I believe Mr. Burrowes, Mr. Springall, and others, assisted by a drunken man named Griffiths, made up pay-sheets so as to give the men something. Frazer was removed from the service, and I was sent down there to adjust matters.
9303. Were many of the officers of the Casual Labour Board addicted to drink like Frazer? Yes.
9304. Who were? I have known Walsh eight, ten, or twelve days in a state of *delirium tremens*, and kept on notwithstanding. On the Holt-Sutherland roads he was repeatedly intoxicated, and Mr. Davies knew of his weakness, but would not send him away from the work he had charge of, it being improvements on the Holt-Sutherland Estate.
9305. Was Mr. Burrowes a sober man? I never saw him the worse for liquor, but he could stand a great deal.
9306. Who was Mr. Hillier. He was a freeholder up at Sutherland, and he had the cutting up by steam of all the timber taken from the National Park. He carried it on until the contract was finished. It was a contract for a very large amount.
9307. Mr. Gordon, or Mr. Deering, or both, I forget which you said, discovered Mr. Springall to be guilty of fraud? Yes.
9308. Did they notify their discovery to the Casual Labour Board? No; but I have seen Mr. Gordon's report to Mr. Deering, a copy of which was forwarded to Mr. Burrowes, who gave it me to read.
9309. Did Mr. Deering forward it to Mr. Davies and his colleagues? I am not aware that he did.
9310. So far as you are aware, Mr. Davies was ignorant of that? He might be for all I know.
9311. If you look at the letter-book, page 477—the press copy of the pay-sheet, 8th April to 21st April I think you will see the payments made to the men correspond with the short payments noted on your previous return? Yes.
9312. So that the payments correspond? Yes; the short payments are disclosed in this letter.
9313. Which, with the amount drawn from the bank, would make the short payment? Yes; that is so.

MONDAY, 15 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

William Newcombe called in, sworn, and examined:—

- Mr. W. Newcombe.
15 April, 1889.
9314. *President.*] What position do you hold in the Public Service? Receiver in the Colonial Treasurer's Office.
9315. A statement was handed to this Commission the other day by the Under Secretary for Finance and Trade showing amounts paid into the Treasury on account of the Casual Labour Board from the 2nd May, 1887, to 8th April, 1889;—can you give me particulars of what those different amounts represent and the persons who paid them in? Yes; do you want them all?
9316. Will you tell me who paid in the last amount in the statement, £33 3s. 2d.? That is the document that was handed in with the money paid in by Mr. John Davies.
9317. Did you receive the money? No; the Assistant Receiver received it.
9318. Did you see Mr. Davies? I could not answer that question. He has been there, but whether he came with that payment or not I cannot say.
9319. How was it paid? There is no cheque for that amount, and we fully believe it was paid in cash.
9320. Is there any cheque for that amount on that particular day? No; and we fully believe it was paid in cash.
9321. Can you say whether Mr. John Davies paid it in personally or not? No; I cannot.
9322. Do you know Mr. John Davies' signature? I do not. [*Document put in and marked O*]
9323. Will you give me particulars of the item shown in the statement, £52 13s. 2d.? This voucher represents an amount of £52 3s. 2d. received for the sale of firewood, and 10s. for damaged crockery sold, making altogether £52 13s. 2d. paid into the Treasury on the 15th February, 1889, signed John Davies. [*Document put in and marked O 1.*]
9324. Can you tell me whether Mr. John Davies paid it in in person? No; I cannot.
9325. Can you tell me whether it was paid in by cheque or cash? We fully believe that it was paid by cash, for there is no cheque representing that amount.
9326. Will you tell me about the item in this statement, £8 10s.? We have a voucher representing that amount.
9327. What are the particulars? Proceeds of the sale of surplus stores—seventeen bags of sugar sold at Carlingford, 10s. per bag, £8 10s., signed John Davies; paid into the Treasury on the 25th February, 1889.
9328. Was this also paid in cash? It was also, I believe, paid in cash. This document was written out by the clerk who drew the receipt at Mr. John Davies' dictation, and Mr. John Davies signed it. [*Document put in and marked O 2.*]
9329. Can you tell me anything about the item in the statement, unclaimed wages, £86 11s. 7d.? No; I cannot.
9330. From the way it appears in this statement it would seem the Casual Labour Board paid it—can you say whom that would mean? In a case of that kind we always take the name of the person who adjusts the advance.
9331. For example, three items in the statement are noted as having been paid in by the Casual Labour Board, whereas other items appear as paid in the name of John Davies? That would arise from the way the clerk in the Accountant's branch of the Treasury made the entry.

Henry

Henry Little called in, sworn, and examined:—

9332. *President.*] What position did you hold under the Casual Labour Board? I was overseer at Mr. H. Little. Hornsby.
9333. When were you appointed? I was appointed by Mr. Deering when the Lands Department took over the works. 15 April, 1889.
9334. When? About three years ago now.
9335. Do you recollect the exact date? No, I do not.
9336. Do you recollect when the Casual Labour Board came into existence? I think it was about April, 1887.
9337. Had you anything to do with the unemployed then? Yes.
9338. Did you pass over from Mr. Deering to the Casual Labour Board, or had you a fresh appointment? No; I passed over.
9339. What were your duties as overseer? To see that the men did their work, to supervise their labour, and to make out the pay-sheets.
9340. Anything else? No; nothing else.
9341. Were you always located at Hornsby? Not always. I have been at Beecroft.
9342. When did you first go to Hornsby? I went there at the commencement of August, 1887.
9343. Where were you previously? At Beecroft and Carlingford. We started at Beecroft about nine months before.
9344. Were Beecroft, Carlingford, and Hornsby the only places you have been at? Yes.
9345. What work was done at Beecroft? Clearing, road-stumping, and road-forming.
9346. Was that all done on public property? Yes.
9347. What work was done at Carlingford? Public roads were formed, and clearing was done on public lands.
9348. Was any work done there on private property? No; not that I am aware of.
9349. Were you examined before the Select Committee of the Legislative Assembly? Yes.
9350. Is this your evidence? Yes.

[*Evidence before Select Committee.*]

2414. *Chairman.*] You are a surveyor in the employment of the Casual Labour Board? Yes.
2415. Are you confined to the Casual Labour Board, or do you do other Government work besides that? I am confined to the Casual Labour Board.
2416. You have been at work at Hornsby? Yes.
2417. *Mr. Copeland.*] Are you on the staff, or are you a licensed surveyor? I am only connected with the Casual Labour Board.
2418. You are not in the Government service otherwise? No.
2419. How long have you been working under the Casual Labour Board? Since the Casual Board took the work over from the Lands Department.
2420. Did you survey the Government subdivision at Hornsby? No.
2421. I suppose you have merely been there surveying roads, or superintending the making of roads? Superintending the formation, making, clearing, and such like.
2422. Can you tell the Committee the length in chains of the roads cleared on the Government subdivision at Hornsby, on the eastern side of the line? 273 chains.
2423. Perhaps you could tell me how many roads there are there? I could not tell you that without having a plan of them before me.
2424. How many of those roads have been formed? 115 chains.
2425. Any metalled or ballasted? No; nothing to speak of.
2426. What number of culverts or bridges have been made? There are two bridges, six crossings, and one causeway.
2427. What do you call crossings? They are paved crossings.
2428. What has been the total expenditure on those roads and bridges? £1,629.
2429. I want you to distinguish between the roads on the Government subdivision on the eastern side of the line and those on the Government land on the other side? Boundary Road is not included in this estimate I am giving you. There are cuttings and excavations which would come pretty close on to another £1,000.
2430. On the same subdivision? On the same subdivision. I have not had the time to take the quantity of yards out of the book; but I think it will come pretty close up to that; perhaps not quite £1,000.
2431. Those are the cuttings on the various roads? Those are the cuttings on the various roads. I could not distinguish any particular work without the books, and I had not the time to see them.
2432. Does that include underscrubbing on the whole of the land? That includes the underscrubbing.
2433. And clearing the land ready for sale? And clearing the land ready for sale—that is, all the work we have done upon it.
2434. Do you know the area of the Crown lands subdivision? 233 acres.
2435. What do you estimate the cost of the underscrubbing and clearing of the land, exclusive of roads? £3 an acre.
2436. Then £699 has to come out of your former amount, leaving the balance to go for roads, bridges, and so forth? Yes.
2437. How many men had you at work on that subdivision? I could not say very well. We must have had when we started up there about forty.
2438. Has any labour been expended upon that subdivision since the Government sale? No.
2439. Has any work been done on the Boundary Road since the subdivision? No.
2440. Or on any of the other roads? Yes; there has been work done on the continuation of Boundary Road—three or four days' work.
2441. *Mr. O'Sullivan.*] How much was expended on the unemployed in the works on private lands, exclusive of the Crown lands? It must be close on £2,900.

2442.

Mr. H. Little.
15 April, 1889.

2442. If you have had £2,900 spent on private lands, and £2,029 spent on Crown lands, for culverts, and causeways, and underscrubbing, and so forth, the whole amount comes to £4,929, does it not? That is right.
2443. *Mr. Copeland.*] Does that include the clearing? It includes it.
2444. *Mr. O'Sullivan.*] Can you tell us what other money has been spent—it has been given in evidence that over £6,000 has been spent at Hornsby? £1,000, I think, has been included that we spent for works at Berowra. When they were finishing the work at Berowra there were a few gangs left up there to complete the work, and they used to come down to Hornsby to be paid; but the sum cannot be more than £1,000, any way. The balance is in the cuttings and excavations and horse-hire.
2445. In addition to the £2,900 there must have been spent about £1,500 on the private lands? Yes. This estimate was made up at 15s. a chain, and there are a number of chains which could not be made for less than £4 or £5. We paid by the cubic yard, and put it into chains.
2446. What I want to get at is this: There is a discrepancy of at least £1,600 between the amount already given as the total expenditure on the unemployed at Hornsby and the expenditure you have accounted for now. You have accounted for £4,929, and it has been given in evidence that there has been nearly £7,000 spent on the unemployed at Hornsby. I ask you was this balance of at least £1,500 also spent on these roads? You can put down £800 on the private lands, and the balance on the other.
2447. That is £3,700 on the private lands altogether? Yes.
2448. So far as you know, at least £3,700 has been spent on all the land south of Boundary Road and including that road? Yes; I think that will cover it.
2449. Will you kindly tell us where the other £700 has gone? On the Government lands on both sides of the line.
2450. *Mr. Copeland.*] Are there any roads on the Crown lands east of the subdivision at Hornsby? All the work done is included in the £6,000, and there was also a 3¼-acre reserve for a Court-house which was stumped.
2451. *Mr. O'Sullivan.*] Are you in a better position than Mr. O'Donnell is in to know what the amounts spent on the lands are? Not unless I took them out of the books. I could not fix upon any particular length of road; but I can tell you pretty well what has been spent upon the Crown lands, and outside of the Crown lands.
2452. Did you yourself keep the accounts of the expenditure on these roads? Yes, mostly all.
2453. Then we can accept your statements as approximately true? Yes. What I have told you has been the money paid away for work at Hornsby and neighbourhood, within £1,000.
2454. *Mr. Copeland.*] There have been no roads made on the Crown lands east of the subdivision? No; we have never done any.
2455. You know the bad creek on Boundary Road, what do you consider you could have made that passable for—what would be your estimate? It is formed as far as road D.
2456. Yes. Knowing the nature of the place, what amount would you estimate would cover the cost of making that place passable for traffic? About £1,200, I think.
2457. That is bearing in mind the soft nature of the sandstone? Yes.
2458. You think that for £1,200 you would be able to make a cutting through the hill, and tip the mullock and debris down into the gully, and so level the road to make it fit for ordinary traffic? Yes; but it would be a steep incline then.
2459. How steep? One in eight or one in nine.
2460. Could you not reduce it? Unless you cut through the hill altogether.
2461. The £1,200 would include a bridge, or culvert, or whatever you might term it*? There would have to be a bit of a bridge. The higher the bridge the better.
2462. With the stone you took out of the cutting you would be able to build the approaches to the bridge? Yes.
2463. Then for £1,200 you could make that place passable, and the Boundary Road would then be as serviceable as Junction Road? Yes†.
2464. For the whole length to Vanceville Road, if this £1,200 were spent in making this crossing at Spring Gully Creek, Boundary Road would be as serviceable as Junction Road? No.
2465. But still Boundary Road could be made a good serviceable road for traffic? It could be made; there would be no difficulty about it at all. You could do the work right enough if you liked to spend the money over it.
2466. Then you think £1,200 spent upon this road would make it serviceable for all kinds of traffic? Yes‡.
2467. *Chairman.*] Did you survey any of these roads? No, none of them.
2468. *Mr. Copeland.*] Have you noticed whether you could, by a slight deviation, reduce the expenditure upon this road? If I was going to make the road there I would follow the creek round to the top.
2469. In that case the expense would be reduced? By about £8 a chain.
2470. *Chairman.*] That is to say, with a slight deviation to the south? Yes.
2471. Would you have to make much of a deviation? No, I do not think so.
2472. Would it materially injure Burns, Withers, and Smith's estate if you did it? No, I do not think it would much. It would certainly injure it a little.
2473. *Mr. Copeland.*] They would have frontages to both sides of the street? Yes; but then it would leave land that would be of no value at all. If you had to follow the contour of the hill you would have to grade it right up. 2474.

*NOTE (on revision) :—No: The bridge would not be included.

†NOTE (on revision) :—Only as far as the first gully; and the amount does not include bridge.

‡NOTE (on revision) :—The £1,200 would simply form the road to the first gully.

2474. How many chains of road do you think would be necessary? About 15 or 16 chains, at a cost of £8 a chain.

2475. It would cost about £120? Yes.

2476. In that case the road would be just as serviceable, I suppose, as the Junction Road? No; it would not be as serviceable.

2477. I mean for traffic? Yes; but it would be very steep.

2478. What is the steepest grade of Junction Road? I think it might, in one or two pinches, be about 1 in 78, or something like that.

2479. Still, for all practical purposes, by making a deviation of 15 chains, which would cost at £8 a chain, £120, Boundary Road could be made serviceable for traffic? No; but they could have gone round to the south and got on to the Crown lands on the top, but then there are some nasty creeks further along.

[*End of Evidence before Select Committee.*]

9351. *President, resuming.*] Was that evidence submitted to you for revision? Yes.

9352. Is that evidence true and correct in every particular? Yes.

9353. From whom did you get instructions to initiate work? From Mr. O'Donnell, who was the superintendent.

9354. Did you ever have any instructions direct from Mr. Davies? No; I have had none.

9355. What work did you do up at Hornsby? Under-scrubbing, clearing roads, forming roads, and ballasting them, and building bridges and culverts.

9356. And you always worked under instructions from Mr. O'Donnell? Yes.

9357. From anybody else? No

9358. *Mr. Franklin.*] You went to work at Hornsby under the direction of Mr. O'Donnell? Yes.

9359. What was O'Donnell's position there? He was superintendent.

9360. He had full charge, I suppose, of laying out the work? Yes; he had charge of the men there.

9361. From whom did he get his instructions? He used to get all his instructions from the Board.

9362. In getting his instructions from the Board, are you aware whether those instructions were from the professional members of the Board? Well, not all of them; but a great many of them were.

9363. You know that from your own observation? Yes; I saw the members there.

9364. What was the first work that you commenced? It was clearing roads.

9365. Which roads? The road marked A, I think, on the plan.

9366. I want you particularly to tell me how you commenced the work on the Hornsby subdivision. I show you now a plan showing, I think, all the work done by the Casual Labour Board on the Hornsby property during the time the Board was in existence [*Appendix D 4.*] Upon this, point out where you commenced your work when you arrived at Hornsby? The first road-clearing was the extension eastwards from the overbridge on the railway, north of the railway station towards Boundary Road, and then we went south towards the Boundary Road by Sherbrook Road.

9367. What did you do on these two courses? We only cleared them first and stripped them.

9368. You did not form? No. Sherbrook was cleared right through to Junction Road.

9369. Why did you go beyond Boundary Road at that time? I do not know. I could not give you any idea.

9370. Did you know that Boundary Road was adopted by Mr. Deering for a division between Burns, Withers, and Smith's land and the Crown lands? Yes.

9371. What was the next work done? Then, after that, the Junction Road, from Sherbrook Road towards the railway station, was formed.

9372. In what manner was that treated? It was only stumped.

9373. Do you know what particular instructions were given in regard to that? No; I do not know any instructions.

9374. What did you do after that? Then, after that, Junction Road was extended eastward to the intersection of the Great Eastern Road.

9375. Can you tell me why you omitted Boundary Road, which had been already laid out? That was cleared afterwards.

9376. The first work was on the private property of Messrs. Burns, Withers, and Smith, and then afterwards the road surveyed by Mr. Deering, forming the boundary of the Crown lands, was taken in hand, and then you had other roads on the Crown lands following in succession? First we had the men. At first we had the men working on the Crown lands, but at the same time the greater number of men were working on the road called Junction Road.

9377. Then your evidence is that the works on the Junction Road and the roads going through the Crown lands were going on simultaneously? Yes.

9378. Looking at the plan, do you notice a gully called Spring Gully? Yes.

9379. Would you say that at this point the road was difficult or otherwise? I should say that it was very difficult.

9380. Can you give any evidence why the road was not continued beyond that point? It was too rough; we could not go beyond that point.

9381. You had already established a thoroughfare from Vanceville Road to the Junction Road? Yes; but we had some difficulty at the corner of the Junction Road. We found the peg afterwards and proceeded with it.

9382. You do not know by whose instructions you commenced the thoroughfare towards Vanceville Road, leading to Boundary Road? I do not.

9383. Had Mr. Napier been at work there? Mr. Napier had commenced the work described as from Sherbrook towards the western portion of Junction Road.

9384. Was Mr. O'Donnell your superior officer on this work? Yes.

9385. Are you aware whether they took any instrumental measurements at this Spring Gully? No.

9386. Are you sure that no section was taken of that before the report was made that it was impracticable? No.

9387. Do you notice the road marked C D in the plan? Yes.

9388. That road makes a junction between Boundary Road and Junction Road? Yes.

9389. Do you know why that was done? To get an outlet.

Mr.
H. Little.

15 April, 1889.

- Mr. H. Little. 9390. What was the outlet for? It was to get from the Crown lands into the Junction Road. It was done with the object of making communication with the Junction Road from the Boundary Road.
- 15 April, 1889. 9391. Do you see a road marked B? Yes.
9392. Why was that road made? For the same purpose as this one.
9393. Notwithstanding that there are two other roads running in the same direction as the road marked B, you considered that was necessary? Yes.
9394. Was this work, the extension of the Vanceville Road, done subsequently to the Main Junction Road? It was done after the Junction Road.
9395. Then it is not true that the extension of the Vanceville Road was first carried on? No.
9396. During the time this work was going on, had you any visit from Mr. Wells and Mr. Houison? Yes.
9397. Did Mr. Wells and Mr. Houison personally see the work of the construction of these roads? They went all over them.
9398. Can you tell me at what date the Main Junction Road and the Vanceville Road, and the connecting roads to the Boundary Road were done? About nine months ago this work was completed.
9399. This Great Eastern Road? The whole of these roads would be constructed subsequent to July, 1888.
9400. Do you remember any visits from Mr. Houison and Mr. Wells after that? I know Mr. Houison came up three or four times subsequent to that.
9401. Are you aware whether Mr. Houison gave his sanction to any of these roads marked here on the plan? He knew that these were going on.
9402. How did you know in which direction to carry these roads? These roads to the Junction Road were laid out for us by Mr. Dawson. He came up one day one week and another day another, and marked them out.
9403. Who was Mr. Dawson? Mr. Dawson was the private surveyor to the owners of the estate.
9404. Did Mr. Dawson at the same time lay out these roads extending southward? No; he laid out the extension of the Burns Road on the southern boundary of Burns, Withers, and Smith's land. The road marked H we carried through towards the south to meet Burns Road, proceeding southward for access to the railway platform.
9405. Was that done with the sanction of Mr. Houison? Well, he went over it—he never said anything against it.
9406. Do you remember if Mr. Houison at any time took exception to any of these roads being done? Not that I am aware of.
9407. Do you know from the instructions given to Mr. O'Donnell if there was any exception taken to these roads being done? I do not believe there was any.
9408. So that you believed that they were done under proper sanction? Yes.
9409. Did Mr. John Davies visit you frequently? Some two or three times.
9410. Did he make any suggestions as to what should be done? No; he might say whether a thing was to be done, but he never undertook the practical direction of the works.
9411. Have you seen a statement made of the actual expenditure and the mileage of the roads on that property. I am referring now to the Burns, Withers, and Smith's property? I did not know whose property it was.
9412. Have you got any records as to instructions, or can you give any information as to the instructions you had as to the making of Burdett-street, Florence-street, and Albert-street? No; the extension of Albert-street we did not do at all—it was done by the private owners.
9413. Looking at this plan of the roads coloured pink, done by the Casual Labour Board, does it not appear to have been designed for the close subdivision of land near the Hornsby railway station? It looks as if it was.
9414. Do you think that that subdivision was made in the interests of the public only, or more in the interests of the owners of the land? Well, the division altogether is more in the interests of the owners of the land than in the interests of the public.
9415. From your knowledge of the locality, can you say whether this plan shows all the roads that have been done? I think it does not extend to the roads far north of Boundary Road. This road continues straight through to Bullard's property.
9416. You say that Burdett-street, Florence-street, or Albert-street was not done by the unemployed? They were not cleared. Some of them have been done. We simply continued them on the plan laid down by the company's surveyor.
9417. Have you had any opportunity of making a calculation of the actual money expended on the Burns, Withers, and Smith's property? No; I do not know Burns, Withers, and Smith's land.
9418. Did you frame the pay-sheets there? Yes.
9419. You stated, I think, that £3,700 would cover the expenditure on the private roads at Hornsby? Yes.
9420. And you accounted for the discrepancy between the amount, which had already been given as the total expenditure on the unemployed, and the expenditure you accounted for—£4,400—by saying that £700 had been expended on Government roads on both sides of the line? Yes.
9421. Have you seen the detailed statement of the expenditure by Mr. Wells? Yes.
9422. Does that agree with your statement? No; he is too low.
9423. Did he not get the information in detail from you? Yes; but that was surface-forming. There were some heavy cuttings that would probably cost £1,000. At the junction of the Great Eastern Road and Burns Road there is a small cutting, on the junction at the southern end of road marked E at the intersection of Burns Road; on road marked C, 4 chains to the Boundary Road, a heavy cutting. The total cost of cuttings and excavations was £514 9s.
9424. Can you give me the total cost of clearing and under-scrubbing for road-forming? Yes; 1,204 chains, at 18s. 6½d. per chain, £1,118 8s. 6d.
9425. How did you get these figures? Out of my book. That is the actual cost.
9426. Now will you give me the general formation without embankments and cuttings? Nine hundred and fifty-two chains, at 19s., £906 1s.
9427. Side drains? No; I have not got side drains.

9428. Will you give me the lump sum for them? I should think about £60 would pay for drains.
9429. Have you got the ballasting? No; I have not got the total number of chains. It was £3 5s. 9d. per chain quarrying, breaking, spreading, and blinding.
9430. To that must be added the carting? Well, I can give you what the cost was in cartage all through. We have spent £1,026 in cartage.
9431. Do you know the rates that you paid? When we first started up there we used to pay 12s. per day; then we knocked the amount down to 10s. per day.
9432. Were the railway works going on then? Yes.
9433. Did you experience any difficulty in getting carts at that time? No. They were always willing to come to us.
9434. Was your work easier than that given on the railway, so that they would come to you in preference to going to the railway? Yes; it was not so hard.
9435. Was this ballasting done by contract? Yes; a contract of so much per yard.
9436. What was the gauge for breaking? About 3 or 4 inches.
9437. How was the ballast spread on the road? About 16 feet wide; on an average about 6 inches, running about 17 cubic yards to the chain on an average.
9438. Did you find that by measurement? Yes.
9439. Have you made an abstract of the actual cost of forming, ballasting, and blinding per chain? No.
- 9439½. But the above items may be taken as the average? That is the average. The items for road forming and clearing come out as I have stated.
9440. In clearing, would provision be made for getting the timber off the road? We could not get it off. We left it there on the private lands.
9441. Have you any memos. of the bridges? Yes.
9442. Will you give me them, stating their positions? There are six bridges, the total cost of them being £176 10s.
9443. How are they constructed? They are second-class bridges, of blackbutt.
9444. How do you calculate the total cost of the bridges? I think it runs 17s. 6d. per foot.
9445. How are they finished? Well, they are finished off very well.
9446. Painted? Yes.
9447. Have you had much experience in bridge-building? Yes.
9448. Do you know that this is a small rate per foot for substantial bridges? Yes, but the timber was very close at hand. They are finished very nicely as regards painting.
9449. Do they add value to the land? Yes.
9450. Are they only temporary bridges? Well, I think they will last twenty years.
9451. What is the general formation of the ground in the vicinity of the bridges? Which way do you mean?
9452. Is it sand? Yes; it is good sandy land.
9453. Is there heavy traffic on any of these roads? There is no heavy traffic as yet, nor is there likely to be until the population gets there.
9454. Do you consider that the ballast adds very much to the value of the roads? Yes.
9455. In dry weather? I think so.
9456. Did you blind these ballasted roads sufficiently, so that they might become consolidated? Yes; I blinded them enough, I think.
9457. Would not the simple forming of the roads have been sufficient for the present, and for some considerable time in the future? Yes, I think so. I do not know why anything more was done.
9458. What cost would the proportion of the ballasting be to the general formation of the road;—would it cost as much as the actual clearing and forming? Yes; it would cost more.
9459. How much more? It would cost a pound a chain more.
9460. And this work was more than was necessary for practical purposes? Yes, for some time to come.
9461. Are you acquainted with the mode of clearing land for subdivision sales? Not particularly.
9462. Have you not seen various lands cleared for sale and subdivided? Oh, yes.
9463. What is generally done on roads that are laid out to increase the value of property for sale? They are generally stumped; that is all I have seen done to them in order to make them passable.
9464. Have you ever in such cases seen roads formed, gravelled, and ballasted? No.
9465. Do you think that the work done on the Burns, Withers, and Smith's Estate has greatly increased the value of the land? It must have done so.
9466. To what extent do you think? I could not say to what extent.
9467. What was it like before you commenced working there—bush land? Yes—wild bush.
9468. Impenetrable? Yes.
9469. Do you think that the work done would double the value of the lands? No.
9470. You say you received instructions from Mr. Houson until a late date last year? Yes, up to late in 1888.
9471. So far as you are concerned there is no doubt in your mind that Mr. O'Donnell was not exceeding his instructions in regard to the formation of this road? Yes.
9472. *Mr. Waller.*] How did you estimate the cost of the work upon all these roads? We took it from one of these sketch plans and scaled it all.
9473. *Mr. Franklin.*] You have taken your estimate from the plan, and this Commission may fairly calculate upon your rates, applied to the accurate survey, giving the actual amount? Yes.
9474. *President.*] What salary were you getting? 7s. per day for seven days—49s. per week.
9475. Who paid you? The Casual Labour Board.
9476. Do you know Mr. Burns? I have known him by sight.
9477. Have you seen him on the ground where these works were being carried on? I have seen him at Hornsby, at the station.
9478. Had you ever any conversation with him? No.
9479. Do you know Mr. R. B. Smith? Yes; I have seen him.
9480. Have you ever had any conversation with him? No.
9481. Was he at Hornsby when you saw him? Yes; he was up there once with Mr. Burns.
9482. Do you know Mr. Withers? No; I do not.

- Mr. H. Little. 9483. Did you ever see Mr. Burns or Mr. Smith with Mr. Davies? I saw Mr. Davies, Mr. Burns, and Mr. Oliver—those three together.
- 15 April, 1889. 9484. How often? Only once.
9485. During the time that you were in the employment of the Casual Labour Board, have you observed or been made aware of any departmental irregularity or of any improper expenditure of money or of any imposition? No.
9486. In the way of making out improper vouchers, pay-sheets, or otherwise? No.
9487. Everything, according to your observation, was perfectly straight? Yes.
9488. Have you ever received anything beyond your salary? No.

James Edward Ormiston called in, sworn, and examined:—

- Mr. J. E. Ormiston. 9489. *President.*] What position do you hold in the public service? I am Accountant in the Colonial Secretary's Office.
- 15 April, 1889. 9490. I believe, since the dissolution of the Casual Labour Board, you have had something to do with the payment of the men? Yes; I have had the supervision of the payments.
9491. What system did you find prevailing as to these payments? I thought the system was a very good one. There seemed to be a check upon the payments in every respect.
9492. Did you find it necessary to make any change? No; I did not.
9493. Then the course that you have recently adopted is precisely the same as you found being adopted at the time of the existence of the Casual Labour Board? Precisely.
9494. Do you think it was possible for any fraud to be arranged under the system that prevailed? Not unless several of the parties have been acting in collusion.
9495. One individual could not do it? No; one individual could not do it.
9496. For example, in getting the signatures to the pay-sheet, what precaution did you adopt to ensure the proper person signing? In every instance I referred the men to the superintendent and overseer, who were present at the pays.
9497. Then, if such reference was not made, would there be a want of proper precaution? You would know of course the man's signature—he signed in every instance.
9498. How did you know, for example, that a man who came up as a ganger was or was not a ganger? Only on the assurance of the overseer.
9499. You asked him in every case? Yes.
9500. Do you think that would be the best precaution that you could take? There was another. The ganger had a ticket, which he obtained from me on the payment of the wages.
9501. Did you have many cases of men being absent on the pay-day? Yes.
9502. What course did you adopt then? It was paid into the Treasury, and the men from time to time I believe came to the Treasury for it.
9503. Is it the practice of all Government Departments to pay such money into the Treasury immediately? Yes.
9504. Would it be considered irregular if it were withheld for a time? Well, it would depend upon circumstances.
9505. *Mr. Franklin.*] The numbers of the unemployed are greatly reduced since you have been there? Yes.
9506. So that you had greater opportunities of recognising individuals? Yes.
9507. But at a very heavy pay, which might last until late in the evening, would it be possible to recognise every individual? Yes.
9508. Do you think there was a sufficient check then to provide against mistakes or fraud or irregularity? Yes, unless there was collusion.
9509. When the camps were divided, and the payments equally so, there could not have been so complete a check in every payment as there would be now with a smaller number of men? Well, I do not know; the same precaution is taken in every instance.
9510. At any rate you would not be so well able to select your men to supervise each pay as you would if there were smaller operations? No.
9511. Supposing two or three men acted in collusion at any one of these pays, would it have been possible to make payments to persons other than *bona fide* gangers? I think so.
9512. That could have been done? Yes; it could have been done.
9513. After each pay, if there were any accumulated unpaid amounts, how long should they be withheld for chance applications? Well, if I had anything to do with the matter, I should pay them at once into the Treasury.
9514. Would the Treasury in its ordinary course of business take the signatures of the applicants upon any unfinished pay-sheet and pay the amounts? Yes; upon the certificate of the Board.
9515. Would that be the proper course of dealing with them? Yes.
9516. Then any moneys that came into your hands after the pays would be paid into the Treasury into a suspense account? Yes.
9517. And you would not consider it your duty to hold them for any length of time? No.
9518. *Mr. Waller.*] Did you take any independent witnesses with you when you went to superintend these pays? Yes.
9519. What do you mean by independent witnesses? The officers of this department, independent of the Board.
9520. How long have you been acting as Paymaster? Since the 1st February this year. At the time the new Board took over the affairs.
9521. Do you know the ordinary routine of ordering goods for the Casual Labour Board? Yes.
9522. What was the routine? They requisitioned from the Board, and the Board sent to the contractor, and the contractor sent what was required out to the different places where they were wanted, and the superintendent would give a receipt for the goods.
9523. Was this requisition eventually returned back with the contingent voucher? Yes; it should be.
9524. Otherwise, would there be any proof of the correctness of the voucher? Only the certificate of the overseers or receivers.
- 9525.

9525. The only certificate that the overseers could give would be to sign blindfold for the goods? Yes; but there was the butt in the order-book with the Accountant.

9526. What did the superintendent sign for? For receiving the goods.

9527. But if they did not order the goods? No; but the fact of the goods being received would be sufficient for them. That was only taken on trust.

9528. Would there be much difficulty in arranging the vouchers so that each voucher should have the original order attached to it? No, there would be no difficulty.

9529. How long do you think it would take to do that? I do not know that I understand you exactly.

9530. How long would it occupy to take M'Lean Bros. and Rigg's vouchers and have attached to them all the orders, and in the same way all Kidman's vouchers? It would take no time at all if the superintendent did all his work.

9531. I am talking about doing it now? I should not think there would be any difficulty, because the overseers would know what was received.

9532. These orders should correspond with the vouchers? Yes; before I passed an account I should see that they did so.

9533. And the numbers of the orders should correspond with the numbers of the vouchers? They should do so.

9534. Would you think it correct to pay vouchers if you could not find orders to support them? No; I would not pass them without the orders.

9535. You would not consider the mere certificate of the superintendent sufficient? Certainly not. I would see from whence the order came.

9536. Do you think that before this Commission could say that they were satisfied with these vouchers it would be necessary to have them supported by the butts of the book? Yes, I should think so.

9537. If your services were required for such work, would you be willing to undertake it? I should be glad, with Mr. Walker's permission, to place my services at your disposal.

9538. *Mr. Franklin.* Have you taken charge of the accounts? Yes; I have taken charge of all the payments in connection with the accounts.

Frederick Crossthwaite called in, sworn, and examined:—

9539. *President.* What are you? My proper business is discharging clerk.

9540. What are you doing now? Nothing at present; I am trying to get work in Sydney, in that capacity, but I have not succeeded yet.

9541. Were you in the ranks of the unemployed between the months of May, 1887 and December, 1888? Yes,

9542. How long? I think about sixteen months.

9543. What were you doing? When I went there first I was with the surveyors. I was with Mr. M'Pherson, and when he was taking surveys I went with him. He found me so quick that I was put into Mr. Burrowes' office as clerk, after which, when the work got slacker, I was sent out with the surveyors again. Then after that I was made assistant overseer, and I was put to report upon what appeared to Mr. Burrowes to be swindling going on, and I was dismissed for doing so. I was not actually dismissed, but my wages were reduced, and I left on that ground.

9544. What district were you in? The National Park.

9545. What did you say about Mr. Burrowes. I did not quite catch your evidence? Mr. Burrowes called upon me to report upon some flagrant swindling. I objected to do so, and asked him to make a report himself. He did not give me any reason why he would not do it, but asked me to do so. I said, "I know what the result will be; I will get dismissed." He spoke to me in this way. That it was my duty to try to expose any cases of swindling. I wrote a letter asking if they were aware that certain men were not charged with rations. I knew what the result would be; I was reduced to 3s. 6d. per day.

9546. Whom did you write to? To the Chairman of the Board.

9547. When? It would be on the 16th or 18th March, 1888. If you show me the papers I could tell you.

9548. Was your complaint inquired into? I can tell you no more than this. Mr. Burrowes could see it was plain swindling, and I reported it, and my pay was reduced from 5s. to 3s. 6d. per day. I spoke to Mr. Burrowes about it. He said, "I am very sorry; it is Mr. Davies' orders." I said to Mr. Davies, "I don't care to remain here at 3s. 6d. a day." He said, "That is exactly what I want. I want to get every one out of the place."

9549. What was this swindling? I acted as ganger on this ticket, dated the 28th February. My name had been struck off the overseer's, but still I had to keep time, for the overseer was incompetent and unable to do so. I was keeping time and doing writing for which I was never paid. Bastable was the overseer, and he said to me, "Pender's name will appear in your tickets, £3 and no rations, and you will give the £3 to give to Mr. Springall." On the 28th February, instead of the amount of £16 18s. 3d. being passed over to me from the Casual Labour Board Paymaster, there was only £15 18s. 3d. I pointed this out. Well they insisted that £16 18s. 3d. had been put upon the table. The Paymaster insisted that there had been a sovereign put upon the top of this money. I paid my gang, and this left me only £2 instead of £3 to give to Mr. Springall. I was a pound short, so I gave this to Pender. Mr. Springall said to me, knowing that Bastable had been dismissed, "You take Bastable's place." He asked me what I was going to do with the pound. "Well," I said, "I had an idea that it might have been put on the top of the next man's money." "Well," he said, "either you or me will have to lose that"; and then he said, "You will have to meet me half-way." I said neither yes nor no to that. On the following Sunday week I went in to see Mr. Burrowes. I told him I had taken Bastable's place. He said Springall had said something about it. I asked him if he had heard about my being a pound short. He said, "Yes; how did it occur?" I showed him this slip—"Pender, 5s. a day and no rations." "Look here," he said, "there is some damned swindle going on here. Don't you know that every man here, from myself downwards, has got to pay for his rations, except the police." I told him about Springall having said I would have to meet him half-way about the pound. The day before I went to see Springall about some rations I had made a claim for eleven rations that had been overcharged to me—twenty-two instead of eleven. He said, "Do you remember, Crossthwaite, that claim for eleven rations? I will allow you for those rations and you give me the pound." Burrowes said, "Don't give him a penny of it." On the following day the work down at the river was stopped. I saw Mr. Burrowes before the pay. I said, "What

Mr. J. E.
Ormiston.

15 April, 1889.

Mr. F.
Crossthwaite.

15 April, 1889.

- Mr. F. Crossthwaite.
15 April, 1889.
- *“What about this £3?” He said, “Give it to Springall, and we can talk about it afterwards.” When the pay was over I gave Springall the £3. I was being paid 5s. a day as assistant overseer. Well, about three or four days after this my report went in asking Mr. Davies whether he was aware of the fact that the law laid down by the Board was not strictly adhered to; that on my ticket Pender’s name appeared 5s. per day and no rations, and the money was handed to Springall to dispense. The next pay I was down for 3s. 6d. a day. I said, “Is mine 3s. 6d. a day?” Springall said, “That is right.” I went to Mr. Burrowes to see whether this was really so. He said it was a mistake, but that I did not want a special voucher; it would do next pay. The next pay I was paid 3s. 6d. again. I think I spoke to Mr. Burrowes again, and he said, “I am very sorry, I cannot help it; it is Mr. Davies’ orders.” A couple of days after I sent in the report to the Board, Springall went to a man who was a tentmaker named Nightingale, on whose ticket Pender had been before. He said, “Nightingale, don’t tell Crossthwaite about Pender’s name being on your ticket.”
9550. Did you know Nightingale? Yes.
9551. Did you know that previously Pender’s name had been on his ticket? No; I did not know.
9552. Do you know of any other swindling? No; I cannot say I know of any, but I have heard of a good deal of it.
9553. Do you think that Mr. Springall was benefitting by this? I am perfectly certain he was. There was a man called Flemming; he was put down as one of Springall’s factotums. A man who was working there was only speaking to me to-day about him. This man Flemming used to be paid in a gang, and besides this he had a dummy gang of his own. He was paid in an ordinary gang and was paid for a dummy gang.†
9554. Do you think from what you saw that Springall alone was concerned in this matter? From what I have heard men say, mine was not the only ticket made up in that manner.
9555. Who was Pender? Pender was a watchman.
9556. Do you think that Mr. Burrowes had anything to do with the swindling? I am perfectly certain that Mr. Burrowes would be above anything of that sort. No; he is a different man from that altogether.
- 9556½. Did you ever hear of Mr. Burrowes being identified with anything of the sort? Whatever it was Mr. Burrowes would have nothing to do with anything of the kind. He was looked upon as a different kind of man altogether.
9557. What about Mr. M’Pherson? I am perfectly certain that these mistakes could not have occurred without Mr. M’Pherson knowing about them. He is too sharp an accountant. He was particularly sharp.
9558. Do you think Springall could have been carrying on this with the connivance of others? I do not know.
9559. How does this sheet show that Pender was not drawing rations? Well, there is a nought there.
9560. What would that convey—that he was not drawing rations? It would convey, that for some particular reason, he was not drawing rations. I had at first supposed that perhaps being a watchman he might have day work as well as night work, and have been let off in that way.
9561. Do you know the man Flemming? Yes; he was another watchman.
9562. Had he charge of a gang? No; he had nothing to do with a gang. He was simply about amongst the tents.
9563. Had he ever a gang? Well, I could not say that he never had a gang. I never knew him to have one.
9564. Had you an opportunity of seeing whether he ever had a gang or not under him? Oh, yes; I had plenty of opportunities.
9565. And you never knew him to have a gang? Never.
9566. Was Mr. M’Pherson present on pay-days? Yes; I never knew him to be absent—although he might have been absent one day.
9567. How could Mr. M’Pherson find out when this Pender was going up for his pay that there was a swindle? Well, if he saw Pender’s name on half-a-dozen other tickets he could see. It was only by mere chance that Mr. Burrowes would go over these accounts.
9568. Was Mr. Burrowes present on these occasions? No; he was always with Mr. Davies—he never appeared at the pay-table.
9569. This took place in March, 1888? Yes.
- 9569½. And you called attention to it officially? Yes.
9570. And no notice whatever was taken of it, except by reducing your pay? That is so. And Mr. Burrowes told me that it should never have been reduced.
9571. If Mr. Burrowes was such a good master, how was it that you did not get him to represent the injustice? He asked me to remain on the Park and he would get me something better. I said I did not care to remain where I was. They looked upon me as being dangerous, and thought I would tell Burrowes too much. They thought I had seen too much for them. That was my impression. When I was clerk there, I saw some discrepancies in the pay-tickets and pay-sheets. I had to make out the pay-tickets as clerk, and I had to make them out after the vouchers had been sent up to Sydney. I could not alter the pay-ticket, but I pinned a piece of paper to the bottom of the pay-tickets, where the discrepancies were. Before the next pay I got notice that my services would not be required any longer as clerk.
9572. Do you recollect what the discrepancy was? No. There were three or four. It was charging too little or too much; I forget which.
9573. Whom would it bring into trouble by your discovering it? I do not know that it would bring anybody. It might show carelessness on the part of Mr. Springall.
9574. From whom did you get notice of your dismissal? From Mr. Springall. The complaint was that he had too many clerks.
9575. *Mr. Waller.*] How is it that you have these ration tickets in your possession? Well, I used to get them at the pay-table. I had really never intended to keep them; but when I went up to Bulgo I found them there in my possession. I said, “Well, now some of these swindles of Springall’s are bound to come out yet, and I will keep them.” So I kept them until now.
9576. What was the proper thing to have done with these tickets? To have kept them or torn them up, just as I liked.
9577. Had you not to return them to the Board? No.
9578. You say that this man Pindar was drawing no rations—do you mean that he was charged for no rations? Yes.

9579.

NOTES (on revision) :—* Mr. Burrowes first told me to give Springall the £3, but on the following day told me to give it to him. † Witness states that he never said—from “and besides this, &c.,” to end of answer.

Mr. F.
Crossthwaite.
15 April, 1889.

9579. Do you mean that he was getting rations free? No; I don't mean that. I mean that Kidman would not get paid for the rations, although Springall received the money for them.
9580. Was Kidman the sufferer? I do not know that he suffered much.
9581. Was this man Pender getting rations? Yes; he was often sitting at the same table as I was.
9582. And you say that Kidman did not get paid for them? I do not say that he did not get paid for them.
9583. Were there many cases of this sort? They were quite common, I have heard it said.
9584. How could the rations be charged for if they were not supplied without suspicion being excited? Well, I do not know. I was thinking to myself it could be done. I believe there were always 20 per cent. of the men at the National Park who did not draw their rations every day. Now it would be very easy for Springall to send for 2,000 instead of 2,500. I knew of the scales for the weighing of the meat being wrong, and men not drawing rations being charged for them all the same. It might be that a gang of eight men would not draw rations and they would be charged for them. It would be easy for them to issue a return for the delivery of 2,500 rations and have only 2,000.
9585. What about the scales being wrong? When I was in Sydney one day I went to the station and got weighed, and I got weighed at Sutherland, and found my weight to be the same as at Sydney. That evening I was weighed on the meat scales and found there was 7 lb. difference. The scales were 7 lb. on the wrong side of the book for the people who were having the meat.
9586. Which way were you 7 lb. on the wrong side—heavier or lighter? I was 7 lb. heavier.
9587. You said just now that in your conversation with Burrowes he told you that “everyone from myself downwards” had to pay for rations;—was that exclusive of, or did it include himself? I would think it included himself.
- 9587½. Do you know of your own knowledge that none of these people, by the permission of the Board, were allowed their rations free? I never knew of any being allowed their rations free. I know they used some months before this particular work was commenced to receive their rations free.
9588. Who was this man who was talking to you to-day about Flemming? His name was Oscar; he was a tentmaker at the National Park, and also at Bulgo.
9589. Do you know where this man Oscar lives? I don't; he told me he lived in Balmain—that is all I know.
9590. Did he tell you that what he knew about Flemming he knew on his own account? No.
9591. And this man Nightingale who mentioned to you about Springall, who is he? He is a tentmaker also. He said that Springall told him to say nothing to me about Pender having been in his gang; and this Oscar that I met to-day was along with the tentmaker, Nightingale, and he also knew about Springall going to Nightingale and asking him to say nothing about Pender to me.
9592. Where is Nightingale to be found? He is at Bulli—working at the North Bulli mine.
9593. Are there any other men besides Nightingale, Oscar, and Pender who can tell us about these matters? These are the only three I know anything about.
9594. Where is Pender? He is up at Hurstville working with the unemployed still I presume.
9595. Do you say that Pender was on several gangs? I think it is very probable.
9596. What were the police doing? There were two police on the station. They used to go there and stop any disturbance that was going on. They were going to leave when the number of people was reduced.
9597. Were they in a position to tell the gangers by their faces? I should think so.
9598. They attended pays, I suppose? Yes.
9599. *President.*] Were you always a ganger? No; I was only a ganger for two or three pays, and then I was timekeeper at the same time.
9600. I see you are returned on these two papers “Crossthwaite, ganger”? Well, on the second of those it ought to have been overseer.
9601. *Mr. Franklin.*] What work were you doing as ganger? We were building a spur on the Port Hacking River to divert the current to cause more scour. There was a bend in the river there. It was rather wide and very shallow.
9602. How was that work done—by piece-work? They were paid 5s., and most of them 3s. 6d. a day. The gangers were getting 5s. per day. It was done by day-work.
9603. Were there many gangers working at 5s. per day? There were six gangers and thirty-eight men working at these rates.
9604. Do you know of any other gangers working on the same terms at 5s. a day? There were some working at quarrying getting 5s., but that was all at the time.
9605. Who laid out the work for the spur on the river? It had been done previously, but the wall had sunk, and we had to make it higher.
9606. How was that day-work supervised beyond the supervision that you, as ganger, would give to it? There was an overseer named Bastable, and I was his assistant at that time. Bastable would have charge of all these gangs. He was a hard-working man.
9607. How often did Mr. Burrowes visit the work? About once or twice in a fortnight.
9608. Did you remain there until its completion? Yes, I did.
9609. Can you give the date when it was completed? It was the 15th or 16th March last year.
9610. Was that work approved by Mr. Houson or Mr. Wells? I do not know.
9611. Did you see either of those gentlemen during the progress of the work? Yes, occasionally.
9612. Did they go to inspect the work? No; they never went on to the work to inspect it. Mr. Burrowes was the only one who did so.
9613. Do you remember how mattock contracts were measured out? Oh, yes. I was with the surveyor when that was done. I was with M'Pherson, Fraser, and Underwood.
9614. Were advances made to the gangs only on completion of the work, or on account? Oh, on account.
9615. And on completion, final payments were made? Yes.
9616. Did you ever hear of any of those works having been advanced upon or paid for wholly without having been finished? No; I never heard of such a thing. I heard of ganger having been paid twice over. His name was Martin. He received the money twice over and he cleared.
9617. Whose fault was that? It was M'Pherson's fault.
9618. Was it rectified? It was no use trying to rectify it—the man had gone. I remember where the work was computed, and it was paid the second time; but it was only a clerical error.

Frederick

Frederick O'Donnell called in, sworn, and examined:—

- Mr. F. O'Donnell. 9619. *President.*] What are you? I have no profession.
 9619½. What business are you in now? None at the present time.
 15 April, 1889. 9620. Were you in the employ of the Casual Labour Board? Yes.
 9621. When were you appointed? By the Casual Labour Board as soon as it came into existence. As soon as the Board was initiated I was transferred from the Roads Department to the Casual Labour Board.
 9622. Did you remain in their employ during the whole time of the Board? Yes.
 9623. Did you have anything to do with the Southern District? No; my work was all in the north.
 9624. Were you examined before the Select Committee of the Legislative Assembly on the 29th November and 11th December, 1888? Yes.
 9625. Is this your evidence? Yes.

[*Evidence before Select Committee.*]

1096. *Chairman.*] Are you the overseer in charge of the unemployed at Hornsby. Yes.
 1097. How long have you been in that position? I have been there since the Board was first initiated. I suppose it is something like fifteen or sixteen months since I went to Hornsby. Altogether, in connection with the Department, I have been about three years and a-half with the unemployed.
 1098. You went to Hornsby at whose instructions? At the Casual Labour Board's, when they came into power. Previous to that we went out by Mr. Deering's instructions. Then we got the Casual Labour Board's instructions to form a camp and stay there.
 1099. What you mean is that you were working on the ground before the Casual Labour Board came into existence, and that you continued there by the instructions of the Casual Labour Board? Just so.
 1100. What instructions did you receive from the Casual Labour Board as to the limits of your powers—what powers had you? I do not think my powers were very clearly defined, whether with reference to the Casual Labour Board or the other departments that I have gone through.
 1101. Had you the power of originating any roads? No; I have not the power to originate any road. I can suggest, or do something of that sort.
 1102. That is to say, you could recommend to the Board? I could recommend to the Board.
 1103. But did you ever, of your own authority, commence to form a road? I believe we started Junction Road on our own authority? Having the men there, we had to do something, and it was started. We got a line along Junction-street; that was partly started.
 1104. When you say we—? I mean the Department—ourselves working there.
 1105. Was that before the Labour Board came into existence? Yes.
 1106. When you say we, do you mean yourself? No; I had some authority.
 1107. What was the authority? I believe I got it from Mr. Davies.
 1108. Did you commence any road without authority from Mr. Davies, or from your superiors? No; I never did things of that sort. I might answer that at once. I have never started a thing on my own authority.
 1109. You must receive instructions before you proceed to do work? Yes.
 1110. Can you tell us how that road to the north of Burns Road and parallel with it was formed? It is what was termed the Mistake Road. We call it among ourselves the Mistake Road; that is, in camp. We had started along the road H H H to a point where there was a large tree, and we had instructions—from whom, at the present time, it does not come to my recollection—to start from a point in the continuation of this road E, and meet it, and an old fellow named Noonan was to show us the way; but instead of squaring it up, we ran across diagonally, so that we have termed it the Mistake Road.
 1111. Then is the plan incorrect? Yes; as it is here. I can show you better by a little sketch I have here. The road goes down and then up again. It was a mistake on our part.
 1112. Then these roads, as shown on Mr. Deering's sketch map, are inaccurate—road E does not run straight? No, the plan is not right; it is only a sketch.
 1113. That was a mistake originating with yourselves? Yes.
 1114. But have you any other mistakes of anything like that character? Not that I am aware of.
 1115. From whom did you receive instructions to construct the road parallel with the railway? From Mr. Davies.
 1116. And these roads in the form of a T and the continuation of the Boundary Road? From Mr. Davies.
 1117. And the road from Junction Road, near road B, to the south, leading to the hotel and platform? You mean across the railway.
 1118. To the hotel? They were got from the Casual Labour Board.
 1119. From Mr. Davies? From Mr. Davies or one of them. I know that I had instructions to do it, and I did it.
 1120. *Mr. Bruncker.*] I suppose the instructions from Mr. Davies would be from the Casual Labour Board? Yes, and in some cases the orders have been verbal.
 1121. But the orders would then come from the Casual Labour Board? Yes.
 1122. *Chairman.*] In carrying out your orders as to forming or ballasting, were exact instructions given to you as to the quality of the road you were to make, or anything of that sort? I do not know that they were. I was supposed to do the best I could.
 1123. Was it left to your discretion? Well, of course, they were there to examine it and see if it was satisfactory. They never said anything to the contrary, and I took it to be right enough.
 1124. But had you discretionary power to say whether a road should be simply cleared, or whether it should be formed? I only had the power to clear; then I got instructions to form and metal afterwards. I would not undertake to do anything of that sort.
 1125. Is the road running parallel to the railway formed? Yes; we are now forming it. It was partly formed before this inquiry commenced. 1126.

1126. You are now forming it? We have knocked off within the last few days. Since the answer was given to a question about the matter in Parliament the other evening, I had instructions to knock off the men. I left instructions on Monday, and I repeated them yesterday to the overseer in charge, to knock the men off until this inquiry was finished.
1127. That is, not to continue forming the road? Not to continue any work.
1128. Are any roads formed there in close conjunction with the railway, such as the continuation of Boundary Road? We formed Boundary Road.
1129. Is that road to the south of it, parallel with it formed? No; that is only cleared. Then you will understand that these roads were cleared half-way through before we did anything to them. I suppose there were about 11 chains on each side. We cleared the continuation of Boundary Road, and formed it, and tried to make a direct road of it because it leads to Crown lands.
1130. You found half done already? Previous to our going to it it was half cleared.
1131. And the small piece of road running up from Junction Road? We did not do that; that is private.
1132. Did not the unemployed work on that small bit? No.
1133. Are the unemployed working at all on Boundary Road now? There have been none working on Boundary Road for some time—that is, on the continuation of Boundary Road, not further along.
1134. Have you not been working there at all? Not recently.
1135. How far along Boundary Road have you got the road good and passable? It is pretty fair until you come to this street here, D.
1136. Is it not good up to the first gully? Not up to the first crossing. At this gully we came to an impracticable road.
1137. You can drive up to road D? Yes.
1138. Are you cognizant of how much land is owned by Burns, Withers, and Smith there? I have an idea now; but I had not at the time I gave the return to Mr. Brunker, which I am sorry for. I tried to get the information as best I possibly could at the time, and of course sent the return on with it.
1139. Is the answer then that you gave to Mr. Brunker incorrect? It was incorrect.
1140. That is to say, the second answer? The second answer was also incorrect, from the information we got.
1141. *Mr. O'Sullivan.*] You say that you never carried out any work whatever without receiving instructions from Mr. Davies, or from the Casual Labour Board? No.
1142. Therefore, you could never originate any of these roads yourself? No.
1143. Could you tell us how much these roads have cost to make—the total cost? I can give it you approximately—£2,079 7s.; that is the total cost of the work round about; and the total cost of all the work done at Hornsby by the Board is £6,265.
1144. *Chairman.*] When you speak of £2,079 7s., you mean the work done on the Burns-Withers' Estate? From the information we have got since we would say it is round about and in close proximity to this property.
1145. *Mr. O'Sullivan.*] Have you any idea of the length of the roads made there, to the south of the Crown Lands? Junction Road is about 2 miles, and the other road—Burns Road—about 1 mile 80 chains.
1146. Those two roads would come to 3 miles? Yes.
1147. Would 7 miles in length be too great for all the roads? All the roads together, so far as we have it approximately, are 8½ miles in length.
1148. Eight and a quarter miles represent all the roads constructed south of the Crown lands? All the roads; Government land is not included. That is private lands.
1149. Including road A, and south of it, what is the whole length? 8½ miles.
1150. I want to get the total length on the Burns-Withers' property? About 3 miles—2 miles on Junction, and a mile on Burns Road.
1151. You say 8½ miles for all the properties. I want to know what is the total length of Burns' property? ———
1152. *Mr. Brunker.*] Have you got the length of each road; give us a rough idea? Burns Road is 1 mile; Junction Road, 2 miles; A road about 25 chains ———
1153. *Mr. O'Sullivan.*] But there are 8½ miles south of road A. Deduct from that the roads on property other than that owned by Burns, Withers, and Smith; what is the length of those? This road I, leading to Pearce's Corner, we call a Government road.
1154. What do you call the H road? That we would also call a Government road. We would call the other roads on the Hornsby Estate about 8½ miles.
1155. What would you call the other roads, to classify them? They are on private property, so far as we know it at the present time.
1156. *Chairman.*] The roads on private property are about 8½ miles? Yes.
1157. On Burns, Withers, and Smith's Estate, 3½ miles? Yes.
1158. *Mr. O'Sullivan.*] Touching this extension of road E, not including the tributary portion, do you know who authorized it? Mr. Davies gave me instructions to do that.
1159. Did he state the object of it? He did not state the object of it, and it was not my purpose to question him.
1160. You got the instructions to carry out that road? Yes.
1161. And the same remark applies to the road running parallel with the railway? Yes.
1162. This road was carried out by Mr. Davies? Yes.
1163. And the road from the Boundary Road to the station by Mr. Davies? Yes. 11 chains were already cleared. But to qualify this, I may say that Mr. Davies told me to clear this road parallel, to throw it up, but I am making a good job of it.
1164. Finding that the owners of this Burns, Withers, and Smith's Estate had started these roads near the station, was not that an evidence that they were going to make them themselves?

Mr.
F. O'Donnell.
15 April, 1889.

Mr.
F. O'Donnell.
15 April, 1889.

- themselves? Of course it is evidence that they were going to construct the road, but it is not my place at any time to question any authority I may receive.
1165. How many men have you working out there now? At Hornsby alone about fifteen, but altogether I may tell you that at Hornsby and other places we have about 140.
1166. In the neighbourhood you have 140? Not in that neighbourhood alone.
1167. *Chairman.*] But fifteen men are on the roads on Burns, Withers, and Smith's Estate? That is what I would term it now.
1168. *Mr. O'Sullivan.*] Referring to Boundary Road, are you not now constructing a culvert down near the gully, near road C? We are doing nothing now.
1169. I mean last week; you were constructing a culvert where they are cutting out stone? That is at the end of the road. We are putting in drain-pipes there.
1170. Where you are making that culvert is at the continuation of the Boundary Road? Yes.
1171. In point of fact you are not working any men on Boundary Road at the present time? Not at the present time.
1172. Although the road has been cleared, you have not been working men there for some considerable time? _____
1173. *Mr. Brunker.*] You say that when you commenced work at Hornsby you were under Mr. Deering's instructions? Yes.
1174. Until the Casual Labour Board came into existence? Yes.
1175. When did you commence work under Mr. Deering's instructions? I have not got the date, but I can tell you the quantity of work.
1176. I would like to know when you commenced there; how long before the Casual Labour Board came into existence? I think about a fortnight before.
1177. You have never commenced any work without instructions? No; I never commenced any work unless I got instructions to do it.
1178. Had you at any time any communications verbal or otherwise with the owners of property in that locality? They have never said one word to me. Although I have asked Mr. Burns about the deviation he has never said one word to me about the constructing of the roads.
1179. Could you define to the Committee the work carried out by private owners before you commenced work there at all? They had a portion of Burns Road cleared, about 30 chains, then they had two culverts on Burns Road, and they had some work done near the station, and about 11 chains on the Railway Road.
1180. I think I understood you to say just now that whatever work has been done on the roads intersecting this portion near the station, has been done by the owners of the private property? I think we had about 11 chains to do on each of these roads. A fair part of it was done privately, and also on the road leading to the station.
1181. You were asked just now by Mr. O'Sullivan whether the fact that these roads had been opened up by the proprietors was not evidence that they were going to construct the road, or only that they were going to construct them? They were cleared.
1182. Can you swear that they were going to construct them, or that this was only to define the roads—there is a material difference? It was cleared and stumped.
1183. I want to know whether it was simply to define the roads, or to construct them? I do not know; that is not for me to say, of course.
1184. *Chairman.*] Was the character of the clearing of such a nature as to make you suppose that they intended to instruct roads there? I cannot go into the suppositions of people.
1185. *Mr. Brunker.*] You know something about the locality? Yes.
1186. You know the Thornhill subdivision;—those roads were stumped and cleared, but never made? They have not been done to the present time.
1187. Did you not find the same to have been done on the Hornsby Estate—that this clearing had been done simply to define the streets, and show buyers where they were;—I suppose you know that after the sale streets like these are left, and never constructed at all? Very true.
1188. *Mr. O'Sullivan.*] Still these roads being cleared in the way indicated by Mr. Brunker gave access to Crown lands; if they had only been cleared access would have been given to the Crown lands by them? If they had been cleared through.
1189. *Chairman.*] You carried them through? We commenced where they knocked off.
1190. *Mr. Brunker.*] You completed what they commenced? Yes; however, it is a benefit to Boundary Road, giving an outside opinion, because it now leads right through to Crown lands.
1191. Do you think the work you have done has assisted to improve the Crown lands? Most undoubtedly. It would only have brought £5 an acre. I would have had a lot of money myself to pay more than £5 an acre for it.
1192. *Mr. O'Sullivan.*] If this estate had been your property and you intended to sell it to the best advantage, would you not have laid out roads there, and cleared them in the way indicated by Mr. Brunker, in the usual way of subdividing estates? I do not think that is a fair question. I might put the roads different to what they are on the plan altogether.
1193. Granting that you would put them where you pleased, would you not have subdivided the estate and cleared the streets to give frontages and corner blocks? If I were going to submit it to public auction.
1194. You would have done so? I might have done so; but I am not to surmise what other people would do.
1195. *Mr. Brunker.*] Assuming that this estate was your own, would you have subdivided it in that form for sale? I am not sufficiently a surveyor to answer that question.
1196. Have you ever seen a property subdivided in that form for sale? No.
1197. *Chairman.*] Did you ever see property with gullies running through it in such a number,

number, and requiring roads between the gullies like that before;—would not the peculiarity of that property, with those gullies running through Boundary Road, have a good deal to do with your decision in making your subdivision? That would have to be taken into consideration in dividing in every case; no doubt of that.

Mr.
F. O'Donnell.
15 April, 1889.

1198. *Mr. Brunker.*] Is the loss of that land, by way of roads, under this form of subdivision, much greater than it would be under an ordinary form of subdivision? —

1199. *Mr. O'Sullivan.*] These roads have been laid out in the best way possible to avoid expense in constructing them? That is true.

1200. To avoid gullies and steep places? Yes.

1201. Then the owners of this estate if they had subdivided and cleared roads—if you had been the owner of this estate you would have proceeded on the same policy? I daresay I would.

1202. Then, pursuing that policy, your plan would have been very similar to this? I cannot see that it necessarily follows that way. I cannot see what you are driving at.

1203. You admit that these roads have been laid down to the best advantage, and to avoid running through the creeks and gullies, and to avoid unnecessary expense in construction, and you admit that if you had been the owner of a private estate you would have proceeded on exactly the same policy? I daresay I would.

1204. Then your plan must of necessity be very similar to this, because you admit these roads to be constructed on a sound plan? Yes.

1205. Have you been in sole charge of the men during the last twelve months? I have.

1206. Has Mr. Gordon been in connection with you in this work at all? No; from time to time we received sketch plans from him.

1207. He has not been on the ground? He has been on the ground several times; but I have not seen him. He has been there quite recently, I forget on what occasion; but I was not there.

1208. *Chairman.*] And how long before that was it since he was there? It must have been some months since he was there. He and I are not the best of friends.

1209. *Mr. O'Sullivan.*] And you do not throw yourselves in each other's way? No.

1210. Has Mr. Houison been up there within five months? He has been there once within the five months.

1211. Has Mr. Gordon been in command and in control of these works during the last twelve months? No.

1212. And Mr. Houison has not been in command or control of them during five months? No.

1213. *Mr. Brunker.*] You said just now that the object you had in view in making these roads was to give increased access to the Crown lands? Yes.

1214. Supposing you had not had that object in view? The Crown lands would have been no use at all.

1215. Would you have adopted the same form of subdivision. The land is very uneven on the surface, and you have formed the road so as to fall in with the inequalities of the surface? Yes; but I am giving you an opinion now. It is quite unnecessary to do so. I have got the instructions to do these things, and I have done them. When you come to ask me for a professional opinion—I am not a surveyor or could I give one.

1216. We only ask for a practical opinion with regard to the access. You say that £6,265 have been expended? Yes.

1217. And the cost of improving and making the roads on private property is £2,079, so that on the Crown land £4,186 have been expended? Yes.

1218. I think I have gleaned from your evidence that you have not an accurate knowledge of the owners of these properties? No, I have not an accurate knowledge of the owners.

1219. And you really do not know now whose properties you have intercepted? I would be sorry to take an oath and say whose properties they were.

1220. You really do not know? No, because we were never supplied with a district map.

1221. You have heard something of this property of Harnett's, but you really do not know to whom the land belongs? Now I have some knowledge. I thought at one time that Mr. Burns was interested about the land; but I could not say that authoritatively.

1222. Your want of knowledge of the private ownership of this land will account for the mistake you made in furnishing me with that report you sent to me the other day, and from which I furnished the House with a reply to a question? Yes; I think I have already acknowledged that.

1223. *Chairman.*] You say that £2,079 represents the amount spent on roads on private property? On what we consider round and about private property.

1224. Do you mean by private property the private property of Burns, Withers, and Smith? And other private owners.

1225. These roads running to the south of Junction Road are included in the £4,000 you mentioned? Yes.

1226. Do they not run through private property? Yes.

1227. Those roads running through private property are included in the £4,000? Yes.

1228. *Mr. O'Sullivan.*] If you only spent £2,079 7s. on private roads, without including these running to the south of Junction Road, that amount has been spent on roads on Burns, Withers, and Smith's property, where have you spent the other £4,000? On all the Crown lands on the other side of the railway, and to the north of Boundary Road.

1229. That work is not shown on the map? The work would be on the other side at Peat's Ferry Road, where there are Crown lands, and 3-acre blocks formed.

1230. It has cost £4,000 for one side? It has cost £4,000 for all the Government lands outside the private estate.

1231. *Mr. H. Clarke.*] Are those roads on the Government estate cleared? Yes.

1232. And ballasted? No, not ballasted.

1233.

Mr.
F. O'Donnell.
15 April, 1889.

1233. They are not ballasted on the Crown lands? No, merely cleared and formed.

1234. I noticed the other day when I was out that you had taken away a lot of undergrowth on Crown lands? Yes.

1235. *Chairman.*] Mr. Brunker just asked you, in reference to the roads on private property, would not the value of the land given more than compensate for the roads that were made;—as a matter of fact, does not the number of roads on that property increase its value? I should imagine it does increase the value; but you have to get access.

1236. But did you recommend any of those roads? Not that I am aware of.

Frederick O'Donnell recalled and further examined, 11th December, 1888.

2395. *Mr. O'Sullivan.*] We wish to ascertain from you the total cost of the work which has been done upon the Crown lands? I could give you the amount approximately. I could not give you the exact calculation. The calculation I gave you the last time I was here was almost correct, as far as we knew. I suppose the whole cost of the work would be £6,500, or about that. It may come a little over that sum. That would cover the whole of the roads upon the Crown lands.

2396. That would include the Hornsby Crown lands subdivision, and the whole of the lands embraced within the yellow margin, showing the private property of Messrs. Burns, Withers, and Smith, and other owners? Yes.

2397. But take the Hornsby subdivision, to which these roads give access;—how much of the £7,000 has been spent upon that portion of Crown lands which was offered for sale? I should think about £4,500. We have spent at Hornsby altogether £6,000 odd. We reckon that the roads on the Burns, Withers, and Smith's Estate would cost about £2,300.

2398. You say that out of £7,000 spent upon the work of the unemployed at Hornsby, £2,300 only has been spent upon private property? Yes.

2399. Then are we to understand that the remainder of the £7,000 has been spent entirely upon the Crown lands? Yes; on each side of the railway.

2400. What has been done to the Crown lands to cost an expenditure of £4,000? Well, I have given you the expenditure according to our books. Under-scrubbing cost us in the first place £3 an acre, that is the average price, I believe, and the roads have cost between £7 and £8 an acre.

2401. How many acres of roads are there? There are about 5 or 6 miles of roads.

2402. The figures you have now given for under-scrubbing and for making the roads would bring the total up to only £1,220? Well, all I can say, is, that the £4,000 has been spent upon the Crown lands in the Hornsby neighbourhood.

2403. How many miles of roads on the Crown lands have been metalled? In some places they had been cleared and formed, and in some places they had only been cleared. I think there would be about 2 miles of roads which are only cleared. The remaining 3 miles of roads would be cleared and formed, none of them metalled.

2404. The average price of the work is £8 an acre? Yes.

2405. Then where has the rest of the £4,000 gone to? I cannot give you a better idea than I have already given as to the expenditure.

2406. How are we to reconcile your statements as to the expenditure then? I cannot say exactly what roads have been made upon the Crown lands. Since this inquiry commenced we have been more particular in ascertaining the expenditure which has been made upon the lands of Burns, Withers, and Smith. We did not anticipate that the inquiry would extend to the Crown land. I think if my surveyor, Mr. Little, were summoned he would be able to give you the information you desire as to the Crown lands. The only thing that we have been doing latterly has been to get a correct estimate of the expenditure on Messrs. Burns, Withers, and Smith's land. We have had some difficulty in ascertaining to whom the private lands belong. Hitherto we have been in the dark all the way through as to the ownership, and I could not tell you now exactly the boundaries of the estate of Burns, Withers, and Smith.

2407. Is it not extraordinary that the forming of all these roads upon the estate of Messrs. Burns, Withers, and Smith should have cost only £2,300, while the roads which have been made upon the Government land, none of which have been metalled or culverted, should have cost £4,000? * Well, there are two bridges to be taken into consideration, one on the Boundary Road, and the other a little lower down.

2408. *Mr. Copeland.*] But the bridges on Boundary Road would not be included in the Crown lands expenditure? Yes; there are two bridges on the Crown lands upon which money has been expended.

2409. How many men had you employed upon these roads at the time the inquiry commenced? We had fifteen; but after the Committee paid their visit of inspection to the land these men were taken off the work.

2410. Do you remember informing Mr. Brunker and myself upon the ground that a fortnight previous to our visit you had as many as eighty men employed there? I cannot recollect saying so; but I may have said so. But that would include all of my men in the neighbourhood.

2411. That is what you told Mr. Brunker and myself upon the ground? I will not dispute it. I was only speaking roughly. I find that we never had eighty men there at any one time. If I said there were eighty men at work, it was meant to include the whole of the men on other works, besides the roads in question.

2412. You remember Mr. Brunker and myself asking you how many men you had employed there at that particular time, and you saying fifteen? Yes. 2413.

* NOTE (on revision):—The £4,000 includes work of clearing and subdividing Crown lands, and other works in the neighbourhood of Hornsby.

2413. I think Mr. Bruncker then asked you how many men you had had employed there a fortnight previously, and you said eighty? I may have said so. I find that in May, 1887, when we first started there, five men were sent to work. That was according to Mr. Deering's instructions. In June, 1887, we had only 8 men; in July, 8; in August, 12; in September, 19; in October, 16; in November, 20; in December, 16; in January, 1888, 48; in February, 39; in March, 55; in April, 55; in May, 44; in June, 43; in July, 42; in August, 65; in September, 32; in October, 27; and in November, 15.

Mr.
F. O'Donnell.
15 April, 1889.

[*End of Evidence before Select Committee.*]

9626. *President resuming.*] Was that evidence submitted to you for revision? It was.

9627. Do you wish now, having heard it read over, to make any correction or explanation? Since I gave this evidence I have got a more correct estimate of the cost altogether than what I gave. The cost of all the work in the Hornsby district is, as nearly as we can get to it, £6,329. About private lands £3,700 has been expended, including cuttings, culverts, drain-pipes, &c.; and on the Government land, £2,629.

9628. With that exception, is your evidence true and correct in every particular? Yes; so far as I can see it.

TUESDAY, 16 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

James Flemming called in, sworn, and examined:—

9629. *President.*] Do you know Mr. Springall? Yes, I do.

9630. Have you had many quarrels with him? Sometimes I had; sometimes I had not.

9631. What did you quarrel about? When he bored me for doing something which was not right.

9632. What was that? When he rowed me that I did not do so and so, and did not look after so and so.

9633. Did you have any other quarrels? No; he would say, why do not you look after the tools and so on.

9634. Has he been kind to you? Sometimes he was; sometimes he was not. He was kind to me in many cases. I never found him a foe.

9635. What were you before you met him? I was invalided in Sydney—in George-street.

9636. In the hospital? I was under medical aid.

9637. Who paid the expenses? Myself.

9638. How did you earn the money? I earned it as an engineer.

9639. What else have you been besides an engineer? I can hardly tell you what I have been.

9640. Have you been anything else but an engineer? I have been a fencer; taking up a contract to fence at Junee.

9641. Have you been in any Government office? No.

9642. Are you a good scholar? I cannot say I am. I wish I was.

9643. Will you write your name on this sheet of paper? I am bad with sciatica. [*Witness writes his name as requested.*]

9644. How did you first come to know Springall? When I met him at the National Park, on 2nd May, 1887.

9645. Are you sure it was May, 1887? It was at the time of the big rush from the Queen's statue.

9646. Have you ever been to sea? I have been to sea; I have been to the Brazils.

9647. What were you at sea? Only a passenger; not a seaman.

9648. Who brought you in here this morning? The train did from Sutherland.

9649. Who took you to Sutherland? Mr. Springall and his daughter.

9650. What were you talking about coming in? I never spoke at all. I do not think I talked to anyone.

9651. Not all the way? No; I do not think I had a word until I came here.

9652. What time did you get the summons to attend here? At half-past 7 o'clock last night.

9653. Have you had any talk with Springall since then? Not the slightest. I did not know anything about it until I got the summons.

9654. Did you not know that we were sitting here to take evidence? I knew nothing about it.

9655. Did you ever have anything to do with a horse? Never. Not the slightest.

9656. Do you know a gentleman named Burrowes? I do, perfectly well. I cut wood for him, worked for him, and took charge of his horse at Hurstville.

9657. Then you have had something to do with a horse? I have. I was looking after Mr. Burrowes' horse.

9658. What else did you do? I gathered together all the Government tools.

9659. What else? That was my principal employment. I said the same thing to the constables who were with me last week.

9660. Who were they? They were two detectives—I know they were—who took down everything in writing.

9661. Who told you? A joiner from Sutherland told me they were detectives.

9662. What were their names? That I do not know.

9663. Had you ever seen them before? Not to my knowledge.

9664. What did you do besides looking after a horse? I cut wood, emptied out the railway trucks, and carried the things up to Mr. Burrowes' house.

9665. Did you ever have any men under you? Yes. Sometimes thirteen or fourteen.

9666. Do you recollect any of their names? I recollect all their names, excepting the blacks, and those I cannot recall.

9667. Can you tell me any of the names? James Ramsay, Robert Dick, who is living in Balmain, and Wheaney.

9668. Were those men under you? Yes.

9669. Were you their ganger? Yes.

9670. Then they were in your gang? Yes; sometimes I had fourteen.

9671.

Mr.
J. Flemming.
16 April, 1889.

- Mr. J. Flemming,
16 April, 1889.
9671. Was that the number you generally had? No; sometimes eight, ten, or seven.
 9672. And sometimes fourteen? I have had fourteen to be sure.
 9673. Would you know any of these men if you were to see them? I think so.
 9674. Would you know Ramsay? I would.
 9675. Would you know Robert Dick? I would. He is a Scotchman. The last time I paid him was in the goods shed at Sutherland.
 9676. Did you always pay him his money? I did. I paid him his money honourably every month.
 9677. How long were you working as a ganger? Ten or twelve months.
 9678. Had you any relatives amongst the unemployed? No.
 9679. Were there any other persons that you knew of the same name as yours? There might be.
 9680. In your district? Not to my knowledge. I heard there was someone named Flemming about the Waterfall.
 [President. Call in Robert Dick. Robert Dick called into the room.]
 9681-2. Who is that (*pointing to the man called in*)? That is Robert Dick. That is the very man.
 [Robert Dick withdrew.]
 9683. Tell me about him? He was a cook at Sutherland—Loftus; I paid him his money.
 9684. Was he in your gang? Yes.
 9685. Did you collect the money and pay it to him? Yes.
 9686. When you were looking after the horse, were you a ganger? Yes; all through. I used to lift the money for these men. They were all odd men.
 9687. How much used you to get a fortnight? It was always on the back of the slip. Sometimes £15 or £16; sometimes £10 or £12.
 9688. Did you ever get £20? Yes; about Christmas when we were all working there.
 9689. What did you do with it? Paid my men with it.
 9690. How much did you get out of it? I got nothing but my wages.
 9691. How much was that? 3s. 6d. a day.
 9692. Where did you get your rations? At Hurstville.
 9693. Always? No, not always. At Sutherland and Loftus.
 9694. How long is it since you have taken an oath? Thirty-six years.
 9695. You have not forgotten the value of it? I know the value of it.
 9696. Did you always pay away the money you got? Yes; all excepting my own wages.
 9697. Where do you say you got your rations from? Sometimes Sutherland and Loftus when there.
 9698. Do you recollect when Mr. Springall came up here for examination? No.
 9699. Did you ever give Mr. Springall any money? Yes; I gave him my wages after my wife died.
 9700. How much altogether? £22.
 9701. How do you know? I kept an account.
 9702. Where is the account? I always said "that makes so much," and "that is so much." He asked me about three months ago if I would lend him the money. I said, "Yes, you can have it." He said, "I cannot afford you a percentage." I said, "I shall not want it." My wife died in September; I had no place, and gave it to him to take care of.
 9703. How long were you at the National Park? From May, 1887. I might be there about twelve months.
 9704. Where did you go to then? I came down to Hurstville. I had a gang of six men. I could not come down before Hodges took charge of the place. I was taking charge of the tools.
 9705. What was your number? I had two numbers; seventy-two was one number; what the other one was I cannot say—I know seventy something was my number.
 9706. How many men, as a rule, did you have in your gang? I had twelve or thirteen; perhaps fourteen.
 9707. Do you know Mr. Bell? I do.
 9708. Were you ever working under him? Not fully.
 9709. Do you know the Heathcote works? No.
 9710. Were you out there? No; but I lifted the money for the men at Heathcote.
 9711. Why did you go to Heathcote? To get the money for some of them who were on the road there.
 9712. How far away was Heathcote? Heathcote was not far from Sutherland. I could not tell you how far. Some of them would have half a mile and some 2 miles to walk.
 9713. Were you only 1 mile away? 2 miles or 3. The men were all over the roads; everywhere. Some were in Loftus; some in Sutherland.
 9714. Tell me the number of men you had in your gang at first? I had fourteen at first.
 9715. Was Robert Dick in your gang at the first? No; he was a ganger himself then.
 9716. Was he in your gang when cooking at Loftus? Yes.
 9717. For how long? For two or three months. I cannot say how long.
 9718. Do you recollect what month Dick was put into your gang? I cannot say.
 9719. Was it in 1887? It was some time in 1887.
 9720. Was he there in 1888? I won't mistake myself. I cannot say.
 9721. Not the year? No; he was not two years in my gang.
 9722. Was he in your gang at all? Yes.
 9723. Was he there between 1887 and 1889? Yes, he was. He was in my gang until he came to Como.
 9724. Were you at Woronora River Road? No.
 9725. Were you working on any road? No.
 9726. Did you ever do any stone-breaking? No. I lifted the money for the men that were stone-breaking.
 9727. How much have you paid Springall altogether? Between £21 and £22, in instalments.
 9728. Has he paid you back? No; he asked me about two months ago would I lend it to him. I was going away to Dubbo.
 9729. Did any of the other men pay him money? Yes; he used to get money from different men.
 9730. How much? Sometimes £2 or £3.
 9731. How much altogether? I cannot say. I never looked after any one else's business.
 9732. Where are you now? I went with him. I was going away after Mr. Springall took the horse away. I asked Springall if he was going to move to an hotel, and I said I was going away to Walgett.
 9733. What are you doing now? I asked him if he would give me the place I hold in his stables. I am stableman for Mr. Springall.

Mr.
J. Flemming.
16 April, 1889.

9734. What is he paying you? £1 a week.
9735. When did you get it? I have not got it yet.
9736. How long have you been there? About three weeks.
9737. Have you been at Springall's since you left the employ of the Board? Yes.
9738. Did he ask you to go or did you ask him? I asked him, as I was not able to travel.
9739. *Mr. Franklin.*] You were a ganger at the camp? Yes.
9740. Over what men? Different men. I had Irishmen, Scotchmen, Turks, blacks, and heathens.
9741. You certified to the work they did? Yes.
9742. And their work was situated all over the camp? Yes; 2 or 3 miles away.
9743. During the time you were ganger, were you taking charge of the horse? Decidedly not. I was never in charge of the horse until Mr. Burrowes went to Hurstville.
9744. Was that about May last? Yes.
9745. May, 1888? Yes.
9746. Since then have you remained at Hurstville? Yes.
9747. Have you had anything to do with gangs afterwards? Yes; I always had.
9748. After you went to Hurstville, had you anything to do as a ganger? Decidedly I had. I lifted the wages for all the straggling men.
9749. Did you give in any measurements? I got it on the back of the slip.
9750. As a ganger you did not certify to the work they did? No.
9751. Who did? Someone would certify to that. I got their names on the back of a slip, and how to divide the money amongst them.
9752. Did you take the money away? Yes; the money was on the table for me. I paid them all afterwards.
9753. What time were you usually paid? 11, 12, and 1 o'clock.
9754. After you got the money, did you walk 3, 4, or 5 miles? I came to Sutherland and paid the first man there. Sometimes the men met me at Loftus Junction, and I paid them on the platform.
9755. Did you get their signatures? No. I gave them a slip with their names attached to the back of it.
9756. Did you pay the money in the presence of any person? No; I cannot say that I did.
9757. How often did you pay them at Sutherland Station? Five times.
9758. Did the station-master see you pay them? No, certainly not. He was not a witness; nothing of the sort; we never had a witness to any of it.
9759. Are you the Flemming who attended to Mr. Burrowes' horse? Yes.
9760. Will you sign your name again? Yes. [*Witness again signed his name on a sheet of foolscap, for comparison.*]
9761. Did you ever have any disputes with the men as to the money you paid them? I never had any disputes with any one.
9762. Did you ascertain the quantity of the metal the stonebreakers broke? Yes; the paying clerk gave it to me.
9763. Then as a ganger you knew the number of yards you were paying for? Certainly, and the price.
9764. You say you never had any disputes? Never the slightest. Every man I had I paid honourably. I had them from the time of the Jubilee. The Jubilee was the time I went as a ganger.
9765. Did Mr. Burrowes know that you were drawing this money? He must have seen the sheets, certainly.
9766. Did he make out the pay-sheets? Decidedly; it was his business to do so.
9767. After you went to Hurstville, did you give up the gang? No, I did not.
9768. Did you go from Hurstville each pay-day? Yes; and Mr. Burrowes gave me a pass right through to lift the money for the men, because they were scattered all along the line.
9769. What work are you doing now at Coronulla Beach? My work is in the stables.
9770. Are there any horses there? Yes; I had five yesterday.
9771. If you could have got your money from Mr. Springall, would you have left immediately? I never asked him for it. I think I would get it any time I asked him for it.
9772. Is he flush of money and able to satisfy you? I do not know. That is a question I could not answer.
9773. *Mr. Waller.*] Why was it the gangers did not get their rations? I got rations, decidedly.
9774. Did all the gangers? I got rations right through from Johnson for all my men when I was at Sutherland.
9775. Did you get them at the other store? No; the men went up to Ottley.
9776. Who drew the rations for the gangers? The ganger himself drew them.
9777. Was the ganger responsible for the rations for the gang? The ganger could not be responsible. Sometimes the men would be away at Sydney for a week disporting themselves.
9778. Would a ganger then be handed the rations for his gang? No. Why should a ganger be responsible for the rations?
9779. How long were you a ganger when you were at work under the Board? I was a ganger up to New Year's Day last, from Jubilee, June.
9780. To when? To Christmas week, 1888.
9781. Where was your gang working? All over the Park; everywhere; some here and some there about the place.
9782. Had you the same gang all the time? No, certainly not.
9783. Different men? I had different men in all the places.
9784. Had you more than one gang at a time? I had only three men who stuck with me right through.
9785. Had you more than one gang of men working for you at the same time? No, decidedly not.
9786. Who knew you had that gang? I suppose Mr. Burrowes knew it. I do not know who should know it. I am not keeping the books.
9787. Then could any man get paid for a gang and no one know whether he had a gang or not? It would be a strange thing if they should not know that I was a ganger when I was taking the money.
9788. Who would know whether you were a ganger or not? Mr. Burrowes should know, Mr. Springall should know, and the whole party.
9789. Who is the whole party? Those engaged with him.
9790. Is it possible that Mr. Burrowes did not know that you were a ganger? Mr. Burrowes did not interfere with them in the making of the gangers.
- 9791.

- Mr. J. Flemming.
16 April, 1880.
9791. Who did make the gangers? The men made their own gangers.
9792. Were the gangers paid more than the other men? Yes; 6d. more, for looking after the tools.
9793. Did the superintendent know who were the gangers? Some knew, some did not.
9794. Did Mr. Bell know his gangers? I did not know Mr. Bell. He came at the latter end of the establishment.
9795. Were you on Mr. Bell's pay-sheet? I know I was on his pay-sheet.
9796. Why? I do not know that. I was on his scrub; I was at Heathcote.
9797. How do you know you were on his list? I do not know.
9798. Were you on his pay-sheet? I do not know.
9799. Were you on anyone's pay-sheet? I was, but always at Heathcote-Sutherland.
9800. You did not know then, and you do not know now, whose pay-sheet you were on? I do not know—I swear I do not know whose pay-sheet I was on.
9801. Why did you go to Heathcote to be paid on Bell's pay-sheet if you did not know you were on it? Because there were some of my men working at the Junction, and I had to pay them coming down.
9802. Why did you suppose you were on his pay-sheet? When I was at Heathcote I always went to Heathcote. I had three men stone-breaking, and paid them coming back.
9803. Why should you suppose you were on the pay-sheet? I could only suppose I was.
9804. How did you get the money? I got it on the pay-sheet at Heathcote.
9805. Will you tell me who told you to go to Heathcote? I went to Sutherland, where I was usually paid, and I was told that my money was not there for me, and that I had to go to Heathcote.
9806. Who was the clerk? I do not know his name. He was the oldest pay-clerk there was.
9807. What month was that? I know the year.
9808. What year? Last year. At Johnson's camp I said, "My name has not been called." He said, "No, you are on the Heathcote list." I never went more than once.
9809. How often did you go to Heathcote? Twice or three times. I went to Loftus and Sutherland.
9810. Why did you go to Loftus and Sutherland? Because I was employed there personally.
9811. Were you paid at the Heathcote pay-table in August or September, 1888? I daresay I was; I did not take note of it.
9812. Who attended the Heathcote pays? I was paid by the clerk.
9813. Did Mr. Bell attend? I do not know anything about Bell. I never had anything to do with him.
9814. Did Mr. Bell attend the paying of the men at Heathcote? Sometimes he did and sometimes he did not.
9815. How often did he attend? I cannot say. Dozens of times I should say.
9816. During the dozens of times you were there getting paid, did you see Bell frequently? I saw him every day on the platform.
9817. How often were you paid there? Two or three times.
9818. What were you there dozens of times for if it was not to get paid? I cannot say. I saw him dozens of times. I could not if I was not there.
9819. You were only paid there three times? I cannot say how long I was paid there. I cannot keep these things in my head.
9820. You must know how often you were paid? I do not.
9821. Were you grooming Mr. Burrowes' horse at the same time you had the gang? Yes, at the same time.
9822. Did you get extra for grooming the horse? No; nothing but my regular pay.
9823. You never got paid for yourself alone? No; I only received this money for them.
9824. Do you see this pay-voucher [*Exhibit J 2*]? Yes.
9825. Whose name is that? That is Flemming.
9826. Whose signature is there? That is not my signature, as far as my opinion goes. It is not my "J"; but it is like my "F."
9827. Is that your signature? It is like my "F."
9828. Answer me? It is like mine, but I have a doubt about it.
9829. Look at this pay-sheet [*Exhibit J 1*];—is that your signature? Yes, that is mine.
9830. Do you see a signature on the pay-sheet 26th August to 8th September? Yes; that is mine.
9831. Do you see this sheet [*Exhibit J 4*]; do you see the name at the bottom;—whose is that signature? That is mine.
9832. Do you see this pay-sheet [*Exhibit J 3*]? That is right.
9833. Look at this pay-sheet [*Exhibit K*];—do you see your name there? That is right.
9834. Now I have shown you five pay-sheets from Heathcote? There is one signature there I doubt.
9835. You said you were only paid there two or three times? Of course, I could not say exactly.
9836. Did you say just now that Mr. Burrowes used to send you out himself to get your money? Yes; and he gave me a pass on two occasions.
- 9836½. Did you tell him what you were going for? Yes, certainly. He has seen me being paid at Sutherland. He walked into the office whilst I was there.
9837. Did Bell know you had a gang? I do not know Bell. I never had any correspondence with him in any case. I did not know him until lately. All I know is that he has a lot of men there digging gardens and running about.
9838. What were the duties of a ganger? To see that he received the money for the men, and that the tools were returned to the office.
9839. Did he look after their work? No; there was a manager for that. The gangers never looked after the works.
9840. Who had the right to look after the gangers? The surveyors. There were Mr. Burrowes and Mr. M'Pherson. Those were the men.
9841. Who was the surveyor you, as a ganger, were working under? There was an old man who was there surveying constantly.
9842. What was his name? I cannot remember.
9843. Was it Smith or Sanderson? Yes, it was Sanderson. He was there surveying the ground.
9844. Looking after your gang? No.

9845. Who was looking after your gang? No one excepting myself. We belonged to the camp.
9846. What camp? The Sutherland Camp.
9847. Was there not an officer of the Casual Labour Board whose duty it was in the different districts to keep the tally where there were gangers, and would the gangers work under him? There were such officers.
9848. Who was the officer in the district in which your gang was working? We had three or four.
9849. Give their names? A gentleman called Brighton, who made the roads and laid out the streets.
9850. I want to know the responsible officer in your district, where your gang was working, who knew about you and your gang? We had no other. We had no responsible officer, only him.
9851. During the time you were a ganger, did you on every occasion pay this man Dick his money? Up to the time he left the gang I did. The last time I paid him was in Sutherland.
9852. Will you swear that Mr. Burrowes knew that you were a ganger in charge of a gang at the time you were grooming his horse? I do.
9853. Was there any other officer of the Board you can swear knew it also? That man Dick knew it.
9854. He is not an officer? Mr. Springall knew it.
9855. Anybody else? Mr. M'Pherson could prove I was.
9856. *President.*] Were you ever at the Waterfalls? No; I have never been there.
9857. Are you quite sure? I am sure I have never been at the Waterfalls.
9858. Look at this pay-sheet from 14th August to 27th August, 1887. Is that your signature? No; I have never been there. I have never received one sixpence of money there.
9859. Were you at Sutherland, Loftus Road, from 17th June to 30th June? Yes; I was at the three stations.
9860. Is that your signature? Yes; that is mine.
9861. Were you ever in a gang? Yes; in Byrnes' gang.
9862. How long? Three weeks.
9863. Were you in any other gang? No.
9864. Were you ever in a gang under Baker? No.
9865. Do you know Johnson? Yes; he was storekeeper.
9866. Did you ever get rations direct from him? Yes.
9867. Did you ever get them direct from Sydney? No; I never knew them come direct.

Mr.
J. Flemming.
16 April, 1889.

Robert Dick was then called in, sworn, and examined:—

9868. *President.*] Do you know Flemming who has just gone out of this room? Yes.
9869. Were you ever in his gang? Never.
9870. Did you ever work under him as ganger? Never.
9871. Did you ever receive any money from him? I got my wages from him for a couple of months, or something like that.
9872. What money was that? I was cooking, just below Loftus, where the surveyors were; I cooked for thirteen there. I was ganger for some twelve months, and he drew the pay for me as cook.
9873. How often was that? I suppose for a couple or three months.
9874. How many times? Once a fortnight I think.
9875. Who was it gave Flemming the money? Mr. Springall.
9876. Where did he collect it from? He went on the pay-day up to the office and got it.
9877. Were you ever in Flemming's gang? Never. He might say he was ganger, but I never worked under him.
9878. Who was Flemming? The only thing ever I saw him do was sweeping up and cleaning the tents, and when any men left he took the tents up to the stores, and when they did not keep a watchman or person there he went to carry water there.
9879. Was he ever stone-breaking? I do not think it. I never saw him working at anything but cleaning the rubbish from the tents. He once had a gang of four or five there; blacks and foreigners.
9880. Why was it he got your money? Because I could not go for it myself.
9881. You were not in his gang? I never considered myself in his gang. The man who cooked got on the spree, and I was sent up there.
9882. When Flemming went for your money, what pay-sheet would you be on? I really could not tell. I was kept on the same sheet for a long time before I was sent down there. When once I was put on as cook it broke up the gang. The time I was ganger I was at Loftus.
9883. Were you ever at Heathcote? I was at Heathcote.
9884. Did you get money there? No, only at Sutherland.
9885. When did you leave? It is six or eight months since I left the Park altogether.
9886. What month last year was it you left? I really forget just now. I left it to go to George's River.
9887. Cannot you tell us when? I cannot. I was ten months there, and four or five months cooking there.
9888. Where did you get rations from? From Johnson. It was me that drew the rations always.
9889. Did you ever sign pay-sheets yourself? Oh, yes, for twelve months.
9890. Do you recollect when you first went out there? Yes; it is two years since I first went to the Park.
9891. Did you sign the sheets yourself for twelve months? Yes.
9892. Who signed them afterwards? The man they put to be ganger in my place.
9893. Who signed the sheets after that twelve months for you? I had nothing to do with them after that. After then, Flemming generally gave me my money.
9894. Did he sign for you? He gave me the money.
9895. How often? For two or three months.
9896. Now, did Flemming collect the money for you, or because you were in his gang? He said he got it for me and two or three others; he was put over as ganger, but I never worked under him at all.
9897. How did you know you were not in his gang? I never worked with him. I was cooking all the time he was giving me the money.
9898. You might have been in his gang and not have known it? I might.
9899. Do you know any other men who were working with Flemming? I do not know their names. There were a Russian or two, and there was one who was said to be a Turk.

Mr. R. Dick.
16 April, 1889.

- Mr. R. Dick. 9900. How many men did you have? On an average, eight or nine.
 16 April, 1889. 9901. What were you doing? Scrubbing and mattocking sometimes.
 9902. What was Flemming doing? He was looking after the tents at the time.
 9903. What were the men he had under him doing? Something similar.
 9904. Did you ever make up Flemming's pay-sheets? Two or three times.
 9905. Why? He could not do it himself.
 9906. Why? He could not divide the money.
 9907. When you made up the pay-sheets, did you put your money in? No; it was on a piece of paper he had himself.
 9908. *Mr. Franklin.*] Who took your time for the pay-sheets? Mr. Reeves generally.
 9909. Did they take your time every day? Yes; sometimes twice a day.
 9910. When the time was taken, did you not know whose sheet you were taken on for payment? Well, it was Reeves who took the time.
 9911. Who gave the daily time during the fortnight and gave it into the office? A man of the name of Christy for a long time. When I went there first it was a German.
 9912. You know the time was taken regularly to the office? Yes.
 9913. You generally got it all right? Yes; there were two mistakes, but they were afterwards rectified.
 9914. Supposing Flemming had not brought you your money, where would you have got it from? I should have gone to Springall; but I got mine regularly.
 9915. Could you have got the money if Flemming had not been present? Oh, yes; I went up twice or three times and signed the sheet; but after that he said he would give it to Flemming. I went up one afternoon, and he said, "I gave it to Flemming to take down for you." After that he gave it to Flemming to take down for me regularly.
 9916. Then you discontinued to sign the pay-sheet from the time you were paid by Flemming? Yes.
 9917. You are certain you signed the sheets up to a certain time? Always.
 9918. You cannot tell me the time? No, I really cannot.
 9919. Was it last year? It is twelve months altogether since I left.
 9920. I suppose in the camp the men knew their own gangers? Yes.
 9921. No matter how their works were spread over the Park? Oh, yes; everyone knew his ganger.
 9922. Did the ganger move about amongst the men freely? Yes. But if I, as a ganger, told them to do things they would give me impudence, and would never mind me.
 9923. Do you think a ganger living at Hurstville could look after men in the National Park? I do not think it.
 9924. When you were drawing the money, did Flemming live at Hurstville? For a short time only. He came three times. I was paid at Sutherland, on the railway platform, in a little room there.
 9925. You do not remember those dates? That would be about nine months ago.
 9926. What other men were on the Sutherland platform at the time you received your money there? I saw no men at all at the time I was going.
 9927. You say Flemming used to take your money at the table and pay you at the platform; how many men would be with you at the time you were being paid? The black cook and myself would go down together. There would be only two of us.
 9928. In taking the money, did you notice that Flemming paid himself at the same time? He would get his own money with mine. I remember on one or two occasions he had £12 or £13 to get.
 9929. *Mr. Waller.*] Did you know at any time of Flemming grooming Burrowes' horse? Yes.
 9930. At the time he was grooming the horse, was he also collecting your pay? I think I got it three times afterwards.
 9931. Who were you cooking for? I was cooking for the overseers, for Reece, and the two policemen there. I cooked for fourteen for a long time;—some young lads who were surveying.
 9932. You were cooking for the officers of the unemployed? Yes.
 9933. For them or for the unemployed working men? First of all it was for the working men; then I was taken to cook for the officers.
 9934. At the time Flemming was grooming the horse, were you cooking for the officers? Yes.
 9935. Would it be possible for Flemming to suppose you were in a gang of his at that time? I could not be in a gang with him.
 9936. If Flemming had a gang of thirteen, fourteen, or eight men who were breaking stones, clearing, or such like, were you ever amongst them? I was never amongst them. They came in and got hot water from me. I know he paid them.
 9937. Did he simply, as a matter of kindness, collect your pay? He only brought it down, either to oblige me or Mr. Springall.
 9938. Did you ever know of Flemming having a large gang of working men, such as stone-breakers, working under him? He might have paid them, but I never knew him to have any working with him excepting those cleaning the tents.
 9939. Was a ganger supposed to work with his gang on all occasions? Yes.
 9940. Did you ever know of a case of a ganger having a gang distributed and not being with them? No.
 9941. Was the ganger held responsible by the overseers to see that the gangs did their work? That is what they ought to have done.
 9942. Would the superintending officer of the district know the gangers in the district? They ought to.
 9943. Would a ganger know the superintendent of his particular district? Yes; they could not help knowing him.
 9944. If a man told you he was a ganger, and told you he could not remember his superintendent, would you believe him? Everyone knew that Mr. Burrowes was superintendent.
 9945. If a man told you he was a ganger and could not tell you the name of the superintendent of the district, would you believe him? No; I would not.
 9946. What were the particular duties of a ganger? He would see that the men were all there, and he would look after the tools. Those were the principal things they did. The overseers generally told them where to go to. The ganger was responsible for looking after the tools and seeing that they were carried home every night.
 9947. Was he responsible for seeing that the men did their work? The gangers ought to have been, but they did not do it.

9948. When did you leave the employment of the Board? Eight months ago. I think it was in September, 1888. Mr. R. Dick.
9949. If, therefore, any person states that they drew money for you since that date it would not be true? I never got it. 16 April, 1889.
9950. *President.*] Here is a pay-sheet, 26th August to 8th September, 1888. [*Exhibit J.*] Is that your signature? Yes; that would be the last money I received.
9951. Do you see on the same sheet for Heathcote, between the same dates, "James Flemming and seven men." Were you one of the seven men? I was never one of the seven men.

James Flemming recalled and further examined in the presence of Robert Dick :—

9952. *President.*] Do you see Robert Dick here? Yes.
9953. How long was he in your gang? That I could not say. I have paid him five or six times.
9954. How long was he in your gang? More than three months.
9955. What was he doing in your gang? Cooking.
9956. Cooking for your gang? No; for the bosses. For the men who were the overseers, I think it was.
9957. How did he come to be in your gang? Because he was a stray man, as two or three more were who came into my gang. Any odd fellow who was given up was put into my gang.
9958. How would you know? Because his name was put on a slip for me.

Mr.
J. Fleming.
16 April, 1889.

Robert Dick further examined. [*Question interposed.*]

9959. *President.*] Robert Dick, is that true? I cannot say.
9960. Flemming says you were in his gang, is it true? I was never in a gang working with him.

Mr. R. Dick.
16 April, 1889.

James Flemming further examined :—

9961. *President.*] Was this man Dick ever on your pay-sheet? Yes. [*Flemming withdrew.*]

Mr.
J. Flemming.
16 April, 1889.

Robert Dick further examined :—

9962. *President.*] Is that true? I never saw the pay-sheet.
9963. You see the difference between you and the last witness is that he says you were in his gang, and you say you were not? Nor I never was.
9964. What I want to find out is this. When he got your money, on one or two occasions at the pay-table, did he get it simply to oblige you or because he was entitled to do so as a ganger? I think it was to oblige me.
9965. During the time you were out there, did you notice anything wrong going on in the stores? Johnson was very particular when he first came there; he would serve me in two minutes; afterwards he would keep me an hour-and-a-half.
9966. Why, was there anything to raise a suspicion that things were not right? I heard a great deal of talking, but never saw anything myself.
9967. Did you ever hear that Springall got money from the men? No.
9968. Did you ever know of his selling rations? No; I never heard of it.

Mr. R. Dick.
16 April, 1889.

Frederick O'Donnell called in and examination continued :—

9969. *President.*] When we left off yesterday you had stated to me the total cost of the Hornsby works. Did that relate simply to the work that the unemployed had done? Simply to what the unemployed had done at Hornsby on Government lands and private lands. Mr.
F. O'Donnell.
9970. In any other district you had to do with, was work done by the unemployed on private land? I believe so. 16 April, 1889.
9971. I am speaking with what you had to deal with? I believe we have done some close to Ryde, through Mr. Terry's land, and also a road across Tennyson's, at Gladsville; a road close into Ryde, close to Mrs. Darvall's; and another road going eastward; we called it Small's Road. Then, of course, roads were opened at Carlingford. They were all roads passing through orchards. We only cleared these roads—at Ryde we formed them.
9972. Is that all? I think also at Foxground. That runs through the Tange property.
9973. From whom did you get instructions? From Mr. Davies.
9974. In writing or verbally? Sometimes in writing, sometimes verbally.
9975. Did you get instructions from anyone else? I do not think I did. In general I asked Mr. Davies. He perhaps said, "Yes, keep the men employed."
9976. Who was Mr. Gordon? He has never been in charge of work in that district to my knowledge. He never came to our camp.
9977. Did he ever give you any orders? I never met him on the works.
9978. Will you look at this memorandum from Mr. Deering to the Chairman of the Casual Labour Board, dated 15th June, 1887, as to some road at Beecroft—did you report on that? Yes; I reported against it.
9979. Will you look at a letter of the 27th September, 1887—does that letter refer to Beecroft, or does it refer to a petition? I am not certain about this.
9980. Do you observe there instructions from Mr. John Davies that you are to carry out the work at once? Yes; I see it.
9981. And the note, "I will proceed with it as soon as I can in a few days"? Yes.
9982. Was that the first you knew of a proposal to make a road at Beecroft? Yes; I believe so.
9983. Do you know whether the authorization for that came from any person other than Mr. Davies? Not that I am aware of.

- Mr. F. O'Donnell.
16 April, 1889.
9984. Will you look at the letter dated 27th September, 1887, being a report as to some petition in which you report that the opening up of the Beecroft section will be of very little use unless there is considerable expenditure on the Castle Howard Road; does that refer to the petition? Of course, in that letter I am referring to the petition.
9985. What was the result of that petition? We did not do it.
9986. Has it been done to this time? I do not think so.
9987. Do you know anything about the Dural Road? Yes.
9988. What was done there? We have done a lot of work there.
9989. Who is Mr. Stopps? I do not know.
9990. That appears to have gone on to the Principal Under Secretary, does it not? Yes.
9991. And is by the Principal Under Secretary referred to the Board? Yes.
9992. Do you believe that work was done? We have done that work. At least, it is not finished. We have only partly done it.
9993. Do you know anything about this letter, as to a road from North Ryde, to eastward of the station, referred to in the Ryde Council Clerk's letter of the 30th June, 1888? That is one of the roads we have already constructed. That is one of the roads through private property.
9994. Do you know under whose authority that was done? We did that under Mr. Davies' authority.
9995. Do you know whether the Council of Ryde paid anything towards it? I am not aware. Of course it would be out of my line to know anything about that.
9996. Will you look at that letter dated 1st December, 1887, to the Chairman of the Casual Labour Board, with reference to a petition as to the Junction and Boundary Roads? Yes.
9997. Can you tell me whether this plan which appears as *Appendix B* to this paper is a copy of the plan you refer to? The plan *Appendix B* is the plan referred to in my letter.
9998. You say in that letter that you are forming Junction Road and Vanceville Road, and that when ballasted they will answer the requirements of the district for some time? Yes.
9999. How did you come to form Junction Road? I had authority from Mr. Davies to do it.
10000. From anybody else? I think after clearing it we had word from Mr. Gordon. I am not certain, I think it mentioned about ballasting, forming, and putting culverts in where necessary.
10001. Who gave you instructions about Vanceville Road? I had that from Mr. Davies also.
10002. Does this letter of the 1st December, 1887, that I have referred to, relate to this petition that is printed underneath it? Yes.
10003. Then at that time the Junction Road was going on? Yes; it was partially finished.
10004. Do you notice that this petition seems to have gone to the Colonial Secretary's department, and below it is a letter from Mr. Hinchcliffe, Secretary of the Casual Labour Board, relating to three other roads? Yes.
10005. Can you tell me whether these three roads had been commenced at this time? I think they had been commenced—partially, at any rate.
10006. Can you tell me who gave you instructions to do this? Mr. Davies gave me instructions at all times. I would ask Mr. Davies' authority.
10007. Can we take it as to these three roads that you had Mr. Davies' written or verbal authority? I had verbal instructions. I think we had a plan of this road sent to us by Mr. Gordon.
10008. Did Mr. Deering have anything to do with this work? He started the first road there.
10009. Did you take any orders through him? I think he sent us out to clear the school reserve—I think from a sketch plan sent to us by Mr. Wells.
10010. Are you quite sure you never took any instructions from Mr. Gordon? No more than he sent sketch plans where we were authorized to do the work.
10011. Will you look at the plan [*Exhibit D 4.*] Does that appear to you to properly indicate the roads through various properties, private or otherwise? Yes, so far as I see it.
10012. Will you tell me which of these roads, and what lengths, were done by the unemployed under your supervision? Yes.
10013. Were you up there in charge of the unemployed before the Board was in existence? I was.
10014. Who was your superior officer? Mr. Deering.
10015. Where was your camp? At Beecroft.
10016. When did you go to Hornsby? I could not tell the exact date.
10017. Tell me the whole of the work you did up there? The first I did was a road over the over-head bridge with Mr. Deering: we went east for 20 chains; then came down at right angles to the creek until we came to Junction-street.
10018. At the time Mr. Deering went off, and the Casual Labour Board came on, had Junction Road been commenced? I do not think it had been. We came to the Junction Road and met a fence and a division of property there. On starting along the Junction Road, I think Mr. Davies told me to continue it right along, as they had authority for doing it. I met Mr. Burns some time afterwards, and asked him about a deviation some distance on. It is a deviation of 2 chains. Having authority to do it we were not certain about keeping a straight line. I think mention was made of this, and Mr. Dawson was sent out to survey a line.
10019. Who is Mr. Dawson? I think he is their private surveyor.
10020. Who sent him out? I do not know.
10021. Very well. Dawson gave you a straight line? He gave us a line to continue to the Great Eastern Road. In coming to the Vanceville Road we had authority to form it, and so it has been.
10022. You came down along the Vanceville Road to where it had already been completed? To where the Government had previously done the work.
10023. After that? We did a road leading to Bobbin Rock Road, and continued Burns Road.
10024. Is that private property? I take it to be private property. I am not certain whether it is or not.
10025. When was Burns Road formed? It was cleared and formed, and then I had authority to metal it. I think I may mention casually that I said to Mr. Davies that for my part I would sooner have Burns Road than Junction Road, because there is a better grade right through it.
10026. Can you tell me whether these roads marked B C E F on this plan, being roads joining on to the Junction Road, were done by the unemployed? Yes.
10027. Under whose instructions? Mr. Davies'. 10028.

Mr.
F. O'Donnell.
16 April, 1889.

