S					
SPEAKER :—					
Election of James Henry Young, Esquire, 5.					
Joseph Palmer Abbott, Esquire, proposed, 5.					
Presentation of, 7.					
Commission to Administer the Oath, 7.					
Informs the House that Clerk had been summoned, 8, 17 ⁽²⁾ , 19, 27 ⁽²⁾ , 28 ⁽²⁾ , 43, 233.					
Reports attendance of House in Council Chamber to hear Opening Speech, 9.					
Reports receipt of Writ, 11, 13.					
Reports issue, and Return of Writ 27 ⁽²⁾ , 181, 215, 249, 427.					
Informs House of irregularities at an Election, and issue of Proclamation curing same, 11, 13.					
Reports presentation of Address-in-reply to Governor, and Answer to Address-in-reply, 17.					
Lays on Table Warrant appointing Elections and Qualifications Committee, 11, 25, 93; reports maturity of Warrant, 23, 53, 111.					
Lays on Table Election Petition, 260.					
Reports receipt of Deputy Speaker's Commission to Administer Oath, 53.					
Reports resignation of Member of Elections and Qualifications Committee, 92.					
Directs Member to discontinue his speech on the ground of irrelevance or tedious repetition, 102 ⁽²⁾ .					
Reports resignation of Member, 165.					
Reports death of Member, 175, 225.					
Gives Casting Vote, 322.					
Resumes Chair at request of Chairman of Committees, to restore order arising in Committee of Supply, 442.					
Issues his Warrant committing the Honorable Member for West Macquarie, Mr. Crick, to the custody of the Sergeant-at-Arms, 442.					
Directs Sergeant-at-Arms to bring Mr. Crick to the Bar, and an apology having been offered, directs his release from Custody, 450.					
Calls attention to nature of amendments made by Legislative Council in Crown Lands Bill, 393.					
Calls attention to nature of amendments made by Legislative Council in Parliamentary Representatives Allowance Bill (No. 2), 396.					
Calls attention to nature of amendments made by Legislative Council in Sydney Water Supply (Partial Distribution) Bill, which he considered should be disagreed to, 411.					
Calls attention to nature of amendments made by the Legislative Council in the Wollongong Harbour Trust Bill, and regrets that the necessity for calling attention to such matters was growing in frequency, 419.					
RULINGS OF—					
That no debate should take place on the subject of a Petition on the motion for its reception; motion made to dissent from and withdrawn, 101.					
That the motion for the adjournment of a debate having been negatived, and a speech on the main question having intervened, the same motion may be again made, 102.					
That the motion having been carried that all the words stand in an original motion no amendment could be made except by way of additions thereto, 104.					
That amendment proposed to be inserted in Committee in the Public Works Act Amendment Bill was inadmissible, being outside the order of leave and the scope of the Bill, 119.					
That on the motion for the adjournment of the House a discussion on the conduct of a Judge was not irregular provided the language was not disrespectful to the Judge, 125.					
That Wentworth Irrigation Bill does not create an expenditure from the Consolidated Revenue Fund, 229.					
That Blackfriars and Shepherd's Nursery Estates Bill was properly introduced as a Public Bill, 291.					
That Bathurst Cattle Sale-yards Bill was within the Order of Leave, 292.					
That Parliamentary Representatives Allowance Bill (No. 2) was not in contravention of the Constitution Act and Amendment Act in consequence of Members holding offices of profit under the Crown, 296.					
That Inland Waters Conservation Bill imposed a penalty, and was therefore beyond the Order of leave, 320.					
That Fuel Bill was not outside the Order of leave by reason of the imposition of penalties in clause 4 and 6, 320.					
That Sheep District Boards (Powers Restoration) Bill did not require to be covered by a Message, 342.					
That Illawarra Harbour and Land Corporation Bill was not properly before the House, its provisions not being authorized by the Order of Leave, nor the notices in the <i>Gazette</i> , 372.					
That Coal Mines Regulation Bill was not beyond the Order of Leave, 374.					
That amendment proposed in Committee of the Whole on Council's amendment was not admissible, as being beyond the scope of and irrelevant to the amendment, 397.					
That a Member using offensive words in Committee, and having withdrawn them, the Member to whom the words were used could not demand an apology, 429.					
That amendment was in order to refer a rival route with proposed Railway to Parliamentary Standing Committee on Public Works, 435.					
That Member could not discuss the import of words taken down in Committee of the Whole on which a motion to refer to the House had been made, 442.					
That in urgent cases of disorder in Committee Speaker could resume Chair to restore order at the request of the Chairman or otherwise, 442.					
SPECIAL ADJOURNMENT :—					
Motion made for, and passed, 18, 79 (<i>Easter</i>), 91, 139 (<i>Queen's Birthday</i>), 221, 413, 417, 425, 455.

NEW SOUTH WALES.

R E P O R T

OF THE

MINISTER OF PUBLIC INSTRUCTION

FOR THE YEAR

1888.

Presented to Parliament, pursuant to Act 43 Vic. No. 23, sec. 36.

SYDNEY: CHARLES POTTER, GOVERNMENT PRINTER.

1889.

[5s.] 238—*a*

[2,653 copies—Approximate Cost of Printing (labour and material), £297 9s. 6d.]

1888.

REPORT OF THE MINISTER OF PUBLIC INSTRUCTION.

To His Excellency the Right Honorable CHARLES ROBERT, BARON CARRINGTON, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

My Lord,

I have the honor to submit to your Excellency the Report of the Department of Public Instruction for the year 1888. The Report deals fully with the educational work carried on under the provisions of the "Public Instruction Act of 1880," and embraces summaries of similar work done in certain State-aided Institutions of an educational character.

I.—SCHOOLS.

2,271 schools, comprising 2,463 departments, were in operation, as compared with 2,236 schools or 2,424 departments open in 1887. During 1888, 114 schools, or 117 departments, were established, comprising 20 Public, 62 Provisional, 17 Half-time, 15 House-to-house, and 3 Evening Schools. Forty-seven Provisional Schools and 1 Half-time School were raised to the rank of Public Schools, and 5 Half-time and 4 House-to-house Schools to the rank of Provisional Schools; while 17 Public and 18 Provisional Schools were reduced to Half-time or to House-to-house Schools. Sixty-two of the schools open during the whole or some portion of 1887 do not appear on the list of schools for 1888, while of those actually in operation in 1888, 51 were closed before the last quarter. Hence, the number of schools open in the last quarter of 1888 was 2,237, or 2,428 departments. These comprised 5 High Schools, 51 Superior Public Schools, or 139 departments, 1,576 other Public Schools or departments, 303 Provisional Schools, 219 Half-time Schools, 78 House-to-house Schools, and 5 Evening Schools. The net increase for the last quarter of 1888, as compared with the last quarter of 1887, was 63 schools, or 67 departments, and the whole school accommodation available at the close of 1888 was equal to 181,357 places, 94 per cent. being provided in vested, and 6 per cent. in non-vested, premises.

The schools were organized and classified as follows :—

Schools :—

- 5 High Schools—2 for boys and 3 for girls.
- 1,509 Public Mixed Schools for boys and girls.
- 46 Public Schools of 2 departments each.
- 71 Public Schools of 3 departments each.
- 1 Public School of 4 departments—one a Practising School.
- 303 Provisional Mixed Schools for boys and girls.
- 219 Half-time Mixed Schools for boys and girls.
- 78 House-to-house Schools for boys and girls.
- 5 Evening Public Schools for boys only.

Or Departments :—

- 5 High Schools—2 for boys and 3 for girls.
- 1,509 Public Mixed Schools for boys and girls.
- 34 Separate Primary Departments for boys and girls.
- 106 Separate Infants' Departments.
- 85 Separate Departments for boys only.
- 84 Separate Departments for girls only.
- 303 Provisional Mixed Schools for boys and girls.
- 219 Half-time Mixed Schools for boys and girls.
- 78 House-to-house Mixed Schools for boys and girls.
- 5 Evening Public Schools for boys only.

						2,237			2,428

207 applications for the establishment of new schools were received, namely, 48 for Public Schools, 109 for Provisional Schools, 21 for Half-time Schools, 18 for House-to-house Schools, and 11 for Evening Schools. Of these 118 were granted, and 33 were declined, while 56 remained under consideration at the close of the year. The total number of children to be accommodated in the new schools to be established

established was 4,478. Of this number accommodation was provided by local promoters for 412, while for the remainder buildings have been provided, or are being provided, by the Department.

The number of applications received and the action taken with regard to them are shown in the following table :—

Applications for the establishment of schools.

Schools.	Number received.	Number granted.	Number declined.	Number still under consideration.
Public Schools	48	27	11	10
Provisional Schools	109	58	15	36
Half-time Schools	21	15	0	6
House-to-house Schools	18	12	4	2
Evening Public Schools	11	6	3	2
Total	207	118	33	56

Full details respecting these applications will be found in Appendices I, II, III, IV, V.

The number of schools in operation, with the increases or decreases from 1881 to 1888 inclusive, are given in the following table :—

Schools in operation, 1881 to 1888 inclusive.

Schools.	Number of Schools or Departments in operation.								Increase or Decrease. 1881 to 1888
	In 1881.	In 1882.	In 1883.	In 1884.	In 1885.	In 1886.	In 1887.	In 1888.	
High Schools			6	8	8	8	6	5	Increase. 5
Superior Schools... ..	58	58	58	75	90	104	120	139	81
Ordinary Public Schools... ..	1,042	1,274	1,432	1,560	1,606	1,656	1,680	1,688	646
Provisional Schools	246	206	225	250	293	323	332	319	73
Half-time Schools	93	76	91	117	150	176	194	223	130
House-to-house Schools... ..			15	40	51	58	69	80	80
Evening Schools... ..	57	28	23	21	12	20	23	12	Decrease. 45
Total	1,496	1,642	1,850	2,071	2,210	2,345	2,424	2,466	970
Accommodation, 1881	98,721								82,636
„ 1888	181,357								

From the foregoing table it will be seen that, while High Schools, Provisional Schools, and Evening Schools show diminished numbers for the year, the number of all other kinds of schools have been considerably increased. In ordinary Public Schools the increase for the year is shown to be 8, and for the last seven years 646 ; in Superior Public Schools for the same periods similar increases are 19 and 81 ; and in Half-time Schools they are 29 and 130. House-to-house Schools were increased last year by 11, their total number being 80, as compared with 15 in 1883, the first year of their organization. Provisional Schools show a decrease of 13 for the year, but an increase of 73 for the seven years ; while Evening Schools have diminished by 11 as compared with their number in 1887, and by 45 as compared with their number in 1881. The number of High Schools was the same as for the latter half of 1887.

In addition to the schools established and maintained under the Public Instruction Act, the following State supported or aided schools are in active operation, namely:—The Sydney Grammar School, two Industrial Schools, and the School for the Deaf and Dumb and the Blind.

II.—THE SCHOOL POPULATION OF THE COLONY.

The total population of the Colony on 31st December, 1888, was, according to the Government Statistician's estimate, 1,085,356. Assuming the proportions under the different ages to have been the same in 1888 as they were when the last census was taken in 1881, the ordinary school population in 1888 (4 to 15 years) was 295,316, and the statutory school population (6 to 14 years), 212,774. It would thus appear that in the $7\frac{3}{4}$ years which have elapsed since the census was taken the ordinary school population of 4 to 15 years has increased by 90,848, and the statutory school population of 6 to 14 years by 65,456.

Estimated total populations and school populations of the Colony for the years 1881 to 1888.

Ages.	April, 1881. (Census.)	December, 1881. (Estimated.)	December, 1888. (Estimated.)
Total population—All ages ...	751,468	781,265	1,085,356
Population—4 to 6 years ...	40,871	42,492	59,030
" 6 to 14 " ...	147,318	153,156	212,774
" 14 to 15 " ...	16,279	16,924	23,512
Total... ..	204,468	212,572	295,316

III.—SCHOOL ATTENDANCE.

School returns show a gross aggregate enrolment of 212,150 for the year, as compared with 209,158, returned in 1887; and deducting 12 per cent. for multiple enrolments, it is found that the number of individual pupils on the rolls in the year was 186,692. This number equals 17·2 per cent. of the total population of the Colony.

The gross and corrected enrolments for the last seven years, taking 12 per cent. as representing the multiple enrolments in each year, are given in the following table:—

Years.	Apparent Gross Average Enrolment.	Corrected Aggregate Enrolment of Distinct Pupils.	Increase or Decrease.	
			Gross Enrolment.	Corrected Enrolment.
1882	189,141	166,611	Increase. 12,172	Increase. 10,175
1883	177,079	155,918	Decrease. 12,062	Decrease. 10,693
1884	189,852	167,134	Increase. 12,773	Increase. 11,216
1885	197,090	*173,440	Increase. 7,238	Increase. *6,306
1886	204,534	*179,990	Increase. 7,444	Increase. *6,550
1887	209,158	184,060	Increase. 4,624	Increase. 4,070
1888	212,150	186,692	Increase. 2,992	Increase. 2,632

* Numbers given in previous reports corrected by deducting 12 per cent. (for multiple enrolments.)

Besides

Besides the 186,692 pupils enrolled in schools under the Public Instruction Act, there were 1,149 in attendance at the other State-aided schools, namely:—

The Sydney Grammar School	514
The Industrial Schools	549
The School for the Deaf and Dumb and the Blind ...	86

1,149

Thus, of the 295,316 children in the Colony between the ages of 4 and 15 years, 187,841, or 63·6 per cent., attended State schools in 1888, and 107,475, or 36·4 per cent., received instruction in private schools or at home, or else remained altogether untaught. The latest return of private school attendance, published by the Government Statistician, is that for 1887. From this return it appears that the total enrolment at such schools was 40,979, namely:—At Undenominational Private Schools, 9,777; at Church of England Private Schools, 3,329; at Roman Catholic Private Schools, 26,992; at Presbyterian, Wesleyan, and Lutheran Private Schools, 352; and at the Sydney Ragged Schools, 529. Hence, taking the returns available, it may be stated that, of the ordinary school population of 295,316, about 228,820, or 78 per cent., are enrolled at State and Private Schools, while 66,496, or 22 per cent., are taught at home or else remain untaught. Of the 186,692 children enrolled in schools under the Department, 737 were enrolled in High Schools, 626 in Evening Schools, and 185,329 in Ordinary Day Schools—the number from 4 to 6 years being 22,776; from 6 to 14 years, 151,594; and over 14 years, 12,322.

It will be observed that, of the estimated ordinary school population, only 78 per cent., as compared with 79 per cent. for 1887, were enrolled for school attendance. No doubt this small decrease was caused by the extreme drought, and consequent depression which prevailed during the year. Satisfactory improvement was, however, shown in the length of time pupils remain on the school rolls during the year.

The average quarterly enrolment was 160,919, and the average attendance 112,220·3, or increases respectively of 3,657 and 5,812·7. The regularity of attendance, as tested by comparing the average attendance with the enrolment, was more satisfactory than in any previous year. The percentage was 69·7, as compared with 67·6 in 1887, and it was nearly 1 per cent. higher than any previous record.

In the first half of the year 104,643 pupils, and in the second half 122,125 pupils, attended the Ordinary Day Schools 70 days or above, while the number who attended 140 days or above in the year was 103,680. These attendances show a very satisfactory improvement upon those of previous years. The percentages of the enrolment attending 70 days or above in each half-year, and 140 days or above in the year, were respectively 65·5, 76·1, and 64·8; while for 1887 the similar percentages were 56·9, 71·7, and 60·6; and for 1886 they were 64·2, 69, and 59·8.

The

The enrolment, average attendance, and attendance for the number of days required by statute, are shown and compared for the last eight years in the following tables:—

(a) *Quarterly Enrolment and Average Attendance for 1888.*

Quarters.	Number enrolled.	Average Attendance.	
		Number.	Percentage.
March quarter	161,821	110,412·5	68·2
June quarter	159,229	113,669·5	71·3

Increase. 1881 to 1888.	35,413	3·69	Decrease. 3,365	Decrease. ·69	Decrease. 8,318	Decrease. 5·57	Decrease. 8,460	Decrease. 1·2

The main facts relative to school attendance may be summed up thus :—187,841 children, or 17·3 per cent. of the total population of the Colony, and 63·6 per cent. of the ordinary school population between 4 and 15 years, were in attendance at State Schools, 152,072 being of the statutory school age (6 to 14 years), 22,776 under, and 12,993 above, that age; 186,692 were enrolled in the Department's schools. The enrolment in the ordinary day schools was 185,329, while the length of time pupils remained on the rolls was more satisfactory than in previous years. The mean quarterly enrolment was 160,919, or 86·2 per cent. of the year's enrolment, and the average attendance was 69·7 of the mean quarterly enrolment. 64·8 per cent. of the mean quarterly enrolment attended school 140 days or above in the year, 90,824 being of the statutory age, and 12,856 under and over that age. Taking the enrolment of the statutory school age, 69·9 per cent. attended school 140 days or above.

Comparing last year's attendance with that of 1887, the following points may be noticed :—The year's enrolment was increased by 2,632, or 1·4 per cent., and the mean quarterly enrolment by 3,657, or 2·3 per cent. The percentage of the quarterly enrolment in average attendance for the year shows an increase of fully 2 per cent. as compared with that of 1887, and it is 1 per cent. higher than any previous

previous record. 103,680, or 61·8 per cent. of the quarterly enrolment, attended school 140 days or above in the year, as compared with 95,153, or 60·6 per cent., in 1887; 95,123, or 59·8 per cent., in 1886; 85,780, or 58·7 per cent., in 1885; and 78,118, or 60·1 per cent., in 1884. The length of time pupils have remained on the rolls shows satisfactory improvement. The percentage of the population enrolled quarterly and the corresponding percentage in average attendance in 1888 were, respectively, 14·8 per cent. and 10·3 per cent., as compared with 15 per cent. and 10·2 per cent. in 1887.

The arrangements which came into operation on 1st July, 1887, and by which the school attendance officers were placed under the control of the several district inspectors, were continued during 1888; and considering the drawbacks under which the Department labours, principally by reason of defects in the law, there are grounds for believing that the new system under which the clauses of the Public Instruction Act relating to attendance and fees are administered is working tolerably well.

As intimated in the last Report, teachers are now called upon to furnish the information upon which action is taken to enforce regular attendance and prompt payment of fees. This arrangement has been objected to, on the ground that the additional clerical work is calculated to withdraw a teacher's attention from his main function of imparting instruction. This cannot be acknowledged; but even were it so, the advantage of securing a generally increased regularity of attendance more than counterbalances the disadvantages. The teacher is also brought into closer touch with the residents, and thus acquires a knowledge of their habits and surroundings, without which no teacher can be really successful. The local teacher necessarily knows more of the circumstances of a case than a school attendance officer could ascertain by an occasional visit; and it is believed that the present arrangement has been the means, not only of preventing the Department from initiating legal proceedings which in some cases would have been futile, and which in others would have inflicted unmerited hardship upon the defendants, but of bringing under cognizance a number of children who would not otherwise have attended school. Moreover, it is found that the fees are paid with greater promptitude than when the responsibility of collecting them was divided between the teacher and the school attendance officer, and that a considerable saving of time is effected by teachers having direct communication with the administrative officers. This policy necessarily curtails the duties of school attendance officers, and it has been found practicable to further reduce the staff. Two officers retired during the year, two were reappointed to the charge of schools, and one died. The vacancies thus caused have not been filled, and it is anticipated that further reductions can be made as opportunities occur without impairing the efficiency of this portion of the Department's work.

All possible care is exercised in dealing with cases of default, and the law is put in motion only after full inquiry, and after all
other

other suitable means have failed. As stated in last year's Report, the prosecution of the parent or guardian for the short attendance of a child is not recommended except in the case of repeated infringement of the law, nor until after he has received warning of the consequences of default. These warnings are issued by the District Inspector at the end of each school quarter, and probably have done a great deal towards securing more regular attendance. It has been found necessary to give increased attention to the collection of arrears of fees. From various causes debts had been allowed to accumulate, until at the end of November, 1887, the aggregate amounted to £6,335 0s. 11½d. This sum included a large number of debts which were due by persons well able to pay, but which had accrued principally in consequence of indifference or neglect on the part of the teachers. This was the result of lax supervision, and of permitting teachers to rely too much upon help from the school attendance officers. A more vigorous policy was initiated; and now that the teachers are held mainly responsible for the collection of fees a marked diminution of the total indebtedness is noticeable. The amount due at the end of June, 1888, was £4,268 5s. 5½d., and at the end of December, 1888, £3,532 5s. 1d. Except in one or two districts, fees are now paid with fair regularity, and it is hoped that little difficulty will be experienced in future in keeping debts within reasonable bounds. It has been considered desirable to be somewhat lenient in the recovery by legal procedure of arrears of fees, it having been felt that, in a large number of cases, it would be cruel to intensify the distress caused by the prolonged drought from which the Colony has suffered. Acting upon the same principle, many debtors have been granted reasonable time in which to liquidate their liabilities, and in the cases of others, where, because of extreme poverty or of chronic sickness, there seemed no probability of obtaining the amounts, even by small instalments, the debts have been cancelled. It was found necessary, however, to appeal to the law in some instances, but that course was adopted only after other means had failed, and when it seemed that the debtors were attempting to evade their responsibility. As evidence of the increased activity in the collection of fees, it may be observed that the amount received during the year was £69,553 14s. 4d., an increase over that collected in 1887 of £5,657 16s. 11d. As illustrating another improvement noticeable under the new arrangements, it may be mentioned that, although probably on account of the general depression resulting from the severe drought, the enrolment has not kept pace with the population of the Colony, the average attendance has materially increased, both actually and in proportion to the augmentation of population. It is estimated that the increase of population amounted to about 4·1 per cent. The excess of the mean quarterly enrolment of 1888 over that of 1887 was 3,657, or only about 2·3 per cent., while the increase in the average attendance was 5,812, or nearly 5·5 per cent., and the proportion of attendance to enrolment was raised from 67·66 to 69·72.

But notwithstanding these satisfactory results, it is felt that the usefulness of the Public Instruction Act is somewhat marred for the

want of amendment in certain important particulars. As remarked in previous reports, the weak points in the law have become generally known, and one of the principal objects of the compulsory clauses is thereby unachieved. There are parents who, either from indifference to the blessings of education, or from the selfish motive of benefiting by the labour of their offspring, neglect to send their children to school, or to provide other means of instruction. The efforts of the Department's officers to bring such parents to punishment are to a great extent rendered nugatory, because of the many loopholes for escape afforded by the defects in the law. Until provision is made for ascertaining the number of children of statutory school age; until teachers of private schools are compelled to furnish accurate returns of attendance; and until it is made penal to employ during school hours children of school age (unless educated up to the standard, or specially exempted from attendance at school), it will be next to impossible to enforce compliance with the obligation imposed by section 20 of the Public Instruction Act. Considerable time and expense would be saved to the Department if the onus of proving that there is sufficient cause for default were thrown upon the parent or guardian; and further experience of the difficulties of obtaining conclusive evidence to rebut the mendacious statements of defaulters, show that, in the interest of the children, the law should be amended in that direction. The term "nearest road" in clause 3 of section 20 of the Act is ambiguous. It is generally found that Magistrates before whom cases of default are tried construe the phrase as meaning the nearest public road; but it seems reasonable to assume that the intention of the Legislature was that any child living within 2 miles of a State school by the nearest available road, track, or path, whether public or private, should come within the scope of the compulsory clauses. Another interference with the regularity of attendance arises from the fact that the penalties for default are so small as not to deter parents from wilfully breaking the law for the sake of the child's earnings. The hereinbefore proposed restriction upon employers of labour would only partially meet this case, and probably the only way out of the difficulty would be to require the child to attend school for a certain proportionate number of days in each quarter, and to give larger discretion to Magistrates in regard to punishment for cases of repeated default. At the same time provision could be made for cases of short attendance at Half-time and House-to-house Schools. These schools being part time are open for only half or less than half the period during which the other classes of schools are accessible, and therefore the obligation to attend seventy days in each half-year cannot apply to pupils attending them.

IV.—SCHOOL PREMISES.

School Sites.—108 new school sites were obtained in the year. Of these sixty-eight were Government grants, thirty were resumed under Act 44 Victoria No. 16, eight were purchased, and two were gifts

gifts from private individuals; nine of the resumed sites were also gifts. The cost of the sites purchased was £920, and the sum of £1,029 15s. 5d. was paid on account of those resumed. The balance still due for the resumed sites is £5,909. Full particulars will be found in Appendix 15.

School Buildings.—121 new school-houses and additions, to provide increased accommodation in 34 existing buildings, were completed during the year. 23 weathersheds were also completed, 7 residences for teachers were erected, and repairs and improvements were effected in 643 existing buildings. Places for 6,256 children were provided for in the new buildings and additions. 107 of the new school-houses, 17 of the additions, 7 residences for teachers, and 14 of the new weathersheds were erected under the supervision of Inspectors of Schools. Repairs to 371 buildings were also effected under the same supervision. The other works specified were carried out under the Department's architect. Of the total number of new places, 3,614 were provided by the architect's buildings, and 2,912 by buildings erected, or rented, under inspectors' supervision.

At the close of 1888 the existing school premises afforded room for 181,357, about 94 per cent. of such accommodation being in vested, and 6 per cent. in non-vested, premises. Of the school-places counted in 1887, about 2,382 were lost in 1888, by the closing of schools and by the giving up of old buildings, and hence the net increase for 1888 was 4,144.

Taking the building work done in the two last years, it may be observed that in 1888, 14 new school buildings were erected under the architect's supervision as compared with 23 erected in 1887, while the additions numbered 17 as compared with 37, the premises repaired 272 as compared with 274, and the places provided 3,614 as compared with 9,846 for the same periods. It may also be noticed that the number of small school buildings erected under the inspectors' supervision were 107, as compared with 109 in 1887; and the number of places provided, 2,642 as compared with 3,568. The total number of places provided in 1888 showed a decrease of 6,882 as compared with the number provided in 1887.

At the close of 1888 the following additional works were in progress:—21 new buildings, additions to 14 existing buildings, and 34 buildings for small country schools, the whole to provide accommodation for about 4,683 children. 3 new weathersheds were also in course of erection; and repairs and improvements were being carried out in 87 existing school buildings.

Full particulars respecting the building work completed in the year, and that in progress at its close, are given in the following tables:—

Works completed.

	Number.	Places provided.	Total cost, not including costs of sites.	Average cost per building.	Cost per place.

1888	84,575	0	9
Total	£1,667,933	14	6

V.—INSPECTION.

No change has been made in the inspecting staff during the past year. A few interchanges of districts have, however, taken place amongst inspectors. These were rendered necessary by one cause or another, and have, on the whole, been productive of good. With the exception of sixteen, all schools underwent the usual regular inspection and as many as 1,017 or two-fifths of the whole were inspected a second time. The total number of inspections made was 3,516. This is the largest amount of inspection done in any year, and when the other very arduous duties of an inspector are duly considered, it will be admitted that great efforts have been made by these officers to perform this most important part of their work in a satisfactory manner. The present

present staff, consisting of a chief inspector, a deputy chief inspector, nine district inspectors, and twenty-three inspectors, is not sufficiently strong to ensure two inspections of all schools within the year; and the appointment of additional inspectors is therefore becoming urgently necessary. It is hoped that something may be done in this direction at no distant date.

Information respecting the apportionment of schools to the several district inspectors, and the amount of inspection done in each district, is given in the subjoined table :—

District.	No. of Inspectors.	No. of Schools.	No. of Schools inspected.	No. of Schools inspected twice.	Total No. of inspections.	No. of Schools not inspected.	No. of pupils examined.

Course of Secular Instruction and Standards of Proficiency.—

In framing a course of secular instruction three important considerations have to be kept in view: (first) that the subjects selected for teaching are the most suitable and useful; (second) that the course is not overburdened with subjects; and (third) that the time for a child's stay in each class is judiciously regulated. It is believed that these conditions are fully recognised in the course sanctioned by the Department. In the lower classes of each school great prominence is given to the three R's, while other branches find a place in the routine as the higher classes are reached. Assuming a child to enter a Public School at the age of six years, and that his attendance has been reasonably constant, he will be expected to clear the class at 7, the second-class at $8\frac{1}{2}$, the third-class at 10, and the fourth at 11. The number of subjects embraced within the course ranges from six in the first-class to fifteen in the fifth or highest class. All these subjects are compulsory, and are estimated in accordance with their relative importance and the time required to teach them. It is just possible that the course may be regarded by those unacquainted with our school system as too ambitious; but it should be pointed out that the Superior Public School, for which the full course is alone prescribed, is intended to supply an education somewhat similar to that given in Secondary or High Schools.

The present standards of proficiency have been in force four years—ample time to test the fairness of their requirements and their general suitability. Compared with those formerly in use, it must be admitted that they impose increased work on both teachers and pupils. This is probably true of the subjects generally, but unquestionably so in respect of arithmetic. As applied to this branch,

branch, the standards are higher than in any other country, and the question of revising them is pressing on the attention of the Department. The whole subject of standards, as well as other matters of importance, will, it is hoped, receive careful consideration and treatment before the close of the year.

Character of Pupils' Attainments and Progress in Learning.—

118,710 pupils were present at the examination of schools conducted by the inspectors, showing an increase of 4,912, or 4·3 per cent., on the number examined in 1887, while the increase in 1887 over the number for the year previous to it was 1,725, or 1½ per cent. All were examined in reading, 99½ per cent. in writing, 97 per cent. in arithmetic,

arithmetic, 38·6 per cent. in grammar, 41·7 per cent. in geography, 41·8 per cent. in history, 95·3 per cent. in Scripture lessons, 76·7 per cent. in object lessons, 29·4 per cent. in drawing, 84·4 per cent. in music, 1·1 per cent. in French, 5·1 per cent. in euclid, $1\frac{1}{2}$ per cent. in algebra, 6·9 per cent. in mensuration, 1·2 per cent. in Latin, 3·2 per cent. in natural science, 0·1 per cent. in trigonometry, 71 per cent. (of girls) in needlework, and 83·7 per cent. in drill.

Of the 118,710 pupils examined in reading, 10 per cent. were examined in the alphabet, 21·2 per cent. in monosyllables, 27·4 per cent. in easy narrative, and 41·4 per cent. in ordinary prose. Of 118,137 pupils examined in writing, 42·2 per cent. wrote on slates, and 57·8 per cent. wrote on paper. Of 115,239 examined in arithmetic, 60·8 per cent. were examined in simple rules, 19·1 per cent. in compound rules, and 20·1 per cent. in the higher rules. Of 45,875 pupils examined in grammar, 26·2 per cent. were tested in the elementary part, and 73·8 per cent. in the advanced part of the subject. In geography, of 49,459 pupils examined, 31 per cent. were tried in the elementary, and 69 per cent. in the advanced, parts of that subject.

The following table gives a comparison of some of the percentages above-mentioned, with the results in corresponding subjects in 1887, viz. :—

		1887.	1888.	Increase per cent.	Decrease per cent.
Total number of pupils examined		113,798	118,710	4·3

	{ Writing, who wrote on paper	58	57·8	0·2
	{ Arithmetic, who were tested in the higher rules ...	20	20·1	0·1
	{ Grammar, who were tested in advanced portions ...	71·9	73·8	1·9
	{ Geography, who were tested in advanced portions...	66·5	69	2·5
Percentage of pupils examined in	{ History	41·5	41·8	0·3
	{ Scripture.....	93·4	95·3	1·9
	{ Drill.....	85·5	83·7	1·8

It will be seen that the above percentages were nearly equal for the two years, there being a slight difference in favour of 1888 in all except two of the subjects—writing and drill. A comparison with earlier years will, however, show that progress has been continuous and steady. For instance, in 1885 a material increase over 1884 took place in the percentage of examinees in most of the above subjects; in 1886 there was a further increase in *all* those subjects; 1887 saw a still further advance in all but two; while, for 1888, this improvement has been maintained and even slightly added to. Ordinary
prose

prose reading has advanced from 33 per cent. of examinees in 1884 to 41·4 per cent. in 1888; writing on paper from 55 to 57·8 in the same period; arithmetic (higher rules), from 12 to 20·1 per cent.; history, from 14 to 41·8 per cent.; Scripture, from 39 to 25·3 per cent.; and drill, from 73 to 83·7 per cent. These figures prove that a good proportion has been reached of pupils receiving instruction in the higher parts of the subjects mentioned.

With regard to "passes," the results are as follows:—86 per cent. of the number examined passed in reading, 88 per cent. passed in writing, 75 per cent. in arithmetic, 76 per cent. in grammar, and 78 per cent. in geography. Arithmetic showed an increase of 7 over the percentage of passes in 1887; geography a decrease of 2 per cent.; the other results remained unaltered. Of other subjects, trigonometry showed the greatest falling off in passes, the number being 60 per cent., as against 78 in 1887. Object lessons, Latin, and French showed decreases of 4 and 5 per cent. Algebra and natural science had small increased percentages. The others remained much the same as for last year. It may therefore be stated that the most satisfactory progress was made in arithmetic; the least satisfactory in trigonometry. The lowest proportion of passes was in mensuration, 58 per cent.; the highest in needlework, 90 per cent.; with writing next, 88 per cent.

Of 1,824 Public Schools examined, 85 per cent. were up to or above the standard, and 15 per cent. were below it; of 313 Provisional Schools, 65 per cent. were up to or above the standard, 35 per cent. below it; of 222 Half-time Schools examined, 72 per cent. were up to or above the standard, and 28 per cent. below it; of 78 House-to-house Schools, 67 per cent. were up to or above the standard, and 33 per cent. below it; and of 8 Evening Schools examined, 87 per cent. were up to or above the standard, and 13 per cent. were below it.

The progress in efficiency made by the several classes of schools under the Department during the last five years is shown below:—

Class of Schools.	Percentage up to or above the Standard.				
	1884.	1885.	1886.	1887.	1888.
Public	80·9	80	82	84	85
Provisional	55·2	57	64	65	65
Half-time	60	63	65	74	72
House-to-house	36·6	50	65	75	67
Evening Schools	60	...	100	79	87
All Schools	75·8	75·6	78	80	80

This statement shows that the schools have continued to improve in efficiency, with the exception of House-to-house, and, to a very small extent, Half-time Schools, which class seems to have lost part of the advance made last year. When compared, however, with the first year mentioned in the table (1884), it will be noticed that a very decided improvement has taken place in the efficiency of all schools.

Music and Drawing.—The standards of proficiency provide for a complete and systematic course of instruction in vocal music and drawing by the most approved methods. With regard to the former, the tonic-sol-fa method is employed as far as the Third Class, while the staff-notation is mainly used for classes beyond the Third. Not only is the teaching in both subjects compulsory, but special classes for imparting instruction therein to pupil-teachers have been many years in existence, and a pass in both branches is absolutely necessary to enable teachers and pupil-teachers to obtain grades of classification or promotion. In order to properly utilize the instruction in music given to the lower classes, the staff-notation is taught to the higher classes by the movable doh method, an application of the tonic-sol-fa principle.

Judging from the results elicited by the inspectors' examinations in music the subject would appear to be effectively taught. It is to be feared, however, that the tests ordinarily applied are of a partial and easy character, and that a more searching examination of the pupils' knowledge of the theory would disclose a less satisfactory state of things. Herr Alpen, who is employed to visit schools in the Metropolitan District in order to ascertain how music is taught therein, reports in the following terms:—"I am glad to be in a position to state that in a fair number of schools, notably the smaller ones, there is a decided advance in the knowledge of elementary theory; and, as a consequence, a steady improvement in reading at sight is observable. In almost every school the staff-notation is now taught in the upper classes,

classes. There are also now but very few infant schools where the children of the upper division cannot sing a scale or have some idea of its construction. In the actual singing of the children, however, I am unable to state that any improvement has taken place. In the boys' schools, particularly, more attention ought to be paid to voice production and greater refinement of style aimed at."

The results disclosed by the examinations in drawing were apparently little less satisfactory than those obtained in music, but there is reason to believe that a large number of teachers fail to follow the prescribed course. A remedy for this irregularity will, it is confidently expected, be found before long, as it has been decided to appoint a superintendent of drawing, whose chief duty will be to visit schools, examine the pupils in drawing, and see that the methods of teaching it are the most approved and the best.

With regard to the degree of proficiency shown by the teachers and pupil-teachers examined in drawing during the year, the following extracts from the Examiner's Report will convey a tolerably clear idea:—"In freehand drawing the work is very poor. No progress has been shown in that subject during 1888 * * * * Model drawing is unsatisfactory. Examinees are deficient in the general knowledge of the subject, and especially of proper proportion * * * * Geometrical drawing is creditable. Very fair progress has been made during the year. Perspective drawing has been attempted only by a few teachers. Some of the candidates' work is excellent. The average of passes is 50 per cent. General improvement has been shown * * * * The average number of passes in drawing amongst the students in training is very good."

Discipline.—The inspectors, without an exception, report very favourably of the general discipline of our schools. Regularity of attendance excepted, all the points commonly included under the head of discipline appear not only to receive due attention but to be well secured. Cases, no doubt, occur where the government is weak, and where other conditions essential to a well managed school are absent, but such cases are few. The ordinary type of school met with is one in which the pupils attend with fair punctuality, present a neat cheerful appearance, manifest a quiet respectful demeanour, and yield a prompt and willing obedience. There is reason to believe, however, that in a large number of instances, the means employed to establish a proper healthy school routine are open to adverse criticism, the documents that regulate the instruction being unskilfully arranged, and the use and value of systematic drill being but partially recognised.

Captain Mulholland continues to fill the office of superintendent of drill. He appears to have done a year's good work, and to have formed a favourable opinion as to the general progress made in this most important aid to school discipline. The following extracts from his report will afford a fair idea of what is being done under his teaching and directions:—

"I visited and examined in drill 81 schools, representing 175 departments. This year I have been able, in some instances, to make several visits, to which I will allude at greater length below.

"The

“The standard of drill, of which I was able to report so favourably in my last report, has been well maintained, and in many instances improvement is observable.

“My duties are as follow:—To give instruction in drill, gymnastics, and calisthenics, &c., to the Training Schools at Fort-street and Hurlstone; to give instruction in drill to the pupil-teachers at Fort-street on Saturdays; to give instruction in drill and calisthenics to the High Schools, on Mondays; to inspect the drill in every department of every school within the Metropolitan District. In addition to these duties, with a view to enlisting the sympathies of teachers of girls’ and infants’ schools, I have given instruction in calisthenics to the girls in several schools at regular intervals, and have exercised the infants in gallery exercises. In some schools the girls have provided themselves with wands, and I believe exercises with them are regularly given by the teachers.”

Public School Cadet Corps.—The Public School Cadet Corps still continues to make but moderate progress, the arrangements under which the corps is conducted being unsatisfactory. The causes which operated against the success of the corps were stated in a former Report, and may here be repeated. They are:—

1. The existing organization is defective.
2. The regulations are not enforced.
3. Target practice is neglected.
4. Teachers have no voice in the management of the corps.
5. Cost of uniform.

As formerly remarked, a committee, consisting largely of teachers of leading Public Schools, was appointed to report as to the best means for placing the corps on an efficient footing. After fully considering the whole question, the committee furnished an exhaustive report containing the following recommendations:—

1. That all boys who are not 12 years of age, who are not physically disqualified, should be drilled to the use of arms.
2. That, in order to carry out that principle, all male teachers should be put through a course of training in rifle exercises.
3. That the present Cadet Corps be disbanded, with the view to the introduction of a military system on a broader basis by the formation of a force to be called the “New South Wales Public School Cadet Force.”
4. That, in connection with this force, a Senior Cadet Corps be formed in order to continue the military training of the boys after they leave school until they are eligible for admission to the ranks of the Volunteer Force.
5. That a simple and inexpensive uniform be introduced, the cost to be borne by the parents.

6. That the Cadet Force be under the command of an officer (rank to be hereafter determined), who should be a teacher, and who should be responsible to the Minister of Public Instruction.
7. That a paid staff be appointed, consisting of an adjutant, a sergeant-major, and a sergeant-armourer, such officers to be directly responsible to the officer commanding.
8. That, as a preliminary step, a corps should be established in Sydney, to be called the "First Regiment of the New South Wales Public School Cadet Force," the movement to be extended to the country districts as soon as practicable.

The committee's report also deals with the necessary details for the efficient carrying out of these recommendations.

These and other matters embraced within this Report are now under consideration, and will be finally dealt with at an early date.

Major Strong reports that the increase in the number of cadets upon the roll for this year, over the number for last year, is 137 only. The smallness of this increase he attributes partly to the want of suitable carbines. This difficulty, however, will now be met, inasmuch as 2,000 light Snider carbines have recently been received from England. In connection with suggestions already made by the committee appointed to report upon the whole question of the corps, Major Strong states that it is his intention to take steps for the establishment of a corps of senior cadets, to be composed of youths who have left school but who are still too young for enrolment in the Volunteer Force. Major Strong hopes to make this senior corps a connecting link between the Public School Cadet Corps and the Defence Force of the Colony, with a view to the ranks of the latter being recruited in a great measure from the former.

High Schools.—These institutions are five in number, and are situated at Sydney, Maitland, and Bathurst. All are conducted in temporary premises which are very fairly suitable for the purpose; those in Sydney are becoming overcrowded, and are badly in need of additional playground space. New High Schools for the city, constructed on the latest and most approved plans, and occupying a central and spacious site, are much needed.

The attendance at High Schools continues to increase. In 1887 the enrolment was 710, and the average daily attendance was 498·9; whereas for 1888 the enrolment was 737, and the average daily attendance, 550·7. These schools are reported by the examining inspectors to be in a very healthy disciplinary condition, the pupils being orderly, well-behaved, and diligent in study. The boys receive regular instruction in drill, and the girls in calisthenics.

The course of instruction, although fixed by regulation, is arranged to harmonize with the programme of the University Examinations. The methods of teaching are suitable, and are applied with
vigour

vigour and effect. The percentage of passes in the several branches of learning are as follow:—Reading, 96; writing, 90; arithmetic, 89; mensuration, 90; history, 88; Latin, 94; French, 93; drawing, 88; geometry, 96; algebra, 92; trigonometry, 86; natural science, 100; Greek, 100; German, 100. At the examinations held in connection with the University the High Schools also appear to advantage, inasmuch as 70 pupils passed the Junior, 20 the Senior, and 11 the Matriculation, examination of the year.

The expenditure on High Schools during the year was £6,691 18s. 8d.; the amount of fees received for the same period was £4,326 12s. 7d.; so that the actual cost to the State was £2,365 6s. 1d., or less than £3 5s. for each pupil enrolled.

At this small cost the High Schools are doing excellent work for the State.

Superior Public Schools continue to gain in public favour. Besides affording all the educational advantages obtainable in the Ordinary Public Schools, provision is made in them for instruction being given in Latin, French, science, and mathematics. In many localities they supply, in a great measure, the place of High Schools. To warrant a school being declared a Superior Public School, it must have at least twenty children educated up to the standard that completes the course prescribed for a fourth class. The number of such schools in operation at the beginning of 1888 was 43, embracing 120 departments, with an attendance of 35,678 pupils. During the year the schools at Albury, Ashfield, Braidwood, Camperdown, Forbes, Marrickville, Parramatta, and Taree, comprising 19 departments, were raised to the rank of Superior Public Schools. The total number, therefore, of these schools at the close of the year was 51, consisting of 139 departments, and attended by 39,692 pupils.

The condition of this class of school, as disclosed by the inspectors' reports, is very satisfactory. They are efficiently organized, well disciplined, and well taught. Young (boys), Crown-street (boys), Blackfriars (boys), Lismore, and Cooma schools deserve special commendation for the success of their pupils at the late University examinations.

Evening Public Schools.—At the beginning of 1888 nine Evening Public Schools were in operation. During the year applications were made for eleven new schools. Of this number six were granted, but only three were opened in the year. Of the others three were declined, and two remained under consideration.

As pointed out in previous Reports, schools of this class are not popular institutions. So far they have been established for boys only, whose ages exceed 14 years. The course of instruction is confined to reading, writing, and arithmetic. None but classified teachers are appointed to conduct them; and everything is done to render the teaching skilful and attractive. The general results are nevertheless of a disappointing character.

House-to-house Schools.—The number of House-to-house Schools in operation in 1887 was 69. In 1888 this number increased to 79. These schools are usually started in remote and isolated localities where sufficient children cannot be found within a 4-mile radius to form a Provisional School of the lowest class, having a minimum average attendance of 12. They thus meet the wants of a large number of families who, without such provision, would be cut off from the means of school instruction. The subjects taught in House-to-house Schools are limited to reading, writing, dictation, and arithmetic. Every itinerant teacher is required to work by a programme approved by the inspector; and in this programme due provision is made for supplementing the school teaching by a systematic course of home lessons. House-to-house Schools occasionally merge into Half-time Schools or into Provisional Schools. Of the 80 in operation, 78 were inspected. In point of proficiency, although below the standard reached in 1887, they nevertheless compare favourably with Provisional Schools, and, having regard to the difficulties under which they are conducted, are doing very useful work.

Kindergarten.—The modification of the Kindergarten system which, as intimated in former reports, was some time ago introduced into the infants' schools at Riley-street, Sydney, and Wickham (Newcastle), has been continued in those schools with success. A further step towards the general incorporation of that system into the Infants' School teaching of the Colony has been made by its introduction into the schools at Fort-street and Waverley, and schools specially adapted for its exemplification are now being erected at Paddington, and Australia-street, Newtown. Systematic instruction has been given during the year to the students of the Hurlstone Training School, and the female pupil-teachers being required to familiarize themselves with its principles, it is fair to assume that many of the infants' schools of the country will shortly enjoy the advantages which may result from its judicious use in the instruction of very young children.

During 1888, as in former years, the method has been best exemplified in the Riley-street school, which is under the charge of Miss E. L. Banks, who in addition to being a certificated Kindergarten, has had the advantage of a course of training, and long Infants' School experience in England and Germany. The Riley-street school had an average attendance of 180 pupils, arranged in four classes. The time devoted to Kindergarten instruction throughout the school is 40 minutes daily.

The lower first class contained, at the date of inspection, sixty children whose average age was 5 years. These are occupied with the first gift, which consists of six rubber balls, crewelled over with wool, representing the three primary and the three secondary colours. An introductory lesson is given on the colour, shape, and other qualities of the ball, comparisons are made with familiar objects, and contrasts are shown; but the chief aim of the gift is to teach the children a number of movement plays by means of the balls attached to strings,

or

or loose. The games are commenced with a song, and during the play short lines of poetry are recited, appropriate to the exercises performed.

The occupations of the upper first class, containing forty pupils (average age, $6\frac{1}{3}$ years), are the second and third gifts. The third gift has three objects made of wood: a ball, a cube, and their connecting link, a cylinder. The bright colours and the softness of the first gift are gone, but there remains a link in the size of the ball which is the same. The balls of the first gift are identical in form, the colour only varied, whereas in the second there is variety of both form and properties. The sphere of wood feels cold, hard, and heavy in comparison with the ball of the first gift. The cylinder possesses the convexity of the ball, and the flatness of its two ends forms a connecting link with the cube. This law of connexion and contrast is found to be typified throughout Froebel's teaching. In the next occupation (third gift), a wooden cubical box containing eight cubes of equal size is used. The children are taught to separate these cubes into halves, quarters, eighths, and then to put the several pieces together again to make a whole. In this way they receive their first lesson in fractions. But the cubes are useful in other respects; they represent bricks, and the child's natural impulse to build can be gratified with them. He imitates his teacher, and rears his tiny edifice slowly, answering her questions at intervals, and listening to her instructive remarks in reference to the work being done. In this way the children are trained to accuracy of eye and hand, defects of construction are detected, and the objects built have not to be thrown down when finished, but one form follows the other with as little change as possible.

The second class numbering 36 pupils (average, age $6\frac{1}{2}$ years), are exercised with the fourth, seventh, and twelfth gifts. The fourth contains a wooden box, cubical in shape, in which are eight oblong pieces of wood of small size. The forms built with this and the preceding gift are:—1. Forms of knowledge: squares, oblongs, &c. 2. Life objects: castles, houses, tables, &c. 3. Forms of beauty: pretty forms, stars, &c. From solids an advance is made to plane surfaces, represented by a thin wooden tablet of square, oblong, or triangular shape (seventh gift). The tablets are laid on the scored surface of the Kindergarten desks to represent the plane surfaces of the life, objects, &c., built with cubes. Exercises in lines (straight and curved) are then gone through by means of sticks and rings (twelfth gift).

The occupations of the third class (32 pupils: average age, $8\frac{1}{8}$ years) are plaiting, paper-folding, drawing lines, pattern pricking, pattern sticking, paper-cutting, pea-work, interlacing, and clay-moulding. In plaiting, the child is called upon to use both his hands, and is afforded an opportunity for cultivating a taste for colour, as every pattern requires the combination of at least two colours. The child's faculty for number is also exercised in handling objects of different

different forms and colours. In paper-folding, pieces of paper, four inches square, and of different colours, are given to the children with directions for their manipulation into boats, boxes, and other objects and forms of beauty. As every fold made on the paper must be mathematically exact, the eye is trained to observe and the hand to produce. In drawing lines, slates are first used, then books ruled in small squares. The child's first effort is to follow the ruling with his pencil. Thence he proceeds to draw the square, oblong, triangle, and numbers of mathematical figures, thus apprehending the beauties of symmetry, combination, and opposition, always ended by the simple network of squares. Soon the pupil begins to draw the objects he sees around him, and this occupation becomes useful and interesting.

The examination of these pupils in the ordinary subjects of the prescribed course for infants' schools shows that the instruction is fully up to the requirements of the standard, and the discipline is reported to be excellent. The school may, therefore, be regarded as a successful experiment in the way of embodying the best parts of the Kindergarten system with the ordinary methods of infant school teaching.

Scientific and Technical Education.—In Great Britain and other European countries, in the United States, and in the larger British Colonies, much attention is still being devoted to the work of technical education, but, as regards provision for the preliminary part of such work being carried on in connection with State Primary Schools, France may be instanced as having taken the most advanced steps. In that country the work of primary education is organized as follows:—(a) Infants' Schools for children under 7 years; (b) Elementary Schools with three courses, viz.: An elementary course for children from 7 to 9 years, an intermediate course for children from 9 to 11 years, and a superior course for children from 11 to 13 years; and (c) Superior Primary Schools for a two years' additional course. The principles and methods of Froebel's Kindergarten are largely adopted in the French Infants' Schools; and in all the courses of the Elementary Schools, and in the Superior Primary Schools, industrial work, or a practical preparation for it, forms an important part of the programmes, both for boys and girls. In a large number of Primary Schools, situated in Paris and other important centres, regular instruction is also given in handicrafts.

In England, during 1888, a new Bill for the promotion of technical and manual instruction was prepared by the Government, but, as yet, it has not been passed by Parliament. By this Bill, "manual instruction" may be carried on in connection with all classes in Primary Schools, while "technical instruction" will be open only to children who have passed the sixth standard of the ordinary Primary School course. The Bill further defines the instruction as follows:—(a) "Manual Instruction": Instruction in the use of tools, and modelling in clay, wood, and other material; and (b) "Technical Instruction": Instruction in the principles of science
and

and Art applicable to industries, and instruction in the application of special branches of science and art to specific industries or employments. Teaching the practice of any trade, industry, or employment, is not to be included in the instruction thus defined.

In New South Wales, during 1888, no new arrangements affecting technical education in Primary Schools were brought into operation, but preliminary steps have been taken towards securing the services of a specially qualified and experienced organizer and superintendent of drawing instruction for Primary Schools and teachers. The question of rearranging the Primary School course of study, so that more systematic instruction introductory to agriculture might be given, has also been under careful consideration. This action has been taken with the view of ascertaining whether pupils could not be prepared, in some measure, for the wider curriculum and practical work of agricultural colleges and model farms which, it is expected, will shortly be established under Government control. At present, Primary School instruction bearing on agriculture is imparted thus:—

(a) to the infants' and lower classes, object lessons are given on common animals and vegetables; and (b) to the upper classes, similar lessons are continued, with fuller details, and elementary physiology is systematically introduced. In place of the foregoing, possibly the following course might be substituted for all schools in agricultural districts:—

- (a) Up to the third class the course to remain as at present, *i.e.*: Object lessons to be given on common animals and vegetables.
- (b) For the third class: Lessons on animals and plants, with special reference to agriculture.
- (c) For the fourth class: Lessons on animal and plant life, and on the chemical and physical principles involved in agriculture.
- (d) For the fifth class: The fourth class work continued, but with fuller details.

To carry on the above course, text-books of information for teachers might be prescribed, and the acquiring of a certain portion of the information such text-books contain might be allotted as the work of a class. As far as practicable, however, such information would have to be recast by the teacher to suit the climate, soil, and special circumstances of his particular school locality. Further, where facilities exist, such as available land of a proper kind and a qualified practical teacher, for working a small garden or "spade farm" in connection with a school, the teacher and his pupils might be encouraged in the establishing and working of such garden or farm. Workshops for the instruction of pupils in the use of ordinary tools might also be established, if deemed desirable, in connection with large schools, both in town and country.

As pointed out in the Report for 1886, three things must be carefully attended to in furnishing scholars with the preliminaries of a scientific industrial education: "First, they must be trained to systematic habits of industry, in order that a thoroughly industrial disposition may be cultivated in them; secondly, they must be instructed in general industrial knowledge, and in the outlines of science and technology; and, thirdly, there must be a development of their physical, intellectual, and artistic powers, such as will give them a consciousness of strength, and will lead them to devote themselves earnestly and successfully to some chosen employment." The systematic arrangements and methods under which all work is carried on in our Primary Schools are the best means of cultivating industrial habits among the pupils; and the general scientific and technical information imparted by the means of oral lessons, courses of which are carefully arranged for each class, will afterwards enable pupils to take up the subjects and work of technical education suitable to those who have completed the Primary School course. Moreover, drawing, as now being taught, not only trains the hand and eye and helps to develop the pupils' artistic powers, but it also forms the most important basis for the advanced instruction and training necessary to prepare our youth for nearly all industrial pursuits.

Beyond the preliminary scientific and technical instruction given in Primary Schools, the work of technical education continues to be carried on under the management of the Board of Technical Education, appointed in 1883. The contemplated changes affecting that Board, referred to in last year's Report, are, however, still under consideration. A detailed report of the Board's work for 1888 will be found in Appendix 17.

Public School Savings Banks.—In view of the large amount of good likely to result from school banks, it was considered advisable that the establishing and carrying on of these institutions should be recognised as a necessary part of the educational work of our Public Schools; and as a preliminary step it was decided that, from January 1887, all such schools ranking above class VII, should be eligible to have banks opened in connection with them. This decision was duly notified to the teachers of the schools concerned; and it was fully expected that, within reasonable time, nearly all of them would make application, and take the other steps necessary to have the banks brought into operation. At the close of 1887, however, the expectation had been but partially realized, the teachers of as many as 275 or more than one half of the schools or departments eligible to have banks, having failed to take effective action towards promoting their establishment. Under the circumstances, the teachers were requested to explain why the desired action had not been taken by them. The explanations furnished showed that, while nearly all teachers agreed as to the great advantages to be derived from the establishment and healthy operation of school banks, many of them feared to undertake the responsibilities, and, as they thought, the large amount of extra work likely to be necessary in connection with the carrying on of such institutions.

institutions. At the same time others at once sent in their preliminary applications, and acknowledged that they had always intended to take steps to have the banks established. By the end of 1888, banks had been established in connection with nearly 70 per cent. of the schools eligible to have them; and as it was found that the institutions could be successfully carried on by the teachers of so many schools, the other teachers, who are in all respects in similar positions and circumstances, were informed that steps would have to be taken without further delay to have banks brought into operation in connection with the schools under their charge.

At the close of 1887 the school banks in existence numbered 255, and during last year the number was increased to 389. Early in the current year (1889) 141 additional banks were brought into operation; so that now only 36 of the schools, or departments, eligible to have these institutions, have failed to secure their establishment. In 1887 there were about 40,000 depositors in the banks then established, and the total amount of deposits for that year was £9,446 15s. 9d. In 1888 the additional deposits received amounted to £8,368 1s. 2d. Thus the total amount of deposits received during the first two years of the banks' operations has been £17,814 16s. 11d. Of this amount the sum of £5,571 5s. 4d. was transferred to children's own separate accounts in the Government Savings Bank, and, at the close of 1888, £5,179 0s. 11d. remained as the credit balance of the "school banks'" account with the Government Bank. During the two years the amount withdrawn by the depositors, for current use, was £7,064 10s. 8d., or about 40 per cent. of the total amount deposited. It may be noted, however, that these withdrawals amounted to £4,979 13s. 3d. for 1888, while for 1887 they were only £2,084 17s. 5d. On the 31st December the following progress was shown as the nett result of the work done in connection with school banks in 1888:—134 additional banks had been opened; £2,840 15s. 9d. had been added to the sum transferred to children's own separate accounts in the Government Bank, and the "school banks'" account in the Government Bank had been increased by £547 12s. 2d.

As pointed out in last year's Report it is fully recognized that school banks can be established and carried on successfully only by teachers who are prepared to interest themselves warmly in the work, and act from professional devotion without any selfish motive; and, as these institutions are known to be eminently successful in European countries, in cultivating in the young the very desirable habits of self-restraint, self-reliance, and thrift, the teachers of New South Wales will not, it is hoped, be eventually found wanting in the zeal and self-sacrifice so necessary in connection with this important branch of Public School work.

VI.—TEACHERS.

Teachers enter the service of the Department in one of three ways, either as candidates who have passed through a complete course of training, as candidates who have undergone a preliminary course of training

training in a Public School, or as candidates who have gone through a course of training in the Training Colleges or Normal Schools of other countries. The requirements of the service are, on the whole, amply met from the first two sources. Very few teachers trained beyond the Colony have received appointments under the Department during the past year. At the same time it is proper to state that room can always be found for teachers of exceptional ability, large experience, and good character. Some difficulty is felt in obtaining suitable teachers for very small Provisional Schools and for House-to-house Schools. Schools of these classes are usually situated in remote, isolated places, where male teachers alone can be provided with accommodation; but the remuneration attached to such schools being necessarily small, little or no inducement is offered to male teachers to accept appointment to them. Vacancies in Public Schools are invariably filled by the appointment of properly trained and classified teachers, and no vacancy is filled without the claims of every teacher eligible for appointment to such being carefully considered. The grounds on which promotion is granted are seniority and classification combined with success in teaching.

Training of Teachers.—In last year's Report it was stated that the whole of the arrangements relating to the training of teachers were under consideration, with the view of having important modifications effected in them. The modifications have since been decided upon, and a scheme deemed calculated to secure increased efficiency and economy in the future management of our training institutions has been adopted, to come into operation from the 1st January, 1889.

Under the old arrangements the period of training was limited to twelve months, and the whole expenditure incurred, inclusive of that for students' maintenance, was borne by the department. These provisions, however, were acknowledged to be of a temporary and imperfect character, and the desirableness of a more extended term of training for teachers has long been recognised. Indeed, to provide a class of cultured and efficient teachers for the larger Public Schools, the Superior Public Schools, and the High Schools under the department, an extended term and a more comprehensive course of education and training were absolutely necessary. At the same time, however, it is a sound and just principle, and one thoroughly recognised in Great Britain, that the State is not bound to defray the whole cost of the training of pupil-teachers beyond the period for which the services of these young persons are first engaged. A pupil-teacher, who has successfully completed his four years' term of service, is qualified to act as an assistant, or to manage a small school; and, if he aspire to fill the higher positions in the service, he should, except under special circumstances, and he be possessed of marked ability, be required to pay, either wholly or in part, for any additional training that may be necessary to enable him to attain that object. Towards providing a class of teachers thoroughly qualified to carry on secondary education in our Superior Schools and High Schools, jointly already numbering over fifty, it is deemed very desirable that a few of the Training
School

School students among those showing marked ability should, before completing their course, become connected with the University. To effect this object, arrangements have been made under which three of the students most successful at the end of each course of two years will be permitted to remain in the Training School for a third year's course; and the University Senate has agreed to so modify its by-laws that such students may attend the third year's lectures for undergraduates and be admitted to the final examination for the B.A. degree.

The following is an outline of the new scheme adopted for the management of the Training Schools:—

Each Training School will be limited to an attendance of 53 students. Admissions will be annual, and may consist of three classes of candidates, namely:—First class or scholarship candidates, second class or half-scholarship candidates, and third class or non-scholarship candidates. The first class will consist of fifteen pupil-teachers whose term of service has expired, and who, in passing the entrance examination, obtain the highest marks; the second class will consist of ten pupil-teachers whose term of service has expired, who obtain the highest marks next to those obtained by the first fifteen in passing the entrance examination, and who are prepared to pay half the cost of their maintenance while in training; and the third class will consist of pupil-teachers whose term of service has expired, of untrained teachers who have had charge of schools, and of persons entering the teaching profession for the first time, who have passed the entrance examination successfully, and are prepared to pay the whole cost of their maintenance while in training. All Training School students will be examined at the close of each year's work. At the end of the first year those showing the necessary qualifications will be allowed to remain a second year in training, while those who, although passing successfully, show lower qualifications, will be awarded a third class certificate of grade A, B, or C, and will, as opportunity offers, be appointed to positions in the service for which their awarded classification renders them eligible. At the end of the second year the three students passing most successfully will be allowed to remain in training for a third year's course, while all others passing successfully will be awarded a second class certificate with honours, or of grade A or B, and will, as opportunity offers, be appointed to positions for which their awarded classification renders them eligible. In all cases, however, the classification awarded will be provisional only, and will be confirmed at the end of three years from the date of examination, if the inspector's report on the teacher's school work be fully satisfactory.

After gaining admission to the Training Schools as first-class candidates, the students who desire it will be admitted to the matriculation examination of the Sydney University. All who pass such examination successfully will, after passing the first examination in the Training School, be eligible for admission to the undergraduates' first year's examination, and, if that examination and also the Training School examination of the second year be passed successfully, in due course

course to the undergraduates' second year's examination. The three students who prove most successful in passing the second year's examinations will be allowed to remain for a third year's course of training, and will be admitted to the undergraduates' third years' lectures at the University, and to the final examination for the B.A. degree. The course of study hitherto followed in the Training Schools includes the principal subjects of the University course, and under the new arrangements; the Training School course for the different years will, as far as necessary or desirable, be made to correspond with that of the University. When this is done the few students of the three years' course, who will be the most intelligent and advanced of all the students admitted, should have no special difficulty to contend with in passing for the B.A. degree.

Ex-pupil-teachers not deemed eligible for admission to the Training Schools, and other candidates for employment possessing sufficient elementary qualifications as teachers, may be employed when required as assistants or to take charge of small schools. These will be deemed eligible for examination for a certificate of Class III after two years' service and upon receipt of favourable reports, and for one of Class II after three years' further satisfactory service.

From the foregoing statements it will be seen that, under the new arrangements, ex-pupil-teachers entering the Training Schools will be afforded the opportunity of obtaining Class II in two years either free of cost altogether, or by paying half or the whole cost of their maintenance while in training; while, by successful study and school work, those who do not enter the Training Schools may obtain Class II in five years, during which time they will receive as emoluments for the first two years sufficient to maintain them, and for the last three years the salaries allotted to third-class teachers. That is, if we assume pupil-teachers to be in their nineteenth year when their term of apprenticeship expires, those admitted to the Training Schools will have an opportunity of obtaining Class II in their twenty-first year, while those not admitted will not be able to obtain such classification before they reach their twenty-fifth year; and thus, on the one hand, the advantages to be obtained by gaining admission to the Training Schools will encourage pupil-teachers to study, and to endeavour, to the utmost of their abilities and opportunities, to qualify themselves to pass high in the examinations; while, on the other hand, those unsuccessful in obtaining admission to the Training Schools will not be debarred from eventually gaining high classifications and positions, provided their abilities and application to work prove them to be qualified for such.

The advantages to be secured under the new arrangements adopted for the management of the training institutions may be summarized as follows:—

1. The annual increase of second-class teachers, already much too numerous, will be very considerably reduced.

2.

2. The reduced number of new second-class teachers annually available will have received double the amount of special training second-class teachers hitherto have had; and hence they will be more highly cultured, and capable of superior work.
3. A supply of efficiently-trained second-class teachers, and of superior first-class teachers, will be available to carry on the secondary education in Superior Schools and High Schools, of which there are already over fifty in existence.
4. The total annual cost to the State for Training School students' maintenance will be lessened.

Fort-street Training School for Male Students.—The premises used as a Training School are commodious, well lighted, and well ventilated, and liberally provided with the best educational appliances. The institution is properly organized.

The number of students in training was twenty-four, divided into fourteen seniors and ten juniors. The seniors completed their course in June, and the juniors in December. In view of great and important changes in the arrangements for the training of teachers no admissions were permitted during the second half-year.

The Principal reports that the conduct of the students has almost without exception been highly satisfactory, and that their diligence and attention to duty have been equally praiseworthy.

The work of the Practising School has been continued without interruption, and appears to be of a satisfactory kind.

Hurlstone Training School for Female Students.—During the year a permanent water supply has been provided for the use of the inmates, new lavatories have been constructed, and the grounds have undergone improvement. The buildings are very fairly suitable, and are well appointed. The organization of the institution is complete and satisfactory.

Fifty-one students were in session. One retired through ill-health; the rest completed their course of training. They were reported as attentive to instruction, diligent in study, and well conducted.

The monthly reports on the working of the institution, furnished by the Visiting Inspectors, were of a uniformly favourable character.

The Practising School is efficiently managed and doing useful work.

Pupil Teachers.—Pupil teachers are appointed to schools ranking above the seventh class, provided the teachers of such hold classifications not lower than II.B. As the growth of schools keeps pace with the growth of settlement and increase of population, the number of schools eligible for pupil teachers is yearly becoming larger. For the year covered by this Report the total number employed was 990 as against 930 during the preceding year. The number

number of young persons seeking employment in this way is greatly in excess of the requirements of the service. Having regard to this fact great care is exercised in making selections. Every candidate has to prove his physical fitness to undertake the duties of the position by passing a rigorous medical examination, and he has further to satisfy the Examining Board that his attainments and aptitude for teaching are up to standard requirements. Those who succeed in passing these tests are employed on probation for three months, when, provided they afford evidence of becoming efficient teachers, their appointments are confirmed. Their term of service extends over four years, but those who fail to pass any of the yearly examinations have necessarily to serve for a longer period. The assistance rendered by these young persons is of a valuable kind; their intelligence, zeal, and attention to duty are very generally recognized.

The arrangements for supplementing the instruction given to pupil teachers by their teachers has undergone some modifications. Latin has been added to the list of subjects for female pupil teachers, and French for males of the first and second classes. As heretofore, the classes are held at Fort-street and Castlereagh-street schools, and are attended by 381 pupil-teachers. Their conduct is on the whole good, and they are reported as making satisfactory progress in learning.

The number of teachers on the list in the last quarter of 1888 was 3,913, showing an increase of 72 on the number for the corresponding quarter of 1887; 2,123 classified teachers, 665 teachers unclassified—but certificated for small schools, 31 classified Training School students, 990 pupil-teachers, 77 work-mistresses, and 27 High School teachers. Of the whole number, 50·4 per cent. are males, and 49·6 per cent. females; and of the teachers in charge of schools or departments, 63·4 per cent. are males and 36·6 per cent. females.

The following table will exhibit full information respecting the several classes into which teachers are divided:—

Total teachers of all ranks																	1,961	1,925	3,886		

NOTE.—The High School teachers, numbering 27, are not included in the above table.

Exclusive of High School teachers, workmistresses, and pupil-teachers, the number is 2,819. Of these, 57 per cent. are males and 43 per cent. females; while 76·4 per cent. are classified, and 23·6 per cent. unclassified. The unclassified teachers have passed the usual examination and been certified, and nearly all of them are in charge of small country schools. The number of classified teachers shows a net increase of 92 for the year; and of the total number of such teachers, 5·9 per cent. are in Class I, 39·6 per cent. are in Class II, and 54·5 per cent. are in Class III. In 1887, the percentage in the three classes were, respectively, 5, 38·3, and 56·7; and in 1886 they were 3·2, 37·4 and 59·4.

The next table shows the number of classed schools, the number of classified teachers required, and the number of such teachers actually in the Service at the close of 1888.

Classed Schools or departments in operation in the last quarter of 1888.				Classified Teachers, &c., required by regulation for the classed schools in operation in the last quarter of 1888.			Classified Teachers and Students actually in the Service on 31st December, 1888.

278	278	VIII.	III. B.	268, III. B.													
689	689	IX.	III. C.	615, III. C.	188	615	140, III. C.	134, III. C.	1, III. C.	275, III. C.						
212	212	X.	III. C.	188, III. C.													
1778	1969	1861.	481	2,342	1,329	794	10	21	2,154						

As regards the information exhibited in the last table the following points may be noticed. At the close of 1888 the number of classified teachers in the service was 2,154, showing a net increase of 92 as compared with 128 in 1887, and 94 in 1886. The total number of classified teachers required to fill positions in classed schools was 2,342, namely, 256 of Class I, 813 of Class II, and 1,273 of Class III; while the numbers actually in the service, of the different classes, were 127 of Class I, 853 of Class II, and 1,174 of Class III.

Teachers' Examinations.—The Examining Staff is composed of three permanent officers, assisted by occasional teachers, and its work is chiefly confined to framing questions for examination and revising papers.

The

The following table furnishes the results of the several examinations in detail :—

Applicants for office of Teacher	2	2
For Class III. A., 1 passed			
" " III. C., 1 "			
	1,286	633	1,919

The total number of examinations, as compared with that for 1887, shows a decrease, but the papers are an improvement on those of previous years. The decline in the number of examinations may be attributed to the fact of a large proportion of old teachers having already gained the requisite classification, and to the changes recently introduced, which require that examinations shall be held yearly instead of half-yearly, and that a teacher shall possess the requisite degree of practical skill as a condition to being allowed to sit for examination.

The number of applicants for the office of pupil-teacher examined is not quite so large as that recorded for 1887, but the results of the examinations are, in point of efficiency, better.

In the case of pupil-teachers the per centage of passes is 82·5 as against 70·7 in 1887, the improvement being especially noticeable in first class pupil-teachers competing for admission to the Training Schools. A system of scholarships having recently been established in connection with those institutions, pupil-teachers have thereby been induced to study with increased diligence in order to obtain the benefits accruing from the change thus introduced. The per centage of passes in the case of pupil-teachers competing for training was 85·4, as against 72·9 in 1887.

Teachers'

The duties of Boards are clearly defined in clause 19 of the Public Instruction Act, and in regulations 104 to 113 inclusive; and were these faithfully carried out, markedly beneficial results must follow. Especially would this be the case if the members of Boards would "regularly visit, inspect, and report upon the schools under their supervision;" see that the teacher discharges his duties; protect him from vexatious and frivolous complaints; and "use every endeavour to induce parents to send their children to school regularly." If Boards would even, irrespective of the other matters specified in the regulations, perform these duties alone in a sympathetic spirit and in a kindly way, teachers and pupils would be encouraged in their work, parents roused up to a sense of their responsibilities, and, as a result, the efficiency and success of the schools would be ensured.

While indifference by Boards is manifested in so many instances, it is gladly recognised that several Boards are energetic in the performance of their duties, and, by intelligent and judicious supervision, exercise a very beneficial influence. These, however, are the exceptions. The sole object apparently, and the one idea of duty, in the case of a large number of the Boards is to have placed in their hands the control of the expenditure of public money. This, however, is neither expedient nor practicable. In countries where the cost of education is defrayed from rates specially imposed for the purpose, it is but right and just that Boards should be invested with the power to expend the money so raised. But in this Colony the amount expended annually upon education is paid out of the general revenue, and no such right exists.

It may be added that in a few instances, where on account of distance, it has been found impracticable for an inspector or other officer of the Department to supervise the erection of buildings and of additions and repairs, Boards have been entrusted with the work and have, in every case, performed the duty to the satisfaction of the Department.

VIII.--FINANCE.

The sum available in 1888 for expenditure under the Public Instruction Act was £601,994 17s., made up as follows:—

	£	s.	d.
Balance from 1887	5,295	0	7
Amount received from Treasury on account of Vote for 1887	24,960	19	9
Amount received from Treasury on account of Vote for 1888	571,738	16	8
	<u>601,994</u>	<u>17</u>	<u>0</u>

The total expenditure in the year was £600,603 10s. 11d., £84,568 10s. 9d. having been expended on school premises, and £516,035 0s. 2d. on the maintenance of schools, administration, &c. The balance at the close of the year was £1,391 6s. 1d.

GENERAL

GENERAL STATEMENT OF EXPENDITURE FOR 1888.

I. On School premises :—

	£	s.	d.
For sites, new buildings, additions, repairs, &c.	84,575	0	9

II. On Maintenance of Schools, &c. :—

	£	s.	d.
1. Teachers' salaries and allowances in Ordinary Schools	436,068	10	10
Other maintenance expenses in such schools ...	16,553	2	9
2. High School salaries, and maintenance expenses.	5,551	15	10
3. Administration expenses, including training Schools, and enforcement of school attendance	54,353	12	1
Refund to Treasury on account of 1886 and 1887.	3,501	8	8
	516,028 10 2		
	£600,603 10 11		

The amount of school fees collected and paid into the Consolidated Revenue was £69,553 14s. 4d.—namely, £65,227 1s. 9d. from ordinary day schools and £4,326 12s. 7d. from High Schools. Deducting this amount and the amount refunded to the Treasury from the total expenditure, there will remain £527,548 7s. 11d. as the net school expenditure derived from State funds, showing a decrease for the year of £33,538 11s. 5d. as compared with the like expenditure in 1887, of £63,608 0s. 5d. as compared with that of 1886, of £77,222 5s. 11d. as compared with that of 1885, and of £242,877 0s. 6d. as compared with that of 1883. These satisfactory reductions in the net State expenditure have been effected notwithstanding that there have been large annual increases in the numbers of both schools and pupils.

The total expenditure under the following heads in the last five years were :—

	1884. Expenditure.			Per- centage of total expen- diture.			1885. Expenditure.			Per- centage of total expen- diture.			1886. Expenditure.			Per- centage of total expen- diture.			1887. Totals	774,357	6	0	100	00	663,696	11	9	100	00	654,410	18	11	100	00	624,982	16	9	100	00	600,603	10	11	100	00							

The foregoing statement shows that, of the total year's expenditure of £597,102 2s. 3d., about 14 per cent. was spent on school premises, nearly 76 per cent. on the maintenance of ordinary schools, 9 per cent. on administration—including training and examination of teachers, and the enforcement of school attendance,—and nearly 1 per cent. on High Schools. In 1887 the corresponding per centages were, premises, 19 per cent.; maintenance of ordinary schools, $70\frac{1}{4}$ per cent.; administration, &c., $9\frac{3}{4}$ per cent., and High Schools, nearly 1 per cent.; while in 1886 they were—premises, $23\frac{1}{2}$ per cent.; maintenance of ordinary schools, 65 per cent.; administration, &c., $10\frac{1}{2}$ per cent., and High Schools, 1 per cent.

The following table exhibits the number of schools, the number of pupils, and the State expenditure for each of the eight years elapsed since the passing of the Public Instruction Act of 1880:—

Years.	Number of Schools.	Number of Pupils.	The State Expenditure				
			On School Premises.	On maintenance of Schools, including administration, &c.	Total.	Less School Fees.	Net State Expenditure.
			£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1881.....	1,667	146,106	102,903 11 2	371,253 14 5	474,157 5 7	46,347 5 4	427,810 0 3
1882.....	1,795	166,611	228,401 11 2	390,398 17 7	618,800 8 9	51,812 5 11	567,488 2 10

1884.....	1,912	167,184	304,383 9 7	469,973 16 5	774,357 6 0	56,766 13 1	717,590 12 11
1885.....	2,046	173,440	178,001 15 7	485,694 16 2	663,696 11 9	58,925 17 11	604,770 13 10
1886.....	2,170	179,990	155,072 0 7	499,338 13 4	654,410 18 11	63,164 10 7	591,246 8 4
1887.....	2,236	184,060	119,957 3 10	505,025 12 11	624,982 16 9	63,895 17 5	561,086 19 4
1888.....	2,271	186,692	84,575 0 9	512,527 1 6	597,102 2 3	69,553 14 4	527,548 7 11
Total 8 years' expenditure.....			1,564,294 15 3	3,665,065 11 0	5,229,360 6 3	461,393 12 5	4,767,966 13 10

It thus appears that the net State expenditure under the Public Instruction Act, for the eight years ending December, 1888, was £4,767,966 13s. 10d., or an average of £595,995 16s. 8d. per year; and that the expenditure in 1888 was less than in any other of the eight years, and even as much as £68,447 8s. 9d. less than the average yearly expenditure for the period. Of the total expenditure for the eight years, £1,564,294 15s. 3d., or nearly 30 per cent., was spent in providing school premises.

The next table will show the eight years' expenditure more in detail:—

V. RETIRING ALLOWANCES :								
1. To officers				3,234 0 0		298 9 4		
2. To Public School Teachers			8,514 15 10	3,036 15 10	866 19 0	93 19 2		
3. To Provisional School Teachers			396 7 1	96 5 0				
			8,911 2 11	6,367 0 10	866 19 0	392 8 6		
Total expenditure	474,157 5 7	618,800 8 9	821,852 16 3	774,357 6 0	663,696 11 9	654,410 18 11	624,982 16 9	597,102 2 3

The figures in the last table show that the total expenditure for the year was decreased by £27,880 14s. 6d. Teachers' salaries and travelling expenses show increases, but such increases were entirely due to corresponding increases in the number of schools, teachers, and pupils, these increases being respectively—schools, 35; teachers, 72; and pupils, 2,992.

The total average cost per child, and the average cost respectively for "School Premises," the "Maintenance of Schools," and administration, including inspection, the training and examining of teachers, and the enforcing of school attendance, are shown in the next tables.

1885	1 15 5 $\frac{1}{2}$	4 3 7	0 13 1 $\frac{1}{4}$	6 12 1 $\frac{1}{2}$
1886	1 9 4 $\frac{1}{2}$	4 1 6	0 13 1 $\frac{1}{2}$	6 4 0
1887	1 2 6 $\frac{1}{2}$	4 3 7 $\frac{1}{2}$	0 11 3 $\frac{1}{2}$	5 17 5 $\frac{1}{2}$
1888	0 15 1	4 1 7 $\frac{3}{4}$	0 9 8 $\frac{1}{2}$	5 6 5

In the last three tables the total year's expenditure is dealt with in calculating the average cost per child, but in the succeeding tables the amount of school fees paid into the Treasury has been deducted; and the average cost per child has been calculated on the reduced amount as being the actual average cost to the State.

Cost per child in average attendance at Board Schools, England						3 5 5 $\frac{1}{2}$

The State expenditure in the different Colonies, the last year for which reports are yet available, was—

	£	s.	d.
New South Wales... ..	527,548	7	11
Victoria	697,722	14	5
Queensland... ..	202,946	16	5
South Australia	97,502	10	0
Western Australia... ..	8,000	0	0

In this Colony the cost per child has steadily decreased since 1883. For 1888, the cost per child in average attendance showed a reduction of 11s. 0½d. as compared with the rate for 1887; of 17s. 7d. as compared with that for 1886; of £1 5s. 8½d. as compared with that for 1885; of £2 16s. 2½d. as compared with that for 1884; and £3 19s. 2¼d. as compared with that for 1883. It has also showed a reduction of £1 9s. 7¾d. as compared with the rate for 1882.

SUMMARY.

THE year's work may be summed up as follows:—114 new schools, or 117 departments, were opened; 2,271 schools, or 2,463 departments, were in operation during the whole or some part of the year, and 2,237 schools, or 2,428 departments, were in existence at its close. The school accommodation was equal to 181,357 places. The net increase of schools from 1881 to 1888, exclusive of Certified Denominational Schools closed in 1882, was 970. The school population (4 to 15 years) was 295,316, and the statutory school population (6 to 14 years), 212,774, showing an increase since 1881, the date of the last Census, of 65,456, or 44 per cent.

186,692 pupils, showing, as compared with the return for 1887, an increase of 2,992, attended State Schools. 151,594, or 81·2 per cent., were of the statutory school age, and 35,980, or 18·8 per cent., under or over that age. 185,329 pupils were enrolled in the ordinary day schools; the length of time pupils remained on the rolls shows satisfactory improvement, and 55·9 per cent. attended school 140 days or more in the year. The per centage of pupils in average attendance (69·7) was higher than in any previous year. The work relating to school attendance has been carried on with increased success, notwithstanding that the number of officers has been further reduced. 108 school sites were obtained. 121 school-houses, and additions to 34 existing buildings, were completed, affording room for 6,256 pupils. At the close of the year the total number of places provided in school accommodation exceeded the enrolment of pupils by 22,174, and the average attendance by 69,411. Other buildings and additions for the accommodation of 4,683 pupils were in course of erection. Twenty-six weathersheds and repairs to 730 school buildings, were also completed or in progress. The total outlay for the year on school premises was reduced 29½ per cent. Schools are well supplied with furniture, books, and apparatus of approved kinds. 2,450 schools or departments, out of a total of 2,463 in operation, were inspected, and 119,293 pupils examined. Satisfactory progress was indicated. Five High Schools, and 51 Superior schools were in operation. The

High Schools show improvement in all essentials, and have been worked at a cost to the State of £3 5s. per head of the number of pupils enrolled. The Superior Schools (increased by eight during the year) continue to do good work. Night-schools are still but moderately successful. The modification of the Kindergarten, referred to in previous reports, was carried out during the year with good results. The importance of technical education is still fully recognized in carrying on primary school-work.

134 school banks were brought into operation, and additional deposits, amounting to £8,368 1s. 2d., were received.

2,819 teachers and assistants, 990 pupil-teachers, and 77 work-mistresses, were employed, being an increase of 124. 75 students attended the Training Schools; of these 1 withdrew, and 74 completed their course and were examined for classification. Important changes, to take effect from January, 1889, have been made in the arrangements for the training of teachers—the chief being an extension of the training course to two and, in some cases, to three years. 681 teachers and 847 pupil-teachers were examined with a view to classification or promotion. 391 pupil-teacher applicants were also examined. The numbers successful were, respectively, 377 teachers, 699 pupil-teachers, and 210 pupil-teacher applicants. The salaries of classified teachers in charge of schools range from under £100 up to £400 per annum. £597,102 2s. 3d., or £27,880 14s. 6d. less than in 1887, was expended, and towards this amount £69,553 14s. 4d. was paid into the Treasury as school fees. The total expenditure was 11s. 0½d. less per pupil in average attendance than in 1887, and was also less than in any previous year. The State expenditure per pupil of the year's enrolment was £2 16s. 2¼d., and, exclusive of the sum spent on school premises, it was £2 7s. 5½d., being a decrease on all previous years. The cost per pupil is now lower in New South Wales than it is in the adjoining colonies of Victoria and Queensland.

Information respecting educational institutions connected with the Department, but not carried on under the provisions of the Public Instruction Act, is furnished in the following summaries:—

THE SYDNEY TECHNICAL COLLEGE, AND BRANCH TECHNICAL SCHOOLS.

The Board of Technical Education report an increased attendance of students at the various technical classes held during the year. 2,847 individual students attended the Sydney Technical College and branch Technical Schools, being an increase of 152 over the enrolment for 1887. It is thought that the scarcity of employment in the various trades prevented the increase from being greater. At the Sydney Technical College the individual students numbered 2,077, of whom 990 attended for one quarter only, 497 attended for two quarters, 286 for three quarters, and 304 for four quarters. The enrolments in each quarter were 835, 1,081, 1,133, and 1,007, making an average quarterly enrolment of 1,014. The average attendances were 621, 793·7, 749·3, and 698·4 in each quarter, or an average of 771·6 daily.

The

The suburban and country classes were attended by 770 individual students. The quarterly enrolments were respectively 537, 647, 720, and 709; and the average attendances were 254·6, 314·6, 343·9, and 385·6. The fees received from students and paid to the teachers of the different classes amounted to, Sydney Technical College, £1,869 8s.; suburban and country classes, £512 11s. Total, £2,381 19s.

The occupations of the students who attended the Sydney Technical College, were as follows:—Accountants, 6; architects, 34; artillerymen, 7; agents, 27; assayers, 2; baker, 1; blacksmiths, 11; booksellers, 7; bookbinder, 1; builders, 14; bricklayers, 25; box-maker, 1; bootmakers, 2; boilermakers, 18; brassfinishers, 2; brass-moulder, 1; carpenters and joiners, 128; chemists, 31; carters, 5; Civil servants, 10; clerks, 322; clergyman, 1; coachbuilders, 12; cement tester, 1; curators, 3; cabinetmakers, 4; decorators, 16; dentists, 8; drapers, 21; dressmakers, 33; draftsmen, 26; engineers, 126; engravers, 5; engine-drivers, 14; electricians, 6; farmers, 12; farriers, 3; feather-duster maker, 1; fitters, 29; french-polisher, 1; framemaker, 1; gardeners, 9; grocers, 9; ironmongers, 11; iron-moulders, 4; japanners, 2; jewellers, 9; labourers, 7; ladies, 362; lithographers, 8; masons, 31; mat-maker, 1; mariners, 7; messengers, 37; modellers, 8; nurses, 5; operators, 5; painters, 34; pattern-makers, 8; photographers, 6; plasterers, 16; plumbers, 34; printers, 22; policemen, 5; saddler, 1; scholars and students, 257; sign-writers, 14; shipwrights, 5; slater, 1; stationers, 6; storemen, 10; surgeon, 1; surveyors, 19; tailors, 37; teachers (male), 34; (female), 76; tinsmiths, 4; tobacco manufacturer, 1; typewriter, 1; warehousemen, 14; wood carvers, 3; wood turners, 2; and wool sorters, 3.

New classes were formed in the following subjects:—Technical College: Scientific dress-cutting, type-writing, and ladies' phonography. Newcastle: Mechanical drawing, metallurgy, and mathematics. Bathurst: Book-keeping. Parramatta: Model drawing. Glen Innes: Mineralogy; and Kogarah: Mechanical drawing. The following classes have been discontinued, namely:—Evening classes for primary subjects, which have been converted into an Evening Public School, and classes in Law, English History, English Literature, Greek, Italian, Singing, and Music.

The teachers' reports on the various classes are generally favourable. The usual annual examinations were held in December. One thousand examinees presented themselves, and the results were:—First year's students (838 entries), 74 obtained honors, 130 passed in first grade, and 394 in second grade; total percentage of passes 71·3. Second year's students (153 entries), 24 obtained honors, 35 passed in the first grade, 70 in second grade; total percentage of passes, 84·3. Third years' students (9 entries), 7 obtained honors, and 2 passed in first grade; percentage of passes, 100. The revision, in England, of the papers of students who attended the technological examinations showed that of 51 of the Board's students 34 passed, 2 obtaining first class honors, and 5 second class honors; 9 first class certificates in ordinary

ordinary grade, and 18 second class. At the South Kensington examinations the work of students obtained 14 prizes, namely, 9 in architectural drawing, 2 in design, 1 in mechanical drawing, and 2 in modelling.

The classes in mining, conducted at the Sydney Technical College, are reported by the Board to afford all the instruction required for a complete mining course, similar to that given at the Royal School of Mines, London. In addition, twenty-six lectures were given in country districts by the instructor in this subject. The classes in agriculture have been more largely attended than in any previous year, and the instructor speaks highly of the interest shown by the students. Thirty-eight lectures in country districts, and twenty-nine in the Technical Hall, were delivered by the instructor, in addition to conducting the classes. Analyses of grazing, farm, and garden soils have been made, and the information has been published in pamphlet form for the benefit of farmers and others.

The work of imparting manual training has obtained considerable development, especially in architecture, engineering, and art. The workshops in Kent-street contain a valuable plant for the above purpose, comprising machinery, science apparatus, statuary and models for the school of design, &c. Plaster models for drawing from the round have been sold to private teachers at cost price, and supplied to the Department of Public Instruction for use in schools.

A collection of the work of students was shown in a separate court at the Melbourne Centennial International Exhibition, and received a special prize and special mention.

181 popular science lectures were delivered in Sydney, attended by 43,308 persons, or an average of 239 per lecture. The teaching staff under the Board consisted of 67 persons, and the number of examiners engaged was 41. The Board held 35 meetings, with an average attendance of 5 members, 16 meetings of the Organizing Committee, and 12 meetings of the Finance Committee.

The Treasury advances to the Board, from the Parliamentary vote, amounted to £16,997 3s. 2d. The whole of this has been expended as follows:—Allowances to instructors and teachers, £7,354 10s. 9d. (exclusive of £2,381 19s., paid to them as fees for students); administration, salaries, £2,783 13s. 8d.; Sunday duty, £60 10s.; petty-cash, £92 18s. 11d.; rent, £3,336 1s. 2d.; apparatus, £651 11s. 6d.; printing, £193 4s. 6d.; advertising, £421 17s. 5d.; library, £37 18s. 7d.; fittings, £414 1s. 10d.; lectures, £529 17s. 3d.; prizes, £158 16s. 8d.; lighting, £390 5s.; stationery, £36 19s. 9d.; general expenses, £534 16s. 2d.

THE SYDNEY GRAMMAR SCHOOL.

The total number of pupils enrolled at this school during 1888 was 514, of whom 183 were under 14 years of age, and 331 over that age. The mean quarterly enrolment was 426, and the average daily attendance 405. 165 new pupils were admitted: 86 of these were under 14 years, and 79 were over that age. The University examinations were attended by 64 scholars, of whom 51 were successful as follows:—Junior Public (37 candidates), 30 passed; Senior Public (9 candidates), 7 passed; Matriculation (18 candidates), 14 passed. The total income for 1888 amounted to £10,594 7s. 9d., being as follows:—Balance from 1887, £1,261 5s. 9d.; State grants, £3,233 5s. 10d.; school fees and other sources, £6,099 16s. 2d. The total expenditure for the year was £9,794 0s. 11d. Compared with 1887 the enrolment has increased by 64, and the average attendance by 4; while the number of new pupils admitted was less by 18. The number of successful pupils at the University examinations has decreased by 11. Of the new pupils, 52 per cent. were under 14 years of age, as compared with 54 per cent. in 1887, and 60 per cent. in 1886. Calculated on the total expenditure the cost per pupil in average attendance was £24 3s. 7d., and the expense to the State was £7 19s. 8d. per head. For the previous year the figures were £26 3s. 4d., and £5 19s. 8d. respectively.

THE FREE PUBLIC LIBRARY.

The total number of volumes in the Library at the end of the year was 82,343, being an increase of 6,381 over the number for 1887. The number of visitors to the Reading Room was 84,922, and the number of visits to the Lending Branch by persons borrowing books was 64,503. The total number of visits was therefore 149,425. The persons employed in the Institution numbered 22, being the same as for last year. The expenditure was as given below:—

	£	s.	d.
On buildings, repairs, &c. (from Public Works votes) ...	7,576	14	9
„ Books	2,086	2	2
„ Salaries and maintenance ...	4,856	7	0
Total	£14,519	3	11

THE AUSTRALIAN MUSEUM.

The number of visitors to this Museum in 1888 was 128,365, being on week-days 89,028, and on Sundays 39,337. The number of employés was 22, the same as for 1887. The expenditure was as under:—

	£	s.	d.
For Maintenance	739	5	6
„ Specimens, &c.	1,228	5	4
„ Books	463	9	11
„ Salaries	4,273	11	8
Total	£6,704	12	5

THE

THE TECHNOLOGICAL MUSEUM.

38,614 visits were paid to the Institution during the year. 11 persons were employed therein, 7 being permanent and 4 temporary. The expenditure amounted to £3,874 16s. 6d., as follows:—

	£	s.	d.
For Maintenance	1,541	10	8
„ Specimens, models, &c. ...	1,296	18	1
„ Salaries	1,036	7	9
Total	*£3,874	16	6

* (Including £474 16s. 6d., incurred in 1887.)

THE NATIONAL ART GALLERY.

This Institution was visited on week-days by 112,092 persons, and on Sundays by 82,958; making a total of 195,050 visits. This shows an increase of 17,708 on the visits in 1887. 5 persons were employed on the permanent staff. The total expenditure is shown below:—

	£	s.	d.
For Buildings	Nil.		
„ Works of art, &c.	4,060	6	9
„ Maintenance	186	16	1
„ Salaries	924	6	0
Total	£5,171	8	10

NEW SOUTH WALES INSTITUTION FOR THE DEAF AND DUMB AND THE BLIND.

The number of inmates in 1888 was 86, being 54 under 14 years of age and 32 over it. This is one inmate less than for 1887. The new admissions during the year were 14, 11 being under and 3 over the age of 14 years. The number discharged was 13, of whom 5 were under and 8 over the age already stated. The income of the Institution was, from State Grant, £450; from all other sources, £7,335 8s. 9d.; total income being £7,785 8s. 9d. The expenditure for the year was as follows:—

	£	s.	d.
For buildings	1,289	5	0
For maintenance, &c.	2,312	19	8
For salaries... ..	1,810	4	8
	£5,412	9	4

THE INDUSTRIAL SCHOOL FOR GIRLS, PARRAMATTA.

The number of girls enrolled at this Institution for the year was 145, showing a decrease of 16 on the previous year's number. Of these inmates 42 were below the age of 14 and 103 were over it. There were 55 new admissions, of whom 22 had not reached 14 years, while 33 were beyond that age. Those discharged for apprenticeship, &c., numbered 52, 11 being under 14 and 41 over it. The total expense of the Institution was rather less than for 1887, being £2,667 11s. 8d. as against £2,900 16s. 6d. for the year named.

The

The Superintendent reports as follows :—

The working of the Institution during the year has been satisfactory, and good progress in the domestic departments has been made by the inmates, who gained several medals and certificates for needle and domestic work at the late Exhibition of Women's Industries. I have had good accounts of almost all the apprentices at service, who now number 76. There is still a great demand for the services of these girls—several families have had a succession of them, as many as four and five having served their term in one house. This shows that the conduct of the girls at service depends materially upon the character of the employers to whom they are bound. Upon regaining their freedom and returning to their parents I grieve to say that many of these unfortunate girls are again led astray by the bad example and influence of their relatives. Notwithstanding these failures I believe the greater number turn out well. Many marry, and all have a good knowledge of domestic work and enough schooling for ordinary purposes. The health and conduct of the girls have been good. Only one died. This was a half-caste girl, who died of rapid consumption. The daily average for the year was 94. The cost per head was £28 6s. 6d. The contributions from parents were much below the average, being only £7 10s.

THE NAUTICAL SCHOOL-SHIP "VERNON."

The total number of boys enrolled in 1888 was 404, of whom 199 were under 14 years of age, and 205 exceeded that age. The new admissions numbered 201, 89 being under and 112 over 14 years. The number discharged for apprenticeship was 195, of whom 76 were under and 119 were over the age stated. The total cost of the Institution for the year was £5,500.

The Superintendent reports as follows :—

The institution has worked well during the year, although it has been overcrowded during most of the time. Sickness has been entirely confined to new comers, some of whom were sent on board in an advanced state of disease, and required hospital treatment. No deaths occurred. In addition to the boys on the ship, nearly 500 apprentices were under my charge, and over 90 per cent. of these received good characters. The ship now enters upon its fiftieth year, and is in a very bad condition; she gets worse as time goes on. The admissions were more numerous than in any former year.

J. H. CARRUTHERS,

Minister of Public Instruction.

Department of Public Instruction,

Sydney, 18th April, 1889.

DEPARTMENT OF PUBLIC INSTRUCTION

APPENDICES TO THE MINISTER'S REPORT FOR 1888.

APPENDIX I	—Applications for the establishment of Public Schools, received during the year 1888	50

APPENDIX XII.

APPENDIX XII.

THE CHIEF INSPECTOR'S REPORT, WITH ITS ANNEXES.

In 1887 there were in operation 2,230 schools. Of these 78 closed during that year, leaving 2,152 with which to begin the year 1888. During 1888, 114 new schools were opened, making a total for the year of 2,266. The number of schools of each kind is shown in the following table:—

Year	Public.	Provisional.	Half-time.	House-to-house.	Evening.	Total
1885	1,532	294	150	50	12	2,038
1886	1,585	323	176	58	20	2,162
1887	1,612	335	191	69	23	2,230
1888	1,635	316	224	79	12	2,266

Arranged according to classes, they stand:—

	Class I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Small Unclassified	Total.
1885	23	26	18	35	91	196	161	285	583	191	429	2,038
1886	25	29	15	47	92	177	177	279	584	228	509	2,162
1887	26	30	18	51	95	178	184	307	534	239	518	2,230
1888	26	33	20	47	101	190	183	281	694	222	469	2,266

A few of the new schools were put up in the suburbs of Sydney, but the greater number were opened in thinly peopled places in the interior. Parents living too far from existing schools to be able to send their children to them, invariably apply for a school as soon as they can muster the minimum number of scholars requisite for its establishment. No pressure is needed to induce parents to guarantee support to new schools. The more isolated the place, the more difficult it is, except through the agency of the State, to provide education for children. Small schools in outlying districts with an average attendance ranging from 20 down to 10 are relatively more expensive to maintain than the larger schools. When it is considered, however, that there are more than 800 of these small schools supplying education to groups of families scattered all over the Colony who without them must in most cases go without education, the disproportionate cost seems a matter of insignificance.

The largest enrolment in any quarter of 1888 was 163,443. There was sitting accommodation in the schools at the end of the year for 176,992. In the aggregate, therefore, there is more than sufficient space for all comers. The following table shows the accommodation in each district:—

Districts.	Number of places provided at end of 1887.	Number of new places provided during 1888.	Number of places lost by closing schools and by giving up old buildings.	Increase or decrease in number of places.	Number of places provided at end of 1888.
Armidale	13,979	1,441	717	724, Increase.	14,703
Bathurst	15,260	738	275	463 "	15,723
Goulburn	17,226	624	221	403 "	17,629
Grafton	12,746	505	101	404 "	13,150
Maitland	22,189	903	170	733 "	22,922
Metropolitan	41,521	41,521
Sub-Metropolitan ...	22,449	1,475	340	1,135 "	23,584
Wagga Wagga	17,231	636	488	148 "	17,379
Wellington	10,247	204	70	134 "	10,381
Total.....	172,848	6,526	2,382	4,144 "	176,992

During the year, 121 new schools, 28 residences, and 21 weather-sheds were built, 23 existing schools were enlarged, and 405 repaired. As in previous years, the architect attended to the larger works and the local inspectors to the smaller. It is a great gain to the Department both in time and money to have small repairs made and small buildings put up promptly and cheaply by local officers. The work done by the inspectors in this way in 1888, consisted of:—

	£	s.	d.
107 new schools	}	to seat 2,642 pupils; total cost	5,998
17 additions to schools			5
7 new residences			764
14 weather-sheds			218
371 buildings repaired	5,442	11	0

The inspectors report that the schools, as a whole, are suitable, amply supplied with desks, forms, and materials, and kept in a fair state of repair. As only a limited amount of money is voted annually for school buildings, care is taken to spend it only on works that are certified by the inspectors to be absolutely necessary.

The gross enrolment of pupils in 1888 was 211,119. Deducting 12 per cent. for multiple enrolments, the number of individual pupils entered during the year was 185,785. The following table gives the enrolment and the average attendance for each quarter:—

Quarter.	Enrolment in 1887.	Enrolment in 1888.	Increase for 1888.	Average daily attendance for 1887.	Average daily attendance for 1888.	Increase in average attendance for 1888.	Percentage of increase of enrolment.	Percentage of increase of average attendance.
March	157,338	161,821	4,483	102,946·2	110,412·5	7,466·3	2·8	7·2
June	155,728	159,229	3,501	103,638·1	113,669·5	10,031·4	2·2	9·6
September	158,458	163,443	4,985	108,754·2	112,892·7	4,138·5	3·1	3·8
December..	157,525	159,183	1,658	110,292·0	111,906·8	1,614·8	1·05	1·4
Average ...	157,262	160,919	3,656	106,407·6	112,220·3	5,812·7	2·2	5·5

The percentage of attendance for each quarter was :—

Quarter.	Enrolment.	Average attendance.	
		Number.	Percentage.
March	161,821	110,412·5	68·2
June	159,229	113,669·5	71·3
September.....	163,443	112,892·7	69·07
December	159,183	111,906·8	70·3
Year's average	160,919	112,220·3	69·7

Compared with 1887, these figures show an increase of 1,725 individual pupils, of 3,657 on the average quarterly enrolment and of 5,873 on the average daily attendance. In the latter half of the year, sickness and drought greatly interfered with regularity; but notwithstanding this, the average attendance (69·7), as compared with the enrolment, was higher in 1888 than it was in any previous year since the passing of the Public Instruction Act. This satisfactory result may, in some measure, be fairly ascribed to the work of teachers in carrying out the provisions of the compulsory clauses of the Act. A timely notice from a teacher, that a child on account of irregularity is not likely to make his 70 days' attendance, wakes up many a parent who is only careless or over-indulgent to the necessity of securing himself against possible trouble. For the six months ending June, 1888, there was an average enrolment of 160,525; of this number, 8,946 or 5½ per cent. were defaulters in terms of the Act. No satisfactory reason could be given for their failure to attend 70 days in the half-year; and consequently, the parents of 1,357 were prosecuted, and the parents of 7,589 received the formal caution, which is always given before resorting to prosecution. For the half-year ending December, the average enrolment was 161,313, and the defaulters numbered 5,115 or 3·2 per cent. Of these the parents of 1,211 were recommended for prosecution, and the parents of 3,904 were cautioned.

The first, second, and third-class schools have usually three departments, one each for boys, girls, and infants; fourth-class schools have generally two departments, one for infants and one (mixed) for boys and girls above 7 or 8 years of age. So far as the internal management is concerned, departments are independent of each other, and for the purposes of inspection are treated as separate schools. The number of schools or departments open in 1888 was 2,461. With the exception of 16 small schools that were closed when the inspectors were in their neighbourhoods, all the schools were fully examined and reported on: 1,071 were inspected a second time, and incidental visits for various reasons were made to a great number. In no year have so many inspections been held, or so many pupils examined. There was, however, no increase in the staff of inspectors. The demands on these gentlemen's time and endurance have now become so great that it will be necessary even in the interests of schools and of the department to increase their number. The details of inspection during the last four years stand thus :—

Year.	No. of Schools.	No. of Schools inspected.	No. of Schools inspected twice.	Total number of inspections.	No. of Schools not inspected.	No. of pupils examined.	No. of Inspectors.
1885	2,202	2,167	919	3,086	35	105,815	32
1886	2,337	2,301	1,003	3,304	36	112,073	32
1887	2,418	2,387	970	3,357	31	113,798	32
1888	2,461	2,445	1,071	3,516	16	118,710	32

The following table shows the distribution of schools, and the number inspected in each district:—

District.	No. of Inspectors.	No. of Schools.	No. of Schools inspected.	No. of Schools inspected twice.	Total No. of inspections.	No. of Schools not inspected.	No. of pupils examined.
Armidale	3	267	267	40	307	...	9,103
Bathurst	3	266	264	65	329	2	9,572
Goulburn	4	370	367	102	469	3	10,471

The above table may be thus summarized :—

Class of School,	Above Standard.	Up to Standard.	Below Standard.	Total.	Percentage up to Standard in 1888.	Percentage up to Standard in 1887.
Public	1,276	271	277	1,824	85	84
Provisional	147	56	110	313	65	65
Half-time	108	53	61	222	72	74
House-to-house	38	14	26	78	67	75
Evening!	5	2	1	8	87	79
Totals	1,574	396	475	2,445	80	80

The number of pupils examined was 118,710, an increase of 4,912 on the previous year.

In reading, 118,710 were tested, 100,860, or 86 per cent., of whom satisfied the inspectors. In some schools, especially in the best girls' departments, the reading is excellent, and in the majority of schools, it is a subject that receives from the teachers a great amount of time and care. In schools where reading is badly taught, it is usually found that an attempt is made to push pupils through the prescribed books too fast. This is done either by rushing over large portions superficially, or by omitting them altogether. The standard of proficiency in this Colony is probably the highest in the world, and an average child needs all the allotted time to enable him to meet its demands. Yet in order

order to keep the upper classes well filled, some teachers crowd the work of three half-years into two in their second classes, and of two half-years into one in their third. This can only be done by sacrificing thoroughness and accuracy. In reading, the evil shows itself in the upper classes in bad spelling, and general slovenliness in regard to speed, articulation, and expression.

In writing, 118,137 were examined, and 103,938 or 88 per cent. satisfied the inspectors. The great majority of teachers appear to be satisfied with obtaining for their pupils a bare pass in this subject. In some schools, no care is taken to preserve uniformity of character in copies, and even a serious attempt to imitate them is not insisted on. A few schools could be mentioned where the writing from the lowest to the highest class is admirable, the whole secret being that the teachers adopt a uniform style of copy, carefully supervise the children, and never overlook carelessness in regard to imitation of head-lines.

In arithmetic 115,239 were examined, and 81,245 or 75 per cent. satisfied the inspectors. In 1887, the percentage was 68. This subject is much better taught than the percentage of passes would lead one to think. As in reading, teachers suffer in their results by making their second and third classes attempt to cover the prescribed quantity of arithmetic in less than the prescribed time. As there are several other subjects to be studied, it takes an ordinary child fully three half-years to become thorough in the arithmetic put down for a second-class, and, fully two half years that set for a third. Skipping a half year in each class tells against the teachers results, and is injurious intellectually to the children. If full time were taken for arithmetic in the lower classes, and greater attention given to mental work, the upper classes in schools would be much stronger than they are in this subject.

In the remaining subjects good work was done, the percentage of passes in some being slightly above, and in others slightly below that of the preceding year. The following table shows the number of pupils examined in each subject and the number of passes.—

Subjects	Estimated Proficiency.

Needlework	37,787	34,113	90
Drill	99,395	84,077	84

All the inspectors report favourably of the discipline kept up in schools. Teachers differ as greatly in capacity for government as they do in force of character, and the same ends are, therefore, not always obtained by similar means. All aim, however, at securing personal cleanliness, respectful conduct, orderly habits, truthfulness, and becoming language, together with the class virtues of silence, attention, industry, and obedience. Drill continues to be taught with reasonable success, and as the students, both male and female, who have of late years left the Training School, all received very careful training in this subject, the schools throughout the Colony may be expected to gradually show improvement in it also.

The number of teachers in the Service at the end of the year was 3,864, an increase of 50 on 1887. The teachers as a body are good citizens, faithful workers in their schools, and very anxious about the progress of their pupils. Occasionally one is dismissed for misconduct, disgraced for idleness or inefficiency, or otherwise punished; but the number requiring to be thus dealt with is so small that the inspectors are always unanimous in testifying to the general respectability and trustworthiness of their

their teaching staffs. The pupil-teachers, numbering nearly 1,000, have, as usual, given satisfaction both to their teachers and to the Department. It is very seldom that a complaint is made respecting any of them. The following table shows the number of teachers in each class :—

	I A.		I B.		II A.		II B.		III A.		III B.		III C.		Examined and Certified for Small Schools.		Totals.		Grand Total.

NOTE.—The High School-teachers, numbering 27, are not included in the above table.

Except that there were no admissions in July, no change was made in the working of the two Training Schools. Fort-street had an enrolment of 24 and Hurlstone of 50 during the first half of the year, and of 10 and 21 respectively during the second half; 14 male and 29 female students were examined, classified, and placed out in schools at the end of June, and the remainder at the end of December. The officers of both Training Schools performed their duties with zeal and ability, and the conduct and work of the students gave satisfaction. From the 1st January, 1889, the course of study in the non-professional subjects will be so modified as to make it coincide with the University course for the B.A. degree. The term of training will be extended to two and, in some cases, to three years, instead of being restricted to one year as hitherto; and a limitation by competition will be placed on the numbers admitted. The new regulations bearing on these changes will be found elsewhere.

The High Schools continue to do the work expected of them, but, except in Sydney, the attendance is small. In a separate report full information respecting them is given.

In summing up, I may remark that the schools maintain their reputation for proficiency, that the discipline and general management are good, that schools increase in number as fast as the population needs them, and that, throughout the year, teachers and officers of all ranks have, with few exceptions, done their best to make the schools a success.

15th February, 1889.

J. C. MAYNARD,
Chief Inspector.

ANNEX A.

DISTRICT INSPECTOR JOHN M'CREIDIE'S REPORT.

At the beginning of the year there were 181 schools or departments in operation in the Metropolitan District, and during the year two new departments and one Evening School were added, thus making in all 184 schools or departments opened during the whole or a portion of 1888. The Croydon Evening School having been carried on for only a short period, 183 schools remained on the list at the close of the year. These consisted of 177 Public Schools or departments and six Evening Schools. Various repairs or improvements were made in connection with many schools, but no increase took place in the accommodation provided for the pupils in 1887. The buildings necessary for the new departments had been erected in 1887 in anticipation of their establishment in 1888. Two new infant rooms for the Fort-street Superior Public School were nearly ready for occupation at the end of the year; and steps had been taken for the erection of two school-rooms for the Paddington Superior Public School, and for the carrying out of extensive repairs and improvements to the old buildings. A residence was provided at Drummoyne, a new one was erected at Burwood, and it was decided to build another at Ashfield. The following schools may be mentioned as having received repairs or improvements of a more or less important character, viz. :—Ashfield, Balmain, Banks' Meadow, Bondi, Camdensville, Camperdown, Darling Road, Double Bay, Drummoyne, Five Dock, Fort-street, Kegworth, Leichhardt, Leichhardt West, Manly, Naremburn, Newtown North, Nicholson-street, Paddington, Randwick, Redfern, Smith-street, St. Leonards, St. Leonards North, Surry Hills South, Blackfriars, Burwood, Darlington, Dulwich Hill, Forest Lodge, Glebe, Marrickville West, and North Sydney. The erection of a residence at Neutral Bay was also in progress at the close of the year.

The material condition and organization of the schools are, as a whole, good. The schools are generally well furnished, and possess a suitable supply of apparatus, books, and other necessary working appliances.

The average quarterly enrolment for the year was 44,151, and the highest enrolment for any quarter was 44,968, for September, while the average attendance for the year was 30,261, and the greatest average for a quarter was 30,743, for the September quarter. For the accommodation of these pupils the buildings supply 332,169 square feet of floor space, which, at the usual allowance of 8 square feet for each child, furnishes places for 41,521 scholars. There is thus ample provision in the aggregate for the attendance of pupils in the district. In a good many cases the present educational wants are more than met, but in a few others there is need for further provision in view of the increasing population. Among the latter may be specified Newtown, and the locality lying between Waverley and Woollahra. The following table shows the enrolment, average, and percentage attendance in proportion to enrolment of each quarter during 1887 and 1888 :—

Quarters.	Enrolments.		Averages.		Percentage of Attendance.	
	1887.	1888.	1887.	1888.	1887.	1888.
March	43,164	44,517	28,611·5	29,568·3	66·3	65·9
June	42,068	43,624	27,647·5	30,404·4	66·0	69·7
September	43,982	44,968	30,140·9	30,743·4	68·5	68·3
December	43,718	43,495	29,785·5	30,529·8	68·1	70·2
Average of enrolments, &c.	43,233	44,151	29,046·3	30,261·5	67·2	68·5

From this table it appears that the percentage of attendance has risen by 2·3, and that the highest quarterly average (70·2) was for the December quarter. The latter is the highest average that has been reached for years.

The same staff employed in 1887 carried on the work of inspection in 1888. All schools but one underwent regular or general inspection. The one left out was a small evening school, which was opened during the year, and collapsed before inspection took place. Ordinary inspections of 128 schools and many incidental inspections, were also made in addition to those of the regular or general kind. But for the withdrawal of one of the staff for the inspection of the High Schools, and the employment of the whole staff in examining school exhibits for the Melbourne Exhibition, all schools would probably have undergone inspection twice. Altogether 31,407 children were examined during the year. Of the schools examined 24 are of superior rank, and 55 schools or departments have fifth classes. It is scarcely necessary to remark that by the increase in the number of schools with fifth classes the work of inspection becomes more laborious and requires more time. The subjoined table exhibits the condition of the schools in relation to the standard, 50 per cent. of possible marks being estimated "up to," and 60 or more "above the standard" :—

Proficiency of Schools in relation to the Standard.

	Below Standard.	Up to Standard.	Above Standard.	Totals.
Number of Schools	17	69	97	183

The schools are distributed into their various classes as under :—

Class.	I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Evening.	Schools.	Departments.
	18	18	9	11	8	13	...	2	1	1	7	88	148

The next table gives the total number of children examined in each subject with their estimated proficiency, and the percentages of those who reached or passed the standard. Those entered as "above standard" obtained not less than 60 per cent. of possible marks in the subject opposite which the numbers appear under the heading :—

ESTIMATED proficiency of the pupils in all Schools.

Subjects.	Estimated Proficiency.				
	Above Standard.	Up to Standard (50 p.c. of possible marks).	Below Standard.	Total Examined.	Percentage up to or above Standard.

Latin	257	260	206	723	71·5
Natural science	666	471	261	1,398	81·4
Trigonometry	25	16	32	73	56·1
Needlework	4,613	2,653	1,325	8,591	84·5
Drill	18,300	8,990	3,823	31,113	87·7

Comparing the results in this table with those given in last year's report, it will be seen that the percentages in grammar, scripture, and music have decreased, and those of English history, object lessons, mensuration, needlework, and drill have increased by a fraction. Arithmetic, with an increase of 2.2 per cent., and Australian history, with 5.1 per cent., are the only subjects that have made decided advance; the others, ranging from 1 per cent. in reading, writing, and geography to 23.9 in trigonometry, have all lower percentages than those of 1887. This falling-off in proficiency may be attributed, in some degree, to Centennial celebrations in the early part of the year, and again, later on, to the time devoted to the preparation of articles for exhibitions in Melbourne and Sydney. Time was not only lost from these causes, but the minds of the pupils were distracted from their usual work, and the progress made was not likely to be so rapid or the proficiency so thorough as in ordinary circumstances. Schools inspected, therefore, about the time of, or soon after, the occasions referred to, would not reach such high proficiency as in previous years, when no such disturbing causes presented themselves. In arithmetic the highest proficiency was shown in simple rules, 13,926 out of 18,932 pupils examined having reached "up to" or "above" standard. In higher rules 4,024 out of 6,769 reached or exceeded the standard. The proficiency in this and other subjects is injuriously affected in some schools by too rapid promotions. Care should be taken that pupils are well grounded in the lower-class work before being moved to the higher. Injudicious promotions of this kind prevent progress in accordance with the standard, and cause worry and unnecessary trouble to both teacher and pupil. Although the results for 1888 are, on the whole, not so high as those for 1887, it is not to be understood that they are not reasonably satisfactory. The average proficiency in all subjects taught during the year stands at about 75 per cent., or very fair to good, while in the essential subjects for Primary Schools—reading, writing, and arithmetic—the percentage stands at 78, or nearly good. This result, considering the severity of the tests required by the standard, is satisfactory.

The discipline of the schools continues to be satisfactory. The government is, generally speaking, mild, but vigilant and firm. Talking is suppressed, attention to work is insisted upon, and prompt obedience to orders is secured, without fuss or noise, in all the best conducted schools. Occasionally a noisy school is met with, and the result is seen in the comparatively low proficiency. This is, however, the exception. Taken as a whole, the pupils are trained to orderly habits by the prevalent discipline, and to self-reliance and earnest application to duty.

The following table shows the numbers and classifications of teachers employed in the Metropolitan District:—

TABLE of Classification of Teachers.

	A.		I B.		II A.		II B.		III A.		III B.		II C.		Special Teachers, or exempted by age.		Totals.		Grand Total.
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.

Work-mistresses	42	42
Grand Total of Teachers																	105	305	410
																	852

As a body, the teachers are earnest, faithful, and diligent in the discharge of their duties, and deserve commendation.

Of the five School Attendance Officers employed in 1887, one was removed to take charge of a school. There are now, therefore, only four engaged in this work in Sydney and suburbs. These officers have performed their duties amid many difficulties and discouragements, with tact, intelligence, and zeal.

In conclusion, I have to remark that the general material condition of the schools is satisfactory, that the accommodation, except in some exceptional cases, is adequate; that the discipline is of a high order; and that the general proficiency in all subjects for the year is very fair to good.

J. M'CREIDIE,
District Inspector.

Ashfield, 11th January, 1889.

ANNEX B.

INSPECTOR THOMPSON'S REPORT.

DURING the year, I had under my immediate supervision, 29 schools, viz.—26 Public Schools, comprising 59 departments, and 3 Evening Public Schools. Of the Evening Schools, one at Croydon was only temporarily in operation.

The classification of these schools is as follows:—

Class I.	Class II.	Class III.	Class IV.	Class V.	Class VI.	Class VII.	Class VIII.	Class IX.	Class X.	Evening.	Schools	Departments.
7	6	3	4	2	2	2	3	29	62

Accommodation.

The provision made may, generally speaking, be regarded as adequate to the requirements of the several localities, with the exception of that section which lies between Woollahra and Waverley. Here, in all probability, further provision will be necessary in the course of next year, as the Public Schools of Waverley and Woollahra will be unable to furnish accommodation adequate to the rapidly increasing population in the section referred to.

The necessity for additional accommodation at Enmore was met at the beginning of the year.

As regards material organization, the accommodation provided may be considered as adequate to the requirements. The schools are commodious, in good repair, and well provided with working material.

The

The total enrolments on average attendance and percentages of attendance for each quarter are set forth in the following table :—

Quarter.	Total Enrolment.	Average Attendance.	Percentage.
March	15,663	10,292·2	65·7
June	15,329	10,642·2	69·4
September	15,851	10,709·1	67·0
December	15,336	10,742·4	70·0

The highest enrolment, therefore, was in the September quarter, the highest average attendance in the December quarter, and the highest percentage in the December quarter.

Inspection.

Croydon Evening Public School was in operation during a comparatively short period, and was closed somewhat abruptly, consequently this school was not inspected under any form of inspection; otherwise, all schools received regular or general inspection; twenty-three schools received ordinary inspection, and twenty-seven incidental visits were paid.

The Committee meetings necessary for adjudicating relative to school exhibits for the Melbourne Exhibition, prevented my making as many ordinary inspections on the reassembling of the schools at the end of the mid-winter vacation, as I otherwise might have found opportunity for.

Hereunder is shown the proficiency of the schools in relation to standard of 50 per cent. possible marks, as ascertained by regular or general inspection :—

	Below Standard.	Up to Standard.	Above Standard.	Total.
Public Schools or departments in operation a full year.	4	24	29	57
Not in operation a full year	2	2
Evening Public Schools in operation a full year	1	..	1	2
	5	24	32	61

Upon the computation of 50 per cent. of possible marks, a table showing the proficiency of the pupils in the various subjects of examination is subjoined :—

Subjects.	Number of Pupils examined	Percentage of marks up to or above Standard.	Subjects.	Number of Pupils examined.	Percentage of marks up to or above Standard.
Reading	10,866	80·0	Music.....	10,866	80·0
Writing	10,866	79·0	French	235	70·0
Arithmetic	10,866	59·0	Euclid	813	58·6
Grammar	4,056	74·4	Algebra	353	66·8
Geography	4,325	72·3	Mensuration	1,765	52·0
History—England	2,963	66·0	Latin	333	63·0
Australia	1,088	75·7	Natural Science	567	76·7
Scripture	10,866	69·2	Needlework	3,023	79·9
Object lessons	10,324	66·1	Drill	10,866	80·0
Drawing	2,963	65·2			

The table above shows that the proficiency in the several subjects is above the standard required. As a whole the percentages are slightly below those of last year, which may be accounted for by several inspections having taken place on inauspicious days. Improvement is, however, shown in grammar, geography, French, and natural science. The reading needs more careful individual working, and its want of evenness is frequently very marked. In the upper classes the fluency requisite is pretty generally acquired, but intelligent expression and emphasis are not sufficiently general.

The arithmetic still exhibits some weakness, and mensuration has the lowest percentage of all subjects.

The general proficiency, however, may be regarded as satisfactory, and the government is generally effective and judiciously administered.

The staff and classification of teachers and pupil-teachers is hereunder summarized :—

	I A.		I B.		II A.		II B.		III A.		III B.		III C.		Special or exempted by Age		Totals		Grand Total.
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	
Principal Teachers (Male)	6	..	5	..	11	..	2	..	1	25	1	26
(Female)	1	
Mistresses of Departments	..	4	..	8	..	14	..	5	..	1	33	33
(Male)	6	..	13	..	9	..	2	33	
Assistants (Male)	68	98
(Female)	68	
	6	4	11	8	24	34	11	30	3	18	..	4	..	3	..	1	55	102	157
	Class I.		Class II.		Class III.		Class IV.		Probationers.										
Pupil-teachers	8	24	7	20	9	20	10	13	8	9		42	86	128
Work mistresses	15	15
	Total Teachers of all ranks																97	203	300

To sum up: the material organization is good, the government is effective, and the general efficiency satisfactory.

W. F. THOMPSON,
Inspector.

ANNEX

ANNEX C.

INSPECTOR MORRIS' REPORT.

WHEN the year 1887 closed there were under my supervision 27 Public Schools in 63 departments, and two Evening Schools; as soon as 1888 began, an Infants' department was opened at Randwick, making the total number of departments open during any portion of 1888 to be 66; but late in the year St. Leonards East Evening School was closed, leaving 65 in operation at the end of the year.

I regard the space provided as sufficient for present requirements.

No increase has been made in the sitting accommodation during the year, but repairs and improvements more or less extensive have been effected at Balmain, Camperdown, Darling Road, Double Bay, Naremburn, Newtown North, Nicholson-street, Randwick, Smith-street, St. Leonards, St. Leonards North, and Surry Hills South. At the time of writing, repairs are in progress at Birch Grove and Surry Hills South.

Of the schools under my charge, 5 are first-class, 9 second, 3 third, 5 fourth, 3 fifth, and 2 sixth; 9 of them are Superior Schools, and 20 departments have fifth classes.

All departments received general or regular inspection; 51 ordinary inspections were conducted, and a good many incidental visits were paid. I was only prevented from completing my programme of ordinary inspections through my absence during the examination of the High Schools.

The following table shows the relation to the standard of the 66 departments spoken of above:—

Standard, 50 per cent. of possible marks.

Above 38	Up to 21	Below 7	Total. 66
-------------	-------------	------------	--------------

The next table gives the total number of pupils examined in each subject and the percentage of these who satisfied or exceeded the standard in the several subjects.

Subject.	Numbers examined.	Percentages.	Subject.	Numbers examined.	Percentages.
Reading.....	10,918	83.5	Music	10,897	84.8
Writing	10,918	81.7	French	231	78.0
Arithmetic	10,918	78.2	Euclid	774	71.8
Grammar	3,694	78.8	Algebra	197	80.2
Geography	4,683	82.6	Mensuration	1,337	69.9
History—English	3,134	73.7	Latin	197	77.7
Australian	1,075	76.5	Natural science	428	83.9
Scripture	10,897	76.4	Trigonometry.....	40	40.0
Object lessons	10,419	78.3	Needlework	2,869	87.1
Drawing	3,134	71.0	Drill	10,897	89.1

Two or three of these subjects call for some remark. The reading, so far as the mechanical part of it is concerned, is satisfactory; but, in all that makes up the musical effect of reading, the results are disappointing.

Writing has not been taught with much success, the majority not obtaining a higher mark than tolerable. It appears to me that insufficient attention is paid to the principles of good writing, the children being allowed to practise in wrong methods.

The results in arithmetic show a considerable advance upon those of last year.

English history, drawing, euclid, and mensuration do not appear to advantage, and trigonometry is exceptionally low.

The schools viewed as a whole may be described as well organized, the supply of teaching appliances is sufficient, and the repair of buildings is generally good.

The enrolments, averages, and percentages of attendance for each quarter of 1888 is shown below:—

Quarter.	Enrolment.	Average.	Percentage.
March.....	15,767	10,309	65.3
June	15,437	10,770	69.7
September	15,938	10,943	68.6
December	15,474	10,828	69.9
Average	15,654	10,712.5	68.3

As a rule the manner, bearing, and general appearance of the pupils are becoming; the punctuality is very fairly satisfactory; and the regularity is fairly so. The government is generally firm, watchful, and effective.

A perusal of the subjoined schedule will show the number and respective ranks of the teachers and pupil-teachers under my supervision.

Staff.	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Special Teachers, exempted by age.	Total.	Grand Total.							
	M. F.	M. F.	M. F.	M. F.	M. F.	M. F.	M. F.				M. F.						
Principal teachers.	10	5	5	4	1	1		1	25	27							
Mistresses of Departments..	3	10	13	7	4				37	37							
Assistants.....	3	9	13	12	26	8	1	12	4	1	25	64	89				
Total.....	10	3	8	10	14	26	16	34	1	12	1	12	4	2	50	103	153
	Class I.		Class II.		Class III.		Class IV.		Probationers.		Total.						
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.					
Pupil-teachers ...	11	33	4	15	10	22	9	19	3	8	27	97	124				
Sewing-mistresses											17	17	17				
	Entire Staff.....											294					

In conclusion I would say that the schools are, for the most part, properly organized, well governed, and faithfully taught; and their present condition gives rise to a reasonable anticipation of satisfactory work in the future.

R. N. MORRIS,
Inspector.

ANNEX D.

DISTRICT-INSPECTOR M'INTYRE'S REPORT.

I HAVE the honor to submit my General Report upon the schools in the Sub-Metropolitan District for the year 1888.

At the close of the year 1887 there were 273 schools in operation. Now, there are 281, being an increase of 8.

During the year, new Public Schools at Ermington, Wyong, Thirlmere, and Pitt Row were opened, and Provisional Schools at Mona Vale, Yarrawah, Hillcrest, and Upper Dural. The Provisional School at Blackgolar became a Public School, and the Provisional School at Lakesland was made Half-time. New Half-time Schools were opened at Innescliff, Williamswood, Jooriland, and Glen Hill, and the Half-time School at Toonulli was closed from want of pupils. The Evening Schools at Meroo and Mount Murray were not reopened in 1888. Early in the year the Public Schools at Mullet Creek and Woy Woy were closed with the completion of the railway contracts, and Sylvania was reopened. Arrangements are in progress for the opening of new Public Schools at Rockdale, Mortdale, St. Ives, Narara, Balgownie, Robbinsville, Corrimal, Hoxton Park, Fairfield, Sandhurst, Woodstock, Marsden Park, and South Granville. Mullet Creek is to be reopened in a more central position, and Half-time Schools at Webb's Creek and Lower M'Donald have been sanctioned, and an itinerant teacher for Higher Mangrove.

Schools in the District.

At the close of the year 1888 there were in operation in the district 281 schools and departments, attended by 20,763 scholars for the last quarter, with an average attendance of 14,534, being 70 per cent. of the number enrolled.

The following statement shows the number of schools of each class, with the total attendance of scholars for the December quarter, and the average enrolment for each school:—

246 Public	Schools, attended by 20,073 pupils; average for each school, 81.
17 Provisional	„ „ 377 „ „ „ 22.
18 Half-time	„ „ 313 „ „ „ 17.

The school buildings are nearly all well situated on dry and healthy sites; their material condition has been considerably improved during the year, and it is fairly satisfactory in all respects. Generally speaking, the school-rooms are well ventilated, properly lighted, and afford better accommodation than formerly. The schools are all well supplied with suitable furniture, apparatus, and books. The school sites recently selected are excellent. The play-grounds are nearly all well fenced, and, with few exceptions, lavatories and weathersheds have been provided for the cleanliness and comfort of the scholars. The educational wants of the district are well supplied, and the new schools keep pace with the increase of population. There are no unnecessary schools, and few of the settlers are without the means of education.

New School Buildings.

During the year 17 school-rooms were erected at the following places:—Pittwater, Rockdale, Cawdor, Malumbi, Pitt Row, Rouse Hill, Fairfield, Goughtown, Upper Dural, Parramatta South, North Granville, Central M'Donald, Sandhurst, Wallaya, Yarrawah, and Hillcrest.

Residences for teachers have been built at Pittwater, Bexley, Cawdor, Helensburgh, Pitt Row, Rouse Hill, Fairfield, Rockdale, Mortdale, North Granville, Goughtown, and Jasper's Brush. Weathersheds were erected at Carlingford, Bexley, Gordon, Dapto West, Dural, Galston, and Lower Portland. Three school-rooms were enlarged and 116 school buildings were repaired or improved, including residences, fencing, and water supply. New school buildings are in progress at Wyong, St. Ives, Hornsby Junction, Narrara, Jiliby Jiliby, West Kangaloon, Liverpool, Thirlmere, Balgownie, Robbinsville, Woodstock, and Marsden Park.

At the close of the year 1887 there was accommodation for 22,449 scholars. With the new school-rooms and class-rooms, accommodation is now provided for 23,584 pupils, being 1,135 seats more than last year, and 2,821 seats in excess of the number of pupils enrolled for the last quarter of the year. From these facts it is clear that there is ample school accommodation provided for all the educable children in the district.

Condition of Schools inspected.

All the schools in the district were fully examined. 189 received a second inspection, and incidental visits were made as opportunities offered, to a considerable number.

The following statement shows the condition of the schools inspected:—

Summary return of Inspection for the Year 1888.

Drill.....	12,579	1,649	1,449	15,677	90

Comparing the proficiency in this table with the results for last year, it may be observed that an advance of 3 per cent. has been made in reading, writing, arithmetic, and several other subjects.

The

The new standards still continue to improve the instruction. The progress of the younger children in reading and writing is more satisfactory than it was formerly, and the more important branches receive greater attention. The classification of the pupils in many schools has improved, and the school work is more equally divided among the several teachers. In a few schools the classes are still too much subdivided, and in some of the large schools, the monthly examination of the classes by the principal teachers is not regularly observed. The work on the programme agrees with the course of instruction in nearly all schools. The time-tables generally agree with the Public Instruction Act and Regulations, and they usually provide for the regular and profitable occupation of the pupils.

Discipline.

The general discipline of the schools is very creditable, and it continues to constitute one of their most pleasing features. The pupils are generally clean, attentive, and well behaved. Drill is now taught with more or less success in all schools, and where it is well taught the scholars are more obedient and attentive to their school duties.

There are some cases where the play-ground supervision is still defective, where late scholars are not regularly inspected as to cleanliness, and where the school-rooms and premises are not so clean and nicely kept as they should be; but the teachers have promised to give more care and attention to these matters. Excessive punishment very seldom occurs, and the government is generally mild but firm and judicious.

Teachers employed.

The whole staff of teachers employed in the schools of the district at the close of the year included 312 teachers and 131 pupil-teachers classified as follows:—

Teachers.	Class I.		Class II.		Class III.			Un-classified.	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Males	1	2	43	49	77	27	13	11	223
Females		2	11	12	20	19	14	19	97

Pupil-teachers.	Class I.	Class II.	Class III.	Class IV.	Totals.
Males	15	8	13	12	48
Females	26	14	25	18	83

There are also 9 work-mistresses employed to teach needlework in some of the more important schools, and in cases where schools are taught by unmarried men. With the exception of cutting out, which is not much practised the needlework is generally well taught.

The unclassified teachers are employed in the small schools where the attendance varies from 12 to 20 pupils. Many of them have been recently examined with a view to classification. Although they are unclassified they have all been trained for their work in some of the larger schools, and have passed a satisfactory examination in the subjects which they have to teach. The teachers of the district with but few exceptions, manifest a lively interest in the success and efficiency of their schools. They are in general attentive to their duties and exemplary in their conduct. The assistant teachers do good work. The pupil-teachers are studious, obedient, and attentive to their duties. With but few exceptions they pass their annual examinations.

School Attendance and Fees.

At the close of the year there were 20,763 schools enrolled with a regular average attendance of 14,534, being 70 per cent. of the enrolment. The number of cases of short attendance reported by the teachers for the June half-year was 3,930, and for the December half-year 2,529, showing a decrease of 1,401. The causes of short attendance are numerous, but the cases of actual default have recently been considerably decreased. Teachers now take a more active personal interest than formerly in the attendance of their pupils, and, as the result is beginning to be felt, it may fairly be expected that the necessity for prosecution will become gradually less.

Of 96 cases taken into Court, 9 were dismissed and 7 withdrawn. Convictions were obtained in 80 cases.

Teachers' monthly returns of school fees in arrear were carefully scrutinised by the Attendance Officers, and in every case requiring it the teachers were furnished with special instructions. In some cases it was found necessary to write to the parents as to their arrears. Wherever a debtor was unable to pay, cancellation of the debt was recommended; but in every case where the debtor was able to pay his arrears, payment was insisted upon. Legal action for recovery of fees was taken in 17 cases, and judgment was given for the amounts claimed.

The amount of school fees due in October, 1887, was £612 3s. 1d., and at the close of the year 1888 that sum was reduced to £143 0s. 8d., being a decrease of 75 per cent.

The present plan of working the compulsory clauses of the Public Instruction Act is economical, fairly effective, and has a beneficial effect upon teachers and parents.

The Attendance Officers under my direction have been industrious and attentive to their duties.

Summary.

During the year the material condition of the schools has been very much improved, the attendance of scholars has increased, the means of education have been extended, and the instruction is more efficient and satisfactory. Seventeen school-rooms and 14 residences for teachers have been built, 3 school-rooms were enlarged, 116 school buildings improved or repaired, 9 weathersheds were erected, and 12 new school buildings are in progress. The Savings Banks appear to give satisfaction to parents, but Evening Schools fail to secure permanent support.

In regard to the compulsory clause of the Public Instruction Act, the number of defaulting parents is decreasing. About 75 per cent. of the school fees in arrear have been collected during the year. All the schools in the district have been examined once, and 189 have been inspected a second time. In conclusion, I have to add that considerable progress has been made during the year, and the prospects and success of the schools are encouraging and satisfactory in most respects. The inspectors with me in the district have made all possible efforts to perform their duties in a satisfactory manner. Their reports are appended.

Glebe Road, Sydney.
12th January, 1889.

W. M'INTYRE,
District Inspector.

ANNEX E.

INSPECTOR HOOKINS' REPORT.

I HAVE the honor to submit this my general report on the condition of the schools under my immediate supervision, during the year 1888.

1. At the termination of the year 1887 there were in operation 57 Public Schools, 4 Provisional, and 4 Half-time. During the present year, 2 new schools, Pitt Row Public, and Upper Dural Provisional, were opened; and therefore, there are now in operation, 58 Public, 5 Provisional, and 4 Half-time Schools.

2. Two new Public Schools, Fairfield and Sandhurst, are ready for opening at the termination of the holidays; and schools are in progress at Woodstock, Marsden Park, and South Granville. The establishment of a Half-time school at Webb's Creek, to be worked in conjunction with the school at Lower McDonald, reduced, and the employment of an itinerant teacher at the Higher Mangrove have been sanctioned.

3. New school buildings have been erected under the architect's supervision at Pitt Row, Rouse Hill, Fairfield, North Granville, and Goughtown, and under the inspector's supervision at Upper Dural, Central M'Donald, and Sandhurst.

Weathersheds have been erected at Dural by the architect; and at Galston and Lower Portland under the inspector's care.

Additions and repairs have been made by the architect to the following schools:—

Blacktown	New kitchen and repairs.
Castle Hill	General renovation.
Erskine Park	General renovation.
Freeman's Reach	Enlargement and repair of weathershed.
Goughtown	Fencing site.
Pitt Row	Washhouse.
Pitt Tower	New bedroom.
Prospect	Supply of forms to class-room.
Rooty Hill	General repairs.
St. Alban's	New bedroom.
Wilberforce	Repairs to water systems.
Wiseman's Ferry	Supply of hat pegs.

and under inspectoral supervision, at:—

St. Mary's	Repairs to closets and gravelling.
Lower Portland	New closet and repairs.
Sackville Reach	Repairing tank.
Riverstone	Felling trees.
Prospect	New porch and lavatory.
M'Donald Upper	Boarding in basement.
Galston	" "
Mulgoa	" shed.
Penrith	" Infants' verandah and sundry minor repairs.

It has been decided to erect school-buildings at Woodstock and South Granville, important centres of population.

Comfortable accommodation for 4,871 pupils existed at the end of 1887. By the opening of the schools at Pitt Row and Upper Dural provision was made for 275 more. When the schools now in progress, are completed, there will be space to receive 230 pupils; so that, while at the termination of 1888 there were seats for 5,146 pupils, there will, in a few months, be seats for 5,426 pupils. The highest enrolment of pupils in 1888, was 4,852 pupils. The accommodation supplied and resolved upon is, therefore, more than equal to the demands of 1839.

The school-buildings are generally healthy and prettily situated, and, in all but a few cases, ample space for playgrounds is secured. The school-rooms are well lighted and ventilated, and amply provided with all the necessary educational appliances and furniture, and the arrangements for the convenience and comfort of the pupils are very complete and satisfactory. Nearly all the schools are properly fenced in.

Enrolment and Attendance.

The following tabular statement shows the enrolment and attendance of pupils in each successive quarter of the year:—

Quarters.	Enrolment.	Average Attendance.	Percentage.	
			1888.	1887.
March	4,605	3,120·1	67·7	64·4
June	4,738	3,445·4	72·7	64·7
September	4,852	3,232·4	66·6	71·6
December	4,703	3,338·6	70·9	70·4

Reckoning for the whole year, I estimate that there is an improvement in the attendance of about 4 per cent. In the September quarter very many children were employed the best part of the day in watering cattle, the supply often being 2 miles away. Sickness, due to drinking bad water and to the excessive heat and dryness of the weather, was very prevalent.

During the year, 6,166 pupils' names were entered on the rolls; 5,931 at Public Schools, 143 at Provisional Schools, and 92 at Half-time Schools. Many of these pupils, however, remained but a short time, their parents migrating to some other locality.

Inspection.

All the schools in this section received a full regular or general inspection: two schools were inspected a second time; 47 schools received an ordinary inspection, and incidental visits were paid wherever practicable.

A full regular inspection of the Girls' Reformatory and Industrial School, Parramatta, was also held, besides quarterly inspections of the management of the institution itself.

The following table shows the condition of the schools in relation to the Standard:—

Schools.	Below Standard.	Up to Standard.	Above Standard.	Totals.	Percentage above Standard.	
					1888.	1887.
Public	6	2	50	58	86·2	96·4
Provisional	1	4	5	80·0	100·0
Half-time	4	4	100·0	100·0
All Schools	6	3	58	67	86·5	93·8

All schools, with two exceptions, were in operation the whole year.

I examined 3,606 pupils during the year, and their proficiency in the subjects of instruction is shown in the following tables. The results are not, as a whole, quite so favourable as those obtained last year, although there is an advance in the enrolment and the average attendance. I attribute this chiefly to the enervating influence of the heat and dryness so long experienced during the past year, showing itself in diminished mental energy or disposition for work.

Subjects.	Estimated Proficiency.				1888.	1887.
	Above Standard.	Up to Standard.	Below Standard.	Total Examined.	Percentage above Standard.	Percentage below Standard.
Reading	2,833	621	150	3,604	95·6	94·3
Writing	3,020	437	102	3,559	97·1	97·6
Arithmetic	1,967	688	894	3,549	74·8	78·1
Grammar	1,120	263	118	1,501	92·1	92·9
Geography	1,066	285	192	1,543	94·0	87·4
English history	541	228	233	1,002	76·7	78·5
Australian history	356	183	146	685	78·0	75·3
Scripture	2,474	749	271	3,494	92·2	98·9
Object lessons	1,666	482	74	2,322	96·8	90·8
Music	2,187	355	164	2,706	93·9	93·0
Drawing	753	167	79	999	92·9	95·7
Euclid	129	3	4	126	97·0	81·1
Algebra	26	12	38	100·0	89·7
French	40	40	100·0	100·0
Latin	36	36	100·0	100·0
Mensuration	82	32	36	150	76·0	72·0
Natural science	26	26	100·0	100·0
Needlework	815	41	4	860	98·3	99·5
Drill	2,907	613	60	3,580	98·2	98·0

The instructional arrangements are very fairly complete; the various lesson documents are drawn up with intelligence and attention to detail; the methods are improved, as regards penetrative power, and the teaching is diligent and intelligent. The pupils of the various schools with a few exceptions, are judiciously classified, and the more important standard subjects are taught throughout.

Organization.

This is in as satisfactory a condition as reported last year. Inconvenience has been suffered at a few schools, through the exhaustion of the water supply from the drought, but these cases have been remedied by the purchase of water from some neighbouring sources, at the expense of the Department.

Discipline.

On this point, I have to report as favourably as in my report for 1887; the enrolment has increased, and the percentage of attendance has also improved; the pupils generally are very fairly punctual, and most creditably neat and becoming in appearance.

Teaching Staff.

The following is a tabulated view of the teachers and pupil-teachers employed, and of their respective ranks in the service, in Public Schools.

Teachers.

Sex.	Class I.		Class II.		Class III.			Not Certificated	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Male	8	17	18	4	4	1	52
Female	1	2	5	1	5	1	2	17
Total	1	10	22	19	9	5	3	69

Four other uncertificated teachers are employed in Provisional Schools.

Included in the list of female teachers, are 4 mistresses of departments.

Two paid sewing-mistresses are employed at Penrith and North Parramatta respectively. At all other schools where this subject is taught, the duty of teaching is undertaken by the teacher's wife, or some female relation.

Pupil-teachers.

Sex.	Class I.	Class II.	Class III.	Class IV.	Total.
Male	2	2	4	8
Female	4	1	7	6	18
Total	6	1	9	10	26

Examinations of teachers and pupil-teachers were held at Parramatta, at Midwinter and Midsummer, and were largely attended by the teachers; a fair number passed the test.

Both teachers and pupil-teachers maintain their high character for sobriety and correctness of conduct.

In September last an examination of applicant pupil-teachers was held; 25 candidates presented themselves, and a large number of them succeeded in passing. The wants of the district in this respect therefore are satisfied for some time to come.

Evening Schools.

No applications for the establishment of these schools have been received during the year.

Itinerant Teachers.

The employment of an itinerant teacher at the Higher Mangrove, has been sanctioned.

Summary.

Summary.

During the past year the enrolment has increased by 371, and the average attendance by about 4 per cent. Upwards of 6,166 pupils passed through the schools during the same period.

Two new schools have been opened; two more open at the termination of the vacation, and two others are in progress. Eight new school-buildings, four of them with residences, have been built; and additions and repairs have been made to 20 other schools. Three schools have been provided with weathersheds.

Savings Banks have been opened at the more important schools with considerable success, and with satisfaction to the parents.

The condition of the schools is satisfactory, and the teaching staff is zealous and efficient.

All schools were fully inspected once, and 49 schools received a second inspection.

Accommodation now exists for more than 5,200 pupils, where at the end of 1887, 4,871 pupils only could be seated.

5th January, 1888.

C. HOOKINS,
Inspector.

ANNEX F.

