113. I am supposing that your land blocked the way to the Government land? Well, there can be no doubt that the opening of Boundary Road for instance, was a material aid to the Government in the sale of their land.

114. I am talking now of the roads that lead on to the Government land from Junction Road for instance? I think the offer you make would be a liberal one. I am assuming that the parties owning the land proposed to give the Government free use of, and control over the roads.

115. Not only that—but supposing they left the Government free to arrange the roads in order to suit the conditions of their own land—would you think that if you gave the land to the Government gratis under these circumstances, you would be making a fair and reasonable request if you asked them to make the roads a little superior to those ordinarily formed upon subdivisions? I think so, because there would be a consideration implied in the exchange. The interests of the Government being served, I think it would be right to ask them to give some reward—that is bearing in mind the great advantages they would derive. I may say that there is a lot of table-land on the Government land which as far as I can see cannot be served by the Boundary Road.

116. Junction Road, I take it, was made as a substitute for Boundary Road as a basis of connection? Yes, I believe so; but whether it was designed by the Government or not I do not know.

117. Do you not know as a matter of fact that when it was found that the Boundary Road would be so enormously expensive this other road, the Junction Road, was formed as a base for the cross road? I should imagine that the reason of this extension was to give access to the Crown lands. I presume that Junction Road was adopted as the more practicable road of the two.

118. Taking it for granted that it was a matter of good judgment to make the Junction Road as a basis of communication, do you see any roads there which are not absolutely necessary either to communicate with the main outlet at the Vanceville Road—the road leading to the new line—or with the Hornsby Junction;—what I want to get at is this, if the facts which I have put before you are correct, do you on that basis see any unnecessary roads—as a means of general communication with the Crown lands or as a means of communication elsewhere? As a general principle it is of course well to have various means of access. Having regard to the population, the Lane Cove Road at Vanceville and at Hornsby Junction itself, I think that many of these roads are desirable. Hornsby will some day I presume be a junction of some importance, and I daresay that in time persons living at Vanceville and at Irishtown would prefer to go to Hornsby for the purpose of catching a train of an express character generally looked for at junctions.

119. *Mr. Henry Clarke.*] I understood you to say that the Crown lands not included in the subdivision are not of a very valuable character? Yes; the unsold lot is not of so valuable a character as the sold land generally.

120. What do you think would be the value of that land? Well I have not been over the whole of it, and when you reach the table-land I do not know what you might find beyond. When I was there I really was not in a fit state, from my knee, to be going up and down the hills.

121. You say that this land is not as valuable as the land already sold? I should think *Mr. A. W. S. Gregg.*
not.
122. If the land is of so little value of what use was it to make roads through this private property to give access to it? It is probable that at the time the Junction Road was formed it was deemed wise to carry it to the full extent to which it has gone, for the purpose of reaching the lands at the back. Then I suppose there was the general principle that the district hereabout would open out on to a railway station or stations. *8 May, 1889.*
123. Have you been along the Boundary Road? I have been from the station down to the creek.
124. Do you think it possible at a reasonable expense to make Boundary Road passable? You would require an engineering feat something like that at the Zig-zag. Looking up from the hollow it would seem to require a series of slopes. Even then I do not think I should like to drive down. It would be like the Bulli Pass in some places.
125. *Mr. Bruncker.*] Are you aware that Messrs. Richardson and Wrench were asked to report upon the value of these Crown lands? Yes.
126. Do you know by whom the report was made? By Mr. Wrench.
127. Did he inspect the land? No, I think not.
128. Did you? No; but a good man—a thoroughly practical man—was sent.
129. The report was a reliable one? Yes; of course.
130. I believe you sold the land for Messrs. Richardson & Wrench? Yes.
131. Do you know whether the land was sold at the upset price? At more.
132. How much more? A good deal more in some cases.
133. It sold at 50 per cent. more? I will give you some of the prices:—Thirty-pound reserves brought £33; thirty brought £41; thirty brought par; some brought £61, and one lot as much as £77 per acre.
134. What was the upset price of the block which sold at £77? Twenty-five pounds per acre.
135. Then it fetched 300 per cent. above the upset price? Over 200 per cent.—that is, that lot. As I have already said the opening of the Boundary Road direct to the station gave to the Government a considerable advantage in the sale.
136. You think that the land obtained its increased value from the fact of the Boundary Road having been made? Not wholly; but the road undoubtedly assisted.
137. Before selling the Crown lands I suppose you traversed some portions of them? Yes.
138. Is the plan in the Appendix No. 8 an accurate plan of the Crown lands? Do you mean of the whole of the Crown lands?
139. Does it show them in the state in which they were when you offered them for sale? Well, it shows no features whatever, with the exception of the gullies.
140. Then it is not a fair plan of the land as it was at the time you sold it? No; I could not say that it is. It is a mere skeleton boundary—if it be true—of the holding of the Crown.
141. It does not show the full area in accordance with the scale? What is the area of the Crown lands?
142. Say 4,000 acres? Taking the area shown to belong to Burns, Withers and Smith to 685 acres, the portion marked blue, if it is intended to show that area of Crown lands, should be six times the size of the other land according to scale.
143. The subdivision of the Crown land is not shown upon this plan in the appendix? No.
144. The plan does not show the land in the form in which it was when you offered it for sale? No.
145. Is the plan signed by Mr. Deering? It is represented to have been.
146. Are you aware that there is a large area of Crown lands to the eastward of the Vanceville Road? I am not aware of that.
147. In submitting land of this character in a similar position, what would be the usual area embodied in the lots? It would depend upon the use to which the land might be applied. I think that in this case the land near the railway station is likely to be thickly populated. Railway communication will make it a very attractive place. I presume that the railway will be taken down to the water at the North Shore and you will then be able to reach a considerable altitude above the sea within a comparatively short space of time.
148. Do you think that the construction of the line from the North Shore to Hornsby will increase the value of this land? I dare say it will.
149. The population is likely to be much more thick than it would be without the railway? I think so.
150. Would you consider the subdivision of this valuable block of land near the railway station a desirable form of subdivision—I refer to the piece of land between the Boundary Road and the continuation road over the bridge? No; I do not.
151. Take the subdivision of the block between road H and the continuation of road E;—do you consider that a desirable form of subdivision? No.
152. You have traversed the best portion of the Crown lands and the best portion of the land of Messrs. Burns, Withers, and Smith;—which do you consider the more valuable of the two? The land of Messrs. Burns, Withers, and Smith.
153. Dealing with the whole of the Crown lands offered in one block, what should you say would be the difference in the value between the two? I should think the private land would be fully double the value of the other.
154. *Chairman.*] Speaking of these subdivisions, you have been asked whether they are in a desirable form? I do not apprehend that that portion shown upon the plan near the railway station would be called a subdivision.
155. Are not some of the roads between Junction Road and road A shown upon the private subdivision? Yes.
156. Then they absolutely formed part of the subdivision? Apparently.

Mr. A. W. S.
Gregg.
8 May, 1889.

157. Then what you meant when you said just now that the form of subdivision was not desirable was that still further subdivision was required—that is all? Yes.
158. On the assumption that you owned a piece of property, if you could get roads made on it at somebody else's expense, of a better character than are usually made for subdivision purposes, would you get them made for you? I might or might not. There might be a question as to whether I should get them made or not.
159. But providing the roads were in a direction and position of which you approved? It would depend. It is a peculiar question.
160. Supposing it were your own case, and you could get a superior road in place of an inferior road, would you take it? If I were justified in having it done, I do not see why I should refuse. I think justification has been shown in this case.
161. Mr. Bruncker has asked you if the map he showed you shows the Government subdivision? Yes; that does not show it in this form. That is clearly self-evident.
162. Do you wish us to understand that that map is incorrect, inasmuch as it does not show the subdivisions? Yes.
163. Do you see that this map purports to be a tracing forwarded to the Hon. John Davies, C.M.G., M.L.C., Chairman of the Casual Labour Board, to accompany my report of 28th January. That is a report showing the roads made by the unemployed in this neighbourhood through private lands. This is signed by Mr. Gordon, the surveyor. Mr. Deering only shows on this tracing additional roads, which were not shown by Mr. Gordon, and it does not profess to have anything to do with showing the Crown lands subdivision? Yes.
164. *Mr. O'Sullivan.*] When you sold this land were the roads on the private estate of Burns, Withers, and Smith made? I believe they were. I did not go over them then. As I have said, my first visit to them was on New Year's Day.
165. You say that there was no access at that time? No access direct from the station to the Government ground, *via* Boundary Road.
166. That only referred to one road? Yes.
167. Referring to subdivision plan 8, does that show the whole county of Cumberland? It does not.
168. Is it only intended to show the private estate of Burns, Withers, and Smith? I apprehend it chiefly show that.
169. *Mr. Burns.*] Is it the case that many landed proprietors decline to allow roads to be made through their land to give access to Government lands, when they propose to sell their land in block? Yes; I suppose they expect the same reward from the Government as they would get from private people. I do not suppose the Government have the power to take any person's land without compensation.
170. *Mr. Bruncker.*] As to the assumption of your having roads of a better character made at somebody else's expense through your land, if the Government or somebody else wanted to make a macadamized road through your property, which you did not choose to subdivide, and which you could realize on better in one block, would you permit that road to be made without compensation? No; because the question implies that there would be a loss if I allowed the best road to be made.

[*End of evidence before Select Committee.*]

13588. *President resuming.*] Was that evidence submitted to you for revision? Yes.
13589. Substantially can we take it as true and correct? Yes.
13590. Have you been in the Hornsby district since then? No, not since then.
13591. Are you auctioneers for the Holt-Sutherland Estate Company Limited? We are.
13592. Have you recently sold any of the property there? A little; not very much.
13593. How long ago? I sold a few allotments at auction, at the rooms, on Friday week.
13594. By a plan of subdivision? By an early plan of subdivision.
13595. Do you think that you could recognize that plan? I am not quite sure, as I have not come here to-day prepared to touch that part of the question.
13596. Have you been out on the Holt-Sutherland Estate at any time? Six or seven years ago.
13597. Have you sold any land for Messrs. Burns, Withers, and Smith? Never, to my knowledge. I believe I may positively say no.
13598. Did Mr. Burns see you before you were examined before the Select Committee on the subject of the Hornsby Estate? He called in and said that he had given information to the Committee that I was to be summoned, and I got notice in due form.
13599. You were summoned at his request? I think so. I am not sure of that.
13600. *Mr. Franklin.*] Does not a subdivision of land improve the value of land near a railway station? Well, it does in some cases. It depends on the nature of the land through which the subdivision is made. If people are living there they look for the comfort of roads.
13601. Do you not find, when an additional railway is established, that a subdivision of land follows almost immediately? Oh, yes, naturally.
13602. That is the rule on each of the railways? Yes.
13603. Did you know the natural state of the land at Hornsby before subdivision? It was bush.
13604. Did the making of roads improve the property for selling purposes? In some measure it did. I estimated the increment given by improvement was equal to the cost of the road.
13605. Then on the same terms the Holt-Sutherland Estate, being in the vicinity of a railway station, would be improved? I think they had their plan of subdivision prior to the railway. It is six or seven years since we sold the first lot of land there. It was a great success—far more than the latter sales, in fact.
13606. What do you think would be the value of the land on the Holt-Sutherland Estate? I never considered it. I have never been out over the whole of it.
13607. I suppose when your clients have blocks of land for sale you recommend clearing in some way? Oh, yes. People prefer to go through it in a way.
13608. If ballasted and culverted it would be a great improvement? Yes, if it is a valuable estate it should be done.

13609. How much should land be worth per acre to justify such a work? Over £100 per acre.
13610. Would that justify it? Well, I hardly know the cost of making per mile, or how they measure.
13611. *Mr. Waller.*] You said that if land were valuable subdividing would increase the value? Yes. That is if it is wise to subdivide it.
13612. Would you consider that land in a natural state of bush, the valuation of which is put down at from £80 to £100 per acre, as valuable land? I should think so, especially in the light of what it cost years ago.
13613. Have you placed any value on the Hornsby Estate as regards the value of the land? Not definitely. Generally, I should consider from £80 to £100 per acre.
13614. Is not that a good price for unimproved land? The prospects there are looked upon as being good.
13615. Is it not a good price? Not the largest price, by a long way.
13616. Do you consider it a good price? On the whole it may be considered a good price.
13617. *President.*] If it should turn out that many of these roads on the Burns, Withers, and Smith's estate have not been given to the Government, though the Government has done the work on them, is there a *quid pro quo* there? I asked how much the work cost. The Chairman of the Select Committee said £2,950. Then I asked how much was the area of the land. I made a calculation at the time, and thought them about equal.
13618. Was that calculation made on the assumption that the land had been made over to the public? I think so.
13619. If that should appear not to be the case, then the basis on which your calculation is made is wrong? Yes.
13620. Do you know who the surveyor of the Holt-Sutherland Estate is? On that plan it is L. A. Curtis. He is at Victoria Chambers, Castlereagh-street.

Mr. A. W. S.
Gregg.
8 May, 1889.

William Matheson Gordon called in, sworn, and examined:—

13621. *President.*] Do you hold any position in the Government service at present? Yes.
13622. What? I am temporary salaried surveyor.
13623. Who is your superior officer? Mr. Deering.
13624. Were you examined before the Select Committee of the Legislative Assembly? Yes.
13625. Is this your evidence? Yes.

Mr. W. M.
Gordon.
8 May, 1889.

[*Evidence before Select Committee.*]

549. *Chairman.*] You are a Government surveyor? Yes.
550. Under whose instructions are you now working—under general Government instructions? Under Mr. Deering.
551. Was it under Mr. Deering's instructions that you surveyed the roads that the unemployed have been working upon at Hornsby? I never surveyed any of them, except one, then merely laying on about 5 chains of it with a compass.
552. Which road on the map did you survey? I believe it is marked E here.
553. The road from the Junction Road to the Boundary Road? Yes, I believe that is the one; I am not positive.*
554. At all events it is one of these running north from Junction Road to Boundary Road? Yes. I merely put up a compass on Boundary Road, and gave 5 chains for a start.
555. Do you know anything further about the other roads marked on the tracing? Those marked in red?
556. Yes—do you know by whom they were surveyed, and when they were surveyed? I do not know. I do not know whether they were ever surveyed. I do not know whether they are marked.
557. Your name is appended to the plan? Yes. This plan was compiled by myself from an inspection of the ground, not from a survey at all. I never made a survey except that I designed the Crown lands at the north. From what information I could get from our own office and the Land Titles Office, I compiled this tracing so that it is not of course thoroughly correct as regards scaling. I generally, when any of my sketches are not made accurately, mention that it is a sketch-tracing—it is good enough for purposes of illustration.
558. Do you know anything of the origin of these roads, with the exception of the one marked E, which you surveyed? I do not know by whom they were surveyed, with the exception of A, which was marked by the Government surveyor. Previously to the roads being marked by Mr. Perdriau I had the instructions.
559. You know nothing about Junction Road? Nothing whatever as regards the survey.
560. How long is it since you compiled this sketch-tracing? This is my report of the 28th January. It must have been the 26th and 28th January. I do not know whether I prepared one before that.
561. Is this the latest you compiled? Yes. I would like to state that I am totally unprepared for any evidence. I only arrived from Melbourne on Friday. I was recalled before my leave was up, and I have not had an opportunity to get anything together. Yesterday I tried to get the papers, but I found that Mr. Deering had them, and that places me at a disadvantage.
562. If you had possession of these papers, would you be able to state anything further as to the origin of these roads;—does your memory serve you to say whether you have any knowledge of the origin of these roads? No; but as to any additional evidence you might require, it might not be possible for me to give it, on account of not having the information, and being taken at a disadvantage.
563. Could you tell us, in the event of any roads not being shown upon this plan, who would have surveyed them? I have not the slightest idea of anyone having surveyed any roads since I laid out road E.

594.

* NOTE (*on revision*):—Having viewed the land since, I am positive about road E.

Mr. W. M.
Gordon.

8 May, 1889.

564. Would you say that this is the latest plan that there is of the roads in existence there? It is the latest I compiled, and contained only the road then existing.
565. You are not aware that anyone has compiled any since? I am not.
566. Would it be possible? Mr. Davies, the Chairman of the Board, used generally to send to me when he wanted a tracing compiled on the latest information.
567. You have given Mr. Davies the latest information? Yes, at the time of my inspection.
568. *Mr O'Sullivan.*] So far as I can gather from your replies, all that you are responsible for is the making of the tracing? As regards the plan.
569. But your name is attached to it? Yes; I made some recommendations in connection with the tracing.
570. Will you kindly state what roads you recommended? I recommended, if you will refer to Appendix A, that the roads marked A, B, and that part of Vanceville Road, which is marked C and F, should be cleared, and that the Junction Road, from the station through to Vanceville Road, should be ballasted. It was already cleared. The roads A, B, and C, were given by the owners of the land.
571. You never made a recommendation about Junction Road, except that it should be ballasted? That is all.
572. Who recommended road E? Roads D and E* are mine also.
573. Will you kindly state why you recommended this road E on Appendix A in this dog-legged fashion? Only because it was the most practicable road laid down in the subdivision.
574. Road E is road H upon appendix E; you recommended that road H should be laid out? I did not recommend that it should be laid out—it was already laid out. I merely recommended that it should be cleared.
575. Can you tell me who laid it out? I have not the slightest idea.
576. Did you have anything to do with road I? Yes, I recommended that also to be cleared.
577. Did you never recommend the laying of it out? No; I had nothing to do with it.
578. If neither you, nor Mr. Wells, nor Mr. Houison, recommended the laying out of these roads, have you any idea who did recommend them? I do not know who marked them out, and I have no idea who authorized them to be marked out.
579. You have no knowledge of the party who recommended the laying out of roads I and H? I am perfectly certain that I never heard of anybody recommending them.
580. Who first brought them under your notice? I was asked by Mr. Davies, Chairman of the Casual Labour Board, to proceed to Hornsby to see whether there were any other roads that could be cleared advantageously to the Crown lands, giving increased access.
581. And you think Mr. Davies laid out these roads? No; I do not think so.
582. Did he order the laying of them out? I could not say. I know nothing about the laying of them out.
583. We have a map here containing a number of roads that do not appear on your plan—will you kindly explain to the Committee how it is that your plan appears without these roads? The fact is easily seen. This plan of mine was prepared in January, 1888. Since that I have not been called upon to prepare any additional tracings or plans of the country. In fact, I have not been up there since 28th January, 1888.
584. At the time you drew up your plan it was correct? It was correct up to date.
585. Then the additional roads marked on Mr. Deering's plan have been constructed since you drew up your sketch in January, 1888? That has evidently been compiled from my tracing, from information since received.
586. If these roads are now existing there, they have been constructed since you drew up your plan, and that is the reason why they do not appear upon it? Yes.
587. You had nothing to do whatever with these additional roads? Nothing whatever.
588. *Chairman.*] Do you know anything at all about them? No.
589. Do you know that they exist? I have not been up there since. I went up once, up the Lane Cove Road and over the railway, to see Mr. O'Donnell. I did not see any of these roads until one Sunday, when I was asked to go up and pick out some allotments for some friends, and then I merely rode across the land diagonally.
590. Then you have not been up officially since January, 1888? No.
591. *Mr. O'Sullivan.*] Do you know who has been in charge of the men there? Mr. O'Donnell, I believe, has been in charge from the start of the works.
592. Have you any knowledge of Boundary Road? Yes; I know Boundary Road well.
593. Do you think that road is passable, or that it could be made passable at a moderate cost? No; I think it would be impossible to make Boundary Road; it would not be trafficable.
594. It would not pay for making? No, and it was a blind road leading from nowhere to nowhere.
595. You considered that, Boundary Road not being worth making, Junction Road was justifiable? certainly at the time.
596. And the tributary roads from Junction Road, leading into the Crown lands, were justifiable? Most certainly.
597. Supposing the Government had not done this at all, and the proprietors of this estate had subdivided it and cut it up in the usual way, would not they have made these roads themselves? Well, I do not know, I am sure; that would rest entirely with their own surveyor. In designing the property they would design it to their best advantage.
598. Would not they lay it out with roads in such a way as to make it as saleable as possible? Most decidedly; but then, probably, they would not have given us the same access as we have now, because everyone of these roads are laid out to tap each spur between the gullies, and that is what we seek for in all our subdivisions.

599.

* NOTE (on revision) :—E on Appendix "E" is similar to B on Appendix "A."

599. Bearing in mind the prospective population on the Crown lands would the owners of this estate not have laid their roads so as to serve the Crown property, and make their property more valuable? Well, private owners when they are subdividing their property do not give the Government the benefits we give them, as might be seen in the case of the late auction sales. At Gordon I recommended some roads two years ago, and offered to get them cleared, if the owners would give us the roads without compensation. Through some misunderstanding, however, in the Department, these roads were let slip, and the Government have had to purchase roads within 8 chains and 50 links* of each other. I may mention some of the roads in Archibald's block, where we gave access to the Gordon lands off the Lane Cove Road, to show that wherever we can get a chance of getting a road from a private owner previously to any auction sale, even though it be a couple or three years before one, we take it. I have had lots of this work at Narrabeen and Hornsby.
600. *Chairman.*] You are alluding to lands taken merely for the purpose of access to Crown lands? Yes; generally we get them through the Casual Labour Board. I ask the Casual Labour Board whether they will clear the roads before I ask the owners if they will give us the land without compensation.
601. *Mr. O'Sullivan.*] Allowing for all that, is it not probable that the owners of this estate would have laid out roads that must give access to the Crown lands? I do not know. The owners could have shut the roads against the Government. They could run them half-way, and debar us from all access, and the Government would then have to purchase or resume under the Parish Roads Act.
602. If they resorted to so extreme a step as that, would they not be injuring themselves by diverting the traffic that would naturally make their property more valuable? I have no doubt they would; but when a private owner is subdividing he knows that the Crown have lands above him or on one side of him, and if he thinks he has a chance of getting £100 an acre for the land, it is not likely that he will hand it over for nothing, as has been exemplified at Gordon.
603. *Chairman.*] Perhaps it may be just as well if you tell us whether you know anything of the boundaries given on Mr. Deering's plan of the property of Burns and Company? Mr. Deering's plan is only a copy of my own.
604. Are the properties shaded with green lines those belonging to Burns and Company? I have not the slightest idea. I cannot tell you a block that Messrs. Burns, Withers, and Smith own.
605. But if that is a copy of your plan? That may be a copy of my plan; but, as I said before, that plan is not correct, and those blocks are not correct.
606. But as a sketch, without giving strict accuracy as to measurement, is that correct;—is it approximately correct? The only part I know anything about is that piece of land near the station. I cannot answer for the others; I do not know who the owners are. Half of the road marked H, I believe, was given by Mr. Harnett.
607. *Mr. H. Clarke.*] Who instructed you to survey these roads? I never surveyed them at all.
608. You never surveyed them? Except merely to give a start to road E.
609. This plan is signed by you? It is signed as a sketch-tracing attached to the report. We generally state on a plan that it was surveyed by so and so between such and such dates.
610. Can you say you gave instructions to clear and form any of these roads? I only know the one road.†
611. Which one is that? Junction Road. That was done as a leading road, from which the others would be tributaries.
612. Does Junction Road go entirely through private property? Yes.
613. The whole of it? Yes.
614. Was it possible to get the road, marked A, into the Crown lands? It was impossible.
615. How far is the road made along the Boundary Road? I do not know; I have not been along there.
616. Is it practicable to make a road from the Hornsby Station along Boundary Road to the road marked F? You could make a road, but it would never be trafficable. You could not drive along it, the grades would be too steep, especially over Spring Gully Creek and the next creek. There are four gullies before you come to Bobbin Rock Road.
617. But could not the road be made, if you went to a considerable expense in doing so? It would take all the money that the Crown lands would ever bring to make that Boundary Road. Even then I doubt if you could make it over Lovers' Jump Creek.
618. If these lands are so barren, and there is such a difficulty in making a road, can you say why it was necessary to give access to it by making roads through private property? It was only to improve these lands, which are no worse than lands which have been already sold. Some of the lands on the top of the ridges are very good.
619. Have you any idea of the expense of making the roads through private lands? I have not any idea. I never went into the question of the expense of making roads. It is not in my line at all.
620. It is usual to clear, ballast, and form roads on private property? We have done it in many instances. The Casual Labour Board have done it.
621. *Chairman.*] Has it been done outside the Casual Labour Board? I do not know that we have ever done it. The only other formation we did was under Mr. Deering; we did a little ballasting here and there on the Field of Mars.
622. *Mr. H. Clarke.*] Has it been done by the Lands Department on any other occasion that you remember? I do not know that we have ever done it. We did a little ballasting here and there on the Field of Mars.

Mr. W. M.
Gordon.
8 May, 1889.

623.

* NOTE (on revision) :—Speaking more correctly from scaling on plan, about 13 chains.

† NOTE (on revision) :—I never gave an instruction to carry out any of the roads; it was recommendations only, and that recommendation was to ballast Junction Road; clearing was already done.

Mr. W. M.
Gordon.

8 May, 1889.

* See note to
Question 599.

623. *Chairman.*] But that was on Government land—the Field of Mars? Yes.

624. *Mr. Street.*] Is it customary, when roads are required through private lands to reach Crown lands, for the owners of those lands to make those roads a free gift to the Government? It is not customary at all. I do not know of any instance where it has been done, unless we have promised them something.

625. Do you know of any sums of money being paid for lands for roads? Yes.

626. Will you give an instance of one? The road leading from Munro's south-east corner, 40-acre grant, on the Lane Cove Road, along the north boundary of Archibald's, and across the railway line to the Lane Cove Road, for which, I believe, £100 an acre was paid.

627. What area was that? Two acres. There was also another road about 8 chains and 50 links* below that, parallel to the same road, given to the Government on the understanding that an overhead bridge would be erected over the railway line, and they would give so much, I think £200, to assist in the construction.

628. *Chairman.*] Were there any special features in that, that you should require a road in that vicinity;—were there any other roads on the same land? There was a road recommended by me further south, and a much better road, and it would have answered instead of the latter road I referred to, a dead level road. The road I laid out was not a very practicable road; it would require a considerable amount of money spent on it, and it is right up the centre of a subdivision, or of an intended subdivision, belonging to a company, and was made without any report as to the practicability of the road.

629. *Mr. Street.*] Then, within your knowledge, for all roads taken through lands belonging to private owners by the Government, to lead to Government lands, the owners in every case receive some consideration? Yes, every one that I can bring to recollection at the present time.

630. Either in the way of purchase money or by formation? Yes; or by clearing and making.

631. I think you said you recommended the formation of these roads, D, E, F, leading to the Crown lands? The clearing of them.

632. What was the object of them? If you have visited the ground you will see that each of these roads give access to the spurs leading between these gullies, branches of the Cowan Creek, leading to the population boundary.

633. Would it be possible to get access to the table-lands without those roads? I think it is impossible. E is a main road, I think, as far down as the salt water.

634. Junction Road was already formed? It was cleared.

635. Can you tell us if D, E, and F, are of the slightest advantage to the owners of that private land? I hardly think so, because they cannot very well subdivide those blocks and make frontages to them. Their frontage will be to Junction Road, which they could have done very easily without. As far as I can see, they only require the one frontage. Even if they cut up the land into three or five acre blocks, they have strips abutting on to the Crown lands. I do not see what necessity there is for them to have these side blocks except to give access to people at the back.

636. Having got the frontages to Junction Road, the roads B, C, D, E, and F, are in your opinion not of the slightest value to the owners of this private land? I cannot say at the present time that there is any more value to them, because they have given them so close together. C and D, for instance, are pretty close together, but they lead, however, to different sides of a gully, if I remember rightly, but I am not positive whether these gullies are in their right places.

637. These roads having been cleared and formed, do you consider that they have given any increased value to the Crown lands? I should never have recommended them, had they not.

638. *Mr. Brunker.*] How did you first become associated with the business? With the unemployed?

639. Yes—with regard to this making of roads? I do not exactly remember the date.* I was working at Hornsby about the middle of October; I am not certain of the year. It was the October prior to when I went to Kurnell.

640. *Chairman.*] Was it prior to the coming into existence of the Labour Bureau? It was prior to that. Before I had anything to do with the unemployed at all I was marking and subdividing roads up here, and everything was left unfinished, in a state of chaos, when I was called away from there without a moment's notice, by Mr. Deering, to go to Kurnell with 800 or 900 of the unemployed. From that date I have always been associated with the unemployed in some way.

641. *Mr. Brunker.*] You say you made no survey of any of these roads? None whatever.

642. That plan submitted is only a design you presented to the Casual Labour Board? Yes, a sketch tracing.

643. Made in the office? Not in our office—not in the Lands Office; in my own office.

644. You made no survey; you simply submitted a design? That is all.

645. Was that design acted upon? The recommendations I made were carried out.

646. Was any work carried out beyond your recommendations? I have not the slightest idea. I have not been up there for some considerable time. I have no idea about what has been done.

647. What was your object in preparing that design? I always forward a sketch of everything I do, to guide those who may be interested in what has been done, and I sent that tracing to Mr. Davies. I was requested to prepare the tracing for Mr. Davies.

648. You must have seen that these cross-roads were necessary? Most decidedly, or I could never have put them in.

649. I want to know what your object was? To give access from the road to the Crown lands.

650.

* NOTE (on revision) :—The date I since found out to be 1st November, 1886.

650. And, knowing the locality, you believed that they would have that effect? I did most certainly.
651. You said that Boundary Road is not practicable; that you did not think it could be made available for traffic; if Boundary Road had been made and formed instead of Junction Road, is it not a fact that Burns, Withers, and Smith would have had the same frontage as they have now from the formation of Junction Road without having lost the land? Of course they would have a frontage to Boundary Road.
652. If Boundary Road had been formed, would they not have had a frontage to it for their own land without the loss of the land taken for Junction Road? Most decidedly.
653. *Chairman.*] Do not they gain two frontages now? Yes, that is true.
654. *Mr. Brunker.*] Do you know what area is taken from Junction Road? I cannot tell.
655. Approximately? Roughly, I suppose there would be about 150 chains.
656. What is the width of the road? About a chain.
657. How much land would be there? About 15 acres.
658. What is it worth an acre? It is a very difficult matter to say. I suppose land up there is worth £120 an acre for orchard land.
659. You know the Vanceville Road? Yes.
660. Is that a public road? I do not know whether it is a public road in the meaning of the Act, although it was maintained by the Roads Department to a certain distance. It was cleared and formed to a certain distance, but I do not know whether that constitutes it a public road. I do not know whether it has ever been proclaimed.
661. Had you anything to do with the forming and metalling of these roads? Nothing, except as far as recommending that Junction Road be ballasted.
662. Did you recommend that any other roads should be metalled? Not to my recollection.
663. To whom did you make the recommendation? To Mr. Davies.
664. Have you seen the plan submitted by Mr. Deering this morning? Yes.
665. You see the roads that have been formed there? Yes.
666. From your knowledge of the locality, do you think that those roads which are shown are made essentially in the public interest? There is a lot of roads here I do not know anything about. Particularising them, I think I could manage to give a very good idea.
667. You know the locality as a Government surveyor, and having been over the land so frequently, you ought to understand the locality as well from the plan as if you were on the ground? Yes. Burns Road had evidently been made with the intention of connecting with the Bobbin Rock Road that comes across Pymble's grant. There are 30 chains marked cleared, running from H to E. Continued southerly, there is a road of 28 chains cleared, formed, and metalled, running from Junction Road to Peat's Ferry Road. That, I do not know anything of.
668. You do not know anything about the land adjoining? I do not know whom it belongs to. The roads running easterly from the Hornsby Station to the western extremity of Boundary Road, and also the roads between B and the Hornsby Station, I do not know anything of.
669. Is it probable that those roads were designed for the purpose of giving access to the Hornsby Railway Station? It would appear to me from this plan that they were.
670. From Pearce's Corner to North Shore do you know whether there are any platforms authorized? The only one I know of is a platform on the road marked H H H.
671. Above the Lane Cove Road? Yes. That is the only one I know of along the line.
672. You said that you had nothing to do with the survey? Nothing.
673. How did you localize the roads when you first went on to the ground? In the first instance, I got a tracing from the Lands Office. I produce my original. These black lines on the plan are in the original subdivision and plan in the Titles Office.
674. *Mr. Copela.d.*] I believe you have made a good many subdivisions for the Government? Yes.
675. That has been your principal duty for a long time past? Yes.
676. Did you ever make any subdivisions on Government lands without providing the necessary roads for access;—in other words, did you ever make a subdivision without cutting the land up into blocks by means of roads intersecting it in all directions? No.
677. In point of fact you could not make a subdivision unless you made roads? No.
678. Can you tell us of any instance where any private company have made a subdivision without making roads;—in other words, is it possible for a private company to subdivide land without making roads? No.
679. That being the case, what necessity was there for the Government to provide these roads in subdividing private owners' land;—would not the private owners themselves have been compelled to make these roads? I think some of these roads were provided before the unemployed went there at all.
680. What roads can you specify which were not previously provided for in the subdivision? D H H, the whole length of Junction Road, and all those pieces running northerly from Junction Road, B, C, D, E, and the short piece north of the Vanceville Road marked F.*
681. You obtained the whole of these roads from the syndicate? I obtained some of them. I did not get them all.
682. Who got the others? As far as I can understand the Casual Labour Board got the others.
683. Is the road D H H the only road you obtained? I obtained that and the E road further to the right.†
684. Those are all you obtained? Yes.
685. From your knowledge of subdividing do you suppose that the private owners would have

* NOTE (on revision):—Southernmost H on Appendix "E" was provided for by the owners.

† NOTE (on revision):—I did not obtain H H, and from what I now recollect northernmost H was cleared prior to my recommendation to clear southernmost H and part of Burns-street.

Mr. W. M.
Gordon.

8 May, 1889.

- have made these roads if you had not done so? They might have made roads, but they might have been made in a way that would not have suited us. The roads run out on to the middle of the spurs, and if they had been put 23 or 30 chains, for instance, to the east or west they would have run us into sidelings. The access then would not have suited us at all.
686. Would they not have had the sense to lay out the land in such a way as to make the roads continue yours, as it were;—in subdividing land do you not take all these things into consideration? I do, and I have often been taken to task for taking roads along private boundaries instead of the private owners giving half. You will find that this is the case in many subdivisions with which I have been connected.
687. Who gave the Boundary Road? That was designed by me in my subdivision of the Crown lands some years ago.
688. The Crown gave the whole of the Boundary Road? Yes; I will tell you how it came to be laid out if you like. When I first went out there there was some dispute about that boundary—
689. What I want to know is whether the Government charged the owners of this private land anything for giving them this frontage? It is only a designed road at the present time.
690. It is surveyed up as far Spring Gully Creek? Yes.
691. And on the Government providing the Boundary Road they gave the owners of the private land the benefit of the one frontage? Yes.
692. I thought you said just now that the property-owners got no frontage benefit so far as Junction Road was concerned? Oh no, because, of course, they got the advantage of the second frontage.
623. Did they not get the whole benefit of 4 miles of frontage along the Junction Road? Well, yes, I suppose so.
694. In subdividing land, would it not be one of the objects of the owners to get as much frontage as possible? Yes; they always endeavour to do so.
695. In making the subdivisions, is it not to their interest to make as many roads as possible, so that they may multiply their frontages? Yes.
696. And in the case of the roads to which you have been referring, you have provided the owners of the private land at the public expense with a double frontage? Yes; that is very true, but we have to do it in many instances. We cannot help ourselves.
697. Can you tell us of many instances in which the Government have made roads through private property? We have made a lot at Narrabeen.
698. Can you give us any instances before the Casual Labour Board were brought into existence? No; I cannot call to mind at the present time anything of that kind.
699. Take the subdivision of Harbord? Well, we did there. You will perhaps recollect, Mr. Copeland, that you were down there, and that you objected to our making roads from Pittwater through private land. I think you had the work stopped, and said that you would make inquiries into the matter. The road was pretty nearly complete, but I do not think they did anything more to it after that time.
700. In the subdivisions at Beecroft and at the Field of Mars, did the Government make any roads through private lands? I cannot call to mind anything of that kind being done.
701. Then I think you can safely say that up to the time of the Casual Labour Board coming into existence the Government had not resorted to the practice of improving private lands in this way? It certainly has never been done to my knowledge.
702. You estimate the value of the land taken to form the Junction Road at £120 an acre? Well, I cannot flatter myself that I am able to give you a very accurate idea.
703. Do you know at what price the Government land at Hornsby was sold? I could not say.
704. I have a map showing that the land fetched from £30 to £70, or £100 an acre. Will you tell me at what you value the Crown lands to the eastward of Spring Gully Creek? The level land at the top of the ridges might realize as high a price as £50, and the rougher land would perhaps go at as low as £15.
705. If Mr. Deering estimated the value of the land at from £2 to £10 per acre, that would be too low? Yes; I should think so.
706. You said just now that the Boundary Road was impracticable; where is it impracticable? Well, over the Spring Gully Creek in the first instance. The next gully is very bad, and then there is another at the north-east corner which would be impassable almost.
707. Do you say that the Spring Gully Creek is impassable? Well, it would be possible to make a road there, but it would never be of use. As far as I can recollect, I have been on that road only once since it has been cleared.
708. You have had some experience of country roads, I suppose? Yes.
709. Have you had any experience in the making and laying out of roads there? No. I am not from my position called upon to give an estimate as to whether a road is or not a good one. All that I do is to lay out roads to the best of my ability.
710. What should you estimate would be the cost of cutting through the eastern slope of Stony Gully Creek? That is beyond my knowledge.
711. Would it be more expensive to make that cutting and to complete this bad piece of road than to clear, form, and metal the whole two miles of Junction Road? Yes. I do not think it would cost nearly as much to make the Junction Road—that is, as far as my knowledge goes. There is nothing difficult about the Junction Road. There is not a bad grade on it.
712. Where is there a bad grade on the Boundary Road except at Spring Gully Creek? Well, there is a good stiff grade from the eastern boundary of Bellamy's.
713. Is it not a good road from the railway to Spring Gully Creek? I have not been on the road myself for a long time. I was totally unprepared for this examination. I have not been there for nearly twelve months.

714. I understand that the Crown lands are too rough to permit of a road being continued through them from road A? Oh, yes.

715. If this land is so rough, where is the utility of the Government spending so much money in order to reach it? Well, we were endeavouring to improve the value of the Crown lands in just the same way that we did at Gordon.

Mr. W. M.
Gordon.
8 May, 1889.

716. To improve the private or the Crown lands? I have been from the first moved by a desire to improve the Crown lands.

717. Do you know of any other instance in which the Government have deliberately gone away from the Crown lands which it was desired to improve, and have spent the public money in the improvement of the private lands? Not on the north side of the harbour.

717½. You said just now that you were ordered to open up a road at Narrabeen belonging to private owners; where was that road? It was through the property of Mr. James Wheeler and Miss Jenkind.

718. Did you submit your recommendation to Mr. Deering before carrying out the road? I do not quite recollect how it came about.

719. Were you ever authorized to take upon your own shoulders this responsibility in connection with the expenditure of public money? I certainly never did any work unless I had proper instructions. It is true they were verbal instructions, and I have nothing to show for them.*

720. Who gave them to you? Mr. Deering.

721. Did he tell you to make what roads you liked? When we gave up the unemployed he promised the Casual Labour Board every assistance in his power. He asked me whether I would do the same thing, and my willingness was expressed in just the same way. Colonel Wells and Mr. Houston were also told by Mr. Deering that if at any time they wanted me they could command my services, or words to that effect were used.

722. But is it the practice in the Department for gentlemen occupying the position you occupy to give orders on their own responsibility for the making of roads and the expenditure of large sums of public money without submitting the proposal to a superior officer? A lot of latitude was allowed me. When Mr. Deering first took charge of the unemployed he put me in charge of everything. I had charge of the men, and I used to give to Mr. Deering the cheques to sign, explaining to him what the expenditure was for. I used sometimes to order from £200 to £300 worth of tools. I did a great deal upon my own responsibility. When we gave up the unemployed Mr. Deering handed my services to a certain extent over to the Casual Labour Board for the carrying out of the rest of the work.

723. When you took upon yourself the responsibility of spending public money upon private lands, did you first submit the proposal to your superior officer? It was only recommendations which I made in the first instance. They had to be considered by the Board. Of course I did not submit the recommendations to Mr. Deering, because he was not in charge of the work. The Board asked me whether in the interests of the Crown lands such and such things were necessary, and as I had such a knowledge of the district I made recommendations.

724. You recommended to the Casual Labour Board that these roads should be opened up at the expense of the public? Yes, some of them.

725. *Mr. Brunker.*] And the Board confirmed your recommendations? Yes. The matters were known to Mr. Deering, of course. I had no interest in doing anything underhand or doing anything without Mr. Deering's knowledge. He is my superior officer.

726. I believe that a good many roads are now made of which you know nothing? Yes.

727. Therefore you cannot say who authorized them? I know nothing about them.

728. You were connected only with the Junction Road, with road HH, and with E road? Yes. E road will eventually be a main road through the Crown lands, past the population boundaries, to the water.

729. When you were expending this public money on roads, how is it that you did not expend it upon the Crown lands? That was already done—that is to say, roads were made through the subdivision.

730. Are these roads metalled and culverted? From what I can understand, the roads are made all through.

731. But are they metalled? I do not know.

732. It is your opinion, speaking as a Government officer, that it was better policy to spend the public money in improving the private estates than to spend it upon the Crown lands? That is not my opinion, and it is not what I have been led to do in anything I have done.

733. You thought it better policy to spend the money in making roads through the private property than in making them through the Crown lands? I think it is a good thing, in some instances, to expend money upon roads through private estates. We know that the owners benefit, but we are seeking at the same time to benefit the Crown lands.

734. How will these particular Crown lands be benefited by the making of these roads more than a mile away? Well, if you were to close Bellamy's Road and these roads running northerly from the Junction Road it would be impossible to get in or out of the Crown lands.

735. No one proposes to close Bellamy's Road? I know, but I was just instancing it.

736. There was something intelligible in opening up road A? It would open up only a small section of the Crown lands.

737. Has the continuation of road A through the Crown land been metalled? Not that I am aware of. I have not been on the Crown lands since the roads have been cleared.

738. Was it necessary in making these roads not only to form and metal them, but to put culverts into them, in order to give the desired access to Crown lands? I thought at the time that the Junction Road would be really a good back-bone road from which we could divert

*NOTE (on revision):—It was never in my power to expend public money whilst in connection with the unemployed.

Mr. W. M.
Gordon.
8 May, 1889.

- divert the traffic on to the Crown lands from the Lane Cove Road. The work on many of the other roads I do not hold myself responsible for in any way.
739. Then you take upon yourself no responsibility for the road down to the hotel, for instance? No.
740. In making these minor roads—the road along the railway from Junction Road to A road, and these other subdivision roads—do you think, as a Government officer, it was a proper thing to expend the public money in metalling them, with the object of opening up the Crown lands? Of course, as I said, I had nothing to do with them; but as far as I can see at present, from a glance at the plan, there does not appear to be much necessity for some of the work you mention.
741. Would you take upon yourself the responsibility of recommending the expenditure of public money upon these roads? No.
742. And, as a matter of fact, you did not recommend them? No.
743. You think that there is no necessity in the interests of the sale of Crown lands? Not as far as I know, unless it was thought necessary to continue the Boundary Road through to the station. That is all I can see.
744. Supposing you had employed twice as many men, and had made twice as many roads, would it not have been an additional improvement to the private estate? Yes. Of course the more you do, the better for the owner's land.
745. *Mr. Brunker.*] Have you had any experience outside the Government service as to subdivision? I have had some experience in Victoria.
746. Have any cases come to your knowledge where the adjoining owners have made a reserve of a foot or two of land, so that the adjoining parties should not have the advantage of the road? I do not know of any case where they have taken advantage of the Government in that way.
747. But you know that it has occurred in private subdivisions? Yes.
748. *Mr. O'Sullivan.*] Do I understand that the proprietors of the Burns, Withers, and Smith property have given fifteen acres of land? Yes.
749. Is that for the Junction Road alone? Yes.
750. And I suppose they gave other land for other roads? Yes.
751. The fifteen acres of land at £120 per acre would be worth nearly £1,800? Yes.
752. But would they not have had to give this land if they had been subdividing their own property and making their own roads? If they had made their roads prior to the subdivision of the Crown Lands, and if a plain showing the Junction Road had been lodged in the Titles Office, it would have been to a certain extent a proclaimed road, although it would not have been dedicated to the public.
753. In point of fact they had a plan of the subdivision lodged in the Lands Titles Office? There is the original plan. It was put in there many years ago.
754. Did the original plan lodged in the Lands Titles Office show the roads now marked on your plan? No.
755. Can you tell us the inception of these roads. You say that they were laid out, and that you simply ordered them to be cleared and made? Yes.
756. How did they originate? That is more than I can tell you.
757. A number of them you did not find in the original plan? No.
758. *Mr. Brunker.*] I suppose there was no subdivision of the estate when you took action? No, except the old subdivision.
759. Does that apply to the whole of the land in this estate or to only a portion of it? It applies only to the south-eastern portion.
760. *Chairman.*] In answer to Mr. Brunker, you stated that you received a communication from the Labour Board asking your opinion whether such and such a work would be advisable? Yes.
761. You received a communication from the Board asking for your recommendation then? Yes, most certainly.
762. And your recommendations were made at the solicitation of the Board? Yes.
763. In whose name were those communications addressed to you? Mr. John Davies, the Chairman of the Casual Labour Board.
764. Are not the roads shown upon your plan the roads which have been carried out by the Casual Labour Board of most advantage to the owners of private property, that is to say, if they had had to make the roads would they have adopted a plan similar to that here shown, considering the way that Hastings-street, Smith-street, and Billyard-street run. You will see that Burns Road and Junction Road are paralld, and that the roads E, D, and C are paralld with the Vanceville Road. Would it not have been to the advantage of the owners of this property to cut up the land in this form? If I were a private surveyor, and were subdividing for the owners of this land, I doubt if I should put in B, C, D, E, and F. I do not see what benefit is to be derived by the owners of the property from these roads. There might be some benefit in B, but I cannot see any in C, D, and E.
765. *Mr. Copeland.*] But is there not a double frontage? It is not of much use, because They have the Boundary Road and the Junction Road. A road at the side of an allotment does not make it so much more valuable.
766. Would you get a connection between Boundary Road and Junction Road except by those streets? What I wish you to understand was that they would not be of much good to private owners who would have frontages to Boundary Road. A side frontage does not increase the value of a block materially.
767. *Mr. Brunker.*] I suppose the loss of the land in making these streets would not be counterbalanced by the increased return from the frontage, that is to say, it would pay the owners better to have one road instead of three? That is my idea.
768. *Chairman.*] These private lands of Messrs. Burns, Withers, and Smith, will improve in value as the alienation of the Crown lands proceeds? Yes.

769. Ultimately I suppose there will be settlement further to the eastward of the Boundary Road. Will the roads of access to this settlement from the Junction Road increase the value of the private property? I should imagine so; I think E will be a main road giving access to the water frontages.

770. Take the north-west portion of the Crown lands—it has been alienated—if settlement had taken place there, what would have been your roads of access if C and D had not been made? Of course you are referring now to only a small portion of the Crown lands, but I quite agree with you that these roads will indirectly benefit the private owners. The more traffic you bring through a man's property the better for him.

771. In subdividing do you ever make the blocks more than a quarter of a mile square? Not in town subdivisions.

772. You put roads round blocks at every quarter of a mile? Yes, as a rule—but we are guided a great deal by the nature of the country.

773. But take suburban divisions? I am taking Harbord for instance.

774. *Mr. Brunker.*] Is it not a fact that the roads are made to suit the character of the country? Yes.

775. *Mr. Copeland.*] How is it that you make these roads so frequently if there is nothing to be gained by having a certain quantity of frontage. Do you not think that these private owners would have made the roads to which I have been referring for the sake of the frontages? I suppose they would try to get as much frontage as possible. Of course, a great deal would depend upon the size of the blocks.

776. Do not private owners invariably create as much frontage as they can by making roads? Yes, I suppose so.

777. Would it not have paid the owners of this property to make the roads leading from Junction Road to the Boundary Boundary in order to get the extra half-mile of frontage in each case? I admit that B, C, and D, are pretty close together. I don't quite see what necessity there was for the whole of those roads. If E, D, and B, had been left, there would as far as I can see, have been an equal space between each of them.

778. Would it not have been to the interest of the owners to make C themselves in view of the extra half-mile of frontage which it would give them? Yes, I should think so.

779. You think that on account of the frontage alone they might have been induced to make the roads? It is possible that they might.

780. *Mr. Brunker.*] I suppose that the value of the frontage would depend upon the character of the adjoining land? Yes.

781. *Chairman.*] You say that the roads leading from the Junction Road are roads of access to the Crown lands? Yes.

782. Assuming that the Boundary Road is good as far as the first gully, is more than one road of access necessary into that road? If the road were thoroughly level perhaps B and C would not be necessary.

[*End of Evidence before Select Committee.*]

13625½. *President resuming.*] Having heard it read, do you wish to make any correction or explanation? Well, yes, I think I can explain a good deal in connection with some of the questions that have been asked. I can enlarge upon a good many things here. Referring to question 551, I had no instructions to survey these roads at all, but acted on previous instructions by Mr. Deering, to my assistant, Mr. Palmer, through me, I had no delicacy in recommending the Junction Road and one or two of the roads northwards. Referring to my answer, No. 600, I was authorised by Mr. Deering to see the Casual Labour Board before asking for some roads at Narrabeen. Referring to my answer to question 621, I should have said that we did do it. In answer to question 699, I said I did not think anything further was done to it; after that time the roads were completed. In connection with questions 719 and 720, it is a large matter, and I should have to go into instructions which I received from Mr. Deering.

13626. With the exception of these matters that you have called attention to, is your evidence true and correct? My evidence is thoroughly correct now with these alterations.

13627. How did you come to be connected with the Casual Labour Board? Well, I was, of course, connected with the unemployed previous to them taking charge of it. I did all the work under Mr. Deering; and when the Casual Labour Board was appointed I believe Mr. Wells and Mr. Houison called upon Mr. Deering one morning and asked about the transfer of the work, and asked whether I could transfer everything, and Mr. Deering consented that I should give them every assistance in every way. So, until they got matters pretty straight, I went out pretty well every day for a week on the different works, explaining everything, going over the lines of everything; and that is how it started. There is nothing in writing in connection with it.

13628. Were you detached from the Survey Department? No; not at all.

13629. Who paid you your salary? It was paid out of the Lands Department.

13630. Was there any change with regard to the way in which you were paid salary after you went to the Casual Labour Board? None whatever.

13631. You were paid in the usual way? Yes.

13632. And there was nothing to indicate any change as to who were your superiors? Nothing.

13633. What is the nature of the accounts you rendered for payment to the Lands Department? I rendered accounts for my own salary and the men's salary.

13634. Did these accounts show what you had been doing? No; I sent in a progress journal that showed what I had been doing.

13635. Will you look at this plan (*Exhibit D 4*);—does that plan correctly indicate the property of Messrs. Burns, Withers, and Smith, in the district of Hornsby, and the roads that have been formed there? That shows every road that has been cleared and formed up there.

13636. Does that plan show the property of Burns, Withers, and Smith? Yes.

13637. Does it show the roads made in, through, and about their property? Yes.

13638. Can you tell me, looking at that plan, the work that has been done by the unemployed in charge of Mr. Deering when the Casual Labour Board came into existence? That road A was done, and I think

we

Mr. W. M.
Gordon.
8 May, 1889.

Mr. W. M.
Gordon.
8 May, 1889.

we had partly cleared the reserve on the western side of the line. We had another gang that were going from east to west, clearing in the direction of the Boundary Road. I believe the camp did some clearing on the Boundary Road.

13639. Can you tell me whether at that time any, and, if any, what, work, in the nature of clearing, formation, or making, had been done in, through, or about, this property of Burns, Withers, and Smith? There was not a thing done excepting part of the Vanceville Road, from Lane Cove Road to Billiard-street, that was maintained by the Government. I do not know for certain, but I have learned since that the road H was only half a chain wide, as far as Noonan's orchard, and was cleared. I believe Burns Road was cleared, and the other roads southward. Billiard-street, Hastings-street, &c., were certainly cleared by Burns, Withers, and Smith years previously.

13640. Do you recollect what was done on Burns Road? I believe it was cleared about 30 chains, and there was a culvert over the creek near the junction of the Vanceville Road and Burns Road.

13641. Had any work been done at all either in the way of clearing or anything else to the east of, and on the other side of, the continuation of Vanceville Road? None whatever.

13642. What was your position up there when the Casual Labour Board came into existence and during its existence—how would you describe yourself? That is more than I can say.

13643. Were you advising surveyor, superintendent, or what? Being in the Government I was a sort of officer for the benefit of the work, to advise them on it. They would be out of work, and I would advise, as far as lay in my power, for the benefit of the Crown. I forgot just now to mention that, before the unemployed came on the property, Burdett-street, Florence-street, and the part of Albert-street marked red, being the road adjoining Florence-street and Junction-street, was cleared, I believe, by Burns, Withers, and Smith.

13644. You know Mr. O'Donnell? Yes.

13645. Was he a subordinate officer to you? There were no officers under me in connection with the Board at all.

13646. Did you have anything to do with the arrangements of the men as regards rations? Nothing whatever.

13647. Did you have anything to do with regard to putting them on particular works? While carrying out the various roads I did.

13648. I am confining my attention to this particular property. Were you in such a position up there that you could order the men to go to any particular work? No. I had no power of that kind at all.

13649. Did you ever do it? Never.

13650. Did the Chairman of the Board communicate with you direct or through the department under your control? Direct to me, generally.

13651. Did you make reports direct to him? Yes.

13652. Had you any authority for doing that? Oh, yes.

13653. From whom? I had authority from Mr. Deering. I took it as a general authority in the work.

13654. Was Mr. Deering aware that you, being a subordinate officer in his Department, was communicating direct with some other department? Oh, yes; from the fact that he sent me down on several occasions to communicate with them.

13655. Did Mr. Davies ever see you personally? Oh, yes.

13656. Frequently? Not very often.

13657. On the ground or at the office? At the office, when I would be in town. Sometimes he would drop me a note to come down and see him.

13658. Did you converse with him on the ground? I do not think I have met him more than three or four times up there.

13659. How many times have you been at the office to see him? I could not give an idea. When I was in town I would run down once a week or twice a month to see him.

13660. How often do you think you saw him during the twenty-one months that the Board was in existence? Say 100 times, but I would not like to confine myself to numbers.

13661. Were you in the habit of seeing Mr. Wells? Yes; I often used to see Mr. Wells and Mr. Houison,

13662. On the ground or in Sydney? On the ground mostly.

13663. Did he or Mr. Houison ever give you instructions? Never; they never gave me instructions.

13664. How would directions or instructions be conveyed to you by letter or verbally? They never directed me to do anything.

13665. How was the work initiated then;—through Mr. O'Donnell, or how;—somebody must have brought the men up there? I think the men were all up there when the Casual Labour Board took charge. These works were initiated by Mr. Deering. I believe Mr. Davies wrote to me to go and see him about finding more work up there when they took charge.

13666. Do you think that this letter of 17 October, 1887, was the first correspondence you had with the Casual Labour Board;—they were appointed in May, 1887? I think it is, in connection with this work.

13667. Do you know what unemployed Mr. Deering had at work on road A? I cannot say. There was a lot of work carried out on the east of this by another camp.

13668. Have you any memorandum or books which will show when the unemployed first went on the works on Burns, Withers, and Smith's Estate? I have nothing whatever,

13669. Do you think it would be in October? This work, or a good deal of it, was done before this letter was written, because I went up there, and these roads were cleared.

13670. Can you tell me the month when you first commenced attending to the work of these roads up there—was it the month after the Casual Labour Board came into existence? I was never on the ground after Mr. Deering left charge until a day or two before I made this report.

13671. Can the Commission take it then that you had nothing to do with these roads or this property until shortly before you wrote the letter of 17th October, 1887? Yes; I think I am strictly safe in saying I had nothing to do with it after Mr. Deering gave up charge until 17th October.

13672. Is this your signature to a letter of 17th October, 1887, to Mr. John Davies? Yes. [*Letter put in and marked V.*]
13673.

NOTE (*on revision*):—Q. 13658—"I cannot bring to recollection having ever met Mr. Davies on or around the Hornsby lands." Q. 13660—"Many of the times I met Mr. Davies was when engaged on my own work contiguous to the works the Board were carrying out, and the hundred times will amply cover all the times I saw Mr. Davies unofficially and officially." Q. 13671—"safe" read "within the bounds of truth."

13673. Was that letter written by you in response to any written or verbal request from Mr. Davies? I am not quite positive about it, but I believe he spoke to me and asked me to go up and have a look at the roads and see whether there were any roads that were required for access.
- 13674-5. This letter enclosed a tracing. Have you got that tracing? It was only just a rough copy I made at the time.
13676. Is this tracing that I show you a copy of it? Yes. [*Tracing put in and marked V1.*]
13677. I see by that that you proposed that the roads coloured brown on the tracing should be cleared, and that you refer to them by the letters A, B, C, D, E. Will you look at this plan [*Exhibit D 4*] and tell me what road on that plan corresponds to road A on your tracing? Road D.
13678. What road corresponds to road B? Road E.
13679. What road corresponds with road C? Road F.
13680. You mean by the roads D, E, F, only those parts that lay between Boundary Road and Junction Road, I suppose? Yes.
13681. What on this plan corresponds to the road marked D on your tracing? Road I.
13682. What road on the plan corresponds with road E on your tracing? Road H H.
13683. What road on the plan corresponds with road F on your tracing? Road J.
13684. I understand then that the first part of this letter [*Exhibit V*] consists of a recommendation to clear roads D, E, F—that is, the roads lying between the Junction Road and Boundary Road—road H H, and road J, which is a continuation of road F? Yes.
13685. You speak here of the Junction Road having been cleared throughout “from the Hornsby Railway Station, and that it is a very good road as regards gradients and crossings at the gullies,” and you recommend that it be formed and ballasted throughout, and culverts erected about the position shown on the tracing over the gullies;—do you know who, at the date you wrote the letter, had done the clearing on the Junction Road? It was done by the Casual Labour Board.
13686. Had you anything to do with it? Nothing whatever.
13687. Had any of these other roads that you recommended here been cleared? No.
13688. Then, I take it, that on October 17, 1888, all that was done up there was road A, that I spoke about some little time ago, and the Junction Road, which is marked on this plan “G”? Yes; and the road H had been cleared, running south from Junction Road to Burns Road.
13689. Had Burns Road been formed then? No, nothing; with the exception of what the owners had done.
13690. Had the work which had been done by the owners on Burns Road been carried right up to the point that road H came in? Yes, in a straight line.
13691. Am I to understand that the owners of the estate had done something right up to point H? No, up to about 30 chains.
13692. Then was not road H at this time a *cul de sac*? It was finished down to the junction of Burns Road.
13693. By the unemployed? Yes.
13694. Had this parallelogram of roads, shown in the middle of the plan, been done? No; they were not done at all.
13695. Do you know under whose instructions Junction Road had been cleared? I know nothing about it.
13696. Do you know under whose instructions road H had been cleared? I do not know.
13697. Do you know what action was taken as regards that letter of the 17th October, 1887;—was the work you recommended done? Yes.
13698. Who authorized it? I suppose the Board authorized it after I had recommended it.
13699. Do you know anything about the authorization of it? No; I do not.
13700. After you wrote this letter then you washed your hands of it? Yes; of everything.
13701. With that report you finished what you considered to be your duty with regard to the roads that you recommended? I was there once afterwards, to give a start to road E.
13702. Can I take it that you cannot give this Commission any evidence whatever to indicate who authorized the clearing of these roads H, G, and H, and the carrying out of the other recommendations you made? I can throw a little light on the way that the Junction Road was cleared.
13703. Can you throw any light on who authorized it? I think so. After Mr. Deering had charge of road A he gave instructions to Mr. Palmer to carry it south-easterly. It became a matter of impossibility to survey it through the Crown lands. He told him to survey it through private lands and to run roads on to the Crown lands.
13704. Is your evidence then that Mr. Deering gave the instructions? I won't say for those particular roads.
13705. It is necessary to be very particular on this point. I refer you to a minute of the Secretary for Lands of 5th May, 1887, which was sent on to Mr. Deering to report, and he said, “Mr. Palmer has already received verbal instructions”? Those instructions were some that Mr. Palmer got from Mr. Deering to go down south-easterly, and continue the road through private lands, tapping the Crown lands with cross roads.
13706. Will you look at a minute by Mr. Bennett, the Engineer-in-Chief, dated 8th February, 1888. You see the first paragraph:—“The roads from the main or Junction Road to the Peat's Ferry Road have been cleared at private cost by the owners of land on either side.” Are there any roads from this Junction Road G to the Peat's Ferry Road? If it refers to them, these roads on the west were cleared.
13707. Where is the Peat's Ferry Road on that plan. Is it east or west of the railway line? It is south-west and west.
13708. Is Junction Road G on the same side of the railway line as the Peat's Ferry Road? No; on the opposite side.
13709. Is it possible for there to be roads from Peat's Ferry Road to the Junction Road G, without crossing the railway line? They must cross the railway line.
13710. Can you understand that paragraph in any way, or do you think it is a mistake? It is a mistake; his intention was to convey that those three little roads in Hornsby township were cleared.
13711. But do those three little roads at the Hornsby township, which are not marked on this plan at all, communicate with Peat's Ferry Road? Yes.
13712. Is it not probable that Mr. Bennett was under some misapprehension when he wrote that paragraph? I think he must have been.
13713. Look at paragraph 3 of this same minute. Mr. Bennett speaks there of the “owners of the land, Messrs.

Mr. W. M. Gordon.

8 May, 1889.

Mr. W. M.
Gordon.
8 May, 1889.

Messrs. Burns, Withers, and Smith, having given five roads of access, which have all been cleared, so as to give access to eligible points for the continuation of roads at summits of ranges through the expanse of Crown lands." How many roads had they given, according to your recommendation? As far as I know, there are only three.

13714. Do you think Mr. Bennett made a mistake in putting five roads instead of three? No; I suppose the five roads were cleared all right when he was up there.

13715. Can you give me anything of the history of this part of the Vanceville Road to Billiard-street. Do you know who cleared that? I do not know. It should come under the Roads Department.

13716. I see Mr. Bennett speaks in paragraph 4 as follows:—"One of the other two cross roads recently cleared was to give direct access from the church and junction of the Lane Cove Road and Peat's Ferry Road, Pearce's Corner to the Crown lands." Do you know anything of what these other roads were that Mr. Bennett refers to? Road I and road H.

13717. Does Mr. Bennett's report touch road K and road G, or Burns Road in any way? I do not think there is any allusion to road K or road G, the Junction Road or Burns Road.

13718. Or the continuation of Burns Road in an easterly direction? No; I see no mention of it.

13719. Does it refer to the streets in this property marked George-street, Florence-street, Burdett-street, and so on? No. But I see he does make mention of the Junction Road.

13720. Do you know Mr. Dawson, a surveyor? No; I have heard of him.

13721. I mean Mr. C. B. Dawson, a licensed surveyor? I have never spoken to him in my life.

13722. Did you, during the time you were acting in connection with the Board, have any communication with Mr. Deering on the subject of these roads? No; I never had any communication with him.

13723. Did you consult him? We would talk about the roads, and the work I was doing sometimes. Just merely casually.

13724. Did you take your orders from Mr. Davies? Yes.

13725. When he wrote to you for anything did you do it? Unless it was something out of the way.

13726. Did Mr. Davies ever ask you to do anything out of the way? He never asked me to do anything out of the way, but only whether such and such a thing could be done.

13727. Did he manifest any particular anxiety as to this work being done? Not that I know of.

13728. Did you ever hear of any authority that Mr. Wells had, signed by Mr. Deering, as to the making of these roads? I cannot say I am sure.

13729. Did you ever hear anything about a missing document? I believe there was a paper about the clearing of these roads, but it could not be found.

13730. Did you see it? I have a faint recollection of it.

13731. Do you know whom it was signed by? I believe by Mr. Deering. I believe five or six roads were marked on it. I think I hunted my papers over for it, but it could not be found.

13732. Can the Commission take it that you believe that such a document once existed? I believe there was such a document.

13733. In the face of a positive denial on the part of Mr. Deering, who says there was not such a document, would you pledge your oath that there was? It is a difficult matter for me to state. I am only a servant under Mr. Deering. I think my evidence, before it is over, will answer that question.

13734. I do not want to get anything from you excepting what you believe in your conscience to be absolutely true;—have you any recollection of such a document as I have spoken about showing certain proposals for roads, and signed by Mr. Deering? I do recollect having seen it.

13735. Will you state to this Commission fearlessly without reference to the fact that you are a Government officer, recollecting your duty as a citizen, that justice may be done, what you know of this matter? Well, since the Casual Labour Board have had anything to do with it, I know nothing whatever that has happened between the owners and the Board. All I know is what I have done, and everything I have done you will see in print; anything further, I know nothing of.

13736. You indicated just now that before you had done giving your evidence I would be satisfied that there was some mistake somewhere? Well, there has been a lot of talk about the roads and who initiated them. You see in Mr. Deering's evidence that he states that I had no authority to do these things, The roads, I may say, were initiated by Mr. Deering. I was in the office early one morning, and he touched me familiarly on the shoulder, and said, "I have got some roads to do for Mr. Burns up there; it will not do either of us any harm, and we may as well set about it;" and there and then, that very morning, there was notice sent to my assistant, Mr. Palmer, to take up two gangs of men from Beecroft and the Field of Mars to start the work. I went to Mr. Kidman's and ordered the rations.

13737. Can you fix the date of that? No.

13738. Where did it take place? In the old building of the Lands Department.

13739. Was it early in the morning? At about a quarter past 9 o'clock.

13740. Was any one else in the room within hearing? I do not think so. I told the conversation that passed between us to my assistant.

13741. Who was that? Mr. Palmer.

13742. Where is he? He is a licensed surveyor in the city.

13743. What is his Christian name? Lynton C. Palmer.

13744. Is there anything in the office, or on record, of yours that will enable the Commission to arrive at the date of this? I think Mr. Palmer could give the date better than me. If the Casual Labour Board have got their books they will show the date that these men went up. I think they went up the day afterwards.

13745. Do you think Mr. Palmer could tell us who took the men up to do the work? He himself took the men up to Hornsby.

13746. Did Mr. Deering convey to you when he said, "I have some roads to do for Mr. Burns" that he had been requested by Mr. Burns to do them? I do not know whether he was requested by him, but I know Mr. Burns had seen him in respect to the disputed boundary which Mr. Perdriau and I had some dispute about.

13747. At this time was Mr. Burns Colonial Treasurer? I do not think he was.

13748. Do you recollect who was Minister for Lands? I think Mr. Dibbs was in power at the time. I fancy Mr. Copeland was Minister for Lands.

13749. Then, according to you, the initiation of Junction Road and these tapping roads, northwards, to the Crown lands, was the outcome of the conversation you had with Mr. Deering? They were the outcome of it. That was the start of the roads up there.

13750.

Mr. W. M.
Gordon.
8 May, 1889.

13750. Do you see on the plan a continuation of Burns Road, in an easterly direction, along some land of Burns, Withers, and Smith; then down south on the easterly boundary of the land, and then again east to the same point—where does that road go to? It joins on another road that comes out of a large lot of Crown land at the back.

13751. It does go to another road, then? Yes.

13752. Had you anything to do with that? No.

13753. Do you know anything of the country around it? No; I never knew it was made until I went out there with the Select Committee.

13754. Will you look at this petition [*Exhibit D5*]; read it, and tell me what part of Vanceville Road you think it refers to? I take it that it is the road from Lane Cove Road to Junction-street.

13755. Had you anything to do with this? Never.

13756. Had you anything to do with the repairs or improvements to that road? No.

13757. Did you ever see Mr. Burns on the estate? Yes; I was up there one day with Mr. Burns.

13758. Was anybody else with you? There was only Mr. Burns and myself.

13759. Was that whilst this work was going on? Yes.

13760. What was it about? About this road E.

13761. What about it? If he would give it. I recommended that it should be cleared, but there was some difficulty to get him to give it. I asked for that road because it was a main road right out to the reserve.

13762. Was that the only time you saw Mr. Burns? The only time I saw him on the ground.

13763. And the only conversation was as to road E? Yes. He came out to the Station.

13764. How did you know he was coming up? Mr. Davies sent me word that Mr. Burns would point out the road that he could give me if I could go to Hornsby with him on the Saturday.

13765. Did you ever see Mr. Burns in town, at his office or any other place, with reference to these roads? No; I believe that is the only time I met Mr. Burns. I believe this was the first and only time I met him.

13766. Did you ever see Mr. Withers or Mr. Smith? I never spoke to either of them.

13767. Do you see this road on the plan, marked George-street, running parallel to the railway. Was anything done on that road when Mr. Deering gave over supervision of the unemployed to the Casual Labour Board? I do not think there was.

13768. Did you have anything to do with that? No.

13769. Were these cross streets—Burdett-street and the other streets there—done by you? Nothing at all.

13770. Will you call out the letters of the roads from that plan that you had anything to do with or recommended? Road G throughout, D, E, F and J, HH, and I.

13771. Will you show me the tracing which you refer to in your letter of the 28th January, 1888, to the Chairman of the Casual Labour Board? Yes. This is a copy of it. [*Tracing put in and marked V 2.*]

13772. I notice that in that letter you speak of two roads, B and C, corresponding with B and C on this plan [*Exhibit D 4*]. Had you anything to do with these roads? Nothing whatever.

13773. How do you come to report on them to the Chairman of the Casual Labour Board in this letter? I only reported in a general way that they were practicable and fairly level.

13774. I see you say that it was "in accordance with a verbal request"? I was telegraphed to proceed and report on these roads.

13775. That letter was in consequence of a telegram received from Mr. Davies to meet Mr. Wells and Mr. Bennett, Commissioner for Roads. Did you meet them? I met them.

13776. From whom did Mr. Bennett get his information on this meeting as to the roads—from you or from Mr. Wells? Mr. Wells and I both pointed out the different roads.

13777. Do you know whether Mr. Bennett had been up there before? I cannot say.

13778. When you spoke, in the early part of your evidence, of the other roads that had been cleared some years ago,—what are the roads you referred to? Billyard-street, Smith-street, and Hastings-street.

13779. Do you know whether there was any cutting of timber for firewood up there? I cannot say.

13780. Will you look at a letter of J. W. Deering's, of 24th June, 1887, to the Chairman of the Casual Labour Board, as to a road from the spit, Middle Harbour, to Lane Cove Road;—Was that forwarded to you for report and tracing? I forwarded the tracing and the report.

13781. How? Through Mr. Deering.

13782. In that case you forwarded the report through Mr. Deering? Yes.

13783. And in all the other cases you communicated with Mr. Davies? Yes.

13784. Why was there an alteration in this case? Because in this case the request came straight from my superior officer. Professor Gurney had seen him about this.

13785. Have you any idea what led to your being called upon to furnish a report in January, 1888, as to these roads? I do not know what was the reason of it, I am sure, but I believe it was because something had appeared in some of the papers, or something of the kind.

13786. Can you say whether after your report in January, 1888, any further work was done by the unemployed there? I do not think there was anything done further than I have mentioned.

13787. Are you aware whether, after you had sent in your report, and after Mr. Bennett had seen the land, any further work was done there? Oh, yes.

13788. Considerable work? Oh, yes.

13789. *Mr. Waller.*] These roads that you said were made, previous to the Casual Labour Board going there, by the owners of the estate—can you tell me which they were? Billyard-street, Hastings-street, Smith-street, part of Burns Road, part of Florence-street, and part of Albert-street.

13790. When were these improvements made? Billyard-street, Hastings-street, and Smith-street were long before my time; these others have been made between this and four or five years.

13791. Do you know of your own knowledge when these improvements were made? I am positive about Hastings, Billyard, and Smith Streets. I am not positive about the others, because when I saw them the undergrowth was up 7 feet or 8 feet high.

13792. When did you first know about these improvements being made;—did you know before you were examined by the Select Committee? Yes.

13793. Did you mention it in your evidence? No.

13794. You knew of it at that time? Yes.

13795.

- Mr. W. M. Gordon.
8 May, 1889.
13795. Did you consider yourself as working under the authority of the Casual Labour Board? Oh, no. They could not command me to do anything.
13796. What position did you occupy? They came to me merely as a Government officer.
13797. Did you consider yourself placed at the disposal of the Board? Most undoubtedly I did by Mr. Deering. I should like to give you some proof of that.
13798. I will come to that in a minute;—how long were you at the disposal of the Board? Well, for two months I did a considerable amount of work for them. I finished a good deal of work that I had taken in hand.
13799. How long do you think you were at their disposal? My time was always at their disposal so far as advising was concerned. When I saw that the Crown lands were shut in I would say, "It would be advisable to clear a road through here as we have no road."
13800. Was Mr. Deering aware you were at the disposal of the Board? Most undoubtedly.
13801. If we have in evidence that he was not aware of it, and was greatly surprised that you were, is it true or is it false? It is as false as anything ever was. I have proof of him being with me at the works.
13802. Give the proof? We were clearing some Crown land at Dobroyd. We had to make a road there. He said, "Mr. Gordon, as you have started, you may as well complete it." I had charge of the unemployed down there making this road. When we got half way through the road, which I was trying to take as straight as possible from the Crown lands to the Military road, a private owner wanted it to run through his land. I was called on for a report by Mr. Deering. I think his letter was dated 20th July, 1887. I reported upon it. Because my report was not in accordance with this man's wishes, who wanted the road to go through his property, he called upon Mr. Deering, and wanted him to go and inspect the road. Mr. Deering telegraphed to me to come to the office. He told me he was going to meet Mr. C. Hays, of Manly, who was going to drive us over the ground. I said I would not go, but he persuaded me to go. When he got to the little church at the top of the hill he wanted Mr. Deering, in reference to a road which I was carrying out there, to carry it diagonally through some land of his. When we came down to Dobroyd, Mr. Deering gave me instructions to carry the road straight through Mr. Hays' property, after we had it half completed. I said I could not do anything of the kind, as the Casual Labour Board would have to be a party to it. I reported against it, and the Board carried out the idea which I had started. Is not that sufficient proof that Mr. Deering knew I had charge of some of the work?
13803. These returns, which were sent in for your salary, do they show what work you were engaged upon? Yes.
13804. When a surveyor sends in an application for his salary does the application report what he has been doing and where he has been doing it? No; we also send in a progress journal.
13805. Whom does it go to? Mr. Deering.
13806. So your progress journal would disclose where you and your men were working at the time? No; because I never sent a journal in all the time I was working for the Board. Afterwards it would only be an hour's work or a day's work for them.
13807. It would not disclose to Mr. Deering where you were? No.
13808. Mr. Franklin.] Here is a memorandum of the district surveyed by you; I want a schedule of the roads made through Burns, Withers, and Smith; does this give the actual quantity of road through Burns, Withers, and Smith's and the Crown lands; is it divided? No.
13809. Do 9 miles 69 chains represent the roads coloured red on this plan? No; that only represents the roads cleared by the Board. There are more on this plan than the Casual Labour Board has done. This was the plan for the proclamation of the roads.
13810. Is the schedule made for the Crown lands and Burns, Withers, and Smith's land too. Have you embodied the Crown lands? No; there is none of the Crown lands there at all.
13811. Is there Burns, Withers, and Smith's land here only? Burns, Withers, and Smith's and other property.
13812. Could we get a schedule of the actual roads cleared on Burns, Withers, and Smith's land? I would have to go out and do it; I have never been over most of this land.
13813. Then it will be necessary to resubmit this schedule to the District Surveyor? Undoubtedly.
13814. You cannot furnish me with the memorandum? I can only furnish you with anything in this plan. If you want it done, of course I can go up and do it.
13815. Do you think it possible, having taken evidence of the work upon the roads, by applying the works and their values to the total lengths shown on this schedule, I can get a valuation of the work on the estate? No, it could not be done from that.
13816. Does the 9 miles 69 chains shown to be cleared include the subdivision close to Hornsby railway station? It only shows what the Casual Labour Board has done.
13817. President.] Will you give me the lengths of the roads that are marked red on this plan (*Exhibit D 4*) on Burns, Withers, and Smith's land, indicating which are cleared, which formed, which gravelled, blinded, ballasted, and so forth? Yes; but there are other owners included in the return. There are cleared, 9 miles 69 chains; formed, 8 miles 78 chains; gravelled, 4 miles 6 chains; ballasted, 4 miles 27 chains.
13818. Who can give us the extent of the roads formed, cleared, and ballasted on the land of Burns, Withers, and Smith? Nobody could do it, excepting myself, because I hold the field-books.
13819. Can you supply it from the field-books? Yes; I could do that for you.
13820. Will you supply this Commission with particulars under similar heads to this, confined to the roads that pass through Burns, Withers, and Smith's estate alone? Yes.

THURSDAY,

NOTE (*on revision*):—Extract from my letter, No. 87-14, of 23rd July, 1887, to the Metropolitan District Surveyor:—
Sir,

In accordance with your instruction No. 1,775, of 20th July, 1887, to report upon Seaview-street in the parish of Manly Cove, county of Cumberland, as the best access to the Crown lands at Dobroyd, I have the honor to state that immediately on receipt of your instruction I proceeded to Manly, and have to report as follows:—

Firstly, that the unemployed are working under my directions, and have cleared, &c., &c. * * *

I have, &c.,

W. M. GORDON,
Government Surveyor.

The Metropolitan District Surveyor, Lands Department.

I quote the above as proof of evidence given by me in answer.

THURSDAY, 9 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

Lynton Charles Palmer, called in, sworn and examined:—

13821. *President.*] Are you in the Public Service? Not at present.
13822. Were you in the Public Service in 1887 and 1888? I was field-assistant to Mr. Gordon at that time. Mr.
L. C. Palmer.
9 May, 1889.
13823. Were you previously in the Public Service? I was in the Railway office before I was with Mr. Gordon. Some time in May, 1886, I think it was.
13824. How long did you remain with Mr. Gordon? Until August, 1888.
13825. Why did you leave? I left because I thought I could start on my own account as a licensed surveyor in the town. I thought I could better myself.
13826. Did your duties bring you much in contact with Mr. Gordon? Certainly. I was field-assistant to him.
13827. Do you recollect on any occasion having any instructions with reference to carrying out some work at Hornsby? Yes, certainly. At the time I was in charge of the unemployed at Beecroft, I received some instructions from Mr. Deering.
13828. When was that? In the month of April, 1887. I know it was whilst we were at Beecroft.
13829. What were those instructions? The instructions were to proceed to Hornsby and clear a road through blocks of Bellamy's, adjacent to the station. The road ran across the railway bridge. I received a tracing at the time showing a continuation of the road.
13830. Will you look at this plan (*Exhibit D 4*), and show me which of those roads you received instructions to clear? Road A. To clear it from Peat's Ferry Road to the eastern boundary right through and to continue it coming down in a south-easterly direction. I knew the country there as I was connected with the survey of Bellamy's boundary.
13831. From whom did you get your instructions? Mr. Deering.
13832. In writing? In writing and verbally.
13833. Was there anything accompanying them? There was a tracing.
13834. How far in the direction of road A going east would your instructions lead you to go? It distinctly stated to the boundary of Bellamy's, and from there as the country might permit.
13835. From there in what direction? In a south-easterly direction.
13836. What did you do? I finished the road through Bellamy's, and then my connection with the unemployed ceased. Mr. Deering gave them up, and we returned to our legitimate work.
13837. You mean you finished road A? Yes.
13838. Looking at that plan, and the road marked G on it, the Junction Road, and the cross roads D, E, F, can you say whether the plan that Mr. Deering gave you showed them in any way? It did not show them at all. It only showed a direction easterly from Bellamy's.
13839. On the plan that you speak of, were the roads B, C, D, E, and F shown? No.
13840. Was the road G shown? No, it was not.
13841. Did Mr. Deering ever give you any instructions to clear any of these roads? No. The road A was the first and only road I cleared.
13842. Do you recollect any conversation with Mr. Gordon at an early stage of this matter with reference to the roads in that district? Yes.
13843. What was the conversation? I was asking about some roads not shown on the plan proceeding in a south-easterly direction to strike the Great Eastern Road. He said I would have to go a long way up into the private land to get to the head of the different creeks to make it of any value.
13844. Was the name of any of the owners of the private lands mentioned? Most certainly; Mr. Burns' name was. He generally spoke of it as Burns, Withers, and Smith's land.
13845. Was Burns' name particularly mentioned? I cannot say.
13846. Did you see any document then, or have you seen any since, connecting Mr. Burns with the instructions you got from Mr. Deering? No; I cannot remember any.
13847. What became of the tracing you had? After I joined Mr. Gordon in the survey camp, I asked him what I had better do with it, and he recommended me to send it back, as we had carried out our instructions; so I sent it back to Mr. Deering.
13848. Under cover or with a letter? With a letter, if I remember right.
13849. Did you keep a copy of the letter? No.
13850. Did you place lines in a direction south-easterly? No; because I had only just finished road A. In fact, the last payment was on the clearing up of road A.
13851. *Mr. Waller.*] Why did you not go on with your instructions? When the charge of the unemployed went to the Casual Labour Board I returned with Mr. Gordon to the survey camp.
13852. That was before the appointment of the Board? Yes.

Charles Burford Dawson called in, and examination continued:—

13853. *President.*] Your evidence before the Select Committee had not been concluded when you were here last? No. Mr.
C. B. Dawson.
9 May, 1889.
13854. We will continue it? Yes.

Second day's evidence before Select Committee.

252. *Mr. Burns.*] You are surveyor to the estate of Messrs. Burns, Withers, and Smith, in the Lane Cove District? I am.
253. You have held that position I believe from the time of the estate being first purchased by them? I think so.
254. And any subdivisions which they may have made have been carried out by you? Yes.
- 255.

Mr.
C. B. Dawson.
9 May, 1890

255. You recollect my writing to you, I think in the early part of 1888, about an application from the Casual Labour Board, for permission to extend Junction Road, from near the station, through our land to the Vanceville Road? About twelve months ago I think— at the beginning of last year.
256. Did you in consequence of what I wrote to you proceed to Hornsby to survey the Junction Road and the cross roads leading into that road? I did.
257. Were you also acting for Mrs. Edwards, whose representative was in the Colony, she being at the time in England? I was.
258. Did I instruct you to survey this road at right angles as near as possible? Yes.
259. And also to survey what is known as the road leading down to Noonan's? Yes; along the boundary of Messrs. Burns, Withers, and Smith's land, and the land of Mrs. Edwards.
260. Did I make it a condition that the representative of Mrs. Edwards should give one half of the land for that road? Yes.
261. And you surveyed that cross road, taking half of the land from Mrs. Edwards and the other half from our property? Yes.
262. Had you any instructions to do any more than survey these roads for the unemployed? Nothing more.
263. Had you instructions at any time to make the subdivision of the area through which these roads are made? None at all.
264. Is there any subdivision on the eastern side of the railway except that adjoining the railway station? Not that I know of.
265. Of what does that subdivision consist? About 52 acres.
266. Have you at any time received instructions to make a subdivision of the land through which these roads have been made? Never.
267. Then if a statement has been made that these lands to the south of the Crown lands have been marked off by you in subdivision for Messrs. Burns, Withers, and Smith, that statement cannot be correct? It is incorrect.
268. Have I mentioned anything to you about our desire to sell this land in a block? You said something about selling the whole of the land in one block to a syndicate some time ago.
269. Without any thought of subdivision? Yes.
270. In your previous examination you made some statement about orchard blocks being made fitting in with the Junction Road? I think I was asked how I would subdivide the land, and that I said I would subdivide into 10-acre orchard blocks.
271. But you never received instructions to make such a subdivision? No, I was asked by a member of the Committee how I would subdivide the land. I think that was how the matter arose.
272. It was a mere speculation of your own? Yes. I gave my opinion as to the way in which I would cut up the land.
273. If it had been your own property? Yes.
274. Do you know how much land was given to the Government for roads by Messrs. Burns, Withers, and Smith? Judging from the plan, I should say from 29 to 30 acres.
275. Are you aware that Messrs. Burns, Withers, and Smith sold some land to Mr. Suliman, the architect, on the eastern side of the railway? Yes; there was a 4-acre block marked out there.
276. Do you recollect the price per acre paid? I think it was £100.
277. Did you not hear it was £125? I never heard that price mentioned. I understood that the price was £100.
278. Has there been any sale of land close to Noonan's lately? Not that I know of.
279. Have you heard of any land being sold in that district for less than £100 an acre within the last twelve months? No. I believe a piece of land was put under offer at Noonan's a short time ago at £200 an acre.
280. Not far from the platform, I presume? No. I think there was from 36 to 40 acres offered to a Company at £200 an acre I believe.
281. You have not heard of lands being sold in that district lately for less than £100 per acre? No.
282. What do you estimate to be the value of the lands which the Government have taken for these roads? I should think it would be at least £100 per acre.
283. Then there would be close upon £3,000 worth? Yes.
284. Have you been to Hornsby lately? Not lately; not since I laid out the roads.
285. Look at this statement of expenditure furnished by Colonel Wells, and countersigned by Mr. O'Donnell, the road overseer, purporting to give the expenditure upon the roads in the Hornsby district, upon the property of Burns, Withers, and Smith. I want first to call your attention to the road leading from Junction Road to Pearson's corner;— you know that road? Yes.
286. Have Messrs. Burns, Withers, and Smith any land along that road? Your land is on the north of it.
287. But have we any land adjacent to the road? No.
288. Then any expenditure upon that road would not come within the category of the expenditure in which we are concerned? No.
289. Do you know the road leading from the Junction Road over the railway crossing to the hotel? Yes.
290. Have Messrs. Burns, Withers, and Smith any land adjacent to that road? None.
291. In any estimate of expenditure upon the roads in which we are concerned the expenditure upon these roads would have to be omitted? Yes.
292. Are you aware that the boundary road has been extended through the subdivision at the station to the railway line? I have not seen it.
293. You will see in the list before you the continuation of Boundary Road to Burdett street;—do you observe the charge for the continuation of that road? Yes, £27, 294,

294. Then as to the road adjoining the railway station in the plan of the estate George-street, what is the expenditure there? £67 10s.

295. The land adjoining the railway line is the property of Messrs. Burns, Withers, and Smith? Yes.

296. And the extension of the Boundary Road to Burdett-street? That is on your land.

297. Messrs. Burns, Withers, and Smith had made a rough opening prior to the Government commencing to give work to the unemployed in that district;—this opening had been made through one or two streets in the subdivision? I think so, but I did not see them.

298. There had not been much expenditure there? There was an old man working there, but I do not know what he did there—very little, I should think.

299. If you look at the total of the expenditure shown in this list you will see that it is £2,309? To that there must be added something for culverts and some small bridges.

300. What proportion of the amount do you suppose would be chargeable to roads through the land of Messrs. Burns, Withers, and Smith, taking into consideration the fact that some portion of the expenditure is upon the old Vanceville Road? How much is expended upon the Vanceville Road?

301. Say about £262 10s.; that is partly for the opening of the new road to the back, and partly upon the old road. Both roads have been improved by this expenditure. Making the necessary exceptions what should you think would be the proportion of expenditure upon roads passing through our land? I should also have to deduct the expenditure upon Burns Road—that I think is outside of your land. That road was left a long time before you purchased the land. It was left in the Big Island Estate, about forty or fifty years ago.

302. I understand that Burns Road was laid out in the original sale of the property when it belonged to Mr. John Terry Hughes? Yes; it is just as old a road as the Vanceville Road.

303. I want you nevertheless to include that road in your estimate, because it has a frontage to our northern property. Including that what would be the proportion of expenditure in which we are concerned? About three-quarters of the expenditure, I should think.

304. That would be less than £2,000? It would be about £1,700, I suppose.

305. You have had large experience both as a surveyor and as a party concerned in properties;—do you think that Messrs. Burns, Withers, and Smith derive much benefit from the making of these roads through their property? I should say that the only benefit they would derive would consist of the amount expended in making the roads—that is, the amount actually spent. It must be borne in mind that they had given the land themselves. The expenditure upon the roads would be the actual value added to the estate.

306. Do you estimate that the lands given to these roads is worth more than the expenditure? Considerably more.

307. If it be a matter between the Government and Messrs. Burns, Withers, and Smith, do you estimate that Messrs. Burns, Withers, and Smith would gain any advantage as against the Government from this expenditure? I do not think so.

308. No advantage? No.

309. Do you think that the plan before you, No. 8 in the Appendix, signed by Mr. Deering, gives a fair conception of the proportion of Crown lands to private lands? Decidedly not.

310. Have you any idea of the area of Crown lands at the back of these private lands? Between 3 and 4,000 acres.

311. Yet by this plan the private lands are made to assume a proportion about as large as that of the Government lands? Yes; and there is another thing, the roads through the Crown lands are not shown. There are roads between the gullies continuations of the cross roads leading up from Junction Road.

312. Do you know anything about the Mistake Road? Yes, it was made in mistake for the Burns Road.

313. Do you know anything of the continuation of the Burns Road towards the Bobbing Rock Road? No.

315. You have not been there? No.

316. *Chairman.*] You wrote a letter, I think, a short time ago to the *Herald*, in which you stated that there was no subdivision of the Burns, Withers, and Smith estate to the eastward of the station? Other than that which I had already subdivided. I do not think I said that there was no subdivision to the eastward of the station.

317. Has not the subdivision left by you roads in it which have been made by the unemployed? Not that I am aware of.

318. You made the subdivision for Messrs. Burns, Withers, and Smith? Yes.

319. Look at the plan in front of you. You see that George-street runs parallel with the railway line;—is not that shown on your subdivision? Yes, George-street is shown.

320. You see from the plan that it is one of the roads which had been made by the unemployed? Yes.

321. Is not Burdett-street also shown in your subdivision? Yes.

322. And Junction-street? Yes.

323. Is not a portion of Hunter-street also shown? Yes.

324. The whole of these streets which I have named which have been made by the unemployed are shown upon the subdivision which you made? Parts of them. Burdett-street I take it as a continuation of Boundary Road.

325. But it is shown in the subdivision which you made? Yes.

326. You say that Mr. Burns wrote to you some time ago instructing you to go up to the estate and to lay out some roads? Yes.

327. So that you had the direction which the road should take in your own hands? Mr. Burns told me to leave the roads in the best possible places,

Mr.
C. B. Dawson.

9 May, 1889.

Mr.
C. B. Dawson.
9 May, 1889.

328. And you obeyed that instruction in consideration of the interests of Messrs. Burns, Withers, and Smith? Yes.

329. I suppose that, having regard to those interests, you left the Junction Road where it is, and also road E? I did not lay out road E.

330. You say that there was a mistake in connection with the Estate Road? It is not what I surveyed. They cleared Mistake Road, thinking it was Burns Road.

331. Then evidently that portion Burns Road was not cleared at that time? Burns Road was not cleared at that end.

332. You have spoken upon the expenditure upon these roads; as a matter of fact do you know anything absolutely as to the expenditure which has taken place? Only from the Schedule which I see before me.

333. You know nothing as to the expenditure beyond that? Nothing at all. I have not seen the roads since they were cleared and made.

334. You are unable to form any actual conclusion? I am.

335. You said just now that it would be a loss for Messrs. Burns, Withers, and Smith to have made these roads themselves? I do not think I said that. At the same time I do not think that there would be any advantage to them in having the streets made like this if they were not going to sell in subdivisions.

336. But suppose they were going to sell would they be of any advantage? If they could make use of them in that position they would certainly be of advantage.

337. Have you not placed the roads in a good position for subdivisional purposes? Junction Road is the only one we could make use of.

338. If you were going to subdivide the block would you not have to have more roads than those shown upon the map? Not necessarily.

339. Would you not for instance have to have more roads between the roads H and G? Of course, if the land were to be cut up into small blocks you would have to have more roads, but I suggested that it should be cut up into larger blocks—the land is not suitable for little 50 feet blocks.

340. You said in your previous evidence that the roads had improved the estate—do you wish to withdraw that statement? I think I said that the roads had improved the estate to some extent, but that they were of very little advantage. I think that is what I said. I think I said that the roads had improved the estate to the extent of the amount which had been expended upon them.

341. Will you look at the answer you gave to question 1852.

1852. *Chairman.*] As a matter of fact, does not every road on that property, with the exception of Mistake Road, improve the value of Burns, Withers, and Smith's Estate? To a certain extent, most decidedly.

Do you wish to withdraw that statement or to adhere to it? No; I adhere to that statement.

342. What is the exact meaning which you wish to convey when you state that the improvements to the estate are represented exactly by the expenditure upon the roads. Do you mean to say that notwithstanding that the lands were given by the owners the estate has been improved to that value? If I owned the land and left the streets through it, and spent a certain amount upon those streets, the value by which the estate would be increased would be represented exactly by the amount of money which I expended. I do not think I could give you any better idea of what I mean.

343. Suppose this block of land were your own, that you desired to sell it, and that you subdivided it—if you cleared and made roads you would expect the property to increase in value to the extent of the amount which you had spent upon the roads? Yes.

344. Then this property has increased in value to the extent of the amount which the Government has expended upon these roads? I suppose it has.

345. If the Government had made better roads upon the estate than would be made by private owners in their subdivision would not the value of the property be enhanced proportionately? To the extent of the cost of the roads, but of course you could make a road too good.

346. But as a general rule the more valuable the road is the more the property is improved? I should not expend more than a certain amount upon roads in a locality like this; I should not put down kerbing and blue metal, for instance; that would not be necessary. These roads will be only roads of access for the next fifty years.

347. Still the roads have improved the selling capacity of the land? To a certain extent, of course.

348. Have you had any communication with anyone concerning this estate since you were last before the Committee? No.

349. You have not seen any member of the syndicate? Oh, yes; but I have had nothing to do with the estate.

350. Have you been up to see it since you were here? No.

351. *Mr. Burns.*] Do you consider that these cross roads from Junction Road are of any advantage to the estate? No, certainly not; not those short roads.

352. *Chairman.*] What do these black lines shown upon the plan indicate? They are the boundaries of the allotments in the old Big Island Estate.

353. That is an old subdivision? Yes; I should say it was fifty years old at least.

354. *Mr. Millan.*] A good many of the questions you have been asked have been upon the basis of a certain supposititious subdivision. Now I want to bring you back to the original state of affairs. There is a block of 680 acres owned by certain people; there are Government lands to the north of it. We will take it for granted—I believe it is in evidence—that there was no intention on the part of the private owners to subdivide immediately. Indeed, it is a question whether the owners would have subdivided at all. I want you to put yourself in the position of these proprietors. Would you, knowing the difficulties

in

Mr.
C. B. Dawson.
9 May, 1889.

in which the Government were placed with regard to their property to the northward, have thought it to your interest to tell the Government that they could make any roads they liked in reason leading to their estate and that you would give them the ground you required for the roads? I should certainly make them resume. I would not give them any roads.

355. Suppose you were a little more patriotic than that, would you consider, taking these roads as a whole, which have been made by the Government, that they were roads which, in view of some future possible subdivision, were laid out in the best possible way? No; I think they are not.

356. I admit that there may be one or two unnecessary roads; but taking the bulk of them as necessary for access to the Crown lands, both from the junction at Hornsby and the Pearce's corner line, would you consider that you were compensated by the Government making these roads a little better than roads are generally made in such country—that is, would you regard them as a fair equivalent for the land which you had given? No; I do not think I should be sufficiently compensated; I do not think I should get the value of the land.

357. Your attention has been directed to the subdivision you made. Is it not a fact that when subdivisions are made in such country as this they are simply a sort of indication of roads made by trenches on each side marked by pegs, and in many instances scarcely cleared? They are very seldom cleared.

358. The roads are merely indicated? Yes.

359. Is it not a fact that all such roads and subdivisions are as a rule taken up ultimately by the municipalities or by the Government as settlement increases? Yes, in nearly all cases.

360. That is to say, whatever is done to the roads whether they are formed in an expensive or inexpensive manner the proprietors do not as a rule spend money in this way? I have never seen it.

361. *Chairman.*] But notwithstanding all that, you consider that these roads have benefited the private property of Messrs. Burns, Withers, and Smith? I adhere to the statement which I have already made.

362. *Mr. Burns.*] Which was that the property was improved to a certain extent? Exactly.

End of evidence before Select Committee.

13855. *President resuming.*] Was that evidence submitted to you for revision? Yes.

13856. Having now heard it, do you wish to make any correction or explanation? No.

13857. Is it true and correct in every particular? Yes.

13858. Then can the Commission take your evidence before the Select Committee, of 4th December, 1888, and 11th January, 1889, as correct? Yes.

13859. And adopt it as the evidence before this Commission? Yes.

13860. How long have you been a surveyor for Burns, Withers, and Smith? For about six years.

13861. Do you know all their land in that district? Yes; I surveyed it originally.

13862. Then you can speak with authority on it? Yes.

13863. Will you look at this plan [*Exhibit D 4*] and say whether, in your opinion, it correctly indicates, in a neutral tint, the land of Burns, Withers, and Smith? That indicates the land on the east side of the railway line.