10028. Did Mr. Wells say anything to you about them? I do not think so; nor Mr. Houison.
10029. Then these roads marked "H" and "I" were those done by the unemployed? Yes.
10030. Under whose instructions? Mr. Davies'.
10031. Did you have his verbal or written instructions in any of these cases? Verbal in nearly all these cases.
10032. Are you quite sure you had his instructions? Oh, yes.
10033. Can you tell me about this rectangular block of roads in the middle? It was a mistake that originated with ourselves. We had a line to come along there, and an old fellow named Ewell was to point out the track. Instead of that he gave us a zig-zag, and we went astray on it.
10034. Had you anything to do with these roads on the extreme left of the plan that are coloured red? We have been forming them quite lately. We have cleared George-street, Burdett-street, and Florence-street.
10035. When did you first find out that Mr. Burns was interested in property up there? I surmised he was interested. I had the information partly. I could not say authoritatively so.
10036. Was it before or after you went up there? Before that I heard he had property there.
10037. Do you know him? I know him casually.
10038. How often did you see him on the subject of these roads? I have never spoken to him about them. I met him and asked him about a deviation at one time.
10039. Was that the only time you saw him? I went round in a buggy once afterwards with him, and Mr. Davies, and Mr. Oliver.
10040. How many times did you see him there altogether? Twice.
10041. Has he ever made any request that you should get on with the work? Not one word.
10042. Do you know Mr. Withers? By sight.
10043. Has he ever spoken to you about them? Never.
10044. Do you know Mr. R. B. Smith. Has he ever spoken to you about the roads? Never about the roads.
10045. *Mr. Franklin.*] You were with Mr. Deering before the Casual Labour Board commenced at Hornsby? Yes.
10046. Do you know what Mr. Deering's intentions were with regard to clearing the roads in the interests of the Crown lands? It was to clear all through the Crown lands, I believe. He never spoke to me.
10047. Do you recollect the direction he intended to take? I think he gave the surveyor in the camp a sketch to give to me, but I did not get it.
10048. Did you continue the road over the bridge towards the Crown lands? I think, if you knew that Mr. Deering was authorized to make a road from Hornsby station to the Crown lands, you would understand that no other authority was necessary, Mr. Deering being a surveyor.
10049. You know that it was continued to what is called the Boundary Road? Yes.
10050. Did you not know it was Mr. Deering's intention to clear the Boundary Road? I could not say. There was a surveyor marking out the land for subdivision at the time.
10051. Did you know that Mr. Deering intended to continue the road over the railway, along the Sherbrook Road, and beyond it? I think so. I could not say it positively.
10052. Did you not subsequently clear the roads on the Crown lands? Yes; but I think Mr. Deering was out of office.
10053. That subdivision was under direction? Yes.
10054. You know that the roads on the Crown lands were cleared? Yes.
10055. Was that done prior to the work you have been describing to the President? Yes.
10056. The Crown lands were completed before you got on to Burns, Withers, and Smith's land? I think we were going on with Junction Road at the same time.
10057. Could we find in your records how the men were divided between the Crown lands and Burns, Withers, and Smith's land? I do not know how we can get at that.
10058. Up to the time of your going to Hornsby, had you been clearing roads at Beecroft? Yes.
10059. For what purpose? For auction sale. In some cases we cleared the approach to land at Carlingford.
10060. When you left Beecroft for Hornsby, was it with the understanding that you were to clear roads on the Crown lands? Yes.
10061. Why did you fix the camp at Hornsby? It was near a railway station.
10062. Instead of commencing immediately and making roads on the Crown lands, was your first work from the western point of Junction Road proceeding eastwards? The extension of Sherbrook Road had already been done under Mr. Deering, and another section of the Boundary Road.
10063. The Boundary Road being partially on Crown land, and partially Burns, Withers, and Smith's land, would that be a proper road to make by the unemployed? Yes; that road was not subdivided.
10064. Was the reason that you did not go on Crown land at once that surveys were not complete? Yes.
10065. Was the reason for prolonging Sherbrook Road to get the men employed? Yes.
10066. Then, for the same reason, did they begin at the west end of Junction Road, and extended eastward until they come to a difficulty? Yes.
10067. To whom did you apply for assistance? Seeing Mr. Burns there I asked him about the deviation.
10068. How long did it take you to do the work from the east to west portion of Junction Road until you came to the obstruction? I cannot say how long.
10069. Do you remember whether you pressed on Mr. Deering to give you the survey of the Crown lands? I think I did.
10070. Are you certain? I am not certain of it. I think we asked Mr. King for a plan of the subdivision. I think we had to write to Mr. Palmer to get the plan from him.
10071. Do you remember on what day you got the subdivisional plan? I do not.
10072. Will it be on record when it was given you for the Crown land bounded by the Boundary Road? Their having sent us the plan ought to be on record.
10073. Whose record would it be on? I should imagine it would have to come through the Board to come to us.

- Mr. F. O'Donnell.
16 April, 1889.
10074. Where did the plan go eventually? They were lithograph plans from the Survey Department, and I would imagine that they were in the Casual Labour Board office now.
10075. Having received that subdivisional plan of the Crown land, were your difficulties removed as to what to do with the men? Yes.
10076. Did you discontinue the work on the private lands? No; we continued to work on the Junction Road.
10077. At the time you were enabled to take all the men off Burns, Withers, and Smith's land, and put them on Government land, was it done? No, it was not done.
10078. Did you continue Junction Road until you joined with the Vanceville Road? Yes.
10079. Then did you make a prolongation of the Vanceville Road to meet that part of the Vanceville Road already made by the Roads Department? Yes.
10080. Did you carry Vanceville Road northwards and proceed on until it joined with the Boundary Road? Yes.
10081. Then at what time did you put on your full force of labour to improve the Crown lands in order for their sale? I cannot tell you the exact dates.
10082. Does this plan of the subdivision show the entire area and length of roads on the Crown lands? I should imagine it did.
10083. What would be the proportion of roads on the Crown lands as compared with the roads coloured red? I think there are 8 or 9 miles of private roads, and $2\frac{3}{4}$ of Government roads.
10084. At a glance, does it not look as though there were five times more on private lands? Yes, it does; but one of these roads is called a Government road.
10085. The road from Pearce's Corner, crossing the railway and carried to the Boundary Road, is that a public road? I understood from the residents that it was a public road.
10086. You think that road should not be classed with the others said to be on private lands? I cannot tell private land from Government land, but we always understood this to be a Government road.
10087. To summarise this, there has been by this plan absolutely five times more work done on private lands than on Crown lands for sale? Yes.
10088. What was the nature of the work on the Crown lands? Clearing, grubbing, forming, and in some places metalling.
10089. Was it cleared about a chain wide? It was grubbed, and the roots were taken out and the holes filled. Everything was burned off, and the logs were rolled on one side.
10090. Was the Boundary Road cleared in the same way? Yes.
10091. Can you tell me the price per chain of the clearing for the Crown land? It went between £8 and £9 per acre.
10092. Would £8 10s. state it as a mean? Yes.
10093. If that were applied to the particular roads on the plan, would that give an estimate so that we could know what was done? Yes.
10094. Is there any forming? Some of the roads are formed; Palmerston Road, Sherbrook Road, and Derby Road are formed.
10095. Are any ballasted? None are ballasted.
10096. In what way are they formed? The rough formation stood us in 15s. a chain.
10097. Will you particularise the roads. What was done to George-street? It was cleared and formed excepting a few chains.
10098. Tell me one after another what you have done? Burdett-street is formed partially three parts of the way; Junction Road is formed for the whole length—cleared, formed, and ballasted; the extension of Vanceville Road is cleared, formed, and ballasted, and four drain-pipes put in; Burns Road east is cleared and ballasted for 25 chains, culverts in, a bridge, and formed towards the Bobbin Rock Road. On Burns Road west, some 30 or 40 chains were cleared before we went on to it; since it has been ballasted and reformed. Burns Road also had two culverts in, and we redecked them. When we get on the road marked "E" from Burns Road to Junction Road, that is simply cleared and formed, and culvert pipes put in on one side. A further extension of 20 chains of Burns Road is cleared and formed. The road running from Burns Road south to Peat's Ferry Road is also cleared and formed; it has also drain-pipes, side drains, and culvert pipes. A road marked "C" to the Junction Road is cleared, formed, and ballasted. Then continuing that on from the Junction Road to the Boundary Road it is cleared and formed in a heavy cutting. The road from Lane Cove Road northwards to the hotel is ballasted about 15 chains, drain-pipes, culverts, side drains. The same road from the railway to the Junction Road is cleared, formed, ballasted, and has pipe culverts.
10099. Now, does that description refer to the whole of the roads made on the Burns, Withers, and Smith's Estate? Yes.
10100. Did the sums you gave the President represent the total expenditure on the Hornsby works? Yes. £6,329 represented the whole of it.
10101. If you knew that the plan from which you made the measurements was a sketch plan and not a scale plan, would it be correct? No; it could not be correct.
10102. Now, having a plan before you which is on a scale, will you give me the price of the different items by which your calculation was made, so that I can make a calculation on your evidence. What was the price per chain for clearing? We gave between £9 and £10 for clearing.
10103. Formation? From 15s. to 17s. 6d. a chain. For side drains, from 6s. to 8s. per chain; quarrying and ballasting, 2s. a yard; spreading, 5s. per chain; blinding, 5s. to 6s. per chain; breaking, 1s. 3d.; and the carting would vary from 6d. to 1s., according to the distance, per yard.
10104. What was the rate of payment for a two-horse cart. What do you think they earned? 10s. or 12s. a day in some cases, with two horses. We reckoned about £3 5s. 9d. per chain for doing the best class of work.
10105. What were the culverts? They varied from 15s. to 17s. 6d. a foot; but the pipe-drains cost £3 per set to put in.
10106. These are all the items excepting bridges. What were the bridges? They went about 17s. 6d.
10107. If we apply these prices to the lengths of the various roads and the work done a valuation may be made? I think so.

10108. The only difficulty being that your calculations were made on a sketch plan, and that ours will be on a proper survey plan? Yes, of course. We did the best we could. It was always considered well to keep the men employed, and to get as much work out of them as we could for the money.

Mr.
F. O'Donnell.
16 April, 1889.

10109. It did not matter whether you did Crown lands or private roads first? The Crown lands were not divided at that time.

10110. But when they were, you went on with other work simultaneously? We went on with the Junction Road.

10111. You did not crowd them on the Crown lands? No.

10112. How is the exact total expenditure in that neighbourhood to be ascertained? I do not know, unless you get it by the vouchers, which show the Hornsby expenditure.

10113. *Mr. Waller.*] On what date was the Crown land at Hornsby subdivided? I have given no dates.

10114. Was it the time the Casual Labour Board came into existence? The Crown land was divided when the Casual Labour Board came into operation. It was under them that we did the Crown land.

10115. Was the work done by Mr. Deering chiefly performed on Crown land or private land? We were partly on private land and partly on Government land. We were going across Sherbrook Road. Sherbrook Road is the east boundary of the private lands, and adjoins the Crown lands.

10116. Were you mostly on Crown land or private land? I cannot say, because we had no intimation of it. I should imagine it was close to Crown land.

10117. Was the work done subsequently by the Casual Labour Board on Burns, Withers, and Smith's Estate, necessary to follow from the work done by Mr. Deering? That is not for me to say. I cannot give an opinion on that. That is only speculation as to what should follow what had been done. I am not to know that. I had instructions to do work, and I did it.

10118. I am asking your opinion? It is not fair to ask me an opinion on that matter.

10119. I put it in another way. Would the work which followed the work done by Mr. Deering make it appear necessary that further authority should be given by the Board? Some of these roads would be necessary as roads leading to the Crown lands; as such they would be advisable.

10120. I am asking you whether the work undertaken by the Board would be the natural sequence of the work previously done? In my opinion it is not, but I do not think I ought to be asked opinions.

10121. It has been stated in evidence that the authority for doing the work of the Casual Labour Board on Burns, Withers, and Smith's Estate rested principally on the ground of work that had been previously done by Mr. Deering, and that it was simply continuing or carrying out his plans? I know nothing about that.

10122. Would you think that was the case? I do not know anything about that.

10123. Do you know the Boundary Road? Yes.

10124. Do you think it possible to have made a road to continue that Boundary Road? Yes; I think it possible.

10125. Do you know the gullies;—are they impracticable? Well, a road could be made there, but as you get along about a mile further you come to an impracticable place altogether, because there is a gulf half-a-mile wide with 300 feet perpendicular walls. We could have got over the first obstacle we met with; but on the other hand the Junction Road was far preferable. I believe it would be a far cheaper road, and my opinion is that Burns Road is the best road of the whole lot.

10126. Have you made any estimate of the value the Crown lands have been increased by the work done? No, I have not.

10127. Have you any idea of what their value was before the work was done? To give you my opinion, I am not conversant with land for sale, because I have seen places I would not give £20 for, bought, and the man has made a profit. But I would not give £2 10s. per acre for the Crown land there if I were going in for it.

10128. Was there much timber cut on that portion of the Crown lands adjoining the Hornsby Estate—timber for sale, sleepers, and firewood? There might have been on Burns, Withers, and Smith's, but not on the Crown land. There was no timber there.

10129. Was there a saw-mill out there? That cut up the firewood for town.

10130. Was there much? Not very much. I think they took some of it to cut at the saw-mills.

10131. Where were the saw-mills? At the Hornsby Station.

10132. Was there much wood-cutting at the Hornsby Station? I cannot answer that.

10133. Were these saw-mills put up by the Casual Labour Board, or did they belong to outsiders? They belonged to private individuals.

10134. Do you know the names of the owners? One was named Thomas, and there was another one. He only came quite recently. Thomas was there for some months.

Archibald M'Leod called in, sworn, and examined:—

10135. *President.*] What position did you occupy in connection with the Casual Labour Board? I was an overseer.

Mr.
A. M'Leod.
16 April, 1889.

10136. When were you appointed? In August, 1887.

10137. How long did you continue there? Until 3rd or 4th April.

10138. Where were you? I was at several places—Peakhurst, George's River, and Woronora River Road.

10139. Were you an overseer there? Yes.

10140. What were your duties? I had to look after the men and see that they did their work, make up returns of the work done and in hand to show the superintendent when he came round, and to look after things in general, and see that they were kept going.

10141. Did you ever have a man named Flemming in your charge? No.

10142. Did you ever have a man named Dick? Yes.

10143. What work was he doing? He was cooking.

10144. Was he a ganger? No.

10145. Did you attend on pay-days? Yes.

10146. Always? Always.

10147. At these three places? I always attended where the men were paid.

10148

- Mr.
A. M'Leod.
16 April, 1889.
10148. Did you ever have a man named James Flemming or T. Flemming in any of your gangs? No.
10149. Were you amongst the unemployed at the time you went there? No.
10150. How did you get the employment? I was out of a billet and applied to the Board and got it.
10151. How much did you get? Six shillings a day.
10152. Nothing else? I had to pay for my rations.
10153. Who was your superior officer? Mr. Burrowes.
10154. Did you ever have any difficulty with him? No.
10155. Did he ever make any complaint against you? Not that I am aware of.
10156. During the time you were out there, did you become aware of any irregularity or any case of imposition? No.
10157. Was everything perfectly straight? As far as my place was concerned it was? As far as I observed.
10158. What used you to do on these pay-days? I would be there to see that the men got their money right.
10159. Did you call the men out? Sometimes I did. I was always at the table when the pay was going on.
10160. Did you know the men as they came up? Yes.
10161. Were you ever at Heathcote? That is the Woronora River Road.
10162. Then there is another place—Heathcote Agricultural? That was under Mr. Bell. I had nothing to do with that.
10163. *Mr. Franklin.*] Do you know Flemming at all? I know him by sight.
10164. Did you know his occupation there? I did not know what he was doing.
10165. You did not know him as a ganger? No, not at all.
10166. Do you know whether there were men doing odd jobs in different places, who were put into a gang, with one man to represent the lot? That was never done under me. I do not know whether it was done with any of the others.
10167. Were there men called camp-keepers besides cooks? With me there were not.
10168. *Mr. Waller.*] What were the duties of a ganger? I used to tell him what to do, and he would see that it was done, and he would collect the money.
10169. Was he a sub-overseer over the men? No.
10170. Had he to see how the men did their work? No; he was one of themselves.
10171. Would a ganger of necessity know the officer of his district? Yes.
10172. Would the surveyors and superintendents know the gangers in their districts? Of course they would.
10173. If a man said he was a ganger, and could not tell you who his officer was, or who his surveyor or superintendent was, would you believe him? I do not think I would.
10174. Would a man be appointed as a ganger whose gang might be spread out over the district so that he could never be with them? I know of nothing like that.
10175. Did you ever know a case? I cannot say I did.
10176. Would a man be appointed ganger of a lot of stonebreakers and never be with them from week to week? It was never done under me.
10177. Do you think he would? I cannot say.
10178. What advantage would he be to the overseer if he was never with his gang? He would be no advantage to him at all. The only advantage he is is to gather the money and to divide it amongst the men.
10179. Is not one of the advantages of a ganger that the overseer can speak to him instead of having to gather all the men together? Yes.
10180. Consequently, if this man was not with his gang there would be no good in the overseer speaking to him about it? No.

WEDNESDAY, 17 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

The Hon. John Davies, C.M.G., M.L.C., called in, sworn, and examined:—

- Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.
10181. I believe you were the Chairman of the Casual Labour Board? I was.
10182. And you held that position from 2nd May, 1887, to 25th January, 1889, when the services of the Board were dispensed with? Yes. We were superseded by two other gentlemen, Messrs. Miles and Mason, of whose appointment we received no official information, until after the gentlemen mentioned presented their letters of appointment to me. We subsequently received an official communication from the Colonial Secretary, that these two gentlemen had been appointed to supersede us and close the works of the Board by the 31st March.
10183. Were you examined before a Select Committee of the Legislative Assembly, on 29th November, 12th December, and 18th December last? Yes.
10184. Is this your evidence? Yes.

[*Evidence before Select Committee.*]

The Hon. John Davies, C.M.G., M.L.C., called in, sworn, and examined, 29th November, 1888:—

783. *Chairman.*] You are the Chairman of the Casual Labour Board? Yes.
784. Could you briefly tell us the formation of that Board, its origin, and how you came to be connected with it? Perhaps the letter of instruction from Sir Henry Parkes will give you all the information you require in that respect.
785. This is the original of a copy sent in to the Committee by Colonel Wells? Yes.
786. Had you any conversation with Sir Henry Parkes, prior to the reception of this letter, with reference to the formation of this Bureau? Yes, merely as to whether I was prepared to

to undertake, in conjunction with two other gentlemen, the carrying out in detail the information contained in that letter of instruction.

787. Did he seek your services by letter, or personally? By note first. I personally waited upon him.

788. That was the first you heard of the matter? That was the first.

789. In entering upon these duties, what was your first work? We found that the work at that time was already in operation, under the control of Mr. Deering. There were about 4,010 on the several works at that time.

790. Have you any recollection as to how these 4,010 men were distributed? The different works at that time were at Dobroyd, Gordon, Hornsby, Beecroft, Carlingford, National Park, Heathcote, and Waterfalls.

791. Were all these men under Mr. Deering at that time? Yes.

792. And the Board took them over? We took them over from Mr. Deering—the men and the works that were then in progress.

793. And you continued the work? We continued the work on, and we established a different basis to that which had been in existence prior to our taking the control of the unemployed.

794. Did you have any formal meetings to consider the work that should be carried out? Yes.

795. Have you kept any minutes of those meetings? Minutes of the first meetings were recorded; but the professional members of the Board—Colonel Wells and Mr. Houson are both employed in different departments of the Public Service, one in Roads, and the other in the Harbours and Rivers Department, and frequently the whole three of us could not meet. Perhaps Mr. Houson would come in, and he would acquiesce in what was done, and subsequently Colonel Wells would come in, and it would be reported to him, and he would approve of it. Nothing was done without the general concurrence of the whole Board.

796. When you say that nothing was done without the concurrence of the whole Board, do you mean that they concurred after any work was initiated, or that they were asked to concur before? They were asked to concur before.

797. Have there been any instances where they have not been present and you have initiated works on your own responsibility? Only very small works, where men have been employed, and it has been reported to us by the overseer or surveyor-in-charge that it would be well to continue a road in certain directions, or to make certain improvements on the road. That has been done because it was a matter of small moment; but in large works the whole Board has been consulted, and its approval obtained.

798. When you say large work, how would you define a large work from the work of laying out roads similar to these, B and H? If that was reported to us by our overseer or superintendent-in-charge, and if the surveyor, Mr. Gordon, who was a very intelligent officer, recommended it, we would approve of it.

799. But that is scarcely an answer to my question;—there is this road DH, which might or might not be of some importance, I want to know what distinction you would make? A road like that would come under the control of the Board, but any small matters, such as clearing a road suggested by the Cumberland ranger prior to the sale to give access to the ground, we did without a general conference.

800. That is to say you did it? Yes.

801. Still your answer is scarcely clear as to what you would consider the difference to be between a work you should feel it necessary to consult with your colleagues upon, and one which you would feel yourself qualified to order to be done without consultation? Well, that would not be making, it would be clearing. I do not confess to have any knowledge about road-making, that is a professional knowledge I do not profess to have; but the matter of clearing a road that has been already defined does not require any professional skill.

802. Do you lay the stress on the difference as to whether a road is really formed or only cleared? Yes, that is the distinction.

803. In the matter of clearing, you feel yourself entitled to order any road to be cleared? Not any, but small roads, and even then afterwards to consult my colleagues and inform them of what has been done.

804. Was it any good asking your colleagues approval after the instructions had been given? Well, it was so small a matter, and one which required immediate action. We had thousands of men seeking employment, the surplus labour of the city, and I was obliged to find employment for these men. The matter could not wait.

805. Do you not consider it a defect in the Board that you could not have colleagues who could co-operate with you? In a matter of this kind I do not think it was a defect. I had full power to act.

806. Who gave you that power? I had the general consent of my colleagues.

807. That is to say they authorized you to do as you did? Yes; in very small matters of that kind.

808. How did they give you to understand that they intended a small matter like that to be undertaken? The only way that I can give you an illustration is, as I have already told you, that if a road had been already defined, and that road led into Crown lands, all that I could undertake would be that the roads might be widened or cleared.

809. Did they pass any formal resolution? No formal resolution; I had only their general concurrence.

810. Only general concurrence;—do you mean that you simply had a private conversation with each one in turn? No. We met in the office, and they gave me power in cases of that kind to exercise my discretion to a limited degree.

811. How many meetings have you had at which the three of you were present? I suppose a hundred meetings.

812. At which the three have been present? Yes.

Hon.
J. Davies,
C.M.G.,
M. L. C.

17 April, 1889.

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1880.

813. Was it a meeting at which the three were present that you were authorized? I think there were only two present, Mr. Houison and myself; but it was reported to Colonel Wells afterwards, and he concurred.

814. What you did then was to have a conversation with Mr. Houison, and you simply told Colonel Wells of what you had done? Everything was done in our office, so far as the Board is concerned.

815. Have you ever originated any works yourself, and then consulted Mr. Houison or Colonel Wells, whichever came to you first, and then the other afterwards? Certainly not.

816. State what was the course you adopted? The practice has been that papers or petitions are sent direct from the Lands Office, through the Colonial Secretary's Office, to our Board. We subsequently send the papers on that come through that way to our officers for report. If the report justifies us we recommend the work to be carried out for the approval of the Colonial Secretary.

817. You mean to say that you have originated no works without receiving a petition or instruction from the Colonial Secretary? And then upon the reports of our officers I will give you for illustration the Narrabeen subdivision. A paper comes from the Lands Department to the Colonial Secretary, recommending that the land should be subdivided, the roads cleared, &c.

818. *Mr. Brunker.*] Was that since the establishment of the Board? Yes; since the establishment of the Board. That paper was sent on to us from the Colonial Secretary, the Board being under the Colonial Secretary. We then sent it on to our officers to report as to the advisability of carrying out the works suggested. If our officers report that it would be to the advantage of the public that the works should be carried out, we, as a Board, recommend that the works should be approved of by the Colonial Secretary in order that the Board may carry them out. That is the usual practice.

819. *Chairman.*] Then, in each particular instance, you have got the sanction of the Colonial Secretary? In every case, except in two or three cases where we took work over, initiated by Mr. Deering. We simply continued the works on that had been initiated by this gentleman, who had charge of the unemployed, prior to the formation of the Board.

820. What roads of those marked red on the plan before you, have been either continued or originated by your Board? You mean as to forming and clearing?

821. As to forming or anything;—you might briefly describe them to us? All these roads.

822. So far as your connection with them is concerned? Yes.

823. Whether in originating, clearing, forming, ballasting, or continuing? Yes; we have had to do with all these roads.

824. What roads have you originated of these? Well, we have originated most of these roads, as you will find on reference to the papers. We obtained reports from our officer, Mr. Gordon, recommending that these roads should be carried out in order to give access to the Crown lands, which were worthless without this access.

825. You have originated most of them? Very nearly the whole of them, with one or two exceptions. "A" road was done by Mr. Deering, I fancy. I am not sure, but I think that was the road Mr. Deering cleared, and he cleared Boundary Road, which was found to be impracticable.

826. What roads of these did you open or originate on petition? The Bobbing Rock Road, not shown on the plan, and the extension of the Vanceville Road. The lower portion of that road had been cleared and formed four or five years previously to that, and we continued it on a petition from the residents and property-holders that it should be continued in the direction on the plan.

827. Have you got the petition asking for the continuation of Vanceville Road? I think it is amongst the papers.

828. What other roads were opened by petition? Another road was opened, road I, to join the Pennant Hills Road, and to avoid a long detour to get on to that road. It shortened the distance about half-a-mile.

829. That road was opened by petition? Yes.

830. Was there any petition for the road marked C? I do not think there was. That was opened on the recommendation and report of Mr. Gordon.

831. Was there any petition for the road D H H? No; I think not.

832. Was there any petition for Burns Road? A deputation, consisting of Mr. Noonan, who is a property-holder, and several of the local people, waited upon the Board, and made representations that it would be of very great public utility and a great convenience to the farmers if the road were continued.

833. Were there any petitions for the roads B, C, D, E, F? No; these were done purely on the grounds that you will find contained in the report of Mr. Gordon, and they were borne out by the professional members of the Board, Mr. Houison and Colonel Wells.

834. On the tracing which you have before you are all the roads which the unemployed have cleared or formed shown? No; I think not.

835. Will you look at this sketch by Mr. Deering, showing all the roads; do you say that that is accurate? That is accurate, I think.

836. Accepting this map to be correct, had you any petition to continue road E to the south to Burns Road? I am not aware that we had; but there were frequent representations made by deputations from people residing in the district.

837. Did any deputation wait upon you in reference to that road? I could not say positively that they did.

838. About 5 chains from the junction of this road with Burns Road there is another road running between it and H, and parallel with Burns Road? Yes; but it does not run in that form. By a mistake the men started to clear that road, but it was only partly cleared. It runs in a zig-zag manner.

839. It was cleared by mistake? They started to clear it by mistake,

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

840. Was it continued by mistake? I think the overseer overtook them before it was very near done.
841. It is completed now? I think not.
842. So far as clearing is concerned? Only in a very partial way, and it does not run in a straight line.
843. Who laid that road out? It was not laid out at all, that is where the mistake was made. The men who started the work commenced at the wrong peg.
844. For what cause was this small road of about 5 chains, between the road we are now talking about and Burns Road, made? That was in the same way made by mistake. Instead of clearing along road H H H they continued straight on; but you will find that the overseer-in-charge will be able to give you more detailed information. It is impossible for me to give you detailed information about these mistakes. I could not live on the spot and control matters of that kind. I can only give you information as far as the general workings of the Board are concerned, what our operations have been, and the reasons which prompted the Board to carry out these roads.
845. What reason had you for carrying out the road running to the south from Junction Road, a little to the west of road B? That leads to a railway platform.
846. Was that its object? Yes.
847. Had you any petition for it? We had representations from the people in the district.
848. What originated the road parallel with the railway, between Junction Road and road A? We were simply adopting a system that had been in operation before we took office. At the Field of Mars, Beecroft, and Carlingford, roads were formed and cleared all along the line, and we merely continued the same practice here.
849. When you say "cleared along the line of railway," do you mean along the whole length of the line? Yes. The same principle has been adopted.
850. How is it that this road does not come further to the south then—that it happens to be just between road A and Junction Road? Because of private property intercepting it.
851. Where—to the south? Yes.
852. Is not that private property it goes through? A portion of it.
853. Does not the whole of it run through private property? Yes; but it has only been cleared.
854. Are they not putting culverts there? I think one or two pipe-drains have been put in to carry the water off; but there has been no ballasting or formation.
855. When you say "cleared," does not that imply something more than the cutting off of the timber and clearing it? It implies that we are going to put in pipe culverts.
856. Is not anything else going to be done? There may be a little formation; but no metal ballasting will be put on.
857. Then it is more than cleared if it goes so far as to be formed? Well, it is very trifling outside the clearing.
858. There is a road shown on the map continuing Boundary Road to the railway line;—is not that through private property? I am not aware; it may be. I may tell you that I know very little about the holders of the property. I did not know a man who owned an inch of land in this district. It was not my duty to inquire.
859. Did you get any petition for opening that road? Representations were made to us by property owners in that district; by a gentleman who was going to embark in a public business, and others, asking that the road might be constructed to Boundary Road.
860. To the south of this road, between it and Boundary Road, and parallel to them, there is another road;—did you receive any petitions or representations for that road? We got representations, I think, from the forest ranger for that.
861. What were his representations? That it would be an advantage to Crown lands.
862. How could those two parallel roads be advantageous to Crown lands? I do not see how it could be a direct advantage. They only led into roads leading into the Crown lands.
863. Was there any necessity to have these roads so close together? The Board thought that it was an advantage to have as many roads as possible leading into Crown lands.
864. Do they lead into the Crown lands? Indirectly.
865. In the same way any number of repeated roads would have the same arguments in their favour? Well, I suppose the whole of the roads in the Colony would. They have to go through somebody's land.
866. But if they had cut the whole of this land into small blocks the argument would have been equally good for any one of them? No, it would not.
867. What are the special advantages? The road comes out direct to the railway station.
868. Was not one sufficient? No; the greater the number the greater the advantage to the public.
869. How does this road give any better access to the railway station than the continuation of Boundary Road? You have got the advantage of another road. Two roads are better than one.
870. Does it in any way shorten the distance from any section? Yes.
871. Where from? From the Peat's Ferry Road.
872. Would it not be equally short to turn up Junction Road, and then along the road parallel with the line? Possibly; but it is far easier to go up this short road, and then along the road under discussion.
873. Do you consider that those roads in any way give access to Crown lands? Indirectly, yes.
874. Indirectly is very indefinite;—in what way? In the way I have described. They lead first to the railway station, and then to the Crown lands.
875. As a matter of fact, do they not lead the other way—from Crown lands? Well, it depends upon the way you are going. If you turn your face towards the Crown lands they lead that way, and so the reverse.

Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

876. You say you know nothing about the owners of this land? Not any of them.
877. Do you not know that Messrs. Burns, Withers, and Smith own land up there? I knew it subsequently; I did not know it at that time.
878. Did you not know before you opened up a number of roads that they were the owners of that property? Only from official communication with them.
879. Before any of those roads had been opened out, did you not know that Burns, Withers, and Smith owned an estate there? I knew that they owned an estate in the locality; but I did not know that we were going through their land. If I had known, it would not have operated against our going through.
880. Did you not know that they owned the land through which these roads went? Not at that time.
881. Have you not been on the grounds with Mr. Burns? Yes, with reference to the sale of the Crown lands.
882. Have you not been on the ground with him before the opening of these roads? No.
883. Before the clearing of the road from road A to Junction Road? No. I have been on the ground with Mr. Burns consulting him with reference to the sale of Crown lands. I suggested that the sale should be made on the ground. That is the only communication I have had with Mr. Burns.
884. *Mr. O'Sullivan.*] Were you on this property in company with Mr. Burns or any of the proprietors of this land? I have just stated that I was on the ground with Mr. Burns on one or two occasions prior to the sale.
885. Was this prior to the roads being laid out? No.
886. And it was after you received the official communication from the syndicate with regard to the roads? I received no official intimation from the syndicate.
887. I understood you to say just now that you had received only one official letter from them? We had only one communication from Mr. Burns. Mr. Gordon, the surveyor, recommended to the Board that application should be made to the private proprietors of the land through which roads had to go, for permission. In conformity with his recommendation the Board applied for permission, and we got a reply. That was the only communication we ever had from Mr. Burns on this matter—that they were willing to give us the land.
888. This visit you made to the land with Mr. Burns was subsequent to this letter from him? Yes; prior to the sale.
889. You said just now that the Casual Labour Board had held 100 meetings? Yes.
890. If any other officer has sworn that only a few meetings have been held and none recently, that officer is in error? It just depends upon what construction he put upon a meeting. If two members met I would call that a meeting. Two members formed a quorum.
891. Will you kindly explain how you met, and what you understood to be a meeting of the Board? If any one of my colleagues attended the office we regarded that as a meeting, because everything was then handed over to him, and his attention was directed to what had been done, or to what was about to be done.
892. Did you sit down and consult, and examine maps, and plans, and representations? Yes.
893. Did you keep any minutes? Only of the first few meetings. One minute will show you that I went the first month after our appointment, with Mr. Deering, on to the Hornsby lands, and conferred with him upon the works in progress.
894. Previous witnesses have sworn that there were only a few meetings held, you tell us 100;—I would like to know exactly what you mean by a meeting;—you said just now that minutes of only two or three meetings were kept? Yes; at the inception of the Board.
895. At your later meetings there was only a consultation with one of the members of the Board? Yes.
896. But in the ordinary sense of the word this was not a regular meeting? I call it a regular meeting. We met and performed the duties of the office.
897. Supposing we desired some evidence to show what had been done at the meetings, you would have no record? Only that Messrs. so and so were present on such dates. We can give you that in the diary; but it does not give you any minutes.
898. Then as a matter of fact, we would have no evidence to appeal to show what business was transacted? No; it did not appear in the minutes. We simply met in that formal way which I call a meeting, and in the diary the Board enter the names of those who are present.
899. Then the operation of this system seems to be that you meet these gentlemen as advisers? I performed the administrative part of the work, and they the professional part. I was simply the executive.
900. You were the executive of the institution, and these gentlemen only appeared now and then to give you advice? They appeared as often as their other duties would permit.
901. They appeared as advisers? They were equal with myself in every way.
902. What is the practical operation of the thing? I will give you one illustration. We had some sewerage works out at White's Creek and Johnson's Creek, and several works of that kind, which my colleagues, though they had authority to do these works, on the representation of the members for the district, and on a petition from the local residents, took exception to, and we sent in a remonstrance against having to carry them out. Still, the work was authorized, and we had to proceed with it.
903. Who authorized that work? It was authorized by the Colonial Secretary. I am only giving you that as an evidence that we have remonstrated against certain works my professional colleagues thought that was not wise to undertake. We could not go astray in making

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1939.

making roads or clearing lands; but a great undertaking such as the drainage of the whole of the Leichhardt district they thought was not to be attempted in piecemeal style, and a very strong remonstrance was sent in.

904. You told the Chairman that these roads on the plan originated by the representations of local residents? Yes; most of them, and, as I have said, also from our own officer (Mr. Gordon), and with the personal inspection of my colleagues, Mr. Houison and Colonel Wells.

905. You say that Mr. Gordon did originate some of these roads? Yes; they were done on his recommendation. I think the papers will show that. Of course, you could not expect myself to have a professional knowledge in a matter of that kind.

906. If Mr. Gordon has sworn that he did not originate, and only cleared these roads, and that he cannot tell how they did originate, he has made a mistake? I scarcely think he could make such a statement. I think his own reports to us will bear out what I have stated. There must be some misapprehension. I think the papers will disclose what I state.

907. Referring to the roads I and H, can you tell us who originated these roads? Road I was made on the representations of people who wished to save a detour of half-a-mile to get on to the Pennant Hills Road to go to Parramatta. The representations were submitted to Mr. Gordon, and he reported on them. With reference to road H, there is a railway which goes right through this property, and this road is to give access to a platform and to the Lane Cove Road.

908. But is there a platform there? Yes, there is.

909. *Chairman.*] And the object of this road was to get to that platform? Yes.

910. *Mr. O'Sullivan.*] If this road H was required to give access to the Lane Cove Road, why was it not taken straight through to Boundary Road? Because there is a gully which prevented them from getting across—a very steep gully, about 1 in 2—almost perpendicular.

911. But you cross two creeks now? Yes; but only very slight ones. In that case we would have had a very large expenditure. You can drive along the Boundary Road to this gully, but you will find it very steep.

912. The reason you gave just now for constructing some of these roads was that you had a number of unemployed in your hands, and that, therefore, you were compelled to give them employment? Yes.

913. Was there any reason why these necessitous men should not be employed upon any other work? The best work the men can be employed upon is on the roads, which are the property of the people, and give facility of access to Crown lands and railways.

914. Admitting all that, why were the men sent specially to this district? We had so many men that I had to distribute them everywhere, and utilize their labours as best we could in the public interest. Prior to my taking charge the men were simply knocking about, doing scrub work—work of no utility—and tens of thousands were spent without any result at all. We placed the men on a different basis altogether. We put them on as contractors so that it would not destroy the dignity of labour, nor in any way degrade the men, or affect any of their fixed principles. They formed their own gangs, and took their contracts.

915. With reference to this T-shaped road, between road H and the continuation of E, cleared by mistake, who would be responsible for that mistake? I think our superintendent, Mr. O'Donnell; but then the man had a very large area of land to traverse to get to these different places, and men anxious to get to work would get to work and make a start before he could overtake them.

916. If road E was continued to the south on the representation of the property owners, that representation must have been made by Messrs. Burns, Withers, and Smith, as they were the owners of the property? All this property to the east belongs to private owners, and there are no other means of getting to the station except by going through this property.

917. But how would they be served by Burns Road? That leads into Junction Road. To get to the station, they come along Burns Road, up the continuation of E, and along Junction Road.

918. Could they not go up H? They could have done that; but I do not think there could have been any objection to their having an additional road, because that gave us a direct line into the public estate.

919. Your object is that that road was laid out to serve the people in the east, to give them access to the station? Yes, and we wanted to continue it right through into the public estate. The Board thought that the more we had of these roads to tap the flat lands on top the better. They saw, and the officers recommended, that it would be a great advantage to have these additional roads.

920. Already having road J to give access to these people to Crown lands, and having road H to give access from the south, what was the necessity for constructing a road down the centre? That was the recommendation of Mr. Gordon. You will find the papers disclose that. There was a representation from the property owners in the district; but Burns, Withers, and Smith never waited upon us.

921. You say that Mr. Gordon authorized this southerly extension of road E? I think you will find it so in the papers.

922. I am not talking about these tributary roads, which, for arguments sake we will admit were required; I am talking about the southerly extension of road E. As a matter of fact, Mr. Gordon knows nothing about these roads, and only holds himself responsible for the roads marked on his plan. He admits Junction Road, the roads B, C, D, and F, and the northerly part of road E, and he justifies it. What I want to know is why that road was continued to the south, to serve, as I can see, no one except the owners of the land? Burns' people had already cleared Burns Road, and on the representations of the people owning the land on the other side, this road was continued in that direction.

923. But what was their object in asking for that? They said it was a nearer road for them to take their fruit and produce.

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889

924. These men you say would come along Burns Road, and up the continuation of road E? Yes, the grade is better that way. They recommended that if that road was made it would be much easier for them to strike Junction Road at an earlier stage.
925. *Chairman.*] Would it not have been nearer for those fruit growers to go to North Shore? They did not so represent it.
926. *Mr. O'Sullivan.*] Directing your attention to the roads near the railway station, coloured a fainter red, none of these roads appear on the plan made by Mr. Gordon, and he appears to take no responsibility for them? They were done on the representation of Mr. O'Donnell.
927. What reason does Mr. O'Donnell give for constructing the road between the continuation of Boundary Road and Junction-street, and parallel to them? The representation made by local people.
928. What local people would be served by it;—what was the object in making it;—surely, as the head of the institution, you ought to have had some reason assigned? There is no road there, it is a clearing, and was partly done by the property owners before we touched it. You are asking me questions as though I was the overseer. I could not tell you these little details.
929. So far as you know, not being the overseer, you are not able to give a reason why these roads should be constructed? They have not been made at all. They were simply partly cleared by the owners before we took charge, and have been continued.
930. As a matter of fact, I may tell you that some members of the Committee have been over these roads, and there is no doubt that they have been cleared—whether they are metalled or not I am not prepared to say? They were cleared partly, about half-way, before we took charge, by the private owners.
931. Did you consider yourself justified in carrying out the work started by private owners without any object in view? We did it on representations we received.
932. *Chairman.*] But if the proprietors were already doing it, was there any necessity for you to take up the work? They were not doing it; it had been done. I am not so well-informed as the overseer is in the matter.
933. *Mr. O'Sullivan.*] Not being an overseer you cannot give an authoritative opinion? It is a very trifling matter. It is far better that the men should be employed in that work than in doing the work they were doing when we took office.
934. You have a pretty good knowledge, from what goes on around you, of the subdividing of property, the cutting up of estates; you have seen a good deal of it—the giving of fanciful names to streets, and all that kind of thing; you know that all this is done by the owners of the estates to make them saleable? Yes.
935. Burns, Withers, and Smith, having a private estate, and being desirous of selling it, would they not naturally have carried out that plan of laying out the estate, if the Government had not done it for them? I cannot say. I am not responsible for what they might do.
936. Would it not be done in the ordinary way of business? I cannot tell. You and I might take certain courses, and Burns, Withers, and Smith, take quite an opposite one. I know what I would do with my own estate.
937. As a business man, if you owned this property, and desired to make it saleable in small lots, would you not have subdivided the estate, and laid out roads, and cleared them yourself? Yes; these people gave the land, which was of more value than the money spent on road making.
938. *Chairman.*] But must not the roads always be given, even if the owners make them themselves? Quite so.
939. *Mr. H. Clarke.*] I think you stated that you got instructions to continue the work that had been originated by Mr. Deering? Yes; we got instructions to take up the management and the control of the unemployed.
940. From whom did you get your instructions? The Colonial Secretary. They referred to works in all directions, in about a dozen different places.
941. How much work was done by Mr. Deering previous to your taking charge of these people? Not a great deal. I think a portion of Boundary Road had been cleared, and some other roads.
942. Are you aware how many miles of roads are on the private property of Burns, Withers, and Smith, and other owners? No; I have not had any calculation made of the mileage.
943. Nor of the cost? Yes; we have a knowledge of the cost.
944. What is the cost, roughly? I think the cost of the whole of the works through land we have since realized as the property of Burns, Withers, and Smith, is a little over £2,000.
945. Is it usual, in making roads through Government property, to clear, form, and ballast? Yes. We have done it in almost all the estates. We have had to make better roads than we have made for Messrs. Burns, Withers, and Smith.
946. Are they on private lands, or on Government lands? On Government lands. If you go through the subdivisions we have cleared at French's Forest, Narrabeen, Gordon, and Dobroyd, you will find that we make as good roads as you can find out of Sydney, all through Crown lands, and a portion on private property.
947. Was it actually necessary to have all these roads marked red? Absolutely necessary.
948. For what purpose? To give access to the Crown lands. The Crown lands were bordered round with private properties.
949. Were there not some portions of these roads Crown lands;—take the road marked A? That road was cleared by Mr. Deering, and has an overhead bridge.
950. Would not that road give access to some portion of the Crown lands? Yes; but you would have these lands unoccupied which have realized splendid prices—£40, £50, and up to £70 and £80 an acre.
951. The Boundary Road goes at present as far as the first gully? Yes; you can go as far as that.

Hon.
J. Davies,
C.M.G.,
M.L.C.

952. Why not continue this road on Government land, instead of on private property? It is impossible, because the gullies are almost perpendicular. Of course you could make a track, but not one for traction. The grade would be about 1 in 3, and it was represented by men who were competent to express an opinion—I do not profess to have any knowledge of road-making, or the construction of bridges, myself—by Mr. Houson and Colonel Wells, that it was impossible. Of course I could not veto their opinions. 17 April, 1889.
953. *Mr. Sullivan.*] You mean to say that the road would not pay the making? It would be impossible, without spending ten times the money that we have spent upon these roads.
954. *Mr. H. Clarke.*] I have seen roads made over worse places than that? Well, of course, I am not skilled to give a professional opinion.
955. Could not a deviation have been made round this rugged part? It was reported to us that nothing would warrant our taking the road in any other direction. Our officers reported that all the money in the Treasury could not make roads there. And, besides, you have got to take another thing into account, we have not skilled labour. We have to take shoemakers, blacksmiths, engine-fitters, and all kinds of men, and you could not expect them to be skilled in that work.
956. If the country is so rugged, what is the good of making access to it? To sell the land; and the Government have sold a lot of it at very high prices. It is beautiful land. Of course there is a lot of broken country, but the table-land is beautiful country for orchards or residences.
957. *Chairman.*] You mean the part sold? Yes; but there is some good land farther away from the station.
958. *Mr. Street.*] I think you said that at the time you took charge of the Casual Labour Board there were 4,010 men unemployed;—how many are there at the present time? About 930; but it is only fair to qualify that answer by saying that if this bad season continues we will have a large increase.
959. Was any considerable portion engaged at day wages? Yes, the great majority.
960. At what rate? From 6s. and upwards.
961. Have you any men working at day wages now? Thirty or forty.
962. What wages? Three shillings and sixpence. These are mostly men who are not able to do contract work—cripples.
963. Junction Road and Burns Road give frontages to the private property of Messrs. Burns, Withers, and Smith? Yes.
964. Can you tell us what advantage these gentlemen, having possession of the frontages to these two roads, can get from the roads B, C, D, E, and F, and the southern extension of road E? No advantage whatever.
965. Have they taken a large area out of their land? Yes, a very large area. There is from 12 to 15 acres of land in Junction Road, worth £120 an acre.
966. It was not necessary for their purposes to make the roads B, C, D, E, F, and the southern extension of E? Certainly not, not even for subdivision.
967. *Mr. Brunker.*] I suppose you have a knowledge of the value of property; at any rate, about Sydney? Yes.
968. Do you think that it is likely that a private individual, in subdividing his estate, would consider it to his interest to make a large number of roads when a smaller number would contribute to the same end? Certainly not.
969. A smaller number of roads would, of course, make the area given very much less, and increase the return from the sale very largely? Yes; it would leave a larger portion to sell.
970. As the number of roads increases, so the profits decrease? Yes.
971. So that in making a subdivision of this kind private owners would find it to their profit and advantage to have roads at equal points, taking a much smaller area from the whole? No doubt; and we would not have been justified in making these roads unless we got these concessions. What we wanted was to get into Crown lands.
972. The fact is that the owner of a private estate considers that he loses about one-fifth in roads for subdivision;—what is the proportion there? Very much larger. I could not tell you exactly without taking the scale and measuring; but it is very much larger.
973. So that the loss to the owners would be considerably greater by the course you have adopted? A great deal more. Junction Road contains from 12 to 15 acres, and would fetch at the lowest estimate £100 an acre.
974. In constructing these roads, what was the object you had in view;—I suppose you had one view for the whole of them? Our primary object was to get access to Crown lands; that was the whole of our object. We had no other object.
975. Have you any knowledge of the locality? I have been frequently there.
976. What is the extent of the population in and around this district? A very large population, because the district takes in a very large area—farmers, and people with orchards.
977. Would these roads give the population round access to Hornsby station? Yes.
978. And also to the Crown lands? Yes; there is a platform and a station on the Pearce's Corner railway to which they give access.
979. Had you any conversation, or were your operations influenced in any way by Messrs. Burns, Withers, and Smith, during the whole progress of these works? Certainly not. I have not spoken to Mr. Withers for six years.
980. Were they influenced by any member of the Government? Certainly not.
981. Did any Member of Parliament attempt to use any influence? No Member of Parliament used any influence. We were actuated by no other desire than to put men on to works of a productive character, works of utility, which would give an increased value to the public estate.
982. What works were in course of progress when Mr. Deering surrendered his supervision to the Casual Labour Board? I think I have already mentioned them in answer to the Chairman's question. National Park, Heathcote, Waterfalls, a portion of Gordon, Dobroyd, Hornsby, Beecroft, and Carlingford.

Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

983. These works were all under the control of Mr. Deering? Yes; and in full swing at the time we took charge.
984. They are now under the supervision of the Casual Labour Board? Yes; but many are completed.
985. Have the works which have been carried out under the Casual Labour Board been of the same character as those which have been carried out on this ground? Yes; in fact, the work we have done in the Government lands, in the subdivisions we have had under our control, has been of a better character than this.
986. You were asked a question as to the character of the work that was undertaken without the authority of a full meeting of the Casual Labour Board, that is, that small works were authorized by individuals members of the Board, and larger ones by the full Board. You have had some experience of municipal matters? Yes.
987. And is it not the general custom in all municipal matters to allow either one or two members of a Council to construct works up to a certain stipulated amount? Yes. Practically, in this case, I was the mayor, as it were, the executive head, and any small representation made by the superintendent of any of the works that I believe to be to the public interest in any way was attended to.
988. So that the custom adopted by you is the practice which governs municipalities generally? Yes; the uniform practice.
989. *Mr. H. Clarke.*] Do you say that the formation of these roads through the property of Messrs. Burns, Withers, and Smith does not increase its value? Incidentally it does.
990. Does it improve it to a greater extent than the actual land they have lost? Of course, it would be only a matter of opinion. I do not think it does. You take 25 or 30 acres from them at £100 an acre.
991. The formation of these roads surely would improve the property? Of course, in every way, incidentally; all roads do that.
992. *Mr. Brunker.*] I should like to have some information with regard to the action of Sir Henry Parkes with reference to the Casual Labour Board;—you say that none of the works were carried out until the propositions were confirmed? All works initiated after our appointment were approved of.
993. Sir Henry Parkes could have had no knowledge of the details? No. They approved on the reports of the proper officers.
994. So that you received in each case first a report from the Government Surveyor, Mr. Gordon? Either from Mr. Gordon or from Mr. Deering.
995. Mr. Deering had nothing to do with it? As the metropolitan surveyor, he had to do with it, in making report on the subdivisions of the Crown lands, which were sent to the Lands Office, and the Minister for Lands sent them on for the approval of the Colonial Secretary.
996. That is for subdivision? Yes; on large estates which had been cleared and roads formed through them. These reports were sent to us, and our officers would then report again, so as to make doubly sure that it was work that would warrant us in undertaking it, and if satisfactory, we would recommend it as a Board for the approval of the Colonial Secretary, and then approved, so that all work initiated by us had Ministerial authority.
997. Notwithstanding that petitions were sent in from local residents, was it the custom of the Board to make full inquiry through Mr. Gordon before authorizing the work? Through Mr. Gordon and Mr. O'Donnell; nothing was done without a report and full inquiry.
998. You know something about the country. What is the general character of it? It is rugged. There is a good table-land, with soil very rich and fine for fruit-growing, very suitable for orchards and homesteads.
999. Although you say that you have no professional knowledge, is it your opinion that the roads are being formed so as to fall in with the formation of the country? Quite. These roads open up about 2,000 acres of Crown lands for sale, and there is any quantity of Crown lands besides—thousands of acres.
1000. In answer to a question you said that no works had been initiated except by a petition from the Lands? I said that no work had been initiated by us unless it came from the Lands Office or by petition. These subdivisions came to us from the Lands Office to the Colonial Secretary. They were then sent on to us. Mr. Deering recommended that these subdivisions and the clearing should be done at Narrabeen, French's Forest, and Dobroyd.
1001. Before you came into power? No, since. They were recommended by Mr. Deering. Mr. Garrett sent them on to the Colonial Secretary, and the Colonial Secretary sent them on to us. We still got our own officer to report upon them, and if he concurred with Mr. Deering's recommendation, we recommended that the works should be carried out for the approval of the Colonial Secretary.
1002. One road you said was recommended five years ago? The Vanceville Road.
1003. That is a public road? A public road under the Roads Department.
1004. As a practical man, is it your opinion that this expenditure is in the interests of the public generally? Certainly. This land would not have been worth a five-pound note if it had not been for the roads made through it, and it will realize £30,000.
1005. *Mr. O'Sullivan.*] Frontage blocks are more valuable than blocks of land not served by roads? Corner blocks are the most valuable.
1006. Frontage blocks are more valuable than blocks not served by road? Oh, most certainly.
1007. Then the owners of this estate, if they desired to make their land valuable and saleable, would have been likely to carry out a certain number of roads? Of necessity they would have to form a number of roads; but not roads like B, C, D, E, and F.
1008. Do you consider that if these roads had not been constructed by the Government, they would have formed a lesser number of roads than on the plan? Yes; in a different direction altogether.

1009. But still, though in a different direction; they would have given access to the Crown lands? I cannot answer that; I do not know how they might have put their roads. The greater part of their estate has no roads provided.

1010. You refer to the Vanceville Estate; that is now owned by other people? I thought Mr. Burns owned it.

1011. You said just now that they had given 15 acres for the Junction Road, and so many acres for other roads, and that the land was worth £100 an acre? Yes.

1012. Would it be worth £100 an acre if those roads were not made there? Of course, without access it would not be worth anything.

1013. Then if they have given the Crown an advantage the Crown have increased the value of their lands? That is incidental.

1014. You said just now that it is usual for those who subdivide private estates to calculate on a loss of one-fifth? Yes; to give roads through.

1015. And you said that on this estate more than one-fifth had been given? Quite so.

1016. Do you mean to say that these roads represent more than one-fifth? Yes; a great deal more.

1017. Given 15 acres for Junction Road, and about 10 acres for each of the others, there would be 100 acres altogether in main roads that would represent a total amount of 1,500? I do not know what the area of the estate is. Unless I had the scale I could not tell.

1018. It is understood, I believe, that originally the estate was 1,600 acres, and they have sold the Vanceville Estate? I have been told there were 700 acres altogether.

1019. Do you think that more than 100 acres have been given for roads? I do not know what their land is, and I could not speak unless I knew whose land it was. Judging from this tracing here, I should come to the conclusion that more than one-fifth had been given by the proprietors for roads.

1020. And these roads do not include more than 100 acres? I do not know what the quantity is altogether. I am certain that if it was your land or mine we would not have cut it up in that form.

1021. But you admit that if someone had not done the work they would have had to do it? Not in that form.

1022. But in doing so, you would have to comply with Mr. Reid's law, and give away land to the public? Yes.

1023. In point of fact, if they had subdivided the estate, they would have had to give the land, as they have given it? They would have had to give the land for streets; they could not sell it otherwise.

1024. In an ordinary business way they would have laid out the land in rectangular blocks? Yes, so as to give them the best results.

1025. In doing that they must have given access to the Crown lands? I cannot answer that.

1026. You said just now that the Board always consulted Mr. Gordon about the roads? Mr. Gordon, Mr. O'Donnell, or one of the superintendents.

1027. Then you did not always consult Mr. Gordon? Mr. Gordon had not control over all the roads, only over a certain portion.

1028. Mr. Gordon has not been out there during the past twelve months? I think he has.

1029. If he swears that he has not been out there there must be some error? Yes.

1030. Mr. Houison swears that he has not been out there for five months, and Mr. Gordon for twelve months, and that therefore he knows nothing about the roads marked on the plan? I think if you look at his plan, you will see that at the latter part of the first month of the year he reported to us—and this is November—so that it cannot be twelve months since he was out there.

1031. At all events he said he had not been out on the land for that period? No; he drew it up from being on the land.

1032. *Mr. Brunker.*] You were asked just now whether land with a frontage was not more valuable than any other portion of land;—is it not a fact that everybody has a frontage in a subdivision? Of course.

1033. But of course there are some lands that have special value? Corner blocks, and those nearer the station, have greater value.

1034. That special value would apply in a case like this. Supposing that the road marked D ran along the top of a ridge, and that the allotments on each side ran into deep ravines, and that another road, say Junction Road, was on a plateau, would not the frontages to the latter road be worth double the value of those on road D? Three times as much.

1035. *Mr. O'Sullivan.*] If corner blocks are most valuable, the more corner blocks you have the more valuable the land? Yes.

1036. And the more roads you make the better? Yes.

1037. *Mr. Brunker.*] Although a large area of land may have been given by the proprietors, from your practical knowledge can you say that that is not the form in which the land would have been subdivided by private owners? Certainly; it is not done as one would do with his own property.

1038. *Chairman.*] Referring to your document of authorization, I see that the Colonial Secretary says that there would be work to do in making tanks, works of irrigation, deepening water-courses, &c.;—have the unemployed been put on works of that description? No such works have been authorized.

1039. But are not these general instructions here? Yes; but still we have not been able to embrace them because there has been no work of that character.

1040. Have any men been put on the railways? Some men at Pearce's Corner.

1041. Did you at any time get any petition from the inhabitants of this district for the erection of a platform on the Hornsby line? I have no recollection of any such petition; it would not come within our scope; we are concerned only with roads.

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

1042. You have received no representation from Government officers? Not for the construction or erection of a platform, to my knowledge.
1043. How many visits have you made to the ground at Hornsby? I suppose I have been there about sixteen or twenty times altogether within the last eighteen or nineteen months.
1044. Have you seen all the additional roads marked on this plan—those coloured in a fainter red? I think so.
1045. Do you think that all these roads are necessary for the simple purpose of access? Yes.
1046. They are all necessary? All necessary. As I have said before, the Crown lands would not be worth a five-pound note unless these roads of access had been given.
1047. Would it not have been better to have made fewer roads; because it is clear, on your own showing, that they could utilize fewer roads there, and to have made the roads on the Government property on the other side of Boundary Road? I do not think so; because the more roads of access you give to Crown lands, the more value you give to this estate.
1048. But if, according to your showing, the value of the land has improved from being worthless to £100 an acre on Burns, Withers, and Smith's Estate, by the making of these roads, would not the value increase in equal proportions on the Government side, providing you had access? I do not mean to say that our making the roads on the land gave it that value, I only gave you the value of the land.
1049. Did you not state that the land would be worthless if the roads had not been made? As far as the public estate was concerned, not these people's property. You misunderstood me. I stated that the Government land would not be worth a five-pound note without the access.
1050. But prior to the Board, was it not the custom of the Government to form the roads on their own property, and then to make too many roads on private property? I never knew the Government to make any roads by unemployed labour other than public roads.
1051. In cutting land into subdivisions are you not obliged to make roads? The private owners of the land would have to do it.
1052. Have you made any roads on the Crown lands? Yes, they are all of them formed and made.
1053. Any of them metalled? Not metalled—no.
1054. Some of the roads to the south of the boundary-line are metalled? A little; but then I may say that all the material that came for the ballasting of these roads came out of the people's own property.
1055. You tell the Committee that those were not the roads that would have been made in the interests of private owners? I simply say that if it was my property I would not subdivide it in this way.
1056. As a matter of fact, have you not told us that some of these roads were commenced by private owners? The clearing of Burns Road was commenced before my time.
1057. And have not other roads you commenced been partly done? Yes.
1058. You have cleared roads already commenced to be cleared? Yes.
1059. Is not that an evidence that the owners would have made these roads? It is quite possible that they would have done so.
1060. But it is not an argument that they did intend to do it? Well, of course; it looked like it. It is an evidence that they had made a start.
1061. *Mr. Brunker.*] But you do not mean to say that the owners of private property subdivided the property in that form? No.
1062. *Chairman.*] But are not the roads B, C, D, E, and F, which are said to be not to the interest of private owners, absolutely necessary to give communication to their property from any population that may be settled to the north of Boundary Road? It is absolutely necessary to get to Crown lands.
1063. Supposing you were the owner of this estate, would you not, in laying out the roads to give access to the north, have in view the intersection of these gullies. For instance, you would not cut up a street leading into a gully; you would go further to the right? If it was my private property I would endeavour to form Boundary Road, and save the land.
1064. But that not being possible, would you not have gone to the east of the first gully—Spring Gully;— would you not have gone to the east of that? I would not be concerned about that, as long as I had roads to give me frontage.
1065. Would the roads be of use to sell the land if they did not continue to other roads? There are no roads there.
1066. But anyone cutting up land has a prospective population in view? They look to see what they can get in the market.
1067. But does not the prospective population increase the value in the market? It may do to some extent; but these roads you speak of were absolutely necessary.
1068. But are they not beneficial to the private owners? Incidentally. All roads you make will be.
1069. Then the greater number of roads on private property the more value it will be to private property. The greater number of roads you have the greater advantage to the property. But if it was my property I would not have cut it up in that form. I would subdivide it in a form that would give me better frontages.
1070. But if you could get the roads made in that form without any expenditure of your own, you would consent to it? Yes; as these people did. But after all, one balances the other, the value of the land as against the work done on it. I would value the land more than the money spent.
1071. But then land must be given in any case, whether private owners make the roads or the Government make them, is not that a fact? Yes.
1072. And the more roads the greater the value of the property? The more roads the greater the convenience, of course.

1073. You tell us that you had your recommendation for these roads either from Mr. Deering or from Mr. Gordon? I think you will find that Mr. Gordon recommended about those roads. The papers will show it.

1074. Mr. Deering recommended none of them? Mr. Deering recommended one of them just at the time we took office.

1075. That was the road then being cleared—road A? Yes.

1076. Then Mr. Gordon has recommended all the rest? Yes; and the Board, that is Mr. Houson and Colonel Wells, have visited the locality and approved before anything was done.

1077. First of all came his recommendation? Yes.

1078. Then if Mr. Gordon said, in answer to this question:—"Can you say you gave instructions to clear and form any of these roads?" "I only know one road, that is Junction Road," and adds as a foot-note to make himself more correct, when revising this: "I never gave an instruction to carry out any of the roads; it was recommendations only, and that recommendation was to ballast Junction Road; clearing was already done";—that is not correct? No. You will find from his own reports that he recommended that all these works should be carried out, and we then got the recommendation of the Board, and the work was carried out.

1079. *Mr. Brunker.*] Is it not apparent to a business man that although these main roads—Burns Road, Junction Road, Vanceville road, I road, and H road—might be beneficial to the owners of a private estate; these minor roads leading to the Hornsby Station are only beneficial to the Crown lands? Certainly.

1080. *Chairman.*] But is it not equally clear that the number of these roads—the road running parallel with the railway, the continuation of Boundary Road, and this T road, commenced in a mistake—is unnecessary for roads of access? I do not think so.

1081. Could we not have access to the Crown lands and dispense with a number of them? You could have had access with one road alone.

1082. But could we not have equal access without the T section? You would dispense with the whole of that. It is only cleared.

1083. And we could have equal access? The more roads you have there the better it is.

1084. For the people and the railway station? Yes; and for the public. The railways are the people's property, and the roads are the people's property, for all time.

1085. But you said just now that they are roads of access only? Access to the Crown lands.

1086. But considering the present state of population are these roads at all necessary? I think they are now; and taking your view of the prospective population, I think they are very wisely done.

1087. *Mr. Brunker.*] You know that the railway from Hornsby Station to Vanceville Road is in course of construction? Yes; and very nearly finished. It will be finished by the end of the year, I think.

1088. Is it not an advantage to the Crown lands that these roads—the Vanceville Road, the H road, the C I road, and the B road—will give access from the Crown lands to the Hornsby line at different points? No doubt. I have already stated that.

1089. And that being the fact, must it not naturally tend to increase the value of Crown lands? The greater the number of roads you have the more valuable they are.

1090. *Chairman.*] But instead of making so many roads leading to and giving access to Crown lands, when a fewer number would have done, would it not have been more conducive to the value of the public estate to have formed the roads on Crown property? No, it would not; because the Crown property is not worth anything without these roads of access.

1091. But is it worth anything without subdividing it, and forming the streets? So they are formed.

1092. But would it not have increased the value of these lands more by having the roads ballasted, as they are to the south? I have no doubt it would.

1093. From your experience, has not that been the course adopted by syndicates or by owners of property? I do not think they have ballasted the roads. They have generally only formed the roads. The roads are cleared to a chain wide, and formed to half a chain.

1094. Have you done that on the Crown lands? Yes.

1095. You have formed them? Yes; but not ballasted them.

The Hon. John Davies, C.M.G., M.L.C., recalled and further examined, 12th December, 1888.

2868. *Chairman.*] You have had to do with the making of the roads through the Holt-Sutherland Estate shown on the plan before you? Yes; we have cleared, formed, and gravelled some of them.

2869. At whose instigation did the Board make these roads? Petitions were presented by numerous property owners in and around the district, and reports were obtained from our officer in favour of the works being carried out. Ministerial authority having been obtained, the works were proceeded with.

2870. Did you take any means to investigate the *bond fides* of any of the petitions? The names of any of the petitioners are those of well-known Members of Parliament and of persons of good positions in society, and I should regard it as an insult to them to make inquiries into their characters. I knew from their names and positions that there was no need to do that.

2871. How many Members of Parliament are property owners round this estate? I could not say that they are property owners, but they represent the district—Central Cumberland. I suppose the Members took an interest in the district in the ordinary way. I ought to add that when this work was initiated we had 5,000 men at the National Park wasting public money

Hon.
J. Davies,
C.M.G.,
M. L. C.
17 April, 1889.

- money in grubbing and rooting about among a lot of rocks. This was a legacy left to us by the gentlemen who had charge of the unemployed before they were handed over to the Board. When we took charge of them we regarded the work which has been done as being of greater utility to the public than the expenditure which was taking place at the Park.
2872. How many men had you employed upon the Holt-Sutherland Estate proper? 160 or 170.
2873. There are some Government reserves in juxtaposition to the estate? Yes.
2874. Have you cleared, formed, and gravelled any roads on that estate? We have made roads to some of the reserves.
2875. To which reserves? Well, the main road to Coronulla Beach goes to a reserve; the beach is a reserve for recreation purposes. There is also a reserve at the point for fortifications, or something of that kind. At all events, so we were informed.
2876. Are there any roads in that reserve? Not that I know of; but there is a road leading to it.
2877. Does not the road you speak of lead to the beach? Yes, but it goes close to the reserve.
2878. There are no roads on that point on the beach to the Government reserve? There is no direct road to the reserve. The Hungry Point Road, which goes through the whole of the reserve, was laid out, but it is not yet cleared.
2879. Was that road laid out by you? No; we did not lay out any of these roads. They were all surveyed before we had anything to do with the work, so far as I know. We have had authority to clear many of these roads, but we have not done so yet.
2880. Has any road from Sutherland to Kurnell been cleared? No, only partly; we had authority to clear the line of railway. A petition was presented; it was signed by seventy or eighty Members of Parliament.
2881. You have not done that work? We are waiting for the survey to be finished.
- 2881½. The line has not been surveyed? There is no defined survey, we are waiting for it to be finished.
2882. To whom was the delay attributable? To the Survey Department. This is a work upon which we have been anxious to employ the labour we had at our disposal. The Board were quite in accord with the prayer of the petition, which as I have said was signed by a large number of Members of Parliament. We considered the work to be a public work and a work of great utility, because it would be a means of assisting a number of manufactures to a site which it has been proposed to be used for noxious trades.
2883. Did you employ a surveyor in connection with any of these roads? No; but we have had overseers; some of these roads were surveyed as long as fifty years ago. Of course we have had to get surveyors to lay out the work for the men and to take the measurements of the work they did before they were paid.
2884. Did you employ Mr. Sanderson to survey any of these roads? Not in the sense of surveying.
2885. Was he employed to define the road? No; to piece off the work for the men. The road was easily defined because it was an old original survey. I am speaking now of the main roads.
2886. Do not the majority of roads which you have cleared appear on the subdivision of the Holt-Sutherland Estate? I know nothing about that company. I do not know any of the shareholders, and I have no interest in it directly or indirectly. I have never seen the subdivision to which you refer.
2887. Has it not come to your knowledge that the roads which were cleared were subdivisional roads of the Holt-Sutherland Company? I have never seen the subdivision.
2888. Would not the pegs be marked? I do not know that that would be so. The original history of that place would be found to be this—there was a number of Crown grants to old Mr. Laycock and others, and the property was afterwards acquired by purchase by the late Mr. Holt.
2889. Did you take any pains to ascertain whether the roads you were making were subdivisional roads? The only step I could take was the ordinary one of sending my superintendent to report upon the several petitions and applications we received. You could not expect me to go and report myself, seeing that I had no technical knowledge about road-making or surveying.
2890. When you received so many petitions apart from the main roads, did it not strike you that it would be advisable to examine the original plan for subdivision? No; that is a matter entirely in the hands of the superintendent.
2891. Did you never receive any report showing that these roads were in existence upon the subdivision of the estate? These are Government roads, and the owners of the estate, I believe, have adopted them in their subdivision.
2892. You knew that these roads were in the subdivision? I knew these roads were public roads, and adopted by the owners in their subdivision.
2893. *Mr. O'Sullivan.*] The clearing of the line of railway from Sutherland to the noxious trade site would have been a genuine public work? No doubt.
2894. It was a petition for that work which you say was signed by over sixty members of Parliament? Quite so. As I have already explained, we have the authority for the work and are anxious to carry it out, but we could not do so, because the survey is not complete. It would be folly to attempt to form a line of our own. As soon as the survey is finished we are willing to proceed with the work. It is a work which, I think, ought to be proceeded with.
2895. As a matter of fact, the work petitioned for by these Members of Parliament has not yet been carried out? Just so, for the reason I assign.
2896. Knowing as you did from the papers supplied to you that these roads were already surveyed, and that some of them were half-completed, how did you come to utilize the public funds

funds for the benefit of the Holt-Sutherland Estate? I think the work would benefit the whole community. A public road is a public property for all time. Some of these roads are as old as the Colony itself.

2897. But knowing beforehand that the work was about being done by the owners of this estate, why did your Department accede this request for roads? I had no knowledge that any subdivision was to be carried out.

2898. I understand you to say that you know from the papers that these roads were surveyed before, and that they were part of the subdivision of the estate. Knowing this, why did you construct, with the public money, roads which were in the process of being constructed by, or which would have been constructed by private owners? How was I to know that. The great Illawarra Road, leading from Tom Ugly's Point to the Sutherland Railway Station, is an old road, and is the road to Wollongong and Kiama. Then there is the Silvanian Road, the Port Hacking Road, and two or three other old roads which were known to be public roads.

2899. Granting that there were four or five main roads which were said to be necessary for the public convenience, where was the necessity for the construction of the twenty-two roads as shown upon this plan? You are asking me now for a technical opinion as to whether these roads should or should not be made.

2900. I am asking you upon what principle you made these twenty-two roads? On the same principle that all roads in the Colony are made; they are public roads—dedicated to the public, and they were made upon the authority upon which all roads are made—namely, Ministerial authority. I have done nothing in connection with these roads, save by Ministerial authority.

2901. You are a medium between the Minister and the expenditure? That is all.

2902. Had you any knowledge that these twenty-two roads would serve any large number of people here? At the present time many of them would not.

2903. How many people are there residing about these roads who would be served by them at the present time? I could not say what the population of the district is, but I am told by people who visit the locality on Sundays and on holidays that there are thousands of people in the district.

2904. Residing there? No; visiting the district.

2905. But are there many persons residing there. Do you think there would be fifty families? I could not tell you how many. I have no doubt that you could get the information from the Holt-Sutherland people.

2906. I suppose that thousands of people who go out there pleasuring to whom you refer would use only the roads leading to the places of public resort? Yes.

2907. They are about four in number? Yes.

2908. Therefore the remaining eighteen roads would not be constructed for their especial benefit? No, not exactly; but all of the roads lead more or less to deep water—picnic places and so forth—to which people are in the habit of going.

2909. You said just now that there were formerly 5,000 persons at the National Park whose work you did not consider to be of public utility? Not as compared with this other work. As a member of the Casual Labour Board I may say that I consider roadmaking one of the most useful works in which you could be engaged. Whenever we saw that we could employ the surplus labour in roadmaking we did so, because we considered it to be a work of public utility—of far greater advantage to the public than the scrubbing and clearing of portions of the Park.

2910. But the Park is public property? Yes.

2911. But the roads you have constructed are constructed up through private estates? They are dedicated to the public and are public property.

2912. Have they been dedicated? Yes, most of them, I think.

2913. Most of them? I understand that most of them have been dedicated.

2914. You said just now that most of the roads shown on the plan were not made? That is so.

2915. Still it is your intention to make them? Of course it is, unless we are stopped.

2916. You propose to complete the original plan? We propose to continue the work as far as our authority will permit us to do so, provided the surplus labour lasts, and I am afraid that it will.

2917. How many miles of roads marked on the plan are not yet completed? Mr. Burrowes could tell you, but I could not. That is a matter entirely in the hands of the superintendent.

2918. Are you aware that over 43 miles of road have been completed? Between 30 and 40 miles of road have been cleared, I believe, but they are not yet completed.

2919. You mean cleared and gravelled? Nothing of the kind. Some are gravelled, some are only cleared.

2920. Is it your intention to treat these other roads marked on the plan in the same way? Not some of them; nothing more will be done with some of the minor roads. Although we have had authority to do more to most of them, we do not recognize that there is any necessity for doing the work.

2921. By the time you have completed these roads, there will be about 60 miles of them in this locality? I do not know what the measurement is. I could not tell you exactly; but I do not think there could be that mileage.

2922. *Mr. Carruthers.*] You have heard Mr. O'Sullivan speak of twenty-two roads. On this plan, I believe, the roads marked red are cleared, while those coloured in sienna are not commenced? That is so.

2923. If you look at the plan, I think you will see that there are fourteen roads coloured in sienna, and therefore not yet commenced? I believe so; but Mr. Burrowes could satisfy you on that point.

Hon:
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

2924. You believe that this plan is correct? I believe so. Mr. Burrowes' name is attached to it.
2925. I see that fourteen roads have been cleared? I think you will find that there are sixteen.
2926. What would you say is the utility of the main Illawarra Road? As I have already stated, that is a road between Sydney and Wollongong and Kiama.
2927. Is there a fair traffic on it now? A good traffic.
2928. Is it in contemplation to use the road for military purposes? It is a Military Road joining on to what we call the Sutherland and Loftus Roads, which goes right through the Park.
2929. What is the length of that road which has been dealt with? I could not tell you; but I have no doubt that Mr. Burrowes could. I do not want to guess at these things. It is a road passing through the Government reserve, and it is a road which has been under the control of the Roads Department for many years.
2930. Has it been in receipt of the annual mileage allowance? I believe it has, I could not say.
2931. Are you aware that Mr. Frederick Want and other gentlemen are trustees for a considerable number of these roads? I was not aware who the trustees were; but I presume there would be a trust, because it is one of the oldest roads in the Colony.
2932. Is the Port Hacking Road also a trust road? I am not aware whether it is a trust road. I know it to be an old Government road.
2933. You know that the Coronulla Road has been a public road for a considerable time? Yes.
2934. Has the bulk of your work involving an expenditure of money been upon these three roads? Yes. The principal expenditure has been upon these roads, they being the principal ones.
2935. Assuming that the total expenditure is over £8,000 you think you are justified in stating that the larger proportion of that amount has been expended on these three roads? The larger portion of the money has been spent on these three roads.
2936. You state that when you took charge of the unemployed there were great complaints about the work of the men at the National Park Camp? Yes.
2937. Did you receive any instructions to scatter them from that camp—to get them away from the National Park? We received instructions to try and employ their labour to greater advantage than it was being employed in the Park.
2938. You spoke of a large petition signed by Members of Parliament, the Chairman of this Committee—Mr. O'Sullivan—and myself, among others? Yes.
2939. Could you not go on with the work prayed for in that petition until the line had been surveyed? No; I have already stated the reasons why I have been delayed.
2940. When was the line surveyed? The survey is not complete yet.

Hon. John Davies, C.M.G., M.L.C., recalled and further examined, 18th December, 1888.

3084. *Mr. Carruthers.*] When we left off examining you last time you were speaking about the noxious trades site? I think you asked me how it was that we had not cleared the line for noxious trades, tramway, or railway.
3085. Are you aware of the noxious trades site as proposed by the Committee of the Upper House; have you seen the plan of it? I have already answered that question;—yes.
3086. Have you got a plan of that? No, I have not. This plan shows it.
3087. Are you aware that it was proposed by the Bill before Parliament some time ago and by the Select Committee to include all the land for the noxious trades site between Cape Solander and the Burrannear Road? That was proposed, but I do not know what became of it afterwards.
3088. Are you aware that a portion as far as Coronulla Beach was proposed as a neutral zone? Yes.
3089. To stop all habitation and industrial pursuits there? Yes.
3090. And from Coronulla Beach to the noxious trades site, marked green on the plan, as a residential area? Yes.
3091. And this for the noxious trades? Yes; quite so.
3092. *Chairman.*] You say that it was confined to the site marked on the plan? Yes.
3093. *Mr. Carruthers.*] This is a list of roads put in by Mr. Burrowes. Can you give me the lengths of the three main roads on that list? According to Mr. Burrowes, Port Hacking Road, 320 chains; the main Illawarra Road, 330 chains; the Coronulla Road, 180 chains.
3094. That makes 10 miles 30 chains? I suppose it would. I have not calculated.
3095. What has been the nature of the work done on the main Illawarra Road; It is an old public road as I have stated before.
3096. What is the width of that road cleared? Two chains.
3097. Is there any formation done? Yes.
3098. What width is formed? Half a chain.
3099. What width is ballasted? There is no ballasting at all.
3100. You are sure there is not some of it being ballasted? Just perhaps at the punt end there is a little being done now; just at the entrance of the ferry.
3101. Are you gravelling any portion of it? Yes; a portion of it. It is the main road.
3102. *Mr. Copeland.*] I should think there must be a mile of it done? Not half-a-mile.
3103. *Mr. Carruthers.*] Are you making any culverts on the Illawarra Road? Yes; pipe culverts. The portion near the station has been gravelled. The other portion approaching the ferry had to be widened, and it has been ballasted.
3104. You had to make some deep cuttings there? Yes; so as to relieve the steep grade leading down to the ferry.

Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

3105. Has the work you speak of on that road taken a large portion of the £8,000 Well a large portion has been expended on the three or four main roads.

3106. On the other two roads have you done any gravelling or any other work? Yes, the Port Hacking Road has been pretty well gravelled from one end to the other. The Coronulla Road is in progress. These three or four roads are the principal roads upon which expenditure has taken place, they being main roads.

3107. Have you gone to any expense for similar work on any of the other roads? No; we have simply done the clearing.

3108. I notice that here and there you have put in pipe culverts? Pipe culverts are the cheapest kind that can be put in. I see from a return which I hold in my hand, furnished by the officer in charge of the works, that 4 miles of the Port Hacking Road have been cleared, and that 4 miles of the road have been cleared and formed. I see also that $4\frac{1}{2}$ miles of the Illawarra Road have been cleared, and that $3\frac{1}{2}$ miles have been cleared and formed. Of the Coronulla Road $2\frac{1}{4}$ miles have been cleared, and $2\frac{1}{4}$ miles have been cleared and formed.

3109. You said, I believe in your former evidence, that you did not know whether these roads had been dedicated? I think I said that they had been dedicated—that they were proclaimed public roads.

3110. You know that all these roads have been dedicated? Yes.

3111. Take the Wollooware Road;—is not that an old track used by fishermen and others? Yes; for years and years I know that they have used it to get to their fishing-grounds and to get their fish to market for years past.

3112. Is it not also used by the lime-getters? I could not say.

3113. Take the Tareen Point Road;—is there any special advantage to be gained from the clearing and forming of that road? Yes, of course; that road leads right to the deep waters.

3114. Are you aware that on the opposite shore, at Sandringham, there is a Government tramway? I know there is a tramway there, but I thought it belonged to a private company.

3115. By the construction of the Tareen Point Road, would there be any saving of distance to people travelling from Sydney to Port Hacking and to the people living at Port Hacking? There is a saving of at least 2 miles.

3116. Would it not save something like 5 miles? I have not been over the distance myself more than once or twice.

3117. Is not the distance from Tom Ugly's Point to the Kogarah Station 3 miles, and would not the whole of that distance be saved? Yes; there is no doubt about that.

3118. At any rate it would at least effect a saving of 2 miles? I should say so from my casual observation. I have been over the distance only twice, and that was some time ago. I know that the road would save a considerable distance, because the road is more direct.

3119. Does any portion of the Tareen Point Road go through any private property besides the Holt-Sutherland Estate? Yes.

3120. Whose property is it? I do not know.

3121. Have you a plan of the National Park with you? Yes—a tracing. The portion tinted green shows the National Park.

3122. I see that its area is 36,320 acres? Yes.

3123. What is the main approach by road? The main Illawarra Road.

3124. There is also an approach by branch railway? Yes.

3125. But the main approach for vehicular traffic is by the main Illawarra Road? Yes; I believe that the train goes up to a platform in the centre of the Park twice a week.

3126. I notice from this plan that the southern shore of Port Hacking is to a large extent the foreshore of the National Park? Yes.

3127. Do the roads which you have cleared through the Holt-Sutherland Estate give access to the National Park? Yes; several of them. I have already stated that the roads leading down from the main roads go to the deep waters of Port Hacking and to the National Park.

3128. What was the general work of the unemployed in this locality when you took charge of them? When we took charge of the unemployed there was a system of free rations and free feeds. This the Board immediately stopped. The great majority of the men were upon day labour, and were receiving not less than 6s. a day, thus making the relief works very attractive, and causing the men to leave their private employ, and flooding the city with unemployed.*

3129. Where were the bulk of the men concentrated? At the National Park.

3130. Do you think that the work which they have been doing on the Holt-Sutherland Estate is an improvement in point of utility upon the work on which they were previously engaged? I have already said so. I do not see how the men could have been more profitably employed than upon the construction of roads which had been dedicated to the public. I think they were employed in a most useful work.

3131. Did you use some of the unemployed in making roads at Como and Heathcote? Yes, after the sale.

3132. Do you know whether, as a result of the making of these roads, the Crown lands were improved in value? If the sale had been delayed until the roads had been made a much higher price would have been realized; but the sales had been arranged, and they took place prior to the roads being made and the appointment of the Board.

3133. The same thing occurred at Heathcote? Yes; precisely the same thing.

3134. That is, the improvements were made after the sale? Yes.

3135.

* NOTE (on revision) :—This system was abolished by the Board, and piece-work substituted instead of day labour.

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

3135. Did the Crown lose? Yes; but it is only fair to say that the auctioneer who sold on behalf of the Crown said that the roads would be made. You will see from the papers that Sir George Innes called upon the Government to make a road in accordance with the promise made by the auctioneers.

3136. Did you also have charge of the work of the unemployed at Narrabeen? Yes.

3137. And at Harbord? We did not do much there. The sale took place before we took charge.

3138. You did not do much work at Harbord? We had to make some roads to give access to the Crown lands. These were made upon the recommendation of Mr. Surveyor Gordon. Certain roads were made to give access to the Crown lands.

3139. *Mr. Copeland.*] Do you mean that the roads were to give access to Crown lands which were not sold? To both. The Harbord subdivision was sold prior to the appointment of the Casual Labour Board, but subsequently, upon the recommendation of Mr. Surveyor Gordon, roads of access were made to the sold and unsold portions of Crown land. I think there are only about 2 miles of road, but there are some heavy cuttings in it.

3140. *Mr. Carruthers.*] Has any work been done at Narrabeen? Yes; about 65 miles of roads have been cleared, 19 miles have been formed, and 10 miles have been formed, metalled, and blinded.

3141. Have you any idea of the cost of that work? I know that it cost a considerable sum.

3142. Were any of these roads at Narrabeen through private property? Yes; there was the road through Miss Jenkins and the road through Wheeler's.

3143. *Mr. Copeland.*] What was the length of these roads? One would be about half-a-mile long. I do not suppose that the length of all of them would exceed $1\frac{1}{2}$ mile to 2 miles.

3144. *Mr. Carruthers.*] Are there any cross roads from these roads? No; the subdivision of the Crown lands takes the cross roads. These roads were to give access from the Pittwater Road to the Crown lands subdivision at Narrabeen.

3145. *Mr. Copeland.*] With the exception of these $1\frac{1}{2}$ mile of road, the whole of the rest of these 65 miles of road were through Government land? Yes, with the exception of a few chains belonging to Mr. Cousins of Manly Beach.

3146. Did these private owners contriquire anything towards the making of these roads? No.

3147. Did they give the land? Yes; but in one instance we had a difficulty in getting the land, and that was the cause of some delay. We got the land eventually.

3148. Did the land on both sides of these roads belong to one owner? In one case it did; in the other it did not.

3149. What was the difficulty to which you have referred? Well, some of the people did not like to part with their land. They thought that the Government would be eventually compelled to take the land and to give them compensation. I assured them that the construction of the roads would be of great advantage to their property.

3150. Did you form these roads? Yes; we formed and ballasted them. One was a very difficult road to make. It passed through a swamp, and we had to make the foundation with bundles of faggots. Although it was a short bit of road it was very expensive, but it was absolutely necessary in the interests of the Crown that it should be made. There has been a sale which has been a great success. The first subdivision nearly all sold, and fetched a long price.

3151. You are referring now to the Crown lands subdivision at Narrabeen? Yes. I believe the first sale realized about £29,000.

3152. Was that a better sale than the Harbord sale? A much better sale.

3153. You did nothing like the work at Harbord that you did at Narrabeen? We did very little work at Harbord.

3154. How do you account for the sale at Narrabeen being so much better than the sale at Harbord? Simply because the roads were only cleared at Harbord, whereas in connection with the subdivision at Narrabeen they were cleared and formed also. That is a great advantage.

3155. Is not the Narrabeen land better land? A great deal of it is bad land; it is very rocky. The land at Harbord is much better. I think you will find that at the next sale at Harbord you will get double the price for the land—that is, having regard to the roads which have been made. Of course it would not have been worth our while to make the roads unless we were to get a better value.

3156. You stated just now that the bulk of the expenditure upon the Holt-Sutherland Estate had been made upon the Port Hacking Road, the main Illawarra Road, and the Coronulla Road? Yes; and also upon the Woronora Road. Those are the four principal roads.

3157. Are you aware that Mr. Burrowes has handed in a statement showing that a great deal of expenditure has taken place in connection with other roads? I am aware that a great deal of other work has been done, but I cannot speak as to the length and width of the clearing in every case.

3158. Are you aware that the Burrannear Road has been cleared for 144 chains for a width of a chain and a half? I know that a great many of these roads had been partially cleared before. As far as I know this road has been cleared, but I could not say for what length.

3159. I suppose you have no doubt that the length supplied by Mr. Burrowes would be correct? It may be.

3160. Are you aware that he has supplied us with the information which I have just read with regard to the Burrannear Road? I was not aware of it.

3161. Are you aware that three culverts and one bridge have been erected on the road? I was not aware of it.

3162. But you do not dispute it? No.

3163. Are you aware that 180 chains of the Wotonga Road has been cleared, that 45 chains have been gravelled, and that four culverts have been made on one section of the road? I was not aware of that. I think it is only fair to say that fully 20 miles of these roads had been cleared by the owners of the estate before we had anything to do with them. Mr. Burrowes does not subtract that work, I take it.

3164. He sends in a return showing a list of roads cleared, formed, and improved on or in connection with the Holt-Sutherland Estate by the unemployed? Yes; but we did not clear these roads. I do not mean to say that the old Illawarra Road, for instance, has not been widened, but it was partly cleared before, and had been so for the past fifty years. If you want to get a correct statement as to the amount of work done in the case of each road by the unemployed I do not think this return will show it to you. I know that we have not done as much work as that mentioned in this schedule.

3165. But this return is supplied to us as the amount of work which has been done by the unemployed? Then it is misleading. These old trust roads were cleared long before we had anything to do with the work.

3166. Now take the Malvern Road. Are you aware that Mr. Burrowes states that this road has been cleared for 165 chains by a width of a chain and a half? I am not aware.

3167. Are you aware that out of this quantity 93 chains have been gravelled, and that three culverts have been made? I am not aware of that. I cannot speak as to the distance.

3168. Then on the Station Road. Are you aware that half-a-mile by a chain and a half of that road has been cleared and that the whole of that half-mile has been gravelled? Yes.

3169. It leads to the railway station? Yes, it leads to the railway station.

3170. Then there is the Lilli Pilli Road. 150 chains of that has been cleared? I am not aware of that.

3171. The Euronga Road, 30 chains, and the Orara Road, 64 chains? I was not aware of that.

3172. Are you aware of the work which has been done upon the Karimbela Road? I could not tell you what work has been done.

3173. I am merely mentioning these distances because they have been given to us by Mr. Burrowes the superintendent? I only know the distances from what you tell me. I have not seen the statement. I have no knowledge of it.

3174. Mr. Burrowes says that 67 chains of the Karimbela Road have been cleared to a width of a chain and a half and that 261 chains of the Sylvania Road have been cleared to the same width? I know that these roads are cleared, but I do not know to what length.

3175. He also says that 110 chains by a chain and a half have been cleared on the Bath Road? I know that the road is cleared, that is all.

3176. He tells us that 319 chains on the Boulevard Road have been cleared by a chain and a half? I know that the road has been cleared, but I could not say to what length.

3177. That 92 chains by a chain and a half had been cleared on the Yowie Road, and that 250 chains on the Forest Road have been cleared, each by a chain and a half? I know the roads are cleared, that is all.

3178. He tells us that 175 chains by a chain and a half have been cleared on the Corea Road? I am not aware of that.

3179. And that 60 chains by a chain and a half have been cleared on the Eton Road? I am not aware of that.

3180. He also tells us that certain distances have been cleared on the Willarree and Camera Roads? I know that some clearing has been done, but I could not speak as to the length.

3181. If these statements have been made by Mr. Burrowes I suppose there was no doubt as to their being correct? I have great doubt.

3182. *Chairman.*] But have you not confidence in your own superintendent? Like you and me he is liable to make mistakes, and I think he has made a great mistake here.

3183. *Mr. Copeland.*] In that case would you not consider it necessary to inquire into the matter yourself? I think it would be better for this Committee to send out an independent surveyor to make inquiries for himself.

3184. Is not Mr. Burrowes a surveyor? Not a licensed surveyor.

3185. But he is a practical surveyor and a road engineer, is he not? Not that I know of. I have no knowledge of his engineering skill. With Mr. O'Donnell and a number of others he was appointed before the Casual Labour Board came into existence. We have had to get rid of a number of men, but we have not made one appointment since we took office.

3186. You know that Mr. Burrowes has held a responsible position in Queensland? From his own statement.

3187. Have you any reason to doubt his capability in measuring the width and length of roads? I have.

3188. How long is it since you first had such a doubt? Within the last month or six weeks.

3189. Since this Committee has been in existence? No, before that.

3190. Did you take any steps to dispense with his services, or to call him to account? No; I called him to account. I wrote him a letter. I had occasion to complain of what appeared to be want of skill and attention to his duties in connection with the Woronora Road.

3191. What is the date of that letter? It is dated some time last month.

3192. Did he afterwards satisfy you in the matter? He gave an explanation which was deemed satisfactory.

3193. But you do not doubt his ability to measure a certain number of chains? No; certainly not.

3194. Do you doubt his honesty? No; but I think he is neglectful in his duty sometimes.

3195. Then in all probability the width and length of the roads given here is approximately accurate? No doubt; but I think it would be much more satisfactory to this Committee if

they

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

Hon.
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

they are in search of truth to get some gentleman from the Roads Department to take the measurements.

3196. *Chairman.*] Surely you can trust your own officer? I think he is out in his measurements here.

3197. *Mr. Copeland.*] You were appointed head of this sub-department by the present Premier? Yes.

3198. Are you considered to be on the Civil Service List? No; but the paid officers of the Department are—that is, the accountant and the paymaster.

3199. But you yourself? Certainly not. I have not received a shilling for the services I have rendered, up to the present moment.

3200. You have charge of the financial arrangements in connection with the unemployed? No; I have not.

3201. What is the *modus operandi* in obtaining money from the Treasurer? The three members of the Board have to sign the paper applying for an advance. We have to furnish the vouchers, in conformity with the "Audit Act," to the Auditor-General. We generally apply for £6,000.

3202. In each case have the three members of the Board signed? Yes; in all cases.

3203. Having obtained your £6,000, what becomes of it? It is placed to the credit of the Casual Labour Board.

3204. Who signs the cheques? One member of the Board and the accountant; precisely the same as in the Roads Department.

3205. I suppose that you as chairman sign the cheques? Yes; they look to me to do the executive part of the work.

3206. Are there any instances in which some other member of the Commission besides yourself has signed? No; but in case of my absence, any one of my colleagues can sign.

3207. And the accountant? He has to countersign. All cheques have to be countersigned by him, no cheque is of any use without his signature.

3208. Who is the accountant? Mr. Hinchcliffe.

3209. Has he given any bond? Yes; a fidelity bond of £1,000.

3210. Have you given any? There is no occasion for me to do so; I never handle sixpence of the money.

3211. Is it not the custom in the Government Service for each head of a Department to give a guarantee? I am not aware.

3212. Are you aware that Mr. Bennett, the Commissioner for Roads, has entered into a bond for £1,000. That is quite a proper thing, he being a Civil Servant.

3213. And that Mr. Flynn, the Under Secretary, and other Under Secretaries have acted similarly? And rightly so, I think, they being Civil Servants.

3214. You have control over your own accountant? No, he is an independent officer put there by the Government.

3215. Is he subordinate to you? No; he is appointed by the Government and the Executive.

3216. Does he not work subordinately to you? He takes his instructions from us.

3217. Do you ever check his accounts? No; I do not.

3218. Do you know who does? They are checked by the Auditor-General's Department and the Treasury.

3219. Do these officers come to the offices of the Casual Labour Board? Yes; we had a Treasury official round a month ago. The accounts are furnished to the Auditor-General, and his staff go through them.

3220. What check is there to show that the men whose names are entered on the pay-sheets are actually there and have received the money? There is in the margin of the sheets the man's name and the quantity of work he has done at so much a yard, and it is carried forward. The man has to sign immediately opposite the money he receives, in my presence, in the presence of Mr. Hinchcliffe, and in the presence of the storekeeper. There are three names to witness the payment.

3221. The actual payment of the money? Yes; the men step up to the table, and the paymaster hands over the money with a pay-slip, so that the man knows exactly what amount of money he is receiving.

3222. How much money have you received from the Treasury altogether? Speaking from memory I should say that we had received up to date about £225,000; that would be in twenty months.

3223. Have you received any money from the Treasury direct for private disbursements? Not a shilling.

3224. What is the practice in regard to the stores;—do you supply the men with rations? Yes. When we took charge we found that the men were being charged 1s. 3d. per head for rations, and that there was no contract at all—nothing but a general order given by the Colonial Secretary of the day, Mr. Dibbs, that all the men were to be supplied with rations not exceeding 2s. a head per day. The contractor, Mr. Kidman, charged 1s. 3d. a head per day, and this amount was deducted from the men's earnings. The first month we were appointed we insisted in having public tenders invited, and that the Government should call for a contract for larger rations than the men had been accustomed to receive. For instance, the men were getting only a pound of beef, and we thought that they should receive a pound and a half, seeing that they were working hard. The Colonial Secretary consequently invited tenders, and some thirteen or fourteen persons tendered for the supply of the rations at prices varying from 1s. 1d. to 1s. 9d. per head. The tender at 1s. 1d. was accepted. It effected a saving of £30 a day at that time, or £1,000 a month. It was all in favour of the men, because they had larger rations and less money to pay.

3225. Do you know when you were appointed to the Casual Labour Board? On the 2nd May, 1887,

Hon
J. Davies,
C.M.G.,
M.L.C.

17 April, 1889.

3226. You say that you have since received no salary or emolument of any kind? I have not.
3227. Do you expect to receive any? Most certainly I do.
3228. Can you tell the Committee what you expect? I expect to receive the ordinary fees given to members of Boards.
3229. I suppose you will make a claim for the amount? No doubt.
3230. Were you appointed to the Legislative Council before you were appointed to the position? I gave eight months' service before I was appointed to the Legislative Council. I do not expect to be paid for a period since I have been a member of that Chamber, but I expect to be paid for my services prior to the date of my appointment.
3231. Can you give the Committee the date on which you commenced to use the unemployed upon the property of Messrs. Burns, Withers, and Smith, and upon the Holt-Sutherland Estate? The papers will give you the dates.
3232. Which papers? The papers laid up the table.
3233. Could you not tell us the month? It would be impossible for me to say from memory. There are twenty or thirty different places where these men were working.
3234. You say that you took the men away from the clearing of the National Park and put them on to these roads on the Holt-Sutherland Estate and other places? Yes.
3235. You thought that was a judicious course in the public interest? Yes.
3236. Were you not aware that there were miles and miles of roads through Government subdivisions upon which you could have employed these men? I was not.
3237. You were not? No, I applied to the Lands Department. I applied for information in reference to the different Crown lands subdivisions with a view to their being improved by the Board. Our desire was to obtain some return to the Crown for the moneys we were expending.
3238. Were these applications of yours in writing? No, they were verbal applications to the Minister direct.
3239. They will not be shown on the printed papers? Some of them may be, but not all of them. I spoke to Mr. Garrett personally. I went to see him purposely.
3240. You are aware now that hundreds of miles of roads could have been cleared and formed, and if it were necessary to find employment, metalled, upon Government subdivisions at Harbord, the Field of Mars, and other places? I am not aware, as we have done so in all the places you refer to. We have carried out the same work as at Narrabeen, only perhaps not to so large an extent.
3241. Did you make any roads upon the Heathcote subdivision? We are making them there. The sale took place prior to the Board's appointment.
3242. But you have made roads since? We are making some now.
3243. When did you commence? The work has been in hand for some time past. For some six or eight months. It is only a small subdivision.
3244. What I want to get at is this: Are you not aware that there were any number of roads from Crown lands subdivisions upon which the so-called unemployed could have been employed instead of their being employed upon these private estates? No. Such places as you mention do not exist. No Crown lands subdivisions other than those through which we have made roads have existed during the time I have had charge of the unemployed.
3245. How many chains have you cleared and formed at Harbord? At least 2 miles. There is a good deal of cutting through hard rock.
3246. You can hardly be expected to know how many chains remain uncompleted? I could not say.
3247. Are there not any number of incomplete roads upon the Government subdivisions of Harbord, Gordon, Heathcote, and the Field of Mars? All the roads in the subdivision have been cleared and formed as far as the Field of Mars is concerned. There have been 69 miles of roads cleared on the Field of Mars Common by the Casual Labour Board.
3248. Is that since you took charge? Yes. 44 miles have been cleared and formed, and in addition to this three bridges, twenty-nine culverts, and six crossings have been made.
3249. How many chains have been metalled? I do not think any metalling has been done.
3250. Do you mean upon any of the subdivisions? There is some on some of them, but I could not say what quantity. As far as Harbord is concerned the roads made by the Casual Labour Board there are ballasted and metalled.
3251. Are there not miles and miles of roads through Government subdivisions which are not formed and ballasted? I am not aware of that. Wherever we have had a Crown lands subdivision we have thought it our duty in the public interest to form a road. I do not know of any subdivision upon which we have neglected to do this.
3252. Do you know whether all the roads on the Heathcote subdivision have been formed and metalled? No; because there was a sale prior to the appointment of the Board. The land was simply cleared.
3253. Are all the roads through the unsold portions cleared, formed, and metalled? The roads are in course of formation.
3254. I suppose the same answer would apply to all the Government subdivisions? Yes; much the same.
3255. These roads were there for you to go on with at the time you commenced on these private estates? Yes; but the unsold portions are very small.
3256. I suppose you know that there are over 4,000 acres at Gordon? Yes; but the subdivision roads have been cleared and formed.
3257. How many are there on the Liverpool Common? About 30 or 40 acres. We are waiting for Ministerial authority for that work.
3258. *Mr. Copeland.*] Can you say when the petition for the clearing of the railway track to the noxious trades site was presented to you? I could not say.
3259. When was it dealt with by you? On the 2nd of June, 1887.

Hon.
J. Davies,
C.M.G.,
M.L.C.
17 April, 1889.

3260. What difficulty existed in the way of your putting the men on to clear that track? The survey of the line of railway was not completed.
3261. Did you take any steps to get the survey made? Yes.
3262. What steps did you take? I communicated with the Railway Department, asking them to hurry on the survey, as we had authority to clear the track.
3263. Is there any letter in the printed papers showing your request. The request was made to Mr. Sutherland direct.
3264. Not by letter? No.
3265. It was a personal application? Yes. I had to make a great many at that time. Having regard to the number of men who were flocking in at the time, I could not wait for the usual red-tape routine.
3266. Have you since June, 1887, made any application to get this survey work completed? Yes. I have seen the Minister three or four times about it. He subsequently gave instructions to the surveyors, and they have been at work for about three months.
3267. Then I think they should have completed the survey? It is not quite complete, I think.
3268. Although they have been three months at the work? Yes, off and on.
3269. Have you employed any men upon the portion of the track which has already been surveyed? No; it would not be a prudent thing for me to attempt to clear the track until the survey had been approved. I think it is a national work, and that it ought to be pushed on with great speed. I am quite in sympathy with the petitioners.
3270. Have you formed any estimate as to the increased value of the Holt-Sutherland Estate by reason of the making of these roads? I have not. That is a question which would not arise so far as I am concerned.
3271. You have no opinion to express upon that point? No.
3272. You said as a reason why the Coronulla Beach Road should be made was that thousands of people visited the seaside? Yes.
3273. When you said thousands I suppose you did not mean thousands literally? What I said was that thousands of people visited the locality in holiday time; they come by rail, and drive out in private traps and in buses; I have myself seen 500 people upon the beach.
3274. On one day? Yes.
3275. *Chairman.*] Was it a picnic? There were a number of private picnics. The people came out in buggies or traps.
3276. It was not a public picnic? Not that I know of.
3277. *Mr. Copeland.*] What is the general traffic on that road? There is a good deal of traffic upon it. On a Sunday when I have been out there I have seen as many as forty or fifty buggies upon that road.
3278. Have you seen that number on this one road? Well, on the beach.
3279. And have you at the same time seen other buggies on other roads? There is a good deal of traffic of the ordinary kind on the Port Hacking Road.
3280. The whole of the traffic on that estate would have first of all to cross at Tom Ugly's Point? Well, those who came by rail would not need to do that.
3281. Have you any idea as to the amount of traffic crossing in the punt? No; I have seen it frequently loaded with traps coming across; I have been on it myself when there have been three or four vehicles.
3282. Would you be surprised to hear that the total number of coaches, carriages, and buggies, and so forth, that crossed at Tom Ugly's Point both ways amounted to only 109 for the whole of the month of November? I could not say whether that is so.
3283. Would you be surprised to hear that there were 279 carts and waggons, and that there were in addition to that 128 coaches, carriages, and buggies, making a total of 407 vehicles? I could not have any knowledge upon that point. I do not know what number of vehicles would be likely to cross.
3284. *Mr. O'Sullivan.*] Do you know a road leading from the Loftus platform right through the middle of the park called the Lady Carrington Road? I am not aware of any such road. The road leading from the Loftus platform is called the Audley Road.
3285. At all events there is a well-defined road in the centre of the Park? Yes.
3286. It is also reached by the Illawarra railway? Yes; the railway goes right through the Park.
3287. So that passengers to the Park have ready access by the Illawarra railway, by a branch railway, and by the Audley Road? Yes.
3288. All of these give direct access to the Park? Yes.

End of evidence before Select Committee.

10185. *President resuming.*] Was that evidence submitted to you for revision? It was.
10186. Having heard it read over, do you now wish to make any correction or explanation? In reference to my answer to question 795, minutes of about twenty-five meetings were kept, and after that there were the records regularly kept of the action of the Board; and with reference to my answer to question 819 I can give some further explanation later on.
10187. With those exceptions, is that evidence which has just been read over to you true and correct in every particular? It is.

TUESDAY,

TUESDAY, 23 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.,

| T. F. WALLER, Esq., J.P.

The Hon. John Davies, C.M.G., M.L.C., called in and further examined:—

10188. *President.*] Have you the summons that was served on you to attend here? I have not. I am here in obedience to the summons.

10189. You were summoned on the 19th of March last? I could not say that I was summoned on the 19th March—not from memory—but I have no doubt the date is correct.

10190. Did you attend then? I did attend.

10191. Were you ready then to be examined? I was.

10192. Did you ask the Secretary to this Commission to be excused attendance on that or a subsequent day? Never.

10193. Are you sure? Never. I do not understand the nature of the question.

10194. Did you ask the Secretary to have your attendance excused on the 19th of March, or on any other date? No; I simply asked the Secretary to avoid summoning me on a Thursday, as it would entail a loss if I did not attend a Board meeting. That was the only exchange of words between the Secretary and myself. It was merely to avoid a loss to myself that I asked him that.

10195. Did the summons ask you to produce any books and papers you had in any way relating to the Casual Labour Board? Yes.

10196. Have you any? I produce printed papers, copies of which have been laid upon the Table of the House. I presume you have got copies of them already, and a few letters marked private and confidential, from the superintendent. I think you have got most of these papers before; they are simply official papers laid upon the Table of the House and ordered to be printed.

10197. Have you any others? Not unless you want private papers.

10198. I ask you to produce all the books and papers you have relating to the Casual Labour Board? These are only private papers.

10199. Do you produce them? I shall produce them if the Commission insists upon them being produced.

10200. Do you produce them? If you want them I will give them to you.

10201. Do you decline to produce them? No; but I have no wish to put them in unless it is necessary. If the inquiry says it is necessary, I will produce them; I brought them because they might be useful during the inquiry, but if it is necessary I will give them to you now. It is not the first time I have been on a Commission. I have been President myself of two or three Commissions, and I know how they should be conducted. That is a report from Mr. Gordon upon my taking charge of the works; that is a copy of a letter I sent to the Colonial Secretary asking that money be put at the disposal of the Board for the purpose of paying wages; that is a copy of a ticket which I made each ganger produce showing to the gang all the moneys that were received.

10202. Have you any books—order-books or receipts—in your possession? No; I have receipts of money paid into the Treasury.

10203. Do you produce these? Yes. Here is another letter, marked private and confidential; I may as well put that in, too. That is all I have got, sir. There are a large number of receipts besides these I hand you, but I have not got those. These, I think, are some of them that were paid just as I was leaving office.

10204. Have you any other books, papers, receipts, butts, cheque-books, or documents of any kind in your possession, here or in your house, or anywhere else, beyond those that you have produced to me to-day? No; nothing more than I produce here.

10205. When the Casual Labour Board came into existence, what was the arrangement that was made for having the necessary funds supplied? An arrangement was made that advances of £6,000 should be placed to the credit of the Board from time to time, as required. The three members of the Board signed a formal application for the advance. If you have the papers here you will see the form of applying for the advance signed by three members of the Board, to be adjusted for in conformity with the Audit Act.

10206. Were there any written instructions given you? No; I received no instructions whatever except what are contained in the formal appointment in the printed papers. That was the only instructions that we had of any character.

10207. Is that the document of the 2nd May, 1887, addressed to you, Mr. Wells, and Mr. Houison? Yes, quite so.

10208. You had no other written instructions? No.

10209. From whom did you learn the arrangement as to the £6,000 advances—was that a verbal arrangement? Well, I think the Paymaster had more to do with getting the advances than anyone else. He had had experience in connection with the unemployed before they were transferred from the Immigration Department to the Casual Labour Board. I think he proceeded simply on the lines that were in operation before.

10210. How did you become aware of the bank that you had to deal with? By the Treasury. The Treasurer intimated that money would be placed to the credit of the Casual Labour Board in the Australian Joint Stock Bank.

10211. Did he intimate that to you in writing? No.

10212. Verbally? Verbally.

10213. Did you see the bankers and ask what arrangement you had to make to draw the money? Yes.

10214. Whom did you see? I saw Mr. Webster, the clerk in the Australian Joint Stock Bank.

10215. What was the arrangement? That cheques should be made out under the signature of the Chairman, countersigned by the Secretary, and in the absence of the Chairman, by any of the other members of the Board.

10216. Was there any arrangement made by which you were to have an overdraft? Well, that was an arrangement made, not by us, but by the Treasury officials. I may tell you that most of the operations of the Board were carried on by overdraft. We simply had letters of credit.

10217.

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10217. How were the moneys made available to the Board from time to time? By our continual application. As one advance became exhausted—and sometimes before it was exhausted,—in order to make provision for the pay of the following week, we would apply for an additional £6,000.
10218. Looking at these pass-books, I see the following sums credited:—7th June, 1887, £38 4s. 2d.? Yes, that is correct.
10219. 19th July, 1887, £113 9s.? Yes.
10220. 22nd August, 1887, £76 4s. 11d.? Yes.
10221. 16th September, 1887, £40 12s. 3d.? Yes.
10222. 21st June, 1888, £46 5s. 11d.? Yes.
10223. 24th September, 1888, £20? Yes.
10224. Do you know what these payments total up? No; I have not made them up, sir.
10225. Will you add them up and give me the amount? Well, perhaps you will ask your Secretary to make them up. I am not here to give you an account—to make-up accounts. I will give you evidence—that is what I came here for, but I am not here to make-up accounts. No doubt the Secretary can give it to you in a minute.
10226. What are these sums paid in for? For various purposes—principally, I think, for the sale of firewood. £20 was received, I think, from the Roads Department on account of Roberts' Bridge, Beecroft; £42 on account of sleepers from the Roads Department—sleepers that cost the Casual Labour Board £150. They were sent down on the estimate made by the superintendent that they could be delivered at Sydney Station at 22s. 6d. per hundred; the Board offered to do them at that price, relying upon the accuracy of the superintendent's estimate; we found that the weight of them alone was something like 4½ tons per hundred, and the consequence was that a loss was made of over £100 on the transaction. The total sum received was £42 odd, and the total cost was £150.
10227. You spoke of some sales of firewood;—who sold the firewood? Mr. Neale.
10228. Any one else? Not that I know of; not to my knowledge. A portion of the receipts I have given you to-day is for the proceeds of the sale of firewood.
10229. Where did you get the proceeds from? From Mr. Neale.
10230. Anybody else? Yes; £4 from Mr. Hanley.
10231. Have you the accounts of these sales? No; they were left in the office when the new Board was appointed.
10232. Did you leave them all in the office? Yes.
10233. Were they in the office when you gave up charge? Yes.
10234. Are you sure? I could not swear to it, but I saw them there a short time before I left possession.
10235. Mr. Neale's accounts and Mr. Burrowes's letters;—amongst what papers were they put? On a file.
10236. Where were they kept? In the office.
10237. In what part of the office? Towards Mr. Larnach's desk, on a file on the table.
10238. Who had charge of them? No one had charge of them. They were there in the office like all the other papers.
10239. Were they ever put in a drawer? Never.
10240. Had you not particular charge of them? No more than I had charge of all the other papers.
10241. If other witnesses have sworn that you had them in a drawer, is their evidence true or false? False; absolutely false.
10242. That is your evidence? I say, without any hesitation, absolutely false.
10243. Then all those account sales should be amongst the papers that have been handed over to us? They should be.
10244. Are these moneys, which you have paid into the Australian Joint Stock Bank, all the moneys you received on account of the Casual Labour Board for sales of firewood, charcoal, sleepers, or any other produce or property belonging to the Board or the Government? I have received no money for the sale of charcoal. There is an outstanding account due by Mr. Wearne. What I paid into the Treasury, and paid into the bank, is the total amount I have received on account of the Government.
10245. Are the moneys that you paid into the Australian Joint Stock Bank, and the moneys that you paid into the Treasury, the total moneys that you received on account of the Casual Labour Board for sales of firewood, charcoal, sleepers, or any other produce or property belonging to the Board or the Government? Yes.
10246. Absolutely? Yes.
10247. You swear that? Of course, I have sworn it. Of course, if there was any little outstanding account that I have no knowledge of I am prepared to make an adjustment at any time. As head of the department I am prepared to do so. You must understand that I am placed at a great disadvantage; the whole of the books and papers were taken out of my custody without my having five minutes' notice.
10248. Who were the persons entrusted with the sales of produce or property belonging to the Casual Labour Board? I told you Mr. Neale was the only one who had the sales of firewood. The sleepers were paid for by the Roads Department.
10249. Was there any other property of the Casual Labour Board sold? There were some surplus stores taken over by me without any inventory—stores which I found were gradually becoming less—very much less, I may tell you. I took the opinion of the storekeeper of them, and I made the purchase and paid for them. I paid 2d. per lb. for some ration sugar, and 10s. for some broken crockery, so broken that it was scarcely worth anything; I am sure nobody would have given the same price for it; it was put in a little kerosene case.
10250. Were Mr. Neale and the Roads Department the only persons from whom you received money? Yes, except Mr. Hanley.
10251. Was there anybody else? I do not remember anybody else. Oh! there was a duplicate roller that we lent to the Kogarah Council. I lent it to them on the understanding that they were to return it in the same condition that they received it; they did not do so. I think the duplicate cost £24, and the money was paid into the Treasury. Then there were moneys for unclaimed wages. The moneys I held in hand for unclaimed wages I held with the full knowledge of the Audit Department. I held them in trust.