INSPECTOR DAWSON'S REPORT.

I BEG to submit my report for the year 1888.

At the end of 1887 there were 77 schools in operation under my supervision, comprising—56 Public Schools in 66 departments, 5 Provisional Schools, and 6 Half-time Schools. All these are still in existence except one, Toonulli Half-time School, which from want of pupils was closed in the month of June. Five new schools have been started during the year,—a Public School at Thirlmere (near Picton) and Half-time schools at Jooriland (Upper Burragorang), Glen Hill, Innescliff, and Williamswood, (all near Picton). Two schools were converted during the year; Lakelands Provisional was made a Half-time School, and the Provisional School at Blackgolar (Cox's River), became a Public School. The year 1888, therefore, ended with 81 schools in operation, divided as follows:—

56 Public Schools in 68 departments.
3 Provisional Schools.
10 Half-time Schools.

In addition to the five new schools already mentioned as in operation, the establishment of Public Schools at Balgownie (near Wollongong), Robbinsville (near Bulli), Corrimal (near Wollongong), and Hoxton Park (near Liverpool), has been authorized after due inquiry. These new schools are situated on newly-formed settlements as at Thirlmere and Hoxton Park; amongst isolated families as at Glen Hill, Jooriland, Innescliff and Williamswood; or in the Wollongong District where the mining population has increased considerably of late.

With few exceptions the schools are well placed throughout the district both for present and prospective population. The schools in operation with those in progress will fairly meet for a time the wants of the various localities.

The following table shows (1) the names of the new school buildings completed during the year, (2) under whose supervision each was erected, (3) the object in view in each case, and (4) the accommodation provided:—

School.	Supervision.	Object in view.	Accommodation.
Parramatta South (Infants) ...	Architect	To provide additional accommodation.	241
Cawdor	Architect	To replace rented premises	50
Malumbi	Local Supervision	To replace old building	24

A residence at Helensburgh was erected under the architect's supervision; a weathershed at Dapto West, under local supervision. A new class-room was erected at Fairy Meadow under local supervision, and affords accommodation for 50 pupils.

Considerable improvement has been made in the material condition and equipment of 30 schools—10 under the supervision of the architect and 20 under local or inspectoral supervision. At present repairs and improvements to 9 schools are in progress.

Glenfield Public School is undergoing extension under my supervision at a probable cost to the Department of £48 10s. At Liverpool a new Primary School is nearing completion. At Thirlmere, Robbinsville, and Balgownie, new school buildings are in course of erection. Tenders have been invited for the provision of a class-room at Narellan.

At the end of 1887 there were places in the schools for 6,432 pupils. The new school buildings and class-room mentioned above as completed, accommodate 375. Five of the new schools opened in non-vested premises accommodate 156. By the closing of one school, the abandonment of another, and the replacing of a third by vested premises, 118 places were lost. So that in all 413 places were added during the year. The total number of places is now 6,845. As the highest average for all the schools in any quarter was under 4,800, the total number of places is quite adequate.

The following table shows side by side the enrolment and average at all the schools for each quarter of 1887 and 1888, and the percentage in each case:—

	Enrolled.		Average.		Percentage.	
	1887.	1888.	1887.	1888.	1887.	1888.
March	6,923	7,014	4,529·3	4,793·9	65·5	68·4
June	6,756	6,858	4,258·4	4,789·2	63·0	69·9
September	6,873	6,972	4,667·3	4,725·2	67·8	67·8
December	6,773	6,900	4,716·9	4,707·7	69·6	68·3

During 1887 the attendance was affected by wet weather and bad roads. In 1888 it has been affected considerably by outbreaks of measles in almost every locality.

Every one of the 82 schools and departments open during 1888 or some portion of it, underwent the annual inspection, called regular. Two received a second regular inspection, having been found defective at the first inspection, and 42 received a second inspection, called ordinary. It was not found possible to visit all the schools a second time. Incidental inspections were made of all schools convenient to the routes of travel during the year.

The

The general efficiency of the schools as disclosed by inspection and examination may be seen from the following table :—

	Below Standard.	Up to Standard.	Above Standard.	Total.
1. Schools in operation a full year at time of inspection—				
Public	13	10	44	67
Provisional	1	2	3
Half-time	2	5	7
2. Schools not in operation a full year—				
Public	1	1
Provisional
Half-time	2	2	4
Total	16	17	49	82

In 1887, 79 per cent. of the schools were up to or above standard; this year this percentage is 80. Of the 16 schools below standard efficiency, 11 come very close to it.

The organization of the schools is generally speaking very satisfactory. The rooms are kept clean, the material properly arranged, and the documents regulating the instruction are conspicuously placed. Each school has a time-table drawn up by the teacher and examined by the inspector. In but few cases did I find the time-table not followed. The lesson programmes are generally drawn out with fair skill in agreement with standard requirements.

The discipline in the schools is of a healthy kind. Mildness is its prevailing characteristic, and its effectiveness is not the less on that account. I have had no complaints as to severity on the part of the teachers. The pupils are well behaved, steady, and attentive under examination.

The subjects of examination have been invariably those prescribed, and the following table will show (1) the No. of pupils examined in each subject, and (2) the percentage of passes in each subject.

Subjects.	No. Examined.	Percentage of Passes.
Reading	5,084	86
Writing	5,039	89
Arithmetic.....	4,879	76
Grammar.....	1,962	85
Geography.....	2,163	86
English history	1,416	80
Australian history	414	75
Scripture and moral lessons	4,949	80
Object lessons	4,117	86
Drawing.....	1,465	70
Music.....	4,629	86
French.....	80	48
Euclid.....	259	62
Algebra.....	128	45
Mensuration.....	381	63
Latin	119	41
Natural science	190	69
Needlework	1,492	92
Drill.....	5,048	91

The schools are managed by 97 teachers and assistant teachers, and 49 pupil-teachers, classified as follows :—

Teachers and Assistant Teachers.

	Class I.		Class II.		Class III.			Not Classified.	Totals.
	A	B	A	B	A		C		
Males	2	15	7	16	11	4	4	59
Females	1	7	5	8	7	4	6	38

Pupil-teachers.

	Class I.	Class II.	Class III.	Class IV.	Totals.
Males.....	5	4	9	3	21
Females.....	12	4	9	3	28

Three work-mistresses are employed to teach sewing at the Public Schools at Granville, Windsor, and Parramatta South. In the other schools sewing is taught by the teacher's wife, or by the female teachers of the school.

The conduct of the Pupil-teachers has been, without exception, good. They have been favourably reported upon by all concerned in their training. With but few exceptions the teachers have shown themselves diligent, painstaking, and faithful servants. In their hands I have no doubt that the efficiency of the schools of the district will be maintained.

All statistics are appended.

J. DAWSON,
Inspector.

Campbelltown, 31st December, 1888.

ANNEX G.

INSPECTOR PITT'S REPORT.

HAVE the honor to submit to you my General Report upon the schools inspected and the official duties performed by me during the year ending the 31st December, 1888, in the Nowra Section of the Sub-Metropolitan District.

I.—Means of Education.

The total number of schools of all classes in operation in this section of the district at the commencement of the year, was eighty-three.

This number has been increased by the establishment of two new Provisional Schools at Yarrawah, near Robertson and at Hillcrest, near Kangaroo Valley. Both of these schools commenced active work in the last half-year, and have maintained a good average attendance since their opening.

At the end of the year, therefore, there were in full operation in this district 74 Public, 7 Provisional Schools, and 4 Half-time Schools.

With regard to the demand for new schools, I have to report that four applications for the establishment of Provisional Schools have been received. Of these, two have been favourably entertained, one declined, and the other, a very recent application, is now under consideration.

The following statement shows the localities from which these applications were received, and the Department's decision in each case :—

School.	Department's decision.
(a) Yarrawah.....	Provisional granted.
(b) Hillcrest.....	Provisional granted.
(c) North Barrengarry.....	Declined.
(d) Corindah.....	Under consideration.

II.—Organization.

The school buildings in this section are in the majority of cases kept in a satisfactory condition, clean, in good repair, and well equipped. The school records are better kept than formerly, and the requisite lesson documents have been compiled with increased ability and care.

The formation and cultivation of flower gardens, and the planting of trees and shrubs in the playgrounds do not yet receive the attention they deserve. In too many instances there is nothing done to give the schools and surroundings an attractive and cheerful appearance.

For neat, well-kept, and attractive gardens and playgrounds, the undermentioned schools deserve special praise :

(a) Pyree Public School,	(d) North Huskisson,
(b) Broughton Vale,	(e) Tomarong,
(c) Berry,	(f) Woodhill.

III.—School Accommodation.

There exists in this portion of the Submetropolitan District sufficient and suitable school accommodation for all requirements.

At the beginning of the year the accommodation provided by the existing schools was satisfactory in both amount and character for no less than 5,870 pupils.

The three new buildings, erected during the year at Wallaya, Yarrawah, and Hillcrest, provide additional room for 128 more, so that the school accommodation for the whole section is adequate for 5,626 pupils, being largely in excess of actual or prospective wants, as is evident from the yearly returns which give an average daily attendance of 3,080 pupils.

The following table sets forth the amount and character of the existing school accommodation :—

No.	Class of Schools.	No. of Schools.	No. of Departments.	Accommodation provided.	Gross enrolment, 1888.	Average attendance, 1888.
1	Public.....	74	75	5,465	} 5,413	3,079.5
2	Provisional.....	7	7	373		
3	Half-time.....	4	4	160		
	Total.....	5,998		

It may fairly be concluded from the foregoing observations, that so far as school accommodation is concerned, the progress made in this district during the past few years has been both substantial and satisfactory.

New Buildings.

(a) New school buildings erected under the supervision of the inspector.

(3.)

No.	Name of Schools.	Dimensions.			Accommodation.	Cost.	Object.
		Length.	Width.	Height.			
1	Wallaya (public).....	ft. 36	ft. 16	ft. 12	72	£ 170	To replace old premises.
2	Yarrawah (provisional) ...	30	16	12	50	45	New.
3	Hillcrest (do) ...	25	14	11	36	45	New.
						£260	

(b) New residences and kitchens.

(3.)

No.	Name of Schools.	Nature of work.	Supervision.	Cost.	Object.
1	Berry (public).....	Kitchen, brick and stone (14 × 14)	Inspector	£ 69	New.
2	Jasper's Brush (public).	Residence of 6 rooms and kitchen, &c.	"	200	New.
3	Robertson (public) ...	Kitchen, iron and stone (14 × 12).	"	35	New.
				£304	

(c) Works in progress.

No.	Name of Schools.	Nature of work.	Supervision.	Cost.	Object.
1	West Kangaloon	School and residence, &c., &c.	Architect..	£ s. d. 857 15 0	To supersede old premises.
2	Shellharbour.....	General repairs, &c., &c.	Inspector..	38 10 0	For improvement.
3	New Bristol	Removal of school and repairs.	"	38 0 0	" "
	Budjong	Removal of school ...	"	12 0 0	" "
	Budjong Vale	Erection of weather-shed.	"	15 0 0	New.
	Cambewarra	General repairs.....	"	26 17 6	For improvement.
				£988 2 6	

Repairs and Improvements.

Important repairs and improvements have been made—more or less extensive—to the buildings at the undermentioned schools, viz. :—

Albion Park	Fall's Creek	Mimosa Park
Beaumont	Foxground	Nowra
Berry	Gerringong	Osborne Hill
Boolong	Harley Hill	Omega Retreat
Budjong Vale	Jamberoo	Pyree
Burrill	Jasper's Brush	Robertson
Burrawang	Kangaroo Valley	Stockyard Mount
Cambewarra	Kiama	Terrara
Comarong	Marshall Mount	Tomarong
Coolangatta	Meroo	Tongarra
Conjola	Milton	Wild's Meadow
Croobyar	Minnamurra	Yarrunga.

The total cost of effecting the miscellaneous repairs and improvements to these 36 schools was £650, and in each case the work was carried out under my own supervision.

Attendance.

The following is a comparative statement of the total enrolment of pupils, the average attendance for each quarter of the year, and the fees received from the schools for the last two years :—

Quarters.	1887.					1888.				
	No. of Schools.	No. Enrolled.	Average attendance	Per-centage.	Fees.	No. of Schools.	No. Enrolled.	Average attendance	Per-centage.	Fees.
March	84	4,485	2,997·5	66·8	£ s. d. 378 2 3	83	4,319	3,020·9	69·9	£ s. d. 408 3 2½
June.....	84	4,388	2,803·7	63·9	351 10 9	83	4,248	3,193·5	75·4	427 14 9½
September ...	86	4,434	3,082·3	69·5	424 14 8½	85	4,396	3,145·3	71·0	488 2 8½
December ...	86	4,385	3,063·2	69·9	492 19 9	85	4,256	2,989·7	70·2	454 14 6

From this table it will be observed that while the number on the rolls is practically stationary the average attendance has increased by nearly 4 per cent., and the fees have considerably improved.

This is gratifying, and testifies in the strongest way that, if the compulsory clause of the Education Act be worked with perseverance, due activity, and some enthusiasm, it will certainly be productive of much benefit and improvement throughout the Colony.

The greatest obstacle to success in our schools is "irregularity of attendance," though I am glad to be able to report a prospect of continued improvement in school attendance in this section.

Discipline.

The discipline in the majority of the schools inspected continues to be of a sound healthy character ; in a few it is susceptible of improvement.

The regularity and punctuality of the pupils are sensibly better than formerly, and a decided improvement is perceptible in their morning attendance.

Habits of cleanliness and neatness are carefully observed in the working of the schools, and on the whole successfully cultivated.

The government secures obedience, good behaviour, and cheerfulness, and seldom or ever is undue severity resorted to.

Instruction in military drill is, with very few exceptions, given now in all the schools of my district ; in a considerable number it is very well carried out, and satisfactory improvement is noticeable in this respect.

Inspection.

All the schools that were in operation during the year were fully inspected.

Ordinary inspections have been made, and frequent incidental visits paid to every school under my supervision. These visits without notice are a most useful means for enabling an inspector to judge of the discipline of a school, of its whole character, and of the worth and efficiency of its teacher, and I am glad to say that in no instance during the year have I been unable to pay each school such a visit.

I have not altered the opinion I expressed in my last report of the value of these inspections, as from experience I see that they have been of great service in improving the character of the instruction and the general condition of the schools, and at the same time have been in nowise distasteful to the honest, earnest worker who has his heart and soul in his calling.

I may have at times to find fault, or to press for improvements, and to do so, perhaps, with considerable determination, but I never find it taken otherwise than in good part.

Throughout the district the teachers have in many cases made very creditable efforts to comply with the full requirements of the revised standards, and in consequence it is gratifying to be able to report that the elementary subjects—reading, writing, and arithmetic, are, on the whole, taught with creditable success.

The

The total number of inspections made in this section during the year was 170, viz., 9 general, 76 regular, and 85 ordinary.

The work of inspection for the year may be thus stated :—

85 general and regular inspections.
85 ordinary inspections.

The number of pupils present at the inspection of the 85 schools was 3,347.

Condition of Schools.

The general results of the inspection may be seen from the following table :—

Name of Schools.	Below Standard.	Up to Standard.	Above Standard.	Totals.
Public	7	3	64	74
Provisional	2	2	3	7
Half-time	0	1	3	4
Totals	9	6	70	85

This table shows that about 90 per cent. of the inspected schools either met or exceeded standard requirements, and that 10 per cent. failed to do so—a very creditable result of the condition of the schools,—and indicates a gradual and satisfactory improvement on former years.

Percentages.

The following statement shows the number of pupils examined in each subject, and the percentage who satisfied the standard for the years 1887 and 1888 :—

Subjects.	1887.		1888.	
	Number examined.	Percentage of Passes.	Number examined.	Percentage of Passes.
Reading	3,299	86	3,347	87
Writing	3,299	84	3,347	87
Arithmetic	3,299	74	3,347	78
Grammar	1,494	81	1,593	84
Geography	1,618	86	1,614	89
Object Lessons	2,265	84	2,582	81
Scripture	3,239	85	3,347	89
Drawing	1,040	77	1,074	81
Music	3,045	83	3,207	85
History	1,580	78	2,337	72
Geometry	206	79	250	82
Algebra	135	76	150	74
Mensuration	149	78	270	78
Latin	71	73	70	75
French	50	70	65	70
Natural Science			105	80
Needlework	1,384	85	1,962	95
Drill	3,299	81	3,347	80

The above table shows a steady progress in all the elementary subjects, and compared with last year, the results may be regarded as very satisfactory, and may be taken as a basis for future work and progress.

Teachers.

At the end of 1888, there were under my supervision 86 principal teachers, 4 assistant teachers and 22 pupil-teachers.

The principal teachers and assistants are thus classified :—

Teachers.	Class I.		Class II.		Class III.			Un-classified.	Total.
	A.	B.	A.	B.	A.	B.	C.		
Males	0	0	5	14	25	10	5	5	64
Females	0	0	1	0	7	4	5	9	26
									90

The Pupil-teachers rank as follows :—

Pupil-teachers.	Class I.	Class II.	Class III.	Class IV.	Total.
Males	5	3	0	2	10
Females	5	1	4	2	12
					22

As a body, the teachers are respectable, sober, and competent. The bulk of them are punctual and faithful, and discharge their duties with commendable zeal and intelligence.

All the pupil-teachers under my supervision have conducted themselves well and creditably, and have carried out their many duties promptly, cheerfully, and with satisfactory efficiency.

Summary

Summary.

1. The schools are well distributed ; the accommodation is good and sufficient.
2. The discipline of the schools continues a pleasing feature, and the school attendance has increased.
3. All schools have received two inspections, and been visited incidentally many times.
4. The efficiency of the schools have much improved, and the general results indicate steady sound progress.
5. In conclusion, I am glad to be able to report a year of satisfactory and material progress, and that the prospects for the incoming year are hopeful and encouraging.

All required statistics have been duly forwarded as directed.

Nowra, 31 December, 1888.

CHAS. JNO. PITT,
Inspector.

ANNEX H.

DISTRICT-INSPECTOR BRADLEY'S REPORT.

I.—*Schools and School Establishment.*

During the year 1887 there were in operation in the Armidale District, for the whole year, or part of it, 258 schools, viz. :—173 Public, 62 Provisional, 10 Half-time, and 13 groups of House-to-house Schools. Of these schools, 5—Milliwindi Public, Somerton Public, Swanbrook Public, and Glen Lee and Wallangra Half-time—were not working during 1888 owing to insufficient attendance ; and fourteen new schools were opened in the following localities :—Bando, Bonavista, Cobbadah, Cubbo, Dwyer's Homestead, Glenarm, Graham's Vineyard, Mannka, Nine-mile, Redbank, Ukolan, Willow Grove, Wilson's Creek, and Wollomombi. The school roll for the year 1888 will thus show a net increase of nine schools, classified as follows :—

Public.....	183
Provisional	56
Half-time	12
House-to-house	16
Total.....	267

Early in 1889 the opening of small schools at Coolootai, Kulki, Milchomi, Nowley, Oakey Creek, and Wollun will be effected ; and a few applications for other small schools are still under consideration. Applications for the establishment of Provisional Schools at Blairmore, Bullawa Creek, The Cedars, Eulah Creek Road, Hawarden, and Terrible Vale have been refused, in most cases on the ground that the educational wants of the several places were sufficiently well met by existing schools. I know now of no localities in which schools are or may be required, beyond those for which steps have already been initiated for school establishment. All the centres of population are fully supplied, and, under ordinary circumstances, any new schools that may be opened must be of the smallest kind—Provisional, Half-time, or House-to-house Schools.

II.—*School Buildings, Organization, &c.*

Under the Architect to the Department, new buildings or extensive alterations and improvements have been completed during 1888, at Deepwater, Dundee, Moree, and Tenterfield ; important additions are in progress at Warialda ; and a contract for the erection of new school premises at Quirindi, to cost over £2,000, has just been entered into. Minor repairs and improvements have also been effected under the same officer in various parts of the district. The inspectorial staff of the district has arranged for, and completed, the erection and furnishing of twelve of the smaller class of school buildings at a total cost of £866, and for the repair of forty school houses at a cost of £687. A teacher's residence has also been provided at Hillgrove for £145, and a Provisional School building, to cost £60, is approaching completion at Wollun. Expenditure throughout has been as economical as possible, consistent with effectiveness, and proved wants have been promptly met.

After deducting accommodation lost by the closing of schools, and the disuse of old buildings, an aggregate increase of 724 "places" has been effected during 1888, making now available a total sitting accommodation for 14,703 children. As the maximum enrolment of pupils (reached in the September quarter) was but 12,276, with an ordinary attendance estimated at 10,000, such accommodation must be regarded as ample. There are certainly cases in which the seating capacity of a school is taxed to its fullest extent ; and others where, from decadence of population or other causes, the attendance is small relatively to the size of the building available ; but, as a rule, it may be said that the schools of the district afford sufficient, and more than sufficient air space and floor space for the children ordinarily attending them.

In all schools, except those conducted under House-to-house teachers, and some few other small ones, the furniture in use is suitable and sufficient in quantity ; while in the case of every school a stock of books and working materials is obtainable yearly, which, though not granted on very liberal lines, is adequate for efficient conduct when ordinary care and economy are exercised by the teacher.

In general, the classification of the pupils is appropriate and in accord with the requirements of the standard, and improvement is apparent in the construction of the documents framed to regulate the teaching. Except in a few instances, the records of the school are accurately and punctually kept, although it too often happens that a want of neatness is displayed. Savings banks are worked in connection with most schools ranking from Class VI upwards ; and within a few weeks every school in the district that should have a bank will have one opened.

III.—*Inspection.*

In the beginning of the year a change was made in the inspectorial staff by the appointment of Mr. Walter Beavis to succeed Assistant-Inspector Nolan in the Inverell section of the district. Mr. Beavis entered on his duties on the 7th February, and the zeal and efficiency displayed in successfully compassing the work of a large section entirely new to him deserve commendation. Of the 257 schools which were in operation during either the whole or part of 1888, 67 were under my personal supervision ; 97 were in the Tamworth section, under Mr. Blumer, and 103 formed the Inverell section, under Mr. Beavis. Every school in the district received full inspection, and in the case of three very defective schools a second inspection was held ; 40 ordinary inspections have also been made, and numerous incidental visits and brief inspections have been made as opportunity offered. Fortunately for the work of inspection, travelling during 1888 was facilitated by the long continuance of dry weather ; but in many localities, the drought militated against regularity of attendance, and fewer pupils were present at examination than otherwise would have been the case. Notwithstanding, an increase of 791 in the number examined which took place as compared with the record of 1887—the numbers for the two years being respectively 8,312 and 9,103 ; and this latter number exceeds by nearly 300 the highest average attendance for any quarter of the year.

IV.—*Efficiency of Schools.*

In estimating the general efficiency of schools, the marks awarded for the organization, the discipline, and the instruction are taken into account, and the attainment of 50 per cent. of the total number of marks entitles a school to be rated as "up to the standard." In this light, out of the 267 schools inspected, 36 rate below the standard, 187 exceed the requirements, and 44 just satisfy them.

These

These results are in themselves very fairly creditable, and indicate steady, although not great progress. An opportunity for comparing the record of 1888 with those of the three previous years is afforded by the following tables:—

	1885.	1886.	1887.	1888.
No. of schools below standard	42	42	37	36
" " up to " 	62	30	29	44
" " above " 	92	161	191	187
Totals	196	233	257	267

Or having regard to percentages:—

	1885.	1886.	1887.	1888.
No. of schools below standard	22%	18%	15%	13%
" " up to, and above standard.....	78%	82%	85%	87%

The following table deals simply with the matter of attainments as elicited at examination, and shows (1) the subjects, and to some extent, the range of the instruction; (2) the number of pupils examined in each subject; (3) the proficiency reached in relation to the standard; and (4) the relation of the results to those of 1887:—

Subjects.	Estimated Proficiency.					
	Above Standard.	Up to Standard (50 p.c. of possible marks).	Below Standard.	Total Examined.	Percentage up to or above Standard.	Relation to results of 1887.
Reading—

Drill.....	3,569	1,737	1,119	6,425	83%	+ 8%

Every pupil present at examination was tested in the three essential subjects of instruction—reading, writing, and arithmetic. In these subjects the results, viewed as a whole, show a slight falling off when compared with those of the previous year; but it is fair to note that, in the reading of easy narratives and ordinary prose, 6,483 pupils were examined during 1888 as against 5,597 in 1887; in writing on paper, 5,036 as against 4,371; and in compound and higher rules of arithmetic, 3,009 as against 2,389. In grammar and geography the results correspond closely with those of 1887, notwithstanding that the number of pupils tested in the more advanced parts of the subjects exceeds that of the previous

previous year by about 30 per cent. Considering, therefore, the severer tests to which the pupils have been subjected, it is creditable that no appreciable falling off in the number of passes has occurred.

No retrogression in the disciplinary conditions of the school is observable; and, as has been remarked in the previous reports, no other feature of school work is found to be so uniformly creditable.

V.—*Teachers.*

At the close of the year, the teaching strength of the district was represented by 252 principal teachers, 12 assistant teachers, and 49 pupil-teachers. Of the former, 119 have not obtained classification by examination, and these are employed in Provisional, House-to-house, and other small schools. The remainder, with the assistant teachers (145 in all) are classified as follows:—5, Class I, Section B; 32, Class II, Section A; 21, Class II, Section B; 47, Class III, Section A; 29, Class III, Section B; 11, Class III, Section C.

With rare exceptions the teachers have proved themselves worthy of the trust reposed in them, both on the score of efficiency in the discharge of their school duties, and as exemplars in their conduct to those around them. Not a few of the younger men are placed in circumstances of strong temptation, and it is much to their credit that they so well withstand the evil influences of their surroundings.

As a body the pupil-teachers are circumspect in their conduct, obedient, and very fairly diligent in their efforts towards self-improvement; while the seniors among them render service quite as effective as that of an ordinary assistant teacher. So far as I can ascertain the feeling in the matter, the recent regulation as to their admission to the Training Schools has had a depressing effect; and in country places it is not unlikely that some difficulty may be met in obtaining suitable applicants for the position.

VI.—*Summary.*

Summarizing the foregoing remarks, it may be said that the supply of schools throughout the district is well up to its requirements; and that, as regards their accommodation and equipment, the provision made is ample. So far as the teachers are concerned, the organization of the schools is, as a whole, satisfactory; while the discipline exercised is healthy, the appearance and demeanour of the pupils pleasing, and the order, with very few exceptions, good. Every school has been subjected to one thorough inspection, and ordinary and incidental inspections have been made as far as practicable. The proficiency of the pupils as elicited at examination shows some improvement on that of last and preceding years, and is creditable in its relation to standard requirements. Teachers, generally, have worked well and honestly. The suggestions offered for their guidance have been received in a cordial spirit, and with an evident desire for the improvement of their schools which promises well for the future.

J. D. BRADLEY,
District Inspector.

ANNEX I.

INSPECTOR BLUMER'S REPORT.

I.—*Adequacy of the Means of Education, as regards Amount and Distribution.*

At the close of last year, there were under my supervision 62 Public, 16 Provisional, 2 Half-time, and 8 House-to-house Schools. Total 88 schools.

Two Public Schools (Barraba and Hawkin's Creek), 1 Provisional (Colonna), and 1 House-to-house (Crowley's) were then transferred from the Inverell to the Tamworth section of the district. 2 Public Schools (Colly Blue and Millwindi) did not reopen after the vacation; and 2 Provisional Schools (Harparary and Wooloban) were converted into Public.

During 1888, 4 Provisional Schools (Bando, Bona Vista, Grabham's Vineyard, and Ukolan), and 2 House-to-house (Cobbadah and Cubbo) were established. The Colly Blue school was revived as House-to-house, instead of Public, and the Provisional School at Warrah Ridge was closed.

The present year therefore closes with the following schools in existence:—

64 Public; 18 Provisional; 2 Half-time; 12 House-to-house. Total, 96 schools.

A Provisional School will come into operation at Nowley early next year.

Applications for the establishment of Provisional Schools at Blairmore, Bullawa Creek, The Cedars, Eulah Creek Road, Hawarden, and Terrible Vale were refused, as were also requests for an Evening Public School at Attunga Springs, and for itinerant teachers at Cryon, and at Barry and Nagis Creek. The question of sending a House-to-house teacher to Milchomi is still under consideration.

The existing schools are properly distributed, and fully meet the present educational requirements of the district.

It is probable, however, that the decrease of population in some localities, and the settlement of families in others will necessitate the early closing of certain small schools and the establishment of others elsewhere.

II.—*The Actual Condition of the Schools as elicited by Inspection.*

Ninety-seven schools were open during the whole or some portion of the year. All were fully inspected, 1 received a second full inspection, and 8 ordinary inspections were held. It is to be regretted that time did not admit of more ordinary inspections, as such inspections cannot fail to prove of direct advantage to the teacher, and of proportionate benefit to the pupils.

(a) *Organization.*

No unnecessary outlay has been incurred for repairs and improvements; but nevertheless the school buildings are, as a whole, in good condition, afford suitable accommodation, and are well provided with furniture, apparatus, books, &c. In many cases, however, the water-supply, although sufficient under ordinary circumstances, failed to last throughout the long rainless period that occurred in many places.

Savings Banks are successfully conducted in all the more important schools except two or three; and from these latter applications have been received for the establishment of such banks.

The records are correctly and, with rare exceptions, neatly and carefully kept, and marked improvement in the construction and observance of Time-tables and Programmes still continues.

(b) *Discipline.*

The discipline continues to be a most satisfactory feature in the schools. The pupils are, as a rule, punctual and very fairly regular in their attendance, clean and tidy in appearance, obedient, and diligent. The government is kindly, yet vigilant and firm, and the moral tone of the schools healthy. Drill is now taught in nearly all but the smaller schools, and ranges from simply marching in file to the advanced company drill of the Tamworth Cadet Corps.

(c) *Instruction.*

Except in a few cases, the pupils are correctly classified, and receive instruction in accordance with the requirements of the Standard of Proficiency. In schools under the charge of trained or classified teachers the methods used are generally of approved type, and in nearly every instance the school work is conducted with intelligence and commendable zeal.

IV.—Teachers.

During the year two teachers resigned to avert dismissal, and it may now be said that, with scarcely an exception, the teachers are steady, industrious, efficient, and trustworthy. Their duties are faithfully and, in many cases, most zealously performed. Every school has a complete staff.

Considerable difficulty is sometimes experienced in obtaining suitable male teachers for House-to-house Schools, and it is expected that the number of applicants for the office of pupil-teacher will be much reduced by the new regulations with reference to admission to the Training School. The pupil-teachers are a hard-working efficient body, but many of them are much disheartened at the prospect of admission to training, after four years' service at comparatively low salaries, only provided they are prepared to do so without allowance of any kind for a period of two years.

Summary.

The means of education are considerably distributed and adequate.

The efficiency of the schools is more than satisfactory. There is no reason why the results of inspection for 1889 should not be quite as good as those of previous years.

L. BLUMER,
Inspector.

Tamworth, 28th December, 1888.

ANNEX J.

ASSISTANT INSPECTOR BEAVIS' REPORT.

At the close of 1887 there were in operation in this section 104 schools; viz., 69 Public, 28 Provisional, 2 Half-time, and 5 House-to-house: 4 of these, viz., 2 Public (Barraba and Hawkins Creek), 1 Provisional (Colonna), and 1 House-to-house (Crowley's, Rockmore, and Wood's Reef) were transferred to the Tamworth Section, and the Half-time Schools at Wallangra and Glen Lee were closed. There were thus 91 schools in the Inverell Section at the commencement of 1888.

During the year four schools have been established in new localities, viz., Nine-mile, Willow Grove, Redbank, and Dwyer's Homestead; and, worked in conjunction with the last named, Bluff River, formerly Public, was re-opened as an Half-time School. Altogether, therefore, there have been in operation under my supervision, during 1888, 103 schools, classified as under:—

75 Public
22 Provisional
2 Half-time
4 House-to-house.

Several schools have undergone modification of status consequent on increase or decrease of attendance; 8 Provisional Schools have become Public; and 1 House-to-house School was converted to Provisional. On the completion of new school-premises at Tenterfield in March last, that school was re-organized, separate Boys' and Girls' Departments being substituted for the original Primary and Infants.

The House-to-house School at Gragin has been temporarily discontinued, and it has been decided to close permanently on account of small attendance, the Half-time Schools at Bluff River and Dwyer's Homestead.

Several new schools will, however, be brought into operation at an early date. At Oakey Creek and Kulki, a commencement will be made as soon as suitable buildings are erected; the Swanbrook school is to be re-opened, and a House-to-house School will shortly be established at Coolootai and Wallangra. Two applications for schools are under consideration, and two or three more are expected from new localities. When provision for these has been made, the wants of the district should be well met, and very few if any children should be absolutely beyond reach of the means of education.

The accommodation provided in existing schools is in most cases adequate and of a satisfactory description, and wherever the prospects of settlement have demanded the erection of new and larger buildings, the provision has usually been of a superior kind. At Tenterfield, Moree, Deepwater, Dundee, Yetman, and Graman, the new buildings which have been occupied during the year, are in strong contrast both as regards appearance and suitability to the structures they have replaced.

The schools, excepting the very small ones, are well supplied with furniture, apparatus, and other requisites, so that there are sufficient facilities for successful work.

The disciplinary condition of the schools as a whole is fair, and in some of the larger schools, where military drill is successfully taught, a high standard of discipline is maintained.

The state of the schools as regards instruction may be best inferred from the results of inspection.

Every school in the section has been fully inspected (two schools twice); 31 received ordinary inspection, and incidental visits were paid as opportunity offered. Of the 103 schools inspected, 77 were above the standard in point of efficiency, 11 up to, and 15 below it; the sum of the former two numbers being 85 per cent., of the whole. The corresponding percentage for 1887 was 84.

3,610 pupils were examined as against 3,561 during the previous year. As may be seen from the subjoined table, the estimated proficiency of the pupils in the several subjects taught bears a satisfactory relation to the standard although the results are slightly lower than for 1887.

Subjects.	Percentage up to or above Standard.		Increase or decrease per cent.
	1887.	1888.	
Reading	96	86	- 10
Writing	97	96	- 1
Arithmetic	84	67	- 17
Grammar	90	79	- 11
Geography	90	79	- 11
History { English	92	69	- 23
{ Australian	94	85	- 9
Scripture	92	91	- 1
Object lessons	95	96	+ 1
Drawing	93	92	- 1
Music	85	87	+ 2
French
Euclid	100	100
Algebra	100	100
Mensuration	100	100
Latin	100	100
Natural science	100	100
Trigonometry
Needlework	100	98	- 2
Drill	99	94	- 5

The following conditions observed in a number of schools will sufficiently account for the reduced percentages of passes .—

1. Deficiency in the quantity of work accomplished has necessitated reduction of the actual marks.
2. Lessons (more particularly reading lessons) have been skipped by teachers in the effort to bring class work into harmony with the standard
3. Class promotions have been too rapid. Teachers have injudiciously promoted unfit pupils on completion of their standard time in class under the impression that it was compulsory so to do

Arithmetic, grammar, and history, the weakest of the subjects, are in many of the smaller schools very imperfectly taught. The teachers, through inexperience, fail to adapt the instruction to the capacities of their pupils. This is particularly noticeable in the teaching of history; the pupils learn from text books, and the task is cast upon them of analysing the subject matter to select the vital facts.

In the larger schools the superior skill of trained teachers produce higher results. In the boys' departments, at Tenterfield and Glen Innes, instruction of fifth class range has been imparted. Pupils of the former school were successful at the University public examinations.

The teachers, as a body, are zealous and assiduous in the discharge of their duties. Where there has been non success in school-work, except in a few instances, the method has been at fault, not the will of the teacher. It is a matter for regret that more frequent opportunities are not available for ordinary inspections when direct aid might be given to the teacher in the shape of practical hints on school method.

The following lists show the teachers actually employed in the several schools at the close of the year —

<i>Teachers and Assistants</i>		
Class	I B	2
	II A	13
	II B	8
	III A	19
	III B	12
	III C	3
	Unclassed	49
		106

<i>Pupil teachers</i>		
Class	I	5
	II	5
	III	5
	IV	8
		23

The enrolment of pupils in the schools for the several quarters of the year, notwithstanding the loss by transference of schools to the Tamworth Section, has been about the same as for 1887, but the average attendance has been higher. See table subjoined —

Quarters Ending	Enrolment 1887	Enrolment 1888	Average Attendance, 1887	Average Attendance, 1888
March	4,798	4,813	3,022	3,218
June	4,855	4,772	3,280	3,476
September	4,894	4,871	3,236	3,442
December	4,901	4,719	3,413	3,322

In 1887 the weather was unfavourable to regular attendance, while in 1888 there was nothing to check regularity till the last quarter of the year, when owing to the protracted drought, sickness was unusually prevalent, and many children were kept from school to assist in watering stock.

The accommodation now provided in the schools is represented by 6,123 places, 577 places were lost during the year, and 824 gained, the net increase being 247.

New school buildings have been erected as shown hereunder —

(a) Under Supervision of Architect

Schools	Accommodation	Object
Deepwater Public	51	To replace old building
Dundee Public	60	Do
Moore Public	224	Do
Tenterfield Public	326	Do

(b) Under Supervision of Inspector

Schools	Accommodation	Object
Graman Public	25	To replace old building
Nine mile Public	33	New school
Yetman Public	38	To replace old building

At Willow Grove, Redbank, and Dwyer's Homestead, buildings with accommodation in all for 40 pupils, were provided free of cost to the Department.

In addition to the works already enumerated, improvements and repairs have been effected in connection with 27 schools.

Summary

The means of education is within the reach of nearly every group of children sufficient to constitute a school, the accommodation and appointments of the several schools are of a suitable description, the work of the past year may be regarded as a satisfactory standpoint for fresh effort, and there is every reason to regard the teaching staff with confidence. The prospect for 1889 is very encouraging.

Inverell, 12th January, 1889

W BEAVIS,
Assistant Inspector
ANNEX

ANNEX K.

DISTRICT INSPECTOR JAMES M'CREDIE'S REPORT.

THE number of schools and departments on my general list at the close of 1887 was 253, distributed in the three sections of the district as under :—

Class of School,	Central Section.	Eskbank Section.	Forbes Section.	Totals.
Public	58	75	62	195
Provisional	13	24	37
Half-time	4	4	8
House-to-house	4	9	13
Totals	58	96	99	253

The attendance at Coate's Creek Provisional School was so low during the last quarter of 1887, that it was decided to close the school in January last. It was not therefore in operation during last year. Jandra Provisional School was also closed later in the year for the same reason.

The following 14 new schools were opened during the year. :—

Public.—Arramagong, Deep Lead, and Ingliswold.

Provisional.—Broula, German's Hill, Gosper Downs, Hampton, Hollybrook, Lawson, and Remville.

Half-time.—Eualdrie and Torwood.

House-to-house.—Brolgan Tank.

Evening Public.—Mount Macquarie.

The last-mentioned school, Mount Macquarie Evening Public, was closed through lack of support shortly after it was opened.

The Public Schools at Galwary Creek, Cave Creek, and Boree Cabonne, and the Provisional School at Mandagery, were worked during the latter part of the year on the Half-time system.

At the end of 1888, there were 264 schools in operation, the distribution of which is shown hereunder :—

Class of School.	Central Section.	Eskbank Section.	Forbes Section.	Totals.
Public	59	74	62	195
Provisional	2	14	22	38
Half-time	6	10	16
House-to-house	4	11	15
Totals	61	98	105	264

Public Schools have been sanctioned for Lyndhurst and George's Plains, and Provisional Schools for Warrangong, Euabalong, Mickie's Plains, and Wattleville. At Porter's Mount, a Half-time School has been granted, and will be worked in conjunction with Felled Timber Half-time when the necessary buildings are ready for occupation. Reports upon application for Provisional Schools at Genanguy (Rosewood), and Murrin (Windmill Farm), have been furnished, and are now under consideration.

The schools at Cumbijowa, Chatham Valley, Merton (now Neila Creek), and Monica Vale (now Koorawatha), were removed to more central sites. A new brick school building has been sanctioned for Raglan, and action has been taken to secure a larger and more suitable site on Crown land adjacent to the existing school buildings in that locality. At Bumbury, tenders have been accepted for a new school and teacher's residence at a reasonable cost. The school at Lewis Ponds, where a mining township is rapidly springing into existence, was removed to more central leased premises. An excellent site has been selected, and will be resumed if it be found necessary to erect new vested buildings. At East Orange, a suitable site has been chosen and recommended for resumption. The school buildings at South Lead were destroyed by fire in the beginning of the year, and the school was reopened in new premises in October last.

The majority of the new schools established during the year are in the Forbes or Western Section of the district where new settlements are from year to year being formed. Very few additional schools will for some time be required in the Central and Eastern Sections.

Sixteen new school buildings were erected during the year under the supervision of inspectors or local committees; six of these buildings replace old structures. Two school-rooms were enlarged, 67 others were improved and repaired, and 2 new residences and 3 weathersheds were provided.

The cost of the works executed under the inspectors or local supervision is subjoined :—

Cost of new schoolrooms	£1,089 7 0
Cost of repairs and improvements	1,011 18 7
Cost of one residence	57 0 0
Cost of two weathersheds	28 7 6

Total cost..... £2,186 13 1

There are at present seven new buildings in progress; six of these are under the supervision of inspectors, and one under that of the architect.

The educational requirements of the district are well met by existing schools, the sites of which have been chosen with good judgment. The buildings, with few exceptions, are in good repair, suitably furnished, and well supplied with books and teaching appliances. All provide adequate accommodation for the number of children of school age living within 2 miles of each school, and in no single instance to my knowledge is a school-room overcrowded, or in need of enlargement.

At the end of 1887, the State Schools of this district had sufficient accommodation for 15,260 pupils. Through the closing of a few schools and the giving up of old buildings, 275 places have been lost during the year. New and rented buildings and additions have, however, added 738 places, the net gain for the year being 463 places. The total accommodation at the end of 1888 was 15,723 places. The highest enrolment of pupils during any quarter of the year was 13,676, and the highest average attendance for a quarter 9,395.8.

The school records are generally punctually and correctly kept, and neglect to compile and suspend the lesson guides is of rare occurrence. To ensure a closer observance of the programmes, I have directed a number of teachers to copy from the programmes into the lesson registers at the beginning of each week the work to be done during the week in the several subjects of instruction. A teacher who does this can readily ascertain the errors in judgment, if any, made by him in apportioning the work in the several subjects for a quarter, and he can at a glance compare at the end of each day the work actually done with that set down in the programme. He will also, it is hoped, learn to appreciate

appreciate the value and importance of a good programme in conducting the work of his school, and will not regard it, as I fear is done in too many cases, as a document that must be drawn up and suspended in the school-room at the beginning of a quarter, but rarely to be looked at except to ascertain the object lesson for the week.

All school returns are now as a rule correctly compiled and promptly forwarded by teachers, although at the beginning of the year there was a considerable number of defaulters in these respects.

Few schoolrooms when visited were found in a dirty or untidy condition, and in point of cleanliness and neatness of dress, the appearance of the pupils was generally satisfactory. The discipline continues a good feature of the schools. Punctuality is firmly insisted upon, and regularity encouraged by every means in a teacher's power. In governing the pupils, harsh measures are seldom resorted to, and are rarely necessary in schools where the teacher makes good use of his eye and voice, and is uniformly firm and kind.

Some teachers lack patience and the power of self-control—two essentials in an instructor of youth—and, when they are annoyed or irritated by the incorrect answering or work of their pupils, they summarily dispose of the case by caning the offenders. Such persons evidently lose sight of the fact that all youthful minds are not cast in the same mould, and that while in a class a few pupils may be found who have little or no trouble in doing the work required of them, there may be some others who cannot grasp at once the instruction which the teacher desires to impart. To succeed with such slow and dull pupils, a teacher must exercise patience, have a thorough command of temper, and be sympathetic rather than harsh.

The attendance for several months of the year at many schools was very low, in consequence of epidemics of measles and scarlatina. The drought, also, towards the close of the year compelled some parents to keep their children at home to look after the sheep and cattle. The number of children present at inspection was small in a large number of schools through the same causes. At the end of each school quarter, cautions were sent to parents in all cases where no sufficient excuse was offered for their children's short attendance during the preceding six months. Many of these cautions had a salutary effect. At the end of June last, the School Attendance Officers prosecuted defaulters in 146 cases, with the following results:—Convictions, 110; dismissals, 11; withdrawals, 25; fines, £11 18s. 6d.; costs, £22 16s. 10d. The total amount owing for school fees on 31st December, 1887, was £431, the arrears in some cases having accumulated since 1882. The return of school fees in arrear for December last, shows that in 130 schools there are now no arrears, and that the total amount owing in the remaining schools is £100 13s. 9d. The clerical work connected with the recovery or cancellation of the arrears was very heavy, and impeded to some extent the work of inspection. The School Attendance Officers, and the teachers, with one or two exceptions, ably assisted me in reducing the debt by their prompt and careful attention to the instructions given them. One of the School Attendance Officers, Mr. J. Kealy, retired from the Service at the end of the year; and Mr. Cusack, the officer hitherto stationed at Cowra, was transferred to Bathurst. The whole district will in future be worked with Mr. Cusack's assistance.

Statistics of the attendance, compiled from the quarterly and annual returns furnished by the teachers, are appended:—

I.—Quarterly Returns.

School Quarters.	Enrolled.	Average Attendance.	Percentage for 1888.	Percentage for 1887.
March quarter.....	13,676	9,395·8	68·7	64·5
June quarter	13,278	9,032·7	68·2	66·3
September quarter	13,435	8,978·5	67·6	68·0
December quarter	13,319	9,182·9	69·0	70·5

II.—Annual Returns.

	1888.	1887.
Gross enrolment for the year	17,230	16,946
Multiple do do	2,340	2,054
Actual do do	14,890	14,892
Average attendance	9,204·8	9,040·2
Percentage of average attendance in relation to actual enrolment	62	60·1
Fees received	£5,502 3s. 1d.	£5,092 1s.

There were 266 schools open during the whole or a part of the year, and all except two received a regular inspection.

The two uninspected schools were:—

Jandra Provisional.—(No attendance on the day of the inspector's visit).

Mount Macquarie Evening Public.—(In operation only a few weeks).

Ten schools received a second regular inspection, and 55 schools one of the ordinary kind. Exclusive of incidental visits, the total number of inspections, regular and ordinary, was 329.

The efficiency of the schools inspected, and the proficiency of the pupils examined, are exhibited in the following tables:—

I.—Efficiency of Schools Inspected.

Class of School.	Below the Standard.	Up to the Standard.	Above the Standard.	Totals.
Public	18	13	164	195
Provisional	7	5	26	38
Half-time	5	3	8	16
House-to-house	9	2	4	15
Totals	39	23	202	264

The percentage of schools that were up to or exceeded the standard in general efficiency is 85. In 1887, the percentage was 86·8.

II.—Proficiency of Pupils examined.

Subjects.	Number of Pupils Examined.	Percentage up to or above Standard.	Percentages for 1887.
Reading.....	9,572	85	85
Writing.....	9,572	86	90
Arithmetic.....	8,741	71	66
Grammar.....	3,812	75	72
Geography.....	4,007	79	76
History.....	2,942	75	77
Scripture lessons.....	8,499	82	66
Object lessons.....	6,473	83	88
Drawing.....	2,944	81	83
Music.....	7,303	83	64
French.....	83	94	84
Euclid.....	387	83	74
Algebra.....	117	77	85
Mensuration.....	245	68	80
Latin.....	92	76	87
Natural science.....	229	89	85
Needlework.....	3,217	92	89
Drill.....	5,319	86	78

Compared with the results of inspection in 1887, the percentages of passes this year are higher in arithmetic, grammar, geography, scripture, music, French, euclid, natural science, needlework, and Drill. In one subject, reading, the percentage is the same as in the preceding year, and in all remaining branches it is lower. Taking into consideration the number of new schools brought into operation during the year, and the irregularity in the attendance for some months in a large number of schools, the results this year are, on the whole, satisfactory.

The teachers, as a body, maintain their reputation for the faithful and conscientious discharge of their duties, and their willingness and readiness on all occasions to carry out the suggestions and directions given by inspectors.

The pupil-teachers are receiving careful training, and are fully instructed in all specified branches of study. Comparatively few fail to pass the yearly examination.

A Savings Bank has been established in nearly all schools ranking above seventh class, and I feel satisfied that the success or failure of the bank in any school depends mainly upon the interest taken in it by the head teacher and his assistants.

*Summary Remarks.**

During the year, 17 new buildings were erected, and 14 new schools established, 2 schoolrooms were enlarged, 67 buildings were repaired and improved, and 2 residences and 3 weathersheds were provided. In seven localities the new buildings sanctioned are not completed. The discipline is healthy, and the condition of the schools in point of efficiency, is, on the whole, satisfactory. The accommodation provided exceeds the present requirements of the district. Under more favourable conditions, the schools will, it is expected, appear to better advantage in the year now entered upon than in that which has just closed.

JAMES M'CREDIE,
District Inspector.

ANNEX L.

INSPECTOR KEVIN'S REPORT.

I HAVE the honor to submit my report for the year 1888.

I took charge of this section of the Bathurst District on 8th of February, and found on my roll 75 Public Schools, 13 Provisional, 4 Half-time, and 4 House-to-house. This number has been augmented since by the opening of two Provisional Schools—Lawson and Hampton—and the fitful existence of one Evening Public School at Mount Macquarie. The Public Schools at Wheatfield and Dullaberry were changed into Half-time Schools on account of the small attendance. The numbers now on my list stand :—

Public Schools.....	74
Provisional Schools.....	14
Half-time Schools.....	6
House-to-house Schools.....	4
Total.....	98

Buildings.

One new building has been erected during the year at Lawson, while two others—Lyndhurst and Wattleville—are in progress. An application for a Half-time School at Porter's Retreat has been granted, and the school will be worked with Felled Timber so soon as the necessary buildings, &c., have been provided at the former. Lyndhurst and Wattleville are to be Public and Provisional respectively. Thirty-seven schools have been repaired in various ways during the year, and at a total outlay of £1,265 13s. 11d. Nine of these were carried out by the architect, while the remaining 28 were supervised by myself. Two weathersheds have been built, one at Meadow Flat and the other at Mount M'Donald. Residences, fencing, water supply, &c., have received due attention where necessary. Viewed as a whole, the schools are in a good state of repair, and fully meet the requirements of the district.

The highest enrolment for the year was 4,822, while the average daily attendance was 3,182. The total accommodation at the end of the year represents 4,794 places, or an increase of 54 over the previous year. The accommodation is, therefore, ample. The following table gives the enrolment, average daily attendance, and other information for each quarter of the year :—

Quarters.	Enrolment.		Average daily Attendance.		School Fees.	Free Pupils.	
	Boys.	Girls.	Boys.	Girls.		Boys.	Girls.
March.....	2,433	2,389	1,720·3	1,640·3	£ 453 6 6½	136	131
June.....	2,356	2,263	1,595·6	1,538·1	442 10 11	140	137
September.....	2,353	2,267	1,607·1	1,494·8	500 8 6	115	118
December.....	2,335	2,243	1,624·7	1,508·3	506 1 6	120	118

Inspection.

The end of the year showed 74 Public, 14 Provisional, 6 Half-time, 4 House-to-house, and 1 Evening School so far as the annual return goes. All these, except the last (which ceased to exist before it could be visited), were regularly inspected, 10 were reinspected, while 31 underwent an ordinary inspection. In addition, I assisted for a week in the regular inspection of Bathurst Superior Public, and inspected regularly Mount Tarana, Carcoar, and Wattle Grove outside of my own section. My work under this head for the year consists of 110 general or regular inspections (nine reinspections), thirty-two ordinary inspections (including Mount Tarana Public in central section), together with a large number of incidental visits.

Organization.

This continued satisfactory as a whole, and there is little to report beyond what has been said for last year. The buildings are adequate, and generally in good condition. The furniture, is as a rule, of modern pattern and suitable, while the supply of materials is sufficient and in fair order and condition. The records, as a whole, are satisfactory, and the lesson guides drawn with fair skill and intelligence. The circular instructions and duplicates of returns are not, however, always to be promptly found when asked for; the result of want of method and taste. There is one feature of the organization that I cannot allow to pass, as much has been said publicly and privately about fuel allowance and the hardship of withdrawing it. With this I have nothing to do, but what are we to think of a teacher who could see his scholars (some of them mere babies) shivering with cold in the depth of winter while wood lay in heaps all round, and might be had for the trouble of getting and lighting. I regret to say I have had this experience more than once in my inspections. This year I hope it will not be common.

Discipline.

This feature continues to give satisfaction, particularly in schools conducted by trained and experienced teachers. Drill is taught in most schools for a short time each week, and, in the better class, forms a part of the regular school course.

Instruction.

Taken as a whole, this has given satisfaction during the year, though there were some cases in which the schools were found below standard; but a reinspection in five or six months after showed, in almost every instance, a decided improvement. All the prescribed subjects have been taught in most schools, and the teachers and children work earnestly, and on the whole satisfactorily.

In connection with this subject I should be much pleased, if such could be done, to see school libraries established and aided by the Department. They could, I think, be successfully worked thus. When one school has read these books, these could be exchanged with a neighbouring school, and thus we might have a number of small circulating libraries doing an immense amount of good. I think the scheme is practicable, and ought to be encouraged. I make no recommendation, but simply say that it might be worth a trial, as the Savings Bank scheme was.

The following table shows the number of schools inspected in the year and immediately under my supervision, together with their condition, as gauged by the standards of proficiency :—

Class.	Below Standard.	Standard.	Above Standard.	Totals.
Public	5	9	60	74
Provisional	2	1	11	14
Half-time	1	5	6
House-to-house	2	2	4
Evening	Not inspected—closed before date.			98

The number of schools up to or above the standard must be regarded as satisfactory, especially when it is borne in mind that the attendance for a considerable time was irregular, on account of epidemic complaints—measles, &c. Many schools had but a small attendance on the day of inspection, owing to this.

The teachers of this section are, as a body, intelligent, conscientious, and of good character. The pupil-teachers give satisfaction.

Summary.

1. The means of education are ample, well distributed, and of a good kind.
2. The organization continues satisfactory, and the discipline may be viewed in the same light.
3. The instruction has been steady, earnest, and progressive, while the teachers, as a whole, have performed their duties faithfully and efficiently, and continue to hold the respect due to their responsible and delicate office.

South Bowenfels,
31st December, 1888.

JOHN KEVIN,
Inspector.

ANNEX M.

ASSISTANT INSPECTOR THOMAS' REPORT.

I.—*The Adequacy of the means of Education as regards Amount and Distribution.*

At the close of 1887 there were, in this section of the district, 99 schools, classified as follows :—

Public	62
Provisional	24
Half-time.....	4
House-to-house	9

Of these, one—Coates' Creek Provisional—did not reopen, and another—Marsden Provisional—reopened as a Public School.

Thus, there were, at the beginning of the present year, 98 schools under my supervision, viz. :—

Public	63
Provisional	22
Half-time.....	4
House-to-house	9

During the year the following schools have been established in localities previously without means of education :—

- 2 Public Schools (Aramagong and Deep Lead).
- 3 Provisional Schools (Broula, German's Hill, and Gosper's Downs).
- 2 Half-time Schools (Eualdrie and Torwood).
- 1 House-to-house School (Brolgan Tank).

One school—Iandra Provisional—was closed through small attendance.

Several changes were made in the classification of schools, in consequence of increased or diminished attendance.

The year closes with 105 schools in operation, viz. :—

Public	62
Provisional	22
Half-time.....	10
House-to-house	11

Steps have been taken to establish Provisional Schools at Warrangong, Euabalong, and Mickie's Plains, and it is expected that all three will open immediately after the Christmas vacation. The establishment of a Provisional School at Genanaguy is under consideration.

The schools already established, with those about to open, will very fairly meet the requirements of the district as at present settled. Land is, however, being rapidly selected and cut up into small holdings in certain parts of the district, and as soon as settlers erect their homesteads and bring their families on to the land, applications for new schools may be expected.

II.—Actual condition of Schools as elicited by Inspection.

Of the 106 schools open during the year, or any part of it, 105 were fully inspected, and 2,945 pupils were examined, as against 2,665 in 1887, an increase of 280. The school uninspected was Jandra Provisional, no children being in attendance on the day of my visit. It has since been permanently closed. As special work in outlying portions of my section had interfered with the ordinary work of inspection, 7 of my schools were inspected by the District Inspector, and one by Mr. Inspector Kevin. Three schools received a second full inspection, 8 received an ordinary inspection, and incidental visits were paid to a considerable number.

The condition of the schools in regard to general efficiency will be seen on reference to the subjoined :—

Class of School.	Below Standard.	Up to Standard.	Above Standard.	Total.	Percentage up to and above Standard.
Public	9	3	50	62	85.5
Provisional	5	3	14	22	77.2
Half-time	5	2	3	10	50.0
House-to-house	7	2	2	11	36.0
Total	26	10	69	105	75.2

Comparing the results with those of last year :—

Year.	Total No. of Schools inspected.	No. up to and above Standard.	Percentage.	Result of Comparison.
1887	101	82	81.1	Decrease of 5.9 per cent.
1888	105	79	75.2	

As accounting for the falling off in the percentage of schools satisfying the standard, it must be mentioned that no school under my supervision was considered fully organized, and therefore up to the standard, unless there were three classes under instruction. Few Half-time or House-to-house Schools had more than two classes. It will be seen that the efficiency of the full time schools, Public and Provisional, is over 83 per cent. The prevalence of measles and scarlatina in some localities had an injurious effect on the general proficiency of such schools.

Looking at the attainments of the pupils, subject by subject, it will be seen that an all-round improvement has been made on the percentages of 1887.

The following table will give the percentages of passes for 1887 and 1888 :—

Subject.	1887.	1888.	Result.
Reading	75.4	84.8	Increase of 9.4 per cent.
Writing	78.3	83.2	" 9.9 "
Arithmetic	44.3	70.9	" 26.6 "
Grammar	42.0	86.5	" 44.5 "
Geography.....	60.0	83.8	" 23.8 "
History	76.9	77.7	" 0.8 "
Scripture	59.8	86.2	" 26.4 "
Object Lessons.....	72.8	89.9	" 17.1 "
Drawing	62.6	85.1	" 22.5 "
Music.....	48.6	79.5	" 30.9 "
French	71.4	100.0	" 28.6 "
Euclid	59.7	92.9	" 33.2 "
Algebra	0.0	86.3	" 86.3 "
Mensuration.....	60.0	72.8	" 12.8 "
Latin	60.0	100.0	" 40.0 "
Natural science	64.5	97.4	" 32.9 "
Needlework	78.2	97.7	" 19.5 "
Drill	39.3	85.5	" 46.2 "

III.—Organization.

All the more important centres of population are provided with good buildings, but in some instances Public Schools are conducted in buildings originally erected for Provisional Schools. In such cases the accommodation is barely sufficient. Some schools are not provided with ceilings, and there being nothing between the iron roof and the pupils' heads, the heat in the summer is intense.

During the late extraordinarily dry season, complaints as to the want of water have been numerous. As a rule, however, nearly every Public School, and several Provisional Schools, have a water supply sufficient for ordinary seasons.

The schools are generally well supplied with furniture, books, and apparatus. The records are, on the whole, well kept. The instruction is regulated by properly constructed time-tables and programmes, and the classification of the pupils is based on sound lines.

School

School Savings Banks have been inaugurated in all the large schools in my section, and have become very popular institutions.

IV.—Discipline.

During the year only one complaint of using undue severity was lodged against a teacher, and it broke down upon investigation. The pupils are easily governed, and where only ordinary tact and judgment are displayed in dealing with them, the school work runs smoothly, and severe measures are rarely necessary. In many of the smaller schools too little attention is paid to military drill, and the ordinary school movements are not properly regulated.

V.—Teaching Staff.

Seven Public Schools are in charge of unclassified teachers, but four of these are paid at Provisional School rates, as the average attendance is below twenty.

Two Public Schools are in charge of teachers holding a lower classification than is required by the Regulations.

Eight Half-time Schools are under unclassified teachers.

All schools of Class VI and upwards are staffed in accordance with the Regulations, with the exception of Condobolin Public, where a vacancy for a pupil-teacher exists.

The teachers are classified as follows:—

	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Unclassified.	Work-mistress.	I.	II.	III.	IV.	Probationer.	Total.
Teachers in charge	6	9	24	10	9	42	100
Assistants	1	2	3
Work-mistress	1	1
Pupil-teachers	2	7	2	2	1	14

During the year one teacher was dismissed for falsifying the records of his school, and another for drunkenness. Complaints against teachers have been very rare. On the contrary, there are few teachers in the district who are not earnest, steady, industrious, and deserving of that support and encouragement which they should receive from parents who rightly estimate the difficulties a teacher often labours under, and the good he may achieve if backed up by efficient parental control.

Examinations are held in June and December of those teachers who desired to obtain classification or promotion.

All pupil-teachers in the district were, with one exception, examined, and in most cases they succeeded in gaining promotion.

VI.—Accommodation.

During the year school-buildings were erected under my supervision at Aramagong, Deep Lead, Broula, German's Hill, and Gosper's Downs. No schools had previously been in existence at any of these places.

The following buildings were erected under my supervision, to take the place of non-vested premises:—Murga, provisional; Bungerringong, provisional; Ten-mile Ridges, provisional; Kadina, provisional.

A building was erected, under local supervision, at Tomanbil, to take the place of a rented building.

A new school building was erected at Koorawatha, to take the place of the Monica Vale Public School, the latter site not being centrally situated. The old Monica Vale buildings have been removed to serve as a Provisional School building at Warrangong.

The South Lead Public School, which was burnt down early in the year, has been rebuilt under my supervision.

The buildings at Merton have been removed to a more central site.

Additional accommodation has been provided, under the supervision of the architect, at Toogong and Canowindra Public Schools.

Repairs and improvements (fencing, water supply, &c.), were effected at 22 schools.

New residences were provided at Cocomingla and at Toogong, the old residence at the latter school being converted into a weather-shed.

Tenders have been accepted for the erection of a schoolroom and attached residence at Bumbury, in lieu of non-vested premises and of Provisional School buildings at Euabalong, Mickie's Plains, and Warrangong. Notice of the completion of the latter has just come to hand.

Several minor repairs are in progress at various schools.

The school buildings, residences, &c.; are now in general good order, and should call for little outlay in the way of repairs during the coming year.

The subjoined will show the enrolment, average attendance, and accommodation provided:—

No. of pupils enrolled during December quarter, 1888	4,072
Average attendance	2,806
Highest quarterly average during 1888	2,816
Seats provided at close of 1887	4,870
Seats lost during year	275
Seats gained during year	616

Net gain	341
Seats provided at close of 1888	5,211

VII.—Summary.

105 schools, with an enrolment of 4,072, an average attendance of 2,806, and employing 118 teachers and pupil-teachers, are in operation.

All were fully inspected during the year.

The proficiency of the pupils has materially improved during the year.

The schools are well organized, and in good repair.

The educational requirements of the district are very well satisfied.

Forbes, 29th December, 1888.

W. GEO. THOMAS,
Assistant Inspector.

ANNEX N.

DISTRICT INSPECTOR W. DWYER'S REPORT.

At the close of 1887, there were 356 schools in operation, and at the end of last year the number was 370, being an increase of 14. They are distributed in the following classes :—

Public.....	221	with	228	departments.
Provisional	52	„	52	„
Half-time	76	„	76	„
House-to-house...	14	„	14	„
Total	363	„	370	„

Of these 348 were open the whole year; 367 were fully inspected; 115 were inspected twice; and 3 were not inspected, owing to the fact that two—a Provisional and a Half-time—were, through want of attendance, closed early in the year; and 1, a House-to-house School, was not opened until 10th December.

At the end of 1887, the accommodation available was equal to 17,226 places, for an enrolment of 15,228 pupils. During 1888, 403 additional places were provided, making the school space at its close equal to 17,629 places for 17,410 pupils. This extra room was secured by the erection of 14 new schools, under the supervision of inspectors and committees, and by the leasing of 4; 12 are in new localities and 6 are intended to replace old buildings. The accommodation, as a whole, is abundant, suitable, and properly distributed; and, for the year now entered upon, about 270 places more are, by the completion of Goulburn Superior Girls' new school, ready for occupation.

The number of pupils examined in 1887 was 9,718; last year it was 10,471.

The efficiency of the schools may be understood from the following statements :—

	Below Standard.	Up to Standard.	Above Standard.	Total.
Public Schools—				
Open a full year at inspection	63	52	111	226
Not „ „	2	2
Provisional Schools—				
Open a full year at inspection	12	12	17	41
Not „ „	6	2	2	10
Half-time Schools—				
Open a full year at inspection	13	20	35	68
Not „ „	6	1	7
House-to-house Schools—				
Open a full year at inspection	3	3	7	13
Not „ „
Totals	105	90	172	367

Of the schools open the whole year (348) the efficiency may be stated as follows :—

Below standard.....	26 per cent.
Up to and above standard	74 „

Subjects.	No. of Pupils examined.	Percentage up to and above Standard.
Reading	10,471	87
Writing	10,350	90
Arithmetic.....	9,667	62
Grammar	3,736	62
Geography.....	3,868	69
English history	3,547	50
Australian history	1,547	67
Scripture Lessons.....	9,269	70
Object lessons	6,679	74
Drawing.....	2,812	63
Vocal music	6,868	75
French	62	88
Euclid.....	375	77
Algebra	75	66
Mensuration	252	45
Latin	26	69
Natural science.....	58	95
Needlework	3,022	92
Drill	7,881	78

These results may be regarded as in the aggregate, fully satisfying the strict requirements of the standard; but the defects noticed last year in reading, grammar, and arithmetic still continue rather prominent features in the character of most of the schools under review.

Examinations are directed as far as practicable to expose and correct these faults; but one visit in the year is scarcely sufficient to enable an inspector to do this work well, and opportunities for more frequent visits are, owing to the pressure of other duties, very few.

The figures above quoted indicate that the schools of this district are in a state of reasonable efficiency, and the future prospects of the majority are fairly hopeful and encouraging.

The reports of the inspectors acting with me are forwarded herewith, together with all statistical information not already despatched.

Goulburn, 12th January, 1889.

WM. DWYER,
District Inspector.

ANNEX O.

INSPECTOR MURRAY'S REPORT.

At the beginning of the year there were in operation, under my supervision, 51 Public Schools, 1 Provisional, 6 Half-time, and 7 House-to-house Schools. In the course of the year new Public Schools were established at Mount Costigan and Cordillera, and a Half-time School at Balmoral. The Myrtleville school was closed, by reason of small attendance, and the change from one class to another, of some of the schools, owing to an increase or decrease in attendance, leaves now, at the close of the year, 54 Public Schools, 13 Provisional, 18 Half-time, and 5 House-to-house Schools.

School Buildings.

During the year new school-rooms have been erected at Burwood, near Binda, Manchester Square, Mount Costigan, Irishtown, and Balmoral. School buildings, including teacher's residence will shortly be completed at Tuena, and school-rooms are about being built at Bowral. The school buildings at ten places have been repaired and improved, and steps are being taken for the repair, enlargement, and improvement of nine other school buildings.

At the close of the year 1887 there was accommodation for 3,726 pupils. With the new school-rooms provided during the year, there is now accommodation for 3,901 scholars, being an increase of 175 seats. The total enrolment is 3,289; there is thus ample accommodation provided for all the educable children in the district, and it is properly distributed. There is but one school in the district, which is crowded, and it will soon be replaced by a new and sufficiently large building. As a whole, the schools are well found in necessary teaching appliances.

Inspection.

Every school in the district, in operation for the whole or any part of the year, received one regular or general inspection, except the Half-time school at Myrtleville, which, through small attendance, was closed early in the year, before arrangements could be made for visiting that locality. Seventeen of the schools received an ordinary or second inspection, and several received from one to four incidental inspections, as opportunity offered. The results of inspection show that 8 schools were below the standard, 7 were up to the standard, and 76 schools were above the standard.

Estimated proficiency of the pupils in all schools.

Subjects.	Estimated proficiency.				
	Above Standard.	Up to Standard (50 per cent. of possible marks).	Below Standard.	Total examined.	Percentage up to or above Standard.

Music.....	687	718	414	1,819	77·2
French.....	28	28	100·
Euclid.....	28	28	6	62	90·3
Algebra.....	16	16	100·
Mensuration.....	21	10	19	50	42·
Needlework.....	583	133	50	766	93·4
Drill.....	1,267	603	669	2,539	73·2

This table shows that the efficiency of the schools, as a whole has been well maintained.

Teachers.

During the year many of the teachers have been examined, with a view to obtain or raise classification. As a body, they are correct in their habits, honest, and earnest in their work, and esteemed by the people.

Summary.

Summary.

1. The means of education are sufficient and properly distributed.
2. The schools as a whole are improving.
3. The supply of teachers is sufficient.
4. The inspection has been thorough and searching, and the supervision as complete as circumstances permitted.
5. Reasonable progress has been made, and the educational outlook is hopeful.

J. H. MURRAY,
Inspector.

Inspector's Office, Mittagong, 29th December, 1888.

ANNEX P.

INSPECTOR WILLIS' REPORT.

THIS portion of the Goulburn District was put under my supervision last January, and I commenced duty in it on the 10th of the following month.

There were 92 schools in this section at the close of last year, and they were classified thus :—

Public	44		Half-time	28
Provisional	15		House-to-house	5

Since last January new Half-time Schools have been established at Shallow Crossing, Cullendulla, Ryrie Creek, and Werriwa, and a new Provisional School has been established at Woodfield. Not only has the number of the schools been altered, but many changes have been effected amongst them by making alterations in their classification. The Public Schools at Carwoola, Currawan, and Meroo Flat have been converted to the rank of Half-time, as also the Provisional Schools at Foxlow and Hillydye, and the House-to-house Schools at Reedy Creek and Binanderah. The Jerrabatgulla School, formerly Provisional, is now classed as House-to-house; and the Currockbilly School has been converted from Half-time to the rank of Provisional. These alterations in the number and classification of the schools during the year now closing may be summarized thus :—

Schools existing at the beginning of the year	92
School closed during the year	1
Schools converted from Provisional to Half-time	2
" " Provisional to House	1
" " Public to Half-time	3
" " Half-time to Provisional	2
" " House to Half-time	2
Opened as new schools	5
Total schools in operation during the year	97
Total schools in operation at close of the year	96
Conversion from Public to Superior Public	1

The only school closed during the year was the Half-time at New Line West.

It is necessary here to remark that the Binanderah House School has been converted into *two* Half-time Schools, under the names of Binanderah and Durras Lake.

The 96 schools now in operation are classified thus :—

Public	41
Provisional	14
Half-time	36
House-to-house	5

Several of these are about to be closed owing to the paucity of attendance, notably Creekborough, Provisional; Araluen Upper, Provisional; and Black Creek, Provisional. These will cease to exist as soon as the teachers in charge can be employed elsewhere.

Applications for the establishment of new schools at the following places have been received and dealt with :—

Public	At Wagonga and Half-way Creek.
Provisional	At Woodfield and Urila.
Half-time	At Shallow Crossing, Ryrie Creek, Cullendulla, Werriwa.
House-to-house	At Booth's Creek and Barnes' Creek.

The applications from the settlers at Half-way Creek and Urila were refused by the Minister, the others granted, and at Shallow Crossing, Cullendulla, Werriwa, Ryrie Creek, and Woodfield, the schools asked for are now open.

In addition to the applications above referred to three, lately to hand, are now awaiting inquiry and report.

These applications are from residents at East Lynne, Stony Pinch, and Jingera, requesting the establishment of Half-time Schools in these localities.

Viewed collectively, the material condition of the schools is fairly satisfactory, and is being rapidly improved.

New buildings have been erected by the Department at Thornhurst and Woodfield, and at Wagonga a new one, now in course of erection, is nearly fit for occupation.

Fourteen schools have been repaired this year, and extensive improvements to the school premises at Bodalla and Braidwood have been sanctioned, and are about to be executed. It has also been decided to replace with new ones the old buildings now in use at Major's Creek and Captain's Flat, and arrangements are being made to do this.

The accommodation afforded by the existing school buildings is, in the aggregate, more than sufficient for present requirements, and is well distributed.

Information concerning the accommodation provided is subjoined :—

Places provided at end of 1887	3,016
" added during 1888	116
" lost	63
Total places gained in 1888	53
" now provided	3,069
Average attendance for 1888	2,097
Ordinary attendance	2,300

Thus it is evident that ample accommodation is afforded by the existing school buildings.

The schools for the most part are suitably furnished, and though much of the furniture is roughly constructed the greater part of it is in serviceable condition.

The school-rooms are kept very clean by most of the teachers, and nearly all the rooms present a neat, well ordered appearance.

Many of the school grounds, though securely fenced, are destitute of trees and flowers—a serious defect in the material condition of their schools that teachers should set themselves the task of remedying without further delay.

The tall trees and tastefully arranged flower-beds on the school grounds at Braidwood and Major's Creek, and the "Willow Avenue," in the Jembaicumbene playground, show how successful those teachers can be who make an effort to effect the twofold object of beautifying the premises, and of adding at the same time to the out-door comfort and amusement of the pupils. The

The other branches of school organization must be briefly referred to.

In a large number of schools the attendance records in use were found to be of obsolete type; they have been since set aside for the substitution of new ones of modern style.

The lesson documents are, with a few excellent exceptions, defectively compiled, and are not strictly followed.

All things considered the schools generally may be regarded as fairly organized.

The pupils present at inspection were tidily dressed and clean, and all but a very small percentage of them were orderly and attentive.

The government, in the majority of the schools, is vigilant, firm, and effective, and the moral tone obtaining amongst the pupils is for the most part satisfactory.

Drill is well taught in nearly all the larger schools and a few of the smaller ones. The subject has, however, been neglected by many of the teachers. If such had not been the case there would have been at least 500 more under instruction in drill than the number entered in this report.

The pupils have attended school more regularly this year than last, as may be seen by the following statement:—

	Enrolment.	Average.
For 1887.....	3,803	2,027
For 1888.....	3,375	2,095

Thus the average attendance for this year exceeds that of last year, though the actual enrolment for the current year is less by nearly 500 pupils than the enrolment for 1887.

The gross enrolment for this year has been 3,695. The ordinary attendance about 2,300 pupils.

All the schools of this section have been fully inspected, and 13 of those below the standard were re-inspected. 47 schools received an ordinary inspection, and 30 were incidentally visited.

The inspectorial work for the year may, therefore, be summarized thus:—

Regular inspections	97
Regular re-inspections	13
Ordinary inspections.....	47
Incidental visits.....	30

In addition to this work, 9 of the schools on the Manning River received an ordinary inspection from me in January last.

The efficiency of the schools, as disclosed by inspection, is set forth in the following table:—

Classes of schools.	Below Standard.	Up to Standard.	Above Standard.	Total.
Public.....	5	9	27	44
Provisional	5	4	5	14
Half-time	6	12	19	37
House-to-house	1	1	3	5
Totals.....	17	26	54	97

These results do not bear favourable comparison with those recorded for last year, as may be seen, thus:—

	1887.	1888.
Schools below the standard	10	17
Schools up to the standard	7	26
Schools above the standard.....	75	54

This comparison would have been still less favourable to this year's work, but for the fact that 11 of the 13 schools re-inspected succeeded at my second visit in reaching or exceeding standard requirements.

The number of pupils examined during the year, and the proportion that showed themselves up to or above the standard in each subject, are given in the following table:—

	Pupils.	1887.	1888.
Reading	2,195	83·9 per cent. ...	89 per cent.
Writing	2,195	88·7 "	90 "
Arithmetic	1,907	85·6 "	65 "
Grammar.....	891	72·1 "	66 "
Geography	891	83·5 "	63 "
English history	689	75·5 "	43 "
Australian history	333	91·5 "	45 "
Scripture.....	2,010	72·1 "	69 "
Object lessons	1,397	74·5 "	84 "
Drawing	681	74·1 "	65 "
Music	1,432	72·6 "	69 "
Euclid	115	78·2 "	90 "
Mensuration	139	70·4 "	54 "
Needlework	740	92·3 "	96 "
Drill.....	924	83·9 "	91 "

In reading, the majority of the pupils examined satisfied the standard.

A still larger percentage of passes in writing would have been gained if the advanced pupils in several of the schools had shown better work in ornamental penmanship.

The results obtained for arithmetic would have been higher than those recorded if the teachers generally had devoted more of the pupils' time to the study of notation tables and mental arithmetic.

Excepting in one or two of the small schools, and about half of the larger ones, grammar is not skilfully taught. Most of the pupils had an indifferent knowledge of analysis; etymology, and syntax were found to be very weak branches, and composition was mechanically and ineffectively taught by very many of the teachers.

The award of marks for geography is far below that of last year, a result due in great measure to the fact that a considerable number of teachers omitted to give instruction to their advanced pupils in physical geography and mapping.

History (both English and Australian) is a subject that very few of the teachers have this year gained high marks for. I do not expect any improvement in the handling of this attractive subject till at least half the teachers become themselves better acquainted with it. All the classes that passed creditably in history were in charge of teachers who themselves were proficient in the subject.

Scripture is taught intelligently in most schools, but a number of teachers have omitted moral lessons from the course of instruction prescribed for the junior classes.

Next year I propose giving the names of the schools that have severally gained the highest mark awarded in this section for proficiency in all or any one of the subjects taught. The

The schools that gained, this year, the highest marks for general efficiency were the under-mentioned :—

Public.—Braidwood Superior, Araluen, Captain's Flat, Moruya, Araluen West, Bungendore, Queanbeyan, Major's Creek, Nerrigundah, Eurobodalla, and Brook's Creek.

Provisional.—Creekborough, Meangora, Thornhurst.

Half-time.—Back Creek, Durran Durra, Jinden, Gundillion, Nithsdale, Anembo, Monkittie.

House-to-house.—Currawan, Snaphook.

Savings' Banks are in operation at Queanbeyan Public, Bungendore Public, Braidwood Superior Public, Major's Creek Public, Araluen Public, and Moruya Public, and they are being conducted with success.

In the schools under my supervision there are 78 teachers, 3 assistants, and 9 pupil-teachers. These are classified as shown in the following table :—

Office.	Class I.	Class II A.	Class II B.	Class III.			Probationers.	Total.
				A.	B.	C.		
Teachers	0	4	4	11	17	9	33	78
Assistants	0	0	0	2	1	0	0	3
	Class I.	Class II.	Class III.	Class IV.				
Pupil-teachers	2	0	4	3	0	0	0	9

Of the 33 Probationers, 19 are in charge of Provisional and House-to-house Schools, for the conduct of which classified teachers are not required. The other 14 probationers are in charge of such small Half-time and Public Schools that salaries at Provisional School rates only are paid them.

The teachers are persons of good moral character, and they have the respect of the communities amongst whom they labour.

The pupil-teachers are studious, attentive to duty, and fairly efficient. All of them are regularly and efficiently instructed, and all have this year been favourably reported upon by their inspector and their teachers.

The defects existing in the general management of their schools have been brought prominently under the notice of the teachers concerned, all of whom have promised to make every effort to put their schools into a thoroughly efficient state. Already 11 teachers have succeeded in raising considerably the status of their schools, and this gives ground for the hope that all others will do the same, and that the results to be obtained by inspection next year will be a great improvement upon those recorded for the year that closes to-day.

M. WILLIS,
Inspector.

Braidwood, 31st December, 1888.

ANNEX Q.

ASSISTANT INSPECTOR SKILLMAN'S REPORT.

I HAVE the honor to submit my General Report for 1888.

At the end of 1887 there were in this section of the Goulburn District 84 Public, 18 Provisional, 14 Half-time, and 3 House-to-house Schools, making a total of 119.

During 1888 new Provisional Schools have been established at Greig's Flat, Stony Batter, Thubergal Lake, Wellesley, and White's Point, and a House-to-house School at Boggy Plain.

Three Provisional Schools (Beresford, Pericoe, and Wallaga Lake) have been raised to the rank of Public.

Avoca and Sam's Corner, Provisional, Eaglehawk and Hembsy, Public, and Hayden's Flat, House-to-house Schools, have been converted into Half-time.

Cubmurra Provisional, and Corrowong Lower Half-time, have been closed.

The number of schools now under my charge is 123, comprising :—

85 Public.
17 Provisional.
18 Half-time.
3 House to-house.

Total... 123

Six applications for the establishment of new schools have been received and reported on during the year.

A list of the localities is given below :—

Place.	Result of Inquiry.
Bobundarah	Under consideration.
Boggy Plain	House-to-house granted.
Crackemback.....	Provisional, granted conditionally.
Pleasant View	Half-time promised.
Thubergal Lake	Provisional granted.
White's Point	" "

A proposal has also been made to open an Evening Public School at Arable, but at present it is doubtful whether the requisite attendance could be maintained.

School Buildings.

During 1888 six new school buildings have been erected at a cost of £373, under my own or local supervision. Two of these replaced old structures, and four were built where no school previously existed.

Two buildings at Wellesley and Boggy Plain have been provided for school purposes rent free by the residents.

At the beginning of the year the number of pupils that could be accommodated in the schools of this district was 6,960.

By the new buildings referred to above, accommodation for 187 children is provided.

Places for 61 pupils have been lost by the closing of schools and giving up old buildings.

123 extra places have therefore been supplied, so that existing schools contain sufficient space for 7,086 pupils.

In addition, authority has been given for the erection of class-rooms at Adaminaby and Brown Mountain, and the school-room at Angledale is being lengthened. These extensions will accommodate 75 more children.

During

During the year the architect has effected considerable improvement to the school buildings and residences at Cathcart, Eden, Merimbula, and Rocky Hall, while the sum of £320 ls. 7d. has been expended under my supervision in executing necessary repairs, &c., at 19 other schools.

A teacher's residence is in course of erection at Quaama.

Attendance.

In all 125 schools have been in operation during 1888, 115 being in existence for the whole year and 10 for only a portion thereof.

The total enrolment of pupils has been 5,443, and the average attendance for the year, 3,046·3.

In 1887 the numbers were 5,622 and 2,974·9 respectively.

The average attendance for the four quarters was as follows:—

[The numbers for 1887 are also given for the purpose of comparison.]

Quarter.	Average attendance.						Total enrolment.		Percentage.	
	Boys.		Girls.		Total.		1887.	1888.	1887.	1888.
	1887.	1888.	1887.	1888.	1887.	1888.				
March	1,542·7	1,509·3	1,347·6	1,368·9	2,890·1	2,878·2	4,413	4,210	65·7	68·3
June	1,598·1	1,613·4	1,368·8	1,465·4	2,958·9	3,078·8	4,404	4,248	67·1	72·4
September ...	1,612·9	1,619·4	1,372·7	1,427·9	2,985·6	3,047·3	4,393	4,322	67·9	70·5
December	1,572·5	1,590·8	1,396·6	1,415·9	2,969·1	3,006·7	4,359	4,285	65·8	70·1

These figures show that, although the enrolment of pupils has not increased in 1888, the attendance has been decidedly better, a proof of an improvement as regards regularity.

It must be remembered, however, that the year has been extraordinarily dry, and little interruption in the attendance of school children has been caused by rain.

The number of pupils present at examination was 3,359.

School Fees.

The school fees collected during the year amounted to £1,673 16s. 6d., or £120 more than the sum received in 1887.

Inspection.

Of the 125 schools in operation during 1888, 123 received a regular inspection and 27 an ordinary inspection. In addition, 4 schools were fully inspected a second time.

The two schools not inspected at all were Cubmurra (Provisional), and Boggy Plain (House-to-house). The former was closed early in February, and the latter was not opened before 10th December.

Organization.

The material condition of the school buildings in this district is being gradually improved, and many are in an excellent state in this respect.

In some thinly peopled localities the school-rooms are very poor structures, but the prospects of the maintenance of the schools are not sufficiently good to warrant the erection of expensive buildings.

In most instances ample accommodation is provided. A few schools are over crowded, but steps are being taken to provide additional room in those cases where an attendance too great for the size of the building is likely to be maintained.

The teachers generally take due care of the school buildings and property, and keep the premises in a neat and tidy state. There are, unfortunately, a few exceptions where teachers allow paper and litter to lie on the play-ground, and either neglect the daily sweeping and dusting of the rooms, or have it performed in such a careless manner as to be of little use.

In nearly every case the school records are kept correctly and regularly, but negligence is still shown by too many teachers in compiling returns.

Discipline.

The discipline maintained in the schools is satisfactory. An improvement is being made as regards regularity and punctuality. The children generally are clean, neat, and well behaved. The government is firm, and there are very few cases where harshness prevails.

A fair amount of drill is taught by those teachers who have a knowledge of the subject.

At Cooma a cadet corps, whose drill reflects credit on the master, is in existence.

Attainments.

The following table shows the condition of the schools in relation to the standard for the years 1887 and 1888:—

Schools.	Below Standard.		Up to Standard.		Above Standard.	
	1887.	1888.	1887.	1888.	1887.	1888.
Public	36	30	28	27	20	28
Provisional	13	9	4	6	1	2
Half-Time	11	10	1	8	3	1
House-to-House	1	1	2	1
All	61	50	35	42	24	31

It will be seen that while in 1887 only 59 schools, or not quite 50 per cent., reached the standard in 1888; 73 schools, or more than 59 per cent. secured the requisite minimum of marks. The proportion is still low, but it is gratifying to be able to report improvement.

The number of pupils examined, and the percentage of those who reached the standard are shown hereunder :—

Subjects.	Number of Pupils examined.	Percentage of those who reached the Standard.	Subjects.	Number of Pupils examined.	Percentage of those who reached the Standard.
Reading	3,359	85·6	Music	2,066	70·9
Writing.....	3,359	87·0	French.....	18	61·1
Arithmetic	3,359	57·4	Euclid.....	119	54·6
Grammar	1,269	64·3	Algebra	35	51·4
Geography	1,323	71·8	Mensuration	14	50·0
History—English	922	63·4	Latin	10	20·0
Australian	579	80·3	Natural science	9	66·6
Scripture	3,317	68·9	Needlework	978	83·6
Object lessons	2,133	79·1	Drill.....	2,222	72·6
Drawing	914	62·5			

At the public examinations held in October, five pupils from the Cooma Public School creditably passed the Junior University Examinations. It is to be hoped that the teachers in some of the other schools in this district will put forth a little more energy and effort and produce similar results.

Savings Banks.

Savings banks exist in connection with the schools at Bega, Bombala, Candelo, Cobargo, and Eden. During the year 1888 the sum of £79 3s. 3d. was deposited in these banks by 249 children.

Teachers.

The number and the classification of the teachers and pupil-teachers employed in this district are as stated below :—

Class II—A	11
" II—B	10
" III—A	21
" III—B	24
" III—C	13
Unclassed	39
Total	118

Pupil-teachers :—

Class 1	—
" 2	5
" 3	7
" 4	2
Total	14

The number of unclassified teachers here is, I am thankful to say, gradually decreasing, though still about one-third hold no certificates.

Speaking of the teachers as a whole, their conduct, habits, and work are satisfactory. Most of them have a due conception of the importance of their office, and are carefully attentive to duty.

A few, I regret to say, perform their work perfunctorily. As a matter of course, their schools are not successful.

One teacher was dismissed from the Service during 1888 for wilful falsification of the records, and similar conduct of another is under consideration. These, however, are rare instances.

The pupil-teachers under my supervision are working well. Not one failed to gain promotion at the annual examination.

Summary.

The number of schools in the district has increased by four during 1888.

Improvement in the material condition of the schools has been effected by the erection of new buildings and the repair of others.

Sufficient accommodation for the total enrolment is provided.

The pupils have attended with more regularity throughout the year.

The organization generally is satisfactory, and the discipline maintains its good character.

Better results with regard to attainments have been secured, and it is hoped that further improvement will be made in 1889.

H. SKILLMAN,
Assistant Inspector.

ANNEX R.

DISTRICT-INSPECTOR LOBBAN'S REPORT.

THE Grafton District was placed under my supervision early in February, the inspectors associated with me being Mr. Nolan, successor to Mr. Willis, stationed at Port Macquarie, and Mr. M'Lelland, stationed at Lismore. As far as practicable, the programme of my predecessor, Mr. M'Credie, was followed.

At the end of 1887 there were 229 schools in the district; 2 of these were not opened in 1888; 15 new schools were established during the year; but 4 schools were permanently closed within the same period. Thus there were 242 schools to inspect in 1888, and 238 in existence at its close.

The establishment of new schools at Bellenger Heads, Cooper's Creek, Green Hills, Hanging Rock, Warrell Creek, and Wooran has been authorized, and Evening Schools at North Creek and Simpson's Ridge will be opened at once.

School sites were selected at Bellenger Heads, Boggumbil, Buccarumbi, Cumbalum, Cowlong, Dondingalong, Lavadia, Warrell Creek, and Wooroolgan.

The schools are, in most cases, centrally situated, and the buildings, with few exceptions, are substantial, well designed, and properly furnished. Most of them afford more than adequate accommodation, but a few require enlargement, and steps have already been taken to meet such cases. Some of the smaller structures are ill designed, and of inferior character generally. During the year 16 school buildings, 5 weathersheds, and 9 residences were erected; while 9 school buildings were enlarged, and 91 repaired and improved. The ravages of white ants have been considerable; but in all the more recently erected buildings, measures have been successfully adopted to prevent their encroachment.

At the close of 1887 seats had been provided for 12,746 pupils; but at the end of 1888 places were available for 13,150 scholars. When the authorized additions are completed there will be ample accommodation in every school in the district.

The

The attendance throughout the year was, on the whole, very fairly satisfactory; although the vacations connected with the Centennial celebrations, and the prevalence of epidemic sickness reduced the average considerably. About 73 per cent. of those enrolled attended seventy days or more during the first half of the year, and 74 per cent. during the latter half.

No serious interruption to the work of inspection occurred, although each inspector had, at different times, to depart from the authorized programme to inquire into and report upon special matters of importance as they occurred. Of the 242 schools in operation during some portion of the year all, except one, received a regular or general inspection. Some schools received a second regular inspection, and 113 ordinary inspections were made. The Wyrallah Evening Public School, which existed but a short time after its establishment, collapsed before an inspector could visit it. The results of inspection are fairly satisfactory. There were 59 schools below, 16 up to, and 166 above the standard. Of those below standard, 20 are Provisional Schools and 11 Half-time Schools. Of the Public Schools, 84½ per cent. satisfied or exceeded the standard. The number of pupils examined was 8,898, and they were all tested in reading, writing, and arithmetic—the percentage of passes in these subjects being respectively 85, 85, and 69. In the other branches of instruction a fair approach to the standard was made. As a large proportion of the teachers have been fully trained and hold respectable certificates, it is naturally expected to find their schools well conducted; and, as a rule, this expectation is not disappointed. There are, however, some weak subjects in all the schools. Writing in copy-books is one of these, and the writing of the upper classes on unruled paper is often of very poor quality. Good writing is seen in the South Grafton Public School. The drawing on paper is fair, but it would be better if the Royal drawing books were more generally used in the early stages. The results in arithmetic are the most disappointing. Mental arithmetic appears to be greatly neglected; and few boys, even in the higher classes, are found able to work correctly simple questions like the following:—"What sum of money should a farmer receive for 648 bags of maize, each weighing 4¼ bushels, at 3s. 11½d. per bushel, after paying the agent 5 per cent. commission for selling, and the steam company 1s. 6d. per bag for freight?" Considering that maize is the staple product of these districts, it is reasonable to require boys, whose fathers are farmers, to solve questions in arithmetic connected with their ordinary business transactions. Singing is not taught in several of the schools, and in only one of those I visited—West Kempsey Superior—did it strike me as particularly sweet and tuneful. In most schools where the subject is taught, the singing, though correct in time is loud and harsh. In few schools can the pupils sing at sight an easy three-part song. The theoretical portion of the subject is indifferently known, and the modulator is not practised with sufficient frequency.

Savings Banks are in operation in 35 schools. There are 1,124 depositors with £308 5s. 3d. at their credit. These institutions are popular with the children, and are well patronized.

Two attendance officers are attached to this district, one stationed at Grafton and the other at Taree. Owing to impaired health, Mr. Bayley, of Grafton, was forced to retire from the service at the end of September, and he was succeeded by Mr. W. Apsey, of Mudjee. The work in connection with this Branch has been considerable, but the results have been commensurate with the labour. There are no defaulters for the last half-year in 96 schools, and only 99 parents have been recommended for prosecution. There were 128 prosecutions during the year, and fines and costs, amounting to £31 7s., were inflicted.

In 134 schools there were no school fees in arrears on 31 December, 1888. Among the other schools the returns show £131 13s. 6d. in arrear. The bulk of this is due in schools in the Richmond River District. Thus, Ballina returns the arrears as £16 13s.; Drake, £9 13s.; Lismore, £8 9s.; Coraki, £7 0s. 6d.; Seven Creek Provisional, £6 14s. 3d.; and Wyrallah, £5 17s. 3d. During the year a sum, amounting in the aggregate to £130 4s. 14d. was cancelled as bad debts. This is the worst side of the case, for no less a sum than £5,067 7s. 6d., was paid as school fees in this district during 1888, being an increase of £812 on the receipts of the previous year.

In December, the Public School at Taree was declared a Superior Public School, which makes the fourth school of this grade in the Grafton District.

In only two of our schools were pupils prepared for the University Examination in 1888. Lismore Public School sent up 6 candidates, and Cowper Public 1. All were successful.

The teachers, as a body, are trustworthy and zealous. A few were censured for carelessness or misconduct, and two or three were either dismissed or allowed to resign. At the end of each quarter there is a small contingent who fail to furnish complete and correct returns promptly; some even fail to send in all the returns at the close of the year until they are reminded of the omission. Happily these remarks apply to a very small number. Most of the teachers strive to do their work well, and discharge their duties in a manner creditable to themselves and reflecting credit on the Department. The pupil-teachers are a respectable body of young people, who discharge their duties with fair efficiency.

In the following schedules the facts dwelt upon in this Report are summarized, and the reports of inspectors are attached.

SUMMARY OF STATISTICS FOR 1888.

1. Schools in Operation at close of 1887.

Grafton, 14th January, 1889.

A. LOBBAN,
District Inspector.

ANNEX S.

ASSISTANT INSPECTOR NOLAN'S REPORT.

At the close of 1887 there were in operation in the Port Macquarie Section of the Grafton District 78 schools. During 1888 four new schools were established, and four small schools were permanently closed, owing to paucity of attendance.

The schools in operation at the end of the current year are classified thus :—

58 Public.
8 Provisional.
12 Half-time.

Rainbow Reach Public School and the Half-time School at Stony Creek, though not closed officially until the early part of the year, were actually not open during any portion of 1888. The Provisional School at Bobin Flat, and the Evening Public School at Cundletown lapsed in June last. The Provisional School at Callaghan's Creek and Koribakh Creek were raised during the year to the rank of Public Schools. The Provisional School at Telegraph Point, which had been closed for some time, was reopened early in the year.

The gross enrolment for December quarter was 2,993, and the average daily attendance for the same period was 2,139. Existing schools provide accommodation for 3,406 pupils. A few of the schools are slightly overcrowded, but steps are being taken to afford increased room. The schools are well distributed, and they are centrally situated; there are now but few centres in this district without the means of education. Three applications for the establishment of new schools are at present under consideration, and they will probably be favourably entertained.

All the schools in this section received full inspection, and 49 of them underwent a second or ordinary inspection. Four of the regular inspections, and seven of the ordinary inspections were conducted by Mr. District Inspector Lobban. In addition to the above I held two regular and nine ordinary

ordinary inspections of schools in the Grafton Section. The condition of the several schools in the Port Macquarie District, as disclosed by inspection, is exhibited in the following table :—

Class of Schools.	Below the Standard.	Up to the Standard.	Above the Standard.	Total.
Public	9	1	48	58
Provisional	4	...	5	9
Half-time	2	1	9	12
Evening	1	1
Totals	15	2	63	80

The corresponding table for 1887 was :—

Class of Schools.	Below the Standard.	Up to the Standard.	Above the Standard.	Total.
Public	8	13	35	56
Provisional	5	...	4	9
Half-time	6	...	6	12
Evening	1	...	1
Totals	19	14	45	78

81 per cent. of the schools inspected in 1888 satisfied the required standard ; the corresponding proportion for 1887 was 76 per cent. It thus appears that better results were produced during the year just terminated than in the previous year. Detailed statistics as to class proficiency in the several subjects are forwarded herewith. The Public School at Wingham deserves special mention for its very creditable condition.

The material condition of the school-buildings is fairly satisfactory ; extensive repairs to several school-buildings situated on the Manning and the Hastings Rivers have been sanctioned, and the work will be carried out early in the ensuing year. As a rule the schools are commodious and well furnished, and the supply of working materials is adequate ; the premises are neatly kept, and the Department's property is carefully preserved. As far as the teachers are accountable the organization is sound ; the usual lesson guides are intelligently constructed, and they are faithfully observed ; with but very few exceptions the records are neatly and correctly compiled. Discipline is a pleasing feature ; the government is generally mild, but it is firm and exacting, and the resulting order is satisfactory. The instruction is earnest and industrious, and the methods employed are of a modern type.

The following table shows the enrolment and the average daily attendance of pupils for each quarter :—

	Enrolment.	Average.
March quarter.....	3,079	2,178
June quarter	2,986	2,231
September quarter	3,087	2,235
December quarter	2,998	2,139

The residents of Ellenborough, Telegraph Point, and Killabakh provided buildings in their respective localities free of cost to the Department. A building was erected under the inspector's supervision at Cogo, at a cost of £60. At the abovenamed places schools did not previously exist. Commodious residences were erected by the architect at Sherwood, Tinonee, and Killawarra ; and repairs to seven schools were effected under his supervision. A sum of £210 1s. was spent under the supervision of the inspector in effecting repairs to seventeen schools.

At the commencement of the year accommodation was provided for 3,371 pupils ; during the year 30 places were lost by the closing of schools ; and 65 seats gained by the opening of new schools.

The following list gives information concerning the teachers employed in the district :—

Classification of Teachers.

	1 A.	1 B.	2 A.	2 B.	3 A.	3 B.	3 C.	Nil.	Totals.

Classification of Pupil-teachers.

Class I.	Class II.	Class III.	Class IV.	Total.
...	4	3	5	12

Both teachers and pupil-teachers have as a body worked well during the past year ; their labours have been attended with gratifying results, and there is every reason to anticipate equally good work for the ensuing year. A few of the older teachers who have for many years past been employed in the Service, are now, by their advanced ages, compelled to retire under the provisions of the Civil Service Act.

W. NOLAN,
Assistant Inspector.

Port Macquarie, 31st December, 1888.

ANNEX T.

ASSISTANT INSPECTOR M'LELLAND'S REPORT.

I BEG to submit my general report for the year 1888 :—

At the beginning of the year there were in operation in this section 85 schools, viz. :—
Sixty-seven Public, 12 Provisional, 6 Half-time. Total 85.

During the year new schools, 7 in number, were opened at the under-mentioned places :—

Red Rock Public.	Skinner's Creek Provisional.
Brunswick River Provisional.	Woorroowoolgan "
Condong "	Wyrallah Evening.
Riley "	"

The

The Provisional Schools at Byron's Creek, Cormick's Creek, Friday Hut, Lower Palmer's Island, Seven Creek, and Sandy Hills were converted to Public rank, as also was Cowlong Half-time, and the other Half-time School at Pearce's Creek was raised to Provisional grade. In consequence of these changes, and the closing through failing attendance, of Dugarubba Creek Provisional, and Wyrallah Evening Public, the classification of schools at the end of the year stood thus:—

Seventy-five Public, 11 Provisional, 4 Half-time. Total 90. The number in operation during any portion of the year was 92.

It has been decided by the Minister to establish new schools at Hanging Rock, Cooper's Creek, and Wooram (Sandy Creek); and an Evening School will also be opened at North Creek next month. Applications for the establishment of schools at Cudgen Wharf, Tuckurimba, Boomerang Creek, and Blakebrook have, for various reasons, been declined. Altogether 14 applications have been dealt with and reported on by me during the past year; and such is the nature of the district under my supervision that the same activity in new school movements may be expected for several years to come. At present, however, I am personally aware of very few localities where the residents are without the means of education. So soon as increased settlement brings a sufficient number of children of school age within the prescribed radius, the parents concerned are usually prompt in urging their claims upon the Minister's notice. It is strange but true, however, that they do not always display the same zeal when their desires have been gratified; hence it not uncommonly happens that the most enthusiastic promoter of the new school is the first to become enrolled upon its list of defaulting parents.

The accommodation for pupils has increased during the year from 5,006 to 5,240, and is, on the whole, quite adequate. The increase referred to (234) has been produced, (1) by the erection or rental of new buildings where none formerly existed, (2) by the substitution of new premises for old ones, and, (3) by the provision of class-rooms and other additions where such were required. Information respecting these buildings will be found in the subjoined tables.

I. New Buildings.

School.	Under Supervision of.	Object of Erection.	Size and accommodation.		Cost.	
Boggumbil	Inspector	To replace old building.	20 × 16 × 10	32	£ s. d. 135 0 0	
Cowlong	Local Committee.	"	25 × 16 × 10	40	60 0 0	
Tooom	Inspector	"	17 × 14 × 9	21	60 0 0	
Riley	"	New	14 × 12 × 9	15	25 0 0

				Totals ...	229	400 16 0

II. Additions—Class-rooms, lengthening.

School.	Under Supervision of.	Nature of addition.	Size and accommodation.		Cost.	
Drake	Inspector	Class-room	20 × 10 × 10	20	£ s. d. 60 15 0	
Irvington	Architect	Lengthening	14 × 12 × 10	16	87 13 0	
Tirrannia Creek	"	"	16 × 11 × 10	17	90 0 0	
Palmer's Island	"	Class-room	16 × 14 × 10½	23	100 18 0	
				Totals ...	76	339 6 0

The following is a list of works that are now in course of completion. When finished they will provide further accommodation for 258 pupils:—

Name of School.	Nature of Work.	Under whose Supervision.	Accommodation.	Cost.	
Cooper's Creek	New school-room	Inspector ...	32	£ s. d. 60 0 0	
Cumbalum	"	"	15	45 0 0	
Point Danger	"	"	32	79 18 6	
Ballina	New class-room	Architect...	44	177 18 0	
Broadwater	"	"	43	78 10 0	
Harwood Island	"	"	26	75 0 0	
Wardell	"	"	24	75 0 0	
Meerschaum Vale	Lengthening of School-room	"	16	78 5 0	
M'Lean's Ridges	"	Inspector ...	14	31 10 0	
Cormick's Creek	"	"	12	20 0 0	
			Totals	258	721 1 6

It has also been decided to make additions to the premises at New Italy, and to erect a cheap residence at Mororo.

In all cases where improvements have been deemed desirable, and where the circumstances of the school warranted the expenditure, the necessary steps have been taken to remedy the defects noted; as a result no less than 39 schools have been improved in various ways during the year at a total cost to the Department of £1,075 18s.

In the matter of new buildings the policy of former years has been adopted, *i.e.* the erection of plain but neat wooden structures at the lowest cost, compatible with substantial work.

In most cases the organization is satisfactory. The material condition of the buildings is generally good; the supply of educational requisites adequate. Most of the teachers take pleasure in preserving a neat well-kept appearance in the premises committed to their care. They show judgment in the construction of time-table and programmes, and use these lesson guides intelligently, methodically, and successfully. But there are still some, though not many, who either fail to appreciate the true meaning of effective organization, or are constitutionally too indolent to take the pains necessary to keep their schools in

in good working order. The latter is, I believe, the true explanation of inferior organization. The industrious teacher hates to lose time, and, therefore, always works with a plan. If shiftless teachers could be suddenly transferred from their own ill-kept premises to one of the well-kept schools the contrast would, I think, considerably startle their complacency, and possibly teach them a very valuable lesson.

The discipline generally prevalent is as satisfactory as in former years. The pupils are almost always neat in their dress, and are seldom unpunctual. While under examination they work cheerfully, often with great spirit, and are usually attentive. Doubtless the attention and mental activity displayed at the inspection are somewhat greater than is the case under ordinary circumstances; still, the general behaviour of the children at such a time is a faithful indication of the nature of the government and of the degree of sympathy existing between teacher and pupils. In some few schools the government, though very effective, is too strict and unsympathetic; the same results might be acquired by gentler means. Rarely, however, is corporal punishment inflicted with undue severity, and only two or three instances have occurred during the past year where parents have complained of the teacher's harshness in this respect.

The rudiments of military drill are taught in the larger and in some of the smaller schools; but in the latter the instruction is mostly confined to extension, motion, and marching. Of the 92 schools in operation during some portion of 1888, all save 1 received a regular and 28 an ordinary inspection. The one school not inspected was the Evening School at Wyrallah, which closed suddenly and unexpectedly in the first part of the year, before I had an opportunity of arranging for its inspection. In all, 121 inspections were made in this section; 10 by the district inspector (8 regular and 2 ordinary) and the remaining 111 by myself. The relation of the schools inspected to the standard is shown in the following table:—

	Below.	Up to.	Above.	Totals.
Public	13	7	55	75
Provisional	11	...	1	12
Half-time	3	...	1	4
Totals	27	7	57	91

Thus the percentage of those schools that satisfied or exceeded standard requirements is 70 per cent., as against 86 per cent. for 1887. In explanation of this falling off it must be borne in mind that 11 out of the 27 schools below standard, fell into that unenviable category not through the fault of the teachers, but because they possessed no 3rd class at the time of inspection, and no school can be considered "up to Standard," in the proper sense of the expression, where no instruction is given in grammar, geography, history, and higher arithmetic. This distinction was not drawn in making up the estimates of last year. If for the purposes of comparison these 11 schools be considered neutral, there were 64 schools up to or above standard, out of 80 that could reasonably be expected to obtain the minimum number of marks. The percentage of passes is now raised to eighty which is still 6 per cent. less than the average for last year. Of the 16 schools that ought to have passed a satisfactory inspection, but did not, I believe that in every instance such failure was due either to indolence or inefficiency on the part of the teachers in charge. The schools in question are all of the smaller class, and their teachers have not had the advantages of training and education enjoyed by their confreres in more important positions. They only imperfectly understand the importance of their office, and such zeal as they do show, springs chiefly from a dread of the consequences of their neglect. The table below setting forth the percentage of passes in each subject, will show clearly that the great bulk of the pupils acquitted themselves satisfactorily, and that the schools found in an unsatisfactory condition are represented by a small minority of the pupils examined. The following schools deserve honorable mention as having obtained over 70 per cent. of the maximum number of marks at the regular inspection: Lismore Primary, Ballina, Wardell, Wyrallah, Coraki, Lower Southgate, and Acacia Creek. At the recent Junior University Examinations, 6 candidates from the Lismore Public School presented themselves, and all were successful. There are several schools in this district whose teachers are well qualified to prepare pupils for these examinations, and I hope, next year, to be able to report a considerable increase both in the number of schools represented and in the number of successful examinees.

Subject.	Number of Pupils Examined.	Percentage of Passes for 1888.	Percentage of Passes for 1887.	Increase or Decrease for 1888.
Reading	3,171	90 per cent.	93 per cent.	Decrease 3 per cent.
Writing.....	3,171	91 "	92 "	Decrease 1 "
Arithmetic	3,171	82 "	71 "	Increase 11 "
Grammar	1,114	75 "	77 "	Decrease 2 "
Geography	1,147	76 "	67 "	Increase 9 "
English history	889	67 "	49 "	Increase 18 "
Australian history	521	75 "	77 "	Decrease 2 "
Scripture	2,992	73 "	65 "	Increase 8 "
Object lessons	2,092	75 "	82 "	Decrease 7 "
Drawing	830	84 "	92 "	Decrease 8 "
Music	2,591	83 "	79 "	Increase 4 "
Euclid	113	88 "	56 "	Increase 32 "
Algebra.....	8	100 "	100 "
Mensuration	115	64 "	65 "	Decrease 1 "
Needlework	1,037	94 "	99 "	Decrease 5 "
Drill	2,682	72 "	77 "	Decrease 5 "

In such subjects as show a decrease in the number of passes compared with those of last year, the falling off is so slight as to call for no special remark. The improvement, on the other hand, observable in arithmetic, geography, English history, and euclid, is creditable and gratifying.

Of the great majority of the teachers, I can report in terms of commendation. I have already referred to a small number that have given cause for dissatisfaction. It is to be hoped that these will exert themselves honestly during the coming year and not render themselves again liable to censure or dismissal for incompetency. One teacher has been dismissed for gross neglect of duty, and another is under suspension on a charge of intemperance. The pupil-teachers are almost without exception industrious, painstaking, and studious. I am aware of only one that has given cause for complaint.

In conclusion I may state that I consider the general condition of the schools under my supervision satisfactory, and the prospects for the coming year encouraging.

H. D. McLELLAND,
Assistant Inspector.

Lismore, 20th December, 1888.

ANNEX

ANNEX U.

DISTRICT-INSPECTOR T. DWYER'S REPORT.

THE number of schools in operation in the Maitland District at the beginning of 1887 was 270, viz. :—

Public Schools and departments	213
Provisional Schools	19
Half-time Schools	34
House-to-house Schools	4
Total	270

During the year new Infant departments in connection with the Public Schools at Tighe's Hill and Carrington were completed ; a new Public School is ready for occupation at Fassifern ; additional class-rooms have been provided at West Maitland Superior Public for Boys, Girls, and Infants, at St. Ethel's, and at Newcastle East. These schools and class-rooms were erected under the architect's supervision.

Non-vested Public Schools have been established and opened in temporary buildings at Middle Falbrook and Tea Gardens. New Provisional Schools were started at Awaba, Eglingford, Turrill, and Wagaribil, and House-to-house Schools were brought into operation at Rosemount and Lower Munmurra.

The Public Schools at Muscle Creek, Hawk's Nest, and the Half-time Schools at Castle Rock, Sandy Creek, Gungal, and Worrolong had to be closed during the year through want of attendance of pupils ; but it has been decided to re-open Muscle Creek as a House-to-house School, and Worrolong as a Provisional.

Applications for the establishment of small schools at Cattle Creek, Cooba, Bulga, and Nandowra have been favourably entertained.

The number of schools in operation during some portion of 1887 in this district is shown hereunder.

Section of District.	Public Schools.	Provisional Schools.	Half-time Schools.	House-to-house Schools.	Total.
Maitland	62	2	2	66
Newcastle	57	2	59
Dungog	58	10	12	3	83
Muswellbrook	39	11	20	5	75
Total	216	25	34	8	283

Existing schools are, with few exceptions, centrally situated, and provide ample accommodation for the requirements of the district. At the beginning of the year accommodation for 22,189 pupils existed, while at the end of 1888 the schools in operation had sufficient floor space for 22,922 children.

The material condition of the vested buildings continues to be satisfactory. The sum of £953 9s. 3d. was expended by the inspectors in repairing and painting them during the year.

In a number of schools which, unfortunately, is not as large as it should be, the teachers have incurred expense, and have worked hard besides in improving the school-grounds by planting trees and cultivating flower and vegetable gardens. An example has been set by these teachers to their pupils and neighbours, which is certain to be beneficial in the near future. This class of teachers rarely gives trouble to the Department. The satisfactory performance of their official duties, and the cultivation of their gardens afford them ample means of spending their time intellectually, healthfully, and profitably. Improved means of ventilation have been introduced into many schools. Some are still defective in this particular ; in others, fair means of ventilation are provided, but are not properly utilized. Lighting is generally sufficient ; but some even of the newer schools are not well constructed in this respect. There is too frequently an unnecessary amount of cross lights ; and a number of schools are unprovided with blinds or frosted windows.

The number of pupils enrolled during each quarter of the year, and the average attendance are shown in the following table :—

	Enrolment.	Average attendance.	Percentage.
1st quarter	21,387	15,101.4	70.5
2nd quarter	20,777	14,830.2	71.3
3rd quarter	21,100	14,335.8	68.
4th quarter	20,522	14,634.3	71.

The prevalence of measles in all sections of the district throughout the year, and the miners' strike in the Newcastle Section during the third and fourth quarters of the year are the main causes of the diminution in the average attendance for these periods. Were it not for these obstacles, the average attendance for the third and fourth quarters of 1888 would have exceeded 72 per cent. of the enrolment for the same periods.

The number of pupils enrolled for the whole year was 26,522, the multiple enrolments amounted to 3,946; the net enrolment was, therefore, 22,580, and the average attendance was 14,548.1 or 65 per cent. of the net enrolment. But for the reasons already assigned, the average attendance for the year would have reached 72 per cent. of the net enrolment.

The organization of the majority of the schools of this district continues to be satisfactory. In a large number it is of a high order of merit. Cleanliness and neatness in regard to the keeping of grounds, school-rooms, residences, and out-offices, is a marked feature. The arrangement of furniture and appliances is thoughtful and appropriate. School property is carefully preserved, and the records are invariably, neatly, and accurately kept. In other schools, these characteristics of good organization exist, but in a less satisfactory degree. Sometimes in this class, school-rooms do not present such a well ordered appearance as they should, and teachers of important schools have had to be rebuked for inattention to, and inaccuracy in the keeping of their records. In a third class of schools, the grounds and buildings present an unattractive and untidy appearance. Nothing is done to improve them. Insufficient attention is given to the proper classification of the pupils ; out-offices are not inspected regularly, and the records are not kept well enough to escape adverse criticism. The inspectors of this district have done a good deal to remove these defects, but still they exist.

With regard to discipline, it is pleasing to have to report that improvement has been made during the year. Punctuality of attendance is decidedly better, and is unsatisfactory only in such schools as are under the management of teachers who are themselves unpunctual and indifferent as to the character of their schools and pupils. The children are under good control, their movements in school are marked by more precision than in former years ; self-reliance, good manners, and habits of industry, are more generally inculcated ; home exercises receive increased attention ; copying has almost disappeared, and corporal punishment is much less resorted to than in the past. In a small number of schools, however, which are under the oversight of unambitious teachers, the details of discipline receive but fitful attention, and, as a consequence, the tone of these schools is unsatisfactory.

Pupils look forward to the annual inspection of their schools with pleasurable feelings, and indicate by their eagerness to answer well, and by their desire to be thoroughly questioned how fully they appreciate completeness and fulness in the work of inspection.

The work of inspection for the year is exhibited in the following table :—

Section of District.	Schools that received General or Regular Inspection.	Schools that received Ordinary Inspection.	Total number of Inspections.	Total number of pupils examined at General or Regular Inspections.
Maitland	66	66	132	3,768
Newcastle.....	59	58	117	8,192
Dungog.....	83	57	140	2,108
Musclebrook	75	60	135	1,880
Total	283	241	524	15,948

Every school in operation during any portion of the year received a general or regular inspection, and 241 schools had ordinary inspections. The number of schools that did not receive second inspection is 42 of which 1 is in the Newcastle, 26 in the Dungog, and 15 in the Musclebrook Section.

Conditions of the inspected schools in relation to the Standard :—

Section of District.	Schools.	Above the Standard.	Up to the Standard.	Below the Standard.	Total.
Maitland	Public	43	6	13	62
	Provisional.....	2	2
	Half-time	2	2
	Total	45	6	15	66
Newcastle	Public	54	1	2	57
	Provisional	2	2
	Total.....	54	1	4	59
Dungog	Public.....	13	25	20	58
	Provisional	1	4	5	10
	Half-time	5	7	12
	House-to-house	1	2	3
	Total.....	15	34	34	83
Musclebrook.....	Public.....	33	3	3	39
	Provisional.....	5	3	3	11
	Half-time	14	3	3	20
	House-to-house	5	5
	Total.....	57	9	9	75
Grand Total...		171	50	62	283

From this table it appears that 78 per cent. of the inspected schools succeeded in reaching or exceeding the standard of proficiency; the percentage for each section of the district being Maitland, 78; Newcastle, 93; Dungog, 59; Musclebrook, 88. Last year the percentage for the whole district was 74; for Maitland Section, 72; for Newcastle, 91; for Dungog, 52; and for Musclebrook, 84.

The following schools failed to reach the standard :—

Maitland Section.—Aberglasslyn, Black Hill, Brokenback, Brownmuir, Elderslie, Ellalong, Laguna, Merannie, Nelson's Plains, Sedgefield, Stockyard Creek, Sweetman's Creek, Wattagon, Dairy Arm (Half-time), Mount Finch (Half-time).

Newcastle Section.—Awaba, Mandalong, Ash Island, Dora Creek.

Dungog Section.—Bendolba, Booral, Bulladelah, Belltrees, Binglebrah, Carrow Brook, Chichester, Croom Park, Bunnabunoo, Gundy, Hawke's Nest, Limeburner's Creek, Gloucester, Malvern, Markwell, Myall Upper, Mount Rivers, Mount Pleasant, Glen William, Monkerai, Tea Gardens, Nerong, Page's River, Rouchel Vale, Ward's River, Atherton, and Lamb's Valley (Half-time), Bowman's Creek (Half-time), Big Creek (Half-time), Carrabolla (Half-time), Sugarloaf Creek (Half-time), Tabule Creek (Half-time), Page's Creek (House-to-house), Waverley (House-to-house).

Musclebrook Section.—Aberdeen, Harben Vale, Wybong, Doyle's Creek, Gungal, Willy Wally, Bylong, Howick, Oxley's Peak.

The proficiency of the pupils examined in each subject of instruction, and the percentage of those who satisfied or exceeded the Standard, are shown in the following table :—

Subjects.	Number examined.	Percentage up to or above the Standard.
Reading—		
Alphabet	2,226	82
Monosyllables	2,090	81
Easy narrative	4,292	78
Ordinary prose	7,340	82
Total number examined	15,948	81
Writing—		
On slates	6,168	91
On paper	9,744	90
Total number examined	15,912	91
Arithmetic—		
Simple rules	9,498	78
Compound rules	3,116	56
Higher rules.....	3,274	54
Total number examined	15,888	69

Subjects.	Number Examined.	Percentage up to or above the Standard.
Grammar—		
Elementary	2,054	65
Advanced	4,980	69
Total number examined	7,034	68
Geography—		
Elementary	2,519	68
Advanced	5,061	73
Total number examined	7,580	72
History—		
English	5,079	70
Australian	2,381	69
Scripture and moral lessons	15,173	78
Object lessons	13,396	98
Drawing	5,142	71
Music	13,503	81
French	133	73
Euclid	924	64
Algebra	178	90
Mensuration	1,375	36
Latin	169	84
Natural science	419	94
Trigonometry	43	60
Needlework	5,379	90
Drill	13,312	74

Compared with last year there is improvement in eleven subjects, viz., writing, 3%; English history, 2%; scripture, 5%; object lessons, 15%; music, 2%; euclid, 4%; algebra, 22%; Latin, 10%; natural science, 23%; trigonometry, 26%; and needlework, 1%. The results in arithmetic, geography, and drawing are the same as for last year. In five subjects there is a falling off, viz., grammar, 2%; Australian history, 6%; French, 2%; mensuration, 13%; and drill, 1%.

Except in the compound and higher rules of arithmetic, in grammar, Australian history, euclid, and trigonometry, the percentage up to or above the standard in every subject of instruction exceeds 70.

In the best conducted schools of this district, Reading lessons are as carefully prepared by the teachers as if they had to be delivered before a critical audience. Sample reading is regularly practised; and the pupils are made thoroughly conversant with the meaning of the passage to be read by them before they are allowed to read it. In these schools reading is taught intelligently, expressively, and satisfactorily.

The tests applied in arithmetic were easier all round than in former years; still the percentage of satisfactory answering for this year is no higher than for 1887. This arises mainly from defective teaching, infrequent revision, and the absence of systematic training in mental arithmetic. In some schools failure to solve easy questions resulted from the over simplicity of the questions given by the inspectors.

Mensuration is badly taught, chiefly because teachers fail to clearly explain definitions and principles, to deduce the rules from geometry, and to give a sufficient number of suitable exercises on the different rules.

Composition, which is an important branch, being an intellectual test of a high order has received an average share of attention. Letter-writing has been introduced into a number of schools with fair success. In only a few schools of the better class has notepaper been supplied to the pupils for use in letter-writing.

Were the question asked—what, in your opinion, is the chief hindrance to increased efficiency in the attainments of the pupils attending the Department's Schools in this district?—my answer would be—"Failure on the part of a number of teachers to methodically prepare their school-work in regard to matter and method." Experience justifies me in expressing the deliberate opinion that in a pretty large number of schools the teachers seldom, or never, prepare their lessons in grammar, geography, history, scripture, meanings and derivations. Desultory, ineffective teaching, and unsatisfactory results at inspections are the invariable consequences of such inexcusable neglect. In several schools where teachers were requested by the inspectors to examine their pupils in object lessons, scripture, or history, they had to actually use the text-book in the inspector's presence.

The teachers employed in this district number 264; the assistants, 62; and the pupil-teachers, 137. In the following table their classification is shown:—

	I.		II.		III.			Unclassified.	Total.
	A.	B.	A.	B.	A.	B.	C.

Class I.	Class II.	Class III.	Class IV.	Total.
44	35	26	31	137

On the whole, the teachers and the assistants employed in this district possess the necessary skill, diligence, and information to enable them to successfully discharge their official duties. Some of

of them, however, are rather too much engaged in the consideration of other pursuits to admit of their devoting all their energy and attention to the duties of their office as required by law. As previously stated, a certain number fail to give satisfaction by reason of their neglect to systematically prepare the lessons which they have to teach.

With very few exceptions the pupil-teachers are a decidedly promising body. In some schools they are hard worked, indifferently supervised, and badly taught. Arrangements for giving all who can conveniently attend on Saturdays at Maitland and Newcastle instruction in Latin, French, drawing, and music have been nearly three months in operation; and give promise of materially benefiting such as attend regularly.

Summary.

Thirteen new schools were opened during the year. Accommodation for 22,922 pupils exists. Every school in the district had a regular or general inspection, and 241 schools received ordinary inspection. The condition of the schools in regard to organization, discipline, and efficiency shows satisfactory improvement. The material condition of the schools of the district is better. Habits of study among the bulk of teachers and pupil-teachers are general; and the prospects of primary education in the Maitland District are highly gratifying.

East Maitland, 18th January, 1889.

T. DWYER,
District Inspector.

ANNEX V.

INSPECTOR M'CORMACK'S REPORT.

THE Newcastle Section of the Maitland District had 58 schools in operation at the beginning of 1888. One new school has since been opened. Fifty-seven are Public Schools and 2 are Provisional Schools. At Fassifern, 16 miles south-west of Newcastle, a place where no school previously existed, suitable buildings have just been completed, and new Infants' Departments for the Public School at Tighe's Hill and Onybigambah are now ready for occupation. An additional class-room has been built at Newcastle East, weathersheds have been erected at Islington and the Gravel Pits, and improvements and repairs, extensive in some instances, have been effected in connection with the Public Schools at Adamstown, Cook's Hill, Hexham, Jesmond, New Lambton, Minmi, Newcastle East, Onybigambah, Stockton, and Wallsend. It has been decided to establish Public Schools at Merewether, near Newcastle, and at West Wallsend. Important works have also been sanctioned for improving the condition of the school premises at Charlestown, Cooranbong, Dora Creek, Fullerton Cove, Hanbury, Lambton, Mosquito Island, Newcastle South, Raymond Terrace, and Wickham. All new buildings but one have been erected under the supervision of the architect.

2. Existing schools provide ample accommodation for, and are within easy reach of, almost the entire school population of this section. They contain 9,596 places, an increase of 229 since the beginning of the year. The return for December shows an enrolment of 10,667 pupils, and the ordinary attendance reaches 8,800. With very few exceptions the buildings are in a very fair state of repair. The water supply, much less this year than the ordinary, owing to the slight rainfall, has been carefully used. Good attention has been given to the ventilation and the cleanliness of the rooms, and, as a rule, the necessary supervision has been exercised to keep the grounds and out-buildings in a satisfactory state. School materials, excepting slate and slate pencils, are kept in creditable condition. Desks scratched and in places chipped are to be seen in a few of the largest schools. Defects in registration are occasionally met with. Admission registers are not always fully posted, and some records of monthly examination are of little worth. Mere results, loosely estimated, are set down. On the whole the classification of pupils is sound. Occasional delay in the promotion of pupils from the Infants' School to the Primary Departments has been noted. Pleading discipline is maintained in most schools. Punctuality is insisted upon, and close inspection of the pupils in reference to cleanliness and neatness is made before they enter school. Simultaneous class movements are performed with quietness, precision, and due rapidity, and the government generally is vigilant, regular, and considerate. An adequate teaching staff for each school has been maintained, and the proper distribution of the teaching power has been well observed.

3. The schools and the departments under my supervision are ranked thus:—

Public—	Classes.	Schools and Departments.
	I	12
	II	18
	III	2
	IV	8
	V	5
	VI	2
	VII	4
	VIII	2
	IX	4
	X	0
Provisional		2

4. In the following table the enrolment and the average attendance for each quarter of the year are given:—

Quarters.	Pupils Enrolled.	Average Attendance.
March.....	11,255	7,927
June	10,844	7,469
September	11,017	7,260
December	10,667	7,595

The average attendance is 69.1 per cent. of the enrolments. Much sickness was prevalent in the thickly populated portions of the district during the second and third quarters of the year. Several schools had to be closed for short periods. In the September quarter also a general strike of coal-miners began, lasted three months, and caused a further decrease in the attendance at several schools.

5. All schools received during the year a regular inspection, and all but one an ordinary inspection. The exception, Awaba Provisional, was established very late in the year. The general condition of the schools is here given:—

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public	2	1	54
Provisional	2
Totals	4	1	54

These results are very satisfactory and indicate a considerable amount of earnest skilful teaching throughout the district.

6. The subjects, the number of pupils examined in each subject, and the percentage up to and above the standard, are given in the following table :—

Subjects.	Pupils Examined.	Percentage up to and above Standard.
Reading.....	8,192	80
Writing.....	8,184	87
Arithmetic.....	8,192	63
Grammar.....	3,673	65
Geography.....	4,118	67
History.....	3,908	66
Scripture.....	8,107	73
Object lessons.....	7,983	80
Drawing.....	2,622	61
Music.....	7,958	74
French.....	89	60
Euclid.....	547	55
Algebra.....	82	79
Mensuration.....	1,226	40
Latin.....	82	74
Natural science.....	110	75
Trigonometry.....	43	60
Needlework.....	2,786	84
Drill.....	8,157	75

Kindergarten occupations have been introduced into the Infants' Departments of the Wickham Superior Public School, and satisfactory results have been achieved. Numerous specimens of the pupils' work are in the present Melbourne Exhibition.

7. The entire teaching staff consists of :—

59 Teachers.
46 Assistants.
92 Pupil-teachers.
6 Work-mistresses.

Total..... 203

They are thus classified :—

Teachers and Assistants.

Teachers.	First Class.		Second Class.		Third Class.			Not classified.
	A.	B.	A.	B.	A.	B.	C.	
Teachers.....	5	5	27	8	7	3	2	2
Assistants.....	...	1	11	17	8	9
Totals.....	5*	6	38	25	15	12	2	2

Pupil-teachers.

Class I.	Class II.	Class III.	Class IV.
32	19	18	23

On Saturday mornings all Pupil-teachers attend the Wickham Superior Public School, a central and suitable place, for special instruction in singing, drawing, Latin, and French. These classes are conducted by competent and earnest teachers.

As a body, the teachers are devoted to their work, are conscientious in the discharge of their duties, and are exemplary in their conduct.

Existing conditions favour the progress of primary education in this portion of the Maitland District.

Newcastle, 8th January, 1889,

J. M'CORMACK,
Inspector.

ANNEX W.

MR. INSPECTOR LONG'S REPORT.

At the end of 1887 there were in operation in the Dungog Section of the Maitland District, 78 schools. During the year 1888 one school was closed, and five new schools were opened. Three Provisional Schools were raised to the rank of Public Schools. The schools at the end of the year numbered 82, and consist of 57 Public Schools, 10 Provisional, 12 Half-time, and 3 House-to-house. New buildings have been provided for three schools, and in eighteen cases repairs or improvements have been effected. Details of the nature and cost of these have been furnished in a separate schedule.

The buildings in use at the beginning of the year sufficed for 4,179 pupils. The places gained during the year numbered 165, and 128 places have been lost, so that there is now in this section school-room accommodation for 4,216 pupils. The largest enrolment for any quarter was 2,862, while the average attendance for the year was 2,056.3. As regards the distribution of the schoolroom space, it may be stated that in every instance it is at least sufficient. The buildings are centrally situated and, with two exceptions, are in good condition, while all are liberally provided with educational appliances.

During

During the year every school received a regular or general inspection, and 58 an ordinary or second inspection. Several were further visited incidentally or under special instructions. In the following table is shown the condition of each school in relation to standard at the time of its inspection :—

Above Standard.	Up to Standard.	Below Standard.
Clareval	Aliceton	Hannah Bay
Rosenthal	Johnson's Creek	Dusodie
Barrington	Williamtown	Lostock
Bandon Grove	Moonan Flat	Vacy
Dungog	Gresford	Moonan Brook
Munni	Halton	Salisbury
Upper Hunter	Brookfield	Colstoun
Caergurle	Crawford River	Salt Ash
Oakendale	Davis Creek	Rouchel
Thalaba	Clarence Town	Goorangoola
Copeland North	Ravensworth	Eccleston
Paterson	North	Stroud
Holmes Creek	Welshman's	Seaham
Ellerston.	Creek	Boolambayte
	Telegherry	Stewart's Brook
	Eagleton	Cross Creek
	Girvan	Wortwell
	Tea-tree	Nelson's Bay.
	Campsie	
		Malvern
		Bendolba
		Markwell
		Limeburner's
		Creek
		Gundy
		Mount Rivers
		Croom Park
		Hawk's Nest
		Monkerai
		Tea Gardens
		Carrow Brook
		Nerong
		Rouchel Vale
		Lamb's Valley
		Big Creek
		Sugarloaf Creek
		Tabule Creek
		Bulladelah
		Myall, Upper
		Booral
		Ward's River
		Belltrees
		Chichester
		Bunnabunoo
		Mount Pleasant
		Glen William
		Binglebrah
		Gloucester
		Page's River
		Atherton
		Bowman's Creek
		Carrabolla
		Page's Creek
		Waverley.

The number of schools, therefore, whose efficiency is up to or above standard is 49, constituting 59 per cent. of those inspected. This is satisfactory in so far that it is an improvement of 7 per cent. on the results of the preceding year, but, that so many schools should appear as below standard must certainly indicate defective efficiency in the case of a considerable number of teachers. In some few instances the teachers cannot be held responsible for this failure, either because their schools have been but recently established, as in the case of Gloucester, Tea Gardens, Page's River, and Waverley, or because of special obstacles beyond their control. The teachers of 6 schools which appear under the least creditable of the above headings, have, during the year, been replaced by successors who give promise of improved efficiency, and it is to be hoped that the others will, in future, manifest that increase in diligence or skill which has been pointed out to them as necessary.

The number of pupils examined in the several subjects, and the percentages whose proficiency was found to be satisfactory, or creditable, is given in the following table :—

Subjects.	No. Examined.	Percentage up to or above Standard.
Reading.....	2,108	85
Writing.....	2,108	88
Arithmetic.....	2,108	74
Grammar.....	944	64
Geography.....	950	63
English history.....	683	55
Australian history.....	333	62
Scripture.....	1,930	76
Object lessons.....	1,295	75
Drawing.....	633	70
Music.....	888	83
Euclid.....	53	38
Needlework.....	631	95
Drill.....	941	69
Dictation.....	1,555	63

These results are higher than those of the former year in all subjects but three, and may be accepted as indicating some improvement in the average efficiency of the teaching. The organization of the schools, so far as the teacher is accountable, and the discipline, are, as a rule, characterised by highly commendable diligence, judgment, and skill. Defects of a serious nature in regard to the former were found in 10 schools only, and in but 17 was the discipline of less than average quality. Excellent order, and careful attention to neatness, and propriety of appearance, are almost invariably observed. In some instances, however, teachers do not exhibit an intelligent comprehension of the methods by which good discipline should be secured. They fail to exert proper personal influence, and resort to means appropriate in extreme cases only, with a frequency which is suggestive of defective judgment, self-control, and disciplinary ability.

There are employed under my supervision 77 teachers, of whom 53 hold classifications ranging from 3C to 2A. As a rule they possess the skill, attainments, and diligence requisite for the successful performance of the duties entrusted to them, and are, further, well-conducted and respected. There are cases in which defective diligence or aptitude is observed, or neglect of the responsibilities involved in the acceptance of the position of teacher, but it is satisfactory to note that these are exceptional, and are diminishing in number. Seven pupil-teachers are employed in this section. They are well-conducted, diligent, and useful, and all, so far as is at present known, have, during the year, been successful in their examinations for promotion.

Summary.

The schools in this section are sufficient in number, properly situated, and in good condition in a material sense. The educational results, though unsatisfactory in certain schools, show an improvement as compared with those of the preceding year. Alterations already effected, and in prospect, warrant the anticipation of higher average results in the future.

Sydney, 16th January, 1889.

GEORGE ED. LONG,
Inspector.

ANNEX X.

ASSISTANT INSPECTOR FLASHMAN'S REPORT.

THE boundaries of the section under my supervision are the same this year as they were last.

At the beginning of the year the following schools were in operation :—

Public.....	38
Provisional.....	10
Half-time.....	20
House-to-house.....	3
	—
Total.....	71
	—

The

The public school at Muscle Creek and the Half-time Schools at Castle Rock, Sandy Creek, Gungal, and Worrolong have, in consequence of diminished attendance, been closed during the year.

A Public School at Middle Falbrook, Provisional Schools at Wagoribil and Turill, and House-to-house Schools at Rosemount and Lower Munmurra, have been opened.

It has been decided to re-open the school at Muscle Creek as a House School, and that at Worrolong as a Provisional. Applications have been received and granted for schools at Cattle Creek and Cooba Bulga, near Cassilis.

The year closed with the following schools in operation :—

Public	38
Provisional	12
Half-time	16
House-to-house.....	5
Total	71

Accommodation has been provided for 3,629 pupils, while the number of names on the roll during any quarter of the year has not exceeded 2,400. There is no school where the number of seats is not equal to the attendance. Most of the buildings are fairly well placed as regards the school population, and I believe that some school is within easy reach of nearly every child of school age in the district.

The school-buildings at Denman, Seone, Jerry's Plains, Dunbar's Creek, Kayuga, Owen's Gap and Broke have been repainted, and minor repairs have been effected in connection with several other buildings.

As a general rule the teachers are careful of the property placed under their charge. Most of the school-rooms are neat and clean; it is very seldom that there is any need to complain of dirty rooms. When such is necessary, other and more serious defects are almost certain to be present. It is rare indeed, to find a successful teacher in dirty or untidy surroundings.

Several of the play-grounds have been planted with ornamental trees. The almost total absence of rain during the greater part of the year, has made it very difficult to keep the trees alive, and only those teachers who take more than average interest in their homes have been successful.

All the schools in the section were fully inspected once, and most of them received a second or ordinary inspection :—

No. of schools that received a Regular Inspection.	No. that received an Ordinary Inspection.	Total No. of Inspections.
73	60	135

The following table shows the relation of the schools to the standard of proficiency :—

Schools.	Below Standard.	Up to Standard.	Above Standard.	Total.
Public	3	3	33	39
Provisional	3	3	5	11
Half-time	3	3	14	20
House-to-house	5	5
Total	9	9	57	75

Last year 12 schools failed to reach the standard requirements; this year 9 failed. This is to a certain extent satisfactory. At the same time it must be remembered that 50 per cent. of the possible number of marks obtainable is not a very high standard, and I hope before very long ever school in this district will be at least "up to standard."

The conviction is forcing itself upon me that the number of teachers content with the mark "Tolerable" is on the increase. It is generally supposed that a school must obtain at least that mark to escape censure. My opinion is that a trained teacher who is satisfied with such a result plainly indicates that his training and experience have to a large extent been a failure. A first or second class teacher who can produce results equal only to those obtained by untrained teachers certainly is not compensating the State for the expense of his education and training.

The subjects, the number of pupils examined in each, and the percentage that satisfied the Standard, are given below :—

Subject.	Number Examined.	Percentage up to Standard.
Reading	1,880	92
Writing	1,864	96
Arithmetic	1,825	71
Grammar	671	86
Geography	772	86
History—English.....	605	84
" Australian.....	314	97
Scripture	1,440	90
Object lessons	1,038	92
Drawing	650	78
Music	1,360	87
Euclid	97	76
Algebra	38	100
Mensuration	59	91
Latin	38	100
Natural science.....	118	100
Needlework	526	100
Drill.....	1,075	88

The results obtained this year are as a whole much higher than those of last. This I attribute in some measure to the fact that many of the small schools are now in charge of young men who have had some experience as pupil-teachers. These young persons being excluded for various reasons from the

the advantages of the Training School, know that if they are to make any headway in their profession it must almost entirely depend upon their success in the management of their schools. Consequently they devote their whole energy and attention to their work. Their one aim appears to be to prepare their pupils to successfully deal with the inspector's tests and so obtain a good report. There is a healthy rivalry between them which imparts an enthusiasm to their teaching, which reacts upon the pupils in a pleasing manner. The scattering of these semi-trained teachers must have the effect of raising the general character of the instruction in the country districts.

Arithmetic has improved considerably. Yet I am far from being satisfied with the results obtained. Seventy-two per cent. only obtained half the number of possible marks. It is in the higher rules that the low results are obtained; the simple rules are fairly well taught.

Mental arithmetic has received more attention during the year. The number of teachers who are beginning to see its value is fast increasing.

Drawing does not receive that attention which its importance demands; it is not at all uncommon to find a teacher who possesses two or three certificates for drawing almost entirely neglecting the subject, or teaching it in such a manner as to give the impression that his knowledge of the subject is of the most elementary kind.

The organization and discipline generally are still of a very satisfactory character; in most schools there is little to find fault with and much to commend.

The teachers employed are classified as follows:—

Schools.	Class II.		Class III.			Unclassified.	Total.
	A.	B.	A.	B.	C.		
Public	2	3	11	8	9	6	39
Provisional	2	10	12
Half-time	1	4	3	8
House-to-house.....	5	5
	2	3	11	9	15	24	64

There are 7 pupil-teachers all of whom have gained promotion during the year.

The number of unclassified teachers is still large; most of them are in charge of small bush schools where they are doing satisfactory work. As a body the teachers are respected; they are industrious, painstaking, and reliable.

There are school Savings Banks opened at Muscleebrook, Scone, Murrurundi, Denman, and Jerry's Plains; they have in each case been very successful.

Muscleebrook, 29th December, 1888.

C. O. FLASHMAN,
Inspector.

ANNEX Y.

DISTRICT INSPECTOR O'BYRNE'S REPORT.

I HAVE the honor to submit, for the information of the Minister, my report on the condition of the schools in the Wagga Wagga District for the year 1888.

The boundaries of the district are the same as described in last year's report, and the inspectorial staff remains the same. In consequence of the extensive area of the Hay Section, it was found necessary at the beginning of the year to lighten the work assigned to Mr. Assistant Inspector Maclardy. This was done by the transference of 5 schools to the Wagga, and 4 to the Albury Section.

The number of schools in operation for the whole or some portion of the year was 330. Eleven of these were closed on account of low attendance, thus leaving 319 in actual operation on 31st December.

During the year 18 new schools were opened where none existed before. These were at the following places: Murrleball, Gregadoo, Gwynne, Gobbagumblin, Bull Plains, Jubilee Downs, Overton, Manus, Black's Camp, near Gundagai, Keajura Creek, Kyamba, Boginderra, Ferncliffe, Toual, Kildary, Pooncairie, Mia Mia, and Tori.

The schools closed during the course of the year were situated at Rowan, Jones' Creek, Jingellic, Mountain Creek, Milbrulong, Wyangle, Barwong, Cullagong, Birrego, Narrama, and Toganmain. It is expected that most of these schools will be reopened in the near future. The loss of a family from a locality is sufficient to cause the temporary breaking up of many of the small schools. Persons not conversant with the circumstances of country schools would be led to conclude that the Department shows want of forethought in erecting buildings that, after a short period, are not required. This would be a very erroneous conclusion. The aim of the Department is to meet the educational wants wherever ascertained, and it is not possible, in all cases, to foresee that settlers will sell out their holdings to their neighbours. There certainly is some waste of power in this direction, but it is better that this should be than that any centre of settlement should be left without its school. In last year's report I pointed out that the natural desire for enlarging estates is one of the main factors at work in closing schools in settled districts. My observations during the year now closed bear out that conclusion.

Arrangements have been completed for opening new schools at the following places: Kimo, Boombolo, Yellow Waterhole, Winchenden, Cuthero, Eaglehawk, Acacia Dam, Alma, Euriowie, Mount Brown, and Purnamoota. The last six are in the neighbourhood of the Barrier Range. In this part of the Colony a couple of schools might have been established with advantage some months back, but the rapid change of population in these parts could not be foreseen in the early part of the year, when the inspector visited it, and the remoteness of the place, and pressure of other work prevented him from making the necessary inquiries to enable him to report on the applications. These matters, however, have now been attended to. It may be said, generally, that the action of the Department in providing new schools in the Wagga District has been kept fairly abreast of ascertained requirements.

Accommodation.

The school-buildings provide ample accommodation for all requirements. Only in a very few places is there anything like overcrowding, and in these prompt action has been taken to adjust the accommodation to the attendance. At the end of 1887 the school-houses provided accommodation for 17,231 pupils, and by new schools and additions, there is now room for 17,779. This is exclusive of the new schools mentioned above as ready for occupation. A comparison of these figures with the average attendance will show that in providing accommodation, the Department is well ahead of all reasonable wants. Indeed, in a matter of this kind, there is very little fear of falling behind requirements.

A contrary danger is more to be apprehended, as Local Boards and the public generally are very keen to obtain expenditure on new buildings. I have endeavoured to exercise the strictest economy in the matter of buildings and repairs, whilst seeing, at the same time, that nothing absolutely necessary has been left undone. By the policy of resisting all unnecessary demands I am satisfied that considerable savings have been effected.

The schools have been kept well supplied with furniture and all necessary working appliances.

Inspection.

Inspection.

The number of schools regularly inspected was 322, leaving 8 not examined. Five of these were in the Hay Section, 2 in Albury, and 1 in Yass. The gentlemen in charge of these sections give satisfactory reasons in their own reports for these omissions.

As in former years, the inspections were of a searching character. Every pupil was tested in all the subjects prescribed for his class. Deductions for high age and long enrolment were more rigidly enforced than in former years. By these means we have aimed at keeping up a ratio between the time at school and the progress made by each pupil. The gentlemen associated with me in the work of inspection all bear testimony to the practical utility of this mode of examining. The deductions spoken of will, I think, account for the slight falling off in the attainments as compared with last year.