13864. Do you think it is correct, as indicating the land owned by Burns, Withers, and Smith? Practically it is correct with the exception of a piece immediately adjoining Foster's, on the north; Mrs. Edward's, on the west; and Crown land, on the south. That also belongs to Burns, Withers, and Smith.

13865. Will you "hatch" it in pencil? Yes; I will.

13866. Will you look at plan [*Exhibit D 4*] and tell me whether the letters marked there to indicate the roads, correspond with the letters marked on this plan [*Exhibit U*]? Yes.

13867. Does road K pass through any land of Burns', Withers', and Smith's? No.

13868. Where does it lead to? It leads to the Junction Road, which is the boundary of Burns, Withers, or Smith's property.

13869. Does road I pass through their land? No; it leads to Junction Road, which is their boundary.

13870. Does part of road H, from Burns Road, in a southerly direction, pass through any of Burns, Withers, and Smith's land? No.

13871. Was this plan of subdivision, which I show you, prepared by you? Yes. [*Plan put in and marked W.*]

13872. Does that subdivision include only land on the eastern side of the railway? It extends to both sides of the line.

13873. Will you tell me, for our information, up to what point on plan [*Exhibit D 4*] does this subdivision go? Up to a point near road A, as far as Albert-street; then down south to the Junction Road, and from the Junction Road to a road parallel with the railway.

13874. Have you prepared any other plan of subdivision? None at all.

13875. Is there no other plan? No; nothing.

13876. Can you say whether the roads which are marked on that plan [*Exhibit D 4*] are shown on any plan of subdivision or any sketch plan of proposed subdivision you have got? None at all.

13877. What is the subdivision you refer to in your answer to question 318, before the Select Committee? The one you have just shown me.

13878. There is no other subdivision? No other subdivision.

13879. Did you ever see Mr. Gordon on the subject of the work done on this estate? No; I never saw him.

13880. Did you see Mr. O'Donnell? I saw him before laying out the Junction Road. He called at my office one morning, and told me the men were doing nothing, and that they wanted a road through the estate in lieu of Boundary Road. He said Mr. Burns had allowed him to lay it out. I went up next morning and laid it out in position. They had laid out the Boundary Road, but found that they could not get across the gullies, as it was very precipitous in places.

13881.

- Mr. C. B. Dawson.
9 May, 1889.
13881. Did the way you laid it out show the curious angle at the corner of roads C and G? When I started I started at the junction of roads G and D. The road up to that point had already been done. I did that previously for Mrs. Edwards.
13882. From where did you lay it? From the boundary.
13883. How far had you laid it out easterly? From the junction of roads G and D to the junction of roads G and E.
13884. When was road G laid out from the junction of roads C and G to the corner of the parallel road by the railway? That was done before I surveyed it originally—years ago. It was left in the old grant. It was done by the Government years ago.
13885. Cleared? Not cleared; simply surveyed.
13886. Then all you did this time when you went up at O'Donnell's request was to survey from the junction of the roads shown on the plan, G and D, to a point extending to the Great Eastern Road? Yes.
13887. I suppose at that time the Great Eastern Road had not been extended? No; and at the same time I gave O'Donnell the boundary-line of Mrs. Edward's property.
13888. Did you survey road E? No.
13889. Road F? No; I had no idea they were going to have a road there.
13890. Did you survey roads H, I, or K? I showed O'Donnell where the boundary-line of road H was. I did not survey the others.
13891. Do you know anything about this parallelogram of roads in the centre of the plan? I had nothing to do with it, but I can explain how it was done. The clearers came down south along road H, and found a peg, put in by Mr. Surveyor Boyle. They took it for the peg of the road, and ran the road at right angles, but could not make it fit. They asked me if there was not some mistake, and he knocked the men off, and cleared the other road afterwards.
13892. Then what would be the cause of the centre line through the parallelogram? There is no line there.
13893. Did you ever see Mr. Wells on the subject of these roads? I have seen him since the Commission.
13894. On what subject? He has brought the matter up at the Club two or three times, but I cannot recollect any of the conversation.
13895. You are members of the same club? Yes.
13896. Do you know Mr. Houison? No.
13897. Do you know Mr. Davies? By sight.
13898. Do you know Mr. Deering? By sight only.
13899. Have you ever spoken to him on the subject of the roads? No.
13900. Or to Mr. Palmer? No.
13901. Do you know, of your own knowledge, whether Burns, Withers, and Smith have given up any of the roads in their estate? I do not know that they have given any excepting the Junction Road, road G, road D, and road H. I only know simply through Mr. Burns saying he had given these roads.
13902. Mr. Waller. In answer to question 1736, before the Select Committee, you say: "I laid out a few streets for the clearers"? Yes, for the unemployed.
13903. By whose orders did you lay out these streets? By Mr. Burns. He instructed me to lay out two streets.
13904. Did you have any other authority excepting his? No other authority.
13905. Did you lay out any other streets or roads, excepting those you mention in answer to question 1736? No others, excepting those and roads G, D, and H, as far as the continuation of Burns Road.
13906. Did you see any of the unemployed working on this estate of Burns', Withers', and Smith's? When I surveyed the road they were ready to clear it. When I laid it out and came back in the evening they had cleared the scrub off.
13907. Did you see them afterwards? No; I have not been there after the unemployed cleared them.
13908. Did you know under what circumstances the unemployed were there? I had no idea.
13909. President.] Did you ever hear of any idea of taking a road diagonally in a south-easterly direction from the junction of road A to join the Great Eastern Road? No; I never heard of it.

Henry Prince called in, sworn, and examined:—

- Mr. H. Prince.
9 May, 1889.
13910. President.] Are you a partner in the firm of Prince, Ogg, & Company? I am.
13911. Is Mr. J. S. Jamieson a partner? Yes.
13912. Is he in the Colony at present? No.
13913. When did he leave? About two months ago.
13914. Do you know the date? No, I do not know the exact date.
13915. What vessel did he leave by? The "Zealandia."
13916. Do you know the month that he left in? It was in February, I am almost sure.
13917. Did he leave anybody here to represent him as his attorney? Yes, he has two attorneys. His eldest son, Melbourne Jamieson, and myself.
13918. Do you know anything as his attorney of his private business? No.
13919. Do you know whether he was a creditor of Sir Henry Parkes? I do not know.
13920. Is there anybody who knows sufficient of Mr. Jamieson's business to be able to give us information? I do not know.
13921. Were your firm of Prince, Ogg, & Co., creditors of Sir Henry Parkes? I believe there is a small amount against Sir Henry Parkes for goods supplied.
13922. Do you know the signature of Mr. J. S. Jamieson? Yes.
13923. Is that his signature to this Deed of Assignment? Yes. [*Deed of assignment for benefit of creditors of Sir Henry Parkes to Messrs. Allen, Palmer, and Dixon, marked X, for identification.*]
13924. Is this signature that of the firm of Prince, Ogg, & Co.? Yes.
13925. Is that the signature of Mr. Jamieson for Sir William Anderson Ogg? It is.
13926. Is that your signature, "Henry Prince"? It is.
13927. Whose is that, "Easton Mackie Ogg"? The son of Sir William Ogg, our partner.
13928. And the signature of Jno. S. Jamieson;—is that one of your partners? Yes. 13929.

13929. Mr. Jamieson has signed twice, and as attorney for Sir Wm. Ogg? It looks like it. Under the "Deed of Assignment Act" it is required that there should be the signatures of all the partners of a firm.

Mr.
H. Prince.
9 May, 1889.

13930. Then he has signed it once as a partner of the firm, and once in his individual capacity? I should say so, undoubtedly.

13931. Do you see in the schedule of creditors is Prince, Ogg, & Co., £209;—is that your firm? I suppose so.

13932. Do you believe that to be correct? I know Sir Henry Parkes did owe us a small amount.

13933. Do you see immediately below, "Jno. S. Jamieson, money lent, £1,400";—is that your partner? That is his name. I do not know whether Sir Henry Parkes owes him any money or not.

13934. Will you look at this memorial, dated 7th July, 1887 [*Exhibit S 1*]? Yes, that is my signature to it.

13935. Do you recollect who brought it to you? I believe that Mr. Murphy, of the Holt-Sutherland Estate, brought me that. I believe he brought me more than one.

13936. Are you a shareholder in the Holt-Sutherland Estate Company? I am.

13937. How many shares have you? I believe I hold thirty-two.

13938. Do you know whether your partner, Mr. J. S. Jamieson, is a shareholder? He was. I do not think he sold them.

13939. Did you ever hear of his getting some shares in which Sir Henry Parkes had some interest? No.

13940. Will you look at this memorial, 22nd September, 1887 [*Exhibit R 3*], and see whether you have signed that? No, my name does not appear there.

13941. Will you look at this memorial, 19th August, 1887 [*Exhibit I 26*] and see whether you have signed that? Yes.

13942. Is that signed by Mr. J. S. Jamieson? Yes; that is his signature.

13943. Will you look at this memorial, 10th May, 1888 [*Exhibit R 4*] and see whether you have signed that? No.

13944. Now will you look at these five memorials, two of which you appear to have signed, and three of which you do not appear to have signed, and say whether there is any resemblance in the writing? I should say that three out of the five are in the same handwriting, and that the other two are in the same handwriting.

13945. Did you ever have a memorial or petition presented to you by Mr. Murphy or anyone else which you did not sign? I do not remember.

13946. Did you make any inquiries as to the memorials of 7th July, 1887, and 19th August, 1887, which you did sign? I read them through and spoke to Mr. Murphy on the subject, to the best of my recollection.

13947. Can you say whether you signed them off-hand or whether you made any inquiry? I spoke to him on the subject.

13948. Did you know what your were doing? I knew perfectly well.

13949. What were you doing? I was signing to have men put on to make roads which I understood from Mr. Murphy were Government roads.

13950. Were you asked by Mr. Murphy to get any other signatures to the memorial? I was not.

13951. Can you recollect whether it was left in your office or brought to you and taken away afterwards? I believe it was left with some of the fellows about the place. Mr. Murphy and I are old boating friends, and he does not stand on any ceremony with me, but walks in and out of my office, and has done for years.

Edward Percy Simpson called in, sworn, and examined:—

13952. *President.*] I believe you are a member of the firm of Want, Johnson, & Co., solicitors? Yes.

Mr. E. P.
Simpson.
9 May, 1889.

13953. Are you solicitors to the Holt-Sutherland Estate Land Company? We have had no business from them lately; but I consider we are their solicitors.

13954. Were you ever asked to sign any petitions or memorials in connection with the construction of roads on the estate or in the district? Yes.

13955. Did you sign any? Well, from my recollection, I think I signed one, but declined to sign the others. There were some roads I thought necessary. If my recollection is correct, I signed the petition for those I thought necessary, and refused to sign it for the others.

13956. Do you think you signed any? I think I signed one.

13957. Do you recollect who brought you that one? I think it was Mr. Moloney, of the Holt-Sutherland Estate office. I think so, but I am not certain.

13958. Who is Moloney? He is a clerk in the office, and also secretary to the National Park Trustees.

13959. Have you any idea what the memorial had reference to? I could not say for certain. I think it had reference to the main road from Tom Ugly's Point to the National Park, but I signed in a great hurry, without carefully reading it.

13960. I will put before you all the petitions and memorials we have been able to discover amongst the papers of the Casual Labour Board or other departments, and I will ask you to say whether you recognise any of them as having been presented to you for signature? I could not do that.

13961. Will you look at memorial dated 7th July, 1887 [*Exhibit S 1*];—have you signed that? No, I have not.

13962. Have you any recollection of the memorial which is for doing some work on the main Illawarra Road being presented to you? I could not carry my recollection back two years to recognise any petition, because they were presented in an off-hand kind of way. I could not do more than generally swear that there were certain petitions presented to me for signature which I refused to sign, but that one petition I did sign.

13963. Will you look through this memorial of 7 July, 1887, and see whether any of your partners or of the clerks in your office have signed it? I do not see any of them. There are none.

13964. Will you look at the memorial of the 19th August, 1887 [*Exhibit I 26*] and tell me whether you have signed that? No, I have not.

13965. Is that signed by any members of your firm? Yes; I see it is signed by Mr. S. A. Want.

Mr. E. P.
Simpson.
9 May, 1889.

13966. Is that signed by any gentlemen, who at the time were clerks in your office? Yes; by Mr. Pinder, Mr. Dalton, S. A. Geddes. I am not certain about the initials of the other gentlemen, but I know Mr. Pinder's signature. I do not see any other names.
13967. Will you look at this memorial dated 22nd September, 1887 [*Exhibit R2*], and say whether you have signed that, or whether any members of your firm have signed it? I have not signed it. Mr. S. A. Want has signed it. I see the name of Mr. Moriarty; that is a clerk in our firm. Mr. Salwey, Mr. Bucknell, Mr. Geddes, and Mr. Dalton are clerks. I see here the signature of G. W. Ash. We have a clerk named Ash in our office. There is also the signature E. S. Daniell; he is also a clerk in our office; but I do not know about the initials of these two names.
13968. Is not J. H. Potter a clerk in your office? I do not know.
13969. Was he in September, 1887? I do not know.
13970. Was W. T. Davey a clerk in your office? I think a clerk we have is named Davies, but I am not certain.
13971. Then we may take it with regard to Moriarty, Salwey, Geddes, Dalton, Daniell, and Bucknell, you are certain, but of J. H. Potter and W. T. Davey you are not sure? I am not certain about Potter, and I am not sure whether our clerk is named Davey or Davies.
13972. You see that that memorial is really a memorial of S. A. Want and the clerks in your office? Yes.
13973. Were you aware of this before? If I had refused to sign it myself I would not have let my clerks sign it.
13974. Were any of these gentlemen you speak of articulated clerks? Bucknell, Salwey, Geddes, and Ash were. I think Moriarty was just out of his articles.
13975. Who were Dalton and Daniell? Daniell was a bill clerk; Dalton was a general clerk.
13976. Now, will you look at this memorial, dated 22nd September, 1887 [*Exhibit R3*], and see whether you signed it, any member of your firm, or any clerks in your office? I see Mr. Want has signed it; also, Daniell, Potter, Davey, Moriarty, Ash, Salwey, Geddes, Bucknell, and Dalton. I also see C. Stephens. We had a clerk of the name of Stephens, but I am not sure of his initials. I have not signed it myself.
13977. Do you think that C. Stephens is a clerk in your office? We have a clerk of the name of Stephens. In all probability, seeing that his name follows those of the other clerks, he is the same Stephens as we employ as a messenger.
13978. Will you look at this memorial, dated 10th May, 1888 [*Exhibit R4*], and see whether that is signed by you, by any members of your firm, or by any of your clerks? I see it is signed by Mr. Want, but apparently not by any of the clerks, nor is it signed by myself.
13979. Now, having looked through these memorials carefully, have you any recollection of ever having been asked to sign them? I have a recollection of having been asked to sign certain petitions for the construction of roads on the Holt-Sutherland Estate, but as for identifying these particular petitions, I could not do it, because it is two years ago, and I do not suppose I looked at them for more than a second or so, and I did not read them. Being told what they were for, I declined to sign them without reading them.
13980. Are you a shareholder in the company? Yes. I have about eighty-six shares.
13981. Why did you decline to sign these memorials that were presented to you? I declined because I did not think that in the interests of the public the roads were necessary.
13982. You say that Mr. S. A. Want signed several of them;—did he ever discuss the matter with you? He did not.
13983. Did he give it any independent consideration? I cannot tell you.
13984. How many clerks have you in your office? We have about thirty altogether.
13985. Then we have about a third of them in this memorial? You have ten of them; that is including Potter, Davey, and Stephens.
13986. Do you know anything about some shares that were originally Sir Henry Parkes', and which were transferred to your firm? I only know of the transaction in consequence of having been referred to in the matter.
13987. Were you the member of the firm who attended to it? No, I was not.
13988. Do you recollect any question arising as to the ownership of a re-issue of shares that you thought your firm was entitled to? Yes.
13989. Do you know whether any person ever waited upon you in reference to that for the purpose of getting the shares from you? No. All I can tell you is from what took place between our late Accountant, who is now dead, and myself. The circumstances were shortly these. It became necessary for the Colonial Mutual Society to take up a mortgage that existed from Sir Henry Parkes to Mr. Woodhouse, and in consideration of their so doing, we gave the Colonial Mutual a guarantee to the extent of the money so advanced. In consideration of our doing that, these shares in the Holt-Sutherland Estate which then belonged to Sir Henry Parkes were handed to us to protect us against the contingent liability we were under. These shares were in the custody of our Accountant, Mr. Pinder, and I ascertained from him that he delivered them—at a time when the Company was creating a new issue of shares—to the Secretary of the Colonial Mutual Society, who, I subsequently found out, delivered them to Mr. Jamieson. My clerk was wrong in handing them over in the first instance, because no one had a right to them but ourselves, and the Secretary of the Colonial Mutual Society was wrong in handing them to Mr. Jamieson, but he did so, I understand, because he thought Sir Henry Parkes was entitled to the new issue of shares, as the shares were only held as security, and the fresh issue had to be got out in his name. He handed them to Mr. Jamieson as he thought under authority from Sir Henry Parkes, in order that the new issue might be got out in Sir Henry Parkes' name, the old shares to be delivered back and remain again as security in the manner they were first lodged. We communicated with Mr. Jamieson, telling him that we held the old shares, and that we also thought we were entitled to the new shares, and asked that he should deliver up to us the new shares that had been issued in proportion to the old shares held in Sir Henry Parkes' name. Mr. Jamieson did not think he was bound to do this, and said that he was entitled to them. I believe they had, in some way, been transferred to him by Sir Henry Parkes. Finally, the matter ended by our agreeing to refer the matter to some independent person. After we had arranged that, I think I had to go away somewhere, and when I came back I found Mr. Jamieson had made arrangements to go to England, and, therefore, the matter has to stand over until he comes back again.
13990. Then it is still an unsettled matter whether this new issue of shares, which we are told were four, should be handed to you or retained by Mr. Jamieson? Exactly.

13991. Did Mr. Jamieson ever see you about it? No; he never saw me about it. He went to the Secretary of the Colonial Mutual Society, and the Secretary came up to our Accountant. Knowing that they were interested, and thinking the thing all right, and also expecting that the new issue would be returned to us in conjunction with the old, the shares were given over, but the new issue was never given to us.

Mr. E. P.
Simpson.
9 May, 1889.

13992. Did you ever communicate with Sir Henry Parkes on the matter? No, I did not; for the simple reason that at this particular time, Sir Henry Parkes had assigned his estate, and, I think, got a release, and under the circumstances, he practically had no interest in the shares. The trustees would have been the only people we could have communicated with, because they would have been entitled to go to the Colonial Mutual Society and pay off all liability, in which case our responsibility would be at an end, and we should be bound to deliver them any securities we held to cover our contingent liability.

13993. Do you know the Holt-Sutherland Estate well? Yes; very well.

13994. Then I suppose when you were asked to sign these memorials, and did not consent, you brought your knowledge of the estate to bear on the matter? I did.

13995. Have you been out there since these roads involved in this inquiry have been constructed? Yes; I go out every fortnight.

13996. You know their position on the estate fairly well? Yes.

13997. Do you think from your knowledge of the locality that all these roads that you have seen, some cleared, some cleared and formed, some cleared, formed, and made, or ballasted, were constructed in the interest of the public? I think there are some roads on that estate that were necessary. I think the main road from Tom Ugly's Point to the Park was a necessary road to construct. I think the main road running through the estate to the Coronulla Beach, near where the Government have some 1,500 acres reserve was a necessary road, because lots of the public come down to Coronulla Beach, which is a lovely place, and there was really no access before these roads were made. If the Noxious Trades are to be centred at Kurnell, the road leading to Kurnell would have been justifiable, but all the offshoots from these roads ought not to have been constructed.

13998. *Mr. Franklin.*] Were you under the impression that the road was made to Kurnell? No. I said I thought the road to there would be justifiable. But some of these roads go a certain distance to Kurnell but do not go on. I think as far as any road goes to Kurnell it is a reasonable road to make.

MONDAY, 13 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

Charles Nicholson Jewel Oliver called in, sworn, and examined:—

13999. *President.*] What position do you now hold in the public service? I am one of the Railway Commissioners.

Mr. C. N. J.
Oliver.

14000. You were at one time Under Secretary for Lands, I believe? Yes.

14001. Were you examined before the Select Committee of the Legislative Assembly appointed to inquire into the work of the unemployed on the Hornsby and Holt-Sutherland Roads? Yes.

13 May, 1889.

14002. Is this your evidence? Yes.

Evidence before Select Committee.

1855. *Chairman.*] You were until recently Under Secretary for Lands? I was.

1856. Whilst you were occupying this position, had you anything to do with the proclamation of roads, or the surveying of roads by any officer of your department, on the land situated at Hornsby, owned by Burns, Withers, and Smith;—had you any connection with them as an officer of the department at all? The only connection I remember having with the question of these roads was the opening of a road from the Crown lands to the Hornsby station, which crosses a bridge, and is marked on the map before me as road A.

1857. Do you remember who was Minister at that time—was Mr. Copeland the Minister for Lands then? I think he was.

1858. What was the object of that road? In order to give access from the Crown lands to the station, or to the vicinity of the station.

1859. Does it go from Crown lands to Crown lands, as a connecting-link between two portions of Crown lands. There are Crown lands to the west? It affords a means of communication across the bridge to the station, such as would not exist had that road not been made.

1860. Do you, as an officer of the department, remember anything as to the origin or completion of any other roads? No; I know nothing about these road matters, other than what I have mentioned.

1861. Had your department anything to do with any of these roads in any way? No.

1862. You would have known if it had? Yes. I am of course, aware of the object of the Committee in this inquiry; but I had nothing to do with the making of these roads.

1863. Had proposals for any of these roads to come before you? In a general way. There were a number of subdivisions of Crown lands being carried out at the time, and I was always strongly of opinion, which was shared, I think, by the Minister of the day and by officials in the department, that it was a good thing to lay out the roads to a certain extent in the subdivisions, to clear them.

1864. *Mr. Copeland.*] On the Government subdivisions? On the Government subdivisions.

1865. *Chairman.*] You are not speaking of roads on private lands? No; there were no instructions given by me about such roads; I had nothing to do with them.

1866. Mr. Deering in his evidence yesterday spoke of you, Mr. Burns and himself being present at Hornsby;—do you remember any such occasion? Yes. Some question had been raised as to the upset price placed on Crown lands being excessive, not only the price placed

Mr. C. N. J.
Oliver.
13 May, 1889.

placed on the Hornsby subdivision, but on some other lands, notably Manly Cove, and I had occasion to speak to Mr. Burns on the subject. He was at the time doing some portion of the work appertaining to the Minister for Lands. I was strongly of opinion that these upset prices were not excessive. They had, however, been recommended by me without my having seen the land, acting on the reports of the officers of the Department. In order to make myself satisfied as far as I could that the prices were fair and reasonable, I determined to visit the land, and on that occasion I was accompanied by Mr. Burns. The day turned out very wet, it was raining all the time, and I was simply able to make just a running inspection of the Crown lands. I then noticed that some roads had been made, I thought in a way that was unnecessary.

1867. *Mr. McMillan.*] Do you mean on the Crown lands? I am not prepared to say whether on the Crown lands or not. Some of the roads were metalled or metal was being put upon them.

1868. *Chairman.*] That is on the Burns, Withers, and Smith's property? I do not know. That can be determined by some one better acquainted with the locality.

1869. Do you think they were in the interest of the Department? I do not think that in subdivision of this kind roads need be made in such a substantial manner; but that is a matter of opinion. The upset prices, which were pronounced by Richardson and Wrench to 50 per cent. above the value of the land, were exceeded by 100 per cent., and even to a greater extent; so it must be considered whether those roads, made in the way I thought unnecessary, did not materially enhance the value of the land, and bring about this satisfactory sale.

1870. Was Mr. John Davies with you on this occasion? Yes.

1871. Why was he with you? I do not know. He was not with me. He may have come up to make some inspection of the work done by the unemployed.

1872. Was there any mention made of roads on the Burns, Withers, and Smith's estate? It was suggested that some other roads should be cleared. I do not quite recognize the road I refer to on this plan, but it was a road which would have given more direct communication to the station than the road A. I looked at it, and I saw that it was not on the Crown lands. It ran along the railway line.

1873. Did it run parallel with the railway line? Yes; and fronted private lands. I could not see that there was any necessity to clear that, and I would not consent to its being cleared at the Government's expense. Whether it has been since cleared or not, of course, I cannot say.

1874. *Mr. O'Sullivan.*] You say that when you were inspecting the roads with Mr. Burns, Mr. John Davies standing near you, you were under the impression that the roads were on Crown lands; you were not quite certain whether they were on Crown lands or not? I did not say that. When I was speaking of the roads being metalled, or ballasted, I think the question was asked whether they were on Crown lands, and I said that that could be determined by others better informed. I made a very hurried inspection, and I was not in a position to particularise the roads on Crown lands or on private lands.

1875. Did you notice that on the Crown lands there were roads cleared? Several roads were cleared.

1876. Would you be surprised to hear that those metalled roads are on the lands of Burns, Withers, and Smith? Well, I cannot say that I should be surprised to hear it; but it is something new to me. I could understand Burrs, Withers, and Smith's land being bounded by a macadamized road, forming a common boundary; but I cannot understand that there was any necessity to have metalled roads passing through private property. Of course there was no reason why road A should not be made properly. I believe that it was stipulated that the road should be properly made when the land was given.

1877. *Chairman.*] Were any other roads so stipulated for? No; not to my knowledge. This is the only road that formed the subject of correspondence. The papers would show that it was agreed that it should be made available for vehicular traffic.

1878. *Mr. O'Sullivan.*] Then, notwithstanding your refusal to agree to this road being made parallel with the railway line, from road "A" to the Junction Road, you find that it has been made? I am not aware whether it has been made or not. I have never been on the land since.

1879. But if it has been made, and if it has been metalled, ballasted, and culverted, you regard that as a work for which the public have no right to pay? I distinctly said at the time that it was not necessary.

1880. You were Under Secretary for Lands, and the superior officer of Mr. Deering; do you know Mr. Gordon, the surveyor? Yes.

1881. Was Mr. Gordon supposed to act under the orders of Mr. Deering—Mr. Gordon is a surveyor acting under Mr. Deering? Yes; he would be, in connection with this survey. I see that the plan is signed by Mr. Gordon, so that he would be acting under Mr. Deering's directions.

1882. Were the services of Mr. Gordon ever lent by you to the Casual Labour Board? For a time, I believe.

1883. *Chairman.*] Were his services placed at the absolute disposal of the Labour Board? For a time, I believe, Mr. Deering had something to do with the unemployed.

1884. *Mr. O'Sullivan.*] But after Mr. Deering gave up the control of the unemployed, were the services of Mr. Gordon supposed to be available by the Casual Labour Board? Yes; they were for a time. I could not say for how long, but for some time—perhaps two or three months.

1885. If Mr. Gordon recommended the making of certain roads, should that recommendation have gone through you or Mr. Deering;—should he have reported to his superior officer? I should think so.

1886. Did the fact that Mr. Gordon was working for the Casual Labour Board relieve him of the necessity of reporting through his superior officers? Not that I am aware of. He may have made reports in that way. 1887.

1887. During the time that he was working with the Casual Labour Board he was supposed to be an officer of your Department? Certainly; he was paid by the Department.
1888. Therefore, it was his duty to report through his superior officers? I should think so; I am not aware that he received any instructions to the contrary.
1889. Then if he has recommended that these roads should be made and metalled and ballasted, and has not reported so through you or through Mr. Deering, he has done so in violation of the rules of the Service? I should hardly like to say that he had so acted, for this reason, it was rather an unusual position to place an officer in. He was an officer of the Department of Lands, lent occasionally to assist the Casual Labour Board, because he was not wholly engaged in connection with the unemployed, and it might so happen that he would make a report of that character and send it direct to the person in charge of the unemployed, without sending it through his official head, and at the same time having no intent of committing any breach of the Regulations, though he would be actually guilty of doing so. I have a very good opinion of Mr. Gordon as an officer, and I should be loth to say anything that would prejudice him. I do not think he would do anything of the kind intentionally; that is to say, I do not think he would have any desire to withhold from his superior officer anything he might do, or any desire to do anything on his own responsibility, of which he might think that his superior officer would not approve.
1890. *Chairman.*] What you wish to imply is this—that having had his services placed at the disposal of the Casual Labour Board he felt in the position of a man with two masters? Yes; he would probably find himself in that position, and might report directly to the Casual Labour authorities without any reference to his superior officer.
1891. *Mr. O'Sullivan.*] Still the proper course would have been to have sent his reports through you or Mr. Deering? Yes.
1892. And if he had taken the proper course and recommended these roads, which you say are unnecessary, the probability is that you would have vetoed them in the public interest? I do not think I said that any roads were unnecessary. I think I said that the roads were being made in a way that I thought unnecessary.
1893. Take the road running parallel with the railway line? I should not have approved of that.
1894. You would have vetoed that? Yes.
1895. Or any other road which you thought was not required in the public interest? Yes. I would like to make it perfectly clear. As a matter of fact, I did object to that road running parallel with the railway being made. The only roads in reference to which I was consulted were the A road, and the road running along the railway line. I think the papers will show that I recommended that the former should be made, and I am quite satisfied that it was the proper course to pursue, even if we had to buy the land; but for this road running parallel with the railway I could not see any business necessity for it, and I only had to deal with it as a matter of necessity in regard to the opening of that road when we had to sell the lands. Those are the only two roads upon which I was consulted.
1896. *Chairman.*] All the rest you know nothing about? No.
1897. *Mr. O'Sullivan.*] Kindly refer to road D and H, which is cleared, ballasted, and fitted with all the accommodations of civilization—supposing all the other roads had been allowable, for arguments sake, if Mr. Gordon had recommended road D and H would you have endorsed that recommendation? No.
1898. Kindly look at road I;—would you have endorsed that road if Mr. Gordon had recommended it? I think not. I am speaking without a very accurate knowledge of the locality, so I must be guided by this plan. The road seems not to end at any particular locality. From the map, too, it appears to end at a church.
1899. During your term of office I believe there were a great many Crown lands cut up for subdivision, and roads made through them—at Heathcote and other places? Yes.
1900. When you subdivided these lands and laid out streets, did it ever enter your head to metal them and make channels and culverts? No; I think the very best subdivision the Department ever made was the Field of Mars.
1901. And the most expensive? Yes.
1902. And did the Department metal the streets there? In some portions; but that was a very extensive subdivision. The first sale realized £64,000.
1903. They ballasted the streets there? Ballasted some of them.
1904. And did they cut channels and make culverts? Yes.
1905. That was all upon Crown lands? Yes.
1906. And that is the only instance you can call to mind? I am under the impression that there was something special done at a place called Harbord at the back of Manly—to give some access there.
1907. *Mr. McMillan.*] I suppose you find it rather difficult to reply to some of the questions, not knowing the whole character of the country? I tried to convey to the Committee that I really do not know the locality well. I do not think that I was more than two and a half hours on the ground, and it was raining nearly all the time. I travelled from the railway station along the line to road A, and then crossed on to the Crown lands, returning to a point on the railing line, so that, as a matter of fact, I do not believe I was on the property of Burns, Withers, and Smith at all.
1908. You saw the Crown lands to a certain extent? Yes.
1909. You recognized here the principle of putting a road through private land for the purpose of opening communication with Crown lands? Yes.
1910. Suppose that your officer had reported to you that it would take £10,000 to make that Boundary Road, as against £2,000 or £3,000 for the Junction Road; suppose that he said that the only way to enable the people on the Crown lands to get at the railway station was to cut roads north and south, would it not alter your view of the position of affairs to

Mr. C. N. J.
Oliver.
18 May, 1889.

Mr. C. N. J.
Oliver.

13 May, 1889.

a certain extent? I can tell you all about this Boundary Road now. I remember the circumstances. The question was raised as to whether it was possible to make this Boundary Road suitable for vehicular traffic at anything like a reasonable cost, and a report was made, I think, by an officer of the Works Department, to the effect that it was not possible to make a road without going to very great expense, but that in another position, some short distance away, the natural formation of the land was such that a road could be made at a comparatively small expense. Whether or not the Junction Road is the road I am not prepared to say.

1911. Taking it for granted that the impassibility of the Boundary Road is caused by gullies running north and south, which have to be crossed, would it not be clear to you that the occupants of the eastern portion of these lands would have to find their way to the Pearce's Corner railway by roads running north and south;—would it not be the policy of the Department, as far as your experience goes, to make an outlet under certain circumstances? We should endeavour to provide every reasonable means of access to Crown lands. If there was a railway station, for example, at both ends of the Crown lands, we should endeavour to provide access to both of those railway stations.

1912. Looking at this plan, you can see that one portion of these Crown lands has its natural outlet at the Hornsby railway station, and that another portion would probably have its natural outlet at the Pearce's Corner line. What I want to know is this: Taking this explanation I have given to you with regard to the configuration of the land, which is borne out by officers of the Department, would it be a very unusual thing to make roads to meet the convenience of the public land which you were proposing to sell? No; it would not be unusual. I know of instances where efforts have been made to purchase very considerable length of road through private property—not a question of only making the road, but of buying the land and making the road afterwards.

1913. So that practically you are in this position, that while you had to do with road A, and gave your opinion about the road running parallel with the railway, you are not in a position to give any general opinion as to what roads should be made for the purposes of communication at the present time? No; the question was never submitted to me. I think the papers in the Lands Department will show that, in connection with a subdivision known as the Gordon subdivision, it was proposed to make a very large purchase of land running through a private estate for the purpose of affording reasonable access.

1914. The principle is not a new one? No. It would follow, as a matter of course, that had that purchase been completed the road would have been made. I am not, however, aware whether the purchase has been completed.

1915. Then, judging from your previous remarks, it does not necessarily follow, from your condemning the metalling and ballasting of certain roads, that you would not have approved under some circumstances of other roads being ballasted; that is to say, you are not in a position to say that some of these roads might not be recommended for ballasting in other portions of the estate if they went through private property? It would have been an exceptional course to pursue.

1916. It is exceptional? Yes.

1917. When you speak of a road you mean a road simply formed so as to be available for ordinary traffic? Yes. I gave an instance where the Department did actually ballast the roads—at the Field of Mars.

1918. But that was all on your own ground? Yes.

1919. Then, taking the explanation I have given you as to the necessity for roads through the main block of the Burns, Withers, and Smith property, in order to give access to the Pearce's Corner railway, do you think that roads simply formed without any ballasting would be sufficient for the purpose? I think so.

1920. *Mr. Street.*] You have referred to a conversation which you said took place when you were on the ground with reference to this particular road? Yes.

1921. Was Mr. Burns present during that conversation? I think he was. I could not say positively whether he heard the conversation.

1922. *Chairman.*] With whom were you talking? Mr. John Davies.

1923. *Mr. Street.*] Do you remember whether Mr. Burns took part in the conversation? I am inclined to think he did not. If I remember rightly, I simply said, "I did not consider it necessary to clear a road along the railway land," and I continued to walk on towards the station, and the conversation terminated. It was not pursued any further. Whether Mr. Burns or Mr. Davies had any conversation afterwards about it or not I do not know. My conversation was with Mr. John Davies.

1924. You have no recollection of Mr. Burns offering to you any reasons why the road should be formed? I do not think he did. I do not remember it. It was, I think, proposed by Mr. Davies. The question was raised by Mr. Davies as to whether this road running parallel with the railway should be cleared, in order to give more direct access to the railway station.

1925. *Mr. Copeland.*] Access from where? From the Crown lands. The access afforded by road "A" is across the bridge; whereas the access that would have been afforded by this other road, had it been cleared, would have been more direct. You would not have had to cross the line. There is no doubt it would have been a better access; but I did not consider that, in the interests of the Crown, it was necessary for merely sale purposes to clear that road.

1926. You have no recollection then of Mr. Burns taking any part in the conversation about the clearing, and urging reasons why it should be done? No.

1927. *Mr. Copeland.*] With reference to the formation of that road "A," do you remember whether I took any Ministerial action in the matter; it was stated by Mr. Burns that these roads were originated by me during the time I was in office;—do you remember the question being dealt with? There was a general instruction given. You will probably remember that

that great interest was taken at the time you were in office in these subdivisions, with a view of making them as attractive as possible to the public; and there was a general direction given referring not only to these subdivisions but also to various other contemplated subdivisions as to the making and forming of roads. That was a general decision affecting the making of roads through subdivisions.

Mr. C. N. J.
Oliver.
13 May, 1889.

1928. Through our own subdivisions? Yes, I remember that minute; but I cannot find it in the papers before the Committee, which do not to me appear to be complete.

1929. Do you say that Mr. Burns was acting for the Minister for Lands at the time when he was out with you on these lands at Hornsby? No; I said that previously I had occasion to refer to Mr. Burns while he was acting for the Minister for Lands; but he was not acting for the Minister for Lands at the time he was out with me.

1930. Can you fix the time when he was acting for the Minister for Lands? There would be some difficulty, because he acted once or twice, or even more frequently.

1931. For what period, roughly speaking? It was in the early part of this year that he acted.

1932. That was during the time that Mr. Garrett was Minister? Yes; I think I went to inspect this land early in July this year.

1933. You then saw a number of roads which you deemed were unnecessary in the interests of the Crown? I did not say that the roads were unnecessary, but the way in which they had been ballasted.

1934. And culverted? Yes.

1935. Looking at this map, and bearing in mind that the Crown lands lie to the north of the Burns, Withers, and Smith property, if the work of the unemployed had been under your control, would you have permitted the unemployed to make all the roads you see marked on this map at the Government expense, with the view of improving these Crown lands? Expressing an opinion from the information conveyed by this plan, I should have to state that I could not allow the work to be carried out.

1936. Would you not rather have expended the money in making roads through your own Crown lands? My endeavour would have been to make the Crown lands as attractive as possible.

1937. Exactly, not to make the private lands attractive? Not to make the private lands attractive.

1938. Can you remember any instance in any of the Government subdivisions where some like £5,000 or £6,000 has been expended in making roads through adjoining private property? Small sums have been expended.

1939. That is in obtaining a road of access? Yes.

1940. This road you refer to at Gordon, was that a road of access from Crown lands to Crown lands? Yes.

1941. Being in that respect somewhat similar to this road "A"? Yes; but much more extensive. I think the price asked for the land was something like £200 an acre.

1942. And was it the intention to purchase the whole block of land, or merely a small strip for a road? Merely a road. I am not in a position to state that that intention was carried out. I know it was proposed.

1943. But that was merely a road of access from valuable Crown land to — ? To the railway—Pierce's Corner railway.

1944. If it had been suggested to you while you were Under Secretary for Lands that all these roads through the Burns, Withers, and Smith estate were to be cleared and grubbed, the roads formed, and about 4 miles of them metalled, culverted, and drained, would you have given permission for the Government to expend money in making those roads? I should not have recommended such a course.

1945. Would you have permitted it? I would not have permitted it either. I should like to qualify my reply, in consequence of something Mr. McMillan said in connection with his question that proved, from a business point of view, that it was desirable to give access to the railway at either one of two points. It would become a question for consideration, as a mere matter of business, whether or not a road should be made through private property.

1946. *Chairman.*] A "road," but would you say "a number of roads?" Certainly not. I only mention this to make myself clearly understood. I do not know anything about the land of Burns, Withers, and Smith.

1947. *Mr. Copeland.*] You are aware that to the north of the Burns' estate there is a vast area of Crown lands, none of which has been sold? I believe that is so.

1948. Bearing in mind that none of this land has been sold, and that it is described as exceedingly rough, and that it has not been even surveyed or designed, would you feel justified in expending money in making and metalling these roads to give access to Crown lands that have not even been designed for subdivision? No.

1949. You are aware that there was a subdivision of Crown lands at Hornsby; do you think that the making and metalling of these roads, and the spending of money upon them, was likely to give very much increase to the value of this subdivision near Hornsby? No, except to the extent I have just stated; it might afford a better means of access to the railway.

1950. Would not these lands derive their value more particularly by reason of their close proximity to the railway? And ready access to it. For instance, the road to the railway station, which is a continuation of the Boundary Road, is one which might have been made.

1951. Would you also have approved of the roads to the south of that road—the T-shaped roads? I would have approved of a road being opened to give communication to the railway station, at the eastern end of the Crown lands.

1952. You would not have approved of roads parallel to it to the south? Certainly not.

1953.

Mr. C. N. J.
Oliver.
13 May, 1889.

1953. Are you aware whether any Government money was expended in forming and ballasting the roads through the Government subdivision at Hornsby? I was over a portion of that land, and the roads have been formed; but I could not say whether or not they have been ballasted, because I am not sufficiently acquainted with the locality to say positively whether a particular road was on Crown land or private land.

1954. Speaking in general terms, would you consider it judicious management if the bulk of these roads on the Burns-Withers property were cleared, formed, metalled, and culverted, and that as soon as you got on to the Crown lands adjoining no such work was done, but that the roads were merely cleared; would you consider that a judicious expenditure of public money? No; I should consider that if roads of a superior quality were to be made, they should be made on the Crown lands.

1955. Do you remember Mr. Burns making an application to have some land alongside the railway on the western side declared a reserve? An application was made by Mr. Burns, under the 11th clause, to purchase a piece of land containing 10 acres, intervening between the freehold of the applicant and the existing road.

1956. What was done in connection with that matter? That application was made on 30th September, 1884.

1957. What was done with regard to it? After investigation, it was disposed of by Mr. Secretary Garrett, in a minute, dated 4th March, 1887, to the following effect:—"I decide that the portion adjoining the recreation ground be temporarily reserved for future public requirements, and that the subdivision of the other part of the design be proceeded with. I approve of the proposed reserve." That was a reserve for a Court-house.

1958. But the application to purchase the 10 acres was refused? Yes.

1959. The Government had a subdivision of Crown Lands, consisting of this and other pieces of land adjoining the railway station at Hornsby;—do you see amongst the papers a letter from Mr. Burns, asking to have that subdivision withdrawn, and for the land to be declared a reserve? I find a letter from Mr. Burns, dated 19th November, 1886, in which he draws attention to the fact that there is a proposal to sell the reserve at Hornsby, situated on the western side of the Peat's Ferry Road, between the land of Burns, Withers, and Smith and the Hornsby Land Company, with an area of 20 acres, exclusive of an area set apart for a Public School; and he goes on to state that it will be impolitic to sell this reserve, as it is the only block of Government land near the junction fit for public recreation purposes.

1960. That block of land was subdivided, was it not? It was.

1961. And ready for sale;—do you see any minute there, or any estimate by Mr. Deering as to the value of the land per acre? Yes; he writes to this effect—"Nearly all the reserve is of a rocky and precipitous character, with the exception of a level area of about 10 acres beside the Hornsby railway station, and fronting the main road to Peat's Ferry. This frontage is worth not less than £2 per foot, and the total area of 10 acres is worth £3,000."

1962. What action did you, as Under Secretary for Lands, take on that application? I simply submitted it for the decision of the then Minister for Lands, Mr. Copeland, the facts being fully set out in the report.

1963. And my decision was that the application should be refused? Yes; and not to suspend the subdivision of land from sale.

1964. By looking at the papers you will see that Mr. Garrett subsequently dealt with the case, Mr. Burns having written to him after I left office. I wish to see what action you took in regard to this second application? Mr. Burns wrote, under date 15th December, 1886, acknowledging the receipt of a letter dated the 11th of the same month, inquiring where the reserves in question—that is, the reserves referred to in the letter of the 11th—were situated, as he felt sure they were unknown to the local residents.

1965. And making a further application, I suppose, to have the subdivision cancelled? Not in this letter.

1966. Will you read Mr. Copeland's minute dealing with Mr. Burns's proposal to have a reserve for public recreation made at Hornsby Junction? This is the minute:—"Mr. Burns, M.P., may be informed that sufficient provision has already been made for reserves in this neighbourhood; but should the public interest require it, further provision will be made. At present I see no reason for withdrawing the portion referred to from subdivision.—H.C., 7/12/86." The effect of that minute was communicated to Mr. Burns on the 11th. On the 15th he wrote a reply to the effect I have already quoted.

1967. What further action was taken? Mr. Burns's letter of the 15th was referred to Mr. District-Surveyor Deering for report, and Mr. Deering in his report explained the position of the land which he, in his former report, referred to as being available for recreation purposes, and upon that report Mr. Secretary Garrett gave his decision on the 4th March, 1887, which decision I have already read.

1968. Then Mr. Garrett, on the 4th March, reversed the decision which I had given in the previous December, refusing to withdraw the land from subdivision? He did not altogether reverse your decision.

1969. But, as a matter of fact, the 10 acres of land which Mr. Deering valued at £3,000 were applied for by Mr. Burns while I was in office to be reserved for recreation purposes? Yes.

1970. And I refused that application? Yes; on the ground that there was already sufficient reservation for the locality. The case came forward for further consideration, and it was decided by Mr. Garrett that these 10 acres of land should be temporarily reserved for future public requirements.

1971. But has it not been gazetted as a recreation reserve? The papers I have in my hand do not disclose the fact that the reservation was made, although Mr. Secretary Garrett approved of the temporary reservation of these 10 acres.

1972. Withdrawing them from sale? They were not advertised for sale.

1973. They were subdivided? No; it was proposed to subdivide them. The matter was in hand. Mr. Copeland's decision was in December, and before it was acted upon, Mr. Burns, four days afterwards, wrote a reply that brought the matter forward for review, and it was carried on then until the March following, when Mr. Secretary Garrett gave the decision which I have read to the Committee. That was on the 4th of March, 1887. I may say that the action I took in this matter as Under Secretary for Lands was purely of a formal character, and I notice scarcely a minute of mine throughout these papers.

Mr. C. N. J.
Oliver.
13 May, 1889.

1974. Do you think the papers are complete? I think not.

1975. *Mr. O'Sullivan.* Are any of these missing papers pertinent to the present inquiry? I do not know. I cannot say that any papers are missing. Mr. Copeland stated that the reserve had been made. I say that if the reserve was made there are no papers here to show that it was so, and, therefore, to that extent the papers are incomplete. But the absence of these papers, even supposing that they are lost, would not be in any way material, because the *Gazette* notice is the authority as to the disposal of the land. The Executive minutes are simply something leading up to that action.

1976. If this reserve had been made, would it have had a tendency to increase the value of Burns, Withers, and Smith's land? It would have improved the locality generally, and I have no doubt would in that way have given additional value to their land.

1977. Would it have had the effect of removing from the market a piece of land that would otherwise have competed with theirs when their property was open for sale? Certainly. It would have had the effect of reducing the land available for the purposes of alienation.

1978. If the owners of this estate had laid out and started would the Government have been justified in taking the work out of their hands and making the roads themselves? No.

Charles Nicholson Jewel Oliver, recalled and further examined, 5th December, 1888:—

1997. *Mr. Copeland.* You have had an opportunity since you were last here of looking at the papers in this case? I tender a plan with the object of being able to reply to questions put by you to me yesterday. [*Appendix, plan 7.*] It is a plan showing the Crown lands on the western side of the railway line at the Hornsby station. At the northern part of the plan there is a public school site of 2 acres, with a paddock of 3 acres 3 roods 31 perches. This public school site was dedicated on the 13th October, 1881. That action was taken as usual in cases of the nature at the instance of the Department of Public Instruction. Subsequently portion 234, more immediately in the vicinity of the Hornsby station, containing 2 acres, was also dedicated for a public school at the request of the same Department. There is a portion of land on this plan, between Bellamy's land and the Peat's Ferry Road, of irregular shape, containing about 10 acres. It was originally applied for by Messrs. Burns, Withers, and Smith, under the 11th section of the Crown Lands Alienation Act of 1861, as intervening between their property and the Peat's Ferry Road. This application was approved of. It was, however, subsequently refused, and it was proposed to subdivide the land and to sell it by auction.

1998. On what ground was the application of Messrs. Burns, Withers, and Smith refused? The 11th section. Application was refused upon the ground that the portion of land was such as should not be sold under that section—that is, having regard to its situation. It was, however, perfectly legitimate that an application under that section should be put forward. I think one portion of the section states specially that it applies to land intervening between the property of the person applying and a road—that is to say, the intention of the 11th section was to enable the person who, by some change in the direction of a particular road, had been severed from his proper frontage to recover it.

1999. Had this land ever been severed from the other property? I fancy that it had. I am not prepared to speak definitely upon the point. There are indications in the papers that the course of the Peat's Ferry Road had been diverted—that it was not originally in the position in which it now is. This application, however, under the 11th section, was, as I have already said, refused. Subsequently it was suggested by Mr. Burns that this land should be devoted to public recreation. That suggestion was not adopted, upon the ground that there were ample grounds in the locality. It was, I believe, represented that the land was worth £2 a foot, and that its total value was something like £3,000.

2000. That is for the 10 acres? Yes.

2001. By whom was the case dealt with? By Mr. Secretary Copeland, who decided to refuse the application for the reservation, and that the land should be subdivided and sent to auction. A further letter was received from Mr. Burns, as I think I explained yesterday, on the subject of the reservation of this land for recreation purposes, inquiring where ample provision for those purposes in the neighbourhood had been made, as he was not aware of their existence. That led up to the proposed subdivision of this area with some other land adjoining being reconsidered, and it was decided by Mr. Secretary Garrett that the portion of land shown upon this tracing as reserve 47, and that portion of land intervening between Bellamy's land and the Peat's Ferry Road should be reserved for future public requirements. A question was asked yesterday as to whether the reserve had been notified in the *Government Gazette*. I answered that the papers did not disclose it. That led to a question as to whether the papers were complete. They are complete, I find, because no such reserve has yet been made. There was simply an approval of the reservation.

2002. Then the reservation has not been gazetted, although it has received Ministerial approval? That is so.

2003. What has become of the school site to the north? It still exists. It was, I presume, applied for before it was known where the Hornsby station would be; and the site of the station having been determined, it was natural that the Department of Instruction should apply for a site in the vicinity of the station and where population would be likely to settle. That is the explanation I should give of the existence of the two sites without knowing the exact circumstances.

Mr. C. N. J.
Oliver.
18 May, 1889.

2004. You say that the Department of Public Instruction applied for the second site? It applied for both of them.
2005. *Mr. Brunker.*] What is the distance between the two sites? They are about a quarter of a mile apart.
2006. *Mr. Copeland.*] You have a reserve made on the opposite side of the road for a court-house? Yes; it was made on the 7th January, 1888. It formed part of the 10 acres applied for—I mean the portion of land applied for by Messrs. Burns, Withers, and Smith—under the 11th section of the Crown Land Alienation Act of 1861. It formed portion of the land which Mr. Burns afterwards suggested should be devoted to recreation purposes.
2007. This piece of land applied for as a reserve would give half a mile of frontage to the Peat's Ferry Road? Yes, about.
2008. The reserve for the police-station and court-house formed a portion of the reserve? Yes; a part of 47.
2009. What area is there in that reserve? Roughly, I should say 31 acres.
2010. Which was the land withdrawn from subdivision? A portion of land which I have described as part of the reserve 47, edged green, and a piece of land intervening between Bellamy's grant and the Peat's Ferry Road, not embraced in portion 233, dedicated as a site for a court-house and a police-station.
2011. The site dedicated for a court-house and police-station would give 1,000 feet of frontage to the Peat's Ferry Road? I would rather call it approximately 16 chains, as by this plan.
2012. But it would give you 1,056 feet? Yes, if exactly 16 chains.
2013. The land being valued at £2 a foot? That is Mr. Deering's valuation—not mine.
2014. I suppose that if any of the land were worth £2 a foot, portion 233 would be worth that amount? Yes.
2015. On account of its width and proximity to the railway station? Yes.
2016. Do you know what the piece of land for the hotel realized? I do not.
2017. This balance of 31 acres 3 roods 1 perch was withdrawn from subdivision at the instigation of Mr. Burns for a recreation reserve? I cannot say that. I know that Mr. Burns drew attention to the fact that necessity existed for reservation for recreation purposes, but the Lands Department reported against it.
2018. But the portion coloured green on your tracing has been subdivided for sale? Yes; and is now approved for reservation for future public requirements; subdivision was not proceeded with.
2019. Do you know whether Messrs. Burns, Withers, and Smith provided any reserve in their subdivision? I do not know anything about their land beyond the fact that it is in the locality.
2020. I suppose you do not know whether there has been any Government expenditure through the unemployed upon the roads upon the western side of the railway line? I do not know. I should like to make a slight explanation in connection with my evidence yesterday, which is strictly correct, although it may not be fully understood. It will be remembered that I said yesterday that I should like to see a plan of the Government subdivision. In order that I might fully understand the position of the land, I have consulted the plan which I have now before me. The plan handed to me yesterday, upon which I gave my evidence, showed a somewhat detailed subdivision of the land of Messrs. Burns, Withers, and Smith, but only showed the Crown lands known as the Hornsby subdivision in colour, without any subdivision at all. I was questioned as to having been on this land on a certain date. I had visited the land, as I had explained, for the purpose of satisfying myself as to the upset price. A question was then asked me as to my knowledge as to some roads made through the land of Messrs. Burns, Withers, and Smith. I endeavoured to indicate from the plan then before me the direction in which I travelled over this land. I did so approximately, showing that I travelled in a northern direction. I can now fully explain the direction, and I think that it is material to my evidence as showing its value in regard to anything done upon the land of Messrs. Burns, Withers, and Smith. Coming across the bridge over the railway line from the road marked A, I travelled up what is known in the Hornsby subdivision as King's Road. I followed nearly the whole length of that road down through the subdivision on to what is known as the Boundary Road, and by that road I went back to the station, going very little, if at all, upon the land of Messrs. Burns, Withers, and Smith. I make this statement simply because I was examined as to the roads through their estate. My evidence as to the value of those roads can be taken only as an expression of opinion formed from the papers before me yesterday. I think that it is proper that I should make this explanation as any one inspecting these two plans will see that they convey quite a different impression to an observer who is not fully acquainted with both of the portions of land referred to.
- 2021-2. With reference to the road marked A, have you been able to detect any ministerial action taken with respect to exchanging a piece of land to the northward for that road? I have not been able to trace a ministerial decision, although there was evidence that one was given. The Committee can very well understand that I cannot give great personal attention to the matter, but I have done the best I could to trace this decision. I would suggest that one of the record clerks, or someone in the Lands Department, should be subpoenaed to produce the papers.
2023. Mr. Burns stated in Parliament that the making of these roads originated with me (Mr. Copeland); I had nothing to do with any of them except this one road marked A, and even that road does not appear on the papers to have ever come before me, but it was agreed by the department while I was in office that this piece of land should be taken in exchange for a piece of land further to the northward in order to give access from one portion of Crown lands to the other. That seems to be all the action taken in connection with this estate during the time I was in office? I have no doubt that the arrangements made in regard

Mr. C. N. J.
Oliver.
13 May, 1889.

regard to that road were approved of by you. The records, as far as I have inspected them, show that. It goes without saying that it was a desirable road to make. It was the best access we could obtain from the railway to the Crown lands; besides it immediately connected two blocks of Crown land. In fact, it would have been a desirable arrangement to make even if we had had to pay a large sum of money for the road.

2024. *Chairman.*] In saying to-day that you had been on only a small portion of Messrs. Burns, Withers, and Smith's property, do you wish us to understand that you desire to correct any of your evidence in regard to the road running parallel to the railway? Not at all; my evidence in regard to that road is quite in accord with what I have just stated. I wanted the Committee to understand that I knew nothing about the roads further to the south.

2025. *Mr. Brunker.*] Was any action taken by the Department of Lands in connection with the making of these roads? None, except with regard to the road marked A. I think I said yesterday that the understanding when the road was given to the Government was, that it should be cleared for vehicular traffic, and formed—that is to say, that the road should be made.

2026. The Hornsby subdivision shown on the plan before you was done at the instance of the department? Yes.

2027. Had the roads been cleared when you were there? Such of the roads as I went over were cleared. My visit to the land was early in July last. I have not the slightest idea of what has been done since. It was very nearly two months before the land was sold that I visited it.

2028. *Mr. Copeland.*] At the time of your visit, were the unemployed working upon the property of Messrs. Burns, Withers, and Smith? That I could not say: as I explained yesterday, I was only a short time on the ground; it rained heavily, and it was Saturday afternoon; I saw no persons at work.

2029. *Mr. Brunker.*] Has it not been the practice of the department to clear these roads before offering the roads for sale? It has been of late.

2030. But not before the unemployed question cropped up? A general decision was given some time during Mr. Copeland's term of office that steps should be taken to make the land as attractive as possible, and that roads should be cleared. I think I am correct in stating that in the case of one subdivision the clearing was done by tender, but in other instances, after the unemployed question cropped up, the clearing was done by the unemployed.

2031. Before that, was it always done by tender? On one occasion only, and then on my own recommendation; we cleared some land at Liverpool. It was before the unemployed question cropped up. It was a special sale of land, and the land was in the immediate vicinity of the railway station.

2032. Does your experience enable you to say that this clearing of roads has had a beneficial effect? I am certain that it has.

2033. *Mr. Copeland.*] I suppose you know that we have large areas of Government subdivisions still uncleared, and upon which roads have been neither formed or metalled. I am aware that there are very large areas upon which roads have not been cleared.

2034. In no case have the roads upon these large areas been formed, even although they may have been cleared? In one or two exceptional cases roads have been metalled or ballasted, I believe, but it is not the practice.

2035. Have there not been, therefore, plenty of avenues of employment for the unemployed in improving our own Crown lands which have been subdivided for sale? I certainly think so.

2036. So that there was no need to employ the so-called unemployed upon private subdivisions merely with a view to find them employment? I think there was plenty of employment for the unemployed on our own lands. I may say that if my evidence has been taken as being favourable to this work being done by the unemployed, I should like to state at once that I think it is not at all desirable that work of this character should be done by the unemployed, if it is possible to avoid it. In my humble opinion such work would be better carried out if it were done by tender.

2037. *Mr. Brunker.*] You know the position of Mr. Burns' land relatively to the Crown land? Yes, from the plan.

2038. Do you think the construction of roads through the Burns, Withers, and Smith Estate in any way assisted the sale of the Crown lands? Some of them may have done so to this extent—they would give the surroundings a better appearance. They must of necessity have made the land more attractive. I think I mentioned yesterday that the Hornsby sale was really a successful sale; but whether the success was brought about by the way in which these roads were made it is hard to say. I can scarcely express an opinion upon that point, but I do know that the prices realized were high—that they were in excess of the prices put on the land on my recommendation, and far above the price which those experienced auctioneers Messrs. Richardson and Wrench said the land was worth and would realize.

2039. *Mr. Copeland.*] Don't you think that the metalling of roads upon our own subdivisions would have made our own land more attractive than the metalling of roads on the land of other people? I think so, if that has occurred.

2040. *Mr. Brunker.*] Do you think these roads were necessary as roads of access? Not all of them. Without an inspection of the land, I am not prepared to say that some of the roads leading up from the railway in different directions are not desirable for access, but it does not require an inspection of the land to enable me to say that all of these roads are not necessary.

2041. Do you think that reserve 47 is necessary in the interests of future public requirements? My opinion is that that is a piece of land which should not be sold, and I will briefly

Mr. C. N. J.
Oliver.
13 May, 1889.

briefly give my reasons. Assuming that Hornsby will someday become a populous place, sites for the usual public buildings will be required, and if the Government were to sell this land they would afterwards have to resume a portion of it for these sites, probably paying very dearly for it. From a public point of view, therefore, I think it would be unwise to sell that land. I do not say that it will all be required hereafter for these public purposes, but we know from experience that fatal mistakes have been made in selling land surrounding railway stations and other places where public requirements necessitate areas being set apart for different purposes.

2042. *Mr. Copeland.*] Could not this reserve for a court-house have been taken out of a portion of reserve No. 47, instead of such a valuable portion of land as portion 233 being used for the purpose? I will not go into the question of the value of the land, because I do not admit your valuation; but I do not think it is a desirably-shaped portion of land to set apart for a court-house and police-station.

2043. Would it not have been better to have taken a portion out of reserve 47? That might have been a better arrangement.

2044. *Mr. O'Sullivan.*] Were you present at the sale of Crown lands at Hornsby? No.

2045. But you have been over the Hornsby subdivision? Yes.

2046. What portion has been sold? Everything indicated on this plan except the portion tinted red.

2047. Can you tell me whether the better part of the land has been sold? That must be left to public competition. We offer the whole of the land, and it is fair to assume that when people buy they buy the best portion.

2048. Do you know the character of the country remaining unsold? I cannot speak of my own knowledge. If you look at this plan you will see that the unsold portion is somewhat hilly.

2049. Bearing that fact in mind, do you think that if the roads J, I, and A had been constructed, sufficient access would have been given to the Crown Lands? I stated a moment before that I was not in a position to say absolutely whether these roads were necessary; but if by the roads you mention access were given to the railway line, I should say that reasonable access to the Crown lands would be provided.

2050. The roads I have named, in addition to road H, you will observe, strike the railway line and a public road at four different points;—should you not consider that reasonable access? Yes.

2051. You consider the Crown land sale a satisfactory one? Yes.

2052. The total amount realized was £4,300? I am not sure about that. The reason I say the sale was satisfactory was this: That the upset prices placed upon the land upon my recommendation were pronounced by well-known auctioneers, Messrs. Richardson & Wrench, to be from 25 to 50 per cent. in excess of the value of the land, while the land brought, as a matter of fact, from 50 to 100 per cent. more than the upset prices.

2053. Accepting the aggregate amount of the sale as £4,300, and bearing in mind that £6,000 had been expended to achieve that result, should you consider the result a satisfactory one? I should not; but I am not aware that £6,000 has been expended in connection with the formation of roads with the view of developing these Crown lands.

2054. Are you aware that it is the practice of the owners of private estates to subdivide land and to lay out roads prior to sale in order to give an increased value to the land? Yes.

2055. If you had been the owner of these Crown lands, and had seen that your neighbours to the south were laying out roads, would you have come in and relieved them of the expense of doing it in order to give access to your own land? I think not.

(*End of Evidence before Select Committee.*)

14003. *President resuming.*] Was that evidence submitted to you for revision? Yes.

14004. And having now heard it read, do you wish to make any explanation or correction? It is generally correct.

14005. Do you recollect the time when you were up at Hornsby with Mr. Davies and Mr. Burns? Yes; it was in July of last year, so far as I can remember.

14006. Were you up there more than once? Only once.

14007. Were you ever up there on any other occasion? I have been up there since, in my capacity as Railway Commissioner.

14008. Can you say whether at the time you went up there, when Mr. Davies and Mr. Burns were present, Mr. Burns was a Minister? He was Colonial Treasurer.

14008½. You speak in one place in your evidence before the Select Committee, that you had occasion to refer to Mr. Burns when he was acting Minister for Lands—what Minister was he acting for? Mr. Garrett.

14009. Not Mr. Sutherland? No. Mr. Burns acted for Mr. Garrett.

14010. Do you know whether Mr. Burns acted for Mr. Sutherland as Minister for Works? I do not recollect.

14011. How long were you connected with the Lands Office before you gave up your position? Between twenty-three and twenty-five years.

14012. So that your experience was considerable? I was eight years Under Secretary for Lands.

14013. Is it an exceptional practice, or otherwise, to metal and ballast roads such as those at Hornsby? It is an exceptional practice, as far as my experience goes.

14014. I am speaking of your experience? Yes; it is exceptional.

14015. Were you ever asked in your official capacity, on any other occasion, as to these roads? No; on no other occasion.

14016. Do you recollect whether Mr. Deering was up there on any occasion that you were present with Mr. Burns? Yes; he was up on that occasion.

14017. Will you kindly look at plan [*Exhibit D 4*], and tell me what road you mean in your evidence before the Select Committee, as the road running parallel with the railway? I refer to the road marked George-street on the plan.

14018. Do you recollect any conversation you had with Mr. Deering, specially with reference to that road? I cannot recollect any particular conversation. Mr. C. N. J. Oliver.
14019. Do you recollect Mr. Deering and yourself walking apart from Mr. Davies, and your asking him something about who the land belonged to? I remember asking Mr. Deering at one time during the afternoon, but I do not think we were discussing this particular road, as to the propriety of clearing it. I asked him, during one portion of the afternoon, whether it was Crown lands that fronted that road. He told me that it was not Crown land that fronted it. I am under the impression that the conversation took place when we were up at the other end of the land, and before the question was raised as to the desirability of clearing that land. The conversation with Mr. Davies took place at the lower or south-western part. I walked on, when I said I did not consider the road was necessary, in the direction of Hornsby Station. That terminated my inspection of the land. It was very likely that I had a conversation with Mr. Deering, but I do not remember making any inquiry about the land in that particular conversation. The inquiry I made was when I was up near the railway. 13 May, 1889.
14020. *Mr. Franklin.*] You know that the whole of that road marked George-street is private property? Yes.
14021. You did not think the road was necessary? I said that so far as the Lands Department was concerned that road should not be cleared.
14022. Do you recollect that the whole of that portion, close up to a road, had been subdivided for sale? No, I am not aware, Practically, I was not upon the subdivided land.
14023. Do you remember whether instructions were given to take a new road diagonally, as the country suited, to the head of the Vanceville Road, running diagonally north to the A road, which is on the eastern side of Burns, Withers, and Smith's property? I do not remember.
14024. You do not remember whether any instructions were given for the construction of a road running diagonally to junction with the Vanceville Road? No; I do not remember, unless it is a diversion of the Boundary Road. I do not remember any proposal to make a road diagonally. I do not say that the papers would not disclose it, but I have had no opportunity of refreshing my memory by reference to the papers.
14025. *Mr. Waller.*] Had Mr. Deering any power to give authority for the making of these roads, independent of you as Under Secretary? Not that I am aware of.
14026. If any authority were given by Mr. Deering, would that be recorded in the Lands Office? I should think so.
14027. If he gave directions for the formation of a road, there would then be some official document to represent that? I could not say that.
14028. If it went from you, would there not be? Yes.
14029. When you went out that day, did Mr. Davies appear to be anxious to receive instructions or authority for the making of this road? I cannot say whether he was anxious. The only conversation I had with him was with reference to this road fronting the railway line. I simply expressed my opinion, and there the matter ended, so far as I was concerned.
14030. Had you any conversation with Mr. Burns? I do not think so. I do not think he joined in the conversation. It was between Mr. Davies and myself.
14031. In fact we may take it that it was a short visit for official purposes? It appeared to me so utterly absurd that George-street would be of any value to the Crown lands, that I said "no" at once.
14032. May this Commission take it pretty well as a fact that if any authority had emanated from the Lands Office for the making of these roads, there would be a record of it? Yes; there must be a record of it. It must be either there as an original document, or as the press copy of a letter.

David Houison called in and further examined:—

14033. *President.*] Did you ever see these papers headed "Suggestions for dealing with the unemployed." It appears to have been in the Casual Labour Board Office on the 10th May, 1887? No; I do not think I have seen these at all. I do not remember this particular paper. I may have seen it, but I do not remember it. Mr. D. Houison.
13 May, 1889.
14034. Have you any paper, or have you ever had any paper appointing you further than this paper of 2nd May, 1887? That is the only document I have, the copy one with Sir Henry Parkes' signature.
14035. That is the only one? The only paper I ever received.
14036. Had you previously to this received any verbal appointment? None.
14037. Had you or Mr. Wells any authority to depute your joint powers to Mr. Davies solely? No. It was only resolved by ourselves.
14038. Did you ever receive any authority to do so from the Colonial Secretary? No, none.
14039. When Mr. Davies was appointed Chairman by you and Mr. Wells, did you interfere in the office routine? Well, I would rather call it assist.
14040. Did you ever examine the cash-book? No.
14041. Had you anything to do with the system of keeping books? I have seen books there. I have seen them on the table, and the officers at work at them.
14042. Have you seen Mr. Hinchcliffe doing anything with the books? Yes; I have seen Hinchcliffe repeatedly overlooking them.
14043. Do you know who kept the books? Hinchcliffe.
14044. Do you know his handwriting? Yes; I think so.
14045. Do you recognise that book? No, I could not externally.
14046. Inside? Yes.
14047. Do you know whose writing that is? Hinchcliffe's.
14048. All of it? Yes; all that I see here, unless there may have been a page done by somebody else during his absence.
14049. Who was the Accountant in the Department? Well, I understood he was Secretary and Accountant.
14050. Mr. Hinchcliffe has told us that this book is not in his handwriting at all, and the clerk who wrote it has been here, and has told us that it is not in Hinchcliffe's handwriting? I thought it was.
14051. Did you concern yourself at all about it? No; I trusted entirely to the Accountant. 14052.

Mr.
D. Houston.
13 May, 1889.

14052. Have you had anything to do with the payment of vouchers? No; nothing, except overlooking them when they came in.
14053. What did you do? I overlooked and checked the amounts and prices.
14054. Did you overlook all of them? No; I was not there. Vouchers were paid whenever they came in.
14055. Did you concern yourself about the pay-sheets? Not every individual pay-sheet; no further than looking through them occasionally. I do not think now that this is Hinchcliffe's handwriting.
14056. You can see by a cursory glance at this book that there are a large number of cheques drawn during the whole of that time. Did you authorize the drawing of any cheque? Not any particular cheques.
14057. What proportion of them? I could not enumerate them.
14058. Many? Whenever I was in I looked through them. I read cheques through repeatedly, and looked through the items in the vouchers.
14059. How long did you spend at the office generally? Well, I suppose about an hour or two hours in the morning when I was in.
14560. Do you know anything about the arrangements that obtained with regard to the supply of rations? When tenders were called for them?
14561. With regard to supplying and delivering them,—anything of your own personal knowledge? I have seen them delivered; but I do not know about the details.
14062. Was the system arranged by you or arranged by Mr. Davies? It was arranged by the Board.
14063. Did you have anything to do with the selection of the tradespeople with whom you were dealing? No.
14064. Were you aware of the arrangement that existed between the Board and M'Lean Bros. and Rigg? About supplying tools and things?
14065. Yes? Merely that requisitions were given for tools as they were required.
14066. Did you have anything to do with supplying them? No. I might have signed a requisition for tools when in the office and Mr. Davies was absent.
14067. Did you ever go through their vouchers? No; not the individual items.
14068. Do you know what the practice was with regard to the examination of these vouchers? Well, I understood that it was the usual departmental course.
14069. Did you issue any instructions? No.
14070. You left it entirely with Mr. Davies? Yes, and the Accountant.
14071. Do you recollect when you took office having any report made to you by any person with regard to Springall and Burrowes? No.
14072. Did you ever hear of a report by Mr. Gordon or Mr. Deering? I do not remember ever seeing it.
14073. Had it been mentioned to you? No; I do not remember anything of such a report.
14074. Did you ever, during the time you were in office, have the conduct of either of these persons brought under your notice further than you have already mentioned? Nothing beyond what I have already mentioned.
14075. Had you anything to do with the appointment of clerks, officers, or overseers? Nothing beyond recommending them for the works—that is the overseers. I did not interfere with the clerks at all.
14076. Who appointed them? Mr. Davies. If I thought any man fitted for the position of overseer anywhere I recommended him.
14077. Did you ever hear complaints of Mr. Larnach being drunk? I took no notice of what I heard.
14078. Did you ever notice him? No; I cannot say I have. I have noticed him queer.
14079. Did Mr. Davies ever tell you? No.
14080. Did you have anything to do with the receiving of the proceeds of the sales of firewood? No.
14081. Did you know what the practice was as regards cheques that were paid in for it? I understood that they were all paid into the Casual Labour Board bank account in error instead of the Treasury. I remember speaking to Hinchcliffe about it.
14082. Were you aware that Mr. Springall had a store account with Mr. Kidman during the time Mr. Kidman was supplying the Board with rations? No; only so far as I told you that we thought he was working this store for Kidman at the ground when we took charge.
14083. Did you know that he was supplying stores on the ground during the whole time? No; I had no knowledge of that.
14084. Did you ever see Springall? Yes; every time I went out. I was not out there very often.
14085. Do you recollect some work that was carried on in connection with a spur on the Port Hacking River? No; I never saw it. Do you mean what they were doing at Ewey?
14086. I mean the spur on the river? Oh, a sort of breakwater.
14087. Yes; had you anything to do with that? No; I condemned it.
14088. Who started it? It was started under the direction of the trustees, I think. It was not commenced by us, I think. The trustees asked that the work should be done, and the men were allowed.
14089. Was it done? It was partially carried out but not completed when I was there last. I went over it with Burrowes.
14090. Did Mr. Murphy ever see you with reference to what was done in the Holt-Sutherland estate? I do not know Mr. Murphy; I have never seen him.
14091. Did you hear of his name in connection with this work? Only in the papers.
14092. Do you know whether Mr. Davies and Mr. Murphy were friendly? No; I never heard Mr. Davies mention his name.
14093. Did you ever hear of any complaint made by a man named Robertson? No.
14094. As to irregularities alleged to have been committed by Springall? No.
14095. In connection with the stores out there? No; I do not recollect the man's name even.
14096. Or in connection with the sale of rations? No; I don't remember anything of the kind.
14097. I will read you the answers to questions 8868, 8869, and 8870 in the evidence of W. M. Robertson; is that correct? I do not know the name of Robertson. I do not remember it. I have, distinctly, no recollection of it.
14098. Nor of Mr. Wells speaking about it? No. I am positive it never was told to me. I have no recollection whatever about it. It might have been told to Mr. Davies, while I was present on the ground—when we were all together

14099.

14099. Was your concurrence asked in every case where work was initiated, before it was carried out? No.
14100. I refer to Mr. Davies' answer to question 796 before the Select Committee, in which he says that you were asked to concur before any work was initiated. Is that correct? No. It was after the initiation in some cases that my concurrence was asked.
14101. Did Mr. Davies act in many cases on his own responsibility? Well, I have generally heard of it immediately I got to the office. When I have been away for weeks Mr. Davies would act in the meantime.
14102. Did he report upon all the payments that had been made? No; the books were open to us in the office.
14103. How many meetings do you suppose there were at which the three members of the Board were present? I could not remember—over a hundred, I should think. In many cases Mr. Wells would be gone just the instant before I got there, and *vice versa*.
14104. Did Mr. Davies ever initiate works, and afterwards consult you? Yes, in some instances.
14105. And carry them out? With the approval of the Colonial Secretary.
14106. Not on his own approval? Not that I am aware of.
14107. Do you recollect ever having seen a letter that Mr. Sanderson wrote to Mr. Deering, in which the names of yourself and Mr. Wells were mentioned? No, I do not think so, I do not remember it.
14108. At which Mr. Davies was somewhat annoyed? No, I do not remember it. I did not take much notice of his communications—that is of Sanderson's.
14109. Were you consulted as to the system that was pursued in the office with regard to orders and paying accounts, and that kind of thing? No; I do not profess to be an Accountant at all.
14110. *Mr. Franklin.*] Do you know all the roads that were made on the Holt-Sutherland Estate? No.
14111. Were you aware of them? Not before they were made.
14112. Do you know where the localities were? Yes.
14113. Did you approve of them? They were approved by Sir Henry Parkes. I never saw them. I never saw the Holt-Sutherland Estate, until I visited it lately.
14114. My reason for asking the question is that Mr. Wells, in reply to question 1432, states that he objected to all that he saw done, except four, and I wanted to know whether the proposal for making these roads was brought before the Board as a Board, and received your consent and approval? Of course they were approved by the Board. But the roads were not visited by the Board. I never visited them.
14115. Do you take my responsibility for the roads? I take my share of the responsibility of course.
14116. Mr. Wells, in answer to question 1435 says he accepted no responsibility except in regard to those he had mentioned? Of course I accept the responsibility as one of the Board. I do not say I approved of them after they were done.
14117. Do I understand you to say you occasionally looked over the cheques? I have looked over the cheques and the vouchers for the pays, and also over contingent vouchers and any small vouchers that were in.
14118. Did you ever see the original abstract sheets from which the pay sheets were made out? Yes; I have seen them at the National Park, in a book there.
14119. Have you compared them? In looking over things I have looked them up.
14120. *Mr. Waller.*] Were there many of these cheques and vouchers at the time you chose to look through them? Yes; large amounts.
14121. So that it would be impossible with the little attention you could give to examine them very carefully? It was impossible for us to check the items.
14122. As regards the inspection of these accounts, did you not go through the items? No further than Mr. Darley would do with me. Mr. Darley could not possibly go through all the figures in our vouchers. He trusts me and I trust the Superintendents that they supply me with correct amounts and quantities.
14123. *President.*] There has been some evidence given about you which it is only fair I should read to you; I read to you questions and answers, being Nos. 5102, 5103, 5104, 5105, 7437, 7438, 8042, 8043, 10893, 10894? I make no explanation. I don't consider any necessary. It carries falsehood on the face of it. It is absolutely false.

Mr.
D. Houston,
13 May, 1889.

TUESDAY, 14 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P. | T. F. WALLER, Esq., J.P.

Thomas Cooper Hinchcliffe called in and further examined:—

14124. *President.*] Do you wish to make any corrections in your previous evidence? Yes. And another matter is, that in your special report you say that I said I was not Accountant, and the other witnesses said I was; you have documentary evidence before you that I was appointed Secretary and Paymaster; it looks in the report as if I swore one thing and that several other witnesses swore another; I have to make my living, and I do not wish to come into conflict with any of the gentlemen giving evidence here—there is no occasion for it.
14125. Do you wish to make any corrections in your evidence? Yes. They are simply to make matters more explicit. In answer to question 673, which says, "I did the principal business previous to that," add the words "under Mr. Wise." In question 674, "he then asked for my services," insert "the Colonial Secretary" after the word "asked." In question 677, "the correspondence was inserted in the books," say "Record" books. In question 714 read "the unemployed used to go in deputations." In question 715, say 4,000 at "one time," not "a time." In question 735, the figures £1,000 should be transferred to the end of the answer. In question 754 add "Mr. Larnach." In question 759 strike out the words "might be carried out," and insert "the goods were sent to." In question 766 strike out the words "small amounts." In question 770, the sentence, "not a large sum, £10 to £50," should read "£10 to £100"; also say "never more than £100." In question 817, in the sentence, "I had been there to pay for Mr. Wise and at Carlingford," strike out the word "and." In question 822½ make it read, "applied to Mr. Burns to send some one

Mr. T. C.
Hinchcliffe,
14 May, 1889.

Mr. T. C.
Hinchcliffe.
14 May, 1889.

- one, but the Under Secretary for Finance and Trade said it was not necessary." In question 823 make it read, "It is only, I believe, where large sums are daily received." In question 831 strike out the words "so with regard to several other sums, I think about £300 altogether, that the course he adopted was against the rules of the Department," and insert instead the words "I thought the Treasury was the proper place to pay the money in." In question 840 say, "small sums paid to me would be for rations;" strike out the words "for instance" and say "one day a man left" instead of "put £2 on the pay-table." In question 857 insert the word "No" at the beginning of the answer, and add at the end "the unemployed then." In question 914, instead of "We would have to find out that next day," read "We would have to pay that out next day." In answer 915, instead of "the Chairman would pay him and sign on the margin," read "and the man would sign on the margin." In question 967 read "I used to put paid by T. C. Hinchcliffe." In question 1009, instead of "a man earned 4s. or 4s. 3d. a day," read "4s. or 5s. a day." In question 1015 the words "on a plan" should be added to the answer. In question 1024 strike out the words "on the 30th," and insert "within a few weeks." In question 1031, instead of "it was stated at one time" read "twice in the Legislative Assembly by Sir Henry Parkes." In question 1032 the sentence "he would tell me on account" should read "he would not tell me." In question 1033 the figures "£260" should be altered to "£261 10s." In question 1051 the answer should be "No" instead of "Yes." In question 1067 the word "out" should be struck out, and it should read "the clerk to fill up," instead of "sign the order." In question 1074 instead of "we trusted to Mr. Burrowes," read "the Superintendents." In question 1075 add the words "I said I was told that." In question 1121 add at the end of the answer "or at the different works." In question 1125 add at the end of the answer "to a small extent." In question 1128 add at the end of the answer "all orders had to go through the head office." In question 1139 add at the end of the answer "the vouchers would be in the office." In question 1143 read "he had as a housekeeper." In question 1144 strike out the name "Baker" and insert "Baber." In question 1153 add at the end of the answer, "I acted as Paymaster." In question 1158 read, "they had butts to them," instead of "butts in them." In question 1191½ add to the answer, "I explained these amounts previously."
14126. Have you seen Mr. Davies since you were examined before the Commission? Yes.
14127. When? The day the Special Report was laid upon the Table of the House.
14128. What took place? He seemed to be greatly put out. He said it was a very one-sided report, and that he was going to reply to it.
14129. Where did you see him? At the Temperance Hall.
14130. Did you go to see him? Yes.
14131. At his request? No.
14132. Was anything else besides the Report discussed? Nothing beyond the application I am making to the Department. He knows I am entitled to the money, but the papers do not go through unless you get some Member of Parliament to push it for you.
14133. Did you request him to use his influence? He had spoken to me about it previously.
14134. Is that the only time you have seen him since you gave evidence? I think I met him here one day in the Colonial Secretary's Office.
14135. Did he enter into any discussion as to the evidence then? No.
14136. How long were you discussing matters at the Temperance Hall? Only a few minutes.
14137. Did you know of these moneys which the evidence discloses he received for firewood? No, I did not. I knew he had been receiving certain amounts, but I thought that he paid them into the Bank.
14138. Did you know he had paid them into the City Bank? I did not. I would not know anything about that, beyond seeing the letter open on the table.
14139. Did you see that cheque for £26 17s. 7d.? I could not swear to that particular cheque, although I see it has my name filled in; but I do not think I saw it, or else I should have noticed it.
14140. Were you sitting in the same room as Mr. Davies? Yes. He would be at one end of the table and I would be at the other.
14141. Do you recollect the different times that Hillier came there? Yes.
14142. Did you see what cheques he brought? No.
14143. Who made up the amount which had to be paid to Hillier? Mr. Burrowes.
14144. There is another cheque for £33 3s. 2d.—did you see that? I cannot say that I saw any particular cheque. I have seen the book occasionally, but what the account was I did not notice.
14145. Do you recollect Mr. Larnach paying Mr. Davies any sums of money? No, I do not. He paid me £2 once, for which I gave him a receipt.
14146. This is some evidence which Mr. Larnach gave to this Commission, in answer to a question asked him:—"I, myself, gave John Davies, on 15th December, 1887, £6 10s. for firewood that had been sold at Carlingford. After I had done so I thought I had made a mistake, as he never offered me a receipt. I felt rather queer about it, as Mr. Hinchcliffe told me once or twice to pay the money to Mr. Davies. I was determined to get an acknowledgment from him that he had received the money, so I asked Mr. Hinchcliffe if he would ask me when Mr. Davies came in, if I had received certain money from Carlingford. Mr. Hinchcliffe did so, and Mr. Davies said, "He handed them to me, I have them." Now, is that evidence true? I do not recollect a word of it. Mr. Larnach was very particular if he brought back any money to get an acknowledgment. I do not think he would give over any money without getting a receipt for it. I do not know how he come into possession of the money.
14147. Mr. Larnach had some book in his possession. He further said, "This is an almanac on which I made an entry on the day I paid it. It is dated 15th December?" I do not recollect a word about it. There were strained relations between Mr. Davies and Mr. Larnach at that time. If Larnach had handed any money to Mr. Davies, he would certainly have asked for a receipt.
14148. Why were there strained relations then? Mr. Davies wanted to get rid of him several times, and spoke a little cross to him once or twice.
14149. That was in December, 1887? I do not recollect about December, 1887; it would be December, 1888.

14150.

NOTE (on revision) :—Q. 14128—Answer to read : "He said your special report was the most one-sided report he had ever seen," &c. Q. 14132—For "am making" read "made" Q. 14133—Answer to read : "I had spoken to him about it three months previously" Q. 14139—For "noticed" read "remembered" Q. 14149—After "would be" read "some time before"

Mr. T. C.
Hinchcliffe.
14 May, 1889.

14150. The evidence I read gives it as December, 1887? Then I do not suppose matters were so strained then.
14151. Did Mr. Davies speak to you the other day about that £6 10s.? No.
14152. Not a word? No. I do not know where Larnach could have got that money from.
14153. He says from Carlingford? I do not know anyone that would give it to him.
14154. What would lead up to the paying of the cheques entered in this cash-book throughout the work of the Board? What do you mean by lead up to them?
14155. There are a number of cheques entered through the book, what would lead up to them? I presume they are mostly for wages.
14156. What would lead up to them? I do not understand what you mean by what would lead up to them.
14157. It is plain English? The pay-sheets would come in in the ordinary manner. They would be checked in the office, and a cheque would be drawn for the amount.
14158. By whom? By Mr. Davies and myself.
14159. Would Mr. Houison or Mr. Wells be present when you drew the cheque? No.
14160. Would they be present from the time you got in the pay-sheets up to the time you drew the cheque? They would be present pretty often. I could not say about any particular pay-sheet.
14161. What was the practice in drawing cheques;—were they drawn by you and Mr. Davies in the presence of Mr. Wells and Mr. Houison? If they were not there they would be drawn just the same. What the cheque was for, in the shape of the work, would be in the body of the cheque, and the vouchers would be numbered the same as the cheque.
14162. Were these payments authorized at any time by Mr. Wells or Mr. Houison? No; they would not require to be authorized.
14163. All the payments, then, would be authorised on Mr. Davies' authority? Yes, on Mr. Davies' authority.
14164. Were the payment of these cheques reported to Mr. Wells and Mr. Houison at any time in your presence? They would not be reported. They were paid, and they could look at the pay-sheets. Mr. Houison would come in and look at the pay-sheets.
14165. Supposing they should say that they would not authorise the payments? It would not be requisite for them to authorise them.
14166. Can you explain how it comes that in the months of December, 1888, and January, 1889, there is such an unusually large amount of petty cash payments? No; I cannot. Only Mr. Davies' voucher comes in on that month. That is a very large item out of it. I could not explain about the others.
14167. Apart from that amount of Mr. Davies' then, you can give me no explanation? No. My own six months petty cash came out of it.
14168. Did you bring any of your own vouchers into that month? Yes.
14169. Is this Commission to understand that you kept vouchers constantly in reserve, not entered up in the book at all? Yes; I always had a lot in the box.
14170. Would anybody else know of them? They would not know the particulars. They would know they were there.
14171. Who would know they were there? Anybody in the office.
14172. The messenger? No.
14173. Mr. Josephson? No; Mr. Hibble, Mr. Larnach, and Mr. Davies would know.
14174. Would they know the amounts? No.
14175. Then you might have, in the cash box, a voucher six months old for a considerable amount? I do not think for a considerable amount, excepting Mr. Davies.
14176. Was Mr. Davies' a considerable amount? £261 10s.
14177. Did you have vouchers for the whole of the amount? He gave me vouchers at the finish. It is just possible I would have some vouchers by me which would be six months old. There might be one for some odd amount which they would keep putting back in the box.
14178. What object had you in keeping them so long not entered up in your books? No object at all. They would be entered up periodically.
14179. What do you mean by periodically? Once a month, or once two months, or once in six weeks—no particular period.
14180. Supposing anything had happened to you, would there be any record at all? Not of the cash vouchers. You see Larnach and Hibble, at the finish, had charge of the vouchers where the cheques were drawn. They would make up £6,000 worth without any cash vouchers. They would say, "You will want this to-morrow or the next day."
14181. If the cash-book shows a credit of £500, according to your evidence you had vouchers for all that in your box? I might have £100 in cash and the rest in vouchers.
14182. Supposing anything had happened to you, would anyone have known anything about this—would they have known that the vouchers were in the box? Oh, yes, always. They would have asked Hibble or Larnach, and they would tell you.
14183. When you settled with Mr. Davies in December, did he pay you money, or did you pay him money? I paid him money.
14184. Are you sure? Yes.
14185. Look at pay-sheet Leichhardt Park, December 4, 1888, to January 5, 1889. Who is J. Baker on that pay-sheet? I do not know.
14186. In whose hand-writing is the pay-sheet? In Mr. Evans, the superintendent.
14187. Who paid that money? It was paid by Josephson, it says.
14188. Why was that paid out of the petty-cash? I cannot say. Because we had the petty-cash in hand. It might have been a holiday or something. I cannot tell now.
14189. Was it usual to pay large sums like that out of the petty-cash? It has been done.
14190. Was it a usual thing? It was not a usual thing, but it has been done several times.
14191. I want to read this evidence of Mr. Hibble's again to you. [*President read question and answer Nos. 7291 to 7303.*] Do you wish to give any explanation as to that? I never said anything of the sort. I could not know myself.

101—3 R

14192.

NOTE (on revision):—Q. 14177—For "vouchers" read "one voucher" and for "they would keep putting" read "for some reason would be kept" Q. 14180—After "they would say" read "Here is another £6,000 ready"

- Mr. T. C. Hinchcliffe.
14 May, 1889.
14192. When Mr. Hillier came to bring in these cheques for firewood did he get a cheque himself? Generally. If he presented a voucher signed by Mr. Burrowes.
14193. Did you have to countersign that cheque? Yes.
14194. If he paid in a cheque for £26 17s. 7d., and got a cheque for £29 1s. 6d., would that cheque be countersigned by you? Yes.
14195. Would you make any inquiry about it? No; not if it was signed by Mr. Burrowes or Mr. Davies in a voucher.
14196. *Mr. Waller.*] What disbursements had Mr. Davies to make in connection with the office? None that I am aware of.
- 14197-8. Did he have payments to make in the way of paying men? Only the money he had previously received on account of the men.
14199. Only in regard to unclaimed wages? Yes.
14200. Was there any occasion for him to keep the proceeds of the sale of firewood in hand with which to pay anything? No. If he wanted money at any time I gave it to him.
14201. As a matter of fact, did he ask you for money? Yes.
14202. And you gave it to him? Yes.
14203. Then, between the petty-cash in hand and the unpaid wages he had sufficient money in hand to meet any claim for wages or other things? Yes.
14204. These vouchers I hand you—have you any recollection of them? No; I may have seen them before, that is all.
14205. Have you any recollection of Mr. Burrowes being asked to sign them in the office? No.
14206. Have you any recollection at all as to the particulars of these vouchers? No; I might have seen them; they are all in due form.
14207. Who had charge of the paid vouchers? The cash vouchers were in my box, locked; the other vouchers were put in a safe upstairs.
14208. Had you access to Mr. Davies' safe? No; Mr. Hibble had; he had a duplicate key.
14209. Do you know whether Mr. Davies kept any cash there? I think so.
14210. Did you ever see it? No; he told me he had money there; he generally put the vouchers in a drawer when he first paid them.
14211. Did he put the account sales in a drawer? When he had them first he did, but he might have taken them out half-an-hour afterwards, for all I know.

Francis Abigail, M.P., called in, sworn, and examined :—

- F. Abigail, Esq., M.P.
14 May, 1889.
14212. *President.*] Are you a member of Parliament? Yes.
14213. And have been for several years past? Yes.
14214. Were you a member of the Government of which Sir Henry Parkes was Colonial Secretary in the years 1887 and 1888? Yes.
14215. Can you say whether the creation of the department known as the Casual Labour Board came under the consideration of the Cabinet? It was reported to the Cabinet by Sir Henry Parkes.
14216. Reported that it had been formed, or that it was desirable? It was brought up as a paper for the approval of the Cabinet.
14217. Can you say whether it was reported or brought up for approval that Mr. John Davies should be appointed Chairman of the Board? I cannot say; I do not think so; the names of the three who constituted the Board were reported; I do not recollect anything being stated as to who should be Chairman; I was under the impression that they would appoint their own Chairman.
14218. Can you say whether during the time you were in office, the question of the roads at Hornsby, or in connection with the property of Burns, Withers, and Smith came before the Cabinet? I have no recollection of it having done so.
14219. Were you a frequent attendant at the Cabinet meetings? A regular attendant; I do not think I missed one.
14220. Can you give your belief as to whether or not the question of the propriety or otherwise of these roads was considered? I may say that I am satisfied they were not.

James Inglis, M.P., called in, sworn, and examined ;—

- J. Inglis, Esq., M.P.
14 May, 1889.
14221. *President.*] Are you a Member of Parliament? Yes.
14222. I believe you were a member of the Government of which Sir Henry Parkes was Colonial Secretary in the years 1887 and 1888? Yes.
14223. Were you in the habit of attending the Cabinet meetings regularly? Yes.
14224. Can you say whether the question of the creation of a department for the administration of the unemployed came before the Cabinet at all? Well, when we came into office the question of the unemployed was already before the country; but along with a vast amount of papers the question was mooted of bringing it under proper dimensions and trying to do away with it if possible.
14225. Can you say whether the question of a department or Board was touched upon? The Board is a different thing. The question of a Board was considered by us. There was the Carrington Soup Kitchen and a lot of things before we came into office.
14226. Can you recollect whether the question of the Casual Labour Board was discussed, or reported to the Cabinet? I did not pay much attention to it, not being in my department. I fancy the Colonial Secretary made the arrangements as a merely departmental thing with the sanction of the Cabinet.
14227. Do you know whether the question of Mr. John Davies being appointed Chairman of the Board came up? It naturally would. As an executive matter it would be mentioned to the Cabinet.
14228. Have you any recollection, as a matter of fact, of it being mentioned? I do not remember, but I have not the slightest moral doubt that it was.

14229.

NOTE (on revision) :—Q. 14196—After “aware of” add “except for personal expenses.” Q. 14200—Omit “No,” insert “Except personal expenses and unclaimed wages.” Q. 14203—After “Yes,” add “as far as I knew.”

14229. Can you recollect whether, at any meetings of the Cabinet, the question of constructing the roads at Hornsby of Burns, Withers, and Smith, came up? No, I do not remember anything about that. I have a vague recollection of the matter; but after the thing was once settled I do not think any of the work that was before the Board came before the Cabinet at all.

J. Inglis, Esq.,
M.P.
14 May, 1889.

14230. What was your portfolio? Minister for Public Instruction.

14231. Here are five memorials having reference to the initiation of certain work, each of which has on it "Approved, H.P." Can you say whether you ever saw those documents? I would have to read them. I do not know until I see what they are. [*Reads the memorials.*] I cannot say that I remember anything about any specific work at all being brought before the Cabinet in connection with the Casual Labour Board.

14232. I believe Mr. Burns was Colonial Treasurer. Do you recollect him at any Cabinet meeting expressly asking that some inquiry should be made about the roads at Hornsby? Yes, I believe that Mr. Burns, in conversation of course, stated that he would like some inquiry to be made. It is a long time ago, I cannot recollect the exact terms of it. I do not remember whether it was before or after the question was mooted in the press.

Frederick Wells called in and further examined:—

14233. *President.*] Do you wish to make any corrections in the evidence you previously gave before this Commission? Yes.

Mr. F. Wells.
14 May, 1889.

14234. Will you give them? In my answer to question 1235, instead of "the work that we found for them was," read, "the men were paid at the rate of 5s. per day." In the same answer, after the word "men," in the sentence, "keep up the practice of giving the men about 6d. per hour," add "piece-work to yield;" after the words, "who offered to supply," add, "the increased ration." In the sentence, "it was compulsory that they," say "compulsory that all." In the sentence, "when I gave my evidence before the Select Committee that they had been audited," read "had not been audited." In question 1253½, in place of "366 days," read "146," and add the words "from Sydney," at the end of the answer. In my answer to 1262, in place of saying "the Chairman was the head of the department," say "the Chairman, although head of the department, had to consult his colleagues." In my answer to 1282, say "he was good at clearing and making ordinary gravel roads." In my answer to 1285, say "Possible, but I, &c." In my answer to 1288, add at the end "in his subordinates." In my answer to 1294, say "Yes, in the safe." In my answer to 1302, say "Yes, as far as my attendance allowed." In my answer to 1305, instead of "and I requested Mr. Houison," say, omitting "and," "I requested Mr. Houison to visit the Junction Road, I had a conversation with Mr. Burns"; then after "the Government would clear and form the road," add the words "to Hornsby Station." In my answer to 1312, add "by the Board." In my answer to 1314, say "he was our overseer in charge" instead of "surveyor." In answer to 1315, read "No; first appointed by the Roads Department as a kind of officer, and then he was transferred again when the Board took charge." In answer to 1334, after the words "of course," add "we did not expect too much." In answer to 1336, instead of "very efficient," say "fairly efficient." In answer to 1343, say "more or less money," instead of "more money," and leave out the word "and" after "entitled to." In answer to 1349, instead of "for Campbelltown," read "near Campbelltown." In answer to 1352, add "and I also think another." In answer to 1353 add, at the commencement, "I only heard of them." In answer to 1359 add, at the end, "not so often as I should have wished." In answer to 1360, say "I went sometimes with both, sometimes with Mr. Houison, sometimes singly." In answer to 1361, strike out "Oh" at the commencement, and add, after "National Park," the words "Rookwood, Gordon, Beecroft, Narrabeen, and other places"; and at the end, instead of "he appeared anxious that," read "appeared to think that." In answer to 1362, for "long before I had notice," say "we had noticed." In answer to 1363, add, at the end, "to about that." In answer to 1374, alter the word "officers" to "Board." In answer to 1393, for "that Mr. Deering," read "when Mr. Deering." In answer to 1401, for "I have met," "I meet and shake hands." In answer to 1404, before the word "country," read "exact." In answer to 1434, for "an income," read "benefit." In answer to 1437, say "some of them are cleared very much wider than was intended." In answer to 1438, for "made," read "cleared." In answer to 1460, at the end of the answer, say "roads to the southward of Junction Road I know nothing about." In answer to 1462, for "my neighbourhood," read "the neighbourhood." In answer to 1466, for "remember," read "remembered." In answer to 1485, for "had every reason," read "have every reason." In answer to 1503, for "I had done," say "we had done." In answer to 1521, for "if they had found time they would," read "if it had funds would." In answer to 1523, after Bondi, insert "and Spit Road," and after "a large number at" add "Bourke," and strike out "work at the Spit Road." In answer to 1525, for "Dayson," read "Dyson," and for "Mr. Cunter," read "Mr. Symonds." In answer to 1536, instead of "when they began clearing," say "when the Company began clearing." In answer to 1541, add "until quite lately." In answer to 1548, for "make," read "complete," in two places. In answer to 1562, strike out "along the Junction Road," and insert "to Billyard-street." In answer to 1571, add at the end, "and was in hand." In answer to 1590, add at the end "except what the company had done." In answer to 1594, strike out the word "because." In answer to 1610, instead of "3s. to 3s. 6d.," put "2s. to 2s. 6d.," at the end of the answer. In 1665 the word "for," in the question should be struck out. In answer to 1706, after the word "Sanderson," insert "or other officer." In answer to 1730, add at the end "agreed on with the Government." In answer to 1782, instead of "he meant the other works," read "he meant also other works," and add, "paid from Hornsby Depôt."