10252.

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

10252. How was the sale of property in the shape of timber, sleepers, and firewood originated—who originated the sales? It was done before my time—at least the firewood business. It was started by Mr. Deering. I was simply carrying out what had been previously in existence. The matter of the sleepers was done on the application of Mr. Bennett. He asked whether we could not supply a number of sleepers for the Centennial Park, to enable him to carry out the necessary arrangements in connection with the formation of the roads there. We submitted the matter to the superintendent, and he said we could supply the sleepers at 22s. 6d. per hundred, but they cost us more like £2 2s. 6d. The weight alone per hundred was over 4 tons, and you can easily form an opinion that the timber would be worth a great deal more money.

10253. What do you say was the cost in proportion to the result of the proceeds? I think we lost over £100 by that transaction. The cost was three times what it was put down at. Then there was a terrible loss over firewood. I may tell you that Mr. Deering made a contract with a man named Hillier for cutting 1,000 tons of firewood. It only realized 4s. 9d. per ton, and there was a loss of 4s. or 5s. a ton on the whole of it.

10254. What practice did you adopt in the office to check the quantities of firewood—did you obtain the railway delivery-notes and the returns from the cutters? The only practice we could adopt was the practice that Mr. Burrowes had followed previously. He would see the trucks, get the weights, and send the weights to us. The auctioneer would send his weigh-bills, showing how much per ton and the prices. On this we paid the man Hillier according to as many tons we got.

10255. How were you made aware that firewood, sleepers, and so forth, were available for sale? We were not made aware of the fact until after the sale.

10256. Did you keep any record of this part of the work? No; of course our business was the disbursement of moneys. All our trouble arose with our taking over matters that had been initiated before our time—before our creation. If we had created the matter, we would have had proper supervision over everything. It was only regarded as a temporary affair.

10257. Were you or the Board authorized to effect sales of property such as this and pass the proceeds to the credit of the Board at the Australian Joint Stock Bank? No; we had no special authority for it.

10258. Did you know that it was irregular? I was told afterwards that it was irregular.

10259. In what position was Mr. Hinchcliffe in the office? He was Paymaster and Accountant—he went to the pays and paid the men.

10260. Was he accountant also? He was.

10261. Are you sure? I am.

10262. Did you hold him responsible for the accountant's work? I did.

10263. Was he the responsible accountant in the department? Yes, he was.

10264. If he has stated before us that he was not an accountant, what do you say to that? All I say is that the Government made a great mistake in appointing a man who was not an accountant. He was appointed there, so far as I understand, to look after the accounts and books. That was his particular work. I do not profess to have any knowledge of accounts myself—that is, any professional knowledge—neither I nor any other members of the Board.

10265. Do you recollect his remonstrating with you in connection with these payments into the Australian Joint Stock Bank? I don't remember his remonstrating with me. He told me after some of the payments had been made that it was irregular. It was some time after. The money should, he said, be paid into the Treasury.

10266. Did he ask to be relieved of any responsibility in the matter of these payments? He might have done so. I could not positively say that he did.

10267. What position did Mr. Hibble occupy in the office? He was assistant clerk in the office.

10268. Do you recollect him making any remark about it? No; it would not have been his place to make any remark about it.

10269. Was he in too subordinate a position? Yes. I think, now you mention Mr. Hinchcliffe, I went to see the Under Secretary for Finance about it, and he said it was an irregularity, and he said it would be quite sufficient to pay the money into the Treasury when we settled up.

10270. Did Mr. Hinchcliffe call your attention to it on the occasion of your first payment? I do not think so. He called attention to it afterwards by pointing out the irregularity.

10271. When did he call your attention to it? I am not aware when he did so, but as soon as he pointed it out I saw the Under Secretary for Finance, and he said it was an irregularity, but it would be easily remedied when we paid the money to the credit of the Board into the Treasury.

10272. Did Mr. Hinchcliffe ask to be exonerated from any responsibility in the matter? He may have done so, but I have no recollection at the present time that he did.

10273. Do you know whether Mr. Wells or Mr. Houston received any moneys for the sales of firewood? No; I am not aware. I do not think they have. I think I am the only person who ever received money in the matter of sales.

10274. Did you receive, between the 2nd May, 1887, and the 23rd January, 1889, from any person or firm any other moneys the proceeds from the sales of firewood, sleepers, charcoal, or any other produce, the property of the Government or the Casual Labour Board, that you have not paid into the Australian Joint Stock Bank or the Treasury? No, sir.

10275. Have you seen any of the evidence that has been taken before this Commission? No, sir.

10276. Have you spoken to any of the witnesses that have been examined? I spoke to Sir John Robertson.

10277. Have you spoken to Mr. Wells? I spoke to him casually upstairs in this building about a fortnight or three weeks' ago.

10278. Have you spoken to Mr. Neale? No.

10279. Have you spoken to Mr. Miles? No; I have not seen him since I left the Casual Labour Board office.

10280. Have you spoken to a man named Charles Robertson? I have never seen him.

10281. Have you spoken to Mr. Lawn? No; I have not been in their shop since this inquiry began.

10282. Have you spoken to Mr. Woods? No.

10283. Have you spoken to Mr. Franklin? Do you mean Mr. Franklin here?

10284. Yes? I have only bowed to him.

10285:

NOTE (on revision):—Q. 10265—After "made that" read "he thought" Q. 10270—For "I do not think so" read "No."
Q. 10274—After "No, sir," add "not to my knowledge."

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

10285. Have you spoken to Mr. Taylor, the shorthand-writer here? Only to say, "How do you do?"—nothing further; I don't suppose there is any crime in that. I may say that Mr. Burrowes has circulated a report that he knows all the evidence that has been taken here, and states in a bold manner that he knows everything that happens on the Commission.

10286. I will read you a portion of Mr. Hinchcliffe's evidence, being questions numbered 1047 to 1053, in reference to the firewood account sales. What do you say to that evidence? It is absolutely wrong with reference to my keeping them in the drawers.

10287. Is it false? I would not say that; he may have been under a misapprehension.

10288. Is it true about his remonstrating with you when you paid the first cheque into the Australian Joint Stock Bank? I have no recollection of anything of the kind. It was on a subsequent occasion that he said it was improper or irregular, and I saw the Under Secretary for Finance and Trade, Mr. Eagar. He said, "All right, you can pay it in when you are winding up the affairs of the office."

10289. I see according to a receipt that you have just handed to me that you paid into the Treasury on the 29th March, 1889, the sum of £33 3s. 2d.? Yes; there was some difficulty in finding from the books and papers how these payments actually stood. I found I had paid that into my own bank in order to have the proceeds to pay into the Treasury. Of course I was placed at very great disadvantage. I had to fossick out information as best I could.

10290. How did you find out that this sum had not been repaid by you? I got Mr. Neale's memorandum of the amounts. These were the amounts that I had from the office. I found that there was a sum owing, and that I should adjust it.

10291. Where in those two papers that you have just handed in did you get the sum of £33 3s. 2d.? I got it from the totals. This is in such a muddled form I cannot make head or tail of it.

10292. When did you get this memorandum of payments from Mr. Neale? I think it was in the beginning of this year.

10293. What is the total amount shown on Mr. Neale's memo.? £320 13s. 6d. [*Document put in and marked P.*]

10294. What paper is this other? That is a copy of the items out of the cash-book. [*Document put in and marked P1.*]

10295. And this shows the total £334 16s. 3d.? Yes.

10296. Yet you refused to give me the total of these very items just now? You asked me to make the total up for you.

10297. Is this correct? I should think so.

10298. Is not this document [*Exhibit P1*] copied out of the Casual Labour Board cash-book? I believe it is furnished to me as such.

10299. By whom was this copy furnished from the office? I received it from Mr. Hibble when I was Chairman of the Casual Labor Board.

10300. Have you any reason to doubt its correctness? I suppose it is correct.

10301. Were you Chairman of the Casual Labour Board at the time it was made out? Of course.

10302. Up to what date were you Chairman? Up to the 25th January last.

10303. And the officer who made it out was under you? He was.

10304. Do you doubt its correctness? I don't at all doubt its correctness; I believe it is correct.

10305. Where do you get this amount of £33 3s. 2d.? It is included in those two statements.

10306. Can you point it out to me? It is the difference between the two.

10307. How was it paid? By cheque. There were two cheques that I paid in and got cash for. The one was for £33 3s. 2d., and the other was for £52 something.

10308. But do these two documents [*Exhibits P and P1*] which I have before me, one an account from Mr. Neale and the other a memo. from Mr. Hibble, do they explain in any way the £33 3s. 2d.? I think so.

10309. Can you show me how? I have not gone into them.

10310. Do you say that the £33 3s. 2d. is the difference between the two? Yes.

10311. May I take it that that is your evidence. Look at the documents, sir? I don't know what you want, Mr. Chairman, from me.

10312. I want to know, Mr. Davies, how that £33 3s. 2d. is made up from these documents? It is made up by the proceeds of a cheque that I received for the sale of firewood, paid in to my own credit.

10313. Has it anything to do with these accounts? No; it is out of these accounts altogether. Mr. Neale will give you particulars.

10314. I want your evidence; I don't want it from Mr. Neale. I ask you will you produce the account sales for this? I have not got them; I have not got the papers.

10315. Did you receive the amount from Mr. Neale? Yes; it was an unpaid amount.

10316. Have you any doubt about it? No doubt whatever. On finding that the amount was unpaid I paid it into the Treasury.

10317. I ask you again have you any doubt about it? No doubt whatever.

10318. What date was it you received this amount from Mr. Neale? I believe it was in July, 1887—I think that was the date.

10319. Then what became of the money between July, 1887, and March, 1889? In my possession.

10320. Where? In my possession.

10321. Where in your possession—I ask you where? Some of it was in cash.

10322. In the office or where? You are not aware, perhaps, that I was spending £20 a week out of my own pocket.

10323. Where was this money between July, 1887, and March, 1889—this £33 3s. 2d.? It was in my possession.

10324. As cash? Certainly, as cash; and I paid it in as cash to the Treasury.

10325. Did Mr. Neale pay you this in cash? No; he paid it in a crossed cheque—£33 3s. 2d.

10326. Are you sure of that? Well, as far as I can remember.

10327. Did you ever pay that cheque into your bank? I paid it into the bank, and got the proceeds of it, as far as I can remember.

10328. Are you sure you paid it in? I am sure I paid it into the bank and got the proceeds.

10329. When was that? I believe it was in July, 1887.

10330.

NOTE (on revision):—Q. 10289—After "proceeds" read "in the office." Q. 10315—After "amount" add "I held in the office, which Mr. Neale did not show in his memorandum." Q. 10321—Omit "some of it" and after "cash" add "in the office." Q. 10323—After "possession" add "in the office." Q. 10328—For "got the proceeds" read "placed proceeds in the office safe."

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

10330. Then close upon two years you have been holding that money in your private bank account;—is that your evidence? No.
10331. In whose account was it? In my possession.
10332. All the time? Was I not perfectly justified in utilising it in the office—for the purposes of the office? I had to spend sometimes as much as £20 in a week.
10333. Did you hold it in your possession all that time? I do not think it was any crime for me to hold it.
10334. Will you look at this paper—this Treasury receipt voucher [*Exhibit O*]? Yes.
10335. Read it? Chairman, Casual Labour Board, Sydney: Sale of firewood, National Park, £33 3s. 2d.
10336. Is that signed by you? Yes.
10337. Whom did you give that document to? Do you mean to pay it into the Treasury?
10338. Yes? I gave it to my son.
10339. What did your son do with it;—do you know? Paid it into the Treasury.
10340. Cash? Of course; they would not take any cheques there.
10341. Not even your cheque? No, nor anybody else's.
10342. Where did you cash that cheque for £33 3s. 2d.? At the bank.
10343. Did you get the cash for it? Yes.
10344. And have you been holding that cash since July, 1887? I told you I have had it in my possession.
10345. Let me ask you seriously whether you have from July, 1887, until March, 1889, been holding that cash, £33 3s. 2d., in your possession? I have already told you I have, and explained the reason.
10346. Do you swear that you got that money from Mr. Neale? Most certainly I could.
10347. Are those particulars correct in that document [*Treasury Receipt Voucher, Exhibit O*] which was handed to me by Mr. Newcombe? I believe so.
10348. Who can vouch for the correctness of this [*Exhibit O*] if you cannot? I believe it is quite correct.
10349. That payment, according to this document, was made on the 29th March last? Yes; that is the last payment I made.
10350. On the 26th March last Mr. Neale was examined before this Commission; did you see Mr. Neale on the 26th, 27th, 28th, or 29th March? I do not think so.
10351. You were very frequently at this office, upstairs? Yes.
10352. Have you seen Mr. Neale while you have been here on any occasion? I have not seen him to speak to.
10353. Will you tell me how it was that you waited until the 29th March, 1889, to pay this £33 3s. 2d. into the Treasury? Because I was a little confused as to whether I had paid it in with the money I paid into the bank. I subsequently found that I had not paid it in.
10354. When did you find that you had been holding this money in your own private account for your own private purposes? I was not holding it in my own private account for my own purposes. I held it with other moneys, amounting to £86 in all, unpaid balances of wages.
10355. Did you hold all that in cash? Yes.
10356. In your pocket? I held it in the safe in the office in cash—about £100 altogether.
10357. What did you do with it? I passed the cheque into the bank.
10358. Why do you fence with me in this manner? There is no fencing.
10359. Why, sir, don't you explain this matter clearly, if you can? I told you already I paid it into my credit with £52 odd.
10360. Into what bank? In my own bank, in order that I might pay it into the Treasury.
10361. Did you cash the cheque in your bank for £33 3s. 2d. to pay into the Treasury? Yes.
10362. When? In July, 1887.
10363. In July, 1887, you cashed that cheque—that is what you tell us,—and you have held the cash in your possession ever since? I did, and I see nothing wrong in doing so.
10364. When you went out of office what moneys did you take with you? I took £85 odd out of my safe.
10365. What did that represent? It represented trust moneys that I held by me—unclaimed wages—that I held with the full knowledge of the Auditor-General and the gentlemen in the Audit Office.
10366. Why did you not adjust these sums before? I had never been asked to make this adjustment; but I have made the adjustment now.
10367. Can you give me accurately the amount that you took out of the Casual Labour Board Office when your Board ceased to exist? The total amount.
10368. Yes? About £115 or £116.
10369. Can you tell me what you have done with it? I paid £86 on account of unpaid wages.
10370. Are you sure that you took the amount you have stated? It must have been more, I think—about £170.
10371. Have you got the exact figures? No.
10372. Have you any figures? No. I took what few papers I could away at the time, but I had no time to do anything more.
10373. How long were you in the office after Mr. Miles and Mr. Mason took charge? They took charge on the 25th of January, and I was not there afterwards.
10374. Were you not in the office for three or four days after they took charge? No.
10375. Were you not in the office some days afterwards? I was in the office downstairs, but I never was upstairs after I was informed of their appointment.
10376. Did you not remain there until the next pay-day? The letter I put in will show that I offered to pay the money, but the Colonial Secretary did not think that it was prudent that this course should be taken, and asked that the gentlemen themselves should make the pay; and we were relieved of any further responsibility.
10377. Were you not in the office three days after Mr. Mason and Mr. Miles took charge? No.
10378. Were you in the office two days? No.
10379. Were you in the precincts of the office? I was downstairs occasionally.
10380. Did you not decline to give up the office before some official communication was made to you? No. I handed everything over to the gentlemen who came. I thought we had no right to be uncourteous towards the gentlemen who came, although I had great reason to complain of the action of the Colonial Secretary.

10381.

NOTE (on revision) :—Q. 10343—For “Yes” read “No, but held cash equivalent to it.” Q. 10354—For “£86” read “£186.” Q. 10364—For “£85” read “£186.” Q. 10368—For “£115 or £116” read “£186.” Q. 10370—For “£170” read “£200.”

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

10381. Here is a receipt that you have handed to us dated 15th February, 1889, purporting to be a receipt for £52 3s. 2d., and 10s.—in all £52 13s. 2d., received from you, and paid into the Treasury—what is that for? The sale of firewood and some damaged crockery. [*Receipt put in and marked P 3.*]
10382. Is this the receipt voucher I show you which was put in by you alongside the payment. Is this document [*Exhibit O 1*] a receipt voucher put in by you at the same time as that payment? Yes.
10383. Who made that payment? I made it.
10384. In person? Yes.
10385. Is your signature at the bottom of the paper? Yes.
10386. Will you tell us what the £52 13s. 2d. represents? The sale of firewood at the National Park and proceeds of some damaged crockery.
10387. When was the sale of that firewood effected at the Park? In the latter part of 1887.
10388. What is the date you received the cheque for it from Mr. Neale? 26th September, 1887.
10389. What became of that money between September 26th, 1887, and the 15th February, 1889? In my possession. I cashed the cheque, as I did the former cheque, and intended to pay the proceeds into the Treasury. It was in my possession all the time.
10390. In cash? Yes. I may tell you that some of it was spent in expenses. You must remember that I had not one single shilling for my attendance or expenses up to the end of the year.
10391. Can you tell me how you came to hold these proceeds of sale of firewood money, £52 3s. 2d., in your possession from 26th September, 1887, to 15th February, 1889, and the other sum, £33 3s. 2d., from July, 1887, to March 29, 1889, and yet paid the other moneys into the Australian Joint Stock Bank? Yes; because I held other trust moneys, as I have already explained—as much as £100 unclaimed wages. I held this money in order that when we wound up the affairs of the Casual Labour Board it might be adjusted and paid in due form to the Treasury.
10392. Why then did you not hold the other moneys that you paid into the Australian Joint Stock Bank in the same way? Simply because I had paid them in error. I had already done that.
10393. Oh, you recognized the error as regards other receipts from Neale, but not the payments made by Neale in July and September, 1887? That is the only explanation I can give you just now. I think Mr. Hinchcliffe had spoken to me about it. But I should have felt perfectly justified in holding this money and using it for my travelling expenses. I should have no scruple whatever about it. It was not to be supposed that I was to use my own money. Some £400 or £500 might be spent in various directions without being paid or receiving any fees. I should have had no hesitation whatever in using it.
10394. How comes it that the payment of £33 3s. 2d., made to you in July, 1887, is retained by you and not paid into the Australian Joint Stock Bank, when other payments in May, June, July, August, and September, from the same source, are paid in by you to the Australian Joint Stock Bank? These were trade cheques, and it was my duty to see that they were negotiable.
10395. Were not the other cheques in exactly the same category?—
10396. Did you pay the money into the Treasury upon receiving it? No.
10397. What is your explanation for not doing so? Simply because I kept it in hand for final adjustment when we wound up our affairs.
10398. In reference to this Treasury receipt voucher signed by you [*Exhibit O 1*], what is this damaged crockery sold? That is some damaged crockery in a case that I got. I took it over after the Casual Labour Board was formed. It was gradually getting all smashed when we were moving the camp from the Park. I asked the storekeeper, and he said it was worth nothing. I said I did not mind giving him 10s. for it.
10399. Who was the storekeeper? Mr. Johnson and Mr. Springall.
10400. Do you think that was a correct thing to do as head of a department? The crockery was not worth 2s.
10401. Do you think it was right that you should do that with property belonging to the Casual Labour Board? I do not think it was a wrong thing to do.
10402. Do you think it was the proper thing to do? I do. It was not worth 2d. If you think it is of any value I can send it to you now.
10403. I simply asked you if it was the proper thing to do? Perhaps if I had thought of it I might not have had anything to do with it; but it was not done with any motive of that kind.
10404. I see on the 15th February last, after your Casual Labour Board had ceased to exist, there is a sum of £8 13s. 9d. paid into the Treasury;—do you know how long that was in your hands? Some of it only a few days, some of it months. There were some little sums—the duplicate roller from Kogarah Council.
10405. There is a payment to the Treasury on the 25th February, 1889, £86 11s. 7d. unclaimed wages;—did you have that in your possession for a considerable time? Yes; off and on, small sums of unclaimed wages.
10406. Did you ever pay that into the bank? No; I did not think it was necessary to do so. It was not like as if I were an unsubstantial person who had not £100.
10407. There is a payment on the 25th February, 1889, into the Treasury of £8 10s.? That is for some sugar that I have already explained to you—17 bags of sugar I took over.
10408. Is that the item referred to in this receipt voucher [*Exhibit O 2*]? Yes; there was originally 21 bags, but I was told by the storekeeper that Mr. Burrowes had helped himself. I had it brought to Sydney. But this did not belong to the Casual Labour Board, it was before our existence, and I presume that this inquiry has relation only to the period during which the Casual Labour Board was in existence.
10409. You took it over? I bought it at 2d. per lb. I asked the storekeeper in the Park what the value of it was.
10410. When did you buy it? I bought it about six months ago or so.
10411. Are these the particulars—17 bags of sugar sold at Carlingford? It was not sold at Carlingford; it was sold last November, about six months ago, and when we were removing our stores from the National Park to Hurstville this sugar was taken over to Carlingford.
10412. Was it ever at Hurstville? No; never.
10413. Do you say that you bought this sugar six months ago, and paid it in on the 25th February last? Yes. [*Receipt put in and marked P 4.*]
10414. Do you believe that you have accounted for everything else that you have received? I honestly believe I have accounted for everything.
10415. Have you any property belonging to the Board or the Government now in your possession? Not a shilling.

10416.

NOTE (on revision):—Q. 10389—Omit “intended, &c., to Treasury,” and insert “and held the proceeds in the office for payment into Treasury.”

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

10416. I don't mean money property only, I mean chattels? Not a pennyworth.
10417. Have you any chattel property, any cash, or anything belonging to the Government or the Casual Labour Board? You don't think I am a thief, Mr. Chairman? That is a sort of insinuation against me that I don't know that I ought to submit to. The idea that I would take the Government property away! No; it has been all on one side so far as the Government are concerned.
10418. When did it first dawn upon you that these payments of £33 3s. 2d. and £52 3s. 2d. had not been accounted for? When I was leaving office I set myself to work to see what sums had not been adjusted.
10419. When did you leave office? On the 25th January—that I think was the last day—the day before the public holiday—Anniversary Day. It was my clear duty to make the adjustment as head of the department, so I did that; I think I have done so in every case.
10420. Do you recollect a man named Larnach paying you a sum of money? What sum of money?
10421. I ask you the question? No, sir; he never paid me any money.
10422. Did Larnach ever pay you £6 10s.? No; he never paid me any money in his life.
10423. Does he owe you any money? Yes.
10424. How much? He owes me £1; just now it was £1 12s. 6d.
10425. Was he a good clerk? No; he was a bad man—both a drunkard and a very unreliable man.
10426. Did you make him a present at the end of last year? Yes.
10427. What was it? 10s. 6d. to buy a hat. I did that to the other supernumeraries in the office as well.
10428. How long had he been there? A little over twelve months.
10429. Was not that rather inconsistent—giving a gratuity to a man who was a drunkard and an unreliable man? I have no doubt, but you might have made the same mistake that I have made.
10430. When did you first find out that Mr. Larnach was both a drunkard and an unreliable man? It was towards the latter part of last year.
- 10430½. Before you gave him the hat? I gave him the hat in December. I did that to a large number of persons in the office. I do not think that was any great crime.
10431. Mr. Larnach has sworn that, on the 15th December, 1887, he gave you £6 10s., proceeds of the sales of firewood;—he swore that he gave it to you in the presence of witnesses—is that true or false? False, absolutely false.
10432. Mr. Larnach speaks somewhere else in his evidence about a sum of £2 surplus from the pay-sheet. Did he give you that? Not to me. He gave it to the Paymaster, Mr. Hinchcliffe, who gave him a receipt for the £2.
10433. Do you know what became of that? It was paid into the Treasury.
10434. Who paid it in? It was paid in by Mr. Hinchcliffe himself. That is before the Casual Labour Board was dissolved.
10435. And you know that was paid in? I have been informed by Mr. Hinchcliffe that it was.
10436. Mr. Larnach's evidence on that is in his answer to my question:—"How did you do in the case of absentees? Of course, if there was no payment made, there was no signature. On one occasion I had to go to Hornsby, and I had to take gold to pay the men with. There were two sovereigns found on the table, which I brought back and handed to Mr. Hinchcliffe. I could not tell how they got there, and I told Mr. Hinchcliffe to put them in the Paymaster's surplus cash. That was on 22nd December."—Is that a fact? I know that he handed the two sovereigns over to Mr. Hinchcliffe, and Mr. Hinchcliffe gave him a receipt. Mr. Hinchcliffe subsequently told me that he had paid it into the Treasury.
10437. Did you see Larnach make the payment? I saw the payment made of £2 to the Paymaster on the pay-table.
10438. But you deny any knowledge of the £6 10s. Larnach says he paid you? I never saw it. Mr. Larnach was not the man—if he handed money to anyone, he would take the receipt for it.
10439. I see in the statement of the amounts paid into the Treasury between May, 1887, and April, 1889, several payments in your name in the year 1887, and in the year 1888, and several payments in the name of the officers of the Casual Labour Board? The only payments I have made direct have been in February, winding up the affairs of the Board.
10440. What I, and I am sure my colleagues as well, want to get at is this: How, in some cases, you paid the money you received into the Treasury, which it appears was the proper place; in other cases into your own bank; and in other cases, you paid it into the Australian Joint Stock Bank? I have already explained that I made a mistake; but I do not know that it was a very great mistake after all. You were asking me about the payments made into the Treasury of the trust moneys. You will find the vouchers in the Auditor-General's department, giving the whole particulars, from a penny up to 25s., making £86 altogether. That is the only payment I have made direct into the Treasury as regards unclaimed wages. Other sums have been paid in from time to time by the Paymaster.
10441. In February, 1889, you appear to have paid in £334 16s. 3d.? No, I did not pay it in. That wants a little explanation. I left this voucher filled up in that form for my successors, so that they would have no difficulty in transferring from the Australian Joint Stock Bank the amount of money there to the credit of the Casual Labour Board and paying it into the Treasury.
10442. Can you tell me what that £4 item is? That I believe to be from Mr. Hanley, for wood sold by Mr. Burrowes. Mr. Burrowes sold this £4 worth of wood to Mr. Hanley, and he brought the amount to the office, and the cheque was paid into the Australian Joint Stock Bank.
10443. Have you ever received any money from Mr. Wearne? Not a shilling.
10444. Does he owe the Government any money? I think he owes about £10; but the bill will show.
10445. Have you ever asked him for it? I have instructed that application should be made to him for it, but he has treated the applications with indifference.
10446. To whom did Mr. Neale pay the money, the proceeds of all sales? Usually to me.
10447. Are there any returns of the wood cut that you got from the cutters, and of the charcoal and the sleepers? Yes. The papers will show, and the books will show the amounts. You will find them in the press copy-books.
10448. Do you know of anybody who has any interest in these sales of sleepers and firewood who would be likely to take away the papers? No. The papers ought to be all there.
10449. When did you see them last before you left the Casual Labour Board office? In the latter part of December.

10450.

NOTE (on revision):—Q. 10430½—For "hat" read "Christmas-box" in both places. Q. 10444—For "bill" read "books"
Q. 10446—After "to me" add "or Mr. Hinchcliffe"

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10450. All of them? Most of them. I could not say all of them, because I did not go through them all.
10451. How was it that you went to Mr. Neal for particulars of these sales? Because I was out of the office altogether, and I felt it was my clear duty to have these matters adjusted, and I felt that I was at full liberty to get them adjusted up to the 31st March, in accordance with the letter of the Colonial Secretary.
10452. Where did you get information about these payments of £33 3s. 2d., and £52 3s. 2d.? From Mr. Neale.
10453. And after you got the information from Mr. Neale, you paid them into the Treasury? Yes.
10454. Did you ever receive £52 3s. 2d. from Mr. Neale? Yes.
10455. Are you quite sure? I am quite sure.
10456. How did you receive it? By cheque.
10457. When? As far as I know, it is eighteen months ago.
10458. Can you tell me what you did with the cheque? Paid it into the bank and cashed it.
10459. How long after you paid it in did you cash it? I suppose it would be cashed the next day after it was paid in.
10460. Are you aware of any accounts outstanding between the cutters of the wood and the Casual Labour Board that have not been adjusted? No; they have all been adjusted.
10461. What precautions did you take against the sale of the wood by the officials at the Park? I could not take any precautions beyond trusting to the superintendent.
10462. Where did the wood come from principally? All round the National Park.
10463. Any from Hornsby? No.
10464. Liverpool? No.
10465. Narrabeen? No; there is no getting it there.
10466. Referring again to the item £33 3s. 2d., have you any memorandum or account sales, or any other documents to fortify that? I have no memorandum of account sales or anything else. The documents were left in the office.
10467. Does that represent proceeds of the sale of firewood that you received from Mr. Neale? Yes.

In the presence of last witness, George Robert Cartwright Neale called in and examined (*his evidence being interposed by the President*):—

- Mr. G. R. C. Neale.
23 April, 1889.
10468. *President.*] What are these books that you produce? These are the account salebooks.
10469. What dates do they cover—from when to when? From 10th July, 1886, up to 12th May, 1888.
10470. Have you not got here any book after that? Nothing showing dealings with the Casual Labour Board.
10471. Had you any transactions with the Casual Labour Board after May, 1888? I think not. These are the only two books that we have relating to them.
10472. What are the papers in the bag you have there? I have got some books.
10473. Books relating to this matter? Yes.
10474. Will you allow me to see them? Yes.
10475. Are those books the rough books from which these entries are posted? Yes.
10476. Do you produce two account salebooks, two small ledgers, and two cash-books? Yes.
10477. Do these books contain the history of all the transactions that you have had between January, 1887, and May, 1888, with the Casual Labour Board? Yes; so far as I am aware they are there. If there is anything else I know nothing of it.
10478. Now answer this question categorically—give me an answer to the question and go no further; will you look through these books from January, 1887, until the end of the records in the books, and tell me if there is any payment made to the Casual Labour Board, or any member or officer of it, amounting to £33 3s. 2d.? I think that is a matter I turned up the other day. In my book, ledger lettered A, I find that there has been an account or cheque paid of £33 3s. 2d. drawn on the 19th July, in the year 1887.
10479. Have you got the butt of the cheque-book? No; I have not got it here. I was not aware of this until the other day, when, looking at some old accounts, I found this entry.
10480. Have you anything to show how you paid that money? Well, I paid it by cheque. It was paid, £33 3s. 2d., on the 19th July, 1887, by cheque.
10481. To whom? Well, it was made payable to Mr. Burrowes.
10482. Do you know whom the cheque would be handed to? It would be taken on to the Casual Labour Board, in Pitt-street.
10483. Does that book that you are looking at now show you the date and the name of the payee? It does.
10484. Who drew it out? Well, it was drawn out by my office-boy.
10485. Do these entries on page 405 of your ledger, under the heading of Government Relief Works, appear in these account sale books? I think so.
10486. When was this entry made in this book? At the time it was made out, I suppose.
10487. You notice it is in different ink? Yes; the one entry was made out by myself, and the other was copied in by the boy.
10488. Do you recollect when you gave Mr. Davies these particulars? No; I do not.
10489. This year or last? I do not think I gave him any account at all.
10490. When did you give him the amount of it? Well, I could not tell you that.

The Hon. John Davies, C.M.G., M.L.C., resumed his evidence:—

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10491. *President.*] You have heard Mr. Neale's evidence as to that £33 3s. 2d. Do you still adhere to your evidence then that you have no other moneys not accounted for? To the best of my knowledge I believe there are none.
10492. Have you any doubt upon the matter? I have no doubt myself. 10493.

NOTE (on revision) :—Q. 10458—After “cashed it” add “and placed an equivalent sum in the office safe”

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

10493. Can you tell me what surplus stores there were when you took over the unemployed at the National Park or wherever they were? There were a number of tables, trestles, some tools, tents, camp-ovens, frying-pans, stump extractors—two or three I think, two cases of soap, two or three cases of fish, some boxes of rice.
10494. Anything else? From memory I cannot say much more. I had no list handed over to me.
10495. Was there any sugar? Yes; I have already explained that.
10496. Was there any crockery? Yes; there was a small case of crockery.
10497. Were there any beds or bedding? I think there were three that I took over from the Hyde Park barracks.
10498. What became of them? I think one was out at Bulgo—one or two at Hurstville. I know they were out with the surveyors—they had them in their camps.
10499. Have you got any of them? No.
10500. If it has been said that you have, is it untrue? Absolutely untrue.
10501. Or any eider-down quilts? Yes; it is untrue. I may say that in order to attend the pays I had to sleep in the office to catch the 6:30 a.m. train in the winter months. I had a bedstead there and bedding and quilt. There was a robbery in the office, and that and some other things—about £15 worth of my clothes—were removed. There is another one in the office now.
10502. Have you got one now belonging to the Casual Labour Board? I have got nothing whatever.
10503. Can I take it then as your evidence distinctly that there is nothing now in your possession either in the way of money, stores, or anything else belonging to the Casual Labour Board or the Government? Nothing whatever.
10504. Do you give me your positive oath on that? Absolutely yes.
10505. Can you tell me whether any book was kept showing what the refunds were on the pays? The Secretary and Paymaster kept a book.
10506. When the Paymaster went out to pay and brought back money with him, who kept a record of it? The Paymaster kept that. I think the Paymaster had a book showing that.
10507. Do you know what became of these moneys? Some of them were utilised in the payment of contingent vouchers. Others, as you will find, were paid in the ordinary way into the Treasury. You will find that the Secretary from time to time paid money into the Treasury.
10508. Did you look into the books of the Casual Labour Board at all.
10509. It was not my place to keep the books. I devoted as much as sixteen hours a day to the business of the Board, and I did as much as I possibly could do in the time.
10510. Did you look at the books at all—did you ever look at this book [*Exhibit E 8*]. No.
10511. Did you ever see it in the office? Yes.
10512. Did you ever look over it to check it, or see how it was being kept? No.
10513. Did you ever interest yourself in it at all? No; never.
10514. Did you ever compare or ask for a report as to the state of the cash? I frequently asked for the purpose of knowing how to provide for the pays.
10515. Who was responsible for the keeping of the books? Mr. Hinchcliffe.
10516. Can you tell me what the rule was as regards unpaid wages and refunds? In the earlier days large sums would be brought back from the Park. I have known the Paymaster bring £40 or £50 back, and he utilised it in paying small contingent vouchers.
10517. Did he keep it as cash? Yes; instead of drawing a cheque.
10518. Where did he keep it? In the safe.
10519. Did he take it out of the safe to pay these vouchers? Yes.
10520. Did you ever remonstrate with him for doing that? No; he told me it was customary to do so before.
10521. Did you hold him as the responsible officer for these moneys and the keeping of this book? Yes.
10522. Do you consider that you were responsible for the cash? No, sir—not for the petty-cash book. Only the cash that I held in trust was I responsible for.
10523. Did you keep the cash that you held in trust apart from the petty cash? I put it in a safe, and Mr. Hinchcliffe's cash was kept down-stairs.
10524. Had anybody access to this safe but yourself? Nobody had access to the drawers of the safe.
10525. Was this cash in the drawers? Yes.
10526. Was the money that you took away from the Casual Labour Board when you left the office money that you got out of the drawers of this safe? Most of it.
10527. Most of the £160? Yes.
10528. After this money had been held back for wages and such like, what became of any surplus? I have told you that we paid these small contingent vouchers or small pay-sheets with it. Men would leave the work, having got employment elsewhere, and sometimes pay-sheets would come in certified to by the superintendent—so many chains of clearing—so many yards of mullocking would be certified to, and the voucher would be brought to the office and paid in that way instead of on the ordinary pay-day. Then he would debit the amounts to the cash.
10529. Did Hinchcliffe ask you if he might do that, or did he just tumble into it? He said it was what he had done before when the unemployed were under the direction of the Immigration Department. I was quite ignorant of the practice that had been previously adopted. I did not profess to know anything about it.
10530. But you were the head of the department? Yes, but I had no knowledge of the practice followed with regard to such matters as these.
10531. Are you aware whether any receipts or records were kept to show what these refunds were. For example, the pay-clerk might have come back with £70, £80, or £100 in his possession;—is there anything that would show that? Yes; the papers and records would show it. Supposing it was £50 or £100 that he brought back, he would have to account for it either by vouchers or cash.
10532. Supposing he came after the office was closed, would he keep it without reference to you? Yes; he would very likely put it in the safe and inform me of it on the following morning.
10533. Then he had the sole control of the cash? Yes; I think I ought to say that we took every precaution to prevent imposition. Before the money was paid the sheets would have to be signed by the store-keeper and signed by the superintendent. We found a great many attempts at imposition. A man has
come

NOTE (on revision) :—Q. 10493—For “boxes” read “bags” Q. 10501—After “office” read “which was reported in the Police Gazette” Q. 10527—For “£160” in question read “£180” Q. 10528—For “mullocking” read “mattocking”

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

come in representing himself as being on the pay-sheet, and that he had not been paid in the usual way, and he would try to get other people's money. I adopted a system of issuing printed tickets to the persons who were entitled to receive money, and these would show the number of the gang and the amount of the earnings of each.

10534. How comes it, can you tell me, that during the years 1887 and 1888 there are a number of payments called refunds of wages, balances of advances, unclaimed wages and such like paid into the Treasury, and a number of others that the Board seems to have appropriated for petty cash? Well, that would be done in some instances for the adjustment of the accounts. If the Board used the money there would be a voucher, and the voucher would represent cash. A voucher was as good as cash in the adjustment of the accounts.

10535. Can you give any explanation how it was that in some cases the Board appropriated this money for what is called petty cash, and in other cases paid the money into the Treasury? In some cases it might be that when an adjustment was necessary we would have to pay the difference between the £6,000 paid by the Treasury and the amount of the vouchers.

10536. Who did you entrust with making the different pays? To all the large pays I went with the Paymaster.

10537. Who did you entrust with the making of the pays? Mr. Hinchcliffe, Mr. Hibble, and Mr. Josephson.

10538. Did you entrust Mr. Larnach? I never entrusted Mr. Larnach. The Paymaster took that responsibility upon himself.

10539. Was there any one else? I do not think that there was any one else.

10540. When the Paymasters came back, how did you know whether or not they would bring any money with them? Well, when I was visiting the works I was frequently in the office late at night when these men came back.

10541. Would they come and tell you? Yes. In answer to my question they would tell me whether they got on all right, and they would say what they had brought back—£3 or £5, as the case might be, and pay it into the petty cash. If the Paymaster was not there, then it would be locked up in my safe.

10542. In the morning, would you pay it over? No; I had nothing to do with it.

10543. You simply handed it over to the Paymaster? No; I did not hand it over.

10544. You would lock it up at night in your safe, and open your safe in the morning, and Dick, Tom, or Harry would take it out? The Paymaster would come in and they would go through the sheet, and say who had not been paid, and he would adjust it in that way.

10545. Did you approve of that system? Well, I approved of it so far. I gave it my approval because I knew of no better course to adopt.

10546. Did it not strike you as being an inconsistent practice to pay some money into the Treasury, and hold some moneys back as petty cash? No; it did not strike me as being inconsistent. Some were held back to feed the petty cash, and others were paid in simply to adjust the vouchers. Supposing we had £5,925, and there was £75 short of the £6,000 which had to be adjusted, then we would have to pay these small things out of the petty cash, and we would give vouchers for the amounts.

10547. Then is Mr. Hinchcliffe responsible for that? Yes.

10548. Do you disclaim any responsibility in the matter? I don't want to shirk any responsibility; but I had nothing to do with the adjustment.

10549. Will you describe to me the practice that you adopted in giving orders for plant, tools, supplies of seed, and so forth? The practice was simply an order drawn by the clerk, Mr. Hinchcliffe, when a request came from the different works for what was required. On the order coming from the National Park, that they wanted so many mattocks, so many long-handle shovels, it would be sent in as a requisition from him. The only thing I had to do was to sign the order.

10550. Did you always sign the orders before they went out? Certainly I did. I believe in one or two instances the Secretary did, but not more.

10551. Did you ever give any verbal orders? I have no recollection of any verbal orders, unless it was to the contractors for the supply of rations. That would be when we sent out a rush of men; and whenever I have given a verbal order, I have sent written information to the works that we had sent fifty or sixty additional rations, and had increased the order.

10552. Do you ever remember giving verbal orders for tools? I do not.

10553. What was your practice, verbal or written? Against giving verbal orders.

10554. If verbal orders have been given it is in exceptional cases? Very exceptional.

10555. Who used you to send with the requisitions for goods and plant? I think the usual practice was to send Mr. Hibble.

10556. Who would send in the requisitions for what was required at the different works? The superintendents would send them, or the storekeepers.

10557. Who in the Southern District had the power to requisition? Mr. Burrowes. He was the superintendent, and he had the Southern District and the Illawarra line; Mr. McPherson, the assistant superintendent, and the storekeeper, Mr. Springall.

10558. Anyone else? No one else. Of course the sub-overseers in matters of that kind would communicate with Mr. Burrowes.

10559. Then how would you know that these things were required? Only by the statements of the officers; there was no other way; I could have no personal knowledge myself.

10560. Did you use any discretion in the matter of complying with these requests for plant? A very great deal.

10561. How? By sending old material from one place to another instead of sending new—old things I have had repaired in Sydney. I sent out a large quantity of mattocks and had them relaid, and a number of picks and shovels for repair.

10562. Did you ever send a less quantity of goods than was ordered? Frequently.

10563. Did you ever send more? No.

10564. Are you quite sure? I am quite sure.

10565. If others have sworn that you have, is it true or false? If others have sworn that I have sent more than was ordered they have sworn to what was not true.

10566. What knowledge had you that the goods requisitioned for were delivered? Only the receipts of the railway authorities and the acknowledgments of the storekeeper that he had received by the previous day's train so many mattocks, so many dozen shovels.

10567.

Hon.
John Davie,
C.M.G.,
M.L.C.

23 April, 1889.

10567. Was the storekeeper the only man that would receive them? He would receive them at the principal camp as a rule, but to the other outstanding places we would send them direct.
10568. Did you get letters or memoranda in every case? In nine cases out of ten we did.
10569. Did you get the railway receipts? They would get them and we would get them too.
10570. Who in the department would be authorized to give orders beside yourself? Mr. Hinchcliffe.
10571. Anyone else? No.
10572. Would Mr. Hibble? Only with my authority. As I have already stated, he has frequently gone down with the orders.
10573. Would he have authority to give a verbal order? No.
10574. Then can we take it that all these goods that were sent out were the result of written orders signed by yourself or of written orders signed by Mr. Hinchcliffe? There were very few by Mr. Hinchcliffe. They were nearly all signed by myself.
10575. And he and you were the only persons who had anything to do with that? I have explained to you that the mode was a requisition coming from the works; then the order was filled up by Mr. Hibble and signed by myself.
10576. What happened after the delivery of the goods? The vouchers would come in from the contractors. Contingent vouchers would come in showing the quantities of goods sent out to the different places. They would come in from our own department—that is, from the places where the goods were sent to—the National Park or Bankstown, or wherever it was, for the purpose of being checked—and after being checked and certified to by the superintendent or assistant-superintendent; then they would be returned to us, and the quantities would be computed by Mr. Hibble to see if they were all correct, and then they would be passed for payment.
10577. Who compared them with the butts of the order-book? Mr. Hibble did so.
10578. Did you see him do so? I have seen him do so myself.
10579. If he has stated that he never did so, would that be true or false? It would be untrue. I have seen him do it.
10580. Have you seen him compare the vouchers with the butts of the orders? I have.
10581. You have no doubt upon that? No; I have told you I have seen him, Mr. Chairman. I have been as close to him when he was doing it as I am to you now.
10582. Had you anything to do with the contingent vouchers? I had nothing whatever to do with them, more than as head of the department to sign them prior to their being paid.
10583. Whom did you hold responsible for computing and checking the quantities? I held Mr. Hibble responsible for checking and computing the quantities.
10584. And beyond computing the figures, who was responsible? I held Mr. Burrowes responsible then in one district for having received them. It was the same with Mr. McPherson, the same with Mr. Oxley, and the same with Mr. O'Donnell.
10585. Had Mr. Hinchcliffe anything to do with the contingent vouchers? Yes; he had to do with them. He was equally responsible with Mr. Hibble for seeing that they were all correct in the orders.
10586. Did he sign them? Yes; he signed all the vouchers.
10587. Are you sure of that? Yes.
10588. Are you quite clear that Mr. Hibble examined these vouchers with the butts of the order-books? Yes.
10589. And you held him responsible? Yes. You would not expect that I could go through that routine with the duties I had to do otherwise.
10590. Did you ever sign these contingent vouchers? Only in the way I have stated.
10591. When did you sign these vouchers? After Mr. Burrowes had certified that the goods had been received, and after Mr. Hinchcliffe had signed that they were correct.
10592. Should we find Mr. Hinchcliffe's signature and initials showing that the quantities were all right on the vouchers? On all the vouchers that have been paid.
10593. When did Mr. Hinchcliffe sign them? When they were paid. I had better explain how it was done. These contingent vouchers with the quantities received from the different contractors supplying the Casual Labour Board with supplies were sent out to the different works and certified to by the officer incurring the expense, that is by the superintendents on the different works. Then they were computed as to quantity and numbers on the requisition, and so on, and when we received all the computations as to the amounts by Mr. Hibble, then we used to make the adjustment. When paid, and before sending them to the Auditor-General or to the Treasury, I would sign them as head of the department.
10594. After the payment? Yes. I never saw the voucher until after the payment. It never came before me. Then Mr. Hinchcliffe also signed as witness of the pay.
10595. You never saw the vouchers until after they were paid? No.
10596. Did you ever sign them before they were paid? I have done in the case of the last few at the request of Miles and Mason. They related to expenses incurred during my term, but never before that.
10597. Do you state that you never signed any vouchers except those that were paid? No.
10598. Beyond those that Messrs. Mason and Miles asked you for? No.
10599. All the vouchers that you signed up to the end of last year were paid vouchers? Yes; and had been first of all duly certified to by the officer incurring the expense and computed by one of the clerks in the office.
10600. Did you ever sign a contingent voucher before the superintendent? Never.
10601. Mr. Hibble has sworn that he only checked the computations, and that that was all that he was responsible for;—is that correct? No; I held him responsible for the quantities as well as showing that the computations were correct.
10602. Did you never hear of any vouchers being lost? No. I heard them talk about vouchers being lost, but I never knew that they were lost.
10603. Whom did you hear talking about it? I think I heard Mr. Larnach speak about it.
10604. Did you ever hear of Mr. Hibble's instructions being limited to computing the amounts of these vouchers? No; I did not. As far as the pay-sheets went he was limited to the computations only; but not in the case of vouchers where goods were ordered.
10605. How long after the payment for these goods did you generally sign? It just depended upon how soon we wanted to make an adjustment of the £6,000. Then they would be signed right off the reel so as to make the adjustment.

10606.

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10606. I read you the evidence of Mr. Hibble, questions 6963 to 6966, on these very points—is that correct? I do not understand that he did that.
10607. Do you recollect that instance? I do remember something about it, but I do not remember the whole of the circumstances. He had not the power to alter the pay-sheet. He had power to bring under my observation any matter if there was anything wrong. He could not alter it. The computations were sometimes so mutilated that they had to be sent back.
10608. Did I understand you to say that the vouchers were checked with the butts in the order-books? Yes.
10609. So that if there were any discrepancy between the two it should be noticed? Yes. It would be remedied by us communicating with the people who supplied the goods if there was an error.
10610. Who was in the habit of getting the letters? They were sent by post from the office, and they came back by post.
10611. Who would open them? Mr. Hinchcliffe.
10612. Who would authorize the making out of the cheques for these vouchers? I would.
10613. Who made the cheques out? Mr. Hinchcliffe, the Paymaster.
10614. Who paid them? Sometimes I did, sometimes he did. Any particular accounts he paid. I paid Kidman's, and I paid M'Lean Bros. and Rigg's a few times—two or three times.
10615. Who else paid accounts? Mr. Hinchcliffe.
10616. Anyone else? I do not think anyone else.
10617. Mr. Larnach? No; I do not remember that Mr. Larnach ever went to pay accounts. He went to pay wages sometimes—in two or three cases, I think, but that was at the Paymaster's own risk.
10618. Was there any further check kept of the supplies and plant ordered than the superintendent's certificate and the comparing the vouchers with the butts? Yes; they had stock-books, and into these they entered all the goods in the store. I had that return made to me.
10619. Where can we find these? They ought to be amongst the papers and books in charge of the store-keeper.
10620. Whom did you hold responsible for the correctness of the vouchers? I held Mr. Burrowes responsible for all the works that he certified to. I held Mr. M'Pherson responsible for all the works that he certified to, and the same with Mr. O'Donnell and Mr. Oxley.
10621. Then had you any responsibility at all? My responsibility was in the direction of the machinery—in seeing that they all did their work.
10622. I want to get at what was the value of your signature to contingent vouchers if you had no responsibility for the correctness of the accounts? I may appeal to Mr. Franklin, who is an old official. He will understand that I signed simply as head of the department—on the strength of Mr. Burrowes' signature, believing that to be correct. I had to trust somebody, and I had to trust the officers in the field.
10623. Then your signature does not involve any responsibility? No responsibility. Simply as head of the department, I was compelled to sign in accordance with the Audit Act. I have no personal knowledge of the expenditure myself.
10624. Were these payments all made on your individual responsibility, or did you consult your colleagues at all? I consulted the Board.
10625. In all cases? I could not say in all cases.
10626. Were all these payments to M'Lean Bros. & Rigg, to Mr. Kidman, Mr. Graham, and so forth, authorized by the Board? Yes.
10627. At a meeting? Yes.
10628. Where would the meeting be held? In the office.
10629. And the papers would of course show that such was the case? Sometimes Mr. Houson and myself were present—sometimes Mr. Wells and myself. One of the professional members of the Board might be out of town.
10630. Did you ever take charge of these contingent vouchers yourself and put them in a safe? Yes; after they were paid—after the cheques were made out.
10631. Having got the cheques signed, did you ever keep them in hand? No.
10632. Who kept them? They were put in a safe.
10633. What safe? Mr. Hinchcliffe's safe.
10634. Did you ever receive money on account of people? No, sir, never.
10635. Who determined as to what tradesmen should be employed on these works? Which tradesmen?
10636. Tradesmen to be employed in supplying plant, and rations, and so forth? Well, we found when we took charge that Mr. Kidman was supplying to the amount of 4,010 rations, at fifteen pence per head; and for that I found that in the first month he was receiving something like £4,000. I put myself in communication with the Colonial Secretary, suggesting that tenders should be called. Tenders were invited in the public press, and fourteen were received; and that of Mr. Kidman's with an increased ration of something like half-a-pound of meat a day, for 1s. 1d. per ration was accepted. I thus saved £30 a day, or nearly £1,000 a month, by that one transaction. It is only fair to say that the contractor had a right under the authority of the Colonial Secretary of the time, Mr. Dibbs, to go to the extent of 2s. per head, and he charged fifteen pence. With reference to Messrs. M'Lean Bros. and Rigg, we were not aware but what the contract existed in that case that existed in all the Government departments until some months after the Board was in existence. Then the Paymaster, Mr. Hinchcliffe, informed the Board that the practice had been for these people, who were then the Government contractors, to furnish all the supplies at a deduction of 2½ per cent. on the payment of the account. That 2½ per cent. was deducted in every case. So anxious was I that we should secure in the cheapest market all our supplies that I went with Mr. Larnach and Mr. Hibble and bought spawling hammers and a large number of tools off Mr. Harwood, at the Haymarket, at a much less price than was charged by M'Lean Bros. Then we got a report that the articles were not so good—that they did not stand out so well. I went to M'Lean Bros. and Rigg's shop and saw Lawn, and told him that the price was outrageous, just as if it was my own money that I was spending. I went with that object, and I succeeded in cutting them down from 56s. to 46s. per dozen. Having been in the trade myself for a number of years, I knew what the value of everything was, and knowing that the prices in some instances were very high, I got them to reduce them; and if it had not been that I thought that they were supplying the

the goods under the ordinary contract, I should have insisted upon a contract being entered into in the case of that firm.

Hon.
John Davies,
C.M.G.,
M.L.C.

10637. When did you find out that they were not being supplied under the ordinary contract? About six months afterwards, and we did not anticipate that the Board would last more than a few months more.

10638. How long after you were in office did you find out the necessity for advertising for tenders for the supply of rations? Well, the first payment was for £4,000, and that was so high that I thought a saving might be effected by advertising for tenders.

10639. Did it not occur to you that a saving might be effected as regards the other contractors? No. It was the latter part of 1887 before I learned that there was no contract.

10640. Is Mr. Wells in any way responsible for you not having discovered this? He is just as responsible as I am. We are all equally responsible, if there is any responsibility attached to any of us.

10641. Was any tender called for supplying the department with such plant as M'Lean Bros. and Rigg supplied? No.

10642. Did you ever make inquiries as to the nature of the Government contract? Yes. I got Mr. Hinchcliffe to make inquiries.

10643. What was the result of that? He told me that Mr. Deering and Mr. Wise were supplied with the things for these different works, and that from these people $2\frac{1}{2}$ per cent was deducted.

10644. And you took Mr. Hinchcliffe's *ipse dixit* for that? There was no *ipse dixit*.

10645. You did not see that there was any overcharge as regards the rest of the goods? I do not think there was much overcharge after I took the trouble to go to these people and make the best deal I could with them.

10646. Did you ever see Mr. Wood or any of the partners or any of the senior officers of M'Lean Bros. and Rigg's establishment with reference to the charges? No; I never spoke to Mr. Wood or any partner in my life. I spoke to Mr. Lawn, who had charge of the Government contracts. I may say that I do not know any of the firm at all.

10647. Was discount allowed in every case? No, not in every case.

10648. When Messrs. Mason and Miles took over the control of the department, had you any vouchers in your possession—contingent vouchers? Yes.

10649. Many? I had a good number; but I could not tell you how many.

10650. Did they all bear your signature? I have already explained that I signed a portion of them showing the expenses incurred before these gentlemen took over the Casual Labour Board.

10651. Did the vouchers you had in your possession at the time that Messrs. Miles and Mason took over the control bear your signature? Yes.

10652. Do you recollect what you did with them? What I did with them. I did not do anything with them. I simply signed them because the expenses were incurred during our term. After they had been properly computed and properly checked, I signed them at Mr. Hinchcliffe's suggestion, I think.

10653. I want to know what became of them after that? I do not know what became of them.

10654. Did you give them to Mr. Hinchcliffe? He took charge of them.

10655. Did you ask him to get them paid? How could he get them paid.

10656. Did you ask him to see that they were paid, or to get them paid? No, because if so, we would have drawn the cheques. He could not make me do it. I could ask him to do it.

10657. Who went out to make the pays to the men at the time Miles and Mason took charge? I could not tell you. I was out of the office. I do not know who went to make the pays.

10658. Am I to take it that the vouchers were left on the table when you went out of the office? Yes; I left them on the table with the Paymaster.

10659. Then you gave them to the Paymaster? I simply signed them.

10660. Why cannot you answer my question in a direct manner? I am doing so. I never took them from him.

10661. Were you satisfied that the vouchers were all right, and that they had been compared with the butts of the order-book? Yes.

10662. Would you recognise any of the vouchers if I showed them to you? I could not say, but if you show me one I will strive to do so.

10663. Now, I hand you fourteen contingent vouchers, will you look them through and say whether you recognise any of them as being the vouchers that you left? I recognise all these but one for £16 8s.

10664. Here are six more contingent vouchers, will you look through them and say whether you recognise these as forming any part of what you left with Mr. Hinchcliffe? These I recognise, but there is one there for £58 15s. I do not recognise at all. It may be correct, however.

10665. But you don't recognise it as being one of the vouchers that you left with Mr. Hinchcliffe? No, I don't; but I recognise the others. I do not say that one is not correct. It may be correct although I am not able to recognise it. My signature is there because Mr. Burrowes' is there.

10666. Will you look at this contingent voucher for £50 12s., showing twenty-four kegs of blasting-powder, and you see the butt end of the order-book shows twenty-three;—which is right? The butt ought to be right.

10667. Ought that voucher to be paid? It ought to be paid, less the difference in the kegs of powder.

10668. If we have produced the receipt from the Ordnance Department, signed by a responsible officer out at Waterfall, showing twenty-four kegs, how then? Then the butt of that is not correct. We are not above making mistakes, sir; but I am surprised that there should be twenty-three instead of twenty-four on the butt. [*Voucher put in and marked P 5.*]

10669. Will you look at this contingent voucher for £1 13s. 3d. for galvanized buckets and billies, and one plank;—ought we to find an order for that? I presume you ought. That is for Bankstown.

10670. We have had these books carefully searched, and we have found no order for these things? Well, I would not pay on that. Hibble has evidently simply computed the quantities, instead of comparing them with the butts to see that they were correct.

10671. Has that got Mr. Hinchcliffe's signature? No; it is not paid.

10672. How do you account for your signature being there? Because it was at the end of the year, and it was hardly fair for these gentlemen to have to certify for things that they knew nothing at all about.

[*Contingent voucher for £1 13s. 3d. put in and marked P 6.*]

10673.

NOTE (on revision):—Q. 10647—Omit "No, not in every case," insert "Yes, in every case." Q. 10655—Before "How" insert "No". Q. 10656—For "would" insert "could".

- Hon. John Davies, C.M.G., M.L.C.
- 23 April, 1889.
10673. Will you look at this contingent voucher for £14 16s. 6d., M'Lean Bros. and Rigg. There is an item one dozen muck picks. You see that the butt of the order-book says eight muck picks? Yes; the butt ought to be right.
10674. Is that voucher right? In that respect it cannot be right. [*Voucher put in and marked P 7.*]
10675. Look at this contingent voucher for 14s. 6d., M'Lean Bros. and Rigg, for 500 screws and 14lb. of clout nails. Ought there to be an order for that? Yes.
10676. Do you recollect what they were for? They were for Cook Park. Old Mr. Sanderson was there. They were sent out without the ordinary order; it was a small thing.
10677. Who gave the order? Mr. Sanderson; but there ought to have been an order subsequently sent. Most certainly if you go through the vouchers of twenty-one months you will find that little mistakes of that kind occurred. [*Voucher put in and marked P 8.*]
10678. Look at this voucher for £4 4s., for twelve mattocks, M'Lean Bros. and Rigg. Ought there to be an order for that? Yes.
10679. There is none that we can find? Well, I would not pay it.
10680. We have searched and found no order in the book? These vouchers came with the order attached to them upon which the goods have been supplied.
10681. You will notice that is signed by Mr. Sanderson, by Mr. John Davies, and initialled by Mr. Hibble? That was for Rookwood. Formerly they had cleared about 1,100 acres at Rookwood, and the underscrub was growing up, and we put on thirty men, and these mattocks were to clear the underscrub. If there was no order sent it must have been a verbal order. I might have given a verbal order for these. [*Document put in and marked P 9.*]
10682. Will you look at this contingent voucher for £98 14s. 9d.—M'Lean Bros. and Rigg. The butt of the order-book shows ten kegs of powder, and the contingent voucher forty-six kegs of powder. Which is right? Sometimes in sending out powder they would send a much larger quantity and store it out in the magazine, and then afterwards the quantities would be rectified.
10683. This does not tally with the butt of the order? But it does with the explanation I am giving you. It was customary to send out a larger quantity at a time.
10684. Is that a mistake? It is not a mistake.
10685. An irregularity? Well, it was an irregularity, but it was done with the knowledge of the whole Board. I suppose you are only in search of the truth, and if you ask the ordnance officer he will tell you whether he received it.
10686. We have to examine into the working of the Board. We want to see how the Board did their work? Crucify the Board as much as you like. The unfortunate Board has got a good many kicks. [*Document put in and marked P 10.*]
10687. Look at contingent voucher, M'Lean Bros. and Rigg, £20 19s. 9d., ten kegs of blasting-powder and forty coils of fuse. The order-book shows thirty coils of fuse. Can you tell me who gave the order for that? That is Mr. Hibble's writing. He has omitted to give the order for the additional quantity.
10688. Where is that for? Eekersley Road.
10689. The order-book speaks of articles for Leumeah, for your station? All the orders show what the articles were.
10690. Do you know anything of them? I would not have the smallest knowledge—more than you have. If you want to see whether there is a receipt or not there is an easy way of getting it.
10691. Is that a mistake or an irregularity? I should think it was neither a mistake nor an irregularity. [*Document put in and marked P 11.*]
10692. Look at this contingent voucher, £44 17s., M'Lean Bros. and Rigg. The contingent voucher shows twenty-four kegs of powder; the butt of the order-book twenty-three kegs. Is that a mistake or an irregularity? Is not that the one you have shown me already?
10693. No. What is your answer? Neither a mistake nor an irregularity. [*Document put in and marked P 12.*]
10694. Here is a contingent voucher for £22 10s. 3d., M'Lean Bros. and Rigg, December 13th. We can find no butt in the order-book for it, and we can find no order at all. Ought we not to find some order for it? That was sent down to the Rosehill Road; it is some distance from Narrabeen.
10695. Should we not find some record for the order in the order-book? No doubt it is an irregularity, but I am sure it is correct, because we got special authority from the Minister to do that particular work. [*Document put in and marked P 13.*]
10696. Here is another for £37 8s. We find nothing in the butt of the order-book for that. Have you any recollection of that? I have no recollection of it. I would not pay it unless an order was forthcoming.
10697. What do the signatures cover? My signature covers nothing more than that of head of the department.
10698. Do not these contingent vouchers bear on the face of them all the signatures that are required to secure their payment? They would not be paid until the order was produced.
10699. Would not these vouchers have been paid in the ordinary course had not Messrs. Miles and Mason been appointed? I do not think so. I would see that they tallied with the orders.
10700. Do not these bear the name of the person supplying the goods—the officer incurring the expense, the head of the department, and the initials of somebody who checked the quantities. What further was wanted to justify the payment? Nothing, but that we should have in the office sufficient to show that these goods on the voucher were requisitioned for. I would get a requisition from Mr. O'Donnell, asking me to send these goods to him. If you look amongst the correspondence you will find on a date—almost the day before that in the voucher—a letter from O'Donnell asking for supplies of goods.
10701. What I say is this, that these vouchers that I have put before you had every signature on them to justify their payment in the ordinary course, and they would have been paid without further inquiry? Yes; and I believe the Government has received every shilling's worth of them. There may be an irregularity in not having filled up all the butts, but that is not much in an expenditure of over £240,000; out of that expenditure I will make you a present of all that you can find that we are wrong in. [*Document put in and marked P 14.*]
- 10702-3. Will you look at this voucher for £5 11s.—1½ oct. steel? The corresponding number appearing in your

your order-book is $1\frac{1}{8}$;—which is right? It did not matter. We simply used it for striking drills. If we did not get $1\frac{1}{4}$ we got $1\frac{1}{8}$; it did not make a bit of difference.

10704. Will you look at this contingent voucher, M'Lean Bros. and Rigg, £18 3s.—eight kegs of blasting powder and thirty-two coils of fuse? If you compare it with the butt of the order-book you will see that the order-book shows four kegs of powder and sixteen coils of fuse, which is correct? The contingent voucher will be correct. There was a broken coil in the George's River, and that circumstance brings the order to my mind, but this ought to have been corrected immediately afterwards.

10705. Look at M'Lean Bros. and Rigg's voucher for £20 19s. 6d.—eight kegs of powder. The butt of the order-book says six kegs, what about that? Just as I have already said; they frequently sent a larger quantity. 10706. Do you say that is right? Yes; because they often send a larger quantity, and we give them credit for it afterwards, by written intimation.

10707. Here is another of M'Lean Bros. and Rigg's contingent vouchers for £6 10s.—“twenty-four long-handle shovels and four hammers.” Will you tell me where the order is for that. This is one you recognized as having been left by you with Mr. Hinchcliffe? I could not say anything at all about it. The order ought to be in the book.

10708. We have searched and can find no order in the book? I think that as regards these things, instead of being sent to Hurstville they were delivered at the office for the purpose of going to the men employed in clearing the dam at the Little Bay Hospital. One of the inmates of the hospital was found drowned, and the water was found polluted, and under the directions of the Colonial Architect we put on some thirty men, and these shovels were ordered for them.

10709. Who ordered them? They should have been ordered by Mr. Hibble. Some of the shovels were left in the office when I left at the end of January.

10710. Then you say that these twenty-four long-handle shovels and four hammers were delivered at the office? Yes; I think they were.

10711. Can you account for our not finding any written order for them? No; my impression was that you would have found it. I thought you would have found an order for everything that was ordered.

10712. Will you look at this document [*Exhibit E 2*—a contingent voucher for £3 10s.—M'Lean Bros. and Rigg—“six coils of Manilla rope.” Its number is 552, and if you compare that with the butt in the order-book you will see that the corresponding entry in the order-book is a hamper-basket. Will you explain that? The hamper-basket that I used for going these journeys for twelve months—it was my own private property—got the handle broken through going out to these different works on pay-days, and I sent Mr. Hibble to M'Lean Bros. and Rigg to see if they could provide me with a basket. They sent me a basket, but it was too expensive, and I immediately told them that I would have to return it, and that I wanted a less expensive basket, and that the price would be between £3 and £4. I returned the basket myself—taking it in a cab and returning it. I told the man in charge there to credit the office with the basket as being returned. They sent me another one, but it was too small, still expensive, and no use. I returned that. I told the ledger-keeper and told Mr. Lawn that we must be credited with these. There has been no voucher passed by me for them. I should have thought it no crime if I had got a basket for 25s. or 30s. to go out to these different works to have charged the Government with it. I should have thought it no crime seeing that I was getting nothing for my services. That is my explanation.

10713. Do you recollect what the price of the first basket that you returned was? I think it was about £3.

10714. Do you recollect what the price of the second was? £2.

10715. Did they credit you with these baskets? I went myself to the shop and told them they must credit us with the basket. I went to the ledger-keeper. You will find no voucher passed by me for a hamper-basket.

10716. Will you explain what is the meaning of No. 552 in the order-book being “one hamper-basket,” and the corresponding number on M'Lean Bros. and Rigg's voucher, signed by you, is for “six coils of Manilla rope”? No; I must say I have explained to you the whole of the hamper-basket business. You could send for the firm. I do not suppose a respectable firm like that would care to tell a lie. They would not sully their trade reputation.

10717. I want your evidence; you are the man that we have to deal with now. Do you on your solemn oath tell me that you know nothing further about this “hamper-basket” and these “six coils of Manilla rope” than you have told us? Certainly.

10718. Who signed the voucher for these six coils of rope? Mr. Burrowes.

10719. Where were the vouchers signed by him? At the works.

10720. Nowhere else? No; he never signed them in the office. If it were my last words, I would say on my oath that he never signed them in my office.

10721. I never asked you that; that is a piece of voluntary information on your part. Who asked anything about his signing them in the office? You asked me if he signed them in my presence.

10722. I did not ask you whether he signed them in the office. I simply asked where Mr. Burrowes signed, and you answer me that he never signed them in the office. I hope the shorthand writer has got it down as you said it. Now, let us get a little more about this. Do you notice that these vouchers have not got the stamp of the Southern District upon them? They often do not have the stamp of the Southern District.

10723. The others have got that stamp? Not all of them.

10724. Do I understand you to say that both these baskets were returned? Yes; both were returned.

10725. If one of the witnesses has given evidence to the contrary, what do you say to that? It is not true.

10726. Do you recollect the date that you left your office in Goulburn-street? It was on the 25th of January, the day before Anniversary Day.

10727. Not the 31st? No. I was in the lower part of the office two or three times for a day or two after that, but not where the business was being done.

10728. Were you ever told that the price of one of these hamper-baskets was £6 10s.? No.

10729. Will you swear that one of those baskets did not cost £6 10s.? I will swear it did not.

10730. Will you swear that one of them did not come to £3 10s.? I will swear it did not.

10731. After all these different vouchers I have shown you, and the many inaccuracies in them, what check had you against cooked, or bogus, or improper accounts? We had to do the same as other people; we had to trust to people outside.

10732.

NOTE (on revision):—Q. 10715—For “the basket” read “the return of the baskets.” Q. 10731—For “people outside” read “our officers.”

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10732. Had you any check in the department? We had a check, as I have already told you. Out of a sum of £240,000 you have found some small trivial matters, but the whole of them only come to a very small amount.
10733. Does not a feather show how the wind blows? Sometimes a feather shows the wind—that is, where there is any wrong-doing; but here there is no wrong-doing.
10734. Now, I want to take you to Kidman; you are aware of the contract that Kidman had? Yes.
10735. The contract that you made with him? Yes; the contract that the Colonial Secretary made with him.
10736. Do you recollect what the contract was? Yes; he was to deliver wherever required and whenever required.
10737. Are you aware whether charges for cartage were made? Not to my knowledge.
10738. Do you know that we found pay-sheets with charges for cartage? Yes; for carting metal, but not for rations.
10739. Are you aware of any cartage being paid for rations? Not to my knowledge.
10740. Might it have been done? It could if Mr. Burrowes put it down for cartage other than rations. The contract was that Mr. Kidman should deliver whenever and wherever required. That was the condition of the contract.
10741. This is the evidence that we have got on this point—speaking of the rations: “At first they were delivered at the different railway stations, and we carted them to the camps”? It is not true. The rations were delivered and carted to the National Park camp at Kidman’s own expense. I may say that as soon as the contract was accepted each of the superintendents got instructions that they were to insist upon the rations contract being carried out in every sense.
10742. What was the system you adopted in regulating the supply—that is, as to how much rations should be supplied? The number of rations would be according to the number of men on the ground.
10743. Who gave the orders? The superintendents and the different overseers and storekeepers. The superintendent or storekeeper at the main camp would receive information of the number of men on the different works, and he would send an order to Mr. Kidman to send 250 more rations to Narrabeen and 350 to some other works, as the case might be. It was a great source of trouble to the Board, to see that the men should have no cause for complaining of the quality of the rations. The next day after the delivery a ticket would be sent, showing that so many rations had been received at the National Park and so many at Narrabeen. Then the storekeeper kept a book, and entered daily the quantity of rations in the books, and the accounts were made up for everything from the tickets received by the contractors. The storekeepers kept all the orders.
10744. Then the storekeeper was the motive power? Yes, in the matter of rations; he had to do with that.
10745. Do you know whether rations were ordered in excess of the demand? Very seldom. There might be fifteen or twenty in excess occasionally.
10746. Was your attention ever called to the fact? It might be. This would arise through the men suddenly leaving the field, and we would have the rations in stock; but never more than a few.
10747. Do you recollect any occasion upon which a return was made to Parliament when it was pointed out that there must have been something wrong about these rations? No; I don’t remember.
10748. Did you ever remonstrate with the storekeeper as to the large demand for rations? I have no doubt I have done so.
10749. Have you any recollection of doing so? I have done so more than once.
10750. Did you ever check his books? We checked his returns which he made up every fortnight.
10751. You checked his returns against his books? Yes, and against the contractor’s receipts.
10752. Were you ever officially informed that there had been irregularities out there? Never.
10753. Were you ever written to by a man named Robertson? No. I remember a man of that name. He was a drunken man and was dismissed.
10754. Did he ever complain of any irregularities? No. He wrote to me asking to be reinstated after his dismissal for drunkenness.
10755. Did you ever examine Mr. Springall’s requisitions to see whether they were unusually large before you passed them? Well, I would see that they were correct so far as I could see from the numbers at the different camps.
10756. Were any irregularities ever reported to you in connection with the stores? No.
10757. Are you aware that Springall was conducting a store there? No. I should say in passing that I stopped Springall from conducting a private store. That was just after we took charge. I thought it was not right that he should do so, because it put the men in the position that they might not receive the quantities of bread and rations that they were entitled to.
10758. And he stopped this store? Yes.
10759. How do you know that he stopped it? The contractor, at the request of the Board, undertook to provide his own man to conduct the private store, and Mr. Kidman took charge of it.
10760. Do you know that, as a matter of fact, Springall had a store there during the whole of the time that the Board was in existence? No; absolutely no. He had no store after the time I intimated that he must give his store up.
10761. Are you aware that he had a store during the whole time that you were in existence as a Board? Certainly not.
10762. Have you become aware that he received stores on his own account from Kidman? Not during the past twelve months.
10763. If we are told by a large number of witnesses that he did what would you say to it? I could not believe it.
10764. Were you present on pay-days? Yes.
10765. Will you tell me what you did? I went to the pays in order to adjust any grievances that might arise between the men and the overseers and superintendent. I examined the stores—examined the supplies—heard what complaints the men had to make, and dealt with them.
10766. Did you ever see that the right people were paid? I was at the pay while it was going on. I saw the men’s names called out, and each ganger was identified by the overseer on each pay-day. And the man stood up at the table and received his money, signed, and passed outside.
10767. I come back again to the question of rations. Do you recollect any return being made to Parliament as to an expenditure of something like £1,200 a week upon rations? No. 10768.

NOTE (on revision):—Q. 10757—After “position” insert “of being suspicious”; and for “might not receive” read “were not receiving.”

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889

10768. I will put it in this way: Do you recollect anyone calling your attention to a return that had been made to Parliament, in answer to a question, in which 910 men were mentioned, and the return for rations when it came in showed that £2,000 was due to Mr. Kidman, and its being pointed out that if there were 910 men the amount should be about £1,200? My attention was never called to anything of the kind.

10769. Did you ever hear of rations being improperly drawn—that is, drawn on behalf of people who did not exist? No, sir. I have heard, but it is only hearsay, that Mr. Larnach received a big sugar chest and had it carted to his own home—that he had also two trucks of wood carted from the Park, signed Casual Labour Board at Hurstville, and one of them was carted to Mr. Larnach's house.

10770. How do you know this? I have heard it. The porter at the railway station will tell you that Mr. Larnach paid for the trucks and applied the proceeds of the wood to his own private use.

10771. I want to come to the petty-cash. Who initiated the system that you had in the office? The Paymaster.

10772. Had you anything to do with it? No.

10773. Do you know whether it was a proper system? I did not conceive it to be an improper one, or I should have told him. He told me it was the practice adopted by all the men who had conducted the affairs of the unemployed.

10774. Did you ever check the books yourself? No.

10775. Were they ever checked outside your own department? The Treasurer sent some official there.

10776. Do you know whom it was. Was it the Inspector of Accounts, Mr. Kirkpatrick? No; it was not him.

10777. Did any officer from the Treasury go through your books? Yes; an officer came there and looked at the books.

10778. How long did he remain there? He stopped some little time.

10779. Had you any idea of the amount of petty-cash that you had in hand? Sometimes as much as £100, I think.

10780. Was there ever more than £100? About £100. I am not aware of there being more than £100.

10781. Do you think there was £200? I should not think so.

10782. Do you think there was £300? No.

10783. Are you sure? I should think there would not be that amount.

10784. Who determined the amount of petty-cash to draw a cheque for? The Paymaster would say when he wanted a cheque for £50, and he would get one. Supposing his cash was out he would get it.

10785. Supposing his cash was not out when he got a cheque for petty-cash? Then he would get it by misrepresentation.

10786. Do you accept any responsibility with reference to the petty-cash? No.

10787. Did you not see that he had plenty of cash in hand many times when he asked for a cheque? No; certainly not. You are asking something that did not exist.

10788. But you answer my question? I am not going to give a stupid answer to the question unless I know what I am asked.

10789. You are asked whether you accept any responsibility for signing a cheque for petty-cash when petty-cash was in hand to a large amount? Certainly not. I do not accept any responsibility if there was plenty of petty-cash in hand.

10790. If I refer you to items in the cash-book could you give me any information about them? Oh, no; how could I tell you. It is impossible. I did not keep the cash. I did not keep the books. I had nothing to do with them.

10791-2. In order to identify this with the other evidence, I put into your hands the cash-book [*Exhibit E 8.*] Do you notice on page 71 a cheque for petty-cash £50, and do you notice on that same page there was a credit to petty cash of £343 4s. 8d.? I am not aware of it. I have never seen these books.

10793. Do you notice on page 74 a cheque drawn for petty-cash on the 29th June for £100, and on the same date there was a credit of £364 5s. 2d.? I did not know of it.

10794. Without going through the whole of the book I may tell you that in some fifteen instances on the occasion of cheques drawn for petty-cash there were large amounts of petty-cash in hand? Well, I had no knowledge of it.

10795. Who is responsible for that? The Paymaster.

10796. We find in this book items like this—say £35 6s. 8d. drawn out in petty-cash and a wages cheque for £1 on the same day. Can you say how that was? Not a cheque drawn for £1. It must have been purely an oversight to draw a cheque for £1.

10797. Do you know that it was customary to pay large amounts out of the petty-cash for wages? Only in cases I have explained when men have left the works.

10798. Do you know cases where people have been paid partly in cash and partly in cheque? Yes; I remember cases of £17, £15, £10, and the like.

10799. Who determined what should be paid in cash and what should be paid by cheque? The Paymaster.

10800. Had you any responsibility at all. You are throwing every responsibility on the Paymaster. Are you aware that the Paymaster throws it all on you? I do not know how he can do that. You see Mr. Hinchcliffe had complete control over the cash. He could do whatever he liked. He would simply have to bring his vouchers to pay his own expenses. He would give vouchers representing his personal expenses and pay himself.

10801. Without reference to anyone? He would submit his voucher to the Board before it was paid, and then it would be paid.

10802. Did you have meetings of the Board? Yes.

10803. Who was present on any occasion when Mr. Hinchcliffe's voucher was brought before the meeting? Mr. Houson sometimes, and sometimes Mr. Wells.

10804. Where did the meetings take place? In the office.

10805. We are told that you had meetings in the train? You have been told a great many fairy tales, and no doubt that is one of them.

10806. Supposing we have been told that by a member of the Board, is it still a fairy tale? Yes.

10807. Supposing Mr. Hibble, Mr. Larnach, and Mr. Josephson had claims for personal expenses, would Mr. Hinchcliffe pay them? Yes.

10808.

- Hon. John Davies, C.M.G., M.L.C.
25 April, 1889.
10808. Without any reference to you? Oh, no; they would come before the Board. We would cast our eyes over them, and if they were not extravagant the amounts would be paid.
10809. What offices do you consider that Mr. Hinchcliffe fulfilled? Secretary and Paymaster.
10810. Who was Accountant? He was Accountant.
10811. Then you called him Secretary, Paymaster, and Accountant, was there any necessity for such a person as Secretary? Yes; the correspondence would go through the Secretary. He would deal with the correspondence. He would have, I suppose, as many as 2,000 letters.
10812. Who had this correspondence? The Secretary, Mr. Hinchcliffe.
10813. Was there any necessity for Mr. Hinchcliffe being Paymaster? Yes; the Government appointed Mr. Hinchcliffe Paymaster. He went to Narrabeen every fortnight, to Rookwood, National Park, Sutherland, and Waterfalls.
10814. Are we to consider that he was the responsible officer for the books of accounts—for the keeping of of them? Yes.
10815. If we find that large sums in the form of refunds have been paid into the petty cash, is he to be held responsible? Yes.
10816. Have you ever been in charge of a large department? I have been in charge of a Government department, and I am a director in one of the largest financial companies in Sydney. I am a trustee of Mr. Joseph Bayliss' and Mr. Alderson's estates. My time is fully occupied. I never sought this position. The Colonial Secretary sought me. I never sought it.
10817. How did he seek you? He wrote to me asking me to call upon him. I called upon him, and he told me that he contemplated forming this Board. He said he proposed to appoint Mr. Darley and Mr. Wells. Mr. Darley would not accept the position, and Mr. Houison was appointed to succeed him. The Colonial Secretary asked me if I was prepared to accept the position, and explained the nature of the duties. He asked me if I would relieve the Government of the thousands of people who were clamouring for work for the construction of railways, public roads, buildings, and a variety of works that he named. I said I was prepared to do so. Then subsequently I received the official communication which is to be found amongst the papers appointing the Board, coupled with the duties which were previously suggested, and which we should have to carry out. In view of all the applications that were coming in for employment we opened a sort of labour bureau, but we were informed right throughout that our offices were to be of a temporary character, and we did not know any day when the whole thing might be brought to a close. Altogether we had something like 13,000 men passing through our hands.
10818. Did you make any bargain with the Colonial Secretary, or did the Colonial Secretary make any offer to you? Yes. The Colonial Secretary intimated that we should be paid for our services at any rate.
10819. Was there any special rate fixed? No.
10820. Then the first you knew of it was a short note from the Colonial Secretary, asking you to call upon him? Yes.
10821. Do you know Sir Henry Parkes other than officially? Yes.
10822. Intimately? Yes; for thirty years.
10823. Has he ever been to your house? Yes; he has been to my house.
10824. And have you been to his? Yes.
10825. And you are on friendly terms? Yes.
10826. You say that there was a distinct understanding on this occasion that there was to be remuneration for your services? Distinctly. It was announced in the House several times.
10827. Are you quite sure? I have stated distinctly to you already.
10828. There was to be some remuneration. It was not some gratuitous State service that you were entering on? No.
10829. Was anything said about your personal expenses? Yes; all my travelling expenses had to be paid.
10830. Had you much travelling? Well, I travelled about three hundred miles a week.
10831. How? Travelling from my own house every morning, and going to these pays and to other places on the business of the Board.
10832. Did you not get a free pass as Chairman of the Casual Labour Board? No, certainly not.
10833. Did you pay your railway fare always? I never used a pass.
10834. Had the officers of the Board a pass? Mr. Wells might have had a pass.
10835. I am speaking of the other officers of the Board—not of the members? Mr. Burrowes had a pass. I was not a Member of Parliament. I had no pass.
10836. And whenever you went these trips you paid your railway fare? I spent as much as a pound a day on some of my travelling. That is what I have had to do.
10837. Do you know anything about the personal expenses of Mr. Hinchcliffe? They were submitted the same as Mr. Josephson's accounts were, and if they were not extravagant we passed them.
10838. Have you any idea of what they were? No.
10839. Do you know what you have been paid as personal expenses? At the rate of 10s. a day.
10840. Do you know the total? About £260.
10841. Would you be surprised to hear that Mr. Hinchcliffe's are as much? I would be very much surprised.
10842. Were they checked in any way? Only just as I have told you. I think it is fair to say that the Government allowed him in addition to his salary £1 for each pay.
10843. Do you know what check was kept on Mr. Hibble's expenses? Yes; his accounts were always passed by the Board.
10844. Are there any records in the office of who was present when these accounts were passed? There are no records.
10845. No minutes? No minutes were kept. If there is anything in regard to Mr. Hibble's expenses I can explain to you I will do so.
10846. As regards your expenses, were they submitted to the Board? They were submitted to the Colonial Secretary and approved.
10847. Were they submitted to the Board? They were submitted to Mr. Houison.
10848. Have you any memoranda or records of these expenses? No. 10849.

NOTE (on revision) :—Q. 10817—For “would” read “could.” Q. 10818—After “intimated” insert “in answer to questions in Parliament,” and omit “at any rate.” Q. 10830—For “three” read “five.” Q. 10836—For “a pound” read “two to three pounds.”

Hon.
John Davies.
C.M.G.,
M.L.C.
23 April, 1889.

10849. Were they incurred in a lump? No; they extended over twenty-one months.
10850. And you have no memoranda of them? I do not think I kept any memoranda of them after they were paid.
10851. What was the nature of the memoranda? Simply showing the travelling expenses to the different camps.
10852. Have you destroyed them? I think they were destroyed when the money was paid.
10853. When was the money paid? It was paid last year.
10854. Did you receive any money from Mr. Hinchcliffe before that time? Yes.
10855. Did you keep any memoranda of the amounts? Yes; I kept them in a book.
10856. Have you got that book? It is the same book that I disposed of after the thing was done with.
10857. What I want to get at is, how often these personal expenses of yours were placed before the Board before they were authorised by the Colonial Secretary? I could not say.
10858. Twice or thrice? Yes.
10859. I suppose the other members of the Board when they incurred expenses were paid them? The only one who has not drawn personal expenses is Mr. Houison. He did not draw, but Mr. Wells did every month.
10860. Were his personal expenses brought before the Board? Yes.
10861. Will you tell me from your memory what the payments were that you received from Mr. Hinchcliffe on account of expenses? I think there were only two payments I received on account from Mr. Hinchcliffe.
10862. I have a book before me now which I show you. Can you tell me whose writing that is in? Mr. Hinchcliffe's.
10863. Amongst these entries I see the following:—Chairman in account with the Secretary—May 11th, one-half petty cash cheque, £5; May 25th, advanced to the Chairman, £2 12s. 6d.; May 30th, £1 12s.; June 4th, charity, 3s.; June 13th, cab hire, 2s. 6d.; July 5th, charity, 5s.; July 8th, cheque P.C. to Chairman, £5; July 18th, cash to Chairman, 7s.; July 25th, cash to Chairman, 9s.; August 6th, cash to Chairman, 9s.; August 8th, cash to Chairman, £1; August 13th, cash to Chairman, 11s. Do you recognize any of these? Yes. How that would happen would be that I would ask him to advance me £2 or £3 for the day, to save me cashing a cheque.
10864. I see an entry against you on the 29th of the tenth month of £155 7s. 8d. Is that correct? I could say it is correct.
10865. Is it correct according to your idea? I do not think that is correct.
10866. Were you paid up to the 29th of October £155 7s. 8d.? I have no record bearing upon it now, and I could not tell you from memory. If I had thought it was necessary to keep those memoranda I would have done so.
10867. Will you state when the Colonial Secretary authorized these payments on account of your personal expenses? Some time in December.
10868. Can you give me approximately the amount that you had drawn on account of personal expenses up to December last? I should think about £90 altogether.
10869. Do you know when the payment of £261 10s. was made to you? On the 16th December.
10870. Did you get the whole of that in cash? Yes. The whole of the balance that was paid to me.
10871. On that day? On that day I think, but I can refresh my memory at home, and I think I could tell you to-morrow.
10872. Did you pay this into the bank? I think I can tell you the amount when I come again.
10873. Cannot you tell me approximately—it is not so long ago? It was about £90 then approximately that I had been paid previously. There would be something over £150 paid.
10874. Would that be in cash? Yes.
10875. Is it not an extraordinary thing that that amount should be in hand in cash? Yes, it is extraordinary.
10876. I notice at the same time that Mr. Hinchcliffe's salary for two months was paid in cash. Is not that extraordinary? I think not. You will find that on several occasions.
10877. Do you recollect Mr. Hinchcliffe being short in his cash? Never.
10878. Do you ever recollect hearing anything of it? I never heard of such a thing.
10879. What would be the amount of personal expenses paid you from time to time? I received from £5 up to £20 occasionally.
10880. Did you ever borrow money from Mr. Hinchcliffe? I borrow money from him.
10881. Answer the question? No, sir, never.
10882. Did you ever borrow money out of the petty cash? No, sir, never.
10883. Do you recollect on any occasion asking Mr. Hinchcliffe to take some electoral rolls down to the Sydney Station? No; I asked Mr. Burrowes to take them. That was just before the elections. I asked Mr. Burrowes to take a parcel of electoral lists. We always provided the men with electoral rolls.
10884. Do you know whether Mr. Burrowes went? I was told he went, but he was found drunk in a cab afterwards.
10885. Where was he when you told him to go in a cab? He was in my office upstairs.
10886. Was anyone else there? Mr. Hinchcliffe, and I think Mr. Hibble.
10887. Was he drunk in the office? He had got a drop, but he was not drunk.
10888. Was Mr. Burrowes frequently drunk during the time of the existence of the Board? I have seen him once or twice the worse for drink.
10889. Mr. Hinchcliffe? I have never seen him under the influence of drink.
10890. Mr. Hibble? Never.
10891. Mr. Larnach? Yes; I have seen him sometimes.
10892. Mr. Wells? Never.
10893. Mr. Houison? Well, I did see Mr. Houison a little fresh one time.
10894. Only once? Only once I think. It might have been twice.
10895. Was he two or three times? No.
10896. Was he constantly? No, certainly not.
10897. Did you ever see Mr. Wells the worse for drink? Never.
10898. Do you recollect any occasion when he was remonstrating with some one and you tried to restrain him? Never.

10899.

- Hon. John Davies, C.M.G., M.L.C.
23 April, 1889.
10899. Nor using strong language? I never heard him use stronger language than I would use myself.
10900. Then I have yet Mr. Josephson, what about him? I never saw him other than all right.
10901. Do you know what the arrangement was with regard to the advance of £6,000 with the Treasury—when you wanted a second £6,000, did you make an application for it? Of course we did.
10902. How did you ask? By sending in the ordinary requisition, signed by the three members of the Board.
10903. How did you support the previous advance? Supposing we had expended £5,550 of the first advance we applied for another, and then we adjusted the first advance.
10904. Do you know what the system was in making up the vouchers covering £6,000? They were all made out, and there was a sort of recapitulation covering the lot of them.
10905. Do you know that the vouchers were made up for the exact amount of the advance? Yes.
10906. Was that done under your authority? Yes; it was the same practice that had been in existence before our time.
10907. Who told you? Mr. Hinchcliffe.
10908. Mr. Hinchcliffe was the leading spirit in this business then? Mr. Hinchcliffe had charge of this. I thought it was the proper thing to do.
10909. Do you know that on each occasion that you sent in the vouchers they amounted to exactly £6,000, neither more nor less? Yes.
10910. Do you know that this occurred in forty sets? I could not tell you what the number was. All I know is that £6,000 worth of vouchers covered the cash advance.
10911. Did you have anything to do with the making up of the vouchers? No.
10912. Who did it? Mr. Hibble and Mr. Larnach.
10913. Did you ever hear that there was any difficulty in the making up of these vouchers to represent exactly the £6,000? No. I have seen them do it in a quarter of an hour. You have got £6,000 to make up, and you have got £12,000 to make it up with.
10914. Does it not strike you as being marvellous that forty sets of vouchers, representing in the aggregate £240,000, should have been made up to represent exactly £6,000 in each case? No; they were always able to do it. We were always able to go to the bank.
10915. Had you any overdraft at the bank? We frequently had from £300 to £900.
10916. Don't you know as well as I do that you had an overdraft at one time of £72,000? That was covered by the letter of credit from the Treasury. We had often to get an overdraft sufficient to meet the next pay. We had to go and hunt up the money. It was not always sent there.
10917. This overdraft was on the same bank? Yes; but there was no letter of credit covering it. In one case they let us have an overdraft and then they took their account afterwards, and the Treasury told them they ought not to allow us to overdraw. They would not pay any interest on it.
10918. Here I find in December, 1887, you were something like £18,000 overdrawn? But that was covered by the letter of credit.
10919. On the 1st January, 1889, you were £77,722 14s. 8d. overdrawn, and that overdraft increased to over £84,000, and yet you say you were only from £300 to £900 overdrawn? You don't understand; there is a wide distinction between the two accounts.
10920. You had only one account? The smaller overdraft was independent of the letters of credit.
10921. I see in this cash-book several payments to Burrowes and Gleeson. Has that anything to do with the Burrowes at the works? Nothing whatever. They are the owners of the office, and these amounts are for rent.
10922. Mr. Hibble says that you could not examine the cash. By that he means that you had not the ability to do so. Was that so? No.
10923. You could have done so if you had wished? Yes.
10924. I suppose you have the ability to do so? I should think so.
10925. He says you are not well up in figures? It does not require an accountant's knowledge to understand those books.
10926. You understand the difference between the debit and credit side and petty-cash entries and that kind of thing? Oh, yes.
10927. Did you ever examine the cash-book? I may say that I had the greatest possible belief in the Accountant—that he was most thoroughly honest, and that he understood his work perfectly.
10928. You see the position that we are in is this. We call one officer and he blames the next. We call Mr. Hinchcliffe and he blames Mr. Davies. We call Mr. Davies and he blames Hinchcliffe or Hibble? I was the head of the department, and it was not my place to go into all the details.
10929. Surely you ought generally to know the business of the office? No; it was no part of my duty to look into the financial details.
10930. Were you not head of the office? Yes.
10931. The ministerial head? Yes.
10932. Who had charge of everything? Yes.
10933. And you were responsible for the officers under your control doing their duty? Yes.
10934. Did you become aware in December last that there was some probability of the Board's existence being terminated? Yes. I received a communication from the Colonial Secretary, giving notice that the works would be closed within a certain time. That is the letter I received from the Principal Under Secretary, dated 29th December.
10935. Had you any knowledge previous to that that the Board's services were going to be dispensed with? No.
10936. Neither verbally nor otherwise? No, sir; I had no intimation whatever.
10937. What assistance did you get from your colleagues—Messrs. Wells and Houison? I got assistance of a professional character—more than of a departmental character. When I had any suspicion that the quantities given in the measurements were excessive I asked Mr. Houison to go out and take the measurements.
10938. Did they interest themselves or interfere very much with the office routine? Their work was more in the field. In one case in particular I asked Mr. Houison to go and measure a removal of sand at Cook Park, and the amounts were reduced by 30 per cent. A saving of 30 per cent. was thus effected, and the men were perfectly satisfied.

10939.

NOTE (on revision):—Q. 10899—For “stronger” read “any strong,” and omit rest of sentence. Q. 10915—Insert “Yes.” Q. 10916—Insert “Yes,” and for “the letter” read “letters.” Q. 10918—For “the letter” read “letters.” Q. 10927—Insert “No,” for “I may say that” read “as.”

10939. Did you go into the accounts with the other members? Not in the manner in which you did this afternoon, but we went over matters generally.

10940. Was their assistance substantial assistance? In a professional sense it was.

10941. Only in a professional sense? Yes.

10942. Did they assist you in matters in the office? In all matters I had the benefit of their advice and assistance when required.

10943. Do you know what their attendances were? I think Mr. Houson must have been a couple of hundred times, and Mr. Wells the same.

10944. Did you always take their advice? With the exception of one case, and that was the case of Mr. Burrowes.

10945. Did either of these gentlemen ever object to your action in any matter? I never remember their objecting. There was only one occasion on which Mr. Wells objected, and that was to the roads on the Holt-Sutherland Estate. As we had the approval of the Colonial Secretary for the work it was proceeded with.

10946. Did either of these gentlemen ever make remonstrances which were not heeded by you? No, never.

10947. If they have given evidence to the contrary, is it correct or incorrect? It must be incorrect. The only instance I did not act on their advice was in the case of the letters I have given you with reference to Mr. Burrowes.

10948. Did you ever hear of Mr. Wells wanting to withdraw from the Board? He inquired if he could withdraw, because his other duties prevented his giving all the attention he could wish to the affairs of the Board.

10949. Did you ever beg him not to withdraw? No; I had nothing to do with him.

10950. Did you ever hear him say that he was going to give it up? No; never. Mr. Wells said he thought it would be well, as he could not devote the time to it, to withdraw. That was towards the latter part of last year.

Hon.
J. Davies,
C.M.G.,
M.L.C.

23 April, 1889.

WEDNESDAY, 24 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

The Hon. John Davies, C.M.G., M.L.C., called in, and examination continued:—

10951. *President.*] Previously to your appointment to this Board, had you any experience with regard to the employment of labour on a large scale? Not of that character.

10952. Do you recollect receiving any further instructions from the Colonial Secretary's Department subsequently to the letter of the 2nd May, 1887? Only on the 29th December last year.

10953. But shortly after the Board was established in May, 1887, did you not receive some other written instructions? There was a letter, I think, about bringing our proceedings as speedily as possible to a close, and intimating that the department was not to be continued, or something of that kind.

10954. Will you look at this letter, and tell me whether you have ever seen it? I don't remember having seen that. That must have been sent before our time.

10955. Do you notice the minute of Sir Henry Parkes on the margin? Yes.

10956. And do you notice also on the letter the stamp of the Casual Labour Board? Yes.

10957. So that it did come to you after the creation of the Board? Our existence was on the 2nd May, 1887, and as this seems to be dated the 1st May, I do not see how it could have come after our existence.

10958. Is not the stamp Casual Labour Board, 10th May, 1887? It looks like the 1st of May.

10959. Is there not a nought there partly obliterated? There may be.

10960. What is that number 87-20? That is the registered number.

10961. All I want to know is whether it is part and parcel of the first document you got on 2nd May, or something additional? That evidently is the 10th May.

10962. The first document was the 2nd May, and this—"suggestions for dealing with the unemployed"—appears to be something additional to the instructions of the 2nd May? Well, it is practically the same. There is not much additional in it.

10963. It contains suggestions for dealing with the unemployed? Yes.

10964. What officers were appointed in connection with the Casual Labour Board. Give the names of the officers that the Board appointed? The Board made no appointment of officers. We took over the officers that were actually employed before. The Colonial Secretary made two appointments, but we made none.

10965. Was not Mr. Hibble appointed by you? Yes. He was a supernumerary, receiving 6s. per day.

10966. Did your Board appoint Mr. Hibble? Yes.

10967. Did your Board appoint Mr. Larnach? Yes, as a messenger.

10968. Did your Board appoint Mr. Josephson? No; the Colonial Secretary appointed him. Mr. Hinchcliffe and Mr. Josephson were appointed by the Colonial Secretary, and transferred from the Immigration Department to our department, on account of their having dealt with the unemployed prior to the existence of the Board.

10969. Did your Board appoint any superintending officers? Overseers and assistant superintendent.

10970. How were the overseers appointed? The superintendent in every case recommended a certain man as a tolerable man for the work, and we approved of his appointment.

10971. Did your Board appoint any assistant superintendent? Yes; we appointed Mr. M'Pherson, but he was already acting as a sort of superintendent over at Gordon when we took charge.

10972. When reports came from the overseers and superintendent, did you take them for gospel, or did you make inquiries? We made further inquiry, and took a great deal of trouble over them.

10973. What steps did you take to test the accuracy or otherwise of the reports? Either myself or a member of the Board would go out to make inquiry on the spot, where the reports related to what might be termed comparatively important matters. In many cases they would relate to quantities, measurements, grades, and levels. These would devolve more upon the other members of the Board than myself. I have no knowledge of giving the levels or taking the grades. That requires professional skill.

10974.

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

NOTE (on revision):—Q. 10945—For "the roads" read "a road." Q. 10948—Insert "No, but," and *add* at end, "and that at the latter end of last year." Q. 10965—For "supernumerary" read "temporary clerk." Q. 10970—For "tolerable" read "suitable."

- Hon. 10974. Did the professional members of the Board test the accuracy of the reports in these cases? Yes.
 John Davies, 10975. In all cases? Not in all cases. Sometimes I would send the assistant superintendent, who was a
 C.M.G., very skilled, reliable, and able man.
 M.L.C. 10976. Was that Mr. M'Pherson? Yes.
 24 April, 1889. 10977. In those cases where you sent Mr. M'Pherson, did you act then on your own judgment? The
 Board acted upon its own judgment on the reports which they received from Mr. M'Pherson. We had
 sometimes very lengthy reports—documents that would take a quarter of an hour or twenty minutes to
 read some of them.

[*Mr. Corkhill, an officer from the Treasury, attended and produced certain vouchers, which, for Departmental reasons, the Treasury officers did not wish to let out of their custody.*]

10978. Will you look at this contingent voucher for £261 10s.? Yes.
 10979. Do you identify that? Yes.
 10980. That is, I believe, a voucher put in for your expenses? Yes.
 10981. Do you notice the approval, apparently of Sir Henry Parkes, on the margin, dated 14th January, 1889? Yes.
 10982. Were you paid those expenses before that approval? A portion of them.
 10983. Not the whole of them? No; I do not think so. I think I may correct myself. In the latter part of December they were paid.
 10984. According to this cash-book there is a payment of £261 10s. to you on the 27th December. Would that be correct? Yes; it was in the latter part of December.
 10985. I think you said that whatever was paid then was paid in cash? Yes; the balance was paid in cash.
 10986. Then, as a matter of fact, you were settled with on this basis nearly a month before the approval of the Colonial Secretary was obtained? Yes; but I had intimation from the Minister that he would approve.
 10987. Did you see Sir Henry Parkes on that particular subject previously? Yes, several times.
 10988. And did he give you any intimation that this amount would be allowed? Yes; he informed me that my expenses would be paid on the basis I have indicated—at the rate of 10s. a day.
 10989. And you claim that this approval of 14th January, 1889, was only a confirmation of some previous intimation? Quite so.
 10990. I see at the foot here the receipt apparently signed by you, dated the 31st December, 1888—that is four days after the entry in the cash-book? Yes; it is quite possible. It was signed to make out the £6,000 advance for the adjustment.
 10991. Do you say this signature on the receipt was given for the purpose of adjustment? Yes. It was in all probability. It may have been signed at the time. It is not so long after the date.
 10992. Can you give me any explanation how it is that the 31st December is the date upon the receipt, when the payment, according to the cash-book, was made on the 27th December? I am sure I cannot tell what is in the cash-book. I know what the voucher says. It was paid on the 31st December.
 10993. Can you tell me about what date you had a settlement as to this payment? As nearly as I can say, the latter part of December.
 10994. But whether the 16th or 31st, you could not tell? I could not.
 10995. Have you brought with you any memoranda or can you give me any information as to the exact amount which was paid you by Mr. Hinchcliffe in December? No; I have no memoranda. I thought I had some at home, but I have not any. It was about £140, as nearly as I can possibly remember.
 10996. I refer you to a book with several entries (page 241), and at the foot of the entry a note of account made up to the 29th October, 1888, £155 7s. 8d.;—do you recollect that £155 7s. 8d.? No.
 10997. Do you recollect any payment at all? About £130 or £140, as nearly as I can remember.
 10998. Then as to the balance—the difference between £130 or £140 and £261 10s.;—when was that paid? The balance was paid, as I said, in the latter part of December.
 10999. Then what was the amount you received? You asked me what I received before. I told you about £90 yesterday afternoon. I found it was £130 or £140. I did not keep any memoranda after the matter was settled.
 11000. When was the difference paid you between £140 and £261? In December.
 11001. Then the whole of it was paid in the latter part of December? So far as I can remember.
 11002. Did you receive the whole £261 10s. in December? No; I received the balance in December.
 11003. What was that balance? About £130.
 11004. When did you receive the other £131 10s.? It extended over a period of two years very nearly.
 11005. In one payment? No.
 11006. In several payments? Yes.
 11007. How many? I could not say.
 11008. Might it be a dozen? It might; I could not say from memory.
 11009. Might it be in twenty payments? No; I should think not.
 11010. Have you searched to see if you have any records to show how it was paid? No. I have told you already that as soon as the account was settled and paid there was no further responsibility, and I destroyed all the memoranda. I did not anticipate being questioned about the matter, and there was no necessity for my keeping a pile of papers.
 11011. Did you at various times throughout the existence of the Board obtain petty-cash from Mr. Hinchcliffe for the payment of current expenses? There were sums of £130 paid to me on account of travelling expenses.
 11012. Where did he get the money from? I think he paid the money out of the petty-cash. I gave him an interim voucher.
 11013. Here is a voucher, which has been produced from a bundle of papers supplied to this Commission from the Treasury this morning, for £10 9s. 6d., purporting to be the personal expenses of Mr. Hinchcliffe;—can you give me any information how these personal expenses were regulated? It is impossible for me to give you information about all these matters, because I did not keep the accounts. I had nothing whatever to do with the accounts.
 11014. Here are four contingent vouchers of Mr. Hinchcliffe's for personal expenses, amounting to £13 8s. 3d., £10 15s. 11d., £10 8s. 6d., £10 9s. 6d., amounting in all to £45 2s. 2d., can you give me any information as to what personal expenses Mr. Hinchcliffe would have? I have to ask that you refer to the vouchers. They will explain themselves. 11015.

Hon.
John Davies,
C.M.G.,
M.L.C.
24 April, 1889.

11015. Can you give any information outside the vouchers? All I know is Mr. Hinchcliffe went to different places to make pays, and he incurred expenses. He supplied all the expenses that were incurred in the office, such as tram-tickets for messengers, and other petty expenses. I think you will find that charged there.
11016. Ought his expenses to come to nearly 10s. a day? No, I do not think they ought to come to 10s. a day. You told me last night that they did, and I was a little surprised to hear it.
11017. I see amongst other items in one of those vouchers there is a charge for stationery by Mr. Hinchcliffe? Yes; you will find a voucher attached I expect.
11018. Did you not keep stationery in the office? Yes; but some stationery we did not keep in the office. We got it outside. It was for documents of a special character.
11019. Did Mr. Hinchcliffe charge and pay it to himself? He charged the petty-cash.
11020. *Mr. Franklin.*] I just want to ask you a few questions about these vouchers, as the Treasury officer is waiting in the room to take them back with him;—where these accounts furnished monthly? They were not put in for adjustment monthly. They did not appear exactly every month.
11021. Would these vouchers represent all the petty-cash in connection with Mr. Hinchcliffe's expenses? Yes.
11022. And the items should agree with the cash-book? Yes.
11023. Had you anything to do with the cash-book? I have not kept the cash-book. I do not keep the cash-book, nor did I ever keep the cash-book. I do not suppose I looked at the cash-book during the whole twenty months. I did not regard that as any part of my functions at all.
11024. *Mr. Waller.*] Is this voucher for £261 10s. for the balance of money due to you for expenses? No, sir, it covered the whole expenditure for twenty-one months. I received a portion of it in the interim, and the balance of it was in the end of December.
11025. And you say that balance was £130? Yes.
11026. It would leave you, roughly speaking, as having received £131 10s. previously? Yes.
11027. Did you receive that in one sum, or at various times? In several sums.
11028. How many? I suppose three or four sums.
11029. Would it be six? Not more than four or five. That is apart from those shown in the book. I do not regard those sums of 4s. or 5s. as advances.
11030. Then you received the £131 10s. in three or four payments? Yes.
11031. In what amounts? In sums of £20 and upwards in cash.
11032. Was it all cash? Yes.
11033. Were there no cheques at all? No.
11034. Who would you receive it from? The Paymaster.
11035. Mr. Hinchcliffe? Yes.
11036. What would Mr. Hinchcliffe have to show that you got a sum of £20 when these advances were made? The ordinary contingent voucher, pending adjustment.
11037. What would become of the contingent vouchers after they passed through your hands? They would be locked up in his safe.
11038. Would they be of the same kind as the vouchers of other people for payment, or would they be I.O.U.'s? No; they would be simply contingent vouchers, and they were kept until the adjustment of the whole amount.
11039. What became of them in the end of December, 1888? They were destroyed then.
11040. Who destroyed them? Mr. Hinchcliffe.
11041. Did you see him destroy them? I am not certain.
11042. Of your own knowledge, do you know whether they were destroyed or not? He told me he would destroy them, and I think he tore them up in my presence.
11043. Are you quite positive that you gave a voucher for each payment that you received? Quite; except as regards those small sums that the President called attention to; there was no contingent voucher for those.
11044. Would those contingent vouchers have particulars on them, similar to these? I could not say; I did not fill up the contingent vouchers; I simply signed for what I received.
11045. Who would sign these contingent vouchers as well as yourself—Mr. Hinchcliffe? Yes.
11046. Anyone else? Somebody who witnessed my signature.
11047. Who would witness your signature? Mr. Hibble or Mr. Larnach.
11048. Who signed as head of the department for these payments? I did, but I found it was wrong, and that I could not do it. I had to get the approval of the Colonial Secretary. That is how I referred the whole matter to him.
11049. Would your signature be witnessed by one of those three you have named? Yes.
11050. What did the £130 that you received cover? Travelling expenses, hotel expenses, train and tram fares—I was not a Member of Parliament—and hire of vehicles. Of course it would be impossible to give all the details. They charged 4s. for dinner at the hotel when we visited the works, and there would of course be myself and Mr. Hinchcliffe. You will find when you go up to visit these works what it will cost; and they are very much more accessible now than they were when I had to visit them.
11051. Are you quite certain that these contingent vouchers were never used? I am positive of that. They were put in the safe and kept in the custody of the Paymaster.
11052. But you never saw them? I saw them when he tore them up in my presence, and said that the adjustment covered the whole of them.
- [*Mr. Corkhill, the officer from the Treasury, here left with the parcels of vouchers.*]
11053. *President.*] Were there any dismissals of officers during your existence as a Board? Yes; there was a number of surveyors and overseers dismissed by reason of the reduction of the number of men on the different works, and others were dismissed in consequence of their drunken habits.
11054. Were any officers dismissed who had been appointed by the Board? Well, you understand that they were not appointed by the Board. They were recommended by the superintendents and approved by the Board.
11055. Were any of them dismissed? Yes; for the reasons that I have explained. We had no reason for keeping the officers when the men were being reduced.
11056. Were any dismissed for improper conduct or irregularities? Yes; several of them.

11057.

NOTE (on revision) :—Q. 11020—Insert "Yes, but" Q. 11023—Insert "No." Q. 11041—For "I am not certain" read "Yes." Q. 11042—Omit "I think" Q. 11050—After "fares" insert "and hire of vehicles."