The number of pupils examined in 1887 was 9,532, and in 1888 we tested 10,446. The following table exhibits the proficiency in all the principal subjects for these two years:—

	1887.	1888.
Reading	83.5	80
Writing	86.5	84
Arithmetic.....	72.6	68
Grammar	76.7	73
Geography.....	84.9	78
History.....	74.6	83
Scripture	85.0	75

For special reasons, the following schools underwent a second regular examination:—Dalton, Stony Creek, Deniliquin, and Moama.

We are indebted to the Deputy Chief Inspector, Mr. Bridges, for valuable aid in the inspection of 6 of the more important schools. These visits from the Chief Inspector's office, of a man of such large experience, are of the greatest possible utility, as tending to preserve uniformity of inspection. All inspectors' reports are examined by the Deputy Chief, and, therefore, he has special opportunities of noticing any deviation from the aims of the standard.

Forty-one ordinary inspections were made during the year, besides a very great number of incidental visits. Each ordinary inspection takes nearly a day to complete it, but the incidental visits are of a less formal character, and involve no writing unless grave errors are revealed. I paid a second visit to 48 out of the 61 schools in the Wagga Section, and, as District Inspector, visited a large number of schools in the other sections.

The subjoined table shows the number and the various kinds of schools in the district, as also the number that received a regular inspection:—

	Public.		Provisional.	Half-time.	House-to-house.	Total.
	Schools.	Departments				
(a) Opened during year 1888 or part thereof	234	245	66	6	13	330
(b) Number that received regular inspection	231	242	62	6	12	322
(c) Number that did not receive regular inspection	3	3	4	...	1	8
(d) Number that received ordinary inspection	35	37	3	...	1	41

Of the 322 schools examined, 248 were either equal to or above the standard; that is 77 per cent. were found to be in a fair or very satisfactory condition.

The number of teachers and pupil-teachers employed to work the schools to which this report refers is 410. The following table shows the ranks or grades they hold in the service:—

Section.	Teachers.								Pupil-teachers.					Total Teachers and Pupil-teachers.
	I A.	I B.	II A.	II B.	IIIA.	IIIB.	IIIC.	Unclassed	Class I.	Class II.	Class III.	Class IV.	Probationers.	
Albury ..	1	7	9	15	10	14	34	1	7	2	7	1	108	
Hay....	1	12	4	10	18	6	25	3	3	3	6	...	91	
Wagga ..	2	11	4	11	14	7	20	5	2	2	7	2	87	
Yass ..	1	1	10	4	13	13	41	6	3	4	5	...	124	
Totals	1	5	40	21	54	60	120	15	15	11	25	3	410	

I am able to speak in favourable terms of the industry, good conduct, and general bearing of the teachers. As a rule, they win the confidence and respect of the people amongst whom they live. Of course, among such a large staff, occasional dissatisfaction will arise, but we had no very serious complaint to deal with during the year. As hitherto, the pupil-teachers have proved themselves thoroughly efficient.

Attendance Branch.

There are two Attendance Officers employed in the district—one at Wagga, and one at Deniliquin. I am not very well satisfied with the present arrangement; the officer at Wagga has more than he can do, and the one at Deniliquin is sometimes without work. During the year there were 368 cases brought into Court, and in 252 of these convictions were obtained; 1,124 parents were cautioned by letter.

Summary.

The total number of pupils enrolled for any portion of the year was 18,902, and the average attendance was 10,172. The number of pupils examined was 10,446. The fees paid amounted to £5,644 19s. 6½d. These figures show a moderate increase in each item for the year now closed.

Wagga Wagga, 12th January, 1888.

G. O'BYRNE,
District Inspector.

ANNEX Z.

INSPECTOR LAWFORD'S REPORT.

I HAVE the honor to submit my general report for the year 1888.

The boundaries of the Yass Section are practically the same this year as they were last. At the end of 1887 there were in operation 101 schools, of which the following 4 have been closed during the current year.

School.	Giving places for.
Fisher's Creek	40
Trigalong	28
Barwang	33
Cullagong	14

Total places lost 115

The first two were not open during any part of the year, and Cullagong was only open for the first two weeks in January.

The following schools are new, and are in places where there were no schools before :—

Name.	Room for.	Built by.	Cost.
Boginderra	15	Local Committee.	£45
Ferncliffe	8	„	nil
Toual	15	„	nil
Boambolo	21	„	£60
Total	59		£105

Boambolo was only finished in December, too late for a teacher to be sent there this year.

A new school has been built by the residents at Milong, at no expense to the Department, to replace that burned down, giving places for 40 children.

A new school has been built at Wargela by the inspector at a cost of £90, to replace the old one, giving additional places for 19 children.

The Provisional School at Geegullalong was converted during the year into a Public School, and was enlarged and repaired by the inspector at a cost of £27 7s. 7d., giving places for 10 more children.

Repairs and improvements were made at 13 schools by the inspector, at a cost of £201 7s.

Adequacy of School Accommodation.

At the beginning of the year there were places for 5,611 children ; by the closing of the 4 schools above mentioned, 115 places have been lost, but the new schools and extra room given by the larger size of the new buildings, or by additions, provide fresh places for 128 children. There is thus a net gain of 13 places, and room now for 5,624 children.

No new residences have been built, but tenders for one at Derringullen are under consideration.

One new weathershed, at Bendenine, has been built at a cost of £13 16s.

Applications for new schools were dealt with at Cavendale (renewed) and Narellan, and refused ; but were granted at Caulderwood, Broken Dam, and Wee Jasper, subject to the residents putting up the necessary buildings at their own expense.

There is therefore exactly the same number of schools in actual operation at the end of this year as there was at the end of 1887 and 1886, viz., 101 ; but Boambolo will probably start at the beginning of next year or very soon after.

The total number of schools open during the year or any part of the year is 103, of which 97 have been open during the whole year, and 6 during a part only.

All these have been fully inspected once, excepting Cullagong, which, as mentioned above, was only open during the first fortnight of the year, and collapsed unexpectedly, so that it was impossible to visit it. Ordinary inspections have been made at 4 schools, time not allowing of any more of these inspections being held.

As regards the adequacy of the means of education in this district, there is nothing to add to what was said last year. As then the number of schools closed balances the new ones.

The actual condition of the schools as elicited by inspection is not so good this year, 77 per cent. being up to or above the standard as against 92 per cent. last year ; but it is possible that a stricter application of the standards is responsible for this, and the percentage is good when all things are taken into account, and will probably compare very well with other districts.

There is no reason to suppose that next year will not produce as good or better results.

Attendance Branch.

The school attendance and payments officers have now been for a complete year and a half under the District Inspector, and although not under the inspectors, yet such officers in the country districts have to deal with all the forms relating to the enforcement of the compulsory clauses of the Act, and the collection of fees in arrear, or their remission in cases of poverty. The efficacy of that portion of the Act is thus brought more thoroughly under their notice than in former years.

By clause 20 parents and guardians are obliged to send all children between the ages of 6 and 14 to school for seventy days in each half year ; unless—

1. The child is being regularly and efficiently instructed in some other manner.
2. The child has been sick.
3. Or lives beyond 2 miles from a school.
4. Or has been educated up to the standard.

And the next clause provides the penalty on conviction of the first offence of a fine not exceeding 5s., and for succeeding offences a fine not exceeding £1, and in default, imprisonment for a term not exceeding seven days.

Forms are sent to all teachers, on which it is their duty to report the names of all children of the school age whose homes are within 2 miles of the school, at the end of every quarter. These are sent to the inspector, and it becomes his duty to recommend prosecution or otherwise. When a case is taken into Court the burden of proof is on the prosecution, and it sometimes happens that a case is dismissed from inability on the part of the prosecution to prove that the child is *not* being regularly and efficiently instructed in some other manner. This is especially the case with regard to private schools. There is no means of compelling the managers of such to record the attendance of their pupils, nor to disclose the number of days they have attended, even if they can do so. This in towns affords an easy method by which the Act may be evaded.

Then, when the evidence is complete, it sometimes happens that the Magistrates take a sentimental view of a case, and dismiss it without any just cause.

When a conviction is obtained the fines in most cases are very light, the fine on a first conviction being generally 1s., and the costs amount to about 5s. more, so that, assuming a parent intended to defy

defy the law, he might keep his child at home entirely and save 12s. a year by having no school fees to pay. It is a Departmental rule that no parent should be prosecuted who has not first been cautioned. Take the case of a useful boy of 12, whose father finds his work on a farm worth a good deal of money. The boy is kept at home entirely; at the end of six months the father is cautioned; at the end of a year he is prosecuted, and fined 1s., and 4s. 10d. costs; so that on the first year he actually saves 6s. 2d. in non-payment of school fees. The boy is then 13, and the father has to stand two more prosecutions, which cost him at the outside £2 10s., but more probably about 30s. As the boy's labour is probably worth ten times the first sum, he can cheerfully afford to pay the highest fine the Bench can impose.

This is not the time or place to suggest remedies, but it is submitted that the Act is defective in the following respects:—

1. That the onus of proving that a child is *not* being efficiently educated is thrown on the prosecution.
2. That there are no means of compelling a disclosure of the attendance at private schools.
3. That the maximum fine allowed for second and subsequent offences is too low.

Yass, 31st December, 1888.

L. E. LAWFORD,
Inspector.

ANNEX Z 1.

ASSISTANT INSPECTOR WRIGHT'S REPORT.

THERE were 94 schools open in the Albury Section of the Wagga Wagga District during some portion of the year 1888, 4 of which—Jingellic Public, Mountain Creek Provisional, Milbrulong Provisional, and Wyangle Half-time—were closed, owing to the low attendance.

During the year 7 new schools were opened, viz., 5 Provisional—Bull Plain, Jubilee Downs, Keajura Creek, Overton, and Manus; 1 Half-time at the Black's Camp, near Brungle, and 1 House School at Kyamba. There are now in operation 90 schools, viz.:—

60 Public,
17 Provisional,
6 Half-time,
7 House-to-house,

and the teaching staff of the district consists of 87 principal teachers and mistresses, 3 assistants, and 18 pupil-teachers, whose classifications are shown in the following tables:—

TEACHERS.

	I B.	II A.	II B.	III A.	III B.	III C.	Unclassed.	Totals.
Principals and mistresses.	1	6	7	15	10	14	34	87
Assistants	1	2	3
Totals.....	1	7	9	15	10	14	34	90

PUPIL-TEACHERS.

	Cl. I.	Cl. II.	Cl. III.	Cl. IV.	Probationers.	Total.
Pupil-teachers	1	7	2	7	1	18

The educational wants of the district are very fairly met by the schools in operation, and the opening of schools at Burrumbuttock East, Round Water Hole, Ellerslie, and Major's Plains in 1889, will leave but little room for the establishment of schools in this district.

Inspection.

All the schools but 2 open during the year received a regular inspection, one of the two omitted being Jingellic, which closed early in the year, and the other, Manus, which was not opened until December, too late for inspection. Two schools received a second regular inspection, and twenty ordinary inspections were made, while incidental visits were paid to a large number of schools.

The school lately opened for the aboriginals near Brungle was inspected by Mr. District Inspector O'Byrne, who has included the statistics relating to it in his report.

Of the other 91 schools inspected 53 were above, 14 up to, and 24 below the standard in efficiency; that is, 73.6 per cent. of the schools satisfied the requirements. This coincides exactly with the results obtained last year, and so confirms the statement made in my last report, that this percentage represents very fairly the results our teachers can obtain.

The organization and discipline of the schools have been, as heretofore, very satisfactory.

The attainments of the pupils in the principal subjects of examination are shown in the subjoined summary:—

Subject.	Pupils Examined.	Percentage up to or above Standard.
Reading	2,584	82.3
Writing	2,573	92.3
Dictation.....	2,066	71.2
Arithmetic	2,380	77.9
Grammar	911	69.3
Geography	943	79.5
English history	795	73.0
Australian history	230	72.1
Scripture.....	2,335	80.0
Object lessons	1,647	90.4
Singing	1,776	85.1
Drill	2,430	89.5

In some subjects, notably Australian history, geography, and reading, there is a falling off in the attainments, but the results obtained in these subjects are still high, while in arithmetic and dictation, which in former years have been weak, there is a decided improvement.

Adequacy

Adequacy of School Accommodation.

At the beginning of the year places were provided for 4,484 pupils, but ninety-eight of these places have been lost through the closing of schools, &c. The new schools erected or rented provide accommodation for 182 pupils, as follows:—

Schools.	Vested or rented.	New or to replace old	Places for.	Cost.
Culeairn.....	Vested	To replace old	21	£60
Manus	"	New	15	£45
Black's Camp	"	"	24
Overton.....	Rented	"	25
Jubilee Downs	"	"	17
Bull Plain.....	"	"	10
Kyamba.....	"	"	20

Thus there is a gain for the year of thirty-four places, so that there is now accommodation for 4,518 pupils, this being ample for all probable contingencies.

Repairs and additions have been effected at 19 schools, and information respecting these is given below:—

Minor repairs have been executed at 15 schools under the supervision of the Inspector at a total cost of £197 14s.

Four schools have been repaired by the architect at a cost of £369 5s. 6d.

In addition to these, repairs are in progress at 6 schools, involving an expenditure of £445, and improvements to 5 schools have been sanctioned, the estimated cost of which is £500.

Summary.

To sum up, the educational wants of the district are well met, the teaching staff is complete, and the teachers as a body are well adapted for their work. The efficiency of the schools is very satisfactory, and there is every reason to believe that in all respects equally high results will be obtained next year.

STEWART WRIGHT.

Albury, 31st December, 1888.

ANNEX Z 2.

ASSISTANT INSPECTOR MACLARDY'S REPORT.

In January last I was relieved of the supervision of the following 9 schools:—Public, Berrigan, Clarendon, Cooba Creek, Mitta Mitta, Nangunia, Nangus, and Tocumwall; Provisional, Billabong and Leniston, and there were left in this section of the district 69 schools, classed as follows:—Public, 49; Provisional, 17; and House-to-house, 3.

Of these, the Provisional Schools at Birrego and Narama were closed early in the year on account of the diminution in the attendance. The Public School at Toganmain has also been closed since June last for the same reason. There is a probability, however, of this last school being reopened next year.

The Provisional Schools at Cuddell Siding, Lower North Berry Jerry, and Tibooburra, were during the year, converted to Public.

The designation of the Public School at Woodlands, near Moama, was changed to Altcar, as confusion had arisen from the fact that a post town in another district had already received the former name.

During the year the following new schools were opened:—Provisional, at Kildary (on the boundary of the Buddigower and Kildary Runs), and at Pooncairie (Darling River); House-to-house, at Mia Mia (Wakool River), and at Tori (near Lake Tori).

Altogether there were in operation during the year or some portion thereof, 73 schools, viz., 49 Public in 52 departments, 16 Provisional, and 5 House-to-house.

After further inquiry it was decided to establish a Provisional School at Cuthero (Darling River), for which the application had been declined last year. Schools are also to be established at the following places:—Public, at Alma (South Broken Hill), and Eaglehawk (Mount Gipps); Provisional, at Euriowie (Poolamacca Tin Mines), Mount Browne (near Milparinka), Uley and Winchenden Vale (near Coolaman). The application for a Provisional School at Bunyip (near Jerilderie) was declined, but the residents were informed that an itinerant teacher would be appointed if they provided the necessary school accommodation.

The school buildings provided by the residents at Cuthero and Ivanhoe are now ready for occupation, and these schools will be opened as soon as practicable. The residents at Merrowie Creek have not yet provided the necessary school accommodation for a House-to-house School at that place.

During the year school buildings were erected at the following places:—Ivanhoe, Kildary, Lower North Berry Jerry, Mimosa East, and Pooncairie, 5 under local Committees and 1 under the District Inspector. Three of these were new, and 2 to replace old buildings. The residents at Mia Mia and Tori also provided the necessary House-to-house school accommodation at these places.

The buildings rented for school purposes at South Marowie were burnt down, through accident, last July. The Stewards of the Hillston Jockey Club kindly lent their Committee room (which is situated about half-a-mile from the site of the old school) for use as a school, pending the completion of the new school buildings, which, I have just been informed, are now ready for inspection. School buildings are also in course of erection at Broken Hill, Euriowie, Kindra, Mount Browne, and Tibooburra, and a new class-room is being built at Silverton. The buildings at Broken Hill and Silverton are under the supervision of the architect, the rest under that of local committees. The probable cost to the Department of those being erected under local committees, including the school buildings at Cuthero, which are complete and ready for inspection, will be £577 10s., and the additional accommodation 185 places.

Teachers' residences, under the supervision of the architect, were erected at Broken Hill and Round Hill.

The removal of the Maloga Black Mission, referred to in last year's report, was finally determined on by the Aborigines' Protection Association. This necessitated the removal of the school buildings to the new site, 3 miles distant from the old one. This was accordingly done, and the buildings were also enlarged, to afford accommodation for the increased attendance. The work was under the supervision of the inspector. The new position is called by the aborigines "Cummeragunja," and as the place is totally distinct from Maloga, this name has been suggested as the new designation of the school. The exact position of the new Mission Station was for some considerable time undetermined, and as the aborigines had in the meantime left the old station, and had not settled themselves in any definite place, the school was closed for about three months.

Several minor repairs, improvements, &c. to school buildings have been effected, when and where required, under the supervision of the Inspector, and at a cost to the Department of £108 15s. 6d.

The accommodation provided by the school buildings in operation at the beginning of the year was 4,555 places. By the closing of schools, &c., 223 places were lost, and by the erection of new buildings, &c., 296 places were gained, or an increase of 63 places; so that at the close of the year the accommodation provided by existing schools is 4,618 places. This accommodation, together with that being provided by buildings

buildings in course of erection, is sufficient for present requirements. Cases where additional accommodation is found necessary are dealt with as they arise, and wherever there appears a reasonable probability that a sufficient number of children can be collected in a central position, or in groups within a reasonable radius the means of education are provided either in the form of Provisional Schools or of House-to-house teaching stations.

The following schools were not inspected this year:—Public—Milparinka and Toganmain; Provisional—Birrego and Narama; and House-to-house, Tori.

The school at Milparinka, situated about 450 miles north-west from Hay, was closed when I visited that portion of the district. Toganmain Public was closed for the last six months, and I was unable to visit it during the first six months of the year. The Provisional Schools at Birrego and Narama were closed early in the year, and the House-to-house School at Tori was only opened last month.

Of the 68 schools inspected, one—Juneo Reefs Provisional—was inspected by the District Inspector. Deniliquin Primary Public and Moama Public received second regular inspections from the Deputy-Chief Inspector and the District Inspector. Two schools received ordinary inspections, and I also received a second regular inspection from myself. That no other school received a second inspection was due to the first six months of the year being taken up by special trips to the extreme south, east, and west of the district, and by the tour of inspection in the north-west corner of the Colony, beyond the Darling. These trips so interfered with the work of inspection that by the end of June only 16 schools had been inspected. During the last six months fifty-three inspections were made, but my continued ill-health interfered largely with the work of inspection.

The number of pupils examined in the several subjects, and the results of inspection, together with a comparison with those of last year, are shown in the following table:—

Subjects.	1887.		1888.	
	Number of pupils Examined.	Percentage up to or above Standard.	Number of pupils Examined.	Percentage up to or above Standard.
Reading.....	2,375	66·8	2,402	54·4
Writing.....	2,375	69·5	2,402	61·2
Arithmetic	1,888	59·9	1,935	57·4
Grammar	744	65·7	777	65·2
Geography	782	76·4	829	66·3
History—				
English	504	71·2	574	52·6
Australian.....	147	80·2	148	72·9
Scripture	2,311	70·0	2,395	65·7
Object lessons	1,356	76·4	1,327	73·5
Drawing	504	67·6	577	62·0
Music.....	1,960	65·0	1,910	69·0
French			4	75·0
Euclid	44	68·1	71	71·9
Algebra			11	54·5
Mensuration			6	83·3
Latin.....			6	66·6
Natural science			22	81·8
Needlework	709	72·4	879	72·8
Drill	930	67·8	747	74·9

With the exception of grammar, music, euclid, needlework, and drill, the results for this year are below those of last year. This is due to the fact that the requirements of the standards as to the age of the pupils in the several classes have been more strictly enforced. Thus not only is the period of enrolment in class taken into account, but children are expected to commence second class work at 7 years of age, third class work at 8½ years, and so on, as specified by the standards of proficiency. Children were examined according to their period of enrolment in class, and if their ages were beyond that required by the standards for that period of enrolment, a suitable proportion of marks was deducted. It was found necessary to make the greatest deductions in reading and history. Of the other subjects, the percentage of passes in arithmetic approaches most nearly to that of last year, and it must therefore be considered that the results in this subject show decided improvement.

Strenuous efforts are being made to bring the schools in this district into a state of greater efficiency, and I have every hope that these efforts will meet with success.

The following tables show the number and classification of the teachers and pupil-teachers under my supervision.

1. Teachers.

Office.	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Prob.	Totals.
Principal or Mistress	1	11	4	8	14	6	25	69
Assistant	1	...	2	4	7
Totals.....	...	1	12	4	10	18	6	25	76

2. Pupil-teachers.

Class I.	Class II.	Class III.	Class IV.	Totals.
3	3	3	6	15

In this district a great difficulty has been found in obtaining suitable applicants for employment in small schools. Teachers, who are qualified for training applicants, have been instructed to look out for such persons, but they report in nearly all cases that they cannot find suitable persons. Four applicants were examined by me this year, but only one was deemed eligible for employment.

With the exception of the schools in the oldest established centres, and in the mining districts of the Barrier Ranges and Mount Browne, the number of pupils enrolled is steadily decreasing. This is due to the unsettled condition of the population of this extensive district, through the tendency of the land to revert into large holdings. In other respects the educational condition of the district is satisfactory.

Hay, 29th December, 1888.

J. D. ST. CLAIR MACLARDY,

Assistant Inspector.

ANNEX

ANNEX Z 3.

DISTRICT INSPECTOR JOHNSON'S REPORT.

Two hundred and twenty-four schools of all classes commenced work in this district in January last, but 6 of these were closed during the year on account of the falling off in the attendance thereat. Eight new schools were brought into operation, and 3 that were closed during the previous year were reopened. There were, therefore, 229 schools in the district at the close of the year. The new schools opened are Goolma Public, Beri Provisional, Suntop Provisional, Plain Creek Provisional, Belairingah Provisional, Gooriannawa House-to-house, Narrango House-to-house, and Pandora's Pass House-to-house; and the schools reopened are Medway House-to-house, Arthurville Provisional, and Inglegar House-to-house. The Public School at Bourke consisted, at the beginning of the year, of a Primary and an Infants' Department, but it being considered advisable to have a separate school for girls, these two were closed and one each for boys and girls opened instead. There are not at present any Evening Schools in this district. The Superior Public Schools are those at Dubbo, Mudgee, and Wellington.

It has been decided to establish new schools at Peabody, Tong Bong, Buckhobble, and Eurimbla, and these will be opened immediately the necessary buildings have been erected. When they shall have started work the educational requirements of every part of this district will be fully met. The population of this part of the Colony increases but slowly, and it is not therefore probable that many new schools will be required in the near future.

New buildings were erected during the year at Goolma, East Tabrabucca, Beri, Suntop, Buggil, Belairingah, Curban, Munderoran, and Plain Creek. Those at Buggil, Curban, and Munderoran replaced old and unsuitable buildings, and the others were erected in places where no schools previously existed. Contracts have also been let for new buildings, including a teacher's residence at Nyngan, for a new schoolroom at Coonabarabran, and for class-rooms at Bourke and Dubbo.

The present school buildings of the district are capable of comfortably seating 10,381 pupils, being an increase of 134 seats made during the year. The enrolment for the September quarter, which is the highest for the year, was 9,431, so that the number of seats provided exceeded the number of pupils enrolled by 950, but as the whole number enrolled is never present at any one time, the excess of seats over the number actually required is considerably greater. With the exception of the schools at Nyngan, Bourke, and Coonabarabran, no schoolroom is overcrowded, and, as before stated, increased accommodation is being provided at these places.

Forty-five buildings were repaired or otherwise improved during the year, namely, those at—

Amaroo	Molong
Botobolar	Mookerawa
Bourke North	Mumbil
Byerock	Mulyan
Canadian Lead	Murrumbidgee
Cobar	Nymagee
Cobbora	Nyngan
Coonamble	Pipeclay Creek
Crudine Creek	Ponto
Cudgegong	Rocky Ponds
Curra Creek	Sally's Flat
Dapper	Sandy Creek
Dubbo	Spring Flat
Eurunderee	Tambaroora
Galwadgerie	Ulamabri
Geuri	Wanaaring
Goodrich	Warkton
Goolma	Wellington
Gulgamree	Wilbertree
Gulgong	Windeyer
Hill End	Yeoval
Lawson's Creek	Yulundry
Minore	

A considerable outlay for repairs will always be necessary in this district, on account of the severity of the climate and the ravages of the white ants. The only safeguard against these latter is the use of the local pine, the timber of which has not so far been attacked by them.

All the schools of the district, except the Evening School at Cobar, which was closed in the early part of the year, received a regular inspection, and 155 schools were inspected a second time, so that 389 inspections were made during the year. Of these, 194 were made by Mr. Inspector Rooney, 89 by Mr. Assistant Inspector Smith, and the remaining 106 by myself.

The number of pupils examined in the various subjects of instruction and the percentages of passes in each for this and the previous year are given in the subjoined table:—

Subject.	1887.		1888.	
	No. of pupils.	Percentages.	No. of pupils.	Percentages.
Reading	6,651	88.7	7,004	90.2
Writing	6,321	94.5	6,872	95.3
Arithmetic	6,139	61.1	6,855	76.8
Grammar	2,485	74.7	2,727	78.8
Geography	2,559	76.7	2,703	83.0
History	2,650	81.6	2,721	83.5
Scripture	5,701	88.3	6,484	89.6
Object lesson	3,493	91.7	3,699	92.1
Drawing	1,966	88.0	2,033	87.4
Music	4,993	92.5	4,931	87.9
French	50	100.0	46	100.0
Euclid	344	97.6	265	96.6
Algebra	46	32.6	90	100.0
Mensuration	252	63.0	272	93.5
Latin	52	100.0	69	100.0
Science	198	100.0	511	100.0

The numbers of pupils examined in each of the more important subjects is greater this year than last, and a very marked improvement has taken place in the percentages of passes. Especially is this so in arithmetic, which satisfactory result is mainly due to the improved methods of handling the subject and

and also to the greater time and attention devoted to it by the teachers generally. On visiting the schools the second time this year, I observed that several teachers had adopted a more intelligent method of teaching arithmetic, and were more careful to see that each point explained was well understood before proceeding to the next. In most schools also copying has almost wholly been suppressed, and thus one of the greatest hindrances to satisfactory progress has been removed.

The teaching, generally speaking, is painstaking and intelligent, but there are some teachers who give very little time to the previous preparation of the various lessons, and, as a result, the subject matter is slovenly and imperfectly treated, and the explanation is often wanting in clearness and is sometimes even incorrect. This is especially noticeable in arithmetic, in object lessons, in the explanation of words, &c., and in the reading lessons. This neglect of previous preparation, both as to matter and method, is sufficient to account for many of the poor results so often obtained at the inspection. If teachers would carefully prepare their lessons beforehand, and at frequent and regular intervals thoroughly examine their pupils on the work done, taking notes of their weak points with the object of afterwards making good the defects; and also, during the various lessons, question rigorously and exhaustively on the subject being taught, much of the, at present, unavoidable fault-finding by the inspectors, would become a thing of the past.

As a rule, the schools of this District are well disciplined, the pupils being orderly, obedient, and well behaved, and the schoolwork being carried on quietly and systematically. In this connection the following schools deserve special mention:—Dubbo Superior Public, Mudgee Superior Public, Hill End Public, and Canadian Lead Public. Many of the smaller bush schools also are admirably conducted.

The various school premises are, with few exceptions, neatly and cleanly kept; but in some few cases, though the schoolrooms are clean, yet the premises have an untidy and uncared for look, and it is very noticeable that when this is the case, the appearance of the majority of the pupils is in keeping therewith. This untidiness is, in some instances, attributable to neglect on the part of the teachers, but I think, in the majority of cases it is the result of unconsciousness on their part.

There is also much improvement observable in the keeping of the school records. Seldom now are the necessary entries found to be either incomplete or incorrect, and the books themselves are carefully preserved. It is in the construction of time-tables and programmes of lessons that the greatest want of judgment and skill is to be noticed. Some few teachers look upon these documents as being intended for show rather than for use, and so take little or no pains with their construction, and when completed, suspend them on the walls of their schoolrooms, and take no further notice of them. In the larger number of schools, however, these documents are skilfully drawn up and their provisions carefully followed.

The condition in relation to the standard of the schools inspected are given hereunder:—

Schools.	Below the Standard.	Up to the Standard.	Above the Standard.	Totals.
Public	27	11	116	154
Provisional	13	4	14	31
Half-time	10	10	14	34
House-to-house.....	4	1	9	14
Evening.....	1	1
Totals.....	54	26	154	234

That is, 76.9 per cent. of the schools were up to or above the standard, and 23.1 per cent. failed to reach it. This shows a slight improvement on last year.

The quarterly enrolment and average attendance for the years 1887 and 1888 are given in the following table:—

	1887.		1888.	
	Enrolment.	Average.	Enrolment.	Average.
March	9,142	5,858.2	9,244	6,450.9
June	9,238	6,437.0	9,134	6,745.3
September.....	9,072	6,163.4	9,431	6,592.2
December	9,153	6,508.2	9,148	6,436.2

The average attendance for each of the first three quarters of 1888 is greater than for the same periods of 1887, but for the December quarter it is less. The falling off in the attendance towards the end of the year was caused by the elder children being kept at home to drive stock to water, the usual home supply having become exhausted through the long continued drought; and the intense heat during the months of November and December caused many of the younger children to be kept away, especially those living at a distance from school.

The number of pupils returned as having attended for less than seventy days during each half year was—

June	3,964
December	3,640

Of these, however, 566 and 631 were enrolled for the June and December quarters respectively, as pupils of Half-time Schools, and could not, therefore, have made up the full number of days. Legal proceedings were taken against the parents of 119 pupils for short attendance, and 74 of these were convicted and fined in various amounts.

At the beginning of the year the fees in arrear amounted to £354 17s. 5d., and the whole of this would no doubt have been cleared off had it not been for the drought, which in this part of the Colony caused an almost total failure of the farmers' crops, and great loss to all classes of residents. The amount now owing is £137 11s. 2d., the greater part of which has been promised, and consists chiefly of small sums.

The teachers employed in this District are classified as follows :—

Class I.		Class II.		Class III.			Unclassified.	Totals.
A.	B.	A.	B.	A.	B.	C.		
1	2	18	20	43	24	32	85	225

The teachers are as a body industrious, well conducted, and intelligent, and, with few exceptions, they are most anxious to perform their duties with credit to themselves and benefit to their pupils.

Summary.

The present condition of the schools of this district as regards organization, discipline, and instruction, is satisfactory, and an equal, if not increased state of efficiency, may confidently be expected during the year just entered upon.

Wellington, 10th January, 1889.

W. H. JOHNSON,
District Inspector.

ANNEX Z 4.

INSPECTOR ROONEY'S REPORT.

I HAVE the honor to submit this, my general report for 1888 :—

At the termination of the year 1887 there were 93 schools in operation in this portion of the Wellington District, viz. :—

65 Public.
8 Provisional.
16 Half-time.
4 House-to-house.

Total 93

In June last the Public School at Sally's Flat, and the Provisional School at Crudine Creek, were reduced to the rank of Half-time.

The following new schools were opened during the year :—

Goolma (Public).
East Tabrabucca (Provisional).
Narrangerie (House-to-house).
Pandora's Pass (House-to-house).

Now, the end of the present year the number of schools stands thus :—

65 Public.
8 Provisional.
18 Half-time.
6 House-to-house.

Total 97

Narrangerie House-to-house is in future to be worked as a Provisional School.
A Provisional School is in course of erection at Tong Bong.

Organization.

In this portion of the Inspectoral District, the school buildings, with one exception, are suitably and centrally situated.

During the year three new buildings were erected in localities where no schools previously existed. Repairs and improvements of a substantial character have been effected at 18 schools.

All the Public and Provisional Schools, except one, are vested in the Department, and their material condition may be considered as good.

The buildings used for Half-time and for House-to-house Schools are suitable, and in very fair repair. All schools are properly lighted and ventilated.

At the beginning of the year the accommodation afforded by the existing schools was estimated as sufficient for 3,454 pupils. At present accommodation is provided for 3,548 pupils.

The annual returns show that there was an average daily attendance of 2,804 throughout the year.

Enrolment.

The total enrolment for the year amounted to 4,565, and of this number 465 are returned as having attended more than one school. The enrolment and average attendance for each quarter of the year were as follows :—

	Enrolment.	Average Attendance.
1st quarter	3,751	2,710·9
2nd quarter	3,723	2,796·4
3rd quarter	3,817	2,861·9
4th quarter	3,746	2,752·2

The enrolment for the year is 76, and the average attendance 147 more than in 1887. The average attendance is 74 per cent. of the quarterly enrolments, being thus, 2 per cent. greater than that of last year.

Inspection.

Of the 97 schools in operation during the year all received general or regular inspection—91 from myself and 6 from the District Inspector. Two schools received a second regular inspection, and 1 a third. Three schools, not under my supervision, were also examined by me.

All schools received ordinary inspection except Pandora's Pass House-to-house, which was not in operation till 5th December.

The work of inspection may be summed up thus :

103 General and Regular inspections.
99 Ordinary inspections.

The

The number of pupils present at the examination of the 97 schools was 2,895. The proficiency displayed in the various subjects in relation to the standards is given below. The results of the preceding year are also given.

Subjects.	Number of Pupils Examined.	Percentage satisfying Standard.	
		In 1888.	In 1887.
Reading	2,895	95	90
Writing	2,763	97	96
Arithmetic	2,821	89.7	73½
Grammar	1,297	84	80
Geography	1,245	85.7	80
History—English	900	76	76
" Australian	462	81	84
Scripture	2,582	81	83
Object lessons	1,755	95	92
Drawing	916	83	82
Music	2,037	81	93
French	35	100	100
Euclid	128	93	95
Algebra	35	100	100
Mensuration	97	100	73
Latin	24	100	100
Natural science	144	100	100
Trigonometry		None examined.	
Needlework	943	100	100
Drill	1,822	85	98

Reading, arithmetic, object lessons, and mensuration show considerable improvement, but English composition and geography are still imperfectly taught in most schools.

The methods of instruction are suitable, and in nearly all cases, the teaching is painstaking and effective.

The following table shows the efficiency of the schools inspected in relation to the standard :—

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public	3	7	55
Provisional	2	1	5
Half-time	3	5	10
House-to-house	1	1	4
Total	9	14	74

Thus 90 per cent. of the schools satisfied or exceeded the standard.

Pupils from the Public Schools at Hill End and Mudgee were successful at the University examinations held in September.

Teachers.

The teachers of the schools under my supervision are classified as follows :—

I B.....	2
II A.....	7
II B.....	12
III A.....	20
III B.....	12
III C.....	10
Unclassified	29
Total	92
Pupil-teachers—	
Class I.....	10
" II.....	3
" III.....	5
" IV.....	2
Total	20

Only three complaints were made against teachers during the year, and in each case the teacher was exonerated.

The Department's property, on the whole, is well cared for, and the schoolrooms, with one or two exceptions, are clean and cheerful. Proper attention is given to the classification of pupils, and an improvement has taken place in the construction of the lesson guides and in the compilation of the returns.

As a body the teachers are respectable, and are animated with diligence and zeal in the discharge of their duties.

Savings Banks have been established in connection with 5 schools, but in no instance with the success expected.

Summary.

1. This part of the Wellington District is well provided with schools.
2. The material condition of the school buildings is good.
3. The accommodation in most cases exceeds the requirement.
4. The total enrolment and average attendance increased during the year.
5. All schools were fully inspected.
6. The organization of the schools is good.
7. The general discipline is very satisfactory.

In conclusion, it may be stated that good work has been done during the year just ended, and that the prospects for 1889 are very favourable.

Mudgee, 31st December, 1888.

JOHN P. ROONEY,
Inspector.

ANNEX

ANNEX Z 5.

INSPECTOR SMITH'S REPORT.

I HAVE the honor to submit my general report upon the schools in the Dubbo section of the Wellington District for the year 1888.

There were in operation during the year, or some portion thereof, 51 Public, 13 Provisional, 4 Half-time, and 7 House Schools—total, 75 schools. Of these, 2 of the Public were, at the beginning of the year, Provisional Schools, namely, Angledool and Warkton, and Bourke first consisted of a Primary and an Infants' School, which were closed, and Boys' and Girls' Departments opened instead. Yalcogrin Public with New Berida Provisional formed a House School, and the Half-time Schools, Biamble and Caigan, were also converted into a House School, while the House School at Inglegar, which had been closed for some time, was re-opened. Two new Provisional Schools, Belairingah and Plain Creek, and one new House School, Goorianawa, were established during the year in places where no schools had previously existed. Warrumbungul Public School was closed for want of sufficient attendance. The establishment of a House School at Wilga, near Nevertire, and a Provisional School at Mount Billygoe, near Cobar, has been sanctioned by the Minister; and teachers will be appointed thereto immediately after the Christmas vacation. Two or three other applications for House Schools from some of the outlying portions of the district may be expected within a short period, and when these have been attended to it may be taken for granted that the means of education will be well distributed and within easy reach of all classes of the community.

Every school in the Dubbo section of this great and important district received either a regular or a general inspection, one Public School two regular inspections, and twenty-three schools ordinary inspections. The number of inspections in 1885, the year before my appointment, and one most favourable for travelling, was ninety-one, which was slightly in excess of that for 1884; and the number last year, though much time was spent in conducting special examinations of teachers and pupil-teachers, was 91. These special examinations were held in no less than seven different places, namely, Angledool, Bourke, Brewarrina, Cobar, Coonamble, Coonabarabran, and Nymagee. The regular examinations were also held in Dubbo during the months of June and December.

In 1887, out of seventy-eight schools there were:—

Below Standard.	Up to Standard.	Above Standard.
27	8	43

And in 1888, out of seventy-five schools there were:—

Below Standard.	Up to Standard.	Above Standard.
27	3	45

The following table will show the proficiency of the pupils examined:—

Subjects.	Number of pupils examined.	Percentages satisfying Standard.
Reading	2,427	82 per cent.
Writing	2,427	90 "
Arithmetic	2,427	66 "
Grammar	763	65 "
Geography	791	76 "
History—English	604	79 "
" Australian.....	90	100 "
Scripture.....	2,280	92 "
Object Lessons	1,195	89 "
Drawing	613	85 "
Music	1,819	90 "
French	11	100 "
Euclid	83	100 "
Algebra	20	100 "
Mensuration	98	81 "
Latin	20	100 "
Natural Science	208	100 "
Needlework.....	519	93 "
Drill.....	1,662	90 "

The number of children present at examination was greater this year than in 1887. This may be accounted for by the (comparatively speaking) better condition of the roads in the interior of the district. During the September quarter an epidemic of measles broke out, which seriously interfered with school work, and reduced the attendance of scholars.

A statement of the enrolment and average attendance is hereto subjoined:—

Quarters.	No. of Schools.	Enrolment.	Average Attendance.
March	72	3,091	2,090·2
June	72	3,041	2,192·4
September	72	3,125	2,004·2
December	73	3,036	2,040·4

Thirty-five out of fifty-one teachers employed in the Public Schools in this section are duly qualified by examination for their several positions. The teachers of the Provisional and House Schools are not required to hold any classification by examination, and the majority of them are young and without experience in their profession. All the teachers, with but very few exceptions, performed their arduous duties in a most conscientious and faithful manner, and this, too, under severe trials, arising from an exceedingly

exceedingly warm climate and poor accommodation in the houses where they board and lodge. Only three complaints were brought before me during the year for investigation—one of a very serious character, and two for undue severity in the use of the cane. The behaviour of the children under tuition has been decidedly good, though in the back-blocks there is still the same unpleasant habit—an inexcusable fault—of answering questions in a whispering tone of voice.

The material condition of the schools has undergone considerable improvement. Besides the two new Provisional Schools, already referred to—Belairingah and Plain Creek—three other new schools have been erected to replace old and incommodious buildings, namely, Buggil, Curban, and Mundooran. The Public School at Trangie has been lengthened, and the following schools repaired:—Dubbo, Coonamble, Bourke (North), Byerock, Minore, Ulamabri, Wanaaring, and Warkton. A new teacher's residence has been built at Narromine, and a new weathershed at Nevertire. New buildings and improvements and alteration of teacher's residence, to replace old and incommodious ones, are in the course of erection at Coonabarabran. The erection of a class-room at Dubbo, and of two class-rooms at Bourke, and also the enlargement of the Public School at Wanaaring, has been sanctioned by the Minister.

At the end of 1887 there was accommodation for 4,100 pupils, and making allowance for the school closed (Warrumbungul), and the new schools opened (Belairingah, Plain Creek, and Goorianawa), there is still an excess of accommodation over actual requirements.

In conclusion, the organization in every respect of all the schools may be pronounced very fair, the discipline decidedly good, and progress in attainments fair.

Dubbo, 4 January, 1889.

JOHN LESLIE SMITH.

ANNEX Z 6.

REPORT OF PRINCIPAL OF TRAINING SCHOOL, FORT-STREET.

At the beginning of the year the students were divided into two sections, the seniors (fourteen in number), who had completed six months of their training, and the juniors (ten in number), who had just been admitted. The seniors were examined and classified in June last; and as the Minister had decided to make important changes in the organization of the training institutions, it was determined that no further admissions should take place until January, 1889. During the latter half of the year, therefore, there were only ten students in training. Their conduct has, almost without exception, been highly satisfactory, while their diligence and attention to duty have been equally commendable.

2. STAFF.

The permanent staff consisted of two persons, Principal and Assistant. Drill, Drawing, and Vocal Music were taught by visiting masters, and the practical training of the students was entrusted to the Head Masters of the Fort-street Superior Public School and the Practising School.

3. COURSE OF STUDY.

Reading.

Smith's Specimens of English Literature. Shakespeare's "Julius Cæsar."

English Grammar.

Parsing. Derivation.
Analysis. Punctuation.
Composition. Prosody.

Geography.

Descriptive: Australia, Europe, North America. Physical: Geikie's Physical Geography.
Mapping.

Mathematics.

Arithmetic in Theory and Practice. Algebra up to, and including, Binomial
Mensuration, Plane and Solid. Theorem.
Euclid, Books I to VI, with deductions. Elementary Geometrical Analysis.
Plane Trigonometry.

Natural Science.

Physics: Heat, Magnetism, and Electricity. Chemistry: Outline of the Non-metals.
Physiology: Elementary.

Latin.

Smith's Principia Latina, Part I. Cæsar, Books I and II.
Ihne's Syntax.

School Management.

Public Instruction Act and Regulations. Outline of the History and progress of
Organization, Discipline, Method. Primary Education in New South Wales.

History and English Literature.

British History from William I to Victoria. Australian History.
English Literature: Elizabeth to Cromwell, inclusive.

Vocal Music.

Staff Notation. Rudiments.
Elements of Harmony.

Drawing.

Freehand, Model, and Geometrical.

Military Drill.

Squad and Company Drill.
Dumb-bell, Indian Club, Single-stick, and
other gymnastic exercises.

4. PRACTICAL TRAINING.

The small number of students in training this year has given them the opportunity for more extended practice in the Art of Teaching than could possibly have been granted to larger sessions. Every student spent four (and in some cases even five) weeks in the Practising School, engaged either in the actual work of teaching, or in watching the method employed by the classified teachers of that establishment. In addition to this valuable training, every Wednesday afternoon was devoted to *test lessons*, which were afterwards criticised by the students themselves, and also by a committee consisting of the Principal of the Training School and the Head Masters of the Fort-street Superior Public School and the Practising School. The hints and suggestions given to the students by these officers will undoubtedly prove of much benefit to them hereafter.

5. PUPIL-TEACHERS' CLASSES.

Certain important alterations have taken place in the organization of these classes. Latin has been added to the list of subjects for female pupil-teachers, and French for males of the first and second classes.

Singing, Drawing, and Drill are no longer taught to the two upper classes, while the two lower classes now confine their attention entirely to these subjects.

The number of pupil-teachers in attendance during the year was 381.

Their conduct has been on the whole satisfactory, but there is a tendency among a small minority of them to absent themselves on frivolous pretences. This, however, has now to a large extent been checked.

Considering the limited time at their disposal, the pupil-teachers attending the Wednesday Mathematical Classes have, with but few exceptions, made satisfactory progress.

J. CONWAY,
Principal.

ANNEX Z 7.

REPORT OF PRINCIPAL OF HURLSTONE TRAINING SCHOOL.

I HAVE the honor to submit my report upon the Training School, Hurlstone, Ashfield, for the year 1888.

1. COURSE OF STUDY.

English.

Reading : Macaulay's Essays, Bacon's Essays, Elocution : Recitations from Shakespeare, Shakespeare's "Julius Cæsar." Goldsmith, and Sheridan.
Composition, Parsing, Analysis, and Prosody.

Mathematics.

Arithmetic : Theory and Practice. Mensuration.

Geography.

Descriptive : Europe, North America, and Australasia, in detail. Physical : Surface of the earth, climate, oceans, atmosphere, seasons, &c.
Commercial and Political. Mapping.

English Literature.

From Elizabeth to Cromwell, inclusive. Special Study : "Julius Cæsar," Shakespeare.

British History.

From William I to Victoria. Sutherland's Australian History.

Natural History.

Physiology.

French.

Havet's Grammar. Recitation : Molière's "Bourgeois Gentilhomme"; Molière's "Précieuses Ridicules";
Hallard's Grammar. "La Bague de Diamants."
Charles XII, Voltaire.

School Management.

Organization, method, discipline. Public Schools Act and Regulations.
Compilation of School Records, Time-tables, History of Reformers of Education.
and Lesson Programmes.

Domestic Economy.

Sanitary Science. Needlework.
Cookery : Theory and Practice.

Vocal Music.

Theory and Practice. Tonic Sol-fa.
Staff Notation.

Drawing.

Blackboard. Model and Elementary Perspective.
Freehand from Copies. Geometrical.

Drill.

Calisthenics. School Drill.

Kindergarten.

2. THE STUDENTS.

In January, 1888, there were 51 students—the full number—29 of whom had been in training from July, 1887, and completed their course in June, 1888. Of the remaining 22, one was obliged to retire from the service of the Department, on account of ill-health, and the others are now undergoing classification examination prior to leaving the Training School. No fresh students were admitted last July, as entirely new arrangements are contemplated for the year 1889. Consequently there has been only one class this half-year instead of two.

The conduct of the students has been satisfactory, their diligence being especially commendable. Their health, though giving in some instances cause for anxiety last half-year, has been remarkably good this half.

Both in attainments and abilities, a wide diversity is still noticeable. The proposed plan of not admitting to the Training Schools any but the very best pupil-teachers is most welcome, and almost imperatively needed. Among the present set, several knew very little French and History on entering, and two knew no French at all. When it is remembered that sometimes even the best enter having comparatively slight acquaintance with Sanitary Science, Literature, Physiology, and even Needlework, the heavy amount of work to be done in one year will be better understood. Composition and General Reading—with a few striking exceptions—are weak points, but with the contemplated extension of time to two years, a great improvement in mental culture may be hoped for.

It is noticeable that a large percentage of those most advanced in French and History come from Sydney schools; some of the most solidly grounded in Arithmetic and Grammar from the *small country schools*; and also that a considerable number of those who *teach* effectively, and with good style, have been trained as pupil-teachers in the *large country schools*, such as Maitland, Newcastle, and Bathurst.

3. ADVANTAGE OF THE PROPOSED TWO YEARS' COURSE OF TRAINING AND PREPARATION FOR MATRICULATION EXAMINATION.

All the subjects at present taught can be better grounded; there will be more time to correct deeply-rooted errors in Practical Skill; another subject—such as Botany, or even Phonography—could be taken; and the range of information will be widened to a very beneficial extent.

4. PRACTICAL TRAINING.

The arrangements have hitherto been, that the juniors do the Practising School work, and give Model Lessons too. As seniors, they are exempt from the Practising School Work, but continue to give the Model Lessons to children in the presence of fellow-students and the Principal, weekly or bi-weekly. This has been the only means by which each student could get her fair share of practice in the school. The present set of students had completed their prescribed course of Practising School Work as juniors, and as they appeared weaker in attainments than in practical skill, and needed time to study, it was deemed wiser that they should give the Model Lessons only, as other seniors had done. As there were no juniors in July, two ex-students were sent as assistants to the mistress of the school. Each Thursday a student is selected by the Instructor in Music to give a lesson either in Theory or Part Singing to a class of children; occasionally the Instructor gives the lesson himself, to show what he wishes done. Lessons in Drill are given in presence of the Drill Instructor, sometimes to children, but more frequently to fellow-students. Lessons (oral) are also prepared weekly by students and given to fellow-students. The lessons in the Practising School are determined by the mistress, the Model Lessons by the Principal. If left to themselves, the students—even the brightest—show an inclination to choose somewhat hackneyed subjects for their specimen lessons. Model Lessons are occasionally given by the Principal and the mistress of the Practising School in the presence of the students.

5. KINDERGARTEN.

Instruction in the Kindergarten System is given by the mistress of the Riley-street Public School to the students, who are taught to occupy themselves with the various gifts exactly as the children would do. The lesson is given once a week, and lasts an hour. This subject can only receive partial attention in the Practising School, otherwise the requirements of the standard would not be met. The pupil-teacher receives the lessons with the students, and puts into practice as much as she can of the instruction she receives. It appears quite possible to give a real Kindergarten class—Kindergarten and nothing else—a fair trial at Hurlstone. A class of about twelve could be formed, the children to be under seven years of age, to come in the morning only, and to provide their own material; the pupil-teacher, under the supervision of the mistress, could devote herself to their instruction in the morning, and attend to other duties in the afternoon. As far as can be judged, the Kindergarten system appears to be in favour with children and parents alike.

6 THE PREMISES.

The premises are in good condition. The following improvements have been effected:—
 (a) The water has been laid on. Until this year the institution had depended on the rainfall for its supply of water, but the very dry weather that set in almost at the beginning of the year necessitated other arrangements, and the water was laid on from the main supply without delay.
 (b) A proper lavatory was constructed.
 (c) The grounds have received much needed attention from a practical gardener sent for the purpose.

Hurlstone Training School, Ashfield, 21 December, 1888.

MARY M. EVERITT,
Principal.

APPENDIX XIII.

REPORT OF PUBLIC SCHOOL CADET CORPS.

DURING the year corps have been formed at Broughtonworth, Camperdown, and Balmain.

The following teachers have been appointed honorary subalterns during the year, viz., Mr. Deer, of Broughtonworth, and Mr. Kennedy, of Thirlmere.

The number of cadets on the roll for the year is 2,191, against 2,054 for last year. The increase is only 137, owing, partly, to the want of suitable carbines. This difficulty, I am happy to say, will soon be overcome, as the 2,000 light snider carbines, applied for in June, are expected to arrive about the end of January, 1889. There are three applications for the formation of corps under consideration, viz., from Lismore, Macdonaldtown, and Wickham, and I hope to induce the masters of the principal city and suburban schools to take to the cadet movement a little more warmly and form corps where none already exist. The various corps were visited and inspected by me during the year, and, on the whole, everything was in a satisfactory condition. Parades were held by me monthly and target practice weekly, in connection with the metropolitan and suburban corps, and both have been well attended.

It is my intention to establish a corps of senior cadets, to be composed of youths who have left school, but who are still too young to enrol in our Volunteer Force; and it will be my aim to make this branch a connecting link between the Public School Cadet Corps and the defence force of the Colony, so that the ranks of the Volunteers may be recruited, if not entirely, in a great measure from the senior cadet corps.

The annual prize meeting held on the 1st, 2nd, and 3rd of last November, was an unqualified success; 645 cadets competed, of whom 137 camped on the rifle range for five days, and behaved admirably.

The prizes were presented to the winners by Mrs. Poole, at the Protestant Hall, on the 8th of December, the Public Schools' shield going to the Sydney High School, and the shield presented by Mr. Condy being won by Quartermaster-sergeant Richardson of the same school.

I append report of inspection of the Cadet Artillery by Captain Savage of the Permanent Artillery, with Colonel Roberts' remarks thereon.

H. W. STRONG, Major,
Commanding Public Schools Cadet Corps.

The Under Secretary, Department of Public Instruction.

From Captain Savage, Adjutant, P.A., to Colonel Roberts, C.M.G., Commanding Artillery and Military Forces.

Sir,

20 August, 1888.

I have the honor to inform you that, in accordance with your directions, I inspected the Cadet Artillery at field-gun drill, on Saturday afternoon last, the 18th instant, at Victoria Barracks, and beg to forward the following report.

The parade consisted of four detachments with 6-pounder L.B. guns, who were exercised in drill and field-artillery movements.

The drill, with the exception of one or two minor details, was admirably carried out—the cadets showing a thorough acquaintance with their duties, and working smartly and keenly under intelligent Nos. 1.

The want of such drill stores as lanyards, lights, and dummy tubes, cartridges, and projectiles, was, however, very obvious, and it is a question whether the practice that at present obtains of "going through the motion" of loading, sighting, and firing is not calculated to infuse a spirit of carelessness in the performance of those duties.

A

A variety of intricate field-battery movements were gone through most creditably, and showed that the instruction imparted to the cadets has been very thorough, and the cadets themselves have made the most of their opportunities.

The behaviour of the cadets on parade left nothing to be desired.

In conclusion, I would point out that the guns in possession of the cadets are of very old date, and, in view of the fact that they are sometimes fired with live shell, it would seem desirable that they should be thoroughly examined by some competent authority.

I have, &c.,

A. S. P. SAVAGE,

Captain and Adjutant, P.A.

In forwarding this report, I would desire to fully endorse the remarks of Captain Savage, especially those referring to the gun-drill. The practice of "going through the motions of loading" I consider is a fruitful cause for the accidents so often heard of lately, when blank cartridges are used; in the desire to appear smart, the sponge is not properly pressed home, and, with muzzle-loaders, the danger of fragments of ignited cartridge remaining in the bore is incurred. I would strongly advise that the proper drill cartridges and shot of wood, with strong lanyards attached, be given to the Cadet Corps. If it is desired, the guns could be examined and reported on immediately, and this, I consider, should be carried out prior to any practice taking place, in order to prevent the possibility of a serious accident; but when the date of the manufacture of these guns is considered, in two cases out of four, being over 100 years old, I would recommend that no more shot practice should be carried out with them. The 16-pounders in use by the Artillery Forces could be utilized, if the ammunition expended was replaced by the Department of Instruction, under which Cadet Corps now are maintained.—CHAS. F. ROBERTS, Col., 21/8/88.

B.C., P.S. Cadet Corps. Forwarded for information and remark *re* suggestions contained herein.
—J.S.R., M.-G., 23/8/88.

H. W. STRONG, Major,
Commanding Public School Cadet Corps.

APPENDIX XIV.

REPORT ON HIGH SCHOOLS.

THE five High Schools in operation at the end of 1887 were carried on through 1888. All are still conducted in temporary buildings, which, though fairly suitable, are not attractive in situation or appearance. Arrangements have, however, been completed for leasing at Bathurst commodious, well-appointed, and centrally-situated premises, so that, in future, so far as Bathurst is concerned, there will be nothing in the material condition of the High School that will hinder its success.

The want of proper buildings is severely felt in Sydney. The insufficiency of accommodation makes school organization difficult, and prevents the formation of such classes as would utilise the teaching staff to the best advantage. The limited space for play-ground is also a serious drawback.

At the beginning of the year the schools in Sydney were fitted with single-seated desks of an improved pattern, but the crowded state of the various class-rooms has rendered it necessary to place these desks so close together that much of the benefit of their special construction is lost.

All the schools are adequately furnished and are supplied with proper working appliances. In connection with the Sydney boys school is a small laboratory for the teaching of Chemistry and Physics. At Maitland, the Head Master has a very large and useful collection of geological specimens.

The number of pupils attending the High Schools is steadily increasing. For 1887 the total enrolment and average daily attendance were respectively 710 and 498·9; for 1888 they were 737 and 550·7. In the following table particulars of the attendance at each school are given:—

Name of School.	Total Enrolment for 1888.	Average Quarterly Enrolment.	Average Daily Attendance.
Bathurst Girls	27	26	23·2
Maitland Boys	66	53	47·1
„ Girls	38	30	27·1
Sydney Boys	315	260	239·9
„ Girls	291	233	213·4
Totals	737	602	550·7

The disciplinary condition of the High Schools is very good in all respects. Punctual and regular attendance prevails in all. The pupils are very orderly, attentive to instruction, and diligent in study. During the examinations we saw nothing in the conduct or demeanour of any pupil to which serious exception could be taken. The boys are regularly drilled, and the girls receive instruction in calisthenics. There is a very efficient cadet corps at the Sydney boys' school.

The subjects of instruction are fixed by regulation, but in arranging the work for each year care is taken that the course of lessons accords with the programme of the University examinations. Our examinations were both oral and written. The questions were framed so as to cover the course of instruction for the year, and, without being puzzling, were minute and searching. The oral answering was prompt and intelligent; the written work gave evidence of fairly accurate and thoughtful acquaintance with the various subjects of study. While we are pleased to be able to report an all-round improvement in the attainments, we regret that, excepting in four classes, sufficient attention is not paid to neatness in the execution of the written work. Careless, slovenly writing is too often seen.

The methods of teaching vary according to the professional training and experience of the teachers employed, but, viewed as a whole, they are intelligent and are vigorously and earnestly applied. The following table shows in detail the results of the examinations in the various subjects:—

Subjects.	No. of Pupils Examined.	Percentage of Passes.
English	583	96
Dictation	526	90
Arithmetic	583	89
Mensuration	300	90
History	583	88
Latin	560	94
French	583	93
Geography	307	93
Drawing	537	86
Geometry	403	96
Algebra	583	92
Trigonometry	102	86
Natural Science	142	100
Greek	12	100
German	35	100

The number of pupils examined, 583, is an increase of 66 upon the number examined in 1887.

Our favourable opinion of the work done in the High Schools is borne out by the results of the University Examinations: 70 High School pupils passed the junior, 20 the senior, and 11 the matriculation examinations of the year. Those who passed were not the only ones qualified to do so; many well-informed pupils are kept away from these examinations by the inability or unwillingness of their parents to pay the fees demanded. Former High School pupils now in attendance at the University have distinguished themselves at the yearly examinations.

During the year, a collection of exhibits, comprising specimens of plain and ornamental writing, drawings, maps, solutions of problems in the different sections of mathematics, translations from and into French and Latin, and original essays in English, French, and Latin, was forwarded to the International Exhibition at Melbourne. This collection has been awarded a prize of the "first order of merit."

The

The total expenditure on High Schools during 1888 was £6,691 18s. 8d.; the amount received from school fees for the same period was £1,326 12s. 7d.: so that the actual cost to the State was £2,365 6s. 1d., or less than £3 5s. for each pupil enrolled. This fact shows how utterly unfounded is the complaint sometimes made that the High Schools are a heavy charge upon the State funds.

In conclusion, we have to report that while it is unfortunately still a fact that in the country towns the High Schools do not receive such measure of public support as their efficiency merits, they show a steadily increasing number of pupils, and are doing very good work for the State at a very small cost.

For information as to the range of instruction in the High Schools we append the synopsis of the year's work for the Sixth Form in the Sydney High School.

F. BRIDGES, } Inspectors.

APPENDIX XVI.

REPORT OF THE WORK OF THE ARCHITECT'S OFFICE.

BUILDINGS.

BETWEEN the 1st January and the 31st December, 1888, there have been delivered to the Department, ready for occupation, the following buildings, viz. :—

No.	Description of Work.	Accommodation.	Cost.
14	Public School Buildings	1,745	£ s. d. 12,052 2 5
17	Additions, &c., providing increased accommodation	1,869	5,484 0 0
272	Additions, &c., not providing increased accommodation	17,991 12 11
9	Weather-sheds	625 9 3

The school accommodation has thus been increased this year by 3,614, at a cost of £17,536 2s. 5d., or about £4 17s. per head, against 9,840 at a cost of £52,795 3s. 4d., or about £5 7s. 3d. per head last year, and 8,321, at a cost of £41,101 4s. 8d., or about £5 per head in 1887.

In addition to these works contracts have been entered into, and are now in progress, and will probably all be finished by the end of 1889 as follows:—

No.	Description of Work.	Accommodation.	Cost.
21	Public School Buildings	2,821	£ s. d. 21,990 16 1
14	Additions, &c., providing increased accommodation	1,012	3,443 10 6
87	Additions, &c., not providing increased accommodation..	7,306 10 9
3	Weather-sheds.....	186 5 0

It will thus be seen that in the work now in progress additional accommodation is provided for 3,833 children, at a cost of £25,434 6s. 7d., or about £6 12s. 8d. per head, and there is every indication of this number being largely increased during 1889. The slightly greater average cost of accommodation arises from the fact that with most of the schools, residences are being provided.

OUTLAY.

The total outlay for work certified for by me during the year is £47,484 6s. 10d., in 1,038 certificates, averaging about £47.

CORRESPONDENCE, &C.

The number of papers received, registered, and dealt with during the year is 7,000, against 6,000 last year, and the number of letters, reports, &c., written and dispatched, 3,526, against 3,354 last year, besides 747 papers referred to the clerks of works, and 112 orders for school furniture. 346 contracts were entered into during the year, for which 346 sets of contract documents had to be prepared, and a number of works were carried out under the Minister's authority, but for which no contracts were signed. The clerical work has therefore increased, and the staff is one less than it was for the first half of last year.

PLANS AND SPECIFICATIONS.

During the year 527 plans, &c., and 577 specifications have been prepared, against 439 plans, &c., and 490 specifications last year, and for the first six months of 1887, I had four more draftsmen and four more clerks of works than I now have.

The work in this branch has been very heavy during the year, and it is only by the extra diligence displayed by my officers, and by making large use of photography in the preparation of drawings, that I have, I am glad to say, been able to cope with it, and prevent the work accumulating and getting into arrears.

COST.

The cost of the office for salaries was £4,786 7s. 5d., and for travelling expenses £1,233 17s. 4d. during the year, making a total of £6,020 4s. 9d., against £5,798 for salaries in 1887, and £1,269 2s. 2d. for travelling expenses, making a total of £7,067 2s. 2d. The decrease in the amount paid for salaries is very large, amounting to £1,011 12s. 7d.

STAFF.

The staff is less by four draftsmen, four clerks of works, and one clerk than it was for the first six months of last year, and as the work done does not, and is not likely to decrease, I think I am justified in saying the number of my officers is as small as possible. The foregoing statements of the amount of work done in this office justify me in reporting that I have reason to be satisfied with the care and diligence with which all the officers serving under me, perform their duties.

WM. E. KEMP,
Architect for Public Schools.

APPENDIX XVII.

REPORT OF THE BOARD OF TECHNICAL EDUCATION.

To the Honorable the Minister of Public Instruction.

THE Board of Technical Education has much satisfaction in reporting that the number of students attending the classes at the Sydney Technical College and Provincial Technical Schools has again increased. The enrolment of students during the year at the Sydney Technical College and Branch Technical Schools numbered 2,847 individuals, being an increase of 152 over those for 1887. The holding of celebrations in connection with the centenary of the foundation of the colony and other causes interfered to some extent with the attendance of the students during the first quarter of the year, but the numbers enrolled afterwards showed an increase over those of similar terms in the preceding year. The continued scarcity of constant employment in the various trades during the last three years has doubtless prevented many youths from joining the classes, as in more prosperous times they could better afford to pay the fees charged to attend courses of instruction.

There is still, as in former years, a difference of opinion as to the subjects which should be taught by the Board, and the manner of teaching them. Speaking on this point, Sir Philip Magnus, the Director of the City and Guilds of London Institute for the Advancement of Technical Education, in an address delivered at the opening of the Finsbury Technical College, said:—“It must be remembered, in considering this difference of method, that the main purpose of the teaching to be given in this institution is not to make scientific men, nor to train scientists, as the Americans call them, but to educate technikers as the Germans say—to explain to those preparing for industrial work, or already engaged in it, the principles that have a direct bearing upon their occupation, so that they may be enabled to think back from the processes they see to the causes underlying them, and thus substitute scientific method for mere rule of thumb. It is almost superfluous to remark that instruction of this kind can be given by those only who possess a wide and deep knowledge of their subject, and a full and accurate acquaintance with the practical and commercial details of the industry or trade to which their teaching refers. Indeed, it is now generally recognised that technical teachers must be familiar with the processes of the factory or workshop. Teachers of this kind the President of the British Association must have had in view when, in his opening address at Southampton, contrasting them with the ardent students of nature, ‘the High Priests of Science,’ he said:—‘It is not to them that we must look for our excellence and progress in practical science, nor must we look for it to the rule of thumb practitioner, who is guided by what comes nearer

ncarer to instinct. It is to the man of science, who gives attention to practical questions, and to the practitioner, who devotes part of his time to the prosecution of strictly scientific investigations, that we owe the rapid progress of the present day.' Such men, of whom the writer himself is so illustrious an example, are difficult to find; and yet the progress of technical education in this country depends upon their supply. The teacher who is to inspire confidence in his artisan students must address them in the language they understand, and must show that he is not beyond appreciating practical difficulties which occur to them in their daily work. Dr. Siemens further tells us that 'theory and practice are so interdependent that an intimate union between them is a matter of absolute necessity for our future progress,' and certainly none are more alive to the truth of this proposition, as regards educational progress, than artisan students, for it is to them a constant source of regret that they are unable to see the relation of scientific truths as they are generally imparted to them to the work in which they are engaged; and in this complaint, which is so often heard, is found the protest of workmen against the divorce of practice from theory in the instruction which they frequently receive."

On the 11th December, 1884, the Board requested the Government to commission the President of the Board to make special inquiries with reference to technical schools and other matters connected with the system of technical instruction in Great Britain and on the continent of Europe, and Mr. Combes submitted an exhaustive report to His Excellency the Governor, which was printed by order of Parliament. This report contained a number of recommendations respecting the imparting of instruction in art, science, and manual training at the Technical College, and in connection with the public school system of the colony. Mr. Combes is still in Europe, and at his own cost prosecuting inquiries into industrial instruction and selecting apparatus for the Technical College. He has recently intimated to the Board that he has now ready a scheme of manual training for the approval of the Government.

The Board considers that the premises and appliances of the Sydney Technical College could be much better utilised by the formation of a regularly organised day school, in addition to the afternoon and evening classes now held, and with prescribed courses of study similar to those seen recently by the Secretary in successful operation at the principal technical institutions of Great Britain. If the necessary funds were available the Board would accordingly recommend that similar courses of technical instruction be imparted at the Sydney Technical College during the daytime as are now given in the evening. In this respect its operations should be made to correspond with the Finsbury Technical College, which, since its formation, has had both day and evening classes.

It has ever been the desire of the Board not to enter into competition with the Sydney University, the Grammar School, the High Schools, Primary Schools, or private tutors; and therefore the instruction given under the Board has been confined chiefly to subjects not embraced in the programmes of the other educational agencies of the colony. The Board has several times relinquished features of its work as soon as more suitable agencies have been found willing to take up the teaching, hence the conduct of evening classes in primary school subjects, such as arithmetic, grammar, writing, &c., which had been conducted at the Technical College for several years, were formed into an Evening Public School. The Board also only consented to conduct several other literary classes at the Mechanics' School of Arts out of deference to representations that it would not be convenient for its committee to continue them while the Board rented the greater part of the buildings. Classes in law, English history, English literature, Greek, Italian, singing, and music, which were also transferred from the Committee of the School of Arts, were therefore discontinued, as subjects not within the province of the Board.

There were 35 fortnightly Board meetings held during the year under the presidency of Mr. Norman Selse, with an average attendance of five members; 16 meetings of the Organising Committee, under the chairmanship of Dr. Belgrave; and 12 monthly meetings of the Finance Committee to examine accounts. Resignations of their positions on the Board were received during the year from Mr. Justice Windeyer, Mr. H. C. Russell, and Professor Liversidge, and the Board must express its indebtedness to these gentlemen for their services when originally engaged in the work of fixing the curriculum of the Technical College and engaging for it a staff of instructors and teachers.

Buildings for Sydney Technical College.

The principal defect in the operations of the Sydney Technical College, as regards convenience and economical working, is that operations have to be conducted in three different streets in the city, instead of the several departments being held in one central building specially constructed for the purpose, as in similar institutions elsewhere. The Board has for several years recommended that a suitable building for the metropolitan institution should be erected in a central position, as a great saving could thereby be effected in payments for rental, administration, teaching, &c. Many students have found it impossible to bear the intense heat of the present badly ventilated class rooms during the summer months, and there can be no doubt that the numbers attending would largely increase if a properly constructed building, similar to those now in course of erection for branches of the Sydney University, were provided for the Technical College.

The Committee of the Sydney Mechanics' School of Arts having declined on the expiration of the lease of its premises, to allow the chemistry classes to be held there, the laboratory has been removed to new buildings at No. 301, Pitt-street, adjoining the Temperance Hall. The classes in the department of domestic economy, for cookery, dress-cutting, &c., which were formerly held at the Royal Arcade and in the Sussex-street Technical Institute, have also been removed to the same premises. As the large hall of the School of Arts could not be obtained for every evening, in order to accommodate the large number of students now attending the school of design, the apartments hitherto used for the chemical laboratory and the registrar's office will in future be utilised for the art classes. The office of the Board is also removed from Phillip-street to the new premises in Pitt-street, and this change will enable the Secretary to have better supervision over the arrangements connected with the Technical College; the operations of which will even now be conducted in four places in Sydney situated widely apart, instead of as it should be in one suitable building erected for the purpose.

As the leases of two of the premises now rented for the purposes of the Technical College will expire during the present year, it is very desirable that steps should be at once taken to renew these leases or provide a suitable building in which all the operations can be conducted at one central spot.

Enrolments of Students.

At the Sydney Technical College the number of individual students enrolled and who received instruction for at least one session was 2,077, and there were also 770 individual students entered at the Provincial Schools, making a total of 2,847 persons. The quarterly enrolments of individual students at the Technical College were 835 in the first quarter, 1,081 in the second, 1,133 in the third, and 1,007 in the fourth, or an average quarterly enrolment of 1,014 persons. The average quarterly attendances were respectively 621, 793.7, 749.3, and 698.4, or 771.6 daily. The number of attendances at the Technical College during the first quarter was 12,930; second quarter, 15,810; third quarter, 19,385; fourth quarter, 14,441. The entries for the classes at the Technical College numbered in the first quarter 1,197 in the second quarter 1,440, in the third quarter 1,484, in the fourth quarter 1,262 or an average of 1,425.7.

The average enrolments in each class at the Sydney Technical College during the four quarters were as follows:—Agriculture, elementary, 19.6; advanced, 14.6; afternoon, 6.5; botany, 3.3; veterinary science, 6.5; wool-sorting, 5.7; applied mechanics, 16.2; mechanical drawing, 55.2; plumbing, 14; naval architecture, 4.5; boiler-making, 12.7; fitting and turning, 34.7; afternoon class, 3.5; architecture, 48.2; carpentry, evening, 52.5; afternoon 26.7; Deaf, Dumb, and Blind Institution, 13.5; brick-laying, 12.5; masonry, 10.7; cabinet-making, 8.5; coach-building, 6; freehand drawing, 140.2; modelling, 22.2; geometry, plane, 26.5; solid, 15.5; afternoon 11.7; perspective, 19; design, 14.2; house painting,

painting, 22.5; art decorating, 13.5; practical chemistry, Monday, 15; Friday, 12; chemistry (theoretical), first year 11.5; second year, 8.7; photography, 10.7; bookkeeping, 4.9; calligraphy, 50.7; phonography, 90.7; actuarial science, 9; German, 10.5; French, 39.5; Latin, 36.5; domestic economy, 4.5; cookery (plain) 27.7; elementary, 12.5; advanced, 8.5; dresscutting, 46.5; tailors' cutting, 19; geology, 9; crystallography, 13.5; mineralogy, 15.6; mining, 8.3; mathematics—geometry 12.5; algebra, 14.5; trigonometry, 3.5; arithmetic, 3.5; navigation, 2; elocution, 17.5; pharmacy, 13.2; materia medica, 10.7; pharmaceutical chemistry, 16.7; dispensing, 11.7; dentistry, 13.5; physics, 12.5; electricity, 17.5; telegraphy, 6.7; freehand, (teacher's special) 20, Saturday 25. Of the individual students who attended at the Technical College in 1888, 990 received one quarter's instruction, 497 two quarter's instruction, 286 three quarter's instruction, and 304 four quarter's instruction.

The 770 individual students who entered during last year at Provincial Branch Technical Schools were enrolled as follows:—537 in the first quarter, 617 in the second quarter, 720 in the third quarter, and 709 in the fourth quarter, or an average enrolment of 733.5. The average quarterly attendances were respectively 254.6, 314.6, 343.9, and 385.6, or 378.4 daily. The number of attendances during the first quarter was 4,098; second quarter, 5,273; third quarter, 7,198; fourth quarter, 5,957.

The average entries for the classes at the Branch Provincial Schools for the four quarters were as follows:—Newcastle: Chemistry, 9.5; mineralogy, 6.5; metallurgy, 6; mechanical drawing, 8.3; building construction, 6.3; phonography—senior, 29.5; junior, 17; model drawing, 18.7; perspective, 7.7; geometry, 8; mathematics, 10. Lambton: Model drawing, 7. Plattsburg: Model drawing, 8; geometry, 9. West Maitland: Drawing, 75.7; mathematics, 18.2. Singleton: Drawing, 49.7. Coogee: Drawing, 5. Paddington: Drawing, 30. Petersham: Drawing, 56.5. Granville: Geometrical drawing, 9; mechanical drawing, 8.7. Parramatta: Geometrical drawing, 6.7; model drawing, 16. Bathurst: Physics, 30.5; chemistry, 7.5; geology, 14.7; mineralogy, 9; mathematics, 17; botany, 4.7; bookkeeping, 14; drawing, 21.2; French, 21. Morpeth: Drawing, 15; mechanical drawing, 4.5. Goulburn: Theoretical chemistry, 21; practical chemistry, 4.7; geology, 5.7; mineralogy, 4; mathematics, 12; freehand drawing, 60.5; mechanical drawing, 4.5; architecture, 9. Kogarah: Mechanical drawing, 12. Glen Innes: Geology and mineralogy, 14.

The total quarterly enrolments for the classes under the Board in the Sydney Technical College and Branch Technical Schools were 1,734 in the first quarter, 2,087 in the second quarter, 2,204 in the third quarter, and 1,971 in the fourth quarter, or an average quarterly enrolment of 2,159.1. The average quarterly attendances at the classes under the Board was respectively 875.6, 1,108.3, 1,093.2, 1,084, or 1,150 daily. The total number of attendances of students in Sydney and the country districts during the first quarter was 17,028; second quarter, 21,083; third quarter, 26,583; fourth quarter, 20,398.

The occupations of students attending the Sydney Technical College during the year were as follows:—Accountants, 6; architects, 34; artillerymen, 7; agents, 27; assayers, 12; baker, 1; blacksmiths, 11; booksellers, 7; bookbinder, 1; builders, 14; bricklayers, 23; boxmaker, 1; bootmakers, 2; boilermakers, 18; brass finishers, 2; brass moulder, 1; carpenters and joiners, 128; chemists, 31; carters, 5; civil servants, 10; clerks, 322; clergyman, 1; coachbuilders, 12; cement tester, 1; curators, 3; cabinet-makers, 4; decorators, 16; dentists, 8; drapers, 21; dressmakers, 3; draughtsmen, 26; engineers, 126; engravers, 5; engine drivers, 14; electricians, 6; farmers, 12; farriers, 3; feather duster maker, 1; fitters, 29; french polisher, 1; frame maker, 1; gardeners, 9; grocers, 9; ironmongers, 11; ironmoulders, 4; japanners, 2; jewellers, 9; labourers, 7; ladies, 362; lithographers, 8; masons, 31; matmaker, 1; mariners, 7; messengers, 37; modellers, 8; nurses, 5; operators, 5; painters, 34; pattern-makers, 8; photographers, 6; plasterers, 16; plumbers, 34; printers, 22; policemen, 5; saddler, 1; scholars and students, 257; sign-writers, 14; shipwrights, 5; slater, 1; stationers, 6; storemen, 10; surgeon, 1; surveyors, 19; tailors, 37; teachers—male, 34; female, 76; tinsmiths, 4; tobacco manufacturer, 1; type-writer, 1; warehousemen, 14; woodcarvers, 3; woodturners, 2; wool-sorters, 3.

The nationalities of the students who attended the Sydney Technical College during the year 1888 shows that there were born in New South Wales, 1,287; Victoria, 139; Queensland, 41; South Australia, 7; Tasmania, 27; New Zealand, 55; England, 322; Scotland, 84; Ireland, 46; Wales, 7; America, 18; South America, 2; Germany, 16; France, 1; Russia, 2; Norway, 2; Poland, 1; Belgium, 1; Switzerland, 1; Denmark, 3; Italy, 2; Mauritius, 1; South Africa, 1; South Sea Islands, 2; New Caledonia, 1; India, 7; China, 1. It will thus be seen of the 2,077 students who attended the Technical College, 1,556 were Australasian born, evidencing that colonial youths largely avail themselves of the advantages of the institution.

Examinations, &c.

Annual examinations according to the courses of study prescribed in the calendar of the Technical College were held in December last. In the subjects of the courses for the first year 838 entries were made, and 74 obtained honors, 130 the first grade, and 394 the second grade. In the subjects of the courses for the second year 153 were examined, and 24 obtained honors, 35 the first grade and 70 the second grade. In the subjects of the courses for the third year, 9 were examined, seven obtained honors, and 2 the first grade. Monthly class examinations were also made by the teachers. A report of each lecture or lesson given has to be forthwith furnished to the Secretary, and the classes in Sydney, suburbs, and country towns are visited by members and officers of the Board. The instruction given by teachers in townships in the country districts is under the supervision of resident science and art masters, who forward, for the information of the Board, periodical reports on the progress of the classes placed under their immediate supervision.

The following extracts are taken from the reports received from the examiners in the following subjects:—Veterinary science: "I think that the students have shown great proficiency considering the time devoted to tuition, which reflects very favourably on the attention devoted to them by the teacher of the class." Plumbing: "I have much pleasure in recording the general excellence of the work done, which, having consideration that the students presenting themselves this year are much younger in experience than those who came forward at last year's examination, is, in my opinion, quite up to the average. The same number of students, viz. 10, presented themselves this year as last, and the same proportion have passed, and although only two have secured honors this year as against four last year, that is amply accounted for by the circumstances above noted. The suggestion I made last year that gas-fitting should be included in the course of instruction has been carried out, and some very excellent answers in that branch have been given." Fitting and turning: "The work done in the shop by the pupils was very good, and reflects very great credit upon their instructor. I am also very pleased with the theoretical work done this year, as most of the papers are very good." Architecture: "The papers of a fair percentage of students being very good, as will be seen by result sheets." Carpentry: "One of the students has a first-class record, and the theoretical and practical questions were answered very well. I am convinced that if apprentices largely availed themselves of the instruction given in these classes we would have tradesmen second to none in the world." Carriage building: "A marked improvement in the work of this class on the examinations in previous years." Chemistry: "The practical work of some of the students is very satisfactory. The purely theoretical questions have been very indifferently answered." Advanced calligraphy: "It affords me much pleasure to find the papers are on the whole very creditable alike to the teacher and the students, considering the length of time the latter have been under tuition in the College. It has occurred to me that the Board might perhaps see its way to improve the arrangements and fittings for these classes by adopting the plans followed in some of the large modern schools in Scotland, that is in fitting up rooms for writing, correspondence, and bookkeeping, as much as possible like a merchant's counting-house, with suitable desks, tables, book-racks, presses, &c." Correspondence: "There is a considerable difference in the merits of the papers in the second grade, as the marks show the students to exhibit very good writing generally, and the questions have been answered intelligently and with evident pains. The teacher deserves great credit considering the time the students have been under his charge." French;

French: "The work done by the students of the first year was very satisfactory, some of the papers being very remarkable for their neatness and accuracy. As for the students of the second year, their work did not by any means come up to the expectations formed by me at the last examinations." Scientific dress-cutting: "I must say that on the whole great credit is due to the teaching." Mineralogy: "One student answers excellent throughout, and others a trifle weak in crystallography, but otherwise very good." Mining: "All these papers are fair, but the answers are too general, from which it is apparent that these students have not that intimate knowledge of their subject which would entitle them to a first class." Actuarial science: "The answers by the candidates show that the standard obtained is due rather to carelessness and want of thought than to ignorance of the subject." Elocution: "Oral test most excellent. Written answers fairly intelligent." Materia medica: "One excellent paper, the others very good." Pharmacy: "The papers in this class were more even than in the materia medica, and omitting the two students who obtained honors in the class the average is much higher." Pharmaceutical chemistry: "One student obtained the maximum number of marks." Dispensing: The examiner reports one student to have prepared a most excellent paper. Dentistry: In the practical examination several are reported to have performed excellent work. Anatomy and physiology: The examiner reports the answering of one student to be of distinguished excellence. Practical electricity: "The papers as a whole are satisfactory, especially when it is remembered that the students have for the most part had but one year's tuition." Telegraphy: "I am doubtful whether I am in order in making the following observation, but I cannot help expressing regret that there is an absence of certainty of students who pass in this examination obtaining a field of employment in the Government Telegraphic Service as a result of that attainment."

Sir Philip Magnus has furnished to the Board the undermentioned results of the technological examinations of the City and Guilds of London Institute for the Advancement of Technical Education, held in May last at the Sydney Technical College, Bathurst Technical School, and Newcastle Technical School, showing that of the 51 competitors in New South Wales 34 passed the examinations, two obtained first-class certificates in the honor grade, five obtained second-class certificates in the honor grade, nine obtained first-class certificates in the ordinary grade, and eighteen second-class certificates in the ordinary grade, as follows:—Gas manufacture—ordinary grade, class 2: Glanville Stone. Electric lighting—ordinary grade, class 2: Arthur J. W. Rush. Plumber's Work—ordinary grade, class 1: John Albin, William Nelson; results of practical examination, class 1: John Albin, William Nelson. Mechanical engineering—honors grade, class 2: William Alsop; ordinary grade, class 1: Ernest E. Hunt, David N. Morrison, John Rodgers; ordinary grade, class 2: Alfred Fischer, Herman Simon. Carriage building—ordinary grade, class 2: Samuel Jewett, J. P. Walsh. Milling—ordinary grade, class 2: John M. Mitchell. Carpentry and joinery—honors grade, class 1: Edward Lockley; James H. Merriman (who has obtained number of marks qualifying for prize) honors grade, class 2: James Dunlop, Thomas Lockley, Frank Taprowsky, William Williamson; ordinary grade, class 1: John Gardiner. Ernest E. Giles, Louis S. Robertson, W. S. Sweet; ordinary grade, class 2: Paul J. Barrett, Guilford Dudley, Bernard Finkernagel, George H. Gostelow, William R. Goulding, Patrick E. Malumby, Thomas A. Walker, Uriah W. Ware, John M. Wilson. Brickwork and masonry—ordinary grade, class 2: Holland Andrews, Edward Stevens. The above awards by the imperial examiners show that a large percentage of colonial candidates obtained an excellent classification in these technological examinations, which were also held at over 200 centres in the United Kingdom.

A communication has been also received from the Secretary to the Science and Art Department of Great Britain, enclosing a list giving the names of students of the Sydney Technical College who were awarded prizes at the South Kensington examinations held in June last, at which 71,730 works were sent up from 237 Schools of Arts and branch classes. The prizes obtained by the colonial competitors at this national competition being special books for architectural drawings, &c., to Messrs. Frank Lee and W. S. Sweet; and the examiners also state the work submitted in this branch shows an improvement as compared with that forwarded in previous years. Messrs. Holland Andrews, F. J. Davies, E. Lockley, F. M. Marshall, and P. E. Malumby gained third grade prizes for architectural drawing; L. Dechaineux, third grade prize for design; Herman Simon, third grade prize for mechanical drawing; and the following students received rewards for obtaining the maximum number of (20) marks:—Messrs. Holland Andrews and W. S. Sweet, architectural drawing; L. Dechaineux, design; and Arthur Hallams, Gregory Macintosh, and W. Robbins, modelling. Two students having attended the required courses and obtained the necessary class certificates have been awarded by the Board certificates as Industrial Experts in the following departments:—Pharmacy, Mr. H. W. Smith; domestic economy, Miss Mary Dowling.

Subjects of Instruction.

When the Board commenced its operations technological instruction even in Great Britain was in the experimental stage, but during the last few years very great attention has been given to the subject by leading educationists in view of the importance of conserving the manufacturing interests of the mother country, which were being jeopardised by the results of the excellent science and art training given to artisans, not only in France, Germany, Belgium, and Sweden, but also in America.

The annual reports, forwarded for the information of the Minister of Public Instruction during the last four years, contain records of the difficulties the Board has had to contend with in conducting its work, and also some of the views of leading educationists as to the subjects which should form part of technical training, as well as recommendations relating to instruction in agriculture and mining to further the development of these great colonial industries. Efforts have been made, as far as the funds at the disposal of the Board would permit, to promote technical instruction in many centres of population in the interior, for the benefit of those engaged in pioneer industrial work, so that they might not be altogether debarred from proper scientific training. The classes applied for by the large number of persons engaged in mechanical pursuits in the city and suburbs had, however, first to be developed, as it was considered expedient that the metropolitan institution should be properly fitted with apparatus, and serve as a model for the branch schools afterwards formed in the country districts.

Mining and Agriculture.

The classes of the Sydney Technical College afford all the instruction required for a complete mining course, similar to that given at the Royal School of Mines in London. The valuable metalliferous deposits found throughout New South Wales have also induced the Board on several occasions to endeavour to obtain additional funds for imparting systematic instruction by means of schools of mines, for the establishment of which institutions applications have been received from the residents of the principal mining centres. Although the Board, at the request of the Government, reported on the best mode of carrying out a resolution passed by the Legislative Assembly in 1886 respecting mineralogical instruction, the only amounts placed on the Estimates for that purpose were for "Schools of Mines and Assay Works," to be expended under the direction of the Mining Department, and the Board has been directed to defer the formation of the schools of mines applied for, until special funds have been voted for them.

The classes conducted by the Instructors in Agriculture and Mining in the Sydney Technical College were not held during the first quarter of the year, as these gentlemen had to devote all their time lecturing in the country districts. The whole amount placed at the disposal of the Board would not be more than sufficient to devote to either of the important subjects of instruction in agriculture and mining, if their importance with regard to the progress and welfare of the Colony is taking into account or contrasted with the expenditure on similar work in Victoria and the other colonies.

The Instructor in Agriculture reports: "Concerning the classes in Sydney, they have been the largest we have yet had. The attendance has been exceptionally high. I could not speak too highly of the studious character of the students. That they will show good results for the country I have not a doubt.

doubt. Had we the facilities for out-door instruction, such as I have pointed out on previous occasions, the system, as carried out at the Technical College, would be still more useful. For the session 1889, I expect still larger classes, and may have again to apply to the Board for more accommodation and additional appliances to give instruction. During the terms of the 1888 sessions various gardens, orchards, &c., were visited during Saturday afternoon 'outings,' which are always well attended, and are of much practical use. I am very glad to add that there is evident improvement in the character of the subjects of the lectures asked for by Agricultural Societies and Mechanics' Institutes. The requests for information regarding tools and implements, draining, manures, various systems of tillage, dairying, poultry, and bee-keeping, &c., show how practical is the tendency towards agricultural education. The applications for lectures from the country districts are more numerous than ever before, and though, during the teaching sessions of 1888, I filled as many engagements in the country districts as my duties at the Technical College would allow, I am afraid it will be impossible for me to comply with all the requests now in the hands of the Secretary. If I could have the aid of an assistant for the out-door work, one who could take one or more of the classes in Sydney while I was absent, all the requests for lectures might be met, though it might be late in the year before all could be filled."

Under the direction of the Board, notes and analyses were made of the grazing, farm, and garden soils of New South Wales, by the Instructors in Agriculture and Chemistry, at the Sydney Technical College, and the valuable information thus obtained published in pamphlet form for the benefit of farmers and others.

Thirty-eight lectures were delivered in the following country towns by Mr. Angus Mackay, F.C.S., Instructor in Agriculture, in addition to nineteen lectures in the Technical Hall and conducting classes at the Sydney Technical College: Adelong 1, Broughton Creek 1, Burrawang 1, Burrowa 1, Camden 1, Carlingford 1, Cootamundra 1, Crookwell 1, Dugong 1, Fairfield 1, Goulburn 2, Grafton 2, Grenfell 1, Kangaroo Valley 1, Kogarah 2, Lismore 1, Liverpool 1, Milton 1, Molong 1, Mudgee 2, Murrurundi 1, Muswellbrook 1, Nowra 1, Parkes 1, Picton 2, Richmond 1, Robertson 1, Scone 1, Tamworth 1, Tumut 1, Wellington 1, Windsor 1, Wollongong 1.

Twenty-six lectures were delivered in country towns by Mr. S. H. Cox, F.G.S., F.C.S., Instructor in Geology, Mineralogy, and Mining, at the following places during the first quarter of the year, besides conducting classes for nine months at the Sydney Technical College:—Adelong 2, Bega 1, Blayney 2, Carcoar 2, Emmaville 2, Forbes 2, Goulburn 2, Gulgong 2, Inverell 2, Mount M'Donald 2, Orange 1, Parkes 2, Tenterfield 2, Tingha 2.

During the five and a-half years of its existence the Board has been the means, through itinerant science lectures and publications, of awakening throughout the Colony a great interest in the subject of technical education, and the movement has extended to several of the other colonies, as many of their statesmen now appreciate its utility in relation to the applied arts and manufactures of Australia.

Manual Training, &c.

The imparting of manual training to school boys has only been attempted during the last few years in a few schools in Great Britain, while at the same time the experiment was being tried at the Technical workshops in Sydney. The trade classes, recommended by the recent Royal Commission on Technical Education in England, have obtained considerable development in the Sydney College, especially in its departments of Architecture, Engineering, and Art. Practical tests in mechanical work, given to young artisans and apprentices at the annual examinations held for the last four years, have shown that many of them possess considerable manual skill, and that they have also profited by the theoretical instruction afforded has been proved by the answers given to the questions in the papers specially set them by the examiners. Collections for exhibition purposes of models in wood, stone, and other materials made in the carpentry, masonry, plumbing, painting, naval architecture, boiler-making, fitting and turning, and other trade classes have been found to be most interesting, as showing the methods adopted at the Technical College to endeavour to improve the applied arts in this Colony. Some difficulty has been recently experienced in inducing many of the students attending the mechanical classes to make models in metal, wood, or plaster, as several much-prized articles owned by them have been broken in transit to and from English competitions and intercolonial exhibitions. It is also understood that the primary object of the teachers must be to impart instruction in the principles underlying the arts and industries, rather than in endeavouring to give actual training in the trade itself, or in producing finished works suitable for exhibition purposes.

The obtaining of the valuable plant for the workshops in Kent-street has been one of the best means to promote a knowledge of mechanical science amongst the young men of the community. The acquisition of the latest scientific instruments, for illustrating the instruction imparted at the Technical College and branch schools, has been necessarily attended with much expense and difficulty, as the apparatus was specially selected, in many instances, by the President in Europe, and conveyed to this colony. For example, the delicate instruments in the physics room at the Technical College, procured in order to properly illustrate the courses of instruction in light, heat, sound, and electricity, now amount in value to over £1,000. The beautiful statuary, models, &c., obtained from England and France for the school of design, are used by a large number of students attending the drawing and modelling classes. Advantage was taken of the Sydney International Exhibition of 1879 to purchase several valuable collections of engineering models and drawing casts, used in the Polytechnic Schools of Germany, which happily were not lost in the destruction of the Garden Palace by fire. One of the largest items of expenditure incurred by the Board has been for machinery for the workshops, apparatus for the science classes, and models for the art classes; and the cost of imparting instruction in technical matters is therefore necessarily much greater than that for purely literary subjects taught in other kinds of schools, in which comparatively few appliances are required. In order to stimulate instruction being given in drawing from the round instead of from the flat, the Board has allowed teachers of many private schools to purchase at cost price plaster models made by its caster, as these models cannot be obtained elsewhere in the colony. Sets of these casts have also been supplied to the Department of Public Instruction for use in the high and superior schools, and an offer made to furnish them to the primary schools. Many of the educational institutions in the neighbouring colonies have also been furnished with sets of these casts on application.

Sir Phillip Magnus says, with regard to art instruction being given from the round and not from the flat:—"But there is no better way of selecting for further training those children who exhibit any decided art aptitude, than by teaching drawing indiscriminately to all. From those who exhibit such an aptitude the bulk of industrial designers would be formed. * * * * But, in order that drawing may yield its full value as a means of mental training, the pupil must be brought face to face with natural objects. It helps him little or nothing that he can copy copies. He must depict things. He must look at all things till he knows them, and must acquire the ability to represent them on paper. There is this in common between science teaching and art teaching: that both should bring the pupil in immediate contact with nature. It is because drawing may be made the means of directing observation to the form of things that the teaching of it is valuable, apart altogether from the use which the pupil may make of the skill acquired. It is desirable, therefore, that the pupils should be taught from the very first to draw from natural objects. Much difference of opinion has been expressed as to the advantage of letting children commence by drawing from things, but the prevailing practice of the best foreign schools is found to fully support the views of educationists as to the importance of accustoming the child, as soon as he can use a pencil or a brush, to draw from real objects."

Sir Frederick Leighton, President of the Royal Academy, has also recently stated with regard to imparting art instruction:—"I should strongly advise work almost exclusively from the round, and not from drawings and prints."

In order to enable school teachers to receive instruction in free-hand, geometrical and perspective drawing special classes have been held in the metropolitan and country districts, and they have been attended by numbers of the teachers employed by the Department of Public Instruction, in order to gain a proper elementary art training.

Results of Instruction.

The prescribed courses of study in freehand, architectural, and mechanical drawing, building construction, and design must have proved highly beneficial to many colonial trades and industries, as is evidenced by beautiful decorations executed by students on the buildings erected of late years in Sydney, by many articles made in the classes, and from the accounts now given of the methods of instruction pursued by the teachers. A class for imparting instruction in the principles of design, open only to students who have completed a two years' course in freehand drawing, has been held by the Instructor in Art for several years past. It is believed that when the course in design is completed, the knowledge gained will be utilised by the students in benefitting colonial industries—such as stone-carving, terra-cotta work, weaving, illumination, illustration, &c.—more especially as attention is directed to the suitability of the Australian fauna and flora for decorative purposes.

Many young men have gratefully acknowledged that they have obtained promotion to the positions of foremen and to other responsible posts, owing to the superior technical knowledge acquired at the Sydney Technical College; and the certificates given by the Board have been the means of otherwise securing remunerative employment for numbers of late and present students not only in New South Wales but also in the neighbouring colonies.

The following particulars have been received from teachers as to the utility of the instruction imparted by them, and as to situations, promotions, &c., obtained by students in classes under their charge:—The instructor in chemistry at the Sydney Technical College states that several of the students attending the classes taught by him have obtained appointments as managers, assayers, and some of them are now engaged in scientific departments of the Government, and in the employ of manufacturing firms. The teacher of architecture furnished twenty names of some who have passed through his classes and are doing well—some in architect's offices, some as clerks of works, &c. The teacher of dentistry stated that nine students taught by him have obtained situations or are practising through class instruction. The teacher of boilermaking states that three pupils owe their present positions to what they learned in the boilermaking class. The teacher of phonography states that many have brought phonography into practice in the situations they hold, such as solicitors' clerks, &c., and some have become teachers of phonography and reporters for the press. A student on leaving school, some months ago, was engaged as a warehouse boy to a large firm in the city, but one of the principals, having seen a specimen of his shorthand exhibited, sent for him and promoted him into the office. The teacher of elocution states one of his most successful pupil twice received a prize, and some of his pupils have been students for the ministry. The teacher of masonry mentions that three of the students of his class have taken very prominent positions as foremen of masons to large contractors in Sydney; one of them went to Brisbane to be foreman for large buildings for the Works Department, and others have commenced business on their own account. The instructor in geology states that students in his class have received appointments as assistants on the geological survey, and in other geologists' offices, and as manager of cobalt works. Other gentlemen have turned their knowledge to account as curator of the Geological Museum, in positions at the Sydney Mint, and for working mining machinery, auriferous deposits, or as mining and general agent. The instructor in physics reports that he has reason to believe that several students who have obtained certificates in his department have found them of assistance in obtaining positions. The instructor in engineering reports that there are several instances where students have advanced in the workshops through the knowledge that they gained at the college. In many other cases the students have obtained situations and joined classes to better learn the work they have to carry out—such as men coming to learn how to work and clean gas engines for lifts—they being in stores and having the charge of gas engines. Clerks of works have come to learn how to draw, so that they can send sketches in to the office. Engine drivers have come to learn how to repair working parts of engines, so that they can take charge of the engine without the engineer's assistance. All these instances show the great benefits numbers are able to receive through attending the technical classes. The teacher of the cabinetmaking class mentions one clerk who, in the short space of eighteen months, has risen from a novice to be almost equal to a journeyman, and bids fair to become a first-class tradesman. Most of the students are very young, some not having left school. Mechanics also come for a quarter or two to perfect themselves in a difficult branch of their trade, and drop off as soon as they have acquired that knowledge. Under such circumstances, it is hard to estimate results, but there can be no doubt of the ultimate good to young tradesmen and apprentices from the diffusion of this knowledge, otherwise unattainable, among them. The teacher of carpentry reports that a good many students learn hand-railing, stair-casing, and other advanced work, fitting them for competent tradesmen and to receive the standard wages. One apprentice has finished his time, and is now a foreman; his assistant teacher came first as a student and is now also a foreman. Other students have started business on their own account. Direct results in money can scarcely be expected in this department so soon, as the greater number of those who come are school boys and apprentices, whose time is not completed since the college started, and therefore have no chance of promotion. Until very lately, wages in the trade have been gradually reduced, the trade in general depressed, and there has been very little chance of promotion of any kind. But, if trade revives and opportunities occur, there is no doubt that those who have gone through the full course will be able to take the best positions in the trade. The teacher of veterinary science reports that one of his pupils has considerably improved his position with his employers, as he has been recently promoted and his salary increased in consequence of the saving effected by skill acquired in treatment of their horses. The teacher of bookkeeping reports that one of his students who passed, on the strength of the certificate received from the Technical College obtained a position as bookkeeper. The teacher of photography reports that he knows of two members of his class who have been promoted as photographers to a private firm and to a Government department. The teacher of French states that he has had from the pupils many expressions of the high commercial value they place on the knowledge acquired by them in the class. The teacher of Latin states that, since he has taught the class, several of the students have passed in that subject in the matriculation and law examinations; and, this year, one was classified A at the Senior Public Examination. The teacher of cookery reports that she can only state that five out of the eighteen already joined the cookery classes this term are married ladies, and eleven out of forty-four of last term, and that several of her pupils are engaged to be married. The teacher of actuarial science reports that the great majority of his pupils have invariably been drawn from the ranks of the service of the Australian Mutual Provident Society, which has a system of progressive examinations in actuarial science for the members of its staff. In accordance with the regulations laid down, increases in salary are granted annually to those who are successful in attaining the percentages of marks required to constitute a first, second, or third class. Nearly all the tuition of these youths has been necessarily performed in the class under his charge, and several of them have obtained substantial promotion in the way of salary, from time to time, by virtue of the examinations passed by them. The teacher of solid geometry submitted letters received from several mechanics connected with the building trades, testifying to the value of the practical instruction received by them from the teacher, and the promotion to positions of foremen and constant employment as journeymen secured through the knowledge obtained at the Technical College. The teacher of drawing at Paddington reports that there were two or three pupil teachers in his late class at Coogee who, but for the instruction received, would have failed to pass their examinations. The Science and Art Master at Bathurst reports that several teachers in the public service, after attending classes, gained certificates which enabled them to obtain the full

full "D" certificate and improved classification. At least one teacher also was enabled to take the sciences of physics, geology, and botany at the examination for promotion to the first-class. A dispenser, who was a regular student, mentioned that his salary was raised shortly after he had passed examinations in chemistry, physics, and botany, and he considered this increase was to a great extent a recognition of his success; he also proposes going to England to qualify himself for a medical man, and relies upon the information gained in the classes as a means of winning a medical scholarship to enable him to pursue his studies. A joiner, and subsequently foreman at the gaol works, stated that he had found a knowledge of drawing, mathematics, and physics of great assistance in his business, and this training he gained in the Bathurst classes. A student who intends shortly to present himself for the examination of the Pharmaceutical Society, in order to qualify as a druggist, obtained the knowledge he possesses of chemistry and botany in the classes there. A student in the bookkeeping class, who has just been appointed to a local bank, stated that he had already found his knowledge of the subject of great assistance to him. One late student has entered an architect's office in Melbourne, and is continuing his studies in that city, and another has recently received a cadetship as an engineer in the Eveleigh Workshops. The Science and Art Master at Goulburn reports that a local architect applied to him for an opinion respecting one student, who was afterwards taken on as an articled clerk. A coachbuilder, a carpenter, a bricklayer, a sign-writer, and others, have expressed unsolicited acknowledgement of the benefits they have derived from attendance at the classes. About thirty public school teachers have gained drawing certificates, which assisted them in gaining promotion. Three students have become articled clerks in lawyers' offices. The Science and Art Teacher at Maitland reports that the certificates of eighteen students have been accepted by the Department of Public Instruction. There are a number of intelligent lads, in both Maitland and Singleton classes, who are still attending school, and these boys will probably find little difficulty in obtaining situations when the time comes. Five of the students were successful in the mathematical portion of the teacher's examination held recently, and one, who attended the class for technical arithmetic, passed the Junior University Examination in that subject. The art teacher at Morpeth reports that eight public school teachers and pupil teachers attending his classes obtained passes either under the Technical Board or at subsequent examinations under the Public School Department. One obtained employment with an artist in Maitland. The art teacher at Petersham reports that one student, whose instruction was solely gained there, was appointed to the position as the assistant art teacher, and that an apprentice to lithography received a course of instruction which enabled him to be trusted with work of considerable importance. Another student, an upholsterer, attended the drawing class specially to gain instruction to aid him in taking drawings and measurements of rooms, furniture, &c. Another, a carpenter by trade, is now entrusted to superintend various jobs for his father, a coachbuilder.

Collection of Works of Students.

At the request of the Minister of Public Instruction, the Board collected a number of works executed by the students of the Sydney Technical College and Provincial Technical Schools, to illustrate their courses of study, and for comparison with similar collections shown at the Melbourne Centennial Exhibition of 1888. The works executed were principally from the art, architectural, and engineering departments of the Sydney Technical College. The classes in its other six departments were represented by but few specimens as the result of the instruction given in them could not be shown in a similar way. Some of the best articles shown in the exhibition were done by clerks, who, besides learning shorthand, bookkeeping, &c., occupy their spare time in endeavouring to qualify themselves for some manual occupation, instead of swelling the ranks of the unemployed. Hundreds of men have now to deplore the purely literary training given to them in the ordinary schools, which has proved in their case but poor preparation for the battle of every-day life, especially in a new country requiring hardy pioneers to develop natural resources scattered over a large extent of territory.

A pamphlet, describing the work of the Sydney Technical College in its several departments and illustrating its courses of study, was distributed at the Melbourne Centennial Exhibition. A comparative statement was also compiled for distribution, showing subjects in which instruction is given at the Sydney Technical College and Industrial Colleges in the United Kingdom, United States, and the neighbouring colonies, most of which institutions were recently visited by the Secretary when absent on sick leave.

The separate court in which the work of the students was shown at the Melbourne Exhibition, had a frontage of about 50 feet, by a depth of 60 feet, with an external entablature, having the words "Sydney Technical College," supported in four columns decorated with purely Australian subjects, principally the flowers and foliage of the *stenocarpus* and the waratah or native tulip. Upon the top of the structure is the Australian coat of arms and the design for the corporate seal of the Sydney School of Arts, with figures representing Science, Art, and Literature.

The following extracts from the report and copy of award made by the Educational Jury, at the Melbourne Centennial Exhibition, shows that the exhibits in the Sydney Technical College Court obtained the first order of merit and special mention:—"Too high praise could not be given to New South Wales for the exhibit of the Board of Technical Education." "Board of Technical Education.—Special prize for students' work from the Sydney Technical College and Branch Schools; special mention for completeness of organization, large scope of subjects taught, good execution of work by students."

Department of Art.

The studies in the Art Department are organized in the following progressive order:—

- (1.) Practical plane geometry, which realises the plane aspect, the surface of objects or space; solid and descriptive geometry, treating of volume and development, and which, with the aid of isometric projection, proves of great use, not only to pupils engaged in the different decorative arts, but also to those whose pursuits are connected with construction in architecture and engineering. The study of geometry, or the knowledge of surfaces and bodies such as they are, has been dealt with as follows:—Monday night, 1st and 2nd year, practical plane geometry; Tuesday night, 1st and 2nd year, solid and descriptive geometry. Instruction in these courses is given on an average in forty lessons per annum.
- (2.) Following immediately after instruction in geometry comes the perspective course, dealing with surfaces and bodies, not as they are, but as they appear to the eye. This course comprehends parallel and angular perspective, inclined planes, accidental perspective, projection of shadows, and reflection in the water. The class for it is held on Tuesday night, in order that the students wanting to attend it may prepare themselves in the geometry course given on Monday, and the course is of three years duration.
- (3.) Prepared by the initial and indispensable studies of geometry and perspective, the student enters on Wednesday in the first stage of freehand drawing, *i.e.*, model drawing, the course of which extends over a period of two years, occupied by the rendering of straight and curvilinear bodies. Of all the elementary ones, this course is most important, inasmuch as the student has to apply, without the aid of any mathematical instruments, the principles he has been previously made acquainted with. The work in this freehand drawing course lies in the correct representation of solids from the following apparatus: wire models, showing the construction lines, wooden metals, and plaster casts. Combination seats and stands in wrought iron were specially designed by Mr. Norman Selfe for use in the School of Design by the students in freehand drawing and modelling. A large number of the valuable diagrams exhibited were specially prepared by the art instructor (Mr. Lucien Henry) during the last three years, in order to illustrate his course of lectures on design. Several hundreds of the exhibits shown consisted of works from the freehand, model, geometrical, and perspective drawing classes held in Sydney, Goulburn, Bathurst, Newcastle, Maitland, Petersham, &c. Special exhibits were sent from the Sydney Technical College of figure drawing, designs, and modelling

modelling, reproduced from the excellent appliances now in its art rooms. The house painting and decorating classes showed specimens of ornamental panels, decorations, sign-writing, &c., executed by apprentices, which could not be produced in Sydney even by journeymen some years ago. Instruction in freehand drawing is given on Thursday and Friday evenings and on Saturday mornings. This course is conducted entirely from the round, and occupies a period of two years; the first year being for elementary, and the second year for advanced studies. Instruction from the figure is excluded, as this subject is only studied by pupils having obtained their certificates for freehand drawing. The design class is open on Monday and Friday nights to students having completed their freehand drawing course and obtained their certificate in that subject. The course in design is intended for studying the different styles of ornamentation required in architecture, metal-work, glass-work, pottery, textile fabrics, and other pursuits involving the use or application of the decorative arts. The complete art course occupies five years, and the design class deals consecutively with the following forms:—1, Egyptian and Assyrian; 2, Greek-Pompeian; 3, Etruscan-Roman; 4, Byzantine, Romanesque, Celtic; 5, Moorish and Arabian; 6, Gothic; 7, Renaissance-Italian, French, English; 9, Persian and Indian; 10, Chinese and Japanese; 11, Modern; and 12, Australian subjects applied to the decorative arts. The course of modelling has been of two years duration, the first and second year being respectively given to elementary and advanced studies. Having been prepared by the first year's course of the Art Department, students engaged in plastering, terra-cotta, metal or glass-works, are able to make rapid progress. The course in modelling is that for a trade class, and deals with the decorative arts expressed by "relief."

The course of instruction in house-painting and decorating extends over two years, and students have to be prepared for entering it by the first year's training in the art department. This class deals with the decorative art expressed by "color," and proves of great advantage to those students engaged in general painting, who want to familiarise themselves with graining, marbling, oil gilding, sign writing, gilding and ornamental work on glass, applications of decorative designs, &c.

Department of Architecture.

The course of instruction in the department of architecture is designed for evening students, and includes the use of drawing instruments, drawing to scale, copying drawings, enlarging and altering sizes, orders and styles of architecture, working out complete designs of buildings and sketches with partial assistance, draft specifications, coloring and neatly finishing set of plans, inch scale and full sized detail drawing for foremen and clerks of works, &c. Perspective drawing is taught in its application to architectural subjects, and the examples are finished with pen and ink shading. Regular courses of lectures are delivered by the instructor in historical architecture, building construction, materials, sanitation, ventilation, and the principles of design. A class for learning how to calculate quantities should be of great service to young builders, and prevent them from making mistakes when tendering for work. In connection with the architectural department the following trade classes are held, viz.:—Carpentry and joinery, masonry, bricklaying, cabinet-making, and carriage building. During the short time that the architectural department has been in existence its influence has been widely felt, and its marked success has been most gratifying, especially in the annual examinations held by the Science and Art Department at South Kensington, as during the last three years one bronze medal and eighteen third grade prizes have been gained by the students for architectural designs. In the technological examinations held last year by the City and Guilds of London Institute, fourteen students from the architectural school were examined, and every one succeeded, ten receiving first-class certificates and four second class certificates. Of eight students who entered from the carpentry and joinery class seven gained first class certificates and one a second class certificate in the ordinary grade. The scene in the workshops when the students are employed in them is a very busy one, and it is a gratifying spectacle to see the intense interest each one takes in his particular task. A student very often comes to the Technical College with one object in view, say for example to improve himself in his particular trade or in some detail of it, and although he is strongly advised to go through the whole course no obstacle is raised to his applying himself to that particular portion of it that he may need most.

In the Technical College Court there were shown drawings and designs from the architecture class, practical work from the cabinet making class, models and working drawings from the carriage building class, and articles from the carpentry class, consisting of handrails, models of doors, ventilators shutters, windows, &c.

Department of Engineering.

The Engineering Department has its various classes in the Sussex-street and Kent-street branches of the Sydney Technical College, and the work is divided into several sections, viz.:—Mechanical drawing, machine construction, applied mechanics, blacksmithing, pattern-making, plumbing, boiler-making, metal plate working, fitting and turning, and naval architecture.

The number of students on the roll for the engineering department averages about 150, the largest class being for mechanical drawing with 65 enrolled, but many of the students in it also attend other classes. The mechanical drawing class has students principally from various workshops in the city, and the progress made evidences much appreciation by those attending such an institution. In the classes the students acquire the means of conveying their ideas to paper, and obtain proper instruction how to erect or manufacture. The machine construction class is composed of students who have passed through a year's course of study in mechanical drawing, or who can show that they can thoroughly understand its principles. In this class the work is treated in the same way as in an engineer's drawing office, by giving the order to draw a machine or engine for a particular purpose on certain conditions. The strength of the work is then ascertained by calculations on the blackboard, the students taking notes and designing from the information given. The applied mechanics class, which also works in unison with the mechanical drawing and design class, goes more fully into strains and tresses for construction of large bridges, roofs, &c., and also the principles and applications of the mechanical powers. The members of the class have to visit works in progress in various places so as to see the special modes of manufacture or of erection, and the young engineer should attend a one year's course of study in it. The classes in blacksmithing and pattern-making are only now being formed, but a large number of students is anticipated in that for pattern-making. The principles and processes of moulding will also be taught, as well as those for melting and casting, with the adaptability of metals for different work. In this course instruction will also be given in the selecting of timbers most suitable for pattern-making, and the way to cut them to the best advantage. The plumbing class is one that has been well appreciated, and it is trusted that the advantages gained by the theoretical as well as the practical lessons given will soon be of great use to the public, as until the class was formed the young colonial plumber had no means of gaining information on the very important subjects of sanitary plumbing and the best methods of dealing with sewer gases, &c. The boiler-making and metal plate working class has made remarkably good progress since it was started, and the students have gained information in it that could not be learned in the workshop. The construction of templates, setting out and properly proportioning the dimensions of stays, and lining off of templates for bending, &c., are thoroughly gone into in this class. The fitting and turning class is a large one, and advantage is taken of it by apprentices in several of the consulting and civil engineer's offices as well as those at mechanical work, to get an insight into practical work. The students have first to begin at vice work, and learn the art of chipping and filing, and gradually advance up to working the machine tools and lathes. Besides the instruction given by the teacher in mechanical work, the instructor one night in the week gives explanations of various parts of machines and processes of manufacture in large factories. The naval architecture class, though a very important one for a large maritime port like Sydney, is not as much availed of by colonial youths as should be the case; for, although colonial timber shipbuilding is nearly an industry of the past, it might be considered that from

the number of yachting men in Port Jackson many would attend the class in order to understand the principles of construction in their racing or pleasure boats. It is hoped that with a revival of the ship-building trade in Sydney more apprentices will again be employed, when it is probable the advantages of the class will be more largely availed of by shipwrights, boat builders, and others interested in naval architecture.

Curriculum.

The calendar of the Sydney Technical College for 1888 was referred for revision to the Committee of Instructors, and several recommendations contained in the reports submitted by it respecting fees, enrolments, &c., have been adopted by the Board. On the recommendation of the Committee of Instructors it is also now proposed to hold only three terms at the College during the year instead of four as at present, in order to make a longer recess during the heat of the summer months, as is the practice in Great Britain and elsewhere.

Department of Commercial Economy.

With a view to conducting the classes in the department of commercial economy on the lines suggested at the Chambers of Commerce Congress recently held in Melbourne, the Board has requested the Honorable S. A. Joseph, M.L.C., President of the Sydney Chamber of Commerce, to recommend a competent instructor over the classes in that branch of the Sydney Technical College, and this gentleman has promised to submit the matter for the consideration of the body over which he presides. Sir Philip Magnus says in his recently published work on "Industrial Instruction":—"The question of how best to adapt our existing educational machinery to the requirements of commercial life, and of the additions, if any, that should be made to it, is now engaging the serious attention of merchants, manufacturers, teachers, and statesmen. The importance of the question is no longer doubted, and discussion of the subject is invited with the view of eliciting the opinions of persons, who by their knowledge and experience, are able to contribute to the solution of what must be regarded as a problem of national importance. To this end an important conference was held under the auspices of the Chamber of Commerce in November, 1887, when Sir John Lubbock, who is specially qualified to speak on this subject, delivered a very suggestive address, in which he pointed out many of the reasons which prevent our children from obtaining in our secondary schools, as at present organized, the preliminary training which might best prepare them for practical and commercial pursuits. The organization in all large towns of evening classes, with a well arranged programme of studies extending over three years, is a necessary part of any system of commercial education. If our clerks are to hold their own against the competition of foreign clerks opportunities must be afforded to them of making up, by evening instruction, for the deficiencies of their early education."

Department of Pharmacy.

Under the direction of the instructor in pharmacy one of the rooms at the Technical Institute has been furnished with the necessary apparatus for teaching pharmaceutical chemistry, materia medica, and pharmacy. The curriculum in this department has been arranged to meet the requirements of the Board of Pharmacy of New South Wales, and the instructor states that about 60 students who have been in attendance at his lectures have become duly qualified chemists and druggists.

Staff.

There are 9 instructors and 41 teachers, &c., employed at the Sydney Technical College, and 3 science and art masters, and 14 teachers and assistants at the branch schools, making the total number of the teaching staff to be 67 persons. During the year 36 different lecturers were engaged by the Board to deliver a number of popular lectures for working men on technical subjects. There were 41 examiners selected by the Board in 1888 from persons engaged in the various colonial industries and the staffs of other educational institutions, who prepared papers in 55 subjects. The examination of classes in suburban and country districts were superintended by local committees appointed for that purpose, to whom thanks are due, and in Sydney by the Board's officers.

Expenditure.

The Treasury advances to the Board from the Parliamentary vote amounted to £16,997 3s. 2d. The whole of this sum has been expended as follows:—Allowances to instructors and teachers of Sydney Technical College and Branch Provincial Technical Schools (exclusive of £2,381 19s. paid to them as fees from students), £7,354 10s. 9d.; administration—salaries, £2,783 13s. 8d.; Sunday duty, £60 10; petty cash, £92 18s. 11d.; rent, £3,336 1s. 2d.; apparatus, £651 11s. 6d.; printing, £193 4s. 6d.; advertising, £421 17s. 6d.; library, £37 18s. 7d.; fittings, £414 1s. 10d.; lectures £529 17s. 3d.; prizes, £158 16s. 8d.; lighting, £390 5s.; stationery, £36 19s. 9d.; general expenses, £534 16s. 2d.

Since the appointment of the Board in 1883 it has received 291 applications for the formation of classes in the city, suburban, and country districts, of which 87 were granted and 204 deferred, owing principally to want of funds for providing the desired instruction. During 1888 there were ten classes formed out of 44 applied for. Women are allowed to join any of the classes, and nearly 500 of them attended during last year, not only in classes specially formed for them in the department of domestic economy—in order to secure training in cookery, household management, scientific dresscutting, &c.—but they have also largely availed themselves of many of the science and art classes with satisfactory results.

Popular Science Lectures.

There were 181 popular lectures delivered during the year in Sydney, at which there was a total attendance of 43,308 persons, or an average of 239 persons at each lecture. These lectures on science and art subjects have been delivered on four evenings in each week in the large hall of the Sydney Mechanics School of Arts, and during the last five years they numbered 937 (including many long courses of a systematic kind) with 210,808 attendances, or an average attendance of about 225 persons at each lecture. The attendances at the popular science lectures delivered in the Technical Hall were as follows:—1884: 187 lectures, average attendance 183. 1885: 196 lectures, average attendance 208. 1886: 190 lectures, average attendance 226. 1887: 183 lectures, average attendance 270. 1888: 181 lectures, average attendance 239. It will be seen that the attendances at these lectures during the five years gradually increased, evidencing that they must have been appreciated by those attending them during that period to obtain information on technical subjects in which they were interested. The lectures were principally intended, for artisans resident in the city and suburbs, who felt themselves too old or had too little time at their disposal to attend classes and undertake courses of systematic study, and also to induce young men to join the classes. Many of those who attended these lectures belonged to the labouring classes and had apparently come from the country districts seeking employment, so that it is believed that much practical information was given them which should prove of use in their ordinary vocations and for opening up new industries. The following steps were taken with regard to popular lectures:—(a) Reports were obtained from experts as to the qualifications of lecturers in the Technical Hall; (b) the applications from agricultural societies, Municipal Councils, Mechanics' Institutes, and the reports of the Board's officers are carefully considered before a lecturer is sent to the country; (c) the reports of the lecturer, of the local authorities, and the statements furnished as to the number attending the lectures, are further taken into account when deciding as to the utility of this method of imparting technical instruction. The lectures delivered in the Technical Hall during the year were given by specialists, when obtainable in answer to applications invited by advertisement, and digests of the information afforded were furnished after delivery for publication in newspapers, so that the instruction given reached a large number of persons

persons besides those who personally attended. For several reasons already referred to it has been decided not to renew the lease of the large hall of the Sydney School of Arts for these lectures on four evenings each week, but arrangements have been made so that introductory lectures can be given by the instructors of the Technical College at the opening of its first session in 1889. The resident masters at Bathurst, Goulburn, Newcastle, and Grafton, also delivered popular lectures on scientific subjects in connection with local Schools of Arts or Mechanics' Institutes, in addition to conducting science and art classes in the branch country schools.

Provincial Technical Schools.

The Board has been most anxious to extend technical education as rapidly as possible throughout the Colony, and has now in operation Branch Technical Schools or science and art classes in the following places:—Bathurst, Goulburn, Newcastle, West Maitland, Singleton, Morpeth, Lambton, Kogarah, Paddington, Petersham, Parramatta, Granville and Glen Innes. The Committees of the Newcastle School of Arts and the Goulburn Mechanics' Institute have erected new buildings, in which better accommodation has been provided for the science and art classes conducted by the Board in those cities. A building has been recently secured for the Bathurst Technical School, as its classes had to be held in three different places in that city for several years previously. The other branch schools are held in buildings rented from the committees of Mechanics' Institutes and private persons, or in public schools granted for that purpose by the Minister of Public Instruction.

The resident science master at Bathurst reports that the present year has been an important one in the history of the Bathurst Technical School, as not only has the attendance at the classes considerably increased, but suitable rooms have been provided, so that the students meet under much more comfortable conditions than hitherto. During the year, 105 individual students have attended the science classes, and 36 in other subjects, making a total of 141. In the science classes for the first two quarters, the number of individual students was 43 and 47 respectively. During the third quarter, there was a sudden increase to 75 individuals. This great rise has not been quite maintained, owing to some of the younger students having dropped off, but at the close of the year there were 60 individual students on the roll. The examinations held in connection with the City and Guilds of the London Institute for Technical Education are becoming more widely known and appreciated. Last year one student passed from Bathurst. This year three passed in gas manufacture, milling, and brickwork and masonry respectively.

The local science and art master reports another year of successful work in connection with the Goulburn Technical School. The total number of individual students who were enrolled during the year is 131. Of this number, 42 have attended throughout the year, 21 have attended for three quarters, 28 for two quarters, and the remaining 40 only one. The average enrolment during the four quarters for each subject is as follows: Theoretical chemistry 21, practical chemistry 4·7, geology 5·7, mineralogy 4, elementary mathematics 12, freehand 8, model 21, geometry 13, perspective 3, mechanical drawing 3, architecture 10·5. The number of registered attendances during the year is 6,021, which gives an average of 128 each week during the 47 weeks in which the school was opened. The work in all classes has been well sustained, and good progress has been made, the majority of students showing a praiseworthy desire to take full advantage of the opportunities offered.

The science master at Newcastle reports that during the last 12 months two classes ceased to exist from lack of a sufficient number of students, namely, that for metallurgy at Newcastle, and the geometrical drawing class at Plattsburg; the former he hopes to resuscitate. The classes for mechanical drawing and building construction have been amalgamated as a class for mechanical and building construction drawing. One new class has been formed, that for mathematics; and others have been proposed, as bookkeeping, for which thirty students entered, and which is now being carried on in the School of Arts as a private class; and physics, for which no apparatus was available, and one for telegraphy. The promoters of these were informed that the classes could not be undertaken by the Board of Technical Education, owing to insufficiency of means. During the year 1888, the entries for the classes in the Newcastle district were 417 in number, averaging 117 per quarter. The entries in the drawing classes were respectively in order, 52, 59, 52, 64. The entries for last quarter, including three day students for metallurgy, amounted to 118. The number of individual students who entered for the classes during the year was 105. The average attendance during the last three months was about 90; and for the year, 79·14. The students' fees during the year amounted to £140 15s. 10d. The following list fairly represents the occupation of the students:—Assayer 1, blacksmiths 2, boilermaker 1, bricklayers 2, butcher 1, carpenters 5, contractors 2, clerks 7, draftsman 1, engineers 14, labourer 1, merchant 1, machinist 1, miners 8, printers 3, photographer 1, private teachers 2, painter 1, telegraphist 1, public school teachers 38, timber merchant 1, news agent 1, journalist 1, watchmaker 1; others are shop assistants, youths of no occupation, clerks, &c. About fifty students went up for examination. The number would have been much larger, but that during the year, from disturbing causes, several students left the classes and the district, and their places were taken by others, who were beginners. This was notably the case in respect to the mechanical drawing class.

Work Performed.

Some of the work performed since the appointment of the Board of Technical Education will be seen from the following statistics:—52 classes have been formed at the Sydney Technical College, in addition to the 28 classes transferred from the Committee of the Sydney School of Arts, of which eight subjects have been discontinued as not properly within the province of the Board, and 45 classes are in operation at the Branch Technical Schools.

There are now a larger number of teachers, subjects taught, and students attending at the Sydney Technical College than similar institutions in towns of the same size in Great Britain, although the latter have been subsidised by the Imperial Government for a great many years.

New classes were authorized to be formed at the Technical College for instruction in scientific dress-cutting, type-writing, and ladies' phonography. Seven classes were also opened in the Branch Technical Schools in the country and suburban districts as follows:—Newcastle—mechanical drawing, metallurgy, and mathematics; Bathurst—bookkeeping; Parramatta—model drawing; Glen Innes—mineralogy; Kogarah—mechanical drawing.

The Board has, from an early period, recognized the importance of associating appropriate honour and dignity with the numerous constructive and manufacturing trades and the useful handicrafts, knowing how powerful an influence the estimation of the world exercises on the judgment of youth in determining the choice of a calling in life. The Board has in practice been insensibly led towards correcting the disparity that has been noticed to increase so disastrously, during recent years, between the producing and consuming classes. The bulk of its numerous educational classes in Sydney are, therefore, for imparting instruction in useful trades and those branches of physical science which underlie them.

Summary of Statistics for 1888.

(1.) Individual Students—	
Sydney Technical College.....	2,077
Provincial Technical Schools	770
Total	2,847

Increase over last year—152 students.

(2.) Average quarterly enrolment in classes—			
Sydney Technical College.....		1,426	
Provincial Technical Schools		733	
Total		2,159	
(3.) Average daily attendance—			
Sydney Technical College.....		772	
Provincial Technical Schools		378	
Total		1,150	
(4.) Income—			
Advances from Parliamentary Vote	£16,997	3	2
Fees received from students and paid to teachers	2,381	19	0
Total	£19,379	2	2
(5.) Number of classes—			
Sydney Technical College.....		72	
Provincial Technical Schools		45	
Total		117	
(6.) Number of Instructors, Teachers, &c.—			
Sydney Technical College.....		50	
Provincial Technical Schools		17	
Total		67	
(7.) Number of Examiners for all Board's classes			41
(8.) Annual Examinations, 1888—			
	Entered.	Passed.	
1st year.....	838	598	
2nd year.....	153	129	
3rd year	9	9	
	1,000	73=673%	of entries
(9.) Popular Science Lectures—			
Sydney, 181; average attendance, 239; total attendance, 43,308; number of lecturers, 36.			
Country, 64; 33 on Agriculture, 26 on Mining.			
(10.) Technological Examinations, City and Guilds of London Institute; 51 entered, 34 obtained certificates.			
(11.) Science and Art Department of Great Britain, 1883—12 obtained classification from the examiners.			

EDW. DOWLING,
Secretary.

NORMAN SELFE,
Acting President.

APPENDIX XVIII.

CHIEF EXAMINER'S REPORT, WITH ITS ANNEXES.

THIS Section of the Department of Public Instruction dealt with the following Examinations during the year which closed in December, 1888 :—

1. The Examination of Applicants for the office of Pupil-teacher.
2. The Examination of all Pupil-teachers, Male and Female.
3. The Examination of Applicants for admission to the Training Schools.
4. The Examination and Classification of Male Students on completion of their Training Course.
5. The Examination and Classification of Female Students on completion of their Training Course.
6. The Examination of Applicants for Classification and Appointment as Teachers under the Department.
7. The Examination of Unclassified Teachers and Assistant Teachers, serving within the Department.
8. The Examination of Teachers and Assistant Teachers appointed, and in charge of Schools.

I.—APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

In the selection of candidates for this office, the conditions laid down in the Regulations relative to age, attainments, aptitude for teaching, character, and general eligibility, have not been altered during 1888. It will be seen from the following statement that the number of Examinations for the year is not quite so large as that recorded for 1887; but the results, in the light of efficiency, exhibit improvement.

Examined in Sydney	Eligible	97	Ineligible	120	Total	217
„ Country Districts	„	113	„	61	„	174
Totals.....		210		181		391

The percentage of passes is 53·7 as against 51·5 in the preceding year.

The nature of the Examinations which these Applicants are required to undergo, may be understood from a perusal of the published regulations on the subject, and specimens of the questions employed, will be found in Annex A enclosed herewith.

II.—PUPIL-TEACHERS.

The following will show the results of Examination for the year which has closed.

Advanced from Class IV to III	220	Not promoted	59	Total ...	279
„ „ III „ II	180	„	39	„ ...	219
„ „ II „ I	182	„	30	„ ...	212
„ „ I „ Training... ..	117	„	20	„ ...	137
Totals	699		148		847

The

The percentage of passes is 82.5 as against 60.7 in 1887. In the two lower classes the Examinations have this year been somewhat lighter; but in the others they have been considerably heavier. This was especially the case with those of the Pupil-teachers who, falling within the range of Class I, were candidates for admission to the Training Schools under the new Regulations. The Examination Papers, as a whole, were good—not a few extremely so; and as nearly all had put forth their best efforts to pass successfully, a careful and lengthened scrutiny of the answers was absolutely necessary in order that justice might be done to the Examinees. Specimens of the Examination Questions will be found in Annexes B, C, D, E.

I have already shown in former Reports what is required of these young persons on their appointment to the lowest grade, i.e., to Class IV, and it is scarcely necessary to repeat the details now. Having once entered the Service, however, they are, as the conditions of continuance and promotion, required to advance year by year both in knowledge and skill. They must also be well reported of, as regards conduct and usefulness, by those appointed to guide them and watch over their welfare. Should there be any failure in carefulness, attainments, or efficiency, the course of promotion is necessarily arrested.

III.—APPLICANTS FOR ADMISSION TO THE TRAINING SCHOOL.

Males passing successfully,	49	Ineligible	8	Total	57
Females „	68	„	12	„	80
Totals	117		20		137

The percentage of passes is 85.4, as against 72.9 in 1887. Specimens of Examination Questions employed, will be found in Annex E.

IV.—STUDENTS IN TRAINING—MALES.

Seventy-four Students passed out of the Training Schools for 1888. Of this number, twenty-four (24) were males, and fifty (50) were females.

The following are the Results of Examination in the case of the Male Students. They show the classification provisionally awarded for the sessions terminating in June, and December. I have said “provisionally,” because the certificates gained through Training, are not finally confirmed until three years of satisfactory service have expired.

Recommended for Class 2, Section A	12
„ „ subject to the completion of	
the Drawing	2
Recommended for Class 2, Section B	7
„ „ subject to the completion of	
the Drawing	3
Total	24

V.—FEMALE STUDENTS.

The following are the results of Examination in the case of the Females.

Recommended for Class 2, Section A	14
„ „ subject to the completion of	
the Drawing	1
Recommended for Class 2, Section B	24
„ „ subject to the completion of	
the Drawing	3
Recommended for Class 3, Section A	3
„ „ subject to the completion of	
the Drawing	1
Recommended for Class 3, Section B	3
„ „ C	1
Total	50

The number examined and classified provisionally, was therefore seventy-four (74). The highest certificate attainable in Training is Section A. of Class 2; and the number of Females gaining this grade is not so high as that shown in the record for 1887. It must not however be inferred that the instruction and training have been less vigorous, or less efficient than formerly. The causes of diminished results are often to be found in the difference of “material” on which the Training Officers operate, rather than in the lack of earnest teaching. In some sessions it may be that the candidates admitted are superior in capacity, talent, and perhaps power of application, to those received at other times. Such variations in quality, have existed before, and may arise again. Nor is it to be concluded that those Examinees who win Section B, only, instead of Section A, have failed, or that they will ultimately prove of less value as instructors, than their more fortunate, or more gifted companions, merely because, at a certain stage, they appeared slow of mind. Experience should lead us to be reluctant to blame, or think unfavourably of such Trainees. Backward they may be, for a time, in some subjects—less brilliant and less showy perhaps, as teachers, than some of their companions; but they, not unfrequently, in after days, make up for all this by steady perseverance, thorough work, consistent attention to duty, and an unrelaxing, but quiet vigilance, which avails itself of every legitimate advantage to gain the soundest results in teaching. Specimens of the examination Questions used will be found in Annex F.

VI.—APPLICANTS EXAMINED WITH A VIEW TO CLASSIFICATION AND APPOINTMENT.

Two only of the above class were dealt with in 1888, and they were strangers, not educated in the Colony.

The following are the results:—

Recommended for Class III, Section A	1
„ „ C	1
Total	2

VII.—UNCLASSIFIED TEACHERS AND ASSISTANTS EXAMINED FOR CLASSIFICATION

The number in 1888 examined under this head was, 260.

The following will show the results:—

Recommended for Class II, Section A	1
„ „ B	6
„ „ A	15
„ „ B	53
„ „ C	42
Not recommended for classification	143
Total	260

The percentage of promotions is 45, as against 35 for 1887. Specimens of the Examination Questions employed will be found in Annexes G and H.

VIII.—

VIII.—CLASSIFIED TEACHERS IN CHARGE OF SCHOOLS, AND ASSISTANTS.

The number of Examinations under this section for the year now closed, was 345.
The following summary shows the results:—

Recommended for advancement to Class I, Section A	7
" " I, " B	26
" " II, " A	43
" " II, " B	34
" " III, " A	53
" " III, " B	21
Not recommended for promotion	161

Total

345

The percentage of promotions is 53·3, as opposed to 41·7 in 1887.

Specimens of the Examination Questions will be found in Annexes G, H, and I. These embrace papers on Writing, Arithmetic, Grammar, Geography, Principles of Teaching, Sanitary Science (both ordinary and advanced), Drawing (in five sections) Music, History, British Literature, Geometry, Algebra, Trigonometry, French, Latin, Greek, Geology, Physics, Chemistry, Physiology, Botany, and Zoology.

The total number of Examinations for the year was, 1,919.

Regarded from a numerical standpoint, the papers, compared with the total number of Examinations returned for 1887, show a decline; although the individual examinations themselves were more voluminous as a whole. The decline in numbers is, to some extent, more apparent than real, and may be thus explained. The Examinations in the subject of Drawing (only), were more numerous in 1887 than in 1888. The number of Teachers examined for the higher classifications, was also considerably lower in 1888, not perhaps from any unwillingness on the part of the Examinees themselves to come forward as usual, but because it was necessary that they should possess the Practical Skill required by the Standard, before admission to the Literary portion of their Examination. Previously, they were permitted to undergo this Examination, even though, at the time, they did not possess the requisite Practical Skill.

As regards the results otherwise, although the general issues are not unsatisfactory, not much that is new can be advanced. In almost all Examinations, some subjects are necessarily stronger than others. The weak point with one Teacher, may be a strong one in his neighbour, and *vice versa*. Again, in a course of Examination, some subjects will be more or less defective throughout. In the year of which we speak, the least satisfactory points are those lying within the domain of Arithmetic, Latin, History, British Literature, and English Composition.

On the whole, however, there is a steady upward tendency; the papers are fuller, and in most instances more carefully prepared than in past years. With perhaps one exception, already noticed, the range of promotion is higher. Both Teachers and Pupil-teachers continue to improve.

J. GARDINER,
Chief Examiner.

ANNEX A.

EXAMINATION PAPERS—APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

Grammar.

An hour and a half allowed.

All questions, answered, throughout the set, *are to be written down.*

1. *A man's ledger does not tell what he is really worth: [count what he is in himself, not what he has, if you would know whether he is rich or poor.]*

- Parse all the words in italics.
- Analyse the portion within brackets.
- Write a paraphrase of the passage, or give its true sense in your own words.

2. Correct or criticize the following expressions, and give your reasons:—

This road is the best of the two.
Them fish is not good.
He can't see it, nohow.
Who finds him in the money?
She is a misfortunate creature.
I ain't agoing to-day.
If any one calls, tell them I am engaged.

Arithmetic.

An hour and a half allowed.

- $80,200,105 \times 30,409$. Prove your answer.
- 654 articles at £7 13s. 5½d. each: work by practice, and by compound multiplication.
- 1,500 copies of a book of 11 sheets, require 66 reams of paper; how much paper will be necessary for 5,000 copies of a book of 25 sheets, of the same size as the former?
- If 2½ yards of cloth cost 3½ shillings, what would be the price of 4¾ yards?

Geography.

An hour and a half allowed.

Answer four questions at least, the last must be one of them.

- Why are Maps of the World usually represented in two (circular) portions, and not in one, seeing that the Earth is one sphere?
- Distinguish between Parallels and Meridians.
- From what lines or points are Latitude and Longitude measured?
- What is the greatest Latitude any place can have; and what, the greatest Longitude?
- Name the Continents and Oceans of the Globe. Indicate also the positions of the following:—Australia, Australasia, Polynesia, and New South Wales.
- Give a clear Geographical account of the District lying round your Home or School, and within 2 miles of it.

Reading, Prose, and Poetry.

For an Advanced Class Book, sanctioned by the Minister.

Dictation.

See Paper enclosed herewith.

Aptitude for Teaching.

A Lesson to be given to a Junior Class in presence of the Inspector.
N.B.—Applicant's personal statement as usual.

Dictation.

Dictation.

It was Milton, I believe, who said, "They also serve, who only stand and wait."

"This is the story of one who stood and waited. Whether she has served aright, and whom, the pages to come would wish to tell you. If their purpose fail in part, know that the fault is in the tale, and not in the life it speaks of. Faultless she is not, being human. Weak she may be, being a woman; but the purpose of a pure life cannot fail. How should it, being most entirely one of the great purposes of the Almighty? Discourses are delivered to us week by week; and weekly we listen and then forget. But the sermon of a devoted, a holy life cannot thus pass away. Judging no man, condemning no one, from the majestic silence of the lesson comes its power. Day by day to see, is so much better than from week to week to hear. Sermons in stones and brooks, the Voice of the Highest in the cedars of Lebanon; and why not in one formed after His own image? This is the life of a maiden called Margaret.

would	avouch	couch	fowl	towel	slough
would	bough	crouch	foul	trowel	rough
allow	browse	dowry	fuller	marsh	scowl
avow	carouse	drowsy	lounge	shovel	scout

Music.

One hour allowed.

1. Rewrite the following passage, putting in bars in their proper positions:—

2. Write down in order the time-name and pitch-name of each of the above notes.
3. Rewrite the above passage, putting corresponding rests for the notes.
4. Give the length of each or the following notes in demisemiquavers:

5. Explain clearly the meaning of each of these terms:—allegro, forte, pianissimo, crescendo, da capo; show the sign that is used for each.

ANNEX B.

PUPIL-TEACHERS—FOURTH CLASS.

NOTE.—To the Presiding Inspector. Throughout all these sets of questions, and unless where otherwise indicated, please to direct all Examinees to write down every question before proceeding to answer it.

Grammar.

An hour and a half allowed.

1. "Remote from towns he ran his godly race
Nor e'er had changed nor wished to change his place
Unskilful he to fawn or seek for power
By doctrines fashioned to the varying hour
Far other aims his heart had learned to prize
More bent to raise the wretched than to rise."

DESERTED VILLAGE.

- a. Supply the punctuation in the above quotation.
b. Paraphrase the passage.
c. Parse the words in italics.
d. Analyse the first four lines.
2. Construct sentences showing the uses of six of the following words: gay, severe, zeal, craft, appreciate, extremity, manifold, external, mainly, deepen, regret.
3. The nominative to a verb may be a word, a phrase, or a clause. Illustrate this by examples.

Arithmetic.

An hour and a half allowed.

1. Add together $\frac{3}{4}$ of a guinea, and $\frac{5}{8}$ of a pound stg.; from the resulting fraction take $\frac{1}{2}$ of half a guinea; and find the vulgar fraction representing the remainder.
2. How far should 27 tons 10 lb. of goods be carried for £19 15s. 6d., if 100 tons are charged £3 10s. 6d. for a mile and a half?
3. Find, by Practice, the cost of 115 miles 3 fur. 8 po. 3½ yds. of telegraph, at £21 7s. per mile.
4. Divide £20 15s. 10d. stg. between two men, so that one of them may receive one-fourth more than the other.

Geography.

An hour and a half allowed.

Answer three questions.

1. Draw a map of the coast line of New South Wales, showing its projections, indentations, lagoons, &c., as clearly as possible.
N.B.—The map must not be less than ten inches in length.
2. Enumerate, in order of importance, the chief towns of the Colony, south of the parallel of Sydney, stating their positions, industries, and any other facts known to you, relating to these places.
3. Give a full description of Italy.
4. Give a description of England, south of a line drawn from London to Bristol.

School Management.

An hour and a quarter allowed.

Two questions at least, are to be answered, the second to be one.

N.B.—In the first lines of your first answer, give specimens of copy Lines in three hands.

1. Describe what you understand by the Kindergarten System. Explain how it is applied.
2. Explain how you would give a moral lesson on "Courage" to a Class.
3. What measures would you take to secure Regularity and Punctuality?
4. How would you teach Simple Addition to beginners?

Dictation.

Dictation.

N.B.—Inspectors are respectfully requested to caution Examinees against *carelessness in writing*, and against *the use of abbreviations*, or symbols, to represent any word, or words, such as “&” for “and,” &c.

“This tendency towards abstracted observation, discernible in Goldsmith’s poetry, agrees peculiarly with the compendious forms of expression which he seems to have studied; whilst the home-felt joys on which his imagination loved to repose, required at once the chastest and sweetest hues of language to make them harmonize with the dignity of a philosophical poem. His whole style has a still placid depth of feeling and reflection which gives back the image of nature unruffled and minutely. He has no redundant thoughts nor fallacious transports, no ecstasies, but appears on every occasion to have weighed the impulse to which he surrendered himself. Whatever ardour or casual facilities he may have thus sacrificed, he acquired a high degree of purity, lucidity, and self-possession. His chaste pathos makes him a fascinating, if not an insinuating moralist, and throws a spell of Claude-like softness over his descriptions of homely scenes, that would seem only suited to be the materials for a Dutch painting.”

Music.

An hour allowed.

1. Define the following terms:—Staff, unison, octave, slur, bind, pause, syncopation.
2. Place over each of the following notes its name, under it, its value in semiquavers, and after it its corresponding rest:—

3. Write two bars in each of the following Times, introducing a quaver rest, a crotchet rest, and a minim rest:—

4. Define a Major Second and a Minor Second. How many of each are there in the Major Scale? Define their respective positions.

5. How many kind of Scales are used? Distinguish between them.

History.

An hour and a half allowed. Three questions at least to be answered.

1. Give an account of the descent of the Romans upon Britain, prior to the Christian era.
2. Give an account of the struggle with the Danes in Britain.
3. State what you know of the introduction of Christianity into Britain.
4. Give an account of the formation of the first British settlement on Port Jackson.

Euclid.

An hour and a half allowed.