14235. Can you tell me whether, when you were made aware of your appointment as a member of the Board, it was intimated to you that you could appoint a Chairman? No.

14236. Was the appointment of the Chairman simply the outcome of your and Mr. Houison's own deliberations? Quite. We could neither of us possibly attend to the duties, and we wanted a member who could do so.

14237. After the appointment of the Chairman did you interfere with the executive work of the office? No.

14238.

NOTE (on revision):—Q. 14231—Add "although allusions were very frequently made to the large amount of remunerative work that was being done by the so-called unemployed at various places, I certainly understood that the State was getting good value for the cost expended."

- Mr. F. Wells. 14238. Did you inquire into the payments that were being made? No further than seeing the pay-sheets. I did not interfere with the accounts in any way.
- 14 May, 1889. 14239. Had Mr. Davies, with Mr. Hinchcliffe, authority to sign for everything? For everything.
14240. Did you concern yourself in an examination of the vouchers to ascertain whether a proper system was being carried out there? Yes, in a general way, but not individually, to exercise any check.
14241. Did you concern yourself in regard to the system that was adopted in the supply of rations to see whether any irregularities were going on? I did in the field.
14242. Did you examine the store-keepers' books? I did not examine the books, but I examined the quality of stores and the mode of issue.
14243. Were you aware whether any one examined the store-keepers' books? They should certainly have been examined by the officer in charge of the field and by our own store-keeper. I presume Mr. Burrowes would do that.
14244. It is not a matter of presumption. I want to know if you know whether it was done? I do not know whether it was done.
14245. As to that you trusted to the Chairman as head of the executive work? Yes, and to our own officers in the field.
14246. Did you become aware that some of the officers were not what you might call competent? Yes; I found that Mr. Burrowes was incompetent for doing road works. I had fault to find with Mr. Springall for what appeared to me a sort of truck system. I brought it under notice, and had a stop put to it.
14247. Were there any irregularities as to drink? No, I think not. There were one or two cases in which some of our subordinates have been intoxicated, and I inflicted punishment on one, reducing his pay.
14248. Was Mr. Burrowes' the only case in which you thought that there should be dismissal? It was the only one that merited dismissal.
14249. Did you take steps to bring about that dismissal? I did.
14250. Did you know Larnach at all? I saw very little of him.
14251. Did you know anything of his character, habits, or ability? No.
14252. Did Mr. Davies ever complain of any of them? I think Mr. Davies did complain, towards the close, of Mr. Burrowes. That was either before or after the Board was winding up.
14253. Did Mr. Davies, the Chairman, consult you, after his appointment, as to the system that was to be carried on in the office and outside? Yes; we had a general conversation on that.
14254. But the mode of carrying out the system. Did you go into it? I saw it was in working order before I ceased to take an active interest in it.
14255. When you took charge did any report of Mr. Deering or Mr. Gordon, as to Mr. Burrowes or Mr. Springhall, come before you? Both Mr. Deering and Mr. Gordon spoke disparagingly of Mr. Burrowes.
14256. And of Mr. Springall? No; I heard Mr. Deering speak disparagingly of Mr. Burrowes, and I think Mr. Gordon spoke so too, because I know that they disagreed.
14257. Have you any recollection of a report made by those gentlemen showing dishonesty, or serious irregularity, in the conduct of Mr. Springall's department? No.
14258. Were you aware that during the whole time of the existence of the Board, Mr. Springall had stores supplied to him, on his private account, by Mr. Kidman? I was aware of it at one time, but I stopped it, as I thought, effectually.
14259. Were you aware that it continued during the whole time that the Board was in existence? No; so soon as I was aware of it I stopped it. Mr. Kidman afterwards sent a man of his own to supply the luxuries. I might say that when I spoke of a "truck" system it was for little articles of luxury: tobacco, jams, and articles of that description, which were sold to the men by Mr. Springall. I objected to it and then Mr. Kidman sent a man of his own out there. I understood that the thing was then effectually checked, and that Mr. Kidman was carrying the store on his own account.
14260. Were you aware that McLean Bros. and Rigg were supplying large quantities of plant or tools to the Board? Yes.
14261. Were you aware of the terms? The usual Government contract that they were working under before the Board took control.
14262. Do you know what the schedule prices are? No; not without reference.
14263. What do you call the usual contract? The contract they were working under before the appointment of the Board.
14264. Were you aware that McLean Bros. and Rigg were supplying goods to the Board on the same terms as to any ordinary wholesale customer? No, I understood they were supplying them all the time at contract rate, as I was given to understand they did before our appointment, and that ours was a continuance of the same contract.
14265. In making these calculations of the estimated cost of the work done by the unemployed on the roads at Hornsby, did you get the information from Mr. O'Donnell or from Mr. Gordon? I got the information as to the bridges from Mr. O'Donnell. The whole of this is taken from Mr. Gordon's map and my own knowledge of the prices.
14266. Was it a sketch map or a survey map? It was Mr. Gordon's map.
14267. We are told that there was no actual survey until a map was prepared for this inquiry? I took it from Mr. Gordon's map. Of course I had but a short time to prepare the rough estimate. It was done hurriedly, and I scaled it from Mr. Gordon's map, and got it as near as I could.
14268. Have you ever heard anything against Mr. Larnach. One witness stated that Mr. Larnach was constantly in the habit of getting drunk. I asked, "Did the Chairman or any member of the Board know it." He said, "Mr. Wells knew it; I do not think Mr. Davies did"? Oh, I may have seen him a little bit wrong, but not drunk.
14269. Not sufficiently bad to justify you in recommending his dismissal? Oh, no. I have seen him with a good drop on board.
14270. I read to you some evidence that has been given by Mr. Hibble and Mr. Josephson with reference to some occasions on which you and another member of the Board are alleged not to have been in a sober state [*Evidence read*];—do you wish to state anything in regard to this? The allegations are totally untrue.
- 14271.

NOTE (on revision):—Q. 14269—For "good" read "little." Q. 14270—*Added*, at end of answer, "as far as the evidence of Mr. Burrowes and Mr. Larnach."

14271. Can you tell me anything of an interview which Mr. Burrowes speaks of, which he had with Mr. Mr. F. Wells. Houison? Yes; I was present.
14272. What was it? Mr. Houison said to him, "I would not believe a word you said." Mr. Houison certainly was the worse for liquor that day. I told Mr. Burrowes to pay no attention to him, but to come along with me and I would go over and see what was wanted. He did so.
14273. Did it not strike you as a strange thing that, knowing, apparently what all the members of the Board did, about Burrowes, that he was kept on? I tried to get rid of him on one or two occasions.
14274. Are you quite clear on this question of Mr. Springall's irregularities, or dishonesty, that they were never brought under your notice? I never heard anything dishonest about Springhall, but I heard some rumour, or something about a house he was building. It was something very vague. Mr. Davies inquired into it.
14275. Anything about putting names on pay-sheets for which there was no justification? I never heard about that. I did, however, hear of him putting down his son's name as Frank, which is his christian name, as if it was his surname; but we employed his son the same. We had no objection to his son being employed. This was in Mr. Deering's time, I believe.
14276. Did you ever have any complaints made about his selling rations or getting money from the men? No; the only complaint I found was his keeping this store.
14277. Did you ever hear of a man named Robertson pointing out some irregularities of his? I do not even remember the man.
14278. Do you recollect being out at the National Park, or in the neighbourhood, one Sunday, on which a complaint was made about Springall;—a man has given evidence that he wrote out a statement of complaint about Springall, and brought it specially under your notice? I have no recollection of it. Of course we had a great many complaints made at different times against many of the officers, but when they were investigated we found that they could not be substantiated.
14279. Mr. Sanderson, in giving evidence, has referred to some difficulty he had with Mr. Davies arising out of some letter he had written to Mr. Deering, and which you got hold of and showed to Mr. Davies; have you any recollection of that? Yes; I have recollection of there being some trouble with Sanderson over something of the kind; I had to administer a rebuke to Sanderson.
14280. Mr. Sanderson spoke of Mr. Davies having taken umbrage because he had said that Mr. Wells and Mr. Houison were gentlemen, and Mr. Davies inferred because two had been named as gentlemen, that he was not one? I think that may been a passage in the letter.
14281. Was there any difference with Mr. Davies? Yes, there was a difference; I do not think Mr. Davies took the question up; I think it was taken up because of some ulterior action on Sanderson's part against Mr. Burrowes; I remember I had to rebuke Sanderson.
14282. Were you aware whether any large sums of money were kept in the office for ordinary purposes? No, not large sums; I know certain sums would come back at times after the pays—unclaimed wages—that might lay there for a day or so. We left that there, for fear a man should come into the office for his pay the next day. The rule and practice should be to pay all returned money straight into the Treasury.
14283. If the amounts for unclaimed wages were kept in cash in the office was there any occasion to keep back any other money received on other accounts? No. They could have drawn a cheque if money had been wanted to any large amount. If Mr. Houison and myself had been asked that Mr. Davies should have a small petty cash account, I dare say we should have agreed to it.
14284. Do you not know that there was a petty cash account? I know Mr. Hincheliffe had a small one

Francis Antill Pockley, M.B., C.M., M.R.C.S., called in and examined:—

14285. *President.*] I believe you are the medical man attending Mr. Bennett? Yes.
14286. Mr. Bennett's evidence is desired by this Commission on some matters we have under inquiry. He is a witness, the nature of whose evidence might probably excite him and cause him annoyance. We understand that he is unable to attend from serious illness? Quite so.
14287. We first thought—considering his evidence is of importance—of offering to take his evidence at his house, should you, as his medical adviser, say that he might safely submit himself to the ordeal of examination. We should like to hear your opinion on that point, because on that will depend whether or not we will give up the idea of examining him altogether. We are anxious to do nothing that might retard his recovery or disturb him, and however important the matter of this inquiry may be, we would rather forego the taking of his evidence than trouble him if his state of health precludes it? It would be very inadvisable to examine him at present.
14288. Can you say that it would be likely to prejudice his recovery? Yes; I think it would be.
14289. And as his medical adviser you would not like to authorize this Commission to see him? No; even his private friends excite him very much—they have had to fasten up the gates to prevent his friends seeing him.

Dr.
F. A. Pockley.
14 May, 1889.

TUESDAY, 21 MAY, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

T. F. WALLER, Esq., J.P.

Sir Henry Parkes, G.C.M.G., M.P., Premier and Colonial Secretary, attended:—

14290. *President.*] Sir Henry Parkes, at present the Commission over which I have the honor to preside has not had any intimation as to whether it has been granted an extension? The time is extended. You are the President, are you, sir?
14291. Yes. We have had no intimation of the extension? You can consider this as an intimation. You will have an official intimation in the course of an hour or so.
14292. Can I take it officially that the time has been extended by His Excellency the Governor? The time is extended; you may take that as official.

Sir
Henry Parkes,
G.C.M.G.,
M.P.
21 May, 1889.

14293.

Sir
Henry Parkes,
G.C.M.G.,
M.P.

14293. Otherwise we are *functi officio*, and would not, I think, have the power to examine anyone to-day? I am fully aware of that. The time has been extended by the Governor-in-Council, in the usual way, for fourteen days.

Sir Henry Parkes was then sworn and examined:—

21 May, 1889.

14294. *President.*] As President of this Commission I wrote you a letter on 13th instant inviting you to name a time when it would be convenient for you to attend. I find from your letter to me, which I have recently received, that you did not receive my communication until the 18th instant? It reached me on Saturday, the 18th instant.

14295. The letter was delivered on 13th. I wished to meet your convenience as far as possible, being fully aware that your time was of very great importance? If you require me I am at your service.

14296. I think some inquiry should be made as to how it came about that there was this lapse of time between the time of delivery of my letter and the time it was received by you? I really could not undertake to make the inquiry. It can be made by anyone else who has got the time.

14297. This document [*Exhibit A*] purports to be a copy of an original document signed by you? I have no doubt that is a copy. I recognize it. I have no doubt whatever it is a copy.

14298. Can you say whether the matter referred to in this document came before the Cabinet? I do not suppose it did. It certainly was done with the full knowledge of the Cabinet.

14299. What I want to get at is whether this was a Ministerial act or an act of the Cabinet? Well, I can hardly draw the distinction. The former of a Government would represent the whole Government in a matter of that kind, according to every definition of responsible Government now known to us. There is a large number of important things which I do in the name of the Government which the Prime Minister of England does in the name of the Government, without even the knowledge of the other Cabinet Ministers in England, although not so here. I have no doubt this was fully made known to the other Cabinet Ministers. It is a thing that I might not call a Cabinet expressly to consider.

14300. Did the creation of the department which you at that time contemplated come before the Cabinet or not? I do not know whether it came before the Cabinet or not, but the Cabinet had every means of being acquainted with it. The probability is I read it to the Cabinet, but I cannot recollect it at this moment. The mass of business that goes through my hands every day does not enable me to consult the Government in every important matter. I am empowered by the Crown to form an Administration, and I can place whoever I choose in the different offices. I could have omitted all the gentlemen who were associated with me, and placed other gentlemen in their places. I am answerable for the whole Government. If I resign the Government dies. That is the position of Prime Minister under our form of Government. In England, for example, it is very well known that Mr. Gladstone appointed the Chief Secretary for Ireland, without consulting the other Cabinet Ministers, after the death of Lord Frederick Cavendish. That is a kind of thing we should never do here, but in England the Prime Minister does not consult his colleagues on some very important matters. In this case, if I had to perform the same duty again, I should perform it exactly in the same way—as I have done in many other instances.

14301. Can you tell me whether it came to your knowledge that Mr. Davies was appointed Chairman of the Board? Is he not appointed Chairman by that minute. I do not know whether he is or not. If he is not he was not appointed Chairman by me, but by mutual arrangement amongst the three. Unless his appointment is in the minute he was not appointed by me.

14302. The evidence before this Commission is that within a day or two of their receiving that document the gentlemen named in it met and appointed Mr. Davies, Chairman of the Board. Mr. Wells states that he called at this office and reported the matter to Mr. Walker, the Principal Under Secretary. Have you any recollection of that coming officially under your notice? No; but I have no doubt it did, and I am quite sure I should have approved of what they had done had my approval been required. I had perhaps better add that I never took any steps whatever to even intimate to them who they should appoint as Chairman, to the best of my recollection. If I had any intention of that kind I should have stated it in writing.

14303. Can you say whether before the date of that document, which is 2nd May, 1887, you saw Mr. Davies with reference to the department you then contemplated creating? I do not admit the word department to begin with. I never called it a department myself, and I had never any intention that it should become a department. I have no doubt whatever I saw Mr. Davies before he was appointed. It is hardly probable I should appoint a gentleman without knowing whether he was willing to act or not; that is nothing other than the uniform practice. If I were thinking of appointing any gentleman I should ascertain whether he would accept office before I appointed him. I have no recollection of the circumstances, but I regard it as a thing certain to occur. The whole process arose in this way, if I might be permitted to explain it: The Government found itself saddled (to use an expressive word) with a thing quite foreign to the real business of governing. A mass of persons who were clamouring for employment represented themselves as totally unprovided for. I had to grapple with the circumstances as I found them, and to consider the best way in which I could employ these people and control them; and, as this document I am sure states, gradually get them drafted off into private employment. I selected Mr. Davies from the knowledge I had of him as being about the fittest man for that duty I could think of. He has a marvellous faculty for organization—great influence with the working people—and as I knew he was a person of the strictest sobriety and great industry, I thought he was a person upon whose services the Government and myself could safely rely for business of that kind. I became acquainted with Mr. Davies through the late Chief Justice, Sir James Martin, who I knew to the end of his life entertained the same opinion of him. I have had many opportunities of judging the estimation in which he was held by Sir James Martin; and I know he held a similar opinion to what I hold. That is how he was appointed. I associated with him two members of the Civil Service of high character, because I thought it would give public confidence and consistence to the Board. That they should have devolved all their duties upon Mr. Davies practically is a matter which I never contemplated, and which they appear to have done. Coming back to the question, I have no doubt whatever I sent for Mr. Davies and asked him whether he would take the appointment.

14304. Leaving this matter, I want to ask you whether you were aware, during the time you held office in the years 1887 and 1888, that there was any work being done by the unemployed on the property of Messrs. Burns, Withers, and Smith? You mean at Hornsby, I suppose. 14304½.

14304½. Yes? I was aware that work was being done at Hornsby, and I think I was acquainted in a rather imperfect manner that some roads were being made going through property owned by Mr. Burns and two others, but it was always represented to me that these roads were necessary to get at Government land. That is about all I know of it. I may, perhaps, as you ask me this question about this particular part of the work of the unemployed, add my evidence that I never once visited any of the places where these men were at work; my time would not admit of it. I simply acted upon reports laid before me. I do not remember ever giving any instructions except repeated oral instructions to compress the work of employing these men, or, in other words, to get rid of them as speedily as they could, and relieve the Government of this large expenditure.

14305. Can you say whether the question of the propriety of making these roads, or allowing the unemployed to continue to make these roads, on the property owned by Messrs. Burns, Withers, and Smith ever came before the Cabinet? I daresay it has; I have not a very distinct recollection, because many matters are debated between Ministers informally, sometimes without constituting what is called a Cabinet Council. What I understand as a Cabinet is a Council summoned in the usual manner by the Colonial Secretary, but frequently conversations of importance take place between Ministers without that formality being gone through, both here and in England, and everywhere where our form of government exists. May I ask you whether you are aware that a Cabinet is defined as a body that has no real existence, that it keeps no records.

14306. I am obliged to you for the information—I was not aware of it? I may perhaps be allowed to explain, as bearing upon the evidence I have already given, and may give in the future, a Cabinet Council is a body which is not recognized in the laws of England. Minutes are never kept; and it is a very dishonorable thing for a Minister to keep a memorandum of what takes place in that body. The only exception to that usual course is as when Sir Robert Peel proposed the repeal of the Corn Laws. On that memorable occasion he laid before the Cabinet a minute embodying his reasons for proposing that great change. On some few occasions some similar memoranda have been laid before the Council by the Prime Minister. For instance, when it was determined to liberate Mr. Parnell in the Gladstone Government, a memorandum was laid before the Council on that occasion, but, as a rule, there are no minutes, no memoranda, nothing whatever in writing. I only mention this to show you how complete a thing of consultation a Cabinet is.

14307. I think you said your belief was that some mention of the matter of the roads on the property of Burns, Withers, and Smith was made at some time in the Cabinet? I never attached any importance to the matter, and therefore should not have thought much of it supposing it was, nor do I attach importance to it now. The roads that appear to have been made were necessary. We have that on the authority of the gentleman who presides over the Roads Branch of the Public Service. He says that they might have been a little better made, and there might have been more than was absolutely necessary, but you could not have got to the public lands without these roads through Mr. Burns' property. I do not think any instructions were ever given by any Minister with respect to the roads—certainly not by me—nor had I any knowledge of their being made until I heard, I think, a question asked about them in the Legislative Assembly.

14308. I think Mr. Burns was the Colonial Treasurer in your Ministry during the years 1887 and 1888? Yes, from the beginning of 1887 to the close of 1888—close upon two years.

14309. I will leave this part of the inquiry, and come to the Holt-Sutherland District. I ask you to look at five memorials or petitions I place in your hands, and which appear to have been before you at different times? Yes.

14310. Can you recollect who brought these or any of these documents to you? I should refuse to receive any of these documents except through my Under Secretary. They are all marked as coming through him. For example: If Mr. Davies had brought any one of these papers I should have directed it to be handed in to the Under Secretary, to be presented in the usual way; or if Mr. Burns, the Treasurer, had done so, I should have given the same instructions.

14311. Can you say, looking at these documents, that every one of them came before you in the usual way? Oh, certainly. Certainly, I made it a rule never to receive documents from anybody without their coming through the Under Secretary.

14312. Did you pursue the same practice with regard to Members of Parliament who brought such documents? Yes.

14313. And personal friends? Well, I have no personal friends in public office. If my son applied to me for anything I should subject him to the same rule as the greatest stranger.

14314. Do you recollect seeing Mr. Myles M'Rae with reference to any of these memorials or petitions? I do not. I am positive about that, because I had to inquire who the gentleman was who was speaking, when I found Mr. M'Rae addressing the Assembly. Still he might have been on a deputation to me.

14315. But you have no recollection of seeing him? None whatever. He was a stranger to me, and when he was on his feet I had to inquire who he was, soon after the new Parliament met.

14316. Do you recollect Mr. Jamieson seeing you with reference to any of these memorials? Mr. Jamieson, I think, several times urged me to open a road to some place called Kurnell, where it was proposed to establish noxious trades. Sometimes himself, and sometimes in company with others, he has urged me to expedite the opening of some roads in connection with this place; but I do not think if he were before you he would tell you he ever got much encouragement.

14317. These memorials refer more particularly to a large number of roads—in all some thirty roads, I think—on the Holt-Sutherland Estate. Can you say whether Mr. Jamieson saw you particularly in reference to any of these? I do not think so. The only thing I recollect in connection with Mr. Jamieson is his urging the settling of the noxious trades in the Kurnell locality. I do not recollect his speaking about the Holt-Sutherland Estate.

14318. Was he in the habit of seeing you frequently? Oh, yes. He is a gentleman I have been acquainted with for many years, and he used to presume upon his acquaintance to see me often.

14319. Can you tell me what course these memorials would go through, when they came before you, as regards the manner in which you arrived at the conclusion whether you could approve of them or not? Oh, in some cases I would seek information from the Under Secretary; and if he had no information I should probably ask him to obtain information. In other cases I should judge them by the circumstances at the time. In others I might attach weight to what some gentleman said on the subject, but not such weight

Sir
Henry Parkes,
G.C.M.G.,

Sir
Henry Parkes,
G.C.M.G.,
M.P.
21 May, 1889.

weight as would lead me to disregard other testimony. Considering that I had to act with great rapidity in these matters I should take the best means to satisfy myself what I would do on the occasion.

14320. Can you recollect whether you made any inquiry with regard to any of these? I do not think I have instituted any inquiry, except such as I tell you. I do not think I instituted any formal inquiry.

14321. Can you recollect seeing any other person than Mr. Jamieson in reference to any of these memorials or the work? I do not think I can. There may have been many persons seeing me. I should not recollect seeing Mr. Jamieson were it not for the fact that I know him personally so well.

14322. Do you recollect, when you were in Adelaide, receiving a telegram from the Principal Under Secretary, intimating that he had stopped some work out on the Holt-Sutherland District? No, I do not; it is hardly likely I should.

14323. Do you recollect, on returning from Adelaide, whether the matter of proceeding with the work came before you? No. Can you point it out on the paper?

14324. I will read you Mr. Walker's evidence on the point, and it may refresh your memory. [*President read questions and answers 429, 429½, 430, 431, and 432 of Mr. Critchett Walker's evidence.*] Does that recall the circumstance? No; it is scarcely likely it would. For instance to-day I have approved of a hundred things.

14325-6. Then you have no recollection whatever either of approving of the stoppage of these works or afterwards authorising them to go on? No.

14327. Is this your signature to a deed of assignment dated 12th October, 1887? That is my signature. [*Deed put in and marked X.*]

14328. I see amongst the schedule list of creditors the name of John S. Jamieson for an amount of £1,400;—can you tell me how long that amount had been due? Oh, it accrued during many years. But I doubt very much whether this comes within the scope of your inquiry; but as I have no reason for concealment I may as well answer the question. I think that had been accruing fully seven or eight years. A considerable amount of it is for interest.

14329. Were you a shareholder in the Holt-Sutherland Company? I had ten shares, which I imagine are amongst the assets of the estate.

14330. Do you recollect when you transferred them? They never were transferred to the best of my knowledge. I think they were held in connection with a mortgage by the Colonial Mutual Provident Society. But surely you are not appointed to try the Prime Minister of the country—who appointed you—to inquire into his private affairs.

14331. Can you say whether you transferred these shares to Want, Johnson, Simpson, and Minter? I do not know that I transferred them to them. I think they held them in connection with the Colonial Mutual Provident Society?

14332. What I want to get at—and I have no doubt you will see it is relevant to the inquiry—is whether at the time you approved of the construction of these works and roads on the Holt-Sutherland Estate you were or were not interested in the property? Well, suppose that I was interested, I resent with indignation the supposition that I would be influenced by any interest I might have in the property. I desire this taken down. Other persons may allow their conduct to be influenced by such motives and such objects, but I do not. My whole life gives a negative to my doing it. I do not think I ever thought of the shares; they were virtually gone from me, because they were gone out of my hands at the time this matter came before me. I can, with the most distinct sense of duty, declare that I never was in the slightest way influenced by the circumstance of my having had at one time ten shares in this property.

14333. Of course all we want to get at are the facts. Conclusions from the facts are not evidence—conclusions probably we will draw ourselves? I imagine that you will. You have got no one else to draw your conclusions for you.

14334. We consider that the matters upon which I have asked for your evidence are relevant. Do you know whether you have any interest in these shares now—at the present moment? All the world must know what interest I have in them. I could have no interest in these shares at the present time, except by the redemption of my estate. Everybody can judge of that as well as I can.

John Fitzgerald Burns, M.P., attended:—

J. F. Burns,
Esq., M.P.
21 May, 1889.

14335. *President.*] Mr. Burns, on the 15th instant I received a letter from you, in which you stated that you wished to give further evidence, and to produce papers before this Commission, and you expressed a hope that I would be able to make an appointment for you on Tuesday—that is, to-day. I do not wish to ask you any questions, but if you have any statement to make or documents to produce you can do so? I want to follow up the preceding examination; first, in connection with the questions put to me bearing upon the correspondence that passed between myself and the Government, when I was out of office, and to produce some papers which bear upon this inquiry. I was asked by you whether I did not see some incompatibility between my position as regards the construction of roads through property in which I was interested, and my position in this business as a member of the Government when the road was being constructed, and you drew a comparison between a member of the Government and a Director of a financial institution. The comparison cannot possibly apply in this case, because a Director could not go beyond his obligations to his Company; but with regard to these roads and my connection with the property at Hornsby, the origination of these roads did not occur with me, or the Government of which I was a Member, nor were they designed for my benefit. Before I took office as a Minister, the preceding Government had conceived the idea of bringing the adjoining Crown lands into the market for sale by auction. The papers show that the preceding Government—the Jennings-Dibbs Government—were pushing the sale of suburban lands by auction as much as they possibly could, and it was in connection with the design to sell all the suburban lands they could, that the application was made to me for my permission for the first road to be made through the property; so that the origination of the matter was entirely outside any control or influence of mine. The then Government began the negotiations for the opening of this first road; and I gave my consent after conferring with my partners to the opening of the road known as the Bridge Road. Up to that time I had made no application for any road in that locality.

The

NOTE (on revision).—Q. 14335, line 22.—After "locality" insert "except the road near Fear's, which the, &c." and omit "a road" and "which is, &c., to Fear's Road." Line 35.—Omit "From what, &c." to "Dibbs Government." Line 41.—Omit from "in continuation, &c., to roads."

The Government were entitled to make a road on the northern boundary of the lands of Burns, Withers, and Smith, which is sometimes spoken of as Fear's Road. All the papers, to which I have made reference since I was here last, show that the only road I applied for was the clearing and forming of the road known as Fear's Road. On the 31st March, 1886, I wrote a letter suggesting that steps should be taken for clearing and forming this road. There is a report upon the matter by Mr. Symonds, dated 21st June. There is a further note upon the same business, dated the 17th September, initialled P.J.O., in which reference is made to my having urged the clearing of the road known as Peat's Ferry Road. There is a letter from Mr. Bennett on the same subject, on the 26th September, stating that when the road was aligned by the Survey Department the clearing would be done. On the 27th October I wrote that it did not appear that any action had been taken. All my correspondence related to this road which the Government were entitled to make as the result of the settlement in 1885 between the surveyors in the Department of Lands and the surveyor of Burns, Withers, and Smith, was in reference to this road. From what you asked me on the last occasion another road than the one which was asked for during the time of the Jennings-Dibbs Government, you will see, if you look through the correspondence, that there is no reference to the road over the bridge applied for by the Government until November 10th, 1886. Finding that Fear's Road was not so good as the road over the bridge, the Government applied to me for the road over the bridge, and on the 16th November I wrote to the Government, in consequence of the application through Mr. Perdriau, assenting to the opening of the road over the bridge. Having explained this in confirmation of what I have said regarding the making of these roads, I wish to read you a minute of Mr. Copeland's, of the 3rd January, 1887. This minute shows that his Government were not satisfied with the progress made in the sale of the Crown lands by auction in the preceding year, 1886. This special minute is written to direct the officers of the Lands Department to bring into the market 500,000 acres of land in 1887, in order that the full maximum area allowed to be sold might be disposed of; and makes special reference to the proposed sale of land at Beecroft and in the parish of Gordon, and explains the action of the officers of the Department in proceeding with this road. The minute is as follows:—

J. F. Burns,
Esq., M.P.
21 May, 1889.

In considering the work of the Department for the present year, I desire that the important question of Auction Sales should receive early and special attention; and with a view to avoid the delay which occurred last year I have thought it expedient to give special instructions thus early in the year.

In the present state of the country's finances it would be desirable to effect sales during the year to the full limit of 200,000 acres, and with this object in view it will be necessary to bring forward for auction, including town and suburban and country lands, not less than 500,000 acres. These lands, as was the case last year, should be apportioned to the various districts with some degree of proportion to the amount of settlement, and to where there is likely to be a reasonable demand. In the Western Division, however, the sales will be restricted to town and suburban lands.

In cases where special areas have been proclaimed, and the land, after a reasonable interval, has not been selected, it may be brought forward to auction at the special area prices. And it should again be particularly noted that no reserve should be cancelled without a recommendation from the district surveyor as to whether such land should or should not be proclaimed a special area, so that the notice of the revocation and the proclamation of special areas should be published simultaneously, and not, as on several occasions occurred last year, when it was found only some day or two before the land was open to selection, that a special area should have been proclaimed, which, when done under these circumstances, naturally caused great dissatisfaction amongst those who, at considerable trouble and expense, had prepared to select under the ordinary conditions.

A reminder of former instructions may be sent to the district surveyors to advise the Department where reserves are unnecessary, with a view to the same being cancelled. They should also be asked to advise as to the desirability of bringing forward town and suburban lands in their respective districts and to recommend prices.

The unsold portions of Harbord, Heathcote, and Field of Mars, also the subdivision near the Como Station, may be advertised for sale at some of the auction-rooms in the city, the particular auctioneer to be forthwith decided on.

Sales at Beecroft, Stockton, Wilberforce, Katoomba, parish of Gordon, and other places where the subdivisions are ready, should be brought forward as quickly as possible, to be sold on the ground. Auctioneers in these cases can be appointed later on.

In many cases town and suburban lands have been offered at country towns, but it is thought the upset price having been fixed too high has precluded sales taking place. These lands should again be brought forward at a reduced upset.

HENRY COPELAND, 3/1/87.

I have brought this minute forward as it shows clearly the policy of the Government with respect to the sale of Crown Lands by auction, in particular suburbs. This minute makes special reference to the parish of Gordon, in which Hornsby is included. I may state that the sale at Hornsby produced £4,600. There was a sale at Gordon proper, about 6 miles from Hornsby, which realised £16,000. The policy set out by Mr. Copeland was approved by Mr. Garrett, the succeeding Minister, and it was in this connection that the application was made for these roads. Now I was asked on a previous occasion something about the roads or land, that was given by Burns, Withers, and Smith for roads to the Government, not having been proclaimed. That is a matter entirely which rests with the officers of the Survey Department. If they had sent forward the proper papers, as they did with respect to the road over the bridge, there is no doubt the roads would have been proclaimed. There was no hesitation on the part of the owners of the land in complying with the condition for the roads becoming public property. I cannot understand why this application has not been made. With respect to the application to extend the road known as the Overbridge Road through to the Eastern Road, the papers show a report of Mr. Deering's, of 17th January, 1888. Before we signed the formal assent to the dedication the officers had taken action, and the road towards the Eastern Road had been cleared under the direction of Mr. Deering. When we were asked to sign a paper (which did not bind the Government) we signed our formal consent to the road over the bridge without any obligation being attached to it, as the papers show. I am told that Mr. Bennett is at the present time very ill, and that he cannot be examined. That being so, I have taken the trouble to look through his report, and in his absence may say, having reference to the question of the first part of his report of 10th February, that what is known as Lane Cove Road leads into Peat's Ferry Road, and that it is simply a blunder on his part as to name of the road repaired by the owners of the land. The President asked me something about an application from the Lands Department for the extension of the road known as the Vanceville Road leading into the Crown lands. I have not been able to find the application that was made to me for the extension, but I have applied to the Department of Lands, and they have given me a copy of their application [*Copy letter put in marked T 1*]. I was

101—3 S

also

NOTE (on revision):—After "January, 1888," read "in which it is stated that the Government had before that date authorized the clearing of the road through to the Eastern Road. The formal assent of Burns, Withers, and Smith was not signed till 11 August, 1888." Omit "under the direction of Mr. Deering" and "when we were asked to sign a paper (which did not bind the Government)."

J. F. Burns,
Esq., M.P.
21 May, 1889.

also asked about the application made in connection with the Junction Road. I cannot find the papers. Mr. Dawson can explain as much about the matter as I could; when the application came to me, I wrote to him to attend to it. He saw the person in charge and surveyed the road; but I have no papers in connection with it. I was asked about the expenditure on Burns Road by Burns, Withers, and Smith. I know the address of Mr. Kearney who was in charge there. He is at Kellyville, near Parramatta. I believe the expenditure on that road would not exceed £100. We have expended £500 on both sides of the line. He told me the first part of the expenditure was by contract. A lot of work was done, and he was not surprised at it being estimated as being of more value than it was, as it was done much better than the work of the unemployed. The President also asked me about my visits to Hornsby. I have a record which shows the exact number of them. In 1887, I visited there on fifteen occasions; and in 1888, on eleven—making twenty-six visits in two years. I requested Mr. Dawson some time ago to go over the roads, make a full inspection, and give me a report, and also draw a plan, which he has done. If you will allow me, I will hand in his plan and report. [*Report and plan put in and marked T 2 and T 3 respectively.*] Now about the extension of Burns Road. Instead of it being a *cul de sac*, it goes to Bobbin Rock Road, and opens up connection with the main road to the Crown lands. It answers the double purpose of connecting with this country here, and also connecting with the Crown lands. I do not think the plan of Mr. Houson shows that so fully as Mr. Dawson's plan, and that is why I wish Mr. Dawson's plan put in. I should also say with regard to Mr. Dawson's report that I have given it in as he gave it to me. He is wrong in one matter about my consent. He says that I gave my consent to a small opening from the Boundary Road to the Junction Road; I think it is called the upper part of road E; but as Mr. Dawson has given his report in I hand it in without comment upon it and without alteration. I think I may be allowed to say, before I conclude my statement, that, on reviewing the whole matter, I do not see, if the thing occurred again, that I could do much otherwise than I did. I did not originate the project of opening roads to or through the Crown lands. It was not for my benefit that it was conceived. It was conceived by the preceding Government, in the interest of the public, in order to sell the Crown Lands. There is a large area of Crown Lands in the locality, consisting of at least 4,000 acres, and without roads of access the sale of it would be a matter of great difficulty. I gave my consent to the roads willingly, not so much believing that I should profit by it as that the opening of the country generally would be of some advantage to us, and I believed also a great public benefit, an important matter to the whole side of the country. As to the manner in which the work has been carried out, that is a matter with which I have had no connection. The Casual Labour Board was a body with whom I had no connection, unless applications came through the Colonial Secretary for funds to carry on the work. I may state that, under pressure of balancing the public accounts, it became my duty to press the Colonial Secretary to reduce the expenditure, and it is only in that connection that I saw Mr. Davies. Sir Henry Parkes was written to by me, complaining about the expenditure; and he sent for Mr. Davies, who promised him that he would not increase it. I believe it would have been much larger if I had not in some measure remonstrated against so much money being expended on the work. As to the roads made through private property, all the evidence shows that I took no steps to increase the work, or to promote it. I made visits on occasions, and saw what was going on. Some places, however, I did not see for two or three months, because I only visited one part of the country at a time, and did not go over it generally. In a report from Mr. Bennett that gentlemen approved of the work done. That report was backed up by other reports. I was anxious about Mr. Bennett's report knowing that he was a high authority, and I felt easy after I saw it, and did not trouble about the matter. I carefully abstained from any communication with the officers or with Mr. Davies. My intercourse with Mr. Davies was of the most formal character. Since Mr. Bennett gave his evidence before the Select Committee of the Assembly on this subject, I thought it right to write and ask him to give me his opinion with respect to this expenditure in the Hornsby district. This is a rough copy of my letter of the 22nd January, 1889. I stated that after hearing his evidence I was desirous of securing his good offices and his determining for me the value of the work for which I might be considered morally responsible, if any, at Hornsby; I said that since I had heard his evidence, when he stated that while he thought fully nine-tenths of the expenditure was justifiable in the public interest, some of the smaller roads could have been dispensed with, I thought it my duty to ascertain as nearly as I could the extent of the expenditure which in his opinion was not for the public benefit. I received a letter sometime after that—an official letter—I wrote to him privately, stating that the whole of the matter of the expenditure would be referred to this Commission, and since that I have taken no further action. I do not think I have anything further to say, unless you desire to ask me any questions.

14336. Do you recognize that tracing? I do not recognize it. It states here that it was obtained from me. I presume it was. I do not doubt that it was received from me when it says so. [*Tracing and memorandum put in and marked T 4.*]

Archibald M'Leod called in and further examined:—

Mr.
A. M'Leod.
21 May, 1889.

14337. *President.*] Do you know a man named Thomas Boulden? Yes.

14338. What is he? He has charge of the punt at George's River.

14339. Do you know his signature? I could not swear to his signature, but I think that is his on the contingent pay-voucher for £2 17s. 6d.

14340. Do you know Mr. Burrowe's signature? Yes.

14341. Is that his signature certifying to the pay-sheet? Yes.

14342. What was your position on that date, August 1888? I was the overseer.

14343. Whereabouts? I think I was at Woronora River Road, if I am not mistaken on the day.

14344. Will you look at this pay-sheet for George's River, 6th May, to 19th May, 1888, is that your name at the top of the sheet? Yes.

14345. Is Thomas Boulden's name on the pay-sheet? Yes.

14346. What for? Nine days at 5s. a day as a day labourer.

14347. Is that correct? No; he never was a day labourer.

14348. Is it false? Yes.

14349. Who supplied the particulars on which this pay-sheet was made out? I supplied them.

14350. Was Boulden's name on those particulars? No.

14351.

14351. In whose writing is this pay-sheet? I do not know whose it is, whether Springall's or Goodman's, Springall's I think.
14352. Was that name put in that pay-sheet after you had prepared your draft-sheets? Yes, it must have been.
14353. Were you present at that pay? Yes.
14354. Who witnessed the payment? Mr. Springall.
14355. Were you at the pay-table as these men came up? Yes.
14356. Did you see Boulden come up? Yes.
14357. Did you see him get £1 15s. 3d.? Yes.
14358. Did you make any objection? No.
14359. Why not? I did not consider it my place to make objection.
14360. Do you know what became of the money after it was paid to him? No.
14361. Was he ever a labourer in the ranks of the unemployed? No; he was employed under the Roads and Bridges Department.
14362. I see amongst the names on a list of persons paid by the Government on the staff of the Roads and Bridges Department that of T. Boulden, puntman, George's River, £9 9s.;—is that the same man? To the best of my belief it is.
14363. I see in a letter you wrote on 6th May instant, with reference to this case you report that Boulden was never employed at the relief works, but was a permanent man on the punt at George's River under the Roads and Bridges Department—Is that correct? Yes.
14364. You say in that letter that the only connection he had with the relief works, was that the men, horses, and traps would cross the punt to the works; that Boulden would render you a monthly account of that, and that you would forward it to Mr. Burrowes—is that correct? Yes.
14365. Was he paid his money in that monthly account? I believe that that is the money that Boulden's name is put down on the pay-sheet for; that is why he got his money.
14366. If he was on the staff of the Roads and Bridges Department, and in receipt of wages from the Government, how could he have a claim against the Casual Labour Board, such as this? I suppose for carts crossing the punt while they were employed by the Board.
14367. How many accounts did you receive from Boulden which you sent in to Mr. Burrowes? I cannot say from memory.
14368. More than one? Yes; I dare say I have sent in three or four.
14369. Do you know what became of them after you sent them in? No.
14370. Do you know who received the money for them? I suppose Boulden did.
14371. Do you know that of your own knowledge? I do not know.
14372. Was your camp at George's River? Yes.
14373. How long were you out there? Between Peakhurst and George's River, I suppose about twelve months.
14374. Was Thomas Boulden ever working in the ranks as a labourer whilst you were out there? No.
14375. *Mr. Waller.*] Do you know of any other case of men improperly receiving money, or their names appearing on the pay-sheets like this? No; I cannot say I do.
14376. Do you believe that it happened in more cases than this one? No.
14377. Are you certain that you do not know of any others? I am certain I do not.
14378. Where was Mr. Burrowes when this pay-sheet was made out in May, 1888? I do not know where he was; he might have been in one place or another.
14379. Where was he living? At Hurstville.
14380. Have you ever seen any other pay-sheet but this with Boulden's name on it? Yes.
14381. Do you know how much money was on it? I do not know.

Mr.
A. M'Leod.
21 May, 1889.

Thomas Boulden, called in, sworn, and examined:—

14382. *President.*] What are you? I have been working on the punt at George's River.
14383. Who pays you? Mr. Dyson.
14384. Who is he? Road Superintendent.
14385. How much does he pay you? Two guineas per week.
14386. I see the name "T. Boulden, puntsman, George's River, £9 9s.," in a return from the Roads and Bridges Department; is that you? Yes.
14387. It appears as nine guineas for the month? Yes. I was getting two guineas a week there. I did not get any more afterwards.
14388. Do you get two guineas per week now? It depends how many days there are in the month—if there are thirty-one days, or twenty-seven working days.
14389. Who got the money you earned from the punt? I turned it in to Mr. Dyson at the end of every month.
14390. Whatever you received for taking over horses, vehicles, and men you paid over to an officer of the Roads and Bridges Department? Yes.
14391. Did you get any benefit from it yourself? None at all.
14392. Is that your signature? Yes.
14393. Can you write? I am a poor writer.
14394. Whose writing is this? The particulars in the voucher are mine.
14395. I see there are in it various dues, amounting to £2 17s. 6d.? Yes.
14396. Is that the same thing as on the other contingent voucher? It is the same. I was up at Hurstville and saw Mr. Burrowes. I asked him if I was going to be paid. He said, "how much is it," I said, "£2 or £2 17s. 6d." He asked me if I had got it. I told him I had not. He said he would give me that sheet for me to make it out on, and that he would get it for me if he could. I was never paid it.
14397. Did you get any other sums besides that? Yes.
14398. How often? A couple of times, I believe.
14399. Who paid you? I got it at Hurstville pay-table.
14400. How much? At one time 24s. or 25s. and 30s. the next time.

Mr.
T. Boulden.
21 May, 1889.

14401.

- Mr. T. Boulden. 14401. You see what kind of a document this is—did you get paid any sums under a document like this? No.
- 21 May, 1889. 14402. Look at that pay-sheet—George's River, from 6th May to 19th May, 1888—is that your signature acknowledging the payment of £1 15s. 3d.? Yes.
14403. Did you get it? Yes.
14404. What did you do with it? I put it in the toll sheet with the other money that was taken.
14405. What became of it? I turned it in.
14406. To whom? To Mr. Dyson. I used to pay up this out of my own pocket at first to make up the account of what had crossed.
14407. Do you see that this pay-sheet says that you were nine days at work, at the rate of 5s.; that you earned £2 5s., and that 9s. 9d. was deducted for rations. Were you amongst the ranks of the unemployed? No.
14408. Did you receive any rations? No.
14409. Did you ever do any work for them? No.
14410. Are these particulars on this pay-sheet true or false? That sheet, I believe, is true. When I signed that I did not know that I was signing for daily wages. I thought I was signing for the punt money.
14411. Did you get rations? No.
14412. You see that there is a deduction for rations? I see it.
14413. Do you know Mr. Springall? Yes.
14414. Did you ever have any talk with him? I was up there about a couple of times and asked him whether that money had come up. He said "No; Mr. Burrowes would see about it."
14415. Did he ever say anything about your rations? No.
14416. Did you ever get anything from him? No.
14417. Did you ever give him any money? No.
- 14417½. Mr. Waller.] What other money have you received besides that £1 15s. 3d.? There was something over £1.
14418. Did you receive £1 6s.? Something to that effect; but whatever I got I turned in with the other tolls.
14419. Then you were engaged on the Roads Department staff and not with the unemployed? I had nothing to do with the unemployed.
14420. How many punts were you connected with? I have been at Tom Ugly's once or twice that is all.
14421. Do you know how much money was owed you by the Casual Labour Board? There was £2 19s. and these couple of bills. I do not know of any more.
14422. Who owed you that money? The carts were crossing while the unemployed were working.
14423. Who is the person you look to to pay you the money? I sent in my accounts to Mr. M'Leod.
14424. Did you ever lend any money to Mr. Burrowes? No.
14425. Are you sure of that? Quite sure.
14426. President.] Did you render any account of what was owing to the Roads and Bridges Department? I told Mr. Dyson it was owing.
14427. What did you tell Mr. Dyson was owing? This £2 19s.
14428. Have you paid him any of the money? I have paid him £2 of it.
14429. Then you owe the Roads and Bridges Department 19s.? The Casual Labour Board owe me £2.
14430. Did you pay Mr. Burrowes any portion of the money you got? No.

Alfred Hibble called in and further examined:—

- Mr. A. Hibble. 14431. President.] I put in your hands a statement [*Exhibit P1*];—is that your handwriting? Yes.
- 2 1 May, 1889. 14432. When did you make it out? There is no date on it, but I believe I made it out some time before 1st February last.
14433. Who asked you to make it out? Mr. Davies, when he was in the office, and I believe I handed it to him in the presence of Mr. Mason. I think Mr. Mason could verify what I say.
14434. Was it after the 25th January? Yes.
14435. Why did you make it out? Mr. Davies asked me to make it out.
14436. Where? In the office. It is just a copy of our press-copy book.
14437. When did you see Mr. Davies last to speak to? It is a long time ago now. I have not seen him since I was here—not since he was in the office looking after Larnach.
14438. In whose handwriting is this rough cash-book in? There is a lot of it in Hinchcliffe's writing.
14439. Up to what date does Hinchcliffe's writing go? Up to 14th November, 1887.
14440. And from that date it is in your handwriting? It is my handwriting right through then.
14441. Then Mr. Hinchcliffe carried it on for the two months after you went into the office? No. I went into the office in June; I went upstairs in September. Mr. Hinchcliffe carried it on for two months after I went upstairs.
14442. When did you write up that rough book into this cash-book? After I went upstairs.
14443. Did you make one job of it? No, as I had time I kept the two books going. I would not take the book over without striking a balance, so I kept it as a rough book and opened the other one afterwards.
14444. How often did you add up the figures at the foot of the page? I kept them pretty well up until August or September last year.
14445. Did you ever strike a balance? No; I never did, because Mr. Hinchcliffe kept the vouchers in hand.
14446. Did you ever ask him? Yes; but he said "Just enter the vouchers as I give them to you."
14447. What are these blank lines left in the cash-book for? When I first took the book over I said, "Mr. Hinchcliffe had a wrong idea." I said "If you have cash vouchers you should make them 18a, 18b, 18c, and so on." He said "No; leave lines to enter them as they come in."
14448. Then these lines were left to enter these cash vouchers just as he might think fit? Yes; just as he sent them in.
14449. Are the cash vouchers those we see marked A? Yes. 14450.

Mr.
A. Hibble.
21 May, 1889.

14450. Then those lines were left in the cash-book to put in the A vouchers, just as he might think fit to put them into your cash account? No; I would not say to make up the cash account. The idea was to put them in as near the date as I could get them.
14451. You said when Mr. Hinchcliffe paid the vouchers he handed them to you? Yes.
14452. Then what about those in his box? I could not tell. I never had access to his box. He might have paid £50 out of his petty cash. I could not tell.
14453. Supposing a voucher was paid in your presence, was it handed to you or put in the box? It would be put in the box and given to me on some future date. He would never give them to me straight away.
14454. Did you ever hear any particulars of this "bye account," as you have called it, between Mr. Hinchcliffe and Mr. Davies? No.
14455. You were in the same room and could see what was going on? Yes.
14456. Was everything straightforward? I believe everything was straightforward.
14457. Between Mr. Hinchcliffe and Mr. Davies? I solemnly swear it, as regards them and the petty cash.
14458. What about keeping all these vouchers in the box? I cannot say. I do not know what amount of vouchers he had; but the transactions between him and Mr. Davies as to the petty cash were honest and straightforward.
14459. Were you present when they settled up? I was present when they had a bit of a squaring up in October, before Mr. Hinchcliffe went to Melbourne.
14460. When did Mr. Hinchcliffe return? He returned about the 28th or 29th November last; I cannot say the exact date. I did his duties up to then.
14461. Were you present when the final settling up was made? No. I was there, but Mr. Davies asked me to take certain vouchers down to the office.
14462. I mean the final settling up? No. There was a final settling up, but I do not know what transpired.
14463. Do you know what amount was paid over? What it was I cannot tell. I was not present, and did not see any money pass between them.
14464. You said in your previous evidence, after being pressed, that Hinchcliffe told you he was short in his cash, and that you believed he drew on his own Bank, and that you saw him draw cheques out? That evidence of mine is wrong.
14465. Is it untrue? It is not untrue.
14466. I will read it to you. [*Questions and answers 7296 to 7303 read.*] Is that true evidence? A certain part of it is true, and a certain part not. I did not say he drew a cheque on the London Chartered Bank. I said I saw him draw cheques on the London Chartered Bank, because they were his bankers; not because I saw him draw the cheques.
14467. Have you seen Mr. Hinchcliffe lately? I saw him a week ago.
14468. Did you have any discussion? He said that I had put him away in my evidence.
14469. "Put him away." What did he mean by that? He said, "I think you put me away." I said, "I don't think I have."
14470. Was that his own expression? It was, and I walked away.
14471. Did you not bring up this question about the cheques? I will take my oath about it.
14472. I see in another part of the evidence, speaking of the cash-book, you got particulars from the cheque-book, and when Hinchcliffe got the vouchers he would hand them over. Did he hand them over to you to be entered in the cash-book? Always; they must go through the cash-book.
14473. Did he get them back afterwards? He never saw them afterwards. You will see there that you asked me if Mr. Hinchcliffe was short in his cash and I said "No."
14474. But later on in your evidence you said "Yes." I have a note that you contradicted yourself, and your evidence speaks for itself. You spoke in your previous evidence of some rumour you heard of Mr. Burrowes in connection with a road running round Mr. Gannon's property? I heard he put a road there called the Wotonga Road. It cost three or four times as much as it ought, and therefore he must have put an extra road round the property.
14475. Do you wish to add anything to your evidence respecting these two vouchers [*Exhibits E 2 and E 3*]? I can hardly recollect what I said about them.
14476. Do you know anything about them? I have initialled them for the computation being correct. Mr. Larnach has taken the discount off them.
14477. Is that all you know of them? That is all I know of them. I have had them before me with Mr. Mason; I ought to know them well now.
14478. I will read to you question and answer 4434. [*Question and answer read.*] What do you say about that evidence? I say he is a most damnable liar. He never signed a single solitary contingent voucher in our office in his life-time.
14479. If Mr. Hinchcliffe has sworn that Burrowes has on some occasions signed vouchers in the office is his evidence also untrue? He may have signed pay-vouchers, but contingent vouchers he never signed in the office. They are two different things altogether. If Mr. Hinchcliffe swears he (Burrowes) signed contingent vouchers in the office he swears what is not true.
14480. I will read question and answer 2565. [*Question and answer read.*] What do you say to that? He is as big a liar as the other man; that is all I can say about it, although it is pretty rough language to use.
14481. I will read to you an extract from a letter [*Exhibit I*] with reference to this matter;—what do you say to that? He is a liar still—a bigger liar than ever he was. I never handed him a voucher in my life-time for signature.
14482. Did you ever see any order for these goods? I gave an order to M'Lean Bros. and Rigg for "a hamper basket," and I brought it to the office. As for Mr. Burrowes saying that he signed the vouchers in the office he is a liar.
14483. *Mr. Waller.*] That time that you saw Mr. Davies and Mr. Hinchcliffe settling up, before Mr. Hinchcliffe went to Melbourne, do you know what amount passed between them? I think there was about £90 odd due to Mr. Davies, I cannot say for certainty. 14484.

NOTE (on revision):—Q. 14461—Omit "I was there" and add after "office" "of Colonial Secretary for approval." Q. 14463—He said that I think you have put me away in your evidence. Q. 14470—Add to end of answer "upon my business."

- Mr. A. Hibble.
21 May, 1889.
14484. Can you give any reason for this keeping back all these vouchers for months and months? No; it was Mr. Hinchcliffe's own business. If he kept them back it had nothing to do with me.
14485. Can you give any reason? I can give no evidence about it.
14486. Can you give any reason? It was his own carelessness. That is all I can give.
14487. In your former evidence you said you were in the hay and corn business;—what were you doing before that? I was in a general business for myself.
14488. Were you in a bank? Yes.
14489. Where? In the Commercial Bank, in the city.
14490. What branch? George-street West.
14491. What position? As manager.
14492. Why did you leave? I retired.

William Newcombe called in and further examined:—

- Mr. W. Newcombe.
21 May, 1889.
14493. *President.*] Look at this statement we received from the Treasury of amounts paid into Treasury up to 29th March last [*Exhibit L*], and tell me whether any sum has, since the date of the last item, been paid into the Treasury by or on behalf of Mr. John Davies, or by any one else connected with the Casual Labour Board? Yes, one item; a sum of £26 17s. 7d.
14494. Will you tell me when that was paid in and the circumstances—if you know them—connected with the payment? It was paid in on the 7th May by the hands of Mr. John Davies' son, by a cheque of Mr. John Davies, on the City Bank, Sydney, dated 6th May, 1889, number two account, number B, 4,234, in favour of the Treasury.
14495. Are you sure it was a cheque? Yes; I took special note myself.
14496. Because we have been told the Treasury will not take cheques? We have a notice up in the office saying that cheques are not taken, but we take any number of them. We use our discretion whether we take them or otherwise.
14497. Did you have brought under your notice a letter, dated 15th April last, signed by the members of this Commission, addressed to the Colonial Treasurer, requesting that any moneys that might be tendered for payment to the Treasury might be placed to a suspense account pending this inquiry? Yes.
14498. Was that amount, £26 17s. 7d., which you say was paid in by Mr. Davies' son, passed to any particular account? To the suspense account, in accordance with the letter.
14499. Is that the only payment that has been made? Yes; the only payment.
14500. Will you look at this receipt voucher for £86 11s. 7d.;—is that signed by Mr. Davies? Yes. It is dated 25th February, 1889.
14501. From where was that statement attached to it obtained. Was that handed to you by Mr. Davies? I cannot say anything about that. I have no recollection of having seen it before. [*Receipt voucher for £86 11s. 7d. put in and marked O 3.*]

CASUAL LABOUR BOARD INQUIRY COMMISSION.

APPENDIX.

[To Evidence of D. Houston.]

A.

MINUTE or Document of 2nd May, 1887, signed by Sir Henry Parkes, directed to John Davies, Esq., C.M.G., Col. F. Wells, and D. Houston, Esq., copied *in extenso* in Report.

A 1.

PRINTED Return of the "Unemployed," showing number of applicants for work, where they came from, and how dealt with, from 2nd May, 1887, to 31st December, 1888.

A 2.

SKETCH tracing showing roads cleared by the Casual Labour Board at Hornsby on Crown lands, Burns, Withers, and Smith's, and other properties.

[To Evidence of Critchett Walker.]

B.

Sir,

Colonial Secretary's Office, Sydney, 29 December, 1888.

I am directed by the Colonial Secretary to convey to you the views of the Government in respect to the heavy expenditure in support of that class of persons known as the "unemployed." These irregular expenditures have gone on far beyond what was contemplated at the beginning, and the amount to which they have reached is not only a serious drain upon the public revenue, but is calculated to assist in creating an erroneous and a prejudicial impression abroad of the real condition of the country. It may be doubted whether at any time there has been in New South Wales relatively a larger number of persons who have found a temporary difficulty in obtaining employment than in other countries; but the Government of this Colony, from several mixed causes, has more readily than other Governments, afforded a forced means of employment which, however attempted to be directed to purposes of public utility, cannot be entirely divested of an eleemosynary character. The effect has been to draw a certain class from other countries, thus increasing the difficulty which it was sought to remove or diminish. Not only so, but in some cases the works opened by the Government appear to have induced men to desert the legitimate operations of private employers. This unhealthy state of things, so unnatural in a country where the most precious thing is trustworthy and well-directed human labour, if initiated mistakenly, cannot be continued by the perpetuation of fresh mistakes.

I am to say that, so far as Sir Henry Parkes can judge, the greater part of the work done by this class of men has been of solid value to the State, and he feels persuaded that the gentlemen forming the Casual Labour Board have done their best to direct this large body of labour to the best advantage of the public. Still he feels it to be his duty to give this positive instruction, that no public improvement, however undoubted, is to be undertaken where the effect would be to incidentally serve the interests of private proprietors, without the case being first specifically stated to him, and receiving his written approval on the part of the Government.

As already intimated, the system itself must be brought to an end. You will take the necessary steps to make known to the men that their services will be dispensed with in the following divisions:—One-third of their number on the last day of January next, one-third on the last day of February, and the remaining one-third on the last day of March. No fresh hands are to be taken on the works.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Chairman of the Casual Labour Board.

Sir,

Casual Labour Board, 82, Goulburn-street, Sydney, 31 December, 1888.

I have the honor, on behalf of the Casual Labour Board, to acknowledge receipt of your letter of 29th December, conveying the views of the Government with respect to the expenditure, &c., incurred in support of the "unemployed."

We will have much pleasure in giving prompt attention to the request of the Colonial Secretary in dispensing with the services of all men employed on the several works, so as to close them up by the 31st March.

This would have been realized at a much earlier period if public works had been authorized, as was contemplated when our Board was appointed, which would have been a natural means for absorbing the large amount of surplus labour which had been attracted here from other Colonies, and from all parts of the country, by an injudicious system, inaugurated by a previous administration, where unskilled labourers, whose rations, tents, tools, &c., were insured to them, and with wages not less than 6s. per day, were induced to leave private employ and flock to the city.

One of our first acts was to put a stop to this improper system, and to institute a system of piece-work and payment by results, and where day labour could not be dispensed with the rate was reduced to 3s. 6d. per day; in consequence of such act the works ceased to be attractive, as they were prior to our appointment.

When we took over the charge of the "unemployed" there were on the several works 4,010 men, and during the period we have been in existence upwards of 8,000 men have passed through the books, and of this number about 2,400 were provided with private employment at the current rates of wages, and a large number, profiting by the temporary assistance afforded them, have been enabled to find employment in the ordinary channels of labour, and at the present time less than 1,000 men are now employed on the different works under the control of the Board.

Although a great expenditure has been incurred in directing this large body of labour, it will be seen that the work carried out in improving Crown lands subdivisions, the making of public roads, the beautifying of public parks, and other public works, that good and substantial value has been realized for the expenditure.

Your Board, since its appointment, has not undertaken the carrying out of any public works without first obtaining the reports from the Government officers and subsequently the approval of the Colonial Secretary (excepting those works initiated before their appointment).

We found it no easy task in directing so large a body of mixed labour so that the best results might be obtained; and the prejudicial impression created abroad by the massing of large numbers of unemployed in the city, and the besieging of public offices, has been abolished by the action taken by us; this state of things will, in a measure, we think, revive on the closing of the several works under the control of the Board, in the absence of the authorization and opening up of public works which are urgently required as avenues for absorbing the large masses of unskilled labour at present only partially employed in the city and large centres of population. The Board is much pleased to find by tenor of your letter that their efforts have been appreciated by the Government.

I have, &c.,

JOHN DAVIES,

Chairman.

The Principal Under Secretary.

B 1.
CASUAL LABOUR BOARD.

THE Cabinet has had under its serious consideration the question of the unemployed and the Casual Labour Board, and it has decided, in view of the evidence given at the Select Parliamentary Committee, and having regard to the unsatisfactory working of the existing Board, to terminate the labours of the gentlemen forming the Board, who will be relieved forthwith.

The Cabinet has further decided to appoint two gentlemen of standing to adjust the accounts and wind up the Casual Labour business; it being the intention to go further into the subject when time can be given to its consideration, and a full attendance of the Cabinet be secured.

It appears to the Cabinet that the method hitherto adopted of distributing large sums of public money is loose, imperfect, and unsatisfactory. The gentlemen to be appointed will be requested, in making payment, to adopt a system more in accordance with that followed in the Treasury Department. The gentlemen to be appointed will close the unemployed work in terms of the minute of my predecessor of 31st December last.

The question of payments to the men now employed will be dealt with on the report of the gentlemen referred to.
Colonial Secretary's Office, Sydney, 23rd January, 1889. G. R. D.

B 2.

Minute—Casual Labour Board—Termination of services, &c.

Colonial Secretary's Office, Sydney, 24 January, 1889.

UNDER the circumstances contained in the accompanying papers, I recommend that the services of the gentlemen forming the Casual Labour Board be terminated forthwith, and that the undermentioned gentlemen be appointed for the purpose of adjusting the accounts and winding up the business of the Board, namely:—John B. C. Miles and William Mason, Esquires.
GEORGE R. DIBBS.

The Government wish that the recently-appointed Board should pay all moneys due to the unemployed, and that the duties of the gentlemen forming the Casual Labour Board should cease at once. It is the wish also of the Government that all work and responsibility for the future surveillance of the men engaged under the Casual Labour Board should be undertaken by Mr. Mason, C.E., and Mr. Miles, absolutely.

Pro G. R. DIBBS,
JOHN LACKEY.

B 3.

Colonial Secretary's Office, Sydney, 25 January, 1889.

Sir, I am directed to acknowledge the receipt of your letter of the 24th instant, regarding the termination of the Casual Labour Board, and to inform you that a letter on the subject was sent to you this morning.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Hon. John Davies, M.L.C., C.M.G., Chairman, Casual Labour Board.

B 4.

Sydney, 31 January, 1889.

Sir, We have the honor to inquire whether it is the desire of the Honorable the Colonial Treasurer that the money now due to the unemployed shall be disbursed by us or by the Chairman of the Casual Labour Board, who is still engaged on the duties of that Board.

We shall be glad also to be informed when the services of the Chairman and the other two gentlemen forming the Board will cease, as we are quite prepared to undertake all the duties committed to us under our appointments of 25th instant.

We have, &c.,

WILLIAM MASON, C.E.
JOHN B. C. MILES.

The Principal Under Secretary, Colonial Secretary's Office, Sydney.

B 5.

Colonial Secretary's Office, Sydney, 25 January, 1889.

Sir, I am directed by the Colonial Secretary to inform you that the Government have decided to forthwith terminate the services of the gentlemen forming the Casual Labour Board, and have appointed the gentlemen noted in the margin for the purpose of adjusting the accounts and winding up the business of the Board, and to request that you will be good enough to hand over to the gentlemen named all the books and documents in connection with Board.

2. I am also desired to enclose for your information copies of the correspondence and of Mr. Dibbs' minute on the subject.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Hon. John Davies, M.L.C., C.M.G., Chairman, Casual Labour Board.

B 6.

Casual Labour Board, 82 Goulburn-street, Sydney, 24 January, 1889.

Sir, Referring to my several interviews with the Honorable the Colonial Secretary in respect to the usual advance of £6,000 from the Treasury (which had been previously authorised by the late Colonial Secretary), to enable the Board to pay the wages of the men engaged upon the Public Relief Works, I have the honor, on behalf of the Board, to inform the Honorable the Colonial Secretary that the wages for the men engaged on the works at Liverpool, Campbelltown, Woolwash Road, Rookwood, Bankstown, and Leichhardt Park are now overdue, and unless the money is this day made available, the Board respectfully submit that they cannot be held responsible for any results that might happen.

I have, &c.,

JOHN DAVIES,
Chairman.

The Principal Under Secretary, Sydney.

Send copy of my minute, together with copy of the late Colonial Secretary's minute.—G.R.D., 24/1/89. Done, 24/1/89.

B 7.

Casual Labour Board, 82, Goulburn-street, Sydney, 24 January, 1889.

Sir, I enclose paragraph clipped from this day's *Daily Telegraph*, headed "Casual Labour Board," and as the Board has not up to the present received any official intimation of the truth or otherwise of the enclosed paragraph, I deem it as due to myself and colleagues that if there is any truth in it that the Board has been treated, to say the least, in a most discourteous manner by the Government.

I deemed it my duty personally to wait upon the Hon. Colonial Secretary on Monday morning last, to ascertain his views with reference to his further action of the Board, regarding the instructions received from his predecessor, and I was informed by the Hon. Colonial Secretary that the Board were to give effect to Sir Henry Parkes' letter of 31st December last, and not to depart from those instructions until we heard to the contrary from him.

You

J. B. C. Miles,
Esquire.
William Mason,
Esquire.
2 enclosures.

You will observe that the paragraph alludes to the loose and irregular manner in which a large amount of public money has been spent. The Board deny that there has been any loose and irregular expenditure, and I demand, on behalf of the Board, that an officer be sent from the Treasury to examine and investigate the accounts and expenditure.

I may also state that as soon as the report referred to in the paragraph (9) of the Select Committee on Hornsby and Holt-Sutherland Roads report appeared, wherein it states that no audit of the accounts had taken place—knowing this statement to be wholly unfounded, and not supported by any of the witnesses giving evidence before this Committee, which will be seen upon perusal of the report—I felt it my duty, on behalf of the Board, to personally wait upon the then Colonial Treasurer, and requested him to send the Treasury Inspector to examine our books and accounts. He immediately called in the Under Secretary for Finance and Trade, and the Treasurer told him that I requested an officer might be sent to conduct the necessary inquiry into our books and accounts. The Under Secretary informed the Treasurer that there was no necessity for such, as the accounts were regularly examined and checked by the Treasury officers, as also by the Auditor-General, to whom they were afterwards forwarded.

C. Walker, Esq., Principal Under-Secretary, Sydney.

I have &c.,

JOHN DAVIES, Chairman.

[Enclosure.]

Daily Telegraph, 24/1/89.

THE CASUAL LABOUR BOARD.

The Cabinet sat for a considerable time yesterday afternoon. The principal matter under consideration was that of the unemployed and the Casual Labour Board. It was decided, in view of the evidence given before the Parliamentary Committee and of the unsatisfactory working of the Casual Labour Board, to relieve the gentlemen forming that Board from further duties, and to appoint two commercial men of high character to close the accounts and the operations of the unemployed, in the terms of Sir Henry Parkes' minute of December 31 last, a minute which provides for the gradual extinction of the unemployed movement altogether. The Cabinet also decided, in view of the loose and irregular manner in which a large amount of public money has been spent upon this department, to request that the two gentlemen they appoint shall adopt a system similar to that employed by the Treasurer in regard to the expenditure of public money. With reference to the wages of the unemployed, the Government leave it to the Board to bring up a report of the position of affairs, and upon that report action will be taken.

B 9.

I CANNOT understand why Mr. Hinchcliffe should have a salary of £350, when in his late office he only received £190; and the Board certainly cannot appoint officers or do more than recommend, as in other branches of the public service. Mr. Davies had better see me.—H.P.

This letter can be withdrawn by Board, and another of a more explanatory character substituted.—H.P. 87/5,744. 27 May. Withdrawn.—C.S. Letter should state necessity for creating office, nature of duties, &c., and recommend appointment.—The Chairman of the Board. B.C., 31/5/87.—C.W.

B 8.

Recommending that T. C. Hinchcliffe be appointed at £350 per annum, and F. J. Josephson at £250 per annum.

Sir,

I have the honor, on behalf of the Casual Labour Board, to recommend the appointment of Mr. Thomas Cooper Hinchcliffe as Secretary and Paymaster, at a salary of £350 per annum. This gentleman, until recently, was employed in connection with the Immigration Department, at a fixed salary of £190 per annum; and in addition to services rendered to that department, was engaged for some months previous to the appointment of the Casual Labour Board, in assisting Messrs. Wise and Deering in connection with the unemployed, and he was allowed £1 for each pay, as paymaster in charge; equal to £130 per annum; and received £50 as compensation for additional services rendered to the unemployed, equal to £100 per annum; making, in all, £420 per annum.

The duties performed by Mr. Hinchcliffe are onerous and very responsible, having the custody and control of large sums of public money. On these grounds I recommend for the favourable consideration of the Hon. Colonial Secretary the salary named.

I have the honor also to recommend the appointment of Mr. Francis Jacob Josephson as Registrar and Assistant Paymaster, at a salary of £250 per annum.

This gentleman was, till recently, employed in the Immigration Department, at a fixed salary of £190 per annum, and he received a bonus of £25 for special services for the half year, being equal to £50 per annum, in connection with the control of the unemployed, making a total of £240 per annum.

Mr. Josephson has charge of the registrar (*sic*) of all applicants for employment, and attends to the drafting of the unemployed to the various works, and otherwise performs the duties of clerk and assistant paymaster. I respectfully submit the above recommendations for the favourable consideration of the Hon. Colonial Secretary.

I have, &c.,

JOHN DAVIES,
Chairman.

Hon. Colonial Secretary, Sydney.

These gentlemen can only be employed temporarily. Considering the responsible nature of their duties I approve, on the recommendation of the Board, of the rate of the remuneration submitted. But the Board must keep in mind that the whole work is temporary, and guard against any circumstance giving to their proceedings the appearance of permanence.—H.P., 3/6/87. U.S., Treasury, 7/6/87.

The Chairman, Casual Labour Board, B.C., 7/6/87.—C.W., P.U.S. Seen.—T.C.H., F.J.J., J.D., Chairman, B.C., 16/6/87. The Principal Under Secretary. To be noted and returned. Returned, C.S.O., 17/6.

B 10.

LET Mr. Ormiston bring down here the whole of the old books in connection with the Casual Labour Board, and let Mr. Hinchcliffe be removed forthwith. The new books to be placed in the charge of Mr. Ormiston.

G.R.D., 6/2/89.

The Board appointed to relieve the old Board to take over premises.—G.R.D., 6/2/89. Mr. Ormiston, B.C., 6/2/89.—C.W.

In accordance with these and verbal instructions, we informed Mr. Hinchcliffe to-day that his services would be dispensed with after the 12th inst.; but he requires that written notice to that effect be given to him by the Government, as he is an officer appointed by the Executive Council, and meantime declines to relinquish his post here. We are in possession of all the books and papers in the office, and have had separate books opened for recording the dealings with the moneys which pass through our hands. Mr. Ormiston can have access to these books at any time he may desire.—W.M., J.B.C.M., 8/2/89.

Mr. Hinchcliffe's services, I understand, are now no longer required. Perhaps he should be informed in this sense.—C.W., 12/2/89. Approved.—E.B., 12/2/89. H. Hinchcliffe, 12/2/89.

B 11.

PRINTED papers in connection with various roads and other works carried out by the Casual Labour Board at Ryde, Eastwood, Carlingford, Beecroft, Hornsby, Dural, Coolah, Thornleigh, and Berowra.

B 12.

PETITION dated 15th August, 1889, addressed to the Honorable John Davies, C.M.G., M.L.C., signed by certain residents of Campbelltown, praying for road of access to George's River.

Minute thereto, as follows:—

"You will please have 3 (three) gangs of men put on to this work as soon as possible, proceeding yourself to lay out the work at once. The men can be sent from Sydney, if you wish.

J. DAVIES,

Chairman,

20/8/88."

Mr. E. M. Burrowes, Hurstville.

The Chairman, C.L.B.—This work has been started under the supervision of A. Campbell.—E. M. BURROWES, Superintendent, 28th August, 1888.

[To Evidence of T. C. Hinchcliffe.]

C.

RECEIPT for vouchers to the amount of £536 14s. 10d. and cheque for £100, signed by Messrs. Mason & Miles.

C 1.

LETTER from Principal Under Secretary to Mr. T. C. Hinchcliffe, informing him his services as Secretary to the Board would not be further required.

C 2.

New South Wales.

D.

ROUGH sketch prepared by Mr. W. M. Gordon, being a section of Boundary Road and Junction Road, showing grades.

D 1.

Memorandum by Colonel Wells.
Roads cleared by Casual Labour Board near Hornsby.

Sydney, 13 November, 1888.

AFTER reading papers already submitted, I have little to add. Some two or three years ago, in a casual conversation on the subject of the prospects of the Northern line of railway, Mr. Burns, M.P., mentioned his willingness to let the Government have a road through the lands owned by "Burns, Withers, and Smith," to connect the proposed Hornsby Railway Station with the Vanceville, or Eastern Road, part of which had been formed by the Roads Department, provided the Department would clear and form it for traffic. This was merely conversational; but had it come before me officially, from my knowledge of the locality, I was prepared to recommend this being done in the usual course as a necessary public work. Some time elapsed, and work had to be found for surplus labour—first by Roads Department scrubbing Crown lands on Field of Mars and clearing roads in access thereto from railway stations. Subsequently this work was taken over and extended by Mr. Deering and the staff of surveyors engaged in the subdivision of Crown lands proposed to be sold at Field of Mars and in parish of Gordon, between the railway and Narrabeen.

After the appointment of the Casual Labour Board, in May, 1887, the control of these works devolved on that body. A large quantity of land had been partially cleared for sale near Hornsby, and subdivision roads cleared; it therefore became necessary, as at other places, to give access to railway and enhance value. A petition was presented by Mr. Ives, M.P., to the Minister for Works, in November, 1887, praying for construction of road from Vanceville Road, where work had been left off by Roads Department, to Hornsby Railway Station. This being forwarded to Casual Labour Board, it was deemed advisable to comply with it.

In order to do this, and at the same time benefit the Government property, the only way was to adopt the subdivision road (Junction-street) through Burns, Withers, and Smith's property, with tributary roads, as shown on Mr. Gordon's map, tapping the Crown lands on the plateau or spurs between the gullies falling to Cowan, these gullies being such formidable obstacles on the line of the Government Boundary Road as quite to preclude it from adoption. To ratify this, very close personal inspection of the surroundings was made by Mr. Houston, a member of the Board. Junction-street and the unformed portion of Vanceville Road were accordingly made, and the former extended through various properties to Bobbin Head Road, and other lines of access to the Government estate. It was also deemed advisable to continue the tributary roads, C. I. and D. H., on Mr. Gordon's map, to the Lane Cove Road, as such access would enhance the value of Crown land.

Since our conversation in 1885 or 1886, I have heard nothing whatever from Mr. Burns in connection with these roads, nor, I believe, has any other member of the Casual Labour Board, which has only been prompted by a desire to find useful and reproductive work for the unemployed. The prices brought at the sale show the result.

F. WELLS, Col.,

Member Casual Labour Board.

D 5.

[Presented by Mr. Ives, M.P., 11 November, 1887.]

Petition for Repairs to Road known as the Great Eastern or Vanceville Road.

To the Honorable John Sutherland, Minister for Works.

Sir,

WE, the undersigned landowners and others, have the honor to request that you will be good enough to grant a sum of money for the repair and improvement of the road known as the Great Eastern or Vanceville Road, from the Lane Cove Road to the new road recently cleared by the Government from Hornsby Railway Bridge. The Great Eastern Road has to bear a large amount of traffic, which will be increased by the opening of the new road above referred to, and which is known as Boundary Road.

Works Department, 87-10,597. 11/11. Roads, B.C., 12/11/87. Public Works, 87-17,387, 15th November. Colonial Secretary, 87-12,830, 21 November. This is a paper which should be sent to the Casual Labour Board, as work is being done by the unemployed in this vicinity.—W.C.B., 14/11/87. Under Secretary, B.C., 16/11/87. B.C., Principal Under Secretary, 16/11/87.—J.R. Refer to Casual Labour Board. C.W., 22/11/87.

D 6.

Casual Labour Board, 82, Goulburn-street, Sydney, 18 October, 1887.

Sir,

Enclosed herewith you will please find tracing of roads recommended to the Board by their local officer at Hornsby, to give better access to the adjacent Crown Lands. Should yourself and co-partners have no objection to the opening of these roads marked A, B, C, instructions will be given to have them commenced forthwith.

I have, &c.,

THOMAS HINCHCLIFFE,

The Honorable J. F. Burns, M.P., Treasury.

Secretary.

Put with papers, Roads to Hornsby Station, (*here some words illegible*) and resubmit when Mr. Symonds is next in office.—W.C.B., 12/11/88. B.C.—Mr. O'Donnell for report.—J.D., Chairman, 24/11/88.

D 7.

D 7.

Sir, In reply to your letter of yesterday's date, I beg to say, on behalf of Burns, Withers, and Smith, that I have no objection to the roads shown on the tracing enclosed therein, being opened for the public use.

Sydney, 19 October, 1887.

Mr. Thomas C. Hinchcliffe, Secretary, Casual Labour Board.

I am, &c.,
J. F. BURNS.

D 8.

Re enclosed petition and Junction and Boundary Roads.

Sir,

I have the honor to report *re* petition attached, and for Casual Labour Board's information, that I am forming Junction-street and Vanceville Road, and when ballasted I believe will answer the requirements of the district for some time. By referring to the plan* you will see that Boundary Road is a parallel road to Junction Road. It would take an immense amount of money to make it available for traffic.

Hornsby Junction, 1 December, 1887.

Therefore I will not do anything further to same until I hear from the Board.

F. O'DONNELL,
Superintendent.

Mr. Superintendent O'Donnell to the Chairman, Casual Labour Board.

[To Evidence of J. B. C. Miles.]

No. 552. Order for Issue of Stores.
To Messrs. M'Lean Bros. & Rigg,—
PLEASE issue the undermentioned articles to office, viz :—
1 hamper basket.

10 September, 1888.

JOHN DAVIES,
Chairman.

[To Evidence of E. M. Burrowes.]

I.

Sir, Hurstville 9 February, 1889.
In attention to the request of the Honorable the Colonial Secretary of this date, that I should send you a report as to various matters contained herein, I have the honor to commence by giving the *modus operandi* of the way our payments are prepared. It has always been my custom, and that of the Assistant-Superintendent, to go round to our various camps and inspect, value, and measure up on the last two or three days of the fortnight, then such valuations were committed to the "Draft Abstracts" (enclosed), which were handed to Mr. Springall to prepare the vouchers (pay-sheets), which, when finished, were copied into letter-book and signed by myself as the Superintendent; they were then forwarded to the Board Office, to be there dealt with.

Re Flemming's case.

By the abstracts (enclosed) you will please observe that Flemming does not appear on any of these sheets, although by the pay-sheets supplied by Mr. Springall, and which I signed, believing that they were true copies of the abstract, not having time to compare each item. The "Heathcote Agricultural Pay-Sheets" have in every case been written out by Mr. J. H. Springall; and at the time, having no doubt as to his honor and integrity, did as any head of a Department would do, sign the papers as correct. Flemming had been employed making himself generally useful in and about the yard of this Depot, but when Mr. Springall's term of office ceased at the end of the year, Flemming left to be employed by him. If I had had time to attend the pay-tables I have no doubt this would never have occurred, but on the ordinary pay-day at National Park, when Flemming would draw his money, I was generally engaged inspecting at Liverpool and Campbelltown; the Chairman advised me that there was no necessity of my being present, as Mr. Springall would do as well.

Re Mr. Hinchcliffe.

On Tuesday, the 29th ultimo, I had occasion to visit the Casual Labour Board Office, and there saw Mr. Hinchcliffe in company with Mr. John Davies just at 4 p.m. I was about leaving when Mr. Davies requested me to take the various electoral rolls up to the railway station. I remarked that the messenger might take them up, as I had to meet my wife at North Shore. Mr. Davies said, "Oh Mr. Hinchcliffe will drive you up to the station, and he can then leave you anywhere you want." I did so. While in the cab Mr. H. informed me that Mr. Mason "had his knife into me." I replied that it was strange, as I had never met that gentleman in my life. Shortly afterwards he told me he was in a bit of a fix. I said I was sorry to hear it. He then told me he was short £270 in his cash, but that I could be of great assistance if I choose; asking him in what way, he said, "You had at one time a drunken old messenger at the Park; I used often to send papers and envelopes by him; he must have lost vouchers as well paper." I replied that I never remembered an instance of a voucher going astray; he then said, "You might rig up some vouchers

vouchers for me, and I can get Davies to sign them, so that I can get my money, which I have had to borrow." At the same time he informed me that Mr. Davies had received a cheque amounting to £260 from the Colonial Secretary for expenses at the rate of 10s. per diem, and that Mr. Davies had remarked to him "that he did not care who sank so long as he swam."

Re Messrs. Davies and Hebble.

On my visiting the office one afternoon Mr. Davies said, "By-the-by, Hebble, you have some vouchers for Mr. Burrowes to sign." Hebble then placed four (4) of Messrs. M'Lean Bros. and Rigg's vouchers in front of me for signature. I did not care about signing them until I referred them to my storekeeper at Hurstville, when Mr. Davies said, "They are all right, you can sign them"; on his word I signed. Later in the afternoon again, in the presence of Mr. Larnach, Hebble told me that the voucher for two dozen long-handled shovels and four (4) spalling hammers was in lieu of "Davies' hamper." I said, "Had I known that I would never have signed it." From my own experience when verbal orders have been given M'Lean Bros. and Rigg they have always asked before many hours elapsed for a written order signed by some responsible officer.

While listening to some of Hebble's statements to the Honorable the Premier I was astonished at his prevarications as to his initialing vouchers, &c. His initials may have been to verify computations, but were also to show that the articles had been ordered from the office, as shown on the butt of the order-book, and likewise on the margin of the contingent voucher sent in by the claimant.

Should I have omitted any thing that you might deem information be good enough to let me know.

I have, &c.,

E. M. BURROWES,

Superintendent.

Seen.—Wm. M., J.B.C.M., 11/2/89. Forwarded for the information of the Honorable the Colonial Secretary.—
Wm. M., J.B.C.M., 14/2/89. Seen. To the Royal Commission.—G.R.D., 16/2/89.

I 1.

LETTER of 12th November, 1888, from J. H. Springall, to G. Johnson, ordering rations and stores.

I 2.

MEMORANDUM of 2nd November, 1888, from C. Walsh to G. Johnson, countermanding rations.

I 3.

LETTER of 25th January, 1889, from G. Johnston to E. M. Burrowes, forwarding Springall's and Walsh's letter and memo, and specifying ration issue.

I 4.

Dear Mr. Burrowes,

3, O'Connell-street, Sydney, 18 January, 1888.

I write you a line at the instance of Mr. Dalglish. He says you promised to let your men cut a trench or water-table on the west side of Sylvania Road (and his eastern boundary), so that the drainage from his land should run into the creek which crosses the Sylvania Road below his land. He says you instructed Mr. Buller to have it done, and when he left he passed on the instructions to Mr. Fraser, who is not there now, and that Mr. Saunders has no instructions about it. Could you get this done for Mr. Dalglish?

Another little matter: On the Woronora Road, down near the culvert, there was an old fence with the earth heaped up to it. This earth-bank was not disturbed. It would be a convenience to the road to scatter this bank the first time you have any men there.

Yours truly,

J. MURPHY.

A deposit of white metal has been found on our estate not far from the main road.

I 5.

Dear Mr. Burrowes,

Sydney, 11 May, 1888.

It appears that your men are doing some work on the Coronella Road, and that they have taken down the fence which crosses the road (called the Duck Ponds Fence). I think I told you that we had cancelled Blake's lease, and he is entirely out of it now; John Lehane (formerly Mr. Holt's overseer) has the grass lease now. He tells me that if the fence is left down it will be a great loss and trouble to him, as this is the only means of keeping the stock on the eastern part of the run—in fact that it would be quite useless to him. In these circumstances I write to ask whether you could not allow the fence to be put up again and have slip-rails fixed until we can have a new fence put up on the north side of the road. I fancy that it is not absolutely necessary for this fence to be removed just now, except while they are working at the exact spot where the fence is, and a day or two should put them past it. If you send Mr. Walsh a line about it he will not, I imagine, see any reason why the fence cannot remain for the present, so long as there are slip-rails to give them free passage to and fro. I wish you would give this your consideration at once, as Lehane is greatly exercised about it.

The requisition which I told you of has been handed to Mr. Davies yesterday. Amongst the things asked for is the opening of the road-metal quarry. I will show you or any of your officers where it is any time you like to make an appointment. There are people who would try to prevent these works from being undertaken, and I think it would be wise to keep your own counsel. Some persons would have these men thrown on the streets and the relief works closed if they cannot get exactly what they want done. Therefore the less they are told the better for all concerned I think. It has been suggested to Mr. Davies that the Main Illawarra Road should be undertaken and that Woronora Road and Sylvania Road might be formed, and where necessary cut down and culverted the same as Tafel Road (Port Hacking) and Malvern Road. It has been suggested that 500 men might be put on to these works.

Will you please do what you can about the Duck Ponds Fence at once.

Hoping this may find you quite well and happy,

I am yours truly,

J. MURPHY.

I 6.

Dear Mr. Burrowes,

Sydney, 17 May, 1888.

I have your note of to-day. I shall be glad to point out the road-metal deposit to Mr. Nolan or anyone else at any time you make an appointment. It would be no use marking it on the map, it would never be found from that. It is not opened out, and there is nothing on the surface to indicate its existence. You might look for it for a week and not find it, as the ferns and other vegetation over-grow it. If you like to write or wire me to-morrow that you or any of your people will meet me at Kogarah on Saturday morning when the 9.2 train arrives there, I will be there and we can go to it. It is much nearer to Sylvania than to Sutherland, and if we go we should take advantage of the Port Hacking coach which meets that train. If this cannot be done, let Mr. Nolan appoint any day and I will go with him either from Sutherland or from Kogarah, or I will meet him at the punt by any Port Hacking coach from Kogarah. Unless I hear from you before 5 to-morrow (Friday) I shall assume that you do not want me for Saturday.

I am glad to hear that you have started gravelling Coronella Road. Mr. Knibbs, Government surveyor, will be out about the 25th to mark off for you the new road from the river (opposite to San Souci) to the Port Hacking Road, near lucerne paddock. He was with me to-day. He will, while on the estate, mark the road to the water's edge at Tareel Point.

The other papers (for the new roads and metal quarry) have been sent on to Sir Henry by Mr. Davies recommended to be carried out. Sir Henry has been very busy, but we expect them to be returned approved on Saturday or Monday.

Yours truly,

J. MURPHY.

When will you start forming Woronora Road? Please don't let Mr. M' Rae or anyone else know what is going on.

I 7.

Dear Mr. Burrowes,

3, O'Connell-street, Sydney, 21 May, 1888.

Just a line to say that the Colonial Secretary formally approved of the new works for you to-day. This includes the opening of the road-metal quarry, which, I suppose you know, I pointed out to Mr. Nolan and Mr. Giblin yesterday. The main road is also to be made, but it may be a little while before that is started. When the papers reach you, let me know if you would like me to send you a couple of copies of the plan, showing the new roads marked on them, for the guidance of your overseers. We would like the continuation of Woronora Road cleared first, then Karimbla Road, which will run from the Port Hacking Road, at the big culvert, to the head of Yowie Bay. We want Yowie opened up first. Then say Bath Road (M'Farlane's and Well's houses face this road). Some of the roads on the eastern end will want to have their exact positions fixed. We have asked that a Government surveyor be sent to do this. Mr. Knibbs would be a good man for the work, as he has had a lot to do with fixing the points on the estate. He will be out on or about the 25th to fix the route for the eastern end of Simpson's road, and to survey Taren Point Road (the new road from George's River to the Lucerne paddock). The roads which want re-marking are (I wish you to remember them and push Mr. Davies to apply for the surveyor at once) Canoona Road, Illerco, Burraneer, Wooloware, Wotonga, Yarra, Orara Road. All the other roads are marked, and I will be glad to point them out to you or to any of your officers any time you may wish it.

We would like the Woronora Road to be formed as far as it is cleared, a proper culvert or bridge put up at Dent's Creek, and the Hill on the east side cut down, so that by the time the new portion is cleared they could at once go ahead with the making of that. A small bridge will be wanted at Yowie Creek, which runs into the bay on the west side of it, and the road will have to be deviated on both sides of this creek to get a coach road, but you can do it.

In the past a great deal of Yankee grubbing was allowed. I think your overseers should keep their eyes open this time. I hope you will put on a good crowd of men. Let me know if you want anything from me and I will go out.

E. M. Burrowes, Esq.

Yours truly,
J. MURPHY.

I 8.

Dear Mr. Burrowes,

Sydney, 29 May, 1888.

I was at Sutherland to-day, and saw your new men working on Bath Road. (Please remember that this road extends from Forest Road on the south to about 20 chains north of the Boulevard on the north.)

My object in writing now is to ask if you could make it convenient to go out with me one day, and give me your opinion as to the place where Woronora Road should cross Yowie Creek (running into Yowie Bay on west side). The eastern side is steep, and a little engineering and work will be wanted. If you can spare time I can go any time, if you give me notice the day before. This is an important point, and I would like to leave it to you to decide the crossing-place, and it should be done as soon as possible, as we intend to ask you to do this road next. The locality will require close examination, and to do it properly I think we should go out by the morning train, say 8:22. Will you kindly let me know if you can spare time to go, and if so, let me know to-day.

I think the men on Bath Road have started "yanking" already. I did not notice it, but I was told as much; it may not be true, but as you know from the past, they all want watching closely.

This evening I inquired for you on the way in at Hurstville, but was told you were not about there. Supposed to be in Sydney.

E. M. Burrowes, Esq.

Yours, &c.,
J. MURPHY.

I 9.

Dear Mr. Burrowes,

Sydney, 4 June, 1888.

I have not heard from you about fixing the crossing-place for Yowie Creek, on the Woronora Road. I suppose you have not had time. We have surveyed one straight line for the whole length of the road, and we have marked a deviation on each side of the creek as an alternative route, if you should think it better to adopt that course. I was out on Saturday, and my opinion is that the straight line will give the best grade in the end. Still I would like you to see it with me, if you have time. In the meantime please don't let this prevent the clearing from going on, it is marked and pegged both sides all the way from Sylvania Road on the west to where it junctions with Coronella Road, on the east.

Another little matter. I understand that some of the new men have arranged to sell some of the wood which they may fall on the roads to the mill-owners at Sutherland. The effect of this will probably be the same as it was before,—the men will leave some wood which the mills won't take, and after you have paid for the work you will have to send wages men to burn off the wood which is left on the roads. I think it would be a mistake to let the men do any dealing of this kind; they should burn everything except what the overseer may order to be left for use in culverts. This kind of thing would only be a cover for the mill-owners to go along all the roads and take the valuable ironbark sticks which were expressly left for culvert use.

About the Port Hacking Road (east end) and Taren Point Road, Mr. Knibbs has instructions from the Minister for Lands to survey these immediately, and it will most likely be done in a few days now.

Yours truly,
J. MURPHY.

I 10.

Dear Mr. Burrowes,

Sydney, 9 June, 1888.

I am sorry I did not see you the other day when you called. I would like to have a chat with you.

If you should be in any doubt about the exact position or starting-point of any the new roads, you can make an appointment for me on any day you may fix, by giving me a day's notice, and I will meet you or any of your officers.

I don't like troubling you with complaints, and I would not do so now if I could have found your new overseer, who is in charge of the clearing of Bath Road. I spent over two hours looking for him this morning, from one end of Bath Road to the other, at his camp and other likely places, but without success. I mentioned to you that I had been told that the men were "yanking" the trees, I now tell you, from my own observation this morning, that some of them are simply cutting them at the ground, and covering up the stumps. It was done under my own eyes by the gang working at the junction of Bath and Woronora Roads (south of Woronora Road), and I spoke to them about it. They said the overseer had been past there only a short time previously. There were a dozen pointed bottoms of trees lying on the ground, and the holes filled up (which the overseer must have stepped over to get past). In going along the road looking for the overseer, I met Mr. M'Farlane at his gate, and he showed me a place full of stumps. This work was, I understand, also done by the gang I have mentioned. I saw one lot cut a tree at the ground and quietly drag it on to the private land at the side of the road. It seems to be the practice for them to roll the big trees on to the side of the road and leave them there. Sometimes they fall a tree so that part of it lies on the road and part on the private land, and they just cut it off at the road line, leaving the rest. What is the use of an overseer who allows this? And don't you think that any men found doing this should be refused any more work. A gentleman who owns some land on Bath Road was out with me and saw the logs rolled on to his land; he said he would write to Mr. Davies about it, and advise him to get a fresh overseer. He has some land also on the Illawarra Road, and he says that Mr. Buller allowed tons of stumps and logs to be shovelled on to his land in the same way. I told him I would write to you about it, that he need not trouble Mr. D.

What is the use of paying these men a high price for taking out stumps? They get say £8 an acre, and the stumps are worth £6 or £7 out of the £8. They do one or two pounds worth of work for £8! and the next gang, perhaps honest fellows, wonder how their neighbours get through their work so fast, or perhaps they learn a wrinkle from them and follow suit. When these roads come to be formed, many of these stumps will be in the water-tables and must come out, at four times the present cost, and for the rest we shall always want a travelling staff to keep down the suckers, a forest of which will appear in the spring. These men I speak of should be made to take out those stumps now. I can show you a dozen of them.

Yours, &c.,
J. MURPHY.

P.S.—When can you spare time to go and have a look at Yowie Creek crossing on Woronora Road?

Answered, 11/6/88. Meet, 13/6/88.

I 11.

I 11.

Dear Mr. Burrowes,

3, O'Connell-street, Sydney, 16 July, 1888.

I think I have nothing from you to reply to, and I only write to ask you to lend us a hand, if you can, in one or two matters that we are moving in. It will take a long while to do all we have in hand with the present number of men, although so far, they have not done badly, but to get through it by the summer we should want a lot more men. We are asking Mr. Davies to send 100 more; we also want to have that big gully leading into the west side of Yowie Bay (on Woronora Road) blasted down, and an embankment made as soon as possible, and we are asking for some quarrymen (say at least twenty) to be put on, with proper tools and explosives, and a blacksmith. You have only two carpenters or bridge and culvert builders on the works. There appears to be work for six more, and we are asking for them to be put on. If these extra hands, as well as the quarrymen and carpenters, do not present themselves at the office of the Board asking for work, we are asking that they may be removed from other works. We are also asking that Woronora Road, where formed, say from Railway Station to Dent's Creek, and from the East side of Dent's Creek to Port Hacking Road (where practicable) may be gravelled at least 6 inches thick. All this is included in the original order for the work, but we want it done at once. Give it a send on if you have the chance.