- Hon. John Davies, C.M.G., M.L.C.
24 April, 1889.
11057. Any holding important positions? Yes. Walsh was dismissed for drunkenness, and the superintendent, Mr. Burrowes, was reprimanded.
11058. I want to get the dismissals first? Walsh was dismissed for drunkenness. A man named Coleman was dismissed for improper conduct in connection with some man's pay. I think the papers I left will disclose that. A man named M'Donald was dismissed for drunkenness. An overseer named Bastable was dismissed for drunkenness—the overseer on the Liverpool Road, C. Arthington. I happened to visit the work on a Monday, and not only did I find the overseer drunk, but a number of men. I dismissed the lot. There were a number of persons dismissed for drunkenness during the two years that I occupied the position I had.
11059. I suppose, as the administrative head of your department, you are enabled to speak with some authority as to the different officers? Yes.
11060. What is your opinion of Mr. Hinchcliffe? Well, I have always had a very high opinion of Mr. Hinchcliffe. He was always most attentive to his duties.
11061. Truthful? Yes.
11062. Sober? Yes.
11063. Competent? Yes.
11064. What is your opinion of Mr. Hibble? I think Mr. Hibble of the two is even an abler man than Mr. Hinchcliffe.
11065. Honest? Yes; thoroughly honest.
11066. Sober? Yes.
11067. Truthful? Yes.
11068. A competent officer? Yes; very competent.
11069. What is your opinion of Mr. Josephson? I found him truthful and sober, but not a very competent officer.
11070. Honest? Yes.
11071. Mr. Larnach? I cannot speak well of Mr. Larnach. I do not wish to say anything to the detriment of this man; but if I had to conduct an affair of this kind again I would not employ him.
11072. What is your opinion of him? I believe him to be dishonest. I know him to be a drunkard. I know him to be most unreliable and untruthful.
11073. Was he competent in the discharge of his duties? No, sir. He had to index the papers, and if you turn to the index you will find that the papers were not indexed. He was frequently in arrears twelve months. I had the greatest difficulty in finding the papers required by Parliament or the Colonial Secretary.
11074. When did you discover that he was dishonest, untruthful, incompetent, and not sober? I found that he was not a sober man in the early part of last year—perhaps about the middle of the year. I found him to be untruthful, and believed him to be dishonest some time afterwards.
11075. How did you find it out? I got to learn a good deal of it from representations by people into whose debt he got. His landlady, his washerwoman, his coal merchant, Mrs. Lucas, the furniture dealer, Messrs. Cahill and Oatley, house-agents, all gave him a most terrible character for want of truthfulness, want of sobriety, and the impossibility of getting their money from him. He would take people's houses and pay no rent for them, and put false bum-bailiffs in them——
11076. Is this what you have been told;—I am asking you for an opinion from your own observation? The result of my own observation is that I would not trust him. During last year I found him to be untruthful and unreliable in every way.
11077. Did you dismiss him? No.
11078. Did the Board dismiss him? No. He was reprimanded, but was not dismissed.
11079. Do you think it was right as the head of a department to keep an officer in the discharge of responsible duties who was not sober, untruthful, dishonest, and incompetent? He had no responsible duties to perform. He simply acted as messenger and had to index the records.
11080. Do you think it was right, speaking in your capacity of Chairman of the Casual Labour Board, to keep in your employment an officer who was untruthful, not sober, dishonest, and incompetent? He was not an officer. I did not recognize him as an officer.
11081. Do you think it was right to have him there? There is no doubt it was not the proper thing for me to keep him. I should have got rid of him. I admit I committed a great error in not getting rid of him. It was on account of his family that I kept him on—to save them from starvation.
11082. Messrs. Hinchcliffe, Josephson, Hibble, and Larnach were the only officers or clerks in the head office, were they not? Yes; and the two detectives.
11083. What is your opinion of Mr. Burrowes? Well, I have formed a very bad opinion of Mr. Burrowes. You will find, on turning to the press copies of my letters, that I had to write to Mr. Burrowes with regard to his actions. I gave you an instance yesterday of how he was regarded by the professional members of the Board. I found him unreliable, and the other members of the Board found him incompetent; but, being a layman, I am not able to put my opinion by the side of theirs. I think if you will only turn up a letter I wrote to him on my visit to the Woronora River Road, where he left the overseer, Mr. M'Leod, in charge of important work, you will see for yourself. We were constructing a road from the Woronora River to the Peakhurst Road across the Woronora. On my visit with Mr. M'Pherson, the assistant superintendent, I found that the overseer had been carrying on this work—a work of really great magnitude—and that he had no levels and no grades supplied him by the superintendent, although the superintendent had previously informed me that he had got the grades and levels, and that he had given the overseer the necessary information to enable him to carry out this work, which was of a difficult character—very difficult indeed. Immediately on my return to Sydney I wrote to the superintendent, telling him what I had ascertained, and the letter will bear out what I said.
11084. When did you write the letter? I think it was in October. I told him I had been informed by Mr. M'Leod, who was in charge of the work, that he had been left entirely to himself to find the levels and grades, with a 9-inch spirit-level; that he had never checked the grades or quantities; that he had certified for the payments made without having seen the quantities or checked the measurements. You will find this letter amongst the correspondence, and it will be useful to have it looked up and read. It is rather a lengthy letter. I asked Mr. Burrowes to furnish me with an immediate explanation of his conduct, as his conduct was such that, unless he furnished a satisfactory explanation, I should feel it my duty to recommend my colleagues to dismiss him.
- 11085.

NOTE (on revision):—For “and put false bum-bailiffs in them—” read “and they would put the bailiff in and find that there was no goods to levy on.”

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11085. Did you receive a reply from him? He acknowledged the receipt of the letter, and said he would be able to send a report on the matter in a few days. I never received a report. He only gave me a verbal explanation that he had such confidence in Mr. M'Leod that he had no occasion to take the measurements or the quantities. He told the same thing to Mr. Wells. Well, then I also visited the works on the Main Illawarra Road. I saw the ganger in charge, and asked him if he had his level or his grade for a cutting that he was then making on the Main Illawarra Road. This man instead of gradually rising to get out of the cutting was actually going down deeper as he went on. I asked him whether he had got his levels and he said "no." Mr. Burrowes had told him up here a foot, down there a foot, and somewhere else a foot, but he had no levels. I told him he had better not go on with that, as it was most unsatisfactory. I placed myself in communication with Mr. Burrowes respecting this work, and he said it was all the fault of the ganger who was named Morgan. On the Liverpool and Eckersley Estate road—a road going through from Eckersley to Campbelltown—I paid a visit to the work and found that they were actually clearing roads through private property in direct violation of the instructions I gave them—in direct violation of the written instructions I had given to Mr. Burrowes—that he was not to proceed in the direction in which he was clearing the roads, as there were no Crown lands there. When he came to a drop of 70 feet over Peters' Meadows Creek, where an embankment would be necessary which would cost half the money in the Treasury, what does he do. He turns right in another direction, through private property, and goes into the creek again through the same drop. I called his attention to his neglecting to carry out his instructions, and he said it was Mr. Underwood, the overseer's fault—that it was he who had committed the error—then I told him to go in as straight a line as possible through the public estate to open up the land on the George's River, where 9,000 acres of land have been taken up by free selectors. Instead of going as I directed him straight through, he takes a detour in the Campbelltown direction, and clears roads facing private property fronting it for $3\frac{1}{2}$ miles, and not only clearing but ballasting the roads in direct violation of instructions. When he came to the office I brought him to task again. I told him to go and see Mr. Phillips, who owned the adjoining property, and he gave in writing authority to the Board to go through his land to give access to the Crown lands. I come now to another matter affecting Mr. Burrowes, and my statement can be verified. Mr. Burrowes sent a contingent voucher by young Springall from the camp signed by a man named Crane, one of the carters on the works. Mr. Burrowes signed a voucher containing no amounts and no quantities. When Mr. Burrowes came to the office I got the voucher, and in the presence of Mr. Hibble and Mr. Hinchcliffe I said that he ought to be dismissed for doing such a thing. I told him that he had certified to a blank voucher. I have since ascertained that he had borrowed £17 10s. off this man Crane, and he gave him a voucher for the amount of his debt. They are very easily comeatable these people, and the Commission can ascertain the truth of what I have stated. Then when the inquiry was on before the Select Committee, Mr. Burrowes gave evidence with reference to the works that had been under his control, and he subsequently received a circular from the Select Committee to give a report upon the Boundary Road at Hornsby. The Board, Mr. Wells, and myself remonstrated with him for giving a report upon a work that the professional members of the Board had already given their evidence upon. He stopped behind after Mr. Wells had left, and said to me, "I was out with those damned scoundrels yesterday. They are going to give you away. They are going to shirk all the responsibility for the Holt-Sutherland Roads." I said, "Do not talk to me about my colleagues in that way. I won't listen to you." The next morning I received a letter marked private and confidential. [*Letter put in and marked P 15.*] In that letter he underlines the reference that he makes to my colleagues, and then he says, "You can do what you like with me." At the end of December we got notice that we were to wind up the whole of the department; and it was scarcely worth our while to deal with Mr. Burrowes, as we received instructions that we were to get rid of the men, one-third each month, until they were all cleared off on the 31st March. I may also state that I also lent Mr. Burrowes money, and I hold an I.O.U. from him now for the last sum he borrowed from me. I hold Mr. Burrowes' I.O.U. for £2, dated 27th November, 1888. That has not yet been paid. You will form from this a pretty clear estimate of the trouble I had with the officers I had to manage this large amount of money.

11086-7. Well, Mr. Davies, I am still on Mr. Burrowes;—was he a sober man? No; he was not a sober man, but during the twenty-one months of the Board's existence I did not see him drunk more than three times.

11088. Was he an honest man? No; I do not think he was honest. I only realized that, however, during the last month or two of the year. I found that he had borrowed money from the men on the works. A man named Walsh had borrowed £10 to send to his wife in New Zealand, and Burrowes borrowed the money from him. Burrowes has since then paid £4 10s. of it back. We were frequently troubled with applications for money out of his wages from people on all hands, as well as people who had bills of sale over his furniture. He owed money to Peapes and Shaw. This gentleman, Neale, had a judgment against him. He borrowed money from a man named Cook, from a man named Moore, and he borrowed money off a man named James Rutherford, a contractor, who got a contract to make a dam across George's River. We have paid his petty-cash expenses to the amount of £12. We never stinted him in his travelling expenses, but he would incur debts at the hotels, and would not pay his expenses. He was summoned by a publican named Arnold. He borrowed this money from Rutherford, and never paid half of it. He also went to a storekeeper at Campbelltown —

11089. Do you know this of your own knowledge? Not of my own knowledge; I am informed by the storekeeper.

11090. I would like if you would confine yourself as much as possible to what you know yourself? Then there was Mr. Phillips, a gentleman who came to me at the railway-station, and asked me what had become of the man Burrowes. I said, "Has he had you, too?" He said, "Only £15." I could give you a list of over £400. He has borrowed money from a large number of people on the list.

11091. Will you condense what you have said by saying that, in your judgment, he was an utterly bad man? I found him towards the latter part of last year an utterly bad man.

George

George Robert Cartwright Neale called in and further examined:—

- Mr. G. R. C. Neale, 24 April, 1889.
11092. *President.*] Will you look through your books and give us a statement of the amounts paid by you to the Casual Labour Board or officers between the 1st January, 1887, and the end of 1888? Well, Mr. Cape, I have been brought here several times to the sittings of this Commission, and I should like to know who is going to pay me for all this lost time.
11093. If you will send an application to the Commission it will be considered. You must recollect that there are a large number of persons in exactly the same position as yourself? Perhaps they are in the Government service.
11094. Some of them may be, but look how many hundreds are subpoenaed to the Courts who are in the same position as you. However, submit your application; I do not say that it will be successful, but my colleagues and myself will give it our consideration. It will shorten your time and our time immensely if you will just go through your books and give me out of them what I ask? The first payment was 14th May, 1887, for the sale of firewood, £26 17s. 7d.; the next, 31st May, 1887, sale of wood, £38 4s. 2d.; the next, 23rd June, 1887, sale of wood, £66 12s. 6d.; July 7th, 1887, sale of wood, £41 12s.; July 19th, 1887, sale of wood, £5 4s. 6d.; July 19th, 1887, sale of wood, £33 3s. 2d.; August 4th, 1887, sale of wood, £40 1s. 1d.; August 19th, 1887, sale of wood, £36 3s. 10d.; September 1st, 1887, sale of wood, £40 12s. 3d.; September 23rd, 1887, sale of wood, £52 3s. 2d.
11095. Now, how is it that the first item, £26 17s. 7d., is not in your ledger books? For the simple reason that we never ledger any country people's stuff; we send the cheques every day, and the amounts would be in the account sales books. It is only in cases when we get weekly or fortnightly payments that I do this.
11096. After that payment of £26 17s. 7d., you opened a ledger account? Yes.
11097. Before that you had not a ledger account? No; but all these items are in the account sales book.
11098. How does it come about that when you were examined before us on the 26th of March last you omitted to tell us of the item £33 3s. 2d.? Yes; because there was no memo. made as to where it was placed; it was only, as I told you, the other day that I found it out.
11099. On the same date as that you see you made a payment, £5 4s. 6d.? Yes; when transferring this from the account sales book the boy omitted to make an entry of the folio it was on. It was only a few days ago that I found out where it was placed.
11100. Then through a purely clerical mistake in your office the item £33 3s. 2d. had been overlooked by you in giving your last evidence? Yes; the cheque had been paid, but through the fault of the lad not folioing it it had been omitted.
11101. Will you read out the amounts making up this payment? July 6th, £2 9s. 2d.; 7th, £2 8s. 6d.; 8th, £2 7s. 11d.; 9th, £2 4s. 9d.; 9th, £3 4s. 5d.; 11th, £2 1s.; 11th, £2 2s. 11d.; 12th, £1 19s. 11d.; 15th, £2 19s. 5d.; 16th, £1 18s. 8d.; 18th, £5 5s. 9d.; 19th, £4 0s. 9d.
11102. Are these the items representing the account sales for £33 3s. 2d.? Yes.
11103. Did you give that item to Mr. Davies when he asked recently? I could not say; he asked me whether I knew the amounts of the cheques I sent over or paid to the Casual Labour Board.
11104. This account [*Exhibit P*] which Mr. Davies says you gave him, is the item £33 3s. 2d. in that? I do not see it. I have told you the reason that I did not give it to you before, because it was not mentioned where the other amounts were.
11105. Do you recollect giving that amount to Mr. Davies when he called upon you about a month previous to your giving your former evidence? No, I cannot. He said at the time, "I fancy there is something more." I said, "I cannot find it."
11106. Do you think that the item of £33 3s. 2d. was given to Mr. Davies when he called? I do not think so. That is my writing [*Exhibit P*]. I am sure I gave that.
11107. But you do not recollect giving him the item £33 3s. 2d.? I should have given it to him had I known it to be there.
11108. Do you notice in your account [*Exhibit P*] that you have not mentioned the £26 17s. 7d. Why is it not mentioned there? I cannot say; it was not in the ledger.
11109. What took place at your interview with Mr. Davies? I was going out myself, and he shook hands and said, "Can you give me the amount of the cheques you paid to the Casual Labour Board." I said, "I am in a hurry now." He said, "That won't take you five minutes." I turned up the ledger, but I did not attempt to go through my account sales book, so I did not give him the amount of £26 17s. 7d., for it would have taken me some time to find it out.
11110. Then this account [*Exhibit P*] which you gave him was an abstract from the ledger, and you did not give him the other items because you did not attempt to go into your other books to fish them out? That is so.
11111. Have you brought here the cheque you gave for £33 3s. 2d.? Yes. I produce the cheque, dated 19 July, 1887, payable in favour of Mr. Burrowes or bearer, for £33 3s. 2d. This cheque is on the Bank of New South Wales, Haymarket Branch, and is signed by me.
11112. The cheque is crossed BANK,—is that done by you? It was done in my office; the cheque bears the stamp of Bank of New South Wales, Haymarket Branch; Bank of New South Wales, Sydney, and of the City Bank, and is also marked C.B. on the back.
11113. Read over your evidence of 26th March last, which I hand you? Yes.
11114. Are there any alterations or additions that you desire to make? Yes; in my answer to question 2969, I wish to say that is how I first came to know Mr. Davies was there.
11115. I show you the cheques for £26 17s. 7d. and £52 3s. 1d., which you handed us when you gave evidence on 26th March last, and the cheque for £33 3s. 2d., which you produced to us to-day;—are these all signed by you? Yes. [*Cheques put in and marked Q, Q 1, Q 2.*]
11116. I show you also the copy account sales for £26 17s. 7d. and £52 3s. 2d., furnished by you to this Commission? Yes. [*Copy account sales put in and marked Q 3 and Q 4.*]

Wm. Duchesne called in and further examined:—

11117. Will you look at this cheque purporting to be signed by George Robt. Neale, dated the 19th July, 1887, payable to Mr. Burrowes or bearer, £33 3s. 2d., and say whether it has passed through the City Bank? It has been through.

Mr. W.
Duchesne.
24 April, 1889.

11118. Have you with you to-day the deposite slip that contains that? I have. That cheque is part of a deposit of £38 3s. 2d. paid into the account of John Davies, C.M.G., on the 19th July, 1887.

11119. Do you produce the credit slip evidencing that? I do. [*Deposit slip put in and marked G 2.*]

11120. By whom was that payment made? It was paid in by John Davies.

11121. Is that credit slip in the handwriting of Mr. John Davies? It is in Mr. John Davies' handwriting.

11122. Then this cheque of £33 3s. 2d. is part of a deposit of £38 3s. 2d.? Yes, the balance being made up in notes and gold—4 notes and £1 in gold.

11123. Will you read the body of the deposit slip? "Paid in for the credit of John Davies, C.M.G., the sum of thirty-eight pounds three shillings and two-pence, by self, to provide for cheque to be drawn on Thursday."

11124. Do you believe that the whole of that deposit slip is in Mr. Davies' handwriting? I should say so. Undoubtedly the figures are rather more clearly made than Mr. Davies usually makes them, but I could not say that they are not his.

11125. Do you produce from amongst the cheques in your hand any cheque by John Davies, C.M.G., for £26 17s. 7d.? I have no cheque for that amount.

11126. What cheques are these—from what date to what date? These cheques were debited to John Davies, C.M.G., on his account No. 1, from the 19th May, 1887, to 31st September, 1887.

11127. Are these all the cheques that would be debited to his two accounts between those dates? Yes, these are all the cheques.

11128. Is there a cheque for £33 3s. 2d. amongst that lot? There is no cheque for that amount.

11129. Is there a cheque for £52 3s. 2d.? I have no cheque for that amount.

11130. Is there one for £52 13s. 2d.? I have none for that amount; but one for £53 12s. 4d.

11131. Will you kindly search the account of John Davies, C.M.G., and the account of John Davies No. 2, and any other accounts of John Davies in your bank, from the 1st May, 1887, to 31st March, 1889, and inform this Commission whether there is any cheque drawn by him for £26 17s. 7d.; £33 3s. 2d.; £52 3s. 2d.; £52 13s. 2d.; £8 10s.; £86 11s. 7d.; £139 12s. 11d.; £26 6s. 4d.;—all or any of those? Yes.

11132. Will you kindly attend this afternoon with the information? Yes.

[Witness attended subsequently and stated that there was not any cheque drawn for any of the amounts given to him.]

The Hon. John Davies, C.M.G., M.L.C., called in, and further examined:—

11132½. *President.*] When did it first dawn upon you or your colleagues that Mr. Burrowes was such an indifferent officer? I think from the letters I have handed in this morning you will find that Mr. Wells, one of my colleagues, in 1887, took exception to Mr. Burrowes in very strong language, which he put in writing, and stated that he should be taken from the work—that Mr. Burrowes should have no possible connection with the work of the roads, although he might have a supervision over the men, and might deal with the requisitions for supplies. In conjunction with that, I might say we found that he had certified to the payment of a drunken overseer who had been absent ten days from his work, and the man was returned for full pay on the pay-sheet. This circumstance caused Mr. Wells to express himself in very strong language—in very strong terms indeed—that Mr. Burrowes should not have any further control over the road-making. He had at that time charge of Unwin's Bridge Road and the Waterfalls Road, and several other roads within the National Park. In the first instance, on receiving an explanation from Mr. Burrowes, the Board, at the instance of Mr. Wells, took these other roads out of the control of Mr. Burrowes, and placed them under the control of Mr. M'Pherson, who, I may say, gave the Board general satisfaction in the works which he carried out. That was the first instance in which I remember Mr. Burrowes showed so badly. Then there was that in connection with the Woronona River Road, which I have already referred to this morning. There have been circumstances of a similar character developing, showing that Mr. Burrowes has been very lax and neglectful or ignorant of what was going on, and very culpable in allowing measurements to pass simply on the *ipse dixit* of the overseer instead of checking them, which it was his duty to do prior to the pay. In the case I refer to he never went and checked the quantities, as Mr. M'Leod informed me, in the presence of Mr. Hibble. He had never been present to check any of his measurements, but simply relied upon his own judgment and his own skill in making the measurements.

Hon.
John Davies,
C.M.G.,
M.L.C.
24 April, 1889.

11133. One witness who has been examined before this Commission was asked this question—speaking of Mr. Burrowes—"With the exception of this imperfection of professional knowledge, were his other duties satisfactorily performed?—Yes; I consider him a very good and very efficient officer"? Yes, up to that stage I suppose I considered him very good and very efficient. That is up to the last three months of last year.

11134. Do you recollect when Mr. Wells was examined before this Commission? Yes.

11135. I suppose you recollect seeing him the morning of the day afterwards? Yes; I think so, but I am not certain whether it was the next day.

11136. Will you give me, as nearly as you can, the substance of the conversation you had with Mr. Wells on the day after he was first examined here—where it was, and what it was about? Well, I do not know that I can give it. It had no special reference to the inquiry. It simply, I think, had reference to getting employment for one or two of our overseers—Mr. Oxley, whom I recommended as a very deserving man, Mr. M'Leod, and Mr. O'Donnell. These men I had every confidence in, and recommended that something might be done for them in the Roads Department. Then he said he had been up before the Commission and had given evidence—I said that I saw from the papers that he had been called, but as to a detailed statement of his evidence there was no reference whatever.

11136½. Are you sure no reference was made to any of his evidence? Yes.

11137. Did he make any reference to Mr. Burrowes? I think he did say something of Mr. Burrowes, and I told him I had this letter—private and confidential, written in 1887—wherein he made reference to Mr. Burrowes. That is the letter I gave you this morning.

11138.

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11138. Where did the conversation take place? In Mr. Wells' room.
11139. Was it by accident that you found yourself there that morning just after his first examination? It was purely accidental. I am in this building nearly every day of my life—in one part or another.
11140. Are you in the Public Service? I am a public man. I am a Member of Parliament. I have public duties to perform, and I have a right to go to a public office and carry out those public duties.
11141. Are you in the Public Service? No. I think it is well known I am not, Mr. Chairman. You need not ask me that.
11142. I have very little knowledge of you, sir? Well, sir, I have very little knowledge of you, so the relations are mutual—the relations are mutual.
11143. When did Mr. Wells first complain to you about Mr. Burrowes? As far back as August, 1887.
11144. Mr. Wells has given in evidence here a letter of 25th October, 1887, in which he complains in very strong terms of Mr. Burrowes' wilful insubordination? Incompetency, I think you will find, Mr. Chairman.
11145. In this letter of 25th October, I think you will see the words "wilful insubordination"? I see the word "incompetency" here.
11146. Read the beginning of the letter. Am I right or wrong? Right, as you always are, Mr. Chairman.
11147. Will you tell me, as nearly as you can recollect, what followed upon this complaint? The changes I have already described followed upon the complaint. We took from Mr. Burrowes the road-making. We took from him the special roads I have mentioned—the Unwin Bridge Road, the Waterfall Road, and placed them under the control of Mr. M'Pherson, the assistant superintendent.
11148. Can this Commission take it that in October, 1887, the Board became aware that Mr. Burrowes was an incompetent and useless officer? That was the opinion of Mr. Wells.
11149. Did you share that opinion then? No, I did not. But I did not disagree with him, because it was the expression of a professional opinion against that of a layman.
11150. Then at that time the objection to Mr. Burrowes was rather of a professional than a moral character? Just so.
11151. Did Mr. Wells recommend Mr. Burrowes' immediate dismissal? I am not aware that he recommended his dismissal—he recommended his suspension. You see he was not appointed by the Board—he was appointed by Mr. Dibbs. So you see what a difficulty there was in dealing with a man like Mr. Burrowes.
11152. Did you on any occasion in Mr. Wells' presence beg off Mr. Burrowes? Certainly not.
11153. Are you sure? Certainly, sir.
11154. If any witness has stated in his evidence before this Commission that you did beg off Mr. Burrowes, is that untrue? If any witness has said that he has stated an absolute untruth. I am as positive about that as about anything in my life.
11155. When did you first become aware as Chairman of the Casual Labour Board that Mr. Burrowes was not only professionally incompetent, but the reverse of a sober man—and a dishonest and untruthful man? In September or October, 1888.
11156. I understand then, the Board became aware in September, 1887, that he was professionally incompetent? That was, as I have explained, the professional opinion of my colleagues. I did not put my opinion by the side of theirs, because they are in a position to form an opinion and I am not.
11157. Did your Board, or you, as the administrative head, retain Mr. Burrowes in a highly responsible position during the whole time of the existence of the Board? As I have told you already, I regarded him up to September or October, 1888, as an efficient officer, so far as the administration of his department went; of his professional skill I cannot speak. It was not until the latter part of September of last year that I discovered he was borrowing money from the men on the works—that in fact he was placing himself in an improper position as regards the employees, and was getting himself into all sorts of scrapes. The last time we had an instance of this kind was an application from Mr. Jones, the tailor.
11158. Do you know this of your own knowledge? Mr. Jones told me.
11159. Do you know if we have got this evidence? Well, if you have got it in evidence there ought to be no harm in my confirming it. No one is better informed about these matters than I am. I say that he went and got a suit of clothes from Mr. Jones the tailor to go to Lord Carrington's installation.
11160. Do you know this of your own knowledge? I know it from the statement of the man himself.
11161. Can you swear that statement is correct? I cannot do that, but you can call Mr. Jones and examine him.
11162. What is the use of taking up our time with this talk. The time of the Commission is important. This is not evidence? You insult me, sir. [*Witness rising up from his chair.*] I am not here to submit to insult from you or anybody else. I am here every bit as good as yourself. I am not a twopenny-halfpenny police court lawyer. I am not here on the cheap ticket.
11163. What do you mean? I mean that I am not going to be insulted or bullied either. I will give you all the information within my power, but I am not to be insulted. I am quite your equals Mr. Cape—quite your equals. [*Witness resumes his seat.*]
11164. Have you anything further to add? If you do not wish me to add anything further, I will not. You prevented me from doing it, and I have lost the thread of what I was saying. I am here to give evidence. If you decline to hear my evidence, of course I cannot help it.
11165. *President, resuming.*] I was asking you more particularly with reference to Mr. Burrowes—what steps you took when it came to your knowledge that he was a useless, untrustworthy, and incompetent officer? I must ask you to turn to the press copy of my letters. You will find the information you require in the press copybook. If you will kindly ask your Secretary to turn them up I shall feel obliged. I did not rest in the matter. I did not sleep. I took the proper steps. I desire to have the correspondence read and put in evidence.
11166. Are these you refer to letters you have written to him, or letters he has written to you? They are letters that I have written to him complaining of his conduct.
11167. Can you fix about the time? I think you will find it was in November of last year.
11168. A Select Committee of the Legislative Assembly was appointed to inquire into the working of the unemployed on the Hornsby and Holt-Sutherland Estates on the 15th November, 1888. Was it prior or subsequent to that you discovered Mr. Burrowes was an utterly useless, untrustworthy, and incompetent officer? It was prior to that. If you will be good enough to have those letters read they will speak for themselves. I desire that they be read and put in evidence. 11169.

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11169. They will be put in at the proper time? In my opinion the proper time is now, but of course you are the judge.
11170. You will be good enough to allow this Commission to be the judge as to when the proper time is? I am quite agreeable to that. I admit you are the judges. I have said so.
11171. Did you on any subsequent occasion, when Mr. Burrowes' conduct was brought under your notice, beg him off? I never begged him off in my life. It was only on account of his wife and family that I asked that he should be kept on. I may have done that after hearing his explanation with reference to some of his misdoings.
11172. Can you give me any opinion with regard to the way Mr. Springall performed his duties? Well, I had occasion to complain of Mr. Springall's conduct on several occasions with reference to the private store of which he was in charge. He was called upon to explain his conduct, and he did explain some matters that are referred to in the letters which you will find concerning a man named Coleman. The explanation of Mr. Springall at the time was considered satisfactory. Another statement that cropped up was a statement that Mr. Burrowes' salary was mortgaged to Mr. Springall, and that consequently Mr. Springall was more the superintendent than Mr. Burrowes was. I inquired into the matter, and the explanations furnished by Mr. Springall was that it was not so; that he had simply advanced Mr. Burrowes £10 to take the bailiffs out of his house, but so far as the salary being mortgaged was concerned there was no foundation for the statement. The Board regarded the explanation as satisfactory, and we took no further action with respect to Mr. Springall. We examined his books and found them faithfully kept, and the records of every thing he did in connection with the works were all kept properly. Press copies were kept of all rations supplied, and so far as I could form an opinion everything was satisfactory.
11173. Can this Commission take it that he was in your opinion an efficient officer? Upon the whole he was.
11174. You say "We examined his books"—who examined his books? Mr. Hinchcliffe and myself.
11175. Is he the Paymaster? Yes.
11176. Then you do not include in the "We" your colleagues? No; because they were not always with me. I conceived that Mr. Hinchcliffe was better able to do work of that kind than either my colleagues or myself.
11177. Is Springall a sober man? I have never seen him under the influence of liquor.
11178. Is he an honest man? I have never known anything to the contrary.
11179. Is he truthful? I believe so.
11180. As to Mr. O'Donnell—was he appointed by the Board? Yes, we took him on.
11181. Will you tell me your opinion of him as an officer? Well, in the early part of the time he was not so sober as he was in the latter part of his time. He is not a bright man, but I think him an honest man.
11182. Would you call him an efficient officer after your twenty months' experience? I think he was as efficient as most of the officers we had. He had no professional knowledge or skill—he was simply an intelligent labouring man.
11183. Had you any previous knowledge of his qualifications or experience? No, I had not.
11184. Do you know whether he is a Sydney man, a Victorian, or a Queenslander? He is a native of Sydney.
11185. Do you know whether he is any relation to the late Mr. J. S. Farnell? I believe he had some connection with the late Mr. Farnell.
11186. Do you know the nature of that connection? I do not know.
11187. Now, we can probably summarize the other officers. What is your opinion of Mr. Sanderson? Which Mr. Sanderson—there are two of that name, John and H. T.
11188. Well, what is your opinion of Mr. H. T. Sanderson. He says he is an engineer, and appears to have been employed for some time by the Casual Labour Board? He was employed before we took charge. I have not a good opinion of Mr. Sanderson. When we were reducing the works we reduced the number of employees. We gave notice to Sanderson, Underwood, and Fraser, all surveyors. They were dismissed because we had no further employment for them. They were receiving 10s. a day. Mr. Sanderson requested us to retain him as an officer, and we got him to take charge of one of the contracts as an overseer. We sent him to Cook Park, and had a great deal of trouble with him on account of his measurements. A professional member of the Board went up two or three times, and in one instance reduced the measurements 30 per cent., and still the men were perfectly satisfied with the price. Another instance was where Mr. Sanderson levied blackmail upon the men, and sent the hat round. That I considered a serious offence, and Mr. Sanderson received no further employment. He has sent in an account in which he claims the sum of £32 or £33, which he sent me a lawyer's letter for; but he has no more claim upon me than the greatest stranger I can meet in the street.
11189. Then he was an unsatisfactory officer? Yes.
11190. Who appointed him? He was appointed before my time.
11191. Was he one of the legacies you took over? Yes.
11192. Did he remain in the employ of the Board during the whole time of its existence? Yes.
11193. When did you first become aware of his incompetency? At Cook Park five or six months ago.
11194. Did you take any steps to remove him? No.
11195. Then he remained in your employment during the whole of the Board's existence? Yes. In the ordinary work he is an intelligent officer, but we could not know what he did afterwards when he was left to his own resources and professional work had to be done.
11196. But he, although in your opinion an incompetent officer, was retained during the whole of the period of the Board's existence? I do not say he was incompetent in the sense in which you employ the word. He was a surveyor, but he was not a satisfactory officer. He was a sober old man. I never saw him under the influence of drink.
11197. I suppose you can say nothing but good in connection with Mr. Oxley and Mr. McPherson? They are the best men that we had in the service—sober, reliable, truthful, and in every way doing their best to get the best results from their employment.
11198. Did you know Mr. Henry Little? Yes.
11199. Was he an appointment of the Board or a legacy? A legacy.
11200. Can you express any opinion about him? I do not know anything about his capabilities—he was an overseer under Mr. O'Donnell.

11201.

NOTE (on revision) :—For "employment" read "employees."

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11201. Do you know a man named Goodman who held a subordinate office in Springall's store? I know nothing of him.
11202. Do you know a man named Johnson who also, it appears, held a subordinate office at Springall's store? Johnson was the assistant storekeeper.
11203. Can you give us your opinion of Mr. Johnson? I always found him a sober, respectable, trustworthy man.
11204. Do you know where he came from? I believe he came from the ranks of the unemployed.
11205. Mr. Boylan, can you give us your opinion about him? He was an old Irishman, an honest, reliable man, who did his work satisfactorily.
11206. What position did he occupy? He was an overseer.
11207. An appointment of the Board? Yes; under the recommendation of one of the superintendents.
11208. Had his duties anything to do with Mr. Burrowes? At one time they had. I think at the closing of our works he was under Mr. Burrowes.
11209. Did he and Mr. Burrowes get on well? They did not. I may explain that I had occasion to dismiss Arthington the overseer and about ten or twelve gangers, and then I appointed Mr. Boylan to take Arthington's place; and Boylan did not go to plot out his work to put the men on to advantage, and that caused Burrowes to have some bit of feeling towards the old man.
11210. Do you know a man named M'Leod? Yes; he was appointed overseer on the works at 5s. a day on this blessed Woronora River Road. His father was in New Zealand in connection with the New Zealand Railways. His son set up here, and as he could not find employment anywhere else, we gave him work. He is a very reliable, trustworthy fellow—very intelligent.
11211. Did you ever recommend your colleagues to dismiss any of the officers whose names I have gone through? I am not aware that I have recommended their dismissal.
11212. Do you know whether Mr. Houison ever expressed his opinion of Mr. Sanderson to you? Well, I really could not say. It would only be a matter of guess. I could not speak from memory of Mr. Sanderson, beyond saying that he was a failure.
11213. I show you a letter dated 29th October, 1888, from Mr. Houison to you, respecting the measurements at Cook Park. Do you recognize that? That is the second time he went. There is one before.
11214. That speaks rather favourably of Mr. Sanderson? Yes; but in the first instance he found the measurements all out.
11215. In the letter he states, that he had made every allowance for irregular tracing, and also allowed to a large extent for curvatures, and he found Mr. Sanderson's figures fairly satisfactory as regards the total. That letter is rather commendatory? Yes; that refers to the second time he went there. In the first instance a reduction was made of 30 per cent.
11216. I gather from your whole evidence as regards Mr. Burrowes that you, and apparently your colleagues, did not regard him as an efficient or proper officer. Did you ever take any steps to dismiss him? I think I have already answered that. I told you that it was only in the latter part of the year that I considered Mr. Burrowes an unsatisfactory officer. I took no steps to dismiss him, and my successors found it a difficult matter to get rid of him. He was twice restored after his services had been dispensed with.
11217. I have now been through the list of officers who have been connected with or appointed by the Casual Labour Board, and it appears to me—of course you will correct me if I am wrong—that with the exception of Messrs. Larnach, Burrowes, and Sanderson, you entertained a fairly good opinion of all of them? Yes; and I did of Mr. Burrowes until the latter part of last year.
11218. I put in your hands what appears to be a press copy letter-book from the 10th March, 1886, to 27th August, 1888? Yes; that begins before our time.
- 11219-20. Will you kindly look through that book, and for the information of this Commission point out any letters referring to any of the officers whose names I have mentioned that you think the Commission ought to pay attention to? There is one written on 14th August, 1888, addressed to the superintendent, Mr. Burrowes. It is copied on page 1434 of the press copy letter-book, head office. There is another on the 20th August, 1888, copied on page 1449; and another on the 27th August, copied on page 1459; but I want the other book.
11221. *President.*] That is the only press copy letter-book we have. Do all these letters relate to Mr. Burrowes? They relate to want of attention to duties.
11222. Are they not in the nature of complaints? They are strong remonstrances from myself.
11223. The first is in the beginning of August, 1888. Yes, in August, 1888.
11224. Have you been able to find any letter prior to August, 1888? I do not think I have. I am not certain. I did not look for any previous ones. I think you will find one of Mr. Deering's complaining the same way.
11225. Is there nothing earlier than 1888? I do not think there is, so far as the Board is concerned.
11226. Can I take it that up to August, 1888, short of the professional objections that Mr. Wells pressed against him, he had given you satisfaction? He had given satisfaction in the general management of the men up to that time.
11227. Short of his professional incompetency? Yes.
11228. Up to that time you placed every reliance on him? I did.
11229. Were you on friendly terms? I have never been in any other way than on friendly terms with him. I treated him with the greatest kindness.
11230. Were you acquainted with him beyond the official acquaintance as head of the department? No, certainly not. I treated him in a courteous manner as an officer having charge of important works.
11231. Can you speak of there being an intimacy between you? No.
11232. Did he ever stop at your house? I do not think so.
11233. Do you know Mrs. Burrowes? I have met her on the station.
11234. Did you ever call him Ned? Never in my life.
11235. Did you ever give him any gratuity? Never.
11236. I do not mean in your personal capacity, but as Chairman of the Casual Labour Board? Never.
11237. Did you ever give Mr. Hibble any gratuity? Yes; I gave him a Christmas-box at the end of the year—Mr. Larnach and Mr. Hibble.

11238.

NOTE (on revision):—Q. 11209—For "Boylan" read "Burrowes" For "plot out his" read "plot out the" Omit from "Burrowes" to "old man" inclusive, and insert "Boylan to complain, at which Burrowes, in consequence, had some bad feeling against him" Q. 11216—For "consider" read "considered."

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11138. Mr. Hinchcliffe? No.
11139. Any of the overseers or anyone excepting Larnach and Hibble? No; it was only half-a-guinea for a Christmas-box.
11140. Did you have any list or schedule made or sent in to you of the stock of goods or plant in hand when the relief works were handed over to the Casual Labour Board? No; not any.
11141. Did you when you came into existence have any store-book, or such-like book, to check the stores in hand? Yes; I had a statement made to me.
11142. Where was it kept? It was kept at each of the stores. I think amongst the papers you will find a statement containing all the stock in hand, all the tools, tents, and cooking utensils in the field.
11143. Did you, when you first took office, organize any system under which the office was to be conducted, or did you take it just as it came? I had to organize. We made a great change to what existed before our time. We made each storeman responsible direct to the Board for the custody and distribution of the stores.
11144. Do you think that your organizations of the outside system were as perfect as you could make them under the circumstances? It was as perfect as we could make it under the circumstances. We had hundreds of men applying for work. We had not, at first, the same time as we had last year to devote to office duties. The men almost pulled the office down about us.
11145. Did you organize any system in the head office for the regulation of its affairs? Yes. Mr. Hinchcliffe was appointed Paymaster and Secretary; Mr. Josephson was Assistant Paymaster and Registrar. Their duties were defined according to instructions received from the Colonial Secretary. Assistants in the office—we had Mr. Hibble to assist in the correspondence and look after matters of detail, and we had Mr. Larnach as messenger, and to assist also in copying the records. These were their duties.
11246. Did they drop into those duties naturally, or did you instruct them? I instructed them.
11247. Did they refer to you at all? They referred to us, because we had a written statement defining their duties.
11248. Did you detail to each officer his duties and responsibilities? The Board of course did that in conformity with instructions they received, excepting the two officers whose duties were defined. Mr. Josephson, the Registrar, was appointed; and Mr. Hinchcliffe was appointed Paymaster and Secretary. The others were simply supernumeraries appointed by the Board to assist.
11249. Did you take any steps to instruct them at the start of the concern what the routine of the department was to be? I took steps to get the books properly printed for the registration of persons applying, where they came from, and all particulars. That was given to Mr. Josephson with instructions to him what to do. Mr. Hinchcliffe seemed to be better informed than what we were ourselves; he had been at the same work before. In order that the Board might have a personal knowledge of the earnings of the men, and the wages at the different works, I advised a system of an average sheet showing the earnings of each man per day at all the works. Any moment you asked about a man, how much he earned, the quantities, and so on, it was shown in this average sheet, with any remarks that the superintendent liked to make in the margin. That I found to be useful, because if I found the wages larger than ought to be paid on relief works, I communicated with the superintendent asking for an explanation, why Brown or Jones received so much money at the last pay. I found it very useful in conducting the business of the Board. That was approved of by my colleagues.
11250. What I want to get at is this: Whether any of the officers who were in the Sydney office knew from you or from any member of the Board what their definite duties were, and what they were responsible for? Yes; I think there could be no mistake about that.
11251. Their duties were defined then, either by you or some member of the Board? Yes.
11252. If A says, "I have no duty with this"; B says, "I have no duty with this"; and C says, "I have no duty with this," how can we find out, other than from you, that they had such duties? I am sure they had their separate duties, and each was responsible for the discharge of those duties.
11253. Did you regard Mr. Hinchcliffe as senior clerk? Yes; we looked upon him as principal.
11254. How long was he in Melbourne? A fortnight.
11255. Who did his duties at that time? Mr. Hibble.
11256. With your approval? Yes.
11257. I believe you were in Melbourne also? For two days. From the Friday to the Monday.
11258. So short a time that you had no occasion to hand over your administration to a colleague? I went away by the 5 o'clock train on Friday night, and on Monday, by 12 o'clock, I came back. I told Mr. Houson and Mr. Wells I was going.
11259. When did you tell Mr. Larnach that he was an officer? He was not an officer. He was a messenger.
11260. But he made pays? At the instance of the Paymaster. I always told him I would not regard Larnach as being responsible.
11261. Do you know that he made up the average pay-sheets? Very seldom indeed.
11262. Did you take any steps to have him removed? I threatened him two or three times, but he commenced crying away like a baby, and I suppose he touched a weak spring in my heart and I let him remain with a reprimand.
11263. What was the extent of Mr. Burrowes' district? Well, he certainly had a large district. That was why we were so liberal in allowing him £12 a month to pay his travelling expenses.
11264. Do you think his district was so large that he could not properly undertake all the duties you held him responsible for? I do not think that, because he had forage allowance for a horse.
11265. Had he to certify to the delivery of all stores and supplies and rations? No; the storekeepers certified to the rations.
11266. Do you think, with the large extent of his district, he could fairly and properly be held responsible for the efficient discharge of all the duties that you looked to him to perform? I do. If he had been devoted to his duties he could have done them with comparative ease.
11267. Can you tell me approximately the average number of men he was responsible for? At what time?
11268. The average number throughout the year. I do not limit you to ten or twenty? The pay-sheets will show exactly what was the number under his control.
11269. Cannot you give me an average without reference to the pay-sheets? They would show exactly. At one time he had 4,000 or 5,000 men, but then they were scattered in the Park.

- Hon. John Davies, C.M.G., M.L.C.
24 April, 1889.
11270. I have just had the second letter-book sent up to me from the Board office, and which I telephoned for. It is from the 28th August, 1888, to the end of the Board's time. Will you look through it and find any letters about the officers under the Board to which you wish to direct the attention of the Commission? Yes. There are letters on the 24th September, 1888, page 72; on the 12th October, 1888, page 87; and on the 8th November, 1888, page 129. This last is a special letter, and I want to draw the attention of the Board to it. There is a letter on the 23rd December, 1888, page 152, instructing Burrowes to go with the other members of the Board to visit the Holt-Sutherland Estate; and another on the 21st January, 1889, page 256.
11271. Will this Commission find in these two letter-books all the letters you have written to Mr. Burrowes in the nature of complaints? Yes.
11272. Did Mr. Burrowes often write to you? Yes.
11273. Many letters? Daily, almost. Official letters.
11274. Did you have any private or unofficial letters from him? Yes. I think I have shown you some this morning. I have had scores of letters marked "private and confidential," but I never kept them.
11275. Did you keep any beyond those you have shown me? I think not.
11276. Did you not keep them to satisfy yourself? No. It is a wonder I did not tear up these. I did not take them to be worth anything.
11277. Do you remember him writing to you something in connection with Mr. Want—about roads? No.
11278. Do you remember him writing anything about Mr. Walker, the Principal Under Secretary, and about the roads? No, I do not remember; he may have done.
11279. Do you recollect when Mr. Miles took over the duties from your department? Yes.
11280. Do you recollect a conversation with him in the office? Yes.
11281. Do you recollect how it started? I do not know.
11282. Do you recollect your saying anything to him about Mr. Burrowes? I do not remember—I may have done.
11283. And his remarking to you, "it was strange you kept such a man in your employ"? I do not remember any such thing. I have had little to say to Mr. Miles. It has been to Mr. Mason.
11284. Did you ever caution Mr. Wells against Mr. Burrowes? Each of my colleagues knew what letters were written.
11285. Will you tell me, for the benefit of myself and colleagues, which of these officers we can rely upon, in your opinion, as being most competent and trustworthy, to show us over the work that has been done by the unemployed in the Southern District? Mr. M'Pherson.
11286. Will that gentleman be sufficiently conversant with the whole of the district? Yes.
11287. Who could we accept for the Northern District? Mr. Oxley, for Narrabeen. Then you want Hornsby and the Field of Mars; that will be Mr. O'Donnell.
11288. Do you think we can take Mr. O'Donnell's pointing out as satisfactory? I think you can, with Mr. J. W. Gordon, the surveyor, under Mr. Deering, who laid out most of this district.
11289. Before we go to make an inspection of the works, will you describe, as briefly as you can, the works which were in hand when the Board took over control? Yes. Rookwood, Dobroyd, Beecroft, Hornsby, Carlingford, Gordon, and the National Park. These were the works in existence when we took charge.
11290. Who was looking after them? Mr. Gordon, under Mr. Deering, with Mr. Burrowes at the National Park; Mr. O'Donnell and Mr. Frazer at Beecroft and Carlingford; a young gentleman named Farmer and Mr. Koebke were in charge of works on the Field of Mars Common, and Mr. M'Pherson was at Gordon.
11291. Do you know who was the most responsible of these officers? Mr. Deering, I think.
11292. Will you tell me how works were initiated under your system? The works under our system were initiated sometimes by the Lands Department, in the matter of Crown lands; and on requisitions to the Colonial Secretary that the unemployed surplus labour might be employed in clearing, scrubbing, and road-making. Upon approval of the Colonial Secretary, the Board would see that the work was carried out, and would give instructions for the road-making, the clearing, and the scrubbing. Then with reference to other roads than on Crown lands, on petition and report from our officers, with the approval of the Colonial Secretary in every case; and that being obtained the work is carried out. The official papers laid on the Table of the House disclose all that information as far as the official records of the late Casual Labour Board are concerned.
11293. How did your Board determine whether certain work should be carried out or not? As I have described,—from reports from our officers, and on some occasions from personal visits made by the professional members of the Board to the different works. If the report made by the superintendent was borne out by the members of the Board who visited the work, a requisition would go to the Colonial Secretary that it be carried out, and on the approval of the Colonial Secretary the work would be proceeded with.
11294. Was any record kept of the other members of the Board's approval? No, not on the papers. I represented my colleagues.
11295. Can I take it that whenever I see your recommendation signed "John Davies, Chairman," that that was the same as the Board? Yes, the same as representing the Board.
11296. Did you ever authorize works independently of them? Never.
11297. Did you have meetings to consider these works? They were not very regular. They were irregular. Either one or other of my colleagues would be there every day.
11298. Were they summoned to attend? They were not summoned. Unfortunately I was left largely to myself.
11299. Did they get notice when their attendance was required? It was their duty to be there.
11300. Did they leave it very much to you? They necessarily left a very great deal to me. They were both engaged in other branches of the service, and their professional skill and ability would be required in their several departments.
11301. Did you feel the responsibility weigh heavily on you? It was the largest job I ever undertook in my life.
11302. Did it take up much of your time? It often took sixteen hours a day.
11303. Occasionally, did you remain in at night? Frequently. I would be too late to get out to my place.
11304. Did you consider you were being fairly treated by your colleagues? I do not know that I should be put into a position to answer that.

11305.

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11305. I mean in having so many and such responsible duties cast on you to carry out solely? My colleagues were in this position, that they could not devote more time than they did. If I had had a professional gentleman appointed with myself to carry out the skilled and professional work, and devote his whole time to it, it would have been a great assistance to me, and would have relieved me of many anxieties cast on me by the absence of my colleagues.

11306. Did you assume to exercise much independent authority in the absence of your colleagues? No.

11307. Did you, before works were initiated or recommended by you, personally visit them? As a rule.

11308. Did you visit by yourself or with your colleagues? Sometimes with my colleagues and sometimes alone if my colleagues were absent from town. Mr. Wells would be away from town, and Mr. Houison had charge of Cook's River reclamation works. My time was taken up by having to go and see so many places, and I did the best I could.

11309. Were personal applications ever made to you to do any work? Yes.

11310. Did frequent applications come to you direct? Yes.

11311. What course did you adopt then? Sent them to the officer in charge of the district for report. On receipt of his report, if there were anything to warrant our asking the Colonial Secretary to carry out the works, we would visit the place and would come to a decision as to whether we would recommend or otherwise; then, when we had obtained the Colonial Secretary's approval, we would proceed with the works. It was no easy task to provide work for the labour we had. We had 5,000 or 6,000 men on our hands at one time.

11312. Did you always have independent reports? Uniformly.

11313. Did you ever rely on your own judgment? Never.

11314. Do you say that in every case you took some steps to satisfy yourself that the work proposed was a proper work, and for the benefit of the public? Yes; in every case.

11315. And the works were the outcome of joint deliberation, and not of yours solely? The major portion of them. Some of them, of course, were not referred to us at all.

11316. When you say the "major portion," will you mention the "minor portion," which you exclude? I could not, unless I go through the papers and point them out.

11317. Do you refer to works you have solely authorized? No. There are several works sent to me from the Colonial Secretary's office to be carried out by the unemployed.

11318. When these consultations were held with your colleagues, was the Secretary present? Usually.

11319. He ought to be able then to give me some evidence of the number and nature of these deliberations? He ought to be. He was uniformly there.

11320. On more occasions than otherwise? Yes.

11321. He was the proper officer to be present? Certainly.

11322. Did petitions and memorials come to you direct? Some of them.

11323. Did you take steps to satisfy yourself as to their genuineness? No. They were presented by a Member of Parliament. That would be sufficient guarantee they were not bogus ones. The Members for Central Cumberland, Canterbury, and so on would present them.

11324. Supposing they were sent in and signed by two Members of Parliament, and the whole of the rest of the signatures were those of the unemployed, or such like? We would soon know that.

11325. Did you take any precaution to test them to prevent such a thing happening as that? We should soon have known that. Most of the names to the petitions would be those of gentlemen well known to myself.

11326. If I go through some of the petitions, will you be able to tell me who some of these gentlemen are? Yes.

11327. Was work ever commenced before the approval of the Colonial Secretary had been obtained? Not to my knowledge.

11328. In every case was the approval of the Colonial Secretary, or some other Minister obtained, before work was commenced? All works were sanctioned before commencement by the Board.

11329. When you sent a recommendation to the Colonial Secretary for his approval, had he anything before him besides your recommendation to guide him as to giving approval? He had the report of the superintendent as well as our report.

11330. Did you always send in the reports you obtained? I think so.

11331. Did you ever see him personally in reference to the initiation or construction of works? It was always by official communication; never in any other way.

11332. Did you ever have any personal interview, in which you pressed for the approval of certain work? I think I spoke to him about work for the construction of a railway from the Holt-Sutherland Estate to the proposed Noxious Trades Site. I asked him about that because we had authority. We were anxious to utilise the labour, as we regarded it as proper work. The railway surveys were not completed, and I, as Chairman of the Board, urged him to proceed with them.

11333. With that exception, did you ever see the Colonial Secretary with reference to the initiation, construction, or completion of any works that the unemployed were engaged on, or to be put on? Certainly not.

11334. Never? Never.

11335. Are you quite clear about that? Quite certain.

11336. Did you ever recommend, officially or otherwise, to the Colonial Secretary, on your own sole responsibility, works that one of your colleagues objected to? No.

11337. Do you recollect Mr. Wells objecting to the work being done on the Holt-Sutherland Estate? No; he objected to one road, but that was included in the general authority given by the Colonial Secretary, and when I pointed that out to him he said "all right."

11338. Did he not decline responsibility, and remonstrate against the unemployed being put on there? Never to me.

11339. Did you ever meet individuals, representatives of companies, or other persons, on the scene of any proposed works? I have met, when I have been out on the works, Mr. Murphy, who, I afterwards heard, was Manager of the Company.

11340. No one else? No.

11341. Mr. Burns? I think I met Mr. Burns.

11312.

- Hon. John Davies, C.M.G., M.L.C.
24 April, 1889.
11342. Did you ever meet any one else? Never.
11343. Mr. Mc'Rae or Mr. Carruthers? Never. I think Mr. Houison met Mr. Carruthers.
11344. With the exception of Mr. Murphy and Mr. Burns, can I take it that you never saw any individual person or representative of a company on the scene of any of the proposed works? Certainly.
11345. Did you ever see anyone who was interested in any company about them? Not to my knowledge.
11346. Do you know Mr. Jamieson? Well.
11347. Do you know he is a shareholder in the Holt-Sutherland Company? From the papers printed subsequently.
11348. Did you meet him out there? No.
11349. Did you meet him on the Holt-Sutherland Estate? No.
11350. Not at the Coronulla Beach? No; we drove that way from the National Park, along the Sutherland Road, down to the beach.
11351. Are you friendly with each other? We just pass the time of day.
11352. Are you not on intimate terms? We never were.
11353. Do you like him? I have no reason to dislike him.
11354. Were you ever at a picnic with him? At Mr. Jamieson's picnic.
11355. Did you drive to the beach? No.
11356. Are you interested in any land there? No.
11357. Did you take any up? I had an idea of doing so, but I thought it would be better afterwards to have nothing to do with it.
11358. Did you know he was interested in any land there? No; he was going to take some up. I did not think he was interested in the land or else he would not want to take it up.
11359. I want to ask you generally;—you know the work done on the Holt-Sutherland Estate? I do.
11360. Did you recommend it? Mr. Burrowes recommended it. I approved of it.
11361. Do you take on yourself the responsibility of approving of the whole of it? I cannot tell you. There is such a lot of work. Two out of the four are Trust roads under the Government, and receive an annual grant.
11362. If you do not take the responsibility, who does? There was a want of discretion on the part of the superintendent. He did work he had no right to do. Of course I am responsible for his conduct. I am responsible no doubt.
11363. Do you recollect when certain work on the Holt-Sutherland Estate was stopped by Mr. Walker? No; I only heard of it after it had been done.
11364. Did you go to the Principal Under Secretary's office about it? No; I did not know about it until it was stopped and started again.
11365. You did not stop it? No.
11366. You did not start it? No.
11367. Who did? Mr. Walker told me he telegraphed to stop the work, because there was some complaint about it not being a public road. It was afterwards shown to be a public road, and the Colonial Secretary told him to go on with it.
11368. Did he have any communication with you? No.
11369. Did it not strike you as unusual? I did not know anything about it until months afterwards.
11370. Did it not strike you as an extraordinary thing that work you were responsible for had been stopped, and later on started again without you knowing anything about it? When I heard of it some months afterwards it struck me as being an extraordinary proceeding.
11371. How long afterwards was it? It was six months afterwards. It was Mr. Borrowes' duty to inform me about it, but he never did.
11372. Did you hear of complaints being made by Sir John Robertson, Mr. Want, and others, as to the way the public money was being spent out on the Holt-Sutherland Estate? They never said so to me. Sir John Robertson spoke to me since the inquiry, and told me he had given evidence to that effect.
11373. Did you ask him? I would not insult Sir John Robertson by asking him a question like that.
11374. Have you seen Sir Henry Parkes on the subject of the Holt-Sutherland roads since you discovered the stopping and afterwards the starting of these particular roads? No.
11375. Have you ever spoken to Sir Henry Parkes on the subject? No.
11376. Have you ever spoken to him on the subject of the roads constructed on the Holt-Sutherland Estate? No.
11377. Have you spoken to him on the subject of the roads on the Hornsby Estate? No; I have had no conversation with him.
11378. Can you tell me whether you or your officers have ever paid any fees or moneys for survey or reports outside your department? In one case a fee was paid to a gentleman in Elizabeth-street—they look upon upon him as one of the best surveyors in the city—for making a survey of a road that went through a portion of the Coalcliffe property. That is the only case.
11379. Do you know the name of the surveyor on the Holt-Sutherland Estate? No; I do not.
11380. Do you know the name of the surveyor Mr. Burns employs at Hornsby? Mr. Dawson, I think.
11381. Do you know whether any payment was ever made to him? Not a penny.
11382. Whose duty was it to measure out the work? The superintendents in each case.
11383. Were they the responsible officers for that? Yes; we held them absolutely responsible.
11384. Do you know as a matter of fact that they did it? The superintendents did it.
11385. Who took tally of the men and the number of days they worked? The overseers in charge of each section.
11386. Can you give me, from your knowledge of the working of the Board, what was the average number of men employed throughout its existence? Well, it was very fluctuating.
11387. Cannot you strike an average right through? Do you mean right through for the whole twenty months.
11388. Would it be a fair thing to say 2,000? It would be a difficult thing to say any number without reference to the pay-sheets. The pay-sheets would give you the numbers for each month.
11389. What was the lowest? About 1,100.
11390. When was that? In the latter part of the year.
11391. Do you know how many you took over? About 4,010.
- 11392.

11392. Did it ever occur to you that it was a reasonable thing, by reason of the thinning of the men in the ranks at any time, to recommend the stopping of the works altogether? We did recommend that.
11393. To whom? The Principal Under Secretary.
11394. In writing? No; verbally.
11395. Who? I did.
11396. More than once? In conversation I said that it would be a good thing to get the works closed up as soon as possible.
11397. When was that? The latter part of the year.
11398. Do I understand that your evidence is that you had the Colonial Secretary's approval for every thing you did in the way of the construction of roads and initiation of works? Yes; the papers disclose that fact when the works were initiated.
11399. What about the works at Hornsby? They were in progress when we took the work over.
11400. Did you get approval for these? No; no more than we did for the National Park.
11401. Is it any good my seeking amongst the papers for Ministerial records, or evidence of Ministerial authority for any of the works at Hornsby? Not since our time. Not since the currency of the Board.
11402. In some respects work seems to have been constructed on your approval alone? Where is that.
11403. Here is a letter dated 30th June, 1887, from Whitby and some one else, respecting culverts at a road at Carlingford. I see it is marked "approved.—J.D."? It is the continuation of the same work.
11404. Can you say whether any approval of the Colonial Secretary was given to that? No. It is not a new work. It is part of the Field of Mars Common.
11405. Now I show you the case of a letter dated 17th September, 1888, from Mr. Frank Farnell, respecting Morrison's Road at Ryde, forwarded by you to superintendent O'Donnell, and subsequently submitted for approval to the Colonial Secretary and approved by him. Can you tell me why, in that case, you sought his approval, and why, in the other case, you did not? This is a different thing. It is part of the Ryde Municipality. We could not carry out works in a municipality unless we had special authority for them.
11406. Have you any interest in any land at Hornsby? Not a shilling's worth.
11407. Do you know the Vanceville Estate? Yes.
11408. Have you any interest in that? No.
11409. Did you buy some property from the Vanceville family? Never. If any statement has been made to this Commission to that effect it is absolutely untrue. It was sold by public auction, and Mr. J. F. Burns bought it.
11410. Have you had anything to do with the Curator of Intestate Estates and the Vanceville property? I had a mortgage on a portion of the Vanceville property in Sydney, but it had nothing at all to do with this land; that was sold by the trustees in the ordinary way.
11411. You tell me you had some idea of applying for some land with Mr. Jamieson, but that you thought better of it? I thought that as I was mixed up with the road-making there people might say that I was making roads to my own property, and so I abandoned the idea.
11412. Have you any land there? I have no land near these works.
11413. Have you any interest in any company or syndicate who own land there? No, not a shilling. Perhaps, however, I may say that I have since bought 10 acres of land at Narrabeen.
11414. I see a return has been prepared purporting to show the works carried out under the control of the Casual Labour Board signed by you:—do you recognize it? Yes, and it also shows the amount realised from the sale of land made available for sale.
11415. Does this return accurately show all the works you took over, initiated, constructed, or completed during the existence of the Board? Yes.
11416. I take Hornsby—does it show all the roads that have been made at Hornsby? Yes; it shows a number of miles cleared, formed, and culverted. That was supplied by our superintendent, Mr. O'Donnell.
11417. I see there are miles of road "cleared, formed, and made,"—what does "made" mean? It means that the roads are simply thrown up from the water-tables and formed.
11418. Can you show me on this return where the works on the Holt-Sutherland Estate is returned? There is Boulevard, Blue Gum, Coronulla, Ewey, Malvern, Military, Port Hacking, Sutherland, Loftus, Sylvania, Woronora Roads, and Station-street.
11419. These are all Holt-Sutherland roads? Yes.
11420. Here is the case of a petition relating to the Peakhurst Road, which appears to have the approval of the Colonial Secretary;—does this letter of the 18th August refer to the same works? Yes.
11421. Here again is a petition for a road from Williams' Creek to the George's River Road, which has the approval of the Colonial Secretary;—is that the way approval was obtained as a rule? Usually.
11422. I see, with reference to Mr. M'Rae, that authority was received to proceed with work through his property;—who is he? He is the Mayor of Kogarah.
11423. Do you know whether he has much property out there? I do not know. I have never seen him more than once in my life. He is a Member of Parliament now.
11424. In looking through several of the papers I have got here, I see that you acted yourself in many cases without referring to the Colonial Secretary? I never acted of myself, always with the approval of my colleagues—one or both of them.
11425. Is your evidence that you obtained the approval of the Colonial Secretary in every case? Yes; the papers disclose that fact.
11426. Do you recollect a case in the Holt-Sutherland district where Mr. Holt objected to give up a part of a road? No.
11427. Now, is this letter of the 23rd August, 1887, from Mr. Myles M'Rae to you, referring to the grubbing and forming of certain roads, the same work as is referred to in this petition I have just shown you? Yes.
11428. And what is this letter of the 20th May, 1888, from Mr. Myles M'Rae to Mr. E. M. Burrows, dedicating for public purposes, "so much of my land as will be required for the road you have cleared"? That is a Liverpool road, going to Eckersley, through his property. It was necessary to join the two properties.
11429. Was that road made? It has been cleared.

Hon.
John Davies,
C.M.G.,
M.L.C.

24 April, 1889.

11430.

NOTE (on revision) †—Q. 11411—Insert "No, not with Mr. Jamieson." Q. 11423—For "properties" read "roads."

- Hon. John Davies, C.M.G., M.L.C.
24 April, 1889.
11430. Was that done independently of Mr. M'Rae? I cannot say.
11431. With reference to this payment of £33 3s. 2d., made by you into the Treasury on 29th March last, am I to understand that that payment was made by you in cash? Yes; in fact all the payments were made in cash.
11432. Am I right in my recollection of your evidence that you say you had held that money in cash for a considerable time? Yes.
11433. Am I right in my recollection of your evidence that you say you originally received a cheque for that amount from Mr. Neale? Yes.
11434. And that you paid it into your own private bank? Yes; I cashed it at my bank, got the proceeds, and placed them in the safe so as to be available to be paid.
11435. Then, after you paid it into the bank you drew a cheque for it? No, I did not draw a cheque for it; I drew it out from my rents and from other moneys. I paid that into the safe and recouped it in that way.
11436. Did you say anything about that yesterday? I think I did.
11437. Then is this your evidence now: That you paid Mr. Neale's cheque for £33 3s. 2d. into your own bank, and afterwards, in lieu of paying some rents and other moneys belonging to you into your bank, you took a certain sum from those rents and moneys and withheld it —? Yes; so as to recoup the proceeds of the cheque.
11438. Did you say a word about that yesterday? I think I did.
11439. If we cannot find it at all on your evidence, as transcribed by the shorthand-writer, is it not probable you did not say a word about it? I could not be positive; I intended to say it; it was not my intention to avoid a word about it.
11440. Now, again, this payment of £52 13s. 2d. made by you into the Treasury on 15th February last, and which represents £52 3s. 2d., you say you received from Neale, and 10s. "Proceeds of sale of damaged crockery";—do I understand that you paid that sum into your bank and afterwards drew a cheque or cheques for it? I had no occasion to draw cheques; I had the money in a safe—about £170.
11441. Have you in your possession, under your control, or in the control of any person or company on your behalf, any money, property, goods, or chattels belonging to the Government or Casual Labour Board at the present time? Certainly not.

TUESDAY, 30 APRIL, 1889.

Present:—

A. J. CAPE, ESQ., M.A., PRESIDENT.

T. F. WALLER, Esq., J.P.

William Hillier called in, sworn, and examined:—

Mr. W. Hillier.
30 April, 1889.

11442. *President.*] What are you? Wood and coal merchant at Ashfield.
11443. Where do you live? I have been residing at Sutherland. I have moved away; but I have had business which kept me there.
11444. Did you have anything to do with the Casual Labour Board? I had a contract to cut 3,000 tons of wood.
11445. What was it? The first contract I had was to cut 1,000 tons at 3s. per ton, and then they called for tenders for 3,000 tons. They made out that the arrangement I had was useless, was not a contract at all, and that they had not signed it. I put in a tender, and it was accepted at 3s. a ton for the first thousand, and 2s. 6d. a ton afterwards for the balance.
11446. Can you tell the date? It was sometime in March, 1887.
11447. Did you keep an account of the amount of wood cut? I had an account, but when I left Sutherland my wife tore up all these things, thinking they would be of no use.
11448. What did you do when you had cut the wood? The practice was that I should be paid every fortnight. Mr. John Davies, however, said they could not pay me, excepting they were paid themselves. He said, "You go to the auctioneer and get his cheque and then you will be paid." I got the auctioneer's cheque, and then Mr. Davies paid me. The cheque was always put into a big envelope with the account sales.
11449. Who gave you this? Mr. Neale.
11450. Then every time there was a sale of timber you were paid? There was a sale every day, but I only got the money once a fortnight, or it may be twice a month. I had a terrible job to get my money. They owe me £4 10s. now.
11451. Then every time you got any payment from the Casual Labour Board for your work you had to take a cheque from Mr. Neale? Excepting once, when Mr. Neale went with me and took the cheque himself.
11452. Did you take up the account sales every time? The lot; for every truck of wood; ten, twenty, or 100 trucks.
11453. Have you any record of the accounts you took up from Mr. Neale and the different amounts you cut? I cannot say the different amounts, but my cheque would amount to the sum within £2 or £3. The wood fetched a low price, from 4s. 3d. to 4s. 6d. per ton.
11454. Have you any record of the number of cheques you received from the Board? No.
11455. Have you any record of the quantity of wood you sent to Neale? It would be 2,700 tons or 2,800 tons. The first 1,000 they paid me 3s. for, and the others, 2s. 6d.
11456. I find that about the 14th May, 1887, Neale paid the Casual Labour Board £26 17s. 7d.; on 17th May, 1887, you were paid by the Board £29 1s. 6d.;—have you any recollection of that? Yes; I have. I have not my bank-book here, or else I could show you the amount.
11457. Can you tell me whether the payment of £29 1s. 6d. was for the same timber that Neale accounted for in the £26 17s. 7d.? It might be that the wood fetched a low price. My charge was 3s. a ton, and sometimes the wood would sell for less than I got.
11458. Then the transaction which returned £26 17s. 7d. may be exactly the same for which you were paid £29 1s. 6d.? Quite likely. 11459.

NOTE (on revision):—Q. 11437—For "and withheld" read "and placed it in the office safe." Q. 11440—For "£170" read "£200."

11459. I find that on the 19th July, 1887, Neale sent to the Casual Labour Board a cheque for £33 3s. 2d. for the sale of certain firewood, and on the 21st July you were paid by the Board £34 5s., would that be the same transaction? Yes, it would be the same.

11460. Then it is quite possible for the Board on that occasion also to have paid you more than the actual sale of the wood returned? I know myself that the wood was not realizing the price I got for it.

11461. I find that on or about the 22nd September, 1887, Mr. Neale paid the Board £52 3s. 1d.; and that, on the same date, you were paid £38 1s. 6d.;—is that likely to be the same transaction? I think it is.

11462. Was the regular practice then this: that in every case where there was a sale of the firewood, and a return of the proceeds, you got a cheque? Yes, I got a cheque. The last cheque that I received from Mr. Davies I do not think that they got the money for it. That was for six or eight trucks of wood; it came to over £4. I do not think Neale has been paid for it yet.

11463. Who owes the money? Different private people.

11464. Who sold it? It was not sold; it was sent to different people along the railway line. One truck went to Ashfield, another to Kogarah, and some trucks to Waterfall. Mr. Neale sent the people bills, but they have never paid the money. I sent my bill to Mr. John Davies for cutting the wood, but he would not pay the money. But I got Mr. Burrowes to certify to it, got a voucher, and went and got the money after waiting for several months.

11465. Can you tell me when you stopped cutting the timber for the unemployed? I think some time in September, 1887. It was a very wet winter.

11466. If we find no return for the sale of firewood after September, 1887, can we conclude that that was the end of it? That was the end of it.

11467. Did you become aware, during the time you were cutting timber of anyone else dealing in this timber, excepting Mr. Neale? He was the only one that I know of.

11468. Do you know to whom you delivered the timber? I cut the timber, and a man was appointed to keep account of every truck that I sent away. He consigned the wood to Mr. Neale. I had nothing to do with the consigning of it. One of the unemployed men did it.

11469. Do you think you could furnish me, if you have not got any particulars here, with an account of the timber you sent in, or the amounts you have received, or the amounts that Neale paid? No; I do not think I could.

11470. Have you destroyed all the documents? My wife got rid of them all, even the book, which one of my boys took to school with him.

11471. Had you anything else to do with the Casual Labour Board? Yes.

11472. What else did you do? I had three horses and carts working for them at 2s. 6d. a load.

11473. Who was driving the carts? My two sons.

11474. Were you carting? No.

11475. Your two sons were working as carters? My two sons were working one cart each, and another man another.

11476. What did they earn? Some days 15s., some days, 17s. 6d.

11477. Were your sons in the ranks of the unemployed? No, my sons were not. I tendered for the work. They wanted carts. If they did not want my carts I told them they had better not employ them. There was word sent out that the carts were only to do four loads a day—10s. a day. If there were wet days they could make it up to twenty-four loads a week. When my sons went for the money they paid them £9. They had earned £12 in the fortnight; that is £3 they owe me. My sons were sent to draw timber for a bridge made by a man under Mr. Sanderson, and when pay-day came they would not pay them 30s. They said that the man who did the work on the bridge was the one to pay them; yet my carts were employed drawing timber for the Government. They still owe me the money. That is, £4 10s., and I shall sue them for it. Afterwards they did not pay anything but 10s. a day. They ought to have told my sons that it was to be day-work in the future. When pay-day came they were sent off with 10s. a day instead of at the rate of 2s. 6d. a load.

11478. Can I take it that you have no documents, memoranda, nor anything left? I have not now, but I did have up to six weeks ago.

11479. *Mr. Waller.*] Do you remember how many times you went to the office for payment for the wood? I cannot say.

11480. To whom did you give the documents you received from the auctioneer? To Mr. John Davies. If he was not there I would leave them and call the next day.

11481. You gave them to him personally? Yes.

11482. Often? Three or four times.

11483. *President.*] Have you anything else to say about the subjects we are inquiring into? There is a road in front of my house at Sutherland I should like to have something to say about.

11484. Say it? The road runs along there. They have made a road 4 feet high right in front of people's property. I told them that if they piled the stuff up in front of my place I would cart it away.

11485. Is it any complaint against the work that you have to make? I think it is a waste of money. In fact, over the whole estate they have made roads that will never be of any use.

11486. Did you ever become aware of any impositions that were practised on the Board officers? No.

11487. Of any extravagance or irregular expenditure? I think there was a lot of extravagance. I think they might just as well have thrown the money broadcast.

11488. Do you know Gannon's place? I know a road of that name, but I have never been there.

11489. Do you know Mr. Springall? Yes.

11490. Do you know anything about him? He is building a place at the bottom of the Coronulla Road. He was the storekeeper.

11491. Did you meet him as storekeeper? Only when keeping the store at the National Park.

11492. Do you know anything about his goings on? No.

11493. Have you anything further to report to the Commission which you consider it your duty to tell us of? The only thing is that there are a lot of roads out there that are not necessary, and roads that should have been made are left in a dreadful state. I had an engine to go down there the other day and had to take it several miles round in order to get it to my place.

The

NOTE (on revision) :—Q. 11477—Omit "I tendered, &c." and insert "I asked Mr. Burrowes, and he agreed to pay me 2s. 6d. per load." Note.—Mr. Sanderson was one of the overseers, and it was him that put my son to draw the timber.

Mr.
W. Hillier.
30 April, 1889.

The Hon. John Davies, C.M.G., M.L.C., called in and examination continued :—

- Hon. John Davies, C.M.G., M.L.C.
30 April, 1889.
11494. *Mr. Waller.*] Did you have regular returns sent in as to the number of men employed? Yes.
11495. What kind of returns? Returns showing the number of men employed on each of the road works—written returns.
11496. How often were they sent in? About every month. But the numbers were always fluctuating.
11497. Who prepared them? The storekeepers in each camp, and they were certified to by the superintendent.
11498. What became of them? They are amongst the office papers.
11499. Whom were those returns given to? They were addressed to the Chairman of the Board.
11500. Were they checked? They were checked with the books.
11501. Did the same man who made out the pay-sheets, make out the return? Frequently; but there would be more than one man making out the pay-sheets—the superintendent, the storekeeper, and the assistant—all three of them. The return would also be made out by a number; first by the local storekeeper at each camp; there were twenty-five camps in all. The small details would be sent to the principal storekeeper and afterwards compiled and put into one general report. At Narrabeen we would have a separate return from the storekeeper; the same at Hornsby; the same at Campbelltown; the same at Liverpool.
11502. Did you find discrepancies in the pay-sheets as regards their tallying with the returns? Yes; frequently.
11503. Did you draw attention to the matter? Frequently.
11504. In writing? Yes.
11505. Will you show us the letters? The memorandums sent were not always written in the book.
11506. Were the explanations satisfactory? In most cases.
11507. How long before you retired from your position did you see those returns? About a month before I left.
11508. Were they filed? Yes; amongst the papers.
11509. What do you mean amongst the papers? It was the duty of the officers to register these returns.
11510. They ought to have been registered? Yes.
11511. Were the returns numbered in the usual Government style? They were simply returns showing the number of men up to a given day.
11512. Who was responsible for the making up of the contingent vouchers? Who do you mean.
11513. The contingent vouchers for expenses? Mr. Hinchcliffe. Do you mean is he responsible for the vouchers?
11514. For all the vouchers? Oh, you see they are made up by the party to whom the money is due.
11515. I am not speaking of himself personally, but of the expenses incurred by the officers of the Board; who is responsible? Each individual. For instance, the superintendent would make out and send in a contingent voucher. He would make out a voucher of money due to himself, and he would also sign a declaration saying that he has incurred expense in connection with the duties of his office.
11516. Is that a separate document? No; it is attached to the same.
11517. Then each individual whose name would appear for any amount in the contingent voucher would be individually responsible? You must make a distinction between a contingent voucher and a pay voucher. On a contingent voucher there would be only the one name.
11518. Call it a pay-sheet. I will describe it. Here is a voucher for expenses for cab-hire; expenses to Sydney; expenses to pays;—what do you call this document? That is a contingent voucher. There are vouchers of that kind from the paymaster and the superintendent.
11519. Who is responsible for the items that appear in them? The paymaster and the superintendent.
11520. Where we find items which have been paid on account of persons who are neither paymasters nor superintendents, nor other officers of the Board, who is responsible—the paymaster or the superintendent? The superintendent of the work in connection with which the expense was incurred.
11521. Were these contingent vouchers checked? Yes, in the office.
11522. By whom? Usually by Mr. Hibble.
11523. When goods were supplied in the shape of tools and stores, were receipts given for them when they were delivered? Yes.
11524. By whom? By the receiver. Either by the principal storekeeper or the sub-storekeeper.
11525. What kind of receipts? It would run, "Received from the railway authorities," so many things, whatever they might be. There would also be a receipt showing when they were received from the people who supplied the goods.
11526. Out of printed books? Yes.
11527. Butts attached? Yes.
11528. Which would carry the same information as in the portion torn out? Yes.
11529. These books—where are they? With the storekeeper.
11530. Were they returned to the head office? Yes; they were returned to the head office.
11531. Was that a regular system of receipt? Yes. Suppose five dozen mattocks, six dozen shovels, and ten kegs of powder were sent away, we would get a return back, "I have the honor to acknowledge I received so and so by train yesterday," and then enumerating the goods.
11532. Within how long after the delivery of the goods would the receipts find their way to the head office? Within two or three days. It was the duty of the officer to report the next day that he had received them. Frequently goods were over-carried or there were discrepancies in the quantities; this had to be rectified by the contractors.
11533. How long after goods were ordered in the city and delivered was it before the orders would be returned to the head office? Sometimes a week, sometimes a little longer, before we got the return back saying that they had been received.
11534. I am talking of the original order? Sometimes a week, sometimes a little longer.
11535. They always came back? They always came back; either those or an acknowledgment that the superintendent had received the goods.
11536. Did not the orders come back? I believe they did, although it was no duty of mine.
11537. Whose duty was it? The Paymaster's or Mr. Hibble's. I was not a clerk.
11538. Whom would you look to if there were a discrepancy? I would look to Mr. Hibble or the Paymaster.

11539.

Hon.
John Davies,
C.M.G.,
M.L.C.
30 April, 1889.

11539. Which of them would you say was responsible? I would look to the Paymaster, because the other was only a supernumerary under him. It was not my duty, and I did not recognize it as my duty.
11540. How were general payments made to satisfy creditors;—I am not talking of wages? They were paid by cheque, excepting small sums, which were paid out of the petty-cash.
11541. Where were the payments made? At the office, or they were paid by the Paymaster or myself.
11542. Did you make the payments? Some few of them.
11543. To whom principally? To Mr. Kidman, two or three times, and twice to Messrs. M'Lean Bros. and Rigg.
11544. Did they come to the office for their money usually? Yes, very frequently.
11545. Who would come? One of their collectors.
11546. Do you know his name? No.
11547. You stated the other day that you received a certain amount of money out of that payment of £261 10s.? Received a certain amount of it—I received the whole of it.
11548. Yes, but part of it, if I may use the word, was already spent? Yes.
11549. The balance you received was about how much? As I stated previously, I think it was about £130.
11550. The difference between £130 and £261 10s. is £131 10s.? Yes.
11551. This money you had already received? Yes; extending over twenty months.
11552. This amount of £131 10s., I think you stated you received in some three or four payments of different amounts? I told you I received three or four payments. I have nothing further to tell you about it. If that is all you can ask me, I am not coming here for it. I am not an idler or an unemployed. I am not going over the same ground again. I cannot waste my time. I have furnished you with all information on that point, and I am not going over the same ground again, unless you have some fresh point.
11553. You must answer me my question, and not read me a lecture as to what I am to ask you? I have already had ten hours here.
11554. I shall ask you what questions I think fit? Ask your questions then; I have no time to waste.
11555. You stated that these were payments by cheques? I stated nothing of the kind. I stated it was paid in cash. There were no cheques about it at all.
11556. I find here a payment made to you on 11th May of £5; on 25th May of £2 12s. 6d.? I have answered all that already.
11557. On 30th May of £1 12s.; on 8th July of £5—? I have answered all these questions.
11558. If you will be good enough not to interrupt? I have received one or two other payments.
11559. In all there are five payments. Are these payments inclusive or exclusive of the amount of money which you received? They are included in the gross amount. I received three or four payments of larger sums, which made it £131 that I received. I do not want to go over the same ground again. Why should I be put to the trouble of answering that again.
11560. You will have to be put to some more trouble, I am afraid? There are two of us to judge whether you will do that or not.
11561. Have you large landed property in the city? What is that to do with you.
11562. Is that an answer? Yes. But what is it to do with you.
11563. Have you got houses rented in the city? Yes, I have; but what is it to do with you.
11564. You stated the other day, I think, that you received certain rents from your property in the city? Yes, I have rents from property in the city.
11565. Some of these rents you say you paid into a safe or box in the Casual Labour Board office? I simply stated I recouped the amount of the cheques, paid them into the safe, and kept the money there until paid into the Treasury. If you wish to go to the bank you can see whether I drew this amount. You can go. I will give you permission in writing.
11566. What safe did you put the money into? Into a safe upstairs in my room. I told you last week that I had access to that safe. I not only kept that money but also kept other money there. I had £170 in that safe.
11567. What payments did you make out of this money? Oh, a large number of payments. I could not tell you now. I suppose about 200 payments at different times; some of them, 2s. 6d.; some, 25s. It was money I held in trust with the concurrence of the Audit Department.
11568. Did you keep the receipts for these payments? Yes; the receipts were kept in the office, and if the pay-sheets had not gone in I got a receipt on the pay-sheet itself before it was sent in for adjustment.
11569. Would the superintendents of the different works be acquainted with the gangers in the district? Yes; they appointed the gangers.
11570. Would the surveyors? Yes; they were a party to the appointment in each case.
11571. Would it be possible for a man to be a ganger in a district without the knowledge of the superintendents? No, it would not be possible.
11572. Would a ganger be appointed in a district if he was not working with his gang, and was himself in another district altogether? No; he could not be, unless the superintendent were dishonest. I never knew such a thing. Such a thing has not been brought under my observation. I held the superintendents responsible for the due performance of their work—the receipts of the stores, the custody of the Government property, giving proper certificates for the earnings of the men. You will find in every case where vouchers have been sent in to the office that they have been accompanied by a letter duly certified to by the superintendent in each camp.
11573. Are you aware that Mr. Kidman was paid cartage? No; certainly not. It was a condition of his contract to deliver wherever we required within 40 miles.
11574. If carriage was paid, whom is it properly chargeable against? It depends who gave the order. If Mr. Kidman did, he is responsible. If our superintendent gave the order, we are responsible. We must accept responsibility for the orders of our officers. A copy of the contract was furnished to the superintendents with instructions to see that the contract was carried out to the strictest letter; that there was the best quality, and that it was timely delivered.
11575. If it was delivered at the railway station, how would it find its way to the camp? It was the duty of the contractor to deliver at the proper place. The orders should be delivered at the camp, not at the railway station. We had nothing to do with cartage.

Hon.
John Davies,
C.M.G.,
M.L.C.
30 April, 1889.

11576. There are a considerable number of items on the vouchers for expenses incurred by officers of the Board, such as seeing men off to the railway station and so forth, and a cab here or there;—who authorized those expenses? The Board.

11577. Were these payments in addition to the officers' salaries? Yes; they were for special services. Frequently it would be 8 or 9 o'clock at night. I had better explain that the men for whom we had found private employment at current rates of wages—men without means—were provided with a free pass to their employment. But instead of giving them an order to go and get the tickets, when they would have been delivered to them, we appointed an officer, like Mr. Hibble, to go and get the tickets, see the men into the railway carriage, and then give them their tickets, so that there could be no trafficking with them. It had been pointed out that there had been a large amount of traffic going on in these tickets when issued by the Immigration Department.

11578. If an officer saw men off on the Western line, and others off on the Southern or any other line, would he be justified in making separate charges on the same night? It just depended. One train would go at 8 o'clock and another at 9 o'clock. If we kept a man away from his home we made an allowance of 6s. We effected a saving in this way of hundreds of pounds. Men who were gamblers at races and card-sharpers used to get tickets and sell them at the railway station, and thus the Government was robbed. Instead of that I adopted the course of issuing a certificate, so many men going to so many places. We had the names on the backs of the tickets, so that they could not be transferred. It was better than to allow them to draw the tickets and sell them.

11579. As to pay-days—what was the allowance on those occasions? The practice before we took office was to allow the person making it £1 for every pay in addition to his salary. We simply allowed 10s., 5s., or 6s., as the case might be. They had to go to an hotel. They would go out in the morning at half-past 6 o'clock, and get back at 7 o'clock at night. We did not think it too much to allow 10s.

11580. Was it to include the eating and drinking? It depended. If the whole Board was there it would be different.

11581. Was the allowance made to each individual? Of course, the Paymaster would simply be accompanied by myself, or the superintendent, or perhaps one of the detectives.

11582. Would the Paymaster have anything to do with you or anybody else? He would only have his own expenses.

11583. We may take it that he would have no right to make other charges over the 10s. or the 6s. allowed? Excepting (say) fares to Manly Beach, there might be three or four tickets required, or any little thing like that.

11583½. With the exception of such things as fares, in the shape of boats, cabs, or tram fare, would the 10s., or whatever sum was allowed, cover all expenses? Yes.

11584. Were all contingent vouchers numbered consecutively? I cannot tell you that. I did not keep the accounts. I did not make out any vouchers. I presume that would be the case when the adjustments were made. I have seen a recapitulation of the numbers. I only know from casual observation.

11585. Do you know the practice that was adopted in your office for making up the vouchers for applications for the refreshment of your funds for £6,000? There was a proper form for applying for an advance of £6,000, signed by the three members of the Board, and countersigned by the Secretary.

11586. I know that—I mean as to how the vouchers were made up showing that the £6,000 had been expended? All the vouchers were taken out, and an adjustment was made equal to the amount of the advance. There was no difficulty, because if we had spent most of the money we made application for a fresh advance. We always had something to go on with. We have had as much as £18,000 in the bank at a time. The Act demanded that we should make these adjustments within a certain time. I never heard of any difficulty in making them up; but some of the vouchers might be ten months old, because they would not previously fit in.

11587. The matter then was simply working the vouchers about to make up the amount? Yes, but with that matter I had nothing to do. It was simply a practice of the office. It was introduced by the Paymaster as a principle that had been in operation before we were appointed.

11588. I see an entry here—Castner, £24 11s. 4d.;—do you know what it is for? It is a man at one of the refreshment rooms. I never remember seeing that before. It is quite new to me. I see, however, that it is not in our time. It is before our appointment.

11589. *President.*] Will you look at these five documents, purporting to be letters or memorials dated 7th July, 1887; 19th August, 1887; 22nd September, 1887; 22nd September, 1887, again; and the 10th May, 1888;—do you know in whose handwriting they are? No, I do not. They seem to be in the one handwriting.

11590. Have you any recollection as to who handed them to you? I think either Mr. Frank Farnell or Mr. Varney Parkes, and I think one or two others were with them. I could not say as to one.

11591. Would these be handed to you personally or sent by post? Some came by post, and some were presented by the Members for Canterbury or Cumberland—Mr. Carruthers or Mr. Frank Farnell, through whom we received them.

11592. Can you recollect whether on any occasion that these five documents came before you there were any individuals present connected with the Holt-Sutherland Estate? No; I have no recollection of there being any person there connected with the Holt-Sutherland Estate.

11593. I take the first memorial, 7th July, 1887; you note on it some recommendation by yourself? Yes; there is a note on it, sending it to Mr. Burrowes, and then it is returned to me.

11594. Did you give the recommendation which is given on your own responsibility, or did you obtain a report previously? I obtained a report.

11595. Can you say whether that was done in each case? In each case we obtained a report from the superintendent of the locality.

11596. Did you rely entirely on the superintendent's report? Entirely; coupled with the fact that the application was made by a number of these people, and pressed upon us by the Members for the district.

11597. *Mr. Waller.*] I find a voucher here (1652 A), and on looking at it I find it is a voucher in payment of £261 10s. I find also a second voucher, numbered 1,652, and on looking at it I find it is a voucher in favour of paying Mr. Burrowes £6 10s. 1d.;—I want to understand the meaning of these two vouchers carrying the same number? That would be for the Accountant to explain. I did not make up these numbers.

Hon.
John Davies,
C.M.G.,
M.L.C.

30 April, 1889.

numbers. They might put "A" if there are two vouchers with the same figures. I am not an expert in figuring, but the matter could be explained by the Paymaster, who made up these documents. As I have told you, I have had nothing to do with the tallying of the £6,000, or the adjustment of it. It was not part of my duty. All that I had to do was to sign a paper that covered them, so as to make them in due form.

11599. Here is a voucher (1,506 A) in favour of Mr. Springall;—is that what you would call a contingent voucher? Yes.

11600. Who is responsible for its correctness? Mr. Springall signs for having received the goods; the Paymaster for having paid it.

11601. Is Mr. Springall responsible in the first instance? Yes; and the Paymaster is responsible for having paid it—responsible to the Audit Office, and responsible to the Treasury.

11602. Is Mr. Josephson one of your officers? Yes; one of the Government officers.

11603. Here is a voucher (1,493A);—would he be responsible for it? Yes; and Mr. Hinchcliffe for paying it.

11604. Will you explain, as far as your knowledge goes, why such a large number of vouchers should have duplicate numbers? I cannot. The Paymaster, who made them out, can tell you.

11605. Why were blank spaces left in the cash-book? Did you not hear me tell you that I did not open it, so that I could have no knowledge of what was in it, no more than the Principal Under Secretary looks at the cash-book here.

11606. Do you think that it was a correct thing in carrying on a book like this to leave blank lines? That is for the Treasury officials and for the Auditor-General to say. We had the auditing done by the Treasury, and had no complaints. More than that, when a paragraph appeared in the Select Committee's Report stating that there had been no audit, I applied to the Treasury to send a gentleman down to examine the whole of the vouchers in our office. It was intimated that there was no necessity, because they were so well kept. I applied to Mr. Dibbs, asking him to send some gentleman to inquire into our accounts before I left office. He must have admitted that they were satisfactory, as he did not send any one. Messrs. Mason and Miles also said that they were satisfactory.

11607. You, as Chairman then, cannot give me any information as to the manner in which the books were kept, or the reason why these vouchers appear with duplicate numbers? No.

11608. *President.* Do you recollect on any occasion conferring with Mr. Wells with reference to some roads in the district of Campbelltown on which some work was sought to be put? I cannot say particularly, I have had so many conferences with Mr. Wells.

11609. Do you recollect his advising you to have nothing to do with it, as it was in the district in which you lived? No.

11610. Can you say that he never stated this? My impression is that he never did, because I have no recollection of it. As far as the work in the district was concerned, it did not benefit me one halfpenny. I have no property anywhere near where the work has been constructed.

11611. Can you tell me whether Mr. M'Pherson has been to your house? Yes.

11612. When? Before Christmas.

11613. Do you recollect holding any conversation with him as to the work of the Board? I might have asked him how the roads were going on.

11614. Do you recollect referring him to any statement Mr. Burrowes made, or any action of Mr. Burrowes? No.

11615. Do you recollect his saying anything about sales of firewood? I never spoke to him in my life about sales of firewood.

11616. Are you quite clear that when M'Pherson stayed at your house you never referred to the question of sales of firewood? No.

11617. Mr. M'Pherson, in his evidence before us, has spoken of a conversation which he had at your house, in which the question of this Commission and the sale of firewood came up;—do you recollect anything about it? He must be under some misapprehension. He has spoken to someone else, not to me.

11618. Mr. M'Pherson was asked a question with reference to a conversation at your house. He was asked, "Did he (meaning you) have any conversation about this Commission, or say anything about anything likely to crop up in the shape of evidence." He replied, "Yes." "On what subject? He (meaning you) told me he understood that certain charges were made against him about his connection with Mr. Kidman about payment of some refreshment supplied to the Park —"

Witness.] He is entirely astray. I have had no such conversation.

11619. *The President continued reading the evidence.*] "Did Mr. Davies say anything about anything else? Yes. On several occasions we had long conversations about charges or rumours of charges. He told me about some charges made about wood. He told me he had paid the money into the bank and got the receipt. I think he said the Australian Joint Stock Bank." Now, is that evidence correct? It is not correct as far as seeing him since this inquiry is concerned as to that matter.

11620. This return, which I will put in, from what was it compiled? From reports from Mr. Burrowes. [*Return put in and marked P 16.*]

11621. Take, for example, that which has relation to the work on the Holt-Sutherland Estate, from whose evidence was that compiled? From the evidence of Mr. Burrowes and Mr. M'Pherson.

11622. Mr. M'Pherson has pointed out several discrepancies in what was submitted to him;—would we be justified in taking his alterations as correct? I think you would. He is most reliable.

11623. Referring to Springall, the storekeeper in the Sutherland District, was complaint ever made to you of him by Mr. Gordon or Mr. Deering? No. I left the papers I got with the other papers, when I took over the work, indicating the complaints against the different officers. They served my purpose to make inquiry. I carried out the suggestions made by Mr. Gordon in almost every case.

11624. On the subject of petty-cash in the office, can you tell me whether Mr. Hinchcliffe had a petty-cashbook and a safe? He had a cash-book and safe.

11625. Was it an independent safe? Yes. The reason we had two safes was because the first was so small that it would not hold the box. We had to get a larger safe. The small one I had upstairs for my own purpose.

11626. Was your safe and Mr. Hinchcliffe's in the same room? No.

11627. Had Mr. Hinchcliffe access to your safe? He might when I gave him the key.

11628. He did not have duplicate keys? No.

11629.

- Hon. John Davies, C.M.G., M.L.C.
30 April, 1889.
11629. Did you have a cash-box? I had tills and a cash-box, a small one in which I kept my own cash, apart from Mr. Hinchcliffe's altogether. It had nothing to do with the control of the money by Mr. Hinchcliffe.
11630. *Mr. Waller.*] Here is a voucher—638A, carting rations from Loftus to Hurstville, £11 11s.; another—550, carting rations from Loftus to Hurstville, £6 5s. 8d.;—can you explain these? Those would be from the camp—surplus rations.
11631. Here is another one—423, £7 2s. 2d., conveyance of rations from Loftus to Hurstville? These would be the returns.
11632. Here is a voucher—256, cartage of rations to Sutherland, £3 10s.? Yes, I see. There should not be any such voucher.
11633. Here is another one—177, cartage of rations from the National Park to Heathcote, £15; here is another—216, cartage to Sutherland, £3 10s.; here is another—109, cartage of goods, tools, and rations to Heathcote? A case like the last would be where men are sent to work at Heathcote, and we send rations, tools, and tents with the men. That would be charged to us.
11634. Here is another—cartage of rations, Heathcote, £18;—are these charges properly made? They should not have been made at all.
11635. Who properly should be debited in the case of these charges? The contractor who was responsible for supplying them. Mr. Burrowes or Mr. M'Pherson was in charge of them.
11636. I see a name is attached to the voucher—I. G. Folkes; the certifying officer is Mr. E. M. Burrowes, and each voucher is signed, John Davies, Chairman? As I told you, I signed as head of the department on the strength of the other officers certifying that the service had been rendered.
11637. Is Mr. Burrowes solely responsible? He is absolutely responsible in a case of that kind.
11638. Should Mr. Hinchcliffe have examined into this? No, he should not. It entirely rested with the superintendent. The superintendent may be able to explain why these goods were sent out. He may, after the contractor performed his service, have had to send the men and rations out to another place.
11639. Would that account for such large sums? In some cases it would—not so large as £15, but £3 it would.
11640. We have a case here of £18—cartage of rations, 12 days, at 30s. a day? That is clearly the fault of the superintendent. The rations should have come to the camp.
11641. Here is another—216, £3 10s., cartage from the 18th to 30th? It is improbable that the superintendent could have allowed charges to be made of that kind. I stake my existence you do not find it in any one else's camp. You will find there that the contractor delivered at the camp, and that there was not another sixpence for cartage.
11642. Here is another—256, for thirteen days cartage;—may we take it these are improper payments? You may take it that they are not in accordance with the contract, and should not be charged to the Board, but the blame is entirely with the superintendent. You can readily understand that I would not know of small details like that. We paid the superintendent 15s. a day to do his duty, and allowed him £12 a month for expenses.
11643. I have a large number of vouchers here for payments to the different officers;—have you any personal knowledge of the items in these vouchers? Only what the vouchers themselves disclose. Beyond I know nothing of them.
11644. *President.*] Will you look at the letter from Mr. Burrowes to you, dated 8th September, 1887, marked "private and confidential";—does your reading that recall anything to you? Nothing at all.
11645. You see it was written in 1887;—was Mr. Burrowes in the habit of writing private and confidential letters to you? Yes; scores of them. I tore them up or put them in the waste-paper basket.

Thomas Cooper Hinchcliffe called in, and further examined:—

- Mr. T. C. Hinchcliffe.
30 April, 1889.
11646. *President.*] Do you produce any books or documents since you were examined on the last occasion? Yes. I produce a copy of a letter of 3rd May, 1887, from the Principal Under Secretary to the Agent for Immigration, Sydney, ordering that the services of F. J. Josephson and myself, then clerks in Mr. Wise's department, should be detached, and placed at the disposal of the Casual Labour Board. I also produce copy of a letter written by me to the Principal Under Secretary, dated 12th February, 1889, in reply to a previous letter, and making application for leave of absence for three months and for payment of superannuation allowance.
11647. Do you produce a rough Lett's diary in which the Commission has been told you entered payments of petty-cash? No.
11648. Did you ever keep a diary? I kept a diary more for the purpose of knowing when the payments took place.
11649. Did you keep a memorandum-book in which the payments made in petty-cash were recorded? I might have kept a little monthly diary or something of that kind.
11650. Did you keep any book or memorandum of what Mr. Davies got in petty-cash? I kept a private account of my own in a general way, which I locked up in the safe. It was kept on a sheet of paper. When the account got to a certain amount I got him to give me an intermediate voucher. I went to the Audit Office and asked them whether I was justified in making these advances. They said, "Yes, as long as you get receipts." I said, "This is the only receipt he can give me as yet, as he has to get his fees sanctioned." They said, "The only risk is, if his fees do not come to the amount you advance him, you will be liable for the balance, supposing you advance more than he receives from the Government."
11651. Have you any memorandum that would enable you to give us the advances which were made to him from time to time? I started to keep it in the book, but did not go on with it. There were several people writing in the book, and the Chairman did not like it.
11652. Look at page 241 of this book, headed, "The Chairman, in account with the Secretary," containing a lot of items with the pen run through them;—is that in your handwriting? Yes.
11653. Is that the book you started? Yes.
11654. Are the entries, as far as they go, correct? Yes.
11655. What is the meaning of the expression, "Account made up to 29th October, 1888"? That is a memorandum to say that the account is made up to that date.
11656. What did you advance to Mr. Davies up to 29th October, 1888? Up to that date I had advanced £155 7s. 8d.
- 11657.

11657. Could you supply us with the different amounts which make up this sum of £155 7s. 8d.? I do not think I can now.
11658. Did you rely on your memory? No; I kept an account of it until he gave me an official voucher. It was only an acknowledgment from Mr. Davies that he had received that amount from me on account of the Board.
11659. Are you clear that on the 29th October you had advanced him £155 7s. 8d.? Quite sure of it.
11660. Does that memorandum enable you to state so positively? Yes.
11661. Can you tell me what those advances were for? He would ask me for a sum of money on account of expenses.
11662. On account of what expenses; did he give you the particulars? No; they were to be given when the account was to be posted.
11663. Did he ever give you particulars? Only a voucher. [*Mr. Corkhill attended and produced the vouchers from the Treasury as before.*]
11664. Did he give you any particulars other than appear in voucher 1,652 A? No. [*Voucher marked C 2 for identification—The officer from the Treasury having declined, under instructions, to leave it with the Commission.*]
11665. Then can I take it, that from first to last you never had any particulars from Mr. Davies of these expenses beyond this? No; I never had.
11666. Can you tell me when the official adjustment was made with Mr. Davies by you? I cannot tell you without I saw the book. I see that shows December 27th, but being a cash-voucher, it may not be entered in the proper place.
11667. Do you believe that the entry in the cash-book I put in front of you £261 10s. as the payment to the Honorable John Davies on the 27th December, 1888, is correct? As far as the amount goes it is correct.
11668. Was that paid to him on that date? The balance was. He had received so much on account previously.
11669. Can you recollect what the balance was? I do not know exactly what the balance was. There were two accounts. When I was away in Melbourne he had so much money to account to me for, and the balance I debited him with. I charged him with it.
11670. Have you any other memorandum or any recollection as to the amount paid him? I might have if I had the diaries here.
11671. What diaries? Ordinary Lett's diaries.
11672. Did you leave any diaries behind that you kept there? Yes, two diaries are there.
11673. Should they be in the possession of the officers who took over the business? Yes.
11674. Without these you cannot give us any further information? No.
11675. But you are certain that up to that time £155 7s. 8d. had been paid? Yes, to the end of October.
11676. Did Mr. Davies keep any petty-cash? No; he kept cash that I brought him back from the different pays.
11677. In this book I produce here, do pages 250 to 261 show all the payments you made to Mr. Davies for money you had had returned? Yes, money unclaimed at the time. His initials are to every one of them. [*Pages 250 to 261 out of a cash-book put in and marked C 3.*]
11678. Do you know what became of these sums? They were paid into the Treasury ultimately. I went to the Audit Office and saw a copy of them and checked it with the book. There is another small book, different to that, which has the amounts entered into it.
11679. Do you know whether Mr. Davies was in the habit of paying the amounts into the Treasury at once? I do not think he did.
11680. Do you know whether he had paid the money into the Treasury up to the time you left the office? I cannot say about the date. I went to the office about a week ago and I saw by a copy of the Treasurer's books that everything had been paid in. I ticked it off with these books, but I did not look at the date.
11681. Did Mr. Davies have a private safe in the office? Yes.
11682. Did he have a private cash-box? A private drawer with a lock to it.
11683. Do you know whether he kept large sums of money there? I cannot say.
11684. Do you know this cash-book (*Exhibit E 8*)? Yes.
11685. Did you ever check it and go through it? Yes.
11686. Mr. Davies has told us in his evidence that you were the responsible Accountant of the office? I never was an Accountant. If I were I would not be in the Casual Labour Board office at £350 a year.
11687. I suppose you are familiar with the books? Yes.
11688. You said in your previous evidence that your petty-cash holdings were between £50 and £100? I used to draw £100 at a time.
11689. Did you ever have more than £100? Not that I am aware of.
11690. Have you any recollection? I cannot say for certain.
11691. Did you ever have more than £200 in petty-cash? No.
11692. Are you sure? Yes.
11693. Do you see on page 71 a cheque drawn for £50? Yes.
11694. What would it be for? Presumably for petty-cash.
11695. Have you any doubt about it? Not much.
11696. Have you any doubt at all? I would not like to be sure.
11697. Look at it carefully? I should think by the amount it would be a petty-cash cheque.
11698. Would there be any other cheque drawn against the account in that way than a petty-cash cheque? I do not think so.
11699. Can I take it that this was a petty-cash cheque? Yes.
11700. What was the balance in hand of petty-cash as shown by that book, when that cheque for £50 was drawn? I could not say; nor could any Accountant.
11701. Was not the balance £343 4s. 8d.? No one could tell what the balance was. Vouchers would be paid, but the date would be left out of them. I might have £200 or £300 worth of paid vouchers in my box that might not be entered up in the cash-book at this time. Very often vouchers are paid, but the dates are omitted. We have to fill in the dates, and see that they are witnessed. They might be added a month after they are paid, and would not appear until then.

Mr. T. C.
Hinchcliffe.
30 April, 1889

NOTE (on revision):—Q. 11666—For “place” read “date” Q. 11678—For “different” read “in addition,” and omit “the.” Q. 11701—After “dates” read “afterwards,” and after “not appear” read “in the cash-book.”

- Mr. T. C. Hinchcliffe.
30 April, 1889.
11702. Look at page 74, you see a cheque drawn on 29th January for £100; was it for petty-cash? I should think so.
11703. Can you tell me what the balance in hand, as shown by this book, was at the time the cheque was drawn? I cannot state. We never balanced the book. The whole of the vouchers have gone to the Treasury and been audited. They have been reaudited and checked by the Auditor-General. They have been further checked by Mr. Miles, the professional Accountant to the new Board, and they all say they are perfectly correct. I do not think you want anything more about the accounts than that. Of course if you are more competent than all those gentlemen and say they are not correct. I say nothing —
11704. Was not the balance of petty-cash in hand, as shown by this book, on that date £364 5s. 2d. I do not know, nor can anyone else know. The vouchers for a year might belong to that sheet. I might have £300 or £400 paid away. The only balance was a final balance.
11705. Will you look at page 80 of this cash-book. Is that cheque £100, on 28th July, a petty-cash cheque? I think so.
11706. What was the balance of petty-cash on that date? There is no balance. There are some figures in pencil in the book, but who says that it is a balance. If any gentleman said that was a balance I should say that he did not know what he was talking about.
11707. Was not the balance in hand on the 28th July, as shown by this book, £390 18s. 3d.? There is no balance shown in the book. There is only one balance in the whole of the book. It is impossible for anyone to go through them like that. It is impossible to make a balance.
11708. Will you look at page 89 of this cash-book. There is a cheque drawn on the 7th September, 1888, for £50. What was the balance in hand, as gathered from this book on that day? There is no balance shown at all.
11709. Is there not in hand at that time £416 1s. 6d.? No; there is no balance shown in the book. Someone has put some pencilling in the book, but no one can make any balance out of that.
11710. Look at page 91. Is that cheque on 17th September, for £25 a petty-cash cheque? I think so.
11711. Does that book show from its figures, what was the balance in hand of petty-cash on that day? No.
11712. Can it not be gathered that, on that day there was a credit of £451 11s. 4d.? No; it cannot be gathered from the book.
11713. Look at page 93. On the 27th September, there is a cheque drawn for £50. Can you tell me whether that was a petty-cash cheque? I think so.
11714. What was there of petty-cash on that day? There is nothing shown there.
11715. Can it not be readily ascertained from the book that on that day there should be £471 18s. 4d.? I should not think so.
11716. Look at the entry on page 97; on 15th October, there is a cheque drawn for £50; was that a petty-cash cheque? I think so; I cannot say positively.
11717. Have you any doubt? You have to have a doubt if you are not sure. The same answer must apply to that as to all, unless I had the cheque here.
11718. Do you not know from the book that there are no cheques on that side which are not petty-cash cheques? I do not know. This is Mr. Hibble's handwriting.
11719. Did not you check it? I checked it.
11720. On 15th October there is a cheque drawn for £50—is that petty-cash? Yes.
11721. What was the balance of petty-cash on that day? There is no balance shown.
11722. Was there not a balance of £462 15s. 2d. in hand on that day? I cannot say; I should not think so.
11723. Look at page 99. On 23rd October there is a cheque for £10; is that a petty-cash cheque? I should think it was.
11724. What, as shown by that book, should be the amount of petty-cash in hand on that date? It is not shown.
11725. Can you not gather that on that date there was £515 4s. 6d. of petty-cash? No one can gather that.
11726. Look at page 101. There is a cheque on 1st November for £50—is that for petty-cash? I think so.
11727. What by that book, was the amount in petty-cash, in hand on that date? I have given the answer before. It is the same answer as the last.
11728. Does it not show that there was a sum of £493 3s. 8d. in hand? It does not show that.
11729. Look at page 104. Is that cheque on 13th November for £25 for petty-cash? I should think so.
11730. Can you gather from the book what was the balance in hand on that date? No.
11731. Does it not show that it was £535 16s. 1d.? No it does not.
11732. Look at page 105. Is that cheque for £25 for petty-cash? I think so.
11733. Can you gather what was the balance in hand on that date? No. It is the same answer as the others.
11734. Was there not a sum of £536 16s. 1d. of petty-cash? No, you cannot gather anything of the sort.
11735. Look at page 106; on 3rd December there was a cheque for £100; can you gather from the book what was the balance of petty-cash in hand on that date? No.
11736. Was there not £549 5s. 9d.? No.
11737. Look at page 114; there is a cheque on 7th January 1889 for £25; was it for petty-cash? I should think so.
11738. Can you gather from the book what was the balance in hand on that date? No.
11739. Was it not £223 6s. 6d.? No you cannot say that.
11740. Did Mr. Hibble ever call your attention to this? No.
11741. Not as to these extraordinary things I have pointed out to you? What extraordinary things.
11742. The fact of getting cheques for petty-cash when the book showed a large amount in hand? The only thing he did was to put a balance in pencil what we call a rough balance and it came to £220 odd. As he knew that was represented by nearly £220 advance to Mr. Davies, and the balance would be some petty-cash accounts of my own.
11743. How much would be paid to Mr. Davies? I cannot say the exact amount. Mr. Hibble had a pretty good idea how much it was.

11744.

Mr. T. C.
Hinchcliffe.
30 April, 1889.

11744. Why did you say £200? I should think between £100 or £200.
11745. Can we believe Mr. Hibble's evidence on this point? I think so.
11746. If he has sworn he pointed this out to you—these extraordinary discrepancies? There are no discrepancies.
11747. If he says he pointed them out to you, and warned you there would be some inquiry, is that true or not? It is untrue.
11748. Have you got a private banking account? Yes. The London and Chartered Bank, Oxford-street.
11749. Did you ever draw a cheque to supply the Casual Labour Board with funds? I gave a cheque one day to some unemployed men, for which I afterwards took a Government cheque.
11750. How much for? I cannot say.
11751. £50? No.
11752. £20? I cannot say the amount. It would not be so much as £50.
11753. Did you ever supply the petty-cash of the Casual Labour Board from your own pocket? I may have done.
11754. Were you ever short in your cash? In what way?
11755. When the cash was made up, were you short in your cash? No.
11756. If other witnesses say you were, and that you drew a cheque on your own private account to make it up, is that evidence true or false? I should have to explain it. It might be both.
11757. I repeat the question. I have had certain evidence given to me, and I wish to test whether it is true or false. Have you at any time drawn against your private account a cheque to make up some sum of money in connection with the Casual Labour Board? I would use the money as if my own money. I had no one to account to for it but myself. If I took a few pounds out of the petty-cash, as I was going along, I would afterwards draw a cheque and put it back.
11758. Have you drawn a cheque out of your own account to make good any deficiency in the petty-cash? No.
11759. Have you ever drawn a cheque out of your own banking account to make up what you were short in your petty-cash? No.
11760. Have you drawn a cheque of from £100 to £200 to make up something wrong in your petty-cash? No.
11761. If witnesses swear you have, is it true or false? False.
11762. Will you produce your banking account? Yes.
11763. When? Whenever you like. I wish to explain about these alleged balances that no one could make a balance. The vouchers would be in the box, and unless you put in what was paid up to that date you could not have an actual balance. Any amounts represented by Mr. Davies' voucher, and any expenses spent for two or three months, would go to make up anything short.
11764. Did you ever hear of any vouchers being lost at the National Park? No. I would be glad to hear of it. I would be responsible for anything that was lost.
11765. Do you think then you have paid moneys you ought not to have paid? I cannot say. If I could produce a voucher I have paid, and which amount I have not got from the Government, I should be recouped.
11766. Who had the preparation of this recapitulation of vouchers? It depends on the date.
11767. Take this bundle showing a recapitulation to December 17, 1888? These shown here are in my handwriting.
11768. Who would make up that lot? I am not quite sure. Larnach had it in hand for a long time. He would make up the list. As soon as he got £6,000 he would let me know. If he wanted a voucher for a certain amount, and could not make it up out of those in hand, I would give him a voucher out of my cash-box.
11769. A *bonâ fide* voucher? Yes; we had no other vouchers.
11770. Were all the vouchers in the office *bonâ fide*? All that we made use of would be *bonâ fide*. Any sent to the Treasury would be *bonâ fide*, unless they were sent in error.
11771. Will you look through this bundle of papers and note four vouchers for personal expenses, amounting to £10 10s. 6d., £10 9s. 6d., £10 8s. 6d., £13 8s. 3d.;—what time would they cover? Four months, I presume.
11772. Who authorized those payments to you? The Board allowed it. I do not know whether it was authorized in the first instance.
11773. Who paid it? The Board or myself; it was paid in the usual way.
11774. What was the "usual" way for paying your personal expenses? By cash or cheque.
11775. Did you refer to Mr. Davies before you took it out of the cash-box? Yes.
11776. Did he have anything to do with the cash-box? No.
11777. Did he have a key? No.
11778. Did you apply to Mr. Davies? He had to sign the voucher.
11779. You gave in on December 17, 1888, all these vouchers for personal expenses. They all came in then, including Mr. Davies, yourself, Mr. Hibble, and a series of other payments to officers? I cannot see that there are many vouchers. I did not put them in regularly.
11780. Were you paid by cheque or cash for your salary? Both ways.
11781. How often by cheque? I cannot say.
11782. I have been through that cash-book myself. I state to you on every occasion, excepting, I believe, two, your payment of salary was by cheque. Can you tell me how it came about that in December and January, I think, you were paid your salary out of the petty-cash? I suppose that was so. I was paid both ways.
11783. If we find that the only occasions were in December and January, when, according to the book, large amounts of petty-cash were unaccounted for;—was that unusual? It was not unaccounted for. I object to anyone saying that it was unaccounted for.
11784. Was it not unusual on these occasions, in January and December, when all the others are cheque payments, that you should be paid by cash? I do not think so.
11785. What was your salary? £29 3s. 4d. per month—£350 per annum.
11786. Was that paid you at first. I see at first there was a cheque for £27 10s? Yes.
11787. And then I see another cheque for £47? That would be on account of petty-cash and salary.
- 11788.