1. Write down all Euclid’s definitions of rectilineal figures accurately and in their order.
2. If from the ends of the side of a triangle there be drawn two straight lines to a point within the triangle, these shall be less than the two other sides of the triangle, but shall contain a greater angle.
3. To make a triangle of which the sides shall be equal to three given straight lines, but any two of which must be greater than the third.
4. If two triangles have two sides of the one equal to two sides of the other, each to each, but the angle contained by the two sides of one of them greater than the angle contained by the two sides equal to them, of the other, the base of that which has the greater angle shall be greater than the base of the other.

Algebra.

An hour and a half allowed.

1. $a = 1, b = 2, c = 3, d = 4,$ and $e = 5,$ find the numerical value of $5a^2 + 3ab + 9b^2 - ab - 2b^2 - 2ab - 7b^2 + 5abcde$
2. Add together $x^2 + y^4 + z^3, -4x^2 - 5z^3, 8x^2 - 7z^4 + 10z^3, 6y^4 - 6x^3,$ and from $7x^3 - 2x^2 + 2x + 2$ take $4x^3 - 2x^2 - 2x - 14,$ diminishing this remainder by $2x^3 - 8x^2 + 4x + 16.$
3. By what expression must $x + y - z$ be multiplied to produce $x^2 + 2yz - y^2 - z^2?$
4. Resolve the following expressions into factors, $x^2 - 81, x^2 + 11x + 30, x^2 - 7x - 44, x^3 + 125, x^2 - 13xy + 42y^2$ and $a^2 + 9ab + 20b^2.$

Latin.

Two hours allowed.

1. Translate into Latin, *without transcribing the English*—
 - a. Which girl’s flowers are the most beautiful?
 - b. She has twenty-two pictures in that house.
 - c. These old men’s legs are very thin and very weak.
 - d. These spurs will be very useful to the horse-soldiers.
 - e. What gift is better than virtue?
 - f. My brother’s horse is swifter than that one.
 - g. These works will be more useful to you than to me.
 - h. The soldiers’ camp is in my father’s field.
 - i. Iron is more useful than gold for you and me.
 - j. War is the cause of many men’s death.
2. Decline these combinations of words.—

Mea similis spes.
Hec longius calcar.
Alia gracilis quercus.
3. Give the comparative and superlative of—humilis, pius, velox, celer, nobilis, malevolus, magnus, arduus, niger, benedictus.
4. Write down the Latin for—a thousand mares, three thousand daughters, eight hundred and two trees, nine hundred animals, the twenty-fourth day.

French.

French.

Two hours allowed.

1. Translate into French,
- without transcribing the English*
- :—

- A. It is more noble to forgive an enemy than to avenge one's self.
 B. My sister is prettier than yours ; but your brother is cleverer than mine.
 C. These books are very much esteemed by my dear father.
 D. My sister has been a little better, but is now worse than ever.
 E. My father's enemies are stronger than his friends.
 F. Bring me some coffee, and put in it some sugar and cream.
 G. My friend's mother has sold her house and garden.
 H. Have you seen my sister's watch, so small and pretty ?
 I. This general's horses are finer than my father's.
 J. These little girls' dolls are prettier than ours.

2. Translate into English,
- without transcribing the French*
- :—

- A. Votre lettre du quinze janvier m'est parvenue le premier février.
 B. Ces ouvrages sont très estimés des savants.
 C. L'histoire est aussi utile qu'agréable et intéressante.
 D. La vertu est plus précieuse que les richesses.
 E. Avez-vous vu mes fleurs favorites, les roses, si fraîches et si douces ?
 F. Il y a quelques défauts dans ce tableau.

3. Write down the plural of each of these nouns—Jeu, sou, voix, travail, bal, aïeul, cheval, détail, fou, bijou, couteau, œil.

4. Write down the feminine form of each of these adjectives—Agé, vif, vieux, net, fier, flatteur, pécheur, épais, mou, long, conducteur, meilleur.

ANNEX C.

PUPIL-TEACHERS—THIRD CLASS.

Grammar.

An hour and a half allowed.

1. "Beside the bed where parting life was laid
-
- And sorrow guilt and pain by turns dismayed
-
- The reverend champion stood. At his control
-
- Despair and anguish fled the struggling soul
-
- Comfort came down the trembling wretch to raise
-
- And his last faltering accents whispered praise."

DESERTED VILLAGE.

- (a) Supply the punctuation in the above quotation.
 (b) Paraphrase the passage.
 (c) Parse the words in italics.
 (d) Analyse the first four lines.
2. Give the origin or derivations of any six words selected from the above extract.
 3. Give examples of the various ways in which Adjectives may be formed from Nouns, and Adverbs from Adjectives.
 4. "That" may be a Relative, an Adjective, or a Conjunction. Give three examples of each.

Arithmetic.

An hour and a half allowed.

1. Show that $\frac{3 \cdot 25 + 2\frac{1}{4}}{3\frac{1}{4} - 2 \cdot 25} = 5\frac{1}{2}$; and find what fraction of half-a-crown is the difference between $\frac{3}{8}$ of a shilling and $\frac{5}{16}$ of a guinea.
 2. Find, by Practice and Proportion, the value of 2,731 cwt. at £4 8s. 9½d. per cwt.
 3. I laid out upon an estate, which cost me originally £798 16s., the sum of £500 15s. How must I sell it to gain 35 per cent. ?
 4. Extract, to six decimal places, the square root of $6\frac{1}{2}$.

Geography.

An hour and a half allowed.

Three questions to be answered.

1. Draw an outline map of the Australian Continent, showing the coast-lines, boundaries, and chief towns of the various Colonies.
 2. Enumerate the island groups of the Pacific lying between the Equator and the Southern Tropic ; or, exhibit the relative positions of the same by means of an outline map.
 3. Describe fully one of the two larger islands of New Zealand.
 4. Give a full description of the table-lands of New South Wales.

School Management.

An hour and a half allowed.

Three questions to be answered, the last to be one of them.

N.B.—In the first lines of your first answer give specimens of copy lines in three hands.

1. How would you maintain a healthy spirit of emulation in your class ?
 2. On what principles would you act in giving rewards to pupils ?
 3. Explain clearly how you would teach Simple Proportion to a class ?
 4. Give notes of a moral lesson on " True Heroism."

Music.

An hour allowed.

1. Define a major sixth and a minor sixth. How many of each are there in a major scale, and where are they respectively situated ?
 2. Define the terms—adagio, accelerando, staccato, decrescendo, dal segno, sforzando, alligretto, a tempo ; and give the sign for each used in music.
 3. What is a sharp, a flat, a natural, a key-signature ? Give an example of each.

4. Write three measures in $\frac{3}{8}$ time. How would you beat such time for your class?
 5. Complete the imperfect measures in the following passage, using rests only—

History.

(Three questions to be answered.)

An hour and a half allowed.

1. Enumerate the authors of the "Old English" period. Specify the literary works of King Alfred.
2. Give an account of Simon de Montfort, and of the struggles maintained during his time.
3. Describe the social condition of England during the time of the Angevins.
4. Describe the administration of Governor Sir Ralph Darling.

Euclid.

An hour and a half allowed.

1. If two triangles have two angles of the one equal to two angles of the other, each to each, and one side equal to one side, namely either the sides adjacent to the equal angles, or the sides which are opposite to the equal angles in each, then shall the other sides be equal, each to each, and also the third angle of the one equal to the third angle of the other.
2. If a side of any triangle be produced, the exterior angle is equal to the two interior and opposite angles; and three interior angles of every triangle are together equal to two right angles.
3. Triangles upon the same base and between the same parallels are equal.
4. To describe a parallelogram that shall be equal to a given triangle, and have one of its angles equal to a given rectilineal angle.

Algebra.

An hour and a half allowed.

1. Resolve into factors $a^4 - 16b^2$, $2xy + x^2 + y^2 - z^2$, $9 - 64a^4b^4$, and $a^3 - b^3$.
2. Find the G.C.M. of $3x^2 - 22x + 32$ and $x^3 - 11x^2 + 32x - 28$, and the L.C.M. of $x^2 - 4y^2$ and $x^2 + xy - 6y^2$.
3. Reduce to their simplest forms the following expressions:—

$$\frac{x^3 - 5x^2 + 11x - 15}{x^3 - x^2 + 3x + 5} \text{ and } \frac{a^2 - a - 20}{a^2 + a - 12}$$

4. Solve $\frac{5x - 1}{2x + 3} = \frac{5x - 3}{2x - 3}$ and $\frac{3x + 2}{x - 1} + \frac{2x - 4}{x + 2} = 5$.

Latin.

Two hours allowed.

1. Translate into Latin, *without transcribing the English*,—
 - (a) All wise mothers wish that their daughters may love virtue.
 - (b) Do not flee, soldiers! The enemy's camp has been taken by our horse-soldiers.
 - (c) My dear sons, take care that your bodies may be vigorously exercised.
 - (d) As soon as I have finished this work I shall take a walk in the garden.
 - (e) The Romans' camp, which has been pitched near the river will be taken by our men.
 - (f) There is no doubt that that brother of yours is likely to injure the State.
 - (g) My daughters have been walking in the garden, singing and adorning themselves with flowers.
 - (h) My dear daughters, obey your mother who has loved you so long.
 - (i) We who have finished our work will be praised by the wise master.
 - (j) You brave soldiers, who have fought so bravely, will be praised by the General.
2. Write down, with the English, the 2nd person singular of each tense, active voice, of *rapio*, *rapui*, *raptum*, I seize, and passive voice of *mordeo*, *momordi*, *morsum*, I bite.
3. Decline in full these combinations of words:—

idem aureum monile.
 ego humilis filia.
 aliud melius donum.

French.

Two hours allowed.

1. Translate into French, *without transcribing the English*,—
 - A. Here is my house, and your cousin's.
 - B. The arm-chair on which I am sitting is very old.
 - C. The house in which I was living is larger than this one.
 - D. Here are two pears; choose which you please.
 - E. Whatever your intentions may be, no reason can justify a falsehood.
 - F. Let us be more attentive and diligent, in order that we may have real and true pleasure.
 - G. My dear daughter, be humane, kindhearted, and generous.
 - H. When we have filled our pockets with pears and apples, we shall go away.
 - I. I shall answer his letter, and wait for the steam-boat till to-morrow.
 - J. Since you are so idle, Mary, I shall not speak to you any more.
2. Translate into English, *without transcribing the French*:—
 - A. Combien de plumes avez-vous? Je n'en ai pas une.
 - B. Chacun d'eux résolut de vivre en gentilhomme.
 - C. L'entreprise est difficile, mais vous en viendrez à bout.
 - D. Un magistrat intègre et un brave officier sont également estimables; celui-là fait la guerre aux ennemis domestiques, celui-ci nous protège contre les ennemis extérieurs.
 - E. C'est une chose à laquelle ma sœur ne condescendra jamais.
 - F. Vos frères n'ont pas dû le rencontrer.
3. Write down, with the English, the third person plural of each tense of *devoir* and *mordre*.

ANNEX D.

PUPIL-TEACHERS—SECOND CLASS.

Grammar.

An hour and a half allowed.

1. "Far as Creation's ample range extends
The scale of sensual mental powers ascends
Mark how it mounts to Man's imperial race
From the green myriads in the peopled grass
What modes of sight betwixt each wide extreme—
The mole's dim curtain and the lynx's beam—
Of smell—the headlong lioness between
And hound sagacious on the tainted green."
"ESSAY ON MAN."
- a. Supply the punctuation in the above.
b. Paraphrase the passage, explaining the allusions in the last three lines.
c. Parse the words in italics.
d. Analyse the first four lines.

2. Give examples of words (six of each) containing the diphthongs *ie* and *ei*; and suggest some general rule regulating their application.

3. *Mine* and *thine* are sometimes used before nouns beginning with a vowel or silent *h*. Give six examples.

4. The *nominative* is, as a rule, placed before the *verb*; but it is often found after it, and at a distance from it. Give six examples.

Arithmetic.

An hour and a half allowed.

1. If £40 10s. 8d. is required to provide 16 men with food for 8 weeks, when flour is 5d. a pound; what sum would be required to supply 15 men with provisions for $10\frac{1}{2}$ weeks, when flour has risen to 6d. per pound?
2. Find, by Practice, the cost of 2 tons 15 cwt. 27 lb. at £5 11s. 7 $\frac{3}{4}$ d. per cwt.
3. Find what part of $\frac{1}{3}$ of an acre is 25 $\frac{1}{4}$ poles? Represent $\frac{7}{183}$ of 28 days as a fraction of $\frac{1}{30}$ of a minute.
4. What is the present worth of £357, due 296 days hence, at $3\frac{1}{2}$ per cent. per annum?

Geography.

An hour and a half allowed.

Three questions to be answered.

1. Describe one of the following:—
a. Palestine.
b. Japan.
2. Give a full account of one of the Californias (Upper or Lower).
3. Enumerate the Rivers composing the drainage system of Southern Asia; and describe one of them in full.
4. Account for the Tides, and trace the progress of the Tidal Wave from its source to the Arctic Ocean.

School Management.

An hour and a half allowed.

Three questions to be answered, the last to be one of them.

N.B.—In the first lines of your first answer give specimens of copy lines in three hands.

1. How do you determine when a School is in a healthy condition of Government?
2. Explain what you understand to be the objects sought by punishment, and describe the means you would employ to gain those objects?
3. Explain as to your class the mode of solving the following:— $(\frac{1}{2} + \frac{1}{3} + \frac{1}{6} + \frac{1}{4}) = ?$
4. Give notes of a Moral Lesson on one of the following:—"Fidelity," "Gentleness."

Music.

An hour allowed.

1. Write on the staff—treble clef—the key of G major, showing where the semitones fall.
2. Write on the staff—bass clef—the key signatures of A, $A\flat$, B, $B\flat$, D, F.
3. What is a tetrachord? How many are there in the major scale?
4. In key-signatures with sharps, what is the order of sharps?
5. Over each of the following notes write its pitch-name (A, B, C, &c.), under each its time name (minim, crotchet, &c.), and after each its corresponding rest:—

History.

An hour and a half allowed.

Three questions to be answered.

1. Give an account of Cardinal Wolsey, and his influence upon the State policy of England.
2. Describe the popular amusements during the Tudor Period.
3. Give a description of the Plague and the Great Fire of London—1665 to 1688.
4. Describe the discovery and development of the mineral wealth of South Australia.

Euclid.

An hour and a half allowed.

1. To describe a parallelogram that shall be equal to a given triangle, and have one of its angles equal to a given rectilineal angle.
2. The perpendiculars let fall on two sides of a triangle from any point in the straight line bisecting the angle between them are equal to each other.
3. To divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts, may be equal to the square on the other part.
4. If the square described on one of the sides of a triangle be equal to the squares described on the other two sides of it, the angle contained by these two sides is a right angle.

Algebra.

Algebra.

An hour and a half allowed.

1. Reduce to simple fractions in their lowest terms:—

$$\frac{x^2+x-2}{x-7} \times \frac{x^2-13x+42}{x^2+2x} \text{ and } \frac{x^2-4}{x^2+5x} \times \frac{x^2-25}{x^2+2x}$$

2. Divide the number 208 into two parts such, that the sum of the fourth of the greater, and the third of the less, is less by 4, than 4 times the difference between the parts.

3. Solve the equations:—

$$(x+a)(2x+b-c)^2 = (x+b)(2x+a+c)^2, \sqrt{x+4ab} = 2a - \sqrt{x}$$

4. Simplify:—

$$\frac{\sqrt{x} + \sqrt{y}}{2\sqrt{x}} + \frac{\sqrt{x} \cdot \sqrt{y}}{2\sqrt{y}} \text{ and } \frac{1}{\sqrt{5} + \sqrt{2}i} \text{ also } \frac{\sqrt{12+6\sqrt{3}}}{1+\sqrt{3}}$$

Latin.

Two hours allowed.

1. Translate into Latin,
- without transcribing the English*
- ,—

- (a) It is befitting in good daughters to obey their mother's orders.
 (b) Many citizens were killed when returning from the city.
 (c) It cannot be doubted that you have acted worse than all the others, thou wicked Consul.
 (d) Towards summer we shall migrate into other lands with our father and mother.
 (e) The Romans were able to conquer the Gauls more easily than the Germans.
 (f) The enemy's camp, which was pitched near the river, will be taken by our soldiers in three days.
 (g) Let us always obey the laws of the country in which we dwell.
 (h) Who doubts that it is honourable to die for one's country?
 (i) O, just Judge! you ought to have pity on the wretched girls.
 (j) On the same day on which the poet was born the Gauls' camp was taken by our soldiers.

2. Write down with the English the 2nd pers. sing. of each tense, active and passive, with all the infinitives and participles of
- rapio, rapui, raptum*
- , to seize.

3. Give the English of these parts of verbs:—cant, velitis, ferris, cundo, nolles, fer, amere, vicere, loquere, locutura.

French.

Two hours allowed.

1. Translate into French,
- without transcribing the English*
- ,—

- A. Shall I have the pleasure of answering his letter?
 B. My dear little sister is loved and esteemed by everybody.
 C. We had fallen a-leap, but my brother had got up at 4 o'clock.
 D. My dear daughters, have you not risen too late this morning?
 E. There would be more happiness if everybody were to obey God's law.
 F. Let us endeavour to persuade her to send him some money.
 G. People do not become learned without studying, nor rich without working.
 H. These girls have run over the whole town to find their unhappy mother.
 I. They who serve the country well have no need of ancestors.
 J. These little girls, who amuse themselves the whole day in my garden, are very dear to me

2. Translate into English,
- without transcribing the French*
- ,—

Deux petits garçons, ayant trouvé une noix, se la disputèrent vivement. Elle est à moi, dit l'un d'eux; car c'est moi qui l'ai vue le premier. Non, mon cher, elle m'appartient, répondit l'autre; car c'est moi qui l'ai ramassée. Ils en venaient déjà aux mains, lorsqu'un jeune homme, qui était témoin de la dispute, leur dit: Venez, je vais vider votre querelle. Il se plaça entre les deux petits garçons, cassa la noix et dit: L'une des coquilles appartient à celui qui le premier a vu la noix, l'autre sera pour celui qui l'a ramassée. Quant à l'amande, je la garde pour prix du jugement que j'ai rendu.

3. Conjugate in full, giving the English of the first person singular of each tense,
- tenir and savoir*
- .

ANNEX E.

PUPIL-TEACHERS—FIRST CLASS FOR ADMISSION TO TRAINING.

Grammar.

An hour and a half allowed.

1. ["Heaven from all creatures *hides* the book of fate
Ali but the page prescribed—their present state
 From brutes what men—from men what spirits know
 Or who could suffer being here below]
 The lamb they riot dooms to bleed to-day.
 Had he thy reason would he skip and play
 Pleased to the last he crops the flowery food
 And licks the hand just raised to shed his blood."
 "ESSAY ON MAN."

- a. Supply the punctuation in the above quotation.
 b. Paraphrase the passage.
 c. Parse the words in italics.
 d. Analyse the first four lines.

2. Some words change y into i, before "ous," as "study," "studious"; but others transform the y into e. Give six examples.

3. The relative sometimes refers to a whole clause as its "Antecedent." Give three examples.

4. Give examples of the various sounds which the letters (or vowels)
- a*
- and
- e*
- represent in English Orthography.

Arithmetic.

An hour and a half allowed.

1. If $3\frac{5}{8}$ shillings pay for $1\frac{1}{8}$ yard, how much may be bought for $\pounds 6\frac{7}{8}$?
 2. If 17 per cent. be gained by selling flour at $\pounds 1$ 5s. 8d. per cwt., how much per cent. is gained or lost by selling it at $\pounds 1$ 0s. 9d. per cwt.?
 Find the difference between the sum of the cube roots of 50 and 31, and the cube root of their sum.
 4. Two persons purchase a house jointly. They afterwards, however, let it for a yearly rental of $\pounds 183$ 6s. 8d. What share of the annual profit from the rent should each receive, the one having contributed $\pounds 850$, and the other $\pounds 1,150$, of the purchase money, and the ground rent being $\pounds 44$ 8s. per annum?

Geography.

Geography.

An hour and a half allowed. Three questions to be answered.

1. Define the term "Wind" and show what gives rise to Atmospheric Currents. Describe also what is meant by the Zone of Calms and Variables.
2. Draw an outline map of Cape Colony.
3. Describe fully the conditions on which Climate depends, showing their application to New South Wales.
4. Give a full account of Chili.

School Management.

An hour and a half allowed. Three questions to be answered. The last must be one.

N.B.—In the first lines of your first answer, give specimens of Copy Lines in three hands.

1. What is to be gained by teaching Grammar in School?
2. When do you consider a Reading Lesson thoroughly taught?
3. State your views as to the aims, ends, and working of the Kindergarten System.
4. Give notes of a Moral Lesson on "Reverence for the aged."

Music.

An hour allowed.

1. Transpose the following passage into the key of A :—

2. Write on the staff—bass clef—the key-signatures of C \sharp , D, A \flat , G, E, D \flat .
3. Define the terms—perfect 4th, augmented 4th, major 6th, augmented 6th, minor 3rd, diminished 3rd, minor 7th, and diminished 7th, and write these intervals on the treble clef, commencing in each case from G.
4. How can you decide whether a piece of music is in the major or minor key?
5. What is the order of major scales with flats? How is the tonic of each flat scale found?

History.

An hour and a half allowed. Answer three questions fully.

1. Explain clearly how George the first succeeded to the throne of Great Britain.
2. Give an account of Sir Robert Walpole as a statesman, noticing the times in which he lived.
3. Describe the Rebellion of 1745.
4. Describe Sturt's exploratory journey into Central Australia.

Euclid.

An hour and a half allowed.

1. On the same base and on the same side of it, there cannot be two triangles having their sides which are terminated in one extremity of the base equal to one another, and likewise those which are terminated at the other extremity equal to one another.
2. Construct a right-angled triangle, having given the hypotenuse and the difference of the sides.
3. In any triangle, the sum of the squares on the sides is equal to twice the square on half the base, together with twice the square on the straight line drawn from the vertex to the middle point of the base.
4. If a straight line be divided into any two parts, the squares on the whole line, and on one of the parts, are equal to twice the rectangle contained by the whole and that part, together with the square on the other part.

Algebra.

An hour and a half allowed.

1. Extract the cube root of $27x^6 - 54ax^5 + 63a^2x^4 - 44a^3x^3 + 21a^4x^2 - 6a^5x + a^6$
2. Solve $\frac{x+4}{3x+5} + 1\frac{1}{2} = \frac{3x+8}{2x+8}$ and $\frac{6x+13}{15} - \frac{3x+5}{5x-25} = \frac{2x}{5}$
3. Solve $\sqrt{5}(x+2) = \sqrt{5x} + 2$ and $x^2 + 19x = 20$
4. Find two numbers whose sum, multiplied by the greater, is 223, and their difference 5.

Latin.

Two hours allowed.

1. Translate into English, *without transcribing the Latin* :—

Perfacile factu esse illis probat conata perficere, propterea quod ipse suæ civitatis imperium obtenturus esset; non esse dubium, quin totius Galliae plurimum Helvetii possent; se suis copiis suoque exercitu illis regna conciliaturum confirmat. Hac oratione adducti inter se fidem et jusjurandum dant, et, regno occupato, per tres potentissimos ac firmissimos populos totius Galliae sese potiri posse sperant.

2. Parse the words in italics.
3. Translate into Latin, *without transcribing the English* :—
 - a. Do you believe that our camp which the soldiers have pitched near the river will be taken by the enemy?
 - b. Cæsar has sent two messengers to Ariovistus to ask for the gold he promised.
 - c. Let us go to see Corinth which is called the most beautiful city of Greece.
 - d. My sister promised to come with me to Rome which the Romans call the head of the whole earth.
 - e. The General having heard these things ordered the soldiers to return the gold they had taken.
 - f. After we had finished this work we shall return to Athens, the largest city of Greece.
 - g. I am of opinion that the world was created by God, and is governed by his providence.
 - h. The girls who obey their mothers' laws are to be praised.
4. Write down the principal parts of these verbs :—*tero, vinco, texo, quæro, vincio, morior hæreo, occido, cogo, committo.*

French.

French.

Two hours allowed.

1. Translate into French, *without transcribing the English*,—
 - A. When will you see his sister again? It is necessary that we should see each other soon.
 - B. After the death of this king his empire will be dissolved.
 - C. That sum will not be sufficient to pay his debts.
 - D. My dress was torn, but my dear mother sewed it again very neatly.
 - E. She has not written again; it is a sign that she is coming.
 - F. A wise man never defers till to-morrow what he can do to-day.
 - G. Has not your sister surprised you very much by telling you that?
 - H. My sister has been in great dejection of mind, but the news she has just received has revived her.
 - I. Of all the great French writers Voltaire is the one I like least.
 - J. Truth, notwithstanding prejudice, error, and falsehood, clear its way and penetrates at last.
2. Write down the 3rd person singular of each tense of the verb *écrire*.
3. Translate into English, *without transcribing the French*,—

Un marchand voyageait à cheval, pour aller chercher dans une ville éloignée une somme considérable, qui lui était due; son fidèle barbet marchait à côté de lui. Après avoir touché son argent, il se remit en route pour revenir chez lui.

En chemin le porte-manteau qui renfermait sa bourse, tomba de cheval, sans que le marchand s'en aperçût. Le barbet essaya d'enlever le porte-manteau avec ses dents; ne pouvant en venir à bout, il courut à son maître et se mit à sauter contre le cheval, en aboyant sans cesse et avec une telle force, que le marchand ne savait qu'en penser. Il lui commanda de se taire, ce fut en vain; il lui donna un coup de fouet, mais inutilement.

ANNEX F.

STUDENTS IN TRAINING.

Grammar.

Three hours allowed.

Two questions will suffice for the maximum number of marks—the first is to be one of them.

1. [“ If these be motives weak break off betimes
And every man hence to his idle bed
So let high-sighted tyranny range on
Till each man drop by lottery. But if these
As I am sure they do bear fire enough
To kindle cowards and to steel with valour
The melting spirits of women then countrymen
What need we any spur but our own cause
To prick us to redress] what other bond
Than secret Romans that have spoke the word
And will not palter and what other oath
Than honesty to honesty engaged
That this shall be or we will fall for it.”

JULIUS CÆSAR.

- (a.) Supply the punctuation in the above passage.
- (b.) Paraphrase it.
- (c.) Parse the words italicized.
- (d.) Analyse the portion within brackets.
2. Give examples of nouns that have the same form, singular and plural, and of others that have the singular form only.
3. In how many ways may a noun be in the nominative case. Give examples of each, and explain clearly what is meant by a “ noun in apposition.”
4. In analysis, sentences are met with which begin, some with the extension of the predicate, and others with the completion of the predicate. Give examples showing this.

Arithmetic.

Three hours allowed.

Six questions are required for the maximum number of marks; but candidates for section A are expected to solve the last six.

1. If 500 men excavate a reservoir 800 yards long, 500 yards wide, and 120 feet deep, in four months, how many men will be required to excavate another reservoir 100 yards long, 400 yards wide, and 50 yards deep in five months?
2. By practice. Find the value of 2 tons 3 qr. 19½ lb. at £7 8s. 6½d. per ton.
3. A dealer accepts £19 6s. 3d. in payment of a debt of £20 5s. 6½d. due twelve months hence, in consideration of being paid at once. What rate of discount does he allow?
4. A cistern can be filled by three taps, flowing separately, in 20, 30, and 40 minutes respectively. In what time will it be filled should they all flow together?
5. £5,151 sterling are invested in 5 per cent. stock at 101. The stock, however, rises to 105, and it is sold out, the proceeds being then invested in stock at 102, which gives 4½ per cent. interest. What change takes place in the income of the investor?
6. Solve the following to not less than three decimal places :—
√1·014049
7. A has coffee, which he exchanges at 6d. per lb. more than it cost him, for tea which cost B 3½s. a pound but which he now values at 4½s. How much did the coffee at first cost A?
8. A square apartment, the floor of which measures 32 square yards and 1 square foot, is 11½ feet high. Calculate the expense of colouring the walls and ceiling at 2½d. for every square yard.
9. Two men in two weeks complete a piece of work, for which they are paid £7 7s. 9d. One of them works alternately 9 hours and 8 hours daily; the other works 9½ hours daily during 5 days per week, but remains idle on the remaining day. How should the amount they earn be divided in these circumstances?

Geography.

Three hours allowed.

Four questions to be taken for the maximum number of marks. Write down each question before answering it.

1. Through what regions, tracts, or countries does each of the following pass?
 - The Meridian of Greenwich.
 - The Equator.
 - The Tropic of Cancer.
 - The Tropic of Capricorn.

Any reference to maps in the examination room is prohibited.

2.

2. Describe in general terms the Great Archipelago lying north and north-west of the Australian Continent, giving a more detailed account of one of the most important islands—Java, for example.
3. Describe the course of the Danube, noticing its tributaries.
4. Describe fully one of the following:—
 1. Mexico.
 2. Scandinavia.
5. Account for the Monsoons, and describe their range.
6. Draw lines on an outline map of New South Wales and Victoria, showing their principal and secondary watersheds.

Art of Teaching.

Three hours allowed.

Four questions to be answered, one of them (the second) to be dealt with in the form of a letter to the Minister. Write down each question before answering it.

N.B.—In the first lines of your first answer, give specimens of head lines in three forms at least.

1. In constructing a Time-table for Infants in what respects might it differ from one for grown children, apart altogether from the range of subjects?
2. What do you understand by "Moral Government" in school? How would you secure it?
3. What lessons, in your estimation, are best calculated to cultivate close attention and sustained effort? Give reasons for your opinions.
4. Describe how you would give an Object or Oral Lesson on one of the following. Give full notes:—

An Australian Fig-tree (*Ficus Macrophylla*).

An Arch (constructed of stone or brick).

Presence of Mind.

5. Describe the best mode of teaching Geography. Explain also, if possible, the method employed in German schools.
6. What special difficulties attend the giving of Collective Oral Lessons? Explain how you would meet them.

Sanitary Science.

Three hours allowed.

Four questions to be answered for the maximum number of marks.

Write down each question before proceeding to answer it.

1. Mention the various changes which food must undergo before it can supply the blood with nourishment.
2. What are the Instructions of the Royal Humane Society in relation to Bathing, and accidents arising therefrom?
3. Describe how you would treat one of the following:—
 - a. Bronchitis.
 - b. Scarlet Fever.
4. What is meant by a "Vapour Bath"? In what cases can it be safely employed? How could you improvise one in an ordinary household?
5. Describe clearly the effects of one of the following upon the Human System:—
 - a. Intemperance (in eating or drinking).
 - b. Smoking (Tobacco or Narcotics).

Music.

One hour and a half allowed.

Either Part I. or Part II. to be answered.

Part I.—Tonic Sol-fa Notation.

1. Give an account of the three positions of the common chord.
2. Rewrite the following passage, exhibiting the transition according to the better method:—

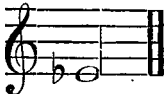

| s : s | m : d | f : f | l : — | l : l | ta l | ta : ta | l : — | s : l t | d' : f | m : r | d : — ||

3. Write notes of a lesson on transition of two removes.
4. Show how to divide a pulse into thirds, sixths, eighths, and ninths.
5. Write the passage in question 2 in the Staff Notation.

Part II. | Staff Notation.

1. Write on the staff in the bass clef the key-signatures of B major, B \flat major, C minor, and C \sharp minor.
2. Rewrite the following passage half a tone higher, making the necessary alterations:—

3. Write this note  in all the clefs with which you are acquainted without

altering the pitch.

4. Write on the staff the notes, their names, and corresponding rests, equal respectively to 16, 24, 8, 12, 32, 6 demi-semiquavers.
5. Write below each of the following intervals its name:—

NOTE.—Students in training must take Part II.

British Literature and History.

Three hours allowed.

Five questions will suffice for the maximum number of marks, provided that they are nearly evenly distributed between the History and Literature.

1. Account for the great advance made by British Literature more especially during the latter half of the Sixteenth Century.

2. Give a concise account of Hampden and his leading Contemporaries.
3. Describe the plot of the "Facrie Queene," and quote a passage of twelve consecutive lines from the work.
4. Describe the troubles in Scotland during the lifetime of Queen Mary (Stuart).
5. Give an account of the administration of Sir Thomas Brisbane in New South Wales.
6. Enumerate the leading Authors of the Elizabethan Age, and describe one Work composed by any of the more eminent prose writers.
7. Give an outline of the "Faustus," of Marlowe; or, failing this, of any one of the standard tragedies of the Shakesperian School.

Geometry.

Three hours allowed.

N.B.—Six of the following, well answered, will suffice for the maximum number of marks :—

1. If a quadrilateral have two of its opposite sides parallel, and the two others equal but not parallel, any two of its opposite angles are together equal to two right angles.
2. If a side of a triangle be produced the exterior angle is equal to the two interior and opposite angles, and the three interior angles of every triangle are together equal to two right angles.
3. Show that in a straight line, divided as in the 11th Prop. of the 2nd Book, the rectangle contained by the sum and difference of the parts is equal to the rectangle contained by the parts.
4. To divide a given straight line into two parts so that the rectangle contained by the whole and one of the parts may be equal to the square of the other part.
5. To describe a square that shall be equal to a given rectilineal figure.
6. Draw a straight line to touch each of two given circles.
7. Equal straight lines in a circle are equally distant from the centre, and those which are equally distant from the centre are equal to one another.

Algebra.

Three hours allowed.

N.B.—Six of the following numbers, well answered, will secure a pass for 2 A.

1. Extract the cube root of $x^3 - 3x^2y + 3xy^2 - y^3 + 8x^3 + 6x^2z - 12xyz + 6y^2z + 12xz^2 - 12yz^2$.
2. Find the G.C.M. of $x^3 - (2a + b)x^2 + (2ab + a^2)x - a^2b$, and $3x^2 - (4a + 2b)x + 2ab + a^2$; and the L.C.M. of $x^3 + ax^4 + a^2x^3 + a^3x^2 + a^4x + a^5$, and $x^5 - ax^4 + a^2x^3 - a^3x^2 + a^4x - a^5$.
3. Simplify $\left(\frac{x}{x-y} - \frac{y}{x+y}\right) \div \left(\frac{x^2}{x^2+y^2} + \frac{y^2}{x^2-y^2}\right)$ and $\left(\frac{2x}{x+y} + \frac{y}{x-y} - \frac{y^2}{x^2-y^2}\right) \div \left(\frac{1}{x+y} + \frac{x}{x^2-y^2}\right)$
4. Multiply $a^{\frac{5}{2}} - 2a^2b^{\frac{1}{2}} + 4a^{\frac{3}{2}}b^{\frac{3}{2}} - 8ab + 16a^{\frac{1}{2}}b^{\frac{5}{2}} - 32b^{\frac{5}{2}}$ by $a^{\frac{1}{2}} + 2b^{\frac{1}{2}}$, and extract the square root of $9a^2 - 6ab + 30ac + 6ad + b^2 - 10bc - 2bd + 25c^2 + 10cd + d^2$.
5. Solve $3x + 5y = 76$
 $4x + 6z = 108$
 $5z + 7y = 106$
and $\sqrt{9x+4} + \sqrt{9x-1} = 3$.
6. An officer can form his men into a hollow square, 4 deep; and also into a hollow square, 8 deep; the front, in the second square, contains 16 men fewer than that in the first; find the number of men.
7. Solve $4x^2 + 9xy = 190$ } and $x^3 + y^3 = 2728$ }
 $4x - 5y = 10$ } and $x^2 - xy + y^2 = 124$ }
8. Solve $\sqrt{2x+4} - \sqrt{\frac{x}{2}+6} = 1$, and $\frac{1}{\sqrt{x+1}} + \frac{1}{\sqrt{x-1}} = \frac{1}{\sqrt{x^2-1}}$

French.

1. Translate into English, *without transcribing the French*,—

A. Le maréchal Stenau ne perdit pas un moment; à peine aperçut-il les Suédois qu'il fondit sur eux avec la meilleure partie de sa cavalerie. Le choc violent de cette troupe tombant sur les Suédois dans l'instant qu'ils formaient leurs bataillons, les mit en désordre; ils s'ouvrirent, ils furent rompus et poursuivis jusque dans la rivière. Le roi de Suède les rallia le moment d'après au milieu de l'eau, aussi aisément que s'il eût fait une revue. Alors ses soldats, marchant plus serrés qu'auparavant, repoussèrent le maréchal Stenau et s'avancèrent dans la plaine. Stenau sentit que ses troupes étaient étonnées; il les fit retirer en habile homme dans un lieu sec, flanqué d'un marais et d'un bois où était son artillerie. L'avantage du terrain, et le temps qu'il avait donné aux Saxons de revenir de leur première surprise, leur rendit tout leur courage.

B. C'est lui qui a établi des hussards en Russie. Enfin il a eu jusqu'à une école d'ingénieurs dans un pays où personne ne savait avant lui les éléments de la géométrie. Il était bon ingénieur lui-même; mais surtout il excellait dans tous les arts de la marine; bon capitaine de vaisseau, habile pilote, bon matelot, adroit charpentier, et d'autant plus estimable dans ces arts qu'il était né avec une crainte extrême de l'eau; il ne pouvait dans sa jeunesse passer sur un pont sans frémir: il faisait fermer alors les volets de bois de son carrosse; le courage et le génie domptèrent en lui cette faiblesse machinale.

Il fit construire un beau port auprès d'Azoph, à l'embouchure du Tanaïs: il voulait y entretenir des galères, et dans la suite, croyant que ces vaisseaux longs, plats, et légers, devaient réussir dans la mer Baltique, il en a fait construire plus de trois cents dans sa ville favorite de Pétersbourg: il a montré à ses sujets l'art de les bâtir avec du simple sapin, et celui de les conduire.

2. Translate into French, *without transcribing the English*,—

A. After having finished this work, I shall go to pay a visit to my mother.
B. Whatever your opinion on this subject may be, do all you can to relieve the miserable girl.
C. The lady you heard playing is going to sing this song that I composed.
D. The girls you have taught are now trying to teach their little sisters.
E. When walking in my garden this morning, I found my little daughter crying bitterly.
F. The roses I have brought you are the finest I could find in the whole garden.
G. The books I wished you to read are full of facts that will be very useful to you.
H. Those songs you have heard sung this morning, have been much praised by my father.

3. Write down in a tabular form the 1st pers. plur. pres. indic., 3rd sing. pret. def., 2nd plur. pres. imperative, 3rd plur. pres. cond., 3rd sing. imperf. subj. of *peindre, pouvoir, tenir, se promener*.

STUDENTS IN TRAINING.

Latin.

Three hours allowed.

1. Translate into English, *without transcribing the Latin*,—

- (a) Postquam id animum advertit, copias suas Cæsar in proximum collem subducit, equitatumque, qui sustineret hostium impetum, misit. Ipse interim in colle medio triplicem aciem instruxit legionum quatuor veteranorum, ita uti supra se in summo jugo duas legiones, quas in Gallia citeriore proxime conscripserat, et omnia auxilia collocaret, ac totum montem hominibus completeret; interea sarcinas in unum locum conferri, et eum ab his, qui in superiore acie constiterant, muniri jussit. Helvetii cum omnibus suis carris secuti impedimenta in unum locum contulerunt; ipsi confertissima acie, rejecto nostro equitatu, phalange facta, sub primam nostram aciem successerunt.
- (b) Hæc sibi esse curæ: frumentum Sequanos subministrare, jamque esse in agris frumenta matura; de itinere ipsos brevi tempore judicatu. Quod non fore dicto audientes neque signa latenti dicantur, nihil [se ea re commoveri; scire enim, quibuscunque exercitus dicto audiens non fuerit, aut male re gesta fortunam defuisse, aut aliquo facinore comperto avaritiam esse convictam: suam innocentiam perpetua vita, felicitatem Helvetiorum bello esse perspectam. Itaque se, quod in longiorem diem collaturus fuisset, representaturum, et proxima nocte de quarta vigilia castra moturum, ut quam primum intelligere posset, utrum apud eos pudor atque officium an timor valeret. Quod si præterea nemo scquatur, tamen se cum sola decima legione iturum, de qua non dubitaret, sibi que eam prætoriam cohortem futuram.

2. Parse the words in italics.

3. Turn the speech in extract B into *Oratio recta*.4. Translate into Latin, *without transcribing the English*,—

- (a) Having pitched his camp near the river, the general was about to draw up his line of battle.
- (b) I am of opinion that virtue is to be prized by all good girls.
- (c) The more you love your parents and follow after virtue, the more happy you will be, my dear sister.
- (d) Having exhorted his fellow citizens to fight bravely for the republic, he promised to be at their head in time of danger.
- (e) When you have taken the camp which the Germans have pitched in the middle of the plain, you must advance to Marseilles as quickly as possible.
- (f) Do you believe that we must all die?
- (g) At what price do you value this field? I believe it is not worth as much as that house.
- (h) After this speech had been delivered, the sentiments of all the bystanders were wonderfully changed, and the greatest alacrity and keenness for going on with the war were engendered.

5. Decline these combinations of words:—

alius præceps vir.
hæc vetus domus.
quod longius rete.

and give the principal parts of—occido, impello, pango, depingo, cohæreo, cogo, comburo, texo, contero, surgo.

Mathematics.

Three hours allowed.

1. A person observes the elevation of a tower to be 60° , and, on retiring from it 100 yards further, he finds the elevation to be 30° . Determine the height of the tower.

2. Prove these formulæ:—

$$a. \quad \frac{\cot. \frac{1}{2} A}{\cot. A} = 1 + \sec. A.$$

$$b. \quad \frac{\sin. A + \sin. 2A}{\cos. A + \cos. 2A} = \tan. \frac{3}{2} A.$$

2. Given $AB = 250$ yds., $AC = 160$ yds., and $A = 60^\circ$. Find the area of the triangle.

4. Solve the equations—

$$A. \quad \left. \begin{aligned} 3x^2 + xy + 3y^2 &= 8\frac{1}{3} \\ 8x^2 - 3xy + 8y^2 &= 17\frac{2}{3} \end{aligned} \right\}$$

$$B. \quad x^3 + 3x = a^3 - \frac{1}{a^3}$$

5. If $a + b + c + d = 2s$, prove that $4(ab + cd)^2 - (a^2 + b^2 - c^2 - d^2)^2 = 16(s - a)(s - b)(s - c)(s - d)$.

6. Find by the binomial theorem an approximate value of $\sqrt[7]{108}$.

7. If two circles touch externally, and a common tangent be drawn not passing through the point of contact; then the square of this tangent shall be equal to the rectangle of the diameters of the circles.

8. If the side of a hexagon inscribed in a circle be produced to equal the side of the inscribed square, a tangent to the circle from the extremity of the produced line will be equal to the side of the inscribed octagon.

Science.

Three hours allowed.

- Give a general account of the occurrence, preparation, and properties of iodine.
- Calculate the percentage composition of sulphuric and nitric acids.
 $H = 1, N = 14, O = 16, S = 32.$
- State the names of the following substances, and one method of preparation of each:
 $HCl, CO, P_2O_5, H_2S, NH_3, HNO_3.$
- Give some explanation of the phenomenon of lightning. What is the supposed use of lightning conductors?
- What is a magnet? How would you make one?
- Mention some of the principal causes which produce variation in the amount of CO_2 exhaled by the lungs.
- Describe fully the circulation of the blood.

ANNEX G.

THIRD-CLASS TEACHERS.

Grammar.

Three hours allowed.

Two questions, fully answered, will suffice for the maximum number of marks for 3 C or for 3 B, the first being one. Write down each question before proceeding to answer it; *all through this set the same practice is to be observed, unless otherwise instructed on the question paper.*

1. "Recall the traveller whose altered form
Has borne the buffet of the mountain storm
And who will first his fond impatience meet
His faithful dog's already at his feet
[Yes though the porter spurn him from the door
Though all that knew him know his face no more
His faithful dog shall tell his joy to each
With that mute eloquence which passes speech]
And see the master but returns to die
Yet who shall bid the watchful servant fly."

"PLEASURES OF MEMORY."

- (a) Supply the punctuation in the above passage.
(b) Paraphrase, or give its substance in other words.
(c) Parse the words printed in italics.
(d) Analyse the portion enclosed in brackets.
2. The same word may represent different parts of speech, according to the office it has to fill in the sentence, or the ideas to be expressed. Give six varied examples.
3. Give six examples of words pronounced alike, but spelled differently, showing also their applications.
4. Construct sentences showing the use of any seven of the following words, giving the derivations where possible:—

exhaust	degreo	grade	proscribe
foreign	adore	mellow	depict
data	apparatus	citron	languish

Arithmetic.

Three hours allowed.

Five questions have to be solved for Class 3, section C; six for 3 B; and candidates for 3 A are expected to solve the last six at least.

1. How long will it take a man to walk 16 miles, if he should take 110 steps of $2\frac{1}{2}$ feet each every minute?
2. Divide 28 tons 4 cwt. 3 qr. into 36 equal portions, and find the value of one of them (in two ways) at the rate of £7 10s. 8d. per cwt.
3. By practice, find the value of $644\frac{3}{8}$ packages, at £10 14s. 10½d. each.
4. A man, his wife, and three children earn twenty-seven shillings and sixpence per week. The wife earns twice as much as each child, and the man three times as much as his wife. What is the man's weekly earnings?
5. In what time will £142 10s. amount to £227 5s. 9d. at $3\frac{1}{2}$ per cent. per annum?
6. A can do a piece of work in 50 days, B in 60 days, and C in 75 days. If all worked together, in what time could they do it?
7. Solve one of the following, giving the answer both as a Vulgar Fraction and as a Decimal:—

$$(a) \left\{ \frac{3}{8} + \cdot 061 \right\} \times \left\{ \cdot 02 - \cdot 003 \right\}$$

$$(b) \left\{ \cdot 0672 \div \cdot 006 \right\}$$

8. If 15 horses and 148 sheep can be kept during 9 days for £75 15s., what sum will keep 10 horses and 132 sheep for 8 days, supposing 5 horses to eat as much as 4 sheep?
9. A grocer buys 10 cwt. 3 qr. 21 lb. of molasses for £30, and pays 12s. 6d. more for expenses. How should he sell it per lb. so as to clear £15 6s. 3d. by the transaction?

Geography.

Three hours allowed.

Four questions to be answered for the maximum number of marks.

1. Compare Europe and Australia as Continents.
2. On an outline map of Europe, show how you would draw lines so as to indicate the course of its principal watersheds.
3. Draw a map of Australia, marking the boundaries of all its Colonies, the capitals, and courses of the Rivers Murray and Darling.
4. A ship sails from Cronstadt to Sebastopol, touching at Bordeaux on the way. Through what seas, gulfs, straits, &c., will she successively pass in order to reach her destination?
5. Describe clearly the drainage of New South Wales—Pacific slope.

School Management.

Three hours allowed.

Four questions to be answered for the requisite number of marks.

One, the first, to be dealt with in the form of a letter to the Minister.

- N.B.—In the first lines of your first answer, give specimens of copy-lines in "text," "round," and "small" hands.
1. What is the cause of noise in school? What measures may be taken to prevent it?
2. What is the difference between "Collective" and "Simultaneous" Teaching? Explain fully.
3. What is stated in the Regulations as to the duties of Teachers?
4. It has been said that the worst Penmanship differs from the best in three particulars only, or at most four. How could you prove this to your pupils, with a view of acquiring decided excellence in Writing?
5. Describe the essential characteristics of a good Reading Lesson?

Domestic Economy.

Three hours allowed.

Four questions to be fully answered for the maximum number of marks. The last should be one.

1. For what purpose is the blood taken to the lungs? How is it conveyed to and from these organs?
- 2.

2. How would you make one of the following :—
Mutton Broth?
Yorkshire Pudding?
3. *Accidents*.—How would you act in the following cases :—
The occurrence of a "severe cut"?
Do. of a "burn" or "scald"?
4. Describe how, without a slavish adherence to fashion, you could, in the Australian climate, most appropriately and economically clothe a young family of boys and girls.
5. Show the advantage to girls of respectable Domestic Service, as opposed to comparative idleness at home, on the one hand, or Factory Life on the other.
6. What, in your opinion, may lead to Intemperance in Husbands, and their desertion of Home?

Music.

An hour and a half allowed.

Either Part I or Part II to be answered.

Part I—Tonic Sol-fa Notation.

1. Draw a modulator exhibiting transitions into the first Flat and Sharp Keys. Explain the advantages of the modulator in teaching Singing.
2. Write a chromatic scale exhibiting all the accidentals with which you are acquainted.
3. Explain fully the difference between a major and a minor scale.
4. Write a time exercise in four-pulse measure, showing notes of one, two, and three pulses, three-quarters, half, and quarter-pulse notes; also rests corresponding with each of these.
5. What signs and terms are used to indicate the various shades of expression in music? Explain the meaning of each.

Part II—Staff Notation.

1. Add correct time-signatures to the following bars of music :—

2. Show on the staff the four clefs—Alto, Tenor, Bass, Treble; and write the scale of A major in the Bass and Treble clefs.
3. How is duration of sound represented in the Staff notation? Name each of the notes and exhibit them on the staff with their corresponding rests.
4. Re-write the bars in Question 1, using rests instead of notes.
5. Explain the meaning of each of the following signs :—

\S , \langle , \rangle , \frown , *sf*, *D.C.*, *ad lib.*

History.

Three hours allowed.

Four questions to be fully answered for the maximum number of marks.

1. In English History, what is meant by the "Conquest"? Describe its more immediate effects upon England.
2. Enumerate the monarchs of the Plantagenet Dynasty. Give the date of the accession of each, and the length of each reign.
3. Give a concise account of the wars of the Roses, and show their effects upon the nation at large.
4. Name the prominent statesmen who guided public affairs in the reign of Elizabeth, stating what you know of the character of her Chief Minister.
5. Give your views as to the character and policy of Charles the First.
6. Describe the career of one of the following :—

William Pitt.
General Wolfe.
Cardinal Wolsey.

ANNEX H.

SECOND-CLASS TEACHERS.

Grammar.

Three hours allowed.

Two questions will suffice for the maximum number of marks—the first is to be one of them.

1. ["If these be motives weak break off betimes
And every man hence to his idle bed
So let high-sighted tyranny range on
Till each man drop by lottery But if these
As I am sure they do bear fire enough
To kindle cowards and to steel with valour
The melting spirits of women then *countrymen*
What need we any spur but our own cause
To prick us to redress] what *other bond*
Than secret Romans that *have spoke* the word
And *will not palter* and what other oath
Than honesty to honesty engaged
That this *shall be* or we will fall for it."]
- JULIUS CÆSAR.
- a. Supply the punctuation in the above passage.
 - b. Paraphrase it.
 - c. Parse the words italicized.
 - d. Analyse the portion within brackets.
2. Give examples of nouns that have the same form, singular and plural, and of others that have the singular form only.
 3. In how many ways may a noun be in the nominative case? Give examples of each, and explain clearly what is meant by a "noun in apposition."
 4. In Analysis, sentences are met with which begin, some with the extension of the predicate, and others with the completion of the predicate. Give examples showing this.

Arithmetic.

Arithmetic.

Three hours allowed.

Six questions are required for the maximum number of marks ; but candidates for Section A are expected to solve the last six.

1. If 500 men excavate a reservoir 800 yards long, 500 yards wide, and 120 feet deep in 4 months, how many men will be required to excavate another reservoir, 100 yards long, 400 yards wide, and 50 yards deep in 5 months ?
2. By Practice. Find the value of 2 tons 3 qr. 19½ lb., at £7 8s. 6½d. per ton.
3. A dealer accepts £19 6s. 3d. in payment of a debt of £20 5s. 6½d., due 12 months hence, in consideration of being paid at once. What rate of discount does he allow ?
4. A cistern can be filled by 3 taps, flowing separately, in 20, 30, and 40 minutes respectively ? In what time will it be filled should they all flow together ?
5. £5,151 sterling are invested in 5 per cent. stock at 101. The stock, however, rises to 105, and it is sold out, the proceeds being then invested in stock at 102, which gives 4¼ per cent. interest. What change takes place in the income of the investor ?
6. Solve the following to not less than three decimal places :—

$$\sqrt{1.014049}$$

7. A has coffee, which he exchanges at 6d. per lb. more than it cost him, for tea which cost B 3½s. a pound, but which he now values at 4½s. How much did the coffee at first cost A ?
8. A square apartment, the floor of which measures 32 square yards and 1 square foot, is 11½ feet high. Calculate the expense of colouring the walls and ceiling at 2½d. for every square yard.
9. Two men in 2 weeks complete a piece of work, for which they are paid £7 7s. 9d. One of them works alternately 9 hours and 8 hours daily ; the other works 9½ hours daily during 5 days per week, but remains idle on the remaining day. How should the amount they earn be divided in these circumstances ?

Geography.

Three hours allowed.

Four questions to be taken for the maximum number of marks. Write down each question before answering it.

1. Through what regions, tracts, or countries does each of the following pass ?

The Meridian of Greenwich.
The Equator.
The Tropic of Cancer.
The Tropic of Capricorn.

Any reference to maps in the examination room is prohibited.

2. Describe in general terms the Great Archipelago lying north and north-west of the Australian Continent, giving a more detailed account of one of the most important Islands - Java, for example.
3. Describe the course of the Danube, noticing its tributaries.
4. Describe fully one of the following :—
 1. Mexico.
 2. Scandinavia.
5. Account for the Monsoons, and describe their range.
6. Draw lines on an outline map of New South Wales and Victoria, showing their principal and secondary watersheds.

Art of Teaching.

Three hours allowed.

Four questions to be answered, one of them (the second) to be dealt with in the form of a letter to the Minister. Write down each question before answering it.

N.B.—In the first lines of your first answer, give specimens of head lines in three forms at least.

1. In constructing a Time-table for Infants, in what respects might it differ from one for grown children, apart altogether from the range of subjects ?
2. What do you understand by "Moral Government" in school ? How would you secure it ?
3. What lessons, in your estimation, are best calculated to cultivate close attention and sustained effort ? Give reasons for your opinions.
4. Describe how you would give an Object or Oral Lesson on one of the following. Give full notes :—

An Australian Fig-tree (*Ficus Macrophylla*)
An Arch (constructed of stone or brick.)
Presence of Mind.

5. Describe the best mode of teaching Geography. Explain also, if possible, the method employed in German schools.
6. What special difficulties attend the giving of Collective Oral Lessons ? Explain how you would meet them.

Sanitary Science.

Three hours allowed.

Four questions to be answered for the maximum number of marks.

Write down each question before proceeding to answer it.

1. Mention the various changes which food must undergo before it can supply the blood with nourishment.
2. What are the Instructions of the Royal Humane Society in relation to Bathing, and accidents arising therefrom ?
3. Describe how you would treat one of the following :—
 - a. Bronchitis,
 - b. Scarlet Fever.
4. What is meant by a "Vapour Bath" ? In what cases can it be safely employed ? How could you improvise one in an ordinary household ?
5. Describe clearly the effects of one of the following upon the Human System :—
 - a. Intemperance (in eating or drinking).
 - b. Smoking (Tobacco or Narcotics).

Music.

One hour and a half allowed.
Either Part I or Part II to be answered.

Part I.—Tonic Sol-fa Notation.

1. Give an account of the three positions of the common chord.
2. Rewrite the following passage, exhibiting the transition according to the better method :—

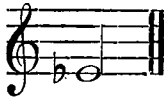

3. Write notes of a lesson on transition of two removes.
4. Show how to divide a pulse into thirds, sixths, eighths, and ninths.
5. Write the passage in question 2 in the Staff Notation.

Part II.—Staff Notation.

1. Write on the staff in the bass clef the key-signatures of B major, B \flat major, C minor, and C \sharp minor.
2. Rewrite the following passage half a tone higher, making the necessary alterations :—

3. Write this note  in all the clefs with which you are acquainted without altering the pitch.

4. Write on the staff the notes, their names, and corresponding rests, equal respectively to 16, 24, 8, 12, 32, 6 demi-semiquavers.
5. Write below each of the following intervals its name :—

NOTE.—Students in training must take Part II.

British Literature and History.

Three hours allowed.

Five questions will suffice for the maximum number of marks, provided that they are nearly evenly distributed between the History and Literature.

1. Account for the great advance made by British Literature more especially during the latter half of the Sixteenth Century.
2. Give a concise account of Hampden and his leading Contemporaries.
3. Describe the plot of the "Faerie Queene," and quote a passage of twelve consecutive lines from the work.
4. Describe the troubles in Scotland during the lifetime of Queen Mary (Stuart).
5. Give an account of the administration of Sir Thomas Brisbane in New South Wales.
6. Enumerate the leading Authors of the Elizabethan Age, and describe one Work composed by any of the more eminent prose writers.
7. Give an outline of the "Faustus," of Marlowe; or, failing this, of any one of the standard tragedies of the Shakesperian School.

Geometry.

Three hours allowed.

N.B.—Six of the following, well answered, will suffice for the maximum number of marks.

1. If a quadrilateral have two of its opposite sides parallel, and the two others equal but not parallel, any two of its opposite angles are together equal to two right angles.
2. If a side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the three interior angles of every triangle are together equal to two right angles.
3. Show that in a straight line, divided as in the 11th Prop. of the 2nd Book, the rectangle contained by the sum and difference of the parts is equal to the rectangle contained by the parts.
4. To divide a given straight line into two parts so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.
5. To describe a square that shall be equal to a given rectilineal figure.
6. Draw a straight line to touch each of two given circles.
7. Equal straight lines in a circle are equally distant from the centre, and those which are equally distant from the centre are equal to one another.

Algebra.

Three hours allowed.

N.B.—Six of the following numbers, well answered, will secure a pass for 2 A.

1. Extract the cube root of $x^3 - 3x^2y + 3xy^2 - y^3 + 8z^3 + 6x^2z - 12xyz + 6y^2z + 12xz^2 - 12yz^2$.
2. Find the G.C.M. of $x^3 - (2a + b)x^2 + (2ab + a^2)x - a^2b$, and $3x^2 - (4a + 2b)x + 2ab + a^2$; and the L.C.M. of $x^5 + ax^4 + a^2x^3 + a^3x^2 + a^4x + a^5$, and $x^5 - ax^4 + a^2x^3 - a^3x^2 + a^4x - a^5$.
3. Simplify $\left(\frac{x}{x-y} - \frac{y}{x+y}\right) \div \left(\frac{x^2}{x^2+y^2} + \frac{y^2}{x^2-y^2}\right)$ and $\left(\frac{2x}{x+y} + \frac{y}{x-y} - \frac{y^2}{x^2-y^2}\right) \div \left(\frac{1}{x+y} + \frac{x}{x^2-y^2}\right)$.
4. Multiply $a^{\frac{5}{3}} - 2a^2b^{\frac{1}{3}} + 4a^{\frac{2}{3}}b^{\frac{2}{3}} - 8ab + 16a^{\frac{1}{3}}b^{\frac{4}{3}} - 32b^{\frac{5}{3}}$ by $a^{\frac{1}{3}} + 2b^{\frac{1}{3}}$, and extract the square root of $9a^2 - 6ab + 30ac + 6ad + b^2 - 10bc - 2bd + 25c^2 + 10cd + d^2$.

5. Solve $3x + 5y = 76$
 $4x + 6z = 108$
 $5z + 7y = 106$

and
 $\sqrt{(9x + 4)} + \sqrt{(9x - 1)} = 3.$

6. An officer can form his men into a hollow square, 4 deep; and also into a hollow square, 8 deep; the front, in the second square, contains 16 men fewer than that in the first; find the number of men.

7. Solve $4x^2 + 9xy = 190$ } and $x^3 + y^3 = 2728$ }
 $4x - 5y = 10$ } $x^2 - xy + y^2 = 124$ }

8. Solve $\sqrt{(2x + 4)} - \sqrt{\left(\frac{x}{2} + 6\right)} = 1$, and

$$\frac{1}{\sqrt{(x+1)}} + \frac{1}{\sqrt{(x-1)}} = \frac{1}{\sqrt{(x^2-1)}}$$

French.

Three hours allowed.

1. Translate into English, *without transcribing the French* :—

(a) Le maréchal Stenau ne perdit pas un moment; à peine aperçut-il les Suédois qu'il fondit sur eux avec la meilleure partie de sa cavalerie. Le choc violent de cette troupe tombant sur les Suédois dans l'instant qu'ils formaient leurs bataillons, les mit en désordre; ils s'ouvrirent, ils furent rompus et poursuivis jusque dans la rivière. Le roi de Suède les rallia le moment d'après au milieu de l'eau, aussi aisément que s'il eût fait une revue. Alors ses soldats, marchant plus serrés qu'auparavant, repoussèrent le maréchal Stenau, et s'avancèrent dans la plaine. Stenau sentit que ses troupes étaient étonnées; il les fit retirer en habile homme dans un lieu sec, flanqué d'un marais et d'un bois où était son artillerie. L'avantage du terrain, et le temps qu'il avait donné aux Saxons de revenir de leur première surprise, leur rendit tout leur courage.

(b) C'est lui qui a établi des houssards en Russie. Enfin il a eu jusqu'à une école d'ingénieurs dans un pays où personne ne savait avant lui les éléments de la géométrie. Il était bon ingénieur lui-même; mais surtout il excellait dans tous les arts de la marine; bon capitaine de vaisseau, habile pilote, bon matelot, adroit charpentier, et d'autant plus estimable dans ces arts qu'il était né avec une crainte extrême de l'eau; il ne pouvait dans sa jeunesse passer sur un pont sans frémir; il faisait fermer alors les volets de bois de son carrosse; le courage et le génie domptèrent en lui cette faiblesse machinale.

Il fit construire un beau port auprès d'Azoph, à l'embouchure du Tanaïs: il voulait y entretenir des galères; et dans la suite, croyant que ces vaisseaux longs, plats, et légers, devaient réussir dans la mer Baltique, il en a fait construire plus de trois cents dans sa ville favorite de Pétersbourg: il a montré à ses sujets l'art de les bâtir avec du simple sapin, et celui de les conduire.

2. Translate into French, *without transcribing the English* :—

(a) After having finished this work, I shall go to pay a visit to my mother.

(b) Whatever your opinion on this subject may be, do all you can to relieve the miserable girl.

(c) The lady you heard playing is going to sing this song that I composed.

(d) The girls you have taught are now trying to teach their little sisters.

(e) When walking in my garden this morning, I found my little daughter crying bitterly.

(f) The roses I have brought you are the finest I could find in the whole garden.

(g) The books I wished you to read are full of facts that will be very useful to you.

(h) Those songs you have heard sung this morning have been much praised by my father.

3. Write down in a tabular form the 1st pers. plur. pres. indic., 3rd sing. pret. def., 2nd plur. pres. imperative, 3rd plur. pres. cond., 3rd sing. imperf. subj. of *peindre, pouvoir, tenir, se promener*.

Latin.

Three hours allowed.

1. Translate into English, *without transcribing the Latin* :—

(a) Hac confirmata opinione timoris, idoneum quandam hominem et callidum delegit Gallum, ex his, quos auxilii causa secum habebat. Huic magis proemiis pollicitationibusque persuadet, uti ad hostes transeat, et quid fieri velit edocet. Qui ubi pro perfuga ad eos venit, timorem Romanorum proponit, quibus angustiis ipse Cæsar a Venetis prematur docet; neque longius abesse, quin proxima nocte Sabinus clam ex castris exercitum educat et ad Cæsarem auxilii ferendi causa proficiatur. Quod ubi auditum est, conclamant omnes occasionem negotii bene gerendi amittendam non esse; ad castra iri oportere.

(b) Diebus decem, quibus materia coepta erat comportari, omni opere effecto exercitus transducitur. Cæsar ad utramque partem pontis firmo præsidio relicto in fines Sigambrorum contendit. Interim a compluribus civitatibus ad eum legati veniunt, quibus pacem atque amicitiam petentibus liberaliter respondit, obsidesque ad se adduci jubet. At Sigambri ex eo tempore, quo pons institui coeptus est, fuga comparata hortantibus iis, quos ex Tenchtheris atque Usipetibus apud se habebant, finibus suis excesserant suaque omnia exportaverant seque in solitudinem ac silvas abdiderant.

2. Parse the words in italics.

3. Translate into Latin, *without transcribing the English* :—

(a) Are you aware that the judges have threatened you with punishment?

(b) My sister promised to come home to-day to see her mother, who is very ill.

(c) Do not believe, my dear son, that I, who have been in so many battles, will be afraid of this danger.

(d) Cannot you, who have ever sided with the wretched, prevent this coward from speaking ill of our unhappy friend?

(e) Having exhorted his soldiers to remember their ancient valour, and having given the signal for battle, he ordered the tenth legion to charge.

(f) I fear that these girls who have not obeyed their mother will not be happy.

(g) Rome, which has been called the head of the whole earth, is a very beautiful city.

(h) This man is of opinion that the more money he has the happier he will be. He is wrong.

4. Write down the principal parts of—pango, pingo, tego, texo, quero, queror, cedo, cædo, vinco, vincio.

5. Write down in four columns the English, gender, gen. sing., and acc. plur. of—acus, scelus, incus, servitus, domus, locus, ager, agger, obses, acies.

ANNEX

ANNEX I.

FIRST-CLASS TEACHERS.

Grammar.

Three hours allowed.

Three questions to be answered for the maximum number of marks, the first being one. Write down each question before answering it.

1. "They heard and *were abashed* and up they *sprung*
Upon the wing *as* when men *went* to watch
On duty sleeping *found* by *whom* they dread
Rouse and *bestir* themselves ere well awake
Nor did they not perceive the evil plight
In *which* they were nor the fierce *pains* not feel
Yet to *their* general's voice they soon obeyed
Innumerable—as when the potent rod
Of Amram's son in Egypt's evil day
Waved round the coast *up* called a pitchy cloud
Of locusts warping on the eastern wind
That o'er the *realm* of impious Pharaoh hung
Like night and darkened all the land of Nile."
"PARADISE LOST," Book I.
 - a. Supply the punctuation in the above passage.
 - b. Paraphrase the quotation, explaining the allusions.
 - c. Scan the passage.
 - d. Parse the words italicised.
 - e. Analyse the last nine lines.
2. Explain the formation of the "Preterite" in the so-called Irregular Verbs, in English.
3. What are the principal conditions that a perfect Alphabet and Orthographical System must satisfy; and how far does the English alphabet fail to meet these conditions?
4. Explain the difficulties and anomalies connected with the following nouns:—'alms,' 'riches,' 'pains,' 'news,' 'means,' 'data,' 'apparatus.'

Arithmetic.

Three hours allowed.

Seven problems are necessary for the maximum number of marks for Class 1 B; but candidates for 1 A are expected to solve the last seven. Write down each question before answering it.

1. The wages of 25 men amount to £76½ for 16 days. How many boys must work 24 days, to earn £103 5s, the daily wages of the latter being only one half those of the former?
2. Simplify $\left(\frac{2\frac{3}{4} + 3\frac{3}{4} + 3\frac{3}{4}}{4\frac{3}{4} + 5\frac{3}{4} + 10\frac{3}{4}}\right) \times \left(\frac{2\frac{4}{11} + 2\frac{7}{11}}{2\frac{4}{11} + 2\frac{7}{11}}\right) - \frac{281}{1405}$.
3. Supposing I mix 80 gallons of spirit at 15s. 6d. per gallon with 96 gallons at 17s. 1d., and then sell the mixture so as to gain 10 per cent., at what price per gallon do I sell it?
4. A and B join in a speculation. A puts in £400 stg. at first; and, at the end of two months, £500 more. B contributes at first £300; but, at the end of three months, adds £600 more. They gain, at the end of the year, £470. How should it be divided?
5. A, B, C, do $\frac{1}{5}$ of a piece of work collectively in 24 days. A does the same quantity of work that B does, in the same time; but had either A or B been absent, the remaining two could have done $\frac{1}{5}$ of the work in 28 days. In what time could each *separately* do the work.
6. How many flags, each 5.76 feet long and 4.15 feet wide, will be required to pave a corridor which encloses a rectangular court 45.77 yards long, and 41.93 yards wide, the corridor itself having a width of 12.45 feet?
7. Solve one of the following, stating concisely the principle on which the operation rests:—
 - (a) $\sqrt[3]{\frac{5030 \cdot 912}{65536}}$
 - (b) $\sqrt[3]{0.00024339}$.
8. A broker sells out of the three per cents at 92½, and realises £18,550. If he invests $\frac{2}{3}$ ths of the produce in the four per cents at 96, and the remainder in the three per cents at 90, what is the change effected in his income?
9. A seaman rows a distance of 1½ mile down stream in 20 minutes; but, without the aid given by the current, it would have taken him half an hour. What is the rate of the stream per hour, and how long would it take him to pull back against it?
10. Three traders, X, Y, and Z, charter a vessel. X contributes £240 for 6 months; Y a sum unknown for 12 months; and Z, £160 for a time not known when the accounts were settled. X received £300 for his stock and profit; Y, £600 for his; and Z, £260 for his. Required Y's stock, and Z's time.

Geography.

Four questions, fully answered, are necessary for the maximum number of marks.

1. State concisely what is known of the configuration of the Ocean basins.
2. Specify the Maritime Counties of Great Britain, taking them in order. Describe one.
3. By what general law for the whole World, and by what special law for the Old and New Worlds respectively, are the slopes of mountain chains regulated?
4. Give a good general description of Central America.
5. Draw an outline map of one of the larger Islands of New Zealand, indicating its capes, bays, rivers, mountains, settlements, &c.
6. In the light of its position, climate, soil, productions, and resources, compare New South Wales with the other Australian Colonies.
7.

{	Answer one.	(a.) To an observer at the North Pole, what solar phenomena would be presented, or what would be the sun's apparent course, between the months of March and September?
		(b.) <i>The Planets Jupiter and Saturn</i> : State what is known of these members of the solar system, and their attendant moons.

Principles of Teaching.

Three hours allowed.

Four questions to be answered for the maximum number of marks—the fourth to be in the form of a letter addressed to the Minister. Write down each question previous to answering it.

NOTE.—In the first lines of your first answer give specimens of penmanship in as many forms as possible.

1. *Memory*: How can it be most beneficially employed or cultivated? What is its office in School Training?

2. "The earliest lessons in Composition should begin with the Lowest Class (in Primary Schools), and proceed from the concrete, and through simple objects arranged before the pupils." Show how this can be worked out effectively.

3. Describe the Faculties of the "Human Mind," and the order in which they are developed.

4. *In Grammar*, a pupil may parse and analyse tolerably well, but yet be unable to make sensible composition in reconstructing the passage thus treated. How do you account for this defect? How would you act in such circumstances?

5. Show fully, by means of notes, &c., how you would give an Oral or advanced Object Lesson on one of the following :—

The Garden Spider and its habits.
The Frigate Bird.
A Mirror.
Self-denial.

6. Formulate the principles which should underlie all Methods propounded for effective Teaching.

Sanitary Science—Ordinary Paper only.*

Three hours allowed.

Four questions to be fully answered for the maximum number of marks.

1. Assuming that "Fish" and "Fresh Meat" are composed of the same elements as regards nutrition, explain how it is that a given weight of the former is not so nourishing as the same weight of the latter.

2. Describe how you would deal with one of the following, if out of all reach of medical aid :—
(a) Pleurisy.
(b) Small-pox.

3. Describe the Human Heart, its structure and mechanism, showing how the blood is conveyed from it through the body.

4. What hints could you give on diet, as regards variety, digestibility, distribution, and choice of food? Write some useful rules on the subject.

5. Describe the functions of Respiration, showing the difference between inspired and expired air.

*NOTE.—THE ALTERNATIVE PAPER ON Sanitary Science will be found printed separately.

Sanitary Science.

Three hours allowed.

Write down each question before answering it.

If taken as an *Ordinary Paper*, four questions will suffice; but if taken as part of an *Alternative Group*, it is expected that the last six will be answered.

1. Enumerate the more palpable self-induced causes of disease, and describe the effects of one of them.

2. Show the necessity for fashioning dress in conformity with the natural lines and proportions of the body.

3. Describe the composition of the Blood.

4. Describe fully the precautions you would take in the selection of a dwelling, or in selecting the site for the erection of one.

5. The neglect of bodily exercise is a fruitful source of disease. State some of the forms which the failure of health referred to assumes.

6. Water may be rendered impure, and even unsafe, by an excess of mineral matter held in solution. How can this be proved?

7. Mention the most suitable schemes which have been proposed for the removal, purification, and utilization of sewage, and describe one fully.

8. With a view of exhibiting the nutritive values of certain foods, show the relative proportions of carbonaceous matter contained in any fifteen of the articles—vegetable and animal—commonly found in household use.

Music.

One hour and a half allowed.

Candidates will answer either Part I or Part II.

Part I.—Tonic Sol-fa Notation.

1. Define each of the following musical terms :—Madrigal, glee, part song, fugue, canon, recitative, oratorio, round.

2. Construct a Modulator showing transition of three flat removes and three sharp removes.

3. Explain fully the difference between a major and a minor scale.

4. Write down a short passage exhibiting transition.

5. Translate into Staff Notation the following passage (first and second lines to be in G clef, third in F clef) :—

Key F.

m : — f : s	l : — : l	t : — l : t	d ₁ : — : s	s : f : m
d : — r : m	d : — : f	r : — d : r	m : — : m	m : r : d
d : — d : d	f ₁ : — : r ₁	s ₁ : — : s ₁	d : — : d	f ₁ : — : f ₁
r : — d : r	m : — : —	— : — : —	— : — : —	— : — : —
t ₁ : — l ₁ : t ₁	d : — : —	— : — : —	— : — : —	— : — : —
s ₁ : — s ₁ :	d : — : —	— : — : —	— : — : —	— : — : —

Part II.—Staff Notation.

1. Give an account of the origin of the syllabic names of the tones of the scale.

2. Write in the bass clef, the key signatures of C \flat major, F \sharp major, B \flat minor, and C \sharp minor.

3. Write on the staff a major second from B \flat , a perfect fifth from D, a major seventh from E \flat , and a minor third from A.

4. Write the following passage a semitone lower, making the necessary alterations :—

5. Put the following into score for treble, alto, tenor, and bass, each part on its proper staff, and with its proper clef signature :—

History.

Three hours allowed.

Four questions to be fully answered for the maximum number of marks.

1. Describe the effects of the Crusades upon Britain.
2. Describe what is meant by "Trial by Jury." Trace the rise and progress of this institution in Britain.
3. Compare Parliamentary Government under William the Third with that prevailing under Charles the Second.
4. What circumstances rendered the Union of England and Scotland a necessity?
5. Delineate the character of one of the following :—
King George the Third,
William Penn,
John Howard,
Lord Burleigh.
6. Trace the origin and progress of Wool-growing in Australia.

British Literature.

Three hours allowed.

Four questions, fully answered, are necessary for the maximum number of marks. Write down each question before proceeding to answer it.

1. Characterize the method and style of the Principal British Writers of History from the time of Elizabeth to that of Anne, quoting examples, if possible, in illustration.
2. Describe the "De Augmentis Scientiarum," giving a concise view of the aims of its author.
3. Enumerate the chief literary works of De Foe; and account for the influence which he exercised upon contemporary Literature.
4. } Answer one only of these (a.) or (b.)
(a.) What do you understand to have been the design of the author of the "Paradise Lost" in writing such a work? State the "Argument" (Book I.) Give also Milton's description of the following heathen deities :—Moloch, Chemos, Bäälim, Astarte, Dagon.
(b.) "The materials for the 'Paradise Lost' consist of the first chapters of the Book of Genesis and some passages in the Apocalypse." Give your views on this statement as clearly as possible, showing its accuracy or otherwise.
5. Describe the changes of taste in poetry between the era of Spenser and that of Pope.
6. Describe one of the following, quoting from it, and criticizing the matter, style, diction, &c.
The "St. Cecilia Ode" of 1697 (Dryden).
"Hymn on the Nativity" (Milton).
"Vision of Public Credit" (Addison).
"Envy" (Bacon).
7. How far may the physical condition of the British Isles be regarded as having determined the character of their Literature?

Geometry.

Three hours allowed.

N.B.—Six problems, well answered, are required for 1 B; but candidates for 1 A are expected to take the last six. Every problem must be written down before proceeding to answer it.

1. On the hypotenuse BC, and the sides CA, AB of a right angled triangle ABC, squares BDEC, AF, and EG are described. Show that the squares on DG and EF are together equal to five times the square on BC.
2. A straight line is divided into two parts. Show that if twice the rectangle of the parts is equal to the sum of the squares described on the parts, the straight line is bisected.
3. In every triangle, the square on the side subtending an acute angle is less than the squares on the sides containing that angle, by twice the rectangle contained by either of these sides, and the straight line intercepted between the perpendicular let fall on it from the opposite angle, and the acute angle.
4. If a straight line be bisected and produced to any point, the rectangle contained by the whole line thus produced, and the part of it produced, together with the square on half the line bisected, is equal to the square on the straight line, which is made up of the half and the part produced.
5. If two straight lines cut one another within a circle, the rectangle contained by the segments of one of them shall be equal to the rectangle contained by the segments of the other.
6. Draw a straight line cutting two given circles, so that the chords intercepted within the circles shall have given lengths.
7. To inscribe an equilateral and equiangular quindecagon in a given circle.
8. Perpendiculars are drawn from any point within an equilateral triangle on the three sides. Show that their sum is invariable.
9. On a given straight line to describe a rectilinear figure similar and similarly situated to a given rectilinear figure.
10. Find a straight line such that the perpendiculars drawn on it from three given points shall be in a given ratio to one another.

Algebra.

Three hours allowed.

N.B.—Eight of the following numbers, well answered, will secure a pass for 1A.

- Solve $x - \frac{14x-9}{8x-3} = \frac{x^2-3}{x+1}$ and $4a^2x = (a^2-b^2+x)^2$
- $\sqrt{x+\sqrt{(x+y)}} + 2\sqrt{(x^2+7x)} = 35-2x$;
or,
 $x+4 + \sqrt{\left(\frac{x+4}{x-4}\right)} = \frac{12}{x-4}$
- The sum of two numbers is 20; and the sum of their cubes 2,240: find the numbers.
- Expand to four terms $(1+5x)^{\frac{1}{5}}$ and find the $(r+1)$ th term in the expansions $(1-2x)^{-\frac{7}{2}}$ and $\sqrt[1]{(1-x)}$.
- Divide $8a^{\frac{3}{2}} + b^{-\frac{3}{2}} - c + 6a^{\frac{1}{2}}b^{\frac{1}{2}}c$ by $2a + b - c$ and extract the 4th root of $x^{\frac{4}{3}}y^{-\frac{2}{3}} - 4xy + 6xy - 4xy + x^{\frac{5}{3}}y^{-\frac{2}{3}} + x^{\frac{2}{3}}y^{\frac{2}{3}}$
- Find the price of oranges per dozen, when two more in a shilling's worth lowers the price one penny per dozen.
- Find the greatest term in the expansion $(1+x)^{-n}$ when $x = \frac{1}{2}$ and $n = 3$.
- Three numbers are in Arithmetical Progression whose sum is 10; and the product of the 2nd and 3rd $33\frac{1}{2}$. What are the numbers?
- If the common ratio of a G.P. is -3 , find the common ratio of the series obtained by taking every 4th term of the original series.
- Solve $\frac{3x-2}{2x-5} - \frac{2x-5}{3x-2} = \frac{8}{3}$ and $(7-4\sqrt{3})x^2 + (2-\sqrt{3})x = 2$.

Trigonometry.

Three hours allowed.

- Given $\sin A = \frac{2}{3}$, find all the other ratios.
- From the top of a ship's mast, 90 feet above the surface of the water, the angle of depression of the hull of another ship was found to be 30° ; find the distance between the ships.
- The earth's radius (4,000 miles) subtends at the moon an angle $57' 1.8''$; find what is the moon's distance from the earth.
- In any triangle prove the truth of this formula:—
$$\frac{\tan B}{\tan C} = \frac{a^2 + b^2 - c^2}{a^2 + c^2 - b^2}$$
- The sides of a triangle are as 3:4:5; find the greatest angle and the sines of the other two.
- A person observes the elevation of a tower to be 60° , and on retiring from it 100 yards further he finds the elevation to be 30° ; determine the height of the tower.
- Given $\log. 6 = 7781513$, $\log. 5 = 6989700$; find the log. of $\sqrt[4]{\frac{1}{2} \cdot \frac{3}{4} \cdot \frac{3}{4} \cdot \frac{1}{4}}$.
- Prove the following formula:—
$$\frac{\sin A + \sin 2A}{\cos A + \cos 2A} = \tan \frac{3}{2}A$$
- The angles of a triangle are as 1:2:3, and the greatest side exceeds the least by 100 yards; find the area.

French.

Three hours allowed.

- Translate into English, *without transcribing the French*:—
 - Ah! Rodrigue, il est vrai, quoique ton ennemie,
Je ne te puis blâmer d'avoir fui l'infamie;
Et, de quelque façon qu'éclatent mes douleurs,
Je ne t'accuse point, je pleure mes malheurs.
Je sais ce que l'honneur, après un tel outrage,
Demandoit à l'ardeur d'un généreux courage:
Tu n'as fait le devoir que d'un homme de bien;
Mais aussi, le faisant, tu m'as appris le mien.
Ta funeste valeur m'instruit par ta victoire;
Elle a vengé ton père et soutenu ta gloire;
Même soin me regarde, et j'ai, pour m'affliger,
Ma gloire à soutenir, et mon père à venger.
Helas! ton intérêt ici me désespère.
Si quelque autre malheur m'avoit ravi m'en père,
Mon âme auroit trouvé dans le bien de te voir
L'unique allègement qu'elle eût pu recevoir;
Et contre ma douleur j'aurois senti des charmes,
Quand une main si chère eût essuyé mes larmes.
 - Cieux, écoutez ma voix; terre, prête l'oreille!
Ne dis plus, ô Jacob, que ton Seigneur sommeille!
Pécheurs, disparaissez; le Seigneur se réveille.
Comment en un plomb vil l'or pur s'est-il changé?
Quel est dans le lieu saint ce pontife égorgé?
Pleure, Jérusalem, pleure, cité perfide,
Des prophètes divins malheureuse homicide:
De son amour pour toi ton Dieu s'est dépouillé!
Ton encens à ses yeux est un encens souillé.
Où menez-vous ces enfants et ces femmes?
Le Seigneur a détruit la reine des cités:
Ses prêtres sont captifs, ses rois sont rejetés;
Dieu ne veut plus qu'on vienne à ses solennités:
Temple, renverse-toi; cèdres, jetez des flammes.
 - Maie, quoi, n'ai-je point oublié en mille autres occasions les devoirs de la solidarité humaine? Est-ce la première fois que j'évite de payer ce que je dois à la société? Dans mon injustice, n'ai-je pas toujours traité mes associés comme le lion? Toutes les parts ne me sont-elles pas successivement revenues? Pour peu qu'un malavisé en redemande quelque chose, je m'effraie, je m'indigne, j'échappe par tous les moyens. Que de fois, en apercevant, au bout du trottoir, la mendicante acroupie, j'ai dévié de ma route, de peur que la pitié ne m'appauvrît, malgré moi, d'une aumône! Que de douleurs mises en doute pour avoir le droit d'être impitoyable! Avec quelle complaisance j'ai constaté, parfois, les vices du pauvre, afin de transformer sa misère en punition méritée!

2. Translate into French, *without transcribing the English* :—
- How many faults you would have avoided in this examination if you had attended to the directions I have given you!
 - Though I wanted very much to see my sister, I had to set off again without seeing her.
 - After spending all our ready money abroad, we returned to our native country, where we shall spend the rest of our lives in retirement.
 - Do you believe that my dear sister will come to see me, when she has finished this work? No; I do not.
 - Have you read the books I had advised you to read?
 - The recollection of the pains we have suffered and the dangers we have run through is pleasant, because it is a blessing to be delivered from them.
 - I could have finished my work as soon as you, if I wished, but then it would not have been so well done as it is.
 - Whatever be your power as a teacher, you cannot hope to increase, nor even to preserve it, if you be not very attentive to gain the affections of your pupils.
3. Give the French for the following idioms :—
- That will suit me exactly. That is quite another matter. She is laughing in her sleeve. I am at my wit's end. This speaker wanders from his subject. He builds castles in the air. He shut the door in my face. The piano is out of tune. We slept in the open air. Let us come to the point.
4. Give the meanings of the following paronyms :—
- Haire, hère; are, arrhes; brocard, brocart; compte, comte, conte; cri, cric; fard, phare; héraut, héros; gué, guet; peau, pot; pêcheur, pècheur.

Latin.

Three hours allowed.

Candidates in Group IV will take Questions 1 A, 1 B, 2, 3.

1. Translate into English, *without transcribing the Latin* :—
- A. Horum adventu tanta rerum commutatio est facta, ut nostri, etiam qui vulneribus confecti probuissent, scutis innixi proclium redintegrarent, tum calones perterritos hostes conspicati etiam iermes armatis occurrerent; equites vero, ut turpitudinem fugæ virtute delerent, omnibus in locis pugnae se legionariis militibus præferrent. At hostes etiam in extrema spe salutis tantam virtutem præstiterunt, ut, quum primi eorum cecidissent, proximi jacentibus insisterent utque ex eorum corporibus pugnarent; his dejectis et coacervatis cadaveribus, qui superessent ut ex tumulo tela in nostros conjicerent et pila intercepta remitterent: ut non nequidquam tantae virtutis homines judicari deberet ausos esse transire latissimum flumen, ascendere altissimas ripas, subire iniquissimum locum; quae facilia ex difficillimis animi magnitudo redegerat.
- B.
- At Cytherea novas artes, nova pectore versat
Consilia, ut faciem mutatus et ora Cupido
Pro dulci Ascanio veniat, donisque furentem
Incendat reginam, atque ossibus implicet ignem:
Quippe domum timet ambiguam Tyriosque bilingues.
Urit atrox Juno, et sub noctem cura recursat.
Ergo his aligerum dictis affatur Amorem :—
"Nate, meæ vires, mea magna potentia, solus,
Nate, patris summi qui tela Typhoia temnis,
Ad te confugio et supplex tua numina posco.
Frater ut Æneas pelago tuus omnia circum
Litora jactetur, odiis Junonis iniquæ
Nota tibi, et nostro doluisti sæpe dolore.
Hunc Phœnissa tenet Dido blandisque moratur
Vocibus; et vereor, quo se Junonia vertant
Hospitia; haud tanto cessabit cardine rerum.
- C. Si civis vester Alco, sicut ad pacem petendam ad Hannibalem venit, ita, pacis condiciones ab Hannibale ad vos rettulisset, supervacuum hoc mihi fuisset iter, quo nec orator Hannibalis nec transfuga ad vos venissem. Cum ille aut vestra aut sua culpa manserit apud hostem (si metum simulavit, sua; vestra, si periculum est apud vos vera referentibus), ego, ne ignoraretis esse aliquas et salutis et pacis vobis condiciones, pro vetusto hospitio quod mihi vobiscum est, ad vos veni. Vestra autem causa me, nec ullius alterius, loqui quae loquor apud vos, vel ea fides sit, quod neque dum vestris viribus restitistis, neque dum auxilia ab Romanis sperastis, pacis unquam apud vos mentionem feci. Postquam nec ab Romanis vobis ulla est spes, nec vestra vos jam aut arma aut mœnia satis defendunt, pacem afferro ad vos magis necessariam quam æquam.
2. Turn the above speech into *oratio obliqua*.
3. Translate into Latin, *without transcribing the English* :—
- We believe that he will use his wealth wisely, that he will help the poor, and not forget his friends.
 - Having conquered the Gauls in battle, and having won over their chiefs by gifts, Cæsar returned to Rome in the seventh month.
 - Who fears a man that he despises, or loves one that has injured him?
 - After laying waste the whole country they demand hostages of the enemy; for they remember that the more recent their misfortune is, the speedier is their own hope of peace.
 - Would you rather that your son should die with honour as a youth, than seem, when an old man, endowed with wisdom, but not free from the cares of age?
4. Translate into Latin, both *oratio recta* and *oratio obliqua* :—
- Away then with such follies! Do you not see that your liberty and lives are at stake to-day? Why do you obey a few centurions, still fewer tribunes, who can do nothing against your will? When will you dare to demand redress? It is of the utmost importance what you do. Awake at last and follow me? Remember the ancestors from whom you are sprung. If you let slip this opportunity, you will deservedly be slaves, and no one will give you a thought, or compassionate your present condition.

TEACHERS—CLASS I, GROUPS III, V, VI.
FEMALE TEACHERS—CLASS II, GROUP IV.

Physiology.

Three hours allowed.

Candidates in Class II will answer six.

1. Describe the different changes which the various food stuffs undergo between the time they enter the mouth and the time they enter the blood.
2. Explain what is meant by the glycogenic function of the liver, and mention some of the principal circumstances which modify it.
3. Mention some of the principal causes which produce variation in the amount of carbonic acid exhaled by the lungs.
4. Describe what is meant by the accommodation of the eye, and explain how it is effected.
5. Give an account of the development of the teeth.
6. In what manner is the heat of the body obtained?
7. Describe fully the structure of the retina.

Physics.

Three hours allowed.

Candidates in Class II will answer six.

1. What are the differences between kinetic and potential energies?
2. What is the nature of a sound-wave? What are the chief circumstances affecting its velocity?
3. Explain the construction and action of the Telephone.
4. Define Magnetism; and state some of the points of resemblance and difference between it and common electricity.
5. A body weighs 252 grains in air, 36 in water, and 63 in spirit; what is the specific gravity of the body and of the spirit?
6. A room of 2,000 cubic feet capacity is heated from 60° to 80° F.; how much air is expelled from the room?
7. What degrees on a Centigrade thermometer correspond with 10, 60,—40 on a Fahrenheit, and vice versa?
8. Describe the Solar Spectrum, and the practical uses of the Spectroscope.

Geology.

Three hours allowed.

Candidates in class II will answer six.

1. Describe the process of disintegration that may be observed in most granites of New South Wales, and trace out its ultimate effect on the land surface.
2. Describe the tokens by which the prehistoric existence of glaciers may be inferred in regions now quite free from perennial snow.
3. Show how bars are formed at the mouth of rivers, and why they are absent in certain cases. Illustrate your answer by some account of the bars, harbours, and coast lagoons of New South Wales.
4. Describe the material, mode of stratification, joints, faults, and phenomena of erosion in the Hawkesbury sandstone.
5. What are mineral veins? How have they been formed? What do you know of the manner in which gold occurs in veins?
6. Describe the processes by which caverns are excavated in solid limestone, and stalactitic deposits formed within them.
7. Describe the chief rock-forming minerals.

Zoology.

Three hours allowed.

Candidates for Class II will answer the first five questions. For class I, candidates are expected to take the last six.

1. Give a concise view of the five Groups or Sub-kingdoms into which the Invertebrates are divided.
2. Give an account of the Sea Anemones, showing their structure, habits, &c.
3. State clearly the leading points of dissimilarity existing between the Vertebrata and the Invertebrata.
4. What are the distinctive peculiarities of the "Lucernarida"? Distinguish between this Sub-Class and the so-called "Naked-eyed Medusæ."
5. Distinguish between the "Pearly Nautilus" and the so-called "Paper Nautilus," showing the group to which they belong, their haunts, habits, and more remarkable peculiarities.
6. Describe the more important characteristics of the Asteroidæ.
7. Give a clear account of one of the following orders:—
"Chelonia."
"Grallatores."
"Cursores."
8. Enumerate the various Groups or Orders included under the head Mammalia, and describe the leading characteristics of the Class.
9. Compare fully the following as regards structure, motion, habits, and manifestations of life:—
(a) The Holothuroidæ.
(b) The Ophidia.

Botany.

Three hours allowed.

1. Define the following:—Seed, Fruit, Bract, Stipule, Rhizome, Pistil, Calyx, Epiphyte, Species, Genera and Raceme.
2. Give an account of the structure and functions of the root of a plant.
3. What is the difference between the vascular and cellular tissue?
4. Name the usual parts of the flower of a Phanerogamic plant.
5. Distinguish between Phanerogamic and Cryptogamic plants as to structure.
6. By what general characters are Endogens or Monocotyledonous plants and Exogens or Dicotyledonous plants distinguished from each other?
7. What are the functions of leaves?
8. What parts of the flower are essential to the production of seed?

Greek.

TEACHERS—CLASSES I.

Three hours allowed.

1. Translate into English, *without transcribing the Greek* :—

- (a) Καὶ ὁ Κύριος παρελαύνων οὐ πᾶν πρὸς αὐτῶ τῷ στρατεύματι, κατεθεύτο ἐκατέρωσε ἀποβλέπων εἰς τε τοὺς πολεμίους καὶ τοὺς φίλους. ἰδὼν δὲ αὐτὸν ἀπὸ τοῦ Ἑλληνικοῦ Ξενοφῶν Ἀθηναῖος, ὑπελάσας ὡς συναντήσῃ, ἤρετο εἰ τι παραγγέλλοι· ὁ δ' ἐπιστήσας εἶπε, καὶ λέγειν ἐκέλευσε πᾶσιν, ὅτι καὶ τὰ ἱερὰ καλὰ καὶ τὰ σφάγια καλὰ. ταῦτα δὲ λέγων θορύβου ἤκουσε διὰ τῶν τάξεων ἰόντος, καὶ ἤρετο τίς ὁ θόρυβος εἶη. ὁ δὲ Κλέαρχος εἶπεν ὅτι τὸ σύνθημα παρέρχεται δεύτερον ἤδη, καὶ ὡς ἐθαύμασε τίς παραγγέλλει, καὶ ἤρετο ὅ, τί εἶη τὸ σύνθημα. ὁ δ' ἀπεκρίνατο Ζεὺς σώτηρ, καὶ νίκη.
- (b) Πρόξενος δὲ ὁ Βοιωτίας, εὐθύς μὲν μενιάκιον ὄν, ἐπεθύμει γενέσθαι ἀνὴρ τὰ μεγάλα πράττειν ἱκανός· καὶ διὰ ταύτην τὴν ἐπιθυμίαν ἔδωκε Γοργία ἀργύριον τῷ Λεοντίῳ. ἐπεὶ δὲ συνεγένετο ἐκεῖνος, ἱκανὸς νομισθεὶς ἤδη εἶναι καὶ ἄρχεω, καὶ φίλος ὢν τοῖς πρώτοις, μὴ ἤττάσθαι ἐνεργετῶν, ἦλθεν εἰς ταύτας τὰς σὺν Κύρῳ πράξεις· καὶ ᾤετο κτήσεσθαι ἐκ τούτων ὄνομα μέγα καὶ δύναναι μεγάλην καὶ χρήματα πολλά. τοσοῦτων δ' ἐπιθυμῶν, σφόδρα ἐνδηλον αὐτῷ καὶ τοῦτο εἶχεν ὅτι τούτων οὐδὲν ἂν θέλοι κτᾶσθαι μετὰ ἀδικίας, ἀλλὰ σὺν τῷ δικαίῳ καὶ καλῷ ᾤετο δεῖν τούτων τυγχάνειν, ἀνευ δὲ τούτων· ἄρχεω δὲ καλῶν μὲν κάγαθῶν δυνατὸς ἦν.

2. Translate into Greek, *without transcribing the English* :—

- (a) I pity the mother for having been deprived of such a daughter.
- (b) He withheld from the sources of gain which he formerly pursued, thinking them disgraceful.
- (c) Many men die before their character is known.
- (d) Do you see how many there are of the enemy, and how few we are?
- (e) What induced the Athenians to undertake an expedition against so great an island as Sicily?
- (f) Do not go away till you have learnt whether the affairs of the city are in a good condition.
- (g) Who, that is a good citizen, would not be willing to obey the laws of his own city?
- (h) He refused to go away without receiving the money.

3. Write down the principal tenses (1st person singular) of *τρέφω, ἀμαρτάνω, ἐλαίνω, ἐσθίω, τρέχω, ῥέω, μάχομαι, αἰρῶ, ὠνούμαι, βάλλω, δάκνω, φαίνω, ἀφίημι, ὀρῶ, γιγνώσκω*.

4. Conjugate in full the future and aorist active of *ἀφίημι, φέρω*, and the aorist and perfect passive of *δίδωμι, φέρω*.

APPENDIX XIX.

Department of Public Instruction, Sydney, 12 February, 1886.

REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Regulations, for carrying out the provisions of the Public Instruction Act of 1880, being made in accordance with the 37th section of that Act. These regulations are intended to supersede those of 4th May, 1880, and subsequent dates.

J. H. YOUNG.

PUBLIC SCHOOLS.

1. Application for the establishment of a Public School must be made in the following form :—

Application for the establishment of a Public School at
Post Town,
Date,

The undersigned, on behalf of the residents at _____, hereby request that a Public School may be established at that place, under the provisions of the Public Instruction Act.

On behalf
of the Residents...

{
.....
.....
.....

Information to be supplied by Applicants.

- (1.) Describe the position of the proposed School, namely :—
County,—
Parish,—
Post Town,—
- (2.) What other Schools, maintained or aided by the State, are within two miles of the site of the proposed School?
- (3.) If none are within two miles, what is the distance to the nearest School?
- (4.) Are there any Primary Schools, not aided by the State, within two miles of the proposed School? If so, of what character, and how attended?
- (5.) State the number of children, from four to fourteen years of age, living within a radius of two miles of the site of the proposed School, *e.g.* :—

Boys
Girls
Total.....

Religious Denominations—
Church of England
Roman Catholic
Presbyterian
Wesleyans
Others

Total.....

- (6.) What land is available for a site on which to erect the necessary School buildings? Give a Surveyor's description, and, if possible, a plan of the ground. Annex

Annex to Application for establishment of a Public School at

WE, the undersigned Parents (or Guardians) of Children residing within the undermentioned distances from the site of the proposed Public School at _____, hereby undertake that our Children, whose names are inserted below, shall attend the said School.

Name of Parent or Guardian. (To be written by himself. *)	Distance from proposed School.	Distance from nearest existing State School.	Name of Child.	Age.	Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by one of the Promoters of the School.

2. A Public School may be established in any locality where a regular attendance of twenty children between the ages of 6 and 14 years can be guaranteed.

Inscription.

3. In the case of every Public School, whether the property be vested in the Minister or not, the inscription "Public School," and no other, shall be conspicuously put up on the outside of the building.

Uses of Public School Buildings.

4. No use shall be made of any Public School building tending to cause contention—such as the holding of political meetings, or bringing into it political petitions or documents for signature. And no such building shall be used as a place of public worship unless built and kept in repair without aid from the Minister; nor in such case, if objected to in writing by one-fourth of the parents of the children attending the school.

SUPERIOR PUBLIC SCHOOLS.

5. Any Public School may be declared a Superior Public School, if, after due inquiry, it shall be found that the attendance thereat is sufficient to enable a class to be formed of not less than twenty pupils who have been educated up to the standard that completes the course prescribed for a Fourth Class.

6. In addition to more advanced work in the ordinary subjects, lessons in other branches shall be given to the highest class, as under:—

To Boys.—In Mathematics, Latin, Science, and Drawing.

To Girls.—In French, Drawing, and Sanitary Science.

Instruction may also be given in such other branches as the Minister may from time to time consider expedient.

7. No special fee shall be charged.

8. Necessary text-books shall be supplied by the Minister.

9. In cases where the regular staff is unable to teach any prescribed subject efficiently, the Minister may employ a special teacher for such subject, and pay him such salary as he may deem expedient, provided that the special class so taught shall be drafted from the highest class, and contain not less than twenty pupils.

10. The course of instruction to be carried out in the highest class of a Superior Public School shall be that prescribed for a fifth class in the Standard of Proficiency; and such portions of the course shall be studied each year as will coincide with the subjects prescribed annually for the Junior or Senior Examinations of the Sydney University.

EVENING PUBLIC SCHOOLS.

11. Application for the establishment of Evening Public Schools must be made by petition to the Minister of Public Instruction in the form subjoined.

Signatures to Petition.

12. Every such petition must be signed, on behalf of not fewer than ten persons, by the parents, guardians, or other residents of the locality in which it is desired to establish an Evening Public School.

Persons not eligible to be Pupils.

13. No person below the age of fourteen years shall be received as a pupil in any Evening Public School unless such person has received a certificate under section 35 of the Public Instruction Act; and no teacher or pupil-teacher employed in any school established or maintained under this Act shall be eligible for admission into such Evening Public School unless authorized by the District Inspector.

Appointment of Teachers.

14. Teachers of Evening Public Schools will be appointed by the Minister, but no teacher can be appointed unless he has been trained and classified.

Place of holding Evening Public Schools.

15. An Evening Public School may be conducted in any Public School-room or in any class-room attached thereto, or elsewhere in a suitable place.

Furniture and Apparatus.

16. The ordinary school furniture and apparatus of any such Public School may be used in the management of an Evening Public School.

Books.

17. Necessary supplies of reading-books will be granted to Evening Public Schools.

Time of Meeting.

18. The pupils of an Evening Public School shall meet for instruction three times weekly at least, and every such meeting shall be of not less than two hours' duration.

Course of Instruction.

19. The course of instruction shall comprise Reading, Writing, Dictation, Arithmetic, Grammar, and Geography; but other subjects may be included with the sanction of the District Inspector.

Instruction to be Secular.

20. The instruction imparted must be secular, in accordance with section 7 of the Public Instruction Act. Fees.

Fees.

21. Every pupil in an Evening Public School shall pay to the teacher weekly, in advance, a fee not exceeding one shilling; but the Minister may relieve pupils from the payment of school fees in cases where inability to pay is satisfactorily shown, and make good the payment to the teacher.

Salaries.

22. The salaries of teachers of Evening Public Schools shall be at the following rates :—
 For an average attendance of 10 to 15, £20 per annum.
 „ „ 15 to 20, £26 „
 „ „ 20 to 30, £32 „
 „ „ 30 to 40, £38 „

Fuel and light.

23. The expense of providing fuel and light must be borne by the teacher.

Registers.

24. A class roll for recording the attendance of pupils, and a lesson register, shall be kept in every Evening Public School.

Returns.

25. Quarterly and annual returns shall be furnished in the same form as in Public Schools.

Inspection and control.

26. Evening Public Schools shall be subject to the same inspection and control as Public Schools.

FORM OF PETITION.

To the Honorable the Minister for Public Instruction.

The petition of the undersigned parents, guardians, and other residents, humbly sheweth :—
 THAT your Petitioners desire that an Evening Public School may be established at
 in accordance with the provisions of section 10 of the Public Instruction Act of 1880.

That your Petitioners guarantee the regular attendance for _____ months at such school,
 when established, of the persons named in the annexed Schedule.

That your Petitioners undertake, on behalf of the said persons, that they shall conform to the
 Regulations for the conduct of Evening Public Schools now in force or that may hereafter be framed by
 authority.

And your Petitioners will ever pray.

SCHEDULE showing the names of persons who will attend an Evening Public School at

Name.	Age next birthday.	Occupation (if any).	Signature of parents, guardians, or employers.

PUBLIC HIGH SCHOOLS.

27. The standard of attainments for the admission of pupils to High Schools shall be as follows :—

BOYS AND GIRLS.

Reading.—To read a passage from some standard author, pronouncing every word distinctly, and giving due emphasis and modulation to each sentence as a whole. To have an acquaintance with the meanings of words selected from the passage read.

Dictation.—To write a passage of about fourteen lines dictated from some standard author, or an ordinary newspaper, with correct spelling and punctuation.

Arithmetic.—To solve questions in Proportion, Vulgar and Decimal Fractions, Interest, and Discount.

NOTE.—In the case of girls, Interest and Discount to be omitted.

Grammar.—To parse the more difficult words in a passage of about six lines. To distinguish the true subjects and the true predicates in sentences. To correct inelegant or ungrammatical expressions. To exemplify the correct usage of picked words.

BOYS.

Euclid.—Book I, Definitions, &c., Propositions 1 to 20 inclusive.

Algebra.—First Four Rules.

Latin.—Smith's Principia Latina, Part I, to Exercise 15 inclusive.

GIRLS.

French.—Schneider's First French Course, Exercises 1 to 60 inclusive.

28. The School fee shall be two guineas per quarter, payable in advance. Candidates whose parents are duly certified to be unable to pay the fee may be admitted free, provided they pass the entrance examination.

29. The fees shall in no case be the property of the Teachers, but shall be paid into the Consolidated Revenue Fund.

30. The ten candidates of each sex, and not over fourteen years of age, who gain most marks and show the necessary proficiency at the examination held at the beginning of each year for admission to the Sydney High Schools, shall be awarded Scholarships entitling them to free education therein for that year, and, subject to the Teacher's annual favourable report on their proficiency and conduct, for the two following years. In each of the other High Schools the first three successful candidates shall be awarded like Scholarships.

PROVISIONAL SCHOOLS.

31. Application for the establishment of a Provisional School must be made in the form contained in the subjoined Schedule.

32. A Provisional School may be established in any locality where not fewer than 12, but not more than 19, children between the ages of six and fourteen years can regularly attend such school: provided that no Provisional School shall be established within 4 miles by the nearest route practicable for children of any existing Public, Provisional, or Half-time School.

33. The necessary school buildings and furniture for a Provisional School, as well as the requisite books and apparatus, will be provided at the cost of the Department, subject to the following conditions :—

- (a) That the grant in aid of the building and furniture shall be limited to £45, when, in the opinion of the Inspector, the average attendance will be from 12 to 15, and to £60 when the average attendance is likely to be 18 ; that payment shall not be made until the building has been erected, and reported by an Inspector or other officer of the Department of Public Instruction to be ready for occupation.
- (b) That the building shall be placed on Crown lands, if sites thereon central to the school population and otherwise suitable can be obtained, and that, if built on private land, the right-of-way shall be secured, and the property leased to the Minister of Public Instruction for a term of years, as may be agreed upon, at a peppercorn rent, the Minister having the right to remove the building before or at the expiration of that term.
- (c) That where the average attendance is expected to range from 12 to 15, the school-room shall measure 14 feet in length, 12 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fire-place ; two out-offices must also be provided, and the following articles of furniture supplied, viz. :—
 2 desks, each 10 feet 6 inches long.
 2 forms, each 10 feet 6 inches long.
 1 book-press or box.
 1 table, 3 feet by 2 feet
 1 chair.
- (d) That where the average attendance is expected to be 18, the school-room shall measure 17 feet in length, 14 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fire-place ; two out-offices must also be provided, together with the following articles of furniture, viz. :—
 4 desks, each 7 feet 6 inches long.
 4 forms, each 7 feet 6 inches long.
 1 book-press or box.
 1 table, 3 feet by 2 feet.
 1 chair.
- (e) That the applicants for a Provisional School state, on the usual form of application, the arrangements which they deem best for having the building erected, and the furniture supplied, with the least possible delay.

34. Teachers of Provisional Schools will be appointed by the Minister, after their competency for the office has been ascertained.

35. To ensure the continuance of a Provisional School, the provisions of the Public Instruction Act must be duly observed, and an average attendance of not fewer than 12 pupils maintained.

36. Provisional Schools shall be classified in the following manner :—

Schools with an average attendance below 20, but not below 18.....	} First-class Provisional Schools.
Schools with an average attendance below 18, but not below 15.....	
Schools with an average attendance below 15, but not below 12.....	} Second-class Provisional Schools.
Schools with an average attendance below 15, but not below 12.....	
Schools with an average attendance below 15, but not below 12.....	} Third-class Provisional Schools.
Schools with an average attendance below 15, but not below 12.....	

37. The Salaries of Teachers of Provisional Schools shall be at the following rates :—

- In First-class Provisional Schools, £90 per annum.
- In Second-class Provisional Schools, £75 per annum.
- In Third-class Provisional Schools, £60 per annum.

38. School fees shall be paid at the same rate as prescribed for Public Schools, and the sums received shall be paid to the Consolidated Revenue.

39. Provisional Schools must be conducted in every respect as Public Schools, and be subject to all the provisions of the Public Instruction Act with respect to religious instruction.

40. The course of secular education shall embrace Reading, Writing, Arithmetic, Grammar, Geography, and History, with needlework for girls, whenever practicable ; and the instruction must be imparted in accordance with the prescribed standard of proficiency.

SCHEDULE.

Religious Denominations—
 Church of England
 Roman Catholic
 Presbyterian
 Wesleyan.....
 Others

Total.....

If a school building has been provided without cost to the Department, or can be rented, describe it.
 Can

Can a suitable and central site be obtained on Crown Lands? If not, is there a site on private property that can be rented by the Department for a term of years at a peppercorn rental, on the understanding that a building erected by the Minister can be removed before or at the expiration of that term?

What arrangements are deemed best for having the requisite building erected and furniture supplied, with the least possible delay, in accordance with article 3 of the Regulations for Provisional Schools.

Annex to Application for the establishment of a Provisional School.

We, the undersigned, parents (or guardians) of children residing within the undermentioned distances of the proposed Provisional School at _____, hereby undertake that our children, whose names are inserted below, shall attend the said school :—

Name of Parent or Guardian. (*To be written by himself.)	Distance from proposed school.	Distance from nearest State School.	Name of Child.	Age.	Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by a Member of the Local Committee.

SCHOOLS TAUGHT BY ITINERANT TEACHERS.

(A.) Half-time Schools.

41. Wherever twenty children, between the ages of six and fourteen years are residing within an estimated radius of 10 miles from a central point, and can be collected in groups of not less than ten children in each, the Itinerant Teacher will visit two such places only, and the schools so established will be designated Half-time Schools.
42. Applications for the establishment of Half-time Schools must be made in the form appended; but aid will not be granted towards the maintenance of such schools unless suitable school-houses be provided by the applicants.
43. No school-room will be approved unless it be 10 feet at least in width, be floored, be provided with a fireplace, and be properly lighted and ventilated.
44. A full supply of furniture and school books will be granted as a first stock to all schools newly established, and further grants will be made from time to time, as may be deemed expedient.
45. The same Registers are to be kept and the same Returns furnished as in Public Schools.
46. Every teacher must divide his time between the schools under his charge, with the view of effecting the largest amount of good. Where practicable, he is to devote the mornings to the teaching of one school and the afternoons to the teaching of the other; but, if found more suitable, other arrangements may be adopted, under the authority of the Inspector charged with the supervision of the school. In any case, the parent or guardian of each child is to be supplied with a time-table showing the hours at which school will open and close.
47. Half-time Schools will be classified in the same manner as Public Schools, according to the total average attendance of pupils at the stations at which a Teacher gives instruction.
48. Teachers will be paid the full rates of salary attached to the classification of their schools.
49. The scale of fees for Half-time Schools shall be, for five days teaching —
 For one child in a family, three pence.
 For two children in a family, six pence.
 For three children in a family, nine pence.
 For four or more in a family, one shilling.
50. Teachers will be paid a sufficient annual allowance, where necessary, for horse forage, irrespective of the salary attached to their schools.
51. As regards instruction, every Half-time School is to be conducted in all respects as a Public School.
52. Teachers are required to insist on the carrying out of a systematic course of Home Lessons.
53. Teachers will hold themselves directly responsible to the Inspectors under whose supervision they are placed.
54. At the end of each month a report upon the work done during that period must be furnished by each Teacher to the Inspector.

Application for the establishment of a Half-time School at _____ and _____
 Post Town _____
 Date _____

Sir,
 Schools at _____ beg to apply to the Minister for Public Instruction for the establishment of Half-time
 and _____ under the 23rd section of the Public Instruction Act of 1880.

What is the character of the proposed school buildings at each place?

Annex to application for establishment of a Half-time School at

WE, the undersigned, parents (or guardians) of children residing within the undermentioned distances from the site of the proposed Half-time School at _____ hereby undertake that our children, whose names are inserted below, shall attend the said school.

Name of Parent or Guardian. (*To be written by himself.)	Distance from School.	Name of child.	Age.	Religious Denomination.

* If the parent or guardian be unable to write, his mark must be witnessed.

(B.) *House-to-house Schools.*

55. Teachers not necessarily trained may be employed in house-to-house teaching; they must be persons of good moral character, and must satisfy the Inspector that they are capable of imparting the rudiments of an English education.

56. The mode in which their time shall be apportioned to the several families visited by them will be determined by the Minister, on information furnished by the Inspector.

57. The subjects of Instruction shall be limited to reading, writing, dictation, and arithmetic.

58. It is required that the teacher shall supplement his oral instruction by a systematic course of home lessons.

59. At the end of each month a report upon the work done during that period must be furnished by the teacher to the Inspector.

60. The remuneration of teachers engaged in the work will be at the rate of £5 per annum for each pupil in average attendance, up to a maximum salary of £100 per annum.

61. In addition to such remuneration they will be allowed a sum of £10 per annum as forage allowance. Application for payment should be made at the end of each quarter.

62. As a condition to payment of salary, they must keep a record of the pupils' attendance in a satisfactory manner, and furnish punctually and accurately such returns as may be required by the Department.

63. Necessary text-books and materials will be supplied on requisition, as in the case of other schools.

Application for the appointment of an Itinerating Teacher for the _____ District of

Sir,

Date _____

We hereby request that the Minister of Public Instruction, in accordance with the provisions of section 23 of the Public Instruction Act, will be pleased to appoint an Itinerating Teacher to instruct the children residing in the vicinity of _____, and within 10 miles of that place.

The information necessary for the Minister's decision is appended hereto.

The Under Secretary,
Department of Public Instruction.

We remain, Sir,
Your obedient Servants,

Information to be supplied by Applicants for the appointment of an Itinerating Teacher.

NAMES of Teaching Stations, their distances from the most central position, and the number of children to be instructed at each :—

	Name.	Distance.	No. of Children.
1.—Residence of _____	_____	_____	_____
2.— Do _____	_____	_____	_____
3.— Do _____	_____	_____	_____
4.— Do _____	_____	_____	_____
5.— _____	_____	_____	_____
6.— _____	_____	_____	_____

NATURE of provision made at each station for school accommodation. Local provision towards the support of Teachers.

WE, the undersigned, hereby promise that we will place under the instruction of the Itinerating Teacher to be appointed by the Minister of Public Instruction, the children whose names are inserted in the subjoined Schedule, and send them regularly and punctually to school :—

Place (if named).	Children's Names.	Ages.	Parents' Signatures.

Grants of School Books, &c.

64. Grants of school books and apparatus will be made from time to time as may be deemed expedient, to all schools under supervision of the Minister, in proportion to the average number of children in attendance. A full supply will be granted to schools newly established.

Requisitions for School Materials.

65. Requisitions for supplies should be forwarded at the end of a quarter only.

Character of School Books.

66. Such books only as are supplied or sanctioned by the Minister shall be used in any school for ordinary instruction.

Apparatus.

67. The term apparatus will include maps, diagrams, pictures, black-boards, easels, and ball-frames.

Registers, &c., to be kept.

68. The undermentioned registers and forms shall be kept, according to directions supplied with them, by every teacher: (a) an Admission Register, (b) a Class Roll, (c) a Daily Report Book, (d) Punishment Book, (e) a Lesson Register, (f) a Time-table, and (g) a Programme of Lessons for each Class.

Returns.

Returns.

69. Quarterly and Annual Returns shall be furnished from every school. Each quarterly return must be neatly made out in duplicate, one copy to be retained by the teacher as a record and the other to be furnished to the Inspector on the Saturdays preceding the Midwinter and Christmas vacations, and in other cases on the last Saturdays in the months of March and September. The annual return must be forwarded, with the quarterly return, immediately after the close of the December quarter.

Default in sending Returns.

70. Negligence in compiling or sending returns, or in keeping School Registers, will render a teacher liable to a fine, or, if repeated, to a loss of classification. Any teacher guilty of fraudulently making false entries in any register or return will be dismissed.

Training of Teachers.

71. Every applicant for employment as a teacher must undergo a course of training before being permanently appointed, unless he shall have previously been trained in some recognized Training School. He must sign an undertaking to accept such employment in any locality indicated by the Minister.

Position of Teachers.

72. Teachers employed under the Department of Public Instruction are Civil Servants of the Crown, and are entitled to all the advantages and subject to all the restrictions of that position.

General Qualifications.

73. As a general rule, no person will be appointed as a teacher unless he has been examined and classified. In some cases a teacher may be appointed provisionally who has not undergone examination; but his appointment will not be ratified until his competency has been tested in that manner.

Examination and Classification.

74. The attainments of teachers, students of the Training School, and candidates for employment as teachers, will be tested by oral and written examinations, and their skill in teaching will be determined by their ability to manage a school or class; and according to such attainments and skill they will be classified in the following grades:—The first or highest class will have two grades, distinguished as A and B; the second class will have two grades, distinguished as A and B; and the third class will have three grades, distinguished as A, B, and C. A classification awarded to a teacher, a student of the Training School, or a candidate for employment, after his first successful examination, will be provisional only, and will be confirmed at the end of three years from the date of examination if the Inspectors' reports upon his school work be fully satisfactory: Provided that the classification of any teacher in the school service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification.

Commencement of duty.

75. When a teacher is appointed to a school he must report to the Inspector of the District the fact of arrival at his post, and the date of commencing duty.

Resignation of Teachers.

76. Teachers are required to give not less than one month's notice of their intended resignation, which will take effect on the last day of the month indicated. Before receiving salary for the last month they must hand over to a person duly authorized all school property belonging to the Minister, and make out, in duplicate, an inventory of the same: one copy, to be forwarded to the Inspector, the other to be left with the School records.

Teachers' Occupation.

77. Teachers in the service of the Minister are prohibited from engaging in any occupation not having a distinctly educational character, unless the sanction of the Minister has been previously obtained.

Duties of Teachers.

78. The duties of teachers are the following:—

- To observe faithfully these Regulations.
- To carry out the suggestions of Inspectors to the best of their ability.
- To teach according to the course of secular instruction.
- To maintain the discipline prescribed in the Regulations.
- To keep the School records neatly, and to furnish returns punctually.
- To see that the undermentioned documents are kept posted in a conspicuous place in the school-room, namely:—(a) The Regulations; (b) Notice to Visitors; (c) Course of Secular Instruction; (d) Time-table; (e) Programme of Lessons; (f) Scale of Fees.
- To take charge of the school buildings and all property belonging to the Minister, and to be responsible for keeping the school premises in good order and tenantable repair—reasonable wear and tear excepted.

Teachers' Wives.

79. In schools containing female children but no female teacher it will be the duty of the teacher's wife to teach needlework to the girls during at least four hours in each week. In forming an estimate of the efficiency of schools, the competency and usefulness of teachers' wives, and the time they devote to school duties, will be taken into account.

Assistant Teachers.

80. Assistant teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for three years at least as a pupil teacher, or (b) persons who have been examined and classified.

Pupil-teachers.

81. Pupil-teachers may be employed to serve not less than three years in any school in which the average attendance has been not less than fifty for the three months preceding, provided that the teacher holds a classification not lower than Class II.

Conditions of Appointment.

82. Candidates for the office of pupil-teacher must be not less than 13 nor more than 17 years of age, and free from any bodily infirmity likely to impair their usefulness. They must also pass an examination in the subjects specified in Regulation 84.

Remuneration.

83. The remuneration of pupil-teachers will consist partly of instruction to be given by the teacher, for at least one hour on every school day, and partly in a yearly salary.

SUBJECTS OF EXAMINATION FOR TEACHERS AND PUPIL-TEACHERS.

84. The subjects in which teachers, students of Training Schools, and pupil-teachers shall be examined for classification are those stated hereunder.

FOR A THIRD CLASS CERTIFICATE.

- Reading*—Full value, 800 marks. Prose and Poetry.
Writing—Full value, 800 marks. Specimens of copy-setting in round hand, half-text, and small hand.
Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.
Text Books—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
Grammar—Full value, 1,000 marks. Including Punctuation, Paraphrasing, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, Dictation, and Composition.
Text Books—M'Leod's Grammar, and Laurie's Composition.
Geography—Full value, 1,000 marks. Europe and Australia in detail. Mapping in connection with those Continents.
Text Books—Hughes' Class Book of Geography, Geography of New South Wales (Wilkins').
History—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important Events. General sketch of Australian History.
Text Books—Nelson's Royal History of England, Sutherland's History of Australia.
School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.
Text Books—Gladman's School Method, Public Instruction Act and Regulations.
Domestic Economy—(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.
Text Book—Hassall's Domestic Economy.
Drawing—Full value, 500 marks. Black-board, Freehand.
Text Books—As prescribed in the Standard of Proficiency.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

FOR A SECOND CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry from any English Reading Book.
Writing—Full value, 500 marks. Specimens of Copy-lines, Letter-writing, Ornamental Writing.
Arithmetic—Full value, 1,000 marks. The full course, with Elementary Mensuration.
Text Books—Barnard Smith's Arithmetic, Hamblin Smith's Arithmetic, Todhunter's Mensuration (for Males), Chap. I to XX inclusive. For Females, Chap. I to XIII inclusive.
Grammar—Full value, 1,000 marks. Including Spelling, Punctuation, Parsing, Paraphrasing, Meaning and Uses of Words, Etymology, and Analysis.
Text Books—Hunter's Grammar, Lennie's Grammar (revised), Morell's Grammar and Analysis.
Subject for Special Study—"Julius Cæsar,"—(Shakespeare).
Geography—Full value, 800 marks. Physical Geography, Europe, Australasia, and North America, in detail. Mapping within these limits.
Text Books—W. Hughes' Class Book of Geography, and Edward Hughes' Physical Geography, or Geikie's Physical Geography.
History and English Literature—Full value, 700 marks.
 History—{ British History, from the Conquest to the present times.
 { Australian History.
 Literature—Elizabeth to Cromwell inclusive.
Text Books—Nelson's Royal History, Sutherland's History of Australia, Smith's smaller History of English Literature.
Art of Teaching—Full value, 500 marks. Organization, Discipline, Method, and Instruction of Schools in greater detail.
Text Books—Gladman's School Method, Public Instruction Act and Regulations.
Sanitary Science—(Female Teachers only)—Full value, 500 marks.
Text Books—Wilson's Healthy Life and Healthy Dwellings.
Drawing—Full value, 500 marks. Geometrical and Model Drawing.
Text Books—Nesbit and Brown's Handbook of Model and Object Drawing, Rawle's Practical Plane Geometry.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

* *Alternative Groups for Males.*

Group I.

- Euclid*—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.
Algebra—Full value, 1,000 marks. To Quadratic Equations, including Surds.
Text Books—Hamblin Smith's Algebra, Todhunter's Euclid.

Group II.

- Latin*—Full value, 2,000 marks. Grammar, Composition, Cæsar De Bello Gallico. Books I to IV inclusive.
Text Books—Dr. Smith's Smaller Latin Grammar, "Principia Latina," Part I; and Ihne's Latin Syntax, Part I. * *Alternative*

* NOTE—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

* *Alternative Groups for Females.*

Group I.

French—Full value, 1,500 marks. Grammar, Composition, Translation from an easy author.
Text Books—Voltaire's Charles XII. Books I to IV inclusive.
 Havet's French Class Book (complete), or
 Hallard's French Grammar.

Group II.

Latin—Full value, 1,500 marks. Grammar, Composition. Cæsar De Bello Gallico. Books I, II.
Text Books—As for Males.

Group III.

Euclid—Full value, 750 marks. Books I and II, with easy deductions on them.
Text Books—As for Males.
Algebra—Full value, 750 marks. To Quadratics, omitting Surds.
Text Books—As for Males.

Group IV.

Any two of the following Sciences:—

Experimental Physics—Full value, 750 marks.
Text Book—Balfour Stewart's Lessons on Elementary Physics.
Chemistry—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Lessons in Elementary Chemistry.
Geology—Full value, 750 marks.
Text Book—Lyell's Student's Elements of Geology.
Zoology—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Zoology.
Botany—Full value, 750 marks.
Text Book—Oliver's Lessons in Elementary Botany.
Physiology—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Physiology.

FOR A FIRST CLASS CERTIFICATE.

Reading—Full value, 500 marks. Prose and Poetry from a standard author.
Writing—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing, Principles of Writing.
Arithmetic—Full value, 1,000 marks. The whole theory and practice.
Text Books—Hamblin Smith's Arithmetic.
 Barnard Smith's Arithmetic.
 Colenso's Arithmetic (as revised by Hunter.)
 Todhunter's Mensuration (for Males only).
Grammar—Full value, 1,000 marks. Including Orthography, Punctuation, Parsing, Paraphrasing, Analysis, Composition, Etymology, Prosody, and Style.
Text Books—Mason's English Grammar.
 Bain's Higher English Grammar.
 Meiklejohn's Book of English.
Geography—Full value, 800 marks. Physical Geography.
 Astronomical Geography.
Text Books—Geikie's Physical Geography.
 Lockyer's Astronomy.
Art of Teaching—Full value, 700 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.
Text Books—Gladman's School Method.
 Tate's Philosophy of Education, or
 Morell's Mental Philosophy.
Sanitary Science (Female Teachers only)—Full value, 500 marks.
Text Books—Wilson's Healthy Life and Healthy Dwellings.
Drawing—Full value, 500 marks. The full D Certificate.
Text Book—Dennis' Perspective.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or
 Sutton's Theory of Music.
History—Full value, 700 marks. History of England in detail. History of Australia.
Text Books—Smith's Student's Hume.
 Creasy on the English Constitution. Chapters 10, 11, 15, 16.
 Sutherland's History of Australia.
English Literature—Full value, 800 marks. Elizabeth to Anne.
Text Book—Morley's English Literature. Chapters VII to XI inclusive.
For Special Study—Shakespeare's "Merchant of Venice."
 Milton's "Paradise Lost." Book I.
 Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159, 165, 409, 458, 487.
 Bacon's Essays, 6 (Blackie's edition), Civil and Moral.

Alternative Groups for Males.

Group I.

Algebra—Full value, 1,000 marks. Including the Binomial Theorem.
Text Book—Colenso's Algebra, or
 Hamblin Smith's Algebra.
Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—Potts' Euclid, or
 Todhunter's Euclid.
Plane Trigonometry—Full value, 1,000 marks.
Text Books—Todhunter's Trigonometry for Schools and Colleges, or
 Hamblin Smith's Trigonometry.

* Group

* NOTE.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

* Group II.

Latin—Full value, 2,000 marks. Virgil, first two Books of *Æneid*; Livy, Book 21. Questions on Grammar. Composition.

Text Books—Dr. Smith's Larger Latin Grammar.
Abbott's Latin Prose Composition.
Inhe's Latin Syntax.

Greek—Full value, 1,000 marks.

Text Books—Xenophon's "Anabasis." Books I and II.
Smith's Larger Greek Grammar.
Abbott's Greek Prose Composition.

French—Full value 1,000 marks. Grammar, Translation, Composition.

Text Books—Souvestre's "Un Philosophe sous les Toits."
Racine's "Athalie."
Havet's French Grammar.
Hallard's French Grammar.

German—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Schiller's "History of the Thirty Years' War." Chaps. I to IV.
Goethe's "Faust."
Otto's German Grammar.

† Group III.

Natural Science—Full value, 750 marks. Experimental Physics.

Text Book—Ganot's Physics.

Chemistry—Full value, 750 marks. Inorganic.

Text Book—Rosco's Class-book of Elementary Chemistry. (Macmillan.)

Geology—Full value, 750 marks.

Text Book—Juke's or Geikie's Geology.

Zoology—Full value, 750 marks.

Text Book—Huxley's Zoology.

Botany—Full value, 750 marks.

Text Book—Oliver's Manual of Botany.

Physiology—Full value, 750 marks.

Text Book—Huxley's Physiology.

Sanitary Science—Full value, 750 marks.

Text Book—Wilson's Handbook of Hygiene.

Group IV.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

Latin—Full value, 1,000 marks. Cæsar De Bello Gallico. First two Books.

Virgil's *Æneid*. Book I.
Text Books—As in Group II.

Group V.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

And any two Sciences of the Science Group already specified in Group III. Full value, 1,000 marks.

Group VI.

Latin—Full value, 2,000 marks. Virgil's *Æneid*. Books I, II.

Livy. Book XXI.

Horace's Odes. Books I, II.

Grammar and Composition.

Text Books—As in Group II.

Together with any two of the following Sciences, namely :—Chemistry, Physics, Physiology, Geology.

Full value, 1,000 marks.

Text Books—As in Group III.

Alternative Groups for Females.

Group I.

French—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—Souvestre's "Un Philosophe sous les Toits."
Corneille's "Le Cid."
Racine's "Athalie."
Havet's French Grammar.
Hallard's French Grammar.

Group II.

German—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—As for Males.

Group III.

Latin—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—As for males.

Group IV.

Euclid—Full value, 800 marks. Books I to IV, with Deductions.

Text Books—As for Males.

Algebra—Full value, 700 marks. To Quadratic Equations inclusive.

Text Books—As for Males.

Group V.

Any three of the following Sciences :—

Experimental Physics—Full value, 500 marks.

Chemistry—Full value, 500 marks.

Geology—Full value, 500 marks.

Zoology—Full value, 500 marks.

Botany—Full value, 500 marks.

Physiology—Full value, 500 marks.

Text Books—As for Males of First Class.

SUBJECTS

* NOTE.—In this group at least two languages must be taken, one of them being Latin.

† NOTE.—Any four of these Sciences may be taken.

SUBJECTS OF STUDY FOR PUPIL TEACHERS.

BEFORE APPOINTMENT—CANDIDATES.

- Reading*—Full value, 50 marks. To read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to spell well, and to understand the meaning of the passage read.
- Writing*—Full value, 50 marks. To write from Dictation, in a neat hand, a simple Prose Narrative, with correct spelling and punctuation.
- Dictation*—Full value, 100 marks.
- Arithmetic*—Full value, 100 marks. To know the Arithmetical Tables, and to work the Rules in Vulgar Fractions, Proportion, and Practice, as in Barnard Smith's Arithmetic.
- Grammar*—Full value, 100 marks. To Parse and Analyze correctly a passage taken from an ordinary Class Book; to know the Elements of Grammar.
- Geography*—Full value, 100 marks. To understand the Geographical Terms, to be acquainted with the Map of the World, and to have a knowledge of the Geography of Australia.
- Drawing*—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of proficiency.
- Vocal Music*—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.
- Skill in Teaching*—To teach a Junior Class in the presence of an Inspector.

PUPIL TEACHERS—Class IV.

- Reading*—Full value, 50 marks. To read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter; to repeat from memory fifty lines of Poetry.
- Writing*—Full value, 50 marks. To write neatly and correctly from Dictation or from memory.
- Dictation*—Full value, 50 marks.
- Arithmetic*—Full value, 100 marks. To work Questions in Proportion, Vulgar and Decimal Fractions and Practice.
Text Book—Barnard Smith's Arithmetic.
- Grammar*—Full value, 100 marks. To Parse, Paraphrase, and Analyze a Passage; Meanings of Words Etymology.
Text-Books—Lennie's Grammar (revised).
Laurie's Spelling, and
Dictation Class Book.
- Geography*—Full value, 80 marks. New South Wales, in detail; Europe; the Physical Features and Chief Towns in each Country.
Text Books—Wilkins' Geography of New South Wales.
Hughes' Class Book of Geography.
- History*—Full value, 70 marks. English History to William I.
Text Book—Nelson's Royal History of England.
Australian History—Sutherland's. Chap. I to V.
- Drawing*—Full value, 50 marks. Black-board Practice.
- Vocal Music*—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. I to VIII.
- Geometry* (for Males)—Full value, 100 marks. Euclid. Book I. Propositions I to XXVI.
Text Book—Todhunter's Geometry.
- Algebra* (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chaps. I to V inclusive.
- Latin* (for Males)—Full value, 100 marks. Smith's "Principia Latina" to Exercise XXIV inclusive.
- * *French* (for Females)—Full value, 100 marks. De Fivas' "Grammaire des Grammaires," to Exercise XXX inclusive.
- School Management*—Full value, 50 marks. The Kindergarten Principle (Lyschinska). Gladman's School Method.
- Needlework* (for Females)—Full value, 50 marks.

PUPIL TEACHERS—Class III.

- Reading*—Full value, 50 marks. To read with improved intonation and expression.
- Writing*—Full value, 50 marks. Specimens of Penmanship; three hands.
- Arithmetic*—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.
- Grammar*—Full value, 100 marks. Parsing of Difficult Sentences, with a good knowledge of Syntax and the Analysis of Sentences: Meanings of Words; Force of Affixes; Latin Roots; Composition.
Text Book—Lennie's Grammar (revised).
- Geography*—Full value, 80 marks. Australia, Polynesia.
Mapping, confined within these limits.
Text Books—Collins' Geography of Australia and Pacific Ocean.
Collins' Australian and Primary Atlas.
- History*—Full value, 70 marks. English History; William I to Richard III inclusive.
Australian History—Sutherland's. Chaps. VI to X.
Text Books—Nelson's Royal History of England.
Sutherland's History of Australia.
- Drawing*—Full value, 50 marks. Freehand Drawing.
- Vocal Music*—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. IX to XII inclusive.
- Geometry*—Full value, 100 marks. Euclid. Book I.
- Algebra*—Full value 100 marks. Fractions and Simple Equations, to Chap. XIV inclusive.
- Latin*—Full value, 100 marks. Smith's "Principia Latina," to Exercise XXXIII.
- French* (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise LX. (See note,* Fourth Class Pupil Teachers.)
- School Management*—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
- Needlework* (for Females)—Full value, 50 marks.

PUPIL TEACHERS—Class II.

- Reading*—Full value, 50 marks. A standard author, with correct intonation and emphasis.
- Writing*—Full value, 50 marks. Specimens of Penmanship; three hands, with increased skill.
- Arithmetic*—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
- Grammar*—Full value, 100 marks. Increased skill in Parsing, Paraphrasing, and in the Analysis of Sentences; Meanings of Words, Affixes, Roots, Composition.
Text Book—Hunter's Grammar.
- Geography*—Full value, 80 marks. Asia: Physical Features and Chief Towns of each Country of Asia and North America.
Physical Geography: Waves, Tides, Currents.
- History*—

*NOTE.—From Female Pupil Teachers in Country Districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question:—

Latin or Euclid and Algebra	As for Males.
--------------------------------------	---------------

History—Full value, 70 marks. English History: Henry VII to Anne inclusive.
 Australian History—Sutherland's. Chapters XI to XVI.
Drawing—Full value, 50 marks. Model Drawing.
Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chap. XIII to XV inclusive.
Geometry—Full value, 100 marks. Books I and II, with Deductions in Book I.
Algebra—Full value, 100 marks. Simple Equations and Surds, to Chap. XXIV inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XLVIII.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise XC. (See (Note,* Fourth Class Pupil Teachers.)
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lynschiska).
Needlework (for Females)—Full value, 50 marks.

PUPIL TEACHERS.—Class I.

Reading—Full value, 50 marks. To read with ease and expression from a standard author.
Writing—Full value, 50 marks. Specimens of Penmanship; three hands, with increased skill.
Arithmetic—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.
Text Books—Barnard Smith's Arithmetic.
 Todhunter's Mensuration.
Grammar—Full value, 100 marks. Parsing, Paraphrasing, Prosody, Analysis of Sentences, Meanings of Words, Formation of Words, Derivations, Composition.
Text Book—Hunter's Grammar.
Geography—Full value 80 marks. Physical Geography.
 Physical Features and Chief Towns of each of the Countries of Africa and South America.
 Mapping, within these limits.
History—Full value, 70 marks. English History: George I to present time.
 Australian History—Sutherland's. Chapters XVII to XXII.
Drawing—Full value, 50 marks. Advanced proficiency expected in the three sections.
Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chap. XVI to end.
Geometry—Full value, 100 marks. Books I and II, with Deductions.
Algebra—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to end. Cæsar de Bello Gallico. Chap. I to III. Easy Translations.
French (for Females). Full value, 150 marks. "Grammaires des Grammaires," to the end. (See note,* Fourth Class Pupil Teachers.)
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lynschinska).
Needlework (for Females)—Full value, 50 marks.

Annual Examinations.

85. Examinations of teachers will be held half-yearly in each Inspector's District. Teachers who desire to be examined, with a view to a higher certificate, must at least one month before the date of examination, apprise the Inspector of their wish, and furnish him with a list of the alternative subjects upon which they are prepared for examination.

Promotion for Good Service.

86. Teachers can only be promoted from one class to another by examination. But in each class a teacher may, without examination, be advanced to a higher grade for good service, counting from the end of 1885; that is to say, if his school, in the last five years during which he has held the classification, has increased in efficiency, if the Inspectors' reports throughout that period have been satisfactory, and the report for the fifth year indicates that the applicant's practical skill is equal to that required for the grade sought, and if his general conduct has merited the Minister's approval.

Promotion by Removal.

87. Teachers desirous of being promoted to more important schools must intimate their wishes to the Inspector of the district, in writing. A list of such teachers will be kept in the Department of Public Instruction; and, except in special cases, promotions will be made in accordance with the principle of classification and seniority.

Classification of Schools.

88. Primary schools established or maintained under this Act shall be classed as follows :—

First Class Schools.

All schools in which the average daily attendance is not less than 600 in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Second Class Schools.

All schools in which the average daily attendance is not less than 400 children nor more than 600 in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Third Class Schools.

All schools in which the average daily attendance is not less than 300 nor more than 400 in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Fourth Class Schools.

All schools in which the average daily attendance is not less than 200 nor more than 300 in two departments, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Fifth Class Schools.

All schools in which the daily average attendance is not less than 100 nor more than 200 children in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Sixth Class Schools.

All schools in which the daily average attendance is not less than fifty nor more than 100 children in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Seventh Class Schools.

All schools in which the daily average attendance is not less than forty nor more than fifty in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Eighth

*NOTE.—From Female Pupil Teachers in Country Districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question :—

Latin	} As for Males.
or	
Euclid and Algebra	

Eighth Class Schools.

All schools in which the daily average attendance is not less than thirty nor more than forty children, in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Ninth Class Schools.

All schools in which the daily average attendance is not less than twenty nor more than thirty children, in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Tenth Class Schools.

All Public Schools in which the daily average attendance does not exceed twenty.

Condition of Retention in Class.

89. If a school fail to meet any one of the conditions before specified for its class the Minister may remove such school to a lower class.

Eligibility of Teachers for appointment to certain Schools.

90. Teachers who have gained their classifications by examination, or by promotion under regulation 86, shall be eligible for appointment to any school or department, in accordance with the following schedule :—

Class of Schools or Department.	Teacher's Classification.
I	I. A.
II	I. B.
III	II. A.
IV	II. A.
V	II. B.
VI	II. B.
VII	III. A.
VIII	III. B.
IX	III. C.
X	III. C.

91. A teacher may be removed from the school in which he is employed to another of a lower class, should he fail, through any default on his part, to maintain the requisite number of pupils n average attendance, or to satisfy the conditions of the standard of proficiency.

Teachers' Emoluments.

92. The salaries of male teachers shall be according to the following scale :—		£
For a teacher in charge of a school of the	First Class	400
Do do do	Second Class	336
Do do do	Third Class	252
Do do do	Fourth Class	240
Do do do	Fifth Class	228
Do do do	Sixth Class	216
Do do do	Seventh Class	180
Do do do	Eighth Class	156
Do do do	Ninth Class	132
Do do do	Tenth Class	108

In schools ranking below the fourth class, the salaries of unmarried male teachers, of married teachers who are not assisted by their wives, as required by regulation, and of female teachers in charge of schools, shall be £12 per annum less than the foregoing rates.

Mistresses.

93. The salaries of mistresses shall be according to the following scale :—		£
For a mistress in charge of a girls' or infants' department of a	School of the First Class	300
Do	Second Class	252
Do	Third Class	204
Do	Fourth Class	192
Do	Fifth Class	180

94. In addition to these salaries, residences, vested or rented, will be provided for married men in charge of Public Schools ; but a residence rented for a teacher shall be as near as practicable to his school. Mistresses of departments and unmarried teachers in charge of Public Schools may be paid such allowances in lieu of rent as the Minister may direct.

Assistant Teachers.

95. Salaries shall be paid to assistant teachers as follows :—		Male.	Female.
To a First Assistant, holding a First Class Certificate, in a school of the First Class	£250	£168	
To a Second Assistant, holding a Second Class Certificate, in a school of the First Class	150	120	
To a Third Assistant, holding a Third Class Certificate, in a school of the First Class	108	100	
To a First Assistant, holding a Second Class Certificate, in a school of the Second Class	180	144	
To an Assistant holding a Second Class Certificate, in a school of the Third Class	150	114	
To an Assistant holding a Second Class Certificate, in a school of the Fourth Class	150	114	

Pupil-teachers.

96. Salaries shall be paid to pupil-teachers at the following rates :—		Male.	Female.
First Class	£66	£48	
Second Class	54	36	
Third Class	42	30	
Fourth Class	36	24	

TRAINING SCHOOL.

Classes of Candidates.

97. The Minister will authorize to be received into the Training Schools three classes of candidates, namely:—*First Class* pupil-teachers whose term of service has expired, and teachers who have already been trained elsewhere. *Second Class*—Untrained teachers who have been in charge of schools. *Third Class*—Persons entering the teaching profession for the first time.

Qualifications

Qualifications.

98. Candidates must apply for admission in a form prescribed by the Minister: They must, except in the case of pupil-teachers, be not less than twenty years of age, and, as a general rule, not more than thirty; they must be free from any bodily infirmity likely to impair their usefulness as teachers, and be persons of active habits and unblemished reputation. They must also satisfy the Minister as to their previous history and qualifications.

Conditions of Admission.

99. Before admission, every candidate must make a declaration that he intends, in good faith, to follow the profession of a teacher in schools under the Minister, and that he will accept a situation in any district, as the minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than a period to be agreed upon at the time of his admission to training.

Term of Training.

100. Entrance examinations will be held half-yearly, in June and December; and the periods of training will be six or twelve months, as may be found necessary.

Allowances During Training.

101. The following allowances may be made to students who satisfy the afore mentioned conditions and pass successfully the prescribed examinations:—To married couples, £8 per month; to unmarried persons, £6 per month. When the school is prepared to receive students into residence, these allowances are not paid; board and lodging being provided instead.

Practical Training.

102. The students will be trained in the practical management of schools by attendance at the practising school.

Examinations.

103. Oral examinations of the students will be held periodically to test their attention and progress; and written examinations will take place half-yearly, in June and December—when classifications will be awarded according to attainments and teaching skill. No certificate will be given until the Inspectors Report shows that the student is successful in the management of a school.

GOVERNMENT OF SCHOOLS.

Public School Boards.

104. The Minister reserves to himself the power of controlling, through his officers, the internal management of schools; but, for other purposes, he will avail himself of the assistance of Public School Boards, whenever suitable persons are found to fill the office.

105. Every Public School Board, at the first meeting thereof, shall elect from the members a chairman, whose duty will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board may deem expedient.

106. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty, prescribed by the 19th section of the Public Instruction Act, of visiting any of the schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board.

107. In the visitation of schools placed under the supervision of a Public School Board in accordance with the aforesaid section of the Act, the Board may be represented by a quorum thereof, and the Board may, if it see fit, report the result of such visit to the Minister.