I notice you are forming the road to Fred. Want's cottage. We find on surveying the road, that a straight line from the corner of Sylvania and Woronora Roads (where Want's road turns off) to the cottage, will cross the road three times, and the straight line is a level road all the way. We are laying off this straight road and have dedicated it, in fact it is dedicated as a perfectly straight line. I am sorry I did not notice it before. In these circumstances it is a pity to go on forming. The timber is very light on the road. Could you let the men on the road go on to clearing those portions of the straight road which are not included in the old track? The eastern side of the straight road starts to the east of the old one; the line can be plainly seen. It will be permanently pegged in a day or two. Could you take the men off the forming and put them on to the clearing? When Mr. Napier asked me about this the other day, I could not find the proper line. I did not think it was quite so far to the east, but I did not think he was going on forming, or I would have had the straight line found for him, or advised him to wait. After Forest Road, and the road from the head of Yowie to the Port Hacking Road, have been cleared (both now being done), we would like you to put the men on to clear Orara Road, which will run from the Port Hacking Road, near Simpson's end, down to Great Taren Point (opposite to Kosten's). This will open up a beautiful point Any day now instructions may come from the Lands Department to do Taren Point Road (to Common's Point, opposite to Sans Souci).

Hoping this may find you quite gay as usual.

E. M. Burrowes, Esq.

Yours, &c.,

J. MURPHY.

I 12.

Dear Mr. Burrowes,

Sydney, 21 July, 1888.

I think you said this morning that you would go with me one day next week and have a look at Yowie Road. If you can go I will go any day next week if you let me know the day before. I wish you could fix it at once, as we want to have the straight road cleared as soon as possible, and we do not want to trouble Mr. Davies about it unless it is necessary; but if you think this will be necessary or advisable, I wish you would let me know at once, and we will apply to him. Kindly let me know what you think about it.

Yours truly,

J. MURPHY.

P.S.—They have made a splendid job of the bridge at Rover's Creek, Port Hacking Road. It is a credit to all concerned; but there is a very small matter I wish to call your attention to. I spoke to Mr. Allen about it this morning. As a cover for the stones on the approaches, they have put a coating of simple earth, in which there is not a pennyweight of ironstone or gravel to the ton; and the same with regard to the stuff put on the road where it was cut up by the carts. Could not you order them to put on a few loads of real gravel? If they do not know where to find it near the place our men will show them if they are asked. Allan knows where our men are camped. J. M.

E. M. Burrowes, Esq.

I 13.

Dear Mr. Burrowes,

3, O'Connell-street, Sydney, 27 July, 1888.

With reference to the Yowie Bay roads, I thought you might be busy, and not have time to go out at once; and as we want to have it done as soon as possible, we have had the matter placed before Mr. Davies. When it comes to you, please give it a lift.

I notice that Mr. Walsh is not having any forming done. We would like you to have Karimbla Road (from Port Hacking Road in to the head of Yowie) formed, when it is cleared, all the way, which should be in a day or two now. The lower part of this road (near Port Hacking Road), runs through the bed of a swamp. We would like you to have a drain cut at the side to keep the water off the road, as the position of the road cannot be altered now. This road will be much used when it is opened. It is the only way into the head of Yowie from the punt, and also from Sutherland until you provide that embankment across the big gully on Woronora Road. When are you going to start the quarrymen on that?

Moss's mate tells me that they will be five weeks yet at the Dent's Creek bridge, Woronora Road. Could not you put on some more carpenters for the bridges on the two creeks running into Yowie on Woronora Road? Then there is the bridge on Lilli Pilly Road, one on Burrawong Road, one on Corea Road, one on Sylvania Road, and two or three others. Moss and mates would not do them all in a year. Give these other bridges a shove on if you can.

I hear you are again graveling Malvern Road. There was some pure clay put on here before under Mr. Nowlan. I wish you would tell them to go for the real gravel; there is plenty of it near, and it is a great pity to have to pay for spoiling the road. Our men will show Allan or Mr. Napier where to find good gravel on any part of the estate. Allan knows where our men are camped—not far from Napier's.

I am going out to-morrow, Saturday, if it does not rain, to Tyreel Point, with Mr. Knibbs, Government surveyor, to fix the position of the road at the point.

I suppose you know we have asked for another 100 or so of men, and they are promised. Couldn't you take some quarrymen off some of those back roads out towards Liverpool way and put them on here for a while?

I thought I would tell you all this personally when I saw you, but it seems uncertain when I may see you.

With best regards,

Yours truly,

J. MURPHY.

I 14.

Dear Mr. Burrowes,

Sydney, 28 July, 1888.

I was at Sutherland to-day, and saw Mr. Napier. He said he had no instructions about Yowie roads. He said he expected soon to get instructions to form Bath Road. We would rather let the forming of *this road* wait until all the clearing of the other roads is done. We would like the strength put on to get Woronora Road and Karimbla Road ready for use as soon as possible. We will ask you to blast down the rock and grade to the water's edge, the south end of Karimbla Road, so that a vehicle can drive to the water at the head of Yowie Bay. We want to make all parts of Yowie accessible from every direction as quickly as possible. After that, the other points on Port Hacking, viz.:—Simpson's Point, Lilli Pilly (properly Great Tyreel Point, two roads near there, Kamira and Orara), Gynea Bay, two roads, and Gunramatta Bay, Wo'onga Road, then the others. I was out at Simpson's Point to-day to arrange with Mr. Knibbs, Government surveyor, for the exact route of that end of the road. He was not there, but I saw his pegs, and it will do as he has marked it.

I spoke to a gang of men on the road; they said they were Martin and party, and were waiting for the design of a bridge over the creek, east side of Yowie Bay, so that they could tender for the work. I wish you would make this bridge as long as you can, to ease the rise on east side. I think it would be a good plan to bind the carpenters to use nothing but iron-tark. There is plenty of it, easily got, and as you know, there is no doubt about what kind of stuff it is for this work. I saw some white gum cut in such a way as to lead me to think it was to be used for Dent's Creek bridge. I spoke to Mr. Napier about it, and told him it was quite useless for such work, and the same with red gum. If a plank of that stuff got in, the white ants would

would be in it in a month, and it might fetch the bridge down. I think it would be wise to in future bind them to the stuff that we know is safe and will last. Of course grey gum, bloodwood, mahogany, stringy and black butt, are good enough, but none of them are equal to ironbark, and every one knows ironbark, so there would be no fear of them putting in white or red gum in mistake. When will you be going to Sutherland?
 Yours truly,
 E. M. Burrowes, Esq., Hurstville. J. MURPHY.

I 15.

Dear Mr. Burrowes, 3 O'Connell-street, Sydney, 31 July, 1888.
 You said you would instruct Mr. Napier about Yowie Road to-day. I saw him yesterday, and he knows the lines well; in fact they could not be missed.
 Yours truly,
 J. MURPHY.

I 16.

Dear Mr. Burrowes, Sydney, 4 August, 1888.
 I was at Sutherland to-day, and saw the men still forming the crooked Yowie Road. If you are going to clear the straight road, isn't it a pity to waste labour in forming the other one? You asked me the other day to tell Mr. Napier that you would, next day, instruct him to go on with the clearing of the straight road. I thought they would have been clearing it by this time.
 Mr. Walsh must be very nearly done clearing Karimbla Road (into the head of Yowie), and I hear that he intends to go on to the Boulevard. We would like those two small roads done first (Orara and Camira), running down to two different points on Port Hacking, from the south end of Tareel Road, and also the Yowie Road. We would like all roads leading to the water to be done and completed before any of the others are started, if it would suit your arrangements equally well. We are anxious, as I explained to you personally, to have good access made into Yowie as soon as possible, by way of Woronora, Karimbla, and Yowie Roads; after that Orara, Camira, and Simpson's end of Tareel Road; then the others in the order of their importance.

I was looking again at the big gully. If you put in a high bridge, (say) 20 feet, at the highest level, I think it will greatly reduce the stonework, and ease the grade. For a high bridge you would, no doubt, have a different design to the others. I think a trestle or frame bridge would look well, and not take much timber or labour.

See if you cannot get the blasting started at the big gully, and have the straight road to Yowie cleared. When do you start gravelling Woronora Road?
 Yours, &c.,
 J. MURPHY.

Is not Mr. Walsh going to form Karimbla Road, and cut drains at the sides?

I 17.

Dear Mr. Burrowes, Sydney, 8 August, 1888.
 I have yours of 6th. Thanks for your promise to carry out the matters I mentioned—Yowie Road (straight). There is very little work in this, and we are anxious to have it done at once, as promised by Mr. Davies. Mr. Napier has all his men on Forest Road, which is not so urgent. Couldn't you take off a couple or three gangs from Forest Road, and put them on to Yowie.

There is no plan of the new deviation, and there will not be one made until the subdivision plan comes out. They will be subdividing it this week. The road is so marked that you could drive a barrow through it, and Mr. Napier knows every peg on it. See if you can't rattle it off at once.
 Yours, &c.,
 E. M. Burrowes, Esq. J. MURPHY.

P.S.—I have mislaid my plan of these last new roads. Could you lend me yours for a day? I will return it punctually. If so, please post it.—J.M.

I 18.

Dear Mr. Burrowes, Sydney, 10 August, 1888.
 I have your memo. of 9th, also plan, for which I have to thank you. I have had the roads marked on another plan, and under separate cover. I am returning yours by this post.
 Hoping you will keep in mind the direct road to Yowie,—
 E. M. Burrowes, Esq. I am, &c.,
 J. MURPHY.

I 19.

[Private.] 8 September, 1888.
 Dear Mr. Burrowes,
 Just a line to say that I understand you have reported to Mr. Davies that I have frequently communicated with you and your subordinate officers with regard to the relief works at Sutherland, and Mr. Davies has requested me to deal directly with him in future, which I shall of course comply with.
 From a purely business aspect this course, will, no doubt, be more regular, and will probably save you and your people the worry and annoyance which I may have occasioned, and which I regret. At the same time I may remind you that I was invited to make such suggestion in a confidential way rather than formally through the head office, that it would save time and misapprehension. I thought so too, and am sorry to find it otherwise.

It is now necessary to say something about the works, and considering our relations hitherto, I think it only courteous to you to say that I am communicating directly with your head office only because you desire it, and that you wish all other avenues to be closed, so that we should be on a strictly departmental and business footing, which I shall now be content with.

I am sorry for any trouble I may have caused you or your officers, and I shall endeavour not to bother you with any more suggestions.

Hoping you are quite well,—
 E. M. Burrowes, Esq., Hurstville. I am, &c.,
 J. MURPHY.

I 20.

Dear Sir, Sydney, 13 November, 1888.
 The bearer, Mr. J. W. Ward, informs me that you are in want of horses and carts. He is out of employment with his horse and cart, and asks me to give him this line to you, and to request that you may be kind enough to give him a chance if you have any vacancies. I know him, and I think you would find him a sober, honest, and industrious man.
 Yours faithfully,
 E. M. Burrowes, Esq., Superintendent, Casual Labour Board. J. MURPHY.

I 21.

Memo. received 22 November, 1888. 19 November, 1888.
 Dear Mr. Burrowes,
 I forgot to say to-day that if you should be called as a witness (which I doubt), to please remember that some roads on the Sutherland Estate have been made by private labour; also that the large tract of land known as the Holt-Sutherland Estate includes almost, if not the whole of the parish of Sutherland, and has an area of about 13,000 acres, is 12 miles in length. It has two railway stations on it; it has over 60 miles of water frontage. Hemmed in with it are large areas of Government land. The main Illawarra Road and Port Hacking Road traverse it, and many other Government roads lead to these main roads and intersect the estate in every direction. Making roads here is not like doing it on a small patch of a few acres in extent. Referring to Mr. Garvan's question for Wednesday night, there has been no *metalling* done on any of these roads. *Re* roller—if the shafts are not wide enough, wouldn't it be better to have it sent back to the maker and have it altered properly at once? You might let Mr. Davies know immediately what wants doing to it.
 E. M. Burrowes, Esq. J. M.

[Private]

[Private.]

I 22.

Dear Mr. Burrowes,

You wish to know what happens that may concern you. Well, I believe Mr. Davies was to-day interviewed by the Progress Committee of Sutherland about the Illawarra Road. I understand they wished to call his attention to the material which is being put on the road, and that they said it was only mud. They got no satisfaction from Mr. Davies, who snubbed them, and they were indignant, and were on their way to see Wells and Houson when I bumped against them in the street, and if they obtained no satisfaction there to see Sir Henry Parkes, and ask to have the work placed under a permanent officer of the Roads Department. With difficulty I persuaded them to let me see what I could do. They have a lot of abuses to point out, and they say the work is neglected and badly done, and say they are determined to see Sir Henry unless better stuff is used on the road within a week. They say there is no stone, or not enough, in the material, in which I must say I agree with them, so far as the stuff which they were taking out of the pit last Saturday.

If these fellows saw Wells and Houson or Sir Henry, they would do no good, only make him dissatisfied all round. I dare say you will hear of this from Mr. Davies himself. If not, you have it now.

I am letting be known that we met your assistant yesterday on the road.

Please don't forget your promise to give out the culvert on Eton Road; also Lilli Pilly Road (near Walsh's), Want's Creek, two on Sylvania Road (near Woronora Road), Corea Road, Forest Road, and half a dozen others. When these are done, what is the objection to getting these culverts out of hand? Are you putting on any more masons to get ready the abutments of Yowie bridge? What about Holloway?

Yours truly,
J. MURPHY.

E. M. Burrowes, Esq.

I 23.

Dear Mr. Burrowes,

I met Mr. Walsh on the road to-day, and asked him if you had given him instructions to put Duncan or other carpenters on to the Eton Road, or other culverts. He said he had heard nothing of it as yet. I write you this line to remind you of it again, and I hope you will not think I am troubling you too much.

Yours truly,
J. MURPHY,
Saturday night.

P.S.—At Moss' present rate he will have one bridge built in about two years.—J.M.

E. M. Burrowes, Esq.

I 24.

My Dear Sir,

I write you a line to say that Malvern Road is to be 99 feet wide, although it is pegged and blazed for only 80 feet. It is pegged every 10 chains, and the south boundary is correct. If you take the south-west corner of Malvern and Sylvania Roads (opposite to Mr. Dalglish's), and continue the south line along the pegs and measure off 99 feet from that, it will be correct, and the south line (running nearly east) will go through the old farm paddock and strike the corner of the Lucerne Paddock fence on the Tareel Road. I fancy that from the position of some of the stakes or wadsticks now placed by your men that they are not on the correct line, and it would be a pity to have any mistake about it. There are only the two lines of pegs, 80 feet apart, and your surveyor should have no difficulty in running the north line 19 feet further out.

Yours truly,
J. MURPHY.

— Buller, Esq., Overseer, Relief Works, Sutherland.

To E. M. Burrowes, Esq. Sir,—Am I to take any notice of this letter; reply by bearer.—Yours obediently, L. BULLER.

I 25.

Dear Sir,

3, O'Connell-street, Sydney, 16 June, 1888.

After leaving you this morning I walked up Bath Road, as far as Mr. M'Farlane's, and I found that nearly all the way up some of the roots and logs have just been rolled off the road on to the private land, the same as was done on the lower part of the road (of which I spoke to you). I was told that the men have an excuse ready for this, that they say the wood-cutters have asked them to leave them and that they will be cut up and removed. This is an old dodge of the clearers. It may be true that some wood-cutter asked them to leave them, but we have found by experience that the wood-cutters take only about one stick out of every ten left by the men, and when I called the attention of Mr. Burrowes to the subject, the other day, he said that no such dealings with the wood-cutters, would be allowed, that the men must not leave anything behind them, it must all be burned off before the men are paid. The wood-cutters are not such fools as to take away big roots and logs. The owners of private land have already complained to Mr. Davies of these logs and roots being shoved on to their ground, and if Mr. Burrowes knew of these being left, I am sure he would at once order them to be burned on the road by the different gangs who left them there. In future, I think it would save you a lot of trouble and avoid complaints if you refused to pass the work while a single root or branch was left at the road-side or remained unburned. Another thing these men do, if they take down a tree and part of it falls on to private land they just cut off the trunk at the road line and leave the rest of the tree on the land. Mr. Burrowes said this would not be allowed. All these points should be explained to the men before they begin to clear, and then there would be no room for them to say that they did not so understand it.

From what I can see, I think that if you got an old harpoon, or a cold chisel, and had it ground off to a point, and stick a wooden handle into it (or some other pointed iron spike), and try the holes that have been filled up, you will find a lot of stumps left in, and if you let the men see you with this in your hand and tell them what it is for, it will have a good effect on them. The depth to which the stumping is to be done should also be thoroughly explained to the men; they told me it was 12 inches, but Mr. Burrowes said 18 inches. There should be no doubt about this between you and the men.

I have taken the liberty of writing to you because I think you would prefer my doing so directly than to trouble Mr. Burrowes with it, and it is certainly more pleasant for me to communicate straight with the officer in charge. You will find that these men will want a lot of watching and checking.

Yours faithfully,
J. MURPHY.

— Napier, Esq., Sutherland.

I 26.

Memorial.

Re Malvern and Sylvania Roads.

Chairman and Members of the Casual Labour Board, Sydney.—

Sydney, 19 August, 1887.

Gentlemen,—We have the honor to request that your Board may have the goodness to grant the use of some of the men under your charge to clear, stump, and form Malvern Road (from Illawarra Road to Lucerne Paddock), and also the road known as Venetia-street and Sylvania Road—these two latter form one road—which leaves the main Illawarra Road at a point about a mile from the punt, and runs in a straight line southerly to the north-west arm of Port Hacking; it also branches off at Woronora Road and runs to two other points on the waters of Port Hacking, viz., to Yowie Bay and to Yowie Head. (The roads are shown on the accompanying plan and marked red.)

These are the nearest landing-places for visitors returning from the Park by water and thence by road to Sydney. His Excellency the Governor and party, the Trustees, and many visitors return to Sydney this way.

They are public roads, but as they have not been properly cleared and formed, the greater part of them cannot be used, and a long detour between the punt and the Park is thus necessitated.

We

We respectfully urge that the making of these additional highways to the Park would be a useful and permanent work and a great public convenience, and we earnestly hope your Board will see fit to have it carried out.

We have, &c.,

A. H. M'Culloch.	Fred. J. Jackson.	Coward Byrne.

P 15.

[Private and confidential.]

Dear Mr. Davies,

Hurstville, midnight, 12 December, 1888.

After leaving you I went up to the House and saw Mr. T. Walker, and he declined to allow me to put off their appointment; so I must go, much against my own inclination. I ask you to *beware* of your friends who I spoke to you about. I saw another member, and he agrees with me; he also is a member of the Committee. Perhaps you may think I am presuming too much, but I trust my past actions may be sufficient for you. I shall send a copy of my report to you, after which you can deal with me as you wish.

Faithfully yours,

E. M. BURROWES.

P 16.

RETURN, signed John Davies, Chairman, Casual Labour Board, showing the works carried out under the Casual Labour Board; also the amount realized for Crown lands, and the approximate value of the lands now available for sale, based upon prices recently realized at public auction. (Ordered by Legislative Assembly to be printed, 8 January, 1889.)

[To Evidence of S. A. Want.]

R.

Dear Sirs,
I herewith place in your hands the new script for ten (10) shares in the Holt-Sutherland Land Co., to be held by you as forming part of the security of the Colonial Mutual Life Assurance Society for an advance of £9,000.

Messrs. Want, Johnson, & Co.
True copy.—S. A. WANT.

Sydney, 26 September, 1885.
Yours faithfully,
HENRY PARKES.

R 1.

My Dear Sir,
I send the ten shares in the Holt-Sutherland Estate Co., endorsed in blank, to be held in blank as agreed.

Messrs. Want, Johnson, & Co.
True copy.—S. A. WANT.

1 October, 1885.
Yours sincerely,
HENRY PARKES.

R 2.
Memorial.

The Chairman and Members of the Casual Labour Board,
Gentlemen,

Sydney, 22 September, 1887.

The plan adopted by your Board of employing the surplus labour in opening up new roads, and thus making useful and permanent improvements, is regarded by the public with general satisfaction and approval.

We have now the honor to respectfully request that your Board may be good enough to have the undermentioned roads cleared and stumped to their full width, and properly formed with water-tables, &c., fit for vehicular traffic, for (say) 33 feet wide on each road, viz., Eton-street, Woronora, Croonulla, Lilli Pilli, and Eurunga roads, and the Boulevard. Eton-street is two (2) chains wide and about 20 chains long. It runs from the Illawarra Road to the Park, and would be the best carriage entrance to the Park, avoiding the crossing of the railway line in two places, which is rendered necessary by the present road.

Woronora Road runs from Eton-street to Sylvania Road, and would be the nearest way from the Railway or the Park to the deep waters of Port Hacking. We ask that this may be cut down and graded where necessary.

Coronulla Road runs from Tyreal public road to Croonulla Beach.

Lilli Pilli Road runs from Tyreal Road to east head of Yowie Bay.

Eurunga Road runs from Lilli Pilli Road to east side of Yowie Bay.

The Boulevard leads from a large tract of country to the railway line, where a platform is to be erected, and it will open up the large Government reserve of which this road is the boundary.

These are all public roads which will lead to the Park and will bring an increase of traffic to the Illawarra line.

The roads mentioned are coloured red on the accompanying plan.

Trusting that you may approve of this work being immediately commenced,

We have, &c.,

A. H. McCulloch,	Henry Salwey,
Frank Farnell,	S. R. Geddes,
Myles M'Rae,	A. J. Dalton,
John S. Jamieson,	John Davison,
Sydney A. Want,	Charles T. Stephens,
Edwd. S. Daniell,	D'Arcy H. Bucknell,
J. H. Potter,	G. William Ash,
Wm. Tho. Davey,	J. Murphy.
Merion Moriarty,	

Forwarded for the favourable consideration of the Hon. the Colonial Secretary.—J. DAVIES, Chairman, B.C., 22/9/87.
The Principal Under Secretary.

R 3.
Memorial.

The Chairman and Members of the Casual Labour Board, Sydney.
Gentlemen,

Sydney, 22 September, 1887.

We have to thank your Board for the very useful and permanent improvement which you have effected by the clearing of the Illawarra Road, between George's River and the National Park.

In order, however, that the public may avail themselves of the full advantages of this grand highway to the Park, we have to respectfully request that your Board may have the road completed and made fit for carriages and light vehicles to drive to the Park, by immediately carrying out the works suggested below:—

To burn off clean the whole of the logs, stumps, and parts of trees left within 10 feet of the sides of the road.

To form, ballast, and blind the road (commencing at the end near the railway, where the surface is clay and the road very bad).

To put on (say) thirty men to trench places for planting ornamental shade trees (say) every 100 feet apart, on each side of the road (say) 20 feet from the sides, trenches to be 3 feet deep and 10 feet square.

To put on (say) thirty carpenters or fencers to cut timber in the bush and to enclose the trenches; posts should be sunk and rammed not less than 2 feet under the surface nor less than 4 feet above ground. (This should be done at once, or it will be too late for planting this season.) The owners have given permission to take the timber required from any part of the bush.

To

To put on fifty quarrymen, miners or others used to stonework, at Kangaroo Hill (otherwise Huntsman's Hill), and fifty at Sylvania Hill, on this road, to cut down the former hill 10 feet and the latter 5 feet in the deepest part. The work in both cases to be first properly designed and graded. The material from these cuttings to be used for ballasting the other parts of the road.

To supply the men with suitable quarry tools, powder, &c., and a blacksmith on the spot with portable forge to sharpen for them.

The junction of Venetia-street with the Illawarra Road, near Kangaroo Hill, to be suitably graded. Venetia-street and Sylvania Road to be cut down where necessary and graded.

On the short piece of road between the goods shed and the gate house at Sutherland a few stumps have been left. These should be taken out to the full width of the road (1 chain), and the road blinded so that vehicles may be able to run on the metalled portion.

The adoption of these suggestions would render this road to the Park one of the most attractive drives in the Colony, and a credit to your Board. We therefore hope you may approve of the work being immediately carried out.

We have, &c.,

A. H. M'Culloch,	G. William Ash,	W. P. Sillsomy,
Frank Farnell,	Henry Salwey,	M. Maloney,
John Higginson,	S. R. Geddes,	Fred. J. Jackson,
John Davison (Sutherland),	D'Arcy H. Bucknell,	W. W. Russell Jones,
Myles McRae,	A. J. Dalton,	Edw. McKenny,
Sydney A. Want,	Charles T. Stephens,	Arthur W. Cooper,
Edward S. Daniel,	J. Murphy,	J. Roberts,
J. H. Potter,	S. H. Thompson,	B. W. Campbell,
Wm. Thos. Davey,	A. J. Walson,	O. S. Pedley,
Merion Moriarty,	E. S. Graham,	J. A. Armstrong.

Forward for the favourable consideration, so far as road-making concerned, of the Hon. the Colonial Secretary.—J. DAVIES, Chairman, B.C., 22/9/87. The Principal Under Secretary.—Submitted, 29/9/87. Approved.—H.P., 30/9/87. The Chairman of the Casual Labour Board.—C.W., P.U.S., B.C., 30/9/87. To be noted and returned.—T.C.H., 5/10/87. Mr. Burrowes. Noted.—E.M.B., 6/10/87.

R 4.

Memorial.

The Chairman and Members of the Casual Labour Board, Sydney.

Sydney, 10 May, 1888.

Gentlemen,
We have the honor to respectfully request that your Board may be good enough to clear, stump, form, gravel (and, where necessary, to culvert) the undermentioned roads, in the county of Cumberland. The roads are shown on the map forwarded herewith, and thereon coloured red.

The opening of these roads would be a great public convenience, would provide useful and reproductive work for some of the men under your control, give access to the main roads and railway stations of the district, and would increase settlement, communication, and traffic, and become feeders which would greatly swell the earnings of the railway.

We understand that a quarry of superior road metal has been found on the Government Reserve near Sutherland, and we respectfully suggest that profitable employment can be found for a large number of your men in breaking this stone for use on the railways and public roads.

On some of these roads the old pegs and marks have disappeared, and we would suggest that, where necessary, those may be re-marked by a Government surveyor.

The following are the roads referred to:—Kurrajong, Bittongi, Yanda, Yallaroi, Bath, Holt, Crystal, Box, The Boulevard, Yarra, Burrawong, Illeroo, Burrancar, Wooloware, Wotonga, Kamira, Willaree, Caworra, Orara, Karimbla, Canoona, Montrose, Glenwood Roads.

We have, &c.,

Frank Farnell,	J. Blenkinsopp,
John Nobbs,	W. R. Taylor,
Sydney A. Want,	J. J. Dunlop,
Fred. J. Jackson,	C. Millin,
John Davison,	J. Furber,
Edward Reading,	W. B. Thame,
R. Adrain,	J. Parfett,
John McCarty,	C. Price,
R. J. Hogg,	Chas. W. Norris,
Chas. Bourne,	R. Shankland,
Alfred C. Steer,	W. McMurtrie,

S 1.

To the Chairman and Members of the Casual Labour Board, Sydney.

Gentlemen,

Sydney, 7 July, 1887.

We have the honor to call your attention to the fact that the main Illawarra Road from the George's River Ferry to the National Park is in a very unsatisfactory state. It was a good deal cut up by the traffic of the Easter Encampment; the heavy rains following have still further damaged it.

It is a Government road 2 chains wide, but it is cleared only 12 feet or so in some places, and the running room is confined to that space, making it unsafe to travel on.

This being the only drive to the Park, and the main road to the south coast, it is much used.

We have to respectfully request that your Board may be good enough to have it aligned by the Government surveyors and then allow some of the unemployed to clear and stump it for the full width of 2 chains and to properly form the road for (say) half a chain. This would be a great public convenience, and would be a most useful and permanent work on which to utilize some of the surplus labour.

Hoping the matter may receive your early and favourable consideration,

We have, &c.,

J. H. Carruthers, Sydney.	Wm. G. Shearsby, Redfern.

Burrowes,—To be noted and returned.—J.D., Chairman. B.C., 13/7/87. Noted. Arrangements made to start the work to-morrow.—E. M. BURROWES, 13/7/87.

S 2.

Private Memo.

Dear Mr. Burrowes,

Can you look in on me the next time you are in town? I would like to have a word with you. Are the men again on the roads to Yowie Bay and Yowie Point? Mr. Walker told us they ought not to have been taken off. In fact, he said they had not been taken off; but when I insisted that they were off, he said he would see that they should be put on again immediately.

J.M., 21/9/87.

S 3.

Dear Mr. Burrowes,

3, O'Connell-street, Sydney, 12 January, 1888.

Just a line to ask how the clearing of the roads stands and if you have made a start at the main road (Illawarra Road) yet. The driver of the Port Hacking coach tells me that your men are putting the gravel on the new road only 2 or 3 inches thick, and that, there being no ballast foundation, the sand will work through from the bottom very quickly, as it has already done in Madeira-street, where it was laid much thicker. He says it should be at least 6 inches thick to make a decent job to stand any time. There is some gravel on our land, this side of Dolan's, at a place near the "Iron Mine," which you could take if necessary, but the top should be taken off the hill, level, not to make holes. Let me know what you think of this. Have you done anything towards building a bridge at Rover's Hole, or a new and better culvert on Woronora Road. Can't you cut down that hill (near the Chock and Hog culvert on the road to Yowie) to ease the grade? When will you be in town? "The same to you; many of them."

Yours truly,

J. MURPHY.

S 4.

Dear Sir,

3, O'Connell-street, Sydney, 21 September, 1887.

I have your letter of 19th; also map of parish of Sutherland, lent you. Thanks for same. By the subdivision plan you will see that Sylvania Road is 150 links wide. I think they are clearing only a chain. You might get your overseer to have a look at it.

Yours faithfully,

E. M. Burrowes, Esq., Superintendent Relief Works, National Park.

J. MURPHY.

S 5.

Dear Sir,

3, O'Connell-street, Sydney, 1 August, 1887.

After leaving you on Saturday I strolled along the new road. It will be a grand drive when finished. I noticed a lot of logs and stumps rolled just off the road out of the way. I asked Mr. Buller about them; he said that those which are not wanted for culverts, &c., would be burned. I only call your attention to them because they would be a great eye-sore if left there after the road is finished. Mr. Want said he would speak to you about putting on (say) two hundred more men, as we have heard that the relief works will soon be abolished and it would be a pity to have the road left unfinished. In view of the likelihood of this we are applying to have your men put on to make Sylvania Road, which I mentioned to you on Saturday, and which Mr. Want said he would see you about. He said he thought you would recommend it.

I am sorry to say that Mr. Want met with an accident yesterday. He was skylarking with Mr. Ebsworth and broke one of the bones of his right arm; I understand that it is not a serious fracture.

I understand that the trustees of the road are going to ask your opinion about shade trees for the road. They are anxious that this should be considered, and the question is whether there are any good ones for this purpose on the road, and if

if so, whether it would be better to leave a belt of them (where they exist) on each side of the 40 feet, or to clear the whole of it and plant ornamental trees (say) 100 feet apart on each side of the road, and to ask you to let your men trench the places for them and put up enclosures of saplings, &c. The trustees would like to have your opinion on the subject, and if you thought it better to plant them to take advantage of the present season, this being the last month for planting trees.

E. M. Burrowes, Esq., National Park.
Answered (see Letter Book)—E.M.B., 2/8/37.

Yours, &c.,
J. MURPHY.

S 6.

Holt-Sutherland Estate Land Company (Limited),
3, O'Connell-street, Sydney, 15 August, 1887.

Dear Mr. Burrowes,
Referring to our conversation with reference to your taking stone from Sylvania for the road, we have Mr. Ward's permission for you to take what you want from lots 5, 6, 7, 9, and 10 of section 9, Sylvania, provided you do not injure the land. In addition to the above you may also take from lot 1, section 9, and lots 1 and 2 of section 11 (as given you already).

I was down the road on Saturday. I think you must have mistaken what I said about the boggy place in Malvern Road. The place I mean has not been "corduroyed." It is on the Malvern Road, about 20 yards past the new culvert, and just now it is quite a bog. The culvert is done and covered with saplings. To make a good job of the place—I mean, I think, if you saw it, you would advise the making of another small culvert, as well as "corduroying," say, about 20 yards of the road. It is only a small length, and is alongside of where the men are camped. We will have men in near Mr. Dalglish's, taking sleepers; and it would be a great convenience to have this patch done, if you could spare three or four men for a day or two.

E. M. Burrowes, Esq., National Park.

Yours truly,
J. MURPHY.

Mr. Buller,—Please attend to this place, and note on your plan the allotments we may take stone from.—E.M.B.

[To Evidence of J. F. Burns, M.P.]

T

Work of Unemployed on roads at Hornsby and Holt-Sutherland Estate.

(Petition from J. F. Burns—the House to appoint a Select Committee to complete inquiry on.)

Ordered by the Legislative Assembly to be printed, 6 March, 1889.

To the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Fitzgerald Burns, a Member of the said Assembly,—
Respectfully sheweth:—

1. That your Petitioner is a member of the land firm of Burns, Withers, and Smith, which, in the year one thousand eight hundred and seventy-six, acquired by purchase a large area of private lands in the district of Lane Cove, parish of Gordon, and South Colah, some of which lands are situate in what is now known as the Hornsby District.

2. That there are at least four thousand acres of Crown lands to the eastward of Hornsby with a long frontage parallel to but not adjoining the North Shore Railway which it was the desire of both the Jennings and the Parkes Governments to bring into market for auction sale.

3. That in the year one thousand eight hundred and eighty-six, while the Jennings Government was in office, and while that Government was pressing the sale of Crown lands by auction for purposes of revenue as well as of settlement, application was made to your Petitioner by the Survey Department for permission to make a road through the lands of Burns, Withers, and Smith, from the Peat's Ferry Road across a railway bridge near Hornsby to the said Crown lands.

4. That your Petitioner agreed, on the sixteenth of November, one thousand eight hundred and eighty-six, as expressed by letter of that date, addressed to the Under Secretary of Lands, to give the Government permission to open the said proposed road, provided that it was put in a passable condition for traffic in a reasonable time, and that the Government relinquished their right to open another road through the lands of Burns, Withers, and Smith, further north, which was of no use for such a purpose.

5. That, without any communication from or to your Petitioner, or any of his partners, some of the persons called the "Unemployed," who were under the direction of the Colonial Secretary, and the immediate supervision of Mr. Deering, the Metropolitan District Surveyor, and who had been at work on Crown lands on the western side of the Homebush and Waratah line, were put on to clear and form the said road, and also a road between the southern boundary of the Crown lands and the lands of Burns, Withers, and Smith, to the eastern road.

6. That, as has been proved in evidence, the Casual Labour Board, which was formed by the Colonial Secretary to relieve Mr. Deering of the charge of the unemployed, applied to your Petitioner by letter, on the recommendation of Colonel Wells and Mr. Houston, engineer, both of whom are officers of the Government, for permission to open a road further south than the Boundary Road, owing to its appearing that the Boundary Road could not be constructed throughout unless at great cost, to which application your Petitioner agreed.

7. That after your Petitioner had agreed to the opening of the said road, and to small roads leading thereto from the Boundary Road, his colleagues in the Ministry, at his request, caused an inquiry to be made independently of the Casual Labour Board as to whether the proposed roads were really required for the public benefit; and, in compliance with his wishes, reports on the subject were called for and furnished by Mr. W. C. Bennett, the Chief Engineer for Roads and Bridges, Mr. J. W. Deering, the Metropolitan District Surveyor, and Mr. W. M. Gordon, surveyor, dated the thirteenth February, one thousand eight hundred and eighty-eight, seventeenth January, one thousand eight hundred and eighty-eight, and twenty-eighth January, one thousand eight hundred and eighty-eight, respectively.

8. That Mr. Bennett expressed his approval of the opening of the said roads, stating that all of them would be ultimately required and would enhance the value of the Crown lands. Mr. Deering reported chiefly in relation to the road across the bridge and the Boundary Road, the opening and forming of which he justified, stating likewise that while the clearing operations were under consideration or proceeding, "not the slightest communication was received by him from Messrs. Burns, Withers, and Smith," also, "that the work was initiated solely by himself, solely in the interest of the Crown whom alone he served," and that he only learned that Bellamy's one hundred acres, through which the Bridge Road was made, was the property of Burns, Withers, and Smith, by reason of the negotiations for the survey and opening of the said road, and also that "his only aim was to improve the Crown lands for sale;" Mr. Gordon stated that the roads constituted useful and reproductive works, taking into consideration the proximity of the Crown lands to both railway lines, as well as to such main roads as the Lane Cove, Peat's Ferry, and Pennant Hills.

9. That at the first sale of Crown lands at Hornsby about two hundred and fifty (250) acres were offered by auction on behalf of the Government by Messrs. Richardson and Wrench, of which one hundred and sixteen acres were sold, and realised upwards of four thousand six hundred pounds.

10. That on the fifteenth November, one thousand eight hundred and eighty-eight, a Select Committee of your Honorable House was appointed, on the motion of the Honorable Member for Northumberland, Mr. Thomas Walker, consisting of Mr. O'Sullivan, Mr. Copeland, Mr. Henry Clarke, Mr. McMillan, Mr. Melville, Mr. Street, Mr. Brunker, Mr. Carruthers, and the mover, to inquire into and report upon the works of the unemployed in clearing, forming, and making roads through the property near Hornsby, owned by Messrs. Burns, Withers, and Smith, and also through those made through the Holt-Sutherland Estate and other private properties.

11. That the said Committee brought up, on the day your Honorable House adjourned for the Christmas holidays, a Report, which it termed a "Progress Report," which it appears was adopted by the Committee on the casting vote of its Chairman (Mr. Walker).

12. That your Petitioner takes exception to certain of the allegations and inferences drawn therefrom, made in the said Progress Report, respecting the expenditure on roads through private lands in the Hornsby district.

13. That your Petitioner takes exception to the statement in the second paragraph of the said Report, that some of the roads and streets formed on the estate of Burns, Withers, and Smith appeared on their subdivision plan, and that their construction had been commenced prior to the advent of the Casual Labour Board, inasmuch as it leaves the inference that the roads made through the lands of Burns, Withers, and Smith were in accordance with a plan of subdivision which is not true, the fact being, as has been proved in evidence, that the lands through which roads have been made, consisting of upwards of six hundred acres, had not been subdivided or marked on any plan of subdivision, and that it was not the intention of the proprietors to subdivide the said six hundred acres; while the only expenditure on any subdivision of theirs was a very small amount in roughly extending two or three roads or streets on a subdivision adjoining the railway line a few days before the sale of Crown lands already referred to.

14. That your Petitioner takes exception to the name of Mr. Oliver, the ex Under Secretary for Lands, being coupled with that of Mr. Deering, as condemning the roads at Hornsby as being beyond public requirements, and the superior quality of the work on some of the roads as being chiefly calculated to benefit private individuals. Your Petitioner is aware, as has been proved by the evidence, that Mr. Oliver did not see any of the roads through private lands, and that the superior work about which he expressed an opinion was on the Crown lands subdivision and not on the private roads.

15. That your Petitioner takes exception to the statement in paragraph four of the said Report, as follows:—"The cost of the roads at Hornsby, including the Government subdivision, was nearly seven thousand pounds, whilst the Government subdivision realised only four thousand three hundred pounds at the recent sale,"—which conveys the impression that the cost of the roads in the Hornsby district was seven thousand pounds, and that the Crown lands in the locality affected by the expenditure were worth only four thousand three hundred pounds; whereas, as the evidence of the officers of the Government and of others examined proved that the total of the expenditure for clearing roads, reserves, and the like work, was only six thousand three hundred pounds, and that there are still upwards of four thousand acres of Crown lands for sale, which, in the opinion of competent judges, are worth thirty thousand pounds.

16. That your Petitioner further objects to the paragraph in the said Report in which it is stated that one of the proprietors of the estate of Burns, Withers, and Smith had admitted that their property had been greatly enhanced in value by the construction of the roads. The partner referred to was no doubt Mr. George Withers, who was denied the privilege of amending his evidence before the Report was brought up, but who was subsequently examined on the 15th January last, when he stated that when he was previously examined he had been led to believe that five thousand to six thousand pounds had been expended on roads through the lands of Burns, Withers, and Smith, and that the area held by them in that quarter was one thousand to one thousand two hundred acres, whereas he had since then ascertained that the amount expended on any roads in which they were interested was only about one thousand eight hundred pounds (528); that the lands through which the roads were made did not exceed six hundred and eighty acres, and that the land taken for the roads was worth three thousand six hundred and twenty-five pounds (524); that, in his opinion, Burns, Withers, and Smith did not obtain any increment in value from the roads, that the roads were very inferior (484), and that his first estimate of increment was based upon representations made in the House by the Chairman of the Committee (Mr. Walker), also upon general rumour (533).

17. That although your Petitioner did not promote or control the expenditure on any of the roads through lands in which he is interested, he has been most anxious to discover whether any of the expenditure has been in excess of public requirements, and whether his estate has been unduly improved by any such expenditure, for which reason he requested that Mr. W. C. Bennett, the Chief Engineer for Roads, and Mr. Gregg, of the firm of Richardson and Wrench, who conducted the Crown land sale, might be examined by the Select Committee, which was refused before the Progress Report was presented to your Honorable House, but both of whom have since been examined and their evidence brought up with a Second Progress Report, of the sixteenth January, one thousand eight hundred and eighty-nine; your Petitioner would invite the attention of your Honorable House to the additional evidence in question. Mr. Bennett, after inspecting the roads in the Hornsby district, stated that in his opinion two thousand pounds would represent the whole expenditure on roads through the property of Burns, Withers, and Smith (202); that Burns, Withers, and Smith have derived no advantage from the expenditure other than

than the exceptional position of the land absolutely rendered necessary, because access must be given to the Crown lands, no matter who owns the intervening land (205); that a larger proportion than nine-tenths of the roads are absolutely necessary (244); that he thought the roads were of inferior kind (186); Mr. Gregg also thought the roads were not of a good character (34); that any advantage from the expenditure on the 640 acres was about equalled by the roads being given without compensation.

18. Mr. Dawson has also inspected the roads at the request of your Petitioner, and has furnished a report in which states that the land given for the benefit of the Crown lands greatly exceeds in value the amount expended on the roads by the Government. Mr. Dawson has also prepared a plan, which shows that the plan put before the Select Committee of your Honorable House by Mr. Deering is misleading.

Your Petitioner therefore prays,—

That your Honorable House will appoint a Select Committee to take further evidence, and complete the inquiry on the Work of the Unemployed on the Roads at Hornsby.

And your Petitioner, as in duty bound, will ever pray.

J. F. BURNS.

T 1.

Gentlemen,

Department of Lands, Sydney, 9 September, 1887.

Mr. John Davies, C.M.G., having applied for the continuation of the Vanceville Road to the road which is being cleared from Hornsby, I am directed by the Secretary for Lands to request you to state (as the proposed road would traverse land belonging to you—being part of Hyndes' 2,000 acres) whether you will dedicate such road to the public free of any cost to the Crown beyond that of survey

I have, &c.,

STEPHEN FREEMAN,

For the Under Secretary.

Messrs. J. F. Burns, Geo. Withers, and R. Burdett Smith, care of the Hon. J. F. Burns, Esq., M.P.

T 2.

Dear Sir,

88, Pitt-street, 26 February, 1889.

In compliance with your request I visited Hornsby on Friday, the 15th instant, and made a careful inspection of the roads lately cleared by the unemployed in that locality, and beg to report as follows:—

The road along the east side of the railway line, and which is now called George-street, and which extends from Junction Road to Bridge Road, has been cleared, and about 15 chains of same has been roughly formed, but not ballasted.

Burdett-street is cleared, and a shallow water-table has been made in centre of same; but the street is not formed. This street has been extended easterly, from the subdivision at railway station to meet Boundary Road, with the intention of giving access to the Crown lands subdivision.

Hunter and Florence Streets have been cleared only, and Florence-street has been extended easterly to meet a road running southerly from the south-west corner of the Crown lands subdivision to Junction Road, and, with the exception of these extended portions, all the before-mentioned streets were cleared by your men some time ago, and the amount of money spent by Government on same would not, I consider, exceed £50.

Junction Road is cleared, formed, and roughly ballasted 15 feet wide, from George-street to the Vanceville Road, but this road from George-street to Forster's property is outside your property.

Road marked B on Mr. Deering's plan is cleared, formed, and ballasted very roughly, the ballast being only 15 feet wide, and consists mostly of broken sandstone that would not go through a 6-inch gauge. This road is in continuation of the road along the west side of the Crown lands subdivision, and was evidently made so as to give access from the Crown lands to Junction Road, and thence to railway-crossing and Peat's Ferry Road, and was made without your authority.

Road marked C on Mr. Deering's plan is cleared only, and a water-table has been made down one side, and this road has also been taken to give access from Crown lands to Pearce's Corner, and was also made without any authority.

Road marked D on Mr. Deering's plan is cleared and formed roughly, and half the land taken for said road comes out of Mrs. Edwards' property.

Road E on Mr. Deering's plan is cleared and roughly formed, but is not the shape as shown on his plan (*vide* my sketch herewith).

This road was not surveyed by me, but has been evidently taken to give access to the Crown lands, and which will be very beneficial to said lands when sold in subdivision.

Road H on Mr. Deering's plan is cleared, formed, and ballasted very roughly 15 feet wide, with the exception of 5 chains of same, which is only 10 feet wide.

This road, like D, has been taken equally from the lands of Mrs. Edwards and Messrs. Burns, Withers, and Smith.

Mistake Road is roughly cleared only, and is nothing like the shape shown on Mr. Deering's plan (*vide* sketch).

Burns Road is cleared, formed, and ballasted very roughly 15 feet wide. This road is outside your property, and I believe was done at the instance of Mr. Noonan and others, who have properties in that locality.

Road F on Mr. Deering's plan is cleared, formed, and ballasted 15 feet wide from Junction Road to Burns Road, and cleared and formed from Junction Road to Boundary Road, and this road was also taken to give access to the Crown lands, and which will be of immense benefit to same when subdivided, as will be seen on reference to plan.

Burns Road from Vanceville Road easterly is cleared, formed, and ballasted 15 feet wide. This road is then cleared and formed in a southerly and easterly direction till it meets Bobbin Road, and thence to the Lane Cove Road, and does not end at the boundary of Messrs. Burns, Withers, and Smith's land, as it appears to do on Mr. Deering's plan.

The land subdivided on the east side of the railway line contains about 52 acres, and the remainder of the estate has not been subdivided in any way.

In conclusion, I beg to state that in my opinion the land given for roads for the benefit of the Crown lands subdivision greatly exceeds in value the amount spent on said roads by the Government.

Yours, &c.,

C. B. DAWSON.

J. F. Burns, Esq., M.P., 75, Elizabeth-street.

T 3.

PLAN signed by C. B. Dawson, of Hornsby Roads, showing lands owned by Messrs. Burns, Withers, and Smith, tinted pink

[See Plan 2.]

T 4 (a).

Memorandum from the Chairman, Casual Labour Board, to W. M. Gordon, Esq., St. Leonards.

29 May, 1888.

ENCLOSED herewith I send you a rough sketch which the Honorable the Colonial Treasurer, Mr. Burns, handed me yesterday. Will you kindly supply a tracing of this locality, showing the names of property-holders, through which the Bobbin Rock Road* runs, where the delay in making has taken place.

J. DAVIES.

I have made all inquiry and endeavoured to find out the owner of Pymble's grant, through which the road will run, but failed. Whittingham is the owner of a small intervening strip. It would be much better to inspect the road, and make inquiries from the residents, who can tell at once the owner or owners of the land through which it will pass. I send you an approximate tracing of the continuation of the road, and if you think it necessary to go up, I could make it convenient to go on receiving your reply.—W. M. GORDON, 1 June, 1888. John Davies, Esq., C.M.G., M.L.C., Chairman.

For report.—J.D., Chairman, B.C., 4/6/88. Mr. O'Donnell.

The

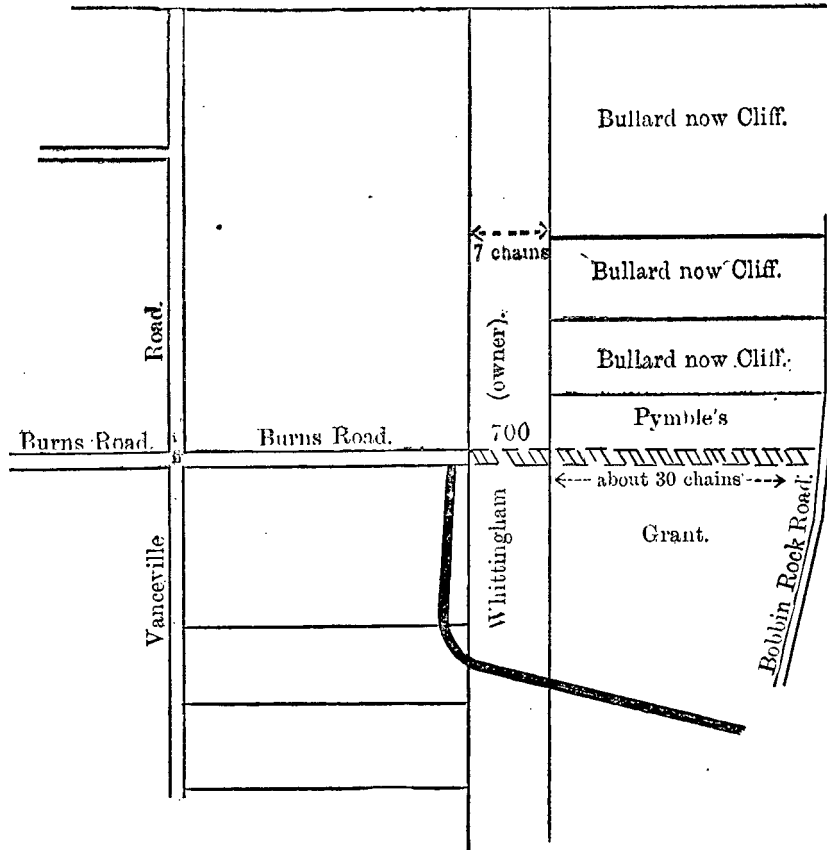

* Query.—The continuation of Burns-street runs. I have given the other information regarding the Bobbin Rock Road, also a tracing.

The road marked red on sketch plan attached impracticable; deviation suggested by previous report and sketch plan the only practicable road (on this black), unless at an enormous expense. The owners of property are Rogers, Clissold, and Myles McRae.—F. O'DONNELL, 9/6/88. To Chairman, Casual Labour Board.

T 4 (b).

SKETCH SHOWING BY LINES THUS // // // // // THE PROPOSED CONTINUATION OF BURNS ROAD, THROUGH WHITTINGHAM'S AND PYMBLE'S TO JOIN THE BOBBIN ROCK ROAD.

CROWN LANDS.

[To Evidence R. Burdett Smith.]

U.

Plan compiled by Frederick Wells, 27 November, 1888, showing Proprietors, as far as could be ascertained, and work done by "Unemployed" to date, near Hornsby Station. And Schedule of all roads shown on plan cleared or made by unemployed, giving name of road, length, estimated cost, amount, name of landowners, and explanatory remarks certified as correct by Mr. O'Donnell, 7 November 1888, and signed by Mr. Wells, 6 December, 1888.

[To Evidence of W. M. Gordon.]

V.

Sir, Adare Villa, North Shore, 17 October, 1887.
I have the honor to inform you that I have visited the works now being carried out by the unemployed in the Parish of Gordon, with regard to the further clearing of roads giving access to the Crown lands.

To illustrate my report more clearly I furnish herewith tracing showing by a red colour roads cleared and in course of completion.

First.—I have the honor to propose that the roads coloured brown on tracing be cleared. It will be seen at once the necessity of clearing roads marked A, B, C, to give access from Junction Road to the Crown Road dividing the private lands from the Crown lands. The roads marked D and E will also tap the Lane Cove Road at intervals, and F will be a continuation of road C to the Lane Cove Road, viz., Vanceville Road, which is a first-class road from Billyard-street to the Lane Cove Road.

Second.—As Junction Road has been cleared throughout from the Hornsby Railway Station, and is a very good road as regards gradient and crossings at the gullies, I have the honor to recommend that it (Junction Road) be formed and ballasted throughout, and culverts erected in about the position shown on tracing over the gullies, and one over a gully on Boundary Road.

I have, &c.,
W. M. GORDON,
Government Surveyor.

John Davies, Esq., C.M.G., Chairman.

To the Secretary of the Casual Labour Board Inquiry Commission, Sydney,—

Sir,

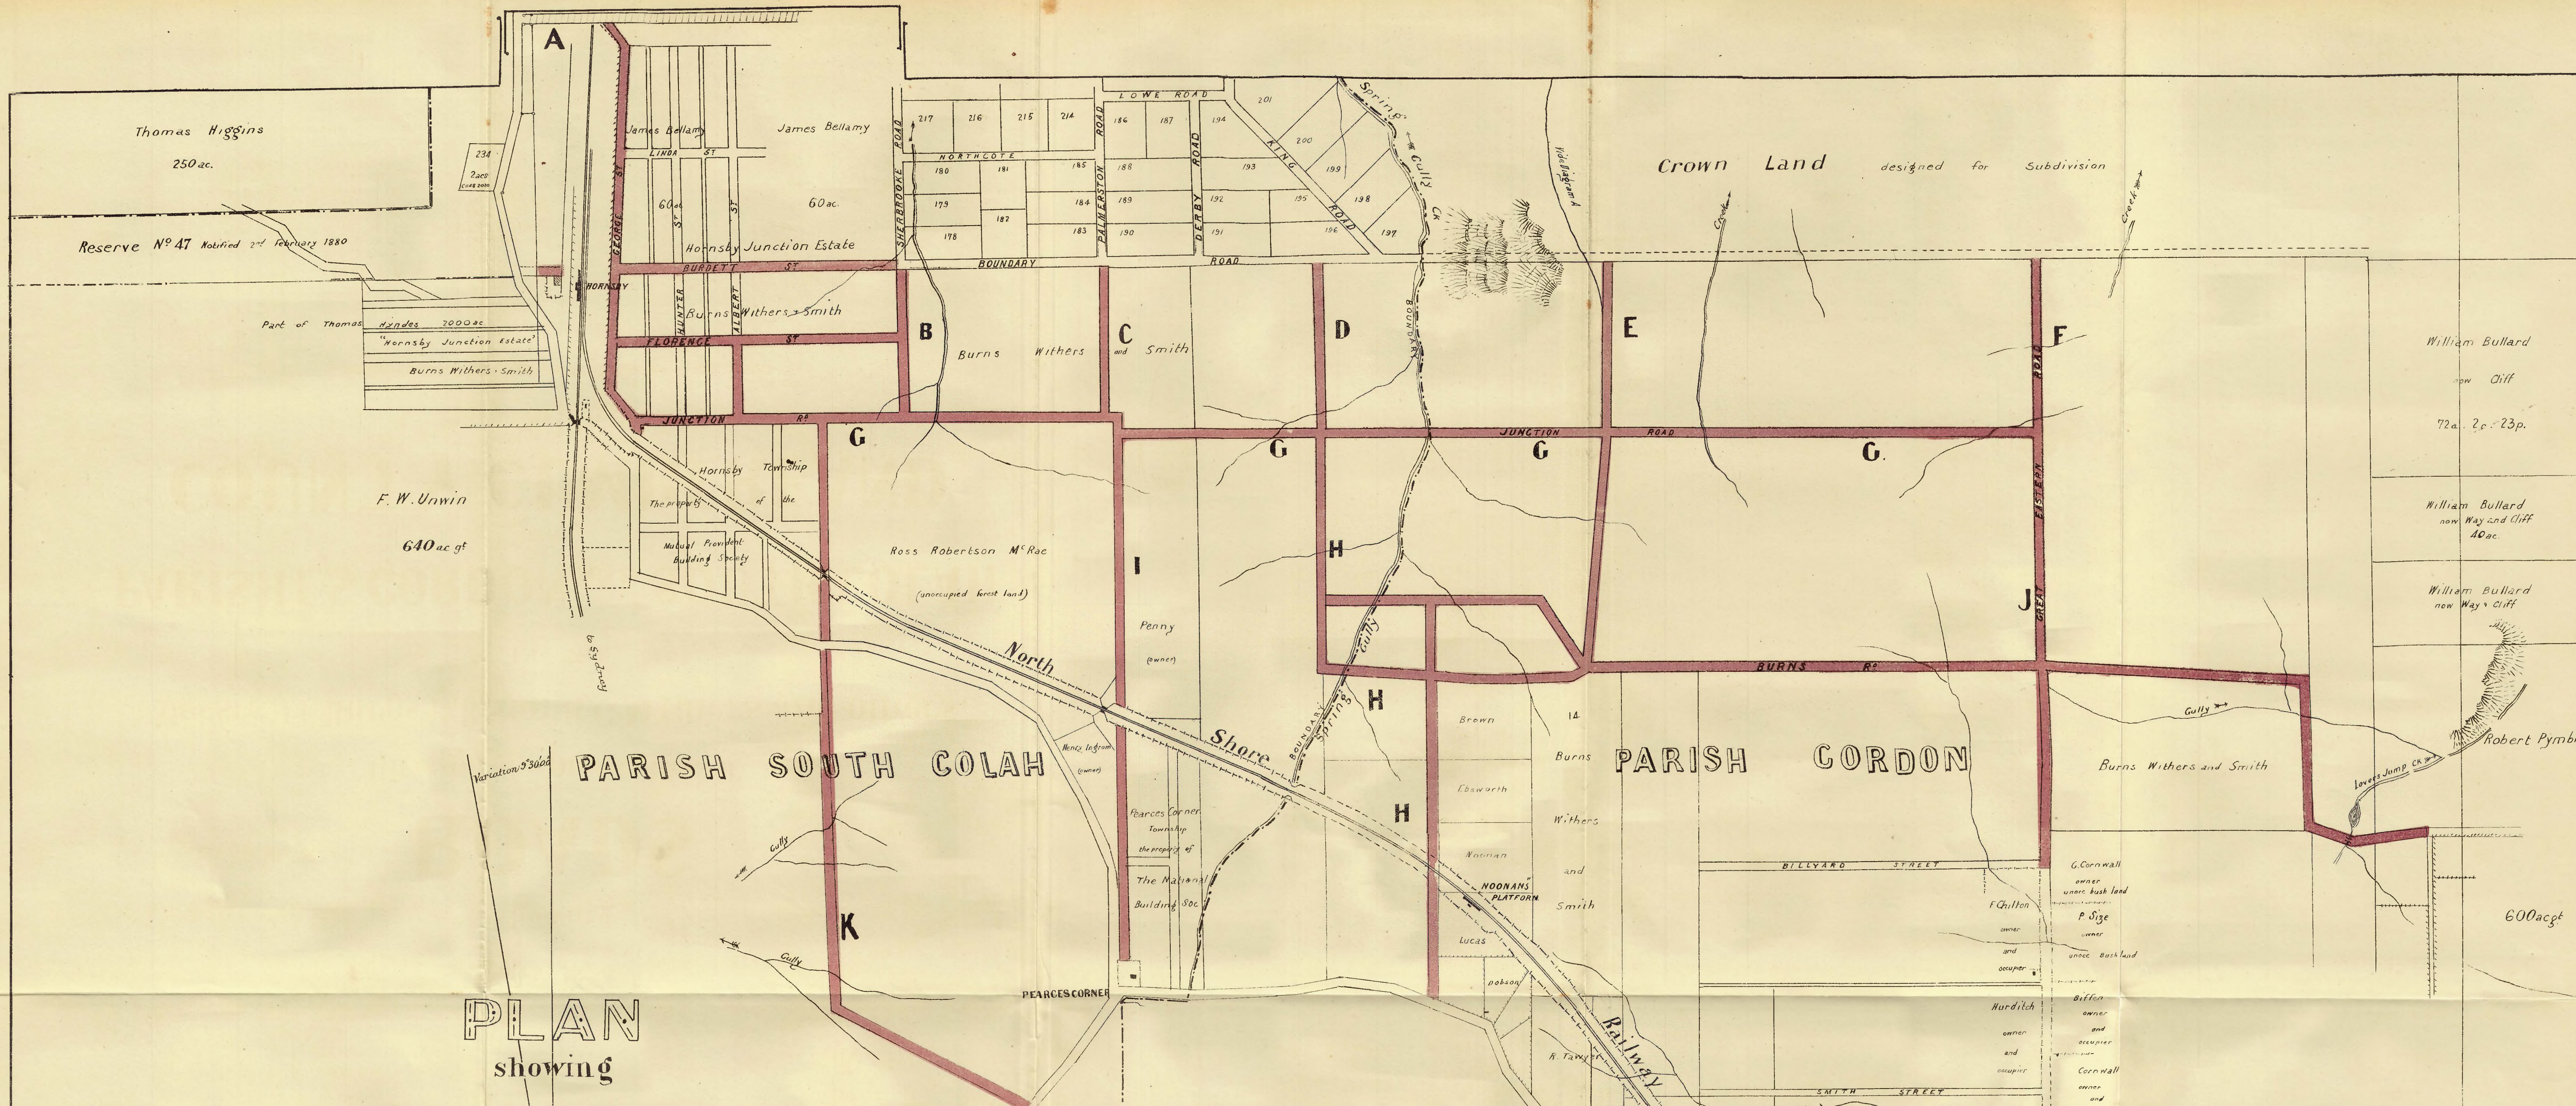

Norwich Chambers, Hunter-street, Sydney, 31 May, 1889.

We, the undersigned, being the members of the firm of Messrs. Want, Johnson, & Co., Solicitors, Sydney, declare that we were not aware, until within the last few weeks, that the signatures of the clerks in our office who signed the memorials petitioning for the making of roads on the Holt-Sutherland Estate had been obtained to same; and we assert that if we had known at the time that any of our clerks were so signing the same, we should not have permitted them to do so.

We have, &c.,

JAMES WM. JOHNSON.

CASUAL LABOUR BOARD INQUIRY COMMISSION.
(SPECIAL REPORT BY.)

Presented to Parliament by Command.

A SPECIAL REPORT presented to His Excellency the Governor, by the Casual Labour Board Inquiry Commission, upon a particular matter arising during the progress of the Inquiries directed by the Commission.

To His Excellency The Right Honorable CHARLES ROBERT, BARON CARRINGTON, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

We, Her Majesty's Commissioners, were appointed by Letters Patent under the Great Seal of the Colony, dated the twentieth day of February, one thousand eight hundred and eighty-nine, to make a diligent and full inquiry into the working of the Casual Labour Board, consisting of the Honorable John Davies, C.M.G., M.L.C., Frederick Wells, Esquire, and David Houison, Esquire, from the time of its appointment until the twenty-third day of January, one thousand eight hundred and eighty-nine, into the mode in and the purposes for which public moneys have been expended by the said Board, or any members or member thereof, or under their or his authority; into the manner in which the said Board and the members thereof have performed their duties in that behalf; and into the truth of all charges and statements which have been made before Parliament, or before any Select Committee thereof, touching any alleged improper expenditure by the said Board, or any members or member thereof, or under their or his authority, of any public moneys in the improvement of, or the making, or construction of roads or other works upon the property of any person, partnership, or company.

We received our Commission on the 22nd day of February last.

We have since that date diligently prosecuted the inquiry intrusted to us and we are still actively engaged in the examination of witnesses, whose evidence is, in our opinion, material and necessary for the purposes of the investigation.

We have held twenty-seven meetings and have examined fifty-two witnesses.

Excepting so far as the subjects referred to us for inquiry, and above indicated, trench upon and are unavoidably imported into that branch of the inquiry which relate to the charges and statements which have been made before Parliament or before any Select Committee thereof, as mentioned in the Commission, we have, we believe, unless other material witnesses are presented, concluded the actual taking of evidence, on what may be termed, for purposes of division of subject matter, the Departmental working.

We defer bringing up our Report on this head until we are in a position to present our Final Report upon the whole subject matter submitted for investigation, as, in some important respects, we are unable to come to a proper conclusion until evidence on the latter branch of the inquiry is completed.

In the course of the inquiry, a matter, in our judgment, of serious import has arisen, involving the Chairman of the late Casual Labour Board, the Honorable John Davies, C.M.G., M.L.C.

We have, so far as we are able, investigated this matter, with the result that, in our opinion, the evidence taken and the examination of such books and documents as are available to us, disclose grounds for the belief that, at least, a grave irregularity, implicating Mr. Davies, has been committed.

We, therefore, after the fullest and most anxious deliberation, and in view of the responsible nature of our duties and the public interests, deem that the circumstances demand that we should submit a Special Report on the particular matter hereinafter indicated.

We, for reasons that will appear obvious, refrain here from pronouncing our definite finding on the matter.

We submit this Special Report, with the documents that are annexed to, and are to be taken as incorporated herein, in order that, if your Excellency sees fit the same may be referred for the opinion and advice of the Crown Law Officers, as to whether any further action shall be taken.

We have, as will be found later on in this Special Report, taken upon ourselves the responsibility of impounding certain books and documents which have been produced in evidence by various witnesses.

These books and documents are the property of certain persons and companies.

We doubt whether we have power, either inherent to our office as Commissioners, or by virtue of the statute 44 Victoriae No. 1, to warrant the impounding of such books and documents.

But, in the general interests, and to save what possibly might lead to a miscarriage of justice, we have assumed the authority to detain the books and documents, believing that our action in this respect will be supported.

The consideration of this has, in a large measure, induced us to the conclusion that the circumstances justify our submitting a Special Report, and on this point we seek to be directed as to what course we are to take, if the return of these books and documents is demanded and insisted upon by their owners.

We

We propose in this Special Report to refer to or quote only such evidence as, in our judgment, bears upon and is material for the purpose of conveying a clear comprehension of the particular matter to which this Report relates.

The Casual Labour Board, the members of which were Mr. John Davies, Mr. Frederick Wells, and Mr. David Houison, appears to have been appointed by Sir Henry Parkes, then Colonial Secretary, in or about the month of May, 1887.

The members of the Board rely upon a memorandum or minute under date 2nd May, 1887, signed by Sir Henry Parkes, and directed to them as conveying instructions for their guidance.

Messieurs F. Wells and D. Houison, at the time of the creation of the Board, and throughout its existence, held important, and, we believe, responsible offices in the Public Service, the former as an Assistant Engineer in the Roads and Bridges Department, the other as District Engineer in the Harbour and Rivers Department.

Shortly after the creation of the Board, the members thereof appointed Mr. John Davies to be the Chairman, and subsequently, what has been termed by different witnesses "the executive work," or general administration of the Department, was entrusted to him.

Messieurs F. Wells and D. Houison thenceforth, though in many respects bestirring themselves in regard to the professional working, did not actively and continuously engage themselves in the duties of the Casual Labour Board Department.

Mr. John Davies, on the other hand, assumed the active management of the office, and administered its affairs, virtually appearing and acting throughout as the responsible head of the Department.

He and some of the subordinate officers on the staff of the Department appear to have had almost the entire control of the funds which were placed at the disposal of the Casual Labour Board by the Government, and the application of the various moneys belonging and coming to the Department.

Amongst other things, Mr. John Davies was empowered to sign cheques, which were countersigned by Mr. Thomas Cooper Hinchcliffe, the senior clerk in the establishment, and in other respects Mr. Davies appears to have had and exercised a very wide discretion.

From our examination of the books of the Department, and from evidence we have taken on the subject, the practice appears to have obtained for the Colonial Treasurer to pass to the credit of the Casual Labour Board at the Australian Joint Stock Bank various sums from time to time, each amounting to £6,000.

For some months the bank account of the Board was thus kept in funds by periodical payments from the Treasury of £6,000, but at a later period the account with the Australian Joint Stock Bank became and remained for a considerable time overdrawn to the extent of several thousands.

For example: In December, 1887, the Board's current account with the Australian Joint Stock Bank was overdrawn upwards of £18,000. In July, 1888, the same account was overdrawn upwards of £29,000; and this overdraft went on increasing to the end of the year 1888, when it reached £77,722 14s. 8d., as shown by the Bank pass-book.

The account was then partially put in funds by a payment from the Colonial Treasurer of £72,000. But at the close of the Board's existence in January last there was again an overdraft, amounting to £12,203 10s.

The total payments made by the Casual Labour Board during the time of its existence, as taken from the cash-book kept by one of the officers of the Department, were £252,424 8s. 10d.

These facts and figures are mentioned to illustrate in a measure the extent of the control and responsibility of Mr. John Davies as the Chairman of the Board who administered the Department.

They are not further relevant to the special matter herein reported on, beyond noting that the Colonial Treasurer was, with certain exceptions to which we refer below, the source from which this Bank account was fed, and that the Casual Labour Board's Bank was the Australian Joint Stock Bank.

In examining the Bank pass-books, three in number, at an early stage of the inquiry we discovered in addition to the Colonial Treasurer's payments at various times of twenty-five sums of £6,000 each to the credit of the account and of the payments £18,000 and £72,000 from the same source, there were in the months of June, July, August, and September, 1887, and of June and September, 1888, six credit items appearing simply with the name "John Davies" before each item.

On referring to the cash-book of the Casual Labour Board, we found these entries in name, date, and amount, agreeing with the entries in the Bank pass-books, but we could not find amongst any of the other books or records of the Casual Labour Board Department anything to throw light on the items.

Mr. T. C. Hinchcliffe, the senior and responsible clerk employed in the Casual Labour Board office, and immediately under Mr. John Davies, was examined by us.

In his evidence, he claimed the position simply of Secretary and Paymaster to the Department, and distinctly disclaimed the position of Accountant, or full responsibility for the accounts, though he admitted that it was his duty to see the books were properly kept, and he said he sometimes checked them.

Several other witnesses, including members of the Board, described him as the responsible Accountant to the Department.

In the course of his examination he was asked whether moneys were received for or on account of the Casual Labour Board from any other source than the Treasury, and he replied: "Small sums sometimes."

In eliciting his knowledge on this point further by close questioning, we obtained the clue to the transactions to which some of the entries related.

In answer to a question, "What became of the moneys?" he replied, "They were paid into the Bank to the account of the Casual Labour Board. That, I may tell you, was irregular. I told the Chairman so with regard to several other sums, I think about £300 altogether, that the course he adopted was against the rules of the Department. He said he would take the responsibility, but when I left the office I got him to sign a voucher, transferring it from the Bank to the Treasury. It was simply an irregularity on his part. He said he would take the responsibility, and I let him do so. There is the voucher in the office, simply transferring the amount from the Bank to the Treasury."

Mr.

Mr. Hinchcliffe further said—Such moneys were paid to the Chairman, sometimes by cash and sometimes in cheques. He was asked—Whether such moneys would go through the books of the Department, and, in reply, he said, “No; that is where the irregularity came in. We were not allowed to receive any moneys, except from the Government, that is, the books did not show any money that we received. We were supposed to pay it into the Treasury, into the Miscellaneous Account, or wherever it had to go.”

He repeatedly affirmed that these amounts appeared only on the Bank deposit receipts and Bank pass-books, but on no book that was kept by the Casual Labour Board Department.

As a matter of fact, these items did appear as and in the way mentioned above, in the cash-book of the Department. This was pointed out to Mr. Hinchcliffe at the close of his evidence, and he explained that he did not know the items appeared there.

On further interrogation, Mr. Hinchcliffe said “That firewood was sold by auction. That the auctioneer sent accounts of the sales, which he saw when they came in but not afterwards. That the Chairman had possession of these accounts, and would keep them in his own drawers. That the Chairman would receive the moneys for the sales, and pay them into the Bank” (meaning the Australian Joint Stock Bank) “to the credit of the Casual Labour Board, and they would become absorbed in the balance of the £6,000 advances.”

This witness also stated, “The Chairman, when he received the *first* cheque, paid it into the Bank. I told him that that was not the usual way, but that it should be paid into the Treasury”; and further, “That the Chairman paid similar moneys in all the time, in spite of his (Mr. Hinchcliffe’s) remonstrances.”

Following this information up, we ascertained that men had been employed at or near the National Park from time to time in cutting timber, apparently the property of the Government, for firewood, which was sent on for sale to Sydney; that Mr. George Robert C. Neale, of Engine-street, was the auctioneer employed, who alleged that he had made several payments to the Casual Labour Board, and had always with such payments sent in account sales to the Chairman of the Board.

Mr. J. B. C. Miles, one of the gentlemen appointed in January last to take over and wind up the affairs of the Casual Labour Board, was examined before us, and stated that he had been unable to find any account sales in the office, and had applied to Mr. Neale for copies of same, but that he (Mr. Neale) had refused to furnish copies without payment therefor.

We accordingly summoned Mr. G. R. C. Neale to attend before us with his books, &c. He was examined by us on 26th March last. As he had not then with him certain cheques, on which the evidence he then gave bore, we required him to attend again and produce them.

On the following day, 27th March last, Mr. Charles William Beggs, the partner of Mr. G. R. C. Neale, attended before us and was examined. He produced nine cheques, which it was claimed had been paid over to the Casual Labour Board, and represented proceeds of sales of firewood.

Subsequently, occasion arising, Mr. G. R. C. Neale was again called and examined on 23rd April instant, and on 24th April instant with reference to a further payment that had turned up in the course of the taking of evidence.

As

“timber to the Casual Labour Board. Hillier got it because before they (the Casual Labour Board) gave him (Hillier) his cheque they (the Board) had to have Neale’s.” It is supposed, the Board wanted Neale’s cheque and account sales to check Hillier’s work.

We should here remark that we have not yet found where Hillier is for the purpose of obtaining his evidence, though we don’t think it can in any way materially affect the matter presently under report.

The Casual Labour Board cash book discloses a payment to Hillier, on 17th May, 1887, of £29 1s. 6d. This may relate to the same timber as the payment by Neale, but we have not yet been able to connect it with the particular transaction.

We do not think it affects the consideration of the evidence.

The evidence of Mr. Duchesne, of the City Bank, supported by the original deposit slip he produced, establishes that on the 16th May, 1887, apparently two days after its receipt by Mr. John Davies, as Chairman of the Casual Labour Board, this particular cheque of £26 17s. 7d., which Neale had paid to the Casual Labour Board Department, as proceeds of sale of firewood, was appropriated by Mr. John Davies to his own use, and paid into his private bank account in the City Bank, with special directions as to how it with other moneys then paid in should be applied, that is to say, according to the deposit or credit slip in Mr. Davies’ handwriting, “£50 in special reduction of Osborne’s bill, and £5 ~~7s. 7d.~~ account C. R., £5 7s. 7d. on 18th instant,” being evidently purposes connected with his (Mr. Davies’) private business, and in no way pertinent to or arising out of his position as Chairman of the Casual Labour Board.

We next come to the consideration of the sixth item in the foregoing statement of amounts, the item of £33 3s. 2d. It will be noted that Mr. G. R. C. Neale, when examined before us on 26th March last did not disclose this item. On the contrary he stated he had not anything further on his books than what he had just then previously stated to us in evidence, and that he did not know of any further sales.

Having, subsequently to Mr. Neale’s examination, of 26th March last, learnt that certain sums had been paid into the Colonial Treasury on account of the Casual Labor Board, we summoned the Under Secretary for Finance and Trade, and subsequently, Mr. Newcombe, an officer in the Treasury Department.

From them, we received a statement of the moneys so paid in, and the receipt vouchers, which had been handed in, when certain payments-in had been made, describing for what the particular payments-in purported to have been made:

The last item on this Treasury statement was £33 3s. 2d.; the date on which it had been paid in and credited at the Treasury was 29th March, 1889. The Department receipt voucher No. 4,635 was signed “John Davies,” and showed under the head of “Particulars of sums received” the words “Sale of firewood at National Park.”

This was the first clue we obtained to any further firewood transactions than what Mr. G. R. C. Neale had stated to us on 26th March last.

We followed it up, with the result that we discovered and the evidence established that in July, 1887, a sale of firewood was effected by Mr. G. R. C. Neale, on account of the Casual Labour Board; that the proceeds, amounting to £33 3s. 2d., were duly paid over by Mr. G. R. C. Neale by his cheque on the Bank of New South

South Wales, Haymarket Branch, dated 19th July, 1887; that that cheque was received by Mr. John Davies, and by him appropriated to his own use, such cheque having been paid by him personally into his private Bank, the City Bank, with a special direction written on the credit or deposit slip: "To provide for cheque to be drawn on Thursday."

We next come to the consideration of the payment of £52 3s. 2d., on or about 22nd September, 1887, being the tenth or last item in the foregoing statement of amounts. Though apparently trivial, it is worthy of notice that Mr. Neale, giving evidence on 26th March last, with his auction sales book in front of him, stated the amount, *as it does in fact appear there*, to be £52 3s. 2d., but when Mr. Beggs next day produced the original cheque given in payment it was found to be for £52 3s. 1d.

This circumstance is relied on as assisting to explain a matter later on in this Special Report.

Mr. Neale says—In all cases he sent the account sales and always paid by cheque.

That the sales for which he accounted were all on account of the Casual Labour Board, and that the Casual Labour Board generally got his account sales and cheques before they settled with Hillier.

A reference to the cash-book of the Casual Labour Board shows a payment to Hillier on 22nd September, 1887, of £38 1s. 6d., thus supporting Neale's evidence as to the practice. For this would appear to be in respect of the transaction he had accounted for to the Board that day.

When asked if he had seen Mr. Davies recently, Mr. Neale said, "About a month ago as near as possible." He was asked what Mr. Davies saw him about. His reply was, "He asked me whether I could give him a memo. of what cheques I paid to the 'Board.' I said, 'I can give you a rough one.' I did so far as I could. He said, "'That is about the same as I have, but I have a little more.' I looked it up and "found I had omitted something whilst copying from one book to the other."

Taking a month back from the time the witness spoke would bring the interview to nigh the end of February.

The evidence is that Messrs. Miles and Mason were appointed to take over control of the unemployed on 25th January last, and that Mr. Davies remained at the office for some days after that time.

He would probably become aware later on of the fact that some examination would be made into past transactions.

Messrs. Miles and Mason took some time to master the details of the office, and probably it was well on in February before mention of any firewood sales would come up.

Mr. Davies was not, we believe, in the office after January, but we are disposed from the evidence to think he had friends, or at least one there who would mention to him what was going on.

Apart from that, we readily believe, from what has happened in the course of this inquiry, that Mr. Davies would not lose an opportunity of inquiring what was being said or done by his successors.

This will probably account for his visit to Neale, and his anxiety to obtain from him a memo. of the payments.

Now

Now Mr. Neale says he was then asked for a memo.; that he gave a rough one; that Mr. Davies said he had more; Mr. Neale then said he looked it up and found he had omitted something.

Mr. Davies, in the course of giving his evidence before us, which is hereinafter referred to, produced the memorandum he said he had got from Mr. Neale, and also a memorandum he had obtained from the office of the Casual Labour Board.

This latter was in the handwriting of one of the clerks in the Board's service, for which probably Mr. Davies had asked after giving up charge.

It comprised a list of all the payments that had been made by him to the Australian Joint Stock Bank other than the moneys which had been paid into that Bank by the Treasury.

But the memorandum he got from Mr. Neale, and which he (Mr. Davies) produced did *not* contain either the items of £26 17s. 7d. and £33 3s. 2d.

This probably is what Mr. Neale meant by his evidence "he found he had omitted something in copying from one book to the other."

We have Mr. Neale's books, and we have observed that the item of £26 17s. 7d. is not carried into some new ledger account he opened, and that the item of £33 3s. 2d. appears on a different page to that on which all the other payments are noted, only a figure reference at foot of page being noted to direct attention to the separate entry.

We can readily understand how these entries might be overlooked in the hurry of supplying information on Mr. Davies' call. We are quite satisfied as to Mr. Neale's books.

Mr. Neale had in his book—as he gave it in evidence—£52 3s. 2d.; but when Mr. Beggs produced the cheque it was £52 3s. 1d.

Mr. Neale evidently had not noticed in his book the small discrepancy between the return of proceeds as per his book and the cheque he drew. It is clear though, now, from this small discrepancy, that when Mr. Davies paid the £52 3s. 2d. into the Treasury on 15th February last he got his information then recently from Mr. Neale, and not from the cheque which he had received in September, 1887.

As to this £52 3s. 1d. the evidence of Mr. Duchesne, and the original deposit slip in Mr. Davies' own handwriting, establishes that this sum of £52 3s. 1d. was on 26th September, 1887 (four days after the date of Mr. Neale's cheque for that amount), appropriated by Mr. John Davies to his own use, and paid into his No. 2 account in his own bank (the City Bank).

According to the statement we received from the Treasury Mr. John Davies, on 15th February last, paid into the Treasury a sum of £52 13s. 2d., of which £52 3s. 2d. is described in the departmental receipt voucher, signed by "John Davies" as "September 26th, amount received for sale of firewood from National Park."

As to Mr. Neale's omission of items in the memorandum he gave Mr. Davies in February last, it may be the first item of £26 17s. 7d., or it may be the item of £33 3s. 2d. It seems to afford some explanation for the items of £52 3s. 2d. and £33 3s. 2d. coming in separately when they appear in the statement we obtained from the Treasury—the one on the 15th February, 1889; the other on 29th March,

1889. But this can in no way explain the appropriation of these moneys in the months of July and September, 1887; while as to the £26 17s. 7d., there does not appear to have been ever any payment thereof made to the Treasury. So far as the evidence goes that money has never been disgorged.

It is beyond doubt that the payment-in to the Treasury of £52 3s. 2d. was made by Mr. Davies after he saw Mr. Neale in February last, and that the amount differing from the actual amount he received and paid into his own bank in September, 1887, was obtained from Mr. Neale's book.

Mr. Davies was examined by us on 23rd April instant specially in regard to any moneys he received or property he held for or on account of the Casual Labour Board or the Government in respect of the premises.

His evidence on this point is hereto appended.

It may appear unaccountable that Mr. John Davies should select only certain of Mr. Neale's cheques for proceeds of firewood sales to pay to his own bank for his private credit, while the bulk he paid to the Board's account in the Australian Joint Stock Bank.

There is this distinguishing feature:—All the seven of Mr. Neale's cheques—except one small one for £5 4s. 6d.—that were paid into the Australian Joint Stock Bank, credit of account Casual Labour Board, were made in favour of—(1) Government Wood; (2) The Casual Labour Board; (3) Government Relief Works; (4) Casual Labour Board; (5) Chairman of Labour Bureau; (6) Government Labour Bureau.

Such cheques, if paid to a private account in a bank, might naturally excite question or remark at the time, or some talk amongst the officials.

The three of Mr. Neale's cheques that were at different times passed by Mr. John Davies to the credit of his private account in the City Bank were made in favour of “(1) Mr. T. S. Hinchcliffe, (2) Mr. E. M. Burrows, (3) Mr. Burrows.”

We may add that, in a measure, to test the value of the evidence as regards cashing cheques and “holding particular moneys in hand,” we inquired whether, between 1st May, 1887, and 31st March, 1889, any cheques had been drawn by Mr. Davies on any of his accounts in the City Bank for £26 17s. 7d., £33 3s. 2d., £52 3s. 2d., or £52 13s. 2d., and in reply we were informed that not any cheque for any of such sums had been drawn during the periods named.

The evidence given by Mr. Davies just at the close of his second day's examination came after we had had the bank's officer in attendance and under examination.

Mr. Davies' evidence on the whole matter herein referred to, is, in our opinion, extremely unsatisfactory, and does not alter the facts established by the evidence of Messrs. G. R. C. Neale, W. C. Beggs, and W. Duchesne,—

As to the misappropriation, on 16th May, 1887, and the absolute retention of £26 17s. 7s.

As to the misappropriation, on 26th September, 1887, of £52 3s. 1d., and its retention from that date until 15th February, 1889.

As to the misappropriation, on 19th July, 1887, of £33 3s. 2d., and its retention from that date to 29th March, 1889.

It

It has already been mentioned that, during a considerable portion of the period of the Casual Labour Board's existence, the account in the Australian Joint Stock Bank was overdrawn, and probably paying interest, while Mr. John Davies had the use of the above moneys for his private banking purposes.

It will be seen from Mr. Davies' evidence that he distinctly and frequently denies that he has now any money or property in his possession or under his control, or in the control of any person or company on his behalf, belonging to the Government or the Casual Labour Board.

It is proper for us to add that there is not any evidence whatever to connect the other members of the Board, Mr. Wells or Mr. Houison, with the matter herein specially reported on, and we believe they have not any knowledge of the same.

It will be gathered from the foregoing, the reasons that have induced us to impound the several books, cheques, and credit-slips, pending any further action that may appear to Your Excellency proper in the premises, or pending Your Excellency's commands or directions to us, which we humbly ask may be issued to us in this respect.

We certify this to be a Special Report made upon a particular matter arising during the progress of the inquiries entrusted to us by the Commission before referred to.

Certified under our hands and seals, at Sydney, this 29th day of April, 1889,—

ALFRED J. CAPE,
President.

F. A. FRANKLIN.

T. F. WALLER.

MINUTES OF EVIDENCE.

George Robert Cartwright Neale called in, sworn, and examined:—

Mr.
G.R.C. Neale.
26 Mar., 1889.

2928. *President.*] I believe you had several transactions with the Casual Labour Board? Yes.
2929. What was their nature? Selling wood for them.
2930. Only wood? I think I sold one little lot of charcoal.
2931. Nothing else? Nothing else.
2932. What are you? An auctioneer.
2933. Carrying on business where? Engine-street.
2934. Will you refer to your books and give us the account of the first transaction you had with the Casual Labour Board? I fancy that was made out on account of Mr. Deering. The first lot that came down was sent from Mr. Deering, and the party that was cutting it used to come and get the account sales and take them to the Casual Labour Board. Until I went there on one occasion I did not know that Mr. Davies was one of the Board at the time.
2935. Give us the first account you had with the Board if you can? The first was, I think, about the 7th of May, 1887.
2936. What was that for? That was for wood.
2937. And the amount? The first cheque was drawn in favour of Hinchcliffe for £26 17s. 7d. on the 14th May, 1887.
2938. Did you say there was a previous account? I do not think there was a previous account.
2939. The first time the wood was sold for Mr. Deering? I think that was the commencement of it.
2940. You need not go back before 1887? Very well.
2941. Take the beginning of 1887, and give me the first amount after 1st January, 1887? The first time in 1887 was on 6th April. That was payable to Mr. Deering.
2942. How much was that? £2 15s. 1d.
2943. To whom was it paid? Mr. Deering.
2944. When was the next? The next payment was £14 6s. 11d., on the 14th April, 1887.
2945. To whom paid? The cheque was made in favour of Mr. Deering.
2946. And the next? £2 14s. 1d., on 15th April, 1887.
2947. And the next? I think they went from there to the National Park.
2948. When was the next cheque given? The next cheque was for £26 17s. 7d., on 14th May, 1887.
2949. Whom did you give that cheque to? That cheque was taken by the cutter to the Casual Labour Board.
2950. Who was the cutter? Mr. Hillier had the contract for cutting the timber.
2951. Did you give it to Hillier? I did. He used to come every week. Before they gave him his cheque they had to have mine. When they got my cheque they were able to check his work.
2952. Did you get any receipt for it? No, none. Of course the cheque would be a receipt of itself. It should go through the Bank to the credit of the Board.
2953. What Bank was it drawn on? The Bank of New South Wales, Haymarket Branch.
2954. What was the next cheque, the amount and date? £38 4s. 2d., on the 31st May, 1887.
2955. Whom did you pay it to? To the Casual Labour Board through Hillier.
2956. Have you the butt of your cheque-book here? No.
2957. Have you anything to show that you paid the £26 17s. 7d.? I have the butt of the cheque-book at home. I thought that was not necessary if I showed the cash-book. I can produce the bank-book with it in. It was only yesterday morning I knew of this inquiry. I can look up all these things in a few hours.
2958. Do you know Hillier? Yes.
2959. Who is he? He was a wood and coal merchant. He has moved from Sutherland to Ashfield. At the time he was there he had the first contract with the Government to cut wood.
2960. Have you got any receipt for the £38 4s. 2d.? I never got any receipt for any cheque.
2961. How did you know they went to the Casual Labour Board at all? I know Hillier went there. They said they could not pay him until I sent my cheque over. He used to come down and get his cheque once a fortnight or once a week. They said they wanted the account rendered when he came down for them. They used to give him sometimes so much on account. I think he has got a book of his own which would show what they paid him.
2962. Have you any account sales? This book here is the account sales-book.
2963. Are you giving your evidence from your book? Yes; it is copied from the sale-book into here.
2964. Did you send in account sales? Every one of them; we never omitted them.
2965. Tell me the next payment after 31st May, 1887? £66 12s. 6d.
2966. When? On 23rd June, 1887.
2967. How did you pay that? By cheque.
2968. To whom? To the Casual Labour Board.
2969. Who took it? I fancy I did myself. I went over with it because I told Hillier I would go with it myself. That is how I first came to know Mr. Davies was there. It was only on that occasion I saw Mr. Davies.
2970. When was the next payment? 7th July, 1887, £41 12s.
2971. What was that for? For wood.
2972. Whom did you pay that to? The same party.
2973. To Mr. Davies himself? I can hardly tell you that. If you want to verify this I can get the cheques, or the old butts. I can get them from the Bank, and see what Bank they passed through.
2974. I ask you to do that;—when was the next payment? 19th July, 1887.
2975. Are you quite sure this is all on account of the Casual Labour Board? Yes.

2976.

- Mr. G. R. C. Neale. 2976. How much on 19th July? £5 4s. 6d., for wood.
 2977. After that? I think you will find the next amount is £40 1s. 1d., on 4th August, 1887.
 2978. What for? For wood.
 26 Mar., 1889. 2979. Whom was it paid to? It was paid in the usual way to the Casual Labour Board.
 2980. To any individual you can name to us? I will get you the cheques as far as that goes. I think they are all made out to the Casual Labour Board.
 2981. What was the next payment? £36 3s. 10d., on 18th August, 1887.
 2982. The next? £40 12s. 3d., on 2nd September, 1887.
 2983. The next? £52 3s. 2d., on 23rd September, 1887.
 2984. The next? I think that is the last.
 2985. Nothing else? That is the lot.
 2986. Since 23rd September, 1887, can I take it, you have not sold anything on account of the Casual Labour Board? I have not paid them anything. There were a few bags of charcoal I sold for them. I had paid the Casual Labour Board for a truck of wood I never got paid for, sent by Mr. Burrowes to Ashfield. I never sent the wood to the parties. I said to Mr. Davies that the charcoal and that wood would about tally. That is the only thing that has not been paid to them. The twenty bags of charcoal sold at 1s. 6d. a bag.
 2987. Is that something you have not accounted for? It is.
 2988. When was it sold? On 21st September. I dare say it might have come down before, but I have no account of it until then. It was represented as being good. It was not good.
 2989. What became of the proceeds? I got them. As I told you, I never paid anything to the Labour Board for it. The weight of the wood was given me to charge a certain party for it, and I never got paid for it. There were four trucks of wood sent to a man of the name of Hanley, at Waterfall. I billed him for it and gave an order to get the money. I sent a man for it, and he said he would sue him for it.
 2990. Was that wood you got from the Casual Labour Board? No; I never got it at all. I never ordered it to be sent. I sent the bill in for it. I said, "The charcoal I have in hand will pay for the truck of wood." Twenty bags of charcoal would be £1 10s. Hanley said he would not pay. Hillier told me this. I gave him an order to collect the money. He said, "I have nothing to do with Neale at all. I did not buy the wood from him."
 2991. Can you tell whether, between August, 1887, and the end of December, 1888, you received any charcoal for sale by order of the Board? That was the only lot I ever received.
 2992. What was that? Thirteen hundred weight and a quarter (twenty bags). That is the only lot I ever got, and some of this was broken.
 2993. Did you in every case send the account sales with your cheques? Yes.
 2994. Did you always pay by cheque? Always.
 2995. Do these represent all sales of timber? Yes, of wood.
 2996. Except one you mention about charcoal? That is the only thing.
 2997. Can you recollect any instance in which you saw Mr. Davies personally and handed him a cheque? Well, I saw him on several occasions and handed him a cheque, but what the amount was I cannot say. I think there was a £66 12s. 6d. cheque that I handed to Mr. Davies. It was only then that I knew Mr. Davies was on the Board. The man who cut the wood informed me there was a Mr. Davies there, but I did not know it was John Davies.
 2998. Is there any other information you can give us as to sales effected by you on behalf of the Casual Labour Board? Nothing further.
 2999. Have you anything further on your books? No.
 3000. Has Mr. Davies seen you lately? About a month ago, as near as possible.
 3001. What about? He asked me whether I could give him a memo. of what cheques I paid to the Casual Labour Board. I said, "I can give you a rough one." I did, as far as I could. He said, "That is about the same as I have, but I have a little more." I looked it up and found I had omitted something whilst copying from one book to the other.
 3002. That was this year? A few weeks back.
 3003. *Mr. Franklin.*] I cannot understand how Hanley got this truck of wood? I believe it was sent to him from the Park.
 3004. That would be a loss to you if you were the salesman? If you called Hillier, he would tell you he never got paid for cutting it. I smoothed him down and said, "Think yourself lucky you got paid for what you did."
 3005. You lost your commission on the wood? Yes.
 3006. You were so far interested? Yes. I said I would not pay them for any more until I got the money myself.
 3007. What would be your commission on the sale? Well, it would only be a matter of 5s.; it was cheap wood.
 3008. So that you only lost 5s. by that transaction? Yes.
 3009. Did you lose by other transactions? Yes. The trifle I lost I did not care about. Only Hillier said, "Why don't you bill these people?"
 3010. Did you think, when you impounded 30s., you were justified in doing it for loss of commission? Not for loss of commission, but because I did not get paid for the wood. After this matter of Hanley's I said I would not pay for any more until I got the money. I could not summons the man for it, as I never sold it to him. I sent the bill to him, and I also sent Hillier, who was well known up there, to receive the money.
 3011. Were there any other contractors for cutting wood on the ground besides Hillier? No. He had the only engine. He got nearly 3,000 tons—1,000 at 3s., the remainder at 2s. 6d.
 3012. Is it not a fact that wood was sold in the stack on the ground? I know nothing about anything sold at the park excepting this one truck and another truck that went to Heathcote or Waterfall. The reply I got from Hillier was that Hanley would settle with Burrowes.
 3013. *Mr. Waller.*] Where was that charcoal? It was at Darling Harbour.
 3014. How did you know? I applied to Mr. Davies for some charcoal for Mr. Gillies, a wood and coal merchant. I fancy someone told me they had charcoal.
 3015. About what time? I really could not tell you.

3016. Was there a written answer or application? I fancy it was Mr. Davies I talked to about it. It appears this truck of charcoal had been lying some days at Darling Harbour. It was a bad lot; the water had got into it. Mr.
G. R. C. Neale.
26 Mar., 1889.
3017. That is how you became acquainted with the charcoal being there? Yes.
3018. You are sure you did not get any letter about it? There may have been a letter saying it was there.
3019. You are sure there were twenty bags? Yes.
3020. Suppose you found burst bags? I would not pay for burst bags.
3021. Would not the Railway know how many bags there were broken or unbroken? Yes; sometimes they invoice them "more or less." There were either twenty or twenty-five.
3022. You say Hillier said that certain persons paid Burrowes? I made out the accounts for the wood to Hanley.
3023. You say Hanley refused to recognize you? The answer was he would settle with Burrowes.
3024. Did not you say that in some cases Hillier did not get paid, and that settlement was made with Burrowes? I did not say settlement was made with Burrowes. I did not say any of them paid.

GEO. ROB. C. NEALE,
April 24, 1889.

Charles William Beggs called in, sworn, and examined:—

3370. *President.*] Are you a partner of Mr. G. R. C. Neale, who was examined yesterday before this Commission? Yes. Mr.
C. W. Beggs.
27 Mar., 1889.
3371. Do you produce some cheques, drawn by Mr. Neale, in favour of different persons? Yes.
3372. How many cheques are there? Nine.
3373. What is the first cheque? £26 17s. 7d., in favour of T. S. Hinchcliffe, dated 14th May, 1887.
3374. Can you say what became of that cheque? No.
3375. Looking at the cheque itself, can you give us any information? Only that it has gone through my partner's bank.
3376. Is there anything to show what other bank it has gone through? Yes; the City Bank.
3377. What is the amount of the next cheque? £38 4s. 2d., dated 31st May, 1887, in favour of the Government wood.
3378. What became of that? It appears to have gone through the A.J.S. Bank.
3379. The next? £66 12s. 6d., dated 23rd June, 1887, in favour of the Casual Labour Board.
3380. Has that gone through the A.J.S. Bank? Yes.
3381. The next? £41 12s., dated 7th July, 1887, in favour of the Government Relief Works.
3382. Has that gone through the A.J.S. Bank? Yes.
3383. The next? 19th July, for £5 4s. 6d., in favour of Mr. Burrowes, gone through the A.J.S. Bank.
3384. The next? 4th August, £40 1s. 1d., paid to the Casual Labour Board, through the A.J.S. Bank.
3385. The next? 18th August, £36 3s. 10d., to the Chairman of the Labour Bureau, through the A.J.S. Bank.
3386. The next? 2nd September, 1887, £40 12s. 3d., to the Government Labour Bureau, through the A.J.S. Bank.
3387. The next? 22nd September, 1887, in favour of E. M. Burrowes, £52 3s. 1d., paid into the City Bank.
3388. They all appear to have gone through the Australian Joint Stock Bank except two? Yes.
3389. Can you say whether that mark across the cheque is your stamp or the bank's stamp? I cannot say. That probably is our stamp in a different ink.
3390. All these cheques appear to be crossed cheques? Yes.
3391. *Mr. Waller.*] Do you ever pay cheques that are not crossed? No, not as a rule, unless we miss stamping some of them.