NOTE (on revision) :—Q. 11749.—After "men" read "the chairman being absent." This, I explained, was to oblige some men who had been engaged to go to Grafton sugar-cane-cutting, and would lose their passages unless they could get away that day. Q. 11757.—After "petty-cash" read "for expenses." Q. 11763.—After "date" read "and the amount of cash in hand." Q. 11768.—For "cash-box" read "cash-voucher box." Q. 11772.—After "instance" add "the bulk of the amount would be for cash actually paid out of my pocket."

- Mr. T. C. Hinchcliffe.
30 April, 1889.
11788. Can I take it that throughout your employ there you received £29 3s. 4d. per month? Yes; and 10s. for each pay-day.
11789. Do you know how much you received over and above your salary for allowances for personal expenses, or whatever you like to call it? I cannot tell from memory.
11790. Did you receive £250? I cannot say. The vouchers would explain all about it.
11791. Can we take it that the entries in the cash-book, which you have checked, are correct? Yes.
11792. If we add up the total amount of the payments in your name and subtract the amount of your salary, will that leave the amount of the allowances and personal expenses? Yes; but in many cases I should explain the personal expenses were for others as well as myself. It would not be all spent on myself individually.
11793. You recollect the evidence you gave that you never had in hand more than £50 to £100 in petty-cash. I will read you this evidence taken before us:—"What was the balance in hand then? I believe from £250 to £300. He (meaning you) told me himself. Of the office money? Yes; and he said he was that much out of pocket by being Secretary in charge of the cash. How? He said he had sent vouchers to the Park and they were never returned. When did he tell you that? At the beginning of this year. Did you ever hear of him being short in his cash? He never told me he was short. Was he to your knowledge? According to the books I knew he must be short. Did Mr. Hinchcliffe ever tell you he was short in his cash? Yes. Before or after his Melbourne trip? After. What was the amount? Between £250 and £300. Did you say he had to make it up by drawing on his own private account? He told me he had to make it up, and I believe he drew on his own bank." Now, is that evidence true or false? To a certain extent it is true; but it is incorrect in another way. This £200 or £300 was represented by vouchers. Any advance of money to Mr. Davies or anyone else would be there. It would not be short actually, as I had vouchers in the box; but, in the case of Mr. Davies, I could not make use of them until Sir Henry Parkes had approved of his expenses at the rate of 10s. a day. All money I advanced to him, I was told at the Audit Office, would be quite right as far as I was concerned.
11794. Did you, before his payment was authorized, make an advance to him at the rate of 10s. a day? It was never made up until the finish.
11795. How did you arrive at that voucher £261 10s. that I showed you just now? That was at the rate of 10s. a day from the time he started. It was allowed by the Colonial Secretary.
11796. Did the Colonial Secretary authorize it on the 27th December? I would not be sure of the date.
11797. I want to know how you passed or paid a cash voucher for £261 for which you had no authority? I had the authority of the Chairman. He was my "boss," as you call it. I knew he would have to have the approval of the Colonial Secretary before I passed it, and I took an intermediate voucher, which I was told would exonerate me.
11798. Do you remember when Miles and Mason came into office? Yes.
11799. Did Mr. Davies give you any vouchers that were unpaid? Yes; a large bundle which Mr. Hibble made up.
11800. Did Mr. Davies direct Mr. Hibble to give them to you? I think so.
11801. Would you recognize them individually? I should know the firms, but I did not take any notice of the amounts or numbers.
11802. Tell me the firms? There were M'Lean Bros. and Rigg, Seale, and I think some were ration accounts for Mr. Kidman.
11803. Will you look at this batch of vouchers and see whether you can recognize any of them as having been handed you by Mr. Davies? I never looked at them individually.
11804. Then you cannot identify any of these? No, not individually. I put them in a bag and took them down to Mr. Miles' office.
11805. If Mr. Miles has said you produced a packet of papers out of your bag, and told him to get them paid, is that correct? Yes.
11806. Are they correct? I cannot say.
11807. Are they certified to? I cannot say whether they are.
11808. Do they not bear on them the necessary signatures to justify immediate payment? All but one appear to have upon them the necessary signatures to justify immediate payment.
11809. Now, did you hand them to Mr. Miles, and tell him that the Chairman told you to get them paid? We had an appointment, and these gentlemen wanted to know what these were for. I took them down to get them paid; but they only passed the pay-sheets.
11810. Did you have anything to do with these vouchers? No.
11811. Did you certify as to their correctness? Not as a rule.
11812. Did you examine them? No; Mr. Hibble generally examined them, and of course checked them with the order-book when they came in, and checked the calculations, and the officer would certify that they had been received.
11813. Look at that voucher;—what course did it go through? In the first instance, it would come to the office with a lot of others. We should pick out what district it was for and send it to the superintendent, and it would be returned by him to the office.
11814. Would they be signed by the superintendent? If correct.
11815. Does that voucher show that it is signed by anyone? Yes, by Mr. Burrowes.
11816. In what district? In the Southern District.
11817. That would come back signed? If correct.
11818. Did Mr. Burrowes ever sign any vouchers at the office? Sometimes.
11819. Was it the rule or otherwise? Otherwise.
11820. If we find that certain vouchers do not bear his stamp, would that show that they were signed at your office? No.
11821. Did he sign them frequently in your office? Yes.
11822. Do you remember any particular occasion when Mr. Burrowes signed some vouchers in the office at the request of the Chairman? I cannot recollect any particular occasion.
11823. Who was responsible for the correctness of the vouchers as to the items of goods? The superintendent.
11824. Nobody in the head office? No.
11825. If a voucher was signed by Mr. Burrowes, went through the books, and was paid, and was found to be wrong? The Auditor-General would send it back. 11826.

Mr. T. C.
Hinchcliffe.
30 April, 1889.

11826. Who was responsible in your office? Nobody.
11827. Then if there is a voucher for a dozen tons of powder, and you have no particulars of it in the office at all, no one is responsible? How do you mean responsible?
11828. Responsible for the contingent voucher? Whoever certified to it is responsible. If the Auditor-General sent us a surcharge note of £1, we would send it to Mr. Burrowes and tell him to forward it, as has been done on several occasions.
11829. Were you present on any occasion at the head office when Mr. Hibble, Mr. Davies, and I think Mr. Burrowes were present and some vouchers were signed? I do not recollect.
11830. Do you recognize this handwriting? I believe it is Hibble's.
11831. Do you know anything about it? No. I see it is for a hamper-basket. The voucher never came to me. It never came to the office, or else before it was paid it would have to have been certified to by me, similar to a superintendent having charge of a district. It was said there was something wrong about it.
11832. Were you sitting in the same room with Mr. Hibble? Yes.
11833. Can you give me any explanation about it? It was not paid for.
11834. Do you know whether such a basket was obtained? I cannot say.
11835. And yet you were in the same room? The basket would not have to be brought into the room.
11836. Look at voucher [*Exhibit E 3*] and compare it with that order. Now, I ask you—as we have already a lot of evidence about it—to let us have the whole history of that, if you can tell us? In what way?
11837. Do you see that the order and the contingent voucher have the same number? I do.
11838. Do you see that the order having the same number is for one hamper-basket, and the contingent voucher bearing a corresponding number is for six coils of Manilla rope? Yes.
11839. I ask you—as you were sitting in the same room as Mr. Davies and Mr. Hibble—can you give me any account about it? I cannot.
11840. Are you absolutely ignorant of it? Yes.
11841. You see that the voucher for the Manilla rope is certified to by Mr. Burrowes and pencilled Hurstville? Yes.
11842. Is it unusual for the numbers to be the same? That may be a mistake.
11843. Did you hear of it? I heard of it; but no one ever came to me to certify to it.
11844. Did you hear that that voucher, six coils of Manilla rope, was supposed to be for the hamper-basket? No.
11845. From Mr. Hibble, from Mr. Davies, from Mr. Burrowes, or from anyone else? No.
11846. Look at voucher [*Exhibit E 2*]-have you seen that before? I cannot say. I see neither of them has been paid. That is the only thing peculiar. They are both certified to.
11847. Are they in such a state that in the ordinary course you would have paid them? I would have drawn a cheque for them if I had been told.
11848. Were they amongst the packet you handed to Mr. Miles? I cannot say.
11849. If neither of these vouchers is in Messrs. M'Lean Bros. and Rigg's account, and there were two hamper-baskets for the same amount sent to the Casual Labour Board, does it help your recollection at all? No.
11850. Did you hear anything about a hamper-basket? Yes.
11851. From whom? I saw the voucher in the office. Mr. Larnach drew my attention to it. I said, "Do not mix that up with the others, there must be some mistake." I did not see the hamper-basket there. Mr. Davies used the room behind the office as his private room.
11852. When was the conversation with Larnach? I cannot say.
11853. Then you did see a contingent voucher for a hamper-basket? Yes. I told him I thought there must be some mistake.
11854. And not to mix it with the others? Yes.
11855. Is that all you can give us about it? Yes.
11856. I believe the office had a cabman constantly on hire there? Yes, there was a cabman.
11857. Then what would be the justification for all these other payments for cabs? He would not always be there. When we went to the bank, for instance, Mr. Davies might want him.
11858. Did the cabman get paid by a contingent voucher? Yes. I think every fortnight or three weeks. The voucher will show.
11859. Do you know whether Mr. Davies ever examined your cash? No.
11860. Did he examine your cash-books? I could not say.
11861. You being in the same room, would you not have an opportunity of seeing what he was doing? He could not examine my cash-book, because it was in the safe.
11862. Who kept the key of your cash-box? I did myself.
11863. Who kept the key of the safe? I did myself.
11864. Could anyone get at them? No.
11865. Mr. Hibble has told us you had a rough Letts' diary with entries of cash in? Occasionally I might put entries there, but mostly I had them in a memo. book in my pocket.
11866. He also said you were a lot of money out of pocket? Mr. Hibble has made a mistake. Mr. Hibble said to me, "I think you have the wrong end of the stick." He said, "I think you have paid money to the Chairman and not put it down." I said, "Well, if I have done that I shall have to pay it." No one could tell how the cash stood, unless some officer came there, took out the vouchers, and made them up. I could not tell myself.
11867. How large was the box in which you kept the papers? It was an ordinary Government box. They have a patent lock to them.
11868. Do you believe you "had the wrong end of the stick"? That is more than I should like to say.
11869. Was it possible for you to make payments to people and never get it returned? It would be my own fault if I did.
- 11870.

NOTE (on revision) :—Q. 11828—For "Mr. Burrowes" read "the Superintendent." Q. 11851—For "the" read "a."
Q. 11861—After "because" read "generally." Q. 11866—After "took out the" read "cash and" and add to end of answer
"until I made up the final balance some £5 odd." Q. 11868—For "should like to" read "could." Q. 11870—Omit "if
it is" before "untrue" and omit "that" after.

Mr. T. C.
Hinchcliffe.
30 April, 1889.

11870. If the evidence is correct that you were from £150 to £200 short, you must have had the wrong end of the stick? That is if it is untrue that the money was made up by the vouchers not entered.
11871. Do you think your bank-book will show any payment in December or January exceeding £100 for the benefit of the Board? I am quite sure it will not. There may be one small payment—perhaps two.
11872. Were your duties heavy? Yes; as Secretary and Paymaster.
11873. Did you find yourself constantly occupied? Yes; towards the end it got easier.
11874. Was Mr. Hibble's time taken up? Yes,
11875. Did he work overtime? Yes; when the Parliamentary returns were asked for.
11876. Did you ever know him work overtime at the cash-book? I cannot tell what particular work he worked at.
11877. How comes it that in some of the payments made here there is this peculiarity: A large sum is drawn out of the petty-cash, for argument say £30 16s. 7d., and there is a cheque for £1 to make up the payment of some pay-sheet? That would be to rectify an error.
11878. I observe a payment out of the petty-cash for some pay-sheet or wages, and find the amount made up in the next item by a small cheque;—how is this? I cannot tell unless you show me the item. I see they are separate payments.
11879. You heard me read the evidence of Mr. Hibble about some vouchers going to the National Park and never being returned? I did not understand that there were any not returned, or any missing vouchers. It was only conjecture on his part.
11880. There is a payment on page 23, £6 5s. 4d., National Park, and £1 cheque;—is not that curious? No, it is not curious at all. It may be a cheque that we wanted to send by post. It is not one payment or to the same party.
11881. Then Mr. Hibble's evidence on the point that you drew a cheque out of your private bank about December or January is incorrect? Yes.
11882. Did you observe in the cash-book that in December there were several large payments of petty-cash all coming together;—can you account for it? Mr. Davies nearly occupies the lot.
11883. Your salary was paid in petty-cash, and large amounts were paid out of it in December? That is very likely.
11884. Does it strike you as being strange? No. I can only suppose that I did not make up these vouchers for five or six months, and that they would all come in the one month.
11885. Did you ever send in any contingent vouchers yourself? Yes, for anything that came into the office.
11886. What was Mr. Hibble's duty with regard to them? To check them with the order-book and check the calculation.
11887. Mr. Hibble says he had nothing to do but to check the computation, and that he was not responsible for checking them with the order-book? He had charge of the order-book.
11888. We find a large number of vouchers amongst a number handed by you to Mr. Miles which do not correspond with the order-book;—who was responsible for that? If they were paid, Mr. Hibble would be.
11889. They were signed by all the officers for payment, and had it not been for the accident of some other gentlemen coming into the office, it seems probable they would have been paid. We find there is a discrepancy between the order-book and the voucher. Who is responsible? Mr. Hibble.
11890. Would you be responsible? I do not think so.
11891. Are you prepared to take the responsibility? I should not take the responsibility at all.
11892. Do you consider yourself, as senior officer, responsible for the correctness of these contingent vouchers? Not at all.
11893. You shift it on Mr. Hibble? And the Chairman.
11894. With reference to the adjustment of the £6,000 voucher, who initiated the making up of the amount? I did it in Mr. Wise's office.
11895. Are you aware that in forty sets for £6,000, the Casual Labour Board has vouchers for the exact amount in each case, nothing more nor less? That is quite correct.
11896. Who initiated that practice? I did myself.
11897. Was Mr. Davies responsible for it? No.
- 11897½. Could it be done easily? I never found any difficulty in doing it, nor did Mr. Hibble, nor Mr. Larnach.
11898. Was it a simple thing in every case to get the exact amount of vouchers without splitting them? We were not allowed to split vouchers. Sometimes it might take Mr. Larnach an hour to get the amount. Sometimes he would make a boast of it, and say I have another lot ready. He would add up the amounts as he went along. Sometimes we would have to go back to the commencement. There would be a voucher for £21 11s. 4d., and we could not get a voucher to fit into it.
11899. Suppose you were £5 11s. 7d. short, what would you do? He would say, "Have you a voucher to correspond." He might take out a voucher with five pence on it.
11900. Does not the arrangement strike you as being extraordinary? I found it very easy.
11901. How might he make it up? In half a dozen different ways. If he was short, he would have to pay it into the Treasury. The Audit Office thanked me for doing it, and said it made things very easy for them.
11902. Did you do it yourself? Yes. I did it myself at the start. I also did it for Mr. Wise on a smaller scale. I handed it over to Mr. Larnach, and he did not find it difficult. We had vouchers as small as 6s.
11903. Did these gentlemen ever ask you for vouchers from your box? Yes; they would ask me for vouchers out of the box.
11904. Did they ever ask you for a voucher when you had not the exact amount? They might have done. I cannot say.
11905. Was it the rule or otherwise, when you were asked for vouchers, that you had the amount required? I cannot say; I had all kinds of different amounts.
11906. When you went to Melbourne, who took up your work? Mr. Hibble. 11907.

NOTE (on revision):—Q. 11882—After "Davies" read "voucher." Q. 11888—After "paid" read "and found incorrect" and after "Hibble" read "or the certifying officer." Q. 11889—For "Mr. Hibble" read "the certifying officer." Q. 11893—For "and the Chairman" read "No, the Chairman."

Mr. T. C.
Hinchcliffe.
30 April, 1889.

11907. You were a month away? I forget exactly.
11908. When Mr. Davies was away who took up his work? He was only away one day, I think.
11909. Did you ever see Mr. Hibble the worse for drink? No.
11910. Mr. Larnach? Yes; I thought he was ill. The detective said he was drunk.
11911. Mr. Burrowes? I have seen Mr. Burrowes jolly.
11912. Mr. Wells? I never saw him drunk.
11913. Mr. Houison? I have seen him a little bit jolly. It is a hard thing to define when a man is drunk.
11914. Do you recollect a lot of vouchers that were being made out for petty-cash at one time being brought under your notice? In what way.
11915. Do you recollect six vouchers for nearly £100 being made out of petty-cash. I have this in evidence:—"You ask me something about the cash. I said it was not correct for certain reasons. Six vouchers were made out to my certain knowledge by Mr. Hibble, and they amounted to nearly £100." They consisted of one for £3; another for £1 1s, 8s. 6d., 10s. 6d. expenses for lunch; 4s., cab-hire and so on. Now, do you know anything of that? I do not know to what they refer.
11916. I have evidence from one witness also that you told him about a hamper-basket that was wanted for the pays;—is that correct? No?
11917. Did you ever say anything about a basket? Only what I have stated to you this afternoon—what I said when the voucher came in.
11918. Do you know whether the Chairman was in the habit of keeping large amounts of cash in the office? I cannot say.
11919. Were you on friendly terms with him? Yes.
11920. Was he ever at your house? No.
11921. Did he ever discuss with you what was going on in the department? Sometimes.
11922. Did he ever express an opinion of the officers? Yes.
11923. Pleasantly or otherwise? Both.
11924. Whom did he speak of? He spoke of the whole of them at different times.
11925. Did he give his opinion of Mr. Hibble, for example? He said he was a smart young fellow.
11926. What did he say of Mr. Larnach? He said he was a d—d old scoundrel.
11927. Are you sure of that? I am not sure about the d—d; but he emphasised it.
11928. Did it not strike you as unusual to keep "a d—d old scoundrel" in the office so long? He wanted to get rid of him once or twice; but, knowing Larnach's position, I pleaded for him to let him stop. Larnach complained that Mr. Davies treated him like a dog, and said that he would be even with him some day.
11929. What did he say of Mr. Burrowes? He said that he gave him a lot of trouble, and that the other two members of the Board were in favour of dismissing him; but he took some compassion on his wife and family.
11930. How long did this go on? I cannot say. The letter-book would show that.
11931. Would you say the department worked harmoniously or otherwise? I used to tell Mr. Burrowes that he gave us more trouble than all the others put together.
11932. Did the department work harmoniously? Amongst themselves they did; but, as I have explained, two of the members of the Board wanted to discharge Mr. Burrowes. Mr. Houison, the first time he saw him—he must have known something of him previously—after Mr. Burrowes had made some explanation, turned round and said that he would not believe a word that Mr. Burrowes said.
11933. Do you know whether any want of harmony prevailed during 1887 as regards the department generally? I believe the case I have mentioned is one.
11934. With the exception of Mr. Burrowes? I think they were not over-pleased with Mr. O'Donnell. I believe his salary was reduced.
11935. Do you remember taking some electoral rolls down to the station in a cab? No.
11936. It is said that you did? I never did.
11937. Is it possible Mr. Davies may have asked you? He never did.
11938. You never went? No, not with any electoral rolls.
11939. Did you ever go with Mr. Burrowes to the station? Not that I recollect.
11940. In January? I cannot say.
11941. You might have gone in January last and have forgotten it? I might have done.
11942. Referring to this payment on the 27th December, of £261 10s., to Mr. Davies, from an examination of this cash-book, it would appear that after that payment there should be a balance in hand of £259 4s. 4d.? You cannot tell that. I might, perhaps, have every shilling of that represented by vouchers.
11943. Two witnesses have told us that at about that time you were short something like £250 in your cash? It is not true.
11944. Then both these witnesses have perjured themselves? They have made a mistake, no doubt. I could not tell whether I was short or not until I made a final balance.
11945. Did you ever lend any money? I have advanced money.
11946. To whom? To all of them.
11947. Out of the petty-cash? Yes.
11948. Did you lend money to Mr. Davies? Only the sums I have mentioned on account of personal expenses.
11949. What was the largest amount? I cannot say.
11950. Have you any book or record? No; I only kept account on a sheet of paper, and kept it in my cash-box.
11951. How was it you paid wages out of petty-cash? Because the men would come into the office a few at a time, and if we had the cash of course we would pay them.
11952. When refunds were made, what became of them;—were they paid into the petty-cash? Any I have seen would be.
11953. I have been through the petty-cash book, and I see a lot of entries—refunds by cheque, £7 4s.; National Park cheque, £5 10s.; Rookwood cheque, £3 11s. 8d., and so forth;—what would these be? That was a time when we were rushed. A cheque would be drawn for the full amount of the pay-sheet, and we would check it afterwards.

11954.

NOTE (on revision):—Q. 11913—After "I have" read "once." Q. 11920—For "No" read "Yes, twice," but the question asked me was "Were you ever at his house? No." Q. 11934—After "O'Donnell" read "when at Carlingford," and after "reduced" add "he afterwards gave every satisfaction." Q. 11946—For "of them" read "the clerks on account of their salaries."

Mr. T. C.
Hinchcliffe.
30 April, 1889

11954. Then these are from excess payments? No.
11955. Cheques drawn in excess of what was required? Yes.
11956. Were these not in the same category as unclaimed wages? No; unclaimed wages belonged to the men.
11957. Whenever there were refunds on cheques, were they paid to you as petty-cash clerk? I would hold them.
11958. Then all these refunds of different cheques were money you got yourself, and not what was paid you by any clerk? Yes; it might be, in some cases, that the clerks would give it to me.
11959. Would you apply it to the petty-cash? Yes; it was the only way we could use it!
11960. From May, 1887, to the end of January, 1889, you spent in petty-cash something like £2,916 6s. 8d.;—is that likely to be correct? That is correct.
11961. And that was supplied by cheques drawn for petty-cash, and by refunds from excess cheques? Yes.
11962. *Mr. Waller.*] You stated to the President that these large amounts in December were probably the result of expenses for many months? Yes.
11963. That being the case, how is it, in this contingent voucher here 628, I find another sum for £9 2s. 3d.? That would be for the month of December. The other ones would be for some other months.
11964. I draw your attention to voucher 486A for the month for £9 7s. 6d.;—what month would it be for? The month of October.
11965. I will draw your attention to voucher 553A, for £8 7s. 6d., for the month? Yes; that is for November.
11966. I will draw your attention to voucher 522A, for £11 17s. 9d., for the month? Yes; that is correct, July.
11967. I will draw your attention to voucher 1,159A, for £11 0s. 3d., for the month of May or August— which is it? The month of August.
11968. I will draw your attention to voucher 847A, for £11 15s. 4d., for the month of March? Yes.
11969. Here is another one, 1,144A, for April, £8 15s.; for June, 1,180A, for £10; for September, 511A £10 3s. 8d.? Yes.
11970. Does not that pretty well exhaust all the months of the year? There would only be one for each month.
11971. Then how could these vouchers put in in December be for months previously? Because I had not got them made up. They may have been put in all at one time.
11972. The President asked you why they were put in in December, and you explained that the reason was they were for back-payments due for previous months. How could that be when I have produced vouchers for expenses incurred in the previous months? These are the vouchers I referred to. They would be additional ones. There is only one voucher for each month. They might be three or four months old before they were put in.
11973. Can you tell me whether the Chairman of the Board was aware you were drawing such large sums of money per month for expenses outside your salary? Yes; of course he was aware of it.
11974. What was the 10s. allowed to you for? As Paymaster.
11975. As Paymaster only? Yes.
11976. Was it to cover anything? It was an allowance made by the Government. I used to receive £1 when I was with Mr. Wise.
11977. What was it to cover? It was to cover any loss you might make.
11978. Was it to cover any expenses in the way of food? I did not understand that. It was more to cover a loss by over-payment or otherwise.
11979. So it was a compensation fund? It was an allowance usually made. You have charge of a large sum of money, and you are responsible for it.
11980. How many pays did you have in a month? I cannot say. On the Hurstville line we had ten or twelve different pays.
11981. How many days in the month? The vouchers would show that.
11982. These expenses for the greater part are for cab-hire. There are pretty considerable amounts for cabs? I only see on this voucher I am looking at 11s. 6d. for cabs.
11983. Look at this voucher and say what you see for cabs on it? Yes; I was in a cab pretty well all day on that occasion.
11984. In every one of the vouchers there are numerous amounts for cab-hire—16s. 6d., 3s., 4s., 2s. 6d., 15s., 2s. 6d.—how is it that you, as one of the officers of the department, and the other officers could incur such large sums for cab-hire when there are also accounts here from men for cab-hire only? At the first date we did not have a cabman to look after the Board. There was no one excepting myself or the members of the Board allowed to pay cab-hire.
11985. If you look you will see that cab-hire passes through the whole of these vouchers? On pay-days you had to get two cabs—one in the morning, and another one back in the evening. We came in late as a rule.
11986. Then, can you account for the bills from others for cab-hire only. Here is cab-hire, J. Solomon, £1 16s.; another item, £3 11s.; another, £5 17s. 6d.; and another for £1 4s.? That would be in connection with the Chairman and other members of the Board.
11987. What were the Chairman's fees of 10s. a day to cover? I cannot say.
11988. Did he pay his hotel expenses, or did you pay it out of the petty-cash? When he went with me I generally paid.
11989. Were these vouchers numbered regularly? Yes; when they were made up and entered in the book.
11990. What is the meaning of the letter A after so many of them? That simply shows that it is a cash voucher. It is to distinguish it.
11991. It does not signify that it is a duplicate voucher? No.
11992. How is it we find that these A's are duplicate numbers? They are duplicates of those at the top.
11993. But these are duplicate numbers? The A shows that it is a cash payment.
11994. I have seen spaces left in the cash-book, which I do not understand—will it assist the meaning as to these duplicate numbers? If we put in a number to these vouchers it would interfere with the other numbers. Using the letter A saves writing another number. 11995.

Mr. T. C.
Hinchcliffe,
30 April, 1889

11995. Then this letter A only refers to these cash payments? Yes; to those that are paid by cash.
11996. Was the payment to Mr. Davies of £261 10s. a cash payment? Yes.
11997. Would that have the letter A to it? Yes.
11998. So it was simply to show whether it was a cash or cheque payment? Yes.
11999. I find there is a sum, £160 12s., paid to a couple of people for cab-hire and buggies alone;—the calculation is made up from vouchers you had to do with? These vouchers are correct.
12000. Does it not strike you as extraordinary that such a large amount of money should be paid away in cabs, and yet that there should be so many vouchers in your name, Mr. Hibble's name, and Mr. Burrowes' name, and others for the like expense? I cannot account for that. I have only to do with the amounts for myself. I know mine are correct.
12001. Then each officer is responsible for the voucher made out by himself? Yes.
12002. What would your duty be? To pay them when they are certified to.
12003. Have you no other responsibility? No.
12004. That amount of money which you paid Mr. Davies previously to making it up in the petty-cash book, would that include the two large amounts he owed you for? It includes the lot. It would be a continuous account. Until he gave me a proper voucher I could not use it. That would make the cash-book appear short.
12005. The most he could owe you is the difference between £155 7s. 8d. and £261 10s.—that is £106 2s. 4d.? Yes.
12006. Would that sum of money, £155 7s. 8d., be the entire amount of money you gave Mr. Davies from time to time? Yes; up to that date.
12007. Do you know of him making other payments on account of the Casual Labour Board, besides those amounts which are included in the £155 7s. 8d.? In what way?
12008. In any way? A payment on account of the Board?
12009. Yes? Not that I recollect. Only the money that he paid into the Bank.
12010. For any expenses, or things incurred by him, did he make any payment outside this money that you refunded him for? No; if he paid anything it would be entirely out of his own pocket.
12011. He did not make any demand on you for other payments? No. From time to time I had given him amounts that came to £155 7s. 8d. on that date.
12012. Did he make any subsequent demand? I think he did, for the sum of £5 odd. I told him I knew nothing about it, but he had better get it from the new Board.
12013. When did you tell him he ought to pay into the Treasury this money that he received and paid into the Australian Joint Stock Bank, and which you disapproved of his doing? When I first saw the bank-book—I think it was a few months after the start of the Board—I told him that I thought it was not the correct place to pay it into. He said, "I will see Mr. Eagar about it." Having paid the one account in he paid in the others.
12014. What did you mean? I meant that the Bank was the wrong place to pay the money into.
12015. How soon after did he pay it into the Treasury? I cannot tell you that.
12016. Did you tell him that he need not pay it in until the Board closed up? He would not consult me about it.
12017. You did not say it? I would not say it. I told him he would have to transfer the amount from the Bank to the Treasury at any rate at the end of the Board.
12018. Is the Commission to understand that the sum of £155 7s. 8d. was a debt incurred by Mr. Davies to you as Paymaster by reason of certain advances you, as Paymaster, made him from time to time? Yes; and to be accounted for afterwards by a proper voucher.
12019. Were those payments in cheque or cash? In both, mostly cash.
12020. With that exception, there was no other account for any sums of money paid out by Mr. Davies for the Casual Labour Board? Not that I know of.
12021. You have no contingent voucher representing other sums paid out by him? Not that I know of. That is all the money Mr. Davies has received from the Board.
12022. These two cheques that you cashed by giving cheques of your own;—what did you do with those cheques? I cannot tell you for certain. They were my property after having paid the money. I do not think I paid them into my account. I might have done.
12023. *President.*] Do you know anything about a roller from the Kogarah Council? Yes.
12024. Did they return it? Yes; but there was a charge of £1 5s. for repairs.
12025. Do you know of any persons who were paid twice? There was one case the Audit Department found out.
12026. Did Mr. Davies have a free railway-pass? I think he had.
12027. This evidence which Mr. Hibble gave in reference to those features in that cash-book, I have now found I was referring to the fact that you had stated in your evidence that you generally had from £50 to £100 in petty-cash. He says, "No, he must be wrong; the book shows different to that. He must be a lot out." Then again, when I pointed out to him that, on a certain day when a cheque was drawn for £100 for petty-cash, the cash-book showed a balance of £390 18s. 3d., he says, "Yes, Mr. Hinchcliffe had the money in his box"? Oh, he meant the vouchers.
12028. Then again, when I said, "What was the balance then?" he says, "I believe from £250 to £300, He (meaning you) told me so himself." Again, "He said he was short in his cash. He told me he went to his Bank and drew it. His Bank is the London Chartered Bank." Now, what is your explanation of that? I could not be short. The cash-book was never made up until the finish, and then it was only made up to date.

WEDNESDAY,

WEDNESDAY, 1 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.

T. F. WALLER, Esq., J.P.

James William Johnson called in, sworn, and examined:—

- Mr. J.W. Johnson. 12029. *President.*] Are you a member of the firm of Want, Johnson, & Co.? I am.
12030. Are you a shareholder in the Holt-Sutherland Estate Co.? I am.
- 1 May, 1889. 12031. How many shares have you? I can only tell you about the number—about twenty-two or twenty-three.
12032. I see in a list of shareholders made up to 12th December, 1888, which was before the Select Committee of the Legislative Assembly, the name of J. W. Johnson for twenty-four shares? That is myself.
12033. Are you interested in any other shares beyond these—in those in the names on the list of Johnson, Want, Simpson, and Minter? Indirectly, with the others, under very peculiar circumstances. They were given to us by Sir Henry Parkes.
12034. Will you tell me the circumstances under which they were given to you by Sir Henry Parkes? That involves going into the private matters of Sir Henry Parkes.
12035. I must ask you to give them to me? The circumstances are these. I must premise by saying that I personally did not conduct the matter, although it came to my knowledge at the time, and I then looked into it. Sir Henry Parkes had applied to the Colonial Mutual Assurance Company for an advance of a considerable sum by way of first mortgage. I believe he signed one of the printed forms of the Colonial Mutual Society, which are on the basis that the security is to be a first mortgage. Having got the particulars of the property to be mortgaged, we, in the usual way, caused a search to be made for incumbrances, with the result that the clerk who had charge of the search reported that there were no incumbrances. The matter was carried through, and the amount advanced. We were then informed, or discovered, I forget which, that there was a first mortgage, and on further search and inquiry we found that that was so. There was a mortgage to Mr. Woodhouse over the same property existing, and registered. We then, as in duty bound, reported that fact to our clients, and Sir Henry Parkes was communicated with. His explanation was, that although he knew that such a mortgage had been given to Mr. Woodhouse, he was not aware that it had been registered, and it seemed to me a very extraordinary explanation. We then had to get rid of this first mortgage, and volunteered to indemnify our clients against any loss by reason of our having overlooked these incumbrances on the register. We took up Mr. Woodhouse's first mortgage, and we also obtained from Sir Henry Parkes ten shares which belonged to him in the Holt-Sutherland Company, which we hold as security against any loss we may be put to under the indemnity.
12036. Is it ten or eleven shares? I believe ten shares. There may be some additional share in respect of them, but I do not think we have got that additional share.
12037. Do you know in whose names these shares are? They were in Sir Henry Parkes' name; but I think we found reason for having them transferred to our own name. That was done whilst I was in England.
12038. In the list of shareholders, 12th December, 1888, there appears—"J. W. Johnson, S. A. Want, E. P. Simpson, A. R. Minter, eleven shares." Were these the shares that belonged to Sir Henry Parkes? That must be. I suppose an additional share was issued in respect of the ten original shares, making eleven shares.
12039. Do you consider that Sir Henry Parkes has any interest, at the present time, in those shares? Certainly. If the security now held by the Colonial Mutual Society were to realise more than Sir Henry Parkes' debt we should hand him back those shares.
12040. Then both legally and morally you are trustees for those shares for Sir Henry Parkes, after satisfaction of your client's security? I thoroughly understand so.
12041. Are you a director of this Company? No.
12042. Is Mr. S. A. Want? I really could not tell you.
12043. Is Mr. E. P. Simpson? I could not tell you.
12044. Is Mr. A. R. Minter? I could not tell you.
12045. Are these gentlemen all partners of yours? Yes; my reason for being ignorant is that I have only just returned from England after an absence of thirteen months. That is the reason why I did not know that there were eleven shares.
12046. Did you ever have any petition or memorial presented to you for signature by Mr. Murphy, or anyone else, for the opening, clearing, or construction of roads on the Holt-Sutherland Estate? Not to my recollection.
12047. To help your memory, I put into your hands a series of papers which are letters or memorials addressed to the Chairman of the Casual Labour Board referring to the making or construction of roads. Have you any recollection of any of these being presented to you for signature? None whatever. I will not say they were not, but I have no recollection of them, and I have not signed any of them.
12048. Do you notice on any of them the signatures of your partners? I see Mr. Want's signature, and also Mr. Simpson's.
12049. You notice the signature of Mr. S. A. Want, but yours does not appear. Have you any recollection on any occasion of any petition or memorial being presented to you with reference to the construction or making of roads on the Holt-Sutherland Estate? None whatever. I do not believe they were.
12050. Mr. Murphy, in giving evidence before the Select Committee of the Legislative Assembly, in December last, was asked these questions: "Then during the last six months Sir Henry Parkes transferred his shares?" He answered, "Yes; those are the shares, Want, Johnson, Simpson, and Minter have now." How many shares? Eleven.
12051. Does that refer to the same matter I have been asking you about? Yes; there cannot be any other.
12052. *Mr. Franklin.*] Were you in Sydney from June, 1887, to August, 1887? Yes.
12053. *President.*] When did you leave the Colony? The beginning of March, 1888.

Sydney Alfred Want called in, sworn, and examined :—

12054. *President.*] Are you a member of the firm of Want, Johnson, & Co.? Yes.
12055. Are you a shareholder in the Holt-Sutherland Estate Land Company Limited? Yes.
12056. How long have you been a shareholder? I could not exactly tell you. Some years.
12057. Were you a shareholder in the years 1887 and 1888? I believe so.
12058. How many shares have you? It is a rather difficult question for me to answer. They have been split up at various times for the purpose of reissue. Eight.
12059. I see on a list of shareholders, in appendix to Mr. Murphy's evidence before the Select Committee of the Legislative Assembly, the names of E. P. Simpson, eighty-two shares; J. W. Johnson, twenty-four; and H. Pinder, eight shares; and Johnson, Want, Simpson, and Minter, eleven shares. Can I take it that E. P. Simpson and J. W. Johnson mentioned there, and A. R. Minter mentioned in connection with Johnson, Want, and Simpson, are your partners? Yes.
12060. Who is H. Pinder? He was formerly an accountant with us. He met his death by drowning at the Lavender Bay baths. He was a clerk with us for ten years.
12061. I see the name of J. H. Want on this list for thirty-three shares? He is a brother of mine.
12062. I see the name of J. D. Milne;—is he connected with your office? He was an accountant previous to Pinder. He was some ten years in the office.
12063. I see A. R. Winter, two shares;—can you say whether that is meant for A. R. Minter? I never heard of a Winter. I believe it must be Minter.
12064. This then is A. R. Minter (instead of Winter), your partner? I think so. I would not like to speak with any certainty.
12065. Are there any other clerks in your office who are shareholders in this company besides those I have called attention to? I do not think so.
12066. Are there any relatives of your family interested in this company other than the names I have mentioned? I do not think so.
12067. Did you know of the existence of a department called the Casual Labour Board, who had charge of the unemployed in the years 1887 and 1888? Not officially. I was aware of it through the public journals.
12068. Were you aware who was the Chairman of that department? Yes; I know it now.
12069. Were you aware in 1887 and 1888? I do not think so.
12070. Do you know Mr. James Murphy? Yes; he is manager of the Holt-Sutherland Estate Land Company.
12071. Is he a shareholder? Yes.
12072. To what extent? With others he holds a large number. I know they do not all belong to himself.
12073. Who are the others? His brother and relatives.
12074. I see his name down on the list for eighty-nine shares? They are not all his.
12075. Do you think, over and above that eighty-nine, he has got any interest in any others? No.
12076. Then you think that exhausts his interest directly or indirectly? I think so—quite.
12077. Do you know his handwriting? Yes.
12078. Look at these documents, dated 7th July, 1887, 19th August, 1887, two of 22nd September, 1887, and 10th May, 1888—can you say whether you recognize the handwriting in the body of them? I believe them to be the handwriting of Mr. Murphy; but there is another gentleman in his office who has picked up his writing, and it is rather difficult to say. Still I think they are his writing.
12079. I take the first one, dated 7th July, 1887. Is Mr. Carruthers a shareholder of the company? Not that I know of.
12080. Is Mr. Prince? Yes, recently.
12081. Was he at that time, in 1887? I really could not say.
12082. Is Mr. Shankland? I do not know him at all.
12083. Will you look through that document and read out the names of any gentlemen who have signed it who were, to your knowledge or belief, shareholders of the company? Yes; Henry Prince and Jamieson (Prince, Ogg, & Company). I do not see any more that are.
12084. Then on this document, 7th July, 1887, you cannot see any more shareholders than you have mentioned? I cannot see any.
12085. Did you sign it? I do not think so; I cannot see my name there at all.
12086. Will you look at this memorial, dated 19th August, 1887;—has that been signed by you? Yes; that is my signature.
12087. Will you read out from the signatures to that memorial the names of any who were shareholders of the company to your knowledge or belief? I believe Newton's name is on the register. I cannot say whether there are three of them there. Myles M'Rae, E. Reading, F. J. Jackson, S. A. Want, H. Pinder, I believe, Geddes, Henry Prince, I believe, Varney Parkes, G. F. Want, J. S. Jamieson, and J. Murphy are shareholders.
12088. Look at this memorial of 22nd September, 1887;—have you signed that? Yes.
12089. Will you look at that and read out the names of any gentlemen who have signed it who are shareholders in the company to your knowledge or belief? Yes; Myles M'Rae, S. A. Want, J. Murphy, I believe Maloney, and F. J. Jackson are shareholders.
12090. Will you look at this other memorial of the same date;—is that signed by you? Yes.
12091. Will you read out the names from that of any gentlemen who have signed and who are to your knowledge or belief shareholders in the company? Myles M'Rae, J. S. Jamieson, S. A. Want, and J. Murphy.
12092. Will you look at this memorial, dated 10th May, 1888;—is that signed by you? It is.
12093. Will you read out the names of any gentlemen who have signed it who are shareholders in the company to your knowledge or belief? S. A. Want, F. J. Jackson, E. Reading; I do not recognize any of the others.
12094. Have you any recollection who presented these memorials or petitions for your signature? I believe the manager of the company.
12095. Did you make any inquiries before you signed them? He informed me what the object of them

Mr.
S. A. Want.
1 May, 1889.

- Mr. S. A. Want.
1 May, 1889.
12096. Can you give me your recollection of what he informed you? I will tell you what did occur to me: After these roads were made we went to visit the place. We had great difficulty in getting the Directors to go out there at all. We went out on one occasion, and I was surprised to see the extent of the roads made.
12097. I want to know if you can recollect what it was Mr. Murphy said, or what representation he made, when he presented these memorials for your signature? I would not like to say; I would say if I could remember.
12098. I think you have signed three out of the four memorials? I think so.
12099. Were they presented to you during the hours of business? At my own office.
12100. Were you a Director of the Company during 1887 or 1888? I was for a certain time.
12101. Can you say whether you were a Director when you signed the memorials? I believe I was.
12102. Can I take it that you have no memory as to what actually took place when these memorials were presented to you by Mr. Murphy? He first told me where the roads led to and from the Punt Road and the main road to Tom Ugly's.
12103. Did you sign them with the belief that they would be a considerable benefit to the estate if the roads were carried out? Not at that time. I did not know.
12104. In what capacity did you sign them? Simply as a shareholder.
12105. Did you make any independent inquiry as to whether these roads that were petitioned for were on public or private property? I was informed by Mr. Murphy on the matter, because he brought a plan with him and showed me that some of them were proclaimed roads. I remember on one occasion in connection with Holt's property, we had to make a portion of a road to connect with the Government road.
12106. Is there any proclaimed road on the estate? I cannot say, I only went by the plan.
12107. Is there any road that has been dedicated by the Directors? There are subdivisions laid out by which we are to be bound.
12108. Dedicated to the public? We cannot close them.
12109. These roads shown on the subdivisions plan only affect the purchasers under the subdivisions? Yes.
12110. They have not been dedicated? No.
12111. Do you know anything of the arrangement or agreement under which your firm hold ten or eleven shares in this Company? There are ten. I think the other must be an additional share taken up in connection with them. Do you refer to Sir Henry Parkes' shares.
12112. I did not say a word about Sir Henry Parkes' shares. Will you tell me what the arrangement or agreement was as to the ten or eleven shares? Yes, I will tell you exactly. I think on the 27th November, 1884, we had instructions from the Colonial Mutual Assurance Company to prepare a mortgage from Sir Henry Parkes to the Company. The Colonial Mutual Company never lend on second mortgage, and only lend on a proper application being made on a printed form, signed by the person procuring the advance. I have sent down to the Company to try and get the application form, but the Secretary is away at the opening of the Hawkesbury Bridge, and has got the keys in his pocket. Therefore I cannot speak confidently. Search was made by us on the register, and a report was sent in that showed the title to be clear. I believe the printed form of application was signed by Sir Henry Parkes. Some time afterwards a prior incumbrance created by Sir Henry Parkes was discovered. I believe Mr. Woodhouse was the mortgagee. This incumbrance was clearly overlooked by the searching clerk, and was not included in his report to us. The Colonial Mutual Company intimated that they would have to look to us for the amount of such first incumbrance in the event of the property under mortgage—North Shore lands—not proving sufficient to clear their debt. To protect my firm, one of my partners interviewed or wrote to Sir Henry Parkes on the subject, with the result that Sir Henry Parkes wrote a letter on the 26th September, 1885, placing in our hands his ten shares in the Holt-Sutherland Estate Company, to be held by my firm as forming part of the security to the Colonial Mutual Company for an advance of £9,000.
12113. Do you recognize the signature to that letter? It is Sir Henry Parkes' handwriting and signature.
12114. Is your firm solicitors for the Colonial Mutual Insurance Company? Yes.
12115. Is this part of your security? Yes.
12116. Do you object to part with this? Yes.
12117. Will you, before you leave the room, kindly examine with the Secretary to this Commission a copy he will make of this letter and certify to its correctness? Yes.
12118. Then I can let you have the original on your undertaking to produce it again should occasion require? Yes, undoubtedly.
- [Copy of letter dated 26th September, 1885, from Sir Henry Parkes to Messrs. Want, Johnston, & Co., put in and marked R.]
12119. Has the arrangement as evidenced by that letter been altered in any way up to the present time? Yes.
12120. In what respect? In 1886 there was a new issue of shares, and, in order to entitle the proper holder of these shares to obtain such reissue, he had to produce the ten shares to the Company. A representative, I presume, of Sir Henry Parkes, applied to Mr. Pinder, my accountant, to allow of the production of these shares for the purpose. My accountant produced the shares on 11th June, 1886, and I believe the scrip was afterwards returned to my firm.
12121. Has any further alteration taken place? Yes.
12122. What was it? The firm objected to these new shares being claimed by Sir Henry Parkes, or his representative, notwithstanding he still retains them, and in order to prevent any further new shares being so taken up, applied to the Directors to transfer the shares into the names of the firm.
12123. And that was done? That was done recently—in 1888, I think.
12124. But has any alteration taken place with regard to the terms of the arrangement under which you hold the shares from Sir Henry Parkes? I think not. If he paid off the Colonial Mutual Society we should have to transfer these shares to Sir Henry Parkes. I may mention that I had not personal charge of the matter, but what I have stated I know to be correct. I cannot say what Mr. Simpson's arrangements were in the last matter.
12125. Where is Mr. Simpson? He is now absent from town.
12126. We have summoned him to attend before us. When will he be back? Within two or three days.
12127. Can you tell me who the gentleman was who you say you presume was a representative of Sir Henry

Henry Parkes? I cannot say. Application was made direct to Mr. Pinder. Had I known of the application being made I should have refused to have produced the shares.

12128. Does anyone else know of that application to Mr. Pinder? I do not think so. There is a letter which may have led to the name, but I have not got it with me.

12129. If from your records, or from reference to other clerks, you can learn the name of the gentleman who appeared on this occasion, will you send it to this Commission? I will. Probably Mr. Simpson could tell you.

12130. What do the other papers you have in your hand relate to? I have been through them and cannot find anything relating to the shares.

12131. I do not want to refer to private papers, either of the Colonial Mutual Society or your firm; but will you tell me whether you have any other papers relating to this matter? Here is one, 1st October, 1885, which seems to refer to it.

12132. Who is that letter signed by? Henry Parkes.

12133. Do you know his signature? Yes.

12134. Do you believe it to be the signature of Sir Henry Parkes, the present Colonial Secretary? Yes.

12135. Is that letter a portion of the security your firm holds? Yes.

12136. Do you object to part with it? Yes.

12137. Will you allow a copy to be taken and certify to it in the same way as with the previous letter? Yes. [*Copy of letter of 1st October, 1885, put in and marked R 1.*]

12138. Are there any other letters relating to this matter? I cannot see that there are. I have been through the correspondence before I came up here. There is nothing except the absolute transfer of the shares.

12139. Can you say whether Sir Henry Parkes made any application other than the one you speak of to obtain any benefit in the new issue of shares? I cannot say.

12140. Did any come before you as a Director? I am under the impression that it did.

12141. After he pledged them to your firm or the Colonial Mutual Society? I believe there was, but I believe in a different issue of shares.

12142. Then can I take it, so far as your view of the matter is concerned, these shares were pledged to your firm to indemnify you against any loss you might have with your clients on their security over North Shore lands? That is exactly what I understand to be the case.

12143. Can you tell me about the date of the new issue of shares? It came about the time the rent was due. The estate is not a rent producing property, and in order to meet the rent due to Mr. Holt (£3,000 odd) we had a new issue. Every new issue decreases the value of the other shares, unless taken up by the holders of the shares.

12144. When are there reissues? I should think very possibly each year.

12145. Then there would be a reissue in 1887 and a reissue in 1888? I think so.

12146. Have you been out on this estate lately? Yes.

12147. Have you seen the roads that were cleared and constructed by the unemployed? Cleared I should say, yes.

12148. Have they, in your opinion, increased the value of the estate? Not as roads.

12149. Has the existence of the roads there increased the selling value of the estate? I have driven over to the place frequently, but I have never driven over the roads made by the unemployed.

12150. I want to ask you, as a gentleman of some experience, altogether apart from any question of shareholder or Director? I am not a Director now.

12151. I want to ask you whether the work has increased or taken away from the value of your estate? Increased it.

12152. Considerably? For the time.

12153. Until the trees grow up again? The trees have grown up now until you cannot drive across it.

12154. Do you know the Coronulla Road? Yes.

12155. Do you consider its construction has increased the value of your estate? Not as a road.

12156. Has it increased the value of the estate? I think it has to a certain extent.

12157. Do you know the work done on the Illawarra Road and the Port Hacking Road? I do not know which is the Port Hacking Road.

12158. When you signed these memorials that I have shown you, did you examine any of the signatures that preceded yours? No, I do not suppose I did.

12159. Did you give it much consideration at all? I gave it consideration in the way mentioned as to being an advantage to a large number of people about there. I understood these people were neighbouring landowners.

12160. Would you, knowing what you do now, have signed these memorials if presented? That is a difficult thing to answer; some of them I certainly would.

12161. There are only three signed by you. Would you have signed those three knowing what you do now—speaking as a citizen? If I had known what I knew after seeing the roads, I would not have signed; some of the roads I have seen are unnecessary.

12162. How long since is it that you were a Director of the Company? It is seven or eight months ago since I resigned.

12163. Can you recollect whether, during your term of office, any application was made to the Board by Sir Henry Parkes with reference to his shares? Not by Sir Henry Parkes direct. I have never heard of any.

12164. You recognize these two memorials of 22nd September, 1887, and this one of the 10th May, 1888, as being signed by you? Yes. [*Memorials put in and marked R 2, R 3, and R 4.*]

12165. *Mr. Franklin.* Were any surveys made with a view to subdivision? No.

12166. Was your intention to subdivide the property and bring it into sale? Yes, undoubtedly.

12167. Are you aware whether there is in existence any plan of subdivision? I believe there is. Every auction sale there is a plan prepared.

12168. Do you know whether there is one showing a general subdivision of the whole property? I do not know that. The only plan that I know is one that hangs on the wall there.

12169. Do you know the general arrangement of the roads now, taking them eastward and on to Coronulla Beach? Yes.

12170. Do you know a road parallel with the Woronora Road? Yes.

12171.

- Mr. S. A. Want.
1 May, 1889.
12171. The Woronora Road is parallel with the Malvern Road, running towards Coronulla Beach? Yes.
12172. You know these memorials—dated 22nd September, 1887 and 10th May, 1888? I believe I read them at the time.
12173. You see that under the memorials of 22nd September, you are asking for the formation of Eton-street, Woronora, Coronulla, Lilli Pilli, and Eurunga Roads and the Boulevard? Yes; I know most of them.
12174. Will you look at the petition of the 10th May, 1888; it requests the formation of the following roads:—Kurrajong, Bittogi, Yanda, Yallaroi, Bath, Holt, Crystal, Box, the Boulevard, Yarra, Burrawong, Illeroo, Burraneer, Woolaware, Wotonga, Kanura, Willaree, Cowarra, Orara, Karimbla, Canoona, Montrose, Glenwood Roads. Does not Burraneer Road run down to Gannon's farm? Yes.
12175. Is there any settlement besides that there? Not that I am aware of.
12176. Do you know the Woolaware Road? No.
12177. Or the Wotonga, Kanura, Willaree, Cowarra, Orara, Karimbla, Canoona, Montrose, or Glenwood roads? No.
12178. If these roads are constructed on the Holt-Sutherland Estate you are not aware of it? No.
12179. Would you be surprised to learn that they are cleared to the extent of 43 miles? I am not aware of it. My principle trips have been to go to my own place or my brother's cottage. I simply pass over one road. I have never been over the others.
12180. Have you ever been on a trip of inspection? No.
12181. I am showing you a plan, Appendix 9, to the evidence before the Select Committee of the Legislative Assembly. All the roads shown in red represent roads we have been referring to now. It is shown in connection with the plan that the whole of these roads have been either cleared, formed, culverted, or ballasted? I cannot tell you about them.

James Murphy, called in, sworn, and examined:—

- Mr. J. Murphy.
1 May, 1889.
12182. *President.*] Were you examined before the Select Committee of the Legislative Assembly on 12 December, 1888? Yes.
12183. Is this your evidence? Yes.

Evidence before Select Committee.

2480. *Chairman.*] You are the registered manager of the Holt-Sutherland Company? Yes.
2481. Do you produce a list of the shareholders, as requested, and the number of shares held by each shareholder? Yes; I hand in a list. (*Vide Appendix.*)
2482. *Mr. Copeland.*] That includes the whole of the shareholders in the Company? Yes.
2483. What money has been called up upon these shares? £23 5s.
2484. That, then, represents the total amount of called-up capital? Yes.
2485. How many shares are there in the Company? 800.
2486. The list you have read makes up the number to 800? Yes.
2487. What is the value of the shares? £25. £1 15s. still remains to be called up.
2488. This list represents the shareholders at the present day? Yes.
2489. Have you had any transfers during the last six months? Yes.
2490. Have you had many? They are always being sold. Every Board meeting nearly there are some.
2491. Can you tell us what transfers have taken place during the last six months? Not without a little time to prepare it. Every week there are some being sold.
2492. Have any Members of Parliament transferred any shares during the last six months? I could tell you that from memory. Mr. John Want has transferred some shares within the last six months.
2493. Any others? I think Sir Henry Parkes has; I think a transfer has come in from him within the last six months.
2494. Is Sir Henry Parkes' name amongst those in that list of shareholders you read just now? No; because he has not been a shareholder since the assignment of his estate. These shares float round like bank-notes, and do not come in until some time after they have really been parted with.
2495. Then, during the last six months, Sir Henry Parkes transferred his shares? Yes. Those are the shares Want, Johnson, Simpson, and Minter have now.
2496. How many shares? Eleven.
2497. Was Sir Henry Parkes a shareholder from the formation of the company? I can tell you that by turning up his name in the register. In January, 1882, he got ten shares, apparently purchased from Mr. John Want.
2498. And he held them until the assignment of his estate? Yes. As a matter of fact I know, from the dealings in them, because we have had several inquiries about them one way or another. I don't think they have really been his property during the last four years. They were held by Mr. Woodhouse, who had a lien on them. The firm of Want, Johnson, & Co., have them now. I think the amount borrowed on them was more than they could realize, and the trustees of the estate did not take them. The people who held the security could not get their money for them, so he kept the shares.
2499. Have any Members of the Upper House held any shares in the company? No.
2500. They do not hold any at the present time? No.
2501. You are quite sure on that point? Except Sir John Robertson, I do not think we ever had Members of the Upper House in the company. Sir George Innes also had shares in the company. He was a Member of the Upper House, and has been in the company from the first.
2502. Mr. John Davies has never been a shareholder? No.
2503. You know the works that have been carried out on the Holt-Sutherland Estate by the Casual Labour Board by the unemployed? Yes.
2504. Can you tell us who initiated the making of those roads? I think I did.
2505. By petition, or how? By memorial. We got a memorial signed by a large number of persons. It arose this way: When we took possession of this estate the main Illawarra Road

- Road was in a very bad condition, and we said to the trustees—Mr. Fred. Want was one of them, and it was through him that it was done.—“This road ought to be made.” It was not then surveyed, and it is not shown on any map now. We said, “Supposing we make this road 2 chains wide instead of 1 chain, if we give another chain will you get it made?” They said that they had arranged with the Minister for Lands to do that. That was seven years ago, and it has never been done until now.
2506. Mr. Hoskins was Minister for Lands then? I cannot recollect who was in office then. This was in July, 1881. We had, with our own men, begun to make this road, and we have had a staff of men there all the time, and finding the unemployed at National Park I thought it would be a good opportunity to get the road made. I got up this memorial, and when we got that road made we asked for others to be made.
2507. Had you begun to make any other roads? Yes; we made the Malvern Road.
2508. You had begun to make it? We had made it, about a chain wide, not as it is now; but we had cleared it and put temporary culverts over it.
2509. I suppose you had begun to open up the estate by making roads in different directions? Yes.
2510. And then, these unemployed being available, you got them to complete the work you had begun? Yes.
2511. Can you give the Committee any idea as to the increased value of the estate by reason of the unemployed labour being expended upon it? We have not tested that in any way. We can only imagine what it was before, and what it is now. We have not sold any land since this work began. The market for land is very depressed, and we have not tried it.
2512. Supposing the market was fairly lively, what would be your idea of the increase in the price of the land. What would you propose to put on it by reason of these roads having been opened? It is an extraordinary thing. You would have thought that these roads would have improved the value; but we got higher prices at the first than we get now. There was a boom then. The railway was being opened to that place. In 1881 things were very lively, everybody had plenty of money, and that was then we sold most of our land. In fact, generally, land has not brought so much since.
2513. Have you been fully paid for the land you sold? We are selling it in leases.
2514. You still have an interest in it? We get an annual rent out of it.
2515. So that it is desirable to you that things should continue to look lively, so that you may recover your rent? Yes.
2516. Are there many giving up their leases? A certain proportion are always giving up their leases. The working people for the last two or three years, as I suppose you know, have had rather hard times. I suppose 5 per cent. do not pay? When the time is suitable we put up the land again.
2517. Is it your intention to have any more sales soon? We did intend to sell this month; but, seeing the way that other recent sales have gone off, we have abandoned that now. We think it is a bad time.
2518. You have a lease of these lands from Mr. Holt for ninety-nine years? Yes.
2519. Have you the right to work minerals? Yes; all minerals, except gold.
2520. Do you convey the same right to your tenants? No. We have a right to mine under any lands, at a depth of not less than 600 feet, and then we have to compensate them for any damage done. We have sublet the right to mine for coal to a syndicate.
2521. What royalty have they to pay you? We pay Mr. Holt 6d. a ton for large coal, and 3d. for small, and the syndicate—it is a limited liability company now—pay us 9d. and 4½d. There is supposed to be iron ore there, and if they get iron ore, or any other minerals except gold, it is the same.
2522. Have this syndicate to whom you have let the mining-right any intention of commencing work soon? They will if they can get capital. I am interested in that myself.
2523. I suppose the making of these roads will help them to get the money? I doubt that, because they would want a railway.
2524. The railway to Kurnell, the proposed site for noxious trades, has been surveyed through your land? Yes.
2525. But there has been no work done on the line of railway? No; except surveying it.
2526. I suppose there was no reason, as far as your company was concerned, why that railway route should not have been cleared—there was no hitch between you and the Government as to the clearing of that route? No; but the survey is not yet finished. Of course I do not know whether they would place the coal-mine near the route, or the route of this railway as it is surveyed now. It is not near where they have found the coal. The coal syndicate was formed to discover whether coal was there. Three bores were put down; one was put down by the coal syndicate, at a depth of 2,300 feet, and they found two seams of coal, and Dr. Robertson, who reported on it, speaks very favourably of it.
2527. That bore was put down before the formation of your present company? No; not this one where they found the coal. There were two bores before our company was formed, that Mr. Wentworth and Mr. Coghlan put down, but they did not find the coal. This last one, Mr. Fletcher, Mr. McCulloch, and Mr. Coghlan put down, and they were successful.
2528. Has the cost of that come out of your capital? No; that is a separate fund, nothing whatever to do with us. If they find coal they pay us 9d. a ton, and we pay Mr. Holt 6d. a ton, so that we make 3d. a ton out of it. You spoke of the noxious trades railway serving them, but that railway, as surveyed, is a mile from the bore where the coal was found. Of course I do not know where they would place the mine.
2529. *Mr. Carruthers.*] Did you give the names of the members of the coal syndicate;—are there any Members of Parliament amongst them? You want to know who they are.
2530. Yes; who are they? There are Mr. Fletcher, Mr. Dibbs, and Mr. McCulloch in it. The lease was granted to Messrs. McCulloch, Fletcher, and Coghlan, and they have assigned it to the syndicate.

Mr.
J. Murphy.
1 May, 1899.

2531. With regard to the men you have had at work yourself, how long have you had them there? Seven years.
2532. Are they still at work? Yes.
2533. You have been pretty well acquainted with all the work that has been done in that neighbourhood, I presume? Yes.
2534. What roads have your men cleared—what work have they done on the roads? Our men started on nearly every road there is there. They had made a track of some sort.
2535. So that it is not safe for the Committee to assume that all the work we see there on inspection has been done by the unemployed? I do not think more than half the clearing was done by the unemployed.
2536. *Chairman.*] What roads do you say were done by your men? We have done the Malvern Road as far as the old farm. In fact, it was not made by us. It was really a road before we came there. The whole length of Malvern Road was really a road before we took possession of the estate.
2537. *Mr. Carruthers.*] Did any of the neighbouring settlers contribute to the cost of that work? Yes. There was a trouble about this road, which I will explain. We had a tenant to whom we let the grass right, and he closed this road, because it ran through a useful paddock to him. The neighbours chopped down his fences, and he came to us to protect him. We sought to do so, and we were then met with a memorial of the neighbours, saying that this had been a road for forty years, and was a road by right of user. After this we improved it, and recognized it as a road, and our tenant threw the lease up, and we have since had trouble with another tenant, who threw the lease up because we would not stand up and say that this was not a road. These people not only came to us with a memorial, but they addressed the Minister for Lands. I saw the petition, and I saw it was no use resisting, so we threw the road open. The whole length of this road had been made before the unemployed came there, and we improved it.
2538. *Mr. Copeland.*] Was the Malvern Road cleared to its present width? No; to only a chain, I think. We picked the best road we could get out of a width of 2 chains.
2539. Now it is cleared 2 chains wide? Yes; part of it is, and part of it is cleared to only 80 feet. Of course a large area of it was a farm, and was always cleared.
2540. *Mr. Carruthers.*] You did the bulk of the work? Supposing it to have been in its original state, more work would have been done to it before the unemployed came to the land than they have since done.
2541. *Mr. Copeland.*] Had you gravelled or metalled the road in any way? No, not that road. The only improvement we made was, that we put in some culverts, not so good as those which were afterwards put in.
2542. The new culverts you speak of have been put in by the Casual Labour Board? Yes.
2543. They have also gravelled that road? Yes.
2544. The whole length? No; only for a part at each end.
2545. *Mr. Carruthers.*] It is a main approach to the railway-station for the settlers of Port Hacking? Yes; and not only that, but it is used by people going eastward to Coronulla Beach and Kurnell. That road is the main outlet from Sutherland to the eastward.
2546. Did you do any work on the road to Yowie Bay? We made the road, and formed it, and left it a better road for driving on than it is now. I do not mean to say that the unemployed have done no valuable work on it, but they have broken up and disturbed the natural surface. It is not so hard as it was.
2547. *Mr. Copeland.*] How do you think the unemployed have made the road worse? They have formed it. They have dug up the sides on the road to make the water-tables, and they have thrown the earth into the centre. This has made the road soft and loose, whereas, before it was touched, the natural surface was hard, and you could drive on it better.
2548. Have they drained it or culverted it? No culverts are wanted.
2549. *Mr. Carruthers.*] Is there any bridge work upon the road? No.
2550. Are you acquainted with the work which had been done on the main Port Hacking Road before the unemployed came? Yes.
2551. What work had been done? The road had been made from the Illawarra Road.
2552. What do you mean by made? It was cleared and formed by subscription. Trustees were appointed for the purpose.
2553. Was any of it gravelled? Yes.
2554. In fact, it was almost as it is now? The greater part of it. It was made right down nearly to Simpson's Point. It was made certainly 5 miles in length before the unemployed came there at all.
2555. Are you aware that £200 was subscribed for the work by the people? Yes; and I know that we spent some money there besides.
2556. Was there not a vote from the Government to trustees? Yes. That money was also spent upon it.
2557. Was not the greater part of the work done upon the road by trustees with private subscription and with the usual road grants? The unemployed came and cleared the road a little wider I think. It was only cleared about half a chain or 50 feet, and we gave them 99 feet. That was another case in which a road was demanded. It was pointed out that a right of user had been established. We had subdivided the land down to a certain point, and for a certain distance; we could give them only a chain. Where we had not sold we gave them $1\frac{1}{2}$ chains. That was from Gawley Creek out to Port Hacking. I do not mean to say that the unemployed have done no good work on the road. They have improved it to a great extent.
2558. You had cleared the road before? Yes; but it was not so wide a road before.
2559. Have they done any gravelling? Yes; they gravelled it. A portion of it was not gravelled at first.

2560. Have they drained the road? Yes? they have put in culverts and a bridge.
2561. Can you say how many culverts? Most of them are small pipe drains, which you will hardly call culverts. There is one bridge over Rover's Hole Creek.
2562. *Mr. Carruthers.*] Did your company give the gravel? Yes; if they wanted any gravel they were free to take it where they chose. We did not say anything about it.
2563. You have to pay a royalty for the gravel? Yes; a royalty of 6d. a ton.
2564. You also pay a royalty on the timber? Yes.
2565. Who has been the prime mover in getting these roads formed on the estate? I myself have been.
2566. Have any of your shareholders, who have been members of Parliament, interfered to your knowledge? I do not think any member of Parliament has ever known anything about it. As far as I am concerned, I can say that I made no request to them.
2567. With whom have your communications been? Mr. John Davies.
2568. How do you communicate with him? I have sent in memorials. I got the members for the district to sign them first. Mr. McCulloch, Mr. Frank Farnell, and Mr. Varney Parkes have all signed them. Then afterwards I would get the best signatures I could. I then took the memorial straight to Mr. Davies, and I generally had a plan with me, and explained what the roads were and where they were to be made to, leaving the matter with him.
2569. In what electorate is this estate? In Central Cumberland.
2570. Where have your communications with Mr. Davies been? At his office.
2571. Have you held any communications with any other persons respecting these roads? No.
2572. Do you know the Wotonga Road? Yes.
2573. Did you take any steps to get that road formed? No; I think Mr. Gannon got it done.
2574. Where does it lead to? To Mr. Gannon's house.
2575. Is that a road going over a steep hill with a very heavy cutting? Yes.
2576. *Mr. Carruthers.*] How many acres are there in your estate in this locality affected by these roads? Nearly all the estate is affected, and there are about 13,000 acres.
2577. *Mr. Copeland.*] You are not including the Government reserves in that estimate? No.
2578. Have you been asked at any time by the people to give roads other than the public roads? Yes.
2579. Have you given roads to suit the public convenience which have been atogonistic to the general design of your estate? Yes, we have; there are several cases in which we should not have given roads but for the result of the disputes which I have mentioned. We would not have allowed the Port Hacking Road to run its present course if we had consulted our own inclinations. We should have taken it a different way.
2580. Which way? We should have cut a lot off its length. We should have straightened it. We should have shortened it by half-a-mile. I ought to mention that Mr. Holt has kept as a private estate out of our lease of 700 acres. The present course of the road gives Mr. Frederick Holt about a mile-and-a-half of frontage; and if we had consulted our own interest, we should have taken both frontages ourselves, but the Port Hacking people wanted the road as you see it.
2581. *Mr. O'Sullivan.*] What population would be served by these roads? It is increasing every day.
2582. Where are they settled? They are spotted all over the place. I daresay there are altogether about fifty families.
2583. Does it take about forty roads to serve fifty families? Most of these roads are Government roads.
2584. You said just now that you had started making most of these roads. I presume that if the Government had not come along with this generous assistance, your syndicate would have gone on with the roads themselves? Some of them we might have made and formed, but many of them we should only have opened.
2585. The fact of your having started making the roads is an evidence that you intended to complete the work—that is to put roads across the estate? I would not say to complete it. We had completed most of the roads as far as we intended to do anything to them at the present time.
2586. Is it not a fact that you had laid out roads, and had commenced them, in accordance with the design of your subdivision? Ultimately these roads would have been made by some means I have no doubt.
2587. How much land have you rented? About 1,500 acres.
2588. That leaves 11,500 acres still to be disposed of? If you make allowance for Mr. Holt's private estate, we had only 12,200 acres originally. I suppose there are about 10,000 acres of the land, speaking roughly, left.
2589. Upon these 10,000 acres, which are undisposed of, these roads have been made? No.
2590. But the larger portion of them have? Perhaps.
2591. What is the object of taking Coronulla Road to the beach—where is the population? This has been a great road for picnics for many years. It was a track before this road was made. It was used by fishermen and shell-getters largely. Besides there was the Government reserve of 300 acres close by.
2592. There is no fixed population there? No.
2593. If you were to describe it as a road to anywhere you would probably say to California? I do not think you can say that. Coronulla beach is a favourite fishing, camping, and picnicking ground.
2594. *Mr. Copeland.*] Are there any roads on Government reserves? No; but roads are surveyed through them.
2595. The improvements seem to stop short when you approach a Government reserve?
We

Mr.
J. Murphy.
1 May, 1889.

Mr.
J. Murphy.
1 May, 1889.

We designed a road through one reserve. Our surveyor has marked a road 2 chains wide to the end of the reserve.

2596. Has the road ever been cleared? No.

2597. What length is it? About $1\frac{1}{2}$ miles.

2598. There has been no clearing on that reserve? No.

2599. You say that the fishermen use Coronulla Beach—what is the width of the road? Eighty feet.

2600. Was it necessary for the fishermen and shell-getters to have a road 80 feet wide? No; but while we were having a road made we thought we might as well have a wide one. It would suit picnickers and pleasure-seekers driving vehicles to the beach.

2601. Especially when you get the road at no expense to yourself? Well, to some extent.

2602. *Mr. Carruthers.*] Is there any great traffic on it? I do not know whether you could say that there was any great traffic, but there are sometimes about twenty vehicles down on Saturdays and Sundays, and the number is increasing all the time.

2603. You spoke some time ago of a general design in cutting up the estate;—have you a general design? No.

2604. *Mr. Copeland.*] Have you not had the ground surveyed? A portion of it. I think in every case I have suggested what roads we should have.

2605. These suggestions have always been adopted? Yes, generally.

2606. *Mr. Carruthers.*] How many of the roads are cleared and formed and gravelled? Three.

2607. *Mr. Copeland.*] Is that for the whole length? No; for instance, the Main Illawarra Road is now only being made, and the Port Hacking Road and the Coronulla Road are not yet finished.

2608. Take the Malvern Road, Port Hacking Road, and the Coronulla Road—did they form part of any plan of subdivision, or are they old public tracks? They are old tracks.

2609. Have you followed them? As nearly as possible.

2610. Are not there men working on the roads now finishing them? There are some men at work on the Coronulla Road and some on the Port Hacking Road; but those engaged on the Port Hacking Road do not form part of the unemployed.

2611. *Mr. Carruthers.*] How many coaches are there running on the Port Hacking Road? I know there is a coach each way every day, and I believe there are two on Saturday and Sunday. There is a mail as well.

2612. Where does that run to? From Kogarah to Tom Ugly's Point, and from the point to Port Hacking, down as far as Simpson's Crossing.

2613. Do you know whether the tender for the carriage of the mail specifies that that road shall be used? I know that it does.

2614. *Chairman.*] Were all the roads running north and south, from water to water, made at your suggestion? Yes; all except one, I think. I believe the trustees of the National Park wished us to give the land for a shorter road to Sydney. The tramway runs to Sans Souci, and we were asked to set apart land for a road which would save 3 miles between Sydney and the Park. Mr. Holt joined us in fencing off this road; it is known as the Commous Point Road.

2615. Starting from the beach at Coronulla, there are seven roads running north and south? Yes.

2616. And those were all made at your suggestion? Yes; but they are old Government roads, shown on the map.

2617. *Mr. O'Sullivan.*] Were the persons who signed the memorials always the same? No; sometimes the same person had to sign two of them. In each case I got the names of the members.

2618. *Chairman.*] You took the memorials round? Yes.

2619. *Mr. O'Sullivan.*] What I want to get at is this: Would the persons living near Gunnamatta Bay sign for roads as far away as Gymea Bay? Well, I got any signatures which I thought would help.

2620. *Chairman.* The fact is that whenever you thought a signature would be of help to you you took it? Yes.

2621. *Mr. O'Sullivan.*] Whenever you wanted a new road I suppose you scouted round to get signatures? No; I got as many roads as I thought the people would sign for. Sometimes a man might not care to sign for a road some distance away; in such cases as those I should of course have to get others to sign.

2622. Then, to save yourself frequent journeys, you got as many as five or six roads signed for at one time? Yes.

2623. Are there any unemployed on the Noxious Trades Site now? No; the railway survey is not finished yet.

2624. But there were some? Yes.

2625. What do you think of the character of their work there? I should not like to make myself a judge of the quality of the work. It was done a long time ago.

2626. *Chairman.*] Did you get any of these roads without petition, and simply by interview with Mr. Davies? No.

2627. In every instance you had papers? Yes; I do not think I ever spoke to Mr. Davies privately in my life.

End of Evidence before Select Committee.

12184. *President, resuming.*] Was that evidence sent you for revision? Yes.

12185. Having now heard it read over, do you wish to make any explanation or correction? The corrections would be so trifling it would be hardly worth while.

12186. Is it correct and true in every particular? Well, I think so. But perhaps I may as well call attention to one or two small things. I do not wish to be bound down to every point, when it may be necessary to explain afterwards. With regard to the value of the shares, I say here £25. I do not mean

that

Mr.
J. Murphy.
1 May, 1889.

that this is the market value, but the stock value. They are valued at that in our stock. If you wanted to sell that would not be the value in the market, but for the purpose of our capital that is what they are valued at. Again, speaking of Sir Henry Parkes' shares, I say I do not think they were his property during the last four years. I am not sure about the number of years; it may be two. I would not bind myself to the number of years. Then there is another question. I am asked, "Have you held any communication with any other persons respecting these roads?" I suppose that meant Members of Parliament and people of that kind. I said "no," but, in order to be particular, I may say that I used to go out on the estate, and do now, and I would communicate with the superintendent, and point out anything to him. He invited me to point out anything that I thought wanted attending to, and I spoke to or wrote to him when I thought necessary.

12187. Can I take it, with these exceptions, that your evidence before the Select Committee is true and correct? Yes, I think so.

12188. Do you produce to day the share-register of the Holt-Sutherland Estate Land Company? Yes.

12189. Will you refer to the list of shareholders which appears as an appendix to your evidence before the Select Committee, and tell me from what book you compiled that list. Was it from the share-register book you produce to day? Yes.

12190. Has there been any change since 12 December, 1888, which is the date of the list? I would have to go through the whole book to see that.

12191. Have there been many? Not many, but I should have to turn to every name and see the date of it. We keep no separate record—nothing excepting the record itself. There have been very few transfers lately, because everything connected with land is nearly unsaleable.

12192. Is that book the share-register you are obliged to keep under the Companies Act? Yes.

12193. Then it shows the shareholders' names, with dealings? Yes. Here is an alteration on December 20th. Finlay sold some shares to Skarratt; his name was not on the list before. Here is another alteration. Ferguson sold some shares to R. J. Hogg.

12194. He was a shareholder before? Perhaps so. Coleman sells to Skarratt, A. W. Cooper sells to Hogg, C. T. Geddes sells to Skarratt. These are the only alterations.

12195. Does that book enable you to tell me when Sir Henry Parkes became a shareholder? Yes; it will show what shares were transferred to him, but sometimes a man will keep shares a year in his box before he sends them in to be entered. The book will show when we had notice of it. It was in January, 1882.

12196. How many shares? Ten.

12197. How were they acquired? From J. H. Want.

12198. What is the next entry in the book as affecting these shares? Sold to Mr. Jamieson, July, 1885, the same shares he had.

12199. What is the next entry? The next entry is a transfer from Jamieson back to Parkes.

12200. What is the next? On July 3, 1886, an allotment of new shares.

12201. What is the next entry? The next is July 6, 1887, another allotment—a new issue of shares.

12202. The next? July 13. It shows a sale to J. S. Jamieson of four shares.

12203. The next? The next is a transfer of ten shares to Johnson, Want, Simpson, and Minter. If you want to know, I can explain that I had something to do with the transfer of the shares. When we issued the new shares Sir Henry Parkes did not want to take them up. We were issuing one share for a certain number of old ones. I suggested to Mr. Jamieson that where there were less than the required number of old shares, or where the number was broken, it would be a good thing to get some one to transfer a certain number to make him entitled to a certain number of the new shares. Supposing the number was one new share to six or seven old ones, a man might only get one new one. If he held twenty shares he could get three. Sir Henry Parkes had these ten shares. Mr. Jamieson said that Sir Henry Parkes would not take up the new ones. I said to Mr. Jamieson, "Why do not you take them up." This course was adopted. When the allotment was over Mr. Jamieson transferred them back again to Sir Henry Parkes. They were borrowed from Sir Henry Parkes for that purpose.

12204. Is that entry in the share-register in your handwriting? No.

12205. Where would the particulars be obtained from? From the back of the scrip itself.

12206. Have you any doubt as to the correctness of this book? No. [*Copy of page 18 from the share-register of the Holt-Sutherland Estate Land Company put in and marked S.*]

12207. On this list which appears as an appendix to your Select Committee evidence, I see the names of Johnson, Want, Simpson, and Minter for eleven shares;—are these the shares referred to on page 18 of your register? Yes.

12208. How is it it comes to be eleven shares? That eleven is a mistake evidently. It should be ten.

12209. Do you see the name of R. A. Winter on the list;—is that meant for Minter? Yes.

12210. The gentleman who is a partner in Want, Johnson, & Co.'s? Yes.

12211. Was this arrangement by which Mr. Jamieson got the benefit of the new issue of shares, that Sir Henry Parkes was entitled to, done on some suggestion of yours? Yes, I think so. It was done generally. When I found a shareholder I was at all friendly with likely to lose a portion of the shares of the new issue, I suggested he could make up the number of shares required by borrowing from his friends. In some instances these were paid for. A man would lend the shares. Mr. Jamieson told me he paid Sir Henry Parkes for the loan of the shares, as he would forego his own new number.

12212. He said he paid him for the loan? Yes; he said he gave him some consideration.

12213. Was not what Sir Henry Parkes did brought to the knowledge of the company? I suppose it was.

12214. Have you the minute-books of your company here? Yes; there was some misunderstanding about it between Want and Johnson and Sir Henry Parkes. They considered that Mr. Jamieson got these shares from them—I do not know whether to say improperly or not; but they thought it a smart thing to do. Mr. Jamieson got them from them, and presented them, and so entitled himself to the new shares. He got an advantage which Want and Johnson thought they should have had. Both sides mentioned the matter to me, and this enabled me to know how things stood.

12215. Do you know whether Mr. Jamieson went to see Mr. Want about it? I think Want and Johnson went to him. Mr. Jamieson told me they had been to him.

12216. I see that the taking up of this new issue occurred on the 13th July, 1888. Will there be any notice of that in your minute-book? No.

Mr.
J. Murphy.
1 May, 1889.

12217. On that date according to this share register Sir Henry Parkes would be entitled to fourteen shares in the Company. Can you tell me how it was that four of the shares were put into Mr. Jamieson's name without Sir Henry Parkes transferring them? It was not done without his transferring them, because we must have had his authority for it. If the shares were in his name they could not pass out without his signature.

12218. Then the probability is that you have a transfer from Sir Henry Parkes to Mr. Jamieson on or about the 13th July, 1888, of four shares and a transfer to Johnson, Want, Simpson, and Minter of ten shares? Yes. Mr. Jamieson got the new shares which Sir Henry Parkes would have got had he taken them up.

12219. Did you mention to Mr. Burrowes that Sir Henry Parkes was a shareholder in the Holt-Sutherland Estate Company? No.

12220. Do you know whether he was aware of it? I think he thought that Sir Henry Parkes was.

12221. From anything he told you? From remarks he dropped. I think I told him he was not.

12222. Do you know Mr. John Davies? Yes.

12223. Intimately? My acquaintance with him is entirely in connection with this work.

12224. Did you ever mention to him that Sir Henry Parkes was a shareholder? No.

12225. Do you know, from anything he said to you, that he was aware of it? I never had that sort of conversation with him. My connection with him was of the most dry and official character. I only went to him when I wanted something done by his department, and I was not friendly enough with him to talk about anything else.

12226. Did you ever see Sir Henry Parkes about these memorials? No.

12227. Were you ever in the upper part of this building in connection with memorials or petitions? In connection with something arising out of them. One of these roads was stopped. I found that the road had been taken off. I went and got Mr. M'Culloch, Mr. Varney Parkes, and, I think, Mr. Jamieson, and we came to see Mr. Critchett Walker about the matter.

12228. Did you ever meet Sir Henry Parkes at any other place, at the estate or elsewhere? No.

12229. Or Mr. Walker? No.

12230. Who then helped you through with these memorials? The Members for the district.

12231. Who? Mr. Varney Parkes at one time. Since then Mr. M'Culloch, Mr. Nobbs, and Mr. F. Farnell.

12232. Has Mr. Varney Parkes any interest in the Company? No.

12233. Has he ever had? No.

12234. What M'Culloch is this? Mr. A. H. M'Culloch, who was Member for the district.

12235. Did he have any interest in the Company? No.

12236. Mr. F. Farnell? He never had any interest.

12237. Mr. Nobbs? He never did.

12238. Mr. Carruthers? He had none.

12239. Has he any interest in any land out there? I do not know whether he has now. I understood he was interested in a piece of land on the other side of Port Hacking.

12240. Do you know of any other land of his? Not in that part of the country. I think he has sold his land to a Company. Whether he is interested in the Company I do not know.

12241. Look at these five memorials, dated 7th July, 1887; 19th August, 1887; two, 22nd September, 1887, and 10th May, 1888;—do you recognize the handwriting? I do.

12242. Whose is it? Some are in the handwriting of Mr. Maloney, our clerk, and some in the handwriting of my brother.

12243. I take the petition of 7th July, 1887, first. Is that signed by you? I do not see it.

12244. Will you read out from those, who have signed their names to it, any who are shareholders in your Company? Yes. H. Prince and R. J. Hogg. That is all. [*Memorial put in and marked S. 1.*]

12245. Do you know whose signature this is? Yes; R. Shankland.

12246. Is he a landowner, or a shareholder, or in any way interested in any land out there? I do not think so.

12247. Here are H. B. Jamieson, G. Jamieson, and M. R. Jamieson, who are they? Two sons and a brother of Mr. J. S. Jamieson.

12248. Is W. G. Whiting interested in land out there? I do not think so.

12249. Is C. W. Norris? No; he has no interest.

12250. Is J. E. Shant? I do not think he is.

12251. Is A. S. Bennett? I do not think he is.

12252. How many persons who have signed the memorial do you think are interested in property out there, or in your Company, or like the Jamieson's, have relatives who are interested? With the exception of Prince, Hogg, and Jamieson, and supposing Mr. Carruthers and Mr. Varney Parkes to be interested in the district only as Members; I do not think there are any more.

12253. Who took the memorial round to be signed? I did.

12254. What practice did you adopt in getting these signatures? I got the most influential men first. If I went into an office where there was a gentlemen interested or a friend of mine, I would ask him to get as many more as he could.

12255. Then it was just a question of getting a number of signatures? After giving it a little influence by the best names, like those of the Members.

12256. Did you get all these signatures? I think so.

12257. Do you believe them to be all *bonâ fide* signatures? Yes; they are.

12258. Are there any of the unemployed amongst them? Not one.

12259. Now the next I show you is a memorial, dated 19th August, 1887, [*Exhibit I. 26*], will you look through that and tell me the names of the gentlemen who were on that date, or have since become shareholders in the Company, or interested in property out there? Yes. J. S. Jamieson, J. H. Carruthers, G. F. Want—although Mr. Want's name does not appear on our register he has shares—J. Newton, J. Davison, Myles M'Rae, E. Reading, F. J. Jackson, S. A. Want, H. Pinder, H. Prince, my own name—J. Murphy, J. F. Murphy, my brother, J. Roberts, A. W. Cooper, and Mr. Wheatley lives in the district.

12260. With these exceptions, who are the rest of the people who have signed? They are friends of mine.

12261. Can I take it that this memorial was got up and signed on the same system as the others? Yes.

12262.

Mr. J.
Murphy.

1 May, 1889.

12262. I put into your hands a memorial dated 22nd September, 1887 [*Exhibit R 2*];—will you tell me the names of any persons who signed that who were, on that date, or have since become, shareholders, or interested in shares or land out there? Myles M'Rae, J. S. Jamieson, J. Davison, S. A. Want, and J. Murphy—that is myself.
12263. Who is E. S. Daniell? He is either a clerk in Scott and Henderson's, or else in Want and Johnson's; J. H. Potter is a clerk in Want and Johnson's, and so is W. T. Davey. M. Moriarty was a clerk and solicitor in Want and Johnson's office at the time.
12264. Who is H. Salwey? He was a solicitor, a member of the firm of Fisher, Ralph, and Salwey.
12265. Who is H. Geddes? He is in Want and Johnson's office.
12266. Who is O. H. Dalton? He is at Scott and Henderson's, and C. J. Joseph is at Montefiore and Joseph's.
12267. Who is D. Bucknell? He is at Want and Johnson's.
12268. Then with the exception of three or four names that memorial is entirely signed by shareholders in the Holt-Sutherland Estate Company, clerks in Want and Johnson's, Scott and Henderson's, or Montefiore and Joseph's offices? Yes.
12269. The next memorial has the same date upon it [*Exhibit R 3*];—will you glance through that and give me the names of persons who signed it, who were on that day, or have since become, shareholders or interested in your Company or in property out there? John Higgeson, John Davison, Mylos M'Rae, S. A. Want—I am the J. Murphy,—F. J. Jackson, A. W. Cooper, and J. Roberts.
12270. Well, I see on this memorial, following S. A. Want's signature, the names of E. S. Daniell, J. H. Potter, W. Davey, and M. Moriarty;—who are these gentlemen? They are the same gentlemen I told you of before.
12271. All clerks in offices? Yes.
12272. Geddes, Bucknell, and Dalton, are they also clerks? Yes.
12273. With a few exceptions then the memorial is signed by shareholders in your Company and clerks in Want and Johnson's, and other offices? No, I should not say with a few exceptions, because they are the minority.
12274. Tell me some of the names of gentlemen signing who are neither clerks, members of Parliament, or shareholders in your Company? There is M. Maloney, who is a clerk in our office, E. M'Kenny, manager of the Colonial Mutual Fire Office, W. W. Russell, Jones, a clerk in the Victorian Insurance Company, O. S. Pedley, J. A. Armstrong, and B. W. Campbell (in Scott and Henderson's).
12275. The next memorial is dated 10th May, 1888 [*Exhibit R 4*]. Will you tell me in the same way as with the others, the names of shareholders or persons then interested or who afterwards became so in your company or any land there? F. J. Jackson, S. A. Want, J. Davison, E. Reading, R. J. Hogg, J. E. Gowing, J. M'Carty (the coachbuilder), R. Adrain (the land agent), A. M. Steer (in Prince, Ogg, & Co.'s), J. P. Davey and Bullock (in Gowing's shop), and Thos. Hynard.
12276. Did you have anything to do with any other memorials or petitions that you can recollect? I do not think so.
12277. Where did you live? At Moore Park.
12278. I think you said you were in the habit of going out to Holt-Sutherland? Yes.
12279. Did you ever see Mr. Davies out there? Only once.
12280. Did you ever go to the office of the Casual Labour Board? Yes.
12281. How often? I went with each of these memorials.
12282. Not oftener? I do not think so.
12283. Did you take any steps after having helped to initiate the work to urge it on? No, I do not think so.
12284. Did you ever give any directions to the men on the works? I may have suggested things to them. I never gave any directions. When I have met Mr. Burrowes I have pointed out little things to him that I noticed that ought to be remedied. He invited me, if I ever saw anything of that kind, not only to mention it to him but also to the officers, as it would be more easily remedied. I might see a man leaving the stumps in, merely cutting the trees off level with the ground, and when they were gravelling they would put on stuff not fit to be put on. I would call the attention of the overseers to it and tell them that Mr. Burrowes had asked me to look after it. I would suggest "There is some stuff up there; you should go up and have a look at it."
12285. Did you ever see Mr. Davies as to the way the work was being carried out? I saw him latterly, I think.
12286. Did you ever communicate in writing with Mr. Davies? No.
12287. Or with anyone else? With Mr. Burrowes I did. If I saw anything that I thought was going wrong I would write a note and call attention to it.
12288. Will you run your eye over this parcel of letters [*Exhibits I 4 to I 25*] and see whether you recognize them? They seem all to be in my handwriting.
12289. Do you identify all of them? Yes.
12290. Was this correspondence carried on between you and Mr. Burrowes with Mr. Davies' knowledge? I do not think so. Mr. Davies did not know it from me.
12291. Will you look at these letters, twenty-two in number, and tell me whether you recognize them? Yes, these are all mine.
12292. Do you know whether Mr. Davies was aware of that correspondence? I do not think he was. As far as I was concerned he did not know anything about it.
12293. Do you recollect any occasion on which Mr. Burrowes complained to Mr. Davies of your interference? Yes; but he did not complain of my interfering with him. I do not know what he complained of. Mr. Davies spoke to me and asked me not to speak to Mr. Burrowes at all, but that if I had any complaint to make, or felt it my duty to say anything in connection with the office, I would say it to him direct.
12294. I will read you this letter marked "Private" [*Exhibit I 22. The President read the letter.*] Can you give me the date of that letter? I do not know that I can.
12295. Had you any particular reason for marking it "private"? I do not think so. I think you will see others marked "private" also.
12296. Here is another letter [*Exhibit I 19*], dated 8th September, 1888? I may say that, as far as my communications with Mr. Burrowes were concerned, he being the head of the Department, I looked upon the whole thing as private.

Mr.
J. Murphy.
1 May, 1889.

12297. [*The President read the letter.*] Can you tell me whether, after that, you ceased to communicate with Mr. Burrowes in reference to the work? No; I did not make any more communications. I dropped it. I wrote that letter because I wanted Mr. Burrowes to know that I would not bother him, and because I did not think he treated me properly. He had professed to be friendly with me, and only a day or two before this had pressed me to point out anything I thought was wrong. I wrote that letter for two reasons:—First, I thought if he could read between the lines he would see that I was hurt; and next, I did not want to bother him any more, and I gave him a good reason for it. The occasion of my writing that letter, and of Mr. Davies speaking to me, was this: He had a man there who used to drink. I called his attention to one particular man who was lying there on the roadside and might have got run over. On this day that man was very drunk, and I told him I would report it to Mr. Burrowes. He did not like my saying that. I do not think Mr. Burrowes thought that Mr. Davies would tell me. I disliked it because I thought it insincere on the part of Mr. Burrowes, and I wrote to him to show that I had found out what he would not think I should find out. I was always complaining about the men putting mud on the road. It was butter in the winter, and flour in the summer.
12298. Were the unemployed out there working on behalf of your Company? How do you mean?
12299. Were they working for your Company;—did your Company engage to pay them? Did we engage the unemployed?
12300. Were the unemployed working on behalf of your Company—under any engagement from your Company? No.
12301. Do you consider yourself or your Company liable in any way for their work? No.
12302. I want to confine you to your communications with Mr. Burrowes;—I am puzzled at the interest you took in the work? Why at the interest I took in the work?
12303. Here is a letter dated 8th September, 1888 [*Exhibit I 22; letter read*];—can you say whether that reference is to Mr. Burrowes being called as a witness before the Select Committee of the Legislative Assembly? I wrote that for this reason. From a conversation I had with Mr. Burrowes he asked me some questions, from which I judged that he did not know as much as I thought he knew; he did not know what work had been done, and seemed to be under the impression that the whole of the work on the estate had been done by the unemployed.
12304. So you thought it a fair thing to instruct him? At that time I knew what Mr. Burrowes was, and I thought he might as well have some guide to the truth, not only as to his actual knowledge, but as to what he would say. If I was asked if I knew the area and those particulars, I might as well let him know what I was going to say; and if he contradicted me —
12305. It would appear from these letters as though Mr. Davies knew you were in communication with Mr. Burrowes? I do not think so.
12306. Do you know a man named Napier? Yes.
12307. What was he? An overseer.
12308. Do you identify this letter [*Exhibit I 25*] as the one sent by you to Napier? Yes.
12309. [*The President read the letter.*] Now, can you say whether Mr. Napier was in the employ of the Holt-Sutherland Estate Company? No.
12310. Had he anything to do with them? No.
12311. Was he in your service? No.
12312. Who is Mr. Buller? Another overseer.
12313. Had he anything to do with the Company? No.
12314. Was he in your employ? No.
12315. Here is a letter [*Exhibit I 24*] amongst the number;—do you identify that as written by you to Mr. Buller? Yes.
12316. [*The President read the letter.*] Who was it gave instructions that the Malvern Road should be 99 feet wide? I did. Instead of being a chain wide, we gave half-a-chain more, and made it a decent width.
12317. Was the authority of Mr. Davies, the Chairman, got for that work? I do not know.
12318. Do you know what happened after you wrote that letter to Mr. Buller. Do you know whether Mr. Burrowes became aware of it? Mr. Burrowes knew, because he asked me to speak to the men and not to wait to speak to him. These roads were running through our land. Whilst they were making the road, I did not want one made of mud, and the men were paid as good a price for making a bad road as a good one.
12319. Here is another letter [*Exhibit I 20. Letter read*]. Do you know whether horses and carts were used out there in large numbers? Yes they were.
12320. Did they belong to the unemployed or to outside people? They belonged to all sorts of people. The owners of the horses and carts were not considered to be amongst the unemployed. The poor men, the unemployed, could not be considered to own horses and carts.
12321. Here is another letter [*Exhibit I 18*]. Did you consider you had power to make this alteration with regard to the roads? I do not know whether you know anything of the character of these men. The road at Yowie Bay was a straight road; but Mr. Napier, in the distance of a mile, had four dog-leg turns in it. We got our surveyor to go and straighten it. Mr. Burrowes knew this road was to be straight, but let these men go on with the work on this crooked road.
12322. Who was the surveyor? Mr. Curtis. I think he is at Orange now.
12323. Here is another letter [*Exhibit I 17. Letter read*]. Who are “we”?—“We are anxious to have this done”? Generally I was speaking of the Company.
12324. Then the “we,” was really “I”? Yes.
12325. You, for the purpose of that letter made yourself plural? It was just a chance. In a letter you might say “we.” In writing as a Manager of a Company you say “we”.
12326. Was that expression the outcome of your own individual anxiety or of any formal minute of the Company? At the time they knew nothing about it.
12327. You say here, you “were anxious to have it done at once as promised by Mr. Davies”; that shows that Mr. Davies knew about it? What is the date of that.
12328. Had Mr. Davies promised you? How long is it after the petition.
12329. Two months after the last. The last is dated May, 1888? I was going to say that I thought I had gone to Mr. Davies on two or three occasions. When we found that this work had been authorised, and seemed to be of more importance than the other roads, the road being more travelled over.

Mr.
J. Murphy.
1 May, 1883.

over than any other, and when we found that it was being neglected, I went to Mr. Davies and pointed out to him that this work should be gone on with. It might be that on one of these occasions Mr. Davies might say, "Very well, it is authorised, I will push it on". But Mr. Davies said that he would stir up Mr. Burrowes about it, and I was in his hands as he was superintendent. I suppose that letter referred to something of the kind. Of course Mr. Davies was aware of this work.

12330. Then going back there is a letter of January, 1888, [*Exhibit, I 4. Letter read.*] Who is Mr. Dalgeish? He lives at North Shore.

12331. Is this some private work? No, it is a road—the Sylvania Road. He intended they should form the water tables on that side of the road.

12332. I need not go further into these letters. They speak for themselves. I would like to know whether you had many more conversations with Mr. Davies on the subject of these roads? Not many.

12333. How many do you think? I think half a dozen; perhaps not that many.

12334. Did you see Mr. Davies about the matter before the memorials were signed? No.

12335. Who suggested you should get up these memorials? I think now that I did go to see Mr. Davies. When I found that these thousands of men were on our boundary I thought of the original promise to get a road made. I went to see Mr. Davies, and asked him could he not find something better for these men to do than to knock down the Christmas bush in the park. I said, "You can make the Illawarra Road, one of the oldest roads in the Colony." He said, "Can you get me authority. If you can show me anything more useful than what the men are doing now I should be glad to do it. I am ashamed of what the men are doing now." So I then went and got up the petition.

12336. Were all these memorials got up in the same way following on that? Yes; when I found we had authority for the one road, I got up the others.

12337. You got the Colonial Secretary's authority? Mr. Davies said, "If you can get me a letter or anything I can get sanctioned I will recommend it. I have no doubt they will do it." He said, "Is it a Government road?" I said, "It is the only way to Wollongong."

12338. Then may I take it that these memorials were really the outcome of Mr. Davies' suggestion as to getting proper authority? I could not say so with regard to all the cases; but with regard to the first one. The first was the Illawarra Road. I saw thousands of men there, and I thought it a good thing to put them on that road.

12339. Did you do that solely in your interest as a citizen? I do not say that. I do not say that if we did not own any land there I would have done it.

12340. Referring to the time that the work was stopped;—what action did you take? I was out on the ground; Mr. Buller told me the work was stopped. I went and saw Mr. McCulloch, Mr. Varney Parkes, and I think Mr. Jamieson. We came up to Mr. Critchett Walker and asked him why the work was stopped, and all that sort of thing. He said he had been told that it was a private road, and that he would not go on with it until he knew whether it was or not.

12341. Here is a letter dated 29th September, 1887;—is that your hand-writing? Yes. [*Letter put in and marked S 2.*]

12342. Is that letter correct;—does it represent what Mr. Walker told you? I think so.

12343. Does that refer to what you were speaking of before? No. I think they took the men off another road as well, and Mr. Walker said it was an error to take them off the second road. The men were taken off both roads, and Mr. Walker said they should only have been taken off one.

12344. Here is a memorandum of the 12th January, 1888, purporting to be signed by you, and addressed to Mr. Burrowes. Is that in your handwriting? Yes. [*The President read the memorandum.*]

12345. Does this letter refer to the road the work was stopped on? No. [*Memorandum put in and marked S 3.*]

12346. Then here is another letter dated 21st September, 1887. Is that signed by you? Yes. [*Letter put in and marked S 4.*]

12347. [*The President read the letter.*] Was the alteration spoken of in this letter made? I do not recollect now. They cleared one part a chain and a half, and the other part only a chain. I think we had some doubt as to what the width was, and made it one and a half chains.

12348. Here is a letter dated 1st August, 1887. [*Letter read.*] Are the trustees referred to here those for the Illawarra Road? Yes.

12349. Is Mr. Want one? Yes. [*Letter put in and marked S 5.*]

12350. Here is another letter dated 15th August, 1887. [*Letter read.*] Was that work done? I do not know. [*Letter put in and marked S 6.*]

12351. Is there a plan of the subdivision of your property? We have several plans of subdivisions of special portions of it.

12352. Is this plan one of your subdivisions? Yes.

12353. Is this another? Yes.

12354. How many have you got? No more plans connected with this work. We have plans at Como and Sylvania.

12355. Can you let us have them? I can.

12356. How many subdivisions have you got already? Five, but Como and Kurnell do not affect these. [*Plans put in and marked S 7 and S 8.*]

12357. Will you send the Secretary up the other plans? Yes.

12358. Are you aware whether your Company agreed to pay any officer of the Government, or the Casual Labour Board, any portion of the cost of this work? Not to my knowledge.

12359. Do you know Mr. Sanderson? Yes.

12360. Did you ever have any conversation with him about the work? Yes.

12361. As to the question of it being a private estate? No.

12362. As to any of the cost being borne by your Company? No. He was putting the finest garden soil on the road, and I called attention to it, and he got angry.

12363. What was the property advertised for sale by Messrs. Richardson and Wrench? That at Como.

12364. Are there any roads there made by the employed? Not within 2 miles.

12365. How many shares have you in the Company altogether? I cannot tell you all the shares, but I think 109 or 110.

12366. Are you the largest shareholder in the Company? Well, half these shares belong to my brother. As I stand on the register, if they were all mine, I would be the largest.

12367.

Mr.
J. Murphy.
1 May, 1889.

12367. You said in your evidence before the Select Committee that you were interested in that mining syndicate? Yes.
12368. What is the extent of your interest there? I hold nine or ten shares out of 110.
12369. Can you tell me, as briefly as possible, how much of that Malvern Road was done when the unemployed went on to it? It was done for the whole length in some places, a chain wide—from half a chain to a chain and a half.
12370. What was done to it? It was cleared; only cleared.
12371. Can you tell me what it cost up to the time that the unemployed took it over? I cannot tell. That clearance extended over forty years. That has been a road for a great number of years.
12372. Did you have refusals on any occasion when you presented these memorials for signature? Some people would not sign them.
12373. Can you mention any names of persons who would not sign? I cannot recollect now.
12374. Any shareholders in the Company? Yes. Mr. Simpson signed for one, and would not sign for the others.
12375. Do you know why he would not? I do not recollect now.
12376. Did he say why? I do not remember.
12377. Was it because the roads asked for in the memorial were not in his opinion public roads? I would not take any notice of his opinion. He does not know the estate more than a baby. I would not take any more notice of Mr. Simpson's opinion than that of a child's, because he would be talking about things he did not understand.
12378. Was there any other person who refused to sign? Sometimes they would say "I will have nothing to do with it," and they would not sign it. But I wish to withdraw that part of my evidence in which I spoke about Mr. Simpson's knowledge of the estate.
12379. It is quite possible to say a man does not know anything more about engineering than a baby, and yet be true? But this, put in this way, might be offensive to Mr. Simpson.
12380. Do you recollect any other shareholders who objected to sign the memorial. Did you ever ask Sir John Robertson? I do not know. I think I did.
12381. Do you know with what result? He would not sign it.
12382. Do you know why? He said that being Chairman of the trustees of the Park it might be said that he was trying to shift the men from the Park to the roads.
12383. Only that? I think so.
12384. Did not he say that he could not give his sanction to spending public money on a private estate, or any words to that effect? He never said that to me.
12385. Did you meet Mr. Davies in connection with Mr. Burrowes. Did all three of you meet together? Yes, on one occasion.
12386. No more than one occasion? No, and then only by accident at the station at Sutherland.
12387. Did you notice whether Mr. Davies and Mr. Burrowes were on friendly terms? They were then. They had been out in a vehicle together.
12388. What led you to believe they were? They were shaking hands and talking about what they had been doing.
12389. What time was that. Can you tell us? Shortly after that letter we were speaking of, in which Mr. Davies had asked me not to speak to, Mr. Burrowes. It was the first time I had seen him after that letter had been written. He said he was sorry, and wanted to shake hands with me. He said that he did not intend when he wrote that Mr. Davies should close me up to the extent he did.
12390. Have you seen Mr. Davies to speak to within the last month or so? Yes.
12391. Where? In the railway.
12392. Did he enter into conversation about these roads at all? No; excepting he said he had been up and was examined, and asked me whether I had been up.
12393. Where to? To the Committee of the Legislative Assembly.
12394. Have you seen him since? Only to acknowledge him in the street.
12395. Do you know when he and Mr. Burrowes first became unfriendly? Mr. Burrowes made me aware of it.
12396. Can you tell me what property Mr. Myles M'Rae has out there? He has property known as part of the Doolan's Estate, on the Port Hacking Road, about 70 acres I think. He had other property, too, 50 acres, but I think he sold that.
12397. Can you show me on the plan approximately where you think Doolan's Estate is? I think so. Part of section 44 on the plan, appendix to Mr. Burrowes' evidence. It is bounded by roads which subdivide our own land, excepting on one side, and that is Gannon's.
12398. Is that property which is at the corner of Port Hacking and (as called on this plan) Wotonga Roads Mr. Myles M'Rae's land? Yes.
12399. What is the name of it? Myrtle Grove.
12400. Does what you call the Wotonga Road bound it on the one side? Yes, on the north side.
12401. Going east do we come to another road turning to the right? That is the Burranncar Road.
12402. Do the Burranncar Road and the Wotonga Road bound Mr. M'Rae's place? No.
12403. Whose is that land at the end of Burranncar Road? That is Gannon's.
12404. Will you tell me what you understand by Gannon's Road? Well, I have never been asked that question before. I would not like to say. I understand these roads, because to me they have names, and I identify them by their names. I call one the Burranncar Road and the other the Wotonga Road.
12405. Then it is quite possible that what you have heard called Gannon's Road is either the Burranncar Road, or the Wotonga Road, or both? Yes.
12406. I show you a letter dated 23rd January, 1888, addressed to Mr. Critchett Walker, requesting him to have a gang of the unemployed put to work to clear and form a road running from the Port Hacking Road to a road at another point which is marked at the top of Gannon's Road. Do you believe this refers to one of the roads called Wotonga Road, or Burranncar Road, or both? Yes.
12407. Which particular roads, by name, pass Mr. M'Rae's place? The Wotonga Road, and the Tureel Road, or the Port Hacking Road.
12408. Then as to the other property you mentioned? If Mr. M'Rae is still the owner the Boulevard Road would pass in front of it.

12409. Would the other roads also benefit him? Of course the main roads would, because he would have to get to his land.

12410. If they improved the Holt-Sutherland property would it improve his property in particular? It is a difficult thing to say how much these roads would improve property if they do not pass in front of it.

12411. Has Mr. M'Rae other property? He has 50 acres on the railway—on each side of the railway between Como and Sutherland. I do not know that these roads would affect that in any way. I think they would not.

12412. What is the nearest road to it? The nearest road is a road called Kurajong Road.

12413. Was that not cleared and formed? Not at all.

12414. Would any other roads affect him? None of the roads we are interested in—none of the roads passing through our estate at all.

12415. I have here a letter concerning the Como Road, signed by Mr. Justice Innes and Mr. M'Rae, in reference to land purchased at a Government sale at Como. Is that land independent of what you have been telling us? Yes.

12416. Would any of the roads that the unemployed have formed, cleared, or constructed, benefit that land in any way? I would not like to say. I think I had better say that I do not know.

12417. *Mr. Waller.*] Who made this road that may be understood as Gannon's Road? The unemployed did.

12418. Do you know that? I saw them working there.

12419. Are they private roads? They are shown as Government roads on the map we have been looking at.

12420. What was the intention of these memorials that have been shown to you? I do not know what you mean.

12421. What were they got up for? I cannot make that any plainer than appears on the face of them.

12421*a*. Was it in order to get the roads made on the Holt-Sutherland Estate? Each memorial is accompanied by a plan which shows exactly the position of the roads we wanted. I do not know that I can make the matter any plainer than it is.

12421*b*. Was it to get the roads made on the Holt-Sutherland Estate? As a matter of fact, there is not a single one of these roads on the estate. They are made on Government land.

12421*c*. Did they make the roads on land adjoining your land? In some cases.

12421*d*. Were these memorials put in to carry weight, to get what was asked for done. Were they intended to be of value? We intended them to be of value. I hoped they would get done what I asked to be done.

12421*e*. You said sometime ago that Mr. Simpson was not personally acquainted with the estate, and therefore could not know of the value, or give an opinion of the value, of the roads made? Yes.

12421*f*. Were these other gentlemen, whose names are signed to these memorials, thoroughly well acquainted with the estate? No, a great many of them were not. I do not think any of them were. They took my word for it.

12421*g*. You remember there was the making of a road stopped? Yes.

12421*h*. Was it commenced again? Yes.

12421*k*. Do you know why it was recommenced? We waited on Mr. Critchett Walker, and asked him why it was stopped. Mr. Walker said that it had been explained to him that it was a private road, and not shown on the map. I explained to him that it had been a road for many years, and in corroboration of what I said I referred to the fact that we shut it up, and that it was resisted by the residents, who got up a petition, that they had passed over it for forty years, and ultimately we again opened it.

12421*l*. Did you see anyone else but Mr. Walker? No, no one else.

THURSDAY, 2 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E.,

T. F. WALLER, Esq., J.P.

The Hon. Joseph Hector Carruthers, M.P., called in, sworn, and examined.

12422. *President.*] I believe you are Minister for Public Instruction? Yes.

12423. Were you a Member of Parliament during the years 1887 and 1888? Yes.

12424. Did you know of the existence of the department called the Casual Labour Board? Yes.

12425. Do you recollect signing a memorial with reference to the Noxious Trade Site in June, 1887? Yes, perfectly well.

12426. Do you know how long previously to the signing of that memorial the Casual Labour Board came into existence? I should say about three months.