108. The grounds upon which any Public School Board shall exercise the power conferred on it by the section beforementioned to suspend a teacher for misconduct, should be the following:—Unfitness on the part of such teacher to perform his duties from intemperance; immoral conduct; gross neglect of duty; or continued absence from duty without leave.

109. Public School Boards shall, before leaving the school under visitation, report to the Minister any case in which a teacher is suspended by them, and apprise the Inspector having charge of such school by letter.

110. Public School Boards should use every endeavour to induce parents to send their children regularly to school, and should report, in cases coming under their notice, the names of any parents or guardians who refuse or fail to educate their children, for which purpose necessary forms will be provided.

111. When the course laid down in Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the Public School Board of the district; and, if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months and shall thereupon report the case to the Minister.

112. In fixing, in consultation with any teacher, the hour for special religious instruction, in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school, as laid down in the Regulations, is not unduly interfered with.

113. In addition to the powers conferred on such Boards by the Public Instruction Act, the Minister entrusts to them the following duties:—(a) To take care that the school buildings are not used for any improper purpose. (b) To see that a sufficient quantity of suitable furniture and apparatus is provided. (c) To take precautions for excluding from the school, during its ordinary business, all books not sanctioned by the Minister. (d) To inspect periodically the School Registers and Records. (e) To see that the school is open on all the usual school-days, and that the teacher is present at his work. (f) To observe whether the teacher discharges his duties; to report his conduct to the Minister when he is in fault; and to protect him from vexatious complaints.

Inspectors of Schools.

114. Inspectors and other persons deputed by the Minister to visit any school will be furnished with proper credentials. Every teacher is required to treat such persons with deference; to carry out their suggestions for the improvement of the school; and to obey their instructions in all matters relating to the Public Instruction Act and these Regulations.

Duties of Inspectors.

115. Inspectors are to enforce observance of the provisions of the Public Instruction Act and of the Regulations; but their decisions are subject to appeal to the Minister. They are to examine into the condition of schools, and to inquire into all matters which it may be expedient to report to the Minister. They are authorized to determine all questions of school management, and to take the teaching of a class or of a school into their own hands for a time, to show the teacher how defective methods may be improved.

Annual Inspections.

116. Once at least in the year, every school in each Inspector's district shall be visited by him, and the pupils be examined as to their proficiency in the several branches of instruction which are authoritatively prescribed. He will, within six days' of such inspection, send a report thereupon to the Minister, together with such observations on the state of the school generally as shall appear to him to be called for.

Conduct of Inspectors.

117. In their intercourse with teachers, Inspectors should be guided by feelings of respect for the teacher's office, and of sympathy with his labours. They will exhibit towards teachers every possible courtesy, treating them at all times with the consideration and kindness which the difficulties of their position demand.

Observation Book.

118. The Inspector's remarks upon the state of a school visited by him, will, at the close of the examination, be entered in the Observation Book of the school, which, as a record, is to be carefully preserved. Entries therein are not to be erased or altered.

SCHOOL ROUTINE AND DISCIPLINE.

Punctuality.

119. With a view to the proper training of their pupils, teachers must conduct the operations of their schools with punctuality and regularity.

Cleanliness.

120. Habits of personal neatness and cleanliness are to be encouraged among the pupils, not only by precept, but by the personal example of the teachers, and, if necessary, may be enforced. Teachers are also responsible for keeping the schoolrooms and furniture clean and arranged in an orderly manner.

Order and Conduct.

121. Teachers are to instil into the minds of their pupils the necessity for habits of orderly and modest behaviour, as well as of obedience to teachers and to the rules of the school. Pupils should also be trained to exhibit respect for the property of others, whether public or private; to regard the feelings of their fellows; to be honest and truthful, diligent under instruction, and conscientious in the discharge of every duty.

Government of Pupils.

122. In the government of pupils all degrading punishments are to be avoided. The teacher's discipline should be mild but firm, his manner kindly, his demeanour cheerful, and his language marked on all occasions by strict propriety. While overlooking no offence, his aim should be to prevent the necessity of punishment by effecting the improvement of the offender.

Corporal Punishment.

123. Corporal punishment may be inflicted, but by the principal teacher only, or by an assistant with his approval. It should be restricted as much as possible to extreme cases; and the teacher must keep a record of the time and place of punishment, its amount, and the nature of the offence.

Expulsion of Pupils.

124. No pupil shall be expelled from any school unless by the direction or with the express concurrence of the Inspector or the Public School Board, in writing; subject in every case to appeal to the Minister.

Suspension.

125. A pupil may, nevertheless, for gross insolence, persistent disobedience, profanity, or immoral conduct, be, by the teacher, forthwith removed from the school: provided that, in every such case, the matter shall be reported without delay to the Minister; and, until its settlement by him, the pupil shall not be readmitted.

Playground Supervision.

126. The conduct of pupils in the playground must be carefully supervised by the teacher; and he must see that, in proceeding to school and returning from it, their behaviour is orderly.

Religious Views of Pupils or Parents.

127. Nothing must ever be said or done by any teacher, in a pupil's hearing or presence, calculated to offend the religious views of that pupil, or of any other in the school, or of the parents of any such pupil.

Daily Routine.

128. In all schools maintained or aided by the Minister, the daily routine shall be that specified hereunder: provided that, by permission of the Minister, the time of assembling may be half an hour later than that so specified; in which case, the several times stated will be later in the same proportion.

Morning.

- At 8:45. Pupils to assemble in the playground. All school materials to be prepared for lessons.
- At 8:55. Pupils to be arranged in ranks, inspected as to cleanliness, and marched into school.
- At 9. Lessons (or Special Religious Instruction) to commence; as noted in the time-table prescribed by Rule 131.
- At 10:30. Recess for ten minutes, to be spent in the playground by pupils and teachers.
- At 10:45. Lessons to be resumed according to the time-table.
- At 11:55. Class-roll to be called and marked.
- At 12. The school to be dismissed for mid-day recess.

Afternoon.

- From 12 to 1:20. Recess for dinner and recreation, under the superintendence of the teachers.
- At 1:20. Pupils to reassemble in the playground. School materials to be prepared for lessons.
- At 1:25. Pupils to be arranged, inspected, and marched into school.
- At 1:30. Lessons to recommence as noted in the time-table.
- At 3:25. The roll to be called and marked.
- At 3:30. The school to be dismissed.

Time-table.

129. The time-table to be observed in the schools is the following, except that, in cases within the proviso to the preceding regulation, the time in each instance will be half an hour later than specified:—

- From 9 to 10. Special Religious Instruction; or, in Public and Provisional Schools, where no religious teacher is in attendance, Ordinary Instruction.
- From 10 to 12. Ordinary Instruction.
- From 12 to 1:30. Recess for dinner and reassembling.
- From 1:30 to 3:30. Ordinary Instruction.

Specia

Special Religious Instruction.

130. The hour appropriated to Special Religious Instruction is to be fixed by mutual agreement between the Public School Board, the teacher, and the person giving such instruction.

Vacations and Holidays.

131. The vacations sanctioned by the Minister are—three weeks at Christmas, and a fortnight at Mid-winter. The holidays allowed, other than those occurring in vacation, are—the Anniversary of the Colony, and of the Queen's Birthday, Good Friday, and Easter Monday.
Teachers are to state on their time-tables these vacations and holidays.

Closing Schools.

132. No school is to be closed on any school-day without the written direction of the Minister or other person duly authorized by him on that behalf.

Infectious Diseases.

133. The attendance of any pupil suffering from any contagious, offensive, or infectious disease, may be temporarily suspended by the teacher.

INSTRUCTION IN SCHOOLS.

Course of Instruction.

134. The course of Secular Instruction, as the term is defined in the Public Instruction Act, shall, for each class be as follows :—

1.—*Infants' Department.*

(Course, 2 years.)

Reading—Primer, Reader I and Reader II to Lesson 24—"Australian School Series"; or (in last half-year) "I.N.B. Series," Book II, to end of Section III.
Writing—On slates, from copies and dictation, using capitals.
Arithmetic—Notation to four places, and Simple Addition on slates; easy mental operations in Addition and Subtraction, and the Multiplication Tables to "7 times."
Object Lessons—Familiar Objects, Domestic Animals, Common Vegetables, Common Materials.
Form—Lines and Angles, Three and Four-sided Figures, Curved-line, and other Plain Figures.
Colour—Primary, Secondary, and Tertiary Colours; Combination, Shades, and Tints.
Singing—Simple Melodies by Ear.
Geography—School-premises and surrounding neighbourhood.
Scripture—Narratives and Moral Lessons.

2.—*First Class.*

(Course, 1½ year.)

Reading—Primer, Reader I, Reader II to Lesson 24—A.S. Series; or, I.N.B. Series as far as Book II, Section III, inclusive.
Writing—On slates from copy.
Dictation—From Lessons read, using capitals.
Arithmetic— }
Singing— } As in Infants' Department.
Scripture— }

Second Class.

(Course, 1½ year.)

Reading—Readers II and III—A.S. Series, or I.N.B. Series, Book II, with Sequel I, and Book III; Repetition of Poetry—50 lines.
Writing—On slates from copy; in copy-books—round-hand, half-text, and small-hand, with capitals.
Dictation—From Lessons read.
Arithmetic—Notation; Simple Rules; Addition, Subtraction, and Multiplication of Money by two figures. Mental Arithmetic:—Tables, Money, Weights and Measures, Prices of Dozens, easy Reduction.
Grammar—(In last half-year)—Noun, Pronoun, Adjective, and Verb, Parts of Speech.
Geography—(In last half-year)—School Locality, Cardinal Points; Continents, Oceans, and Chief Divisions marked on Map of the World.
Object Lessons—(In last half-year)—Domestic Animals, Common Objects, &c.
Singing—Simple Melodies by Ear; Scale Exercises, Intervals, Two-part Songs.
Scripture—I.N.B., Old Testament No. 1 to end of Lesson 18; Moral Lessons.

Third Class.

(Course, 1½ year.)

Reading—Reader IV, A.S. Series; or, I.N.B. Series, Book IV. Repetition of Poetry, 150 lines.
Writing—In copy-books—three hands.
Dictation—From the Reading Lessons, with correct spelling and punctuation.
Arithmetic—Compound Rules and Reduction; Vulgar and easy Decimal Fractions; Simple and Compound Proportion. Mental Arithmetic—Prices of Dozens and Scores, Exercises in Buying and Selling Transactions, and in Proportion and Fractions.
Grammar—All the Parts of Speech; Accidence, Parsing, and Analysis of simple Sentences; the Rules of Syntax; Composition—Letter-writing, description of places and events.
Geography—Outlines of the Geography of Australasia and Polynesia; Physical Geography and Towns of New South Wales, Europe, and Asia; Tides, Winds, Currents, Climates, Mapping.
Object Lessons—Common Minerals, Vegetables, and Animals; the Human Frame, and Laws of Health; Elementary Physiology; Important Manufactures.
History—Nelson's History of England for Junior Classes, to page 122; Sutherland's History of Australia, to end of Chapter III.
Singing—Part-singing; Notation, Pitch, Accent, Length of Sound; Double, Triple, and Quadruple Measures; Time Signatures; Scale, &c.
Drawing—"Royal Drawing Books," Nos. 7, 8, 9, and 10; Miscellaneous Freehand Exercises.
Scripture—I.N.B. Old Testament No. 1 and No. 2 to Lesson 27; New Testament No. 1.

Fourth Class.

(Course, 1 year.)

Reading—Reader V to Lesson 56, A.S. Series; or I.N.B. 4th Supplement, to page 155. Repetition of Poetry—100 lines.
Writing—On unruled paper; three hands; Ornamental Writing; Commercial Forms.
Dictation—From any portion of books read, with punctuation.
Arithmetic—Practice; Simple and Compound Interest; Discount; Profit and Loss; Mensuration of Surfaces; Mental Arithmetic.
Grammar—Accidence; Parsing and Analysis generally; framing Sentences; simple Essays.
Geography—Physical features and Chief Towns of North America. Outlines of the Geography of Africa, South America, and West Indies. Ocean; Atmosphere. *Object*

Object Lessons—As in Third Class, with Light, Heat, and Air in relation to Health ; Elementary Physical Science.
History—Nelson's History of England for Junior Classes, to page 232 ; Sutherland's History of Australia, Chapters 4, 5, 6, 7, 8, 9, and 10.
Singing—As in Third Class ; Sharps, Flats, Transition, Staff Notation, Key, and Time ; Signatures and Intervals fully.
Drawing—"Royal Drawing Books," Nos. 11 and 12 ; Collins' Advanced Books, Nos. 1 and 2 ; Wire Models—cube, cone, prism, pyramid.
Scripture—I.N.B. Old Testament, No. 2, to end ; New Testament, No. 2, to end.
Euclid—Book I, to Proposition XXVI.

Fifth Class.

(Course, 1 year.)

Reading—Reader V to the end, A.S. Series ; or I.N.B. 4th Supplement, to the end.
Writing—As in Fourth Class.
Dictation—On unruled paper—difficult passages.
Arithmetic—Full course, from Hamblin Smith's Manual, or any equivalent.
Mensuration—Todhunter's Mensuration for Beginners.
Grammar— }
Geography— } As prescribed for Junior and Senior Public Examinations at the Sydney University.
History— }
Natural Science—Balfour Stewart's Lessons in Elementary Physics ; or Huxley's Elementary Physiology.
Geometry—Euclid, Books I, II, III, and IV, with Exercises.
Algebra—Todhunter's Algebra for Beginners, to Chapter XXII inclusive.
Latin—Smith's "Principia Latina," Part I, to Exercise 28 inclusive.
French—(For Girls) Schneider's First Year's French Course ; Caron's French Reader to Exercise 152.
Drawing—Geometrical Drawing—Royal, Vere Foster's, or Collins' Series ; Collins' Advanced Books, Nos. 22 and 24 ; Wire Models—hexagon, pyramid, cylinder, flat circle, and square ; Plaster Models, or grouping of Wire Models.
Music—As in Third and Fourth Classes ; Major and Minor Modes ; Inversions, &c.
Scripture—As in Fourth Class.

NOTE—Where there are not as many as ten pupils to form a Fourth Class or a Fifth Class, as required, the Fourth Class and Fifth Class courses are to be taken as additions to the courses of the Third and Fourth Classes respectively ; and where pupils remain in the Fifth Class beyond a year, Trigonometry is to be taken in that class as an additional subject.

The Standards of Proficiency for the several Classes in Schools shall be as follow :—

FOR INFANTS' SCHOOLS.

First Half-year of Enrolment.

For children enrolled one half-year, and being five and a-half years old :—

Reading—To read Primer, Part I (Australian School Series), to Lesson 26.
Writing—To write on slates—i, u, n, m, v, r, w.
Arithmetic—To count and read up to 10, to know Ball-frame exercises in Addition, and addition of other concrete quantities as far as 10.
Object Lessons—Familiar Objects.
Singing—Simple Melodies by ear.
Form—The different kinds of lines and angles.
Colour—First (Primary) Colours.
Scripture—Narratives and Moral Lessons.

Second Half-year of Enrolment. (Age, 6 years.)

Reading—To read Primer (Part I), to end, Primer (Part II), to Lesson 70.
Writing—To write on slates all the letters of the Alphabet, with easy combinations.
Arithmetic—To count and read as far as 20 ; addition in single column to 20 ; add and subtract mentally, numbers not involving higher results than 20.
Object Lessons—Domestic Animals.
Singing—Simple Melodies by ear.
Form—Three and four sided figures.
Colour—Secondary Colours.
Scripture—Narratives and Moral Lessons.

Third Half-year of Enrolment. (Age, 6½ years.)

Reading—Primer (Part II), to end ; and Reader I (A.S.S.), to Lesson 10.
Writing—To write on slates from copies, and Monosyllables from Dictation.
Arithmetic—To read and notate to three places ; addition to three places—4 addends ; Mental Arithmetic, up to 40 ; tables to "4 times."
Object Lessons—Common Vegetables.
Singing—Simple Melodies by ear.
Form—Curved-line figures.
Colour—Tertiary Colours.
Scripture—Narratives and Moral Lessons.

Fourth Half-year of Enrolment. (Age, 7 years.)

Reading—(A.S.S) Reader I, to the end ; and Reader II, to Lesson 24. (I.N.B.) Book II, to the end of Section III.
Writing—On slates from Copies and Dictation, using Capitals.
Arithmetic—To read and notate as far as four places ; addition—6 places, 6 lines ; mental operations in Addition, Subtraction ; Multiplication Tables to "7 times."
Geography—The School premises and surrounding neighbourhood.
Object Lessons—Common materials.
Singing—Simple Melodies by ear.
Form—Other plain figures.
Colour—Combination, Shades, and Tints.
Scripture—Narratives and Moral Lessons.

NOTE.—The enrolment of each Pupil in the several Classes must show the time of such Pupil in the School and not in the Class.

FOR

FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

FIRST CLASS.

First Half-year of Enrolment.

Children enrolled one half-year and being six years old must have completed the following course:—

Reading—One of the following books or an authorized equivalent:—1. (A.S.S.) Primer I. 2. (I.N.B.) Book I, Sections I and II.

Writing—To write on slates from the black-board the following letters with their combinations in words of four letters—i, u, n, m, o, a, c, e, v, w, r, t, d, l, b, h, j, f, y, g, p, q.

Arithmetic—To count and read any number as far as 20; to add in single columns numbers not involving a higher result than 20; to notate as far as 20; to add and subtract, mentally, numbers not involving results higher than 20.

Singing—Simple Melodies by ear.

Scripture—Narratives and Moral Lessons.

NOTE.—Object Lessons are to be included in the instruction to the First Class in all schools above Class 7.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Primer II, to the end; and Reader I, to Lesson 10. 2. (I.N.B.) Book I, to the end; and Book II, Section I.

Writing—To write on slates from copies and Dictation—Monosyllables, and Sentences consisting of Monosyllables.

Arithmetic—To read and notate easy numbers as far as three places; to work sums in Addition—four addends; to add mentally numbers involving results not higher than 40; Tables to "4 times."

Singing—Simple Melodies by ear.

Scripture—Narratives and Moral Lessons.

Third Half-year of Enrolment.

Reading—1. (A.S.S.) Reader I, to the end; and Reader II, to Lesson 24. 2. (I.N.B.) Book II, Sections II and III.

Writing—On slates from copy.

Dictation—From Lessons read, using capitals.

Arithmetic—To read and notate numbers as far as four places; to work sums in Addition to six places, 6 lines; to perform easy mental operations in Addition and Subtraction; to know the Multiplication Tables to "7 times."

Singing—Simple Melodies by ear.

Scripture—Narratives and Moral Lessons.

Values of Subjects taught to First Class.

Reading (Reading, 80; Spelling and Meanings, 20).....	100
Writing	60
Dictation	60
Arithmetic (Notation, 20; Slate work, 60; Mental, 20)	100
Singing	30
Scripture Narratives and Moral Lessons	30

SECOND CLASS.

First Half-year of Enrolment.

Children enrolled one half-year, and being seven and a-half years old, must have completed the following course:—

Reading—One of the following books, or an authorized equivalent:—1. (A.S.S.) Reader II, to Lesson 70. 2. (I.N.B.) Book II, to the end.

Writing—On slates from copy; in copy-books—Round-hand, with capitals.

Dictation—8 lines from Lessons read.

Arithmetic—Notation as far as seven places—4 lines; Subtraction; Multiplication by two digits. Mental Arithmetic—More difficult operations in Addition and Subtraction. Multiplication Tables to "12 times."

Singing—Simple Melodies by ear. Scale Exercises on Modulator.

Scripture—(I.N.B.) Old Testament, No. 1, to the end of Lesson 6. Moral Lessons.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader II, to the end; and Reader III, to Lesson 25. 2. (I.N.B.) Sequel I, to the end; and Book III, to Lesson 25. Repetition from memory of 20 lines of Poetry.

Writing—On slates from copy. In copy-books—Half-text and Round-hand.

Dictation—8 lines from Lessons read.

Arithmetic—Notation to 9 places—5 lines; Multiplication in full; Division by 3 figures. Mental Arithmetic—Exercises in Simple Rules. Tables—Money, Weights and Measures.

Singing—Scale Exercises and Simple Melodies.

Scripture—Old Testament No. 1, to the end of Lesson 12. Moral Lessons.

Third Half-year of Enrolment.

Reading—1. (A.S.S.) Reader III, to the end. 2. (I.N.B.) Book III, to the end. Repetition from memory of 30 additional lines of Poetry.

Writing—In copy-books—Round-hand, Half-text, and Small-hand.

Dictation—8 lines from Lessons read.

Arithmetic—Notation; Long Division; Compound Addition; Subtraction; and Multiplication of Money by 2 figures. Mental Arithmetic—Prices of Dozens; Easy Exercises in Reduction.

Geography—To know the School locality and the Cardinal Points, and the names and positions of the Continents, Oceans, and chief divisions of Land and Water, marked on a Map of the World.

Grammar—To define the Noun, Pronoun, Adjective, and Verb, and to distinguish them in easy sentences.

Singing—Scale Exercises; Intervals; Two-part Songs.

Scripture—Old Testament, No. 1, to the end of Lesson 18. Moral Lessons.

Object Lessons should be given to the Second Class twice a week.

Values of Subjects taught to Second Class.

Reading (Reading, 80; Meaning, &c., 20)	100

THIRD

THIRD CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :—

- Reading*—One of the following books or an authorized equivalent :—1. (A.S.S.) Reader IV, to the end of Lesson 27. 2. (I.N.B.) Book IV, to Lesson 18, Section II. Repetition from memory of 40 lines of Poetry.
- Writing*—In copy-books—Round-hand, Half-text, and Small-hand.
- Dictation*—12 lines from the Reading Lessons, marking periods.
- Arithmetic*—All the Compound Rules and Reduction. Mental Arithmetic—Prices of dozens and scores.
- Grammar*—To distinguish readily all the Parts of Speech ; to know the Accidence of the Noun ; to be able to point out the Subject and Predicate ; and to construct Simple Sentences.
- Composition—To write a letter of not less than 12 lines.
- Geography*—To know the outlines of the Geography of Australia, Tasmania, and New Zealand ; and the Physical Geography of New South Wales and its Towns.
- Object Lessons*—On common Minerals, Vegetables, and Animals.
- English History*—To page 58, Nelson's "History of England for Junior Classes."
- Singing*—Two-part Songs, and Rounds in three parts ; Notation of Pitch ; Accent.
- Drawing*—Royal Drawing Book No. 7, and Miscellaneous Free-hand Exercises in straight line figures.
- Scripture Lessons*—(I.N.B.) Old Testament, No. 1, Lessons 1 to 23. New Testament, No. 1, Lessons 1 to 12.

Second Half-year of Enrolment.

- Reading*—1. (A.S.S.) Reader IV, to the end of Lesson 50. 2. (I.N.B.) Book IV, to the end of Section III. Repetition from memory of 40 additional lines of Poetry.
- Writing*—In copy-books, three hands.
- Dictation*—12 lines from the Reading Lessons, with proper punctuation.
- Arithmetic*—Vulgar Fractions—Addition and Subtraction ; Simple Proportion by First Principles. Mental Arithmetic—Questions in Buying and Selling, and easy questions in Proportion and Vulgar Fractions.
- Grammar*—Parsing of Simple Sentences, Accidence, and Analysis of Simple Sentences.
- Composition—To write a letter on paper of not less than 12 lines.
- Geography*—Europe—Physical Features and Chief Towns of each Country ; Tides, Winds, and Mapping.
- Object Lessons*—Elementary Lessons on the Human Frame and on the Laws of Health.
- English History*—Nelson's "History of England for Junior Classes," to page 84.
- Singing*—As in last half-year ; and also Length of Sound ; Double and Treble Measures ; Notation.
- Drawing*—Royal Drawing Book, No. 8, and Miscellaneous Free-hand Exercises in curved figures.
- Scripture Lessons*—Old Testament, No. 1, to the end. New Testament, No. 1, to Lesson 24.

Third Half-year of Enrolment.

- Reading*—1. (A.S.S.) Reader IV, to the end. 2. (I.N.B.) Book IV, to the end. Synonyms, Meanings, Derivations ; Repetition from memory of 50 additional lines of Poetry.
- Writing*—In copy-books, three hands.
- Dictation*—12 lines on paper, with correct spelling and punctuation.
- Arithmetic*—Vulgar and easy Decimal Fractions, Simple and Compound Proportion. Mental Arithmetic—exercises in the foregoing.
- Grammar*—Increased skill in Parsing and Analysis of Sentences, with a knowledge of the Rules of Syntax. Composition—description of places and events.
- Geography*—Asia—Physical Features and Chief Towns of each Country. Polynesia in outline ; Currents, Climate, Mapping.
- Object Lessons*—Elementary Physiology ; Important Manufactures.
- English History*—Nelson's "History for Junior Classes," to page 122. History of Australia—Sutherland's "History of Australia," Chapters I, II, and III.
- Singing*—Scale and Voice Exercises ; Two-part Songs from Notation ; Quadruple Measure ; Time Signatures ; Structure of the Scale.
- Drawing*—Royal Drawing Books, Nos. 9 and 10, with Miscellaneous Free-hand Exercises in figures of corresponding difficulty.
- Scripture Lessons*—Old Testament, No. 2, to Lesson 27. New Testament, No. 1, to the end.

Values of Subjects taught to Third Class.

Reading (Reading, 80 ; Meanings, &c., 20).....	100
Writing	50
Dictation	50
Arithmetic	100

History.....	60
Singing.....	30
Drawing	30
Scripture Lessons	30

NOTE.—Where there are not ten pupils to form a Fourth Class, the Standard prescribed for the First Half-year in the Fourth Class shall be that for the Fourth Half-year in the Third Class.

FOURTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :—

- Reading*—One of the following books or an authorized equivalent :—1. (A.S.S.) Reader V, to the end of Lesson 22. 2. (I.N.B.) 4th Supplement to page 63. Repetition from memory of 50 lines of Poetry.
- Writing*—On unruled paper, three hands ; Ornamental Writing ; Ordinary Commercial Forms.
- Dictation*—As in last half-year—12 lines on unruled paper.
- Arithmetic*—Practice ; Interest ; Mensuration of Surfaces. Mental Arithmetic as in last half year.
- Grammar*—Parsing passages from Reading Lessons ; Analysis of a Compound Sentences ; Framing Sentences ; Composition of Simple Essays.
- Geography*—North America—Physical Features and Chief Towns of each Country. South America, West Indian Islands, and Africa, in outline.
- Object Lessons*—As in previous half-year, with Light, Heat, and Air in relation to Health.
- History*—English History—Nelson's "History for Junior Classes" to page 155. History of Australia—Sutherland's, Chapters IV, V, and VI.
- Singing*—As before ; Sharpened and Flattened Sounds ; Transition ; Expression Marks.
- Drawing*—Royal Drawing Book, No. 11. Drawing from Wire Models—Cube and Cone.
- Scripture Lessons*—Old Testament (I.N.B.), No. 2, to end. New Testament (I.N.B.), No. 2, to Lesson 21.
- Euclid*—Definitions—Book I, Propositions I to VII.

Second

Second Half-year of Enrolment.

- Reading**—1. (A.S.S.) Reader V, to the end of Lesson 56. 2. (I.N.B.) 4th Supplement, to page 155.
 Repetition from memory of additional 50 lines.
Writing—As in last half-year.
Dictation—Selected passages and separate words from any portion of the books read, with punctuation.
Arithmetic—Compound Interest ; Discount ; Profit and Loss ; Mensuration of Surfaces.
Grammar—Accidence ; Parsing and Analysis generally ; Framing Sentences ; Simple Essays.
Geography—Physical—Ocean and Atmosphere.
Object Lessons—Elementary Physical Science.
History—English History—Nelson's Junior, to page 232. History of Australia—Sutherland's, Chapters VII, VIII, IX, and X.
Singing— { Staff Notation ; Sol-faing.
 { Key and Time ; Signatures fully ; Three-part Songs.
 { The Intervals fully.
Drawing—Royal Drawing Book, No. 12, Collins' Advanced Drawing Books, Nos. 1 and 2. **Drawing**
 from Wire Models—Prism and Pyramid.
Scripture Lessons—New Testament, No. 2, to end.
Euclid—Book I, to Proposition XXVI.

Values of Subjects taught to Fourth Class.

NOTE.—Where there are not ten pupils to form a Fifth Class, the Standard prescribed for the First Half-year in Fifth Class shall become that for the Third Half-year of the Fourth Class.

FIFTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :—

- Reading**—One of the following books, or an authorized equivalent :—1. (A.S.S.) Reader V, to the end of Lesson 114. 2. (I.N.B.) 4th Supplement, to page 275.
Writing—Ornamental, and three hands.
Dictation—On unruled paper—Difficult passages.
Arithmetic—The Full Course as treated in Hamblin Smith's Manual, or any equivalent. Mensuration—
 Todhunter's Mensuration for Beginners, to page 120.
Grammar—
Geography— } As prescribed for the Senior or Junior Public Examinations at the Sydney University.
History— }
Natural Science—Physics or Physiology. Physics—Balfour Stewart's Lessons in Elementary Physics.
 Physiology—Huxley's Lessons in Elementary Physiology.
Euclid—Books I and II, with Exercises.
Algebra—Todhunter's Algebra for Beginners, to Chapter IX.
Latin (for Boys)—Smith's "Principia Latina," to Exercise 21.
French (for Girls)—Schneider's "First Year's French Course," to Exercise 85, or an equivalent.
Drawing—Geometrical Drawing ; Royal, Vere Foster's, or Collins' Series. Collins' Advanced
 Drawing Books, Nos. 22 and 24. Drawing from Wire Models ; Hexagon, Pyramid, Cylinder, Flat
 Circle, and Square.
Music—Staff Notation, Major and Minor Modes ; Part Singing ; Consonant and Dissonant Intervals ;
 Inversions.
Scripture Lessons—As in Fourth Class.

Second Half-year of Enrolment.

- Reading**—1. (A.S.S.) Reader V, to the end. 2. (I.N.B.) 4th Supplement, to the end.
Writing— } As in last half-year.
Dictation— }
Arithmetic—As before. Mensuration—Todhunter's, to end.
Grammar—

NOTE.—Teacher's are required to see that the two Series of Reading Books specified are duly read by their Pupils.
Provisional

Provisional Schools.

135. The last preceding regulation, with all others respecting routine, discipline, and inspection, shall apply equally to Provisional as to other schools.

Special Religious Instruction.

136. No pupil is to be required to receive Special Religious Instruction if the parents or guardians of such pupil object to such religious instruction being given.

Denominational Books.

137. The teacher, in all schools under the superintendence of the Minister, shall see that the religious books employed in the classes for Special Religious Instruction are confined to the time and place of such instruction, and not left in the way of children whose parents may object to them.

Methods of Teaching.

138. Every teacher is required to make himself acquainted with improved methods of teaching, and to practice them in his school; and, as the efficiency of teachers will be judged of by the attainments, as well as the moral improvement of their pupils, *results*, as well as the mode of instruction should be kept in view.

Teaching power to be justly distributed.

139. Teachers are to provide for the equitable distribution of their time through all the Classes, so that the instruction of no pupil shall be neglected.

Persons visiting Schools.

140. Visitors shall have access to every school maintained or aided by the Minister, during the hours of Secular Instruction—not to take part in the business or interrupt it, but simply to observe how it is conducted.

Duty of Teachers to Visitors.

141. Every teacher is required to receive courteously visitors seeking to inspect his school, to afford them access to the schoolroom, and liberty to observe what books are in the hands of the children or on the desks, what tablets are on the walls, and what is the method of teaching; but teachers should not permit any person to interrupt the business of the school by asking questions of the children, examining classes, calling for papers, or in any way diverting attention from the usual business.

Official Visits.

142. The restriction expressed in the preceding rule, will, of course, not interfere with the provision in section 17 of the Public Instruction Act, whereby access is afforded to religious teachers for the purpose of communicating special religious instruction.

Visitors' Book.

143. Every teacher is required to have the visitors' book lying upon his desk, in which the visitors may enter their names, and, if they think proper, any remarks. Teachers are by no means to erase or alter any remark so made.

INSTRUCTIONS TO TEACHERS.

THE following Instructions, issued for the information and guidance of principal teachers of schools comprising two or more departments, and of mistresses of Girls' and Infants' Departments, are also to be acted upon as far as practicable by teachers generally.

I. INSTRUCTIONS RELATING TO PRINCIPAL TEACHERS ONLY.

1. The principal teacher will keep a teachers' time-book, and will see that all teachers enter therein the time of their arrival at and departure from school.
2. He will report to the Inspector all teachers absent from duty without leave, and any who are habitually unpunctual.
3. He will visit the other School Departments once a day at least, to ascertain that the Teachers are at their posts and are observing the time-tables. He will see that all documents required by the Regulations are exhibited in their proper places. It is not intended that he shall interfere with the teaching, the discipline, or the internal management of the other departments; nor is he at liberty to remove children therefrom to his own department without the sanction of the Inspector; but he is empowered to decide questions relating to the general order and routine of the entire school, subject to appeal to higher authority.
4. He will, with the concurrence and aid of the heads of departments, arrange for the regular cleaning of the schoolrooms, will see that the water-closets and all external premises are kept clean, and that the fences and gates are uninjured by the pupils. He will report promptly any damage done to the school buildings, as also any necessity for emptying the water-closets. If the water for the use of the pupils should become bad, the Inspector should be informed to that effect; and, in dry seasons, care is to be taken to prevent any persons, other than the pupils or the Teacher's family, from obtaining water from the school tanks or wells.
5. He will receive all letters addressed to teachers at the school, and deliver them to the owners as soon as convenient. At the same time he will impress upon Teachers that having private letters addressed to them at the school is an inconvenient arrangement, justified only by urgent circumstances. Letters intended for pupils, and non-official letters addressed to pupil-teachers, should be forwarded to the parents of the persons concerned.
6. Persons visiting the school, or calling upon teachers, should in the first instance be brought to the principal teacher.
7. He will receive and investigate complaints from parents and others. It is expected that he will attentively consider such complaints, that he will endeavour to ascertain whether they are well founded, and that he will afford the redress which their nature may require or suggest.
8. The principal teacher will register all children applying for admission to the school, and will determine the department for which they are fit.
9. Under the heading in the Annual Return, "Number of Scholars on the Records," pupils who have left, but who have subsequently been re-enrolled in the same school during the year, should only be counted once. A school with two or more departments is to furnish but *one* Annual Return, in which children transferred from one department to another during the year are only to be counted once.

II. INSTRUCTIONS RELATING ALIKE TO PRINCIPAL TEACHERS AND MISTRESSES OF DEPARTMENTS.

10. He will give vigilant attention to the ventilation and temperature of the rooms, and will especially avoid an excessive degree of heat. At each recess the doors and windows should be opened so as to secure an effectual change of air. Windows should be opened, where practicable, by lowering them from the top; and children must not be allowed to sit in a strong current of air.
11. He will note the methods employed and the discipline maintained by the several teachers under his immediate supervision, and will have power to interfere whenever he may consider either to be defective.
12. He will arrange his classes; if four or more, in sections, each section to contain two or three classes; and will place in charge of each section an assistant teacher, who, when the staff admits, will be aided by a pupil-teacher.

13. When a subordinate Teacher relinquishes the charge of a class or section, it should be examined by the Head of the Department in the presence of the outgoing Teacher and his successor. A record of the condition of the class or section, as elicited by such examination, should be entered in the Lesson Register, and be attested by the signatures of all the persons concerned.

14. A similar course should be followed with respect to the materials used by the class or section in charge of the outgoing Teacher.

15. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

16. Corporal punishment must not be inflicted except by the Head of the Department, or—under his direction and responsibility—by an Assistant Teacher. Pupil-teachers are, under no circumstances, to be permitted to inflict corporal punishment. Careful attention must be paid to the Regulation which provides that corporal punishment “should be restricted as much as possible to extreme cases.” The frequent infliction of such punishment will be regarded as evidence of a Teacher’s want of disciplinary power. The boxing of pupils’ ears is strictly forbidden, as is also the infliction of corporal punishment upon female pupils twelve years of age and over. It must be distinctly understood that *all* cases of corporal punishment are to be recorded at the time the punishment is inflicted. A book for that purpose may be obtained by requisition in the usual way, and should be preserved in the Department.

17. Pupils shall not be detained in School for study or for punishment during any part of the forenoon recess.

18. During recesses, the Teacher will make the necessary arrangements for the proper oversight of the playground. It is competent for the Head of a School or of a Department, the staff of which contains more than one Teacher, to so arrange that each half of the staff shall be relieved of playground supervision during an equal portion of the recess for dinner. Principal Teachers and Mistresses of Departments must undertake playground duty equally with the other Teachers.

19. He will construct Programmes of Lessons for classes in his department taught by Pupil-teachers, and will decide upon the suitability of those framed by Assistant Teachers. His signature is to be attached to these documents, in evidence that they have been examined by him and have received his approval.

20. He will devote a portion of his time weekly to the instruction of each class in his department.

21. He will examine each class in his department at least once a month, and will record the results, note the defects, and enter suggestions for their remedy in a book kept for the purpose. Such entries should be signed by himself and the teacher of the class.

22. He will be responsible for the progress of all children in his department, and for the condition of the department in all other matters, excepting those points of organization for which he cannot reasonably be held accountable.

23. He will devote at least one hour daily to the instruction of pupil-teachers, and will see that *all* the prescribed subjects are duly studied by them. Suitable programmes are to be prepared, and a Register is to be kept showing (a) the time of commencing the daily lesson and the time at which it was concluded, (b) the exercise or home-lesson appointed for the day. It must be clearly understood that mistresses of departments are to perform a fair share of the work of instructing pupil-teachers.

24. He will be responsible for posting Quarterly Returns on the Saturdays preceding the Mid-winter and Christmas vacations; and, in other cases, on the last Saturdays of the months of March and September. In country places where no post leaves on Saturday or the preceding Friday evening, the Returns must be sent, without fail, by the first subsequent opportunity.

25. In making application for increased assistance, he will give attention to the following rules, by which the numerical strength of teaching staffs is regulated:—

In a mixed school, or in a separate boys’ or girls’ department, having an average attendance of—

50 pupils, the staff may consist of Teacher and Pupil-teacher.

80 to 110 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

110 to 140 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.

140 to 180 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

180 to 220 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.

220 to 270 pupils, the staff may consist of Teacher, 2 Assistants, and 2 Pupil-teachers.

270 to 310 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.

310 to 350 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

350 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 4 Pupil-teachers.

400 to 450 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.

450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

In every separate Infants’ Department having an average attendance of—

60 pupils, the staff may consist of Teacher and a Pupil-teacher.

100 to 120 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

120 to 160 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.

160 to 200 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

200 to 240 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.

240 to 300 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.

300 to 340 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

340 to 380 pupils, the staff may consist of Teacher, 2 Assistants, and 5 Pupil-teachers.

380 to 440 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.

440 to 480 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

480 to 550 pupils, the staff may consist of Teacher, 3 Assistants, and 7 Pupil-teachers.

26 Principal Teachers and Mistresses of Departments are empowered to grant leave of absence to Assistants and Pupil-teachers employed under their supervision, respectively, for a period not exceeding one day, subject to the conditions stated in paragraph 3 of the rules regulating leave of absence. It must, however, be distinctly understood that such leave of absence can only be granted in cases where the necessity for it is clearly shown. In forwarding applications for leave of absence for more than one day, the Principal Teacher or Mistress of a Department, will state thereon the arrangements proposed for the performance of the duties of those applying; will express an opinion as to whether such arrangements are satisfactory; and will state what previous leave has been granted, and on what terms, during the past twelve months. Applications for sick leave for three or more days should be accompanied by medical certificates.

27. All correspondence and returns (except those relating to fees) should be sent to the Inspector under whose immediate supervision the school is placed. Salary abstracts should be sent direct to the accountant.

28. Teachers of all ranks are required to abstain from public discussions on political or religious topics, and from public controversy upon the merits of the system of education now in force, as also from acting as local preachers, lay readers, or local correspondents of newspapers.

29. No sectarian or denominational publications of any kind whatsoever shall be used in school, nor shall any denominational or sectarian doctrines be inculcated.

30. It shall be the duty of all teachers to impress on the minds of their pupils the principles of morality, truth, justice, and patriotism; to teach them to avoid idleness, profanity, and falsehood; to instruct them in the principles of a free Government; and to train them up to a true comprehension of the rights, duties, and dignity of citizenship.

PUBLIC INSTRUCTION ACT OF 1880: AMENDED REGULATIONS AS TO TRAINING,
EXAMINATION, AND CLASSIFICATION OF TEACHERS.

Department of Public Instruction, Sydney, 25th September, 1888.

HIS EXCELLENCY the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended Regulations, in substitution for those relating to the Training, Examination, and Classification of Teachers, of date 12th February, 1886.

JAMES INGLIS.

Examination and Classification.

74. The attainments of Teachers, Students of the Training Schools, and Candidates for employment as Teachers, will be tested by written and oral examinations, and their skill in teaching will be determined by their ability to manage a school or class; and, according to such attainments and skill they will be classified in the following grades:—The First, or highest class, will have three grades, distinguished as A with Honors, A (without Honors), and B; the Second Class will have three grades, distinguished as A with Honors, A (without Honors), and B; and the Third Class will have three grades, distinguished as A, B, and C. A classification awarded to a Teacher, a Student of the Training School, or a Candidate for employment, after his first successful examination, will be provisional only, and will be confirmed at the end of three years from the date of examination if the Inspectors' reports upon his school work be fully satisfactory: Provided that the classification of any Teacher in the School Service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification.

Assistant teachers.

80. Assistant teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for four years at least as a pupil-teacher, or (b) persons who have been examined and classified.

Pupil-teachers.

81. Pupil-teachers may be employed to serve not less than four years in any school in which the average attendance has been not less than fifty for the three months preceding; provided that the teacher holds a classification not lower than Class II.

SUBJECTS OF EXAMINATION FOR TEACHERS AND PUPIL-TEACHERS.

84. The subjects in which teachers, students of Training Schools, and pupil-teachers shall be examined for classification are those stated hereunder.

FOR A THIRD-CLASS CERTIFICATE.

- Reading*—Full value, 800 marks. Prose and Poetry.
Writing—Full value, 800 marks. Specimens of Copy-setting in round hand, half-text, and small hand.
Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.
Text Books—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
Grammar—Full value, 1,000 marks. Including Punctuation, Paraphrasing, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, Dictation and Composition.
Text Books—M'Leod's Grammar, and Laurie's Composition.
Geography—Full value, 1,000 marks. Europe and Australia in detail. Mapping in connection with those Continents.
Text Books—Hughes' Class Book of Geography, Geography of New South Wales (Wilkins').
History—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important Events. General sketch of Australian History.
Text Books—Nelson's Royal History of England, Sutherland's History of Australia.
School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.
Text Books—Gladman's School Method, Public Instruction Act and Regulations.
Domestic Economy—(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.
Text Book—Hassall's Domestic Economy.
Drawing—Full value, 500 marks. Black-board, Freehand.
Text Books—As prescribed in the Standard of Proficiency.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

FOR A SECOND-CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry from any English Reading Book.
Writing—Full value, 500 marks. Specimens of Copy-lines, Letter-writing, Ornamental Writing.
Arithmetic—Full value, 1,000 marks. The full Course, with Elementary Mensuration.
Text Books—Barnard Smith's Arithmetic, Hamblin Smith's Arithmetic, Todhunter's Mensuration (for Males, Chap. I to XX inclusive. For Females, Chap. I to XIII inclusive).
Grammar—Full value, 1,000 marks. Including Spelling, Punctuation, Parsing, Paraphrasing, Meaning and uses of Words, Etymology and Analysis.
Text Books—Hunter's Grammar, Lennie's Grammar (revised), Morell's Grammar and Analysis.
Subject for Special Study—"Julius Cæsar."—(Shakespeare).
Geography—Full value, 800 marks. Physical Geography, Europe, Australasia, and North America, in detail. Mapping within these limits.
Text Books—W. Hughes' Class Book of Geography, and Edward Hughes' Physical Geography, or Geikie's Physical Geography.

History

History and English Literature—Full value, 700 marks.

History— { British History, from the Conquest to the present times;
 } Australian History.

Literature—Elizabeth to Cromwell inclusive.

Text Books—Nelson's Royal History.
 Sutherland's History of Australia.

Smith's Smaller History of English Literature.

Art of Teaching—Full value, 500 marks. Organization, Discipline, Method, and Instruction of Schools in greater detail.

Text Books—Gladman's School Method.
 Public Instruction Act and Regulations.

Sanitary Science (Female Teachers only)—Full value, 500 marks.

Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. Geometrical and Model Drawing.

Text Books—Nesbit and Brown's Handbook of Model and Object Drawing.

Rawle's Practical Plane Geometry.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.

Text Books—Curwen's Standard Course, or
 Sutton's Theory of Music.

* *Alternative Groups for Males.*

Group I.

Euclid—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.

Algebra—Full value, 1,000 marks. To Quadratic Equations, including Surds.

Text Books—Hamblin Smith's Algebra.
 Todhunter's Euclid.

Group II.

Latin—Full value, 2,000 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I to IV inclusive.

Text Books—Dr. Smith's Smaller Latin Grammar. "Principia Latina," Part I; and Ihne's Latin Syntax, Part I.

* *Alternative Groups for Females.*

Group I.

French—Full value, 1,500 marks. Grammar, Composition. Translation from an easy author.

Text Books—Voltaire's Charles XII. Books I to IV inclusive.

Havet's French Class Book (complete), or
Hallard's French Grammar.

Group II.

Latin—Full value, 1,500 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I, II.

Text Books—As for Males.

Group III.

Euclid—Full value, 750 marks. Books I and II, with easy Deductions on them.

Text Books—As for Males.

Algebra—Full value, 750 marks. To Quadratics, omitting Surds.

Text Books—As for Males.

Group IV.

Any two of the following Sciences:—

Experimental Physics—Full value, 750 marks.

Text Book—Balfour Stewart's Lessons on Elementary Physics.

Chemistry—Full value, 750 marks. Inorganic.

Text Book—Roscoe's Lessons in Elementary Chemistry.

Geology—Full value, 750 marks.

Text Book—Lyell's Student's Elements of Geology.

Zoology—Full value, 750 marks.

Text Book—Huxley's Lessons in Elementary Zoology.

Botany—Full value, 750 marks.

Text Book—Oliver's Lessons in Elementary Botany.

Physiology—Full value, 750 marks.

Text Book—Huxley's Lessons in Elementary Physiology.

FOR A FIRST-CLASS CERTIFICATE.

Reading—Full value, 500 marks. Prose and Poetry from a standard author.

Writing—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing, Principles of Writing.

Arithmetic—Full value, 1,000 marks. The whole theory and practice.

Text Books—Hamblin Smith's Arithmetic.

Barnard Smith's Arithmetic.

Colenso's Arithmetic (as revised by Hunter).

Todhunter's Mensuration (for Males only).

Grammar—Full value, 1,000 marks. Including Orthography, Punctuation, Parsing, Paraphrasing, Analysis, Composition, Etymology, Prosody, and Style.

Text Books—Mason's English Grammar.

Bain's Higher English Grammar.

Meiklejohn's Book of English.

Geography—Full value, 800 marks. Physical Geography.

Astronomical Geography.

Text Books—Geikie's Physical Geography.

Lockyer's Astronomy.

Art of Teaching—Full value, 700 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.

Text Books—Gladman's School Method.

Tate's Philosophy of Education, or

Morell's Mental Philosophy.

Sanitary Science—(Female Teachers only)—Full value, 500 marks.

Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. The full D Certificate.

Text Book—Dennis' Perspective.

Vocal

* NOTE.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

- Vocal Music**—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.
- History**—Full value, 700 marks. History of England in detail. History of Australia.
Text Books—Smith's Student's Hume.
 Creasy on the English Constitution. Chapters 10, 11, 15, 16.
 Sutherland's History of Australia.
- English Literature**—Full value, 800 marks. Elizabeth to Anne.
Text Book—Morley's English Literature. Chapters VII to XI inclusive.
For Special Study—Shakespeare's "Merchant of Venice."
 Milton's "Paradise Lost." Book I.
 Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159,
 165, 409, 458, 487.
 Bacon's Essays, 6, Blackie's edition, Civil and Moral.

Alternative Groups for Males.

Group I.

- Algebra**—Full value, 1,000 marks. Including the Binomial Theorem.
Text Books—Colenso's Algebra, or
 Hamblin Smith's Algebra.
- Euclid**—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—Potts' Euclid, or
 Todhunter's Euclid.
- Plane Trigonometry**—Full value, 1,000 marks.
Text Books—Todhunter's Trigonometry for Schools and Colleges, or
 Hamblin Smith's Trigonometry.

*Group II.

- Latin**—Full value, 2,000 marks. Virgil, first two Books of *Æneid*; Livy, Book 21. Questions on Grammar. Composition.
Text Books—Dr. Smith's Larger Latin Grammar.
 Abbott's Latin Prose Composition.
 Ihne's Latin Syntax.
- Greek**—Full value 1,000 marks.
Text Books—Xenophon's "Anabasis." Books I and II.
 Smith's Larger Greek Grammar.
 Abbott's Greek Prose Composition.
- French**—Full value, 1,000 marks. Grammar, Translation, Composition.
Text Books—Souvestre's "Un Philosophe sous les Toits."
 Racine's "Athalie."
 Havel's French Grammar.
 Hallard's French Grammar.
- German**—Full value, 1,000 marks. Grammar, Translation, Composition.
Text Books—Schiller's "History of the Thirty Years' War," Chapters I to IV.
 Goethe's "Faust."
 Otto's German Grammar.

* NOTE.—In this group at least two languages must be taken, one of them being Latin.

† Group III.

- Natural Science**—Full value, 750 marks. Experimental Physics.
Text Book—Ganot's Physics.
- Chemistry**—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Class Book of Elementary Chemistry (Macmillan).
- Geology**—Full value, 750 marks.
Text Book—Jukes' or Geikie's Geology.
- Zoology**—Full value, 750 marks.
Text Book—Huxley's Zoology.
- Botany**—Full value, 750 marks.
Text Book—Oliver's Manual of Botany.
- Physiology**—Full value, 750 marks.
Text Book—Huxley's Physiology.
- Sanitary Science**—Full value, 750 marks.
Text Book—Wilson's Handbook of Hygiene.

† NOTE.—Any four of these Sciences may be taken

Group IV.

- Euclid**—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
- Algebra**—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.
- Latin**—Full value, 1,000 marks. *Cæsar, De Bello Gallico*. First two books.
 Virgil's *Æneid*. Book I.
Text Books—As in Group II.

Group V.

- Euclid**—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
- Algebra**—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.
- And any two Sciences of the Science Group already specified in Group III. Full value 1,000 marks.

Group VI.

- Latin**—Full value, 2,000 marks. Virgil's *Æneid*. Books I, II.
 Livy. Book XXI.
 Horace's Odes. Books I, II.
 Grammar and Composition.
Text Books—As in Group II.
- Together with any two of the following Sciences, namely, Chemistry, Physics, Physiology, Geology,
 Full value 1,000 marks.
Text Books—As in Group III.

Alternative

Alternative Groups for Females.

Group I.

French—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—Souvestre's "Un Philosophe sous les Toits."
 Corneille's "Le Cid."
 Racine's "Athalie."
 Havet's French Grammar.
 Hallard's French Grammar.

Group II.

German—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group III.

Latin—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group IV.

Euclid—Full value, 800 marks. Books I to IV, with Deductions.
Text Books—As for Males.
Algebra—Full value, 700 marks. To Quadratic Equations inclusive.
Text Books—As for Males.

Group V.

Any three of the following Sciences :—

Experimental Physics—Full value, 500 marks.
Chemistry—Full value, 500 marks.
Geology—Full value, 500 marks.
Zoology—Full value, 500 marks.
Botany—Full value, 500 marks.
Physiology—Full value, 500 marks.
Text Books—As for Males of First Class.

NOTE.—In lieu of the Alternative Subjects of examination herein prescribed for a Second-class or a First-class Certificate, the subjects of the Sydney University Arts' Course (as set forth in the by-laws and annually published in the Calendar) will be taken up in the Training Schools by those students who have passed the University Matriculation examination and who may desire to compete, in subsequent University examinations, for the special privilege of remaining a third year in Training and proceeding to the final examination for the B.A. degree.

SUBJECTS OF STUDY FOR PUPIL-TEACHERS.

Before Appointment—*Candidates.*

Reading—Full value, 50 marks. To Read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to Spell well, and to understand the meaning of the passage read.
Writing—Full value, 50 marks. To write from Dictation, in a neat hand, a simple Prose Narrative, with correct spelling and punctuation.
Dictation—Full value, 100 marks.
Arithmetic—Full value, 100 marks. To know the Arithmetical Tables, and to work the rules in Vulgar Fractions, Proportion, and Practice, as in Barnard Smith's Arithmetic.
Grammar—Full value, 100 marks. To Parse and Analyse correctly a passage taken from an ordinary Class-book; to know the Elements of Grammar.
Geography—Full value 100 marks. To understand the Geographical Terms, to be acquainted with the Map of the World, and to have a knowledge of the Geography of Australia.
Drawing—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of Proficiency.
Vocal Music—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.
Skill in Teaching—To Teach a Junior Class in the presence of an Inspector.

Pupil-teachers—Class IV.

Reading—Full value, 50 marks. To Read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter; to repeat from memory 50 lines of Poetry.
Writing—Full value, 50 marks. To write neatly and correctly from Dictation or from Memory.
Dictation—Full value, 50 marks.
Arithmetic—Full value, 100 marks. To work Questions in Proportion, Vulgar and Decimal Fractions, and Practice.
Text Book—Barnard Smith's Arithmetic.
Grammar—Full value, 100 marks. To Parse, Paraphrase, and Analyse a Passage; Meanings of Words; Etymology.
Text Books—Lennie's Grammar (revised).
 Laurie's Spelling and Dictation Class Book.
Geography—Full value, 80 marks. New South Wales, in detail; Europe. The Physical Features and Chief Towns in each Country.
Text Books—Wilkins' Geography of New South Wales.
 Hughes' Class Book of Geography.
History—Full value, 70 marks. English History to William I.
Text Book—Nelson's Royal History of England.
 Australian History—Sutherland's. Chaps. I to V.
Drawing—Full value, 50 marks. Black-board Practice.
Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. I to VIII.
Geometry (for Males)—Full value, 100 marks. Euclid. Book I. Propositions I to XXVI.
Text Book—Todhunter's Geometry.
Algebra (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chaps. I to V inclusive.
Latin (for Males)—Full value, 100 marks. Smith's "Principia Latina" to Exercise XXIV inclusive.
 **French* (for Females)—Full value, 100 marks. De Fivas' "Grammaire des Grammaires," to Exercise XXX inclusive.
School Management—Full value, 50 marks. The Kindergarten Principle (Lyschinska). Gladman's School Method.
Needlework (for Females)—Full value, 50 marks. *Pupil-teachers*

* NOTE.—From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question :—

$$\left. \begin{array}{l} \textit{Latin, or} \\ \textit{Euclid and} \\ \textit{Algebra.} \end{array} \right\} \text{As for Males.}$$

Pupil-teachers—Class III.

- Reading*—Full value, 50 marks. To read with improved intonation and expression.
Writing—Full value, 50 marks. Specimens of Penmanship; three hands.
Arithmetic—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.
Grammar—Full value, 100 marks. Parsing of Difficult Sentences, with a good knowledge of Syntax, and the Analysis of Sentences; Meanings of Words; Force of Affixes; Latin Roots; Composition.
Text Book—Lennie's Grammar (revised).
Geography—Full value, 80 marks. Australia; Polynesia.
 Mapping, confined within these limits.
Text Books—Collins' Geography of Australia and Pacific Ocean.
 Collins' Australian and Primary Atlas.
History—Full value, 70 marks. English History: William I to Richard III inclusive.
 Australian History—Sutherland's. Chaps. VI to X.
Text Books—Nelson's Royal History of England.
 Sutherland's History of Australia.
Drawing—Full value, 50 marks. Freehand Drawing.
Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. IX to XII inclusive.
Geometry—Full value, 100 marks. Euclid. Book I.
Algebra—Full value, 100 marks. Fractions and Simple Equations, to Chap. XIV inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XXXIII.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise LX. (See note*, Fourth Class Pupil-teachers).
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
Needlework (for Females)—Full value, 50 marks.

Pupil-teachers—Class II.

- Reading*—Full value, 50 marks. A standard author, with correct intonation and emphasis.
Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.
Arithmetic—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
Grammar—Full value, 100 marks. Increased skill in Parsing, Paraphrasing, and in the Analysis of Sentences; Meanings of Words; Affixes; Roots; Composition.
Text Book—Hunter's Grammar.
Geography—Full value, 80 marks. Asia: Physical Features and Chief Towns of each Country of Asia and North America.
 Physical Geography: Waves, Tides, Currents.
History—Full value, 70 marks. English History: Henry VII to Anne, inclusive.
 Australian History—Sutherland's. Chapters XI to XVI.
Drawing—Full value, 50 marks. Model Drawing.
Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chaps. XIII to XV inclusive.
Geometry—Full value, 100 marks. Books I and II, with Deductions in Book I.
Algebra—Full value, 100 marks. Simple Equations and Surds, to Chapter XXIV inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XLVIII.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise XC. (See note*, Fourth Class Pupil-teachers).
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
Needlework (for Females)—Full value, 50 marks.

Pupil-teachers—Class I.

- Reading*—Full value, 50 marks. To read with ease and expression from a standard author.
Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.
Arithmetic—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.
Text Books—Barnard Smith's Arithmetic.
 Todhunter's Mensuration.
Grammar—Full value, 100 marks. Parsing, Paraphrasing, Prosody, Analysis of Sentences, Meanings of Words, Formation of Words, Derivations, Composition.
Text Book—Hunter's Grammar.
Geography—Full value, 80 marks. Physical Geography. Physical Features and Chief Towns of each of the Countries of Africa and South America.
 Mapping within these limits.
History—Full value, 70 marks. English History: George I to present time. Australian History—Sutherland's. Chapters XVII to XXII.
Drawing—Full value, 50 marks. Advanced proficiency expected in the three sections.
Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chaps. XVI to end.
Geometry—Full value, 100 marks. Books I and II, with Deductions.
Algebra—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to end. Caesar, De Bello Gallico. Chaps. I to III. Easy translations.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to the end. (See note*, Fourth Class Pupil-teachers).
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
Needlework (for Females)—Full value, 50 marks.

NOTE.—The course herein prescribed is for all pupil-teachers alike. It is recommended, however, that the Sydney University Matriculation subjects (as set forth in the by-laws and annually published in the Calendar) be also studied by those pupil-teachers who may desire or intend, after admission to the Training School, to present themselves at the Matriculation examination and to compete, in subsequent University examinations, for the privilege of remaining three years in training and proceeding to the final examination for the B.A. degree.

Examinations.

85. Examinations of teachers will be held yearly in each Inspector's District. Teachers who desire to be examined, with a view to a higher certificate, must at least one month before the date of examination apprise the Inspector of their wish, and furnish him with a list of the alternative subjects upon which they are prepared for examination.

Eligibility

* NOTE.—From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question:—

*Latin, or
 English and
 Algebra.* } As for Males.

Eligibility of Teachers for appointment to certain Schools.

90. Teachers who have gained their classifications by examination, or by promotion under Regulation 86, shall be eligible for appointment to any school or department, in accordance with the following Schedule :—

Class of Schools or Department.	Teacher's Classification.
I	I A. with Honors, or I A.
II	I B.
III	II A. with Honors.
IV	II A.
V	II B.
VI	II B.
VII	III A.
VIII	III B.
IX	III C.
X	III C.

TRAINING SCHOOLS.

Classes of Candidates.

97. The Minister may authorize to be received into the Training Schools, annually, three classes of candidates, namely, *First Class, or Scholarship Candidates*—Thirty pupil-teachers whose term of service has expired and who have obtained the highest marks among those passing the entrance examination successfully; *Second Class, or Half-scholarship Candidates*—Twenty pupil-teachers whose term of service has expired and who have obtained, after the first 30, the next highest marks among those passing the entrance examination successfully, and are prepared to pay half the cost of their maintenance while in training; *Third Class, or Non-scholarship Candidates*—Other Pupil-teachers whose term of service has expired, untrained teachers who have had charge of schools, and persons entering the Teaching profession for the first time, who have passed the entrance examination successfully and are prepared to pay the whole cost of their maintenance while in training.

Conditions of Admission.

99. Before admission, every candidate must make a declaration that he intends, in good faith, to follow the profession of a teacher in schools under the Minister, and that he will accept a situation in any district, as the Minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training defrayed by the State will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than a period to be agreed upon at the time of his admission to training.

Term of Training.

100. Entrance examinations will be held yearly, in December; and the period of training will be one year, two years, or three years, as may be found expedient.

Allowances during Training.

101. The following allowances may be made to students who satisfy the aforementioned conditions and pass successfully the prescribed examinations :—To Scholarship Students, £6 per month; and to Half-scholarship Students, £3 per month. When the school is prepared to receive students into residence, these allowances are not paid; board and lodging being provided instead.

Examinations.

103. Oral examinations of the students will be held periodically to test their attention and progress; and written examinations will take place yearly, in December—when classifications will be awarded according to attainments and teaching skill to students who have completed their course. No certificate will be given until the Inspector's Report shows that the student is successful in the management of a school.

E & O E.

Department of Public Instruction,
18th February, 1889.

J. GIBSON,
Accountant.

1889.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF TRUSTEES FOR THE YEAR 1888.)

Presented to Parliament pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this their thirty-fifth Annual Report.

1. The hours during which the Museum is open to the public have continued to be, as in previous years, from 10 o'clock until 5 o'clock (or in summer till 6 o'clock) daily, except on Sundays, when the hours are from 2 o'clock only till 5, and on Mondays, when it is closed for the necessary purposes of cleaning. The record of the number of visitors in 1888 shows an increase over the previous year, the total number being 128,365, as against 122,799 in 1887. The largest attendance on one day was 2,160, namely, on Thursday, 26th January; and the largest Sunday attendance was 1,058, on 8th January. The average daily number throughout the year was 332 on week-days and 756 on Sundays. The orderly conduct of the visitors on all these occasions, and the more than ordinary interest taken by a large portion of them in the exhibits, afford gratifying evidence of their value as affording not merely amusement, but also useful instruction.

2. The collections are still being increased, by Purchases, Exchanges, and Donations, and also by our Collectors. A list of these additions, under their respective heads, with a report by the Curator, will be found in the Appendices. An expedition, under the charge of Messrs. Cairn and Grant, to the Western Districts of the Colony was not very successful on account of the drought, but it resulted in obtaining for the Museum many specimens of Mammals and Birds, and other desiderata required for replacement of exhibits sent to the Adelaide and Melbourne Exhibitions and for exchanges with other Museums and kindred societies. A list of the most important of these will be found among the Appendices. Mr. Etheridge, our Palæontologist, visited the Limestone Caves at Cave Flat, junction of the Murrumbidgee and Goodradigbee Rivers, on behalf of the Museum, and obtained much interesting information. His report is published as an appendix. At the request of the New South Wales Commissioners for the Melbourne International Exhibition, we supplied to them a collection of natural history exhibits illustrative of the fauna of this Colony, and we also sent to them some relics of Captain Cook and implements of the Aborigines.

3. The Ethnological Hall has been opened to the public during the greater part of the year, and has proved, as anticipated, to be not the least interesting portion of the Museum.

4. The officers of the Institution are still suffering much inconvenience, and their work is in no small degree retarded, by the want of the additional accommodation which has been so long promised. We are glad to report, however, Parliament having voted to a considerable extent the necessary funds, that plans for the authorized works are in preparation; and we hope that considerable progress will be made with these alterations and additions during the current year. In the meantime the Curator has in anticipation vacated the rooms hitherto occupied by him; Parliament having made provision for his accommodation elsewhere.

46—A

[1553 copies—Approximate Cost of Printing (labour and material), £49 16s. 0d.]

5.

5. The following publications have been issued during the year :—

Catalogue of Fishes. Part I. Recent Palæichthian Fishes ; by J. Douglas Ogilby.
Catalogue of Sponges ; by R. Von Lendenfeld.

The following works are in the Press, and will shortly be issued, while others are in preparation :—

Catalogue of Australian Birds' Nests and Eggs ; by A. J. North.

Catalogue of Shells ; by J. Brazier.

Report on Lord Howe Island ; edited by the Curator and Mr. R. Etheridge, with special papers by the Scientific staff.

Guide to the Museum.

6. Annexed to this Report are the following Appendices .—

- I.—Annual Balance-sheet.
- II.—Attendance of Visitors.
- III.—Attendance of the Trustees.
- IV.—Acquisitions by Collection and Purchase.
- V.—Donations.
- VI.—Exchanges.
- VII.—Reports of Assistants.
- VIII.—Additions to the Library.
- IX.—Report on the Limestone Caves.
- X.—Publications of the Australian Museum.

The Common Seal of the Museum is affixed by order of the Board, this
11th day of February, 1889.

S. SINCLAIR,
Secretary.

ALFRED STEPHEN, (L.S.)
Crown Trustee and Chairman.

Examined and found correct, 16th January, 1889.

JAMES NORTON.
J. BELISARIO.

APPENDIX II.

ATTENDANCE OF VISITORS DURING 1888.

	Week-days.	Sundays.	Totals.
January	14,594	4,806	19,400
February	6,844	2,840	9,684
March	5,731	2,866	8,597
April	6,925	3,840	10,765
May	8,627	2,333	10,960
June	7,214	3,400	10,614
July	5,855	4,055	9,910
August	5,782	3,458	9,240
September	5,421	3,364	8,785
October	7,235	2,332	9,567
November	6,759	2,651	9,410
December	8,041	3,392	11,433
Total for the year 1888...	89,028	39,337	128,365
Total for 1887	85,931	36,868	122,799

APPENDIX III.

ATTENDANCE OF THE TRUSTEES DURING 1837.

Crown Trustee.

The Honorable Sir Alfred Stephen, G.C.M.G., C.B., M.L.C. ... 4

Official Trustees.

His Honor the Chief Justice 0
 The Honorable the Colonial Secretary 0
 The Honorable the Attorney-General 0
 The Honorable the Colonial Treasurer 0
 The Auditor-General 7
 The Collector of Customs 0
 The Surveyor-General 8
 The Colonial Architect 0
 The President of the Medical Board 11

Elective Trustees.

J. C. Cox, Esq., M.D., F.L.S. 12
 J. Belisario, Esq., D.D.S. 3
 A. Liversidge, Esq., F.R.S. 4
 The Honorable Jas. Norton, M.L.C. 9
 Sir Alfred Roberts, M.R.C.S., Knt. 6
 H. H. B. Bradley, Esq. 9
 Robert Hunt, Esq., C.M.G. 14
 Charles Moore, Esq., F.L.S. 8
 C. S. Wilkinson, Esq., F.G.S. 3
 The Honorable P. G. King, M.L.C. 5
 W. J. Stephens, Esq., M.A. 3
 W. D. Campbell Williams, Esq., L.R.C.P., London, &c. ... 12
 Number of Board Meetings during the year 17

APPENDIX IV.

ACQUISITIONS BY PURCHASE AND COLLECTION.

Mammalia:—17 species; 66 specimens collected. 35 species; 69 specimens purchased.
 Aves:—158 species; 603 specimens collected. 91 species; 201 specimens purchased. 9 species;
 77 specimens nests and eggs purchased.
 Reptilia:—20 species; 53 specimens collected. 29 species; 29 specimens purchased.
 Pisces:—129 species; 301 specimens collected. 89 species; 140 specimens purchased.
 Mollusca:—10 species; 35 specimens purchased.
 Insecta.—338 specimens purchased. One or two small collections collected.
 Fossils:—111 species; 459 specimens collected. 56 species; 227 specimens purchased.
 Minerals:—494 specimens purchased.
 Ethnological specimens purchased:—

	Specimens.		Specimens
Queensland	152	Savage Island	1
German New Guinea	123	Mortlock Island	15
British New Guinea	30	Stewart Island	7
New Guinea	6	Greenwich Island	8
New Britain	11	French Island	7
Viti or Fiji Islands	5	Sir Chas. Hardy Island	2
Solomon Islands	21	Mortlock Island, Carolines	10
New Ireland	9	O'Brien Island	8
New Hebrides	21		
New Zealand	149		632
New South Wales	47		

APPENDIX V.

Donations.	Presented by—
<i>Reptiles—continued.</i>	
1 Diemenia, sp. ...	Mr. Boyer Bower.
1 Psuedechis porphyriacus ...	Mr. G. Carlyle.
2 Morelia variegata ...	Mr. Church.
2 Hoplocephalus curtus ...	Mrs. Chandler.
1 Gymnodactylus miliusii ...	} Mr. R. W. Cox.
1 Vermicella annulata ...	
1 Tiliqua gigas ...	Dr. J. Cox.
1 Lialis burtonii ...	Mr. A. Denning.
4 Eggs of Varanus varius ...	Mr. T. Dobson.
1 Hoplocephalus curtus ...	Mr. A. Ferguson.
1 Brachysoma diadema ...	Mr. A. E. Flavelle.
1 Typhlops nigrescens ...	Rev. W. S. Frackleton.
1 Hoplocephalus signatus ...	Mr. P. Goneolf.
1 Tiliqua gigas ...	Mrs. M. Hall.
1 Acanthopphis antarctica ...	} Mr. J. G. Hunter.
1 Hoplocephalus stephensii ...	
1 Gymnodactylus platurus ...	Mr. W. Jarman.
1 Trachysaurus rugosus ...	Hon. G. P. King.
1 Vermicella annulata ...	Hon. C. Kroetzsch.
2 Lygosoma lichenigerum ...	Mr. J. Langley.
1 Hoplocephalus curtus ...	} Mr. H. J. McCooley.
1 " ramsayi ...	
1 Diemenia superciliosa ...	} Mrs. McFail.
1 Typhlops rueppellii ...	
1 Vermicella annulata ...	
2 Diplodactylus vittatus ...	} Mr. J. Mitchell.
1 Egernia, sp. (with young) ...	
1 Lygosoma, sp. ...	
1 " tæniolatum ...	
1 Pseudophryne, sp. ...	} Mrs. J. Morrison.
1 Lygosoma punctatovittatum ...	
1 Acanthopphis antarctica ...	
1 Vermicella annulata ...	
1 Typhlops nigrescens ...	
1 Tiliqua gigas ...	
1 Vermicella annulata ...	
2 Amphibolurus muricatus ...	
1 Lygosoma lesueurii ...	
2 " tæniolatum ...	
1 " metallicum ...	} Mr. J. D. Ogilby.
2 " sp. ...	
2 Chiroleptes, sp. ...	} Mr. T. Paton.
2 Pseudophryne, sp. ...	
1 Amphibolurus barbatus ...	
2 Brachysoma diadema ...	
1 Lygosoma tæniolatum ...	
2 Gymnodactylus platurus ...	
1 Nardoia gilberti ...	
2 Pseudonaja australis ...	
1 Pseudechis australis ...	
1 Brachyrophis australis ...	
2 Gymnodactylus miliusii ...	} Mr. J. Ramsay.
2 Diplodactylus spinigerus ...	
1 Lialis burtonii ...	} Mrs. Saunders.
2 Hoplocephalus curtus ...	
1 " collaris ...	Mr. T. G. Sloane.
1 Gehyra oceanica ...	} Mr. A. G. Steele.
3 Brachylophus fasciatus ...	
2 Lygosoma samoense ...	} Mr. H. E. Stephenson.
1 Cryptodelma orientalis ...	
1 Diemenia superciliosa ...	
1 Vermicella annulata ...	
1 Pelamis bicolor ...	
1 Acanthopphis antarctica ...	
1 Lygosoma æquale ...	
1 Physignathus lesueurii ...	
1 Tiliqua gigas ...	
1 Pygopus lepidopus ...	
1 Typhlops nigrescens ...	Mr. T. Temperley.
1 Pygopus lepidopus ...	Mr. H. Thorpe.
1 Dendrophis punctulata ...	Mr. H. G. Walker.
2 Vermicella bertholdii ...	Mr. G. Wall.
	Mr. S. Waters.
	Mr. J. J. Weatherstone.
	Mr. W. Webb.
	Mr. H. Wells.
	Mr. J. G. Wilson.
	Mr. Zietz.

Donations.	Presented by—
<i>Fishes.</i>	
1 Trichiurus coxii (upper jaw)	} Mr. M. Bell.
1 Ophichthys serpens... ..	
2 Scyllium anale	} Bondi Aquarium Company.
1 Dactylopterus orientalis	
1 Eleotris australis	Mr. A. S. Bowman.
1 Girella cyanea	Mr. R. Brannon.
1 Parma squamipinnis	Mr. J. Brazier.
1 Therapon richardsonii	Mr. M. C. Brown.
1 Syngnathus margaritifer	Mr. R. Cameron.
1 Hypeneus signatus	Mr. J. Cooper.
1 Plectropoma annulatum	} Dr. J. Cox.
1 Hypeneichthys porosus	
1 Percis coxii	
1 Glyphidodon antjerius	
1 Cossyphus unimaculatus	
1 Synaptura nigra (var.)	
2 Ctenolates ambiguus	
1 Therapon richardsonii	
5 Gadopsis marmoratus	
1 Dicotylichthys punctulatus	
1 Trigla kumu	} Mr. R. W. Cox.
1 Acanthias megalops	
1 Priacanthus macracanthus	Mr. G. Emmanuel.
1 Trygon kuhlii	Mr. M. Fleming.
1 Gobius leucostictus	Mr. F. C. Fox.
1 Belone choram	Mr. G. L. Goodman.
1 Ophichthys serpens... ..	} Rev. — Gray.
2 Chatoessus richardsonii	
1 Rhinobatus bougainvillii	Mr. F. Hatfield.
2 Acanthoclinus littoreus	Mr. F. C. Hogg.
1 Hypeneus signatus	Mr. J. Hughes.
1 Cristiceps aurantiacus	} Mr. J. Langley.
1 Gonorhynchus greyi	
1 Sillago maculata (deformed)	Mr. Leonard.
1 Fistularia serrata	Mr. J. Lipman.
1 Glyptauchen panduratus	Manly Aquarium Company.
3 Macquaria australasica	Mr. A. Marden.
1 Parascyllum collare. TYPE	} Mr. O. Meyer.
1 Anema inermis	
1 Ophichthys serpens	Mr. G. W. Mortimer.
1 Trigla kumu... ..	Mr. R. Oatley.
1 Trachypterus jacksoniensis	Mr. W. H. Paul.
1 Serranus dæmeli	} Messrs. Payten and Brown.
1 Trachypoma macracanthus	
1 Plectropoma cinctum	
1 Atypichthys strigatus	
2 Girella cyanea	
1 Glyphidodon polyacanthus	
2 Labrichthys inscriptus	
1 " luculentus	
1 Coris aygula... ..	
1 Ostracion lenticularis	
2 Chrysophrys australis	Mr. S. Pepper.
2 Percalates montanus	Mr. R. W. Robertson.
2 Gadopsis marmoratus	} Mr. A. M. N. Rose.
3 Carassius vulgaris	
1 Caranx ciliaris	Mr. Roderick.
1 Achirus pavoninus	Mr. F. Sommers.
1 Trichiurus coxii	} Mr. T. Southwell.
1 Trigla kumu	
1 " "	Hon. R. H. D. White.
1 Dactylopterus orientalis	Mr. Williams.
9 Oligorus macquariensis	} Mr. O. Wilshire.
7 Ctenolates ambiguus	
23 Macquaria australasica	
2 Therapon macleayanus	
2 Aristeus fluviatilis	
15 Gadopsis marmoratus	
2 Copidoglanis tandanus	
<i>Tunicata.</i>	
2 Compound ascidians	Mr. J. Brazier.

Donations.						Presented by—	
<i>Mollusca.</i>							
12	Ostrea mordax, Gld.	Mr. H. S. Hyam, M.L.A.
2	Helix grayi	Mr. Bell.
26	„ falconari	
12	„ richmondiana	
6	„ muehlfeldtiana	
71	„ fraseri	
59	Unio, sp.	Mr. J. A. Thorpe.
29	Donax deltoides	
274	Marine shells	
2	Ovula birostris	Mr. T. Whitelegge.
2	Conus marmoreus, 1 Conus litteratus	Mrs. J. Parkinson.
	Cypræa microdon	
	Columbella marquesa	Captain Braithwaite.
2	Cypræa decipiens	Mr. Jas. Clarke.
2	Succinea eucalypti	
1	Vitrina mastersi	Mr. J. Mitchell.
2	Shells-Cypræa talpa and C. lynx	Rev. F. E. Lawes.
<i>Polyzoa.</i>							
	Bugula neritina	Mr. Langley.
<i>Crustacea.</i>							
	Parthenope horrida	Rev. F. E. Lawes.
	Alpheus edwardsii	Mr. Dunshea.
	Planes minutus	
	Several specimens of a species of Caprella	Mr. Langley.
1	Alpheus edwardsii	Mr. L. Porcello.
2	Cardiosoma hirtipes	
2	Pagurus, sp....	Rev. — Gray.
1	Remipes testudinarius	
1	Astacopsis serrata	
1	Palinurus hugelii	
3	Penæus monodon	Dr. J. C. Cox.
1	Thalamita crucifera...	
	Tiger Prawn—Penæus monodon	Mr. H. L. Carter.
1	Ibacus peronii	Dr. Ward.
2	Alpheus edwardsii	
1	Halimus spinosus	Dr. J. C. Cox.
	Menaëthius monoceras	Messrs. Payten & Brown
1	Axius plectrorhynchus	Prof. R. Tate.
	Ibacus peronii...	Mrs J. Pratt.
2	Crabs	
6	Barnacles—Lepas, sp.	Mr. J. A. Thorpe.
2	Phymodius ungulatus	
	Goniodactylus chiragro	Mr. Langley.
<i>Arachnida.</i>							
1	Stéphanopis, sp.	Mr. J. F. Fitzhardinge.
	Cermatia maculata	Mrs. Podmore.
<i>Myriopoda.</i>							
1	Heterostoma, sp.	Mr. Goneolf.
	Heterostoma sulcidens	Mr. H. G. Greville.
1	Heterostoma sulcidens	Mr. H. J. Acland.
	Heterostoma, sp.	Mr. W. Murphy.
6	Zephronia, sp.	
4	Julus, sp.	
8	Myriopoda	Mr. J. A. Thorpe.
<i>Insecta.</i>							
	Walking-stick Insect (Phasma, sp., immature)	Mr. A. C. Jacob.
	Wood Moth (Cossus, sp.)	Mr. Archibald Smith
	Ailanthus Moth—Saturnia cynthia	Mr. W. A. Gilder.
	Melolonthid larvæ (2 species), from roots of sugar-cane	Mr. A. J. Boyd.
6	Schizorrhina australasiæ, & larvæ	Mr. H. Belnare.
	Gigantic Spider (Mygale, sp.)	Mrs. E. Mackay.
	Bronze-bodied Fly (Pangonia, sp.)	Master A. Farr.
	Larva of Charocampa sp.	Miss King.
	Australian Silk Moth—Antheræa eucalypti	Mr. C. E. Jones.
	Larva of Chelepteryx collesii	Mr. James Wall.
	Cocoon and Larva of Chelepteryx collesii	Mr. H. Smithurst.
	Walking-stick Insect (Phasma, sp.)...	Mr. Martin Green.

Donations.	Presented by—
<i>Insecta—continued.</i>	
Coccus, sp. ♀	Mr. H. A. Burrows.
Larva of <i>Chærocampa scrofa</i> ...	Mr. W. G. Cole.
Larva of <i>Cæquosa triangularis</i>	Mr. W. A. Nicholas.
<i>Acripeza reticulata</i> ♀	Mr. M. Brown.
<i>Musca</i> , sp.	Mr. Steers.
<i>Protoparce</i> (<i>Sphinx</i>) <i>convolvuli</i>	Mr. J. M. Stephens.
1 <i>Libellula</i> , sp.	Mr. B. Lucas.
1 <i>Lamprima latreillei</i>	Mr. R. Cox.
1 <i>Chærocampa erotus</i>	} Mrs. Hall.
1 <i>Scolia violacea</i>	
1 <i>Acrophylla titan</i>	Mr. J. Jacobs.
1 <i>Anoplognathus porosus</i>	} Madame Friederich.
1 <i>Darala</i> , sp.	
1 <i>Doratiophora</i> (Cocoon)	
1 <i>Metamimas australasiæ</i>	Mr. D. Hazlewood.
12 Coleoptera (<i>Buprestidæ</i> , <i>Lampyridæ</i> , &c.)	Rev. I. Gray.
A small collection of Coleoptera, chiefly Longicorns and Phytophaga	Mr. L. F. Woolrych.
1 <i>Spilosoma fulvo-hirta</i>	Mr. J. Moore.
1 <i>Schizorrhina bakewelli</i>	Mr. Young.
1 <i>Acrophylla typhon</i>	Mr. Jos. Power.
<i>Chærocampa scrofa</i>	} Madame Friederich.
<i>Lamprima latreillei</i>	
18 Lepidoptera, from N. America, including— <i>Vanessa antiopa</i> , Linn ; <i>Pyrameis cardui</i> , Linn ; <i>Pyrameis carye</i> , Hübn ; <i>Pyrameis huntera</i> , Fabr ; <i>Pieris protodice</i> , Bois ; <i>Samia cecropia</i> ; <i>Telea polyphemus</i> ; <i>Smerinthus occidentalis</i> , &c.	} Right Rev. Bishop of Sydney.
2 <i>Doratiophora casta</i>	Mr. F. G. Lender.
Processionary Caterpillars and nest...	Mr. E. G. Dyce.
<i>Chelepteryx collesii</i> , ♀	Mr. C. Beverley.
14 Carabidæ	} Mr. J. A. Thorpe.
20 Passalidæ	
3 Tenebrionidæ	
1 <i>Anostostoma australasiæ</i> ♂	Mr. C. A. Keram.
<i>Podacantha typhon</i>	Mr. H. Smithurst.
6 <i>Haltica</i> , sp.	Mr. H. G. Gornale.
A Cricket— <i>Anostostoma australasiæ</i>	Madame Friederich.
Pupa of <i>Chærocampa</i> , sp.	Mr. Geo. Bridle.
<i>Hyperion schroetteri</i>	Mr. J. P. Creed.
Parasitic dipteran (<i>Nyctemera</i> , sp.)...	Mr. A. H. Belfield.
1 <i>Lestes bombylans</i>	Miss King.
1 <i>Doratiophora lewini</i> (Larva)	Right Rev. Bishop of Grafton.
1 <i>Lestes bombylans</i>	Mrs. H. A. Podmore.
1 <i>Myrmeleon</i> , sp.	Mr. J. Burrows.
1 <i>Trygonalys fasciapennis</i> ♀	Mr. J. Simpson.
1 <i>Cæquosa triangularis</i>	
<i>Echinodermata.</i>	
3 <i>Ophiocoma brevipes</i>	Mr. Langley.
<i>Centrostephanus rogersii</i>	Mr. W. Steers.
100 <i>Asterina calcar</i>	Mr. J. A. Thorpe.
Star fish— <i>Ophidiaster germanii</i>	Messrs. Payten and Brown.
<i>Ophiomyxa australis</i> (Sand star)	Mr. A. M. Lea.
<i>Holothuria</i> , sp.	Mr. W. H. Rowsale.
2 <i>Colobocentrotus atratus</i>	Mr. Ralph Hargrave.
<i>Vermes.</i>	
6 Marine worms	Mr. Langley.
17 Marine worms	Mr. J. A. Thorpe.
Intestinal worm (from a sea snake)...	} Capt. G. Drevar.
<i>Platurus scutatus</i> ; from the stomach of the Tiger shark, <i>Galeocerdo rayneri</i>	
<i>Cœlenterata.</i>	
4 Alcyonarian Corals— <i>Spongodes</i> , sp.	} Capt. Braithwaite.
6 Hydrocorallines— <i>Distichopora nitida</i>	
1 <i>Lytocarpus</i> , sp.	Revd. — Gray.
<i>Antipathes</i> , sp.	Dr. W. A. Haswell.
1 <i>Antipathes spiralis</i>	Dr. McGregor.
<i>Distichopora coccinea</i>	Miss M. M. Rowsell.

Donations.	Presented by—
<i>Palæontological Specimens.</i>	
1 <i>Spirifera tasmaniensis</i>	} Dr. J. C. Cox.
1 „ <i>convoluta</i>	
1 „ <i>duodecemcostata</i>	
1 <i>Platyschisma oculus</i>	
1 <i>Productus brachythærus</i>	
1 <i>Stenopora crinita</i>	} Mr. Fitzgerald.
1 <i>Meiolania platyceps</i> , portion of head and fragments of bones	
Pelvis, teeth, and other bones of <i>Diprotodon</i>	} Mr. J. McMaster.
Ramus of large Wombat	
Jaws, teeth, and bones of extinct sp. of <i>Macropus</i>	
Ramus of <i>Nototherium mitchelli</i> . Adult.	
5 pieces of shell <i>Agglutinate</i> (Post-Tertiary)	Mr. Jas. Smith.
3 <i>Sanguinolites</i> from the Permo-Carboniferous beds, near Maitland	Mr. Achd. Smith.
<i>Dietyophyton</i>	Messrs. Ward and Howell.
2 <i>Spirifera stokesii</i>	} Mr. T. Illidge.
1 „ <i>tasmaniensis</i>	
<i>Minerals, Rocks, &c.</i>	
Specimens of pyrites on wood, &c.	Mr. John Henry.
Orthoclase felspar with mica... ..	Mr. John Lovett.
Auriferous quartz with free gold and pyrites	Mr. W. Lovegrove.
Tin ore, mispikel, and gem sand, containing quartz, topaz, tourmaline, zircon, sapphire, &c.	} Mr. Chas. Wooller.
Decomposed clay rock	Mr. Chas. Wooller.
Dyke rock containing pyrites	Mr. E. Lawless
Stalactites of limonite	Mrs. E. Selkirk.
Red clay and red sand probably baked by lava stream	Mr. H. G. Gornalle.
Pyrolusite (manganese ore)—basalt	} Mr. Véscey.
Crystals of augite	
Hollowed prisms of ferruginous clay	Mr. Cocks.
Galena and copper pyrites with silver and gold	Mr. J. Begehole.
Galena, zincblende, &c.	Mr. B. Bryant.
Galena and copper pyrites, &c.; quartz and felsite breccia, with pyrites, copper pyrites, and blende; quartz with galena and light yellow blende; crystalline marble; hematite; idocrase or vesuvianite; the same decomposed; epidote; granite; pegmatite; diorite; arkose; jasper; chalcedony in diabase; black slate with glossopteris; coal; chalcopyrites; zincblende; barytes and buratite, &c.	} Mr. H. G. Gornalle.
Auriferous quartz showing gold from Gympie	Dr. E. P. Ramsay.
Copper glance and malachite in diabase	} Mr. A. Chrystal.
Gray copper in quartz	
Red oxide of copper with azurite and malachite	
Chalcopyrites	} Mr. J. T. Fischer.
Basalt, hornblende granite, sandstone, white topaz, skeleton of quartz infiltrated in fissures of a mineral (probably pyrites) subsequently removed	
Quartz with encrinite stems	Mr. A. F. Macdonnell.
Galena from White Rock—gem sand including sapphires, green sapphires, zircons, &c.	} Mr. H. G. Gornalle.
Granite containing small garnets	Mr. W. Lovegrove.
Chalcedony, stream tin and quartz pyrites	Mr. J. G. Lodwidge.
Crystallised calcite	Mr. B. Hargraves.
Silver gossan, galena and carbonate of lead	Mr. A. Duboisé.
Pyrites and gossan, with quartz	Mr. Nathan.
Porphyritic rock	Mr. G. Gander.
Auriferous quartz	Mr. P. Davies.
„ specimens... ..	Mr. W. Tanner.
Quartz with magnetic pyrites, pyrites and gold	Mr. J. Traverton.
Mispikel and gold in quartz—auriferous mispikel with calcite	Mr. J. Charlton.
Auriferous quartz, gold in honeycombed opaline quartz—and quartz with mispikel	} Mr. T. Poile.
Magnetic pyrites and quartz—pitchstone	Mr. W. E. Mitchell.
Specimens of argentiferous galena, mispikel, and oxide of lead, black slate with fenestella,—specimens of graphite... ..	} Mr. C. Wooller.
Specimens of calcite; quartz with specks of pyrites and copper pyrites; chlorite, &c.	} Mr. T. R. Hancock.
Gray shale with specks of mica	Mr. H. Lord.
Limonite showing gold (silicious)	Mr. Jas. Smith.
Coralloidal chloride of silver with moss gold; crystallised chloride of silver, &c.	} Mr. R. Hellyer.

Donations.	Presented by—

Ethnological and Historical Specimens—continued.

5 Stone tomahawks	} Mr. C. W. T. Brown.
1 Flat sharpening stone	
Mummied skin of the head of a child, from Quito, Peru, South America	} Mr. W. L. Fenwick.
1 Wicker basket from Marshall Islands	
1 Basket from Gilbert Islands	} Dr. J. C. Cox.
Fork for eating human flesh from Fiji	
Corfu race card—Autumn, 1883—on pink satin	} Miss Stephen.
Indenture of the time of Queen Elizabeth, 1602	
Colonial land grant by Governor Hunter, 1796	} Baron A. von Hugel.
Patent of Knighthood by Queen Victoria, 1846	
Rough draft of a deed of partnership entered into for the purpose of printing and publishing a newspaper in Melbourne, to be called the <i>Port Phillip Gazette</i> , which paper has now merged into one of the principal daily papers in Melbourne. The water-mark on this draft is 1832. Prepared by the late J. S. Clarke, Esq., solicitor	} Miss Taylor.
	} Sir Alfred Stephen, G.C.M.G. C.B., &c.
	} Mr. W. S. Clarke.

Numismatics.

English testoon or shilling, Edward VI, 1547	} Mr. G. T. Hall.
Bronze coin, 1 cent, Indo-Chine Française Republique Française	
Bronze medal in commemoration of visit of Colonial and Indian Representatives to the city of London, 25 June, 1886	} Mr. B. Lucas.
Centennial bronze medal, in commemoration of the completion of the first 100 years of settlement of the Australian Colony	
	} London Corporation.
	} Centennial Celebration Commission.

Photography.

“Cook’s tree.” A Tamarind tree planted by Captain Cook on Point Venus, Tahiti, to mark the spot from which he viewed the transit of Venus in 1768. (Photo. taken in 1883)	} Mr. C. T. Burfitt.
10 original proof photos. of New Guinea, &c.	
Photographic view of their exhibit	} Mr. Theo. Bevan.
	} Messrs. Ward & Howell.

Books for the Library.

Reports of Meetings	} Marine Biological Association, Plymouth.
Journal, Nos. 1 and 2	
Plan of Building	} E. Thurston.
Report, Marine Fauna of Ramcswaram	
Catalogue of Batrachia Salientia and Apoda	} Government Central Museum, Madras.
Report, 1887-8	
Odontornithes; O. O. Marsh	} British Museum.
Icones Fossilium Sectiles; Konig	
Catalogue of Fossil Mammalia. Part 5	} British Museum.
A number of Geological Publications	
Catalogue of Birds, vols. 12 to 14	} British Museum.
Guide to Shell and Starfish Galleries	
Catalogue of Fossil Reptilia and Amphibia	} Societa Adriatica, Trieste.
Bolletino, vol. 10	
Insects Noxious to Agriculture; Maskell	} Prof. T. Kirk, New Zealand.
Catalogue of the Moths of India: Cotes & Swinhoe. Parts 2 and 3	
Notes on Economic Entomology, No. 2	} Indian Museum, Calcutta.
Annual Report, 1886-7	
Preliminary Account, Wheat and Rice Weevil; Cotes	} A. W. Waters, Microscopical Society, King’s College, Lond.
Bryozoa from N.S.W., &c. Parts 1, 2, and 3	
Third Annual Report of Antiquarian Com., 1887	} Museum of Archæology, Cambridge.
Annual Reports, 1886-7	
Geology of Vegetable Creek Tin-mining Field	} Department of Mines.
Mineral Products of New South Wales and other Publications, 1887	
Memoirs Geological Survey of N.S.W.; Palæont. Nos. 1 and 2	} Department of Mines.
Catalogue of Exhibits of Metals, &c.	
Aarsberctning for 1886	} The Museum, Bergen.
Abnorme Eberhauer	
Memiors, vol. 24. Part 1	} Dr. O. Finsch, Bremen.

APPENDIX VI.

EXCHANGES.

Received from—	Forwarded to—
Professor Collett, Christiana, Norway. (8, 24.)	
Mammalia :—4 species—4 specimens.	Mammalia :—3 species—3 specimens.
Aves :—20 species—21 specimens.	
P. H. Carpenter, F.R.S., London. (20.)	
Named duplicates.	Echinodermata :—7 species—19 specimens.
Dr. Carroll, Sydney.	
	Photography :—24 prints of ethnological specimens.
Blackmore Museum, Salisbury, Wilts. (38.)	
Cretaceous fossils promised.	Pisces :—2 species—2 specimens.
James Dall, New Zealand. (12, 25.)	
Aves :—1 species—1 specimen.	Aves :—14 species—14 specimens.
8 Birds Nests and Eggs.	Mollusca :—54 species—148 specimens.
Mollusca :—18 specimens.	Minerals :—1 specimen.
Educational Museum, Tokio, Japan.	
	Aves :—125 species—169 specimens.
	Minerals :—Small collection.
Fisheries Commission of New South Wales.	
	Pisces :—89 species—161 specimens.
L. S. Foster, New York. (32.)	
Books :—6 vols.	Books :—2 vols.
Royal Zoological Museum, Florence, per Professor Giglioli.	
Reptilia :—1 species—2 specimens.	

EXCHANGES.

Received from—	Forwarded to—
	Robert Grant, Lithgow. (11.)
Mammalia :—13 species—15 specimens. Aves :—46 species—89 specimens.	Aves :—2 species—2 specimens.
	G. W. Griffin, Consul for U.S.A. (17.)
	Minerals :—50 specimens.
	Tasmanian Museum, Hobart. (31, 37.)
Mammalia :—3 species—5 specimens.	Photography :—19 negatives of fossils. Bottles :—192 glass stoppered. Boxes :—Glass top.
	R. H. Ivy, Sydney.
Mammalia :—2 species—2 specimens. Aves :—53 species—64 specimens.	
	Hon. Jas. Inglis, M.L.A., for Montrose Museum, Scotland. (15.)
	Aves :—23 species—24 specimens. Mollusca :—42 species—109 specimens. Echinodermata :—16 species—30 specimens. Fossils :—17 species—25 specimens. Ethnology :—30 specimens.
	Ed. Lovett, Croydon, England. (18.)
Specimens illustrating the manufacture of Gun Flints, &c., at Brandon.	
	Prof. M'Coy, Melbourne. (22.)
Specimens lent for comparison.	Reptilia :—2 specimens.
	Prof. M'Intosh, Scotland. (14.)
Fishes and Crustacea promised :—Pamphlets.	Mammalia :—46 species—135 specimens.
	F. M'Knight, Melbourne. (5, 33.)
Fossils :—11 species—28 specimens.	Fossils :—19 specimens.
	Mines Department, Sydney. (26, 41.)
Ethnology :—1 specimen.	Fossils :—2 casts. Books.
	L. Montagnat, New Caledonia. (27.)
Minerals :—Collection of.	Book.
	N.S.W. Commission, Centennial International Exhibition, Melbourne.
	Mammalia :—5 species—9 specimens. Aves :—61 species—103 specimens. Album of Photos. of Fishes.
	Natural History Society Museum, Newcastle-on-Tyne. (16.)
Mollusca :—4 type specimens shells.	
	H. Payten, Sydney. (34.)
Aves :—2 species—2 specimens.	Aves :—1 species—1 specimen.
	A. S. Olliff. (29.)
Book :—1 vol.	Book :—2 vols.
	Sir Richard Owen, England. (19.)
	Fossils :—3 casts.
	Queensland Museum, Brisbane. (10.)
Fossils :—2 casts.	Fossils :—4 casts.
	U.S. National Museum, Washington.
	Reptilia :—10 species—20 specimens. Pisces :—39 species—88 specimens.
	H. Smithurst, Brisbane. (7.)
Reptilia :—9 species—13 specimens. Insecta :—Small collection.	Aves :—2 species—2 specimens.
	H. Suter, New Zealand. (30.)
Mollusca :—30 specimens.	

MINERAL DEPARTMENT.—(*F. Ratte, Mineralogist*).—1,406 numbers (corresponding to about 1,930 specimens) have been entered in the Register of Minerals. Leaving out retrospective registrations and purchases, there are 750 numbers, half of which represent minerals and rocks collected and the other half, donations. Three-fourths of the donors are amateur collectors, with whom correspondence is kept up, or persons interviewed in the course of collecting excursions and visits. This shows progress compared to last year, and demonstrates that a system of correspondence, combined with occasional collecting excursions, will ultimately succeed in filling the gaps of a colonial collection, methodically arranged, and illustrating such mineralogical features necessary to the education of the people and the advance of science.

PALÆONTOLOGICAL DEPARTMENT.—(*R. Etheridge, jun., Palæontologist*).—The chief work consisted in naming and registering new acquisitions, and naming portions of the old collection. Of specimens registered, 227, including 56 species, were obtained by purchase; 130, including 20 species, by exchange; and 459, including 111 species, were collected by members of the Museum staff. Of these a collection from the Shoalhaven district of the marine fossils of the Coal Measures; Post-Tertiary bird bones (small Moa) from New Zealand, partly purchased from and partly presented by Mr. Illidge; bones of Marsupials collected by Mr. Etheridge and Mr. J. Mitchell from the Murrumbidgee Caves, including a very large Thylacine skull; and, lastly, the Geological specimens, consisting chiefly of bones of *Meiolania*, obtained from Lord Howe Island by the Museum Collecting Party in 1887, are among the most important. In addition to the foregoing a large series of shells and other fossils has been collected from the Tertiary strata of Muddy Creek, Hobson's Bay, and other localities. A part of these were collected by Mr. A. J. North, and the remainder received in exchange from Mr. T. Worcester. This collection will be referred to in detail in the next Annual Report. Those portions of the old collection determined consist of the higher-Permo-Carboniferous Mollusca and some of the Australian Secondary fossils. During a portion of June Mr. Etheridge was engaged with Mr. J. Mitchell in a preliminary exploration of the Murrumbidgee Caves at Cave Flat, on which a report has already been made.

CONCHOLOGICAL DEPARTMENT.—(*J. Brazier, Conchologist*).—During the year the purchases have been 8 from New Zealand, Mauritius, Lord Howe Island, Phillippine and Solomon Islands, Port Jackson, New Hebrides. The most important collection purchased is a foreign one; it embraces nearly all European species, including the land and fresh water forms. *Nautilus Pampilius* with the animal in spirits was secured from the New Hebrides. Specimens presented number 16 from New Hebrides, New South Wales, and Western Australia; among them are two rare *Cypræa decipiens*, E. A. Smith, obtained in deep water at Cape Joubert and Amphinome Shoals, N. W. Australia. Exchanges received are *Heligen Silveri*, Angas; *Angasiana*, Pfr. *Flindersi*, Ad & Angas; *Eyrei*, Angas; typical specimens from the collection of the late Mr. George French Angas, from the Natural History Society Museum, Barras Bridge, Newcastle-upon-Tyne, England; and a small collection of land shells from New Zealand.

ETHNOGRAPHICAL DEPARTMENT.—(*J. Brazier, Ethnologist*).—During the year ending 31st December, 1888, a number of specimens (632) have been purchased to fill up the many gaps in this department. Specimens have been secured from Queensland, British and German New Guinea, New Britain, Viti, or Fiji Islands, Solomon Islands, New Ireland, New Hebrides, New Zealand, New South Wales, Niue, or Savage Island, Mortlock, Stewart, Greenwich, French, Sir Charles Hardy, and O'Brien Islands, Caroline Group. The number of specimens presented during the year has been only nineteen, from New South Wales, Viti or Fiji, Gilbert, Marshall, and Solomon Islands. The exchanges number two, viz., portion of a large tree with native carvings, New South Wales, from the Department of Mines; large square of tappa cloth, from Viti or Fiji, Dr. Williams. Although the Ethnological Hall was formally opened by Sir Alfred Stephen, G.C.M.G., Crown Trustee of the Museum and Chairman of the Board of Trustees, in January last, the ceremony was but a concession to the exigencies of the Centenary celebration, and so much had to be done before all the contents were properly arranged and catalogued that the place was closed at the end of the week and remained so until the 16th of October, when it was finally thrown open for inspection. The hall is already too small for the collection, which must grow from year to year. The hall itself is 70 feet by 30 feet, lofty and well ventilated, with galleries all round.

HISTRIOLOGICAL DEPARTMENT.—(*J. Brazier, Ethnologist*).—During the year five old historical documents have been presented, viz.:—Indenture of the time of Queen Elizabeth, 1602; Colonial Land Grant by Governor John Hunter, 1796; Patent of knighthood by Queen Victoria, 1846, to Alfred Stephen, Esq., presented by Sir Alfred Stephen, G.C.M.G.; Race Card, printed on satin, Corfu, 1833, Miss Taylor; Rough draft of a deed of partnership entered into for the purpose of printing and publishing a newspaper in Melbourne to be called the "Port Phillip Gazette," which paper has now merged into one of the principal daily papers in Melbourne, prepared by the late J. S. Clarke, Esq., Solicitor; this is understood to be the first printed newspaper in Melbourne, the only previous one being a written one; the watermark on this draft is 1835. Two coins and one medal have been presented, viz.:—English Testoon or Shilling, Edward VI, 1547, silver; and bronze one cent, Indo-Chine Française. Centennial Medal, bronze, in commemoration of the completion of the first hundred years of Australian settlement, has been received from the Centennial Celebration Commission.

E. P. RAMSAY,
Curator.

APPENDIX IX.

To the Curator.—Report on the Limestone Caves at Cave Flat, junction of the Murrumbidgee and Goodradigbee Rivers, County of Harden.

Sir,

Sydney, 6 July, 1888.

In compliance with your instructions, I have the honour to herewith hand a report on my visit to the Murrumbidgee Caves, in company with Mr. J. Mitchell, of Bowning, between the dates of June 16th and June 22nd. We had intended visiting the Goodradigbee Caves also, some distance up the river of that name, above its junction with the Murrumbidgee, but time did not permit of our so doing.

Cave Flat is about twenty-five miles south-west of Bowning, and can be reached comfortably from that place by arriving there by the night-train from Sydney in the morning, and then driving. For the first nine miles the Great Southern Road is followed, but at that distance from Bowning the Goodradigbee Road branches off, and is a good track the whole way. The country is undulating and open until within a short distance of the flat, on entering the Barren Jack Ranges. The ground here becomes more broken and thickly wooded, a rapid descent of 800 feet taking place to the Murrumbidgee. Cave Flat is situated at the junction of the two rivers—the Bowning and Yass Road here crossing the former stream—and is a large alluvial tract of more than one geological age, extending on both sides the Murrumbidgee, and forming a delta-like piece of land between it and the mouth of the Goodradigbee.

The caves, for there are a series of them, are situated in a belt of limestone, running in a general north-west and south-east direction, along the strike of which the Goodradigbee River has more or less cut its course. Three caves in all were explored, one other is known, which we did not examine, and there are numerous depressions existing in the limestone ridge which probably represent filled in entrances to others.

The principal cave, or that which will be known throughout this report as "The Cave," and which was partially examined by Mr. Charles Jenkins, L.S., of Yass, in 1881, on behalf of your Trustees, is situated on the river's edge, within the conditional purchase of Mr. Weston, No. 14, Parish of Childowla; the two others examined by us are on the conditional purchase, No. 13, of Mr. John Hannam. To Mr. Weston we were indebted for much assistance and information, and I wish to take this opportunity of thanking him.

THE CAVE.

This, the principal cave, so far as our knowledge at present goes, is situated on the steep and narrow north bank of the Murrumbidgee, immediately at the south-west corner of Cave Flat. Its precise position, as surveyed by Mr. Jenkins, is 4 chains 86 links west of the south-east corner peg of Weston's (formerly Swift's) 65-acre conditional purchase, No. 14 (H. 3929), Parish of Childowla, County Harden. It was the subject many years ago of a brief description by Dr. G. Bennett,* and as before stated, has been briefly reported on by Mr. Jenkins.† His report refers almost wholly to excavations carried on in searching for fossil bones in the main, or entrance chamber of the cave. It "has a noble entrance in the

* Wanderings in New South Wales, &c., 1834, I, p. 224.

† Exploration of the Caves and Rivers of New South Wales. *N. S. Wales Parl. Papers*, 1882, 162—A, p. 32.

the face of a nearly vertical cliff of limestone, about 78 feet high. The entrance is about 40 feet above the Murrumbidgee ordinary summer level, and above the height reached by the greatest known flood. * * * As seen on the face of the cliff the entrance has a triangular form; but immediately within the entrance the form is modified by stalactitic roof cutting off the upper angle." This magnificent chamber, which for the sake of distinction, may be called "The Hall," is 42 feet wide, and has a depth of 80 feet, with a height of about 30 feet. The triangular form assumed at the entrance is continued more or less throughout all the chambers of the cave, and as Mr. Jenkins very justly remarks, is dependent on the dip of the limestone rock, which varies in the hall from 60° to 63°. Speaking generally of this cavern and its branches, Jenkins remarks, "The west side inclines generally at an angle of about 60°, so that the opposite side rises to a great height, whenever the passage is not very narrow. The right side (by the right I mean the right-hand side on entering) is nearly vertical throughout, more or less covered with stalactite incrustations, and where the passages widen out, the right halves of the chambers are filled with beautifully formed white, or variously tinted, and sometimes massive, stalactites and stalagmites. The left side exhibiting throughout little more than the dark grey limestone rock of the cliff, is relieved by bold massive fractures, and occasionally by small stalactites and stalactite stains." The size of this fine hall is adequately expressed by Dr. Bennett, who says, "a slight ascent brought us to the spacious and lofty entrance into which the horses were easily led and conveniently stabled."

The general form of this chamber is that of an irregular square, with a sloping roof. On entering, the visitor is confronted with the remains of fallen stalactites, broken and stained, but on the right are two very large columnar masses of united stalactite and stalagmite. Behind them the whole of the right-hand side is occupied by a massive deposit fantastically arranged in tiers and pillars. Up and over this is the path leading to the right-hand and main passage of this cavern, and the masses of deposited matter in this part of the hall are the result of water issuing from this passage as well as percolating through the roof above. In some of these festoon-like masses, where broken, the laminated and mammilated structure of the lime deposit is well exhibited. The roof of the hall is mottled with blunt and obtuse parti-coloured stalactites. At its further end, about the centre, is a short upcast passage of 20 feet, containing red earth.

Two main passages proceed from the hall—that already mentioned on the right, and one from the immediate far left-hand or north-west corner of the chamber. The course of the former will be first followed. Proceeding upwards over the worn surfaces of stalagmitic masses, the hall gradually narrows at 64 feet, along its eastern or vertical wall, from the entrance, from the successive accumulations of calcareous matter, to a narrow triangular passage. The entrance is almost blocked by a stalactitic doorway, through the pillars of which the dim chamber at the end of this passage can be seen. A gutter-like passage leads round this, and then passes in a direct line for 110 feet.

PLATEAU CHAMBER.

At about the middle of its course the above passage widens to the extent of 20 feet into a small and low chamber of the usual triangular form. This we have named from its position the Plateau Chamber (No. 2 on plan). On the left-hand side a blind branch is given off, now completely filled up, but it is just possible that it may communicate in a downwards direction with the short upcast from the end of the hall. A few stalactites are visible on both sides of this chamber, but they are not important, and have ceased forming. The floor is composed of the dull-red earth, partly bone earth, and partly bat guano, so prevalent in these caves. It imperceptibly lowers as progress is made forwards until a brow is reached, and an abrupt descent of 66 feet, at an angle of 32°, takes place into the Altar Chamber.

Along the passage to and from the Plateau Chamber are a few excellent examples of the method in which the stalagmites first commence to form. A constant drip takes place from the roof, resulting in the scattering of the soft earth on which it falls into a small basin-shaped outline. The dripping continuing into this, the water gradually evaporates, leaving a small pinnacle of stalagmite in the centre.

The descent to the Altar Chamber appears to be wholly stalagmitic, and whether following on a bed of limestone rock or is composed of successive beds of stalagmite and bone earth it is difficult to say, but from the resonance which takes place on percussion it is probably the latter. The present slope is covered with 1 ft. 6 in. of bone earth, in places hardened into a breccia filled with bone fragments.

ALTAR CHAMBER.

As the previously mentioned descent takes place, a large and high chamber is entered, 41 feet wide and including the gentle ascent at its further end, about 140 feet long (No. 3 on plan.) The general triangular form is again noticeable here, but it is somewhat more rounded than in other instances, the ultimate roof attaining a very considerable height. The left-hand, or western side, runs generally in a direction varying from N. 20° W. to N. 35° W., and immediately at the foot of the descent from the plateau chamber, the hanging wall has fallen, revealing a declivity below this chamber (No. 4 on plan) for 32 feet, and following the dip of the rock, and is more or less filled with general *débris* and bone earth. In consequence of this fall, a magnificent face of limestone is here exposed.

The mass of stalactitic and stalagmitic matter from which this chamber takes its name stands in about the centre of the cavern, just as the floor commences to rise again in a corresponding manner to the descent into it. It occupies more or less the whole of the floor, and consists of two portions, a right and left. The former is a number of thin pendant stalactites like a chandelier or candelabra, joined below to four chief masses of stalagmite. The left-hand portion is formed of two large pillars, fluted by the formation of smaller stalactites around them. These unite with a heavy base of stalagmitic matter, arranged in festoon-like groups. The height cannot be less than 20 feet, and probably more. It is possible to go behind and around these pillars, and if, when in such a position, the chamber is illuminated by means of magnesian wire a very fine effect is produced.

Behind the altar the chamber throws off a subsidiary branch (No. 5 on plan), which it was not possible to follow up without much labour and excavation. Immediately past this point the chamber narrows to 19 feet, and the floor continues to rise, but with traces of an old stalagmitic stratum, perhaps corresponding with one of those on the opposite and downward slope. It is at present 2 feet above the existing roadway. On this ascent, a little distance further on, is the finest single stalagmite in these caves, about 10 feet high, with a stalactite above, to which it is barely joined. The surface is fluted and concentrically wrinkled, the whole attaining a basal girth of 4 feet 6 inches, and at the top 6 feet. Adjoining this individual is an immense mass of stalactitic and stalagmitic matter combined, forming a huge pedestal,

pedestal, with a girth of 58 feet. At one time a small recess existed in this mass, with a continuous drip from its roof, representing a small fountain; but now, as a result of the vulgar vandalism of the day, this natural feature has been destroyed, and the whole face is simply an inscription-post for the vain and ignorant. This deposit of calcareous matter seems to have acted as the starting point of at least one, if not more, of the floors with which this part of the cave is covered. The longest stalactites may be seen just at the point where the fall of the hanging wall had taken place; they extend from the roof to the floor.

Returning to the altar once more, we found, by a little diligent examination, two openings immediately below it. The right-hand aperture led into a narrow downward passage, in a direction N. 1° W., at an angle of 32°, and extending for 40 feet. At the bottom the sides and roof are covered with a stalactitic incrustation, which has evidently proceeded from a crack in the limestone above. The bottom or lowest level of this passage is completely blocked up with stalagmitic layers and ossiferous earth and breccia, which seems to have entered through the before-mentioned crack, and more or less filled the whole passage, as it is still adhering to the roof in places. The present face cannot be less than 5 feet thick. This is the lowest point to which this cave was explored by us, and appears to be the lowest level to which any of the passages have yet been traced. The left-hand opening simply consists of the hollowed-out base of the altar, but is, however, of interest, as it is filled with ossiferous red earth.

Beyond the large pedestal, like mass of stalagmitic deposit, the main passage extends but about 40 feet further, the rising floor still showing alternations of stalagmite and bone-earth.

BAT CHAMBER.

On the left-hand side of the Altar Chamber, and opposite the large pedestal stalagmite, is a very low and irregular opening in the limestone wall, partially blocked by red earth and bat guano. By crawling through a fourth chamber is gained (No. 7 on plan), long and narrow, but with a high roof, lost in the depths of, upward blackness. It is 52 feet in length, with a long terminal fissure-like passage, which it is impossible to traverse. Like that of the other chambers the floor is composed of deposited matter, red earth, and an immense quantity of recent bat guano, and is resonant on percussion. The floor rises at a considerable angle. About half-way in its course, on the left-hand side, is an old branch passage, now partially closed by fallen *débris*; and, as a fresh current of air issues hence, this cannot be far from the surface of the hill. Just at the entrance, and immediately on the right-hand side, is a narrow upcast passage, where red earth is again visible; and a third similar fissure occurs at the lowest point of this cave, to the left of the entrance aperture. The cave is inhabited by a large number of bats (*Scotophilus morio*), and must have been so for ages, from the immense quantity of droppings accumulated not only in this cave, but throughout the chambers generally. In fact, I believe that the red earth, which so freely enters into the composition of the present flooring of the chambers, is to a large extent composed of bat guano. The walls of the bat chamber are coated with a peculiar semi-greasy black carbonaceous-looking film, which I apprehend is the result of some form of chemical change brought about by the decay of the guano at a somewhat high temperature. The temperature of all the chambers and passages is much above the external atmosphere. The total length of this eastern branch of the cave, according to Mr. Jenkins, is 420 feet, and our measurements made it but a few feet more, too trivial to comment on in such a difficult and ever-varying matter as cave measurement.

The lower or eastern passage leads off from the north-east corner of the hall (No. 8 on plan) in a direction of S. 2° E., and in round numbers extends for a distance of 140 feet, terminating at its distal end in a mere fissure. This portion of the cave calls for but brief notice, being low and narrow, but retaining in a marked form the triangular outline, so frequently referred to before. The passage is nowhere more than 13 feet wide, and perhaps as much as 15 feet high, narrowing and widening imperceptibly. The floor appears to be composed of general fine alluvial matter, mixed with a proportion of red earth and calcareous *débris*, and I think little doubt can exist that it has been filled to a considerable depth, like the hall, of which it is practically a continuation, by an in-wash in times of flood from the river, and matter brought down from the higher parts of the cave. By excavation no doubt this passage could be cleared out to some depth, and rendered a worthy continuation of The Hall.

Some differences in the length of the passage now under description, as given by Mr. Jenkins, and the measurement as taken by Mr. Mitchell and myself, exist. The former, speaking of the branches from the hall, or entrance chamber, as he terms it, says:—"That from the right is 200 feet; that from the left a length of 420 feet." Now by the explanation of his own terms—"by the right I mean the right-hand side on entering,"—he has clearly changed the places of his figures, and the numbers should be reversed; then the reading would be,—“That from the right is a length of 420 feet; that from the left a length of 200 feet.” The length of 200 feet, however, is clearly too much for this passage, unless it has greatly altered its character since Mr. Jenkins' visit; we made it only 140 feet. If the 200 feet he calculated from the absolute plumb-line entrance of the hall, along its actual western or lower wall, it is quite correct; but Mr. Jenkins distinctly speaks of his measurement as a passage, and here there clearly exists a discrepancy.

Touching the question of ossiferous deposits in these caves, the excavations for determining this point were made by Mr. Jenkins in the floor of The Hall only, in the deposit which I believe to be the least likely to contain fossil bones. So far as can be gathered from his not too clear statement, his section of the excavations made by him would be as follows:—

1. "Dark earth," with lime, recent bones of small marsupial, 1 foot 6 inches.
2. "Yellowish earth," with lime, insect remains, fur, similar bones, and towards the bottom bones of large marsupials, reaching to a depth of 5 feet.
3. Broken stalactites and lumps of rock, followed by a stalagmite floor, at 6 feet.
4. Solid limestone floor, at 9 feet.

Mr. Jenkins distinctly speaks of fossil bones coming in at a depth of 5 feet, but I am assured by yourself that most of the specimens sent from the cave were recent and unfossilised. Mr. Jenkins says, "as to how the bones came into the cave, I remark that they were never brought there by water, no drift was found in sinking." The presence of drift is not required to account for their transport by water. Little doubt exists in the minds of Mr. Mitchell and myself that these bones have acquired their present position through flood-waters, to which The Cave or at any rate The Hall has been subjected at a remote period.

True ossiferous deposits exist in these chambers although they certainly were found by Mr. Jenkins, only to a limited extent, and I am of opinion that they are well worthy of investigation on an extended

extended scale. We have undoubtedly proved the presence of bone earth, passing into ossiferous breccia, at certainly three spots, viz. :—The descent into the Altar Chamber, in the long passage below the altar, and on the ascent from the Altar Chamber, at its further extremity.

The evidence seems to point to a filling of these inner chambers with bone earth from above, through cracks and fissures, and if such is the case the best possible results may be anticipated. Judicious excavation will probably result in the extension of the branches of "The Cave" to a considerable extent, and I believe they are capable of being rendered worthy objects for the attention of the enquiring.

THE BONE CAVE.

The Bone Cave so named by Mr. Mitchell, from the fact that this was the first in which his attention was attracted to fossil bones, is the smallest cavern examined by us. It is situated on the 200-acre conditional purchase, No. 13 (H. 3928), of Mr. John Hannam, Parish of Childowla, and lies barely a chain inside the fence separating the lot on which it stands from that containing "The Cave."

The entrance is small, just sufficiently large to admit the body of an ordinary sized man, and is situated on the rocky ridge traversing the above lot. The descent from the entrance is vertical for a distance of 40 feet, in two flights of 20 feet each, with a small platform half way. The cave at the bottom of this pipe-like fissure is a low excavation of three irregular prolongations—one having an upward direction towards the surface, another a rather downward inclination, and the most important portion horizontal. The first has a direction N. 45° W., and extends upwards for 58 feet, at an inclination of 40°, tailing off into a very narrow long fissure-like passage, filled with small stalactites and red earth, but much fallen about. The width varies from 5 to 20 feet. The second branch proceeds in an E. 5° S. direction for 16 feet, and is hardly more than an expansion of the main hollow at the foot of the descent, it is about 13 feet wide. The third and most important branch has a bearing of S. 15° W., and terminates in a right and left prolongation. The former is a long, low, and narrow entry, leading some 30 feet to a small chamber, which is now blocked up, but Mr. Mitchell penetrated into this on a former visit. The left-hand split extends but 12 feet, and is a rounded prolongation of the main passage, it is however of the greatest importance, as it was here the most important bones were found. The walls of all these passages bear stalactites, but they are poor and small.

The whole of this cave must at one time have been filled with alternations of bone earth and stalagmite. Immediately at the bottom of the fissure are evidences of two breccia deposits, the higher 5 feet 6 inches above the present floor, and just under the roof, and 3 feet 5 inches below this is the second. The latter stalagmitic and bone floor although broken away and destroyed generally shows its lateral portions adhering to the sides of the cave, like portions of a shelf. Below it the bone earth has been removed for a depth of 1 foot 6 inches, representing the space now existing between the shelves and the present bottom, which is composed of black alluvium brought from the above, through the entrance fissure. In the E. 5° S. passage the ossiferous deposit has been as much as 3 feet 4 inches thick, resting on a stalagmite floor 1 foot 6 inches.

The whole of the infilling of this cave is of a brick red colour, in some places soft, in others quite hard, and resembles the Wellington bone-breccia very much in appearance, the red stains even hiding up the surface of the limestone walls.

The bones in the best state of preservation occur at the further end of the *cul-de-sac*, terminating the S. 15° W. passage, where the Thyiacine skull was found by Messrs. Weston and Mitchell. There are here several small layers of stalagmitic matter associated with strata of hair bone breccia.

The Bone Cave would, without doubt, yield by far the best immediate results by detailed examination.

CATHEDRAL CAVE.

The Cathedral Cave, so called by the residents on the flat, from the large number of pillar stalactites it contains, is excavated in the same hilly mass of limestone as The Cave, but removed some little distance from it. It is situated on the same block as the Bone Cave, but some way further south, and is quite contiguous to the fence.

Like the Bone Cave, the entrance is very small, and would be readily passed unnoticed, but the descent although steep is gradual, 50 feet in length, and is in fact a talus formed by inwashed detritus. The cave consists of one large chamber, more or less oval in form, and dome-shaped above. It is 80 feet long, by 54 feet broad, and on the left-hand or west side there is a further prolongation or recess of 30 feet, making a total width of 84 feet. The roof is covered with fine drooping stalactites, and the entire walls are a similar mass. Simply from the point of view of effect this is the finest cave visited, and is a really wonderful example of stalactitic and stalagmitic structure. The centre of the chamber is occupied by a large pedestal of stalagmite, and on the east and south are some grand masses. The recess on the right above referred to, cannot be better compared, than to an ice-floe, from the huge blocks scattered about, and on one another, completely filling up the lower portions; several of these blocks of calcareous matter must be several tons in weight. The further wall of this recess is covered with stalactites resembling a series of cascades, mounting one above the other. There are also traces of red earth in some of the cracks and crevices of the walls. The extreme southern end of the oval chamber rises like so many of the terminations of these caves.

GENERAL REMARKS.

The Murrumbidgee limestone is a dense blue-black in colour, much jointed and fissured, highly brittle in places, with a hackly conchoidal fracture, and crammed with fossils, especially corals. As a display of these beautiful organisms in natural section I have never seen its equal. Large faces of limestone—none are better than one at the entrance to the lower passage from The Hall in The Cave, and another in the Altar Chamber—may be seen, with the weathered corals, and particularly *Stromatopora*, standing out in relief and in section also. Many of these masses of coral, particularly those of *Stromatopora* and *Favosites*, are as much as 4 feet in diameter.

The Murrumbidgee limestone has been classed as Devonian by the late Prof. de Koninck; but I have not yet sufficiently examined the fossils of this deposit either to gainsay or confirm this view; but it is not improbable that his view may be correct.

The bones collected comprised portions of those of kangaroo—femora, humerus, radius, tibia, pelvic,

pelvic, and toe bones; portion of the lower jaw of a bear (*Phascolarctos*) or wombat (*Phascolomys*), and a tibia of a bear. The chief specimen, however, is a very large skull of a Thylacine, 10½ inches in length 7 inches in breadth. These are all from the Bone Cave.

From The Cave the specimens are more fragmentary and commingled together.

I have, &c.,

R. ETHERIDGE, JUNR.,
Palæontologist.

The Curator, Australian Museum.

NEW SOUTH WALES.

NATIONAL ART GALLERY.

(REPORT OF TRUSTEES FOR THE YEAR 1888.)

Presented to Parliament by Command.

ANNUAL REPORT of the National Art Gallery of New South Wales, for the year 1888.

Trustees of the National Art Gallery of New South Wales :

E. L. MONTEFIORE, Esq., J.P., President.	JOSIAH MULLENS, Esq.
E. DU FAUR, Esq., F.R.G.S.	The Hon. W. J. TRICKETT, M.L.C.
J. R. FAIRFAX, Esq.	J. R. ASHTON, Esq.
E. COOMBES, Esq., C.M.G.	B. R. WISE, Esq.
SIR PATRICK JENNINGS, K.C.M.G.	

Secretary and Treasurer :

W. P. WARTON.

Report to The Minister for Public Instruction.

A NUMBER of very important additions have been made to the national collection during the year by purchase ; the Colony is also indebted to the donors for several valuable presentations.

The Trustees have purchased ten oil paintings, at a cost of £2,322 5s.; seventeen water-colours, at a cost of £1,222 10s.; and eleven pictures, in black and white, costing £100, of which the following is a detailed list :—

Oil Paintings.

Portrait (Mrs. N. W. Pickersgill) : By H. W. Pickersgill, R.A.
 Departure of the "Orient" : By C. Conder.
 Meadow Walk, Christchurch, Oxford : By Keeley Halswelle, A.R.S.A., R.I., and H. S. Marks, R.A., R.W.S.
 The Cowlow Rocks : By John Brett, A.R.A.
 Rising Mists : By Peter Graham, R.A.
 The Shrimpers : By E. W. Cooke, R.A.
 On the Jetty : By G. Haquette.
 A Lecture on Anatomy : By F. Sallé.
 The First Born : By Gaston La Touche.
 Sydney, from North Shore : By C. H. Hunt.

Water-colours.

Off the Eddystone : By Copley Fielding.
 Gib it Bacca, Boss : By J. R. Ashton.
 High Tide, Bondi : By F. B. Schell.
 A Solitary Ramble : By J. R. Ashton.
 Near Fulham Dock : By C. E. Hern.
 View of the Alhambra : By N. C. Stanier.
 Gateway, Granada : By N. C. Stanier.
 Interior, Granada : By N. C. Stanier.
 A Sketch : By J. Mather.
 A Seat in St. James' Park : By G. F. Pinwell, R.W.S.
 Bazaar Gossip : By Chas. Robertson, R.W.S.
 Llyn Elsi, North Wales : By W. H. Raworth.
 Arts Applied to War (copy) : By C. Morton, after Sir Frederick Leighton's Cartoon.
 Cathedral of Saintes : By Lennard Lewis.
 St. Alban's Cathedral : By H. Hine, R.I.

Black and White.

7 Autotypes of New Guinea : By Lindt.
 Andromeda (Mezzotint engraving) : After F. Goodall, R.A.
 Christ on Calvary : Etched by C. Koepping, after Munkaczy.
 Little Redcap (Pastel Head) : By Madame Schwartz.

The

The total number of visitors during the year was 195,050, being an increase of 17,708 on that of the previous year.

The average on Sundays was 1,565, and on week-days 360.

The following works of art were presented to the Gallery during the year :—

An oil painting, "Oxen Ploughing": By Thos. L. Devitt, Esq.

An oil painting, Portrait of H. W. Pickersgill, R.A., painted by himself: By C. Newton, Esq.

A marble group, "Romeo and Juliet": By G. F. Todman, Esq.

A plaster bust, "Leichhardt": By John Rae, Esq.

A Jubilee Medal: By the Master of the Mint.

A Centennial Medal: By the Master of the Mint.

An application made to the Government, through the Agent-General, by the Anglo-Australian Society of Artists, for the use of a room in the Gallery for the purpose of holding an exhibition of pictures which they proposed sending to Sydney, having been submitted to the Trustees, it was agreed, subject to the sanction and approval of the Government, to allow the Society the use of the black and white Gallery, in accordance with which a message was cabled to the Society by the Government through the Agent-General, who spoke very highly of the objects of the Society—the aims and purpose of which are stated to be as follows :—

"The Society is formed for the purpose of affording the Australian public the opportunity of becoming acquainted with contemporary English Art, and for the furtherance, culture, and promotion of the Fine Arts in the Australian Colonies."

"The Widower," by Luke Fildes, A.R.A., having become seriously cracked, was sent to England to the artist to be renovated, that gentleman having kindly undertaken to restore it.

The number of students permitted to copy in the Gallery was increased by twenty, the total number now being sixty-eight, and there was a fair average attendance throughout the year. A platform has been provided at the request of the students to enable studies to be made from pictures highly hung.

It was arranged, by permission of the Minister, that Mr. Sydney Dickinson should be engaged to give four lectures on art in the Gallery; these were delivered to large and appreciative audiences, and afterwards published—copies being obtainable at the Gallery.

A sum of £300 having been placed on the Estimates for the purpose of calling for competitive designs for the completion of the building, the matter is now under consideration.

The Trustees desire to express great regret at the resignation of the Hon. Sir Alfred Stephen, C.B., G.C.M.G., the President of the Board, and consider the thanks of the public are due to that gentleman for the interest taken by him in the promotion of art in the Colony.

The Trustees also desire to express their regret at the resignation of the Hon. H. C. Dangar, who for so many years assisted them by his counsel.

Messrs. J. R. Ashton and B. R. Wise, having been appointed as Trustees by the Government, have taken their seats at the Board.

The Trustees desire to especially direct the attention of the Government to the present unsightly appearance of the exterior of the Gallery, and to the necessity for additional space, and to urge the advisability of proceeding as soon as possible with the completion of the building.

On the completion of the Gallery the Trustees hope to have accommodation for art classes, for loan collections, and for the proper exhibition of works by Colonial artists.

E. L. MONTEFIORE,
President.

1888-9.

NEW SOUTH WALES.

SYDNEY FREE PUBLIC LIBRARY.

(REPORT FROM TRUSTEES FOR 1888-9.)

Presented to Parliament by Command.

The Trustees of The Free Public Library to The Minister of Public Instruction.

Sir,

Sydney, 13 March, 1889.

I have the honor to transmit to you the Eighteenth Annual Report of the Trustees of the Free Public Library, for the year 1888-89.

2. It is with regret that the Trustees have, since the date of their last Report, had to place on record the decease of one of the late members of the Board, the Right Hon. William Bede Dalley, P.C., Q.C., M.L.C., whose death took place on the 28th of October last.

3. At a meeting of the Trustees held on the 14th November, the following resolution was passed, viz. :—"That this Board desires to record its sense of the great loss which has been sustained by the Free Public Library, and the Colony at large, in the decease of the Right Hon. William Bede Dalley, P.C., Q.C., M.L.C. (one of the first appointed Trustees of the Library), and to express the same to the surviving members of his family." A copy of this minute was transmitted to his eldest son.

4. The vacancy in the Board, occasioned by the death of the Right Hon. William Bede Dalley, P.C., Q.C., M.L.C., has been filled by the appointment of the Hon. John Fitzgerald Burns, Esq., M.P. (late Colonial Treasurer), and is notified in the *Government Gazette* of 11th December, 1888.

5. During the past year 6,381 volumes have been added to the Library, increasing the total number on the 31st December to 82,343 volumes. The classes under which these additions have been made are given in A of the Appendix.

6. The number of visits to the Reference Library during the year is 84,922, and to the Lending Branch 64,503, making a total of 149,425, being an increase upon last year of 10,222, but it is to be observed that the Library was closed for three months during 1887 for the purpose of removing the collection of books from the old building, now demolished, into the new wing in Bent-street. A still greater increase in the number of visits would in all probability have been shown had the Trustees been able to provide more sitting accommodation for readers, pending the building of the new Library in Macquarie-street.

7. The Reference Library was kept open to the public for 357 days, and the Lending Branch 343 days. In the number of volumes borrowed from the latter there is a decrease, as shown in the return for 1887-88, of twenty-three in the daily average, which is no doubt owing to the closing of the Reference Library, as stated above, having caused a greater number to go to the borrowing department in 1887.

8. Country Libraries have taken advantage of the privilege for borrowing boxes of books to the full extent to which the trustees could, with only thirty-eight boxes to lend, meet the demands made upon them, while there have been an average of fifteen applications each month in excess of the boxes available for loan. These boxes, which contain 2,918 volumes, have been issued eighty-four times, making a circulation of 6,283 volumes during the past year, and they have travelled 34,868

83—A

miles

miles to reach the various borrowing institutions, a list which will be found under Appendix E. One of the boxes which was lost by the Brewarrina School of Arts last year has now been paid for by the Committee of that Institution, and the books replaced, but the absence of this box has made the number of issues two less than last year

9. A list of the various donations, for which the Trustees have sent their acknowledgments, are given in Appendix H, and in addition to these they have received from the Corporation of the City of London a copper medal in commemoration of the visit of the Colonial and Indian representatives to London on the 25th June, 1886. They have also to report that the late Richard Sadlier, Esq., R.N., at the advanced age of ninety-five, presented to the Library, in view of its future publication at any time the Trustees may have funds at their disposal for such a purpose, his manuscript of "Christianity in the Southern Hemisphere," being an account of its rise and progress in the Colonies of New South Wales, and Victoria, South Australia, Western Australia, Tasmania, New Zealand, and missions in the Pacific, which the Trustees have accepted on the conditions above named.

10. In their last report the Trustees referred to the contract taken for the masonry of the new Library in Macquarie-street, which will probably be completed by the end of June next, and they have received a notification that the Colonial Architect has been instructed to prepare the necessary plans, &c., for the internal fittings. They desire to point out that, with the view of relieving readers from the overcrowding which is unavoidable in the present reading-room, it is desirable that a contract should be taken at the earliest date possible, as such a work can scarcely be completed in less time than eighteen months from the day of starting.

11. Owing to serious illness in the family of Mr. Orlando Stevens, Cataloguing Clerk in the Library, who has been twelve years in the Government service, the Board recommended that he be granted an extended leave of absence to enable him to proceed to Italy, and His Excellency the Governor, with the advice of the Executive Council, has been pleased to grant him six months leave on half-pay, from the 1st December last

12. The Trustees regret to report that on the 1st of February last a young man of education, about twenty-two years of age, and a new arrival in the Colony, stole from the reading-room Mrs. Ida Pfeiffer's "Lady's Second Voyage Round the World," two volumes cr. 8vo., and offered them for sale to Messrs. Angus and Robertson, booksellers, in Market-street, who seeing that the volumes had been mutilated suspected them to be stolen, and called in a constable, who brought the thief with the volumes to the Library. Here the Principal Librarian identified them as Government property, although the stamps had been obliterated, and several pages bearing the Library marks taken out. The man was charged with stealing the property, and on being searched nine of the missing pages were found in his pockets. He was taken before the Water Police Magistrate, when he pleaded guilty, and was sentenced to one month in gaol, also to pay four times the value of the book (£3) or a further three months imprisonment.

13. The use which has been made of the Library during the past year, as shown by the statistics given in the appendices, justifies the Trustees in stating that the Institution continues to render great assistance in the cause of public education.

I have, &c.,

W. J. STEPHENS,
Chairman of the Board.

3

APPENDIX A.

NUMBER of VOLUMES in the FREE PUBLIC LIBRARY on the 31st December, 1888.

Synopsis of Classification.	Reference Department	Lending Branch.	For Country Libraries.	Total.
Natural Philosophy, Science, and the Arts ...	6,236	3,073	517	9,826

APPENDIX G.

AMENDED REGULATIONS.

CONDITIONS upon which books in boxes, each containing lots of about 60 volumes, will be lent by the Trustees of the Free Public Library, Sydney, to Libraries in Country Districts of New South Wales:—

1. Books will be lent only to Trustees or Committees of Free Libraries, Schools of Arts, Mechanics' Institutes, or Libraries of Municipalities, that may be beyond the boundary of the City of Sydney.

2. All books authorized to be lent under these conditions shall be bound in good strong binding, placed in boxes constructed of nearly uniform size, and numbered from 1 upwards. Each box shall contain about 60 volumes, according to its catalogue, in which no alteration can be made.

3. Printed catalogue slips of the contents of each box, stating the value of each book, together with forms of application for loans, will be forwarded free of charge, on application being made to the Principal Librarian.

4. Trustees or Committees of Country Libraries, &c, wishing to obtain books on loan, must make application in writing, stating which particular box of books they desire to borrow; and their application must be accompanied by an undertaking in the form approved by the Trustees of the Free Public Library, Sydney, to indemnify them against loss.

5. Borrowers in their applications must give a full description of the Library, room, or building in or from which it is proposed to deposit or lend the books, and must specify the time for which they desire to retain the use of the books. They must also submit, for the approval of the Trustees, the conditions or regulations under which it is proposed to lend any books so obtained from the Trustees, who reserve to themselves the right of refusing any application without assigning any reason therefor.

6. No charge will be made for the loan of any box of books to cover the cost of freight, packing, and collating; but no receipt will be given for any books returned until they have been collated and an adjustment made for any loss or damage that may be discovered.

APPLICATION TO BORROW BOOKS.

Sir, We are desirous of borrowing the books enumerated in your catalogue slip No. 188 .
of the of which the names of the* are on behalf

It is proposed to retain the books for _____ months from the date of their despatch from Sydney, and to keep them (while not lent under the conditions mentioned below) in the building of which a full description is attached, in order that you may effect an insurance on the said books to cover risk against fire so long as they remain in the said building.

Enclosed herewith is a copy of the regulations under which we propose to lend the books, and we agree to sign an undertaking in the form required by the Trustees of the Free Public Library, Sydney.

We have the honor to be, Sir,

Your most obedient servants.

The Principal Librarian, Free Public Library, Sydney.

* Trustees or Committee.

UNDERTAKING to be signed by Borrowers of Books from the Free Public Library, Sydney, for use of
Libraries, &c., in Country Districts.

IN consideration of the books enumerated in the Catalogue hereunto annexed, together with the box containing the same, having this day been delivered to us by Robert Cooper Walker, the Principal Librarian of the said Free Public Library, Sydney, for the use of the
situate at _____ we, the undersigned, undertake and agree with the said Robert Cooper Walker, and also with the Trustees of the said Free Public Library, Sydney, and each and any two or more of them, as follows:—

1. The books will be kept in a suitable apartment of the said _____ to be approved of by the Trustees of the said Free Public Library, Sydney, and the public will be permitted to use the same during such hours only as shall be determined by the Trustees (or Committee, as the case may be), but may be lent by such of the said Trustees (or Committee, as the case may be) under the same Regulations as shall apply to books belonging to the said Institution.

2. The said books and box shall be returned to the said Robert Cooper Walker, or other Principal Librarian for the time being of the said Free Public Library, Sydney, at the expiration of _____ months from the date of despatch from Sydney, in good condition, allowance being made for reasonable wear.

3. We undertake to pay to the said Robert Cooper Walker, or other Principal Librarian for the time being of the Free Public Library:—

- (1) The value of every book not returned.
- (2) The estimated value of the injury done to any volume, work, set, or series, or box, of which value the Trustees for the time being of the Free Public Library, or any two of them, shall be the sole judges.
- (3) The value of the whole work, set, or series, in case any volume or part thereof shall not be returned within the time above mentioned.

4. In case default shall be made in the observance or performance of any of the conditions aforesaid, we will pay to the said Robert Cooper Walker, or other Principal Librarian of the said Free Public Library, Sydney, for the time being, the sum of £50 (fifty pounds) as liquidated damages.

Dated at _____ this _____ day of _____ 18 .

APPENDIX I.

LIST of Books missing from the Lending Branch during 1888,

No.	Author and Title of Book.	Borrowed by	No.	Author and Title of Book.	Borrowed by
1.33	H—Stowe's Pink and White Tyranny.	C. Leslie, Arthur-street, Moore Park.	6.97	H—Andersen's Danish Fairy Tales.	D. Loise, Charlotte-lane, Sydney.
2.70	H—Haddon's Book-keeping.	F. S. Naphthali, Point Piper Road, Woollahra.	7.121	B—Cox's Campaigns of the Civil War.	J. Leonard, 24, Francis-street, Hyde Park.
1.146	A—Weale's Dictionary of Terms.	J. R. Louat, Dock Road, Balmain.	7.147	H—Habberton's Helen's Babies.	R. C. Griffin, Crystal-street, Petersham.
3.178	H—Hammerton's Intellectual Life.	Miss A. Argles, 31½, Walker-street, Redfern.	9.62	H—Knight's Half-hours with Best Authors.	J. Hartley, 45, Bayswater Road.
3.184	E—Murray's Round about France.	C. Atkin, Royal Hotel.	10.148	H—Hughes's Tom Brown's Schooldays.	J. Edgar, Union-street, Pyrmont.
4.112	H—Wilson's Tales of the Borders.	T. Crampton, Haileybury Cottage, Double Bay.	10.162, 163	D—Kohl's Travels in Canada.	S. Norman, 60, Dowling-street, Paddington.
5.176	A—Carpenter's Spiritualism.	W. C. Burne, 53, Douglas-street, Redfern.	11.9	H—Napier's Military Life.	T. J. Gardiner, Tramway Offices, Randwick.
5.192	F—Blackie's Natural History of Atheism.	T. Milligan, Belmont House, Wynyard-square.	11.175	A—Jones's Evolution of the Human Race.	A. Thomas, 60½, Harris-street, Ultimo.

No.	Author and Title of Book.	Borrowed by	No.	Author and Title of Book.	Borrowed by
11.189	H—Fielding's Works of Fiction.	L. Jarrett, Australia-street, Woollahra.	33.96	H—Kingsley's Hereward the Wake.	E. Sauphy, Burwood Road.
12.51	D—Wilkinson's Sunny Lands.	T. Mitchell, Hunter's Hill.	33.148-150	H—Ward's Human Life.	Mrs. M. Schmidt, 99, Morehead-street.
12.157	A—Downing's Cottage Residences.	J. Cleburne, 69, Church-street, Newtown.	33.169-171	H—Tabor's Janita's Cross.	W. Harvey, Andreas-street, Petersham.
13.29	G—Burns's Poetical Works.	T. S. Sherratt, 22, Burton-street.	36.195	H—Lytton's What will he do with it?	S. Stokes, 129, Albion-street, Surry Hills.
13.147	B—Story of Waterloo.	O. Kelly, Rose-street, Darlington.	39.3	C—Clarke's Shakespeare.	E. Gilmour, John-street, Woollahra.
17.103	D—Jerrold's At Home in Paris.	A. H. Couldery, "Aubyn," Stanmore.	40.168-170	G—Swift's Works.	J. Sheideaux, 441, Bourke-st.
18.135	D—Butler's Travels in Assam.	C. Johnson, Mossman's Bay.	41.115	B—Dixon's Tower of London.	T. Beck, Record Office, St. Leonards.
22.37	D—Therry's New South Wales.	J. Norton, 273, Goulburn-street.	41.157	F—Parker's Collected Works.	G. Shaw, 65, Pitt-st.
22.38	A—Youatt's The Horse.	A. J. Kent, 53, Lewis-street, Redfern.	44.167	C—Scott's Albert Durer.	S. J. Laby, Sutton Forest.
24.40	D—Ede's Home among the Snow.	Mrs. A. M. Sharp, 243, Forbes-street, Darlinghurst.	45.152	A—Miller's Lockwood's Price-book.	E. Phillips, 50, Macquarie-street South.
25.171	B—Journal of the Plague Year.	J. C. Sayers, Victoria Cottage, Edward-street, North Shore.	45.157	A—Anderson's Persia.	A. Roy, 208, Pitt-street.
26.4	A—Gore's Scientific Discovery.	H. J. Gibson, St. Aubyn Terrace, Ridge-street, North Shore.	47.2	B—Keightley's Mythology.	T. Mozzall, 7, Erskineville Road.
26.43	H—Beeton's Household Amusements.	K. D. Moore, 31, Wigram-street, Forest Lodge.	48.96	G—Kendall's Australian Forest.	C. Hungerford, 146, Phillip-street.
26.58	C—Celebrated Men.	W. H. Jeffreys, 2, Brent-street, Balmain.	41.140	A—Gore's Electro-deposition.	R. Gibson, St. Aubyn's-terrace, North Shore.
26.189, 190	C—Alger's Life of E. Forrest.	H. Cooke, 129, Liverpool-street, Sydney.	49.150	C—Grote's Plato.	S. Lasker, 424, Castlereagh-street.
27.16	H—Dickens's Nicholas Nickleby.	T. Astley, 348, Crown-street.	52.180	H—Thackeray's Four Georges.	R. M'Grath, 114, Dowling-street.
27.20	H—Dickens's Tale of Two Cities.	R. Munro, "Royal Hyde Park Hotel."	53.94	C—Jolly's Robert Burns.	J. Wilson, "Hill Top."
27.76	H—Benjamin's Wrinkles and Recipes.	G. Mathieson, 36, Wells-street, Redfern.	55.80	H—Beeton's Three Scouts.	W. Franklin, Hargrave-street, Paddington.
27.77	C—Barnum, Life of.	S. Hornby, Survey Office.	57.6	H—Blackwood's Tales.	R. D. Stephens, 36, Castlereagh-street, Redfern.
27.80	D—Barnard's Three Years' Cruise.	R. O'Neill, 21, Little West-street, Darlinghurst.	57.55-57	C—Scott's Life of Napoleon.	P. S. Harris, Moore Park.
29.122	A—Arnold's Dairying.	J. Sherrington, 2, Denison-street, Woollahra.	57.87	G—Bell's British Theatre.	J. G. Neale, Gannon Grove, Hurstville.
30.35	H—Thackeray's Critical Reviews.	W. Hubbard, Elizabeth-street.	58.22	H—Baughan's Chiromancy.	W. F. Hooper, 135, Phillip-street.
30.55	H—Thackeray's Barry Lyndon.	J. Murdock, 11, Clarence-street.	58.117	D—Knox's Boy Traveller.	R. O'Neill, 35, Barcom-street, Darlinghurst.
30.84, 85	H—Thackeray's Vanity Fair.	J. J. Cooper, 391-3, George-street.	66.112	D—Gray's Switzerland.	Mrs. M. A. Jackson, 2, Melrose-terrace, Oxford-street, Paddington.
30.86, 87	H—Thackeray's Pendennis.	Miss E. Williams, Trafalgar-terrace, Petersham.	68.68	D—Kingsley's Water Babies.	B. Taylor, "Lakemba," Canterbury.
32.133-135	H—Martineau's Romance.	J. Waus, 23, Botany-street.	68.132	A—Harris's Honey Bee.	E. Meares, 147, Liverpool-st.
32.166-168	H—Ollier's Ferrers.	H. Stewart, 594, Kent-st.	70.43	C—The Hero Sacrificed.	T. West, Beattie-street, Balmain.
			71.124	C—Davitt's Prison Diary.	J. Molloy, 52, Princes-st.
			73.102	H—Harris's Coaching Age.	R. Logan, Pitt-street, Redfern.
			73.184	C—Pycroft's Oxford Memories.	J. A. Howison, 441, Darling-street, Ultimo.