CHAS. W. BEGGS.

William Duchesne called in, sworn, and examined:—

4262. *President.*] You are clerk in the City Bank? City Bank, head office.
4263. Will you look at this cheque for £26 17s. 7d., drawn on the Bank of New South Wales, Haymarket Branch, purporting to be signed by George Robert Neale, in favour of Mr. T. S. Hinchcliffe or bearer, and tell me whether it passed through your Bank? It formed part of £55 7s. 7d. paid in by John Davies to his own account on 16th May, 1887; it was put through in the usual manner, and, of course, he received credit for it. Mr.
W. Duchesne.
28 Mar., 1889.
4264. Will you look at this cheque for £52 3s. 1d., purporting to be signed by George Robt. Neale, drawn on the Bank of New South Wales, Haymarket Branch, dated 22nd September, 1887, in favour of E. M. Burrowes or bearer. Has that cheque passed through your bank? That cheque was handed in by John Davies for credit of his own account on the 26th September, 1887. We put it through in the usual manner and credited him with it.
4265. To the same account as the previous cheque? To the same person's name, but to No. 2 account; the previous one was to John Davies', C.M.G., account.
4266. The cheque, £26 17s. 7d., went to John Davies No. 1 account? To John Davies only. The second account is No. 2, to distinguish between the two accounts.
4267. The second cheque went to John Davies, No. 2? To John Davies No. 2.
4268. Can you tell me how many accounts John Davies has in your bank? At the time of this transaction John Davies had two accounts.
4269. What were they called? John Davies, and John Davies No. 2.
4270. What position do you hold in the bank? Well, general clerk.

4271.

- Mr. W. Duchesne. 28 Mar., 1889. 4271. In the course of business would these cheques come before you? In the course of business they might come before me; but I am able to say what has been done, because I can recognize our marks on the back of the cheques, and the cheques would not be marked unless they had been treated in the usual manner.
4272. Do you know John Davies? Not personally.
4273. By sight? I have seen him, but I do not think I should recognize him again.
4274. Are you in a position to say whether the John Davies with whom your bank does business is the Hon. John Davies, C.M.G., M.L.C., late Chairman of the Casual Labour Board? He is known to us as John Davies, C.M.G., only.
4275. Can you say from your own knowledge of the bank's arrangements what the difference is between these accounts, John Davies and John Davies No. 2? I am not aware that there is any difference, we simply credit either account in accordance with the marks on the slips. The first slip is John Davies, C.M.G., that would be paid to the credit of John Davies, C.M.G., only. The second slip is John Davies, C.M.G., No. 2, and, therefore, we should credit No. 2 account.
4276. Do you produce the deposit slip which includes the sum £26 17s. 7d.? This is the deposit slip [*Deposit slip, marked "G," for identification*].
4277. Do you know who filled that up? John Davies.
4278. Do you know his handwriting? I know from his handwriting, and the fact that it is marked paid in by "self," shows it was paid in by John Davies.
4279. That slip shows that in addition to the cheque there were notes and gold paid in at the same time? £28 in notes and half-a-sovereign.
4280. That amount went to a private account? To a private account, and part of it for a particular purpose.
4281. Can you tell us what that foot-note on the deposit slip means? The total amount paid in was £55 7s. 7d. on the 16th May, 1887. Mr. Davies marked the slip to the effect that £50 was in special reduction of Osborne's bill, and the balance, £5 7s. 7d., to meet an account on the 18th instant. That second part is rather foggy, but we should judge it to be to meet an account on the 18th instant; but we cannot be quite clear about that.
4282. Do you know what that Osborne's bill means? I cannot answer clearly; but I should presume it was a bill drawn by or accepted by John Davies.
4283. Do you know what that C. R. £5 7s. 7d. means? I cannot understand what is the meaning of that; it is not quite clear.
4284. Do you produce a deposit slip, £52 3s. 1d.? I produce that slip. [*Deposit slip marked "G 1" for identification.*]
4285. Is there anything particular about that? Nothing unusual.
4286. Whose handwriting is that in? John Davies'.
4287. You believe it to have been paid in by himself? It is marked to the credit of account No. 2 by himself.
4288. Are you in a position to say what that No. 2 account is? Not at present; but there may be a note in the ledger that it is to operate with any special class of accounts. I am not certain. I can ascertain.
4289. Can you tell me whether John Davies is a regular customer of yours? John Davies has been for some time past, and is at present a customer of ours.
4290. Can you tell me whether his account is in funds or is in debt as a rule? It is an operative account.
4291. Is he overdrawn? Yes, overdrawn.
4292. Has he had an overdraft for any time? I cannot answer for what time without referring to the ledger.
4293. Can you say whether he has more than two accounts at your bank? These are the only two operative accounts I know of.
4294. Is there any dormant account there? There is a dormant account which is largely overdrawn.
4295. In the name of John Davies? In the name of John Davies.
4296. Can you recollect the amount of the overdraft approximately? I do not like to speak definitely, but if I am not mistaken the account is between £7,000 and £8,000 overdrawn.*

W. DUCHESNE.

* NOTE (on revision):—In my answer to Question 4296:—I found on referring to the ledger that the overdraft of from £7,000 to £8,000 was on account of a Mr. Davies, but not the John Davies, C.M.G., about whose account I was being questioned.—W. DUCHESNE.

Ernest Grant Cooper called in, sworn, and examined:—

- Mr. E. G. Cooper. 28 Mar., 1889. 4297. *President.*] What are you? Ledger-keeper in the Australian Joint Stock Bank.
4298. Are you aware that the accounts of the Casual Labour Board between May, 1887 and January, 1889, were kept in your bank? Yes.
4299. Do you produce any deposit slips for any amounts lodged in the bank to the credit of that Board between those dates? Yes, I have several here.
4300. Do you produce six deposit slips for amounts paid in to the credit of the Casual Labour Board? Yes, for £38 4s. 2d., £113 9s., £76 4s. 11d., £40 12s. 3d., £46 5s. 11d., and £20.
4301. Have you brought any books with you? The teller's cash-book.
4302. What does that show? Simply that these deposits have been passed through.
4303. I understand that the book simply goes to prove what became of this money? Yes, that is all—simply records.

E. GRANT COOPER.

TUESDAY,

TUESDAY, 23 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P., | T. F. WALLER, Esq., J.P.

The Hon. John Davies, C.M.G., M.L.C., called in and further examined:—

President.] Have you the summons that was served on you to attend here? I have not. I am here in obedience to the summons.

You were summoned on the 19th of March last? I could not say that I was summoned on the 19th March—not from memory—but I have no doubt the date is correct.

Did you attend them? I did attend.

Were you ready then to be examined? I was.

Did you ask the Secretary to this Commission to be excused attendance on that or a subsequent day? Never.

Are you sure? Never. I do not understand the nature of the question.

Did you ask the Secretary to have your attendance excused on the 19th of March, or on any other date? No; I simply asked the Secretary to avoid summoning me on a Thursday, as it would entail a loss if I did not attend a Board meeting. That was the only exchange of words between the Secretary and myself. It was merely to avoid a loss to myself that I asked him that.

Did the summons ask you to produce any books and papers you had in any way relating to the Casual Labour Board? Yes.

Have you any? I produce printed papers, copies of which have been laid upon the Table of the House. I presume you have got copies of them already, and a few letters marked private and confidential, from the superintendent. I think you have got most of these papers before; they are simply official papers laid upon the Table of the House and ordered to be printed.

Have you any others? Not unless you want private papers.

I ask you to produce all the books and papers you have relating to the Casual Labour Board? These are only private papers.

Do you produce them? I shall produce them if the Commission insists upon them being produced.

Do you produce them? If you want them I will give them to you.

Do you decline to produce them? No; but I have no wish to put them in unless it is necessary.

If the inquiry says it is necessary, I will produce them; I brought them because they might be useful during the inquiry, but if it is necessary I will give them to you now. It is not the first time I have been on a Commission. I have been President myself of two or three Commissions, and I know how they should be conducted. That is a report from Mr. Gordon upon my taking charge of the works; that is a copy of a letter I sent to the Colonial Secretary asking that money be put at the disposal of the Board for the purpose of paying wages; that is a copy of a ticket which I made each ganger produce showing to the gang all the moneys that were received.

Have you any books—order-books or receipts—in your possession? No; I have receipts of money paid into the Treasury.

Do you produce these? Yes. Here is another letter, marked private and confidential; I may as well put that in, too. That is all I have got, sir. There are a large number of receipts besides these I hand you, but I have not got those. These, I think, are some of them that were paid just as I was leaving office.

Have you any other books, papers, receipts, butts, cheque-books, or documents of any kind in your possession, here or in your house, or anywhere else, beyond those that you have produced to me to-day? No; nothing more than I produce here.

When the Casual Labour Board came into existence, what was the arrangement that was made for having the necessary funds supplied? An arrangement was made that advances of £6,000 should be placed to the credit of the Board from time to time, as required. The three members of the Board signed a formal application for the advance. If you have the papers here you will see the form of applying for the advance signed by three members of the Board, to be adjusted for in conformity with the Audit Act.

Were there any written instructions given you? No; I received no instructions whatever except what are contained in the formal appointments in the printed papers. That was the only instructions that we had of any character.

Is that the document of the 2nd May, 1887, addressed to you, Mr. Wells, and Mr. Houison? Yes, quite so.

You had no other written instructions? No.

From whom did you learn the arrangement as to the £6,000 advances—was that a verbal arrangement? Well, I think the Paymaster had more to do with getting the advances than anyone else. He had had experience in connection with the unemployed before they were transferred from the Immigration Department to the Casual Labour Board. I think he proceeded simply on the lines that were in operation before.

How did you become aware of the bank that you had to deal with? By the Treasury. The Treasurer intimated that money would be placed to the credit of the Casual Labour Board in the Australian Joint Stock Bank.

Did he intimate that to you in writing? No.

Verbally? Verbally.

Did you see the bankers and ask what arrangement you had to make to draw the money? Yes.

Whom did you see? I saw Mr. Webster, the clerk in the Australian Joint Stock Bank.

What was the arrangement? That cheques should be made out under the signature of the Chairman, countersigned by the Secretary, and in the absence of the Chairman, by any of the other members of the Board.

Was there any arrangement made by which you were to have an overdraft? Well, that was an arrangement made, not by us, but by the Treasury officials. I may tell you that most of the operations of the Board were carried on by overdraft. We simply had letters of credit.

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

How were the moneys made available to the Board from time to time? By our continual application. As one advance became exhausted—and sometimes before it was exhausted,—in order to make provision for the pay of the following week, we would apply for an additional £6,000.

Looking at these pass-books, I see the following sums credited:—7th June, 1887, £38 4s. 2d.?
Yes, that is correct.

19th July, 1887, £113 9s.? Yes.

22nd August, 1887, £76 4s. 11d.? Yes.

16th September, 1887, £40 12s. 3d.? Yes.

21st June, 1888, £46 5s. 11d.? Yes.

24th September, 1888, £20? Yes.

Do you know what these payments total up? No; I have not made them up, sir.

Will you add them up and give me the amount? Well, perhaps you will ask your Secretary to make them up. I am not here to give you an account—to make-up accounts. I will give you evidence—that is what I came here for, but I am not here to make-up accounts. No doubt the Secretary can give it to you in a minute.

What are these sums paid in for? For various purposes—principally, I think, for the sale of firewood. £20 was received, I think, from the Roads Department on account of Roberts' Bridge, Beecroft; £42 on account of sleepers from the Roads Department—sleepers that cost the Casual Labour Board £150. They were sent down on the estimate made by the superintendent that they could be delivered at Sydney Station at 22s. 6d. per hundred; the Board offered to do them at that price, relying upon the accuracy of the superintendent's estimate; we found that the weight of them alone was something like 4½ tons per hundred, and the consequence was that a loss was made of over £100 on the transaction. The total sum received was £42 odd, and the total cost was £150.

You spoke of some sales of firewood;—who sold the firewood? Mr. Neale.

Any one else? Not that I know of; not to my knowledge. A portion of the receipts I have given you to-day is for the proceeds of the sale of firewood.

Where did you get the proceeds from? From Mr. Neale.

Anybody else? Yes; £4 from Mr. Hanley.

Have you the accounts of these sales? No; they were left in the office when the new Board was appointed.

Did you leave them all in the office? Yes.

Were they in the office when you gave up charge? Yes.

Are you sure? I could not swear to it, but I saw them there a short time before I left possession.

Mr. Neale's accounts and Mr. Burrowes's letters;—amongst what papers were they put? On a file.

Where were they kept? In the office.

In what part of the office? Towards Mr. Larnach's desk, on a file on the table.

Who had charge of them? No one had charge of them. They were there in the office like all the other papers.

Were they ever put in a drawer? Never.

Had you not particular charge of them? No more than I had charge of all the other papers.

If other witnesses have sworn that you had them in a drawer, is their evidence true or false? False; absolutely false.

That is your evidence? I say, without any hesitation, absolutely false.

Then all those account sales should be amongst the papers that have been handed over to us? They should be.

Are these moneys, which you have paid into the Australian Joint Stock Bank, all the moneys you received on account of the Casual Labour Board for sales of firewood, charcoal, sleepers, or any other produce or property belonging to the Board or the Government? I have received no money for the sale of charcoal. There is an outstanding account due by Mr. Wearne. What I paid into the Treasury, and paid into the bank, is the total amount I have received on account of the Government.

Are the moneys that you paid into the Australian Joint Stock Bank, and the moneys that you paid into the Treasury, the total moneys that you received on account of the Casual Labour Board for sales of firewood, charcoal, sleepers, or any other produce or property belonging to the Board or the Government? Yes.

Absolutely? Yes.

You swear that? Of course, I have sworn it. Of course, if there was any little outstanding account that I have no knowledge of I am prepared to make an adjustment at any time. As head of the department I am prepared to do so. You must understand that I am placed at a great disadvantage; the whole of the books and papers were taken out of my custody without my having five minutes' notice.

Who were the persons entrusted with the sales of produce or property belonging to the Casual Labour Board? I told you Mr. Neale was the only one who had the sales of firewood. The sleepers were paid for by the Roads Department.

Was there any other property of the Casual Labour Board sold? There were some surplus stores taken over by me without any inventory—stores which I found were gradually becoming less—very much less, I may tell you. I took the opinion of the storekeeper of them, and I made the purchase and paid for them. I paid 2d. per lb. for some ration sugar, and 10s. for some broken crockery, so broken that it was scarcely worth anything; I am sure nobody would have given the same price for it; it was put in a little kerosene case.

Were Mr. Neale and the Roads Department the only persons from whom you received money? Yes, except Mr. Hanley.

Was there anybody else? I do not remember anybody else. Oh! there was a duplicate roller that we lent to the Kogarah Council. I lent it to them on the understanding that they were to return it in the same condition that they received it; they did not do so. I think the duplicate cost £24, and the money was paid into the Treasury. Then there were moneys for unclaimed wages. The moneys I held in hand for unclaimed wages I held with the full knowledge of the Audit Department. I held them in trust.

How

How was the sale of property in the shape of timber, sleepers, and firewood originated—who originated the sales? It was done before my time—at least the firewood business. It was started by Mr. Deering. I was simply carrying out what had been previously in existence. The matter of the sleepers was done on the application of Mr. Bennett. He asked whether we could not supply a number of sleepers for the Centennial Park, to enable him to carry out the necessary arrangements in connection with the formation of the roads there. We submitted the matter to the superintendent, and he said we could supply the sleepers at 22s. 6d. per hundred, but they cost us more like £2 2s. 6d. The weight alone per hundred was over 4 tons, and you can easily form an opinion that the timber would be worth a great deal more money.

What do you say was the cost in proportion to the result of the proceeds? I think we lost over £100 by that transaction. The cost was three times what it was put down at. Then there was a terrible loss over firewood. I may tell you that Mr. Deering made a contract with a man named Hillier for cutting 1,000 tons of firewood. It only realized 4s. 9d. per ton, and there was a loss of 4s. or 5s. a ton on the whole of it.

What practice did you adopt in the office to check the quantities of firewood—did you obtain the railway delivery-notes and the returns from the cutters? The only practice we could adopt was the practice that Mr. Burrowes had followed previously. He would see the trucks, get the weights, and send the weights to us. The auctioneer would send his weigh-bills, showing how much per ton and the prices. On this we paid the man Hillier according to as many tons we got.

How were you made aware that firewood, sleepers, and so forth, were available for sale? We were not made aware of the fact until after the sale.

Did you keep any record of this part of the work? No; of course our business was the disbursement of moneys. All our trouble arose with our taking over matters that had been initiated before our time—before our creation. If we had created the matter, we would have had proper supervision over everything. It was only regarded as a temporary affair.

Were you or the Board authorized to effect sales of property such as this and pass the proceeds to the credit of the Board at the Australian Joint Stock Bank? No; we had no special authority for it.

Did you know that it was irregular? I was told afterwards that it was irregular.

In what position was Mr. Hinchcliffe in the office? He was Paymaster and Accountant—he went to the pays and paid the men.

Was he accountant also? He was.

Are you sure? I am.

Did you hold him responsible for the accountant's work? I did.

Was he the responsible accountant in the department? Yes, he was.

If he has stated before us that he was not an accountant, what do you say to that? All I say is that the Government made a great mistake in appointing a man who was not an accountant. He was appointed there, so far as I understand, to look after the accounts and books. That was his particular work. I do not profess to have any knowledge of accounts myself—that is, any professional knowledge—neither I nor any other members of the Board.

Do you recollect his remonstrating with you in connection with these payments into the Australian Joint Stock Bank? I don't remember his remonstrating with me. He told me after some of the payments had been made that it was irregular. It was some time after. The money should, he said, be paid into the Treasury.

Did he ask to be relieved of any responsibility in the matter of these payments? He might have done so. I could not positively say that he did.

What position did Mr. Hibble occupy in the office? He was assistant clerk in the office.

Do you recollect him making any remark about it? No; it would not have been his place to make any remark about it.

Was he in too subordinate a position? Yes. I think, now you mention Mr. Hinchcliffe, I went to see the Under Secretary for Finance about it, and he said it was an irregularity, and he said it would be quite sufficient to pay the money into the Treasury when we settled up.

Did Mr. Hinchcliffe call your attention to it on the occasion of your first payment? I do not think so. He called attention to it afterwards by pointing out the irregularity.

When did he call your attention to it? I am not aware when he did so, but as soon as he pointed it out I saw the Under Secretary for Finance, and he said it was an irregularity, but it would be easily remedied when we paid the money to the credit of the Board into the Treasury.

Did Mr. Hinchcliffe ask to be exonerated from any responsibility in the matter? He may have done so, but I have no recollection at the present time that he did.

Do you know whether Mr. Wells or Mr. Houison received any moneys for the sales of firewood? No; I am not aware. I do not think they have. I think I am the only person who ever received money in the matter of sales.

Did you receive, between the 2nd May, 1887, and the 23rd January, 1889, from any person or firm any other moneys the proceeds from the sales of firewood, sleepers, charcoal, or any other produce, the property of the Government or the Casual Labour Board, that you have not paid into the Australian Joint Stock Bank or the Treasury? No, sir.

Have you seen any of the evidence that has been taken before this Commission? No, sir.

Have you spoken to any of the witnesses that have been examined? I spoke to Sir John Robertson.

Have you spoken to Mr. Wells? I spoke to him casually upstairs in this building about a fortnight or three weeks' ago.

Have you spoken to Mr. Neale? No.

Have you spoken to Mr. Miles? No; I have not seen him since I left the Casual Labour Board office.

Have you spoken to a man named Charles Robertson? I have never seen him.

Have you spoken to Mr. Lawn? No; I have not been in their shop since this inquiry began.

Have you spoken to Mr. Woods? No.

Have you spoken to Mr. Franklin? Do you mean Mr. Franklin here?

Yes? I have only bowed to him.

Have

Hen.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

Have you spoken to Mr. Taylor, the shorthand-writer here? Only to say, "How do you do?"—nothing further; I don't suppose there is any crime in that. I may say that Mr. Burrowes has circulated a report that he knows all the evidence that has been taken here, and states in a bold manner that he knows everything that happens on the Commission.

I will read you a portion of Mr. Hinchcliffe's evidence, being questions numbered 1047 to 1053, in reference to the firewood account sales. What do you say to that evidence? It is absolutely wrong with reference to my keeping them in the drawers.

Is it false? I would not say that; he may have been under a misapprehension.

Is it true about his remonstrating with you when you paid the first cheque into the Australian Joint Stock Bank? I have no recollection of anything of the kind. It was on a subsequent occasion that he said it was improper or irregular, and I saw the Under Secretary for Finance and Trade, Mr. Eagar. He said, "All right, you can pay it in when you are winding up the affairs of the office."

I see according to a receipt that you have just handed to me that you paid into the Treasury on the 29th March, 1889, the sum of £33 3s. 2d.? Yes; there was some difficulty in finding from the books and papers how these payments actually stood. I found I had paid that into my own bank in order to have the proceeds to pay into the Treasury. Of course I was placed at very great disadvantage. I had to fossick out information as best I could.

How did you find out that this sum had not been repaid by you? I got Mr. Neale's memorandum of the amounts. These were the amounts that I had from the office. I found that there was a sum owing, and that I should adjust it.

Where in those two papers that you have just handed in did you get the sum of £33 3s. 2d.? I got it from the totals. This is in such a muddled form I cannot make head or tail of it.

When did you get this memorandum of payments from Mr. Neale? I think it was in the beginning of this year.

What is the total amount shown on Mr. Neale's memo.? £320 13s. 6d. [*Document put in and marked P.*]

What paper is this other? That is a copy of the items out of the cash-book. [*Document put in and marked P1.*]

And this shows the total £334 16s. 3d.? Yes.

Yet you refused to give me the total of these very items just now? You asked me to make the total up for you.

Is this correct? I should think so.

Is not this document [*Exhibit P1*] copied out of the Casual Labour Board cash-book? I believe it is furnished to me as such.

By whom was this copy furnished from the office? I received it from Mr. Hibble when I was Chairman of the Casual Labor-Board.

Have you any reason to doubt its correctness? I suppose it is correct.

Were you Chairman of the Casual Labour Board at the time it was made out? Of course.

Up to what date were you Chairman? Up to the 25th January last.

And the officer who made it out was under you? He was.

Do you doubt its correctness? I don't at all doubt its correctness; I believe it is correct.

Where do you get this amount of £33 3s. 2d.? It is included in those two statements.

Can you point it out to me? It is the difference between the two.

How was it paid? By cheque. There were two cheques that I paid in and got cash for. The one was for £33 3s. 2d., and the other was for £52 something.

But do these two documents [*Exhibits P and P1*] which I have before me, one an account from Mr. Neale and the other a memo. from Mr. Hibble, do they explain in any way the £33 3s. 2d.? I think so.

Can you show me how? I have not gone into them.

Do you say that the £33 3s. 2d. is the difference between the two? Yes.

May I take it that that is your evidence. Look at the documents, sir? I don't know what you want, Mr. Chairman, from me.

I want to know, Mr. Davies, how that £33 3s. 2d. is made up from these documents? It is made up by the proceeds of a cheque that I received for the sale of firewood, paid in to my own credit.

Has it anything to do with these accounts? No; it is out of these accounts altogether. Mr. Neale will give you particulars.

I want your evidence; I don't want it from Mr. Neale. I ask you will you produce the account sales for this? I have not got them; I have not got the papers.

Did you receive the amount from Mr. Neale? Yes; it was an unpaid amount.

Have you any doubt about it? No doubt whatever. On finding that the amount was unpaid I paid it into the Treasury.

I ask you again have you any doubt about it? No doubt whatever.

What date was it you received this amount from Mr. Neale? I believe it was in July, 1887—I think that was the date.

Then what became of the money between July, 1887, and March, 1889? In my possession.

Where? In my possession.

Where in your possession—I ask you where? Some of it was in cash.

In the office or where? You are not aware, perhaps, that I was spending £20 a week out of my own pocket.

Where was this money between July, 1887, and March, 1889—this £33 3s. 2d.? It was in my possession.

As cash? Certainly, as cash; and I paid it in as cash to the Treasury.

Did Mr. Neale pay you this in cash? No; he paid it in a crossed cheque—£33 3s. 2d.

Are you sure of that? Well, as far as I can remember.

Did you ever pay that cheque into your bank? I paid it into the bank, and got the proceeds of it as far as I can remember.

Are you sure you paid it in? I am sure I paid it into the bank and got the proceeds.

When was that? I believe it was in July, 1887.

Then

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

Then close upon two years you have been holding that money in your private bank account;—is that your evidence? No.

In whose account was it? In my possession.

All the time? Was I not perfectly justified in utilising it in the office—for the purposes of the office? I had to spend sometimes as much as £20 in a week.

Did you hold it in your possession all that time? I do not think it was any crime for me to hold it.

Will you look at this paper—this Treasury receipt voucher [*Exhibit O*]? Yes.

Read it? Chairman, Casual Labour Board, Sydney: Sale of firewood, National Park, £33 3s. 2d.

Is that signed by you? Yes.

Whom did you give that document to? Do you mean to pay it into the Treasury?

Yes? I gave it to my son.

What did your son do with it;—do you know? Paid it into the Treasury.

Cash? Of course; they would not take any cheques there.

Not even your cheque? No, nor anybody else's.

Where did you cash that cheque for £33 3s. 2d.? At the bank.

Did you get the cash for it? Yes.

And have you been holding that cash since July, 1887? I told you I have had it in my possession.

Let me ask you seriously whether you have from July, 1887, until March, 1889, been holding that cash, £33 3s. 2d., in your possession? I have already told you I have, and explained the reason.

Do you swear that you got that money from Mr. Neale? Most certainly I could.

Are those particulars correct in that document [*Treasury Receipt Voucher, Exhibit O*] which was handed to me by Mr. Newcombe? I believe so.

Who can vouch for the correctness of this [*Exhibit O*] if you cannot? I believe it is quite correct.

That payment, according to this document, was made on the 29th March last? Yes; that is the last payment I made.

On the 26th March last Mr. Neale was examined before this Commission; did you see Mr. Neale on the 26th, 27th, 28th, or 29th March? I do not think so.

You were very frequently at this office, upstairs? Yes.

Have you seen Mr. Neale while you have been here on any occasion? I have not seen him to speak to.

Will you tell me how it was that you waited until the 29th March, 1889, to pay this £33 3s. 2d. into the Treasury? Because I was a little confused as to whether I had paid it in with the money I paid into the bank. I subsequently found that I had not paid it in.

When did you find that you had been holding this money in your own private account for your own private purposes? I was not holding it in my own private account for my own purposes. I held it with other moneys, amounting to £86 in all, unpaid balances of wages.

Did you hold all that in cash? Yes.

In your pocket? I held it in the safe in the office in cash—about £100 altogether.

What did you do with it? I passed the cheque into the bank.

Why do you fence with me in this manner? There is no fencing.

Why, sir, don't you explain this matter clearly, if you can? I told you already I paid it into my credit with £52 odd.

Into what bank? In my own bank, in order that I might pay it into the Treasury.

Did you cash the cheque in your bank for £33 3s. 2d. to pay into the Treasury? Yes.

When? In July, 1887.

In July, 1887, you cashed that cheque—that is what you tell us,—and you have held the cash in your possession ever since? I did, and I see nothing wrong in doing so.

When you went out of office what moneys did you take with you? I took £85 odd out of my safe.

What did that represent? It represented trust moneys that I held by me—unclaimed wages—that I held with the full knowledge of the Auditor-General and the gentlemen in the Audit Office.

Why did you not adjust these sums before? I had never been asked to make this adjustment; but I have made the adjustment now.

Can you give me accurately the amount that you took out of the Casual Labour Board Office when your Board ceased to exist? The total amount.

Yes? About £115 or £116.

Can you tell me what you have done with it? I paid £86 on account of unpaid wages.

Are you sure that you took the amount you have stated? It must have been more, I think—about £170.

Have you got the exact figures? No.

Have you any figures? No. I took what few papers I could away at the time, but I had no time to do anything more.

How long were you in the office after Mr. Miles and Mr. Mason took charge? They took charge on the 25th of January, and I was not there afterwards.

Were you not in the office for three or four days after they took charge? No.

Were you not in the office some days afterwards? I was in the office downstairs, but I never was upstairs after I was informed of their appointment.

Did you not remain there until the next pay-day? The letter I put in will show that I offered to pay the money, but the Colonial Secretary did not think that it was prudent that this course should be taken, and asked that the gentlemen themselves should make the pay; and we were relieved of any further responsibility.

Were you not in the office three days after Mr. Mason and Mr. Miles took charge? No.

Were you in the office two days? No.

Were you in the precincts of the office? I was downstairs occasionally.

Did you not decline to give up the office before some official communication was made to you? No. I handed everything over to the gentlemen who came. I thought we had no right to be uncourteous towards the gentlemen who came, although I had great reason to complain of the action of the Colonial Secretary.

Here

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

Here is a receipt that you have handed to us dated 15th February, 1889, purporting to be a receipt for £52 3s. 2d., and 10s.—in all £52 13s. 2d., received from you, and paid into the Treasury—what is that for? The sale of firewood and some damaged crockery. [*Receipt put in and marked P 3.*]

Is this the receipt voucher I show you which was put in by you alongside the payment. Is this document [*Exhibit O 1*] a receipt voucher put in by you at the same time as that payment? Yes.

Who made that payment? I made it.

In person? Yes.

Is your signature at the bottom of the paper? Yes.

Will you tell us what the £52 13s. 2d. represents? The sale of firewood at the National Park and proceeds of some damaged crockery.

When was the sale of that firewood effected at the Park? In the latter part of 1887.

What is the date you received the cheque for it from Mr. Neale? 26th September, 1887.

What became of that money between September 26th, 1887, and the 15th February, 1889? In my possession. I cashed the cheque, as I did the former cheque, and intended to pay the proceeds into the Treasury. It was in my possession all the time.

In cash? Yes. I may tell you that some of it was spent in expenses. You must remember that I had not one single shilling for my attendance or expenses up to the end of the year.

Can you tell me how you came to hold these proceeds of sale of firewood money, £52 3s. 2d., in your possession from 26th September, 1887, to 15th February, 1889, and the other sum, £33 3s. 2d., from July, 1887, to March 29, 1889, and yet paid the other moneys into the Australian Joint Stock Bank? Yes; because I held other trust moneys, as I have already explained—as much as £100 unclaimed wages. I held this money in order that when we wound up the affairs of the Casual Labour Board it might be adjusted and paid in due form to the Treasury.

Why then did you not hold the other moneys that you paid into the Australian Joint Stock Bank in the same way? Simply because I had paid them in error. I had already done that.

Oh, you recognized the error as regards other receipts from Neale, but not the payments made by Neale in July and September, 1887? That is the only explanation I can give you just now. I think Mr. Hinchcliffe had spoken to me about it. But I should have felt perfectly justified in holding this money and using it for my travelling expenses. I should have no scruple whatever about it. It was not to be supposed that I was to use my own money. Some £400 or £500 might be spent in various directions without being paid or receiving any fees. I should have had no hesitation whatever in using it.

How comes it that the payment of £33 3s. 2d., made to you in July, 1887, is retained by you and not paid into the Australian Joint Stock Bank, when other payments in May, June, July, August, and September, from the same source, are paid in by you to the Australian Joint Stock Bank? These were trade cheques, and it was my duty to see that they were negotiable.

Were not the other cheques in exactly the same category?—

Did you pay the money into the Treasury upon receiving it? No.

What is your explanation for not doing so? Simply because I kept it in hand for final adjustment when we wound up our affairs.

In reference to this Treasury receipt voucher signed by you [*Exhibit O 1*], what is this damaged crockery sold? That is some damaged crockery in a case that I got. I took it over after the Casual Labour Board was formed. It was gradually getting all smashed when we were moving the camp from the Park. I asked the storekeeper, and he said it was worth nothing. I said I did not mind giving him 10s. for it.

Who was the storekeeper? Mr. Johnson and Mr. Springall.

Do you think that was a correct thing to do as head of a department? The crockery was not worth 2s.

Do you think it was right that you should do that with property belonging to the Casual Labour Board? I do not think it was a wrong thing to do.

Do you think it was the proper thing to do? I do. It was not worth 2d. If you think it is of any value I can send it to you now.

I simply asked you if it was the proper thing to do? Perhaps if I had thought of it I might not have had anything to do with it; but it was not done with any motive of that kind.

I see on the 15th February last, after your Casual Labour Board had ceased to exist, there is a sum of £8 13s. 9d. paid into the Treasury;—do you know how long that was in your hands? Some of it only a few days, some of it months. There were some little sums—the duplicate roller from Kogarah Council.

There is a payment to the Treasury on the 25th February, 1889, £86 11s. 7d. unclaimed wages;—did you have that in your possession for a considerable time? Yes; off and on, small sums of unclaimed wages.

Did you ever pay that into the bank? No; I did not think it was necessary to do so. It was not like as if I were an unsubstantial person who had not £100.

There is a payment on the 25th February, 1889, into the Treasury of £8 10s.? That is for some sugar that I have already explained to you—17 bags of sugar I took over.

Is that the item referred to in this receipt voucher [*Exhibit O 2*]? Yes; there was originally 21 bags, but I was told by the storekeeper that Mr. Burrowes had helped himself. I had it brought to Sydney. But this did not belong to the Casual Labour Board, it was before our existence, and I presume that this inquiry has relation only to the period during which the Casual Labour Board was in existence.

You took it over? I bought it at 2d. per lb. I asked the storekeeper in the Park what the value of it was.

When did you buy it? I bought it about six months ago or so.

Are these the particulars—17 bags of sugar sold at Carlingford? It was not sold at Carlingford; it was sold last November, about six months ago, and when we were removing our stores from the National Park to Hurstville this sugar was taken over to Carlingford.

Was it ever at Hurstville? No; never.

Do you say that you bought this sugar six months ago, and paid it in on the 25th February last? Yes. [*Receipt put in and marked P 4.*]

Do you believe that you have accounted for everything else that you have received? I honestly believe I have accounted for everything.

Have you any property belonging to the Board or the Government now in your possession? Not a shilling.

Hon.
John Davies,
C.M.G.,
M.L.C.
23 April, 1889.

I don't mean money property only, I mean chattels? Not a pennyworth.

Have you any chattel property, any cash, or anything belonging to the Government or the Casual Labour Board? You don't think I am a thief, Mr. Chairman? That is a sort of insinuation against me that I don't know that I ought to submit to. The idea that I would take the Government property away! No; it has been all on one side so far that the Government are concerned.

When did it first dawn upon you that these payments of £33 3s. 2d. and £52 3s. 2d. had not been accounted for? When I was leaving office I set myself to work to see what sums had not been adjusted.

When did you leave office? On the 25th January—that I think was the last day—the day before the public holiday—Anniversary Day. It was my clear duty to make the adjustment as head of the department, so I did that; I think I have done so in every case.

Do you recollect a man named Larnach paying you a sum of money? What sum of money?

I ask you the question? No, sir; he never paid me any money.

Did Larnach ever pay you £6 10s.? No; he never paid me any money in his life.

Does he owe you any money? Yes.

How much? He owes me £1; just now it was £1 12s. 6d.

Was he a good clerk? No; he was a bad man—both a drunkard and a very unreliable man.

Did you make him a present at the end of last year? Yes.

What was it? 10s. 6d. to buy a hat. I did that to the other supernumeraries in the office as well.

How long had he been there? A little over twelve months.

Was not that rather inconsistent—giving a gratuity to a man who was a drunkard and an unreliable man? I have no doubt, but you might have made the same mistake that I have made.

When did you first find out that Mr. Larnach was both a drunkard and an unreliable man? It was towards the latter part of last year.

Before you gave him the hat? I gave him the hat in December. I did that to a large number of persons in the office. I do not think that was any great crime.

Mr. Larnach has sworn that, on the 15th December, 1887, he gave you £6 10s., proceeds of the sales of firewood;—he swore that he gave it to you in the presence of witnesses—is that true or false? False, absolutely false.

Mr. Larnach speaks somewhere else in his evidence about a sum of £2 surplus from the pay-sheet. Did he give you that? Not to me. He gave it to the Paymaster, Mr. Hinchcliffe, who gave him a receipt for the £2.

Do you know what became of that? It was paid into the Treasury.

Who paid it in? It was paid in by Mr. Hinchcliffe himself. That is before the Casual Labour Board was dissolved.

And you know that was paid in? I have been informed by Mr. Hinchcliffe that it was.

Mr. Larnach's evidence on that is in his answer to my question:—"How did you do in the case of absentees? Of course, if there was no payment made, there was no signature. On one occasion I had to go to Hornsby, and I had to take gold to pay the men with. There were two sovereigns found on the table, which I brought back and handed to Mr. Hinchcliffe. I could not tell how they got there, and I told Mr. Hinchcliffe to put them in the Paymaster's surplus cash. That was on 22nd December."—Is that a fact? I know that he handed the two sovereigns over to Mr. Hinchcliffe, and Mr. Hinchcliffe gave him a receipt. Mr. Hinchcliffe subsequently told me that he had paid it into the Treasury.

Did you see Larnach make the payment? I saw the payment made of £2 to the Paymaster on the pay-table.

But you deny any knowledge of the £6 10s. Larnach says he paid you? I never saw it. Mr. Larnach was not the man—if he handed money to anyone, he would take the receipt for it.

I see in the statement of the amounts paid into the Treasury between May, 1887, and April, 1889, several payments in your name in the year 1887, and in the year 1888, and several payments in the name of the officers of the Casual Labour Board? The only payments I have made direct have been in February, winding up the affairs of the Board.

What I, and I am sure my colleagues as well, want to get at is this: How, in some cases, you paid the money you received into the Treasury, which it appears was the proper place; in other cases into your own bank; and in other cases, you paid it into the Australian Joint Stock Bank? I have already explained that I made a mistake; but I do not know that it was a very great mistake after all. You were asking me about the payments made into the Treasury of the trust moneys. You will find the vouchers in the Auditor-General's department, giving the whole particulars, from a penny up to 25s., making £86 altogether. That is the only payment I have made direct into the Treasury as regards unclaimed wages. Other sums have been paid in from time to time by the Paymaster.

In February, 1889, you appear to have paid in £334 16s. 3d.? No, I did not pay it in. That wants a little explanation. I left this voucher filled up in that form for my successors, so that they would have no difficulty in transferring from the Australian Joint Stock Bank the amount of money there to the credit of the Casual Labour Board and paying it into the Treasury.

Can you tell me what that £4 item is? That I believe to be from Mr. Hanley, for wood sold by Mr. Burrowes. Mr. Burrowes sold this £4 worth of wood to Mr. Hanley, and he brought the amount to the office, and the cheque was paid into the Australian Joint Stock Bank.

Have you ever received any money from Mr. Wearne? Not a shilling.

Does he owe the Government any money? I think he owes about £10; but the bill will show.

Have you ever asked him for it? I have instructed that application should be made to him for it, but he has treated the applications with indifference.

To whom did Mr. Neale pay the money, the proceeds of all sales? Usually to me.

Are there any returns of the wood cut that you got from the cutters, and of the charcoal and the sleepers? Yes. The papers will show, and the books will show the amounts. You will find them in the press copy-books.

Do you know of anybody who has any interest in these sales of sleepers and firewood who would be likely to take away the papers? No. The papers ought to be all there.

When did you see them last before you left the Casual Labour Board office? In the latter part of December.

All

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

All of them? Most of them. I could not say all of them, because I did not go through them all. How was it that you went to Mr. Neal for particulars of these sales? Because I was out of the office altogether, and I felt it was my clear duty to have these matters adjusted, and I felt that I was at full liberty to get them adjusted up to the 31st March, in accordance with the letter of the Colonial Secretary.

Where did you get information about these payments of £33 3s. 2d., and £52 3s. 2d.? From Mr. Neale.

And after you got the information from Mr. Neale, you paid them into the Treasury? Yes.

Did you ever receive £52 3s. 2d. from Mr. Neale? Yes.

Are you quite sure? I am quite sure.

How did you receive it? By cheque.

When? As far as I know, it is eighteen months ago.

Can you tell me what you did with the cheque? Paid it into the bank and cashed it.

How long after you paid it in did you cash it? I suppose it would be cashed the next day after it was paid in.

Are you aware of any accounts outstanding between the cutters of the wood and the Casual Labour Board that have not been adjusted? No; they have all been adjusted.

What precautions did you take against the sale of the wood by the officials at the Park? I could not take any precautions beyond trusting to the superintendent.

Where did the wood come from principally? All round the National Park.

Any from Hornsby? No.

Liverpool? No.

Narrabeen? No; there is no getting it there.

Referring again to the item £33 3s. 2d., have you any memorandum or account sales, or any other documents to fortify that? I have no memorandum of account sales or anything else. The documents were left in the office.

Does that represent proceeds of the sale of firewood that you received from Mr. Neale? Yes.

In the presence of last witness, George Robert Cartwright Neale called in and examined (*his evidence being interposed by the President*):—

Mr. G. R. C.
Neale.

23 April, 1889.

President.] What are these books that you produce? These are the account salebooks.

What dates do they cover—from when to when? From 10th July, 1886, up to 12th May, 1888.

Have you not got here any book after that? Nothing showing dealings with the Casual Labour Board.

Had you any transactions with the Casual Labour Board after May, 1888? I think not. These are the only two books that we have relating to them.

What are the papers in the bag you have there? I have got some books.

Books relating to this matter? Yes.

Will you allow me to see them? Yes.

Are those books the rough books from which these entries are posted? Yes.

Do you produce two account salebooks, two small ledgers, and two cash-books? Yes.

Do these books contain the history of all the transactions that you have had between January, 1887, and May, 1888, with the Casual Labour Board? Yes; so far as I am aware they are there. If there is anything else I know nothing of it.

Now answer this question categorically—give me an answer to the question and go no further; will you look through these books from January, 1887, until the end of the records in the books, and tell me if there is any payment made to the Casual Labour Board, or any member or officer of it, amounting to £33 3s. 2d.? I think that is a matter I turned up the other day. In my book, ledger lettered A, I find that there has been an account or cheque paid of £33 3s. 2d. drawn on the 19th July, in the year 1887.

Have you got the butt of the cheque-book? No; I have not got it here. I was not aware of this until the other day, when, looking at some old accounts, I found this entry.

Have you anything to show how you paid that money? Well, I paid it by cheque. It was paid, £33 3s. 2d., on the 19th July, 1887, by cheque.

To whom? Well, it was made payable to Mr. Burrowes.

Do you know whom the cheque would be handed to? It would be taken on to the Casual Labour Board, in Pitt-street.

Does that book that you are looking at now show you the date and the name of the payee? It does.

Who drew it out? Well, it was drawn out by my office-boy.

Do these entries on page 405 of your ledger, under the heading of Government Relief Works, appear in these account sale books? I think so.

When was this entry made in this book? At the time it was made out, I suppose.

You notice it is in different ink? Yes; the one entry was made out by myself, and the other was copied in by the boy.

Do you recollect when you gave Mr. Davies these particulars? No; I do not.

This year or last? I do not think I gave him any account at all.

When did you give him the amount of it? Well, I could not tell you that.

GEO. ROBT. C. NEALE,
April 29, 1889.

The Hon. John Davies, C.M.G., M.L.C., resumed his evidence:—

Hon.
John Davies,
C.M.G.,
M.L.C.

23 April, 1889.

President.] You have heard Mr. Neale's evidence as to that £33 3s. 2d. Do you still adhere to your evidence then that you have no other moneys not accounted for? To the best of my knowledge I believe there are none.

Have you any doubt upon the matter? I have no doubt myself.

* * * * *

WEDNESDAY,

WEDNESDAY, 24 APRIL, 1889.

Present:—

A. J. CAPE, Esq., M.A., PRESIDENT.

F. A. FRANKLIN, Esq., C.E., J.P.,

T. F. WALLER, Esq., J.P.

George Robert Cartwright Neale called in and further examined:—

President.] Will you look through your books and give us a statement of the amounts paid by you to the Casual Labour Board or officers between the 1st January, 1887, and the end of 1888? Well, Mr. Cape, I have been brought here several times to the sittings of this Commission, and I should like to know who is going to pay me for all this lost time.

Mr.
G. R. Neale.
24 April, 1889.

If you will send an application to the Commission it will be considered. You must recollect that there are a large number of persons in exactly the same position as yourself? Perhaps they are in the Government service.

Some of them may be, but look how many hundreds are subpoenaed to the Courts who are in the same position as you. However, submit your application; I do not say that it will be successful, but my colleagues and myself will give it our consideration. It will shorten your time and our time immensely if you will just go through your books and give me out of them what I ask? The first payment was 14th May, 1887, for the sale of firewood, £26 17s. 7d.; the next, 31st May, 1887, sale of wood, £38 4s. 2d.; the next, 23rd June, 1887, sale of wood, £66 12s. 6d.; July 7th, 1887, sale of wood, £41 12s.; July 19th, 1887, sale of wood, £5 4s. 6d.; July 19th, 1887, sale of wood, £33 3s. 2d.; August 4th, 1887, sale of wood, £40 1s. 1d.; August 19th, 1887, sale of wood, £36 3s. 10d.; September 1st, 1887, sale of wood, £40 12s. 3d.; September 23rd, 1887, sale of wood, £52 3s. 2d.

Now, how is it that the first item, £26 17s. 7d., is not in your ledger books? For the simple reason that we never ledger any country people's stuff; we send the cheques every day, and the amounts would be in the account sales books. It is only in cases when we get weekly or fortnightly payments that I do this.

After that payment of £26 17s. 7d., you opened a ledger account? Yes.

Before that you had not a ledger account? No; but all these items are in the account sales book.

How does it come about that when you were examined before us on the 26th of March last you omitted to tell us of the item £33 3s. 2d.? Yes; because there was no memo. made as to where it was placed; it was only, as I told you, the other day that I found it out.

On the same date as that you see you made a payment, £5 4s. 6d.? Yes; when transferring this from the account sales book the boy omitted to make an entry of the folio it was on. It was only a few days ago that I found out where it was placed.

Then through a purely clerical mistake in your office the item £33 3s. 2d. had been overlooked by you in giving your last evidence? Yes; the cheque had been paid, but through the fault of the lad not folioing it it had been omitted.

Will you read out the amounts making up this payment? July 6th, £2 9s. 2d.; 7th, £2 8s. 6d.; 8th, £2 7s. 11d.; 9th, £2 4s. 9d.; 9th, £3 4s. 5d.; 11th, £2 1s.; 11th, £2 2s. 11d.; 12th, £1 19s. 11d.; 15th, £2 19s. 5d.; 16th, £1 18s. 8d.; 18th, £5 5s. 9d.; 19th, £4 0s. 9d.

Are these the items representing the account sales for £33 3s. 2d.? Yes.

Did you give that item to Mr. Davies when he asked recently? I could not say; he asked me whether I knew the amounts of the cheques I sent over or paid to the Casual Labour Board.

This account [*Exhibit P*] which Mr. Davies says you gave him, is the item £33 3s. 2d. in that? I do not see it. I have told you the reason that I did not give it to you before, because it was not mentioned where the other amounts were.

Do you recollect giving that amount to Mr. Davies when he called upon you about a month previous to your giving your former evidence? No, I cannot. He said at the time, "I fancy there is something more." I said, "I cannot find it."

Do you think that the item of £33 3s. 2d. was given to Mr. Davies when he called? I do not think so. That is my writing [*Exhibit P*]. I am sure I gave that.

But you do not recollect giving him the item £33 3s. 2d.? I should have given it to him had I known it to be there.

Do you notice in your account [*Exhibit P*] that you have not mentioned the £26 17s. 7d. Why is it not mentioned there? I cannot say; it was not in the ledger.

What took place at your interview with Mr. Davies? I was going out myself, and he shook hands and said, "Can you give me the amount of the cheques you paid to the Casual Labour Board." I said, "I am in a hurry now." He said, "That won't take you five minutes." I turned up the ledger, but I did not attempt to go through my account sales book, so I did not give him the amount of £26 17s. 7d., for it would have taken me some time to find it out.

Then this account [*Exhibit P*] which you gave him was an abstract from the ledger, and you did not give him the other items because you did not attempt to go into your other books to fish them out? That is so.

Have you brought here the cheque you gave for £33 3s. 2d.? Yes. I produce the cheque, dated 19 July, 1887, payable in favour of Mr. Burrowes or bearer, for £33 3s. 2d. This cheque is on the Bank of New South Wales, Haymarket Branch, and is signed by me.

The cheque is crossed BANK,—is that done by you? It was done in my office; the cheque bears the stamp of Bank of New South Wales, Haymarket Branch; Bank of New South Wales, Sydney, and of the City Bank, and is also marked C.B. on the back.

Read over your evidence of 26th March last, which I hand you? Yes.

Are there any alterations or additions that you desire to make? Yes; in my answer to question 2969, I wish to say that is how I first came to know Mr. Davies was there.

I show you the cheques for £26 17s. 7d. and £52 3s. 1d., which you handed us when you gave evidence on 26th March last, and the cheque for £33 3s. 2d., which you produced to us to-day;—are these all signed by you? Yes. [*Cheques put in and marked Q, Q 1, Q 2.*]

I show you also the copy account sales for £26 17s. 7d. and £52 3s. 2d., furnished by you to this Commission? Yes. [*Copy account sales put in and marked Q 3 and Q 4.*]

GEO. ROBT. C. NEALE,

April 29, 1889.

Wm. Duchesne called in and further examined :—

Mr. W.
Duchesne.
24 April, 1889.

Will you look at this cheque purporting to be signed by George Robt. Neale, dated the 19th July, 1887, payable to Mr. Burrowes or bearer, £33 3s. 2d., and say whether it has passed through the City Bank? It has been through.

Have you with you to-day the deposit slip that contains that? I have. That cheque is part of a deposit of £38 3s. 2d. paid into the account of John Davies, C.M.G., on the 19th July, 1887.

Do you produce the credit slip evidencing that? I do. [*Deposit slip put in and marked G 2.*]

By whom was that payment made? It was paid in by John Davies.

Is that credit slip in the handwriting of Mr. John Davies? It is in Mr. John Davies' handwriting.

Then this cheque of £33 3s. 2d. is part of a deposit of £38 3s. 2d.? Yes, the balance being made up in notes and gold—4 notes and £1 in gold.

Will you read the body of the deposit slip? "Paid in for the credit of John Davies, C.M.G., the sum of thirty-eight three shillings and two-pence, by self, to provide for cheque to be drawn on Thursday."

Do you believe that the whole of that deposit slip is in Mr. Davies' handwriting? I should say so. Undoubtedly the figures are rather more clearly made than Mr. Davies usually makes them, but I could not say that they are not his.

Do you produce from amongst the cheques in your hand any cheque by John Davies, C.M.G., for £26 17s. 7d.? I have no cheque for that amount.

What cheques are these—from what date to what date? These cheques were debited to John Davies, C.M.G., on his account No. 1, from the 19th May, 1887, to 31st September, 1887.

Are these all the cheques that would be debited to his two accounts between those dates? Yes, these are all the cheques.

Is there a cheque for £33 3s. 2d. amongst that lot? There is no cheque for that amount.

Is there a cheque for £52 3s. 2d.? I have no cheque for that amount.

Is there one for £52 13s. 2d.? I have none for that amount; but one for £53 12s. 4d.

Will you kindly search the account of John Davies, C.M.G., and the account of John Davies No. 2, and any other accounts of John Davies in your bank, from the 1st May, 1887, to 31st March, 1889, and inform this Commission whether there is any cheque drawn by him for £26 17s. 7d.; £33 3s. 2d.; £52 3s. 2d.; £52 13s. 2d.; £8 10s.; £86 11s. 7d.; £139 12s. 11d.; £26 6s. 4d.;—all or any of those? Yes.

Will you kindly attend this afternoon with the information? Yes.

[Witness attended subsequently and stated that there was not any cheque drawn for any of the amounts given to him.]

W. DUCHESNE.

The Hon. John Davies called in and examination continued :—

* * * * *

Hon.
John Davies,
C.M.G.,
M.L.C.
24 April, 1889.

With reference to this payment of £33 3s. 2d., made by you into the Treasury on 29th March last, am I to understand that that payment was made by you in cash? Yes; in fact all the payments were made in cash.

Am I right in my recollection of your evidence that you say you had held that money in cash for a considerable time? Yes.

Am I right in my recollection of your evidence that you say you originally received a cheque for that amount from Mr. Neale? Yes.

And that you paid it into your own private bank? Yes; I cashed it at my bank, got the proceeds, and placed them in the safe, so as to be available to be paid.

Then, after you paid it into the bank you drew a cheque for it? No, I did not draw a cheque for it; I drew it out from my rents and from other moneys. I paid that into the safe and recouped it in that way.

Did you say anything about that yesterday? I think I did.

Then is this your evidence now: That you paid Mr. Neale's cheque for £33 3s. 2d. into your own bank, and afterwards, in lieu of paying some rents and other moneys belonging to you into your bank, you took a certain sum from those rents and moneys and withheld it —? Yes; so as to recoup the proceeds of the cheque.

Did you say a word about that yesterday? I think I did.

If we cannot find it at all on your evidence, as transcribed by the shorthand-writer, is it not probable you did not say a word about it? I could not be positive; I intended to say it; it was not my intention to avoid a word about it.

Now, again, this payment of £52 13s. 2d., made by you into the Treasury on 15th February last, and which represents £52 3s. 2d., you say you received from Neale, and 10s. "Proceeds of sale of damaged crockery";—do I understand that you paid that sum into your bank and afterwards drew a cheque or cheques for it? I had no occasion to draw cheques; I had the money in a safe; about £170.

Have you in your possession, under your control, or in the control of any person or company on your behalf, any money, property, goods, or chattels belonging to the Government or Casual Labour Board at the present time? Certainly not.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(REPORT OF MESSRS. MASON AND MILES ON WORKING OF.)

Ordered by the Legislative Assembly to be printed, 8 May, 1889.

Casual Labour Board, 82 Goulburn-street,

Sydney, 11 March, 1889.

Sir,

We have the honor to report that, in accordance with the instructions of the Honorable Colonial Secretary (Mr. Dibbs), we took charge of the duties appertaining to the Casual Labour Board on 25th January last, superseding the Board originally appointed.

Our instructions were confined to carrying on the works then in progress, *and to discharge one-third of the workmen at the end of each month so as to close the works at the end of the present month*, and finally wind-up the business of the Board.

These instructions so far have been carried out, and at the end of the present month the last section of workmen will be discharged and the works closed, although it will be necessary for a short period to retain a few men, overseers, and superintendents, for the purpose of collecting, and storing the plant, tools, &c., &c.; and also to keep this office open until the whole of the accounts of the Casual Labour Board have been finally settled.

With reference to the works which have been carried out under the Board in the construction of roads, &c., &c., Mr. Mason confined his attention principally to the works then in progress, and took every opportunity of visiting and examining them. He found in very many cases that great want of skill had been shown, both in laying them out and in their execution. Had this labour been skilfully directed, the result would have been works of a more permanent and satisfactory kind, as well as a great saving of useless expenditure.

All that could practically be done to remedy this state of things has been done, during the short time we have had charge of the works.

With reference to the form of rendering accounts to the Treasury and Audit Departments we have, according to our instructions, complied with their wishes, the form used being practically the same as that of the former Board; we find that accurate records have been kept of all moneys disbursed by the late Board.

The vouchers for the expenditure before our appointment having been forwarded to the Treasury (some of them having been sent on thence to the Auditor-General) have not been available to us, but in the unpaid accounts against the late Board, which were handed over to us, there are a few apparent discrepancies of unimportant amounts, into which we are now inquiring. The most serious matter connected with the accounts which has come under our notice is the double payment of £125 17s. 8d. for seed purchased; but we have obtained a refund of that amount from the contractor, and have lodged it in the Treasury.

We have also found the late Board received the aggregate sum of £334 16s. 3d. for proceeds of the sale of firewood, &c., from the National Park, which instead of having been paid into the Treasury was deposited in the Australian Joint Stock Bank, Sydney, to the credit of the account opened there by the Government in favor of the late Board, and has been disbursed by the late Board as per vouchers in our possession.

A small sum of money was, we were informed, in the hands of the Chairman of the late Board, on behalf of a few men who had not applied for wages due to and drawn for them.

The respective amounts are noted in a book now in the possession of the Auditor-General, and probably the total amount has ere this been paid into the unclaimed wages account at the Treasury.

In due course we shall render a final and complete report of our dealings with the matter entrusted to us.

We have the honor to be,

Sir,

Your obedient servants,

WILLIAM MASON, C.E.
JOHN B. C. MILES.

The Principal Under Secretary, Sydney.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(MR. JOHN DAVIES' EXPLANATION ON ALLEGATIONS MADE AGAINST HIM IN THE SPECIAL REPORT OF ROYAL COMMISSION ON.)

Ordered by the Legislative Assembly to be printed, 8 May, 1889.

The Principal Under Secretary to The Honorable John Davies, C.M.G., M.L.C.

Sir,

Colonial Secretary's Office, Sydney, 6 May, 1889.

I am directed by the Colonial Secretary to transmit herewith, for your perusal, a copy of a Special Report from the Royal Commission now inquiring into the general management of the late Casual Labour Board, together with a Report from the two gentlemen appointed to examine into the accounts and the working of that Board, and shall be glad if you will be good enough to furnish me with any explanation you may desire to make.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Honorable John Davies, C.M.G., M.L.C., to The Colonial Secretary.

Sir,

Sydney, 8 May, 1889.

I have the honor to enclose an explanatory paper, for your information, having reference to the allegations contained in the Progress Report of the Royal Commission to inquire into the workings of the Casual Labour Board.

I desire to inform you that when Colonel Wells was being examined by the Commission, he, on behalf of the Board, requested that permission be granted for the representation of the Board during the inquiry, in order that we might hear the evidence and cross-examine witnesses, which application was refused.

This is a sample of the justice and impartiality shown to the members of the late Board by the Commission.

I have, &c.,

JOHN DAVIES.

[*Enclosure.*]

The Honorable Sir Henry Parkes, G.C.M.G., Colonial Secretary,—

Sir,

6 May, 1889.

With your usual sense of justice, you afford me an opportunity of placing this explanatory paper before the Assembly concurrently with the Report of a Royal Commission, and of Messrs. Mason and Miles, on the expenditure under the late Relief Board.

In May, 1887, when the difficulty of finding work for the unemployed was very considerable, you, Sir, requested me to undertake the task of finding employment for them of a kind which would make some return to the State for the contemplated expenditure.

From May, 1887, to January, 1889, I performed this duty, associated with Colonel Wells and Mr. Houston, until 25th January last, when, on a change of administration, I was peremptorily called upon by the new Colonial Secretary, Mr. G. R. Dibbs, to discontinue my connection with the work, which was then transferred to the hands of Messrs. Mason and Miles. Later on (20th February, 1889) a Royal Commission was appointed by Mr. Dibbs to make a diligent and full inquiry into the working of the Casual Labour Board, from the time of its appointment until the 23rd January, 1889, and for other purposes named in the Commission.

On

On the 11th of March of the present year, Messrs. Mason and Miles made a Progress Report, which I do not quote here, but I refer to it as showing that the *bona fides* of myself and those acting with me has not been questioned.

With respect to the Report of the Royal Commission, the case is different. The gentlemen forming the Commission seem to have felt themselves called upon to report that, in the management of the affairs of the Casual Labour Board, I have been guilty of grave irregularities, in reference to which they recommend that the opinion and advice of the Crown Law Officers should be taken as to whether any further action should be adopted.

I am perfectly willing to admit that the conduct of any person charged with the expenditure of public money should be open to the fullest scrutiny, but then inquiry should be surrounded with some of the forms of justice. The object of the Commission was really to try me; and, during that trial, I have been deprived of those rights which would have been maintained in a court of justice. For instance, I was not allowed to be present at the inquiry. I was not allowed to cross-examine witnesses; I was not allowed to call witnesses. Everything, so far as I was concerned, was conducted with the secrecy which is alien to British sentiment and practice. I know of no case where the magistrate at a police office, or the Judge on the Bench, would find it to be consistent with the nature of his office to run about from place to place, and from person to person, to seek for evidence to inculcate the accused.

There are three charges made against me:—

1. As to the alleged misappropriation on the 16th of May, 1887, and the absolute retention of £26 17s. 7d.
2. As to the alleged misappropriation, on the 26th of Sept., 1887, of £52 3s. 1d., and its retention from that date until the 15th of February, 1889.
3. As to the alleged misappropriation, on 19th July, 1887, of £33 3s. 2d., and its retention from that date to 29th of March, 1889.

So far as the Commission has reported, there are but three irregularities in the expenditure of £240,000, extending over a term of nearly two years. I do not think that this circumstance involves any great censure upon me, engaged in a very arduous task, the nature of which compelled prompt payment to a large number of individuals scattered over various localities, without much opportunity of personally attending to accounts as matters went along.

The first amount of £26 17s. 7d. is shown to be paid into my private account in the City Bank, and it is also shown that on the credit-slip directions as to its use, apart from a public use, are marked in my handwriting. But this very circumstance, which shows the absence of concealment, deprives the transaction of the badge of fraud. Is it not plain that a person contemplating fraud would never by paying money over a Bank counter, and using a Bank deposit slip, establish against himself documentary evidence of a damaging character?

I deeply regret that, owing to a clerical omission in connection with the recording of the transactions of account sales and the disbursements relating to the same, this cheque for £26 17s. 7d. was paid with other moneys of my own to my personal credit, and in consequence was not adjusted prior to my relinquishing office. Now that I am made aware of the fact, I have at once paid the amount for adjustment into the Treasury.

With respect to transactions Nos. 2 and 3, which are most erroneously termed misappropriations, the question in the minds of the Commissioners seems to have resolved itself into one of interest, and it is made a matter of lamentation that the Government account in the Joint Stock Bank should have been deprived of a sum of interest due to the Crown of some £4 or £5. I myself emphatically dissent from the allegation that these sums (2 and 3) can in any proper sense of the word be termed misappropriations. Charged with the expenditure of some £240,000 of public money over a continuous period, with the obligation to make periodical adjustments, if in my final adjustment I paid in this money, which I did of my own free-will, the only damage done to the Government is the loss of the interest before referred to.

I have further to say, with reference to the allegations Nos. 2 and 3 contained in the Report, that I had appropriated for my own use the proceeds of two cheques from a given date to a given date, that this is totally untrue, and at variance with my evidence given before the Commission. As is well known, the Treasury do not receive cheques from tradespeople, and I cashed the cheques referred to in my own bank, and placed sums equivalent in gold and notes in the office-safe with other trust moneys, of which the Audit Department had a knowledge. This course was rendered necessary for the convenience of the men, so that they could obtain the small balances of wages which were owing, varying from one penny to twenty-five shillings. These sums remained in the office-safe until the adjustments were made for the closing up of the affairs of the Casual Labour Board, making a total of £180; consequently, there was no misappropriation, as the amounts were ultimately paid into the Treasury. While under examination I offered to give written authority to the President to go to my bankers and ascertain from them whether I had drawn or cashed any cheques for the purpose of the adjustments referred to, as a further proof that the money was in the office awaiting payment into the Treasury. All these sums I paid into the Treasury long before my examination, and I was in no way requested to do so by the Audit Department, or by Messrs. Miles and Mason. As the Chairman of the late Board I was responsible, and recognized it as my duty to do so. I informed the Commission, in answer to a question, that I had as far as I knew adjusted all moneys that I held, but should there be found any outstanding discrepancies, I was prepared to make the adjustment, on being permitted to have access to the books, papers, and documents of the office, of which my colleagues and self were deprived when superseded by Messrs. Miles and Mason, and they were placed in possession of all books and records of the office before we received any official intimation of the appointment.

Previous to the above appointment we applied to the late Colonial Secretary for the Treasury Inspector to examine our books, vouchers, &c., but instead of complying with our request we were summarily removed; and I have no hesitation in saying that if our request had been complied with, a saving of at least £3,000 would have been effected, which will now be absorbed in fees to pay the Royal Commission and staff. It is only fair to say that Messrs. Miles and Mason reported that they found that correct records were kept of the receipts and expenditure, and that they practically carried out the system that we had adopted.

During

During our term of office we spent on the several works under our control up to the 31st December, 1888, the sum of £240,000. Acquittances for this expenditure were forwarded to the Treasury and the Audit Department. Although a great expenditure has been incurred in directing this large body of labour, it will be seen that the work carried out in improving Crown lands subdivisions, the making of public roads, the beautifying of public parks, and other public works, that good and substantial value has been realized for the expenditure.

When we took over the charge of the "unemployed," there were on the several works 4,010 men, and during the period we were in existence upwards of 8,000 men passed through the books, and of this number about 2,400 were provided with private employment at the current rate of wages, and a large number, profiting by the temporary assistance afforded them, have been enabled to find employment in the ordinary channels of labour. We found it no easy task in directing so large a body of mixed labour, so that the best results might be obtained, and the prejudicial impression created abroad by the massing of large numbers of unemployed in the city, and the besieging of public offices, was abolished by the action taken by us. I submit from the above facts that I have good cause to complain of the treatment I have received in return for the time and labour spent in the performance of the onerous duties devolving upon me as Chairman of the late Board—occupy my time, on an average, from twelve to fourteen hours daily, and travelling about 500 miles per week, rendered necessary in consequence of the works being distributed over five-and-twenty different places, and many of them very inaccessible. I am sure it was never contemplated, nor was it desired by the State, that I should devote the whole of my time, and spend my own money, in carrying out the duties of my office without fair remuneration, of which I have yet not received one shilling.

I have, &c.,

JOHN DAVIES.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(OPINION OF C. E. PILCHER, ESQUIRE, Q.C., ON CHARGES PREFERRED AGAINST THE HONORABLE JOHN DAVIES, C.M.G., IN SPECIAL REPORT OF ROYAL COMMISSION ON.)

Ordered by the Legislative Assembly to be printed, 17 May, 1889.

No. 1.

The Colonial Secretary to The Attorney-General.

My dear Mr. Simpson,

Colonial Secretary's Office, Sydney, 9 May, 1889.

I am sorry to trouble you in your present state of indisposition, but the case presented by the accompanying papers requires immediate attention. The papers consist of:—

* A. A Special Report from the Casual Labour Board Inquiry Commission.

* B. A Report from the present Casual Labour Board.

* C. A letter in reference to the foregoing Reports from the Hon. John Davies.

You will observe that on page 2 of this printed copy of the Report from the Commission it is suggested that the special matter reported upon be "referred for the opinion and advice of the Crown Law Officers as to whether any further action shall be taken." Having received from Mr. Davies such explanation as he has considered it necessary to make, I invite you, as the legal adviser of the Government, to give your opinion on the transaction in which that gentleman is reported to have been concerned.

Yours, &c.,

HENRY PARKES.

No. 2.

The Principal Under Secretary to The Crown Solicitor.

Sir,

Colonial Secretary's Office, Sydney, 9 May, 1889.

I am directed by the Colonial Secretary to send you herewith copies of documents* relating to No. 1. certain conduct of the Honorable John Davies, as Chairman of the late Casual Labour Board, together with copy of a letter to the Attorney-General.

Sir Henry Parkes regrets to say that he has received a message from Mr. Simpson that he is at present too ill to attend to anything. Under these circumstances the Colonial Secretary desires you to retain the services of a barrister of the Supreme Court to act in this matter, placing him in possession of the documents and a copy of the letter to the Attorney-General.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

No. 3.

The Crown Solicitor to C. E. Pilcher, Esq., Q.C.

In re the Casual Labour Board and the Honorable John Davies.

A COMMISSION, under the Great Seal of the Colony, having been appointed to inquire into the working of the Casual Labour Board, the Commissioners on 29th April last forwarded to His Excellency the Governor a Special Report upon a particular matter which came under their notice while the inquiry was being made by them; that matter is the way in which the Chairman of the Board has dealt with moneys received by him as such Chairman.

A copy of the Special Report is forwarded herewith; it is marked A.*

The Report being laid upon the Table of the Assembly, thereupon Mr. Davies forwarded a letter to the Honorable the Colonial Secretary, a printed copy of which, marked C,* is also forwarded herewith.

Upon this the Colonial Secretary forwarded the papers to the Honorable the Attorney-General, inviting him as the legal adviser of the Government to give his opinion upon the transaction in which Mr. Davies is reported to have been concerned.

In reply the Attorney-General informed the Colonial Secretary that he is too ill to attend to anything; the Colonial Secretary has therefore instructed me to retain the services of a barrister of the Supreme Court to act in this matter, and directed me to place in the hands of the gentleman so retained the documents above-mentioned, and also a copy of Sir Henry Parkes' letter to the Attorney-General; No. 1. of this letter the paper herewith sent, marked D, is a copy. As

* Laid upon the Table of the Legislative Assembly on 8th May, 1889.

[Enclosure.]

As it seems to me to be necessary that the document by which the Casual Labour Board was appointed should also be considered, I have obtained a copy, and herewith forward same; it is marked E.

Although the papers are sent to be advised upon because the Attorney-General is not able to deal with the matter, who, as a member of the Executive Council, could have advised his colleague generally upon the matter, the only advising now required is as to the legal aspect of the case; that is, whether the papers disclose facts in respect of which Mr. Davies is liable to be prosecuted criminally.

This will, it is thought, depend mainly upon the question of his position with the Government; and a copy of the letter under which he was appointed and acted is with the papers herewith sent.

It is thought that Sir Henry Parkes' minute of date 2nd May, 1887, addressed to Messrs. Davies, Wells, and Houison, and their acting thereunder, constitute such an employment in the Public Service, and would render them liable to be dealt with under the 121st and 122nd sections of the Criminal Law Amendment Act of 1888. Nor probably can Mr. Davies be said to be an agent as to the money received by him, with a direction in writing as to the way in which such money is to be dealt with, so as to come under the 126th section of the Act, nor under the 127th section; and it is difficult to see in what way he can be said to be a trustee under the 133rd section, which makes trustees of any property for a public purpose liable for its misappropriation.

It has been suggested that by reason of his employment, and acting under the minute above referred to, if there is no section of the Criminal Law Consolidation Act under which he may be dealt with, he may be proceeded against as for a misdemeanour at Common Law, the appropriation to his own use of the cheque given in payment for wood supplied by the Board, being a fraud committed by him in his official capacity. (*See Russell on Crimes, vol. 1, p. 302.*)

It is thought desirable that counsel in advising upon this matter should state fully his reasons for thinking either that Mr. Davies can or cannot be proceeded against criminally.

Will counsel please consider this matter as urgent, as the Honorable the Colonial Secretary is anxious to deal with it at once.

JOHN WILLIAMS,
Crown Solicitor,
11 May, 1889.

[Enclosure E.]

THE chief object I have in view, ultimately, is to draft the men off in parties of 400 to 600 to permanent works where their labour may be of value to the country, and from which they may be gradually absorbed (or, at least, a portion of them) by private employers.

In furtherance of this object, work will be provided in the Northern, Southern, and Western divisions of the Colony, in making tanks, works for irrigation purposes, deepening water-courses, and the like. Besides these works, commenced sooner than they might have been under other circumstances, but still of a legitimate character, there will be the construction of the North Shore Railway within a short time, and the conversion of the Lachlan Swamp into a public park, and some limited employment under municipal bodies.

By these various means it is hoped that employment may be found shortly for all industrious men, and that the difficulty will be practically removed.

In the meantime I wish a kind of Labour Bureau opened in Sydney, where a proper register shall be placed in charge of a careful and trustworthy person. I assume that a suitable office may be obtained in Hyde Park Barracks, and one of the clerks there hitherto employed may be detailed off for this duty. In this register the name of every applicant must be entered, with the following particulars:—

Name in full—
Address—
Trade or calling—
Age—
Nationality—
Married or single. If married—number and ages of children—
Date of arrival in the Colony—
Where from—
How long unemployed—
Name of last employer—
Substance of any certificate of character—

In connection with this principal office in Sydney communication will be established with local authorities in the principal country districts, with a view to obtaining employment for individuals.

All temporary assistance must be given after due inquiry, and in view of the ultimate objects arrived at.

2nd May, 1887.

HENRY PARKES.

John Davies, Esq., C.M.G.; Col. F. Wells; D. Houison, Esq.

No. 4.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 15 May, 1889.

I have the honor to state that having submitted a case to Mr. Pilcher, Q.C., as to the action, if any, that can be taken against the Honorable John Davies, with reference to the matter mentioned in the Special Report as to the Casual Labour Board, I have received Mr. Pilcher's advising thereon, a copy of which I forward herewith.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

[Enclosure.]

[Enclosure.]

Opinion of C. E. Pilcher, Esq., Q.C.

THE Government of New South Wales in the year 1887 determined to establish a Labour Bureau for the regulation of the employment of the surplus labour in the Colony. For that purpose the then Colonial Secretary, Sir Henry Parkes, upon the 2nd day of May, 1887, addressed a letter, from which the following is an extract, to John Davies, Esq., C.M.G., Colonel F. Wells, and D. Houston, Esq. :—

“The chief object I have in view ultimately is to draft the men off in parties of 400 to 600 to permanent works, where their labour may be of value to the country, and from which they may be periodically absorbed (or at least a portion of them) by private employers.

“In furtherance of this object, work will be provided in the Northern, Southern, and Western Divisions of the Colony, in making tanks, works for irrigation purposes, deepening water-courses, and the like. Besides these works, commenced sooner than they might have been under other circumstances, but still of a legitimate character, there will be the construction of the North Shore Railway within a short time, and the conversion of the Lachlan Swamp into a public park, and some limited employment under municipal bodies.

“By these various means it is hoped that employment may be found shortly for all industrious men, and that the difficulty will be practically removed.

“In the meantime I wish a kind of Labour Bureau opened in Sydney, where a proper register shall be placed in charge of a careful and trustworthy person. I assume that a suitable office may be obtained in Hyde Park Barracks, and one of the clerks there hitherto employed may be detailed off for this duty. In this register the name of every applicant must be entered with the following particulars :—

“Name in full—

“Address—

“Trade or calling—

“Age—

“Nationality—

“Married or single; if married, number and ages of children—

“Date of arrival in the Colony—

“Where from—

“How long employed—

“Name of last employer—

“Substance of any certificate of character—

“In connection with this principal office in Sydney, communication will be established with local authorities in the principal country districts with a view to obtaining employment for individuals.

“All temporary assistance must be given after due inquiry, and in view of the ultimate objects arrived at.”

This is the document under which I understand these three gentlemen became what has come to be known as the Casual Labour Board, and this document is, as I am instructed, the only appointment or authority, in writing or verbal, under which these gentlemen performed any duties on behalf of the Government. It will be observed that the duties and position of the Board are not defined. Further, I understand that those duties were performed voluntarily and without any consideration.

It is clear, therefore, that any or all of these gentlemen could have declined at first to act, or could at any time have refused to continue the duties of the Board; they were in no way bound to the Government.

It appears that after the letter of the 2nd May these gentlemen did act as the Casual Labour Board, Mr. Davies being Chairman, and practically doing everything that was done.

According to the evidence taken before the Royal Commission, it appears that before the Casual Labour Board came into existence a certain contract for cutting wood had been let by a Mr. Deering.

This wood was after being cut sent to Sydney to Mr. Neale, an auctioneer, for sale on behalf of the Government.

The sale of the wood was, it appears, carried out after the Casual Labour Board came into existence, and the evidence shows that Mr. Neale was in the habit of transmitting the proceeds of the wood sales by cheques to the Casual Labour Board.

The auctioneer's cheques, or perhaps the account-sales attached thereto, appear to have been used as the vouchers upon which payments were made to the contractors.

Of the cheques so sent by Mr. Neale to the Casual Labour Board, Mr. Davies personally received, amongst others, three cheques, bearing date respectively 16th May, 1887, for £26 17s. 7d., 19th July, 1887, for £33 3s. 2d., and 26th September, 1887, for £52 3s. 1d. These three cheques were drawn in favor of T. S. Hinchcliffe, E. M. Burrowes, and Burrowes respectively, and were paid by Mr. Davies himself into his own private account at the City Bank.

The proceeds of two of these cheques Mr. Davies seems to have retained for a very long time, in fact until the 15th February, 1889, and the 29th of March, 1889. The proceeds of the first cheque are still in his possession. These cheques were all received by Mr. Davies as Chairman of the Casual Labour Board, and there can be no doubt, altogether apart from the question of criminality, that his appropriation of the cheques and their proceeds, as disclosed in the evidence, was highly reprehensible.

Upon the above evidence being disclosed, the Royal Commission made an interim report to His Excellency the Governor, and Mr. Davies made a reply thereto, addressed to the Colonial Secretary. Both of these documents, together with the evidence, have been perused by me.

Under these circumstances I am asked to advise whether Mr. Davies can be prosecuted successfully for any criminal offence.

The evidence taken before the Royal Commission is certainly strong to prove that Mr. Davies received the cheques on behalf of the Government, and that he appropriated them and their proceeds to his own use.

That is, upon his trial there would be ample evidence to go to the Jury upon that part of the case. The main question, and the only one which creates any difficulty in the case, is whether Mr. Davies occupied a position with reference to the Government at the time of his receipt and appropriation of the cheques and their proceeds which would make his conduct criminal. I think that, although he sailed very close to the wind, his position at the time saves him from any criminal proceeding.

I have already said that, apart from Mr. Davies' position, there was ample evidence to go to the Jury upon the rest of the case on a charge of embezzlement. What was his position? He was acting purely voluntarily and without any remuneration, and in fact without any appointment other than that contained in the letter of 2nd May, 1887.

The position he filled was not held under any contract or appointment, nor was he bound to accept it, or to retain it, or to perform all or any part of the duties devolving upon the position.

Besides, he was not requested or instructed to receive the proceeds of the wood sales, nor indeed does it appear to have been a matter contemplated by the Government that moneys would arise from any such sources, and the cheques were received by him as moneys arising out of a contract with which he, as Chairman of the Casual Labour Board, had nothing to do; it was no part of his duty to receive the cheques in any way whatever; at the same time his receipt of the cheques was perfectly legal and free from any crime. The question of criminal liability in respect of the cheques seems to me to depend upon the construction of the 121st, 122nd, 126th, 127th, 133rd, and 129th sections of the Criminal Law Amendment Act of 1888, and upon the question whether Mr. Davies has been guilty of a common law offence. The 121st section provides that "whosoever being employed in the Public Service shall" &c. The 122nd section provides that "whosoever being employed as last aforesaid" that is employed in the Public Service. There is no definition in the Act of what these words mean, but I clearly take them to mean a person who has been duly appointed to some position in the Public Service and not to a mere volunteer, who, in fact, holds no appointment, receives no remuneration, and is not under any legal obligation to perform any work for the Government.

Next as to the 126th and 127th sections, I do not think the case comes within the 126th section, nor within the 127th. Not under the 126th, because at any rate there was no direction in writing given to Mr. Davies with reference to the cheques; nor within the 127th section, because Mr. Davies was not an agent within the meaning of the section. The 129th section provides that the word "agent" shall include banker, &c., &c., and any other person acting in the capacity of an agent so entrusted." In my opinion these words do not include a person who voluntarily and without remuneration, and not being one of the class of persons enumerated, nor following similar avocations, receives cheques on behalf of another.

The last section is the 133rd. That section provides that "whosoever being a trustee of property," &c. The word "trustee" is defined in the interpretation clause, section 3, to mean a trustee upon some express trust howsoever created, and shall include," &c. Mr. Davies does not appear to me to be a trustee within the meaning of the 133rd section.

I do not find any other section in the Criminal Law Amendment Act which includes such a case as the present. It seems to be a case omitted from the statute.

As to the common law liability, I cannot find any authority for saying that under the circumstances in this case, especially with reference to the position Mr. Davies held in regard to the Government, a criminal prosecution can be successfully undertaken.

I may add that I have not lost sight of the statements contained in Mr. Davies' letter to the Colonial Secretary, under date the 6th day of May, 1889. They do not appear to me to alter the case, or to establish any criminal liability in respect to his dealings with the cheques.

Upon the whole, I cannot advise that a criminal prosecution will be successful, as in my opinion Mr. Davies' position as Chairman of the Casual Labor Board does not, under the circumstances disclosed to me in my instructions, make him amenable to any provisions in the Criminal Law Amendment Act of 1888, nor do I think he is criminally liable at common law.

C. E. PILCHER.

14 May, 1889.

No. 5.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 17 May, 1889.

I have the honor to inform you that I have just received from Mr. Pilcher, Q.C., a further opinion in the matter of the Hon. John Davies, which I forward herewith.

As I have not had time to make a copy of this opinion I send the original, and shall therefore be obliged by you returning it to me when it is no longer required.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

[Enclosure.]

Further Opinion of C. E. Pilcher, Esq., Q.C.

Re Davies.—When writing my opinion, which I have already sent to the Crown Solicitor, my attention was directed entirely to the question of Mr. Davies' liability to indictment for a criminal offence. It did not occur to my mind, nor indeed did I suppose that the Government contemplated taking any proceedings which could only result in a summary conviction, with a comparatively trifling punishment. I mention this because I have since considered the 154th section of the Criminal Law Amendment Act. That section would apply to Mr. Davies' case if the word person includes the Government. The word person is defined in the third section of the said Act to include any society, company, or corporation. It seems to me that to make either of these appellations include the Government of New South Wales would be straining the ordinary meaning of the words. In addition, the punishment provided is on summary conviction, and is limited to three months' imprisonment, or a fine of £20. I admit I overlooked the section at first, but I must add that I am strongly of opinion this is not the kind of proceeding contemplated by the Government, or upon which my opinion was asked. And further, for the reasons above given, I doubt extremely whether the section applies.

C. E. PILCHER.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(OPINIONS OF C. E. PILCHER, ESQUIRE, Q.C., AND F. E. ROGERS, ESQUIRE, Q.C., ON CHARGES PREFERRED AGAINST THE HONORABLE JOHN DAVIES, C.M.G., IN SPECIAL REPORT OF ROYAL COMMISSION ON.)

Ordered by the Legislative Assembly to be printed, 5 June, 1889.

No. 1.

The Colonial Secretary to The Attorney-General.

My dear Mr. Simpson,

Colonial Secretary's Office, Sydney, 9 May, 1889.

I am sorry to trouble you in your present state of indisposition, but the case presented by the accompanying papers requires immediate attention. The papers consist of:—

* A. A Special Report from the Casual Labour Board Inquiry Commission.

* B. A Report from the present Casual Labour Board.

* C. A letter in reference to the foregoing Reports from the Hon. John Davies.

You will observe that on page 2 of this printed copy of the Report from the Commission it is suggested that the special matter reported upon be "referred for the opinion and advice of the Crown Law Officers as to whether any further action shall be taken." Having received from Mr. Davies such explanation as he has considered it necessary to make, I invite you, as the legal adviser of the Government, to give your opinion on the transaction in which that gentleman is reported to have been concerned.

Yours, &c.,

HENRY PARKES.

No. 2.

The Principal Under Secretary to The Crown Solicitor.

Sir,

Colonial Secretary's Office, Sydney, 9 May, 1889.

I am directed by the Colonial Secretary to send you herewith copies of documents* relating to certain conduct of the Honorable John Davies, as Chairman of the late Casual Labour Board, together with copy of a letter to the Attorney-General.

No. 1.

Sir Henry Parkes regrets to say that he has received a message from Mr. Simpson that he is at present too ill to attend to anything. Under these circumstances the Colonial Secretary desires you to retain the services of a barrister of the Supreme Court to act in this matter, placing him in possession of the documents and a copy of the letter to the Attorney-General.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

No. 3.

The Crown Solicitor to C. E. Pilcher, Esq., Q.C.

In re the Casual Labour Board and the Honorable John Davies.

A COMMISSION, under the Great Seal of the Colony, having been appointed to inquire into the working of the Casual Labour Board, the Commissioners on 29th April last forwarded to His Excellency the Governor a Special Report upon a particular matter which came under their notice while the inquiry was being made by them; that matter is the way in which the Chairman of the Board has dealt with moneys received by him as such Chairman.

A copy of the Special Report is forwarded herewith; it is marked A.*

The Report being laid upon the Table of the Assembly, thereupon Mr. Davies forwarded a letter to the Honorable the Colonial Secretary, a printed copy of which, marked C,* is also forwarded herewith.

Upon this the Colonial Secretary forwarded the papers to the Honorable the Attorney-General, inviting him as the legal adviser of the Government to give his opinion upon the transaction in which Mr. Davies is reported to have been concerned.

In reply the Attorney-General informed the Colonial Secretary that he is too ill to attend to anything; the Colonial Secretary has therefore instructed me to retain the services of a barrister of the Supreme Court to act in this matter, and directed me to place in the hands of the gentleman so retained the documents above-mentioned, and also a copy of Sir Henry Parkes' letter to the Attorney-General; of this letter the paper herewith sent, marked D, is a copy.

As No. 1.

* Laid upon the Table of the Legislative Assembly on 8th May, 1889.

[Enclosure.]

As it seems to me to be necessary that the document by which the Casual Labour Board was appointed should also be considered, I have obtained a copy, and herewith forward same; it is marked E.

Although the papers are sent to be advised upon because the Attorney-General is not able to deal with the matter, who, as a member of the Executive Council, could have advised his colleague generally upon the matter, the only advising now required is as to the legal aspect of the case; that is, whether the papers disclose facts in respect of which Mr. Davies is liable to be prosecuted criminally.

This will, it is thought, depend mainly upon the question of his position with the Government; and a copy of the letter under which he was appointed and acted is with the papers herewith sent.

It is thought that Sir Henry Parkes' minute of date 2nd May, 1887, addressed to Messrs. Davies, Wells, and Houison, and their acting thereunder, constitute such an employment in the Public Service, and would render them liable to be dealt with under the 121st and 122nd sections of the Criminal Law Amendment Act of 1888. Nor probably can Mr. Davies be said to be an agent as to the money received by him, with a direction in writing as to the way in which such money is to be dealt with, so as to come under the 126th section of the Act, nor under the 127th section; and it is difficult to see in what way he can be said to be a trustee under the 133rd section, which makes trustees of any property for a public purpose liable for its misappropriation.

It has been suggested that by reason of his employment, and acting under the minute above referred to, if there is no section of the Criminal Law Consolidation Act under which he may be dealt with, he may be proceeded against as for a misdemeanour at Common Law, the appropriation to his own use of the cheque given in payment for wood supplied by the Board, being a fraud committed by him in his official capacity. (*See Russell on Crimes, vol. 1, p. 302.*)

It is thought desirable that counsel in advising upon this matter should state fully his reasons for thinking either that Mr. Davies can or cannot be proceeded against criminally.

Will counsel please consider this matter as urgent, as the Honorable the Colonial Secretary is anxious to deal with it at once.

JOHN WILLIAMS,
Crown Solicitor,
11 May, 1889.

[Enclosure E.]

THE chief object I have in view, ultimately, is to draft the men off in parties of 400 to 600 to permanent works where their labour may be of value to the country, and from which they may be gradually absorbed (or, at least, a portion of them) by private employers.

In furtherance of this object, work will be provided in the Northern, Southern, and Western divisions of the Colony, in making tanks, works for irrigation purposes, deepening water-courses, and the like. Besides these works, commenced sooner than they might have been under other circumstances, but still of a legitimate character, there will be the construction of the North Shore Railway within a short time, and the conversion of the Lachlan Swamp into a public park, and some limited employment under municipal bodies.

By these various means it is hoped that employment may be found shortly for all industrious men, and that the difficulty will be practically removed.

In the meantime I wish a kind of Labour Bureau opened in Sydney, where a proper register shall be placed in charge of a careful and trustworthy person. I assume that a suitable office may be obtained in Hyde Park Barracks, and one of the clerks there hitherto employed may be detailed off for this duty. In this register the name of every applicant must be entered, with the following particulars:—

Name in full—
Address—
Trade or calling—
Age—
Nationality—
Married or single. If married—number and ages of children—
Date of arrival in the Colony—
Where from—
How long unemployed—
Name of last employer—
Substance of any certificate of character—

In connection with this principal office in Sydney communication will be established with local authorities in the principal country districts, with a view to obtaining employment for individuals.

All temporary assistance must be given after due inquiry, and in view of the ultimate objects arrived at.

2nd May, 1887.

HENRY PARKES.

John Davies, Esq., C.M.G.; Col. F. Wells; D. Houison, Esq.

No. 4.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 15 May, 1889.

I have the honor to state that having submitted a case to Mr. Pilcher, Q.C., as to the action, if any, that can be taken against the Honorable John Davies, with reference to the matter mentioned in the Special Report as to the Casual Labour Board, I have received Mr. Pilcher's advising thereon, a copy of which I forward herewith.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

[Enclosure.]

[Enclosure.]

Opinion of C. E. Pilcher, Esq., Q.C.

THE Government of New South Wales in the year 1887 determined to establish a Labour Bureau for the regulation of the employment of the surplus labour in the Colony. For that purpose the then Colonial Secretary, Sir Henry Parkes, upon the 2nd day of May, 1887, addressed a letter, from which the following is an extract, to John Davies, Esq., C.M.G., Colonel F. Wells, and D. Houston, Esq. :—

“The chief object I have in view ultimately is to draft the men off in parties of 400 to 600 to permanent works, where their labour may be of value to the country, and from which they may be periodically absorbed (or at least a portion of them) by private employers.

“In furtherance of this object, work will be provided in the Northern, Southern, and Western Divisions of the Colony, in making tanks, works for irrigation purposes, deepening water-courses, and the like. Besides these works, commenced sooner than they might have been under other circumstances, but still of a legitimate character, there will be the construction of the North Shore Railway within a short time, and the conversion of the Lachlan Swamp into a public park, and some limited employment under municipal bodies.

“By these various means it is hoped that employment may be found shortly for all industrious men, and that the difficulty will be practically removed.

“In the meantime I wish a kind of Labour Bureau opened in Sydney, where a proper register shall be placed in charge of a careful and trustworthy person. I assume that a suitable office may be obtained in Hyde Park Barracks, and one of the clerks there hitherto employed may be detailed off for this duty. In this register the name of every applicant must be entered with the following particulars :—

- “Name in full—
- “Address—
- “Trade or calling—
- “Age—
- “Nationality—
- “Married or single; if married, number and ages of children—
- “Date of arrival in the Colony—
- “Where from—
- “How long employed—
- “Name of last employer—
- “Substance of any certificate of character—

“In connection with this principal office in Sydney, communication will be established with local authorities in the principal country districts with a view to obtaining employment for individuals.

“All temporary assistance must be given after due inquiry, and in view of the ultimate objects arrived at.”

This is the document under which I understand these three gentlemen became what has come to be known as the Casual Labour Board, and this document is, as I am instructed, the only appointment or authority, in writing or verbal, under which these gentlemen performed any duties on behalf of the Government. It will be observed that the duties and position of the Board are not defined. Further, I understand that those duties were performed voluntarily and without any consideration.

It is clear, therefore, that any or all of these gentlemen could have declined at first to act, or could at any time have refused to continue the duties of the Board; they were in no way bound to the Government.

It appears that after the letter of the 2nd May these gentlemen did act as the Casual Labour Board, Mr. Davies being Chairman, and practically doing everything that was done.

According to the evidence taken before the Royal Commission, it appears that before the Casual Labour Board came into existence a certain contract for cutting wood had been let by a Mr. Deering.

This wood was after being cut sent to Sydney to Mr. Neale, an auctioneer, for sale on behalf of the Government.

The sale of the wood was, it appears, carried out after the Casual Labour Board came into existence, and the evidence shows that Mr. Neale was in the habit of transmitting the proceeds of the wood sales by cheques to the Casual Labour Board.

The auctioneer's cheques, or perhaps the account-sales attached thereto, appear to have been used as the vouchers upon which payments were made to the contractors.

Of the cheques so sent by Mr. Neale to the Casual Labour Board, Mr. Davies personally received, amongst others, three cheques, bearing date respectively 16th May, 1887, for £26 17s. 7d., 19th July, 1887, for £33 3s. 2d., and 26th September, 1887, for £52 3s. 1d. These three cheques were drawn in favor of T. S. Hinchcliffe, E. M. Burrowes, and Burrowes respectively, and were paid by Mr. Davies himself into his own private account at the City Bank.

The proceeds of two of these cheques Mr. Davies seems to have retained for a very long time, in fact until the 15th February, 1889, and the 29th of March, 1889. The proceeds of the first cheque are still in his possession. These cheques were all received by Mr. Davies as Chairman of the Casual Labour Board, and there can be no doubt, altogether apart from the question of criminality, that his appropriation of the cheques and their proceeds, as disclosed in the evidence, was highly reprehensible.

Upon the above evidence being disclosed, the Royal Commission made an interim report to His Excellency the Governor, and Mr. Davies made a reply thereto, addressed to the Colonial Secretary. Both of these documents, together with the evidence, have been perused by me.

Under these circumstances I am asked to advise whether Mr. Davies can be prosecuted successfully for any criminal offence.

The evidence taken before the Royal Commission is certainly strong to prove that Mr. Davies received the cheques on behalf of the Government, and that he appropriated them and their proceeds to his own use.

That is, upon his trial there would be ample evidence to go to the Jury upon that part of the case. The main question, and the only one which creates any difficulty in the case, is whether Mr. Davies occupied a position with reference to the Government at the time of his receipt and appropriation of the cheques and their proceeds which would make his conduct criminal. I think that, although he sailed very close to the wind, his position at the time saves him from any criminal proceeding.

I have already said that, apart from Mr. Davies' position, there was ample evidence to go to the Jury upon the rest of the case on a charge of embezzlement. What was his position? He was acting purely voluntarily and without any remuneration, and in fact without any appointment other than that contained in the letter of 2nd May, 1887.

The position he filled was not held under any contract or appointment, nor was he bound to accept it, or to retain it, or to perform all or any part of the duties devolving upon the position.

Besides, he was not requested or instructed to receive the proceeds of the wood sales, nor indeed does it appear to have been a matter contemplated by the Government that moneys would arise from any such sources, and the cheques were received by him as moneys arising out of a contract with which he, as Chairman of the Casual Labour Board, had nothing to do; it was no part of his duty to receive the cheques in any way whatever; at the same time his receipt of the cheques was perfectly legal and free from any crime. The question of criminal liability in respect of the cheques seems to me to depend upon the construction of the 121st, 122nd, 126th, 127th, 133rd, and 129th sections of the Criminal Law Amendment Act of 1888, and upon the question whether Mr. Davies has been guilty of a common law offence. The 121st section provides that "whosoever being employed in the Public Service shall" &c. The 122nd section provides that "whosoever being employed as last aforesaid" that is employed in the Public Service. There is no definition in the Act of what these words mean, but I clearly take them to mean a person who has been duly appointed to some position in the Public Service and not to a mere volunteer, who, in fact, holds no appointment, receives no remuneration, and is not under any legal obligation to perform any work for the Government.

Next as to the 126th and 127th sections, I do not think the case comes within the 126th section, nor within the 127th. Not under the 126th, because at any rate there was no direction in writing given to Mr. Davies with reference to the cheques; nor within the 127th section, because Mr. Davies was not an agent within the meaning of the section. The 129th section provides that the word "agent" shall include banker, &c., &c., and any other person acting in the capacity of an agent so entrusted." In my opinion these words do not include a person who voluntarily and without remuneration, and not being one of the class of persons enumerated, nor following similar avocations, receives cheques on behalf of another.

The last section is the 133rd. That section provides that "whosoever being a trustee of property," &c. The word "trustee" is defined in the interpretation clause, section 3, to mean a trustee upon some express trust howsoever created, and shall include," &c. Mr. Davies does not appear to me to be a trustee within the meaning of the 133rd section.

I do not find any other section in the Criminal Law Amendment Act which includes such a case as the present. It seems to be a case omitted from the statute.

As to the common law liability, I cannot find any authority for saying that under the circumstances in this case, especially with reference to the position Mr. Davies held in regard to the Government, a criminal prosecution can be successfully undertaken.

I may add that I have not lost sight of the statements contained in Mr. Davies' letter to the Colonial Secretary, under date the 6th day of May, 1889. They do not appear to me to alter the case, or to establish any criminal liability in respect to his dealings with the cheques.

Upon the whole, I cannot advise that a criminal prosecution will be successful, as in my opinion Mr. Davies' position as Chairman of the Casual Labor Board does not, under the circumstances disclosed to me in my instructions, make him amenable to any provisions in the Criminal Law Amendment Act of 1888, nor do I think he is criminally liable at common law.

C. E. PILCHER.

14 May, 1889.

No. 5.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 17 May, 1889.

I have the honor to inform you that I have just received from Mr. Pilcher, Q.C., a further opinion in the matter of the Hon. John Davies, which I forward herewith.

As I have not had time to make a copy of this opinion I send the original, and shall therefore be obliged by you returning it to me when it is no longer required.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

[Enclosure.]

Further Opinion of C. E. Pilcher, Esq., Q.C.