12427. Do you know whether the work petitioned for in that memorial was done? It was not done.

12428. Do you know why? I believe it was, because the surveyors had not got their work in a sufficiently advanced state for the work to be commenced.

12429. I think all the other signatures to that memorial are Members of Parliament? Yes; I was a Member at that time.

12430. What constituency did you represent at that time? Canterbury.

12431. Is this place within the electorate of Canterbury? No; it is in the adjoining electorate.

12432. In your opinion as a Member of Parliament, and as a member of the community, was that a useful work to put the unemployed upon? Oh, I think so. If you take it for granted that the Noxious Trades were to be located in that locality, it would be a first-class thing to put that labour on.

12433. If surplus labour were at the disposal of the Government, do you think it would have been about the best thing to put them on? Well, there is no better that I know of.

12434. Will you look at this memorial of 7th July, 1887 [*Exhibit S 1*], is that signed by you? That is my signature there.

12435. Will you glance at this memorial, and say what is asked to be done there? It is asked, that the main Illawarra Road be put in repair.

12436. Have you been out to that part since that work was done? They have not done it; they have only done it partially here and there. The road is in a worse condition than ever it was. 12437.

Mr.
J. Murphy.
1 May, 1889.

Hon. J. H.
Carruthers,
M.P.
2 May, 1889.

- Hon. J. H. Carruthers, M.P.
2 May, 1889.
12437. Was that main Illawarra Road a public road? Yes; it has been a public road ever since I can remember. It has been a public road for years and years past.
12438. Do you know who took you that memorial for signature? I think it was Mr. Murphy who presented it to me.
12439. Will you look at this memorial dated 19th August, 1887 [*Exhibit I 26*], is that signed by you? Yes.
12440. Is that in the same handwriting as the previous memorial I placed in your hands? No; I should say it is in different handwriting.
12441. Can you recollect who brought you that memorial? I think it was Mr. Murphy, and one of the Members for Central Cumberland who had signed it.
12442. Do you notice what is asked to be done in that memorial? The clearing, and stumping, and forming Malvern Road from the Illawarra Road; also, the road known as Sylvania Road, and there is a statement later on that they are public roads.
12443. Are they public roads? The Malvern Road is a public road, and the Sylvania Road is a public road. I remember some time ago when I was acting as trustee for this road, that there was an action threatened against the Holt-Sutherland Estate Company because they disputed it as a road.
12444. Do you know whether any of these have been dedicated to the public? I believe they have, but I could not say from my own knowledge. I believe that Sylvania Road was a public road for forty years, but I may say that the road called Sylvania Road on the map submitted to the Select Committee of the Legislative Assembly was not the road that I took to be the Sylvania Road.
12445. Can you say whether the road spoken of in this memorial as the Sylvania Road is the one you call the Sylvania Road? I do not think it is. What I call the Sylvania Road, is a different road from the road marked Sylvania Road on the maps of the estate.
12446. This Commission has been out visiting this place, and has seen a road marked Sylvania Road, which has no appearance of being a public road, you think there may be some difference between the Sylvania Road that we have seen, and the road that you mean by Sylvania Road? I think it is a different road altogether.
12447. Will you show the Commission on this plan the road that you understand to be the Sylvania Road? The road that I understand to be the Sylvania Road is the road leading from Port Hacking to Sylvania—the Port Hacking Road it seems to be called here.
12448. Then in point of fact, what you understand to be the Sylvania Road is part of what is commonly called the Port Hacking Road? Yes, that is what I understood to be the Sylvania Road that I signed for. I would not have signed for that other road, Mr. Cape. I would not have signed for it under any circumstances.
12449. Do you know whether more was done than was asked for in that memorial? Oh! there is more work done than that.
12450. Much more than is referred to in that memorial; Yes; a great deal.
12451. I see here amongst some printed papers that were laid before the Legislative Assembly on the 14th December, 1888, a letter from you, dated 16th September, 1887? Yes.
12452. Does that refer to the particular road which you have known as the Sylvania Road? It refers to the Port Hacking Road—not the Sylvania Road that is on that map at all.
12453. Will you kindly refresh your memory by reading that letter, and tell me whether the work that you asked for was done? It was partially done; but only partially.
- 12454-5. You understood at the time you signed this memorial that the Sylvania Road was the road which appears to be now known as the Port Hacking Road, leading from Sylvania to Port Hacking? Yes.
12456. About which, I suppose, nobody can have any doubt as to its being a public road? No; it was only proclaimed twelve months before.
12457. Then the road you know as the Sylvania Road, to Port Hacking, is unquestionably a public road? Yes; there is no doubt whatever about it. It has been a public road for forty years. There are bridges twenty-four years old upon it erected by the Government.
12458. Do you believe that is the same road as is referred to in the memorial of 19th August, 1887, and upon which work was done in pursuance of the recommendation and approval there obtained? No; the work was not done on what I have known as the Sylvania or Port Hacking Road until it was pointed out by my letters.
12459. Will you look at a letter that you appear to have written on 9th September, 1887, and the next letter following undated, both addressed to the Chairman of the Casual Labour Board, *re* the Port Hacking Road,—do you know whether that work was done? That is what I call the Sylvania Road, and the work was only partially done. A large part of it is to this day in its primitive nature, and in a very bad state.
12460. I see, according to the evidence given before the Select Committee, it would appear that before the unemployed went there this Port Hacking Road had been made from the Illawarra Road; cleared by subscription; trustees had been appointed for the purpose of administering the expenditure; that the road had been gravelled and, in fact, the greater part of it put in the condition in which it was at the time of the Select Committee; that it had been made nearly to Simpson's Point, nearly 5 miles in length, before the unemployed went there at all. If this was the case, what was the necessity for this particular application in September, 1887, to which I have called attention? In the first place, part of the work was done about fifteen or eighteen years ago. Three bridges were constructed on the road, and a little ballast was put on. Two years ago, subscriptions to the amount of £100 or £200, had been raised by the residents, and the Government added £100. The money was put in the hands of trustees—Mr. Holt, Mr. Simpson, and myself. We gravelled and cleared the road down to the first bridge. We cleared the road from the first to the second bridge; in fact, we cleared the road almost the whole distance to a width only of 18 feet. The second year we got another £100. Over £400 we spent on that road in making it tolerably passable. After having cleared it, we asked the Department of Lands to survey the road with a view to having it proclaimed, and it took the road out of the position, in some instances, where we had cleared it. It had never been accurately located at all. In some cases we found that we were trespassing upon adjoining property; in other cases we were on the road itself. I found that the work we had done was very slight, and we were unable to do what was required, and as we could not get sufficient funds from the Government to do the work, and as we had no funds ourselves, we thought this would be a very useful road to be put down by the surplus labour. The work done was of a primitive character—in forming culverts, water-tables, graveling and ballasting, clearing and stumping, the sum of £400 did not go a long way. 12461.

- 12461-2. Are you speaking of the work that you did, or the unemployed? I am speaking of the work that we did.
12463. Then can I take it that notwithstanding the evidence given before the Select Committee there was strong justification for your request to have this labour put on the road? Yes; very strong. You see the mail coaches run through this road. There are sometimes thirty or forty vehicles a day running on the road.
12464. Will you look at this letter from J. Murphy to the Casual Labour Board apparently following a letter enclosed from you to J. Murphy. Will you tell me how you came to have this communication with Mr. Murphy? Well, Mr. Holt was co-trustee with myself for this road, and this road ran between his private property and the private property of the Holt-Sutherland Estate, and as a trustee of that road it was necessary that I should appeal to Mr. Murphy not to put any obstacle in the way of the survey of this road in a position which would be satisfactory to the people.
12465. Did you know who Mr. Murphy was? I knew he was the Manager of the Holt-Sutherland Estate, and that is why I appealed to him.
12466. Will you look at the next letter dated 11th November, 1887, addressed to the Chairman of the Casual Labour Board asking him to instruct Mr. Burrowes to get some men to work on a particular part of the road? Yes.
12467. Did you know Mr. Burrowes? I only knew him by being referred to him as being the person in charge of the work.
12468. Who referred you? I think it was Mr. Davies.
12469. According to that memorandum at the foot of the letter the work it would seem was authorized by Mr. Davies on his own responsibility? I would not say on his own responsibility. You will understand I had the greatest difficulty in getting them to do this work. They went pottering about a lot of roads that nobody used, and this road that everybody used we could not get done. They put the men to work on roads that were of no use, and seeing them refuse to do this I went worrying them to do it. We had the greatest opposition to getting it granted at all. The people had to threaten an action against the Holt-Sutherland Estate Company to get the road used without hindrance by them.
12470. What I observe is that the approval of the Colonial Secretary does not appear at the foot of that note? No.
12471. Will you turn over the page and see a letter from W. Lovell Davis to the Colonial Secretary, dated 23rd January 1888. Do you know the road mentioned there called Gannon's Road? I was asked to write a letter to get this road done, but as I did not see that it was necessary I refused to write the letter. I refused because I did not see that it was so necessary as the other.
12472. Who asked you? One of the Gannon's. I think it was Mr. Fred. Gannon who asked me. I told him I would have nothing to do with a road that was not a main public road.
12473. Do you think you can show upon this plan what you believe to be Gannon's Road, referred to in that letter? That is it I believe [*Witness points out the road.*] What I know as Gannon's Road is there called Burraneer Road and part of Wotonga Road.
12474. Have you been out in that neighbourhood since these roads were formed? I go out there once or twice a week.
12475. Do you know Mr. M'Rae's place, I think it is called Myrtle Grove? I know the place but I did not know that he owned it.
12476. Does this road that you believe to be Gannon's Road pass that place? Yes. It goes out at right angles to the main Port Hacking Road.
12477. Have you followed that road down—it ends at a gate and fence? Yes.
12478. Do you know whose property that is? That property was Doolan's estate.
12479. Do you know whom this property belongs to now? I think it belongs to the executors of Doolan's estate. I am acting as solicitor for the executors of Doolan's estate.
12480. Do you know whether Mr. M'Rae owns any portion of it? I do not know. I had heard that he bought that piece called Myrtle Grove.
12481. Does that road benefit anybody at all except the persons who owned that property? No, except those, and their friends, and visitors.
12482. Where do you live? I live at Kogarah.
12483. Have you any property in the vicinity of this Holt-Sutherland Estate? Not within miles of it.
12484. Are you a shareholder in this Holt-Sutherland Estate? I never owned a share or had any interest in the estate. I some years ago bought an interest in some leasehold lands at Kurnell for £20, but I forfeited that because I did not think it was worth continuing to pay the rent for it.
12485. Some witnesses have stated that you owned or had an interest in a block of land on the other side of the Holt-Sutherland property? What do you mean by the other side.
12486. The other side—Port Hacking. Will you look at the map and show me any property about there that you are interested in? Well, one piece I had an interest in is about 4 acres at Kurnell, which I forfeited. That is about 7 miles away.
12487. Anything else? Well, I was a shareholder in a building society which owns some land on the south head of Port Hacking, about 3 or 4 miles from the southern point on this estate. The roads on that we made at our own expense without receiving a shilling from the Government or any such source at all.
12488. Do any of the roads made by the unemployed pass your property where you are living or benefit you in any special way? No road goes closer to any property of mine than about 5 miles; and no road on the Holt-Sutherland Estate goes closer to any property in which I have the slightest interest than about 3 miles. There are none of these roads that put a penny piece of value on any property owned by me.
12489. You gave some evidence before the Select Committee with reference to Unwin's Bridge Road? That road passes on one side of the property owned by me.
12490. I do not wish to encumber this Commission with all the evidence that you gave before the Select Committee, but I would like you to state how far it benefits you? Well, I gave £6,600 for the property, but only a portion of it fronts the road. Only a portion of it could possibly be benefited by the road. I spent £1,000 on improvements, making a total cost of £7,600. I offered it for sale since the road was made at a lower rate by £2,000 than I gave for it. I am willing to take to-day £2,000 less than I actually gave for the property, and £2,000 less than I was offered for it some time ago. That is attributable, no doubt, chiefly to the fact that property has gone down, but it shows also that there has been no benefit to the property in value by what was done on the road.

- Hon. J. H. Carruthers, M.P.
2 May, 1889.
- 12491-2. Were any memorials or letters presented to you by Mr. Murphy or any one else, other than in the case of Gannon's Road, which you refused to sign? Yes; all that you see on that schedule.
12493. Did you ever see these memorials [*Exhibits R 2, R 3, and R 4*]? I have seen two out of three of them, I am sure. I refused to sign them.
12494. Why? Because I would not mix myself up with what appears to be private roads, although my name appears on one of them known as Sylvania Road.
12495. Do you notice on this sketch plan that what is marked as the Sylvania Road is marked as an unnecessary road, and appears registered as such? Yes.
12496. That is not the road you refer to as the Sylvania Road? No. The road I understand to be the Sylvania Road and the road I spoke of is the Port Hacking Road. I very much regret that my name appears in connection with the Sylvania Road, which, by the evidence given before the Select Committee, appears to be another road.
12497. I think you said you had been often out there? I have. I was out on Saturday last. I frequently take my wife and children for a drive out there.
12498. Have you seen the clearing and other work on the Holt-Sutherland Estate? Yes.
12499. Has it improved the value of the estate? Yes.
12500. To what extent proportionately? Well, property has gone down very much lately, but if there had been the same prospects of a good market that there was some time ago, the benefit would have been considerable. The roads are not done in such a way as really to permanently improve the property. They are badly done; the workmanship is bad. Where they have grubbed, stumped, or cleared the place in another twelve months there will be a dense undergrowth.

Varney Parkes called in, sworn, and examined:—

- Mr. V. Parkes.
2 May, 1889.
12501. *President.*] Are you a Member of Parliament? No; I was a Member of Parliament, but I am not now.
12502. When were you a Member of Parliament? Up to March, 1888. I think that is the month I resigned.
12503. During the years 1887 and 1888 were you a Member of Parliament? Yes.
12504. For what electorate? Central Cumberland.
12505. Have you any property in Central Cumberland? Yes; only at Liverpool.
12506. Have you any interest in any other property than at Liverpool? No.
12507. Have you any shares or interest in the Holt-Sutherland Company? No; none whatever.
12508. Are you any relation to the Colonial Secretary? Yes; I am his son.
12509. Do you know whether he has any interest in that Company? I really do not know. I have no knowledge of his private affairs at all.
12510. Did you ever know that he was a shareholder in the Holt-Sutherland Estate? No; I never knew that.
12511. Will you look at this letter, dated 6th July, 1887, signed by you, and addressed to the Casual Labour Board? Yes.
12512. Does that letter refer to the following petition of 7th July, 1887, signed by Messrs. Carruthers, Prince, and others? It would be difficult for me to say. It is some time since I wrote that. I was then acting as a Member of the Legislative Assembly, taking an interest in the constituency which I represented, and I may have written many a letter such as this. It may have referred to that, or it may have referred to some other matter.
12513. How did you come to write it? When I wrote that letter I was acting at the request of my constituents.
12514. Can you recall the names of some of those constituents who requested you to do this? No; I could not recall the names of them.
12515. Do you see the memorial of 7th July, 1887 [*Exhibit S 1*], immediately following your letter of the 6th July of that year? Yes.
12516. Do you notice your signature to the memorial? Yes.
12517. Does that recall to you whether that memorial is connected with the letter of 6th July, 1887? I could not tell. I remember some gentlemen waiting on me with this petition, and I unwisely gave them my name as the Member for the district.
12518. You observe your signature to the memorial, but you do not recollect who it was that presented it to you? No; I cannot remember who it was.
12519. Can you say whether it was Mr. Murphy? I believe Mr. Murphy was one of the gentlemen who called upon me. So many petitions are presented to a Member of Parliament for Central Cumberland that it is a difficult thing for him to remember all the petitions. Their requirements are so many.
12520. Do you recollect any memorials being presented to you as Member for Central Cumberland, which you refused to sign? No; I fancy this is the only one that was presented to me. I can only call to mind one in connection with this matter. I believe this one was in all probability the only one presented to me.
12521. Will you look at this memorial dated 19th August, 1887 [*Exhibit I 26.*] is that signed by you? Yes that is signed by me.
12522. Do you know who presented that to you? I really could not swear who presented it to me. I remember, indistinctly, several gentlemen coming to me with reference to this.
12523. Do you recollect Mr. M' Rae ever coming to you about any of these roads? No, I do not recollect.
12524. Do you recollect making any inquiries as to these memorials before signing? No; but I have no doubt some explanation was given to me at the time.
12525. Did you not satisfy yourself as to the correctness of the statements made? All I know is that it is a common thing for the Member for the constituency to sign a petition.
12526. Without inquiry? Well; at times without inquiry. We take it that these people who are signing know the roads referred to. There are many bad roads about Central Cumberland.
12527. I suppose you know from your experience that a memorial signed at the start by three Members for the district naturally influences a lot of other signatures? I do not think that these were signed in the first instance by the three Members. The places were kept there at the head for these names. I have signed many a one which has been brought to me with the front sheet vacant.
- 12528.

12528. Do you think that practice was adopted in this case? I think it is very likely, from the form of it.
12529. Who is Mr. A. H. McCulloch? He was my colleague at the time, and Member for Central Cumberland.
12530. Do you know Mr. John S. Jamieson? Yes.
12531. Did he ever see you about this? He never said a word to me about this—in fact, I did not know his name was attached to the petition.
12532. Do you know whether he has any property out there? I do not know. I do not know his private business.
12533. Do you know Mr. John Davies? Yes.
12534. You knew the Casual Labour Board was then in existence? Yes.
12535. Did you ever see Mr. John Davies with reference to these roads? No.
12536. Did you write a note to him? I do not know whether I wrote to him or my clerk.
12537. Did you ever have any interview with reference to these roads? No; I was ignorant of the place. Beyond being of assistance to my constituency, I took little or no concern in the matter.
12538. Who was Colonial Secretary at the time? I suppose Sir Henry Parkes would be.
12539. Did you ever see him about this? I never said a word to him about it.
12540. Can you recollect whether any other memorials, petitions, or letters were presented to you for signature than those I have now put before you? No; I really cannot recollect any. It made very little impression upon my mind at the time. It was at a time I was attending to my private business, and I had little time to give to their consideration.

Mr.
V. Parkes.
2 May, 1889.

The Hon. William McMillan, M.P., Colonial Treasurer, called in, sworn, and examined:—

12541. *President.*] You are, I believe, Colonial Treasurer? Yes.
12542. Do you know of the matters which have been entrusted to this Commission for inquiry? Generally I do, but not specifically.
12543. Amongst other things, we are directed to inquire into the working and expenditure of the Casual Labour Board. In the course of our inquiry we found it necessary, owing to certain evidence, to examine many of the paid vouchers. We have, after some difficulty, collected from various places most of the Board's vouchers and papers, but about a month ago we found that certain paid vouchers covering large sums of money were wanting, and that they were either with the Audit or the Treasury Department. We summoned certain officers from the Audit Office, but failed to get the vouchers. We then summoned certain officers from the Treasury, with the like result. Then Mr. Eagar was summoned and examined before this Commission. He was asked whether he had any papers in his Department vouching for payments made by the Casual Labour Board. He said he had a large number of vouchers; that he declined to part with them, but that he would allow one of his officers to attend here and produce them whenever occasion should arise. Many of these vouchers we have had to put into the hands of different witnesses, a Treasury officer being present here when the documents were examined. But our inquiry is being to a certain extent impeded through our not having them left in our possession—for some time at any rate. The Treasury officer, we presume under instructions, does not leave this room while we are examining the vouchers and asking questions of witnesses about them. We do not complain of the officers of the Treasury Department, from whom we have received every courtesy. They may not wish to take the responsibility attached to allowing us to have these documents. We ask you, as the Minister in charge of the Treasury Department, to authorize your officers to deliver to us these vouchers on our undertaking to return them at the close of our inquiry, or sooner if necessary, in order that we may carefully examine them, and ask witnesses questions about them as they come before us, without the necessity each time of summoning an officer from the Treasury to attend. I need scarcely mention that the Commission under which we are working is a Crown Commission, and that it enjoins all Government officers and other persons whomsoever to assist us in the execution of our duties. From a late date in March, up to the present time, we have been prevented from properly examining these vouchers, owing to the course taken, no doubt, in the interests of a Department unwilling to take the responsibility of complying with our request. What I ask you now is, that in the interests of the public, and in deference I may say to a request from us, as the servants of the Crown, that you will authorize the leaving of these vouchers with us? What would be the bulk of the vouchers?
12544. I believe there are two batches of £6,000 vouchers representing about £12,000, and another batch representing £200 odd. The vouchers being for payments made just about the close of the Board's existence, are, I take the responsibility of saying, of the greatest importance to this inquiry. They should be produced and left with us. The officers from every other Department of the service have taken the responsibility of leaving their documents with us? I take it that if the vouchers are left there would be a tabulated statement left in the hands of the Treasury to show what has been left with you. I am in this position: I have only been a month in the Treasury, and I am now, to a certain extent, acting in contravention to official ideas. Could these vouchers be left here in the morning and taken away at night?
12545. No. I am afraid not; for the reason that several vouchers that we want to inquire specially into concern different individuals, and in respect to which these individuals can give evidence. You can see the difficulty we are placed in by the course adopted. Witnesses come here at different times. We are often sitting very late. We often sit five and six hours at a time. Sometimes witnesses are before us at a late hour when the Treasury offices are closed? I have settled the matter in my own mind. If you can undertake, as President, that they will be safely returned to us, I think the best way would be that there should be some kind of a statement made that the vouchers you get, you will undertake to return.
12546. We will do that without any hesitation? Of course there is a great responsibility so far as the Department is concerned, because if one of the vouchers were lost we could not replace it.
12547. We will take every care that they are put in a safe place. You were, I believe, a Member of Parliament in the years 1887 and 1888? I was.
12548. Have you any interest in any property out on the Holt-Sutherland Estate? No, not on the Holt-Sutherland Estate; but I have an interest in a Company which has a right to mine under the Holt-Sutherland Estate. I have no interest whatever in the surface.
12549. Have you an interest in any other property out there? I have an interest in 18,000 acres of mineral land, known as the property of the Metropolitan Coal Company, which extends from the 18-mile peg on the railway to the 28-mile peg.
12550. Are you in any way interested in shares in the Holt-Sutherland Estate Company? No; I never was.

Hon. W.
McMillan,
M.P.
2 May, 1889.

- Hon. W. McMillan, M.P.
2 May, 1889.
12551. Have you any interest in any land or do you own any land in or about Hornsby? No.
12552. You were a member of the Select Committee appointed by Parliament to inquire into the work of the unemployed on the Hornsby and Holt-Sutherland Estates? Yes.
12553. Certain statements and charges touching some alleged improper expenditure on the property of certain persons or Companies at Hornsby and Holt-Sutherland appear to have been made. Have you any statement to make in reference to the matter? Do you mean as the result of my inquiry on that Committee?
12554. No. Have you any statement you wish to make affecting the Casual Labour Board or any members of it, as to any alleged expending of public moneys on any private estates? My general impression with regard to the matter, as a member of the Committee, and hearing the evidence there, was, that while there was nothing absolutely irregular in the worst meaning of the word, there was certainly a good deal of what I might call slovenliness, in the way in which the work of the Casual Labour Board was conducted, and in the way in which responsibility by the different members of the Board was avoided—that is to say, that the responsibility for having paid such a large amount of money should have been jointly borne by all parties connected with the Board; whereas it is evident, owing to the other duties of Messrs. Houston and Wells, that a great deal, probably almost the entire control of everything with regard to the functions of the Board in connection with certain roads, and the expenditure on those roads, and the whole control of the affairs, seem to have drifted into the hands of Mr. John Davies.

Myles McRae, M.P., called in, sworn, and examined:—

- M. McRae, Esq., M.P.
2 May, 1889.
12555. *President.* Are you a Member of Parliament? Yes; I believe so.
12556. How long have you been a Member of Parliament? Only a few months—since the last general election.
12557. Were you a Member of Parliament during the years 1887 and 1888? No; not before the last election. I am one of the recent additions to the House.
12558. Then during the year 1887 you were not a Member of Parliament? No; not up to February this year. I have only been a Member for a few months.
12559. Have you any property out in the Holt-Sutherland district? I am a shareholder in the Holt-Sutherland Estate Company.
12560. How many shares have you? I think forty-three or forty-four; I am not sure.
12561. Have you any property there independently of your interest in the Holt-Sutherland Company? Do you mean in that district?
12562. Yes, in that district? Yes; I purchased at a Government land sale about 40 acres at Como. A land sale was held there, conducted by Mr. G. F. Want; and the Government, at the sale, agreed to make a road, to give access to this property from the old Punt Road. Sir George Innes and I reminded the Government of their promise, and they started to make this road, but they left it unfinished. That was part of the conditions under which we bought.
12563. Where is this property? At Como—Glass and Bottle Point, I think they call it.
- 12563½. Is that the property referred to in this letter signed by you and Sir George Innes? It is; and the Government have not carried out their promise with regard to the road. The men were taken somewhere else. I hope you will induce the Government to carry out their promise.
12564. Have you any other property in that district besides the Como property? At the Heathcote land sale, I bought about 50 acres from the Government—by the foot and by the acre.
12565. Have you property on the Port Hacking Road? Yes; a recent purchase I bought in the first instance from Caudy, through Richardson and Wrench. They sold as mortgagees. I bought this property about seven or eight months ago.
12566. Do you know a road called the Wotonga Road? Well, I was told yesterday that is one of the boundaries of my property—that is, the property that I bought was faced by that road.
12567. Do you know the Burraneer Road? No. My property has a frontage to the Port Hacking Road.
12568. Is your property called Myrtle Grove? Yes; and the fellow I bought it from agreed to give me 10s. a week for it. He has been there since, but he has not paid me anything. I went in to Hamilton and Garrard about it before I bought it, and I have been out there since. I went out once to see Condi, and he agreed to give me 10s. I went out and saw him, and I threatened to bring him up if he did not pay my rent, but he has paid me nothing.
12569. Is there not a road running down the northern side of your property called the Wotonga Road? I was told last night it was called Wotonga Road.
12570. Did you ever drive over it? No. I was out about a month ago with my family, and I saw it was in good order.
12571. It is very good, is it not? Yes, it is good. I asked Mrs. Caudy if I could go to the hotel by that road, and she said there was some road not made, so I went back towards Sydney by the main road, where the new hotel is built.
12572. Is your property part of Doolan's estate? Yes.
12573. Have you any other property there? No; that is all I have got.
12574. Do you know a road called Gannon's Road? Does it front my land?
12575. That is what I want to know? Well, I could not tell. Although I bought this land, I never went over it.
12576. I suppose you know the corner where the house is? Well, I walked into the little paddock. It had been cultivated, but I have not been over the land.
12577. Have you any other property about there? No.
12578. We are told, perhaps wrongly, that you have a property or interest in a property near what is called, on the map of Holt-Sutherland, Boulevard Road? I have got 49 acres. Mr. S. W. Gray owns the adjoining block. There were 49 acres originally adjoining the Holt property, and this was bought from the son. Thomas Garrett and S. W. Gray took it up with other blocks, and he conveyed a fourth of the land to Mr. Garrett, and I bought 49 acres. When my men went out there they cleared 18 acres, and they did grubbing and stumping for Mr. Gray, and he refused to pay for it, and accordingly I lost it. I sold that land to the Rev. Andrew Gardner, three or four years ago—a 51-acre block and a 55-acre block. They were both Gray's. One was 51 acres and the other 55.

12579.

NOTE (on revision):—Q. 12568—Omit from "He has been," &c., to "nothing." Q. 12571—Omit from "she said," &c., to "built," and insert "she said part of it was not finished." Q. 12578—Omit from "and" to "son"; omit "Thomas Garrett and"; omit from "and" to "for Mr. Gray," and insert "of Mr. Gray's land"; omit from "One" to "55," and insert after "Gray's" "at one time."

12579. Are you enabled to tell me how far this land is from the Boulevard Road? About half a mile.
12580. Have you any other property out there near this estate? I have Glass and Bottle Point, this on Doolan's estate, and that Grey's purchase.
12581. No others? No.
12582. Are you sure you have not any other property there? No; I have got no other. If I have I have forgotten about it. I have got so much land I am not sure where it all is.
12583. What is your business? I am not in any particular business. I am retired.
12584. Were you in 1887 or 1888 in any particular position? Well, I am a trustee for several estates and Chairman of Boards of Directors.
12585. So that you keep no clerks or staff? No; I have a lot of work to do in connection with my own property. It takes all my time.
12586. I place in your hands a memorial dated 19th August, 1887—[*Exhibit I 26*] is that signed by you? The first one I signed for was the road from Tom Ugly's Point to Sutherland. I am trustee of that road.
12587. I ask you first if you have signed that? Yes; I signed this. These are public roads. They are main roads, and will open up the district for settlement. The Malvern Road is one of the principal roads out there.
12588. Will you kindly look at this memorial, dated 22nd September, 1887 [*Exhibit R 3*] and say whether you have signed it? What is this petition for.
12589. Will you kindly see if you have signed it? Yes; I signed that.
12590. Will you look at this other memorial, also dated 22nd September, 1887 [*Exhibit R 2*] and say whether you have signed that? Yes; I signed that.
12591. Will you read to yourself the memorial of 19th August, 1887 [*Exhibit I 26*]; glance at the signatures, and tell me how many shareholders of the Holt-Sutherland Estate have signed? Well, I see John S. Jamieson of Prince, Ogg, & Company; the senior partner of Prince, Ogg, & Company. I do not know whether G. F. Want is. I know J. H. Want is.
12592. You are a large shareholder yourself? I know I am.
12593. Don't you know the others who have signed; Mr. Reading, Mr. F. J. Jackson, Mr. Henry Prince, Mr. S. A. Want? I could not tell you more from memory.
12594. Mr. J. Murphy? Yes; he is a large shareholder.
12595. Do you know who Mr. J. F. Murphy is? No.
- 12595½. Do you know whether he is a brother of Mr. J. Murphy? Well, I know that he has got a brother, but whether that is his brother or not I cannot say.
12596. Mr. G. F. Want, is he a shareholder? I know J. H. Want is.
12597. You see the names Newton down there, are they shareholders? I would not be sure.
12598. Do you know any of the Messrs. Want? Yes.
12599. Do you know Mr. S. A. Want? Yes.
12600. Were you ever in his office? Yes; I have been once or twice.
12601. Do you know if the signatures of any of his clerks are on that memorial? No.
12602. Looking at that memorial, can you say whether it has been signed by any of their clerks? I know Mr. Want and Mr. Johnson, but I do not recollect any of the clerks.
12603. Do you know Mr. Murphy's handwriting? I do.
12604. Is this memorial in his handwriting? It looks like it; I think it is.
12605. Do you take the responsibility for the work asked for in this memorial being proper work in the public interests? Yes. I recollect being a trustee to the Tom Ugly's Point Road, and the Military Road, and I conceived that this work would benefit the country, and would benefit the returns from the Illawarra Railway. I think it would be much better than scraping the gullies in the National Park.
12606. What is the Malvern Road? The Malvern Road is the main Road leading to the ocean off the Military Road.
12607. Now, I come to this petition of the 22nd September, 1887. [*Exhibit R 2*]? Yes; I recollect it.
12608. Do you know where Eton-street, and Orara, Coronulla, Lilly-Pilly, Euronga, and the Boulevard Roads are? I know whereabouts they are.
12609. Did you know at the time you signed this memorial in September, 1887? I know the road to Coronulla Beach. I know that it would be a positive benefit to the Government inasmuch as if we thought about locating the Noxious Trades there the grubbing and stumping of that road would be of great advantage. The other road to Ewey Bay is a favourite resort, and the grubbing and stumping of that road would enable excursionists to get at the bay in a more direct way.
12610. Could you make it convenient to accompany this Commission and show us where all the streets or roads mentioned in this petition are? No; my time is fully occupied at the present time.
12611. Do you think you could find them at all? Yes. I have been at Ewey Bay, Coronulla Beach, and Eton-street.
12612. Will you show me Eton-street on this plan? Yes, leading to Ewey Bay. I have been over that road. I went as Mayor of Kogarah. We had a deputation from different municipalities, and we were asking the Government to reserve 1,000 acres about here for cemetery purposes, within half a mile of the railway.
12613. But can you show me that road now? Eton-street; it is not marked there. I know it is about there.
12614. Can you show me Lilly-Pilly Road? No; I do not think I can from the map.
12615. Euronga Road? No.
12616. Boulevard Road? That is marked there.
12617. Are you prepared to state to this Commission that on 22nd September, 1887, you had an intimate acquaintance with these roads named here, and recognised them when the memorial came before you? Well, I knew the Coronulla Beach Road and the road to Ewey Bay.
12618. Did you then? Oh, yes; I have been over these in my capacity of Mayor. We were trying to induce the Government to reserve 1,000 acres at £15 an acre.
12619. Are you well acquainted with this district? Yes.
12620. And have been for a long time past? Well, I have not been over it so much recently as I have been during the last four or five years.

- M. McRae, Esq., M.P.
2. May, 1889.
12621. Will you look at this memorial, dated 22nd September, 1887—[*Exhibit R 3*] ? Yes. I am trustee of this road. I went with Mr. Jamieson and presented this petition to the Casual Labour Board, asking them to make this road—to grub, stump it, and form ballast and blind it. I was very anxious that this road should be made, because it is the Military Road. Then we went to Sir Henry Parkes, and I think he approved of the road being made; but it was sometime before they started. I was urging the Labour Bureau to proceed with the work on several occasions. I consider it the most useful work that has been undertaken in that direction.
12622. Are you often at the office of the Holt-Sutherland Estate Company? No; not very often. I attend the meetings there; that is all.
12623. Are you a Director? No; I am not a Director.
12624. Did you ever see Mr. Murphy with reference to these roads? At that time I was buying shares. I am only a recent shareholder. A young fellow named Maloney was buying shares for me.
12625. Is that the Maloney who has signed one of these memorials? Yes; I suppose it is.
12626. Then he was negotiating for these shares for you about this time? Yes.
12627. Did Mr. Murphy see you pretty often about these memorials? No.
12628. Did he appear to take much interest in them? Yes.
12629. What position does he hold? Well, he is Manager of the Company.
12630. And he took a considerable interest? Yes. There is no doubt about that.
12631. How often did you see Mr. Davies? I think about twice or three times. I went with Mr. Jamieson on one or two occasions.
12632. Where to? To the Labour Bureau.
12633. At Goulburn-street? No; I think it was at the Haymarket at that time.
12634. Do you recollect how often you went with Mr. Jamieson? I went twice. I went as a trustee of this road.
12635. What had Mr. Jamieson to do with it—was it the Mr. Jamieson who is a shareholder in the Holt-Sutherland Estate? Yes, he is; at least I fancy he is.
12636. Did he tell you he was a shareholder? I think he is a large shareholder too.
12637. Do you think he was a shareholder when he went down with you? Oh, yes.
12638. Can you tell me whether it was a formal interview, or a casual interview? No.
12639. Did you make an appointment? No; the Board was sitting, and they said this matter would be considered.
12640. Whom did you see? I think we saw Mr. John Davies, and Mr. Wells? I did not know the other gentleman, or I forget his name.
12641. Was that the first or second occasion that you went there? The first occasion.
12642. Who was there on the second occasion? I only went twice.
12643. Whom did you see on the second occasion? I think we saw the same persons.
12644. Do you know whether any work was done after you memorialised? I could not tell. I know that the work on the Military Road was not done. I was continually urging that this work should be done. I found fault with them for the men being taken away from the road.
12645. How many shares did you buy at the time? I could not tell. I know I was some five or six months in buying them.
12646. Can you tell me when you got all these shares? No.
12647. I want to find out how many shares you had in 1887? I could not say.
12648. I see you had forty-three in December, 1888. Can you tell me how many you had in 1887? I could not say.
12649. Had you twenty? I could not say.
12650. You were buying at that time? Yes.
12651. Why. Did you think it was a good thing? Well, I was given to understand that it was, but I found out after buying that it was not such a good thing. A good many people will say so too. I found shares before that were bought at £180 or £190, and only a few select people could buy them. I do not think it is such a good thing.
12652. Do any of these roads benefit your property? Independent of my interest in the Holt-Sutherland Estate?
12653. Yes. Will the road fronting at right angles to Port Hacking Road? Yes.
12654. Do any of these other roads benefit your property? Oh, yes; I think so, certainly.
12655. Do you know that road that goes down by the side of your property—called Wotonga Road—on the north side of your property? I have seen it.
12656. Does that benefit anybody else's property but yours? It benefits Gannon's.
12657. Now, Mr. McRae, would you sign these memorials for the same work if you were asked to do so now? There is another petition I refused to sign. I considered that I was not justified in doing so.
12658. I ask you now, with your experience and as a Member of Parliament whether, if these memorials were presented for signature under the same circumstances, you would in the interests of the public, sign them? There is one there for the Port Hacking Road I should certainly sign.
12659. What of the other two? They relate to arteries mainly of that road, opening up the National Park and the water frontages at Coronulla Beach. I would do the same thing to-day. The other roads I refused to sign for because I considered they were not justifiable.
12660. How many were there? I think fourteen or fifteen.
12661. Will you look at this memorial of 10th May, 1888 [*Exhibit R 4*] ? Yes.
12662. Did you ever see that memorial? Yes; I recollect having seen it.
12663. Were you ask to sign that memorial? Yes.
12664. Did you sign it? No; I refused to sign it.
- 12665? Why? Because I considered that the Government would not be justified in making these roads to benefit our property.
12666. Do you know Mr. W. Lovell Davis? Yes.
12667. Has he any property up there? I do not know that he has.
12668. Will you read that letter, signed W. Lovell Davis, written to the Principal Under-Secretary, dated 23rd January, 1888? Yes.
12669. Does that recall anything to you? Well; I think this is the road that goes to the bottom of my property. This road certainly benefits Mr. Gannon's property.

12670. And benefits yours, does it not? Yes; but it was not my property then. It benefited Condi, who owned the property. I own it now.
12671. Do you know Mr. W. Lovell Davis? Yes. I know him; he was a member for Canterbury. I certainly would not have recommended that road. I do not think that a Member of Parliament is justified in asking for an expenditure of that kind to benefit one or two individuals.
12672. Had you been in Parliament would you have recommended that road? I would not. I want to say with reference to what I stated about the road for which I am trustee, I think it is entitled to £50 a mile for 5 miles. It would be a saving to the Government to put the unemployed on that road in preference to grubbing and stumping the gullies in the National Park. All the other roads I signed for are necessary. A great deal of this land is sold and let to sub-lessees. Then, as to the main roads leading to Ewey Bay and Coronulla Beach, I consider that a far more beneficial expenditure could have been made upon them than upon grubbing and stumping the gullies upon the National Park. Some roads were certainly made that I would not care to sign for. Mr. Murphy asked me to sign for a batch of roads, and I said I would see him to Jericho first. I condemn the expenditure the Board made on the Holt-Sutherland Estate.
12673. Were you a Director then? No; I was a shareholder.
12674. How did you come to give up the Directorship? Well, it was from an observation that fell from one of the Directors.
12675. Do you recollect who it was? No.
12676. Mr. Jamieson? No; it was not Mr. Jamieson. We were offering this property for sale to the representative of some London or English capitalist, Mr. E. M. Young I think his name was. We deputed one or two of the Directors to go out and submit a basis of agreement as to the amount that we should ask for the property. Well, the amount they submitted to the Directors was £250 a share. I forget now how many shares there are in the company, but it is equal to £200,000. Well, I moved an amendment that we offer the property for £150 a share. I consider that to be the outside value of the property; but as I thought I might possibly be under-rating the value I put on the other £50. I was quite prepared to sell out at £100. I said that if the Board were in earnest about the £250 I would cease to be a Director before I left the room. It appeared to me that we were asking a most exorbitant price from the English capitalist. I think it was the Chairman, Mr. Cook, who said that the property was worth £250 per share, and he said that they had spent a lot of money in improving the property. I said we might thank the Government for a good deal of the improvement that had taken place upon the property. I said that I did not think that the Company had spent such a great deal of money. At all events, at the meeting before that I refused to sign this petition. I stated that if we could not find enough coin to improve our own properties as other Land Companies had done the sooner we threw up the sponge the better. The reason I was so dead against this expenditure was that in my capacity as Mayor of Kogarah and an alderman of the Hurstville Municipality, especially in the latter capacity, I collected some £2,000 for corporate purposes from *bonâ fide* ratepayers, and we applied this to making, forming, ballasting, and blinding the main roads leading from Kogarah, Carlton, Hurstville, and Oatley platforms, and although the Act provides a pound for a pound contribution from the Government, the Colonial Secretary refused to give us the endowment. I felt very much annoyed that this expenditure should be made on the Holt-Sutherland Estate and the Hornsby Estate, where there was no settlement, and where the circumstances did not occur to justify it, and where the parties concerned did not contribute towards the expenditure, while the Government should refuse to give us the endowment provided for under the Municipalities Act. I was disappointed that the Government did not give us this, because where we were spending money there was a big development taking place. I was anxious, too, that the unemployed should be dispersed. We had had them in our employ for eight or nine months. We had been carrying out work that we would never have carried out unless we were sure of Government endowment; but we got no endowment in Hurstville and it was the same in the Kogarah Municipality.
12677. With the knowledge you subsequently gained would you now be prepared to sign memorials similar to these, for roads like the Malvern Road, the Sylvania Road, Eton-street, Woronora Road, Coronulla Beach Road, Lilly Pilly Road, Euronga Road, Boulevard Road, Venetia-street, and so forth, and to increase the width of the Illawarra Road, to the extent mentioned in this memorial? Yes; I consider that the expenditure on that road is perfectly justified. In fact I believe there were men working on it some time ago.
12678. Is there any settlement in that estate to justify the expenditure? There is settlement taking place.
12679. How many people are there there now? I could not tell. I know they have sub-let some 1,300 or 1,400 acres. There are a good many people going out there commencing market-gardening, &c.
12680. Are there fifty there? I should think about fifty would be the extent.
12681. Did you see Sir Henry Parkes, with reference to these matters? I went with Mr. Jamieson to Sir Henry Parkes.
12682. On different occasions? I could not say that I saw him. Mr. Jamieson came to see him.
12683. Was it in deputation or in private interview? We had called at the Labour Bureau. The Labour Board recommended the expenditure and Sir Henry Parkes ordered the work to be carried out.
12684. Did you see Sir Henry Parkes more than once? I do not know that I did see Sir Henry Parkes.
12685. Did you come here to see him? I did; but I could not say that he actually saw me.
12686. Did you see Mr. Critchett Walker on this subject? Yes.
12687. Can I take it that Mr. Jamieson was always with you when you saw Mr. Walker? Yes; I never saw Mr. Walker with reference to these roads, except when Mr. Jamieson was with me.
12688. Do you know Mr. Burrows? Yes. I have nodded to him, only within the last few months.
12689. Have you any property in the parish of Holdsworthy, near George's River? Yes. I have got property there.
12690. Does that appear on this plan? I do not think so.
12691. Where is the land? I own what was originally, at least the land upon which Joseph Wearne's mill was built upon. In fact I was accused of becoming a protectionist by the present Colonial Treasurer in consequence of that purchase. He said the glories of protection never dawned upon me until I had bought a factory, and then he spoke about this mill. He reckoned without his host, for I bought the 465 acres upon which the mill had stood, and which had been burnt to the ground six or twelve months before I bought the property.

12692.

NOTE (on revision):—Q. 12672—Omit "I condemn" to "Estate," and insert "I condemned one expenditure at one of the board meetings." Q. 12674—Omit from "Well" to "Directors." Insert "I never was a Director." Q. 12675—Omit "No." Q. 12676—After "I consider" omit "that," and insert "£100 per share." For "a Director" read "a shareholder," line 9.

- M. McRae,
Esq., M.P.
2 May, 1889.
12692. Did you have any road going there? Yes.
12693. Did you dedicate any portion of the road? I do not think so.
12694. Will you tell me what this letter refers to? That is a letter from me to E. M. Burrowes, Esq.,
Bonny Boon, Arncliffe, 20 May 1888:—

Dear Sir,

I hereby dedicate for public purposes so much of my land as shall be required for the road you have cleared leading to the George's River, parish of Holdsworthy.

Yours, faithfully,
MYLES McRAE.

12695. Is that your letter? Yes, that is my letter.

12696. Is that a road through your land? Well, I was asked by the Government to dedicate so much of my land. I had never been on it, and I quite forgot the writing of this dedication. I do not know who sent me the correspondence with reference to it—whether it was the Casual Labour Board or Mr. Burrowes.

12697. Does that road go right through your property? I could not say. I have not been on the property. I have only been twice upon it since I bought it four or five years ago.

12698. And yet you dedicate the road when it is cleared to the George's River? The Chairman having written to me with reference to it, under any circumstances where the Government wishes to make a road I always give the right. I gave the Government half a chain of a frontage to Peakehurst Park. This slipped from my memory.

12699. Don't you know what part of your property it goes through? No.

12700. Did you know a road was cleared and formed? No; I never was aware of it until I saw what is stated in the letter.

12701. How long is it since you have been out on your property? About three years.

12702. Have you been out since May, 1888? No.

12703. I suppose on going over these lands, you will be surprised to see a road right through your property? Not if I agreed to dedicate and give the road.

12704. Will you look at this letter dated 23rd August, 1887, addressed to John Davies, C.M.G., signed by Myles McRae. "We forgot yesterday to mention the number of unemployed required to grub and stump and form the roads referred to in the petition, we suggest about 300 men." Is that your signature? Yes, that is my signature.

12705. Is that memorial referred to in your letter, the one of 19th August, 1887? I suppose so.

12706. Who are the "we" referred to in that letter? The petitioners.

12707. Were the petitioners down to see Mr. Davies in a body? The petitioners were Mr. Jamieson and myself.

12708. Does this letter of 23rd August, 1887, refer to the memorial of the 19th August, 1887? Yes; there is no doubt about it.

12709. Then the "we," who you said just now were the petitioners, are really Mr. Jamieson and yourself? Yes.

12710. Were you doing that simply in your capacity as an individual citizen and in the sole interests of the community? Well, I had signed the petition. I recognized the utility of the making of these roads. When I put my shoulder to the wheel I do not like to cease until I have accomplished my object.

12711. Will you look at another letter here dated 24th August, 1887, the next day apparently written by you to the Casual Labour Board, to the effect that "you hereby recommend Messrs. Ross, Clarke, and party of four as first-class clearers," stating that at scrubbing and stumping they do excellent work, and adding, "Put them on the road leading to Port Hacking, if you can"? Yes.

12712. Is that your signature? Yes. These men could not get anything to do, and they were pestering me to get them something to do.

12713. So that you found works for the unemployed to go on, and you found unemployed to put on the works? No; this is only a recommendation. They were not making their salt. I knew that they were good men and able to perform any kind of work.

12714. Do you know the signature of Mr. F. J. Ellis Holt? Yes.

12715. Do you know the signature to these two letters? Yes; I recognize them. This is a letter dated Sutherland house, Sylvania, November 12th, from Mr. Holt, addressed Myles M'Rae, Esq., Bonny Doon, Arncliffe:—

Dear Sir,

I am in receipt of your letter of the 9th instant. I feel rather a delicacy, through living here, of dealing with the unemployed. I would kindly suggest that you should see Mr. John Davies yourself, and ask him to cause the necessary instructions to be sent to Mr. Burrowes, who resides at the National Park, some distance from here, to have the work you refer to done. This would be much the best way, for even if I went up to the National Park to see Mr. Burrowes he might be away, and I might have the journey for nothing, not to mention the loss of time.

Yours, faithfully,
F. J. ELLIS HOLT.

THE second letter is dated Sutherland House, George's River, Sylvania, November 16th, 1887, to Myles M'Rae, Esq., Bonnie Doon, Arncliffe:—

Dear Sir,

With reference to your letter of the 9th inst., I learn that a section of the road you refer to therein has now been nearly completed. If you were to see Mr. John Davies, C.M.G., concerning the matter I think you would be able to arrange for the prompt commencement of the work, which is undoubtedly one of public interest.

Yours, faithfully,
F. J. ELLIS HOLT.

12716. Then I see a letter, apparently signed by you, to the Casual Labour Board, without date, enclosing these two communications, and stating that "This work has been approved by Sir Henry Parkes nearly five months ago, and being a main thoroughfare, should be improved without delay; in fact a Military Road, where trees should be planted on either side, the timber for tree-protectors easily got along the road. Kindly give orders to have this necessary work started and oblige." What is the name of that road? The Bottle Forest Road, I think.

12717. Is Mr. Holt a large land owner out there, and son of Mr. Thomas Holt? I considered that a most necessary work out there.

12718. Do you wish to offer any further explanation or evidence to this Commission with reference to the works out there, or the roads that have been constructed by the unemployed on the Holt-Sutherland Estate? No; only that I signed for those that I considered it was justifiable to expend the money upon. All others I refused to sign for.

12719.

12719. Did you ever call Mr. John Davies' attention to your refusal? No; I did not care about seeing Mr. John Davies. I only saw him once or twice.
12720. Are you friendly with him? No; but I have no reason to be unfriendly.
12721. Had you any particular reason for urging attention to the work out in that district? No; I never interfered. I felt I had a duty to perform in connection with the Military Road. I went there several times. I was anxious that the road should be completed. I must apologise for forgetting about dedicating that road mentioned in the letter to Mr. Burrowes. Mr. Burrowes had asked me to give so much of my land as to dedicate a road, and recognizing the benefit that the road would be, I acceded to the request. I have not been on the ground, but I was told that this was a road going from Campbelltown or somewhere up there, and that it was a main road through the parish of Holdsworthy. Accordingly I gave as much land as would be required for it, but I forgot all about it.
- 12721½. Have you ever seen Mr. Burrowes in connection with roads about the National Park? I have never seen Mr. Burrowes in connection with road making at the National Park. He asked me to dedicate so much of my land for this purpose. I induced the Government to allow some 200 of the unemployed to continue the Forest Road to the Old Point. It was made by Sir Francis Mitchell. That is in an incorporated district where there is good settlement. The people stopped them. They said that the road went in another direction, and the men were taken off. It would have been a very useful work to have got some thirty or forty men to improve Peakhurst Park—a park of 190 acres on the other side of George's River. I am sorry that the Government did not send them, because the work would have been a great benefit to the people.

M. M'Rae,
Esq., M.P.
2 Mar, 1889.

Harry Brisbane Jamieson called in, sworn, and examined:—

12722. *President.*] What is your father's name? John Storey Jamieson.
- 12722½. Where is he? I do not exactly know at the present moment; he is on his way from America to England.
12723. How long has he been absent from the Colony? Since the 20th February last.
12724. Will you look at this memorial, dated 7th July, 1887 [*Exhibit S 1*—who is Henry Prince, the second signature on it? He is a member of the firm of Prince, Ogg, & Company.
12725. Is he a member of the firm of which your father is a partner? Yes.
12726. Whose is signature No. 6? That is my signature.
12727. Whose is the signature, "George Jamieson"? An uncle of mine, who has since died.
12728. Whose is the signature, "M. R. Jamieson"? A brother of mine.
12729. Is he living? Yes.
12730. In Sydney? Yes.
12731. Are you in the office of Messrs. Prince, Ogg, & Company? Yes.
12732. Will you kindly look down those signatures and tell me whether there are any you recognize? Yes; "A. W. Francis." He was at one time in our office as cashier. The next one, "R. Shankland," was in our office.
12733. Do you know W. G. Whiting? Yes; he is our accountant.
12734. Are there any others that you recognize? Yes; there is the signature of Charles W. Norris, Custom House clerk in our establishment. John Chant; he is the manager of our Manchester department.
12735. Was George Jamieson an officer in the warehouse? Yes.
12736. Do you know the next name, A. G. Bennett? He is a storekeeper at Tumut; he was in our employ at the time he wrote that. M. R. Jamieson, my brother is the next.
12737. Will you read out all the other signatures on the memorial that you know were officers or clerks in your establishment at the time? J. B. Robinson, J. E. Copplestone, R. Grant, J. B. Tucker, W. B. Thame, N. Mackay, A. J. Pring, T. Richardson, Thos. W. Smalley, Charles Wilkes, C. Pemprase, J. Doyle, Charles Hooper, W. Shearsby, S. C. Brees, W. T. Brown, W. C. Black, T. F. Gurney, J. M. Butters, C. Bourne, H. Tillidge, C. Woolnough, S. Bullock, R. F. Wilkinson, W. M'Murtrie, T. Hynard, C. Millin, C. W. Bullock, R. J. Hogg, J. Westwood, George Hutton, and F. Boardman.
12738. Will you oblige me by counting the number of signatures that there are to that memorial? There are forty-nine.
12739. Will you now kindly tell me how many of these signatures are the signatures of persons who were either members of the firm or clerks in your firm's office on that date? Forty-three to my knowledge. There are two or three signatures I do not recognize.
12740. Do you recognize any of the other six as being constituents of your firm? No.
12741. Will you look at this memorial, dated 19th August, 1887 [*Exhibit I 26*]. Is that signed by you? Yes; that is my signature.
12742. Will you kindly call out the names of any other gentlemen who have signed it, who were at that time members of your firm, or clerks in your establishment? Yes. John S. Jamieson, Henry Prince, R. Shankland, C. J. Salier, W. Jones, C. W. Norris, H. B. Jamieson.
12743. How many is that? Eight signatures. Is the John S. Jamieson, who has signed it, your father? Yes.
12744. Will you look at this memorial, dated 22nd September, 1887, [*Exhibit R 2*]? Yes.
12745. Is that signed by any member of your family? That is signed by my father, John S. Jamieson.
12746. Are there any other members of the firm or clerks of the firm on that? No.
12747. Will you look at this memorial dated 10th May, 1888 [*Exhibit R 4*], and say whether you recognize any members of your family, or of the firm, or persons connected with your firm there? Yes. R. J. Hogg, C. Bourne, A. C. Steer, J. E. Chant, C. W. Bullock, T. Hynard, J. Blenkinsopp, and H. Taylor. This man Taylor I am not sure about. There was a man Taylor in our employ; J. G. Dunlop, C. Millin, J. Furber, W. B. Thame, J. Parfett, C. W. Norris, R. Shankland, W. M'Murtrie, George Hutton, and E. Warren.
12748. Will you kindly count the signatures to that memorial, and tell me how many there are altogether? Thirty-two, I make them.
12749. Will you kindly count the signatures of those connected with or employed by your firm? Seventeen I am certain of as being interested in my father's firm.
12750. Have you any recollection of the circumstances under which these two documents were presented to you for signature? No.

Mr. H. B.
Jamieson.
2 May, 1889.

- Mr. H. B. Jamieson.
2 May, 1889.
12751. Can you tell me who presented them? No; I have not the faintest idea who presented them.
12752. Did you know anything of their contents? I read them through at the time, but I could not say what they contain now.
12753. Did you consider their contents? Yes.
12754. What age were you then? I was 19 years of age when the first one was signed, and about the same when the second one was signed.
12755. And you have no recollection as to who asked you to sign them, or what their object was? No; I cannot say I recollect anything about them at the present time. I read them through, but I did not know their contents.
12756. Do you know whether they had any reference to the making of roads at Manly Beach? No, I think they had reference to the making of roads or bridges, or something of that kind towards Hurstville.
12757. Do you know whether your father has any interest in any property out there? I know he is a shareholder in the Holt-Sutherland Estate.
12758. Do you know how many shares he has? No.
12759. Do you know Sir Henry Parkes? Yes.
12760. Intimately? Yes.
12761. Is he often at your house? He has been, but not for some considerable time.
12762. Was he frequently there when your father was in the Colony? No; he was not at our house frequently.
12763. Had he and your father any business transactions with each other? Not that I am aware of.
12764. Did your father lend him any money? Not that I am aware of.
12765. Has your father ever spoken about any money transactions that he had with him? No.
12766. Who is the gentleman who is representing your father as his attorney during his absence? My brother, M. R. Jamieson.
12767. Is he older than you are? Yes.
12768. Do you know Mr. John Davies? I know him.
12769. Has he ever been at your father's house? Not that I remember. I have never seen him there.
12770. Are your family and the family of Mr. John Davies on visiting terms? Not that I know of. I never heard of anybody visiting Mr. Davies' house.
12771. Do you know whether your father still holds shares in the Holt-Sutherland Estate? I could not give you any definite information, but I believe he does.

FRIDAY, 3 MAY, 1889.

Present:—

A. J. CAPE, ESQ., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

John William Deering called in, sworn, and examined.

- Mr. J. W. Deering.
3 May, 1889.
12772. *President.*] What position do you hold in the Public Service? Metropolitan and Coast District Surveyor.
12773. How long have you held that position? Since 1885.
12774. How long have you been connected with the Survey Department? Nearly twenty-nine years altogether. I have been in the Government Service thirty-four years.
12775. Is your present position of a responsible nature? Entirely so.
12776. Will you kindly define the responsibilities attaching to it? Every application or case in my district requiring report comes to me, and I recommend direct to the Under Secretary for Lands, as the official in connection with the Minister.
12777. Have those responsibilities attached to your office for a considerable time? Since the passing of the Land Act of 1884.
12778. Then can I take it that your duty is of a highly responsible nature and that, in the main, the Minister looks to you for report and advice professionally? Entirely so.
12779. What district do you cover? From just a little south of Newcastle to the north boundary of the Bega district, extending westerly and southerly to Bathurst and Goulburn within a few miles. Every case comes before me from a minor matter to a £10,000 affair.
12780. I do not ask this question offensively; but will you tell me whether in carrying out your duties you have ever been offered gratuities or considerations? Do you mean during my whole career. I think twice, but not by educated men, or men in position.
12781. Who is Mr. Gordon? A surveyor under me.
12782. Do you recollect the creation of a department called the Casual Labour Board, and the date of its creation? Perfectly. In May, 1887. It was appointed when I gave the duties up.
12783. What was Mr. Gordon's position just previously to the creation of the Casual Labour Board? A surveyor under me.
12784. After the appointment of the Board, what was his position? He had no official connection with the Casual Labour Board whatever.
12785. Was he in any way detached from you? He was not.
12786. Or from the Department to which you belong? He was not.
12787. Can I take it that, throughout the whole existence of the Board, he was a subordinate officer to you, and responsible to your Department? Entirely so.
12788. Will you look at this plan, and tell me by whom it was prepared? Yes; Mr. Gordon, in connection with the Government Department.
12789. Can this Commission take it to be a correct plan? Yes.
12790. What does it show? The roads cleared formed, and in parts metalled by the Casual Labour Board, through lands chiefly of Messrs. Burns, Withers, and Smith.
12791. By whom were these letters B, C, D, E, F, G, H, and I, placed on the plan? By a draftsman in my office, at the request of the Secretary to this Commission. 12792.

NOTE (on revision):—Q 12755—Witness states he did not say "but I did not know their contents."

Mr. J. W.
Deering.

3 May, 1889.

12792. Do they correspond with the letters on any plan that has been before the Select Committee of the Legislative Assembly? They correspond with a plan prepared by their order, plan 8 of the appendix to the Select Committee.
12793. Then these letters are put there for the purpose of convenience of comparison with the plan that was before the Select Committee? Precisely.
12794. Amongst the papers which have been submitted to this Commission is a return laid upon the Table of the Legislative Assembly on 13th November, 1888, relating to the roads at Hornsby, to which is attached (Appendix E) a plan; will you tell me, for my assistance, whether that plan, so far as the lettering goes, corresponds with the lettering of this plan? Yes. The roads lettered on that plan correspond with the roads similarly lettered on the large plan.
12795. But I see on this smaller plan a road marked A, is that indicated on Mr. Gordon's plan now before me? There was no room to put it on the paper if omitted.
12796. Can you indicate whereabouts on the paper it would come? At the extreme north end of the plan of Mr. Gordon's [*Exhibit D 4*]. I will mark the letter "A" in pencil. [*Plan marked accordingly*].
12797. Had you anything to do with the work of the unemployed in the southern district or in or around the Holt-Sutherland Estate? I found the men at work there when I took charge, but I initiated nothing.
12798. Can I take it that this Commission can confine our questions to you to matters outside the Holt-Sutherland Estate? Yes; almost entirely. I cleared Kurnell, but I do not think that that is what you mean.
12799. Confining yourself to this plan [*Exhibit D 4*], will you tell me what, at the time you gave up supervision, was the state of affairs? The road marked A was cleared only.
12800. Nothing else? Nothing else. The public lands we were going to sell were just about to be cleared, and I sent a litho. of the subdivision to the officer in charge on the ground requesting him to continue it, and to clear the public estate.
12801. I put into your hands a minute apparently signed by you, dated 5th May, 1887, just three days after the creation of the Casual Labour Board; does that fairly represent what the position of affairs was at the time? Yes.
12802. I see you refer in that minute to a public road through Bellamy's grant; is that the road you have marked "A" on this plan? Yes.
12803. Did that road lead to the Crown lands? Yes.
12804. Does that road "A" pass through private property or through Crown lands? Through private property.
12805. Did the Government obtain authority to put the road "A" there? Yes.
12806. Will you tell me what it was? It was a permissive authority from Messrs. Burns, Withers, and Smith. An exchange of land was made.
12807. Was it afterwards formally dedicated? Yes; we opened it under the Parish Roads Act. I think that Mr. Burns even dedicated it.
12808. Will you look at a copy of the *Gazette* notice on page 110 of the printed evidence before the Select Committee, and tell me whether that notice refers to road "A"? Yes; for other land to which we surrendered our claim.
12809. What was the other land? On the northern side of the same grant.
12810. Is that shown on this map? No. It was a fair exchange. It suited Mr. Burns, and it suited us.
12811. How did you become aware that Mr. Burns was the owner of that land? Of that particular piece of land?
12812. Of all the land about here? Only through that road being taken through it. I knew then that Bellamy's grant belonged to Burns & Co. I never knew it before.
12813. Then, just about the time of the initiation of work on this road, you found that Mr. Burns was interested? It was just about the time, or a little before, because I happened to see the names of the owners of the land on the Road Plan.
12814. Do you see a minute prepared by you on 17th January, 1888? Yes.
12815. Does that minute refer to road "A"? Yes, entirely.
12816. Not to any other roads? I do not think I have alluded to any other roads.
12817. Can I take it that that minute is correct? Yes; quite correct.
12818. Do you see, on the next page of these printed papers, a minute of 14th June, 1887? Yes.
12819. To what does that refer? It refers to the roads through the public estate, the lithographs of which you have.
12820. And to no others? No; to no others.
12821. Will you look at the first minute on the paper, marked No. 3, a minute not dated, but from a note later the date would appear to be November, 1888; can I take it that the statements in that minute are correct? Quite correct.
12822. Is this road, which you have marked A on this plan [*Exhibit D 4*], the road you speak of there as that leading from Peat's Ferry Road, through Bellamy's grant (now Burns & Co.'s land), and across the bridge over the railway to the Crown land? Yes.
12823. You speak of it as having been cleared and formed? I think the side drains were just cut and thrown up into the middle. I think that was the case. There was no metal put on it by me.
12824. Do you notice a road on this plan [*Exhibit D 4*] called the Boundary Road? Yes.
12825. Did you have anything to do with that, and if anything, what? I think I said it had better be cleared through to the Great Eastern Road. A minute of Mr. Garrett's of 5th May, 1887, at page 3 of these printed papers, refers to the road, and my note there is to continue clearing it through to the Great Eastern Road, because the Boundary Road abutted on Crown lands all the way. No Crown lands, no clearing with me.
12826. Does the Boundary Road go through Messrs. Burns, Withers, and Smith's property? No; it bounds it. Crown lands are on one side, and Messrs. Burns, Withers, and Smith's land on the other.
12827. Look at the minute, 5th May, 1887; it says, immediately following your note, "Road named herein now completed, F.O.D.; who is F.O.D.? Mr. O'Donnell.
12828. Was he an officer under you? When I had charge of the Relief Works. He is not one of my departmental officers.

- Mr. J. W. Deering.
3 May, 1889.
12829. Can you say whether that road mentioned there was cleared its entire width up to the point you were speaking of; I refer to the road in continuation of the Great Eastern or Vanceville Road? No.
12830. Was that Boundary Road, in your opinion, a practicable road? No, it was not; but it was impossible to form a good judgment until we cleared it partly.
12831. I suppose we can take it as conclusive that it is an impracticable road? Yes.
12832. Did you take any steps to get any other road in substitution of this Boundary Road when you found it impracticable? No; I did not want any other road in that locality to sell those Crown lands.
12833. By what route then would the public get access to the Crown lands you were about to sell? Across the road A, and the roads through the Crown estate as laid out.
12834. That being so, could people get to the land by any other road than across the road A? No, only by road A.
12835. Do you think, in the interest of these Crown lands and the public, it was desirable to have any other means of access than by road A? Yes, I do.
12836. Do you know anything about this road which is marked G on this plan [*Exhibit D 4*]? Yes, I know it well.
12837. What is it called? Junction Road.
12838. Do you know anything of its history? I think it was recommended by Mr. Gordon.
12839. I see that on the 31st March, 1886, it was asked that steps be taken for clearing and forming a new road, surveyed by the Government, between Burns, Withers, and Smith's land, and land owned by Fears and others on the other side;—do you know to what that refers? Scarcely.
12840. I see Mr. Symonds reports to the Commissioner for Roads that there was no road marked, that the road in such a position was of no present use to the public, that no persons were living on the back land to make use of it; that no provision was made for crossing the rails;—does that recall the matter at all? No; I scarcely know.
12841. It is in on our papers, and I want to find out whether it affects our inquiry at all? I do not think it affects you at all.
12842. Look at your minute of 14th July, 1886, page 108, Appendix of Select Committee evidence;—what is the proposed parish road you there refer to? The one marked A on the plan.
12843. You see a memorandum above that on the same page, of James Symonds'. It says, "Mr. Surveyor W. M. Gordon to survey the road referred to, with a view to opening under 4 William IV, No. 2, where necessary." Is that still the same road? Yes; it is the road A on the plan.
12844. Do you notice that you invite attention "to the streets already laid out in the private subdivision of Hornsby Junction Estate litho. herewith"? I do.
12845. What plan of subdivision do you refer to there? I believe it is the plan of the subdivision which is plan 4 of the evidence before the Select Committee. My intention was to take advantage of the streets already laid out in the subdivision for the public.
12846. Will you look at page 109 of the Appendix to the Select Committee evidence, a note dated 16th November, 1886, in which Mr. Burns states, "In lieu of the road we first mutually agreed upon, Burns, Withers, and Smith are prepared to assent to the proposed change, provided that the new line is surveyed and cleared for traffic in a reasonable time, and that the Government relinquish all claim in respect of the former line." Do you take it that what you did to the road A was a compliance with that request? Yes, it was.
12847. That is to say, you surveyed it, and cleared it for traffic? We did, and with the public money. We complied with that agreement.
12848. Do you consider that after that the Government were under any obligation to Mr. Burns? I am sure they were not.
12849. Then can we take it that all the correspondence with Mr. Burns up to May, 1887, was in reference to this road A, and the old road to the North, for which A was substituted? Yes.
12850. He speaks of "a line" you made;—does that mean any line of road? It was the boundary line of the grant. There was no other road substituted for that.
12851. If you look at a letter from Mr. Surveyor Perdriau, on page 109 of the Appendix to the Select Committee evidence, you see a reference to a road;—is that still road A? It is still road A.
12852. Who is the Mr. Dawson referred to? Burns & Co.'s private surveyor.
12853. Do you know anything of the difference between the surveyors referred to there? It is a professional misunderstanding.
12854. It is only as to the plan I suppose? That is all.
12855. This appears to be the first occasion in which Mr. Gordon comes into the business? Yes; that only refers to the boundaries of the old grants.
12856. That letter is noted by you;—can you tell me whether at that time Mr. Gordon and Mr. Dawson were brought into contact in any other way than as to road A? I think not. It was not so much about road A as about the boundaries of the old grants.
12857. If you look at the papers you will see a memorandum by Mr. Twyman, of July, 1887, and immediately following that comes a dedication;—does that still refer to road A? It still refers to road A.
12858. At the next page is a letter of Mr. Burns, of 11th August, 1887, he says, "I think right to remind you that it is obligatory on the part of the Government to extend the road to the Great Eastern or Vanceville Road, and to put it in fair passable condition for traffic";—did that come before you in any way? Scarcely. Besides it was not obligatory on the part of the Government.
12859. Was it possible to do this from the nature of the country? No. It was not obligatory, and in that direction it was impracticable.
12860. Did you know whether, at the time you made that report of the 17th January, 1888, there were any other roads in existence at all? No. I know nothing about them. I never saw them.
12861. Have you become aware that, as a matter of fact, at that time there were other roads in existence? Yes; I have become aware of it since.
12862. Look at the letter, dated 28th January, 1888, from Mr. Gordon to the Chairman of the Casual Labour Board;—did you ever have that letter brought under your notice? I did not.
12863. You see in part of it Mr. Gordon says, "The road marked 'G,' called the Junction Road, runs from the railway line easterly to Vanceville Road, passing through slightly undulating country, and crosses the heads of creeks and gullies, which present very precipitous banks after running to Boundary Road." Can you tell me who initiated that Junction Road? I cannot tell you, unless it was Mr. Davies. I did not.
- 12864.

Mr. J. W.
Deering.
3 May, 1889.

12864. Did Mr. Gordon report anything about the matter to you? Never.
12865. Was there anything unusual in that? It was extremely unusual.
12866. Do you see he speaks in the same letter of roads "marked B.C., D.E.F., which are all practicable and fairly level,"—did you have anything to do with these? Nothing.
12867. Did Mr. Gordon report to you in any way about those roads? No.
12868. In the same letter he speaks of the roads, H and I, as being "also good and practicable." Did he report the making of these to you? He did not.
12869. What was Mr. Gordon's position during this time with reference to you? He was a surveyor on temporary salary as he is now.
12870. How came he to be mixed up with the Casual Labour Board? At the time of the Casual Labour Board taking over the work from me they asked for the assistance of Mr. Gordon occasionally, whilst the work was in course of transference. I consented to that and the matter ended, about May, 1887, and it is with surprise that I learn from these papers that he had any further connection with the Casual Labour Board.
12871. Who is Mr. Symonds? A road superintendent.
12872. Look at page 110 of the appendix to the Select Committee evidence. You see a note of Mr. Symonds,—“I inspected this line of roads on the 12th instant, and find that the work of clearing, culverting, &c., has been undertaken by the Casual Labour Board, who have a number of men employed upon it.” Does that refer to road A? I should think that it does; but I cannot say.
12873. Have you had anything to do with the culverting? They might call the work over the bridge on the railway culverting.
12874. At this stage, when you passed over Mr. Gordon to the Casual Labour Board, can I take it that there was nothing more done but the clearing of the road A? Nothing more. I lent Mr. Gordon to them for a day or two to start them right.
12875. After that, did you have anything to do with these other roads? Nothing.
12876. Can you tell me anything about these other roads, B, C, D, E, F, G, H, and I, excepting from hearsay? I went over them with the Select Committee. They requested me to go with them, and then I saw them for the first time.
12877. Do you see on the plan roads marked Burdett, Florence, George, and Smith Streets; do you know any of these roads? I have seen them on the ground.
12878. Do you know who made any of them? The Casual Labour Board.
12879. Are you positive? Yes.
12880. All of them? Yes; all of them.
12881. Do you see this road, marked red to the west of road I, which leads into the road from Pennant Hills? Yes.
12882. Does that go through Messrs. Burns, Withers, and Smiths' property? No; it does not. It goes through the Mutual Building Society's land.
12883. Can you mark it for identification with some letter? Yes; I will mark it K. [*Road marked K*].
12884. Was that done by the unemployed? Yes.
12885. You see a road, being a continuation of the Great Eastern Road, marked J and F? That was partly done by the unemployed. Burns & Co. began to do it themselves, I have been informed.
12886. Do you know how far they did it? They cleared from the Lane Cove Road up to Burns Road.
12887. This continuation of Burns Road to the East of the Great Eastern Road—through whose property does it pass? It passes along the north side of Burns, Withers, and Smith's land, and then after going east a little, it goes south.
12888. It goes south again? It goes south along the east boundary of Burns land.
12889. And then east again—up to what point? It continues east for 13 chains, or thereabouts, to some point.
12890. Does it go to Crown lands? No; there are no Crown lands there.
12891. Was there any object, in the public interest, in having the Great Eastern Road continued up to a point that might strike a continuation of the Boundary Road? Certainly not; because if the Boundary Road is an impassable road, what is the good of getting up to it.
12892. Was there any object in having the roads B, C, D, and E running to the Boundary Road—I am assuming that the Junction Road exists? I would have cleared them through to the Boundary Road.
12893. Given that the Junction road is a public road of access, was there, in your opinion, any occasion for all, or any of the roads, marked B, C, D, and E? I would have cleared them if the people had given the land.
12894. All of them? Yes; but cleared them only.
12895. If that block was Crown land, and you were laying out Crown land to the North, would you have laid out these roads B, C, D, and E? In that locality I would have cleared the roads, if they had given us the land. What I object to is, not the clearing, but the formation and ballasting.
12896. Do you think these roads marked H, I, and K were justifiable, in the public interest? Yes; but only the clearing. I would have cleared through the whole of the Great Eastern Road into the Crown lands. I would have cleared the roads I and C, the road K, and Burdett-street, commencing from the station; but I would never have put a scrap of metal on them. It is not the clearing that is wrong, but the extraordinary expenditure which followed.
12897. Were you examined before the Select Committee of the Legislative Assembly? Yes.
12898. Is this your evidence? Yes.

Evidence before Select Committee.

1333. *Chairman.*] You have had something to do, I believe, with the management of the unemployed? I had the unemployed for about nine or ten months; I think from about September, 1886, to May, 1887.
1334. Did you have entire control of the unemployed up to that time? Yes.
1335. What work did you put them on during that time? Kurnell.
1336. What did you give them at Kurnell? Clearing.
1337. What kind of land? Government land. 1338.

NOTE (on revision) :—Q. 12873—For "They, &c., to culverting" read "Nothing whatever, except at the Field of Mars, a public estate." Q. 12891—After "impassable road" add "as the Board themselves state."

Mr. J. W.
Deering,
3 May, 1889.

1338. Did you put them on any private property, or roads through private property? Certainly not.
1339. Then after Kurnell? Field of Mars.
1340. What property was that? Government property.
1341. Any private roads leading to it or from it? No. I hesitated because I thought there might be a short piece leading to a railway station or something.
1342. But there was not? No; I think not.
1343. The clearing was all on Government land? Entirely.
1344. What other place? There was no other place.
1345. Did you have any of the unemployed working at Hornsby? They commenced a road over the bridge. They commenced to clear it just as I gave up the charge of the unemployed.
1346. That is the road marked A? Yes; I distinctly remember telling O'Donnell (he had better complete it.
1347. That is the only road in the vicinity of Hornsby you authorized? It is the only one I authorized, and it is the only one I saw till the other day—Monday week.
1348. *Mr. Carruthers.*] Is that the road where the bridge is? Yes.
1349. I thought it was a quarter of a mile more to the south? We were going to take the road here [*points to plan*]. There was a piece of Crown land between what we stated was Bellamy's grant and the other grants. It was not a very good road, and we made an exchange with the owners of this grant for this road A. I do not know whether we had a good position with regard to this piece of Crown land. In order to settle the matter, the owners said, "Do not claim this, and we will give you a road over that bridge." It was manifestly to the advantage of the Crown to accept the offer.
1350. You had no acknowledged right to that? No; there was a little doubt about the matter, and we made a very good arrangement for the Crown with the owner of that property by getting that road. They gave it freely.
1351. *Chairman.*] Who were the owners of this? Burns, Withers, and Smith.
1352. Then for this road A you gave them a piece of doubtful Crown land? Yes; unproven Crown land. I do not know whether we should have gained our case. The moment the offer was made I recommended the Government to close; it was so manifestly to our advantage.
1353. Did you recommend any other roads in the vicinity of Hornsby? I did not.
1354. Did you survey any others? I did not, nor cause them to be surveyed.
1355. There is a minute here:—

28 May, 1887.—Board met at 426, Pitt-street.

Present:—Mr. John Davies, F. Wells, D. Houison.

Mr. John Davies visited Hornsby, in company with Mr. Deering, and approved of certain roads being laid out and formed;—

is that minute correct? I do not know what Mr. Davies did. The minute states what Mr. Davies approved.

1356. Did you approve of any roads? I did not approve of any roads. Mr. Burns asked me to go up with him and Mr. Davies on that occasion. I do not think it was an official visit. Mr. Burns was a very old friend of mine.

1357. Was Mr. Burns with you? He was. I never went up with Mr. Davies alone.

1358. Who was with you each time you went up with Mr. Davies? I went with Mr. Burns the first time.

1359. And who was with Mr. Davies the second time? Mr. Burns and Mr. Oliver, the Under Secretary for Lands.

1360. I suppose this 28th May was the first time? I could not say the date; it was about that time.

1361. To assist your memory, I may say that the Casual Labour Board came into office on the 2nd of May, and on the 28th of May there is this record of your being present with Mr. Davies at Hornsby;—was that the time that Mr. Davies and Mr. Burns were with you without any others? It must have been, if that minute is right as to date. I was never there but with Mr. Davies and Mr. Burns.

1362. In this instance, when it applies that you approved of any roads, is that correct;—did you approve of any roads on that occasion? If I did it was the roads through the Crown lands; and I think that is what we looked at on this occasion and the clearing of the reserve.

1363. Did you recommend or approve of roads being laid out or formed on private land belonging to anybody? I did not.

1364. Are any of those roads on the plan recommended by you? None, except A.

1365. Have any of them been surveyed by you? None; nor seen by me until I went with Select Committee last Monday week, nor had that part of the ground been seen by me until I went with the Committee.

1366. From what kind of property does the road A go, and to what kind of property does it lead? It leads from Peat's Ferry Road into Crown lands.

1367. Is it private land to the west? No.

1368. It leads from and to Government property? Yes; there is a reserve there.

1369. Where? That little piece at the western side: it is not quite correctly drawn. I had it surveyed.

1370. Is it a Government reserve? Yes.

1371. Are there any roads leading to that reserve? Yes. Peat's Ferry Road.

1372. Did you recommend that as a reserve whilst you were in charge of the unemployed? No.

1373. *Mr. Brunker.*] You could not make it a reserve unless it was Crown land? Of course it was Crown land.

1374. *Chairman.*] You recommended the dedication of it as a reserve? No; it was a reserve. I recommended subdivision.
1375. Now, all these other roads that you see, are they all, in your opinion as a surveyor, necessary as roads of access to Crown lands? No; I should not say they were all necessary.
1376. Those shown on the plan you gave in with your papers? No; of course they are not all necessary. Nobody could say that.
1377. *Mr. Carruthers.*] Are they beneficial as roads of access? Every road is beneficial to a certain extent—everything has a certain amount of advantage; but if you ask me would I have made them—I suppose that is it—I say decidedly I would not have made those roads.
1378. *Chairman.*] As a surveyor? Yes; having charge of the subdivision of Crown lands.
1379. In the interests of the Crown you would not have made them? No.
1380. About how many of those would you designate as necessary? If you ask me what I would have done myself, I would not have minded clearing Junction Road, the road north from the church into Boundary Road, Vanceville Road, and I would not have minded clearing B, C, D, and E.
1381. *Mr. Carruthers.*] Why would you have cleared them? They lead into Crown lands. I want to say something more: I would not have minded clearing them, provided the owners gave the land free.
1382. *Chairman.*] But you would not have gone any further? No; I would not have formed them. I would not have metalled them.
1383. *Mr. Carruthers.*] They have not been metalled, I believe? Well, call it what you like—ballasted.
1384. *Chairman.*] Would you have recommended the formation of that road alongside the railway-station? No; I would not.
1385. Do you know whether that road is being formed or not? I saw something was being done to it the other day. Is it being culverted, and it has been cleared.
1386. And it is now being formed? Yes.
1387. Now, take the continuation of Boundary Road to the road bordering the railway;—would you have recommended that to be cleared or formed or metalled? Yes; cleared only, provided always the land was given.
1388. Take the one to the south of that—the road running from B into the one bordering the railway-station? The middle one?—no, decidedly not.
1389. You would not have recommended even the clearing of that? No; I would not.
1390. Then the road running southward from that into Junction Road;—would you have recommended that? I would not.
1391. The road running from H, parallel with Burns Road, about 5 chains to the north of it;—would you have recommended the clearing or forming of that road? I would not.
1392. Would you have recommended the road from Burns Road into E? No.
1393. Would you have recommended the continuation of HH, running from Lane Cove Road up to the road I have just mentioned through this little section? No; I would not.
1394. Do you consider that there are too many roads on this section south of the Boundary Road for purposes of access to the Crown lands or to the railway-station? Yes.
1395. What benefit (if any) would be likely to accrue to the owners of private property from the multiplication of these roads? Well, it simply makes the roads for them through their estate. I suppose the value to the owners is the expenditure upon the roads.
1396. Would you consider that the giving of the land would be ample consideration for the construction of these roads? No.
1397. The forming of these roads would give more value to the land than they would lose by giving the land? Yes, beyond a doubt. It would not compensate for the expenditure.
1398. Whilst you were in charge of the unemployed, you have stated that it has been your object to employ them in making roads through subdivisions on Crown land;—is it your opinion that if that course had been adopted with reference to these Crown lands to the north of Boundary Road it would have been more beneficial to the country than to make so many roads south of Boundary Road? Of course, beyond a doubt.
1399. If this expenditure that has been made on private property had been made on public lands, the Crown lands would have profited to that extent? Yes. I would not say to that extent—not to the full extent—but they would have profited.
1400. Of course there must be some roads of access? Yes.
1401. But after the necessary roads of access, if the superfluous roads had been put on Government land it would have been of more benefit to the country? Beyond a doubt.
1402. *Mr. O'Sullivan.*] Have you been over these Crown lands marked here for subdivision? Partly.
1403. What is the character of the country? Bad land; broken rocky country.
1404. Do you think the greater portion of it will be sold during the next ten years? No.
1405. Have all the lands worth buying been bought there already? Not entirely; there is a little fair land, but it is patchy.
- 1405½. How long did you have the unemployed under your care? From September, 1886, to May, 1887.
1406. During that time, did you ever lay out roads across private estates to give access to Crown lands? No; I think not.
1407. Were you ever approached by anyone with the request to do so? No.
1408. If you had had the unemployed when it was suggested that these roads should be laid out across the Burns-Withers-Smith property, would you have carried them out to the extent to which you see them on this plan? I would not.
1409. Are you aware that there are a number of roads in existence on the property not marked on the plan at all? They are marked on my plan.
1410. Not marked on the plan submitted to Parliament? Yes; I am aware of that—numbers of roads. I suppose the plan shows the roads proposed by Mr. Gordon, and that they have made roads since Mr. Gordon's report.

Mr. J. W:
Deering.
3 May, 1889.

Mr. J. W.
Deering.
3 May, 1889.

1411. *Mr. Carruthers.*] Do you know anything about other roads besides those that are shown? Yes; I have been all over them. The Select Committee requested me to produce a plan showing the roads.
1412. *Mr. O'Sullivan.*] Now, take Burns Road;—can you tell where that road leads to off the property of Burns, Withers, and Smith? I do not know where it leads to.
1413. Would you regard Burns Road, running from west to east, as giving access to Crown lands lying to the north of that road? Certainly not; that is exactly the reason that I object to these roads parallel to Boundary-street.
1414. Then the construction or making or forming of Burns Road was not justifiable on the ground of giving access to Crown lands? I do not think it was; I could not possibly say so.
1415. Take road E, running southerly on to Burns Road, do you regard that as necessary to give access to Crown lands? No.
1416. Referring to the road running south from near the western end of Junction Road, is that required to give access to Crown lands? No; but I think it is only fair to state that it is not on the land of Burns, Withers, and Smith.
1417. And you have already admitted that the T-shaped road opposite was not required to give access to Crown lands? Not at all.
1418. What was the object of constructing this road parallel to the railway, and not taking it across Junction Road on to Peat's Ferry Road? I do not know anything about it.
1419. You do not know who made that road or who authorized it? I asked the men who were making it, and they said the Casual Labour Board.
1420. You do not know who authorized it? No.
1421. Do you think it was wise to take this road between those two points to Junction Road and leave it there? I do not think it was.
1422. Do you think it was a useful expenditure of public money? I do not.
1423. With regard to Boundary Road, have you any knowledge of the character of the country along there? Yes.
1424. Would it pay to make a public road along Boundary Road? No, it would not; it would pay to clear it, not to make it.
1425. Do you think it would be preferable to make Junction Road and the tributary roads than to make Boundary Road? Yes; I would have cleared them, not made them.
1426. *Mr. Carruthers.*] You do not understand the question. Mr. O'Sullivan says would you sooner make Junction Road and these tributary roads than make Boundary Road? I would not make either; they are both wrong.
1427. Suppose you had to make one or the other? Then, as a public officer, I would make Boundary Road. I would not make the other.
1428. Then, Boundary Road not being made, do you think sufficient access was given to the Crown land by the Church Road (I) and the Vanceville Road? Yes, beyond a doubt, and the road A.
1429. *Mr. O'Sullivan.*] You consider the roads I, A, and J justifiable roads to give access to Crown lands? Yes.
1430. In your opinion, all the other roads were unnecessary to give access to Crown lands? Well, I think it was right to clear Junction Road. I would not have minded seeing it cleared if they would give the land.
1431. Have you made any observations on the system of subdividing private estates? Yes, of course.
1432. Is it the practice of owners of private estates, when they want to make their land saleable, to cut the land up and clear the streets? Yes; clearing the streets pays, if it is a good estate.
1433. As a business man, if you had been the owner of this whole property and desired to sell it to advantage, would you have laid out and cleared a number of streets? Yes; I would have cleared the streets, but not have formed, metalled, or ballasted them.
1434. By forming and metalling the road, of course you increase the value of the property to that extent? I would not say to that extent exactly. Of course it would improve the value of the property considerably, and effect a sale.
1435. Then do you consider that if the Casual Labour Board had not laid out and made these roads, Burns, Withers, and Smith, if they desired to sell their land to advantage, would have laid it out and cleared certain roads in the ordinary way of business? Yes; they would have done it without a doubt.
1436. And in doing that they must have given access to the Crown lands? No; because they need not take their roads right into Boundary Road; they could stop within 2 feet or a foot, put up a fence, and block us.
1437. Could not the Government resume those 2 feet and make a road? No; because you must resume for a certain purpose, and roads cannot be resumed under the Resumption Act, not being specified as a purpose thereunder.
1438. But you would not be resuming roads, you would be resuming vacant land that was an obstacle to the construction of a public road? Yes; but if it is for a purpose that is provided for by some other Act, you could not put the Lands Acquisition Act in force—not for roads or railways.
1439. *Mr. Bruncker.*] Is there any other Act to give the power? No. The Parish Roads Act only applies where you go from a population to a population, or to a main road.
1440. *Mr. Carruthers.*] And it is only at the instance of the population you can open it? Quite so.
1441. *Mr. O'Sullivan.*] Is there no law on our Statute Book which would allow the Government to force a road through this 2 feet left there as a bar and an obstacle to the public? No.
1442. I mean, providing for compensation and everything else, provided the owners were treated fairly? No; we cannot do it.
- 1443.

1443. *Chairman.*] Would it not be to the advantage of the private owners to take it right through? Yes; quite so.
1444. In considering their own advantage they would have taken them right through? Yes.
1445. Did you never know of a case where the Government resumed private lands? Not for a road. They sometimes resume land for a public purpose, and then resume a road of access afterwards, and which the Lands for Public Purposes Acquisition Act allows.
1446. Then, if they saw that these proprietors were so unpatriotic as to leave an obstacle of 2 feet, would not they probably resume that land and put a road through it? I think it is likely enough that some steps would be taken.
1447. Apart from that altogether, do you think it is probable that owners of an estate like this would play so unpatriotic and selfish a part, and a part so detrimental to themselves, as to leave a narrow barrier between the end of their roads and the Boundary Road? Do you mean, provided they cleared their roads, and we would not clear ours?
1448. Under any circumstances? Yes; it is continually done.
1449. *Mr. O'Sullivan.*] Under these circumstances, considering that the effect of giving access to the Crown land would be to still further increase the value of their own land, do you think they would be likely to do it? Giving access to the Crown lands would, of course, improve their lands.
1450. If the population were induced to settle on the Crown lands at the back of their property, would not the presence of that population give value to their land? Beyond a doubt.
1451. Would it not be an advantage in that case to have cleared roads of access to the Crown lands, in order that the population at the back would be able to cross the street? It would be an advantage to the population, and also an advantage to the owners of the estate.
1452. You admit that if the population were settled on the Crown land that would add value to the property of Messrs. Burns, Withers, and Smith? Yes.
1453. Then, admitting that, and the probability that a little township would go up, with shops and stores fronting the street? Yes; but not there. The township would come here in their estate.
1454. Yes; but even so, the people settled on the Crown lands would naturally have to come there to trade; and with that probability before them, would it not be to the advantage of the owners of this property to give access to the Crown lands? Beyond a doubt, when the population is there.
1455. *Mr. Brunker.*] What population is settled round here, to the east? None at all.
1456. Is not that where we saw the orchards? No; it is a good deal further south. There is a population to the south—not a large population.
1457. Assuming that the population settles to the east and west of these lands, would not these roads of access give increased value to the Crown lands—increase the traffic to the railway? Yes; some of these roads—not all of them.
1458. *Mr. Carruthers.*] How could population settle on those Crown lands if you have no access to them? Of course it could not.
1459. Is it not a rule you recognize that, before you can induce people to purchase this land and settle on it, you must give fair access to your railway lines and main roads? Yes.
1460. You have had a great deal of experience in the sale of Crown lands in the metropolitan area? Yes; I have charge of it all.
1461. How far is Hornsby from Sydney by railway? About 12 miles from St. Leonards.
1462. What have been the best Crown land sales you have had during the last two years, within (say) 10 to 20 miles of Sydney? The Gordon sale, south-east from Hornsby.
1463. Was the sale at Narrabeen good? Yes, very good; but Gordon was better.
1464. Was the Narrabeen sale better than Harbord? Yes.
1465. Very much better? Yes.
1466. You sold a great deal of the Harbord land at the upset price? A good deal of it was left. We did not consider it a good sale.
1467. You considered Narrabeen a very good sale? Yes, a good sale.
1468. At Harbord you did not do very much in the way of clearing roads or land? We cleared the roads.
1469. Did you clear them to anything like the extent you did at Narrabeen? Yes; what there was of them.
1470. Is it not the fact that the unemployed were working for months at Narrabeen? They were making a road (the French's Forest Road) and metalling it—a leading road right through—towards Pittwater.
1471. They made other roads of access to that—cross-roads? I do not think they metalled any.
1472. Ballasted them—gravelled them? No; I do not think they ballasted any. They cleared them and cut side trenches.
1473. Is not Harbord closer to Sydney and Manly Beach than Narrabeen? Yes; from 2 to 3 miles—it varies.
1474. Narrabeen was the better sale? Yes; on account of the proposed railway, projected since the Harbord sale, which will sell better than Narrabeen when next offered.
1475. You remember the sales that took place at Como? Yes.
1476. There is a water frontage there? The sale (on the ground) went too low. We can only account for it by the wet day. Still, every lot was sold, though the attendance was small.
1477. There were no roads made to that whatever? No.
1478. Do you know that after you sold at Como, the unemployed made roads there—from Como to the Wororona River, and to Sutherland Railway Station, and to Heathcote? That was not by my orders; I only cleared Como.

Mr. J. W.
Deering.
3 May, 1889.

Mr. J. W.
Deering.
3 May, 1889.

1479. But do you know it? I do know of the Heathcote and Hurstville Roads since made now you mention it. I gave orders to have Como cleared, and only cleared.
1480. And after the sale, one or two roads of access were made? They might have been promised by the auctioneer if it is so.
1481. Do you know that Sir George Innes, one of the purchasers, sold at a very considerable profit after the roads were made? Yes; I have heard so.
1482. Do you know that Mr. Myles M'Rae bought there and sold at a very considerable profit? Yes; I have heard so.
1483. Does not that enable you to form an opinion that the making of these roads increased the value very considerably, and that the Crown lost through not making them before the sale? Those roads you are speaking of are through Crown lands. The Como prices were too low for the reasons stated.
1484. Now what are the sales at Heathcote? Good.
1485. What was the average price? Some of the town allotments went very high; I cannot remember.
1486. Are you aware that a considerable portion of Heathcote was sold at £12 and £13 an acre? I cannot remember.
1487. Are you aware that contracts were let beforehand, and that the cost of clearing that land for sale was over £12 and £13 an acre? Yes; that is the more distant of the suburban lands. It was cleared by the Casual Labour Board, but should not have been done at all.
1488. Was the sale of Crown lands at Hornsby a good sale? Fair.
1489. What were the average prices realized? About £40 an acre, I think.
1490. You are sure it was not £78 an acre? That was the highest.
1491. Do you remember the best Como brought? I think about £30 an acre.
1492. Water frontage and all? Yes. It went too cheaply altogether, as already stated.
1493. About 11 miles from Sydney? About 13; but then you have to take a boat from the station to get to it.
1494. Supposing I were to offer to drive you on to it? Yes, now you could, by going a long way round through Peakhurst, since the Upper Punt across George's River has been re-established, and since the sale.
1495. You attribute the failure of the sale at Como to the fact that there were not the same facilities to get to the land that there are now? Partly; but then at Heathcote we cleared the land, and we sold it in parts only for what it cost to clear.
1496. How many miles is that from Sydney? Twenty.
1497. And some of that went for £12 or £13 an acre? Yes; but we cannot account for land sales. Sometimes there is an excitement for land sales, and then again you may make your best endeavours and people will not buy.
1498. Is it not the fact that the sales at Narrabeen and Hornsby are the two best sales the Government have had? Yes, for outside lands.
1499. On the two occasions, when you visited this locality with Mr. Burns, is it not a fact that you visited merely the Crown lands? Yes; the reserve near the Public-school site.
1500. Mr. Burns did not take you over his land? Not at all, except the land crossed by the road "A," at the railway bridge.
1501. You confined your attention solely to the Crown lands? Quite so. I do not know what we did exactly. We did nothing in particular.
1502. The object of your visit was to go to the Crown lands? That was on the second visit, beyond a doubt. I am speaking of the first visit. I went up with him as a friend, I understood, on the first occasion.
1503. Then you went officially? No; I do not think I did. I think I went up with him as a friend. He asked me to go with him, and I asked no questions. He asked me if I was disengaged on Saturday, and I went up.
1504. You spent that time inspecting the Crown lands? Yes. I certainly did not look at any of his private lands. We went and looked at the land where the bridge is. That is what we went to look at. We had very little time there. We went to look at this reserve on the first visit. I did not look on the first as an official visit, but the second was undoubtedly.
1505. You stated that, while you consider roads A, G, the Junction Road, I, and J, which of course include C and F—while you consider those justifiable, in your opinion, you would not have made the others? No; and I would only clear those mentioned.
1506. Now, suppose you had to purchase those roads, what was the price of land at the time? I think the land is worth about £40 an acre.
1507. You would have had to pay £40 an acre for those roads? Yes; I think we should have got it for that.
1508. Do you know what it has cost to clear those roads per acre? I know what it is worth.
1509. As it has been done, we are told it would cost £7 an acre? Yes; that is very reasonable if they took trees out 12 inches under the surface.
1510. If you did not go below the surface you could get it done for £2 or £3? For £4.
1511. As you have seen it done, is £7 an acre a fair price? Yes.
1512. *Mr. Bruncker.*] Is not that a big price? It is quite enough. I thought about £6, but did not wish to be too critical.
1513. *Mr. Carruthers.*] You stated in your evidence that you would have cleared these roads if the owners gave these lands free? Yes.
1514. Now you say the value you would pay for the land is £40 an acre, and the equivalent you would give the owner is £7 an acre? Exactly; I expect to make something out of it for the Government. That is the way I work. Then we proclaim that road, and it gives a frontage to the estate.
1515. You would be doing justice to your employers? Exactly; I serve the Government exactly as if they were private individuals.

1516. And getting the best of the bargain? Exactly.
1517. Now, I know you speak as an officer looking at a normal state of affairs; but considering that the Government had a large number of men unemployed, for whom they had to find relief work, do you think they lost anything by the bargain in this case in getting roads G, I, F, J ballasted while they were on the spot, after getting the land given to them free—so getting perfect access to the Crown lands—considering the cheap labour, and the necessity to find employment for this labour? I think the Government lost by it, beyond a doubt.
1518. In what way? We did not get the money back that was expended on these roads, and never shall.
1519. You say that, despite the fact that it has been the best sale you have had? That has not been the best sale. I said the Gordon sale was the best. I was rather disappointed about this sale. I did not think it was a particularly good sale.
1520. You said before that the Narrabeen and this were the two best? So they were, as regards outside sales; but Gordon is a suburban subdivision virtually.
1521. What did this land fetch? About £40. Some we would not sell at all.
1522. £78 was the highest? Yes.
1523. What was the lowest? £25, I think. [*Refers to lithograph with selling prices marked.*]
1524. Where do these roads come in? [*Witness indicates approximate position of roads.*]
1525. Do you notice that where you have marked the road C coming in, the price obtained is the highest in that block? Yes; but it was not because of that exactly. The reason that fetched such a price was because it has such a long frontage to the Boundary Road.
1526. You do not give any credit to the fact of there being a good made road facing it? Not very much.
1527. If it is no benefit to the buyer of that lot, can you tell me what advantage it is to the people through whose land it goes? Of course it gives them double frontage all the way.
1528. There remains the fact that this land brought £65 per acre; the next block, facing the same road, £61 per acre, and the other blocks diminish in value down to £41? Yes; but there are different elements there.
1529. Now take the block where the next road, D, comes in;—do you notice that this block fetches £33 per acre; the next blocks to it, although they are closer to the station, drop to £25, £29, and £27? Yes; but that is not the reason why. The reason that fetched the money is that Boundary Road is made and King Road is not.
1530. Nevertheless here is this road made to that limit, and yet this fetches £60? Yes; but the best of the land is on the top of the hill. Some of the other did not fetch so much because of the rocks. [*Refers to plan.*]
1531. Do you know that Burns and Withers sold some land on the other side of the railway line? Yes; in the Hornsby Junction Estate, at 20s. per foot to £3 10s. per foot, near the railway station.
- 1532-3. Are you sure they did not sell some on the same side as the Government land? I do not know; I was not aware that they had.

Recalled and further examined, 3rd December, 1888:—

1534. *Mr. M. Millan.*] Mr. Gordon is your officer, is he not? Yes.
1535. He seems to have had a good deal to do with the initiation of these roads, if I understand aright? It seems so from the papers.
1536. How was it that Mr. Gordon, being an officer in your Department, should do anything in the matter without its going directly or ultimately through you? He should not have done so; it was very wrong of him to do so.
1537. You are, I believe, in the position of head surveyor to the Metropolitan District? Yes.
1538. And every officer in that district is under you? Yes.
1539. For how long did the period extend during which Mr. Gordon was acting, or is acting, on his own account, instead of acting directly through you? I can judge only by the papers. I see his letters now for the first time.
1540. But speaking roughly? I see there are four of his letters in the papers at various dates, from October, 1887, to May, 1888.
1541. Are you not supposed to have a more or less accurate knowledge of the movements and works of your officers? Yes.
1542. You say you know nothing, except from reference to Mr. Gordon's letters, of what he has done in the matter; surely, during the eight months to which you have referred, you have some knowledge of the work occupying Mr. Gordon's time as your subordinate officer? You see he might easily have written any one of these letters without my having any knowledge of it.
1543. Mr. Gordon is an officer under your supervision; he is engaged on certain work, and, by the rules of the office, he should report to you, you being responsible to him;—how could he be so long employed on work of which you knew absolutely nothing? He was not employed exclusively on this work during the period I have named. All I say is, that he wrote these four letters during this period. He was not employed by the Casual Labour Board from October, 1887.
1544. What I want to get at is this: Mr. Gordon did a certain amount of work as your officer in connection with this Hornsby Estate through the Casual Labour Board;—how is it that he did work of this kind without you having any knowledge of it. I take it for granted that you ignore, as far as you are concerned, and that you disclaim any responsibility for it? Yes.
1545. How can you ignore work done by an officer in your own department for whose action you are directly responsible to the Minister? I can only say that these letters are unwarranted.

Mr. J. W.
Deering.
3 May, 1889.

1456.

Mr. J. W.
Deering.

3 May, 1889.

1456. Was Mr. Gordon not employed by the Casual Labour Board under Mr. John Davies? No; he was not. I protested against Mr. John Davies writing to Mr. Gordon. Mr. Davies wrote to him recently, and I protested officially against his letter.
1547. Did not Mr. Gordon do some work in his position as a Government officer in connection with these roads? You are rather emphasising what he did. Of course he knew the country intimately.
1548. You know now that Mr. Gordon was employed by the Board—that he had something to do with it? I did not know till I saw the papers.
1549. You know now? I know now.
1550. How could an officer under you be spending his time doing certain work without you having some knowledge as to how it came about? He was not spending much time at it. I know, as a matter of fact, that he could not have done so. He could not possibly have done so without my knowing it. He sends me a progress journal every month. You must bear in mind that it would not take a very long time to write any of these letters and to make these proposals.
1551. He had no right, without instructions from or without the letter going through you, to take the initiative in any work of this kind? He had not. I may say that I reprimanded him for writing this letter of 28th January, 1888.
1552. *Mr. Street.*] Had you at any time charge of the unemployed? Yes.
1553. When? From about September, 1886, to May, 1887.
1554. Can you tell us how it was that you gave up charge of the unemployed? I found that I could not carry on my duties as district surveyor and carry on the "unemployed" work as well, and resigned the latter.
1555. Who succeeded you in your charge? The present Labour Board. Sir Henry Parkes asked me to be on the Board, but my official duties were too heavy.
1566. How were the unemployed paid during the time you had charge of them? By contract.
1557. All? Well, there were, of course, a few whom we could not pay by contract.
1558. Were any large number employed upon day labour? No; very few.
1559. On what description of work did they engage? Well, clerks, storemen, and making culverts. They were paid at day rates.
1560. What rate of wages were paid to them? I gave one of the men 6s. a day; he was a ship's carpenter, and a skilled labourer.
1561. Do you know the position of the Boundary Road dividing private roads from Crown lands? Yes.
1562. It has been said that it is very difficult and expensive in its formation? In one place.
1563. The Boundary Road being difficult of formation, do you consider it necessary to form the Junction Road in order to get communication with the station? I would have cleared it, but I would have formed nothing.
1564. This would have enabled the private land to take advantage of the features of country? Yes.
1565. That being so, what advantage was it to the private owners that roads B, C, D, E, and F should be constructed? Well, it would give them cleared roads and additional frontages.
1566. But it seems to me that they did not want it? Of course they did.
1567. What for? For the subdivision of their property. You see that this land would be cut up into much smaller allotments than shown on lithograph, with roads running east and west.
1568. *Mr. Carruthers.*] Is it a fact, with regard to the Narrabeen land sale, a lot of roads leading to that estate were formed by the Government through private property—French's Road, for instance? French's Forest Road is a public road, that is the difference.
1569. What do you deem a public road? A road proclaimed under the Act.
1570. That is what you, as a surveyor, deem a public road? Yes.
1571. Are you aware that cross roads from French's Road have been formed to the Narrabeen Estate through private property;—Wheeler's, for instance? Yes; I know Wheeler's Estate.
1572. Are these cross roads formed to give access to the Narrabeen Estate? I would not have formed it.
1573. But are you aware whether it has been done? No.
1574. You have not observed it? No; the cross roads were not done by my suggestion.
1575. *Mr. M'Millan.*] Is it not a fact that the natural way of getting up on the Government land at Hornsby is north and south, the gullies rendering it impossible to take the roads east and west? Yes.
1576. I understand that the land is so full of gullies and creeks, that in opening up the property it is necessary to take roads from north to south? Yes; but not so many as have been made.
1577. But speaking generally? Yes.
1578. I take it that the Crown land is not so different to that of Messrs. Burns, Withers, and Smith, that it might ultimately get into small subdivisions? That is not so.
1579. There are great natural obstacles in the way of forming the Boundary Road? Yes.
1580. Taking for granted that Pearce's Corner line is constructed, would not the natural way to get to the Crown lands be from that direction instead of coming straight on from Hornsby? Yes, partly.
1581. It follows that it would be necessary by some means to open up communication on that line to various points of the Government land? Yes.
1582. Suppose you owned the Government land yourself, and you wanted to make a mutual arrangement and simultaneous settlement of both your land and the other land, would you not feel inclined to make arrangements for roads to be constructed pretty much as these roads have been constructed? No; I would not, 1583.

1583. Then how would you get the benefit of access from Pearce's Corner Railway? I would not offer to spend £5,000 in order to get £4,000, land included.
1584. But speaking generally, would you not try to arrive at some arrangement with your neighbours on an equitable basis for the opening up of the roads through yours? Without doubt.
1585. *Mr. O'Sullivan.*] But you would not spend £5,000 to get £4,000? No.
1586. Do you consider that the value which the Government have given to this property is greater than the value they have received? Yes.
1587. *Mr. M'Millan* has asked you whether you would not endeavour to come to some arrangement with your neighbour for the making of these roads; but suppose you saw that your neighbour was doing these roads himself, would you step in and relieve him of the work? No; I do not think so.
1588. Roads have been commenced upon the estate by Messrs. Burns, Withers, and Smith before the Government commenced constructing any? I believe so.
1589. *Mr. M'Millan.*] If I understand your evidence rightly, it is more against the number of roads made than the advisability of some? I admit the advisability of some being cleared.
1590. *Mr. O'Sullivan.*] Taking up that line of argument, and admitting that some roads should be cleared from the Pearce's Corner line to the Crown lands, do you admit that four roads running in that direction are absolutely necessary? Certainly not.
1591. You say that you did not authorize Mr. Gordon to work for the Casual Labour Board? I did not, and I objected to it the moment I knew of it.
1592. If Mr. Gordon undertook work under their instructions he did wrong, and should have received his instructions from you as Metropolitan Surveyor? Yes.
1593. Did you think it your duty to interfere with Mr. Gordon's work, knowing that he would be authorized to construct the roads by Mr. Davies, who represented the Colonial Secretary? I did not know that at all.
1594. You were not conscious that Mr. Gordon was doing this work? Not till I saw these printed papers.
1595. *Mr. Street.*] You say you do not consider all these roads necessary;—which would you have dispensed with? I would rather say the roads I would have cleared, for brevity. I think, in view of the convenience of persons coming from Sydney, the Vanceville Road should have been cleared, provided the owners would have given the land; I would clear a road to give access from the Pennant Hills; I would clear the Junction Road along its whole length, provided always that the owners would give the land; I would also clear the extension of Boundary Road westerly to the station; road A I think I cleared myself.
1596. If you would have cleared only these roads, by what means would you have given the purchasers of Crown lands access to the good land between the gullies;—for instance, road B would lead up to a lot of good land according to the evidence we have taken? I would clear all the tributary roads from Junction Road. My great objection to the roads through this private estate consists in the formation, ballasting, the side drains, and the culverts.
1597. *Mr. M'Millan.*] But you do not object to the clearing? No.
1598. *Chairman.*] Are you now speaking of all the roads? I am speaking of those I have just enumerated.
1599. *Mr. Copeland.*] You object to the other roads altogether? Yes.
1600. Have you any reason to suppose that if the Government had not cleared the roads through this estate the owners themselves would have cleared them? I am sure they would.
1601. Is it not a fact that the laying off of the roads really forms the subdivision? It forms the back bone of the subdivision.
1602. In every case you know of, have not the owners of private estates laid out the roads and cleared them? Yes; so far as I know, in any valuable estate.
1603. Were not these roads through the Burns, Smith, and Withers' Estate laid off and surveyed before any Government expenditure was made upon them? Yes.
1604. The whole of them? Yes; by Mr. Dawson, I believe, the surveyor to the Burns' Estate; I am not sure that all of them were laid off, but some of them I am sure were.
1605. And your experience leads you to believe that the owners of these private lands would have cleared the roads at their own expense? There is no doubt about it.
1606. That applies to the roads on the whole estate? It does; still they might have done it in their own time.
1607. You did not survey any of these roads? No.
1608. You have no intention of recommending that the Crown lands to the eastward of the Government subdivision should be put on the market immediately? No.
1609. They are very rough? Yes; some of the Hornsby Government Estate, near the railway, is not yet sold, we could not sell it at £10 an acre.
1610. Then there was no immediate prospective benefit to the Government resulting from the making of many of these roads? No; the making of the roads was wrong, there is no getting away from that.
1611. You have been out on these roads on several occasions? Yes.
1612. Did you go out officially or unofficially? I went out with this Select Committee, that was my first visit.
1613. But you have been out on to the land before? Yes; but not on to the roads, I was never over Burns' land before.
1614. What was your object in going out there? If I remember rightly I went out with Mr. John Davies in connection with the reserve.
1615. Did anyone else accompany you? Mr. Burns.
1616. Had you any roads through the portion of Crown lands on the western side of the railway now forming the reserve? No.

Mr J. W.
Deering.
3 May, 1889.

Mr. J. W.
Deering.