1889.

NEW SOUTH WALES.

SYDNEY GRAMMAR SCHOOL.

(ANNUAL REPORT FOR 1888.)

Presented to Parliament, in accordance with the provisions of section 16 of Act 18 Vic., 1854.

The Chairman of Board of Trustees to The Minister of Public Instruction.

Sir,

Sydney Grammar School, 18 June, 1889.

I have the honor to submit the following Report of the proceedings of the Trustees, and of the progress of the School during the year 1888, in order that the same may be laid before His Excellency the Governor and the Executive Council, in accordance with the provisions of the Sydney Grammar School Act.

The only change which has taken place in the Board of Trustees has been occasioned by the resignation of Mr. Justice Stephen, and the election of the Honorable Dr. Andrew Garran in his place. Mr. Stephen had for many years held office as a Trustee, and rendered valuable services to the School. The Trustees desire to record their appreciation of such services, and an expression of regret that Mr. Stephen should have found it necessary to resign his seat. Throughout the year Mr. Justice Windeyer has been Chairman, and Mr. J. R. Street, M.L.A., Vice-chairman of the Board.

The full number of pupils has been maintained during the year, the average being 423.

The Trustees would again express their satisfaction with the able manner in which the whole teaching staff have performed their duties; and the continuance of the zealous interest in the welfare of the boys, and of the School generally, that has been displayed by the Head Master.

The yearly examination of the School was, as usual, conducted by gentlemen selected from other Institutions. In Classics, Mr. E. J. Robson, B.A., Lecturer and Tutor of Ormond College, in the University of Melbourne; in Mathematics, Mr. A. Newham, B.A., Lecturer in Mathematics in the Sydney University; in Modern Languages, English and Natural Science, Mr. Robertson, B.A., LL.B. Their reports are hereto annexed.

A Schedule is attached giving the names and emoluments of the Teaching Staff. A comparison of this with that given in the last Report will show the changes that have taken place in the Staff.

The Salting Exhibition at the University, which became vacant early in 1888, was awarded to Mr. Edward Milner Stephen.

The Morehead Exhibition was for the first time awarded at the close of 1888 to Mr. John Beverley Peden.

During the year the Trustees had under their consideration the matter of adapting some portion of the School Curriculum to meet the requirements of those boys who proposed to seek Commercial employment on leaving School, as also the question of improving the status and efficiency of the Modern Division of the School. Four Trustees and the Head Master prepared papers embodying their views on these questions, which have now been submitted to the Board, and it is believed that this discussion will be productive of good result. Meanwhile the Trustees have reason to believe that some of the defects in the Modern School, to which attention had been called in the reports of previous Examiners, have been overcome.

In view of the important part which Chemistry is now playing in the Manufacturing, Agricultural, and Mining Industries, the Trustees are strongly of the opinion that they should be in a position to afford instruction on this branch of knowledge. For this purpose a laboratory with the necessary appliances should be provided at the School. The Trustees therefore request that a sum of £1,500 be placed on the Estimates to enable them to build a room (none being available in the present building), and to provide the necessary equipment, and that the annual vote should be supplemented by £250, so that they could make provision for the necessary lectures to the boys who appear to be qualified for this line of study.

The funds in the hands of the Trustees are now only sufficient to defray the current expenses of the School, and no savings could be effected which could be devoted to improving or adding to the present buildings. These are now much more suitable than formerly for the work of the School, and have been maintained in fair order, but much can yet be done to them before they are worthy of the School or of the site they occupy.

A statement of the income and expenditure of the School for the past year is hereto appended.

I have, &c.,

W. C. WINDEYER,

Chairman.

SYDNEY GRAMMAR SCHOOL, DECEMBER, 1888.

Reports of the Examiners.

To the Trustees of the Sydney Grammar School,—

Mr. E. I. Robson, B. A., Lecturer and Tutor of Ormond College, in the University of Melbourne, late Scholar of Christ's College, Cambridge, reports as follows :—

Gentlemen,

I have the honor to submit to you a fourth time my report on the classical work of the Sydney Grammar School. I am pleased to be able again to express a satisfactory opinion.

In the sixth form which I have examined only in unseen work, the averages of this year will not be found to compare favourably with those of 1887. Two principal factors have contributed to this result. First, the difficulty of the papers set, and secondly, a want of strength, by no means unaccountable, in the form. With one exception no boys have been in the form for more than a year; while the large increase in numbers as compared with last year naturally leads to a preponderance of mediocrity. But these boys have done really well throughout, and in composition, at least, the whole form shows signs of having been carefully taught, and though some may have failed, yet it was not for want of effort. In sight translation there is not a very good result, but this is rather, I imagine due to want of practice in this class of work.

The fifth form is in a better condition than I have yet known it. Their knowledge of the subjects is not only good, but is better presented than heretofore. Some really good papers were submitted throughout, and the Latin unseen translation calls for special commendation. I was glad to see my recommendation of last year followed and less prepared work presented.

The upper fourth form has done even better than in previous years, its one failure being in sight translation in which, I understand, the boys have had no practice.

With the material of these two forms there is every reason to hope for some really good results in the sixth next year. One fault which crops up somewhere or other in every form of the Upper School I cannot omit to notice. There is great need to cultivate better expression when translating from Latin or Greek. This fault is naturally more marked in the unseen work than in the papers on prepared books, though in the lower forms it is also conspicuous in the latter. I am of opinion that if time can be found, more writing of translations should be done throughout the Upper School. *Viva voce* translation is necessarily, especially in the lower forms, of a fragmentary nature. These forms might be set to translate, on paper, passages which they have already done orally in class, though personally I should like to see more sight translation attempted. As a form of mental, not merely linguistic training the importance of sight translation whether from dead or modern languages, cannot be over-estimated. Pen and paper ought to be, to the boy, as to the French philosopher, a great incentive to thought.

The Lower School work is mostly good throughout, showing considerable improvement upon last year's standard. In the upper forms there is again a slight tendency to know the advanced and more difficult work better than the elementary. There is a tendency among the better boys to see pitfalls where none exist. It is to be hoped that soon a knowledge of Latin and Greek Grammar will not mean a precise acquaintance with irregularities, many of which exist only in the grammarians' or examiner's brain. I need to repeat, though scarcely so emphatically, my last year's remark about quantities. The Lower School are still grave offenders in this respect, and do not, even in the higher forms, seem to have been impressed with the necessity of a correct pronunciation.

Mr. W. Newham, B.A., late scholar of St. John's College, Cambridge, Evening Lecturer in Mathematics in the University of Sydney, reports on the Mathematics as follows :—

Gentlemen,

It is once more my duty to report to you upon the results of the Christmas Examinations in Mathematics at the Sydney Grammar School, and generally as to the present state of Mathematical teaching in that Institution.

During the whole time, extending now to four years, that I have had the honor of acting as an Examiner the school has been to a considerable extent in a state of development and experiment, the object being to satisfy the demand which exists that the boys should be prepared to pass certain definite examinations at particular stages of their career, and yet not to interfere in any way with the high standard of mathematical culture which this school has always endeavoured to impart to its scholars. This is by no means an easy task to accomplish, but an important step in this direction has been taken during the past year in the formation of two classes, parallel roughly speaking to Divisions II and III in which boys are specially prepared for the Junior Examination. These classes have as yet been formed for too short a time for me to speak confidently as to the result; but I regard the experiment as a very hopeful one, and as the best way out of the difficulty, which is undoubtedly caused by the Junior Examination, in satisfactorily arranging the school Mathematical course. The teaching of Higher Mathematics has, I regret to say, been to some extent sacrificed in consequence of these changes, there being only eleven boys who sent in papers in Trigonometry this year as compared with twenty-seven in 1886; but I am confident that this falling off is only temporary; and that in a very short time it will be found possible to combine increased attention to the Public Examinations with a maintenance of the high standard hitherto reached by the school. I am glad to hear that Mr. Newbury has applied for extra time for Mathematics. If the Head Master can see his way to grant this request, I have no doubt that the result will prove most satisfactory.

Turning to particular subjects, I find a marked improvement in the Lower School and in the less advanced part of the Upper School in all their Mathematical subjects. The Arithmetic and Algebra are decidedly better, and the Euclid is written out with more intelligence and less verbosity. The definitions and questions dealing with fundamental ideas were the least satisfactory part of the Geometry; I am glad to hear that a modern edition of Euclid is to be introduced, which gives more assistance to learners than the one at present in use. This change cannot fail to produce a great improvement in this subject.

Owing to the rearrangement of the upper classes, I cannot confidently compare their work with last year's; but on the whole I think that the process of transition has affected them unfavourably. After allowing for the fact that some of the papers were harder this year than last year, the fact remains that some divisions, notably the IV, did not do as well as they ought to have done. The Arithmetic of Division I is also weak, and there are minor faults in some other divisions which I have pointed out more fully in my detailed report. These a little attention on the part of the masters will easily correct.

Taking the whole school together the results obtained were most satisfactory, and I am happy to be able to congratulate the Governing Body, Masters, and all others interested in the school upon the continued efficiency and progress of its Mathematical department.

Mr.

Mr. D. S. Robertson, B.A., LL.B., reports as follows :—

Gentlemen,

I have the honor to report that I have for the third time examined the Modern School in German and French, with results which, if not evidence of such progress as was shown at the examination of 1887, are still satisfactory in every respect.

Senior English, of which in previous years I had been able to speak in terms of high commendation, has not been included in my work this year, having been examined at an earlier date. On the other hand, I have now for the first time examined the French of the Upper and Lower Schools, and have been able to compare the results of the former with those obtained in the same subjects by the boys on the Modern side. The advantage is slightly with the Classical boys on the average percentages, but the restriction to prescribed authors favours them, as do other obvious matters, so that I regard the results of the Moderns as about equal to those obtained by the Upper School.

I cannot pass without remark the position of the German language in the work of the school. I have examined fourteen divisions in French and only three in German.

Remarks on Chemistry, Division I., which has been examined by Mr. A. M. Nesbitt, M.A., Oxon., Lecturer at Trinity College, Melbourne, will be found in the detailed report.

APPENDIX, giving full details of the Examination Work.

CLASSICS—UPPER SCHOOL.

Form.	Subjects.	Percental results.			Remarks.
		Average.	Highest.	Lowest.	
UPPER SCHOOL VI. 12 boys.	Latin Prose	52	71	35	The way in which the form attacked the historical piece showed that they had been taught to appreciate the differences of Latin and English idiom. The second piece was rather too hard, but one or two fair versions were forthcoming.
	Greek Prose	61	75	45	The better part of the form showed some good work, and all made a good attempt at the first piece. Many fail however in consecution of tenses, and a better acquaintance with conditional sentences should have been shown in the second piece. Accents are good in the upper part of the form.
	Latin Translation (unseen)	48	80	20	Some good, but most too content with a slipshod average of the meaning. A better knowledge of the vocabulary should have been shown, and considerably more common sense. There was not enough vigour or boldness displayed.
	Greek Translation (unseen)	58	80	20	Better boys did fairly, but most appear to have been discouraged by the difficulty of the paper. One piece was rendered harder by two misprints. Vocabulary rather weak, and more vigour required.
	Critical Paper	42	76	21	Better boys do fairly well. There is a want of knowledge of the Greek negatives, and the test sentences for translation into Latin should have been better done. Question 10 elicited a satisfactory amount of general information from the better boys.
	Greek and Roman History	42	74	20	Well done by two boys, whose work shows great improvement on that of last year in arrangement and conciseness.
V. 18 boys.	Lucian: Piscator.....	67	92	46	The remainder of the form might have known more facts. Translation mostly good. Bye questions often very well and intelligently answered. A few boys attacked the piece set for retranslation particularly well. Parsing is indifferent.
	Cicero pro lege Manilia ...	67	85	55	Translation mostly good. The bye questions show in some cases a want of familiarity with Latin sentence structure, which ought to be cultivated in this form.
	Latin Prose	57	83	31	The versions of the continuous piece scarcely showed enough style or accuracy. Boys often aim at a periodic style, without paying much attention to the sequence of ideas. More knowledge of the moods and tenses should have been displayed on the sentences.
	Greek Prose	64	92	50	In many cases a great want of life. Elementary mistakes rather too common, and particles too much at haphazard.
IV.—A. 20 boys.	Latin Unseen Translation and Grammar.	68	92	41	The grammar might have been better done. The translation was in several cases particularly good.
	Greek Unseen Translation and Grammar.	58	80	46	The translation was often too much rushed at and the meaning simply roughly averaged. One or two rather common phrases and constructions generally missed. In the grammar questions a much better knowledge of Greek accidence was shown than in the Greek Prose paper. Scarcely enough known about indirect speech and prepositions.
	Roman History	51	69	14	Two or three knew their facts and could arrange them, but several were lacking both in facts and arrangement.
	Lucian: Piscator.....	63	87	45	The same paper as set for Form V but rather less stringently marked. The remarks on the work of Form V on this paper apply equally well here.
	Cicero pro lege Manilia ...	61	77	44	Marked to the same standard as in Form V. The translation was on the whole good, though there were some failures. The bye questions, were well done, except that in explaining points of grammar boys often apply terms which they do not seem to understand.
	Latin Prose	66	91	25	The paper showed a good knowledge and power of application of the book work.
	Greek Prose	66	88	45	Fairly well done, but rather too many mistakes in accidence, and want of vocabulary. Rather more acquaintance with the particles might have been shown.
	Unseen Translation.....	60	85	25	The form has had no practice in this kind of work and consequently for the most part failed. A few however did much better than was under the circumstances to be expected.
IV.—B. 25 boys.	Grammar	64	83	47	Both in Greek and Latin the knowledge of accidence was very satisfactory.
	Cæsar and Latin Grammar	67	80	40	Translation rather lacks style and in one of the pieces there might have been more accuracy, too many points being missed. A few boys show an intelligent appreciation of sentence structure, and in accidence the form as a whole did very well.

CLASSICS—UPPER AND LOWER SCHOOL.

Form.	Subjects.	Percental Results			Remarks.
		Average.	Highest.	Lowest.	
IV.—B (continued).	Latin Prose	46	71	19	The paper set covered too much ground, at the same time more familiarity with their book work might have been shown.
	Greek Grammar	61	81	42	On the whole good.
	Greek Prose	69	86	52	The knowledge of accidence shown is good, but there should be a little more attention paid to minor points.
REMOVE. 22 boys.	Caesar and Latin Grammar	58	77	31	The translation is generally poor. Perhaps the work was a little hard for the form. Boys have little idea of putting an English sentence together. Spelling often very bad. Parsing was not often well done, the wildest theories being often hazarded about the connection of words. Accidence much more satisfactory.
	Latin Prose	43.5	85	5	Not good, with a few exceptions. Some boys seem to have little idea how to put a Latin sentence together. False concords, especially with persons of verbs, are numerous.
	Greek Grammar and Prose	50	71	36	Grammar generally fair, sometimes good. The Prose was not well done, except in a few cases. Boys seemed often too careless to take the hints given them.
LOWER SCHOOL. III.—A. 31 boys.	Latin Accidence	70	89	55	Some of the work very good, and none very bad. None under half marks.
	Latin Sentences	68	94	41	Very good on the whole; a slight tendency to fail in the more elementary part of the paper. The order of words is often too artificial.
	Greek Grammar	52	86	28	Some did well, but the work is necessarily very uneven.
	<i>Vivá Voce</i> (Latin)	The form answered well and readily. About 65 per cent. of right answers were obtained.
III.—B. 24 boys.	Latin Accidence	69	89	44	Work not so uniform as in III A., but some individually better results.
	Latin Sentences	59	84	18	Too many elementary mistakes, such as a disregard of concords. The more advanced work was better done than the elementary.
	<i>Vivá Voce</i>	The form answered well on the points of accidence, but parsed badly. Their quantities are bad. About 60 per cent. of good answers were obtained.
II.—A. 23 boys.	Latin Accidence	69	92	58	Some of the work very good, and the results on the whole very satisfactory.
	Latin Sentences	78	93	51	Some very good work; mistakes not frequent and not often stupid.
	<i>Vivá Voce</i>	About 60 per cent. of good answers obtained. The relative pronoun rather a puzzle.
II.—B. 25 boys.	Latin Accidence	74	83	61	A very satisfactory result.
	Latin Sentences	74	88	51	A very creditable paper.
	<i>Vivá Voce</i>	About 67 per cent. of good answers given.
I.—A. 30 boys.	Latin Accidence	63	84	35	A very fair paper, but perhaps might have been more even.
	Latin Sentences	75	94	28	Both sentences and parsing good. Scarcely any boys know the Latin for neither—nor.
	<i>Vivá Voce</i>	About 63 per cent. of good answers given. Quantities rather bad.
I.—B. 30 Boys.	Latin Accidence	40	53	29	A rather higher standard of accuracy might have been reached.
	Latin Sentences	63	83	33	Sentences often very good, but translation into English and parsing too often missed.
	<i>Vivá Voce</i>	About 48 per cent. of good answers.
I.—C. 24 Boys.	Latin Accidence	44	80	11	Work not unnaturally very uneven.
	Latin Sentences	39	85	3	Not much notion of translating from Latin into English, or of parsing. English into Latin varies between excellence and zero.
	<i>Vivá Voce</i>	About 58 per cent. of good answers. <i>Vivá voce</i> parsing not very brilliant.
LOWER SCHOOL. I.—B. 25 Boys.	French	64	85	27	Very good except in sentences.
I.—A. 26 Boys.	"	65	85	50	Very good except in the sentences.
II.—B. 23 Boys.	"	76	88	58	Very good, fair in sentences.
II.—A. 20 Boys.	"	77	89	57	Very good. Sentences better done than in 2 B.
III.—B. 19 Boys.	"	67	98	45	Good; last questions not well answered.
III.—A. 27 Boys.	"	63	81	40	Good. Better than 3 B in sentences, but not so strong in accidence. In all these lower school divisions the accidence is well known so far as the boys have gone, but they need constant practice in easy translation from French to English, and from English to French.
UPPER SCHOOL. DIVISION I. 16 Boys.	French	64	92	34	Very good all round. Translation better than that of Modern I. Composition—satisfactory.
DIVISION II. 23 Boys.	"	54	81	30	Good in general. Translation into French—indifferent. Sentences done badly. These boys do not know the rules as to position of personal pronouns in a French sentence.
DIVISION III. 23 Boys.	"	64	84	42	Very good. Ten pages of the author is very little to read in a year. The choice of author is scarcely a happy one.
DIVISION IV. 25 Boys. MODERN.	"	46	74	30	Good. I still think the boys of this division might read an easy author.
DIVISION I. 8 Boys.	"	61	75	51	Grammar—good. Translation—unsatisfactory. No boy in the division translated the first two lines of the passage from "Le Cid" correctly.
DIVISION II. 16 Boys.	"	50	72	16	Grammar—fair. One mistake in translation universal.
DIVISION III. 24 Boys.	"	55	78	26	Grammar—good. Translation in general not so good as it might be.
DIVISION IV. 14 Boys.	"	40	54	30	A fair result, not quite equal to that of the corresponding division in the upper school.

CLASSICS AND MATHEMATICS—UPPER AND LOWER SCHOOL

Form.	Subjects.	Percental Results			Remarks.
		Average.	Highest.	Lowest.	
DIVISION V. 27 Boys.	French.....	37	65	16	
DIVISION I. 5 Boys.	German.....	60	81	46	Grammar and translation—very good, but composition and sentences—indifferent. The boys in the first German division of the Modern Side should translate English into German much better than they do.
DIVISION II. 14 Boys.	„	62	84	36	Translation from German very good. English into German exceedingly bad.
DIVISION III. 25 Boys.	„	48	72	25	Some papers very good. The boys in general are not accurate in Grammar, have a limited vocabulary, and know very little about the construction of a sentence.
MODERN I. 21 Boys.	Special History	38	75	11	Not quite a satisfactory result. Question 1—badly answered. One very good paper.
24 Boys.	English Composition	45	85	18	A few essays very good. The majority indifferent.
MODERN II. 20 Boys.	Special History	51	85	19	Some very good papers. Questions 6 and 7 not well done.
27 Boys.	General History	44	74	25	Question 6 not answered. Questions 1, 3, 5, 8, badly answered.
25 Boys.	English Composition	55	70	35	The compositions in the divisions are in general promising. A few are very good both in matter and arrangement.
MODERN III. 21 Boys.	Special History	46	73	21	Questions 6, 7, 8, 9, not well done.
24 Boys.	General History	44	59	19	These boys sometimes answered correctly part of a question which had been wrongly answered by every boy in Division II.
23 Boys.	English Composition... ..	42	60	25	Fair all round.
MODERN IV. 22 Boys.	English History	48	75	28	A fair result.
20 Boys.	English Composition	44	70	10	Punctuation not well understood, and the personal pronouns used in a strange confused way.
22 Boys.	English Grammar and Author.	59	72	44	Good knowledge of the text and allusions. Analysis might be improved. Questions 6, 7, 8, fairly answered.
24 boys.	Geography	41	73	16	Questions 2, 3, 4, satisfactory. Maps—bad.
MODERN V. 22 boys.	English History	35	61	16	The answers show abundant proof of the influence of the text-book, the form being strong in trivial anecdotes and a little weak in important facts.
22 boys.	English Composition	37	60	10	Too much bad grammar and slang.
21 boys.	English Grammar and Author.	35	57	18	Question 1, not answered as the form had not finished "The Traveller." Fair knowledge of the meaning of allusions. Analysis bad. Questions 6, 7, good.
22 boys.	Geography	37	70	19	Maps rather better done than by Modern IV.
DIVISION I. 14 boys.	Chemistry.....	54	74	28	Question 2. Principal points of reason for answer either omitted or wrongly stated. Question 3. In no case was the correct result sent in. Question 5. Only one boy gave the correct equation. In other respect satisfactory. Two boys showed excellent work and the papers of three others were decidedly good.
DIVISION II. 21 boys.	„	29	69	8	
DIVISION III. 25 boys.	„	20	59	...	
UPPER SCHOOL. DIVISION I. 16 boys. 2 absent.	Arithmetic	62	84	31	Paper rather harder than that set last year; the marks obtained greatly diminished. I think that the division ought to have done better.
	Algebra to Binomial	44	65	25	Better on the whole than last year, specially in the higher part of the paper. Wanting in finish in the harder examples; they go far enough to show that they know the method to be applied; but stop short where a little originality is required.
11 boys.	Euclid, Books I-VI.	55	79	38	Propositions well written out; it is a pity that they do not do more riders. Eleven papers sent up; two very creditable, and five very fair.
1 boy.	Analytical Conics and Differential Calculus.				One paper, sent in by Taylor, shows good knowledge of the subjects as far as he has read.
4 boys.	Mechanics and Geometrical Conics.				Four papers in mechanics and two in conics. The standard is rather lower than last year, but two papers in each subject are very promising.
DIVISION II. 25 boys. 2 absent.	Arithmetic	53	79	28	Work is accurate, but they are inclined to shirk questions in decimals and fractions.
	Algebra to Quadratics.....	44	65	25	Work accurate and neat, but the standard of the class not quite so high as it was last year, or as the position of the division in the school requires.
DIVISION III. 25 boys. 1 absent.	Euclid, Books I-VI.....	57	69	34	Book work very well written out; but they sometimes cut it too short. Riders not much attempted.
	Arithmetic	50	81	23	Not a very strong division, but the work is well done and the class well together.
	Algebra to Simultaneous Simple Equations.	54	97	27	Work very variable; some good, others very bad.
	Euclid, Books I-III	63	97	30	Well drilled; show a good acquaintance with the minutiae of the propositions.
DIVISION IV. 28 boys. 1 absent.	Arithmetic to Compound Interest.	40	79	20	This division has not done well as a rule. Their work is very inaccurate.
	Algebra to Equations	41	70	19	Best subject of this class. Weak in G.C.M. and L.C.M.
	Euclid, Books I and II....	39	78	13	Results in this subject very poor. Very few of the boys can be trusted to write out a proposition correctly.

MATHEMATICS—UPPER AND LOWER SCHOOL—continued.

Division.	Subjects	Percental Results			Remarks.
		Average.	Highest.	Lowest.	
DIVISION V. 29 boys. 1 absent.	Arithmetic to Compound Interest.	51	72	26	A very good division as far as they go. They would have done better, but for the employment of clumsy methods of working in some questions. Results sent up without work in too many instances; otherwise very good.
	Algebra to Simple Equations.	57	100	23	
DIVISION VI. 32 boys. 3 absent.	Div. I. Euclid Book I.	66	94	38	} Ought to learn to divide their propositions up into steps to a greater extent in writing them out, otherwise excellent.
	Division II. Book 1-25 ...	74	100	36	
DIVISION VII. 27 boys. 5 absent.	Arithmetic	52	77	33	Quite satisfactory. Very various. Display a good deal of intelligence in their work, considering that they are quite beginners.
	Algebra and Euclid Elementary.				
JUNIOR I. 23 boys. 3 absent.	Arithmetic	45	84	20	Averaged on the same standard as the two top divisions. Work good, but more boys ought to have attempted the theoretical question.
	Algebra various to Quadratics.	42	87	25	
JUNIOR II. 27 boys.	Euclid Books I-IV	59	85	23	Decidedly good, some very fair attempts at problems.
	Arithmetic	54	89	27	
LOWER SCHOOL. DIVISION I. 30 boys.	Algebra to Equations	54	78	25	Satisfactory, but I was disappointed to find that no one was successful with the problem.
	Euclid, Books I and II ...	55	77	31	
DIVISION II. 25 boys. 1 absent.	Propositions well written out, but with two many slips, due apparently to carelessness or hurry.				The material not quite so good as last year. Good with the exception of factors and fractions. Rather inaccurate.
	Arithmetic to Discount ...	58	84	27	
DIVISION III. 24 boys. 2 absent.	Algebra various to Equations.	Work particularly good, specially in decimals and fractions. Class includes several very promising boys; good average class on the whole. Very fair.
	Euclid various to Book II.	
DIVISION IV. 27 boys.	Arithmetic to Simple Interest.	60	88	39	Satisfactory. Good work for beginners.
	Algebra	
DIVISION V. 25 boys. 4 absent.	Euclid	Averaged on standard nearly as high as division above them. Work much more fully shown than by Divisions II and III.
	Arithmetic to Proportion..	52	66	25	
DIVISION VI. 27 boys. 2 absent.	Algebra	Quite satisfactory. Do not go very high, but work well as far as they do go.
	Arithmetic to Decimals ...	51	84	34	
DIVISION VII. 30 boys.	Arithmetic to Fractions ...	59	88	21	A good general result.
	Arithmetic to Weights and Measures.	54	76	31	
	Arithmetic, elementary	The upper portion of this division averaged 62 per cent. on the same standard as Division VI. An excellent result. The lower boys are mere beginners.

[*Supplement to the Australian Museum Report for 1888.*]

1889.

NEW SOUTH WALES.

TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM.

(REPORT OF THE COMMITTEE OF MANAGEMENT FOR 1888.)

Presented to Parliament pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this, the Ninth Annual Report of the Committee of Management of the Technological, Industrial, and Sanitary Museum.

1. The business of the Museum has been conducted by the same Committee as in the previous year, namely,—Sir Alfred Roberts, M.R.C.S., E.; Robert Hunt, Esq., C.M.G., F.G.S.; and Professor Liversidge, M.A., F.R.S.

2. The Museum has continued open every afternoon (Good Friday and Christmas Day alone excepted) during the year 1888. A statement of the number of visitors for the year will be found in Appendix II of this Report. The attendance of visitors continues to fall off, though the diminution in number as compared with 1887 is not so great as the Committee had to regret in last year's Report.

3. The falling off of the attendance of the public is clearly attributable to the impossibility of examining the exhibits, owing to the crowded state of the building. The mere storage of the goods for exhibition has rendered it necessary to encroach very largely upon the floor space. Numbers of specimens are packed upon each other in the show-cases, and many of the latter stand upon each other. Numerous valuable exhibits are packed away and cannot at present be otherwise dealt with. Every possible precaution against danger from fire has been taken, but the Committee feel that no means which they can adopt in the present building would prevent the total destruction of the collection in case of fire breaking out. The Committee feel the more anxious while contemplating this probability as the Museum has already been totally destroyed by fire, and the consequences of a second conflagration would be far more serious to the interests of the Museum than even the first one was. The Committee have felt it their duty to wait upon the Minister for Public Instruction, and represent to him the very serious state of the Museum, and are assured that he will give it his most earnest attention.

4. The Committee have the pleasant duty to report that the acquisition of suitable specimens, both by donation and purchase, has been important during the past year. They particularly desire to notice the munificent gift of Messrs. Whitbread & Co., brewers, of London, of a beam engine, by James Watt, the celebrated natural philosopher and civil engineer, which, originally erected in 1785, has been working ever since, and was only pulled down in 1887 to make room for a larger one. It is believed that it is the best existing specimen of its kind, and it is accordingly of great historical interest. The Committee also take this opportunity of acknowledging their indebtedness to Mr. E. A. Cowper, the well-known engineer, of London, for the great assistance he gave in helping to secure this gift.

The Committee hope soon to be able to report the acquisition of a building in which this valuable educational exhibit can be suitably displayed; meantime, it has been stored in a dry warehouse, and every care has been taken of it.

Messrs.

316—A

[2,153 copies—Approximate cost of printing (labour and material), £48 3s. 6d.]

Messrs. John Priestman & Co., Ashfield Mills, Bradford, Yorkshire, have generously presented a very valuable collection (in show-case) of merino wool in various stages of manufacture. This forms an imposing and instructive exhibit. The collection of raw wools (chiefly Australian) has received important additions during the past year, and the total exhibit of wools is one of the most useful and valuable in the Colonies. This has been secured through the generous co-operation of growers, and much labour on the part of Mr. Alfred Hawkesworth, Honorary Wool-classer to the Museum.

The Committee have to report the receipt of a further magnificent collection of specimens of economic botany from the Director of the Royal Gardens, Kew. The value of the gift cannot fully be estimated by the catalogue given in Appendix IV.

The Committee beg to add to this, their Report, the following Appendices :—

- I. Balance-sheet for the year ending 31st December, 1888.
- II. Attendance of visitors.
- III. List of specimens purchased.
- IV. List of specimens presented.
- V. List of specimens lent to the Museum.
- VI. List of books, periodicals, &c., purchased.
- VII. List of books, periodicals, &c., presented.
- VIII. List of diagrams, maps, &c., purchased.
- IX. List of diagrams, maps, &c., presented.
- X. List of specimens sent away in exchange.

The Common Seal of the Museum is affixed by order of the Board, this sixth day of August, 1889.

ALFRED ROBERTS,
ROBERT HUNT,
A. LIVERSIDGE, } Members of
Committee.

ALFRED STEPHEN, Crown Trustee.

J. H. MAIDEN,
Curator and Secretary.

APPENDIX I.

BALANCE-SHEET of the Technological Museum of New South Wales for the year ending
31st December, 1888.

APPENDIX III.
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
ECONOMIC ZOOLOGY.	
February 15.	
18,035	Two dressed sides of Porpoise Leather, blackened and waxed on both sides, suitable for boot-laces.
February 16.	
18,032	Rough-tanned whole Whale Hide, Southern baleen Whale (<i>Megaptera australis</i>).
18,034b	Fine rough-tanned sides Australian Porpoise Leather (<i>Delphinus Forsteri</i>), dressed on grain side and buffed; suitable for boot-uppers.
18,033a	Fine rough-tanned sides Porpoise Leather; suitable for belt-laces for machinery.
May 1.	
18,323	Deerskin, tanned (Swinhoe's Deer, <i>Cervus Swinhoei</i>), Formosa.
June 29.	
18,551	Two Ivory Tusks of Narwhal (<i>Monodon monaceros</i>); length, 6 feet 3½ inches; width, 2¼ inches (at base), 1 inch (at top). Both ends are sawn off; original length may have been 10 feet. Spiral in form; fine complete turns discernible. Have been used for bedposts.
ECONOMIC ENTOMOLOGY.	
Collection of Bee-keeping Appliances, as under:—	
January 31.	
17,828	Alley's Trap for excluding drones, and for retaining swarms.
17,829	Queen Cage "Pipe-cover," for enclosing a queen by pressing the cage into the comb upon some honey-cells.
17,830	Queen Travelling Cage. For sending queen bees through the post.
17,831	Bee Entrance Guard. To exclude drones on returning to their hive when flying out.
17,832	Traps for caging drones.
17,833	Honey-bottle, jar shape.
17,834	Eucalyptus Honey, one bottle.
17,835	Eucalyptus Honey, one can.
17,836	Capsule Screw-top Honey-bottles, two sizes.
17,837	Vegetable Parchment. For covering honey and preserved fruit.
17,838	"Perfection" Feeder. For regulating the supply of food to the bees when there is no honey to be gathered and it is desired to keep the queen laying.
17,839	Round Feeder. Used above the brood nest.
17,840	Simplicity Feeder.
17,841	Smokers, three sizes. For quieting bees by the use of smoke.
17,842	Bertrand's Fumigator. For fumigating bees with salicylic acid in cases of foul brood.
17,843	Spray Diffuser. Used for spraying bees with scented syrup before uniting, also for spraying combs affected with foul brood.
17,844	Dr. Clarke's Bee-keeper's Lotion. For bee stings.
17,845	Cheshire's Cure for Foul Brood.
17,846	Pure Salicylic Acid. Used for fumigating bees to cure foul brood.
17,847	Salicylic Acid and Borax. Used for medicating syrup for feeding bees, as a preventive against foul brood.
17,848	Heavy Artificial Comb Foundation. Used for placing in the frames to form the brood nest, and may be drawn out for extracting.
17,849	Light Artificial Comb Foundation. Used for bees just commencing work in the section-boxes to guide them in the direction to build their comb. Made from sheets of pure beeswax.
17,850	The Lever Foundation Fixer. For fixing foundation into section-boxes by pressure.
17,851	The Roller Foundation Fixer. For fixing foundation into frames and sections.
17,852	"Carlin" Wax-cutter. For cutting wax-comb foundation.
17,853	Cake of Beeswax; weight, 2 lb. 1 oz.
17,854	Wax-melter. This is a double-cased tin kettle. The outer reservoir holds hot water and the inner one contains the wax, which is thus kept in a liquid condition, and may be heated by being placed over a lamp or candle. The wax can be poured out slowly at the spout for cementing the combs or wax sheets so as to fix them in position within frames or sections.
17,855	Knife-heater. When uncapping the combs the knives should be used hot.
17,856	Honey-knives, Roots' large-size blade.
17,857	Honey-knives, Bingham pattern. For uncapping combs previous to extracting the honey.
17,858	Scraper-knife. For cleaning sections and hive.
17,859	Frame Block (for wiring). To hold the frames rigid while the wires are being stretched tightly across them.
17,860	Button-hook Wire-fixer. For pressing the wire into the comb foundation.
17,861	Tinned Wire. For wiring frames.
17,862	Frame Blocks. To hold frames square and true while being nailed.
17,863	Veils. To protect the face when manipulating bees.
17,864	The "Jones" Comb-holder. To hang at the side of the hive for receiving the first frame or two when manipulating.
17,865	Separator. For placing between the rows of sections to ensure a flat surface for the combs and an equal quantity of honey in each section-box.
17,866	Dove-tailed Section-boxes, 1-lb. size.
17,867	Block. For holding the sections square and true while they are being put together.
17,868	Uncapping Tin. Used for holding the comb while the cappings are being removed.

APPENDIX III—*continued.*
PURCHASES (SPECIMENS.)

Museum No.	Date and Description.
17,869	Travelling Honey crate. For section honey; 1-lb. size sections.
17,870	Queen Excluder, zinc. Spaces allow worker bees to pass through, but will prevent the queen or drones from passing.
17,871	Solar Wax-extractor. For smelting wax by the heat of the sun.
17,872	Ant-proof Hive-stand. The zinc trough, being supplied with water, forms an island, thereby isolating the hive from ants.
17,873	Voltaic Cell. For fixing wire into comb foundation.
17,874	Comb Box. For carrying combs to and from the hive when extracting honey.
17,875	Swarm Box. To pack bees for travelling; also very convenient for hiving and transporting a swarm.
17,876	Bar-frame Movable Comb Hive (Langstroth) standard size. Containing ten frames, movable floor-board, reducing entrance $2\frac{1}{2}$ storeys, each fitted with twenty-eight 1-lb. section-boxes.
17,877	Queen Cage (registered). Used for introducing a new queen.
17,878	Bar-frame Movable Comb Hive (Langstroth), standard size. Containing ten frames for brood nest, movable floor-board, reducing entrance, tin runners, and extra body fitted with four frames.
17,879	Centrifugal honey-extractor. To extract honey, remove the cappings with a knife, then place the frames near the wire gratings at each side, one comb against each grating; by turning the handle at a good speed the honey contained in the combs is thrown out of the cells by centrifugal force on to the side of the extractor.
	31 May.
18,464	Honey of Australian Native Bee, from Cambewarra, N.S.W.
	30 June.
18,564a	Wax of Australian Native Bee, from Cambewarra, N.S.W.

ETHNOLOGY.

31 January.

- 17,824 Nardoo stone, from Korningbirry Creek, 100 miles N.W. of Wilcannia, N.S.W. Collected by Mr. W. Bäuerlen.

In Brough Smith's "Aborigines of Victoria," i, 383, will be found a drawing of these stones, such as are used by the natives of the Darling. The following description is given:—

"The slab, generally of sandstone, is about 22 inches in length, 14 inches in breadth, and about 1 inch in thickness.* The handstones (*Wallong*) are round, or of an oval form, and vary in size, one is $4\frac{1}{2}$ inches in breadth and $1\frac{3}{4}$ inch in thickness; and another is 6 inches in length, $4\frac{1}{2}$ inches in breadth, and 3 inches in thickness. The *Wallong* have hollows cut in them, so as to be more easily held by the hand.

"Mr. Howitt says that the stones here figured like those usually seen at Cooper's Creek. In the flat stone there is a depression which leads out to the edge by a channel. In grinding grass, or *Portulaca* seed, a little water is sprinkled in by the left hand, and the seeds being ground with the stone in the right hand form a kind of porridge, which runs out by the channel into a wooden bowl (*Peechee*), or a piece of bark. It may then be baked in the ashes, or eaten, as it is, by using the crooked forefinger as a spoon."

ECONOMIC GEOLOGY.

7 February.

- 17,889 Specimen of Indurated Schist. Tibooburra, N.S.W.
 17,890 Silver-bearing Ironstone (two specimens). Mount Poole, N.S.W.
 17,897 Specimen of Copai, Native Sulphate of Lime, used as a substitute for lime. In making mortar it is mixed with a little more than its own quantity of sand.
 17,909 Gypsum from Whittabranah, Tibooburra.
 17,910 Gypsum from Yantara Lake, Milparinka.

28 November.

- 19,140 Clay suitable for Fictile Ware. Bounty River, Nerriga.
 19,141 Carbonate of Lead (Crystallized). Captain's Flat, Bungendore.

ECONOMIC BOTANY.

8 May.

- 18,362-3 Specimens of Japanese Pine (*Cryptomeria japonica*), polished and unpolished.

28 May.

- 18,451 Black Wattle Gum (*Acacia decurrens*). Sold in Sydney as "Chewing Gum."

Specimens to illustrate the utilization of Colonial Woods, as follows:—

14 June.

- 18,476 One Handspike. "Tallowwood." (*Eucalyptus microcorys*)
 18,477 One Picket. "Tallowwood."
 18,478 One Handspike. "Blackbutt." (*Eucalyptus pilularis*?)
 18,479 One Picket. "Blackbutt."
 18,480 One Handspike. "Blue Gum." (*Eucalyptus saligna*)
 18,480a One Picket. "Blue Gum."

* In the Technological Museum is a very fine pair of stones from the Korningbirry Creek, 100 miles N.W. of Wilcannia, and 80 miles south of Milparinka, N.S.W. The material is of fine-grained sandstone, inclining to quartzite. The dimensions of the bed-stone are 23" x 14" (widest part) x $3\frac{1}{2}$ " to 2", while those of the hand-stone are $5\frac{1}{2}$ " x 4" x $1\frac{1}{4}$ ". The hand-stone has no hollow cut in it, but it is well worn, and it is, of course, impossible to say what its original thickness was.

APPENDIX III—continued.
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
29 June.	
18,517	One Patent Double Block. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,518	One Patent Single Block. "Blackwood."
18,519	One Patent Double Block. "Beech." (<i>Gmelina Leichhardtii</i> .)
18,520	One Patent Single Block. "Beech."
18,521	One Small-size Double Block, 5½ inches. "Blackwood."
18,522	One Small-size Double Block, 5½ inches. "Blackwood." (With <i>lignum vitæ</i> pulleys.)
18,523	One Jib-sheet Block, 8 inches. "Beech." (With <i>lignum vitæ</i> pulleys.)
18,524	One Match Block, 7½ inches. "Beech." (With <i>lignum vitæ</i> pulleys.)
18,525	One Pair Dead Eyes, 7 inches. "Blackwood."
18,526	One Leader, 4 inches. "Cedar."
18,527	One Leader, 4 inches. "Cedar."
18,528	One Leader, 4 inches. "Cedar."
18,529	One Truck, 5 inches. "Beech."
18,530	One Belaying Pin. "Blue Gum?" (<i>E. saligna</i> .)
18,531	One Belaying Pin. "Blackwood."
18,532	One Cedar Table-leg, 6 inches.
18,533	One Cedar Table-leg, 5 inches, for Casters.
18,534	One Pair Shafts. "Ironbark." (<i>Eucalyptus siderophloia</i> .)
18,535	One Pair Shafts. "Spotted Gum." (<i>Eucalyptus maculata</i> .)
18,536	One Pair Shafts. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,537	One Pair Rims. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,538	One Pair Canoe Fronts. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,539	One Pair Cart-rails. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,540	One Pair Cart-rails. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,541	One Pair Cart-rails. "Blackwood." (<i>Acacia melanoxylon</i> .)
18,542	Two Pair Seat-rails. "Blackwood."
18,543	One Pair Cart-rails. "Mountain Ash."
18,544	One Pair Cart-rails. "Mountain Ash"
18,545	One Pair Cart-rails. "Mountain Ash."
18,546	Two Splash-boards. "Kauri Pine."
18,547	Two Riddle Hoops. "Kauri Pine."
18,548	One Sieve Hoop. "Kauri Pine."
18,549	One Set Waggon Bows. "Mountain Ash" and "Blackwood."
The following logs of timber from The Valley, Blue Mountains :—	
19 July.	
18,570	<i>Angophora lanceolata</i> ; Cav. "Apple-tree."
18,571	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringy-bark."
18,572	<i>E. corymbosa</i> ; Sm. "Bloodwood."
18,573	<i>Casuarina torulosa</i> ; Ait. "Forest Oak."
18,574-5	Two Cabbage-tree Hats made from the leaves of an Australian Palm. (<i>Livistona australis</i> , Mart.) These particular specimens came from the Illawarra District of N.S.W. The leaves are boiled, dried, and then bleached preparatory to weaving.
June 15.	
18,433	Kino (B.P.) Probably the produce of <i>Pterocarpus erinaceus</i> .
October 3.	
19,070	<i>Araucaria Cunninghamii</i> ; Ait. "Pine." (<i>Coniferæ</i> .) Richmond River, N.S.W. Collecting plate.
19,071	<i>Gmelina Leichhardtii</i> ; F. v. M. "Beech." (<i>Verbenacæ</i> .) Richmond River, N.S.W. Finial.
19,072-3	<i>Cryptocarya glaucescens</i> ; R. Br. "She Beech." (<i>Laurinæ</i> .) Nambuccera, N.S.W. Baluster; also specimen in the rough.
19,074-5	<i>Endiandra glauca</i> ; R. Br. "Teak." (<i>Laurinæ</i> .) Tweed River, N.S.W. Baluster; also sample of timber in the rough.
19,076-7	"Black Bean." (<i>Leguminosæ</i> .) Clarence River, N.S.W. Masonic column; also specimen of timber in rough.
19,078	<i>Gmelina Leichhardtii</i> ; F. v. M. "Beech." (<i>Verbenacæ</i> .) Richmond River, N.S.W. Specimen of timber.
19,079-80	"Red Bean." (<i>Leguminosæ</i> .) Clarence River, N.S.W. Chair-leg; also specimen of timber in the rough.
19,081	<i>Casuarina</i> sp. "Oak." (<i>Casuarinæ</i> .) Nepean River, N.S.W. Cornice-pole.
19,082	<i>Eucalyptus resinifera</i> ; Sm. "Mahogany." (<i>Myrtacæ</i> .) Myall Lakes, N.S.W. Table-leg.
19,083	"Ash." Richmond River, N.S.W. Hand-screw.
19,084	<i>Araucaria Cunninghamii</i> ; Ait. "Colonial Pine." (<i>Coniferæ</i> .) Richmond River, N.S.W. Carved bracket for mantelpiece.
19,085-6	<i>Dysoxylon</i> sp. "Rosewood." (<i>Meliacæ</i> .) Myall Lakes, N.S.W. Newel-post; also specimen of timber in the rough.
October 5.	
19,092	<i>Eucalyptus rostrata</i> ; Schlecht. "Red Gum." (<i>Myrtacæ</i> .) Melbourne. Kino.
December 4.	
19,146	<i>Eucalyptus resinifera</i> ; Sm. "Forest Mahogany." (<i>Myrtacæ</i> .) Nambuccera River, near the Bellinger River, N.S.W. Obtained through the Forest Branch, Lands Department, Sydney.

APPENDIX III—*continued.*
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
The following specimens have been acquired by the Collector for the Museum:—	
February 7.	
17,883	<i>Acacia cibaria</i> ; F. v. M. (Leguminosæ.) Olive Downs, Tibooburra, Grey Ranges, N.S.W. Seeds used as food by the Aborigines.
17,884	<i>Hakea lorea</i> ; R. Br. "Cork-tree." (Proteaceæ.) Olive Downs, Tibooburra, Grey Ranges, N.S.W. Log.
17,886	<i>Crinum flaccidum</i> ; Herbert. "Darling Lily." (Amaryllideæ.) Olive Downs, Tibooburra, Grey Ranges, N.S.W. An arrowroot is made from these bulbs, which may be used as food in times of scarcity.
17,891-3	<i>Eucalyptus terminalis</i> ; F. v. M. "Bloodwood." (Myrtaceæ.) Whittabranah, Tibooburra, Grey Ranges. Log, bark, and kino.
17,894	<i>Atalaya hemiglaucæ</i> ; F. v. M. "White-wood." (Sapindaceæ.) Whittabranah, Tibooburra, Grey Ranges. Log.
17,895	<i>Acacia aneura</i> ; F. v. M. "Mulga." (Leguminosæ.) Whittabranah, Tibooburra, Grey Ranges. Insect galls; used as food occasionally.
17,896	<i>Grevillea striata</i> ; R. Br. "Beefwood." (Proteaceæ.) Whittabranah, Tibooburra, Grey Ranges, N.S.W. Resin.
17,898	<i>Acacia sentis</i> ; F. v. M. "Prickly Acacia." (Leguminosæ.) Whittabranah, Tibooburra, Grey Ranges, N.S.W. Gum.
17,899	<i>Acacia salicina</i> ; Lindl. "Native Willow." (Leguminosæ.) Whittabranah, Tibooburra, Grey Ranges, N.S.W. Insect galls.
17,900-2	<i>Acacia homalophylla</i> ; A. Cunn. "Gidjah." (Leguminosæ.) Whittabranah, Tibooburra, Grey Ranges, N.S.W. Log, bark, leaves.
17,903-4	<i>Acacia</i> sp. (Leguminosæ.) Mount Wood, Tibooburra. Bark, leaves.
17,905	<i>Acacia</i> sp. (Leguminosæ.) Mount Wood, Tibooburra. Insect galls, 1st kind.
17,906	<i>Acacia</i> sp. (Leguminosæ.) Mount Wood, Tibooburra. Insect galls (aromatic), 2nd kind.
17,907	<i>Acacia pendula</i> ; A. Cunn. "Nilyah" (Leguminosæ.) Mount Wood, Tibooburra. Insect galls.
17,908	<i>Owenia acidula</i> ; F. v. M. "Mooley Apple." (Meliaceæ.) Mount Wood, Tibooburra. Timber (log).
17,912	<i>Acacia stenophylla</i> ; A. Cunn. (Leguminosæ.) Yantara. Leaves and bark.
March 29.	
18,193	<i>Acacia decurrens</i> ; Willd. "Green Wattle." (Leguminosæ.) Nerriga, N.S.W. Bark.
18,194	<i>Eucalyptus maculata</i> ; Hook. "Spotted Gum." (Myrtaceæ.) Nowra, N.S.W. Kino.
18,195	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringy-bark." (Myrtaceæ.) Cambewarra, N.S.W. Kino.
April 4.	
18,216	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) Cambewarra. Kino.
April 7.	
18,217	<i>Cedrela australis</i> ; F. v. M. "Red Cedar." (Meliaceæ.) Cambewarra. Bark.
18,218	<i>Tristania laurina</i> ; R. Br. "Water Gum." (Myrtaceæ.) Bangley Creek, Cambewarra. Bark.
18,219	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Bangley Creek, Cambewarra. Liquid kino.
18,220	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Bangley Creek, Cambewarra. Kino.
18,221	<i>Pittosporum undulatum</i> ; Andr. (Pittosporææ.) Cambewarra. Gum-resin (aromatic).
18,222	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) Cambewarra. Kino.
18,223	<i>Acacia binervata</i> ; DC. "Black Wattle." (Leguminosæ.) Cambewarra. Insect galls.
April 16.	
18,247	<i>Eucalyptus botryoides</i> ; Sm. "White Gum." (Myrtaceæ.) Cambewarra. Kino.
April 18.	
18,297	<i>Macrozamia spiralis</i> ; Lehm. "Burrawang." (Cycadeæ.) Cambewarra. Gum from the fruit stalk.
18,298	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Cambewarra. Liquid kino.
18,299	<i>Banksia serrata</i> ; Linn. "Honeysuckle." (Proteaceæ.) Cambewarra. Bark.
May 1.	
18,324	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) Cambewarra. Kino.
18,325	<i>Eucalyptus botryoides</i> ; Sm. "White" or "Scribbly Gum." (Myrtaceæ.) Cambewarra. Kino.
18,326	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Cambewarra. Kino.
18,327	<i>Casuarina suberosa</i> ; Otto & Diet. "Forest Oak." (Casuarineæ.) Cambewarra. Bark.
18,328	<i>Acacia decurrens</i> ; Willd. "Green Wattle." (Leguminosæ.) Braidwood. Bark.
18,329	<i>Acacia binervata</i> ; DC. "Blackwattle." (Leguminosæ.) Tomerong, Nowra, N.S.W. Bark.
18,330	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) Cambewarra. Kino.
18,331	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Kino.
May 5.	
18,345	<i>Syncarpia laurifolia</i> ; Ten. "Turpentine-tree." (Myrtaceæ.) Cambewarra. Bark.
18,346	<i>Ceratopetalum gummiferum</i> ; Sm. "Christmas-bush." (Saxifragææ.) Cambewarra. Bark.
18,347	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Bark.
18,348	<i>Eucalyptus botryoides</i> ; Sm. "White" or "Scribbly Gum." (Myrtaceæ.) Cambewarra. Bark.
18,349	<i>Macrozamia spiralis</i> ; Lehm. "Burrawang." (Cycadeæ.) Cambewarra. Gum.

APPENDIX III—*continued*.
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
May 4.	
18,350	<i>Ceratopetalum gummiferum</i> ; Sm. "Christmas-bush." (Saxifragæ.) Cambewarra. Gum. (Kinoid.)
18,351	<i>Acacia binervata</i> ; DC. "Black Wattle." (Leguminosæ.) Cambewarra. Piece of timber.
18,352	<i>Acacia binervata</i> ; DC. "Black Wattle." (Leguminosæ.) Cambewarra. Log (31).
18,353	<i>Syncarpia laurifolia</i> ; Ten. "Turpentine-tree." (Myrtaceæ.) Log (32).
May 5.	
18,354	<i>Eucalyptus botryoides</i> ; Sm. "White" or "Scribbly Gum." (Myrtaceæ.) Cambewarra. Log (33).
18,355	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) Cambewarra. Log (34).
18,356	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Log (35).
18,357	<i>Casuarina suberosa</i> ; Otto & Diet. "Forest Oak." (Casuarinæ.) Cambewarra. Log (36).
18,358	<i>Ceratopetalum gummiferum</i> ; Sm. "Christmas-bush." (Saxifragæ.) Cambewarra. Log (37).
May 11.	
18,366	<i>Banksia serrata</i> ; Linn. "Honeysuckle." (Proteaceæ.) Cambewarra. Log (38); from trunk.
18,367	<i>Banksia serrata</i> ; Linn. "Honeysuckle." (Proteaceæ.) Cambewarra. Log (39); from limb.
18,368	<i>Cryptocarya</i> sp. "Cork-tree." (Lauraceæ.) Cambewarra. Log (40).
18,369	<i>Eucalyptus amygdalina</i> , var.; Labill. (No local name.) (Myrtaceæ.) Cambewarra. Log (41).
18,370	<i>Cryptocarya</i> sp. "Cork-tree." (Lauraceæ.) Bark.
18,371	<i>Eugenia Smithii</i> ; Poir. "Lillypilly." (Myrtaceæ.) Cambewarra. Bark.
18,372	<i>Sterculia diversifolia</i> ; G. Don. "Kurrajong." (Sterculiaceæ.) Cambewarra. Bark.
18,373-4	<i>Syncarpia laurifolia</i> ; Ten. "Turpentine-tree." (Myrtaceæ.) Cambewarra. Oleo-resin and fruit.
18,375	<i>Eucalyptus botryoides</i> ; Sm. "White Gum." (Myrtaceæ.) Cambewarra. Kino.
18,376	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Kino.
18,377	<i>Eucalyptus botryoides</i> ; Sm. "White Gum." (Myrtaceæ.) Cambewarra. Insect galls.
18,378	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) Cambewarra. Insect galls.
May 21.	
18,431	<i>Eucalyptus maculata</i> ; Hook. "Spotted Gum." (Myrtaceæ.) Cambewarra. Log (42).
18,435-6	<i>Melia composita</i> ; Willd. "White Cedar." (Meliaceæ.) Cambewarra. Log (43), and also bark.
18,437	<i>Duboisia myoporoides</i> ; R. Br. "Cork-tree." (Solanaceæ.) Cambewarra. Log (44).
18,438-9	<i>Eugenia myrtifolia</i> ; Sims. "Red Myrtle." (Myrtaceæ.) Cambewarra. Log (45) and bark.
18,440	<i>Eucalyptus amygdalina</i> ; Labill. (Myrtaceæ.) Cambewarra. Bark.
18,441	<i>Cupania semiglaucæ</i> ; F. v. M. (Sapindaceæ.) Cambewarra. Log (46).
18,442	<i>Phyllanthus Ferdinandi</i> ; J.M. "Pencil Cedar." (Euphorbiaceæ.) Cambewarra. Log (47).
18,443	<i>Cryptocarya glaucescens</i> ; R. Br. "Beech." (Lauraceæ.) Cambewarra. Log (48).
18,444	<i>Baloghia lucida</i> ; Endl. "Brush Bloodwood." (Euphorbiaceæ.) Cambewarra. Log (49).
May 11.	
18,445	<i>Acacia decurrens</i> ; Willd. "Green Wattle." (Leguminosæ.) Cambewarra. Log (50).
18,446	<i>Cupania semiglaucæ</i> ; F. v. M. (Sapindaceæ.) Cambewarra. Bark.
18,447	<i>Phyllanthus Ferdinandi</i> ; F. v. M. "Pencil Cedar." (Euphorbiaceæ.) Cambewarra. Bark.
18,448	<i>Baloghia lucida</i> ; Endl. "Brush Bloodwood." (Euphorbiaceæ.) Cambewarra. Bark.
May 31.	
18,452	<i>Eucalyptus maculata</i> ; Hook. "Spotted Gum." (Myrtaceæ.) Cambewarra. Small slab timber (dressed).
18,453	<i>Syncarpia laurifolia</i> ; Ten. "Turpentine-tree." (Myrtaceæ.) Cambewarra. Timber (dressed).
18,454-5	<i>Stenocarpus salignus</i> ; R. Br. "Beefwood" or "Silky Oak." (Proteaceæ.) Cambewarra. Timber (dressed), and also a sample in the rough.
18,456	<i>Baloghia lucida</i> ; Endl. "Brush Bloodwood." (Euphorbiaceæ.) Timber (rough).
18,457	<i>Persoonia linearis</i> ; Andr. "Geebung." (Proteaceæ.) Cambewarra. Timber (rough).
18,458	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Timber (rough).
18,459-60	<i>Macrozamia spiralis</i> ; Lehm. "Burravang." (Cycadeæ.) Cambewarra. Hairy covering from fronds (Australian Pulu.) Gum from the same species.
18461	<i>Ceratopetalum gummiferum</i> ; Sm. "Christmas-bush." (Saxifragæ.) Cambewarra. Kinoid gum.
18,462	<i>Syncarpia laurifolia</i> ; Ten. "Turpentine-tree." (Myrtaceæ.) Cambewarra. Oleo-resin.
18,463	<i>Gymnostachys anceps</i> ; R. Br. "Settlers' twine." (Aroideæ.) Cambewarra. These long leaves are used for tying the legs of pigs, for hay-bands, &c., by farmers.
18,465	<i>Eucalyptus botryoides</i> ; Sm. "Blackbutt." (Myrtaceæ.) Cambewarra. Log (51).
18,466	<i>Ficus rubiginosa</i> ; Desf. "Fig-tree." (Urticaceæ.) Cambewarra. Log (52).
18,467	<i>Evodia micrococca</i> ; F. v. M. (Rutaceæ.) Cambewarra. Log (53).
18,468	<i>Bursaria spinosa</i> ; Cav. "Boxthorn." (Pittosporæ.) Cambewarra. Log (54).

APPENDIX III—*continued*.
PURCHASES—(SPECIMENS).

Museum No.	Date and Description.
18,469	<i>Eucalyptus botryoides</i> ; Sm. "Blackbutt." (Myrtaceæ.) Cambewarra. Bark.
18,470	<i>Ficus rubiginosa</i> ; Desf. "Fig-tree." (Urticaceæ.) Cambewarra. Cross-section of the stem.
18,471	<i>Evodia micrococca</i> ; F. v. M. (Rutaceæ.) Cambewarra. Bark.
June 18.	
18,484	<i>Eucalyptus siderophloia</i> ; Benth. "Ironbark." (Myrtaceæ.) Cambewarra. Log (55).
18,485	<i>Ceratopetalum apetalum</i> ; D. Don. "Coachwood" or "Leather-jacket." (Saxifrageæ.) Cambewarra. Log (56).
18,486	<i>Cupania semiglauca</i> ; F. v. M. (Sapindaceæ.) Cambewarra. (Log 57).
18,487	<i>Backhousia myrtifolia</i> ; Hook. "Grey Myrtle." (Myrtaceæ.) Cambewarra. Log (58).
18,488	<i>Claoxylon australe</i> ; Baill. (Euphorbiaceæ.) Cambewarra. Log (59).
18,489	<i>Ceratopetalum apetalum</i> ; D. Don. (Saxifrageæ.) Cambewarra. Kino.
June 22.	
18,490	<i>Eucalyptus</i> sp. (Myrtaceæ.) Cambewarra. Log (60).
18,491	<i>Eucalyptus</i> sp. (Myrtaceæ.) Cambewarra. Log (60a).
18,492	<i>Melaleuca leucadendra</i> ; Linn. "Tea-tree." (Myrtaceæ.) Cambewarra. Log (61).
18,493	<i>Eucalyptus tereticornis</i> ; Sm. "Blue Gum." (Myrtaceæ.) Cambewarra. Log (62).
18,494	<i>Eucalyptus</i> sp.; "Stringybark," "Messmate," or "Peppermint." (Myrtaceæ.) Cambewarra. Log (63).
18,495	<i>Ceratopetalum apetalum</i> ; D. Don. (Saxifrageæ.) Cambewarra. Bark.
18,496	<i>Backhousia myrtifolia</i> ; Hook. "Grey Myrtle." (Myrtaceæ.) Cambewarra. Bark.
18,497	<i>Claoxylon australe</i> ; Baill. (Euphorbiaceæ.) Cambewarra. Bark.
18,498	<i>Eucalyptus</i> sp.; (Myrtaceæ.) Cambewarra. Bark.
18,499	<i>Eucalyptus</i> sp.; (Myrtaceæ.) Cambewarra. Bark.
18,500	<i>Eucalyptus tereticornis</i> ; Sm. "Blue Gum." (Myrtaceæ.) Cambewarra. Bark.
June 29.	
18,501	<i>Eucalyptus piperita</i> ; Sm. "Peppermint" or "Messmate." (Myrtaceæ.) Cambewarra. Log (64).
18,502	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) Cambewarra. Log (65).
18,502a	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) Cambewarra. Bark.
18,503	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Cambewarra. Log (66).
18,504	<i>Leptospermum flavescens</i> ; Sm. "Tee-tree." (Myrtaceæ.) Cambewarra. Log (67).
18,505	<i>Stenocarpus salignus</i> ; R.B. "Beefwood" or "Silky Oak." Proteaceæ. Cambewarra. Log (68).
18,506	<i>Cryptocarya glaucescens</i> . "Black Sarsaparilla" or "Black Beech." (Lauraceæ.) Cambewarra. Log (69).
18,507	<i>Alphitonia excelsa</i> ; Reiss. "Red Ash." (Rhamneæ.) Cambewarra. Log (70).
18,508	<i>Rhodamnia trinervia</i> ; Blume. (Myrtaceæ.) Cambewarra. Log (71).
18,509	<i>Eucalyptus</i> sp. "Stringybark," "Messmate," or "Peppermint." (Myrtaceæ.) Cambewarra. Bark.
18,510	<i>Eucalyptus piperita</i> ; Sm. "Peppermint," or "Messmate." (Myrtaceæ.) Cambewarra. Bark.
18,511	<i>Stenocarpus salignus</i> ; R. Br. (Proteaceæ.) Cambewarra. Bark.
18,512	<i>Stenocarpus salignus</i> ; R. Br. (Proteaceæ.) Cambewarra. Cross-section.
18,513	<i>Cryptocarya</i> sp. "Black Sarsaparilla" or "Black Beech." (Lauraceæ.) Cambewarra. Bark.
18,514	<i>Alphitonia excelsa</i> ; Reiss. "Red Ash." (Rhamneæ.) Cambewarra. Bark.
18,515	<i>Rhodamnia trinervia</i> ; Blume. (Myrtaceæ.) Cambewarra. Bark.
18,516	<i>Commerçonia Fraseri</i> ; J. Gay. "Kurrajong." (Sterculiaceæ.) Cambewarra. Bark.
June 30.	
18,552	<i>Ceratopetalum apetalum</i> ; D. Don. "Coachwood." (Saxifrageæ.) Cambewarra. Kino.
18,553	<i>Eucalyptus punctata</i> ; DC. "Grey Gum." (Myrtaceæ.) Cambewarra. Kino.
18,554	<i>Eucalyptus</i> sp. (Myrtaceæ.) Cambewarra. Kino.
18,555	<i>Macrozamia spiralis</i> ; Lehm. "Burrawang." (Cycadeæ.) Cambewarra. Gum.
18,556	<i>Cedrela australis</i> ; F. v. M. "Red Cedar." (Meliaceæ.) Cambewarra. Gum.
18,557	<i>Sterculia diversifolia</i> ; G. Don. "Kurrajong." (Sterculiaceæ.) Cambewarra. Inner fibrous bark.
18,558	<i>Commerçonia Fraseri</i> ; J. Gay. "Kurrajong." (Sterculiaceæ.) Cambewarra. Bark.
18,559	<i>Lambertia formosa</i> ; Sm. "Honeyflower." (Proteaceæ.) Cambewarra. Honey-like liquid from the flowers.
18,560	<i>Hæmodorum teretifolium</i> ; R. Br. (Amaryllideæ.) Cambewarra. Roots, probably capable of yielding a reddish dye.
18,564	<i>Eucalyptus</i> sp. "Hybrid." (Myrtaceæ.) Cambewarra. White fungoid substance from the wood.
July 17.	
18,566	<i>Elæocarpus reticulatus</i> , var. <i>Kirtoni</i> ; Sm. "Mountain Ash." (Tiliaceæ.) Cambewarra. Bark.
19,567	<i>Villaresia</i> sp. "Maple." (Olacineæ.) Cambewarra. Bark.
18,568	<i>Diploglottis Cunninghamii</i> ; J. Hook. "Tamarind." (Sapindaceæ.) Cambewarra. Bark.

APPENDIX III--*continued.*
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
August 2.	
18,582	<i>Eucalyptus tereticornis</i> ; Sm. "Blue Gum." (Myrtaceæ.) Cambewarra. Log (62).
18,583	<i>Pseudomorus Brunoniana</i> ; Beau. "Whalebone-tree." (Urticaceæ.) Cambewarra. Log (72).
18,584	<i>Eucalyptus robusta</i> ; Sm. "Swamp Mahogany." (Myrtaceæ.) Cambewarra. Log. (79).
18,585	<i>Casuarina glauca</i> ; Sieb. "Swamp Oak." (Casuarinææ.) Cambewarra. Log (80).
18,586	<i>Nephelium leiocarpum</i> ; F. v. M. (Sapindaceæ.) Cambewarra. Log (81).
18,587	<i>Elæocarpus</i> sp. "Ash." (Tiliaceæ.) Cambewarra. Log. (82).
18,588	Not yet determined. Cambewarra. Log (83).
18,589	<i>Melaleuca styphelioides</i> ; Sm. "Prickly-leaved Tea-tree." (Myrtaceæ.) Cambewarra. Log (84).
18,590	<i>Callistemon salignus</i> ; DC. "Tea-tree." (Myrtaceæ.) Cambewarra. Log (85).
18,591	<i>Acacia longifolia</i> ; Willd. "Sally." (Leguminosæ.) Cambewarra. Log (86) and bark.
18,593	<i>Eucalyptus robusta</i> ; Sm. "Swamp Mahogany." (Myrtaceæ.) Cambewarra. Bark.
18,594-5	<i>Casuarina glauca</i> ; Sieb. "Swamp Oak." (Casuarinææ.) Cambewarra. Cross-section of stem; also bark.
August 16.	
18,940	<i>Eugenia Smithii</i> ; Poir. "Lillypilly." (Myrtaceæ.) Bangle Creek, Cambewarra. Log (73).
18,941	<i>Elæocarpus reticulata</i> ; F. v. M. "Mountain Ash." (Tiliaceæ.) Cambewarra Mountain. Log (74).
18,942	<i>Diploglottis Cunninghamii</i> ; Hook. "Tamarind." (Sapindaceæ.) Cambewarra Mountain. Log (75).
18,943	<i>Villaresia Moorei</i> ; F. v. M. (Olacineæ.) Jasper's Brush, Cambewarra Mountain. Log (76).
18,944	<i>Pennantia Cunninghamii</i> ; Miers. (Olacineæ.) Cambewarra Mountain. Log (77).
18,945	<i>Pennantia Cunninghamii</i> ; Miers. (Olacineæ.) Cambewarra Mountain. Section.
18,946	<i>Rhodamnia trinervia</i> (?); Blume. (Myrtaceæ.) Bomaderry. Log (78).
18,947	<i>Sloanea australis</i> ; F. v. M. (Tiliaceæ.) Cambewarra Mountain. Log (87).
18,948	<i>Sideroxylon laurifolia</i> ; F. v. M. (Sapotaceæ.) Cambewarra Mountain. Log (88).
18,949	"Opossum Wood." Jasper's Brush, Cambewarra Mountain. Log (89).
18,950	<i>Polyosma Cunninghamii</i> ; J. J. Benn. (Saxifrageæ.) Jasper's Brush, Cambewarra Mountain. Log (90).
18,951	<i>Tristania conferta</i> . R. Br. (Myrtaceæ.) Jasper's Brush, Cambewarra Mountain. Log (91).
18,952	<i>Eucryphea Moorei</i> ; F. v. M. (Saxifrageæ.) Cambewarra Mountain. Log (92).
18,953	<i>Dysoxylon</i> (?); Cambewarra Mountain. Log (93).
18,954	<i>Doryphora sassafras</i> ; Endl. (Monimiaceæ.) Cambewarra Mountain. Log (94).
18,955	<i>Elæocarpus cyaneus</i> ; Ait. Tiliaceæ. Cambewarra Mountain. Log (95).
18,956	<i>Panax Murrayana</i> ; F. v. M. (Araliaceæ.) Cambewarra Mountain. Log (96).
18,957	<i>Acacia melanoxylon</i> ; R. Br. (Leguminosæ.) Cambewarra Mountain. Log (97).
18,958	<i>Pittosporum undulatum</i> ; Vent. (Pittosporææ.) Clyde, Cambewarra Mountain. Log (98).
August 23.	
18,961	<i>Achras australis</i> ; R. Br. "Black Apple." (Sapotaceæ.) Cambewarra. Log (99).
18,962	<i>Eucalyptus resinifera</i> ; Sm. "Forest Mahogany." (Myrtaceæ.) Cambewarra. Bark.
18,963	<i>Sideroxylon laurifolia</i> . "Sycamore." (Sapotaceæ.) Cambewarra. Bark.
18,964	<i>Pittosporum undulatum</i> ; Andrews. "Cheesewood." (Pittosporææ.) Cambewarra. Bark.
18,965	<i>Polyosma Cunninghamii</i> ; J. J. Bennett. "Featherwood." (Saxifrageæ.) Cambewarra. Bark.
18,966	<i>Tristania conferta</i> ; R. Br. "Water Gum." (Myrtaceæ.) Cambewarra. Bark.
18,967	<i>Doryphora sassafras</i> ; Endlich. "Sassafras." (Monimiaceæ.) Cambewarra. Bark.
18,968	<i>Melaleuca styphelioides</i> ; Sm. "Prickly-leaved Tea-tree." (Myrtaceæ.) Cambewarra. Slab of timber.
18,969	<i>Ficus rubiginosa</i> ; Desf. "Rusty Fig." (Urticaceæ.) Cambewarra. Milky juice (latex).
18,970	<i>Ceratopetalum apetalum</i> ; D. Don. "Leather-jacket"; "Coachwood." (Saxifrageæ.) Cambewarra. Kinoid Gum.
18,971	<i>Eucalyptus robusta</i> ; Sm. "Swamp Mahogany." (Myrtaceæ.) Cambewarra. Kino.
18,972	<i>Eucalyptus piperita</i> ; Sm. "Peppermint." (Myrtaceæ.) Cambewarra. Kino.
18,973	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) Cambewarra. Kino.
18,974	<i>Eucalyptus amygdalina</i> ; Schau. "Messmate." (Myrtaceæ.) Cambewarra. Kino.
18,975	<i>Pittosporum undulatum</i> ; Andr. "Cheesewood." (Pittosporææ.) Cambewarra. Gum-resin.
18,976	<i>Cedrela australis</i> ; F. v. M. "Red Cedar." (Meliaceæ.) Cambewarra. Gum.
September 11.	
19,016	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) Cambewarra. Piece of timber.
19,021	<i>Eucalyptus maculata</i> ; Hook. "Spotted Gum." (Myrtaceæ.) Cambewarra. Piece of timber.
September 24.	
19,028a	<i>Eucalyptus siderophloia</i> ; Benth. "Red Ironbark." (Myrtaceæ.) Cambewarra. Small slab of timber.
October 1.	
19,053	<i>Eugenia Smithii</i> ; Poir. "Lillypilly." (Myrtaceæ.) Cambewarra. Bark.
19,054	<i>Ceratopetalum apetalum</i> ; D. Don. "Coachwood"; "Leather-jacket." (Saxifrageæ.) Cambewarra. Bark.
19,055	<i>Gmelina Leichhardtii</i> ; F. v. M. "Long Jack." (Verbenaceæ.) Cambewarra. Piece of timber.

APPENDIX III—*continued.*
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
19,056	<i>Pittosporum undulatum</i> ; Andr. "Cheesewood." (<i>Pittosporaceæ.</i>) Cambewarra. Piece of timber.
19,057	<i>Eucalyptus siderophloia</i> ; Benth. "Ironbark." (<i>Myrtaceæ.</i>) Cambewarra. Kino.
19,058	<i>Ficus rubiginosa</i> ; Desf. "Rusty Fig." (<i>Urticaceæ.</i>) Cambewarra. Milky sap (latex).
October 9.	
19,097	<i>Eucalyptus hemiphloia</i> ; F. v. M. "Box." (<i>Myrtaceæ.</i>) Braidwood. Kino.
November 26.	
19,126-128	<i>Acacia mollissima</i> ; Willd. var. <i>Leichhardtii</i> . F. v. M. (<i>Leguminosæ.</i>) Monga. Gum; timber; bark; the latter being difficult to grind, though used by tanners.
19,129	<i>Eucalyptus goniocalyx</i> ; F. v. M. "Mountain Gum." (<i>Myrtaceæ.</i>) Sugarloaf Mountain, Braidwood. Timber.
19,130	<i>Eucryphia Moorei</i> ; F. v. M. "Plum." (<i>Saxifrageæ.</i>) Braidwood. Timber.
November 28.	
19,131	<i>Hakea macræana</i> ; F. v. M. (<i>Proteaceæ.</i>) Braidwood. Gum.
19,132	<i>Aster argophyllus</i> ; Labill. "Musk." (<i>Compositæ.</i>) Sugarloaf Mountain, Braidwood. Three pieces of timber.
19,133	<i>Eucalyptus viminalis</i> ; Labill. "Ribbon" or "Manna Gum." (<i>Myrtaceæ.</i>) Monga, Braidwood. Manna.
19,134	<i>Eucalyptus hemiphloia</i> ; F. v. M. "Box" or "White Box." (<i>Myrtaceæ.</i>) Nerriga. Kino.
19,135-6	<i>Eucalyptus amygdalina</i> (?); Labill. "Mountain Ash." (<i>Myrtaceæ.</i>) Sugarloaf Mountain, Braidwood. Kino; bark.
19,137	<i>Eucalyptus</i> sp. "Blue Gum." (<i>Myrtaceæ.</i>) Sugarloaf Mountain, Braidwood. Bark.
19,138-9	<i>Acacia mollissima</i> ; Willd. "Green Wattle." (<i>Leguminosæ.</i>) Bell's Creek, Araluen. Gum; bark.
December 3.	
19,143-5	<i>Aster argophyllus</i> ; Labill. "Musk." (<i>Compositæ.</i>) Sugarloaf Mountain, Braidwood. Log, two slabs, and two thin pieces of timber.
December 17.	
19,147	<i>Eucalyptus goniocalyx</i> ; F. v. M. "Mountain Gum." (<i>Myrtaceæ.</i>) Sugarloaf Mountain, Braidwood. Timber.
19,147A	<i>Eucalyptus amygdalina</i> ? var. "Mountain Ash." (<i>Myrtaceæ.</i>) Sugarloaf Mountain, Braidwood. Timber.
19,141	<i>Leptospermum lanigerum</i> ; Sm. "Tea-tree." (<i>Myrtaceæ.</i>) Monga, Braidwood. Timber.
19,149-50	<i>Hakea macræama</i> ; F. v. M. Sugarloaf Mountain, Braidwood. Bark; gum.
19,151	<i>Cedrela Toona</i> ; Roxb. "Red Cedar." (<i>Meliaceæ.</i>) Cambewarra. Gum.
19,152	<i>Eucalyptus</i> sp. (hybrid). "Blue Gum." (<i>Myrtaceæ.</i>) Bell's Creek, Araluen. Kino.
19,153-4	<i>Acacia mollissima</i> ; var. <i>Leichhardtii</i> . Willd., F. v. M. (<i>Leguminosæ.</i>) Monga. Gum off tree; ditto taken off ground.

EDUCATIONAL APPLIANCES.

Large Drawing Models, as under:—

August 23.

18,977	One square prism.
18,978	" hexagonal prism.
18,979	" cube.
18,980	" cylinder.
18,981	" square pyramid.
18,982	" hexagonal pyramid.
18,983	" cone.
18,984	" globe, and two extra pieces to form base.
18,985	" treble cross.
18,986	" circle, with two extra pieces to form intersecting circles.
18,987	" square.
18,988	" triangle.
18,989	" pentagon.
18,990	" hexagon.
18,991	" Gothic arch.
18,992	" set (three) of patent perspective models. (P. Jolins.)

Models of Light and Shade, as under:—

18,993	(1.) Showing the construction of the angle of incidence and of shadows; also of lines in various positions on the plane of projection.
18,994	(2.) Showing construction of the shadows of four round, and four cornered planes on the plane of projection.
18,995	(3.) Cylinder, with shadow of incidence and shadow of conical plane thereon. Oblique cylinder, with shadow of a circular surface thereon.
18,996	(4.) Hexagonal pyramid, with shadow of incidence and shadow of a vertical surface thereon.

APPENDIX III—*continued*.
PURCHASES (SPECIMENS).

Museum No.	Date and Description.
18,997	(5.) Cone, with shadow of incidence and shadow of a horizontal surface thereon.
18,998	(6.) Flat surface, with coping; canted off below.
18,999	(7.) Semi-circular moulding, with newel.
19,000	(8.) " hollow, with slab.
19,001	(9.) Reversed cornice.
19,002	(10.) Plinth.
19,003	(11.) Model of shadows of parts of machinery (head of slide rod.)
19,004	(12.) " " (bearings.)
19,005-7	Three objects of form (vases), in baked white clay, as used for teaching at South Kensington.

August 23.

- 19,003-12 Five selected Vases in majolica ware, used for teaching at South Kensington.
19,013-15 Three selected Vases in terra-cotta, used for teaching at South Kensington.

September 11.

- 19,017 One Universal joint Telescope-stand, to show models in any position. (Full size.)
19,018 One Universal joint Telescope-stand. Small size, and different model to the preceding.

APPLIED ART.

- 17,985 Pair of Vases, brown Awaji ware, decorated with best gold lacquer.
17,986 Pair of Vases, purple Awaji ware, decorated with best gold lacquer.

February 11.

- 17,987 Pair of Vases, Awata body, decorated with best gold lacquer.
17,988 Pair of Vases, Kishiu ware, decorated gold lacquer on blue.
17,989 Pair of Vases, Kishiu ware, decorated gold lacquer on green.
17,990 Pair of Vases, brown Awaji ware, best gold lacquer.
17,991 Large Plate, Seiji ware, crackled, with cheap lacquer decoration.
17,992 Pair Vases, Seiji ware, with cheap lacquer decoration.
17,993 Plate brown Fayence, bronze imitation, best gold lacquer.
17,994 Plate, Kutani ware, fine.
17,995 Pair Bottle-Vases, blue and white, by Goski.
17,996 Plate, Rakuyaki earthenware.
17,997 Bowl, finest Imari, by Korasha.
17,998 Small Bowl, Imari, common earthenware.
17,999 Pair Vases, Owari body, painted.

March 16.

- 18,112-55 Collection of Japanese Fans, various shapes and designs of frame, and various pictorial subjects.

MISCELLANEOUS.

May 8.

- 18,364 Cashmere Dress Goods, cream colour, dyed in piece. Made from the finest Colonial merino wools.
18,365 Merino Dress Goods, cardinal colour, dyed in piece. Made from fine-combing Colonial wools.

June 7.

- 18,473 Wall Ornaments of split bamboo, with birds and flowers painted thereon. From Japan.
18,473a Water-jug on iron spring frame (automatic tilter).
18,473b Patent compact Clothes-horse.
18,473c Patent folding Writing-desk.

APPENDIX IV.
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
ETHNOLOGY, &c.	
January 31, 1888.	
17,827	Weaving Loom, showing screw-pine fibre (<i>Pandanus</i>) mat in course of construction, Santa Cruz Islands. Right Rev. Dr. Selwyn, Bishop of Melanesia, through Sir Alfred Roberts.
June 18.	
18,481	Bronze Coin, 1 sen, Japan. Mr. John Fagan, Sydney.
18,482	Silver Coin, $\frac{1}{2}$ dime, United States. Mr. John Fagan, Sydney.
18,483	Rod-like elongated Dumb-bell; made of cocoanut wood. Used by natives of N.E. India for athletic exercises. Mr. John Fagan, Sydney.
October 1.	
18,659	Aboriginal Relic or implement of undetermined character, found a few months ago in sinking a tank at Byrock, N.S.W., at a depth of 7 ft. It is of argillaceous sandstone, carrot-shaped, about $11\frac{1}{2} \times 2\frac{1}{2}$ in., the broad extremity concave, the surface marked transversely at intervals with lines, of which there are five pairs on one side and three pairs on the other. Blackfellows to whom it had been shown could give no information about it; nor had anyone who had yet seen it been able to recognize its import.* Rev. J. Milne Curran, F.G.S., Cobar.
MISCELLANEOUS.	
January 12.	
17,801	Stereotype of four pages of the <i>Times</i> , 2nd August, 1878 (2), 25th July, 1883 (1), 19th August, 1887 (1). Mr. Charles Robertson, 110, Market-street, Sydney.
February 7.	
17,888	A piece of wood (<i>Frenela</i> sp.) which formed a portion of the boat used by Sturt, the Australian Explorer. Mr. A. Lang, Mount Poole, N.S.W.
May 31.	
18,472	Exhibit for the purpose of teaching carpentry, consisting of models and diagrams (received incomplete). Mr. H. Staynes, Finsbury Technical College, London.
June 30.	
18,561-3	Three pieces of square turning, for cabinet work. "Blackwood." (<i>Acacia melanoxylon</i>). Mr. E. Verdich, Darlington, Sydney.
ECONOMIC GEOLOGY (INCLUDING MINING).	
January 3.	
17,800	Specimen of Göthite. Master B. Corrie, Strathdon, Colo Vale, N.S.W.
January 14.	
17,802-5	Four models of appliances for obtaining gold from washdirt, as used on the Turon (N.S.W.) Goldfields:—Cradle, scale $\frac{1}{4}$, 3 in. to 1 ft.; False-bottom Sluice, scale $\frac{1}{2}$, 1 in. to 1 foot; "Long Tom," scale $\frac{1}{2}$, $1\frac{1}{2}$ in. to 1 ft.; Puddling Machine and appurtenances. Mr. C. Taylor, Burlington-street, North Shore, through Mr. Hugh Watt.
January 16.	
17,806	Bat Guano, from caves on the Murrumbidgee, near Cooradigby, N.S.W. Mr. John Mitchell, Bowning.
January 31.	
17,825	Mass of Azurite Crystals, from Mount Hope, N.S.W. Rev. J. Milne Curran, F.G.S., Cobar, N.S.W. (now of Bathurst).
17,826	Two specimens Diabase Porphyry, Red Hill, Springs, N.S.W. Rev. J. Milne Curran, F.G.S., Cobar, N.S.W. (now of Bathurst).
February 1.	
17,880	Seven pieces of Cores from diamond drill. Dr. J. C. Cox, Sydney.
February 2.	
17,881-2	Scythe Stones and Stones for sharpening the blades of reaping machines, moulded, Yorkshire, England. (? Made of sand bound with Kean's cement). Mr. J. Fagan, Sydney.
March 14.	
18,110	3-in. cube of Sandstone, quarried in Queensland about 1 January, 1888. Crushing weight, 15,900 lb. The Colonial Architect, Sydney.
18,111	3-in. cube Sandstone, quarried at Pyrmont, Sydney. Crushing weight, 48,000 lb. The Colonial Architect, Sydney.

* On comparing the specimen with an implement exhibited on behalf of Mr. C. S. Wilkinson, at the Linnean Society's Meeting of 25th June, 1884 (*vide* Proceedings, vol. IX., p. 507), it is evident that the two are of a similar character, differing but little except in regard to size, and in the details of the pairs of transverse markings.

APPENDIX IV—*continued*.
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
March 27.	
18,186	Block of Sydney Sandstone, $3\frac{3}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Tarban Creek. No. 1. The Colonial Architect, Sydney.
18,187	Block of Sydney Sandstone, $3\frac{1}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Tarban Creek. No. 2. The Colonial Architect, Sydney.
18,188	Block of Sydney Sandstone, $3\frac{3}{8}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Trickett's Quarry, Lane Cove. No. 1. The Colonial Architect, Sydney.
18,189	Block of Sydney Sandstone, $3\frac{3}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Trickett's Quarry, Lane Cove. No. 2. The Colonial Architect, Sydney.
18,190	Block of Sydney Sandstone, $3\frac{3}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Old South Head Road, Waverley. The Colonial Architect, Sydney.
18,191	Block of Sydney Sandstone, $3\frac{3}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Trickett's, Greenwich, Parramatta River. The Colonial Architect, Sydney.
18,192	Block of Sydney Sandstone, $3\frac{3}{4}$ in. x $2\frac{1}{2}$ in. x $2\frac{1}{4}$ in., from Mossman's Bay. The Colonial Architect, Sydney.
April 16.	
18,273	Block of Cimolite, the so-called "Meerschaum" of New South Wales. Wyralla, Richmond River. Mr. H. L. Steel, Redfern.
18,274-5	Sachrite (two samples). Eden, Twofold Bay. Mr. H. L. Steel, Redfern.
18,276-7	Quartz var. Opal (two samples). Eden, Twofold Bay. Mr. H. L. Steel, Redfern.
18,278	Basalt Block, 14 in. x 14 in. x 8 in., dressed. Bowral, N.S.W. Messrs. Loveridge and Hudson, Sydney.
18,279	Basalt Block, $10\frac{1}{2}$ in. x 8 in. x $7\frac{1}{2}$ in., dressed. Bowral, N.S.W. Messrs. Loveridge and Hudson, Sydney.
18,280	One polished Block of Granite, 12 in. x 12 in. x 6 in. Trial Bay, N.S.W. The Colonial Architect, Sydney.
18,281-4	Four Briquettes Portland Cement (Femer's), $7\frac{1}{2}$ in. x 3 in. x $1\frac{1}{2}$ in. The Colonial Architect, Sydney.
April 16.	
18,285-88	Four Briquettes Portland Cement (Robins'), 3 x 2 x 1 inches; breaks at 450 lb. per square inch in seven days. The Colonial Architect, Sydney.
18,289	Sample of Cement moulded in bottle, to show contraction. The Colonial Architect, Sydney.
April 21.	
18,290-91	Two "Australian Rubies" cut from one stone, of which No. 18,291a is a model. These "rubies" are from South Australia, and are simply garnets of fair quality. E. W. Streeter, Esq., F.R.G.S., New Bond-street, London (through Professor Liversidge, F.R.S., Sydney).
18,291a	Model of Ruby before being cut. E. W. Streeter, Esq., F.R.G.S., New Bond-street, London (through Professor Liversidge, F.R.S., Sydney).
April 23.	
18,292-95	Four specimens of Basalt from Colo Vale. Mr. E. S. Corrie, Strathdon, Colo Vale, N.S.W.
April 26.	
18,300	Specimen Graphite from New Borrowdale Mine, Undercliff Station, Wilson's Downfall, Tenterfield, N.S.W. Mr. Chas. Wooller, Sydney.
18,301	Clinkers and Drift-wash from Wilson's Downfall, Tenterfield, N.S.W. Mr. Chas. Wooller, Sydney.
May 5.	
18,359	Eight specimens Argentiferous Galena from Horton and Archibald's silver leases at junction of Koreelah Creek, Cullen's Creek, and Clarence River, Rivertree. Mr. C. Haazer.
18,360	Four specimens Argentiferous Galena from Horton and Archibald's silver leases at junction of Koreelah Creek, Cullen's Creek, and Clarence River, Rivertree. Mr. C. Haazer.
May 8.	
18,361	Permission to take a cast from a Nugget of Gold (specific gravity, 15.44) from Mount Brown, N.S.W. Assay—Gold, .9790; silver, .015; gross value, £116. The Department of Mines, Sydney.
May 11.	
18,379	One block White Sandstone, 12 x $7\frac{1}{2}$ x 6 inches (piece of string course), from Bundanoon, N.S.W. The Colonial Architect, Sydney.
18,380	One block Red Sandstone from neighbourhood of Condobolin, N.S.W., 7 x $5\frac{3}{4}$ x 5 inches (base course). The Colonial Architect, Sydney.
18,381	One 3-inch cube White Sandstone from Parramatta, N.S.W. The Colonial Architect, Sydney.
June 7.	
18,474	One sample Coal, Upper Clarence River District. Mr. A. Hagman, Sydney.
18,475	Gold-bearing Conglomerate, Black Rock, Ballina. Mr. A. Hagman, Sydney.

APPENDIX IV.—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
June 29.	
18,550	One specimen Tetradymite (telluride of bismuth) from Jingera, N.S.W. (This mineral has not previously been found in New South Wales.) The Government Geologist, Sydney.
July 19.	
18,576	Carnelian from Stanthorpe, Queensland. Mr. Chas. Wooller, Sydney.
18,577	Specimens of Gem-stones from Stanthorpe, Queensland. Mr. Chas. Wooller, Sydney.
18,578	Specimen of Auriferous Quartz from creek near New Borrowdale Mine, Tenterfield, N.S.W. Mr. Chas. Wooller, Sydney.
18,579	Porcelain-clay (Kaolin), Undercliff Run, Tenterfield. Mr. Chas. Wooller, Sydney.
July 30.	
18,580	Three-inch cube of Sandstone from Parramatta; crushing weight, 37,000 lb. The Colonial Architect, Sydney.
18,581	One specimen Soapstone (fireproof) from Gundagai, N.S.W. The Colonial Architect, Sydney.
August 2.	
18,596	Three Australian Rubies (garnets) from the Macdonnell Ranges, South Australia. Daniel Adamson, Esq., J.P., Adelaide.
18,597	Specimen of Auriferous Quartz from the New Rising Sun Gold-mine, North Gippsland, Victoria. Mr. H. L. Walker, Bombala.
18,598	Specimen of Auriferous Quartz from the Eclipse Mine, Bendoc, Victoria. Mr. H. L. Walker, Bombala.
18,599-604	Five specimens Calcite in cavity in diabasic dolerite; two specimens Analcime crystallised on calcite; two specimens Wollastonite; two specimens Prehnite in cavity in diabasic dolerite; one nodule of Clay Ironstone. From Waimalle Hill, Prospect Reservoir. Mr. A. Godhard, Prospect, near Sydney.
September 24.	
19,029	One specimen Rock Crystal
19,030	Specimens Topaz
19,031	One specimen Beryl
19,032	One specimen Carnelian
	} Mr. C. Wooller, Bonanza King Reef Mine, Undercliff Run, Wilson's Downfall, Tenterfield.
	(The above are from Undercliff Run, Wilson's Downfall, Tenterfield, N.S.W.)
October 5.	
19,089	One specimen Basalt. Mr. A. Corrie, Colo Vale, Mittagong.
19,090	Three specimens Colonial Pine (<i>Araucaria Cunninghamii</i>) from northern part of New South Wales and Southern Queensland. Anonymous.
November 26.	
19,124	Two specimens Auriferous Quartz showing white mundic (iron pyrites). Messrs. Wooller and Main (through Mr. Chas. Wooller, 23, Burns-street, Sydney).
19,125	Two specimens Quartz showing graphite and slate. Messrs. Wooller and Main (through Mr. Chas. Wooller, 23, Burns-street, Sydney).
	(All from the Bonanza King Reef, Undercliff Run, Wilson's Downfall, near Tenterfield, N.S.W.)
November 28.	
19,142	Meteorite, Cast of. Weight of original, 12 lb. 3.84 oz.; specific gravity, 7.802. The meteorite was found by a miner named O'Shaughnessy, now living at Cowra, on the highest peak of the Battery Mountain, at the junction of the Burrowa and Lachlan Rivers, firmly embedded in the slate, only one point being visible.
December 20.	
19,155	Gold and Gems, Persecution Creek, Wilson's Downfall, Tenterfield. Messrs. Wooller and Main, through Mr. Chas. Wooller, 23, Burns-street, Sydney.
19,156	Quartz with crystals, Bonanza King Reef, Undercliff Run, Wilson's Downfall, Tenterfield. Messrs. Wooller and Main, through Mr. Chas. Wooller, 23, Burns-street, Sydney.
19,157	Jasper, Bonanza King Reef, Undercliff Run, Wilson's Downfall, Tenterfield. Messrs. Wooller and Main, through Mr. Chas. Wooller, 23, Burns-street, Sydney.
METALLURGY AND MACHINERY.	
24 February.	
18,043	Chilled Iron Wheel; largely used on the Austro-Hungarian railways. These wheels offer great resistance to change of temperature. Messrs. Ganz & Co., Buda-Pesth, through Messrs. A. D. Nelson & Co., Sydney.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,045	Chilled Iron Crossings; largely used on the Austro-Hungarian railways. These crossings offer great resistance to change of temperature. Messrs. Ganz & Co., Buda Pesth, through Messrs. A. D. Nelson & Co., Sydney.
18,382	11 May. Model of Apparatus for transferring rolling-stock from broad to narrow gauge railways, and <i>vice versa</i> ; narrow gauge, 4 feet 8½ inches; broad gauge, 7 feet (Eng.), 6 feet (U.S.) Two trucks and track, 6 feet 4 inches x 12 inches. The Engineer-in-Chief, Railway Department, Sydney.
18,383	Casting made of Colonial Iron. Scroll-work with Australian Arms in centre; length, 25¼ inches; height, 5½ inches (for tops of railway carriages). The Engineer-in-Chief, Railway Department, Sydney.
18,384	Casting made of Colonial Iron in form of Crown; size, 6 inches x 6 inches. Tylden Wright, Esq. (the agent of the Earl of Dudley), through H. B. Hardt, Esq. Collection of Iron Samples from the "Round Oak" Ironworks. Tylden Wright, Esq. (the agent of the Earl of Dudley), through H. B. Hardt, Esq., as follows:— Pig Iron for Foundry and Forge purposes (13 samples.)
18,385	Cold blast (samples) brand L.N.F., Dud.
18,385a	Cold blast (samples) brand L.N.F.
18,385b	Hot blast (samples) brand L.N.F.
18,385c	Hot blast (samples) brand Coneygre.
18,386	6 samples round 2-inch iron.
18,386a	7 samples round 1¾-inch iron, L.N.R.O.; R.B.B. Crys. showing fracture.
18,387	2 samples round 1-inch iron, cut and bent over to show fibre, L.W.R.O.; R.B.B. Crys.
18,388	2 samples 2 inch x ¼ inch, showing bending qualities, L.W.R.O.; B.B.B. Crys.
18,388a	2 do. do. do
18,389	10 samples 1½ inch x 1½ inch, showing bending qualities of metal, L.W.R.O., B.B.B. Crys.
18,390	1 sample 9-inch H girder-iron, showing bending qualities when cold.
18,390a	1 sample 10-inch H girder-iron, do do
18,390b	2 samples 6½-inch H girder-iron do do
18,391	9 samples 1-inch round iron, L.W.R.O.
18,392	21 samples 1½ inch x 1½ inch iron, showing quality of fibre or texture, L.W.R.O.; B.B.B. Crys.
18,392a	10 samples 1 inch x 1 inch do do do
18,393	8 samples iron 1⅝ inch (round) showing texture or grain, L.W.R.O., B.B.B. Crys.
18,393a	8 samples round iron, 1 inch do do
18,394	2 samples of 1½-inch square iron, showing bending qualities, L.W.R.O.
18,395	4 samples ¾-inch round iron, Hurst best; best chain, showing bending qualities.
18,396	7 samples horse-shoe iron, L.W.R.O., showing bending qualities.
18,396a	15 do do
18,397	9 finished horse-shoes, branded Guest L.W.R.O., best.
18,397a	4 finished horse-shoes, brand L.W.R.O.
18,397b	3 finished horse-shoes, branded L.W.R.O., best.
18,398	2 samples iron 2 inch x ½ inch, showing bending qualities, L.W.R.O.
18,399	2 samples plate-iron ⅝-inch, triangular in form.
18,400	A piece of 1½-inch round iron, worked in various shapes, <i>i.e.</i> , horse-shoe, core, twist, nails, &c.
18,401	Wrought-iron fork in the rough, made from 2 inch x ¼ inch iron, brand, L, crown, W.R.O.; best best Crys.
18,402	Double fork, made from iron 2 inch x ¼ inch, showing malleability; wrought iron, L.W.R.O.; B.B.B. Crys.
18,403	1½-inch square iron, wrought and beaten into various shapes, hand, spoon, tongues, &c., showing malleability, L.W.R.O.; B.B.B. Crys.
18,403a	1-inch square iron showing malleability.
18,404	1 sample ¾-inch round iron, L.W.R.O.; best best, showing bending qualities.
18,404a	3 samples 1½-inch round iron, L.W.R.O.; best best best, showing bending qualities.
18,404b	2 samples 1¾-inch round iron, L.W.R.O.; best best best, showing bending qualities.
18,404c	1 sample 1¼-inch round iron, L.W.R.O.; best best best, showing bending qualities.
18,405	1 sample 1-inch rivet-iron, cut longitudinally and hammered, L.W.R.O., best.
18,405a	1 sample 1½-inch rivet-iron, cut longitudinally and hammered, L.W.R.O.; best best best.
18,406	3 samples ¾-inch round iron, showing bending qualities.
18,406a	5 samples 1¼-inch round iron, L.W.R.O., best best, showing bending qualities.
18,406b	2 samples 1½-inch round iron, L.W.R.O., best best, showing bending qualities.
18,406c	2 samples 1½-inch round iron, L.W.R.O., best best, showing bending qualities.
18,406d	1 sample 1½-inch round iron, L.W.R.O., best, showing bending qualities.
18,406e	6 samples 1-inch round iron, L.W.R.O., best, showing bending qualities.
18,407	Thumb-screw in the rough, showing malleability, L.W.R.O.
18,408	1 sample iron, 2 inches x ⅝ inch, showing punching qualities.
18,409	2 samples malleable iron, worked in various shapes.
18,410	2 hammers, in the rough, made from L.W.R.O. iron.
18,411	1 sample, Y shaped, made from L.W.R.O. iron.
18,412	Part of tire made from L.W.R.O. iron.
18,413	1 sample 1¼-inch square iron, L.W.R.O., showing bending qualities.
18,413a	3 samples 1-inch square iron, L.W.R.O., best best, showing bending qualities.
18,414a	1 sample 1½-inch round iron, L.W.R.O., showing bending qualities.
18,414	1 sample 2-inch round iron, L.W.R.O., showing bending qualities.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
------------	-----------------------

June 5.

18,432 A Beam Engine by the celebrated Watt. Messrs. Whitbread & Co., Brewers, Chiswell-street, London, E.C., through E. A. Cowper, Esq., London, and Professor Liversidge, M.A., F.R.S., Sydney.

It is a very interesting and very early example of Boulton and Watts' manufacture, having been erected in 1785, and having worked well till 1887 (102 years), when it was taken down simply to make room for one of greater power. Mr. E. A. Cowper, the distinguished engineer, says, "I doubt if there is another like it left anywhere now." He was also kind enough to furnish the following interesting particulars concerning it in a letter to Professor Liversidge.

The only reason for its being pulled down is to make room for a more powerful engine of a much more economical character, viz., one burning much less than half the fuel per horse-power. The following quaint inscription is on a brass plate on the engine:—

The steam-engine was first invented by the most noble Edward Somerset, Marquis and Earl of Worcester, 1655.

Improved by Captain Thomas Savery, 1699.

Further improved by Thomas Newcomen and John Cawley, Ingenious Mechanicians of Dartmouth, in the County of Devon, 1712.

The expense in fuel reduced one half by Mr. John Smeaton, F.R.S., of Austthorpe, in the County of York, Civil Engineer, 1768.

Greatly enlarged in its powers and uses, and brought to its present state of perfection by Mr. James Watt, F.R.S., of the City of Glasgow, who received His Majesty's Patent, 1769.

And in conjunction with Mr. Matthew Boulton, of Birmingham, F.R.S., obtained an Act for the exclusive privilege for 25 years, commencing 1775.

They erected this engine, which performs the work of 35 horses, 1785.

But in the course of 10 years' use more power being found necessary, this engine was altered to make it equal to the work of 70 horses.

It is stated, it will be observed, that ten years after its erection it was increased in power, and it is believed that at this time the iron beam was substituted for the original wooden beam, and an iron connecting rod added; also, that the long diagonal iron strut was added to stiffen the framing, which is of wood. I may state that the teeth in the "sun wheel" of the "sun and planet motion" gave way several times, being only of wood; these were replaced by brass teeth, which are now in the wheel, and have stood their work very well, when the engine has been worked of late years as a "stand by" engine, when the other engine in the brewery required repair.

It will be noticed that the valve motion is distinctly a "tappet motion," with catches that are let off, for opening some valves, by the very small portion of the stroke of the engine, there being a small "set-screw" which is so set as just to detach the latch at the end of the stroke.

The balance-weights to the valves work in pots of water, having a hole in the side of the pot, just softening the blow, or acting to some extent as "cataracts."

There are no eccentrics to the engine, though all the later Boulton and Watts' engines had them.

The cylinder is not "steam-jacketted" like more modern Boulton and Watts' engines, but it is well "logged" with wood.

I may mention that there used to be an old copper boiler of the "haystack" form, with a domed top; this was only safe for low-pressure steam, and I took it down in 1877. It was of curious construction, having $1\frac{1}{8}$ -inch rivets at $3\frac{1}{4}$ -inch pitch, and the heads were $3\frac{1}{4}$ inches in diameter.

I will trace some indicator figures that I have, off the old engine, and enclose them to you, together with some figures off the new compound engine, as soon as the work is on it; it will have 80 lb. steam, and expand largely, and has a "Cowper's hot pot," or steam-jacketted steam receiver between the cylinders, and an "evaporative surface condenser," to avoid using the valuable cold water from the well, used for cooling worts.

WOOL.

January 17.

Messrs. Hodgson and Ramsay, Eton Vale, Darling Downs, Queensland:—

- 17,807 Stud ram; champion grass-fed; skirted fleece, 12 lb.; from Toowoomba Show, 1886.
- 17,808 Stud ram; strong combing fleece, 14 lb.
- 17,809 Stud ram; very superior combing fleece, $12\frac{1}{4}$ lb.
- 17,810 Stud ram; very superior combing fleece, $13\frac{1}{2}$ lb.
- 17,811 Stud ram; fine combing fleece, 15 lb.
- 17,812 Champion ewe; superior combing fleece, 13 lb.
- 17,813 Champion ewe; strong combing fleece, $14\frac{1}{4}$ lb.
- 17,814 Champion ewe; fine combing fleece, 13 lb.
- 17,815 Champion ewe; strong combing fleece, $13\frac{1}{4}$ lb.
- 17,816 Stud ewe; strong combing fleece, 13 lb. 3 oz.

[The last four samples from Toowoomba Show, 1887.]

Wellshot Station, Barcaldine, Queensland, the property of the New Zealand and Australian Land Company (Limited):—

- 17,817 Aged stud rams; 4 samples.
- 17,818 Fat wethers; 5 samples.
- 17,819 Stud ewes with lambs; combing superior to medium; 18 samples.
- 17,820 Aged stud ewes; clothing wool; 6 samples.
- 17,821 Ewe hoggets; 2 samples.
- 17,822 Aged ewe; showing distinct serration.

Sir Francis Murphy, Northampton Downs, Central Queensland:—

- 17,823 Imported Tasmanian ram, "Sir Thomas" blood; purchased, 1887.

February 9.

Messrs. Lackay, Wallace, and Mills, Nudda Station, near Cootamundra, through Messrs. Trebeck Son and Gair, Sydney:—

- 17,913 High-class stud ram.

APPENDIX IV—*continued*.
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
H. C. White, Esq., Havilah, Dungarce, Mudgee, through Messrs. Trebeck Son and Gair, Sydney :—	
17,914	Black Wool, extra quality, grown at Havilah, from prize Havilah sheep; awarded Special Centennial Prize at the Centennial Agricultural Exhibition, Sydney, 1888. One of the most valuable specimens of black wool in the Colonies, probably the best. Valued in grease at 1s. 10d. per lb.
17,915 to 17,924	Ten samples of very superior combing Hogget Wool. Value, 1s. 2d. per lb.
17,925 to 17,928	Four samples superior combing Ewes' Wool. Value, 1s. 2d. per lb.
17,928, a, b, c	Three samples Ewes' Wool.
Mr. F. W. Hume, Tarengo, Burrowa, N.S.W., through Messrs. Mort & Co. Sydney :—	
17,929 to 17,934	Six samples Merino Greasy Combing Wool; age of sheep, from 2 to 3 years; growth of wool, 370 days; wool grown at Tarengo Station; bred, previous to the year 1865, from ram bred by David Taylor, St. Johnston, Tasmania, and shows a marked improvement. Fed on natural grasses only, and unhused.
Mr. R. H. F. Hume, Everton, Burrowa, N.S.W. :—	
17,935 to 17,938	Four samples Merino Combing Wool, unwashed; aged ewes rearing lambs; growth of wool, 357 days; wool grown at Everton Station; bred, previous to the year 1865, from imported Saxon merino rams, subsequently from rams purchased from N. P. Bayly, of Havilah, Mudgee. Fed on natural grasses only, and unhused.
Mr. F. W. Hume, Tarengo, Burrowa, N.S.W.; agents—Messrs. Mort & Co. :—	
17,939 to 17,942	Four samples Merino Combing Wool, hoggets'; grown at Tarengo; growth of wool, 390 days. The wool exhibited is from sheep by a stud ram; bred by David Taylor, St. Johnston, Tasmania, and shows marked improvement. Fed on natural grasses only, and unhused.
17,943 to 17,948	Wool, grown at Tarengo; growth about 400 days. Flock bred from N. P. Bayly's Mudgee sheep, and crossed with a ram bred by David Taylor, Tasmania.
Messrs. F. & A. Cox, Oakfields, Mudgee :—	
17,949 to 17,954	Six samples Greasy Combing Wool, taken from pedigree stud ewes; growth of wool, 12 months.
February 11.	
— Hawkins, Esq., Eunonyhareenyha, Wagga Wagga :—	
17,955 to 17,958	From 4-tooth and 8-tooth ewes out of breeding flock. Wool grown at Wallinga, Mudgee. Pure Broombee blood. Running in natural-grass paddock, never housed or fed.
17,959 to 17,966	Eight samples of Wool from stud ewes, 4-tooth. Value, 1s. per lb.
17,966a to 17,973	Eight samples of Wool from stud ewes, 8-tooth. Value, 1s. per lb.
17,974 to 17,977	Four specimens Hogget Wool. Value, 1s. per lb.
17,978 to 17,982	Five specimens of Wool from wethers. Value, 9d. per lb.
17,983 to 17,984	Two specimens Lambs' Wool; very superior. Value, 1s. per lb.
February 15.	
Messrs. Dangar Brothers, Gostwyck, Uralla, New England :—	
18,000 to 18,011	Twelve specimens Hoggets' Wool, grown at Gostwyck. Value, 1s. 2d. per lb.
18,012 to 18,014	Three specimens Breech Wool (lowest part of fleece) from Hoggets.
18,015 to 18,028	A very fine Combing Wool from the general flock; used in making ladies' dress goods. Value, 1s. per lb.
18,029 to 18,031	Three samples Breech Wool, from ewes of general flock.
February 18.	
T. Warnes, Esq., Koomooloo, South Australia, through Messrs. Goldsbrough & Co., Sydney :—	
18,036	Fleece of 4-tooth ram; extra strong and deep-grown combing; sheep fed on salt-bush country; weight of fleece, 15 lb. 12½ oz.

18,339-43	Five samples Fleece Wool, exhibited at the Centennial Agricultural Show, Moore Park, Sydney, 1888.
18,344	One sample Breech Wool, exhibited at the Centennial Agricultural Show, Moore Park, Sydney 1888.
July 13.	
Mr. Briggs, Sydney :—	
18,565	One sample Wool.
September 18.	
James M'Kees, Esq., Hazel Park, Conargo, N.S.W. :—	
19,022	One sample Ram's Wool; 9 months' growth.
19,023	One sample Ram's Wool; 9 months' growth.
19,024	One sample Ewe's Wool; 12 months' growth.
19,025	One sample Ewe's Wool; 9 months' growth.
19,026	One sample Wool of old ewe; 9 months' growth.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
September 24.	
Jas. Lee, Esq., Larras Lake, Molong:—	
19,033	One sample of Wool of 4-tooth ram; grass-fed.
19,034	One sample of Wool of 2-tooth ram; grass-fed.
19,035	One sample of Wool of 2-tooth ram; grass-fed.
19,036	One sample of Wool of 8-tooth ram; grass-fed; 11 months' growth.
19,037	One sample of Wool of 8-tooth ram; grass-fed; growth of wool, 11 months.
19,038	One sample of Wool of 8-tooth ram; grass-fed.
19,039	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
19,040	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
19,041	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
19,042	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
19,043	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
19,044	One sample of Wool of 2-tooth ewe; grass-fed; growth of wool, 11 months.
[The six samples (19,033 to 19,038) of rams' wool averaged 20½ lb. in weight. The six samples (19,039 to 19,044) of ewes' wool averaged 12½ lb. in weight. All the above sheep took prizes at Bathurst Show, held in April, 1888, and since then have been grass-fed in box country, with rich alluvial black flats, sown with prairie rye and lucerne.]	
September 28.	
Messrs. Russell & Co., Barunah Plains, Hesse, Victoria:—	
19,045	One sample Wool of 4-tooth ram; growth of wool, 342 days; weight of fleece, 13½ lb.
19,046	One sample Wool of 4-tooth ram; growth of wool, 366 days; weight of fleece, 12½ lb.
19,047	One sample Wool of 4-tooth ram, No. 9, offered for sale in Melbourne, bought in for £15 15s.; weight of fleece, 12½ lb.
19,048	One sample Wool of 4-tooth stud ram; growth of wool, 334 days; weight of fleece, 13½ lb. This ram is used in stud flock.
19,049	One sample Wool of 4-tooth ram, used in common flocks; growth of wool, 349 days; weight of fleece, 12½ lb.
19,050	One sample Wool of 4-tooth ram, used in common flocks; growth of wool, 347 days; weight of fleece, 12 lb.
19,051	One sample Wool of 4-tooth ram, No. 5, bought in at Melbourne for £15 15s; weight of fleece, 11 lb.
October 3.	
F. W. Hume, Esq., Tarengo, Burrowa, N.S.W.:—	
19,067	One sample Wool of young ewe, grass-fed and unhoused; growth of wool, 11 months.
19,068	One sample Wool of hogget ram, grass-fed and unhoused; shorn as a lamb; growth of wool, about 11 months.
19,069.	One sample Wool of hogget ram, grass-fed and unhoused; shorn as a lamb; growth of wool, about 11 months.
Hon. Philip Russell, M.L.C., Carngham, Victoria:—	
19,091-2	Two samples of Wool.
October 9.	
H. R. F. Hume, Everton, Burrowa:—	
19,093	One sample Wool of ewe, 3 years old. This sheep took 1st prize in her class when exhibited (twice), at Yass and Burrowa Shows (1888); growth of wool, 11½ months; weight of fleece, 11 lb.
19,094-5	Samples of Skirtings of No. 19,093. One sample wool of ewe, aged 8 years, rearing lambs 3 months old; growth of wool, 11½ months; weight of fleece, 11 lb. This ewe won four "champion" prizes.
19,096	Skirtings from No. 19,095.
November 12.	
M. Minter, Esq., Dhurringile, Murchison, Victoria:—	
19,098	Sample of Wool of cross-bred sheep out of merino ewe, by Lincoln ram.
19,099	Sample of Wool of cross-bred sheep out of cross-bred ewe, by merino ram.
19,100	Sample of Wool of sheep out of cross-bred ewe, by merino ram.
19,101	Sample of pure merino Wool of stud sheep.
November 23.	
Mr. Phillip Lee, 29, Lower Fort-street, Sydney:—	
19,113	One fleece Wool; weight, 9 lb.
19,114	One fleece Wool; weight, 9 lb.

DONATIONS (SPECIMENS).

Museum No.	Date and Description.
ECONOMIC BOTANY.	
(a) <i>Miscellaneous.</i>	
April 16.	
C. C. Armytage, Sydney:—	
18,239-41	Cocoa-nut Fibre, 1st, 2nd, and 3rd qualities, Ceylon. Called "mattress fibre"; used for mattresses, and also to make coir yarn.
18,242	Kapok, Calcutta (? <i>Bombax malabaricum</i>).
18,243	Kapok, Java; used for stuffing pillows, &c.
18,244	Cinnamon Chips, Ceylon; used in the manufacture of essential oil.
18,215	Plumbago (2nd quality), Ceylon.
Miss M. A. Clements, Palesthan, Condobolin:—	
18,246	Collection of 120 plants, indigenous to New South Wales, comprising specimens in Flower and Fruit.
May 21.	
Mr. Henry Vincent, 154, Castlereagh-street, Sydney:—	
18,450	Pentagonal Basket, made from the seeds of the Whampee (<i>Cookia punctata</i>), worked from the centre to each angle; ornamented with white beads and Barricarr seeds; handle of rattan covered with seeds, probably from the South Sea Islands, possibly Samoa.
March 16.	
Messrs. Rottman, Strome & Co., Tokyo, Japan:—	
18,156 to 18,169	Fourteen specimens of Japanese "Leather Paper" (made from fibre of the Paper Mulberry).
16 April.	
C. C. Armytage, Esq., Sydney:—	
18,224	Cinnamon, "Superior." Bambalapitiya Estate, Colombo, Ceylon.
18,225	Cinnamon, No. 1. Bambalapitiya Estate, Colombo, Ceylon.
18,226	Cinnamon, No. 2. " "
18,227	Cinnamon, No. 3. " "
18,228	Cinnamon, No. 4. " "
No. 18,224 is from the inner bark, and is of too fine a quality and too laboriously rolled to pay as a commercial product.	
18,229 to 18,235	Coir Yarn. Six specimens showing different qualities. Ceylon.
18,236-S	Kitool Fibre (<i>Caryota urens</i>), three qualities. Ceylon. Used for the manufacture of the most expensive (locally) brooms and brushes.
(b) <i>The following specimens, Australian with hardly an exception, are separately listed for convenience.</i>	
8 February.	
Presented by the Curator:—	
17,911	Xanthorrhæa arborea (Grass-tree Gum); R. Br. (Juncaceæ.) Oatley's Grant, Illawarra Line.
21 February.	
Presented by Mr. J. C. Brown, F.L.S., Conservator of Forests of South Australia:—	
18,041	Xanthorrhæa Tateana; F. v. M. (Juncaceæ.) Kangaroo Island, South Australia. "Grass-tree Gum."
24 February.	
Presented by Miss A. Lovegrove, Sydney:—	
18,042	Eucalyptus maculata; Hook. "Spotted Gum." (Myrtaceæ.) Illawarra, N.S.W. Tinder or amadon formed by a fungus (<i>Xylostroma giganteum</i> , Fries.) in the wood. It is very like chamois leather in texture and appearance.
29 February.	
Presented by the Colonial Botanist, Brisbane:—	
18,046	Eucalyptus hæmastoma; Sm. "Scribbly Gum." (Myrtaceæ.) Queensland. Kino.
18,047	Eucalyptus microcorys; F. v. M. "Turpentine-tree." (Myrtaceæ.) Queensland. Kino.
18,048	Eucalyptus resinifera; Sm. "Jemmy Low." (Myrtaceæ.) Queensland. Kino.
18,049	Eucalyptus siderophloia; Benth. "Ironbark." (Myrtaceæ.) Queensland. Kino.
18,050	Eucalyptus maculata; Hook. "Spotted Gum." (Myrtaceæ.) Queensland. Kino.
18,051	Semecarpus anacardium; Lind. "Marking-ink Nuts." Anacardiacea. India. Nuts grown in Queensland.
10 March.	
Presented by Mr. M. P. Hansen:—	
18,056a	Acacia decurrens; Willd. "Black Wattle Gum." Leguminosæ. Gosford.
26 March.	
Presented by the Curator:—	
18,185a	Angophora lanceolata; Cav. "Red Gum." (Myrtaceæ.) Tram Terminus, Botany.
4 April.	
18,196	Acacia linifolia; Willd. (Leguminosæ.) The Valley, Blue Mountains, N.S.W. Gum.
18,197	Acacia elata; A. Cunn. (Leguminosæ.) Fitzgerald's Creek, The Valley. Gum.
18,198	Eucalyptus eugenioides; Sieb. "Stringybark." (Myrtaceæ.) Between Springwood and The Valley. Kino.

APPENDIX IV—continued.
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,199	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) The Valley. Kino from concentric circles of the wood.
18,200	<i>Angophora lanceolata</i> ; Cav. "Apple-tree." (Myrtaceæ.) The Valley. Kino.
18,201	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) The Valley. Kino.
18,202	<i>Eucalyptus saligna</i> ; Sm. (Myrtaceæ.) The Valley. Bark.
18,203	<i>Backhousia myrtifolia</i> ; Hook. et Harv. "Water Myrtle." (Myrtaceæ.) The Valley. Bark.
18,204	<i>Tristania laurina</i> ; R. Br. "Water Box." (Myrtaceæ.) The Valley. Bark.
18,205	<i>Hakea saligna</i> ; R. Br. (Proteaceæ.) The Valley. Bark.
18,206	<i>Callicoma serratifolia</i> ; Andr. "Beech." (Saxifrageæ.) The Valley. Bark.
18,207	<i>Ceratopetalum gummiferum</i> ; Sm. "Christmas Bush." (Saxifrageæ.) The Valley. Bark.
18,208	<i>Eucalyptus punctata</i> ; DC. "Leather-jacket." (Myrtaceæ.) The Valley. Kino.
18,209	<i>Eucalyptus eximia</i> ; Schau. "Yellow Bloodwood." (Myrtaceæ.) The Valley. Leaves.
16 April.	
18,248	<i>Acacia elata</i> ; A. Cunn. (Leguminosæ.) The Valley. Bark.
18,249	<i>Ceratopetalum apetalum</i> ; D. Don. "Coachwood." (Saxifrageæ.) The Valley. Bark.
18,250	<i>Eucalyptus punctata</i> ; DC. "Leather-jacket." (Myrtaceæ.) The Valley. Bark.
18,251-2	<i>Angophora lanceolata</i> ; Cav. "Apple-tree." (Myrtaceæ.) The Valley. Bark (two samples from differently-grown trees.)
18,253	<i>Banksia serrata</i> ; Linn. "Honeysuckle." (Proteaceæ.) The Valley. Bark.
18,254	<i>Eucalyptus Sieberiana</i> ; F. v. M. (Myrtaceæ.) The Valley. Bark.
18,255-6	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) The Valley. Bark (two samples from differently-grown trees.)
18,257	<i>Eucalyptus eugenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) The Valley. Bark.
18,258-9	<i>Casuarina torulosa</i> ; Ait. "Forest Oak." (Casuarinæ.) The Valley. Bark (two samples from differently-grown trees.)
18,260	<i>Eucalyptus tereticornis</i> ; Sm. "Red Gum." (Myrtaceæ.) The Valley. Bark.
18,261	<i>Eucalyptus saligna</i> ; Sm. "Blue Gum." (Myrtaceæ.) The Valley. Bark.
18,262	<i>Doryphora sassafras</i> ; Endl. "Sassafras." (Monimiaceæ.) The Valley. Leaves.
18,263	<i>Angophora lanceolata</i> ; Cav. "Apple-tree." (Myrtaceæ.) The Valley. Kino.
18,264	<i>Eucalyptus punctata</i> ; DC. "Leather-jacket." (Myrtaceæ.) The Valley. Kino and leaves.
18,265-6	<i>Eucalyptus corymbosa</i> ; Sm. "Bloodwood." (Myrtaceæ.) The Valley. Kino (two samples and leaves.)
18,267	<i>Eucalyptus engenioides</i> ; Sieb. "Stringybark." (Myrtaceæ.) The Valley. Kino.
18,268	<i>Eucalyptus piperita</i> ; Sm. "Peppermint." (Myrtaceæ.) The Valley. Kino.
18,269	<i>Sida retusa</i> ; Linn. "Queensland Hemp." (Malvaceæ.) The Valley. A bundle of the stems.
18,270	<i>Eucalyptus eximia</i> ; Schau. "Yellow Bloodwood." (Myrtaceæ.) The Valley. Kino and bark.
18,272	<i>Xylomelum pyriforme</i> ; Knight. "Native Pear." (Proteaceæ.) The Valley. Gum.
24 April.	
18,296.	<i>Frenela rhomboidea</i> ; Endl. "Cypress Pine." (Coniferæ.) Near Clontarf, Middle Harbour. Sydney. Bark and resin.
30 April.	
18,316	<i>Eucalyptus pilularis</i> ; DC. "Blackbutt." (Myrtaceæ.) Eastwood, near Sydney. Kino.
18,317	<i>Eucalyptus saligna</i> ; Sm. "Blue Gum." (Myrtaceæ.) Eastwood. Kino.
18,318	<i>Eucalyptus paniculata</i> ; Sm. "White Ironbark." (Myrtaceæ.) North Ryde. Kino.
18,319	<i>Angophora intermedia</i> ; DC. "Apple-tree." (Myrtaceæ.) Eastwood. Kino.
18,320	<i>Eucalyptus pilularis</i> ; DC. "Blackbutt." (Myrtaceæ.) Eastwood. Bark.
18,321	<i>Eucalyptus paniculata</i> ; Sm. "White Ironbark." (Myrtaceæ.) North Ryde. Bark.
18,322	<i>Eucalyptus acmenioides</i> ; Schau. "White Mahogany." (Myrtaceæ.) Eastwood. Bark.
21 May.	
18,449	<i>Eucalyptus pilularis</i> ; DC. "Blackbutt." (Myrtaceæ.) Ashfield, near Sydney. Three logs.
25 April.	
Presented by the Hon. W. Macleay:—	
18,349	<i>Spinifex resin</i> . (Gramineæ?) Near Derby, Western Australia. Vegetable matter cemented by an ill-smelling resin of an orange colour. In cakes, about 3 inches in diameter, and used by the aboriginals for cementing the heads of their spears.
16 August.	
Presented by Mr. A. W. Aspinall, Eden:—

19,106	<i>Acacia mollissima</i> ; Willd. "Green Wattle." (Leguminosæ.) Fernhill, Mulgoa, N.S.W. Bark.
19,107	<i>Acacia decurrens</i> ; Willd. "Green Wattle." (Leguminosæ.) Fernhill, Mulgoa. Bark.
19,108	<i>Acacia prominens</i> ; A. Cunn. "Grey Wattle." (Leguminosæ.) Fernhill, Mulgoa. Bark.
14 November.	
Presented by Mr. G. Brown, Sydney:—	
19,102	<i>Eucalyptus siderophloia</i> ?; "Red Ironbark." (Myrtaceæ.) In the old Central Police Court, Sydney. These pieces of timber (Nos. 19,102, 19,103, and 19,104) formed a portion of the building materials, and have been in use over sixty years.
19,103	<i>Eucalyptus crebra</i> ? "Grey Ironbark." (Myrtaceæ.) See No. 19,102.
19,104	<i>Cedrela australis</i> ; F. v. M. "Cedar Wedge." (Meliaceæ.) See No. 19,102.
Presented by Mr. R. C. Riley, Glenmore, Penrith:—	
19,109	<i>Acacia decurrens</i> , var.; Willd. "Wattle." (Leguminosæ.) Penrith. Flower, leaf, and seed.
20 November.	
Presented by Messrs. Mailand and McKeown, Sydney:—	
19,110	Red Ironbark. See note to No. 19,112.
19,111	<i>Cedrela Australis</i> ; F. v. M. "Cedar." (Meliaceæ.) See note to No. 19,112.
19,112	<i>Araucaria Cunninghamii</i> ; Ait. "Colonial Pine." (Coniferæ.) Old "White Swan Hotel," Queen's Wharf, Sydney.
Presented by Mrs. R. H. Kennedy, Wonnaminta, Wilcannia:—	
19,116	<i>Marsdenia Leichhardtiana</i> ; F. v. M. "Doubar" or "Native Fig." (Asclepiadææ.) Wonnaminta, Wilcannia. Used as food by the aboriginals.
19,117	<i>Cucumis trigonus</i> ; Roxb. "Native Melon." (Cucurbitaceæ.) N.W. Albert District, N.S.W. Used as food by the aboriginals.
(c) The following superb collection is the gift of the Director of the Royal Gardens, Kew, England:—	
<i>Timbers.</i>	
14 June, 1888.	
18,615	<i>Eperua falcata</i> ; Aubl. (Leguminosæ.) British Guiana. Shingles.
18,616	<i>Olinia cymosa</i> ; Thunb. (Lythariææ.) South Africa. Timber used for musical instruments, picture-frames, and fancy work; also for axles and poles for waggons.
18,617	<i>Castilloa elastica</i> ; Cervantes. "India-rubber Tree." (Urticaceæ.) British Honduras. A spongy, almost worthless, timber.
<i>Fibres and Fibrous Substances.</i>	
18,618	<i>Typha elephantina</i> ; Roxb. (Typhaceæ.) Cuddapah, Madras. Umbrella-mat (Gudala). Used for protecting plants, &c.
18,619	<i>Pandanus odoratissimus</i> ; Linn. "Screw Pine." (Pandaneææ.) India. Mats made of split leaves.
18,620	<i>Borassus flabelliformis</i> ; Linn. "Fan-palm" or "Palmyra." (Palmææ.) India. Mats made from leaves.
18,621	<i>Bambusa</i> sp. "Bamboo." (Gramineæ.) India. Roofing-mats made from split bamboo.
18,622	<i>Calamus</i> sp. "Rattan." (Palmææ.) India. Mats made from split cane.
18,623	<i>Ichnosiphon aromata</i> ; Korn. "Iturite." (Scitamineæ.) Kernicke, British Guiana. Basket made from the strips of the leaves; woven very openly.
18,624	<i>Streblus asper</i> ; Lour. (Moreææ.) Bangkok, Siam. Book made of the leaves.
18,625	<i>Hierochloa borealis</i> ; Hook. F. (Gramineæ.) N. America. Four mats—one entirely made of this aromatic grass; the other three are tastefully decorated with birch-bark and dyed porcupine-quills.
18,626	<i>Bambusa</i> sp. "Bamboo." (Gramineæ.) India. Strainer made of split bamboo.
18,627	<i>Bauhinia Vahlia</i> ; W. & A. (Leguminosæ.) India. Platters made by sewing the leaves together; used instead of plates.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,628	<i>Ravenala guyanensis</i> . (Musaceæ.) Brit. Guiana. Red tomentum from seeds.
18,629	<i>Yucca brevifolia</i> ; Engelm. "Adam's Needles." (Liliaceæ.) Mexico. Boiled fibre.
18,630	<i>Bœhmeria nivea</i> ; Hook. et Arn. "Ramie" or "China Grass." (Urticaceæ.) Gowhatty, India. Fibre.
18,631	<i>Gossypium</i> sp. "Cotton." (Malvaceæ.) India. Five pods (capsules).
18,632	<i>Ficus</i> sp. "Fig." (Urticaceæ.) Botanic Gardens, Mauritius. Fibre (inner bark).
18,633	<i>Thuja gigantea</i> ; Nuttall. "Cedar." (Coniferæ.) Vancouver Island. Fibre from wood.
18,634	<i>Caryota</i> sp. (Palmeæ.) Cachar, Assam. Hairy covering from young fronds; used as tinder.
18,635	<i>Pinus palustris</i> ; Sol. "Syn. <i>Pinus australis</i> , Mich." (Coniferæ.) United States of America. Fibre prepared from the leaves; used for mat-making.
18,636	<i>Aloe spicata</i> ; Thun. (Liliaceæ.) Madras. Piece of fine cord.
18,637	<i>Livistonia sinensis</i> ; Griff. (Palmeæ.) Hongkong. Piece of rope made from the leaves.
18,638	<i>Sabal palmetto</i> . "Palmetto Palm." (Palmeæ.) Bahamas. Piece of rope made from the leaves.
18,639	<i>Raphia ruffia</i> ; Mt. (Palmeæ.) Madagascar. Very fine cloth made up into a gaiter.
18,640	<i>Phormium tenax</i> ; Forst. "New Zealand Flax." (Liliaceæ.) New Zealand. Fibre ready for rope-making.
18,641	<i>Linum usitatissimum</i> ; Linn. "Flax." (Linaceæ.) Lahore, India. Prepared fibre.
18,642	" " (Linaceæ.) Russia. Coarse flax.
18,643	" " " " Flax beaten out and then dried.
18,644	" " " " Flax prepared by steeping in water.
18,645	" " " St. Petersburg, Russia. Flax.
18,646	" " " Ireland. Flax.
18,647	" " " " (Co. Mayo). Flax.
18,648	" " " Russia (Porkoff). Tow (fine).
18,649	" " " Ireland. Tow (medium and very coarse).
18,650	" " " " Dry-spun tow.
18,651	" " " " "
18,652	" " " " Wet-spun tow.
18,653	" " " " Flax yarn, wet-spun.
18,654	" " " " Dry-spun flax twist.
18,655	<i>Corchorus capsularis</i> ; Linn. "Jute." (Tiliaceæ.) India. Fibre.
18,656	" " " " " Wet-spun twists.
18,657	" Flax " and " Jute." Dry-spun mixture.
18,658	<i>Linum usitatissimum</i> ; Linn. Ireland. Yarns.
18,659	" " " " Four samples to illustrate the preparation of flax.
18,660	Tow (prepared for spinning). " " Three samples to illustrate the preparation of tow previous to being spun into yarn.

14 June.

The following fabrics, to illustrate the utilization of flax and jute, were manufactured by Messrs.

Richards & Co., Broadford Works, Aberdeen, Scotland:—

18,661	Brand Sheeting. Flax warp and flax weft. "Shaved" and "finished."
18,662	Railway Waggon Canvas. Flax warp and flax weft. "Shaved" and "finished."
18,663	Flax Tent Cloth. Double flax warp, single flax weft; boiled yarns. "Shaved" and "finished."
18,664	Tent Cloth. Flax warp and flax weft. "Unshaved," "unfinished."
18,665	Plain Art Canvas. Creamed flax yarns. "Finished."
18,666	Etruscan Tapestry. Wet-spun, natural colour. "Finished." Flax warps and bleached flax wefts.
18,667	Linen Scrim. Wet-spun warps and wefts unbleached. "Unfinished."
18,668	Brown Dowlas, for Army and Navy clothing purposes. Flax warps and wefts. "Finished."
18,669	Seamless Flax Hose-piping. Rubber-lined for Fire Brigades, Mines, Railways, &c. "Finished."
18,670	Linen Drill. Flax warps and wefts. Round thread. "Finished."
18,671	Serge Twilled Sheeting, flax warps and wefts. Cloth "bleached" and "finished."
18,672	Creamed Damask Table Linen, medium quality. "Shaved" and "finished." Flax warp and weft.
18,673	Bleached Damask Table Linen, flax warp and weft. "Bleached" and "finished" after weaving.
18,674	Superior Linen Glass-cloth. Bleached flax warps and wefts. Washed and finished after weaving to remove fluff.
18,675	Huckaback Towelling. Flax warps and wefts. "Loom finished."
18,676	Sail Canvas, medium quality, made from flax warps and wefts. "Finished."
18,677	Sail Cloth, superior quality, flax warp and weft. "Unshaved" and "unfinished."
18,678	Table Linen, medium quality, flax warps and wefts. Bleached and "finished" after being woven.
18,679	Linen Drill Short-linings, flax warps and wefts. Round thread. "Finished."
18,680	Roman Tapestry. Wet-spun, flax lino warps and wefts. "Finished."
18,681	Linen Scrim. Wet-spun, flax warps and wefts. Bleached and finished.
18,682	Domestic Linen. Turkey-red cotton borders. Bleached flax warps and wefts. Round thread. "Finished."
18,683	Old English Tapestry. Creamed flax warps and wefts. "Finished."
18,684	Linen Drill Short-linings. Wet-spun flax warps and wefts, round thread, "finish."
18,685	All Flax Navy Duck. Creamed flax warps and wefts. "Unshaved" and "unfinished."
18,686	Flax Duck. Awnings and yacht sails. Bleached flax yarns. "Finished."
18,687	Table Linen, medium quality, flax warps and wefts. "Creamed" and "loom finished."
18,688	Navy Duck, Army and Navy clothing purposes, &c.; warps and wefts superior flax yarns. "Finished."
18,689	Linen for Sheetings, &c.; dry-spun warps and wefts. Washed and "finished."

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
<i>Flax and Tow Fabrics.</i>	
18,690	Glass-cloth made of bleached yarns. Flax warp and tow weft. "Loom finished."
18,691	Railway-waggon canvas, tow warp and weft. "Finished."
18,692	Domestic linen. Bleached dry-spun flax warps and tow wefts. "Unshaved" and "unfinished."
18,693	"Cream" sheeting. Flax warps and tow wefts, rough as it comes from the loom.
18,694	Linen Drill, short-lining. Bleached yarn, flax warps, tow wefts. "Finished."
18,695	Domestic linen. Bleached dry-spun flax warps and wefts. "Shaved" and "finished."
18,696	Cream linen shoe-linings. Flax warps and tow wefts. "Finished."
18,697	Black linen linings; cloth dyed. Flax warps and tow wefts. "Finished."
18,698	Tea-cloths. Flax warps and tow wefts. Washed and "finished" after being woven.
18,699	"Cream" sail-canvas. Finished "creamed," tow warps and wefts.
18,700	Tailors coat-paddings. Flax warps and tow wefts. "Unshaved" and "unfinished."
<i>Tow Fabrics.</i>	
18,701	Domestic towelling. Dry spun, tow warp and tow weft yarn.
18,702	White and brown and twilled towelling. Warp, best spun tow; weft, dry-spun tow; colours, cotton.
18,703	Bed-ticking. Colours, warp and weft, dry-spun tow.
18,704	Repairing canvas. "Finished." Boiled tow warp and weft.
18,705	Brown sacking twill. Natural colour, tow warp and weft. "Shaved, finished."
18,706	Railway-waggon canvas. Flax warp, tow weft. "Shaved, finished."
18,707	"Creamed" sheeting. Tow warp and weft. "Shaved and finished."
18,708	Blue-striped padding. Warp and weft, dry-spun tow yarn.
18,709	Brown-striped sheeting. Warp and weft, dry-spun tow yarn; colour, cotton.
<i>Mixed Fabrics.</i>	
18,710	Railway-waggon canvas. Flax warp, hemp, weft. "Unshaved" "unfinished."
18,711	Domestic towelling. Jute warp, natural colour, tow weft, bleached, "finished."
18,712	"Creamed" tropical cloth, "shaved" "finished," double cotton warps; double flax wefts.
18,713	Apron sheeting, low quality, bleached cotton warps, tow wefts.
18,714	Huckaback towel. Warp, dry-spun flax; weft, dry-spun tow; colour, cotton.
18,715	Tropical cloth. Double cotton warps, double flax wefts. "Full bleached" and "finished."
18,716	Union glass-cloth, cotton warp and tow weft. "Shaved" and "finished."
18,717	Union glass-cloth, cotton warp and tow weft. "Unshaved" "unfinished."
18,718	Dice towels. Flax warp, tow weft. Colour, cotton.
18,719	Oatmeal towel, warp and weft, dry-spun tow; colour, cotton.
18,720	Damask towel, warp, dry-spun flax, and weft, dry-spun tow; colour, cotton.
18,721	Glass towel, warp and weft, dry-spun line; colour, cotton.
18,722	Twilled towel; warp, flax; weft, tow; coloured yarn, cotton.
18,723	Dice towel; warp, flax; weft, tow; coloured yarn, cotton.
18,724	Dice towel, striped; warp, dry-spun flax; weft, dry-spun tow; colour, cotton.
18,725	Linen sheeting; warp, flax; weft, tow. "Finished." Natural colour.
18,726	Brown sacking twill; natural colour; warp, tow; weft, jute. "Shaved" and "finished."
18,727	Union glass-cloth; warp, cotton; weft, tow. "Shaved," "finished."
18,728	Apron sheeting, rough; warp, bleached cotton; weft, tow.
18,729	Railway-waggon canvas; warp, flax; weft, hemp. "Shaved" and "finished."
18,730	Brown tow scrim (gluing canvas); warp, tow; weft, jute. "Shaved" and "finished."
18,731	Union glass-cloth; warp, cotton; weft, tow. "Shaved" and "finished."
18,732	Union creguela; warp, cotton; weft, dry-spun.
18,733	Italian tapestry; natural colour; warp and weft, wet-spun flax. "Finished."
18,734	Union glass-cloth; warp, cotton; weft, tow. "Unshaved" and "unfinished."
18,735	Domestic towelling; warp, cotton; weft, wet-spun tow; turkey-red cotton borders.
18,736	Creamed sacking twill; warp and weft, tow. "Shaved" and "finished."
18,737	Railway-waggon canvas; warp and weft, tow. "Unshaved," "unfinished."
<i>Miscellaneous.</i>	
18,738	Pipe made of maize-cobs by the Indians of South Carolina, America.
18,739	Shield of split rattans, Coorg, India.

FOODS.