Re Davies.—When writing my opinion, which I have already sent to the Crown Solicitor, my attention was directed entirely to the question of Mr. Davies' liability to indictment for a criminal offence. It did not occur to my mind, nor indeed did I suppose that the Government contemplated taking any proceedings which could only result in a summary conviction, with a comparatively trifling punishment. I mention this because I have since considered the 154th section of the Criminal Law Amendment Act. That section would apply to Mr. Davies' case if the word person includes the Government. The word person is defined in the third section of the said Act to include any society, company, or corporation. It seems to me that to make either of these appellations include the Government of New South Wales would be straining the ordinary meaning of the words. In addition, the punishment provided is on summary conviction, and is limited to three months' imprisonment, or a fine of £20. I admit I overlooked the section at first, but I must add that I am strongly of opinion this is not the kind of proceeding contemplated by the Government, or upon which my opinion was asked. And further, for the reasons above given, I doubt extremely whether the section applies.

C. E. PILCHER.

[NOTE.—The foregoing correspondence was laid upon the Table of the Legislative Assembly on the 17th May, 1889.]

No. 6.

No. 6.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 31 May, 1889.

I have the honor to inform you that I have this afternoon received from F. Rogers, Esq., Q.C., his Opinion upon the case submitted to him with reference to the Honorable John Davies' action in certain matters as Chairman of the Casual Labour Board, and to forward herewith a copy of that Opinion for the information of the Honorable the Colonial Secretary.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

[Enclosure.]

Opinion of F. E. Rogers, Esq., Q.C.

In re the Casual Labour Board and the Honorable John Davies.

In this matter I think that the 126th, 127th, and 133rd sections of the Criminal Law Consolidation Act have no bearing. There is no direction in writing to bring the case within the 126th section, nor is there anything to show that Mr. Davies was entrusted as an agent within the meaning of the 127th section, and there is not in my opinion any case against him under the 133rd section. I do not see that he was a trustee on some express trust in the sense contemplated by that section. When the cheques were given in payment by Mr. Neale, it seems to me that he paid them to the authorised quarter, and considered that as far as he was concerned his indebtedness was discharged, and that he had no concern with their further disposal. Therefore I cannot see that he entrusted them to Mr. Davies as an agent or as a trustee.

I speak with more hesitation about the 71st section; but I do not think that it would be held that Mr. Davies was a bailee of these cheques. I do not think that the giving of the cheques by Mr. Neale was a bailment, because, as above said, Mr. Neale gave them in payment of the proceeds of the sales of wood. Neither do I think that Mr. Davies was bailee of them for the Government, because it seems to me that Mr. Davies was not bailee of the wood. How was he bailee? As I understand the facts, certain trees on Government land were cut down by persons employed for that purpose by the Casual Labour Board (as it was called). The wood of those trees was sold and the three cheques to be presently referred to were the proceeds of the sales of the wood. But what bailment was there of the wood? To create a bailment it seems to me that there must be *possession* by the bailor and an actual or constructive delivery to the bailee. But this wood, although no doubt the property of the Government, was never in the *possession* of the Government. Therefore I do not see how it can be contended that there was any bailment of the wood; and if not, it seems to me that there was not any bailment of the cheques, as the property into which the chattel bailed had been converted, cannot, in my opinion, be regarded as in any other position than the chattel itself.

I now come to the sections which, in my opinion, do bear on the case,—and they are the 121st and the 122nd.

The 121st section says:—"That whosoever, being employed in the Public Service, steals any property, or any part thereof entrusted to him, or taken into his possession, or being in his custody or under his control, by virtue or color of such employment shall be liable, &c."

The 122nd section says:—"That whosoever, being employed as last aforesaid, fraudulently embezzles any property or any part thereof so entrusted to him, or taken into his possession, or being in his custody or under his control, or fraudulently secretes, removes, or in any manner fraudulently appropriates or disposes of the same or any part thereof, shall be deemed to have stolen the same."

It cannot be doubted that the evidence taken before the Royal Commission is strong to establish that three cheques, the first in favour of Mr. T. S. Hinchcliffe for £26 17s. 7d., the second in favour of Mr. E. M. Burrowes for £52 3s. 1d., and the third in favour of Mr. Burrowes for £33 3s. 2d.—were improperly appropriated, and there is ample evidence to support an information preferred under the above quoted sections, so far as regards the wrongful appropriation. The next and most important consideration is whether Mr. Davies was employed in the Public Service within the meaning of those sections.

It appears that on the 2nd May, 1887, the Colonial Secretary addressed a letter to Mr. Davies and two other gentlemen, which was the cause of the Board, afterwards called the "Casual Labour Board," coming into existence. From the extract of that letter before me I cannot see that there was anything like an appointment to any specific office; in fact the letter seems to me to be no more than an expression of the Colonial Secretary's wishes, with suggestions for carrying out the object he had in view. But on that letter the gentlemen to whom it was addressed associated themselves together and acted together in fulfilment of its suggestions. They came to be called the Casual Labour Board. Mr. Davies became Chairman, and took an active and prominent part in the work done by the Board.

Now it seems to me that it is a question proper for determination by a jury whether Mr. Davies was employed in the Public Service, and I think that his having acted on the Board, and taken the prominent part above alluded to, is evidence of his employment. I think it matters not whether he acted gratuitously or in anticipation of future pecuniary recognition; and I think it is equally immaterial that the duties to be performed by the Board should be definitely specified. If it can be shown that any claim for his services has been made by Mr. Davies, I think that would also strengthen the case, as showing that he himself recognized an employment. In compliance, then, with the letter of my instructions that "the only advising now required is as to the legal aspect of the case, that is, whether the papers disclose facts in respect of which Mr. Davies is liable to be prosecuted criminally?"—I have to say that in my opinion, for the reasons above given, he is liable to prosecution under the sections last referred to

With regard to the suggestion that perhaps Mr. Davies is liable to prosecution at Common Law, I may say that owing to my being asked to consider this matter as urgent, it has not been possible for me in the time at my disposal to consider the question as carefully as one would wish, but so far as can be gathered from the cases consulted by me, my opinion is that Mr. Davies is not liable to prosecution at Common Law.

The papers laid before me, and upon which this opinion is given are:—

1. The Report of and the Minutes of Evidence given before the Royal Commission, marked A.
2. The Report of Messrs. Mason and Miles, marked B.
3. Mr. Davies' letter to the Hon. Sir Henry Parkes, dated 6th May, 1889, marked C.
4. Extract from Sir Henry Parkes' letter to Messrs. Davies, Wells, and Houson of 2nd May, 1887, marked E.

F. E. ROGERS,
31st May, 1889.

No. 7.

The Principal Under Secretary to The Crown Solicitor.

Sir,

Colonial Secretary Office, Sydney, 4 June, 1889.

I am directed to invite your attention to that portion of Mr. Rogers' Opinion (enclosed) which deals with the 121st and 122nd clauses of the Criminal Law Consolidation Act in relation to the case of the Honorable John Davies, and to inform you that it was decided by Ministers in Cabinet Council to-day that you be instructed to proceed against Mr. Davies accordingly.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary,

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(FURTHER CORRESPONDENCE ON OPINIONS OF C. E. PILCHER, ESQUIRE, Q.C., AND F. E. ROGERS, ESQUIRE, Q.C., ON CHARGES AGAINST THE HONORABLE JOHN DAVIES, C.M.G., IN SPECIAL REPORT OF ROYAL COMMISSION.)

Ordered by the Legislative Assembly to be printed, 20 June, 1889.

No. 1.

The Colonial Secretary to The Attorney-General.

My dear Mr. Simpson, Colonial Secretary's Office, Sydney, 22 May, 1889.

I send herewith copies of the papers on the reference of the case of the Hon. John Davies to Mr. Pilcher, Q.C., in your absence through indisposition. These papers are sent to you for any opinion you may desire to express as a Member of the Government.

For myself I hold that we are bound to abide by the opinion of the eminent counsel employed in your absence, just in the same way as we must have been bound by the opinion of the Attorney-General, and that we can take no further step in law.

Several of our colleagues, however, hold that a prosecution of Mr. Davies ought to be instituted, not only on public grounds but to enable Mr. Davies to justify himself, if he can, in a Court of law. But the Crown Solicitor states that he knows of no provision of the law under which any such prosecution could be properly initiated.

I remain, &c.,

HENRY PARKES.

No. 2.

The Attorney-General to The Colonial Secretary.

My dear Sir Henry, Darling Point, 23 May, 1889.

I received your note yesterday, forwarding copies of papers on the reference of the case of the Honorable John Davies to Mr. Pilcher, Q.C., in my absence through indisposition, and stating that they were sent to me for any opinion I might desire to express as a member of the Government. I agree with you that the Government are bound to abide by the opinion of the eminent counsel employed in my absence (*unless it can be shown that that opinion is wrong*). Mr. Pilcher was asked by the Crown Solicitor to advise "as to the legal aspect of the case—that is, whether the papers disclose facts in respect of which Mr. Davies is liable to be prosecuted criminally,"—and Mr. Pilcher has expressed his opinion that "Mr. Davies' position as Chairman of the Casual Labour Board does not, under the circumstances disclosed to him in his instructions, make him amenable to any provisions of the Criminal Law Amendment Act of 1883, nor does he think he is criminally liable at Common Law."

In his second opinion he refers to section 154 of the Act, and he states that that section (under which a person could only be summarily convicted before two Justices and punished by imprisonment for a term not exceeding three months, or by the infliction of a fine not exceeding £20) would apply to Mr. Davies if the word person includes the Government, and after referring to the definition of the word "person" he expresses extreme doubt whether the section applies.

Assuming—as I do at present—that the opinion of Mr. Pilcher is correct, I certainly would be opposed to the initiating of any criminal proceedings against Mr. Davies; and in the face of that opinion—that Mr. Davies has *not* committed any offence for which he is amenable to the Criminal Law—I think that the instituting of such proceedings by the Crown "on public grounds, or to enable Mr. Davies to justify himself, if he can, in a Court of law," would be altogether unjustifiable. I am writing this note in bed.

Believe me, &c.,

G. B. SIMPSON.

I am not strong enough to express any opinion or consider the case carefully as to the legal liability (criminally) of Mr. Davies, and it would be impossible for me to do so without access to legal authorities. If any of our colleagues doubt the correctness of Mr. Pilcher's conclusions it might be desirable to obtain the opinion of another eminent counsel, say Mr. Rogers, Q.C.—G.B.S.

No. 3.

The Colonial Secretary to The Crown Solicitor.

My dear Sir,

Sydney, 23 May, 1889.

No. 2.

In the letter herewith from Mr. Simpson you will observe that he suggests that the opinion of "another eminent counsel, say Mr. Rogers, Q.C.," might be obtained on the case of the Honorable John Davies. You will be good enough to take the necessary steps to obtain that opinion.

Yours, &c.,

HENRY PARKES.

No. 4.

The Crown Solicitor to F. E. Rogers, Esq., Q.C.

In re The Casual Labour Board and The Honorable John Davies.

A COMMISSION under the Great Seal of the Colony having been appointed to inquire into the working of the Casual Labour Board, the Commissioners on 29th April last forwarded to His Excellency the Governor a special Report upon a particular matter which came under their notice while the inquiry was being made by them; that matter is the way in which the Chairman of the Board has dealt with moneys received by him as such Chairman.

A copy of the special Report is forwarded herewith; it is marked "A."*

The Report being laid upon the Table in the Assembly, thereupon Mr. Davies forwarded a letter to the Honorable the Colonial Secretary, a printed copy of which, marked "C,"* is also forwarded herewith.

Upon this the Colonial Secretary forwarded the papers to the Honorable the Attorney-General, inviting him, as the legal adviser of the Government, to give his opinion upon the transaction in which Mr. Davies is reported to have been concerned.

In reply, the Attorney-General informed the Colonial Secretary that he is too ill to attend to anything; the Colonial Secretary has therefore instructed me to retain the services of a Barrister of the Supreme Court to act in this matter, and directed me to place in the hands of the gentleman so retained the documents above-mentioned, and also a copy of Sir Henry Parkes' letter to the Attorney-General. Of this letter the paper herewith sent, marked "D,"† is a copy.

As it seems to me to be necessary that the document by which the Casual Labour Board was appointed should also be considered, I have obtained a copy, and herewith forward same; it is marked "E."†

Although the papers are sent to be advised upon, because the Attorney-General is not able to deal with the matter, who, as a member of the Executive Council, could have advised his colleague generally upon the matter, the only advising now required is as to the legal aspect of the case, that is, whether the papers disclose facts in respect of which Mr. Davies is liable to be prosecuted criminally.

This will, it is thought, depend mainly upon the question of his position with the Government, and a copy of the letter under which he was appointed and acted is with the papers herewith sent.

Counsel's attention is requested to the 122nd, 127th, 133rd, and to the 71st section of the Act, Criminal Law Amendment Act of 1883.

It has been suggested that, by reason of his employment, and acting under the Minister above referred to, if there is no section of the Criminal Law Consolidation Act under which he may be dealt with, he may be proceeded against as for a misdemeanour at Common Law, the appropriation to his own use of the cheque given in payment for wood supplied by the Board being a fraud committed by him in his official capacity. (See Russell on Crimes, vol. 1, page 302.)

It is thought desirable that counsel, in advising upon this matter, should state fully his reasons for thinking Mr. Davies can or cannot be proceeded against criminally.

Will counsel please consider this matter as urgent, as the Honorable the Colonial Secretary is anxious to deal with it at once?

JOHN WILLIAMS,

Crown Solicitor.

No. 5.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 5 June, 1889.

I have the honor to acknowledge the receipt of your letter of yesterday directing me to proceed to prosecute the Honorable John Davies under the 121st and 122nd sections of the Criminal Law Consolidation Act, and to state that I have, this morning, called upon Mr. Rogers and informed him that I proposed delivering a brief to him to attend for the prosecution at the Police Court.

Mr. Rogers, in reply, stated that his numerous engagements in the several Courts now sitting for the trial of causes in the Supreme Court renders it impossible that he can accept a brief in this matter.

I did not refer to the Honorable the Attorney-General in this matter, as it seemed to me so very desirable that as the proceedings would be instituted under Mr. Rogers' advice that there could be no doubt that he should be offered the brief for the prosecution; as he declines to accept the brief it will have to be offered to some other member of the Bar, and as the prosecution is undertaken by the Government, the Attorney-General will doubtless consider that he should be consulted as to the counsel to be employed.

It is therefore necessary that reference should be made to the Honorable the Attorney-General.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 20 June, 1889.

In reply to your verbal inquiry of this morning, I have the honor to state that some days since a brief was delivered to Mr. Cohen, who accepted same, and upon his request, with the approval of the Honorable the Attorney-General, a consultation has been held between Mr. Cohen and F. E. Rogers, Esq., Q.C., as to matters connected with the prosecution of this case at the Police Court.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CASUAL LABOUR BOARD.

(COST OF ROYAL COMMISSION OF INQUIRY INTO.)

Ordered by the Legislative Assembly to be printed, 3 July, 1889.

[Laid upon the Table of this House in answer to Question No. 9 of 3 July, 1889.]

Questions.

9. MR. KIDD *to ask* THE COLONIAL SECRETARY,—

(1.) How many of the following works, viz., Beacroft, Hornsby, Berowra, Carlingford, Ryde, Gordon, National Park, Sutherland, Waterfalls, Otford, Port Hacking, Camp Creek, Bulgo, Cawley's Creek, Heathcote, Hurstville, Cook Park, Liverpool, Campbelltown, Narrabeen, Dobroyd, French's Forest, Helsarmel Creek, White's and Johnson's Creeks, and Garic Beach, which were carried out by the Casual Labour Board, did the Royal Commission visit and inspect, and what length of time (if any) did they devote to each inspection?

(2.) Is it a fact that only two hours were devoted to the inspection of the Holt-Sutherland works by the Commission, and a shorter period to the Hornsby works by Mr. Franklin?

(3.) What is the total cost of the Royal Commission of Inquiry, including fees paid or to be paid to Commissioners, salary to the Secretary, shorthand and type-writers, witnesses' expenses, stationery, printing, and other incidental expenses?

Answers.

The following information has been supplied by the Secretary of the Casual Labour Board Inquiry Commission:—

(1.) From the Report it is gathered that the Commissioners visited the Holt-Sutherland works and the Hornsby works, and that they conceived that the official reply (forwarding certain papers) to their letter of the 25th February last, asking for particulars of the charges and statements, confined them to an examination of those papers which principally affected the abovenamed works. The time and expense involved in more fully examining the works, &c., of the late Casual Labour Board not being at the disposal of the Commission, they confined their inquiry to the papers before mentioned.

(2.) No.

(3.) The total cost of the Royal Commission up to date (3rd July, 1889) is £582 15s. 11d., viz.:—

	£	s.	d.
Shorthand-writers	361	15	0
Secretary	126	8	6
Clerical expenses	43	8	6
Witnesses' expenses	16	12	5
Incidental expenses	34	11	6

£ 582 15 11

The members of the Commission have not received any remuneration, nor have they yet made any claim.

1889.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LATE CASUAL LABOUR BOARD.

(FEES, &c., TO MEMBERS OF.)

Ordered by the Legislative Assembly to be printed, 17 May, 1889.

The Chairman, Casual Labour Board, to The Colonial Secretary.

Dear Sir Henry,

Casual Labour Board,
82, Goulburn-street, Sydney, 31 December, 1888.

In compliance with your request, I have the pleasure to inform you that I have been engaged as Chairman of the Casual Labour Board for the past twenty months, and during that time, in performing the duties of my office, I have travelled on an average of 500 miles per week, and have been occupied twelve to fourteen hours daily. The duties devolving upon me have been both difficult and onerous, but it will be admitted, I think, by all, that they have been discharged with good and satisfactory results to yourself and the country. During the period referred to, upwards of 8,000 men have passed through our hands, and a large proportion of them have been provided with private employment at current rate of wage, and also a large number who were temporarily employed have subsequently found employment among the ordinary avenues of labour, leaving 930 on the different works; and the several works performed by the large number of men temporarily engaged from time to time in road-making, clearing Crown lands, &c., will yield a splendid return for the outlay, most of the works being of a highly reproductive character. The following are the localities where the men have been employed:— On the Northern Railway Line, at Ryde, Eastwood, Carlingford, Beecroft, Hornsby, and Berowra, in road-making and clearing Crown lands. The Southern Line, at Bankstown, Rookwood, Liverpool, and Eckersley, in clearing and road-making. Illawarra Line—Unwin's Bridge Road, Peakhurst, Great Illawarra Road, Cook Park, Kogarah, Sutherland, Woniara Road, National Park, Heathcote, Waterfalls, Cawley's Creek, Camp Creek, Otford, and Bulgo, in road-making and clearing. Pearce's Corner Line, at Gordon, land cleared and roads made. Manly Beach, Dobroyd, French's Forest, and Narrabeen, land cleared and roads made; besides sewerage works at Johnson's and White's Creeks; forming Leichhardt Park, clearing Little Bay Hospital Reserve, and improving University and Prince Alfred Hospital grounds.

All these works it was necessary for me to frequently visit, some of them being very inaccessible, and consequently caused me to incur travelling expenses, for which I have enclosed voucher for £261 10s., for a period of 521 days. I also enclose voucher for £873 12s. in payment of fees for services rendered as Chairman of the Casual Labour Board, from the 2nd May to the 29th December, 1887, being the period prior to my appointment to the Legislative Council. The twelve months since my appointment to the Legislative Council I shall regard as honorary service.

I have, &c.,
JOHN DAVIES,
Chairman.

Minute by The Colonial Secretary.

Fees to Casual Labour Board.

MR. DAVIES was appointed early in May, 1887, and he certainly has devoted his time most assiduously to the direction of the work he undertook, and his management has upon the whole been entirely satisfactory. He claims £873 12s. as fair compensation in the shape of fees to the end of 1887, making no charge for the time since he has been a Member of the Legislative Council. He also claims £261 10s. to cover his expenses, and I have authorized the payment of this latter sum as just and reasonable. Mr. Davies informs me, in respect to the first claim, that he frequently attended two meetings of the Board in one day, and that he has sat as late as 10 o'clock at night engaged in business. Unquestionably the work has been very heavy. My colleagues, however, think that the payment of this principal claim for services should be left for the consideration of our successors, chiefly on the ground that the Committee sitting on the Hornsby and Holt-Sutherland Estate roads have not completed their inquiry.

H.P.,
4/1/89.

Minute by The Colonial Secretary.

THE question of fees to Casual Labour Board to stand over, pending inquiry by the Royal Commission.

G.R.D.,
16/2/89.

The Secretary to the Casual Labour Board to The Principal Under Secretary.

Sir,

Casual Labour Board, 82, Goulburn-street, Sydney, 10 January, 1889.

I have the honor to forward herewith, for the approval of the Honorable the Colonial Secretary, vouchers for the payment of expenses and fees to the Chairman and Members of the Casual Labour Board from the 2nd May, 1887, to the 31st December, 1888.

I have, &c.,

THOMAS S. HINCHCLIFFE,
Secretary.

Minute

Minute by The Cabinet.

Casual Labour Board.

THE Cabinet has had under its serious consideration the question of the unemployed and the Casual Labour Board, and it has decided, in view of the evidence given at the Select Parliamentary Committee, and having regard to the unsatisfactory working of the existing Board, to terminate the labours of the gentlemen forming the Board, who will be relieved forthwith.

The Cabinet has further decided to appoint two gentlemen of standing to adjust the accounts and wind-up the Casual Labour business, it being the intention to go further into this subject when time can be given to its consideration, and a full attendance of the Cabinet secured.

It appears to the Cabinet that the method hitherto adopted of distributing large sums of public money is loose, imperfect, and unsatisfactory. The gentlemen to be appointed will be requested, in making payment, to adopt a system more in accordance with that followed in the Treasury Department. The gentlemen to be appointed will close the unemployed work in terms of the minute of my predecessor of 31st December last.

The question of payments to the men now employed will be dealt with on the report of the gentlemen referred to.

Colonial Secretary's Office,
Sydney, 23rd January, 1889.

G.R.D.

Minute by The Colonial Secretary.

SINCE the above was written the Government has decided on and has appointed a Royal Commission, pending the result of which no further action should be taken for paying Mr. Davies.

G.R.D.,
7/3/89.

Minute by The Colonial Secretary.

THE question raised by the minute of Sir Henry Parkes will stand over for further consideration, and may be submitted when the unemployed are finally disposed of.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CASUAL LABOUR BOARD.
(INFORMATION RESPECTING.)

Ordered by the Legislative Assembly to be printed, 21 May, 1889.

[Laid upon the Table of this House in answer to Question No. 1, of 17 May, 1889.]

Questions.

1. MR. O'SULLIVAN asked THE COLONIAL SECRETARY,—

- (1.) How many men are now employed under the direction of the Casual Labour Board?
- (2.) What is the amount per diem paid to Mr. Miles for his services in connection with the Casual Labour Board?
- (3.) The same information with regard to Mr. Mason?
- (4.) What is the salary received per week by Mr. McPherson?
- (5.) How much is paid to Semple, the groom or coachman of Mr. McPherson?
- (6.) What salaries are paid to Messrs. Boylan, Munce, Bell, Bell junior, and Hibble for their services in connection with the Casual Labour Board?
- (7.) Is it a fact that two detectives are still employed in connection with the Casual Labour Board?
- (8.) What rent is paid for the premises occupied by the Board in Goulburn-street?
- (9.) What works are the unemployed still engaged upon?
- (10.) The date of the starting of these works?

Answers.

- (1.) 233.
- (2 and 3.) Nothing has yet been paid to Mr. Miles or Mr. Mason for their services in connection with the Casual Labour Board.
- (4.) £4 10s. per week.
- (5.) Semple is paid 30s. per week, including Sundays, as a labourer in charge of the plant, &c., belonging to the Casual Labour Board at Hurstville.
- (6.) Boylan, 49s. per week, including Sundays; Munce, 30s. per week, including Sundays; Bell, 60s. per week; Bell junior, 30s. per week; Hibble, 60s. per week.
- (7.) Yes.
- (8.) £2 per week.
- (9 and 10.) National Park, started November, 1886; Leichhardt Park, started May, 1888; Sydney University Grounds, started February 7th, 1889; Clearing Liverpool Common, started April 2nd, 1889.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CASUAL LABOUR BOARD.

(EXPENDITURE ON ROADMAKING BY.)

Ordered by the Legislative Assembly to be printed, 3 July, 1889.

[Laid upon the Table of this House in answer to Question No. 12, of 3 July, 1889.]

Questions.

12. MR. WILLIAM STEPHEN *to ask* THE COLONIAL SECRETARY,—Referring to the Commission of Inquiry into the expenditure of money in roadmaking on the Holt-Sutherland Estate and the Hornsby District,—
- (1.) What was the total amount expended in the formation of roads by the Casual Labour Board on the Holt-Sutherland Estate?
 - (2.) What was the total amount expended for a like purpose by the abovenamed Board in the Hornsby District?
 - (3.) What was the whole cost of the inquiry by the Commission appointed to inquire into the expenditure in connection with roadmaking by the Casual Labour Board in the abovenamed localities, specifying the amount of fees which each Commissioner received separately; also, the number of witnesses called to give evidence, and the amount of costs or fees which they each received for attendance during the inquiry, and all other costs in connection therewith?
 - (4.) The cost of the inquiry on account of roadmaking by the Casual Labour Board in each of the abovenamed localities, separately?

Answers.

- (1.) The total amount expended on making roads on the Holt-Sutherland Estate was £3,004 11s. 2d. The total amount expended on the Port Hacking River Road and Illawarra Public Roads, which pass through and beyond the Holt-Sutherland Estate was £10,393 3s.
- (2.) The total amount expended in the Hornsby District was £8,155 6s. 9d.
- (3. and 4.) The Secretary to the Casual Labour Board Inquiry Commission reports that it is impossible to distribute the cost of the inquiry between these two estates. The Commission directed a general inquiry into the working and expenditure of the Board, and into the alleged improper expenditure upon any private properties. The cost incurred, and the witnesses called, had reference to the whole subjects of inquiry. The cost incurred up to date (3rd July, 1889), is £582 15s. 11d., viz. :—

Shorthand-writers	£361	15	0
Secretary	126	8	6
Clerical expenses	43	8	6
Witnesses' expenses	16	12	5
Incidental expenses	34	11	6
Total	£582	15	11

The members of the Royal Commission have not received any remuneration, nor have they yet made any claim.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WORK OF UNEMPLOYED ON ROADS AT HORNSBY AND HOLT-SUTHERLAND ESTATE.

(PETITION FROM J. F. BURNS—THE HOUSE TO APPOINT A SELECT COMMITTEE TO COMPLETE
INQUIRY ON.)

Ordered by the Legislative Assembly to be printed, 6 March, 1889.

To the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Fitzgerald Burns, a Member of the said Assembly,—

RESPECTFULLY SHOWETH:—

1. That your Petitioner is a member of the land firm of Burns, Withers, and Smith, which, in the year one thousand eight hundred and seventy-six, acquired by purchase a large area of private lands in the district of Lane Cove, parish of Gordon, and South Colah, some of which lands are situate in what is now known as the Hornsby District.
2. That there are at least four thousand acres of Crown lands to the eastward of Hornsby with a long frontage parallel to but not adjoining the North Shore Railway which it was the desire of both the Jennings and the Parkes Governments to bring into market for auction sale.
3. That in the year one thousand eight hundred and eighty-six, while the Jennings Government was in office, and while that Government was pressing the sale of Crown lands by auction for purposes of revenue as well as of settlement, application was made to your Petitioner by the Survey Department for permission to make a road through the lands of Burns, Withers, and Smith, from the Peat's Ferry Road across a railway bridge near Hornsby to the said Crown lands.
4. That your Petitioner agreed, on the sixteenth of November, one thousand eight hundred and eighty-six, as expressed by letter of that date, addressed to the Under Secretary of Lands, to give the Government permission to open the said proposed road, provided that it was put in a passable condition for traffic in a reasonable time, and that the Government relinquished their right to open another road through the lands of Burns, Withers, and Smith, further north, which was of no use for such a purpose.
5. That, without any communication from or to your Petitioner, or any of his partners, some of the persons called the "Unemployed," who were under the direction of the Colonial Secretary, and the immediate supervision of Mr. Deering, the Metropolitan District Surveyor, and who had been at work on Crown lands on the western side of the Homebush and Waratah line, were put on to clear and form the said road, and also a road between the southern boundary of the Crown lands and the lands of Burns, Withers, and Smith, to the eastern road.
6. That, as has been proved in evidence, the Casual Labour Board, which was formed by the Colonial Secretary to relieve Mr. Deering of the charge of the unemployed, applied to your Petitioner by letter, on the recommendation of Colonel Wells and Mr. Howison, engineer, both of whom are officers of the Government, for permission to open a road further south than the Boundary Road, owing to its appearing that the Boundary Road could not be constructed throughout unless at great cost, to which application your Petitioner agreed.
7. That after your Petitioner had agreed to the opening of the said road, and to small roads leading thereto from the Boundary Road, his colleagues in the Ministry, at his request, caused an inquiry to be made independently of the Casual Labour Board as to whether the proposed roads were really required for the public benefit; and, in compliance with his wishes, reports on the subject were called for and furnished by Mr. W. C. Bennett, the Chief Engineer for Roads and Bridges, Mr. J. W. Deering, the Metropolitan District Surveyor, and Mr. W. M. Gordon, surveyor, dated the thirteenth February, one thousand eight hundred and eighty-eight, seventeenth January, one thousand eight hundred and eighty-eight, and twenty-eighth January, one thousand eight hundred and eighty-eight, respectively.
8. That Mr. Bennett expressed his approval of the opening of the said roads, stating that all of them would be ultimately required and would enhance the value of the Crown lands. Mr. Deering reported chiefly in relation to the road across the bridge and the Boundary Road, the opening and forming

forming of which he justified, stating likewise that while the clearing operations were under consideration or proceeding "not the slightest communication was received by him from Messieurs Burns, Withers, and Smith," also, "that the work was initiated solely by himself," "solely in the interest of the Crown whom alone he served," and that he only learned that Bellamy's one hundred acres, through which the Bridge Road was made, was the property of Burns, Withers, and Smith, by reason of the negotiations for the survey and opening of the said road, and also that "his only aim was to improve the Crown lands for sale;" Mr. Gordon stated that the roads constituted useful and reproductive works, taking into consideration the proximity of the Crown lands to both railway lines, as well as to such main roads as the Lane Cove, Peat's Ferry, and Pennant Hills.

9. That at the first sale of Crown lands at Hornsby about two hundred and fifty (250) acres were offered by auction on behalf of the Government by Messrs. Richardson and Wrench, of which one hundred and sixteen acres were sold, and realized upwards of four thousand six hundred pounds.

10. That on the fifteenth November, one thousand eight hundred and eighty-eight, a Select Committee of your Honorable House was appointed, on the motion of the Honorable Member for Northumberland, Mr. Thomas Walker, consisting of Mr. O'Sullivan, Mr. Copeland, Mr. Henry Clarke, Mr. McMillan, Mr. Melville, Mr. Street, Mr. Bruncker, Mr. Carruthers, and the mover, to inquire into and report upon the works of the unemployed in clearing, forming, and making roads through the property near Hornsby, owned by Messrs. Burns, Withers, and Smith, and also through those made through the Holt-Sutherland Estate and other private properties.

11. That the said Committee brought up, on the day your Honorable House adjourned for the Christmas holidays, a Report, which it termed a "Progress Report," which it appears was adopted by the Committee on the casting vote of its Chairman (Mr. Walker).

12. That your Petitioner takes exception to certain of the allegations and inferences drawn therefrom, made in the said Progress Report, respecting the expenditure on roads through private lands in the Hornsby district.

13. That your Petitioner takes exception to the statement in the second paragraph of the said Report that some of the roads and streets formed on the estate of Burns, Withers, and Smith appeared on their subdivision plan, and that their construction had been commenced prior to the advent of the Casual Labour Board, inasmuch as it leaves the inference that the roads made through the lands of Burns, Withers, and Smith were in accordance with a plan of subdivision which is not true, the fact being, as has been proved in evidence, that the lands through which roads have been made, consisting of upwards of six hundred acres, had not been subdivided or marked on any plan of subdivision, and that it was not the intention of the proprietors to subdivide the said six hundred acres; while the only expenditure on any subdivision of theirs was a very small amount in roughly extending two or three roads or streets on a subdivision adjoining the railway line a few days before the sale of Crown lands already referred to.

14. That your Petitioner takes exception to the name of Mr. Oliver, the ex Under Secretary for Lands, being coupled with that of Mr. Deering, as condemning the roads at Hornsby as being beyond public requirements, and the superior quality of the work on some of the roads as being chiefly calculated to benefit private individuals. Your Petitioner is aware, as has been proved by the evidence, that Mr. Oliver did not see any of the roads through private lands, and that the superior work about which he expressed an opinion was on the Crown lands subdivision and not on the private roads.

15. That your Petitioner takes exception to the statement in paragraph four of the said Report, as follows:—"The cost of the roads at Hornsby, including the Government subdivision, was nearly seven thousand pounds, whilst the Government subdivision realized only four thousand three hundred pounds at the recent sale,"—which conveys the impression that the cost of the roads in the Hornsby district was seven thousand pounds, and that the Crown lands in the locality affected by the expenditure were worth only four thousand three hundred pounds; whereas, as the evidence of the officers of the Government and of others examined proved that the total of the expenditure for clearing roads, reserves, and the like work, was only six thousand three hundred pounds, and that there are still upwards of four thousand acres of Crown lands for sale, which, in the opinion of competent judges, are worth thirty thousand pounds.

16. That your Petitioner further objects to the paragraph in the said Report in which it is stated that one of the proprietors of the estate of Burns, Withers, and Smith had admitted that their property had been greatly enhanced in value by the construction of the roads. The partner referred to was no doubt Mr. George Withers, who was denied the privilege of amending his evidence before the Report was brought up, but who was subsequently examined on the 15th January last, when he stated that when he was previously examined he had been led to believe that five thousand to six thousand pounds had been expended on roads through the lands of Burns, Withers, and Smith, and that the area held by them in that quarter was one thousand to one thousand two hundred acres, whereas he had since then ascertained that the amount expended on any roads in which they were interested was only about one thousand eight hundred pounds (528); that the lands through which the roads were made did not exceed six hundred and eighty acres, and that the land taken for the roads was worth three thousand six hundred and twenty-five pounds (524); that in his opinion Burns, Withers, and Smith did not obtain any increment in value from the roads, that the roads were very inferior (484) and that his first estimate of increment was based upon representations made in the House by the Chairman of the Committee (Mr. Walker), also upon general rumour (533).

17. That although your Petitioner did not promote or control the expenditure on any of the roads through lands in which he is interested, he has been most anxious to discover whether any of the expenditure has been in excess of public requirements, and whether his estate has been unduly improved by any such expenditure, for which reason he requested that Mr. W. C. Bennett, the Chief Engineer for Roads, and Mr. Gregg, of the firm of Richardson and Wrench, who conducted the Crown land sale, might be examined by the Select Committee, which was refused before the Progress Report was presented to your Honorable House, but both of whom have since been examined and their evidence brought up with a Second Progress Report, of the sixteenth January, one thousand eight hundred and eighty-nine; your Petitioner would invite the attention of your Honorable House to the additional evidence in question. Mr. Bennett, after inspecting the roads in the Hornsby district, stated that in his opinion two thousand pounds would represent the whole expenditure on roads through the property of Burns, Withers, and Smith

(202); that Burns, Withers, and Smith have derived no advantage from the expenditure other than the exceptional position of the land absolutely rendered necessary, because access must be given to the Crown lands, no matter who owns the intervening land (205); that a larger proportion than nine-tenths of the roads are absolutely necessary (244); that he thought the roads were of inferior kind (186); Mr. Gregg also thought the roads were not of a good character (34); that any advantage from the expenditure on the 640 acres was about equalled by the roads being given without compensation.

18. Mr. Dawson has also inspected the roads at the request of your Petitioner, and has furnished a report in which he states that the land given for the benefit of the Crown lands greatly exceeds in value the amount expended on the roads by the Government. Mr. Dawson has also prepared a plan, which shows that the plan put before the Select Committee of your Honorable House by Mr. Deering is misleading.

Your Petitioner therefore prays,—

That your Honorable House will appoint a Select Committee to take further evidence, and complete the inquiry on the Work of the Unemployed on the Roads at Hornsby.

And your Petitioner, as in duty bound, will ever pray.

J. F. BURNS.

1888.

BRITISH NEW GUINEA.

R E P O R T.

I now make my third and last Annual Statement of Receipts and Expenditure on account of the Protected Territory of British New Guinea, from the 1st December, 1887, to the 31st October, 1888. Sovereignty was proclaimed at Port Moresby by Dr. McGregor, the present Administrator, on the 4th of September. A subsequent proclamation in the Queensland *Government Gazette* of the 11th September brought the "British New Guinea Act of Queensland" into operation, and the agreement entered into between Her Majesty's Government and the Government of Queensland is now made effective.

SPECIAL COMMISSIONER.

During the eleven months which this Report covers it has been necessary for me to visit Brisbane, Sydney, and Melbourne more than once in connection with the collection of contributions, the publication of my reports, and the final arrangements consequent on the assumption of Sovereignty. I have also visited all the different points of any importance from the western to the eastern extremity of the Protected Territory, and I am happy to be able to say that during the period here referred to, and since my last report, there has not been a single instance of any serious outrage by the natives against white men, or of white men against the natives. There have been some intertribal disturbances, and cases of what I suppose might be termed native murders have come to my knowledge, but they have been less frequent than formerly, and they have not been such as to call for interference on the part of the protecting authorities. The only difficulty of any importance connected with white men took place on the occasion of Mr. Cameron's visit to the San Joseph River. This arose simply from a misunderstanding, and from the fact that there was no competent interpreter with the party. It resulted in a somewhat precipitate retreat, and in the abandonment of the trade and provisions, but a portion of these was afterwards brought down to the coast by the natives. There has been no period during the last ten years when the relations of the natives to the white men and of the white men to the natives have been on a more friendly or a more satisfactory footing.

Mr. Deputy Commissioner Milman, as hitherto, has been in charge of the Western Division.

Mr. Deputy Commissioner Romilly has been in charge of the Central Division, and Mr. Deputy Commissioner Musgrave has been in charge of the Eastern Division.

Early in the year, in consequence of representations made to me by Mr. Romilly as to some discontent and disturbances among the natives of the Central Division, I visited Port Moresby. I then increased the number of water police by obtaining six acclimatised South Sea Islanders from Mackay, and removed Mr. Robert Hunter from Port Moresby to replace Mr. Frank Lawes, who had been granted three months' leave of absence after a residence at Samarai of twelve months. Mr. George Hunter continued to occupy the Government Station at Rigo, with the supervision of the valley of the Kemp Welch.

Mr. E. G. Edelfelt, having been removed from Motu-Motu to Port Moresby, was afterwards sent to Samarai to succeed Mr. Robert Hunter.

WESTERN

WESTERN DIVISION.

Mr. Milman has exercised a general supervision from Thursday Island.

In reference to this Division, and bearing in mind that it is intersected by several navigable rivers, I must once more state, what I have previously urged, that its great requirement at the present time is a light-draught steamer capable of navigating the shoals on the coast and the inland waters of the Fly, which is the great natural highway to the interior of British New Guinea.

I have been in correspondence with Messrs. Yarrow, of Poplar, and have ascertained that a stern-wheel steamer drawing 2 feet and capable of carrying deck cargo could be built for about £5,000. Such a vessel could, no doubt, be built in Brisbane or Sydney for a sum not much in excess of the London price, and could be towed up to Thursday Island for service in the Straits and on the rivers of New Guinea.

Mr. Milman's brief though interesting report on the condition of the natives at Mowatta (Appendix C), and Mr. Strode Hall's report on the Mai Cussa and Wasu Cussa Rivers (Appendix G), throw some light upon the position of affairs in this District. As regards the Fly and the great deltaic region between the Fly and the Aird, very little is yet known. It promises to be a most interesting field for future discovery. I visited this portion of the coast in April, and finding that a native known as "Mowatta Jack" had been very troublesome and truculent, I deported him for a time to Port Moresby. This compulsory transfer has had a very salutary effect; and "Jack," on his return to Mowatta, broke his bows and arrows, announcing at the same time that he was going to lead a new life. It will be seen by a reference to Mr. Milman's report that there is much need for reformation at Mowatta.

CENTRAL DIVISION.

Mr. Romilly's report (Appendix D) summarises sufficiently the condition of affairs at Port Moresby. The improvements effected during the last few months have been done well and economically. The horses and cattle under the care of Denis Gleeson are thriving, in spite of the very dry season. When I was last at Port Moresby in July only twenty points of rain had fallen since the 1st of January. This terrible drought continues up to date, and the consequence is that fully one half of the cocoanut palms and the fruit trees planted last season are dead. This drought appears to extend to the west of Port Moresby, but not so much to the eastward. Nothing like it has been experienced since the country has become known to us.

EASTERN DIVISION.

Most of the pearl-shelling boats which had visited the Louisiade Archipelago last season have now returned to Thursday Island. There is plenty of shell to be had but it lies in too deep water, and the divers cannot stand the pressure. A fair amount of shell, however, has been obtained in China Straits and in Fortescue Straits. Copra still comes in small quantities from Milne Bay.

I found it necessary to decide the question as to the locality where a permanent Government Station should be formed in this division. I finally fixed on Samarai or Dinner Island. The choice lay between China Straits, South Cape, and Teste Island. The late Special Commissioner, Sir Peter Scratchley, was understood to be rather in favour of South Cape (Su-a-u), and he purchased some land there from the natives for the purpose; Mr. Deputy Commissioner Musgrave was in favour of Teste Island, as being likely to prove more healthy and as being inhabited by an intelligent seafaring population who had relations with many of the neighbouring islands. After a full consideration, however, of the whole case, and after a thorough examination of the different localities, I felt bound to decide on China Straits as being the most central, and as providing the best anchorage. The question then lay as to what position in China Straits it was best to choose. I had purchased the Island of Quato from the natives, and the London Missionary Society had, so far as they could obtain a title at all from the natives, acquired Samarai or Dinner Island. This latter place was resorted to by traders; a coal depôt for Her Majesty's ships had been established there, and it was regarded by the natives themselves as a general rendezvous. From the

fact

fact that it was specially resorted to by white traders it had become less eligible as a centre of missionary enterprise. I therefore entered into negotiations with the representatives of the London Missionary Society with a view to transfer their interest, whatever it was, from Samarai to Quato, in order that the Government of the Protectorate might have the undisputed possession and occupation of Samarai. Mr. Lawes and Mr. Chalmers recognising the position of affairs, and especially in view of the fact that the island had ceased to be for them an advantageous *point d'appui*, considerably arranged to remove their establishment to one of the neighbouring islands, and accepted from me a transfer to them of the Island of Quato in exchange. I then entered into sole and undisputed possession of Samarai. The Island has since then been surveyed. An excellent residence has been erected on one of the highest points of the Island at an elevation of about 200 feet above the sea-level, and various improvements have been carried out in the way of drainage. The building of the house caused a great deal of wonderful attention to it on the part of the natives, and many hundreds came from distant localities to see it. The officers resident in China Straits may now, I hope, live under conditions favourable to good health, and the Island itself may, I think, by the judicious expenditure of a few hundred pounds in addition to what has already been done, be made as healthy as any locality which could be chosen in China Straits. The amount of rainfall is very considerable, and when there is much rain there are sure to be malarious exhalations after the rainy season, but I do not think that Samarai is likely to prove exceptionally unhealthy. The Island, though only 40 acres in area, is very fertile, contains high land, and will provide all the space which is likely to be required by traders for some years to come. The native inhabitants of the neighbouring islands and the mainland immediately opposite are intelligent and interesting. Many of them can be found who will do a fair day's work for what they consider a fair day's wage. Milne Bay in the vicinity of Samarai is a populous District, and one which at no distant time is likely to be resorted to by white men. An interesting excursion for explorers would be to connect the head of Milne Bay with the head of Mullins Harbour. The neck of land which separates them cannot be more than 15 miles across and there does not appear to be any high land intervening.

The discovery of gold at Sudest was made in June, and came about in the following way:—David Lindsay White, who had been engaged in pearl-shelling at Coral Haven, applied to me in April last, at Thursday Island, for a protection area to secure him in the possession of certain gold-bearing reefs which he asserted that he had discovered on Joannet Island. My reply to him was that I could not secure to him any rights, but that I would recommend his application for favourable consideration when Sovereignty was proclaimed, and that, in the meantime, if he discovered anything I would be guided by the usage of the Queensland Gold-fields. He came with me to Cooktown, and having obtained assistance there from several enterprising citizens, he organised a party to go to the Louisiade. I chartered to him, at the rate of £10 a month for three months, a small cutter named the "Juanita" which I purchased at Cooktown for the Protectorate, arranging with Whyte that it should be delivered to me at the end of the time at Samarai.

The party were not successful in finding payable reefs on Joannet, but came on alluvial gold in the bed of the Runcie, a locality which I had visited the year before and which I recommended them to try. This discovery has led to several hundred men going to Sudest. It is as yet uncertain whether a really payable gold-field exists, but there can be no doubt that gold is to be found in various localities in New Guinea. Coal is also said to have been found, though I have not myself seen any traces of it.

APPLICATIONS FOR LAND.

I have at various times during my tenure of office had applications for land in British New Guinea from persons who either professed to be desirous to embark in schemes for the settlement of the country or who conceived that their services as explorers entitled them to reap some reward in this form. I have invariably replied that I had no power to make grants or to confer any special immunities of this kind, and I have drawn attention to the notifications which have from time to time appeared to the effect that no purchases of land from the natives except those made through the Government would have any validity; but I have at the same time stated that these applications would be referred to the Administrator when appointed.

The

The first application of this kind was from a London syndicate which appeared to have no further knowledge of the country than that which was derived from the very imperfect geographical data available.

The second was from Mr. John Strachan, a master mariner of Sydney.

The third was from Mr. H. C. Everill the leader of the New South Wales Geographical Society's expedition to the Fly.

The fourth was from Mr. Theodore Bevan, and in addition to these I have received several applications of a minor character based on personal claims to recognition.

With regard to Mr. John Strachan's application, he has stated that he was promised concessions in writing by my predecessor, Sir Peter Scratchley. I can only say that I am not aware that any such promise was made—no such letter was ever shown to me, and I do not believe that any promise of the kind was made, either verbally or in writing. John Strachan's claims on account of discovery are, moreover, very doubtful.

The Mai Cussa or Baxter River, which forms by its bifurcation what this discoverer has been pleased to call Strachan's Island, was navigated and defined by Mr. Chester under instructions from me when I was Colonial Secretary of Queensland in 1877. Strachan's so-called explorations and definitions, subsequently made in 1885, have been proved to be gravely in error by Mr. Strode Hall, who was despatched by me in April last from Thursday Island in order to ascertain whether the statements made were correct (Appendix G). Nevertheless, if Mr. John Strachan can find men and money to form a settlement on the Mai Cussa, I see no reason why he should not have a slice of land in that locality. There are hardly any natives on Strachan Island, and they are in mortal terror of their lives from the Togari pirates. If, therefore, Mr. Strachan would undertake to keep off the Togari people from the westward he might be of great use to the New Guinea tribes, which have been decimated by these marauders, and I feel disposed, with my knowledge of the country and its inhabitants, to recommend that his application should be favourably entertained, always taking care that no large monopoly should be granted, and that the native rights, such as they are, should be carefully respected.

The next application which I have referred to is that of Mr. H. C. Everill on behalf of several influential capitalists who state their willingness to take an active interest in the colonization of New Guinea. Mr. Everill, no doubt, did good work in the exploration of the Fly and the Strickland in command of the New South Wales Geographical party, and judging from his papers appears to have had large experience in tropical agriculture. There are great stretches of country on the Fly unoccupied by the natives, and if these can be pointed out and defined, I cannot see any reason why some inducements should not be offered to people to go there, if they are prepared to risk their health, their lives, and their money in these pursuits. It is just a question of *bona-fides*. There can be no reason why British New Guinea should not be colonised, always provided that the rights of the native inhabitants are respected. When once a recognised government has been established it should be possible to discriminate and adjust, and I see no reason why this should not be done. It has been proved to be possible in British Borneo, and what has been done there may certainly be done in British New Guinea. If, therefore, Mr. Everill is prepared to find men who will expend their lives and their enterprise on the watershed of the Fly or the Aird, I cannot see why he should not be permitted to do so. The deepest darkness of savagery overhangs that region now, and why should not the light of commerce and civilization be let in upon it? I know that Mr. Everill spent many months in England in connection with this application, and that he received great encouragement from the Colonial Office in response to my recommendations. He was assured, I am informed, that his proposals would be favourably entertained when a decision had become possible, after the proclamation of Sovereignty. A letter has been forwarded to me by Mr. Everill signed by several influential and responsible business men in London indicating the support he was likely to receive there and the amount of money which it is anticipated could be raised there for expenditure in New Guinea, if a concession of unoccupied land could be obtained. I myself see no chance of any improvement in the western portion of British New Guinea except in some such way as this.

The

The last application I shall refer to is that of Mr. Theodore Bevan, who considers that his services as an explorer ought to be recognised by a grant of 254,000 acres. This is an estimate very much beyond what I am disposed to think would be an equivalent for the discoveries made by that gentleman, though I willingly admit their importance. Nor ought it to be forgotten that a large share of the honor attached to them should be credited to Messrs. Burns, Philp, and Co., who supplied the steamer employed in the service and who bore a large proportion of the cost of the outlay. These are considerations which ought, I think, to be borne in mind if the claims thus made are seriously considered by the present Administration. That they should in some way be recognised I do not doubt, if their recognition can be made to serve towards the opening out and civilising of the country at the head of the Papuan Gulf. Experience in other countries, however, has amply proved that the granting of land apart from conditions of settlement and a real equivalent obtained in some form of value is the most fatal impediment to future improvement. It would be the same in New Guinea, and though I do not think there are any valid reasons against the moderate alienation of land where there is so much which is of no utility whatever to the natives, care should be taken to secure some real equivalent in settlement and civilization.

MISSION WORK.

There has been a healthy expansion of Mission work during the past year on the part of the London Missionary Society.

The Rev. Mr. Pierce has gone to live at Kerepuna. All the preparatory arrangements have also been made for Mr. Chalmers to reside at Motu-Motu, a station from which the important tribes inhabiting the country at the head of the Papuan Gulf can be approached much more readily than from Port Moresby. I am happy to say that the Rev. Mr. Savage, from Murray Island, has also established some new Stations on the Fly. There is unlimited scope in that district for missionary enterprise. At the east end there is no resident white missionary, and until there is there will be no advance in Mission work. I regard Milne Bay as a hopeful field for the work of an intelligent white missionary, and Killerton would be a suitable place, I think, for him to reside.

The French Catholic Missionaries at Yule Island are likely to be useful pioneers. Members of the Fraternity have explored the San Joseph River, and the first difficulties connected with the establishment of the station have been overcome. I visited them in July, and found them all in good health. Father Navarre, who lately visited Rome in order to receive episcopal consecration, has now returned, bringing with him both sheep and cattle. The relations between the two Missions are perfectly friendly at present, and I see no reason why they should not continue to be so. Where British Sovereignty and Supremacy exists perfect toleration is guaranteed. There will be a fair field and no favour shown; and if there is rivalry, as there will be, it ought to be of the kind which strives how best to illustrate the virtues of Christian charity.

MAIL CONTRACT.

Early in January, Messrs. Burns, Philp, & Co. gave me notice, under the terms of their contract, that they proposed to terminate their mail contract in July. They had been originally induced to undertake this contract in the hope that the regular service of the steamers along the coast might lead to some settlement and to the opening out of new channels of commerce. Mr. Burns visited England last year, partly with the intention of forming a trading company for New Guinea, and there is no doubt that money amply sufficient for such an enterprise would have been forthcoming, but there was then much uncertainty as to the proclamation of Sovereignty, and this being in suspense no company was formed. It is possible that the proposals then contemplated may be revived now that Sovereignty has been proclaimed. Nothing is likely to conduce more to the benefit of the natives or to the security of those who may be induced to settle on the coast of New Guinea than regular steam communication. Messrs. Burns, Philp, & Co. made a spirited effort to open out a trade, and they lost money, I know, in making the attempt. Circumstances were somewhat against them, and the long delay in the proclamation of Sovereignty was discouraging to those who were willing to invest money in

in New Guinea enterprise. The discovery of gold, however, taken in connection with the establishment of a recognised Government, is now certain to direct fresh attention to the means of communication along the coast, and I am not without hopes that either Messrs. Burns, Philp, and Co., or some equally enterprising firm, may be induced to enter the field once more. On receiving notice of discontinuance from Messrs. Burns, Philp, and Co. I called for fresh tenders. No eligible offer was received, and I then entered into an arrangement for a monthly service by a top-sail schooner—the “Lucy and Adelaide.” This contract is for six trips from Cooktown to Samarai, and Port Moresby, returning to Cooktown, a subsidy of £80 being paid for each trip.

So far the service has been well conducted, the schooner making the round trip in about thirteen days, but this regularity cannot be expected to last after the north-west monsoon sets in. As regards the carrying out of the Mail Service during the eighteen months it was in operation, I was on the whole perfectly satisfied with the manner in which it was conducted. There were occasional delays, and there was one complete break down, but having regard to the exceptional nature of the service and to the small subsidy paid I have no reason to complain. I regret that it resulted in a money loss to the contractors, for the cessation of the service is likely to prove a discouragement to enterprise on the coast, but I trust that it may be revived under more hopeful circumstances.

MELBOURNE EXHIBITION.

An interesting collection of objects of Natural History and of Ethnographical Art connected with New Guinea was made for the Melbourne Exhibition.

These were forwarded through the Queensland Commissioners, who kindly agreed to see that they were properly shown.

It was found, however, that the space available for Queensland was limited, and that it was not sufficient to admit of the New Guinea exhibits being advantageously displayed.

It was arranged, therefore, that they should be removed to an annexe allotted specially for the purpose, and Mr. W. C. Lindt, who had been appointed by me to act as an honorary commissioner on behalf of British New Guinea, kindly undertook to supervise the Court, which was fitted up with taste and attracted some attention.

CONTRIBUTIONS.

A statement will be found at page 15 (Appendix B) of the sums contributed by the Australian Governments to the Government of the Protected Territory. The proportionate amounts paid by the several Governments were estimated on a population basis fixed in 1885, and adhered to subsequently. A deficiency arose in the annual subsidy of £15,000, in consequence of the withdrawal of South Australia from the number of the contributing Colonies. Victoria and Queensland having originally agreed to guarantee the stipulated amount, I felt bound to look to them as guarantors as long as the provisional arrangement was in force. The Government of Victoria, however, held that the guarantee only applied to the first year, and that it did not refer to any subsequent period. Queensland recognised the obligation so far as the terms of the Act of Parliament permitted. These prescribed that “A sum bearing the same proportion to the sum of £15,000 as the population of Queensland bears to the total population of the Australasian Colonies which for the time being contribute towards such expenses should be paid to the maintenance of the Government.” An amount of £297 13s. 8d. has, accordingly been received from the Government of Queensland, and this represents the proportionate amount required to make up the deficiency. The correspondence arising out of these claims led to the expression of a difference of opinion between the Government of Victoria and myself. Mr. Gillies regarded some statements I had made as imputing a breach of faith to the Government of South Australia. I could not myself regard it in any other light, though I regretted that expressions I had made use of should have caused any feeling of soreness on the part of Victoria, a Colony which had always faithfully and promptly responded to my requisitions. Nevertheless, the fact could not be disputed—South Australia by its Legislature had passed very strongly worded resolutions requesting Her Majesty’s Government to
annex

annex New Guinea. The delegated representatives of South Australia, afterwards, in combination with the representatives of the other Australian Governments in conference assembled, pledged themselves by resolution to find the means to carry out this annexation, and to pass Acts of Parliament securing the subsidy. Yet, after accepting this responsibility for two years, and without consulting the Legislature, the Government of South Australia discontinued its payments.

This capricious action of a passing Administration I have not hesitated to characterise as it deserves. It became my duty to endeavour to obtain a recognition of this deficiency from the concerting Colonies, and to secure from them the means to make up the stipulated amount. I corresponded with all the Colonies on the subject. Queensland met the matter in the way I have stated. Mr. Gillies, the Prime Minister of Victoria, addressed a letter to Sir Henry Parkes, of New South Wales, and agreed to be guided by the decision of Sir Henry Parkes.

I received an assurance from Sir Henry Parkes that he would communicate with Mr. Gillies, and come to a settlement one way or another. I regret to say, however, that this intention was not carried out, and no settlement was arrived at. I am obliged, therefore, to enter the short payments on account of South Australia as unsatisfied. Whatever steps may be taken hereafter to make up this deficiency, I feel bound to record it. It seems to be specially unfair to those Governments which have honorably kept their word that any one of the number should have declined to recognise its obligations without consulting Parliament, and without also consulting the Colonies with which it had entered into engagements equally binding on all.

Short payments, amounting in the case of New Zealand to £667 4s. 8d., and in the case of Western Australia to £40 9s. 2d., are also recorded, but those only refer to the last quarter, from 1st June to the 31st of August, for which no demand has been made.

The balance to credit of my account on the 31st October, amounting to £1,397 2s. 5d., has been transferred to the public account of the Administrator of British New Guinea.

MORTALITY AMONG THE NATIVE TEACHERS.

Mr. Deputy Commissioner Musgrave has supplied me with a memorandum on the mortality of the native teachers. The reasons which led to that exceptional mortality have now to a great extent passed away. They were incidental to the first occupation of the country. Similar exceptional mortality has at times prevailed on the coast of Queensland.

I quite agree with Mr. Musgrave that a fitting monument should be erected at Port Moresby to those who laid down their lives as the early pioneers of Christian missionary enterprise in New Guinea. A sum of £300 might with great propriety be set apart for this purpose from the amount handed over by me to the Administrator.

TRADE OF NEW GUINEA.

A paper by Mr. Musgrave dealing with the trade and resources of New Guinea will be found in Appendix F. It contains much valuable information. The natural resources of New Guinea are no doubt very considerable. Its contiguity to Australia renders it certain that these resources will some day be adequately dealt with.

The real question is—how is it to be colonised—by what race, white or black?—It is a tropical country, intensely tropical.

Hitherto tropical countries have been regarded as the home of the dark races. Australia, however, declares that tropical Australia is not for the dark races, and if this be so it may be concluded that British New Guinea, being now an appanage of Australia, is destined ultimately to be the habitation of a white race. This is at variance with all our previous colonial experience, but it has not yet been proved to be at variance with natural laws. It may be hoped, however, that the analogy and example of the West Indies referred to by Mr. Musgrave will not be followed, for they add nothing to our strength as a people, and they count for little in an estimate of either our national or our imperial resources. The immediate value of British New Guinea to Australia at the present time is the strategical advantage which the possession of the south coast gives us. Along that coast line, from Hall Sound to Pitt Bay, there is a series of magnificent natural harbours. It

It is well both for British and Australian interests that the British flag flies on that coast.

The ten years of administration which are provided for under the Act now in force will see great changes in British New Guinea, and if during that period it should appear that £500,000 is required from the associated Colonies of New South Wales, Victoria, and Queensland, instead of £150,000, I am very confident that the expenditure will be well repaid in the development and preparation for settlement of a very fine and a very interesting country.

It has been a source of some honest pride to me that I have been permitted to have a share in giving effect to the first imperfect forms of administration.

I beg to tender my grateful thanks to those officers who have acted under me in Her Majesty's service during my term of office, and who have aided me effectually in the discharge of my duties.

JOHN DOUGLAS,
Her Majesty's Special Commissioner.

Brisbane, 31st October, 1888.

JOHN DOUGLAS,
Special Commissioner.

CERTIFICATE OF AUDIT.

I hereby certify that I have examined the Accounts of the Protectorate of British New Guinea for the period between the 1st December, 1887, and the 31st May, 1888, amounting on the Debit side (including the sum of £4,050 10s. balance brought forward) to £9,700 3s. 11d., and on the Credit side to £7,021 16s. 11d.; and find that all sums received have been duly brought to account; and that the several payments made have been correctly computed, and are supported by duly certified and acquitted vouchers.

The Colonies of New South Wales, Victoria, and Queensland have paid their contributions in full to the 31st May, 1888. New Zealand, Tasmania, and Western Australia have each paid to the 31st May, 1887, only. South Australia has not contributed since the 1st June, 1886; but Queensland, in addition to her own contribution, has paid £132 6s. in each of the Financial Years 1886-7 and 1887-8 towards making good the Grant withdrawn by South Australia. No other Colony has similarly contributed.

Department of Audit, Queensland,
Brisbane, 9th June, 1888.W. L. G. DREW,
Auditor-General.

Special Commissioner.

CERTIFICATE OF AUDIT.

I hereby certify that I have examined the Accounts of the Protectorate of British New Guinea for the period between the 1st June and the 3rd September, 1888, inclusive, amounting on the Debit side (including the sum of £2,678 7s. balance brought forward) to £8,852 5s., and on the Credit side to £7,455 2s. 7d., and find that all sums have been duly brought to account, and that the several payments have been correctly computed, and are supported by duly certified and acquitted vouchers. This account is now finally closed, the available balance, viz., £1,397 2s. 5d., having been transferred by the Special Commissioner to the present Administrator, the Honorable Dr. Wm. Macgregor.

The Colonies of New South Wales, Victoria, Queensland, and Tasmania have paid their contributions in full to the 31st August, 1888. New Zealand and Western Australia have paid to the 31st May, 1888. South Australia has not contributed. Queensland, in addition to her own contribution, has paid £33 1s. 6d. during the period under Audit towards making good the grant withdrawn by South Australia.

Department of Audit, Queensland,
Brisbane, 31st October, 1888.

W. L. G. DREW,
Auditor-General.

APPENDIX B.

PROTECTORATE OF BRITISH NEW GUINEA.

STATEMENT showing the CONTRIBUTIONS IN AID due from and made by the several CONTRIBUTING COLONIES for the FINANCIAL YEARS ended 31st May, 1885, 1886, 1887, and 1888, respectively, and for the QUARTER ended 31st AUGUST, 1888.

APPENDIX C.

DEPUTY COMMISSIONER MILMAN to THE SPECIAL COMMISSIONER.

Sir,

Government Residency, Thursday Island, 31 August, 1888.

I have the honor, in compliance with your Excellency's request, to furnish you with the following short supplementary report on the western portion of British New Guinea. Though I have only been able to pay one visit this year to the mainland I have been in constant communication with people who have had better opportunities of observing than I have had.

As regards the extreme western boundary, the expedition of Mr. Strode-Hall up the Wai-Cussa and Mai-Cussa Rivers points to the conclusion that in the immediate neighbourhood of these rivers the country is very sparsely populated. This I attribute to the fear of the Dogari or Togari pirates, who keep the inhabitants of the southern shores in a constant state of dread during the months that they infest the coast. These people should certainly be checked, and the only way to do so would be for a party to lay wait for them at Dauan, where information could be obtained of their approach at the commencement of the north-west monsoon. Boigo (Talbot Island) still remains deserted on account of the Togari pirates, the few remaining natives having settled permanently at Dauan (Cornwallis Island). They are a quiet, peaceable sort of people, and I prefer them to their neighbours of Saibai.

As regards the Saibai people, I have at last induced them to make and bring in for sale here the mats they manufacture so neatly. I have found a ready sale for them, and I trust that in this way a small industry may be regularly established. I look upon the Saibai people as belonging to New Guinea, though they are really Queensland subjects, and it should be the endeavour of future administrators to encourage small industries as much as possible both here and elsewhere. They get a little *bêche-de-mer*, but not as much as they ought, considering that they have a good cutter which has been given them by the Government.

I am glad to say that I have found a safe passage to Mowatta by keeping near to the east end of Saibai, and getting within 3 miles or so from the New Guinea coast before steering eastward for the mouth of the Katow River. In only one place did I get less than 2 fathoms, and I think that even this shallow spot might be avoided. On my last visit I anchored in 6 fathoms about a mile off the village of Mowatta, and had no difficulty either in landing or in returning to the "Albatros." The village at Mowatta has been greatly improved since I visited it last year. Nearly all the natives now wear clothes; formerly even a shirt only was quite an exception. This change is entirely owing to the fact that many of the men are now willing workers in the *bêche-de-mer* fisheries. Several boats are now worked from Mowatta, and are manned entirely by Mowatta natives; they are doing well. The chief matter is to see that the natives get fairly paid for their work, and I would suggest that an agent be appointed to see that this is done. All engagements and discharges should be made before him. For this purpose I have temporarily authorized Mr. Edward Beardmore to exercise a certain amount of supervision over the trade and the natives engaged in it, and I have instructed him to report to me occasionally. I believe that Mr. Beardmore might with propriety be permanently appointed. He gets on well with the natives, does not interfere with their women, and he has shown himself very willing to carry out any instructions I have given him.

Previous to my last visit to Mowatta I had heard that the younger chief Gamia was in the habit of brutally ill-treating the women. This has caused great discontent among the people, and he has virtually lost all authority over them. On my visit to Mowatta I practically deposed Gamia, and gave my recognition to the other chief Gabia, by presenting him with a staff of authority from Queen Victoria. I also transferred the custody of the flag to him, and in the presence of the assembled people I told them that I should henceforth recognize Gabia as head chief, and that I should look to him in future to keep order in the village. They all appeared to understand what I had done, and to be content with it. I arranged also with Gabia that he was to build a native house for "Government" to come to when they were visited by anyone in authority. In payment for this I left 10 lb. of tobacco with Mr. Beardmore. I further addressed Gabia and told him that he must do his best to put down the hideous practice of sodomy, which is carried on most extensively, and almost openly, young boys being initiated in the practice formally at a certain season of the year. It is probable that this abominable habit is not confined to Mowatta.

During my visit a large number of natives came off to the "Albatros," and were astonished at the practice made by the Nordenfeldt at 1,500 yards.

A missionary teacher is now stationed at Mowatta, but he is a weak specimen, and will have, I fear, but little influence over the natives. The Rev. E. B. Savage has been up the Fly lately to Soomioot, and reports the natives as quiet and well. He also reports that the Keiwai people are more hopeful than they were. He has established a teacher at a large village on the eastern side of Keiwai Island. He speaks well of these people. He proposes on his next visit to the Fly to go as far as Abru, the large village visited by Mr. Cholmondeley and myself last year. He intends further to take Karossa with him, and will try to bring Papina, the chief of Abru, into Thursday Island. I think that much good may be done by bringing some of the principal chiefs across the Straits, so that they may see our houses and some of our big ships.

A bird-shooting party penetrated inland a short time since from Mowatta to about the same distance as that reached by Captain Cole last year. They report that the natives were quiet and friendly. I believe that the same party, though unknown to me, have gone out a second time on a prospecting expedition.

In conclusion, I should wish to point out that if the natives were regularly visited much good could be got out of them by fostering their small local industries and teaching them new ones. The dread of these Togari people, I must repeat, keeps them in a most unsettled and unsatisfactory condition.

I must add that the deportation of "Jack" to Port Moresby under your Excellency's personal instructions, and his brief period of enforced retirement there, has had a most salutary effect on the people of Mowatta. On his return from Port Moresby he burned his weapons, and announced that he was going to lead a new life, following the ways of peace.

The

The system of appointing a few policemen at each place, one which I have found work well in the islands of Torres Straits, might, I think, be adopted at Mowatta and at other places in New Guinea.

A separate code of punishments might be drawn up for the offences most rife at each place, and the chief should be held responsible for giving effect to them.

I was accompanied on my last visit to Mowatta by Professor Haddon, who has come out from England to report on the marine zoology of our coral reefs. He was much interested by what he saw, and I am pleased to know that he thought highly and hopefully of the first Papuans he has seen.

I am, &c.,

HUGH MILMAN,

Deputy Commissioner for the Western Division of New Guinea.

To the Special Commissioner for British New Guinea.

APPENDIX D.

DEPUTY COMMISSIONER ROMILLY TO THE SPECIAL COMMISSIONER.

Sir,

Cooktown, 11th September, 1888.

I have the honor, in compliance with your request, to forward you herewith a detailed statement of the work done during the term of my residence at Port Moresby.

After spending some months in the eastern part of New Guinea I handed the "Hygeia" over to Your Excellency, and at the beginning of November, 1887, took up my residence at Port Moresby, where I remained until the beginning of September this year. For the first two or three months there were no means, owing to the want of money, of doing anything of consequence, except keeping the natives quiet. These, generally speaking, are coastal tribes extending as far to the eastward as Aroma, and as far to the westward as Motu-Motu. All the landing places, villages, and districts between these two points I visited in the cutter "Maino." During the whole term of my residence at Port Moresby there was no disturbance of any sort. There were the ordinary native reports of fighting and quarrelling among themselves, but these disputes were not worth interfering with, and, in fact, I had no means of stopping them.

As regards the actual work done, the following are the particulars:—From the 19th to the 26th January the men were employed putting up a flagstaff at the Government Bungalow, and the necessary timber was got, with great trouble, at a place called Manu-Manu, about 36 miles from Port Moresby. On the 31st January I started in the cutter on a visit to the districts to the eastward, which lasted until the 7th February. I found everything quiet. From the 7th to the 25th February the men were employed getting timber for fencing in the land bought by the Protectorate Government. After Your Excellency's departure for Cooktown on the 24th February I commenced making improvements in Mr. Edelfelt's cottage, and building a verandah, store-room, and kitchen. On the 5th March I began painting the Government Bungalow, and on the 9th March I began building a bath-room off the kitchen. On the 17th March I took over four additional hands, engaged by Mr. Musgrave in Queensland. On the 21st March the bath-room was finished, and I began connecting the bungalow with the bath-room and cook-house by a covered passage. On the 23rd March the painting was finished. On the 26th March I sailed in the "Ellangowan" westward to Motu-Motu, visiting the intervening districts. I called at the French Mission at Yule Island, and while there ascertained that the natives who had molested Cameron's party up the St. Joseph's River had not intended to do them any harm. They simply, like most natives, could not resist their habit of pilfering, and as a proof of their good will sent bags of rice and other trade which they had stolen, down to a coast village 50 miles away, to lie there until the owners should take it away. This is a course of action I never knew natives take before. On the 31st March I got to the village of Motu-Motu, where my reception by the natives was of a very gratifying character. On the 2nd April I returned to Port Moresby. I found that the boat-house, a very frail structure, had been blown down, and on the 4th April started to build a new one. I commissioned Mr. Cameron, a well-known Queensland surveyor, to survey the Badili land, which had been purchased by the Protectorate, and on the 11th April he completed his work. On the 12th April the Motu-Motu trading fleet arrived at Port Moresby. It consisted of eleven "lakatois," or trading canoes, and their crews, numbering some 300 men, came to the bungalow to return the visit I had paid them at Motu-Motu. Mr. Edelfelt had brought back the chief's baton of office, the man with whom Commodore Erskine had left it having died. I now presented it to Hori, in the presence of the whole of his tribe. Before doing so I asked the assembled tribe, "Is it your wish that I should give this stick to Hori?" And they all cried out, "Hori! Hori!" On the 14th April I sent out a shooting party to collect specimens, birds of paradise, &c., for the Melbourne Exhibition. On the 18th April I began improving the road from the beach to the bungalow, which was in a very bad state indeed. On the 19th April I began building a solid stockyard, as the old one was in a bad condition. The site selected by yourself is at the corner of the old and new paddocks. Towards the end of April there appeared to be an epidemic of malarial fever here. On the 15th May I appointed my old servant Charles Kowald, caretaker, at £8 a month, of the accommodation house at Ela, which had been occupied by De-Raeve, the recent lessee of it. On the 24th May, the anniversary of Her Majesty's birthday, I dressed the flagstaff, and had the whole of the population of the village up to the bungalow. I informed them of the fact that it was Her Majesty's birthday, and gave each person two pannikins of rice, one stick of tobacco, and a biscuit. There were 800 natives present on this occasion. On the 29th May the fence round the Government property was finished. It is about 2 miles in length. On the 30th May I engaged Neil Anderson, an Islay man, as mate for the cutter, at £9 a month. In the middle of May a prospecting party went up the St. Joseph's River, but returned in the middle of June without having found more than the colour of gold. On the 22nd June Mr. Cameron began to survey the road through the Badili land, and I sent some of my men with him to put pegs in and otherwise help him. On the 29th June I sailed to Kabidi, to the westward, to visit the inland villages there. Crossing the Kido bar our boat was upset. There were twenty-two persons in her, including two women,

women, and a child a year old. We lost everything, my own property, which included eight guns and rifles, being worth about £200. However, we all reached the beach safely. On the 23rd July, in accordance with instructions, I commenced forming the Badili road, following the contoured track marked by Your Excellency round the hill from Ela beach. It is about a mile and a-half in length, and will for the future be the principal road inland. On the same day I put another gang of men on cleaning out the waterholes, and laying down pipes to them from the springs. On the 24th July I sent the cutter away to cut mangrove timber for renewing all the beacons in the harbour. On the 30th July I started a new tract to intersect the Ela track. Kerr, the master of the cutter, with his men was then working at the beacons in the harbour, and a gang of men was employed at the waterholes. On the 2nd August I started another dam out at Ela. The harbour beacons and both tracks were finished on the 4th August, and on the 8th August the principal dam, estimated to hold 140,000 gallons, was finished. On the 20th August fencing in the native reserve was completed, the fence being all new. On the 23rd August I started refencing the cemetery, as the old fence was tumbling to pieces, and on the 1st September this work was finished. On the 3rd September the yearly fleet of trading canoes, fifteen in all, sailed from Port Moresby westward, and on the 4th September the "Opal" came in. Dr. Macgregor read the commission, and my term of office under the Protectorate came to an end.

I have, &c.,
HUGH H. ROMILLY.

His Excellency the Special Commissioner for British New Guinea.

This Paper is published at Mr. Musgrave's request.—J.D.

APPENDIX E.

MEMORANDUM ON THE MORTALITY OCCURRING AMONGST POLYNESIAN TEACHERS OF THE LONDON MISSION SOCIETY IN BRITISH NEW GUINEA, AND THE ALLEGED DANGEROUS UNHEALTHINESS OF THE TERRITORY.

The accompanying returns, copies of extracts, &c., which together form an Appendix herewith yield almost sufficient information to prove that the alleged dangerous nature of the New Guinea climate as exemplified by the deaths of mission teachers, is still a question *sub judice*, since, if the testimony of impartial witnesses quoted is to be received, it implies that the exceptional death rate among the teachers is to be explained by their having been often placed in exceptional positions, and having been subjected from time to time to exceptional privations.

After being associated with British New Guinea, however, for three years, and having given my best efforts to obtain all *facts* possible, without being unduly influenced by strong statements or hastily drawn inferences, a few additional remarks may tend to correct certain conclusions on the question of the *presumed insalubrity* of British New Guinea, as suggested by numerous deaths of Polynesian mission teachers. In making them I shall studiously avoid any that appear of a controversial character. The subject of the sanitary conditions of nearly 100,000 square miles of valuable territory (to be presently added to Her Majesty's dominions) is of so much intrinsic interest and importance that it must negative the idea of any such intention; and it is, of course, indispensable, in respect of the future settlement of the country, that definite views should, if possible, be formed both for administrative and politico-economical reasons.

2. The explanation of my obtaining the returns herewith (*Appendix I*) was noted by me under date 13th January, 1886, viz. :—

"The history of my getting the detailed returns of teachers and their deaths is as follows:— Before the late Special Commissioner* left Port Moresby for his first cruise to the eastward, I suggested to him the propriety of erecting a simple monument to the memory of the teachers who had lost their lives in the service of the mission before the proclamation of Her Majesty's Protectorate; and that the tribute should be made at the expense of the Government. It would have been both a deserved memorial to those who had lost their lives in a worthy cause and, to a certain extent, a recognition of the assistance which has been freely given to the officers of Her Majesty's Civil and Naval Services in the territory by the local mission.

"The present cemetery in Port Moresby (a small one) is full of the graves of mission teachers and their wives; nor is there any (not the commonest) kind of headstone or board to mark their several graves. For this reason (and the site of the cemetery being in the natural line of a street, running parallel with the beach road) His Excellency proposed to close it as a burial ground at once, and enclose and turf it as a public square instead, at a moderate cost, placing the teachers' monument within the square. This latter was to carry the simplest and briefest inscription of the name of each teacher, and the date of his death and that of his wife."

My allusion to an obelisk in the annexed copy of my letter (*Appendix II*) to the Rev. Mr. Lawes, will thus be understood as referring to a proposed memorial monument to the several teachers who had lost their lives in British New Guinea. The late Sir Peter Scratchley had fully approved of the idea; but in some measure, owing to his premature death, the matter has not been pursued.

3. From the annexed returns it would appear that out of a total number of 187 Polynesians of both sexes, introduced from the Savage Islands, Loyalty Islands, &c., ninety succumbed to disease or the hostility of the natives. Of the latter twelve are stated to have been so massacred. Allowing also a necessary and reasonable percentage of deaths from constitutional or causes other than those peculiar to the climate, it will be seen that between fifty and sixty deaths only can be imputed to local malefic conditions—even taking the latest figures quoted by the Queensland Press (*Brisbane Courier*, 28th June, 1888), from a recent lecture of the Rev. Mr. Lawes in Brisbane, at 201 South Sea Islanders introduced, of whom 103 have died in fifteen years. If due consideration be given to the above points it follows that not more than seventy persons have died from strictly local causes in seventeen † (not fifteen) years.

4.

* Major-General Sir P. H. Scratchley, R.E., K.C.M.G. † July, 1871, to July, 1888.

4. The mortality to be accepted, however, is, no doubt, great, but may be found somewhat exceptional. Within the past twenty years, in which the coasts of British New Guinea have become gradually more frequented by missionaries and their agents, traders, and their associates, crews of Her Majesty's ships, collectors, and explorers, officials and miscellaneous visitors, &c., there is not only no startling loss of life discoverable, but, regarding the comparatively primitive "environment," there are notably few cases of fatal illness* except in the mission teachers' families.

Taking the European missionaries associated with British New Guinea up to date, they will be found to number twenty persons (fourteen missionaries and six wives), as stated in an appended list. (*Enclosure X.*)

The only death in this group that has, I believe, been attributed to fever is that of the Rev. Mr. Sharpe, who died in Cooktown not many months after he joined the New Guinea Mission in 1885. Of the three senior missionaries (Messrs. McFarlane, Dawes, and Chambers) resident for so long in British New Guinea, I may say that it would be difficult to select, in the healthiest temperate climate, men apparently enjoying better health and vitality or more capable of active, mental, and physical efforts. Probably all these gentlemen specified suffered from malarial or other fevers of severe types, at one time or another, but this is natural in a new tropical country. It is more remarkable that their local death-roll only includes one name, and that traces of the "ravages of climate" are not more observable.

5. With regard to the traders, bêche-de-mer fishers, visitors,† &c., in the time under review, the deaths are almost *nil*, nor am I aware of any constitutions "broken down" by residence in British New Guinea. A sufficient number have worked in those waters for some years past to show that the climate need not yet be considered any worse than that of North Queensland.

Of the mining parties which prospected the country inland from Port Moresby, in 1878 and 1879, amounting to about 100 persons, only five or six at most died from actual fever; yet they were subjected to exceptionally severe privations for want of proper food and medicines, and exposed in many instances to the trying effects of the rainy and most unhealthy season.

A mail steamer ran between Thursday Island, Port Moresby, and Samarai, from July, 1886, to June of this year, and on twenty-four trips took over several tourists besides those allowed passages in the Government vessel. None of these have died, though some may have contracted temporary fevers.

Officials quartered at Samarai (the east end) Motu-Motu (at the head of the Gulf of Papua) and at Port Moresby, with Government employés, imported carpenters, boatmen, members of a survey party, &c., have fortunately no deaths to record in their ranks, except the sad case of the first Special Commissioner. Whether his were a clear case of virulent fever or no may, however, be questioned, but it is certainly true that few officers have escaped slight attacks during the currency of the Protectorate.

Of exploring parties the same truths may be stated, and I find on reference to a return ‡ from the Secretary of the Cook District Hospital (whose prompt courtesy in the matter I have much pleasure in acknowledging), that out of 28 admissions from British New Guinea from 1883 to the end of last year 16 are described as fever, 5 of which were malarial fever. Of those 28 persons, only 1 died of the latter disorder.

The reports of the proceeding of H.M.'s ships visiting, patrolling, or surveying in British New Guinea waters show nothing exceptionally dangerous as to climatic effects, so far as I am aware. The crews of the survey ships "Lark" and "Dart" had a share of fever in 1886, and there were one or two fatal cases; but considering the numbers engaged, the exceptional season, &c., there was no reason for inferring special risk to life from their experience. It is to be regretted that I cannot add a list of the several voyages made by these vessels in Protectorate waters. I have made an imperfect list of over twenty names that have been on the coast generally (if not always) during the dry season; but the actual number of visits is much higher.

The Order of the Sacred Heart established a Catholic Mission at Yule Island in June, 1885. It has been maintained for three years without any deaths having occurred I believe—none, at any rate, have come to my knowledge, though the little community now numbers about ten Europeans of both sexes. I can personally testify also to the undesirable exposure and strenuous physical exertions of the two devoted pioneers of the Mission, Fathers Verjus and Coupé, and that they endured severe attacks of fever during their earliest residence, and difficulties in planting the Mission in 1885.

6. One of the most noteworthy points in the history of alien communication with British New Guinea is that Malays, Polynesians, &c., employed in vessels and otherwise on the coast—even when brought from the same islands as the mission teachers—do not show any extraordinary mortality. A remarkable instance of this occurs in respect of a cedar-cutting party. The position of the timber camp, selected by Mr. Clayton F. Page (a gentleman of well-known experience in North Queensland cedar forest), is on an arm of Galley Reach, an estuary of Redscar Bay. It lies behind the village of Manu-Manu, the scene of one of the first mission stations in British New Guinea—very properly abandoned as such owing to its unhealthy surroundings. A mass of mangroves and brackish creeks intervene between Manu-Manu and the original camp built by a fresh stream emptying into a tidal inlet, where fetid muddy banks uncover with the ebb-tide. Thick scrub (forest lands with undergrowth close enough to check the free circulation of air) surrounded the damp spot. I visited it in 1885, and thought it one of the most pestilential-looking places I had ever seen in the tropics. Amongst the men, from twelve to fifteen were natives from the Loyalty Islands, the Savage (Nieué) Islands, &c., from whence teachers have generally been introduced. This force was at work for three years—from 1884 to 1887. They suffered, as might fully have been expected, badly at times from fever, but Mr. Page possessed some knowledge of medicine, and was liberal in respect of rations, as well as careful about their quality. When the men were much prostrated from malaria they were sent to Port Moresby to recruit, and I never heard that there was a fatal case amongst them.

7. In contemplation of the preceding facts the conclusion is irresistible that there must be some special features in the lives of the teachers or defects in the system for their care and control which have operated prejudicially. It is much to have narrowed the question to this point, and the above inference is greatly confirmed by the impressions of impartial witnesses, such as Captain Moresby, R.N., and others which

* Massacres by natives have, of course, no connection with the subject.

† The numbers can be approximately obtained from the shipping returns in the "Queensland Annual Statistical Register."

‡ Not printed.

which appeared in print during the past history of British New Guinea, and are given in the appendix. (*Enclosures IV, V, VI, VII, VIII, and IX.*) The persistent statements as to its extreme unhealthiness are therefore practically baseless, and it is not necessary to dwell further on the subject. Indeed, I should not have treated it so exhaustively had not they been emphatically made from time to time. In an article, for instance, by the Rev. W. G. Lawes, entitled "The Effect of the Climate of New Guinea upon Exotic Races," published in the *Australasian Medical Gazette* of May, 1887, the same pessimistic view of the "utter unhealthiness" of the climate is elaborated. A copy of this is appended. (*Enclosure XI.*)

I have no desire to seem antagonistic to Mr. Lawes' views, but cannot allow one statement to pass unnoticed. He says: "Only five ladies have attempted to live in British New Guinea. Of these two died, and the third is just leaving—now so reduced by fever that her only hope of life is in getting away. I have just heard of the death of the Baroness von Schleinitz in German New Guinea."

I presume that the above two deaths are those of Mrs. W. G. Turner and Mrs. Chalmers. The first died at Murray Island (in Queensland waters), and I have always clearly understood *not* from climatic causes. Mrs. Chalmers died in Sydney, also, I have heard, from ailments unconnected with local influences. If, however, Murray Island be included in British New Guinea (as in many respects is desirable) then *nine* ladies have lived in British New Guinea *none* of whom have died from their sojourn there. Three ladies not connected with the mission—Mrs. H. O. Forbes, Mrs. I. de Racee, and Mrs. E. G. Edelfelt—have all lived for months together in the Protectorate, and are alive and well. The first was at the east end of New Guinea—a less healthy region, probably, than Port Moresby; the second lived at the latter point, and the third for more than a year at the head of the Papuan Gulf, in a low situation, which I should consider decidedly unhealthy. She suffered, in common with the other ladies, more or less severely from fever at times, and I suppose this is the case cited by Mr. Lawes as so critical. This lady returned subsequently, however, and is now quite well. The others have left the Protectorate, but are also well.

The Baroness von Schleinitz died of aggravated bronchitis (to attacks of which she had been subject in Europe), and I have been told on good authority that probably over-exertion at Finschafen, on account of certain hospitable preparations for Christmas or New Year entertainments of the local officials, intensified the malady to a fatal degree.

8. Since writing the previous paragraph relating to the miners' parties of 1878 and 1879, I have held some conversation with one of the number—Mr. Trotter, senior, of Cooktown. He knew of not less than sixty members of these parties from the "Economist" and "Colonist" vessels, &c., and assures me that not more than three persons died from the distinct effects of fever in British New Guinea. Many, if not all, suffered, but of those admitted to the local hospital none died, and the only other deaths were one from drowning and one apparently from sunstroke.

A. MUSGRAVE, JUN.

Cooktown, 27th July, 1888.

Port Moresby, British New Guinea,
January, 1886.

N.B.—The preceding list of London Missionary Society's teachers and wives, who have been associated with British New Guinea from the earliest date of mission effort, was copied by me from a record book kindly lent by the Rev. Mr. Lawes, on the 6th January, 1886, and a list of the Loyalty Island teachers subsequently obtained from Murray Island at my request.

The returns, therefore, should be complete to the close of 1885, and give all important information now at my disposal. To show that I endeavoured to secure the best possible precision in the returns, I annex copy of a note written by me to Mr. Lawes at that time.

Another importation of teachers took place in 1886, and in a brief memo. of mine early in 1887 the deaths of two more teachers, six wives of teachers, and three children are noted. Having, however, been absent from Port Moresby for more than a year, and not being able now to communicate with that point, I regret that the additional returns for two and a-half years, up to date, will have to be printed hereafter.

Cooktown, 20th July, 1888.

A. MUSGRAVE, JUN.
Enclosure

*Enclosure II.*Government Bungalow,
13th January, 1886.

DEAR MR. LAWES,

I return the book containing the data concerning your mission teachers with my best thanks. It has evidently given you some trouble to compile, and is a melancholy record. I therefore the more regret trespassing upon you with another question or two.

In the return of the introduction of teachers you refer to Iponeso and wife and five other Loyalty Island teachers, &c., but without stating the date of their arrival or subsequent disposition. I presume, however, they came here according to the order otherwise adopted in 1882.

In the event, also, of the erection of the obelisk of which we have before spoken, it would not merely be a memento of the earliest local Christian effort, but be an historical record as well, and its inscription should be as accurate as we can possibly make it. If, therefore, you could give me the information required, I should be exceedingly obliged, and the return would be absolutely complete.

Yours, &c.,
A. MUSGRAVE, JUN.

P.S.—I accordingly send a list of the queries to which replies seem to be desirable.
The Rev. W. G. Lawes.

*Enclosure III.**Extract from Letter by the Rev. S. McFarlane of the 11th July, 1875 (?), to the Editor of the "Times."*

(Treats of proposed scheme of colonising Yule Island by certain persons in New South Wales.)

* * * * *

There is one product of the country not mentioned by the immigrants, but which they are likely to get before any of the others—viz., fever.

We have not yet found any part of the coast or any island in Torres Straits free from the dangerous malady, Cape York and Port Moresby not excepted. Our Polynesian teachers and their families have been sadly reduced; they cannot stand the climate as well as Europeans. Although our mission is still young, we have lost no less than twenty-one of our number—seventeen by the diseases of the climate, and four by the clubs of the savages. These are facts which it may be well for those proposing to emigrate to New Guinea to consider. It is true that a few of the seventeen had diseases in their system which this climate rapidly developed and brought to a fatal termination. Humanly speaking, they would have lived longer in their own country.—*Vide* page 312, "Discoveries in New Guinea," by Captain John Moresby, R.N.

*Enclosure IV.**Comment by Captain John Moresby, R.N., on preceding Extract.*

* * * * *

Mr. McFarlane descants on the unhealthiness of New Guinea, and supports his opinion by making a statement as to the mortality of the native Christian Polynesian teachers employed by the London Missionary Society in New Guinea, but he instances no case of a white man suffering from climatic causes.

It has already been seen that Mr. McFarlane, except at Port Moresby (which the missionaries have publicly announced to be a healthy locality), has no knowledge of the high and healthy parts of New Guinea, which are alone fitted for the white man's occupation; but his facts are so striking that I would fain direct his attention to some of their causes. I am satisfied, from the evidence which came under my own eyes, as I think he will be on consideration, that influences other than climatic arrayed themselves against the lives of these poor creatures.

During the first four years which passed after the native teachers were established in New Guinea, they were unwisely scattered at stations in Torres Straits and Redscar Bay, whilst the agent of the London Missionary Society residing at Cape York (Somerset) had no adequate means of visiting and supplying them with necessary food. The teachers and their families were left unguided and unprovided amongst savages who refuse to supply them with food gratis, and in a country whose produce was different from their native islands. The result was that when in 1872-3, the "Basilisk" visited these poor creatures, she found them in such a deplorable state from want of sufficient food and medicines that several had died, and others were only saved by being brought on board and given nourishing food and proper medicines. These facts, together with the opinion of the surgeon of the "Basilisk" were officially reported by me to the agent of the London Missionary Society at the time. By the possession of the "Ellengowan" missionary steamer the mission is now placed on a more satisfactory footing, and it is probable that we shall henceforth cease to hear of so heavy a death-rate amongst the native teachers, even in the unhealthy parts, where they have, in my opinion, been most unwisely settled. It should also be remembered that these native teachers came from various South Sea Islands, more than a thousand miles distant, where all the conditions of their lives were different.

The general health of the men of the "Basilisk's" ship's company during the eight months spent in New Guinea, when they were exposed to all the vicissitudes of climate, in open boats, on detached service up rivers, on shore work surveying, visiting natives, and cutting 700 tons of firewood for steaming purposes, was exceptionally good. The men occasionally suffered from boils, caused by a scarcity of fresh provisions; and whilst on the north* coast of New Guinea a low fever prevailed among us for a time, but it was of a mild type, soon passing over, and leaving no bad effects.—*Vide* page 316, *idem*.

*Enclosure V.**Extract from Report of Mr. Henry M. Chester, dated 27th August, 1878, at Stacey Island, South Cape.*

(Vide Parliamentary Papers, N.G., C 3617, page 79.)

* * * * *

It is melancholy to think of the number of good men who have been sacrificed since the commencement of the New Guinea Mission. These poor fellows were brought from their pleasant island homes in a delightful climate, dropped here and there along an unhealthy coast, and left to their fate until it was convenient for the "Ellengowan" to visit them. If the place proved healthy, well and good; if otherwise, their places were supplied with fresh arrivals. Their pay is £15† a year, out of which they have to feed and clothe themselves, build houses, and buy land to cultivate. In an unhealthy climate like this, men require something more than cocoa-nuts to sustain life, and these teachers ought to be supplied with meat, flour, tea, and sugar. They are the true heroes of the mission, but at the May meetings at Exeter Hall who hears their names?

Enclosure VI.

An interesting leading article, entitled "Mission Work in New Guinea," will be found in *The Queenslander* of the 16th August, 1879. It treats of a letter from the Rev. S. McFarlane on the same subject (under the same date), and holds that the sacrifice of life—even to that time, nine years ago—had been so serious that radical changes should be made by which Papuan would be substituted for Polynesian teachers. The letter and article deserve reference, but are too long to reprint in this connection.

Enclosure

* The italics are Captain Moresby's. † Now £20 per annum.

Enclosure VII.

Extract from Letter from "Wanderer," in "The Queenslander," 8th November, 1879.

* * * * *

I cannot close this without referring to a letter signed S. McFarlane, which appears in your issue of 16th August. Were it not that I am naturally expected to give you all information coming within my "ken," especially any pertaining to such an important matter as the Christianising, and consequent civilising, of the New Guinea inhabitants, I should sincerely like to suppress these remarks on the "working of the gospel," as it is called, in these heathen lands. I say this because I have been the guest of the missionaries on more than one occasion, and I have many reasons to remember their kindnesses. Messrs. Chalmers, Beswick, and the writer of that letter I both admire and respect for fulfilling the duties in the state of life which they have chosen fearlessly and to the best of their abilities, with the means at their command—and I shall be very sorry if the remarks I feel bound to make on this subject are considered by them to be inimical to their labours; but I am thoroughly convinced that they will give me credit for not being actuated by any other than disinterested motives.

In a former letter I said I did not think the game was worth the candle—when that represented human life—and I say now that I have, after seeing and interviewing nearly all the missionaries in this part of the world, found nothing to alter my opinion. Mr. McFarlane, after alluding to the unhealthiness of Port Moresby, and the consequent formation of stations at the south-east end of the Peninsula, remarks:—

"It has been said that our native agents are not properly provided for. The value of a statement depends a good deal upon the person who makes it. *Who* knows the teachers better than we do, who have lived with most of them since they were children, and trained them for their work? And who are so likely to have their best interests at heart as those who have devoted their lives to their elevation and usefulness? If our teachers are good and deserving, no thanks to some of their white admirers with whom they have associated."

In regard to the first sentence, I must say that my experience is that the teachers are not properly provided for, although I freely admit that I do not take all the statements which these coloured teachers make for gospel; indeed I know, despite their teaching, that the majority of them are untruthful, and this the missionaries have admitted is the case. When I was at Teste Island there were three teachers down with fever, and of my own knowledge I know that they had no medicine, and that they had not been visited for months. At Dinner Island the teacher complained of his wife and children being sick, having no medicine, and no food but what the island produced. At Leocadie, man and wife both sick, no medicine, and complaining of a scarcity of food. At Suo or South Cape, where Mr. Chalmers was then residing, both the missionary and his wife seemed happy and contented. At Kerepuna, although the "Ellengowan" had shortly before been there, the teacher complained of having no medicine, and also said that he had on plenty of occasions, when there was a bad season, been short of provisions. Mr. Andrew Goldie endorsed this statement, and told me that he had often carried yams from further up the coast to supply this man with food. While at Kerepuna I saw a man who was stationed at Aloma, but had travelled down to Kerepuna to be near his countryman, who looked to me to be dying. He was a perfect skeleton, and he both moved and breathed with difficulty. He also said he had no medicine, and was supplied by Captain de Hoghton with quinine properly mixed. At Kemp Welsh the missionary's wife and child were very ill; the man and woman both complained of being without medicine and of having insufficient food. Another man, "Isaako," stationed close to Port Moresby, came on board whilst we were at anchor outside the port, bringing with him numerous curios which he wished to trade for medicine. The man, whom the Government presented with a rifle for his kindness to sick diggers, had, when first placed at Port Moresby, to shoot his dinner before eating it, and the inside of the banana plants was the only vegetable he had with his kangaroo for months, and that he had to pay dearly for. "The value of a statement depends a good deal upon the person who makes it," says Mr. McFarlane. These statements emanate from the men themselves: and as they are the men whose virtues and usefulness Mr. McFarlane extols so much, they surely must be worth some credence.

* * * * *

According to Mr. McFarlane, the missionaries have been on the island for six months. Can he point to one convert, or show, beyond the establishment of a number of stations and the death of a lot of half-civilised teachers, anything for the money expended?

Extract from Letter from the Rev. J. Chalmers.

(*Vide Queenslander*, 3rd January, 1880.)

After reviewing the statements of "Wanderer" *seriatim*, and denying them, Mr. Chalmers writes:—

* * * * *

I fearlessly reiterate that during the last twenty-seven months no teacher can complain of being left without food or medicine. I have been connected with the mission work for a number of years, and I give it as my experience that our New Guinea teachers are overpaid and treated too much as if they could not take care of themselves.

* * * * *

We cannot speak of "converts," but we can say the teachers' influence has been widely felt, and we are willing to work on patiently.*

Enclosure VIII.

Extract from Letter from Captain Pennfather of Queensland Government schooner "Pearl."

(*Vide Queenslander*, 1st May, 1880.)

* * * * *

On Friday, 5th March, got under way, and made sail for Bampton Island.