3 May, 1889

1617. That land was formerly Crown land subdivided with the object of sale? It was designed; I do not think it was subdivided; I do not think it got so far as that.
1618. Do you remember the area of the reserve? 27 acres.
1619. That was designed for a subdivision? It was.
1620. Did you make or form any of the roads? No.
1621. Or metal any? The land was never subdivided. The subdivision was stopped.
1622. Have any roads since been made on that side of the railway on what now forms the reserve? I think not.
1623. You recommended that that subdivision should be sold? I did.
1624. But it was afterwards not sold? It was not.
1625. But it was made into a reserve? It was.
1626. At what do you estimate the value of the land near the railway? £1,000 or £1,200 perhaps.
1627. How much is contained in the portion of the reserve near the railway? 27 acres. Some of it is very precipitous. There are 10 acres of good land, and those 10 acres would be worth £3,000. They adjoin the Public School and Court-house sites.
1628. Did not the Public School and Court-house sites form part of the reserve? They did.
1629. Before it was made a reserve? No; before it was subdivided.
1630. This 10 acres which you estimate to be worth £3,000 was, with other lands, subdivided by the Crown for sale? Yes; but not marked on the ground.
1631. But the sale never took place, and the land was reserved? Yes; that is so.
1632. Can you say when it was reserved? In 1887.
1633. While Mr. Garrett was Minister for Lands? I think so.
1634. Is it not a fact that I previously refused to make a reserve of it? By reference to the papers now before me, you refused to do so on the 7th December, 1886. Your minute is to this effect: "Mr. Burns, M.P., may be informed that sufficient provision has already been made for reserves in this neighbourhood; but should the public interest require further provision to be made at present, I see no reason for withdrawing the portion referred to from subdivision." I may say that I reported against Mr. Burns' application.
1635. For what purpose has the land been since reserved? For public recreation.
1636. I understand that 4 acres are taken out for a Court-house Reserve, and that over 2 acres were taken out for Public School reserve? Yes.
1637. And the balance of the 10 acres has since been formed into a recreation reserve? Yes. I ought to explain that the Court-house site was on the other side of the road.
1638. But the Public School site was a portion of the 10 acres? No; I think you misunderstand; the 10 acres was beyond that.
1639. The 10 acres valued at £3,000 has been made into a recreation reserve, and, in addition to that, reserves of the areas I have named have been made for the Court-house and a Public School respectively? Yes; the Court-house is on the eastern side of the Peat's Ferry Road, not on the eastern side of the railway; I daresay it amounts to 4 acres.
1640. Have any roads been made through these reserves since they were proclaimed? Not that I am aware of.
1641. You are aware that the employment of these men in making roads was simply to take them off the labour market? I understood so.
1642. Had you no Crown lands subdivisions upon which this labour could have been judiciously expended in the making and forming of roads, take Harbord for instance? Oh, yes; and we had the whole of the Field of Mars.
1643. You would have had no difficulty in finding employment for any number of unemployed in making roads through Crown lands subdivisions? None whatever; there were 4,300 acres of unsold land at the Field of Mars. The Casual Labour Board might have used the unemployed out there.
1644. It is said in the debate in Parliament that I had to do with the starting of the unemployed in making these roads; you have had charge of the papers I believe? They have come to me officially from time to time.
1645. As the Metropolitan District Surveyor you would know to what extent I, as the then Minister, had to do with the opening of these roads? You had to do with the A road only.
1646. What was the extent of my connection with the opening of that road? As Minister, you approved of the exchange of a strip of land to the north of the grant for the road going over the bridge to Crown land.
1647. The road is from Crown land to Crown land? Yes.
1648. What is approximately the length of it? Half-a-mile.
1649. Had I anything to do with giving instructions for the opening of these other roads? No.
1650. Can you find the papers;—I myself cannot find the papers showing that I had to do even with the road A? I do not see the paper; but I know that it was so.
1651. You were asked whether the private owners would benefit by subdivision roads from Junction Road—how many acres would those allotments contain? The land would not be sold in those large-sized allotments, as shown on lithograph.
1652. Would it not be necessary to even further subdivide the land, and to have an additional number of roads? Yes.
1653. You were asked whether it was not a fact that roads had been made through private land at Narrabeen—do you think it justifiable that these cross roads should have been made at the public expense? I do not approve of making these roads at all through private land. Clearing is a different thing.
1654. You do not object so much to the clearing of the land for the roads? No; provided the owners give us the land.
1655. But in cases where the owners of private land are going to subdivide, would it not be preferable to leave them to clear their own roads, while we employed the unemployed in clearing

- clearing the Crown lands subdivisions? I should clear only one or two of the leading roads.
1656. But you would clear those roads if you knew that the owners of the land were going to clear and subdivide? Well, I do not know; they might not clear in time for our sale.
1657. And in a case of that kind you would consider it justifiable to clear the roads? Yes.
1658. Will you state the nature of the obstacle in the Boundary Road preventing it from being made a passable road? The moment you leave the present subdivision and cross the creek you come on to a wall of rock. It is between the roads D and E.
1659. But it is sandstone rock? Yes.
1660. Would there be any difficulty in cutting through that rock and filling up the gully? You could greatly improve the road by a large expenditure of money.
1661. Which would have been the largest expenditure, the making good of that one bad place in the Boundary Road, or the expenditure which has taken place upon the whole of these roads on private property? If the money expended on the making those roads had been expended on the Boundary Road, you could have made a very good road of it. I think it would have made it a very passable road for £2,000. You would have to cut off the top, and run it down into an embankment.
1662. What, roughly, has been the expenditure upon the whole of these roads on private property? They have cost £5,000 if they cost a shilling.
1663. Has not road A been extended through the Crown land subdivision? It has.
1664. In point of fact, Crown land to which access is given by the roads E and F is unfit for subdivision at the present time? It is not advisable to subdivide them at present.
1665. I suppose those lands are comparatively worthless at the present time? They are not worth £10 an acre.
1666. And you have no idea of recommending that those lands should be put upon the market at present? Not for some time to come.
1667. I presume we have plenty of land already subdivided of a superior character which could be put into the market to supply any demand? Oh, yes; we have much better land than that.
1668. Can you give us any information as to the area of Crown lands subdivisions available in the same neighbourhood? We have a lot of land further on than that. We have 5,000 acres subdivided to the east of it; it is a better quality of land. I left the worst to the last.
1669. This land you look upon as the worst? There cannot be any doubt about that.
1670. In addition to this, what area of land have you at Harbord unsold? 270 acres.
1671. What area have you at Becroft and Field of Mars? 4,300 acres, and in addition to 4,300, Narrabeen and Gordon.
1672. Upon the whole of this land you could have employed the whole of the unemployed in metalling and forming roads? Yes; but I object to metalling even on Crown lands—it does not pay.
1673. At all events the men could have been employed in forming the roads there? Yes.
1674. The roads were surveyed? Yes.
1675. Your experience is that the expenditure of labour on these subdivisions would have enhanced the value of Crown lands, and the Government would have been recouped? Yes, I think so; if the roads were cleared and culverted only.
1676. You think the Government would have been recouped in the wages of the unemployed so engaged? I do not think they would have been recouped, but the increased receipts would have gone towards it, and effected a sale of the lands.
1677. Do you think that the Government would have been recouped in making these roads through the properties of Messrs. Burns, Withers, and Smith? No honest man can, I think, honestly say so.
1678. *Mr. McMillan.*] I understood you to say that the expenditure upon these roads through private property had been £5,000? I am sure of it.
1679. And you say that for an expenditure of £2,000 you can overcome certain difficulties on the Boundary Road? Yes.
1680. But I suppose that even with the expenditure of that £2,000 would not make the road a satisfactory road? No; there would be a very steep gradient, about 1 in 6, I should say, in one place.
1681. What would it cost to make the Boundary Road a satisfactory road for the purposes of traffic as a Junction Road? It would cost a lot of money; you would have a 50-foot cutting.
1682. But roughly, what would it cost to make the road a satisfactory road? £10,000, roughly.
1683. Then it would cost twice as much to make that one road satisfactory as it has cost to make the whole of these other roads? Yes.
1684. But even suppose the Boundary Road were made, that would not preclude the necessity for other roads leading up to it? No.
1685. So that even suppose there were certain roads which are not absolutely necessary at the present time for the purpose of the plan, they have been laid out as a mere matter of economy, for the purpose of giving access to this property? I approve of the four roads going out of the Junction Road.
1686. That is not my point; I do not wish your evidence to appear inconsistent. The inference to be derived from your reply to Mr. Copeland just now was that the Boundary Road could be made in a certain sort of way? My evidence will not be inconsistent. I know for £2,000 you can cut down a lot of stuff, run it down, and make an embankment of it.
1687. But you could not for that expenditure have made a satisfactory road of Boundary Road? Not altogether satisfactory; there would have been a steep gradient under any circumstances.
1688. You have said that you approved of that road? I approved of the clearing of the road.
1689. What I want to remove from your evidence, then, is this appearance of inconsistency;—

Mr. J. W.
Deering.
3 May, 1889.

Mr. J. W.
Deering.

3 May, 1889.

it might appear from your evidence that the Boundary Road could have been substituted for this expenditure for the Government Road? It certainly could not; it is to the advantage of the Government to have the Junction Road cleared, but only cleared provided the owners gave us the land.

1690. You say that there has been no communication between you and the unemployed department? Not the slightest.

1691. Consequently your knowledge as to the value of this land would not be at the disposal of the Board? No application was made to me.

1692. Is it not a fact that at the sale of the Hornsby subdivision as much as £70 an acre was given? Yes.

1693. Do you not consider that a good price? Yes; the very best of the land was bought, some of the inferior land was left.

1694. This land that brought £70 an acre was all on one spot? Yes; only one allotment, I think, brought £70 an acre; the average was £35 or £40 an acre.

1695. As a Crown land sale was it a good sale? Taking it altogether it was a fair sale.

1696. Are we to infer that the prices obtained were a fair test of the value of the land generally? It was a fair test of the value.

1697. Consequently we can say that the roads about which we have been talking open out land which is as a whole of fair quality, excepting the test of this particular sale? No; the land was the pick of the land there.

1698. Was there, as far as you know, any evidence before the Casual Labour Board showing them that this land was not the fair average of the Crown lands in that neighbourhood. Do you know whether the Board were aware that this land was better than the remaining Crown land to be disposed of? I know that Mr. Davies himself is one of the best judges of land in the country, and he knew this particular land.

1699. Then you cannot tell us definitely whether there was any evidence in the possession of this temporary department to give an idea that they were making an entrance to land which was not of as good average value as the the bulk of the Crown land in the vicinity? I think they had a tracing supplied to them.

1700. *Mr. Copeland.*] Was not the land visible to the Board; could they not have judged for themselves? Yes.

1701. The Board consisted of two professional men and Mr. John Davies? Yes; but the professional men were very much engaged otherwise; they had other duties to attend to.

1702. But any one of the members of the Board could have gone on the land and judged of its value for himself? Yes.

1703. As a matter of fact, the further away you get from the railway the less valuable the land becomes? Yes, as a rule.

1704. What was the reason you stopped short with your subdivision at Hornsby? Because the other land was not worth subdividing at the present time. If it was, I would have it surveyed next week.

1705. Vanceville land is the land which the road E gives access to? Yes.

1706. You said just now that the land sold at Hornsby fetched an average of £40 an acre? About that.

1707. Was not that land cleared? Yes; the roads were cleared and grubbed.

1708. If you were to clear, grub, and form roads on the land further to the east you would still receive much less money for it? Yes; proportionately.

1709. *Mr. Carruthers.*] What was the full amount which you realised at this sale? £4,300.

1710. Did you sell all that you put up? All that was of any good.

1711. What proportion to the land sold to the land unsold? I think we sold about two-thirds.

1712. *Mr. Copeland.*] How long were the men employed making these roads? Since May, 1887.

1713. Up to the present time? Yes. After they had cleared our land they put the men on to the other land.

1714. If a mistake had been made at the outset there was ample opportunity to rectify it by withdrawing the men? Yes; I suppose so.

1715. *Mr. Street.*] What was the total number of acres you put up for sale? 230 acres. We sold about two-thirds, it realised £4,644.

1716. *Mr. Copeland.*] It would be an average of about £33 an acre? About that.

1717. *Mr. Carruthers.*] Will you put in the sale plan which you are reading, as part of your evidence? Yes.

1718. *Mr. Copeland.*] You did not think that the clearing and forming of the roads in the Crown land to the eastward would pay? No, it would not pay.

1719. The Government would have lost by the transaction? Yes; the country is so bad.

1720. *Chairman.*] You said just now that you knew nothing of Mr. Gordon's action except from what you saw of the printed correspondence? Yes.

1721. He surveyed and authorized no roads with your knowledge? No; he surveyed no roads at all.

1722. If he states that he recommended road E and some other roads, is that correct? I know nothing about it, I know that he surveyed none, no amount of his time was taken up, I had a check upon him.

1723. He states in connection with the recommendations made by him to the Casual Labour Board that those matters were known to Mr. Deering;—if you read Mr. Gordon's evidence in reply to 723, and so on, you will see what I mean? He knows that it is untrue. You will see that he implies in the first part of his examination that the matter was unknown to me, which is evident. If it were known to me, I would have made the recommendation if proper, and not Mr. Gordon. That is a disapproval of his statement.

1724. He also states in his evidence that you wrote a letter to the Casual Labour Board that

that you would assist them to the full extent of your power, and that Mr. Gordon would do the same? That is likely enough, on transferring charge of the "unemployed." I think it was the case, but they never applied to me. We were seized of the whole of the operations desirable and necessary; we knew what should be done, and I think I simply wrote to say that I would aid them in any way in my power.

1725. What you meant to imply was, that so far as the work upon which you had been engaged was concerned you would be glad to render your services available? Yes; I meant of course, that they might have my official advice.

1726. Mr. Gordon says that Mr. Deering handed his services over to the Casual Labour Board to carry out the rest of the work:—would that be true? It might have been for a very short time correct, and referred to anything which was in hand at the time of transferring charge of the "unemployed," but I objected to any action between Mr. Gordon and the Casual Labour Board.

1727. You did not mean that Mr. Gordon could at any time communicate with the Labour Board and place his services at their disposal without your knowledge? No.

1728. If he did so without your knowledge, should you consider that he had exceeded his power? Yes.

1729. On examination by Mr. Carruthers the other day you were asked about the prices realised by the land at Narrabeen, Harboard, Gordon, &c. You were asked this question with a view to show, I think, that the lands to which most access had been made realised the best prices? In connection with the land for which we received the most money no roads at all were made.

1730. Do you consider that the value of the land sold at Hornsby was given to it by its juxtaposition to the railway, or by the roads which had been made through the property of Messrs. Burns, Withers, and Smith? The juxtaposition of the railway was the chief cause of what was realised. The land further away is not only poor, but also decreases in value, from its distance from the railway line.

1731. Can you give us anything like an idea of the proportion of money spent upon the Crown lands at Hornsby to that spent upon the private property there? They could not have spent more than £700 or £800 upon the whole of the Government subdivision; but on Messrs. Burns, Withers, and Smith's land I am confident they have spent not less than £6,000.

End of Evidence before Select Committee.

12899. *President resuming.*] Was that evidence submitted to you for revision? Yes.

12900. Having now heard that evidence read, do you wish to make any correction or explanation? In reply to question 1715, I spoke from memory when I said that 230 acres were put up for sale. It should have been 232 acres. Instead of selling two thirds, we sold exactly one half, 116 acres, and it realized £4,614, the amount I stated. The average price was £40 per acre, as I previously stated, and not £33, so that my average was right. In answer to question 1489, I said the average price realized was £40, "I think," but now I am sure it was.

12901. With these exceptions, is your evidence as given before the Select Committee, true and correct in every particular? Yes, and I may add that at the time I gave this evidence, Mr. Burns was present.

12902. Have you any feeling in this matter other than your interest as a Government officer? Not the slightest.

12903. Is Mr. Burns a friend of yours? Yes, he was.

12904. Have you ever had any quarrel with him? Not the slightest. I was friendly with Mr. Burns.

12905. *Mr. Franklin.*] Have you a plan of actual survey, giving the length of each of the roads on Burns, Withers, and Smith's land? Yes.

12906. Are the lengths of the roads of the subdivisions for the Crown lands also shown on that plan? Yes.

12907. Can you give us the exact length of the roads on the Crown lands, and also the roads on Burns, Withers, and Smith's Estate? Yes.

12908. *President.*] I see in November, 1888, the following question was asked in the Legislative Assembly by Mr. Fletcher for Mr. Copeland—how many chains of road have been formed, and how many chains metalled at the expense of the Government on the private property of Messrs. Burns, Withers, and R. B. Smith, M.'sP., at Hornsby, and the total amount expended by the Government on the said work. The answer Mr. Bruncker gave was—"499 chains formed, 326 chains ballasted." I am not in a position to state the cost of the work, but no doubt the Colonial Secretary will be able to obtain the information from the Casual Labour Board. Following that is this:—"Since the foregoing answer has been prepared, I have been informed that it had reference to all the roads formed at Hornsby. Mr. O'Donnell reports to-day that the quantity of road formed and ballasted through Messrs. Burns, Withers, and Smith's property at Hornsby by the Casual Labour Board is approximately 24 chains of road forming, at a cost of £18; 53 formed and ballasted at a cost of £106; total, £124; clearing at the average rate of £7 per acre, or £56 per mile, is not included in the above." Now, is the answer to that question correct? The first answer is correct, but the last answer is utterly incorrect. I heard Mr. O'Donnell withdraw that statement, and admit that it was incorrect on the Hornsby Station.

12909. In whose presence? In Mr. Bruncker's presence.

12910. Can you give me what the correct state of affairs is? I furnished the material for the first reply.

12911. But not for what follows? No. Mr. O'Donnell makes it appear that they have only cleared 24 chains.

12912. Is the first part of the answer true? Yes. There were 6 miles at the outside, and he says only 24 chains.

12913. Then the answer as to 499 chains being formed and 326 ballasted is correct? Yes; 499 chains formed and 326 of that number ballasted is correct at that date.

12914. Then, what as to the report that 24 chains of road were formed, costing £18 and so forth? That is utterly untrue, and I heard Mr. O'Donnell withdraw it.

12915. Do you know the cost of 499 chains of forming? The cost would be something like £7 or £8 per chain to clear, form, and ballast it.

12916. *Mr. Waller.*] Did Mr. Gordon ever make any report to you as to the making of these roads? Never.

12917. Do you know whether any authority was given from the Government for the making of these roads? I am tolerably sure there was not.

12918.

Mr. J. W.
Deering.
3 May, 1889.

Mr. J. W.
Deering.

3 May, 1889

12918. Is it usual for authority to be given for the making of such roads as those made on the Hornsby Estate? I should think so. I should say authority should be given before that vast expenditure was undertaken.

12919. Are you quite sure you never gave authority? Certainly not.

12920. We have an answer to a question as to whether there was any authority for making these roads, as follows:—We asked: "Did you approve of this road as handed over to you." *Answer*: "I did, excepting the Boundary Road right through. I refused to allow it go on, although Mr. Deering laid it out because it was impracticable from an engineering point of view." *Question*: "Who recommended them?" "I understood Mr. Gordon." Now did Mr. Gordon have any authority in the position he stood in, to give authority for the making of these roads? No. Might I add something. The Casual Labour Board were only too glad to get some official to recommend what they wished to carry out. They endeavoured to get other things recommended which I refused to recommend. I look upon Mr. Gordon as a victim.

12921. We have this on evidence by Mr. Houison. What we want to get at is: "Was there any authority for making these roads." The answer is: There is that paper that is missing. I fancy there was Mr. Deering's name on that paper"—? Which roads are you alluding to. To the whole of them.

12922. Yes? That is utterly untrue, and no paper is missing.

12923. In another place in the evidence it is also stated that there was a paper with your name attached to it, which gave authority for these roads. May this Commission take it to be your evidence that you never signed any paper whatever with reference to these roads? I never signed any paper. I never saw the roads until I went out with the Select Committee, and I never knew of one of them, excepting by hearsay, as having been made. I avoided going into the District, because I knew the case was so dishonest.

12924. Was the work that was done under your authority of such a nature as to oblige them to make these roads under discussion? No. It seems to me that these officers are trying to put the recommending of these roads on any one that they can.

12925. Did you know a man of the name of Springall? Yes, he was a storekeeper at the National Park.

12926. Under whom? He came in under me, but he was there before I took charge of the place.

12927. When you gave up charge, did you leave any report about Springall? I am not quite sure. I think I did.

12928. Favourable? Very unfavourable. I looked upon Springall as not being straightforward.

12929. Was it a matter concerning money matters? Yes, in connection with his son that he put on the pay-sheets. The boy was down for getting 25s. a week at the daily rate, or about that. He came forward to sign as Frank, S., as though the "S" was for his Christian name. I went myself that day to the pay. I did not usually, but there was a lot of cash to pay away, and I went with Mr. Gordon and the constable. I said to him, "You are young to be here." He looked 12 or 14. "Is your name Frank." He hesitated and said, "No, my name is Springall." I said, "Why not put down his proper name." There was some kind of muttered explanation, but it appeared as though the boy was going down for a man's rate of wages, and I was to be deceived that his name was not Springall. I say that that was not straightforward.

12930. How did the name go? I think it was "Frank, S."

12931. Did you make any report of this to the Casual Labour Board that took your place? No; I did not. I left the papers there. They were to be seen.

12932. Are you aware whether they became acquainted with the facts? No, I am not aware.

12933. Would the papers disclose the facts? Yes.

12934. When you gave up charge of the unemployed did you leave any rations of any description behind, or anything else? Yes; we made out a schedule of everything we left behind us; Mr. Gordon did that for me. I must say he was a very valuable officer to me.

12935. Was a copy kept of that schedule? I do not think we kept a copy, I cannot say.

12936. Would Mr. Gordon be more intimately acquainted with this matter? He would be.

12937. Have you any recollection of whether there was any large amount of tools, crockery, sugar, rations, and such like things? There was no great amount of stores, because the men were rationed by Mr. Kidman, but there was a large number of tools.

12938. Any crockery? Nothing of consequence.

12939. Did you leave any report about Mr. Burrowes? On the vouchers I did. It must have come before the Auditor-General.

12940. What sort of a report was it? The circumstances were these: On the same day that I am speaking about in connection with Mr. Springall, I went to Waterfall to pay the men myself. I used not to go personally unless the amount was large. Eight of the men on the pay-sheet I could not find. They did not come for their money. I did not like that at all. One of the men afterwards came, or was sent, to sign the pay-sheet, and after that the real man came forward and swore that that was not his signature that was put on the paper, and sent in an affidavit to that effect. These papers went to the Auditor-General, and he must have seen them.

12941. Do you remember the amount of the money? They were amounts from 30s. to £2, I think.

12942. What had Burrowes to do with that? He made out the pay-sheets. It is quite possible the men might have had the money owing to them. I make no accusation.

12943. *President.*] The pay-sheet was made out; did you find it to be incorrect? I found eight men on it whom I could not find; but they might have gone away and not taken their money.

12944. What became of the money? It remained in my hands.

12945. Did Mr. Burrowes get any benefit from it? No.

12946. Was there anything in that that struck you as being prejudicial to Mr. Burrowes' character? I would not like to go so far as that; but I did not like it.

12947. Had you any reason to suspect that there was any collusion between Mr. Springall and Mr. Burrowes in any matters? No.

12948. *Mr. Waller.*] Did you ever hear any talk about an alleged missing document that had your name attached to it? Never. I would not have recommended these roads, and if these gentlemen had known their business as Commissioners, they would never have carried out any such erroneous recommendation, even if it had been made.

12949.

NOTE (on revision).—Q. 12924.—*Add*, at end of answer, "They, and they only, are responsible."

12949. Even if there had been a document with your name attached to it would it have been sufficient authority for carrying out these roads? Certainly not. Mr. John Davies knew all about these roads being made, and so did Mr. Burns.

12950. Did you ever see him up there? Yes; I have seen him up there.

12951. Have you any reason to believe there was any improper arrangement between Mr. Davies and Mr. Burns? No; I do not say that. It is only a matter of opinion.

12952. Or between Mr. Davies and Mr. Smith, or between Mr. Davies and Mr. Withers? No.

12953. Do you know of any agreement or arrangement between Mr. Davies and those parties to justify the construction of these roads? No; I do not believe there was.

12954. Are you aware of any irregularity in the practice of the departments which would lead to these roads being formed? No; I cannot possibly imagine such a thing.

12955. To put it very straight—are you aware of there having been any tips or consideration passed? No; I do not believe there was.

Mr. J. W.
Deering.

3 May, 1889.

MONDAY 6 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

John William Deering called in and further examined:—

12956. *President.*] For how long before the commencement of the Casual Labour Board had you the supervision of the unemployed? For about nine months.

12957. Can you give us the average number of men you had at that time? Including the National Park?

12958. All the men you had supervision over? About 3,000.

12959. In what particular districts were they? The Field of Mars Estate chiefly.

12960. Were there any out at the National Park? There were 1,500 or 1,800 men there—perhaps 2,000 in round numbers. I did not send them there. I found them there when I went there. It was originally intended that the National Park should be merely a depôt for the men to be sent out to from the City.

12961. Can you give this Commission any idea of the amount of personal expenses entailed by you in connection with these works? About £25 altogether. That would include boat-fares occasionally for men to Newcastle, and small wages payments under £1.

12962. Were there any Crown lands in the vicinity of Hornsby upon which the unemployed might have been set to work on, instead of working on roads on Burns & Co.'s land on the Hornsby Estate? Yes; 6,000 or 7,000 acres.

12963. Was there sufficient work to keep the men employed there during the time the Government were affording relief? There was ample.

12964. Is it your practice in subdividing lands near railways to leave a road parallel with the railway? Yes.

12965. Is your practice a justification for the road we see here parallel with the railway in Burns and Withers' Estate? Certainly not.

12966. Why? The difference is that one is Crown land and the other is a private estate.

12967. Are the frontages to the railway of greater value? Mostly so, I should say. Of course that gave them a frontage to the estate, which otherwise they would not have had. It gave them a frontage to the estate at the public expense.

12968. Have you read the evidence that was given before the Select Committee on this matter? Yes; all the evidence.

12969. Did you read the evidence of Mr. W. C. Bennett, Commissioner for Roads? I did.

12970. Are the opinions he has expressed there in accordance with your views on the matter? Not at all.

12971. Can you justify the difference between you in any way; both of you having the interests of the community at heart; is it purely a professional difference of opinion? I suppose it is.

12972. If the Government had a lot of cheap labour in the immediate neighbourhood available, was there justification then to clear and form, and in some cases ballast these roads, under the belief that they were getting them done cheaply? In my opinion there was no justification whatever for doing the work that was done.

12973. And if the labour had to be employed there were ample sources for outlet elsewhere? There was ample field for the labour upon the unsold Crown lands.

12974. With regard to that portion of the Vanceville Road running from Lane Cove Road to Billyard-street on that plan, Mr. Bennett says that "that road has been opened and maintained by the Roads Department up to a certain point for years past." Can we take it that what we saw on that road on Saturday was the work of the Works Department or the work of Messrs. Burns, Withers and Smith? I always thought that that portion of the road was cleared by Messrs. Burns, Withers, and Smith.

12975. Is it likely you may be wrong in the matter, seeing that Mr. Bennett has stated to the contrary? Quite so.

12976. Does a road up to the point of Billyard-street, assuming that the road was stopped there, and had been made by the Crown, afford any benefit to the Crown lands you have recently been selling? No; it is very remote.

12977. Then assuming that the Government has been maintaining that part of this road, it could only be for the benefit of the few people in the immediate locality? Yes.

12978. There was no outlet for it? No outlet.

12979. You see this return which was laid on the Table of the Legislative Assembly, on 8 January, 1889; the work on the Hornsby Estate is there described. Have you anything to say as to the statements there or the remarks made relating to Hornsby? I think the return so far as the distance goes, and the miles of road cleared, &c., comes from Mr. Gordon, and I think he had better personally give evidence on this point as he has absolutely measured the roads.

12980. Are these measurements on this plan from survey? Yes; from absolute survey.

Mr. J. W.
Deering.

6 May, 1889

- Mr. J. W. Deering.
6 May, 1889.
12981. I notice here in a return a remark that the land (Crown land) before the Board gave access to it was not worth £1 per acre? It is absolutely untrue.
12982. Are you aware of any valuation of the Crown land that could justify such a statement as that? I know of my own knowledge that the land was worth far more than that.
12983. It states in these remarks in the return that "the remaining unsold portion will, no doubt by reason of the improvements, return £50 per acre"? The only portions of the estate which were unsold we could not sell at £15 per acre, and those lands were nearer to the railway station than the large area of Crown land, containing 7,000 acres, to which I have already referred. It is an absurd thing to say that lands which are not worth £1 per acre are, by reason of roads of access being made to them, worth £50 per acre. These roads of access were bound to be given by Burns & Co. in the subdivision of their estate.
12984. Have you seen the plan of subdivision? No; but in the course of subdivision they are as they would have divided it.
12985. Are the subdivisions that the Government have made such subdivisions as the owners of an estate would make? Precisely.
12986. With reference to this memorandum made out for us by Mr. Gordon on the 4th May, 1889, I see a pencil note "183 chains 83 links to be deducted." Can you explain what that means? That 183 chains is to be deducted, because that distance has not been absolutely made through Messrs. Burns, Withers, and Smith's land or abutting upon it. The matter of consideration is for roads going through their estate. At the same time it must be remembered that this 183 chains, which is $2\frac{1}{4}$ miles, give direct access, from the main road, to the land of Burns & Co.
12987. What roads do you refer to? The roads marked K and I.
12988. I saw on our inspection on Saturday another road which appears to have been cleared, formed, made, and culverted, which is not marked on this plan [*Exhibit D 4*]? I cannot say where it is.
12989. In stating that the number of men under your supervision was 3,000, do you mean that to be the maximum number you had, or the average number during the nine months before the existence of the Board? It was the average—3,000 or 3,500.
12990. When you initiated any work did you get any ministerial authority for it? No. I did it on my own authority. I only kept on public lands.
12991. You know the roads that were cleared north of Messrs. Burns, Withers, and Smith's? Yes.
12992. Can you tell me what proportion of road was cleared and formed on Crown land to what was done on Messrs. Burns, Withers, and Smith's land? Speaking generally, I should think one-sixth part of the work has been done on the Crown Estate, that was to be sold, and a most inferior class of work it appears, as compared with the work done on the land of Messrs. Burns & Co.
12993. In what respect? Well, there was very little formation and little or no ballasting. You can tell when you are coming near the Crown land, because good road formation ceases, the work on the Crown land being of a very inferior description.
12994. Inferior to what we saw on the roads we inspected on Saturday? Very much; in fact you saw some of them yourselves.
12995. I suppose you have no other interest to serve in this matter than the public interest? No; I have given my evidence on oath on this matter as a public officer, because I am obliged to do so, and with a great deal of pain. I am simply a public officer. But I am a public officer before anything.
12996. Have you any strong feeling against any gentlemen who may be affected by this inquiry? Not the slightest. I may say they are all friends of mine. Mr. Burns and Mr. Withers are friends of mine. Mr. Smith is a friendly acquaintance.
12997. What is your opinion, as a Government officer, of the work that has been done there? I have never known anything like it during an experience of thirty-five years in the Government service. I have never heard of anything like it, and should not have believed that such a thing could have been done if I had not seen it.
12998. When did you first become aware that this had been done or was being done? I heard of it in connection with a design for a sub-division of Crown land from one of my own officers who had gone up to the locality.
12999. Do you know what time it would be, the month, and the year? It was at the end of 1887, or the beginning of 1888. I was sorry to have heard it had been done; more sorry than I can express.

George Withers called in, sworn, and examined:—

- Mr. G. Withers.
6 May, 1889.
- 12999 $\frac{1}{2}$. *President.*] What are you? A property auctioneer and general agent.
13000. Are you a Member of Parliament? Not now. I did not seek re-election.
13001. Were you during 1887 and 1888? Yes.
13002. Were you examined before the Select Committee of the Legislative Assembly? Yes.
13003. Is this your evidence? Yes.

[*Evidence before Select Committee.*]

2126. *Chairman.*] You are a Member of the Legislative Assembly of this Colony? Yes.
2127. *Mr. Copeland.*] Are you a joint owner with Messrs. Burns and Smith of the property at Hornsby, shown on this tracing? I am a joint owner with Messrs. Burns and Smith of a good deal of property in that neighbourhood, the exact boundaries I am not thoroughly acquainted with. I know the land fairly well, and I should say that the portion marked green on this tracing would about represent its area. There are two other blocks disconnected with the property shown on this tracing.
2128. What is their position? They are both on the south side of the Lane Cove Road—one is a block of 84 acres, and another is a block of 60 acres.
2129. How long have you been an owner of this property? I could not give you the exact date, but I think it must be twelve or getting on for thirteen years.
2130. You were an owner before the making of the railway line? A considerable time before the line was made. I think it was about six or seven years after I had an interest in the property that I heard that the Government were about to take a portion of it for a railway station.
- 2131.

2131. Had you any part ownership in it before Messrs. Burns and Smith came in? No; we purchased together at my suggestion.

2132. Did you have it surveyed at all? I think there has been a considerable sum expended in different ways in the matter of surveys. Mr. Dawson is the man we generally have employed. We had a subdivision of the property made after the railway was taken there. This was necessary in order to give access to the station. We also sold a piece of land on the other side of the Peat's Ferry Road. This necessitated the preparation of a subdivision plan. Part of the property near the railway-station was subdivided into business allotments, and an hotel is now built on one of those allotments.

2133. Will you furnish the Committee with a copy of this subdivision plan? Yes.

2134. Have you subdivided any portion of the rectangular block between Burns Road and the Boundary Road? No.

2135. Who surveyed the Junction Road? That I could not say; I fancy it must have been done by the Government surveyor.

2136. Did you send out Mr. Dawson to confer with any of the Government officers as to the subdivision of this rectangular block? My memory would not serve me very accurately as to details in connection with this estate. I know that Mr. Dawson has been frequently applied to in conjunction with Mr. Burns, Smith, and myself. For instance, the hotel-keeper was begging me for some time to give him a piece of land near the railway-station on which to build an hotel. I succeeded in getting my partners to consent to running a road from the station across to the Peat's Ferry Road, letting the man have a block upon which he could build an hotel. That is the only place at which people can find accommodation there at the present time. Mr. Dawson had to be employed in that case.

2137. But there are a number of roads on this plan marked upon your land;—did Mr. Dawson survey those roads? I am perfectly certain he must have surveyed some. I know that he has been employed in that way at different times.

2138. Was it with your approval that the whole of these roads were made? I have not the slightest doubt that in the case of every road running through our estate I concurred. It was the most natural thing in the world that I should have been consulted more or less about them.

2139. Do you consider that these roads improve your property? There is no question about that.

2140. Had you commenced any of them before the unemployed came on to the land? I am certain we had. We had a man named Kearney carrying out road-making there a year or two before the unemployed were placed upon the land.

2141. I suppose the unemployed completed the roads that were left unfinished? To tell you the truth, I do not know what roads had been completed. Perhaps I ought to say that, after the matter had been discussed in the House, as I had not been to the property for some time, I took a trip out there by way of Parramatta. I remember entering what I thought to be our property by the road marked A, but I cannot tell you from the plan what direction I took. Perhaps I am not as conversant with the estate as I ought to be.

2142. You have not been actively managing the estate? I am not the manager of the estate. Mr. Burns keeps the bank-book and draws the cheques, and if any man is to be recognized as manager in connection with the estate, I suppose Mr. Burns must be understood to be the financial manager.

2143. You did not frequently visit the property? I have not done so of late years.

2144. Have you been out there since the unemployed have been working there? Well, I went out on the occasion I have just mentioned. That was the last time. It was on the Saturday after the discussion in the House. Prior to that I do not think I had been out to the estate on my own account once within four months. I remember being out there at that time, and driving along the Junction Road.

2145. Were the unemployed then at work there? There was every appearance of it. I think my visit prior to that visit was at least six months before.

2146. But you knew that the unemployed were making these roads through your property? Undoubtedly; of course I heard of it from all sources.

2147. I see from the printed papers that a petition was presented on the 11th September, 1887, asking that a sum of money might be granted for the improvement of the Vanceville Road, from the Lane Cove Road to the new road recently cleared by the Government from the Hornsby railway bridge. Among the persons who signed that petition is Mr. George Withers. Is that yourself? I have very little doubt but that it is. I have a recollection of signing one petition, but I could not have told you now what it was for. I suppose the road to which you refer was in connection with the district in which I, as a local landowner, would be regarded as having an interest.

2148. Are you aware that Mr. Burns, on behalf of the firm, applied to make a special purchase of the piece of land on the western side of the railway line, under the 11th section of the Land Act of 1861? I am not aware; but I think I know the piece of land to which you refer. I know that the matter is one which has been under consideration—in fact, I think Mr. Ives spoke to me about it when I was out there on one occasion having a friendly drive. I know that there was a good deal of talk about cutting off our frontage on the main road.

2149. This tracing will show you the land which Mr. Burns tried to purchase? I see that my signature is attached to the application. I presume it would be a document presented to me by Mr. Burns as part of a *bonâ fide* transaction, but I had forgotten all about it myself. I am aware that there were a good many suggestions in regard to putting the Government land there intact, instead of having a small strip cut off from the main road—in fact, there was some question as to whether the Peat's Ferry Road had not been diverted. There was only a thin strip between our property and the Government land, and I know that the question of making the Government land intact was considered by us.

2150.

Mr.
G. Withers.
6 May, 1889.

Mr.
G. Withers
6 May, 1889.

2150. Were you of opinion that the land belonged to you in consequence of the diversion of the road? I do not think we could set up any claim to the land, but I know that the question arose as to whether the road had not been diverted from our boundary line.
2151. Do you know whether you surveyed any roads on the western side of the railway? Roads have been cleared there, I believe, but none have been constructed.
2152. Have the unemployed done any work upon those roads? I do not know. I have not been over that part of the estate for some time. I could not say what is going on there.
2153. There is a petition signed by Mr. Burns requesting that the Government would cause the reserve fronting the Peat's Ferry Road near the Hornsby Junction to be dedicated for a public park, for which it was said to be well adapted. It was represented that all the private lands near the junction were being sold in small lots for settlement, and that a park, in what promised to be a thickly-populated neighbourhood, would promote the public health. I notice that this petition is also signed by the firm of Withers and Callaghan;—is that the firm of which you are a member? Yes; I see that my own signature is also attached to the petition; that is the only signature of which I have any knowledge.
2154. Is your firm interested in this property? Not in the slightest. Of course if any petition was to be presented, you may be sure that I would be one of the first to whom it would be brought.
2155. You are sure that the firm of Withers and Callaghan are not interested in the land? Not in the slightest; they were the auctioneers for some of the blocks in connection with Hardie and Gorman. Withers and Callaghan have interests in the district, but not so far up.
2156. What was the value of the land which you wished to have dedicated for a public park? I could not say.
2157. There are 31 acres? I should say that it ought to be worth now £150 an acre. Some of the land, as far as my memory serves me, is very low at the back.
2158. Are you aware whether this piece of land was reserved? I could not say.
2159. You are aware also that a reserve for a Court-house of over 4 acres was made? I heard something about a Court-house, but I do not know how the matter stands. I do not know whether any definite steps have been taken.
2160. Can you give us any idea as to the value of the land? I witnessed the contract in regard to some land much further from the station, which was sold about three weeks ago. That land sold at £150 an acre. That was on the eastern side of the line. It was, of course, level land.
2161. What did the piece of land upon which the hotel is situated realize. £5 a foot.
2162. How long is it since it was sold? About nine months ago. You must remember that it is the nearest point to the station.
2163. Assuming that the piece of land which has been reserved for a Court-house occupies over 1,000 feet of frontage to the main road, and that you sold the hotel block at £5 a foot, can you not give us some idea as to its value? I do not think the whole block would bring £5,000, although some of the Peat's Ferry frontages brought £3 and £4 a foot.
2164. You know that this land is close to the railway-station? Yes; but it has a very narrow depth in places.
2165. Would it be worth £3 a foot? I should think that would be about a fair average. Some of the land goes off to nothing. It is very shallow.
2166. Can you tell the Committee what compensation you received from the Government for the 27 odd acres they took for the railway? As far as my memory goes, we got about £50 10s. an acre. I think we took £1,400 odd—the amount offered by the Government.
2167. Did you receive any compensation for the land taken for Pearce's Corner railway? No; we gave that. I do not know how much was taken, but I know it was very little—about 2 or 3 acres.
2168. You do not know how much you gave? We gave whatever they required. I do not think it was a great deal. They took a piece off one of the lower corners of the property, and another piece higher up near the station.
2169. You gave the land to the Government under an agreement entered into generally among the landowners—that if the Government would construct a railway you would give the land free? Yes.
2170. That was one of the inducements offered to the Government to construct the line? Yes; we could well afford to fall in with the suggestion. I do not think we made any claim for the first land we gave. We simply accepted the offer made by the Government.
2171. Were you aware before this inquiry commenced that a large number of men paid by the Government were improving these roads through your property? I had not the remotest idea as to the number of men employed on the job.
2172. But you knew that the unemployed were making these roads? Yes.
2173. Do you know the extent to which they were making them? No. I do not know yet what roads have been made. I am convinced that a great deal of work has been done; you cannot ride down the Junction Road and look at right angles without seeing that.
2174. You are not forced to answer this question, but as a public man, as a man sent to Parliament to represent and conserve the public interest, would you consider it a proper thing, apart from this particular instance, for the Government to employ labour in the improvement of private estates? I must of course admit that I have given the matter a good deal of consideration. I heard of it from all sources. I have treated the matter very lightly, as one giving me no concern so far as my position as a Member was concerned. Seeing that the railway-station was right in the centre of the property, and that there was a lot of Crown land at the back of our property to which access must be given, it never occurred to me that anything was being done which would not have been done had I not been a Member of Parliament.

Mr.
G. Withers.
6 May, 1889.

2175. But would you consider all the roads marked upon this plan necessary in order to enable people to get to the railway station or to the Crown lands? I consider, as I stated in the House, that any short means of access given from the Lane Cove Road to the Crown lands, would certainly tend to put up the value of those lands, and I presume that the work was based upon that principle. I have not gone over the cross-roads.

2176. Would you consider it a wise policy to expend public money in making these roads on private lands rather than upon making roads upon the Crown lands, which were to be sold? I do not know what has been done upon the Crown lands.

2177. Supposing the Crown lands shown on this plan were yours, and that you intended to sell them, would you expend your money in making these lower roads, or would you expend it in opening up the land which you intended to sell? No doubt I should extend these cross roads right through on to the Crown lands. If I were dealing with the whole of the land as one whole private property, I should make roads where the features of the country justified that course.

2178. But would you take men away from making roads from the land that you intended to sell and employ them in making roads a mile or two away from that property? That is a matter of judgment. If the whole of the land belonged to me, and I were going to put up all the property in one estate, I would certainly carry roads through from the Lane Cove Road. I would make that the starting-point, and gives access across the other land.

2179. *Chairman.*] But supposing the land on the south of the Boundary Road belonged to another owner, what would you do? Of course I would have to take all the features of the country and circumstances into consideration.

2180. Do you think Burns Road can be justified as a road of access? We made a portion of that road ourselves. I remember recommending the expenditure of £70 upon a culvert there. I see that the road has since been metalled.

2181. The unemployed took up and completed your work? No; I think we had left off previously. I know that we cleared the land, and made it practicable to get along.

2182. You did all that was necessary, according to your idea, to open up your own land? Well, of course, in all probability, as time went on, as we came to deal with the estate, we should have expended more money.

2183. But you thought what you had expended was sufficient for the time being? I presume we came to that decision because no work was going on there for some time.

2184. *Mr. Copeland.*] I suppose that if these roads, which are so close together, had not been made, you would have felt it to your interest to make the roads for the purpose of a subdivision? Yes; some of these roads were partially made. I could not tell you exactly how much was done. I know that some roads running eastward from the railway station were cleared at our expense. I see from the plan that some of them are now cleared and formed.

2185. *Mr. Henry Clarke.*] Is it usual in making roads through Government land to clear, form, and metal the road? I do not know.

2186. Is it the practice of private owners in making subdivisions to clear, form, and metal the roads? I never knew a case in which it was done. I know that the City Council force private owners in the city, who are dividing their property, to form, ballast, kerb, and gutter. Of course that would not apply to suburban lands.

2187. *Mr. Copeland.*] Do you know of any other case in which the Government have cleared, formed, and metalled roads through a private subdivision? I cannot call to mind any case. I think some work of the sort has been done since the unemployed started. I do not know what the rule is with regard to these subdivisions. As far as my memory serves, they are cleared simply to show up the property. I see that in this case the work has been done in private subdivisions, but I do not think it has been the rule before. Now I think of it, I can think of one case in which a road was formed and cleared by the private owner.

2188. But you do not know of other cases where the work had been done by the Government on private property? No.

2189. *Mr. O'Sullivan.*] What do you estimate is the increase given to the value of your lands by the construction of these roads? It would be impossible for me to say unless I were to go over the property. I am not thoroughly conversant with all the roads that have been constructed. Looking at the plan and going over a large estate like this are two very different things.

2190. Cannot you give us a rough idea? I should say that these roads would give the property a considerable advance, but I could not say to what extent.

2191. Do you think £20,000 would be too high an estimate? It is a difficult thing for me to say; you can probably form as good an opinion as I can. I do not think it would be at all unreasonable to suppose that the property had received that increase in value.

2192. You do not think it would be unreasonable to make that estimate then? Well, I do not know what the cost of the roads would be.

2193. We are told that the cost of the roads is from £5,000 to £6,000? I am not at all surprised at that.

2194. *Chairman.*] Knowing that that expenditure had been made on the roads, would you say that £20,000 was a fair estimate of the increase in value which they have given to the land? Perhaps it is rather a big estimate to say £20,000.

2195. *Mr. Copeland.*] But if you said £10,000 you would certainly be within the mark? There is no doubt at all about that.

2196. Possibly the increase in value would be greater? Possibly. You want to go on the property itself to form a good idea. If £5,000 or £6,000 had been expended on the property on roads, it would be reasonable to expect a difference of £10,000 in a sale.

2196½. Did you ever refuse any request for any road through your property? No.

2197. Did you ever make any request for a road? No; my knowledge of these roads is precisely what I stated in the House. About three or four years ago, seeing that the railway station

Mr.
G. Withers,
6 May, 1889

station was in the centre of the property, and that access would have to be given to it, a request was sent to the Government of the day asking for a road or roads. This I formally signed in conjunction with my partners and others. Whether the road was formed in the ordinary way as a Government road I do not know. I do not know whether it was initiated or whether it was left till the unemployed took the job in hand. When the unemployed put in an appearance a few years ago, I spoke in the House of the folly of having them employed in grubbing the country lands, and represented that they ought to be put on more permanent works in the shape of roads. It was shortly after that that I became acquainted with the fact that the unemployed were going to form this road, which had been talked of for some time in connection with the railway station. The railway station being locked up in our property, I regarded the work as a most reasonable thing. 2197½. Was it on your recommendation that the unemployed were put on the land? No; I knew nothing whatever of it. They were there before I knew anything about it. No doubt they have done some very good work for the Government; of course they have improved property in which I am interested to some extent, but I do not see how, under the circumstances, that could be avoided.

Recalled, and further examined, 15 January, 1889:—

455. *Mr. Burns.*] Do you recollect giving evidence on a previous occasion touching the matter referred to this Committee? I remember giving evidence and I have read it several times since.

456. On the 19th December you wrote a letter to the Chairman of the Committee, stating that when you were before the Committee you were led to believe that £5,000 or £6,000 had been expended upon these roads through the land of Messrs. Burns, Withers, and Smith to the Crown lands in the Hornsby district? Yes.

457. You also stated in this letter that you had reason to believe that a much smaller sum had been expended upon these roads? Yes.

458. You also stated that you had discovered that the land on the eastern side of the Homebush and Waratah Railway belonging to Messrs. Burns, Withers, and Smith connected with these roads was under 700 acres in area? Yes.

459. And that you desired, in consequence, to be allowed to amend your evidence? Yes.

460. You stated in your letter that you wished to be recalled, and that before giving evidence you intended to go over the roads for your own satisfaction, in order that your evidence might be more decided? Yes.

461. Have you since then made a special visit to Hornsby to see these roads? Yes; on Saturday last.

462. Have you satisfied yourself approximately as to the amount expended upon these roads? Yes.

463. Have you also made inquiry with respect to the area held by Messrs. Burns, Withers, and Smith on this side of the line? Yes.

464. When you stated in your letter that you had ascertained that the area was under 700 acres, what did you mean by that? Of course that must be taken in conjunction with my previous statement. I based my estimate upon the increased area which I thought was there, and also upon the statement that £6,000 had been expended upon the property.

465. When you made that estimate, how much land did you suppose was held by Messrs. Burns, Withers, and Smith on that side of the railway? I always thought there were some 1,000 or 1,200 acres. I never knew the exact area until now.

466. What did you ascertain the area to be? 680 acres.

467. Then your estimate of £10,000 increment in value by reason of this expenditure is based upon the statement made by you to this Committee that £6,000 had been spent upon the roads, and also upon the supposition that the area of the land was 1,000 or 1,200 acres? Yes.

468. Was your application to be allowed to amend your evidence agreed to by the Committee? It was not at that time.

469. It was refused? Yes.

470. Have you observed a paragraph in the Progress Reports which states that a member of the firm of Messrs. Burns, Withers, and Smith had admitted that the property had been enhanced in value to the extent of at least £10,000 by the construction of these roads? Yes.

471. That statement is, I presume, based upon your evidence? I took it as such.

472. When you went to Hornsby to make an inspection of these roads, were you accompanied by any person who knew the roads and the locality? Yes; I accidentally picked up an old resident. I intended to go single-handed, but I was driven round by an old resident of the district.

473. Did you make a general inspection of the roads? Yes.

474. I think you said that previously you knew little about them? I never saw the roads until Saturday last, with the exception of the Junction Road, and what little might be seen by passing of the Cross Roads.

475. What member of the Committee led you to believe that £5,000 or £6,000 had been expended upon these roads? As far as my memory serves me, I think the question came from Mr. Copeland. I think I was asked whether I thought the estate had been increased in value by the roads to the extent of £20,000. The evidence shows how I dealt with that question. I was quite at sea as to what had been spent, and could give no estimate from my personal knowledge. I had no knowledge of the work. I think Mr. Copeland observed that the Chairman could inform me that between £5,000 and £6,000 had been expended upon the property.

476. As a matter of fact, three members of the Committee put questions to you about this expenditure;—do you recollect who they were? Mr. Copeland, Mr. O'Sullivan, and the Chairman.

477. On the occasion of your special visit to these roads, I suppose you saw most of them? Yes.
478. Did you see both the roads on the Government subdivision and the roads through the private land? I did not get down to what is known as the Great Eastern Road. I omitted what I had seen on previous occasions.
479. Will you tell the Committee your opinion as to the construction of these roads, and as to their formation;—will you say whether you think them good or bad—First, what is your opinion with regard to the roads passing through the private land? I took a plan with me and I made a few notes. I may say in passing that the plan is very inaccurate. With respect to the roads which are said to be ballasted, I think it is the most inferior work I ever saw. I should imagine that about 13 or 14 feet in the centre of those roads, where the land is alluvial, is ballasted. That occurs in Junction Road and in Burns' Road, where it passes through land which is more alluvial than the other. The roads which are formed on the harder formation are the best roads—in other words, the roads which are not ballasted are the best. It would have been a mistake to ballast the roads formed on the ironstone gravel.
480. Which are they? I could not give you their names.
481. Are the best roads on the private land or on the Government land? The roads on the gravel formation are the best. They occur principally on the Government lands. The Government lands just about there are of a harder formation.
482. You have seen some of the roads in a casual way previous to this special visit? Yes.
483. Having seen the roads on this inspection, generally, your observation as to their inferiority applies to the roads made by the unemployed? I understood that all these roads had been made by the unemployed.
484. Are the roads which have been made by the unemployed of an inferior kind? They are all very inferior roads. As I said just now, the best roads are those which had required least formation.
485. I wish you to look at the account of the expenditure furnished by Colonel Wells and Mr. O'Donnell, the Road Overseer? I have seen that account.
486. You will see that they estimate that the total expenditure upon all roads through these private lands to the Crown lands is, approximately, £2,300? Yes.
487. You will see that the schedule includes the expenditure upon the road from Junction Road to Pearce's Corner to the church? Yes.
488. I presume you are aware that Messrs. Burns, Withers, and Smith have no land upon that road? Yes; I am aware of that.
489. Do you know the road from the Junction Road across the railway bridge to the "Junction Hotel"? Yes. I did not go over it the other day, but I know it well.
490. You are aware that Messrs. Burns, Withers, and Smith have no land along that road? That, I think, will be seen from the plan.
491. Are you aware whether a road has been made close to the "Junction Hotel," down in the direction of a line with the property of Mr. Higgins, by the unemployed, and that Messrs. Burns, Withers, and Smith have no interest in it, having no land there? Decidedly; I know that very well.
492. We have no land there? No.
493. There is among the papers a petition from a number of residents, in which your name is included for the improvement of the old Vanceville Road? Yes.
494. That was an application simply to improve the old road? Yes.
495. There was no question of extension? No.
496. That petition was referred by the Department of Works, to whom it was addressed, to the Casual Labour Board? Yes.
497. You have observed that the Vanceville Road, as far as it was maintained by the Works Department, has been improved by the unemployed? Yes; I saw that on my previous visit.
498. Does not the evidence of Mr. Bennett show that that portion of the road has been maintained by the Department for some years past? Yes. I believe there is a good deal of settlement on either side.
499. Have you observed that Burns' Road is also shown by the evidence to have been an old road which has been improved by the unemployed? Yes.
500. It has been extended in the direction of Noonan's? Yes.
501. Have you any information as to how that road came to be improved by the unemployed? From inquiries I made, I find it has been improved in response to a deputation of the residents, of which I had no knowledge, through the Casual Labour Board.
502. Headed by Mr. Noonan? Yes.
503. Are you aware that Messrs. Burns, Withers, and Smith have no interest in the road leading from the road by Noonan's on to the Lane Cove Road? Decidedly.
504. We have no land fronting it? None whatever.
505. Are you aware that Mr. Noonan offered to give evidence that he was the most active agent in inducing the Casual Labour Board to improve these two roads? I learnt that from Mr. Noonan on Saturday last. He seemed anxious to give evidence.
506. Are you aware that Colonel Wells has stated that £800 out of the £2,300 said to have been expended in connection with the unemployed would have had to be expended by the Public Works Department themselves, in order to make approaches to the railway station? Yes; I understand so.
507. Perhaps you are also aware that Mr. Bennett, the Chief Commissioner for Roads, has said that by-and-by the Department will have to expend at least £2,000 in making roads for the railway station? I did not know that.
508. Are you aware that a station or platform is now being built close to Noonan's and Dobson's, on the North Shore line? Yes; I saw it on Saturday for the first time.
509. A road leading from that station to the Lane Cove Road has been widened and improved by the unemployed? Yes—up past Noonan's.

Mr.
G. Withers.
6 May, 1889.

Mr.
G. Withers.
6 May, 1889.

510. Are you also aware that a station is being built at the corner of the Vanceville and Lane Cove Roads? Yes.
511. Are you aware that there is also a station close to "Porter's Hotel"? I have not been that way for years, but I have heard something of it.
512. Have you any idea of the extent of the Crown lands on the northern side of the property of Messrs. Burns, Withers, and Smith? I have not.
513. You do not know the area of the land? No, but they seem to have a large area. I think it goes pretty well down to Peat's Ferry.
514. Is it your opinion that these Crown lands have been improved in value by these roads of access through the private land? Undoubtedly.
515. Do you recollect the first application we received for permission to make a road through the land of Messrs. Burns, Withers, and Smith? Yes; but I do not recollect the date.
516. Do you remember my consulting you about it? Yes.
517. Do you know who was in office as Minister for Lands then? I was always under the impression that Mr. Copeland was Minister of Lands. I know that the Dibbs or Stuart Government sent the application.
518. Did I write to you or see you as to whether you concurred in the application of the Government for this first road of access? You either wrote to me or saw me personally. I remember the three of us signing a letter.
519. Do you not recollect the first letter I wrote to you, stating that an application had been made to me by a surveyor on behalf of the Government for the road over the bridge near Hornsby? I cannot say whether you wrote a letter or whether you produced a letter and asked me to sign it; but I remember your communicating with me in some way with regard to an application by the Government of the day for land for a road or roads required to give access to the railway station.
520. Do you recollect if Mr. Smith was opposed to giving land for these roads? I know that he was always opposed to giving land for any purpose of that kind.
521. Are you aware that Mr. Bennett, after the applications came from the Casual Labour Board for some of these roads, furnished an independent report to the Government as to their necessity? I think I saw it in January last.
522. Having ascertained the expenditure upon these roads, as far as it can be ascertained, and also the area of land held by Messrs. Burns, Withers, and Smith, can you tell the Committee whether, in your opinion, their estate has derived any great advantage from the construction of the roads? I see very little special benefit derived by the estate myself, after looking into the matter.
523. Do you know how much land has been given for these roads? I believe 29 acres has been given. I do not know whether it has been given or taken. I understand that some of the land has been taken, and that we have not given it.
524. What is your estimate of the value of this land? I put the land in that part of the estate at £125 per acre. A leading architect in the city secured, after very great trouble, a block of 4 acres at £125 per acre. We consider that we made a concession in allowing him to have the land at that price for the construction of what was considered a good residence. I also have regard to the fact that 40 acres near Noonan's was bought at £150 per acre within the last two months. Estimating our 29 acres to be worth £125 an acre, you have a sum of £3,625.
525. Do you know who purchased the land near Noonan's? Mr. Lyne, M.P., I believe, and some Melbourne friends.
526. What proportion of the £2,300, alleged by Colonel Wells to have been expended upon these roads, has been expended upon roads in which Messrs. Burns, Withers, and Smith are directly or indirectly interested? I should say the sum would be considerably less than that given in the Schedule. I could not say how much less.
527. Would it be £500 less? I think there is no doubt about that.
528. Then you estimate the land which has been taken as being worth £3,625, while there has been an expenditure upon the roads in which we are interested of about £1,800? Yes; about that, in round numbers.
529. You think that would be allowing a very full amount? Yes.
530. Do you think Messrs. Burns, Withers, and Smith obtained an increment in value by this expenditure outside what you now state? Decidedly not.
531. Then you wish to withdraw altogether the statement you made about this increase in value of £10,000? Decidedly.
532. *Mr. O'Sullivan.*] Let me refer you now to your previous evidence. Look at question 2191;—
2191. Do you think £20,000 would be too high an estimate? It is a difficult thing for me to say; you can probably form as good an opinion as I can. I do not think it would be at all unreasonable to suppose that the property had received that increase in value;—
- Do you adhere to that? That is simply ridiculous.
533. I am about to ask you a question concerning the value of the roads;—up to that time not a word had been said about the money expended on them, yet in reply to this question you say that you do not think it would be at all unreasonable to suppose that the property had been increased in value by £20,000? That was based upon the representations made in the House by the Chairman when the matter was brought before it, and also upon general rumour.
534. Up to the time that question was put to you you had not been told by the Committee that £5,000 or £6,000 had been expended on the roads? That I think is correct.
535. Notwithstanding that, you said that the increment in value had been £20,000? I never said £20,000. A member of the Committee suggested that value.
536. Yet you admitted that it was not unreasonable? Yes. From the impression made upon me by the report of the proceedings in the House, and from the rumours as to what was going on up there.

Mr.
G. Withers.
6 May, 1889.

537. Further on you were told that the cost of the roads, as the Committee were informed, was from £5,000 to £6,000; and you said, in reply to that, you were not at all surprised? Of course, if I assented to the suggestion that £20,000 was the increment in value I could not be surprised at hearing that £5,000 or £6,000 had been expended. Besides, I could not know whether the money had been judiciously or injudiciously expended.

538. Having discovered that a smaller sum than £5,000 or £6,000 had been expended upon the roads, do you still hold that one half of £20,000 would be too high an estimate? Decidedly.

539. In corroboration of the statement that the roads had cost £5,000 or £6,000, and that there was a reliable reason for the question put to you, let me refer you to the evidence of Mr. Deering. He is asked what, roughly, has been the expenditure upon the whole of these roads on private property; and he says, in reply, that they have cost £5,000 if they have cost a shilling. Further on he is asked by Mr. McMillan whether the expenditure is really £5,000, and he says that he is sure it is? Yes; I observe that evidence.

540. At the conclusion of his evidence he is asked whether he can give the Committee anything like an idea of the proportion of money spent upon Crown lands at Hornsby to that spent upon the private property there; and he says that they could not have spent more than £700 or £800 upon the whole of the Government subdivision, whereas he was confident that they had not spent less than £6,000 upon the property of Messrs. Burns, Withers, and Smith? Yes; I see he gives that evidence.

541. Had you been a member of this Committee, having that evidence before you, would you not have felt justified in putting the question which was put to you as to the amount of money spent upon these roads? Yes. I am pleased to find you had some justification for putting it.

542. *Mr. Burns.*] Are you aware that Mr. Houson, Colonel Wells, Mr. O'Donnell, and Mr. Gordon, the surveyor, dissent from the evidence of Mr. Deering? I have not read all the evidence, but I have become aware of what you state.

543. Are you aware that Mr. Deering stands alone in his statement about this large expenditure on these roads through private property? I understand that to be the case.

544. Following up Mr. O'Sullivan's question, do you think that any member of the Committee is justified in making this statement to you upon the evidence of one witness only, that the roads had cost between £5,000 and £6,000? I do not think they were, unless they had the information officially. Decidedly not. Mr. Deering, I understand, was not the responsible officer.

545. Are you aware that the gentlemen I have named have all given evidence in opposition to Mr. Deering's statement? Yes; I am aware of that.

546. *Chairman.*] You said just now that when you said that £20,000 increment in value was not an unreasonable estimate, you based that statement upon some representations which I have made in the House. I have here the *Hansard* report of my speech. Will you point out in it the representations to which you refer? I do not think I can do that. I simply stated the impression made upon my mind. I could not refer to any particular portion of your speech. I thought, from the manner in which you had addressed the House on that question, and from general rumours which were abroad at that time, that there was a much greater expenditure going on than that which I have discovered to be made.

547. You cannot point to anything in my speech which warranted you in assuming that the increase in value to the estate would be £20,000? No.

548. Do you see that I state that £20,000 would be my estimate of the value? Very likely that part of the speech made the impression upon me to which I refer.

549. Are you aware that I was quoting what you had already communicated to a *Star* reporter? I do not think I can have said that.

550. Are you aware that your estimate was already in print when I made this statement? I know the interview to which you refer. I am not prepared to admit that I could be in a position to form an estimate even now, to say nothing of that time. I knew then even less than I know now.

551. Did you make your estimate before I made this statement in the House? I fail to see how it is possible for me to make any estimate, not having the slightest knowledge of the work which is going on. I had nothing but rumour to guide me.

552. Whatever rumours you heard was not your interview with the *Star* reporter prior to my speech in the House? Two days before. Does it state in that interview that I gave an estimate of £20,000?

553. Yes? Well it is absurd.

554. Mr. Burns asked you just now whether the Committee were justified in taking the estimate of Mr. Deering;—are you aware that when you gave your evidence the Committee had not before them the schedule of Colonel Wells? I was not aware of that.

555. Are you aware, from the evidence, that the schedule of Colonel Wells was put in subsequently? Yes, I see that is so; but I concluded when you put the question to me that the amount was authentic.

556. Are you aware that Mr. Little, the paymaster, estimates the expenditure upon the private land as £3,700? No; I have not read his evidence.

557. Let me refer you to question 2,447? Yes, I see that; but you will see that Mr. Little refers to the expenditure upon private lands altogether.

558. If you read the next question you will see that Mr. Little is asked whether £3,700 at least has not been spent on all the land south of Boundary Road and including that road, and that he says he thinks that amount will cover it? Yes; but there are a lot of private lands there besides ours.

559. Are you not aware that the estimate of Colonel Wells refers to the same roads? Yes. In that case a very expensive road on the other side of Pearce's Corner, which I understand has been constructed by the unemployed, would be included.

560. Assuming that Mr. Little is correct, would not that alter the estimate you have just given? Judging from the plan, a great deal of expenditure upon private land affects other peoples property.

561.

Mr.
G. Withers.
6 May, 1889.

561. But you said just now that you deducted £500 from the £2,300 in Colonel Wells' estimate. Suppose you deduct £500 from Mr. Little's estimate, which is £3,700, leaving £3,200? I do not think I could give you an answer as to value haphazard in that way.
562. You see the difference between the two estimates. One is the estimate of an officer who has had charge of the expenditure of the money, while the other is that of an officer who sees the work after it has been done? Yes, of course there is that difference.
563. Even if a less amount has been expended, is not the making of these roads of additional value to your property? They must give some value to the property, I presume; but I think that more than the full value is balanced by our allowing the Government to take the land free of charge.
564. But, as a matter of fact, the land is required for the roads in every case? We had no intention whatever of subdividing this property.
565. But would it not be rendered more valuable from the fact that it contains these roads. We subdivided what we considered sufficient for settlement near the railway station. It was our intention to deal with the rest of the property on this side in one lot. It was never our intention to subdivide any more.
566. But is it not more valuable subdivided in the form in which it now stands? I do not attach any importance whatever to that. I consider that the work is of much greater value to the Crown, especially as Junction Road is admitted by all to be a necessary one.
567. Do you consider that if you increased the number of roads on the property, running them all at right angles, and making them equi-distant, it would decrease the value of your land? I should object to any further cutting up of the property. I was very much annoyed about one of the existing roads. I did not know that it existed. I knew nothing about it until I saw it on Saturday.
568. Is that Mistake Road? I am referring to road HH. I think it is an outrageous thing. I do not know who consented to it. I certainly have not been a party to it.
569. Are you aware that its peculiar shape is owing to a mistake made by the unemployed? I am not.
570. When you say that we refused to further examine you, do you bear in mind that your letter, containing in substance your corrections of the increase in value, is appended to the evidence? I was informed by Mr. Copeland that that was the case when the Progress Report was submitted; but he did not give the particulars of the letter.
571. Is not the substance of the letter a correction of your estimate of the increase in value? Yes.
572. Mr. Burns asked you just now whether your statement as to the increase in value did not appear in the Progress Report;—you are aware, as a Member of Parliament, that when an amendment is moved in Committee omitting certain words, and is not carried, you cannot go back and alter any portion of the words which the amendment proposed to omit? I believe that is so.
573. Therefore it would have been impossible for the Committee, having dealt with this particular paragraph in that way, to make any alteration after the reception of your letter? Yes; I see that.
574. *Mr. Carruthers.*] At the time you were examined by Mr. O'Sullivan as to the cost of the roads, were you informed that one witness had given evidence to the effect that the cost was a little over £2,000? No.
575. If you refer to the evidence of Mr. Davies, you will find he says, at question 944, that the cost of the whole of the work through the property of Messrs. Burns, Withers, and Smith is a little over £2,000. If you refer to the evidence of Mr. O'Donnell, you will find he says that the cost of improving and making roads on private property is £2,079, and that £4,186 has been expended upon the Crown lands? Yes; I see that is so.
576. Having looked at these questions in the evidence, given prior to your examination, do you think it would have adduced more accurate evidence from you if you had been informed of the replies to these questions? If I had known that one gentleman represented the cost to be £6,000, while another represented it to be £2,000 or £3,000, I should not have offered any opinion at all by way of an estimate.
577. You are aware that Mr. O'Donnell gave this answer, having acted as superintendent of the unemployed at Hornsby? I was not aware of his position. I do not know him.
578. If you had been informed that the gentleman in charge of the works had stated that the cost of the roads was only £2,079, would your answer have been different? Decidedly.

13004. *President resuming.*] Was that evidence submitted to you for revision? Yes.

13004½. Do you wish to make any corrections or explanations? Referring to question 2138, I simply want to say, in a general way, I have no doubt I was conversant with nearly every movement made on the property, but I never went to the place; but I was not aware of the extent of the work that was going on. It was my feeling and belief all through, at the time these men were employed on this property, that their work was based on the application made to the previous Government for roads required to give access to the railway station and the Crown lands. That is the only consideration the matter ever had in my mind. I do not wish to shirk any responsibility about it. Not having been on the property I was not, however, so conversant with it as Mr. Burns might be. Referring to question 550, I wish to say that all sorts of questions and ideas were put into my head in this interview. I was busy when the *Star* reporter came to me and informed me they were going for the Government on the Hornsby roads, and as I was one of the interested parties he thought it only right to see me as to the correctness of the rumour. Whether the conversation was taken down then and there I have no knowledge. I have seen the reporter since. He says he is a shorthand-writer, but I have no recollection of seeing him take down the conversation, as my evidence is being taken down now. It was more like a private conversation, in which, when

I

NOTE (on revision):—Q. 13004½—After “now,” line 14, add “and my opinion is strengthened by the fact that when the proof was submitted to me I expressed my surprise, and was readily allowed to amend it, which I did to a great extent.”

Mr.
G. Withers.
6 May, 1889.

I said "I," I meant our Company. I treated the whole thing as being an advertisement for the property more than anything else—the few words I made use of were in the same way. A proof was brought to me the next day and submitted for revision. I said, "I do not think this is fair." The conversation we had was verbal conversation without any data. It was based on the reports, I was led to a great extent to believe, were current in the city. As to the £20,000 mentioned, as I had not seen the property, I should say that no weight should be attached to it at all. However, I admit having hurriedly corrected the proof. There was a passage in it that I declared to the reporter I had no knowledge about there and then. That was that I had no disposition to interfere with Mr. Burns' enterprise. How I could have made such a statement I do not know. I had no difference with Mr. Burns in connection with the conduct of the business. I considered his position in the matter identical with my own. The land was being cleared by the Government for these roads, and he being more of the manager was brought more into the business than myself. He took a delight in going up to the property; I considered it somewhat a labour. Latterly it became a labour for me to bother about it to the extent he always did. That is the only difference between us. There is no other difference between me or any of the partners of the property. I did not know the extent of the work that was going on, because I never visited the property; but when I spoke in the House I pointed out how value for every shilling could have been got for their work. They could have been put on to the projected railways, and when the time came for the making of the railways these portions could have been exempt from the contracts for the completion of same, in which case I, as a citizen, would not have been put to the annoyance of being dragged into this matter. Referring to question 467, I think it should be "based upon a statement made to you by this Committee," instead of "by you to this Committee." I gave the evidence on the faith of the money being expended without having seen the property.

13005. With these exceptions, can we take it that your evidence is true and correct in every particular? Yes.

13006. When did you first purchase the land in conjunction with Messrs. Burns, Withers, and Smith? Twelve or thirteen years ago, as stated in my evidence.

13007. I find on examining the papers a difference between Mr. Burns and some of the other witnesses on the point, and I want to put it right. Now I will show you a letter from Mr. Oliver, late Under Secretary for Lands, dated 29th August, 1885, referring to certain land;—does that refer to the land that these roads go through? That I cannot say.

13008. Have you any other land in that district that you own with Burns and Smith? Yes; a portion of about 400 acres, of which we were once joint owners, of the Vanceville Estate, bought, perhaps, a year before this property was bought.

13009. Did you apply to bring it under the Real Property Act? Yes.

13010. Is it likely that this letter had reference to some of this land that we are inquiring into? I should think so. Mr. Burns would be a better authority on that matter than me. Some of it we have under the Act, and some of it not.

13011. Look at plan [*Exhibit D 4*];—does that appear to you to correctly represent the position of the roads as regards your property? Yes.

13012. Is this road marked "A" at the top of the plan the first road that you were applied to, to give up to the Government? I may state, as regards the original application, that I have never made myself acquainted with the exact site of the first proposed road. It was, I believe, altered in lieu of Burns Road.

13013. Do you recollect what is called the overbridge road? I presume it is the road that leads to the overhead bridge. I do not know what name has been given to the road.

13014. Is that the road you had communication with the Government about? I cannot remember distinctly, but I have every reason to believe it was.

13015. You were asked by Mr. Burns, before the Select Committee, whether you recollected the first application you received to make a road through Burns, Withers, and Smith's land;—do you believe that is the road referred to, or do you know anything about it? I cannot say distinctly. I imagine it would be. Until the railway was formed there the place was a wild bush. I did not, nor do I now, know definitely the boundary of the property.

13016. How long is it since you have been out there? I have not been out there since I amended my evidence when I went to look at the property, which was on the 10th November, 1888.

13017. If you bought the land in 1875, how many times have you been up there since you owned it? More in the early history of it than later.

13018. Have you been up there twice? I have been up there nearer thirty times than twice, but only once on the roads.

13019. Do you know the road on that plan called the Junction Road? Yes.

13020. Have you any papers in your possession agreeing to the Government taking the road which is marked G on this plan? Whatever papers would be understood to be in my possession Mr. Burns would have.

13021. Does Mr. Burns manage the whole of this estate? Yes, and other joint interests.

13022. Do you look to him as the gentleman who has the entire control and management connected with it? Decidedly not; only to the extent that I have declared in my evidence. Of course he receives no fee whatever.

13023. Would he have power to grant the use of the roads throughout your estate without reference to you? He has not the slightest power of that kind. He has no more power than Mr. Smith or myself.

13024. Can you tell me when you first became aware that there was such a road as Junction Road—before or after it was formed? I really could not tell you the origin of the Junction Road.

13025. Do you know of your own knowledge whether any work in the way of clearing, forming, or making the roads was done on that estate before the unemployed went on it? Yes. Burns Road was made. I cannot give you an exact description of the road; it would be cleared pretty well through to the Eastern Road.

13026. From where? I really cannot tell you the point. I cannot give you the details. I know that I recommended £70 as a reasonable expenditure to cross one of the creeks in Burns Road down to the Great Eastern Road. I think Burns Road must have been cleared through from the Eastern Road so as to give access to the railway-station.

13027. How far from the Great Eastern Road west was anything done to Burns Road by you? I do not know.

13028

Mr.
G. Withers.
6 May, 1889.

13028. Who could give me that information? Mr. Burns would be the best. He has been more on the property all through than myself.

13029. Do you know how much you spent on that estate for the clearing of the roads? Mr. Burns could give you that. I could not tell you.

13030. Did Mr. Burns keep the accounts? Yes.

13031. Did he produce them to you? A contract would be entered into with people, and he would take charge of it. When the time for payment came a cheque would be drawn. If it was a contract for (say) £70, it would be easy to see that the right amount was given. I never called for the cheques in my life, but I presume they could be got.

13032. Did your syndicate keep any minute-book? Yes.

13033. Would that show the expenditure on the work? We never met and had minutes taken in the ordinary way of a Board or Committee, but there would be no difficulty in getting the vouchers representing the amount of money spent on the works.

13034. You see on this plan what is termed the Great Eastern Road;—can you tell me who originated the work from the junction of it with the main road to what is called Billiard-street on the plan? No; I think it was done on petition by the residents in the place. I think that the petition was brought to me.

13035. Can you say of your own knowledge whether your syndicate cleared or went to any expense in making that road? No; I do not think so. We never spent any money on the Great Eastern Road.

13036-7. I see in your answer to question 2141 before the Select Committee, when asked as to what roads were left unfinished by you before the unemployed went on, you said, "To tell you the truth, I do not know what roads have been completed." Do you know—for if you do not know it is no good taking up your time—what work had been done on the roads in your estate before the unemployed went on? I know a considerable amount of work was done on Burns Road, but what was the exact state that it was left in I cannot say. As time went on we should have done more, but we left off some considerable time before the unemployed went on to it.

13038. Do you know that from your own knowledge? From my own personal knowledge.

13039. Do you know whether any part of Burns Road was ballasted? There was no ballasting done by us on our roads.

13040. Was it formed? I do not know whether it would be formed. It was formed near where the culverts were put in.

13041. Was it cleared? I think it was cleared right through.

13042. Were there any culverts on it? Yes; you will find there has been an expenditure of a certain amount upon culverts. I am quite certain about that.

13043. On Burns Road we find a continuation to the east, crossing the Great Eastern Road to a certain point. The road, after crossing the Great Eastern Road, bounds the whole of the land, apparently yours, on the north; then goes south and bounds the whole of your property again on its east side, and then starts away in an easterly direction to some place unknown to us;—can you explain this? I believe that work was carried out to give communication from the Junction to the Bobbin Rock Road.

13044. Does anyone live there? Yes; there are some old residents there, owning some of the best orchards in the district.

13045. As far as we could see that road is a *cul de sac*;—did your syndicate have anything to do with it? I have had nothing to do with making any of the roads excepting those roads I have paid for in conjunction with the firm.

13046. Did your syndicate pay anything for that road which bounds the whole of your property on two sides and then goes to some place? This road had been carried out at the time I visited the property, as indicated in my evidence. That was the first I knew of its existence.

13047. Has your syndicate ever given up any of the roads we see coloured red on the plan to the Government? I have no knowledge of having given up any of the land.

13048. Is there anything to prevent you, so far as you know, from closing any of these roads? No; I do not think there is. The work, I presume, was carried on in a hurried manner. The land should have been sold to the Government if they wanted it.

13049. I see on the south of the line of railway, as shown on this plan, there is a continuation of roads marked H, J, K;—do those continuations go through any of your property? No; we have scarcely any land there. I do not suppose we have an acre on the south side of the line.

13050. You were asked before the Select Committee to produce a plan of the subdivision;—is this plan I show you a copy of it? That is only a portion of the estate subdivided, or contemplated to be so subdivided.

13051. Is that the only part of your estate for which you have had a plan of subdivision made? Yes, that is the only part.

13052. It has been represented to us that the whole of the 600 acres has been subdivided? That is not the case.

13053. Do you know when you bought the land whether there were any roads cleared through it? As far as I remember the only road running through the estate would be the main Peat's Ferry Road, one of the most ancient roads in the Colony. The Vanceville Road must also have been in existence. These were the only two roads running through the property when we purchased it.

13054. Do you think any part of the Vanceville Road was in existence, either in the way of clearing or formation, when you got it? Yes; an old man named Cherry lived at the intersection of the Great Eastern Road and Lane Cove Road.

13055. Have you sold any portion of the subdivision, and if so, what prices did it bring? Between £3 and £4 a foot with Peat's Ferry Road frontages, and £5 per foot for other land.

13056-7. Have you sold any land on the eastern side of the line? 4 acres for £125 per acre.

13058. Where is that land? It will be in some of the blocks fronting Albert-street, in sections 8 or 9, on the eastern side of the station, some distance from the station.

13059. When did you first become aware of the existence of this network of road which is indicated on this plan by the letters H, H, H, I, E, and K, and especially this parallelogram of roads in the middle? Well, about the time and in the manner referred to in my evidence. On the 10th November, 1888.

13060. Was it long before the matter was mentioned in the House? I have stated that I had a general knowledge of certain roads. You want to know exactly when I became aware of and saw the roads.

13061.

Mr.
G. Withers.
6 May, 1889.

13061. Yes? That would be after giving my first evidence. It was shortly after I wrote and asked to amend my evidence before the Select Committee. They summoned me almost immediately, but I asked them to defer taking the evidence until I had inspected the property. My first definite knowledge of these roads was when I went up after giving my first evidence, on the 10th November, 1888.

13062. I see you were asked the question, "But you knew the unemployed were making these roads through your property," and you said, "Undoubtedly." And "Of course I heard it from all sources." Is that correct? Yes, principally from residents of the district, who would meet me in the city. I never sought any of the information.

13063. Then, I suppose, during the greater part of 1877 and 1888, and during the time you were a member of Parliament, whatever was done on that property you were made aware of? In a general way. Not as regards the details.

13064. Did you make any objection to the work? No; I was never called on.

13065. Did you consider that, as a Member of Parliament, you should wait until you were told of things? Being a Member of Parliament, knowing these men were starving in the community, and that the Government in their judgment were finding them this sort of work, and knowing that some years ago the Government asked for land for roads to open up the railway station and the Crown lands—that was where I understood the men were working. I thought the roads were being constructed in the ordinary way on that understanding.

13066. Were any of your partners members of the Government at that time? Mr. Burns was a member of the Government.

13067. What office did he hold? Colonial Treasurer.

13068. Whilst the work was going on? Yes.

13069. Did it occur to you, from your position as a Member of Parliament, and your partner being Colonial Treasurer, that these works should have been noticed specially by you; or did you think you should wait until your attention was called to them? I have had plenty of opportunities of seeing since what would have been the most judicious course on my part. It would have been to have got an injunction from the Supreme Court and have prevented the Government from going on to the land. This is what I should have done. Of course we can all be very wise after the event, but you will see a passage where I declare I believed that nothing was being done on that property that would not have been done if I had not been a Member of Parliament.

13070. You are aware from your business knowledge that in Companies or partnerships, it is well recognized that members or Directors shall not have a voice or vote in matters in which they are personally interested? Certainly.

13071. Did it not strike you when this money was being expended on the unemployed constructing roads on this private estate that you, as a Member of Parliament, and your co-partner as Treasurer, would be called on to vote or sanction the expenditure? I never viewed it in that way; but certainly when I saw the work that had been done, knowing what party politics are, I thought there would, in all probability, be a lot of bother about it.

13072. Altogether, away from party politics, did it not strike you as being a matter that might properly be objected to? I say no. You see the railway-station was in the middle of our property, and means of access must be given to it. Seeing that the Crown land was at the back, I looked upon the thing as most legitimate, but still, when I saw it, I thought there was plenty of scope for party politics to make a handle out of it.

13073. We are not concerned with party politics. We have to see if this ought to have been done in the general public interest. Do you think Mr. Burns knew that this was going on? Of course he did. Mr. Burns is in the habit of going to the property. For at least three years I have scarcely visited it.

13074. Do you know what Mr. Burns average visits are? I dare say his average visits have been once in every three weeks. In the early history of the property I frequently drove him up, but I, for certain reasons of late years, rarely went near the property.

13074½. Were you aware that, not only in the vicinity, but in other parts of the Colony there was Crown land that the unemployed might usefully have been set upon? I am now aware of this, but really it was no business of mine. As an ordinary member in the House I could not interfere with the Members of the Government.

13075. One of the Members of the Government was your co-partner? I had very little to do with Mr. Burns as a Member of the Government. I had very little to do with him even as a partner. Certainly I had no voice in the administration of the country with him. I saw less of Mr. Burns than of any other Member of the House or Government, although he was a partner of mine. I look upon a large portion of the work on this estate as being of benefit to the country.

13076. Not of particular benefit to yourself? If it had been dealt with on purely commercial lines, and the land purchased from us and paid for, we should have been £1,000 or £1,500 in pocket.

13077. I want you to look at this petition of June, 1887, respecting the Noxious Trade Site and the road thereto, signed by a large number of Members of Parliament, one of whom appears to be you.

13078. Do you not think that that would have been far more useful work to put the unemployed on than on this private property? Decidedly that was the sort of work I recommended. When speaking in the House on that and other questions of work, I failed to impress Governments with my ideas until too late. There would have been no question then about people's evidence or people's honor.

13079. I show you a petition [*Exhibit D 5*] presented by Mr. Ives for repairs of a road known as the Great Eastern Road? Yes, I signed that.

13080. Does reading that now remind you what was the state of the Vanceville Road before the petition was put in? It was all bush down to a certain point.

13081. Does the petition refer to the lower part of the road or the upper part of it? That was only a repairing job.

13082. That would be repairs to a road that already existed? Yes.

13083. Does your reading that petition refresh your mind as to what state the road was in before? No.

13084. I see in answer to a question before the Select Committee, by Mr. Burns, you said that Mr. Noonan was anxious to give evidence. Do you know what evidence he could give? No.

13085. Do you know where he lives? Yes, at Lane Cove. Patrick Noonan is his name.

13086. Did Mr. Burns show you various petitions of his that he presented to the House on this subject? No. I think he sent one to my office, addressed to my partner, but I have not seen it.

13087.

Mr. G.
Withers.
6 May, 1889.

13087. I see in a petition he presented he says that the unemployed who were under the direction of the Colonial Secretary and Mr. Deering without any communication to him, were put on to clear and form the said road. The road he refers to is the Boundary Road A. Is that correct to say it was done without any communication with your syndicate? I should imagine it was; because Mr. Burns told me the unemployed were going to do that road for which that land had been asked some years previously. I thought it a most reasonable and proper thing to put them on that road or any such requisite work.

13088. Yes, but the complaint is here that it was done without any communication with Mr. Burns, and this petition makes out, also, that it was done without any communication to you? Yes. I was never consulted about it. We had agreed to the matter many years before the "unemployed" were employed by the Government.

13089. Look at a memorandum in the appendix to the Select Committee's evidence being a dedication of part of Burns, Withers, and Smith's land one chain in width for the use of the public. Does not that refer to this road in paragraph five of the petition. Is not that the road that Mr. Deering cleared? I know nothing about it. I suppose all the details that were necessary had been attended to.

13090. Did you ever hear of Mr. Burns colleagues in the Ministry, at his request, having an inquiry made, independently of the Casual Labour Board, as to whether these roads were really required for the public benefit? Yes; after an article appeared in the *Sunday Times*.

13091. After the roads were formed? The *Sunday Times* had an article headed "The way the Treasury is looted."

13092. That inquiry then referred to here relates to what was produced by that article in the *Sunday Times*? Yes.

13093. That was what Mr. Burns asked to have an inquiry about? Yes. People called his attention to it.

13094. If we want to get any more evidence about that petition we had better get it from Mr. Burns? Yes.

13095. Do you know the road called Boundary Road. Is that on your land or on Crown land? I have every reason to believe that it is the boundary of the two properties.

13096. Is it on your land or on Crown land? That I cannot say.

13097. Do you know Mr. John Davies? Yes.

13098. Do you know him well? Yes; I have known him many years.

13099. Did you ever visit at his house? No. I have not been on speaking terms with him for some years.

13100. Have you spoken to him for some time? No, we have not spoken. There has been a permanent estrangement. We have not spoken for six years.

13101. Mr. Waller.] Has the firm of Burns, Withers, and Smith a separate banking account for the Hornsby Estate? No; we have no separate banking account for the Hornsby Estate. We have for that estate and other properties.

13102. How would you make payments for expenditure in connection with the Hornsby Estate? Mr. Burns would draw a cheque and send it round to Mr. Smith and myself to sign it.

13103. On what bank? The Bank of New South Wales.

13104. To any particular account? We did not pay by number, and whatever it was for would be represented in the body of the cheque.

13105. If it was for the Hornsby Estate would it be on the cheque? Yes.

13106. If it was for some other estate would it be named? Yes.

13107. Did a cheque have to be signed by all three partners? Yes.

13108. Was that arrangement in vogue for some time? Always. Very likely for some five or six years; ever since the account was opened.

13109. Would all payments for contract labour outside be thus paid? Yes. It would show nearly everything.

13110. Does your syndicate keep any books for such transactions as payments by cheque? No; the matter would be almost entirely represented in the bank-book and vouchers.

13111. Would the minute-book show it? I do not think so. The operations have not been very great. There are not many details.

13112. Were not undertakings in the shape of expenditure for improvements on the estate agreed to by each of the members of the syndicate? They would be agreed to by all three of the partners—that is, any matter of disposing of the timber or employing men about the place.

13113. How would you find out if a cheque were drawn for the Hornsby Estate, for what particular thing it was drawn? It would be shown in the body of the cheque. Mr. Kerney was in charge of the works, and it would be "pay him so and so." If for wages it might be "pay wages."

13113½. Would you recognize any expenditure paid on the estate undertaken without your knowledge or sanction? We have had a few brushes over matters that have not been clearly understood by all parties, but nothing serious; but any matter could be blocked by one partner or the other.

13114. Then, from the vouchers and the cheque-book a true record could be obtained of all money spent on the estate? Every sixpence.

13115. Therefore, all works, roads, or improvements will be disclosed by the cheque-book supported by the vouchers? Yes, should be.

13116. You said just now that you considered the work done on the Hornsby Estate of value to the country? Yes; I consider it of mutual advantage.

13117. Why? Because the Crown lands there are to be brought into the market. It gives access to them and also to the railway station. The fact of the railway station being so close at hand would induce people to buy the Crown land. The station would be almost locked in unless you had the roads.

13118. The roads were between the Crown land and the railway? No; between the Crown land and the main road—I mean the Lane Cove Road.

13119. Supposing there was nothing there but the sea or water? Then there would be nothing to justify the expenditure at all.

13120. Would you not have made access from the farthest position next the water up to the railway station? Decidedly; but that would have been when we felt justified in doing it, and had means at our disposal to do it.

13121. So, as a matter of fact, if the Government had not made access to the Crown lands when it suited your estate you would have made access to the railway station? There is very little doubt of it. There would have been an additional inducement to do it then, because there would have been no land in competition

competition with it. Our intention was not to subdivide it unless we had great inducement. We were anxious to sell it in one block. I am willing to do so now.

13122. Did you not think the land valuable enough to subdivide it? We did not think so. I believe it is now. It could be sold for £150 per acre.

13123. Is it as valuable as the Crown land? It is better than the Crown land. There is not much good Crown land left there.

13124. As a matter of fact, if your land is not sufficiently valuable for subdivision the Crown land would be of less value for subdivision? Yes; but it is all of some value. We can get £100 per acre for most of our land; but we have declined to take that.

Mr. G.
Withers.
6 May, 1889.

TUESDAY, 7 MAY, 1889.

Present:—

A. J. CAPE, ESQ., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

John Fitzgerald Burns, M.P., called in, sworn, and examined:—

13125. *President.*] Are you a Member of the Legislative Assembly? Yes.

13126. Were you a Member of the Legislative Assembly in the years 1887 and 1888? Yes.

13127. Did you hold a portfolio during either of those years? Yes, I was Colonial Treasurer.

13128. During what time in those years were you Colonial Treasurer? I held the office of Colonial Treasurer from the 20th January, 1887, until the month of January, 1889. I cannot fix the exact date.

13129. Then I can take it that during the whole of the years 1887 and 1888 you were in office as Colonial Treasurer? Yes.

13130. I believe you are interested in some land in the vicinity of Hornsby Railway Station? Yes.

13131. When did you purchase that land? In August, 1876.

13132. Will you look at this plan (*Exhibit D 4*) and tell me whether it correctly shows the land that you purchased? Yes; the plan shows the land on the eastern side of the line.

13133. Did you buy it jointly with anybody else? Yes; with Mr. Withers and Mr. R. B. Smith.

13134. Do you know Mr. Wells? Yes.

13135. Do you recollect at any time having a conversation with him relative to your Hornsby property? Yes.

13136. Will you detail, as nearly as you can, that conversation, and give approximately the date of it? Well, I could not fix the date; it was long before there was much movement at Hornsby in the way of settlement. It was about the time the line was to be opened. It occurred when I was going to Maitland in a railway carriage. The conversation turned on the probability of the connection between the Hunter and Sydney by a railway line. I then told him, in speaking of the Crown lands in the neighbourhood of Hornsby, that I would be willing to give the Government a road leading from Hornsby Station to the Crown lands.

13137. Can you give the year? No; I could not fix the year. I think it was before the line had been actually opened to Hornsby; I think it was in course of construction.

13138. Does that plan show the road that you contemplated giving? No; I had no particular idea as to where the road was to come. The conversation that we had in regard to Hornsby related more particularly to the large area of Crown lands in that neighbourhood. I think Mr. Wells said that the Government would require to open some roads. I told him I was the owner of the land intervening, and that I was willing, with my partners' concurrence, to let him have a road to the Crown lands.

13139. Was a result of that conversation your handing over the road marked A on this plan? No. As far as my knowledge extends the conversation led to nothing. The first movement for a road came from the Survey Department. Having read the evidence of Mr. Wells, I think it goes to show that nothing resulted from our conversation, which was long prior to any movement to open the roads in that locality. I had an application at a much later period from the Survey Department for permission to make a road from the Peat's Ferry Road across the Railway Bridge to the Crown lands. An officer called upon me at my office in Elizabeth-street, and his mission was to get a road from Peat's Ferry Road across the Railway Bridge to the Crown lands.

13140. What evidence of Mr. Wells' do you refer to that you say you have read? I read his evidence through, and it does not seem to me from his evidence that any action was the result of the conversation.

13141. His evidence before this Commission? No; his evidence before the Select Committee of the Legislative Assembly. I have not seen his evidence before this Commission.

13142. Will you look at a letter from the then Under Secretary for Lands, Mr. Oliver, to Messrs. Burns, Withers, and Smith, dated 29th August, 1885—what land does that refer to? That refers to land known as Bellamy's Grant, on the eastern side of the line.

13143. And is that some of the land through which are the roads we are inquiring into? I think it will save time, if I say this—

13144. I must ask you to allow me to conduct the examination in my own way. This letter of Mr. Oliver's states that the Crown will raise no objection to the issue of a certificate of title in virtue of Bellamy's grants to the land extending about 59 chains southerly from the south side of a road 1 chain wide running along the south boundary of Fear's and Gray's grants. Is that shown on this plan [*Exhibit D 4*]? I do not think the plan will show the land, which is at the back of road A to the north.

13145. In your evidence before the Select Committee you state that Surveyor Perdriau waited upon you with reference to some road. Will you point out on the plan what road that is? That is road A, over the bridge. He made an application and came to inquire whether the owners of the land—Burns, Withers, and Smith—would be willing to allow the Government to make a road there, from the Peat's Ferry Road through our lands to the Crown lands. I was personally willing to give the road, but I had to consult my partners.

J. F. Burns,
Esq., M.P.
7 May, 1889.

J. F. Burns, Esq., M.P.
7 May, 1889.

13146. Was the outcome of that interview the writing by you of the letter mentioned in your evidence before the Select Committee? Yes; the outcome of it was that letter.

13147. Will you read it? Yes.

"Sir,

"75 Elizabeth-street, Sydney, 16 November, 1886.

"With reference to my letter of 8th July, 1885, addressed to the Surveyor-General, and to your communication to me of the 29th August following, numbered 85-1,615, I beg now to state for your information that as it appears the Government would much prefer a direct road from Peat's Ferry, across the railway bridge at Hornsby, through the lands of Burns, Withers, and Smith, to the Crown lands adjoining, in lieu of the road we first mutually agreed upon, Burns, Withers, and Smith are prepared to assent to the proposed change, provided that the new line is surveyed and cleared for traffic in a reasonable time, and that the Government relinquish all claim in respect of the former line.

"I am, &c,

"J. F. BURNS."

"The Under Secretary for Lands."

13148. Was that arrangement carried out on the part of the Government? I do not know in what sense it was carried out. I only knew that the Government assumed that we were contented, because I, some time afterwards, learned they had placed some of the unemployed on the land to clear the road for traffic.

13149. Did they relinquish to you all claim in respect to some former proposed line of road? I do not know that they did. It may be assumed that they did by their acting upon that letter when it suited their purpose.

13150. Was that road A formally dedicated? I do not know of any formal dedication. Do you mean the first road—the old road?

13151. Will you look on notice of dedication appearing on Appendix to the Evidence before the Select Committee. Is that the dedication of road A? Yes; that is it, dated 19th August, 1887.

13152. Were you often up about the land there belonging to Burns, Withers, and Smith? Yes.

13153. How often? I was sometimes there on a Saturday.

13154. Were you there once a week? Not once a week.

13155. Once a month? More than once a month sometimes.

13156. What were your average visits during the year? I dare say during the year I would pay twenty visits.

13157. Have you seen road A since the agreement by you and your partners to dedicate it? Yes.

13158. Have you seen it in such a way as to know what has been done on it? Yes; I think I must have been over it several times.

13159. Has anything more been done to it than what was required in your letter—namely, that it should be surveyed and cleared for traffic? It has been roughly cleared and roughly ballasted.

13160. You know what surveying and clearing a road for traffic means? It just depends upon the requirements of a locality.

13161. In a part of the country where it was bush land could there be any doubt as to what surveying and clearing for traffic meant? It depends upon the prospects of the place for traffic. Rough clearing might be done, but if there are any prospects of traffic more may be done.

13162. Has anything more been done than surveying and clearing this road for traffic? No more has been done than I and my partners have a right to expect, considering that we gave the land. The land is worth at least £6,000, and I question if that amount has been expended upon the road.

13163. Where about is Fears' and Gray's land? It abuts on our property to the north.

13164. Is this petition I hand you the petition you presented to the Legislative Assembly on 6th March last? Yes.

13165. Are the statements in that petition correct? Yes. [*Petition put in and marked T.*]

13166. In paragraph 5 of that petition you say that without any communication from or to petitioner, or any of his partners, some of the persons called the unemployed, who were under the direction of the Colonial Secretary, and the immediate supervision of Mr. Deering, the Metropolitan District Surveyor, were put on to clear and form the road from Peat's Ferry Road across a railway bridge to the Crown lands? Yes.

13167. Is that correct? I believe it is correct.

13168. Did you not on several occasions—both verbally and by letter—urge the clearing and forming of that road A and the fulfilment of the Government agreement? I may have urged the fulfilment of the engagement to clear the road, but I had nothing to do with the unemployed being put on to clear it.

13169. The petitioner states that without any communication from you these men were put on? Yes. I will add to that, that eventually, on the occasion of a visit I paid to Hornsby, I recollect driving over to see what "the unemployed" who had been on the Crown lands were doing, and I found the men at work on the road—which they were then clearing.

13170. Does this letter, dated 31st March, 1886, appendix to the Select Committee's evidence, from you to the Chief Commissioner for Roads refer to road A? Yes.

13171. You say there that steps should be taken as early as practicable for clearing and forming the road? Yes.

13172. And that relates to road A? Yes. I want to retract that statement. It refers to the road near Fears' in accordance with the settlement arrived at in 1885. My request was that they were to make the road near Fears' which by their settlement they were entitled to make. The road they proposed in the first instance was too far north, and they made application to me for road A.

13173. Then that letter refers to the road originally proposed, and for which road A was substituted? Yes.

13174. If you refer to this letter you will see a note by Mr. Bennett,—“Could not the unemployed be put at work here”? Yes.

13175. You see further on a note that—“A road in this position would be of no present use to the public, as there is not a person living on the back lands to make use of it;—no provision is made for crossing

NOTE (on revision) :—Q. 13148—Add “The Government was at the same time preparing for the sale of a subdivision of Crown lands into which the road led.” Q. 13156. I have a record of my visits to Hornsby which proves that in 1887 I made to it fifteen visits, and in 1888 eleven. Q. 13162. The accounts of Mr. Wells and Mr. O'Donnell prove that the expenditure on this road was £131 5s. The land given for it was worth at least £600. Q. 13163. The Government in 1885 obtained the right to make a road near Fears' along the boundary of the land of Burns, Withers, and Smith. This is the road I asked the Government in my correspondence up to October, 1886, to open. It is near Hornsby, yet further north than road A. Qs. 13170–83. All my correspondence on this subject up to November, 1886, had relation to the road near Fears'. My letter of the 27th October, 1886, proves that I was then ignorant of any intention on the part of the Government to survey road A. At no time during this correspondence was I a member of the Government.

crossing the rail at this point, which, being here in embankment, would require a heavy embanked approach and an expensive culvert adjoining";—have you seen these papers before? I saw them when this evidence was published by the Select Committee of the Assembly.

J. F. Burns;
Esq., M.P.
7 May, 1889.

13176. Did you read the Appendix? Yes.

13177. And you read this? Yes.

13178. Now look at the next paper of the same Appendix—a letter from Mr. Symonds to the Commissioner for Roads, being an intimation that after seeing you he (Symonds) could not recommend the road at first proposed by you, but recommended another road about a quarter of a mile south of that line;—is not road A the road that he recommends? I think it is; but I may state that although I was included to give the road, my partner, Mr. Smith, was strongly opposed to the road being given.

13179. Do you know whether that road was surveyed by Mr. Deering? I am not aware at the present moment.

13180. Do the notes following on Mr. Symonds' letter indicate that this road A was surveyed by Mr. Deering? I think from the second note that some directions were given to Mr. Deering to make the survey.

13181. Do you know of your own knowledge whether or not the road was surveyed? I do not think it could have been surveyed before Mr. Perdriau came and saw me.

13182. Will you look on the next page of the Appendix to the Select Committee's evidence, a letter dated 29th September, 1886, from the Commissioner for Roads to you, informing you that the papers relating to the road had been sent to the Survey Department to Mr. Deering for survey of road, and intimating that when the road is aligned by Survey Department the clearing will be done? Yes; that, I believe, referred to the road further north of the line.

13183. I think you will find that it is spoken of in Mr. Symonds' report of 21st June, 1886, in which he recommends road A in substitution of the useless road previously reported on? That may be so. I do not think I was informed.

13184. Look at the next letter from you to the Minister for Mines, inquiring when the road through Government land on the northern side of the land of Messrs. Burns, Withers, and Smith to Peat's Ferry Road would be surveyed. What does that refer to? So far as I know it still refers to the Government road on the north side of the land.

13185. Is the road that you think it refers to shown on this plan? I think not.

13186. The next letter of the 16th November, 1886, is an intimation from you and your co-partners that you are prepared to assent to the change of road? Yes, that was in consequence of Mr. Perdriau calling upon me and asking for a road across the bridge through our land to the Crown lands.

13187. You see the next letter of 14th February, 1887, from Surveyor Perdriau, reporting the survey of a road 1 chain wide crossing W. Bellamy's 100 acres in a direct line from the Peat's Ferry Road to the Crown land. Is that road A? That is road A.

13188. Who is the Mr. Dawson referred to in that letter? Mr. Charles B. Dawson, a surveyor, who had been acting for me.

13189. Then at that time the Government Surveyor and your private surveyor were brought into contact regarding this road? Yes. There was a difference between the surveyors which was settled by the giving up of the road to the north.

13190. You see the next letter from Mr. Twyman is recommended that the tracing and form of dedication of the roads be sent to you to be signed and returned to the Department, so that notification of dedication might be made in the *Government Gazette*? Yes.

13191. Did you and your co-partners sign that form? Yes; and that relates to road A.

13192. And that dedication was gazetted? Yes; I believe it was.

13193. Did that dedication take place after you took office as Colonial Treasurer? It must have done.

13194. In the next letter, appendix to the Select Committee's evidence, dated 11th August, 1887, addressed to the Minister for Lands, you say, "In sending you, as I do herewith, the within approval of Burns, Withers, and Smith, of the plan of the road through their land from Peate's Ferry Road *via* the railway bridge at Hornsby to adjoining Crown lands, I think it is right to remind you that it is obligatory on the part of the Government to extend the road to the Great Eastern or Vanceville Road, and put it in fair passable condition for traffic"? Yes.

13195. Where was the obligation? I wrote from memory as to the conditions. I only knew that in giving the road I was acting in opposition to my partner, Mr. Smith. My recollection so far was, that there was an obligation on the part of the Government to put it in fair passable condition for traffic and extend it to the Great Eastern or Vanceville Road. It is not named in the papers, but I wrote that only from memory.

13196. Do you think it is correctly put there? It was not correct.

13197. You were a Minister at the time, communicating with one of your colleagues? Well, I was communicating with him officially. They would know what the conditions were in the Survey Department; they would be in the office. I knew I was giving land that was valuable—worth any expenditure that might be made upon it by the Government.

13198. When did you first become aware that the men named the "unemployed" were working on road A? I became aware of it on visiting the locality, on being informed by a man named Noonan who lives in the locality. He said that some men were working in the direction of the bridge.

13199. Was it any difference to you whether that road was cleared for traffic by the people called unemployed or ordinary labour, so long as it was done? I do not know that it was.

13200. Do you make any complaint, as you point out in your petition that "the unemployed" were put on without any communication to you? I did make a point of that for this reason. It had been alleged that the unemployed were placed on the road under my directions; whereas I had no control over the unemployed. I neither sought to direct nor interfere with them. They were put on the road without my

NOTES (on revision):—Q. 13184—Omit, "So far as I know" and "still," and after "land" add "near Fears." Q. 13204, line 7—For "Vanceville" read "Junction," and for "Junction" read "Vanceville." Q. 13189—After "surveyors" insert "about boundaries in 1885," and after "north" add "near Fears, to the Government." Q. 13196—After "not" insert "technically." Note.—Nevertheless this was not material, as the road to Vanceville was then being formed, and it was true that I had been led to believe that it would be continued through the Crown Lands to Vanceville. Mr. Deering states in his Report of the 17th June, 1888, par. 7, that the Department of Lands had authorized the roads through the Public Estate, about to be sold, including the road from the Hornsby railway station, through and along Crown lands to the Eastern or Vanceville Road, to be cleared, &c. My letter respecting the dedication was dated 11th August, 1887.

J. F. Burns,
Esq., M.P.
7 May, 1889.

my knowledge. The first information I got of the fact was from Noonan. It did not matter to me whether the work was done by the unemployed or not. The Government got the land without any compensation, and I considered it should be properly cleared.

13201. Was it not part of the bargain that the Government should clear the road for traffic? Yes.

13202. And did it matter whether that work was done by so termed unemployed paid by the Government or by other men paid by the Government? Not in the least to me.

13203. It was public money all the same? Yes; it was public money all the same.

13204. Will you tell me as concisely as you can what was the arrangement that led to the giving by you and your colleagues of what is called Junction Road, marked GGG on plan [*Exhibit D 4.*]? There was no arrangement. I knew that they commenced to make what is called the Boundary Road, and I knew from observation that the making of Boundary Road there as they proposed, to reach the Vanceville Road, would involve a large expenditure as the ground was precipitous at one place. It did not surprise me therefore to receive a communication from the Casual Labour Board expressing their desire to continue what is known as the Vanceville Road through to the Junction Road. I understood that was owing to the difficulty in making the Boundary Road. That announcement came to me in a letter, and I gave my assent to the proposal. I knew perfectly well that they could not construct the Boundary Road except at an enormous expenditure. I learned afterwards from the evidence before the Select Committee —

13205. I wish, as far as I can, to confine your evidence on this point to your own knowledge. It is important that we should get your knowledge instead of what you know from other people? To complete the matter, I heard Mr. Houison state before the Select Committee that he recommended the Casual Labour Board to apply to the owners of the land to allow them to continue the road known as Junction Road through to the Vanceville Road.

13206. Did you ever see Mr. Houison with reference to any proposal to allow the Government to go through your land with a road in place of extending the Boundary Road? No.

13207. Did you ever see Mr. Wells with reference to it? No.

13208. Or Mr. Davies? No.

13209. Have you amongst your papers a copy or record of any authority from you or your co-partners allowing the road, and for the work that has been done on this Junction Road? I do not think there is any paper unless it is the reply to the application to make the road.

13210. Have you that? I have not got it here; but it is amongst the papers of the Select Committee. I may be allowed to add this: that until I saw Mr. Houison before the Select Committee I did not know him.

13211. Are you sure there is such a paper? Yes; I will get the document. I think I at once wrote a letter giving my assent to the change. I should have the original paper with a rough copy of what I wrote in answer to the application.

13212. Do you believe that there is any authority from you and your co-partners to support the opening, clearing, forming, or other work on this Junction Road? There is an authority. This application was made to me for permission to make this road from the Junction Road to the Vanceville Road; and I wrote back an answer giving the permission.

13213. Nothing beyond that? No.

13214. But you believe there is such a letter? Yes.

13215. Will you be able to give the Commission a copy of it? Yes.

13216. Mr. Wells, one of the members of the Casual Labour Board, stated that since his conversation with you in 1885, or 1886, he has heard nothing whatever from you in connection with these roads, nor does he believe that any other member of the Casual Labour Board has? No; I have studiously refrained from saying anything about these roads.

13217. Then to whom would that authority be given? The Casual Labour Board wrote to me asking for my permission. I at once replied giving my permission.

13218. Is that the letter you refer to? [*Witness looks at a letter, dated 19th October, 1887, addressed to Thomas Hinchcliffe, Secretary to the Casual Labour Board.*] That is it I believe.

13219. Read it carefully? I think that is it.

13220. Do you see attached to that a copy of a letter from Thomas Hinchcliffe, dated 18th October, 1887, asking you if you have any objection to the opening of the roads marked A, B, and C? Yes.

13221. Now, having seen that letter, has the letter of 19th October any reference to the Junction Road? It does not seem to have any reference to it.

13222. Do you think that amongst your papers you can find that authority? The paper I had in my mind when you asked about the letter was a similar paper to the one I have here.

13223. Do you believe there was one? There was a paper asking for permission to extend the Boundary Road.

13224. Is this Junction Road an extension of the Boundary Road? No.

13225. Was there any writing by which you and your co-partners authorized the Government, or any surveyor, or any person in charge of the unemployed, to go on your property and make the road called the Junction Road? No. I think they got permission in this way:—They made application to me for some roads. I had no time to attend to the business, so I handed the matter over to the surveyor, Mr. Dawson, and he went over and marked out the roads. I gave him discretionary power. I did not want them to make roads that would injure my property, and to make the Junction Road, about which there was a communication at right angles through the property to the Vanceville Road. Mr. Dawson would have acted in this matter for me.

13226. Do you believe that there was any letter at all? I believe there was a letter.

13227. Do you believe that there was a written authority from you and your partners? I do not think I waited to see my partners. I was informed there was a large number of people on the ground, and, without waiting for my approval, they had actually commenced to extend the Boundary Road.

13228. Did you give Mr. Dawson, your surveyor, some instructions? Yes.

13229. Did he, consequent upon those instructions, see the gentleman who had charge of the unemployed operations there? Yes.

13230. Is it not the case that, instead of there being any written authority, the matter was arranged between Mr. Dawson, your surveyor, and the Government Surveyor? That may have been so, but I think there was some communication.

13231.