(a) *Cereals.*

18,768	<i>Oryza sativa</i> ; Linn. "Rice." (Gramineæ.) Almercz. Husk used as fodder.
18,769	<i>Oryza sativa</i> ; Linn. "Paddy." (Gramineæ.) Java.
18,770	<i>Oryza sativa</i> ; Linn. "Paddy." (Gramineæ.) Bombay.
18,771	<i>Oryza sativa</i> ; Linn. "Paddy." (Gramineæ.) Bombay.
18,772	<i>Oryza sativa</i> ; Linn. "Var. Kar." (Gramineæ.) Madras.
18,773	<i>Oryza sativa</i> ; Linn. "Var. Kar." (Gramineæ.) Madras.
18,774	<i>Oryza sativa</i> ; Linn. "Var. Kar." (Gramineæ.) Bengal.
18,775	<i>Oryza sativa</i> ; Linn. "Paddy." (Gramineæ.) Saharunpore.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,776	<i>Oryza sativa</i> ; Linn. "Var. Shengkorvai." (Gramineæ.) India.
18,777	<i>Oryza sativa</i> ; Linn. "Var Dhola Bosidham." (Gramineæ.) Goalpara, Assam.
18,778	<i>Oryza sativa</i> ; Linn. "Pootoo Aresee." (Gramineæ.) Madras. Husked.
18,779	<i>Triticum sativum</i> ; Linn. "Hard Red Wheat." (Gramineæ.) Punjab.
18,780	<i>Triticum sativum</i> ; Linn. "Wheat, poisoned." (Gramineæ.) Bombay.
18,781	<i>Avena sativa</i> ; Linn. "Oats." (Gramineæ.) Calcutta.
18,782	<i>Hordeum hexastachyum</i> ; Linn. "Barley." (Gramineæ.) India. Used for making a kind of beer.
18,783	<i>Hordeum cœleste</i> (syn. <i>H. vulgare</i>); Linn. "Siberian Barley." (Gramineæ.) Bushahr. Grows at high elevation. Used for making beer. Flour made from the parched grain is carried by the natives.
18,784	<i>Zea Mays</i> ; Linn. "Mucca." (Gramineæ.) Chitore, India. Maize or Indian Corn.
18,785	<i>Zea Mays</i> ; Linn. (Gramineæ.) Natal. Maize.
18,786	<i>Sorghum vulgare</i> ; Pers. "Great Millet." (Gramineæ.) Central Provinces, India. The well-known "Guinea Corn."
18,787	<i>Panicum italicum</i> (unthreshed); Linn. (Gramineæ.) Bombay.
18,788	<i>Panicum italicum</i> (threshed); Linn. (Gramineæ.) Bombay.
18,789	<i>Pennisetum typhoideum</i> , var. <i>Gungapori</i> ; Rich. "Bajra." (Gramineæ.) Cawnpore. Furnishes a valuable green fodder and a good hay.
18,790	<i>Paspalum scrobiculatum</i> ; Linn. "Koda Millet." (Gramineæ.) Central Provinces, India. Fodder and food.
18,791	<i>Paspalum scrobiculatum</i> ; Linn. "Koda Millet." (Gramineæ.) Narsinghur, India. Fodder and food.
18,792	<i>Paspalum scrobiculatum</i> ; Linn. "Koda Millet." (Gramineæ.) India. Fodder and food.
(b) <i>Pulse.</i>	
18,793	<i>Pisum sativum</i> ; Linn. "Common Pea." (Leguminosæ.) India.
18,794	<i>Pisum arvense</i> ; Wight. "Field Pea." (Leguminosæ.) Calcutta.
18,795	<i>Lens esculenta</i> ; Moench. "Lentils." (Leguminosæ.) Calcutta.
18,796	<i>Lens esculenta</i> ; Moench. "Split Seeds." (Leguminosæ.) Gobindpore, Manbhūm, India.
18,797	<i>Cajanus indicus</i> ; Spreng. "Pigeon Peas." (Leguminosæ.) Calcutta. Largely consumed by all classes in many parts of India.
18,798	<i>Cajanus indicus</i> ; Spreng. "Split." (Leguminosæ.) Cawnpore.
18,799	<i>Lathyrus sativus</i> ; Linn. "Vetchlings, split." (Leguminosæ.) Cawnpore. A coarse, inferior pulse.
18,800	<i>Vigna catiang</i> ; Endl. "Catiang Beans." (Leguminosæ.) Madras.
18,801	<i>Vigna catiang</i> ; Endl. "Catiang Beans." (Leguminosæ.) Saharunpore.
18,802	<i>Phaseolus mungo</i> ; Linn. "Gram." (Leguminosæ.) Bombay. Largely consumed in all parts of India.
18,803	<i>Phaseolus mungo</i> , var.; Linn. "Gram." (Leguminosæ.) Gobindpore. Manbhūm, India.
18,804	<i>Phaseolus mungo</i> , var. <i>radiatus</i> ; Linn. (Leguminosæ.) Calcutta.
18,805	<i>Phaseolus mungo</i> , var. <i>radiatus</i> ; Linn. (Leguminosæ.) Madras.
18,806	<i>Dolichos biflorus</i> ; Roxb. "Horse Gram." (Leguminosæ.) Madras. Common food for cattle and horses in South India.
18,807	<i>Dolichos biflorus</i> ; Roxb. "Horse Gram." (Leguminosæ.) Calcutta. Common food for cattle and horses in South India.
18,808	<i>Cicer arietinum</i> ; Linn. "Chick-pea." (Leguminosæ.) Saharunpore. Much consumed by the lower classes.
18,809	<i>Cicer arietinum</i> ; Linn. "Chick-pea." (Leguminosæ.) Calcutta.
18,810	<i>Cicer arietinum</i> ; Linn. "Chick-pea." (Leguminosæ.) Central Provinces, India.
(c) <i>Spices and Miscellaneous.</i>	
18,740	<i>Allium sativum</i> ; Linn. "Garlic." (Liliacæ.) Berar, India.
18,742	<i>Allium cepa</i> ; Linn. "Onion." (Liliacæ.) Almara, India.
18,743	<i>Capsicum</i> sp. "Red Pepper, or Chillies." (Solanacæ.) Dehra Dun, India.
18,744	<i>Elettaria cardamomum</i> (cardomoms); Wh. and Mt. "Horse-radish." (Zingiberacæ.) India.
18,745	<i>Cochlearia armoracia</i> ; Linn. "Horse-radish." Cruciferæ. United States.
18,746	<i>Illicium anisatum</i> ; Lindl. "Star Anise." (Magnoliacæ.) Bombay. Fruits.
18,747	<i>Ocimum sanctum</i> ; Linn. "Basil." (Labiata.) Madras. Seed.
18,748	<i>Areca catechu</i> ; Linn. "Betel Nuts." (Palma.) Ceylon. The masticatory of tropical Asia.
18,749	Models of sliced betel nut. India.
18,750	<i>Piper betel</i> ; Linn. (Piperacæ.) Madras. These leaves are wrapped round fragments of betel nut and lime, and the whole chewed.
18,751	<i>Cannabis sativa</i> ; Linn. "Ganja." (Cannabinacæ.) Bombay. The dried hemp plant, used for smoking.
18,752	<i>Erigeron canadense</i> ; Linn. "Canadian Flea-bane." (Compositæ.) United States. Used for making a kind of tea.
18,753	<i>Papaver somniferum</i> ; Linn. (Papaveracæ.) Bombay. Scarified poppyheads, showing the incisions made, from which the juice (which, when dried, becomes opium) exudes.
18,754	<i>Papaver somniferum</i> ; Linn. (Papaveracæ.) Patua, India. "Alcaree Provision" opium.
18,755	<i>Coffea liberica</i> ; Bull. "Liberian Coffee." (Rubiaceæ.) Porak.
18,756	<i>Cyclopia latifolia</i> ; DC. "Cape or Bush Tea." (Leguminosæ.) Cape of Good Hope. Used for making a kind of tea, and said to be used to adulterate China tea.

APPENDIX IV—*continued.*

DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,757	Nuphar advena; Ait. (Nymphaeaceæ.) United States. The roots of this water-lily are eaten.
18,758	Nymphaea sp. "Poi Giy." (Nymphaeaceæ.) Bombay. Water-lily seeds.
18,759	Cyperus sp. "Cormantyn ground Nut." (Cyperaceæ.) Niger expedition, Africa.
18,760	Raphanus sativus; Linn. "Tinki Radish." (Cruciferae.) Nepal. Fermented.
18,761	Cucumis trigonus; Roxb. (Cucurbitaceæ.) Chota Nagpur, Bengal. Sliced fruits. For an account of the use of these fruits, see Dymock, "Materia Medica of Western India," p.
18,762	Coix lachryma; Linn. "Job's Tears." (Gramineæ.) India. Used for food, and also for making necklaces.
18,763	Fagopyrum emarginatum; Meiss. "Buckwheat." (Polygonaceæ.) India.
18,764	Mangifera indica; Linn. "Mango." (Anacardiaceæ.) Calcutta. Vernacular, "Amchoor."
18,765	Prunus armeniaca; Linn. "Khobani." (Rosaceæ.) Calcutta. A kind of insipid dry plum, used as food.
18,766	Sagus vitiensis; Herm. Wendl. "Sago." (Palmae.) Fiji.
18,767	Curcuma angustifolia; Roxb. "Arrowroot." (Cucurbitaceæ.) Bombay.
<i>Dyes and Tans.</i>	
18,831	Acacia catechu; Willd. (Leguminosæ.) British Burmah. Chips of the wood, used both for tanning and dyeing.
18,832	Diospyros Burmanica; Kurz. (Ebenaceæ.) Prome, Burmah. The fruits used locally for tanning.
18,833	Uncaria gambier; Roxb. "Siak Gambier." (Rubiaceæ.) Straits Settlements. Used for tanning.
18,834	Comptonia asplenifolia; Gærtn. "Sweet Fern." (Myricaceæ.) United States. The leaves used for tanning.
18,835	Acacia catechu; Willd. (Leguminosæ.) Burmah. Pods.
18,836	Rhizophora mangle; Roxb. "Mangrove." (Rhizophorææ.) United States. The bark used for tanning.
18,837	Diospyros embryopteris; Pers. "Gab." (Ebenaceæ.) Hoogly, India. The fruits. The glutinous juice of these is extensively employed in caulking boats and fishing-nets in India; it yields a powerful astringent, used for tanning purposes.
18,838	Anogeissus latifolia; Wall. (Combretaceæ.) Gobindpora, Maubhum, India. Leaves used for dyeing and tanning.
18,854	Calamus Draco; Willd. "Dragon's Blood." (Palmae.) Bombay. The well-known red dye.
18,825	Nyctanthes arbor-tristis; Linn. "Hursinghar." (Jasminææ.) Patiala, India. The flowers. The tube of the corolla affords a beautiful but fugacious yellow dye.
18,847	Terminalia belerica; Roxb. (Combretaceæ.) Basha'ir, Punjab, India. The fruits, called "Belleric Myrabolans."
18,848	Moriada citrifolia; Linn. "Madder." (Rubiaceæ.) United States." The roots, use for dyeing reds.
18,849	Quercus tinctoria; Willd. "Quercitron, or Dyer's Oak." (Cupuliferae.) United States. The bark, used for dyeing and tanning.
18,850	Cathamus tinctorius; Linn. "Safflower." (Compositæ.) Saharanpore, India. The florets, used for dyeing reds and yellows.
18,851	Ventilago calyculata; Tulasne. (Rhamnæ.) Cuddapah, India. Root-bark.
18,852 & 18,853	Pinus longifolia; Roxb. (Coniferae.) N. W. Provinces, India. The charred leaves, which, when mixed with rice-water, are used as ink.
18,811	Pistacia terebinthus; Linn. "Galls of." (Terebinthaceæ.) Calcutta. Used for tanning leather in the East.
18,812	Button lac. "Shellac." Bengal. The purified exudation caused by the exudation of an insect on the twigs of various trees.
18,813	Quercus infectoria; Olivier. "Galls of." (Cupuliferae.) Bengal. Used for dyeing.
[The three preceding specimens are caused by the attacks of insects on plants]	
<i>Gums and other exudations.</i>	
18,839	Dichopsis gutta; Bth. et. Hook. f. "Gutta-percha." (Sapotaceæ.) British North Borneo.
18,840	Gutta-percha. Gutta-percha, supposed to be from the Straits Settlements. Brought on shore at Zanzibar, probably from a wreck.
18,841	Symphonia globulifera; Linn. "Hog Gum." (Guttiferae.) Jamaica.
18,842	Aloe Socotrina; Lam. "Socrotine Aloes." (Liliaceæ.) Bombay. The inspissated juice, used largely in medicine.
18,843	Anogeissus latifolia; Wall. (Combretaceæ.) Cuddapah, Madras. Gum.
18,844	Hevea brasiliensis; Muell. Arg. "Para Rubber." (Euphorbiaceæ.) Jamaica. The seeds.
18,845	Manihot Glaziovii. "Cerea Rubber." (Euphorbiaceæ.) Jamaica. The seeds.
18,846	Hopcea micrantha. (Dipterocarpeæ.) Sumatra. "Damar Mata Kutching," or "Cat's-eye Damar." A resin used in varnish-making.
<i>Oils and Oil Seeds.</i>	
18,814	Papaver somniferum; Linn. "Poppy Seeds." (Papaveraceæ.) Bombay. Used to make "poppy oil;" used by artists, &c.
18,815	Hardwickia binata; Roxb. "Fruits of." (Leguminosæ.) Tinnevelly.
18,816	Quillaja saponaria; Mol. "Soap Bark." (Rosaceæ.) Chili. Contains a large quantity of saponin.
18,817	Pongamia glabra; Vent. "Indian Beech." (Leguminosæ.) Bengal. These seeds yield an oil used both medicinally and for illuminating purposes.

APPENDIX IV—*continued*.
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,818	<i>Bassia butyracea</i> ; Roxb. "Indian Butter-tree." (Sapotaceæ.) Almora, India. A vegetable butter ("Rhut") is made from the seeds.
18,819	<i>Bassia latifolia</i> ; Willd. "Mahwa-tree." (Sapotaceæ.) N.W. Provinces, India. Sample of the oil-cake made from the seeds.
<i>Drugs.</i>	
18,856	<i>Colliguaya odorifera</i> ; Molin. "Colliguaya." (Euphorbiaceæ.) Chili. The juice of the berries is used to destroy.
18,857	<i>Artemisia vulgaris</i> ; Linn. "Mugwort." (Compositæ.) North America. Leaves and twigs, tonic and anthelmintic.
18,858	<i>Teucas aspera</i> ; Spreng. (Labiatae.) Madras. The leaves, the juice of which has been applied successfully in psora and other chronic eruptions.
18,859	<i>Cunila Mariana</i> ; Linn. "Dittany." (Labiatae.) United States. The leaves.
18,860	<i>Aristolelia macqui</i> (Syn. <i>A. glandulosa</i> , Ruiz. & Pav.); Herit. "Magui." (Tiliaceæ.) Chili. Leaves and twigs; used in cases of diarrhœa and dysentery.
18,861	<i>Polygonum sanguinaria</i> . (Polygonaceæ.) Chili. Used as a diuretic and to cool the blood.
18,862	<i>Erythraea divaricata</i> (Syn. <i>E. Chilensis</i> , Benth.); Schaff. "Cauchalagna." (Gentianaceæ.) Chili. The herb.
18,863	<i>Kageneckia oblonga</i> ; Ruiz. & Pav. "Bollen." (Rosaceæ.) Leaves used as a febrifuge; but taken in excess they act as a poison.
18,864	<i>Solanum nigrum</i> ; Linn. "Yerba Mora." (Solanaceæ.) Chili. The herb.
18,865	<i>Pongamia glabra</i> ; Vent. (Leguminosæ.) Thauna, Bombay. The pods; an oil is obtained from the seeds, which is very valuable in scabies, herpes, and other cutaneous diseases.
18,866	<i>Mentha arvensis</i> ; Linn. "Mint." (Labiatae.) Nowgong, Assam. The herb.
18,867	<i>Picrorrhiza Kurroa</i> ; Royle. (Scrophulariaceæ.) Nepal. The herb; a bitter. The root is, however, the part usually employed.
18,868	<i>Gentiana quinqueflora</i> ; Lamarek. (Gentianaceæ.) America. The herb; a bitter tonic.
18,869	<i>Chelone glabra</i> ; Linn. "Balmony." (Scrophulariaceæ.) United States. The herb; laxative or purgative.
18,870	<i>Cephaelis tomentosa</i> ; W. (Rubiaceæ.) Trinidad. The root; an ipecacuanha.
18,871	<i>Parmelia Kamtschadalis</i> ; Esch. (Lichenes.) India. Said to be diuretic.
18,872	<i>Peumus Boldus</i> ; Molina. "Boldo." (Monimiaceæ.) Chili. Leaves.
18,873	<i>Rheum emodi</i> ; Wall. "Indian Rhubarb." (Polygonaceæ.) Nepal. Differs entirely in appearance and structure from ordinary rhubarb.
18,874	<i>Ruta graveolens</i> ; Linn. "Rue." (Rutaceæ.) United States. The leaves; stimulant, carminative, and anthelmintic.
18,875	<i>Cunila Mariana</i> ; Linn. "Dittany." (Labiatae.) United States. Leaves and twigs.
18,876	<i>Cistanche tubulosa</i> (Syn. <i>Phelipæa tubulosa</i> , Schenk); Hoffm. & Link. India. When the stems are bruised they form an efficient cure for sores on horses.
18,877	<i>Gnaphalium viravira</i> ; Molin. "Viravira." Chili. Flowers, leaves, and twigs.
18,878	<i>Melilotus officinalis</i> ; Linn. "Melilot." (Leguminosæ.) Kurrachi, India. The flowers contain abundance of coumarin.
18,879	<i>Hyoscyamus niger</i> ; Linn. "Henbane." (Solaneæ.) Colchester, England. A fine bundle of biennial henbane, in fruit.
18,880	<i>Taraxacum officinale</i> ; Wigg. "Dandelion." (Compitæ.) India. The root, spirited.
18,881	<i>Verbascum thapsus</i> ; Linn. "Mullein." (Scrophulariaceæ.) United States. The root, mucilaginous.
18,882	<i>Hydrastis canadensis</i> ; Linn. "Yellow-root." (Ranunculaceæ.) United States. The roots, official in the U.S.P.; a powerful bitter.
18,883	<i>Tinospora cordifolia</i> ; Miers. (Menispermaceæ.) Saharunpore, India. The roots; reputed to possess tonic, antiperiodic, and diuretic properties.
18,884	<i>Aconitum heterophyllum</i> ; Wall. "Atees Root." (Ranunculaceæ.) Bengal. The roots. Used in India as a tonic and antiperiodic.
18,885	<i>Caulophyllum thalictroides</i> ; Mich. "Blue Cohosh." (Berberideæ.) North America. The root is valued as a sudorific in North America, and its seeds form a substitute for coffee.
18,886	<i>Nectandra Rodiceï</i> ; Schomb. "Bebeeru." (Laurineæ.) British Guiana. The fruit; the bark is the part employed in medicine.
18,887	<i>Rheum</i> sp.; "A Rhubarb." (Polygonaceæ.) Afghanistan. The fruit; used as a purgative. (Surgeon-major Aitcheson).
18,888	<i>Tribulus terrestris</i> ; Linn. (Zygophyllaceæ.) Bengal. The fruit; diuretic.
18,889	<i>Thevetia nereifolia</i> ; Juss. "Yellow Oleander." (Apocynæ.) Calcutta. These very poisonous fruits are useful, in suitable doses, in the treatment of intermittent fever.
18,890	<i>Dalbergia</i> sp.; "Plaska biya." (Leguminosæ.) Nepal. Fruit.
18,891	<i>Spondias mangifera</i> ; Pers. (Terebinthaceæ.) Kurseong, Bengal. The fruit.
18,892	<i>PedaliuM Murex</i> ; Linn. (Bignoniaceæ.) Bengal. The fruit; a useful diuretic.
18,893	<i>Pterocarpus Marsupium</i> ; Roxb. "Kino-tree." (Leguminosæ.) Madras. Fruit.
18,894	<i>Cassia Fistula</i> ; Linn. "Purging Cassia." (Leguminosæ.) Cawnpore. Fruit pulp; a purge, as its name denotes.
18,895	<i>Ambrosia artemisiæfolia</i> ; Linn. (Compositæ.) United States. Leaves.
18,896	<i>Cynoglossum officinale</i> ; Linn. "Hound's Tongue." (Boraginaceæ.) United States. Leaves; the root is used medicinally.
18,897	<i>Juniperus Virginiana</i> ; Linn. "Red Cedar, or American Savin." (Coniferae.) United States. Leaves; used as a substitute for Savin.

APPENDIX IV—*continued.*
DONATIONS (SPECIMENS).

Museum No.	Date and Description.
18,898	<i>Mussaenda frondosa</i> ; Linn. (Cinchonaceæ.) Seebpore, Calcutta. Leaves.
18,899	<i>Archangelica atropurpurea</i> ; Hoffm. (Umbelliferae.) North America. Leaves.
18,900	<i>Hepatica triloba</i> ; Chaix. "Liverwort." (Ranunculaceæ.) United States. These leaves have enjoyed some reputation in chronic bronchitis, &c.
18,901	<i>Erigeron philadelphicus</i> ; Linn. "Syn. of <i>E. canadense</i> ." (Compositæ.) United States. The leaves; slightly tonic, diuretic and astringent.
18,902	<i>Cassia lanceolata</i> ; Wall. "Senna." (Leguminosæ.) Bombay. The leaves. The Indian or Tinnevely Senna.
18,903	<i>Hedeoma pulegioides</i> ; Pers. "American Pennyroyal." (Labiatae.) North America. The leaves; a substitute for Pennyroyal.
18,904	<i>Pinus Strobis</i> ; Linn. "White Pine or Weymouth Pine." (Coniferae.) United States. Leaves.
18,905	<i>Oenothera biennis</i> ; Linn. "Evening Primrose." (Onagraricæ.) United States. The leaves, which are slightly astringent, are occasionally given in diarrhoea.
18,906	<i>Simaruba glauca</i> ; Kth. "Bitter Dan." (Rutaceæ.) Jamaica. The bark; a bitter tonic.
18,907	<i>Holarrhena antidysenterica</i> ; Wall. "Conessi." (Apocynæ.) India. The bark; largely used in bowel complaints in India.
18,908	<i>Ilex verticillata</i> ; Gray. "Black Alder." (Ilicineæ.) United States. Bark.
18,909	<i>Alnus rubra</i> ; Desf. "Tag Alder." (Myricaceæ.) United States. The bark; used in scrofula and cutaneous diseases.
18,910	<i>Prunus Pseudocerasus</i> ; Lind. (Rosaceæ.) Japan. Bark.
18,910a	<i>Quassia amara</i> ; Linn. "Surinam Quassia-wood." (Simarubeæ.) Japan. The bitter bark; the wood is, however, usually employed.
18,911	<i>Michelia champaca</i> ; Linn. (Magnoliaceæ.) Kurseong, Bengal. The bark; bitter and aromatic.
18,912	<i>Tsuga mertensiana</i> ; Carrietze. "Syn. <i>Abies Mertensiana</i> ; Lindl." (Coniferae.) United States. Bark.
18,913	<i>Liriodendron tulipifera</i> ; Linn. "Tulip-tree." (Magnoliaceæ.) United States. The inner bark; stimulant, tonic, and diaphoretic.
18,914	<i>Melia Azedarach</i> ; Linn. "Persian Lilac." (Meliaceæ.) Kumaon, India. Bark. The root bark is used as an anthelmintic in America.
18,915	<i>Tsuga Pattoniana</i> . (Coniferae.) United States. Bark.
18,916	<i>Juniperus Virginiana</i> ; Linn. "Red Cedar." (Coniferae.) United States. Bark.
18,916a	<i>Myrica sapida</i> ; Wall. "Wax Myrtle." (Myricaceæ.) Phillour, Punjab. The bark, when mixed with ginger, is used to rub cholera patients, to promote reaction.
18,917	<i>Canella alba</i> ; Murr. "Wild Cinnamon." (Canellaceæ.) Jamaica. The bark; a stimulant, aromatic tonic.
18,918	<i>Phyllanthus emblica</i> ; Linn. "Emblie Myrabolans." (Euphorbiaceæ.) Bitul, Central Provinces, India. The bark; astringent.
18,919	<i>Gordonia Lasianthus</i> ; Linn. "Loblolly Bay." (Camelliaceæ.) United States. Bark.
18,920	<i>Cinchona Calisaya</i> ; Wedd. "Calisaya Bark." (Rubiaceæ.) Jamaica. The well-known Cinchona bark.
18,921	<i>Quercus alba</i> ; Linn. "White Oak." (Cupuliferae.) United States. The bark; astringent.
18,922	<i>Psidium Guaiana</i> ; Raddi. "Guava." (Myrtaceæ.) Bengal. Bark.
18,923	<i>Oxydendron arboreum</i> ; DC. (Ericaceæ.) United States. Bark.
18,924	<i>Vochysia guyanensis</i> (Syn. <i>Cucullaria excelsa</i> , Willd); Aubl. "Etabally." (Vochysiaceæ.) British Guiana. Bark used in the form of an infusion for affections of the eye.
18,925	<i>Careya arborea</i> ; Roxb. "Kumbhi." (Myrtaceæ.) Thama, Bombay. Bark.
18,926	<i>Hymenoclea Courbaril</i> ; Linn. "Simiri" or "Locust Bark." (Leguminosæ.) British Guiana. Bark.
18,927	<i>Ægle marmelos</i> ; Corr. "Bael or Bengal Quince." (Rutaceæ.) India. The seeds. The interior of the fruit is used in the preparation of a drink for invalids.
18,928	<i>Melia Azadirachta</i> ; Linn. "Neem or Margosa." (Meliaceæ.) India. Seeds; the bark is used as an anthelmintic.
18,929	<i>Schleichera trijuga</i> ; Willd. (Sapindaceæ.) Thama, Bombay. Seeds.
18,930	<i>Plantago Ispaghula</i> ; Roxb. "Spogel." (Plantaginaceæ.) Bengal. Seeds; used for making a demulcent drink.
18,931	<i>Corypha umbraculifera</i> ; Linn. "Fan Palm." (Palmæ.) Ceylon. Seeds.
18,932	<i>Macuna</i> sp. (Leguminosæ.) British Guiana. Seeds.
18,933	<i>Psoralea corylifolia</i> ; Linn. "Bakche." (Leguminosæ.) Nepal. Seeds.
18,934	<i>Butea frondosa</i> ; Roxb. "Pulas." (Leguminosæ.) Chota, Nagpore. Seeds.
18,935	<i>Crotalaria juncea</i> ; Linn. (Leguminosæ.) Thama, Bombay. Seeds.
18,936	<i>Crotalaria juncea</i> ; Linn. (Leguminosæ.) Cawnpore. Seeds.
18,937	<i>Cæsalpinia</i> sp.; "Kubi Rasche." (Leguminosæ.) Nepal. Seeds.
18,938	<i>Sisymbrium Irio</i> ; Linn. (Cruciferae.) Kurrachi, India. Seeds.
18,939	<i>Strychnos nux-vomica</i> ; Linn. "Nux Vomica." (Loganiaceæ.) Trinidad. Seeds; used for preparing strychnine.
18,826	<i>Matricaria Chamomilla</i> ; Linn. "German Chamomile." (Compositæ.) Cawnpore, India. The flowers.
<i>Miscellaneous.</i>	
18,822	<i>Pinus serotina</i> ; Mich. "Pond Pine." (Coniferae.) North America. Cones.
18,823	<i>Mucuna</i> sp. "Horse-eye Beans." (Leguminosæ.) British Guiana. Used for making into bracelets.
18,824	<i>Tulipa stellata</i> ; Clegh. (Liliaceæ.) Rawulpindi, India.
18,827	<i>Trifolium repens</i> ; Linn. "White or Dutch Clover." (Leguminosæ.) North America. Flowers of.
18,828	<i>Pinus muricata</i> ; D. Don. "Bishop's Pine." (Coniferae.) California. Cones.

APPENDIX VI—continued.

PURCHASES (Books).

Library No.	Title of Book.	Author.
APPLIED ART.		
2,145	The Art of the Saracens in Egypt—Part I. (South Kensington Museum Hand-book.)	Stanley Lane-Poole.
2,148	Musical Instruments, Historic, Rare and Unique	A. J. Hipkins.
2,254	Album of Arts and Industries of Great Britain, 1887 :— Illustrations of Armorial China Portfolios of Chinese Art (1). " Egyptian Art (2). " English Art (1). " Flemish Art (1). " German Art (1). " Italian Art (5). " Persian Art (4). " Saracenic Art (2). " Sicilian Art (2). " Spanish Art (2).	
APPLIED SCIENCE.		
2,089	Treatise on Coal-gas. Vols I, II, III	King.
3,112	Woollen and Worsted Cloth Manufacture	R. Beaumont.
2,130	Text-book of Paper-making	Cross and Bevan.
2,242	Soaps and Candles	Cameron.
2,244	Animal and Vegetable Fats and Oils	Brannt.
2,063	Report on the Manufacture of Paper from the Paper-Mulberry in Japan. (Re-bound.)	
CHEMISTRY.		
2,001	Qualitative Chemical Analysis	W. G. Valentin.
2,003	Quantative "	J. E. Thorpe.
2,004	Qualitative "	Thorpe and Muir.
2,079	Chemistry of Foods—Part 2. (Science Hand-book, South Kensington.)	Bell.
2,113	Hand-book of Chemical Technology... ..	R. Wagner (translated by W. Crookes).
2,128	Plant Analysis	Dragendorff (translated by Greenish).
2,131	Manual of Chemical Analysis... ..	Hoffmann and Power.
2,132	Manual of Analytical Chemistry	J. Muter.
2,141	Treatise on Chemistry—Vol. III.—The Chemistry of Hydrocarbons, and their Derivatives; or, Organic Chemistry.	Roscoc and Ichorleminer.
2,237	Physical and Inorganic Chemistry	Watts.
EDUCATION.		
2,241	Ellis's Irish Educational Directory. 1888	Ellis.
2,032	Report of the Royal Commission on Technical Instruction. 2nd Report. Evidence, &c, re Ireland.	
GEOLOGY, MINERALOGY, AND METALLURGY.		
2,043	Der Jura in den Alpen der Ost-Schweiz. (Re-bound)	Moesch.
2,064	Der Südliche Aargauer-Jura. (Re-bound)	"
2,217	Modern American Methods of Smelting Copper	Peters.
2,220	British Petrology	Teall.
2,232	Practical Mineralogy	Overmann.
2,233	Manual of Geology—Vol. I and II	Phillips.
2,234	Treatise on Ore Deposits	Phillips.
2,235	Metalliferous Mines and Minerals	Davies.
2,236	Treatise on Metallurgy	Overmann.
2,264	Lectures on Mining. (Text)	Callon.
2,265	" " (Atlas)	"
2,266	Mining Machinery; a descriptive treatise on	André.
2,267	Practical Treatise on Coal-mining	André.
2,283	Minerals of New South Wales	Liversidge.
2,095	Hand-book of the New Zealand Mines. (Including notes on forest trees, building materials, &c.)	Official.
ECONOMIC ZOOLOGY.		
2,002	Pearls and Pearling Life	E. W. Streeter.
2,099	Studies in Biology for New Zealand Students. (Part III—Anatomy of the Common Mussel.— <i>Mutilus spp.</i>)	A. Purdie.
2,105	Fishes of New Zealand, and Notes on Edible Fishes	F. W. Hutton.
2,106	Hand-book of the Fishes of New Zealand	R. A. A. Sherrin.

APPENDIX VI—*continued*.
PURCHASES (BOOKS).

Library No.	Title of Book.
The following purchased periodicals have been bound during the year:—	
2,014	Drugs and Medicines of North America. (Lloyd.) Vol. I.
2,015	Australian Journal of Pharmacy. Vol. I.
2,027 } 2,205 }	Tropical Agriculturist. 1885-7.
2,028 } 2,163 }	Canadian Magazine of Science. 1885-6.
2,050 } 2,111 }	Therapeutic Gazette. 1886. 1885.
2,073 } 2,204 }	Révue Coloniale Internationale. 1885-7.
2,076 } 2,192 }	Scientific American. Jan., 1886—Dec., 1887.
2,271 } 2,077 }	Pharmaceutical Journal. Jan. 1883—June, 1887.
2,200 } 2,093 }	Australian Journal of Pharmacy. Vol. I.
2,184 } 2,270 }	The Chemist and Druggist. 1870, 1872-6, 1879, 1880-7.

APPENDIX VII.
DONATIONS (BOOKS AND PERIODICALS).

Library No.	Title, Author, and Donor.
2,036 } 2,215 } 2,216 }	"Eucalyptographia." (Mueller.) The Chief Secretary of Victoria, through the Free Library, Melbourne.
2,094	The Forest Flora of Australia. Part VII. (Brown.) The Government Printer of South Australia.
2,173 } to } 2,176 }	Iconography of Australian species of Acacia and cognate genera. Decades 5-11. (Mueller.) The Chief Secretary of Victoria.
AGRICULTURE AND BOTANY.	
2,150	Imperial College of Agriculture and Dendrology. Komaba, Tokyo, Japan. Bulletin. No. 1. (C. C. Georgeson.) The Director.
2,151	Chief Regulations of the above. (Dec., 1887.) The Director.
2,258	Plants reputed poisonous and injurious to Stock. (Gordon and Bailey.) The Government Botanist of Queensland.
2,070	Illustrations of the Genus Cinchona (rebound). Lambert. 1821.
APPLIED ART.	
2,287	Art Manufactures of India. (Mukharji.) The Government of India.
EDUCATION.	
2,121	Phases of Technical Training. (T. Twining.) The Author.
	Circulars of Information, Bureau of Education, Washington. The Commissioner.—
2,177	No. 1. College of William and Mary.
2,178	No. 2. Study of History in the American Colleges and Universities. (Adams.)
2,179	No. 3. Proceedings of the Department of Superintendence. March, 15th-17th, 1888. Washington.
2,260	The Educational Record. (July, 1888.) British and Foreign Bible Society.
GEOLOGY AND MINERALOGY.	
2,257	Geology of the Vegetable Creek Tin-mining Field, New England (David). The Minister for Mines, Sydney.
2,295	The Mineral Wealth of Queensland; by R. L. Jack, Government Geologist. The Executive Commissioner for Queensland, C.T.E.M.
2,303	Memoirs of the Geological Survey of New South Wales. Palæontology, No. 2. "Contributions to the Tertiary Flora of Australia." Von Ettingshausen (trans. by Etheridge). The Minister for Mines, Sydney.
MECHANICS, ENGINEERING, &C.	
2,067	Magazin Mathematischer Instrumente. Parts II-VI (rebound). F. W. Breithaupt and Son, Cassel.
2,110	Designing Wrought and Cast Iron Structures. Part IV. (Adams.) The Author.
2,183	A paper on the removal of the roof over the "Departure" Platform, King's Cross Terminus, G.N.R., London. Messrs. Trübner & Co.

APPENDIX VII—*continued*.
DONATIONS—(BOOKS AND PERIODICALS).

Library No.	Title, Author, and Donor.
2,284	The Proposed Chemical Laboratory at Sydney University (Liversidge). (Drawings reproduced from "The Building and Engineering Journal," Sydney.) A. Liversidge, M.A., F.R.S., the University, Sydney.
ZOOLOGY.	
2,126	History and Description of the Skeleton of a Sperm Whale, lately set up in the Australian Museum. (Wall.) Reprint of a paper published in 1851. The Trustees.
2,292	Anatomy of "Megascolides Australis," the great earth-worm of Gippsland. (Spencer.) From the Transactions of the Royal Society of Victoria. Vol. I, Part I, 1888. The Council.
2,231	Catalogue of Fishes in the Australian Museum, Sydney, (Ogilby.) Part I. The Trustees.
MISCELLANEOUS.	
2,222	Handbook of Information. (British-India Steam Navigation Co.) Messrs. Burns, Philp, & Co., Sydney.
2,092	By-laws of the Australian Museum, Sydney. The Trustees.
PROCEEDINGS, &C., OF SOCIETIES.	
2,016	Philosophical Society of Glasgow, Proceedings of. Vol. XVIII. The Council.
2,057	American Chemical Society, Proceedings of. Parts 1 and 2 (rebound). The Council.
2,074	Royal Society of N.S.W., Journal and Proceedings of. Vol. XVII (rebound). The Council.
2,115	Royal Society of N.S.W., Journal and Proceedings of. Part 2, 1887. The Council.
	Royal Society of N.S.W., Journal and Proceedings of. Part 3, 1887. The Council.
2,137	Royal Scottish Society of Arts, Transactions of. Vol. XII, Part 1. The Council.
2,120	} Journal of the Society of Chemical Industry, 1888, vol. Index of 1887, vol. By-laws. The Council.
2,138	
2,180	
2,136	Calendar of the Pharmaceutical Society of Great Britain, 1888. The Council.
2,181	Calendar of the Pharmaceutical Society of Ireland, 1888. The Council.
2,154	Linnean Society of New South Wales, Proceedings of. Second series. Vol I, 1886. The Council.
2,155	Linnean Society of New South Wales, Proceedings of. Second series. Vol. II, 1887. The Council.
2,230	Royal Society of Tasmania, 1887, Papers and Proceedings of. The Council.
2,256	Royal Society of New South Wales, 1888. Part 1. The Council.
2,262-3	Physikalisch-medizinischen Societat, Erlangen, 1887-8, Sitzungsberichte der. The President.
2,277	Royal Society of Victoria, Transactions and Proceedings of. Vol. XXIV, part 2. The Council.
REPORTS.	
The following have been presented by the Minister for Mines, Sydney, New South Wales:—	
2,065	Annual Reports of the Department of Mines of New South Wales. 1881-4 (rebound).
2,029, 2,291	Annual Reports of the Department of Mines of New South Wales. 1875-9, 1880, '82, '85, '86.
2,034	The Silver-bearing Lodes of the Barrier Ranges. Report by the Geological Surveyor in charge.
The following have been presented by the Secretary for Mines and Water Supply, Melbourne:—	
2,042	Gold-fields of Victoria. Reports of Mining Registrars. 1884-6 (rebound).
2,119, 2,159, 2,253	Gold-fields of Victoria. Reports of the Mining Registrars for the Quarters ending 31st December, 1887, up to June, 1888.
2,066	Reports of the Registrars and Mining Surveyors of Victoria. 1877-84 (rebound).
2,044, 2,060	Mineral Statistics of Victoria. 1877-85 (rebound).
2,300	Victoria, Mineral Statistics of. 1887.
2,259	Victoria, Department for Mines and Water Supply. Annual Report of the Minister for. 1888.
2,000	Geological Survey of Victoria. Report of Progress. 1873-7 and 1883 (rebound).
2,059	Diamond Drills in Victoria. 1884-6 (rebound).
2,061	Report of the Chief Inspector of Mines for Victoria. 1877-83 (rebound).
2,033	Victorian Board appointed to inquire on Pyrites; Report of.
2,062	Reports of the Government Geologist of South Australia. 1883-6 (rebound). From the Government Geologist.
2,276	Queensland Department for Mines; Annual Report of. 1887. From the Executive Commissioner for Queensland, Melbourne Exhibition.
2,118	Report of the School of Mines, Ballarat. 1887. From the Council.
2,157	California State Mining Bureau. 7th Annual Report of the State Mineralogist, for year ending 1st October, 1887. From the State Mineralogist, Sacramento.
2,182	Botanic Gardens, Adelaide; Report on the Progress and Condition of. Year 1887. From the Director, Botanic Gardens, Adelaide.
2,140	Department of Education, Washington. Report of the Commissioner for Education 1885-6.
2,206	Technological Museum, Sydney. Annual Reports, 1880-6. (Rebound.)
2,281	Queensland Museum. Annual Report of the Trustees for 1888. From the Trustees.
2,282	Technical and Art Instruction and Drawing in Primary Schools in Australasian Colonies. Report on. (Riley.) New Zealand, 1888. Official. From the Author.
2,090	Massachusetts Institute of Technology. 23rd Annual Catalogue. From the Institute.

APPENDIX VII—*continued*.
DONATIONS (BOOKS AND PERIODICALS).

Library No.	Title, Author, and Donor.
2,158	United States, Worcester, Mass. 18th Annual Catalogue of the Polytechnic Institute, with the plan of Instruction, 1888. From the Council.
2,091	Birkbeck Literary and Scientific Institution, London. Syllabus of Classes and Examinations 1887-8, and Report of the 64th Session. From the Council.
2,139	Royal Colonial Institute. Report of the Council. From the Council.
2,261	British and Foreign School Society. 83rd Annual Report of. From the Council.

Exhibition Literature.

2,088	Centennial Intercolonial Exhibition of the Agricultural Society of New South Wales, 1888. Official Catalogue. From the Society.
2,117	Adelaide Jubilee Exhibition, 1887. Catalogue of the New South Wales Wool Exhibits.

Centennial International Exhibition, Melbourne, 1883 :—

2,272	Queensland Court. Catalogue of Grasses.
2,273	" " " Economic Plants.
2,274	" " " Minerals.
2,275	" " " Woods. From the Executive Commissioner for Queensland.
2,279	French Court. " Catalogue Officiel.
2,280	" " " Détaillé. From the Executive Commissioner for France.
2,288	New South Wales Court. Catalogue of the Metals, Minerals, Fossils, and Timbers sent by the Minister for Mines. From the Minister for Mines, New South Wales.
2,289	List of Commissioners, Rules and Regulations of the Exhibition. From the Commission, Melbourne.
2,294	Official Catalogue of Exhibits of New South Wales Court. From the Executive Commissioner.

PERIODICALS.

The Publishers of the following Journals have generously continued to contribute copies of their publications to the Reading-room of the Museum during the year, viz. :—

Amateur Photographer (London).	Hatters' Gazette (London).
American Mail and Export Journal (New York).	Horological Journal (London).
American Monthly Microscopical Journal (New York).	Ironmonger (London).
Bookseller (London).	Ironmonger (Supplement).
Boot and Shoe Trades Journal (London).	Iron (London).
Brewers' Guardian (London).	Iron and Steel Trade Journal.
British and Colonial Printer and Stationer (London).	Jeweller and Metal-worker (London).
British Trade Journal (London).	Manufacturer and Builder (New York).
Builders' Weekly Reporter (London).	Mechanical News (New York).
Bullettino Telegraphico (Rome).	Mechanical Progress.
Burgoyne's List.	Oil and Colourman's Journal (London).
Cabinet-maker (London).	Paper-maker's Journal, and Annual Directory of Paper-makers (London).
California Architect (San Francisco).	Paper-making.
Chamber of Commerce Journal.	Paper Trade Review (London).
Colliery Guardian (London).	Pharmaceutical Journal.
Decorators' Gazette (London).	Plumber and Decorator.
Electrical Review.	Printer's Register (London).
Engineering (London).	Sanitary Record (London).
Exporter (London).	Sugar Cane (Manchester).
Fireman (London).	Stationery Trades Journal (London).
Gas and Water Review (London).	Textile Recorder (Manchester).
	Timber Trades Journal (London).
	Worsted and Woollen Trades Journal.

The Publishers of the following have been good enough to occasionally forward copies of their journals to the Museum :—

American Gas-light Journal.	Mineralogical Magazine.
Australian Chemists Review.	Mining World and Engineering Record.
Australian Trading World.	Paper and Printing Trades Journal.
British Mail.	Paper Record.
Decoration.	Phillips Machinery Register.
Electrical Engineer.	Practical Electricity.
	Stationer and Printer.

APPENDIX VII—*continued.*

The following Periodicals (donations) have been bound during the year:—

Library No.	Title.	Library No.	Title.
2,011 } 2,219 }	British and Colonial Printer and Stationer. July to December, 1885; January to June, 1887.	2,049 } 2,051 } 2,194 }	Oil and Colourman's Journal. 1883-1886. Ironmonger. 1886-7.
2,012	The Printers' Register. 1886.	2,052	Jeweller and Metal-worker. 1886.
2,013 } 2,198 }	The Pottery Gazette. 1885-6.	2,053 } 2,054 }	Paper-makers' Monthly Journal. 1886. American Microscopical Journal. 1886.
2,020 } 2,190 }	London Iron Trades Exchange. 1886-7.	2,055 } 2,056 }	Chemical Review. 1886. Horological Journal. 1885-6.
2,021 } 2,187 }	Engineering. January-June, 1886.	2,068 } 2,069 }	Sanitary Record. 1885-6. British and Colonial Printer and Stationer. 1886.
2,187	" January to June, 1887.	2,071 }	Colliery Guardian. 1886-7.
2,022	Textile Recorder. Vol. III. 1885-6.	2,191 }	Sugar Cane. 1885-86.
2,023 } 2,199 }	Amateur Photographer. 1886-7.	2,072 } 2,075 }	Decorators' Gazette. April, 1883, to December, 1886.
2,024 } 2,186 }	Boot and Shoe Trades Journal. 1885-6. Boot and Shoe Trades Journal. January to June, 1887.	2,134 } 2,135 }	Iron Age. 1886. Paper Trades Journal. 1886.
2,025	Telegraphic Journal. 1886.	2,164-5 } 2,166-9 }	American Mail. 1883-1886. British Trades Journal. 1876; 1884-5-6.
2,185	Telegraphic Journal. January to June, 1887.	2,193 }	Mechanical News. 1885-6.
2,026 } 2,188 }	Cabinet-maker and Art Furnisher. 1884-7.	2,245 }	Sanitary World. 1887; January to June.
2,037 } 2,189 }	Iron. Vols. XXVII, XXVIII, XXIX.	2,196 } 2,197 }	Gas and Water Review. 1887; January to June.
2,038 } 2,195 }	Mechanical World. Vol. XXI.	2,201	Paper Trade Review. March, 1886, to June, 1887.
2,039	Timber Trades Journal. 1886-7.	2,202	Paper-making. 1886.
2,040	Engineering. Vol. XLII. July to De- cember.	2,203	Journal of Forestry.
2,041	Telegraphic Journal. Vol. XVIII. January to June.	2,218	Sanitary Record. 1886-7. Rebound.
2,045	Cabinet-maker and Art Furnisher. 1883.	2,238-40	Index Medicus. 1885-7.
2,047	Gas and Water Review. Vols. XV and XVI.	2,268	Californian Architect and Building News. 1886.
2,048	Boot and Shoe Trades Journal. Vols. XV and XVII.		

APPENDIX VIII.

PURCHASES (DIAGRAMS, MAPS, &c.)

January 31.

Library No. 1,262 "The Physiology" and Anatomy of the Honey Bee and its relations to flowering plants. Two coloured prints 39 in. x 26 in. with explanatory Handbook, by Frank Cheshire.

February 23.

1,263-72 Ten large Wall Maps (in revolving frame), as follows:—
 1. Europe. 6. Canada.
 2. England. 7. Egypt.
 3. Scotland. 8. South Africa.
 4. Ireland. 9. United States.
 5. India. 10. Pacific Ocean.

From Messrs. W. and A. K. Johnston, Edinburgh.

The following Engineering, &c., diagrams have been executed in enlarged scale, in water-colours, by Mr. A. Hagman. The source of the original is stated in each case.

Types of Coke-ovens.

February 23.

a. Full recovery of Bye-products.

1,273 Klönne's.
1,274 Carvès and Hauptart's. } These are drawn on a scale of 4 ft. to 1 in. "Engineering," Vol.
1,275 Adapted Coppée. } XXXVIII, pages 361 and 402.

b. Non-recovery of Bye-products.

1,276 Appolt's. } These are drawn to a scale of 3 ft. to 1 in. "Engineering," Vol. XXXVIII,
1,277 Jones'. } page 337.

Oream Separators.

February 23.

1,278 De Laval's. (The motor being a steam turbine.) Scale: full size. "Engineering," Vol. XLIV,
page 520.

APPENDIX VIII—*continued.*

February 28.

Library No.

1,279 Burmeister and Wain's. Scale: full size. "Engineering," Vol. XLIV, page 476.

July 3.

1,336 Crushing Battery for auriferous vein-stuff. Showing also Californian Mortar with double discharge. Scale: half ft. to 1 in. "Gold, its occurrence and extraction" (Lock), page 1001.

July 10.

1,336 Fisher's rotating-bed stamp for auriferous vein-stuff. Scale: 1 ft. to 1½ in. "Gold, its occurrence and extraction" (Lock), page 1022.

Automatic vacuum brake applied to a locomotive.

July 3.

1,335a Side elevation and plan. Scale: 1 ft. to 1 in.

April 3.

1,299b Combination ejector. Scale: full size.

1,301c Engine vacuum cylinder. Scale: full size.

1,300d Ball valve. Scale: 3 ft. to 1 in. (enlarged).

Westinghouse automatic brake applied to a locomotive.

June 26.

1,333a Side elevation and inverted plan. Scale: 1 ft. to 1 in.

1,334b Driver's brake-valve, in section and elevation. Scale: 2 ft. to 1 in. (enlarged).

April 17.

1,303c Standard air-pump, shown in section. Scale: full size.

1,304d Section of Triple Valve. Scale: 3 ft. to 1 in. (enlarged).

1,305e Double-brake cylinder. Scale: half-size.

1,305f Release valve. Scale: half-size.

March 20.

1,291 Colorado Water-jacket Furnace, with shed for smelting silver and lead. Scale: 2 ft. to 1 in. "Engineering," Vol. XLII, page 267.

March 27.

1,294 Colorado Silver and Lead Smelting Plant. Scale: 10 ft. to 1 in. "Engineering," Vol. XLII, page 267.

Safety Lamps.

March 20.

1,293 Marsaut's. "Engineering," Vol. XLII, page 296.

March 27.

1,296 Evan Thomas's. "Engineering," Vol. XLII, page 296.

March 20.

1,292 Gray's. "Engineering," Vol. XLII, page 296.

March 27.

1,295 Mueseler's. "Engineering," Vol. XLII, page 296.

February 28.

1,280 "Conductor," for Tanneries, used for carrying the tanning materials to and from the exhausting pits. "Text-book of Tanning" (H. R. Procter), page 163.

1,281 Hides for Sole Leather. Diagram showing English method of division (Procter).

Bark Mills (for Tanners).

March 7.

1,287 American "Keystone." H. R. Procter, page 159.

1,286 Newall and Barker's. H. R. Procter, page 159.

1,288 Glaser's. H. R. Procter, page 160.

March 13.

1,289 Wilson's Disintegrator, for Wattle-barks and Myrobalans. H. R. Procter, page 161.

1,290 Tanners' Disintegrator, for Myrobalans. H. R. Procter, page 162.

The following enlarged water-colour drawings of economic plants of New South Wales have been drawn from fresh specimens by Mr. A. Hagman. The scale is stated on the drawings themselves, and is usually 3 : 1.

1,356 *Acacia armata*; R. Br. "Kangaroo Thorn." (Leguminosæ.) Hedge Plant.

June 12.

1,315 *Acacia Cunninghami*; Hook. (Leguminosæ.) Timber.

September 18.

1,353 *Acacia elongata*; Sieb. (Leguminosæ.) Tan.

APPENDIX VIII—*continued.*

June 12.

Library No.

- 1,316 *Acacia falcata*; Willd. "Sally." (Leguminosæ.) Timber (small), Tan.
October 9.
- 1,357 *Acacia glaucescens*; Willd. A. "Myall." (Leguminosæ.) Timber, Tan.
June 12.
- 1,317 *Acacia implexa*; Benth. (Leguminosæ.) Bitter Bark.
August 7.
- 1,342 *Acacia longifolia*; Willd. "Golden Wattle." (Leguminosæ.) Tan.
June 19.
- 1,327 *Acacia melanoxylon*; R. Br. "Blackwood." (Leguminosæ.) Timber, Tan.
September 11.
- 1,351 *Acacia prominens*; A. Cunn. (Leguminosæ.) Timber, Tan.
January 17.
- 1,249 *Angophora cordifolia*; Cav. "Apple-tree." (Myrtaceæ.) Timber (small).
January 3.
- 1,243 *Angophora intermedia*; DC. "Narrow-leaved Apple-tree." (Myrtaceæ.) Forage, Kino,
Timber.
January 31.
- 1,258 *Angophora subvelutina*; F. v. M. "Apple-tree." (Myrtaceæ.) Forage, Kino, Timber.
April 3.
- 1,297 *Avicennia officinalis*; Linn. "Mangrove." (Verbenaceæ.) Timber.
January 17.
- 1,248 *Barklya syringifolia*; F. v. M. (Leguminosæ.) Timber.
November 27.
- 1,379 *Brachychiton populneum*; R. Br. "Kurrajong." (Sterculiaceæ.) Fibre.
August 28.
- 1,348 *Bursaria spinosa*; Cav. "Box Thorn." (Pittosporææ.) Timber, Forage.
June 5.
- 1,311 *Callistemon lanceolatus*; DC. "Red Bottle Brush." (Myrtaceæ.) Timber.
February 7.
- 1,259 *Canthium vacciniifolium*; Benth. (Rubiaceæ.) Timber.
January 24.
- 1,253 *Capparius nobilis*; F. v. M. "Native Pomegranate." (Capparideæ.) Food.
October 30.
- 1,366 *Carumbium populifolium*; Gr. "Poplar." (Euphorbiaceæ.) Fibre.
January 10.
- 1,244 *Castanosporum australe*; A. Cunn. "Moreton Bay Chestnut." (Leguminosæ.) Food, Forage,
Timber.
June 5.
- 314 *Casuarina torulosa*; Ait. "Forest Oak." (Casuarineæ.) Timber.
November 20.
- 1,374 *Cedrela australis* (Syn. *C. Toona*, Roxb.); F. v. M. "Red Cedar." (Meliaceæ.) Timber.
January 3.
- 1,241 *Ceratopetalum gummiferum*; Sm. "Christmas Bush." (Saxifrageæ.) Gum, Timber,
Ornament.
November 20.
- 1,373 *Claoxylon australe*; Baill. (Euphorbiaceæ.) Timber.
June 19.
- 1,328 *Commersonia echinata*; Forst. "Brown Kurrajong." (Sterculiaceæ.) Fibre.
December 4.
- 1,380 *Croton Verreauxii*; Baill. A "Cascarilla." (Euphorbiaceæ.) Drug.
October 16.
- 1,361 *Cryptocarya glaucescens*; R. Br. "Beech." (Lauraceæ.) Timber.
December 11.
- 1 384 *Cudrania Javanensis*; Trécul. "Cockspur Thorn." (Urticeæ.) Dye.

APPENDIX VIII—*continued.*

October 30.

Library No.

- 1,368 *Cupania semiglauca*; F. v. M. "Black Ash." (Sapindaceæ.) Timber.
June 12.
- 1,318 *Cupania pseudorhus*; A. Rich. (Sapindaceæ.) Timber.
August 7.
- 1,340 *Denhamia pittosporoides*; F. v. M. (Celastrineæ.) Timber.
June 5.
- 1,313 *Duboisia myoporoides*; R. Br. "Corkwood." (Solanaceæ.) Drug.
December 4.
- 1,381 *Ehretia acuminata*; R. Br. "Brown Cedar." (Asperifoliæ.) Timber.
November 6.
- 1,371 *Eleodendron australe*; Vent. (Celastrineæ.) Ornamental Shrub.
August 7.
- 1,345 *Endiandra pubens*; Meiss. (Lauraceæ.) Timber.
1,358 *Eucalyptus eximia*; Schau. "Mountain Bloodwood." (Myrtaceæ.) Timber.
January 24.
- 1,255 *Eucalyptus Gunnii*; J. Hook. "Swamp Gum." (Myrtaceæ.) Timber.
January 31.
- 1,257 *Eucalyptus hemiphloia*; F. v. M. "Box." (Myrtaceæ.) Timber, Kino.
February 7.
- 1,261 *Eucalyptus incrassata*; Labill. "Mallee." (Myrtaceæ.) Timber, Essential oil.
January 17.
- 1,251 *Eucalyptus longifolia*; Link. "Woollybutt." (Myrtaceæ.) Timber.
February 7.
- 1,260 *Eucalyptus melanophloia*; F. v. M. "Silver-leaved Ironbark." (Myrtaceæ.) Timber.
September 11.
- 1,352 *Eucalyptus paniculata*; Sm. "She Ironbark." (Myrtaceæ.) Timber.
July 10.
- 1,338 *Eucalyptus robusta*; Sm. "Swamp Mahogany." (Myrtaceæ.) Timber.
January 10.
- 1,245 *Eucalyptus rostrata*; Schlect. "Red Gum." (Myrtaceæ.) Timber, Kino.
August 28.
- 1,349 *Eucalyptus saligna*; Sm. "Blue Gum." (Myrtaceæ.) Timber.
November 20.
- 1,376 *Eucalyptus sideroxylon*; A. Cunn. "Ironbark." (Myrtaceæ.) Timber.
August 7.
- 1,343 *Eucalyptus Stuartiana*; F. v. M. "Apple-tree." (Myrtaceæ.) Timber.
January 10.
- 1,246 *Eucalyptus tereticornis*; Sm. "Grey or Flooded Gum." (Myrtaceæ.) Timber, Kino.
November 20.
- 1,377 *Eucalyptus* sp. Not yet determined. (Myrtaceæ.) Timber.
June 12.
- 1,320 *Exocarpus cupressiformis*; Labill. "Native Cherry." (Santalaceæ.) Timber.
1,321 *Ficus aspera*; Forst. "Rough-leaved Fig." (Urticeæ.) Timber (poor).
January 31.
- 1,256 *Flindersia Oxleyana*; F. v. M. "Yellow-wood." (Meliaceæ.) Timber.
January 3.
- 1,242 *Frenela rhomboidea*; Endl. "Cypress Pine." (Coniferæ.) Timber.
1,240 *Grevillea Hilliana*; F. v. M. "White Yiel-yiel." (Proteaceæ.) Timber.
October 23.
- 1,364 *Grevillia robusta*; Cunn. "Silky Oak." (Proteaceæ.) Timber.
September 25.
- 1,355 *Hakea saligna*; R. Br. (Proteaceæ.) Timber.

APPENDIX VIII—*continued.*

June 12.

Library No.

- 1,322 *Harpullia alata*; F. v. M. A "Tulip-wood." (Sapindaceæ.) Timber.
October 30.
- 1,367 *Hedycarya angustifolia*; Cunn. "Native Mulberry." (Monimiaceæ.) Timber.
June 19.
- 1,330 *Helicia glabrifolia*; F. v. M. (Proteaceæ.) Food.
November 27.
- 1,378 *Hibiscus heterophyllus*; Vent. "Green Kurrajong." (Malvaceæ.) Fibre.
June 19.
- 1,329 *Laportea gigas*; Wedd. "Giant Nettle-tree." (Urticæ.) Fibre.
August 7.
- 1,344 *Laportea photiniphylla*; Wedd. "Small-leaved Nettle-tree." (Urticæ.) Fibre.
September 18.
- 1,354 *Leptomeria acida*; R. Br. "Native Currant." (Santalaceæ.) Food.
June 12.
- 1,323 *Litsea dealbata*; Nees. "Pigeon-berry-tree." (Lauraceæ.) Timber.
August 28.
- 1,347 *Logania floribunda*; R. Br. (Loganiaceæ.) Timber (small).
December 31.
- 1,388 *Lomatia longifolia*; R. Br. "Mountain Beech." (Proteaceæ.) Timber.
June 12.
- 1,324 *Mallotus philippensis*; Muell., Arg. The "Kamala" of India. (Euphorbiaceæ.) Dye; drug.
November 20.
- 1,375 *Melaleuca linariifolia*; Smith. "Tea-tree." (Myrtaceæ.) Timber.
June 12.
- 1,325 *Memecylon* sp. (Melastomaceæ.) Timber.
August 28.
- 1,346 *Monotoca elliptica*; R. Br. "Beech." (Epacrideæ.) Timber.
December 11.
- 1,382 *Myrsine variabilis*; R. Br. (Myrsineæ.) Timber.
June 12.
- 1,326 *Notelæa longifolia*; Vent. "Axe-breaker." (Jasmineæ.) Timber.
October 16.
- 1,360 *Olearia argophylla*; F. v. M. "Musk-tree." (Compositæ.) Timber; perfume.
April 3.
- 1,298 *Panax elegans*; C. Moore and F. v. M. "White Sycamore." (Araliaceæ.) Timber.
December 31.
- 1,387 *Panax sambucifolius*; Sieb. "Elderberry Ash." (Araliaceæ.) Timber.
December 18.
- 1,386 *Pennantia Cunninghamii*; Miers. (Olacineæ.) Timber.
December 31.
- 1,389 *Persoonia linearis*; Andr. A "Geebung." (Proteaceæ.) Timber.
January 17.
- 1,250 *Persoonia pinifolia*; Sieb. A "Geebung." (Proteaceæ.) Timber.
June 5.
- 1,307 *Physalis Peruviana*; Linn. "Cape Gooseberry." (Solaneæ.) Food. Introduced
October 30.
- 1,369 *Pimelia ligustrina*; Labill. (Thymeleæ.) Fibre.
November 6.
- 1,372 *Polyosma Cunninghamii*; J. J. Benn. "Feather-wood." (Saxifrageæ.) Timber.
December 11.
- 1,383 *Prostanthera lasiantha*; Labill. (Labiatae.) Oil; essential.

- 1,254 *Trochocarpa laurina*; R. Br. "Beech." (Epacrideæ.) Timber.
June 26.
- 1,332 *Xylomelum pyriforme*; Sm. "Native Pear." (Proteaceæ.) Timber.

APPENDIX IX.

DONATIONS.

MAPS, DRAWINGS, DIAGRAMS, &c.

January 17.

- 1,252 Framed Photograph of the Incline, Joadja Creek, New South Wales (Kerosene Shale Mine).
From the Government Printer.

March 3.

Plans of the Earning Yacht "Nonsuch" —

- 1,282 Profile.
- 1,283 Plans (a) Upper Deck.
" (b) Lower Deck.
- 1,284 Cross-sections (2).
- 1,285 Drawings (2) to show rig.
Presented by Mr. Thos. Smith, Sydney.

April 21.

- 1,306 Photograph of Engine by Messrs. Boulton and Watt, Soho, Birmingham; erected in 1785 for Messrs. Whitbread & Co., London, who presented the engine to the Museum. From Messrs. Whitbread & Co.

August 28.

- 1,350 Zoological Chart and Chart of Vegetable Kingdom; also Table of Plants and Animals referred to in the "British Pharmacopœia." Presented by Dr. Ussher, Ballarat.

APPENDIX X.

EXCHANGES (OUTWARDS).

Date.	Description of Specimens.	To whom sent.
1888.		
21 Feb.	136 samples of Australian Wools, as follows :— 65 from Queensland 32 „ Tasmania 23 „ New South Wales 16 „ Victoria	The Smithsonian Institute, Washington, through G. W. Griffin, Esq, Consul in Sydney for the United States.
8 March	44 samples of Wool, as follows :— 1 of Ercildoune washed wool, from sheep bred by Sir Samuel Wilson 16 of Goorianawa greasy wool, of sheep bred by C. Fetherstonhaugh, Esq. 27 of Gostwyck greasy wool, of sheep bred by Messrs. Dangar Bros., Uralla, New England	The Queensland Museum.
8 May	Emery, from Naxos Diabase-porphry, from Red Hill, The Springs, N.S.W. Plumbago, from Tenterfield, N.S.W. Wavellite, from Montgomery County, Arkansas Quartz (Jasper), from Cambay, India Axinite, from Dauphiny, France Topaz, from Schneckenstein, Saxony Obsidian, from Iceland Ore, from shallow lead, Brickwood Tin-mine, Inverell Calcite, from Iceland Phacolite, from Collingwood, Victoria Paraffin Coal, from Rott, near Bonn, Germany Novaculite, from Hot Springs, N.Z. Sepiolite, from Asia Minor Hacked Chalcedony, from Yellowstone, National Park, U.S.A. Erythrite, from Schneeberg, Saxony Tourmaline, from Suarum, Norway Aluminite, from Newhaven, England Stibnite, from Corangula, Kempsey, N.S.W. Galena (Argentiferous), from Rivertree, Clarence River, N.S.W.	Rev. J. Milne Curran, Bathurst (late of Cobar).

1889.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(REPORT FOR 1888.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31.

REPORT of the Senate of the University for the year ended 31st December, 1888.

1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1888, for the information of His Excellency the Governor and the Executive Council.

2. Out of a total of 139 students who presented themselves for matriculation in March, 88 qualified themselves.

3. The following are the numbers of matriculated students attending lectures in the various faculties during the year:—Faculty of Arts, 182, including 36 evening students; Faculty of Medicine, 56; Faculty of Science, 4; Department of Engineering, 8; total, 250.

4. The following Degrees were conferred, after examination:—

Master of Arts (M.A.):—Cornelius Delohery, Edward James Loxton, John Meillon.

Bachelor of Arts (B.A.):—Thomas Kingsmill Abbott, Ettie Artlett, Arnold George Henry Bode, Herbert Edward Britten, Norman Vyner Fletcher, Carleton Brennand Fidler, Robert Randolph Garran, Harold W. G. Hunt, Augustus George F. James, George Chatfield King, Gustav Hugo Leibius, Randal Charles William M'Donnell, Duncan Allan M'Intyre, Frederick Allan Morgan, John Arthur O'Keefe, William Clowes Pritchard, Alfred Edward Sendall, Albert John Studdy, William Alexander Walker.

Bachelor of Medicine (M.B.) and Master of Surgery (Ch.M.):—William George Armstrong, B.A., Peter Bancroft, Leslie Gordon Davidson, Arthur G. Henry, Alfred Edward Perkins, M.A., David Dunlop Rutledge, M.A.

Bachelor of Science (B.Sc.):—Archibald William Fletcher, B.A., Fanny Elizabeth Hunt.

Bachelor of Engineering (B.E.):—Henry Harvey Dare, Norman Fitz, James Vicars.

5. The following graduates of other Universities were admitted *ad eundem gradum* in accordance with the provisions of the "Ad Eundem Degrees Act," 44 Victoria No. 22:—

Master of Arts (M.A.):—Andrew Gardiner, M.A., Edinburgh; Richard Philp, M.A., Dublin.

Doctor of Medicine (M.D.):—Alexander MacCormick, M.D., Edinburgh; Ralph Worrall, M.D., Queen's University, Ireland.

Bachelor of Medicine (M.B.):—Frank Antill Pockley, M.B., Edinburgh; Robert Scot-Skirving, M.B., Edinburgh.

6. The total number of degrees conferred during the year was thus forty-five, divided as follows:—M.A., 5; B.A., 19; M.D., 2; M.B., 8; M.Ch., 6; B.Sc., 2; B.E., 3.

7. The following are the honours conferred at the Degree Examinations:—

Faculty of Arts—B.A. Examination.

Classics—Honours—Class I:—W. A. Walker, gold medal; G. H. Leibius, *prox. acc.* Class

II:—D. A. M'Intyre. Class III:—T. K. Abbott, J. A. O'Keefe.

Latin and French—Honours—Class III:—F. A. Morgan.

Mathematics—Honours—Class I:—Harold W. G. Hunt, gold medal.

Faculty of Medicine—Examinations for M.B. and M.Ch.

First-class Honours:—P. Bancroft, A. E. Perkins, M.A.

Second-class Honours—W. G. Armstrong, B.A., A. G. Henry.

Faculty of Science—B.Sc. Examination.

Geology and Palæontology—Honours—Class I:—A. W. Fletcher, B.A.

Physiology—Honours—Class II:—A. W. Fletcher, B.A.

280—A

Department

[1,253 copies—Approximate Cost of Printing (labour and material), £13 1s. 6d.]

Department of Engineering—B.E. Examination.

First-class Honours :—H. H. Dare, gold medal.

8. The following Scholarships were awarded :—

(a) Matriculation Examination.

Cooper Scholarship No. 2 for Classics—E. M. Stephen.

Barker Scholarship No. 2 for Mathematics—E. M. Stephen.

University Scholarship for General Proficiency—Gained by E. M. Stephen, but awarded to F. W. Doak, E. M. Stephen being the holder of two other Scholarships.

(b) First year Examination in Arts.

Lithgow Scholarship for Classics—F. Lloyd.

George Allen Scholarship for Mathematics—R. P. Sellors.

Levey Scholarship for Chemistry and Physics—Gained by H. Wolstenholme, but awarded to W. T. Dick, H. Wolstenholme being the holder of two other Scholarships.

(c) Second year Examination in Arts.

Barker Scholarship No. 1 for Mathematics—H. Newton.

(d) First Professional Medical Examination.

Renwick Scholarship for General Proficiency—G. H. Abbott.

9. Prize books stamped with the University Arms were awarded to those who obtained first-classes in honours at the yearly examinations.

Faculty of Arts.

First year Examination—Classics :—F. Lloyd, H. R. Curlewis. Latin and French :—R. Dick. Mathematics :—R. P. Sellors.

Second year Examination—Mathematics :—H. Newton.

Faculty of Medicine.

First Professional Medical Examination—Chemistry :—G. H. Abbott. Botany :—G. H. Abbott, C. L. W. Hunt.

Second Professional Medical Examination—Anatomy :—J. W. Hester, A. E. Mills, H. V. C. Hinder, Æ. J. M'Donnell, A. Henry. Physiology :—J. W. Hester, A. Henry. *Materia Medica* :—Æ. J. M'Donnell. Pathology :—J. W. Hester, Æ. J. M'Donnell, Æq.

10. Special Annual Prizes were awarded as follows :—

Smith Prize for Physics at the first year examination—H. Wolstenholme.

Norbert Quirk Prize for Mathematics at the second-year examination—H. Newton.

Dr. Milford's Prize for Surgery—G. H. Abbott.

Professor MacCallum's Prize for English Literature in connection with the University Extension Scheme—H. Y. Braddon.

Dr. Dixon's Prize for *Materia Medica*—C. G. Wilson.

Professor MacCallum's Prizes for English—First year—E. I. Sutherland; second year, R. P. Sellors; third year, M. Meares.

11. The following Bursaries were awarded :—

The Maurice Alexander Bursary.

The John Ewan Frazer Bursary.

The Ernest Manson Frazer Bursary.

The William Charles Wentworth Bursary (one half).

The Hunter Baillie Bursary, No. 2 (one half).

The John Brown Watt Exhibition.

The Walker Bursary, No. 1.

The Walker Bursary, No. 2 (one half).

The Walker Bursary, No. 3 (one half).

The Walker Bursary, No. 4.

The Walker Bursary, No. 5.

Twelve students, in addition to the holders of Bursaries, were permitted to attend lectures without the payment of fees.

12. The following courses of lectures under the University Extension Scheme were delivered during the year :—

Lent Term.—Ancient History: Lecturer, Professor Scott; number of students attending, 61.

Political Economy: Lecturer, Mr. A. C. Wylie; number of students attending, 10.

Bathurst—English Literature: Lecturer, Mr. A. W. Jose; number of students attending, 34.

Parramatta—English History: Lecturer, Rev. H. L. Jackson, M.A.; number of students attending, 28.

Trinity Term.—Political Economy: Lecturer, Mr. A. C. Wylie; number of students attending, 8.

English Literature: Lecturer, Professor MacCullum; number of students attending, 30.

West Maitland—English History: Lecturer, Rev. H. L. Jackson, M.A.; number of students attending, 113.

Michaelmas Term.—Political Economy: Lecturer, Mr. J. H. P. Murray; number of students attending, 3. Modern History: Lecturer, Rev. A. Gilchrist, LL.D.; number of students attending, 20. Logic and Mental Philosophy: Lecturer, Mr. F. Anderson, M.A.; number of students attending, 11.

Bathurst—English Literature: Lecturer, Mr. A. W. Jose; number of students attending, 18.

Newcastle—English History: Lecturer, Mr. W. Crompton, M.A.; number of students attending, 61.

The total number attending the various courses was thus—397.

13.

Mr. Christopher Rolleston had been an active Fellow of the Senate for the past sixteen years, and had always taken a leading part in the management of the financial business of the University.

19. In order to fill the two vacancies thus created a Convocation for the election of two Fellows was held on the 19th of May, and the ballot which was taken on the 26th of May resulted in the election of Mr. Cecil Bedford Stephen, M.A., and Mr. Thomas Butler, B.A.

20. In the month of May leave of absence from the meetings of the Senate for a period of six months was granted to the Hon. Peter Faucett and also to the Most Rev. Bishop Barry, both of whom were leaving the Colony on a visit to Europe. Mr. Faucett was at the same time appointed by the Senate to act as representative of the Sydney University at the festivals to be held in the month of June at the University of Bologna to celebrate the eighth centenary of its existence.

21. In the month of April the triennial elections to the offices of Dean of the Faculty of Arts and Dean of the Faculty of Law were held. They resulted in the appointment of Professor Gurney as Dean of the Faculty of Arts, and the re-election of the Hon. Mr. Justice Windeyer as Dean of the Faculty of Law.

22. During the year the Senate has had under discussion the best mode of utilizing the bequest, amounting to about £30,000, of the late Mr. Thomas Fisher, for the purpose of "establishing and maintaining a library for the use of the University."

In the month of February the Senate determined, on the motion of the Chancellor,—

"That the sum of £20,000 and the accumulations thereof from that time to the time of expenditure should be applied in the erection of a library building at and for the University, such building to be designated 'The Fisher Library'; but that before the expenditure of the amount so dedicated the Government and Parliament should be petitioned to provide a corresponding amount for the erection of buildings annexed to the library, comprising reading-rooms and common rooms for students, residences for the librarian and the registrar, a small museum for the Nicholson antiquities, and additional lecture-rooms, together with a refectory for students and other conveniences."

The disposal of the remainder of the bequest, £10,000, is still under the consideration of the Senate.

23. In the month of February the Chancellor reported to the Senate that an effort was being made by several members of the Senate and other friends to the higher education of women, to procure the establishment of a Women's College, in affiliation to the University, upon the general principles of the Affiliated Colleges Act of 1854, but upon a reduced scale of expenditure, and also without denominational distinctions, and that an open public meeting had been held on the 27th of May, 1887, under the presidency of his Excellency the Governor, Lord Carrington, at which the following resolutions had been unanimously passed:—

1. That this meeting affirms the desirability of establishing a College for Women within the University of Sydney, on the basis of the Colleges' Endowment Act of 1854.
2. That the systematic religious instruction required by that Act shall be subject to the following provisions—
 - (a) No religious catechism or formulary which is distinctive of any particular denomination shall be taught, and no attempt shall be made to attach students to any particular denomination.
 - (b) Any student shall be excused from attendance upon religious instruction, or religious observance, on express declaration that she has conscientious objection thereto.
3. That the governing body be composed of twelve members (of whom not less than four shall be women), to be elected in the first instance by the subscribers, and subsequently in such manner as may be determined, together with two Members of the Senate of the University, to be appointed by the Senate from time to time.
4. That subscriptions be forthwith invited from the public, with a view to raising the necessary sum of £5,000.
5. That a deputation be appointed to wait on the Government, with a view to obtaining the co-operation of the Legislature in the establishment and endowment of a College for Women within the University of Sydney. That the deputation consists of the following gentlemen: The Hon. Sir W. Manning, Dr. MacLaurin, Hon. E. Barton, Hon. Dr. Garrau, Mr. G. H. Reid, Mr. A. B. Weigall, Professors Gurney, MacCallum, and Scott; Mr. J. R. Fairfax, the Revs. Canon Sharp, Principal Kinross, C. J. Prescott, Dr. Jefferis, and H. L. Jackson.

The Chancellor also stated that subscriptions had been received to the amount of between £800 and £900, but that it appeared to the committee that before further subscriptions could be obtained it would be necessary that assurance should be received by subscribers that the College would be accepted by the Senate in affiliation, and legally established and endowed, and also that a site for the necessary buildings would be bestowed by the University. He accordingly gave notice of the following resolutions, which were carried at a meeting of the Senate held on the 26th of March:—

1. That the Senate, having had under consideration a proposal made at a public meeting, and already supported by considerable private contributions, for the establishment of a Women's College within the University, hereby consents to receive such College into affiliation in the event of its being established and endowed by the authority of Parliament.
2. That the Senate agrees to dedicate to the use of the proposed College a site for necessary buildings and recreation grounds within the University Domain: Provided that Parliament shall, as in the case of the Affiliated Colleges, have endowed the College for building purposes with a sum equal to the amounts subscribed by the public, and have provided an annual stipend for the Principal: Provided also that the College shall have been established within four years from the passing of this resolution.
3. That the Senate will concur with the subscribing supporters of the said proposal in inviting the Government to submit to Parliament a Bill for establishing and endowing the said College for women.
4. That the Chancellor and Vice-Chancellor be authorized to represent the University in the deputation agreed to at the public meeting of May last.

24. The Senate has adopted certain changes at the instance of the Professor of Modern Literature, by which it is hoped the teaching in that department will be rendered more efficient and of a less elementary character than it has been hitherto. The Lectureship in French and the Lectureship in German existing up to the present have been combined into a Lectureship in French and German, and at a much larger salary than that received by either of the distinct lecturers, with a view to the appointment of some gentleman specially trained as a teacher in the Department of Modern Literature. In order to fill the appointment the following gentlemen were requested to act as a committee for receiving applications and making the election:—The Agent-General for New South Wales; Sir Charles Nicholson, Bart., D.C.L.; Professor Nichol, of Glasgow; Professor Ward, of Owen's College, Manchester; Professor Ker, of University College, Cardiff. These gentlemen gladly consented to act, applications were invited for the post, and received from thirty-five applicants. From these the committee selected and appointed Mr. Emil J. Trechmann, B.A. (Oxon.) Ph.D. (Heidelberg), at present Lecturer in English at Bangor College, North Wales. Dr. Trechmann is expected to arrive in Sydney in time to commence his duties at the beginning of Lent Term, 1889.

25. In consequence of the adoption of the new curriculum for the Faculty of Arts, mentioned in last year's report, in which the subject of logic and mental philosophy was included, it became necessary to appoint a teacher in that subject. Applications were accordingly invited for the post by public advertisement, and from a number of applicants the Senate appointed Mr. Francis Anderson, M.A., a distinguished graduate of Glasgow University.

26. During the year the Senate has had under consideration the expediency of making certain changes in the curriculum for medical and science students in consequence of reports which were received from the Professorial Board and the Faculty of Medicine respectively, recommending that the curriculum in those departments should be modified, so that students should no longer be required to pass through the first year in the Faculty of Arts before proceeding to their special medical and scientific studies. The Faculty of Medicine was accordingly instructed to prepare a proposed new medical curriculum extending over five years on the basis of its suggestion, and the Professorial Board was at the same time instructed to draw up a curriculum for science and engineering students for the consideration of the Senate. The reports were duly presented to the Senate, and after considerable discussion the proposed new by-laws for the medical curriculum (which are appended to this report) were adopted. In accordance with these by-laws candidates for a degree in medicine or in science are required to produce evidence of having graduated in arts or in science, or of having attended the lectures of the first year of the arts course, and passed the first year examination in arts, or of having passed the senior public examination, or an examination equivalent to the senior public examination, in the following subjects, viz.:—Latin; one of the three languages, Greek, French, German, and three of the subjects in group III, viz., arithmetic, algebra, geometry, trigonometry, elementary surveying and astronomy, mechanics, applied mechanics.

27. The Senate is glad to be able to report the completion of the Physical Laboratory which was in course of erection at the beginning of the year. The classes for theoretical and practical instruction have been held in it during the year, and, as regards general fittings and conveniences, it proves to be as well adapted as possible for the purpose for which it was erected.

28. The Senate has had under consideration during the year the necessity for the erection of a new laboratory for the Department of Chemistry. The want of additional accommodation in this department has been felt for some years, and frequent proposals for its provision have been made, but up to the present time financial difficulties have stood in the way. In the month of June the Senate, in view of the great urgency of the necessity of a laboratory, passed the following resolution:—

"1. That for the erection of the buildings required for a Department of Chemistry and Mineralogy, the sum of £7,500 be granted from the amount saved by the compromise in reference to the payment of legacy duty on the Challis bequest as soon as it is available, on condition that an equal sum be provided by the Government, provided that the said sum of £7,500 be recouped to the fund by annual payments from the income fund, extending over a period of not more than twenty years.

2. In order that the building may serve as a memorial of the late Mr. Challis, it be known as the Challis Laboratory."

These resolutions having been submitted to the Government, a communication was subsequently received, stating that the Government had determined to place a sum of £7,500 upon the Estimates for the year 1889 for the purpose, and that the Colonial Architect had been instructed to proceed with the preparation of the plans for the building in order that there might be no delay when the money was available.

29. The Senate is able to report that more efficient arrangements have been made for clinical teaching of medical students at the Prince Alfred Hospital by means of the following resolutions, which were approved by the Senate in the month of May, and by which the conjoint board,—consisting of the Senate and the Directors of the Prince Alfred Hospital—in the month of

- "1. That there should be on the staff of the Prince Alfred Hospital four honorary physicians, four honorary Surgeons, two, three, or four honorary assistant physicians, and two, three, or four honorary assistant surgeons, independently of special appointments.
2. That the University Lecturer on Medicine should be one of the honorary physicians, and the University Lecturer on Clinical Medicine should be one of the honorary physicians.
3. That the University Lecturer on Surgery should be one of the honorary surgeons, and the University Lecturer on Clinical Surgery should be one of the honorary surgeons.
4. That after the expiration of the tenure of office of the present Ophthalmic Surgeon this appointment should be held by the University Lecturer on Ophthalmic Surgery.
5. That when a special Lectureship on Diseases of Women shall have been established by the University, the Lecturer should be the Honorary Physician for Diseases of Women in the Prince Alfred Hospital.
6. That every Honorary Medical Officer should be equally and fully subject to all the by-laws, rules, and regulations of the Hospital.
7. That in order to carry out the above recommendations it is desirable that the conjoint board should elect the Lecturers above specified, unless, in any individual instance, they see material reasons against such a course."

30. In the month of April the Senate received a communication from the Medical Board of the Prince Alfred Hospital recommending the appointment of a Lecturer in Ophthalmic Medicine and Surgery. After full consideration the Senate determined upon the establishment of a Lectureship in that subject; and in the month of September, after applications had been invited by public advertisement, elected Mr. F. Antill Pockley, M.B., Ch.M. (Edin.) to the office.

31. In the month of May Mr. Edward Reeve was reappointed to the office of Curator of the Nicholson Museum of Antiquities for a period of one year.

32. In the month of June a communication was received from the Department of Public Instruction stating that important changes in the Training Institutions organized in that Department were being arranged, and suggesting that arrangements might be made under which a certain number of students of those Institutions would be entitled to graduate in arts in the University. After some consideration and correspondence with the Department, the following by-law was passed by the Senate and approved by His Excellency the Governor in Council:—

To stand as by-law 8, chapter XI.

Notwithstanding the provisions of by-laws 6 and 7, matriculated students, who are students in a Training Institution for teachers organised under the Department of Public Instruction, may be admitted to the First Year Examination in the Faculty of Arts, without having attended the University lectures, upon presenting a certificate from the Under Secretary for Public Instruction to the effect that they have attended the course of instruction in such Training Institution for one year after matriculating. Students of a Training Institution, who have passed the First Year Examination, may be admitted to the Second Year Examination in the Faculty of Arts without having attended the University lectures of the second year, upon presenting a similar certificate to the effect that they have attended a second course of instruction in such Training Institution for one year after passing their First Year Examination.

All such students having passed the Second Year Examination shall have the status of students commencing the Third Year in the Faculty of Arts.

This by-law will have the effect of bringing students of the Training School into close relation with the students of the University who are preparing for other professions to their mutual benefit.

33. In the month of May a committee was appointed by the Senate to inquire and report upon the system of evening lectures at present carried on. On the 30th of July the committee reported that in its opinion the evening lectures had not been altogether successful, but pointed out that as the ordinary period of graduation by attendance on the evening lectures was five years, those students who had entered at their establishment had not had sufficient time to graduate, and recommended that the whole question should be reconsidered after the next annual commemoration when the first five years curriculum would have been completed.

34. The office of Demonstrator in Physiology was rendered vacant during the year through the resignation of Dr. Alexander M'Cormick, who held the office for five years. The appointment of a gentleman to fill the vacancy was left in the hands of Dr. Michael Foster, Professor of Physiology, in the University of Cambridge, and Secretary of the Royal Society, London, who selected Mr. A. E. Wright, B.A. (Cantab.), M.B. (Dub.) Mr. Wright is expected to commence his duties in Lent Term, 1889.

35. In the month of September a meeting of Convocation was held in accordance with the provisions of the by-laws, which had been adopted by the Senate for the regulation of such meetings, and the following resolutions were passed:—

1. That the Fellows of the Senate should be elected for a definite term of years, and not for life, but should be eligible for re-election.
2. That the professors should not be *ex-officio* Fellows of the Senate, but should be eligible for election.
3. That Convocation, other than for the election of Fellows, should be summoned at least twice in each year.
4. That Convocation should be empowered to originate any statute or regulation, and recommend the same for the approval of the Senate.
5. That the Senate be requested to obtain the necessary authority from Parliament for giving effect to the preceding resolutions."

These resolutions were considered at a special meeting of the Senate, held on the 24th of September, when resolutions 1 and 3 as passed by Convocation were adopted by the Senate. In regard to clause 2 and 5 the Senate appointed a committee to consider and report as to the best mode of making use of the services of the teaching staff in the government of the University. The committee has not yet reported to the Senate. In regard to clause 4 it was determined to inform Convocation that the Senate will at all times be ready to receive and carefully consider any recommendations for by-laws or regulations sent up by Convocation.

36. In the month of October a communication was received from Professor Stephens, Professor of Natural History, and Dr. Haswell, Lecturer in Biology, pointing out the necessity for increased accommodation for the classes in their departments, and suggesting that the necessary additional lecture-rooms and laboratories should be erected upon a site adjoining the Macleay Museum. As the Senate felt that there might be difficulty in procuring the necessary funds for the large expenditure which was proposed, arrangements have been made by which at a much smaller expense the building hitherto used as a temporary medical school can be adapted to the required purpose.

37. In the month of November leave of absence for a part of the term beginning in March, 1889, was granted to Professor Threlfall, to enable him to visit Europe.

38. In view of the falling in of the Challis bequest, or that portion of it represented by the Australian assets in the month of September, 1889, the Senate has appointed a committee to consider and report what chairs should be founded when the bequest is at the disposal of the Senate. The committee has not yet sent in its final report to the Senate.

39. The office of Lecturer in Architecture for the year 1888 was filled by the reappointment of Mr. John Sulman, F.R.I.B.A.

40. Mr. John Sulman, F.R.I.B.A., has also been appointed to deliver a course of thirty lectures upon architectural design during the year 1889, for the benefit of architects' articled clerks, not being compulsory for University engineering students.

41. In the month of December the Senate received with regret the resignation of Dr. F. Norton Manning as Lecturer in Psychological Medicine. The vacancy has not yet been filled, as the services of the lecturer will not be required until Michaelmas Term, 1889.

42. In the same month the Senate also received with regret the resignation of Dr. Albert Helms, who has held the office of Demonstrator in Practical Chemistry for seven years. The vacancy has been filled by the appointment of Mr. Edgar Hall, F.C.S., of Owen's College.

43. In the month of October the Senate received a communication from the Hon. William Macleay, in which he pointed out that the building erected to receive his Museum of Natural History, originally bequeathed, but now given to the University, had been completed, and that provision had been made for the necessary fittings, and expressed his intention of commencing the transfer of the museum from its present location to the University building at an early date. He also enclosed a cheque for £6,000 for the endowment of a curatorship in connection with it, in accordance with his intention expressed in 1874 of bequeathing that sum with the museum to the University. Up to the end of the year the transfer of the museum was being rapidly carried on.

44. The Senate has to report the receipt of the following benefactions :—

Some valuable additions to the Nicholson Museum of Antiquities from the Egypt Exploration Society, which is represented in Australia by Mr. Josiah Mullins, one of its Vice-Presidents, including a colossal head in granite of Rameses II in a very excellent state of preservation.

A bequest of £4,000 from the late William Roberts, Esq., of Penrith, for the foundation of a scholarship or scholarships, travelling or otherwise, in memory of the late Mr. James King, of Irrawang, near Raymond Terrace. It has been determined to establish with this endowment a travelling scholarship of £150 per annum, tenable for two years, to be awarded to graduates of not more than four years' standing.

A sum of £1,000 from the Hon. J. B. Watt, to duplicate the Watt Exhibition, which is awarded to pupils at the public examinations.

Prizes of books from Professor Scott, Professor Stevens, Professor MacCallum, Dr. Milford, Dr. Wilkinson, and Mr. F. Anderson.

45. The annual statement of receipts and expenditure, duly certified by the auditor, the Hon. Geoffrey Eagar, and also a statement showing the condition of the various private foundations of the University, are appended to this report.

H. E. BARFF,
Registrar.

APPENDIX A.

BY-LAWS OF THE UNIVERSITY.

CHAPTER XVII.—FACULTY OF MEDICINE.

1. The Chancellor and Vice-Chancellor, the Fellows of the Senate who are legally qualified members of the medical profession, the Professors and Lecturers in the subjects of the Medical Curriculum, and the Examiners in Medicine appointed by the Senate, shall constitute the Faculty of Medicine.

2. The Dean shall exercise a general superintendence over the administrative business connected with the Faculty, and it shall be the duty of the Registrar to summon meetings of the Faculty at such times as may be required by the Dean provided that upon the written requisition of any three members of the Faculty, the Dean, or in his absence the Registrar, shall convene a special meeting. No question shall be decided at any meeting of the Faculty unless there be present at least five members. In the absence of the Chancellor and Vice-Chancellor, the Dean shall act as chairman at all meetings of the Faculty, but in his absence the members then present shall elect a chairman from amongst themselves. The chairman at any such meeting shall have a vote, and in case of an equality of votes, a second or casting vote. It shall be the duty of the Registrar to attend all meetings, and to record the proceedings.

3. The Faculty shall meet for the purpose of considering and reporting to the Senate upon such subjects as have relation to the studies, lectures, examinations, and degrees in Medicine, and such questions as may be referred to it by the Senate.

4. Courses of Instruction shall be given as directed by the Senate; and except where otherwise specified, each shall consist of a long course of 100 hours' instruction, extending through two terms, or a short course of fifty hours' instruction, extending throughout one term; and, where possible, the long courses shall be given during Lent and Trinity Terms, and the short courses during Michaelmas Term.

5. At least three Written Class Examinations shall be held during each long course of instruction, and at least two such examinations during each short course. Students shall not absent themselves from these examinations except upon a medical certificate, and at the end of each course a report of the results, signed by the responsible teacher, shall be presented to the Senate by the Dean.

6. There shall be three Degrees granted in the Faculty of Medicine, viz., Doctor of Medicine (M.D.), Bachelor of Medicine (M.B.), and Master of Surgery (Ch.M.).

7. Candidates for a Degree in Medicine shall produce evidence of having graduated in Arts or in Science, or of having attended the lectures of the First Year of the Arts course and passed the First Year Examination in Arts, or of having passed the Senior Public Examination, or an Examination equivalent to the Senior Public Examination, in the following subjects, viz., Latin and one of the three languages—Greek, French, German, and in three of the sections in Group III., viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics.

8. Candidates for the Degrees of Bachelor of Medicine and of Master of Surgery shall attend the following courses of instruction, and present the following certificates:—

I. In the First year,—

Inorganic Chemistry and Practical Chemistry.
Physics and Practical Physics.
Biology and Practical Biology.
Descriptive Anatomy, Junior Course.

II. In the Second Year,—

During Lent and Trinity Terms,—
Physiology, Junior Course (including Microscopical Anatomy).
Practical Physiology.
Regional Anatomy, Junior Course.

During Michaelmas Term,—
Organic Chemistry.
Descriptive Anatomy, Senior Course.
Hospital Practice.

III. In the Third Year,—

During Lent and Trinity Terms,—
Surgery.
Regional and Surgical Anatomy, Senior Course.
Hospital Practice.

During Michaelmas Term,—
Physiology, Senior Course (with Embryology and Physiological Chemistry)
Hospital Practice.

IV. In the Fourth Year,—

During Lent Term,—
Operative Surgery, a course of twenty-five hours' instruction.

During Lent and Trinity Terms,—
Pathology.
Materia Medica and Therapeutics.
Hospital Practice, with lectures on Clinical Surgery twice weekly and Tutorial Surgery.

During Michaelmas Term,—
Practical Pathology.
Medical Jurisprudence and Public Health.
Hospital Practice, with lectures on Clinical Surgery twice weekly and Tutorial Medicine.

V. In the Fifth Year,—

During Lent and Trinity Terms,—
Medicine.
Midwifery and Gynæcology.
Hospital Practice, with lectures on Clinical Medicine twice weekly and Tutorial Medicine.

During Michaelmas Term,—
Applied Logic.
Psychological Medicine, including Clinical Instruction and at least twelve Systematic Lectures.
Ophthalmic Medicine and Surgery, including Clinical Instruction and at least twelve Systematic Lectures.
Hospital Practice, with lectures on Clinical Medicine, twice weekly.

Before

Before admission to the Fourth Examination candidates shall also be required to present the following certificates at least ten clear days before the date of the Examination :—

1. Of attendance on Practical Pharmacy, or a certificate showing that the Student has been engaged for at least three months, by apprenticeship or otherwise, in compounding and dispensing drugs in the laboratory of a Hospital or Dispensary, or of a Licentiate of the London or Dublin Society of Apothecaries or Pharmaceutical Chemist approved by the Faculty of Medicine.
2. Of having acted during at least three months as a Dresser in the Out-patient's Department, during at least six months as a Dresser in the Surgical Wards, and during at least six months as a Clinical Clerk in the Medical Wards of a recognized hospital.
3. Of attendance on *post mortem* examinations during at least one term during the fourth or fifth years of the curriculum.
4. Of attendance on at least twelve cases of Practical Midwifery.
5. Of proficiency in Vaccination, signed by a legally qualified Medical Practitioner.
6. Of proficiency in the administration of Anæsthetics.

9. For the degrees of Bachelor of Medicine and Master of Surgery there shall be four examinations. The First Examination shall not take place before the end of the First Year, and shall include Inorganic Chemistry, Physics, and Biology. The Second Examination shall not take place before the end of the Third Year, and shall include Organic Chemistry, Anatomy, and Physiology. Before admission to the Second Examination candidates will be required to present certificates of having dissected during at least five terms, and of having dissected at least one side of the body. The Third Examination shall not take place before the end of the Fourth Year, and shall include Pathology and Materia Medica and Therapeutics. The Fourth Examination shall not take place before the completion of the Fifth Year, and shall include Medicine, Clinical Medicine, Surgery, Clinical Surgery, Midwifery, Medical Jurisprudence and Public Health, Psychological Medicine, Ophthalmic Medicine and Surgery, and Applied Logic.

10. Before admission to the Fourth Examination, each candidate shall furnish a declaration of having completed his twenty-first year, and also a certificate of good fame and character, signed by two competent persons.

11. At each Examination candidates shall be required to give proof of their knowledge by written answers to the questions set, to be followed by a practical or by a *vivâ voce* Examination in all subjects whatsoever.

12. Candidates who have passed all the Examinations to the satisfaction of the Examiners shall be recommended to the Senate for admission to the Degree of Bachelor of Medicine, and to the Degree of Master of Surgery if they so elect.

13. Honours at graduation shall depend upon the proficiency shown in the examinations, in accordance with regulations adopted by the Senate from time to time, and the candidate who shall have been most distinguished shall receive a gold medal or a prize of the value of £10, provided that he shall have obtained first-class honours.

14. Accredited certificates of attendance on courses of instruction from other Universities and Schools of Medicine recognized by the University of Sydney, may, on the report of the Dean, be accepted by the Senate as proof of the attendance on courses of instruction *pro tanto* required by these by-laws: Provided always that no person shall be recommended to the Senate for admission to the degrees of Bachelor of Medicine or of Master of Surgery by examination, unless he shall present certificates of having attended within the University of Sydney during each of at least six terms, not less than two courses of instruction in subjects included in the medical curriculum of the University. In all such cases a degree in Arts or in Science, or some certificate of general education satisfactory to the Senate, will be required. Every candidate making application under this by-law must present a certificate of good fame and character, signed by two competent persons.

15. Bachelors of Medicine and Masters of Surgery of this University shall not possess any right to assume the title of Doctor of Medicine.

16. The degree of Doctor of Medicine shall not be conferred until after the expiration of two academic years from the granting of the degree of Bachelor of Medicine.

17. Candidates for the degree of Doctor of Medicine must produce evidence that after having obtained the degree of Bachelor of Medicine they have spent at least two years in medical or surgical practice, or that they have been engaged for a like period and in a manner approved by the Faculty in the scientific study of any subject included in the medical curriculum of the University of Sydney.

18. The candidates shall be required to pass an examination conducted by means of set papers and by *vivâ voce* interrogations in one division of the two following groups, viz. :—

- (1) Medicine,
Surgery,
Midwifery and Gynæcology.

The examination in each case shall include examination of, and report on, the cases of patients in a hospital, and examination and demonstration of specimens or preparations, normal or morbid.

- (2) The other subjects included in the medical curriculum of the University.

They shall further be required to present, and, if called upon, to defend, a thesis on some subject included in the medical curriculum of the University. Five printed copies of the thesis, on paper $5\frac{1}{2}$ in. wide and $8\frac{1}{2}$ in. deep, must be transmitted to the Registrar at least two months before the date fixed for the examination.

19. The candidate who shall at this examination most distinguish himself shall, if of sufficient merit, receive a gold medal or a prize of the value of £10.

20. The degree of Master of Surgery shall not be conferred on any person who has not already been admitted a Bachelor of Medicine.

21. The fees for the degrees of Doctor of Medicine, Bachelor of Medicine, and Master of Surgery, shall be £10 respectively. The fees shall be paid to the Registrar before the examination, and shall not in any case be returned to the candidate.

22. Candidates who fail to pass the examination for any degree shall be allowed to present themselves for a second examination for the same degree without fee, but for every further examination that may be required they shall pay the sum of £5.

1889.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(BY-LAWS—FACULTY OF MEDICINE.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31.

By-Laws—Faculty of Medicine—passed by the Senate, December, 1888.

CALENDAR : CAP. XVII.

1. The Chancellor and Vice-Chancellor, the Fellows of the Senate who are legally qualified members of the medical profession, the Professors and Lecturers in the subjects of the Medical Curriculum, and the Examiners in Medicine appointed by the Senate, shall constitute the Faculty of Medicine.

2. The Dean shall exercise a general superintendence over the administrative business connected with the Faculty, and it shall be the duty of the Registrar to summon meetings of the Faculty at such times as may be required by the Dean, provided that upon the written requisition of any three members of the Faculty, the Dean, or, in his absence, the Registrar, shall convene a special meeting. No question shall be decided at any meeting of the Faculty unless there be present at least five members. In the absence of the Chancellor and Vice-Chancellor, the Dean shall act as chairman at all meetings of the Faculty, but in his absence the members then present shall elect a chairman from amongst themselves. The chairman at any such meeting shall have a vote, and, in case of an equality of votes, a second or casting vote. It shall be the duty of the Registrar to attend all meetings, and to record the proceedings.

3. The Faculty shall meet for the purpose of considering and reporting to the Senate upon such subjects as have relation to the studies, lectures, examinations, and degrees in Medicine, and such questions as may be referred to it by the Senate.

4. Courses of instruction shall be given as directed by the Senate, and, except where otherwise specified, each shall consist either of a long course of one hundred hours' instruction, extending throughout two terms, or of a short course of fifty hours' instruction, extending throughout one term; and, where possible, the long courses shall be given during Lent and Trinity Terms, and the short courses during Michaelmas Term.

5. At least three written class examinations shall be held during each long course of instruction, and at least two such examinations during each short course. Students shall not absent themselves from these examinations except upon a medical certificate, and at the end of each course a report of the results, signed by the responsible teacher, shall be presented to the Senate by the Dean.

6. There shall be three degrees granted in the Faculty of Medicine—viz., Doctor of Medicine (M.D.), Bachelor of Medicine (M.B.), and Master of Surgery (Ch.M.)

7. Candidates for a Degree in Medicine shall produce evidence of having graduated in Arts or in Science, or of having attended the lectures of the first year of the Arts course and passed the first year examination in Arts, or of having passed the senior public examination, or an examination equivalent to the senior public examination, in the following subjects, viz., Latin, and one of the three languages—Greek, French, German, and in three of the sections in Group III, viz., Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics.

8. Candidates for the Degrees of Bachelor of Medicine and of Master of Surgery shall attend the following courses of instruction, and present the following certificates :—

- I. In the first year,
 Inorganic Chemistry and Practical Chemistry.
 Physics and Practical Physics.
 Biology and Practical Biology.
 Descriptive Anatomy (junior course).

- II. In the second year,
 During Lent and Trinity Terms,
 Physiology (junior course).
 Practical Physiology.
 Regional Anatomy (junior course).

- During Michaelmas Term,
 Organic Chemistry.
 Descriptive Anatomy (senior course).
 Hospital Practice.

III.

III. In the third year,

- During Lent and Trinity Terms,
Surgery.
Regional and Surgical Anatomy (senior course).
Hospital Practice.
- During Michaelmas Term,
Physiology (senior course).
Hospital Practice.

IV. In the fourth year,

- During Lent Term,
Operative Surgery, a course of twenty-five hours' instruction.
- During Lent and Trinity Terms,
Pathology.
Materia Medica and Therapeutics.
Hospital Practice, with lectures on Clinical Surgery, twice weekly, and Tutorial Surgery.
- During Michaelmas Term,
Practical Pathology.
Medical Jurisprudence and Public Health.
Hospital Practice, with lectures on Clinical Surgery, twice weekly, and Tutorial Medicine

V. In the fifth year,

- During Lent and Trinity Terms,
Medicine.
Midwifery and Gynæcology.
Hospital Practice, with lectures on Clinical Medicine, twice weekly, and Tutorial Medicine.
- During Michaelmas Term,
Applied Logic.
Psychological Medicine, including clinical instruction and at least twelve systematic lectures.
Ophthalmic Medicine and Surgery, including clinical instruction and at least twelve systematic lectures.
Hospital Practice, with lectures on Clinical Medicine, twice weekly.

Before admission to the fourth examination, candidates shall also be required to present the following certificates at least ten clear days before the date of the examinations:—

1. Of attendance on Practical Pharmacy, or a certificate showing that the candidate has been engaged for at least three months, by apprenticeship or otherwise, in compounding and dispensing drugs in the laboratory of a hospital or dispensary, or of a Licentiate of the London or Dublin Societies of Apothecaries or Pharmaceutical Chemist approved by the Faculty of Medicine.
2. Of having acted during at least three months as a dresser in the Out-patients Department, during at least six months as a dresser in the surgical wards, and during at least six months as a clinical clerk in the medical wards of a recognized hospital.
3. Of attendance on *post-mortem* examinations during at least one term during the fourth or fifth years of the curriculum.
4. Of attendance on at least twelve cases of Practical Midwifery.
5. Of proficiency in Vaccination, signed by a legally qualified medical practitioner.
6. Of proficiency in the administration of Anæsthetics.

9. For the degrees of Bachelor of Medicine and Master of Surgery there shall be four examinations. The first examination shall take place before the end of the first year, and shall include Inorganic Chemistry, Physics, and Biology. The second examination shall not take place before the end of the third year, and shall include Organic Chemistry, Anatomy, and Physiology. Before admission to the second examination candidates will be required to present certificates of having dissected during at least five terms, and of having dissected at least one side of the body. The third examination shall not take place before the end of the fourth year, and shall include Pathology and Materia Medica and Therapeutics. The fourth examination shall not take place before the completion of the fifth year, and shall include Medicine, Clinical Medicine, Surgery, Clinical Surgery, Midwifery, Medical Jurisprudence, and Public Health, Psychological Medicine, Ophthalmic Medicine and Surgery, and Applied Logic.

10. Before admission to the fourth examination, each candidate shall furnish a declaration of having completed his twenty-first year, and also a certificate of good fame and character, signed by two competent persons.

11. At each examination candidates shall be required to give proof of their knowledge by written answers to the questions set, to be followed by a practical, or by a *vivâ voce*, examination in all subjects whatsoever.

12. Candidates who have passed all the examinations to the satisfaction of the examiners shall be recommended to the Senate for admission to the degree of Bachelor of Medicine, and to the degree of Master of Surgery, if they so elect.

13. Honors at graduation shall depend upon the proficiency shown in the examinations, in accordance with regulations adopted by the Senate from time to time, and the candidate who shall have been most distinguished shall receive a gold medal or a prize of the value of ten pounds, provided that he shall have obtained first-class honors.

14. Accredited certificates of attendance on courses of instruction from other Universities and Schools of Medicine recognized by the University of Sydney, may, on the report of the Dean, be accepted by the Senate as proof of the attendance on courses of instruction *pro tanto* required by these by-laws: Provided always that no person shall be recommended to the Senate for admission to the Degrees of Bachelor

Bachelor of Medicine or of Master of Surgery by examination, unless he shall present certificates of having attended within the University of Sydney during each of at least six terms, not less than two courses of instruction in subjects included in the Medical Curriculum of the University. In all such cases as degree in Arts or in Science, or some certificate of general education satisfactory to the Senate will be required. Every candidate making application under this by-law must present a certificate of good fame and character, signed by two competent persons.

15. Bachelors of Medicine and Masters of Surgery of this University shall not possess any right to assume the title of Doctor of Medicine.

16. The degree of Doctor of Medicine shall not be conferred until after the expiration of two academic years from the granting of the degree of Bachelor of Medicine.

17. Candidates for the degree of Doctor of Medicine must produce evidence that, after having obtained the degree of Bachelor of Medicine, they have spent at least two years in medical or surgical practice, or that they have been engaged for a like period and in a manner approved by the Faculty in the scientific study of any subject included in the medical curriculum of the University of Sydney.

18. The candidates shall be required to pass an examination conducted by means of set papers, and by *viva voce* interrogations in one division of the two following groups, viz. :—

(1) Medicine.

Surgery.

Midwifery and Gynæcology.

The examination in each case shall include examination of, and report on, the cases of patients in a hospital, and examination and demonstration of specimens or preparations, normal or morbid.

(2) The other subjects included in the medical curriculum of the University.

They shall further be required to present, and, if called upon, to defend, a thesis on some subject included in the medical curriculum of the University. Five printed copies of the thesis, on paper five and a half inches wide and eight and three-quarters of an inch deep, must be transmitted to the Registrar at least two months before the date fixed for the examination.

19. The candidate who shall at this examination most distinguish himself shall, if of sufficient merit, receive a gold medal, or a prize of the value of ten pounds.

20. The degree of Master of Surgery shall not be conferred on any person who has not already been admitted a Bachelor of Medicine.

21. The fees for the degrees of Doctor of Medicine, Bachelor of Medicine, and Master of Surgery, shall be ten pounds respectively. The fees shall be paid to the Registrar before the examination, and shall not in any case be returned to the candidate.

22. Candidates who fail to pass the examination for any Degree shall be allowed to present themselves for a second examination for the same degree without fee ; but for every further examination that may be required, they shall pay the sum of five pounds.

There has been no distribution of lecture or examination fees during the quarter ended 31st March, 1889.—H E B

1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WOMEN'S COLLEGE UNIVERSITY ENDOWMENT BILL.
(MESSAGE, No. 31.)

Ordered by the Legislative Assembly to be printed, 14 June, 1889.

CARRINGTON,
Governor.

Message, No. 31.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends, for the consideration of the Legislative Assembly, the expediency of making provision to meet the requisite expenses in connection with a Bill to establish and endow a College for Women within the University of Sydney.

*Government House,
Sydney, 13th June, 1889.*

1889.

NEW SOUTH WALES.

EDUCATION.

(ADDITIONAL AND AMENDED REGULATIONS UNDER THE "PUBLIC INSTRUCTION ACT OF 1880.")

Presented to Parliament, pursuant to Act 43 Vic. No. 23, sec. 37.

Department of Public Instruction, Sydney, 15 August, 1889.

HIS EXCELLENCY the Governor, with the advice of the Executive Council, has been pleased to approve of the following Additional and Amended Regulations, in substitution for those of dates 12th February, 1886, and 25th September, 1888, relating to Teachers.

J. H. CARRUTHERS.

Instructions to Teachers.

28. Teachers of all ranks are required to abstain from participation in any public meetings or other gatherings on party, political, or sectarian topics, and generally to refrain from all action in such matters calculated to give offence to any section of the community or to impair their own usefulness as teachers; they must also abstain from public controversy upon the merits of the system of education now in force, and from acting as local preachers, lay readers, or local correspondents of newspapers.

28A. It is incumbent on teachers to attend to directions given them by inspectors, and all departmental orders issued to them must be strictly observed. Should a teacher at any time feel aggrieved, he may appeal to the Minister for redress, but such appeal must be made in a proper and respectful manner. Pending an appeal, no teacher will be justified in disobeying orders, nor in the course of an appeal shall he knowingly make unfounded charges or improperly introduce subjects foreign to the matter of appeal.

Appointment and Training of Teachers.

71. Every applicant for employment as a teacher, unless he be a University graduate, or a person holding a certificate from a recognised training institution, must show that he has gained in the Colony, either as a pupil in a State School, or otherwise, a sufficient experience of the established Public School system to warrant his employment. Every untrained applicant must undergo a course of training before being permanently appointed, and he must sign an undertaking to accept such employment in any locality indicated by the Minister.

SUBJECTS OF EXAMINATION FOR TEACHERS AND PUPIL-TEACHERS.

84. The subjects in which teachers, and pupil-teachers shall be examined for classification are those stated hereunder.

FOR A THIRD-CLASS CERTIFICATE.

Reading—Full value, 800 marks. Prose and Poetry.

Writing—Full value, 800 marks. Specimens of Copy-setting in round hand, half-text, and small hand.

Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.

Text Books—Barnard Smith's Arithmetic, or

Hamblin Smith's Arithmetic.

Grammar—Full value, 1,000 marks. Including Punctuation, Paraphrasing, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, Dictation and Composition.

Text Books—M'Leod's Grammar, and

Laurie's Composition.

Geography—Full value, 1,000 marks. Europe and Australia in detail. Mapping in connection with those Continents.

Text Books—Hughes' Class Book of Geography.

Geography of New South Wales (Wilkins').

History—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important Events. General sketch of Australian History.

Text Books—Nelson's Royal History of England.

Sutherland's History of Australia.

School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.

Text Books—Gladman's School Method.

Public Instruction Act and Regulations.

Domestic Economy—(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.

Text Book—Hassall's Domestic Economy.

Drawing—Full value, 500 marks. Black-board, Freehand.

Text Books—As prescribed in the Standard of Proficiency.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.

Text Books—Curwen's Standard Course, or

Sutton's Theory of Music.

FOR

FOR A SECOND-CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry from any English Reading Book.
- Writing*—Full value, 500 marks. Specimens of Copy-lines, Letter-writing, Ornamental Writing.
- Arithmetic*—Full value, 1,000 marks. The full Course, with Elementary Mensuration.
Text Books—Barnard Smith's Arithmetic.
 Hamblin Smith's Arithmetic.
 Todhunter's Mensuration (for Males, Chap. I to XX inclusive. For Females, Chap. I to XIII inclusive).
- Grammar*—Full value, 1,000 marks. Including Spelling, Punctuation, Parsing, Paraphrasing, Meaning and uses of Words, Etymology and Analysis.
Text Books—Hunter's Grammar.
 Lennie's Grammar (revised).
 Morell's Grammar and Analysis.
Subject for Special Study—"Julius Cæsar"—(Shakespeare.)
- Geography*—Full value, 800 marks. Physical Geography. Europe, Australasia, and North America, in detail. Mapping within these limits.
Text Books—W. Hughes' Class Book of Geography, and Edward Hughes' Physical Geography, or Geikie's Physical Geography.
- History and English Literature*—Full value, 700 marks.
 History— { British History, from the Conquest to the present times.
 { Australian History.
 Literature—Elizabeth to Cromwell inclusive.
Text Books—Nelson's Royal History.
 Sutherland's History of Australia.
 Smith's Smaller History of English Literature.
- Art of Teaching*—Full value, 500 marks. Organization, Discipline, Method, and Instruction of School in greater detail.
Text Books—Gladman's School Method.
 Public Instruction Act and Regulations.
- Sanitary Science* (Female Teachers only)—Full value, 500 marks.
Text Book—Wilson's Healthy Life and Healthy Dwellings.
- Drawing*—Full value, 500 marks. Geometrical and Model Drawing.
Text Books—Nesbit and Brown's Handbook of Model and Object Drawing.
 Rawle's Practical Plane Geometry.
- Vocal Music*—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.
- * *Alternative Groups for Males.*
- Group I.
- Euclid*—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.
- Algebra*—Full value, 1,000 marks. To Quadratic Equations, including Surds.
Text Books—Hamblin Smith's Algebra.
 Todhunter's Euclid.
- Group II.
- Latin*—Full value, 2,000 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I to IV inclusive.
Text Books—Dr. Smith's Smaller Latin Grammar. "Principia Latina," Part I; and Ihne's Latin Syntax, Part I.
- * *Alternative Groups for Females.*
- Group I.
- French*—Full value, 1,500 marks. Grammar, Composition. Translation from an easy author.
Text Books—Voltaire's Charles XII. Books I to IV inclusive.
 Havet's French Class Book (complete), or Hallard's French Grammar.
- Group II.
- Latin*—Full value, 1,500 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I, II.
Text Books—As for Males.
- Group III.
- Euclid*—Full value, 750 marks. Books I and II, with easy Deductions on them.
Text Books—As for Males.
- Algebra*—Full value, 750 marks. To Quadratics, omitting Surds.
Text Books—As for Males.
- Group IV.
- Any two of the following Sciences:—
- Experimental Physics*—Full value, 750 marks.
Text Book—Balfour Stewart's Lessons on Elementary Physics.
- Chemistry*—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Lessons in Elementary Chemistry.
- Geology*—Full value, 750 marks.
Text Book—Lyell's Student's Elements of Geology.
- Zoology*—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Zoology.
- Botany*—Full value, 750 marks.
Text Book—Oliver's Lessons in Elementary Botany.
- Physiology*—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Physiology.

FOR

* NOTE.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

FOR A FIRST-CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry from a standard author.
Writing—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing, Principles of Writing.
Arithmetic—Full value, 1,000 marks. The whole theory and practice.
Text Books—Hamblin Smith's Arithmetic.
 Barnard Smith's Arithmetic.
 Colenso's Arithmetic (as revised by Hunter).
 Todhunter's Mensuration (for Males only).
Grammar—Full value, 1,000 marks. Including Orthography, Punctuation, Parsing, Paraphrasing, Analysis, Composition, Etymology, Prosody, and Style.
Text Books—Mason's English Grammar.
 Bain's Higher English Grammar.
 Meiklejohn's Book of English.
Geography—Full value, 800 marks. Physical Geography.
 Astronomical Geography.
Text Books—Geikie's Physical Geography.
 Lockyer's Astronomy.
Art of Teaching—Full value, 700 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.
Text Books—Gladman's School Method.
 Tate's Philosophy of Education, or
 Morell's Mental Philosophy.
Sanitary Science—(Female Teachers only)—Full value, 500 marks.
Text Book—Wilson's Healthy Life and Healthy Dwellings.
Drawing—Full value, 500 marks. The full D Certificate.
Text Book—Dennis' Perspective.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.
History—Full value, 700 marks. History of England in detail. History of Australia.
Text Books—Smith's Student's Hume.
 Creasy on the English Constitution. Chapters 10, 11, 15, 16.
 Sutherland's History of Australia.

Text Book—Morley's English Literature. Chapters VII to XI inclusive.
For Special Study—Shakespeare's "Merchant of Venice."
 Milton's "Paradise Lost." Book I.
 Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159, 165, 409, 458, 487.
 Bacon's Essays, 6, Blackie's edition, Civil and Moral.

Alternative Groups for Males.

Group I.

- Algebra*—Full value, 1,000 marks. Including the Binomial Theorem.
Text Books—Colenso's Algebra, or
 Hamblin Smith's Algebra.
Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—Potts' Euclid, or
 Todhunter's Euclid.
Plane Trigonometry—Full value, 1,000 marks.
Text Books—Todhunter's Trigonometry for Schools and Colleges, or
 Hamblin Smith's Trigonometry.

*Group II.

- Latin*—Full value, 2,000 marks. Virgil, first two Books of *Æneid*; Livy, Book 21. Questions on Grammar. Composition.
Text Books—Dr. Smith's Larger Latin Grammar.
 Abbott's Latin Prose Composition.
 Ihne's Latin Syntax.
Greek—Full value 1,000 marks.
Text Books—Xenophon's "Anabasis." Books I and II.
 Smith's Larger Greek Grammar.
 Abbott's Greek Prose Composition.
French—Full value, 1,000 marks. Grammar, Translation, Composition.
Text Books—Souvestre's "Un Philosophe sous les Toits."
 Racine's "Athalie."
 Havet's French Grammar.
 Hallard's French Grammar.
German—Full value, 1,000 marks. Grammar, Translation, Composition.
Text Books—Schiller's "History of the Thirty Years' War." Chapters I to IV.
 Goethe's "Faust."
 Otto's German Grammar.

† Group III.

- Natural Science*—Full value, 750 marks. Experimental Physics.
Text Book—Ganot's Physics.
Chemistry—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Class Book of Elementary Chemistry (Macmillan).
Geology—Full value, 750 marks.
Text Book—Jukes' or Geikie's Geology.
Zoology—Full value, 750 marks.
Text Book—Huxley's Zoology.
Botany—Full value, 750 marks.
Text Book—Oliver's Manual of Botany.
Physiology—Full value, 750 marks.
Text Book—Huxley's Physiology.
Sanitary Science—Full value, 750 marks.
Text Book—Wilson's Handbook of Hygiene.

Group

* NOTE.—In this group at least two languages must be taken, one of them being Latin.

† NOTE.—Any four of these Sciences may be taken¹

Group IV.

- Euclid*—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.
Latin—Full value, 1,000 marks. Cæsar, De Bello Gallico. First two books.
 Virgil's *Æneid*. Book I.
Text Books—As in Group II.

Group V.

- Euclid*—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.

And any two Sciences of the Science Group already specified in Group III. Full value 1,000 marks.

Group VI.

- Latin*—Full value, 2,000 marks. Virgil's *Æneid*. Books I, II.
 Livy. Book XXI.
 Horace's Odes. Books I, II.
 Grammar and Composition.
Text Books—As in Group II.
 Together with any two of the following Sciences, namely, Chemistry, Physics, Physiology, Geology.
 Full value 1,000 marks.
Text Books—As in Group III.

Alternative Groups for Females.

Group I.

- French*—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—Souvestre's "Un Philosophe sous les Toits."
 Corneille's "Le Cid."
 Racine's "Athalie."
 Havet's French Grammar.
 Hallard's French Grammar.

Group II.

- German*—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group III.

- Latin*—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group IV.

- Euclid*—Full value, 800 marks. Books I to IV, with Deductions.
Text Books—As for Males.
Algebra—Full value, 700 marks. To Quadratic Equations inclusive.
Text Books—As for Males.

Group V.

Any three of the following Sciences :—

- Experimental Physics*—Full value, 500 marks.
Chemistry—Full value, 500 marks.
Geology—Full value, 500 marks.
Zoology—Full value, 500 marks.
Botany—Full value, 500 marks.
Physiology—Full value, 500 marks.
Text Books—As for Males of First Class.

SUBJECTS OF STUDY FOR PUPIL-TEACHERS.

Before Appointment—*Candidates.*

- Reading*—Full value, 50 marks. To Read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to Spell well, and to understand the meaning of the passage read.
Writing—Full value, 50 marks. To write from Dictation, in a neat hand, a simple Prose Narrative, with correct spelling and punctuation.
Dictation—Full value, 100 marks.
Arithmetic—Full value, 100 marks. To know the Arithmetical Tables, and to work the rules in Vulgar Fractions, Proportion, and Practice, as in Barnard Smith's Arithmetic.
Grammar—Full value, 100 marks. To Parse and Analyse correctly a passage taken from an ordinary Class-book ; to know the Elements of Grammar.
Geography—Full value 100 marks. To understand the Geographical Terms, to be acquainted with the Map of the World, and to have a knowledge of the Geography of Australia.
Drawing—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of Proficiency.
Vocal Music—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.
Skill in Teaching—To Teach a Junior Class in the presence of an Inspector.

Pupil-teachers—Class IV.

- Reading*—Full value, 50 marks. To Read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter ; to repeat from memory 50 lines of Poetry.
Writing—Full value, 50 marks. To write neatly and correctly from Dictation or from Memory.
Dictation—Full value, 50 marks.
Arithmetic—Full value, 100 marks. To work Questions in Proportion, Vulgar and Decimal Fractions, and Practice.
Text Book—Barnard Smith's Arithmetic.

Grammar

Grammar—Full value, 100 marks. To Parse, Paraphrase, and Analyse a Passage; Meanings of Words; Etymology.

Text Books—Lennie's Grammar (revised).
Laurie's Spelling and Dictation Class Book.

Geography—Full value, 80 marks. New South Wales, in detail; Europe. The Physical Features and Chief Towns in each Country.

Text Books—Wilkins' Geography of New South Wales.
Hughes' Class Book of Geography.

History—Full value, 70 marks. English History to William I.

Text Book—Nelson's Royal History of England.
Australian History—Sutherland's. Chaps. I to V.

Drawing—Full value, 50 marks. Black-board Practice.

Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. I to VIII.

Geometry (for Males)—Full value, 100 marks. Euclid. Book I. Propositions I to XXVI.

Text Book—Todhunter's Geometry.

Algebra (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chaps. I to V inclusive.

Latin (for Males)—Full value, 100 marks. Smith's "Principia Latina" to Exercise XXIV inclusive.

*** French (for Females)**—Full value, 100 marks. De Fivas' "Grammaire des Grammaires," to Exercise XXX inclusive.

School Management—Full value, 50 marks. The Kindergarten Principle (Lyschinska). Gladman's School Method.

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers—Class III.

Reading—Full value, 50 marks. To read with improved intonation and expression.

Writing—Full value, 50 marks. Specimens of Penmanship; three hands.

Arithmetic—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. Parsing of Difficult Sentences, with a good knowledge of Syntax, and the Analysis of Sentences; Meanings of Words; Force of Affixes; Latin Roots; Composition

Text Book—Lennie's Grammar (revised).

Geography—Full value, 80 marks. Australia; Polynesia.

Mapping, confined within these limits.

Text Books—Collins' Geography of Australia and Pacific Ocean.
Collins' Australian and Primary Atlas.

History—Full value, 70 marks. English History: William I to Richard III inclusive.

Australian History—Sutherland's. Chaps. VI to X.

Text Books—Nelson's Royal History of England.
Sutherland's History of Australia.

Drawing—Full value, 50 marks. Freehand Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. IX to XII inclusive.

Geometry—Full value, 100 marks. Euclid. Book I.

Algebra—Full value, 100 marks. Fractions and Simple Equations, to Chap. XIV inclusive.

Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XXXIII.

French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise LX. (See note*, Fourth Class Pupil-teachers.)

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers—Class II.

Reading—Full value, 50 marks. A standard author, with correct intonation and emphasis.

Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.

Grammar—Full value, 100 marks. Increased skill in Parsing, Paraphrasing, and in the Analysis of Sentences; Meanings of Words; Affixes; Roots; Composition.

Text Book—Hunter's Grammar.

Geography—Full value, 80 marks. Asia: Physical Features and Chief Towns of each Country of Asia and North America.

Physical Geography: Waves, Tides, Currents.

History—Full value, 70 marks. English History: Henry VII to Anne, inclusive.

Australian History—Sutherland's. Chapters XI to XVI.

Drawing—Full value, 50 marks. Model Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chaps. XIII to XV inclusive.

Geometry—Full value, 100 marks. Books I and II, with Deductions in Book I.

Algebra—Full value, 100 marks. Simple Equations and Surds, to Chapter XXIV inclusive.

Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XLVIII.

French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise XC. (See note*, Fourth Class Pupil-teachers.)

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers—Class I.

Reading—Full value, 50 marks. To read with ease and expression from a standard author.

Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces

Text Books—Barnard Smith's Arithmetic.

Todhunter's Mensuration.

Grammar—Full value, 100 marks. Parsing, Paraphrasing, Prosody, Analysis of Sentences, Meanings of Words, Formation of Words, Derivations, Composition.

Text Book—Hunter's Grammar.

Geography—Full value, 80 marks. Physical Geography. Physical Features and Chief Towns of each of the Countries of Africa and South America.

Mapping within these limits.

History—Full value, 70 marks. English History: George I to present time. Australian History—Sutherland's. Chapters XVII to XXII.

Drawing—Full value, 50 marks. Advanced proficiency expected in the three sections. Vocal

* NOTE.—From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question:—

Latin, or
Euclid and } As for Males.
Algebra.

- Vocal Music*—Full value, 50 marks. Stimpson's Class Book, Chaps. XVI to end.
Geometry—Full value, 100 marks. Books I and II, with Deductions.
Algebra—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to end. Cæsar, De Bello Gallico. Chaps. I to III. Easy translations.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to the end. (See note,* Fourth Class Pupil-teachers.)
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
Needlework (for Females)—Full value, 50 marks.

NOTE.—The course herein prescribed is for all pupil-teachers alike. It is recommended, however, that the Sydney University Matriculation subjects (as set forth in the by-laws and annually published in the Calendar) be also studied by those pupil-teachers who may desire or intend, after admission to the Training School, to present themselves at the Matriculation examination and to compete, in subsequent University examinations, for the privilege of remaining three years in training and proceeding to the final examination for the B.A. degree.

131. The vacations sanctioned by the Minister are: three weeks at Christmas, one week at Easter, and a fortnight at Midwinter. The holidays allowed, other than those occurring at vacation, are: the Anniversary of the Colony, the Anniversary of the Queen's Birthday and of the Prince of Wales' Birthday, and Good Friday.

Teachers are to state on their time-tables these vacations and holidays.

1889.

NEW SOUTH WALES.

MUNICIPALITIES.

(MOSS VALE FREE PUBLIC LIBRARY BY-LAWS.)

Presented to Parliament, in accordance with the provisions of the Municipalities Act of 1867.

Department of Public Instruction, Sydney, 19 July, 1889.

THE following By-laws for the regulation of the Free Public Library at Moss Vale, which have been made by the Municipal Council of Moss Vale, and confirmed by His Excellency the Governor in Council, are published in accordance with the "Municipalities Act of 1867."

J. H. CARRUTHERS.

By-Laws approved by the Library Committee for the regulation of the Public Library, Moss Vale.

1. The Library shall be open every Monday and Thursday from 2 to 4 p.m.; every Tuesday, Wednesday, Friday, and Saturday, from 7 to 9 p.m. In connection with the Library there shall be a Reading Room which shall be open at such times as the Library Committee may appoint.

2. Every person entering the Public Library shall write his name and address in a visitor's book to be provided by the Library Committee, and if such person shall be unable to write, then such name and address shall be written by the proper officer of the Council at such Library or Reading Room at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library or Reading Room, and it shall be the duty of the officer of such Library or Reading Room to enforce this By-law.

3. Any person who being intoxicated shall enter such Library or Reading Room, shall be at once removed from the premises; any person who shall use therein any abusive, improper, or unbecoming language, or shall by unnecessarily loud talking, or by any noise or otherwise, disturb or annoy the persons using or resorting to such Library or Reading Room, or who shall without lawful excuse, but without felonious or larcenous intent, remove any property from such Library or Reading Room, shall forfeit and pay any sum not less than ten shillings nor more than ten pounds, and any such person may be forthwith removed by any officer of the Council in charge of such Library and Reading Room.

By order of the Library Committee,

W. VAL. MILLER,

Council Clerk.

Sealed with the Seal of the Municipal Council of Moss Vale, by order of the Council.

(L.S.)

WM. VAL. MILLER,

Council Clerk.

N. HERBERT THROSBY, MAYOR.

Council Chambers, Moss Vale, 25 June, 1889.

1889.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

RESUMPTION OF LAND UNDER FOR PUBLIC SCHOOL PURPOSES AT

Corrimal.	Mortdale.	Narara.
Eglinford.	Mona Vale.	Orange East.
Granville South.	Narrabeen.	Rockdale.

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

CORRIMAL.

*Gazette, 22nd March, 1889.*NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, Grand Cross of the Most Distinguished
Governor. Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Wollongong Argus" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government *Gazette*, and in a newspaper circulated in the Police District of Wollongong, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Corrimal, containing two acres, being part of John Thomas Williams' 160 acres, originally forming part of Harriet Spearing's 2,000-acre grant, in the parish of Wonona, county of Camden: Commencing on the eastern side of the Main South Coast Road, at the north-west corner of the Roman Catholic cemetery, being a point bearing north 19 degrees 16 minutes east 2 chains 94½ links

from the intersection of the east boundary of J. Martin's 50 acre portion with the north side of a road 20 feet wide, now forming the south boundary of that portion; and bounded thence on the south by a line partly forming the north boundary of said cemetery bearing north 87 degrees 49 minutes east 5 chains 6 $\frac{3}{10}$ links; thence on the east by a line bearing north 2 degrees 11 minutes west 4 chains; thence on the north by a line bearing south 87 degrees 49 minutes west 4 chains 99 $\frac{2}{10}$ links; and thence on the west by the east side of the Main South Coast Road aforesaid bearing south 14 minutes east 4 chains and $\frac{3}{10}$ of a link, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eighteenth day of March, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-second year of Her Majesty's Reign.

By His Excellency's Command,

J. H. CARRUTHERS.

GOD SAVE THE QUEEN!

EGLINFORD.

*Gazette, 18th January, 1889.*NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, Grand Cross of the Most Distinguished
Governor. Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Maitland Mercury" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of

buildings in connection therewith, and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Wollombi, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Eglinford, parish of Aellalong, county of Northumberland, being portion 82, containing two acres, and forming part of T. Crawford's 3,000 acres: Commencing at a point bearing south 75 degrees 44 minutes west and distant 22 chains 56 links from the south-west corner of portion No. 93, J. Bridges' conditional purchase of 40 acres; and bounded thence on the east by a line bearing south 4 chains; thence on the south by a line bearing west 6 chains 9 links to the road from Congowai to Aellalong; thence on the north-west by parts of south-eastern sides of that road bearing respectively north 25 degrees 10 minutes east 2 chains 21 links and north 35 degrees 10 minutes east 2 chains 44 links; and thence on the north by a line bearing east 3 chains 74 links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this ninth day of January, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-second year of Her Majesty's Reign.

By His Excellency's Command,

JAMES INGLIS.

GOD SAVE THE QUEEN!

a Member of Her Majesty's Most
Honourable Privy Council, Knight
(L.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Carcoar Chronicle" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith, and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Carcoar, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Hampton, parish of Hampton, county of Bathurst, being measured portion marked "P.S." at corners, containing 2 acres, and forming part of E. Henry's additional conditional purchase No. 84-69, portion 115 of 117 acres 1 rood: Commencing on the south-

west side of the road from Mandurama to the Belubula, at the south-east corner of portion 115; and bounded thence on the north-east by part of that side of that road bearing north 19 degrees west 4 chains 23 links; thence on the north by a line bearing west 4 chains 32 links; thence on the west by a line bearing south 4 chains; and thence on the south by a line forming the north side of a 1 chain road bearing east 5 chains 69 links, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-second day of June, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-third year of Her Majesty's Reign.

By His Excellency's Command,

J. H. CARRUTHERS.

GOD SAVE THE QUEEN!

MAJOR'S PLAINS.

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, Grand Cross of the Most Distinguished
Governor. Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Border Post" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication

in the Government Gazette, and in a newspaper circulated in the Police District of Albury, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Major's Plains, parish of Moorwatha, county of Hume, containing two acres, being portion 299, and forming part of W. Harrison's conditional purchase of 40 acres, portion 22: Commencing at the north-east corner of portion 22; and bounded thence on the north-east by part of the north-east boundary of that portion, forming the south-west side of a one-chain road, bearing north $72^{\circ} 20'$ west 5 chains; thence on the north-west by a line bearing south $17^{\circ} 40'$ west 4 chains; thence on the south-west by a line bearing south $72^{\circ} 20'$ east 5 chains; and thence on the south-east by part of the south-east boundary of portion 22 aforesaid, being the north-west side of a one-chain road, bearing north $17^{\circ} 40'$ east 4 chains, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of June, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-second year of Her Majesty's Reign.

By His Excellency's Command,

J. H. CARRUTHERS.

GOD SAVE THE QUEEN!

Governor.

a Member of Her Majesty's Most Honourable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the Gazette, and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Richmond River Express" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Richmond River, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Wooram, parish of Wooram, county of Richmond, containing 2 acres, being portion 131, and forming part of Francis Lebon's additional conditional purchase of 213 acres, portion 91: Commencing at the north-east corner of portion 68; and bounded thence on the west by part of the east boundary of that portion bearing south 5 chains; thence on the south by a line bearing east 4 chains; thence on the east by a line bearing north 5 chains to a road 1 chain wide separating this land from portion 67; and thence on the north by the south side of that road bearing west 4 chains, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourteenth day of September, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-third year of Her Majesty's Reign.

By His Excellency's Command,
J. H. CARRUTHERS.

GOD SAVE THE QUEEN!

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.
(RESUMPTION OF, AT BUNGERELLINGONG.)

Presented to Parliament pursuant to Act 44 Vic. No. 16

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, Grand Cross of the Most Distinguished
Governor. Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Cowra Free Press" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Cowra, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance

in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situated at Bungerellingong, parish of Gooloogong, county of Forbes, being measured portion marked p.s. at corners, containing an area of 2 acres, and forming part of M. Walsh's additional conditional purchase No. 81-211, portion 50 of 56 acres, exclusive of road: Commencing on the north-east side of the road 3 chains wide from Cowra to Gooloogong at its intersection with the north side of a road 1 chain wide which forms the south boundary of portion 50 aforesaid; and bounded thence on the south by part of the north side of the latter road bearing east 3 chains 40 links; on the east by a line bearing north 4 chains 24 links; on the north by a line bearing west 6 chains 5 links to the north-east side of the road from Cowra to Gooloogong aforesaid; and thence on the south-west by part of the north-east side of that road bearing south 32 degrees east 5 chains, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourteenth day of May, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-second year of Her Majesty's Reign.

By His Excellency's Command,
J. H. CARRUTHERS.
GOD SAVE THE QUEEN!

1889.

NEW SOUTH WALES.

FISHERIES OF THE COLONY.

(REPORT OF THE COMMISSIONERS OF FISHERIES UP TO 31st DECEMBER, 1888.)

Presented to Parliament by Command.

REPORT of the Commissioners of Fisheries for New South Wales on the Fisheries of the Colony, for the year ending the 31st December, 1888.

The Commissioners of Fisheries to The Colonial Secretary.

Sir,

We have the honor to submit under the following titles our Report on the Fisheries of the Colony for the year 1888.

Finance.

We desire to call special attention to the unsatisfactory financial position of the Department which has resulted from loss of revenue consequent upon the abolition, by Act of Parliament, of the royalty on oysters, and upon the large arrears of rent due on leases for oyster culture.

We regret to be obliged to state that there is an increasing disinclination among lessees to pay the rents due on their holdings. The failure is probably in a measure owing to the present unprolific nature of those holdings, but the result to the Department is that at the present time there remains no less a sum than £2,300 of rent in arrear. It may be remembered that this rent debit was brought under notice in September last with the view to steps being taken for its recovery.

The revenue for 1888, which reaches £3,634 19s. 8d., is less by £1,887 0s. 7d. than that received in 1887, while the expenditure is in excess of receipts by the sum of £2,573 5s. 10d. Against this excess there is the possible asset for overdue rentals above referred to.

Official Staff.

In respect to the staff of the Department, we regret to have to record the death, on the 7th May last, of Mr. Thomas Laman, Acting Assistant Inspector of Fisheries at Port Stephens Heads. It is not in contemplation to fill this vacancy; on the contrary, it is intended to further reduce the staff by dispensing with the services of two inspectors, a draftsman, and a temporary clerk. These reductions will, together, result in a saving in salaries of £499 10s.; and it is possible that in 1889 still further reductions may be found possible.

Fish Acclimatisation.

The introduction of trout-fry into several inland streams has, it is hoped, been successfully accomplished during the year. Through the courtesy of the Victorian Government, aided by the Committee of the Geelong Acclimatisation Society, we were enabled to obtain, free of cost, some thousand or more of trout-fry, and these have been distributed in the Upper Shoalhaven, the Wollondilly, the Upper Nepean, and Nattai Rivers, the Picton Lakes, in several streams in the Western range of mountains, and at Mudgee. A supply was also liberated in a stream in the Armidale district and in the Brogo River, in the Eden district.

It is hoped that this attempt to stock our waters with this favourite fish may prove successful. We do not, however, regard our efforts in this direction as completed, but intend, as early as possible in the season of 1889, to repeat the experiment, anticipating that, by these repeated efforts, the problem whether trout can be successfully acclimatised in New South Wales waters will be finally solved.

55—A

Oyster

Oyster Culture.

The year's consumption of oysters has reached a total of 22,502 bags, of which quantity 13,318 bags were imported from Queensland and New Zealand, the balance, 9,184 bags, being the produce of the Colony.

This result exhibits a very unsatisfactory development of our own beds, and shows that oyster culture, during the year 1888, has not thriven. From a revenue point of view alone can this unfortunate condition of our fisheries be regarded without serious misgivings, the royalty previously levied on the production of oysters having been abolished.

The decline in production is to be attributed in a large measure to the very limited rainfall during 1888—the smallest on record. Our best oysters are absolutely dependent for development upon the presence in their waters of a certain proportion of fresh water; in the absence of such a supply, the result has been, in some rivers, an excessive growth of marine vegetation, and in others the development of disease. These have been, in their respective ways, very destructive. As a consequence, the yield is less by 680 bags than in 1887, while the importation of oysters shows an increase of 8,550 bags over the number received in the previous year.

We consider that this disease, which is becoming so common in some of the best of our rivers, should form the subject of special examination by an expert, in order either that the conclusions we have provisionally adopted may be verified, or a cause, and with it, we hope a remedy, suggested. The northern beds have not by any means recovered their productive capabilities of previous years, and the apparent increase in the yield over that of 1887 is due to the removal of stock which had been previously brought from New Zealand and laid on the beds. Had not this work of semi-cultivation been adopted, the returns from the principal Northern waters would have been very small.

The spawning has, speaking generally, been but moderate, and confined to the lower parts of the rivers; owing moreover to the small rainfall the spat did not thrive as it should have done. We have, however, been informed that there has been a good fall of spat on some of the leased areas at Cape Hawke, as well as in some of the southern rivers.

In the northern half of the Southern division of Fisheries, great improvement is manifest in many of the oyster culture leases, especially those at the Clyde River and Narrawillie Creek. The lessees have expended considerable sums in laying down oak logs and stone for spat collection, with the result that those waters are now fairly stocked with oysters, besides which a large growth of spat is visible on the mangroves; and leases which were originally taken for speculative purposes with the sole object of stripping for sale every available oyster, are, by transfer, now in possession of *bond fide* cultivators, who, we believe, are using their best endeavours to improve their layings.

Oysters have not in this last-mentioned division suffered as in the Northern and Home Divisions. Indeed it is anticipated that, with the increased attention given to culture, the productive powers of those waters will in the course of two or three years show a very considerable increase.

It is however to be admitted that the oyster fisheries in the Twofold Bay district have not improved. They are said to have been nearly ruined by applicants for leases, as well as by lessees. These people strip not only the shores they have applied for, but also their leased areas and Crown lands as well, and yet, under proper management, these fisheries are capable of very remunerative development.

The Fishing Industry.

In the Appendices will be found tabulated statements showing the quantities of fish brought to market, and the range of prices obtained for the latter during the year.

The amount realized in 1887 at the Fish Market by the sale of fish was £31,594 3s. 3d., while in 1888 it reached £37,775 6s. 11d., an increase of £6,181 3s. 8d.

In connection with this industry there are two matters which we regard with satisfaction; one is the transmission of ice-packed fish from the Clarence and other northern rivers to the Metropolis. This industry was only fairly started in the latter part of 1887, and yet this year shows a production of 15,830 baskets so transmitted. The prosecution of this industry may be found to be equally practicable in the Southern waters, where, *e.g.*, in the grounds about Twofold Bay, fish are said to abound. When this shall have been accomplished, the metropolis will receive its supply from along the whole sea-board, with the result, it is hoped, that fish food will be so cheapened as to make it an article of regular consumption in the poorest homes.

The other matter is fish canning. A company for this purpose has been established at Iluka, on the Clarence River, and promises to become a commercial success. It, at present, cans about twenty-five baskets of fish per week. There is a widely expressed opinion that the mullet, which during the months of
April

April to June frequents our shores in immense shoals, is an exceptionally suitable fish for preserving, and would in time prove a formidable rival to the imported tinned salmon and other tinned fish.

We have to report very favourably upon the advantage in the Home Division of fisheries which has been secured in the preservation of the fish supply by the closing of the lakes and upper portions of the rivers against the use of fishing nets; and we think it essential in the public interest that these natural breeding and feeding grounds should be continuously protected from the harassing and destructive operations of the fishing nets. So convinced are we on this point, that we intend to recommend the extension of the system to the Northern waters, whence, as has been shown, a large supply of fish has lately been received in the metropolis. Whilst these closures are maintained, but little apprehension need be felt about any scarcity of fish.

We have pleasure in referring to an experiment undertaken by Leonardi Porchelli with a trawl-net which he proposed for use in deep-sea-fishing. Several trials with this instrument were made in the early part of July last, off the coast at Broken Bay, and at Port Hacking, and in each case satisfactory results were obtained. At Broken Bay one catch was so enormous that the net broke, and the fish escaped. The experiments were undertaken at the instance of Dr. Marano, the Italian Consul, and other gentlemen, and so satisfied were they with the success attained that they had it in contemplation to take the subject up on commercial lines, but the project fell through owing to some of the projectors leaving the Colony. Signor Porchelli is understood to be now on his return from Italy, whither he was sent to procure a sufficient supply of necessary gear in view of the formation of a company to work the net as a commercial venture.

The net itself is unlike the English beam-trawl, being twice as long, and having its other dimensions in proportion; the mouth, instead of being a plain transverse opening, is formed of two extending jaws or wings, which when distended form a shape like the letter V. The net is drawn through the water by two vessels, there being two warps attached to it, one at each side of the mouth; the attachments also are different from those used with the ordinary English trawl. Signor Porchelli has obtained a patent for this net, and a full description and illustrative tracing are among the Appendices.

We have also to invite the perusal of an interesting letter from Mr. W. Buckingham, detailing particulars of a well-fish-boat which he had built in the Colony for the purpose of bringing fish alive to the Sydney market.

Mr. Buckingham in embarking upon this venture was guided by an experience which he had gained during six or seven years' connection with the fisheries at Grimsby. He constructed a vessel, the "Gratitude," 120 tons register, on the model of a North Sea fishing smack. The "Gratitude" measures 90 ft. overall, 23 ft. beam, 10 ft. depth of hold, and 10 ft. draft of water. She is fitted with two wells formed by water-tight bulkheads set athwartships. The water is decked down to prevent wash, the connection with the deck being through a well-funnel, constructed to afford light and air. Water is supplied to the well by apertures on each side of the vessel, through which a stream continually flows as the smack moves through the water. These wells are calculated to carry 2,500 schnapper. The vessel is also fitted with ice and fish rooms, and is complete in all other respects.

Mr. Buckingham states that so far the attempt has been financially a failure—he found the habits of the fish and the circumstances attending their capture and sale so different from what he had learned in his English experience, that he was not surprised at his failure in his first experiments. So far however from being discouraged he has sent the vessel to New Zealand in charge of a person who has had several years' experience in fishing on that coast, and he expects her return in a week or two with a cargo of oysters and live-fish. Mr. Buckingham now considers that all that is necessary to make this venture a success in these waters is auxiliary steam-power to enable the vessel to contend against the southerly current which drifts him off the fishing grounds in the night calms that often prevail.

Mr. Buckingham's enterprise is deserving of all commendation, and his letter in the Appendix is deserving of attentive perusal by every one interested in the success of the fishing industry in this Colony.

For the purpose of instituting experiments in open sea fishing, we recommend the importation of a purse-seine net, such as is used in the Menhaden fisheries, off the coast of Maine.

Such a net was supplied to the Commissioners some years since, but was consumed in the Garden Palace fire.

Also, in view of encouragement to fishing outside the estuaries of the Colony, and, more especially, near Sydney, we advise that a survey be made of the sub-marine coast ground, from Port Stephens to Jervis Bay, extending for a distance of 20 miles seaward.

This survey could be expeditiously and faithfully carried out by H.M.S. "Dart," which is especially qualified for such work, and we suggest that application be made to the Admiralty to grant permission for the "Dart" to make such survey.

The

The Steam Launch.

The small steam launch now used by the Department is, we regret to say, altogether unfit for the various services she is required to perform, and which, because of her unfitness, are necessarily much circumscribed. In spite of repeated efforts to improve her speed and stability, this launch is still a slow and dangerously unstable vessel; nor can she carry coal or water sufficient for even a short trip to the upper waters of the Hawkesbury. Against a very moderate head wind she is unable to make any respectable headway, and it has been found impossible to bring her from so short a distance as Botany or Broken Bay to Sydney unless in exceptionally calm weather. She is altogether unequal to any experiments in trawling except in smooth water, and even then she can do nothing with a moderately heavy beam trawl. She is too small to carry even a dingey on her decks, and her accommodation in wet weather for the single engineer who composes her crew is practically limited to standing room, as her small cabin is generally required as a supplementary coal bunker. We strongly recommend the Minister to direct her to be sold or converted to some other purpose for which, possibly, she may be found suitable, and that a vessel be built for the Department capable of fulfilling the various and, in some respects, exceptional requirements of a serviceable Fisheries Tender. Such a vessel should be of at least 70 tons (builders' measurement), and should be so designed as to allow of at least four or five days' coal being stowed in her bunkers; to give deck room for two useful fishing boats; to be masted and otherwise fitted so as to provide the means of trawling and shooting drift nets and purse-seines at sea; of allowing ample storage for oysters and fish, and especially for the safe carriage of young fry for purposes of acclimatization. A high degree of speed would not be necessary. What is of more importance is that the vessel should be a good sea-boat, capable of ensuring a passage to and fro between the home fishing stations, and of providing the necessary accommodation for the services to which she could be devoted so beneficially. Such a vessel could be employed on the ordinary towing and other Departmental services when not specially employed on duties connected with the Department of Fisheries.