* * * * *

Landed with armed boat's crew, accompanied by Messrs. Bowme and N. Chester; inquired into the death of the two native teachers and their wives reported to have been murdered by these islanders. The natives denied the murder, saying that the teachers had been left on the island for months without provisions or medicine; that they (the natives) supplied them with yams, cocoa-nuts, &c.; that the teachers took ill with fever, and after a time died, and their wives shortly after, also from fever; and that they did all they could for them. This was told me by one of the natives, who had been, according to his account, to Sydney in some ship, and who spoke very good English. He argued that they could have gained nothing by killing them, as they were anxious to keep friendly with the white men, as they wished to obtain knives, tomahawks, and calico from them. They also told me that a large vessel had been some time ago ashore on the reef surrounding their island, and that they had assisted the crew to jettison the cargo (flour), when she got off and proceeded on her voyage. These people are superior in physique and intelligence to those of Kiwai, but the island has every appearance of being fever stricken, being low and swampy.

* * * * *

Enclosure

* The rest of the letter is too long to reprint.

Enclosure IX.

MR. ANDREW GOLDIE to MR. DEPUTY COMMISSIONER MUSGRAVE.

Port Moresby,

DEAR SIR,

13th January, 1886.

I forward to you extracts of old letters that appeared in the Colonial Press—one of the letters by Mr. Chalmers in reply to "Wanderer." I may state I was in Sydney when this letter was published. I dined on board the "Beagle" in Sydney. Captain de Houghton had Mr. Chambers' letter on the table before him. He was most indignant when he read it. He requested me to answer it, and to use his name, that what "Wanderer" wrote regarding the teachers was perfectly true, and were facts indisputable.

I did not answer the letter. I was going back to New Guinea, and I did not wish to be further wrangling and writing on mission work.* I had learned to look upon their Press correspondence with scorn and contempt—so much so that I have scarcely patience to read a missionary's letter through. The years that have passed since have only added to the feeling I then had.

*Enclosure X.**Extracts from the "Australasian Medical Gazette" (Rev. W. G. Lawes), May, 1887.*

THE EFFECT OF THE CLIMATE OF NEW GUINEA UPON EXOTIC RACES.

In all that has been said and written about New Guinea during the last few years, scarcely any attention has been paid to its climate, and yet it is a subject of the first importance in considering the many schemes and proposals suggested for its colonisation by a European race. The country may be rich and its resources great, but is its climate such that the white race can live there and make it a home?

The belief has been growing in my mind for a long time that New Guinea is entirely unfitted to be the home of the Anglo-Saxon, and this belief is strengthened every year. I settled here at Port Moresby in 1874, and, with the exception of a visit to England (1878-80), have been resident ever since. One round of seasons may be exceptional and misleading, but a decade of seasons is amply sufficient to show what the climate really is. I have had, during the whole time, a large number of South Sea Islanders under my care, and have had almost the sole medical care of the mission.

The entire number of South Sea Islanders who have been here since the beginning of the mission in 1872 is 201. Of these 103 have died, including eight who were killed. It must be remembered that these were all men and women in the prime of life, between 25 and 45 years of age. They were also picked men, none being accepted for New Guinea service who had any physical weakness or disease. The 201 might reasonably have been expected in their own homes to have lived to a good old age, and yet in New Guinea ninety-five have died. Most of them died within two or three years of their arrival. They were all from tropical islands, such as Rarotonga, Tahiti, Savage Island, Lifu, and Maré. During the early years of the mission, when we were all alike ignorant of the climate, and the best means of preventing or treating the fever, some deaths may have occurred which were preventable. But the fact remains that with all the care and attention which the experience of those years has taught us there is no sensible diminution of the death-rate. The immediate cause of death has not always been fever—there has been some cases of phthisis, and some women have died in childbirth, and some cases have been obscure and difficult to diagnose; but I do not think there is one out of the 201 who escaped fever.

All the above were coloured men—Polynesians and Melanesians. How has the white race fared on New Guinea during the same period? The white immigrants have been almost entirely men, and most of them visitors rather than residents. Only five ladies have attempted to live on British New Guinea. Of these two died, and the third is just leaving—now so reduced by fever that her only hope of life is in getting away. I have just heard of the death of the Baroness von Schleinitz, in German New Guinea. She passed through Cooktown with her husband about a year ago, full of health and vigour. The largest number of white men who have been in New Guinea at one time were the diggers, in 1877. Of these several died, and the whole party were so stricken with fever that they were only anxious to get away with their lives. Of the scientists and other visitors who have been to New Guinea, almost all have suffered from fever. D'Albertis and party at Yule Island, and up the Fly River, had an experience with which almost every traveller in New Guinea is only too familiar. The deaths have not been numerous, but in most cases the patient has had an opportunity of leaving, and he has gladly taken it. From all the white men I have known to come to New Guinea since 1874, I can only say it has been the exception for anyone to be here a few weeks without getting fever, and the exceptions have been very, very few. The decimation of Sir Peter Scratchley's party on the "Governor Blackall" is a fair illustration of what has befallen most parties of travellers or visitors in New Guinea.

No part of New Guinea that we are acquainted with is free from fever. Inland and on the coast, on high ground and low, on the mainland and on small outlying islands, there seems no escape from malaria. Port Moresby—or, as it is now to be called, Granville—is perhaps as healthy as any place we know, and that is not saying much. Men have been here in Government employ since the proclamation of the Protectorate who have been living for years in North Queensland, and who pooh-poohed the idea of fever, but in a few weeks they have been down with it. Working on the best site, and sheltered from the sun, with no swamp or miasma near, they have succumbed and gone down like nine-pins. Captain Musgrave, the Deputy Commissioner here, is one of the few who have escaped fever, but then he is away on furlough three months in the year—an impossibility to those who come to New Guinea to make a living.

The fever may be called the "New Guinea fever," for, while it has much in common with other malarial fevers, there are some characteristics which distinguish it as endemic to New Guinea. It assumes different forms. We have the simple intermittent fever and ague. This, though, often very severe, is the most tractable and the most amenable to treatment. The more pronounced the cold stage, the more regular are the others, and the more thorough the recovery in the interval. A remittent type is very difficult to deal with. In these cases there is no cold stage and no violent symptoms, but a total loss of appetite, great depression, and continual fever. The Rev. Mr. Sharpe, who died in Cooktown from fever contracted here last year, had this remittent fever more than a fortnight before he left for Cooktown. Day after day, he seemed just about the same. His temperature in the morning was just over 100 degrees, and in the evening 102 and 103 degrees. He slept well, had no vomiting, but loathed all food, and got gradually weaker. This is a typical case.

But there is another form which seems to partake of the character of both intermittent and remittent. The cold stage is not very marked, the hot stage prolonged, and symptoms very violent; at length the sweating stage comes on, but is soon over, and brings very little relief. Long before the proper time the fever returns, and then it is the same thing over again. In these cases vomiting is often very severe, enormous quantities of pure bile being thrown up.

No age or condition is free. My own infant, who was born here, had his first attack of fever when he was six weeks old, and from that time until his death at eighteen months he was constantly the subject of fever and ague. In the case of children especially, the spleen becomes very much enlarged. The natives suffer from fever, but the symptoms are not often violent. Dogs undoubtedly have it. One dog we had used to shiver, and go and lie in the sun, and then came the hot stage, with dry burning nose. I don't know whether it ended in sweating; it lasted a few hours, and used to return at regular intervals. Those who become acclimatised are liable to frequent returns of a milder form of fever and ague. I am writing, not only from my observations of those who have been my patients, but from my own personal experience.

* Mr. Goldie alludes to certain former letters of his printed in the Sydney Press.

I hardly like, as a non-professional, to say anything about treatment. Our resources are very limited. Those who do not know by experience what tinned meats are can scarcely imagine how difficult it is to tempt a fickle appetite or keep up the strength of a patient with them. Next to quinine, Liebig's extract of beef is our greatest necessity. And what would we not give for ice, or even *cold* water? The very large doses of quinine recommended by some practitioners in India have not been a success in my hands. I have found about 15 gr. a day the best quantity with myself and most of my patients. Some, who can never keep down quinine in a liquid form, take it easily in gelatine-covered pills. Arsenic I have found of great service with some, after the recurrence has been broken by quinine. The vomiting almost always yields to hydrocyanic acid. My attention was called last year by Mr. H. O. Forbes to Warburg's fever tincture, and I have tried it with great success. My supply was but limited, but no case in which I took or administered it did it fail; it has a high reputation in India, and I believe will be as successful in the treatment of New Guinea fever.

There are but few diseases besides fever which need any notice. Ulcers are the most common affliction of the natives. Children almost all have, during some period of childhood, the skin disease, known in Eastern Polynesia as *tona*, and which resembles frambœsia; these sores, however, often develop into corroding ulcers, from which many infants die. A form of leprosy is endemic in some places in this neighbourhood. In white men the smallest wound becomes a troublesome sore, very difficult to heal.

Syphilis is certainly unknown among the natives. I have always been on the look out for signs of its existence, and it could not possibly have been hidden if any men had been so afflicted. I fear it has been introduced within the last two years at a village about 40 miles from here, but the surprise and disgust of the natives are strong corroborative proof that they were previously unacquainted with it.

Ophthalmia is uncommon. Isolated cases occur, but it is not epidemic, as it often is in the South Sea Islands, nor yet of so virulent a type.

If blight was common, as it is in Queensland, there would be much blindness, for the habits of the people would increase rather than cure it. The proportion of blind to the population is very, very small.

Port Moresby, New Guinea,
19th March, 1887.

APPENDIX F.

Mr. Deputy Commissioner Musgrave was instructed by me, after communication with the Sub-Collectors of Customs at Thursday Island, Cooktown, and Townsville, to draw up a paper on the trade of New Guinea—Exports and Imports. The following paper dealing rather more widely with the resources of New Guinea has been furnished to me.

J. DOUGLAS.

MEMORANDUM.

1. Having lately expressed the opinion that the natural resources of British New Guinea are considerably greater in proportion than those of the valuable West Indian Colony of Jamaica (even relatively to the areas involved*), and that the territory possesses an "early prospective value for Queensland," I hope by the following returns, appended extracts and remarks, to show that these views are not "unwarrantably sanguine" as has been stated of them. In putting them forward I did not fail to see that they ran directly counter to the growing idea of a "barren heritage," which Queensland has undertaken the responsibility of supporting for the next ten (10) years, and were tolerably sure to be discredited—especially in the face of equally recent adverse opinions on the sanitary condition and value of British New Guinea. As these views have been gradually and carefully formed, however, after some lapse of time and residence, and personal visits to several districts, and are conscientiously held, I could not see any objection to stating them at a moment of political "slack water," so to speak, between the gratifying disappearance of an undeveloping form of administration, and the entrance of a new and necessary one.

2. The comparison drawn between Jamaica when first settled and British Papua is a good deal closer than may at first sight appear to those who have not interested themselves, especially as to the potential wealth, progress, and prosperity of tropical colonies. Both territories are situated within the tropical belt, and the configuration of both is remarkably similar in many respects. British Papua, like Jamaica, possesses magnificent central ranges, more than lofty enough to give all the zones suitable for tropical products which require considerable altitudes, and an ample rainfall, while other kindred atmospheric conditions, steady and healthful trade winds, &c., are equally noticeable. "The aboriginal name of Jamaica was 'Xaymaca,' a word supposed to imply an overflowing abundance of rivers. Bridges tells us that the name is derived from two Indian words, 'Chabaian' signifying water, and 'Makia' wood. The compounded sound would approach to Chab-makia, and harmonized to the Spanish ear would be Cha-makia, corrupted by us to Jamaica, denoting a land covered with wood, and, therefore, watered by shaded rivulets, or in other words, fertile." †

In these respects British Papua might have been called after Jamaica, for there can hardly be a land with a more "overflowing abundance of rivers," as well as streams and springs. Its highest points are nearly twice the elevation of those in Jamaica,‡ and are clothed with dense forests apparently to the summits of the ranges. No one who realises the irrepressibly rapid increase of trade and population throughout Australia, and the developments taking place in Northern Queensland, can doubt that these highlands will as surely be sources of wealth and health hereafter as those of Jamaica and Ceylon. In consequence of this greater internal elevation, the rivers are not merely greater and more numerous, but are navigable in some cases for important distances into the interior.||

In connection with the many admirable bays, harbours, and anchorages which indent the main coast line, and yield shelter among the "satellite" islands of the Protectorate, these useful waterways should be borne in mind amid other natural advantages. Jamaica has, of course, plenty of ports conveniently placed for her oversea trade, but British Papua is equally well endowed in this respect for all her needs in the future.

With

* British New Guinea and its islands probably contain not less than 90,000 square miles. Jamaica has a super. area of 4,000 odd square miles

† Brisbane *Evening Observer*, 16th July, 1888.

‡ See "Handbook of Jamaica," 1887-88, page 25.

§ Mount Owen Stanley, British New Guinea, is 13,000 feet, and the Blue Mountain, Jamaica, a little over 7,000 feet. These are the crowning points, but there are several others of 10,000 feet in British New Guinea; while the greatest altitude in Queensland, one of the Bellenden Ker Range, is only somewhat above 5,000 feet.

|| The Mai-Cussa, Fly, Aird, Jubilee, and St. Joseph Rivers may be mentioned, but there are others. The Fly River was ascended for about 500 miles in a steam launch by the distinguished naturalist and explorer, Signor D'Albertis.

With regard to lands lying between the ranges and the sea, they are extensive and splendidly suitable in various districts, for pastoral and agricultural interests. Enough has been seen of cattle, horses, pigs, goats, and poultry, to say that they thrive perfectly. High-bred sheep imported do not seem so successful; but no careful experiments have yet been made.

African or Indian sheep would, probably, furnish a satisfactory meat supply, but such excellent South Down mutton can be eaten in Jamaica, where trouble has been taken in the matter, that there is no reason yet to expect ultimate failure to produce good stock of this kind.

Cattle thrive as well as possible, and also pigs. The latter are indigenous, not merely on the mainland, but on the islands to the eastward.

Of agricultural lands a cleared tract exists, no great distance west of "Granville," equal apparently to Vere, the best sugar-cane district in Jamaica. It is as level for agricultural operations, as well watered, seemingly as fertile, and as accessible by sea and river. Other fine areas occur of much the same character, many covered with valuable virgin forest, while the sugar-canes cultivated in native gardens look as healthy and vigorous as any to be seen anywhere. The same can be stated of specimens of tobacco, pine-apples, yams, bananas, sweet potatoes, and numerous other tropical fruits and vegetables which it would be tedious to dwell upon.

3. The aborigines of Jamaica were described as very numerous by the early Spanish authorities, when the island was first occupied by that power at the end of the 15th century. One of their historians (I believe, Las Casas) described it as a "land of cottages," and estimated the inhabitants at over 60,000 souls.

These unfortunate people, everywhere mentioned as a mild and confiding race, rapidly disappeared under the slavery and cruelty of the Spaniards. After a century and a half (the term of Spanish control) they seem to have been wholly exterminated, and on the capture of the island by the English in 1655 the chief native tenants of the soil were "Maroons"—descendants of Spaniards and negroes, who had ensconced themselves in remote glens and fastnesses of the hills. British New Guinea, like Jamaica, therefore, has a numerous native population on its earliest settlement.

The earliest exports from the West India Island, during Spanish occupation, seem to have been mahogany, logwood (and probably fustic and "lignum vitæ"), hides, hogs' lard, and some minor products. One hundred and seventy years after its discovery, and in 1664, one of the first English Governors, Sir Thomas Modyford, thus stated its interests and natural resources:—"After having a census taken, which showed the population to be 4,205 persons, in his first report on the condition of the island he informed the King that sugar, ginger, indigo, cotton, tobacco, dyeing woods, and cocoa may be and are produced as well as anywhere; but pimento, China-roots, aloes, rhubarb, sarsaparilla, tamarinds, cassia, vaiguillios, hides, and tallow are the proper commodities. There is the best building timber and stone in the whole world, and great plenty of corn, cassada, potatoes, yams, plantains, bananas, peas, hogs, fowls, cattle, horses, asincoes, sheep, fish and turtle, and pasturage—in fine, nothing wanting but more hands and cows. The low valley grounds are feverish and aguish from June to Christmas—the rainy weather, but the uplands and hills are as healthy as Costall in England."

Passing over the quaintness of expression, it may be said that many of these products, or their equivalents, already exist in British New Guinea; nor are there any, I believe, unlikely to flourish profitably hereafter.

In addition to valuable timbers the new territory yields "jungle produce," such as sago, rattans, copra, massoi bark, bird skins, &c.† (unknown in Jamaica), while its bêche-de-mer and pearl-shell beds are of considerable value and are products that do not rank among Jamaica exports.

Sir Thomas Modyford's remark at starting his new administration (some ten years after the conquest of Jamaica, and when matters were doubtless in a somewhat transitional state), that the only things wanting were "hands and cows" does not apply to British Papua, where there are numbers of "hands," and hands that will be very available and useful (under judicious treatment) in assisting to develop latent industries. Speculations have been made as to the numbers of the native population, but they are of no value whatever—rather the reverse in fact, since they suggest a comparatively even distribution of aborigines, which is not the case.

All that we know at present with certainty is, that some districts are thickly peopled, others much less so, and that there are tracts apparently without any inhabitants at all. The irregular and unknown nature of a large part of the country will render it a difficult matter for some time to form even an approximately correct estimate in this respect. Still the Papuan is to be counted upon as the most important element in the local labour force for some time hence. It is acclimatised, it is cheap, and it is not an unintelligent class of service under certain circumstances. It is not generally understood, I believe, that the copra, gum, and bêche-de-mer exported from the British New Guinea coast is all collected by natives, and the two latter articles cured and "bagged" without supervision, once the collector has been shown the process. It is impossible here to describe the various ways, indeed, in which natives have rendered useful and willing aid to traders and visitors, but their skill as boatmen and wood-cutters may be noted. They are generally well satisfied with good meals of rice as rations, and a few sticks of tobacco pays for a day's work. The Papuan is not an idler in any true sense, although his efforts for an employer are often intermittent and not fully satisfactory.

We have, therefore, in the indigenous labour supply of British New Guinea a valuable factor for evoking its wealth, and in this respect may feel an important advantage over the West Jamaica Colony when it passed into British possession, for instead of 4,000 odd persons, we assuredly have many more than that number conveniently resident in very accessible positions.

These remarks are more lengthy than I at first intended, but I believe they will serve to show that the parallel drawn between the two places is a fair one, and yields considerable historical encouragement to future effort for the utilization and settlement of a spacious, valuable, and beautiful national property.

PAST

* "Handbook of Jamaica," 1887-88, page 35.

† My feeling as a student of natural history revolts against the inclusion of these as economic articles, but a good many valuable packages have left British New Guinea in the past ten or twelve years.

PAST AND PRESENT TRADE WITH BRITISH NEW GUINEA.

It is doubtful whether a clear appreciation generally exist as to the proximity and accessibility of British New Guinea and its islands to Queensland ports.

A table of distances and list of the principal islands appended to this paper (Appendix 1 and 2) will best show the comparatively insignificant spaces which in the present day of steam and electric communication divide the several points. The main coast line from the 141° meridian of east longitude (about 1 degree west of our chief western river—the Mai Cussa River) to Mitre Rock at the boundary of German New Guinea (N.E. coast) is some 1,000 miles in length. And the aggregate measurements of the various islands along shore must be equal to if not more than the same extent. The total number of islands and islets in Protectorate waters may be approximately taken from the Admiralty charts and the Australia Directory, 1879 (also an Admiralty publication), at over 300 in number. A proportion is, however, neither placed on the charts or enumerated, and do not appear in the above total. Hardly any of those mentioned are so small or barren that they are not utilized as fishing resorts or cultivated by the natives. No such large and sterile islands exist in the Protectorate, for instance, as Magnetic, Stradbroke, and Moreton Islands. Even the low mangrove-clad islets have a value in the wood they carry, which is used as a common fuel for shipping, while the red mangrove furnishes excellent material for piles and posts, resisting the attacks of the wood-louse. The larger islands are well watered and timbered, and of most fertile character. Many in the Calvados chain, Sudest Islands, &c., would be suitable for stock, having abundant grass and water, while the inhabitants are not numerous.

The innumerable rocks, reefs, and lagoons* amid the groups of the Louisiade, Engineer, Bonvouloir, Lachlans, Woodlarks, Laseinie, D'Entrecasteaux, Luscancy, Trobriand, and other islands† are swarming with fish, turtle, and other marine products, which form a very important staple of diet for the aboriginal populations. The fish-fauna of British New Guinea is rich in different species, and includes the best edible tropical varieties, while the supply of each kind is abundant at many points, although not easily procured from the natives by visitors.

From May to October inclusive the S.E. monsoon blows with force and regularity varying from this point, but slightly as a rule throughout the season. There is thus abundance of favourable wind for vessels running backwards and forwards between the coasts of Queensland and British New Guinea. At this season also the climate along the mainland or amid the Eastern islands is extremely agreeable, and apparently healthy—the rainfall being reduced to a minimum. At the east end of New Guinea proper, where much moisture collects about the densely forested high lands, the weather is proportionately wet for a great part of the year. In the Archipelagoes north, south, and east of Samarai (Dinner I.) the atmosphere seems drier and clearer and hardly at all malarial.

It is difficult to conceive more beautiful scenes for yachting cruises than are presented by the natural features and grouping of these islands. They are almost certain to become popular resorts for those whose health or pleasure is enhanced by life at sea or such voyages as that of the well known Earl and the Doctor.

When it is realized that Port Moresby is nearer to Brisbane (*via* Cooktown) than Port Kennedy (Thursday Island), and that in fact there is *no point* in the remotest part of Protectorate Oceania waters as far from Brisbane and Cooktown as Normanton,‡ while the conditions for traffic between the two communities are so suitable, it is no longer surprising that some trade has been created in past years, or that such relations are being more rapidly developed in the present, in spite of the possession of many similar natural resources by Queensland, the massacres of aliens and destruction of vessels by aboriginals, and the consequent serious pecuniary losses of merchants in Cooktown and Thursday Island.

Considering the small size of the several crafts employed in the "bêche-de-mer" and other industries, &c., it seems to argue favourably for the absence of bad weather in these waters that hardly a wreck has taken place from this cause in the past.

Trade with British New Guinea, as will be seen from the accompanying returns (Appendices 3 to 6), is almost wholly confined to the North Queensland towns—viz., Cooktown, Townsville, and Thursday Island. Sydney furnishes certain supplies for the use of the London Missionary Society Stations in British New Guinea, but the details of this branch of trade are not now available for reference. Certain quantities of coal for the services of Her Majesty's ships is also sent in from Newcastle.

Probably almost the earliest regular transactions and negotiations for land with the natives of the mainland of British New Guinea were those of the London Missionary Society, who placed "teachers" at certain points in 1871. It is stated that a Sydney merchant (Captain Towns) has despatched a vessel or vessels to the Louisiade group for bêche-de-mer, &c., either before or about that date; and the Woodlark Islands were a resort for whaling ships some years previously. Definite information on these points would be of considerable interest. It is not to be had at this point, however, and indeed is not material to a paper which cannot attempt to deal exhaustively with the historical side of British enterprise in New Guinea. Bartering by the first discoverers and explorers with the natives for ethnographic and other curiosities was no doubt the earliest simple step towards trading relations, which are thus contemporaneous with the history of the territory itself.

The returns herewith exhibit an encouraging expansion of commercial interests, which have been created in the past fourteen (14) years. It is obvious from them, I believe, that British New Guinea is virtually a district of Queensland—a valuable district—and one far easier of approach and entrance than many of her western "back blocks."

The shipping and interchange returns are necessarily imperfect as to past transactions. They do not appear to show the full and true qualities of natural produce from British New Guinea, nor always represent the real values of what is specified.

With

* The largest lagoon in the world is stated to exist between the Trobriand Islands and Mitre Rock (Findlay's South Pacific Directory).

† The Admiralty chart entitled Australia, Coral Sea, and Great Barrier Reef, sheet 2, No. 2764, should be consulted if further details are required.

‡ Distances given in the A.U.S.N. Company's Handbook are as follows:—Brisbane to Cooktown, 1,008; Cooktown to Thursday Island, Thursday Island to Normanton, 500.

With regard to goods outwards from Queensland, also, it would seem that there are omissions and understatements, more particularly as to those transhipped in this Colony. These points of uncertainty can soon be avoided by an improved public service in British New Guinea itself, and they do not invalidate the proofs presented by the returns that a trade almost wholly confined to Queensland, and decidedly increasing, has been fairly established.

It is to be borne in mind, also, that considerable yields of pearl-shell and bêche-de-mer have been appropriated from waters both geographically and equitably those of British New Guinea. The parallel of 10° S. lat. bisects Torres Straits, and the waters and islands northward of that line, which were included ten years ago by the extension of the Queensland boundary*, legitimately belong to British New Guinea. At that date the annexation was no doubt a judicious and statesmanlike step, not only in order to control those engaged in the Fisheries of Torres Straits, but for securing the command of what is virtually a great inter-oceanic canal. Still, the fact remains, that by the projection northwards of the boundary beyond the par. 10° lat. S., between 7 and 8,000 square miles (geo.) of the just proportion of British New Guinea fishery fields with other rights were appropriated by Queensland, and that the valuable proceeds of the Warrior and other rich reefs and pearl-shell deposits have never been credited to the account of the opposite territory. The fisheries of Torres Straits have declined of late years, but are still very profitable in places. Acts for the protection of both pearl-shell and bêche-de-mer fisheries will, however, shortly have to be enforced on both sides of the Straits, unless permanent injury to these important marine resources is to be regarded with indifference. The pearl-shell, bêche-de-mer, and turtle shell exported in the thirteen years from 1875 to 1887, and specified as the "Produce and manufacture of the Colony," amounts to over £920,000†, or probably nearly £1,000,000 sterling to date. There is no doubt that a fair and important percentage of this should be added to British New Guinea returns, but it is impossible to fix the amount.

Since trade opened with British New Guinea (about the year 1875) 373 vessels of 20,592 tons and carrying 3,283, are recorded as passing between the two coasts. Those clearing, however, for the Louisiade, Woodlark, and other groups would be included in traffic with the South Sea Islands.

The vessels enumerated, transported goods in exchange to the value of £80,000, and it is noteworthy that the imports from British New Guinea were largely in excess of the exports thither—being some £50,000 in value against £30,000—this, too, in spite of the fact that the small alien resident and visiting population is chiefly dependent upon foreign provisions of most kinds. This surplus of imports over exports in the early "balance of trade" would be held an especially promising indication in the views of certain political economists.

Of products from British New Guinea, bêche-de-mer has hitherto yielded far the most important share, being stated at over £40,000, or four-fifths of the total imports. The first importation of this article was probably made by Captain Colin Thomson in 1873, when some 12 tons of fish were taken to Townsville from the Louisiade Archipelago. He was one of the earliest, if not the first, pioneer in those waters.

The principal goods sent from Queensland are, firstly, tobacco, which forms the leading item of the statistics. This is the ordinary American manufactured tobacco in use throughout the Pacific for trafficking with native races, the total export of which to the end of June this year reached a value of £5,288. Rice, flour, and salt beef, &c., &c., are now articles of regular, if not yet very considerable consumption in the new territory.

In order to show the most recent developments of supply and demand, the returns of the interchange in detail for the first half of the current year is herewith appended. (Appendix 7).

It will be seen that besides "bêche-de-mer," pearl-shell, copra, and gum have been exported from British New Guinea. A few bundles of rattans shipped have escaped notice in the returns. No mention is made either of birdskins, which have been sold in some numbers yearly since the commencement of local trade by Mr. A. Goldie, the first merchant settled at Port Moresby‡, and other traders. These and numerous packages of natural history specimens, ethnographic curiosities, turtle-shell, "green snail" and nautilus shells, &c.§, scarcely mentioned in the returns, would all serve to swell the amount derived from British New Guinea.

With the exception, however, of copra, none of these should perhaps be regarded as contributing permanently to the trade of the territory.

There are still thousands of square miles of unvisited and almost unknown waters which will doubtless yield bêche-de-mer and pearl-shell for years to come; but, in a forecast of future proceeds it would be unsafe to rely too closely upon these articles. Both are found, of the best possible quality, but the most valuable shell has hitherto chiefly been found at depths which make it difficult and even dangerous to obtain. The accessible bêche-de-mer reefs, likewise, have been exhausted in several places, although the prospect of further productive finds may be considered good.

The two or three cargoes of cedar and malava cut in the forests of Redscar Bay and the Tate River, being sold in Melbourne, do not appear in Queensland statistics. Stress has been laid on the fact that this industry has been deserted for the present as unprofitable. There is nothing, however, to discourage future enterprise of the kind under more satisfactory arrangements than have hitherto been adopted. The development of Northern Australia is proceeding, and many of the timbers required may be conveniently supplied in time to come from the neighbouring and accessible forests of British New Guinea, which undoubtedly contain innumerable valuable woods of abundant growth and fit for almost every purpose.

I

* Act No. 1, 43 Vic., 1879.

† Turtle-shell, £3,972; pearl-shell, £732,349; bêche-de-mer, £185,248; total, £921,569.

‡ Mr. Goldie first visited New Guinea as a Nat. Hist. specimen collector in 1874, and having found the labours of an explorer too trying for his health, opened a general store in Port Moresby, I believe about 1880. Mr. A. H. Kissack commenced a similar enterprise at East End in 1885. Both deserve note from the marked success they have had in improving alien relations with the natives.

§ *Vide* "Commercial Products of the Sea," by Simmonds.

I have said nothing about the supposed mineral wealth of the country, because next to nothing is known. Small quantities of gold have been found of best quality at more than one point, and it is a reasonable expectation that it will find a place amid other valuable resources. But there are many other tropical products of reliable and profitable character to be encouraged, without being over-influenced by a desire for one particular resource which may not exist in British New Guinea, and which is in no way essential to a sufficient measure of agricultural and commercial prosperity. Of course, it is not to be denied that, should it be discovered (as is quite possible still) in payable quantities, it would not only be a direct source of wealth, but that it would probably prove the greatest stimulant to other interests in its vicinity.

Cooktown,
31st August, 1888.

A. MUSGRAVE, JUNR.,
Deputy Commissioner for British New Guinea.

Enclosure 1.

TABLE OF DISTANCES between certain points in QUEENSLAND and BRITISH NEW GUINEA, &c.

Geographical Points.	Geographical Miles.
Port Kennedy (Thursday Island) to the point of coast on 141° long. E. (the boundary line of Dutch New Guinea)	(About) 120
Port Kennedy to Talbot Island (mouth of Maicassa River)	82
Port Kennedy to Kiwai Island (mouth of Fly River)	150
Port Kennedy to Motu-Motu (head of Gulf of Papua), <i>via</i> Dalrymple, York, and Darnley Islands*	325
Motu-Motu to Yule Island*	53
Motu-Motu to Port Moresby	68
Port Moresby to Samarai (E. end)	259
Port Kennedy to Port Moresby direct	300
Cooktown to Motu-Motu	480
Cooktown to Port Moresby	380
Cooktown to Samarai	425
Samarai to Mitre Rock (coast boundary point of German New Guinea)	240
Samarai to north island of Trobriand group	180
Samarai to N.E. extreme Protectorate waters (intersection of Mer. 155° E. long., and par. 8° S. lat.)	380
Samarai to Woodlark Islands	180
Samarai to Laughlans	210
Samarai to Adèle Island (S.E. extreme of Louisiade archipelago)	240
Samarai to S.E. extreme of Protectorate waters (intersection of Mer. 155° E. long., with par. 12° S. lat.)	350

* This was the course pursued during the steam service which existed from July, 1886, to July of this year between Thursday Island and Port Moresby.

Enclosure 2.

LIST OF PRINCIPAL ISLANDS* in WATERS OF BRITISH NEW GUINEA.

<i>Woodlark Island.</i>				<i>Goodenough Island.</i>			
Circumference, about	100 miles.	Circumference, about	50 miles.
Length,	35 "	Length,	20 "
Breadth,	15 "	Breadth,	12 "
<i>Rossel Island.</i>				<i>Ferguson Island.</i>			
Circumference, about	50 miles.	Circumference, about	90 miles.
Length,	25 "	Length,	25 "
Breadth,	10 "	Breadth,	18 "
<i>Sudest Island.</i>				<i>Normanby Island.</i>			
Circumference, about	95 miles.	Circumference, about	85 miles.
Length,	45 "	Length,	35 "
Breadth,	10 "	Breadth,	15 "
<i>St. Aigman's Island.</i>				<i>Saibai Island.†</i>			
Circumference, about	50 miles.	Circumference, about	26 miles.
Length,	25 "	Length,	12 "
Breadth,	8 "	Breadth,	4 "

* The Admiralty Charts have been referred to for these measurements.

† This island is within the present northern water boundary of Queensland, but is one of several coast islands which properly belong to the Protectorate.

Enclosure 3.

STATEMENT OF SHIPPING passing between BRITISH NEW GUINEA and QUEENSLAND for FOURTEEN YEARS (from earliest accessible date, 1875, to 30th JUNE, 1888), compiled from QUEENSLAND ANNUAL STATISTICAL REGISTERS.

† For first six months, and only from Townsville, Cooktown, and Thursday Island.

Enclosure 7.

RETURN showing PARTICULARS of IMPORTS and EXPORTS between BRITISH NEW GUINEA and QUEENSLAND during the FIRST HALF of the CURRENT YEAR, 1888.

Returns of Imports from British New Guinea into Queensland for the Half-year ending 30th June, 1888.

(From Townsville, Cooktown, and Thursday Island.)

Articles.	Quantities.	Values in Sterling.
Bêche-de-mer	9 tons 1 cwt. and 83 bags.	£ 1,055
Copra	2 tons and 621 bags	277
Curiosities	6 pkgs.	13
Gum	29 tons 10 cwt.	470
Shell, Pearl*	54 tons 24 cwt.	3,770
Shell, Turtle	1 cs. and 13 lb.	18
Specimens, Natural History	1 pkg.	10
		£5,613

* In the Return of Exports, for the first six months of this year from the G.O. at Samarai, at least 10 tons more Pearl-shell are recorded as shipped, amounting to an additional £1,000. This agrees with the Sub-Collector's note that the Customs Returns do not show the whole trade, part lost in transshipment.

Enclosure 7—continued.

Returns of Exports, Half-year ending 30th June, 1888, from Queensland to British New Guinea.

(Townsville, Cooktown, and Thursday Island.)

Articles.	Quantities.	Values in Sterling.
Anchors and Chain Cables	3	£
Arrowroot	80 lb.	3

Vegetables	5 pkgs.	1
Vinegar	8 galls.	11
Wine	20 galls.	2
		23
TOTAL VALUE OF EXPORTS	£4,680

NOTE (by Sub-Collector, Customs, Cooktown). N.B.—“These lists include only goods for which Warehousing, Import, or Export Entries have been passed at the Customs. A considerable quantity of *bêche-de-mer* and pearl-shell is simply transferred from the New Guinea vessels to foreign-going vessels on ‘Tra shipment Warrants,’ and consequently does not appear in the Statistical Return of Queensland imports and exports. It is optional with owners to tranship goods thus, and, being a little less troublesome than warehousing goods for exportation, they often prefer it, forgetting that they thereby exclude so much cargo from the Statistical Returns of the port. (Signed) H. BURKITT.”

Enclosure 8.

EXTRACT.—LETTER OF CAPTAIN MORESBY, R.N., to THE EDITOR OF “THE TIMES,” 1875. (?)

As to the character of this country, I can only speak generally within the limits of a letter. The New Guinea coast north of Torres Straits, as far as Yule Island, appears to be an almost unbroken level of swampy, mangrove-covered, and probably malarious country, on the low dreary shores of which the surf breaks unchecked by any barrier reef; a home of the black Papuan race, and wholly unsuited for white occupation.

Reaching Yule Island, some 30 miles west of Redscar Bay, we find a change. The Owen Stanley range approaches the coast to within 20 or 25 miles; but the high and healthy land of their slopes is cut off from the sea-board by a belt of this same low, mangrove-covered swamp, through which the rivers discovered by Her Majesty's ship “Basilisk” will in time afford steam water-ways, for their currents are too rapid for sail or oar, to the high lands within. At Redscar Head, 35 miles east of Yule Island, an entire change is found to have obtained; the shore is sheltered

sheltered by a great barrier reef, which uprears itself from bottomless depths, at a distance of from 4 to 10 miles from the shore, inside which lies calm navigable water, which ripples up to a coral beach, backed by round-topped swelling hills openly timbered, with rich tropical valleys between. From this point to the extreme east of New Guinea, the coast, as far as my knowledge and judgment go, is suitable for white settlement, and it is peopled by a mild Malayan race, with which it seems possible to live on terms of easy friendship.

The three considerable islands, Hayter, Basilisk, and Moresby, which lie off the east end of New Guinea and command the new route, are, I think, suitable for white habitation, especially the last, which attains an elevation of 1,500 feet, and is larger and more fertile than the others. The sago palm is particularly prolific on this island, and its harbours are numerous.

The north-eastern shores of New Guinea are apparently more tropically luxuriant than the south-eastern, and their lofty mountains, where a cool temperature is obtainable, appears more accessible. There is no barrier reef to create a succession of secure harbours, but the anchorages are sufficiently good and numerous. It must, however, be remembered that the natives, after passing Cape Vogel, appear to be a treacherous and savage race.

With regard to the natural wealth of this country, some certainties, probabilities, and possibilities exist, which should not be confounded, but disentangled, and rated according to their value. First, then, as to the certainties:—

New Guinea is rich in timber, which ought to form an immediate article of export. And here I would speak a word of warning against indiscriminate and wasteful felling, by pointing attention to the New Hebrides group, where the supply of sandal wood, once bountiful, has been all but exhausted by wasteful treatment.

New Guinea is fruitful in the sago palm, and the yield might be increased so as to form a permanent and paying export. Yams and roots are abundant, and might be cultivated to any extent for food or export; but the main source of wealth in New Guinea at present is the cocoa-nut, of which the supply appeared to me to be practically unlimited. I can scarcely give a better idea of the value of the cocoa-nut harvest than by quoting from a late report of the Consul Miller, of Tahiti, who says that the value of the coprah (dried cocoa-nut kernals) exported from Tahiti in 1874 was £20,191, and that of cocoa-nut oil (311 tons) £11,190. These products, actually in existence, would doubtless be the first support of an infant Colony, and to them I think its immediate attention should be directed.

The probabilities are as follows:—Pearl-shell, bêche-de-mer, and tortoise-shell fisheries would doubtless offer a paying return, but would need time and material for their development.

Tens of thousands of acres of low land could probably be cultivated for rice, cotton, and sugar-cane with profit. On my late visit to the New Hebrides group I was struck by the excellence of its increasing cotton plantations, and felt the importance of English industry in this direction as tending to make us sufficiently independent of the American supply. The cultivation of such crops is not, however, a task for European labour, and would doubtless fall to the lot of the Chinese in New Guinea, whose importation would be a matter of time. Jute and other fibres are also among the products existent in New Guinea. We found steel sand in Hall Sound and Milne Bay. The high grass lands, which, as far as my observation went, seemed to be better watered than the generality of Australian pastures, would doubtless afford runs to millions of sheep and cattle, and much of the high land appears suitable for coffee culture.

On the possible sources of wealth in New Guinea, by which I intend the mineral, too much stress has, in my opinion, been laid, and this with the risk of attracting the least valuable, because the least plodding, class of colonists. The only sign of mineral wealth seen by the "Basilisk's" company were the fragments of gold quartz picked up by us at Fairfax Harbour, Port Moresby. It is probable, for several reasons, that a mountainous country like New Guinea has not been forgotten by Nature in respect of minerals; but we must await the verdict of a geological survey as to the accessibility and amount of each deposit before we allow a consideration of them to enter into any calculation. The postponement of the discovery of gold in New Guinea is doubtless to be desired, for the restraint and assuredness of established law, the existence of easy inter-communication, the creation of a sufficient food supply, and the presence of a large balance of population engaged in the regular industry of civilised life are needed to mitigate the evils attending a gold rush, and to turn the new wealth with least delay into its true channels.

The wish that no gold may be found in New Guinea can be indulged in only by those who do not travel beyond first aspects, who fail to perceive that solvent and purifying forces exist in a healthy body politic, which, working by natural law, transmute such evils as may be dreaded here into final good, and who fail to consider the impetus that such an accidental force must give to the development of a country.

Enclosure 9.

EXTRACT.—LECTURE DELIVERED BY THE REV. S. McFARLANE ON "PAPUA AND PAPUANS." (*Vide the Brisbane Courier, January 30th, 1886.*)

If they wanted land they would have to arrange with the natives for it, and in the vicinity of Port Moresby they would frequently find as many as twenty different natives laying claim to one piece of land. He predicted that so far as the peninsula itself was concerned, the land question would in the future prove to be a difficult one. In the interior, however, they might take up as much land as they liked. Speaking of the question of the Government of New Guinea, he said it could even now be made self-supporting. They had for products, pearl-shell, bêche-de-mer, and cedar, and a royalty on these would recoup the expenses of governing the island. The proper way to govern it would be from Torres Straits, and that was the manner in which the Honorable John Douglas wished it should be governed. The central place of government should be a healthy spot, and for this reason he thought Torres Straits the most suitable place. If they settled at Port Moresby they would be 200 miles from the Gulf. If they had a depôt at Port Moresby and one at the east end of the island, and the head station at Torres Straits, the government of the place could be carried on by placing the various depôts within communication of each other by means of a government steamer. As for produce, there was such land as he had described. They had about fifty teachers all along the coast, and these had informed him of large quantities of cedar grown in that portion of the island. He would not be much surprised to find that if gold was ever discovered in New Guinea it would be on the Gulf. There was in that vicinity a spot about two days' journey from Katow, which had never yet been visited by white men, in which it was possible there might be gold. There was no doubt plenty of mineral wealth in New Guinea; but apart from that the Government could be supported by revenue in the manner mentioned.

Enclosure 10.

EXTRACT.—LETTER FROM CAPTAIN CYPRIAN A. G. BRIDGE, R.N., to MAJOR-GENERAL SCRATCHLEY, dated February 11th, 1885, relating to the Organization of a Government for Protected Territory in New Guinea.

I am of opinion—an opinion confirmed by several conversations with my distinguished friend, Mr. Chalmers—that New Guinea, as a dependency of Great Britain, may eventually be made self-supporting.

The true way to raise a revenue is to get it out of the products of the country. There are many things for which a market could be found in the neighbouring colonies that could be produced in New Guinea, without competing with the colonial industries. Cinchona, coffee, sago, arrowroot, cocoa, copra, cocoa-nut fibre, possibly cotton, might be obtained and exported without much risk of its being supposed that the native labour was in competition with the labour of our fellow-countrymen in Australia. The forests of New Guinea probably contain timber which would form a valuable export. I believe that it would not be difficult to teach the natives, who in many parts are industrious and ingenious agriculturists, to cultivate what has been mentioned; whilst it would not take very long to make them understand that the produce was to be handed over to the white chiefs to be sold to defray the cost of Government, any surplus being devoted to the benefit of the producers.

APPENDIX G.

THE MAI CUSSA.

MR. STRODE HALL to THE SPECIAL COMMISSIONER.

SIR,

Thursday Island, 1st June, 1888.

In handing you an account of my trip to the Mai Cussa and Chester Rivers, I beg to report as follows:—My instructions were—To verify and correct (if necessary) the reports brought in by Captain Strachan, Mr. Brew, and Mr. Chester; to make a flying survey of the Mai Cussa and Chester Rivers and their tributaries, and also of the coast as far as the western boundary of British New Guinea; and also to try and find out where the hostile tribe known as the "Togari men" come from. On no account was I to allow the boats under my command to part company, or the members of my party, who might be landed for any purpose, to be absent from the boats during night time. The party under my charge, consisting of Mr. G. A. Johnson, four natives of Prince of Wales Island, two from Mobiac, and four from Saibai, left Saibai in the cutter "Queen Victoria" and gig "Crystal" for Tauan on the 19th April, and on the following morning, after having filled our casks with fresh water, we left for Boigoo, where we arrived after a run of four and a-half hours. Here we hauled the cutter upon the beach for repairs to rigging, and left half our stores in charge of Kitab, the chief, so as to give us more room in the boats. The village at Boigoo, which consists of four or five very inferior huts, is situated on the northern point of the island, with an ironstone beach and a mud flat extending out for a quarter of a mile fronting it. The island itself is very low and closely resembles Saibai, having a large swamp in the centre of it. The natives could neither understand nor talk English so our conversations were carried on through the Saibai men acting as interpreters. They were very friendly, and from their gardens—which are extensive—they brought us cocoa-nuts, sugar-cane, and sweet potatoes, in exchange for tobacco. Whilst at Boigoo I got the following information regarding the tribe known as "Togari":—Togari is the name of the wood of which their canoes are built. The natives here have never seen any of this wood growing either on the mainland near here or on any of the adjacent islands. I was able to get a specimen of this wood from an old Togari canoe which is now lying on the beach at Boigoo, and have brought it in with me to Thursday Island. It is apparently a description of cedar. The Togari natives vary in colour from almost white to jet black. Their hair is curly and long. They wear short-sleeved shirts, made from the pith of a tree known to the natives here as "dum." Their noses are pierced through each nostril and also through the cartilage. The women wear a piece of twine round their waists, and a piece of cocoa-nut fibre passed between their legs, and the ends tucked under the twine. Their canoes are from 33 to 38 feet long, the longer ones being about 4 feet wide and nearly as deep. They have no outriggers, and so are only fit to travel during fine weather; they are propelled by paddles alone. The larger canoes are paddled by the men standing two abreast, but when they are fighting the men then stand in single file. They prefer to fight on the shore, as their canoes are very crank. Before leaving Boigoo, Kitab, the chief, asked me if I would take Awattie, a native of Boigoo, with me. As this man had been up the Mai Cussa on a previous trip—namely, with Captain Strachan—and I was told that he was able to talk to the mainland natives, I was very glad to take him. We left Boigoo on the 22nd instant and ran over to the mouth of the Mai Cussa, a distance of about 5 miles, anchored just inside, in front of an old Togari camp, the scene of the murder of Pino (the late missionary teacher of Boigoo), in $2\frac{1}{2}$ fathoms, low-water soundings. The river here is over a mile wide, and we could not get bottom with the lead at 13 fathoms in the centre. We found some fresh water close to the camp, and although it was very dirty we had to fill up our casks, as our supply was already running short. I also had a tree here branded with the broad-arrow. The following morning we got outside the river at slack water, intending to run to the westward on the flood tide, but as there was a strong south-easterly wind blowing and a nasty sea the boats shipped a great deal of water, which I was afraid would spoil our stores; besides as the water which we had got the previous day was already becoming tainted, I determined to run up the river. After having proceeded up for about 30 miles we came to its junction with the Wassen Cussa or Chester River. Here the width of the Mai Cussa is about 300 yards and depth of water 6 fathoms, whilst the Wassen Cussa is 150 yards wide with a depth of 5 fathoms. All the way up the Mai Cussa the banks were low and muddy, and lined with mangroves, with the exception of a few places, where the banks, for the distance of a few yards were, from 5 to 10 feet high, with a break in the mangroves. We anchored for the night in the Wassen Cussa, about a quarter of a mile below the junction. The next day we proceeded to beat down the Wassen Cussa, and at about 10 miles below the junction with the Mai Cussa we came upon another old Togari camp, off which we came to anchor. This camp, and several similar ones which we found later on during the trip, consisted of several "break winds" formed of twigs and saplings covered with paper bark, and large enough to contain about 300 men. All these camps were the same size, and appeared to be the same age. I think they must have been formed by the party who came along the coast last year. The Togari natives had evidently lived on shell-fish, cocoa-nuts, wallabies, and pigs. But I found no traces to prove them cannibals. I also found evidence to prove that they were accustomed to chew the betel nut, and in one camp three young betel palms were growing. I also saw a specimen of their mode of burial, which is quite new to this part of the country. A hole is dug about $4\frac{1}{2}$ feet deep, 7 feet long, and 3 feet wide, and the body, having been covered with paper bark, is laid therein; a flat roof of sapling covered with paper bark is then made about 2 feet above the body, and the hole is then filled in with earth and levelled off, the place being marked by a spear stuck in the ground at the head and a bow at the foot. On the 25th we continued our journey down the Wassen Cussa, and reached the mouth the following day. The mouth of this river is about three-quarters of a mile wide; the river itself is very similar to the Mai Cussa, and has a depth of from 5 to 12 fathoms. After some little search, I found a navigable passage that took us to the north-west point of Aderberdana Kaua, the most western of three islands situated at the mouth of the river. By referring to the plan you will see I have shown three islands here instead of two, as shown on the Admiralty charts of this portion of the coast. Here, I regret to say, we were stopped from proceeding further to the west, as the boats placed at my disposal were unsuited for the journey, the cutter drawing too much water to pass over the shoals, which are dry at low water from the coast to the reefs, which are shown on the Admiralty charts lying from 5 to 7 miles off the land, and the gig being unable to navigate with safety the heavy sea which was running

on

on the weather side of the reefs. Whilst searching for a navigable channel amongst these shoals, the mainmast of the gig was sprung at the thwart. However, this was remedied later on in the trip by Mr. Johnson making a very good substitute out of some timber we got when we returned to the river. Our fresh water, too, was running short; so I very reluctantly gave up the idea of getting to the western boundary line, and after having made a rough survey of the islands, we returned to the mouth of the Wassen Cussa, which we reached on the 29th. From here I began the work of completing a flying survey of both rivers and all their tributaries. We travelled up the Wassen Cussa as far as its junction with the Mai Cussa, exploring all the tributaries that we could get the boats into as we came to them, and running them up until they either became blocked with snags or else so narrow as to prevent further navigation. We also landed at several places, chiefly the sites of old Togari camps, and penetrated inland a distance of several miles for the purpose of examining the country. At the furthest point reached up each tributary, and also at most of the places where we landed, I had the broad-arrow cut in trees. From where the two rivers junction I followed up the main stream the same way, and reached our furthest point, about 50 miles from the mouth, and in latitude 8 degrees 33 minutes south on 9th May. Here the river was running through undulating open forest country, lightly timbered, and was only about 10 yards wide. The water was fresh, although we were not above tidal influence. Shortly after starting to return, the gig got stove-in on a hidden snag. However, when we came to a suitable place we hauled her up and repaired the damage so as to stop all leakage. On my way down the Mai Cussa I explored all the numerous tributaries running into it from the eastward, and also ascertained that one of its western tributaries below its junction with Wassen Cussa penetrated completely through to that river, by that means proving that the so-called Strachan Island is in fact two distinct islands. On a dry rock which I found in one of the eastern tributaries of the Mai Cussa, I planted a bottle containing a piece of paper, on which I put the date of our arrival there (16th May). On the 18th, whilst coming down the Tobeow Cussa, which heads out of Strachan Island, we met the only natives seen during our trip. They were a hunting party, consisting of from thirty to forty men from Määt, a village which was rather more than a day's walk in a south-westerly direction from where we met them. At first they were very frightened, but, after a good deal of persuasion on the part of Awattie (who was able to talk to them), four of them were induced to come on board the cutter, where they received a present of some tobacco. I then went ashore in the gig to where the rest of the natives were and gave them some tomahawks, knives, and tobacco, in exchange for bows, arrows, necklaces, and head dresses. These men were perfectly nude. Some have copied the Togari men by piercing each nostril besides the cartilage of the nose; some of the ornaments worn about their bodies are also copied from the Togari men. Several of the men were suffering from skin disease similar to that which is prevalent in Eastern New Guinea. These natives were of medium height, muscular, and active, and varied in colour. Their hair was short and curly. I was able to find the chief, named Parwee, and told him that one of the objects of the expedition was to find the whereabouts of the Togari men. He told me he did know how far they came from, but that they came regularly every other year, and that they made the same raids at his village that they do further along the coast to the east. Before leaving him I gave him a knife, a tomahawk, and some tobacco. The country on the banks of the rivers, at the back of the mangroves, is low-lying, open forest country, covered with long grass, and in some places swampy. The soil is very poor generally; but there are a few ridges from 10 to 20 feet high, which carry good dark loam, and are covered with dense jungle. The banks of the rivers are low and muddy, and lined with dense mangroves towards the mouths and palms towards the head. The timber growing inland is principally paper bark, ironbark, gum, and wattle. At three places up eastern tributaries of the Mai Cussa, we came across native gardens of from 1 to 3 acres in extent, containing yams, taro, sugar-cane, and tobacco. Fresh water was scarce, and I think that in a few weeks time the holes where we obtained our water from would be dry. I examined carefully all tributaries coming into the Wassen Cussa from the west, hoping to find communication with the sea, and also all eastern branches of the Mai Cussa, lest any should lead into the Fly River, but failed in each case to find any such communication or indication of such. I am convinced from what I saw that this is a separate system. We arrived at Boigoo, on our return, on the 23rd May, and found that the natives had all left for Tauan, and that the stores we had left were all safe and in good order. The following day, after a rough trip, we reached Tauan. Here we left the gig, after having hauled her up on the beach and covered her with the sails. On leaving Tauan we passed to the north of the Ormon Reef, and anchored for the night at Mobiae. The following day we reached Hawkesbury Island, where we anchored, and arrived at Thursday Island on the afternoon of the 28th. The natives I had with me worked splendidly, with the exception of the Saibai men, who were lazy, useless, and very insolent. The health of the party throughout the trip was excellent. The accommodation at my disposal on board the cutter was very limited, and I could hardly find a plank to lie down on at night. From the observations I took I ascertained that Captain Strachan greatly over-estimated the distance he travelled up the Mai Cussa and also the size of its tributaries. His description of the country on Strachan Island is also incorrect. The soil on the southern island is very poor, but that on the northern, where the ground is rather higher, is a little better. I was unable to find the very dangerous rock which he reports being 5 miles from the mouth and in mid-stream. I do not believe it exists. His plan is so much out of position that it is difficult to understand to what islands or creeks he refers. I found Mr. Chester's report on the Mai Cussa very correct. I cannot agree with anything Mr. Brew stated with regard to the Chester River, and some of his locations are very inaccurate. For instance, he places the mouth of that river 16 miles north of the mouth of the Mai Cussa, whereas it is really only about 7 miles, and in a western direction. His description of the country is equally incorrect and misleading. I am unable to complete my plan in time to accompany this report, but as soon as it is finished I will forward it to your Excellency.

I have, &c.,

C. E. STRODE HALL.

To His Excellency The Special Commissioner for British New Guinea.

APPENDIX H.

STATEMENT FURNISHED TO THE SPECIAL COMMISSIONER BY MR. W. WHITTON, OF THE "ALBATROSS" CUTTER.

On our way out to the Woodlarks we sometimes make the Alcester Islands first. During the south-east season there is an anchorage at the village on the north side of the western island. Alcester Island, or Tokuna, is the home of the Tokuna tribe, quite a roving race of people. They are the greatest shipwrights of the eastern end of New Guinea, and on landing at the village a number of large sailing canoes may always be seen on the stocks there. Most of the canoes of the Engineer Group, Foriba, Milne Bay, and South Cape, were built here or in other parts of the Woodlarks. The Tokuna people apparently only stay on their island while they are canoe building, for they have no gardens there, nor is there water. Their drinking water they bring from Woodlark Island. Once every year they form a fleet, and go to the Engineer Group and through a great part of the Lousiades. I have met Tokuna men at East Cape. Their last expedition mustered fourteen large sailing canoes, and they were away during parts of December, January, and February. Often when we visit Tokuna there are no natives there, and looking through the houses we see their pots and pans and baskets just as they left them. Two or three years ago they founded a village, Bugisse, at the western end of Woodlark Island, but they depend little on food of their own growing as they pass their time sailing from place to place, often staying months in each village. According to the fashion of New Guinea hospitality, they are not allowed to work, and when they leave their canoes are filled with "ki-ki" of all sorts. They leave presents of armshells, shell necklaces, stone tomahawks, and other valuables. A-pe-ana and Ga-re-tow are their chiefs, the former an old man and the latter middle-aged. They have told me that the Tokuna people originally came from Tokuna, or Toguna, on the north side of Sudest Islands, but they have the same language as the East Islanders (Panemote). Between Tokuna and Woodlark Island is a chain of small uninhabited islets. When we leave Dinner Island for the Woodlarks, after rounding Ventenant (Duou) on Normanby Island, we steer direct for a group of small islands which I surveyed and called the Albatross Group some months ago. It consists of fourteen islands or islets. A few small basaltic islands in the centre are surrounded by a circular reef at an average distance of 7 miles. A great part of this reef has from 4 to 7 fathoms of water over it, but along the northern side it rises a few feet above the water, forming beautiful tree-covered islands. Yan-iba or Evans Island is the largest, and in a sandy bay on its southern side are the three villages, a few hundred yards from each other. The population of Yan-iba is about 200; Tou-se-arua, an old man is the chief. Eguin, in the centre of the group, has sheltered anchorage. The small village has only ten or twenty natives belonging to it. All the islands are low; Egum, the highest, is about 150 feet. From this group, two high islands, Garwa and Koir-wata, of the Marshall Henry Group, can be seen. Sailing from Egum to the Woodlark Islands we generally make Bugisse, where there is a narrow anchorage for a small vessel. This is the new Tokuna village mentioned before. From Bugisse we sail to the north-west point. The district and tribe about there is called Marow. Through the hostility of the tribes from Mon-e-va-ove, the Marow people have retired to their villages in the bush. Proceeding along the north coast a couple of miles, we see a gap through the bush through which the natives drag their canoes overland into the large bay on the other side which is marked on the chart. A mile further east we see the village Mon-e-va-ove. A tree that he was felling killed a chief here in April, this year, and about the same time a man fell from a tree, and also several women died, so the Mon-e-va-ove people came to the conclusion that the Marow people had cast an evil spell over them. Now they are "talking fight," and the Marow have retired to their securest village in the bush. The next village, Noo-gueg-i, is about 6 miles along the coast. A little to the west of it, almost undiscoverable as we sail along, is a canoe passage through the mangroves to the large bay on the other side. The next place on the north coast is Oose-pe-mat-e, a very snug anchorage where in the old days many a whaler and trader got water. We are now in Wamena district. There are many villages in the bush belonging to this tribe. At the west corner of Richards Bay is the principal Wamena village, Kana-ki-boo-a, situated at the entrance of a pretty little lagoon. Many of the men speak very good English, some having been in Queensland, others in trading or labour schooners. On the left of the passage and facing the Wamena village are the four or five houses of the natives who escaped from the massacre at Guas-op, when the Wacoir surrounded the village at night and killed thirteen. The feud that was bound to ensue still exists, and the Wamena and Manemanena (the Laughlins) having made common cause with the refugees from Guas-op, they find their "natural" enemies in the Wacoir people. Yet we meet Wamena men who have married and settled down in Wacoir and who can be in safety in either tribe. From Kana-ki-boo-a, 5 or 6 miles to the north-east cape of Woodlark Island, and 7 miles north-east, brings us to the extreme eastern point, but we have to go to the second small island off it (Sim-o-wah, to find a passage to the west through the reef. In all the eastern part of New Guinea there are no villages. The low island to the eastward is Noo-bara, on the road out to the Laughlins (Manemanena or Na-di), barren islands, but producing a great quantity of cocoa-nuts. I believe a German, called Charlie, is still there, making copra for Hershheim and Co., of Matupi. Parties of Laughlin Islanders live for months on Woodlark Island, and return, their canoes loaded with taro and other "ki-ki," for which they pay cocoa-nuts. Coming west along the south coast of Woodlark Island the first indentation of the land is Wacoir Bay. This is the district of the enemies of Wamena, and two villages on the bay are named Koo-ma-row and Soo-a-ke-te, and the two most influential chiefs are Ma-ma-di and Kwarna. The latter, who speaks a little English, is called Jim Canoe. The Wacoir people do not make long voyages, consequently they have no large canoes. This Wacoir Bay is shallow and without a good anchorage, and in dealing with these people it is more convenient to anchor in the next bay, where Guas-op is marked on the chart. Leaving Wacoir Bay and proceeding westward we past a point and open the beautiful Guas-op harbour. Skirting the reef a little before we get to the first island, Le-au is the spot where years ago a French whaler was wrecked. Between the two islands Le-au and Wavi-ai is the passage though the reef. On the east side of the bay, near a conspicuous white tree, is where the ill-fated Guas-op stood. It was there the wrecked crew of the whaler lived, and whence they started in their boats. One boat's crew was killed on the north coast, but the man-of-war came and bombarded the bush about Guas-op, fortunately without doing any damage. The district of the west part of the bay is occupied by the Wumuda-muda tribe. They live in two villages on the coast and a number of small scattered ones, of four or five houses each, in the bush. Men-ari, the chief of the village Koir-wata, speaks a little English. At Yow-bonis village, on the small harbour, is a powerful sorceress, who can bring wind, rain or fine weather, health, or death.

death. She has a blind son who is also supposed to possess supernatural powers. Before leaving here, be sure to taste the Woodlark special luxury, land crab. The natives will bring plenty from Wavi-ai. Continuing our course west, we can go inside the reef to the point abreast of Round Island. Inside the large island Mapasa is a harbour, smooth as a mill pond. There is a small village here, and on the ridge of the mountain where the cocoa-nut trees are growing, are a few houses with three or four men. The Mapasa people have no gardens; their food is exclusively "rabair." Natives of other places think Mapasa very poor. Johnnie, quite a young man, is chief. Vessels going to the anchorage must go to the eastward of the island, the other passage is too shallow. Note! Send the natives for the splendid mangrove oysters (Sim-ki-ote). Kwairgi is an inlet in the high land a couple of miles west of Suloga, the name of the highest mountain of the Woodlarks. Through the mangroves at the bottom of Quoirgi Bay is a canoe passage to a shallow lagoon behind. The chief of Kwairgi is an old man, Tau-ro-ke-de. Leaving Kwairgi we pass all the high land, and a long narrow inlet into the low ground is seen. This inlet almost cuts the island in two and is called Oo-ka-da-o. Lemons grow here, the seeds of which were left by a captain long ago. The navigation from here to Bugisse requires care on account of the reefs, and a vessel drawing much water will have to keep a long way out. The land is low, and there are but few villages at the end. This brings us back to the western end of the Woodlark Island with its long reef and islands. The islands to the north-west that stretch in a chain to the Trobriands are Garwa and Koir-wata and Dugu-menu, Ewa (Jouvency), and Kitawa (Jurien Islands)—all, except Dugu-menu, inhabited. The chart of the Woodlark Group is very incorrect. Islands and reefs are down that have no existence now. It is useful only as a general idea of the group. There are two languages, the Murua or Mu-yua and the Tokuna; but as the people travel so much they understand many languages, particularly that used in the Engineer Group. Woodlark Island is called by the people on the south side, and all who live to the southward of it, Murua; on the north coast and in the Trobriands, as Mu-yua.

Cooktown, 5th June,

W. WHITTON,
Master of the Cutter "Albatross."

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COLONY OF WESTERN AUSTRALIA.

(CORRESPONDENCE RESPECTING PROPOSED ALTERATION OF CONSTITUTION OF.)

Ordered by the Legislative Assembly to be printed, 31 July, 1889.

Telegram from The Speaker, Legislative Council, Western Australia, to The Colonial Secretary, New South Wales.

Perth, 27 July, 1889.

HAVE been requested to telegraph to the Government, President, and Speaker of the Legislatures of Australasian Colonies as follows:—"The Legislative Council of Western Australia, finding, the passing of the Enabling Bill introduced in the Imperial Parliament with a view of granting Responsible Government to this Colony, menaced by serious opposition, and not likely for the present to be withdrawn, earnestly appeals for your assistance, and trusts that the Agent-General of your Colony may be instructed to press upon the Cabinet of Great Britain the necessity, in the interests both of Western Australia and of the Australian group generally, for the passing of the measure before the approaching prorogation. The following resolution, adopted by Legislative Council, has been telegraphed to Secretary of State:—"That this House desires to express its strong and unalterable opinion that the Colony has now reached a stage of development when the present Constitution is no longer adapted to its circumstances, and that the anticipated delay in the passing of the Enabling Bill will most seriously affect its material prospects, will give rise to universal irritation, and deal a fatal blow at that trustful confidence in the fair dealing and justice of the House of Commons, which has hitherto been reposed in a body credited throughout the civilized world with a reputation for sympathy with, and active support of, the principles of self-government, which is enjoyed by every other Colony of Australasia, and which is now demanded by Western Australia in accordance with the provision of the 32nd section of the Imperial Statute, 13th and 14th Victoria, chapter 59. The Legislature earnestly request that the Imperial Government will reconsider their position in regard to the Enabling Bill, and in the interests of this Colony, so strenuously menaced by any further delay in the introduction of self-government, will still endeavour to pass the measure during the current Session of Parliament. There is but one opinion throughout the whole of Australasia as to the extreme un wisdom and injustice of shelving the West Australian Constitution Bill for another year. Please supply copies President of Council and Speaker.'"

Telegram from The Colonial Secretary, New South Wales, to The Speaker, Legislative Council, Western Australia.

Sydney, 28 July, 1889.

YOUR telegram received. This Government fully sympathises with the Legislature and people of Western Australia in their desires and efforts to obtain Responsible Government, in the achievement of which the whole of Australasia have a deep and equal interest. Will instruct Agent-General to support your cause, and address circular despatch to other Colonies, urging united action:

Telegram from The Honorable P. O. Fysh, M.L.C., Tasmania, to The Colonial Secretary, New South Wales.

Hobart, 29 July, 1889.

JOINT or simultaneous addresses from Australian Parliaments now in Session is the better form of dealing with Western Australia's request. I await your reply before submitting on Tuesday next a resolution to Parliament.

Telegram

Telegram from The Colonial Secretary, New South Wales, to The Honorable
P. O. Fysh, M.L.C., Tasmania.

Sydney, 30 July, 1889.

I AGREE with you that the joint action of the Colonies is very desirable in the Western Australia difficulty, but the action of one Colony without knowing the precise action of the others would hardly be likely to produce the desired joint effect. Deliberation seems essential to effectual agreement. The question, for the Colonies outside Western Australia, is not one devoid of serious complications. Letter posted to you yesterday.

Telegram from The Colonial Secretary to The Agent-General.

Sydney, 29 July, 1889.

You will take occasion to represent to the Secretary of State that this Colony, in common with the other Colonies under Parliamentary Government, feels that its interest is bound up with the interest of Western Australia in her efforts to obtain a free Constitution. Without any appearance of forcing our views, you will urge the sound policy of the question being settled with as little delay as possible.

Telegram from The Agent-General to The Colonial Secretary.

London, 29 July, 1888.

DELIVERED your message to Secretary of State for the Colonies *re* Responsible Government for Western Australia. Lord Knutsford hopes Bill will be read second time this Session, but fears it will be impossible to pass it beyond that stage before prorogation Parliament, in consequence of opposition on both sides of House, late period of Session, and important necessary work to be accomplished.

Circular Despatch to The Governments of Victoria, South Australia, Queensland,
New Zealand, and Tasmania.

Sir,

Colonial Secretary's Office, Sydney, 29 July, 1889.

The present state of the measure before the Imperial Parliament to confer the powers of self-government upon Western Australia has engaged the anxious attention of this Government, and throughout the consideration of the matter from the first, both in England and in the Colonies, some collateral questions of first importance have prominently presented themselves which it would be well for the other Colonies to deal with in concert. It is assumed that all are agreed that it would be sound policy to bring all the Australasian Governments under one and the same form of Constitution. If this is assented to as a principle, the objection to Western Australia remaining a Crown Colony would be in its nature equally strong against the creation of any new Crown Colony out of her vast territory. Looking to the rapid developments of national life over the whole Continent, it is essential to the general welfare that the free institutions enjoyed by the more populous Colonies should be extended to all.

It seems, then, that the first matter of common concern is that Western Australia should receive a Constitution fully endowing her with all the rights and powers of self-government, like the other Parliamentary Governments in Australia; and that the time is come, owing to threatened delays and complications, when the other Governments should extend to her cause their united support.

In the next place arises the question whether it is not the imperative duty of the free Parliamentary Governments to oppose the creation of any Colony or settlement to be under a system of rule at variance with, and inferior to that enjoyed by, the vast majority of the Australian people. In this is embraced other questions of inferior grades of population and restricted rights of citizenship, and possibly of new casts of national character.

The whole subject of projected changes in Western Australia is so full of interest to each and all of the Colonies that a Conference for its mature consideration would, it is believed, be attended by beneficial results. Though it may be inconvenient for all the Governments to send representatives to such a Conference at the present time; still the subject is one closely affecting the dearest interests of all these young Australian commonwealths, and one of such urgency that it cannot be recalled if once settled under unpropitious influences. It seems, therefore, that it is deserving of some endeavour and sacrifice to bring it under the most effective and satisfactory examination and decision.

I shall feel much indebted to you if you can give early attention to the whole matter, and inform me of your views.

I have, &c.,

HENRY PARKES.

Telegram from The Honorable John Cockburn, South Australia, to The Colonial
Secretary, New South Wales.

Adelaide, 29 July, 1889.

PROPOSE suspending Standing Orders to-morrow, to pass addresses from both Houses to Her Majesty, in favour of Western Australian Enabling Bill. Tasmania also suggests addresses desirable simultaneous action. Please reply.

Telegram from The Colonial Secretary, New South Wales, to The Honorable
John Cockburn, South Australia.

Sydney, 30 July, 1889.

IMPOSSIBLE for us to take the course which you propose in the matter of the Western Australia difficulty. Irrespective of other pressing business, joint action to be effectual should be on definite and the same lines, and we have no knowledge of the precise representations you propose to make. Deliberation in respect to points of importance seems essential to sound agreement. Letter posted to you yesterday. We have instructed the Agent-General to support the cause of Western Australia with the Imperial Government.

Telegram from The Colonial Secretary, New South Wales, to The Honorable
Duncan Gillies, M.P., Victoria.

Sydney, 30 July, 1889.

THE following telegrams in reference to the Western Australia difficulty have been sent to South Australia and Tasmania respectively:—

Telegram to South Australia.

IMPOSSIBLE for us to take the course which you propose in the matter of the Western Australia difficulty. Irrespective of other pressing business, joint action, to be effectual, should be on definite and the same lines, and we have no knowledge of the precise representation you propose to make. Deliberation in respect to points of importance seem essential to sound agreement. Letter posted to you yesterday. We have instructed the Agent-General to support the cause of Western Australia with the Imperial Government.

Telegram to Tasmania.

I AGREE with you that the joint action of the Colonies is very desirable in the Western Australia difficulty, but the action of one Colony without knowing the precise action of the others would hardly be likely to produce the desired joint effect. Telegram from The Chief Secretary, Queensland, to The Colonial Secretary, New
South Wales.

Brisbane, 30 July, 1889.

WHAT action, if any, do you intend taking with reference to the difficulty which has arisen in the Imperial Parliament, *re* passing of the Western Australian Enabling Bill?

Telegram from The Colonial Secretary, New South Wales, to The Chief Secretary,
Queensland.

Sydney, 30 July, 1889.

YOU will receive letter from me to-day on the Western Australia difficulty. Beyond doubt it would be best for the other Colonies to act in concert in dealing with it. But for the outside Colonies the question is not devoid of complication, and it seems to me that consultation is essential to effectual agreement.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COLONY OF WESTERN AUSTRALIA.

(FURTHER CORRESPONDENCE RESPECTING PROPOSED ALTERATION OF CONSTITUTION OF.)

Ordered by the Legislative Assembly to be printed, 7 August, 1889.

Telegram from The Honorable Duncan Gillies, M.P., Victoria, to The Colonial Secretary, New South Wales.

Melbourne, 31 July, 1889.

Re Western Australia, have received your telegram and letter. Did time permit, your suggestion of a Conference would no doubt be a very useful one. It appears to me, however, at this juncture that if we are to be of real service to Western Australia it might be wise to follow the example of South Australia and ask our respective Parliaments to send an address to the Queen similar to theirs. I am firmly of opinion that should the united representations of these Colonies be successful in obtaining the grant of Responsible Government to Western Australia, everything else will follow. I have communicated in this sense with the Government of Queensland. The following is the South Australian address:—"To the Queen's Most Excellent Majesty: May it please your Majesty,—we your Majesty's loyal and dutiful subjects, the Members of the House of Assembly of South Australia, in Parliament assembled, humbly approach your Majesty with every assurance of our devotion to your Majesty's Crown and person, having in common with other Australian Colonies long enjoyed the advantages of self-government, under which our material prosperity has been increased, and our loyalty and devotion to your Majesty have continued unabated; and feeling that the same results will follow the granting of similar powers to our fellow colonists in Western Australia, we humbly pray that your Majesty will be pleased to speedily extend to Western Australia a full measure of Responsible Government, thus advancing the cause of federation, and completing Australian unity, by adding Western Australia to the group of loyal, contented, and autonomous Colonies."

Telegram from The Colonial Secretary, New South Wales, to The Hon. Duncan Gillies, M.P., Victoria.

[Urgent.]

Sydney, 1 August, 1889.

MUCH indebted to you for your frank expression of views on the Western Australia question. Must respectfully dissent from your opinion that if the Western Australia Bill were obtained everything else would follow. On the contrary, I fear the passage of that Bill into law might render the right settlement of other questions of highest importance extremely difficult. I still urge Conference. To meet your convenience let it assemble in Melbourne; though our Parliament is sitting we will arrange to come to you. A united agreement may be arrived at within a week or ten days."

Telegram from The Chief Secretary, Queensland, to The Colonial Secretary, New South Wales.

Brisbane, 31 July, 1889.

In regard to Western Australian Enabling Bill this Government are quite in accord with the suggestion contained in your letter of 29th July. Will you consult other colonies there anent. If Conference as proposed is held Sir Thomas M'Ilwraith will represent Queensland, and I would suggest Sydney as the place of meeting, and that Conference meet at earliest possible date.

Telegram from The Colonial Secretary, New South Wales, to The Chief Secretary,
Queensland.

Sydney, 1 August, 1889.

THANKS for your message. I send copy of message to Government of Victoria. I have a very strong view that the question is eminently one to be considered and settled in Conference, on account of the many subordinate questions involved. The difference between Melbourne and Sydney to you is only one of a few hours. The following is copy:—

Telegram from The Colonial Secretary, New South Wales, to The Hon. Duncan Gillies, M.P., Victoria.

Sydney, 1 August, 1889.

“MUCH indebted to you for your frank expression of views on the Western Australia question. Must respectfully dissent from your opinion that if the Western Australia Bill were obtained everything else would follow. On the contrary, I fear the passage of that Bill into law might render the right settlement of other questions of highest importance extremely difficult. I still urge Conference. Telegram from The Honorable Duncan Gillies, M.P., Victoria, to The Colonial
Secretary, New South Wales.

Melbourne, 1 August, 1889.

I FIND a difficulty in reconciling your letter of 29th July, in which you say that it is a matter of common concern that Western Australia should receive a Constitution, fully endowing her with all the rights and powers of self-government, like the other Parliamentary Governments in Australia, and that the time is come, owing to threatened delays and complications, when the other Governments should extend to her cause their united support, with your telegram of this morning dissenting from my view that if Western Australia Bill were obtained everything else would follow, and expressing the fear that the passage of that Bill into law might render the right settlement of other questions of highest importance extremely difficult. I can only gather from this that, under present circumstances, it is not your desire that the Bill should become law. You do not explain what it is that forms the ground of this fear. It is only because I feel strongly that these delays may be fatal that I am reluctant to go into Conference; but, in addition, it is extremely improbable that Western Australia would be able to join the Conference; and for all the Colonies, in her absence, to deal with a question vitally affecting her constitutional rights would be a course which, to me, would present considerable difficulty, unless such a course could be justified in the interests of Australia.

Telegram from The Colonial Secretary, New South Wales, to The Honorable Duncan
Gillies, M.P., Victoria.

Sydney, 2 August, 1889.

YOUR telegram of yesterday on the matter of Western Australia very much surprises me. I fail to see your difficulty in reconciling my letter of the 29th ultimo with my subsequent telegram, in which, while urging the consideration of all the features of the question affecting Australia as a whole, I say the passage of the Bill (meaning obviously enough its passage without such consideration) might render the right settlement of other questions of highest importance extremely difficult afterwards. The grounds of my fears are fairly indicated in my letter of the 29th. I think I am entitled to complain of the construction you put upon my language, when you say that you can only gather from it that it is not my desire that the Bill should become law, because, in prospect of its not being finally dealt with in England for some months, I urge that all the surroundings of the case should be considered; and, moreover, when this Government has instructed its Agent-General to give its direct support to Western Australia with the Secretary of State. Permit me to add that the many points of difficulty raised in your message—all easy of explanation, though not by the electric telegraph—seem to show forcibly the necessity for a Conference if any satisfactory agreement is to be arrived at.

Telegram from The Chief Secretary, Queensland, to The Colonial Secretary,
New South Wales.

Brisbane, 3 August, 1889.

WESTERN Australia Enabling Bill. This Government are urging Victoria, South Australia, and Tasmania to agree to your suggestion as to Conference.

Telegram from The Honorable P. O. Fysh, M.L.C., Tasmania, to The Colonial
Secretary, New South Wales.

Hobart, 3 August, 1889.

CIRCULAR. All that you urge may be admitted, and a Conference presently granted, or possibly Commissioners appointed by these Colonies to sit with those to be entrusted by the Imperial Parliament to bring up a report for the next Session of the Imperial Parliament upon the matters shadowed forth in this morning's and late English cablegrams, but the future Government and population of a country not embraced in the proposed boundaries of Western Australia need not delay the granting to her of local self-government.

Telegram

Telegram from The Chief Secretary, Queensland, to The Colonial Secretary,
New South Wales.

Brisbane, 5 August, 1889.

THE attitude of Victoria seems to preclude possibility of Conference. If position is not altered before Wednesday will reluctantly have to follow course pursued in South Australia.

Telegram from The Honorable John Cockburn, South Australia, to The Colonial
Secretary, New South Wales.

Adelaide, 5 August, 1889.

AM of opinion that the fact that Western Australia in not asking for all that we hope she may eventually obtain, viz., complete autonomy co-extensive with territory, does not afford a valid reason for withholding immediate response to earnest appeal for assistance. Our neighbourly feeling prompted us to render, without hesitation, the required help; but we are willing also to consider any proposals for formulating a united opinion on the subject of obtaining still further concessions. In addition to address to Queen, we have cabled Agent-General to press passage of Enabling Bill this Session.

Telegram from The Chief Secretary, Queensland, to The Colonial Secretary, New
South Wales.

Brisbane, 7 August, 1889.

SEE by Press telegrams you have decided in meantime to pass Address through Parliament regarding Western Australian Enabling Bill. This course will be adopted here. I still hope that a Conference may meet later on to deal fully with this most important matter.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CORPS OF COMMISSIONAIRES.
(INFORMATION RESPECTING.)

Ordered by the Legislative Assembly to be printed, 29 May, 1889.

[*Laid upon the Table of this House in answer to Question No. 11 of 29 May, 1889.*]

Questions.

11. MR. EDMUNDS *asked* THE COLONIAL SECRETARY,—
- (1.) How many men members of the Corps of Commissionaires are engaged in the Public Service?
 - (2.) Is it a fact that certain officers of that Corps are maintained by fees payable by the members for whom employment in this Colony is procured?
 - (3.) Is it a fact that every member for whom employment is procured in the Government Service pays a fee for such procurement?
 - (4.) Is it a fact that the Corps of Commissionaires is an organization in England, whose object, so far as its working in New South Wales is concerned, is to procure, as far as possible, employment for its members in this Colony?

Answers.

The following information has been supplied by the Major-Commanding the Sydney Division of the Corps of Commissionaires:—

- (1.) Three at the Government Asylum, Parramatta.
No; the Officers' salaries are paid from a fund contributed to by Officers past and present of the Imperial Services "Army and Navy" and the Marchioness of Westminster.
- (3.) Every man getting regular employment pays one week's wages to the Corps Funds, and an annual contribution of £1 10s. This goes towards paying the expenses of the Institution, which is self supporting. It receives no assistance from the Home or Colonial Governments.
- (4.) The Corps of Commissionaires is an organization whose sole object is to get respectable employment for men of good character who have served in the Imperial and Colonial Services, including police and volunteers, irrespective of where they come from. Half of the men at present in the Corps have been in the Colony several years before the Corps was started in Sydney.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DEATH OF WORKMAN EMPLOYED ON HAWKESBURY BRIDGE.
(PARTICULARS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 16 April, 1889.

Questions.

3. MR. WALKER asked THE COLONIAL SECRETARY,—

- (1.) In reference to the death of the man Baker, killed whilst working on the Hawkesbury Bridge, is it a fact that the scaffolding on which he was at work was of a dangerous character, inasmuch as on it there was a large hole unprotected by a trap-door or covering of any kind?
- (2.) Is it a fact that no inquest was held for two days, and that in the meantime the scaffolding was altered so as to appear safe.
- (3.) Were a number of the jury employés on the bridge?
- (4.) Did the sub-contractors, Messrs. Ryland and Morse, attempt to have the corpse buried, sewn up in a bag, without any coffin?

Answers.

The Secretary for Public Works has furnished me with the following replies:—The District Engineer reports, that he was not a witness of the accident nor of any of the circumstances referred to in this question; but he has obtained the following information of the occurrence:—

- (1.) The original staging of the scaffold was perfectly safe. Two or three planks were removed from it to form an additional higher staging on which deceased was working when he fell. The gap left in the lower stage by the removal of the planks allowed deceased to fall through on to the punt beneath.
- (2.) The accident took place on the afternoon of the 27th March, and the inquest was held on 29th idem. The removed planks were at first put back to their original position immediately after the accident but were at once raised again by order of the contractors, so that the state of things should be exactly as when the fatality occurred.
- (3.) Yes. Walter Cooper and Charles King, jurymen, were employés on the bridge.
- (4.) No.

NEW SOUTH WALES.

FOREIGN DESERTERS ACT, 1852.
(DESPATCH RESPECTING PROVISIONS OF—THE UNITED STATES OF MEXICO.)

Presented to Parliament by Command.

The Treasury, New South Wales, 20 August, 1889.

His Excellency the Governor directs the publication, for general information, of the following Order of Her Majesty in Council, extending the provisions of the "Foreign Deserters Act, 1852," to the United States of Mexico.

W. McMILLAN.

Downing-street, 13 June, 1889.

(Circular.)

Sir,

I have the honor to transmit to you, for publication in the Colony under your Government, a copy of an Order of Her Majesty in Council, extending the provisions of the "Foreign Deserters Act, 1852," to the United States of Mexico.

I have, &c.,

KNUTSFORD.

The Officer Administering
the Government of New South Wales.

At the Court at Windsor, the 28th day of May, 1889.

Present :

The Queen's Most Excellent Majesty, Lord President, Earl of Coventry, Lord Ashbourne.

WHEREAS by the "Foreign Deserters Act, 1852," it is provided that whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering and apprehending seamen who desert from British merchant ships in the territories of any foreign power, Her Majesty may, by Order in Council stating that such facilities are or will be given, declare that seamen, not being slaves, who desert from merchant ships belonging to a subject of such power, when within Her Majesty's dominions, shall be liable to be apprehended and carried on board their respective ships, and may limit the operation of such Order, and may render the operation thereof, subject to such conditions and qualifications, if any, as may be deemed expedient.

And whereas it has been made to appear to Her Majesty that due facilities will be given for recovering and apprehending seamen who desert from British merchant ships in territories belonging to the United States of Mexico under a treaty between the Governments of Great Britain and the United States of Mexico, signed at the City of Mexico on the 27th November, 1888 :

Now, therefore, Her Majesty, by virtue of the power vested in Her by the said "Foreign Deserters Act, 1852," and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared, that from and after the publication hereof in the London Gazette, seamen, not being slaves, and not being British subjects, who, within Her Majesty's dominions, desert from merchant ships belonging to citizens of the United States of Mexico, shall be liable to be apprehended and carried on board their respective ships. Provided always, that if any such deserter has committed any crime in Her Majesty's dominions, he may be detained until he has been tried by a competent Court, and until his sentence, if any, has been fully carried into effect.

And the Secretary of State for the Home Department, the Secretary of State for the Colonies, and the Secretary of State for India in Council are to give the necessary directions herein accordingly.

C. L. PEEL.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOVERNMENT ADVERTISEMENTS.

(RETURN SHOWING AMOUNTS PAID FOR, IN DAILY PAPERS.)

Ordered by the Legislative Assembly to be printed, 15 August, 1889.

[Laid upon the Table in accordance with a promise made by the Colonial Treasurer, in reply to a Question asked on 11th July, 1889.]

RETURN showing amounts paid for advertising in the *Sydney Morning Herald*, *Daily Telegraph*, *Australian Star*, and *Evening News*, from 1st July, 1888, to 30th June, 1889, as far as can be readily ascertained from the records of this Department (being the information asked for by Mr. Dowel on 11 July last):—

	£	s.	d.
<i>Sydney Morning Herald</i>	1,326	18	9
<i>Daily Telegraph</i>	1,228	2	9
<i>Australian Star</i>	245	4	3
<i>Evening News</i>	829	15	0

No vouchers for payments for services later than 31st March, 1889, have been received in this Department.

Department of Audit, 11th July, 1889.

E. A. RENNIE,
Auditor-General.

GOVERNMENT ADVERTISING.

Cabinet Minute, by which the public advertising is regulated.

THERE can be but little doubt that much waste of public money has been incurred by negligence or want of knowledge in giving Government advertisements to newspapers.

In every case, and in all Departments of the Public Service, the first thing to be considered is whether the newspaper affords a medium of publicity for the advertisement, and *no other consideration should be allowed to have weight*. For general purposes, it is certain that both the morning journals published in Sydney (the *Herald* and *Telegraph*) and the *Evening News* afford this medium of publicity. The same may be said, though with less certainty, of the weekly papers (the *Sydney Mail*, the *Town and Country Journal*, and the *Tribune*). Again, advertisements which require publicity in one portion of the Colony more than in another may properly be given to any newspaper possessing an established circulation in that district. In the Hunter River District, for example, the *Maitland Mercury* probably affords a better medium than any other newspaper.

These circumstances may be fairly taken into account when advertisements of a special character have to be ordered.

In no instance is any Government advertisement to be given as a matter of favour or patronage, or for any reason whatever apart from the ascertained value of the medium of publicity which the newspaper presents.

Cabinet approve.

Colonial Secretary's Office, Sydney, 6th December, 1887.

HENRY PARKES.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOVERNMENT PRINTING OFFICE.

(COST AND DESCRIPTION OF WORK DONE, FROM 1 JANUARY TO 31 DECEMBER, 1888.)

Ordered by the Legislative Assembly to be printed, 30 July, 1889.

ANNUAL RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 6th May, 1884, That there be laid upon the Table of this House annually, a Return showing,—

“(1.) The total cost, wages, and material of the printing, bookbinding, photography, and lithography done for each Department of the Public Service, at the Government Printing Office, during each year ending 31st December.

“(2.) A statement, in tabular form, showing the title of each book, pamphlet, and collection of photographs or lithographs published at the Government Printing Office during each year ending 31st December; such statement to show the number of copies of each produced, and the total cost of each set.

“(3.) That a statement of the number of copies, and the cost of printing (labour and material), be printed on the title-page of each Return or Departmental Report laid before Parliament.”

(*Mr. Hutchinson.*)

GOVERNMENT PRINTING OFFICE.

(I.)

CHARLES POTTER,
Government Printer.

Government Printing Office,
Sydney, 25 July, 1889.

Sydney : Charles Potter, Government Printer.—1889.

[9d.]

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GOVERNMENT PRINTING OFFICE.

(LETTING BY PUBLIC TENDER OF CERTAIN WORK EXECUTED AT.)

Ordered by the Legislative Assembly to be printed, 8 May, 1889.

Minute by The Government Printer to The Under Secretary for Finance and Trade.

Government Printing Office, Sydney, 8 May, 1889.

"7. MR. FRANK SMITH *to ask* THE COLONIAL TREASURER,—Is he favourable to letting by public tender "all printing work now executed at the Government Printing Office, excepting that required for the "purposes of Parliament?"

THE systems in vogue in other countries afford perhaps the best guide in the above matter of the advisability of letting Government printing out to contract, instead of maintaining a separate Department as at present.

I find (with the exception of England) that in all the chief countries of the world the same system is adopted as here.

In America, after having given the system of contracts a trial, it was abandoned. The whole of the printing required by the States Government is executed in the Government Printing Office, Washington.

In France.—The official organ of the Government and all work required in the conduct of Government business in Paris, as well as the proceedings of the Senate, are printed in the Government Printing Office. The printing required by officials in the departments or provinces is, however, done by local private firms.

In Germany until recently part of the work was let out on contract. But I am informed that within recent years a change has been made and that Government now does the whole of its printing.

In Austria there has been for many years established one of the largest and most complete Government Printing Offices in the world, where all Government work is done.

In England the work is entrusted to a number of large firms, who have done the printing for a great many years. But even in this case all the elements of a contract are absent. Tenders are not invited. The firms of Eyre and Spottiswoode, and Hansard & Co., have done the Parliamentary printing for the last forty years. The contract for book printing has not been revised since 1851; that for job printing has been in existence since 1850. In fact, in the chief branches large houses have for years had a monopoly. The Comptroller of the London Stationery Office stated, in evidence before a Committee of the House of Commons, that he could do the printing of *Hansard* for 45 per cent. less than was then being paid for it. He stated exorbitant over-charges, which it was impossible to control, were made for "corrections" in proofs, &c. Confidential matter is charged for at from 20 per cent. to 45 per cent. over ordinary prices.

In Canada and all the Australian Colonies the same system as here is adopted, and the whole of the work, both Parliamentary and general, is done in the Government Printing Office.

The author of the *Encyclopædia of Printing*, one of the greatest authorities on the subject, gives it as his opinion "that the Government Printing Office at Washington, U.S., annually saves the Government fully half a million dollars."

I do not know of any country in the world where calling for tenders (in the strict sense of the word) for Government printing is in vogue; and, while deprecating the performance of private work in the Department, my own opinion is that the introduction of a system of contract printing would lead to an enormous loss to the country, and to the amassing of large fortunes (as has been the case in England) by the contractors.

It is worthy of notice in this connection that this question has almost invariably been introduced when the discussion of the Estimates was pending, and has generally originated from parties more or less connected with the trade.

The question has at various times been discussed in the Legislative Assembly, notably on the following dates, viz. :—1 April, 1864; 15 March, 1866; 6 June, 1871; 12 June, 1877.

CHARLES POTTER,
Government Printer.

1889.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND FOR CEMETERY, AT CLIFTON, IN LIEU OF NOTIFICATION LAID ON TABLE OF HOUSE, 1 MARCH, 1889, VESTING THE LAND IN THE MINISTER FOR LANDS.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, } Grand Cross of the Most Distinguished
Governor. } Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the establishment and construction of a Public Cemetery at Clifton, for and towards the completion of which said works public funds are available, under the provisions of the "Appropriation Act of 1888"; and whereas the land hereinafter described is required for the construction of the said Works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say, in the "Wollongong Argus," circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purpose hereinafter mentioned, that is to say, for and in connection with the establishment and construction of a Public Cemetery at Clifton, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty for the purpose of the said last-mentioned Act, for an estate of inheritance in fee-simple in possession, freed and discharged from all trusts, obligations, estates, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said

Minister as a trustee, with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the land hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Southend and county of Camberland: Commencing at a peg marked broad-arrow over CEMETERY, on the right bank of Menarko Creek, at the intersection of the eastern side of the road from Bulli to Clifton; and bounded thence on the south-west and north-west by that side of that road, being lines bearing south 40 degrees 30 minutes east 2 chains 17 links, south 13 degrees 10 minutes west 2 chains 71 links, south 26 degrees 28 minutes west 1 chain $67\frac{2}{10}$ links, and south 50 degrees 28 minutes west 1 chain $60\frac{7}{10}$ links; thence on the south-west by a line bearing south 76 degrees 50 minutes east 3 chains $37\frac{7}{10}$ links to the north-west boundary of a reserve of 100 feet from high-water mark on the Pacific Ocean; thence by that boundary, being lines bearing north 50 degrees 28 minutes east $63\frac{5}{10}$ links, north 43 degrees 9 minutes east 1 chain $82\frac{2}{10}$ links, north 68 degrees 29 minutes east 2 chains $5\frac{2}{10}$ links, north 79 degrees 3 minutes east 2 chains $44\frac{2}{10}$ links, north 34 degrees 58 minutes east $26\frac{2}{10}$ links, north 11 degrees west 1 chain $21\frac{7}{10}$ links, north 17 degrees west 1 chain 18 links, north 52 minutes west $61\frac{2}{10}$ links, and north 4 degrees 40 minutes west $95\frac{2}{10}$ links to Menarko Creek aforesaid; and thence by that creek upwards, to the point of commencement,—containing 4 acres 1 rood and 18 perches, and said to be in the possession and occupation of the North Illawarra Coal-mining Co.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of June, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-second year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

GOD SAVE THE QUEEN!

1889.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND FOR THE EXTENSION OF THE PUBLIC CEMETERY AT GALONG.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER 44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, } Grand Cross of the Most Distinguished
Governor. } Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the extension of the Public Cemetery at Galong, for and towards the completion of which said works public funds are available; and whereas the land hereinafter described is required for the construction of the said Works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say, in the "Burrowa News," circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purpose hereinafter mentioned, that is to say, for and in connection with the extension of the Public Cemetery at Galong, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty for the purpose of the said last-

mentioned Act, for an estate of inheritance in fee-simple in possession, freed and discharged from all trusts, obligations, estates, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee, with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the land hereinbefore referred to, that is to say:—

All that piece or parcel of land situate at Galong, in the parish of Galong, county of Harden, and Colony of New South Wales: Commencing at the north-western corner of portion 171, 2 acres for General Cemetery, dedicated 18th January, 1884; and bounded thence on the east by a line bearing south 5 chains 60 links, part of which forms the western boundary of that portion; thence on the south by a line bearing west 20 links; on the west by a line bearing north 5 chains 60 links; and on the north by a line bearing east 20 links, to the point of commencement,—containing about 18 perches, and said to belong to the estate of John Nagle Ryan, deceased.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twentieth day of September, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-third year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH

GOD SAVE THE QUEEN!

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LETTERS ADDRESSED TO DRS. GERMONT AND LOIR.

(CORRESPONDENCE.)

*Ordered by the Legislative Assembly to be printed, 4 April, 1889.**[Laid upon the Table of this House in accordance with promise made in answer to Question No. 2 of 3 April, 1889.]*

Questions.

- (2.) Letters addressed to Drs. Germont and Loir:—MR. TRAILL asked the COLONIAL SECRETARY,—
- (1.) Is it true that a cable message addressed to Messrs. Germont and Loir, received in Sydney on 18th July, 1888, was not delivered to these gentlemen till the 21st August?
 - (2.) Was such cablegram noted as follows—"Mislaid.—H.P."?
 - (3.) Were the initials "H.P." written by Sir Henry Parkes, the then Colonial Secretary?
 - (4.) What was the reason for so long a detention as thirty-six days?
 - (5.) How was the cablegram mislaid, and by whom?
 - (6.) Is it a fact that two letters, one directed to M. Loir, the other to Messrs. Germont and Loir, care of General Post Office, Sydney, were sent to the Colonial Secretary's Office?
 - (7.) Are these the letters which the Colonial Secretary, replying to Mr. Lyne in November last, admitted to have been opened in the Colonial Secretary's Office?
 - (8.) Was there any indication on the exterior of such letters that they came from the Pasteur Institute, or any other source?
 - (9.) Is the explanation given to the daily papers by the Under Colonial Secretary, to the effect that the delay in delivering these letters to the addresses, in accordance with the facts as known to the Colonial Secretary?
 - (10.) Is it the case that other letters similarly addressed, but having no external indication of their source, were delivered to Messrs. Germont and Loir during the period when the Under Colonial Secretary alleges the addresses of those gentlemen were being sought in vain?
 - (11.) Is it true that the Under Secretary was resident in the same house with Messrs. Germont and Loir during that time, or at any time?
 - (12.) Is he aware of any reason why certain letters addressed to Messrs. Germont and Loir, or either of them, were sent from the General Post Office to the Colonial Secretary's Office, and there opened, while other letters, simultaneously received by mail, were delivered direct to those gentlemen?
 - (13.) Had the Post Office officials any instructions relating to any such letters?
 - (14.) If so, has he any objection to state what these instructions were?
 - (15.) Has any despatch or correspondence been received in this Colony from the Imperial authorities in relation to the opening or detention of the letters and cablegram above referred to?
 - (16.) If so, has he any objection to state what is the nature of such despatch or correspondence?

Answers.

SIR HENRY PARKES answered,—I will cause an explanatory Return to be made, giving the information which is required by this question. I may state, however, that I, as Colonial Secretary at that time, never saw any one of the letters addressed to those gentlemen. The "H.P." I imagine, must have been written by me, and it is exactly the thing I should write. If the telegram had been mislaid, I should write "mislaid" upon it, no doubt.

(1 & 2.) A message appears to have been received on 18th July last, and was delivered on 23rd August, having been mislaid. It is believed it is noted as stated, and was delivered as soon as discovered.