13231. Well, looking now at paragraph 6 of your petition, do you still adhere to the statement there, that you were applied to by letter, on the recommendation of Messrs. Wells and Houison? I believe so.
13232. Then if you have that letter from Mr. Wells, Mr. Houison, Mr. Davies, or any other officers or department of the Government, will you kindly send it, or a copy of it, to this Commission? Yes.
13233. You were a Member of the Ministry at this time? Yes.
13234. Was the matter brought before the Cabinet? Yes.
13235. Was the sanction of the Cabinet obtained to the work on this Junction Road? I think I may state that I brought the matter before the Cabinet.
13236. The Junction Road? The question of this road specifically never came before the Cabinet; but I brought the whole question of these roads before the Cabinet.
13237. When? Well, I cannot fix the date; but I know that in consequence of my letters and representations and my desire that the Cabinet should consider whether these roads were all in the public interest, Mr. Bennett, the Commissioner for Roads, was desired to report upon their necessity from a public point of view.
13238. Would that appear in any minute-book of the Cabinet? They don't keep minutes of Cabinets.
13239. Is there no record kept of what is said or done in Cabinet Council? No.
13240. Can you recollect what Ministers were present on the occasion you brought it up? I think most of the Ministers were there. Mr. Sutherland sent for Mr. Bennett, and I recollect him requesting Mr. Bennett to visit the locality and say whether these roads were really wanted. Mr. Bennett furnished a report upon the matter, which is amongst the papers laid before Parliament.
13241. Do you recollect the names of the gentlemen who were present at the Cabinet? I recollect Mr. Sutherland was there, because as his Department had most to do with the roads he sent for Mr. Bennett subsequently.
13242. Can you give me any other name besides Mr. Sutherland? Most of the Ministers were there.
13243. Was Mr. Inglis present? I think so.
13244. Mr. William Clarke? I think so.
13245. Mr. W. J. Foster? I think not.
13246. Mr. B. R. Wise? I do not recollect.
13247. Mr. Thomas Garrett? I think so.
13248. Mr. C. J. Roberts? I think so.
13249. Mr. Francis Abigail? I think so.
13250. Mr. Salomons? I do not think so.
13251. Sir Henry Parkes? I think so. To the best of my recollection I pointed out that I would like the question of these roads to be considered by some officer outside the Casual Labour Board. In consequence of my request Mr. Bennett was sent by Mr. Sutherland to report upon them.
- 13251½. Did the work of clearing and forming and the taking over of this Junction Road ever come before the Cabinet for Ministerial consideration while you were sitting? I believe that it was shortly after the application for that road was made that Mr. Bennett reported upon the roads. That was before anything could be done beyond rough clearing.
13252. Did the question of the Junction Road—whether the Government should take it over, clear it, form it, or otherwise—ever come before the Cabinet at any sitting at which you were present? The question was mentioned by me in the Cabinet, and in consequence of the statement I made on the subject Mr. Bennett was deputed by Mr. Sutherland to report upon the roads.
13253. But did the consideration of taking over, clearing, or forming Junction Road ever come up for decision at any meeting? No. Junction Road was not specifically mentioned, but it is one of the roads upon which I desired the Cabinet to get the opinion of Mr. Bennett.
13254. Do you know Mr. Gordon, surveyor? Yes.
13255. Did you ever see him in connection with any of these roads? I do not think I saw him more than once; it might have been twice.
13256. Referring again to the letter from Mr. Hinchcliffe, dated 18th October, 1887, and your reply attached, will you point out on the plan what roads that referred to? Road A must have been partially made at the time this was written. B and C, I do not know about; they are small roads.
13257. I show you the tracing of Mr. Gordon, which is attached to the papers laid before Parliament, which is apparently the plan referred to in Mr. Hinchcliffe's letter. Are these roads, which are marked A, B, and C in that tracing of Mr. Gordon's the roads marked as general roads, crossing from the Junction Road to the Boundary Road? I could not say.
13258. Are these roads referred to in Mr. Hinchcliffe's note three of the cross roads from Junction Road to Boundary Road? Yes; they are three small roads, leading from Boundary Road to Junction Road, and are probably the roads marked D, E, and F on this plan. [*Exhibit D 4.*]
13259. Now, we have your and your co-partner's authority for these three small cross-roads, marked D, E, and F, on this plan [*Exhibit D 4.*], and which are A, B, and C, on Mr. Gordon's plan, but we don't find any authority from you or your colleagues for any other roads on the estate;—have you given any? No; I think not.
13260. Have you amongst your papers, or have you any recollection of any letter, minute, or writing of any kind, giving up any one of these roads to the Government, or allowing them to be cleared or formed, beyond this letter which relates to the roads D, E, and F? I think not.
13261. You see the roads marked H, I, and K, on this plan [*Exhibit D 4.*]? Yes.
13262. Have you at any time authorized the making of these? No; but I will tell you what may have been done. I have had to leave the matter of the roads, in some measure, in the hands of Mr. Dawson. The roads marked D and F are amongst those asked for by the letter from the Casual Labour Board, which refers to roads running from Boundary Road to Junction Road. The extension down to the corner of Burns Road was given in consequence of some communication from Mr. Dawson, after he had been on the

Esq., M.P.
7 May, 1889.

NOTE (on revision):—Q. 13235—I am certain I never mentioned Junction Road or any other road to the Cabinet. My reference was generally to the roads in the Hornsby district. Q. 13237—Omit from “and my desire to interest” inclusive. Q. 13239—It is not usual to keep regular minutes of Cabinets, but minutes are sometimes made on the papers in some cases. Q. 13255—I recollect meeting Mr. Gordon and Mr. Davies at Hornsby on one occasion, when the former asked me for permission to make an opening from Junction Road to Boundary Road, to which I agreed.

J. F. Burns,
Esq., M.P.
7 May, 1889.

the ground with the surveyors. The desire was to extend the road to the corner of Burns Road, so as to get access to the Boundary Road. I gave my consent to Mr. Dawson to give the half of the road, providing the adjoining property-owner gave the other half. With regard to the road you asked me about—road I—that is a road to Pearce's Corner, it is a road passing through land in which I have no interest, and was made, I presume, like other roads to give an opening through other lands to the Crown lands. It is a road, however, that I have no knowledge of. As to road K, I also have no knowledge of it.

13263. Does not road I go anywhere near your land? No; I have land neither to the right nor left of it.

13264. Have you land to the north of it? Well, it ends in Burns Road. We have no land on the southern side.

13265. Now, with regard to road K? We have no land on either side of it, right through from where it starts from the Junction Road to the end of it. Then, as to the continuation of the road from Burns Road down to the platform, we have no land on either side of that road.

13266. What road is that? That is the continuation of D and H, to what is known as the platform on the Lane Cove Road. We have no land there.

13267. Then, so far as the evidence goes up to the present time, the only roads which you have assented to give up are the roads D, E, and F? Yes.

13268. Will you turn to Mr. Bennett's memorandum of the 8th February, 1888;—was that written while you were a member of the Cabinet? Yes.

13268½. You see in the first paragraph he states that "the roads from the main or Junction Road to the Peat's Ferry Road have been cleared at private cost of the owners of the land on either side"? Yes.

13269. Is that correct? That would apply to a small clearing close to the railway. The clearing was made by the owners of that land I believe, from the Junction Road to the Peat's Ferry Road across the bridge.

13270. Can you show me on this plan [*Exhibit D 4*] what roads are referred to in Mr. Bennett's memorandum as being "roads leading from the main or Junction Road to the Peat's Ferry Road"? No; I cannot explain this matter to you.

13271. Do you know whether Mr. Bennett went up there? He has given evidence that he was there—that he had been over the ground and spent a day there.

13272. Are there any roads on this plan [*Exhibit D 4*] that you have before you, leading from the Junction Road to the Peat's Ferry Road? The only road I know leading from the Peat's Ferry Road would be the road near the railway to the eastern side.

13273. I suppose you know more about these roads than I, but do roads H, I, and K, run from the Junction Road to the Peat's Ferry Road? No.

13274. Is there any road running from the Junction Road to the Peat's Ferry Road? No.

13275. Then is not that paragraph in Mr. Bennett's minute some mistake? I do not know what it refers to.

13276. Is it not incorrect? Unless Mr. Bennett means some other roads, which I can give you no information about.

13277. Is not the paragraph in Mr. Bennett's minute "about roads from the Junction Road to the Peat's Ferry Road having been cleared at private cost by the owners on either side" unintelligible when there is no Peat's Ferry Road on this side of the railway, and there is no Junction Road on the other side of the line where the Peat's Ferry Road is? Unless Mr. Bennett regards the Junction Road as Hornsby Junction. There are roads close to the station, made through the subdivision up to the fence, but there is no Junction Road there.

13278. Do you think that what Mr. Bennett speaks of as the Peat's Ferry Road is the Lane Cove Road, and that when he was speaking of "roads from the Junction Road to the Peat's Ferry Road," he meant the roads H, I, and K, leading to the Lane Cove Road? I do not know what he meant, what I know is this. That the Vanceville Road up to a point here had been cleared by the private proprietors at their own cost. The road here called Burns Road, leading into the Vanceville Road was opened at private cost, within part of the subdivision, about 50 acres close to the railway line some rough clearing was done by the proprietors, and the commencement of the Junction Road here was roughly done at the expense of the proprietors.

13279. But that does not lead into Peat's Ferry Road? No.

13280. Is not Peat's Ferry Road altogether on the other side of the railway line? Yes.

13281. Has the Vanceville Road anything to do with the Peat's Ferry Road? No.

13282. Then, so far as you can say, the first paragraph in Mr. Bennett's minute is not quite intelligible? It requires some explanation, I think.

13282½. You cannot explain it? No.

13283. I come to paragraph 3 in the same memorandum, as follows:—"To obviate this, on the representations of the Officer of the Survey Department, Junction-street was made the main road to those back lands from the station; the owners of the land, Messrs. Burns, Withers, and Smith, having given five roads of access, which have all been cleared so as to give access to eligible points for the continuation of roads at summits of ranges through the expanse of Crown lands to Cowan Creek";—will you tell me what five roads Messrs. Burns, Withers, and Smith gave? Well, Mr. Bennett states that he examined the locality, and he was in a position to know.

13284. Can you tell me what are the five roads that Messrs. Burns, Withers, and Smith gave? First, the extension of road F or Vanceville Road into the Crown lands. That was given in response to the application from the Lands Department. Road E was given at the application of the Casual Labour Board. Road D was given, and I am not sure whether that road is Road C or B there on this paper.

13285. That is three roads. Mr. Bennett states that he was in the locality; do you think his information was correct? His information is incorrect as to the number of roads that were given, but it is only fair to state that one or two of the roads were opened without our assent.

13286. Did you see Mr. Bennett in any way in connection with these roads? No.

13286½. Do you know what officer he sent to report? He states in his report that he examined the locality of Hornsby himself and the works done by the department and the unemployed.

13287.

NOTE (on revision):—Q. 13267—This is subject to correction. Mr. Dawson agreed to some roads on my behalf, and any agreement of the kind must be respected. Q. 13268½—Lane Cove Road is sometimes called Peat's Ferry Road, into which it leads, and probably Mr. Bennett has fallen into what is a common mistake.

13287. About the Vanceville Road—who made that road from the Lane Cove Road to Billyard-street? I believe it was made by the local proprietors who afterwards received some assistance from the Government in making the road.

J. F. Burns,
Esq., M.P.

7 May, 1889.

13288. Was it made at the time you bought the property? I think it was opened and being used.

13289. Was it cleared at the time you bought? I think it was roughly cleared.

13290. What do you call roughly cleared? Carts and drays could go over it.

13291. Did you pay anything for the work on it to the Lane Cove Road—Mr. Bennett's report on the subject of the Vanceville Road—is that it was made by the department? Yes.

13292. Now, as a matter of fact, was it not originally made by the owners of the land? It was roughly made.

13293. Then is that statement in paragraph 4 of Mr. Bennett's minute altogether correct? It might, in the sense of the road being formed and ballasted, be correct. My first recollection of the work is that it was not ballasted. It was a road roughly cleared.

13294. As it was then would you call it made? Yes, sufficiently to drive on.

13295. Look at the next sentence in Mr. Bennett's minute, "One of the other two cross-roads recently cleared was to give direct access from the Church, and junction of the Lane Cove Road and Peat's Ferry Road, Pearce's Corner to the Crown lands." Can you show me on the plan what he refers to? Road I. That is a road concerning which Mr. Bennett did not know to whom the land belonged, but it is not our road.

13296. Mr. Bennett continues: "The other intermediate road gives access from Lane Cove Road, half way between Gordon and Hornsby, to the land in question." Do you know which of the roads on the plan is meant by "the other intermediate road?" I think he means road H; he assumes that it was passing through our land.

13297. Does Mr. Bennett's report touch in any way Burns-street or Road? I don't think it does.

13298. Does Mr. Bennett's report in any way touch the road which connects Burns-street with Junction-street? I do not think it does.

13299. Does Mr. Bennett's report touch road K? I do not know whether it does or not. Mr. Bennett's report speaks of only two cross-roads, and the roads he speaks of are H and I.

13300. Does Mr. Bennett's report touch George-street, Florence-street, or Burdett-street? It would be absurd if Mr. Bennett's report referred to the subdivision streets. These roads for the subdivision have never been properly opened; they have been roughly cleared, and badly done. I do not think that Mr. Bennett's report would touch these roads at all. Besides, anything that was done was rough clearing, done long before Mr. Bennett had been on the roads.

13301. Can you tell me what amount of work had been done by you and your co-partners in the way of clearing, forming, and making any of the roads there up to May, 1887? I could not tell you the amount of expenditure except as regards Burns Road. We had made this road from Vanceville Road over a small briggie here down close to where E road now comes.

13302. How much did you spend on it? I could not state from memory. I have got my bank-book here. I will look at the account.

13303. Please see? I cannot make up the account. I will supply it afterwards.

13304-5. Can you speak from memory—approximately? No. I don't care to speak approximately.

13306. Is there £500 spent? No.

13307. £200? Not £200.

13308. £100? If you will wait, I will give it to you in a few minutes. I have ascertained from my bank-book that we made payments in connection with the clearing of roads—that is, Burns Road, and some clearing on the opposite side—that is, at the subdivision on the eastern side of the railway—of £303 13s. 4d. These payments were made by cheque. Besides these payments we had for a long time a man engaged who lived at Hornsby in a house upon our property, whose sole business it was to clear the subdivision which is marked there.

13309. What would these payments be altogether? I have got no record here. We made payments to one person alone for these clearings, amounting to £303 13s. 4d.

13310. Is that limited to what you expended on the land on the eastern side of the line, or does it include the land on both sides? No, there was the subdivision on the opposite side.

13311. Can you tell me how much you spent on the subdivision on the opposite side? I cannot tell. The payments all had reference to Burns Road and to the subdivision on the opposite side. These were payments made to a man named Whitehead, who had been there for a long time.

13311½. Where do you get these particulars from? From the bank-book.

13312. Have you any account for these payments? No; they go a long time back.

13313. The cheques are here shewn to be drawn in favour of a Mr. Kearney,—who is he? The person who had charge of the work.

13314. Have you had any account of the payments which would give particulars of where the work was done? No; I could find the person who received the payments—which will be better.

13315. Can you send us your accounts? Very likely they are destroyed. We went through the accounts and dealt with them, and bothered no more about them. The man is still living near Sydney.

13316. Do you know his address? I think it is Cook's River; I know he is in the employ of a Company with which I am still connected.

13317. Have you ever seen this petition [*Exhibit D 5*]? Yes.

13318. Was that ever presented to you for signature? Yes.

13319. Did you sign it? No, because it came to me when I was acting for Mr. Sutherland, and I would not sign it.

13320. Who was Mr. Sutherland? Minister for Works.

13321. Then it came to you when you were acting on behalf of one of your colleagues, and you refused to sign it? Yes.

13322. Did you refuse to sign it because you were interested? Because I was a Member of the Government.

13323.

NOTE (on revision):—Q. 13291—For "Yes" read "I paid nothing for the work on the Vanceville Road." Q. 13300—Rough clearing was first done by Burns, Withers, and Smith before the inspection by Mr. Bennett, and next by the Casual Labour Board prior to the land sale and after his visit. Q. 13303—Omit from "that is," &c., to "railway—of," and insert "amounting to." Q. 13311—For "These were," read "There were also."

J. F. Burns,
Esq., M.P.
7 May, 1889

13323. Was it because you were interested in the property it went through? Yes, both.
13324. Do you know what work that petition wishes to have done? Yes. Reference is there made to the road from a point on Lane Cove Road to Burns Road.
13325. Do you know whether there was any petition or memorial presented to the Minister for Lands, or any other Minister, for the extension of the Great Eastern Road from the Junction Road to the Boundary Road? I do not think so. I wrote a letter to the Department, giving my assent to it.
13326. In your evidence before the Select Committee you say, in answer to question 2221, you got an application from Department of Lands on 9th September, 1887, asking permission for the opening of that Vanceville Road, to which you replied on 19th September, giving assent to that road being extended to Boundary Road. You said, in answer to the inquiry of the Chairman as to producing that paper, that you thought it was amongst the printed papers? Yes.
13327. How did you get the dates? I had the letter in my hand when I gave evidence.
13328. Can you produce it now? I can get it now I am certain.
13329. Will you produce to us at your earliest convenience the application and the letter assenting to the application referred to in your evidence before the Select Committee? Yes; it ought to be in the Department.
13330. You probably will have a copy of it, or some record. We have been unable to find it and in the absence of some information from you we are without any relative papers? It can easily be traced in the Lands Department I think.
13331. This petition which relates to the road running from this point here up to Burns Road, refers to Boundary Road? So it does. It must refer to Boundary Road. I thought it referred to Vanceville Road.
13332. What is the date of the petition? November, 1887. What it means is this, that it was the intention to continue the road up to the new road the Government were clearing.
13333. And you say you can produce to us some letter or memorandum from the Government to which you replied in reference to the continuation of this Vanceville Road up to Boundary Road? Yes.
13334. Now, can you tell me whether any application was ever made to you for a road from that point on Vanceville Road diagonally to strike the Boundary Road at a point at which it was capable of formation? I do not think so.
13335. Was there any reason why it should not be done? Yes.
13336. Would not a road from the junction of Billyard-street and Vanceville Road, carried diagonally to point D on the Boundary Road have met all the requirements of the district? I do not think it would. To make a diagonal road across there would mean an awkward road through the property, and I certainly would not have given my assent to it.
13337. Do you recollect Mr. Oliver, the late Under Secretary for Lands, being up at Hornsby on any occasion? Yes.
13338. Do you recollect what took place between you on the occasion of your meeting there? I recollect going to look at Crown lands which had been cleared there, and upon which roads had been made to improve their sale.
13339. Did you go up with him in the capacity of Colonial Treasurer or of acting Minister for Works? I went up as Colonial Treasurer, anxious for the success of the land sale and the public revenue.
13340. Then I may take it that you went up there in your public capacity? Yes.
13341. Did you and Mr. Oliver have any discussion about the making of any roads? We had no discussion except as to roads leading through the Crown lands. We did not go on to the private lands.
13342. Was any one else present there with you? Yes; Mr. Davies was there.
13343. Was Mr. Deering there? I believe he was.
13344. Do you see this road running parallel to the railway on this plan marked George-street. Yes.
13345. Had you any discussion about that road? I had no discussion.
13346. Was any reference made to it? Reference was made to it, but our special business was to see these Crown lands, and Mr. Oliver had some doubts as to the upset price—as to whether it was too high or too low. What he desired, was to make the Crown land sales attractive, and while standing on the Bridge Road Mr. Davies made some reference to the clearing of this road. When I heard that question raised I went away and left them.
13347. Do you know why George-street came to be cleared and opened? It was opened by Burns, Withers, and Smith. We had a man working there—a man named Whitehead.
13348. Do you recollect what your expenditure on that road was? No.
13349. Was it £10? Oh, more than that.
13350. £20? More than that.
13351. £30? I speak from memory, but he was in our employ about two years.
13352. Can all the work that we saw there on Saturday last, be taken to have been done by him? All except the culvert. You could not assume that the whole of the money expended by the Government there produced work which was worth above £50 or £60.
13353. Have you done any work on those roads known as Burdett-street and Florence-street? Only rough clearing.
13354. Who did that? I think it was done by Whitehead.
13355. How much did the unemployed do? The whole expenditure would not amount to more than £50 or £60.
13356. Do you see that this Burns Road is continued eastward across the Vanceville Road, running along two sides of property which belongs to you, and then going to some point I don't know of; can you tell me how that line of road came to be continued on two sides of your property, and thence to some point? I don't think I gave my assent to that road. I found the unemployed at work there, and asked for an explanation. The explanation was that they proposed to take it to the corner of the extension, but the owner of the land wanted £100 an acre for going through his lands and making roads, and the officers did not choose to recommend the payment of £100. Then Mr. Noonan gave them permission to pass through here to a road called Bobbin Rock Road—not anywhere indefinitely.

13357 .

13357. Is Bobbin Rock Road shown there? Here is Bobbin Rock Road, leading to the Lane Cove Road. J. F. Burns, Esq., M.P.
13358. Then taking this road from Vanceville Road first eastward, then southward, and then eastward brings you to Bobbin Rock Road, which you say leads to the Lane Cove Road? Yes.
13359. Did you ever verbally or in writing assent to that road being constructed on the north and east boundaries of your property? No; when I saw it it had been partly cleared. I found it cleared across here. 7 May, 1889.
13360. With the exception of the short roads, D, E, and F, and the overbridge road A, has there been any dedication or giving up to the Government of the roads shown in this plan? There has been no formal dedication.
13361. Is there anything to prevent you and your co-partners shutting up every one of them? We should never think of doing so.
13362. Could you not shut up this Burns Road? No; Burns Road ought not to appear as a work in connection with the Crown lands. It is an old road reserved on part of the Vanceville Estate. It had no connection with the Crown lands. Some local residents finding the unemployed at work there made a request to me that that road as well as other roads, that they were making, should be formed, and in that way I believe it was done. It is a road reserved upon the plan which is now in the office of the Registrar-General.
13363. With the exception of these short roads D, E, and F, and possibly the Junction Road, have not the Government been trespassers upon your property in taking up and clearing or constructing these roads? You might say that technically.
13364. Can you take into consideration any question of giving up land for these roads, seeing that you can take away the land? Technically you might say that.
13365. And perhaps legally? Well, legally that is so.
13366. In other words this Commission could not strictly consider in the question of value the giving up of the land that has been taken for roads, because the land does not belong to the Government. They are trespassers? That may be technically true, but it would not be correct.
- 13366½. Do you know whether there is much Crown Lands in the neighbourhood of this land of yours? The surveyor states about 4,000 acres.
13367. Was there not ample land upon which to put the unemployed to work? For what purpose?
13368. For clearing or any purpose that the Government might think proper? There is plenty of land there but I do not know that you could turn it to any purpose except sub-division for sale. You had no roads of access to it from the station at Hornsby.
13369. I think you said you paid visits to this place repeatedly? Yes.
13370. And that during the time you were a Minister of the Crown? Yes.
13371. You became aware then that these roads were being done? Yes.
13372. And I suppose you knew, as a Minister, that the money to keep the men and works going was being supplied from the Treasury? Yes.
13373. Did it ever occur to you that there might be some doubt as to the propriety of such work? It did not, because it was clear, in my opinion, after receiving the report of Mr. Bennett, of Mr. Gordon, and in some measure, the report of Mr. Deering, who had control of the unemployed at first, that these roads were required. Mr. Deering, in the first instance, thought these roads were wanted in the public interest, and it was also clear that any expenditure that might be made would not amount to the value of the lands taken for this purpose.
13374. When you were attending to the business of the Minister for Works, Mr. Sutherland, during his illness, I understand that you objected to sign the petition [*Exhibit D 5*]? Yes.
13375. Because you were interested in the matter of the petition? Yes.
13376. Did it not occur to you that the same objection applied with regard to the other roads in your position as Colonial Treasurer, as applied to Vanceville Road in your position as representing Minister for Works? No; I was acting in a temporary way. I did nothing for Mr. Sutherland, but what was perfunctory.
13377. In examining the books of the Casual Labour Board we find that from May, 1887, to May, 1888, something like £168,000 has been supplied from the Treasury for purposes of the Board. Did the applications which were made for advances by the Casual Labour Board come before you as Colonial Treasurer? No.
13378. Before any of the officers of your Department? No.
13379. Can you tell me before whom they came? They came before the Colonial Secretary, who had charge of the Board, and the Colonial Secretary authorized the Treasury to pay them. I refused to sanction any payments to the Casual Labour Board, unless they were supported by the recommendation of the Colonial Secretary.
13380. Then in these payments or advances from the Treasury you had nothing to do with sanctioning payments of moneys, portion of which might have been expended on properties in which you or your partners were particularly interested? No. The position, I think, is very clear. I had neither control of the expenditure nor did I interfere in it. I was careful not to interfere in it. I refused to allow payment to anyone in connection with the Casual Labour Board unless it was authorized by the Minister in charge of the Department. I took upon myself to have it ascertained by the best officers of the Government, whether the work being done was for the public benefit, and seeing from the report of Mr. Bennett, Commissioner for Roads and Bridges, the report of Mr. Gordon—and Mr. Deering in some measure

NOTE (on revision) :—Q. 13362—For “there,” read “in the neighbourhood”; and for “made a request to me,” read “requested”; and for “formed,” read “improved.” Q. 13352—Additional clearing was done by the Casual Labour Board for the land sale, and I believe it was done on the recommendation of the forest ranger. Q. 13354—I have learned since giving this evidence that some of the streets in the eastern subdivision were cleared under the direction of Mr. Kearney. Q. 13356—The President has been misinformed. Burns Road does not run along two sides of property belonging to me. Q. 13377—Mr. Bennett, Mr. Wells, and Mr. O'Donnell have all stated in their evidence before the Select Committee of the Assembly that the expenditure on all the roads through the lands of Burns, Withers, and Smith did not exceed £200; the land given for the roads was worth at least £3,000.

J. F. Burns,
Esq., M.P.
7 May, 1889.

measure bore out the statement—that the roads were necessary, I abstained from any interference in consideration of these reports, knowing that if any excessive expenditure took place it could be ascertained.

13381. Are you a Director of any Company in this city? I am.

13382. Are you aware that it is a rule in almost every Company that no Director shall vote in any matter in which he is personally interested? Yes.

13383. Being in the position of Colonial Treasurer, did you not feel that to a certain extent you were individually interested in this large expenditure of money? I did; but you must take into consideration the fact that the application for these roads was made before I was in office as Minister, that the necessity for them seemed to be recognized before I was in office as Minister, and that I took the precaution to see that the necessity for them was determined by the best officers that could be selected. I do not think I could be called upon to interfere with the Government making these roads to the Crown lands, and the more so as I had no interference with the department that had control of the expenditure. I never made a payment to any man, nor had I any interference or connection with, or control of the department, unless upon the authority of the Minister who had charge of it.

13384. Had you anything to do with the appointment of the gentlemen who form the Casual Labour Board? No.

13385. Can you tell me whether that appointment was the result of Cabinet deliberation or of the deliberation of the individual Minister? I am authorized to state that Sir Henry Parkes has great confidence in the gentleman who had charge of the Casual Labour Board, and he selected this gentleman for the position. It was mentioned at a Cabinet Meeting that he had made the selection, and it was approved. The first I heard of the intention to appoint this gentleman was from Sir Henry Parkes himself.

13386. Did he do it with your approval? I did not object, because he told me he had resolved upon it.

13387. Had that gentleman whom Sir Henry Parkes had resolved upon your confidence at the time? I want to say this, that Sir Henry Parkes stated that he was proposing to make Mr. Davies Chairman of the Casual Labour Board, and I offered no objection.

13388. Do you think it came before the Cabinet? I think it was mentioned.

13389. That he was to be Chairman? Well, a member of the Casual Labour Board. I do not think it was as Chairman. As far as my memory serves—I would like to withdraw the statement that it was Chairman. I know Sir Henry Parkes wanted to take the management of the Casual Labour Board out of the hands of Mr. Deering, and he mentioned that he wished to appoint Mr. Davies a member of the Board.

13390. Do you think he mentioned the other names at the Cabinet Meeting? I think so. I think they were mentioned.

13391. It is important that we should know this? I think they were mentioned.

13392. Had Mr. Davies at that time your confidence? He has had my confidence in a general way all along.

13393. Are you intimate with him? No.

13394. Were you then? No.

13395. How many times have you seen him in reference to the works here or in any other parts of the country in connection with the unemployed? I saw him very seldom. His visits to me were on account of my taking exception to the large expenditure in respect of the unemployed. I had written to Sir Henry Parkes several times, and it seems he sent for Mr. Davies. Mr. Davies came to me and I told him I could not stand the expenditure.

13396. That was while you were Colonial Treasurer? Yes.

13397. Before leaving this work at Hornsby—can you tell me what time the unemployed gave up working on these roads? I could not fix the date.

13398. Have you become aware of a report that this Commission has made, affecting Mr. Davies? I have heard of it.

13399. Who told you? I have heard something about it.

13400. Were you told what it was about? I heard one matter about Mr. Davies. I gathered something of its purport.

13401. Do you object to say who it was that told you? It was mentioned to me in confidence, and I do not want to repeat it.

13402. Mentioned as a light matter? I do not know what the intention was. I regarded it as a serious matter.

13403. What are your relations with your partners—Mr. Withers and Mr. Smith—friendly or otherwise? I am not friendly with Mr. Withers. The relations between us became strained from the commencement of this discussion about the Hornsby roads.

13404. After the evidence was taken before the Select Committee about the Hornsby roads? Before that, when he indulged in a long discussion about the matter to a reporter of one of the newspapers. Since that time I declined his very acquaintance.

13405. Then your relations are evidently as strained as they can be? I have not spoken to him since.

13406. Was it not because he took some strong view on the subject of this expenditure that your relations became strained? No; it was because I thought his whole conduct was very improper. He had indulged in expressions about the property which appeared in a newspaper, and knowing what he had done I declined his further acquaintance.

13407. You said some time ago in your evidence in relation to the Board that you were authorized to state something—who authorized you? I had seen my name as a Minister and a Member of Parliament associated with Mr. John Davies, the Chairman of the Casual Labour Board. My relations with Mr. John Davies were not of a character that would justify any person in associating our names together. We were on terms of nothing like intimacy, and when I found my name mentioned in association with Mr. Davies, I pointed it out to Sir Henry Parkes. I objected to these people attacking me there for political purposes on account of the expenditure on these roads. I think it right to state that the appointment of Mr. Davies to the Casual Labour Board, or any public position he has got from the late Government, was not through any nomination or action of mine, and there was no intimacy between us to warrant any one in this association of our names in the public prints about these roads. I have been very careful all along as to what I said to Mr. Davies about his office as a Member of the Casual Labour Board.

13408.

13408. Have you any objection to state who the persons were who spoke to you? I would rather not be asked the question. I do not think it is very material to the evidence. There have been a number of reports.

J. F. Burns,
Esq., M.P.

7 May, 1889

13409. *Mr. Franklin.*] I want to know how much of the £303 13s. 4d. that you referred to some time ago has been expended on the Burns Road? I think on the Burns Road in all probability £150 or £200 have been expended. I am only speaking by conjecture, because I cannot divide the money. We had a subdivision on the other side of the line when we roughly cleared the streets, and the cheques were drawn as you see on the books, and now that, on the western side. We had a man named Whitehead clearing George-street, and he was also engaged clearing on the other side. He was a long time clearing the land there. I suppose that about half the expenditure would be on the Burns Road, and the balance, about £153, would be the amount expended on the western side.

13410. This man, Whitehead, had been in your employ for a long time? Yes; two years.

13411. You stated that about £50 or £60 had been expended by the Government on George-street? Yes. I heard it from parties in the locality. I estimate that about £50 or £60 would be about the value of the work done by the unemployed just prior to the land sale.

13412. Then in addition to that there is the balance of your total expenditure on the western side of the line? Yes. In addition there is the expenditure to the man Whitehead.

13413. *Mr. Waller.*] You say the first knowledge you had of the unemployed being at work on the roads was on the occasion of a visit there one day? Yes.

13414. When was that? I cannot fix the date now. The unemployed had been at work clearing some Crown lands on the western side of the line. They had also been at work on the Field of Mars. The first intimation I had of the unemployed being there was on paying a visit to the district. I was told they were clearing the road across the bridge. That is the road marked A on the plan.

13415. Did you ever see the unemployed afterwards on the estate? Oh, on different occasions.

13416. When you saw the unemployed working on road A, what did you do? I did nothing.

13417. When you saw them working on the other part of the estate there what did you do? I did nothing.

13418. How long were they there as trespassers upon your property? I did not regard them as trespassers.

13419. They were not clearing the roads with your knowledge and assent? I cannot answer that question in the affirmative. I gave my assent to the clearing of some of the roads. I presume they were carrying out that work.

13420. You did not take any steps to ascertain what they were doing when you saw them there? No. I took no steps to interfere with them in any way.

13421. *President.*] Do you produce the pass-book of Burns, Withers, and Smith, and the cheque-book which shows all the cheques drawn since 1884 up to the present time? Yes.

13422. Have you got the vouchers that have been paid? I think you will find most of them, but not all.

13423. Do you think you have them at home? Well, I will look for them.

13424. Would they show the cost of the work done on the east as distinguished from the west? No, I do not think it would. You see we did not have contracts. We had the works placed under a man named Kerney, in whom we had confidence. We gave him the cheques to pay these men. These cheques were drawn and signed by the partners.

13425. Was this land on the east side of the railway subdivided by you before the roads were made? Yes. The land was subdivided with a view to sale some day.

13426. Do these roads appear in the subdivision in any way? Yes; and they were roughly cleared by us long before any Government land sale took place. The undergrowth used to come up and you could not see the Crown lands at the station. Mr. M'Keown, forest ranger, suggested that they might be opened up so that people might see the lands coming from the station.

Robert Burdett Smith, called in, sworn, and examined:—

13427. *President.*] Are you at present a Member of Parliament? I am not at present a Member of Parliament. I was a Member from 1870 up to 1889. I might mention that when I ceased to become a Member I did not offer myself for re-election on account of a serious illness, and I was acting under the advice of my medical men.

Mr.
R. B. Smith.

7 May, 1889.

13428. Were you a Member of Parliament during the years 1887 and 1888? I was.

13429. I think you left the Colonies to visit Europe in April, 1886? Yes.

13430. When did you return? I returned in February of the following year. I think it was on the 1st February; but I am not certain. I came overland from Melbourne. I think it was in February, 1887.

13431. You are a solicitor of the Supreme Court? Yes.

13432. Is Mr. Davies a client of yours? Yes.

13433. How long has he been a client of yours? Oh, I suppose he has been a client of mine for, I should say about fifteen years—perhaps longer.

13434. Does he owe you any money? He owes the late firm of R. B. Smith and Smith an account, I believe.

13435. Can you say how much? I could not say how much, because I had nothing to do with the business.

101—3 K

NOTES (on revision).—Q. 13407.—You said some time ago in your evidence in relation to the Board that you were authorized to say something. Who authorized you? I have seen my name as a Minister and as a Member of Parliament coupled with the name of Mr. John Davies, the Chairman of the Casual Labour Board. My relations with Mr. John Davies have not been of a character to justify anyone in associating our names together. We have not been on terms of anything like intimacy; and I believe our names have been used together for political reasons by parties who wished to attack me for the expenditure on the Hornsby roads. I have mentioned this matter to Sir Henry Parkes, and I think it right now to state that neither the appointment of Mr. Davies to the Casual Labour Board nor to any other office he may have obtained from the late Government was through any nomination or action of mine; and that there has been no intimacy between us to warrant the association of our names together in the public prints about these roads. I can also say that I have been very careful in my communications with Mr. Davies and others in authority respecting the expenditure on the Hornsby roads. Q. 13408.—I understand this to refer to the Report of the Commission respecting Mr. Davies. I did not hear from Mr. Davies on that subject.

Mr.
R. B. Smith.
7 May, 1889.

business—the professional business for which he retained the services of the firm. I may mention that from the time I went to England up to the dissolution of the partnership in January last of the firm of R. B. Smith & Smith, I attended very little to professional business. The business for which there were some costs due by Mr. John Davies to the firm of R. B. Smith & Smith was transacted entirely by my late partner, Mr. Charles Smith. I believe that the amount due was somewhere about £50; it might be more.

13436. Can you tell me whether the amount which now forms a claim against Mr. John Davies was made up about the time of your dissolution with your late partner? Oh, before that.

13437. Was there any difference between you and your late partner about the propriety or otherwise of calling for payment? Not the slightest. I left it to my late partner. It was some bank case. It was entirely transacted by Mr. Charles Smith.

13438. Can you tell me how long this account was due? I would venture to suggest that you examine Mr. Charles Smith on the subject. He can give you more information on it than I can. I know about a fortnight or three weeks ago Mr. Davies called at my office, and gave me instructions about some conveyancing matters, and these matters were attended to by my managing clerk, Mr. Boyce. That is the only business I have transacted for Mr. Davies lately. My room was up-stairs during the partnership, and I very rarely came down-stairs to transact any business, and I am pretty certain I never saw Mr. Davies on the subject of this account.

13439. Had you ever anything to do with Mr. Davies in connection with the purchase from some of the Vance family of some property? Only as solicitor.

13440. Did that property come within the Hornsby district? Yes. That is the property adjoining Hornsby—Vanceville, I believe.

13441. This is a plan [*Exhibit D4*] prepared by Mr. Surveyor Gordon for the purpose of showing the works which have been carried out at Hornsby. Will you tell me on the plan where that property was? Just let me explain. He had an action when he was the mortgagee. This was many years ago. I think as far back as 1875 or 1876, we recovered judgment in the estate against the executor or administrator of the late Mr. Vance; and then we sought to obtain the fruits of that judgment, and not being able to do so the land was put up for sale. I was then purchasing different lands, and I happened to be at Richardson & Wrench's, and I heard that this land was going for a mere song. I purchased this land—nearly 400 acres, at auction. It was sold by Richardson & Wrench under that judgment, I think.

13442. Do you know whom Richardson & Wrench sold for? I think they sold by the direction of Mr. Way, solicitor, who was acting for Vance. It was sold by his direction in order to pay this judgment. I happened to go to the sale. I saw that the land was being sacrificed, as I told you, and I bid for it. It was knocked down to me, and then I happened to see Mr. Burns at the House of Assembly. I told him of the purchase I had made, and I gave him an offer of participating in the purchase. He asked me to let it remain till morning, and then he gave me his cheque for half the deposit. Thus it was that we became partners.

13443. I want to know what Mr. Davies had to do with it? The only way that Mr. Davies had to do with it was that he brought an action either against the executor or administrator, whichever was the representative of the person who died. I cannot remember very clearly. It is a long time ago, but from my recollection he was the administrator of the estate, and Mr. Davies could not obtain the fruits of his judgment; and then this land was sold, I think, with Vance's concurrence.

13444. Then you were simply acting as solicitor for Mr. Davies, who was judgment creditor, and you believe that the land was sold by the administrator with the concurrence of Mr. Davies? I purchased it in that way. I saw Mr. Brown, a well-known resident of Lane Cove, there, and he said it was going ridiculously cheap. I thought it was a pity that it should go so cheap.

13445. What interest had Mr. Davies in it? The interest was simply this: that he acted on his judgment. Out of the proceeds of the sale of this land the judgment was paid.

13446. And after that did his interest cease in the land altogether? Altogether.

13447. Has he any interest in any other land up there? Not the slightest that I know of.

13448. Were you examined before the Select Committee of the Legislative Assembly on the 18th December last? Yes.

13449. Is this your evidence? Yes.

Evidence before Select Committee.

2940½. *Chairman.*] You are one of the proprietors of the Hornsby Estate? I am one of the proprietors of the Hornsby Estate. I have an equal share with my other partners, Messrs. Burns and Withers. We share and share alike as tenants in common.

2941. Do you know anything about the work of the unemployed on your estate at Hornsby? I have seen the work since they commenced—a portion of it. I have not seen the whole of the work done there by the unemployed.

2942. Were you aware of the origin of the work of the unemployed—the commencement of it there? I was not aware of the origin of it, because I paid a visit to England and Europe, and it was on my return from England that I first saw the unemployed at work.

2943. It was done without your cognizance in the first instance? I saw the men at work when I went to visit the Hornsby Estate on my return from Europe.

2944. Was that the first time you knew of it? I think I was informed by my friend and partner, Mr. Burns, that the unemployed had been at work, but they had done very little work at that time, scarcely any.

2945. Have they done a great amount since? I cannot say a very great amount. They have done what was necessary, I believe, to make roads to give access to Crown Lands, and to open up avenues of communication to the railway.

2946. Do you consider all the roads absolutely necessary? I consider that they are absolutely necessary as avenues of communication to the railway, and as giving access to the Government lands.

2947. Would not a less number have sufficed? Well, I do not think a less number would suffice, because there is a population about there which could not gain access to the railway station or to the Crown lands without those roads.

2948. Present or prospective? Almost immediate, because there is a large population about Bobbingrock and Vanceville Estates. Of course they will facilitate the movements of

NOTE (on revision):—Q. 13437—Note.—The memo. of the account shows that the business was for several matters. Q. 13438—Add at end of answer “until recently when he promised payment.”

of the people, and enable them to gain greater access to the railway, and also to the Crown lands by means of these roads. I may mention that when I saw these roads very little work was done, and I was opposed to land being given without compensation for the purpose of opening these roads.

Mr.
R. B. Smith.
7 May, 1889.

2949. Have not the roads benefited your estate? I think there has been a *quid pro quo*, as it were, on our side and also on the part of the Government. I think that the land we have given would recoup the Government to a greater extent any expenditure they have incurred in making these roads.

2950. But is not your estate more valuable in consequence of the existence of these roads than it was prior to their formation? If we had been paid for them the estate would have been more valuable; but you must remember that we have given 28 or 30 acres of land.

2951. But is not the remaining portion rendered more valuable by these roads? There must be some misapprehension as to the expenditure upon these roads. It is not so great as is assumed. I have driven through them, and I fail to see the large expenditure which has been suggested. In my opinion it would not exceed £2,000, and we have given £3,000 worth of land.

2952. *Mr. Carruthers.*] What has been the amount suggested to you? I have heard it suggested that we have been benefited very largely by this expenditure; but we have given £3,000 worth of our best land, because these roads are made all through our best land. When I saw the roads being made, I protested against the land being given without compensation. We have about 680 acres on the eastern side of Hornsby, and it was in contemplation by myself to sell this land as a whole in one block. Well we have been deprived of about 30 acres of that area by the making of these roads. It may seem strange to the Committee, but I was altogether opposed to giving these roads without compensation. I knew, from the railway being contiguous to some of the Government roads—Bobbingrock Road and Vanceville Road and other roads—that they must of necessity apply to us for roads, and by so doing would have had to give us compensation, and I was prepared to wait until this time should have arrived, when the Government would have to make these roads to Hornsby Junction in order to give access to the other roads, and to open up an avenue of communication between them and the railway station. I therefore did my best to urge my partners to apply for compensation.

2953. Did you not subdivide a portion of 50 acres near the station, cutting it up into streets? Before I went to England that was done by Mr. Dawson, 50 or 52 acres were planned out by him.

2954. Laid out with streets? I did not take any notice as to whether they were laid out. I know there was some subdivision made, but it was not for the purpose of immediate sale.

2955. And you named the streets? My partners have named the streets. I may mention that my friend and partner, Mr. Burns, had the management of the whole; I had the most implicit confidence in him, and I allowed him to have the management of everything. I desire also to say that I concur in everything that has been done, and I am quite prepared to share in any responsibility he has assumed in the matter.

2956. Had you not commenced some work on some of the roads? No; that was while I was in England. Some work was done on Burns Road. I left a power of attorney behind, and my partners consulted my attorney.

2957. Had not some work been commenced on this subdivision? Not before I went to England. Not a particle of work was done until after I had left for England.

2958. Whilst you were away in England? Whilst I was away in England, I believe (as I have been informed), an expenditure of something like £200 was made on Burns Road.

2959. Was not some work done on the subdivision? I never heard of it.

2960. Might it not have been done without your knowledge? I think not. They might have marked out with a tomahawk a few streets.

2961. If it has been given in evidence that clearing had been commenced, and in some instances proceeded with half way through the streets? I think not. I think you are mistaken on that point. I am not aware of anything of that kind being done. I know that Burns Road was made while absent. It is quite possible that they may have taken a tomahawk and marked out some streets.

2962. But if it is stated by Mr. O'Donnell and Mr. Burns that real clearing had taken place? If Mr. Burns has stated it it must be correct. I am not aware that he has said so.

2963. But supposing your intention was to sell the land in one block, does not the existence of roads on the property increase its chances of sale and add to its value? Yes, it would, if we had received compensation.

2964. Without compensation? No, I think not, having regard to the fact that we have given about £3,000 worth of land, and that the Government have expended, we will say, £2,000 on our land. I do not believe that they have expended as much as that on our own private estate; though, of course, you are in a position to judge by calling the officers, and getting a statement of the actual expenditure. You cannot drive along Boundary Road owing to its precipitous nature, but I drove through Junction Road and Burns Road as far as the Vanceville Road, and I have also seen the cross-road to Noonan's, and I cannot see that there has been a greater expenditure than £2,000.

2965. When you say that you have given £3,000 worth of land, does that include Burns Road and the roads marked on your subdivisional plan? No; it is exclusive. I think we have given about 29 acres exclusive of Burns Road.

2966. But do you include that part on the subdivision plan? No; I think it is about 29 acres exclusive of that.

2967. What roads do you include? I include Boundary Road.

2968. Boundary Road is not on your land? Oh, yes; pardon me.

2969. No, it is not? With great respect I think you are mistaken.

2970. Boundary Road gives you a frontage, but it is all on Crown lands? I think you are mistaken. I do not want to contradict you; but I—

2971.

Mr.
R. B. Smith.
7 May, 1889.

2971. We have the evidence of Mr. Burns that it is not so? I have always been led to believe that Boundary Road was on our estate.
2972. It is not on your estate; it is on Crown lands all the way through? I am surprised at that; this is the first time I have heard it. If you say so I suppose I am bound to believe it.
2973. I give you the evidence of Mr. Deering, district surveyor, and of Mr. Burns, that it has been all made on Crown lands? Well, I have been always led to believe that that road was on our land.
2974. You see now that it is not? You say so.
2975. Under those circumstances, do you still say that you have given £3,000 worth of land? Approximately £3,000 worth of land has been given.
2976. Exclusive of Boundary Road? We have given 29 acres.
2977. You have given £3,000 worth of land, exclusive of Boundary Road, the roads shown on the subdivision, and Burns Road? In my opinion, and from what I have learnt from Mr. Dawson, we have given about £3,000 worth of land. We have given about 29 acres, and I value that at at least £100 an acre. I value the land at £3,000.
2978. Did not Mr. Dawson, in stating that, include Burns Road? No; he included the whole of the land at East Hornsby.
2979. Did he include Burns Road? No.
2980. You are not sure? Well, he said nothing about Burns Road.
2981. Then you are not positive? I say that it is my conscientious belief, having regard to all the roads made there, that we have given £3,000 worth of land.
2982. *Mr. Copeland.*] At what rate are you valuing the land per acre? A little more than £100 per acre. I would not take a shilling less than £100 per acre.
2983. You say that you value the land at a little more than £100 per acre;—have you sold any of the land round about those roads? No; not yet.
2984. You have sold none? No.
2985. Did you not sell some land on the Vanceville Estate? That is long ago. I was the first purchaser of the Vanceville Estate. Some years ago I purchased nearly 400 acres.
2986. Excuse me; but I want to keep you to the evidence. How long ago is it since you sold the last land on the Vanceville Estate? Some years.
2987. Have you sold no land since? I suppose Mr. Watkin, the auctioneer, sold the last for us.
2988. Which land was that? Vanceville. That is a different estate to this altogether.
2989. What did that land realise per acre? I cannot remember. It was sold many years ago.
2990. Was it sold before the railway was surveyed? Long before the North Shore line was ever dreamt of.
2991. You have sold no land since then? I think not; but Mr. Watkin could tell you.
2992. There is some land on the map marked with the names of different people;—did you sell those portions of land? No; those lands were never ours. It was only this Vanceville Estate that belonged to us.
2993. Then, as a matter of fact, you do not know anything at all about the value of the land there? Oh, yes, I do.
2994. Not having sold any land there, you do not know whether it would bring £50 or £100 an acre? At any rate I would not sell it under £100 an acre.
2995. I suppose you are aware that the average price of the land in the Government subdivision by the station was £34? I do not know anything at all about that. I would not allow the land to go under £100 an acre. As a matter of fact we were asked in July, last year, 1887, I think, to submit 200 acres on the basis of about £100 an acre, and my friend Mr. Burns and myself were willing, but our other partner thought the price too low. I think we could have received £20,000 for this 200 acres; but my partner, Mr. Withers, thought it should not go under £30,000. Owing to his action the purchase fell through.
2996. Is it not a fact that in all cases where the owners of private estates intend placing their land on the market, they make roads for themselves through it? I suppose they do; but I had no desire to do so.
2997. Do not they provide roads of access at different portions of their land? In my opinion they do; but I knew the value of this land. I knew that the soil was splendid.
2998. Have you any knowledge of soil? Yes, I have knowledge of soil, and I believe that this is splendid land. I may mention that I have about 12 acres of my own there, facing Burns Road, and independently of my partners, and I would not sell it now for less than £150 per acre.
2999. Do you know this Crown land subdivision to Hornsby the other side of Boundary Road? I have seen it. It is very bad land.
3000. And this is very good? Yes, this is very good. Some portions of the Crown land is in my opinion very bad. It is very rocky.
3001. The land to the north of Boundary Road is very bad and the land to the south of it is very good? Yes; I consider this excellent land—splendid land. I have 12 or 13 acres near Noonan's, independently of Messrs. Burns and Withers.
3002. Have you cultivated it? No.
3003. Have you cleared it? No; but I would not take less than £150 an acre for it.
3004. Has anyone offered you £150? No.
3005. Have they offered you £100? I have not attempted to sell it.
3006. Are you not aware that the custom is for people to subdivide their land and provide roads through their estates? They may do it.
3007. *Chairman.*] Is it not the invariable custom? It is the custom, but it is not my custom.
3008. *Mr. Carruthers.*] What do you mean by providing a road—do you mean that they make one for themselves? I believe that in many instances it is done to open up roads.

3009. *Mr. Copeland.*] Do you not know that the custom is when people are selling their private estates not only to provide the roads but to open them up, to clear them? I do not know that it is the custom. I have not taken the trouble to inquire or to see into anything of that kind.
3010. Have you not seen hundreds of maps of subdivisions about the city? Really I have not seen hundreds of maps. I have not taken the trouble to look.
3011. *Chairman.*] As a solicitor, do you not know that it is the custom? I have not taken the trouble to bother myself about whether it is the custom or not.
3012. As a matter of fact you do not know the custom? I know that it is done in many instances; but I cannot say altogether that it is the custom. I know that there are supposed to be roads through subdivisions on paper, but when you go to them you do not find that there are roads at all.
3013. *Mr. Copeland.*] Would you expect the Government to pay compensation to you for the road from H to the continuation of E, the Mistake Road? Yes. This is to give access to the railway.
3014. Do you consider that it is to give access to the railway? I suppose that that road was made for some particular purpose. I cannot say for what purpose it was made.
3015. Would you expect the Government to make you compensation for the continuation of road E, which goes entirely through your own land? That road has been made with some particular object. There is a railway station near Noonan's, and this road is to give access to it.
3016. What is road HHHI for? That is also to give access to the railway station.
3017. Will you tell me who is to make use of that access? The people around there.
3018. Will you tell me what population there is there? There is a large population near Bobbingrock and Vanceville.
3019. Can you say how far it extends? I know that there is a very large population.
3020. What do you call a large population? You can see the place studded about with homesteads. I cannot tell you approximately the number of people about there.
3021. Can you tell me the population on Crown lands requiring access to the railway station? No, I cannot.
3022. Can you tell me whether there are fifty people on the Crown lands? No, I cannot.
3023. I suppose you do not know that there are ten or that there is one person on that subdivision? I really do not know; but I know that these are all necessary roads; and I believe that unless they had been made now they would ultimately have had to be made by the Roads Department, and then they would have had to pay us compensation for them.
3024. Would you not have had to make those roads yourself before you sold the land to get to the railway station? Certainly not; I should not have given assent to it.
3025. You must be aware that you would not get the same price for your land? I think that we could have sold this large block of 680 acres irrespective of any road. Then, again, we have given all the roads to the Government a chain wide; I never heard of such a thing.
3026. How wide have you generally heard of roads? Even if we had given roads of half a chain wide I think that that would have been very liberal.
3027. Did you give the Government any compensation for giving you access to the whole of Boundary Road? No; this is the first I heard of it.
3028. Did you give the Government any compensation for that? Certainly not.
3029. Then can you tell me on what principle you give compensation for Junction Road, while they give Boundary Road without compensation? Until to-day I always thought that we had Boundary Road—that the road which has been cleared was on land given by us; but you informed me that such was not the case.
3030. Did the Government press you very much to get these roads? The Government, I believe, pressed my partner.
3031. Can you tell me what particular Minister? I do not know whether they pressed him or not. I know that they applied to him.
3032. For every road? I do not know whether for every road. I believe they did.
3033. Did the Government initiate those roads, or were they initiated by certain persons interested signing petitions? I know nothing about any petition. I signed no petition.
3034. I suppose you are aware that Mr. Withers signed a petition? I have heard that Mr. Withers signed a petition.
3035. You say that the Government took these roads;—will you tell me whether the Government initiated the taking of these roads? I cannot say. I am quite sure that neither Mr. Burns nor myself initiated anything of the kind.
3036. *Chairman.*] Are you aware that Mr. Dawson, the surveyor, consented to these roads, and that it was by his consent that they were made where they are? I am not aware of anything of the kind. I am aware that instructions were given by the managing partner.
3037. Did you make any claim for compensation? No; I did not. I was persuaded not to.
3038. You made no claim? No. I objected to my partners.
3039. Did you send any objection to the Government in writing? No; I did not.
3040. Did you or your partners refuse the Government any road? No; I did not.
3041. Nor your partners either? I think not.
3042. You cannot say what section of the Government were desirous to obtain these roads? I think it was the Roads Department and the Lands Department.
3043. But you do not know how this work was initiated? No; I really do not.
3044. You do not know whether it was recommended in the first place by a Government Officer, or whether it was brought about by persons presenting petitions? I do not know anything of that kind; but I know that neither directly nor indirectly did I have anything to do with the initiation of the work, the carrying on of the work, or anything of that kind, and I believe that neither directly nor indirectly had my partners, Mr. Burns and Mr. Withers, anything to do with urging the Government, although Mr. Withers signed a petition.

Mr.
R. B. Smith.
7 May, 1889.

Mr.
R. B. Smith.
7 May, 1889.

3045. Do you know that Mr. Burns approved of those roads being taken? I believe he offered no objection.
3046. Do you know that he approved—that there is his minute approving? If you say he made a minute, I take your word.
3047. I do say so. Do you know that Mr. Burns further instructed your private surveyor, Mr. Dawson, to go out and lay off the roads? I believe that that was done at the request of the Casual Labour Board.
3048. If it had been done at the request of the Casual Labour Board, which is a Government Sub-Department, would not the Government surveyors have laid off the roads? The Government surveyors, I believe, concurred in this laying out of the roads, as you suggest.
3049. There was no concurrence that I am aware of. I simply want you to say whether you are aware that Mr. Burns authorized you own private surveyor to go out and lay off those roads? Well, I know that from time to time he gave instructions to Mr. Dawson, and I concurred in any direction he gave. Personally, I concurred in everything that was done, because I believe that Mr. Burns is a man of the pink of honour, and that he would not do any improper thing.
3050. *Mr. Carruthers.*] You said that the Crown land is inferior land to yours? Yes; I think so.
3051. Most of it is further from the station and further from the road? I think that this plan is incorrect.
3052. What is the nature of the land along Boundary Road, close to your land? Some of it, in my opinion, is very rocky.
3053. I want you to look at this sale plan. This is a plan put in by Mr. Deering, showing the prices realised at the sale—£50 per acre, £61, £65, £77, £29, £33—Is your land more valuable than that; do you think it would realise more? Most certainly.
3054. Is your land rocky? No; our land is more of a sandy nature, and better land.
3055. Have you any land as poor as the land which realised these prices? It is impossible for me to say. There may be some few dots of it; but as a whole this is splendid land. That is the reason why others say that you could easily get £100 an acre for it.
3056. Do you consider your land superior in regard to physical characteristics? Yes, much superior.
3057. You have been asked a great deal about the custom of proprietors in laying out roads. Are you aware that in many instances of subdivisions there is nothing done to the roads beyond laying them out on paper? Yes; I said so.
3058. You are aware that the custom is rather that way than to the contrary? Yes.
3059. *Chairman.*] But is not the land in such a case provided, although the roads are not made? On paper.
3060. *Mr. Copeland.*] You say those roads are provided on paper; but is not the land itself provided—how could they sell a frontage without the road? I cannot say; they do strange things.
3061. *Mr. Carruthers.*] The provision on paper amounts to a legal dedication of the land. The exposure of a sale plan showing roads on paper amounts to a dedication? It does not amount to a legal dedication.
3062. It is an act of dedication to a certain extent? It is an act of dedication to a certain extent, but only to a certain extent.
3063. *Mr. Copeland.*] Can you take the land away after you have sold an allotment frontage to a certain road, without being subject to an action? It has been done.
3064. Could you do it legally. Could you sell a man a frontage to a certain road, and then take the road away? I have known it to be done.
3065. *Chairman.*] Could it be done legally? I have known it to be done, but it is improper to do it, highly improper. I could mention instances where it has been done.
3066. But in those instances it has been done illegally? In my opinion illegally.
3067. *Mr. Carruthers.*] It is a very risky thing to do? It is a very risky thing to do, though I could mention instances where it has been done.
3068. You said that you desired to sell this property, if you sold it at all, in a block? Yes; as a whole.
3069. Had you any intention whatever of subdividing it? None.
3070. Were you prepared to hold it for a lengthened period of time until you got your price? Yes.
3071. Were you prepared to hold it for twenty years? I do not say twenty years. I was prepared to hold it seven or eight years. I was prepared to hold it until the railway was finished to North Shore.
3072. Do you think that the holding of your blocks of land intact without roads through them would have affected prejudicially the prices that the Government would get for their Crown land adjacent? Most certainly. I think that without these roads no access could be obtained to the Crown lands, and that they could not be sold.
3073. *Chairman.*] Would not the low prices of Crown lands if they were sold affect prejudicially the sale of your land? Not in my opinion. It could not affect it prejudicially at all.
3074. *Mr. Carruthers.*] Do you think that, sooner than have that sacrifice, the Government would have purchased roads from you? My conviction is that the Roads Department would of necessity have been compelled to open up roads through this portion of the estate in order to gain access to the railway, and also of necessity the Lands Department would have been compelled to open up and construct roads to gain access to the Crown lands.
3075. And if they had not, the alternative would have been the sacrifice of Crown property? That is my opinion.
3076. You have had other land transactions, I suppose, and plenty of experience on these matters? Yes.
3077. Is it your experience that it prejudices or affects the sale of a block of land if a particular plan of subdivision is arranged for;—is it not the desire on the part of the people

people purchasing large blocks of land that they shall not be trammelled by any previous plan of subdivision? Yes.

3078. If you were buying a block of land would you care about being trammelled by the vendor having a plan of subdivision with the roads dedicated which would make you follow out his particular design? No, I should not.

3079. Is that one objection you had to putting roads through the block? That was my objection.

3080. I notice by the plan that you have one frontage to the road D H? I believe the property on the other side of the road is Harnett's.

3081. Is it not a usual thing in giving boundary roads between two properties for each people to give 33 feet, or half the road? Yes.

3082. In this case have you not given all the road? I am inclined to think that we have, but am not sure.

3083. *Chairman.*] Is it not so; Mr. Harnett gave half the road; the evidence shows it? I made some inquiry about it. I saw that this was Harnett's or Edwards' land; and I think in going through it Mr. Burns said that we had to provide the road, but I am not certain on this point. It is possible that Messrs. Harnett and Edwards gave half.

Mr.
R. B. Smith.
7 May, 1889.

End of Evidence before Select Committee.

13450. *President resuming.*] Was that evidence submitted to you for revision? It was.

13451. Having now heard it read, do you wish to make any correction or alteration? In answer to question 3013 before the Select Committee, there is a part here about Mistake Road. I produce a report signed by Mr. Wells, being a schedule of all roads shown on the map cleared by the unemployed. On referring to that, I see that I was wrong with regard to Mistake Road. At that time I thought the Mistake Road was a road leading direct to Noonan's platform and through a portion of Noonan's land. With regard to Mistake Road, I know nothing at all about it. I saw a letter "H" appearing on the plan, and I was confounded by that letter "H" appearing there.

13452. Had you not this plan before you then? No; I had a plan similar to this, but not this one. When I said that this was meant to give access to the railway, I meant this road where the letter "H" is marked near Noonan's. This is really a very trifling matter.

13453. Is there any other matter which you want to call our attention to? Well, I want to say this with regard to Mr. Davies, that neither directly nor indirectly had I ever any conversation with Mr. Davies on the subject of these roads on the Hornsby Estate.

13454. I do not think that is stated? Then, again, I wish to say that, neither directly nor indirectly, had I anything to do with the initiation of the work of the unemployed, nor any direction whatever of any of that work. At the same time, I wish the Commission to understand that I was opposed to the roads being opened up or any roads being given without compensation. I was of opinion that if any roads should be given to the Government, or allowed to be taken by the Government, the Government should compensate us.

13455. You volunteer this without my putting any question on the subject? I thought perhaps that you had omitted to ask me any questions on these subjects, and that it was necessary you should know these facts.

13456. With reference to the evidence which has been read over to you, do you wish to make any further explanation or correction? I think there was a question as to whether we had sold any of the land. I am told, since my last examination, that a small portion of the land has been sold, and has realised £125 an acre.

13457. Is there any other point that you wish to correct or explain? No. The reason why I volunteered that evidence was that I thought you had omitted to ask me. That was my only object in giving it.

13458. Can this Commission take it, that with the exception of the matters that you have just called attention to, the evidence that has been read over to you is true and correct in every particular? Yes.

13459. Who manages the matters in connection with this Hornsby Estate? Mr. J. F. Burns.

13460. He attends to all the details? Yes; he has throughout attended to everything.

13461. And I suppose we can take it that he knows more about them than any of you? More than any of us. I had implicit confidence in his honour, integrity, and judgment, and I left everything in his hands.

13462. I put before you a plan [*Exhibit D 4*] which shows the roads through the properties of Burns, Withers, and Smith in and about Hornsby? Yes.

13463. Can you tell me from your own knowledge of the land, looking at that plan, whether the roads marked B, C, D, E, F, G, H, I, J, and K, are all roads that you have given to the Government? I could not say on this plan. We gave Junction Road, I believe, and we gave, I think, a parallel road called Church-street, and we gave the continuation of Sherbrooke Road; but Mr. Burns can give you more information about this.

13464. Did you give any road on the Burns, Withers, and Smith's Estate to the Government? I believe they were given by Mr. Burns on behalf of the syndicate.

13465. Are you sure of that? They were allowed to open these roads up, so Mr. Burns informed me.

13466. Is there anything to prevent your putting a fence across these roads and taking possession of them? It is not at all likely we should do anything of the kind.

13467. Is there anything to prevent it? Yes.

13468. Have you signed any notice of dedication? No.

13469. Have you signed any letter to the Government, or any officer of the Government, giving up your right to all these roads? I don't remember.

13470. If Mr. Burns, in his evidence, says that the only roads which have been signed for are the three short roads marked D, E, and F on that plan, is that likely to be correct? Oh, yes; whatever he says is likely to be correct.

13471. If Mr. Burns states that, with this exception, the other roads have never been formally given up, but to a certain extent annexed—is it not the case that you can resume possession of these other roads at any time? That is a legal question which I am not prepared to answer at this present moment.

13472. You say in your evidence before the Select Committee "we have given £3,000 worth of land." Have you given the land? We are prepared to do so at the present moment. We are bound to do it on application or demand. 13473.

NOTE (on revision):—Q. 13463—Note: There must be a mistake with regard to this answer, as I do not know the names of the roads mentioned. Church Road probably means the road from Junction Road to the Church at Pearce's Corner, along which we have no land. I do not know any road named Sherbrooke Road.

Mr.
R. B. Smith.
7 May, 1889

13473. Supposing you, or Mr. Burns, or Mr. Withers should die, do you think that your representatives would look upon it in the same light that you do? I am certain they would look upon it as a moral obligation on their part to approve of any act that I have done.

13474. Has any of that land been sold? Oh, no.

13475. Does it not come to this—that as regards all these roads, except road A and the three roads, D, E, and F, it is only because the Government have honorable gentlemen to deal with that they can get these roads without compensation or resumption? Well, as you say that Mr. Burns states that we have not signed any document, that may be so; but I regard a promise made by us as equal to an absolute gift. I attach to it the same importance, and regard it in the same light. I am prepared to sign any document to-morrow morning—any legal document—dedicating these roads. I am quite prepared to execute any legal document to the Government giving them greater security of tenure with regard to the roads than they now have.

13476. Then it is not quite strictly correct to say that you and your partners have given up £3,000 worth of land? Not in the legal sense in which you put it. Perhaps in the legal sense it was not quite correct; but in every other sense it was correct. I think I was informed before I gave that evidence that the Government had taken possession, or was about to take possession—that I think Mr. Bennett, of the Roads Department, had done so.

13477. You say in your evidence before the Select Committee that you believed the Government must of necessity apply to you for roads, because you knew, from the railway being contiguous to some Government roads—the Bobbin Rock Road and Vanceville Road—such a necessity would arise? Yes.

13478. Where is Bobbin Rock Road? Bobbin Rock Road, towards the Vanceville Station or the Great Eastern.

13479. Does it lead to Hornsby Station? Oh, you can get now to it. Before that road was constructed [*witness points to the plan*] there was no means of getting from Bobbin Rock Road to the Hornsby Station.

13480. How many people are there at Bobbin Rock? I cannot say.

13481. Have you ever been there? I have been there; I have driven through it.

13482. Are there half a dozen people there? There appeared to me to be a number of orchards there.

13483. How did the making of these roads give the people at Bobbin Rock and Vanceville access to the railway platform? By means of this road—Burns Road.

13484. Is there any platform down there? I believe there is now.

13485. Why should the people from Bobbin Rock and Vanceville go all this distance when they have got a platform near at hand? I do not think there was a platform then.

13486. Do you think that the evidence holds good now, that a road to the station would benefit the Bobbin Rock and Vanceville people? Yes, because it would open up the Crown lands.

13487. Would the people at Bobbin Rock go 2 or 3 miles to the station if there is a platform within half a mile? You will see that these people would have no means of access to this platform unless some road was constructed.

13488. What you wish us to understand is that the continuation of Burns Road, past the Vanceville Road, is of advantage to the Bobbin Rock people, because it gives them a way out? Yes.

13489. Do you know why this road, the continuation of Burns Road, stopped there—is it not a *cul de sac*? It does not stop there. The continuation of Burns Road leads on to the Bobbin Rock Road. After it crosses the Vanceville Road it goes on in the Bobbin Rock direction. It seems to me that it goes on properly.

13490. How often have you been there? I was only once there.

13491. Then, I suppose from your one visit you could not know very much? I saw it.

13492. How long were you there? About a quarter of an hour. It was pointed out to me that this road would terminate at Bobbin Rock, and it was also pointed out to me as being an important road, giving access to either of the platforms or to Hornsby Station.

13493. I see you have stated in your evidence that the expenditure on the Burns Road was something like £200? I was informed so.

13494. Who told you? It must have been Mr. Burns.

13495. Do you believe that to be correct? I believe whatever Mr. Burns told me to be correct. I think that was the amount that he told me, but I cannot say with certainty. I wish the Commission to understand this, that I had scarcely anything to do with the matter. I left it entirely with Mr. Burns. I have every confidence in him. I did not bother myself about the roads. With regard to the improvement of Bobbin Rock Road I am relying upon the statements of those who are better acquainted with all the roads than I am. I don't suppose I have visited these roads more than three or four times altogether, and then I did not go over the whole of them.

13496. I see here that you state, in answer to a question, that the Government pressed your partner to get these roads? I was so informed.

13497. By whom? I was informed, I think, by Mr. Burns. I understand that the Government were anxious to get these roads, and at that time I thought it was very unwise on our part to give these roads without compensation. When I said that I assumed that they had been absolutely given, and I say that they are absolutely given, because I am prepared to sign any legal document to-morrow giving these roads. 13498. Who would the officers of the Government be who pressed to get these roads? I do not know.

13499. Your statement there is dependent entirely upon Mr. Burns? Yes, in pretty nearly everything.

13500. I think you said in your evidence before the Select Committee, as to Boundary Road, you made a mistake? Yes.

13501. Boundary Road is not on your land? No. I knew so little about the roads that I really thought it was.

13502. Were you a supporter of the Government in which Mr. Burns was a Minister? I supported the Government when I thought they were right.

13503. I suppose you know that Mr. Burns was Colonial Treasurer during the years 1887 and 1888? Yes. I sat on the Benches, and gave the Government support. After I returned from England there was a general election, and I went to the country—to the Macleay. I don't suppose I visited the Hornsby Estate until April or May, 1887. I visited the estate after the general election. That was the first time I had heard of the unemployed being out there at work.

13504.

NOTE (on revision):—Q. 13479—Add to end of answer, "or to Noonan's platform or to the Eastern Station." Q. 13483—After "Burns Road" add "across a short road to Noonan's platform as well as to the Hornsby Station." Q. 13485—Note: There is no platform at Bobbin Rock. I think the nearest station is the Eastern, by way of the new road.

13504. I see you have a plan there to which you have made reference;—have you any objection to producing it? No. [*Plan, with schedule of cost of roads attached, produced, and marked U.*]
 13505. Have you anything else to add? In regard to the dedication, I still say that the roads were given. It is not likely that we would repudiate any promise that we made. I am quite prepared, so far as any legal dedication is concerned, to sign any document or make any dedication that may be required.

Mr.
R. B. Smith.
7 May, 1889.

Charles Burfitt Dawson called in, sworn, and examined:—

13506. *President.*] What are you, Mr. Dawson? Licensed surveyor.

13507. I believe you have been employed as a surveyor by Messrs. Burns, Withers, & Smith? Yes.

Mr.
C. B. Dawson.

13508. For how long? For the last five or six years, I suppose.

13509. Were you examined before the Select Committee of the Legislative Assembly on the 4th December, 1888, and on the 11th January last? Yes.

7 May, 1889.

13510. Is this your evidence? Yes.

Evidence before Select Committee.

1732. *Chairman.*] Are you, or have you been, private surveyor to Mr. Burns? I have.

1733. Did you survey the property at Hornsby? I did.

1734. Have you got a plan of the survey you made? This is the outline of the survey of the property.

1735. Have you got a plan showing the subdivisions you made, and the roads and streets? No: I have no plan of that.

1736. Did you survey any roads or streets? I laid out a few streets for the clearers.

1737. Look at the tracing before you, by Mr. Deering:—are any of the streets there those you surveyed? The only street I laid out was Junction Road, from the road C to the Vanceville Road.

1738. Is that the only street you laid out? And this one—DH, from Boundary Road to Burns Road.

1739. Did you lay out that road further to the east, road E? No; I did not touch that.

1740. Look at those roads close to the railway station, T-shaped roads;—did you lay any of them out? Yes, the continuation of the Boundary Road to the railway. I laid out, years ago, the township sub-division, half-way between the railway and the road marked B.

1741. Then the roads as you see them there have been continued as you laid them out? They have been continued evidently.

1742. Are there any other roads there that you laid out;—did you lay out Burns Road? That was originally laid out by the surveyor who did the Vanceville township—Mr. Boyle. It was already marked out. I did not touch it. It was done years ago.

1743. Do you know on whose property it is? I fancy it is Government land, and not on any private property.

1744. Are you sure of that? I am not certain, but it is a road that was left for the use of this Vanceville township. The road is excluded from Burns' land.

1745. Is it not on Burns' land? No.

1746. Take the road running south from Burns Road, the continuation of road H;—did you lay that out? No.

1747. Then the road parallel with Burns Road, and about 5 chains to the north of it;—Did you lay that out? No; I can explain why that was left there. When I went up to lay out this northern portion of road H, and to give the points to the clearers, they had reached the Mistake Road, and that road was then being cleared. They thought it was Burns Road.

1748. By whom was it being cleared? By the unemployed, or people working there.

1749. How long ago is that? I suppose it is twelve months ago.

1750. Then you were surveying for Mr. Burns and laying out roads whilst the unemployed were working there? Yes.

1751. *Mr. O'Sullivan.*] Can you identify Mr. Burns' property on this plan? Yes.

1752. Kindly point out which it is? It is bounded on the south by Burns Road, on the east by the Vanceville Road, on the north by Boundary Road up to the end of the Crown lands near the station. It then runs north of road A to Fiers' property, and then it is bounded on the west and north by Crown lands.

1753. Is the land between Boundary Road and Junction Road, from the railway towards road I, a part of the estate? Yes.

1754. Do you see the three little pieces marked green, to the south of Burns Road; did you survey those? I surveyed the piece south of Burns Road.

1755. *Chairman.*] Are all the pieces marked green on that tracing Burns' property? I do not know about the little piece to the south of Burns Road, in the centre.

1756. *Mr. O'Sullivan.*] All the other portions except that you identify as the property of Burns, Withers, and Smith? Yes.

1757. *Chairman.*] And that may be for all you know? Yes.

1758. *Mr. O'Sullivan.*] You said just now that Burns Road was a public road;—does it not run between the properties of Messrs. Burns, Withers, and Smith? It does run between the properties.

1759. And you say that Burns Road is not included in the estate? Certainly not; it is dedicated to the public. The Vanceville Estate has been a public estate for years.

1760. *Chairman.*] Was not part of the Vanceville estate formerly Mr. Burns' property? I believe it was.

1761. *Mr. O'Sullivan.*] Burns Road is marked on our plan as previously cleared by owners? Yes; it was cleared by somebody when I went to survey the land here some years ago.

1762. When you went to survey the land you found that it had been dedicated to the public? Yes; that we excluded, because we found that it had been dedicated.

Mr.
C. B. Dawson.
7 May, 1889.

1763. Beyond Junction Road, Road HD, and portions of these T-shaped roads between the railway station and I road, you say you did not lay out any other roads whatever? No.
1764. *Chairman.*] You did not finish your account of the Mistake Road;—it was not quite clear how that road originated? It originated in the mistake of the person in charge of the clearers, who mistook it for Burns Road. I pointed that out to him when I went up there.

1765. *Mr. Copeland.*] The person who had charge of the unemployed? Yes.

1766. *Mr. Street.*] Did you lay out that continuation of the H road to the Lane Cove Road? No; I did not lay that out.

1767. Do you know whether or not that was laid out in the subdivision of the Vanceville property? It is not part of the Vanceville property at all.

1768. There are a number of small holders marked on the eastern side of the continuation of H? That road is evidently part of some subdivision here.

1769. Would that be evidence to you that that road had been in existence since these people owned that land? That road was in existence no doubt. I have it shown here on my own plan. It was laid out in the subdivision of what, I think it was called, the Big Island Estate.

1770. It has no frontage whatever to the Burns-Withers' land? No; they do not front it at all.

1771. *Mr. Copeland.*] Were any of the roads when you were surveying cleared and formed? The only road done was this Boundary Road.

1772. Was that cleared? Yes.

1773. Not formed? No; just cleared.

1774. None of the other roads were cleared? None of these roads were cleared. I surveyed them for the purpose of having them cleared. Mr. Burns left it in my hands entirely to leave roads where I pleased. I was to meet the man in charge of the unemployed there, who wanted some roads left through the estate, and I was to leave them in the best places I could.

1775. Who wanted the roads made through the estate? Whoever was in charge—Mr. O'Donnell, I think. He met me on the ground each time, and he said that he wanted roads in certain portions.

1776. Then Mr. O'Donnell really designed what roads were to be laid out on the estate? Yes, he designed exactly what he wanted. If I thought they were practicable I surveyed them for him.

1777. What was his reason for taking the roads where he did take them? I think simply to produce the roads from the Crown lands. I did not give my consent to the roads E, C, and B.

1778. E, C, and B, you did not give your consent to? I objected to them. I told him I would not allow them to be laid out; but evidently he has cleared them, and I have heard no more about it.

1779. Were there roads at that time surveyed through the Crown lands in continuation of the roads you allude to? Yes; they were surveyed and laid out.

1780. On the Crown lands? On the Crown lands.

1781. So that these roads were made a continuation of the roads on the Crown lands? Evidently a continuation of those roads.

1782. None of these roads were cleared when you were there? No.

1783. Did Mr. O'Donnell give you any further reason why these roads should be made? No; he gave no reason. These cross roads were cleared after.

1784. In subdividing those lands for sale I suppose it would have been necessary to have these roads, or to have had other roads quite as near as those are to each other? Well I do not know. I do not think we required any running north from Junction Road.

1785. Is it not the custom, when you are making subdivisions, to have roads closer together than these roads are shown? The block east of road DH should have been cut up into orchard blocks, with very few streets.

1786. That block would be what length—a mile? A little more than a mile, a chain more than mile.

1787. Would you not consider it desirable to have a street intersecting that mile in length, somewhere in the position of E? I should say one should come about the centre. There should have been one somewhere in that position.

1788. You would have laid it out for orchard blocks—in how many acre blocks—what would you estimate a suitable area? About 10-acre blocks.

1789. What area do you estimate, roughly speaking, there is in the block between the streets C and D? About 40 acres, I suppose, in the whole block between the two roads.

1790. You say that you consider that the whole of this block, over a mile in length, and I suppose considerably over half a mile in depth, was more suitable to be cut up into orchard blocks? Yes.

1791. And that these blocks would be about 10 acres in extent;—would it not have been necessary then, in subdividing for orchard blocks, to have had a good number of roads, to enable you to get to the various blocks? I should think not. My idea in cutting that up would simply be to give access to the railway station.

1792. But how would you cut it up into 10-acre blocks without making roads through it? You could cut it up into 10-acre blocks and not leave more than one road. You could leave it through the centre.

1893. What frontage would you have? About 20 chains on each side. If you had a road on each side it would leave 10 chains square. With one road you could leave blocks 10 chains square.

1794. You perceive that this block is more than 40 chains in depth? Taking the road out would leave about 42 chains.

1795. How often would you have roads across down here [*pointing to map*]? I do not think it necessary; only one road in the centre perhaps. A man could get on to this road and go straight along to the station; it would be a more direct way. If you left a road in the centre you would have 20 chains on each side; 10 chains square would be 10 acres each. That would leave two rows of 10 acres each here, and two rows of 10 acres each there. You would not want more than one road in the centre. One road would give a frontage to either block.
1796. *Chairman.*] Was Junction Road left with a view to cutting up the land into orchard blocks? I thought it would come in afterwards if they wanted to subdivide. It was in a very good position, and a practicable road; but it would have been much better for subdivision purposes if it had been in the centre of the block. These roads at the south, the mistake roads, are useless.
1797. *Mr. Copeland.*] How is it that this land to the south of Burns Road is cut up into such small blocks;—what is the area of these blocks? About 7 or 8 acres each; about 10 chains wide, I think.
1798. You do not know anything at all about the forming and the metalling of these roads? Nothing. I only laid them out to be cleared, and I have not seen them since.
1799. The whole of the Vanceville Estate originally belonged to Burns, Withers, and Smith? I believe it did.
1800. It was sold some time ago? Some years ago.
1801. *Mr. Brunker.*] If you had been instructed to subdivide this land on account of the private owners, would you have adopted this form of subdivision? Certainly not.
1802. Do you think that this form of subdivision, with so many roads intersecting the land, is prejudicial or favourable to the interests of the proprietors? I think it is prejudicial.
1803. *Mr. McMillan.*] That is the reason you dissented from it? Yes. Mr. Burns left the matter in my hands, and I objected to anything that would destroy the property in any way.
1804. *Mr. Brunker.*] I gather from the answer you gave just now that the roads leading north and south are of no further benefit than to give access from the Crown lands and the Hornsby railway line? That is all.
1805. *Mr. Copeland.*] Which roads do you object to; you say you would not have subdivided the land in that way? Roads E and DH; but taking into consideration this railway station at Pearce's Corner, I daresay DH would be beneficial for the purpose of giving access. I did not know of that at the time.
1806. How would Mr. Burns get to the southern portion of his estate, south of Burns Road, to the east of Pearce's Corner railway, without the road marked E. Supposing these portions were sold in big blocks, and he wanted communication from these pieces to the south, how could he get it without having a road of access? I do not see how he could get down to them without a road was made. I do not see why he would want it.
1807. *Mr. Street.*] Could not he drive along Junction Road, and down Vanceville Road and Burns Road to it? This block has access. It has a frontage to Burns Road and an outlet to this road, which are two dedicated roads.
1808. You stated a little while ago, in answer to my question, that you would have put a road in the middle of the block? Yes; I believe I would have done so.
1809. Did you not state that you would have one road in the middle of this block, which is over a mile in length; now you say you object to it. Will you tell me how you could subdivide it without having a road there? It could be subdivided with one road in the centre only, parallel to Junction Road. As to the road being left in the centre, if I had thought it would have been any benefit to any orchard blocks I should have left it, but not otherwise.
1810. *Chairman.*] As a matter of fact, Junction Road is the road you did leave? Yes.
1811. *Mr. Copeland.*] Supposing you only left Junction Road in the centre of the block, and the people holding the portions to the north wanted to get to the railway station, how would they have got down without this road? Down HHH.
1812. Did you ever see the subdivision of a large block of land like that without its having cross roads through it? Yes; certainly.
1813. Have you ever made a subdivision yourself without having cross roads for over a mile in length? I never made a road unless it was needful. I cannot say about over a mile in length. I have done several subdivisions.
1814. This is over a mile in length, is it not? It is about a mile.
1815. Can you tell me any Government subdivisions that have ever been made without a cross road joining the parallel roads for over a mile in length? I cannot say I remember any. But I think I can quote one subdivision lately where there is no cross road for a mile, that is on the Moorbank estate, a subdivision of 7,000 acres in big blocks.
1816. In what size blocks? From 5 up to 30 acres.
1817. I understand you did not intend subdividing this into blocks like that? I did not think anything would be under 5 or 10 acres.
1818. What is the area of these small blocks to the south? On the average, 7 or 8 acres. Dobson's is 10 acres, and Brown's 8 or 9 acres.
1819. Supposing this piece was cut up into 10-acre blocks, what frontage would they have, according to the depth? They would be 10 chains square.
1820. But the distance from Burns Road to Junction Road is 60 or 70 chains? It is only 25 chains between the two roads. From the Junction Road to the north boundary is 17 chains 86 links, and it is 26 chains at the very outside between Junction Road and Burns Road. It is only 43 wide between the two roads altogether.
1821. What frontage would a 10-acre block have between these two roads? Eight chains by $12\frac{1}{2}$, taking the road as it is.
1822. Supposing you divided this block into 10-acre blocks what frontage would they have? I would have a road in the centre. There would be a dividing line. About $12\frac{1}{2}$ chains by 8 chains would be the size of the blocks.

Mr.
C. B. Dawson.
7 May, 1889.

Mr.
C. B. Dawson.
7 May, 1889.

1823. *Mr. Brunker.*] I suppose your object in making these subdivisions generally is to conserve as much of the land as possible, in the interests of the owners? Yes.

1824. Whilst at the same time you afford the greatest convenience to those who are purchasers, without detracting from the value of the land? Certainly.

1825. *Mr. Copeland.*] You laid out none of these roads until the person in charge of the unemployed came to you and suggested the laying of them out? Mr. Burns wrote to me, and told me that the man in charge of the unemployed wanted to clear some roads, and that he had given the land, and left it to me to leave the roads where I thought proper. I went up there, and the man met me on the ground. He pointed out where he wanted roads. He wanted a road out to the Great Eastern Road, and I laid out the Junction Road as straight as I could.

1826. So that the laying out of these roads originated with the officer in charge of the unemployed, and not with you? Not with me, certainly.

1827. *Mr. O'Sullivan.*] When Mr. Burns told you to lay out the roads where you thought proper, did you take that as an instruction to lay them out for the best advantage of the estate, or to accommodate the public? In both ways. The man in charge wanted a road for the public, and he came to me to show him where he could leave a good road, and I took out Junction Road.

1828. *Chairman.*] Were you considering the interests of the proprietors of the estate when you laid out that road? Certainly; I was studying both interests.

1829. *Mr. O'Sullivan.*] If a road through the centre would have been better, why did you lay out Junction Road? I did not want to make any bend in the thing.

1830. You said just now that it would have been better if the road had been laid out in the centre? It would have been better as a subdivision. It would have been better for Mr. Burns if the Junction Road had been in the centre.

1831. Then why did you lay out the Junction Road where it is now—because the track was better? I fancied it was a very good road—a practicable road—and I left it in that position. The land gets a little rougher down here, and the road being there, I thought it as well to leave it there as well as anywhere else. Mr. Burns had not made up his mind as to how to subdivide the land.

1832. Referring to road E, will you kindly run that road down to Burns Road. Does not the fact of that road giving easier access to the railway and the Lane Cove Road add to the convenience and the accommodation of the intending settlers, and thus add to the value of the property? I think it would. If people bought land round here it would be handy.

1833. In making that road the public are really benefiting the estate? I do not know that they benefit the estate much.

1834. *Chairman.*] Would not land about there bring a higher value by virtue of that road? The land fronting the road certainly would.

1835. *Mr. McMillan.*] When you say these roads running north and south benefit the estate, do they not also reflect benefit on the Crown lands to which they directly lead? Most decidedly.

1836. Would you say that they benefited the Crown lands equally with the private lands? I consider they benefit the Crown lands. I think the Crown lands would have been valueless without these roads giving access.

1837. If the Crown lands were your lands just as the other lands were Burns' lands, would you like to negotiate on equitable terms for such roads to be made? I should. I would give a big price for a road to get through there, if I owned the land.

1838. You think it would be your business as the proprietor of those Crown lands to negotiate on equitable terms for such roads to be made? It would.

1839. And Burns' land being the nearest to the new line of railway, it would, under certain circumstances, be to his advantage to keep back the other lands? It would, most decidedly.

1840. Whereas those roads open up the land for the next competition in that vicinity? They do.

1841. *Mr. Copeland.*] If the Crown lands were private estates as well as this other, and the owner of this private estate proposed to you to make roads through your land to benefit his land, would you as a matter of business consent to that, or would you lay out money on this estate, supposing you owned the other. Would you lay out your money on another estate to improve your own, or would you lay it out on your own estate? I should be very glad to do so.

1842. Can you give us any instance where it has ever been done—have you ever done it yourself—where the owner of one estate goes to his neighbour's estate to expend money, instead of expending it on his own estate? I have met several such cases. I may speak of one now that I am interested in, where we have left sufficient land to make a road 100 feet wide along the boundary of the estate, and others who are benefited by it are spending money on our estate and forming the road. I am a director of the company which owns the land, and the adjoining owners and the Council are making the road as an access to Lady Robinson's Beach. We have a road 100 feet wide, but we go to no expense on the land given by us.

1843. Is it not of as much interest, supposing there is a population on the Crown lands, to have access to the people there as it would be for the people on the Crown lands to have access down here? The access we want is to the railway, not to the people. I consider that the Crown lands before were valueless. I would not have given £5 an acre for them. These roads have raised the price 100 per cent. I do not believe they could have sold the Crown lands without them. I consider that a man would be very foolish in buying a block of land if he had not access to the station.

1844. *Chairman.*] Do you know the quality of these Crown lands? Yes; very poor.

1845. *Mr. Copeland.*] You have been employed by Mr. Burns for some time in making this and other subdivisions? No; I have not had much work for Mr. Burns.

1846. Are you engaged by him at the present time in making subdivisions? Not at all. I have not had any work from him for the last twelve months; not since I did this.

1847. *Mr. O'Sullivan.*] If you had been the owner of the Crown lands, and had seen that Burns, Withers, and Smith were prepared to construct these streets and had actually employed surveyors, would you have come along and said: "Allow me to relieve you of the necessity of doing these streets, I will do them for you"? Certainly not.

1848. *Chairman.*] You say that Burns Road was a declared road when you went to survey it; was it cleared and formed? Not wholly. A bit at the end was not cleared.

1849. You gave instructions for the continuation of that road, for its being cleared to the end? No; I gave no instructions.

1850. Did you survey it to the end? It was surveyed originally. Of course, anything surveyed originally I had nothing to do with.

1851. *Mr. Street.*] Generally speaking, do you consider the continuation of these roads through private property of more interest to the owners of the property or to the Crown lands. Which have the greatest interest in their continuation? I should say the Crown lands.

1852. *Chairman.*] As a matter of fact, does not every road on that property, with the exception of Mistake Road, improve the value of Burns, Withers, and Smith's Estate? To a certain extent, most decidedly.

1853. *Mr. O'Sullivan.*] It has been shown in evidence that £6,000 has been expended on these roads, and £4,000 were obtained from the sale of the Crown lands—do you consider that a profitable transaction to the Government? How much have they sold of the Crown lands?

1854. Did you not say that the Crown lands were valueless? I do not believe an acre could have been sold without these roads. I was very much surprised to see it sold as it was. It was very poor.

End of first day's evidence before Select Committee.

WEDNESDAY, 8 MAY, 1889.

Present:

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

Charles Mark Palmer was called in and produced Deed of Assignment by Sir Henry Parkes, dated 12th October, 1887. [*Deed marked X for identification.*]

Frank Farnell, Esq., M.P., called in, sworn, and examined:—

13511. *President.*] Are you a Member of Parliament? I am.

13512. Were you a Member in 1887 and 1888? Yes.

13513. What constituency did you represent? Central Cumberland.

13514. Are you any relation to Mr. O'Donnell who was employed by the Casual Labour Board in the Northern District? Yes.

13515. What relation? I am his nephew.

13516. Will you look at the letter dated September, 1887, written to you by Mr. N. G. Bell, respecting a road from Peakhurst to Liverpool, and read your reply? Yes. "My dear Mr. Davies,—Can I be again a trouble to you, and ask you if this can be done. You see the Mayor of Liverpool is anxious that this should be done and will give the necessary to have the work done."

13517. Did you post this or deliver it? I cannot say particularly, because sometimes I posted them and sometimes sent them by messenger.

13518. It appears to have been reported upon and submitted for the approval of the Colonial Secretary? Yes.

13519. And has it that approval? Yes.

13520. You see there "Can I be again a trouble to you?" Yes.

13521. Had you on many previous occasions seen Mr. Davies in relation to similar work? Yes, on several occasions.

13522. Is the work you refer to there within the district you represent? Yes

13523. Do you know Mr. Davies personally? Yes.

13524. Intimately? I cannot say intimately. I have known him as a public man. I knew him as a public man years before I met him personally. It is only within the last three or four years I ever had any conversation with him.

13525. Do you see a letter of the 12th January, 1888, from the Secretary of the Trustees of the Bankstown Park to you? Yes.

13526. It refers to some unemployed labour to clear the park land and cut drains? Yes.

13527. What did you do with that? I made a minute on it and sent it to the Colonial Secretary.

13528. You notice that that document was afterwards referred by the Principal Under Secretary to the Chairman of the Casual Labour Board? Yes.

13529. The next note is one by Mr. Barnet, Secretary, who is he? The gentleman who wrote the first one.

13530. And the next note is one from you? Yes.

13531. It reads, "I would esteem it a favour if Mr. Walker would hurry the matter on for me. I made application three weeks ago.—F. FARNELL"? Yes.

13532. Do you know whether the trustees paid any proportion of the cost of that work if it was done? I do not think they did.

13533. There is a difference in the course you adopted in the first letter I showed you respecting the road from Peakhurst to Liverpool and the course that was adopted in dealing with the Bankstown Park Trustees. The one you forwarded to Mr. Davies direct, and the other to the Colonial Secretary. One is under cover of a letter to Mr. Davies—apparently private—and the other is an official one? None of these letters were supposed to be private ones. They all went through the same channel.

13534.

Mr.
C. B. Dawson.
7 May, 1889.

F. Farnell,
Esq., M.P.
8 May, 1889.

- F. Farnell,
Esq., M.P.
8 May, 1889.
13534. Why did you, in the one case, apply to Mr. Davies, and in the other to the Colonial Secretary? I have done it in several cases, simply to expedite matters. If there were any real necessity I would go to Mr. Davies first, and in another case where there was no particular hurry, I would refer to the Colonial Secretary.
13535. Will you look at this memorial, 19th August, 1887 [*Exhibit I 26*];—has that been signed by you? Yes.
13536. Do you recollect by whom that was presented to you for signature? I cannot say exactly. I had them presented by one and another.
13537. Do you know Mr. Murphy? Yes.
13538. Do you think it was presented by him? I dare say it was. He used to come with several.
13539. Will you look at this memorial, 22nd September, 1887 [*Exhibit R 3*];—is that signed by you? Yes.
13540. Do you recollect who presented that to you for signature? No, I cannot say. In the majority of cases where petitions were presented for work to be done in that locality they were presented to me by Mr. Murphy, who, I believe, is Manager of the Holt-Sutherland Estate Company.
13541. Do you notice any similarity in the handwriting of these memorials? No, there is not.
13542. Will you look at this memorial, 10th May, 1888 [*Exhibit R 4*], and say whether that is signed by you? Yes; that has been signed by me also.
13543. Do you recollect who presented that for signature? No.
13544. Is there any similarity between the writing of that and the others? It looks like the writing in [*Exhibit I 26*].
13545. Do you recollect any of the circumstances in connection with the signing of these memorials? No; unless I inquired whether it was necessary work to be done. I could not go throughout the whole constituency. I had to trust to those who asked that the work should be carried out. I had no personal knowledge of the locality.
13546. Will you look at [*Exhibit I 26*] again, memorial, 19th August, 1887, and tell me whether there were on it any more than the two previous signatures that preceded yours when you signed it? I do not think so. It was the custom of Mr. Murphy to bring these petitions and get them signed by the Members for the county according to seniority. Mr. M'Culloch was senior member, Mr. Varney Parkes next, and I was junior member.
13547. Can you remember whether any of the memorials were already signed numerous with blanks left for your and other Members' signatures? That has been done.
13548. Is there any appearance of a blank having been left there? It would appear as though the ink used by Mr. Varney Parkes and myself were out of the same pot. It may have been signed at the same time.
13549. Does it appear as though blanks had been left for the three Members of Parliament;—that the other signatures had been first got, a blank space being left above them? I cannot say that. Everyone has a different way of signing his name. I have a heavy way of signing.
13550. Did you read the memorials? In many cases I did.
13551. Did you read this one? If I did not read it I inquired the contents. I always inquired whether they were necessary works or not.
13552. Who did you inquire of? The person who presented the petition.
13553. Did you know that Mr. Murphy was the Manager of the Holt-Sutherland Estate Co.? I always looked upon him as Manager.
13554. Did it not occur to you that, as Manager, he had some larger interest to serve than that of an ordinary individual? I was not aware that a large number of these roads passed through the estate at all. It used to be put to me that they were from a certain place to a certain place, either from a watering-place or from a main road.
13555. Do you see that this memorial of 10th May, 1888, to the Chairman of the Casual Labour Board, asked that the unemployed should be put upon some twenty-three roads? Yes, I notice that.
13556. Did you know anything about these roads? Nothing whatever.
13557. Did you know the estate? I did not, and if I had known it I would never have signed the petition.
13558. Have you any property there at all? I have not the slightest interest there. I never knew where the estate was until the other day, when I went out to the National Park.
13559. Can you say, after refreshing your memory by looking at the memorials, whether you made any independent inquiry as to whether this was proper work to be done or not? I did not.
13560. You simply put your name there as Member for the district? Yes.
13561. You did not make detailed inquiry into every one of them? I could not.
13562. Look at this memorial, 22nd September, 1887 [*Exhibit R 3*];—you see your signature at the foot of the first page? Yes.
13563. You see immediately over it a space of three lines? Yes.
13564. Is it not probable, looking at this, that the memorial was signed by a number of people before you got it? It is quite possible.
13565. And if you saw the other signatures you would be all the more ready to put your name? Yes; I should think that was a guarantee for me.
13566. Did you ever have a petition or memorial presented to you by Mr. Murphy, or anyone else, that you declined to sign? No, I do not think so.
13567. I show you another memorial of 22nd September, 1887 [*Exhibit R 2*];—is that signed by you? Yes.
13568. Do you notice a space left just below the words "Your obedient servant," as though it was intended for some other signatures? Yes.
13569. Does not that suggest the probability that it had been already signed by some other people before it had been brought to you? Yes.
13570. And you simply signed then as Member for the district? Yes.
13571. And knew very little about the object of the memorials beyond what was told you? I took the other names as a guarantee.
13572. But at that time you knew nothing about the Holt-Sutherland Estate? No.
13573. Had you seen it? No.
13574. Have you seen it since? Yes.
13575. Do you know what the memorial referred to? Yes.

13576. Would you feel disposed, knowing now what you do, after inspection of the estate, to sign them? No; not all of them, I would not.

13577. Does your constituency take in the Field of Mars? It takes in the whole of the Hornsby, Campbelltown, Beecroft, Field of Mars, and all where the unemployed have been at work.

13578. I see several letters from you as to a reserve at Ryde, a road through the Field of Mars Common, Morrison's Road, Ryde, and other works in the district;—did you interest yourself in these in your capacity as a Member of Parliament? Yes.

13579. Have you any interest in any property that these works have passed through or improved? I do not know whether they have improved it much; we have had property there for years; we have received no material benefit from the work of the unemployed there.

13580. Does Hornsby come within your constituency? Yes.

13581. Were you ever asked by Mr. Burns, Mr. Withers, Mr. Smith, or anyone else to get the unemployed put to any work on the Hornsby Estate? No, I do not know anything about that at all. I could not tell you were it is.

13582. *Mr. Waller.*] Do you know the Holt-Sutherland Estate now? I drove from what they call Mr. Want's cottage by one of the main roads there which goes from the station to the sea.

13583. Did you drive over the estate? No.

13584. *President.*] If you wish to make any explanation or have any further evidence to volunteer, we shall be glad to hear you? I should like to say with reference to the work of the unemployed that I have been directly interested in. The Parramatta Road was in a dilapidated condition, and the Roads Department repudiated all responsibility in connection with it. It was necessary to get the unemployed put on there in order to ensure the safety of the fruit-growers who used it. It had been considered a main road for sixty or seventy years. The same with regard to the Bankstown Road. The Roads Department there would not recognize it; it was necessary to put it in a proper state of repair, and I obtained the help of the unemployed, and they have done good work in that respect.

13585. *Mr. Waller.*] From your knowledge of the district, and country around the district, was there ample work for the unemployed besides putting them on private estates? I should think there was.

13586. Was it necessary to employ them on private estates? It was not necessary, and if I had known it was a private estate I would not have signed the memorial or sanctioned it. We had plenty of work, the responsibility for which, had been refused by the departments.

Alexander Walter Scott Gregg called in, sworn, and examined—8 May, 1889:—

13587. *President.*] Were you examined before the Select Committee of the Legislative Assembly? Yes.

13588. Is this your evidence? Yes.

F. Farnell,
Esq., M.P.
8 May, 1889.

Mr. A. W. S.
Gregg.
8 May, 1889.

Evidence before Select Committee.

6. *Mr. Burns.*] You are a member of the firm of Richardson & Wrench? I am.
7. I think you conducted for the Government a land sale at Hornsby? I did.
8. Did you on that occasion see much land other than that where the sale took place? Not specifically every part of the estate.
9. How did you proceed from the station to the land? Directly over a slip-rail that was taken down.
10. You went from the western to the eastern side through a slip-rail? I went from the western to the eastern, according to the compass.
11. How did you get to the Government land? By Boundary Road.
12. Was Boundary Road then extended up to the station? It was.
13. Was there an opening made? Yes; some rails were down, and the people got through or over the fence.
14. An opening was made through lands adjoining the station to connect with the Boundary Road? Quite so.
15. As the auctioneer, did you approve of that opening being made there? As a matter of opinion, I did. I had no choice in approving. I had to take it as I found it.
16. You saw what had been done by making an opening to the land for sale? I did.
17. Did people pass through that opening? They followed me. I was pretty well the leader, or thereabouts.
18. Have you been at Hornsby since the sale? I have.
19. Have you been over the Hornsby Estate? What estate is that?
20. The estate known as Burns, Withers, and Smith's land? I have not been over it. I know of it, of course; not only recently, but for some time back.
21. Did you observe the roads made through that property? In part through it; not wholly, I think.
22. Were you along the principal roads? I was.
23. Junction Road? Yes.
24. Boundary Road, which is between the Government land and private land? I went along it to the end of subdivision offered for sale by the Government.
25. As far as you could? As far as I could comfortably.
26. Any other roads? Yes; and across the Boundary Road to Burns Road.
27. Were you along Burns Road? Yes; a little way; not the full length.
28. Did you go right through Burns Road, to what they call the Bobbing Rock Road? I do not know it by that name.
29. *Mr. McMillan.*] Did you go along the Vanceville Road? No; I did not.
30. *Mr. Burns.*] Did you pass along the Lane Cove Road? You mean the road out to Hornsby? No, I did not, because I know the road well. I saw the road that runs to meet it, by the hotel.
31. Did you observe the condition of the roads made there, the class of work done, and generally what had been done in the way of improvements recently in making roads? I did, as far as I traversed, which was most of the way.

Mr. A. W. S.
Gregg.
8 May, 1889

32. Did you also make observations of the improvements upon Government lands? Yes.
33. Did you see any difference between the improvements on the Government land and the roads through the private lands? There was a difference. I think there was more stone thrown on the roads outside the Government land. It is not very well done, in my opinion.
34. You think the class of work done on the roads was not of a good character? Not as a quality of work.
35. But would that apply to one or both? Generally. The best road is one of these cross-roads. There are rough large stones; larger than the orthodox gauge, I should say.
36. *Mr. McMillan.*] What they call ballasting? On a large scale.
37. *Mr. Burns.*] Roughly ballasted? Very roughly.
38. I want to ask you this question. You have been over the property generally, and have seen the Government lands? Not the wide range of Government land—that dealt with by auction only.
39. Have you seen the Government lands where roads were made recently? Yes.
40. *Chairman.*] You are alluding now to the subdivision, to the part that was sold? Yes.
41. *Mr. Burns.*] Do you think that the roads made through the private lands have added any great increment to their value; if so, to what extent? Perhaps, to some extent they may. I suppose all improvements of that kind and means of access would naturally give a better attraction.
42. First, with regard to the Crown lands;—have the Crown lands been improved by these roads? They were, at the time they were made, because there was no direct road. This Boundary Road was only opened a little before the auction.
44. Let us have a clear understanding. You desire to say that the Crown lands have been improved by these roads? I take it when it was projected to sell the Crown lands there was no direct road from the station, *via* Boundary Road, and this portion from the Government end to the station certainly improved the value of the Government land.
45. *Chairman.*] You are speaking now of the continuation of Boundary Road? Yes.
- 45½. *Mr. Burns.*] Is it your opinion that the road over the bridge was an advantage to the Crown lands? It was, because it was one of two ways of entrance to the Crown lands.
46. Were you on the Lane Cove Road during your visit? No; I have traversed that road so often.
47. Did you ascertain whether there was a railway platform at a place called Dobson's? No; I did not.
48. With regard to the Vanceville Road—you were on that road? No; I was not.
49. You did not know anything about that road? I know the road where it comes in here. I was not on that road. I may say that when I went out on New Year's Day I was suffering from an accident to my knee, and found it a great difficulty to carry myself over the roads, otherwise I should have gone further.
50. If 29 acres have been taken from the owners of these private lands for roads, what do you suppose is the average value of land in that locality? I suppose private owners have different standards of asking. I suppose from £80 to £100 an acre might be looked upon as a general asking. Sometimes the question of severance comes in. If a road is taken in a certain direction it may hamper a man's intention with a block.
51. If you had that land for sale, would you subdivide the estate in the way the roads are laid out here? I think it looks a feasible mode of subdivision.
52. *Mr. Brunker.*] You do not mean to say that if that design was submitted to you by a principal you would accept it as the most profitable form of subdivision? I am not prepared to say, for I admitted at the beginning that I did not go over the whole of the land.
53. No. But looking over the plan, if that design were submitted to you by a principal would you accept it or suggest to him that it was the most profitable design of subdivision for his property. I suppose you have designs in that way? Yes; but I confess that I do not see anything objectionable in this.*
54. *Mr. Burns.*] The land that has been taken you average at from £80 to £100 an acre for your general land. What increment in value do you suppose will take effect from the expenditure on these roads in relation to these private estates? I do not think that it would be very marked. They were simply made a little before the time, some of them.
55. Do you think the land given will be worth the improvements? I do not know what the cost of the improvements is.
56. Supposing we assume that the improvements would not exceed £2,500. How many acres are concerned in the improvements? What is the holding?
57. Supposing we assume that the acreage is about 680? I daresay it would, although there is no great demand for present use for the land in that position. I do not know that speculators would give very much improved value, because the roads generally in this subdivision were made.
58. Then I gather from your evidence that you do not see that there is much advantage to this estate of 680 acres from the expenditure upon the land given without compensation? No; I think it would about equal it.
59. *Chairman.*] When you say that it would equal the amount of expenditure upon it, are you taking into consideration the fact that the unemployed work at a much lesser rate of wages than the ordinary road-makers? No; I am not supposed to know that; it did not enter into my calculations.
60. If £2,000 were spent on paying men at 3s. a day, would not that mean a greater amount of work than if £2,000 were spent at 8s. a day? But the cases might not be parallel.
61. But making allowances for the difference in the workmen? One working, and the other not supposed to be working?
62. No? I cannot presume to judge; my experience with labouring men has been so small
63. Looking at the plan, you say you have seen the roads? I have in a large measure.

64.

* NOTE (on revision) :—I certainly thought Mr. Brunker meant merely as to the direction of the road for any subdivision.

Mr. A. W. S.
Gregg.
8 May, 1889.

64. You have seen the roads on the Government subdivision? Yes.
65. Are any of the roads on the Government subdivision formed? One road is partly formed, and the rest are only cleared.
66. But on the private estates, did you find many roads formed? There are.
67. Did you find any ballasted? Yes, some.
68. Are the roads on the private lands superior to those on the Government subdivision? Well, there has been more labour expended.
69. The class of work is superior? There has been more labour. Whether that implied money, I would not like to say. The work is not well done, in my opinion. I do not think any gentleman would say that it was work that he could commend.
70. You say it is not well done on the Government subdivision? There has not been as much labour expended on one as on the other.
71. But to such a stage as the work has gone on the Government subdivision it is not well done? The roads are partly formed and cleared.
72. Are the roads on the private property better formed? I daresay they are, if you except that the metal is not put down as well as it ought to be.
73. There are some roads ballasted? I should not like to say that the formation is better than the other; but where the rough metal is put there is no doubt a visible amount of work that is not seen in the other case.
74. You say that you have not seen the character of the Crown lands with the exception of those you have mentioned? Not the land beyond the subdivision—not closely.
75. You can give no opinion as to the quality of the other? Well, their quality would not be good.
76. The remainder of the land is poor? Generally.
77. *Chairman.*] Do you say that all those roads that you see there are necessary as roads of access to the Crown lands? I would not like to say they were absolutely necessary. Of course, practically, my work for a long period tells me that the more means of access there are from one district to the other so much the better.
78. But is it not equally so much the better for the owners of the private estate? I suppose it would be.
79. Do you see that little part parallel with the railway station, between Junction-street and the A road; are you aware that that was originally a subdivision of Burns, Withers, and Smith's property? I think, on going down that road, I saw some pegs put in.
80. Are the streets that you see there to your knowledge formed according to the plan of their original subdivision? I cannot speak of those interior ones. The road B is there, the extension of one of the boundaries of the Government land.
81. Can you see on the tracing before you any of the roads shown in the subdivision of the estate? Well, there is a junction street shown in the subdivision. I presume that is a continuation of Junction Road.
82. Is George street—the street parallel with the Great Northern Railway—shown upon the tracing? Yes.
83. Is Albert-street shown there? Yes, I should imagine so.
84. Is Burdett-street shown there? Yes, I suppose so. That would be the centre street.
85. Is a portion of Hunter-street shown there? Yes. Assuming that the roads are in the same position as on the plan.
86. Do you consider that all these roads are necessary as roads of access to the Crown land? I would not say that all of them were necessary.
87. *Mr. O'Sullivan.*] What was the date of your last visit to the estate? On New Year's Day—a few days ago.
88. Did you then walk over the roads? Yes—as far as the pain in my knee would permit. I know I walked a considerable distance; I suppose I must have travelled about 2 miles.
89. Are the roads in a state fit for the traffic of buggies and other vehicles? In dry weather the roads which are not ballasted would be a great deal more pleasant.
90. *Chairman.*] I understand that you have visited the estate since the sale. Did you find any new roads made on your second visit—that is roads which were not there when you were first on the land? I could not say. I had no means of comparing what was done on the occasion of my two visits.
91. *Mr. O'Sullivan.*] I understood you to say just now that there was nothing objectionable in the mode of design? Well, looking at this plan, I do not see any objection to the design. Whether the roads were made upon the owner's judgment or otherwise, I could not of course say.
92. But you think it would be a fair subdivision for selling purposes? I should apprehend so. I see no reason to say anything to the contrary. I thought of design as to roads.
93. Did you see any settlement there? There were no people in the immediate neighbourhood.
94. Did you notice any settlement around the place? Well there is a settlement on the Lane Cove Road at Irishtown, and those places. There is also settlement on the other side of the railway, where the town will form.
95. If you had owned this property and had desired to sell it to the best advantage would you not have followed out the usual practice of subdividing it and laying out roads? I think that would be the best way to make money out of it.
96. Is it the usual practice in estates of this kind to do that? Yes.
97. Then I suppose that if the proprietors of this estate desired to sell it to the best advantage they would follow out the usual practice of subdividing it and laying out roads? I think so unless they wanted to reserve it for a vast domain which might at some future time have a use. Any large area of land must necessarily have roads made through it.
98. *Mr. Carruthers.*] Is it not your experience as an auctioneer and land agent, that when persons desire to purchase a large block of land they prefer to have it free of subdivision?

Mr. A. W. S.
Gregg.
8 May, 1882.

Yes; in certain cases. Of course it would be so in every case where they found their mode of treatment differing from that contemplated by the vendor.

99. As a rule persons prefer to purchase perfectly free of subdivision? Yes; in many cases.

100. We have had it stated in evidence that it has been the custom in this Colony for persons subdividing land to go to the expense of forming and making roads; is that your experience? I do not think it is the custom, accepting the word in its usual sense. There have been exceptional cases where treatment of that kind has been resorted to.

101. What is the rule? The custom is merely to cut a line for the pegs, in order that people may pass through the scrub. Sometimes all the scrub is taken away. It depends upon the cost of the work and inclination of the seller.

102. In case where the land to be subdivided is worth £100 an acre is it the custom of the proprietors to go to any great expense? No; not to any great expense.

103. What would be the rule in the case of the subdivision of land of the value I have named? It depends upon the cost. In some cases the work would not exceed £2 an acre, in other cases it would be more.

104. But at all events in the case of land of this value is it not the practice to go to the expense of forming the roads? Well, the practice is partly one way and partly another.

105. There is no rule? Well, no fixed rule, I think. It is simply a question of expenditure with each vendor or interest selling.

106. *Mr. McMillan.*] You say that you have been over the Government land? Yes.

107. Do you know the land right through? No; but I have taken the question to be referring to the subdivision.

108. You are aware that the land is naturally subdivided by gullies running north and south? Yes. There are some very deep gullies.

109. Are you aware that the Boundary Road is a very difficult road—that it is very precipitous? Yes; beyond a certain point.

110. Have you ever held land of your own? A few allotments.

111. Suppose that you had 680 acres situated as the land of Messrs. Burns, Withers, and Smith, is situated, and that the Government wished to gain access to their land through your property, would you feel inclined to give them the roads for nothing? I think he would be a very liberal man who would do so.

112. Suppose you said to the Government—I will give you these roads provided you put them into a little better condition than that in which roads are generally made upon subdivisions, would you consider that you were making a fair and liberal offer to the Government? You mean of course that the roads would serve an extent of territory beyond.