Without such a vessel we do not hesitate to give it as our deliberate opinion that none of the important benefits, experimental and protective, expected by the fishermen and the general public from this Department can even be attempted, much less effected, by those upon whom the Legislature has cast the grave obligation of developing the fisheries of the Colony.

We do not make this recommendation lightly, or without having given due consideration to the cost which the character of vessel indicated would entail; nor have we forgotten that, for reasons given in an earlier part of our Report, the Department of Fisheries is no longer self-supporting. But we are constantly being reminded, both in Parliament and in the Press, that much more is expected of the Department of Fisheries than it has yet been in a position to accomplish or even essay, and we are made painfully conscious of the weakness and limitation of our efforts by the nature of the material with which we have to work. In the entire equipment of our Department, feeble and insufficient as it is in many respects, there is nothing which so denotes impotence as the vessel with which we are supposed to carry out the duties connected with the periodical closing of fishing-grounds and the protection of fish for reproductive purposes in waters known to be their natural nurseries, while, in connection with the oyster fisheries, this vessel has never been, and can never be, of the slightest use.

Melbourne Centennial Exhibition.

Our fisheries have been prominently represented at the Centennial International Exhibition, Melbourne. In preparing the collection, a chief object kept in view was to present our resources from an economical standpoint; therefore, in addition to natural history specimens, there were gathered for display exhibits showing our several kinds of fish prepared for food in various ways—smoked, salted, and tinned; also a collection of mammalian and fish oils, as well as specimens of porpoise, seal, and eel skins in the raw and tanned states.

Another feature in the collection was the display of thirty-eight life-size oil-paintings of our fishes; also charts drawn on a large scale of the several oyster-bearing waters, and a map showing their positions. It is proposed that eventually these paintings, &c., shall occupy a space in the Technological Museum.

We hope that this exposition of the capabilities of the fisheries may be instrumental in attracting attention to our resources, and in promoting the establishment of industries such as are referred to in another portion of this Report. The exhibit generally has been favourably commented upon, and it is expected that official recognition of its merit will be duly accorded.

In the Appendices are to be found reports covering the year 1887, as well as from Inspectors stationed on the principal fish-producing rivers, which may be perused with advantage.

We cannot conclude this Report without recording the fact that recent experience has convinced us of the absolute necessity for further amendments in the fisheries' laws, and we propose to submit detailed recommendations indicating the nature of such amendments at an early date.

APPENDIX A.

Annual Reports from local Inspectors for the year 1888.

NORTHERN DIVISION.

THE principal event in connection with the Northern Fisheries for the year 1888, has been an important extension of the fishing industry, and the large development of the trade of shipping fresh fish packed in ice to Sydney.

This work was fairly started in the latter half of 1887, prior to which the quota supplied by the Northern Division to the fresh fish supply of the metropolis consisted of a few shipments packed in ordinary baskets during the winter months of each year—the quantity and success of the shipments depending entirely upon the length and severity of the winter.

The total of these shipments prior to 1887 did not amount in any one year to more than a few hundred baskets for the whole division.

During 1887, when the new mode of packing was initiated, the quantity of fresh fish produced amounted to 3,743 baskets.

In 1888, the industry increased and extended to such dimensions as to show a total of 15,830 baskets, this large quantity being chiefly produced from the Clarence River which, in addition to its fine fishing grounds, has the necessary advantage of regular steam communication with the city.

The total number of fishermen licensed on this river for the year amounted to 56.

The following return shows the total amount produced by each river, while the tabulated form appended shows the production of each river for each of the several months of the year:—

Clarence River	10,453 baskets.
Manning River	1,063 „
Richmond River	165 „
Cape Hawke	2,938 „
Macleay River	821 „
Port Macquarie... ..	390 „
Total	15,830 baskets.

With but little exception the whole of the above were net fish taken within the respective rivers—the exception consisting of a few cases of schnapper. These were caught outside during the winter months when the westerly winds prevailed, and kept the bar entrance sufficiently smooth to admit of the fishing boats crossing out. The schnapper fishing was tried chiefly at the Clarence River and the Nambucca River, but it was soon abandoned—the work proving in the first place risky in crossing over the river bars, and in the next place unremunerative—the plan of packing large fish in ice not being found to answer so well as in the case of the smaller fish.

In addition to the quantity of fish shipped from the Clarence River it is worthy of notice that some large sea turtles are occasionally caught in this river, no fewer than seven being shipped to Sydney during November last.

A fish canning company has likewise been started at Iluka, on the Clarence River, and bids fair to be a commercial success. The company preserves about twenty-five baskets of fish per week.

A limited amount of dried fish has also been produced in a few of the rivers, principally the Clarence, the Richmond, and at Cape Hawke.

With reference to the Richmond River returns—it may be noticed that they are for one month only. The fishermen on that river having started to forward fish in ice and had then to discontinue. The irregularity of their steam communication, together with the greater distance from Sydney, combining to make the work uncertain and unremunerative.

Oysters.

The oyster production and general condition of the natural oyster-beds of the Northern Fisheries for 1888, although showing some improvement on the previous year, is still far from encouraging.

The returns for this year show a total of 1864 bags as against 1226 bags for 1887, and as against the average of 4,129 bags for the four previous years.

The amount produced from the respective rivers is as follows:—

Clarence River	Nil.
Richmond River	588 bags
Manning River	732 „
Evans' River	292 „
Tweed River	73 „
Bellinger River	41 „
Cape Hawke	130 „
Port Macquarie	8 „
Total	1,864 bags

At first sight, it would appear as if there was a decided improvement in the yield for 1888 over that of 1887.

There is this remarkable circumstance, however, to be taken into consideration, that the leases were largely stocked with New Zealand oysters—no less than 2,250 bags being brought from Sydney and laid down upon the Manning River and at Cape Hawke.

A large proportion of them died from long exposure, a portion was lost in the work of laying and relifting, and the remainder contributed in no small degree to the yield which otherwise would have shown no improvement in the return for 1887.

The

The reason for this great falling-off in 1887 and 1888 is not the result of either neglect or mismanagement on the part of the lessees of the natural oyster-beds. On the contrary, nearly the whole production for the year consists of planted oysters—that is, oysters which have been attached or grown in one place, and removed and developed in another. Besides, the large quantities of New Zealand oysters, foreshore oysters have been planted out from many of the leases, and whatever spat has been procurable from Crown Lands not under lease has been taken by the lessees under the provisions of spat licenses, and placed on their deep-water leases.

This work of semi-cultivation has been carried on on the Richmond, Evans, and Manning Rivers, and also at Cape Hawke, and it is quite certain that, but for this work of planting out, the returns from these inlets for 1888 would have been almost nil.

The principal cause of the defection in the natural oyster-beds during the past two years is certainly due to the great extremes which the Colony has experienced in its rainfall in that period.

“It is a remarkable fact,” writes the Government astronomer, “that the rainfall of the Colony for 1888 is the smallest on record,” being 42 per cent. below the average,—while that for 1887 was the greatest on record, being 43 per cent. above the average rainfall of the Colony.

The floods which occurred in the early part of 1887 killed large quantities of oysters in the northern rivers—especially on the Clarence, where the quantity destroyed was ascertained as the result of careful inspection to be 84 per cent. of the whole.

As a further proof of the great damage done by the floods on this river, it may be noted that no oysters were procured from the Clarence after the floods in the early part of 1887 nor during the whole of 1888. Although the extensive natural oyster-beds on the river regularly produced for years several hundreds of bags annually—the amount for 1886 being 2,008 bags, and for 1885, 1,625 bags.

One beneficial effect resulted from these floods, and much was expected from it. This was the thorough scouring the rivers received (the Manning River excepted) and the clearing of the natural beds of marine vegetation, leaving them free to attach the spawn of the succeeding summer months. Then followed the other extreme of rainfall, which had the effect of limiting spawn, and encouraging by an undue amount of salinity marine growth on the natural beds, and fouling them as before.

Moderate amounts of spawn occurred during the latter part of 1887 and in the summer months of 1888, and were noted on the Richmond, Clarence, and Evans Rivers, at Camden Haven, Cape Hawke, and Weegoolgah—this being the first spawn which occurred at the latter place during the last five or six years.

Generally, the spawn was not abundant, and was invariably confined to the leases on the lower parts of the rivers, and as a result of the scarcity of rain, did not thrive so well as it otherwise would have done.

THOS. TEMPERLEY,
Inspector, Northern Fisheries.

SOUTHERN DIVISION.

Bateman's Bay, 25 February, 1889.

I HAVE the honor to forward my report for the year 1888, on that portion of the Southern Fisheries, which has been under my charge during the year, and extending from St. George's basin to the Wagonga, River.

During the year, a great improvement is noticeable on many of the leases, particularly amongst those situated at the Clyde River and Narrawallee Creek, where the lessees have gone to considerable expense in laying down oak and free-stone on their foreshores for the purpose of collecting spat; mature oysters have been kept on the beds for producing spat, and great care has been taken in laying down, culling, and replacing on beds all under-sized oysters. Owing to this treatment most of the leases on these waters are now fairly stocked with oysters. The foreshores, which are principally mangrove and rock,

rock, are well covered with spat and young oysters, many of which will be suitable for laying down during the present year; the few leases which were taken up for speculative purposes by persons whose sole object was evidently to take all the oysters off them they could possibly get hold of, have now fortunately been transferred, and all of the leases are held by persons who have been in the oyster trade for years, and who are using their best endeavours to improve their holdings.

At the Tuross, Borang, and Durras Lakes, most of the oysters have been destroyed by an accumulation of mud and weeds caused through the mouths of these waters being closed to the sea. The leases at the Wagonga River and Tomago River have slightly improved, and several of them are now fairly stocked with oysters.

In consequence of the increased amount of interest that is now being taken by the lessees in their holdings, the future prospects of the oyster beds in the southern waters again becoming as productive as of old have much improved, and I feel confident that under similar treatment to that which they have received during the last twelve months, the supply of oysters in the course of two or three years will be increased tenfold.

I have, &c.,

GEORGE G. BENSON,
Inspector, Southern Fisheries.

Clyde River.—This river, which is the most important in the Southern Division of fisheries, has greatly improved during the year. Owing to a good spatting season the foreshores are well covered with young oysters, many of which will be suitable for laying down on fattening beds during the present year. Most of the leases have been worked in a fair manner, only mature oysters being sent to market, and care taken to leave a sufficient number to insure a supply of spat. Improvements have been made on some leases by laying down spat collectors, but, on the majority of them, this is unnecessary, as they are already supplied with natural collectors in the shape of rocky foreshores and mangroves. Most of the leases are now owned by persons who have been engaged in the oyster trade for many years, who are now utilizing the experience gained in that trade in working their leases, and are doing all that lies in their power to make oyster culture a success. In most cases their efforts have been crowned with success; but unfortunately, in a few instances, oysters which have been laid down on what at the time was a hard bottom have been destroyed by an accumulation of mud. On lease No. 105, belonging to Mr. Gibbins, a great number were lost in this way. 441 bags of oysters were shipped during the year. Most of the leases are fairly stocked with oysters suitable for spatting; and the mangroves and rocks lining the foreshores are well covered with spat. Under these circumstances I consider that there are fair prospects of oyster culture at the Clyde River becoming a success, and am satisfied that if the same care continues to be taken by the lessees the quantity of oysters will gradually increase, and that in a few years it will again become one of the largest oyster producing waters in the Colony.

Cullendulla Creek.—This creek is unsuitable for oyster culture, as with the exception of a few patches of hard ground the foreshores are lined with mangroves, whilst outside of these the bottom is a soft mud. Edwin Cain, who leases the greater portion of the creek, has given it a fair trial during the last three years, but without success. Creeks of this description should, I think, be reserved from lease and kept for producing spat. Leases at Square Head, which is situated near the mouth of the creek, are well stocked with spat. Oysters on these leases, however, never attain a marketable size, owing to their exposed position and the salinity of the water in which they grow; although for flavor and condition they cannot be excelled.

Tuross and Borang Lakes.—Prior to the month of September, 1886, at which time the mouth of the Tuross River was closed by a bank of sand, the oyster beds in these waters were very prolific, and large quantities of a superior class of oysters were shipped annually to market. In consequence of the closure young oysters, with which many of the leases were stocked, were destroyed by an accumulation of mud and weeds, and now scarcely an oyster is to be seen. The mouth of the river is now only partially open, and in the absence of a flood will, in the event of heavy easterly weather, be again completely closed. At present the tide does not rise and fall more than 4 inches; and on the upper part of the river is not perceptible. No spat is showing on any of the leases excepting those situated near the mouth, which derive the benefit of what little tide there is, keeping the rocks clean and giving the spat a chance to adhere. On all of the other leases the foreshores are covered with slime to which, owing to the smooth surface presented, spat cannot adhere. Mr. Smart, who is a lessee and very old resident, states that some twenty years ago the Tuross and Borang Lakes were in as bad a condition as now, when a flood occurred which swept mud, slime, &c., to sea, leaving the bottom clean and suitable for attaching spat. Twelve months later and they were covered with young oysters. Until something similar again happens I am afraid the supply of oysters from these waters will be very limited. Forty-four bags of oysters were shipped during the year.

Narravallee Creek.—All of the lessees on this creek continue to work their leases in a satisfactory manner, and have made and are still making great improvements by laying down young oysters in water averaging about 3 feet in depth at low tide, and placing stone and oak saplings on their foreshores for collecting spat. Some hundreds of yards have been improved in this manner, and it is the intention of the lessees to carry out this method throughout the whole extent of their leases. The oak saplings are placed in a horizontal position, about 12 inches apart, on that portion of the leases lying between high and low water marks, and on these the stone, principally free-stone, is placed stones which have been laid down in this manner for a period of at least twelve months become covered with barnacles and other small crustacea, to which, owing to the rough surface presented, spat can adhere. The stones which have been laid down for this portion of time are well stocked with spat, the majority of which are growing on the under portion of the stone (that resting on the oak), and so protected from the sun and frost, which are very destructive. 168 bags have been shipped to Sydney during the year, and fifteen bags sold locally, making a total of 183 bags for the year. When it is taken into consideration that the creek had been stripped of oysters by licensed dredgers a short time prior to its being leased, and that the whole area on combined leases is only 2,000 yards, the result achieved is highly creditable to the lessees, and shows what can be done by working the beds in a systematic and intelligent manner.

Wagonga River.—The oyster deposits at the Wagonga River show signs of improvement in consequence of a good fall of spat during the year. Those foreshores which are naturally suitable for affixing spat are well covered. Nothing has been done by the lessees to improve their leases beyond laying

laying down young oysters on their foreshores, which are shipped to market on arriving at a marketable size. A lessee named Stephen Canty is an exception, he having gone to considerable expense in laying down stone for collecting spat and fencing in his oysters with wire-netting to prevent the ravages of the star-fish, which are very numerous and grow to a large size. He has also laid down New Zealand oysters with partial success. They show good growth and improve in condition, but about 30 per cent. have died. The Wagonga River is unsuitable for the cultivation of oysters to any great extent, as its foreshores are very narrow, and outside of low-water mark the bottom is composed of soft mud, and in some places sand. Mud oysters are found in considerable numbers on the upper portion of the river, but are of no commercial value, owing to the difficulty in getting them to Sydney in marketable condition.

Moruya River.—Acting Assistant Inspector Sutherland, who is in charge of this river, reports that there has been absolutely nothing done towards the improvement of the leases. The majority of the lessees reside at Bateman's Bay, and I have no doubt that most of the oysters lying above low-water mark are taken by the public during their absence. During the year there has been a great scarcity of fish in the river, so much so that licensed fishermen seldom fished in it, the local market being supplied with fish caught at Coila Lake, although the fish caught there are not so wholesome, on account of the entrance to the lake being closed, which has the effect of making the fish soft and unpalatable, caused, no doubt, by the freshness of the water in which they live. The following oysters were shipped from Moruya Heads during the year:—Forty-four bags from Tuross, and forty-seven from the Moruya River.

Tomago River.—Beyond laying down a few oysters, nothing has been done to improve the leases. On lease No. 501, where mature oysters have been kept laid down for about two years, spat in considerable numbers are growing on the foreshores. On the other leases and unleased portions of the river scarcely a mature oyster is to be seen, and the quantity of spat is very limited. Eleven bags of oysters were shipped to market during the year.

Fish.

Fishing operations are confined chiefly to the limited supply of local wants. Owing to the distance from market and the inefficient steam communication, it is only during two or three of the winter months that fish can be sent to market with any prospect of their arriving in marketable condition. Fish of many descriptions, especially mullet, gar-fish, and whiting, abound in the southern waters, particularly in the lakes; but the expenses incurred for freight, commission, cartage, &c., in sending them to the Sydney market are so heavy that little is left to the fishermen to repay them for their labour.

During the year the supply of fish shipped to Sydney from Bateman's Bay was—

Fresh fish	210 baskets.
Smoked „	30 cases.
Dried „	8 bags.
Lobsters	126 cases.

Report by Inspector Smithers, 1888.

Sir,

Sydney, 19 February, 1889.

In compliance with your instructions I have the honor to submit my report of Twofold Bay District Fisheries for the year 1888; also a brief report upon Tuggerah and Lake Macquarie, and of special visits made to Penrith, Lawson, Katoomba, Shoalhaven River, Goulburn, Mudgee, and Bega, with trout fry.

As stated in previous reports the Eden District possesses large facilities for the extension of the fisheries and oyster culture industries. The experience of 1888 has not lessened the opinion. I had formed.

The entire coast line, as far north as Montague Island, for quite six months of the year, is literally fringed with vast shoals of fish, which work north towards the island from about May till August, then working southward towards Cape Howe till about November. From some unexplained cause the island seems to be a terminal point for the shoals; north of it the number to be seen is actually less than one-half. These larger shoals, which consist of fish of various kinds, are to be found between 5 and 12 miles from the shore, and nearer in shore the smaller shoals abound.

I believe that if means were taken for the capture by meshing nets of these smaller shoals, immense results would appear; but with all this abundance, which by the way is well known to the residents, there does not appear enterprise sufficient to avail of it. There is an illimitable supply of fish food lost to the public, the sole advantages accruing to the innumerable flocks of sea-birds which frequent the locality. This abundance, moreover, is not confined to the ocean waters, for all the creeks and inlets teem with fish of all kinds. I may mention one case in Wallagoot Lake, wherein 10 tons of fish were taken in one haul, and were nearly all destroyed, as the fishermen had not the means to send them to market, nor had they even an idea of curing them.

In addition, also, there awaits an industry in the crayfish capture. The capture of this excellent food is entirely neglected, though fish of 7 lb. could be secured in quantities.

I believe that trawling could be very advantageously practised between Cape Howe and Green Cape, the ground and climate being suitable.

The oyster fisheries in the Twofold Bay District have been to a great extent ruined by the applicants for oyster culture leases, and indeed by the leaseholders themselves. As a rule these people have skinned off every oyster, and have done nothing, and intend doing nothing, towards securing stock with which to perpetuate the supply. I think the defective legislation which we possess is responsible for this, and until better law is provided, requiring leaseholders to enter into a bond to maintain a proper supply of stock on their holdings, and also to prevent stealing oysters from Crown lands, an improvement may not be hoped for.

I respectfully suggest that these splendid waters, that are capable of such enormous development, should not be left uncared for.

I have also visited Lakes Macquarie and Tuggerah, and can safely say they are prosperous; and in the closed waters of these places the fish are very plentiful, showing the grand result accruing by the closing, and reflecting credit upon the officers in charge of them.

As

As an instance of closed waters, Johnson's Bay when closed was fairly alive with fish; but upon its opening for thirty days, on the expiration of and the taking effect of a fresh Proclamation, the fishermen plied their avocation with disastrous results, leaving the bay without a fish either to be seen or heard; but upon the reclosing, after a short period the fish became again plentiful. The same may be said with regard to Parramatta River, Lane Cove River, and Iron Cove. Whilst the waters are closed for the preservation of fish the open waters are being cruelly used by the Italian fishermen with their sunken nets of 1-inch mesh, and containing a large bag, of same mesh, and hauling lines of nearly 200 fathoms. These are being used continuously night and day in and about the harbour.

In conclusion, I must draw attention to an important event—the introduction of trout fry into several waters in the Colony, as far as Armidale one way, Goulburn on another, Mudgee on another, Shoalhaven River on another, and to the south to Brogo River. I cannot but express a hope that the trial will be successful, as it will be the means of stocking the rivers with a most valuable article of fish food, leaving aside the question of providing sport to the angler; and it is to be hoped that the experiment will be further continued in other rivers in the Colony.

I have, &c.,

FREDK. W. SMITHERS,

Travelling Inspector.

The Secretary, Department of Fisheries.

Report on the Fisheries, Tweed River.

Tweed Heads, 5 January, 1889.

In the fisheries under my supervision, there has not been anything particular to note during the past year. Sea mullet came in about the 23rd of March, and disappeared from the station about the 20th of June, but although none were seen about the station from June till the 21st of December, except a small shoal, I heard that they were plentiful up river all the season. There were not many seen about here, they must have come in on the night tides and passed up. Fish are plentiful in the river, principally whiting, bream, mullet, tarwhine, black fish, taylor, and jew fish, but there is only one fisherman and he does not work much, most of the fish are caught by hotelkeepers and crews of vessels for their own use. Whiting are and have been plentiful in the river for some time. The bar having been shallow I have not been able to get to the reefs, so cannot say anything about schnapper.

Seventy-one bags of oysters have been taken from leases—sixty-five shipped to Sydney, and six taken for local consumption. Some of the spat laid on Langley's lease in 1887 has got covered with sand, what is clear is growing well; several of the leases have very little on them; others a quantity of young oysters, but I do not think there will be many to ship for 1889. In collecting the oysters this year the lessees have, in lieu of putting the cullings back, laid them on deeper water leases, as the leases they were taken from were being covered with sand. I cannot say anything about spatting, only that any ballast thrown about the heads gets covered with spat in a short time; I cannot say where it comes from.

WILLIAM M'GREGOR,

Acting-Assistant Inspector of Fisheries.

The Secretary, Department of Fisheries.

Report on the Macleay River Fisheries, 1888.

Macleay River, 27 February, 1889.

THE mullet season was very good, commencing on the 12th April and lasting to the end of May. Six men with three boats have been fishing for the Sydney market, and four men with two boats for the local consumption by the river residents.

The supply during the year has been falling off in quantity. Net fishing is carried on all through the year in the Lower Macleay. All the inlets and creeks up the river are interfered with only for local requirements. I have inspected the fishing nets and found them in accordance with regulations. No leases for oyster culture has been applied for during the year.

J. A. JAMIESON,

Assistant-Inspector of Fisheries.

The Secretary, Department of Fisheries.

Report on the Nambucca River Fisheries, 1888.

Nambucca River, 1 January, 1889.

THE oyster beds were idle, as after careful examination the lessees, Messrs. Pospechal and West, decided to allow them to spell for a season or two.

I am of an opinion that the beds would be much better worked. Much larger quantities of spat were visible this season than there have been for years.

During the year four fishermen with two boats arrived and commenced fishing for schnapper, they sent two shipments away packed in ice; but discontinued the work owing to the irregularity of transit; they thus fished for the local market.

The fish are moderately plentiful, and no doubt if the steamer would continue to trade regularly more shipments will be made. The sea mullet season commenced on the 1st of May and finished on the 12th of June.

There are six fishing nets on this river of legal length and mesh.

W. J. WHAITES,

Assistant Inspector of Fisheries.

The Secretary, Department of Fisheries.

Report on the Cape Hawke Fisheries, 1888.

Forster, 20 February, 1889.

THERE has been a very fair sample of young oysters set in on the lower beds and-foreshores.

The ballast stones at the heads in some places are covered. Oysters can be traced for 1½ mile up the river in patches, the cutting bed lease No. 1,431 in particular is well stocked.

Mr.

Mr. H. Woodward imported here from the 18th May to 25th of August, 191 bags of New Zealand oysters and 98 bags of very small Port Stephens oysters. The New Zealand oysters which made great improvement in a very short time, have been laid down in from 1 to 3 feet of water; the Port Stephens oysters have not yet been disturbed, there is abundance of all kinds of fish about the spits, at the heads, and up the lakes, the fishermen fish at present about the heads as the lake fish will not keep long enough to be sent to market. A Mr. Hack has lately started a smoking establishment and is turning out first class fish, during the past 12 months the exports for fish and oysters were as follows, 1,791 baskets of fish, 282 bags salt fish, 125 bags of oysters—72 bags of the oysters were New Zealand oysters.

At present there are only five boats fishing for the Sydney market, the other fishermen have given up fishing owing to the very small returns from their agents in Sydney.

On 26th April, large shoals of sea mullet came off the bar and proceeded north.

The Secretary, Department of Fisheries.

A. H. KENDALL,
Acting Assistant Inspector of Fisheries.

Report on Manning Fisheries.

Croki, Manning River, 5 January, 1889.

THERE have been imported to this river from March to September, by Mr. A. Comino, 1,437 bags of New Zealand oysters. These were laid on his lease, No. 29, South Channel. He has reshipped 418 bags to Sydney. By a careful examination of his bed I find that more than half of the oysters laid down are dead. I might state that the oysters were in a bad condition when they arrived here.

Mr. Woodward also imported seventy bags of New Zealand oysters, and laid them on one of the beds. When reshipped he obtained only forty-seven bags, thus leaving a dead loss of twenty-three bags.

Mr. Woodward also had collected off his foreshores about 100 bags of mangrove oysters, and laid them in shallow water, on lease No. 489, South Channel. These are doing well, and showing signs of spat.

A. Gylter, junior, has also collected oysters off the mangroves and cobbler's pegs fronting his lease, and laid them on his bed in shallow water, in Scott's Creek, lease No. 1,521.

James Marshall obtained a spat license, and collected twenty-two bags of mangrove oysters, which he has laid on his lease, No. 680, Luthrie Bay.

There are several others who have laid down a few bags of mangrove and foreshore oysters on their leases.

The above comprise all the improvements which have been made during last year.

The deep-water beds are still in a very poor state. There is no sign of spat settling on any of them.

Foreshore oysters have spat several times during the year, spat adhering to the cobbler's pegs and mangrove trees. Most of the spat grow to a certain size and then die off again.

As this river stands at present there is not much of a show for oysters for the next year or two.

Several leases have been cancelled, and but one applied for during the year.

Fish.

Several boats have been here fishing, and sending them to the Sydney market. This river is not adapted for fishing for Sydney market, as the steam communication is very irregular. All the men and boats but three left for other rivers. One boat is fishing for the Sydney market. The other two boats go out occasionally to supply local wants. The principal fish shipped from here are mullet, whiting, bream and flathead.

The Secretary, Department of Fisheries.

ANDREW GYLER,
Assistant Inspector.

Report on Port Stephens Fisheries, 1888.

Aliceton, Port Stephens, 28 February, 1889.

I REGRET to have to say that the oyster industry has suffered a considerable check owing to the appearance of a worm which boring into the shell leaves an opening by which the sand and mud find an entrance and smother the oyster. There are various causes assigned for this, but I think the salinity of the water caused by the absence of freshes (in the upper waters at any rate) is the principal cause. The middle beds of the Upper Karuah, have so far been the principal sufferers among the dredging grounds. The disease, however, is also bad amongst the foreshore and bank oysters all through the harbour, with the exception probably of Mr. Coote's bed round Corrie Island. As some set off against this disease, I have to report that this has been by far the best season for "spat," or "brood," that has been known for some years, more especially on the rocks and foreshores; I regret to have to say that oyster stealing has been prevalent; I obtained two convictions this year; the high price of oysters makes it worth while to run the risk, and a couple of bags pay the fine. Whilst on this subject, I must say that I have found that the issuing of licenses to gather "spat," does not work as it was intended to. Most men who have been granted a license take oysters from Crown lands, and instead of relaying them on their own areas, send them to market. The terms of the "spat" license are not complied with; in only one instance was I notified that so many bags were gathered and ready for removal. Unless caught working they evade paying the fees. On the whole the lessees have worked their beds with care and moderation. This specially applies to the holders of the valuable dredging beds of the Upper Karuah. There is an experiment being tried by Mr. Coote, of Corrie Island, which will be watched with interest, namely, the laying down of New Zealand oysters for culture on his beds.

I have issued permits from Lime Burners Creek for 2,123 bags of oysters, and there have been sent by the "Kingsley" about 624 bags—being a total of 2,747 bags for the year.

Fish have been plentiful. Mullet have been swarming in all the bays and creeks since the commencement of spring. The proclamation closing the greater portion of Port Stephens to net fishing expired on 26th August, and on the strength of its doing so several men in the upper waters got nets and gear. However, on the 29th October the proclamation was renewed in the same terms for a further period.

period of two years. The Myall and fishing grounds towards the heads have supplied all the fish forwarded to the Sydney market. Since the weather has become warm the supply has fallen off considerably owing to length of carriage. The past year has seen the formation of a Fisherman's Union in this district, which has for its ostensible object the increasing of the number of markets for sale of fish, and the guarding of fishermen's interests generally. I have through the year constantly inspected the fish on board the "Kingsley," and also the fishermen hauling. The fish were in particularly good condition, especially the mullet and whiting. No breaches of the Fisheries Act in connection with net fishing have come under my notice. There have been forwarded from this district, on an average, about 270 baskets of fish per month, or 3,240 for the year.

The Secretary, Department of Fisheries.

C. H. OTWAY,
Assistant Inspector.

Report on improvement in dredge beds, Hunter River, 1888.

Fisheries Office, Newcastle, 31 December, 1888.

I HAVE examined the oyster beds in the Hunter River with the dredge this month, and I find there are a good many young oysters set on the beds. I got as many as sixty young oysters in a haul in the bag, and in the back channel and on Yellow Tom's Point the young oysters were not bigger than a sixpence; there are also a good many on the three Spectacle Islands, and on Mud Island, and at the mouth of Mosquito Creek. I have seen a good many worms in the old shells in the bay, and some in the oysters, but I have not found any of the oysters dead on the beds, or on the foreshore. The oysters are in good condition, and I think they will spawn this month.

The Secretary, Department of Fisheries.

I have, &c.,
HENRY CURRAN.

Report on Lake Macquarie Fisheries, 1888.

Swansea, Lake Macquarie, 21 February, 1889.

7,720 BASKETS of fish were sent by fishermen from Lake Macquarie, also between 2 and 3 tons of dried fish by Chinese fishermen, being a decrease in the quantity sent in 1887, which was caused no doubt by there being a less number of fishing boats working on the lake, and also through the lake being infested with blubber during many months of the year. Fish of all description have been plentiful both in lake and channel during year. Salmon and sharks have been destructive as usual, both in channel and lake, amongst the small fish. All fish caught for the Sydney market have been forwarded *via* Newcastle by carts. There were eight fishermen prosecuted for breaches of the Fisheries Act, seven of whom were convicted and one discharged. With reference to oyster culture there is not any on Lake Macquarie.

The Secretary, Department of Fisheries.

I have, &c.,
WILLIAM BOYD.

Report on Tuggarah Lakes Fisheries, 1888.

Tuggarah Lakes, 31 December, 1888.

FISHING operations have been very extensive. The fish were principally netted in Tuggarah Lake and Budgewoi. There was not sufficient water to allow the boats to go into Manmora Lake. It has supported from twenty-six to twenty-eight men and six boats, and produced a total for the year of 1,780 baskets, consisting principally of small schnapper, mullet, gar-fish, bream, tarwhine, whiting, and other varieties.

Large quantities of schnapper have been caught off the entrance to Tuggarah Lakes.

The lakes themselves are in a very dirty state owing to a slimy weed which is very destructive to the nets. I do not expect improvement until a flood occurs.

All the creeks abound with fish, and every precaution has been taken to prevent the destruction of immature fish.

The Secretary, Department of Fisheries.

W. N. CAIN,
Assistant Inspector.

Report on Brisbane Water Fisheries, 1888.

Brisbane Water, 31 December, 1888.

FISHING operations commenced the middle of March and ended about the beginning of October.

Brisbane Water has forwarded a good supply of fish during the eight months the men were netting fish.

On an average there were from eight to twelve boats at work during these months, and about twenty-eight men. The total quantity of fish netted being 496 baskets.

I have carefully watched the natural oyster beds on this river. The lessees in many parts have improved their leases by stocking them with immature foreshore oysters, these are doing well and looking healthy. Other lessees are very careless and take no pride in cultivating there holdings.

In many cases I have stopped the shipment of oysters not being in marketable condition.

In many parts of the river the beds are in a very exhausted condition, and it will take some considerable time before they recover.

The Secretary, Department of Fisheries.

W. N. CAIN.

Report on Hawkesbury River Fisheries, 1888.

Hawkesbury River, 20 February, 1889.

OWING to the greater part of the river and tributaries being closed against net fishing, the catch of fish has necessarily been very limited, not more than from fifteen to twenty persons having found employment.

The produce was, as usual, shipped, partly by steam and partly by rail, to Sydney and suburbs, and part absorbed by local consumption.

Shoals of schnapper found their way during the summer months into Cowan Creek, but they would not take bait when shoaling. Cowan Creek abounds also in shoals of other fish,—bream, black fish, whiting, and mullet; sharks also are very numerous during the summer months.

Saleable

Saleable fish have not been so plentiful in the lower Hawkesbury River, partly owing to the continued blasting operations at the railway works; but up river, in the closed waters, far removed from any noise, mullet and other fish may be seen by tons and in large shoals.

It is now a well known fact that fish after spawning, and on the approach of winter, always desert the lower part of the river and migrate many miles up the river, where they remain until spring, unless driven down by flood. This remark applies also to all the mullet species, the bream, perch, jewfish, and prawns.

During the past year the jewfish were mostly of small size, from 1 foot to 18 inches, and were therefore very young; they were caught in large numbers by pleasure parties, but are not amongst the fish protected by the Fisheries Act.

Of the oyster fisheries I beg to state that culture, such as was contemplated by the Oyster Act of 1884, has not been realized, as scarcely any attempt in that direction has been made, owing in a great measure to the continued worm disease in oysters. The disease, it has also been noted, will attack laid oysters in preference to the natural rock oysters.

A moderate trade has also been carried on with imported oysters from New Zealand; much of this has been laid down, but if due care has not been taken in the operation it will also get the disease.

Of the localities most affected with the disease are the whole of Mooney Creek, the lower part of Berowra Creek, Marra Marra Creek, and the main river above Peat's Ferry.

The quantity of spat paid for by lessees off Crown land for the purpose of laying down was only twenty-five bags.

The total quantity of oysters sent to market, by steamboat and railway, was 2,128 bags, of which I estimate about 400 bags were New Zealand oysters, which had been laid down for fattening purposes.

I cannot close my eyes to the fact that the oyster foreshores of this fine river are getting very much denuded of oysters, both on leases and Crown land, and that only very few lessees have their leases in anything like decent order.

The great cause of the leases and shores being in this condition is through being overwrought; and that only few lessees take the requisite pains to nurture the industry.

P. SMITH,
Assistant Inspector.

The Secretary, Department of Fisheries.

Report on Port Jackson Fisheries, 1888.

Sydney, 26 February, 1889.

THERE has been a decrease of large-sized fish in the closed waters, but small size were to be seen all the year in abundance.

From the open waters of Sydney Harbour, namely, Watson's Bay, Middle Harbour, Rose Bay, and Manly Beach, fish of all kinds have been caught in good quantities and brought to market, particularly black fish, which have been very plentiful, also good numbers of mullet and bream have been got there.

In regard to schnapper, there have been few caught in the harbour, but along the coast, I have to say, they have been more plentiful during this year than for some little time before; also large jewfish have showed an increase all along the coast.

During the prawn season the catchers were very successful, both in regard to quantity and size—the prawns being the finest I have ever seen yet, and which I am sure could not be equalled.

There were a large number of men engaged prawn-catching, and, I suppose, about thirty boats.

The number of boats net-fishing varies, as they go from one district to another; sometimes there may be twenty or more boats in the harbour and other times many less. The nets in use by the fishermen are general working-nets, with a few garfish-nets, besides the prawn-nets.

In regard to oyster culture about the harbour there is little to say, as the rocks from Bradley's Head up to Ryde are almost bare of oysters; but Middle Harbour is very different, the rocks there being as thick as possible with small oysters, but too small altogether for market.

During the past year I have attended at the fish market each morning, from 4 and 5 a.m. till nearly 7 a.m. The fish supply there has been very good from all the fishing places, but during the great heat of the summer there have been quantities of fine fish condemned as unfit for food.

I wish especially to refer to the fineness of the fish, particularly the large whiting, which are brought in large quantities from the Clarence, Macleay, Richmond, and Cape Hawke. During the summer the fish, that is the greater part, are brought from those places in ice-chests.

Crayfish were very plentiful, coming to market in such quantities as to allow them being sold at a low price. Those fish are brought from Port Stephens, Cape Hawke, and Jervis Bay.

All the past year myself and the three men have kept a good watch on the closed portions of my district. The men have always assisted to the best of their power in all the different duties.

THOMAS MULHALL,
Assistant Inspector.

To the Secretary, Department of Fisheries.

Report on George's River Fisheries, 1888.

26 February, 1889.

THE closed waters of George's River have been abundantly supplied with fish. The principal quantities lay on the bars between the railway bridge and Saltpan Creek. From the early part of June to about the middle of July I saw upwards of 2,000 hampers of whiting lying on the shoals known as the moon bars; in fact, all through the winter months whiting were to be seen on all shoals in the closed waters. Mr. Wray, who collects oysters by the diving apparatus, informs me that black bream, black fish, and all kinds of ground fish are in abundance in all the deep waters he has been down in.

The closed waters of the Woronora River have also been abundantly supplied, but though not with large whiting, the river was entirely alive with small whiting, bream, and mullet. In both the above mentioned rivers, on many hauling grounds and flats, a marine vegetation has grown in the past two years, which I think forms food and shelter for fish; I put the cause of the growth to the bottom not being disturbed by fishing nets for three years.

About

About December last a great fresh was caused in the rivers by heavy rain, which drove a great number of fish from the closed waters. I saw several nice lots of sand whiting killed by fishermen about the mouth of the river after the said fresh, and all in full roe; in fact, the roe could be squeezed from them. A fisherman named Charles Smith, who caught some of these whiting, informed me that he has caught whiting full roed in December and in June; he is sure that whiting spawn twice a year, and has also served his life time at net-fishing. Since the fresh in December all fishermen have been catching nice lots of fish; in fact, as many as eighteen hampers of large sand whiting have been caught in one haul on the shores of Botany Bay. All the shores of the open waters have swarmed with mullet and small whiting since the warm weather set in.

The principal part of the oysters of George's River have been in very poor condition all through the year, very few being fit for market, the cause of this poor condition is through mud finding its way into nearly every oyster, and over this mud a very thin shell has grown. The greater portion of the New Zealand oysters which were laid down in the upper beds of the river have died. Mr. T. Wray, oyster culture lessee, brought about 300 bags of spawn, and Mr. J. H. Geddes about 100 bags from their areas in Port Hacking and laid them down on their leases in George's River, out of which one-third have died from the same cause as the New Zealand oysters.

Spawn on George's River has been very plentiful all through the year between low and high water marks, the rock being smothered with small oysters.

All the principal natural oyster beds in George's River have a coating of mud on them about 3 inches thick, which I believe was caused by the heavy freshes of 1887; it has smothered nearly all the oysters on the beds.

The total number of bags of oysters taken from the waters of my district is 138, which includes 100 bags taken from Mr. F. E. Holt's private oyster fishery at Gawley Bay, George's River.

The mangroves of Wolloware, Towra, and Jinbray contain plenty of spawn, but very few marketable oysters, as the public keep them very thin.

J. D. GRANT,
Assistant Inspector of Fisheries, George's River.

The Secretary, Department of Fisheries.

Report on Illawarra Lake Fisheries, 1888.

Unandina, 25 February, 1889.

THIS fishery continues to be very productive. During the year 8,966 baskets were taken, of which 5,189 were sent to Sydney, and 1,500 disposed of locally. This is an increase on last year's output, which is owing to the better facilities afforded by sending fish to the metropolis by the Illawarra Railway. Formerly the fisherman had to depend on steamer carriage, which only permitted their working three or four days per week. Now they can work every day, and send the result away by an afternoon train.

During the year I observed unusually large quantities of young fry of all descriptions in the lake, more particularly in the reserve parts. I attribute this increase to the judicious closing of the tributaries of the lake and areas adjacent to their mouth, against net fishing. The reserved portions are peculiarly adapted to the favourable development of young fish, and I am of opinion that their permanent closure would convert the lake into a vast natural nursery.

A peculiarity of the year was the exceptionally large quantities of flathead and schnapper, which were taken both by net and line fishing. The number of schnapper in the lake seems to increase each year. They are probably attracted from the sea by the better feeding grounds in the lake.

The sea entrance to the lake closed about the 18th of October last. Should it continue closed for any length of time, and the lake be worked by the fishermen daily, as at present, the question as to whether it would not be advisable to prohibit net fishing will have to receive consideration, as the supply of marketable fish partly depends on those sea fish which enter at each tide.

Shags of both species are very numerous, and seem to increase in spite of the rewards offered for their destruction. The reward was claimed on only 241 heads during the year.

Three persons were convicted during the year of breaches of the 18th section of the Fisheries Act, and in each case a heavy penalty was inflicted.

Minumurra River.

Fishing operations as heretofore have been confined to a couple of fisherman for local consumption.

The output of oysters for the year from the river have been very small, namely, twenty-nine bags, or 87 bushels. The oysters are in good condition. No disease exists amongst the oysters in this river.

D. W. BENSON,
Assistant Inspector.

The Secretary, Department of Fisheries.

Report on the Shoalhaven Fisheries, 1888.

Greenwell Point, Shoalhaven, 2 January, 1889.

Oysters.

THE oyster fisheries are in fair condition, there having been a good fall of spat in all the rivers, especially in Currumbene and Mooney Creeks, Jervis Bay.

In Crookhaven river about 500 bags of New Zealand oysters have been laid down on Messrs. Woodward's and Haiser's areas. Mr. Haiser has also cleaned all rubbish off his leases, Nos. 1,894 and 1,902, Crookhaven River. This is all that has been done here as regards cultivation.

A great many of the New Zealand oysters were very shaky when they arrived, consequently a large percentage died. I notice that the large oysters were the ones which suffered most.

In Broughton Creek there have been no oysters laid down this year. Most of what were laid down before died through being affected by the mud. I do not think this creek will ever be any good for oysters again, as it is very narrow, and there are too many steamers going up and down, which disturbs the spawn and does not allow it to settle on the beds. There is no spawn in this creek.

In

In Currambene and Mooney Creeks there has been a great spawn. About 100 bags were shifted to lease 759, which comprises the deep water beds. Not many oysters were sent from here during the year. The oysters in these creeks are not affected by the worm.

In Bherrewerre nothing at all has been done in connection with oyster culture, nor have any oysters been sent away. The 300 bags laid down last year on lease No. 857 Sussex Inlet, remain there, as the lessees intend giving the bed a good spell.

The reason no work has been done is that the oysters which were laid down before were nearly all destroyed by the mud, and lessees are afraid that it might affect them again. This mud is more severe on oysters laid down than on those which grow naturally on the beds.

Fish.

There has been a very good catch this year, but the fishermen complain much of their cheapness, averaging only about 5s. per basket for the greater part of the season.

Net fish have been plentiful, principally mullet.

Schnapper very scarce; they seem to have deserted their old feeding grounds.

In June, July, and August I noticed large quantities of very small fish in all the rivers. The fishermen tell me that they were very plentiful about the same time on the Sir John Young banks, 7 miles east from Crookhaven Heads.

The Secretary, Department of Fisheries.

CHARLES GORDON,
Assistant Inspector of Fisheries.

Report on Moruya River Fisheries, 1888.

Fisheries Station, Moruya, 19 February, 1889.

THERE were shipped from this river during the year ninety-one bags of oysters. There has been absolutely nothing done by the lessees of oyster areas to improve their holdings; the only object they seem to have had in view was to strip their holdings of all available oysters, and leave all improvements as regards oyster culture to nature.

The majority of the lessees being resident in Bateman's Bay, I am of opinion, from what I can hear, that they lose a great many oysters through picnic parties and others visiting their areas in their absence.

And another reason that, I have no doubt, weighs with the lessees for not improving their areas is the harbour improvements that are going on in this river at present.

There were two fishermen's licenses and three boat licenses taken out for the year; but I regret having to report there having been very few fish caught in the river.

The scarcity of fish, in my opinion, is attributable to the majority of the deep holes that existed some years back in the river having been filled up with sand; in consequence, the fish have no place of shelter or resort.

The greater part of the fish for the local market have been obtained from Lake Coila, where the fish, principally mullet, are very plentiful; but they are a coarse, inferior fish, caused, I presume, by the lake being closed at its entrance from the sea, so that, in consequence, the water is fresher than the sea water, and gives the fish a soft, fat, blubbery appearance.

The schnapper fishing outside has been very poor; occasionally there are a few to be caught, but not in any great numbers. The leather-jacket have not been as plentiful as they were in 1887.

The scarcity of schnapper in that year was attributed to the great numbers of leather-jackets about, but the schnapper do not seem to have increased with their disappearance.

The Secretary, Department of Fisheries.

A. SUTHERLAND,
Acting Assistant Inspector of Fisheries.

Report on Inland Fisheries, 1888.

Deniliquin, 5 January, 1889.

1. My experience has shown that the closing of the rivers and creeks against netting has been productive of much good, and that, in consequence, there is every evidence of an increase in young fish of the various species frequenting these streams. Up to the present time this increase is most noticeable in gold and silver perch and silver and black bream which now seem to be fast multiplying under the favourable conditions consequent on the prohibition of netting. This also applies to all other kinds of young fish in these waters.

2. Since the rivers have been proclaimed against netting I have exercised every diligence in the discharge of my duty, but have been unable to detect any case of illegal netting, and I do not consider the prohibition placed upon fishermen has had any ill-effect as regards their particular industry; for when it was found that the penalties attached to netting would be stringently enforced, these persons adopted a system of fishing by lines stretched across the rivers and creeks at various points, by which means they secured large takes of fish sufficient to fully supply their local market, and enable them also to make good profits from this export trade to Melbourne.

3. This method of fishing, and securing the larger fish, is beneficial to the smaller species, as it tends to destroy the natural enemies of the latter, namely, the large cod.

4. During a portion of the year the rivers here have been low, and this has had the effect of attracting large numbers of cormorants or shags, and these birds have no doubt destroyed a great many young fish. These cormorants also have been greatly reduced, for I have given receipts for over 17,000 of their heads during the year.

5. To summarise, I beg respectfully to state that netting is entirely suppressed in the rivers, that the conditions of the proclamation regarding the closing of the streams are being properly observed, and that altogether the fishing grounds in my district are in a healthy and satisfactory condition.

6. In conclusion, I would recommend that the proclamation for the closing of the rivers, &c., against netting of any kind be extended for a period of twelve months, which will be a further advantage in allowing the young fish to mature. It will be obvious that if this be done a large benefit to the public interest will be secured in the near future.

The Secretary, Department of Fisheries.

OSBORNE WILSHIRE,
Assistant Inspector of Fisheries.

Report

Report on Lake George Fisheries, 1888.

Bungendore, 20 February, 1889.

I HAVE to state that a decided increase of fish is discernible in the Murrumbidgee, Molonglo, and Queanbeyan Rivers. Since last August a quantity of fine cod and perch have been caught by the inhabitants of Queanbeyan with lines. I am not aware of any nets being used in these rivers, and the only fishing done is by the inhabitants of the town and district. These rivers are only now being taken interest in, as the fish are increasing. As soon as possible I intend making a special visit to the locality with the view of gaining information.

With regard to Lake George, I have little of interest to report. The first part of the year a very fair supply of fish was caught, viz.:—January, 784 lb.; February, 1,130 lb.; March, 800 lb.; April, 600 lb.; May, 550 lb.; June, July, and August, no fish were caught (these three last named months are very cold, and no fish can be caught; in fact, the fishermen do not care to engage in the avocation); September, 100 lb.; October, 410 lb.; November, 240 lb.; December, 640 lb. During the latter part of the year the water fell to a very low level, owing to the dry weather; but a very little rain in the end of December filled it up to its old level.

There were three licensed fishermen, who all complained of not being able to catch many fish; but this I still think was owing to their not having nets large enough. It was reported some time ago that in consequence of so much net fishing in the lake the supply was being exhausted; consequently I made several visits to all parts of Lake George, and found no persons using nets except those licensed, and with the appliances used I scarcely think it is so far detrimental to the supply. I may also mention that two or three perch have been caught in Lake George during the year and let go again, so as to allow them to accumulate. These fish can only be accounted for by N. Powell, Esq., of Turalla, having some three or four years ago placed a few perch in the Turallo Creek, which flows into the lake.

I am not aware of any illegal fishing being carried on, and the nets are all of the proper mesh.

FREDK. NELSON,

Senior-Constable, Acting Assistant Inspector of Fisheries.

The Secretary, Department of Fisheries.

APPENDIX B.

CENTENNIAL INTERNATIONAL EXHIBITION, MELBOURNE, 1888.

Catalogue of the Exhibits from the Department of Fisheries, New South Wales, in the General Fisheries Court.

NATURAL HISTORY SPECIMENS.

Specimens of New South Wales Fishes, mounted and in spirits:—

SPECIMENS MOUNTED.

Sea Shark (<i>Carcharias macrurus</i>).	Trevally (<i>Caranx georgianus</i>).
Brown Dogfish (<i>Chiloscyllium modestum</i>).	Horse Mackerel (<i>Pelamys australis</i>).
Fiddler (<i>Trygonorhina fasciata</i>).	Sea Mullet (<i>Mugil grandis</i>).
Black Rock-cod (<i>Serranus daemeli</i>).	Fig-fish (<i>Cossyphus unimaculatus</i>).
Black-fish (<i>Girella tricuspidata</i>).	(<i>Solenognathus spinosissimus</i>).
Blue-fish (<i>Girella cyanea</i>).	Box-fish (<i>Ostracion lenticularis</i>).
Morwong (<i>Chilodactylus morwong</i>).	Porcupine fish (<i>Dicotylichthys punctulatus</i>).
Carp (<i>Chilodactylus fuscus</i>).	Murray Cod (<i>Oligorus macquariensis</i>).
(<i>Prionurus microlepidotus</i>).	

SPECIMENS IN SPIRITS.

Perch (<i>Percaletes colonorum</i>).	Black Bream (<i>Chrysophrys australis</i>).
Black Rock-cod (<i>Serranus daemeli</i>).	(<i>Chilodactylus vittatus</i>).
(<i>Plectropoma annulatum</i>).	Carp (<i>Chilodactylus fuscus</i>).
Wirrah (<i>Plectropoma ocellatum</i>).	Red Rock-cod (<i>Scorpaena cruenta</i>).
Trumpeter Perch (<i>Therapon cuvieri</i>).	Fortescue (<i>Centropogon australis</i>).
(<i>Therapon unicolor</i>).	(<i>Plesiops bleekeri</i>).
Silver Billy (<i>Gerres ovatus</i>).	(<i>Pempheris compressus</i>).
Murray Cod (<i>Oligorus macquariensis</i>).	Jew-fish (<i>Sciæna neglecta</i>).
(<i>Macquaria australasica</i>).	(<i>Prionurus microlepidotus</i>).
Salmon (<i>Arripis salar</i>).	Yellow-tail (<i>Caranx trachurus</i>).
(<i>Apogon fasciatus</i>).	Samson-fish (<i>Seriola hippos</i>).
Red Bullseye (<i>Priacanthus macracanthus</i>).	Dart (<i>Trachynotus russellii</i>).
(<i>Chatodon strigatus</i>).	Horse Mackerel (<i>Pelamys australis</i>).
(<i>Chelmo truncatus</i>).	Sand Whiting (<i>Sillago maculata</i>).
Red Mullet (<i>Hypeneichthys porosus</i>).	Trumpeter (<i>Sillago ciliata</i>).
(<i>Hypeneus signatus</i>).	(<i>Batrachus dubius</i>).
(<i>Haplodactylus lophodon</i>).	Frog-fish (<i>Antennarius striatus</i>).
Tarwhine (<i>Chrysophrys sarba</i>).	Sand Flathead (<i>Platycephalus arenarius</i>).

SPECIMENS

SPECIMENS IN SPIRITS—continued.

Flathead (<i>Platycephalus fuscus</i>).	Flounder (<i>Pseudorhombus multimaculatus</i>).
Red Flathead (<i>Platycephalus cirrhonus</i>).	(<i>Ammotretis adpersus</i>).
(<i>Trigla mulhali</i>).	(<i>Solea microcephala</i>).
Flying Gurnard (<i>Trigla polyommata</i>).	(<i>Solea macleayana</i>).
Pike (<i>Sphyræna obtusata</i>).	(<i>Pardachirus pavoninus</i>).
Sea Mullet (<i>Mugil grandis</i>).	Sole (<i>Synaptura nigra</i>).
Flat-tail (<i>Mugil peronii</i>).	(<i>Plagusia unicolor</i>).
Lake Mullet (<i>Agonostoma lacustris</i>).	Catfish (<i>Cnidogobius lepturus</i>).
Pipe-fish (<i>Fistularia serrata</i>).	(<i>Saurus myops</i>).
(<i>Parma squamipinnis</i>).	Long Tom (<i>Belone gavioloides</i>).
(<i>Heliastes immaculatus</i>).	Sea Garfish (<i>Hemirhamphus intermedius</i>).
(<i>Labrichthys laticlavus</i>).	River Garfish (<i>Hemirhamphus regularis</i>).
(<i>Labrichthys gymnogenis</i>).	Maray (<i>Clupea sagax</i>).
Butterfly fish (<i>Heteroscarus castelnavii</i>).	Herring (<i>Clupea hypselosoma</i>).
(<i>Olistherops cyanomelas</i>).	(<i>Ichthyocampus cinctus</i>).
(<i>Gadopsis marmoratus</i>).	(<i>Stigmatophora argus</i>).
Ling (<i>Lotella limbata</i>).	Leather Jacket (<i>Monacanthus granulatus</i>).
Flounder (<i>Pseudorhombus russellii</i>).	Toadfish (<i>Tetrodon hamiltoni</i>).

EDIBLE MOLLUSCA, OYSTERS.

(*Ostrea glomerata*, *O. virescens*, *O. subtrigona*, Sow., *O. mordax*, Gld. *O. edulis*, var. *purpurea*, Hanley.)
A LARGE collection of oysters, in numerous varieties, and from beds in different localities. Most of these are natural beds, very few of them formed by artificial layings; all are under lease, and more or less under cultivation.

Tweed River Oysters.

1. From G. Wells' Oyster-culture Lease, No. 1,651, Terranora Creek; dry at low tide; bottom, sandy, mud, stones, and shells.
2. From G. Wells' Oyster-culture Lease, No. 1,652, Terranora Creek; dry at half tide; bottom, sandy mud.
3. From G. Wells' Oyster-culture Lease, No. 1,298, Terranora Creek; depth of water, 2 to 8 feet; bottom, mud, stones, and shells.
4. "Cultivated Oysters," from R. Langley's Oyster-culture Lease, No. 1,692, Terranora Creek; laid down November, 1887, in 1 foot of water at low tide; bottom, hard slate, with layer of coarse sand and shells.

Richmond River Oysters.

5. "Dredge Oysters," from S. Martin's Oyster-culture Lease, No. 568, Richmond River; depth of water, 10 to 20 feet.
6. "Cultivated Oysters," from W. O. Chafe's Oyster-culture Lease, No. 410, Richmond River; depth of water, 4 to 10 feet.

Clarence River Oysters.

7. "Dredge Oysters," from A. Ross' Oyster-culture Lease, No. 64, at Lake Channel; depth of water, 6 to 20 feet.
8. "Dredge Oysters," from A. Philp's Oyster-culture Lease, No. 677, at Lake Channel; depth of water, 6 to 20 feet.
9. From foreshore at Yamba; dry at low water.

Evans River Oysters.

10. "Rock Oysters," from F. J. Gibbins' Oyster-culture Lease, No. 386, at the Iron Gates; depth of water, 9 to 16 feet.

Bellinger River Oysters.

11. "Rock Oysters," from Ballast heaps; depth of water, 2 to 8 feet.
12. "Dredge Oysters"; depth of water, 10 to 22 feet; bottom, soft slate and pipeclay.

Manning River Oysters.

13. "Dredge Oysters," from South Channel; depth of water, 5 to 20 feet; bottom, rocky and shingly.
14. "Cultivated Oysters"; laid down in the south channel in January, 1887; depth of water, 1 foot at low tide.

Cape Hawke Oysters.

15. "Rock Oysters"; depth of water, 1 to 6 feet.
16. "Cultivated Oysters," from G. Ravel's Oyster-culture Lease, No. 876, at Godwin Island; laid down in January, 1888; depth of water, 1 to 6 feet; bottom, sand and weeds.
17. From H. Woodward's Oyster-culture Lease, No. 1,431; dry at half-tide; bottom, mud and shells.

Port Stephens Oysters.

18. "Dredge Oysters," from W. Engel's Oyster-culture Lease, No. 108, Serpent River; depth of water, 6 to 18 feet.
19. "Dredge Oysters," from J. Joass' Oyster-culture Lease, No. 48, Karuah River; depth of water, 6 to 18 feet.
20. "Dredge Oysters," from J. Holdon's Oyster-culture Lease, No. 832, Karuah River; depth of water, 6 to 18 feet.
21. From R. H. D. White's Oyster-culture Lease, No. 794, Garden Island.
22. From R. H. D. White's Oyster-culture Lease, No. 1,345, Garden Island.

Hunter River Oysters.

23. From F. J. Gibbins' Oyster-culture Lease, No. 808, Spectacle Island ; dry at half-tide ; bottom, mud and shells.
24. From F. J. Gibbins' Oyster-culture Lease, No. 1,658, Spectacle Island ; dry at half-tide ; bottom, mud and shells.
25. From J. Jordon's Oyster-culture Lease, No. 1,330, Port Waratah ; dry at half-tide ; bottom, mud and shells.
26. "Rock Oysters" ; dry at half-tide.
27. From F. J. Gibbins' Oyster-culture Lease, No. 1,250, Mosquito Creek ; depth of water, 1 to 5 feet ; bottom, mud and shells.
28. "Cultivated Oysters," laid down in February, 1888, on F. J. Gibbins' Oyster-culture Lease, No. 83 Sandy Island ; depth of water, 2 to 8 feet ; bottom, shells.
29. "Cultivated Oysters," laid down in December, 1887, in the Back Channel.
30. "Rock Oysters," covered at half-tide.

Brisbane Water Oysters.

31. "Hammer-headed Oysters," from Narrara Creek.
32. "Cultivated Oysters," laid down in February, 1887, on A. Settrae's Oyster-culture Lease, No. 1,706, Cockle Creek ; in 2 feet of water at low tide.
33. "Cultivated Oysters," laid down in January, 1887, on P. Murray's Oyster-culture Lease, No. 729, Riley Island ; in 2 feet of water at low tide.
34. "Cultivated Oysters," laid down in June, 1886, on P. Murray's Oyster-culture Lease, No. 1,189, Brisbane Water ; in 1 foot of water at low tide.
35. "Rock Oysters," taken from Erina Creek, at a depth of 5 feet at low water.

Hawkesbury River Oysters.

36. "Rock Oysters," from Mooney Mooney Creek ; dry at low water.
37. "Cultivated Oysters," from James Ross' Oyster-culture Lease, No. 1,480, Mooney Mooney Creek dry at low water.
38. "Rock Oysters," from Charles Alick's Oyster-culture Lease, No. 1,565, Cowan Creek.
39. "Natural Dredge Oysters," from Browera Creek ; depth of water, 15 feet at low tide.
40. From P. Melvey's Oyster-culture Lease, No. 437, Bar Point.

George's River Oysters.

41. "Mud Oysters," from Jewfish Point, Public Oyster Reserve ; depth of water, from 23 feet ; procured by divers.
42. "Rock Oysters," from Oven Reach and Half-moon ; depth of water, from 20 feet ; procured by divers.
43. "Drift Oysters," from Oven Reach and Half-moon ; depth of water, from 20 feet ; procured by divers.
44. "Cultivated Oysters," brought from Adelaide, South Australia, and laid down at Oven Reach in June, 1885.

Shoalhaven River Oysters.

45. From G. Haiser's Oyster-culture Lease, No. 1,067, at Currambene Creek, Jervis Bay.
46. From H. Woodward's Oyster-culture Lease, No. 749, at Broughton Creek.
47. Spawn from No. 2 bed, Currambene Creek, Jervis Bay.
48. From H. Woodward's Oyster-culture Lease, No. 550, Broughton Creek.
49. "Cultivated Oysters," from H. Woodward's Oyster-culture Lease, No. 550, Broughton Creek.
50. "Cultivated Oysters," from G. Haiser's Oyster-culture Lease, No. 759, Currambene Creek, Jervis Bay.
51. "Mud Oysters," from Jervis Bay.

Lake Durras Oysters.

52. "Mud Oysters," depth of water, 4 feet.

Clyde River Oysters.

53. From Woodward & Templeman's Oyster-culture Lease, No. 34, Buckenboursa Creek.
54. From Woodward & Templeman's Oyster-culture Lease, No. 398, at Buckenboursa River ; depth of water, from 2 to 8 feet.
55. From Woodward & Templeman's Oyster-culture Lease, No. 1,311, at Buckenboursa River ; depth of water, from 2 to 8 feet.
56. From Woodward & Templeman's Oyster-culture Lease, No. 1,501, at Buckenboursa River ; depth of water, from 2 to 8 feet.
57. "Cultivated Oysters," from F. J. Gibbins' Oyster-culture Lease, No. 105 ; known as the "Bold Shore Bend" ; length, 1,000 yards ; breadth, 12 yards ; depth of water, 3 to 15 feet.
58. "Rock Oysters," from F. J. Gibbins' Oyster-culture Lease, No. 1,357 ; known as "Rocky Point Bed."

Lake Tuross Oysters.

59. "Mud Oysters" ; depth of water, 10 feet.

Kiah River Oysters.

60. "Rock Oysters" ; dry at low tide.

Womboyne River Oysters.

61. "Rock Oysters" ; depth of water, 1 to 9 feet.

BIRDS DESTRUCTIVE TO FISH.

Shag (*Graculus*).Pelican (*Pelicanus*).Diver (*Plotus*).Heron (*Ardea*).

PRESERVED

PRESERVED FISH.

These exhibits have been prepared to the order of the Department of Fisheries.

Most of the fishes were preserved during the months of August and September, 1888, having been purchased under the supervision of an officer of the Fisheries Department.

The fresh fishes comprise many of the best known food fishes, of which the mullet, bream, blackfish, and eel appear to be best adapted for this mode of preserving.

In smoked fishes—whiting, eels, blackfish, jewfish, tailor, and mullet, are exhibited.

The oysters were specially selected from beds on the Clarence River and at Cape Hawke.

Crayfishes, tinned and sun-dried, and tinned prawns, are also exhibited.

Fishes tinned for food, prepared at the Globe Preserving Works, Balmain.

FISH, PRESERVED, FOR FOOD.

Fresh Fish, tinned.	Smoked Fish, tinned.	Smoked Salted Fish.

 Edible Birds' Nests.
 Dried Oysters.
 Dried Squid.
 Dried Cuttle Fish.
 Seal Skins (tanned and raw).
 Whale Baleen.

APPENDIX C.

A New or Improved Fishing-net for use in Deep-sea Fishing.

I, LEONARD PORCELLI, of Sydney, in the Colony of New South Wales, fisherman, do hereby declare the particulars of my invention, for "A New or Improved Fishing-net for use in Deep-sea Fishing," and the manner in which the same is to be performed, to be specified, described, and illustrated in and by the following statement and the drawings attached hereto :—

This invention relates to certain improvements in the form and construction of that description of fishing-net of which the "Otter Trawl-net" is typical.

In carrying out my invention I form the body of the net in the same manner as an ordinary trawl or drag-net is formed. The mouth of the net is not, however, constructed like that of the trawl, but is peculiar in form and arrangement; and it is in this peculiarity of form and arrangement that constitutes the essence of my said invention.

I prefer that the length, overall, of the net should be about twice that of an ordinary trawl-net, and that its other dimensions should be proportionate to such length—using the trawl as a model. I prefer to devote about half the total length of the net to the mouth or head, and the remainder to the pocket or body.

The mouth of the net does not consist of a plain transverse opening like that of the trawl, but is formed with two extending jaws or wings, one at each side. These jaws or wings are so formed that when the mouth of the net is distended it assumes a shape something like that of the letter V. The wings or jaws at the lower part of the net extend further back than those at the upper part. Other improvements relate to the formation of the lips at the mouth of the net, and to the mode of attaching the mouth to the drag-rope.

But to make my invention better understood, reference is had to the accompanying sheet of drawings [Appendix A] which illustrates a part plan of a net constructed according to my said invention, and arranged in the way in which it would appear when in actual use.

A is the pocket or body of the net; BB are the jaws or wings. The length of the pocket or body from the bunt a to the lower lip at C is preferably about one-half the total length of the net. The upper lip (D) overhangs the lower lip (C) by a distance of about one-tenth the total length of the net. The jaws or wings are made in the form illustrated, and taper away to a width of about 1 foot at the forward end of the net. At each lip of the net I form two rows (E) of wide-meshed net, converging to a point in the body of the net. Through these larger meshes the weeds and *debris* scraped from the bottom are allowed to escape. The operation of trawling or dragging is carried on by two steamers or boats, to each of which one of the tow-ropes (F) is attached. I prefer that these tow-ropes should be of considerable length—in very deep water several hundred fathoms; but the length must in each case to a great extent depend upon the circumstances. The boats or steamers should be a considerable distance apart, in order that the mouth of the net will be kept well open. The mouth of the net is lashed to the leadline or drag-rope (H) and the cork-line or float-line (K) in the ordinary manner by lashing or lacing with twine (m1); and the extremities of both lines are secured to the bars (GG) at the forward end of the jaws or wings in the way illustrated in the drawing. M are sinkers of lead or other suitable material; N are cork-floats. By these arrangements the mouth of the net is kept distended under all circumstances when in use. The drag-rope or lead-line is fastened to the lower end of the bar (G), and its extremity is then brought round and fastened to the upper end of the same bar, thus forming a loop to which the tow-rope is attached. The float-line is fastened to the upper end of the bar (G), and its extremity is passed through an eye in the end of the jaw or wing (B), and is then fastened to the bar in any convenient manner. The arrangement is the same at both ends of the lines. The effect of this arrangement of the float-line is, that the net may be drawn taut or slackened out as may be required, so as to adapt it for use to suit any description of bottom, leaving it slack when passing over rocks or rough ground, and taut when passing over a smooth bottom. The lead-line and the cork-line are not set at a uniform distance from the edge of the net, but preferably to the following distances :—The lead-line 12 inches at the extremity of each jaw or wing, 18 inches at the curve between the jaw and the lip, and 4 inches at the lip; the float-line 6 inches at the extremity of the jaw or wing, 10 inches at the curve, and 3 inches at the lip.

Having now specified, described, and illustrated the particulars of my said invention, and in what manner the same is to be performed, I declare that what I claim is: In a net for use in deep-sea fishing, having a body like that of an ordinary trawl-net the combination and arrangement of the extending side-jaws or wings, wide-meshed netting let in at the lips for the purpose of allowing the *debris* to escape, upper lip overhanging the lower lip, lashing for lead-line and cork-line, and the bars at the forward extremities of the jaws or wings and the arrangement therewith of the lead-line, cork-line, and tow-rope, substantially as described.

HEPBURN AND SPRUSON,
 Agents for the Applicant.

Dated at Sydney, August 15, 1889.

APPENDIX D.

Well-fishing—Smack "Gratitude."

Dear Sir,

510, George-street, 10 May, 1889.

In compliance with your request for information in connection with the fishing industry, I hereby write you as many particulars on the various points which have come under my notice as I conveniently can.

As you are aware, I sent the "Gratitude" to sea for the first time in September last. Neither I nor my captain having had any previous experience on the coast, it follows that I had a great deal of pioneering work to do—more than I expected. I have a considerable knowledge of the business as it is carried on in England, having been connected with it during six or seven years in Great Grimsby. I had no doubt but that a vessel similar to what I had seen there would do splendidly here, so I determined, at my own risk, to build a fishing smack, after having had the advice of several practical men, coasting captains, and others, which, however, when reduced to practice, proved of very little service to me.

The "Gratitude" is a well-fishing vessel of 120 tons register, built on the model of the famous North Sea fishing smacks, only she is some 30 or 40 tons larger. Her measurements are: Over-all, nearly 90 ft.; beam, 23 ft.; depth of hold, 10 ft.; draught of water, 10 ft. She has two wells, formed by putting three very strong water-tight bulkheads athwartships about 8 ft. apart, the extreme breadth of the vessel. The water is decked down, so as to prevent wash. Connection with the water from the deck is through what we call a "well funnel," 8 x 4 ft., over which a grating is placed, to allow for the passage of light and air. Holes are bored in the vessel's bottom, through which a constant stream of water flows as she sails along. The capacity is about 8,000 gallons (33 tons). She can accommodate 2,500 snapper. She is also fitted with ice and fish rooms, lined with asbestos; has a very nice cabin, kitchen, fore-castle, sail-lockers, &c., replete with every convenience; her sails are all of specially imported canvas; steel wire rigging throughout, &c. She was built by Mr. Thos. Davis, of Terrigal, in that builder's best style, and was modelled, sparred, and canvassed for sailing, which she does remarkably well, in spite of the rush of water through the well as she moves along, 140 miles in thirteen hours having been got out of her; she sails four points from the wind.

Captain Rodgers, whom I first put in charge, had had a large experience in the trade in the old country, he having been for several seasons admiral of a North Sea fishing fleet, but he soon discovered that the Australian coast required a special knowledge, which of course I have had to pay for. The habits of the fish are different from any he had been used to, and the fish themselves differently constituted. Schnapper especially he found were a much finer strung fish, more sensitive, and full of game—different from the cod, which, for instance, has an eel-like tenacity of life; schnapper, on the other hand, is easily killed. The first great difficulty we had to contend with was that of "pricking" the fish. When fish are caught in (say) twenty or thirty fathoms of water they fill with wind through being hauled up. The question then arose where to prick them, and how deep, so as to get the wind out without hurting them. You can easily imagine that a delicate surgical operation had to be performed on a live fish, which was likely to kick as soon as he felt the pricker. Several were dissected so as to try and get the exact spot. Then there had to be discussed size and shape of pricker, the position to hold the hand when using it: whether to hold the fish under the arm, or between the knees, or lay it flat on the deck, &c. Eventually it was found that they were in the best position flat on the deck. But where to prick them was the real difficulty. Some said just behind the fin like a cod, others near the navel, others again between the two. We tried every way, and yet a large number of them died. All tried their hands at it, and all failed. Eventually it was decided to let one man do all the pricking, and though this was attended with better success, nevertheless twenty, thirty, and forty, and sometimes fifty, would die daily. We were almost at our wits' end. Three months had passed and we were not masters of the situation. During that time, however, we had one extra good trip: Out of between 1,000 and 1,100 schnapper caught we managed to bring in alive 850. They were school fish. We always noticed that the smaller they were the better they lived. These were strong, alive, and looked well. Unfortunately it was 5 o'clock on Saturday afternoon when the vessel arrived, and we thought that possibly the fish would not hurt if left in the well until the morning. We had left them in on previous voyages for some hours, although I knew that it is always advisable to take them out directly the vessel is at anchor. Still we had been so fortunate in this respect that we thought we would leave them. On one occasion several had been left in the fore well and the vessel made a trip and they were all right when she came in. So we left them until the morning. Well, would you believe it, 700 of them were dead in the morning. It was a veritable "Black-hole of Calcutta." They had been poisoned in their own dirt, there being no draught of water. The few that remained we kept for over a week. I let Captain Rogers make another trip and then made a change. I thought it was possibly something wrong on his part, especially as he had on a previous trip gone into Port Stephens and lost between 300 and 400 in a similar manner. After this, I think it was the second trip after, they were fishing at the Solitaries, in shallow water, catching large schnapper, a discovery was made. One large fellow was caught in about 4 fathoms of water, strong, alive, and they thought he did not require pricking, so they popped him into the well at once. Directly he touched the water he made a dart, thinking no doubt that he was in the open sea, and came full butt against the bulkhead. They noticed that he seemed stunned. In half an hour he was a dead fish. Here was the explanation why so many had died. I could now account for the small ones living better than the large. They were not so strong, did not swim so swiftly, consequently did not come with such a thump up against the vessel's side, and being young more easily recovered. We then made a net and put it down under the funnel to act like a buffer. It suited admirably. It effectually stopped them until they quieted down. They could then see where they were. We then loosed the strong and let them swim away. It took us nearly five months to make this discovery.

I think I mentioned to you about some chests I had had made similar to those used in England (they were 8 ft. x 5 ft. x 3 ft.) to hold the fish when they were taken out of the well. I was not at all satisfied with them. They appeared to me to be too dark. The fish seemed to fret a good deal and look pale, and when they were taken out of the water the scales fell off. A large number of them went blind as well. Their flesh too was not as firm as it might have been. So, after a number of experiments, which cost me a lot of time and money, I made what I call a cage. On a frame 25 ft. x 9 ft. x 4 ft., made of 4 in. x 4 in. pine, I stretched some galvanized wire-netting, and so formed an excellent movable pen. I fixed
oil-drums

oil-drums at the ends to buoy it so that it floated easily with two men standing on it. I found that the fish lived remarkably well in it, and am sure that I did not lose more than 5 per cent. of them since; and they looked so well, scarcely a scale coming off when they were taken out. We kept them three weeks without food practically speaking, and they looked as if they would live another three weeks. Mind you, I found it advisable to feed them; but not so much as people might think necessary—that is, judging from the condition they were in when sold.

I have introduced fishing lines similar to those used in the North Sea cod fisheries; I find they answer very well. It always was an enigma to me how men could sit fishing with such a very small line, and, at the same time, have a snood double its thickness. I know the argument is, that a small line is best to fish with, but, then, why have a thick snood? My lines are about the thickness of a lead pencil, and the snoods about the ordinary thickness. Something for the men to pull with. They have no difficulty in catching fish when they are among them, and if the hook catches the bottom the snood breaks first. The fish we have caught most of have been schnapper, but one trip they had some very fine cod, they were black in colour and somewhat shorter and thicker than the northern species. If I remember rightly there were eight or nine very fine fish one trip caught at the Solitaries; one sample measured 35 in. at the girth and weighed about a cwt. They lived well, and were strong alive when they were sold in the market, but did not realise much, 7s. 6d. being the highest price obtained—not a penny per pound. A few days before I was asked a shilling at one of the shops. I may here mention that we have taken the barbs off the hooks; we find that it does not make any difference in fishing and it is much easier to unhook the fish, especially when they are to be kept alive.

I have been very well served at the market. Prices have ranged from 15s. to 74s. per dozen, or an average of 30s. I think, though, that 10 per cent. commission and market dues is rather too much, especially when cartage has to be added. Certainly the market is too far from the water. The building seems to be a permanent structure, and I have no doubt but that it will be some years before there will be any thought of moving the market. Nevertheless, trade is rapidly growing at Woolloomooloo Bay, and the ground is getting more valuable every year; it may be advisable to move it; allow me to suggest, through you, that there could be a fine market made over the spit at Rushcutters' Bay.

You will not be surprised, after learning of the difficulties I have had to contend with, that I have not made the venture a financial success; you will be still less so when I explain what I consider has been my greatest difficulty, and one which I did not foresee, consequently did not provide for.

Two features peculiar, as far as I know, to the Australian coast, and which will have to be overcome by the aid of steam power; they are—(1st.) a southerly current; (2nd.) wind failing at sun-set. Consider the effect of these two causes on a sailing vessel. If we happen to be on a good fishing ground, with a north-easter, we soon drop to leeward off the ground. We then lose a lot of time sailing to windward. After having fished all day the wind drops about sunset, consequently we find the vessel 6 or 8 miles to the southward, in the morning, and *no wind*; a breeze springs up at (say) 10 o'clock; it is then dinner-time before the vessel is back on the fish again. This has repeatedly happened, and taken together with the fact of the captains I have had not knowing the grounds, have been the chief causes of failure. I would recommend steam, but only as an auxiliary. It would be too hot for the fish else, and the working expenses would be increased; besides, the first cost of a vessel large enough for the trade would be too great for an adequate return. Sail does very well; we can go and come in fine style. The fish are all right in the well while the vessel is underweigh. Tenison Woods, in his "Fish and Fisheries," p. 143, quoting from the Report of the Fisheries Inquiry Commission, 1880, seems to have got very near the mark. He adopts the Commissioners' statement that we want strong, roomy vessels, of from 100 to 150 tons, with moderate steam power, at least 6 knots, for going to and from the fishing grounds. I agree as to the vessel, but for different reasons: The steam is wanted *while on the ground*, and not going and coming. Page 144, he says: "The cost of such a vessel would be probably £4,000; the weekly expenditure, including £2 a week for the wages of each of the crew of twelve men and interest at 10 per cent. would be, (say), wages £24, interest 8s. and £10 for losses, wear and tear, &c., would be £42 per week. In the course of a week it is pretty certain that twelve men could catch at least 4 tons of fish, and taking these at the low estimate of £20, the weekly profit would be 100 per cent. on the outlay." He says something too about ice. In the first place iced fish does not realize the price on account of its going bad so soon; also, it loses flavour. My vessel did not cost much more than half the Commission's estimate, and the cost of an engine would be (say) only £300 extra, as against the twelve men. I have only five and a cook at a cost of £50 per month as against the Commission's estimate of between £170 and £180 per month. I am not paying wages at all now, the men are on the lay, which is far better. When I made this venture my estimate was something like this: Expenses £50 per month, 100 dozen schnapper per month, at (say) £1 net—clear money, £50, which would have paid well. There is no doubt that all I want now is an engine to drive the ship about four knots, and she then ought to bring in 100 dozen in the fortnight, which, at 30s., should do. I might mention to you an idea which struck me while I was having a conversation with a fisherman. It is this:—That some large cages, similar to those I have described, be taken close to the fishing grounds at the north and anchored; the fishermen to go out in the morning, and as they catch the fish put them in the cage. I to buy them at a price, (say) 5s. per dozen; the vessel to act as a carrier only. This idea only suggested itself to me since I sent the vessel to New Zealand, where she is now. I am not sure but that I shall put it into practice, that is if she does not do anything over there, which I am not quite sure about. I have had so much to learn and so many disappointments that I am almost disheartened. The engine, I believe, would do it. The vessel could get closer to the rocks than they can do now. Having to depend entirely on the wind there is a danger of driving ashore. She could then hold her own at night-time too; also, when fishing, she would not drive over the ground so fast. In fact it would assist in a variety of ways. I believe I am on the right track, only it is almost too much for one man to undertake unless he could devote all his time to it. You see it is, or has been, almost all pioneering work, and it has just about taken all the spirit out of me. I find, too, that I have too many things to attend to. There is my own business, home duties, and other matters, which take up a lot of my time and thought—then this fishing business; so that I have asked myself the question, "Is it worth while? I am doing very well; why not let well alone?" I have thought, "I'll sell her; she will make a good island trader, &c.," and again I have said, "Try again;" so, acting under advice from my captain, I sent her to New Zealand. He, by the way, has been fishing for some years on that coast. I saw that she was reported in the *Daily Telegraph* yesterday. There is a small paragraph in the shipping news about her.

I am sorry that I have kept you waiting for this, but I really have not been able to help it. You will see by the date that I commenced on Friday, and have not really finished now; there is something else I intended to have mentioned but have forgotten. This is about the twelfth time I have attempted to finish. I am sure you will excuse me if I am not quite as clear as I might have been. My train of thought has been broken in upon so often that I could not make out what I intended to say when I left off. I am not quite sure that I have not repeated myself; if so, you will know the reason.

In closing, I would like to say that, if this venture turns out a failure altogether, it will not be my fault. I have done my best to further the interests of my adopted country. I now send you my experience (which has cost me time and money), trusting that if I do not benefit from it others will. Australia has served me well, and I would like to show my "Gratitude" to her.

I am, yours sincerely,

Lindsay Thompson, Esq.

W. BUCKINGHAM.

APPENDIX E.

COMMISSIONERS of Fisheries for New South Wales, 1888:—

APPENDIX N.

PARTICULARS of Prosecutions for infringements of the "Fisheries Act, 1881," and "Oyster Fisheries Act, 1884," during the year 1888.

Offender's Name.	Offence.	Result of Prosecution
Robert Mitchell.....	Fishing in closed waters, Lake Illawarra.....	Fined £2 and costs; net returned.
J. Dennis	" " " ".....	Fined £2 10s. and costs; net forfeited, also licenses.
J. Duncan	" " " ".....	
George Cloughton	Fishing in closed waters of Lake Macquarie	Fined £3 and costs.
Henry Cloughton	" " " ".....	" £3 "
James Smith	" " " ".....	" £5 "
William Boyd	" " " ".....	" £5 "
James Smith	" " " ".....	" £2 "
Charles Parker	" " " ".....	" £2 "
William Smith	Having oysters in unbranded bags	" £5 and £2 2s. costs.
Thomas Thoroughgood.....	" " " ".....	Acquitted.
John Douglass	Stalling.....	Fined £2 and £1 5s. 6d. costs.
Edward Douglass	" " " ".....	" £2 and £1 3s. 6d. costs.
Thomas Douglass	" " " ".....	" £2 and £1 3s. 6d. costs.
Andrew Derwent	Fishing in closed waters, George's River.....	" £10 and costs.
John Callaghan	Stealing oysters	" £5 or two months.
John Callaghan, junior.....	" " " ".....	" £5 or one month.
W. Labone	Fishing in closed waters of Hawkesbury River	" £5 or one month.
Walter Crossland	" " " ".....	" 10s.
James White	" " " ".....	" 10s.
Wm. Labone	Fishing without a license	" 10s.
Richard Hibbs	Having undersized oysters in his possession	" 10s.
W. M'Call	Having undersized fish in his possession	" £1 and costs.
H. Allen	" " " ".....	" £1 and costs.
J. M'Allum	Fishing in closed waters	Did not appear.
C. M'Allum	" " " ".....	" " " ".....
A. Johnson.....	Fishing in closed waters; fishing with over length of net; and fishing with illegal mesh.....	Johnson only appeared, and was fined £2 for fishing with illegal mesh; 10s. for fishing in closed waters; and 10s. for fishing with over length of net.
N. Alstrom		
Michael Burns		
Fredk. Milton		
Mrs. Dennis	Obstructing in performance of duty	Charge withdrawn.
Walter Dennis	" " " ".....	" " " ".....
P. Clifford	" " " ".....	Fined £10.
Walter Dennis	Fishing with an illegal net.....	" £2.
P. Clifford	" " " ".....	" £2.
John Johns.....	" " " ".....	" £2.
R. C. Dunlop.....	Destroying fish with dynamite	" £20.
Peter Jackson.....	" " " ".....	Dismissed.
R. Dunlop	" " " ".....	Withdrawn.
Robt. Gascoigne	Fishing in closed waters.....	Dismissed.
Olaf Olson	" " " ".....	" " " ".....
Olaf Olson	Fishing with an illegal net	" " " ".....
James Latimer	Fishing without license	Fined 1s. and costs.
John Latimer	" " " ".....	" 1s. "
J. Clifford	" " " ".....	" 1s. "
James Latimer	Fishing with an illegal net.....	" £2 "
John Latimer	" " " ".....	" £2 "
J. Clifford	" " " ".....	" £2 "
W. Clifford	" " " ".....	" £2 "
Spiro Macree	Removing oysters without authority.....	Cautioned.
Spiro Macree	Taking oysters under size	Fined 1s. and costs.
Robert Hunter	Shipping oysters in unbranded bags.....	" 1s. "
John Severs	Fishing without license	" 1s. "
John Severs, junior	" " " ".....	" 1s. "
Chas. Severs	" " " ".....	" 1s. "
Demetrius Donnell	Taking oysters off Crown Lands	Oysters confiscated.
B. Higgs	Fishing without a license	Dismissed.
P. Higgs	" " " ".....	Fined £1 and costs.
J. Challoner	" " " ".....	" 10s. "
J. Wint	" " " ".....	" 2s. 6d. "
F. Wint	" " " ".....	" 2s. 6d. "
G. Gianqulani	" " " ".....	" 5s. "
H. Rush	" " " ".....	" 5s. "
H. Newman	" " " ".....	" 5s. "
— Taylor	" " " ".....	" 5s. "
— Rush	" " " ".....	" 5s. "
— Folling	" " " ".....	" 5s. "
— Lyons	Fishing in closed waters, and stalling	Dismissed. Lyons only appeared, and was fined £1 5s. and costs.
— Thompson

633 Bags at 2s.....£63 6s.

ANNUAL REPORT, NORTHERN DIVISION OF FISHERIES, 1887.

Inspector Temperley's Report.

Oysters.

THE oyster-bearing waters of the Northern Division of Fisheries have produced during the past year the total quantity of 1,223 bags of oysters, upon which royalty has been chargeable to the amount of £166 19s.

The quota contributed by each inlet, the quantities shipped to Sydney, and those locally consumed, are as follows :—

River.	Shipped to Sydney.	Locally consumed.	Royalty.
	bags	bags	£ s. d.
Clarence River	88	8	14 8 0
Richmond River	337	10	46 4 0
Manning River	362	33	54 15 0
Evans' River	134	8	18 9 0
Cape Hawke	85	12 15 0
Bellinger River	57	7 10 0
Port Macquarie.....	44	1	6 12 0
Sandon River	20	3 0 0
Woolli River	22	3 6 0
Boambee Creek.....	14
Totals	1,141	82	£166 19 0

It may be noted that the total royalty does not correspond with the amount calculated on the total 1,223 bags, at the royalty charge of 3s. per bag. This is due to the abolition of royalty on the 13th December, between which date and the end of the year 110 bags were produced, and were consequently exempt from royalty charges.

A comparison of the oyster production of this year with that of four previous years shows a serious defection in the production of the whole Northern Division. The figures are these :—

Total quantity of oysters produced ...	Year.	bags.
.....	1883	6,191
.....	1884	3,186
.....	1885	3,177
.....	1886	3,962
.....	1887	1,226

It will be seen that the production for 1887 is much less than a third of the average (4,129 bags) for the years above quoted, and less by 399 bags than the production of the Clarence River alone during last year. The year 1883, which realized 6,191 bags, was specially the licensing-boat year, when that system was in full force, and resulted in a general rush and clearing out of many of the natural beds. The system of leasing the natural oyster beds came into operation with the Amended Fisheries Act of 1884, and for that and the two following years, 1885 and 1886, it may be noticed that the quantities returned are fairly uniform. It is somewhat important to examine the causes to which this falling off in 1887 may be attributed. Whether due to climatic irregularity or mismanagement on the part of the lessees, or to a combination of these causes, it is not supposed that the mismanagement has been wilful, or mainly other than the result of inexperience or ignorance.

Being possessed of long and secure tenures, self-interest alone has caused lessees, as a whole, to take an active interest in their leases, and work them in the manner each has considered best adapted for the improvement of his holding. As affecting a few individual cases, it is, however, desirable that there should be an effective ring measurement to prevent the shipment of young undersized oysters by any lessees willing to sacrifice the future well-being of their holdings for immediate returns. Small as the return for 1887 is, it would undoubtedly have been lessened by at least one-half if many of the lessees had not carried on the work of semi-cultivation, and stocked their deep water areas with immature fore-shore oysters.

Important

Important work in this respect has been carried on in the Richmond River, Manning River, Evans' River, and at Cape Hawke, but little being done in the Clarence River owing to the general scarcity of foreshore oysters in this river. In some cases the work has proved remunerative; in others it has resulted in loss. Inexperience in the selection of suitable sites upon which to deposit the small oysters has rendered the lessees' efforts fruitless, while floods and freshes have proved destructive to the work in other instances.

The principal cause of the falling off is doubtless due to the extremes which the Colony has experienced in its rainfall during the past few years. It is well known that oyster culture has been seriously affected in many oyster-bearing countries of the northern hemisphere by extremes of temperature, from which this Colony is remarkably and happily free.

In fact it may be here noted that it is the uniform temperature of the inlets of New South Wales which with, other conditions, renders almost every inlet from the northern to the southern boundary of the Colony an oyster-bearing area, and causes the oysters to spawn occasionally in winter as well as summer months.

But the rainfall forms an equally important factor in the many conditions which are required for the establishment and preservation of oyster beds.

Sufficient fresh water being required to convey nourishment to the oysters, and at the same time prevents undue salinity, and consequent growth of marine plants and animals which smother the mature oysters and prevent the attachment of spawn.

On the other hand excessive and continued rainfall proves immediately destructive.

It was in this manner the drought of 1885 and 1886 affected the oyster deposits, disturbing the usual spawning seasons and preventing the attachment of whatever spawn occurred. It was specially noticeable during this period that whatever spawn occurred only became attached above half-tide mark—the foul condition of the deep-water beds preventing its attachment below. Following upon the droughty period came the wet season of 1887 with a succession of floods and freshes. These floods were specially destructive, killing large quantities of mature oysters on the natural beds and silting over large areas of foreshore mangrove oysters in several of the northern rivers.

A heavy flood occurred in the Clarence, Richmond, Evan's, and Tweed Rivers in January, a less flood occurred on the Clarence River three weeks later, and following so closely after the first flood was most destructive to the oysters. A careful examination made by the undersigned shortly after the second flood showed that no less than eighty-four per cent. of the oysters on the fine natural beds of this river had recently died.

On the Richmond and Evans' Rivers, the beds suffered from the same excessive rainfall, but not to the same extent. It was realized by the lessees that these floods while immediately damaging to the oyster deposits had thoroughly cleared the deep water beds, leaving them clear of injurious marine vegetation and free to attach whatever spawn might occur. It was also anticipated that the rainy season would be succeeded by a spawning season. The expectation proved correct, the only drawback being that it followed too close after the floods and freshes of the first half-year and occurred during the winter months. It was general, that is, occurred in nearly all the inlets of the North Coast, the Manning River being the chief exception, but it was not by any means an abundant spawn, the result probable of its occurrence outside the usual summer months.

The young oysters became observable before the summer had fairly set in and were noticed as being attached generally in the lower portions of the rivers only. The spat was reported as being attached in the Tweed and Richmond (most northerly rivers), in July, in the Clarence River in September, in the Brunswick and Evans' Rivers in October. Additional deposits were noticed in the Clarence and Richmond Rivers in these later months, Cape Hawke was added to the list in November, and lastly the Assistant Inspector-in-Charge of Camden Haven reported in December, that a good quantity of spat had been attached in that inlet. Young oysters are also known to have shown upon the Bellinger River during some of the above mentioned periods. The only inlet of any importance in the Northern Division, which so far as known not to have participated in the spawn is the Manning River.

While the lessees in general who had taken up deep-water oyster-bearing areas, took a hopeful view of the effect of these floods, those who had later applied for shallow foreshores suitable for cultivation were discouraged by the damage done to the oyster deposits, and more especially by the quantities of silt which in many cases completely covered the foreshore oysters. Many applicants who had intended to start oyster cultivation abandoned the areas they had applied for, and the work which it was anticipated some would have entered upon of providing attachment for the spawn may be considered, so far as these rivers are concerned, still practically untried.

Fish.

With regard to fish, a very important change was made by the fishermen of the Clarence River in the shipment of fresh fish to Sydney. In previous years this work had been carried on only during the brief winter months, and was, moreover, very uncertain. The fish were shipped in ordinary baskets, and depended for their safe carriage upon the coldness of the weather during the passage down, quantities being frequently condemned. In the summer months the fishermen turned their attention chiefly to other pursuits. Occasionally they made attempts to establish a trade in preserved fish, and generally, except where the work was carried on by Chinamen, failed. In one season the sea mullet were boiled down for oil. This was also found to be an unremunerative pursuit.

The winter shipments of fresh fish in 1887 were, however, extended into the summer months by means of the refrigerating chamber of the Clarence River Company's new steamer "Electra." Ultimately the practice—previously tried in the Macleay River—was adopted of packing the fish in ice within large chests, and carrying them on the steamers decks. This mode of conveying fish has succeeded. The fish carry well in the hottest weather. Regular shipments are made by bi-weekly steamers, and the trade is fairly established.

The extensive and prolific fishing grounds of the Clarence River will continue to be regularly worked, and fishing operations grow to an important and remunerative industry. The quantity now shipped (February, 1888) amounts to 150 baskets per week—by far the greatest part consisting of the finest whiting.

The amount of ice required for their transmission amounts to close upon 5 tons per week.

The fish returns for the year are as follows :—

Clarence River	1,150 baskets.
Macleay River	2,500 „
Cape Hawke	93 „
Total...						3,743 baskets.

Although some fine prawns may be caught in the Clarence and Richmond Rivers, nothing has yet been done in the way of establishing them in the market. They do not appear to move in sufficient quantities to enable the work to be properly carried on.

No rewards have been claimed during the year in the Northern Division for the destruction of cormorants.

THOS. TEMPERLEY,
Inspector, Northern Fisheries.

Inspector Benson's Annual Report, Southern Fisheries, 1887.

Sir,

Bateman's Bay, 18 January, 1888.

I have the honor to forward my report for the year 1887, on that portion of the Southern Division of Fisheries, which is under my special supervision. I also enclose Mr. Assistant Smithers' report on the fisheries lying south of the Wagonga River.

I have much pleasure in reporting that the majority of the lessees are paying greater attention to their leases, and working them in a more systematic manner. On many of the leases large numbers of mature oysters have been kept for a considerable time, the spat from which has set on the adjoining foreshores. In several cases spat collectors have been placed consisting generally of stone, and these are fairly well covered with spat. Many of the leases are naturally provided with spat collectors in the shape of rocky foreshores and mangroves, which, excepting in cases where oysters have been laid down near them, are but poorly stocked with spat.

The supply of marketable oysters from the various waters throughout the fishery has fallen off to a considerable extent during the year. Several reasons can be given for this, the principal of which are :

1. Several of the lessees have large numbers of marketable oysters on their leases.
2. In the year 1884, when the new Oyster Fisheries Act came into force, the foreshores of many of the southern waters were well stocked with oysters, which only required to be laid down for twelve or eighteen months to become marketable. Most of these oysters were shipped in the years 1885 and 1886.
3. Oyster spawning during the last four years has occurred only to a moderate extent throughout the fisheries. Most of the leases are now held by men who have been engaged in the oyster trade for many years, and who seem determined to give oyster culture a fair trial.

I am of opinion that a good fall of spat is now the only thing required on many of the southern waters to make oyster culture a success.

I have, &c.,

GEORGE G. BENSON,
Inspector, Southern Fisheries.

Berara Creek is situated about 16 miles north of Ulladulla, and is about 3 miles in length. The oyster bearing portion commences 1 mile from the mouth and extends to within a short distance of the head of the creek. The oysters are found on small patches of freestone, and are of good quality, though scarce. After a careful examination I have failed to discover any sign of spat, and am of the opinion that oysters have not spat for three or four years, as all of the oysters showing on the rocks are apparently of that age. Why there should be a good fall of spat at Narrawallee Creek, only a few miles distant, and none here, I am unable to say, but am inclined to believe that the water has become too salt for their existence. Small areas suitable for oyster culture exist, but up to the present only one lease of 100 yards has been applied for and granted.

Narrawallee Creek.—I have again the pleasure of reporting favourably of the manner in which the lessees are working their leases. As a result of their good management I found on inspection, that although some 150 bags of oysters had been sent to market during the summer months, the beds are still fairly stocked, and the mangroves and spat collectors which line the foreshores well covered with young oysters, which will have attained sufficient growth for laying down during the present year. When it is taken into consideration that the oyster bearing portion of this creek is only about 1 mile in extent, and the fact of its having been almost denuded of oysters under the old licensing system, the result is extremely satisfactory, and is a proof that it only requires judgment combined with a little practical knowledge to make oyster culture a success. Nine leases amounting to 2,000 yards have been issued. Particulars of shipments of oysters are sent direct to Sydney by the lessees.

Durras Lake.—With the exception of a few short periods, extending in one instance to a month, the mouth of the lake has been completely closed to the sea for four years. The natural beds have been almost destroyed by an accumulation of mud, slime, and weeds, the last of which completely cover the lake, making it a matter of impossibility to lay down oysters with any chance of success. One attempt was made by Mr. William Latta, who at the time held an area on sufferance, resulting in the loss of some twenty bags of oysters which he had laid down on his foreshore. The mud oysters, which are very numerous, appear to thrive in spite of everything. All the leases which were applied for have been declared void in consequence of the applicants having failed to execute and take delivery of them. I might mention that this lake was at one time considered one of the best waters in the southern division for the cultivation of oysters.

Cullendulla Creek.—Six leases for a total of 1,700 yards have been issued. Oysters of any description were very scarce when the leases were taken possession of by the lessee, but in November last I noticed a considerable quantity of spat and brood attached to the mangroves which line the foreshores. These, however, are now threatened with destruction by the weeds, which are gradually increasing in quantity. On lease No. 459 a few bags of oysters have been laid down, which, owing to the accumulation of mud necessitating frequent removal, are not doing well. Thirty bags of oysters shipped during year.

Clyde

Olyde River and Tributaries.—Notwithstanding the great falling off in the supply of oysters shipped to Sydney during the year, the prospects of the river ultimately recovering are much brighter. Many of the leases held by persons for purely speculative purposes have been transferred, and the whole of them are now held by persons who have been engaged in the oyster industry for many years, and who, from their experience, should be more likely to give oyster culture a fair trial. A splendid quality of oysters have been shipped during the year, most of which were caught by divers on the deep-water beds. A large quantity of mature oysters, which I estimate at about 500 bags, have been kept on the beds for spatting purposes. Several of the leases have been improved during the year, more especially leases Nos. 187, 273, and 803, held by Mr. James Barclay, who has improved them at great labour and expense by laying down spat-collectors consisting of stone and swamp oak along his foreshores and by keeping some 200 bags of marketable oysters on his beds for spatting. Leases Nos. 105 and 1,357, owned by Mr. Frederick Gibbons, are also in splendid condition, the rocks which line the foreshores being well covered with oysters in all stages of development. Mr. Gibbons' manager informs me that from careful observation he is satisfied that, excepting in two or three of the winter months, oysters on these leases spat more or less throughout the year. On those leases adjacent to where mature oysters have been kept laid down for any considerable time I notice a moderately large quantity of spat and brood on the foreshores, whereas in places which have been denuded of oysters very little is to be seen, and in some cases none at all. In November last I examined oysters taken from the deep water on Messrs. Woodward and Templeman's leases, and supposed by Mr. Templeman to have been destroyed by worm, but failed to observe any indications which would lead to the conclusion that such had been the case. No burrows on the exterior of the shell could be detected, and there was no appearance of the small dark patches resembling blisters filled with fine mud, and in which the worm lives, which are invariably found on the inner face of the shells of oysters affected with this disease. I have no hesitation in stating that the worm which has caused such dire destruction to the oyster beds of the Hawkesbury and other northern rivers is at present unknown in the southern waters. Forty-seven leases, amounting in the aggregate to 23,968, have been issued, from which 601 bags of oysters were shipped to Sydney during the year.

Tomago River.—The lessees on this river have improved their leases by laying down mangrove oysters on their foreshores, which are showing good growth. On lease No. 501, upon which oysters have been kept laid down for two years, I notice a fair quantity of spat. On the other leases and unleased portions of the river very little is to be seen. From personal observation and from information received I am of opinion that a very limited number of oysters have spat during the last three years. Three leases, amounting to 900 yards, have been taken delivery of, from which I have been advised thirty-five bags of oysters were shipped during the year.

Turoos River and Borang Lake.—Twenty-seven leases have been granted on these waters, embracing an area of 7,300 yards. Throughout the whole of the leases very little has been done by the lessees in the way of improvement, which may be accounted for in a great measure by taking into consideration the unfavourable conditions under which they have been placed. During the greater portion of the time the leases have been in their possession the mouth of the river has been closed, causing the destruction of large numbers of oysters, more especially on those leases situated farthest from the entrance. On lease No. 19½, owned by Mr. Walter Foreman, and known as the Pages Islands, situated about 4 miles from the entrance, a great many oysters which had been laid down and were doing well, have been destroyed by the fresh. The only leases on which oysters, in any quantity, exist, are Nos. 16 and 17, situated near the mouth of the river. I also noticed quantities of spat on these two leases, which I failed to do on any other lease throughout the fishery. The mouth of the river is now open to the sea, but not sufficiently so as to allow of a good flow of tide. On the upper portion of the river the action of the tide is scarcely perceptible, whereas some 18 months since, there was a regular flow, and ebb of from 2 to 3 feet. I am of opinion that the oyster beds on these waters will never recover until the mouth of the river is so deepened as to admit of a free flow of tide. 272 bags of oysters have been shipped from these waters during the year.

Wagongo River.—Leases for 3,760 yards have been issued, and there are still several applications to be dealt with. Many of the leases applied for have been declared void in consequence of the applicants having failed to execute and take delivery of them. The lessees have paid greater attention to their leases during the year, having improved them by laying down oysters, and erecting wire-netting and stakes for preventing star-fish and other enemies of the oyster from destroying them. There has been a fair fall of spat, more especially on those foreshores adjacent to leases which have been stocked, and on which, mature oysters have been left for any considerable time. I am unable to state how many banks of oysters have been produced during the year, as particulars of shipment are sent direct to Sydney by the lessees.

Moruya River.—With the exception of a few bags of oysters laid down on lease No. 1,055, nothing has been done to improve the leases. The foreshores are almost destitute of oysters, and very little spat is to be seen. Diving operations were carried on for about three weeks in the deep water, resulting in the catch of only nine bags of oysters. Eight leases for 1,400 yards have been delivered, from which ninety-eight bags of oysters have been shipped during the year.

Inspectors Benson & Gyler's Report on the Hawkesbury River Oyster Beds.

Sir,

Sydney, 21 April, 1887.

We have the honor to forward our report on the oyster-bearing portions of the Hawkesbury River and its tributaries, which, in accordance with your instructions, we have carefully examined.

Beginning at *Mooney Creek*, which has the reputation of being the most valuable oyster-bearing water of the Hawkesbury, and where we had been informed many of the lessees had laid down large numbers of oysters on their leases, which were doing well up till the month of November last, when they were attacked by the worm. We found on examining the leases that in almost every case where oysters had been laid down the worm had nearly completely destroyed them. On lease No. 144 the lessee had improved his holding by paving the foreshore with stone between high and low water marks, and then laying oysters on it. The mud, however, has accumulated on the paving to a depth of from 2 to 6 inches, and at least one-half of the oysters have been killed by mud and worm. We found only five leases in this creek, on which oysters had been laid, free from worm, viz., Nos. 1,654, 1,243, 1,698, 1,462; and a lease on the north-west point of Snake Island, owned by S. Cole. On Nos. 1,654 and 1,243 the bottom

is

is a nice gravel, only slightly intermixed with mud; and to this clean bottom, and to the set of the tide, we ascribe the absence of the worm. Nos. 1,698, 1,462, and the north-west point of Snake Island, the oysters have been laid on points of land where they derive the full benefit of the tide, an advantage to which I will allude further on. The oysters growing naturally on the foreshores are entirely free from disease.

Berowra Creek.—A lease owned by Peter Melvey, at the mouth of creek, is the only one which has been improved by laying down oysters, and they are completely destroyed by worm. We found whole families of them existing in several of the oysters. Mr. Melvey informed us that he had laid down about 800 bags of oysters on his leases, and did not expect to raise fifty bags of marketable ones. The foreshores on all of the leases in this creek are of a rock formation, and well stocked with oysters apparently about twelve months of age. They are in condition during the winter months, but will not be available for market before the winter of 1888, as their growth will not be sufficient to admit of their being knocked off the rock without injury. There are no deep beds in the Hawkesbury excepting those in Berowra Creek, and they can scarcely be designated as such, for they consist merely of a few strips of shelly bottom, extending a few feet outside of low-water mark. No spat or brood has ever been observed attached to the oysters taken from them, and we are of opinion that they depend entirely on oysters forced by growth from the adjoining foreshores for a supply. In several runs of the dredge on Johnson's lease, No. 1,666, we succeeded in catching a few dozen of large-sized oysters which were entirely free from worm.

Milson Island.—Mr. R. Milson is the lessee of the whole island and has laid down oysters at the south-west corner of the island, on lease No. 162. Oysters laid at the extreme western point where a good tide runs are almost entirely free from disease, whilst those lying in still water have been almost entirely destroyed. A few undersized rock oysters exist on the other leases.

Patonga Creek.—R. Emmett is the only lessee in this creek; mangroves line the shore throughout his lease, most of the oysters on which appear to have been killed by sand, those still alive showed no sign of disease.

Porto Bay.—Young oysters on all of the leases few of which are of marketable size; no disease; shores unsuitable for oyster culture, being of soft mud. From Holterman's Lease, No. 176, in Porto Bay to Cowan Creek the rocks are smothered with oysters, many of which are, judging from their stunted appearance, very old and unsuitable for laying down. We noticed, however, growing amongst them, great numbers of young oysters showing good growth which will have no chance of improving unless removed to suitable ground. Oysters laid down on Pelican Island, Fisherman's Point, and Bar Island have been almost entirely destroyed by worm.

At Dangar and Long Islands the rocks are well covered with oysters, many of which are suitable for laying down.

Mullet Creek.—Fair quantities of oysters abound on the rocks of leases Nos. 1,391 and 1,393; but the rock is of such a hard nature, as to render it almost impossible to separate the oysters intact from the rock, they are therefore not available for commercial purposes, and are useful only for local consumption.

Remarks.—We notice that the worm in the Hawkesbury River invariably bores an entrance through the *ventral* or front margin of the shell, whereas on the Hunter, it makes its entrance at the back or *umbo* of the shell.

Most of the lessees have made what we consider a great mistake in laying down oysters on those parts of their foreshores only slightly affected by the tides, or in eddy waters, instead of, in our opinion, laying them on points or places upon which there is a good run of tide, for during our investigations we have noticed that while we found no worm on these points, the oysters in the still waters have been affected and in many cases almost eradicated.

We failed to observe any sign of a recent fall of spat throughout the fishery and believe that in the event of oysters spawning most of the foreshores are incapable of retaining it on account of the rocks and layings being covered with a deposit of tidal sediment to which, owing to the smooth surface presented they cannot adhere.

The oysters growing naturally on the foreshores show no sign of disease.

We have &c.,

GEORGE G. BENSON, Inspector, Southern Fisheries.
ANDREW GYLER, Assistant Inspector.

Assistant-Inspector Nelson's Report on Fisheries at Lake George.

Sir,

Department of Fisheries, Bungendore, 14 January, 1888.

I have the honor to submit my report on the Lake George fisheries for the year 1887. During the above period I have constantly visited all parts of Lake George, and have tried to find out the spawning season of codfish, which I think is scarcely known. However, from my observation of the Lake George cod, they must spawn between September and January, as I find during these months they are full of eggs. During the last twelve months the lake has been constantly rising, and is now almost up to its usual level as in 1880.

For the last year only two licensed fishermen have been engaged fishing, and then only half their time; and although they have very poor appliances for fishing, still they obtain large quantities of fish, which they sell readily at 6d. per pound.

With regard to the quantity of fish sent away from Lake George during the past year, I think, from my observation, it has been larger than it has been for years. During January, February, March, and April, I did not keep an exact record of the fish sent away; but to take it on an average with other months, I should say about 1,900 lb. each month.

The month of May begins to get very cold and boisterous, and very little fish are caught. About 300 lb. for May.

June, July, and August.—No fishing is done during these months; the weather is too cold and boisterous. The fish at this season of the year appear not to move about much, as they cannot be netted in any way, or the fishermen have not the proper appliances to catch them.

September,

September.—The weather begins to get warm, and a few fish are caught. I kept a record from September, and about 1,300 lb. were caught; October, about 1,792 lb.; November, about 2,016 lb.; December, very little fishing carried on—only about 650 lb. caught.

The seasons differ very much. August in some years is a warm month; then as many fish are caught as in September.

All the nets used have been legal.

I have, &c.,
FRÉDK. NELSON,
Acting Assistant Inspector of Fisheries.

Assistant-Inspector Wilshire's Report.

Sir,

Deniliquin, 2 January, 1888.

In submitting my annual report for the year 1887 on the fisheries in my district for the information of the Commissioners of Fisheries, I have the honor to report that I am convinced that a great improvement can now be observed in the increase of fish within the various rivers and creeks here, and, with the introduction of the new Act, I am confident that fish will become as plentiful as formerly, especially if the rivers and creeks are closed from netting for a couple of seasons. I have, as far as lay in my power, guarded against illegal netting, but, owing to the high floods during the last five months, I have not been able to exercise as great a supervision as I could wish for. Since the flood waters have commenced to recede I find that large quantities of small fish have been left in shallow holes in the ana branches from the main creeks, and they are now dying in hundreds, owing, I think, to the weeds decaying and the water becoming hot, and their having no escape to the deep-waters.

I have during the year prosecuted three Victorian fishermen for using unlicensed boats in the Jumudgerie Creek, and two of them named Emerson and M'Shane appeared to answer the charge at the Police Court, Deniliquin. They pleaded not guilty, but after my evidence had been taken they were fined £2 6s. 8d. each, and the other one, named Charles Tomol, who did not appear, was fined £3 6s. 8d. or fourteen days in gaol. After waiting for some two months for him to pay the fine, and not having done so, I have had a warrant issued for his arrest, but while he remains in Victoria it cannot be enforced. And it is with these Victorian fishermen that I have the greatest trouble in watching and guarding against their committing illegal acts. I have seized and have had confiscated one large bag net found set completely across the Bullatella Creek. For the year I have given receipts and vouchers for the destruction of 7,957 cormorants or shags.

There are some twelve licensed fishing boats in my district, and about twenty men are employed in fishing. But these men do not fish all the year round. Most of them during part of the year are engaged rabbit and kangaroo killing.

In conclusion I beg to enclose a paragraph from the *Pastoral Times* of the 31st ultimo.

I have, &c.,
OSBORNE WILSHIRE,
Assistant Inspector of Fisheries.

CORMORANT SCALPS.—During the year 1887 there have been 7,957 shags killed in this district, and Mr. Wilshire, the local Inspector of Fisheries, has paid out the large sum of £132 12s. 4d. for their scalps. The increase this year in the number killed is an enormous one as compared with the previous two years, there being only 1,145 scalps paid for in 1885 and 933 in 1886. The price paid is 6d. per head for the large birds and 4d. per head for the small ones, and all the heads after being passed and paid for by the inspector have to be burned in the presence of a magistrate or a senior constable. These birds have a most voracious appetite for small fish, and as many as fifty and sixty have been found in one bird. It is a coincidence that with the large destruction of the shags there is a corresponding increase in the number of fish in the rivers. This year they are unusually plentiful, and lovers of the gentle sport have many opportunities for securing such hauls as are seldom taken from the local streams by amateur fishermen.

Assistant-Inspector Mulhall's Report.

Sydney, 11 January, 1888.

Sir,

I do myself the honor to furnish you with the following report of the fisheries under my supervision for the year 1887:—

Port Jackson.—I visited the Fish Market every morning during the year (excepting Sundays) from 4 and 5 a.m. till nearly 7 a.m.; often remaining there later when necessary to do so.

During the year there was a very good supply of fish at the market, sometimes rather more than could be well disposed of; and, when such was the case, they had to be sold at a rate too small for the fisherman to gain much by them. Such an influx of fish at those times was caused by the heavy rains which we had during the year driving them down from the heads of the bays into deeper water. Also, the mullet season helped to increase the quantity, as hundreds of dozens of large sea mullet were brought to market from the various fishing places during the early part of the year.

In the beginning of last year—that is, January, February, March, and the early part of April—there was a large quantity of fish condemned as unfit for food, owing to the long distance they had to be brought during those hot months. The fish from the distant places are packed in baskets, then sent on to Sydney by steamers, and, on their arrival, are carted as soon as possible from the wharves to the Woolloomooloo Fish Market, where they are inspected and then sold.

During November and December the fish arrived in much better condition than in the early part of the year, and those from the Macleay and the Clarence have been in very good condition, owing, I believe, to being packed in ice, or brought on to their destination by a steamer with a refrigerator in her. The fish from Lake Macquarie, Port Stephens, Tuggerah Lake, and Broken Bay have arrived during those last named months all in very good order.

During the summer months the Botany fish are generally very good, on account of the nearness of that fishing place to Sydney.

All through the past year the different parts of my district, and particularly the closed waters, have been regularly visited and well watched, by myself and the boatmen generally, four or five nights each week, arriving home seldom before 3 or 4 o'clock of a morning.

In

In the early part of the year fish of small size were not plentiful in the closed waters, but towards the middle of the year they began to increase, and by the end of the year—that is, the middle of November—they had increased in such quantities that my district appeared one mass of various kinds of fish. Such a sight I had not seen for a number of years. They were in such numbers that we could have almost caught them with our hands, and as the boat moved on they almost jumped into it.

Outside the closed waters, in the open portions, fish were not so plentiful; but towards the end of December they began to scatter over the different parts of the harbour.

By the end of the year garfish had almost disappeared from the harbour, owing, no doubt, to the fresh, which did not allow the sea garfish to come in.

In reference to schnapper, I wish to say they are very scarce; but I believe there was rather an increase for the past year (in the quantity brought to market) over the preceding year. The scarcity of this favourite fish cannot well be accounted for. My opinion is that the schnapper men go too far out to sea.

Jew-fish have been more plentiful during the past year, according to the number brought to market.

In reference to the prawn season of last year, I wish to say it has been the best I have ever known. There has been a great increase in the quantity of prawns; and as regards quality and size, I am sure they have never been equalled here or elsewhere. There is generally a good quantity brought to market every morning, which brings a ready sale.

The number of fishermen, including prawn-fishers, belonging to Port Jackson is, I suppose, about seventy when all at work, but they generally go from place to place.

The number of boats is about twenty-six when all at work.

Oysters about Sydney harbour have almost disappeared, the cause of which I believe is through the picnic parties which are allowed to strip the rocks of them.

If there are any remaining in the deep water they are covered with mud, and those on the fore-shores and rocks which remain are so covered with slime that no spawn could attach to them.

I wish to add a few remarks respecting the spawning of fish. The fish spawn twice in the year, first in April and May, secondly in September and October, but owing to the changeable weather we had last year the second spawn was much later on, quite to the end of the year.

I have, &c.,

THOMAS MULHALL,

Assistant Inspector of Fisheries.

Assistant-Inspector Smith's Report.

Sir,

Hawkesbury River, 21 January, 1888.

I have the honor to forward my report on the Fisheries and Oyster Fisheries for the year 1887.

Total quantity of oysters sent to market during the past year, 2265 bags, the greater part of which were natural rock oysters. Royalty payable on the above, up to 13 December, 1887, on which date the royalty ceased by Act of Parliament, £317 11s.

Spat fees received during the year, from different lessees, on 73 bags of spat, £7 6s.

By the above figures you will observe that there has been a serious falling off in the shipments of oysters with former years.

The great item of interest, particularly to lessees, has of course been the disease in oysters, which commenced in this river during the latter part of 1886.

In three months all the laid oysters were either dead or seriously diseased, which made sale impossible; the disease eventually generally resulted in death. Oyster culture thus came to a standstill, and, I may add, remains so now. It is true several lessees have laid small quantities of spat, but it was no sooner laid than it was again attacked by worms.

The localities most marked by the disease are the upper half of Mooney Creek, for a distance of 5 miles; the main river from Peat's Ferry to Mangrove Creek, being a distance of 9 miles; Bar Island and locality; the whole of Murra Murra Creek, and all the lower part of Beroura Creek. In some localities the disease is very severe; in fact, the oysters are nearly exterminated, and the lessees have become disgusted with repeated failures.

In April, 1887, a special examination of the disease took place by experts, who found no difficulty in finding plenty of worms in the oysters; but the origin of the disease and the cure are up to now, I believe, a mystery. I beg to add that I am in hopes that the first good flood may prove to be the cure.

In the upper part of Beroura Creek rock oysters are fairly plentiful, with disease in some. The rock oysters on the main river, below Peat's Ferry, are healthy and clear of disease.

The net and line fishing during the past year have also been disappointing. In the early part of 1887 it was remarked that fish of all sorts had become very scarce in this river, in consequence of which all the waters above the railway bridge were closed against net-fishing for a term of eighteen months.

The waters thus closed against net-fishing contain an enormous area—main river, 90 miles; Mooney Creek, 15 miles; Beroura Creek, 15 miles; Mangrove Creek, 20 miles; Marra Marra Creek, 5 miles; besides other smaller creeks and numerous bays, where fish of all sorts may now be seen undisturbed possession, and in large quantities.

In the spring months Cowan Creek was again visited by shoals of schnapper and large quantities of other fish. The schnapper were seen in shoals and would not take bait, although at other times schnapper were often caught by fishing parties.

The quantity of fish sent to market during the past year, has therefore only been indifferent.

During the latter part of 1887, fish of all sorts have been more plentiful, particularly in closed waters.

Large prawn have also been very plentiful in open waters, as well as closed waters.

The number of men fishing in the lower part of the river in open waters is very uncertain; they are here one day and gone the next, perhaps to Pitt Water, or Brisbane Water, or to Sydney.

The fishing-nets used in this river are mostly a long hauling net, having a mesh of 2½ inches in the bunt, and 3 inches in the wings.

Garfish nets have also been used for the purpose of catching bait for fishing parties, which should at once be discontinued.

I have, &c.,

P. SMITH,

Assistant Inspector.

Assistant

Assistant-Inspector Cain's Report, Tuggarah Lake, 1887.

Sir,

Tuggarah Lake, 14 January, 1888.

I have the honor to report the state of the Tuggarah Lakes fisheries for the year 1887.

During eight months, from 26th of April to 22nd of December, there has been a bountiful supply of fish, principally mullet, whiting, blackfish, garfish, bream, and flathead. There has been 7,013 baskets of fish forwarded to Sydney Market by steamer.

The number of men at work the first two months on the lakes was sixty; number of boats was nineteen.

Shoals of small fish are plentiful along the foreshores, and looking healthy. There are no fish in the creeks at the present time. Owing to the late rains the creeks are quite fresh. The channel to the entrance is good; there are from 7 to 8 feet of water in it. The fish can be plainly seen in the channel making their way into the lakes. The months of February and March are the principal months for the sea mullet entering the lakes. I approve very much of the closed waters that have been proclaimed.

I have, &c.,

W. N. CAIN,

Assistant Inspector.

Assistant-Inspector Cain's Report of the Oyster Beds, Brisbane Water.

Sir,

Brisbane Water, 14 January, 1888.

I have the honor to submit the following report of the present state of the natural oyster beds in the district of Brisbane Water:—They are in good condition, and will continue so until April. The foreshore in the Kincumbe broadwater is not naturally a suitable place for cultivation on account of the soft bottom, but where ballast has been thrown overboard from vessels the oysters are good. In Woy Woy and Cockle Creek the rock oysters are in good condition.

I feel pleased in having to report that the lessees who are cultivating these oyster beds have them in good condition. There are at the present time 900 bags in marketable order. The amount of spat I collected in 71 bags, for which I received the fees, £7 6s.

I have, &c.,

W. N. CAIN,

Assistant Inspector.

Assistant-Inspector Curan's Report, Hunter River Oyster Beds, 1887.

Sir,

Fisheries Office, Newcastle, 9 January, 1888.

I have the honor to forward annual report on the state of the Hunter River beds for the past year. There have been several floods during the year, which have killed the worm. The oysters are commencing to grow on the deep-water beds in the back channel, one of the beds in the steamers' channel, and on the foreshores; mostly in the back channel. On Spectacle Islands the oysters spawned last November. There was a great number of very young oysters to be seen on the old shells on the foreshores in the back channel, Mosquito Creek, and on Spectacle Island, but very few in Fullerton Cove. Mr. Gibbins and Mr. Anderson have laid down about forty or fifty bags of bank oysters on the beds in the back channel, and on the beds in Fullerton Cove; they are all growing well, and in good condition. The last flood does not appear to have injured them as yet. I hope in a few months, with favourable weather and no big floods, to report more favourably on the state of the oyster beds. Mr. Gibbins and Mr. Anderson have two men employed in removing young oysters on their foreshores fronting their leases into deeper water.

I have, &c.,

HENRY CURAN,

Assistant Inspector, Fisheries.

Assistant-Inspector Curan's Annual Report for 1887, Hunter River Fisheries.

Sir,

Fisheries Office, Newcastle, 19 January, 1888.

I have the honor to forward my annual report on the Fisheries for the Hunter River. There have been several floods in the river during the year which have brought down large quantities of mud: this has killed a great many of the foreshore oysters; in some places the mud has settled from six inches to a foot deep, completely covering the oysters and killing them. There has been a great deal of spawn on the foreshores several times, but the freshes in the river have killed them. There is now a good crop of young oysters on the foreshore in Mosquito Creek, and back channel, and Spectacle Island, and on the stones in Mosquito Channel. There are very few young oysters to be seen about Fullerton Cove. Mr. Gibbins, and Mr. Anderson, and Mr. Harrison have laid down forty or fifty bags of foreshore oysters in the back channel beds, and beacon beds, and in Fullerton Cove beds. The oysters laid down on the back channel beds and on the beacon beds spawned, as I got young oysters growing on the old shells in the back channel, and on the beacon beds, when I was trying them with the dredge some hauls I got two and three oysters and others more. Mr. Gibbins, and Mr. Anderson, and Mr. Harrison are the only lessees who have made any efforts to improve their leases; they keep two men constantly employed cleaning with the dredge and removing spat into deeper water, so that the oysters will be always covered at low water. The freshes have killed all the disease in the old shells, the worm does now appear to be destroyed, the shells are clean, and nothing to stop the spawn from setting on the dredge beds; the oysters laid down are growing well and in good condition. The last flood does not appear to have done any harm to the laid oysters. Charles Croese, and Martin Jordan, and James Deamer have not taken up the leases they applied for. There have seventy-four bags of oysters taken from the foreshore last year for use in Newcastle. If there be no more freshes in the Hunter for a few months the oysters will set on the beds and grow; all the dredge beds are cleaner now than they have been for these last three years. There are very few marketable oysters in the river at the present time. If there should be no more floods and fine weather exist I hope to be able to report more favourably of the oyster beds at the close of this year.

With reference to the fish, the supply has not been equal to the demand, the freshes have driven all the fish from the heads of the rivers and out to sea. The flood has killed a large quantity of fish, such as bream, whiting, flathead, soles, eels, mullet, perch, and stinging ray, and the beach was at one time covered with them. I saw some flatheads 2 ft. 6 in. long dead, floating in the river after the flood in February last.

Bream

Bream, flathead, and whiting have been very scarce in the Hunter. Young jew-fish are very plentiful, in fact they are a nuisance to the fishermen, as there is no sale for them when brought into the market. There have been forty-six licensed fishing-boats and 106 licensed fishermen for the Hunter River for the year 1887. Some of these men and boats only fish in the lobster season, some at Port Stephens and some at Newcastle. There have been 3,088 baskets of fish caught last year. Prawns have been very plentiful and very large, but dull of sale. There have been as many as five and six basketfuls caught in one haul in Fullerton Cove. There have been 2,604 baskets of prawns caught in seven months, and thirty-nine dozen of lobsters. The floods have destroyed the feeding-ground by the deposit of mud. The flood last December drove all the prawns out to sea, and they have not returned yet. Young mullet are very plentiful this last week; I have seen large shoals of them from 4 to 6 inches long; they seem to be going up the river. There are three fish-dealers who get fish from Lake Macquarie every morning and sells them on the Market Wharf. Hunter River fishermen are not allowed to retail their fish on the Market Wharf unless they pay 5s. a week for a stand, and 2d. a basket for landing. I must say a fish market is very badly wanted in Newcastle. I have successfully prosecuted one fisherman for catching under-weight fish.

I have, &c.,

HENRY CURAN,

Assistant Inspector of Fisheries.

Report on the Fisheries, Port Stephens District.

Sir,

Port Stephens, 27 January, 1888.

I have the honor to submit for the information of the Commissioners of Fisheries for this Colony the following report on the condition of the fisheries in the district under my charge:—

As the oyster-fishing is the most important I shall commence with it.

It will be in your recollection that towards the close of 1886 or beginning of 1887 I reported upon the existence of a disease affecting the oysters, which bade fair, if not to exterminate the oyster, certainly to cripple that industry. I am happy now to be able to report that this disease has quite died out. There has been a great diversity of opinion as to both the cause of it and to its cessation. Men of experience have given me totally different reasons, but happily the fact remains that it no longer exists. As a rule, the oysters during the past year have been in good condition, especially those from the deep dredging beds of the Upper Karnah.

Some of the lessees have, during the latter months of the year, been giving their beds a rest, and consequently the output has not been so great as in the first portion. With one exception—which I have specially reported on—the holders of oyster areas have kept well within the spirit of the Act; and many have spent time and money in laying down oysters on their ground. From my own observation, as well as from information gathered from the oystermen, I may state that “spat” has been more plentiful during 1887 than the previous year. But I question if oyster culture will ever be properly carried out until some method of artificially hatching “spat” and laying it down is adopted.

I am sorry to have to mention that oyster stealing has been prevalent. It was principally confined however, to one locality—the North Arm. The individuals concerned in this are well known, but the difficulty of detection has been great. I am happy, however, to say that since I confiscated, on two occasions, bags I got on the beach (once the men ran into the bush, and the other time I got the men as well), the nuisance has almost entirely stopped.

This district is so large and consequently thorough supervision of it so difficult, that the wonder is that oyster stealing has not attained greater proportions. The applications to take up new ground were not as numerous as in the latter portion of 1886. Several holders of oyster ground of not much value conceived the idea of forming a company. This was done, and as a matter of course in a very short time it came to grief. A Mr. Kelly became purchaser of the company's interest and he also before long suspended operations, and the leases of the portions of the areas included have for the most part been cancelled for non-fulfilment of the covenants. On the whole, I consider the oyster industry in a healthy condition. The abolition of the royalty does not seem to have met with any particular favour, the middlemen, it is considered, reaping the benefit. Herewith is the number of bags forwarded from this district:—

	Lime Burners Creek,	Nelson's Bay.
January	65	168
February	252	302
March	175	157
April	323	206
May	218	102
June	137	74
July	184	125
August	63	41
September	67	43
October	109	111
November	54	89
December	76	132
	1,723	1,550
	1,550	

Total 3,273 bags for the district of Port Stephens,

which produced a royalty of £490 19s.

With regard to the fish, I have to report that I have observed in all the tidal waters running into Port Stephens a larger number, by a long way, than what I noticed the previous year. Except for some days after freshes, which drive the fish back into the salt water, all the rivers and creeks literally swarm with fish, principally mullet and bream. All the upper waters, extending from Wurrung Island to Flying Fox Island—a distance of over 15 miles—and also a considerable portion of the main harbour, have been closed to net-fishing for a period of two years, which expires in August next; consequently the

the fish sent away are caught entirely in the Myall, and about its mouth, and the lower portion of the harbour. Notwithstanding that the Myall is the principal fishing ground, there seems to be quite as many fish in it as in the other rivers. In going up it the other night I found the mullet in thousands. At this time of year the distance from market is a great drawback to the fishermen, as so many fish are unfit for food by the time they arrive in Sydney. Several fishermen have told me that with all their hard work and life they cannot keep out of debt; and although in the winter and cooler season they do better, yet, taking one time of the year with another, they barely make a living. It is a pity that an attempt is not made to dry and preserve the fish in the summer time, as even a small price for salted or dried fish would pay better than allowing it to go to loss in the wholesale way it does. I think that if any one with a little capital and some practical experience would start a drying establishment, he would not only make the venture pay himself, but do a material benefit to the district and help considerably a hard-working class of men. The fish sent from Port Stephens in 1887 averaged about seventy-five baskets a week, or a total of 3,900.

I have now only to mention the crayfish, which are all caught outside the Heads, the quantity shipped being 1,800 dozen for the season of six months.

I have, &c.,
C. H. OTWAY,
Assistant Inspector.

Acting Assistant-Inspector Windeyer's Report on Oysters and Fisheries at Port Macquarie for 1887.

Oysters.

NATURAL beds situated on the River Hastings, about 4 miles from its mouth, though not large in extent, were in past years extremely productive, yielding oysters of superior size and quality; but for the last eight years have been completely bare, and at the present time show no signs of recuperation, as far as can be ascertained by my limited means of observation.

The causes assigned by experts and others of this total absence of oysters from beds formerly so prolific have been various. Some have attributed it to the complete denudation of the beds by dredging; others to the continued dry weather and consequent absence of freshes, causing a deposit of slime on the stones and cultch, and preventing the adherence of the spawn. Others assert that the water became too saline for the spawn to live, and others again give a combination of these causes as the reason. To this opinion I incline, believing that the continued absence of freshes in the river is the main factor in this apparent extinction of the oysters on the natural beds.

I have gathered from old residents that at one time there were no oysters in these waters, but that the supply was originated by a vessel weatherbound depositing a cargo of oysters in the river. I have every reason to believe this to be correct; it may therefore be assumed from the enormous increase, superior size, and quality, that the conditions of these waters are highly favourable to the production and propagation of oysters.

Foreshore Oysters.

During the past year these oysters do not appear to have thriven; many localities abundantly supplied in 1885 and 1886 have become nearly extinct. I cannot trace any cause for this, unless it may be that the water was too saline.

In 1884, 1885, and 1886, quantities were taken from the foreshores and laid down by Mr. P. Cohen on his leased areas; but this did not prove successful—most of them died. I may here hazard an opinion as to this failure, though I am aware it is opposed by experts.

I have observed, heard, and read that similar failures, some of them on a large scale, have attended the laying down of foreshore oysters in various localities. The rock and mangrove oyster will not exist out of its natural habitat, that is, completely covered at high water, and as completely uncovered at low water; thus, when they are removed and placed in positions where they are constantly covered, the natural conditions of their existence are infringed. Another condition which appears to be necessary is that the oyster must not be detached. In its natural state it is always attached to some object—rocks, stones, trees, or to one another. It is true that the oyster may become habituated to these radical changes of its natural conditions and improve and propagate; but this must be a matter of time.

Spawn.

As far as my observations have extended there appears to have been a medium quantity of spawn cast during the past season; but I fail to see a corresponding supply of young oysters, which should now be of notable dimensions. This may be attributed to adverse conditions of winds and tides during spawning.

Causes of destruction.

With reference to the appearance (the first, to my knowledge) of a small shell-fish, which destroyed the young oysters, mentioned in my Monthly Oyster Returns, I find that its presence is confined to certain localities where the oysters are among rocks or stones. I have not observed that they infest the mangrove oysters; only very young oysters are attacked. I do not attach much importance to this visitation, but will report on more extended observation.

Leased Areas.

As reported in my Monthly Oyster Return, only on one lease (J. S. Dick, No. 319) have the conditions been complied with. On this the boundaries have been marked, and some trouble taken to develop on a small scale the capacity of the locality for oyster culture. On lease No. 945, Cohen and Fremlin, the boundaries have not been marked. In 1885-86 oysters were laid down on this area, with the result before-mentioned. A wall of stones has been placed on this lease to catch spawn. On all the other areas nothing whatever has been done.

Fisheries.

As by weekly reports, supply of fish of every description has been very abundant in this harbour, notably whiting.

During 1885-86 a party of licensed fishermen made large hauls of fish for curing and sending to Sydney; but, I believe, were not successful. The only netting now done is for local consumption—about 20 baskets weekly. The quantity of fish in the harbour at nearly all seasons is very large, and I fail to see why the curing for export to Sydney should not be remunerative, as I believe it is on the Macleay River.

Closing Waters.

In the event of more extensive fishing operations being carried on here, I should beg to recommend the closing of these waters from net-fishing for (say) three months—December, January, February, the spawning season for whiting, mullet, and salmon.

Deep Sea Fish.

The schnapper grounds on this coast, extending over 150 miles north and south, are, within my experience, the best in the Colony, and, I have no doubt, will in the near future be the main source of supply for the Sydney markets.

The fine red sea-weed mentioned in Commissioners' Report (page 3) did not appear here during 1887.

HENRY W. C. WINDEYER,
A.A. Inspector, Fisheries.

Assistant-Inspector M'Gregor's Report for 1887—Tweed River Fisheries.

Sir,

Tweed Heads, 24 January, 1888.

I have the honor (as requested by you) to forward report on the fisheries under my supervision.

There has not been any thing particular to note during the past year (1887). There are generally plenty of fish in the river, principally whiting, bream, tarwhine, black fish, and mullet, but not many caught, there being only one fisherman on the river. Some of the hotelkeepers have short seines, and occasionally fish for their own use. When up river I examined the nets and found them to be the proper size of mesh. Whiting were very plentiful in the lower parts of the river in the summer months; and quantities were caught by crews of vessels. Sea-mullet were not so numerous, nor so long in the river as in former years; but after sea-mullet had left the river, flat-tail mullet were very numerous for some time. Schnapper were more plentiful at the reef's off Cook's Island than in 1886.

No oysters have been taken from the leases. I have not tried any oysters from deep-water leases; but have several times tried some on the foreshores, and they opened well. There is a slimy weed on some of the leases, but there are very few oysters on those leases, they having been over worked some years past and have never recovered again.

Leases improved are Langley's and Wells', Langley having laid down 74 bags of spat on his lease, and Wells 28, besides improving the leases by placing sand stone on the edges. Neither Hunter, Smith & Brett have improved or taken oysters from their leases.

Not having a dredge I cannot tell whether there are any marketable oysters on the deep-water leases or not. There are very few on the shallow leases.

There was a quantity of oyster-spat on the foreshores near the mouth of Terranora Creek towards the end of the year; but do not know what part of the creek it came from.

I have, &c.,

WILLIAM M'GREGOR.

The Secretary Department of Fisheries.

Assistant-Inspector Grant's Report on George's River Fisheries.

Sir,

George's River Fishery, 21 January, 1888.

I have the honor to submit to you the following Report on the Fisheries of the waters under my supervision.

In George's River (closed waters), on Limekiln, Moon, Soilybottom, and Saltpan sandbars, whiting and bream abound for the greater part of the year. On and above the Moon Flats, and in all creeks as far as Rocky Reach, mullet of all descriptions were found in enormous shoals; red bream in medium quantities; river garfish numerous, but very small—none fit for market.

In the Woronora River (closed waters) on all sandbars and flats, there are school and trumpeter whiting, flat-head and bream in very large quantities; mullet and black fish in medium quantities.

Line fishers in the closed waters have been catching great quantities of whiting, flat-head, and red bream; in fact, it has been a great harvest for line fisheries, through the river being closed from net fishing. I notice if it rains heavily for two or three days, a fresh is caused, which drives great numbers of different fish from the closed waters into the open waters of George's River and Botany Bay; after the said fresh, it takes some time before you can see the great quantities of fish back in the closed waters.

Leather-jackets have been very troublesome to the net fishermen in Botany Bay and about the mouth of George's River; in fact, I saw the bunt of a garfish net almost eaten out by them whilst being hauled ashore on the south side of Botany Bay. All through the winter months prawns were caught, and are to be seen in great quantities in George's River, Botany Bay, and Cook's River; in fact, it was the greatest season ever known for prawns.

In Botany Bay, sea garfish have only been in medium quantities, more scarce than they have been for the last few years; only for the few freshes through the year, fishermen would find it very hard to live, being confined only to the mouth of George's River and Botany Bay.

I have noticed for many years that the last two months of the year fish fall off greatly in numbers about the Bay and the mouth of George's River. The cause of the scarcity is that the fish accumulate in large shoals in deep holes in the upper parts of the rivers for the purpose of travelling, which they commence about January; but, if a fresh comes, I have known them to travel at Christmas time. On and after February fish of all descriptions leave the rivers, and commence to travel along the coast from inlet to inlet till May, at which time they cease travelling, and, to the best of my opinion, are going up the river to prepare for spawning. Again, salmon, mackrel, and other coast fish are travelling in September.

The average number of licensed fishing boats engaged in the waters under my supervision is twenty-four, and fishermen sixty, and about twenty private fishing boats with nets.

George's

George's River, as almost everyone knows, is remarkable for its oysters, they being most delicious in flavour; but the quantity taken during the last year has been very limited. Many of the lessees are working diligently to improve their leases, and I think they will prosper, as the foreshores of George's River are lined with spawn, for which it has been the greatest season known for the last fifteen years. In the month of December, there were about 300 bags of spawn laid down on lease No. 510.

The collections taken from private oyster fisheries for the year is ninety-two bags of spawn from Weenee Bay, and 169 bags of marketable oysters from Gawley Bay, sent to Sydney.

Port Hacking Fishery.

In Port Hacking, small fish for the last year have been very plentiful about the upper parts, viz.—above north-west arm, and in the deep holes at the head of south-west arm; which places, I think, are the only parts in the whole of Port Hacking fit for breeding purposes; and I don't see any improvement from the closing of the whole of Port Hacking River from net fishing to what it was in previous years, because fish are plentiful in the said river in all parts one week, but the next, it is impossible to see any. Port Hacking seems to be nothing more than a place of shelter for school fish whilst travelling about the coast. In fact, there have been less schnapper caught by the line since the river has been closed than when the fishermen were continually hauling their nets in it.

In Port Hacking there are numerous oyster leases on the northern side of the river. Lessees have collected and culled 300 bags of oysters, large and small, and brought them to their leases in George's River, for growth and fattening; also, 400 bags to bring round this year. The majority of the oysters on the north shore are poor and not marketable, and never would be if left to remain in Port Hacking, as they grow in great clusters, oyster upon oyster; the underneath ones die, and so the whole bunch falls off the rocks, and what remain alive are buried or choked with sand, and also perish. The removing of the said oysters is the means of saving hundreds of bags through the year, and greatly improves oyster culture in George's River. The shores bounding the National Park have flourished greatly; in fact, since July till the latter end of November, the oysters were in the best condition they have been known to be in for many years; but are now poor again.

The National Park Trustees have taken all control over the the oysters on the shores, so that I can only give account of about 100 bags collected for the market.

I have, &c.,

J. D. GRANT,

Assistant Inspector of Fisheries, George's River.

The Chief Inspector of Fisheries, Sydney.

Assistant-Inspector Benson's Report on Fisheries of Lake Illawarra.

Sir,

Wollongong, 16 January, 1888.

I have the honor to submit the following report on the fisheries in my district to the 31st December, 1887.

Lake Illawarra.

This lake continues to be very productive in fish, although during the months of January and February fishing operations were considerably hampered by the height of the water in the lake, it being three feet above high water mark, rendering it almost impossible for hauling. In consequence of this, I recommended the fishermen to cut through the sand bar at the entrance, it being sanded up; which, after several unsuccessful attempts they succeeded in doing on the 14th February. On this date and the day following, two schools of fish worked into the lake, one of blue-nose whiting, and one of mullet (hardgut). The entrance has continued open during the year, and as yet there are no indications of its sanding up.

The supply of fish forwarded to the metropolis has been very large, when taking into consideration two causes, which, no doubt, have reduced the total thus forwarded. First, to the wonderful increase in the local supply, and second, to eight of the resident fishermen and three boats leaving this lake in April for the Tuggerah Beach Lake, to fish there for the winter months, returning here again for the summer.

The varieties of fish forwarded consisted principally of sea bream, of which some of the finest of these species which have been seen in the Sydney market for years were forwarded from this lake during the early part of this year. These fish were all full roed, but could not ascertain if they spawned in the lake; other varieties consisted of sea mullet, flathead, blackfish, mullet (hardgut), whiting, black bream, garfish, perch, squire, tarwhine, and tailor, with a small quantity of travally, and flat-tail mullet.

The tributaries and bays adjoining with the entrance to the lake, being closed for a further period of twelve months, has kept up the supply of young fish of all descriptions with which this lake is swarming. In reference to the entrance of the lake and Mullet Creek, I would strongly advise the permanent closing of these waters, without the reservations on either sides or facing these waters, and, more especially so, the entrance to the lake, in consequence of netting operations being continuously carried on when open for net fishing, thus preventing the free ingress of fish to the lake for purposes of spawning.

With reference to the local supply of fish, I have to report a wonderful increase on that of 1886. The total number of baskets locally sold being 1,838; the cause of this great increase in the supply is that there are four men constantly hawking fish through the mining centres of the Illawarra districts. Three of these men have been miners who came out on strike during the latter end of 1886, and to gain a livelihood were induced to hawk fish, which will be seen from the total number of baskets sold they have been so successful as to continue to supply the local demand.

Appended to this report is a return showing the quantities for each month of baskets of fish shipped to Sydney, *via* Wollongong and Shellharbour, for 1887.

I have, &c.,

DAVID W. BENSON,

Assistant Inspector.

The Secretary, Department of Fisheries.

Assistant

Assistant Inspector Benson's Report on Fisheries of Lake Illawarra, for 1887.

Sir,

Wollongong, 16 January, 1888.

I have the honor to submit the following report on the oyster fisheries in my district, for the year 1887:—

Minumurra River.

Two oyster culture leases have been granted during the year. The lessee who has been engaged in the oyster fisheries for many years, has gone to work in a systematic manner, by keeping a fair quantity of mature oyster on his beds, and laying down mangrove and cobbler's peg oyster and allowing them to mature thoroughly before shipping to market, also by laying spat collection.

During the month of February there was a general spawn of the deposits of oysters in this river. The lessee in consequence did not work his beds for several months.

There have been taken during the year 40 bags of oysters, the total amount of royalty being £6 collected in Sydney.

This river contains a large quantity of foreshore mangrove and cobbler's peg oysters, which have shown during the year a marked and healthy growth; there is also a fair supply of deep-bed oysters. No disease exists among the oysters in this river.

Fish.

Operations have been during the year confined to a couple of fishermen for local consumption only.

I have, &c.,

DAVID W. BENSON,

Assistant Inspector.

Inspector's Benson's Report of inspection, Ulladulla, Narrawillee, Conjola, and Berara.