(3.) Yes.

(4 & 5.) The message was sent after hours to the private residence of the Colonial Secretary and inadvertently got mislaid; hence the cause of delay.

(6.) Yes, two letters, which in all probability were directed as stated, were received at the Colonial Secretary's Office from the Post Office.

(7.) Yes.

(8.) It would be impossible to say without seeing the documents.

(9.) Yes, as far as I am aware.

(10.) I cannot say.

(11.) Yes, part of the time, namely, from the beginning of July.

(12, 13, & 14.) No.

(15.) No.

 —

[Laid upon the] Table of this House in accordance with promise made in answer to Question No. 5 of
 13 August, 1889.]

Questions and Answers.

- (5.) Mr. Oscar Meyer:—Mr. Crick asked the Colonial Secretary,—
- (1.) What amount was paid to Mr. Oscar Meyer as expenses and remuneration in connection with the Melbourne Exhibition?
 - (2.) What is the total amount paid to this gentleman by the Government of New South Wales?
 - (3.) Will he delay any further payments to Mr. Meyer until he obtains the sanction of this House?

Sir Henry Parkes answered,—I have not been able to get this information; but I will lay a Return upon the Table, giving the required information. We shall not delay any payment that is necessary.

STATEMENT showing amount paid to Mr. Oscar Meyer as salaries, &c., in connection with the Melbourne Centennial Exhibition, as far as can be ascertained from the records of the Auditor-General's Department.

MINT.

(GOLD COINAGE STRUCK, &c.—DESPATCH RESPECTING.)

Presented to Parliament by Command.

The Treasury to The Colonial Office.

Sir,

Treasury Chambers, 13 November, 1888.

I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith, for the information of Lord Knutsford, the enclosed copy of a letter of the 9th instant from the Deputy Master of the Mint, and of its accompanying report upon the gold coinage struck at the Sydney Mint during the year ended 30th June, 1888.

I am, &c.,

R. E. WELBY.

[Enclosure.]

Sir,

Royal Mint, 9 November, 1888.

I have the honor to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the following Returns have been duly transmitted to this Department by the Deputy Master of the Sydney Branch of the Royal Mint, in conformity with the Order in Council of the 19th August, 1853 :—

I. Twelve Monthly Returns, showing the transactions in bullion of the Sydney Mint from July, 1887, to June, 1888, both inclusive. The amount of coin issued to the public in these months was as follows :—

1887.			1888.		
Month.	Sovereigns.	Half-sovereigns.	Month.	Sovereigns.	Half-sovereigns.
	oz.	oz.		oz.	oz.
July	44,944·92	Nil.	January	49,053·40	Nil.
August	43,147·12	Nil.	February	36,983·59	Nil.
September	49,051·36	Nil.	March	63,436·38	Nil.
October	45,713·46	Nil.	April	39,810·90	Nil.
November	14,381·75	17,207·19	May	40,063·11	Nil.
December	58,816·79	Nil.	June	61,936·71	Nil.

II. Four Returns of Waste in coining gold for the quarters ended—
 30 September, 1887,
 31 December, 1887,
 31 March, 1888,
 30 June, 1888.

III. Four Returns by the Board of Verification to the Governor of the Colony on the state of the bullion and coin in the Mint on the—
 30 September, 1887,
 31 December, 1887,
 31 March, 1888,
 30 June, 1888.

I have also to request you to submit to their Lordships my Report, enclosed, being the fifty-fifth, on the weight and fineness of the gold coins produced at the Sydney Mint during the year ended 30th June, 1888, this report being based upon the assay of Pyx Pieces transmitted by the Deputy Master in accordance with the provisions of the Order in Council before referred to.

A copy of the report has been forwarded as usual to the Deputy Master at Sydney for his information.

I have, &c.,

C. W. FREEMANTLE.

The Secretary, Treasury, S.W.

[Sub-Enclosure.]

[Sub-Enclosure.]

SYDNEY MINT.

FIFTY-FIFTH Report addressed to the Lords Commissioners of Her Majesty's Treasury on the weight and fineness of gold coins struck at the Sydney Branch of the Royal Mint, and transmitted to the Deputy Master for examination in accordance with the provisions of Her Majesty's Order in Council of the 19th August, 1853.

Pieces taken without preference by the Colonial Treasurer at the deliveries of the Sydney Mint :—

Half-year ending	Denomination of coin.	No. of pieces.	Total weight.	Average weight of a piece.	Average proportion of gold in 1,000 parts.
1887.			oz.	oz.	
31 December	Sovereigns	204	52,392	·2568	916·649
	Half-sovereigns	30	3,852	·1284	916·676
1888.					
30 June	Sovereigns	233	59,836	·2568	916·739

The standard weight of the sovereign is oz. ·25682, and of the half-sovereign oz. ·12841, and the standard fineness (in 1,000 parts) is 916·666.

9 November, 1888.

C. W. FREEMANTLE,
Deputy Master and Comptroller Royal Mint.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PARIS INTERNATIONAL EXHIBITION, 1889.

(CORRESPONDENCE WITH THE CONSUL FOR FRANCE RESPECTING.)

Ordered by the Legislative Assembly to be printed, 14 June, 1889.

The Consul for France to The Colonial Secretary.

Sir,

Sydney, 20 February, 1888.

I have the honor to enclose, for the information of your Government, a translation of extract from a Despatch of His Excellency the Minister for Foreign Affairs in France, addressed to me as the representative of that country in New South Wales, having reference to the International Exhibition to be held in Paris during the year 1889, and I beg the favour of your consideration of its contents.

I need not draw your attention to the results that would follow the participation of the prosperous Colony under your Government to this peaceful gathering of the world's industries. I may, however, point out that one of the most beneficial effects the representation on a scale worthy of your Colony's great resources and importance would undoubtedly be to add materially to extend to Continental and other nations a wider and more correct knowledge of the position held by New South Wales as the Parent colony of Australasia, from whose loins all the others have sprung—but none of whom can approach her in point of population, commerce, and revenue, and whose ports are open to the free intercourse of trading communities.

The approaching completion of the Panama Canal will necessarily greatly increase the commercial relations between the old and the new worlds, and in view of the possibilities which the perfection of this great enterprise opens out for the commerce of New South Wales, the participation of the Colony to the Paris Exhibition becomes a matter of the importance of which you are the best judge. The central position of New South Wales ports and the immense superiority of her harbours must soon command the attention of Europe as the natural terminus in the Southern Hemisphere for the distribution of the old world's products.

With regard to the trade with France alone, it will open the way for direct communication with those ports on the Channel which are situated in close proximity to the great manufacturing centres of northern France and Belgium, whence come the largest buyers of New South Wales wool, and the Colony's best customers for its staple produce.

I beg to draw your attention to the first paragraph in His Excellency's letter, having regard to the cordial action of the British Government, which, although not officially participating at this Exhibition, nevertheless offers all facilities and encouragement to the establishment of organizations having that object in view.

His Excellency also expresses a hope that the Colony of New South Wales will be represented on a scale worthy of its importance, and will take the place which its great resources, its industry, and its commerce assign to it in this peaceful competition of the industries of all nations in the capital of France.

I shall be greatly obliged, therefore, if you will give this communication your early consideration, and acquaint the colonists of New South Wales with the information therein contained as regards the holding of the International Exhibition of 1889 in Paris.

I beg to enclose translations of the various documents I have referred to above.

I have, &c.,

C^{TE} DE SÉQUIER,

Consul de France à Sydney.

[Enclosure.]

EXTRACTS from a letter from His Excellency the Minister for Foreign Affairs of France to the French Consul at Sydney, re the Paris International Exhibition of 1889.

Sir,

Paris, 10 October, 1887.

The British Government, without officially participating at the International Exhibition to be held in Paris in 1889, has, nevertheless, given British subjects in all parts of the Empire the fullest liberty to take part in it, and has shown itself ready to facilitate in every way the action of private and collective organizations having that object in view.

Under these circumstances, the Exhibition, which preserves its international character, will be open to agriculturists, artisans, engineers, artists, and from all countries, who may either singly or collectively express their desire to exhibit thereat.

In

In 1867 and 1878 every Foreign Government had formed a special Commission, whose President, assisted by an Executive Committee similarly appointed, undertook the organization of a national section at the Champ de Mars. The President was in direct communication with the French Administration or through the intermediate of a special Commissioner, who was appointed as Executive Delegate in Paris, and came to reside thereat with an appropriate staff.

This method, at once the simplest and most effective, seems to be susceptible of being adopted with advantage in your consular district, with the amendments that might be suggested in view of the possibility of abstention on the part of the Public Administration of the country.

In any case the necessity is apparent of forming, if such is possible in your district, a local "Exhibition Committee," with the support of Societies for the encouragement of arts, industry, and agriculture, of the Chambers of Commerce, or of already existing committee under the patronage of high notabilities, whose rank, influence, honorability, and French sympathies would be a guarantee of success. To this local element would be doubtless added such of our countrymen who have gained for themselves a respected position in the business section of the community.

A committee so constituted would act in the fullness of its independence, and might, if it were considered opportune, extend the limit of its operations by the aid of sub-committees established in other commercial and industrial centres of the territory, whose duty would be to canvass their respective districts, gather exhibits, and attend to the work of forwarding the same; and, in short, do all in their power to secure a successful representation in Paris of the industries of their countries.

Once such a committee is constituted, the appointment of a delegate would devolve upon its members, who, as well as their President, would be in direct communication with His Excellency the Minister of Commerce and Industry, Commissary-General. The selection of this delegate will be a delicate one, in view of the conditions which so important an appointment require, and as it is necessary to eliminate those persons who often desire this position with a view to use it in their own self-interest and profit, often at the detriment of the exhibitors and the Exhibition itself.

It may be necessary that the committees should grant an indemnity for their expenses, although it may be hoped that persons of distinction and independent means, residing in Paris, will readily fill without remuneration an enviable and honorable position, and offer their personal services to the Commissioners of their nationality.

In all cases the committee would have to provide for the expenses of its working staff in Paris.

Such are, sir, the main points which I think likely to answer best to the interests of intending exhibitors in your district, if they wish to secure in the most practical manner their successful participation at the International Exhibition of 1889.

I have had the honor, on the 1st September last, to forward you a note prepared by the General Commission, in which are stated the arrangements already taken for the methodical distribution of exhibits, their classification, their localisation by groups, according to their distinct nationalities of similar productions in the various buildings at the Champ de Mars and Quay d'Orsay, for transporting the same and placing them in position within the buildings, and for the preparation of catalogues. In the same note, to which a plan of the Exhibition grounds and buildings is annexed, the expenses which are to be defrayed by exhibitors are also stated, the ground-space being freely granted.

This note, to which the greatest publicity should be given, places you in a position to answer all questions that might be asked on the subject. If additional information was required by intending exhibitors, until a local committee is formed or a Commission appointed, you will be good enough to invite interested persons to address themselves to Mr. Berger, Director-General of the Administration of the Exhibition, Avenue de la Bourdonnais (Champ de Mars), à Paris.

I rely upon your devotion for the execution, in the manner best appropriated to the conditions of the country you reside in, of these instructions. You will be good enough also to take advantage of the good dispositions you may meet with on the part of the local Administration to obtain in favour of the products of the Colony of New South Wales all the advantages in the way of carriage rates, facilities of Custom House formalities, &c., which will permit that colony to come at the Champ de Mars and occupy the position to which she is entitled in this pacific competition of labour, intelligence, and industry.

I have, &c.,

The Minister for Foreign Affairs,
FLOURENS.

DEPARTMENT OF COMMERCE AND INDUSTRY.

International Exhibition of 1889, Paris—General Manager's Office—Foreign Sections—General Informations.

I.

THE Paris Exhibition of 1889 will be universal and international in character, as exhibits of agricultural, industrial, and artistic productions from all countries of the world will be received thereat.

The ground will occupy the following position:—

1. On the left bank of the Seine—the Champ de Mars and the river bank, the Esplanade des Invalides, and that part of the Quay d'Orsay lying between the Esplanade and the Champ de Mars.
2. On the right bank of the Seine—the park and the unoccupied portion of the Trocadero Palace.

The bridge of Jena, which joins the Trocadero grounds to the Champ de Mars, will also be enclosed within the Exhibition grounds.

The Exhibition will have four principal subdivisions.

I.—CHAMP DE MARS.

1. Palace of the Fine Arts (A)—Group I—Works of Art.

In this palace, which has an upper gallery, works of art will be exhibited in rooms, or groups of rooms, corresponding with the different foreign sections, by order of nationality.

2. Palace of the Liberal Arts (B)—Group II—Education and Instruction—Material of Schools and Teaching Apparatus for the Liberal Arts.

In this palace, which comprises a large central hall, surrounded with a gallery with an upper floor, the space will be divided in two sections, subdivided into classes—one for French and the other for foreign exhibits.

3. Gallery of various Industrial Products (C)—Group III—Furniture and accessories; Group IV—Cloths, Dress and its accessories, Tissues of various kinds; Group V—Extractive Industries—Rough Products and Manufactures.

The space of 90,000 square metres, with covered galleries, will be divided into three main divisions for each of the above-described groups of exhibits, each department being also subdivided into two parts. The one reserved for French exhibits will be further subdivided into classes; and the second, reserved for foreign countries, will likewise be subdivided, according to nationalities.

4. Hall of the Machinery (D)—Group VI—Industrial and Mechanical Working Plant—Electricity.

The hall will be divided into sections of classes, in each of which the various products will be exhibited according to nationalities, in the best manner which the supply of motive-power will allow.

II.—QUAY D'ORSAY.

1. Palace of Alimentary Productions (E)—Group VII—Alimentary Productions.

In this palace, which contains several upper floors, the international products will be exhibited according to the class to which they belong.

2. Galleries of Agricultural Products.

These galleries will be subdivided into sections, each devoted to a separate nationality.

III.—ESPLANADE DES INVALIDES.

- 1.—Open spaces planted with trees reserved as additional of space for the Agricultural Section.

2. Various Exhibitions; French Colonies and Protected States; Private Exhibitions of the various French Ministerial Departments; Social Economy; Hygiene and Sanitation, &c.

IV.

IV.—TROCADERO.

International Exhibition of Horticulture and Arboriculture—Group IX—Horticulture.

The spaces which can be affected to the different groups, both for foreign and French exhibits, have been already calculated on the basis of statistics furnished by previous Exhibitions.

The International Exhibitions of 1867 and 1878 in Paris had both comprised one grand main building, whose galleries, sometimes circular, sometimes rectilinear in shape, permitted the products of France and of foreign countries to be so grouped that the visitors could examine successively all the productions of the same class and of various national origin, or all the products of various classes from the same national origin.

This system resulted in the formation for each country of one special and well-defined section. It was carried out successfully in 1867, although the relegation of French and foreign agricultural exhibits in a distant portion of the Exhibition grounds was a departure from the general rule. In 1878 the system of 1867 was also adopted, but the abundance of exhibits was so great that the covered space within the Palace of the Champ de Mars was insufficient to contain them all, and it was found necessary to construct a number of annexes, disseminated without method throughout the grounds.

The plans adopted for the International Exhibition of 1889 have, by reason of their distribution, substituted a kind of "divided methodical order" to the old compact order adopted previously for the arrangement of exhibits.

II.

Ground-space gratuitously granted.

In conformity with the traditions of hospitality which ruled at the International Exhibitions held in Paris in 1855, 1867, 1878 and 1881, French and foreign exhibitors alike will not be charged any rent for the ground-space they may occupy.

Expenses to be paid by Exhibitors.

The French Administration will construct covered buildings for the agricultural, industrial, mechanical, and artistic productions which cannot be exhibited in the open air.

Exhibitors have, however, to provide, either collectively or singly, for all the expenses contingent upon the subdivision of these buildings, comprising the construction and decoration of partitions, ceilings, glass cases for exhibits, and furniture, the whole of these fixtures according to plans approved by the Administration. They also have to provide for expenses in connection with the flooring of the ground-space they hold, as the Administration, in conformity with Article 16 of the General Regulations, only provides the flooring of the roads and means of communication. As regards specially the flooring, the Administration may, in view of a more economical and homogeneous work, construct the whole of the flooring, and recover from exhibitors the quota due by each for this work. Exhibitors will also be held responsible for any damage done to these fixtures by themselves or their agents.

Watchmen and Cleaners.

Exhibitors have to provide for the salary and uniform of guardians entrusted with the watching and cleaning of the various sections.

Section of Machinery.

French and foreign constructors of engines, boilers, &c., will be admitted to tender for the supply of the motive-power which the Administration has to provide, according to Article 34 of the Regulations, for working the machinery exhibited. The conditions of the tenders for supplying motive-power by steam have already been settled.

Horticultural Exhibition.

Special regulations will be issued with regard to the permanent and temporary exhibition of horticultural products, and the conditions upon which the use of hot-houses may be granted.

Live-stock Exhibition.

If an exhibition of live stock takes place special regulations will be issued on the subject.

Carriage of Exhibits.

Arrangements have been entered into with the French railway companies to the effect that all products, except works of art or precious matters, intended to be exhibited will be charged at rates 50 per cent. below the ordinary rates of carriage.

The same reduction of 50 per cent. upon ruling rates will also be granted for all transport by sea on board the steamers of the Compagnie Générale Transatlantique and the Cie. des Messageries Maritimes.

As regards the internal moving of exhibits within the Exhibition grounds, the expenses connected therewith will be supported by the exhibitors; but the Administration, although granting to them the fullest liberty to employ whomsoever they choose, will do all in its power to allow them, under the most practical and economical conditions, the use of all the material and personnel which they may require for loading, unloading, and transporting their exhibits.

Customs and Octroi.

By a Presidential decree, dated the 25th August, 1886, all the buildings affected to the International Exhibition of 1889 will be considered as Customs bonded warehouses. Moreover, the Prefect of the Department of the Seine, by letter dated 28th October, 1886, has informed the Minister of Commerce and Industry that the same privilege will be granted as regards the Octroi of Paris.

Protection of Industrial Property.

The Administration will take the same measures to insure the protection of all industrial property as were taken in previous Exhibitions.

Catalogue.

A complete methodical catalogue of the exhibits of all nations, indicating the various places they occupy in the palaces, parks, or gardens, as well as the names of the exhibitors, will be compiled in the French language.

Each nation will be at liberty to publish, at its own expense, but in its own language only, a special catalogue of the products exhibited in its own sections, in conformity with the "specifications" which will be issued by the Administration.

The Director-General of the Exhibition,

GEORGES BERGER.

Approved.—The Minister of Commerce and Industry, Commissary-General, LUCIEN DAUTRESME.

The Consul for France to The Colonial Secretary.

Sir,

22, Bridge-street, Sydney, 13 September, 1888.

I have the honor to refer you to my letter of 20th February last containing translated copies of the Despatch of His Excellency the Minister for Foreign Affairs of France, on the subject of the Paris Exhibition of 1889. I have not yet been honoured with an acknowledgement of, or an answer to, that communication.

It may be, however, that your Government wished to be guided by the action of the Colony of Victoria, or that of other colonial Governments, before taking any steps in this matter.

Having since been informed that the colonies of Victoria, Canada, and New Zealand have signified their intention to exhibit in Paris, and be officially represented there next year, I think that I would not be justified in the eyes of my Ministry if I delayed any longer to ascertain the views of the Government and the public of New South Wales.

Having

Having previously communicated with you on that subject, I was thereby, as a matter of courtesy alone, precluded from taking any other steps, such as addressing myself to the Chamber of Commerce, or to the merchants and manufacturers of this city, until after the receipt of your answer.

I shall therefore be greatly obliged if you will give this matter your consideration, that in the event of your Government not seeing its way clear to officially participate in the Paris Exhibition of 1889, I might address myself to private exhibitors.

Accept, sir, the assurance of my most distinguished consideration.

C^{TE} DE SÉQUIER,
French Consul.

The Consul for France to The Colonial Secretary.

Sir,

Sydney, 5 December, 1888.

In reply to a cable message that I sent on the 28th ultimo, after the conference that I had the honor of having with yourself, I have this day received a telegram from His Excellency, Mr. Goblet, Minister of Foreign Affairs, informing me that, in spite of his renewed efforts on your behalf, the Commissariat-General of the Universal Exhibition of Paris has not the least space available, and that London Committee alone can allot a place for the New South Wales exhibits.

His Excellency desires me to express to you his regret under the circumstances, and at the same time to remind you that the inability of the French Government to accede to your request is caused by the delay occasioned by the Colony in replying to its invitation.

I have, &c.,
C^{TE} DE SEQUIER,
French Consul.

The Colonial Secretary to The Consul for France.

Sir,

Colonial Secretary's Office, Sydney, 6 December, 1888.

I am much obliged by the trouble you have taken to represent the case of this Colony in desiring to obtain space at the Paris Exhibition.

I fear there is no course open to this Government but to retire from taking any part in the Exhibition.

I have, &c.,
HENRY PARKES.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC GATES—RICHMOND RIVER DISTRICT.
(RETURN OF, WITH CONDITIONS.)

Ordered by the Legislative Assembly to be printed, 2 July, 1889.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23rd May, 1889, That there be laid upon the Table of this House,—

“ A Return of the Public Gates, with conditions, in the Richmond River District.”

(*Mr. Ewing.*)

PUBLIC GATES in the Electorate of The Richmond.

No. of Gate.	To whom granted.	Description.	Conditions.
6	Barnes and Smith Bros.	Gate, distant about 17 miles from Casino, on the road from Casino to Mount Lindsay, at a place known as “Croak’s Waterhole,” near the south boundary of portion No. 3, parish of Runnymede, county of Rous.	
107	Barnes and Smith Bros.	Gate not less than 11 feet wide, with a wicket 4 feet wide for horsemen, on the road from Grafton to Solferino, on Coal Range, and distant about 3 miles from the crossing of Barrett’s Creek, parish of Hassan, county of Drake.	
108	Barnes and Smith Bros.	Gate not less than 11 feet wide, with a wicket 4 feet wide, on the road from Grafton to Solferino, at the boundaries of Tempe and Yulgilbar Runs, near Ogilvie’s Gap, parish of Yarralkiarra, county of Drake.	
153	W. C. Bundock	Gate not less than 11 feet wide, on the road from Casino up the Richmond River towards Queensland, at fence about $\frac{3}{4}$ mile south of Wiangaree, and within W. C. Bundock’s 631 acres, together with a small wicket for horsemen, parish of Wiangaree, county of Rous.	Gate approaches to be metalled and kept in repair by applicant.
154	W. C. Bundock	Gate, not less than 11 feet wide, on the road from Casino up the Richmond River towards Queensland, at fence about 1 mile north of Wiangaree, and near the north boundary of W. C. Bundock’s 163 acres, together with a small wicket for horsemen, parish of Wiangaree, county of Rous.	
155	W. C. Bundock	Gate, not less than 11 feet wide, at fence at McLeod’s Lagcon, about 3 miles north of Wiangaree, together with a small wicket for horsemen, parish of Wiangaree, county of Rous.	

No. of Gate.	To whom granted.	Description.	Conditions.
201	S. Garrard	Gate not less than 11 feet wide, with a wicket for horsemen, on the road from Blakebrook to Lismore, at the north-west corner of M. Garrard's 57 acres conditional purchase, portion No. 10, parish of Blakebrook, county of Rous.	
202	S. Garrard	Gate not less than 11 feet wide, with a wicket for horsemen, on the road from Blakebrook to Lismore, at the crossing of Boerie Creek, within A. Cheeke's 201 acres, portion No. 6, parish of Blakebrook, county of Rous.	
488	Executors of the late Mrs. M. Girard.	Gate not less than 11 feet wide, together with a wicket for horsemen, on the road from Lismore to Gundurimba, at the north boundary of W. Wilson's 163 acres S. P., portion No. 2, parish of Lismore, county of Rous.	
489	Executors of the late Mrs. M. Girard.	Gate not less than 11 feet wide, together with a wicket for horsemen, on the road from Lismore to Gundurimba, at the south boundary of W. Wilson's 494 acres, S. P., portion No. 1, parish of Lismore, county of Rous.	
820	Donald Campbell.....	Gate not less than 11 feet wide, with a wicket for horsemen, on the road from Casino to Coraki, at fence on the west boundary of D. Campbell's 162 acres, portion No. 3, parish of East Casino, county of Richmond.	
821	Donald Campbell.....	Gate not less than 11 feet wide, with a wicket for horsemen, on the road from Casino to Coraki, at fence on the east boundary of D. Campbell's 172 acres, portion No. 5, parish of East Casino, county of Richmond.	
836	H. F. Smith.....	Gate not less than 11 feet wide, on the road from Casino to Mount Lindsay, at fence on the south boundary of H. F. Smith's 50 acres, portion No. 8, parish of Runnymede, county of Rous.	
890	W. C. Bundock	Gate not less than 11 feet wide, with a wicket for horsemen, on the road from Casino to Queensland, at fence on the south boundary of J. White's (now W. C. Bundock's) 320 acres conditional purchase No. 2, parish of Wiangaree, county of Rous.	The approaches to the gate to be kept in repair.
1048	Crook Brothers	Gate not less than 12 feet wide, on road leading from Teven Crossing to G. Cooper's 40 acres conditional purchase, portion No. 65, at fence on the northern boundary of G. Roberts' (now Crook Brothers) 40 acres conditional purchase, portion No. 110, parish of Tuckombil, county of Rous.	
1049	Crook Brothers	Gate not less than 12 feet wide, on road leading from Teven Crossing to G. Cooper's 40 acres conditional purchase, portion No. 65, at fence on the southern boundary of B. Cooper's (now Crook Brothers) 40 acres conditional purchase, portion No. 97, parish of Tuckombil, county of Rous.	
1235	J. Hodgkinson	Gate not less than 11 feet wide, on the road from Ballina to the Tweed and Brunswick Rivers, at the north boundary of J. Hodgkinsons (now the Australian Joint Stock Bank's) 80 acres, portion No. 20, parish of Ballina, county of Rous.	
1236	J. Hodgkinson	Gate not less than 11 feet wide, on the road from Ballina to the Tweed and Brunswick Rivers, at the south boundary of J. Hodgkinsons (now the Australian Joint Stock Bank's) 80 acres, portion No. 20, parish of Ballina, county of Rous.	

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC WORKS ACT AMENDMENT BILL.

(MESSAGE No. 10.)

Ordered by the Legislative Assembly to be printed, 4 April, 1889.

CARRINGTON,

Message No. 10.

Governor.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to alter the constitution of, and mode of appointing the Parliamentary Standing Committee on, Public Works, to empower such Committee to appoint Sectional Committees, and for other purposes hereinafter set forth.

Government House,

Sydney, 4th April, 1889.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

No. 3.—Railway Construction Branch.

Railway Construction Branch, Public Works Department,

Sir,

Sydney, 18 April, 1889.

In compliance with the request contained in the circular of the Under Secretary, dated 16th January, viz., that I would cause to be prepared annually a report upon the operations of this Branch during the preceding twelve months, I have the honor to report as follows:—

The Railway Construction Department was separated from the Department for the Management of Railways by the "Government Railways Act of 1888," becoming operative on 22nd October, 1888.

At the commencement of the year 1888 there were in hand eight railway contracts, viz.:—

Tenterfield to Queensland Border.
 Hawkesbury River Bridge.
 Hawkesbury to Gosford.
 Hornsby to St. Leonards.
 Illawarra Railway Contract No. 2 (from Waterfall to North Clifton).
 Illawarra Railway Contract No. 3 (from North Clifton to Clifton).
 Blayney to Cowra.
 Michelago to Cooma.

The following lengths were opened for traffic during the year:—

Tenterfield to Wallangarra	Jan. 16	11 miles.
Mullet Creek to Gosford	" 16	10 "
Blayney to Cowra	Feb. 13	47 "
Portion of Illawarra Railway, Contract No. 3 (from North Clifton to Clifton)	July 23	2½ "
Portion of Illawarra Railway, Contract No. 2 (from Waterfall to North Clifton)	Oct. 3	10 "

The unfinished works at the end of the year were:—

Hawkesbury River Bridge.
 Hawkesbury to Mullet Creek Station.
 Hornsby to St. Leonards.
 Michelago to Cooma.

These works are all approaching completion.

In Appendix A, I give a brief description of all the lines mentioned, together with a statement of payments to the contractors on works in hand during the year. I may here state that I have in course of preparation a detailed description of all extensions taken in hand since my report of March, 1876. This information will be forwarded as soon as completed.

A staff of surveyors has been engaged during the year in the survey of various new lines, and in the improvement and permanent staking of others authorized in previous years.

In Appendix B will be found a statement descriptive of these lines of survey, with a table of the cost.

I have, &c.,

JOHN. WHITTON.

APPENDIX A.

Tenterfield to Wallangarra.

This extension commences at a point 381 miles 45 chains from Newcastle, and terminates at 392 miles 42 chains, being a distance of 10 miles 77 chains.

The contract for the works was carried out by Messrs. M'Arde and Thompson, as representing Stephens & Co., to whom the contract was let. The earthworks are not of a heavy character. The principal work of importance is the bridge over the Tenterfield Creek, at 388 miles 50 chains, which consists of six 42-inch timber under-trusses, resting on brick piers and abutments.

Stockyards for Tenterfield are erected on this extension near the beginning of the section. The works at the Border Station carried out by this Department consist of a joint goods-shed on the New South Wales side, the widening of the passenger platform and erection of a verandah for the New South Wales trains on the Queensland side, a joint stockyard on the Queensland side, and the necessary connections and extension of the respective roads on either side of the Border. A platform has been made at Sunnyside, 387 miles 31 chains. The line was opened for traffic on the 16th January.

Hawkesbury to Gosford.

Portion—Mullet Creek to Gosford.

This length forms part of contract No. 3 of the Southern and Northern Junction Railway, let to G. Blunt, commencing at the Hawkesbury River, 36 miles 60 chains, and terminating at Gosford, 50 miles 48 chains. Owing to delay in completing embankments 5, 6, 8, and 10, a portion only of the contract, namely, that from 40 miles 40 chains to 50 miles 48 chains, could be opened for traffic, a temporary station being erected at the head of Mullet Creek as the southern terminus. The works on this extension are of a heavy character. Between 41 miles 42 chains and 42 miles 52½ chains the railway is in tunnel (= 1,991 yards). This tunnel has been constructed for a double line, and has been lined with brick throughout. It was originally intended to be only 84 chains in length, but the treacherous nature of the ground at the southern end rendered it desirable to extend it for a length of 6½ chains.

There are two iron bridges built for double line, both of the same construction—one over the Woy Woy Creek, at 45 miles 47 chains, and the other at the Broadwater, over the entrance of the Narrara Creek, at 49 miles 40 chains. The superstructure consists of continuous plate girders, extending over three spans of 66 feet, with plate cross girders and timber deck. The piers are formed by 5-foot cast-iron cylinders in pairs, filled with concrete. Timber approaches are built at each end.

A

A commodious station has been made at Gosford, and a platform and waiting-shed built near the crossing of the Woy Woy Creek at 45 miles.

The works were finally inspected and the iron bridges tested on the 12th January. The line was opened for traffic on the 16th January.

Blayney to Cowra.

The contract for this extension was let to Mr. J. S. Robertson.

The line was practically finished at the end of 1887, but there still remained some road-lifting, boxing up, and trimming to be done. It was finally inspected on February 8th, 9th, and 10th, and opened for traffic on the 13th February. The contract was 45 miles 13 chains in length, but in addition to this the main line between the junction and the station at Blayney was duplicated, this work being also carried out by Mr. Robertson.

The principal work on the contract was the tunnel (308 yards in length) through the hill south of Carcoar Station. This tunnel, which is for a single line, was lined with concrete, and is the first of its kind in this Colony.

Concrete has been exclusively used for the culverts and piers to bridges.

Several creeks of considerable size are crossed, as for instance, Mackenzie's Creek, Belubula River, Coombing Creek, Mandurama Creek, and Wangoola Creek, to provide waterway, for which a series of 26-foot timber openings have in each case been erected. The station at Carcoar is the most commodious on this line. In order to render this station-ground more accessible the original formation was lowered for a length of 1 mile 6 chains, extending through the tunnel, which had to be lengthened in consequence. The increased hardness of the earthworks was the subject of claim on the part of the contractor, and new prices had to be arranged. The other stations are :—

				miles	chains.
Mandurama	at	187	45
Lyndhurst	"	191	0
Baker's Crossing	"	194	0
Burley Jackey...	"	202	10
Woodstock	"	206	50
Holmwood	"	214	60

Water has been provided for engine purposes at 199 miles 15 chains by sinking a well. At Cowra a supply of water is obtained from the river Lachlan, near the road bridge, for the use of the station and the town. This work was completed early in the year.

Illawarra Railway—Contract No. 3.

Portion—North Clifton to Clifton.

This length forms the hitherto unopened portion of contract No. 3 of the Illawarra Railway, and extends from the 34-mile peg to 36 miles 60 chains at Clifton Station. Messrs. Proudfoot and Logan were the contractors. The portion was opened for traffic on the 23rd July, 1888, a temporary station at North Clifton having been made for the purpose.

The works include a tunnel through the Coal Cliff 1,093 yards in length. This tunnel was designed to be 1,056 yards long, but the treacherous nature of the ground necessitated its lengthening at each end. In connection with the culvert at the crossing of Stony Creek, at 34 miles 61 chains, a considerable outlay was necessary in the shape of inlet works. In Clifton township a slip having occurred which had the effect of throwing a railway bridge out of position, and of producing the subsidence of bank 99, this bank was removed and the material got rid of by tipping over the cliff on the land of the North Illawarra Coal-mining Company. The centre line was altered for about 20 chains by bringing it nearer to the hill; an approximation to a surface line was thus obtained, and one that could be easily kept in repair if further slipping took place. This work was commenced on February 17th, and completed April 20th, 1888.

The cuttings between Bulli and Clifton gave a good deal of trouble. This portion had been opened for public traffic in the previous June, before the earthworks were properly finished, and the work done after that date was carried out by day labour, and was necessarily costly. It was completed on March 20th, 1888.

Illawarra Railway—Contract No. 2.

Portion—Waterfall to North Clifton.

This length forms the unopened portion of contract No. 2 of the Illawarra Railway from 24 miles to 34 miles, which was let to Messrs Rowe and Smith.

This line was finally inspected on the 1st October, and opened for traffic on the 3rd. The works include seven tunnels of a total length of 3,498 yards, constructed for a single line, and lined with brick throughout; also, a timber-trussed bridge of seven spans of 42 feet each, over Port Hacking Creek, and some large brick culverts, viz., two of 15 feet, two of 20 feet, and one of 30 feet. The earthworks are extremely heavy.

The wet weather which prevailed throughout the year 1887 hindered the making of bricks for the tunnel lining, and was, further, the cause of a number of earthwork slips more or less serious. The works, which should have been completed by 31st December, 1887, were thus only handed over for traffic on the 3rd October, 1888.

A platform has been erected at Helensburg, at 27 miles 30 chains, and one at Otford, near 30 miles 15 chains, and a junction with the Metropolitan Coal Company's line has been made near 27 miles 70 chains.

Hawkesbury

Hawkesbury River Bridge.

The construction and erection of this bridge was let to the Union Bridge Company of New York. The contract was signed on May 20th, 1886, and two and a-half years were allowed for completion, so that the time expired on November 20th last. The superstructure of the bridge consists of 7 (seven) spans, and is entirely of steel; the distance from centre to centre of the piers is 416 feet. The design of the superstructure is of an American type; the top boom alone being riveted and made rigid throughout—the vertical struts or posts, the diagonal ties, and the bottom boom or chord have pin attachments—the diagonals and members of the bottom chord being eye bars. The piers consist of concrete enclosed in a steel and iron skin up to near low-water level; above this they are of masonry. No. 1 is the shallowest pier, the bottom being about 100 feet below high water; No. 6 is the deepest, and its base is 162 feet below high water; Nos. 5 and 6 piers were the first attempted, but owing to the taper at the lower end of the caissons it was found impossible to keep them in their right position; afterwards the other caissons were altered so as to make the sides at the bottom vertical instead of tapered. No. 5 pier was so much out of line that the masonry could not be built upon it as it was; an attempt was made to sink a crescent-shaped piece at the west end to afford the additional support required. This was a failure, and had to be abandoned. Afterwards, the end of the existing caisson was corbelled out with large stone blocks to receive the masonry. The caisson of No. 6 pier, during sinking, got out of line, out of distance, and twisted, and was considerably out of plumb. The question of distance was overcome by increasing the length of No. 6 span 4 ft. 3 in. The twist was not so great that the masonry could not be built upon it; and, before stopping on the rock, which was ultimately reached, the top came over, so as to enable the masonry to be built upon it, in line with the rest of the piers. The question of the propriety of building up the masonry when the caisson below was in this inclined position was referred by the contractors to Sir John Fowler, who recommended its adoption. The alteration in the length of span No. 6 has caused delay in completion of the contract, the necessary steel-work having only arrived in the Colony in December.

The work done during 1888 was as follows:—

South abutment built.			
No. 1 pier	—	masonry finished.	
2	—	45 ft. sinking, and masonry built.	
3	—	60	”
4	—	Masonry finished.	”
5	—	6 ft. sinking, and masonry built.	”
6	—	30	”
North abutment built.			
Superstructure.			
No. 4 span	put in position	—	May 25th.
1	”	”	—July 12th.
2	”	”	—Sept. 8th.
3	”	”	—August 16th.
7	”	”	—October 6th.

Hawkesbury to Gosford.

Mullet Creek Works.

The unopened portion of No. 3 contract was still incomplete at the end of the year.

Banks 8 and 10 were finished at the beginning of the year, settlement having practically ceased. Banks 5 and 6 still continued to subside. Bank 6 afterwards arrived at a satisfactory state, leaving bank 5 as the only one giving trouble. At the present date this one is also finished.

The quantity of earth and rock tipped into banks 5, 6, 8, and 10 during the year was 125,261 cubic yards, and the total put into those banks over the quantity originally estimated, was, up to the end of 1888, 468,351 cubic yards. The permanent-way has been laid over the whole of this length.

Hornsby to St. Leonards.

This contract, which was let to Mr. E. Pritchard, should have been completed at the end of the year. Delay has occurred chiefly through the neglect or inability of the contractor to obtain sleepers.

The contract originally comprised a length of 10 miles 69 chains, but owing to uncertainty as to where the terminus should be, orders were given not to proceed with any work beyond the 10-mile peg, and the proclamation of the line extended only to this point.

The contract up to this point is now complete.

There are no works of special interest on this line, but the line is rather remarkable for the large number of private level crossings and overbridges which had to be granted to satisfy the demands of the numerous landowners.

The present terminus at 10 miles is far removed from the main road, and the whole line will be practically useless, and, if opened for traffic, must be worked at a loss till the extension to Milson's Point is carried out.

Stations and platforms have been erected at:—

1 mile	40 chains	—	Pearce's Corner.
2 miles	60	”	—Eastern Road.
3	”	37	” —Beechworth Road.
5	”	0	” —Gordon.
6	”	40	” —Lindfield.
7	”	30	” —Roseville.
8	”	30	” —Chatswood.

Michelago to Cooma.

This portion of the Goulburn to Cooma extension was let to Messrs. Walker and Swan. It commenced at 224 miles 55 chains and ended at 263 miles 48 chains, being a length of 38 miles 73 chains. Afterwards the works were stopped at 261 miles 68 chains, and the line deviated into the town of Cooma, the new terminus being at 264 miles 45 chains.

There is one tunnel on this contract 196 yards long at 239 miles; it is made for single line, and lined with brickwork.

The only large brick culvert is on the Gaugoandra Creek, at 239 miles 57 chains, and has a diameter of 20 feet. Other important rivers and creeks are spanned by timber bridges and viaducts, as follows:—

Michelago River, at commencement of contract, spanned by 8-26 feet timber openings.

Ingalara Creek, at 232 miles 48 chains, by 5-42 feet spans, with timber under-trusses and trestles on brick piers.

Colyer's Creek, at 236 miles 4 chains, by 5-26 feet timber openings.

Bredbo River, at 244 miles 43 chains, by 10-42 feet spans on the skew with timber under-trusses on pile trestles and brick abutments.

Umaralla River, at 252 miles 47 chains, by 5-42 feet spans with timber over-trusses on squared pile trestles, and 40-26 feet timber openings; also, 12-26 feet timber openings detached from the main viaduct to give additional space for flood-waters.

Cooma Creek, at 258 miles 26 chains, with altogether 15-26 timber openings on the skew. The permanent-way was commenced about the beginning of the year, and at the end of December about 37 miles in a direct line, not including sidings, had been laid.

Stations at Bredbo, Bunyan, and Cooma, and platform at Umaralla, have been constructed. Works for water supply at Umaralla River and Cooma are in progress.

The contract should have been completed at the end of the year, but owing to delay in obtaining sleepers, it will not be finished until about the end of May.

STATEMENT of payments to the contractors on works on the following extensions during 1888:—

Contract.	Amount.	
	£	s. d.
Hawkesbury Bridge	102,817	4 1
Hawkesbury to Gosford	43,490	6 6
Tenterfield to Queensland Border	6,562	17 10
Blayney to Cowra	16,851	3 8
Sydney to Kiama, section 2... ..	63,353	5 4
Do do 3... ..	21,256	12 4
North Shore Railway	76,953	5 0
Michelago to Cooma... ..	100,575	16 5

WORK PERFORMED BY THE RAILWAY SURVEY BRANCH IN 1888.

Allandale to Wollombi.

In compliance with the wishes of a deputation of the residents from Wollombi and Cessnock, the Minister, in February, ordered a trial survey to be made of this route.

Two deviations, which more than double the distance surveyed, have also been run. The districts traversed are important; near the Allandale end the coal lands are attracting attention.

A survey was made some years ago to connect the Western and Northern Railways, which included this length, but all the records were lost in the Garden Palace fire.

The length of the surveyed line is 28 miles.

The trial plan and section have been prepared.

Grafton to The Tweed.

The first survey made was from Casino to Byron Bay, *via* Lismore, a distance of about 46 miles, but the plans of this were destroyed in the Garden Palace fire.

During 1883-4 the survey was continued from Byron Bay, *via* Brunswick, to Murwillumbah, a distance of 36 miles; and about the same time a survey was commenced in Grafton and carried on to Casino, a distance of about 60 miles.

The coast line between Byron Bay and Chinderah, *via* Brunswick and Cudgen, was also commenced in 1885. Since that time a large amount of deviation for the improvement of the line has been made, and, of this, much has been adopted.

By the end of 1888 the position of the survey was as follows:—About 92 miles of the improved line, commencing from Grafton, had been permanently staked, leaving a length of about 14 miles to Byron Bay yet unfinished.

Working plan and section have been in part prepared.

From Byron Bay to Murwillumbah the line had been roughly marked out and prepared for final staking. On the Chinderah route the portion between Brunswick and Chinderah had been prepared for this operation, leaving a length of 12 miles between Byron Bay and Brunswick to prepare for final staking.

The sum of £1,980,000 was voted in 1884 for this line.

Cootamundra to Temora, Temora to Barmedman, Barmedman to Hillston.

This line was projected in the first instance as a "feeder" to the Great Southern Railway at Cootamundra from Temora only. The survey was commenced in July, 1888, and subsequently extended to Barmedman. An application then being received from Hillston, on the Lachlan, for a connection with Coolamon, on the Hay extension, it was considered advisable to extend the Cootamundra-Barmedman line to Hillston instead; this portion is still in progress.

The lengths of the sections surveyed are:—Cootamundra to Temora, 34 miles 65 chains; Temora to Barmedman, 22 miles 50 chains. The trial plans and sections of the whole of the line to Barmedman have been prepared.

Jerilderie to Deniliquin.

The plans of the original trial survey of this route were lost in the Garden Palace fire.

This line, which would complete a connecting link between the New South Wales and Victorian railway systems, was commenced in July and finished in October, 1888. The length of the connection is $44\frac{3}{4}$ miles.

Trial plan and section have been completed, and also the Parliamentary plan and section.

Molong to Wilcannia, *via* Parkes and Condobolin.

All information respecting the original surveys was destroyed in the Garden Palace fire. The survey, however, only extended to Condobolin.

In 1882 trial surveys were made, and the route afterwards permanently staked for a line from Orange, *via* Borenore and Molong, to a point near Forbes, 275 miles from Sydney. This survey was extended to Condobolin, and thence to Wilcannia. For connecting this proposed line with Parkes a trial survey was made from $251\frac{1}{2}$ miles, *via* Flagstone Creek, to that town, a distance of about $10\frac{1}{2}$ miles. From Molong to Condobolin by this route is 112 miles, and to Wilcannia 270 miles, making 382 miles in all.

A portion of the line from Orange to Molong was constructed, but that from Molong to near Forbes was, in 1884, rescinded, and the route from Borenore, *via* Cudal, Toogong, and Eugowra, to Forbes, substituted and permanently staked. Recently, however, this route has been discarded, and that *via* Molong in part resuscitated.

The working plans and sections of the line, as originally staked, from Molong to 275 miles had been plotted, but the resurvey now made as far as 241 miles cancels this portion.

The work of the year 1888 has included the making of trial surveys for improvement of the alignment of the permanently-staked line between Molong and 241 miles, to bring it within the category of a light line, and the trial survey of another line from this point into Parkes, a distance of 23 miles. The survey of the latter, known as the Bumberry route, was in progress at the end of 1888.

One of the improvements mentioned above has been in continuing the line through Molong Station and round the north and west of the hilly ground, instead of a direct route across the hills, as laid out originally.

In 1884 a sum of £1,050,000 was voted for the line between Forbes and Wilcannia.

Marrickville to Liverpool.

Several trial lines have been surveyed in past years, commencing in 1884, *viz.*:—One *via* Belmore to the south of the route that has been finally staked, and two *via* Bankstown and Lansdown Creek to the north of that route. The line actually adopted prior to 1888 followed an almost direct line from Canterbury to Liverpool, crossing George's River twice.

During the year 1888 another trial survey was made passing to the north of Bankstown, and the staked line was also improved by two deviations which were made for the purpose of reducing the earthworks entailed by the use of a ruling gradient of 1 in 100.

The length is $13\frac{3}{4}$ miles. The working plan and section of the line as finally staked have been plotted and nearly completed, but the deviations since made have yet to be worked up.

Bowling to Burrowa.

This survey which is about 30 miles in length has been undertaken during the year, and is still in progress. About one-third of the work has been completed.

Blacktown to Blayney.

An exploration of this country was made in October by direction of the Minister along the Warragamba and Cox Rivers, *via* Mount Werung. The result showed that had a railway to be constructed along this route the work would be of a very costly nature, and the gradients extremely objectionable.

Kiama to Jamberoo.

On representation by the residents, a surveyor was sent in December to survey a new route for connecting Jamberoo with the existing railway into Kiama. This survey was about half completed at the end of the year. Its length will be about $5\frac{1}{4}$ miles.

One of the surveys for the Illawarra Railway was taken through Jamberoo, but the route was not adopted.

Kiama to Nowra.

Deviations have been made on the staked line between Kiama and the crossing of the Shoalhaven River, on the Kiama to Jervis Bay Extension, which will much reduce the cost of construction at those places.

Sutherland to Kurnell.

This survey was commenced in August, and finished in November. The line is projected to connect the site chosen for the Noxious Trades with the Illawarra Railway at Sutherland, 15 miles from Sydney. Its length being a little under 11 miles.

The trial plan and section have been completed.

Goulburn to Crookwell.

In 1883-4 a trial survey was made to connect Crookwell with the Southern Railway at Yarra. A line was also run from Breadalbane, connecting with the first line from Yarra, and subsequently a deviation was surveyed *via* Grabbengullen.

During 1885-6 a trial survey, which was afterwards approved for final staking as the permanent route, was made from Goulburn *via* Woodhouselee to Crookwell; and from a point on this line, a branch line to Teralga, a distance of 15 miles, was surveyed.

The working plan and section of the staked line were plotted, but since then, and during the year under review, considerable deviation has been made.

In 1884 the sum of £259,500 was voted for this line.

The Balmain Lines.

In 1887 trial surveys were commenced from Homebush and Strathfield on the Western Line *via* Five Dock, across Long Cove to Long Nose Point. Another survey, starting from Tempe on the Illawarra Line, crossing under the Western Line at the Petersham Viaduct, has been made to this point. All these lines meet at Leichhardt, on the Southern shore of Long Cove.

During the year 1888 two other trial lines were made between Tempe and Petersham Viaduct. These not proving satisfactory, another deviation was laid out, which has been adopted.

The plans and sections of the various trial surveys have been prepared, and Parliamentary plan and section of the adopted route, from Tempe to Long Nose Point, have been forwarded to the Minister.

The Dural Lines.

At the latter end of 1887 and early part of 1888 trial lines were run to connect Dural with the Western Railway. One of these started from Parramatta, and a deviation connects this line also with Westmead. Another line, in continuation of the Rosehill Branch Railway, was run to meet the Parramatta and Dural survey.

The route adopted for submission is that leaving the present railway at Westmead.

The length of the adopted line is a little over 11 miles.

Trial plans and sections have been prepared.

The Inverell Lines.

The first route surveyed, for connecting Inverell by railway with Glen Innes, was *via* Swanbrook Creek, giving a distance of $45\frac{1}{2}$ miles. A deviation from this route, *via* Wellingrove, has been permanently staked, and the working plan and sections completed.

From Kentucky a line was surveyed to Inverell, resulting in impracticable gradients; but a renewed exploration being made, a good route was found. This line passes through Bundarra.

A short alternative line was laid down to make Uralla the connecting point on the main line instead of Kentucky. This connection was $5\frac{1}{2}$ miles only in length. Trial plans and sections of these lines are ready.

The length to Inverell from Kentucky, *via* Bundarra, is 82 miles.

There has also been surveyed an independent line from Uralla, *via* Yarrowick, which joins the Guyra to Inverell line at Tingha. Guyra and Inverell have been connected by trial survey, the distance being 55 miles. Plan and section are complete.

Diagram sections of all the proposed lines to Inverell, and a large diagram plan showing them all, have been prepared.

For the line from Glen Innes to Inverell the sum of £578,000 was voted in 1884.

Eden to Bega.

Surveys between Eden and Bega were commenced in 1881. Routes have been tried *via* Pambula, Merimbula, Candelo, &c. The line which had been adopted for final staking, prior to 1888, went *via* Pambula, and was 34 miles in length. In 1888 various deviations were made and permanently staked, making the total distance 37 miles.

The working plans and sections of both lines have been prepared.

The sum of £606,000 was voted for this line in 1884.

Musclebrook to Cassilis.

The surveys for this line were commenced in 1882. They all pass through Merriwa. Various deviations have been tried, and the best route selected and permanently staked.

The working plans and sections have been plotted, and the Parliamentary plans were nearly completed at the end of 1888.

An amount of £700,000 was voted for this line in 1884.

Hornsby to St. Leonards.

This line, as permanently staked, terminated at Crow's Nest, at St. Leonards, a distance of $11\frac{1}{2}$ miles from Hornsby.

Starting at a point $8\frac{1}{4}$ miles from Hornsby, a branch $3\frac{3}{4}$ miles was laid out to Ball's Head, on Port Jackson. The branch line has been abandoned, while of the main line to Crow's Nest 10 miles only have been

been under construction, the present terminus being at Gore's Hill. From this point trial surveys were made and plans and sections prepared for continuation to the waters of Port Jackson, terminating respectively at Robertson's Point (Cremorne), Blue's Point, and Milson's Point. Of these the latter only has been found favourable for the construction of a railway.

Plans, sections, and estimates have been prepared and submitted.

City Extension.

A survey has been made and plans and sections prepared for a proposed double line of railway from Redfern to the Circular Quay, *via* Kent and Sussex Streets and Dawes Point. The length of this line is 2½ miles.

Plans and sections have also been in preparation for a continuation of the present railway at Redfern, through Hyde Park, to a terminus at King-street.

Eastern Suburbs Railway.

A preliminary survey has been made for a double line of railway to serve the Eastern Suburbs, starting from the end of the line *via* Dawes Point at the Circular Quay, and passing through Darlinghurst, Woollahra, Waverley, and Randwick, skirting the Randwick racecourse, thence through Waterloo, and joining the Illawarra Railway at Erskineville. There are four tunnels on this route, and the total length of the line is 8½ miles.

Plan and section of the line are ready, and estimate is being prepared.

APPENDIX B.

EXPENDITURE on Lines under construction during 1888.

Extension.	To end of 1888.			During 1888.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.
Homebush to Waratah	1,934,146	13	5	212,332	1	7	2,146,478	15	0

STATEMENT of the average number of Men Employed on Railway Contracts, and the Amounts Paid to Contractors, in each year, from 1883 to March, 1889.

Year.	Number of Men.	Amount.
		£
1883	7,278	1,222,000
1884	9,163	1,588,000
1885	9,810	1,677,000
1886	7,470	1,451,000
1887	3,671	862,000
1888	1,606	488,000
1889*	504	60,000

* To the end of March, including retention money paid to contractors on completed contracts.

No. 4.—Land Valuer's Branch.

Minute by Mr. Land-Valuer Thompson to The Under Secretary for Public Works.

Subject: Annual Report of the Work of the Valuation Branch of the Public Works Department.

Department of Public Works, Valuation Branch,
Sydney, 15 May, 1889.

IN compliance with the circular instructions of the Under Secretary for Public Works, No. 89/155 P.W., I have now the honor to submit a Report of the work of this Branch for 1888.

During the year claims to the amount of £108,033 11s. 1d. for compensation for land taken for railway and tramway purposes were received and reported on. The number of claims settled during the same period was 155, and the amount paid, £84,327 6s. 7d. At the close of the year there were 245 cases unsettled from various causes, but in none of them is delay attributable to this Branch, nor can any of them be regarded as arrears. Numerous resumptions have also been made under the "Lands for Public Purposes Acquisition Act," for sewerage, water supply, cemeteries, and other purposes.

In addition to the foregoing, the following, which are beyond the ordinary or routine work of the Branch, may be mentioned:—

1. The Land Valuer had to attend to several arbitration cases, and to collect evidence therein; to make special reports on many important matters; and to furnish estimates of cost of resumptions for public purposes, such, for instance, as the proposed quadruplication of the railway from Redfern to Homebush.
2. A large quantity of extra clerical work was done, such as the compilation of a Deed Register of all railway lands, which involved a careful and laborious search of over 3,500 documents, and extraction therefrom of many particulars. Also the collection and entry in registers and ledgers of particulars of all resumptions of land under the "Land for Public Purposes Acquisition Act" resumed prior to the transfer of this Branch to the Public Works, and a large amount of other work consequent upon that transfer.
3. Considerable progress has been made by Mr. Rae (draftsman in this office) in the important work of accurately defining the boundaries of the railway lands upon the working plans.

Statement showing work executed by this Branch since its initiation is annexed hereto.

J. B. THOMPSON,
Land Valuer.

ABSTRACT of the Total Quantity and Cost of Land taken for Railway Purposes to the 31st December, 1888, under the Government Railways Act of 1858.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REAL PROPERTY ACT.
(LEASEHOLD PROPERTIES BROUGHT UNDER PROVISIONS OF.)

Ordered by the Legislative Assembly to be printed, 14 June, 1889.

[Laid upon the Table in accordance with promise made in answer to Question 3 of 17 May, 1889.]

3. Real Property Act:—*Mr. Traill*, for *Mr. Edmunds*, asked the Colonial Secretary,—
- (1.) Is it a fact that only a very few proprietors of leasehold interests have taken advantage of the Real Property Act to register their titles?
 - (2.) How many leaseholds have been registered under that Act, and where are the properties situated?
 - (3.) Are the registered proprietors original lessees, or are their titles derived through those lessees by assignment, or under lease?
 - (4.) If it is a fact that there are only a few registered leaseholds under the Act, will he ascertain from the proper authorities at the Land Titles Office what the reasons are, and whether the form of the certificate issued to applicants for leasehold registration is one reason?
 - (5.) Has the freehold estate been brought under the Act in any (and, if so, in what) cases in which leaseholds have been brought under it?

Mr. McMillan answered,—Upon inquiry of the Registrar-General, I find that these questions will entail a large amount of labour and research, and that it will take considerable time to prepare the answers. I will endeavour to obtain the information asked for, and will lay it upon the Table in the shape of a Return in the course of a week or fortnight.

LEASEHOLD Properties brought under the provisions of the Real Property Act.

No.	Property.	Title, how derived.	Remarks.
1	2 roods 37 perches, lots 2 and 3 of the Pymont Estate, city of Sydney; and 2 roods 8 perches, lot 4, and part of lot 5 of the said estate.	Original lessee.	The freehold has not been brought under the Real Property Act.
2	11 acres, lots 27 to 35 inclusive of a subdivision of St. James' Glebe, on the South Head Road.	Original lessee.	do do

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SUPPOSED FOSSIL MAN.

(FOUND NEAR ORANGE—REPORT OF GEOLOGICAL SURVEYOR ON).

Ordered by the Legislative Assembly to be printed, 30 May, 1889.

Sir,

Geological Survey Branch, Department of Mines,
Sydney, 29 May, 1889.

Observing in the annexed notice in to-day's *S.M. Herald* that the supposed "petrified man," said to have been found in a marble quarry in the Orange district, was on view at 294, Castlereagh-street, I inspected it this morning, in company with Mr. David, Mr. Etheridge, Mr. Slee, and Mr. Carne, of this Department.

We were allowed to do so on payment each of one shilling admission. It is quite unnecessary to describe the specimen, as it is unquestionably an artificial production. It consists of white-veined marble that has been rudely carved into the form of a human body and smeared over with clayey white-wash. The surface in parts is highly polished, as though it had been washed with some acid solution. We can therefore entirely confirm the opinion of Dr. Souter, of Orange, who first examined the specimen, that it is certainly a piece of rude carving, and not petrified human remains as it has been represented. The white marble, of which it is composed, resembles that of Cow Flat, near Bathurst. The marble of the quarry in which it is reported to have been found is of a pinkish mottle description, two large blocks of which may be seen at the office of the Colonial Architect.

I have, &c.,
C. S. WILKINSON,
Geological Surveyor.

The Under Secretary for Mines.

For the information of the Minister.—H. W., 29/5/89.

Seen.—S.S., 29/5/89.

EXTRACT FROM *S.M. Herald*, 29 MAY, 1889.

A SPECIMEN of a petrified human body, discovered by Messrs. Brydon and Sala in their marble quarry at Calula, Mullion Creek, near Orange, now lies at 294, Castlereagh-street. It is the body of a man, about 5 feet 10 inches in height, well-formed, and evidently, from the shape of the head and the contour of the features, a European. To geologists, and scientific men generally, an examination of this strange discovery should prove interesting. The marble in which the body was found is of various colours, but the body itself is petrified in white marble. With the exception of the arms, which are broken off at the shoulders, the limbs and features are intact, the left side of the body, however, being slightly flattened, due no doubt to the fact that it was found lying on this side.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE FRUIT INDUSTRY.

(PETITION FROM FRUIT-GROWERS.)

Ordered by the Legislative Assembly to be printed, 6 March, 1889.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned fruit-growers, exporters of fruit, as well as other persons interested in the fruit industry, and in obtaining better fruit marketing facilities,—

RESPECTFULLY SHOWETH:—

1. That urgent need exists for increased fruit market accommodation; that the present George-street Markets are a disgrace to the city of Sydney, devoid of every convenience required by the fruit-growers to enable them to display their fruit to advantage.

2. That since 1885 the fruit-growers have been incessant in their applications to the City Council to erect suitable fruit markets on an eligible site, but nevertheless, and notwithstanding the promises of various Mayors, fruit markets have not yet been erected in a central position.

3. That, according to statistics, there is annually carried, by rail, about 18,000 tons of fruit, and 34,000 loads taken into the George-street Markets.

4. That a large sum of money is annually expended by the fruit-growers for the delivery of fruit by drays at the George-street Markets, thereby entailing unnecessary expense and delay as well as an incalculable amount of injury to the fruit by the continual handling in the frequent loading and unloading, which would be avoided by having markets erected upon an eligible site, and so constructed that the fruit would be unloaded from the railway truck into the market place.

Your Petitioners therefore pray that your Honorable House will cause immediate steps to be taken for the resumption of that block of land, situated between Quay-street and the railway line leading to the deep waters of Darling Harbour, with frontages to George-street West, to Thomas-street, and to the railway line in the city of Sydney, and suitable markets erected thereon.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 869 signatures.*]

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE FRUIT INDUSTRY.

(PETITION FROM FRUIT-GROWERS' UNION OF NEW SOUTH WALES, PRAYING FOR ERECTION OF MARKETS.)

Received by the Legislative Assembly, 18 July, 1889.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Fruit-growers' Union of New South Wales, representing the exporters of fruit, as well as other persons interested in the fruit-growing industry, and in obtaining better fruit-marketing facilities,—

RESPECTFULLY SHOWETH :—

1. That urgent need exists for increased fruit-market accommodation; that the present George-street Markets are a disgrace to the City of Sydney, devoid of every convenience required by the fruit-growers to enable them to display their fruit to advantage.

2. That since 1885 the fruit-growers have been incessant in their applications to the City Council to erect suitable fruit-markets on an eligible site, but nevertheless, and notwithstanding the promises of various Mayors, fruit-markets have not yet been erected in a central position.

3. That according to statistics there is carried annually by rail about 18,000 tons of fruit and 34,000 loads taken into the George-street Market.

4. That a large sum of money is annually expended by the fruit-growers for the delivery of fruit by drays at the George-street Fruit-markets, thereby entailing unnecessary expense and delay, as well as an incalculable amount of injury to the fruit by the continual handling in the frequent loading and unloading, which would be avoided by having markets erected upon an eligible site, and so constructed that the fruit would be unloaded from the railway truck into the market-place.

Your Petitioners therefore humbly pray that your Honorable House will cause immediate steps to be taken for the resumption of that block of land between Quay-street and the railway-line leading to the deep waters of Darling Harbour, with frontages to George-street West, to Thomas-street, and to the railway-line in the City of Sydney, and suitable markets erected thereon.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

GEORGE LOVELL,
Acting Chairman, Fruit-growers' Union, New South Wales.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE SUGAR BOUNTIES CONVENTION.
(MINUTE OF COLONIAL SECRETARY RESPECTING.)

Ordered by the Legislative Assembly to be printed, 17 July, 1889.

Minute for His Excellency the Governor.

The Sugar Bounties Convention.

Colonial Secretary's Office, Sydney, 6 June, 1889.

IN reference to the despatches from the Right Honorable the Secretary of State, of 31st December, 1888, and 17th September, 1888, and the papers accompanying them, this Government, after mature consideration of the several questions involved in relation to existing laws and the public policy of this Colony, does not see its way, at the present time, to be included in the proposed Convention.

It is intended in a short time to bring the whole fiscal policy of this Colony under review, with the design of carrying out important changes; and the objects of the Convention will be kept before your Excellency's advisers in any such review and readjustment of existing taxation.

HENRY PARKES.

1889.

NEW SOUTH WALES.

TREATY OF FRIENDSHIP, COMMERCE, AND NAVIGATION BETWEEN
GREAT BRITAIN AND THE UNITED STATES OF MEXICO.
(DESPATCH RESPECTING.)

Presented to Parliament by Command.

[Circular 1.]

Downing-street,
29th March, 1889.

Sir,

I have the honor to transmit to you, for publication in the Colony under your Government, a copy of a Treaty of Friendship, Commerce, and Navigation between Her Majesty and the United States of Mexico, signed at Mexico on the 27th of November, 1888, the ratifications of which were exchanged at Mexico on the 11th of February last.

I have to call your attention to Article XIV of the Treaty, from which you will observe that, if it is desired that the Colony under your Government should come within the operation of the Treaty, notice to that effect must be given to the Mexican Government within two years from the 11th ultimo, the date of the exchange of the ratifications.

I have therefore to request that you will be good enough to acquaint me as soon as possible of the wishes of your Government in the matter.

The Officer Administering
the Government of New South Wales.

I have, &c.,
KNUTSFORD.

TREATY of Friendship, Commerce, and Navigation between Her Majesty and the United States of Mexico.

*Signed at Mexico, 27th November, 1888.**[Ratifications exchanged at Mexico, 11th February, 1889.]*

HER Majesty the Queen of the United Kingdom of Great Britain and Ireland, and His Excellency the President of the United States of Mexico, being desirous of maintaining and strengthening friendly relations, and of promoting commercial intercourse between the dominions of Her Britannic Majesty and the territories of the Mexican Republic, have resolved to conclude a Treaty of Friendship, Commerce, and Navigation, and have named as their Plenipotentiaries, that is to say:—

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland; Sir Spenser St. John, Knight Commander of St. Michael and St. George, Envoy Extraordinary, and Minister Plenipotentiary of Her Britannic Majesty in Mexico;

And His Excellency the President of the United States of Mexico, Señor Senador Don Emilio Velasco, ex-Minister Plenipotentiary of Mexico in France, &c., &c., &c.;

Who, after having communicated to each other their respective full powers, found in good and due form, have agreed upon and concluded the following Articles:—

ARTICLE I.

There shall be perfect peace and sincere friendship between the United Kingdom of Great Britain and Ireland and the United States of Mexico. The High Contracting Parties shall use their best endeavours that this friendship and good understanding may be constantly and perpetually maintained.

ARTICLE II.

The Contracting Parties agree that, in all matters relating to commerce and navigation, any privilege, favour, or immunity whatever, which either Contracting Party has actually granted, or may hereafter grant, to the subjects or citizens of any other State, shall be extended immediately and unconditionally to the subjects or citizens of the other Contracting Party, it being their intention that the trade and navigation of each country shall be placed, in all respects, by the other on the footing of the most favoured nation.

ARTICLE III.

The produce and manufactures of the dominions and possessions of Her Britannic Majesty which are imported into the United States of Mexico, and the produce and manufactures of Mexico which are imported into the dominions and possessions of Her Britannic Majesty whether intended for consumption, warehousing, re-exportation, or transit, shall be treated in the same manner as, and, in particular, shall be subjected to no higher or other duties, whether general, municipal, or local, than the produce, manufactures, and goods of any third country the most favoured in this respect. No other or higher duties shall be levied in Mexico on the exportation of any goods to the dominions and possessions of Her Britannic Majesty, or in the dominions and possessions of Her Britannic Majesty on the exportation of any goods to Mexico, than may be levied on the exportation of the like goods to any third country the most favoured in this respect.

Neither of the Contracting Parties shall establish a prohibition of importation, exportation, re-exportation, or transit against the other which shall not, under like circumstances, be applicable to any third country the most favoured in this respect.

In like manner, in all that relates to local dues, customs, formalities, brokerage, patterns, or samples introduced by commercial travellers, and all other matters connected with trade, British subjects in Mexico, and Mexican citizens in the dominions and possessions of Her Britannic Majesty, shall enjoy most-favoured-nation treatment.

In the event of any changes being made in Mexican laws, Customs Tariff or Regulations, sufficient notice shall be given, in order to enable British subjects to make the necessary arrangements for meeting them.

The Mexican authorities shall, moreover, deal equitably with all cases arising from unintentional ignorance of any of the changes above mentioned.

ARTICLE IV.

British ships and their cargoes shall, in Mexico, and Mexican vessels and their cargoes shall, in the dominions and possessions of Her Britannic Majesty, from whatever place arriving, and whatever may be the place of origin or destination of their cargoes, be treated in every respect as ships and cargoes of the most favoured nation.

The preceding stipulation applies to local treatment, dues, and charges in the ports, basins, docks, roadsteads, harbours, and rivers of the two countries, pilotage, and, generally, to all matters connected with navigation.

Su Excelencia el Presidente de los Estados Unidos Mexicanos y Su Majestad la Reina del Reino Unido de la Gran Bretaña é Irlanda, deseosos de conservar y vigorizar relaciones amistosas y de promover el tráfico comercial entre los territorios de la República Mexicana y los dominios de Su Majestad Británica, han resuelto celebrar un Tratado de Amistad, Comercio, y Navegacion, y han nombrado sus Plenipotenciarios, á saber:—

Su Excelencia el Presidente de los Estados Unidos Mexicanos al Señor Senador Don Emilio Velasco, ex-Ministro Plenipotenciario de México en Francia, &c., &c., &c.;

Y Su Majestad la Reina del Reino Unido de la Gran Bretaña é Irlanda á Sir Spencer St. John, Caballero Comendador de San Miguel y San Jorge, Enviado Extraordinario y Ministro Plenipotenciario de Su Majestad Británica en México;

Los cuales, despues de haberse comunicado sus respectivos plenos poderes, encontrándolos en buena y debida forma, han convenido en los Artículos siguientes:—

ARTICULO I.

Habrà perfecta paz y sincera amistad entre la República Mexicana y el Reino Unido de la Gran Bretaña é Irlanda. Las Altas Partes Contratantes harán los mayores esfuerzos para que esta amistad y buena armonía se mantengan constante y perpetuamente.

ARTICULO II.

Las Partes Contratantes convienen en que, en todo lo relativo á comercio y navegacion, cualquier privilegio, favor ó inmunidad, sea cual fuere, que alguna de las Partes Contratantes tenga concedidos en la actualidad ó concediere en lo sucesivo á los súbditos ó ciudadanos de cualquiera otro Estado, se extenderán inmediata é incondicionalmente á los súbditos ó ciudadanos de la otra Parte Contratante, siendo su intencion que el comercio y navegacion de cada país sean colocados por el otro, en todo respecto, sobre la base de la nacion mas favorecida.

ARTICULO III.

Los productos y manufacturas de la República Mexicana que se importen en los dominios y posesiones de Su Majestad Británica, y los productos y manufacturas de los dominios y posesiones de Su Majestad Británica que se importen en la República Mexicana, sea para el consumo, almacenaje, re-exportacion ó tránsito, serán considerados del mismo modo, y particularmente no estarán sujetos á otros ni mas altos derechos, ya generales, municipales, ó locales, que los productos, manufacturas y mercancías de una tercera nacion que sea mas favorecida á este respecto. No se impondrán otros ni mas altos derechos en los dominios y posesiones de Su Majestad Británica á la exportacion de cualesquiera mercancías para la República Mexicana, ó en la República Mexicana á la exportacion de cualesquiera mercancías para los dominios y posesiones de Su Majestad Británica, que los que se impongan á la exportacion de iguales mercancías para un tercer país que sea mas favorecido á este respecto.

Ninguna de las Partes Contratantes establecerá, respecto de la otra, prohibiciones de importacion, exportacion, re-exportacion, ó tránsito que no sean aplicables, en iguales circunstancias, á un tercer país que sea mas favorecido á este respecto.

Igualmente, en todo lo que se refiere á derechos locales, aduanas, formalidades, corretajes, modelos, ó muestras introducidos por agentes viajeros, y todo lo demas relativo á comercio, los ciudadanos Mexicanos, en los dominios y posesiones de Su Majestad Británica, y los súbditos Británicos en la República Mexicana, gozarán del tratamiento de la nacion mas favorecida.

En caso de hacerse algunas alteraciones en las leyes Mexicanas, aranceles ó reglamentos de Aduanas, se concederá un plazo suficiente para que los súbditos Británicos cumplan con ellos.

Las autoridades Mexicanas, ademas, tratarán con equidad todos los casos originados de ignorancia inculpable de alguna de las alteraciones antes mencionadas.

ARTICULO IV.

Los buques Mexicanos y sus cargamentos en los dominios y posesiones de Su Majestad Británica, y los buques Ingleses y sus cargamentos en la República Mexicana, cualquiera que sea el lugar de su procedencia, y cualquiera que sea el lugar de origen ó destino de sus cargamentos, serán tratados, en todo respecto, como los buques y cargamentos de la nacion mas favorecida.

La estipulacion precedente se aplica al tratamiento local, derechos y cargas en los puertos, fondeaderos, diques, radas, bahías y rios de ambos países, practicafe, y, en general, á todo lo relativo á navegacion.

Every favour or exemption in these respects, or any other privilege in matters of navigation, which either of the Contracting Parties shall grant to a third Power, shall be extended immediately and unconditionally to the other Party.

All vessels which, according to British law, are to be deemed British vessels, and all vessels which, according to the law of Mexico, are to be deemed Mexican vessels, shall, for the purposes of this Treaty, be respectively deemed British or Mexican vessels.

For the same purpose shall be considered as ports of each of the Contracting Parties those which are, or hereafter may be, declared open by the respective Governments for import or export trade.

The two Contracting Parties agree to consider, as a limit of their territorial waters on their respective coasts, the distance of 3 marine leagues reckoned from the line of low water mark. Nevertheless, this stipulation shall have no effect, excepting in what may relate to the observance and application of the Custom-house Regulations and the measures for preventing smuggling, and cannot be extended to other questions of civil or criminal jurisdiction, or of international maritime law.

ARTICLE V.

The subjects or citizens of each of the Contracting Parties shall be permitted to reside, permanently or temporarily, in the dominions or possessions of the other, and to occupy and hire houses and warehouses for purposes of commerce, whether wholesale or retail. They shall also be at full liberty to exercise civil rights, and therefore to acquire, possess, and dispose of every description of property, movable and immovable, as far as the laws of each country will permit. They may acquire and transmit the same to others, whether by purchase, sale, donation, exchange, marriage, testament, succession *ab intestato*, and in any other manner, under the same conditions as natives of the country. Their heirs and legal representatives may succeed to and take possession of it, either in person or by procurators, in the same manner and in the same legal forms as natives of the country.

In none of these respects shall they pay upon the value of such property any other or higher impost, duty, or charge than is payable by natives of the country.

In every case the subjects or citizens of the Contracting Parties shall be permitted to export their property, or the proceeds thereof, if sold, freely and without being subjected on such exportation to pay any duty different from that to which natives of the country are liable under similar circumstances.

The citizens or subjects of each one of the Contracting Parties, who may be residing, temporarily or permanently, in the dominions and possessions of the other, are subject to the laws of the country where they reside, especially to those which determine the rights and obligations of foreigners, on the same conditions as those of the citizens or subjects of the most favoured nation.

ARTICLE VI.

The dwellings, manufactories, warehouses, and shops of the subjects or citizens of each of the Contracting Parties in the dominions and possessions of the other, and all premises appertaining thereto, destined for purposes of residence or commerce, shall be respected.

It shall not be allowable to proceed to make a search of, or a domiciliary visit to, such dwellings and premises, or to examine or inspect books, papers, or accounts, except under the conditions and with the forms prescribed by the laws for natives of the country.

The subjects or citizens of each of the two Contracting Parties in the dominions and possessions of the other shall have free access to the Courts of Justice for the prosecution and defence of their rights, without other conditions, restrictions, or taxes beyond those imposed on natives of the country, and shall, like them, be at liberty to employ, in all causes, their advocates, attorneys, or agents from among the persons admitted to the exercise of those professions according to the laws of the country.

ARTICLE VII.

The subjects or citizens of each of the Contracting Parties in the dominions and possessions of the other shall be exempted from all compulsory military service whatever, whether in the army, navy, or national guard, or militia. They shall likewise be exempted from all contributions, whether pecuniary or in kind, imposed as a compensation for personal service, and, finally, from forced loans, and from charges, requisitions, and war contributions, unless imposed on real property, when they shall pay them equally with nationals.

ARTICLE VIII.

The subjects or citizens of either of the two Contracting Parties residing in the dominions and possessions of the other shall enjoy, in regard to their houses, persons, and properties, the protection of the Government in as full and ample a manner as the subjects or citizens of the most favoured nation.

Todo favor ó extencion á este respecto ó cualquiera privilegio en materia de navegacion, que una de las Partes Contratantes conceda á una tercera Potencia se extenderá inmediata ó incondicionalmente á la otra Potencia.

Todos los buques que, conforme á las leyes Mexicanas, se consideren Mexicanos, y todos los buques que, conforme á las leyes Británicas, se consideren Británicos, se considerarán respectivamente Mexicanos ó Británicos para los efectos de este Tratado.

Para los mismos efectos se deberán entender por puertos de cada una de las Partes Contratantes aquellos que estan ó en adelante estuvieren habilitados por los Gobiernos respectivos para el comercio de importacion ó exportacion.

Las dos Partes Contratantes convienen en considerar como límite del mar territorial en sus costas respectivas, la distancia de 3 leguas marítimas contadas desde la línea de la marea baja. Sin embargo, esta estipulacion no tendrá efecto, sino en lo relativo á la vigilancia y aplicacion de los Reglamentos Aduanales y de las medidas para evitar el contrabando, y no podrá extenderse á otras cuestiones de jurisdiccion civil ó criminal, ó de derecho internacional marítimo.

ARTICULO V.

Los ciudadanos ó súbditos de cada una de las Partes Contratantes podrán residir permanente ó temporalmente en los dominios ó posesiones de la otra; ocupar y arrendar casas y almacenes para el ejercicio del comercio, ya por mayor ó al menudeo. Tendrán tambien plena libertad en el ejercicio de derechos civiles, y por consiguiente para adquirir, poseer y disponer de toda clase de propiedades muebles ó inmuebles en cuanto lo permitan las leyes de cada país. Pueden adquirirlas y transmitir las á otros por compra, venta, donacion, permuta, matrimonio, testamento, sucesion intestada y de cualquiera otro modo, bajo las mismas condiciones que los naturales del país. Sus herederos y representantes legales pueden suceder en ellas y tomar posesion de las mismas, ya personalmente ó por procurador, del mismo modo y con las mismas formas legales que los naturales del país.

En ninguno de estos casos pagarán sobre el valor de dicha propiedad otros ni mas altos impuestos, derechos ó cargas, que los que se paguen por los naturales del país.

En todo caso se permitirá á los súbditos ó ciudadanos de las Partes Contratantes exportar su propiedad, ó los productos de la misma, si hubiere sido vendida, libremente y sin estar sujetos en la exportacion á pagar derechos diferentes de aquellos á los cuales están sometidos en circunstancias análogas los naturales del país.

Los ciudadanos ó súbditos de cada una de las Partes Contratantes que residan temporal ó permanentemente en los dominios y posesiones de la otra estan sujetos á las leyes del país de su residencia, especialmente las que fijan los derechos y obligaciones de los extranjeros, en los mismos terminos en que lo estén los ciudadanos ó súbditos de la nacion mas favorecida.

ARTICULO VI.

Serán respetadas las habitaciones, fábricas, almacenes y tiendas de los ciudadanos ó súbditos de cada una de las Partes Contratantes en los dominios y posesiones de la otra, y todas las localidades que les sean anexas destinadas á habitacion ó comercio.

No se permitirá hacer cateos ó visitas domiciliarias en estas habitaciones y sus dependencias, ó examinar ó inspeccionar los libros, papeles, ó cuentas, excepto bajo las condiciones y con las formas prescritas por las leyes para los naturales del país.

Los ciudadanos ó súbditos de cada una de las dos Partes Contratantes en los dominios y posesiones de la otra tendrán libre acceso en los Tribunales para hacer valer y defender sus derechos sin otras condiciones, restricciones, ó contribuciones que las impuestas á los naturales del país, y, como estos, tendrán libertad, para emplear en sus litigios, los abogados, procuradores, ó agentes de entre las personas admitidas al ejercicio de estas profesiones, conforme á las leyes del país.

ARTICULO VII.

Los ciudadanos ó súbditos de cada una de las Partes Contratantes en los dominios y posesiones de la otra estarán exentos de todo servicio militar forzoso, ya en el ejército, la marina, ó la guardia nacional ó milicia. Tambien estarán exentos de toda contribucion, sea pecuniaria ó en especie, impuesta en compensacion de servicios personales, y finalmente, de préstamos forzosos y de cargas, requisas y contribuciones de guerra, á menos que sean impuestas sobre la propiedad inmueble, en cuyo caso la pagarán en iguales terminos que los nacionales.

ARTICULO VIII.

Los ciudadanos ó súbditos de cada una de las Partes Contratantes residentes en los dominios y posesiones de la otra gozarán en sus casas, personas y propiedades, de la proteccion del Gobierno, tan completa y amplia como los ciudadanos ó súbditos de la nacion mas favorecida.

In like manner the subjects or citizens of each Contracting Party shall enjoy in the dominions and possessions of the other full liberty of conscience, and shall not be molested on account of their religious belief.

ARTICLE IX.

The subjects or citizens of each of the Contracting Parties shall have, in the dominions and possessions of the other, the same rights as natives, or as subjects or citizens of the most favoured nation, in regard to patents for inventions, trademarks, and designs, upon fulfilment of the formalities prescribed by law.

ARTICLE X.

Each of the Contracting Parties may appoint Consuls-General, Consuls, Vice-Consuls, Pro-Consuls, and Consular Agents to reside respectively in towns or ports in the dominions and possessions of the other Power, each one of them reserving the right of excepting those places where it may not appear convenient to admit them whenever this exception is extended to the Consular functionaries of all other nations.

Such Consular officers, however, shall not enter upon their functions until after they shall have been approved and admitted in the usual form by the Government to which they are sent. They shall exercise whatever functions, and enjoy whatever privileges, exemptions, and immunities are, or may hereafter be, granted there to Consular officers of the most favoured nation.

The archives and official papers of Consular functionaries shall be respected as inviolable, without the authorities of the country being able, on any account, to seize them, or take note of their contents.

ARTICLE XI.

The Consuls-General, Consuls, Vice-Consuls, and Consular Agents of each of the Contracting Parties, residing in the dominions and possessions of the other, shall receive from the local authorities such assistance as can by law be given to them for the recovery of deserters from the vessels of their respective countries.

ARTICLE XII.

Any ship of war or merchant-vessel of either of the Contracting Parties which may be compelled by stress of weather, or by accident, to take shelter in a port of the other, shall be at liberty to refit therein, to procure all necessary stores, and to continue their voyage without paying any dues other than such as would be payable in a similar case by a national vessel. In case, however, the master of a merchant-vessel should be under the necessity of disposing of a part of his merchandise in order to defray his expenses, he shall be bound to conform to the Regulations and Tariffs of the place to which he may have come.

If any ship of war or merchant-vessel of one of the Contracting Parties should run aground, or be wrecked within the territory of the other, such ship or vessel, and all parts thereof, and all furniture and appurtenances belonging thereto, and all goods and merchandise saved therefrom, including any which may have been cast out of the ship, or the proceeds thereof if sold, as well as all papers found on board such stranded or wrecked ship or vessel, shall be given up to the owners or their agents when claimed by them within the period fixed by the laws of the country; and such owners or agents shall pay only the expenses incurred in the preservation of the property, together with the salvage or other expenses which would have been payable in the like case of a wreck of a national vessel.

The goods and merchandise saved from the wreck shall be exempt from all duties of customs unless cleared for consumption, in which case they shall pay the same rate of duty as if they had been imported in a national vessel.

In the case either of a vessel being driven in by stress of weather, run aground, or wrecked, the respective Consuls-General, Consuls, Vice-Consuls, and Consular Agents shall, if the owner or master or other agent of the owner is not present, or is present and requires it, be authorized to interpose in order to afford the necessary assistance to their fellow countrymen.

ARTICLE XIII.

For the better security of commerce between the subjects of Her Britannic Majesty and the citizens of the United States of Mexico, it is agreed that, if at any time any interruption of friendly intercourse or any rupture should unfortunately take place between the two Contracting Parties, the subjects or citizens of either of the said Contracting Parties who may be residing in the dominions or territories of the other, or who may be established there, in the exercise of any trade or special employment, shall have the privilege of remaining and continuing such trade or employment, without any manner of interruption, in full enjoyment of their liberty and property, so long as they behave peacefully and commit no offence against the laws; and their goods, property, and effects, of whatever description they may be, whether in their own custody, or intrusted to individuals, or to the State, shall not be liable to

Igualmente los ciudadanos ó súbditos de cada una de las Partes Contratantes gozarán en los dominios y posesiones de la otra plena libertad de conciencia, y no serán molestados por razon de sus creencias religiosas.

ARTICULO IX.

Los ciudadanos ó súbditos de cada una de las Partes Contratantes tendrán en los dominios y posesiones de la otra, los mismos derechos que los nacionales, ó que los súbditos ó ciudadanos de la nacion mas favorecida, respecto á patentes de invencion, marcas de fábrica y dibujos para objetos industriales, siempre que cumplan las formalidades prescritas por la ley.

ARTICULO X.

Cada una de las Partes Contratantes puede nombrar Cónsules-Generales, Cónsules, Vice-Cónsules, Pro-Cónsules, y Agentes Consulares para residir respectivamente en las ciudades ó puertos situados en los dominios y posesiones de la otra Potencia, reservándose cada una de ellas el derecho de exceptuar los lugares donde no le parezca conveniente admitirlos, siempre que esta excepcion se extienda á los funcionarios Consulares de todas las demas naciones.

Estos funcionarios Consulares, sin embargo, no entrarán en el ejercicio de sus funciones hasta despues de haber sido aprobados y admitidos en la forma usual por el Gobierno al cual han sido enviado. Ejercerán las funciones, y gozarán de los privilegios, exenciones é inmunidades, cualesquiera que sean, concedidos ó que se concedan en lo sucesivo á los funcionarios Consulares de la nacion mas favorecida.

Los archivos y papeles oficiales de los funcionarios Consulares serán respetados como inviolables, sin que por ningun motivo puedan las autoridades del país embargarlos ni tomar conocimiento de ellos.

ARTICULO XI.

Los Cónsules-Generales, Cónsules, Vice-Cónsules, y Agentes Consulares de cada una de las Partes Contratantes, residentes en los dominios y posesiones de la otra, recibirán de las autoridades locales el auxilio que por la ley se les puede dar para recobrar los desertores de los buques de sus países respectivos.

ARTICULO XII.

Todo buque de guerra ó mercante de una de las Partes Contratantes que esté obligado, á causa de mal tiempo ó de accidente, á refugiarse en un puerto de la otra, estará en libertad para repararse allí procurarse las provisiones necesarias y continuar su viaje sin pagar otros derechos que los que en casos semejantes se pagarían por un buque nacional. En caso, sin embargo, de que el capitán de un buque mercante tuviere necesidad de disponer de una parte de sus mercancías para cubrir sus gastos, estará obligado á conformarse con los Reglamentos y Tarifas del lugar á que haya llegado.

Si un buque de guerra ó un buque mercante de una de las Partes Contratantes encalla ó naufraga en el territorio de la otra, este buque y todas sus partes, su aparejo y pertenencias, todos los efectos y mercancías salvados de él, incluso los echados fuera del buque, ó sus productos si se han vendido, así como los papeles encontrados á bordo del buque encallado ó naufrago, serán entregados á los propietarios ó sus agentes, al ser reclamados por ellos en el término fijado por las leyes del país; y estos propietarios ó agentes pagarán solamente los gastos que se hayan causado en la conservacion de la propiedad, así como el salvamento ú otros gastos que un buque nacional pagaría en igual caso de naufragio.

Los efectos y mercancías salvados del naufragio estarán exentos de todos los derechos de aduanas, á menos que se destinen al consumo interior, en cuyo caso pagarán los mismos derechos que si hubiesen sido importados en un buque nacional.

En el caso de que por razon de mal tiempo un buque se refugiare en un puerto ó encallare ó naufragare, los Cónsules-Generales, Cónsules, Vice-Cónsules, y Agentes Consulares, si el propietario ó capitán ú otro agente del propietario no están presentes ó si están presentes y lo pidiere, estarán autorizados para intervenir á fin de impartir los auxilios necesarios á sus compatriotas.

ARTICULO XIII.

Para mayor seguridad del comercio entre los ciudadanos de los Estados Unidos Mexicanos y los súbditos de Su Majestad Británica, se conviene que, si desgraciadamente en algun tiempo se interrumpieren las relaciones amistosas ú ocurriese alguna ruptura entre ambas Partes Contratantes, los ciudadanos ó súbditos de una de las dos Partes Contratantes que residan en los dominios ó territorios de la otra, ó que allí estén establecidos, ejerciendo el comercio ó empleados en otra ocupacion, tendrán el derecho de permanecer y de continuar en su comercio ú ocupacion, sin interrupcion alguna, con el pleno goce de su libertad y propiedad, mientras se conduzcan pacíficamente y no contravengan las leyes; y sus bienes, propiedades, y efectos, de cualquiera clase que sean, ya estén en su poder, ó confiados á particulares ó al Estado, no estarán sujetos á embargo ó secuestro, ni á otras cargas ú obligaciones que las

seizure or sequestration, or to any other charges or demands than those which may be made upon the like goods, property, and effects belonging to native subjects or citizens. Should they, however, prefer to leave the country, they shall be allowed to make arrangements for the safe keeping of their goods, property, and effects, or to dispose of them, and to liquidate their accounts; and a safe-conduct shall be given them to embark at the ports which they shall themselves select.

ARTICLE XIV.

The stipulations of the present Treaty shall be applicable to all the Colonies and foreign possessions of Her Britannic Majesty, so far as the laws permit, excepting to those hereinafter named, that is to say, except to—

India.
The Dominion of Canada.
Newfoundland.
New South Wales.
Victoria.
South Australia.
Western Australia.
Queensland.
Tasmania.
New Zealand.
The Cape.
Natal.

Provided always that the stipulations of the present Treaty shall be made applicable to any of the abovenamed Colonies or foreign possessions, on whose behalf notice to that effect shall have been given by Her Britannic Majesty's Representative in Mexico to the Mexican Minister for Foreign Affairs within two years from the date of the exchange of the ratifications of the present Treaty.

ARTICLE XV.

Any controversies which may arise respecting the interpretation or the execution of the present Treaty, or the consequences of any violation thereof, shall be submitted, when the means of settling them directly by amicable agreement are exhausted, to the decision of Commissions of Arbitration, and the result of such arbitration shall be binding upon both Governments.

The members of such Commissions shall be selected by the two Governments by common consent, failing which, each of the Parties shall nominate an Arbitrator, or an equal number of Arbitrators, and the Arbitrators thus appointed shall select an Umpire.

The procedure of the arbitration shall in each case be determined by the Contracting Parties, failing which the Commission of Arbitration shall be itself entitled to determine it beforehand.

ARTICLE XVI.

The present Treaty shall continue in force during ten years, counted from the day of the exchange of the ratifications; and in case neither of the two Contracting Parties shall have given notice twelve months before the expiration of the said period of ten years of their intention of terminating the present Treaty, it shall remain in force until the expiration of one year from the day on which either of the Contracting Parties shall have given such notice.

ARTICLE XVII.

The present Treaty shall be ratified by Her Majesty the Queen of Great Britain and Ireland, and by his Excellency the President of the United States of Mexico, and the ratifications shall be exchanged at Mexico as soon as possible.

In witness whereof, the respective Plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done, in two originals, at the City of Mexico, the twenty-seventh day of November, one thousand eight hundred and eighty-eight.

(L.S.) SPENSER ST. JOHN.
(L.S.) EMILIO VELASCO.

que se impongan en bienes, propiedades y efectos análogos pertenecientes á los nacionales. Sin embargo, si prefiriesen salir del país, se les permitirá hacer los arreglos convenientes para la seguridad de sus bienes, propiedades, y efectos, ó para disponer de ellos y para liquidar sus cuentas; y se les dará un salvo-conducto para que se embarquen en los puertos que elijan.

ARTICULO XIV.

Las estipulaciones del presente Tratado serán aplicables á todas las Colonias y posesiones extranjeras de Su Majestad Británica, en cuanto lo permitan las leyes, exceptuando las que en seguida se designan, es decir, excepto—

La India.
El Dominio de Canadá.
Terranova.
Nueva Gales del Sur.
Victoria.
Australia Meridional.
Australia Occidental.
Queensland.
Tasmania.
Nueva Zelanda.
El Cabo.
Natal.

Sin embargo, las estipulaciones del presente Tratado serán aplicables á cualquiera de las expresadas Colonias ó posesiones extranjeras, en cuyo favor se dé noticia para este efecto por el Representante de Sue Majestad Británica en México al Secretario de Relaciones Exteriores de la República Mexicana, dentro de dos años contados de la fecha del canje de las ratificaciones del presente Tratado.

ARTICULO XV.

Las controversias que se susciten sobre la interpretación ó ejecución del presente Tratado, ó sobre las consecuencias de alguna violación de él, se someterán, cuando se agoten los medios de arreglo directo por convenios amistosos, á la decisión de Comisiones de Arbitraje, y el resultado de este arbitraje será obligatorio para ambos Gobiernos.

Los miembros de estas Comisiones serán nombrados de comun consentimiento por los dos Gobiernos; y no estando de acuerdo, cada una de las Partes nombrará un Arbitro, ó un número igual de Arbitros, y los Arbitros así nombrados designarán un tercero para el caso de discordia.

Las Partes Contratantes determinarán en cada caso el procedimiento del arbitraje, y no estando de acuerdo, la Comisión de Arbitraje estará facultada para determinarlo de antemano.

ARTICULO XVI.

El presente Tratado durará diez años, contados desde el día del canje de las ratificaciones, y en caso de que ninguna de las dos Partes Contratantes haya dado noticia doce meses ántes de la espiración de dicho período de diez años, de su intención de terminar el presente Tratado, continuará en vigor hasta la terminación de un año contado desde el día en que una de las Partes Contratantes dé esta noticia a la otra.

ARTICULO XVII.

El presente Tratado será ratificado por su Excelencia el Presidente de los Estados Unidos Mexicanos, y por Su Majestad la Reina de la Gran Bretaña é Irlanda, y las ratificaciones se canjearán en México tan pronto como sea posible.

En testimonio de lo cual los respectivos Plenipotenciarios han firmado y sellado.

Hecho, en dos originales, en la Ciudad de México, el diecisiete de Noviembre, de mil ochocientos ochenta y ocho.

1889.

NEW SOUTH WALES.

TREATY OF FRIENDSHIP AND COMMERCE BETWEEN GREAT BRITAIN
AND SERVIA.

(DESPATCH RESPECTING.)

Presented to Parliament by Command.The Treasury, New South Wales,
29th May, 1889.His Excellency the Governor directs the publication, for general information, of the following Circular
Despatch from the Secretary of State for the Colonies.

W. McMILLAN.

[Circular.]

Downing-street,
13th March, 1889.

Sir,

With reference to my Circular Despatch of the 22nd of July, 1880,* I have the honor to acquaint you that I am informed by the Secretary of State for Foreign Affairs that the Servian Minister for Foreign Affairs has addressed a note to Her Majesty's Minister at Belgrade announcing that the Servian Government give thereby the notification required by Article XIV. of the Treaty of Friendship and Commerce between Her Majesty and the Prince of Servia, signed at Nisch on the 7th of February and 26th of January, 1880, to terminate the said Treaty, which will accordingly expire on the 18th of May, 1890.

I have, &c.,
KNUTSFORD.The Officer Administering
the Government of New South Wales.

* Published in Government Gazette Supplement No. 450, of 18th November, 1880.

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ZOOLOGICAL SOCIETY.

(PARTICULARS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 28 August, 1889.

[Laid upon the Table of this House in answer to Question No. 5 of 28 August, 1889.]

Questions.

5. MR. W. E. ABBOTT asked THE COLONIAL SECRETARY,—
- (1.) Who is the owner of the land and buildings occupied by the Zoological Society?
 - (2.) On what tenure does the Zoological Society occupy their land and buildings?
 - (3.) Who owns the animals in the Zoological Society's Gardens?
 - (4.) To whom does the money received as charges for entrance into the Zoological Society's grounds belong?
 - (5.) Has any request at any time been made to him, or to the Government collectively, to place a sum of money on the Estimates as a special grant, or to give any sum of money to pay a debt incurred by some members of the Zoological Society?
 - (6.) Was any sum of money placed on the Estimates in consequence of such a request?
 - (7.) On what representations was any sum of money placed on the Estimates as a special grant to the Zoological Society?
 - (8.) What are the names of the gentlemen who are personally liable for the debt incurred by the Zoological Society?

Answers.

Reply to Mr. W. E. Abbott's Questions, supplied by the Secretary to the Zoological Society,—

- (1.) The Municipal Council of the City of Sydney. The buildings belong to the Fellows and Members of the N.S.W. Zoological Society.
- (2.) The Zoological Society occupy their land and buildings on sufferance from the Municipal Council, but a lease of the land has been promised to the Society by the City Corporation.
- (3.) The animals in the Zoological Gardens are owned by the Society.
- (4.) The money received as charges for entrance into the Zoological Society's grounds belong to the Society, and is expended exclusively in the interest of the Society under the superintendence of the Council, who generously give their services gratuitously.
- (5.) Yes, a request was made to the Honorable the Colonial Secretary to place a sum of money on the Estimates as a special grant, but not to give any sum of money to pay a debt incurred by any member of the Zoological Society.
- (6.) Yes, the sum of £3,000.
- (7.) On the representation of the Council of Management by letter, and by representations of deputations from the Society to the Colonial Secretary, on the ground that similar Societies in Melbourne and Adelaide are subsidized by the Governments of Victoria and South Australia, and last year they received respectively the sums of £3,800 and £2,700.
- (8.) No individual Fellow or Subscriber is personally liable for the debt incurred by the Society, but the money is advanced on the security of the Society as an Educational Institution.

MEMO.—26,825 school children of all denominations and 675 teachers were admitted free to the Gardens last year. Total free admissions, 27,500.—W.H.C., Secretary.
